- CALAMUS** (*Ant.*) *καλάμος*. 1. A reed or pipe which was formerly used by rustics as a musical instrument. *Virg. Æcl.* 6, v. 69.
- Hos tibi dant calamos, en accipe, Muse*
Ascræo, quos ante seni; quibus ille solebat
Cantando rigidas deducere montibus ornos.
2. A pole or rod to measure with. *Cenal. de Ponder. apud Græc. Thesaur. Antiq. Roman.* tom. 11, p. 148. 3. *Calamus aucupatorius*, a rod which was used in catching hawks.—4. *Calamus scriptorius*, or, according to Apuleius, *chartorius*, a 'pen, because pens were formerly made of reeds instead of quills. For which purpose the Ægyptian reed was preferred. *Mart.* l. 14, v. 38.
- Dat chartis habiles calamos Memphisita tellus.*
- Arundo* and *calamus* are sometimes indifferently put for the same thing.
- Pers. sat.* 3, v. 11.
- Inque manus charta, nodosaque venit arundo.*
Tum queritur, crassus calamo quod pendeat humor,
Nigra quod infusa vanescat sepia lympha:
Ditatas queritur geminet quod fistula guttas.
- Cels.* l. 5, c. 28; *Apul. Florid.*; *Plin.* l. 6, c. 36; *Voss. de Art. Gram.* l. 1, c. 36; *Hugo de prim. Scrib. Orig.* c. 9; *Salmas. Exercit. Plin.* p. 917, B.
- CALAMUS** (*Bot.*) Reed, a well known plant, a species of which Dioscorides speaks under the name of the *καλάμος ἀρωματικός*, the aromatic reed, and describes it as having a viscus, astringent, and somewhat acrimonious taste. *Theoph. Hist. Plant.* l. 4, c. 12; *Dioscor.* l. 1, c. 17; *Plin.* l. 13, c. 11; *Gal. de Simpl.* l. 7; *Oribas. Med. Coll.* l. 11; *Aet. Tetrab.* l. serm. 1; *Paul. Æginet.* l. 7, c. 3.
- CALAMUS**, in the Linnæan system, a genus of plants, Class 6 *Hexandria*, Order 1 *Monogynia*.
- Generic Characters.* CAL. *perianth* six-leaved.—COR. none.—STAM. *filaments* six; *anthers* round.—PIST. *germ* roundish; *style* bifid; *stigmas* simple.—PER. *membranaceous*; *seed* one.
- Species.* The species are shrubs, and natives of the East Indies, as the—*Calamus Rotang*, seu *petræus*, *Arundo Zeylanica*, &c. *nucifera*, &c. seu *Rotang Fructus Cannæ*, &c. *Tsieru Tsierrel*, seu *Palmijuncus Calapparicus Rattan*.—*Calamus verus*, seu *Palmijuncus verus*, native of India.—*Calamus Draco*, seu *Palmijuncus Draco*, native of the East Indies.—*Calamus niger*, seu *Palmijuncus niger*.—*Calamus viminalis*, seu *Palmijuncus viminalis*, native of Java.—*Calamus rudentum*, seu *Palmijuncus albus*.—*Calamus equestris*, seu *Palmijuncus equestris*.—*Calamus Zalacca*, *Palmijuncus Zalacca*, seu *Fructus Baly*, &c. *Raii Hist. Plant.*
- CALAMUS Scriptorius** (*Anat.*) a canal at the bottom of the fourth ventricle of the brain, so called from its resem-

blance to the *calamus scriptorius*, or writing pen of the ancients.

CALAN'DO (*Mus.*) or *Caland*, an Italian word, denoting that the time of the passage over which it is written, is to be gradually diminished in quickness.

CALANDRA (*Or.*) a sort of lark.

CALAN'GIUM (*Archæol.*) or *calangre*, a challenge.

CALAN'TICA (*Ant.*) a hurl, or coil, a covering for the female head. *Cic. apud Non.* l. 14, c. 2; *Alex. Gen. Dier.* l. 5, c. 18.

CALA'PPA (*Bot.*) the *Cocos nucifera* of Linnæus.

CALA'SH (*Mech.*) an open travelling chariot.

CALASIRIS (*Ant.*) *καλασίρις*, a linen garment worn by the sacrificers. *Aristoph. in Av.*; *Herodot.* l. 2, c. 81; *Poll. Onom.* l. 8, c. 16; *Fest. de Verb. Signif.*

CALATA *comitia* (*Ant.*) a name given to the *comitia*, which was held by the appointment of the college of Pontifices, for the purpose of electing the *rex sacrorum*, and other priests, &c. Both the *comitia curiata*, and the *centuriata*, had this name, because they were *calata*, called or summoned by the lictor, or by a trumpeter. *Varro de Ling. Lat.* l. 4, c. 16; *Aul. Gell.* l. 15, c. 27.

CALATHIA'NA (*Bot.*) Calathian Violet, the *Gentiana Pneumonanthe* of Linnæus.

CAL'LATHUS (*Ant.*) a basket, or panicle, made of ozier, which was said to be of Grecian origin, and was used for holding flowers.

Virg. ecl. II. v. 45.

— tibi lilia plenis
Ecce ferunt nymphæ calathis.

Ovid. Fast. l. 4, v. 435, speaking of Proserpine,

Hæc implet lento calathos e vimine nexos.

Vitruv. l. 4, c. 1; *Serv. in Virg. Eclog.*; *Isidor. Orig.* l. 19, c. 28. 2. A vessel, or pan, for holding cheese.

Virg. Georg. l. 3, v. 400.

Quod surgente die mulsere, horisq; diurnis.
Nocte premunt; quod jam tenebris et sole cadente,
Sub lucem exportans calathis, adit oppida pastor.

Columel. l. 7, c. 8. 3. A cup. *Virg. Eclog.* 8, v. 71; *Mart. Apophoret.* 97.

CALAT'OR (*Ant.*) *κατὰ τὰ καλῆν*, an apparitor, or officer at the call of the magistrates, but more particularly of the priests, whom he attended in the sacrifices, and of whom frequent mention is made in inscriptions, as Q. CÆCILIO FEROCI CALATORI SACERDOTITH TITIALIUM FLAVIALIUM. *Plaut. Rud.* act. 2, scen. 3; *Tacit. Annal.* l. 3, c. 27; *Sueton. Gram.* c. 12; *Popm. Serv.* p. 75; *Pignor. de Serv.* p. 113.

CALATRA'VA *Knights of* (*Her.*) an ancient Spanish military order, so called from a fort of that name, and instituted by Sancho III. Their habit was a black garment with a red cross on the breast.

CALBEUS (*Ant.*) a name for the bracelets which were given to soldiers. *Fest. de Verb. Signif.*

CALCADIS (*Chem.*) White Vitriol.

CALCA'GIUM (*Ant.*) vide *Calcea*.

CALCA'NEUM (*Anat.*) *πτεῖρα*, the Heel-bone, the largest bone. *Paul. Ægin.* l. 7, c. 14.

CALCAN'THUS, the same as Vitriol.

CALCAR (*Mech.*) vide *Calcaria Fornax*.

CALCAR (*Bot.*) the Spur, a horned-shaped production of the corolla, in which honey is found. [vide *Spur*]

CALCAR (*Chem.*) a calcining furnace.

CALCAR (*Anat.*) the same as *Calcanæum*.

CALCAR (*Min.*) vide *Calcaria*.

CALCARATE (*Bot.*) *Calcaratus*, from *calcar*, a spur, spurred; an epithet for a calyx, *calcaratus calyx*, a calcarate calyx, as in *Tropæolum*—also for a corolla, *calcarata corolla*, a corolla furnished with a spur, or in the shape of a spur, as in *Larkspur*, *Antirrhinum*, &c.

CALCA'REOUS (*Min.*) the third order of the Class Earths, according to Gmelin's system, consisting principally of carbonate of lime.

The *Genera* are as follow, namely—*Creta*, Chalk, calcining in the fire, but not vitrifying.—*Tophus*, precipitated by water under water.—*Spatum*, Spar, crackling in the fire.—*Schistospatum*, a proportion of carbonic acid gas and water.—*Inolithus*, Limestone, entirely soluble in nitric acid with effervescence.—*Stalactites*, Stalactite, formed in the water by the gradual deposition of water.—*Pisolithus*, Carbonate of lime, a very small proportion of sand and oxide of iron, carbonic acid gas and water.—*Marmor*, Marble, burning into quick lime, soluble the greater part in acids.—*Suillus*, Swinestone burning into quick lime.—*Tremolites*, Tremolite, emitting a phosphorescent light in the dark when struck or rubbed.—*Stellaris*, easily melting in the fire.—*Humus*, Mould, consisting of carbonate of lime, a smaller proportion of silica, hydrogen, and carbonic acid gas, and oxyde of iron.—*Marga*, Marl, partly soluble in nitric acid with effervescence; hardening in the fire, and vitrifying in a strong heat.—*Magnesia*, Brown Spar, becoming black in the fire.—*Picrospatum*, Bitterspath; effervescing slowly with acids.—*Gypsum*, not commonly effervescing with nitric acids, and melting with difficulty in the fire.—*Hepaticus*, when rubbed giving out an odour like liver of sulphur, not effervescing with acids.—*Fluor*, not effervescing with acids, but if distilled with the mineral acids, emitting the fluoric acid gas.—*Apatites*, Phosphorite, soluble in nitric acid, melting in the fire with difficulty, emitting a yellowish-green phosphorescent light.—*Boracites*, consisting of carbonate of lime, boracic acid with a little alumina, silica, and oxide of iron, crackling in the fire, and before the blow-pipe contracting and melting into yellowish glass.

CALCARIA FORNAX (*Mech.*) a sort of calcining furnace in glass-houses.

CALCARIS *flos* (*Bot.*) a flower so called because it somewhat resembles *calcaria*, or spurs, in shape, as the Larkspur. *CALCARIS lapis* (*Min.*) Limestone.

CALCEA (*Ant.*) a causeway, from *calx*, the chalk, or stones, with which it was made; *calcearum operationes*, the work done by the adjoining tenants; and *calcagium*, the tax paid by the neighbourhood for the repair of the causeways.

CALCEARIUM (*Ant.*) an allowance made to the soldiers for their shoes. *Suet. Vespas.* c. 8; *Ulp. Leg.* 21. ff. de *Alim. et Cib. Leg.*; *Bergier de Viis Milit.* l. 4, c. 2.

CALCEDO'NIUS (*Min.*) Chalcedony, vide *Chalcedonius*.

CALCEDONY (*Min.*) *Chalcedonius*.

CALCEDONY (*Lap.*) or *Calcedon*, a defect in some precious stone, either of a foul vein, or a different colour from the rest.

CALCE'NA (*Med.*) a morbus, tartareous matter. *Parac. de Tartar.* l. 2, c. 1.

CALCEOLARIA (*Bot.*) from *calceolus*, a slipper, Slipperwort; a genus of plants, Class 2 *Diandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* one-leaved.—COR. *monopetalous*.—STAM. *filaments* two; *anthers* incumbent.—PIS. *germ* roundish; *style* very short; *stigma* bluntish. PER. *capsule* subconic; *seeds* numerous.

Species. The species are mostly annuals, as—*Calceolaria pinnata*, seu *Fagelia flavitans*, Pinnated Slipperwort, an annual, native of Peru.—*Calceolaria integrifolia*, seu *serrata*, Whole-leaved Slipperwort, native of Peru.—*Calceolaria ovata*, *dichotoma*, seu *integrifolia*, an annual, native of Peru.—*Calceolaria perfoliata*, Perfoliate Slipperwort, native of Peru.—*Calceolaria crenata*, native of Peru. But—*Calceolaria Fothergillii*, Spatula-leaved Slipperwort, is a biennial, and native of the Falkland

isles; and—*Calceolaria plantaginica*, seu *biflora*, Plantain-leaved Slipper-wort.—*Calceolaria nana*, seu *uniflora*, Dwarf Slipper-wort, are perennials.—*Calceolaria* is also the *viola calceolaria* of Linnæus.

CALCE'OLUS (*Bot.*) or *Calciolus*, Our Lady's Slipper, a species of *Alisma*.

CALCES *metallic* (*Chem.*) Metals which have undergone the process of calcination, or combustion.

CALCE'TUM (*Ant.*) vide *Calcea*.

CALCE'TUS (*Med.*) impregnated with tartareous particles; an epithet for the blood. *Parac. de Tartar.* l. 2.

CALCEUM *equinum* (*Bot.*) the herb Colt's Foot.

CALCEUS (*Ant.*) a shoe, or whatever served as a covering for the foot. The *calceus* differed from the *solea*, inasmuch as the former covered the whole foot, and the latter only the sole of the foot. The two sorts of *calcei* spoken of by the ancients are the—*Calcei lunati*, which were worn by the Patricians, so called from an ivory crescent with which they were ornamented, and the—*Calcei mullei*, red shoes, so called from their resemblance to the mullet in colour. They came up to the middle of the leg, but covered only the sole of the foot. They were first worn by the Alban kings, afterwards by the kings of Rome; but on the abolition of the monarchy they were appropriated to those who had borne a curule office. The *calceus lunatus* was otherwise called the *Lunula*. [vide *Lunula*] the *calceus mulleus*, simply *mulleus*. [vide *Mulleus*]

CALCHY'THEOS (*Chem.*) Verdigræse.

CALCHOIDEA *ossicula* (*Anat.*) the same as *Cuneiformia ossicula*.

CALCIDICUM (*Med.*) a medicine prepared of arsenic.

CALCIFRA'GA (*Bot.*) Breakstone; an epithet for the *Scopolendrium* of Linnæus. *Scrib. Larg.*

CALCIGRA'DUS (*Med.*) *πριποβάρης*, one walking, or laying a stress on the heel. *Hipp. de Artic.*; *Foes. Econom. Hippocrat.*

CALCINATION (*Chem.*) the solution of a mixed body by means of heat, or otherwise, into a powder; or, in other words, the dissolution, or corrosion, of compact bodies into their minutest parts, so that they become friable: this was formerly called *Chemical Pulverization*, now more commonly called *Oxidation*. The body so reduced was named a *calx*, in common language a *cinder*, now chemically an *Oxide*. *Calcination* is performed, or takes place, either by *actual fire*, when the combustible parts of bodies are consumed by exposure to the heat of the fire, or the sun; or by *potential fire*, that is, by the addition of some proper *menstruum*, with or without the aid of fire, which is otherwise called *Corrosion*, as when copper is calcined in spirit of Nitre. Of this description is that sort of *Calcination*, in particular, which is termed *Philosophical*, as when the horns, bones, or hoofs of animals, are suspended over boiling water, or any other liquid, until by the force of the heat they lose their mucilage, and are easily reduced to powder.

That species of Calcination which is performed by means of fire alone, or a dry *menstruum*, is termed a *dry Calcination*, as the calcinations of metallic substances, the deflagration of vegetable substances, the calcination of chalk into lime, &c. in distinction from the *Humid* or *Moist Calcination*, as the calcination of copper and lead by means of vinegar so as to procure verdigræse and ceruss. To this class belongs the calcination by means of the air, as also that of *Amalgamation*, *Fumigation*, *Detonation*, *Granulation*, *Cementation*, and *Extinction*.

Calcination is also differently denominated according to the objects to which it is applied, as *Ustion*, when applied to hartshorn, alum, and brass.—*Toasting*, when applied to rhubarb and such other substances.—*Decrepitation*, as applicable to common salt.

CALCINATOR'Y, a vessel to calcine metals in.

CALCINATION (*Chem.*) a term applied to chemical substances when calcined, as—*Calcinatum majus*, what is dulcified by chemical art and not by nature, as dulcified mercury, &c.—*Calcinatum majus Potterii*, Mercury dissolved in aqua-fortis and precipitated in salt water.—*Calcinatum minus*, what is sweet by nature without edulcoration.

to CALCINE (*Chem.*) to reduce to a powder by means of fire, or of a menstruum; a process formerly distinguished by the annexed mark. ☉

CALCIS *aqua* (*Min.*) *Calcis liquor*, seu *Calcis vivæ flores*, the solution of lime.

CALCIS *vitriolata cataplasma* (*Med.*) a cataplasm of plaster of Paris, which is applied to ulcers.

CALCIS *os* (*Ana.*) vide *Calcaneum*.

CALCITARI (*Min.*) the same as *Alcali*.

CALCITE'A (*Min.*) the same as *Vitriol*.

CALCITEO'SA (*Min.*) the same as *Lythargyrum*.

CALCITHOS (*Min.*) the same as *Ærugo Æris*.

CALCITRA'PA (*Bot.*) the *Centaurea*, &c. and the *Valeriana*, &c. of Linnæus. *Hall.*

CALCITRAPOIDES (*Bot.*) The *Centaurea Isnardi* of Linnæus.

CALCOGRAPHIST (*Mech.*) from *καλός*, brass, and *γράφω*, to write; an engraver in brass.

CALCSINTER (*Min.*) a subspecies of fibrous limestone.

CALCTUFF (*Min.*) a subspecies of fibrous lime.

CALCULARY of a pear (*Bot.*) a congeries of little hard knots dispersed through the parenchyma of the fruit, which surround the acetary or acid pulpy substance.

CALCULATION (*Arith.*) from *calculus*, (the pebble used by the ancients in calculation) the act of computing several sums by means of addition, subtraction, multiplication, division, &c.

CALCULATION (*Mil.*) the art of computing the amplitudes of shells, time of flight, projectile curve, &c.

CALCULATOR (*Arith.*) one who makes computations.

CALCULATOR (*Astron.*) a machine invented by Mr. Ferguson in the shape of an orrery, for exhibiting the motions of the earth, moon, &c.

CALCULATOR'ES (*Ant.*) accountants or slaves among the Romans, who formerly used to reckon by means of calculi, of whom mention is made in an inscription V. T. P. CÆCILIVS EMPERODIVS VI. VIR. AVG. CALCULATOR. JUSTINÆ. SALENÆ. UXORI. ET SIBI. *Ulpian. Leg. 7. ff. de Oper. Libert.*; *Modestin. Leg. 15. ff. de Excusor. Tutor.*; *Capitolin. de Helv. Pert.*; *Honor. Cod. Theod. de Logogr. et Cons. l. 5*; *Isidor. Orig. l. 1, c. 3*; *Popma. de Operis. Serv.*

CALCULUS (*Ant.*) in Greek *κάλκλος*, signifies, literally, a little stone or pebble, but was afterwards applied to the little balls of ivory or metal, with which computations were made, votes given, and sentences passed by the judges, &c.; whence, among the Romans, *calculus albus* a favourable vote, or a vote of acquittal; and *calculus niger*, or a sentence of condemnation. These calculi were marked with the letters A for *absolvo*, i. e. I acquit; C for *condemno*, I condemn; and N L, *non liquet*, i. e. it is not clear, must be further examined and additional information given.—*Calculi lusorii* were the chess-men, or little balls, which were employed in the game of chess, which the poets allude to, both as to their matter, their colour, and their use. They were made either of ivory, of gold, silver, or glass.

Juv. sat. 11, v. 131.

— adeo nulla uncia nobis
Est eboris, nec tessellæ, nec calculus ex hac
Materiâ.

Lucan. Ad Pison. v. 180.

Callidiorè modo tabula variatur aperta
Calculus, et vitreo peraguntur milite bella.

They were of two colours, black and white.
Lucan. v. 182.

Ut niveus nigros, nunc et niger alliget albos.

Ovid. Trist. l. 2, v. 477.

*Discolor ut recto grassetur limite miles
Cum mediis gemino calculos hoste perit.*

Mart. l. 14, ep. 17.

Calculus hic gemino discolor hoste perit.

The common men were called *latrunculi*, or *latrones*.

Mart. l. 14, ep. 20.

*Insidiosorum si ludis bellu latronum
Gemmeus iste tibi miles et hostis erit.*

whence the game was called *ludus latruncolorum*, and was played with thirty calculi, fifteen white and fifteen black, as in the present day. [vide *Chess*] *Poll. Onom. l. 9, segm. 97; Senec. de Tranquill. Anim. c. 14, &c.; Petron. c. 33; Plin. l. 8, c. 54; Sidon. l. 8, ep. 12; Scholiast. in Theocrit.; Gronov. de Vet. Pecun. l. 3, c. 15.*

CALCULUS (Med.) the stone or gravel; a disease which consists in the lodgement of a calcareous substance in the bladder or kidneys. The Calculus in the bladder is called *lithiasis*; that in the kidneys *nephritis*. *Aret. l. 2, c. 3; Cel. l. 5, c. 20; Gal. de San. tuend. l. 6; Oribas. de Vist. Simpl. l. 2, c. 1; Act. Tetrab. 1, serm. 1; Paul. Æginet. l. 8, c. 11; Act. de Meth. Med. l. 1, c. 22.*

CALCULUS (Chem.) a name for any calcareous substance formed in the animal body. The ingredients in the different calculi have been found to be not less than twelve, namely, lithic acid, urate of ammonia and soda, phosphate of lime, acid phosphate of lime, ammoniaco-magnesian phosphate, oxalate of lime, carbonate of lime, flint, spermaceti, bezoardic animal resin, and gelatine. The specific gravity of urinary calculi is, in the lightest, 1213,1000; in the heaviest, 1976,1000. The calculus, when single, is usually oval; but when there are several calculi in the bladder the shape is more irregular, and still more so in proportion to their number. They are mostly laminated, and the lamina are of different thickness, and irregular in their direction; in the middle of these a nucleus is commonly seen, of the same mass as the rest. The colour is either white, brown, or resembling that of the mulberry. Those of the latter description, from their resemblance to the mulberry in form as well as colour, are called *mulberry-stones*, which being very rugged, cause the most pain of all. Their smell is partly strong, like that of urine or ammonia, and partly insipid or terreous, especially the white ones, which are like sawed ivory or rasped stone.

CALDARIUM (Ant.) 1. A sweating room, or a place in the bath heated by means of steam, which Cicero called *Vaporarium*, and Seneca *Sudatorium*, and *Laconicum*. *Cic. ad Quint. Frat. l. 3, epist. 1; Vitruv. l. 5, c. 10; Senec. epist. 51; Plin. l. 5, epist. 6.* 2. A vessel or cauldron in which water was heated. *Vitruv. l. 5, c. 10; Plin. l. 5, c. 8; Bald. Lex. Vitruv.; Meurs. de Calid. Pot. c. 1, § 1; Græv. Thes. Antiq. Roman. tom. 12, præfat.*

CALDARIÆ ITALICÆ (Ant.) hot baths near Ferrara in Italy, good for retention of urine.

CALÈ (Mil.) or *la cale*, a punishment among the French, which is inflicted upon any soldier or sailor that wounds another maliciously. It consists in tying the culprit to the yard-arm, suddenly plunging him into the sea and then drawing him up again, very similar to what is called keel-hauling in the British service.

CALÈA (Bot.) a genus of plants, Class 19 *Syngenesia*, Order 1 *Polygamia Æqualis*.

Generic Characters. CAL. common imbricate.—COR. compound uniform.—STAM. filaments five; anthers cylindrical.—PIST. germ oblongish; style filiform; stigmas two. PER. none; seeds solitary; receptacle chaffy.

Species. The species are annuals or shrubs. Of the first kind are the—*Calea Jamaicensis*, *Santolina subhirsuta*, seu *Conyza fruticosa*, native of Jamaica. Of the second kind are the—*Calea oppositifolia*, *Santolina erecta*, seu *Acmella Jamaicensis*, &c. native of Jamaica.—*Calea anellus*, *Amellus ramosus*, seu *Santolina scandens*, &c. native of Jamaica.—*Calca lobata*, *Conyza lobata*, seu *arborescens*, &c. *Santolina erecta*, &c. seu *Virga aurea*, &c.—*Calea scoparia*, *Chrysocoma arborea*, &c. seu *Sergilus scoparius*, &c.—*Calea aspera*, a native of America, &c.

CALEFA'CIENTS (Med.) *calefacientia*, warming medicines; such as have a tendency to stimulate the action of the blood, as anise, carraway, cummin, &c. *Cel. l. 2, c. 33; Oribas. l. 14, c. 13; Act. Tetrab. 1, serm. 2, c. 267; Paul. Æginet. l. 3, c. 38, &c.*

CALEFA'CTIO (Chem.) vide *Calcination*.

CALEFA'CTION (Phy.) the exciting or producing heat in a mixt body.

CALEFACTION (Med.) a way of preparing simple or compound medicines by a moderate heat of the sun.

CALEFA'CTORY (Ecc.) a room in a monastery where the religious persons warm themselves.

CALEFA'GIUM (Law) the right to take fuel yearly.

CALENDAR (Chron.) an orderly distribution of time into the months, weeks, and days, which constitute the year, together with an account of the festivals, and other such matters as serve for the daily purposes of life. Calendars, of course, vary according to the different forms of the year, and the divisions of time in different countries; the principal of which are the Roman, the Julian, the Gregorian, and the Reformed or Corrected Calendar.—*Roman Calendar*, the first that was formed, owes its origin to Romulus. [vide *Kalendarium*]—*Julian Calendar* is that in which the days of the week are determined by the seven letters, called the *Dominical letters*; namely, A, B, C, D, E, F, G, by means of the solar cycle; and the new and full moons, particularly the paschal full moon, with the feasts of Easter, and the other moveable feasts depending on it, by means of golden numbers, or lunar cycles, rightly disposed through the Julian Year. [vide *Chronology*]—*Gregorian Calendar*, that which, by means of epacts rightly disposed through the several months, determines the new and full moons, the time of Easter, &c. in the Gregorian year. The epacts are here substituted for the golden numbers of the Julian calendar.—*Reformed or corrected Calendar* is that which, without the use of either golden numbers or epacts, determines the equinox and the paschal full moon, &c. by computation from astronomical tables. When this calendar was introduced eleven days were omitted in the month of February to make it agree with the Gregorian style. The reformed calendar is ordered to be observed in England by act of Parliament, which fixes that "The Easterday, on which the rest depend, should always fall on the first Sunday after the full moon, which happens upon, or next after, the 21st day of March, so that, if the full moon happens on a Sunday, Easterday is the Sunday after. To the above-mentioned calendars may be added the—*New French Calendar*, which was introduced with the revolution. According to this calendar the year was divided into twelve months, each thirty days, with five supernumerary days to complete the 365; the month was divided into three parts, called *decades*; and the weeks into ten days. This has since fallen into disuse, and been exchanged for the old one on the restoration of the monarchy.—*Calendar months*, the solar months, as they stand in the calendar, as January, thirty-one days, &c.—*Astronomical calendar*, a contrivance by means of a printed paper pasted on board, with a brass slider that carries a hair, to show by inspection the sun's meridian altitude, right ascension, declination, rising, setting, amplitude, &c.

- to a greater exactness than can be done by the common globes.
- CALENDER (*Mech.*) a machine for smoothing linen, so called from *calidus*, hot, because it acts as a species of hot-pressing; also the person who follows the business.
- CALENDS (*Chron.*) the first day of the month in the Roman Calendar. [vide *Kalendæ*]
- CALENDULA (*Bot.*) Marigold, a plant, so called because it flowers every calends or month. The flowers and leaves of this plant are reckoned aperient.
- CALENDULA, in the *Linnean system*, a genus of plants, Class 19 *Syngenesia*, Order 4 *Polygamia Necessaria*.
- Generic Characters.* CAL. common simple.—COR. compound radiate.—STAM. filaments five; anthers cylindrical. PIST. germ oblong; style filiform; stigma obtuse.—PER. none; seeds solitary; receptacles naked.
- Species.* The species are annuals, perennials, or shrubs. Of the first kind are the—*Calendula arvensis*, seu *Caltha officinalis*, *arvensis*, seu *minima*, Field Marigold, native of Europe.—*Calendula stellata*, Starry Marigold, native of Barbary.—*Calendula sancta*, Palestine Marigold, native of Palestine.—*Calendula officinalis* seu *sativa*, seu *Caltha vulgaris*, Garden Marigold, native of the South of Europe.—*Calendula incana* seu *tomentosa*, seu *Caltha maritima*, native of Portugal.—*Calendula pluvialis*, *scabra*, seu *humilis Africana*, seu *Caltha Africana*, Small Cape Marigold, native of the Cape of Good Hope.—*Calendula hybrida*, *Caltha Africana*, seu *Cardispermum, Africanum*, &c. Hybridous or Great Cape Marigold, native of the Cape of Good Hope.—*Calendula nudicaulis* seu *Africana*, *Bellis*, &c. seu *Caltha Africana*, naked stalked Cape Marigold, native of the Cape of Good Hope. Of the second kind are—*Calendula pumila*, Pigmy Marigold, native of New Zealand.—*Calendula magellanica*, seu *Aster nudicaulis*, &c. native of the straits of Magellan.—*Calendula graminifolia*, seu *Africana*, &c. *Caltha Africana*, *Dimorphotheca stictica*, seu *Bellis Africana*, Grass-leaved Marigold, native of the Cape of Good Hope. Of the third kind are the—*Calendula Tragus* seu *caulescens*, Bending stalked Marigold, native of the Cape of Good Hope.—*Calendula oppositifolia* seu *rosmarinifolia*, Glaucous Marigold, native of the Cape of Good Hope.—*Calendula glabrata*, native of the Cape of Good Hope.—*Calendula fruticosa*, Shrubby Marigold, native of the Cape of Good Hope.—*Calendula arborescens*, *rigida*, seu *aspera*, native of the Cape of Good Hope. *Trag. Kraeut. von den vier Element. &c.; Cæsalpin. de Plant.; J. Bauh. Hist. Plant.; Ger. Herb.; Park. Theat. Botan.; Raii Hist. Plant.; Tournef. Instit.; Boerhaav. Ind.*
- CALENTURE (*Med.*) *calentura*, from *caleo*, to grow hot; a burning fever attended with delirium.
- CALENUM *vinum* (*Ant.*) rich wine of Campania.
- CALESIUM (*Bot.*) the name of a berry-bearing tree.
- CALF (*Sport.*) the male hart or hind of the first year.
- CALF, *Sea* (*Ich.*) a large fish with a velvet spotted skin, the flesh of which is like that of a sucking pig.
- CALF-SKIN (*Mech.*) or *calve-skin*, the leather made from the hide of a calf.
- CALF'S-SNOUTE (*Bot.*) vide *Calve's-Snout*.
- CALI (*Chem.*) Pot-Ash.
- CALIBER (*Gunn.*) *calibre*, or *caliper*, the thickness or diameter of any thing, particularly of the bore of a cannon.—*Caliber compasses*, a sort of compasses made with bowed ends for measuring the diameter of guns, &c.
- CALIBERED (*Gunn.*) measured with caliber compasses.
- CALIBRE (*Gunn.*) vide *Caliber*.
- CALICE (*Ecc.*) vide *Chalice*.
- CALICO (*Com.*) a kind of linen made of cotton, principally in the East Indies.
- CALIDARIUM (*Med.*) vide *Caldarium*.
- CALIDUCT (*Mech.*) a pipe or canal disposed along the rooms to convey heat to different parts of a building.
- CALIDUM *innatum* (*Phy.*) innate heat, or that attrition of the parts of the blood which arises from its circulation.
- CALIGA (*Ant.*) a sort of sandal worn by the Roman soldiers, whence *Caligula* derived his name. It was put for the condition of a common soldier, of which mention is made in an inscription: C. OPIIO. C. T. VEL OMNIBUS OFFICIIS IN CALIGA FUNCTO. Whence the soldiers were called *caligati*; and the life of a soldier, by Tertullian, *militia caligata*. They sometimes adorned these *caligæ* with gold and silver nails. *Cic. ad Attic. l. 2, ep. 3; Val. Max. l. 9, c. 1; Senec. de Brev. Vit. c. 17; Tacit. Annal. l. 1, c. 41; Sueton. in Calig. c. 52; Justin. l. 38, c. 10; Dio. l. 57; Tertullian. de Idol. c. 19; Grut. Vet. Inscript. p. 445, and p. 279, &c.*
- CALIGARIUS (*Ant.*) one who made the sandals for the soldiers called *caligæ*. [vide *Caliga*]
- CALIGATI (*Ant.*) a name for the Roman soldiers, from the *caliga* which they wore. *Juv. sat. 16, v. 24.*
- Cum duo crura habeas, offendere tot caligatos.*
- Of these, mention is made in old inscriptions, as HONORATI. ET. DECURIONES. ET. NUMERUS. MILITUM. CALIGATORUM. [vide *Caliga*]
- CALIGRAPHY (*Mech.*) from *καλός*, fair, and *γράφω*, to write; the art of fine penmanship, or of writing beautifully.
- CALIPER (*Gunn.*) vide *Caliber*.
- CALIPH (*Polit.*) in the Arabic *Khalifa*, which signifies a successor; was the title assumed by the successors of Mahomet, which was borne for 656 years, when Bagdad was taken by the Tartars, and Moslaazem, the last of the race of the Abbassides, was put to death.
- CALIPO'DIUM (*Archæol.*) vide *Calopodium*.
- CALIPPIC *Period* (*Chron.*) a period of seventy-six years, invented by Calippus, an Athenian astronomer, as an improvement on that of Meton, or the cycle of nineteen years. At every recurrence of this period he supposed that the mean, new, and full moons would always return to the same day and hour.
- CALIVER (*Gunn.*) from *caliber*, a small hand gun used at sea, a harquebuse, or musket formerly in use.
- to CALK (*Mar.*) or *caulk*, from the French *calfer* and *calage*; to drive oakum, spun yarn and wooden pins into all the seams to keep out the water.
- CALKERS (*Mar.*) the persons employed in calking vessels.
- CALKING (*Paint.*) a term used when the backside of the design is covered with black lead or red chalk, and the lines traced through on a waxed plate, &c. which leaves an impression of the colour on the plate.
- CALKING-IRONS (*Mar.*) the irons employed in calking vessels.
- CALKINS (*Vet.*) the prominent parts at the extremities of a horse-shoe, bent downwards and forged to a sort of point; they are either single or double, i. e. at one end of the shoe or both.
- CALL (*Sport.*) a lesson blown upon the horn to comfort the hounds.
- CALL (*Fowl.*) an artificial pipe made to catch quails, &c. by imitating their notes.
- CALL (*Mar.*) a whistle, or pipe of silver or brass, for summoning the sailors to their duty.—*Gold call*, with a chain, was formerly the ensign of the office of admiral.
- CALL of the house (*Polit.*) a Parliamentary term implying an imperative call or summons sent to every member to attend on any particular occasion.
- CALL (*Law*) or *calling of the plaintiff*, a form in courts of

law of calling upon the plaintiff to appear in cases where, for want of sufficient evidence, he consents to be nonsuited, or to withdraw himself. Accordingly, neither he, nor any for him, appears to answer the summons.

CALL (*Min.*) an English name for the mineral called by the Germans *tungsten*.

CALLA (*Bot.*) a genus of plants, Class 20 *Gynandria*, Order 8 *Polyandria*.

Generic Characters. CAL. *spathe* one-leaved.—COR. none.—STAM. *filaments* some intermixed with the germs; *anther* simple.—PIST. *germ* to each, obtuse; *style* simple; *stigma* acute.—PER. *berries* one-celled.

Species. The species are perennials, as the—*Calla Æthiopica*, *Arum Æthiopicum*, seu *Americanum*, &c. *Æthiopian Calla*, native of the Cape of Good Hope.—*Calla palustris*, *Dracunculus palustris* seu *aquatilis*, seu *Provenzalina palustris*, Marsh *Calla*, native of the North of Europe.—*Calla orientalis*, *Arum minus*, &c. seu *Carsaami*, Oriental *Calla*, native of Aleppo.—*Calla occulta*, native of Cochin China. *Dod. Pempt.*; *C. Bauh. Pin.*; *Ger. Herb.*; *Park. Theat.*; *Raii Hist. Plant.*

CALLAF (*Bot.*) a sort of *Ægyptian willow* mentioned by Prosper *Alpinus*.

CALLAIS (*Min.*) *καλλαις*, a precious stone of a sea-green colour like a sapphire. *Plin. l. 37, c. 10.*

CALLA'RIAS (*Ich.*) a haddock.

CALLIBER (*Gunn.*) vide *Caliper*.

CALLIBER (*Archit.*) the bulk, volume, or diameter of any thing.

CALLIBLEPHARUM (*Med.*) *καλλιβλέφαρον*, from *κάλλος*, beauty, and *βλέφαρα*, eyelids; a recipe for making the eyelids black, consisting of burnt roseleaves, date-stones, marrow, soot, &c. *Terra ampelitis. Plin. l. 32, c. 6; Marcel. de Med. c. 8.*

CALLICARPA (*Bot.*) from *κάλλος*, beauty, and *καρπός*, fruit, a genus of plants; so named from the beauty of its fruit, Class 4 *Tetrandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* one-leaved.—COR. monopetalous.—STAM. *filaments* four; *anthers* ovate.—PIST. *germ* roundish; *style* filiform; *stigma* thickish.—PER. *berry* globular; *seeds* four.

Species. The species are shrubs, as the—*Callicarpa americana*, *Spondylococcus*, *Burchardia*, *Johnsonia americana*, *Anonymus baccifera*, &c. seu *Frutex baccifer*, &c. American *Callicarpa*, native of Carolina, &c.—*Callicarpa cana*, *tomentosa*, seu *americana*, native of Malabar.—*Callicarpa lanata*, seu *tomentosa*, *Tomex tomentosa*, seu *Arbor malabarica*, &c. native of India.—*Callicarpa macrophylla*, native of India.—*Callicarpa ferruginea*, native of Jamaica.—*Callicarpa reticulata*, native of Jamaica.—*Callicarpa longifolia*, native of Malacca.—*Callicarpa integrifolia*, native of Carthage.—*Callicarpa villosa*, native of the East Indies.—*Callicarpa japonica*, native of Japan.—*Callicarpa umbellata*, native of Cochin China.—*Callicarpa triloba*, native of China.—*Callicarpa macrophylla*, native of India.

CALLICO (*Com.*) vide *Calico*.

CALLIGONUM (*Bot.*) *καλλιγονον*, a genus of plants, Class 11 *Dodecandria*, Order 4 *Tetragynia*.

Generic Characters. CAL. *perianth* one-leaved.—COR. none.—STAM. *filaments* about sixteen; *anthers* roundish.—PIST. *germ* superior; *styles* three; *stigmas* capitate.—PER. none; *seed* nut.

Species. The species are—*Calligonum Polygonoides*, seu *Polygonoides orientale*, &c. a shrub, native of the mountain of Ararat.—*Calligonum comosum*, a shrub, native of *Ægypt*.—*Calligonum Pallasia*, seu *Polygonoides Palasias caspica*, seu *Pterococcus*, seu *Pterococcus aphyllus*, a shrub, native of the coast near the Caspian sea.

CALLIGRAPHY (*Mech.*) vide *Caligraphy*.

CALLIMANCO (*Com.*) vide *Calamanco*.

CALLIMUS (*Min.*) *κάλλιμος*, a stone; found within another, called *Taphiusius. Plin. l. 36, c. 21.*

CALLION (*Bot.*) a kind of nightshade. *Plin. l. 23, c. 31.*

CALLIONYMUS (*Ich.*) *καλλιωνυμος*, from *κάλλος*, beauty, and *ὄνομα*, a name, having a fair name; a sort of fish frequently found in the Mediterranean, which Hippocrates recommends for the dryness of its flesh. Dioscorides also recommends the gall of this fish for disorders in the eyes. *Hippocrat. de Vict. in Acut. Morb. l. 2; Dioscor. l. 2, c. 96; Plin. l. 32, c. 7; Gal. de Simpl. l. 10, c. 2.*

CALLIONYMUS, in the *Linnean system*, a genus of animals, Class *Pisces*, Order *Jugulares*.

Generic Characters. Upper lip doubled up; eyes approximate; gill-membrane six rayed.—Body naked; ventral fins very remote.

Species. The principal species are the—*Callionymus Lyra*, Gemmeous Dragonet.—*Callionymus Dracunculus*, Sordid Dragonet.—*Callionymus Indicus*, Indian Dragonet.—*Callionymus Baikalensis*, Baikal Dragonet.—*Callionymus Ocellatus*, Ocellate Dragonet.—*Callionymus Sagitta*, Arrow-headed Dragonet.—*Callionymus Japonicus*, Japan Dragonet.

CALLIPÆDES (*Ant.*) old fellows playing the boy. *Fest. de Verb. Signif.*

CALLIPER (*Gunn.*) vide *Caliper*.

CALLIPHYLLUM (*Bot.*) *καλλιφύλλον*, from *κάλλος*, beautiful and *φύλλον*, a leaf; a species of the *Adiantum*.

CALLIPPII *Period* (*Chron.*) vide *Calippic*.

CALLIS (*Ant.*) called by *Livy* *devix calles*, the name of a path that beasts make in mountains and forests.

CALLIS (*Law*) the king's highway.

CALLISIA (*Bot.*) a genus of plants, Class *Triandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* three-leaved.—COR. petals three.—STAM. *filaments* three; *anthers* double.—PIST. *germ* superior; *style* capillary; *stigmas* three.—PER. *capsule* ovate; *seeds* two.

Species. The only species is—*Callisia repens*, *Callisia*, seu *Hapalanthus repens*, creeping *Callisia*, a perennial, native of America.

CALLISTE'A (*Ant.*) *καλλιστεΐα*, a Lesbian festival, at which the women presented themselves in Juno's temple, in order that the prize might be assigned to the fairest. A similar festival was celebrated among the Parrhasians, and the Eleans, at which the prize was assigned to the most beautiful man. *Plat. Euthyd.*; *Hesychius*; *Eustath. Il. l. 9.*

CALLISTIANS (*Ecc.*) a set of reformers in Bohemia who obtained permission from the see of Rome to communicate in the sacraments of both kinds. *Spondan. Annal. Ann. 1421.*

CALLISTRUTHIA (*Bot.*) according to *Pliny*, a sort of fig of an excellent taste. *Plin. l. 15, c. 18.*

CALLITRIX (*Zool.*) a kind of ape in *Æthiopia*, with a long beard, and a spread tail. *Plin. l. 8, c. 54.*

CALLITRICHE (*Bot.*) originally a name for *adiantum*, or Maiden hair; from *κάλλος*, beauty, and *τριχίς*, hair, a genus of plants, Class 1 *Monandria*, Order 2 *Digynia*.

Generic Characters. CAL. none.—COR. petals two.—STAM. *filaments* one; *anther* simple.—PIST. *germ* roundish; *styles* two; *stigmas* acute.—PER. *capsule* roundish; *seeds* solitary.

Species. The species are annuals, as—*Callitriche verna*, *fontana*, *Stellaria*, seu *Corispermum*, Vernal Star-wort, or Star-headed Water Chickweed, native of Europe.—*Callitriche aquatica*, Common Water Starwort, native of Britain.—*Callitriche autumnalis*, seu *Stagnalis*, *Stellaria aquatica*, *Lenticula palustris*, &c. seu *Alsine aquatica*, &c. Autumnal Star-grass, native of Britain. *C. Bauh. Pin.*; *Raii Hist. Plant.*

CALLONE (*Med.*) καλλόν, a term signifying generally comeliness or decency, but is applied, particularly by Hippocrates, to the decency and gravity of deportment befitting a medical man.

CALLOSUM *Corpus* (*Anat.*) a medullary prominence in the brain, which is conspicuous in separating the two lateral parts or hemispheres of the Cerebrum.

CALLOUS (*Surg.*) a term signifying hardened or indurated, as the callous edges of ulcers.

CALLUS (*Med.*) τύλος, πῶρος. 1. Any cutaneous, carneous, and osseous hardness, whether natural or præternatural, but particularly that callosity which is generated about the edges of fractured bones, a sort of gluey substance, that serves to solder them together. 2. *Calli*, πῶροι, nodes of the gout, according to Galen, by whom *callositas* and *callus*, τύλοσις and τυλος, are also sometimes applied to the eyelids. *Gal. de Comp. Med. sec. Loc.* 1. 7, c. 7, &c. 3. The same as *Callosum Corpus*. *Act. Tetrab.* 1, serm. 1; *Paul. Æginet.* 1. 4, c. 49; *Act. de Meth. Med.* 1. 5, c. 6.

CALMARIE (*Bot.*) vide *Calamariæ*.

CALOCATANOS (*Bot.*) from καλός, beautiful, and κάτανος, a vessel, the wild Poppy; so called from the beauty of its flower.

CALSCHIERAI (*Bot.*) a sort of thistle.

CALODENDRUM (*Bot.*) from καλός, beautiful, and δένδρον, a tree; a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* one-leaved.—COR. *petals* five; *nectaries* five.—STAM. *filaments* five; *anthers* ovate cordate.—PIST. *germ* pedicelled; *style* filiform; *stigma* simple.—PER. *capsule* peduncled; *seeds* in pairs.

Species. The only species is—*Calodendrum capense*, *Dic-tamnus capensis*, seu *Pallasia capensis*, a shrub, native of the Cape of Good Hope.

CALOMEL (*Chem.*) καλομέλας, from καλός, beautiful, and μέλας, black; so called from its colour and virtues. Mercury well pounded with sulphur, or more properly *Mercurius dulcis* six times sublimed.

CALOMELANOS *Turqueti* (*Med.*) a purgative composed of *Mercurius dulcis*, Scammony, &c.

CALONIA (*Med.*) καλονία, a sort of myrrh.

CALONNEA (*Bot.*) the *Galaradia* of Linnæus.

CALOPHYLLUM (*Bot.*) from καλός, fine, and φύλλον, a leaf; a genus of plants, Class 13 *Polyandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* four-leaved.—COR. *petals* four.—STAM. *filaments* many; *anthers* erect.—PIST. *germ* roundish; *style* filiform; *stigma* headed.—PER. *drupe* globular; *seed* nut globular.

Species. The two species are shrubs, as the *Calophyllum Inophyllum*, *Arbor Indica*, *Bintangor maritima*, *Ponna*, seu *Ponna maram*, native of India.—*Calophyllum Calaba*, *Inophyllum*, *Arbor altissima*, *Tsierou-ponna*, native of the Indies.

CALOPHYLLUM the *Grias* and *Mesua* of Linnæus.

CALOPODIUM (*Ant.*) καλοπόδιον, from καλον, wood, and πῶς, a foot; a wooden shoe or slipper.—*Calopodium ferratum*, a shoe with an iron plate to slide upon the ice; a skate.

CALOPUS (*Ant.*) καλοπῶς, from καλός, beautiful, and πῶς, a foot; an epithet for persons with pretty feet, particularly slaves. *Schol. Arist.*

CALOPUS (*Ent.*) a genus of animals, Class *Insecta*, Order *Coleoptera*.

Generic Characters. *Antenna* filiform; *feelers* four.—*Thorax* gibbous.—*Shells* linear.

Species. The species are the—*Calopus serraticornis*, *Calopus hispicornis*, et *Calopus pygmaeus*.

CALORIC (*Phy.*) or the Calorific Principle, that principle commonly known by the name of heat, which is supposed

to be something independent of the body in which it is found. It was formerly known by the name of the *Igneous Fluid*, or *Igneous Matter*. [vide *Chemistry*]

CALORIMETER (*Mech.*) an instrument by which the quantity of absolute heat existing in a body may be ascertained.

CALO'TE (*Ecc.*) French for a sort of tonsure, which distinguished a person in orders in the Romish church, whence the revolutionary epithet of Calotin for a person having this tonsure.

CALOTE (*Mil.*) a sort of skull-cap worn by the French cavalry under their hats, as a guard against the blows of the sword or sabre. The *Calote* is also a French name for the Lieutenant's Court, at which the first lieutenant of the regiment presided. Like a court of honour, the Calote took cognizance of all affairs in which the laws of honour and good breeding had been violated, answering to the *Regimental Committees* in the British service.

CALOTE spherique (*Math.*) the section of a sphere, having a circle for its basis.

CALOTTE (*Archit.*) a concavity or depression, in the form of a calotte or cap, to diminish the height of a chapel; or that it may not exceed the proportion of the breadth.

CALO'YERS (*Ecc.*) or *Calogers*, Greek monks, of the order of St. Basil, who lead a rigorous and retired life on Mount Athos; so called from καλός, fair, and γῆρας, old age, i. e. men venerable for their years. *Montfauc. Paleograph.*

CALPAR (*Ant.*) a sort of earthen vessel which was used: also the wine itself, particularly that which was taken out of the vessel for sacrifice before it might be tasted. *Varr. de Vit. Roman. apud Non.* 1. 15, c. 31; *Fest. de Verb. Signif.*

CALQUING (*Mar.*) vide *Calking*.

CALTHA (*Bot.*) a genus of plants, Class 13 *Polyandria*, Order 7 *Polygynia*.

Generic Characters. CAL. none.—COR. *petals* five.—STAM. *filaments* numerous; *anthers* compressed.—PIST. *germ* superior; *styles* none; *stigmas* simple.—PER. *capsules* one-celled; *seeds* very many.

Species. The species are perennials, as—*Caltha palustris*, *Populago palustris*, seu *major*, Marsh Marigold, *Souci de Marais*, a native of Britain.—*Caltha radicans*, a native of Britain.—*Caltha natans*, seu *Populago*, a native of Siberia. *Clus. Hist. Plant. rar.*; *Bauh. Hist. Plant.*; *C. Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*; *Raii Hist. Plant.*

CALTHULA (*Ant.*) tunica genus à colore calthæ; a short cloak, or yellow frock. *Plaut. Epid. act.* 2, scen. 2, v. 47; *Varr. de Vit. Rom. apud Non.* 1. 16, c. 1.

CALTROPS (*Mil.*) from the Sax. *Coltroepe*, or the French *chauffe-trappas*, and *cheval-trapper*, irons with four spikes, so made that which soever way they fall, one point still lies upward; generally thrown into breaches to annoy the enemy's horse. [vide *Fortification*]

CALTROPS (*Sport.*) an instrument with three iron spikes, used in hunting the wolf.

CALTROPS (*Her.*) is occasionally borne as a charge in coat armour.

CALTROPS (*Bot.*) a herb, the *Tropa natans* of Linnæus, very common in the South of France, where it grows among the corn. It is so called because it resembles the military instrument of the same name, being armed with erect prickles all ways, that greatly annoy the feet of cattle which tread upon them.

CALVA (*Anat.*) and *Calvaria*. The same as *Cranium*.

CALVARY cross (*Her.*) a charge representing the cross on Mount Calvary, with three steps, supposed to imply the three graces, *Faith*, *Hope*, and *Charity*; as *gules* a Calvary cross upon three steps or, name *Jones*, of Denbighshire.

CALVES-SNOUT (*Bot.*) the *Anterrhinum* of Linnæus, a perennial, better known by the name of Snap-Dragon, or Toad-Flax.

CALVINISM (*Ecc.*) the doctrines of Calvin and his adherents, who hold that predestination and reprobation depend upon the will of God unconditionally, and without respect to the good or evil works of men. They also maintain that to the predestinated God imparts a grace which they cannot lose, and imputes no sin to the elect, &c. &c.

CALVITIES (*Med.*) baldness proceeding from defect of humour, in distinction from *alopecia*, *area*, *ophiasis*, and *tinea*, which proceed from a corruption of the nutritious humours.

CALUMBA (*Bot.*) a root imported from Columbo, in Ceylon; whence it has also been called Colombo, and Columba. It has an aromatic smell, and a pungent bitter taste, and is a good corrector of putrid bile.

CALUMET (*Polit.*) or *Pipe of Peace*, a large tobacco-pipe, as in the annexed figure, made of red, black, or white marble; the head is finely polished, and the quill, which is commonly two feet and a half long, is made of a pretty strong reed or cane, adorned with feathers of all colours, interlaid with locks of women's hair; they tie to it two wings of the most curious birds they can find, which makes the calumet resemble a Mercury's wand. This pipe is a pass and a safe conduct among the allies of the nation who has given it; and in all embassies the ambassador carries it as a symbol of peace, the people who use it being fully persuaded that some great misfortune would befall them if they violated the calumet.

CALUMNIÆ juramentum (*Law*) an oath taken by both parties in a cause; the plaintiff, that he did not bring his charge, and the defendant, that he did not deny it, with a design to do each other a wrong, but because they believed their cause to be just and good; also that they would not create unnecessary delays, nor offer the judge or evidence any bribes. If the plaintiff refused this oath, the libel or complaint was dismissed; if the defendant, it was taken *pro confesso*.

CALUMNY (*Law*) the crime of accusing another falsely, knowing the accusation to be false.

CALX (*Chem.*) a kind of ashes or fine friable powder which remains of metals, minerals, &c. after they have undergone the violence of fire, and have lost all their humid parts.—*Calx viva*, quick lime, or lime in its most caustic state.—*Calx extincta*, or slacked lime, is lime that has been quenched with water after it has been burnt.—*Calcis aqua*, or *calcis liquor*, lime-water, or a solution of lime in water. [vide *Calcination* and *Lime*]

CALYBION (*Bot.*) the name of a pericarp adhering closely to the seed.

CALYCANTHEMI (*Bot.*) the fortieth Order in Linnæus' Fragments of a Natural Arrangement.

CALYCANTHUS (*Bot.*) from κάλυξ and ἄνθος, *flos*, the flower, consisting of calycine folioles without petals; a genus of plants Class 12 *Icosandria*, Order 5 *Polygynia*.

Generic Characters. CAL. *perianth* one-leaved.—COR. none.—STAM. *filaments* numerous; *anthers* oblong.—PIST. *germs* a great many; *stigmas* glandulous.—PER. none; *seeds* very many.

Species. The species are shrubs.—*Calycanthus floridus*, *Buitneria anemones*, &c. *Basteria*, *Beureria*, seu *Fruiter corni*, &c. *Carolina All-spice*, native of Carolina.—*Calycanthus præcox*, *Abai*, seu *Robai*, *Japan All-spice*, native of Japan.—*Calycanthus Pensylvanicus*, native of North America.—*Calycanthus fertilis*, native of North America.

CALYCFLORÆ (*Bot.*) the sixteenth order in Linnæus' fragments of a natural arrangement, comprehending those

plants that have only a calyx in which the stamina are inserted, as in *Eleagnus*, *Osyris*, *Hippophae*, &c.

CALYCFIFORM (*Bot.*) in the form of a calyx, an epithet for the involucre when it has the appearance of a calyx.

CALYCINE (*Bot.*) of, or on, the calyx; an epithet either for the scales or the thorns, as calycine thorns, those which are on the calyx.

CALYCLE (*Bot.*) *Calyculus*, a diminutive of calyx, a row of small leaflets placed at the base of the calyx on the outside. The calycle of the seed is the outer proper covering of the seed, which adheres to it to facilitate its dispersion.

CALYCLED (*Bot.*) *calyculatus*, calyculated; an epithet either for the perianth or the pappus; *perianthium calyculatum*, a perianth having a calycle at the base, as in *Dandelion*, *Leontodon taraxacum*, &c.; *pappus calyculatus*, a pappus having a membranaceous calycle that rises over the seed.

CALYCOSTEMON (*Bot.*) *Calycostemon*, a name for a class of plants, according to Gleditsch and Monck, which have their stamina situated on the calyx.

CALYCVLUS (*Bot.*) vide *Calycle*.

CALYCVLUS echinorum (*Zool.*) the prickly cases or skins of sea porcupines. *Apul.*

CALYPTRA (*Bot.*) the Calyptra, a tender skin that loosely covers the top of the theca, like a cup. The calyptra is *villosa*, hairy, when composed of hairs, as in the *Polytrichum commune*; *integra*, entire, when it covers the whole top of the theca, as in the *Grimmia extinctoria*; *dimidiata*, half, when it half covers the theca, as in most of the *Musei*; *dentata*, dentated, when the rim is set with teeth, as in the *Grimmia dentata*.

CALYPTRANTHES (*Bot.*) from κάλυπτρα, *operculum*, and ἄνθος, *flower*; a genus of plants, Class 12 *Icosandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* one-leaved.—COR. none.—STAM. *filaments* very many; *anthers* roundish. PIST. *germ* roundish; *style* simple; *stigma* blunt.—PER. *berry* globular; *seed* single.

Species. The species are shrubs, as *Calyptranthes zuzygium*, seu *arborescens*, *Myrtus zuzygium*, *Suzygium*, seu *Zuzygium fruticosum*, native of Jamaica.—*Calyptranthes guineensis*, seu *arborescens*, native of Guinea.—*Calyptranthes caryophyllifolia*, seu *arborca*, *Eugenia caryophyllifolia*, seu *cortiosa*, *Myrtus cumini*, *Jambosa ceramica*, *Arbor Zeylanica*, &c. *Caryophyllus*, seu *Peria Njara*, native of the East Indies.—*Calyptranthes jambolana*, seu *arborca*, *Eugenia jambolana*, *Jambolana*, seu *Jambolifera pedunculata*, native of the East Indies.—*Calyptranthes chytraculia*, seu *arborca*, *Myrtus chytraculia*, seu *Chytraculia arborea*, native of Jamaica. *C. Bauh. Pin.*; *Raii Hist. Plant.*

CALYPTRATE (*Bot.*) *calyptratus*, caped; an epithet for the arillus when it covers the seed, as the calyptra surrounds the top of the theca in Mosses.

CALYX (*Bot.*) in Greek κάλυξ, a cup; in English, Empalement or Flower-Cup; is defined by Linnæus to be the outer covering of the flower, or the first of the seven parts of fructification, formed of the *cortex*, or Outer Bark. According to this author, the Calyx comprehends *perianthium*, the Perianth; *anthodium*, the Common Perianth, *involucreum*, Involucre; *gluma*, the Glume; *spathe*, the Spathe; *calyptra*, the Calyptra; and *volva*, the Wrapper.—*Perianthium*, the Perianth is that sort of calyx which immediately incloses the flower, as in *fig. 1*, where *a* represents the calyx, and *b* the campanulate corolla. The Perianth is abiding, as in *Hyoscyamus niger*, Henbane; deciduous, as in *Tilia Europæa*; caducous, as in the *Papaver somniferum*, the Poppy; double, as in *fig. 2*, where *a* marks the perianth of the fruit, and *b* the perianth

of the flower; one, two, or three-leaved, &c.; labiate, as in *Salvia officinalis*, the Sage, &c.—*Anthodium*, a calyx which contains a great number of flowers in such a manner that these flowers appear to form but one, as in *Leontodon taraxacum*, Dandelion; *Centaurea cyanus*, Blue Bottle, &c.

Fig. 1.

Fig. 2.

Fig. 3.

Fig. 4.

The *anthodium* is one or many-leaved, scaly, squarrose, fringed, mucronate, thorny, turbinate, doubled or calyculate, &c.—*Involucrum*, the involucre, a calyx peculiar to umbelliferous flowers, which encloses one or several flowers, and is therefore generally distinguished into partial and universal, as in fig. 3, where *aa* represent the universal involucre, *bbb* the partial involucre, *ccc* the rays of the umbel.—*Gluma*, the glume, a calyx peculiar to the grasses, the leaves of which are called *valvulae*, Valves, as in fig. 4, where *a* marks one of the valves of a bivalve glume.—*Spatha*, the Spathe, a calyx of the spadix opening or bursting longitudinally in form of a sheath.—*Calyptra*, the calyptra, a calyx of the mosses covering the anther like a hood, according to Linnæus, but it is not generally reckoned among the number of the calyxes.—*Volva*, the Wrapper, a membranaceous calyx of the *fungi*, which, when they are full grown, remains upon the ground.

CAMÆA (*Min.*) a gem of the onyx kind.

CAMAÏEU (*Min.*) and *Cameo*, a stone on which are found various figures and representations of landscapes.

CAMAÏEU (*Paint.*) a name given to such paintings as have but one colour, where the lights and shades are made on a ground of gold or azure.

CAMAÏL (*Ecc.*) a purple ornament worn by a bishop over his rochet.

CAMARA (*Anat.*) κάμαρα, καμάριον; 1. The *fornix* of the brain. 2. The vaulted part of the auricle leading to the external foramen. *Gal. Def. Med.*; *Oribas. Med. Coll.* 1. 24; *Gorr. Def. Med.*

CAMARA (*Bot.*) the Brazilian name for the *Santona* of Linnæus.—*Camara cuba*, a plant with hairy, rough leaves, something like succory; also a species of *Mentastrum*, or Horse-Mint. *Pis. apud Raii Hist. Plant.*—*Camara Mira*, a Brazilian plant, which, according to Piso, opens every day exactly at eleven, and shuts again at two. *Raii Hist. Plant.*—*Camara*, a species of Dwarf-Honey-Suckle.

CAMARAN-BA'YA (*Bot.*) a species of the *Lysmachia* of Linnæus.

CAMARIN-BA'S (*Bot.*) a Brazilian tree, the fruit of which is the size of a plum, but resembles a peach in taste. *Pis. apud Raii Hist. Plant.*

CAMARIUM (*Anat.*) καμάριον, the same as *Camara*.

CAMAROMA (*Surg.*) vide *Camariosis*.

CAMARIOSIS (*Archit.*) καμάρισις, the raising with an arch or vault.

CAMAROSIS (*Surg.*) or, in Latin, *camaroma*, *cameratio*, a fracture in the cranium, which takes the form of a vault. *Gal. de Fin. Med.*; *Paul. Æginet.* 1. 6, c. 89; *Gorr. Def. Med.*

CAMAX (*Bot.*) from καμάξ, *vitis pedamentum*; a genus of plants in Guiana, Class 5 *Pentandria*, Order 1 *Monogynia*. *Generic Characters.* CAL. *perianth* one-leaved.—COR. one-petalled.—STAM. *filaments* five.—PIST. *germ* roundish; *style* capillary; *stigmas* three or four.—PER. *berry* ovate; *seeds* very many.

Species. The species are shrubs, as *Camax fraxinea*, seu *Ropourea guianensis*, native of Guiana.—*Camax guianensis*, seu *Ropourea guianensis*, native of Guiana.

CAMBA'YES (*Com.*) cotton cloths made at Bengal, Madras, and other places in India.

CAM'BER (*Mar.*) in general any thing that is round; but chiefly employed for cambering the ways in launching a ship.

CAMBER-BE'AM (*Archit.*) from καμάρα, a vault; a beam cut hollow or archwise in the middle, commonly used in platforms.

CAM'BERED (*Mar.*) an epithet for a deck, the flooring of which is highest in the middle; also when it is irregularly and defectively so, which is otherwise denominated broken-backed.

CAM'BERING (*Mar.*) the same as cambered.

CAM'BING (*Bot.*) a tree that grows in the Molucca, the bark of which is efficacious in dysenteries.

CAM'BIO (*Com.*) an Italian word for Exchange. [vide *Cambium*]

CAMBIRE'A (*Med.*) the name which Paracelsus gives to a venereal bubo.

CAM'BIS (*Com.*) one trading in notes or bills of exchange.

CAM'BIUM (*Com.*) in Italian *cambio*, from κάμνω, to bend; 1. The exchanging or bartering of commodities, hence *literæ Cambii*, bills of exchange; also *Cambium siccum*, i. e. *pecuniæ permutatio*, ἀργυρίσις ἀλλαγή, exchange of money. 2. The exchange, or place of meeting for merchants.

CAMBIVM (*Med.*) that humour of the body which, *cambitur*, is exchanged into glutinous matter; among the Arabians, a secondary humour, which is immediately converted into aliment, the two others being termed *ros* and *gluten*, according to Avicenna.

CAMBIVM (*Bot.*) a moisture between the cortex and wood, which in the air becomes mucilaginous and tenacious. *Grew. Anat. of Plant.*

CAM'BLET (*Com.*) vide *Camlet*.

CAMBOGIA (*Bot.*) a genus of plants, named after Cambodia, the province from which it comes, Class 13 *Polyandria*, Order 1 *Monogynia*. This tree produces the gum called *Gamboge*.

Generic Characters. CAL. *perianth* four-leaved.—COR. *petals* four.—STAM. *filaments* very many; *anthers* roundish.—PIST. *germ* roundish; *style* none; *stigma* four-cleft. PER. *pome* roundish; *seed* solitary.

Species. The only species is the *Cambogia Gutta*, *Coddampulli*, *Carcapuli*, *Cambogium*, seu *Gambogia*, *Gambogee-tree*, a native of the East Indies. *Raii Hist. Plant.*

CAMBOGIUM (*Bot.*) the same as *Cambogia*.

CAM'BRE (*Archit.*) French for the bending a piece of timber, or for the curve of an arch.

CAM'BREL (*Mech.*) or *cambrin*, a crooked stick with notches in it, on which butchers hang carcasses of mutton, &c.

CAM'BRER (*Archit.*) to vault, to bend, particularly to fit pannel squares, &c. to any curved dimensions.

CAM'BRIC (*Com.*) a species of very fine white linen made of flax, from *Cambrensis* or *Cambra*, the province where it was first manufactured.

CAMBU'CA (*Med.*) a bubo in the groin. *Castel. Lex. Med.*

CAM'BUI (*Bot.*) the Wild American Myrtle. *Marcgrav. Pis. Bras. Hist.*

CAMBULU (*Bot.*) a species of the *Bignonia* of Linnæus.

CAM'EL (*Zool.*) a well-known animal of Arabia, remarkable for its swiftness, and its power of subsisting many days without water. It is mild and gentle, unless particularly provoked, patient of hunger, and capable of carrying great weights. The flesh and the milk of this animal constitute the principal food of the inhabitants of Arabia, and the countries where it is a native. [vide *Camelus*]

CAMEL (*Her.*) this animal, in coats of arms, denotes expedition in business; sometimes it is only used as *Canting Arms*, as he beareth, "Argent, a camel passant, by the name of Camel." This coat stands in the church of Bury-Pomeroy, in the county of Devon.

CAMEL (*Mech.*) a machine used for lifting vessels over the Pampus at the mouth of the river Y. A camel is composed of two separate parts, whose outsides are perpendicular, and whose insides are concave, so as to embrace the hull of a ship on both sides.

CAMELA'RIOUS (*Ant.*) a camel driver.

CAMELEON (*Astron.*) one of the southern constellations near the South Pole, which is invisible in our latitude. There are ten stars in this constellation, according to Sharpe's catalogue, which are, however, only of the fifth or sixth magnitude.

CAMELEON (*Zool.*) vide *Chamaeleon*.

CAMELINA (*Bot.*) the *Erysinum cheiranthoides* of Linnaeus.

CAMELLIA (*Bot.*) a genus of plants, named after Mr. G. J. Kamel, or Camellus, a botanist in conjunction with Ray, Class 16 *Monadelphia*, Order 5 *Polyandria*.

Generic Characters. CAL. perianth many-leaved.—COR. petals five.—STAM. filaments numerous; anthers simple.

—PIST. germ roundish; style subulate; stigma acute.—PER. capsule turbinate; seeds kernels roundish.

Species. The species are shrubs, as *Camellia japonica*, *Thea Chinensis*, *Tsubakki montanus*, *sybvestris*, seu *hortensis*, seu *Rosa Chinensis*, Japan Rose, native of Japan.—*Camellia Sasangua*, seu *Sasankwa*, native of Japan.

CAMELOPARDALIS (*Zool.*) or *Camelopardus*, καμηλοπαρδαλις, Camelopard, from καμηλος and παρδαλις, a panther; so called, according to Varro, not because it was born of a camel and a panther, but from its figure. It is called in the Arabic *Zurapha*, in the Æthiopian *Nabis*, by the Romans *ovis fera*.

Horat. l. 2, ep. 1, v. 195.

Diversum panthera genus confusa camelo.

Varr. de Lat. Ling. l. 5; *Plin.* l. 8, c. 18; *Solin.* c. 33; *Dion.* l. 43.

CAMELOPARDALIS, in the *Linnean system*, a genus of animals, Class *Mammalia*, Order *Pecora*.

Generic Characters. Horns simple; fore-teeth lower eight; body whitish mixed with tawny, and sprinkled with numerous rusty spots.

Species. The only species is *Camelopardalis Giraffa*, *Cervus Camelopardalis*, *Camelus Indicus*, seu *Gyrassa*, Camelopard Giraffe, a native of Æthiopia, which is gentle, swift, and elegant; when about to lie down it kneels like the camel.

CAMELOPARDALIS (*Astron.*) a new constellation formed by Hevelius, consisting of thirty-two stars, situated between Cepheus, Cassiopeia, Perseus, the two bears, and Draco.

CAMELOPARDALIS (*Her.*) a charge that is sometimes borne in coats of arms.

CAMELOPODIUM (*Bot.*) a sort of Hore-hound.

CAMELS-HA'Y (*Bot.*) a sort of sweet smelling rush growing in Eastern countries; the *Andropogon* of Linnæus.

CAMELUS (*Zool.*) כמל, کاميλος, a beast of burden used in Asia, of which the Arabians distinguish three kinds; the first, the *clitellarii*, or, in the Arabic, *hoguïn*, i. e. ευγενεις, well-born, or of good breed, which have one bunch, and are fitted to carry burdens to the weight of a thousand pounds; second, those with two bunches, called in Arabic *hechti*, by the Greeks βακτριαι, because they were found originally in Bactria, which are fitted for carrying burdens, or for riding; thirdly, the *graciles*, in Arabic *raguahil*,

Greek δρομαδες, dromedaries, so called from their swiftness, were principally used by the nobles. The milk and flesh of the camel were very much esteemed among the ancients, and among the Caspians their finest garments were made of its hair. *Herodot.* l. 1, c. 80, &c.; *Aristot. Hist. Animal.* l. 6, c. 26; *Diodor.* l. 2, &c.; *Plin.* l. 2, c. 41, l. 8, c. 18; *Allian.* l. 17, c. 14; *Veget.* l. 3, c. 2; *Apollon. Mirab.* c. 20; *Veget.* l. 3, c. 23.

CAMELUS, in the *Linnean system*, a genus of animals, Class *Mammalia*, Order *Pecora*.

Generic Characters. Horns none; fore-teeth lower six; tusks distant, upper three, lower two; upper-lip cleft.

Species. The principal species are as follow: the *Camelus Dromedarius*, in French *Le Dromadaire*, the Dromedary, or Arabian Camel, a native of Asia and Africa—*Camelus Bactrianus*, *Dromedarius*, in French *Le Chameau*, Bactrian Camel, native of India.—*Camelus Glavia* seu *Peruvianus*, *Ovis Peruana*, in French *Le Lama*, the Glama or Llama, native of South America.—*Camelus Vicugna* seu *Laniger*, *Vicognes* ou *Vicunas*, in French *La Vigogne*, Vicuna or Vicunna.—*Camelus Paco*, Paco or Alpaco, native of Peru.—*Camelus Huanacus*, *Guanaco-Huanacu*, *Cervo-Camelus*, seu *Allo-Camelus*, Guanaco, a native of Peru.—*Camelus Arcucanus*, *Aries moromorus*, in French *Moutons de Perou*, Chilihucque, native of Peru, Camoe, and Chili.

CAMEO (*Paint.*) vide *Camaiëu*.

CAMERA (*Ant.*) κάμαρα, a vault, or καμπή, a curvature; 1. A kind of ships with close sides, and a wide hold covered at the top, which were used by those who lived near the Black Sea. *Tacit. Hist.* l. 3, c. 47; *Gyrald. de Nairg.* c. 18; *Alex. Gen. Dier.* l. 4, c. 2. 2. A roof. [vide *Camara*]

CAMERA terræ (*Archæol.*) a crooked plot of ground.

CAMERA (*Mus.*) a term in composers' books denoting music for the chamber, or for private concerts.

CAMERA Æolia (*Mech.*) a name given by Kircher to a contrivance for blowing the fire for the fusion of ores without bellows, which is effected by means of water falling through a funnel into a close vessel, which sends from it so much air or vapour as continually blows the fire.—*Camera lucida*, a contrivance of Dr. Hooke's, to make the image of any thing appear on a wall in a light room, either by day or night, which is described in the *Philosophical Transactions*, vol. ii. No. 38.

CAMERA obscura (*Opt.*) an optical machine or apparatus representing an artificial eye, by which the images of external objects, received through a double convex glass, are shown distinctly, and in their native colours, on a white ground placed within the machine in the focus of the glass. The first invention of this machine is ascribed to John Baptista Porta, by whom it is described at large in his *Magia Naturalis*. [vide *Optics*]

CAMERA'RIA (*Bot.*) a genus of plants, named by Plumier after J. Camerarius, a physician and botanist, of Nuremberg; it is of the Class 5 *Pentandria*, Order 1 *Monogymia*.

Generic Characters. CAL. perianth five-cleft.—COR. monopetalous.—STAM. filaments five; anthers converging.—PIST. germs two; styles hardly any; stigmas obscure. PER. follicles two; seeds numerous.

Species. The species are shrubs; namely, the *Cameraria latifolia* seu *arborea*, Bastard Mangeneel, native of America.—*Cameraria Zeylanica*, seu *Apocyno Nerium*, native of Ceylon, &c.

CAMERARIA, the *Montia* of Linnæus.

CAMERA'RIOUS (*Ant.*) a chamberlain or treasurer.

CAMERA'TIO (*Med.*) vide *Camarosis*.

CAMERO'NIANS (*Ecc.*) field conventiclers, or a fanatic sort of Scotch Presbyterians, called after one Cameron, their leader, and chaplain of the regiment, to which he also gave his name.

CAMERY (*Vet.*) a disease in horses, called also the *Frounce*, when small warts or pimples arise in the mouth.

CAMES (*Min.*) or *camet*, silver.

CAMES (*Mech.*) slender rods of cast lead, of which glaziers make their turned or milled lead for joining the panes or quarrels of glass.

CAMFERING (*Carpent.*) vide *Chamfering*.

CAMICA (*Archæol.*) an old word for camlet.

CAMPLII (*Ant.*) or *Camilla*, priests instituted by Romulus.

CAMINUS (*Ant.*) κάμνος, from *καίω*, to burn; a furnace, or chimney; also a bell.

CAMION (*Mil.*) a sort of cart or dray with two wheels, drawn by two horses, which serves to convey cannon-balls.

CAMISADE (*Mil.*) French for setting upon or surprizing an enemy by night, when the soldiers had their shirts over their clothes, that they might be known to each other.

CAMISATED (*Ecc.*) clothed in the *camisia*, or surplice.

CAMPSIA (*Ecc.*) from the Hebrew צמק, a long linen vestment of the priests, a surplice.

CAMISIA *fœtus* (*Anat.*) the shirt of the fœtus. [vide *Chorion*]

CAMLET (*Com.*) or *camblet*; in French *camelot*, in Italian *camellato*, a fine stuff, composed of a warp and woof, and manufactured on a loom with two treddles, so called because they were originally made of camel's hair only. Camlets are of different kinds, as follow, namely—*Goat's-hair, wool, or silk camlets*, according as they are made of those materials.—*Figured camlets*, having figures printed upon them.—*Waved camlets*, having a wave imprinted upon them, as on tabbies.—*Water camlets*, such as undergo a certain preparation with water; but the water camlets of Verona are a kind of tabbies.

CAMLE'TTO (*Com.*) or *Camlettum*, a sort of fine worsted camlets or camelots.

CAMMARON (*Bot.*) vel *Cammorum*, κάμμαρον, the *Aconitum cammarum* of Linnæus.

CAMMOCK (*Bot.*) another name for the herb Rest-harrow.

CAMO'CA (*Ant.*) a garment of silk, or any precious stuff.

CAMOCLA'DIA (*Bot.*) the same as *Comocladea*.

CAMOMILE (*Bot.*) vide *Chamomile*.

CAMOU'FLET (*Mil.*) French for a stinking kind of combustible blown out of paper cases into the miners' faces while they are working in the galleries of the countermines.—*Camouflet* signifies also the sudden explosion of a pistol when miners encounter one another.

CAMP (*Ant.*) vide *Castrum*, and *Militia*.

CAMP (*Mil.*) the space of ground occupied by an army pitching its tents when in the field, and upon which all its apparatus, baggage, &c. are disposed according to the arrangements of the Quarter-Master-General, by whom the ground is marked out, and to every regiment its portion is allotted.—*Camp colour men*, the men who carry the camp colours.—*Flying camp*, the same as flying army.

CAMP CEILING (*Archit.*) a ceiling formed by an inclination of the wall on each side towards the plane surface in the middle, so as to form something like a coved ceiling. It is most frequently used in garrets, where there would otherwise be a deficiency in the height to clear the head.

CAMP-FIGHT (*Law*) the fighting of two champions or combatants in the field. 3 *Inst.* 221.

CAMP-QUARTERS (*Com.*) the quarters which the Siamese and other nations assign to the foreigners with whom they trade.

CAMPAGN (*Mil.*) the period within the space of a year that an army continues in the field without going into quarters, which is mostly during the spring and summer seasons.—*Winter campaigns* are so called when military operations are continued through the winter season, which is rarely the case.—*Campaign oven*, a portable oven made

of copper, and raised upon feet, so that fire may be made underneath.

CAMPANA (*Ecc.*) the name of a church bell; so called because the use of it was first introduced into the Christian Church by Paulinus, bishop of Nola, a town of Campania. *Hier.*

CAMPANA'CEÆ (*Bot.*) one of Linnæus's Natural Orders, including the bell-shaped flowers, as the Campanula, Convolvulus, &c.

CAMPANIFORM (*Bot.*) the same as *Campanulate*.

CAMPANILE (*Archit.*) a tower allotted for the bells in Italy.

CAMPANOLOGY (*Lit.*) the art of casting and ringing of bells, from *campana*, a bell, and *λόγος*, a doctrine.

CAMPANULA (*Bot.*) a diminutive of *campana*, a bell, a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*. *Generic characters.* CAL. *perianth* five-parted.—COR. *monopetalous*.—STAM. *filaments* five; *anthers* compressed.—PIST. *germ* angular; *style* filiform; *stigma* three-parted.—PER. *capsule* roundish; *seeds* numerous.

Species. The species are mostly perennials, as—*Campanula rotundifolia, glabra*, seu *Rapunculus sylvestris*, &c. Round-leaved Bell-Flower, a native of Britain.—*Campanula latifolia*, seu *maxima, Trachelium anglicum*, &c. seu *majus*, &c. Broad-leaved Bell-Flower, or Giant Throatwort, a native of Britain.—*Campanula rapunculoides hortensis*, or Rampion-like Bell-Flower, a native of Britain.—*Campanula Trachelium, Trachelium majus, Cervicaria major*, seu *Rapum sylvestre*, &c. Great bell flower, Great or Nettle-leaved Throat-wort, or Canterbury-Bell, a native of Britain.—*Campanula glomerata*, seu *pratensis Trachelium minus*, seu *Alpinum*, &c. seu *Rapunculus sylvaticus*, &c. Small or Clustered Bell-Flower, or Little Canterbury-Bell, a native of Britain.—*Campanula hederacea*, Ivy-leaved Bell-Flower, a native of Britain.—*Campanula cenisia*, seu *uniflora*, Ciliate Bell-Flower, a native of the Alps of Switzerland.—*Campanula petræa*, seu *Trachelium majus*, &c. Great Stone Throat-Wort. Some are shrubs, as—*Campanula fruticosa*, seu *Prismatocarpus fruticosus*, shrubby Cape Bell-Flower.—*Campanula tenella*, native of the Cape of Good Hope, &c. Some are biennials, as the—*Campanula thyrsoidea, Alopecurus Alpinus, Cervicaria major*, seu *Trachelium thyrsoides*, Long-spiked Bell-Flower, a native of the Alps.—*Campanula hirsuta*, seu *Rapunculus sylvestris*, Waved-leaved Bell flower, a native of Switzerland.—*Campanula patula*, seu *Rapuntium*, Spreading, or Field Bell-Flower, a native of Britain.—*Campanula rapunculus, Rapunculum, Rapuntium parvum, Rapunculus esculentus*, seu *Erinus Nicandri*, Rampion, a native of Britain. Some are annuals, as the—*Campanula hybrida, Speculum Veneris, Pentagonium, Prismatocarpus*, seu *Onobrychis*, &c. Corn Bell flower, Corn Violet, or Small Venus' Looking-glass.—*Campanula speculum*, seu *Onobrychis arvensis*, seu *Prismatocarpus speculum, Venus' Looking-glass*.—*Campanula prismatocarpus*, seu *Prismatocarpus nitidus*, Long-capsuled Bell-Flower, a native of the Cape of Good Hope, &c.

CAMPANULATA (*Bot.*) the same as *Linnæa*.

CAMPANULATE (*Bot.*) *campanulatus*, bellshaped; an epithet for the corolla, calyx, nectary, &c.; *corolla campanulata*, a corolla that grows wider towards the mouth, so as to resemble a bell, as in the Canterbury Bell; *calyx campanulatus*, a bell-shaped calyx, as in *Chetronia*; *nectarium campanulatum*, a bell-shaped nectary, as in *Narcissus*.

CAMPARTUM (*Archæol.*) any portion of a larger field or ground divided off.

CAMPE (*Zool.*) κάμπη, from *καμπή*, a flexure, because it curls itself when it creeps; a worm or grub with many feet, called a palmer, or caterpillar. It is also an epithet for all

- large fish, which were so called from their bending their tails.
- CAMPE (*Anat.*) a deflexion or bending, as in the perforations of the nostrils; also *the ham*, because it is usually bent; and any articulation. *Gal. de Usu. Parti.* l. 2, c. 2.
- CAMPE'CHE-WOOD (*Bot.*) Log-wood; a West Indian wood, from the *Hæmatoxyllum campechianum* of Linnæus; the wood is hard, and both the bark and the gum are gentle astringents.
- CAMP'HIRE-TREE (*Bot.*) or Camphor-Tree, the *Laurus camphora* of Linnæus; a tree so called because it yields the camphor, which is extracted by distilling the wood with water in pots stuffed with straw, when the camphor sublimes, and concretes upon the straw in the form of a grey powder. [vide *Camphor*]
- CAMP'HOR (*Chem.*) *camphura*, and in modern Greek *καφουρα*, is not mentioned by the ancient Greeks, but was introduced by the Arabians. It is a singular substance, dry, friable, of a white colour, an acrid bitter taste, and a penetrating smell. Boerhaave and others looked upon it to be a highly perfect simple and volatile resin, or an oil of a solid form and consistence; but modern chemists have pronounced it to be a substance so peculiar that it cannot be classed with either the oils or the resins. It is altogether volatile and inflammable, soluble in vinous spirits, oils, and mineral acids, but not in water, alcalies, or vegetable acids. Besides the common camphor just described, there is another species, procured from the volatile oils of several plants, as Rosemary, Sage, Lavender, &c.; and an artificial camphor, procured by treating oil of turpentine with muriatic acid.—*Oil of Camphor*, an oil which is procured by the solution of camphor in nitric acid.
- CAMP'HORA'SMA (*Bot.*) Turkey Balsam; so called from its camphor-like smell.
- CAMP'HORA'TA (*Bot.*) the *Camphorosma polyenem arvense*, *Selago corymbosa*, of Linnæus. *Bauh.*; *Raii*, &c.
- CAMP'HORATE (*Chem.*) camphoric acid combined with alkalies, earths, and metallic oxides, as the *camphorate* of alumine, the *camphorate* of ammonia, &c.
- CAMP'HORATED (*Chem.*) mixed or impregnated with camphire, as saline and camphorated liquors.
- CAMP'HORA'TUM OLEUM (*Med.*) a mixture of two parts olive oil, with one of camphor.
- CAMP'HORIC ACID (*Chem.*) an acid obtained by distilling camphor in nitric acid.
- CAMP'HORO'SMA (*Bot.*) from *camphora*, and *ἴσμος*, odor; Camphor-Smell. 1. A genus of plants, Class 4 *Tetrandria*, Order 1 *Monogynia*.
- Generic Characters.* CAL. *perianth* pitcher-shaped.—COR. none.—STAM. *filaments* four; *anthers* oval.—PIST. *germ* ovate; *style* filiform; *stigmas* acute. PER. *capsule* one-celled; *seed* single.
- Species.* The species are mostly shrubs, as—*Camphorosma paleacea*, seu *fruticosa*, native of the Cape of Good Hope.—*Camphorosma monspeliaca*, *Selago*, seu *Camphorata hirsuta*, seu *monspeliensium*, Hairy Camphorosma, native of Spain, &c. But some are perennials, as—*Camphorosma acuta*, *Camphorata altera*, *Camphorata congener*, seu *Anthyllis altera*, &c. Sharp-leaved Camphorosma, native of Italy.—*Camphorosma glabra*, *Camphorata glabria*, seu *Polyenemon*, Smooth Camphorosma, native of Switzerland, &c. and—*Camphorosma Pteranthus*, *Lonichea cervina*, seu *Pteranthus*, is an annual, and native of Arabia. *Bauh. Pin.*; *Park. Theat. Botan.*; *Raii Hist. Plant.*—*Camphorosma*, is also the *Dracocephalum Canariense* of Linnæus.
- CAMP'ICURSIO (*Ant.*) the exercise of training soldiers in marching.
- CAMPIDUCTO'RES (*Ant.*) officers who drilled or exercised the young soldiers in their postures and in the use
- of their arms: they were also called *doctores armorum campigeni*, or in the Greek *ἰπλοδιδασκαλοι*. *Veget.* l. 1, c. 1; l. 2, c. 23; *Salmas in Lamprid. Alex. Sev.* c. 53; *Vales in Ammian.* l. 15, c. 3.
- CAMP'IGENI (*Ant.*) vide *Campiductores*.
- CAMP'IPION (*Bot.*) an annual, the *Agrostemma* of Linnæus. The principal species are as follow; namely—Rose Campion, *Agrostemma coronaria*, a pretty garden flower, having a white tubular or swelling blossom, with red in the middle. When it becomes fixed in a place it grows as freely as a weed.—Corn Campion, or Cockle, a common weed in corn-fields.
- CAMP'TAULA (*Ant.*) a trumpeter. *Vopisc. Carin.* c. 19.
- CAMP'PUS MARTII (*Archæol.*) or *Maii*, an assembly of the people every year in March or May, where they confederated together to defend the country against all enemies. *Leg. Edw. Confess.*
- CAMP'PYLON (*Med.*) *καμπύλον*, from *κάμπτω*, to bend; a distortion of the eye. *Celsus*, l. 1, c. 6.
- CAMP'PYLOTIS (*Med.*) a preternatural incurvation.
- CAMP'NIUM (*Bot.*) the same as *Chalcas paniculata*.
- CAM'MUS (*Ant.*) 1. *καμμός*, a sort of snaffle or curb, with which spirited horses used to be kept in check. *Hesychius*; *Fest. de Verb. Signif.*; *Isid. Orig.* l. 2, c. 16; *Buleng. de Equit.* c. 17. 2. A sort of vessel made like a funnel, into which the judges used to cast their lots by which they passed sentence on criminals. *Schol. in Aristoph. Eq.* act. 3, scen. 2.
- CAN (*Mar.*) the vessel particularly used by seamen in drinking their grog.—*Can-buoy* [vide *Buoy*].—*Canhooks*, an instrument used for slinging a cask by the ends of its staves.
- CAN'A (*Archæol.*) a rod or distance in the measure ground.
- CAN'ABIS (*Bot.*) the same as *Bidens*.
- CAN'ADA BALSAM (*Bot.*) a balsam which is produced from the *Pinus balsamea*.
- CANADE'LLA (*Ich.*) a kind of sea-fish, not unlike the perch.
- CANAILLE (*Polit.*) a term among the French for the mob or rabble.
- CANA'L (*Hydraul.*) an artificial river, provided with locks and sluices, and sustained by banks and mounds. They are sometimes formed for ornament, as the canals of Versailles, Fontainebleau, and St. James's Park; but they are most commonly dug for commercial purposes, to expedite the inland carriage of goods from one place to another.
- CANAL (*Archit.*) the same as Flute.—*Canal of the larnier*, the hollow platfond, or the soffit, for preventing the rain-water from reaching the lower part of the cornice.—*Canal of the volute*, the channel on the face of the circumvolutions inclosed by a list in the Ionic capital.
- CANAL (*Surg.*) vide *Canalis*.
- CANA'L-COAL (*Min.*) otherwise called Bovey-Coal, the *Bitumen ampelites* of Linnæus, a compact jet-black glossy kind of coal, that burns with a bright white flame, like a candle; is easily kindled, and leaves a strong or sooty residuum. It is susceptible of a fine polish, and may, like jet, be made into trinkets. Specific gravity from 1.232 to 1.426.
- CANA'LES SEMICIRCULARES (*Anat.*) the three semi-circular canals placed in the posterior part of the labyrinth in each ear. They open by five orifices into the *vestibulum*.
- CANALICULA'TUS (*Bot.*) channelled; an epithet for a leaf.
- CANA'LIS (*Ant.*) from *καίω*, to gape; a reed or pipe, so called because it is hollow.
- CANALIS (*Anat.*) in the sense of a channel, may be applied to all the vessels of the body; but it is also used in application to particular parts, as—*Canalis arteriosus*, a blood-

vessel peculiar to the fœtus, which disappears after the birth. The blood passes through this vessel from the pulmonary artery into the aorta.—*Canalis nasalis*, a canal going from the internal canthus of the eye downwards into the nose: it is situated in the superior maxillary bone, and is lined with the pituitary membrane continued from the nose.—*Canalis Petitianus*, a triangular cavity, (so called from M. Petit, its discoverer,) between the two laminæ of the hyaloid membrane of the eye, in the anterior part, formed by the separation of anterior lamina from the posterior.—*Canalis sempctros*, the half bony canal of the ear.—*Canalis venosus*, another canal peculiar to the fœtus, that conveys the maternal blood from the porta of the liver to the ascending vena, and disappears after the birth. *Canalis* is also the name of the middle cavity or perforation in the vertebræ of the neck, through which the spinal marrow reaches from the brain.

CANALIS (*Surg.*) *σάλιν*, a hollow instrument like a reed, made either of wood, or reeds, and linen, which serves for embracing and holding a broken limb. *Hippocrat. de Fract. &c. et Gal. Com. Cel.* l. 8, c. 10; *Paul. Æginet.* l. 6, c. 106; *Schultet. Armament.* p. 1, tab. 23.

CANAN (*Com.*) a liquid measure of the kingdom of Siam, which the Portuguese call *choup*; it contains a pot, or near two pints, of Paris. One-fourth of the canan is called *loing*, the same as the French *chopine*.

CANARIENSIS (*Nat.*) Canary, or belonging to the Canary Islands; an epithet applied to plants and animals; so Canary Birds, &c.

CANARIES (*Mus.*) an old dance.

CANARINA (*Bot.*) a genus of plants, so named because it is a native of the Canaries, Class 6 *Hexandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* superior.—COR. monopetalous.—STAM. *filaments* six; *anthers* pendulous from the tip.—PIST. *germ* inferior; *style* conical; *stigma* clavated.—PER. *capsule* obtuse; *seeds* numerous. *Species.* The species are—*Canarina campanula*, seu *Campanula Canariensis*, &c. Canary Bell-flower, a perennial, native of the Canaries.—*Canarina Zanguebar*, native of Zanguebar.

CANARIUM AUGURIUM (*Ant.*) a sacrifice among the Romans, of a red dog, for the purpose of appeasing the fury of the dog-star on the approach of harvest.

Ovid. Fast. l. 4, v. 939.

*Est canis, Icarium dicunt, quo sidere moto
Tosta sistit tellus, præcipiturque seges
Pro cane siderio, canis hic imponitur aræ
Et, quare pereat, nil nisi nomen habet.*

Plin. l. 18, c. 3; *Fest. de Verb. Signif.*; *Alex. Gen. Dier.* l. 3, c. 12; *Salmas.*

CANARIUM (*Bot.*) a genus of plants so named, from *canari*, the vernacular name in the Malay language, Class 22 *Diœcia*, Order 5 *Pentandria*.

Generic Characters. CAL. *perianth* two-leaved.—COR. *petals* three.—STAM. *filaments* five; *anthers* oblong.—PIST. *germ* ovate; *style* scarcely any; *stigma* headed.—PER. *drupe* dry; *seed* nut ovate.

Species. The species are shrubs, as—*Canarium commune*, seu *vulgare*, seu *Mehenbethene*, native of the Moluccas.—*Canarium sylvestre*, a shrub, native of Amboyna.—*Canarium balsamiferum*, seu *odoriferum*, &c. a shrub, native of Amboyna.—*Canarium hirsutum*, seu *odoriferum*, &c. native of the Moluccas.—*Canarium microcarpum*, seu *mirinum*, native of the Moluccas.—*Canarium decumanum*, native of the Moluccas.

CANARY (*Orn.*) or Canary Bird, a well-known singing bird, the *Fringilla Canaria* of Linnæus.

CANARY-GRASS (*Bot.*) the *Phalaris* of Linnæus.

CAN/CAMUM (*Nat.*) a kind of gum brought from Arabia, very like myrrh. *Plin.* l. 12, c. 20.

to CANCEL (*Print.*) to throw aside any portion of a printed work, as single leaves or whole sheets, &c. and print it afresh.

CANCELER (*Falcon.*) is when a light-flown hawk in her stooping turns two or three times upon the wind to recover herself before she seizes her prey.

CANCELLARIA CURIA (*Archæol.*) the Court of Chancery.

CANCELLARII (*Ant.*) officers at the emperor's court who attended *ad Cancellus*, i. e. at the bars. *Vopisc. Carin.* c. 16.

CANCELLATION (*Law*) expunging the contents of an instrument by means of striking two lines through it in the shape of a cross; so called from *cancellus*, a cross-bar.

CANCELLATED (*Bot.*) *cancellatus*, cross-barred or latticed, an epithet for the involucre and capsule. [*vide Latticed*]

CANCELLER (*Falcon.*) *vide Cancelier*.

CANCELLI (*Archit.*) *κλιδοί*, trellis, or lattice-work, as in latticed windows, &c. made of cross-bars, of wood or iron; also the balusters or rails encompassing the bar of a court of justice; and the chancel of a church. *Schol. Aristoph. in Eq.* act 2, scen. 1; *Spartian. in Caracal*; *Ammian.* l. 30; *Cassiodor.* l. 11, ep. 6; *Anastas. Bibl. in Sixt. Papias. Element.*; *Oder. Vital.* l. 2.

CANCELLI (*Anat.*) the reticular substance in bones.

CANCELLUS (*Ent.*) a species of Cancer, under the division *Gammarus*, remarkable for the tenacity with which it keeps hold of whatever it fixes upon.

CANCER (*Ent.*) *καρκίνος*, from *καρπός*, rough; because it has a shell furnished with rough claws; the Crab, an animal frequently spoken of by the ancients. Aristotle mentions three species, namely—*Μαύζ*, *μῆα*, which is the largest of the kind;—*Παγυρός*, *pagurus*, otherwise called *Cancer marinus*.—*Cancer fluviatilis*, a variety of which was so much more swift than the rest as to have the name of *equus*. *Aristot. Hist.* l. 4, c. 2; *Plin.* l. 9, c. 31; *Ælian. Hist. Anim.* l. 17, c. 1; *Athen.* l. 3, c. 13.

CANCER, in the *Linnean system*, a genus of animals, Class *Insecta*, Order *Aptera*.

Generic Character. *Legs* six or eight, besides chelate claws; *feelers* six, unequal.—*Eyes* two, moveable.—*Mandibles* horny.—*Lip* triple.—*Tail* articulated.

Species. The species are distinguished into the following classes: 1. The Crab, having four filiform antennæ. 2. *Pagurus*, having pedunculate antennæ. 3. *Galathea*, having unequal antennæ. 4. *Astacus*, Lobster, Crawfish, &c. 5. *Squilla*, the Squill, having the shell of the thorax extremely short. 6. *Gammarus*, having very simple antennæ. 7. *Scyllarus*, having two biarticulate plates instead of the hinder antennæ.

CANCER (*Numis.*) that species of the cancer known among the ancients by the name of the Pagurus, was the symbol of Agrigentum, and other towns of Sicily, as it is commonly represented on medals. *Goltz. Mag. Græc.*; *Haverkamp. Parut. Sicil. Describ.*

CANCER (*Astron.*) the fourth sign in the zodiac, marked thus, ♋, which the sun enters on the 21st day of June, thence called the summer solstice. It is called in the Greek *ὀκταπύς*, i. e. eight-footed, or *επιστρόβαμον*, i. e. retrograde; in Latin also *Nepa*, *Astacus*, and *Cammarus*; in Arabic *Elsartan*, and consists, according to Ptolemy, of thirteen stars, to Kepler of seventeen, to Bayer of thirty-five, of which two are of the third magnitude, i. e. one in the claws, called by the Arabians *Azuben*, and the other in the southern foot. There are two others of the fourth magnitude, called by the Greeks *δνοι* or *δνισκοί*, *Asini* or *Aselli*, by Manilius *Jugulæ*; and a third of the same magnitude, in the breast of the Cancer, called by the Greeks *μεφελουιδής*, *φατνη*, and *συσφορή*; and in the Arabic *Mellef*.

According to the fables of the Greeks, the crab was transported to heaven at the request of Juno, because it had been slain by Hercules during his engagement with the serpent Python; but the evident design, both of the figure and the name of this constellation, is, to represent the apparent backward motion of the sun, in which it is said to resemble that animal. *Theophrast. de Vent, &c.; Arat. de Apparent.; Hipparchus ad Phænomen. seu Apparent. l. 3; Eratosthen. Characteris; Gem. Elem. Astron. c. 14; Ptol. Almag. l. 7, c. 5; Cleom. de Sphær.; Procl. de Sphær.; Plin. l. 18, c. 35.*—Tropic of Cancer, a small circle of the sphere, parallel to the Equator, from which it is $23\frac{1}{2}^{\circ}$ distant, and marks the sun's greatest northern declination. It is so called because it passes through the beginning of the sign Cancer.

CANCER (Med.) by this term, as appears from Celsus, the Roman writers understood what the Greeks called *Gangrene* or *Sphacelus*; and the disease, which now passes under the name of cancer, is the same as what the Greeks called *καρκίνωμα*, from *καρκίνος*, a crab; because, as Galen thinks, its puffed veins bore some resemblance to the claws of a crab. It was also called *lupus* by the Romans, because it consumed the body like a wolf. The cancer is an unequal tumour, with very elevated edges, of a livid colour, and extremely painful when it is attended with ulceration; it is called by Hippocrates *μυστήρ*, occult, in distinction from that which is ulcerated, and consequently denominated open. It is generated from black bile, of a corrosive quality, and rises in many parts, but principally infests the *uterus*, the breasts of women, and the glandular parts of the body. *Hippocrat. l. 6, aphor. 38; Gal. de Art. Curat. ad Glauc. l. 2, c. 10; Cel. l. 5, c. 28; Oribas de Morb. Curat. l. 3, c. 28; Aet. Tetrab. 4, serm. 4, c. 43; Paul. Æginet. l. 4, c. 26.*

Cancer is ranked by Cullen as a genus of diseases, in the Class *Locales*, Order *Tumores*, and has been distinguished into primitive, degenerate, blind, latent, or occult, ulcerated, and confirmed.—*Primitive cancer*, is one that comes of itself, appearing first about the bigness of a pea, causing a continual inward pricking pain.—*Degenerate cancer*, a cancer which succeeds an imposthume, or swelling, that is either obstinate or ill-dressed, and has never been occult.—*Blind, latent, or open cancer*, a primitive cancer, before it is grown large, and has been opened, in which state a cancer may remain for several years.—*Ulcerated or open cancer*, one that is grown larger than a primitive one, and has been opened.—*Confirmed cancer*, a malignant scirrhus humour, which is accompanied with all the symptoms of a cancerous affection, as burning shooting pains, a livid colour in the skin, &c.—*Cancer of the bone*, a disease in a bone, caused by a sharp humour, and succeeded by an ulcer of the flesh and skin.

CANCRENA (Med.) the same as *Gangrena*.

CANCRI (Ant.) the same as *Cancelli*.

CANCRI'NI versus (Poet.) a sort of verses, which may be read either backward or forward, as *Roma tibi subito, motibus ibit amor*.

CANCROIDES (Ent.) a species of *Scarabæus*, *Dermestes*, &c.

CANCROMA (Orn.) Boat-bill, a genus of animals, Class *Aves*, Order *Grallæ*, having the bill shaped like an inverted boat.

Generic Characters. Bill gibbous.—*Nostrils* small.—*Tongue* small.—*Toes* divided.

Species. The species are—*Cancroma cochlearia*, Crested Boat-bill.—*Cancroma cancropaga*, White bellied Boat-bill.

CANCROUM oris (Med.) Canker of the Mouth, a deep, irregular, foul, and fœtid ulcer in the inside of the lips and cheeks.

CANDEL (Bot.) the *Rhizophora gymnorrhiza* et *candel* of Linnæus.

CANDELA (Bot.) the *Rhizophora candel* of Linnæus.—*Candela regia*, the same as *Verbascum*.

CANDELA fumalis (Med.) an oblong mass, consisting of odoriferous powders employed in fumigation.

CANDELA'BRUM (Ant.) a candlestick.

CANDELA'RES (Bot.) the second Order in Linnæus' fragments of a Natural Arrangement.

CANDELA'RIA (Bot.) the same as *Verbascum*.

CANDENT (Chem.) hot in the highest degree next to fusion.

CAN'DI (Com.) or *cando*, a long measure in India, equal to about seven ells.

CANDIDA'TI (Ant.) those who among the Romans offered themselves dressed *candidâ veste*, in a white robe, as suitors for any office, whence the modern name of *candidatus* in the same sense. *Dionys. Hal. l. 2; Tertul. de Idol. c. 18; Pancirol. Notit. Dig. Imp. Occident. c. 73; Ursat. de Not. Roman apud Græv. Thes. Antiq. tom. xi.*—*Candidati Principis*, were the candidates whom the emperor recommended to public favour; also those who read the emperor's speech in the senate. *Quintil. Institut. l. 6, c. 3; Suet. in Aug. c. 56; Lamprid. in Sever. c. 43; Pancirol. Notit. Dig. Imp. Occident. c. 73.*—*Candidati milites*, privileged soldiers, who were clothed in white, and fought near the prince. Of these mention is made in an inscription at Rome. **HIC POSITUS EST ANTIOCHUS CANDIDATUS PRIMICER.** *Hieron. in Vit. Hilar. Ammian. l. 15, c. 5; Veget. de Re Mil. l. 2, c. 7; Salmas. in Capitol Gord.*

CAN'DIIL (Com.) a measure of capacity in India, by which the burden of a ship is estimated as it is by tons in Europe; 400 candiils being equal to 100 tons.

CANDISA'TIO (Chem.) candying or crystallizing sugar after it has been dissolved in water.

CANDITE'ERS (Fort.) frames to lay faggots or brushwood on to cover the workmen.

CAN'DLE (Mech.) a cylindrical or conical body made of tallow, wax, or spermaceti; whence they are called *tallow, wax, or spermaceti* candles. They are called moulds when they are made in a mould; and *rush-lights* when the wick is rush instead of cotton.—*Candlestick*, the stand in which candles are fixed.—*Candle-wood*, slips of pine, which are burnt instead of candles by the natives of America.

CANDLE-BERRY-TREE (Bot.) the *Myrica* of Linnæus; so called because candles are made of its berries in America.

CAN'DLE-BOMBS (Chem.) glass bubbles, with a narrow bore, which, after being filled with water, are stopped up, and passed through the flame of a light, which causes them to explode with a noise.

CAN'DLEMAS-DAY (Ecc.) the festival observed in commemoration of the purification of the Virgin Mary, on the second of February; so named from the number of lights used on the occasion, or from the consecration of the candles to be used in the ensuing year, that takes place on this day in the Romish Church.

CAN'DLE-STICK (Her.) is borne as a charge in the arms of the founders' company.

CAN'DOCK (Bot.) a weed that grows in rivers.

CANDO'U Purchasii (Bot.) a tree of Brazil, that is very similar to the cork-tree in its wood, and to the walnut-tree in its height.

CAN'DUM (Chem.) Candy sugar melted and crystallized.

CANDY-TUFT (Bot.) the *Iberis* of Linnæus, of which the Purple Candy-Tuft, *Iberis umbellata*, and the White Candy-Tuft, *Iberis amara*, are annuals; but the other species are perennials.

CANE (Bot.) a strong Indian reed; so called from the Hebrew קנה, the Greek κάνα, and the Latin *canna*, of which there

are two kinds, namely, the—Bambu, or Bamboo-cane, the *Arundo bambu*, a woody, hollow, round, knotted reed, growing to the length of forty feet, which serves a very great variety of domestic purposes in India.—Sugar-cane, the *Saccharum*, a perennial, of the reed tribe, remarkable for containing a juice, from which sugar is made. The skin of the sugar-cane is soft, and the spongy matter, or pith, which it contains is very juicy. The sugar-cane will not thrive in England, except in a hot-house, where it is propagated by slips taken from the older plants.

CANE (Com.) 1. A long measure of Montpellier, &c. equal to two yards and a half-quarter; that of Spain equal to one yard, and also to one and a half-quarter; that of Naples equal to two yards and a half; that of Marseilles equal to two yards and a half; that of Rome is eight palms; and thirty canes is equal to fifty-five and a half eils. 2. The quantity measured as a cane of cloth, &c. 3. A walking-stick, which consists of a cane. 4. A lance or dart made of a cane.

CANE/LLA (Bot.) from *canna*, a reed, because the bark resembled a reed, a genus of plants, Class 11 *Dodecandria*, Order 1 *Monogynia*.

Generic Characters. CAL. perianth one-leaved.—COR. petals five; nectary pitcher-shaped.—STAM. filaments none; anthers twenty-one.—PIST. germ superior; style cylindrical; stigmas two blunt.—PER. berry oblong; seeds roundish.

Species. The only species is the—*Canella alba*, *Winterana*, seu *Cubane Winterania Canella*, *Winteranus cortex*, *Laurus*, *Pseudo Cassia*, &c. *Cassia lignea*, &c. seu *cinnamomea*, seu *Cinnamomum Sylvestre*, &c. *Lignum*, seu *Cortex aromaticus*, *Arbor baccifera*, &c. Laurel-leaved *Canella*, a shrub, native of the West Indies.

CANE/ON (Med.) κανέον, the cover of a pot, used in uterine suffumigations. Foes. *Econom. Hippocrat.*

CANE/PHORÆ (Ant.) κανηφόροι, noble virgins of the Athenians; who were so called because they were wont, φέρειν, to carry, κῆνα, baskets, at the festival of the Panathenæa of Minerva. Schol. *Aristoph. in Acharn.*; *Harpocration.*; *Hesychius*.

CANE/PHORÍA (Ant.) the ceremony of carrying the baskets at the festival of the Panathenæa by the Canephoræ. [vide *Canephoræ*]

CANES operti (Archæol.) dogs with whole feet that are not lawed.

CANES venatici (Astron.) the Grey-Hounds, two northern constellations, otherwise named *Asterion* and *Chara*; in which Hevelius, by whom it was formed, reckoned twenty-five stars: the British Catalogue ten.

CANESTELLUS (Archæol.) a basket, or the name of a service by which land was held, that consisted in furnishing baskets. *Lib. Rub. Scacc.*

CANFARA (Archæol.) a trial by means of hot iron, which was formerly used in this kingdom. It is a sort of ordeal by fire, in which the accused carried hot irons in his hands; and if he came off unhurt, he was judged to be innocent. [vide *Ordeal*]

CAN/HOOK (Mar.) vide *Can*.

CANICA (Com.) a spice in the island of Cuba; a sort of wild cinnamon, having the taste of the clove.

CANICÆ (Ant.) brown coarse bread made of bran. *Fest. de Verb. Signif.*

CANICEPS (Ant.) a name given by Pliny to a sort of wild men, whom he describes as having dog's heads. *Plin.* 1. 7, c. 2.

CANICIDA (Bot.) another name for *Aconite*, because it kills dogs.

CANICIDIUM (Anat.) a dissection of living dogs. *Castel. Lex. Med.*

CANICULA (Astron.) a name given both to *Canis Major*

and *Canis Minor*, and also to *Sirius*, particularly by the poets, from which the dog days were called *dies caniculares*. [vide *Canicular*]

Horat. 1. 3, od. 13.

Te fragrantis atrox hora Canicula.

Pers. sat. 3, v. 5.

*En quid agis? Siccas insana Canicula messes
Jam dudum coquit.*

Aristot. sect. 1, prob. 1; *Plin.* 1. 2, c. 40; 1. 18, c. 28.

CANICULAR days (Chron.) *dies caniculares*, the Dog-days; a name given by the ancients to that period of the summer season, between the 15th of July and the 20th of August, when the constellation *Canicula* or *Canis*, and particularly the principal star in that constellation, called *Sirius*, *Canicula*, or Dog-Star, rises heliacally. For they ascribed the great heat, and the consequent diseases, which generally prevail at this season to the influence of that star [vide *Canicula* and *Canarium*]; but this supposition is now considered to be incorrect.—*Canicular year*, the Egyptian natural year; so called because it was computed from the heliacal rising of the *Canicula*, *Canis*, or Dog-star. [vide *Canicula* and *Canis*]

CANILICULUS (Anat.) a little canal.

CANINA appetentia (Med.) the same as *Bulimus*.—*Canina rabies*, the same as *Hydrophobia*.

CANINA (Bot.) an epithet for several plants, namely—*Brassica canina*, the *Mercurialis sylvestris* of Linnæus.—*Lingua canina*, the *Cynoglossum*.—*Malus canina*, the *Mandragora*.—*Rosa canina*, the Wild Briar.

CANINA'NA (Zool.) a species of serpent in America; so called because it may be treated as familiarly as a dog.

CANINUS (Anat.) canine; an epithet for the teeth, *dentes canini*, the four eye-teeth; so called from their resemblance to the teeth of the dog. They are the *Columellares* or *Comelli* of Varro and Pliny; and are called Eye-teeth, because their fangs extend nearly up to the eye. *Varr. de Re Rust.* 1. 2, c. 7; *Plin.* 1. 11, c. 38; *Isid. Orig.* 1. 11, c. 1.—*Caninus musculus*, the same as the *Levator Anguli oris*.

CANIPULUS (Ant.) a short sword.

CANIRAM (Bot.) a tree of Malabar, the span of which exceeds the grasp of two men, the *Strychnos nux vomica* of Linnæus. *Ravi Hist. Plant.*

CANIRUBUS (Bot.) the same as the *Rosa Canina*.

CANIS (Zool.) a genus of animals, Class *Mammalia*, Order *Feræ*.

Generic Character. Foreteeth, upper 6, lower 6.—Tusks solitary.—Grinders from 6 to 7.

Species. This genus comprehends animals that differ very essentially from each other in their habits, as the Dog, Wolf, Hyæna, Fox, and Jackal. The principal species are as follow, namely—*Canis familiaris*, the Dog, with all its varieties of Spaniel, Hound, Grey-Hound, Pointer, &c. [vide *Dog*]—*Canis lupus*, the Wolf, having its tail bent inward.—*Canis Mexicanus*, the Mexican Wolf, having the tail smooth, and bent downwards.—*Canis Thous*, having a greyish body, the size of a cat, the Surinam Wolf.—*Canis lycaon*, the Black Wolf.—*Canis hyæna*, the Hyæna, of a pale brown colour striped with black.—*Canis cocuta*, the Spotted Hyæna, being of a reddish brown colour spotted with black.—*Canis aureus*, the Jackal, or Lion's Provider, having a straight tail, and a pale tawny body.—*Canis vulpes*, the Fox.—*Canis Alopex*, the Brant Fox, having a straight tail, black at the tip.—*Canis Virginianus*, the Lagopus.—*Canis Lagopus*, the Arctic Fox.—*Canis crucigera*, the Cross Fox.—*Canis australis*, the Wolf Fox.—*Canis Cerdo*, the Fennee, or Zerda, a beautiful African and Asiatic animal, remarkable for the size of its ears, which stand up erect.

CANIS Major (*Astron.*) ὁ κύων, one of the 48 old constellations, called by Homer ἄστρ' ἀπάρης, an autumnal constellation, which, according to Ptolemy, contains 18 stars, to Kepler 13, to Tycho 13, to Bayer 19, to Hevelius 21, and to Flamstead 31; the principal of which is Σείριος, Sirius, the Dog-Star. According to the fables of the Greeks, the constellation *canis* was so called from the dog of Orion, the hunter, which was transported to heaven; but Hephæstion and Horus Apollo ascribe the name and figure to the Egyptians, who called it Sothis, and judged of the swelling of the Nile by its rising; wherefore they looked upon it to be the sentinel or watch of the year; and according to their hieroglyphic mode of writing represented it under the figure of a dog.—*Canis Minor*, another of the 48 old constellations, called by the Greeks προύβαν, and by the Latins *Antecanis*, because it rises before the *Canis major*. This name is now applied to the principal star in the *Canis minor*, which according to Ptolemy contains two stars, to Kepler 5, to Tycho 5, to Bayer 8, to Hevelius 13, and to Flamstead 14. The Greeks make this also to have been one of Orion's dogs, or, according to another fable, to have been transported to Heaven by Erigone, or the Virgin, daughter of Icarius; but in all probability the Egyptians were the inventors of this as well as the former constellation. The heliacal rising of these two stars being in the hottest season of the year, namely, in the latter part of summer, this period was denominated by the ancients *dies caniculares*, or Dog-days. [vide *Canicula*, and *Canicular Days*] *Arat. de Apparent.*; *Hipparch. ad Arat.*; *Eratoth. Characteris.*; *Cic. ex Arat. de Nat. Deor.* l. 2; *Ptol. Almag.* l. 7, c. 5; *Plin.* l. 18, c. 28; *Gem. Elem. Astron.* c. 14; *Hor. Apoll. Hierog.*; *Petav. Uranolog.*

CANISTER (*Ant.*) a canister or panier.
CANITIES (*Med.*) hoariness of the hair, grey hairs.
CANKER (*Med.*) see *Cancrum oris*.

CANKER (*Bot.*) *carcinoma*, a cancerous affection which occurs frequently in fruit-trees. It shows itself in a large spongy excrescence, which even in the driest weather discharges an acrid corroding ichor. Sometimes it is latent, and spreads far in the bark before it is discovered.

CANKER (*Chem.*) the rust of iron, brass, &c.
CANKER (*Vet.*) a disease in the feet of horses, consisting of a fungous excrescence with fibrous roots. The disease termed the *frush* will, when neglected, often turn to the canker.—*Canker* is also the name of a disease in the ears of dogs, and in the necks of pigeons, which is of a similar nature.

CANNA major (*Anat.*) the greater bone of the leg, called also *Focile majus* and *Tibia*.—*Canna minor*, the lesser bone of the leg, called also *Focile minus*.

CANNA (*Bot.*) a genus of plants, Class 1 *Monandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* three-leaved.—COR. monopetalous; *nectary* petal-like.—STAM. *filaments* none; *anther* linear.—PIST. *germ* roundish; *style* single; *stigma* linear.—PER. *capsule* roundish; *seeds* few.

Species. The species are perennials, as—*Canna indica*, *Carmacorus*, *Gladiolus indicus*, *Arundo indica*, seu *florida*, seu *Kalu Bala*, a native of Asia.—*Canna angustifolia*, *Cannacorus angustifolius*, *Arundo indica*, *Albara*, seu *Pacivira*, Narrow-leaved Indian reed, a native of America.—*Canna glauca*, *Cannoides*, seu *Cannacorus glaucophyllus*, a native of Carolina.—*Canna juncea*, a native of China.—*Canna flaccida*, a native of S. Carolina.—*Canna coccinea*, a native of the Indies.—*Canna lutea*, a native of the East Indies.—*Canna patens*, a native of the Indies.—*Canna gigantea*, native of S. Carolina.

CANNABINA (*Bot.*) the *Datisca* of Linnæus. *Tournef. Instit.*

CANNABIS (*Bot.*) κάννάβις, hemp, a well-known plant, the seeds of which, in decoctions and emulsions, have been recommended against coughs, &c. *Dioscor.* l. 3, c. 166; *Plin.* l. 19, c. 4; *Oribas. Med. Coll.* l. 11; *Act. Tetrab.* l. 1, serm. 1; *Paul. Æginet.* l. 7, c. 3; a genus of plants, Class 22 *Dioecia*, Order 5 *Pentandria*.

Generic Characters. CAL. *perianth* one-leaved.—COR. none.—PIST. *germ* very small.—PER. very small; *seed-nut* globose.

Species. The only species is—*Cannabis sativa*, *mas*, *er-ratica*, seu *semina*, an annual, native of Persia.

CANNACORUS (*Bot.*) the *Canna Indica* of Linnæus.

CANNEL-COAL (*Min.*) vide *Canal-Coal*.

CANNEQUINS (*Com.*) white cotton cloths brought from the East Indies, which are folded square, and are about eight ells long.

CANNETS (*Her.*) a charge in which ducks are represented without beak or feet.

CANNIONS (*Archæol.*) an old fashioned garment for the leg.

CANNISTER (*Mech.*) an instrument used by coopers in racking off wine.

CANNON (*Mil.*) any sort of gun which is too large to be used in the hand. On their first introduction cannons were distinguished by particular names, as, Queen Elizabeth's Pocket Pistol, a 60-pounder, Mounts-Meg, an 80-pounder, in the Tower of London; the Thunderer, an 80-pounder, at Berlin; the Terrible, an 80-pounder, at Malaga, &c. These names were exchanged for others more systematic, and of more general use, namely—

Name.	Pounders.	Cwt.
Cannon Royal, or Carthoun	48	90
Bastard Cannon, or $\frac{3}{4}$ Carthoun	36	79
Half Carthoun	24	60
Culverin	18	50
Demy-Culverin	9	30
Falcon	6	25
Saker {	lowest sort	5 13
	ordinary	6 15
	largest size	8 18
Basilisk	48	85
Serpentine	4	8
Aspik	2	7
Dragon	6	12
Syren	60	81
Falconet	3, 2, & 1	15, 10, 5

At present cannon, or pieces of ordnance, are distinguished by the weight of the ball they carry; as a 24-pounder, one that discharges a ball of 24 pounds; a 12-pounder, one that carries a ball of 12 pounds. Ship and Garrison-guns consist of 42, 32, 24, 18, 12, 9, 6, and 3-pounders. Battering-guns of 24, 18, and 12-pounders. Field Pieces of 18, 12, 9, 6, 3, 2, 1½, 1, and ½-pounders.

Parts of a Cannon. The parts of a cannon are as follow; namely,—The *reinforce*, that part of a gun next the breech, which is made stronger to resist the force of powder. This is divided into the first and second reinforce, which differ in size.—The *chace*, the whole space from the trunnions to the muzzle.—The *muzzle*, properly so called, is that part comprehended between the muzzle, astragal, and the end.—The *casable*, the hindermost part of the breech, from the base-ring to the end of the button.—The *casable-astragal*, the diminishing part between the two breech-mouldings.—The *neck of the casable*, the narrow space between the breech-moulding and the button.—The *breech* is the solid piece behind, between the vent and the extremity of the base-ring, which terminates the hind part of the gun, exclusive of the casable.—The *breech-mouldings*, the eminent parts, as

squares or rounds, which serve only for ornaments to the piece, &c.—The *base-ring* and *ogee* are ornamental-mouldings; the latter of which is always in the shape of the letter S, after the manner of the ogee in architecture.—The *vent-field* is the part from the vent to the first reinforce-astragal.—The *vent-astragal* and *fillets* are the mouldings and fillets at or near the vent.—The *charging cylinder* is all the space from the chace-astragal to the muzzle-astragal.—The *first reinforce-ring* and *ogee* are the ornaments on the second reinforce.—The *first reinforce-astragal* is the ornament between the first and second reinforce.—The *chase girdle* is the ornament close to the trunnions.—*Trunnions*, two solid cylindrical pieces of metal in every gun, which project from the piece, and by which it is supported upon its carriage.—*Dolphins*, two handles placed on the second reinforcing of brass cannons, resembling the fish of that name; they serve for mounting and dismounting the guns.—The *second reinforce-ring* and *ogee* are the two ornaments joining the trunnions.—The *chase-astragal* and *fillets*, the two last-mentioned ornaments jointly.—The *muzzle-astragal* and *fillets*, the joint ornaments nearest the muzzle.—The *muzzle mouldings*, the ornaments at the muzzle of a piece.—The *swelling of the muzzle*, the projected part behind the muzzle mouldings.—The *mouth of a cannon*, the entrance of the bore, or the hollow part which receives the charge.—The *vent*, that which, in small fire-arms, is called the *touch-hole*, a small hole pierced at the end, or near the end, of the bore or chamber, for the purpose of priming the piece with powder, or to introduce the tube in order when lighted to set fire to the charge.—The *chamber* is the place where the powder is lodged which forms the charge.

The tools employed in the use of cannon are as follow:—

Coins, or *wedges*, to lay under the breech of the gun in order to elevate or depress it.—*Handspikes*, which serve as levers to move and lay the gun.—*Ladles*, which serve to load the gun with loose powder.—*Rammers*, which serve to ram home the wads put upon the powder and shot.—The *sponge* is fixed at the opposite end of the rammer, and serves to clean the gun after it has been fired.—*Screws* are used to field pieces instead of coins, by which the gun is kept to the same elevation.—The *searcher* is an iron hollow, at one end, to receive a wooden handle, and, on the other end, has from four to eight flat springs pointed and turned outwards at the ends.—The *reliever* is an iron flat ring with a wooden handle at right angles to it: it is so called because it serves to relieve or disentangle the searcher, when any one of its springs is caught in a hole on its being introduced into the piece to search it after it is fired.—

Cannon-ball and *cannon-shot*. [vide *Ball* and *Shot*]

CANNON (*Print.*) one of the largest kinds of type or letter used in a printing office, which by some is supposed to be so called because it was used in the printing of canons, but more probably from its size.

CANNONADE (*Mil.*) the firing of several pieces of ordnance against any particular object.

CANNONEER (*Mil.*) the person who manages the gun.

CANNULA (*Surg.*) a tube of various figures introduced into orifices for the purpose of conveying any fluid, as pus from a wound, &c.

CANOE (*Mar.*) an Indian boat formed of the trunk of a tree that is hollowed out. The canoes made of the trunk of one tree keep that name as long as they are so small that not above three or four persons can go in them; when they are larger, those of America are called *pirogues*, and those of Guinea *chams*. Among the Greenlanders the man's canoe is called *kaiak*, that of the women *miak*; the latter is a large boat managed by the women for

transporting families and effects when they shift their encampments.

CANON of Scripture (*Bibl.*) from the Greek *κανων*, a rule; signifies that rule by which the genuine books of Scripture are distinguished from those which are either false or doubtful. The Scriptures consist of the Old and New Testament.

Old Testament. The Jews divided the books of the Old Testament into three classes; namely, the Law, the Prophets, and the Hagiography, which by them was called *Chetubim*.

The Law. The First Class comprehended five books; namely, 1. Genesis, so called from the creation of the world. 2. Exodus, from *ἔξοδος*, the departure of the Israelites out of Egypt. 3. Leviticus, so named from its contents, because it treats of the office and duties of the priest and Levites, and generally called the Levitical Law. 4. Numbers, so named from the numbering of the tribes that came out of Israel. 5. Deuteronomy, i. e. literally, *δευτέρου*, the second, and *νόμος*, law, because it contained a repetition, or recapitulation of the Law. These five books, which were written by Moses, are comprehended under the general name of Pentateuch, from *πέντε*, five, and *τέχος*, a volume.

The Prophets. The Second Class consisted of nine books; namely, 1. Joshua, so called from Joshua, the son of Nun, by whom it was written. 2. Judges, so called because it contained an account of those who immediately succeeded Moses and Joshua as rulers of the people. 3, 4. The two books of Samuel, or the First and Second Books of Kings, so named because they were written by Samuel, and contain an account, not only of himself, but also of the Kings Saul and David. 5, 6. The two books of Kings, or the Third and Fourth Books of Kings, which contain an account of the several Kings of Israel in the order of their succession. 7. Jeremiah, or the book written by Jeremiah. 8. Ezekiel, or the book written by Ezekiel. 9. The twelve minor Prophets, which were all included in one book.

The Hagiography. The third class comprehended nine books; namely, 1. Job, so named from the person whose history it contains. This book is ascribed to Moses. 2. The Psalms, or, as the Hebrew word *Thehelim* implies, the *volume of Hymns*, are ascribed to many different writers, the principal of whom are Moses, David, and Solomon. 3. The Proverbs, also called from the name of their author, the Proverbs of Solomon. 4. Ecclesiastes, or the Preacher, because this book, which was also written by Solomon, was more in the shape of moral discourses than the preceding. 5. The Song of Solomon. 6. Daniel, or the book written by Daniel. 7. Chronicles, called by the Greeks *παραλιπομένα*, remaining, because it details more at large the things passed over, or slightly mentioned, in the Books of Kings. 8. Esdras, the book written by Esdras. 9. Esther, which is ascribed to Esdras as the author; to which some added Ruth, and the Lamentations of Jeremiah. These books, amounting in all to twenty-two, constituted the Canon of the Old Testament as received by the Jews; to which the Romish Church have added six other books that were held by the former to be apocryphal; namely, 1. The Wisdom of Solomon. 2. Ecclesiasticus. 3. Tobias. 4. Judith. 5 & 6. Maccabees, which, by the Protestants, are ranked in the same class as they are by the Jews.

New Testament. The New Testament, which consists of twenty-seven books, is divided into four parts; namely, the Gospels, Acts of the Apostles, Epistles, and Revelation.

Gospels. The First Class comprehends the writings of the

CANON.

Evangelists, so called from *εὖ*, well, and *αγγελία*, a message; because these books contain the Gospel, or a message of glad tidings to all mankind. They are as follow: 1. Matthew, who wrote in Hebrew, and addressed himself to his own nation. 2. Mark, who wrote in Greek, and for the benefit of the Gentiles. 3. Luke, the most learned of the Evangelists, who wrote also in Greek. 4. John, who was the last, wrote his Gospel in Asia.

The Acts of the Apostles. The Second Class, embraces in one book the Acts of the Apostles, so called from its contents. It is ascribed to the evangelist Luke, and contains the history of the Church at its first commencement after the death of our Saviour.

The Epistles. The Third Class, includes, 1. Fourteen Epistles of St. Paul, nine of which were written to seven churches, and the five others to his disciples Timothy, Titus, and Philemon. 2. Two Epistles of St. Peter, which are called General, because they were addressed not to one church, city, or people, but to all the Gentiles. 3. Three Epistles general of St. John. 4. One Epistle general of St. James. 5. One Epistle general of St. Jude.

The Revelation. The Fourth Class, includes the book called the Revelation, or Apocalypse, which was written by the evangelist St. John, during his banishment to the island of Patmos, and contains an account of the revelation, or manifestation of hidden things, which was made to himself. The spurious or disputed books of the New Testament are still more numerous than those of the Old, being written for the most part by heretics, for the purpose of supporting their own particular opinions. [vide *Acts of the Apostles*]

The following is a list of all the books of the Old and New Testament, together with the number of chapters they contain, according to the order in which they are placed in our authorised version.

Books of the Old Testament.

Books.	Chapters.	Books.	Chapters.
Genesis	50	Ecclesiastes	12
Exodus	40	The Song of Solomon..	8
Leviticus	27	Isaiah	66
Numbers	36	Jeremiah	52
Deuteronomy	34	Lamentations	5
Joshua	24	Ezekiel	48
Judges	21	Daniel	12
Ruth	4	Hosea	14
I. Samuel	31	Joel	3
II. Samuel	24	Amos	9
I. Kings	22	Obadiah	1
II. Kings	25	Jonah	4
I. Chronicles	29	Micah	7
II. Chronicles	36	Nahum	3
Ezra	10	Habakkuk	3
Nehemiah	13	Zephaniah	3
Esther	10	Haggai	2
Job	42	Zechariah	14
Psalms	150	Malachi	4
Proverbs	31

Titus	3	I. John	5
Philemon	1	II. John	1
Epistle to the Hebrews.	13	III. John	1
The Epistle of James ..	5	Jude	1
I. Peter	5	Revelation	22

This body of Scripture is received into the Christian Church as the genuine word of God, on the concurrent testimony not only of Jews and Christians, but of the adversaries of both; to which is sometimes annexed the Apocrypha, as follows:—

Books.	Chapters.	Books.	Chapters.
I. Esdras	9	The Song of the Three Children.	
II. Esdras	16	The Story of Susanna .	1
Tobit	14	Bel and the Dragon ..	1
Judith	16	The Prayer of Manasseh.	
The Rest of Esther	6	I. Maccabees	16
Wisdom	19	II. Maccabees	15
Ecclesiasticus	51		
Baruch, with the Epistle of Jeremiah	3		

Phil. Jud. Oper.; Joseph. Antiq. &c.; 1 Polycarp. Epist.; Just. Mart. Apol. &c.; Iren. adv. Hæres.; St. Clem. Alexand.; Tertull. Apol. &c.; St. Chrysost. Homil. &c.; Orig. Comment. &c.; St. Cyp. Epist.; Arnob. con. Genti.; Lactant. Inst.; Euseb. Hist. Eccles.; Epiph. Hæc. &c.; Hieron. Catal. &c.; August. de Hæres. &c.; Isid. Orig. l. 6, c. 1, 2; Cotel. Pat. Apost. vol. 1; Cave. Hist. Lit.; Tillem. Hist. Eccles. tom. ii. pt. 1; Du Pin. Bibl. Ant. Eccles.; Stillingfleet. Orig. Sac.; Prid. Connect. &c. &c.

CANON (*Ant.*) a customary tribute or impost for tonnage—poundage, and also a payment for corn, &c. *Spart. Sever.* c. 8; *Lamprid. Heliogab.* c. 27.

CANON (*Ecc.*) a dignitary in the church. [vide *Canons*]

CANON is also applied in the Romish church to any rules, or formulas which serve as rules, as the—*Canon Religiosorum*, the book in convents which contained the rules and institutions of the house.—*Canon of the Mass*, a formula of private prayer used by the priest preparatory to his administering the sacrament.—*Pascal Canon*, a table of the moveable feasts, showing the day on which Easter falls, &c.—*Canon*, lastly, is a list of the saints acknowledged and canonized in the Romish church.

CANON (*Law*) a collection of ecclesiastical rules and constitutions taken from the ancient, general, and provincial councils. It consists of two parts; namely, decrees, called the *Decrees of Gratian*; and the *Decretals*, which contained the decretal epistles or rescripts of the popes.

CANON (*Math.*) a general rule for resolving all cases of a like nature in Geometry, Algebra, &c.: thus the last step of every equation is a *Canon*, which, if turned into words, becomes a rule for resolving all questions similar to the one proposed.—*Canon* is also the name for tables of sines, tangents, &c. whether natural or artificial.

CANON (*Mus.*) a method of determining the intervals of musical notes, which was invented by Ptolemy. *Ptol. Harmon.* l. 1, c. 8.

CANON, in modern music, a vocal composition in one or more parts, in which one takes the lead and the other follows. There are various kinds of Canons, as the simple, double, triple, diminished, reversed, inverted, &c.—*Canone chiuso*, or *Canone in Corpo*, a perpetual figure written upon one line, with certain marks to denote where the imitative parts begin.

CANON (*Surg.*) an instrument used in sewing up wounds.

CANON (*Vet.*) the cylindrical bone in the hinder leg of a horse, which is situated immediately below the hock.

CANON (*Print.*) vide *Cannon*.

CANON (*Mil.*) French for the barrel of any fire-arms, great or small.—*Canon chambré*, a piece not well cast, and on that account unfit for use.—*Canon secret*, pieces of ordnance so disposed on a battery as to be unperceived by the enemy.—*Canon double*, vide *Reveil-matin*.—*Canon rayé*, a rifle gun.

CANONIAI (*Med.*) *κανονίαι*, those having contracted bellies, as opposed to corpulent persons, according to Hippocrates and Galen. *Hippocrat. de Aer.*; *Gal. Exeges.*

CANONICAL (*Ecc.*) agreeable to the canons of the church, as *Canonical hours*, hours prescribed by the canons for prayers.

CANO'NICI (*Mus.*) the followers of Ptolemy's canon in music, in distinction from *Musici* who followed Aristoxenus and the Pythagorean method.

CANONIZATION (*Ecc.*) the enrolment in the canon of saints.

CANON-MOUTH *of a bit* (*Man.*) a round but long piece of iron, consisting sometimes of two pieces that couple and bend in the middle. Canon-mouths are designed to keep the horse in subjection.

CANONRY (*Ecc.*) or *Canonship*, an ecclesiastical benefice in some cathedral or collegiate church.

CANONS (*Ecc.*) dignitaries in a cathedral church. They are of several sorts, namely—*Regular Canons*, who still live in community, and to the practice of their rules have added the profession of vows; and—*Secular Canons*, who are lay canons that have been admitted into some chapter of canons. This distinction is principally observed in the Romish church.—*Cardinal Canons*, those who are incardinate, i. e. attached to some church, as priests are to a parish.—*Domiciliary Canons*, young canons who, not being in orders, had no right in any particular chapters.—*Foreign Canons*, those who did not officiate in the canonries to which they belonged.—*Mansionary* or *Residential Canons*, who are distinguished from the former by their officiating in their canonries.—*Lay* or *Honorary Canons*, those among the laity who, as a mark of honour and respect, have been admitted into some chapter of canons.—*Expectative Canons*, such as, without having any of the revenue, enjoyed the title and dignity of a canon.—*Minor Canons*, those who perform the duties of the cathedral service in the place of the canons.

CANO'PICON (*Bot.*) a sort of sponge. *Dios.* l. 4, c. 166.

CANOPITE (*Med.*) a collyrium for the eyes. *Cel.* l. 6, c. 6.

CANO'PUM (*Bot.*) the flower and bark of the Elder tree.

CANO'PUS (*Ast.*) 1. The name formerly given to a star in the second bend of Eridanus. 2. *κωνοπος*, a bright star, of the first magnitude, in the rudder of the ship Argo, which, according to Pliny and Manilius, was visible at Alexandria in Egypt; but not at Rhodes.

Manil. Astron. l. 1, v. 215.

*Nusquam invenies fulgere Canopum
Donec Nilias per pontum veneris oras.*

Gem. Elem. Astron. c. 2; *Vitruv.* l. 9, c. 7; *Strab.* l. 3;

Plin. l. 2, c. 70; *Petav. Uranomet.*; *Bay. Uranomet.*

The longitude of Canopus, in 1700, was 10° 52' in \oslash ; lat 72° 49'. The right ascension, in 1812, 94° 56' 46"; declination 52° 35' 48"; the annual variation in right ascension 20", in declination 1" 7.

CANOPY (*Archit.*) 1. A covering for a throne or an altar.

2. The label or projecting moulding which surrounds the heads of Gothic arches.

CANSCHI' (*Bot.*) the *Trewia* of Linnæus.

CANT (*Gram.*) a quaint sort of language affected by particular persons, or professions, for sinister purposes, and not authorized by established usage.

CANT (*Com.*) a sale by auction, so called, probably, from *cantare*, to sing or cry aloud; whence, in Scotland, an auction is called an *outcry*.

CANT (*Archit.*) a term expressing the position of any piece

of timber not standing square.—*Cant-moulding*, a moulding with a bevelled surface applied, instead of the echinus, to the capitals of columns.

CANT-PIECES (*Mar.*) pieces of timber inserted or annexed to the angles.—*Cant-timbers*, in French *couples devoyés*, those timbers which are situated at the two ends of a ship. They are so called because they are canted or raised obliquely from the keel.

CANTABILE (*Mus.*) or *Cantab.* a term implying that the performance must be sung.

CANTA'BRICA (*Bot.*) Lavender-leaved Bindweed, a herb, which, according to Pliny, was first discovered among the Cantabri in Spain, from whom it takes its name. *Plin.* l. 25, c. 8.

CANTABRICA, in the *Linnean system*, a species of *Convolvulus*.

CANTACON (*Bot.*) Garden Saffron.

CANTADOURS (*Mus.*) itinerant singers in Provence, who sprung up in the ninth century.

CANTALIVER (*Archit.*) vide *Cantilever*.

CANTANTE (*Mus.*) a term to denote the vocal part of a composition.

CANTA'O (*Com.*) a wine measure of three gallons in Alicant.

CANTAR (*Com.*) the same as *Cantaro*.

CANTARA (*Bot.*) the plant which bears St. Ignatius's beam.

CANTARELLI (*Ent.*) a species of beetles, which, being macerated in oil, are said to endue it with the virtues of oil of Scorpions. *Castell.*

CANTARO (*Com.*) 1. A weight, in Italy, of 150 pounds, or upwards. 2. A measure in Cochin.

CANTA'TA (*Mus.*) a piece of music for one, two, or more voices; and sometimes with one or more instruments, consisting of grave parts and airs intermingled or alternate.

CANTATILLA (*Mus.*) a small cantata.

CANTEEN (*Mil.*) 1. A suttlng-house for both officers and men. 2. A leathern or wooden machine for holding different utensils used by the officers. 3. A sort of tin-vessel for holding liquors, which is used by soldiers on their march.

CANTEL (*Archæol.*) a lump or mass.

CANTER (*Man.*) the well-known pace of a horse, which is a sort of easy gallop. It is however reckoned not to be the natural pace of any horse.

CAN'TERBURY-BELL (*Bot.*) the *Campanula trachelium, glomerata, et medium*, of Linnæus, which are all perennials.

CANTHARELLUS (*Bot.*) the same as the *Chantarellus* of Linnæus.

CANTHARI FIGULINI (*Chem.*) cucurbits made of potters' ware.

CANTHARIAS (*Min.*) a stone having the figure of a beetle upon it. *Plin.* l. 37, c. 10.

CANTHARIDES (*Med.*) Spanish flies, a species of shining beetle, of a golden, azure, or greenish colour, and of a fetid smell, which, when powdered and applied to the skin, cause an exulceration, whence they are used in blisters. This insect is classed under the genus *Lytta* in the Linnean system.

CANTHARIFERA (*Bot.*) the *Nepenthes* of Linnæus.

CANTHARINUS (*Ent.*) an epithet for a species of cimex, cerambix, &c.

CANTHARIS (*Ent.*) a genus of animals, Class *Insecta*, Order *Coleoptera*.

Generic Characters. *Antennæ* filiform.—*Thorax* mostly margined.—*Shells* flexile.

Species. The species are distinguished into those which have their feelers hatchet-shaped, filiform, or projecting.

CANTHARITES (*Nat.*) a kind of outlandish wine, mentioned by Pliny, l. 14, c. 7.

CANTHERIUS (*Surg.*) the cross beam between two posts in the machine contrived by Hippocrates for replacing the dislocated bone of the shoulder. *Hippocrat. πρ. ἀρθ.*; *Foes. Econom. Hippoc.*

CANTHARUS (*Ant.*) a name of several utensils among the Romans, as a jug or tankard, particularly the one sacred to Bacchus. Virgil calls it *gravis*, *Virg. ecl. 6, v. 17.*

Et gravis attrita pendebat cantharus ansa.

and Sidonius makes Bacchus, when he went in triumph, to carry the Cantharus and the Thyrsus:

Cantharus et thyrsus dextraque levaque feruntur.

and in this manner he is represented on medals, as in the annexed figure of a medal of Antoninus Pius, bearing on the obverse the head of the emperor crowned with laurel, the inscription *ΑΥΤΟΚΡΑΤΟΡΟΣ ΚΑΙ* *Cæs ANTΩNEINOC*

CEBασός ΥCEBης, i. e. *Imperator Caesar Antoninus Augustus Pius*; on the reverse, a figure of Bacchus, standing with a Cantharus and Thyrsus in his hands, and a tiger at his feet; the inscription *ΑΒΩΝΟΤΕΙΧΕΙΤΩΝ*, i. e. *Abonitichorum*, the inhabitants of Abonitichus, a town of Paphlagonia. *Plin. 1. 33, c. 2; Val. Max. 1. 6, c. 3; Goltz. Thesaur.; Vaillant. Numis. Græc.; Patin. Numismati. Imperat. Roman.; Harduin. Numm. Ant. Illustrat.; Spanheim. de Præstan. et Usu Numis.*

CANTHARUS is also the name for a water-spout, and the knocker of a door. *Plaut. Men. act. 1, scen. 2.*

CANTHERUS (*Archit.*) or *Cantherius*, a rafter or joist of a house that comes down from the ridge to the eaves. *Vitruv. 1. 4, c. 2.*

CANTHERUS (*Carpent.*) a tressel or horse to saw or cut timber on.

CANTHUS (*Ant.*) the iron with which the circumference of the cart-wheel is bound. The fello of the wheel, which, according to Quintilian, was a barbarous word first introduced by Persius. *Pers. sat. 5, v. 70; Mart. 1. 14, ep. 168; Quint. Inst. 1. 1, c. 5.*

CANTHUS (*Anat.*) *καθός*, the corner or angle of the eye. That next the nose is termed the internal or greater *Canthus*; and the farther is the external or lesser *Canthus*. *Ruff. Ephes. 1. 1, c. 4.*

CANTICÆ (*Ant.*) ancient dramatic soliloquies, supposed to have been introduced as interludes.

CANTICI (*Ecc.*) songs so called in the twelfth and thirteenth centuries, which were sung in honour of the Blessed Virgin, and the Saints and Martyrs.

CANTICLE (*Theol.*) a sacred hymn or song among the Hebrews, particularly applied to the Song of Solomon.

CANTICLE (*Mus.*) vocal soliloquies in the Greek tragedies.

CANTILENA (*Mus.*) the treble melody or upper part of any composition, in distinction from the bass and other inferior parts.—*Cantilena Scotica*, Scottish melody.

CANTILEVER-CO'RNICÉ (*Archit.*) a cornice formed of modillions or cantilevers.—*Cantilevers*, pieces of wood framed into any side of a house to support the mouldings and eaves over it; a sort of modillions.

CANTIMARONS (*Mar.*) or *Catimarons*, a kind of float or raft used by the inhabitants on the coast of Coromandel, in fishing.

CANTING (*Archit.*) the act of turning a plank or timber to see the opposite side.

CANTING-COINS (*Mar.*) short pieces of wood cut with a sharp ridge, to lie between the casks to prevent them from rolling against each other.

CANTION (*Chem.*) the same as *Saccharum*, or Candy.

CANTO (*Mus.*) or *Cant*, the melody or highest vocal part.—*Canto concertante*, the treble of the little chorus, or the part which one sings throughout.—*Canto fermo*, the ancient chants of the Romish church.—*Canto figurato*, another name for the *Canto fermo* in its cultivated state.—*Canto*

plano, another name for old chanting.—*Canto recitativo*, a speaking song.—*Canto ripieno*, the treble of the grand chorus. **CANTON** (*Geog.*) a division of a country, as the Cantons of Switzerland.

CANTON (*Her.*) an ordinary, so called because it occupies but a cantel or corner of the escutcheon. It is either dexter or sinister, i. e. on the right or left side of the escutcheon, and is the third of the chief. Dexter in a canton is the sign of a baronet's arms, as in the annexed example. "He beareth *gules* two lions passant, *argent*, between nine crosslets fitchet *or*. These are the arms of the *Acton* family."

TO CANTON (*Mil.*) to disperse troops into summer or winter quarters.

CANTONE (*Com.*) a measure in the Moluccas equal to five English pints.

CANTONE (*Archit.*) an epithet for a building, the angles of which are adorned with columns, pilastres, rustic quoins, &c.

CANTONED (*Her.*) in French *cantonée*, a cross between four figures.

CANTONMENTS (*Mil.*) distinct situations in towns and villages where the different parts of an army lie encamped.

CANTRED (*Archæol.*) or *Kantreff*, from *Centum*, a hundred, and *treff*, a town; a hundred in Wales, i. e. a hundred villages. *Stat. 28 Hen. 8; Mon. Anglic.*

CANTUARIENSIS AQUA (*Min.*) Canterbury waters in five wells near to each other, which are strongly impregnated with iron, sulphur, and carbonic acid gas.

CANTRUM (*Chem.*) or *Cantium*, the same as *Candum*, or Candy.

CANTUS (*Mus.*) the mean or counter tenor.—*Cantus Gregorianus*, the Gregorian chant, so called from St. Gregory its inventor, who improved upon that introduced by St. Ambrose.

CANVAS (*Paint.*) or *Canvass*, the cloth on which painters usually draw their pictures. It is smoothed over with a slick stone, then sized, and afterwards whited over, when it is called the *primed cloth*, because they take their first sketches on it.

CANVAS (*Mar.*) or *Canvass*, the cloth of which the sails are made, which are distinguished into degrees of fineness by the first eight digits; No. 1 being the coarsest and strongest.

CANVASS (*Mus.*) the model or first words whereon an air or piece of music is composed and given to a poet to regulate and finish. The canvass of a song contains certain notes which serve to determine the measure.

CANVASS (*Com.*) from *cannabis*, hemp; a coarse cloth of hemp, unbleached, which is wove regularly in little squares. It is used for working tapestry with the needle, &c.

CANVASS-BAGS (*Fort.*) bags filled with earth for raising a parapet in haste.

CANULA (*Surg.*) the same as *Cannula*.

CANUM (*Archæol.*) a duty paid to a superior, or lord of the manor.

CANUM-CERA'SUM (*Bot.*) the same as *Xylosteum*.

CANZONE (*Mus.*) signifies properly an ode or song; but is applied by musicians to a piece of instrumental music, when it signifies sonata: to vocal music, signifying cantata: and to any part of a sonata, to signify the same as allegro.

CANZONE'T (*Mus.*) a diminutive of Canzone, signifying a little air.

CAOPO'IBA (*Bot.*) a Brazilian tree, growing to the height and shape of a beech. *Raii Hist. Plant.*

CAO'UP (*Bot.*) a tree in the island of Maragnam, with leaves not unlike those of the apple tree, and the fruit like that of the orange. *Raii Hist. Plant.*

CAO'UTCHOUC (*Nat.*) the Indian name for *Indian Rubber*, a substance produced from the Syringe tree of Cayenne.

CAP, or *Bonnet* (*Her.*) a bearing in coats of arms.

CAP

CAP of Maintenance, or Cap of Dignity, is a cap of state made of crimson velvet, lined and turned up with ermine, as in the annexed figure. It is carried before the king of Great Britain at his coronation and other great solemnities. Such a cap was sent by Pope Julius the second, with a sword, to Henry the eighth, for his writing a book against Martin Luther.

CAP (Mar.) a square piece of timber placed over the head or upper end of a mast, in which is a round hole to receive the top or top-gallant masts, so that by these caps they are kept steady and firm in the tressel-trees.—**Cap of a Block,** a semi-circular projection from the sides and round the end of a block above the pins.—**Cap-Merchant,** the purser of a ship.

CAP of a Gun (Gunn.) vide *Apron*.

TO CAP (Cus.) to take off the cap, as under-graduates in the university do to their seniors.

TO CAP verses (Lit.) an exercise of the memory among school-boys, who, standing in a row, the first repeats a verse, then the second repeats another, proceeding where he left off, and so on with the rest.

TO CAP a Rope (Mar.) to cover the end of it with tarred canvas.

CAP (Archit.) the uppermost part of any assemblage of principal or subordinate parts. It is applied to the capital of a column, the cornice of a door, the capping or uppermost member of the surbase of a room, &c.

CAP (Bot.) pileus, the top of the fungus, in general shaped like a plate or bonnet, as in *fig. 1, 2,* and supported by *a,* the *stipes,* or Stalk, in *fig. 4.* In this body are the organs of generation. The different kinds of the cap are as follow, namely—flat, *planus,* forming a plane expansion, as in *fig. 3;* round, *convexus,* which is convex above, as in *fig. 1;* hollow, *concauus,* where there is a depression on the

Fig. 1.

Fig. 2.

Fig. 3.

Fig. 4.

upper surface; bossed, *umbonatus,* where there is a prominent point in the centre, as *b* in *fig. 4;* bell shaped, *campanulatus,* when it is very convex above, and spreads wide below, like a bell, as in *Agaricus cimetarius;* viscid, *viscidus,* when the upper surface is covered with a clammy exudation; scaly, *squamosus,* when it is covered with a number of imbricated scales of a different colour from its own, as in *Agaricus muscarius;* squarrose, *squarrosus,* when the scales stand up from the surface, as in *fig. 4;* halved, *dimidiatus,* when it forms only half the figure of a plate, and appears to have one side taken off, as in *Hydnum auriscalpium;* stipitate, *stipitatum,* when supported on a stalk; sessile, *sessilis,* seu *acaulis,* when it is not supported by a stalk. The parts of the cap are as follow, namely—The Boss, *umbo,* the centre of the cap, as *a,* *fig. 1* and *2,* and *b* in *fig. 4,* which in the latter figure is prominent.—The Gills, *lamellæ,* thin foliaceous membranes on the underside of the mushroom, as in *b b,* in *fig. 1,* and also in *fig. 2, 3.* These contain the capsules of the seed, and are peculiar to the genus *Agaricus.*—The Pores, *pori,* small holes on the underside of the cap, as if made with the point of a needle, peculiar to the *Boleti.*—The Prickles, *echini,* raised projecting points, which, like the pores, contain the organs of generation. They are peculiar to the genus *Hydnum,* as in *fig. 2.*—The Warts, *papillæ,* small round protuberances on the under surface.

CAP-MERCHANT (Mar.) vide *Cap.*

CAP-PAPER (Com.) a large sort of brown paper.

CAP

CAPA viela (Bot.) the *Cleome pentaphylla.*

CAPA-A'GA (Polit.) an old and experienced officer in the seraglio, who has the charge of instructing and superintending the Iconoglans, or Agamoglans.

CAPA/CITY (Law) or *capability,* the right which a body politic has to give or take lands or tenements, &c. or to sue for actions, &c.

CAPACITY (Geom.) the solid content of any body: thence our hollow measures of beer, wine, salt, &c. are called measures of capacity.

CAPAN (Com.) a coin in Sumatra, equal to about three-pence English money.

CAPA'RISON (Man.) or *caparasson,* a horse-cloth, or covering for the trappings or furniture of a horse.

CAPARISON (Mil.) includes the bridle, saddle, and housing of a military horse.

CAPA'RISONED (Her.) applied to a horse completely furnished for the field.

CAPE ASTER (Bot.) the *Cinerea amelloides* of Linnæus.

CA'PE (Law) a judicial writ relative to a plea of lands or tenements, which is so named from the word that denotes its chief end and purpose. It consists of the *Cape magnum* and *Cape parvum.*—*Cape magnum,* or the *grand Cape,* is a writ that lies before appearance, to summon the tenant to answer the default, or according to the *Old Natura Brevium,* where a man hath brought a *Præcipe quod reddat* of a thing touching a plea of land, and the tenant makes default at the day to him given in the original writ, then this writ shall go for the king to take the land into his hands; and if the tenant come not at the day appointed he loseth his lands. *Bract. l. 3, tract 3, c. 1; Vet. Nat. Brev. 161; Reg. Jud. fol. 1.*—*Cape parvum,* or *petit Cape,* a writ where the tenant is summoned in plea of land, and comes on the summons, and his appearance is recorded: if at the day given him he prays the view, and having it granted, makes default, then this writ shall issue for the king, &c. *Flet. l. 2, c. 4; Vet. Nat. Brev. 162.*—*Cape ad Valentiam,* a species of *Cape magnum,* or writ of execution, that lies where one is impleaded of certain lands, and he vouches to warrant another, but the vouchee does not come on the day appointed, then if the demandant recover against the tenant he shall have this writ against the vouchee. *V. N. B. 616.*

CAPE (Geog.) a promontory or head-land which projects into the sea farther than the rest of the coast.

CAPE du Batardeau (Fort.) a roof sloping on both sides, which covers the upper part of the batardeau constructed in the ditch at the salient angle of a bastion.

CA'PELET (Vet.) vide *Capellet.*

CAPELINE (Mil.) a kind of iron helmet worn by the French cavalry in the time of John Duke of Britany.

CAPELINE (Surg.) from the French *capeline,* a woman's hat, signifies a double-headed roller for the head.

CAPE'LLA (Archæol.) a chapel or church; also *Capella de Floribus,* a chaplet or garland of flowers.

CAPE'LLA (Astron.) literally a little goat; the name of a star of the first magnitude in Auriga. Its right ascension for the beginning of 1812 was 75° 42' 16", declination 45° 47' 51" N., annual variation in right ascension 6" 21. in declination 5" 09.

CAPE'LLA (Chem.) the same as the *Alembic.*

CAPE'LLA (Mus.) the music and the musicians belonging to a chapel or church.

CAPE'LLET (Vet.) a swelling of a wenny nature, to which horses are subject on the hock, and other parts.

CAPE'LETTE (Mil.) the Venetian militia: they were formerly reckoned the best troops in the service.

CAPE'LLUS (Archæol.) a cap or bonnet; whence *Capellus ferreus,* a helmet, or iron head-piece. *Hoved. p. 61; Blount. Ten.*

CAP'ER (Bot.) the flower or bud of the Caper-Bush, which

- is converted into a pickle.—Caper-Beard, a perennial, the *Zygophyllum* of Linnæus.—Caper-Bush, or tree, the *Caparis* of Linnæus.
- CAPER (*Mar.*) a privateer or pirate ship.
- CAPEROLANS (*Ecc.*) a congregation of religious in Italy, founded by Peter Caperoles in the 15th century.
- CAP'PETUS (*Med.*) κάπετος, a hole or notch cut in the *Bathron* or *Scannum*, which is a machine for restoring luxations. This hole serves for the strengthening or better managing the axis. *Hippocrat. de Art.*; *Gal. Comm.*; *Erot. Lex. Hippocrat.*; *Gorr. Def. Med.*; *Foes. Æconom. Hippocrat.*
- CAPHURA (*Chem.*) κάφερα, the same as *Camphora*.
- CAPHURÆ oleum (*Med.*) an aromatic essential oil distilled from the root of the cinnamon-tree.
- CAP'AGA (*Polit.*) vide *Capa-Aga*.
- CAP'IAS (*Law*) a writ or process of two kinds; the one called *Capias ad respondendum*, before judgment, where an original is sued out, &c. to take the body of the defendant to answer the plaintiff; and the other a writ of execution, which is of different kinds, as *Capias ad satisfaciendum*, *utlagatum*, &c.—*Capias ad satisfaciendum*, a judicial writ of execution that lies where a man recovers for debt, damages, &c. By this writ the sheriff is commanded to take the body of the defendant in execution, and him safely to keep till he satisfy the plaintiff his debt and damages.—*Capias utlagatum*, a writ that lies against a person that is outlawed in any action.—*Capias pro Fine*, a writ formerly against a plaintiff in whose favour judgment was given in the king's courts in cases of assault, &c. that he be arrested till he pay a fine for his wilful delay of justice, considering the offence to be a public misdemeanor as well as a private injury. By Stat. 5 and 6 W. and M. c. 12, no such writ shall issue for the *Fine*, but the plaintiff shall pay 6s. 8d. to the proper officer, and be allowed it against the defendant amongst his other costs.—*Capias in Wilthornam*, a writ whereby a sheriff is commanded to take other cattle or goods in lieu of those that were formerly unjustly taken and esloined, or otherwise withholden. *Stat. Marl. 52 H. 3, c. 23*; *Westm. 2, c. 13*; *E. 1, c. 11*; *19 H. 7, c. 9*; *Old Nat. Brev. 154*; *Reg. Orig. 82, 83*.
- CAPICATINGA (*Bot.*) a species of Acorn, a Brazilian plant. *Pison. de Med. Brasil.*
- CAP'ICULY (*Mil.*) another name for the Janizaries.
- CAP'IGI (*Polit.*) a porter or door-keeper of the Turkish seraglio.
- CAPILA'CTEUM (*Med.*) vide *Aphrogala*.
- CAPILLA'CEOUS (*Bot.*) vide *Capillary*.
- CAPILLAMENTA (*Bot.*) another name for the *Stamina* in plants. *Columel. de Re Rust. l. 4, c. 11*.
- CAPILLA'RES (*Bot.*) a name given by Ray, Boerhaave, and Morison to a class of Ferns.
- CAPILLARY (*Nat.*) *capillaris*, from *capilla*, hair; an epithet for any thing like hair.
- CAPILLARY (*Anat.*) an epithet for the extreme ramifications of the arteries and veins.
- CAPILLARY (*Bot.*) *capillaceus*, or *capillaris*, long and fine, like a hair, an epithet for the leaves, as in *Ranunculus aquatilis*, *Artemisia capillaris*; the filaments, as in *Dipsacus*; the pappus, or down, as in *Sonchus*, *Lactuca*, &c.; the style; and the glands, as in *Ribes*, *Scrophularia*, &c.
- CAPILLARY Tubes (*Phy.*) small pipes, of the fineness of a hair, by which various natural phænomena are displayed, particularly in regard to fluids.
- CAPILLA'TIO (*Surg.*) a capillary fracture of the cranium, so called from its resembling *capillus*, a hair, in fineness.
- CAPILLI'TIUM (*Bot.*) 1. Vide *Capillamenta*. 2. *Capillitium*, or Hair-Net, a reticulated collection of hairs that serve to fasten the seeds of some species of Fungi, as in *Cribaria vulgaris*.
- CAPILLA'RUM *defluvium* (*Med.*) a falling off of the hair. [vide *Alopecia*]
- CAPILLUS (*Anat.*) signifies properly the hair of the head, but is made to signify hair in general.
- CAPILLUS (*Bot.*) a measure which is the diameter of a hair, or the twelfth part of a line.—*Capillus Veneris*, Maiden-Hair, the *Adiantum* of Linnæus.
- CAPIPLE'NIUM (*Med.*) a barbarous word, used to signify a continual heaviness or disorder in the head, called by the Greeks *καπιλένια*.
- CAPISCOLUS (*Ecc.*) an officer who superintended the choir, who is otherwise called the Chanter, or Precentor.
- CAPISTRATIO (*Med.*) vide *Phimosis*.
- CAPISTRUM (*Ant.*) besides its ordinary meaning of a bridle, was employed to denote, 1. A kind of muzzle or ligature, which was used by ancient trumpeters to secure the cheeks from bursting with the violence of the exertion, and also to modulate the sounds by tempering the inflation of the breath. It is called in Greek *φωβεία*. *Schol. Aristoph. in Vesp. p. 470*; *Plut. Sym. l. 7, quest. 8*; *Hesyclus*; *Suidas*. 2. A band to tie up the vine to the top of the stake. *Columel. l. 4, c. 20*. 3. A cord to hold up the wine-press, and keep it tight. *Cat. de Re Rust. c. 12*; *Turneb. Adv. l. 8, c. 6*; *Voss. Lex. Etymol.*; *Salmas. Exercitat. Plin. p. 582*.
- CAPISTRUM (*Surg.*) bandages used about the head, resembling a horse's head-stall. *Castell. Lex. Med.*
- CAPITA (*Ant.*) *vel navia*; a game among the Roman youth similar to our Heads and Tails, which consisted in throwing up a coin that had on one side the figure of Janus with his two heads, and on the reverse that of a ship. *Macrob. Sat. l. 1, c. 7*.
- CAPITA (*Law*) distribution or succession per capita, i. e. to every one an equal share of the estate, when all the claimants claim in their own right, as kindred in an equal degree, and not *jure representationis*.
- CAPITA (*Bot.*) heads in plants, or those globose receptacles of the seed which by their figure represent a head.
- CAPITAL, from *caput*, the head, an epithet for what relates to the head, both in the natural and figurative signification.
- CAPITAL crime (*Law*) such a crime as subjects the offender to the loss of head or life.
- CAPITAL (*Geog.*) the capital or chief city in any country or district.
- CAPITAL (*Print.*) or *capital letter*, the larger kind of letter, which is used in the composition of titles, or as initial letters at the commencement of periods, &c.
- CAPITAL (*Archit.*) the uppermost part of a column or pilaster, serving for its head or crowning, placed immediately over the shaft, and under the entablature. The capital in all the orders is divided from the shaft by some small member, as an astragal, or a fillet, or a channel; but it varies as to the number and form of the mouldings. The Doric Capital consists of *Trachelion*, a Neck, which is a continuation of the shaft with its fluting, several Fillets, from three to five in number, an Ovolo, and an Abacus.—The Ionic Capital consists of an Ovolo, a Band, or Fes-toon, with Volutes, and a thin, moulded Abacus.—The Corinthian Capital consists of a Vase, with two rows of leaves attached to the vase, Volutes, and Caulicoli, which spring between each two of the upper row of leaves, the whole of which is crowned with an Abacus.—The Tuscan Capital is the simplest and most unadorned of any, consisting mostly of no more than three members, namely, an Abacus, an Ovolo, or Quarter-Round, and under that a Neck, or Collarine.—The Composite Capital is so called because it is composed of members taken from the other orders, as an Ovolo from the Doric, an Astragal, together with Scrolls or Volutes, from the Ionic, a double row of

leaves from the Corinthian.—*Angular capital*. [vide *Angular*].—*Capital of a baluster* is similar to those of the Doric or Tuscan Orders.—*Capital of a lantern*, the covering by which it is terminated, either in a bell shape or that of a cupola, &c.—*Capital of a triglyph*, the plat-band, or projecting-band, over a triglyph.—*Capital of a niche*, a sort of small canopy over a shallow niche.

CAPITAL (*Com.*) the stock or fund which any trader employs in trade or commerce.—*Capital stock*, the sum of money which the partners of a trading company jointly contribute to be employed in trade, as the capital stock of the Bank of England.

CAPITAL line (*Fort.*) an imaginary line dividing any work into similar and equal parts, as a line drawn from the angle of the polygon to the point of the bastion, or from the point of the bastion to the middle of the gorge.

CAPITAL lees (*Mech.*) the strong lees made from potashes.

CAPITAL medicines (*Med.*) the principal preparations in the shops of apothecaries, as Venice treacle, &c.

CAPITAL ship (*Mar.*) a ship of the line.

CAPITALE (*Law*) a thing which is stolen, or its value. *Leg. H. 1, c. 59.*—*Capitale vivens*, live stock. *Leg. Athelstan.*

CAPITALIA (*Med.*) the same as *Cephalics*.

CAPITALIS Dominus (*Law*) vide *Capite*.

CAPITANEI (*Archæol.*) a denomination formerly given to the nobility in Italy.

CAPITATÆ (*Bot.*) the first division of the twenty-first order, i. e. *Compositæ Capitatæ* of Linnæus' Fragments of a Natural Arrangement. *Lin. Phil. Bot.* Also the second division of the first order, in the class *Syngenesia*, in his artificial system.

CAPITATÆ is also the name of a class in Ray's system, comprehending the thistles, and such other compound flowers as grow into a head.

CAPITATE (*Bot.*) *capitatus*, an epithet for a stigma; *stigma capitatum*, the stigma which grows in the form of a hemisphere; and for a whorl, *verticellus capitatus*, a capitated whorl, when the flowers stand so thick as to form a hemisphere, as in *Phlomis tuberosa*.

CAPITATION (*Law*) *επισηφάλασιον*, a numbering by the head; also a Poll-Tax, called by Appian *φορὸς των σωμάτων*, a tribute on the body. *Dionys. Halicarn. Antiq. l. 4; Plut. de Puer. Instit.; Appian in Syriac.; Tertull. Apologet.*

CAPITE censi (*Ant.*) *οὐ τὸ δευτερόν τελεῖντε*, the poorer sort of people, who in assessments were valued at nothing, but only named, and reckoned as citizens. *Sallust.; Bud. in Pandect. p. 133; Sigon. de Ant. Jur. Civ. Roman. apud Græc. Thes. Antiq. Roman. tom. 1, p. 37.*

CAPITE (*Law*) or in *Capite tenere*, a sort of ancient tenure, whereby a man held lands of the king immediately, as of the crown, whether by knight's service or in socage. This ancient tenure was of two sorts, one principal and general, which was of the king, as *caput regni et caput generalissimum omnium feodorum*; the other special or subaltern of a particular subject, who was called *caput feudi seu terræ illius et capitalis Dominus*, because he was the first who granted land in such manner of tenure. Tenures in *Capite* are now abolished; and by stat. 12 Car. 2, c. 24, all tenures are now turned into *free* and *common Socage*. *F. N. B. 5; Kitch. 129; Dyer, 44; Blount Ten.*

CAPITELLUM (*Chem.*) the same as *Alcmbic*; also a lixivium.

CAPITELLUM (*Bot.*) vide *Capitulum*.

CAPITILLITIUM (*Ant.*) Poll-money.

CAPITILLIVIUM (*Med.*) a bath or lotion for the head.

CAPITIS Obliquus Inferior et major (*Anat.*) vide *Obliquus Inferior*.—*Capitis Par Tertium Fallopii*, vide *Complexus Minor*.—*Capitis Posticus*, vide *Rectus Major*.—*Capitis Rectus*, vide *Rectus Minor*.—*Capitis Vena*, vide *Cephalica Vena*.

CAPITITIUM (*Ant.*) a covering for the head. *Stat. 1, H. 4*

CAPITO Anadromus (*Ich.*) a fish of the cod kind living both in rivers and seas, so called on account of its great head.

CAPITOLA'DE (*Cook.*) a particular way of dressing fowls, &c.

CAPITOLINI (*Ant.*) those who presided at the Capitoline games, so called from their inhabiting the Capitol at Rome. They were erected into a college by M. Fur. Camillus, the Dictator. *Liv. l. 5, c. 50.*—*Capitolini Ludi*, the Capitoline games instituted by the Romans in commemoration of the deliverance of the Capitol at the time that the city was taken by the Gauls. Poets used to recite their verses at these games. *Liv. l. 5, c. 50, &c; Plut. Quæst. Roman. 52; Tertull. de Spectac. c. 5; Kipping. Antiq. Roman. l. 2, c. 6.*

CAPITO'UL (*Polit.*) or *capitol*, an appellation given to the chief magistrate in Thoulouse.

CAPITULA Ruralia (*Law*) assemblies or chapters held by rural deans and parochial clergy within the precinct of every distinct deanery.

CAPITULAR (*Archæol.*) *Capitulare*, *κεφάλαιον*; an epithet for any writing distinguished by capital letters, particularly the books containing the ordinances of the kings, which were called *Capitulares libri*, and the ordinances themselves *Capitularia*, as the "Capitular of Charlemagne."

CAPITULARS (*Ecc.*) members of an ecclesiastical chapter.

to **CAPITULATE** (*Mil.*) to surrender any place, or body of troops, on certain conditions.

CAPITULATION (*Mil.*) 1. The conditions on which any place or body of troops is surrendered. 2. The terms which are sometimes made with men on their enlisting.

CAPITULATION (*Polit.*) a contract which the emperor of Germany used to enter into, with the Electors, previous to his election; by this he engaged to defend the church and the empire, and to preserve inviolate the laws, rights, and privileges, not only of the whole empire, but of every particular principality.

CAPITULI Agri (*Archæol.*) headlands, or lands lying at the head or upper end of the furrows. *Kenn. Paroch. Antiq. p. 137.*

CAPITULIFORMIS (*Bot.*) an epithet for a flower formed like a *capitulum*, or head.

CAPITULUM (*Ant.*) a transverse beam in the military engines of the ancients, wherein were holes for the strings which served to work them up and down.

CAPITULUM (*Ecc.*) signified generally a chapter, but particularly a chapter in the Bible; whence *ire ad capitulum*, to go to a lecture on a chapter of the Bible; also the apartment where the lecture was read.

CAPITULUM (*Bot.*) or *Head*, a mode of inflorescence, or a manner of flowering, when several flowers form a kind of head or ball. The *capitulum* is of various forms; namely, *globosum* seu *sphæricum*, globose or spherical, as in the annexed figure, which represents the *capitulum* of the *Gomphrena globosa*, Clover; so likewise *foliosum*, leafy, when the head is surrounded with leaves; *comosum*, tufted, having leaves at the point, as in *Bromelia ananas*; *nudum*, naked, when it is devoid of leaves; *terminale*, when it stands on the point of the stem; *axillare*, axillary, or standing in the angles of the leaves.

CAPITULUM (*Anat.*) a small head, or protuberance of a bone received into the concavity of another bone.

CAPITZI (*Hist.*) or *capigi*, officers among the Turks who guard the gate of the grand Seigneur's palace.

CAPIVA'RD (*Zool.*) an amphibious animal of Brazil, called a Water-Dog, having a body like a hog, a head like a hare, and no tail.

CAPIVI (*Bot.*) or Capevi-Tree, a tree of Brasil, the *Copaifera officinalis* of Linnæus, which yields the balsam of Capivi.

CAPLAN (*Com.*) a small fish on the coast of Newfoundland, which is used as a bait in fishing for cod.

CAPNELÆUM (*Nat.*) καπνέλαιον, a resin which flows spontaneously; Foesius supposes it to be so called from the smoke which it yields when put near the fire. *Gal. de Comp. Med. sec. Loc. l. 2; Foes. Econom. Hippoc.*

CAPNIAS (*Min.*) καπνιας, a kind of jasper, so called from its resembling smoke, καπνι, in colour. *Plin. l. 37, c. 9; Act. Tetrab. l. 1, serm. 2, c. 56.*

CAPNIAS (*Bot.*) a sort of vine producing part white, and part black grapes. *Theoph. de Caus. Plant. l. 5, c. 3.*

CAPNISTON (*Med.*) a sort of oil prepared of several sorts of spices and oil, the former of which are kindled, and the latter suffumigated.

CAPNITIS (*Min.*) καπνίτις, a thin sort of cadmia which adheres to the arches and sides of the furnaces. *Plin. l. 34, v. 10. [vide Cadmia]*

CAPNITIS (*Min.*) vide *Capnias*.

CAPNOIDES (*Bot.*) the herb Fumitory.

CAPNOMANCY (*Ant.*) καπνομαντεία, a sort of divination by the smoke of sacrifices, according to the windings and contortions which they made in ascending.

CAPNO'RCHIS (*Bot.*) a species of Fumitory.

CAPNOS (*Bot.*) the herb Fumitory.

CAPO MOLA'GO (*Bot.*) the *Piper Indicum* of Linnæus.

CAPO'LLIN (*Bot.*) a Mexican plant with leaves like those of an almond or a cherry. *Hernand. apud Raii Hist.*

CAPON (*Nat.*) a castrated cock which is generally fattened for the spit.

CAPONNIÈRE (*Fort.*) a covered lodgement of about four or five feet broad, with a parapet to support planks laden with earth. There is also a *Demi Caponnière*, which is a passage made in a dry ditch, and only defended towards the enemy by a parapet or glacis.

CAPO'T (*Gam.*) a term, at the game of picket, when all the tricks of cards are won.

CAPOTE de Faction (*Mil.*) a large great coat with a hood or cowl, which is worn by sentinels in bad weather.

CAPO'TES (*Bot.*) the *Crateva marmelos* of Linnæus.

CAPOUCH (*Ecc.*) a friar's hood.

CAPPADINE (*Com.*) a sort of silk, with which the shag of some rugs is made.

CAPPA'NUS (*Ent.*) an extremely pernicious worm which adheres to and gnaws the bottoms of ships.

CAPPARIS (*Bot.*) κάππαρις, Caper-Bush, a shrub, the trunk and fruit of which are pickled for food, and are also used medicinally, particularly in complaints of the spleen. *Hippoc. de Morb.; Dioscor. l. 2, c. 204; Plin. l. 20, c. 15; Gal. de Simpl. l. 7; Paul. Ægin. l. 7, c. 3.*

CAPPARIS, in the Linnean system, a genus of plants, Class 12 *Polyandria*, Order 1 *Monogynia*.

Generic Characters. CAL. perianth four leaved; leaflets ovate.—COR. petals four.—STAM. filaments numerous; anthers oblong.—PIST. germ pedicelled; style none; stigma obtuse.—PER. berry corticose; seeds numerous.

Species. The species are shrubs, as *Capparis spinosa*, *pedunculis unifloris*, &c. *aculeata*, *retuso folio*, *seu spinosa*, &c. Prickly Caper Bush, native of Europe.—*Capparis ovata*, *pedunculis unifloris*, &c. *seu spinosa*, *Sicula*, &c. *seu folio acuto*, native of Sicily, Spain, and the north of Africa.—*Capparis Ægyptia*, *seu pedunculis*, &c. native of Egypt.—*Capparis tomentosa*, *seu spinosa*, *floribus*, &c. native of Senegal.—*Capparis acuminata*, *seu pedunculis unifloris*, &c. native of the East Indies.—*Capparis Zeylanica*, &c. *pedunculis*, &c. *seu spinosa*, &c. native of Ceylon.—*Capparis horrida*, *seu arborea*, &c. native of Coromandel.—*Capparis erythrocarpos*, *pedunculis*, &c. native of Guinea.—*Capparis sepiaria*, *pedunculis*, &c.

seu Arbuscula baccifera, &c. native of India.—*Capparis citrifolia*, *seu spinosa*, &c. native of the Cape of Good Hope.—*Capparis corymbosa*, *seu floribus*, &c. native of Senegal.—*Capparis maritima*, *pedunculis*, &c. *seu cordifolia*, &c. native of the Marianne Islands.—*Capparis panduriformis*, native of the Mauritius.—*Capparis baducca*, *inermis*, &c. *seu Baducca*, native of the East Indies.—*Capparis torulosa*, *seu Breynia arborescens*, &c. native of Jamaica.—*Capparis ferruginea*, *seu Cratæva fruticosa*, &c. native of Jamaica.—*Capparis grandis*, *seu arbore*, native of Ceylon.—*Capparis Jamaicensis*, *seu pedunculis multifloris*, &c. native of Jamaica.—*Capparis verrucosa*, *seu pedunculis multifloris*, &c. native of Carthæna.—*Capparis amplissima*, *inermis*, &c. *seu pedunculis unifloris*, &c. native of Hispaniola.—*Capparis cynophallophora*, *seu pedunculis*, &c. *flexuosa*, &c. *seu arborescens*, &c. *Morisonia flexuosa*, *Breynia fruticosa*, &c. *Cynophallophorus*, *seu Penis caninus*, &c. *seu Acacia affinis*, &c. native of South America.—*Capparis saligna*, *seu foliis lineari*, &c. native of St. Cruce.—*Capparis linearis*, *seu pedunculis*, &c. native of Carthæna.—*Capparis Breynia pedunculis*, &c. *Cynophallophora*, &c. *seu Breynia foliis*, &c. native of Jamaica. *Prosp. Alpin. Hist. Nat.; Ger. Herb.; J. Bauh. Hist. Plant.; C. Bauh. Pin.; Park. Theat. Botan.; Raii Hist. Plant.; Tournef. Institut. de Re Herb.; Boerhaav. Ind.*

CAPRA (*Ant.*) the goat was an emblem of several towns in Greece, which were called by the name of Ægæa, as in the annexed figure of a medal struck by the town of Ægea, in Cilicia, bearing the inscription ΑΙΓΑΕΩΝ.

Hard. Numm. Ant. illust.; Pellerin. Rec. des Med.

CAPRA (*Zool.*) the Goat, a genus of animals, Class *Mammalia*, Order *Pecora*.

Generic Character. Horns hollow, compressed.—Fore-teeth lower eight.—Tusks none.—Chin bearded.

Species. The principal species are the *Capra ægigrus*, the Common Goat, which includes several varieties.—*Capra ibex*, the Ibex, a wild gregarious species, native of Arabia.—*Capra Caucasica*, the Caucasian Goat, native of Mount Caucasus.

CAPRA (*Astron.*) or the She-goat; a name given to the star *Capella*, on the left shoulder of *Auriga*, sometimes to the constellation *Capricorn*, and sometimes to a northern constellation, having three stars.

CAPRÆ saltantes (*Met.*) fiery meteors or exhalations which sometimes appear in the atmosphere, not in a straight line, but with windings and inflections.

CAPRA'RIA (*Bot.*) a genus of plants, Class 14 *Didynamia*, Order 2 *Angiospermia*.

Generic Characters. CAL. perianth one-leaved; divisions linear.—COR. monopetalous; divisions oblong.—STAM. filaments four; anthers cordate.—PIST. germ conical; style filiform; stigma cordate.—PER. capsule oblong-conical; seeds very many.

Species. The species are perennials, biennials, shrubs, &c. as—*Capraria biflora*, *seu foliis alternis*, &c. *seu curvasavica*, *seu peruviana*, &c. *seu Gratiolæ affinis*, &c. *seu Lysimachie peruviana*, &c. Shrubby Goat-weed, or Sweet-weed, a perennial, native of Peru and the West Indies.—*Capraria lucida*, *seu foliis oppositis*, &c. Shining *Capraria*, a biennial, native of the Cape of Good Hope.—*Capraria lanceolata*, *seu foliis oppositis*, &c. Willow-leaved *Capraria*, a shrub, native of the Cape of Good Hope.—*Capraria semiserrata*, *seu foliis lanceolatis*, &c. a native of St. Martha.—*Capraria undulata*, *seu foliis oppositis*, Waved-leaved *Capraria*, a shrub, native of the Cape of Good Hope.—*Capraria humilis*, *seu pubescens*, Dwarf *Capraria*, an annual, native of the East Indies.—

Capraria durantifolia, seu *Stemodia durantifolia*, seu *Phelypæa erecta*, &c. seu *Veronica caule hexangulari*, &c. native of Jamaica.

CAPRA'RIOUS (*Ant.*) the slave who took care of the goats, the goatherd.

CAP'PREA (*Zool.*) a roe, roebuck, or deer.

CAPREOLA'RIS (*Med.*) an epithet for such vessels as twine about like the tendrils of vines, as the spermatic vessels, &c.

CAPREOLA'TA (*Bot.*) a creeping plant of Brazil.

CAPREOLATE plants (*Bot.*) from *Capreolus*, a tendril; plants which have tendrils like the vine, as the cucumber, &c.

CAPREOLS (*Carpent.*) the struts or braces of a trussed roof.

CAPREOLUS (*Anat.*) the Helix of the ear; so called on account of its tortuosity.

CAPREOLUS (*Bot.*) the clasp or tendril, by which vines and other creeping plants fasten themselves to those things which are intended for their support. *Varr. de Re Rust.* l. 1, c. 31.

CAPRICA'LEA (*Orn.*) a kind of wild goose, a little bigger than a raven.

CAPR'ICCIO (*Mus.*) Italian for a loose irregular species of composition, in which the composer, without any restraint, continually digresses from his subject.

CAPRICCIO'SO (*Mus.*) an Italian epithet to express that the movement at the beginning of which it is written, is to be played in a fantastic, free style.

CAPRICE'RVA *Occidentalis* (*Zool.*) from *caper*, a goat, and *cervus*, a stag; a West Indian deer, participating both of the nature of the deer and stag, affording the West Indian Bezoar.—*Capricerva Orientalis*, the deer in which the East Indian Bezoar is found.

CAPRICORN (*Astron.*) *αγέκερας*, the goat; a southern constellation, and a sign of the zodiac, which the sun enters about the 21st of December; or the winter solstice, to which the poets allude.

Arat. de Apparent. v. 285.

— αὐτὰρ ἔγε πρότερος καὶ νεῖθε μᾶλλον
Κέκλιται αἰγόνερος, ἵνα τρέπῃ ἡελίοιο
Μὴ κείνω ἐνὶ μῆνι περικλύζοιο θαλάσσης
Πεπταμένω ἐνὶ μῆνι περικλύζοιο θαλάσσης
Πολλὴν κερήμευα, ἐπεὶ ταχύνεται εἰσὶν.

Hor. Carm. l. 2, od. 17.

seu tyrannus
Hesperia Capricornus undæ.

Propert. l. 4, eleg. 1, v. 108.

Lotus et Hesperid quid Capricornus aquid.

Manil. Astron. Poet. l. 4, v. 779.

*Tu Capricorne, regis quicquid sub sole cadente
Est positum —*

This sign, which is marked thus, ♄, to represent the horns of a goat, is fabled to have been Pan, who, in the war of the giants, was transported to heaven in the shape of a goat. Macrobius, who calls *Cancer* and *Capricorn* the gates of the sun, makes the latter sign to represent his ascending motion after the manner of the goat which climbs the rocks. This constellation contains, according to Ptolemy and Tycho, twenty-eight stars; to Bayer and Hevelius, twenty-nine; to Flamstead, fifty-one.—*Tropic of Capricorn*, a small circle of the sphere parallel to the equator, passing through the beginning of *Capricorn*, or the winter solstice, which is the sun's greatest southern declination, namely, 23° 27' 46". *Hipparch. ad Arat.*; *Eratosth. Characteris.*; *Cic. de Nat. Deor.* l. 2, c. 44; *Hygin. Astron. Poet.*; *Ptol. Almag.* l. 7, c. 5; *Gemin. Elem. Astron.* c. 4; *Procl. de Sphær.*; *Cleom. de Sphær.*; *Macro. Sat.* l. 1, c. 21; *Achill. Tat. Isagog.*; *Pelav. Uranolog.*; *Bay. Uranomet.*; *Ricciol. Almag. nov. &c.*

CAPRICO'RNETUS (*Chem.*) Lead.

CAPRIFICA'TION (*Bot.*) husbanding, or the dressing of

wild fig-trees; also the cutting of bark trees that they may grow bigger. *Plin.* l. 15, c. 19.

CAPRIFICIA'LES *Dies* (*Ant.*) the dog-days, in which women used to sacrifice under a fig-tree. *Plin.* l. 11, c. 15.

CAPRIFICUS (*Bot.*) the same as the *figus*.

CAPRIFO'LIUM (*Bot.*) the same as *Lonicera*.

CAPRIGENOUS (*Zool.*) *Caprigenus*; an epithet signifying born of a goat, or the goat kind.

CAPRIMULGA (*Zool.*) a large species of viper that is not poisonous; so called from *capra*, a she-goat, and *mulgeo*, to milk; because it was supposed to suck the milk from the goats in the night time. *Castel. Lex. Med.*

CAPRIMULGUS (*Orn.*) Goat-sucker, a bird distinguished for its immensely wide gape. It is a genus of the order *Passeres*, in the Linnean system.

Generic Character. Bill slightly curved.—*Mouth* extremely wide; *ears* very large.—*Tongue* pointed.—*Tail* not forked.—*Legs* short.

Species. The species are *Caprimulgus Europæus*, in French *l'Engoulevent*, European or Nocturnal Goatsucker.—*Caprimulgus Megacephalus*, Great-headed Goatsucker.—*Caprimulgus grandis*, in French *le grand Tbijau*, Grand Goatsucker.—*Caprimulgus strigoides*, Strigoid Goatsucker.—*Caprimulgus Jamaicensis*, seu *Guirea guerea*, Jamaica Goatsucker.—*Caprimulgus guianensis*, in French *le Montvoya de la Guiane*, Guiana Goatsucker.—*Caprimulgus carolinensis*, in French *Engoulevent de la Caroline*, Carolina Goatsucker.—*Caprimulgus brachypterus*, in French *l'Engoulevent roux*, Short-winged Goatsucker.—*Caprimulgus villatus*, Banded Goatsucker.—*Caprimulgus incanus*, seu *vociferus*, in French *l'Engoulevent criard*, Virginian Goatsucker.—*Caprimulgus albicollis*, White-throated Goatsucker.—*Caprimulgus Asiaticus*, Bombay Goatsucker.—*Caprimulgus Africanus*, in French *l'Engoulevent à collier*, Bombay Goatsucker.—*Caprimulgus Indicus*, Indian Goatsucker.—*Caprimulgus Cayanus*, in French *l'Engoulevent de Cayenne*, White-necked Goatsucker.—*Caprimulgus semitorquatus*, White-collared Goatsucker.—*Caprimulgus torquatus*, Gold-collared Goatsucker.—*Caprimulgus Popetue*, in French *l'Engoulevent popetue*, Popetue Goatsucker or Night Hawk.—*Caprimulgus forficatus*, in French *l'Engoulevent à queue fourche*, Fork-tailed Goatsucker.—*Caprimulgus novæ Hollandiæ*, New-Holland or Crested Goatsucker.

CAP'RIO'LA (*Bot.*) the herb dog's tooth.

CAPRIO'LE (*Mus.*) a caper or leap in dancing like a goat's leap.

CAPRIO'LES (*Man.*) leaps of *firma*, à *firma*, or such as a horse makes in one and the same place, without advancing forwards, and that in such a manner, that when he is in the air, and at the height of his leap, he yerks or strikes out his hind legs even and near. A capriole is the most difficult of all the high manege or raised airs, differing from the *coussade* in this, that the horse does not show his shoes; and from the *balotade* in this, that in the latter he does not yerk out.

CAPRIZANS (*Med.*) *δοξαδίζων*, a sort of irregular and unequal pulse; so called by Herophilus, because in its motion it resembled the leaping of a goat. *Gal. de Diff. Puls.* l. 1, c. 29.

CAPRISANT pulse (*Med.*) the same as *Caprizans*.

to CAPRIZATE (*Med.*) to leap like a goat; a term applied to the pulse.

CAPS (*Gunn.*) the coverings made of leather, which serve the same purpose as tompons to preserve the bores of guns and howitzers from the rain.

CAPSA (*Ant.*) κάψα, κιβωτός. 1. A receptacle for books, cloaths, &c. *Diosc.* l. 3, c. 26. 2. Something whose bottom is a contexture of iron wire.

CAPSA'RIOUS (*Ant.*) κιβωτοφορος καμψαρμος. 1. A servant that waited on noblemen's children to school, and carried their books for them, whom Juvenal calls "Custos an-

gustæ vernula capsæ." *Schol. Juven. sat. 10, v. 116; Suet. in Ner. c. 36; Ulp. legg. 13, ff. de Manum. Vind. 2.* One who was hired to keep people's clothes while they were in the bath. *Paul. leg. 3, § ult. de Offic. Praef. Vig.; Epiphani. Hæres. de Adamit.; Rhodig. Antiq. Lect. l. 25, c. 20.*

CAPSE/LLA (*Bot.*) a name for *Echus*, i. e. *Echium* or Viper's Bugloss. *Marcel. Empir. c. 20.*

CAP'SICUM (*Bot.*) Guinea Pepper, the fruit of which is the strongest kind of Pepper, known better by the name of Cayenne Pepper. The plant is so called from *capsa*, a bag, which it's pods resemble in shape.

CAPSICUM, in the *Linnean system*, a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* one-leaved.—COR. *monopetalous*; tube very short; border spreading; divisions broad.—STAM. *filaments* five; *anthers* oblong.—PIST. *germ* superior; *style* filiform; *stigma* obtuse.—PER. *berry* without pulp; *receptacles* exsuccous; *seeds* very many.

Species. The principal species is an annual; but the rest are shrubs, as—*Capsicum annuum*, *Piper Indicum*, &c. seu *Vallia-capo-molago*, Annual Capsicum, or Cayenne Pepper, native of South America.—*Capsicum baccatum*, seu *caule fruticoso*, &c. seu *fructu minimo*, &c. seu *minus*, &c. seu *frutescens*, seu *rubrum minimum*, seu *Piper siliquosum*, seu *brasilianum*, &c. Small fruited Capsicum, or Bird Pepper, native of the Indies.—*Capsicum Sinense*, seu *caule fruticoso*, &c. seu *caule floribus*, &c. Chinese Capsicum, native of China.—*Capsicum grossum*, seu *caule suffrutescente*, &c. seu *fructu longo*, &c. seu *Piper Indicum*, &c. Heart-shaped Capsicum, or Bell Pepper, a perennial or shrub, native of India.—*Capsicum frutescens*, seu *caule fruticoso*, &c. seu *brasilianum*, seu *Indicum*, seu *Capo-Malago*, Shrubby Capsicum, a shrub, native of the Indies.—*Capsicum cerasiforme*, seu *caule fruticoso*, a shrub. *J. Bauh. Hist. Plant.; C. Bauh. Pin.; Ger. Herb.; Park. Theat. Botan.; Raii Hist. Plant.; Tournef. Inst. de Re Herb.; Boerhaav.*

TO CAPSIZE (*Mar.*) to upset or overturn a ship, boat, or any other body.—“*Capsize the coil of rope,*” the order to turn it over.

CAPSQUARES (*Gunn.*) a name given to the strong plates of iron which come over the trunnions of a gun, and keep her in her carriage. The capsquare is fastened by a hinge to the prize plate, so that it may lift up and down. It forms the part of an arch in the middle to receive a third part of the trunnions; for two thirds are let into the carriage, and the other end is fastened by two iron wedges, which are called *forelocks* and *keys*.

CAPSTAN (*Mar.*) in French *Cabestan*, a strong massy column of timber in the form of a truncated cone, and having its upper extremity divided into several squares, with holes in them, to receive the bars or levers, as in the annexed figure, where the parts are represented as follow: A, the step in which the spindle works; BB, the beams under the lower and middle decks; CC, the planks of those decks; D, the iron pawl rim; E, the pawl rim; F, the lifter for raising the messenger; GG, the chocks; HH, the whelps; I, the trundle-heads; K, the barrel; L, the partners; M, the drum-head; N, the pawls; O, the spindle. There are two

capstans in a ship, the fore and the main capstan. The

fore-capstan is placed in the fore part of the ship, abaft the foremast; the *main-capstan* abaft the mainmast. The sea phrases connected with the use of the capstan are as follow:—*To man the capstan*, in French *mettre du monde au cabestan*, to place the sailors at it in readiness to heave.—*To rig the capstan*, in French *armer, ou garnir le cabestan*, to fix the bars in their respective holes, &c.—*To surge the capstan*, in French *choquer au cabestan*, to slacken the rope wound round upon it.—*To heave in at the capstan*, in French *vire au cabestan*, to go round with it, by pushing with the breast against the bars, and drawing in any rope of which the purchase is created.—*To come up the capstan*, in French *devenir*, to turn the capstan the contrary way, thereby letting out some of the rope upon which they had been heaving.—*To pawl the capstan*, in French *mettre les linguets au cabestan*, to fix the pawls to prevent it from recoiling during any pause of heaving.—*Capstan barrel*, the main post of it.—*Capstan bars*, the bars, levers, or pieces of wood put in the capstan holes, in order to wind any thing.—*Jeer capstan*, the machine placed between the mainmast and the foremast, used to heave upon the jeer-rope or upon the viol, and to hold off by, when the anchor is weighing.—*Spindle of a capstan*, the main body of it.—*Whelps of a capstan*, short pieces of wood made fast to it to hinder the cable from coming too high, in turning it about.

CAPSULA (*Anat.*) a diminutive of *capsa*, a chest; a little bag or chest.—*Capsula cordis*, the same as *Pericardium*.—*Capsula communis, Glissonii*, a production of the *Peritoneum*, including the *vena porta* and *biliary duct* in the liver.

CAPSULA (*Chem.*) an earthen vessel in form of a pan, wherein things are put that are to undergo a violent operation by fire.

CAPSULA (*Bot.*) a sort of pericarp, opening in a determinate manner, and containing many seeds. The parts of a capsule are the following, namely,—The Partition, *dissepimentum*, a firm membrane that intersects and divides the inner cavity of a capsule, as *b b b b*, in fig. 1, of a capsule cut transversely.—The Cells, *loculumenta*, the spaces between the partitions, *a a a a*, in fig. 1, and *b*, in fig. 2.—The

Column, *columella*, a filiform body, that passes through the middle of the capsule, and to which the partitions are attached, as *c*.—The Valves, *valvulae*, from the outward coat of the capsule, which bursts longitudinally in several parts, as in fig. 1.—The Suture, *sutura*, a deep furrow, which appears on the outside of a coat.

Different sorts of Capsules.

Capsules are distinguished by the number of their cells, valves, and seeds, as follow:—Unilocular, *unilocularis*, when there are no divisions, as in *Trientalis*; bilocular, as in *Hyoscamum*; trilocular, *trilocularis*, as in *Lilium*; quadrilocular, as in *Euonymus*; multilocular, as in *Nymphæa*; bivalved, having two valves, as in *Chelidonium*; trivalved, as in *Viola*, &c.; two seeded, *bisperma*; two, three, or multiseeded. Capsules are moreover distinguished as to their formation into tricoccus, *tricoeca*, when a trilocular capsule appears as if three were grown together, as in the *Euphorbia*, *Ricinus*, &c.; berried, *baccata*, when the coat is fleshy and soft; corticated when the external coat is hard, and the internal soft, as in *Magnolia*, &c.; woody,

- lignosa*, when the coat is very hard, but still bursts in valves. As to their mode of bursting, capsules differ materially, some opening at the top, others at the base, and others in the middle. Some are elastic, and open with a spring; others are inflated or puffed up like a bladder.
- CAPSULÆ atrabilaricæ** (*Anat.*) *Glandulæ superrenales*, or *Renēs succenturiati*, Glandulous bodies lying on the upper part of the kidneys.—*Capsulæ seminales*, the extreme parts of the *Vasa deferentia*, which have their cavities dilated after the manner of capsules.
- CAPSULÆ RES artericæ** (*Anat.*) from *capsulæ*, the arteries of the renal glands; so called because they are enclosed by a capsule.—*Capsulares venæ*, Branches from the emulgents which go into the renal glands.—*Capsulares seminales*, vide *Capsulæ seminales*.
- CAPSULARIA ligamenta** (*Anat.*) Capsular ligaments; also called *mucilaginosā ligamenta*, because they contain many glands to separate the Synovia.
- CAPSULATE pods** (*Bot.*) from *capsa*, a chest; the little short seed vessels of plants.
- CAPSULATED** (*Bot.*) inclosed in any thing, as a walnut in its green husk.
- CAPTAIN General** (*Mil.*) the general or commander in chief of an army. By the constitution the King is *captain general* of all the forces of Great Britain.—*Lieutenant Captain*. 1. The commanding officer of a colonel's company or troop in every regiment, who commands as the youngest captain. 2. The Captain's second, or the officer who commands under the captain, and in his absence.—*Captain reformed*, one who, upon a reduction of the forces on the termination of war, loses his company, yet keeps his rank and pay, whether on duty or not.—*Captain on half-pay*, one who loses his company on the reduction of an army, and retires on half pay until seniority puts him into duty and full pay again.—*Captain en Second*, or *Second Captain*, one whose company having been broken is joined to another to serve under the captain of it.—*Captain of halberts*, or *of black bills*, those who, during the reigns of our ancient kings, had the charge and direction of a body of men called *halberts*, or *black-bills*.
- CAPTAIN of a ship of war** (*Mar.*) or *Post Captain*, in French *Capitaine de haut bord*, an officer qualified to command any ship of war, from a first rate down to a ship rigged sloop.—*Captain of a Merchant ship*, in French *Capitaine marchand*, he who has the direction of the ship's crew and cargo.—*Captains of Port*, in French *Capitaines de Port*, among the French, officers established in some considerable sea-ports where there are arsenals, as at Brest, Toulon, &c.—*Captain's Clerk*, in French *Commis ou Secrétaire du capitaine chargé de tenir ses comptes et ses écritures*; a person employed by the captain to take charge of all the books necessary for his accounts.
- CAPTAIN Bashaw** (*Polit.*) or *Capondan Bashaw*, in the polity of the Turks, signifies the Turkish high admiral, who is the third officer in the empire, having the same authority by sea that the vizier has on land.
- CAPTION** (*Law*) *captio*, that part of a legal instrument, as a commission, indictment, &c. which shows where, when, and by what authority it is taken, found, or executed.—*Caption*, also another name for an arrest, or the taking a person by a judicial process.—*Caption*, in the Scotch Law, the name of a writ issued by the court of session against the agents of the court to return papers belonging to processes or law-suits, or otherwise to go to prison.
- CAPTIVE** (*Mil.*) in French *Captif*, a prisoner of war.
- CAPTURE** (*Mar.*) in French *capture*, a prize taken by a ship of war at sea, or by privateers in time of war.
- CAPTURE** (*Law*) *captura*, the taking of a prey, an arrest, or seizure.

- CAPUCHE** (*Ecc.*) in French *capuchon*, Italian *cappuccio*, a monk's hood or cowl.
- CAPUCHIN** (*Archæol.*) a cloke with a head to it worn by women, so called because it is made in imitation of the dress of Capuchin monks.
- CAPUCHIN capers** (*Bot.*) called also *Nasturces*, or *Nasturtiums*.
- CAPUCHINS** (*Ecc.*) in French *capuchins*, in Italian *cappuccio*; an order of Franciscan friars, so called from their *capuche*, or hood hanging down their back. *Heliot. Hist. des Ord. Mon. tom. vii. c. 24.*
- CAPUCHON** (*Her.*) French for a hood which was sometimes used as a bearing in coat armour; it differed from the chaperon by being closed every way.
- CAPULÆ** (*Ant.*) a wooden utensil with two handles for lading oil out of one vessel into another; whence the person so doing was called the capulator. *Cat. de Re Rust. c. 67; Colum. de R. R. l. 12, c. 50.*
- CAPULATOR** (*Ant.*) an officer belonging to the prefect of the city, who dealt out the oil to the people in the *capulæ*, or oil-vessel. [vide *Capulæ*]
- CAPULUM** (*Med.*) from *καμπύλω*, to bend; a contortion of the eyelids, or other parts.
- CAPULUS** (*Ant.*) 1. A sword hilt which was often beset with ornaments.
Ovid. Met. l. 7, v. 422.
*Cum pater in capulo gladii cognovit eburno
Signa sui generis.*
Senec. Hippol. act. 3, scen. 2. v. 897.
*Regale parvis asperum signis ebur
Capulo refulget gentis Actææ decus.*
2. A bier or carriage on which the dead were carried.
Fest. de Verb. Signif.
- CAPUR** (*Chem.*) the same as *Camphora*.
- CAPURA** (*Bot.*) a genus of plants, Class 6 *Hexandria*, Order 1 *Monogynia*.
Generic Characters. CAL. none.—COR. monopetalous; tube cylindrical; border six-parted; divisions rounded.—STAM. filaments hardly any; anthers six.—PIST. germ superior; style cylindrical; stigma nearly globose.
Species. The only species is *Capura purpurata*, a shrub, native of India.
- CAPUT** (*Anat.*) the superior part of the body, which is divided into the Skull, *Cranium*, and the Face, *facies*. The Skull consists of the Crown, *vertex* or *fontanella*; the posterior part, *Occiput*; the anterior part, *Sinciput*; and the lateral parts, the Temples, *tempora*. The Face consists of the Forehead, Eye-brows, Eye-lids, Eyes, Nose, Mouth, Cheeks, Chin, and Ears. The external integuments of the head are the Hair; the Skin; the *Membrana cellulosa*, an aponeurotic expansion covering the head, neck, and shoulders, like a cap and hood, which Winslow calls a *coif*; and, lastly, the membrane covering the *cranium*, which is called the *Pericranium*. The other parts of the head, as the brain, bones, muscles, arteries, veins, and nerves, will be found explained under their respective words; as also under the head of Anatomy. [vide Plate 7, fig. 1, 2] *Ruff. Ephes. l. 1, c. 3; Cel. l. 4, c. 1; Gal. de Ossib. &c.; Orb. Med. Coll. l. 25, c. 3; Fallop. Exposit. de Ossib.—Caput gallaginis*, a kind of *septum*, or spongy border, at the extremities or apertures of each of the *Vesiculæ seminales*, serving to hinder the semen from going out of its passage.
- CAPUT Obstipum** (*Med.*) a wry neck, which is mostly a spasmodic disorder.—*Caput-purgia*, errhines, medicines, which purge the head.
- CAPUT Gallinacium** (*Bot.*) the *Hedysarum humile* of Linnæus.—*Caput monachi*, the same as *Dens leonis*.—*Caput Medusæ*, the *Elymus caput Medusæ* of Linnæus.
- CAPUT Mortuum** (*Chem.*) the fœces of any body remaining

after all the volatile and humid parts; viz. phlegm, spirit, salt, &c. have been extracted from it by force of fire.

CAPUT *anni* (*Law*) new year's day.—*Caput Baronæ*, the castle, or chief seat of a nobleman.—*Caput Jejuni*, Ash Wednesday, according to our records, being the head, or first day of the beginning of the Lent fast.—*Caput Loci*, the head, or upper end of any place, as *ad Caput villæ*, at the end of the town.—*Caput lupinum*, anciently an outlawed felon was said to have *caput lupinum*, and might be knocked on the head as a wolf: now the wilful killing of such a one would be murder. *Bract.* l. 1; *Hal. P. C.* 497.

CAPUT *Draconis* (*Astron.*) the Dragon's Head; a name given by some to a star of the first magnitude in the constellation Draco.

CAPUT *Argol* (*Astrol.*) a planet of malignant fortune.—*Caput Draconis*, the Dragon's Head, the name of the moon's ascending node.

CAPUTA'GIUM (*Law*) according to some, Head or Poll-money, or the payment of it; but it seems rather to signify what is called *chevagiium*.

CAPUT-PURGIUM (*Med.*) the same as *Errhinum*.

CAPUPE'BA *Brasiliensibus* (*Bot.*) *Gramen dactylon plumbeum*, a sort of grass in Brasil, the root of which, drank in any convenient liquor, is commended by the natives against poison. *Rain Hist. Plant.*

CAPYRIDION (*Med.*) or *capyrion*, a medicated cake much baked.

CAPYRION (*Med.*) vide *Capyridion*.

CAPYS (*Ent.*) a species of Sphinx.

CAQUE *de Poudre* (*Mil.*) a tun or barrel of powder.

CAR (*Astron.*) the bear, or Charles's wain.

CAR (*Mil.*) 1. A kind of small carriage used in triumphs, and on other solemn occasions. 2. A carriage with two wheels fitted up with boxes to contain ammunition, and to carry artillery-men that are attached, and formed into brigades, for the purpose of accompanying field ordnance.

CAR-TAKER *to his Majesty* (*Law*) a sinecure which is enjoyed by the entering clerk at the Pay office, valued 39l. per annum, net.

CARA (*Bot.*) a species of the *Dioscorea*.—*Cara Brasiliensibus*, a species of *Convolvulus*.

CARAB (*Bot.*) another name for the *Siliqua*.

CARABA'CCIUM *lignum* (*Bot.*) an Indian wood that tastes very much like cloves.

CARABE (*Chem.*) Yellow Amber.—*Carabe funerum*, the same as Bitumen.

CARABINE (*Mil.*) vide *Carbine*.

CARABINE'ERS (*Mil.*) or *Carbineers*, horsemen armed with carbines, who occasionally act as infantry.

CARABINS (*Mil.*) light armed horsemen, who sometimes acted on foot.

CARA'BOLUS (*Bot.*) a kind of wood for making the masts of ships.

CARABUS (*Ent.*) *κάραβος*, from *κάρα*, the head, i. e. *την κάρα βαίνειν*, to walk upon its head; a species of crab much resembling the scorpion. *Aristot. Hist. Animal.* l. 4, c. 3; *Plin.* l. 9, c. 31.

CARABUS, in the *Linnean system*, a genus of insects, of the order *Coleoptera*.

Generic Character. *Antennæ* filiform.—*Feelers* mostly six.—*Thorax* flat, margined; *shells* margined.

Species. Insects of this genus are nearly allied to the beetle tribe, and live mostly in dry wood where they depose their live. Two species of this insect, namely, the *Carabus chrysocephalus* and *ferrugineus*, are recommended for the tooth ache when pressed between the fingers, and applied to the gum.

CARACA (*Bot.*) the *Dolichos bulbosus* of Linnæus.

CARACALLA (*Ant.*) a Gaulish kind of vestment introduced into Rome by Aurelius Antonius Bassianus Caracalla, who

from thence received his cognomen. *Dio.* l. 78; *Spartian. Anton. Carac.* c. 9; *Aurel. Vict. Epit.* c. 21.

CARACALLA (*Bot.*) the *Phaseolus caracalla* of Linnæus.

CARACK (*Mar.*) the name of a large Portuguese ship, a ship of burthen, the same as what are now called *galleons*.

CARACOL (*Archit.*) a stair case in the form of a helix, or spiral curve.

CARACOL (*Man.*) in Italian *caracolla*, an oblique pist or tread, traced out in semicircles, changing from one hand to another, without observing a regular ground.

CARACOLE (*Mil.*) a semicircular motion, or half wheel, used, either by individuals, or squadrons of cavalry, to prevent an enemy from discovering where they intend to make their attack; whence the phrase *caracoler autour d'une troupe d'ennemie*, i. e. to hang on the flanks of an enemy to take him by surprize, or otherwise perplex him.

to CARACOLE (*Man.*) in Italian *caracollare*, in Spanish *caracollar*; a term used for a horse to signify that he goes in the form of half-rounds.

CARACO'LI (*Com.*) a kind of metal, of which the Caribbees, or natives of the Lesser Antilles, make a sort of ornament in the form of a crescent, which they call *caracoli*. This metal comes from the main land, and is generally supposed to be a compound of silver, copper, and gold, something like the Corinthian brass of old.

CARACORES (*Mar.*) light vessels used by the natives of Borneo, and the islands adjacent, and by the Dutch, as *guarda-costas* in those latitudes.

CARACOSMOS (*Nat.*) a name for the *Oxygala equinum*, or sour mare's milk, accounted by the Tartars a delicious food.

CARACT (*Com.*) vide *Carat*.

CHARA'CTERES (*Ant.*) vide *Phylactery*.

CARAGANA (*Bot.*) the *Robinia caragana* of Linnæus.

CARA'GE (*Com.*) a measure of lime equal to sixty-four bushels.

CARA'GI (*Com.*) 1. The duties of importation and exportation, so called in the grand Seignior's dominions. 2. The name of the custom house officers who receive the duties.

CARA'GNA (*Bot.*) the same as *Caranna*.

CARAGROUGH (*Com.*) a silver coin of the Turkish empire weighing nine drachms, of which there are four sorts, and all equally current, and of the same value. It goes at Constantinople for one hundred and twenty aspers.

CARAGUA'TA (*Bot.*) the aloe of Brazil, the concreted juice of which is supposed to be ambergrise; it is the *Bromelia acana* of Linnæus.

CARA'ITES (*Ecc.*) from *קראי*, to read; a sect among the Jews, so called from their strict adherence to the letter of the five books of Moses, rejecting all interpretations, paraphrases, and commentaries of the Rabbis.

CARAMA'NGOE (*Com.*) a drug which comes from China, and is valued much by the Tonquinese for its medicinal virtues.

CARA'MBOLA (*Bot.*) *Malus Indica*, a tree growing in the East Indies which bears fruit three times a year. It is the *Averrhoa carambola* of Linnæus.

CARAMBU (*Bot.*) the *Jussieu repens* of Linnæus.

CARAMEL (*Mech.*) 1. The sixth and last degree of boiling sugar, when if a little be put between the teeth it will break and crackle. 2. A curious sort of sugar work.

CARAME'NO (*Med.*) a name sometimes given to the *Hyboucouhoe Americanus*.

CARAMOU'SEL (*Mar.*) a great ship of burthen.

CARANA'BA (*Bot.*) a species of palm.

CARANA'SI (*Bot.*) the *Capraria crustacea* of Linnæus.

CARANDAS (*Bot.*) the *Carissa carandas* of Linnæus.

CARA'NNA (*Bot.*) *caragna*, or *brélisis*, a tree, supposed to be a species of Palm.

CARANNA (*Com.*) the gum or resin of the Caranna tree,

- which is of an aromatic flavour, and is brought from New Spain, and other parts of America.
- CARANO'SI (*Bot.*) an Indian shrub; the same as the *Negundo* of Linnæus.
- CARANTIA (*Bot.*) the *Siliqua dulcis* of Linnæus.
- CARAPA'CE (*Com.*) a thick, solid, and firm shell which covers the tortoise or turtle.
- CARAPATINA (*Bot.*) the same as *Bufo nitis*.
- CARAPICHE'A (*Bot.*) the same as the *Ipecacuanha*.
- CARARU *Brasiliensibus* (*Bot.*) *Blitum Brasiliannum Lusitanis*, a species of Blite growing in Brasil; it is the *Amaranthus* of Linnæus.
- CARA-SCHULLI (*Bot.*) *Frutex Indicus spinosus*, an Indian shrub like the Caper shrub; the *Barleria luxifolia* of Linnæus, which is used medicinally in various cases.
- CARAT (*Com.*) *carat*, or *karat*, a weight anciently used by workers in gold to mark the degree of purity that there is in gold, twenty-four of which made a mark. The carat is divided into one-fourth, one-eighth, and one-sixteenth, one-thirty-second, in order to distinguish the greater or less quantity of alloy therein contained; thus twenty-two carats of gold is that which has two parts of silver, or any other metal, and twenty-two of fine gold.
- The *carat*, called by the Spaniards *quilate*, is also a certain weight which jewellers and lapidaries use wherewith to weigh precious stones and pearls. This carat weighs four grains, but something lighter than the grains of marc weight. Each of these grains is subdivided into one-second, one-fourth, one-eighth, and one-sixteenth, according to which the price of pearls and precious stones is rated. In Spain the carat or quilate is also of four grains, three carats making a tomin, eight tomins a castellan, six castellans and two tomins one ounce, and eight ounces a marc; but the marc of Spain is about one-seventh lighter than that of France.
- CARAVAN (*Com.*) a company or assembly of travellers or pilgrims, and more particularly of merchants, who for greater security and mutual accommodation travel together through the deserts, and other dangerous places, of Arabia.
- CARAVANNA (*Law*) a caravan.
- CARAVANSERA (*Com.*) in the East, a large building or inn for the reception of travellers and the lodging of caravans.
- CARAVANSERA *Skire* (*Com.*) the director, steward, or intendant of a caravansera. The merchants to whom the caravan belongs appoint its officers, and regulate every thing relating to its police or government during the march. There are commonly four principal officers, namely, the *Caravan-Bachi*, or head of the caravan, the *Captain of the march*, the *Captain of stay*, or *rest*, and the *Captain of the distribution*. The first has the uncontrollable command over all the rest, who are each absolute in the several departments which they fill. The caravans are generally distinguished into five sorts, namely—*Heavy caravans*, composed of elephants, camels, and horses.—*Light caravans*, having but few elephants.—*Common caravans*, where there are none of these animals.—*Horse caravans*, in which they use neither dromedaries nor camels.—*Sea caravans*, consisting of a number of merchant ships under the convoy of some men of war.
- CARAVATA (*Bot.*) the same as *Cacao*.
- CARAVEL (*Mar.*) or *carvel*. 1. A light round old fashioned ship, with a square poop, formerly used in Spain and Portugal. 2. A small vessel used on the coast of France in fishing for herrings on the banks.
- CARAWAY (*Bot.*) a biennial, the *Carum carui* of Linnæus, which has a taper root like a parsnep, that is also reckoned equal in goodness to the parsnep. The seed, well known by the name of Caraway-seed, is a strong aromatic that abounds in essential oil.

- CARAXEON (*Bot.*) the same as *Gomphrena*.
- CARBASUS (*Med.*) *κάρβασος, ἀρμυρονι*, Lint, thin linen, or soft thread, on which the surgeons spread their ointments; called also *achne*, *carpia*. *Scrib. Larg. No. 227*.
- CARBEQUI (*Com.*) or *asper of copper*, a coin current in the province of Georgia, in Asia, forty of which make an abagi, and ten a chasuria.
- CARBINE (*Mil.*) a sort of fire-arms used by the cavalry, and smaller than the firelock of the infantry.
- CARBINEERS (*Mil.*) or *carabineers*, men armed with carbines: formerly all light armed horse were called carbineers.
- CARBO (*Min.*) from the Hebrew *קרב, charab*, to burn: when used without the epithet *fossilis* generally signifies charcoal.—*Carbo fossilis*, or *Lithanthrax*, from *charbah*, burnt Pit coal, or Scotch coal.—*Carbo vegetabilis*, or *Charcoal of Wood*, the coal into which wood is converted by the process of charring.
- CARBO (*Med.*) the same as *Carbunculus*.
- CARBON (*Chem.*) or *Carbone*, Charcoal, or more properly the pure basis of charcoal, free from all the hydrogen and earthy or metallic particles which charcoal usually contains. Charcoal is a black, insoluble, inodorous, insipid, and brittle substance, which is an excellent conductor of electricity, but a bad conductor of heat; remains unchanged by air or moisture at common temperatures; is infusible, and easily combustible in oxygen; absorbs gases in various proportions, and destroys the smell and taste of a variety of vegetable and animal substances. Carbon is produced either by the combustion of charcoal or that of the diamond, and other combustible substances, as coals, wood, oil, wax, tallow, &c. By its union with oxygen it produces two gaseous substances; the first of which was formerly called *fixed air*, and now *carbonic acid*; the second, which contains less oxygen than the former, is called either *oxide of carbon*, or *carbonous oxide*, and sometimes *carbonic oxide gas*. [vide *Oxide*] Carbon also combines with hydrogen in two proportions, so as to form two compounds, namely, *olefiant gas*, otherwise called *hydroguret of carbon*, and *carbureted hydrogen*, or *bihydroguret of carbon*; the proportions of which are, one atom of charcoal to two atoms of hydrogen in the former, and an atom of each in the latter. By its combination with azote it forms a gaseous compound, which has been denominated *cyanogen*; and by the combination of phosphorus and sulphur with it, a *phosphuret* and *sulphuret of carbon* are produced. [vide *Chemistry*]
- CARBON *humanum* (*Med.*) human ordure, in the language of Paracelsus.
- CARBONA'DO (*Cook.*) a steak across, and scotched to be broiled on hot coals.
- CARBONATE (*Chem.*) a name for salts formed by the union of carbonic acid with different bases; as *carbonate of copper*, of ammonia, of barytes, &c. [vide *Chemistry*]
- CARBONES *cæli* (*Alch.*) the Stars.
- CARBONIC acid (*Chem.*) or *carbonic acid gas*, a gaseous substance formed by the combination of carbon with oxygen, in the proportion of 27·27 parts carbon to 72·73 oxygen, which is invisible and elastic, like common air, extinguishes flame, is unfit for respiration, has no smell; specific gravity 1·527, that of air being 1·000; is not altered by exposure to heat in close vessels; combines with alkaline, earthy, and metallic bases, so as to produce compound salts, called *carbonates*.
- CARBONOUS oxide (*Chem.*) a composition of carbon and oxygen. [vide *Carbon*]
- CARBOS (*Min.*) Canal Coal.
- CARBUNCLE (*Her.*) vide *Escarbuncle*.
- CARBUNCLE (*Chem.*) vide *Spinell*.

- CARBUNCULA'TIO** (*Med.*) ἀνθράκωσις, a carbuncle incident to the eye. *Gal. Exeg. Vocab.; Hippocrat.; Gal. de Diff. Morb.*
- CARBUNCULATION** (*Hort.*) the blasting of the young buds of trees.
- CARBUNCULUS** (*Min.*) or *rubinus*, the Ruby; a glittering diaphonous gem, of a red colour.
- CARBUNCULUS** (*Med.*) ἀνθράξ, a carbuncle, from *carbo*, a burning coal, called by Avicenna *Persicus ignis*; an inflammation which for the most part suddenly degenerates into a sphacelus, and corrupts the subjacent parts down to the bones, rendering them as black as a coal. This seems to be the reason why the Latins call such affections *carbunculi*, and the Greeks *anthraxes*. *Cel.* l. 5, c. 28; *Gal. de Diff. Morb.* c. 12; *Orib. de Curat. Morb.* l. 3, c. 27; *Act. Tetrab.* 4, serm. 2, c. 12; *Paul. Æginet.* l. 4, c. 25; *Act. de Meth. Med.* l. 2, c. 12.
- CARBURET** (*Chem.*) a name for the compounds formed by the combination of carbon with metals; the most important of which is the carburet of iron. [vide *Chemistry*]
- CARBURETTED hydrogen gas** (*Chem.*) a gaseous substance formed by the combination of carbon with hydrogen, in the proportions of one atom of carbon to two atoms of hydrogen; whence it is also called a bihydroguret of carbon. The gas which is known by the name of the *fire-damp* among miners is pure carburetted hydrogen. It possesses the properties of common air, having neither colour, taste, nor smell: specific gravity 0.555.
- CARCAMOUSE** (*Mil.*) in French *Monton*, *Marmouton*, the battering-ram used by the ancients.
- CARCAN** (*Law*) in Fr. *Carcan*, an iron collar, sometimes taken for a pillory, and *carcanum* for a prison. *Leg. Caniol. Reg. apud Brompt.*
- CARCANE'T** (*Archæol.*) a chain for the neck.
- CARCA'PULI** (*Bot.*) an Indian tree which affords the Gamboge; the *Cambogia gutta* of Linnæus.
- CARCAROS** (*Med.*) κάρκαρος, from κάρκαρον, to resound; a kind of fever attended with a horror or shivering.
- CARCAS** (*Bot.*) the same as *Cataputia*.
- CARCASS** (*Carpent.*) the timber-work of a house before it is either lathed or plastered, or the floors laid.—*Carcass*, or *Naked flooring*, that which supports the boarding above and the ceiling below. It consists of three tiers of beams, called *joists*; those of the middle tier, called *binding-joists*, support the other two, namely, the *bridgings*, or *bridging-joists*, which form the upper tier, and the *ceiling-joists*, which compose the lower.—*Carcass roofing*, the frame of timber-work which supports the covering of any building. It consists of three tiers of timbers; the first of which compose several vertical frames, called *trusses*; the inclined timbers in each *truss* are called *principal rafters*; the horizontal timbers parallel to each other are *purlins*; the timbers of the third tier are *bridging*, or *common rafters*. The principals rest upon a horizontal piece, called the *raising*, or *wall-plate*.
- CARCASS** (*Mil.*) in French *carcasse*; an iron case so called because the circles which pass from one plate to another seem to represent the ribs of a human carcass. This case, when filled with combustible materials, is discharged from a mortar, in the same manner as a bomb. There are two sorts of carcasses, namely, the oblong and the round; but the former are entirely out of use in the British service, on account of the uncertainty of their flight.
- CARCA'TUS** (*Law*) Loading, a ship freighted. *Pa. R. 2.*
- CARCAX** (*Bot.*) from κάρξα, a head; a species of poppy with a very large head.
- CARCELLAGE** (*Law*) prison fees.
- CARCER** (*Med.*) a remedy proper to restrain the loose and disorderly motions both of body and mind. *Parac. de Morb. Ament. tract 2, c. 3.*
- CARCERES** (*Ant.*) the barriers, made at first of wood or coarse stone, and afterwards of marble, which inclosed the horse-race, particularly that part of it from which the horses started; whence *carcer*, in the singular, for the starting-post. *Virg. Æn.* l. 5, v. 145.
- ruuntque effusi carcere currus.
- Varr. de Ling. Lat.* l. 4, c. 32; *Dionys.* l. 3; *Suet. in Claud.* c. 21.
- CARCHA'RIAS** (*Ich.*) κάρχηρίας, another name for the *Canis marinus*, or Sea-dog.
- CARCHEDONY** (*Min.*) κάρχηδων, *carchedonius lapis*, a sort of precious stone.
- CARCHE'SIUM** (*Mar.*) κάρχησιον, the top of the mast where the pulley is placed; also a cup described by Athenæus. *Virg. Æn.* l. 5, et *Georg.* l. 4; *Athen.* l. 11.
- CARCHE'SIUS laqueus** (*Surg.*) the name of a bandage, of which there are two sorts, the single and the double. *Gal. Com. in Hippoc. de Artic.; Oribas de Leg.* c. 9.
- CARCHE'SII** (*Ant.*) κάρχησιοι, the ropes which are extended from the top of the mast, and support the sails. *Gal. Com. in Hippoc. de Artic.*
- CARCHICHEC Turcarum** (*Bot.*) Blue Primrose, called Turks Snow Flower. It is reckoned hot, dry, and astringent. *Raii Hist. Plant.*
- CARCINA'DÆ** (*Ich.*) a name for a very small sort of Sea-fish, resembling Crabs. *Act. Tetrab.* l. 1, serm. 1.
- CARCINE'THRON** (*Bot.*) from κάρκινος, a crab; so called from its being jointed like the claws of a crab; a name for the *Polygonum Mas*, or Common Knot Grass, according to Oribasius. *Med. Coll.* l. 11.
- CARCINO'DES** (*Med.*) κερκινάδες, from κάρκινος, a cancer, and εἶδος, a form; an epithet for a tumour resembling a cancer. *Cel.* l. 6, c. 8; *Orib. de Virtut. Simpl.* l. 2, c. 1.
- CARCINO'DEES** (*Med.*) choirades, κερκινάδες, χοιράδες, strumous swellings of a malignant quality, which are painful to the touch, and exasperated by the application of medicine.
- CARCINOMA** (*Med.*) and *carcinus*, from κάρκινος, cancer, and νέμω, to consume; the disease called the Cancer. [vide *Cancer*]
- CARCINOMA** (*Bot.*) vide *Cancer*.
- CARCINUS** (*Med.*) vide *Cancer*.
- CARD** (*Sp. rt.*) vide *Cards*.
- CARD** (*Mech.*) an instrument or comb composed of a great number of small pieces of iron wire, of great use in the manufactories, to comb, disentangle, and range the wool, &c. for the purpose of spinning.
- CARD maker** (*Com.*) one who makes cards for carding wool, &c.
- CARD of a compass** (*Mar.*) in French *rose de vents*, a term applied to the circular paper on which the different points of the compass are projected over the mariner's compass.
- CARDAMA'NTICE** (*Bot.*) the same as *Cardamine*.
- CARDAME'LUM** (*Med.*) a sort of medicine mentioned by Galen.
- CARDAMPNDUM** (*Bot.*) the same as the *Tropæolum* of Linnæus.
- CARDAMINE** (*Bot.*) Meadow Cress, a plant, so called from its resemblance to the κάρδαμον of the Greeks, and the *Nasturtium* of the Latins. *Gal. de Simpl.* l. 8; *Oribas. Med. Coll.* l. 12; *Act. Tetrab.* l. 1, serm. 3, c. 184; *Ægin.* l. 7, c. 3.
- CARDAMINE**, in the *Linnean system*, a genus of plants, Class 15 *Tetradynamia*, Order 2 *Siliquosa*.
- Generic Characters.* CAL. perianth four-leaved; leaflets obtuse.—COR. four-petalled; petals oblong-obovate.—STAM. filaments six; anthers small.—PIST. germ slender; style none; stigma entire.—PER. silique long; seeds very many.

Species. The species are perennials, biennials, and annuals; the perennials are as follow:—*Cardamine bellidifolia*, *Arabis bellidifolia*, seu *Nasturtium Alpinum*, &c. Daisy-leaved or Alpine Cress, native of Britain.—*Cardamine Alpina*, seu *Nasturtium Alpinum*, &c. native of Switzerland.—*Cardamine asarifolia*, seu *foliis simplicibus*, &c. seu *Nasturtium Alpinum*, &c. *Asarabacca* leaved Cress, native of Italy.—*Cardamine resedifolia*, seu *Nasturtium Alpinum*, &c. Racket-leaved Cress, native of Switzerland.—*Cardamine pratensis*, *Turritis*, seu *Flos cuculi*, Common Lady's Smock, or Cuckoo-Flower, native of Europe.—*Cardamine amara*, *Nasturtium*, seu *Sisymbrium aquaticum*, Bitter Cress, native of Britain. The biennials are as follow; namely—*Cardamine thalictroides*, *Plumieri*, *foliis ternatis*, seu *Nasturtium montanum*, native of Italy.—*Cardamine impatiens*, *Sisymbrium cardamines*, seu *Sium minimum*, &c. Impatient Lady's Smock, native of Britain, &c. The annuals are as follow:—*Cardamine parviflora*, seu *Nasturtium pratense*, &c. Little-flowered Lady's Smock.—*Cardamine Græcia*, Greek Cress, &c. *J. Baul. Hist. Plant.*; *C. Baul. Pin.*; *Ger. Herb.*; *Park. Theat. Bot.*; *Raii Hist. Plant.*; *Tournef. Institut. de Re Herb.*; *Boerhaav. Ind.*

CARDAMINE is also the *Lepidum Alpinum et petræum*.

CARDAMOMUM (*Bot.*) from καρδάμων and ἀμώμων, a plant, so called because it partakes of the nature of both the Cardamon and the Amomum.

CARDAMON (*Bot.*) the same as *Cardamine*.

CARDAMYLE (*Bot.*) a sort of Maize.

CARDASS (*Mech.*) French for a sort of card used in carding silk; also the flocks of silk so carded.

CARDEGO-INDI (*Bot.*) or *Folium-Indicum*, the leaf of an Indian tree, which, when chewed, renders the saliva slimy.

CARDER (*Com.*) one who cards wool.

CARDIA (*Anat.*) καρδιά. 1. The heart. 2. The left and superior orifice of the stomach; so called on account of its vicinity to the heart. *Ruff. Ephes. l. 1, c. 11*; *Gal. de Decret. Hippocrat. l. 3*.

CARDIA (*Bot.*) the heart or pith of a tree, called by Pliny *encephalus*. *Theophrast. Hist. Plant. l. 3, c. 17*.

CARDIAC-LINE (*Palmis.*) the line of the heart that encircles the mount of the thumb, which is also called the *line of life*.

CARDIACA (*Bot.*) the *Galeopsis galeobdion* of Linnæus.

CARDIACA PASSIO (*Med.*) the Cardiac Passion, a disorder frequently mentioned by the ancients, but by the moderns mostly treated of under the name of Syncope. It derives its name from the part which was supposed to be affected, and consisted, according to Hippocrates, of a preternatural substance in the stomach and entrance into the belly, with a subsequent biting pain of those parts. *Hippocrat. Epid. l. 1, &c.*; *Cæl. Aurel. l. 2, c. 33*.

CARDIACÆ ARTERIÆ (*Anat.*) another name for the *Coronariæ*.

CARDIACE (*Min.*) καρδιακή, a precious stone in the shape of a heart.

CARDIACI (*Med.*) καρδιακοί, those affected with the cardialgia.

CARDIACS (*Med.*) medicines so called, from καρδιά, the heart, because they act upon the heart by their application to the stomach. They are called by Paracelsus *defensiva*.

CARDIACUM (*Med.*) a cardiac medicine.

CARDIACUS DOLOR (*Med.*) the same as *Cardialgia*.

CARDIACUS PLEXUS (*Anat.*) a branch of the *Par vagum*, or eighth pair of nerves which about the first and second rib is sent from its descending trunk, and bestowed upon the heart.

CARDIALGIA (*Med.*) καρδιαλγία, from καρδιά, the heart, or upper orifice of the stomach, and αλγίω, to pain; the heart-burn, or pain at the upper orifice of the stomach. *Ruff. Ephes. l. 1, c. 11*; *Gal. Com. 3 in Hippocrat. Epid.*; *Tral-*

lian. l. 12, c. 4.—*Cardialgia inflammatoria*, another name for *inflammatio ventriculi*.—*Cardialgia sputatoria*.

CARDIMELECH (*Med.*) from καρδιά, and the Hebrew *melek*, a king; a fictitious term to express a particular sort of active principle in the heart, commonly called the vital function.

CARDIMONA (*Med.*) another name for *Cardialgia*.

CARDINAL (*Ecc.*) the highest dignitary in the Romish church next to the Pope. The cardinals are 70 in number; namely, six bishops, fifty priests, and fourteen deacons, who are chosen by the pope, and from among whom, when assembled in what is called the *conclave*, the pope in his turn is elected. The name is derived from *cardo*, a hinge; because they serve the Apostolic See as a hinge on which the government of the church turns. For the same reason this term has been employed as an epithet of excellence to many other objects.

CARDINAL virtues (*Eth.*) the four virtues of prudence, temperance, justice, and fortitude, on which all others depend.

CARDINAL points of the compass (*Mar.*) in French *points cardinaux*, the four principal points or divisions of the horizon, namely, the North, South, East, and West.—*Cardinal winds*, winds blowing from the cardinal points.—*Cardinal signs*, those signs at the four quarters, or the equinoxes and solstices, namely, the signs Aries, Libra, Cancer, and Capricorn.

CARDINAL numbers (*Arith.*) such as express the number of things, as one, two, three, &c. in distinction from the ordinal first, second, &c.

CARDINAL points (*Astrol.*) the first, fourth, seventh, and tenth houses in a scheme or figure of the heavens.

CARDINAL'S CAP (*Bot.*) or Cardinal Flower, the *Lobelia cardinalis* of Linnæus, a plant, so called because its flower, by the intense redness of its colour, seems to emulate the scarlet robes of a cardinal, especially when the sun shines on it.

CARDINAL'S HAT (*Her.*) a charge in coats of arms, as "The field is *argent*, a Cardinal's Hat, with strings pendant, and platted in true love, the ends meeting in base *gules*." These are the arms of Sclavonia, on the coast of the Adriatic.

CARDINAMENTUM (*Anat.*) from *cardo*, a hinge; a hinge-like articulation.

CARDINEA (*Ent.*) or *Cardinée*, vide *Foricule*.

CARDING (*Com.*) a method of preparing wool, cotton, hair, &c. by passing it between the iron points of two instruments called *cards*, so as to dispose it for spinning.

CARDIOBOTANON (*Bot.*) καρδιοβοτανον, the name of a herb mentioned by Myrepsus.

CARDIOGMUS (*Med.*) the same as *Cardialgia*.

CARDIOGNOSTIC (*Med.*) καρδιογνωστικός, of καρδιά, the heart, and γινωσκω, to know; knowing the heart. *Ruff. l. 1*.

CARDIOIDE (*Geom.*) a curve so called by Castelliani, from its resemblance in figure to καρδιά, a heart. Its construction is as in the annexed diagram, where through one extremity, A, a circle is drawn, APB having a diameter AB, and a number of lines APQ are drawn, cutting the circle in PP; upon these set off PQ equal to the diameter AB; then the curve passing through all the points, PQ will be the cardioide.

CARDIOTROTUS (*Med.*) καρδιотρωτος from καρδιά, the heart, and τρώω, to wound; one who has a wound in his heart. *Gal. Exeg.*

CARDIOSPERMUM (*Bot.*) a genus of plants, Class 8 *Octandria*, Order 3 *Trigynia*.

Generic Characters. CAL. *perianth* four-leaved; *leaflets*

obtuse.—COR. petals 4; nectary four-petalled; leaflets obtuse.—STAM. filaments eight; anthers small.—PIST. germ three-sided; styles three; stigmas simplc.—PER. capsule roundish; seeds solitary.

Species. The species are annuals or shrubs, as the—*Cardiospermum halicacabum*, &c. seu *Helicacabum*, seu *Pisum vesicarium*, &c. Smooth-leaved Heart-pea, or Heart-seed, an annual, native of the Indies.—*Cardiospermum hirsutum*, seu *Caule petiolis*, &c. native of Guinea, an annual.—*Cardiospermum corindum*, seu *villosum*, &c. Woolly-leaved Heart-pea, or Parsley-leaved Heart-seed, an annual, native of the Brazils.—*Cardiospermum grandiflorum*, seu *foliis pubescentibus*, &c. Great-flowered Heart-seed, a shrub, native of Jamaica.—*Cardiospermum leve*, an annual, native of the Indies. *Tournef. Instit. de Re Herb.*

CARDIR (*Min.*) Tin.

CARDISPERMUM (*Bot.*) the same as *Calendula*.

CARDIS MARS (*Min.*) Iron.

CARDITIS (*Med.*) vide *Inflammati cordis*.

CARDIUM (*Con.*) Cockle, a genus of insects belonging to the Class *Vermes*, Order *Testacea*.

Generic Character. Animal a tchys.—Shell bivalve, nearly equilateral; equivalve ribbed, striate, or grooved.—Hinge with two teeth near the beak.

Species. The species are found in different seas; some in the British channel, as the *Cardium medium*, *exiguum*, *aculeatum*, *spinatum*, *ciliare*, *tuberculatum*, *lævigatum*, *edule*, *rubrum*, *nodosum*, *arcuatum*, *discors*, *elongatum*, *muricatum*, &c.

CARDO (*Anat.*) the articulation, otherwise called *ginglymus*, to which this name has been given on account of its resemblance to a hinge.

CARDONET (*Bot.*) the *Carlina acaulis* of Linnæus.

CARDONIUM (*Med.*) in the language of Paracelsus, wine medicated with herbs.

CARDOON (*Bot.*) a plant somewhat resembling an artichoke, the leaves of which are eaten as a salad. It is the *Cynara cardunculus* of Linnæus.

CARDOPATIUM (*Bot.*) thistle, the same as the *Carlina* of Linnæus.

CARDS (*Sport.*) pieces of pasteboard of an oblong figure and different sizes, and marked with four different patterns or *suits*, as the French call them, which were intended to represent the four classes in France, where they were invented about the year 1390, to divert Charles VI. who had fallen into a state of melancholy. By the *cœurs*, Hearts, are meant the *gens de Chœur*, choirmen, or ecclesiastics; for which the Spaniards, who revived the use of cards, have copas or chalices. The nobility were represented by lances or pikes, to which we have given the name of spades, probably from the Spanish word *espadas*, swords, which supply the place of the French pikes. By *carreaux*, diamonds, are designated the order of citizens, including merchants, and the like. *Trefle*, a trefoil-leaf, or clovergrass, was emblematical of the husbandmen or peasantry. This is falsely called clubs in English, because the Spaniards have *bastos*, staves or clubs, on their cards; wherefore we have taken the thing from the French and the name from the Spaniards. The four kings alluded to are David, Alexander, Cæsar, and Charles, who represent the four grand monarchies of the Jews, Greeks, Romans, and Franks, under Charlemagne; the queens are Argine, i. e. *regina*, the queen by descent, Esther, Judith, and Pallas. The *knaves* represent the servants of the knights, the word knave signifying originally a servant.

CARDUE/LIS (*Orn.*) Gold-finch, Thistle-finch, a species of the *Fringilla* of Linnæus.

CARDUNCCELLUS (*Bot.*) the *Carthamus mitissimus* and *Carthamus carduncellus* of Linnæus.

CARDUNCULUS (*Bot.*) the *Carthamus carduncellus* of Linnæus.

CARDUO-CNICUS (*Bot.*) another name for the *Atractilis*.

CARDUUS (*Bot.*) Thistle, a genus of plants, Class 19 *Syngenesia*, Order 1 *Polygamia Æquales*.

Generic Characters. CAL. common ventricose.—COR. compound tubular; corollules hermaphrodite.—STAM. filaments five; anthers cylindrical.—PIST. germ ovate; style filiform; stigma simplc.—PER. none; calyx converging a little; seeds solitary; receptacle hairy.

Species. The species are either annuals, biennials, or perennials. Of the first kind are the following—*Carduus leucographus*, seu *Cirsium*, native of Campania.—*Carduus Arabicus*, Arabian Thistle.—*Carduus peregrinus* seu *lacteus*, &c.—*Carduus lanuginosus*, seu *orientalis*, &c. native of Armenia.—*Carduus macrocephalus*, seu *caule tomentosum*, &c.—*Carduus marianus*, seu *Silybum*, &c. Milk or Ladies' Thistle, native of England.—*Carduus crispus*, Curled Thistle, native of Europe. Of the second kind are the following:—*Carduus nitans*, seu *spinosissimus*, &c. Musk Thistle, native of Europe.—*Carduus acanthoides*, seu *polyacanthos*, Prickliest Thistle.—*Carduus palustris*, seu *Cirsium*, Marsh Thistle.—*Carduus cardicans*, native of Hungary.—*Carduus personata*, seu *foliis carlinis*, &c. seu *inermis*, seu *mollis*, &c. seu *majus*, &c. seu *Arctium personata*, &c. native of Switzerland.—*Carduus polyanthemus*, seu *pycnocephalus*, &c. seu *Cirsium palustre*, &c. native of Rome. Of the third kind are the following:—*Carduus paniculatus*, native of the Pyrenees.—*Carduus cyanoides*, seu *mollis*, native of Siberia.—*Carduus polyclonus*, seu *inermis*, &c. native of Siberia.—*Carduus defloratus*, *Cirsium angustifolium*, seu *cirsoides*, Various-leaved Thistle, native of Switzerland.—*Carduus pannonicus*, seu *serratuloides*, seu *Cirsium pannonicum*, &c. native of Austria.—*Carduus cornithoides*, seu *Centaurea nudicaulis*, &c. seu *Jacea*, *Raponticoides*, &c. native of Italy.—*Carduus canus*, seu *Cirsium montanum*, *tomentosum*, &c. Hoary Thistle, native of Austria.—*Carduus rivularis*, seu *Cirsium carmolicum*, native of Montpellier.—*Carduus acaulis*, *Chamaeleon exiguus*, seu *Carlina minor*, Dwarf Carline Thistle, native of Europe.—*Carduus pratensis*, seu *heterophyllus*, English Soft or Gentle Thistle, Single Headed or Meadow Thistle, native of the Pyrenees.—*Carduus ochroleucus*, seu *Cirsium ochroleucum*.—*Carduus rigens*, Upright Alpine Thistle, native of Switzerland.—*Carduus Diacantha*, native of Mount Libanus.—*Carduus gnaphaloides*, native of Calabria.—*Carduus horridus*, native of Armenia.—*Carduus benedictus*, the *Centaurea benedicta* of Linnæus.—*Carduus Brassilianus*, the *Bromelia Ananas* of Linnæus.—*Carduus fullonum*, the *Dipsacus fullonum* of Linnæus.—*Carduus sphaerocephalus*, the *Echinops sphaerocephalus* of Linnæus.—*Carduus stellatus*, the *Centaurea Calcitrapa* of Linnæus.—*Carduus Pinea Theophrasti*, the *Atractylis gummifera* of Linnæus. *Lobel. Plant. et Stirp. Hist. et Advcr.*; *Clus. Rar. Plant. Hist.*; *J. Bauh. Hist. Plant.*; *C. Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*; *Raii Hist. Plant.*; *Tournef. Instit.*; *Boerhaav. Ind.*; *Pluken. Almagest. Botan.*

CAREBARIA (*Med.*) καρβαρια, from καρρ, the head, and βάρως heaviness; an uneasy heaviness of the head.

CARECTA (*Ant.*) or *carectata*, a cart or cartload-man.

CARECTARIUS (*Ant.*) or *caretarius*, a carter.

CARECTATA *plumbi* (*Archæol.*) a pig or mass of lead, weighing 128 stone, or 2100 pounds.

CAREENING (*Mar.*) in French *faire à battre*, *carèner*, heaving the ship down on one side, by applying a strong purchase to her masts, so that it may be hauled from any filth which adheres to it by breaming.—*A half careen*, when

- it is not possible to come at the bottom of the ship, so that only half of it can be careened.
- CAREER (*Man.*) the place inclosed with a barrier, wherein the horses run in a ring.
- CAREER (*Falcon.*) a flight or tour of the bird, about 120 yards; if she mount more, it is a double career; if less, a semi-career.
- CARELET (*Mil.*) the same as *Semelle*.
- CARENA (*Med.*) the twenty-fourth part of a drop.
- CARENE (*Mil.*) all the parts of a ship under water.
- CARENUM (*Med.*) *κέφαλον*, the head.
- CARET (*Gram.*) Latin for *it wanteth*; is marked by a character in printing or writing in this form (Λ), denoting that there is something to be inserted or included.
- CARETTI (*Bot.*) a species of the *Guilandia* of Linnæus.
- CAREUM (*Bot.*) or *Cari*, Caraway Seeds; so called from *Caria*, the country whence they are brought.
- CAREX (*Bot.*) a genus of plants, Class 21 *Monoecia*, Order 3 *Triandria*.
- Generic Characters.* CAL. ament oblong; scales acute.—COR. none.—STAM. filaments three; anthers erect.—PIST. germ three-sided; style very short; stigmas two or three.—PER. none; seed single.
- Species.* The species are perennials:—*Carex dioica*, *Cyperoides parvum*, &c. seu *Gramen cyperoides*, &c. Small Sedge, native of England, Germany, and Italy.—*Carex Davelliana*, seu *Gramen cyperoides*, native of Germany. *Carex capitata*, *Spica andiogyne*, seu *subglobosa*, &c. Round-headed Sedge, native of Lapland.—*Carex paniciflora*, seu *Leucoglochis*, &c. native of Scotland.—*Carex microglochis*, native of North Lapland.—*Carex pulicaris*, seu *Gramen*, &c. Flea Sedge, or Flea Grass, native of Europe.—*Carex cyperoides*, *Scirpus*, seu *Cyperus minor*, &c. native of Bohemia.—*Carex foetida*, seu *Gramen alpinum*, &c. native of Switzerland.—*Carex curvula*, seu *Gramen cyperoides*, native of Switzerland.—*Carex maritima*, seu *Gramen cyperoides*, &c. Sand or Sea Sedge, native of Europe.—*Carex lobata*, seu *Cyperoides*, native of the Alps of Switzerland.—*Carex leporina*, *Lachenalii*, &c. seu *Lagossina*, native of Lapland.—*Carex vulpina*, seu *Gramen palustre majus*, Great Sedge. *J. Bauh. Hist. Plant.*; *C. Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*; *Raii Hist. Plant.*
- CAREX *Lithosperma*, the *Scleria flagellum* of Linnæus.
- CARFVE (*Husband.*) unbroken or untilled ground.
- CARGADORS (*Com.*) a name used by the Dutch and Portuguese to signify a kind of brokers, whose only business it is to find freight for ships outward bound, and to give notice to the merchants who have commodities to send by sea of the ships ready to sail, and of the places to which they are bound.
- CARGO (*Com.*) *cargaison ou chargement*; the merchandize and effects which are laden on board a ship, exclusive of the crew, ammunition, provision, &c.—*Supercargo*, a person employed by merchants to go a voyage for the purpose of taking charge of, and disposing of the cargo.
- CARICA (*Bot.*) *καριον*, a dried fig; so called from *Caria*, the country from which they were brought.
- CARICA, in the Linnæan system, a genus of plants, Class 22 *Diocia*, Order 9 *Decandria*, called by Tournefort *Papaya*.
- Generic Characters.* CAL. scarce manifest.—COR. monopetalous; tube slender; border five-parted.—STAM. filaments ten; anthers oblong; germ ovate; style none; stigmas broad.—PER. berry very large; seeds numerous.
- Species.* The species are shrubs, as—*Carica Papaya*, *Ficus*, seu *Papaya*, &c. Common Papaw Tree, native of the East Indies.—*Carica Posoposa*, Dwarf Papaw Tree.—*Carica pyriformis*, seu *Papaya*, &c. native of Peru.—*Carica cauliflora*, native of the Caraccas.—*Carica micro-*
- carpa*, seu *Ficus*, &c. native of Chili.—*Carica spinosa* seu *Jaracatia*, native of Guinea. *J. Bauh. Hist. Plant.*; *Park. Theat. Botan.*; *Raii Hist. Plant.*; *Tournef. Inst.*; *Pluk. Almag. Botan.*
- CARICA (*Bot.*) another name for the *Ficus*.
- CARICATURE (*Paint.*) a way of representing objects distorted and deformed, but still so as to preserve the likeness, from the Italian *caricatura*, which comes from *carica*, a burden, and signifies the same as overcharging.
- CARICK (*Mar.*) a sort of vessel.
- CARICOUS tumor (*Surg.*) from *carica*, a swelling resembling the figure of a fig.
- CARICUM (*Med.*) or *Carycum*, *καρικόν*, from *Caricus*, the inventor. 1. A cathartic medicine which deterges sordid ulcers, and eats away proud flesh. *Hipp. de Ulcer.* 2. The name of an oil. *Athen.* 1. 2.
- CARIES (*Med.*) from *καίρω*, to abrade, a disease of the bones. *Gal. Introd.*; *Act.* 4, 2, 57; *Aqui.* 4, 20. Class *Locales*.
- CARILLONS (*Mus.*) small bells, such as are held in the hand, or placed in clocks; a species of chimes frequent in the Low Countries, particularly at Ghent and Antwerp.
- CARIMA (*Bot.*) the same as *Cassada*.
- CARIM-CU'RINI (*Bot.*) the *Justicia ebolium* of Linnæus.
- CARIM-GO'LA (*Bot.*) another name for the *Pontedaria* of Linnæus.
- CARIMPA'NA (*Bot.*) the *Borassus flabelliformis* of Linnæus.
- CARIMTUMBA (*Bot.*) a species of the *Nepeta* of Linnæus.
- CAR'INA (*Ant.*) the keel, or long piece of timber that runs along the bottom of the ship from head to stern. *Ovid. Pont.* 1. 4, epist. 3.
- Dum mea puppis erat valida fundata carina.*
- It is frequently taken by the poets for the whole ship. *Virg. Æn.* 1. 2, v. 23.
- Nunc tantum sinus, et statio malefida carinis.*
- Ovid. Heroid.* ep. 17, v. 103.
- Tunc ego te vellem celeri venisse carinâ.*
- Sallus. de Bell Jugurth.*; *Isid. Orig.* 1. 19, c. 1; *Gyrard. de Navigat.* c. 2; *Scheff. de Mil. Naval.* 1. 1, c. 6.
- CARINA (*Bot.*) the lower petalum or leaf of a papilionaceous flower, which contains the germ and pistillum. It is hollow, and stands underneath the vexillum, to which it is opposite. [vide *Botany*]
- CARINA (*Anat.*) the beginning of the entire *vertebræ*, or turning joints.
- CARINA (*Nat.*) the first rudiments of the spine of a chicken during incubation.
- CARINA (*Archæol.*) a building, near the amphitheatre, in the form of a ship's keel. *Serv. in Virg. Æn.* 1. 8, v. 359.
- CARINATED (*Bot.*) *Carinatus*, from *carina*, the keel, bending or crooked like the keel of a ship; an epithet of a leaf or nectary, *Folium* and *Nectarium carinatum*, a keeled leaf and nectary, i. e. having a longitudinal prominence upon the back like the keel of a vessel.
- CARIAPHYLLA'STER (*Bot.*) a species of the *Dodonæa* of Linnæus.
- CARIO'SSE (*Bot.*) a Portuguese name for the fruit of the *Ady* or *Palma Ady*, a palm tree in the island of St. Thomas.
- CAR'IOUS (*Med.*) rotten, after the manner of the bones.
- CAR'IPHI (*Mil.*) a kind of cavalry in the Turkish army, 1000 of which are not slaves, nor bred up in the seraglio like the rest, but are generally Moors, or renegado Christians, who have obtained the rank of horse guards to the Grand Seigneur.
- CAR'ISSA (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.
- Generic Characters.* CAL. perianth very small.—COR. mo-

no petalous; tube cylindrical; border five-parted.—STAM. filaments five; anthers oblong.—PIST. germ roundish; style filiform; stigma rather simple.—PER. berries two; seeds seven.

Species. The species are shrubs, as follow:—*Carissa Carandas*, *Echites*, *Carandas*, seu *Lycium*, &c. native of India.—*Carissa spinarum*, native of the East Indies.—*Carissa edulis*, native of Arabia Felix.—*Carissa inermis*, native of the East Indies.

CARISTIA (*Law*) dearth, scarcity, dearness. *Pat.* 8, *Ed.* 1.

CARITAS (*Law*) *Ad caritatem*; *poculum caritatis*, a gracecup; or an extraordinary allowance of the best wine, or other liquor, wherein the religious at festivals drank in commemoration of their founders and benefactors. *Car-tular. abat. Glaston.*

CARIUM *terræ* (*Min.*) lime.

CARK (*Law*) a quantity of wool, whereof thirty make a sarpler. *Stat.* 27, *H.* 6, c. 2.

CARKANET (*Archæol.*) vide *Carcan.*

CARL-D'OR (*Com.*) a gold coin of Brunswick, worth five rix-dollars, or about sixteen shillings sterling. These coins at present bear on the obverse the arms of Brunswick, instead of the head of the reigning prince as before: the legend CAROLUS D.G. DUX. BRUNS. ET LUN.; on the reverse, a horse in full speed: legend NUNQUAM RETRORSUM, with the date and value, 10 Thaler, or 5 Thaler, according as it is single or double.

CARLINA (*Bot.*) vide *Carline Thistle.*

CARLINA in the *Linnean system*, a genus of plants, Class 19 *Syngenesia*, Order 1 *Polygamia Æqualis*.

Generic Characters. CAL. common ventricose; scales numerous.—COR. compound uniform; corollets hermaphrodite; tube slender; border five-cleft.—STAM. filaments five; anthers cylindrical.—PIST. germ short; style filiform; stigma oblong.—PER. none; calyx remaining unchanged; seeds solitary; down plumose; receptacle flat; chaffs ternate.

Species. The species are mostly perennials, as—*Carlina acaulis*, seu *Chamæleon albus*, Low Carline Thistle, native of Italy, &c.—*Carlina acanthifolia*, *Chardousse*, &c. seu *Carlinskanska*, native of the Pyrenees.—*Carlina adgregata*, seu *caulibus*, native of Croatia.—*Carlina lyrata*, native of the Cape of Good Hope.—*Carlina involucreta*, native of Algiers.—*Carlina corymbosa*, seu *caule*, &c. *Acarina*, &c. seu *Acarus*, &c. *Corymbed Carline Thistle*, native of Italy. But the—*Carlina vulgaris*, Common Carline Thistle, is a biennial, and native of Europe. The two following are annuals, namely,—*Carlina lanata*, seu *Acarina*, &c. *Woolly Carline Thistle*, native of Italy.—*Carlina sulphurea*, &c. *Clus. Hist. Plant. rar. &c.*; *J. Bauh. Hist. Plant.*; *C. Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*; *Raii Hist. Plant.*; *Tournef. Inst.*

CARLINA is also the *Carduus acaulis*, the *Atractylis gummi-fera*; the *Arnica crocea*, and the *Cnicus spinosissimus* of Linnæus.

CARLINE-THISTLE (*Bot.*) the *Carlina* of Linnæus, a plant of the thistle kind, which is said to have been so called by Charlemagne, because his army was delivered from the plague by the use of its root. It contains an acrid resinous principle, by which it stimulates the solids, dissolves the humours, and promotes perspiration.

CARLING-KNEES (*Mar.*) timbers going athwart the ship from the sides to the hatchway, serving to sustain the deck on both sides.

CARLINGS (*Mar.*) in French *entremises*, ou *traversins des baux*, short pieces of timber, ranging fore and aft from one of the deck beams to another, into which their ends are scored. They are used to sustain and fortify the smaller beams of a ship.

CARLINO (*Com.*) a small silver coin, current in the kingdom of Naples and in Sicily, worth about threepence three farthings. It is supposed to derive its name from Charles I. king of Naples and Sicily in 1266. The Carlino is also a gold coin of Piedmont, worth five pounds eighteen shillings and eightpence, or threepence according to their present value. The impression on this latter coin is the same as that on the Doppia.

CARLOCK (*Chem.*) a sort of Isinglass made with the sturgeon's bladder, which is used for clarifying wine, and also in dyeing.

CARLO SANCTO RADIX (*Bot.*) St. Charles' Root, the bark of which is sudorific, and strengthens the gums and stomach. It is found in Mehoacan, a province of South America.

CARMA'GNOLE (*Mil.*) a name given to the French soldiers who first engaged in the cause of republicanism.

CARMAN (*Com.*) one who is employed in carrying goods from the wharfs to the merchants' warehouses, &c. also in timber-yards, &c.

CARME'L (*Mil.*) an order of knighthood in France instituted by Henry IV, in 1608, under the title of our Lady of Carmel.

CARME'LINE-WOOL (*Com.*) the second sort of wool, produced by the animal which the Spaniards call *Vicunna*.

CARME'LITE (*Bot.*) a sort of pear.

CARME'LITES (*Ecc.*) an order of monks, founded by Almerius, bishop of Antioch, on mount Carmel in Syria, in 1122. *Baron. Annal. Ann.* 1181.—*Barefooted Carmelites*, a reformed order of Carmelite monks, so called because they went barefoot according to the rules of their order, which was instituted in the 16th century. *Spondan. Contin. Baron. Ann.* 1568; *Hel. Hist. Ord. Mon.*

CARMEN (*Ant.*) any set formula of words, whether in prose or verse, used for any specific purpose, of which description was the prayer uttered by the Decii on their devoting themselves to death for the benefit of their country. Moral sentences, incantations, charms, and the like, though written in prose, were called *carmina*. The *carmen*, when written in verse, answered to what is now called a verse, or an ode, as the *carmen seculare*, and the *carmina*, or odes, of Horace. *Cat. Dist. Mor.* n. 1; *Plin.* 1. 38, c. 2.

CARMEN (*Med.*) the same as *Incantatio*.

CARMEN'TALIA (*Ant.*) a festival in honour of Carmenta, the mother of Evander, which was celebrated during five days, i. e. from the third of the Ides of January, or the 11th of January, to the 18th of the Calends of February. *Varr. de Lat. Lin.* 1. 5, c. 3; *Ovid. Fast.* 1. 1, v. 617—631; *Alex. Gen. Dior.* 1. 6, c. 8; *Ursat. de Not. Roman. apud Græv. Thes. Antiq. Rom.* tom. 6, p. 2087.

CARMES, Eau de (*Min.*) Carmelite Water, or Magisterial Water of Baumé, which takes its name from being invented by the Carmelites at Paris, and is extremely reviving and good in all sorts of fits.

CARMIN (*Nat.*) the same as *Carmine*.

CARMINATIVES (*Med.*) *Carminantia*, medicines which promote perspiration, or dilute and relax.

CARMINÉ (*Nat.*) a dross or powder of a very beautiful deep red colour, separated from cochineal by means of a water in which are infused Chouan and Autour. It is used for painting in miniature.

CARMOT (*Alch.*) what the philosopher's stone was supposed to consist of. *Castel. Lex Med.*

CARMOUSAL (*Com.*) a Turkish merchant ship.

CARNABA'DIUM (*Med.*) *καρναβάδιον*, *καρναβάδιον*, the same as *Cuminum Æthiopicum*, according to Myrepsus.

CARNADO (*Com.*) a Spanish coin, six of which make a marvedi.

- CARNAGE** (*Mil.*) in French *carnage*; a massacre or great slaughter in consequence of a desperate action between two bodies of armed men.
- CARNAGE** (*Sport.*) in Italian *carnaggio*; the flesh which is given to the dogs after the chase.
- CARNALES** (*Ant.*) *Ædiles*, so called because they superintended the markets. *Non. ex Varr.*
- CARNARIUM** (*Archæol.*) a charnel house, or repository for the bones of the dead.
- CARNATION** (*Bot.*) a beautiful sort of Clove-Pink, a variety of the *Dianthus caryophyllus* of Linnæus, the chief excellence of which consists in the brightness of its colours equally marked all over the flowers. It is distinguished by modern florists into four sorts, namely, the—*Flakes*, of two colours only and their stripes large.—*Bizarres*, striped with three or four different colours.—*Piquettes*, having a white ground spotted or pounced with red, purple, and other colours.—*Painted-Ladies*, having the petals of a red or purple colour.
- CARNATION** (*Paint.*) the flesh colour, which is understood of all the parts of a picture in general which represent flesh, or which are naked without drapery; wherefore, if the flesh be represented to the life, the *carnation* is said to be very good.
- CARNAVAL** (*Ecc.*) vide *Carnival*.
- CARNEÆ COLUMNÆ** (*Med.*) the fleshy pillars or columns in the cavities of the heart.
- CARNEÛDDE** (*Archæol.*) heaps of stones, supposed to be Druidical remains for confirming and commemorating covenants, &c.
- CARNEL** (*Mar.*) a small Spanish ship which goes with mizzen instead of main sails.—*Carnel-work*, the same as *Carvel-work*.
- CARNELIAN** (*Min.*) or *Cornelian*, a precious stone, of which there are three kinds, distinguished by their colours red, yellow, and white. It is the *Chalcedonius carneolus* of Linnæus.
- CARNEOL** (*Min.*) a sort of precious stone.
- CARNEOL** (*Bot.*) a kind of herb.
- CARNEOLUS LAPIS** (*Min.*) *Cornelian*, a precious stone, half transparent, which is found in Sardinia.
- CARNEY** (*Vet.*) a disease in horses by which their mouths become so furred and clammy that they cannot feed.
- CARNICULA** (*Med.*) from *caro*, flesh; used by Fallopius instead of *caruncula*, to signify in particular the flesh which surrounds the gums.
- CARNIFEX** (*Ant.*) the public executioner among the Romans, who was forbidden by the laws to have his house in the city. *Cic. pro Rab.* c. 5; *Sigon. de Ant. Jur. Rom.* l. 2, c. 15; *Fest. de Verb. Signif.*
- CARNIFEX** (*Alch.*) the spagiric Vulcan, or fire, in the affair of the philosopher's stone.
- CARNIFORMIS ABSCESSUS** (*Med.*) from *caro*, flesh, and *forma*, likeness; an abscess with a hardened orifice, and of a firm substance or hard consistence, like a shell.
- CARNIVAL** (*Ecc.*) in Italian *Carnevale*, is supposed to be derived from the Latin words *carnis intercalum*, i. e. a period for eating flesh, as distinguished from the ensuing period of abstinence during Lent, although others have with equal probability derived it from *carn-a-val*, i. e. flesh to the pot, to denote the time for eating meat. The carnival is a season of festivity among the Italians for the space of twelve days previous to Lent, during which all sorts of games, feasting, entertainments, and diversions of every kind, go forward.
- CARNIVOROUS** (*Nat.*) *σαρκοφάγος*, flesh-devouring; an epithet of the *Assius lapis*: also animals are so called whose food is flesh.
- CARNO** (*Law*) an immunity or privilege. *Crompt. Jurisd.* fol. 191.
- CARNEÛ CUTIS** (*Anat.*) or *panniculus carnosus*, a fleshy membrane that assists the corrugation of the skin.
- CARNOSITY** (*Surg.*) a tubercle or fleshy excrescence growing in, and obstructing, any part of the body.
- CARNOSUS** (*Bot.*) fleshy; an epithet for roots, &c. [vide *Fleshy*]
- CARNOUSE** (*Gunn.*) the base ring about the breech of a gun.
- CARO** (*Anat.*) in the general sense, signifies flesh; but in the particular sense, the belly, or red part of a muscle. *Ruff. Ephes. de Appellat. Part. Corp. Human.* l. 1, c. 35; *Gal. de Loc. Affect.* l. 2, c. 2.—*Caro musculosa quadrata*, the *Palmaris brevis*.
- CARO adnata ad testem et ad vasa** (*Surg.*) names given to the sarcocele according to the circumstances in which it takes place.
- CARO** (*Bot.*) the pulp of the fruit.
- CAROB** (*Com.*) a small weight, the twenty-fourth part of a grain.
- CAROB-TREE** (*Bot.*) a tall-spreading tree, the *κεράτιον* of the Greeks, and the *Ceratonia siliquosa* of Linnæus, the fruit of which is a pod or bean, resembling a chesnut in taste, and yielding a sort of honey, which serves the Arabians instead of sugar. *Prosper. Alpin de Ægypt. Plant.*; *J. Bauh. Hist. Plant.*
- CAROBBA** (*Bot.*) another name for the *Siliqua Dulcis*.
- CARENUM** (*Bot.*) *κερνονιον*, a name for musk when boiled to the consumption of one-third, so as to be reduced to a convenient thickness.
- CAROL** (*Mus.*) from the old Italian *carola*; an old name for a song sung to dancing.
- CAROLA** (*Mus.*) Italian; was formerly synonymous with *Ballata*, signifying a song of a plain, simple, popular melody to be sung to a dance.
- CAROLA** (*Archæol.*) a little pew or closet.
- CAROLIN** (*Com.*) or *Carolin d'Or*, a gold coin of Bavaria and Hesse-Darmstadt, worth about one pound sterling. The carolin bears on the obverse the head of the reigning prince Palatinate, with a suitable legend; and, on the reverse, the Virgin and Child supporting the arms of Bavaria. Legend, *CLYPEUS OMNIBUS IN TE SPERANTIBUS*.—*Carolini* is also the name of an old Swedish coin, now out of circulation.
- CAROLINEA** (*Bot.*) a genus of plants, Class 16 *Monadelphia*, Order 7 *Polyandria*.
- Generic Characters.* CAL. *perianth* one-leaved.—COR. *petals* five.—STAM. *monodelphous*; *filaments* very numerous; *anthers* oblongish.—PIST. *germ.* inferior; *style* filiform; *stigmas* simple.—PER. *dome* ovate; *seeds* twin.
- Species.* The species are—*Carolinea princeps*, seu *foliis*, &c. seu *Pachira aquatica*, seu *Sergeant*, &c. seu *Cacao*, &c. a shrub, native of Guinea.—*Carolinea insignis*, seu *foliis*, &c. seu *Bombax*, &c. seu *Xiloxorhill*, &c. a shrub, native of America.—*Carolinea minor*, a shrub, native of Guiana.
- CAROLINES** (*Ecc.*) the four books composed by the order of Charlemagne, to refute the Second Council of Nice, respecting the worship of images. *Du Pin. Bibl. des Aut. Eccles.* xiii. *Siéc.*
- CAROLINGIANS** (*Polit.*) a name of the second race of kings in France, of which Pepin was the founder.
- CAROLITIC COLUMNS** (*Archit.*) columns with foliated shafts, decorated with leaves and branches winding spirally around them, or disposed in form of crowns and festoons.
- CAROLOSTADIANS** (*Ecc.*) a branch of the Lutherans, who denied the real presence in the Eucharist; so called from their founder Carolostadius.
- CAROLUS** (*Com.*) a broad piece of gold struck in the time of Charles the First, made then for twenty shillings, but since current at twenty-three.

CAROMEL (*Chem.*) a name given by the French to the peculiar smell which exhales from sugar when heated.

CARO-MOELI (*Bot.*) the *Sideroxylon* of Linnæus.

CAROPI (*Bot.*) another name for the *Amomum verum*.

CAROPO (*Ich.*) a species of the *Gymnotus*.

CARORA (*Med.*) *Cynnia*, or *Cymia*, the name of a vessel that resembles a urinal.

CAROS (*Med.*) *κάρως*, from *κέφας*, the head; because this is the part principally affected; a slight degree of apoplexy. *Dioscor.* l. 4, c. 76; *Plin.* l. 25, c. 13; *Gal. Com. in Hippocrat.* l. 5, aphor. 5; *Aet. Tetrab.* 2, serm. 2, c. 5; *Æginet.* l. 3, c. 9; *Act. de Meth. Med.* l. 4, c. 2.

CAROS (*Bot.*) another name for *Carui*.

CAROSIS (*Med.*) the same as *Caros*.

CAROTA (*Bot.*) the *Daucus carota* of Linnæus.

CAROTEE'L (*Com.*) a certain quantity which varied in weight according to the commodity; the carotael of mace being about three pounds; that of nutmegs from six to seven and a half; that of currants from five to nine pounds weight.

CAROTIDS (*Anat.*) *καρωτιδες*, *carotidæ arteriæ*, carotid arteries; two principal arteries which convey the blood to the head; they are so called from *κάρως*, the *carus*, or sleepiness; because when the current of blood through these vessels is diminished, a stupor ensues. *Ruff. Ephes. de Appell. Part. Hum. Corp.* l. 1, c. 34; *Gal. de Usu. Part.* l. 16; *Gorr. Med. Def.*

CAROU'M (*Bot.*) the same as *Caru*, or *Carum*.

CAROUSAL (*Mil.*) in French *carroussel*, a magnificent entertainment exhibited by princes or other great personages on some public occasion, consisting of cavalcades of gentlemen richly dressed and equipped, after the manner of the ancient cavaliers, &c.

CAROXYLUM (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.
Generic Characters. CAL. *perianth* two-leaved.—COR. one-petalled; *tube* none; *border* segments obtuse; *nectary* scales five.—STAM. *filaments* five; *anthers* very small.—PIST. *germ* superior; *style* simple; *stigmas* two.—PER. none; *seed* one depressed.
Species. The only species is the *Caroxylon salsola*, seu *Canna bosch*, a perennial, native of Africa.

CARP (*Ich.*) a freshwater fish, the *Cyprinus* of Linnæus, which affords a palatable and nourishing food. Carp sometimes migrate, and spawn about April or May. They are a valuable fish for stocking ponds, being very quick in growth, and spawning three times a year.

CARP-STONE (*Min.*) a stone of a triangular form, found in the palate of a carp.

CARPASUS (*Bot.*) *κάρπασος* so named *παρά τὸ κάρπν ποιῆσαι*, because it induces sleep upon the person who eats of it; a highly poisonous herb, resembling myrrh, which is spoken of by ancient naturalists.

CARPA'TA (*Bot.*) vide *Cataputia Minor*.

CARPA'THICUM (*Med.*) a name for fine essential oil distilled from the fresh cones of the trees which yield the common turpentine.

CARPÆ'A (*Ant.*) *καρπαῖα*, a kind of dance anciently in use among the Athenians and Magnesians, which was performed by two persons, one acting the husbandman, the other the robber. *Athen.* l. 1, c. 13.

CARPEMEALS (*Com.*) a coarse kind of cloth made in the Northern parts of England. 7 *Juc.* 1, c. 16.

CARPENTA'RIA (*Bot.*) the *Herba Judaica*, a vulnerary plant.

CARPENTA'RIOUS (*Ant.*) a maker of carpenta; a coach-maker or wheelwright. *Veget.* l. 2, c. 2.

CARPENTER of a ship (*Mar.*) *maitre charpentier d'un vaisseau*, an officer appointed to examine and keep in order the frame of a ship, with her masts, yards, &c.—*Carpenter's*

mate, in French *aide charpentier*, one appointed to assist the carpenter in his duty.—*Carpenter's crew*, in French *gens du charpentier*, a set of men employed under the carpenter to make the necessary repairs.

CARPENTERS, *Company of*, (*Her.*) was incorporated in 1476. Their arms are *argent* a cheveron engrailed between three pairs of compasses pointing towards the base, and a little extended.

CARPENTER'S rule (*Carpent.*) a tool generally used in taking dimensions, and in casting up the contents of timber, and of artificer's work.—*Carpenter's square*, a square, the stock and plate of which consists of one piece of iron plate.

CARPENTER'S square (*Her.*) a charge in some coats of arms.

CARPENTRY, one of the arts subservient to architecture. [*vide Building*]

CARPE'NTUM (*Ant.*) 1. A kind of vehicle which is either a chariot for public conveyance, or a cart for agricultural uses. Ovid derives the name from Carmenta, the mother of Evander.

Ovid. Fast. l. 1, v. 619.

*Nam prius Ausonias matres carpenta vehabant
Hæc quoque ab Evandri dicta parente reor.*

Liv. l. 1, c. 48; *Apul. Met.* l. 10, 11, &c.; *Pallad. de Re Rust.* l. 10, c. 1; *Tacit. Annal.* l. 12, c. 42; *Sueton. in Cal.* c. 15; *Flor.* l. 3, c. 2; *Ammian.* l. 31, c. 2; *Cassiodor.*; *Var.* l. 6, c. 15; *Isidor. Orig.* l. 20, c. 12; *Scheff. de Re Vehic.* l. 2, c. 17. 2. A tribunal, or the curule chair of the magistrates. *Vopisc. in Aurel.* c. 1; *Cassiodor.* l. 6, c. 3, &c.; *Justin. Novel.* 70.

CARPENTUM (*Astrol.*) the throne or seat of a planet when set where it has most dignities.

CARPERITA'RIA (*Bot.*) the *Erysimum barbaria* of Linnæus.

CARPESIUM (*Bot.*) *καρπῆσιον*, a plant resembling cinnamon in its shoots, and a more powerful antidote than the crocus. *Gal. de Antidot.* l. 1.

CARPESIUM, in the *Linnean system*, a genus of plants, Class 19 *Syngenesia*, Order 2 *Polygamia superflua*.

Generic Character. CAL. *common* imbricate; *leaflets* larger.—COR. *compound* equal; *corollets* hermaphrodites in the disk; *border* quinquefid.—STAM. five; *anthers* cylindric.—PIST. *germ* oblong; *style* simple; *stigma* bifid.—PER. none; *calyx* unchanged; *seeds* obovate; *receptacle* naked.

Species. The two species are the—*Carpesium cernuum*, seu *floribus*, &c. seu *Balsanita*, &c. seu *Aster*, &c. seu *Chrysanthemum*, &c. Drooping *Carpesium*, a shrub, native of Italy.—*Carpesium abrotanoides*, seu *floribus*, a perennial, native of China.

CARPET (*Com.*) a covering for the floor, wrought either with the needle or a loom.

CARPET, *to shave the* (*Man.*) is said of a horse when he gallops close, or near the ground.

CARPET-KNIGHTS (*Polit.*) an epithet applied to persons of peaceful professions, who are raised to the dignity of knighthood.

CARPHOS (*Bot.*) the herb *Fænugreek*.

CARPHUS (*Med.*) a small pustule. *Aet. Tetrab.* 1, serm. 1.

CARPIA (*Med.*) Lint.

CARPINUS (*Bot.*) a genus of plants, Class 21 *Monoecia*, Order 8 *Polyandria*.

Generic Character. CAL. *ament* common.—COR. none.—STAM. *filaments* generally ten; *anthers* didymous.—PIST. *germs* two; *stigmas* simple.—PER. none; *ament* very large; *seed* nut-ovate.

Species. The species are—*Carpinus Betulus*, seu *strobi-*

torum, &c. seu *squamis*, &c. seu *vulgaris*, &c. seu *Astrya*, &c. seu *Fagus*, &c. Horn beam, Hard beam, Horse beech, Horn beech, Wych Hasel, a shrub, a native of Europe.—*Carpinus Americana*, seu *strobilorum*, &c. seu *foliis*, &c. a shrub, a native of Canada.—*Carpinus orientalis*, seu *strobilorum*, &c. seu *strobilis*, &c. seu *duinensis*, &c. a shrub, a native of Carniola.—*Carpinus Ostrya*, Hop Horn beam.—*Carpinus virginiana*, Flowering Horn beam.—*Carpinus duinensis*. *Dodon. Pemptad.*; *Lobel. Adversar.*; *Clus. Rar. Plant. Hist.*; *Ger. Herb.*; *Bauh. Hist. Plant.*; *Park. Theat. Botan.*; *Raii Hist. Plant.*; *Tournef. Instit.*

CARPIO (*Ich.*) the Carp.

CARPI'SCULUS (*Ant.*) a kind of shoe or slipper. *Vopis. in Aurel. c. 30.*

CARPOBA'LSAMUM (*Bot.*) from καρπός, fruit, and βαλσάμω, balsam, the fruit of the Balsam tree.

CARPO'BOLUS (*Bot.*) the same as *Lycoperdon*.

CARPOCRA'TIANS (*Ecc.*) a sect of heretics named after Carpcrates, their ring-leader, A. D. 120. They owned one sole principal and father of all things, and that the world was created by angels; but denied the divinity of Christ. *Iren. l. 1, c. 24*; *Clem. Alexand. Strom. l. 3*; *Tertull. de Præsc. c. 48*; *Epiphani. Hæres. 47*; *Baron. Annal. Ann. 120.*

CARPODE'TUS (*Bot.*) a genus of plants so called from καρπός, fruit, and δέω, to bind, the fruit being surrounded by a fillet; *Class 5 Pentandria*, *Order 1 Monogynia*.
Generic Characters. CAL. perianth turbinate: teeth subulate.—COR. petals five.—STAM. filaments five; anthers roundish.—PIST. germ inferior; style filiform; stigma flat-headed.—PER. berry dry; seeds a few.
Species. The only species is the—*Carpodetus serratus*, a native of New Zealand.

CARPOL'THI (*Min.*) fossils or stony concretions of any kind which have a resemblance to fruit, from καρπός, fruit, and λίθος, a stone.

CARPOLO'GIA (*Med.*) from *carpo*, to pluck or pull gently; a delirious motion of the hands, usually a fatal symptom in fevers.

CARPOPHY'LLUM (*Bot.*) καρποφύλλον, a kind of laurel.

CARPOS (*Bot.*) καρπός, a seed or fruit.

CARP-STONE (*Min.*) vide *Carp*.

CARPTOR (*Ant.*) or *Carpus*, a carver, or one who served out the meat at meals, who is called *obsonii magister* by Seneca. *Senec. de Vit. beat. c. 17*; *Petron. c. 36*; *Juv. sat. 9, v. 110.*

CAR'RPUS (*Anat.*) καρπός, the wrist.

CARR (*Archæol.*) a kind of cart with wheels.

CARRACK (*Mar.*) or *carrick*, *carrucha*, a ship of great burden, so called from the Italian *carico*, or *carco*, a burden or charge. *Stat. 2 R. 2, c. 4.*

CARRA'GO (*Ant.*) a barricade, scone, or camp, made by means of carts and waggons, which it was the practice for the Gauls, and other barbarous nations, to put in the way to prevent the progress of the enemy. *Cæs. de Bell. Gall. l. 1, c. 2*; *Polyæn. Strat. l. 3, c. 10*; *Curt. l. 9, c. 1*; *Veget. l. 3, c. 10.*

CARRA'RA (*Min.*) a sort of white marble, resembling the Parian marble, but harder, and less bright; so called from the town of Carrara where it was found.

CARRAT (*Com.*) vide *Carat*.

CARREA'U (*Mil.*) 1. The ground. 2. A very ancient sort of arrow.

CARREAU (*Mason.*) a square piece of stone, which is broader upon the superficies of a wall than it is within.—*Carreau de plancher*, clay made into different shapes and sizes for the pavements of floors, as flat tiles, &c.—*Carreau de Hollande*, Dutch tile.

CARREA'UX (*Mar.*) the bends or wales of a ship.

CARREFOUR (*Mil.*) a cross-way.

CARREL (*Archæol.*) a closet or apartment for privacy and retirement.

CARRELA'GE (*Mil.*) French for all works made of clay, stone, or marble.

CARRELE'R (*Mason.*) French for to cover over or pave with square tiles.

CARRE'TA (*Archæol.*) a carriage, cart, or wain load, as *carreta fæni*, a load of hay.

CARRIAGE (*Husband.*) a channel cut for the conveyance of water to overflow ground.

CARRIAGE of a gun (*Mil.*) the machine upon which it is mounted. Carriages are of different kinds, namely—*Block-carriage*, a carriage which is made from a solid piece of timber, hollowed out so as to receive the gun into the cap-squares.—*Garrison-carriage*, that on which garrison pieces are mounted, which are much shorter than others.—*Travelling-carriage*, such as guns are mounted on for sieges, &c.—*Field-carriage*, a lighter sort of carriage than the preceding, which is adapted to the size of the pieces it carries.—*Gallop-carriage*, which serves for a 1½-pounder.—*Mountain-carriage*, one constructed for mountainous countries.—*Devil-carriage*, a stouter sort of carriage, with four wheels, used for transporting heavy guns.—*Platform-carriage*, one having a platform to carry both the gun and its carriage.—*Truck-carriage*, which serves for conveying guns and other things on a battery.—*Pontoon-carriage*, one constructed with four wheels, for transporting pontoons.

CARRIAGE of a wooden stair (*Carpent.*) the frame of timber-work which supports the steps.

CARRICK (*Mar.*) vide *Carrack*.—*Carrick bend*, vide *Bend*.
Carrick-Bits, the bits which support the windlass.

CARRIER (*Falcon.*) a flight or tour of the bird 120 yards; if it mounts higher it is called a *double career*.

CARRIER (*Orn.*) one of the different varieties of pigeons included under the *Columba domestica* of Linnæus, so called from its capacity to be used in conveying letters or intelligence to distant parts.

CARRIÈRE (*Mil.*) a large spot, intended for tournaments, races, and other exercises.—“*Carriere prendre*,” to commence the full speed at which cavalry charge.

CARRIERS (*Com.*) all persons carrying goods for hire, as a master and owners of ships, lightermen, stage-coachmen, &c. come under the denomination of *common carriers*.

CARRILON (*Mus.*) a short simple air, adapted to the performance of small bells, or clocks.

CARRION crow (*Orn.*) the *Corvus corone* of Linnæus, so called from the carcases on which it feeds.

CARROBALISTA (*Ant.*) a carriage for the *balista*, or other warlike engines.

CARRONA'DE (*Mar.*) in French *carronade*, a short piece of ordnance invented by Mr. Gascoine, and originally made at Carron, a river. It differs from ordnance in general, having no trunnions, and being elevated upon a joint and bolt.

CARROON (*Law*) a rent paid for the privilege of driving a cart or cart in the city of London.

CARRROT (*Bot.*) a well-known fleshy root growing in kitchen gardens, the *Daucus* of Linnæus.—*Candy carrot*, the *Athamanta cretensis* of Linnæus, a perennial.

CARROUSEL (*Archæol.*) vide *Carousal*.

CARROW (*Polit.*) a sort of itinerants in Ireland, who used to wander up and down to gentlemen's houses, living only by cards and dice; who, though they had little or nothing of their own, would nevertheless play for much money.

CARRU'CA (*Ant.*) a splendid kind of carr or chariot, mounted on four wheels, which were made of brass, of ivory, of silver, and even of gold.
Mart. l. 3, ep. 62.

Aurea quod fundi pretio carruca paratur.

Scævola. Leg. 13, ff. de aur. et arg.; *Plin.* l. 33, c. 2; *Lamprid.* Alex. Sev. c. 43; *Ammian.* l. 14, c. 6; *Vopisc. Aurel.* c. 46; *Isidor. Orig.* l. 20, c. 12; *Scheff. de Re Vehic.* l. 2, c. 27.

CARRUCA (*Archæol.*) the former name for a plough

CARRUCAGE (*Law*) a duty or tax imposed on every plough; also the ploughing of the ground.

CARRUCATE (*Archæol.*) ploughed land; or as much arable land as can be tilled in one year.

TO CARRY away (*Mar.*) *emporter*, to break; as "That ship has carried away her fore-topmast;" i. e. has broken it off. "To carry a bone," is said of a ship that makes the water foam before her.

TO CARRY (*Mil.*) to obtain possession of by force, as "To carry the outworks."

TO CARRY on, to prosecute, or continue, as "To carry on the war."

CARRYING power (*Chem.*) that power by which alone fluids acquire heat.

CARRYING (*Falcon.*) a hawk's flying away with the quarry, which is sometimes the consequence of her not being sufficiently broken to the lure.

CARRYING (*Sport.*) is said of a hare who runs on ground where the soil sticks to her feet.

CARRYING (*Man.*) is applied to a horse either in a good or a bad sense. A horse is said to *carry well* that has his neck raised or arched, and "to *carry ill*," or "to *carry low*," when his neck is ill-shaped, so that he lowers his head too much.—*Carrying wind*, an expression applied to a horse that tosses his head above his ears, and does not carry handsomely. It is distinguished from beating on the hand, because in the first case he only tosses his head, without shaking the bridle, but in the latter case he shakes, and resists the bridle. Carrying in the wind is opposed to carrying low.

CART (*Mech.*) a vehicle mounted on two wheels, and drawn by one or more horses.

CART (*Mil.*) this vehicle is much used in the military service, and is denominated variously according to its use, as *ball-cartridge-cart*, *powder-cart*, *hand-cart*, *trench-cart*, *tumbril-cart*, &c.; the latter is a cart with two wheels, and square bodies, with a canvass painted top, for the conveyance of ammunition.

CARTE (*Mil.*) 1. A thrust with a sword at the inside of the upper part of the body.—*Low carte*, a thrust at the inside of the lower half of the body. 2. A bill of fare, such as is given at a tavern.—*Carte blanche*, a blank paper sent to a person to fill up with such conditions as he pleases.

CARTE détaillée d'un pays (*Geog.*) the correct chart or drawing of a country, so that all the places may be seen at once.

CARTEL (*Mil.*) 1. An agreement between two states at war for the mutual exchange of prisoners. 2. A challenge to a duel.

CARTEL (*Mar.*) in French *cartel*, *bâtiment parlementaire*, a ship commissioned in time of war to exchange the prisoners of any two hostile powers, or to carry proposals, &c. from one to another.

CARTELLI (*Archæol.*) vide *Cartouse*.

CARTESIAN Philosophy (*Lit.*) or *Cartesianism*, the system of philosophy advanced by Des Cartes, which is founded on two great principles,—the metaphysical and physical. The metaphysical is: I think, therefore I am, or I exist: the physical is, that nothing exists but substance.

CARTHAMUS (*Bot.*) Wild or Bastard Saffron, a genus of plants, Class 19 *Syngenesia*, Order 1 *Polygamia Æqualis*. *Generic Characters.* CAL. common ovate; scales numerous.

—COR. compound uniform; corollets equal; border five-

parted.—STAM. filaments five; anthers cylindrical.—PIST. germ very short; style filiform; stigma simple.—PER. none; calyx converging; seeds solitary; receptacle flat.

Species. The species are annuals, perennials, or shrubs.

Among the annuals are the following—*Carthamus tinctorius*, seu *Cnicus*, Official Bastard Saffron, a native of Egypt.—*Carthamus flavescens*, seu *Orientalis*, &c. a native of Armenia.—*Carthamus persicus*, a native of Persia.

—*Carthamus dentatus*, seu *Cnicus*, &c. a native of Melita.

—*Carthamus lanatus*, seu *Atractylis*, &c. Yellow Distaff Thistle, or Woolly Carthamus.—*Carthamus creticus*, seu

Atractylis, &c. seu *Cnicus*, &c. Cretan Carthamus, a native of Crete. Among the perennials are the following

—*Carthamus pectinatus*, a native of Barbary.—*Carthamus multifidus*, seu *caule*, &c. seu *foliis*, &c. a native of Algiers.—*Carthamus tingitanus*, seu *Carduus*, &c. Tangier Carthamus.—*Carthamus cæruleus*, seu *Cnicus*, &c.

Blue flowered Carthamus, or Bastard Saffron, a native of Spain.—*Carthamus Pinnatus*, a native of Barbary.—

Carthamus mülissimus, &c. *Carthamoides*, seu *Carduncellus*, &c. Small Carthamus, a native of Paris.—*Carthamus Carduncellus*, *Cnicus*, *Carduncellus*, &c. seu *Eryngium*, &c. Mountain Carthamus, &c. Among the shrubs

are the following—*Carthamus Arborescens*, seu *Carthamoides*, *Cnicus*, &c. a native of Spain.—*Carthamus salicifolius*, seu *caule*, &c. seu *fruticosus*, &c. a native of Madeira.—*Carthamus corymbosus*, seu *Chamaeleon*, &c. seu

Carduus, &c. Corymbed Carthamus, a native of Apulia. *Clus. Hist. Plant. rar.*; *Dod. Pempt.*; *C. Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Bot.*; *Rau Hist. Plant.*

CARTHUSIANS (*Ecc.*) in French *chatreux*, an order of monks, founded by Bruno, a canon of Rheims, A. D. 1080.

St. Bernard ep. 11, 12; *Heliot Hist. des Ord. Monast.* tom. vii, c. 53; *Mir. de l'Orig. de Rel.* l. 2, c. 35; *Sainte Marthe Gall. Christ.*

CARTHUSIAN Powder (*Med.*) another name for antimony, which owed its introduction to the Cartlians.

CARTILAGE (*Anat.*) χόνδρος, from *caro*, flesh; a cartilage or gristle; a whitish or pearl-coloured substance, which is harder than all other parts, except the bones.

Aristot. Hist. Anim. l. 1, c. 1; *Ruff. Ephes. de Appell. hum. Corp.* l. 1, c. 35; *Oribas. Med. Coll.* l. 25, c. 1.

CARTILAGINOUS (*Bot.*) *cartilagineus*; an epithet for a leaf and arillus; *folium cartilagineum*, a leaf, having its edge strengthened by a tough rim; *arillus cartilagineus*, an aril of a firm consistence, and thick.

CARTILAGINOUS (*Ich.*) an epithet for all fish whose muscles are supported by cartilages instead of bones.

CARTILAGO ensiformis (*Anat.*) χόνδρος ἐπιμοειδής, the tip or extremity of the sternum, which by Hippocrates is called χόνδρος, in the proper sense. *Gal. de Usu. Part.* l. 6.—

Cartilago innominata, χόνδρος ὑπιοειδής, the second cartilage of the larynx.—*Cartilago scutiformis*, or *peltalis*, from its resemblance to the *scutum*, or *pelta*, the prominences of which are discernible outwardly in the throat. *Gal. de Usu. Part.* l. 6, 7, &c.; *Gorr. Def. Med.*; *Foes. Æconom. Hippocrat.*; *Castell. Lex. Med.*

CARTOON (*Paint.*) in French and Spanish *carton*, pasteboard; a design made on strong paper, to be afterwards calked through, and transferred on the fresh plaster of a wall. The most distinguished performances of this kind are the *cartoons* of *Raphael*, seven of which are now preserved in the palace at Hampton Court. The word is derived from the Italian *cartone* and *carta*, paper, signifying several folds of paper.

CARTOUCH (*Mil.*) a case of wood, bound about with marline, about three inches thick at bottom, holding about 400 musket balls, besides eight or ten iron balls of about a pound each, to be fired out of a howitzer, for the defence of a pass.

CARTOUCHE (*Mil.*) a charge or cartridge.—*Cartouche infamante*, or *Cartouche jaune*, a discharge given to a soldier in the French army, after having been degraded, punished, and rendered unworthy to carry arms.

CARTOUCHE (*Paint.*) a particular mode of sketching out with a crow's quill and Indian ink.

CARTOUCHES (*Archit.*) or *Cartoozes*, Italian *cartoccio*, a kind of blocks or modillions used in the cornices of wainscotted apartments.

CARTOUCHES (*Mil.*) in the artillery services are made of leather to sling over the shoulder of the gunner.—*Cartouches* are also military passes given to soldiers going on furlough.

CARTOUSE (*Archæol.*) or *Cartouch*, Italian *cartoccio*, an ornament representing a scroll of paper.

CARTRIDGE (*Mil.*) a case of paper, parchment, or flannel, fitted to the bore of the piece, and filled with gunpowder, to expedite the discharge of the piece. Cartridges are of two sorts, namely—*Ball-cartridges*, which are used in firing balls.—*Blank-cartridges*, which are used in firing without ball.—*Cartridge-box*, a case of wood, carried by a soldier, which contains several rounds of Ball and Blank Cartridges.

CARTULARIES (*Archæol.*) from *charta*, paper; papers wherein the contracts, sales, exchanges, &c. and other acts belonging to churches and monasteries are collected and preserved, and places where papers and records are kept.

CARTWRIGHTS' timber (*Com.*) that which is used by cartwrights and coach-makers.

CARVA (*Bot.*) the *Justicia* of Linnæus.

CARUAGE (*Ant.*) or *carvage*, two marks of silver, which was taken of every knight's fee, by Henry III., towards the marriage of his sister Isabella to the emperor.

CARUCA (*Ant.*) in French *charrue*, a plough; from the old Gallic *carr*, which is the present Irish word for any sort of wheeled carriage: hence *churl* and *carlot*, ploughman and rustic.

CARUCAGE (*Ant.*) *carucagium*, a tribute imposed on every plough for the public service; and as hidage was a taxation by hides, so carucage was by carucates of land. *Mon. Ang.* tom. i. p. 294.

CARUCATA bovum (*Archæol.*) a team of oxen for ploughing and drawing of land.

CARUCATA terræ (*Ant.*) *carucate* or *carue*, a plough of land; which was formerly declared to be 100 acres, by which the subjects have sometimes been taxed. *Bract.* lib. 2, c. 26.

CARUCATA'RIOUS (*Ant.*) he who held lands in carvage, or plough-tenure. *Paroch. Antig.* p. 354.

CARUE (*Archæol.*) the same as *Caruage*.

CARVED-WORK (*Mar.*) in French *la sculpture d'un vaisseau*, the ornaments of a ship wrought by a carver.

CARVEL (*Mar.*) a small ship or fly boat.—*Carvel-built*, an epithet for a ship that is built in carvel work.—*Carvel-work*, in French *manière ordinaire de border les vaisseaux*, the common method of planking vessels, in contradistinction to clincher work.

CARVE-OF land (*Ant.*) vide *Carucate*.

CARVER (*Archæol.*) an officer of the table, whose business it was to cut up the meat and distribute it among the guests; he answered to the *carptor* of the Romans.

CARVER (*Com.*) a cutter of wood into various forms and devices, a very ingenious art, divided into several branches, performed by the chair-carver, the frame-carver, the house-carver, and the ship-carver.

CARUI (*Bot.*) or *carvi*, the *Carum carvi* of Linnæus.

CARUIFOLIA (*Bot.*) the *Selinum caruifolia* of Linnæus.

CARVIST (*Falcon.*) a hawk in the beginning of the year; so called from its being carried on the fist.

CARUM (*Bot.*) *Caraway*, a plant, the seeds of which are

remarkably hot, carminative, and stomachic. *Oribas. Synop.* l. 1, c. 5; *Paul. Ægin.* l. 1, c. 72.

CARUM, in the Linnæan system, a genus of plants, called *Carui* by Tournefort, Class 5 *Pentandria*, Order 2 *Dygynia*.

Generic Character. CAL. umbel universal; long rays ten; umbel partial crowded.—COR. universal uniform; petals five.—STAM. filaments five; anthers roundish.—PIST. germ inferior; styles two; stigmas simple.—PER. none; fruit ovate-oblong; seeds two.

Species. The species are—*Carum carui*, seu *caule*, &c. seu *Apium*, &c. seu *Seseli*, &c. seu *Ligusticum*, &c. seu *Carum pratense*, &c. Common Caraway, a biennial, native of Europe.—*Carum simplex*, seu *caule*, &c. native of Siberia. *Dod. Hist. Stirp.*; *Lob. Adver.*; *Ger. Herb.*; *J. Bauh. Hist. Plant.*; *C. Bauh. Pin.*; *Park. Theat. Botan.*; *Raii Hist. Plant.*; *Tournef. Institut. de Re Herb.*; *Boerhaav. Ind.*

CARUM is also the *Æthusa bunices* of Linnæus.

CARUNCULA (*Anat.*) a diminutive of *caro*, flesh; a caruncle, or small piece of flesh, or what has the appearance of flesh: the *Uvula* is sometimes so called.—*Gal. de Comp. Med. sec. Loc.* l. 6, c. 3.—*Caruncula cuticulares*, the *Nymphæ*.—*Caruncula lachrymales*, the same as *Caruncula oculi*.—*Caruncula mamillares*, the extremities in the tubes of the nipple.—*Caruncula myrtiformes*; small caruncles at the entrance of the *Vagina*, formed, or rather discovered, by the rupture of the *Hymen*.—*Caruncula oculi*, long conoidal glands, red externally, situated in the internal *canthi* of the eyes, before the union of the eyelids.—*Caruncula papillares*, protuberances in the kidneys and the *Urethra*.

CARUS (*Med.*) vide *Caros*.

CARYA (*Bot.*) a walnut, or any nut inclosed in a hard shell. *Theoph.* l. 1, c. 18; *Gal. de Alim. Facult.* l. 2; *Athen. Deipnosophist.* l. 2, c. 12; *Oribas. Med. Coll.* l. 15; *Aet. Tetrab.* 1, serm. 1; *Paul. Æginet.* l. 7, c. 3.

CARYATES (*Archit.*) or *Caryatides*, a name given to an order of pillars, which consist of female figures, with their arms cut off, and clothed in a robe down to their feet. Vitruvius says they represented the *Caryatidæ*, the women of *Carya*, in Asia, who were carried as slaves into Greece, because their town had favoured the Persians. To perpetuate, therefore, the memory of their disgrace, their figures were made to support the entablatures of buildings. *Vitruv.* l. 1, c. 1.

CARYATIC order (*Archit.*) an order wherein the entablature is supported by female figures instead of columns.

CARYCHUS (*Med.*) *καρυχος*, an ingredient in one of *Myrepsus's* antidotes, c. 295.

CARYCIA (*Med.*) or *Caryce*, *καρυκία καρίκη*, a costly sort of food prepared by the Lydians, according to Galen. Varinus supposes it to be so called because it was black like boiled walnuts. *Arct. de Acut. Morb.* l. 1, c. 2; *Gal. Exeges. Vocab. Hippocrat.*; *Erot. Lex. Hippocrat.*

CARYCOIDEA (*Med.*) *καρυκοειδέα*, from *καρίκη*, *caryce*, and *εἶδος*, resemblance; an epithet for any thing resembling blood. *Gal. Exeges. Voc. Hippoc.*

CARYEDON (*Anat.*) the same as *Alphiledon*.

CARYITES (*Bot.*) a name for the female *Tithymalus*. *Diosc.* l. 4, c. 165.

CARYYL (*Med.*) a confection made of the flowers of the *Coralodendron*.

CARYOCAR (*Bot.*) a genus of plants, Class 13 *Polyandria*, Order 4 *Tetragynia*.

Generic Character. CAL. perianth quinquepartite; divisions obtuse.—COR. petals five.—STAM. filaments numerous; anthers oblong.—PIST. germ globose; styles four; stigmas obtuse.—PER. drupe fleshy; seeds nuts four.

Species. The species are shrubs, as the—*Caryocar nuci-*

- ferum*, native of Berbices.—*Caryocar butyrosom*, seu *Pekea*, &c. seu *Rhizobolus*, seu *Castanea*, &c. native of Guiana.—*Caryocar tomentosum*, seu *foliis*, &c. seu *Pekea*, &c. native of Guiana.
- CARYO'CEO (Bot.) a Portuguese name for the fruit of the Palm-tree. Ray.
- CARYOCO'STINUM (Med.) from κάρυον, *caryophyllus*, and κόστος, *costus*, an electuary; so called from its ingredients.
- CARYON (Bot.) κάρυον, a nut. It is also applied to all such fruit as inclose something eatable in a hard shell.—*Caryon basilicon*, the same as *Juglans*.—*Caryon Heracleoton*, a small nut, as a hazle nut or filbert, from Heraclea, in Pontus, whence it was brought into Greece.—*Caryon Lepton*, from λεπτός, small, the same as the preceding.
- CARYOPHYLLÆUS (Conchol.) a genus of animals, Class Vermes, Order Intestina, having a round body, and a mouth dilated and fringed.
- CARYOPHYLLA'CEOUS (Bot.) *Caryophyllaceus*, *caryophyllus*, Pink-like; an epithet for a corolla, having petals at the base much elongated, as in *Dianthus Caryophyllus*.
- CARYOPHYLLA'STER (Bot.) the *Dodonea* of Linnæus.
- CARYOPHYLLA'TA (Bot.) a species of the *Anemone* of Linnæus.
- CARYOPHYLL'ATUM Alcohol (Med.) medicated alcohol, that cures the caries according to Heister.
- CARYOPHY'LLÆ (Bot.) an order of plants in Linnæus' Fragments of a Natural Method, including such as have pink-like flowers.
- CARYOPHYLLI aromatici (Bot.) aromatic cloves, the fruit of the *Caryophyllus aromaticus*.
- CARYOPHYLLUM (Bot.) or *caryophyllus*, καρφόφυλλον, κάρφόφυλλος, Clove-Tree; the name of a tree which literally signifies the leaf of a nut, to which it bears no resemblance whatever. It is called by the Indians *Calafu*; by the inhabitants of the Mollucca Islands *Cangue*; and by the Greeks Cinnamon. Paulus Ægineta is the first who has described this spice under the name of *Caryophyllum*. Paul. Æginet. de Re Med. l. 7, c. 3.
- CARYOPHYLLUM, in the Linnean system, the *Sarracenia flava* et *purpurea*.
- CARYOPHYLLODE'NDRON (Bot.) the same as the *Caryophyllus*.
- CARYOPHY'LLUS (Bot.) a genus of plants, Class 13 Polyandria, Order 1 Monogynia.
- Generic Characters. CAL. perianth of the fruit superior.—COR. petals four.—STAM. filaments numerous; anthers simple.—PIST. germ inferior; style simple; stigma simple.—PER. oval; seed single.
- Species. The only species is the—*Caryophyllus aromaticus*, Clove-tree, native of the Moluccas, &c.
- CARYOPHYLLUS is also the *Aphyllanthes Monspiliensis*.
- CA'RYOPOS (Bot.) the juice of a kind of nut that grows upon a tree resembling cinnamon. Plin. l. 12, c. 28.
- CARYO'TA (Bot.) καρώτιε, one of the three sorts of palms mentioned by Dioscorides and Pliny. The fruit was as big as a walnut, and was sent gilt, according to Martial, as a new year's gift. Mart. xen. 24.
- Aurea porrigitur Jani caryota Kalendis.
- Dioscor. l. 1, c. 148; Plin. l. 16, c. 28.
- CARYOTA, in the Linnean system, a genus of plants, Class Cryptogamia, Order Palmæ.
- Generic Characters. Male Flowers. CAL. spathe universal compound; spadix ramose.—COR. tripartite; petals lanceolate, concave.—STAM. filaments very numerous; anthers linear. Female Flowers. CAL. common, with the males.—COR. tripartite; petals acuminate.—PIST. germ roundish; style acuminate; stigma simple.—PER. berry roundish, unilocular; seeds two large, roundish.

- Species. The two species are the—*Caryota urens*, Palm. Indica, *Schunda-paria*, seu *Segnaster major*.—*Caryotamitis*
- CARYO'TI (Bot.) καρωτοί, from καρωον, a nut; a name for the best dates growing in Syria and Palestine. Gal. de Al. fac. l. 2, c. 26.
- CARYPTIS (Bot.) a kind of Spurge.
- CAS (Com.) *Caza*, *Cayas*, *Cache*, *Casses*, and *Casie*; a small coin, made of lead, mixed with the scum of copper. It is current principally at Java, and some of the neighbouring islands.
- CAS Gangytreb (Bot.) another name for the *Verbena*.
- CASAMUM (Bot.) the same as *Arthanita*.
- CASA'QUE (Mil.) a kind of coat that does not fit so tight as the common coat.
- CASA'VA *Gasava*, or *Gazana*, an East Indian silver coin, and one of the roupies current in the dominions of the Great Mogul.
- CASBE'QUE (Com.) or *Kabesque*, a small copper coin, current in Persia only; worth about six deniers Tournois.
- CAS'ABEL (Mil.) the pummel or hindermost round knob at the breech of a great gun.
- CASCA'DE (Mil.) literally a Water-fall, or cataract; in mining it signifies the several ascents or descents which are made.
- CASCANS (Fort.) in French *Cas-cans*, holes in the form of wells, serving as entrances to galleries, or giving vent to the enemy's mines.
- CASCA'RILLA (Med.) a diminutive of the Spanish word *Cascara*, bark; was originally employed to signify Peruvian Bark; but is now applied to the bark of the *Croton Cascarilla* of Linnæus, which is a very excellent tonic.
- CASCARILLA (Bot.) the *Croton Cascarilla* of Linnæus, which affords a medicinal bark of the same name.
- CASCHOU (Bot.) the *Anacardium occidentale* of Linnæus.
- CASCHU (Min.) the same as *Terra Japonica*.
- CASE (Print.) an oblong frame of wood, divided off into small partitions or compartments, for the reception of the letter, of which there are two kinds, the upper and the lower-case: the upper contains the capitals, and the lower case the small letters. [vide *Printing*]
- CASE (Mech.) any outside covering or envelope, which serves to enclose a thing entirely. They are mostly made of wood, slightly put together, to serve a temporary purpose, as packing-cases.—*Case-knife*, a large kitchen knife.—*Case-Hardening*, a method of making the surface of iron so hard as to resist the file. This is mostly effected by putting it into a case of loam, mixed with dried hoofs, salt, vinegar, &c.—*Case of a door*, the wooden frame, in which a door is hung.—*Case Bays*, the joists framed between a pair of girders, in naked flooring.—*Case of a Stair*, the wall by which a stair-case is surrounded.
- CASE, action on the (Law) an action; so called because the whole cause or case, as much as is in the declaration (except time and place), is set down in the writ.
- CASE of Glass (Com.) in Normandy, consists of 120 feet.
- CASE (Gram.) *casus*, an accident of nouns, which consists in a variety of declension, to express the different relations of things. In Latin there are six cases, the Nominative, so called from *nomino*, to name, because we name every thing by it.—*Genitive*, because we thereby express the gender, kind, or description of things to which any thing belongs.—*Dative*, from *do*, to give, because it expresses the giving of one thing to another.—*Accusative*, from *accuso*, because we thereby accuse, or call upon a person or thing.—*Vocative*, from *voco*, to call, because we address any object by it.—*Ablative*, from *ablatus*, taken away, because it denotes taking away from a thing. Cases are moreover divided into direct and oblique; of the former kind is the nominative; and, under the latter, are included the other cases.

TO CASE a hare (*Cook.*) to skin it, and take out the bowels.

CASE-SHOT (*Mil.*) or *Canister-Shot*, in French *charge à mitraille*; a species of shell containing a number of small balls enclosed in a round tin case, so prepared as to be shot out of great guns.

CASEA'CA (*Bot.*) the *Samyda* of Linnæus.

CASED (*Mason.*) an epithet for a wall which is covered with finer materials than what are in the inside; thus, brick walls may be cased with stone, or a finer kind of bricks.

CASED (*Carpent.*) an epithet for sash-frames hollowed to receive and conceal the pulley-weights.

CASEMA'TE (*Fort.*) a vault, or arch of mason-work, in that part of the flank of a bastion, which is next the curtain, made to defend the ditch and the face of the opposite bastion.—*Casemates nouvelles*, arched batteries constructed under all the openings of revetments or ramparts.

CA'SEMENT (*Archit.*) in Italian *casamento*, a part of a window that opens on hinges to let in air. Casements are either single or double. The single consist of only one aperture; the double of two apertures, otherwise called *folding-casements*, or *French sashes*.

CASE'RNER *une troupe* (*Mil.*) to put a troop into barracks.

CASE'RNES (*Fort.*) 1. Large buildings generally erected between the houses of fortified towns and the rampart for the soldiers of the garrison to live in. 2. Barracks.

CASES or *Reports* (*Law*) are the reports of such cases or causes as have been already determined in courts of law, which are carefully preserved.

CASE-SHOT (*Mil.*) vide *Case*.

CASEUS (*Husband.*) from the Arabic *casah*, milk cheese; the curd of milk separated from the whey, and hardened by a slow heat; said to have been first discovered by Aristæus, a pupil of Chiron.

CASH (*Com.*) the stock of ready money which a merchant, &c. has at his disposal.—*Cash-book*, the book in which an account is kept of the disbursements and receipts of money.

CASHÉ'E'RING (*Mil.*) or *cashiering*, from the French *Casser*, to break; a dishonourable dismissal of an officer or soldier. In extreme cases the dismissal is attended with circumstances of infamy.

CASH'E'W (*Bot.*) the name of a tree, called, in the Linnean system, the *Anacardium Occidentale*. The fruit of this tree is a nut called the *Cashew-Nut*, the expressed juice of which is made into a pleasant wine, and the spirit distilled from it is stronger than rum or arrack.

CASHI'ER (*Com.*) one who keeps the cash or the money, which it is his business to receive and pay.—*Cashiers of the bank* are officers who sign the notes that are issued out, and examine and mark them when they are returned for payment.

CASHLITE (*Archæol.*) a mulct or fine.

CA'SHOO (*Bot.*) the gum or juice of the East Indian tree, called the *Cashew tree*; or the *Anacardium* of Linnæus.

CA'SHOW (*Min.*) the same as *Terra Japonica*.

CA'SIA (*Bot.*) the *Nitraria scoberi* of Linnæus.

CASIBOU (*Bot.*) *Cyprus*, a species of exotic privet.

CA'SING of *timber work*. (*Mason.*) the plastering a house over with mortar, and striking it while wet with a corner of a trowel by a ruler to make it resemble the joints of free-stone.

CASINGS (*Husband.*) cow-dung dried for fuel.

CASK (*Com.*) a common name for vessels of divers kinds, in contradistinction to the liquor, or other matter it contains. A cask of sugar contains from eight to eleven hundred weight; a cask of almonds about three hundred weight.

CASK (*Mil.*) or *Casket*, in French *Casque*; the ancient helmet or armour for the head.

CA'SKET (*Mar.*) small strings of sinnet that, in furling, make fast the sails to the yard.

CASLEU (*Chron.*) the tenth month of the Jewish year, answering to part of November and December.

CASMINA'RIS (*Bot.*) or *Casmunar*, the same as *Cassumuniar*.

CASQUE (*Her.*) vide *Helmet*.

CA'SSA (*Anat.*) the same as *Thorax*.

CASSA'DA (*Bot.*) or *Cassava*, the root of the plant called, in the Linnean system, *Jatropha Manihot*, from which Tapioca; and also a sort of bread is made in India. The juice of this root, in its unfermented state, is of a highly deleterious quality.

CASSA'LE *vulnus* (*Med.*) from the Arabic *cassa*, a breast; a wound in the breast.

CA'SSAMUM (*Bot.*) the fruit of the Balsam-tree.

CASSAMUNA'IR (*Bot.*) vide *Cassumuniar*.

CASSA'TA (*Law*) or *cassatum*, called by the Saxons *hîde*, by Bede, *familia*; a house with land sufficient to maintain one family.

CASSA'TUM (*Med.*) an epithet for weak, spiritless, and grumous blood in the veins, hindering the passage and motion of good blood. *Parac. Archid.* l. 7; *Sect. de Spec. Diaph.*

CASSA'VA (*Bot.*) the same as *Cassada*.

CASSAWA'RE (*Orn.*) vide *Cassowary*.

CASSE *eau de* (*Chem.*) or *Eau de casse-lunetti*, snow water distilled from the flowers of the *Cyanus*.

CASSER'OLE (*Cook.*) a loaf stuffed with a farce of pullets, and stewed.

CASSETTE (*Mil.*) a casket; also a privy purse.

CASSI-ASCHER (*Mil.*) the provost-marshal in the Turkish army.

CA'SSIA (*Bot.*) *κασσία*, or *κασία*, is frequently mentioned by the ancients among the aromatics, but is not described with any particularity. The cassia used in medicine was the *κασσία σίρηξ*, *cassia fistula*, answering to our cinnamon; and the *κασσία μέλαινα* *κασία κικα θυρωρη*, the purging cassia. *Theophrast. Hist. Plant.* l. 9, c. 5; *Dioscor.* l. 9, c. 5; *Plin.* l. 12, c. 19; *Gal. de Antidot. &c.*; *Actuar. de Meth. Med.* l. 5, c. 2.

CASSIA, a genus of plants, Class 10 *Decandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* pentaphyllous.—COR. *petals* five.—STAM. *filaments* ten; *anthers* sterile.—PIST. *germ* long; *style* very short; *stigma* obtuse; PER. *legume* oblong; *seeds* many.

Species. The species are annuals, shrubs, or perennials. Among the annuals are the following:—*Cassia diphylla*, Two-leaved Cassia, native of India.—*Cassia absus*, *Senna*, &c. seu *Loto*, Four-leaved Cassia, native of India.—*Cassia Tagera*, seu *Tagera*, native of India.—*Cassia obtusifolia*, seu *Gallinaria*, &c. Round-leaved Cassia, native of Cuba.—*Cassia sericea*, *sensitiva*, seu *Paiominoba*, native of Jamaica.—*Cassia calcata*, native of America.—*Cassia Senna*, the Egyptian Cassia or *Senna*, from which is produced the *Senna* used in medicine.—*Cassia procumbens*, seu *Chæmacrista*, native of the Indies.—*Cassia flexuosa*, native of Brazil.—*Cassia minima*, &c.; but the—*Cassia dimidiata*, Fine-leaved Cassia, is a biennial. Among the shrubs or perennials are the following:—*Cassia tora*, seu *Galega*, Oval-leaved Cassia, or Wild *Senna*.—*Cassia sennoides*, native of the East Indies.—*Cassia acuminata*, seu *Apoucouira*, &c. native of Guiana.—*Cassia corymbosa*, native of Bonaria.—*Cassia longisiliqua*, native of America.—*Cassia occidentalis*, seu *Senna*, &c. native of Jamaica.—*Cassia planisiliqua*, native of America.—*Cassia Fistula*, seu *Conna*, Alexandria purging Cassia, Cassia-Stick Tree, or Pudding Pipe Tree, native of India. [vide *Cassia*]—*Cassia patula*, native of the West Indies.—*Cassia lineata*,

a perennial, native of Jamaica.—*Cassia arborescens* seu *foliis*, &c. seu *Wellia Tagera*, a shrub, native of the East Indies.—*Cassia ruseifolia* seu *foliis*, &c. a shrub, native of Madcira.—*Cassia biflora*, &c. Two-flowered Cassia, a shrub, native of America.—*Cassia Chinensis*, a shrub, native of Pekin.—*Cassia multiglandulosa*, a shrub, native of Teneriffe.—*Cassia tomentosa*, native of America.—*Cassia liquestrina*, &c. seu *Vahamensis*, a shrub, native of Virginia.—*Cassia florida*, native of the East Indies.—*Cassia stipulacea*, seu *Pseudo Acacia*, &c. native of Chili.—*Cassia alata*, *Faba*, &c. seu *Hermetica*, &c. native of America.—*Cassia Marilandica*, seu *Narilandica*, &c. a perennial native of Virginia.—*Cassia fastigiata*, a shrub, native of the East Indies.—*Cassia frondosa*, a shrub, native of the West Indies.—*Cassia tenuissima*, seu *Senna*, a shrub, native of Havannah.—*Cassia virgata*, a shrub, native of Jamaica.—*Cassia sophora* seu *foliis*, &c. seu *Senna*, &c. seu *Galega*, &c. seu *Gallinaria*, &c. seu *Ponnam Tagera*, native of India.—*Cassia mollis*, seu *Fistula*, &c. a shrub, native of South America.—*Cassia javanica*, a shrub, native of the East Indies.—*Cassia grandis*, seu *Arbor*, &c. a shrub, native of Surinam.—*Cassia nigricans*, a shrub, native of Arabia Felix.—*Cassia polyphylla*, &c. a shrub, native of Porto Rico. *Dod. Pcmpt.*; *Bauh. Hist. Plant.*; *Prosp. Alpin. Egypt.*; *Rail Hist. Plant.*

CASSIA-FLOWERS (*Med.*) an officinal name for the flowers of the true cinnamon, the *Laurus cinnamon* of Linnæus. They are aromatic, astringent, and useful in decoctions.

CASSIANA (*Bot.*) the same as *Cassine*.

CASSI-A'SCHER (*Mil.*) the provost-marshal in a Turkish army.

CASSIBOR (*Bot.*) the same as *Coriandrum*.

CASSIDA (*Bot.*) the same as the *Scutellaria* of Linnæus.

CASSIDA (*Ent.*) a genus of animals, Class *Insecta*, Order *Coleoptera*.

Generic Character. *Antennæ* moniliform.—*Thorax* and *Shell* margined.—*Head* concealed under the shield.—*Body* above gibbous.

Species. The species are principally distinguished by their colour.

CASSIDILL (*Archæol.*) a little sack, purse, or pocket. *Mat. Westm.*

CASSIDONA (*Bot.*) or *Strickadore*, a plant called Castme-down, or Lavender.

CASSIDONY (*Min.*) a mineral, and precious stone, with veins of various colours, of which vases are made.

CASSINE (*Archæol.*) a farm house surrounded by a ditch, where a number of soldiers have posted themselves to make a stand against the approaches of an enemy.

CASSINE (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 3 *Trigynia*.

Generic Characters. *CAL. perianth* quinquepartite.—*COR.* quinquepartite; *divisions* subovate.—*STAM. filaments* five; *anthers* simple.—*PIST. germ* superior; *style* none; *stigmas* three.—*PER. berry* roundish; *seeds* solitary.

Species. The species are shrubs, as the—*Cassine capensis*, *Celastrus*, *Phillyrea*, seu *Frutex*, &c. Cape Cassine, or Phillyrea, native of the Cape of Good Hope.—*Cassine Colpoon*, seu *Evonymus*, &c. native of the Cape of Good Hope.—*Cassine barbara*, native of the Cape of Good Hope.—*Cassine Maurocenia*, &c. *Maurocenia*, &c. *Frangula*, &c. seu *Cerasus*, &c. native of Æthiopia.—*Cassine Peragua* seu *corymbosa*, &c.

CASSINE is also the *Ilex cassine* of Linnæus.

CASSIOBERRY-BUSH (*Bot.*) the *Viburnum cassionoides*.

CASSIOPEIA (*Astron.*) one of the forty-eight old constellations, near Cepheus, not far from the north pole. The number of stars in this constellation are, according to Ptolemy, thirteen; to Hevelius, thirty-seven; to Tycho,

forty-six; and to Flamstead, fifty-five. According to the fables of the Greeks, Cassiopeia, with her husband Cepheus, was placed among the constellations to witness the punishment inflicted on their daughter Andromeda. *Arat. de Apparent.* v. 653.

Ἡ δὲ καὶ αὐτὴ παῖδος ἐπέγεται εἰδάλαιο
Διὰ Κασσιόπειαν.

Manil. Astron. Poet. l. 1, v. 353.

Cepheusque Cassiopeia

In pennis signata suas.

Cassiopeia was also called, among the Greeks, *καθίδρα* or *θρόνος*, a throne, because she is represented as sitting in a chair. *Hipparch. ad Arat.*; *Eratosth. Character.*; *Hygin. Astron. Poet.*; *Ptol. Almag.* l. 7, c. 5; *Bayer. Uranomet.*; *Ricciol. Almagest. nov. &c.* Cassiopeia was distinguished in the year 1572, by the appearance of a new star, which exceeded Jupiter in magnitude, and excited very great attention among astronomers; but it diminished by degrees, and, after the lapse of eighteen months, entirely disappeared.

CASSIQUE (*Polit.*) or *Cacique*, a chief governor, or sovereign lord of a particular district or country in some parts of America.

CASSIS (*Mil.*) a casque or helmet.

CASSITERIA (*Min.*) a sort of crystal having an admixture of tin.

CASSITERON (*Min.*) tin, or white-lead. *Plin.* l. 34, c. 16.

CASSITHA (*Bot.*) the *Cuscuta Europæa* of Linnæus.

CASSIUS, *Powder of* (*Chem.*) a beautiful precipitate formed by immersing tin in a solution of gold, or by mixing the nitro-muriates of each metal. It gives the finest ruby colour to gold.

CASSOB (*Chem.*) the same as *Alcali*.

CASSOCK (*Ecc.*) in French *casaque*, in Latin *casula*, a diminutive of *casa*, a covering of any kind; signified originally a cloak, but is now applied to the vestment worn by clergymen under their gowns.

CASSOLETA (*Med.*) a kind of humid suffumigation described by *Marccllus de Præc. Remed. Form.*

CASSONADE (*Com.*) *Cassonada*, or *Castonade*, cask sugar, or sugar put into casks or chests after the first purification, but which has not been refined.

CASSOURARIUS (*Orn.*) or Cossoway, the *Struthio Cassuaris* of Linnæus; an exotic bird of the stork kind, which Dr. Grew, in his Comparative Anatomy, affirms to be without a craw. Like the stork it cannot fly far, but it can run with great swiftness.

CASSOWARY (*Orn.*) vide *Cassouarius*.

CASSU (*Bot.*) the same as *Acajaiba*.

CASSULA (*Ecc.*) the cassock.

CASSUMUNIAR (*Bot.*) a root which comes from the East Indies. It is moderately heating and astringent, and is recommended as an excellent medicine in nervous and other disorders.

CASSUTHA (*Bot.*) or Cassuta, the *Cuscuta Europæa* of Linnæus.

CASSUVIUM (*Bot.*) the *Anacardium occidentale*.

CASSYTA (*Bot.*) a genus of plants, Class 9 *Emneandria*, Order 1 *Monogynia*.

Generic Characters. *CAL. perianth* triphyllous; *leaflets* semiovate.—*COR. petals* three; *nectary* oblong.—*STAM. filaments* nine; *anthers* adjoined to the filaments below the lip.—*PIST. germ* ovate; *style* thickish; *stigma* obtuse.—*PER. receptacle* growing out into a depressed globular drupe; *seed* nut globular.

Species. The species are shrubs, as the—*Cassyta filiformis*, *Volutella*, *Cuscuta*, &c. seu *Acatsia-Valli*, native of India.—*Cassyta corniculata*, seu *Cassutha*, &c. native of the island of Celebes.

CAST (*Mech.*) a term particularly applied to figures, or small statues of bronze.—*Cast*, among founders, is applied to tubes of wax fitted in different parts of a mould of the same matter, which when removed leave room for the admission of the melted metal.—*Cast* also signifies a cylindrical piece of brass used by founders in sand to form a canal, or conduit in their moulds.—*Cast*, among plumbers, is a little brazen funnel at the end of a mould for casting pipes without soldering.

CAST (*Polit.*) or *caste*, a tribe or number of families in India, which are of the same rank or profession; the principal of which are the *Bramins*, the first and most noble; the *Cagas*, or princes, who derive their origin from divers royal families; the *Choutres*, who comprehend all artificers; and the *Paria*, who are the lowest and most contemptible of all, with whom it is disgraceful to have any dealings.

CAST (*Falcon.*) a flight, couple, or set of hawks dismissed from the fist.

TO CAST (*Mar.*) a term used in several sea phrases, as “*Cast off the lead*,” the act of once heaving the lead into the sea to ascertain what depth of water there is. “*To cast a point in traverse*,” to prick down on a chart the point of the compass that any land bears from you. “*To be cast away*,” in French *faire naufrage*, the state of a ship which is lost or wrecked on a lee-shore, bank, rock, &c. “*To cast off*, or *to cast loose the guns*,” in French *demarrer les canons*, to untie them.

TO CAST OFF (*Sport.*) *Let go* or *set loose*, as “*to cast off the dogs in a chase*.”

TO CAST a hawk to the perch (*Falcon.*) to put her upon it.

CAST IRON (*Chem.*) or *Pig-iron*, Iron when first extracted from its ores.—*White Cast Iron* is extremely hard and brittle, as if composed of a congeries of small crystals.—*Grey* or *Mottled Cast Iron* is softer and less brittle than the last.—*Black Cast Iron*, the most fusible and least cohesive of the three.

CASTA'NEA (*Bot.*) κάστανια, κάστανια, κάστανια; in the singular κάστανον; the chesnut, or the fruit of the Chesnut-tree, called by Theophrastus διος βάλανος, and by others κάστανια ευβοικία, σιωπικία, and ζιμωπα, from Castanea, a town of Thesaly. *Theophrast. Hist. Plant.* l. 2, c. 18; *Nicand. in Alex.*; *Dioscor.* l. 1, c. 145; *Plin.* l. 15, c. 23; *Gal. de Alim. Fac.* l. 2, c. 38; *Athen.* l. 2; *Orib. Eupor.* l. 1, c. 19; *Act. Tetrab.* l. 1, serm. 1; *Egin.* l. 1, c. 83.

CASTANEA is the *Fagus castanea* and the *Æsculus hippocastanum* of Linnæus.

CASTANE'TS (*Mus.*) in French *castagnettes*, a sort of snappers which dancers of sarabands tie about their fingers to keep time with when they dance.

CASTELLA (*Ant.*) water-houses in the fields built over conduit heads. *Vitruv.* l. 8, c. 7; *Frontin. de Aqueduct.* c. 2.

CASTELLA'IN (*Law*) *castellanus*; the lord, owner, or captain of a castle, and sometimes the constable of a fortified house. *Bract.* l. 5. tract. 2, c. 16; 3 *Ed.* l. 1, c. 7.

CASTELLAMENT (*Cook.*) a march-pane castle, or the imitation of a castle in confectionery.

CASTELLA'NO (*Com.*) a piece of money in the West Indies, in value something more than a ducat.

CASTELLA'NY (*Archæol.*) in French *chatellenie*, the manor appertaining to a castle; the extent of its land and jurisdiction.

CASTELLA'RIMUM (*Law*) or *Castellarii*, the precinct or jurisdiction of a castle. *Mon. Angl.* tom. 2, p. 402.

CASTELLA'RIVS (*Ant.*) one who had charge of the conduits or water-works, of which mention is made in an epitaph: D. M. CLEMENTI CÆSARUM N. SERV. V. CASTELLARIO AQUÆ CLAUDIÆ FECIT CLAUDIA SABBATHIS ET SIBI SUI. *Reines. Inscript.* class 9; *Spon. Miscel. Erud. Antiq.* sect. 6, p. 233, &c.

CASTELLA'TED (*Mil.*) in French *entouré*; enclosed within a building of stone, &c.

CASTELLA'TIO (*Archæol.*) the building a castle.

CASTELLO'RUM OPERATIO (*Law*) castle-work; or service and labour done by inferior tenants for the building and upholding castles of defence.

CASTE'RIA (*Ant.*) a house wherein oars and other tackling of ships are laid up.

Plaut. Asin. act. 3, scen. 1, v. 16.

*Quin Pol si reposivi remum, sola ego in casteria
Ubi quiesco, omnis familia causa consistit tibi.*

Non. l. 2, c. 128.

CA'STIGATORY (*Law*) an engine of correction, on which a woman, who is indicted for being a common scold, shall be sentenced to be placed. 3 *Inst.* 219.

CASTILLA'NE (*Com.*) or *Castellan.* 1. A gold coin, current in Spain, worth fourteen rials and sixteen deniers, or three livres and ten sols French money. 2. A weight used in Spain for weighing gold; the hundredth part of a pound Spanish weight.

CASTILLEIA (*Bot.*) a genus of plants, Class 14 *Didynamia*, Order 2 *Angiospermia*.

Generic Characters. CAL. one-leaved; upper lip bifid; lower none.—COR. monopetalous; upper lip very long; lower very short.—STAM. filaments four; anthers twin.—PIST. germ superior; style filiform; stigma simple.—PER. capsule ovate; seeds numerous, small.

Species. The two species are perennials, as—*Castilleia integrifolia*, native of New Granada.—*Castilleia fissifolia*, native of New Granada.

CASTILLE (*Mil.*) formerly the attack of a tower or castle; also a species of military amusement, in which the combatants threw snow-balls at one another.

CA'STING (*Mar.*) in French *abatre*, the motion of falling off, so as to bring the direction of the wind on one side of the ship, which before was right a head.

CASTING (*Metall.*) the operation of running any sort of metal into a mould prepared for that purpose, as the casting of letters, bells, &c.

CASTING is also, among sculptors, the taking of casts or impressions of figures in wax, metal, plaster, and the like.

CASTING of drapery (*Paint.*) a free, easy, negligent way of clothing any figures.

CASTING of timber-work (*Carpent.*) the same as casing of timber.—*Casting of wood*, the same as warping, when the wood shrinks by reason of moisture, air, drought, &c.

CASTING (*Falcon.*) any thing given to a hawk to purge and cleanse his gorge.

CASTING (*Nat.*) a name for that process in nature by which some animals throw off their skins, horns, or other parts of their body which serve either for ornament or use: thus snakes are said to cast their skins, and deer their horns, when the old fall off to make room for the new.

CA'STLE (*Law*) or *Castel*, *Castellum*, a fortress in a town; a principal mansion of a nobleman.—*Castle-ward*, *castle-wardum vel wardum castri*: an imposition laid upon such persons as dwell within a certain compass of any castle, towards the maintenance of such as watch and ward the castle. *Magna Charta*, c. 15. 20; 32 *Hen.* 8, c. 48.—*Castle guard rents* were paid by persons dwelling within the liberty of any castle, for the maintaining of watch and ward within the same. *Stat.* 22 and 23 *Car.* 2, c. 24.

CASTLE (*Mil.*) a close head-piece, so called from its protecting the head as a castle does a town.

CASTLE, fore (*Mar.*) in French *gaillard d'avant*, a short deck placed in the fore part of the ship, above the upper deck. It is usually terminated, both before and behind, by a breastwork in vessels of war, the foremost part forming the top of the *beak head*, and the hinder part reaching

to the after part of the fore chains.—*Prow-castle*, the rise or elevation of the prow over the uppermost deck towards the mizen.—*Stern-castle*, the whole elevation that ranges on the stern over the last deck, where the officers have their cabins and places of assembly.

CASTLE-LEOD WATERS (*Chem.*) a mineral water found at Castle-Leod in Ross-shire.

CASTLES (*Her.*) emblems of grandeur and magnificence, denoting likewise a sanctuary and safety. Castles are commonly represented as treble towered, as "The field is *gules*, three castles triple towered within a double tressure, counterflowry *argent*."

CASTLING (*Nat.*) the young of any animal brought forth or cast before its time.

CASTOR (*Zool.*) Beaver, a genus of animals, Class *Mammalia*, Order *Glires*.

Generic Character. *Fore-teeth* upper truncate.—*Grinders* four each jaw.—*Tail* long, depressed.—*Clavicles* perfect.

Species. The two species of the *Castor*, or Beaver, are the *Castor Fiber*, or Common Beaver, and the *Castor hudsonius*, or the Chilese Beaver.

CASTOR (*Astron.*) 1. One of the twins in the constellation better known by the name of Gemini. [vide *Gemini*] 2. A bright star in this constellation, of the first magnitude, whose latitude for the year 1700 was, according to Hevelius, 10° 4' 20" N. and its longitude \ominus 16° 4' 14". Its right ascension for 1812 was 110° 38' 45"; declination 32° 17' 22" N. Annual variation in right ascension 57".83; in declination 7".1.

CASTOR AND POLLUX (*Met.*) a fiery meteor, which at sea appears sometimes adhering to a part of a ship, in the form of a ball, or even several balls. When one is seen alone it is properly called Helena; but two are called Castor and Pollux, and sometimes Tyndaridæ.

CASTOR (*Med.*) vide *Castoreum*.

CASTOR-OIL (*Chem.*) the oil extracted from the seed of the *Ricinus communis* of Linnæus.

CASTOREA (*Nat.*) the Beaver's testicles, from which castor is procured. *Plin.* l. 32, c. 3.

CASTOREUM (*Med.*) *καστορέιον*, or Castor, a medicine made of the liquor contained in little bags near the beaver's groin, good for convulsions; and used to fortify the head and nervous parts. *Aret. de Curat. acut. Morb.* l. 1, c. 6; *Oribas. Med. Collect.* l. 15; *Aet. Tetrab.* 1, serm. 1; *Trall.* l. 1, c. 13.

CASTOREUM (*Zool.*) a Castor.

CA'STRA (*Ant.*) besides the common signification of camp, also signifies quarters, as *castra hyberna*, winter quarters.

CASTRAMETA'TION (*Mil.*) the art of measuring or tracing out the form of a camp on the ground. [vide *Militia*]

CASTRANGULA (*Bot.*) the herb Brown-Wort or Water-Betony.

CASTRATION (*Surg.*) the cutting or removing away the testes of any animal.

CASTRATION of a book (*Lit.*) the cutting out a leaf or sheet of a book, so as to render it imperfect.

CASTRATUS (*Bot.*) from *castrò*, to castrate; an epithet signifying the filament without the anther.

CA'STREL (*Falcon.*) or *Kastrel*, in French *Cesterelle*, a kind of hawk, in shape resembling the Lanner, but in size the Hobby.

CASTRE'NSIS (*Ant.*) an epithet for several things belonging to military service, as—*Castrensis corona*, a garland given to him who first enters the enemy's camp.—*Peculium castrense*, goods in war.—*Comes castrensis*, an officer in the emperor's train during war. *Fest. de Reb. Signif.*; *Tertull. de Coron. Mil.* c. 12; *Anmian.* l. 21, c. 9.

CASTRENSIS (*Med.*) an epithet for some contagious epidemic diseases, especially fevers.

CASTRIA'NI (*Ant.*) soldiers that kept the forts on the Roman frontiers.

CASUAL EJECTOR (*Law*) a nominal defendant in cases of ejection, who continues such until appearance by or for the tenant in possession.

CASUALS (*Mil.*) or *Casualties*, a term applied to men that are either dead since they were enlisted, have been discharged, or have deserted.

CASUALTY of wards (*Law*) the mails and duties due to the superiors in ward-holdings.

CASUALTY (*Min.*) a term among tanners for a strong matter separated from the ore by washing.

CASUARI'NA (*Bot.*) a genus of plants, Class 21 *Monoecia*, Order 1 *Monandria*.

Generic Characters. **CAL.** common; *ament* loosely imbricate.—**COR.** *scales* two-parted.—**STAM.** *filament* capillary; *anthers* twin.—**PIST.** *germ* minute; *style* filiform; *stigmas* two.—**PER.** *strobile* of bivalve scales gaping perpendicularly.

Species. The species are shrubs, as the—*Casuarina equisetifolia*, Horsetail Casuarina, native of India.—*Casuarina nodiflora*, native of New Caledonia.—*Casuarina stricta*, Upright Casuarina, native of New Holland.—*Casuarina distyla*, seu *dioica*, &c. native of New Holland.—*Casuarina torulosa*, seu *dioica*, Cork-barked Casuarina, native of New Holland.—*Casuarina Africana*, native of Africa.

CASU CONSIMILI (*Law*) a writ of entry granted where a tenant in courtesy, or a tenant for life, or for the life of another, makes over land in fee or in tail, or for the term of another's life. *F. N. B.* 206.—*Casu matrimonii prolocuti*, a writ which lies against a man who within a reasonable time refuses to marry a woman.—*Casu proviso*, a writ of entry given by the statute of Gloucester, where a tenant in dower aliens in fee or for life, and it lies for him in reversion against the alienee. *Stat. Gloucest.* c. 7; *F. N. B.* 205.

CASULE (*Ecc.*) vide *Cassock*.

CASUS (*Med.*) from *cado*, to fall or happen. 1. The same as *Symptoma*. 2. Any thing fortuitous or spontaneous. 3. A fall from an eminence. 4. According to Paracelsus, a present distemper, as also an entire history of a disease.

CASUS OMISSUS (*Law*) where any particular thing is omitted, and not provided for by the statute.

CAT (*Mar.*) in French *chat*. 1. A ship usually employed in the coal trade, formed after the Norwegian model. 2. *Cat*, in French *capon*, a sort of strong tackle, used to draw the anchor perpendicularly up to the cat head.—*Cat-block*, in French *poulie de capon*, a block with an iron strap and large hook to it, which serves to draw the anchor up to the cat head.—*Cat-fall*, in French *garant de capon*, the rope that forms the tackle for heaving up the anchor from the water's edge to the bow.—*Cat-harpings*, in French *trélingage des haubans sous la hune*, small ropes serving to brace in the shrouds of the lower masts behind their respective yards.—*Cat-heads*, in French *bossoirs*, two strong beams of timber projecting almost horizontally over the ship's bows on each side the bowsprit.—*Cat-holes*, the holes that are directly over the capstan, which are employed in heaving the ship astern by a cable, or a hawse, called sternfast.—*Cat-hook*, the strong hook fitted to the cat-block.—*Cat-o'-nine-tails*, an instrument of punishment used both in the army and navy, so called because it consists of nine cords knotted at intervals, whence the expression "To comb the cat," to arrange the cords so that they should lie uniform.—*Thieves' cat-o'-nine-tails*, knotted harder than the rest, used only in cases of flagrant offence.

CAT (*Mil.*) *cattus*, *gattus*, or *cat-house*, a shed used for covering soldiers employed in filling up the ditch, mining the walls, &c. : so called because soldiers lay in wait under it as a cat for its prey.—*Castellated cat*, a cat with crenelles or loop-holes whence the archers could discharge their arrows.

CAT (*Her.*) this animal is borne in coat armour as a symbol of liberty, vigilance, forecast, and courage. The Mountain or Wild Cat is always borne gardant; but the Common Cat is always borne passant, as in the annexed example. "He beareth *argent* three cats passant gardant in pale bar-ways."

CAT-GUT (*Mech.*) vide *Catgut*.

CAT-MINT (*Bot.*) a plant so called because cats like to eat it. It is the *Nepeta* of Linnæus.—*Cat-Pear*, a pear in shape like a hen's egg.—*Cat-Thyme*, a shrub, the stalks of which have a grateful but very powerful scent. It is the *Teucrium marum*.

CAT-SALT (*Min.*) a beautiful granulated kind of common salt, formed out of bittern or leach brine.—*Cat-Salve*, vide *Mica*.—*Cat's-Eye*, a sort of gem found in Siberia, having rings like the onyx, and variable colours like the opal.

CATABALAM (*Bot.*) the same as *Ambalam*.

CATABAPTIST (*Ecc.*) one against, or averse to, baptism.

CATABIBASIS (*Med.*) from *καταβίβαζω*, to cause to descend; an exclusion or expulsion of the humours downwards.

CATABIBAZON (*Astron.*) *καταβίβαζον*, i. e. descending; the south node, or dragon's tail; so called because it goes down exactly against the dragon's tail.

CATABLEMA (*Med.*) *κατάβλημα* from *καταβάλλω*, to place around; the outermost fillet which secures the rest of the bandage. *Hipp. Lib. de Artic. & Gal. Com.*

CATABOLENSES (*Ant.*) or *Catabulenses*, a sort of postillions in the time of the Roman and Greek emperors, who acted also as public carriers, and sometimes as sutlers to the army. *Cassiod. Var. l. 3, ep. 10.*

CATABOLICI SPIRITUS (*Theol.*) *καταβολικοί*, evil spirits which throw down the persons they possess, or that come at certain times upon appointment and bargain. *Tertull. de Anim. c. 28.*

CATABULENSES (*Ant.*) vide *Catabolenses*.

CATACATHARTICS (*Med.*) from *κατα* and *καθαρτικά*, medicines which purge downwards.

CATACAUSTIC CURVE (*Catop.*) a curve or crooked line found by joining the points of concurrence of several reflected rays: suppose an infinite number of rays *AB*, *AC*, *AD*, &c. proceeding from the radiating point *A*, and reflected at any given curve *BDH*, so that the angles of incidence should be equal to those of reflection, then the curve *BEG*, to which the reflected rays *BI*, *CE*, *DF*, &c. are tangents continually, as in the points *I*, *E*, *F*, &c. is called the *catcaustic*, or *caustic by reflection*; and if the reflected ray *IB* be produced to *K*, so that *AB = BK*, and the curve *KL* be the evolute of the caustic *BEG*, beginning at the point *K*, then the portion of the caustic *BE = AC - AB + CE - BI* continually.

CATACERAMENUS (*Surg.*) from *κατακεράννυμι*, splintered or broken into fragments; an epithet for a fracture.

CATACERASTICOS (*Med.*) *κατακεραστικός*, the same as *Epicerasticos*.

CATACHLO'OS (*Med.*) *κατάχλωος*, from *κατά* and *χλωα*, to make green, a very green colour; an epithet applied to stools, with which *catachola*, very bilious, is synonymous. *Gal. Exeg.*

CATACHRESIS (*Rhet.*) *καταχρησις*, abuse; the same as *Abusio*.

CATACHRESTICAL (*Rhet.*) *καταχρηστικός*, abusive; contrary to proper use; far fetched; strained.

CATACHRISTON (*Med.*) from *καταχρίω*, to anoint; any medicine applied by way of unction.

CATACHYSIS (*Med.*) *κατάχυσις*, from *καταχύω*, to pour upon; an affusion.

CATACLASIS (*Med.*) *κατάκλασις*, from *κατακλάω*, to break or distort; breaking, or distortion in general; but particularly that of the eye. *Gal. Exeg. Vocat. Hippoc.*

CATACLEIS (*Med.*) *κατακλεις*, from *κατά*, below, and *κλεις*, the clavicle, *subclavicle*; the first small rib of the thorax. *Gal. de Ossib. c. 14.*

CATACLIDA (*Anat.*) another name for the rib called *subclavian*.

CATACLINES (*Med.*) the same as *Clinicus*.

CATACLYSMA (*Med.*) *κατάκλυσμα*, from *κατακλύω*, to wash; the same as *Clyster*.

CATACLYSMI (*Med.*) *κατακλυσμοί*, Embrocations.

CATACOMBS (*Ant.*) 1. Grottoes, or subterraneous places for the burial of the dead. 2. Divisions in a cellar to stow wine, &c. in

CATACONENSIS (*Med.*) from *κατακονάω*, to irrigate; irrigation by a plentiful affusion of liquor on some part of the body.

CATACORES (*Med.*) *κατακόρης*, from *κατακεράννυμι*, to supersaturate, i. e. full or abundant; an epithet signifying purely or intensely bilious, when applied to stools. *Gal. in Hippocrat. de Rat. Vict. in Morb. Acut.*

CATACOUSTICS (*Mat.*) or *Cataphonics*, the science of reflected sounds; or that part of acoustics which treats of the properties of echoes.

CATACOUSTICS (*Mil.*) are *écoutes*, or small galleries, which communicate with a gallery parallel to the covert way.

CATADIOPTRICAL Telescope (*Opt.*) the same as *Reflecting Telescope*.

CATADROMUS (*Ant.*) *κατάδρομος*. 1. The stadium or place where races were run. *Suet. in Ner. c. 11.* 2. A sort of tight rope on which dancers used to perform their feats. *Suet. in Galba. c. 6; Dio. l. 61; Bud. in Pandect. p. 165.* 3. An engine like a crane, used by builders in lifting up and letting down any great weights.

CATADUPA (*Nat.*) a sort of cataract in the Nile. *Cic. Som. Scip. c. 5.*

CATÆGIZASIS (*Med.*) from *καταίγιζω*, to repel; a revulsion or rushing back of humours or wind in the intestines.

CATÆONENSIS (*Med.*) the same as *Cataconensis*.

CATAFALCO (*Archit.*) a decoration on a scaffold of timber for supporting the coffin of a deceased hero, during the funeral solemnity.

CATAGE'MU (*Bot.*) another name for *Gambogia*.

CATAGLYPHE (*Mech.*) *καταγλυφή*, from *γλύφω*, to cut in wood or metal; an excavation, hole, or pit. *Hipp. de Art. et Morb.*

CATAGMA (*Med.*) *κάταγμα*, from *κατά*, and *αγω*, to break, a fracture; the breaking of the bones, or a separation of the continuity of the flesh. *Hippoc. de Art.; Gal. Com.*

CATAGMATICA (*Med.*) *καταγματικά*, from *καταγμα*, a fracture; remedies for the cure of fractures.

CATAGO'GE (*Med.*) *καταγωγή*, from *κατάγω*, to bring down; the seat or region of any disease, and the circumjacent part. *Hipp. de Epid. l. 7.*

CATAGRAPH (*Paint.*) *καταγραφή*, the first draught of a picture. *Plin. l. 35, c. 8.*

CATALECTIC verse (*Rhet.*) from *καταλέγω*, to stop or

cease; an epithet for a Greek or Latin verse wanting one syllable.

CATALENTIA (*Med.*) a kind of Epilepsy, according to Paracelsus. *Paracel. de Morb. Caduc.* l. 1, c. 1, par. 1.

CATALEPSIS (*Med.*) κατάληψις, from καταλαμβάνω, to seize or interrupt; Catalepsy, a species of apoplexy; called by Hippocrates *aphonia*, by Antigenes *anandia*, by Cælius Aurelianus *oppressio* and *apprehensio*. *Hippocrat.* l. 2, aphor. 3; *Gal. de Caus. Puls.* l. 4, c. 16; *Cæl. Aurelianus de Acut. Morb.* l. 2, c. 9; *Act. Tetrab.* 2, serm. 2, c. 4; *Gorr. Def. Med.*; *Foes. Econom. Hippocrat.*; *Castel. Lex. Med.*

CATALLA (*Law*) vide *Catala*.

CATALIS *captis nomine distractionis* (*Law*) anciently a writ that lay where a house was within a borough, for rent going out of the same; and which warranted the taking of doors, windows, &c. by way of distress of rent. *Vet. Nat. Brev.* 66.—*Catallis reddendis*, an ancient writ which lay where goods, being delivered to any man to keep till a certain day, are not, upon demand, delivered at the day. *Reg. Orig.* 139, et *Vet. Nat. Brev.* 63.

CATALOGUE raisonné (*Lit.*) a catalogue or list of works, arranged according to the order of the sciences, in distinction from the common or booksellers' catalogue, which is formed according to the alphabetical arrangement of the authors.

CATALOGUE of the stars (*Astron.*) a list of the fixed stars, disposed according to some order, in their several constellations; with the longitudes, latitudes, and right ascensions, &c. of each.

CATALONGAY (*Bot.*) the plant which bears the *Faba Sancti Ignatii*.

CATALOPTICA (*Med.*) the same as *Cicatrizantia*.

CATALPA (*Bot.*) the *Bignonia catalpa* of Linnæus.

CATALS (*Law*) *Catala*; Goods and Chattels.

CATALYSIS (*Med.*) κατάλυσις, from καταλύω, to dissolve or destroy; a paralysis, or such resolution as happens before the death of a patient; also that dissolution which constitutes death.

CATAMARAN (*Mar.*) in French *radeau servant de bac*, a sort of floating raft, originally used in China, and among the Portuguese, as a fishing boat; small pieces of wood lashed together, one of which serves as a keel, the other two as sides. It is now used at Coromandel, particularly at Madras.

CATAMENIA (*Med.*) the same as *Menses*.

CATAMITE (*Ant.*) *catamitus*, from κατά, for, and μιθεῖν, hire, a boy kept for unnatural practices.

CATANANCE (*Bot.*) Candy-lion's-foot.

CATANANCHE (*Bot.*) κατανάχη, a plant, mentioned by Dioscorides, which was said to be of an inflammatory nature, and to be used by the Thessalian women in incantations. *Dioscor.* l. 4, c. 133.

CATANANCHE, in the *Linnæan system*, a genus of plants, Class 19 *Syngenesia*, Order 1 *Polygamia Æqualis*.
Generic Characters. CAL. common imbricate; leaflets very many; squamule concave.—COR. compound generally imbricate; corollets very many; proper monopetalous.—STAM. filaments five; anthers tubular.—PIST. germ oblong; style filiform; stigma bifid.—PER. none; calyx unchanged; seeds solitary; receptacle chaffy.
Species. The species are perennials, as—*Catananche cærulea*, seu *squamis*, &c. seu *Chondrilla*, &c. native of Barbary.—*Catananche exposita*, a perennial, native of Atlas. But the—*Catananche lutea*, seu *Chondrilla*, &c. seu *Stoebe*, &c. is an annual, native of Crete. *C. Bauh. Pin.*; *Raii Hist. Plant.*; *Tournef. Instit.*

CATANIA (*Med.*) κατανία, the declivity of the members, as of the arms and legs. *Foes. Econom. Hippocrat.*

CATANTLEMA (*Med.*) καταντλήμα, from καταντλάω, to draw or pour water upon; a kind of lotion by infusion of water.

CATANTLE/SIS (*Med.*) κατάντλησις, from καταντλάω, a lotion with hot water expressed out of sponges, for hot running ulcers of the head. *Marc. Empir.* c. 1.

CATAPASMA (*Med.*) or *Catapastum*, from καταπάσσω, to sprinkle upon; a term applied to any dry medicine, reduced to powder, which was fit for inspersions on the human body. *Paul. Æginet.* l. 7, c. 13.

CATAPASMUS (*Med.*) καταπασμός, a rubbing of the posterior part of the shoulders and neck downwards, according to Cælius Aurelianus.

CATAPELTES (*Med.*) from κατά, against, and πέλτη, a shield; signifies literally a grenado or battery; and is applied to medicines which heal the wounds and bruises made by means of the grenado.

CATAPHISMA (*Med.*) a thick poultice of meal and herbs.

CATAPHONICS (*Math.*) vide *Catacoustics*.

CATAPHORA (*Med.*) the same as *Coma*.

CATAPHRACT (*Archæol.*) a horseman in complete armour.

CATAPHRACTA (*Ant.*) a piece of heavy defensive armour with which sometimes only the breast, sometimes the whole body, and the horse also, were covered. *Tacit. Hist.* l. 1, c. 59; *Tertull. de Pall.* c. 4; *Julian. orat.* 1; *Veget.* l. 1, c. 20.

CATAPHRACTA (*Med.*) καταφράκτα, the same as *Quadriga*.

CATAPHRACTÆ (*Ant.*) covered ships. [vide *Catastroma*]

CATAPHRACTA'RII (*Ant.*) horsemen in the Roman army armed with the *cataphractæ*. [vide *Cataphracta*] *Lamprid. in Sever.*; *Vopisc. in Aurelianus*, &c.

CATAPHRACTI (*Ant.*) καταφρακτοι, an epithet for men armed at all points from top to toe. *Liv.* l. 35, c. 48; *Serv. in Virg. Æn.* l. 11, v. 771; *Propert.* l. 3, eleg. 10; *Lamprid. Alex. Sev.* c. 56; *Amm.* l. 16, c. 10.

CATAPHRACTICS (*Med.*) Breast Swaddle; a bandage or ligature for the breast.

CATAPHRAGMENA (*Ant.*) vide *Catastroma*.

CATAPHRYGIANS (*Ecc.*) heretics of the second century, and followers of Montanus; so called from their leader who came from Phrygia. *Euseb. Hist. Eccles.* l. 4, c. 27; *Eriphan. Hær.* 47.

CATAPLASMA (*Med.*) κατάπλασμα, from καταπλάσσω, to spread like a plaster; a cataplasm or poultice; a soft kind of medicine of which there are different sorts. *Gal. ad Glaucon.* l. 2; *Gorr. Def. Med.*

CATAPLEXIS (*Med.*) κατάπληξις, from καταπλήσσω, to strike; any sudden stupefaction or deprivation in any of the members or organs. *Hippoc. de Epid.* l. 5, 7, &c.; *Gal. Exeg. Vocab. Hipp.*; *Gorr. Def. Med.*; *Foes. Econom. Hippocrat.*

CATAPPOSIS (*Med.*) κατάποσις, from καταπίνω, to swallow down; deglutition. Hence also

CATAPOTIUM (*Med.*) a pill. *Hipp. de Epid.* l. 5, &c.

CATAPPA (*Bot.*) the *Terminalia catappa* of Linnæus.

CATAPSYXIS (*Med.*) κατάψυξις, from καταψύχω, to refrigerate; a coldness without shivering.

CATAPTO/SIS (*Med.*) κατάπτωσις, from καταπίπτω, to fall down. 1. A falling down, the symptom of apoplexy and epilepsy. 2. The spontaneous falling down of a paralytic limb. *Gal. de tol. Morb. Tempor.* c. 4; *Gorr. Def. Med.*

CATAPULTA (*Ant.*) ἀπὸ τῆς πέλτης, i. e. from the pelta, Catapult; a military engine much used by the ancients for throwing huge stones at the enemy. [vide *Militia*] *Plaut. Curc. act.* 5, scen. 3, v. 12,
Te nervo torquedo, itidem ut catapultæ solent.
Diodor. l. 14; *Vitruv.* l. 10, c. 15; *Plin.* l. 7, c. 56; *Ælian. Var. Hist.* l. 6, v. 12; *Plut. Apoth.*; *Lyps. Poliorcet.* l. 3, c. 2.

CATAPULTIA (*Bot.*) the *Ricinus communis* of Linnæus.

CATARACT (*Geog.*) the fall of water down a rocky precipice in the bed of a river, from *καταράσσω*, to throw down.

CATARACT (*Med.*) from *καταράσσω*, to mingle together or put out of order; a disease in the eye; so called because the sense of vision is confounded if not destroyed. It was called by the Greeks *ὑπόχυμα* and *ὑπόχυσις*, *γλαυκώμα* and *γλαυκώσις*; and was defined a flux of humour about the pupil, which concretes and either wholly intercepts the sight, or renders it dim and obscure; or the concretion of an aqueous humour, which is more or less an impediment to the sight. *Hippocrat.* l. 13, aph. 31; *Gal. Def. Med.*; *Cel.* l. 6, c. 6; *Paul. Aeginet.* l. 6, c. 21.

Cataract is now defined to be an affection of the crystalline humour, or its capsule, which becomes so opaque, as to prevent the rays of light from passing to the optic nerve. When the opaque lens is much indurated it is termed a *hard cataract*; when the substance of the lens seems to be converted into a whitish, or other kind of fluid, lodged in the capsule, it is denominated a *milky* or *fluid cataract*; when the substance is of a mean consistence neither hard nor soft, but approaching to the consistence of curds, it is named a *soft* or *caseous cataract*. The cataract is moreover divided into incipient and confirmed.—*Incipient cataract* is only suffusion of sight when little clouds, like motes or flies, seem to hover before the eyes.—*Confirmed cataract*, is when the apple of the eye is either wholly, or in part covered, and overspread with a skin, so that the rays of light cannot have admittance to the *retina*.

CATARACT (*Falcon.*) the name of a disease in the eyes of hawks similar to that which affects the human eye.

CATARIA (*Bot.*) Cat-mint; the *Hysopus lophanthus* of Linnæus.

CATA'RRH (*Med.*) vide *Catarrhus*.

CATARRHALIS febris amphemerina (*Med.*) from *catarrhus*, an epithet for a fever which is accompanied with, or proceeds from, a catarrh.

CATARRHE'CTICUS (*Med.*) *καταρρηκτικός*, from *ρηγνύμι*, to break; an epithet applied by Hippocrates to substances of a penetrating and dissolving nature, as wine, oxymel, &c. *Hipp. de Rat. Vict. in Acut. Morb.*

CATARRHE'UMA (*Med.*) the same as *Catarrhus*.

CATARRHE'XIS (*Med.*) *κατάρρηξις*, from *ρηγνύμι*, to break; a violent and copious eruption and effusion. *Hipp. de Epid.* l. 4, &c. *Catarrhexis*, in Vogel's Nosology, is defined a discharge of pure blood from the intestines, such as takes place in a dysentery.

CATARRHŒ'CUS (*Med.*) *καταρρῳικός*, from *ῥέω*, to flow; a word applied to diseases proceeding from distillation of an acrid fluid. *Hippoc.* l. 5, aphor. 24.

CATARRHO'PIA (*Med.*) *καταρροπία*, from *ρῶπι*, an inclination; a propensity or inclination downwards, in distinction from *anarrhopia*, or a tendency upwards. *Hippoc. de Humor.*—*Catarrhopia Phymata*, tubercles tending downwards, or, according to Galen, those that have their apex on a depending part. *Gal. Comm. in Hippocrat. de Epid.* l. 6, sect. 1, aph. 12.

CATARRHO'POS splen (*Med.*) the spleen verging downwards. *Gal. in Hippocrat. Epid.* l. 6.

CATA'RRHUS (*Med.*) from *κάτω* and *ῥέω*, to flow down; signifies, according to Hippocrates and Galen, a distillation or defluxion from the head upon the mouth and *Aspera Arteria*, and through them upon the lungs. *Hippocrat.* l. 7, aph. 38; *Gal. Comm.* 23 in *Prognost.*; *Cels.* l. 2, c. 1; *Cel. Aurelian de tard Pass.* l. 2, c. 7; *Aet. Tetrab.* 2, serm. 3, c. 3; *Marcell. de Medic.* c. 5; *Gorr. Def. Med.*; *Foes. Econom. Hippocrat.*

Catarrhus, *Catarrh*, among the moderns, is defined to be a morbid secretion from the mucous membrane of the nose, eyes, throat, mouth, or lungs. It is of two kinds,

namely, *catarrhus a frigore*, a common cold in the head; and *catarrhus epidemicus*, or the contagious catarrh, which is better known by the name of the Influenza. It is placed by Cullen as a genus of diseases, under the Class *Pyrexia*, Order *Profluxiva*.—*Catarrhus belinsulanus*, seu *Cyananche parotidæa*, the Mumps.—*Catarrhus suffocativus*, seu *Cyananche trachealis*, the Croup.—*Catarrhus spinalis medullæ*, seu *vesicæ*, the Stranguary.

CATASAR'CA (*Med.*) the same as *Anasarca*.

CATASCE'UE (*Ant.*) *κατασκινῶ*, a training of the *athletæ*, or wrestlers, preparatory to their entering the lists. *Gal. de San. tuend.* l. 3, c. 2.

CATASCHA'SMOS (*Med.*) *κατασχασμός*, from *σχάζω*, to scarify and open a vein; scarification. *Gorr. Def. Med.*; *Foes. Econom. Hippocrat.*

CATA'SCOPUS (*Ecc.*) an arch-deacon,

CATASI'SIS (*Med.*) *κατάσεισις*, from *σείω*, to shake; a distention or extension. *Gorr. Def. Med.*; *Foes. Econom. Hippocrat.*

CATA'STA (*Ant.*) 1. A cage or stall, in which slaves were exposed to sale in the Forum at Rome.

Pers. sat. 6, v. 76.

— *ne sit prastantior alter*

Cappadocas rigidâ pingues plausisse catastâ.

Plin. l. 35, c. 18; *Suet. in Grammat.* c. 13; *Schol. in Pers.* 2. A strappado, or some such machine, on which the martyrs used to be tortured. *Prudent. Peristeph.* l. 2, v. 397; *Gest. Mart. S. Marian. et Jacob.*

CATASTA'GMOS (*Med.*) or *Catalagmos*, *κατασταγμός*, from *σάζω*, to distil; a name formerly used among the Greeks for a distillation. *Cels.* l. 4, c. 4.

CATASTA'LTI'CI'UM (*Med.*) *κατασταλτικός*, from *κατασέλλω*, to restrain; an epithet signifying styptic, astringent, repressing. *Aet. Tetrab.* 1, serm. 2, c. 230.

CATA'STASIS (*Med.*) *κατάστασις*, from *κατίστημι*, to constitute; the constitution of the air or seasons, or the nature of a disease, according to Hippocrates. *Foes. Econom. Hippocrat.*

CATASTASIS (*Poet.*) the third part of the ancient drama, according to the Greek and Roman models. The *catastasis* supports, carries on, and heightens the intrigue or action set forth in the *Epitasis*, till it be ripe for the catastrophe.

CATASTASIS (*Rhet.*) the narration or the narrative part of the orator's speech in which he unfolds the matter in question; and which generally forms the exordium. *Hermog. περί εὐζ.* p. 34; *Sopat. Schol. ad Hermog.* p. 19, Ald. tom. ii.; *Apsin. Art. Rhet.* p. 692; *Syrian. ad Hermog.* p. 247.

CATASTEMA (*Med.*) *καταστήμα*, the clothing air, motion, and external habit of the body; but by Galen, in his Exegesis, it is explained to signify a leaning or resting upon.

CATA'STOLE (*Med.*) *καταστολή*, is explained by Hippocrates to signify decent dress. *Hippocrat. de Decent. Hab.*; *Foes. Econom. Hippocrat.*

CATASTROMA (*Ant.*) *καταστρώμα*, a name for the hatches or decks of a ship on which the men stood to fight. It is sometimes called *καταφράγμα*; whence the ships were called *νῆες πεφραγμέναι ἢ καταφρακτοί*, or covered ships of war, in distinction from the *ἄφρακτοί*, or the uncovered ships. *Schol. in Thucyd.* l. 7, c. 40; *Gyrald. de Nav.* c. 16; *Scheff. de Mil. Nav.* l. 2, c. 7.

CATA'STROPHE (*Poet.*) *καταστροφὴ*, the third and last part in the ancient drama, which is called by Aristotle the *ἔξοδος*. *Aristot. de Poet.* c. 12.

CATATA'SIS (*Med.*) *κατάτασις*, from *κατατενω*, to extend or to place. According to Hippocrates, 1. The extension of a fractured or dislocated limb. 2. The actual replacing it in a proper situation.

CATATONUM (*Archæol.*) an epithet for a chapter or ca-

pital of a pillar, when it is not of a height proportionate to its breadth.

CATATR'PSIS (*Med.*) *κατὰτριψις*, from *τριβω*, to rub; the attrition or friction of machines, applied by Hippocrates to the organs of the human body.

CATAUDESIS (*Med.*) *καταύδησις*, vociferation.

CATA'XA (*Mech.*) *κατάξα*, raw silk, or silk before it is dyed; is so called by Aetius and Actuarius.

CAT-CALL (*Mus.*) or *Cat-pipe*, a harsh sort of pipe that imitates the noise of a cat.

CATCH (*Mar.*) a sort of swift sailing vessel, less than a hoy, that will ride on any sea whatever.

CATCH (*Mus.*) a humorous vocal composition, in which the singers catch up each others' sentences, and give to the words a different sense from that of the original reading.—*Catch-club*, a musical society, who meet together for the purpose of singing catches and glees.

CATCHES (*Mech.*) those parts of a clock, &c. which hold by hooking and catching hold of.

CATCH-FLY (*Bot.*) the *Lychnis viscaria* of Linnæus; a plant, having grass-like leaves, and a long stalk, terminated by a cluster of purple flowers. A glutinous liquor exudes from under the leaves that is almost as clammy as birdlime, so that ants and other insects which happen to light upon these places, are fastened to the stalk; whence this plant has the name of Catch-Fly.

CATCHLAND (*Law*) grounds of which it is not known to what parish they belong.—*Catch-pole*, a sheriff's officer.

CATCH-WORD (*Print.*) the last word at the end of a page, and which commences the next.

CÂTE (*Min.*) a name sometimes given to the *Terra Japonica* or *Catechu*.

CATECHESIS (*Med.*) *κατήχησις*, from *κατηχέω*, to instruct by word of mouth; a term used by Hippocrates to signify instruction or directing by word or mouth; whence the terms to catechize and catechetical.

CATECHIST (*Ecc.*) one who, in the early ages of Christianity, was appointed to instruct those who were intended for baptism in the principles of the Christian faith. [vide *Catechumen*]

CATECHU' (*Bot.*) the *Areca catechu* of Linnæus.

CATECHU (*Chem.*) or *Terra Japonica*, a substance obtained, by decoction and evaporation, from a species of Mimosa, which abounds in India. It is of a reddish-brown colour, uniform in texture, brittle and friable, and without smell. There are two kinds of *catechu*: one from Bombay, which has the lightest colour, and a specific gravity of 1.39; and one from Bengal of the colour of chocolate, and the specific gravity 1.28.—*Extractive of catechu*, the catechu washed repeatedly in powder with water till the fluids cease to precipitate gelatine.

CÂTECHUMEN (*Ecc.*) *κατηχόμενος*, one newly instructed and prepared to receive the ordinance of baptism, but not baptized; a novitiate in Christianity. *S. August. Serm. de Tempor.* 116, &c.; *Morin. de Poenitent.*

CATE'E (*Bot.*) the same as *Acajaiba*.

CATEGOREMATA (*Log.*) *κατηγορήματα*, predicables, or predicable terms, which answer to appellatives in grammar. *Porphyr. Isagog.*

CATEGOREMATICA vox (*Log.*) a categorematical word, or a word which may be predicated, or be the subject of a proposition by itself, as a man, a horse; in distinction from the *Syncategorematica vox*, or part of the subject, as all, every, none.

CATEGORICAL (*Log.*) an epithet signifying affirmative or positive, as a categorical proposition, or a categorical syllogism, where all the propositions are affirmatives.

CÂTEGORY (*Log.*) *κατηγορία*, from *κατηγορεῖν*, to predicate; a term signifying predicament, rank, or class, into which Aristotle divides all things logically considered, making ten of these in number; namely, substance, quantity,

quality, relation, action, passion, where, when, situation, and habit. *Aristot. de Categ.*

CATE'IA (*Ant.*) a barbed dart, or spear used by the ancient Gauls.

Virg. Æn. l. 7, v. 741.

Teutonico ritu soliti torquere cateiis.

Serv. in Virg.; Isidor. Orig. l. 18, c. 7; *Lips. Poliorcet.* l. 4, c. 4.

CATEIA'DION (*Surg.*) *κατειάδιον*, from *κατὰ* and *εἶα*, a blade of grass; a very long instrument which was introduced into the nostrils, in order to provoke an hæmorrhage, in the cure of the *cephalgia*, or head-ach. *Arct. De curat. Morb. diutum.* l. 1, c. 2.

CATELÆ-VEGON (*Bot.*) the *Aristolochia* of Linnæus.

CATELLO'RUM olium (*Med.*) from *catulus*, a whelp; olive oil in which young whelps have been boiled until their flesh separates from the bones; to which is added thyme, marjoram, &c.

CATELLUS cinereus (*Chem.*) a cupel or test, so called from its head resembling that of a dog in shape.

CATE'NA (*Anat.*) a muscle, otherwise called *tibialis anticus*.

CÂTENARY (*Geom.*) from *catena*, a chain; a curve on a crooked line formed by a rope when hanging, between two points of suspension. Suppose a line fixed at the points A and B, then its weight will bend it into the curve, A C B, called the catenary, and if D B

to A B, B b parallel to C D, the points, D and d, infinitely and d c be parallel to the horizon, C D perpendicular near to one another, and a be any given quantity, the property of this curve will be as follow; namely, $bc : Bb :: a : C B$.

CATE'NULA (*Bot.*) or *Elator*, vide *Springer*.

CATER (*Gam.*) four on cards or dice.—*Cater-point*, the number four.—*Cater-foil*, vide *Quatrefoil*.

CATERER (*Polit.*) from the French *acheter*, to buy; a purveyor, or provider of victuals and other necessaries, in the king's household.

CATERGI (*Polit.*) public carriers in the grand seignior's dominions.

CATERPILLAR (*Ent.*) the *larva* produced from the egg, and an insect of a moist soft substance without wings, slow in motion, often with numerous feet, sometimes with none, and very voracious of its food; from the *larva* it passes by a *metamorphosis*, or transformation, into the *pupa*, chrysalis, or nymph; and, lastly, it becomes the perfect active insect furnished with *antennæ*.

CATERPILLAR (*Bot.*) a kind of plant resembling caterpillars, which is esteemed for its seed vessels.

CATESBÆA (*Bot.*) a genus of plants, Class 4 *Tetrandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* superior.—COR. *monopetalous*; *tube* straight; *border* broad.—STAM. *filaments* four; *anthers* oblong.—PIST. *germ* roundish; *style* filiform; *stigma* simple.—PER. *berry* oval; *seeds* many.

Species. The two species are shrubs, as the—*Catesbæa spinosa*, seu *Frutex spinosus*, Lily-Thorn, native of Providence Island.—*Catesbæa parviflora*, seu *Rhannus*, &c. native of Jamaica.

CATE-VA'LA (*Bot.*) Common Aloe, or the *Aloe perfoliata* of Linnæus.

CAT-FALL (*Mar.*) vide *Cat*.

CAT-FISH (*Ich.*) a sea fish in the West Indies, so called from its round head and large glaring eyes.

CAT-GUT (*Mech.*) a name given to the small strings which are used by different artificers, but particularly musical instrument makers for violins, &c. It is made of the intestines of sheep or lambs.

CATHÆRESIS (*Med.*) *καθαίρεσις*, from *καίρω*, to take away;

- the detraction or subtraction of a part of the body by any evacuation whatever.
- CATHÆRETICA** (*Med.*) καθαιρετικά, from αἰρέω; caustics or remedies which consume superfluous flesh.
- CATHARIANS** (*Ecc.*) or *Cathari*, καθαροί, pure; a title assumed by the Novatians, who pretended to a stricter church discipline than other Christians.
- CATHARISTS** (*Ecc.*) a sect of heretics, who were a branch of the Manichees. *August. Heres.*
- CATHARMA** (*Med.*) καθάρμα, from καθαίρω, to purge; the excrements purged off from any part of the body.
- CATHARMATA** (*Ant.*) καθάρματα, sacrifices to the gods to turn away a pestilence; a victim, or one devoted to be a victim for the purpose of expiation. *Harpocration; Hesychius.*
- CATHARMOS** (*Med.*) καθαρμός, from καθαίρω; purgation by medicines, or the cure of a disorder by superstitious ceremonies or sacrifices.
- CATHAROS** (*Med.*) pure or unmixed, as applied to the excrements. *Foes. Econom. Hippocrat.*
- CAT-HARPINGS** (*Mar.*) vide *Cat.*
- CATHARSIS** (*Med.*) καθάρσις, a purgation of the excrements either natural or artificial.
- CATHARTICA** (*Med.*) καθαρτικά, from καθαίρω, cathartics; purgative, or purging medicines, which are distinguished, according to their properties, into stimulating, refrigerating, astringent, emollient, and narcotic. *Gal. Com. 3 in Hippoc. de Tract.; Gorr. Def. Med.; Foes. Econom. Hippocrat.*
- CATHARTICUS Sal** (*Med.*) a name for the *Epsom Salts*.—*Catharticus Hispanicus Sal*, a purging salt procured from some springs near Madrid.
- CAT-HEAD** (*Min*) a kind of fossil containing nodules with leaves called catheads, which seem to consist of ironstone not unlike that found in the rocks near Whitelaven.
- CAT-HEAD** (*Mar.*) vide *Cat.*
- CATHEAUTONPERAS** (*Chron.*) καθ' ἐαυτὸν πέρως, the month in the beginning of which the winter solstice falls; it is so called by the Macedonians. *Gal. Com. in Hippoc. Epid. l. 1.*
- CATHE'DRA** (*Archæol.*) a term introduced to denote the pulpit, or the professor's chair; it originally signified any chair.
- CATHEDRA** (*Med.*) καθέδρα, from καθίζομαι, to sit; the *anus*.
- CATHEDRAL** (*Ecc.*) the church of the bishop, and head of the diocese.
- CATHEDRAL-DU'TY** (*Mus.*) a term applied to the duty or service performed by the organist of a cathedral.
- CATHEDRALITHI** (*Ant.*) Sedan-men that carry their masters in chairs.
- CATHEDRATIC medicines** (*Med.*) from καθαίρω, to destroy; medicines which consume carnosities arising in wounds, as proud flesh, &c.
- CATHEDRATICUM** (*Law*) cathedratic, a sum of two shillings paid by the inferior clergy to the bishop.
- CATHEMERINA** (*Med.*) the same as *Quotidiana Febris*.
- CATHEMERINOS** (*Med.*) the same as *Amphemerinos*.
- CATHERETICS** (*Med.*) the same as *Cathartica*.
- CATHERINE pear** (*Bot.*) a well-known species of pear.
- CATHERINE wheel** (*Her.*) a sort of wheel, so called from St. Catherine, who suffered martyrdom on such a wheel. It has been occasionally borne in coat armour, and is to be found in the arms of the Turners' Company.
- CATHERINE wheel** (*Archit.*) a large circular ornament in the upper compartment of Gothic windows, filled with a rosette, or radiating divisions.
- CATHERINE, St. Order of** (*Her.*) an order instituted by Catherine, wife of Peter the Great, for ladies of the first quality in the Russian court. The emblems of this order are a red cross supported by a figure of St. Catherine, and the motto *Pro fide et patria*.
- CATHERPLUGS** (*Mar.*) the same as *Cat-harpings*.
- CATHESTE/COS** (*Med.*) καθήσθησ, from καθίστημι, to establish or settle; applied by Hippocrates, in his Aphorisms, to the age of man, and the season of the year; also an epithet for a strict and regular diet, according to Plutarch in his Precepts of Health.
- CATHETER** (*Med.*) καθέτηρ, from καθήμι, to introduce; an oblong hollow crooked instrument or tube used in disorders incident to the bladder, called by Celsus *Fistula*. *Cels. l. 27, c. 6; Gal. de Meth. Med. l. 5, c. 5; Paul. Æginet. l. 6, c. 59.*
- CATHERISMUS** (*Med.*) catheterism, the introduction of the catheter into the bladder. *Paul. Æginet. l. 6, c. 59.*
- CATHETERUS** (*Med.*) vide *Catheter*.
- CATHE'TI** (*Math.*) the two legs of a right angled triangle, including the right angle.
- CATHE'TUS** (*Geo.*) καθήτος, a side, also a perpendicular; a line of a triangle that falls perpendicularly, the bottom being called the base, the other leg the hypotenuse.
- CATHETUS of incidence** (*Catop.*) a right line drawn from a point of the object perpendicular to the reflecting line.—*Cathetus of reflection*, or *of the eye*, a right line drawn from the eye perpendicular to the reflecting line.—*Cathetus of obliquation*, a right line drawn perpendicular to the speculum in the point of incidence or reflection.
- CATHETUS** (*Archit.*) a line supposed directly to traverse the middle of a cylindrical body, as of a balluster or pillar. *Vitruv. l. 3, c. 3.*—*Cathetus of an Ionic capital*, a line falling perpendicularly and passing through the centre of the volute.
- CATHIDRYISIS** (*Med.*) καθιδρύσις, from καθιδρύω, to place together; the reducing of a thing to its proper place.
- CATHIMIA** (*Min.*) in the Spagirical language, signifies, 1. A subterraneous mineral vein, whence gold and silver are dug. 2. Concretions in the furnaces of gold and silver. 3. Gold. 4. *Spuma Argenti*. 5. Soot that adheres to the walls in burning of brass.
- CATHIMIA affidia** (*Min.*) 1. The cathimia of silver, which is of the colour of Litharge, i. e. burnt lead. 2. The *spuma auri, æris, et argenti*. There is also the *Cathimia Ferri*.
- CATHODOS** (*Med.*) κάθοδος, from κατά, downwards; signifies literally descent, and is applied by Hippocrates to the blood which forms the menses. *Foes. Econom. Hippocrat.*
- CATHOLCEUS** (*Surg.*) καθολκέυς, from κατά and ολέω, to draw over; an oblong fillet which came over the whole bandage of the head, called *periscepastrum*, which it held firm. *Gal. de Fasc.*
- CAT-HOLES** (*Mar.*) vide *Cat.*
- CATHOLIC** (*Ecc.*) καθολικός, an epithet signifying universal, and applied spiritually to the universal church, which Christ has promised to establish on earth. The Romish church assumes this title to itself as the church which is to be universally established in time. *Euseb. l. 4; August. de Ver. Relig. c. 5, 6.*—*Catholic faith*, the fundamental principles of Christianity which are universally admitted by all bearing the name of Christians.
- CATHOLIC fire** (*Chem.*) a little furnace used for all operations, except such as are done by a violent fire.
- CATHOLIC King** (*Polit.*) a title belonging to the King of Spain.
- CATHOLICI** (*Polit.*) καθολικοί, magistrates with consular dignity, who had charge of the revenues in the provinces under Constantine and his successors. *Euseb. l. 8, c. 23; Cajuc. de Jur. Fisc. l. 5.*
- CATHO'LICON** (*Med.*) or *catholicus*, καθολικός, from κατά and ὅλος, the whole; a general or universal medicine formerly supposed to purge off all bad humours.
- CATHOLICS** (*Ecc.*) the prelates patriarchate of Antioch were formerly so called in the time of Justinian.
- CATHO'LICUS** (*Med.*) the same as *Catholicon*.
- CAT-HOOK** (*Mar.*) vide *Cat.*
- CATHYGROS** (*Med.*) καθύγρος, from κατά and ὑγρός, humid,

excessively humid; an epithet applied to the Uterus. *Hipp.* sect. 6, aph. 62.

CATHYPNIA (*Med.*) from *ὑπνος*, sleep; a profound sleep.

CATI (*Com.*) or *Cath*, 1. A Chinese weight equal to one pound four ounces. It is the only weight at Japan, and is used also at Batavia and other parts of India. 2. A small weight of three grains used by the Eastern lapidaries for weighing emeralds.

CATIANG (*Bot.*) the *Dolichos catiang* of Linnæus.

CATIAS (*Bot.*) the same as *Ament*.

CATIAS (*Surg.*) *κατίας*, from *καθίμι*, to introduce; an incision knife used in extracting a dead fœtus; also in opening an abscess in the uterus. *Paul.* l. 6, c. 74.

CATILLIA (*Com.*) a weight of nine ounces.

CATI-MARUS (*Bot.*) the *Kleinhora hospita* of Linnæus.

CATIMIA (*Min.*) the same as *Cadmia*.

CATINUM-ALUMEN (*Chem.*) Pot-ash.

CATINUS (*Med.*) the same as *Cupella*.—*Catinus fusorius*, the same as *Crucibulum*.

CATISCHON (*Med.*) from *κατίζω*, to retain; one who is costive, or not easily purged. *Hippoc. de Epid.* l. 6, aph. 8.

CATKIN (*Bot.*) or *Catling*, the same as *Ament*; so called from its resemblance to a cat's tail. [vide *Ament*]

CATTLING (*Surg.*) a sort of dismembering knife used in the cutting off any corrupted member or part of the body.

CATLING (*Bot.*) the same as *Catkin*.

CATTLINGS (*Bot.*) the down or moss growing about walnut-trees resembling the hair of a cat.

CATLINGS (*Mus.*) small cat-gut strings for musical instruments.

CATMA (*Min.*) filings of gold.

CAT-MINT (*Bot.*) vide *Cat*.

CAT-PURGARE (*Med.*) to purge downward.

CATOBLECTA (*Zool.*) animals furnished with civet.

CATOBLEPAS (*Zool.*) or *Catoblepon*, *καταβλέπων*, a wild beast found in Æthiopia, which is fabled to kill like the basilisk, by its look. *Plin.* l. 8, c. 21.

CATOCATHARTICA (*Med.*) from *κατὰ*, downwards, and *καθαίρω*, to purge: medicines which operate by stool, in distinction from *anocathartica*, which purge upwards, i. e. emetics.

CATOCHE (*Med.*) *Catochus*, the same as *Carus*.

CATOCHEITES (*Min.*) from *κατέχω*, to retain; a stone found in Corsica, said to attract and retain the hand when laid upon it. *Plin.* l. 37, c. 10.

CATOCHEUS (*Med.*) from *κατέχω*, to retain; a tetanus or spasmodic affection, in which the body is rigidly held in an upright posture.

CATODON (*Zool.*) from *κατὰ*, below, and *ὄδον*, a tooth; the Spermaceti-Whale, so called because it has teeth only in the lower jaw. It is the *Physeter Catodon* of Linnæus.

CATOECPIDIOS (*Med.*) *κατοειπίδιος*, an epithet signifying domestic, familiar, easy to be made or procured; but applied by Hippocrates to extensions necessary for replacing luxated limbs. *Hipp. de Articul.*; *Foes. Econom. Hippoc.*

CATENA DI TRILLI (*Mus.*) a chain or succession of short syllables.

CATOMISMOS (*Surg.*) *κατωμισμός*, from *κατω*, under, and *αμος*, the shoulder; a method of reducing a luxated humerus. *Æginet.* l. 6, c. 114.

CAT-O'-NINE-TAILS (*Mar.*) vide *Cat*.

CATOPISIS (*Med.*) from *κατοπτομαι*, to see with quickness, or acuteness; an acute and quick perception, particularly that acuteness of the faculties which accompanies the latter stages of a consumption.

CATOPSIS (*Opt.*) vide *Catoptrics*.

CATOPTER (*Med.*) *κατοπτρίς*, from *κατὰ*, through, and *ὀπτήμα*, to see; the same as *Speculum*.

CATOPTRICAL CISTULA (*Catop.*) a machine or apparatus by which small things are represented as large; near ones, extremely wide; with other phenomena. It may be made in a variety of different ways to represent different scenes.—*Catoptric dial*, exhibits objects by reflected rays.—*Catoptric telescope*, a telescope which exhibits objects by reflection.

CATOPTRICS, a branch of the science of optics, which breaks off vision by reflection. [vide *Optics*]

CATOPTRON (*Ant.*) of *κάτοπτρον*, a speculum, and *μαντήλα*, divination; a sort of divination among the Greeks, by looking in a mirror which was let down by a thread into a fountain before the temple of Ceres in Achaia. If they saw a ghastly figure in the glass, it was looked upon as a sure sign that the sick person on whose account the ceremony was performed would not recover; but if the image looked fresh, they concluded favourably. *Apul. Met.*

CATOPTRON (*Catop.*) *κάτοπτρον*, a kind of optic glass.

CATOPYRITES (*Min.*) a kind of precious stone from Cappadocia. *Plin.* l. 37, c. 10.

CATORCHITES (*Med.*) *κατορχίτης*, a sort of wine in which orchis has been infused. *Dioscor.* l. 5, c. 41.

CATORETICA (*Med.*) or *catoteretica*, the same as *Purgantia*.

CAT-PEAR (*Bot.*) vide *Cat*.

CAT-PIPE (*Mus.*) the same as *Cat-call*.

CATRICO'NDA (*Bot.*) the *Coix lacryma* of Linnæus.

CAT'S-ROPE (*Mar.*) a rope for hauling up the anchor to the cat-head.

CAT-SILVER (*Min.*) a kind of fossil composed of plates, generally plain and parallel, flexible and elastic. It is of three sorts, the yellow or golden, white or silvery, and the black.

CATS (*Mar.*) vide *Cat-heads*.—*Castellated Cats*, vide *Cat*.

CAT'S-EYE (*Min.*) a stone of a glistening grey with a tinge of green, yellow, or white. It is the *Feldspatum oculus cati* of Linnæus.

CAT'S-FOOT (*Bot.*) the same as *Ale hoof*, or *Ground Ivy*.—*Cat's-head*, a large sort of apple.—*Cat's-tail*. 1. That which grows in the winter on nut-trees, pine-trees, &c. 2. A kind of reed bearing a spike like the tail of a cat.—*Cat's-tail grass*, a perennial, the *Phleum* of Linnæus.

CAT'S-PAW (*Mar.*) in French *fraicheur*, ou *petit vent sur l'eau*. 1. A light air of wind perceived at a distance in a calm, by the impression made on the surface of the sea. 2. A name for a particular turn made in the bight of a rope, in order to hook a tackle on it.

CATTA of *Bantam* (*Com.*) thin plates of lead on a string, 200 of which make a *sata*, value 3s. 4d.

CAT-TAIL (*Bot.*) the same as *Catkin*.

CATTARIA (*Bot.*) the same as *Catarrea*.

CATTEE (*Com.*) a weight in *Bantam*, equal to 1200 $\frac{1}{2}$ oz. avoirdupoise; in *China*, to 16 tail, about 20 $\frac{3}{4}$ oz. avoirdupoise; in *Japan*, to about 21 oz. avoirdupoise; in *Siam*, to 26 tail, or 1 $\frac{1}{2}$ oz. *Lisbon*; in *Sumatra*, to 29 oz. avoirdupoise.

CAT'TLE (*Com.*) from *chattel* and *capital*, signifies those quadrupeds which constitute the personal property of a man, and serve for his domestic use. They are distinguished into black cattle, as horses, cows, &c.; horned cattle, as oxen, sheep, &c.; draught cattle, as horses, oxen, &c.

CAT-THYME (*Bot.*) the *Teucrium marum* of Linnæus. [vide *Cat*]

CATTU-GASTURI (*Bot.*) the same as the *Hibiscus*.—*Cattu-shiragam*, a shrub, the seeds of which kill worms. It is the *Conyza* of Linnæus.—*Cattu-tirpalî*, the *Piper longum*.

CAT'TY (*Com.*) vide *Cati*.

CATULLI-POLA (*Bot.*) the *Pancreatum zeylanicum* of Linnæus.

CATULO'TICA (Med.) *καταλωτική*, from *κατὰ λῶα*, to cicatrize; medicines that cicatrize wounds.

CATULUS (Bot.) the same as *Julus*.

CATURUS (Bot.) a genus of plants, Class 22 *Dioecia*, Order 3 *Triandria*.

Generic Characters. CAL. none.—COR. monopetalous; divisions ovate.—STAM. filaments three; anthers roundish.—PIST. germ villose; styles three; stigmas acute.—PER. capsule roundish; seed solitary.

Species. The two species are the—*Caturus spiciflorus*, seu *Acalypha*, *Watta-Taly*, seu *Cauda*, &c. a shrub, native of the East Indies.—*Caturus scandens*, native of Cochinchina.

CATURUS is also the name of the *Boetsmeria* of Linnæus.

CAT'US (Zool.) the *Felis catus* of Linnæus.

CATU-TZIE'RU (Bot.) the *Limonia* of Linnæus.

CATZU'RUS (Archæol.) a hunting horse.

CAVA-VE'NA (Anat.) i. e. hollow vein; the largest vein in the body, descending from the heart. It is so named from its large cavity; into which, as into a common channel, all the lesser veins, except the pulmonaris, empty themselves.

CAVÆ'DIUM (Archit.) or *cava ædium*, the hall in the midst of a house; or the quadrangle in a college or public building. *Vitruv.* l. 6, c. 3.

CAVAL'AM (Bot.) a Malabaric plant, the *Sterculia balangas* of Linnæus.

CAVALCA'DE (Mil.) a pompous procession of horses, carriages, &c.

TO CAVALCADE, to skirmish, as horsemen when they march and fire one at another by way of diversion.

CAVALCADOU'R (Mil.) a name for the equerry or master of the horse at the court of France.

CAVAL'ER (Mil.) a horseman so called, from *καβάλλης*, and *caballus*, a horse.

CAVALIER (Man.) one expert in all the arts of horsemanship.

CAVALIER (For.) a work raised within the body of a place ten or twelve feet above the other works. But a French Cavalier, *cavalier de tranchée*, in the attacks, is an elevation which the besiegers make, by means of earth, to enfilade the covert-way.

CAVALIERS (Polit.) a name for the royalists in the time of Charles I. in distinction from the rebels, contemptuously denominated Round-heads.

CAVALLO (Com.) a small brass coin in Italy, worth only the 24th part of a penny.

CAVALRY (Mil.) a body of horse.

CAVAN (Bot.) the same as *Cajan*.

CAVAN (Com.) a measure, containing fifty Spanish pounds, used in some of the Phillipine islands, especially for measuring rice.

CAVA'TICUS (Zool.) an epithet for cockles, or shell-fish that breed in holes.

CAVAT'INA (Mus.) a short air without a second part.

CAVATION (Archit.) digging away the earth for the foundation of a building.

CAVATO'RES (Ant.) sculptors of gems.

CAVA'ZION (Archit.) vide *Cavation*.

CAUCALIS (Bot.) *καυκαλίς*, Bastard Parsley, a plant, so called from the shape of its flower, which resembles *καυκίον*, a cup; is eaten as a vegetable, and, according to Dioscorides, provokes urine. *Theophrast. Hist. Plant.* l. 7, c. 7; *Dioscor.* l. 2, c. 169; *Plin.* l. 21, c. 15.

CAUCALIS, in the Linnæan system, a genus of plants, Class 5 *Pentandria*, Order 2 *Digynia*.

Generic Characters. CAL. umbel universal unequal; umbel partial unequal; involucre universal undivided; involucre partial often five; perianth proper five-toothed.—COR. universal radiate; florets of the disc abortive; proper,

one of the disc, male, small; petals unequal.—STAM. in all the flowers; filaments five; anthers small.—PIST. germ, of the ray, oblong; styles two; stigmas two.—PER. fruit ovate oblong; seeds two.

Species. The species are all annuals except the last.—*Caucalis grandiflora*, seu *Echinophora*, &c. Great-flowered Bastard Parsley, native of Europe.—*Caucalis daucoides*, seu *Conium*, &c. seu *Echinophora*, &c. Carrot-leaved Bastard Parsley, native of Germany.—*Caucalis latifolia*, *Tordylum*, *Caucalis arvensis*, *Lappula*, &c. Broad-leaved Bastard Parsley, native of Germany.—*Caucalis Mauritanica*, Barbary Bastard Parsley, native of Mauritania.—*Caucalis pumila*, &c. *Daucus*, *Lappula*, &c. seu *Daucalus*, &c. native of Europe.—*Caucalis Africana*, native of the Cape of Good Hope.—*Caucalis leptophylla*, seu *Lappula*, Fine-leaved Bastard Parsley, native of Germany.—*Caucalis platycarpus*, *Lappula*, &c. seu *Echinophora*, native of Gaul.—*Caucalis arvensis*, &c. Corn Bastard Parsley, native of Germany.—*Caucalis anthriscus*, seu *Tordylum*, &c. Hedge Bastard Parsley, native of Europe.—*Caucalis Japonica*, &c. native of Japan.—*Caucalis nodosa*, &c. *Tordylum*, seu *Torilis nodosa*, &c. Knotted Bastard Parsley, native of Carniola.—*Caucalis macrocarpos*, native of Morocco.—*Caucalis Orientalis*, Eastern Bastard Parsley, a biennial. *J. Bauh. Hist. Botan.*; *C. Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*; *Raii Hist. Plant.*; *Tournef. Instit.*; *Linn. Spec. Plant.*; &c.

CAUCALIS is also the *Conium Africanum* of Linnæus.

CAUCALO'IDES (Med.) *καυκαλοειδής*, the patella, so called from its supposed similitude to the flower of the Caucasus.

CAUCANBARDITES (Ecc.) a sect of heretics in the sixth century, followers of Severus. *Nicephor.* l. 18, c. 49; *Baron. Annal. Ann.* 535.

CAUCA (Ant.) *caucion*, or *caucium*, *καυκίον*, a drinking goblet of wood. *Hieron. in Jovin.* l. 2; *Spart. in Piscen.* c. 10.

CAU'CON (Bot.) the herb Horse-tail.

CA'UDA (Astron.) the Latin name for tail, is affixed to the names of several constellations, to denote certain stars in their tails, as—*Cauda Capricorni*, a star in the tail of Capricorn, marked γ by Bayer.—*Cauda Ceti*, in the tail of Cetus, marked β .—*Cauda Cygni*, marked α .—*Cauda Delphini*, marked ϵ .—*Cauda Draconis* [vide *Dragon's tail*].—*Cauda Leonis*, the same as β Leo.—*Cauda Ursæ Majoris*, marked α .—*Cauda Ursæ Minoris*, marked α .

CAUDA (Bot.) vide *Tail*.—*Cauda equina*, the same as *Equisetum*.—*Cauda muris*, a species of *Ranunculus*.—*Cauda porcina*, the same as *Peucedanum*.

CAUDA *Vulpis rubicundi* (Min.) Red-Lead.

CAUDA Terra (Law) a land's end, or the bottom of a ridge in arable land.

CA'UDAL (Ich.) an epithet for the fin of a fish which forms its tail. [vide *Ichthyology*]

CAUDA'TIO (Med.) from *cauda*, a tail; an elongation of the clitoris.

CAUDEBEC (Com.) a sort of hats (so called from Caudebec, a town in Normandy, where they are principally manufactured) made of lambs' wool, the hair or down of ostriches, or camel's hair.

CAU'DEX (Bot.) the trunk or stem of a tree, that part of a tree or shrub between the root and branches. *Theophrast. Hist. Plant.* l. 1, c. 2.

According to Linnæus, the stem is either descending, *caudex descendens*, which terminates in roots; or ascending, *caudex ascendens*, which rises into branches and leaves. *Linn. Phil. Botan.*

CAUDIVERBERA (Zool.) a species of *Lacerta*.

CAUDLE (Med.) a drink made of milk, ale, wine, eggs, sugar, and spice.

CAVEA (*Ant.*) the place in the amphitheatre where the wild beasts were kept; frequently, however, the word is applied to the middle, or arena; and sometimes to the whole interior. *Plin.* l. 8, c. 17; *Vopisc. in Prob.* c. 19; *Tertull. contra Mare.* l. 1, c. 27; *Ammian.* l. 29; *Claud. in Cons. Stilich.* l. 2, v. 322; *Salmas. in Vopisc.*

CAVEA (*Palm.*) a hollow in the palm of the hand, in which is a triangle formed by three principal lines—the Cardiac, Cephalic, and Hepatic.

CAVEAT (*Law*) a kind of process to stop the institution of a clerk to a benefice, or the probate of a will.

CAVEATING (*Fenc.*) a motion whereby a person, in an instant, brings his sword which was presented to one side of his adversary to the opposite side.

CAVEDOC (*Com.*) two Persian measures, the first of which is one inch longer than an English yard; the other, which is the shortest, is three-fourths of the longest.

CAVERNA (*Anat.*) a cavern; applied to the female *pudenda*.

CAVERNO'SA CORPORA (*Anat.*) two cavernous bodies which principally compose the *penis*.—*Cavernosa clitoris*, two nervous or spongy bodies, like those of the *penis*.—*Cavernosum corpus urethra*, a third spongy body of the *penis*.

CAVERS (*Min.*) a name among miners for those who steal ore from the mines.

CAVE'SON (*Man.*) a sort of nose-band, either of iron, leather, or wood, fastened round the nose of a horse, to forward the suppling and breaking of the horse.

CAVE'TTO (*Arch.*) an Italian word, from A the Latin *cavus*, hollow; signifying a concave moulding, the curvature of whose section does not exceed the quadrant of a circle, as A B in the annexed figure. It is the reverse of the *ovolo*, or quarter-round, and is sometimes used in cornices, pedestals, and the like.

which form or contain some essential part. They are either—*Great Cavities*, as the head, chest, &c.; or *less*, as the ventricles of the heart, brain, &c.

CAUK (*Min.*) a coarse talcy spar, the *Barytes vulgaris* of Linnæus.

CA'UKER (*Vet.*) the bending or turning up of the heels of the shoes of horses, which serves to prevent them from slipping.

CA'UKING (*Archit.*) the art of dovetailing across.

CAUL (*Anat.*) the vulgar name for the *omentum*.

CAULCEIS (*Law*) ways cased with flints, &c. *Stat. G. H. G.*

CAULDRON (*Mech.*) a large kind of boiling vessel.

CAULEDON (*Surg.*) from *καυλός*, a stalk, because it is in the shape of a stalk; a species of fracture when the bone is broken transversely, so as not to cohere.

CAULESCENT (*Bot.*) an epithet for a plant, *planta caulescens*, having a stem different from that which produces the flower. It is opposed to *acaulis*, or stemless. *Linn. Phil. Botan.*

CA'ULIAS (*Bot.*) *καυλιὰς*, an epithet for that juice of the Silphium which flows from the stalk, in distinction from that which flows from the root, and is called *ρίζιας*.

CAULI'COLE (*Archit.*) *caulicula*, from *caulis*, a stalk; a name for the eight small stalks between each of the two rows of leaves in the Corinthian capital. *Vitruv.* l. 4, c. 1.

CAULIFEROUS PLANTS (*Bot.*) from *caulis*, a stalk, and *fero*, to bear; an epithet for plants which have a true caulis or stalk.

CAULIFLOWER (*Bot.*) the finest sort of cabbage; a variety of the *Brassica oleracea* of Linnæus.

CAULIFORMIS (*Bot.*) stemlike, an epithet for that part of plants which penetrates under the soil.

CA'ULINE (*Bot.*) an epithet for a leaf: *folium caulinum*, a leaf which is attached immediately to the stem.

CA'ULIS (*Bot.*) from the Greek *καυλός*, which signifies the stem of a tree, is called in Latin *truncus*, and in English *trunk*; but it is now commonly applied to the stalk or herbaceous stem which lasts but one or two years. [*vide Stalk, Stem*]

CAULK (*Mar.*) *vide Calk*.

CAULO'DES (*Bot.*) *καυλώδης*, a kind of broad-leaved Colewort.

CAULO'TON (*Bot.*) an epithet for the *Beta*, Beet.

CA'ULPES (*Law*) *vide Caupes*.

CA'UMA (*Med.*) *καύμα*, from *καίω*, to burn; any violent heat.

CA'UNGA (*Bot.*) another name for the *Areca*.

CA'UNIÆ (*Bot.*) a kind of figs, so called because they were brought from Caunus, a sea-town of Caria. *Plin.* l. 15, c. 19.

CA'UPES (*Law*) or *Capes*, any gift given by a man to his patrons during his own lifetime.

CA'UPONATE (*Archæol.*) from *caupo*, to keep; a victualing house.

CAURCINES (*Com.*) *Caurisini*, Italians who came into England about the year 1235, calling themselves Pope's merchants. They derive their name, according to Cowel, from Cavisum Cavisu, a town in Lombardy, where they first practised the arts of usury and extortion. *Mat. Paris.* 403.

CAUSA *matrimonii prælocuti* (*Law*) a writ wherein a woman gives lands in fee simple to a man that he should marry her, and he refuses so to do within a reasonable time.

CAUSAL *propositions* (*Log.*) propositions connected together by a causal conjunction, as *because*, *as*, *since*, &c.

CAUSALTY (*Min.*) the earth or stony matter separated from the tin ore in the stamping mill.

CAUSAM *nobis significes* (*Law*) a writ directed to a mayor of a town on delay of the performance of his duty, requiring him to show cause why he so delays it.

CAUSA'RII *milites* (*Mil.*) invalids, or soldiers who were dismissed because they were sick or maimed. *Liv.* l. 6, c. 6.

CAUSE (*Phy.*) whatever produces an effect, or that by which any thing is caused to happen. Causes are distinguished into—*Efficient cause*, the only true and proper cause of any thing, in distinction from a secondary cause, or that which is subservient to another cause. In this sense God is the only efficient cause, or the *first cause*, to which all other causes are secondary.—*Necessary cause*, that which is concerned in producing an effect, not by the will of any agent, but by a necessary law of nature, as the sun emitting its rays, or a spring its waters. This may be otherwise termed a *natural cause*.—*Equivocal cause*, that which is of a different kind and denomination from its effect.—*Accidental cause*, that which produces effects incidentally; as, for the sun to kill any person by the force of its rays.

CAUSE (*Log.*) the end for which a thing is. The *Final cause* is that which is the direct end or motive for an action, &c.

CAUSE (*Med.*) that by which any disease is produced: this is called either remote or proximate; the—*Remote, predisponent, or antecedent cause*, called by the Greeks *προηγμένη*, is that which changes the body in such a manner as to dispose it for the reception of disease upon the accession of another cause: this consists principally in temperament, plethora, and cacochymy.—*Proximate cause*, otherwise called the *procatartic cause*, and by the Greeks the *πρόκαρσις*, is that cause the accession of which to the remote cause excites, and in conjunction with it forms, the disease. Proximate causes are either external or internal, and by Boerhaave are reduced to four classes; namely, the *ingesta*, or things entering the body; *gesta*, things done, as affections of the mind, exercise, &c.; things retained or excreted; and lastly, things applied to the body, as air, vapour, &c.

CA'USEWAY (*Mech.*) or causey, in French *chaussée*, from the Latin *calceum*, a pathway made of stones and rubbish, signifies any path raised above the level of the ground that is near it, and paved with stones or gravel.

CA'USIA (*Ant.*) *καυσία*, a hat worn by the kings of Macedonia.

Poll. l. 10, c. 31; *Plut. in Demet.*; *Plaut. Mil. Glor.* act 4, scen. 2, v. 4.

*Facile ut venias huc ornatus ornatu nauclicero,
Causiam habes ferrugineam.*

CAUSIDICI (*Law*) *causides*, lawyers, or pleaders of causes.

CA'USIS (*Med.*) *καυσις*, from *καίω*, to burn; another name for *Ambusta*.

CAUSO'DES *febris* (*Med.*) a burning fever.

CAUSO'MA (*Med.*) from *καίω*, to burn; a burning heat and inflammation. *Gorr. Def. Med.*

CA'USTIC (*Chem.*) an epithet for potash, from its corrosive quality.

CAUSTIC stone (*Surg.*) a caustic composition.

CAUSTIC curve (*Geom.*) a curve formed by the concurrence or coincidence of the rays of light reflected or refracted from some other curve. The former is called the catacaustic curve, and the latter the diacaustic. [vide *Catacaustic*, &c.]

CAUSTIC Barley (*Bot.*) the seeds of the *Cevadilla Hispanorum*; so called from their caustic quality.

CA'USTICA (*Med.*) from *καίω*, to burn; caustics, so called because when applied to any live part of the body they burn it to a hard crust, or eschar: for this reason they are also called escharotic medicines.

CA'USTICUM *Americanum* (*Med.*) the same as *Cevadilla*.—*Causticum commune fortius*, is made by adding five pounds four ounces of quick lime to water of pure kali sixteen pounds.—*Causticum lunare*, the nitrate of silver, is used by surgeons when melted and cast into cylindrical pieces about the size of common slate pencils.—*Causticum opiatum*, opiated caustic.

CA'USUS (*Med.*) *καυσος*, from *καίω*, to burn; a burning fever,

one of the continual kind, attended with a burning heat, and most intense thirst.

CAUTE'LA (*Archæol.*) a cautel, caution, or security.

CA'UTER (*Surg.*) *καυτήρ*, from *καίω*, to burn; a seering iron to burn a sore with. *Veget.* l. 2, c. 6.

CAUTERISA'TIO (*Med.*) from *καυτηρίζω*, cauterising.

CAUTER'IUM (*Med.*) from *καίω*, to burn; a cautery, or whatever is applied to any live part of the body for the purpose of burning it to a crust. Cauteries are *actual*, as actual fire, and *potential*, i. e. those which have the power of consuming gradually, as Quick-lime, Butter of Antimony, Oil of Vitriol, &c.—*Silver Cautery*, a cautery made of silver, which is accounted the best of the potential kind.

CA'UTING iron (*Vet.*) an iron used to sear or burn the parts of a horse that require it.

CA'UTION (*Cus.*) a sum of money paid on matriculation at the university, by way of caution, or security.

CAUTION (*Mil.*) an explanatory address to the soldiers previous to giving the word of command, that they may the better execute the movement required of them.

CAUTIONE *admittenda* (*Law*) a writ lying against a bishop who holds an excommunicated person in prison for contempt.

CA'UTIONER (*Law*) a person in the Scotch law who becomes bound for another to the performance of any deed or obligation.

CA'VY (*Com.*) vide *Caviar*.

CA'WK-STONE (*Min.*) a kind of mineral, akin to the white milky mineral juice of lead-mines.

CA'W'KING time (*Falcon.*) the pairing time of hawks.

CA'XA (*Com.*) another name for *Cask*.

CA'YA (*Law*) a key or water-lock.

CAYA'GIUM (*Law*) a toll or duty paid at keys or wharfs upon the landing of goods.

CAY'ENNITES (*Ecc.*) vide *Cainites*.

CAY'ENNE (*Bot.*) or *Cayenne Pepper*, a powder prepared from several species of the *capsicum*, but particularly the *capsicum minimum*, or Bird Pepper, which is the hottest of all. In this state it was originally imported from Cayenne, a town on the coast of Guayana, from which it took its names. It is now brought from both the Indies, and sometimes the pods are imported in an unprepared state.

CAYMA'RES (*Zool.*) the West Indian crocodile or alligator.

CAYUTA'NA *luzonis* (*Bot.*) another name for the *Fagara Major*.

CAZA'BI (*Bot.*) the same as *Cassada*.

CA'ZEMATE (*Fort.*) vide *Casemate*.

CA'ZERN (*Fort.*) vide *Casern*.

CA'ZIMI (*Astrol.*) the centre of the sun. A planet is said to be in *cazimi* when it is not above 70 degrees distant from the body of the sun.

CEANO'THOS (*Bot.*) the same as the *Carduus*.

CEANO'THUS (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* one-leaved; *border* five-parted.—COR. *petals* five.—STAM. *filaments* five; *anthers* roundish.—PIST. *germ* superior; *style* cylindrical; *stigma* obtuse.—PER. *berry* dry; *seeds* solitary.

Species. The species are shrubs, as—*Ceanothus americanus*, *Celastrus*, seu *Evonymus*, &c. American *Ceanothus*, or New Jersey tea, native of Virginia.—*Ceanothus macrocarpus*, native of New Spain.—*Ceanothus asiaticus*, seu *Grossularia*, Asiatic *Ceanothus*, a shrub, native of Ceylon.—*Ceanothus africanus*, seu *Celastrus*, seu *Riccinides*, &c. native of Æthiopia.—*Ceanothus capsularis*, native of Otaheite.—*Ceanothus microphyllus*, small-leaved *Ceanothus*, native of North America.—*Ceanothus laniger*, woolly *Ceanothus*, native of New Holland.—*Ceanothus nitidus*, glossy *Ceanothus*, native of New Holland.—*Ceanothus globulosus*, Round-headed *Ceanothus*, native of New Holland.—*Ceanothus reclinatus*,

CED

- seu *Rhamnus*, native of Jamaica.—*Ceanothus circumscissus*, seu *Rhamnus circumscissus*, native of the East Indies.
- CEA'PEGILDE (*Archæol.*) from the Saxon ceap, cattle, and gild, a yielding; a yielding of cattle.
- CE'BELL (*Mus.*) a species of air which was frequent in the time of Charles II.
- CEBI *Gallinæ* (*Cook.*) the broiled liver of a hen. *Castell. Lex Med.*
- CEBIPI'RA *Brasiliensibus* (*Bot.*) a tree growing in Brazil, the bark of which is bitter and astringent.
- CE'BRIS (*Ent.*) a division of the genus *Cryptocephalus* of Linnæus, having the lip entire, and palpigerous at the tip.
- CEBUS (*Zool.*) a sort of monkey.
- CE/CIS (*Bot.*) κκίς, from κκίω, to spring, because it springs suddenly from the oak. A gall of the oak.
- C. CLIFF (*Mus.*) is so called because it gives to the two notes on the same line with itself, the letter C standing for their local name.
- CECRO'PIA (*Bot.*) a genus of plants, Class 22 *Dioecia*, Order 2 *Diandria*.
Generic Characters. CAL. spathe ovate.—COR. none, unless the scales be called nectaries.—STAM. filaments two; anthers oblong.—PIST. germs many; styles solitary; stigmas lacerated.—PER. berry one-celled; seed oblong.
Species. The species are shrubs, as the—*Cecropia peltata*, seu *Coilotapalus*, *Ficus*, *Yaruma*, &c. seu *Ambaiba*, &c. Trumpet-tree, or Snake-wood, native of Jamaica.—*Cecropia palmata*, seu *Ambayba*, native of Brazil.—*Cecropia concolor*, native of Brazil.
- CECRÝPHALOS (*Anat.*) κερυφαλος, from κρύπτω, to hide, signifies properly a net in which women confined their hair; but it is applied to one of the stomachs of ruminating animals.
- CED'AR (*Bot.*) a well-known evergreen of Mount Libanus, the *Pinus cedrus* of Linnæus. It is very like the juniper in its appearance, as also in its heating and astringent quality. The timber of the cedar is said never to decay; for which reason it is used in the building of ships and roofs. It also produces an oil or juice, with which books were anointed to preserve them from being worm-eaten; whence the *Carmina cedro linenda* of Horace, and *cedro digna* of Persius, for things worthy of immortality. There are other trees bearing this name, as—Barbadoes Cedar, the *Cedrela odorata*.—Bermudas Cedar, the *Juniperus Bermudiana*.—Carolina Cedar, the *Juniperus Virginiana*.—Jamaica Cedar, the *Abroma*.—Lycian and Phœnician Cedar, the *Juniperus Lycia et Phœnicia*.—White Cedar, the *Cupressus thyoides*.
- CED'ILLA (*Gram.*) a mark thus (ç) which is put under the French ç, to give it the sound of s.
- CE'DMA (*Med.*) from κεδάω, to disperse; the same as *Pudendagra*.
- CE'DMATA (*Med.*) κεδματα, inveterate defluxions of humours on the joints, especially that at the hip.
- CE'DRA *essentia de* (*Nat.*) the same as *Bergamotte*.
- CEDRA'TUS (*Ant.*) cedrated; i. e. anointed with the oil of cedar trees.
- CEDRE'LA (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.
Generic Characters. CAL. perianth monophyllous.—COR. funnel-form; tube bellied below; petals obtuse.—STAM. filaments five; anthers oblong.—PIST. receptacle proper, five-cornered; germ globular; style cylindrical; stigma headed.—PER. capsule superior; seeds numerous; receptacle woody.
Species. The only species is—*Cedrela odorata*, seu *Barbadensium*, Barbadoes Bastard Cedar, a shrub, native of South America.
- CEDRELA is also the *Sweetenia* of Linnæus.

CEI

- CEDRELATE (*Bot.*) according to Bellonius, from κέδρος, the Cedar, and ἰλάτη, the Fir-Tree; a species of cedar which is said to exceed all other trees in size. *Plin.* l. 24, c. 5.
- CE'DRIA (*Bot.*) κεδρία, from κέδρος, the pitch and resin of the great cedar tree. *Dioscor.* l. 1, c. 105; *Plin.* l. 24, c. 5; *Schol. in Nicand. Theriac.*
- CEDRINUM (*Chem.*) a name for the composition of wax and resin used for ships.
- CEDRINUM vinum (*Med.*) κεδρινος ἔνος, Cedar wine. It is heating, diuretic, and gently astringent. *Dioscor.* l. 5, c. 45.
- CE'DRIS (*Bot.*) κεδρίς, the fruit of the great cedar, which, according to Dioscorides, is heating and prejudicial to the stomach. *Dioscor.* l. 2, c. 105; *Plin.* l. 24, c. 5.
- CEDRITES (*Bot.*) κεδρίτης, a wine in which the resin, distilled from cedar trees, has been steeped. *Dioscor.* l. 5, c. 47.
- CE'DRIUM (*Bot.*) κεδριον, the pitch and resin of the great cedar tree with which books and other things were anointed, to preserve them from moths, worms, and rotteness. Bodies were also embalmed in Egypt with this juice. *Theoph. Hist. Plant.* l. 4, c. 2; *Vitruv.* l. 2, c. 9; *Plin.* l. 16, c. 11.
- CE'DRO (*Bot.*) the Citron-tree.
- CEDROMELA (*Bot.*) the fruit of the Citron-tree.
- CEDRONE'LLA (*Bot.*) the *Dracocephalum Canariense* of Linnæus.
- CEDRO'STIS (*Bot.*) from κέδρος, because it smells like cedar; the *Bigonia alba* of Linnæus. *Plin.* l. 23, c. 1.
- CEDRO'TA (*Bot.*) a genus of plants, Class 8 *Octandria*, Order 1 *Monogynia*.
Generic Characters. CAL. perianth one-leaved; parts ovate.—COR. none.—STAM. filaments eight; anthers roundish.—PIST. germ superior; style short; stigma obtuse.
Species. The two species are the—*Cedrota longifolia*, seu *Aniba*, &c. a shrub, native of Guiana.—*Cedrota guianensis*, seu *Aniba*, &c. a tree, native of Guiana.
- CE'DRUS (*Bot.*) κέδρος, the Cedar-tree; so called from *Kedron*, a valley, where it grew in great abundance. It is the *Pinus cedrus* of Linnæus. This tree is remarkable for the durability of its wood, and the oil or resin which it yields, called *cedria* or *cedrium*. [vide *Cedar*, *Cedria*, and *Cedrium*] It is also the *Cedrela odorata*.—*Cedrus cupressus*, the *Juniperus Lycia*.—*Cedrus Americana*, the same as *Tha*.—*Cedrus baccifera Sabina*, the *Juniperus Sabina*.
- CE'DUE (*Chem.*) the air.
- CE'DUOUS (*Bot.*) from *cedo*, to cut or lop trees; an epithet applied to trees which used to be cut or lopped.
- CEGINUS (*Astron.*) a name sometimes given to a star, in the left shoulder of Boötes, which is marked γ by Bayer.
- CEIBA (*Bot.*) the same as the *Bombax*.
- CEILING (*Mar.*) in French *vaigres* or *vaigrage*, the inside planks of ships.
- CEILING (*Archit.*) from *cælum*, the sky; the inside of the roof or top of an apartment, in distinction from the surface of a floor. Ceilings are either flat or coved.—*Flat ceilings* are adorned with large compartments, foliages, or figures, which are formed by raising mouldings on the surface, or by depressing the panels within a moulded inclosure. The compartments in octagon ceilings are called *coffers*, and the mode of making such compartments is called *coffering*.—*Coved ceilings* are sometimes concave round the margin, and flat in the middle, or otherwise they are vaulted. When a ceiling is made on the under side of the rafters of a roof, it is said to be *camp-ceiled*.
- CEILING (*Carpent.*) a term denoting the lath and plaster at the top of a room, or on the under side of common or ceiling joists; also the joisting, ribbing, or bracketting, for supporting the lath and plaster of the upper surface or ceiling of a room.—*Ceiling-floor*, the joisting and ceiling supported by the beams of the roof.—*Ceiling-joists*, small

beams, which are either mortised into the sides of the binding joists, with pulley mortises, or notched upon, and nailed up to, the under sides of the joists.

CEINTRE (*Archit.*) French for a wooden arch to build vaults on.

CEINTURE (*Archit.*) French for the ring or circle which goes round the top or base of a column.

CEINTURE militaire (*Mil.*) French for a broad leathern belt worn round the waist.

CEIRIÆ (*Med.*) *κηρίαι*, flat worms.

CELANDINE (*Bot.*) a perennial, the *Chelidonium* of Linnaeus.

CELA'RENT (*Log.*) a syllogism, in the first figure, having the second proposition a universal affirmative, and the other two universal negatives, as

C e No animals are devoid of sense.

L a All men are animals : ergo

R e NT No men are devoid of sense.

CELA'STRUS (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Characters. CAL. perianth one-leaved; *divisions* obtuse.—COR. petals five.—STAM. filaments five; *anthers* very small.—PIST. germ very small; *style* subulate; *stigma* obtuse.—PER. capsule coloured; *seeds* few.

Species. The species are shrubs, as the—*Celastrus filiformis*, seu *inermis*, &c. Filiform Branch Staff Tree, native of the Cape of Good Hope.—*Celastrus scandens*, seu *inermis*, &c. seu *punctatus*, &c. seu *Evonymoides*, &c. seu *Frutex*, Climbing Staff Tree, native of Canada. *Celastrus paniculatus*, seu *inermis*, &c. native of the East Indies.—*Celastrus procumbens*, &c. Procumbent Staff Tree, a shrub, native of the Cape of Good Hope.—*Celastrus acuminatus*, &c. Acuminate-leaved Staff Tree, native of the Cape of Good Hope.—*Celastrus cassioides*, &c. Crenated Staff Tree, native of the Canaries.—*Celastrus striatus*, native of Japan.—*Celastrus cernuus*, native of the Cape of Good Hope.—*Celastrus undatus*, native of the Cape of Good Hope.—*Celastrus edulis*, seu *Catha edulis*, native of Arabia Felix.—*Celastrus crenatus*, &c. Notch-leaved Staff Tree, native of the Marqueses islands.—*Celastrus dilatatus*, seu *Evonymoides*, &c. native of Japan.—*Celastrus myrtifolius*, &c. Myrtle-leaved Staff Tree, native of Virginia.—*Celastrus Maytenus*, seu *Maytenus*, &c. native of Chili.—*Celastrus alatus*, Wing-branched Staff Tree, native of Japan.—*Celastrus linearis*, seu *spinousus*, &c. Linear-leaved Staff Tree, native of the Cape of Good Hope.—*Celastrus integrifolius*, seu *spinousus*, &c. Entire-leaved Staff Tree, native of the Cape of Good Hope.—*Celastrus emarginatus*, seu *Kattanchi Mullu*, native of the East Indies.—*Celastrus phyllacanthus*, &c. native of Senegal.—*Celastrus buxifolius*, seu *Lycium*, Box-leaved Staff Tree, native of Æthiopia.—*Celastrus pyracanthus*, seu *Lycium*, &c. native of Æthiopia.—*Celastrus lucidus*, seu *Evonymus*, Shining Staff Tree, or Small Hottentot Cherry.—*Celastrus angustifolius*, Narrow-leaved Staff Tree, native of the Isle of Bourbon.

CELASTRUS is also the *Cassine Capensis*.

CELATURE (*Mech.*) the art of engraving or cutting in metals.

CELA'TUS *air* (*Chem.*) air stagnating in wells or close buildings, neither warmed by the sun, nor agitated by the wind.

CELDRA (*Com.*) a measure among the Scotch, called by them a chaldor; whence our chaldron of Scotch or Newcastle coals.

CE'LE (*Med.*) *κέλη*, from *κελέω*, to swell out; a hernia or rupture of any kind.

CELERES (*Ant.*) a body of 300 men, chosen by Romulus

to defend him and execute his commands; they were so called from their quickness of dispatch, from *κέλης*, a horseman, or from *Celer*, the slayer of Remus. *Dionys. Antiq.* l. 2; *Fest. de Verb. Signif.*; *Serv. in Æn.* l. 9, v. 370; *Sigon. de Antiq. Jur. Civ. Roman.* l. 2, c. 3; *Pauwin. de Civit. Roman.* c. 3; *Ursat. de Not. Rom. apud Græv. The-saur. Antiq.* tom. xi, p. 601.

CELERI (*Bot.*) or *celery*, the *Æpium dulce*.

CELERIAC (*Bot.*) or turnip rooted *celery*, a species of parsley.

CELERRIMI *descensus linea* (*Math.*) the curve of swiftest descent of a natural body.

CELE'RITY (*Phy.*) an affection of motion by which any moveable body runs through a given space in a given time.

CELE'STIAL (*Astron.*) an epithet for what appertains to the heavens, as the *celestial* sphere, the *celestial* globe, and the like.

CELESTINE (*Min.*) a species of the Strontian salts.

CELESTINES (*Ecc.*) an order of monks, founded by one Peter, a Samnite, who was afterwards pope, by the name of Celestin V.

CELEUS'MA (*Ant.*) *κέλευσμα*, a shout of encouragement, which mariners make to one another whilst they are engaged in any work, similar to "Ho up," and such like words, used among sailors in modern times. *Mart.* l. 4, ep. 64, v. 21.

Quem nec rumpere nauticum celeusma.

Serv. in Æn. l. 8; *Gloss. Cyrill.*; *Gyrald. de Navig.* c. 16; *Bud. in Pandect.* p. 106; *Scheff. de Mil. Nav.* l. 3, c. 1.

CELE'USTES (*Ant.*) he who shouted the *celeusma* to the mariners. [vide *Celeusma*]

CEL'IA (*Ant.*) a kind of ale formerly made in Spain. *Plin.* l. 22, c. 25.

CEL'LIAC (*Med.*) vide *Cœliac*.

CELIBA'RIS *hasta* (*Ant.*) a spear with which new married women had their hair trussed up. *Fest. de Verb. Signific.*

CEL'COLI (*Ecc.*) vagabonds condemned by the Emperor Honorius, as heathens and heretics, A. D. 408. *Baron. Annal.* 408.

CELIDO'GRAPHY (*Astron.*) a description of the spots in the sun.

CEL'FOLI (*Bot.*) the same as *Cœlifolium*.

CEL'IS (*Med.*) *κέλης*, a spot or any mark upon the skin.

CEL'LA (*Archit.*) in Latin *cella*, from *celo*, to conceal; signifies generally any place in which things, *celantur*, may be concealed or kept apart. It is particularly applied to the smaller and more private apartments of a prison, or those of a monastery.

CEL'LA (*Ant.*) 1. A cellar or storehouse in which things were laid up; as *cella vinaria*, a wine-vault or cellar; *cella pomaria*, an apple loft; *cella promptuaria*, a pantry; *cella pennaria*, a garner or storehouse. *Plaut. Amph.* act 1, scen. 1; *Cato de Re Rust.* c. 13; *Vitruv.* l. 1, c. 4; *Columnel.* l. 1, c. 6; *Pallad.* l. 1, c. 2; *Tertull. de Resurrect.* c. 27. 2. The chamber underground where the slaves or domestics slept. *Cicer. Anton.* 2, c. 27; *Varr. de Re Rustic.* l. 1, c. 13; *Vitruv.* l. 6, c. 10; *Senec. de Tranquill.* c. 8; *Plin.* l. 36, c. 2; *Suet. in Cal.* c. 57, &c. 3. A private chapel in a temple, or what is now called the chancel of a church, as the *cella Jovis.* *Liv.* l. 36, c. 41; *Val. Max.* l. 8, c. 15; *Aul. Gell.* l. 7, c. 1. 4. A private apartment in a bath, which was distinguished as the *balneum*, into *caldaria*, *frigidaria*, and *tepidaria.* 5. A stew or brothel, the doors of which were marked with the name of the prostitutes, whence it is called by Martial *inscripta cella.* *Juven. sat.* 6, v. 121; *Mart.* l. 11, ep. 46.

CELLS (*Bot.*) *Loculamenta*, the partitions or hollow places in the pericarp, i. e. in the husk or pod of plants, in which

the seeds are lodged. According to the number of these cells perianths are called *one-celled*, *two-celled*, &c.

CELLS (*Anat.*) little bags or bladders, where fat and fluids of different sorts are lodged.

CELLS (*Nat.*) the little compartments in honeycombs, where the young bees and honey are disposed.

CELLARIUS (*Ant.*) a slave who acted as butler.

CELLARIUS (*Archæol.*) the butler or cellarman in a monastery.

CELLEPORA (*Con.*) a genus of animals, Class *Vermes*, Order *Zoophyl.*

Generic Characters. *Animal* an hydra or polype.—*Coral* somewhat membranaceous, composed of cells.

Species. The principal species are the—*Cellepora pumicosa*, *annulata spongites*, &c.

CELLERARIUS (*Archæol.*) the butler in a monastery.

CELLULÆ adiposæ (*Anat.*) the *loculi*, or little cells, which contain the fat of bodies in good habit.—*Cellulæ intestini coli*, cavities in the intestines.—*Cellulæ mastoideæ*, very irregular cavities in the substance of the mastoid apophysis, which communicate with each other, and have a common opening towards the inside.

CELLULO'SA membrana (*Anat.*) the cellular membrane; a membrane of the greatest extent, and of the utmost importance in the human structure, since it connects and penetrates into almost every part. It is of a vascular texture, and forms innumerable cells, in which the fat is lodged.—*Cellulosa tunica Ruyschii*, the external or the first coat of the intestines.

CELO'SIA (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Characters. *CAL.* perianth three-leaved; leaflets lanceolate.—*COR.* petals five; nectary very small.—*STAM.* filaments five; anthers versatile.—*PIST.* germ globular; style subulate; stigma simple.—*PER.* capsule globular; seeds few.

Species. The species are mostly annuals, as the—*Celosia argentea*, *Amaranthus*, seu *Sfera*, Silvery-spiked Celosia, native of China.—*Celosia albida*, &c. seu *pyramidalis*, native of the East Indies.—*Celosia margaritacea*, &c. *Amaranthus*, &c. seu *Belutta*, &c. native of Malabar.—*Celosia cristata*, seu *Amaranthus*, &c. Crested Amaranth, or Cock's-comb, native of Asia.—*Celosia nitida*, seu *Amaranthus*, &c. native of the West Indies.—*Celosia coccinea*, seu *Amaranthus*, &c. Scarlet Celosia, or Chinese Cock's-comb, native of India.—*Celosia castrensis*, seu *Amaranthus*, &c. Branched Celosia, or Cock's-comb, native of India.—*Celosia konsonica*, *Illecebrum*, seu *Amaranthoides*, &c. Downy Celosia, native of the East Indies. But the following are perennials or shrubs:—*Celosia corymbosa*, &c. seu *Paronychia*, &c. native of the East Indies.—*Celosia caudata*, seu *Achyranthes*, &c. native of Arabia Felix.—*Celosia virgata*, seu *fruticosa*, a shrub.—*Celosia polygonoides*, &c. a perennial, native of Malabar.

CELOTO'MIA (*Bot.*) from *κηλὴν*, a rupture, and *τέμνω*, to cut; the operation for a hernia.

CELSA (*Alch.*) the beating of the life, or the life's blood.

CELSIA (*Bot.*) a genus of plants, Class 14 *Didynamia*, Order 2 *Angiospermia*.

Generic Characters. *CAL.* perianth five-parted; divisions lanceolate.—*COR.* monopetalous; tube extremely short; border flat; divisions roundish.—*STAM.* filaments four; anthers roundish.—*PIST.* germ roundish; style filiform; stigma obtuse.—*PER.* capsule roundish; seeds very many; receptacles solitary.

Species. The species are as follow; namely—*Celsia orientalis*, *Verbascum*, seu *Blattaria*, &c. Oriental Celsia, an annual, native of Cappadocia.—*Celsia Arcturus*, seu *Verbascum*, &c. Scollop-leaved Celsia, a biennial, native of Crete.—*Celsia coromandelina*, an annual, native of

the East Indies.—*Celsia cretica*, seu *Blattaria*, &c. Great-flowered Celsia, a biennial, native of Crete.—*Celsia betonicifolia*, seu *Blattaria*, &c. a biennial, native of Algiers.—*Celsia capensis*, Cape Celsia, a biennial, native of the Cape of Good Hope.

CELTIS (*Bot.*) a tall African tree, resembling a lotus, and bearing a fruit the size of a bean. *Plin.* l. 13, c. 17.

CELTIS, in the *Linnean system*, a genus of plants, Class 23 *Polygamia*, Order 1 *Monoecia*.

Generic Characters. *CAL.* perianth one-leaved; divisions ovate.—*COR.* none.—*STAM.* filaments five; anthers oblong.—*PIST.* germ ovate; styles two; stigmas simple.—*PER.* drupe globular; seed nut roundish.

Species. The species are shrubs, as—*Celtis australis*, seu *lotus*, &c. European Nettle Tree, native of Europe.—*Celtis Tournefortii*, seu *orientalis*, &c. native of Armenia.—*Celtis occidentalis*, &c. seu *Lotus*, &c. American Nettle Tree.—*Celtis orientalis*, *Ulmus*, *Sabvifolia*, *Mallam*, seu *Papyrus*, &c. Oriental Nettle Tree, native of the East Indies.—*Celtis micrantha*, *Rhamnus*, &c. seu *Muntingia*, Jamaica Nettle, native of Jamaica.—*Celtis Lima*, seu *Muntingia*, &c. native of the West Indies.

CEMBALÒ (*Mus.*) or *Cemb*, Italian for a harpsichord.

CE'MBRA (*Bot.*) the *Pinus cembra* of Linnæus.

CEMENT (*Mech.*) *cementum*, a compound of pitch, brick-dust, plaster of Paris, &c. used by chasers and other artificers, to be laid under their work, to make it lie firm for receiving the impressions of their punches.—*Royal cement*, a particular manner of purifying gold, by laying over it beds of hard paste, consisting of sal ammoniac, common salt, potters' earth, and brickdust, well moistened with urine.—*Calcareous cement*, any kind of mortar made of lime, sand, fresh water, &c. which is used in buildings. When this is made so as to be impervious to the water, it is called a *water cement*.

CEMENT Copper (*Chem.*) the copper procured from the sulphate by precipitation with iron.

CEMENTATION (*Chem.*) a mode of making steel. [vide *Chemistry*]

CEMENTS (*Chem.*) or *lutes*, are substances or compositions prepared in various manners, to repair flaws and cracks in vessels.

CE'METERY (*Ecc.*) a repository for the dead.

CE'MOS (*Bot.*) *κημῶς*, a kind of herb; the same as the *Leontopodium*. *Plin.* l. 27, c. 8.

CENCHRA'MIDES (*Bot.*) a tree, the fruit of which resembles millet. *Plin.* l. 15, c. 19.

CENCHRA'MIS (*Bot.*) *κεγχραμίς*, a grain or seed of the millet.

CENCHRIAS (*Zool.*) *κεγχριας*, *cenc'iris* or *cenchrites*, from *κεγχρος*, millet, which it resembles; an animal of the serpent kind: according to Ælian it is at the most a cubit in length, and the bite of it is instant death. *Plin.* l. 20, c. 2; *Aet. Tetrab.* 4, serm. 1, c. 25, &c.; *Paul. Æginet.* l. 5, c. 16.

CENCHRIAS (*Med.*) *κεγχρος*, millet; a spreading inflammation, resembling millet; also called shingles or wild fire.

CENCHRIS (*Orn.*) a *kastrel* or *stannel*; a kind of speckled hawk. *Plin.* l. 10, c. 52.

CENCHRIS (*Zool.*) a green snake; the *Boa cenchris* of Linnæus.

CENCHRITES (*Zool.*) or *Acontius*, vide *Cenchrias*.

CENCHRITIS (*Min.*) a precious stone with specks, resembling millet seeds.

CENCHRUS (*Bot.*) a genus of plants, Class 23 *Polygamia*, Order 1 *Monoecia*.

Generic Characters. *CAL.* involucre many; perianth a bivalve glume.—*COR.* one male, the other hermaphrodite; proper each bivalve.—*STAM.* to each three filaments; anthers sagitate.—*PIST.* germ roundish; style filiform; stigmas two.—*PER.* none; seed roundish.

Species. The species are mostly annuals; namely, the—

Cenchrus lappaceus, Bur Cenchrus, native of India.—*Cenchrus capitatus*, seu *Gramen*, &c. Oval-spiked Cenchrus, native of Gaul.—*Cenchrus echinatus*, *Elymus*, seu *Panicastrella*, &c. seu *Gramen*, &c. Rough-spiked Cenchrus, native of Jamaica.—*Cenchrus tribuloides*, *Panicastrella*, &c. seu *Gramen*, native of Virginia.—*Cenchrus ciliaris*, Ciliated Cenchrus, native of the Cape of Good Hope.—*Cenchrus hordeiformis*, seu *Alopecurus*, &c. native of the Cape of Good Hope.—*Cenchrus purpurascens*, seu *Panicum*, &c. native of Japan. But the —*Cenchrus frutescens*, &c. *Arundo*, &c. seu *Gramen*, &c. is a shrub, and native of Armenia.

CENDULÆ (*Archæol.*) small pieces of wood laid in the form of tiles, to cover the roof of a house. *Pat.* 4, *Hen.* 3, p. 210.

CENEA'NGIA (*Med.*) κενεαγγίη, from κενός, empty, and ἄγγος, a vessel; any evacuation or inanition of the vessels, from whatever cause, open or occult.

CENEBRIA (*Med.*) κενέβριζα, Carrion; an epithet for the flesh of animals which die of themselves.

CENEGILD (*Archæol.*) an expiatory mulct paid to the kindred of the deceased.

CENELLA (*Ant.*) acorns from the oak.

CEN'EONES (*Anat.*) κενέωνες, from κενός, empty the flanks.

CENEFICA'TUM (*Chem.*) or Cinificatum, Calcined.

CENIGDAM (*Surg.*) *Cenigplam*, *Cenigotam*, and *Cenigopolam*; an instrument anciently used for opening the head in epilepsies.

CENIGOTAM (*Surg.*) vide *Cenigdam*.

CENIOTE'MIUM (*Med.*) a purging medicine affecting the venereal disorder, which is supposed to be mercurial.

CENIPLAM (*Surg.*) vide *Cenigdam*.

CENIPOLAM (*Surg.*) vide *Cenigdam*.

CENNINGA (*Archæol.*) notice given by the buyerto the seller that the thing sold was claimed by another, that he might appear and justify the sale. *Athelst. apud Brompt.* c. 4.

CENO'MUNI (*Hist.*) an ancient people of the Celtic Gaul.

CENO'SIS (*Med.*) from κενός, empty, a general evacuation; in distinction from καθαρσις, or the evacuation of some particular humour.

CENOTA'PHIUM (*Ant.*) κενοτάφιον, from κενός, empty, and τάφος, sepulchre, a cenotaph; an empty tomb, erected in honour of the dead: called by Ovid "Tumulus sine corpore;" by Suetonius, "Funus imaginarium." *Ovid. Met.* l. 11, v. 429.

Et scæpe in tumulis sine corpore nomina legi.

Virgil calls it *tumulus inanis*. *Æn.* l. 3, v. 304.

*Hectoreum ad tumulum, viridî quem cespite inanem,
Et geminas causam lacrimis sacraverat aras.*

Callimachus calls it κενέον σάμμα, epig. 2.

— Εἰς ἄλλ' πρὸ φέρεται νέκυς, ὡτὶ δ' ἐκείνη
Οὐνομα καὶ κενέον σάμμα παρερχόμεθα.

Suetonius also calls it *tumulus honorarius*, and Lycophron κενήριζα.

Lyc. Cassand.

— ὧς φθιτῶν θεμις
'Ἄλλ' ἔνομ' οὐκ ἄνδρ' καὶ κενήριζον ἡράφας.

Xenophon. Exped. Cyr. l. 6; *Sucton. in Claud.* c. 1; *Val. Flacc.* l. 5; *Pausan. in Corinth.*; *Stat. Thebaid.* l. 12, v. 160; *Isidor. Orig.* l. 15, c. 11; *Meurs. ad Lycophron.*; *Kirchmann, de Funer.* l. 3, c. 27; *Diogen. Laert.* l. 1; *Sym.* 97; *Suidas.*

CENSAL (*Com.*) on the coast of Provence, and in the ports of the Levant, signifies the same as a broker.

CENSA'RIA (*Archæol.*) from the French *cense*, a farm; a farm, or house and land, let, *ad censum*, at a standing rent.

CENSA'RII (*Archæol.*) Farmers.

CENSE (*Archæol.*) public rates.

CENSER (*Ecc.*) a vessel to burn incense in.

CENSIO (*Ant.*) a censure or punishment by the censor.

CENSITOR (*Ant.*) an assessor or surveyor of lands.

CENSOR'ES (*Ant.*) Roman magistrates, of whom there were two, whose office it was to take account of families, to rate men's estate, and to punish misdemeanors and acts of immorality. This they did by turning senators out of the senate, and degrading knights and citizens, which was called "Senatu et Tribu movere." Censors were created U. C. 310, at first from the patricians only, afterwards from both patricians and plebeians. *Dionys. Antiq.* l. 4; *Cic. de Leg.* l. 3, c. 3, &c. and *Ascon. Ped. in Cic.*; *Varr. de Lat. Lin.* l. 5, c. 7; *Liv.* l. 4, c. 8; *Aul. Gell.* l. 4, c. 20; *Zonar. Annal.* l. 7, c. 19.

CENSOR'IAE Tabulæ (*Ant.*) registers or records kept by the censors.

CENSUR'A (*Ant.*) the censorship, or office of censor; likewise a censure, or the exercise of the authority of a censor.

CENSURAL book (*Archæol.*) a register of taxations.

CENSURE (*Law*) from Lat. *census*, a custom observed in divers manors in Cornwall and Devon, where all persons residing therein, above the age of sixteen, are cited to swear fealty to the lord, and to pay 11*d.* per poll, and 1*d.* per ann. ever after. Those thus sworn are called *Censers*.

CENSURE (*Ecc.*) a spiritual punishment inflicted by some ecclesiastical judge in former times, particularly on heretics and schismatics.

CENSUS (*Ant.*) a declaration made before and registered by the Censors, containing an enumeration in writing, given by the several subjects of the Roman empire, of their respective names, places of abode, estates, quality, wives, children, domestics, tenants, slaves, &c. It was instituted and performed by Servius Tullius, and was held every five years by the censors after that office was appointed. The *Census* of the people at large was called simply *Census*; that of the *equites*, knights, *census, recensio, recognitio*; and that of *senatores*, senators, *lectio, and relectio*. The qualification of a knight was 400,000 sesterces, that of a senator 800,000. The people at large were divided into six classes; namely—The First Class comprehended those who were worth 100,000 sesterces, and consisted of eighty centuries, forty seniors, and as many juniors. The seniors included those who were fifty and upwards, who were appointed to guard the city; the juniors those from the age of seventeen to forty-five, who were employed in war. To these were assigned, as weapons of defence, the *galea*, helmet, *clypeus*, the shield, *ocrea*, the greave, *lorica*, the coat of mail, and every thing which was made of brass: their offensive arms were, *tela*, the javelin, *hasta*, the spear, and *gladius*, the sword. The Second Class comprehended those possessed of 75,000 sesterces, making twenty centuries, ten seniors, and ten juniors. They wore the *scutum* instead of the *clypeus*, but had every thing else the same except the *lorica*. The Third Class included those possessed of 50,000 sesterces, making also twenty centuries, ten seniors, and ten juniors, and having the same arms, except the greaves. The Fourth Class included those possessed of 25,000 sesterces, making twenty centuries, and having the same arms. The Fifth Class consisted of thirty centuries, who were assessed at 11,000 sesterces. They consisted of *accensi, tibicines*, and *cornices*, and carried slings for their arms. The Sixth Class comprehended all who were assessed below 11,000, and consequently exempt from taxation and military service. *Dionys.* l. 4; *Cic. pro Flacc.* c. 32; *Liv.* l. 1, c. 44, &c.; *Aul. Gell.* l. 7, c. 11; *Flor.* l. 1, c. 6; *Isidor. Orig.* l. 5, c. 36; *Sigon. de Antiq. Jur. Civ. Rom.* l. 1, c. 14; *Manut. de Civit. Roman. apud Græv. Thes. Antiq. Roman.* tom. 1, p. 37.

CENT (*Com.*) an abbreviation for *centum*, a hundred. 1. The profit or loss of so much on the hundred in the sale of any commodity; thus the expression "Ten per cent. gain or loss" signifies that the seller has gained or lost ten pounds on every hundred of the price at which he first bought the merchandise, which is one-tenth of profit or one-tenth of loss upon the total of the sale. To gain one hundred per cent. or *cent. per cent.* is the doubling of one's capital; to lose fifty per cent. is to lose one half of it. 2. *Cent.* is the benefit, profit, or interest, on any sum of money which is laid out for improvement: thus we say money is worth four or five per cent. upon exchange; that is, it brings four or five pounds profit for every hundred pounds laid or lent out. 3. *Cent.* is also used with regard to the draughts or remittances of money made from one place to another; thus we say, it will cost 2½ per cent. to remit money to such a city. 4. *Cent.* or *centime*, the hundredth part of any thing, particularly applied to the coin or money of account in America, which is the hundredth part of a dollar; and to the coins, weights, and measures which were introduced into France during the Revolution.

CENTAUR (*Astron.*) vide *Centaurus*.

CENTAUREA (*Bot.*) *κένταυρία, κένταυρίοι, κένταύριος*, Centaury; a herb so called from Chiron, the centaur, who was healed by it, is used externally in fomentations against swellings and inflammations. The juice, extract, or infusion of the leaves and roots, of some species are also said to cure intermittents. *Theoph. Hist.* l. 10, c. 1; *Dioscor.* l. 3, c. 8; *Plin.* l. 25, c. 6.

CENTAUREA, in the *Linnean system*, a genus of plants, Class 19 *Syngenesia*, Order 3 *Polygamia Frustanea*.

Generic Characters. CAL. common imbricate; scales often variously terminated.—COR. compound flosculous; corollules hermaphrodite; proper monopetalous; tube filiform; border ventricose.—STAM. filaments five; anthers cylindrical.—PIST. germ small; style filiform; stigma very obtuse.—PER. none; calyx unchanged; seeds solitary; receptacle bristly.

Species. The species are mostly annuals or perennials: of the first kind are the following—*Centaurea Crupina*, *Serratula*, &c. *Chondrilla*, &c. *Senecio*, &c. *Jacea*, seu *Cyanus*, Black seeded Centaury, Bearded Creeper, native of Switzerland, &c.—*Centaurea moschata*, seu *Cyanus*, &c. Purple Sweet Centaury, or Sweet Sultan, native of Greece.—*Centaurea suaveolens*, *Amberboi*, seu *Cyanus*, native of the East.—*Centaurea lippii*, Egyptian Centaury.—*Centaurea coronopifolia*, seu *Jacea*, a native of Ireland.—*Centaurea cyanus*, seu *Stoebe*, &c. Austrian Centaury, native of Switzerland.—*Centaurea benedicta*, *Cnicus*, seu *Carduus*, Blessed Thistle, native of Chios.—*Centaurea eriophora*, seu *Calcitrapa*, native of Portugal.—*Centaurea calcitrapa*, seu *Calcitrapa*, native of Switzerland.—*Centaurea crocodylium*, seu *Crocodylium*, native of Syria.—*Centaurea galactites*, native of the South of Europe.—*Centaurea napifolia*, Turnip-leaved Centaury, native of Archipelago. Of the second kind are the following, namely—*Centaurea crucifolia*, *Jacea*, *Amberboi*, seu *Stoebe*, &c.—*Centaurea centaurium*, seu *Centaurium*, &c. Great Centaury, native of Italy.—*Centaurea phrygia*, *Cyanus*, seu *Jacea*, &c. Austrian Centaury, native of Switzerland.—*Centaurea nigrescens*, &c. native of Hungary.—*Centaurea triumphetti*, seu *Cyanus*.—*Centaurea ochroleuca*, *Caucasica*, seu *Cyanus*, &c. native of Caucasus.—*Centaurea orientalis*, &c. seu *Theiantha*, Oriental Centaury, native of Siberia.—*Centaurea Behen*, *Rhaponticoides*, *Serratula*, seu *Behen*, &c. native of Asia Minor.—*Centaurea alba*, *Rhaponticum*, *Jacea*, seu *Stoebe*, &c. native of Spain.—*Centaurea Rhapontica*, *Centaurium*, seu *Rhaponticum*, &c. native of Switzerland.—*Centaurea babylonica*, *Serratula*, &c. seu *Rapon-*

ticoides, native of the East.—*Centaurea conifera*, *Jacea*, seu *Chamaelon*, &c. native of France.—*Centaurea sonchifolia*, native of the Mediterranean.—*Centaurea Isnardi*, seu *Calcitrapoides*, native of Europe.—*Centaurea sempervirens*, seu *Jacea*, &c. Evergreen Centaury, native of Spain.—*Centaurea scabiosa*, *Cyanus*, *Scabiosa*, &c. *Jacea*, &c.—Scabious Centaury, or Great Knapweed. But some are biennials, as—*Centaurea nigra*, Black Centaury, or Knapweed, native of England.—*Centaurea peregrina*, *Nicaensis*, &c.; and some shrubs, as—*Centaurea spinosa*, Prickly-branched Centaury, native of Crete.—*Centaurea hyssopifolia*, native of Spain, &c. *Clus. Hist. Plant. rar.*; *Bauh. Hist. Plant.*; *C. Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Bot.*; *Raii Hist.*; *Tournef. Inst.*; *Boerhaav. Ind.*; *Linn. Spec. Plant.*

CENTAUREA is also the *Cnicus uniflorus* of Linnæus.

CENTAUREUM (*Bot.*) or *Centaurium*, the *Chlora perfoliata*, and the *Chironia baccifera et frutescens* of Linnæus.

CENTAUROIDES (*Bot.*) the same as *Gratiola*.

CENTAURUS (*Astron.*) *Centaur*, one of the 48 old constellations in the southern hemisphere, represented in the form of half man and half horse, who was fabled by the Greeks to have been Chiron the tutor of Achilles. Ptolemy reckons in this constellation 37 stars, Kepler 52, Tycho 4, Bayer 40, and the Britannic Catalogue, &c. 35. *Ptol.* l. 7, c. 5; *Ricciol. Almag. Nov.* l. 6.

CENTEELLA (*Bot.*) the *Hydrocotyle villosa* of Linnæus.

CENTENAR (*Com.*) a foreign weight of 100, 112, 125, 128, 132, and 140 pounds weight.

CENTENARIUM (*Ant.*) centurions, who had the charge of single centuries. *Veget.* l. 2, c. 8.

CENTENARIUM (*Law*) petty judges, and under sheriffs of counties, that had rule of an hundred, and judged small matters.

CENTENARIUS (*Chron.*) centenary; an epithet for what belongs to a century or 100 years.

CENTER (*Math.*) vide *Centre*.

CENTE/SIMA (*Ant.*) a term signifying the 100th part of an integer, particularly interest of one in the hundred every month. *Cic. in Verr.* 3. c. 70; *Gronov. de Centes.*

CENTE/SIMALS (*Arith.*) the same as *Cents*. [vide *Centigrade*]

CENTICEPITOUS (*My.*) centiceps, from *centum*, a hundred, and *caput*, a head, an epithet for an animal having 100 heads.

CENTIFIDOUS (*Math.*) *centifidus*, from *centum* and *findo*, to split, an epithet for any thing divided into an 100 parts.

CENTIFOLIA (*Bot.*) a kind of rose in Campania having a hundred or many leaves. *Plin.* l. 21, c. 4.

CENTIGRADE (*Arith.*) the division of any thing into a hundred grades, or degrees, called *Centesimals*, *Centimes*, or *Cents*; thus money, weights, and measures, have been divided into cents, or hundredth parts; and the French have a centigrade thermometer, in which they divide the distance between the freezing and boiling points into 100.

CENTIGRANUM (*Bot.*) a kind of wheat having in every ear a hundred grains.

CENTIMORBIA (*Med.*) or *Centum-morbia*, from *centum*, a hundred, and *morbis*, a disease, an epithet for a medicine supposed capable of curing a great number of diseases. It is the same as the *Nunimularia*.

CENTINEL (*Mil.*) vide *Sentinel*.

CENTINE/RVIA (*Bot.*) from *centum*, and *nervia*, a string, an epithet for a plant having many nerves or ribs on its leaves: it is the *Plantago* of Linnæus.

CENTINODIA (*Bot.*) *Centum-nodia*, or *Centinodium*, *Centinody*, from *centum*, a hundred, and *nodus*, a knot; a herb so called from its having many knots and joints; the same as the *Polygonum* of Linnæus.

CENTIPEDA (*Ent.*) Centipede, a worm with many feet; a name given to the wood-louse. *Plin.* l. 18, c. 10.

CENTIPEDE (*Ent.*) from *centum*, and *pes*, a foot; the name of a well known insect with many feet that infests wood. It is vulgarly called a sow, from its resemblance in shape to the hog.

CENTIPELLIO (*Nat.*) the paunch of a stag.

CENTIPES (*Ich.*) a fish, otherwise called *scolopendra*, which when it has devoured a hook vomits it up again with its entrails, which it afterwards draws back again into its stomach. *Plin.* l. 9, c. 43.

CENTNAR (*Com.*) a weight at Lubeck, consisting of 8 lispards, or 28 pounds.

CENTO (*Ant.*) 1. A coverlet or rug made of various shreds. *Macrob. Sat.* 1, 5, c. 2. 2. Patched clothes, such as country fellows wore. *Colum. de Re Rust.* 3. A shroud or tarpaulin to keep off stones or darts from the soldiers in a siege. *Cæs. de Bell. Civ.* l. 2, c. 9. 4. A cover cast over ships, steeped first in vinegar, to keep them from taking fire. *Sisenn. Hist. apud Non.* l. 2, c. 177; *Veget.* l. 4, c. 15. 5. A mop, which was also steeped in vinegar, for the extinguishing of fire. *Ulp. leg.* 12; *Alex. Gen.* l. 5, c. 24.

CENTO (*Poet.*) a poem composed of several pieces selected from other authors.

CENTONARI (*Ant.*) Roman officers appointed to provide tents, and other military furniture, called *centones*, or to quench the fire kindled in the camp by the enemy. *Turneb. Adver.* l. 29, c. 16.

CENTRAL, an epithet for what belongs to the centre.

CENTRAL forces (*Phy.*) are forces which cause a moving body to tend towards or recede from the centre of motion, which are accordingly distinguished into two kinds; namely, centripetal and centrifugal.—*Centripetal force* is that by which a moving body is perpetually urged towards a centre, and made to revolve in a curve instead of a right line.—*Centrifugal force* is that force by which a body revolving about a centre, or about another body, endeavours to recede from it.

CENTRAL rule (*Geom.*) a rule for finding the centre of a circle.

CENTRAL fire (*Chem.*) that fire which chemists formerly imagined to be in the centre of the earth, the fumes and vapours of which made, as they supposed, the metals and minerals, and brought them to perfection.

CENTRALIS radix (*Bot.*) central root; that species of root where the shoot proceeds from the middle, as in *Galanthus nivalis*.

CENTRATIO (*Med.*) from *centrum*, a centre; the degenerating of a saline principle, contracting a corrosive and ulcerating quality.

CENTRE (*Geom.*) κέντρον, a point, from κεντρεύω, to prick; a point equally remote from the extremes of a line, surface, or solid.—*Centre of a circle, or sphere*, that point in the figure from which all lines drawn to the circumference are equal. [vide *Circle*]—*Centre of a conic section*, that point which bisects any diameter, or that point in which all the diameters intersect each other. This point in an ellipse is within the figure, but in the hyperbola without, and in the parabola at an infinite distance.—*Centre of a curve*, of the higher kind, is the point where two diameters concur; and when all the diameters concur in the same point it is called by Sir Isaac Newton the *general centre*.

CENTRE (*Physic.*) is of different kinds; namely—*Centre of attraction, or gravitation*, that point into which if all the matter of a body were collected, its action upon any remote particle would still be the same as it is while the body retains its own particular form. The *common centre of attraction* of two or more bodies is that point in which, if a particle of matter were placed, the action of each body upon it would be equal, and consequently it would remain

there in *equilibrio*.—*Centre of gravity* of any body, or system of bodies, is that point upon which the parts of the body or bodies do in any situation exactly balance each other. Hence, by means of this property, if the body be supported or suspended by this point, it will rest in any position in which it is put. The centre of gravity of a body is not always within the body itself: thus the centre of gravity of a ring is not in the substance of a ring, but in the axis of its circumscribing cylinder; and the centre of gravity of a hollow staff, or of a bone, is not in the matter of which it is constituted, but somewhere in its imaginary axis. All bodies, however, and systems of bodies, have a centre of gravity, in which the whole gravity, or the whole matter of each body, is conceived to be united. Through the centre of gravity passes a right line, called the *diameter of gravity*; and the intersection of two such diameters determines the centre of gravity. In homogeneous bodies, which may be divided lengthwise into similar and equal parts, the centre of gravity is the same as the *centre of magnitude*; hence, therefore, the centre of gravity of a line is that point which bisects the line; the centre of gravity of a parallelogram, cylinder, &c. is in the middle point of the axis. The position, distance, and motion of the centre of gravity of any body is a medium of the positions and distances of all the particles of the body; which property of this centre has induced some authors to give it the name of the *centre of mean distance*; others, that of the *centre of position, centre of inertia, &c.* This point is of the greatest use in mechanics, and in many of the ordinary concerns of life, because the place of the centre of gravity is to be considered as the place of the body itself in computing all mechanical effects.—*Common centre of gravity* of two or more bodies, or of the different parts of the same body, is that point which if it be suspended or supported, the parts of the body, or the bodies, will equiponderate, or rest in any position; thus the point of suspension in a common balance-beam, or steel-yard, is the common centre of gravity for the two parts into which it may be divided.—*Centre of equilibrium* is the same with respect to bodies immersed in a fluid as the centre of gravity is to bodies in free space, being a certain point, upon which if the body or bodies be suspended they will rest in any position.

CENTRE of motion (*Mech.*) is that point which remains at rest while all the points of a body move about it, which is the same as the centre of gravity in homogeneous bodies. The centre of motion of a ship is the point upon which a vessel *oscillates*, or rolls, when put in motion. The *velic centre, or the velic point*, is the centre of gravity of an equivalent sail, or that single sail whose position and magnitude are such as cause it to be acted upon by the wind when the vessel is sailing, so that the motion shall be the same as that which takes place while the sails have the same position.—*Centre of gyration*, that point in which if the whole mass be collected the same angular velocity will be generated in the same time by a given force acting at any place as in the body or system itself.—*Centre of oscillation*, that point in the axis, or line of suspension, of a vibrating body, or system of bodies, in which if the whole matter or weight be collected, the vibrations will still be performed in the same time, and with the same angular velocity, as before. This point differs from that of gyration, inasmuch as in this case the motion of the body is produced by the gravity of its own particles; but in the case of centre of gyration the body is put in motion by some other force acting at one place only.—*Centre of percussion*, that point where the percussion or stroke is the greatest, in which the whole percussive force of the body is supposed to be collected.—*Centre of pressure* of a fluid against a plane is that point against which a force, equal to the whole pres-

sure, but in a contrary direction to it, will keep the surface at rest; thus, on a plane parallel to the horizon, or on any plane where the pressure is uniform, the centre of pressure coincides with the centre of gravity of the plane.—*Centre of rotation*, that point about which a body, otherwise at liberty, revolves, or tends to revolve, when it is acted upon unequally at different points, or by a force the direction of which does not pass through its centre of gravity.—*Centre of spontaneous rotation* is that point which remains at rest the instant a body is struck, or about which the body begins to move: it was employed first by John Bernouilli to distinguish this centre from the centre of forced rotation.—*Centre of friction*, that point in the base of a body on which it revolves, into which, if the whole surface of the base and the mass of the body were collected and made to revolve about the centre of the base of the given body, the angular velocity destroyed by its friction would be equal to the angular velocity destroyed in the given body by its friction in the same time.—*Centre of conversion*, a term used, by Mr. Parent, in respect to a stick laid on stagnant waters, and then drawn by a thread fastened to it, so that the thread always makes the same angle with it; and, consequently, the stick will be found to turn about a certain point, which point is called the centre of conversion.—*Phonic centre* is a term sometimes used in acoustics for the place where the speaker stands in polysyllabical and articulate echoes.

CENTRE of equant (*Astron.*) a term, in the Old Astronomy, for a point in the line of the aphelion supposed to be as far distant from the centre of the eccentric, towards the aphelion, as the sun is from the centre of the eccentric towards the perihelion.

CENTRE (*Dial.*) that point where the gnomon or style, which is placed parallel to the axis of the earth, intersects the plane of the dial.

CENTRE (*Archit.*) a term used to denote a frame of timber constructed for the purpose of supporting the stones or bricks forming an arch or vault, during the erection.

CENTRE of a bastion (*Fort.*) a point in the middle of the gorge where the capital line commences, and which is usually at the angle of the inner polygon of the figure. This may otherwise be defined the point where the two adjacent curtains produced intersect each other.

CENTRE of a battalion (*Mil.*) in parade is the middle where an interval is left for the colours: in an encampment it is the main street; and on a march it is an interval for the baggage—*Centre of an attack*, the middle point in the front, which is taken before a besieged place, which is one of the three capitals upon which the lines of attack are carried.

CENTRE of a fleet (*Mar.*) in French *Centre, ou corps de bataille, d'une armée navale*, the station of the admiral or commander of a fleet.

CENTRE Phrenique (*Anat.*) the name of the fibres of the large muscles of the diaphragm.

CENTRIFUGAL (*Phy.*) vide *Central*.

CENTRIFUGAL machine (*Mech.*) a machine, so called because it is contrived so as to raise water by means of a centrifugal force combined with the pressure of the atmosphere.

CENTRIGRADE (*Arith.*) vide *Centigrade*.

CENTRINA (*Ich.*) a species of squalus.

CENTRING (*Carpent.*) or *centering*, the frame of timber by which the brick or stone work of arched vaulting is supported during its erection, and from which it receives its curved form.

CENTRING of an optic glass (*Mech.*) the grinding it so as that the thickest part be exactly in the middle.

CEN'TRION (*Med.*) *κεντριον*, from *κεντρώω*, to prick; an epithet for a plaster used by Galen against stitches in the side.

CENTRIPE/TAL (*Phy.*) an epithet for a sort of central force. [vide *Central*]

CENTRISCUS (*Ich.*) a genus of animals, Class *Pisces*, Order *Branchiostegosa*.

Generic Character. Head lengthened into a very narrow snout.—*Mouth* without teeth.—*Gills* broad flat.—*Body* compressed.—*Belly* carinate.—*Ventral-fins* united.

Species. The species are, *Centriscus scutatus, colopax, et valitarius*.

CENTRIUM (*Med.*) vide *Centrion*.

CENTROBARIC method (*Mech.*) a method of measuring or determining the quantity of any surface or solid by considering it as generated by motion, and multiplying the generating line or surface into the path of its centre of gravity, i. e. "Every figure, whether superficial or solid, generated by the motion of a line or surface, is equal to the product of the generating magnitude into the path of its centre of gravity." The word is derived from *centro-baryco*, i. e. the centre of weight or gravity. [vide *Centro-baryco*]

CENTRO-BARYCO (*Mech.*) from *κέντρον*, a centre, and *βάρυς*, another name for the centre of gravity.

CENTROGA'STER (*Ich.*) a genus of animals, Class *Pisces*, Order *Thoracica*.

Generic Character. Head compressed, smooth.—*Gill-membrane* mostly seven rayed.—*Body* depressed, smooth.—*Fins* spinous.—*Ventral-fin* connected by a membrane.

Species. The principal species are the *Centrogaster fuscescens, argentatus, equula, &c.*

CENTROPHAGIA (*Bot.*) Penny-royal.

CENTRUM (*Math.*) vide *Centre*.

CENTRUM (*Chem.*) the principal residuum formed, or source of any thing.

CENTRUM (*Bot.*) the herb *Clary*.

CENTRUM (*Med.*) that part of a medicine in which the greatest virtue resides.

CENTRUM (*Anat.*) the middle point in some parts of the body.—*Centrum nerveum*, the tendinous part of the diaphragm, which has a triangular appearance.—*Centrum ovale*, a part of the *corpus callosum*.

CEN'TRY (*Mar.*) or *Sentinel*, in French *Centinelle*, a private marine posted in some responsible part of the ship to prevent any surprize.

CEN'TRY (*Archit.*) a mould for an arch.

CEN'TRY-BOX (*Mil.*) a wooden hutch erected as a shelter for the centinel.

CENTUM Capita (*Bot.*) the same as *Eryngium*.

CENTUMVIRA'LIS (*Ant.*) an epithet for what belongs to the *Centumviri*; *Centumvirale Judicium*, a sentence in the court of the *Centumviri*; *Centumvirales causæ*, causes heard in the court of the *Centumviri*. *Cic. de Orat.* l. 1, c. 38; *Plin.* l. 6, ep. 33.

CENTUMVIRI (*Ant.*) judges chosen to hear certain causes among the people, three of whom were chosen out of every tribe. *Quintil.* l. 5, c. 10; *Flor. Epitom.* l. 18; *Fest. de Verb. Signif.*; *Hotoman. de Magistrat. Rom. apud Græv. Thes. Antiq. Rom.* tom. ii. p. 1816.

CENTUNCULARIS (*Bot.*) the same as *Centunculus*.

CENTUNCULUS (*Ant.*) 1. A patched coverlet or quilt to sleep on. 2. A horse-cloth laid under the dorsers. *Liv.* l. 7, c. 14.

CENTUNCULUS (*Bot.*) a genus of plants, Class 4 *Tetrandria*, Order 1 *Monogymia*.

Generic Characters. CAL. perianth four-cleft.—COR. Monopetalous; tube subglobular; border flat.—STAM. filaments four; anthers simple.—PIST. germ roundish; style filiform; stigma simple.—PER. capsule globular; seeds very many.

Species. The only species is the *Centunculus minimus, Anagallidiastrum, Anagallis, &c. seu Alsine, &c. Bastard Pimpernel*, an annual, native of Italy, &c.

CENTURIA (*Ant.*) a division of a hundred men, which constituted a part of the classes into which Servius disposed all the Roman citizens according to their property. [vide *Census*] The first class contained eighty centuries; the second, third, and fourth, twenty centuries; the fifth, thirty centuries; and the sixth, or last, but one century. At the election of Consuls, Censors, and Prætors, the people gave their votes by centuries; whence the assembly was called *comitia centuriata*; and that century which had the privilege of giving their votes before the rest was called the *centuria prærogativa*. By the first institution of Servius this privilege was attached to the *classici*, or those of the first class, but afterwards it was determined by lot to whom it should belong. *Cic. Brut.* c. 67, &c.; *Dionys.* l. 2; *Liv.* l. 1, c. 36; *Manut. de Comit. Rom.* c. 4. *Centuria* signifies also, 1. A band of a hundred men commanded by *εκατόταρχος*, a centurion. It was called *τάγμα* by Polybius, and, among the Roman writers, *ordo*. The *centuria* was the half of a manipulus, the sixth part of a cohort, and the sixtieth part of a legion, and consisted, according to Vegetius, of 110 men. *Polyb.* l. 6, c. 22; *Varr. de Ling. Lat.* l. 4, c. 16; *Dionys.* l. 10; *Liv.* l. 7; *Aul. Gell.* l. 16, c. 4; *Veget.* l. 2, c. 8, 13, 14, &c. 2. A measure of land consisting of a hundred acres. *Varr. de Re Rust.* l. 1, c. 10; *Colum.* l. 5, c. 1; *Pat. de Roman. et Græc. Mens.* l. 1; *apud Græv. Thes. Antiq. Roman.* l. 11, &c.

CENTURIO (*Ant.*) a captain of a band, or a hundred soldiers. The centurions stood each at the head of his century to lead them up, and the common soldiers were placed at his discretion. The badge of the centurion's office was the *vitis*, or rod of the vine, which he carried in his hand. The centurion, who was chosen from among the *Triarii* or *Pilani*, was the most honourable of all, and was denominated *centurio primipili* or *primipulus*. He had the command of four hundred men, and the charge of the standards. *Cæs. de Bell. Gall.* l. 6, c. 39; *Dionys.* l. 9; *Liv.* l. 7, c. 4; *Tacit. Annal.* l. 1, &c.; *Veget.* l. 2, 3; *Sigon. de Jur. Civ. Rom.* l. 1.

CENTURY (*Ant.*) vide *Centuria* & *Census*.

CENTURY (*Chron.*) a hundred years.

CENTUSSIS (*Ant.*) a rate of Roman money containing forty Sesterces, ten Denarii, i. e. about ten groats sterling, or a noble. *Varr. de Lat. Lin.* l. 5, c. 36; *Pers. sat.* 5, v. 191.

CEOLA (*Archæol.*) a large ship.

CEPA (*Bot.*) from *κεπός*, a wool-card, from the likeness of its roots; the Onion.

CEPA'CA (*Bot.*) a species of onion which used to be esteemed for salads in spring, but is now disregarded.

CEPA'STRUM (*Bot.*) another name for the *Allium sylvestre*, Cow-garlick; the *Cepa Ascalonica*, Eschalots, and the *Schænopressum*, Chives.

CEPHALÆA (*Med.*) vide *Cephalalgia*.

CEPHALALGIA (*Med.*) or *Cephalæa*, *κεφαλαλγία*, from *κεφαλή*, the head, and *ἄλγος*, pain; a head-ach: when mild, it is called *cephalalgia*; when inveterate, *cephalæa*. *Aret. de Caus. et Sign. Morb. Acut.* l. 1, c. 2.—*Cephalalgia catarrhalis*, another name for a species of catarrh.—*Cephalalgia spasmodica*, the Sick Head-Ach.—*Cephalalgia inflammatoria*, the same as *Phrenitis*.

CEPHALALGIA herba (*Bot.*) the same as *Verbena*.

CEPHALALGICA (*Med.*) *κεφαλαλγικά*, medicines for the head-ach.

CEPHALANTHUS (*Bot.*) a genus of plants, Class 4 *Tetrandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* common none; *perianth* proper one-leaved; *border* quadrifid.—COR. *universal* equal; *proper* monopetalous.—STAM. *filaments* four; *anthers* globose.—PIST. *germ* inferior; *style* longer

than the corolla; *stigma* globose.—PER. none; *seeds* solitary; *receptacles* common globular.

Species. The species are shrubs, as follow; namely, the *Cephalanthus occidentalis*, seu *Scabiosa*, &c. American Button Wood, native of North America.—*Cephalanthus montanus*, *stellatus*, &c.

CEPHALANTHUS is also the *Nauclea orientalis* of Linnæus.

CEPHALARTICA (*Med.*) from *κεφαλή*, the head, and *ἄρτιζω*, to make clear; medicines which purge the head.

CEPHALÆA juvenum (*Med.*) the head-ach that often attends youth at the approach of puberty, and affects the whole head. *Plin.* l. 20, c. 13.

CEPHALATIO (*Ant.*) a capitation, or poll-tax.

CEPHALIC (*Med.*) from *κεφαλή*, the head; an epithet for what appertains to the head.

CEPHALIC tincture (*Med.*) a nervous antispasmodic medicine, so called because it relieves the head.

CEPHALIC vein (*Anat.*) *vena cephalica*, the anterior vein of the arm, so called because the head was supposed to be relieved by opening it.—*Cephalic of the thumb*, vide *Cephalica*.

CEPHALIC line, the line of the head or brain in palmistry.

CEPHALIC powder (*Med.*) a powder prepared from the head.

CEPHALICA Pollicis (*Anat.*) a branch of the cephalic vein running along the lower extremity of the radius between the thumb and the metacarpus.

CEPHALICAS (*Mus.*) the name for a character of notation used in the middle ages.

CEPHALICS (*Med.*) cephalic medicines, or such as serve to relieve disorders in the head, of which description is snuff.

CEPHALOIDES (*Bot.*) *κεφαλοειδής*, from *κεφαλή* and *ειδός*, likeness; applied to plants that are shaped like a head.

CEPHALON (*Bot.*) the Date-Tree.

CEPHALONO'SOS (*Med.*) *κεφαλονώσος*, from *κεφαλή*, the head, and *νώσος*, a disease; a malignant epidemical fever frequent in Hungary.

CEPHALO-PHARYNGÆUS (*Anat.*) from *κεφαλή* and *φάρυγξ*, the throat; a muscle of the Pharynx.

CEPHALOPONIA (*Med.*) *κεφαλοπονία*, from *κεφαλή* and *πόνος*, pain, a head-ach.

CEPHALOTOS (*Bot.*) Capitate, an epithet for plants.

CEPHALOTUS (*Bot.*) the *Thymus cephalotus* of Linnæus.

CEPHALOTROTOS (*Surg.*) from *κεφαλή*, and *τιτρίσκω*, to wound; wounded in the head.

CEPHALINE (*Med.*) *κεφαλήνη*, that part of the tongue which is next the root and nearest the fauces.

CEPHALITIS (*Med.*) the same as *Phrenitis*.

CEPHALONOMANCY (*Ant.*) *κεφαλονομαντεία*, from *κεφαλή*, the head, *νος*, an ass, and *μαντεία*, divination; a mode of divination, by means of an ass's head broiled on coals, in order to convict a person of a crime. If the jaws moved, or the teeth chattered, they thought they had detected the offender. *Gyrald. Syntag. Deor.* l. 17.

CEPHALUS (*Ich.*) *κέφαλος*, mullet, a fish with a large head; the *Mugi Cephalus* of Linnæus.

CEPHEUS (*Astron.*) *κέφευς*, a constellation in the northern hemisphere, and one of the 48 old asterisms, which is fabled by the Greeks to represent the husband of Cassiopeia and father of Andromeda. [vide *Cassiopeia*] Ptolemy reckons in this constellation 13, Kepler 11, Bayer 17, Hevelius 51, and the British Catalogue 35.

CEPHEUS (*Zool.*) an animal in Æthiopia, with hands and feet like a man. This is doubtless the ape from the Hebrew *שֵׁפָר*. *Plin.* l. 8, c. 19.

CEPI corpus (*Law*) the return made by the sheriff upon a *capias*, or process to the like purpose, that he "hath taken the body." *F.N.B.* 26.

CEPINA (*Bot.*) a bed of onions.

CEPINI (*Chem.*) vinegar.

CEPIONIDES (*Min.*) precious stones as clear as crystal.
 CEPITES (*Min.*) a species of agate.
 CEPOLA (*Ich.*) a genus of animals, Class *Pisces*, Order *Thoracica*.
Generic Character. Head roundish, compressed.—*Teeth* curved.—*Gill membrane* with six rays.—*Body* ensiform, naked.
Species. The principal species are the—*Cepola tania*, *rubescens*, *trachyptera*, &c.
 CEPPAGIUM (*Archæol.*) the stumps or roots remaining in the ground, after trees are felled. *Fleta*, l. 2, c. 41.
 CEPPIHUS (*Orn.*) a sea-mew; a bird so light that it is carried away with every puff of wind.
 CEPS de Cesar (*Mil.*) Cæsar's trap; a stratagem which Cæsar adopted to draw the enemy into a forest, where the passage was blocked up.
 CEPULA (*Bot.*) κίπυλα, a name for large Myrobans. *Nic. Myre.* sec. 9, c. 83.
 CERĀ (*Med.*) κηρός, from the Arabic *Kira*, or the Chaldean *Kerah*, wax, Bees-wax; a concrete substance, collected from vegetables by bees, and extracted from their combs after the honey is separated from them.—*Cera alba*, white wax; the yellow wax artificially deprived of its colour, by reducing it into thin flakes, by exposing it to the sun and air, and by occasionally sprinkling it with water.—*Cera cinnamomi*, a white sebaceous matter obtained from the fruit of the Cinnamon tree.—*Cera di cardo*, a viscous milky juice, resembling wax, gathered from the *Carduus pinea* *Theophrasti*, or Pine thistle.—*Cera oleum*, oil of wax, is used as an emollient for healing chaps, roughness of the skin, &c.
 CERACHATES (*Min.*) an agate stone of wax colour.
 CERÆA (*Anat.*) κεραία, from κέρα, a horn; the horns of the uterus. *Ruff. Ephes. de Appellat. Corp. hum.* l. 1, c. 31.
 CERAGIUM (*Archæol.*) cerage, a tribute or payment made for finding candles in the church.
 CERA'GO (*Nat.*) the aliment of bees, now called *bee-bread*.
 CERA'MBYX (*Ent.*) a genus of animals, Class *Insecta*, Order *Coleoptera*.
Generic Character. *Antennæ* setaceous.—*Feelers* four.—*Thorax* spinous or gibbous.—*Shells* linear.
Species. The species are distinguished into, 1. *Prionus*, or those who have the feelers equal and filiform. 2. *Rhagium*, or those that have the feelers equal and capitate, and the thorax spinous. 3. *Callidium*, or those having the feelers equal and elevated, the thorax unarmed. 4. *Stenocorus*, or those having the feelers unequal, the two fore ones filiform, the hinder ones clavate.
 CERAMICE (*Min.*) or *Cerameta*, κεραμική, or κεραμίτις, joined with γη, earth, signifies Potter's-clay.
 CERAMITES (*Min.*) a precious stone, of the colour of a tile.
 CERAMIUM (*Ant.*) a Greek measure of nine gallons.
 CERANITES (*Med.*) κερανίτης, from κεράνυμι, to temper together; the name of a troche.
 CERAMIUM (*Ant.*) the same as *Cadus*.
 CERANTHEMUS (*Bot.*) κεράνθημος, or κεράθειμος, from κηρός, wax, and άνθημος, a flower; Bee-glue or Bee-bread.
 CERANTHUS (*Bot.*) the *Chionanthus* of Linnæus.
 CERARE (*Chem.*) to incorporate or mix.
 CERARIUM (*Ant.*) Wax-money; a tax which was paid for the seal in wax. *Cic. in Verr. orat.* 3, c. 78.
 CERAS (*Bot.*) κέρα, a horn.
 CERASA (*Bot.*) the *Prunus cerasus* of Linnæus.
 CERASIA'TUM (*Med.*) from *cerasus*, a cherry, a purging medicine; so called because the juice of cherries is the principal ingredient.
 CERASION (*Bot.*) κερασιον, a cherry.
 CERASIOS (*Med.*) the name of two ointments in medicine.
 CERASIN (*Chem.*) a vegetable principle, possessing the

appearance of gum, and of a similar taste. It is usually harder, and not so easily reduced to powder as gum.
 CERA'SMA (*Med.*) κέρασμα, from κέρανυμι, to mix; a mixture of cold and warm water, when the warm is poured on the cold.
 CERA'STES (*Zool.*) κέρασθε, κέρασθης, from κέρα, a horn; a serpent, a cubit in length, or at the longest two cubits, having two prominences on its head resembling horns. *Nicand. Ther.* p. 19; *Plin.* l. 8, c. 23; *Solin.* c. 27; *Act. Tetrab.* 4, serm. 1, c. 28.
 CERASTES is the *Coluber Cerastes* of Linnæus.
 CERASTES (*Ent.*) a worm that breeds in figs. *Theoph. Hist. Plant.* l. 9, c. 16; *Plin.* l. 16, c. 41.
 CERA'STIUM (*Bot.*) a genus of plants, Class 10 *Decandria*, Order 5 *Pentagynia*.
Generic Characters. *CAL.* perianth five-leaved; leaflets acute.—*COR.* petals five.—*STAM.* filaments ten; anthers roundish.—*PIS.* germ ovate; styles five; stigmas obtuse.—*PER.* capsule obtuse; seeds very many.
Species. The species are annuals and perennials. The annuals are as follow; namely—*Cerastium perfoliatum*, seu *Myosotis*, &c. Mouse-ear, native of Greece.—*Cerastium vulgatum*, *Myosotis*, *Alsine*, seu *Auricula*, Common or Narrow-leaved Mouse-ear, native of Europe.—*Cerastium anomalum*, &c. native of Hungary.—*Cerastium viscosum*, *Myosotis*, *Alsine*, &c. native of Europe.—*Celastrum semidecandrum*, *Myosotis*, seu *Centunculus*, Least Mouse-ear, native of Europe.—*Cerastium pentandrum*, native of Spain.—*Cerastium arvense*, seu *Myosotis*, &c. *Centunculus*, &c. seu *Holosteum*, &c. Corn Mouse-ear. The perennials are as follow; namely—*Cerastium tineare*, native of Mount Cenisius.—*Cerastium dichotomum*, *Lychnis*, seu *Alsine*, Forked Mouse-ear.—*Cerastium alpinum*, *Myosotis*, *Centunculus*, seu *Centunculus*, seu *Alpine*, Alpine Mouse-ear, native of Europe.—*Cerastium repens*, seu *perenne*, &c. *Stellaria*, *Myosotis*, *Ocymoides*, seu *Lychnis*, &c. Creeping Mouse-ear, or Sea-pink, native of Gaul.—*Cerastium strictum*, *Myosotis*, *Alsine*, *Caryophyllus*, &c. native of Austria.—*Cerastium aquaticum*, *Alsine*, *Stellaria*, &c. native of Europe.—*Cerastium latifolium*, *Myosotis*, seu *Caryophyllus*, &c. seu *Herbate*, Broad-leaved Mouse-ear, native of Switzerland.—*Cerastium tomentosum*, native of Granada.—*Cerastium refractum*, seu *trigynum*, seu *Myosotis*, native of Mount St. Barnard. *Clus. Hist. Plant. rar.*; *C. Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*; *Raii Hist. Plant.*; *Tournef. Instit.*
 CERASTIUM is also the *Holosteum umbella* of Linnæus.
 CERASUS (*Bot.*) κέρασος, the Cherry-tree; it received its name from Cerasus, a city of Pontus, whence it was imported to Rome by Lucullus Lucilius, and thence propagated into Britain, according to Pliny. *Theophrast. Hist. Plant.* l. 3, c. 13; *Plin.* l. 15, c. 25; *Athen.* l. 2, &c.
 CERASUS is the *Prunus cerasus* of Linnæus.
 CERATACHATES (*Min.*) from κέρα, a horn, and άγαθης, an agate; a species of agate stone, the veins of which resemble the shape of a horn.
 CERATAMA'LGAMA (*Med.*) or *Ceratomalgama*, from κηρός, wax, and amalgama, a mollifying composition of wax and other ingredients.
 CERATE (*Med.*) *Ceratum*, a composition of wax, oil, or lard, with or without other ingredients. It is used for plasters; and takes its name from the wax, *cera*, which is the principal ingredient.
 CERATIA (*Bot.*) κερασία, the Carob-tree; the *Cercis Canadensis* of Linnæus.
 CERATIAS (*Astron.*) κερασίας, a blazing star like a horn. *Plin.* l. 2, c. 25.
 CERATION (*Med.*) the smearing any thing over with wax.

CERATITES (*Min.*) the Fossil Unicorn; a stone in the shape of a horn.

CERATITIS (*Bot.*) κεραιτίς from κέρα, a horn; the sea violet, according to Marcellus Empiricus; but according to Pliny the *Papaver Corniculatum*. *Plin.* 1. 20, c. 19.

CERATIUM (*Bot.*) κεράτιον, the fruit of the Carob-tree.

CERATIUM (*Com.*) a carat.

CERATOCARPUS (*Bot.*) a genus of plants, Class 21 *Monocœcia*, Order 1 *Monandria*.

Generic Characters. CAL. *perianth* one-leaved.—COR. none.—STAM. *filament* single; *anther* twin.—PIST. *germ* oblong; *styles* two; *stigmas* simple.—PER. none; *seed* oblong.

Species. The only species is the—*Ceratocarpus arenarius*, an annual, native of Tartary.

CERATOCEPHALOIDES (*Bot.*) the same as the *Bidens*.

CERATOCEPHALUS (*Bot.*) from κέρα, horn, and κεφαλή, the head; from the horn-like appearance of its top. It is the same as the *Bidens*.

CERATO-GLOSSUS (*Anat.*) from κέρα, a horn, and γλῶσσα, a tongue; a muscle so named from its shape and insertion into the tongue.

CERATO-HYOIDÆUS (*Anat.*) the same as *Stylo-hyoides*.

CERATOIDES (*Anat.*) κεραιτοειδής, a name for the *Tunica Cornea* of the eye.

CERATOMALAGMA (*Chem.*) κεραιτομαλαγμα. [vide *Ceratomalgama*]

CERATONIA (*Bot.*) a genus of plants, Class 23 *Polygamia*, Order 3 *Trioecia*.

Generic Characters. CAL. *perianth* five-parted.—COR. none.—STAM. *filaments* five; *anthers* twin.—PIST. *germ* lying concealed within a fleshy receptacle; *style* long; *stigma* headed.—PER. *legume* very large; *seed* solitary.

Species. The only species is the—*Ceratonia Siliqua*, seu *Siliqua*, &c. the Carob-tree, a shrub, native of Apulia.

CERATONIA is also the *Mimosa ceratonia* of Linnæus.

CERATO-PHARYNGUS *Major et Minor* (*Anat.*) the names of two pair of the muscles inserted into the *Os hyoides*.

CERATOPHYLLUM (*Bot.*) a genus of plants, Class 21 *Monocœcia*, Order 8 *Polyandria*.

Generic Characters. CAL. *perianth* many-parted; *divisions* equal.—COR. none.—STAM. *filaments* from sixteen to twenty; *anthers* oblong.—PIST. *germ* ovate; *style* none; *stigma* obtuse.—PER. none; *seed* nut-ovate.

Species. The species are perennials; namely—*Ceratophyllum demersum*, *Hydroceratophyllum*, *Dichotophyllum*, *Millefolium*, &c. seu *Equisetum*, &c. Prickly-seeded Hornwort, native of Europe.—*Ceratophyllum submersum*, Smooth-seeded Hornwort, native of Europe.

CERATUM (*Med.*) from *cera*, wax; cerate, or wax, combined by the assistance of heat, with fixed oils.

CERAUNIA (*Min.*) κεραινίον, from κεραινός, thunder; thunder-stones, always found near some place blasted with lightning. Ceraunia is a variety of the *Helenintholithus Nautilites* of Linnæus.

CERAUNIUM (*Bot.*) a kind of puff or mushroom, in Thrace, which grows plentifully after thunder. *Plin.* 1. 19, c. 3.

CERAUNO-CHRYOSOS (*Chem.*) from κεραινός, thunder, and χρυσός, gold; a powder so called from the violence of its explosion when heated. In the Latin it is called *aurum fulminaris*.

CERBERA (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* five-leaved; *leaflets* ovate-lanceolate.—COR. monopetalous; *tube* clavated; *border* large; *divisions* oblique.—STAM. *filaments* five; *anthers* erect.—PIST. *germ* roundish; *style* filiform;

stigma headed.—PER. *drupe* very large; *seed* nut two-celled.

Species. The species are shrubs; as the—*Cerbera Ahouai*, *Thevetia*, seu *Ahouai*, Oval-leaved *Cerbera*, native of Brazil.—*Cerbera ovata*, a native of New Spain.—*Cerbera parviflora*, native of the Friendly Isles.—*Cerbera Manghas*, *Manghas*, seu *Odollam*, native of the Indies.—*Cerbera maculata*, seu *Ochrosia*, &c. a shrub, native of Bourbon.—*Cerbera Thevetica*, *Plumeria*, *Nerio*, seu *Ycofli*, &c. native of Cuba.—*Cerbera sahutaris*, seu *Lactaria*, &c. native of Cochim-China.—*Cerbera laurifolia*, native of the West Indies.

CERBERUS TRICEPS (*Chem.*) the *Pulvis cornachini*, or a triple mercury, composed of salt, quicksilver, and vitriol.

CERCA'RIA (*Conch.*) a genus of animals, Class *Vermes*, Order *Infusoria*.

Generic Character. A worm invisible to the naked eye, pellucid, and furnished with a tail.

Species. The principal species are, the *Cercaria gyrynus*, *inquieta*, *lemnæ*.

CERCELEE (*Her.*) or *Recercelée*, a cross circling or curling at the end, like a ram's horn, as in the annexed figure.

CERCHNALEOS (*Med.*) κερχναλέος, any thing which causes wheezing or hoarseness.

CERCHNOS (*Med.*) κερχνός, a wheezing or hoarse noise made in respiration, on account of some disorder in the *larynx*, or *aspera arteria*, or both.

CERCHODES (*Med.*) those who suffer from a contracted breathing.

CERCIO (*Orn.*) an Indian bird as large as a starling.

CERCIS (*Anat.*) κερκίς, signifies literally a pestle, or an instrument to pound any thing with; but is applied to the bone in the arm called the *radius*.

CERCIS (*Bot.*) a genus of plants, Class 10 *Decandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* one-leaved.—COR. pentapetalous; *wings petals* two; *standard petal* one; *keel petals* two; *nectary* a style-shaped gland below the germ.—STAM. *filaments* ten; *anthers* oblong.—PIST. *germ* linear-lanceolate; *style* of the length and situation of the stamens; *stigma* obtuse.—PER. *legume* oblong; *seeds* some roundish.

Species. The species are shrubs; namely—*Cercis siliquastrum*, *Arbor Judæ*, *Siliqua*, seu *Siliquastrum*, Common Judas tree, native of Italy.—*Cercis Canadensis*, *Siliquastrum*, seu *Ceratia*, &c. Canada Judas tree, Red-Bud tree, native of Virginia.

CERCICIUS (*Nat.*) vide *Circius*.

CERCICLE (*Mil.*) or grand circle, a ring formed every evening by the sergeants and corporals of a brigade in the old French military service, to receive orders.—*Cercle meurtrier*, a large flat piece of iron made red hot and thrown at the enemy.

CERCLE' (*Her.*) within a circle or diadem.

CERCLES-GOUDRONNE'S (*Mil.*) pitched hoops, i.e. pieces of old cordage dipped in pitch and tar and placed in a circle on chafing dishes, to light the garrison of a besieged town at post.—*Cercles à feu*, hoops bound round with grenades, loaded pistol-barrels, &c. covered with tow and fireworks, which are driven across the works of the besiegers.

CERCO'DEA (*Bot.*) the same as the *Haloragis*.

CERCOLIPS (*Zool.*) an ape without a tail.

CERCO'PIS (*Ent.*) a division of the genus *Cicada*, having the *antennæ* filiform, and the *lip* abbreviated truncate.

CERCO'SIS (*Med.*) κέρκωσις, a disease of the *clitoris*, which consists in a preternatural enlargement.

CERD'AC (*Chem.*) mercury.

CERDONISTS (*Ecc.*) or *Cerdomians*, a sect of heretics, named after their leader Cerdo, who maintained most of the errors of Simon Magus and other gnostics. *Iren. cont. Hæres.* l. 1, 3; *Tertull. de Præs.* c. 51; *St. August. Hær.* 21; *St. Epiphân. Hær.* 51; *Euseb. Ecc. Hist.* l. 4, c. 11; *Baron. Annal. Ann.* 146.

to CERE (*Mech.*) to rub with wax.

CEREALIA (*Ant.*) from *ceres*, corn; all sorts of corn of which bread is made: and *Cerealia arma*, implements of husbandry.

CEREALIA (*Ant.*) or *Cereales Ludi*, solemn games in honour of Ceres, when her votaries ran about with lighted torches, in commemoration of her going about in search of her daughter Proserpine.

Ovid. Fast. l. 4, v. 391.

Circus erit pompa celesber, numeroque deorum.

Primaque ventosis palma petetur equis.

Hinc Cereris ludi.

Tacit. Annal. l. 15, c. 53; *Dio.* l. 43; *Tertull. de Spectac.* c. 7; *Ursat. de Not. Roman. apud. Græv. Thes. Antiq.* tom. ii. p. 603.

CEREBELLUM (*Anat.*) and *Cerebellum*, dim. of *Cerebrum*, the posterior part of the brain. [vide *Brain*]

CEREBRI AFFECTIO SPASMODICA (*Med.*) the same as *Apoplexia compressio et concussio*, compression of the brain.—*Cerebri basis*, the same as *Palatum*, which see.—*Cerebri galea*, the same as *Cranium*, which see.

CEREBRUM (*Anat.*) vide *Brain*.—*Cerebrum elongatum*, the same as *Medulla spinalis*.

CEREBRUM Jovis (*Chem.*) Burnt Tartar.

CEREFAC/TIO (*Nat.*) the same as *Ceratio*.

CEREFOLIUM (*Bot.*) the *Chærophyllum sylvestre, tremulum, hirsutum, et aureum* of Linnæus.

CEREI'BA (*Bot.*) a small tree which grows in Brazil, like a willow.

CEREIBU'NA-MANGUE (*Bot.*) another species of the preceding plant.

CERELÆ'UM (*Med.*) *κηράλαιον*, from *κέρος*, wax, and *ἔλαιον*, oil; the same as *Ceratum*.

CEREMONIAL (*Ecc.*) a book containing the ceremonies of the Romish church.

CEREMONIES, *Master of* (*Polit.*) an officer instituted by James I. for the more honourable reception of ambassadors, &c. He wears a chain of gold about his neck, with a medal, under the crown of Great Britain, having on one side an emblem of peace and the motto *beati pacifici*; on the other, an emblem of war and the motto *Dieu et mon droit*.—*Assistant Master of the Ceremonies*, one who acts in his stead when he is absent.—*Marshal of the Ceremonies*, an officer subordinate to them both.

CERETIA (*Bot.*) the *Hymænia corbaril* of Linnæus.

CEREVISIA (*Archæol.*) a drink made of any sort of corn.

CEREUS (*Bot.*) or Creeping Cereus, a plant remarkable for the beauty and sweetness of its flowers, which is classed in the Linnean system, under the genus *Cactus*. The most distinguished kinds are the—Great Night-flowering Creeping Cereus, the *Cactus grandiflorus*; the Pink-flowered Creeping Cereus, the *Cactus flagelliformis*; and the Parasitical Creeping Cereus, the *Cactus parasiticus*.

CERIA (*Ent.*) a division of the genus of *Musca*, having a single bristle and univalve sheath; *antennæ* seated on a common petiole.

CERIFICAC/TIO, the same as *Ceratio*.

CERIGON (*Nat.*) a wild American animal, having a skin under the belly, in which it carries its young ones.

CERILLA (*Gram.*) vide *Cedilla*.

CERIN (*Chem.*) a substance of the consistence of wax, and soluble in fixed and volatile oils.

CERINTHE (*Bot.*) a herb which Virgil calls *gramen*

ignobile, but nevertheless recommends it as food for bees.

Virg. Georg. l. 4, v. 62.

— huc tu jussos asperge saporis,
Trita melisphylla, et cerinthæ ignobile gramen.

Aristotle also recommends it for bees. *Aristot. Hist. Anim.* l. 9, c. 40; *Theophrast.* l. 6, c. 7; *Plin.* l. 21, c. 12.

CERINTHE, in the Linnean system a genus of plants, Class 5 Pentandria, Order 1 Monogynia.

Generic Characters. CAL. perianth five-parted; divisions oblong.—COR. monopetalous; tube short; border tubebellied; mouth five-cleft; throat naked.—STAM. filaments five; anthers acute.—PIST. germ four-parted; style filiform; stigma obtuse.—PER. none; calyx unchanged; seeds two.

Species. The species are as follow; namely—*Cerinthæ major*, Great Honey wort, an annual, native of Siberia.

— *Cerinthæ aspera*, an annual, native of Europe.—

Cerinthæ quarta, Small Honey wort, a biennial, native of Austria.—*Cerinthæ maculata*, a perennial. *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*

CERINTHIANS (*Ecc.*) a sect of heretics who took their name from one Cerinthus, cotemporary with St. John, who, among other blasphemies, denied that the world was made by God. *S. Iren. Cont. Hæres.* l. 1, c. 25, &c.; *St. Epiphân. Hær.* 28; *Euseb. Ecc. Hist.* l. 4, c. 14; *Baron. Annal. Ann.* 35.

CERINTHOIDES (*Bot.*) the same as *Pulmonaria*.

CERIO (*Med.*) the same as *Achor*.

CERION (*Nat.*) *κέριον*, a honeycomb, from *κηρός*, wax; the same as *Achor*.

CERITE (*Min.*) an opaque and brittle ore, specific gravity 4.660; a species of oxide formed of silica, oxide of cerium, iron, lime-water, and carbonic acid.

CERITUS (*Med.*) or *Cerritus*, from Ceres; the disease arising from malt-liquors.

CERIUM (*Chem.*) a metal which has been obtained from a Swedish mineral called cerite, which was formerly supposed to be an ore of tungsten. When this mineral is dissolved in nitro-muriatic acid, the solution, after being neutralized by potash, is precipitated by the tartrate of potash. This precipitate, when calcined, is the oxide of cerium, which is white, very hard, brittle, and volatile. It combines with another dose of oxygen, and forms the peroxide of cerium, which is red. Cerium combines with several acids and forms salts, as the *nitrate of cerium*, the *carbonate of cerium*, the *phosphate of cerium*, the *sulphate of cerium*, the *arseniate of cerium*, &c. formed by the combination of cerium with nitric, carbonic, phosphoric, sulphuric, arsenic, &c. acids. The solutions of the oxides in the acids are either yellow or red, and give precipitates of different shades of these colours.

CERNUA (*Ich.*) a kind of fish mentioned by Galen.

CERNULIA (*Ant.*) a festival in honour of Bacchus.

CERNUUS (*Bot.*) from *cernuo*, to fall with the face downwards; an epithet for plants that droop or bend downwards, or hang down their head.

CEROCOMA (*Ent.*) a division of the genus *Lytta*, in the Linnean system of insects, having the jaw linear, entire.

CEROGRAPHY (*Ant.*) a writing or painting in wax.

CEROMA (*Ant.*) or *Ceronium*, *κίρωμα*, an oil tempered with wax, with which wrestlers were anointed; also the place where they were anointed. *Dioscor.* l. 1, c. 35; *Plin.* l. 28, c. 4.

CEROMANCY (*Ant.*) *κηρομαντεία*, from *κηρος*, wax, and *μαντεία*, divination; a divination by means of wax melted over a vessel of water. They let it drop in three distinct spaces, and observed the figure, situation, distance, and concretion of the drops. *Gyrald. Syntagm. Deor.* l. 17.

CERONEUM (*Ant.*) a cerate; vide *Ceroma*.

CEROPE'GIA (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 2 *Digynia*.

Generic Characters. CAL. *perianth* very small.—COR. monopetalous; *border* very small.—STAM. *filaments* five; *anthers* small.—PIST. *germ* very small; *style* scarce any; *stigmas* two.—PER. *follicles* two; *seeds* numerous.

Species. The species are perennials; as the—*Ceropegia Candelabrum*, seu *Niota*, &c. a native of Malabar.—*Ceropegia tuberosa*, a native of India.—*Ceropegia bulbosa*, a native of India.—*Ceropegia acuminata*, a native of India.—*Ceropegia sagittata*, seu *Cynauchum*, &c. native of the Cape of Good Hope.—*Ceropegia tenuiflora*, *Cynanchium*, &c. seu *Apocryrium*, native of the Cape of Good Hope.—*Ceropegia obtusa*, native of Cochin China.—*Ceropegia cordata*, native of Cochin China; but the—*Ceropegia dichotoma* is a shrub, and native of the East Indies.

CEROPI'SSUS (*Med.*) *κίροπισσοσ*, from *κίρος*, wax, and *πίσσα*, pitch; a plaster made of pitch and wax.

CEROSTROTUM (*Ant.*) the inlaying of pieces of ivory, &c. of different colours, in cabinets, chess-boards, &c. *Plin.* l. 11, c. 37.

CEROTUM (*Ant.*) the same as *Ceratum*.

CERRI glans (*Bot.*) the *Quercus agilops* of Linnæus.

CERRIS (*Bot.*) the same as *Cerrus*.

CERRO (*Bot.*) from *κέρας*, a horn, because its wood is hard like horn; the same as the *Phellodrys*.

CERRRUS (*Bot.*) or *Cerris*, a kind of *quercus*, or oak, that bears mast-like chesnuts prickly about the cup; the holm-tree. *Plin.* l. 16, c. 6.

CERTHIA (*Orn.*) Creeper, a genus of animals, Class *Aves*, Order *Picæ*.

Generic Character. Bill arched, pointed.—Tongue generally pointed.—Feet formed for walking.

Species. The species are distinguished by their colour; as the—*Certhia familiaris*, which is grey.—*Certhia viridis*, the green Creeper.—*Certhia aurantia*, the orange-breasted Creeper. Also by the form of the bill; as—*Certhia falcata*, the sickle-billed Creeper.—*Certhia pacifica*, great hook-billed Creeper, &c.

CERTIFICAN'DO de Recognitione Stapulæ (*Law*) 1. a writ commanding the mayor of the staple to certify to the Lord Chancellor a statute staple taken before him, where the party himself detains it, and refuses to bring in the same. 2. A like writ to certify a statute merchant, and in other cases. *Reg. Orig.* 148, 151, 152.

CERTIFICATE (*Law*) generally signifies a testimony given in writing of the truth of any thing.—*Certificate*, a writ in any court giving notice to another court of any thing done therein, which is usually by transcript. *Stat.* 34, 35 *Hen.* 8, c. 14; 3 *W. & M.* c. 9.—*Trial by Certificate* is allowed in such case where the evidence of the person certifying is the only proper criterion of the point in dispute. *Litt.* § 102; 1 *Inst.* 74.—*Certificate*, or *Certification of assise*, *Certificatio assisæ novæ disseisinæ*; a writ anciently granted for the re-examining or re-trial of a matter passed by assise before justices. *Bract.* l. 4, c. 13; *Horne's Mirror of Just.* l. 3; *F. N. B.* 181; *Reg. Orig.* 200.—*Bankrupt's certificate*, the paper granted to a bankrupt by the consent of his creditors, certifying that he has surrendered and made a full disclosure of all his property.

CERTIFICATES (*Mil.*) are of many different kinds in the army; as the certificate from a field-officer to the commander, affirming the eligibility of a person to hold a commission in his Majesty's service.—*Certificate* of the officer upon honour that he does not exceed the regulation in the purchase of his commission.—*Certificate* from a general officer to affirm and prove the losses which officers may sustain in the field.—*Certificate* from regimental surgeons,

certifying that men who offer themselves for enlistment are fit to be taken; and in like manner in case of their discharge, &c.

CERTIFICATION (*Law*) Assurance when the judge ascertains the party called, and not appearing, what he will do in such a case.

CERTIORARI (*Law*) an original writ issuing out of the Court of Chancery, or King's Bench, directed to an inferior court, and commanding them to certify, or to return the records of a cause depending before them. *F. N. B.* 145, 242; 2 *Hawks. P. C.* c. 27, § 22.

CERT-MONEY (*Law*) Head-money paid yearly by tenants of several manors to the lords thereof, for the certain keeping of the leet, and sometime of the hundred.

CERVA'RIA (*Bot.*) the *Athamanta cervaria* of Linnæus.

CERVA'RIO (*Ant.*) a sheep so called, which was sacrificed to Diana instead of a deer, when a deer was not to be had. *Fest. de Verb. Signif.*

CERVA'RIOUS *Lupus* (*Zool.*) a beast engendered of a hind and a wolf. *Plin.* l. 27, c. 11.

CERUCHI (*Ant.*) the cords or ropes by which the two horns of the sail-yards were held and managed. Homer called them *καλώνει*, the Romans sometimes *rudentes*. *Lucan.* l. 10, v. 495.

Transtraque nautarum, sumnique arsere ceruchi.

Val. Flacc. l. 1, v. 469.

Temperat ut tremulos Zethes fraterque ceruchos.

Scheff. de Mil. Nav. l. 2, c. 25; *Phil. in Vitruv.* l. 10, c. 6.

CERUCHIS (*Bot.*) a species of the *Spilanthus* of Linnæus.

CERVE'LE (*Mil.*) a French word, denoting that earth which, in digging a ditch, or well, is not sufficiently firm to support itself.

CERVELAS (*Cook.*) a large kind of Bologna sausage.

CERVELAT (*Mus.*) a short kind of bassoon which was blown through a reed like a hautboy.

CERVIANA (*Bot.*) the *Pharmacum cerviana* of Linnæus.

CERVICA'LIS (*Anat.*) or *Cervicales*, from *cervix*, the neck; an epithet applied to the veins and arteries of the fore-part of the neck, as—*Cervicales arteriæ*, the arteries of the neck.—*Cervicales venæ*, the Cervical veins.—*Cervicalis descendentis dorsi*, the same as the *Sacrolumbaris accessorius*.

CERVICA'RIA (*Bot.*) the *Campanula cervicaria* of Linnæus.

CERVICULÆ spiritus (*Med.*) the spirit of the bone of the stag's heart.

CERVINUM cornu (*Bot.*) the same as *Coronapus*.

CERVISA'RII (*Law*) a name in Domesday book for such tenants as paid the drinclean duty on ale, from *cervisia*, which signifies ale.

CERVISPINA (*Bot.*) the same as the *Rhamnus* of Linnæus.

CERVIX (*Anat.*) the neck; that part of the body situated between the head and breast. The neck is divided generally into the anterior part or throat, and the posterior part or nape. Cervix is applied also to other parts of the body, as *cervix uteri*, or that part immediately above the *Os Tinccæ*, *cervix vesicæ*, *cervix ossis*, &c.

CERU'MEN (*Chem.*) Ear-wax; a secretion formed in the canal of the external ear, is found, by a chemical analysis, to be very combustible and largely soluble in alcohol, and composed of a fat oil, resembling that of the bile; of an albuminous mucilage, in which the principal bitterness seems to reside, and of a peculiar colouring matter.

CERU'MINA (*Chem.*) the same as *Cerumen*.

CERURA (*Law*) a mound, fence, or inclosure.

CERUSE (*Chem.*) vide *Cerussa*.

CERUSIA'NA (*Med.*) a compound medicine, mentioned and described by Galen. *Gal. de Compos. Med. sec. Loc.* l. 7, c. 5.

CERUSSA (*Chem.*) *Ceruse*, White-lead; a carbonate of lead, prepared by exposing thin plates of lead to the hot vapours of vinegar, or other acetic acids.—*Cerussa Antimonii*, Ceruse of Antimony; a perfect oxide of antimony prepared by nitre.

CÉRUSSE'A *urina* (*Med.*) White urine, which looks as if Ceruse had been mixed with it.

CERVUS (*Ant.*) a forked stake or palisado driven into the ground to annoy the enemy; so called from its resembling the horn of a stag in shape.

Tibull. l. 4, *carm.* 1, v. 82.

*Jam te non alius belli tenet aptius artes:
Qua decet tutam castris præducere fossam;
Qualiter adversos hosti defigere cervos.*

CERVUS (*Numis.*) is a common symbol of Diana on coins. [vide *Arcus*]

CERVUS (*Zool.*) the stag or deer, the female of which was called *cerva*, in the Greek, for both genders, ἐλαφος, is designated by Virgil *æripes*, to denote that it was surefooted. *Virg. Æn.* l. 6, v. 803.

Fixerit aripedem cervam licet.

And by Catullus it is distinguished for its fleetness, when speaking of Achilles.

Catull. Epithal. Pel. et Thes. v. 342.

Flammea prævertet celeris vestigia cervæ.

The poets Pindar, Anacreon, and Sophocles, have also described the *cerva*, or hind, as having horns; but in this they are contradicted by Aristotle, Pliny, and other naturalists.

The principal kinds of deer noticed by the ancients, as well as moderns, are—*Tarandus*, τάρανδος, the *Cervus tarandus* of Linnæus, the Rein Deer.—*Cervus*, ἐλαφος, *Cervus elaphus*, the Stag.—*Platyceros*, πλατυκέρας, the *Cervus platyceros*, or Fallow Deer.—*Caprea*, δερκίας, the *Cervus capreolus*, or Roe-Buck.—*Axis*, the *Cervus axis*, or the Spotted Axis. [vide *Cervus*] The *cervus* is distinguished according to its age, in Greek, into ἐμᾶδες, the young fawns just after they are brought forth; νεβροί, the fawns when they begin to feed; παττιλία, subulones, spitters, whose horns begin to bud forth; κερκασαι, those which are furnished with full branching horns. *Aristot. Hist. Anim.* l. 6, 9, &c.; *Plin.* l. 8, 11, &c.; *Ælian. Hist. Anim.* l. 7, &c.

CERVUS, in the *Linnæan system*, a genus of animals, Class *Mammalia*, Order *Pecora*.

Generic Character. Horns solid, branched annually, deciduous.—*Fore-teeth*, lower eight.—*Tusks*, upper solitary.

Species. The species differ both in the size of their horns and in their general make. They are as follow, namely—*Cervus alces*, in French *l'Elan*, the Elk, or Moose Deer, the largest of the tribe.—*Cervus tarandus*, the *Rangifer* of Gessner, the *Cervus rangifer* of Ray; in French *le Renne*, the Rein Deer, an inhabitant of Lapland.—*Cervus elaphus*, in French *le Cerf*, the Stag, or Red Deer, the female of which is called the hind. This animal is distinguished by its branching horns.—*Cervus dama*, the *Dama vulgaris* of Gessner, the *Cervus platyceros* of Ray; in French *le Daim et la Daine*, the Fallow Deer, the Common Buck and Doe, having branching horns palmated at the top.—*Cervus Virginiana*, the *Dama Virginiana* of Ray, the Virginian Deer.—*Cervus axis*, in French *l'Axis*, the Spotted Axis, one of the most beautiful animals of this tribe.—*Cervus pygærgus*, seu *Cervus aha*, Tailless Deer.—*Cervus Mexicanus*, the *Teutilal maçane* of Hernandez; in French *Chevreuil d'Amerique*, Mexican Deer.—*Cervus porcinus*,

in French *Cerf-cochon*, Porcine Deer.—*Cervus capreolus*, the *Capreolus* of Gessner; in French *le Chevreuil*, the Roe.—*Cervus muntjac*, in French *le Chevreuil des Indes*, Rib-faced Deer.—*Cervus Guineensis*, the Grey Deer.

CE/SARE (*Log.*) a syllogism of the second figure, consisting of a universal affirmative proposition between two universal negatives; as,

C e No animal is incorporeal;

S a All angels are incorporeal; therefore,

R e No angel is an animal.

CESA'RIAN SECTION (*Med.*) vide *Cæsarean Section*.

CE/SSAT EXECUTIO (*Law*) an abatement of a writ towards one of two defendants who has been tried and convicted of a trespass, until the same has been tried against the other defendant.

CESSA'TION OF ARMS (*Mil.*) an armistice or occasional truce, particularly in the case of a siege, when, if the governor find that he must either surrender or sacrifice himself and the garrison to the enemy, he plants a white flag on the breach, or beats the *chamade* to capitulate, when both parties cease firing.

CESSA'VIT (*Law*) a writ lying against a man who holds lands by rent or other services, and neglects or ceases to perform his services for two years together; or where a religious house hath lands given it on condition of performing certain offices, as reading prayers, or giving alms, and neglects it. *F. N. B.* 208.

CE/SSE (*Law*) an assessment or tax. *Stat. 22 Hen.* 8, c. 3. Also, an exacting of provisions at a certain rate for the deputy's family and garrison soldiers.

CE/SSIO (*Law*) *cession*; a ceasing, yielding up, or giving over; as when an ecclesiastical person is created bishop, or a parson of a parish takes another benefice without dispensation, or being otherwise not qualified, they are said to be void by *cession*.

CE/SSION (*Law*) vide *Cessio*.—*Cession*, an act whereby a person surrenders up to another person a right which belonged to himself.—*Cession of effects*, the act of delivering up all effects real and personal by a merchant to his creditors, in order to free himself from all actions and prosecutions; and is either voluntary, which frees the debtor from all the demands of his creditors upon any future estates or effects he may acquire; or *forced*, when his creditors are authorized to seize any effects that may come into his hands in payment of his debts.

CE/SSIONARY BANKRUPT (*Law*) one who has yielded up his estates to be divided amongst his creditors.

CE/SSOR (*Law*) one who ceases or neglects to perform a duty so long as to incur the danger of the law. *F. N. B.* 136.

CE/SSURE (*Law*) or *Cesser*, ceasing; giving over; or departing from. *Stat. West.* 2, c. 1.

CE/SSUS (*Law*) assessments or taxes.

CESTICILLUS (*Ant.*) a wisp of straw which women laid upon their heads who carried pails. *Fest. de Verb. Signif.*

CESTREUS (*Ich.*) κέσρεύς, the mullet.

CESTRITES *oinum* (*Med.*) κέστριτης οἶνος, from κέστρον, betony; wine impregnated with betony.

CE/STRON (*Bot.*) the herb Betony.

CESTROSPHENDONE (*Ant.*) a sort of sling or engine of war for casting darts. *Liv.* l. 42, c. 65.

CESTRO'TA (*Ant.*) κέσρωτα, pieces of ivory or horn wrought with the tool called the *cestrum*. *Plin.* l. 11, c. 37; *Hesychius*.

CE/STRUM (*Ant.*) κέστρον, a graving tool; and also a borer, awl, or wimble. *Plin.* l. 35, c. 11.

CESTRUM (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

- Generic Characters.** CAL. *perianth* one-leaved; *mouth* five-cleft.—COR. *monopetalous*; *tube* cylindric; *divisions* ovate.—STAM. *filaments* five; *anthers* roundish.—PIST. *germ* cylindric-ovate; *style* filiform; *stigma* thickish.—PER. *berry* ovate; *seeds* very many.
- Species.** The species are shrubs.—*Cestrum nocturnum*, *Jasminoides*, *Syringa*, seu *Parxu*, Night-smelling *Cestrum*, native of Jamaica.—*Cestrum laurifolium*, seu *Laureola*, &c. Laurel-leaved *Cestrum*, native of America.—*Cestrum parqui*, seu *Parqui*, native of Chili.—*Cestrum auriculatum*, seu *Hediunda*, &c. Ear-leaved *Cestrum*, native of Lima.—*Cestrum scandens*, seu *filamentis*, &c. native of St. Martha.—*Cestrum vespertinum*, *Lxora*, &c. seu *Jasminum*, &c. Cluster-flowered *Cestrum*, native of America.—*Cestrum diurnum*, seu *Jasminoides*, &c. Day-smelling *Cestrum*, native of Chili.—*Cestrum venenatum*, native of the Cape of Good Hope.—*Cestrum tomentosum*, &c. native of America.—*Cestrum hirtum*, &c. native of Jamaica.—*Cestrum latifolium*, native of Trinity Island.—*Cestrum nervosum*, seu *Jasminoides*, &c. native of Carthage.—*Cestrum macrophyllum*, Large-leaved *Cestrum*, native of the West Indies.—*Cestrum oleifolium*, Olive-leaved *Cestrum*, native of the West Indies.—*Cestrum odontospermum*, Tooth-seeded *Cestrum*, native of the West Indies.
- CETSTUI QUE TRUST** (*Law*) or *Cestui à que trust*, one in whose trust, or for whose use or benefit, another man is enfeoffed or seised of lands or tenements. *Stat. 29 Car. 2. c. 3.*—*Cestui que use*, or *à que use*, one to whose use any other man is enfeoffed of lands or tenements. *Stat. 27 Hen. 8, c. 10.*—*Cestui à que vie*, one to whom any lands or tenements are granted for life.
- CETSTUS** (*Ant.*) a boxing-glove. [vide *Cæstus*]
- CETUS**, κῆτος, was also a marriage girdle full of studs, where-with the husband girded his wife at the wedding, and which he loosed again the first night.
- CETA'CEOUS** (*Zool.*) from *cete*, a whale. Cetaceous, an epithet for a very large sort of fishes which bring forth perfect animals instead of spawn.
- CETA'RIA** (*Ant.*) places near the sea side where large fish are taken and salted.
- CETE** (*Zool.*) an order of animals under the Class *Mammalia*, of the whale tribe, which have pectoral fins instead of feet, live upon smaller fish, and dwell in the waters. They consist of the following genera—*Monodon*, the Narval, having two teeth in the upper jaw, a spiracle on the fore part of the head, and a white skin spotted on the back with black.—*Balæna*, the Whale, the head of which is about a third part of the body, having a tubercle in which is the spiracle.—*Physeter*, the Cachalot, having teeth in the lower jaw and none in the upper.—*Delphinus*, the Porpoise, the Dolphin, and the Grampus, having teeth in each jaw.
- CETERACH** (*Bot.*) the *Asplenium ceterach* of Linnæus.
- CETIC ACID** (*Chem.*) a white solid substance, destitute of taste and smell, formed from spermaceti saponified.
- CETOLOGY** (*Zool.*) a knowledge of those animals which in the Linnean system are comprehended under the *Cete*, or Whale.
- CETRA** (*Mil.*) a short square target or buckler, used by the Spaniards and Moors, which was made of the skin of the ounce or of the buffalo's hide.
- Virg. Æn. l. 7. v. 732.*
- Lævas cetra tegit.*
- Liv. l. 28, c. 5; Plin. l. 11, c. 39; Serv. in Virg.; Voss. Lex Etymol. 34.*
- CETRONIA** (*Ent.*) a division of the genus *Scarabæus*, comprehending those insects of that tribe which have their mandibles straight.
- CETUS** (*Astron.*) κῆτος, in the Arabic *Elkeitos*, the Whale; a southern constellation, and one of the 48 old asterisms. It is fabled to have been the sea monster sent by Neptune to devour Andromeda, which was killed by Perseus. Ptolemy reckons in this constellation 22 stars; Kepler 21; Bayer 27; Hevelius 45; Britannic Catalogue 97, two of which are of the second magnitude, namely, one in the snout of the whale called *Meukar*, and another in the tail called *Deneb*. *Arat. de Apparent. & Hipparc. ad Arat.; Eratosth. Character; Vitruv. l. 9, c. 7; Hygin. Astron. Poet.; Maxil. Astron. Poet.; Ptol. Almag. l. 7, c. 5; Proc. de Sphær.; Petav. Uranolog.; Bay. Uranomet.; Ricciol. Almag. nov.*
- CETUS** (*Zool.*) the Whale. [vide *Cete*]
- CEVADILLA** (*Bot.*) Indian Caustic Barley, the seeds of which are extremely burning and caustic.
- CEVA'DO** (*Com.*) or *Cobit*, a measure in India for silk and linen, which is 27 inches in length.—The lesser *cevado* of Agra and Delli is 32 inches; at Cambaia and at Surat, 35 inches.
- CEVILLUS** (*Min.*) or *Ludus*, a stone mentioned by Paracelsus and Helmont.
- CE'YLANITE** (*Min.*) a species of stone of the argillaceous kind, found in the island of Ceylon, the *Scorbus genuinus* of Linnæus.
- CEYX** (*Zool.*) κῆτος, the King-fisher, a bird breeding in the halcyon's nest. *Plin. l. 32, c. 8.*
- C. fa ut* (*Mus.*) a note in the scale.
- CHAA** (*Bot.*) the *Thea Bohea* of Linnæus.
- CHABASITE** (*Min.*) a precious stone of the Zeolite family, of a white and sometimes transparent colour.
- CHABLE'AU** (*Mech.*) a middle-sized rope used to draw craft up a river.
- CHACE** (*Law*) *chacea*, a station in a forest for game, larger than a park, which may be possessed by a subject though a forest cannot. *Bract. l. 4, c. 44.*
- CHACE** (*Mar.*) a term used in many sea phrases: a ship is said "To have a good *chace*," when she is so formed at the stern as to carry many guns. She is said to lie with her foot *in chace* when she lies in the nearest course to meet another ship.—"To give *chace* to a ship," to pursue it.—*Chace-guns*, or *chace-pieces*, guns lying at the head, to fire on a vessel that is pursued, in distinction from the *stern chasers*, which fire on the pursuer.
- CHACE** (*Mech.*) vide *Chase*.
- TO CHACE** (*Sport.*) a term used at the game of tennis, when the ball falls in a part of the court beyond which the opposite party must strike it the next time to gain the stroke.
- CHA'CEA** (*Law*) vide *Chace*.
- CHACE'ARE** (*Archæol.*) to hunt a hare or fox.
- CHA'CEF** (*Mech.*) an earthen pot.
- TO CHACK** (*Man.*) or, to *beat upon the hand*, a term for a horse that is not steady, but tosses up his nose and shakes his head to avoid the subjection of the bridle.
- CHACCOON** (*Mus.*) *Chacona*, or *Chaconde*, an air resembling the saraband.
- CHACURUS** (*Law*) in French *Chasseur*, a horse for the chase; a hound or dog; a courser.
- CHAD** (*Ich.*) or *Shad*, a sort of round fish, the *Clupea alosa* of Linnæus.
- CHÆROPHYLLO similis** (*Bot.*) the *Aphanes arvensis* of Linnæus.
- CHÆROPHYLLUM** (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 2 *Digynia*.
- Generic Characters.** CAL. *umbel* universal spreading; *partial* nearly equal as to the number of rays; *involucre* universal none; *partial* subpentaphyllous; *leaflets* lanceolate; *perianth* proper, obscure.—COR. *universal* nearly uniform; *florets* of the disk, abortive; *proper* of five

petals.—*STAM.* filaments five; *anthers* roundish.—*PIST.* germ inferior; *styles* two; *stigmas* obtuse.—*PER.* none; *fruit* oblong; *seeds* two.

Species. The species are perennials and biennials. Of the first kind are the following; namely—*Chærophyllum sylvestre*, *Cerfolium*, *Myrrhis*, seu *Cicutaria*, &c. Wild Cicely, Cow-weed, or Common Cow Parsley, native of Europe.—*Chærophyllum aromaticum*, *Cerfolium*, *Scandix*, &c. seu *Angelica*, Aromatic Chærophyllum, native of Lusatia.—*Chærophyllum coloratum*, seu *Myrrhis*, native of Illyria.—*Chærophyllum aureum*, *Cerfolium*, *Scandix*, seu *Myrrhis*, &c. Golden Chærophyllum, native of Germany.—*Chærophyllum hirsutum*, seu *Seseli*, *Cerfolium*, &c. native of Switzerland. Of the second kind are the following—*Chærophyllum bulbosum*, *Myrrhis*, *Scandix*, *Bulbocastanum*, seu *Cicutaria*, &c. Tuberous Chervil, native of Germany.—*Chærophyllum aristatum*, &c. native of Japan.—*Chærophyllum temulum*, seu *sylvestre*, &c. seu *Myrrhis*, *Scandix*, *Cerfolium*, &c. Wild Chervil, Rough Cow Parsley, native of Europe.—*Chærophyllum Capense*, native of the Cape of Good Hope.—*Chærophyllum scabrum*, seu *Jamma*, native of Jeddo.

CHÆROPHYLLUM is also the *Scandix* of Linnæus.

CHÆTODON (*Ich.*) a genus of animals, Class *Pisces*, Order *Thoracica*.

Generic Character. Head small; mouth small; teeth setaceous.—*Body* broad, compressed.—*Dorsal and anal fins* rigid, fleshy, and coated with scales.

Species. The principal species are the *Chætodon canescens*, *alepidotus*, *acuminatus*, *cornutus*, &c.

CHAFAR *Alpini* (*Bot.*) a sort of Egyptian melon.

TO CHAFE (*Mar.*) in French *brailler*, *raguer*, to rub or fret the surface of a cable, mast, yard, &c. by the motion of the ship, or otherwise.

CHAFER (*Ent.*) a name used in composition for three sorts of insects, namely, the Cockchafer, [vide *Cockchafer*] the Stag-chafer, [vide *Stag-chafer*] and the Glimmer-chafer. [vide *Glimmer-chafer*]

CHAFERY of an iron mill (*Mech.*) a sort of forge, wherein the iron is wrought, and brought to perfection.

CHAFE-WAX (*Law*) an officer in chancery who prepares the wax for sealing of writs and commissions to be issued out.

CHAFF (*Bot.*) *palea*, a vulgar term for the dry calyx of corn and grass, which is called *gluma* by Linnæus. Chaff is also a dry membranaceous body interposed between two florets in some plants of the class *Syngenesia*.

CHAFF-CUTTER (*Mech.*) a machine for cutting chaff.

CHAFFFEIN (*Archæol.*) a vessel to heat water in.

CHAFFERS (*Law*) wares or merchandise. *Stat.* 3.

CHAFFINCH (*Orn.*) a bird so called because it delights in eating chaff; the *Fringilla Cœlebs* of Linnæus.

CHAFF-WEED (*Bot.*) the *Filago Germanica* of Linnæus, an annual.

CHAFFY (*Bot.*) *paleaceus*, an epithet for a root, receptacle, pappus, stipe, &c.; *radix paleacea*, a chaffy root, having membranaceous scales as many of the filices; *receptaculum paleaceum*, a receptacle with palea chaff or scales, as in *Dipsacus scabiosa*; *pappus paleaceus*, a chaffy pappus, or one having small leaves, as in the *Helianthus*; *stipes paleaceus*, a stipe covered with scales.

CHAFING-DISH (*Mech.*) a utensil for warming meat.

CHAGREEN (*Mech.*) a rough-grained leather.

CHAIARXAMBAR (*Bot.*) the *Cassia fistularis* of Linnæus.

CHAIN-BOAT (*Mar.*) a large boat fitted for getting up mooring-chains, anchors, &c.—*Chain-bolts*, bolts driven through the upper end of the preventer plates, and then fastened to a link of the chains.—*Chain-plates*, iron plates bolted to the ship's side, and to which the chains and dead-

eyes that support the masts by the shrouds are connected.—*Chain-pump*, a sort of pump provided with a chain for pumping water out of the ship's hold. [vide *Pump*]—*Chain-shot*, two shots linked together. [vide *Shot*]—*Chain-wales*, broad timbers jutting out of its sides, serving to spread the shrouds, that they may the better support the masts.

CHAINS (*Mar.*) in French *chaînes de haubans*, strong iron plates fastened through the ship's side to the timbers.—*Top-chains*, in French *chaînes des basses vergues*, are those which preserve the lower yards from falling when in time of battle the ropes are by any means rendered incapable of service.

CHAINS (*Her.*) as badges of dignity, frequently occur in coats of arms, as he beareth "azure a chain pendant in pale or, a label gules," name *Chaindore*.

CHAIN-SHOT (*Mar.*) vide *Chain-Boat*.

CHAIN-SHOT (*Her.*) this weapon is termed, in blazoning, murdering chain-shot, as in the annexed figure, "He beareth azure three murdering chain-shots or." This coat was borne by the Earl of Cumberland next to his paternal coat.

CHAIN-TIMBER (*Carpent.*) a timber of larger dimensions than the common timbers, which is placed in the middle of a building to give it strength.

CHAIR-CARVER (*Mech.*) one employed in carving chairs, bed-posts, and other furniture which passes through the hands of the cabinet-maker or upholsterer.—*Chair-maker*, one who makes the frames of chairs.

CHAIR-MAN (*Polit.*) one who takes the chair, and presides at any meeting.

CHAIR-MAN (*Cus.*) a sedan-man, or one who bears a sedan.

CHAISE (*Mech.*) a light open two-wheeled conveyance.

CHATA (*Nat.*) *χάιτα*, signifies properly the mane of a quadruped, but is used by Ruffus Ephesius to express the hair of the head.

CHALAMEAU (*Mus.*) or *Chalmey*, from *calamus*, a reed; a wind instrument blown through a reed.

CHALA'PA (*Med.*) the same as *Jalap*.

CHALA'SSIS (*Ant.*) a sort of garment so called from its looseness; also the knot wherewith a woman's scarf is tied about her neck.

CHALA'STICS (*Med.*) *χαλαστικά*, from *χαλάω*, to relax; such medicines as by their temperate heat have the faculty of softening or relaxing the parts which, on account of their extraordinary tension or swelling, occasion pains.

CHALA'STRICUM (*Min.*) pure salt-petre, so called from the town Calastra. *Plin.* l. 31, c. 10.

CHALATO'RRII *funes* (*Ant.*) from *χαλάω*, to let down; ropes to let down the sail-yards. *Veget.* l. 4, c. 23; *Turneb. Adv.* l. 24, c. 25.

CHALAZA (*Med.*) *χάλαζα*, or *χαλάζιον*, a disorder in the eyelids, which consists in a tubercle, like *χάλαζαι*, hail-stones, and is well known by the name of a *stye* or *stia*. It is white, hard, and encysted, and differs from the *crithæ*, another species, only in being moveable. The *chalazion* has also been distinguished into scirrhus, cancerous, cystic, and earthy.

CHALAZA (*Vet.*) a disorder to which swine are much exposed, which causes the flesh to be full of tubercles.

CHALAZA (*Nat.*) the treadle of an egg, or the knotty kind of string at each end, whereby the yolk and white are connected together.

CHALAZIAS (*Min.*) a stone like hail, and so cold that no fire can heat it. *Plin.* l. 37, c. 11.

CHALAZ'ION (*Med.*) vide *Chalaza*.

CHALAZOPHY'LACES (*Ant.*) from *χάλαζα*, hail, and

φυλάσσω, to preserve; Grecian priests who pretended to avert hail and tempests by cutting themselves with knives.

CHALBANE (*Chem.*) χαλβάνη, Galbanum.

CHALBOT (*Her.*) or *chabot*, a name given in heraldic bearings to the fish called the Bull-Head, or Miller's Thumb, as in the annexed figure. He beareth "Or three chalbots hauriant gules, name *Chalbot*."

CHALCANTHUM (*Chem.*) or *chalcanthum*, from χαλκος, brass, and άνθος, flower, flowers of brass, or vitriol. *Plin.* l. 34, c. 12.—*Chalcanthum rubefactum*, vitriol calcined to redness.

CHALCAS *paniculata* (*Bot.*) the *Murraya exotica* of Linnæus.

CHALCEDONIUS (*Min.*) Chalcedony; a genus of earths of the *Siliceous* order, consisting of silica, lime, and oxyde of iron. It is hard, light, and shining within, not mouldering in the air, and admitting of a high polish.

Species. The principal species are as follow—*Chalcedonius geminus*, seu *Achates*, Chalcedony found in the islands of Scotland, &c.—*Chalcedonius cacholoniensis*, Kachelony, or Cacholony, found in the Ferroe islands. The Calmucks make their idols of this stone.—*Chalcedonius carneolus*, *Silex ruber*, seu *Carneolus*, Cornelian, or Carnelian, found in layers of agate in Arabia and Hindostan.—*Chalcedonius sardus*, *Silex vagus*, seu *Carneolus albescens*, Sardoine.—*Chalcedonius fasciatus*, Sardonix, found in Ceylon, Ferroe, Iceland, &c. It is grey and pellucid, with milk-white diaphonous bands.—*Chalcedonius onyx*, seu *Achates*, the Onyx, found in the East Indies; it is the hardest of all the species.—*Chalcedonius chrysoprasus*, *Chrysoprasium*, *Achates prasius*, seu *Nitrum fluor*, or Chrysoprase, found in Germany, &c.—*Chalcedonius heliotropius*, *Jaspis heliotropius*, seu *Heliotropium*, Heliotrope, or Blood-stone.

CHALCEDONIUS (*Med.*) an epithet for a medicine which Galen directs to be used for disorders in the ears. *Gal. de Comp. Med. sec. Loc.* l. 3, c. 1.

CHALCEOS (*Bot.*) a kind of thistle. *Plin.* l. 21, c. 18.

CHALCEIOS (*Bot.*) the *Echinops sphærocephalus* of Linnæus.

CHALCETUM (*Bot.*) a place where thistles grow. *Plin.* 26. c. 7.

CHALCIDICE (*Zool.*) χαλκιδίκη, a sort of serpent so called from its resembling chalcedony. *Dioscor.* l. 2, c. 70; *Plin.* l. 29, c. 17; *Gal. de Simpl.* l. 11, c. 1.

CHALCIDICUM (*Archæol.*) Chalcidic, a large stately hall belonging to a court of justice.

CHALCIS (*Ich.*) χαλκίς, a fish of the turbot kind. *Arist. Hist. Animal.* l. 8, c. 25; *Plin.* l. 9, c. 47; *Colum.* l. 8, c. 17.

CHALCIS (*Ent.*) a genus of animals, Class *Insecta*, Order *Hymenoptera*.

Generic Character. Mouth with a horny compressed jaw; thorax gibbous; abdomen rounded.

Species. The principal species are, the—*Chalcis clavipes*, *apiformis*.

CHALCITES (*Min.*) a precious stone of the colour of brass. *Plin.* l. 37, c. 11.

CHALCITIS (*Min.*) from χαλκός, brass; a vitriolic mineral containing copper and iron, of a copperish colour. *Plin.* l. 34, c. 12.

CHALCOGRAPHER (*Mech.*) *chalcographus*, Gr. χαλκόγραφευς, from χαλκός, brass, and γραφευς, an engraver; an engraver on brass or copper.

CHALCOIDES (*Ich.*) a species of *Cyprinus*.

CHALCOLIBANUM (*Min.*) χαλκολιβανον, a sort of fine brass.

CHALCOLITE (*Min.*) a species of ore of the genus of

oxides, of a glass green colour, translucent, soft, and easily frangible; the *Uranium chalcolithus* of Linnæus.

CHALCOPHONOS (*Min.*) χαλκοφωνος, from χαλκος, brass, and φωνή, a voice; a black stone that sounds like brass. *Plin.* l. 37, c. 10.

CHALCOS (*Min.*) vide *Æs*.

CHALCOSMARGDOS (*Min.*) χαλκοσμάργδος, the bastard emerald. *Plin.* l. 37, c. 5.

CHALCUS (*Ant.*) χαλκός, a weight, the 36th part of a dram, 2 gr. the same as *æreolum*; also a coin of seven mites in value. According to Pliny, ten *chalci*, or according to Pollux eight, go to an *obolus*. *Poll. Onom.* l. 9, c. 6; *Plin.* l. 21, c. 34; *Gronov. de Pec. Vet.* l. 3, c. 10; *Cenall. de Pond. apud Græv. Thes. Antiq.* tom. 11, p. 1522.

CHALCUTE (*Chem.*) burnt brass.

CHALDEE (*Gram.*) a dialect of the Hebrew.

CHALDEE paraphrase (*Theol.*) another name for the *Targum*, of which there are three kinds mentioned by Walton, namely, that of Onkelos, that of Jonathan, son of Uzziel, and that of Jerusalem.

CHALDRON (*Com.*) or *chalder*, of coals, a measure of 36 bushels.

CHALICE (*Ant.*) vide *Simpulum*.

CHALICE (*Ecc.*) from *calyx*, the communion cup used at the sacrament of the eucharist in general.

CHALICRATON (*Med.*) from the old word χαλίς, pure wine, and κέραννυμι, to mix; a mixture of wine and water.

CHALINOS (*Med.*) from χαλινός, a bridle; that part of the cheeks which on each side is contiguous to the angles of the mouth.

CHALK (*Min.*) a kind of white fossil, the *Creta scriptoria* of Linnæus, consisting principally of the carbonate of lime, and from which lime is made. It is of two sorts; hard, dry, and strong, which is best for lime; and the soft, unctuous chalk, which is best for lands.

CHALK-CUTTER (*Husband.*) a man that digs chalk.—*Chalk-pit*, a pit in which chalk is dug.

CHALK-STONES (*Med.*) a common name for the calcareous concretions in the hands and feet of people violently afflicted with the gout.

CHALLENGE (*Law*) *calumnia*, Fr. *challenger*; an exception taken either against persons, as jurors, or against things, as a declaration, &c. of which there are two kinds, namely, challenge to the array, and challenge to the polls. *Challenge to the array*, is that which is made to the whole jury as it stands arranged in the panel, or little square panel of parchment, on which the jurors' names are written.—*Challenge to the polls*, i. e. to the several particular persons, or heads, in the array. Challenges likewise are distinguished into principal or peremptory, and challenges *purcause*.—*Peremptory* or *principal challenge* is that which the law allows without cause alleged, or further examination. Between the peremptory and principal challenge there is this difference, that the former is used only in criminal matters, and the latter in civil causes.—*Challenge purcause* is a challenge upon some cause or reason alleged.—*Challenge to the favour* is a species of challenge *purcause* where the plaintiff or defendant is tenant to the sheriff, or if the tenant's son hath married the plaintiff's daughter, with many other such like causes. *Staudf. P. C.* 124, 157; *Lamb. Eiren.* l. 4, c. 14; 1 *Inst.* 156, &c.—*Challenge to fight*, is a provocation to another, either by word or letter, to fight a duel, which is now regarded in law as a breach of the peace. *Hawk. P. C.* c. 63, § 3.

CHALLENGE (*Sport.*) a term applied to hounds who begin to cry at the first scent of their game.

CHALLENGED (*Sport.*) a term in cockfighting when ten staves of cocks are engaged to fight twenty-one battles, and the odd battle is to have the mastery.

- CHAMÆPUS (*Ant.*) the bride was so called who went to the bridegroom's house on foot to be wedded.
- CHALYBEATE *chrystals of tartar* (*Chem.*) vide *Cream of Tartar*.
- CHALYBEATE *waters*, mineral waters in which iron abounds, as the waters of Tunbridge, the Spa, Cheltenham, &c.
- CHALYBEATES (*Med.*) medicinal preparations in which iron forms the principal ingredient.
- CHALYBIS *Rubigo et Sal* (*Chem.*) Salt of Steel. The same as *Sal Martis*.
- CHALYBS (*Med.*) properly Steel, but in medicine is taken for iron.—*Chalybs tartarizatus*. vide *Ferrum tartari*.
- CHAM (*Polit.*) or *Khan*, a title of the emperor or sovereign prince of Tartary.
- CHAMA (*Zool.*) a sort of Æthiopian wolf spotted like the panther, which was exhibited first at the games given by Pompey. *Plin.* 1. 8, c. 19.
- CHAMA (*Conch.*) a genus of animals, Class *Vermes*, Order *Testacea*.
Generic Character. Animal a Tethys.—Shell bivalve.—Hinge with a callous gibbosity.
Species. The principal species are the *Chama cor*, *gigas*, *hippopus*, &c.
- CHAMAË (*Mil.*) a beat of drum or sound of trumpet, given as a kind of signal to the enemy to come to a parley.
- CHAMÆ (*Con.*) *χῆμαι*, a sort of cockle-fish, of which Pliny mentions several varieties. *Plin.* 1. 32, c. 10.
- CHAMÆA'CTE (*Bot.*) from *χαμαι*, upon the ground, and *ἀκτῆ*, the Elder; Dwarf Elder, or Dane wort. *Plin.* 1. 24, c. 8.
- CHAMÆBA'LANUS (*Bot.*) the *Arachis hypogea* of Linnæus.
- CHAMÆBATUS (*Bot.*) from *χαμαι*, on the ground, and *βαίνει*, to go; an epithet for a plant that creeps along the ground; the same as the *Rubus vulgaris* of Linnæus.
- CHAMÆBUXUS (*Bot.*) the same as *Polygala*.
- CHAMÆCEDRYS (*Bot.*) the same as *Abrotanum fœmina*.
- CHAMÆCERASUS (*Bot.*) Dwarf cherry-tree. *Plin.* 1. 15, c. 25.
- CHAMÆCERASUS is a species of the *Prunus* of Linnæus.
- CHAMÆCISSUS (*Bot.*) Ground-ivy. *Plin.* 1. 16, c. 34.
- CHAMÆCISSUS is the *Glechoma hederacea* of Linnæus.
- CHAMÆCISTUS (*Bot.*) the *Andromeda droseroides* of Linnæus.
- CHAMÆCLA'MA (*Bot.*) the *Glechoma hederacea* of Linnæus.
- CHAMÆCHRYSO'COME (*Bot.*) a species of the *Stahelina* of Linnæus.
- CHAMÆCRISTA (*Bot.*) the *Cassia chamæcrista*, *procumbens*, &c. of Linnæus.
- CHAMÆCYPARISSUS (*Bot.*) the Dwarf-cypress. *Plin.* 1. 24, c. 15.
- CHAMÆDAPHNE (*Bot.*) *χαμαιδάφνη*, the herb Periwinkle, a sort of laurel. *Dioscor.* 1. 4, c. 149; *Plin.* 1. 25, c. 30.
- CHAMÆDAPHNE is the same as the *Andromeda* of Linnæus.
- CHAMÆDRIFOLIA (*Bot.*) the *Forskoelia tenuissima* of Linnæus.
- CHAMÆDROPS (*Bot.*) the same as *Chamædryas*, which see.
- CHAMÆDRYTES *vinum* (*Med.*) *χαμαδρύτης οἶνος*; wine which has had chamædryas infused in it. *Dioscor.* 1. 5, c. 51.
- CHAMÆDRYS (*Bot.*) *χαμαίδρυς*, the herb *Germander*, or *English treacle*, which is reckoned efficacious against the bites of serpents. *Theoph.* 1. 10, c. 10; *Dioscor.* 1. 3, c. 112; *Plin.* 24, c. 14.
- CHAMÆDRYS, in the *Linnean System*, the *Dryas octopetala*.

- CHAMÆFYCUS (*Bot.*) the *Ficus humilis* of Linnæus.
- CHAMÆFLIX (*Bot.*) a species of the *Asplenium* of Linnæus.
- CHAMÆ-GENISTA (*Bot.*) the *Genista sagitalis* of Linnæus.
- CHAMÆPAIME (*Bot.*) the same as *Stellaria*.
- CHAMÆYRIS (*Bot.*) the *Iris pumila* of Linnæus.
- CHAMÆITEA (*Bot.*) the straight dwarf willow with narrow leaves.
- CHAMÆLAITES *vinum* (*Med.*) *χαμαιδαίτης οἶνος*, wine impregnated with the *Chamælea*. *Dioscor.* 1. 5, c. 70.
- CHAMÆLARIX (*Bot.*) the *Aspalathus Chenopoda* of Linnæus.
- CHAMÆLÆ'A (*Bot.*) the same as the *Cneorum*.
- CHAMÆLEA'GNUS (*Bot.*) the same as the *Myrtus Brabantica*.
- CHAMÆLEON (*Zool.*) vide *Chameleon*.
- CHAMÆLEUCE (*Bot.*) *χαμαιλεύκη*, the Sussilage, or Colts-foot, reckoned good for pains in the loins. *Plin.* 1. 24, c. 15; *Gal. de Simpl.* 1. 6; *Dodon. Pemptad.*
- CHAMÆLINUM (*Bot.*) the *Linum catharticum*, or purging Flax of Linnæus.
- CHAMÆMALUS (*Bot.*) a kind of dwarf apple-tree, called *Paradise apple*.
- CHAMÆMELUM (*Bot.*) *χαμαίμελλον*, the herb Camomile, so well known for its many medicinal virtues, being stomachic, hepatic, emollient, and carminative. It derives its name from *χαμαι*, dwarf, and *μήλον*, apple, because its flower resembles the apple in smell. *Dioscor.* 1. 3, c. 154; *Plin.* 1. 22, c. 21; *Gal. Exeges. Vocab. Hippocrat.*; *Oribas. Med. Coll.* 1. 11.
- CHAMÆMELUM (*Bot.*) was reckoned as a genus among Botanists formerly, but is classed as a species in the Linnean system under the genus *Achillea*, *Anthemis*, *Arctotis*, *Chrysanthemum*, *Cotula*, and *Matricaria*. *Ger. Herb.*; *C. Bauh. Pin.*; *Park. Theat. Bot.*; *Raii Hist. Plant.* &c.; *Tournef. Instit.*; *Boerhaav. Ind.*
- CHAMÆMESPIBUS (*Bot.*) the *Mespilus chamæmespilus* of Linnæus.
- CHAMÆ-MOLY (*Bot.*) the *Allium chamæmoly* of Linnæus.
- CHAMÆMORUS (*Bot.*) the *Rubus chamæmorus*.
- CHAMÆMYRSINE (*Bot.*) a sort of rush, or Butcher's broom. *Plin.* 1. 15, c. 7.
- CHAMÆNERION (*Bot.*) the same as the *Epilobium*.
- CHAMÆORCHIS (*Bot.*) the *Ophrys Alpina*.
- CHAMÆPERICLYMENUM (*Bot.*) the *Cornus Suecica* of Linnæus.
- CHAMÆPEUCE (*Bot.*) a herb good against a pain in the back. *Dioscor.* 1. 4, c. 126; *Plin.* 1. 24, c. 15.
- CHAMÆPEUCETUINUM *vinum* (*Med.*) *χαμαιπετιτύνης οἶνος*, wine in which bruised leaves of the *Chamæpitys* have been infused. *Diosc.* 1. 5, c. 180.
- CHAMÆPITYS (*Bot.*) *χαμαιπίτυς*, the herb Ground-pine, is a strong diuretic, opens obstructions, and powerfully promotes the menstrual discharge. *Dioscor.* 1. 3, c. 175; *Plin.* 1. 24, c. 6.
- CHAMÆPITYS, in the *Linnean system*, the *Cressa Cretica*.
- CHAMÆPLATANUS (*Bot.*) the dwarf Rose-bag. *Plin.* 1. 12, c. 2.
- CHAMÆPLION (*Bot.*) a name in Oribasius for the *Erysimum*.
- CHAMÆPYXOS (*Bot.*) the same as the *Pseudo-chamæbucus*.
- CHAMÆRA'PHANUM (*Bot.*) the upper part of the root of the *Apium*. *Paul Æginet.* 1. 7, c. 10.
- CHAMÆRHODODENDRON (*Bot.*) or *Chamærhododendros*, the *Azalea procumbens*, &c. of Linnæus.
- CHAMÆRIPHES (*Bot.*) *χαμαριφῆς*, trees growing in Crete and Sicily that resemble the palm. *Theoph. Hist. Plant.* 1. 2, c. 8; *Plin.* 1. 13, c. 4; *Hesychius*.

- CHAMÆROPS** (*Bot.*) a sort of palm which, when drunk in wine, is good for pains in the sides. *Plin.* l. 26, c. 8.
- CHAMÆROPS** (*Bot.*) a genus of plants, Class 23 *Polygamia*, Order 2 *Dioecia*.
- Generic Characters.* CAL. *spathe* universal; *spadix* branching.—PER. proper tripartite.—COR. tripartite; *petals* ovate.—STAM. *filaments* six; *anthers* linear.—PST. *germs* three; *styles* permanent; *stigmas* acute; *perdrupes* three; *seeds* solitary.
- Species.* The species are shrubs, as the—*Chamærops humilis*, *Phoenix humilis*, *Palma minor*, seu *Chamæriphe*, &c. Dwarf Fan palm, native of Sicily.—*Chamærops serrulata*, native of Georgia.—*Chamærops Palmetto*, seu *Corypha*, &c. native of Carolina.—*Chamærops Cochinchinensis*, native of Cochin-china.—*Chamærops excelsa*, seu *Spiro* et *Sodio*.
- CHAMÆRUBUS** (*Bot.*) the *Rubus cæsius saxatilis*, &c. of Linnæus.
- CHAMÆSPARTIUM** (*Bot.*) from *χαμαι* and *σπαρτίον*, Spanish broom; the same as the *Genista tinctoria* of Linnæus.
- CHAMÆSYCE** (*Bot.*) a sort of fig good for all sorts of disorders in the womb. *Theoph. Hist. Plant.* l. 9, c. 12; *Dioscor.* l. 4, c. 170; *Plin.* l. 24, c. 15.
- CHAMÆTETRE** (*Ant.*) or *Chamæterides*, *χαμαιτετρίς*, little images resembling handmaids, or waiting women, sitting on the ground.
- CHAMÆTRACHEA** (*Ent.*) a kind of sea-crab.
- CHAMÆZEYLON** (*Bot.*) *χαμαιζήλον*, a herb, the leaves of which are used in stuffing bed-ticks, &c.
- CHAMÆZELOS** (*Med.*) *χαμαιζήλος*, low, depressed.
- CHAMBAR** (*Med.*) the same as *Magnesia*.
- CHAMBELECH** (*Med.*) an Elixir.
- CHAMBER** of a mortar (*Mil.*) a cavity at the bottom of the bore to receive the charge.—*Bottled chamber*, that part where the powder lies.—*Chamber of a mine*, the place where the charge-powder is lodged that is to be used for blowing up the works.—*Chamber of a battery*, a place sunk under ground to hold the powder, bombs, &c. and to preserve them.
- CHAMBER** (*Her.*) the cylindrical part of ordnance is so denominated, and is sometimes borne in coats of arms without a carriage, as he beareth "Argent a chevron, sable surmounted of another ermine, between the chambers placed transverse the escutcheon of the second, fired proper;" the name *Chambers*.
- CHAMBER** of a Lock (*Mech.*) the space between the gates of a lock in a canal, in which the barge rises and sinks so as to pass the lock.
- CHAMBERDEKIN** (*Law*) or *chamberdeacon*, a name for poor Irish scholars clothed meanly, and having no rule; or rather Beggars who were banished from England. *Stat.* l. *Hen.* 5, c. 7, 8.
- CHAMBERLAIN** (*Law*) *Camerarius*, a term used variously in our laws and statutes for officers of state, as the *Lord Great Chamberlain of England*, to whom belongs the government of the palace of Westminster.—*Lord Chamberlain of the King's household*, who has the oversight and government of all the officers belonging to the king's chamber, and also of the Wardrobe. Chamberlains are also receivers of rents, as the—*Chamberlain of the Exchequer*, who keeps a controlment of the Pells of receipts, and *exitus*, &c.—*Chamberlain of Chester*, who receives the rents and revenues of that city.—*Chamberlain of London*, who is commonly the receiver of the city rents, payable into the chamber.
- CHAMBERLARIA** (*Law*) or *Chamberlangeria*, the office of a chamberlain.
- CHAMBERS** of the king (*Law*) *Regiæ Cameræ*, the havens

- or ports of the kingdom were anciently so called. *Marc. Claus.* p. 242.—*Chambers at Inns of court*, rooms or apartments belonging to the several inns of court, which are occupied by members of the legal profession; whence the term *chamber-practice* for that branch of the practice which can be followed by barristers or pleaders in their chambers, as distinguished from managing or pleading causes in open court.—*Chambers of commerce*, an assembly of merchants and traders who hear and determine all causes relative to commerce, and inspect the bills of entry and exports.
- CHAMBERS** (*Anat.*) two spaces between the crystalline lens and the cornea of the eye, divided off by the iris; that before the iris is termed the *anterior chamber*; and that behind it the *posterior chamber*. They are filled with an aqueous fluid.
- CHAMBRANLE** (*Archit.*) called by Vitruvius *Antepagmenta*, an ornament of brick or wood, which borders the three sides of doors, windows, and chimneys, varying in the different orders of architecture. It is composed of three parts: the top called the *traverse*, and the two sides called the *ascendants*. When the Chambranle is quite plain, it is only a case or frame, as in a door-case and a window frame.
- CHAMBRE peinte** (*Law*) the painted chamber, anciently called St. Edward's chamber.
- CHAMBRE des comptes** (*Law*) a court established by royal authority for examining the accounts of those who received the royal money.
- CHAMBRE** (*Mil.*) in French signifies, besides its ordinary meaning, a hollow space or flaw in pieces of ordnance, for which they are invariably condemned.
- CHAMBRE** (*Mil.*) a term among the French to signify several soldiers lodged in the same room, in barracks, &c.
- CHAMBREL** (*Vet.*) the joint of the upper part of the hinder leg of a horse.
- CHAMBRELECH** (*Med.*) an elixir.
- CHAMBROCH** (*Bot.*) Trefoil.
- CHAMEGA'OME** (*Bot.*) the *Houstonia cærulea* of Linnæus.
- CHAMELÆA** (*Bot.*) the *Daphne myzereum* of Linnæus.
- CHAMELEON** (*Bot.*) *χαμαιλέον*, a thistle so called, according to Dioscorides, from its many colours. It is of two sorts, the one white, which is the Sow-thistle, or Carline; and the other black, which is the Fuller's Teazle. *Theoph. Hist. Plant.* l. 10, c. 13; *Dioscor.* l. 3, c. 11; *Plin.* l. 22, c. 18.
- CHAMELEON**, in the *Linnean System*, the *Atractylis gummifera* of Linnæus.
- CHAMELEON** (*Zool.*) *Chamæleon*, *χαμαιλέον*, a quadruped of the Lizard tribe in India and New Spain, the *Lacerta Chamæleon* of Linnæus, is said to assume the colour of the objects nearest to it. The ancients supposed it to subsist upon the air; but by later discoveries it has been ascertained that it lives upon flies, which it catches dexterously with its long tongue while it hangs on the branches of the trees. *Aristot. Animal.* l. 4, c. 11; *Plin.* l. 8, c. 33; *Acl. Hist. Animal.* l. 2, c. 14.
- CHAMELEOS** (*Ichn.*) a kind of crab-fish.
- CHAMELOT** (*Com.*) vide *Camlet*.
- CHAMEUNIA** (*Med.*) *χαμευνία*, from *χαμαι*, on the ground, and *ἕων*, a bed; a lying on the ground, or on any hard place.
- to **CHAMFER** (*Archit.*) to channel or make hollow.
- CHAMFER** (*Archit.*) or *Chamfret*, a smaller channel or furrow on a pillar.
- CHAMFERED** (*Bot.*) is applied to the stalks of plants which have impressions on them like furrows.
- CHAMFERET** (*Archit.*) *strix*, or *stria*, a kind of channel or gutter on a column. *Vitruv.* l. 3, c. 3.

CHAMFERING (*Carpent.*) or *Chameraining*, cutting the edge or end of any thing aslope or bevelling.

CHAMFRAIN (*Mil.*) an ancient piece of armour among the French to protect the horse.

CHAM'RA (*Bot.*) the *Heliophila circæcioides* of Linnæus.

CHA'MOIS (*Zool.*) or Wild Goat, which inhabits the Alpine mountains, having horns erect, round, and smooth. It is classed by Linnæus under the Antelope tribe, of which it is made a species with the name of the *Antilope rupicapra*.

CHA'MOMILE (*Bot.*) a well known odoriferous plant, the *Anthemis* of Linnæus, which is possessed of a very bitter taste, but many medicinal virtues. [vide *Chamaemelum*]

CHAMOMILLA (*Bot.*) the *Matricaria suaveolens et Chamomilla* of Linnæus.

CHA'MOS (*My.*) or *Chemosh*, בכּוּשׁ, an idol of the Moabites.

CHAMOYS (*Mech.*) or *chamois*, leather, vulgarly called *shammy*, the leather which is made of the skin of the wild goat.

CHAMPA'CA (*Bot.*) or *Champacac*, a large tall tree growing in the East Indies, the *Mechelia Champaca* of Linnæus, which bears very fragrant flowers twice a year, but no fruit till far advanced in age. The flowers boiled in oil make an ointment for the head ache.

CHAMPAIGN (*Her.*) an epithet for a sort of abatement, a *Point champaign*, or a mark of dishonour in the coat of one who kills a prisoner of war, in field, after he has craved quarter.

CHAMPAIN *Lychnis* (*Bot.*) a kind of rose, either red or white.

CHAMPAIN *Line* (*Archit.*) a conjunction of straight lines, formerly called indentations, the sides of which are parallel and similar to each other.

CHA'MPANS (*Mar.*) small flat bottomed vessels with one sail, used in China and Japan.

CHAMPA'RTY (*Law*) or *Champerty, campi partitio*, because the parties agree to divide the lands, &c. in question; a bargain with the plaintiff or defendant in any suit for part of the land, debt, &c. sued for, if the party who undertake it prevails therein.

CHAMPERTORS (*Law*) those who move pleas or suits, or cause them to be moved, either by their own procurement or others, and sue them at their proper cost, upon condition of having part of the land in variance, or part of the gain. 33 Ed. 1. stat. 2.

CHAMPI'GNON (*Bot.*) a red-gilled edible mushroom, the *Agaricus campestris* of Linnæus, an annual.

CHA'MPION (*Law*) *Campio*; he who fights not only in his own cause, but also in defence of another. *Bract.* l. 3, tract. 2, c. 21.—*Champion of the king, Campio regis*, an ancient officer, who at the coronation of our kings, whilst the king is at dinner, rides armed *cap-à-pee* into Westminster-hall, and by the proclamation of a herald, makes a challenge in defence of the king's title to the crown, for which he receives a gilt cup, with a cover, full of wine, as his fee.

CHANCE (*Math.*) vide *Chances*.

CHANCE-ME'DLEY (*Law*) in French *Chance meler*, and Latin *lapsus miscere*, the accidental killing of a man in self defence on a sudden quarrel, without any evil design. *Stamf. P. C.* c. 16; 3 *Inst.* 55-7; 1 *Hawk. P. C.* c. 30, § 1.

CHANCE'L (*Archit.*) *Cancelli*, an enclosed space railed off in courts of judicature.—*Chancel of a church*, part of the choir between the altar and the communion table, and the rails or ballustrade that inclose the place where the minister stands at the celebration of the communion. The chancel is also the eastern part of the church, where the altar is placed.

CHA'NCELLOR (*Polit.*) *Cancellarius*, the chief administrator of justice, and next to the sovereign.—*Chancellor of a bishop, or of a diocese*, one who is appointed to hold the bishop's courts, and to assist him in matters of ecclesiastical law. *Stat.* 37 H. 8, c. 1.—*Chancellor of the Duchy of Lancaster*, an officer before whom, or his deputy, the court of the Dutchy chamber of Lancaster is held.—*Chancellor of the Exchequer*, a great officer of state, who used to sit with the judges in court, and in the Exchequer chamber, for the ordering of things to the king's best benefit. He had also great authority in the management of the king's revenue which seems of late to be his chief business, being commonly the first commissioner of the treasury. He is mentioned in *stat.* 25 H. 8, c. 16; 33 H. 8, c. 39.—*Chancellor of a University*, one who seals the diplomas, or letters of degrees, &c. given in the university. The Chancellor of the University of Oxford is elected by the masters in convocation, and holds his office *durante vita*.—The *Vice-Chancellor*, who officiates for the chancellor, is nominated by the chancellor, and annually elected by the university in convocation.—The *Pro-vice-chancellors*, of which there are four, are chosen by the vice-chancellor from the heads of colleges, to one of whom he deposes the power of acting in his absence. The Chancellor of the University of Cambridge is the same as that of Oxford, except that he does not hold his office *durante vitâ*, but may be elected every three years.—The *Vice-chancellor* is chosen annually by the senate out of two persons nominated by the heads of colleges and halls.—*Chancellor of the Order of the Garter*, and also of other military orders; an officer who seals the commissions of a chapter and assembly of knights, keeps the register, and delivers the acts under the seal of the order.

CHANCELLOR of a Cathedral (*Ecc.*) one who superintends the regular exercise of the cathedral service.

CHAN'CERY (*Law*) *Cancellaria*, the highest court of judicature in this kingdom next to the parliament, was instituted by William the Conqueror. The Lord Chancellor presides over this court, having under him the following officers:—A *Vice-chancellor*, a newly-created officer who sits for the chancellor, or has a separate court if needful.—*Master of the Rolls*, who has the keeping of all the rolls, patents, grants, records, &c. belonging to the court of chancery. He used formerly to act as an assistant to the chancellor.—*Twelve Masters in Chancery*, some of whom sit in court, and take notice of such references as are made to them, to be reported to the court.—*Six Clerks in Chancery*, who transact and file all proceedings by bill and answer.—*The Cursitors of the court*, four-and-twenty in number, who make out all original writs in chancery.—*The Register, or Registrar*, an officer of great importance, having several deputies under him, to take cognizance of all orders and decrees, enter, and draw them up, &c.—*The Master of the Subpœna office* issues out all writs of subpœna.—*The Examiners* are officers who take the depositions of witnesses, and make out copies of them, &c.—*The Clerks of the Affidavits* file all affidavits used in court, without which they will not be admitted.—*The Clerk of the Rolls* attends constantly at the chapel of the rolls to make search for deeds, &c.—*The Clerks of the Petty-bag-office* who make out writs of summons to Parliament, *congé d'elires*, for bishops, patents for customers; liberates, upon extent of staple; with a variety of other offices.—*The Usher of the Chancery*, formerly had the receiving and custody of all money ordered to be deposited in court, and paid it back by order. This office is now discharged by a new officer, called the *Accountant-General*.—*Serjeant at Arms*, he to whom persons standing in contempt are brought up by his substitute as prisoners.—*Warden of the Fleet* receives such prisoners as stand committed by

the court, &c. To the above may be added other officers, as—the *Clerk of the Crown*, the *Clerk and Controller of the Hanaper*, the *Clerk of the Faculties* for dispensations, and the *Clerk of Appeals* on appeals from the court, &c.

The jurisdiction of this court is ordinary or extraordinary.

—The *Ordinary Court* is that wherein the Lord Chancellor, Lord Keeper, &c. in his proceedings and judgments is bound to observe the order of the common law acknowledged in Chancery. This court holds plea of recognizances, writs of *scire facias* for repeal of letters patent, &c.—The *Extraordinary Court*, or *Court of Equity*, proceeds by the rules of Equity.

A suit to the extraordinary court of Chancery is commenced, on the part of a subject, by preferring or filing a *bill* in the nature of a petition to the Lord Chancellor, Lord Keeper, &c.; if, on the part of the crown, the matter of the complaint is offered by way of *information*. In the case of exhibiting a bill against a peer in Parliament, the Lord Chancellor writes a letter called a *letter missive*, to which, if no answer be put in, a *subpena* follows; then an *order* to show cause why a *sequestration* should not issue; and, if he still stands out, a *sequestration* is granted. The same process is followed for a member of the House of Commons, except the letter missive. The form of defence varies according to the foundation on which it is made; if it rest on the matter of the bill therein apparent, it is termed a *demurrer*; if on the foundation of new matter offered, it is a *plea*; if it submits to answer the charges generally, it is an *answer*; if it disclaims all interest in the matters in dispute, it is a *disclaimer*.

CHANCES (*Math.*) a branch of modern analysis, which treats of the probability of certain events taking place by contemplating the different ways in which they may happen or follow. The laws or rules to which this science are to be reduced, are very few or general; and, consequently, leave much to the skill of the analyst. The *probability of an event* is the ratio of the chance for its happening, to all the chances, both for its happening and failing. The *expectation of an event* is the present value of any sum or thing which depends either on the happening or the failing of such an event. Events are *independent* when the happening of any one of them neither increases nor lessens the probability of the rest. Hence, if an event may take place n ways, and each of these be equally likely to happen, the *probability* that it will take place in a speci-

fied way is properly represented by $\frac{1}{n}$; certainty being represented by unity; or, which is the same thing, if the value of certainty be unity, the value of the expectation

that the event will happen in a specified way is $\frac{1}{n}$. For the sum of all the probabilities is certainty or unity, because the event must take place in some one of the ways, and the probabilities are equal, therefore each of them is $\frac{1}{n}$.

If the certainty be a the value of the expectation will be $\frac{a}{n}$.

If an event happen in a ways, and fail in b ways, all being equally probable, the chance of its happening is $\frac{a}{a+b}$,

and the chance of its failing is $\frac{b}{a+b}$.

Examples.

Example 1. The probability of throwing an ace with a single die in one trial is $\frac{1}{6}$; the probability of not throwing an ace is $\frac{5}{6}$; the probability of throwing either an ace or a duce is $\frac{2}{6}$.

Example 2. Let there be n balls, $a, b, c, d,$ &c. thrown promiscuously into a bag, and let it be required to find the probability of any specified number; then, if a person draw out one of them, the probability that it will be a is $\frac{1}{n}$; the probability that it will be either a or b is $\frac{2}{n}$. If two balls be drawn out the probability

that these will be a and b is $\frac{2}{n \cdot n - 1}$, for there are

$n \cdot \frac{n-1}{2}$ combinations of n things taken together, two and two together, and each of these is equally likely to be taken; therefore the probability that a and b

will be taken is $n \cdot \frac{1}{n \cdot n - 1}$, or $\frac{2}{n \cdot n - 1}$.

Example 3. It is required to determine the probability of drawing out of the fifty-two cards in a pack the four aces in four draws, here $m = 4$, and $n = 52$; whence the probability is $\frac{1 \cdot 2 \cdot 3 \cdot 4}{52 \cdot 51 \cdot 50 \cdot 49}$.

Example 4. To find the probability that an individual of a given age will live one year. In Dr. Halley's tables, out of 586 of the age of 22, 579 arrived at the age of 23; hence the probability that an individual aged 22 will live one year is $\frac{579}{586}$, or $\frac{3}{4}$ nearly; and $\frac{578}{587}$, or $\frac{3}{4}$ nearly is the probability that he will die.

Example 5. To find the probability that an individual of a given age will live any number of years. Let a be the number in the forementioned tables of the given age, b, c, d, \dots, x the number left at the end of 1, 2, 3, \dots, t years; then $\frac{b}{a}$ is the probability that the individual will

live one year; $\frac{c}{a}$ the probability that he will live two

years; $\frac{x}{a}$ the probability that he will live t years; also

$\frac{a-b}{a}$, $\frac{a-c}{a}$, $\frac{a-x}{a}$, are the probabilities that he will die in 1, 2, t years.

If two events be independent of each other, and the probability that one will happen be $\frac{1}{m}$, and the probability

that the other will happen be $\frac{1}{n}$, then the probability

that both will happen is $\frac{1}{m \cdot n}$. For each of the m ways,

in which the first can happen or fail, may be combined with each of the n ways in which the other can happen or fail, and there is only one in which both can happen; therefore the probability that this will be the case is

$\frac{1}{m \cdot n}$. The probability that both do not happen is

$1 - \frac{1}{m \cdot n}$, or $\frac{m \cdot n - 1}{m \cdot n}$. The probability that they will

both fail is $\frac{m \cdot 1 \cdot n - 1}{m n}$. The probability that one will happen and the other fail is $\frac{m + n - 2}{m n}$; and the probability that the first will fail and the second happen is $\frac{m - 1}{m} \times \frac{1}{n}$; and the sum of these, or $\frac{m + n - 2}{m n}$, is the probability that one will happen, and the other fail. If there be any number of independent events, and the probabilities of their happening be $\frac{1}{m}$, $\frac{1}{n}$, $\frac{1}{r}$, &c. respectively, the probability that they will all happen is $\frac{1}{m n r}$, &c.

Examples.

Example 1. Required the probability of throwing an ace, and then a deuce with one die. The chance of throwing an ace is $\frac{1}{6}$, and the chance of throwing a deuce in the second trial is $\frac{1}{6}$; therefore the chance of both happening is $\frac{1}{36}$.

Example 2. If six white and five black balls be thrown promiscuously into a bag, what is the probability that a person will draw out first a white, and then a black ball? The probability of drawing a white ball first is $\frac{6}{11}$, and, this being done, the probability of drawing a black is $\frac{5}{10}$, or $\frac{1}{2}$, because there are five white and five black balls left; therefore the probability required is $\frac{6}{11} \times \frac{1}{2} = \frac{3}{11}$.

This subject was partially considered by Huygens, Dr. Halley, and Bernouilli, but much at large by Du Moivre.

CHANCRES (*Med.*) or *cankers*, ulcers arising from a venereal taint, of which they are frequently the first symptom. They appear in general upon the glans and penis, but sometimes in the adjacent parts that are affected.

CHANDELVER (*Mech.*) a branch for candles.

CHANDELPERS (*Fort.*) a kind of moveable parapet consisting of wooden frames, on which fascines are laid as a cover for the workmen while they are at work in the trenches. [vide *Fortification*]

CHANDIRO'BA (*Bot.*) a species of the *Feuillia*.

CHA'NDLER (*Com.*) literally signifies a maker and seller of candles, as a tallow chandler; but is also now used for a dealer in small wares, whence a chandler's shop, a ship chandler, and a corn chandler.

CHA'NDRY (*Archæol.*) an apartment in the house of a King or nobleman for candles.

CHA'NFRAIN blanc (*Man.*) a white mark on the forehead of a horse.

CHA'NFREIN (*Man.*) French for the shaffroon or black nobby, on the forehead of a horse.—*Chanfrein de cheval d'armes*, the front-stall, head-piece of, or forehead-piece of, a barbed horse.

CHA'NFRIN (*Man.*) the fore part of a horse's head extending from under the ears along the interval between the eye-brows down to the nose.

CHANGE (*Mil.*) a word of command given to the man while on the march to shift the firelock from one shoulder to the other.

CHANGE (*Com.*) small coin in exchange for one of larger value, as shillings are the change for a guinea or pound.

CHANGE (*Com.*) vide *Exchange*.

CHANGE (*Hunt.*) when a stag met by chance is taken for the one dislodged and pursued sometime before.

CHANGE the mizzen (*Mar.*) in French *Change l'artimon*, an order to bring the mizzen-yard over the other side of the mast.

CHANGEABLE ROSE (*Bot.*) the *Hibiscus mutabilis* of Linnæus; a plant, so called because the flowers change their colour at certain periods: at their first opening they are white, they then change to a blush-rose colour, and as they decay they turn to a purple. This is otherwise called the Martinico Rose.

CHANGER (*Law*) an officer of the mint who exchanges coin for bullion. *Stat. 2, Hen. 6, c. 16.*

CHANGER, Money (*Com.*) a banker.

CHANGES (*Math.*) the permutations or variations which any number of things may undergo in regard to position or order, &c.; as how many changes may be rung on a given number of bells, or how many different ways any number of letters may be disposed so as to form words, &c. thus, suppose three things, as *a, b, c*, are to be disposed in a certain order, they will undergo six different changes, as in the margin; since each of the three may be combined three different ways with each combination of the other two, i. e. *a* may be combined with *b c* and *c b*, *b* with *a c* and *c a*, *c* with *a b* and *b a*.

CHANGES (*Mus.*) alternate or variegated peals rung on bells.

CHA'NNA (*Ich.*) *χάννος, χάννιν*, a sort of sea fish not unlike the perch, but the flesh is somewhat harder. *Plin. l. 9, c. 25; Castell. Lex. Med.*

CHA'NNEL (*Med.*) vide *Canalis*.

CHA'NNEL (*Geog.*) an arm of the sea running into the land, or a narrow sea between two islands, &c.

CHA'NNEL of a horse (*Vet.*) the hollow between the two nether jaw bones where the tongue is lodged.

CHA'NNEL (*Archit.*) a gutter or furrow of a pillar. But the *Channel in an Ionic chapter* is that part which lies somewhat hollow under the *abacus*, and open upon the *echinus*.—*Channel of the Larmier* is the soffit of a cornice.—*Channel of the volute*, the face of its circumvolution.

CHA'NNELLED (*Bot.*) *caniculatus*, an epithet signifying hollowed above with a deep longitudinal groove, and convex underneath. It is applied to the stem, leaf, and petiole.

CHA'NNELS (*Mar.*) or *Chain-Wales, porte-haubans*; broad thick planks projecting horizontally from the ship's outside, used to extend the shrouds from each other, and from the axis, or middle line of the ship, as a greater security and support to the masts, and to prevent the shrouds from rubbing against the gun-wale.

CHA'NOS (*Ich.*) vide *Channa*.

CHANSCHENA-POW (*Bot.*) the *Bauhinia tomentosa* of Linnæus.

CHA'NSON (*Mus.*) French for a song.

CHANSONE'TTE (*Mus.*) the diminutive of *chanson*, signifying a little song.

CHANSO'NS de geste (*Mus.*) the historical and heroical romances sung from town to town by itinerant minstrels in the thirteenth century.

CHANT (*Mus.*) a species of melody used in cathedrals between an air and recitative, to which the psalms of the day are repeated.—*Chant en Ison*, a name formerly for a species of chant or psalmody consisting of only two sounds.—*Chant sur le Livre*, a part composed from only seeing that on which it is founded.

CHANTANT (*Mus.*) instrumental music which is performed in a smooth, melodious, and singing style.

CHANTE-PLEURE (*Archit.*) French for an outlet made in the wall of a building, which stands near a running stream, in order to let the water that overflows pass freely in and out of the place.

CHANTANE'LE (*Bot.*) a species of the *Agaricus*.

CHA'NTER (*Mus.*) a male singer, or the leader of the choir.

CHANTERE'LLA (*Bot.*) vide *Chantanelle*.

CHANTERE'LE (*Mus.*) the highest or most acute of the

- four strings of a violin tuned to E above the treble cliff note.
- CHANTE'RRES (*Mus.*) certain provençal singers of songs and ballads.
- CHANTICLEE'R (*Zool.*) a name sometimes given to a cock from his clear loud crow.
- CHAN'TIER (*Mech.*) French for a square piece of wood which is used for raising things, particularly in disposing barrels of gunpowder.
- CHAN'TLATE (*Archit.*) a piece of wood projecting beyond the wall for supporting two or three rows of tiles to prevent the rain water from trickling down the sides of the wall.
- CHAN'TOR (*Mus.*) formerly an appellation given to the master of the choir, which is one of the first dignities of the chapter.
- CHANTRESS (*Mus.*) a female singer.
- CHANTRY (*Ecc.*) a chapel anciently joined to a cathedral or parish church, and endowed with an annual revenue for the maintenance of one or more priests to sing masses for the souls of the founders.—*Chantry priests*, those appointed to sing the mass in the chantries.
- CHANTS RO'YAL (*Mus.*) Lyrics on lofty subjects, formerly much used.
- CHA'LOGY (*Lit.*) from *χῶς*, and *λόγος*, a doctrine; the history and description of chaos.
- CHA'OMANCY (*Ant.*) the art of making presages from observations on the air, which was practised by Paracelsus and his followers, who called the air by the name of chaos.
- CHA'OS (*Nat.*) from the old word *χάω*, and *χαίρω*, to gape; the air, according to Paracelsus.
- CHAOS'DA (*Med.*) an epithet for the plague, in the language of Paracelsus.
- CHA'OSA (*Bot.*) the Egyptian name for coffee.
- CHAP (*Anat.*) the upper or lower parts of a beast's mouth.
- CHAPE (*Mil.*) in French *chappe*, and Spanish *chapa*, the little thin plate of silver or iron at the point of a scabbard or sword.
- CHAPE, French for a barrel containing another barrel that holds gunpowder; also for a composition of earth, horse-dung, and wadding, to cover the mouth of a cannon or mortar.
- CHAPE (*Hunt.*) the tip end of a fox's tail.
- CHAPEA'U (*Her.*) a cap of state worn by dukes, of scarlet velvet, lined with ermine, on which a nobleman's coat of arms is borne as on a wreath. [vide *Cap*]
- CHA'PEL (*Ecc.*) *capella*, in French *chapelle*, commonly called a *chapel of ease*, being built for the convenience of parishioners who dwell far from the parochial church wherein divine service is performed. A *free chapel* is a chapel of ease with a settled revenue for the perpetual maintenance of the curate.
- CHAPEL (*Print.*) a printing-office; so called because printing in England was first carried on in a chapel at Westminster Abbey.
- CHA'PELET (*Mil.*) French for a piece of flat iron with three tenons, or ends of timber, which is fixed to the end of a cannon.
- CHA'PELETS (*Man.*) a couple of stirrup leathers made fast to the saddle, each mounted with a stirrup, and joined at top in a sort of buckle, called the head of the chapelet.
- CHAPELLA'NY (*Ecc.*) that which does not subsist by itself, but is built and founded within the precincts of another church, on which it is dependant.
- CHA'PELLING a ship (*Mar.*) in French *coiffer faire chapelle*; the act of turning the ship round when close hauled in a light breeze of wind, in order to bring it to its former position.
- CHAPELO'NIANS (*Print.*) the members or workmen of a printing-office who have paid a certain fine on admittance.
- CHA'PELRY (*Ecc.*) *capellaria*, is to a chapel what a parish is to a church; the precincts and limits thereof.
- CHAPERON (*Her.*) a hood or cap, particularly that worn by the knights of the garter as a part of their habit.
- CHAPERON of a bit mouth (*Man.*) a name applied to scatch-mouths, and all others, except anon-mouths, signifying the end of the bit that joins to the branch just by the banquet.
- CHAPERONS (*Polit.*) seditious parties who sprung up in France during the reign of King John, in 1358.
- CHAPITEAUX (*Mil.*) two small boards which are joined together obliquely, and serve to cover the touch-hole of a piece of ordnance.
- CHA'PITER (*Archit.*) the head or upper part of the pillar. [vide *Capital*]—*Chapiters with mouldings*, those without ornaments, as the Tuscan and Doric.—*Chapiters with sculptures*, those that are set off with leaves, and carved work.
- CHA'PITRES (*Law*) *capitula*, signifying in common law a summary of such matters as are to be inquired of or presented before justices in eyre, justices of assize, or of peace. *Britt. c. 3.* *Chapitres* are now commonly articles delivered by the mouth of the justice in his charge to the jury.
- CHA'PLAIN (*Ecc.*) *capellanus*, a clergyman who performs divine service in a chapel; particularly one who officiates in the domestic worship of the Royal Family, or any of the nobility, who have a private chapel.
- CHAPLAIN, naval (*Mar.*) in French *aumonier*, a clergyman of the established church appointed to perform divine service on board a ship.
- CHAPLAIN General (*Mil.*) an officer appointed for the government of brigade and regimental chaplains, who are recommended by him, and for whose good conduct he is responsible to head-quarters.
- CHA'PLET (*Archit.*) a kind of ornamental moulding; a fillet or little round moulding carved into beads or lines, &c.
- CHAPLETS (*Ecc.*) are used by both the Roman Catholics and Mahometans; those used by the Roman Catholics are a certain number of beads threaded like a bracelet, by which they count their Pater Nosters and Ave Marias.
- CHAPLETS (*Her.*) garlands, or head-bands of leaves, were called by the Romans *coronæ militum*, because they were given to soldiers as rewards of valour. They have since been borne in coats of arms as trophies or ensigns of military prowess, and success, as the field is—"Or on a chief *gules*, three chaplets of the first; the name Morrison, of Hartfordshire." A chaplet of roses in heraldry is composed of more than four roses.
- CHA'PMAN (*Com.*) a merchant, or one who cheapens or offers to purchase any commodity.
- CHAPOURNE'T (*Her.*) a little hood which is occasionally borne in coat-armour.
- CHAPPE' (*Her.*) another name for cloaked, which is now more commonly a chief party *per bend dexter* or *sinister*, or both.
- CHAPPERONNE' (*Her.*) hooded, or provided with a hood like a friar's cowl.
- CHAPPERONS (*Cust.*) or *shafferoons*, a name for the little shields, containing deaths' heads, and other funeral devices, placed on the foreheads of horses that draw hearses at funerals.
- CHA'PTER (*Ecc.*) *capitulum*, a congregation of clergymen. They are so called in a cathedral church under the dean, because they consist of prebendaries and canons, who are *capita ecclesiæ*, chiefs of the church. 25 Hen. 8, c. 21; Co. Lit. 103.—*Chapter-house*, a building near a cathedral or collegiate church, where the chapter is held.

CHA

CHA'PTRELS (*Archit.*) another name for imposts, or those parts on which the feet of pillars stand.
 CHAR (*Ich.*) vide *Charr.*
 CHARA (*Bot.*) a genus of plants, Class 21 *Monococia*, Order 1 *Monandria*.

Generic Character. CAL. *perianth* four-leaved; *leaflets* subulate—COR. none.—STAM. *filaments* none; *anther* globose.—PIST. *germ* turbinate; *style* none; *stigma* oblong.—PER. *crust* ovate; *seed* single.

Species. The species are perennials or annuals: of the first kind are—*Chara vulgaris*, *Hippuris*, seu *Equisetum*, &c. Common or Stinking Chara, or Stone-wort, native of Europe.—*Chara setosa*, native of the East Indies.—*Chara foliolosa*, native of Pennsylvania.—*Chara leglanica*, native of Malabar—*Chara hispida*, *Hippuris*, seu *Equisetum*, &c. Prickly Chara, or Stone-wort, native of Europe.—*Chara tomentosa*, *Equisetum*, &c. seu *Hippuris*, &c. Brittle Chara, or Stone-wort, native of Europe.—*Chara squamosa*, native of Barbary.—*Chara corallina*, native of Malabar.—*Chara flexilis*, seu *Hippuris*, &c. Smooth Chara, or Stone-wort, native of Europe. Of the second kind are the following—*Chara translucens*, native of Britain.—*Chara nidifica*, native of Britain.—*Chara gracilis*, native of Britain. *Ger. Herb.*; *Ruii Hist. Plant.*

CHA'RABE (*Med.*) or *Carabe*, Amber.

CHARA'CIA (*Bot.*) a kind of spurge. *Plin.* l. 26, c. 8.

CHARA'CIAS (*Bot.*) the *Euphorbia Characias* of Linnæus.

CHARACTER (*Lit.*) χαρακτήρ, an impression, from χαραξω, to engrave; any mark which serves as a sign to denote some particular object. Characters are abbreviations, or characters properly so called. *Abbreviations* are the initials, or other letters, which are substituted for the words of which they form a part. [vide *Abbreviations*]

Characters, properly so called, are distinguished according to the subject, into literal, astronomical, mathematical, chemical, botanical, grammatical, musical, chronological, heraldic, and assayers' characters.

Literal Characters.

Literal characters are either such as serve to express the names of things, which are properly called letters; or they are such as express the things themselves by the representation of their image, or similitude, which are called *hieroglyphics*. Literal characters are, according to their use, *particular* or *universal*. *Particular Characters* are the letters which have been framed by different nations for their own use, and which constitute their alphabets. [vide *Alphabet*]—*Universal*, or *real Characters*, are fictitious alphabets, which have been invented by different persons as the basis of a universal language. Of this description is the "Real Character of Bishop Wilkins."

Astronomical Characters.

Characters.	Planets.	Characters.	Planets.
☉	The Sun.	♄	Saturn.
☾	The Moon.	♃	Herschel, or the Georgium Sidus.
⊕	The Earth.	♁	Ceres.
☿	Mercury.	♁	Pallas.
♀	Venus.	♃	Juno.
♂	Mars.	♃	Vesta.
♃	Jupiter.		

Signs of the Zodiac.

Characters.	Signs.	Characters.	Signs.
♈	Aries.	♋	Cancer.
♉	Taurus.	♌	Leo.
♊	Gemini.	♍	Virgo.

CHARACTER.

Characters.	Signs.	Characters.	Signs.
♌	Libra.	♄	Capricorn.
♏	Scorpio.	♋	Aquarius.
♐	Sagittarius.	♊	Pisces.

Phases of the Moon, Aspects, &c.

●	New Moon.	♁	Dragon's Head, or ascending Node.
☾	First Quarter.	♁	Dragon's Trail, or descending Node.
☉	Full Moon.	°	Degrees.
☾	Last Quarter.	'	Minutes.
♁	Conjunction.	"	Seconds.
♁	Opposition.	A.M.	ante meridiem, &c.
♁	Sextile.	[vide <i>Abbreviations</i>]	
♁	Quartile.		
♁	Trine.		

Mathematical Characters.

Mathematical characters are distinguished into the arithmetical, algebraical, and geometrical. *Arithmetical characters* comprehend numerals [vide *Arithmetic* and *Notation*] and characters for weights and measures, of which the ancient may be found under *Pondera* and *Mensuræ*, the modern under *Measure* and *Weight*.—The *algebraical* and *geometrical characters* are as follow:

Algebraical Characters.

A, B, C, &c.	used first by Stifelius for the unknown or required quantities.
A, E, I, O, U, Y.	used by Vieta for the unknown quantities.
B, C, D, &c.	by Vieta for the known quantities.
a, e, i, o, u.	used instead of the capitals by Harriot for the unknown quantities.
b, c, d, &c.	for known quantities.
a, b, c, d, &c.	used by Descartes for the known quantities.
z, y, x, &c.	for the unknown quantities.
x̄, ȳ, z̄.	used by Newton to denote the first order of fluxions of the variable quantities.
ẋ, ẏ, ż.	for the second order of fluxions.
ẍ, ÿ, z̈.	for the third order of fluxions.
d x, d y, d z.	used by Leibnitz for the differentials of the quantities to which the letter d is prefixed.
δ ^x , κ ^x , δδ ^x , κκ ^x , &c.	initials used by Diophantus to denote the powers <i>dynamis cubus</i> , <i>dynamo-dynamis</i> , <i>cubo-cubus</i> , &c. i. e. the 2d, 3d, 4th, &c.
2, 3, 4, 5, 6, &c.	used by Stifelius for <i>res</i> , or <i>cos</i> , <i>zensus</i> , <i>cubus</i> , <i>zenzezensus</i> , &c. i. e. the root, square cube, &c.
√, √, √, &c.	used by Bombelli for the unknown quantity, and the 1st, 2d, 3d powers, &c.
①, ①, ②, ③, &c.	used by Stevinus for 0, 1, 2, 3, &c. powers of the unknown quantity 0.
①/2, ①/3, ①/4, &c.	used by Stevinus for the square root, cube root, 4th root, &c.
②/3, ②/4, &c.	for the cube root of the square and the square root of the cube, &c.
a, a a, a a a, &c.	used by Harriot to denote the quantity and its powers.
a, a ² , a ³ , a ⁴ , &c.	numerical exponents substituted by Descartes in the place of the letters, and now in use.
℞	the sign of radicality, or the sign used to denote the root by Pacioli and others.
√	the sign of radicality substituted by Stifelius and Recorde; thus √x, or the square root of x.
√, √, √, &c.	the sign of the square cube and biquadratic roots used by Scheubel and others.
√q, √c, &c.	the sign of square, cube, &c. substituted by Recorde and others.

Characters.

δ x	<i>Pulvis,</i>	Powder.
⊕	<i>Pumex,</i>	Pumice Stone.
⊕	<i>Purificare,</i>	To purify.
⊕	<i>Putrificare,</i>	To putrify.
Q. E.	<i>Quinta essentia,</i>	Quintessence.
X ⊗	<i>Realgar,</i>	
⊕	<i>Recipiens,</i>	A receiver.
⊕	<i>Regulus,</i>	
⊕	<i>Retorta,</i>	Retort.
ff.	<i>Saccharum,</i>	Sugar.
⊕	<i>Sal alcali,</i>	Alkaline Salt.
⊕ *	<i>Sal ammoniacum,</i>	Sal ammoniac.
⊕	<i>Sal commune,</i>	Common Salt.
⊕	<i>Sal gemmæ,</i>	
⊕	<i>Sal marinum,</i>	Sea Salt.
⊕	<i>Sal nitrum,</i>	Salt Petre, or Nitre.
⊕	<i>Sapo,</i>	Soap.
⊕	<i>Saturnus,</i>	Lead.
S. H.	<i>Sigillare hermetice,</i>	To seal hermetically
⊕	<i>Sol,</i>	The Sun, or Gold.
⊕	<i>Solvere,</i>	To dissolve.
⊕	<i>spiritus,</i>	Spirit.
⊕	<i>Spiritus vini,</i>	Spirit of wine.
⊕	<i>Stannum,</i>	Tin.
S. S. S.	<i>Stratum, super stratum.</i>	
⊕	<i>Sublimare,</i>	To sublime.
BB+	<i>Succinum,</i>	Amber.
⊕	<i>Sulphur,</i>	Sulphur.
⊕	<i>Sulphur philosophorum,</i>	The sulphur of philosophers.
⊕	<i>Sulphur vivum,</i>	Mineral or Live Sulphur.
⊕	<i>Talcum,</i>	Talc.
⊕	<i>Tartarus,</i>	Tartar.
⊕	<i>Terra,</i>	Earth.
⊕	<i>Tinctura,</i>	Tincture.
⊕	<i>Tutia,</i>	Tutty.
⊕	<i>Venus,</i>	Copper.
⊕	<i>Vinum,</i>	Wine.
⊕	<i>Viride æris,</i>	Verdigrease.
⊕	<i>Vitellum ovi,</i>	The Yolk of an Egg.
⊕	<i>Vitriolum,</i>	Vitriol.
XX	<i>Vitrum,</i>	Glass.
⊕	<i>Urina,</i>	Urine.
□ □	<i>Vitriolum album,</i>	White Vitriol.

Botanical Characters.

The botanical characters were introduced by Linnæus, to distinguish annuals from biennials and perennials; and also fertile from barren flowers, &c. [vide *Botany*]

Grammatical Characters.

Grammatical Characters are either such as determine the pronunciation of words, and are called accents [vide *Accents*]; or they are such as distinguish words and sentences from each other, and are called points or stops. [vide *Punctuation*] To these may be added the following, which are employed for different purposes in writing and printing.

()	Par parenthesis	† ‡ & *	Marks of reference
[]	Crotchet	§	Section, Division, or Paragraph.
-	Hyphen	¶	Paragraph.
^	Caret	“ ”	A quotation.
***	To denote something omitted.		

Musical Characters.

Musical characters are employed to distinguish the notes from each other. [vide *Notes*]

Chronological Characters.

The only chronological characters which are not abbreviations, are the Dominical Letters, which mark the Sundays throughout the year. [vide *Chronology*]

Heraldic Characters.

The only heraldic characters, which are not abbreviations, are the letters which are employed to mark the different parts of the escutcheon. [vide *Heraldry*]

Assayer's Characters.

1	1 dwt.	Ⓔ	15 dwt.
ij	2	Ⓕij	18
Ⓔ	5	ⒻⒺ	19
2	10	ob	½ obulus.

CHARACTER (*Med.*) an hereditary disposition to some particular disease.

CHARACTER (*Poet.*) an assemblage of moral qualities combined by the fiction of the poet in one person, the excellence of which consists in its being a lively and just representation of the characters and manners of human life.

CHARACTER (*Nat.*) the property or quality which distinguishes natural objects, as plants, animals, &c. from each other. These are either generic or essential.—*Generic Characters* are those which distinguish many things of a kind, and constitute the genus.—*Essential Characters* are those which distinguish a small number of individuals.

CHARACTERISTIC of a Logarithm (*Math.*) a term used first by Briggs for what is commonly called the index, or exponent; thus 0 is the characteristic of all numbers from 1 to 10, 1 the characteristic of all those from 10 to 100, 2 of those from 100 to 1000, &c.

CHARACTERISTIC letter (*Lit.*) in a Greek verb is that consonant which immediately precedes the varying termination.

CHARACTERISTIC Triangle of a Curve (*Geom.*) a rectilinear right-angled triangle, whose hypotenuse is a part of the curve, as the triangle *Qqr*, for if *pq* be parallel, and indefinitely near to the ordinate *PQ* and *Qr* parallel to the absciss *AP*, then *Qr* is the fluxion of the ordinate *PQ*, and *Qq* the fluxion of the curve *AQ*; hence the elementary triangle *Qqr* is the characteristic triangle of the curve *AQ*, the three sides of which are *ẋẏż*.

CHARADE (*Lit.*) a sort of riddle, the subject of which is a word of one or two syllables.

CHARADRIUS (*Orn.*) *χαραδριος*, a bird, the sight of which cures a person of the jaundice, according to Ælian. *Aristot. Hist. Anim.* l. 9, c. 11; *Hist. Animal.* l. 17, c. 12.

CHARADRIUS, in the Linnæan system the Plover, a genus of birds, Order *Animalia*, Class *Aves Grallæ*.

Generic Character. Bill straight, obtuse.—Feet formed for running.

Species. The principal species are the—*Charadrius hiaticula*, the ringed Plover.—*Charadrius Jamaicensis*, the collared Plover.—*Charadrius morinellus*, the Dotterel.

CHARAG (*Com.*) a tribute paid to the Grand Seigneur by Christians and Jews, who either live or trade in the Turkish territories.

CHARAMA'IS (*Bot.*) the Turkish and Persian name for the *Ambela*.

CHARANTIA (*Bot.*) the *Momordica charantia* of Linnæus.

CHARBON (*Man.*) a little black spot which remains from a large one in the cavity of the corner teeth of a horse about seven or eight years old.

CHARCEDONIUS lapis (*Min.*) the same as *Chalcedonius*.

CHARCOAL (*Chem.*) the substance from wood half burnt.

- Mineral charcoal*, a species of ore of the glance coal family, of a greyish black colour.
- CHARDONE (*Bot.*) the same as *Cinara spinosa*.
- CHARDO'NS *de fer* (*Mil.*) Cramp-irons used in scaling; also iron spikes on a gateway to prevent persons getting over.
- CHARDS of *Artichokes* (*Hort.*) the leaves of fair artichoke plants bound in straw till they lose part of their bitterness and grow white.—*Chards of beet*, white beets which being transplanted into hot beds prepared for them produce the true *chard*.
- CHARE (*Cus.*) from *care* or *charge*, a small piece of work; whence also charewoman, or charwoman, one who goes out by the day to a job.
- CHARE (*Ich.*) vide *Char*.
- CHARE'A (*Archæol.*) a charr, carr, or cart.
- CHARGE (*Law*) signifies that which binds a man to the performance of any thing, in distinction from *discharge*, which is the removal of such charge.—Land may be *charged* divers ways, as by grant of rent out of it, by statutes, judgments, and the like. *Lit.* § 648.—*Charge of horning*, in the Scotch law, the charging of persons to pay or perform certain debts, or duties, by warrants called *letters of horning*.—*Charge to enter heir*, a writing in the Scotch law passing under the signet, and obtained at the instance of the creditor, against the heir of his debtor, for fixing upon him the debt as representing his debtor, or against the debtor himself.
- Charge* is also used to signify the instructions given by the judge who presides on the bench to the grand jury, respecting the articles into which they have to make inquiry.
- CHARGE (*Gun.*) in French *charge*; the quantity of powder and ball, &c. put into the gun at a time, for the purpose of producing a discharge. The charge of powder for proving guns is equal to the weight of the ball, but for service it may be $\frac{1}{2}$, $\frac{1}{3}$, and even less.
- CHARGE (*Elect.*) the accumulation of electric matter on one surface of an electric, as the Leyden Phial, a pane of glass, &c. while an equal quantity passes off from the opposite surface. Electrics are in fact said to be *charged* when the equilibrium of electric matter on the opposite surface is destroyed, by communicating positive electricity to one side, and the negative kind to the opposite side; and on the other hand the electric is said to be *discharged*, when a communication can be made by means of conducting substances between the two opposite surfaces, so as to restore the equilibrium.
- CHARGE (*Paint.*) or *over-charge*, an exaggerated representation of a person, in which the likeness is preserved, but in a form to be ridiculous.
- CHARGE (*Vet.*) an external remedy applied to the body of a horse, or other beast.
- CHARGE of *lead* (*Com.*) 36 pigs, each pig containing 6 stone wanting 2 lbs.
- CHARGE (*Mar.*) a vessel when she draws much water, or swims deep in the sea, is called a ship of charge.
- CHARGE (*Mil.*) taken absolutely signifies an attack of the cavalry; hence "To sound a charge," to give the signal by the sound of the trumpet for the cavalry to begin the attack. But *charge bayonet* is a word of command given to the infantry to rush on the enemy with the fixed bayonet. Also "To charge an enemy," signifies generally to attack, or fall upon him.
- CHARGE (*Her.*) whatever occupies the field in an escutcheon, which is placed either throughout all the escutcheon, or only in some particular part. Charges are either proper, or common. *Proper charges*, so called because they peculiarly belong to the art of heraldry, are also called *ordinaries*, because they are in ordinary use in all coats of arms, and *honourable ordinaries*, because coat armour is much honoured

thereby, being the gifts of emperors, kings, and princes. These are the Cross, Chief, Pale, Bend, Fesse, Escutcheon, Chevron, saltire and barre Orle, Gyron, Pile, Quarter, Quarter Sinister, Canton, Canton-Sinister Flask, Flanch and Voider. These are subdivided into the *more honourable* and the *less honourable*. [vide *Heraldry*]—Common charges are such as are composed of things natural and artificial, and so named because they are open and common to all other arts and sciences as well as this.

CHARGED (*Her.*) an epithet for any ordinary or figure which carries something else, as *azure a saltire, argent charged with another, gules.*" An escutcheon is also said to be charged with the figures represented on it.

CHARGED cylinder (*Gunn.*) the same as *Chamber*.

CHARGED (*Elect.*) vide *Charge*.

CHARGER (*Mil.*) in French *cheval de guerre*, a war-horse, or a horse used by officers, particularly in action or on parade.

CHARGER (*Mech.*) a large sort of dish.

CHARGES (*Her.*) vide *Charge*.

CHARIEN (*Bot.*) the name of a plant, the root of which, if applied to the navel but for a very short time, expels the dead fœtus.

CHARIENTISMUS (*Rhet.*) *χαριεντισμός*, a mode of speech which consists in an abundance of ornament and figure; also a sort of irony which consists in a pleasant piece of raillery, or a jest that bites with pleasantry, as Ruffinianus says. *Dionys. in Jud. Lys.* c. 13, &c.; *Rufin.*

CHARILA (*Ant.*) *χαρίλα*, a festival observed once in nine years by the Delphians, in honour of the virgin Charila, as described by Plutarch in his *Græca Questiones*.

CHARIIOC (*Bot.*) a kind of herb.

CHARIOT (*Mil.*) a car in which armed men used to ride to battle. They were furnished with scythes, hooks, and other offensive weapons.—*Chariots*, in French, are military conveyances answering to what are called in English waggons, as—*Chariot à porter corps*, a four-wheeled waggon used for the carriage of a piece of ordnance that is not mounted.—*Chariot à ridelles*, a four-wheeled waggon with a rail around it for the carriage of bombs, shells, &c.—*Chariots d'une armée*, waggon-train.—*Chariots d'artilleries, des vivres, d'outils à pionniers*, &c. artillery-waggons, provision-waggons, waggons for the pioneers' tools, &c.

CHARIOT (*Mech.*) a sort of light coach with only back seats.

CHARISIA (*Ant.*) *χαρισία*, a festival celebrated in honour of the *χάριτες*, or Graces, with dancing which continued all night; he that was awake the longest was rewarded with a cake, called *πυράμιος*. *Eustath. Odys.* 6; *Meurs. de Fer. Græc. apud Gronov.*; *Thes. Antiq. Græc.* tom. 7.

CHARISTERIA (*Ant.*) *χαριστήρια ελευθερίας*, a thanksgiving-day at Athens upon the twelfth of Boedromion, which was the day whereon Thrasybulus expelled the Thirty Tyrants. *Plut. de Glor. Athen.*; *Meurs. de Fer. Græc. apud Gronov.*; *Thes. Antiq. Græc.* tom. 7.

CHARISTIA (*Ant.*) a festival solemnized on the 11th calends of March, on which relatives by blood and marriage met, in order to preserve a good correspondence, and to accommodate all differences.

Ovid. Fast. l. 2, v. 617.

*Proxima cognati dixere Charistia patres,
Et venit ad socios turba propinqua Deos.*

Val. Max. l. 2, c. 1.

CHARISTICARY (*Archæol.*) a sort of commendatory, or donatory, of one to whom the enjoyment of the revenues of a monastery was given.

CHARISTOLO'CHIA (*Bot.*) a name for the *Artemisia* of Linnæus.

CHARITE' (*Ecc.*) a French term employed as an epithet for some orders of religious, as—*Frères de la charité*, an

order so called from St. Jean de Dieu.—*Charité Chretienne*, an order instituted by Henry III. King of France and Poland, for soldiers who had been disabled in the service of their country.—*Charité de Notre Dame*, an order for women corresponding to that of St. Jean de Dieu for men.

CHARITY (*Hierog.*) is represented in painting by a woman all in red, a flame on the crown of her head with an infant sucking on her left arm, and two others standing up, one of which is embraced with the right. The flame signifies that charity is never idle, but always active; the three children show the triple power of charity, for faith and hope without her signify nothing.

to CHARK (*Mech.*) vide to Charr.

CHARKS (*Com.*) Pit-coal charred, or charked.

CHARLEMAGNE'S Crown (*Her.*) this crown, of which a representation is given in the annexed figure, is still preserved at Nuremberg. It is made of gold, and is divided into eight parts. The fore part is decorated with twelve jewels, all unpolished. On the second is our Saviour sitting between two cherubs with this motto, PER ME REGES REGNANT. On the fourth part is King Hezekiah sitting, holding his head with his right hand, and by his side Isaiah the prophet, with a scroll, ECCE ADJICIAM SUPER DIES TUOS 15 ANNOS: also over the heads of these figures ISAIAS PROPHETA, EZECHIAS REX. The sixth part has the effigy of a king crowned, and a scroll in his hand with these words, HONOR JUDICIUM DILIGIT; as also over his head REX DAVID. The eighth part has a king sitting with his crown upon his head, and on a scroll which he holds in both his hands is this motto: TIME DOMINUM ET REGEM AMATO; as likewise over his head REX SOLOMON. The other parts are occupied with pearls and gems, but the top of this crown is surmounted with a cross bearing this inscription, I. H. S. NAZARENUS REX JUDÆORUM; also in the arch, or semicircle, these words, CHVONRADUS DEI GRATIA ROMANORUM IMPERATOR AUG. which shows that this semicircle was added after Charles' time by the emperor Conrade.

CHARLES' wain (*Ast.*) a name commonly given to the constellation otherwise called *Ursa major*.

CHARLOCK (*Bot.*) a kind of herb with a yellow flower, which grows amongst corn. It is the *Sinapis arvensis* of Linnæus.

CHARME (*Med.*) or *charmis*, a cordial antidote. *Gal. de Antidot.* l. 1, c. 4.

CHARMS (*Myth.*) *carmina*, incantations or verses used by magicians and sorcerers to effect different purposes, but particularly that of exciting, or allaying the passion of love.

CHARNEL (*Cus.*) any place containing flesh or dead carcasses.—*Charnel-house*, a place under a church where the skull and bones of the dead are laid up.

CHARONIUS (*Ant.*) *χαρωνίσιος*, charonian; an epithet for caves, some of which are found in Italy, where the air is loaded with deleterious vapours.

CHARR (*Ich.*) or *Char*, a very small fish of the salmon kind, inhabiting the rivers of England and Switzerland, which feeds on the larva of the gnat tribe: it frequents, in spring and autumn, the shady borders, where it deposits its spawn. There are two sorts of charr, namely, the Silk Charr, *Salmo carpio* of Linnæus, having its sides and belly silvery, and the Red Charr, *Salmo alpinus*, having the belly orange.

CHARRRE of lead (*Com.*) a weight of 30 pigs, each pig containing 70 pounds.

CHARRRE (*Ich.*) vide Charr.

CHART (*Mech.*) in Latin *charta*, [vide *Charta*] is a representation or description of any place in *plano*, or the projection on a plane surface. Charts may be constructed on two principles, namely, by considering the earth as a

large extended flat surface, or by considering it as a sphere. Charts of the first kind are called plain charts; those of the second kind are either Mercator's Charts, or globular charts. *Plain Charts* have the meridians, as well as the parallels of latitude, drawn parallel to each other, and the degrees of longitude and latitude every where equal to those at the equator.—*Mercator's Charts*, so called from the original designer, and otherwise called reduced or projected charts, have the meridians and parallels represented by straight lines like the plain charts; but the degrees on the meridian, or the degrees of latitude, are made to increase towards the poles in the same proportion that the parallel circles are made to decrease. *Globular chart* is a meridional projection, in which the parallels are equidistant circles, having the poles for their common centre, and the meridians are curvilinear, and converging so as to meet in the poles. Charts are also distinguished according to their use, into hydrographic, geographic, chorographic, topographic, heliographic, selenographic.—*Hydrographic chart*, a sheet of large paper, whereon several parts of the land and sea are described, with their respective coasts, harbours, &c. the points of the compass, and the latitudes and longitudes of the places. This is called also a *sea-chart*, because it is particularly constructed for the use of mariners.—*Geographic chart*, a draught of the whole globe of the earth on a plane surface, which is more commonly called a *map of the world*.—*Chorographic chart*, a description or representation of particular countries, or parts of the terrestrial globe.—*Topographic chart*, a description or representation of places or parts of any particular country.—*Heliographic chart*, a representation of the body of the sun, as also of the *macula*, *fecula*, or spots, &c. observed in it.—*Selenographic chart*, a representation of the parts, mountains, valleys, &c. of the moon.

CHARTA (*Ant.*) a name for paper, or the material made of the Egyptian papyrus, was also used for whatever is written upon; whence *charta plumbea*, a sheet of lead. The name has been derived from *χαρην*, to rejoice, or be useful, whence Martial calls it *charta salubatrix*; but with greater probability from *χαράσσω*, to engrave, and the Hebrew or Chaldee חרש, a graver or tool for writing. From this word comes the modern term chart, signifying generally a sheet or plain surface of paper, fitted for the representation of any object, or actually occupied with the representation. The charta among the Romans was distinguished into *charta Augusta*, fine paper; *charta Claudiana*, a thicker kind of paper, now known by the name of royal, or imperial paper; *charta fibula*, blotting paper; *charta hieratica*, the best sort of paper, used only for religious subjects. *Plin.* l. 13, c. 11, 13, &c.; *Voss. de Art. Grammat.* l. 1, c. 37; *Hug. de prim. scrib. Orig.* c. 2.

CHARTA (*Archæol.*) a charter or deed in writing, particularly such public deeds on the part of the King whereby any thing was granted or confirmed to the subject: of this description was *Magna Charta*, *charta pardationis*, &c. [vide *Charter*]

CHARTA *virginea* (*Anat.*) the same as *Amnion*.

CHARTA'GNE (*Mil.*) French for a strong entrenchment, most generally concealed from the enemy.

CHARTER (*Law*) in French *cartel*, a letter of defiance, or challenge to single combat. [vide *Cartel*]

CHARTER (*Law*) *charta*, in French *chartres*, a written evidence of things done between man and man. They are distinguished into charters of private persons and charters of the King.—*Charters of the King*, those by which any grant is passed by the King to any person, or any body politic, as a charter of exemption of privilege, &c. *Bract.* l. 2; *Britt.* c. 39.—*Charters of private Persons* are deeds and instruments for the conveyance of lands, &c. *Co. Lit.* 6.—*Charter of the Forest*, that wherein the laws of

- the forest are comprised, as the charter of Canute, &c. *Flet.* l. 3, c. 14; *Kitch.* 314.—*Charter of pardon*, that by which a man is forgiven for any offence committed against the crown.—*Charter Land*, the same as *Bockland*.—*Charter party*, *charta partita*, in French *chartre partie*, i. e. a deed or writing divided; an indenture or agreement made between merchants and seafaring men concerning their merchandise, &c. It is frequently called “a pair of indentures.” 2 *Inst.* 673.
- CHA'RTERER (*Archæol.*) a freeholder so called in Cheshire.
- CHARTER-LAND (*Law*) vide *Bockland*.
- CHARTER-PARTY (*Law*) vide *Charter*.
- CHA'RTIS *reddendis* (*Law*) an ancient writ lying against one who had charters of feoffment entrusted to him, and refused to deliver them. *Reg. Orig.* 159.
- CHARTOPHYLA'CIUM (*Archæol.*) a place where books and writings are preserved, as the Rolls, &c.
- CHARTO'PHYLAX (*Archæol.*) the Master of the Rolls.
- CHARTERE'UX (*Ecc.*) Carthusian monk.
- CHARTULARIUS-ROLL (*Law*) a chartulary of a register-roll, &c.
- CHA'RVIL (*Bot.*) vide *Chervil*.
- CHASE (*Print.*) an iron frame which serves to receive composed matter from the composing stick.
- CHASE (*Law*) vide *Chace*.
- CHASE (*Mar.*) vide *Chace*.
- CHA'SER (*Mech.*) one who raises figures upon watch-cases, tweezers, lids of snuff-boxes, &c.
- CHASER (*Mar.*) in French *vasseau en chasse*, any vessel pursuing another.—*Bow-chasers*, in French *canons de chasse*, the cannon situated in the forepart of the ship.—*Stern-chasers*, in French *canons de repaite*, those in the hind part of the ship. [vide *Chace*]
- CHASID'ANS (*Theol.*) another name for the Pharisees.
- CHASING (*Mar.*) Fr. *chasser*, the act of pursuing a vessel or fleet.
- CHA'SME (*Med.*) *χάσμα*, or *χασμός*, from *χάωω*, to gape; oscitation, gaping: the same as *Oscitatio*.
- CHASSE (*Mus.*) any instrumental composition written in imitation of hunting music.
- CHASSE (*Mil.*) French for a charge of coarse powder which is thrown into the bottom of the cartouche to facilitate the explosion of the firework which it contains.
- CHASSE (*Mech.*) French for the vibratory motion which puts a body in action.
- CHA'SSELAS (*Bot.*) a species of grape.
- CHASSER (*Carpent.*) a French term among workmen, signifying to fasten pieces of joinery by driving them home with a mallet, &c.
- CHA'SSERY (*Bot.*) a kind of pear like the ambret, which ripens in December.
- CHASSEURS (*Mil.*) French for a select body of light infantry men, which is formed on the left of a battalion in the same manner as our grenadiers are posted on the right. They are required to be particularly light, active, and courageous.—*Chasseurs à cheval*, a species of light horse in the French service.
- CHASSIS (*Mil.*) French for a square platform, made of wood, which is used in mining.—*Chassis de gallerie*, beams of different lengths which the miners use to support the earth in proportion as they advance into the gallery.—*Chassis à secret*, a particular method of drawing lines upon a sheet of folded paper, and folding it in such a manner that when the words which are written in the intervals are read, they appear unintelligible to all but the person who is provided with a correspondent sheet, folded in a similar manner, by the application of which he can decypher the contents of the writing.
- CHASTE-TREE (*Bot.*) the *Vitex agnus castus* of Linnæus, a tree which derives its name from the anteprophodisic quality ascribed to it by the ancients: the moderns, how-
- ever, so far from countenancing this opinion, ascribe to these trees on account of their aromatic pungency, the opposite quality.—*Chaste-wood*, the wood of the Chaste-Tree.
- CHASTE'LA'IN (*Archæol.*) a governor of a castle.
- CHASTELET (*Polit.*) a French term originally signifying a castle, or fortified place, but now applied to the common gaol at Paris.
- CHASTELL'INE (*Her.*) a noble woman.
- CHA'STISEMENT (*Hierog.*) is represented in painting by a furious looking man armed with an axe, in allusion to the Roman *fascæ*.
- CHASTISEMENTS (*Man.*) corrections by a severe application of the aids.
- CHA'STITY (*Hierog.*) is represented in painting and sculpture by a woman of a modest aspect, holding in one hand a whip, as a mark of chastisement, clad in white, like a vestal, to show her purity and innocence. On her girdle is written, *Castigo corpus meum*. At her feet lies Cupid blinded and conquered, with his bow broken.
- CHA'SUBLE (*Ecc.*) a priest's cope used at mass.
- CHAT (*Mil.*) French for an instrument consisting of three sharp prongs, in the shape of claws, which is used for examining pieces of ordnance: it answers to the *searcher* used in the British service.—*Chat* is also a turreted castle. [vide *Cat*]
- CHATE (*Bot.*) the *Cucumis chate* of Linnæus.
- CHATELL'ANY (*Archæol.*) vide *Castellany*.
- CHA'THAM (*Mar.*) a moiety of the duty payable by foreign built ships, and applied to the use of the chest at Chatham.—*Chest of Chatham* was established for the relief of English mariners who are either wounded or superannuated in their country's service.
- CHA'TTELS (*Law*) or *Catals*, *Catalla*, all goods, moveable or immovable, except such as are in the nature of freehold, or parcel of it. They are either *personal*, as gold, silver, plate, household stuff, goods, wares in a shop, cattle, &c. &c.; or *real*, as terms for years of land, the next presentation to a church, &c. &c.
- CHA'TTERER (*Orn.*) the *Ampelis* of Linnæus; a sort of birds that breed and pass their summer within the Arctic Circle. They are remarkable for their red horny appendages formed by the tips of several of the secondary feathers.
- CHA'T-WOOD (*Husband.*) small sticks fit for fuel.
- CHAUD-MEDLEY (*Law*) vide *Chance Medley*.
- CHA'VENDER (*Ich.*) or *Chevin*: the same as *Chub*.
- CHAUFFE (*Mech.*) French for that spot in a founder's furnace which is occupied with the wood; the heat of which, while it is burning, spreads over the whole inside of the furnace.
- CHAULIODO'NTA (*Zool.*) from *χαυλώω*, to throw out, and *ὄδων*, a tooth; an epithet applied to those animals whose teeth grow to a great length out of their mouths, as the Boar and Elephant.
- CHAUMONTE'LLÉ (*Bot.*) a species of pear.
- CHA'UMP'ERT (*Law*) a kind of tenure to the hospital of Bowes, in the isle of Guernsey. *Pa.* 1, 35 *Ed.* 3.
- CHA'UNOS (*Med.*) tumours, *χαυνός*, soft, *lux*; an epithet applied by Hippocrates to the bones.
- CHA'UNTRY rents (*Archæol.*) rents paid to the crown by the servants or purchasers of chantry lands.
- CHAUSSÉ (*Her.*) signifies literally shot, and in blazonry denotes a section in base, the line by which it is formed proceeding from the extremity of the base, and ascending to the side of the escutcheon, which it meets about the *fessepoint*, as if a chief had shoes, as in the annexed figure.

- CHAUSSÉ (*Fort.*) the level of the field, the plain ground.—*Chausse-traps*, vide *Caltraps*.
- CHAUSSÉ-TRAPS (*Her.*) vide *Cheval-Traps*.
- CHAUSSÉE (*Mech.*) French for a paved way, or causeway.

CHAW-STICK (*Bot.*) a shrub, the *Gouinia Dominicensis* of Linnæus.

CHAYE (*Com.*) *Schai*, or *Chay*, the smallest silver coin current in Persia.

CHAYO'TA (*Bot.*) the *Lecticum edule* of Linnæus.

CHE (*Mus.*) an Italian particle signifying *than*, as *Poco più che allegretto*, a little quicker than allegretto.

CHEAP-GILD (*Law*) a restitution made by the hundred or county for any wrong done by one in *plegio*, or by one for whose good behaviour sureties were put in.

CHEAT'NQUAMINS (*Bot.*) or *Chechinquamins*, an Indian fruit resembling a chesnut.

CHECA'YA (*Mil.*) the second officer in command among the Janisaries—the aga's lieutenant.

CHECK-ROLL (*Law*) a roll or book containing the names of such as are attendants on, and in the pay of, the king or any other great personages; as their household servants, &c. *Stat. 19 Car. 2, c. 1.*

CHECK, *Clerk of the* (*Mar.*) an officer in his majesty's dock-yards, appointed to keep check and control the seamen and artificers in his majesty's service.

TO CHECK (*Mar.*) in French *choquer*, to ease off a little of the rope which is too stiffly extended.

CHECK (*Falcon.*) when rooks, pies, or other birds, come within view of a hawk, and she forsakes her natural flight to follow them.

CHECK-MATE (*Sport.*) when the king in the game of chess is so shut up that he cannot escape, by which means the game is ended: also, a movement that kills the opposite men, or hinders them from moving.

CHECKER-WORK (*Mech.*) checkered or set out with divers colours or materials.

TO CHECKER (*Mech.*) or *Chequer*, to diversify in the manner of a chess-board.

CHECKER'ELLI Panni (*Com.*) cloth checkered or diversified in weaving.

CHECKY (*Her.*) small squares of different tinctures alternately, made to represent a chess-board, as in the annexed figure, "He beareth checky *argent* and *sable*; a fess *gules*: name *Sir Thomas Acland, Bart.*"

CHE'DA (*Com.*) a pewter coin made and current in a kingdom of that name in the East Indies, of which there are two sorts; the first, of an octagon figure, weighing $1\frac{1}{2}$ oz. value two sols Tournois; the second, of a round form, value four deniers.

CHE'DDER-CHEESE (*Husband.*) a sort of cheese, so called from Cheddar in Somersetshire, the place where it is made.

CHE'DROPA (*Ant.*) *χεδροπα*, all sorts of corn, pulse, &c.

CHEEKS (*Mech.*) a general name among mechanics for those pieces of timber in any machine which are double, and perfectly corresponding to each other; as the—*Cheeks of a carriage*, the strong planks which form the sides.—*Cheeks of a mortise*, the two solid parts on the sides of a mortise.

CHEEKS (*Mar.*) pieces of timber fixed to the ship's bow and the knee of the head; as—*Cheeks of a block*, the two sides of its shell.—*Cheeks of the mast*, in French *joutereaux*, the parts projecting on each side of the masts to sustain the trestle-trees on which the frame of the top-mast immediately rests; also, the head of the masts which is above the steps.

CHEER (*Cus.*) a testimony of approbation somewhat resembling the *acclamatio* of the Romans.

CHEESE (*Husband.*) the curd of milk separated from the whey, then pressed and hardened, and afterwards left to dry.

CHEESE-CAKES (*Cook.*) a sort of cake made of curds, sugar, butter, and other ingredients.

CHEESE-RENNING (*Bot.*) or Rennet, the *Galium verum* of Linnæus, a perennial.

CHEESE-LIP (*Ent.*) a hog-louse.

CHEESE-LIP (*Nat.*) the stomach-bag of a sucking calf, from which rennet for cheese is obtained.

CHEESE-PRESS (*Mech.*) a press in which the curds are pressed for making cheese.—*Cheese-vat*, the case wherein the curds are pressed into the form of a cheese.

CHEF (*Her.*) the same as *Chief*.

CHEF (*Mil.*) in French, the chief or head of a party, troop, &c. as—*Chef d'Escadre*, a general officer who commands any part of an army or division of a fleet.—*Chef de Files*, the front rank of a battalion.—*Chef de File*, the man who stands on the right of a troop or company.

CHEILO-CACE (*Med.*) *χειλοκάκη*, from *κείλος*, a lip, and *κάκη*, an evil; the lip evil; a swelling of the lips.

CHEIME'TTON (*Med.*) from *χειμα*, winter; a chilblain.

CHEIRANTHUS (*Bot.*) a genus of plants, Class 15 *Tetradynamia*, Order 2 *Siliquosa*.

Generic Characters. CAL. *perianth* four-leaved; *leaflets* lanceolate.—COR. four-petalled; *petals* roundish.—STAM. *filaments* six; *anthers* erect.—PIST. *germ* prismatic; *style* very short; *stigma* oblong.—PER. *siliqua* long; *seeds* very many.

Species. The species are biennials, perennials, or shrubs, and some few annuals; as—*Cheiranthus erysimoides*, *Erysimum*, seu *Leucoium*, Wild Wall-flower, or Stock, a biennial, native of Germany.—*Cheiranthus Helveticus*, *Boccone*, *Hesperis*, seu *Leucoium*, &c. Swiss Wall flower, or Stock, a biennial, native of Switzerland.—*Cheiranthus Alpinus*, *Hesperis*, *Erysimum*, seu *Eruca*, Alpine or Straw-coloured Wall-flower, or Stock, a perennial, native of Lapland.—*Cheiranthus cheiri*, *Leucoium*, *Viola*, seu *Keiri*, &c. Common Wall-flower, a biennial, perennial, or shrub, native of England, &c.—*Cheiranthus fruticosus*, &c. seu *Leucoium*, a shrub, native of Spain.—*Cheiranthus mutabilis*, Broad-leaved Stock-Gilliflower, a shrub, native of Madeira.—*Cheiranthus chius*, *Hesperis*, *Leucoium*, &c. an annual, native of Russia.—*Cheiranthus maritimus*, *Hesperis*, *Leucoium*, &c. Dwarf annual Stock-Gilliflower, an annual, native of the Mediterranean.—*Cheiranthus parviflorus*, an annual, native of Morocco.—*Cheiranthus incanus*, *Leucoium*, *Viola*, Stock-Gilliflower, a perennial or shrub, native of Spain.—*Cheiranthus fenestralis*, Cluster-leaved Stock-Gilliflower, a biennial.—*Cheiranthus annuus*, seu *Leucoium*, &c. Annual Stock-Gilliflower, or Ten-week Stock, an annual, native of Europe.—*Cheiranthus litoricus*, Sea Stock-Gilliflower, an annual, native of the shores of the Mediterranean sea.—*Cheiranthus pinnatifidus*, seu *foliis*, &c. native of Siberia.—*Cheiranthus tricuspidatus*, seu *foliis*, &c. Trifid Stock-Gilliflower, an annual, native of Tripoli.—*Cheiranthus odoratissimus*, a shrub, native of Persia.—*Cheiranthus cuspidatus*, seu *Turritis*, &c. a biennial, native of Tauria.—*Cheiranthus farsetia*, *Farsetia*, *Lunaria*, seu *Thlaspi*, &c. a shrub, native of Egypt.—*Cheiranthus tenuifolius*, Narrow-leaved Shrubby Stock-Gilliflower, a shrub, native of Madeira. *J. Bauh. Hist. Plant.*; *C. Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*; *Raii Hist. Plant.*; *Tournef. Instit.*

CHEIRANTHUS is also the *Heliophila integrifolia* and the *Hesperis lacera* of Linnæus.

CHE'IRI (*Bot.*) the *Cheiranthus cheiri* of Linnæus.

CHEIRI'ATER (*Med.*) *χειριατρός*, from *χειρ*, the hand, and *ιατρός*, a physician, whose office it is to remove maladies by the operations of the hand; what is now properly understood by a surgeon.

CHEIRISMA (*Surg.*) *χειρσμομα*, or *χειρσμός*, from *χειρίζομαι*, to labour with the hand; handling; or a manual operation.

CHEIRIXIS (*Surg.*) χειρῖς, surgery.
 CHEIRODOTA (*Ant.*) vide *Chirodota*.
 CHEIRONIUM (*Med.*) the same as *Cacoethes*.
 CHEIRONOMY (*Med.*) χειρονομία, an exercise mentioned by Hippocrates, which consisted in gesticulations with the hands. *Hippocrat. de Vict. Rat.* l. 2: *Foes. Econom. Hippocrat.*
 CHIRURGUS (*Surg.*) vide *Chirurgeon*.
 CHE'GI (*Chem.*) in the language of Paracelsus, signifies quicksilver, when speaking of minerals; and flowers, when speaking of vegetables.
 CHE'LA (*Surg.*) χεῖλα, a forked probe, mentioned by Hippocrates, which was used in extracting a polypus of the nose.
 CHE'LAË (*Anat.*) χεῖλαί, the extremities of the *cilia*, which touch each other when the eyes are shut. *Ruff. Ephes. de Appell. Part. Corp. Hum.* l. 1, c. 4.
 CHE'LE (*Nat.*) the claws of the crab.
 CHE'LE (*Med.*) fissures in the heels, feet, or pudenda.
 CHE'RIDON (*Anat.*) χελιδόν, signifies, literally, a swallow; but is also applied to denote the hollow at the flexure of the arm.
 CHE'RIDONIA (*Bot.*) a kind of purple fig. *Plin.* l. 15, c. 18; *Columel. de Re Rust.* l. 10.
 CHE'RIDONIA is the *Ranunculus ficaria* of Linnæus.
 CHE'RIDONIAS (*Ant.*) the West wind, so called because it comes with the swallows. *Plin.* l. 2, c. 47.
 CHE'RIDONIUM (*Bot.*) χελιδόνιον, a plant, so called because it blossomed at the time of the swallows appearing. It was formerly called Pile-Wort, because it was supposed to be good for the piles. *Theoph. Hist. Plant.* l. 7, c. 14; *Dioscor.* l. 2, c. 211; *Plin.* l. 25, c. 8; *Schol. in Nicand. Theriac.*; *Schol. in Theocrit. idyl.* 13.
 CHE'RIDONIUM, in the *Linnean system*, a genus of plants, Class 13, *Polyandria*, Order 1 *Monogynia*.
Generic Characters. CAL. *perianth* two-leaved; *leaflets* subovate.—COR. *petals* four.—STAM. *filaments* flat; *anthers* oblong.—PIST. *germ* cylindrical; *style* none; *stigma* headed.—PER. *silique* cylindrical; *seeds* ovate; *receptacle* linear.
Species. The species are perennials and annuals, as—*Chelidonium majus*, Common or Great Celandine, a perennial, native of Europe.—*Chelidonium Japonicum*, native of Japan.—*Chelidonium glaucium*, *Papaver*, &c. Sea Celandine, or Yellow Horned Poppy, a perennial, native of England.—*Chelidonium corniculatum*, &c. *Glaucium*, seu *Papaver*, &c. Red Celandine, or Horned Poppy, an annual native of Hungary.—*Chelidonium hybridum*, seu *Papaver*, Violet Celandine, or Horned Poppy, an annual, native of Europe. *Clus. Hist. Plant. Var.*; *Bauh. Hist. Plant.*; *C. Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Bot.*; *Raii Hist. Plant.*; *Tournef. Inst.*
 CHE'RIDONIUM is also the *Bocconia frutescens*, the *Sanguinaria Canadensis*, and the *Ranunculus ficaria* of Linnæus.
 CHE'RIDONIUS LAPIS (*Min.*) χελιδόνιος λίθος, a stone found, as it is said, in the craw of a young swallow. *Dioscor.* l. 2, c. 60; *Plin.* l. 11, c. 37.
 CHE'LONE (*Bot.*) a genus of plants, Class 14 *Didynamia*, Order 2 *Angiospermia*.
Generic Characters. CAL. *perianth* one-leaved; *divisions* erect.—COR. *monopetalous*; *tube* cylindrical; *throat* inflated; *border* closed; *upper lip* obtuse; *lower* almost equal to the upper.—STAM. *filaments* four; *anthers* incumbent.—PIST. *germ* ovate; *style* filiform; *stigma* obtuse.—PER. *capsule* ovate; *seeds* very many.
Species. The species are perennials, as—*Chelone glabra*, White Chelone, native of Virginia.—*Chelone obliqua*, Red Chelone, native of Virginia, &c.—*Chelone ruellioides*, seu *Ourifia*, native of the Straits of Magellan.—*Chelone barbata*, seu *Ruellioides*, &c. native of Mexico.

Chelone hirsuta, seu *Digitalis*, Hairy Chelone, native of New England.—*Chelone pentstemon*, *Osarina*, *Dracocephalus*, *Digitalis*, *Pentstemon*, &c. seu *Cynorynchium*, native of North America.—*Chelone campanulata*, native of Mexico.
 CHE'LONE (*Surg.*) χεῖλον, a part of a surgical machine, mentioned by Oribasius, which was used for extending a limb. *Oribas. de Machin.* c. 4, 5.
 CHE'LO'NIA (*Mech.*) the cheeks or side-parts of a wind-beam or crane, for the lifting up great stones or timber. *Vitruv.* l. 10, c. 2.
 CHE'LO'NIA (*Min.*) a stone like the eye of an Indian tortoise, which magicians used for divination. *Plin.* l. 37, c. 10.
 CHE'LO'NITES LAPIS (*Min.*) a name of the *Lapis Bufonites*.
 CHE'LO'NIUM (*Nat.*) χεῖλόνιον, a hump-back, so called from its resemblance to the shell of a tortoise.
 CHE'LTENHAM-WATER (*Min.*) arises from a spring near Cheltenham in Gloucestershire, and is one of the most celebrated purging waters in the kingdom. Its heat is in summer 53° to 69°. It consists of a calcareous earth mixed with ochre and a purging salt.
 CHE'LYS (*Mus.*) a stringed instrument resembling the harp.
 CHE'LYS (*Anat.*) χέλυς, a shell; the breast; so called from its resemblance to the back of a tortoise.
 CHE'LYSCION (*Med.*) χελύσκιον, from χέλυς, a short dry cough.
 CHE'ME (*Ant.*) or *Cheme*, a measure containing two small spoonfuls.
 CHEMICAL (*Chem.*) an epithet for what appertains to chemistry, as *chemical characters*. [vide *Characters*] *chemical processes*, and the like.
 CHE'MICE (*Chem.*) the art of casting metals.
 CHEMICI (*Chem.*) chemists, or those who practised the art of chemistry.
 CHEM'IN COUVERT (*Fort.*) vide *Covered way*.—*Chemin des Rondes*, a space between the rampart and the parapet under it, for the rounds to go about it.
 CHEM'ISE (*Fort.*) an obsolete French term for the *revêtement*, made of brick-work.
 CHEMISE *de coup de main* (*Mil.*) shirts which do not go below the waist, and are used in any *coup de main*, that soldiers may distinguish their comrades.
 CHEMISE (*Mason.*) the solidity of a wall from the talus or slope to the stone row; also a lining or casing with stone.
 CHEMISE *fire* (*Mar.*) a piece of cloth steeped in a composition, used to set fire to an enemy's vessel.
 CHE'MISTRY (*Chemia*) is the science which treats of the properties of bodies, and the changes they undergo. The word has been derived from the Arabic word *Kyamon*, the substance or composition of bodies; but, with more probability, it comes from the Greek χέω, to melt; fusion having been originally the first and principal process employed in chemistry.
 Chemistry may be considered under the two general heads of Theoretical Chemistry, and Experimental or Practical Chemistry.

THEORETICAL CHEMISTRY.

Theoretical chemistry, or the theory of chemistry, naturally divides itself into three distinct heads; namely, 1. Of chemical action in general. 2. Of chemical action in respect to particular bodies or substances. 3. Of the chemical analysis of natural bodies.

Of chemical action in general.

The principle by which bodies either tend towards each other, and come in contact, or remain united in one mass, is denominated in general *attraction*, which is of different kinds, according as this attraction acts, either

CHEMISTRY.

at sensible or insensible distances. Of the first kind is the *attraction of gravitation*, by which the planets are supposed to be kept within their orbits, the *magnetic attraction*, and the *attraction of electricity*. Of the second kind, there is the *attraction of aggregation*, commonly called *Cohesion*, and *chemical attraction*, commonly called *Affinity*.

Cohesion.

Cohesion is that principle by which the particles or atoms of matter, of the same kind, attract each other, so as to produce an aggregate body, called a mass. The cohesive force is most strongly exerted in solid bodies; in *liquids* it acts with considerably less energy; and in *aeriform* bodies it does not appear to exist at all, for their particles are mutually repulsive; and, if not held together by pressure, would separate to immeasurable distances. The force of this attraction in solids may be measured by the weight necessary to overcome it: thus, if a rod of wood, glass, or metal, be suspended in a perpendicular direction, and weights be attached to its lower extremity till the rod breaks, the weight attached to the rod just before it broke is the measure of the cohesive force of the rod. In the following table are given the results of experiments which have been made on different solids, showing the number of pounds which are just sufficient to tear asunder a rod of each.

I. Metals.

Steel bar	135,000	Cast tin	4,440
Iron bar	74,000	Bismuth	2,900
Cast iron	50,000	Zinc	2,600
Cast silver	41,000	Antimony	1,000
Cast copper	28,000	Cast lead	860
Cast gold	22,000		

II. Alloys.

Gold 2 parts }	28,000	Brass	51,000
Silver 1 part }		Tin 3, lead 1	10,200
Gold 5, copper 1	50,000	Tin 8, zinc 1	10,000
Silver 5, copper 1	48,000	Tin 4, antimony 1	12,000
Silver 4, tin 1	41,000	Lead 8, zinc 1	4,000
Copper 6, tin 1	55,000	Tin 4, lead 1, zinc 1	13,000

III. Woods.

Locust tree	20,100	Pomegranate	9,750
Jujeb	18,500	Lemon	9,250
Beech and Oak	17,300	Tamarind	8,750
Orange	15,500	Fir	8,330
Alder	13,900	Walnut	8,130
Elm	13,200	Pitchpine	7,656
Mulberry	12,500	Quince	6,750
Willow	12,500	Cypress	6,000
Ash	12,000	Poplar	5,500
Plum	11,800	Cedar	4,880
Elder	10,000		

IV. Bones.

Ivory	16,270	Whalebone	7,500
Bone	15,250	Tooth of sea-calf	4,075
Horn	8,750		

Affinity.

Affinity is that principle by which particles of different kinds are disposed to unite with each other, and to remain in unison. Thus, for instance, an acid unites with a metal, an earth, or an alkaline salt, and with either of these the acid forms one body; which body does not consist of a combination of the properties of the acid, and the metal, &c.; but these losing their original properties on

their union, a new body different from either is formed. This is forcibly exemplified in the case of potash and sulphuric acid. In their separate state each of these bodies is distinguished by striking peculiarities of taste, and other properties. The alkali changes the colour of blue vegetable infusions to green, and the acid turns them red; but when they are combined, the mixture will produce no effect on blue vegetables, and the taste is converted into a bitter.

This power in bodies is called *affinity*, not to denote the cause but the effect; for when an acid spontaneously quits a metal to unite with an alkali, it is said to have a greater affinity to the alkali than to the metal; or in other words, that it will unite with the alkali, in preference to the metal. On account of this seeming choice which certain bodies have to coalesce, by preference with others, affinity has been termed *elective*; and is also distinguished into different kinds, namely, simple, compound, double, disposing, quiescent, divellent, and reciprocal.—*Simple affinity* is when two substances unite merely in consequence of their mutual attraction: thus acetic acid combines with soda, and forms a salt called the acetate of soda.—*Compound affinity* is when three or more bodies, on account of their mutual affinity, unite and form one homogeneous body: thus, if to a solution of sugar and water be added spirits of wine, these three bodies will form an homogeneous liquid by compound affinity.—*Double affinity* is the action of two compound substances, which decompose each other, so as to produce two or more new compounds. If, for instance, nitric acid be added to the sulphate of ammonia, no decomposition takes place, because the sulphuric acid has a stronger affinity than nitric acid for ammonia; but, if nitrate of potash be added, two new bodies are formed, i. e. the potash attracts the sulphuric acid, while the nitric acid solicits the ammonia. This has been explained by the following diagram,

wherein the affinity of potash to sulphuric acid is supposed to be = 62, that of nitric acid to ammonia = 38, that between nitric acid and potash = 50, and that of the sulphuric acid and ammonia = 46. Now, if two lines or two rules be drawn, so as to cross each other, then it will appear that $62 + 38 = 100$, the sum of the affinities between potash, sulphuric acid, nitric acid, and ammonia will be superior to $46 + 50 = 96$, the sum of the affinities supposed to keep the sulphuric acid and ammonia; the potash and nitric acid together.—*Disposing affinity*, otherwise called *intermediate affinity*, or the affinity of an intermedium, is when two substances of different kinds, that show no affinity to each other, do, by the assistance of a third, combine, and unite into an homogeneous body; thus, if concentrated sulphuric acid be poured upon iron, no action will ensue; but, if a little water be added to dilute the sulphuric acid, an action will instantly ensue, and the iron will soon be dissolved.—*Quiescent affinity* is that when two or more bodies being presented to each other, their mutual attractions tend to preserve the original arrangement of their parts, as in the preceding example, the quiescent affinity between the sulphate of ammonia and the nitrate of potash, respectively, were equal to 96.—*Divellent affinity* is that which tends to destroy the old combination, as in the former case the affinities between the potash, sulphuric

CHEMISTRY.

acid, nitric acid, and ammonia, being = 100, are the divellent affinities.—*Reciprocal affinity* is when a body, compounded of two others, is decomposed by a third, which forms with one of the two principles a new compound, that after some time undergoes decomposition by the means of the separated principle; thus, ammonia and magnesia will separate each other from muriatic acid. Tables of affinities have been drawn up by different writers, wherein the name of the substance, whose affinities are required, is placed at the head of the column, and the other substances underneath, in the order of their affinity to the first substance, as in the following example :

Sulphuric Acid.

Barytes, Strontites, Potash, Soda, Lime,	Magnesia, Ammonia, Alumina, Metallic oxides, Water.
--	---

where the sulphuric acid is the substance in question, to which barytes stands the nearest in the list, to show that it has the strongest affinity for sulphuric acid, and will detach it from any of the succeeding substances; strontites stands the next, because it will separate potash, &c. from sulphuric acid, and so on with the rest.

The following Table contains a general view of Affinities :

Acids.	Muriatic Acid.	Nitric Acid.	Sulphuric Acid.	
Fixed alkalis, Volatile alkalis, Absorbent earth, Metals.	Tin, Antimony, Copper, Silver, Mercury, Gold.	Iron, Copper, Lead, Mercury, Silver.	Phlogiston, Fixed alkalis, Volatile alkalis, Absorbent earth Iron, Copper, Silver.	
Absorbent Earth.	Fixed Alkalies.	Volatile Alkalies.		
Sulphuric acid, Nitric acid, Muriatic acid.	Sulphuric acid, Nitric acid, Muriatic acid, Acetic acid, Sulphur.	Sulphuric acid, Nitric acid, Muriatic acid.		
Metals.	Sulphur.	Mercury.	Lead.	
Muriatic acid, Sulphuric acid, Nitric acid, Acetic acid.	Fixed alkalis, Iron, Copper, Lead, Silver, Antimony, Mercury, Gold.	Gold, Silver, Lead, Copper, Zinc, Antimony.	Silver, Copper.	
Copper.	Silver.	Iron.	Antimony.	Water.
Mercury, Calamine.	Lead, Copper.	Antimony, Silver, Copper, Lead.	Iron, Silver, Copper, Lead.	Alcohol, Salt.

Here it is to be observed that the affinity between acids and fixed alkalis is greater than that between acids and volatile alkalis, and so on with the other substances.

Repulsion. The opposite principle to attraction is that of repulsion, by which the particles of matter are supposed to have a constant tendency to recede from each other. This operates like attraction either at sensible or insensible distances. Of the former kind are those of electricity and magnetism; as, for instance, suppose two small pith balls be suspended from an insulated body with a fine thread, so as to touch each other, and that body be charged with electricity, the pith balls will separate immediately; and, in regard to the magnet, there is a power of repulsion between two magnets which is directly opposed to the power they both possess, of attracting other objects to themselves.

On *affinity* depends all chemical action, which consists of decomposition and combination. When the constituent parts of bodies are separated from each other, the bodies are said to be *decomposed*, and the act of separating them is called *decomposition*. On the other hand, when bodies are so intimately united as to form new and distinct products, they are then said to be chemically combined, and the act by which this union takes place is termed *combination*, in distinction from *mechanical mixture*, which is the mere mixture of the bodies. By these two processes all bodies are chemically investigated in two forms, namely, by *analysis* and *synthesis*. *Analysis* is the separation of bodies by a series of decompositions and combinations, so as to come at the knowledge of their constituent parts. *Synthesis* is a similar process, for the purpose of forming new compounds. These two forms of investigation frequently accompany each other, and may be successively employed on the same substances, to prove the accuracy of the investigation: thus Epsom salt may be analyzed, and shown to consist of sulphuric acid and magnesia; or it may be synthetically compounded, by combining magnesia with sulphuric acid, when Epsom salt, in the form of crystals, will be the result.

Chemical investigations are mostly carried on by reducing bodies to a fluid state, which may be effected either by solution or by fusion.

Solution. When a solid disappears in a liquid, or when a solid or a liquid is taken up by an aeriform body, the act and the result are both called a *solution*: thus, when common salt is melted in water, its solution is said to have taken place, and the liquid thus obtained is called the *solution*. The liquid in which the solid disappears is termed the solvent, or *menstruum*; the body which is found capable of undergoing this change is called *soluble*, in distinction from the *insoluble* bodies, or such as are not susceptible of any such change: thus, common salt is a soluble body in water, and chalk is insoluble; but when muriatic acid is the menstruum, then chalk is also a soluble body. The capacity which bodies possess of uniting with and remaining dissolved in any liquid, is called their *solubility*, which is most frequently exemplified by the solution of saline bodies in water. The solubility, however, of salts is found to vary in degree in different substances. When any body has taken up as much of another body as it can dissolve, it is said to be *saturated* with it, and the point at which the liquid ceases to act upon the solid is termed the *point of saturation*, and the solution is termed a *saturated solution*.

Neutralization. When bodies, by reason of their affinity, combine in a solution in such manner that their peculiar properties disappear, they are then said to be *neutralized*: thus when muriatic acid ceases to act on

CHEMISTRY.

lime, both the acid and the lime are said to be *neutralized*.

Precipitation. When bodies are dissolved, mixed, or suspended in a fluid, in such manner as to be separated from that fluid, and made to gravitate to the bottom of the vessel, they are said to be *precipitated*; the matter which is thus separated is called the *precipitate*, and the substance which thus separates another is called the *precipitant*: thus, if into a solution of nitrate of silver be dropped a quantity of liquid potash, a portion of the metallic oxide immediately separates from the solution and falls to the bottom; in this case the potash is the *precipitant*, and the oxide is the *precipitate*. The act of adding any particular substance in such manner as to produce any particular effect is called *treating*; thus the solution of nitrate of silver is *treated* with liquid potash.

Tests. Those substances which have the property of precipitating others are mostly used in detecting the ingredients which enter into any composition, and on that account are called *tests*, or *re-agents*: thus, suppose a single drop of a weak solution of carbonate of potash, and afterwards a few drops of a solution of sulphate of copper be added to a solution that contains arsenic, the presence of arsenic will be manifested by a yellowish-green precipitate. In this case the carbonate of potash and sulphate of copper are called the tests.

Volatilization and Evaporation. Substances which are in a fluid state sometimes fly off in the form of a gas, which is called volatilization, and sometimes in that of vapour, which is called *evaporation*. The *volatilizing* or *evaporating* of part of the water of fluids, in order to increase their strength, is termed *concentration*. This operation is performed on some acids, particularly the sulphuric and phosphoric; and also in solutions of alkalies and neutral salts.

Crystallization. If evaporation be carried on in some solutions so slowly as to afford an opportunity for the parts of the substance to unite regularly as they cool, the solution will be converted into crystals as perfect as those exhibited by nature. This process is known by the name of *crystallization*, which is one of the properties that characterizes the salts.

Water of crystallization. In the act of separating from the water, most of the salts carry away with them a portion of the fluid, which is essential to give them their crystalline form. This is termed their *water of crystallization*, and that which remains after the crystallization the *mother water*. The quantity of water of crystallization varies in different salts; being in some so abundant as to liquify them on the application of heat, which is called the *watery fusion*.

Efflorescence and deliquescence. Some crystals lose their watery ingredient by mere exposure to the atmosphere, when they are said to *effloresce*; others, on the contrary, attract more water, and on exposure to the atmosphere become liquid, which is called *deliquating*, or *deliquescing*, and the property is called *deliquescence*. The following table exhibits the action of atmospheric air on some of the most common salts.

- Pure potash deliquesces.
- soda, ditto.
- Carbonate of potash, ditto.
- Bi-carbonate of potash remains unchanged.
- Carbonate of soda effloresces.
- ammonia, ditto.
- lime, unchanged.
- magnesia, ditto.
- Sulphate of potash, ditto.
- soda effloresces.

- Sulphate of lime, unchanged.
- magnesia, ditto.
- Nitrate of potash, ditto.
- lime deliquesces.
- magnesia, ditto.
- Muriate of potash, unchanged.
- lime deliquesces.
- magnesia, ditto.

Forms of crystals. Every solid that is susceptible of crystallization has a tendency to assume a peculiar shape; thus common salt forms regular cubes; nitre has the shape of a six-sided prism; and alum that of the octahedron. Crystals have been divided, according to their form, into primitive and secondary. The primitive form, otherwise called the *nucleus* of the crystal, has been found to be of six kinds, namely: 1. The parallelepiped, which includes the cube, the rhomboid, and all solids terminated by six faces, parallel two and two. 2. The regular tetrahedron. 3. The octohedron with triangular faces. 4. The six-sided prism. 5. The dodecahedron terminated by rhombs. 6. The dodecahedron with isosceles triangular faces. [vide *Crystallurgy*]

Fusion. Many substances which are not soluble in water, or any other liquid, are notwithstanding reducible to a fluid state by an artificial application of heat, as in the case of metals, glass, and similar bodies. This process is called *fusion*, and when the substance is thus converted into glass, it is called *vitrification*. Those substances which admit of being fused are called *fusible*; but those which resist the action of fire, either altogether, or to a great degree, are called *infusible*, or *refractory*. Sometimes a substance, called a *flux*, is mixed with metallic ores, or other bodies, to promote fusion, as an alkali is mixed with silica to form glass. Ores are fused for the purpose of separating the metals from them, the process of which is termed *smelting*; if they are heated in crucibles to volatilize the sulphur, arsenic, &c. this is called *roasting*. When metals are separated from other metals, in order to obtain them in a state of greater purity, it is termed *refining*; if this be performed by means of another metal, the process is called *cupellation*; thus gold and silver are refined by fusing them with lead in pots called cupels. Sometimes the more fusible matter in a mass is caused to flow while the other remains infusible; this process is called *eliquation*. Metals are frequently refined, or otherwise changed, without fusion, by means of a composition called a cement, with which they are covered: thus iron, by being kept a long time in a certain degree of heat, surrounded by charcoal powder, is converted into steel. This process is called *cementation*.

Heat is applied not only to metals, but to other substances, and in different modes, of which the following are the principal.

Digestion. Digestion is the operation of exposing bodies to the action of a slow heat, that they may be the more gradually changed.

Calcination. Calcination is the reducing of any body to the state of a powder.

Distillation. Distillation is the process by which the volatile are separated from the fixed principles of any substance. When substances are re-distilled, in order to render them more pure, or concentrated, this process is called *rectification*: thus spirit of wine, ether, &c. are rectified by their separation from the less volatile, and foreign matter which debased their properties. That which is procured by distillation is frequently termed *essence*, as the *essential oils* distilled from odoriferous vegetable substances. That which remains in the pot, or retort, after the vola-

tile part has been drawn off, is called the *residuum*, and sometimes the *caput mortuum*.

Sublimation. Sublimation is the process by which certain volatile substances are raised by heat, and then condensed by cold. If the subliming matter concretes into a solid mass, it is called a *sublimate*; if into a powdery form, it is called *flowers*, as the *flowers of arsenic*, the *flowers of antimony*, &c. Sublimation is, in regard to solid bodies, what distillation is to fluids. The principal subjects of this operation are volatile alkaline salts, neutral salts, as *sal ammoniac*, &c.

There are other minor processes connected with the analysis of bodies, as *lixivation*, *reduction*, *edulcoration*, *dulcification*, *elutriation*, *detonation*, *fulmination*, &c. the explanation of which will be found in their respective places.

Compounds. The substances which are formed by means of chemical union are called compounds.

Base. That which forms the basis, as it were, or the principal part in the combination, is called the *base*. Bases are distinguished into—*Acidifiable base*, or that which may be formed into an acid by uniting with some other substance, as phosphorus is the *acidifiable base* in phosphoric acid.—*Acidifying base* is that which forms the acid, in the combination of which kind there is only one substance hitherto known, namely oxygen.—*Metallic bases* are the principal parts which enter into the composition of metals, and which, as far as they are known, and have been named, are distinguished by the termination *um*: thus *potassium*, the base of *potassa*, or *potash*; *sodium*, the base of *soda*; *calcium*, the base of *calx*, or *lime*, &c.—*Salifiable base* is that body with which an acid is combined to form a salt: thus, when we speak of the sulphate of potash, soda, &c. the potash, soda, &c. are the bases.

Nomenclature of compounds. Compounds which have acid properties are denominated *acids*, and are distinguished according to the proportion of oxygen which they contain by the terminations *ic* and *ous*, as *nitric acid* and *nitrous acid*; *sulphuric acid* and *sulphurous acid*, &c.; the former of which denotes the larger dose, or portion of oxygen, and the latter the smaller: when the syllable *hypo* is added to either of these it denotes a degree below it in point of oxidizement; thus, *hyposulphuric acid* is intermediate between the *sulphuric* and *sulphurous acid*. When the compounds possess no sensible properties of an acid, they are distinguished by the termination *ide*, if they are supporters of combustion, or *et*, if they are combustibles, as the *oxide*, *chloride*, or *iodide* of arsenic, sulphuret of potassium, phosphuret of carbon, &c. The different combinations with oxygen, chlorine, and iodine, are distinguished by the prefix *pro*, to denote the first or smallest proportion, *deu* the second, *per* the largest quantity of oxygen, &c. with which the compound can be combined, as the *protoxide*, *deutoxide*, and *peroxide*. Acids for the most part combine with alkalis, earths, and metallic oxides, and form compounds called *salts*; these are distinguished by the termination of *ate* when the acid contains the larger portion of oxygen, and that of *ite* when the acid contains the smaller: thus the combination of sulphuric acid and potassa is a sulphate of potash, and that of sulphurous acid and potassa is a sulphite of potash, &c. Salts are denominated *neutral* when the separate qualities of the component principles are not apparent; but when the acid predominates the prefix *super* is added; but when the base predominates, the prefix *sub*: thus the *sulphate of potash* denotes the salt in its perfect state of neutralization, without any excess of the sulphuric acid or the potash; *supersulphate of potash* is the same salt with an

excess of acid; *subsulphate of potash* is the same salt with an excess of base. Some acids are capable of combining with two bases at once, as tartaric acid, which combines at once with potash and soda, whence the salt is denominated *tartrate of potash and soda*; and this description of salts is called *triple salts*. All the combinations which metals form with one another are called *alloys*, except those formed by mercury with any other metals, which are named *amalgams*.

The substances which are the subjects and objects of chemical action.

Substances have been divided by modern chemists generally into simple and compound.

Simple Substances.

Simple substances were formerly called *elements*, because they were supposed to enter into the composition of all natural bodies, and were reduced by the ancients to the number of four, namely, air, earth, fire, and water. A simple substance is now defined to be one which has not hitherto been decomposed; a definition which, though liable to objections, is sufficiently correct for the purpose of a general treatise like the present. It will therefore be most convenient to treat first of the properties of simple substances, and afterwards of the compounds formed by the union of the simples. Simple substances are subdivided into imponderable and ponderable.—*Imponderable bodies* are such as are of too subtle a nature to be confined in any vessels that can be made. They are called imponderable because they do not sensibly affect the most delicate balance.—*Ponderable bodies* are those which admit of being confined in vessels, and exhibited in a separate state so as to determine their weight and other properties.

Imponderable bodies. The bodies, at present reckoned imponderable, are four; namely, light, heat, electricity, and magnetism, all of which, except the last, are chemical agents, by which the most important phenomena in the chemical science are produced.

Light. Light was considered by Aristotle, and most of the ancient philosophers, to be a property of matter, but the moderns suppose it to be a distinct fluid substance which passes off from luminous bodies, and, entering the eye, render objects visible: in either case the properties of light, as a chemical agent, are the same. The influence of light on different material bodies is evinced in a variety of ways. Plants lose their colour and become white if they are deprived of light, and the progress of vegetation, though not expressly stopped, is, in most cases, very sensibly impeded. The same plants when exposed again to the light recover their verdure and freshness. Hence it is that plants, when situated in rooms, or shady places, always turn their leaves to the light; and that many discous flowers follow the sun in his course, and keep themselves directed towards him from his rising to his setting. Animals in general droop and become unhealthy when they are deprived of light, and sometimes will even die. The complexions of men, in a state of close confinement, become sallow, and their bodies subject to eruptions, and different sorts of diseases: nor is the influence of light less visible on inanimate objects. Certain metallic bodies become combustible when exposed to light. The red oxide of mercury, and of lead become much lighter when exposed to the sun; and the white salts of silver, in the same situation, soon become black, and the oxide is reduced. Nitric acids are decomposed by coming in contact with the light, and other bodies experience similar changes. Almost all bodies have the

property of absorbing light, and some few also of evolving it again unchanged; of this description are the bodies called phosphoric, also putrid animal substances, the glow-worm, and the like. The chemical effects of light, however, vary with the different rays of which light is composed; some of the rays excite heat and promote oxidation, as the red rays most, the green next, and so on, in a diminishing progression, to the violet. A second sort are termed *illuminating rays*, which follow a different order from that of the preceding; the red possessing the least degree; yellow and green the highest degree of this property. The third sort are the *deoxidizing rays*, which are in general the most refrangible of the rays, although this is not invariably the case in regard to all substances that admit of deoxidation.

Heat. The term *heat* is now restricted by chemists to the sensation of heat, and that of *caloric* has been substituted to express the cause of heat, which was formerly looked upon to be a property or affection of matter, but is now considered as a subtle fluid that is capable of insinuating itself into the densest bodies. Heat, considered as a distinct substance, is supposed to exist in two states; namely, in a state of combination, when it is not sensible to our organs; and, in a state of freedom, when it affects animals with the sensation of heat: in the first case, it is called *latent heat*; and, in the second, *sensible or free heat, uncombined caloric, &c.*

The motion of caloric, when it is not interrupted, is found to be equal in velocity to that of light. This motion is of two kinds, one in which it is transmitted from the surface of bodies, called its *radiation*; and the second, that by which it makes its way through bodies called *conduction*, and the power, which bodies possess of admitting the passage of heat, is called their *conducting power*. The bodies themselves are called *conductors*; if they allow the heat to pass freely they are denominated *good conductors*; and those through which the heat passes with difficulty *bad conductors*. Such as are supposed not capable of admitting the passage of heat at all are called *non-conductors*.

Both the radiating and conducting power have been found to vary in different bodies. The following table exhibits the differences of the radiating power; namely,

Lamp black	100	Isinglass	80
Writing paper	98	Plumbago	76
Rosin	96	Tarnished lead	45
Sealing wax	95	Mercury	20+
Crown glass	90	Clean lead	19
China ink	88	Iron polished	15
Ice	85	Tin plate	12
Minium	80	Gold, silver, copper	12

From this table it appears that the metals radiate much less than other substances; and, as the property of reflecting heat has been found to be by an inverse ratio to that of the radiating power, the surfaces of metals are more powerful reflectors than those of the other substances which are mentioned above.

Conducting power of solids. The conducting power of bodies is still more strikingly evinced than their radiating power, and arises from their affinity for caloric, and the property they have of combining indefinitely with additional doses of it. All solids are conductors of caloric, but they possess this property in very different degrees. All metallic substances are good conductors, but not all equally so. The following metals are set down in the order of their conducting power:

Silver,		Copper,		Platina,		Steel,
Gold,		Tin,		Iron,		Lead.

Stones are reckoned the next best conductors, but brick is a worse conductor than other sorts of stone. Glass differs but little from stones in its conducting power; but dried woods, which come next in succession, vary much with regard to each other, as may be observed from the following table, in which the conducting power of water is supposed = 1.

Water	1.00	Pear-tree	3.32
Ebony	2.17	Birch	3.41
Crab Apple	2.74	Oak	3.63
Ash	3.08	Pitch Pine	3.75
Beech	3.21	Alder	3.84
Hornbeam	3.23	Pine	3.86
Plum-tree	3.25	Fir	3.89
Femal Oak	3.26	Lime-tree	3.90

Charcoal is a bad conductor, and all porous substances, as cork, and the like; but the worst conductors of all are feathers, silk, wool, and hair, which render them peculiarly fit for clothing, because they do not allow the heat of the body to be carried off by the cold external air. It has been found that the conducting power of these bodies is inversely as the fineness of their texture. The conducting power, however, of all solid bodies is so far limited as they are more or less exposed to a change in their state from the action of caloric. Bodies which, in the common temperature of the atmosphere, have the power of conducting caloric, lose that power when heated to the temperature at which they change their state; thus, at the temperature of 60°, sulphur is a conductor; but, when heated to 218°, or the point at which it melts, or is volatilized, it is no longer a conductor.

Conducting power of fluids. Liquids and gaseous bodies are conductors as well as solids, but in a less degree. The relative conducting powers of mercury, water, and linseed are as follow:

<i>Equal Weights.</i>		<i>Equal Bulks.</i>	
Water	1.	Water	1.
Mercury	2.	Mercury	4.8
Linseed oil	1.111	Linseed oil	1.085

As the cooling of hot bodies in gases is produced by a variety of causes, besides that of the conducting power of their fluids, it is difficult to form an estimate of their relative intensities as conductors.

Carrying power of liquids. Besides the conducting power, liquids have also a power which has been called their *carrying power*, by which the caloric is communicated, not from particle to particle, as in the case of conduction, but by the particles coming all individually in contact with the heating body. This, however, can only take place when the caloric is applied to the lower stratum of the fluid when it makes its way upwards independent of the conducting power; for, when the caloric is applied to the surface of the liquid, it can make its way downwards only, as in solids, by the conducting power of the fluid.

Distribution of caloric. As a consequence of the fore-mentioned properties in caloric, it has also been found to possess the tendency of distributing itself in such a manner, among all contiguous bodies, as that they should all acquire, in a certain time, the same temperature; thus, if one body be raised to the temperature of 200°, another to that of 100°, and a third to 60°; and if these three bodies be placed in the temperature of 80°, they all indicate in a short time the same temperature. The bodies which were at the temperature of 200° and 100° are reduced to 80°, and that of 60° rises to 80°. This is otherwise called the *equilibrium of caloric*.

CHEMISTRY.

The effects of caloric. The effects which caloric produces upon other bodies, either by entering into them, or by separating them, are reducible to three kinds of changes; namely, changes in bulk, changes in state, and changes in combination.

Expansion of caloric. One of the most general properties of caloric is, that by addition or abstraction in any degree it produces a corresponding change in the bulk of bodies; the addition of heat increasing their bulk, and the abstraction diminishing it. This property, however, which has been distinguished by the name of *expansion* to denote the positive effect of caloric, is not the same in all bodies. The expansion of gaseous bodies is the greatest of all, that of liquids is the next in degree, but that of solids is the smallest of all.

Expansion of gaseous bodies. By experiments it has been ascertained that all gaseous bodies whatever undergo the same expansion by the same additional heat, supposing them to be placed in the same circumstances: on this principle, therefore, the following table, which gives nearly the bulk of a given quantity of air at all temperatures, from 32° to 212°, will suffice to illustrate that of other bodies:

Temp.	Bulk.	Temp.	Bulk.
32°	1,000,000	73°	1,085,416
33	1,002,083	74	1,087,499
34	1,004,166	75	1,089,383
35	1,006,249	76	1,091,666
36	1,008,333	77	1,093,749
37	1,010,416	78	1,095,832
38	1,012,499	79	1,097,916
39	1,014,583	80	1,099,999
40	1,016,666	81	1,102,083
41	1,018,749	82	1,104,166
42	1,020,833	83	1,106,249

45	1,027,083	86	1,112,499
46	1,029,166	87	1,114,583
47	1,031,249	88	1,116,666
48	1,033,333	89	1,118,749
49	1,035,416	90	1,120,833
50	1,037,499	91	1,122,916
51	1,039,583	92	1,124,999
52	1,041,666	93	1,127,083
53	1,043,749	94	1,129,166
54	1,045,833	95	1,131,249
55	1,047,916	96	1,133,333
56	1,049,999	97	1,135,416
57	1,052,083	98	1,137,493
58	1,054,166	99	1,139,583
59	1,056,249	100	1,141,666
60	1,058,333	110	1,162,499
61	1,060,416	120	1,183,333
62	1,062,499	130	1,204,166
63	1,064,583	140	1,224,999
64	1,066,666	150	1,245,833
65	1,068,749	160	1,266,666
66	1,070,833	170	1,287,499
67	1,072,916	180	1,308,333
68	1,074,999	190	1,329,166
69	1,077,083	200	1,349,999
70	1,079,166	210	1,370,833
71	1,081,249	212	1,374,999
72	1,083,333		

Expansion of liquids. The expansion of liquids is not equable like that of gaseous bodies. Liquids that are most readily brought to the state of vapour, are found to expand the most. With the same given temperature,

the expansion of water is greater than that of mercury; and the expansion of alcohol is greater than that of water. The following table exhibits the ratio of expansion of several liquids, as they have been ascertained by different experiments.

Rate of Expansion of different Liquids in given Temperatures

Temp.	Mercury.	Linseed Oil.	Sulphuric Acid.	Nitric Acid.	Water.	Oil of Turpentine.	Alcohol.
32°	100,000	100,000	—	—	—	—	—

212	101,835	107,250	—	—	104,577	—	—

Expansion of Solids. The expansion of solid bodies is so small, as to render a nice apparatus necessary for the purpose of ascertaining it. The following table exhibits the results of different experiments upon this part of chemistry.

	Temp. 32°.	Temp. 212°.	White Heat.
Platina	120,000	120,104	—
Antimony	120,000	120,130	—
Steel	120,000	120,147	123,428
Iron	120,000	120,151	123,428
Iron	120,000	—	121,500
Cast Iron	120,000	—	122,571
Bismuth	120,000	120,167	—
Copper	120,000	120,204	—
Cast Brass	120,000	120,000	—
Brass Wire	120,000	120,232	—
Tin	120,000	120,298	—
Lead	120,000	120,344	—
Zinc	120,000	120,355	—
Hammered Zinc	120,000	120,373	—
Zinc . 8	120,000	120,123	—
Tin . . . 1			
Lead . 2	120,000	120,247	—
Tin . . . 1			
Brass . 2	120,000	120,247	—
Tinc . . 1			
Pewter	120,000	120,274	—
Copper 3	120,000	120,218	—
Tin . . . 1			

The expansion of glass has been more closely examined than that of other bodies, of which examination the following table exhibits the results.

Temp.		Temp.	
32°	100,000	150°	100,044
50	100,006	167	100,056
70	100,140	190	100,069
100	100,003	212	100,083
120	100,033		

CHEMISTRY.

The expansion of a gaseous body by the accumulation of caloric is shown by confining a quantity of air in a bottle, but not sufficient to fill it completely; after which, if the bladder be exposed to heat, the confined air expands, and the bladder becomes fully distended; but when it is cooled again, the air resumes its former bulk, and the bladder its original flaccid state. The expansion of liquids is exemplified by spirit of wine in a glass vessel having a slender neck. On the application of heat the liquid in the body of the vessel is expanded, and rises in the neck; and when the heat is abstracted, the liquid becomes contracted, and returns to its original bulk. The fixing of iron hoops on carriage wheels affords a familiar but striking example of the expansion of the solids. The hoop being made somewhat smaller than the wheel for which it is intended, is heated until it becomes of the suitable size, when it is fixed on; and afterwards, being cooled by the application of water, it contracts, and is thereby fast bound to the wood.

Thermometer. On the expansive property of bodies by the application of caloric depends the construction of the thermometer, which is employed for the measurement of the relative temperature of bodies. It consists of a hollow tube of glass, blown at one end in the shape of a hollow globe or bulb. This bulb, and part of the tube, are then filled with any liquid which has been first boiled to expel the air; after which, the open end of the tube being hermetically sealed, the rising of the liquid indicates an increase of heat, and its fall a diminution; the several proportions of which are marked by means of the degrees into which the tube is divided. The construction of the scale for this instrument was the result of long experience and observation; by which it was found, that as snow at all times melts at the same temperature, and water also boils at the same temperature, then by marking the two points at which the liquid stands in these two opposite cases, as for example, 0 for the freezing, and 100 for the boiling point; and by dividing the intermediate spaces into equal parts, a scale was procured which could be applied to all such thermometers, and also be extended to any distance above the boiling-point, and below the freezing point. The liquid most frequently used for the thermometer is mercury, because it is the most equable in its expansion.

Pyrometer. To measure the higher degrees of heat, to which the thermometer cannot be applied, another instrument has been invented, called the pyrometer, which consists of two pieces of brass fixed on a plate, so as to be 6-10ths of an inch asunder at one end, and 3-10ths at the other, which serves as a gauge to measure certain pieces of baked clay before and after they have been heated; by which the difference in their dimensions is to be observed, and consequently the relative intensity of heat to which they were exposed may be ascertained. The pieces of clay must have been prepared in a red heat, and must be of given dimensions. A scale is marked on the pieces of brass, each of which is equal to 130° of Fahrenheit.

Exceptions to expansion by heat. Some apparent exceptions have been observed to this law of expansion by means of caloric, as in the case of water, which, when cooled down within about 7° of the freezing point, instead of contracting in consequence of the deprivation of heat, actually expands; alumine also contracts on being heated; and cast-iron, bismuth, &c. when fully fused, are more dense than when solid; for, as soon as they come into the latter state they decrease in density, and expand in the act of cooling; whence the sharpness of figures upon iron which has been cast in moulds, compared with that of others. But the expansion of these bodies is not con-

sidered as an exception to the general law, that bodies increase in bulk by the addition of heat, and decrease by its abstraction; for the expansion is here supposed to arise not from the diminution of the heat, but from the change of state which these bodies undergo in passing from liquids to solids.

Change of state in bodies by caloric. The three changes produced in the state of bodies by means of caloric are, the conversion of solids into fluids, that of fluids into solids, and, lastly, that of fluids into aeriform bodies.

Fusion, or fluidity. When solid bodies are submitted to the action of caloric to such a degree as to destroy their power of aggregation, they are reduced to a state of fluidity. The point of temperature at which a solid liquifies is called the *melting point*, which varies in different bodies, as may be seen from the following table:

Bodies.	Melting point.	Bodies:	Melting point.
Lead	612°	Ice	32°
Bismuth	476	Milk	30
Tin	442	Vinegar	28
Sulphur	218	Blood	25
Wax	142	Oil of bergamot	23
Bleached ditto	155	Wines	20
Spermacetti	112	Oil of turpentine	14
Phosphorus	108	Mercury	39
Tallow	92	Liquid ammonia	46
Oil of anise	50	Ether	46
Olive oil	36		

Fluidity is now generally supposed to be occasioned by the combination of a certain quantity of caloric with the solid bodies, which has been denominated, by some, *latent heat*, because its presence is not indicated by the thermometer; and by others, the *caloric of fluidity*.

Congelation, or freezing. When liquid bodies pass into the solid state by the abstraction of their caloric, this phenomenon is termed *congelation*, or *freezing*; and the point of the temperature at which this change takes place is called the *freezing point*; thus the freezing point of water is 32°, but it may be cooled down, in favourable circumstances, considerably below that temperature. When salts are dissolved in water, the freezing point of this solution is in most cases lowered; whence it is that sea-water does not freeze so readily as pure water. In the following table the names of the salts are given in the first column, the quantity of salt by weight dissolved in 100 parts of water in the second, and, in the third, the freezing point of the solution.

Salts.	Proportion.	Freez. point.
Common salt	25	4
Sal ammoniac	20	8
Rochelle salt	50	21
Sulphate of magnesia	41·6	25·5
Nitre	12·5	26
Sulphate of iron	41·6	28
Sulphate of zinc	53·3	28·6

From this table it appears that common salt is by far the most efficacious in lowering the freezing point of water. When acids diluted with water are exposed to cold, the weakest part freezes, while the stronger portion remains liquid; so that by the action of cold they are separated into two portions, differing very much in strength. This has been termed the *aqueous congelation* of acids.

Evaporation by caloric. All fluids may, by the application of heat, be converted into an aeriform elastic state, termed *vapour*; and the process by which it comes into that state is called *evaporation*. Some liquids assume the form of vapour at any temperature; as water, volatile oils, spirits of wine, and ether. This change is called

CHEMISTRY.

spontaneous evaporation; but there are others which remain unchanged till the temperature is raised to that point when the whole liquid comes into that state of intestine motion, which is called *boiling*, when the liquid becomes rapidly converted into vapour. That point of the temperature at which every liquid begins to boil is called the *boiling point*, which *cæteris paribus* is always the same in the same liquid; thus the boiling point of water is 212°, and never becomes hotter. The following table exhibits the boiling points of several liquids.

Ether.....	98°	Phosphorus	554°
Ammonia	140	Oil of turpentine	560
Alcohol.....	176	Sulphur.....	570
Water	212	Sulphuric acid	590
Muriate of lime	230	Linsced oil	600
Nitric acid.....	248	Mercury	660

But this boiling point is found to vary considerably; and this variation is caused by the different degrees of pressure on the surface of the liquid. When the pressure is diminished, liquids boil at a lower temperature; but when the pressure is increased, they require a higher temperature to produce boiling.

Elasticity of vapours. The elasticity of all the elastic fluids into which liquids are converted by heat increases with the temperature; and the vapour formed when the liquid boils in the open air possesses an elasticity just equal to that of air, or is capable, at a medium, of balancing a column of mercury 30 inches high. The following table exhibits the force of vapour from water in every temperature, from that of congelation of mercury, or 40° below zero of Fahrenheit, to 212°, as verified by experiments.

Decomposition by caloric. Another effect which caloric produces by its action on bodies is that of reducing them to their elements, or otherwise altering the nature of their combination: thus, when ammonia is heated to redness, it is resolved into azotic and hydrogen gases; and alcohol, by the same heat, is converted into carburetted hydrogen and water; and so on with many other substances.

Quantity of caloric. Equal weights of the same body, at the same temperature, contain the same quantities of caloric; and equal weights of the same body, at different temperatures, give on admixture the arithmetical mean; thus the temperature of a pint of hot water and a pint of cold is, when mixed, very nearly halfway between that of the two extremes. But this is not the case when equal quantities of different bodies, at different temperatures, are employed, for they will be found to contain unequal quantities. Wherefore the quantity of caloric has been divided into absolute and relative. The *absolute quantity* of caloric is the whole quantity contained in a body, the measurement of which is a problem in chemistry that is not yet solved. The *relative quantity* of caloric is that quantity which one body contains compared with that contained in another. This is called *specific caloric*; and the power or property which enables bodies to retain different quantities of caloric has been

CHEMISTRY.

called *capacity for caloric*. Thus if a pint of quicksilver at 100° Fahrenheit be mixed with a pint of water at 40°, the resulting temperature will not be 70°, the arithmetical mean, but only 60°; wherefore the quicksilver loses 40° of heat, which nevertheless raises the temperature of the water only; consequently a larger quantity of caloric is required to raise the temperature of a pint of water than that of a pint of mercury through the same number of degrees. Hence it is inferred, that water has a greater capacity for caloric than is inherent in quicksilver.

Specific caloric. Although we do not know the absolute quantity of caloric requisite to produce a certain degree of heat in any body, yet if the unknown quantity that is requisite to heat the water be made = 1. we may determine by experiment how much more or how much less caloric other bodies require, to be heated the same number of degrees; thus suppose the quantity of caloric which heats water 1° heats the same weight of spermacetti oil 2°, it follows that the specific caloric of water is twice as much as that of oil, and consequently, that if the specific caloric of water be = 1. that of spermacetti oil must be = 0.5. The following is a table of the specific caloric of different bodies, which exhibits the results of different experiments.

The specific caloric of various bodies, that of water being 1.000.

Cold. With the quantity of caloric is connected the phenomenon of cold, which, according to modern chemists, arises from the absence or abstraction of heat; so that when we say a substance is cold, we mean merely that it contains less caloric than usual, or that its temperature is lower than that of our bodies. Some have, however, supposed cold to be a distinct body, the subtle particles of which insinuate themselves into other substances; but this opinion has not had many supporters.

Artificial cold. The most remarkable phenomenon belonging to the theory of cold is, that it may be produced to a very great degree by the mixture of different solids, which suddenly become liquid. This mixture is called a *frigorific*, or *freezing mixture*, and the cold is called artificial. The different substances which admit of being employed for that purpose, and the degree of cold which each of them is capable of producing, are exhibited in the following tables:—

Table of freezing mixtures.

<i>Mixtures.</i>	<i>Parts.</i>	<i>Thermometer sinks from</i>

Sources of caloric. The sources are six; namely, the sun, combustion, percussion, friction, chemical combination, and electricity.

The sun. Caloric comes to us from the sun, in the form of rays, at the rate of 200,000 miles in a second of time; but it has been found by experiment, as before observed, that the solar rays, which occasion heat, are distinct from those which illuminate and produce vision.

The effects of the solar rays on all bodies are not the same; the transparent bodies, through which they freely pass, are but little affected by them in their passage; whilst, on the other-hand, opaque bodies are heated by them; and it has been ascertained by experiment, that the deeper the colour of the body the greater is the increase of temperature. It appears too, that those bodies which absorb most light acquire the greatest degree of temperature when exposed to the sun's rays.

The temperature produced in bodies by the direct action of the sun's rays seldom exceeds 120° but a much higher temperature may be obtained by collecting the rays on opaque bodies, which do not readily allow the caloric to be carried off by the surrounding bodies. It has, however, been found by experiment, that the heating power of the solar rays is not increased by concentrating them into a focus; but that the intensity of their action is occasioned by a greater number of them being brought to bear upon the same point.

Combustion. That process is so called by which substances undergo a total change in their nature, accompanied with the emission of light and heat. The manner in which this evolution takes place varies according to

circumstances, and is distinguished into four kinds; namely, *ignition*, or glowing heat; *inflammation*, or ascension; and *detonation*, or explosion.

Many theories have been advanced to explain the process of combustion, which it would exceed the limits of this treatise to touch upon; it will, therefore, be sufficient, for the illustration of this subject, to divide bodies, as far as combustion is concerned, into *combustibles*, *supporters of combustion*, and *incombustibles*.

In every case of combustion there must be present a *combustible* body and a *supporter of combustion*, the former of which always unites with the latter during the process. It is this combination which occasions the apparent waste and alteration of the combustible. The new compound thus formed is called a *product of combustion*, and is either an acid or an oxide.

Percussion. The evolution of caloric by means of percussion is a well-known phenomenon; as in the case of iron, which may be hammered until it is red hot. This phenomenon is supposed to be the consequence of a *condensation* in the body struck, which, by the compression of the particles, forces out the caloric. Experiments have been made upon pieces of gold, silver, and copper, to ascertain the quantity of heat evolved when they are suddenly and forcibly struck; by which it has been ascertained that copper evolved most heat; silver was the next in degree; and gold evolved the least. The first blow evolved the most heat, which diminished on the second blow, and was hardly perceptible on the third.

Friction. The heat which is evolved by rubbing two pieces of dry stick smartly together until they take fire, is a familiar example of friction as a source of caloric; to which might be added numberless other examples from common life.

Chemical combination. As it is one of the characteristics of chemical action to produce a change of temperature, it has been established as a general law in the chemical science, that all bodies which pass from the solid to the fluid state absorb a quantity of caloric; and all bodies which pass from the fluid to the solid state give out caloric; hence it is, that when two substances in a gaseous state, as ammoniacal gas and muriatic acid gas, are mixed together, and combining form a solid salt, they at the same time evolve caloric; so, likewise, when two liquids, as alcohol and water, are mixed, caloric is evolved during the combination. A great quantity of caloric is also given out when a fluid body combines with a solid, as in the case of slacking lime; and, also, when two solids are mixed together which undergo fermentation, as horse-dung and tanners' bark, which are used in making hot-beds, because during the process of fermentation, a gradual and constant evolution of caloric takes place.

Electricity. The evolution of both light and heat in electricity is a phenomenon well known by familiar observation; for when an excited body is discharged through the air, there always appears a very bright flash of light, which is commonly called the spark; this is sometimes sufficiently strong to fuse the most refractory metals, and to set fire to gunpowder, alcohol, and other combustible bodies. [vide *Electricity*]

Ponderable Bodies.

A ponderable body is one whose weight admits of being ascertained. The weight of bodies gravitating in fluids is called *gravity*; which is, absolute and specific, or relative.—*Absolute* or *true gravity* is the whole force with which a body tends downwards.—*Specific* or *relative gravity* is the relative, comparative, or apparent gravity

CHEMISTRY.

in any body, as it respects that of an equal bulk or magnitude of another body.

The specific gravity of bodies is denoted in chemical writings by comparing it with that of pure water, which in decimal figures is always considered as 1·000.

Ponderable bodies, as to their general properties, may be divided into gases, alkalies, earths, and metals.

Gases. Gases are aeriform fluids that are transparent, elastic, for the most part invisible, and not condensable into a liquid or solid state by any degree of cold hitherto known. This last property distinguishes these substances from vapours. The elasticity of gases is increased by heat and diminished by cold, and they are all absorbed both by liquids and solids; but they vary in the measure of absorption, also in their specific gravity, and other properties, which will be noticed under the respective heads.

Alkalies. The word *alkali*, which is of Arabic origin, signifies, literally, the Kali, or plant so called, from the ashes of which a substance has been procured of peculiar properties. Three bodies have been generally ranked under this head; namely—potash, soda, and ammonia; to which have been added some others of a mixed character, and distinguished by the name of alkaline earths. The alkalies have an acrid and peculiar taste: they change vegetable blues, as an infusion of violets, to a green colour: they have a strong attraction for water, and combine with it in all proportions: they also combine with acids, and form salts; and they have a powerfully corroding quality that is sufficient to reduce woollen cloth to the state of a jelly.

The alkalies are divided into fixed and volatile. Potash, soda, and the newly-discovered earth lythnia, are denominated *fixed alkalies*, because they require a great degree of heat to dissipate or volatilize them. Ammonia, on the other hand, is termed a *volatile alkali*, because a very moderate degree of heat is sufficient to produce its volatilization.

Earths. The earths are substances which have neither taste nor smell; are nearly soluble in water, and have a specific gravity under 5. They are divided into *alkaline earths*, which partake of the character of both earths and alkalies, and *earths*, simply so called. The alkaline earths are barytes, strontites, lime, and magnesia. The earths are silex, alumina, zircon, glucina, thorina, and yttria.

Metals. The metals are distinguished by their brilliancy, called the *metallic lustre*; their colour, opacity, density, hardness, elasticity, ductility, malleability, tenacity, fusibility, and their power of conducting caloric and electricity. In addition to the recently-discovered bases of the alkalies and earths, the following are generally admitted to be metallic substances:—

1. Gold	11. Nickel	21. Manganese
2. Platinum	12. Tin	22. Chrome
3. Silver	13. Lead	23. Molybdena
4. Mercury	14. Zinc	24. Uranium
5. Rhodium	15. Bismuth	25. Tungsten
6. Palladium	16. Antimony	26. Titanium
7. Iridium	17. Tellurium	27. Columbium
8. Osmium	18. Selenium	28. Cerium
9. Copper	19. Arsenic	
10. Iron	20. Cobalt	

For the consideration of the simple substances in detail, they may be more conveniently arranged, on the principle of combustion, into combustibles, supporters of combustion, and incombustibles.—*Combustible* bodies are those which, in common language, are said to burn.—*Supporters of combustion* are bodies which of themselves, strictly speaking, are not capable of undergoing com-

bustion, but which are absolutely necessary for the production of this effect in bodies; in so much that, whenever they are excluded, combustion ceases.—*Incombustibles* are bodies, which are incapable of undergoing combustion themselves, or of supporting combustion in other bodies; of which description azote is the only substance hitherto known. These several substances will be considered in the following order: supporters of combustion, incombustibles, and combustibles.

Supporters of combustion. The supporters of combustion, hitherto known, are three in number; namely, oxygen, chlorine, and iodine. The compounds which these bodies form with each other, are likewise supporters.

Oxygen. The properties of oxygen, which is the most important of all chemical substances, have hitherto been discovered only by its effects while in a state of combination, particularly when combined with light and heat in an aeriform state, called oxygen gas.

Oxygen gas. Oxygen gas is an invisible elastic fluid, which, like common air, is capable of indefinite expansion and compression. It has no perceptible taste; and when in a state of purity, is also destitute of smell. Its mean specific gravity, as determined by different experiments, is estimated to be 1·1088. It is not absorbed by water, but absorbable in the highest degree by combustible bodies, which, at the same time, disengage its heat and light. It hastens germination, is indispensable to respiration, and is the cause of animal heat; whence it has been denominated *vital air*. It is considered as the cause of acidity; and, from this last property, has derived its name of *oxygen*. The act of its combining with bodies is called *oxydisement* or *oxygenation*; and the bodies with which it is combined are called oxides or acids.

The following is the order of its affinity for the substances with which it enters into combination.

Oxygen.

Charcoal,
Titanium,
Manganese,
Zinc,
Iron,
Tin,
Uranium,
Molybdena,
Tungsten,
Cobalt,
Antimony,
Hydrogen,
Phosphorus,
Sulphur,
Azote,
Nickel,
Arsenic,
Chromium,
Bismuth,
Lead,
Copper,
Tellurium,
Platina,
Mercury,
Silver,
Oxide of arsenic,
Nitrous gas,
Gold,
Muriatic acid,
White oxide of manganese,
White oxide of lead.

CHEMISTRY.

Oxygen may be obtained from a great number of bodies ; but in the largest quantities from the oxides of manganese, lead, or mercury, from the nitrate of potash, from the green leaves of vegetables, &c.

Chlorine. Chlorine is a gaseous body, so called from its greenish colour ; it was at first denominated *oxymuriatic acid*, because it was supposed to be a compound of muriatic acid and oxygen. It possesses an uncommonly pungent and suffocating odour, is totally unfit for respiration ; so that animals immersed in it die instantly. It is heavier than atmospheric air, the specific gravity being estimated at about 2.500. It destroys colours, supports combustion, and forms combinations with oxygen in four proportions, and with the combustibles in one proportion.

Chlorine gas may be exposed to a very high temperature, without experiencing any change, if it be passed through a white hot porcelain tube. The methods for obtaining it are various.

Iodine. This gas was first obtained in 1811, from kelp. It is a solid substance, in the form of scales, of a greenish black colour, with a metallic lustre. It destroys colour like chlorine, melts when heated to the temperature of $224\frac{1}{2}^{\circ}$, and is volatilized under the common pressure of the air, when raised to the temperature of $351\frac{1}{4}^{\circ}$. It is not very soluble in water, but more so in alcohol, and still more so in sulphuric acid. It combines with oxygen and chlorine, and also with the combustibles ; and, as it appears, chlorine, oxygen, and iodine, separate each other from bases, at a red heat, in the following order ; namely, chlorine, oxygen, and iodine ; consequently chlorine has the greatest affinity for the bases, oxygen the next greatest, and iodine the weakest.

Fluorine. Fluorine is a gaseous body, otherwise called *fluoric acid*, or *fluoric acid gas*, because it is obtained from fluor spar, or Derbyshire spar. It is said by some not to possess the property of maintaining combustion, although by others it is reckoned among its supporters ; but upon this, and other properties of fluorine, there is much room for further discovery.

Incombustibles. Azote, the only substance called incombustible, has also the name of nitrogen, and is a simple body, which is the radical principle of our atmospheric air, and forms a constituent part of many animal and vegetable substances. Its most important combination is with light and caloric, when it appears in a gaseous form, called *azotic gas* or *nitrogen gas*. It is possessed of no positive properties by which it can be characterized ; but is principally distinguished by certain negative qualities ; namely, that it is extremely hurtful to respiration, whence it is called *mephitic air*, and that no combustible will burn in it. This gas is not sensibly absorbed by water, nor is there any liquid which is known to be capable of condensing it. Its specific gravity is about 0.9722.

Azote has the property of combining with oxygen, and forming four compounds ; and it also combines with chlorine and iodine.

Combustibles. The simple combustibles may be divided into three classes ; namely, acidifiable combustibles, alkalisable combustibles, and intermediate combustibles.—*Acidifiable combustibles* are those which have the property of forming acids.—*Alkalisable combustibles* are such as form alkalies or bases, capable of composing neutral salts.—*Intermediate combustibles* are such as produce imperfect alkalies and acids.

Acidifiable combustibles. The acidifiable combustibles are eight in number ; namely, hydrogen, carbon, borax, silica, phosphorus, sulphur, selenium, arsenic, and tellu-

rium ; the three last of which are reckoned among the metals.

Hydrogen. Hydrogen, as its name denotes, is one of the constituent elements of water, which is known only in a state of combination with caloric, which gives it the name of *hydrogen gas* : it was formerly called *inflammable air* or *phlogiston*. Besides the properties of invisibility, elasticity, &c. which it has in common with other gases, it is distinguished by being the lightest of all such bodies ; its specific gravity, in respect to common air, being about 0.0694. It has a disagreeable smell, is incapable of supporting combustion, destructive to animal life, and not sensibly absorbed by water. In combination with oxygen it forms water, with chlorine gas it forms *muriatic acid*, with azote it forms the gaseous substance called *ammonia*. It also combines with iodine and fluorine.

Carbon. Carbon, from the Latin *carbo*, a coal, is frequently taken for *charcoal* ; but in the chemical nomenclature it signifies the base of common charcoal, divested of all impurities, which is obtained in its purest state from the combustion of the diamond. Charcoal is generally black, sonorous, and brittle, very light, and destitute of smell. It is indestructible by age ; a good conductor of electricity, but a bad conductor of heat ; insoluble in water, yet it absorbs moisture in very considerable quantities. When freed from the air which it may contain, either by heat, or by being placed under an exhausted receiver, it has the property of absorbing gases in various proportions. The following table exhibits the bulk of the various gases absorbed by a volume of charcoal reckoned 1.

	Volumes.		Volumes.
Ammoniacal gas	90	Olefiant gas	35
Muriatic acid	85	Carbonic oxide	9.2
Sulphurous acid	65	Oxygen	9.25
Sulphuretted hydro- gen	55	Azote	7.5
Nitrous oxide	40	Oxy-carburetted hy- drogen	5
Carbonic acid	35	Hydrogen	1.76

Carbon combines with oxygen and hydrogen in two proportions, and with azote in one proportion ; by which is formed the compound called *cyanogen*.

Borax. Borax is a well known saline substance which yields an acid called *boracic acid*. The base of this acid, which is called *boron*, is a powder of a dark olive colour, that is not decomposed by heat, in a platina tube, though raised to whiteness, burns in oxygen gas, with a very brilliant light, and is not soluble in nitrous gas or hydrogen gas. It combines with chlorine, fluorine, and hydrogen ; and seems to have a still greater affinity for oxygen, than either hydrogen or carbon.

Silica. Silica, or the siliceous earth, is obtained pure by fusing quartz or flint with twice its weight of potash, in a silver crucible. This earth is a white powder, without taste or smell, is infusible by the intense heat of the voltaic electricity, but has been melted by means of the blow-pipe. It is insoluble in water ; yet, when it is fresh precipitated, water has the property of retaining in solution about one thousandth of its weight. It is not acted on by any of the acids, except fluoric ; but is soluble in the alkalies, which solution has been called *silicated alkali*, or *liquor silicum*. When mixed with an equal weight of carbonate of potash, and exposed to a strong heat in a furnace, it forms a glass that is insoluble in water, and in other respects similar to common glass. Its specific gravity in quartz or flint is 2.6.

Silicon, or *Silicum*, the base of silica or siliceous earth, is

CHEMISTRY.

now most generally supposed to be a substance resembling borax, although previously it was supposed to be a metal, for which reason it had the name of silicium. Silicon seems capable of bearing a high temperature, without undergoing any change; it unites with oxygen, and forms silica, and combines also with fluorine to form *silicated acid* or *fluosilic acid*.

Phosphorus. Phosphorus, an inflammable substance, is generally of a flesh red colour, but in its purest state is colourless. It is so soft as to yield readily to the knife. It melts at about 90° Fahrenheit, and boils at 550°. It is insoluble in water, and dissolved, in a small degree, by alcohol, ether, and oils. When used internally it is poisonous. The mean specific gravity is 1.770.

Phosphorus has the property of combining with oxygen in four proportions, with hydrogen in two, and with carbon in one proportion.

Sulphur. Sulphur, known by the vulgar name of *brimstone*, is a substance procured in the greatest abundance, by subjecting the mineral, called *pyrites*, to distillation. It is hard and brittle, commonly of a greenish yellow colour, without any smell: and is met with under two different forms: a compact solid, which has generally the shape of long rolls or sticks; or a light powder, called *flowers of sulphur*. Sulphur is readily fused and volatilized; and, when heated to the temperature of about 218° Fahrenheit, it melts and becomes as liquid as water; but when allowed to cool again, it crystallizes. At the temperature of about 290° Fahrenheit, it is converted into vapour; after which the volatilized sulphur may be collected in close vessels in a solid form. What remains has been called *sulphur vivum*. Sulphur combines with oxygen in two proportions, with iodine, hydrogen, and phosphorus in one proportion.

Arsenic. Arsenic, as it is to be met with in commerce, occurs in the state of a white oxide. It is of a bluish white colour, not unlike that of steel; has no sensible smell while it is cold, but when heated it emits a strong odour of garlic. It is the softest of all the metallic bodies; and is so brittle, that it may be easily reduced to a fine powder, by trituration in a mortar. Its specific gravity, when melted, is 5.7633. Its fusing point is not known, because it is the most volatile of all the metals; subliming, without melting, when exposed in close vessels to a heat of 356°; when sublimed slowly it crystallizes. Arsenic combines with two doses of oxygen, and with iodine, hydrogen, and sulphur in one proportion. It also forms alloys, by combining with the metals; and salts, by combining with acids. The order of its affinities is nearly as follows:

<i>Arsenic.</i>	<i>Oxide of Arsenic.</i>
Nickel	Lime
Cobalt	Muriatic acid
Copper	Oxalic
Iron	Sulphuric
Silver	Nitric
Tin	Tartaric
Gold	Phosphoric
Platinum	Fluoric
Zinc	Sacclactic
Antimony	Succinic
Sulphur	Citric
Phosphorus	Lactic
	Arsenic
	Acetic
	Prussic

Selenium. Selenium is a substance of which, at present, little is known, except that it has the metallic lustre and other properties of a metal; becomes soft at 212°

and fuses at a little higher temperature; combines with most of the metals, and often with ignition. With the fixed alkalies it forms compounds of a cinnabar red colour; in fixed oils it forms reddish solutions; and dissolves in nitric acid, so as to produce a compound called selenic acid.

Tellurium. Tellurium, a metal of a bluish white colour, is very brittle, easily reducible to powder, melts when raised to a temperature somewhat higher than the fusing power of lead; and, when cooled slowly, crystallizes. Its specific gravity is said to be 6.115. Tellurium combines with oxygen, chlorine, hydrogen, and, as is supposed, with carbon.

The order of the affinities of the above mentioned bodies for oxygen, at a red heat, which seems necessary to promote their action, is as follow:

Oxygen.
Silica
Hydrogen
Carbon
Borax
Phosphorus
Sulphur
Arsenic
Tellurium

Alkalifiable combustibles. The alkalifiable substances are twenty-nine in number; namely: 1. Potash. 2. Soda. 3. Lime. 4. Barytes. 5. Strontian. 6. Magnesia. 7. Ytria. 8. Glucina. 9. Alumina. 10. Zircon. 11. Iron. 12. Nickel. 13. Cobalt. 14. Manganese. 15. Cerium. 16. Uranium. 17. Zinc. 18. Lead. 19. Tin. 20. Copper. 21. Bismuth. 22. Mercury. 23. Silver. 24. Gold. 25. Platinum. 26. Palladium. 27. Rhodium. 28. Iridium. 29.

Potash. Potash is a brittle substance, of a white colour, and of a smell similar to that which is perceived during the slacking of lime. Its taste is remarkably acid; and it is so corrosive, as instantly to destroy any part of the body to which it is applied. It was formerly called *vegetable alkali*, because it is obtained in the greatest abundance from vegetable ashes; and when divested of many of its impurities by burning, it is called *pearl-ash*. Potash, in a perfectly dry state, is a non-conductor of electricity; but after exposure to the air for a few seconds, it acquires a moisture, which converts it into a conductor.

Potassium. By the decomposition of potash, a metallic substance has been separated from it in the form of small globules, which is considered as its base, and called potassium. This substance is white, and has completely the metallic lustre like silver or mercury. At the temperature of 50°, it is a soft and malleable solid; its fluidity becomes perfect at 136½°, and at 32° it is hard and brittle. Potassium combines with oxygen in two proportions, so as to form *potash* and the peroxide of potassium. It also combines with chlorine, iodine, hydrogen, phosphorus, and arsenic.

Potash, or potassium, has so great an affinity for oxygen, that it separates this body from every one of the combustible substances before mentioned. The order of its affinities, for the supporters of combustion, is as follows:

Potash.
Chlorine
Iodine
Oxygen

It has the greatest affinity for sulphur of the acidifiable combustibles, and after that for phosphorus and hydro-

gen in succession. It combines readily with the acids ; and the order of its affinities is nearly as follows :

- Potash.*
 Sulphuric
 Nitric
 Muriatic
 Phosphoric
 Fluoric
 Oxalic
 Tartaric
 Arsenic
 Succinic
 Citric
 Lactic
 Benzoic
 Sulphurous
 Acetic
 Sacclactic
 Boracic
 Carbonic
 Prussic.

Soda. Soda was formerly called fossil, or *mineral alkali* ; and, from the many properties which it has in common with potash, was confounded with it until the last century. The peculiar properties of soda are as follow :—It is the base of common salt ; more fusible than potash ; does not liquefy so rapidly when exposed to the air ; is not altered by light ; adheres less strongly to acids ; attracts sulphur ; and dissolves alumine more easily. Its specific gravity is 1.336.

Sodium. Sodium, the basis of soda, has been found to be a metallic substance, having an intermediate colour betwixt that of silver and lead. At the common temperature it is solid and very malleable, and melts when heated to the temperature of 194°. Its specific gravity is 0.97223. It combines with oxygen, so as to form two compounds, soda and the peroxide of sodium, in different proportions ; also with chlorine, phosphorus, sulphur, arsenic.

The affinities of the simple supporters of combustion for soda, or sodium, are in the following order ; namely,

- Sodium.*
 Chlorine
 Iodine
 Oxygen.

Sulphur, of all the acidifiable combustibles, has the greatest affinity for soda ; but the order of its affinities for the acids is the same nearly as that of potash.

Lime. Lime, *calx*, is an earth moderately hard, that is found in great abundance in nature, though never pure, or in an uncombined state. It is contained in the waters of the ocean, is found in vegetables, and forms the basis of bones, shells, and other hard animal substances. It is of a hot, acrid, urinous taste, produces nearly the same change on vegetable colours as the alkalies do, requires an intense heat for its fusion, and is not volatile. In its most caustic state it is called *quick lime* ; but when by absorbing water it becomes an impalpable powder, it is called *slacked lime*, or *hydrate of lime*. Its specific gravity is 2.3.

Lime is very sparingly soluble in water, but has been found to dissolve more freely in cold than in hot water. The following table exhibits in the first column the temperature of the water ; in the second the number of grains of water required to take up one grain of lime ; and in the third the number required to dissolve one grain of hydrate of lime.

Temperature.	Grains of water to dissolve 1 grain of lime.	Grains of water to dissolve 1 gr. of hydrate of lime.
60°.....	778	584
130°.....	972	720
212°.....	1270	952

Lime, when thus dissolved, forms what has been termed lime-water.

Calcium. Calcium, the base of lime, is white like silver, solid, and considerably heavier than water. When heated in the open air it burns brilliantly, and quick lime is produced. It combines with oxygen in one proportion, so as to produce the compound called lime ; also with chlorine and iodine.

The affinities of calcium, or lime, for the supporters of combustion, are in the following order :

- Lime.*
 Chlorine
 Oxygen
 Iodine.

The order of its affinities for the acids is nearly as follows :

- Lime.*
 Oxalic
 Sulphuric
 Tartaric
 Succinic
 Phosphoric
 Sacclactic
 Nitric
 Muriatic
 Suberic
 Fluoric
 Arsenic
 Lactic
 Citric
 Benzoic
 Sulphurous
 Acetic
 Boracic
 Carbonic
 Prussic.

Barytes. Barytes is a heavy brittle mineral of a flesh-colour, and otherwise called *ponderous spar*. It is never found pure in nature, but always in combination with carbonic or sulphuric acid. It is obtained by the calcination of its carbonate or nitrate ; and when pure it has a caustic state, changes vegetable colours to green, is poisonous, and entirely infusible by heat alone, but melts when mixed with various earths ; changes quickly in the air, swells, becomes soft, and falls into a white powder. It has a more powerful attraction for water than lime, absorbing it with a hissing noise, and consolidating it strongly. It is soluble in twenty times its weight of cold, and twice its weight of boiling water. When the solution is allowed to cool slowly it shoots into regular crystals. The specific gravity of barytes is stated to be 4.000.

Barium. Barium, the metallic basis of barytes, is a solid metal of a silver colour, which melts at a temperature not below redness. It combines with oxygen in two proportions, forming the compounds barytes, and the peroxide of barium ; also with chlorine and iodine.

Barytes, or *barium,* has an affinity for the simple supporters of combustion in the following order :

CHEMISTRY.

Barium.

Chlorine
Oxygen
Iodine.

The order of its affinities for the acids is nearly as follows :

Barytes.

Sulphuric
Oxalic
Succinic
Fluoric
Phosphoric
Saclactic
Nitric
Muriatic
Suberic
Citric
Tartaric
Arsenic
Lactic
Benzoic
Acetic
Boracic
Sulphurous
Carbonic
Prussic.

Strontian, or *Strontites*. Strontian is a mineral which bears a strong resemblance to barytes; but it is not poisonous, and does not act so powerfully on animal bodies.

Strontium, the base of strontian, or strontites, is white, solid, much heavier than water, and bears a close resemblance to barium in its properties. It combines with oxygen in only one proportion at present known, forming the compound strontian; and also with chlorine.

Strontites, or *strontium*, forms acids by combining with the acids for which it has an affinity, nearly in the following order :

Strontites.

Sulphuric
Phosphoric
Oxalic
Tartaric
Fluoric
Nitric
Muriatic
Succinic
Acetic
Arsenic
Boracic
Carbonic.

Magnesia. Magnesia is an earth in the form of a powder, not found pure in nature, but always obtained by art from some of its combinations. It is soft to the touch, and gives a smooth, unctuous feel to the bodies in which it is contained; such as talc, asbestos, and the like. It is very slightly soluble in water, and possesses the properties of an alkali, but in a less degree than the alkaline earths. Its specific gravity is between 2 and 3. It is infusible by the most intense heat, except when mixed with other earths. When heated strongly it becomes phosphorescent.

Magnesium. Magnesium, the base of magnesia, is a white solid metal, like silver, and heavier than water, which combines with oxygen in one proportion, and forms the substance well known by the name of magnesia.

Magnesia, or *magnesium*, also combines with chlorine, sulphur, and the acids; for which latter it has an affinity in nearly the following order :

Magnesia.

Oxalic acid
Phosphoric
Sulphuric
Fluoric
Arsenic
Saclactic
Succinic
Nitric
Muriatic
Tartaric
Citric
Lactic
Benzoic
Acetic
Boracic
Sulphurous
Carbonic
Prussic.

Yttria. Yttria is a perfectly white earth, devoid of either taste or smell, smooth to the touch like alumine, and infusible, except by an intense heat. It is very ponderous; its specific gravity is 4.842, and is insoluble in water, or the fixed alkalies; but it is readily dissolved by carbonated ammonia and sulphuric acid. *Yttrium*, the base of yttria, has not yet been exhibited in a separate form; but the presence of oxygen in yttria is established by its converting potassium into potash when ignited with that metal.

Glucina. Glucina, or Glucine, a new earth, which has been extracted from the *aqua marina*, or the beryl, is a fine soft powder that adheres to the tongue, and is insipid. Its specific gravity is 2.97. It is insoluble in water, but soluble in alkalies and their carbonates, and in all the acids except the carbonic and sulphuric acid. It forms sweet astringent salts with the different acids, and is fusible with borax, with which it forms a transparent glass. Of glucinum, the base of glucina, nothing is known at present; but the general fact of its existence is proved by igniting glucine with potassium, which is thus changed into potash.

The order of its affinities for the acids is nearly as follows :

Glucina.

Sulphuric acid
Nitric
Muriatic
Phosphoric
Fluoric
Boracic
Carbonic.

Alumina. Alumina, alumine, or the Earth of alum, so called because it is the base of the well-known salt called alum, is a white earth which enters into the natural composition of the schistus, of all stones, and of the earths called argillaceous. It is soft to the touch and insipid, adheres to the tongue, and occasions a dryness in the mouth. When moistened with water it forms a cohesive ductile mass, which, when dried to the temperature of the atmosphere, retains almost half its weight of water. When heated to redness it shrinks considerably in bulk, and at last beomes so hard as to strike fire with flint. It is dissolved by the liquid fixed alkalies, and is precipitated by acids unchanged. In ammonia it is very sparingly soluble, and is not soluble in alkaline carbonates. Alumina has no smell when pure; but if it contain oxide of iron it emits a peculiar smell when breathed upon, which is known by the name of the *earthy smell*. It is obtained by dissolving water in alum

CHEMISTRY.

according to a given process; but it assumes two different appearances when thus obtained, according to the way in which the precipitation is conducted. If the earthy salt be dissolved in as little water as possible, it has a light and spongy appearance, whence it is called *spongy alumina*; if in a great quantity of water, it assumes the form of a brittle transparent mass, which is called *gelatinous alumina*. Barytes and strontites combine with alumine, both by fusion and in the humid way; it may also be united with the fixed alkalies, with most of the earths, and almost all the acids. The order of its affinities for the latter is nearly as follows:

Alumina.

Sulphuric acid
Nitric
Muriatic
Oxalic
Arsenic
Fluoric
Tartaric
Succinic
Saclactic
Citric
Phosphoric
Lactic
Benzoic
Acetic
Boracic
Sulphurous
Carbonic
Prussic.

Aluminium. Aluminum, or *aluminium*, the base of alumina, is supposed to be a metallic substance like the preceding, but it has not yet been obtained in such a state as to make it a fit subject of investigation.

Zircon. Zircon is an earth drawn from a precious stone in Ceylon, called the zircon, or jargon. This earth has the form of a fine powder, entirely destitute of taste or smell, the specific gravity of which exceeds 4. It is insoluble in water; but yet it retains, after precipitation, one-third of its weight. It is also insoluble in pure liquid alkalies; nor does it even combine with them by fusion; but it is soluble in alkaline carbonates. When exposed to a strong heat it fuses, and assumes a grey colour. In this state it is very hard, its specific gravity is 3.5, and it is no longer soluble in acids. Of *zirconium*, the base of zircon, little is known except that it is of a metallic nature.

Its affinities for the acids are nearly in the following order:

Zircon.

Vegetable acids
Sulphuric
Muriatic
Nitric.

Thorina. Thorina is, when dried, a perfectly white earth, which absorbs carbonic acid, and dissolves with effervescence in acids. It differs from alumina by being insoluble in solution of potash; from yttria by its astringent taste without sweetness, and by its neutral solutions affording a precipitate when boiled; and from zirconia by its being precipitated by oxalate of ammonia, &c. The base of thorina is called *thorium*.

Iron. Iron exceeds other metals in hardness, particularly when in the state of steel, and its specific gravity varies from 7.6 to 7.8. It has the singular property of possessing the magnetic virtue, or of being attracted by the magnet; but when it is perfectly pure, it is said not

to retain this virtue very long. It is malleable in every temperature, and its malleability increases with the increase of the temperature; but its ductility is still more perfect, for it may be drawn out into wire as fine as a hair; and its tenacity is such, that a wire 0.078 of an inch in diameter is capable of supporting more than 500 lbs. avoirdupois without breaking. It is one of the most infusible of all metals, and is said to require a temperature of more than 150° of Wedgwood for its fusion. It becomes red long before it melts; and by the different shades of this redness are distinguished the different degrees of temperature: the first being called a *dull red*, the second *cherry red*, the third a *bright red*, and the fourth a *white heat*, or *incandescence*.

Iron has a strong affinity for oxygen; but, as far as is known at present, it combines with it in two proportions only. It combines also with sulphur in two proportions; with carbon in various proportions; but with phosphorus in one only. Iron forms salts in combination with the acids, and with the metals it forms alloys.

The affinities of iron for the supporters of combustion are nearly as follow:—

Iron.

Chlorine
Oxygen
Iodine.

Its affinities for other metals, and those of its oxide for the acids, are nearly as follow:—

Iron.

Nickel
Cobalt
Manganese
Arsenic
Copper
Gold
Silver
Tin
Antimony
Platinum
Bismuth
Lead
Mercury.

Oxide of Iron.

Oxalic acid
Tartaric
Camphoric
Sulphuric
Saclactic
Muriatic
Nitric
Phosphoric
Arsenic
Fluoric
Succinic
Citric
Lactic
Acetic
Boracic
Prussic
Carbonic.

Nickel. Nickel, in a state of purity, is a metal of a fine white colour, resembling silver, rather softer than iron. Its specific gravity is between 8 and 9. It possesses the magnetic virtue of iron, and may, like steel, be converted into a magnet. It is malleable both hot and cold, and may be drawn into a very fine wire. It requires a temperature of above 160° of Wedgwood for fusion; but has never, hitherto, been crystallized. As a conductor of heat it is superior to zinc or copper.

Nickel combines with oxygen in two proportions; also with chlorine, carbon, phosphorus, and sulphur in one. It forms alloys in combination with the metals, and salts in combination with the acids.

The affinities of nickel for other metals, and those of its oxide for the acids, are nearly in the following order:—

Nickel.

Iron
Cobalt
Arsenic
Copper
Gold

Oxide of Nickel.

Oxalic acid
Muriatic
Sulphuric
Tartaric
Nitric

CHEMISTRY.

Nickel.
Tin
Antimony
Platinum
Bismuth
Lead
Silver
Zinc
Sulphur
Phosphorus.

Oxide of Nickel.
Phosphoric
Fluoric
Saclactic
Succinic
Citric
Lactic
Acetic
Arsenic
Boracic
Prussic
Carbonic.

Cobalt. Cobalt, or Cobolt, is a mineral of a grey colour, having scarcely any taste or smell. It is rather soft, its specific gravity being from 8.5 to 8.7. It is brittle and easily reduced to powder; melts at the temperature of 130° Wedgewood, and is attracted by the magnet like iron.

Cobalt is never found in a state of purity, but always in the state either of an oxide, a sulphuret, an alloy, or a salt. It combines with oxygen in two proportions; with chlorine, phosphorus, and sulphur in one; and forms alloys by combining with metals, and salts by combining with acids. The order of its affinities is nearly as follows:—

Cobalt.

Iron
Nickel
Arsenic
Copper
Gold
Platinum
Tin
Antimony
Zinc
Phosphorus
Sulphur

Oxide of Cobalt.

Oxalic acid
Muriatic
Sulphuric
Tartaric
Nitric
Phosphoric
Fluoric
Saclactic
Succinic
Lactic
Acetic
Arsenic
Boracic
Prussic
Carbonic

Cobalt is used principally to give a blue colour to glass, porcelain, and the like. When it is mixed with earth, and appears in the form of a brown gritty powder, it is called *zaffre*; when melted with vitrifiable materials it is called *smalt*; and if this be formed into a very fine blue powder, it is called *azure*.

Manganese. Manganese never occurs in a metallic state, but always in that of an oxide. It is of a dusky white colour, and softer than iron. Its specific gravity is estimated from 6 to 8. It is very brittle, and requires for fusion the temperature of 160° Wedgewood. When in the state of a powder it is often attracted by the magnet, on account of the iron, from which it can be separated only with difficulty. It is the most combustible of all the metals. It very rapidly decomposes water by means of heat; as also most of the metallic oxides and sulphuric acid; but it is soluble in nitric acid.

Manganese attracts oxygen so powerfully, that exposure to the air is sufficient to render it brown, black, and friable in a short time; for that reason, it can only be kept in water, oil, or ardent spirits. It combines with oxygen in several proportions; also with chlorine, carbon, phosphorus, and with sulphur. It enters likewise into combination with the acids to form salts, and with the metals to form alloys.

Cerium. Cerium is a Swedish mineral that is white, very hard, brittle, and volatile. It combines with oxygen in two proportions; and the solutions of the oxides in

acids are either yellow or red, and give precipitates of different shades of these colours. Cerium combines also with carbon and phosphorus.

Uranium. Uranium was discovered in 1789, in combination with sulphur, &c. It is a metal of a deep grey colour on the outside, and a pale brown on the inside. It is very porous, and so soft that it may be scraped with a knife. Its specific gravity is between 8 and 9, and its fusion is effected with great difficulty. It is soluble only in nitric acid; combines with oxygen in two proportions, and with sulphur. Of its alloys with other metals nothing is at present known; but it combines with the acids to produce salts.

Zinc. Zinc, otherwise known by the name of *Speltre*, is a metal of a brilliant white colour, never found pure, but in the state of an oxide, a sulphuret, sulphate, or carbonate. Its specific gravity varies from 6.86 to 7.1, and it is lightest when most pure. By particular treatment it is malleable. It melts at the temperature of 680 Fahrenheit, is volatilized at a higher temperature, but when allowed to cool slowly it forms crystals. By exposure to the air its lustre is tarnished, but it does not otherwise undergo any change. It is not acted on by water, but in a state of ignition it decomposes this fluid rapidly. It is oxydized and dissolved by the greater number of the acids. All the alkalies, when digested or boiled with zinc, blacken its surface and dissolve a minute portion of it. It decomposes muriate of ammonia, sulphate of potash, and various other neutral salts. Having a very strong attraction for oxygen, it precipitates the greater number of the metals from their acids and solutions. It likewise combines with iodine, phosphorus, sulphur; and forms alloys with some of the metals, as arsenic, potassium, sodium, &c.

The order of its affinities, for the metals and acids, is nearly as follows:—

Zinc.

Copper
Antimony
Tin
Mercury
Silver
Gold
Cobalt
Arsenic
Platinum
Bismuth
Lead
Nickel
Iron

Oxide of Zinc.

Oxalic acid
Sulphuric
Muriatic
Saclactic
Nitric
Tartaric
Phosphoric
Citric
Succinic
Fluoric
Arsenic
Lactic
Acetic
Boracic
Prussic
Carbonic

Lead. Lead is one of the softest metals, and its specific gravity is above 11. It is malleable, but not very ductile, and less tenacious than any other metals. When cut it is very brilliant, but soon tarnishes by exposure to the air. It unites with oxygen in three proportions; with sulphur in two proportions; with chlorine, iodine, and phosphorus, in one. It is acted upon by the greater part of the acids, with which it forms salts. Lead may be alloyed with most of the other metals; but its alloys are not employed for any use.

Tin. Tin occurs in nature in three states; namely, in a native state, in the state of an oxide, and that of a sulphuretted oxide; it is one of the lightest of metals, and its specific gravity is between 7.291 and 7.299. It is very malleable, and may be beaten into thin plates, called *tin-foil*. Its ductility and malleability are inferior

CHEMISTRY.

to most of the metals which have been long known. A tin wire 0.078 inch in diameter, is capable of supporting a weight of 34.7 pounds only without breaking. It is susceptible of considerable expansion by means of caloric, and is also one of the most fusible metals. It melts at the temperature of 442°, but does not evaporate without a very violent heat; and when allowed to cool slowly it forms rhomboidal crystals. It is a good conductor of electricity, and emits a peculiar odour, which is communicated to the hands by means of friction. It undergoes no other change from exposure to the air except that of being tarnished; but on being heated it combines with oxygen in two proportions; also with phosphorus and sulphur. It forms alloys with many of the metals, and also salts by combining with the acids.

The order of its affinities for the metals and acids is nearly as follows:—

<i>Tin.</i>	<i>Oxide of Tin.</i>
Zinc	Tartaric acid
Mercury	Muriatic
Copper	Sulphuric
Antimony	Oxalic
Gold	Arsenic
Silver	Phosphoric
Lead	Nitric
Iron	Succinic
Manganese	Fluoric
Nickel	Saclactic
Arsenic	Citric
Platinum	Lactic
Bismuth	Acetic
Cobalt	Boracic
Sulphur.	Prussic.

Copper. A metal of a fine red colour, is harder than silver, very malleable, and ductile. Its specific gravity is between 8 and 9, and its tenacity is such that a copper wire 0.078 inch in diameter is capable of supporting 302.26 pounds avoirdupois without breaking. It melts at the temperature of 27° Wedgewood, and evaporates in visible fumes at a higher temperature. When allowed to cool slowly it assumes a crystalline form.

Copper combines with oxygen, chlorine, and sulphur, in two proportions; with phosphorus in one. It forms alloys by combining with most of the other metals; and salts, by its union with the acids. The order of its affinities for the metals and acids is nearly as follows:—

<i>Copper.</i>	<i>Oxide of Copper.</i>
Antimony	Arsenic acid
Platinum	Phosphoric
Tin	Succinic
Lead	Fluoric
Nickel	Citric
Bismuth	Lactic
Cobalt	Acetic
Mercury	Boracic
Sulphur	Prussic
Phosphorus	Carbonic

Bismuth. Bismuth is a metal of a reddish white colour, almost without smell or taste, and composed of broad brilliant plates. It is rather softer than copper, and its specific gravity is 9.822. It is one of the most fusible metals, melts at about 476° Fahrenheit, and evaporates by a considerable increase of heat; but when allowed to cool slowly it readily forms distinct crystals.

Bismuth combines with oxygen in two proportions; with chlorine, iodine, sulphur, and phosphorus, in one pro-

portion. It forms alloys by combining with some other metals; and salts, by its union with the acids. Its affinities for the metals and acids are nearly in the following order:—

<i>Bismuth.</i>	<i>Oxide of Bismuth.</i>
Lead	Oxalic acid
Silver	Arsenic
Gold	Tartaric
Mercury	Phosphoric
Antimony	Sulphuric
Tin	Muriatic
Copper	Nitric
Platinum	Fluoric
Nickel	Saclactic
Iron	Succinic
Sulphur.	Citric
	Lactic
	Acetic
	Prussic
	Carbonic.

Mercury. Mercury, commonly known by the name of Quicksilver, is found in nature in different states; namely, native, as an amalgam of silver, a sulphuret, and an oxide. It is of the colour of silver, very brilliant, and without taste or smell. Its specific gravity is about 13.568; but when in a solid state its density is increased. Mercury is the only one of the metals that retains a fluid state at the common temperature of the atmosphere. When the temperature is reduced to about 39° or 40° below zero of Fahrenheit, it becomes a solid, which happens, however, only in the northern climates. Solid mercury is both malleable and ductile; admits of extension, but to what degree has not yet been ascertained. When heated to about 656° it boils, and becomes changed into vapour. Hence it may be driven over by distillation, and be thus purified in some degree from the admixture of other metals. It is a good conductor of caloric, electricity, and galvanism; combines with oxygen, chlorine, and sulphur, in two proportions; forms amalgams with most of the metals, except iron; and salts, by combining with the acids. The order of its affinities for the metals and acids is nearly as follows:—

<i>Mercury.</i>	<i>Oxide of Mercury.</i>
Gold	Muriatic acid
Silver	Oxalic
Tin	Succinic
Lead	Arsenic
Bismuth	Phosphoric
Zinc	Sulphuric
Copper	Saclactic
Antimony	Tartaric
Arsenic	Citric
Iron.	Sulphurous
	Nitric
	Fluoric
	Acetic
	Boracic
	Prussic
	Carbonic.

Silver. Silver is softer than copper, but harder than gold. When melted its specific gravity is 10.474; but when hammered it is 10.510. In malleability it is inferior to none of the metals, not excepting gold, which it sometimes equals in this particular. It may be beat out into leaves not thicker than the hundred and sixty thousandth part of an inch, and drawn into wire the thousandth part of an inch thick. Its tenacity is such, that a wire of

CHEMISTRY.

silver 0·078 inch in diameter is capable of supporting a weight of 187·13 pounds avoirdupois without breaking. It melts at about 22° of Wedgewood's pyrometer, answering to 1000° of Fahrenheit, and at a higher temperature it becomes volatilized. When cooled slowly it forms rather large crystals. It combines with oxygen, chlorine, iodine, phosphorus, and sulphur; and forms alloys with most of the metals, and salts with most of the acids.

The order of its affinities for the combustibles and acids is nearly as follows:—

<i>Silver.</i>	<i>Oxide of Silver.</i>
Lead	Muriatic acid
Copper	Oxalic
Mercury	Sulphuric
Bismuth	Sacclactic
Tin	Phosphoric
Gold	Sulphurous
Antimony	Nitric
Iron	Arsenic
Manganese	Fluoric
Zinc	Tartaric
Arsenic	Citric
Nickel	Lactic
Platinum	Acetic
Sulphur	Succinic
Phosphorus.	Prussic
	Carbonic.

Gold. Gold is a metal found in nature only in a metallic state. It is of an orange red colour, having no perceptible taste or smell. It is rather softer than silver; and its specific gravity, which varies according to the mechanical processes which it has undergone, may be stated, on an average, at 19·3. It exceeds all other metals in ductility and malleability, and may be beaten into leaves the $\frac{1}{1000}$ part of an inch in thickness. Its tenacity is also considerable, although less than that of iron, copper, platinum, or silver. It appears that a gold wire 0·078 inches in diameter is capable of supporting a weight of 170lbs. avoirdupois without breaking. It melts at a moderate red heat, i. e. at 32° of Wedgewood's pyrometer, but requires a very violent heat to volatilize it; wherefore it may be denominated exceedingly fixed. After fusion it is capable of assuming a crystalline form. Gold undergoes no alteration from the air, nor is it acted upon by water, but it combines by means of the intense heat of a burning glass with oxygen in two proportions, also with phosphorus and sulphur in one proportion. It forms alloys with most of the metals, and salts with some of the acids. The order of its affinities for the latter is nearly as follows:—

<i>Gold.</i>	<i>Oxide of Gold.</i>
Mercury	Muriatic acid
Copper	Nitric
Silver	Sulphuric
Lead	Arsenic
Bismuth	Fluoric
Tin	Tartaric
Antimony	Phosphoric
Iron	Prussic.
Platinum	
Zinc	
Nickel	
Arsenic	
Cobalt	
Manganese.	

Platinum. Platinum was first discovered in 1748, in South America, where it exists for the most part, although but

little of it has hitherto been met with. It is a white metal which in point of hardness is intermediate between copper and iron. Its specific gravity has been estimated from 21·3 to 22·63. It is exceedingly ductile and malleable, so that it may be drawn into wires not exceeding $\frac{1}{1000}$ inch in diameter, and may be beaten into very thin plates. Its tenacity is such, that a wire of platinum 0·078 inch in diameter is capable of supporting a weight of 274·31 lbs. avoirdupois without breaking. It is the most infusible of all metals, and cannot be melted, in any quantity at least, without the aid of the blow-pipe. It combines with oxygen, chlorine, and phosphorus, in two proportions, but with sulphur in three. It forms alloys with most other metals, and salts with many acids.

Palladium and Rhodium. These two metals were discovered in 1803 and 1804, and were separated from the ore of platinum. Palladium is of a somewhat duller white than platinum, harder than wrought iron, its specific gravity varying from 10·972 to 11·871. Rhodium also resembles platinum in colour. Its specific gravity is stated to be 10·649. It is brittle, and requires a much higher temperature to fuse it than any other metal, unless iridium may be excepted. It has the remarkable property of being insoluble in all acids.

Iridium and Osmium. Iridium and Osmium are also newly discovered metals which have been separated from the ore of platinum. The former of these is distinguished by a very high degree of infusibility; but of the other properties of either little is known at present.

Intermediate Combustibles. The third class of combustibles is distinguished by the name of Intermediate Combustibles, because they differ from and agree with both the other classes in some particulars. Their compounds with oxygen do not, like the first class, neutralize acids; and they do not, like the second, enter into any gaseous combination. Their oxides possess acid properties in common with substances of the first class; but these acids, like those of the second class, are but imperfectly soluble in water, and act with but little energy upon animal and vegetable bodies. The substances are as follow: namely, Antimony, Chromium, Molybdenum, Tungsten, Columbium, and Titanium.

Antimony. Antimony, a compact brittle metal, exists in different states in nature, as native antimony, an oxide, a sulphuret, &c. It has a greyish white colour, with a good deal of brilliancy. Its hardness is nearly the same as that of gold, its specific gravity being above 6. It melts at 810° Fahrenheit, and may be volatilized at a higher temperature; but after cooling it assumes the form of oblong crystals. It undergoes no change by exposure to the air, nor by being kept under water; but when steam is made to pass over red hot antimony it is decomposed so rapidly that a violent detonation is the consequence. It combines with oxygen in several proportions, from 2 to 6, according to different statements. It combines also with chlorine, iodine, phosphorus, and sulphur, and forms alloys with other metals, and salts with the acids; the order of its affinities, for the combustibles and acids, is nearly as follows:

<i>Antimony.</i>	<i>Oxide of Antimony.</i>
Iron	Muriatic acid
Copper	Oxalic
Tin	Sulphuric
Lead	Nitric
Nickel	Tartaric
Silver	Sacclactic
Bismuth	Phosphoric
Zinc	Citric
Gold	Succinic

CHEMISTRY.

<p><i>Antimony.</i> Platinum Mercury Arsenic Cobalt Sulphur.</p>	<p><i>Oxide of Antimony.</i> Fluoric Arsenic Lactic Acetic Boracic Prussic Carbonic.</p>
--	--

Chromium. Chromium, or Chrome, is a brittle, infusible, and fixed metal, found in an acidified state, combined with oxide of lead, in the red-lead ore of Siberia. Its specific gravity is 5.90. It combines with oxygen in three proportions, but is acted upon by acids with great difficulty.

Molybdenum. Molybdenum possesses so many properties in common with plumbago, or the oxide of lead, that it was till lately confounded with it. It is now, however, reckoned as a distinct metal. It is drawn from the mineral ore called the sulphuret of Molybdena, either in the form of an agglutinated friable mass, of little brilliancy, or of a black powder. Its specific gravity is about 8.611. It is one of the most infusible metals, but is capable of combining with a number of metals by means of fusion. It combines with oxygen in several proportions, and with sulphur in one proportion.

Tungsten. Tungsten is a metal procured from the mineral called tungsten or ponderous stone. It has a greyish white colour, like iron, is extremely hard and brittle, and its specific gravity is above 17; so that it is surpassed in density only by gold, platinum, and iridium. It requires for fusion a temperature at least equal to 170°; and seems to have the property of crystallizing as it cools. It combines with oxygen in two proportions, forming an oxide and an acid, and also with sulphur; but of its action on the acids little is known at present.

Columbium, or Tantalum. Columbium, or tantalum, is a metal drawn from a mineral called tantalite, has a dark grey colour, and when scratched with a knife assumes the metallic lustre. Its specific gravity is 5.61. It combines with oxygen in one proportion; but of its other combinations little is known.

Titanium. Titanium, a metal obtained from the mineral called titanite, or red schorl, is found only in the state of an oxide. It seems to be one of the most infusible of the metals, combines with oxygen in three proportions, and with phosphorus in one proportion. It forms salts with some of the acids; but of its combinations with other metals little is known.

Compound substances.

Compound substances are those which are formed by the union either of simple substances with each other, or of compound substances with each other. They may be classed under the heads of oxides, chlorides, iodides, hydrogurets, ammonia, carburets, phosphurets, sulphurets, alloys, acids, compound combustibles, hydrates, and salts.

Compounds of oxygen. The compounds of oxygen are either oxides simply so called, or they are gases and acids. The oxides are as follow:—

Oxides of chlorine. The oxides of chlorine are *protoxide of chlorine* and *deutoxide of chlorine*, which are composed as follows:—

	<i>Chlorine.</i>	<i>Oxygen.</i>
1. Protoxide of chlorine . . .	1 atom	+ 1 atom.
2. Deutoxide of chlorine . . .	1 do.	+ 4 atoms.

Now supposing 1.00 to represent one atom of oxygen, and 4.5 one atom of chlorine, then the protoxide of chlorine is composed by weight of

Chlorine, 5.000 81.82 100
Oxygen, 1.111 18.18 22.22

The deutoxide is composed by weight of

Chlorine, 2.5 52.94 100
Oxygen, 2.222 47.06 88.88

The protoxide and the deutoxide are gases, both of which have a brighter yellow green than chlorine; the latter still more than the former.

Oxides of Azote or Nitrogen. The oxides of azote are the protoxide, or nitrous oxide gas, and the deutoxide or nitric oxide gas. The component parts of which are as follow:—

	<i>Azote.</i>	<i>Oxygen.</i>
Protoxide of azote, composed of 1 atom	+	1 atom.
Deutoxide of azote	1 do.	+ 2 atoms.

These two gases have many properties in common, particularly that they are unfit for respiration, and that combustibles will not burn in them; but the nitrous gas is said to have a sweet taste, and the nitric gas to have none. The specific gravity of the first is estimated at 0.00197; that of the second at 0.001343.

Oxide of Carbon. Carbonic oxide gas is composed of 1 atom oxygen and 1 atom carbon: its specific gravity is about 0.972. It possesses the mechanical properties of air, burns with a blue flame, is totally unfit for respiration, and also for supporting combustion. When mixed with oxygen gas, and an electric spark passed through the mixture, it detonates.—*Oxide of Phosphorus.* The oxide of phosphorus is that compound in which oxygen combines with it in the smallest proportion. It is procured simply by the exposure of phosphorus to the atmosphere, when it emits a white smoke, which has the smell of garlic, and is luminous in the dark.—*Oxide of Silicon,* is silica which is supposed to contain about half its weight of oxygen, and the other half silicon.—*Oxide of Sulphur.* The oxide of sulphur is said to be a substance of a dark violet colour, fibrous fracture, and tough consistence; the specific gravity is 2.325, and it contains $2\frac{1}{3}$ of oxide in the hundred parts.—*Oxide of Tellurium.* The oxide of tellurium is volatilized in the form of a white powder.—*Oxides of Potash.* The oxides of potash are formed by the combination of its base, potassium, with oxygen, by which are formed *potash* and the *peroxide of potassium*, the former of which is composed of about 20 parts of oxygen to 100 of potassium; the latter of 60 parts of oxygen to 100. The peroxide is a solid body, of a yellow colour, which, when put into water, effervesces, and is reduced to the state of potash, giving out the excess of oxygen which it contained.—*Oxides of soda,* are soda, or the combination of oxygen with sodium, its base, and the *peroxide of soda*; the former is a compound of about 74.6 of sodium, and 25.4 oxygen per cent.; the latter of about 50 parts oxygen to the hundred of sodium. The peroxide of sodium, when quite pure, is of a dirty greenish yellow colour: by the action of water it evolves oxygen, and produces a solution of the protoxide.—*Oxide of lime* is *lime* which is a compound of about 19 parts of its metallic base, calcium, to a little more than seven parts oxygen.—*Oxide of barytes,* are *barytes* and the *peroxide of barium*; the barytes is a compound of about 10 parts oxygen, and 90 barium. The peroxide, of which the proportions are not known, is a substance of a grey colour.—*Oxide of strontian,* is strontian which is a compound of about 44 parts strontian, and 7 parts of oxygen.—*Oxide of magnesia,* is magnesia, a compound, which is supposed to consist of about 11 of its metallic base + 7 oxygen.—*Oxide of yttria,* is yttria, a compound, which

CHEMISTRY.

is supposed to contain about 25 per cent. of oxygen.—*Oxide of glucina*, is glucina, which contains about 44 per cent. of oxygen.—*Oxide of alumina*, is alumina, a compound of about 100 parts of alum, its metallic base, + 28 parts of oxygen.—*Oxides of iron* are the *protoxide*, which is a black powder, known in medicine by the name of martial ethiops; and the *peroxide*, which is red, and was formerly called saffron of Mars. The proportion of oxygen which the protoxide contains, has been estimated from .28 to .29 parts of oxygen + 100 iron. The peroxide consists of 100 parts of iron + 42 nearly.—*Oxides of nickel* are the *protoxide*, which is blackish ash grey; and the *peroxide*, which is black. Their proportions are as follow :

	Nickel.	Oxygen.
Protoxide	100	29.68
Peroxide.....	100	44.445

The protoxide is tasteless, and soluble in the acids, forming with them a grass green solution.—*Oxides of cobalt*, are the *protoxide*, which is a blue powder, and the *peroxide*, which is black. Their proportions are nearly as follow :

	Cobalt.	Oxygen.
Protoxide.....	100	27.
Peroxide	100	36.77

The protoxide dissolves in acids, forming a green solution in muriatic acid, and a red one in sulphuric and nitric acids.—*Oxides of manganese* are the *protoxide*, which is green, and the *peroxide*, which is black, in nearly the following proportions :

	Manganese.	Oxygen.
Protoxide of manganese.....	100	28.75
Peroxide	100	56.213

The peroxide of manganese is found native in great abundance; and when pure, has a dark steel-grey colour. It is brittle, and very soft, soiling the fingers: the specific gravity is about four.—*Oxides of cerium* are the *protoxide*, which is black, and the *peroxide*, which is reddish brown, in nearly the following proportions :

	Cerium.	Oxygen.
Protoxide of cerium	100	17.41
Peroxide	100	26.115

Oxides of uranium are the *protoxide*, which is greyish black; and the *peroxide*, which is yellow, in nearly the following proportions :

	Uranium.	Oxygen.
Protoxide of uranium	100	6.4
Peroxide	100	9.6

Oxide of zinc, a white tasteless powder, insoluble in water, is composed of 100 parts of metal + 25. of oxygen nearly. It combines readily with acids, and forms neutral salts. It is used as a paint, and answers very well as a water colour.—*Oxides of lead* are the *protoxide*, which is yellow; the *peroxide*, which is brown; and the *red oxide*, which is considered as a compound of the two. Their proportions are nearly as follow :

	Lead.	Oxygen.
Protoxide of lead	100	7.692
Peroxide.....	100	15.384
Red oxide	100	11.08 +

The protoxide is insoluble in water, but soluble in potash and acids. Carbonic acid, combined with this oxide, forms the powder, which is well known by the name of *white lead*. The peroxide is not acted on by

sulphuric or nitric acid; and the red oxide, commonly called *red lead*, or minium, is a beautiful powder, used as a paint, but does not combine with any other substance without undergoing decomposition. All the oxides of lead are very easily converted into glass.—*Oxides of tin* are the *protoxide*, which is grey or black; and the *peroxide*, which is mostly yellow. Their proportions are nearly as follow :

	Tin.	Oxygen.
Protoxide of tin	100	13.5 or 13.55
Peroxide.....	100	27.2 or 27.64

The protoxide is a tasteless powder, soluble in both acids and alkalies; but the union of the peroxide with both is very weak, and may be separated by heat.—*Oxides of copper* are the *protoxide*, which, when native, is red, and when artificial is orange; and the *peroxide*, which is black, and of various shades. Their proportions are nearly as follow :

	Copper.	Oxygen.
Protoxide of copper	100	12.5
Peroxide	100	25.

The oxides of copper are easily reduced to a metallic, when heated with oils, &c.—*Oxide of bismuth* is a yellow powder, composed of 100 parts of metal, + 11 or 12 of oxygen. Bismuth dissolved in nitric acid produces a precipitate in the form of a powder, formerly called the *magistry of bismuth*, which is considered as a compound of this oxide and nitric acid.—*Oxides of mercury* are the *protoxide*, which is a black powder, otherwise called *athiops per se*; and the *red oxide*, otherwise called the *red precipitate*. Their proportions are nearly as follow :

	Mercury.	Oxygen.
Protoxide of mercury	100	3.99
Red oxide	100	7.99

This latter oxide has an acrid disagreeable taste, possesses poisonous qualities, acts as an escharotic when applied to the skin, is insoluble in water, and acquires a black colour by heating, which it loses again as it cools.—*Oxide of silver* is considered to be a compound of 100 parts of the metals + 7.272 of oxygen, the average of different experiments.—*Oxides of gold* are the *protoxide*, which is green; and the *peroxide*, which is reddish brown. Their proportions are nearly as follow :

	Gold.	Oxygen.
Protoxide of gold	100	4.026
Peroxide.....	100	9.889 to 12.077

The peroxide is a tasteless powder, and insoluble in water, but soluble in muriatic acid.—*Oxides of platinum* are the *protoxide*, which is black; and the *peroxide*, which is dark brown or grey. Their proportions are nearly as follow :

	Platinum.	Oxygen.
Protoxide of platinum.....	100	4.423
Peroxide	100	11.86

The peroxide, a light powder, dissolves in the fixed alkalies, combines with lime, barytes, and strontian, and is the base of the salts of platinum.—*Oxide of palladium* is composed of 100 parts of the metal + 14.209 of oxygen.—*Oxides of rhodium* are the *protoxide*, which is black; the *deutoxide*, which is brown; and the *peroxide*, which is red. Their proportions are estimated to be nearly as follow :

	Rhodium.	Oxygen.
Protoxide of rhodium	100	6.71
Deutoxide	100	13.42
Peroxide	100	20.13

CHEMISTRY.

Oxides of chromium are the protoxide, which is green; and the deutoxide, which is brown. The protoxide is easily dissolved by acids; but if it be exposed to a heat rather below redness, it becomes insoluble.—*Oxides of titanium* are the protoxide, which is blue; the deutoxide, which is red; and the peroxide, which is white.

Chlorides. The principal substances worthy of notice, which are distinguished by the name of chlorides, are as follow:—*Chloride of azote*, a yellowish oily matter, is a compound of

Azote 20 + Chlorine 80

Its smell is peculiar and strong, though not so disagreeable and injurious to the lungs as that of chlorine. It is very volatile, and soon dissipated when left in the open air. When heated to 212° it explodes with prodigious violence.—*Chlorides of phosphorus* are the protochloride and the perchloride; the former is a colourless liquid, having an acid caustic taste. The latter is a snow-white substance, which is exceedingly volatile. The specific gravity of the protochloride is 1.45.—*Chloride of sulphur* is a liquid of a brownish red colour, and of an acid, hot, and bitter taste: the specific gravity is about 1.7.—*Chloride of arsenic*, formerly known by the name of *butter of arsenic*, is a transparent substance of the consistence of oil, which is very soluble.—*Chloride of potassium*, formerly distinguished by the name of *febrifuge*, or *digestive salt of Sylvius*, and by the French called *muriate of potash*, is a white saline mass, the specific gravity of which is 1.836. It is composed of about 100 parts of potassium + 90 of chlorine.—*Chloride of sodium* is another name for common salt, or sea salt, which is composed of

Chlorine 4.5 60 150
Sodium 3 40 100

Its specific gravity is 2.125.—*Chloride of lime* is another name for *muriate of lime*, formerly called *fixed ammonia*. It consists of 100 parts of chlorine + 58.3 of calcium. It is extremely soluble in water, and when exposed to the air it deliquesces. The specific gravity is 1.76.—*Chloride of barium*, otherwise called *muriate of barytes*, is formed by heating barytes in chlorine gas; and consists of 100 parts of barium + 51, nearly. It has a pungent taste, is poisonous, and requires 2.29 parts of water, of the temperature of 190°, to dissolve one of this salt. Its specific gravity is 2.8257.—*Chloride of strontium*, or *muriate of strontian*, is a salt of a peculiarly sharp and penetrating taste. It is composed of 100 strontium + 40 chlorine, nearly. The specific gravity is 1.4402.—*Chloride of magnesium*, or *muriate of magnesia*, an extremely bitter, hot, biting salt, which requires rather more than half its weight to dissolve it. Its constituents are about

Chlorine 74.2 + Magnesium 25.8 = 100

Chlorides of iron are the protochloride, which is grey; and the perchloride, which is brown. Their proportions are nearly as follow:

	Chlorine.	Iron.
Protochloride	100	87.16
Perchloride	100	54.08

Chloride of manganese, a substance procured by dissolving the black oxide of manganese in muriatic acid, is of a pure delicate light pink colour, which melts at a red heat without alteration in close vessels; when exposed to the air it deliquesces. It is composed of nearly the following proportions:

Chlorine 54 100 4.5
Manganese 46 85.18 3.83

Chloride of zinc, originally called *butter of zinc*, is obtained by distilling a mixture of zinc filings and corrosive sublimate, and consists of nearly one-half chlorine, and one-half zinc. It deliquesces speedily when exposed to the air.—*Chloride of lead*, formerly distinguished by the name of *plumbeum corneum*, or horn-lead. It is a transparent greyish-white mass resembling horn in appearance, and consists of about

Chlorine	25.78	100	4.5
Lead	74.22	287.88	12.955
		100.	

Chlorides of tin are the protochloride, which is of a grey colour and resinous lustre; and the perchloride, long known by the name of the *fuming liquor of Libavius*, a colourless liquid which, when exposed to the air, smokes with great violence. Their constituents are nearly as follow:

	Tin.	Chlorine.
Protochloride of tin	100	60.7
Perchloride	100	122.02

Chlorides of copper are the protochloride, otherwise called *rosin of copper*, by the French *muriate of copper*, which is of an amber colour; and the perchloride, which is brownish-yellow. Their proportions are nearly as follow:

	Copper.	Chlorine.
Protochloride of copper	100	56.25
Perchloride	100	112.76

The protochloride is insoluble in water, but soluble in nitric and muriatic acids; when the perchloride is exposed to the air, it absorbs moisture, and changes its colour to white, and then green.—*Chloride of bismuth* is of a greyish white colour, and consists of

Chlorine	33.6	4.5	}	nearly.
Bismuth	66.4	8.89		

Chlorides of mercury are the protochloride, commonly called *calomel*; and the perchloride, known by the name of *corrosive sublimate*; they have likewise had the names of *submuriate of mercury* and *muriate of mercury*. Their constituent parts are nearly as follow:

	Mercury.	Chlorine.
Protochloride of mercury	100	17.6
Perchloride	100	35.2

The protochloride of mercury is usually in the state of a dull white mass; but, when slowly sublimed, it crystallizes in four-sided prisms. It has very little taste, is not poisonous, and is employed in medicine as a purgative. The perchloride of mercury is generally in the form of a beautiful white transparent mass composed of very small prismatic needles. Its taste is excessively acid and caustic, and its specific gravity is 5.1398; when swallowed it is one of the most virulent poisons known; it is soluble in half its weight of boiling water, and in about twenty parts of cold water.—*Chloride of silver*, otherwise called *horn silver*, and lately distinguished by the name of *muriate of silver*, is a curdy precipitate obtained by dissolving silver in nitric acid, and mixing the solution with a solution of common salt. Its constituent parts are nearly as follow:

Chlorine	75.5	100	4.5
Silver	24.5	32.5	13.75
		100.	

CHEMISTRY.

Chlorides of platinum are the protochloride, of which little is known, and the perchloride, which consists of

Platinum.....	100	or nearly	12·125
Chlorine.....	37·93		4·5

This chloride is of a dull olive brown or green, has a harsh feel, no taste or smell, and is insoluble in water.—*Chloride of antimony*, formerly called *butter of antimony*, is a fatty mass of a greyish white colour that is a compound of

Antimony.....	54·88	100	5·472
Chlorine.....	45·12		82·22		4·5

100·

This chloride melts at a moderate heat, is very volatile, and decomposed with water, when the white oxide of antimony and muriatic acid is formed.

Iodides.

The following table exhibits a view of the iodides, with all the most important particulars hitherto known respecting them:

Metals.	Iodides.	Colour.	Iodine combining with 100 metal.
Potassium....	1	white	312·5
Sodium.....	1	white	—
Calcium....	1	white	—
Barium.....	1	white	—
Strontium....	1	white	—
Iron.....	1	brown	—
Zinc.....	1	white	390·6
Bismuth....	1	orange	—
Lead.....	1	yellow	—
Tin.....	1	orange	—
Copper.....	1	brown	—
Mercury....	1	yellow	62·5
		red	125·
Silver.....	1	greenish-yellow.	—
Antimony....	1	dark red	—

Ammonia.

Ammonia is a gaseous compound of hydrogen and azote, which was formerly called *hartshorn*, because it was often distilled from the horn of the hart; also *spirit of urine*, and *spirit of sal ammoniac*. It is said to be composed of

Hydrogen.....	0·1947	0·125 × 3
Azote.....	0·9722		0·75

Ammonia is transparent and colourless, has a pungent smell, an acrid taste, immediately extinguishes flame, is fatal to animals, and is lighter than common air, its specific gravity being 0·590, that of common air being 1. When heated to the temperature of about 130° the ammonia separates under the form of a gas; at the temperature of 46°, it crystallizes; when cooled down to 68°, it assumes the appearance of a thick jelly, and has scarcely any smell. Ammonia combines rapidly with water; cold water absorbs this gas almost instantaneously, and at the same time heat is evolved; and the specific gravity of the water is diminished. A saturated solution of ammonia is said to be composed of 74·63 water + 25·37 ammonia = 100·000. Ammonia is acted upon with considerable energy by the supporters of combustion. It combines with sulphur and forms a sulphuret; also with the oxides of gold, silver, and platinum, from which are formed *fulminating gold*, *fulminating silver*,

and *fulminating platinum*. The base of Ammonia is found to be a metal, to which the name of *ammonium* has been given.

Hydrogurets.

The principal substances thus named are as follow:—

Hydrogurets of carbon are two; namely, *hydroguret of carbon*, otherwise called *olefiant gas*, which possesses the mechanical properties of common air, is destitute of taste and smell, burns with greater splendor than any other known gas, and detonates very loudly when mixed with thrice its bulk of oxygen, and an electrical spark is passed through it; its specific gravity is about 0·9745. Olefiant gas is composed by weight of

Carbon.....	0·832	0·75	6	160·
Hydrogen ..	0·1388		0·125		1		16·66

Water is said to absorb one-twelfth of its bulk of olefiant gas.—*Bihydroguret of carbon*, or *carburetted hydrogen*, is a gaseous substance which exhales in hot weather from stagnant waters. It is composed by weight of

Carbon.....	0·416	0·750	3
Hydrogen.....	0·0694		0·125		1

The gas which exhales in coal mines, known by the name of *fire-damp*, has been found to be carburetted hydrogen. Its specific gravity is 0·555.—*Hydrogurets of phosphorus* are the hydroguret and bihydroguret of phosphorus, two gaseous compounds. The hydroguret, otherwise called *phosphuretted hydrogen gas*, has the smell of onions, and a bitter taste, burns with great splendor when it comes in contact with the air; water dissolves rather more than 2 per cent. of this gas: it produces no alteration on vegetable blues, but precipitates silver, mercury, and copper. The *bihydroguret*, otherwise called *hydrosphoric gas*, does not burn like the former when it comes into common air or oxygen gas, but if it be mixed with oxygen, and heated to 300°, it explodes; when mixed with chlorine gas it burns spontaneously. Water is found to absorb one-eighth of its volume of this gas.—*Hydroguret of potassium*, a grey compound of hydrogen, is composed by weight of

Potassium.....	100	5
Hydrogen.....	0·616		0·0308

Carburets.

The principal compounds distinguished by this name are as follow:—*Carburet of nitrogen*, or *azote*, otherwise called *cyanogen*, a gaseous compound lately discovered, which is composed by weight of

Azote.....	0·9722
Carbon.....	0·832

It has a black colour, and the smell of bitter almonds, and it burns with a beautiful purple flame.—*Carburets of iron* are denominated, according to the different stages of the process, *natural steel*, or that which is obtained from the iron ore; *steel of cementation*, better known by the name of *blistered steel*; and *cast steel*, which is the most valuable of all.—*Carburet of manganese*, a compound occasionally to be met with in iron founderies, which is known by the name of *keesh*. It is composed of thin scales having the appearance and lustre of metal, but it is very brittle.

Phosphurets.

Of the phosphurets the following are the principal; namely — *Phosphuret of iodine*, a substance of a reddish brown colour; the solidity, fusibility, and volatility of which vary with the proportions of the ingredients.—*Phosphu-*

CHEMISTRY.

ret of carbon, a soft powder, of a dirty lemon colour, which is composed in nearly the following proportion of

Phosphorus 1·5	200
Carbon.... 0·75.....	100

It has neither smell nor taste, burns below a red heat, and when heated to redness gradually gives out its phosphorus, but does not melt.—*Phosphuret of sulphur* is a compound which bears a high temperature without decomposition.—*Phosphuret of arsenic* is a black compound, formed by distilling equal parts of its ingredients by a moderate heat. It ought to be preserved in water. *Phosphuret of potassium*, a compound of a chocolate colour, burns in the open air, and when thrown into water detonates.—*Phosphuret of soda* has the colour and appearance of lead. It is converted by water into phosphate of soda.—*Phosphuret of lime* is a compound of a deep brown colour, that falls to pieces in the air. It is insoluble in water, which it has, however, the property of decomposing.—*Phosphuret of barytes*, a compound of a dark brown colour, the constituents of which are supposed to be nearly in the following proportions :

Barytes.... 9·75.....	100
Phosphorus 1·5	15·78

Phosphuret of strontian is a compound very similar to the preceding.—*Phosphuret of iron*, a metallic substance procured from that sort of iron which is called *cold short*. It is of a dark steel grey colour, exceedingly brittle, and not very soluble in acids.—*Phosphuret of nickel*, a metallic substance, composed, according to some, of 100 nickel + 15 phosphorus.—*Phosphuret of cobalt* contains about one-fifteenth of phosphorus, and is much more fusible than pure cobalt.—*Phosphuret of manganese* is of a white colour, and more fusible than manganese.—*Phosphuret of zinc* is of a white colour, has a metallic lustre, is somewhat malleable, and when exposed to a strong heat burns like zinc.—*Phosphuret of lead* is composed of about 12 parts phosphuret and 88 of lead. It may be cut with a knife, but separates into plates when hammered.—*Phosphuret of tin* is supposed to be composed of about 85 parts of tin and 15 of phosphorus.—*Phosphuret of copper* is a white substance composed of about 80 parts of copper and 20 of phosphorus. It is harder than iron, not ductile, and cannot easily be pulverized. Its specific gravity is 7·1220.—*Phosphuret of mercury* is of a black colour, and solid consistence.—*Phosphuret of silver* is composed of about 4 parts of silver and 1 of phosphorus. It breaks under the hammer, but may be cut with the knife.—*Phosphuret of gold* is composed of about 23 parts of gold and 1 of phosphorus. It is brittle, whiter than gold, and of a crystallized appearance.—*Phosphurets of platinum* are the *protophosphuret* and the *perphosphuret*, the constituent parts of which are nearly as follow :—

	Platinum.	Phosphorus.
Protophosphuret of platinum..	100.....	22·21
Perphosphuret.....	100.....	42·25

The specific gravity of the first is 6 ; that of the second 5·28. They are both destitute of taste and smell, and nonconductors of electricity.—*Phosphuret of antimony*, a white brittle substance, which emits a green flame when melted. It is composed of about 45 parts antimony and 11 phosphorus.

Sulphurets.

The principal sulphurets are as follow :—*Sulphuret of iodine*, a black compound resembling sulphuret of anti-

mony.—*Sulphuret of carbon*, a liquid as transparent and colourless as water ; is composed of about 5·7 parts of carbon + 30 parts of sulphur. It has an acrid taste, a nauseous smell, and is one of the most volatile liquids known. Its specific gravity is about 1·272 or 1·263. Sulphuret of carbon is scarcely soluble in water, but readily so in alcohol and ether.—*Sulphuret of phosphorus*, a yellowish white compound, is composed in nearly the following proportions, by weight, of

Sulphur..... 2	4	100
Phosphorus .. 1·5	3	75

Sulphur and phosphorus, by combining, have a strong tendency to liquidity.—*Sulphurets of arsenic* are two ; namely, a scarlet coloured vitreous compound, called *realgar*, which is found native in different parts of Europe ; and a yellow coloured powder, which is called *orpiment*, and may be artificially prepared by subliming arsenic and sulphur by a heat not sufficient to melt them. The specific gravity of the *realgar* is 3·3384 ; that of the *orpiment* 3·4522. It has been supposed by some, that these two substances differ merely in the proportions of sulphur which they contain ; but this is denied by others. The sulphurets of arsenic consist of about 58 parts arsenic, and 42 sulphur.—*Sulphuret of potash* is of a brown colour, not unlike the liver of animals, whence it was called *hepar sulphuris*, or *liver of sulphur*. When exposed to the air, it becomes green, and even white. It has an acrid bitter taste, is deliquescent, and very soluble in water, forming a yellow solution of hydrosulphuret of potash.—*Sulphuret of lime* is an acrid reddish mass, which is formed by heating lime with sulphur. It is soluble in water, like the sulphuret of potash.—*Sulphuret of barytes* is a reddish yellow mass like the preceding.—*Sulphuret of magnesia* is a yellow powder, slightly agglutinated.—*Sulphurets of iron* are the *protosulphuret* and the *persulphuret*, which are called by mineralogists the *magnetic pyrites* and the *cubic pyrites*. The former is of a bronze colour, and the latter yellow, but both have the metallic lustre. The addition of sulphur to iron renders it permanently magnetic.—*Sulphuret of nickel* is a brittle yellow compound, that is not magnetic. It is composed of about 28 nickel + 15 sulphur.—*Sulphuret of cobalt* is a yellow compound that is scarcely decomposed by heat.—*Sulphuret of manganese*, a green compound, is composed in nearly the following proportions : of

Manganese 74·5	100·
Sulphur	25·5
	34·22

Sulphuret of zinc exists native in the ore called *blende*, and is composed of about 33 zinc + 15 sulphur.—*Sulphurets of lead* are the *sulphuret* and the *bisulphuret*. The sulphuret of lead is found native, and in that state is called *galena*, which is composed of about 100 lead + 15 sulphur. The bisulphuret is said to contain about 25 parts of sulphur.—*Sulphurets of tin* are the *protosulphuret* and the *persulphuret*. The first is composed of 100 tin + 25 to 27·234 sulphur, according to different experiments. The persulphuret, long known by the name of *aurum mosaicum*, or *musivum*, mosaic gold, is said to consist of 100 tin + 52·3 or 55·25 sulphur. Mosaic gold, which is in the form of light scales, is insoluble in water or alcohol, and not acted upon either by muriatic or nitric acid.—*Sulphurets of copper* are said to be the *sulphuret*, which is black, and composed of about 100 copper + 25 sulphur ; and the *bisulphuret*, which is yellow, and composed of 100 copper + 30 sulphur. They are both found native, and the first may also be formed artificially.—*Sulphuret of bismuth* is of a blueish

CHEMISTRY.

colour, and is composed of about 100 bismuth + 22.52 sulphur. It is sometimes found native.—*Sulphurets of mercury* are the *protosulphuret*, which is black, and the *persulphuret*, which is red. The first, which is in the form of a powder, and originally called *æthiops' mineral*, consists of 100 mercury + 8.2 sulphur. The persulphuret was formerly called *cinnabar*, and when reduced to a fine powder is known, in commerce, by the name of *vermillion*. It consists of 100 mercury + 16 sulphur. This sulphuret is decomposed by distillation with fixed alkalies, lime, and barytes; but it is insoluble in water and muriatic acid.—*Sulphuret of silver* is a black or deep violet compound, of about 100 silver + 14.9 or 14.59 sulphur. It is more fusible than silver; may be cut with a knife, and crystallizes in small needles. Its specific gravity is rather more than 7.—*Sulphuret of gold* is a black compound, of about 100 gold + 21.95 or 24.39 sulphur.—*Sulphurets of platinum* are the *protosulphuret*, which is blueish-grey; the *deutosulphuret*, which is blueish-black; and the *persulphuret*, which is a dark iron-grey. Their constituent parts are nearly in the following proportions:

	Platinum.	Sulphur.
Protosulphuret of platinum.	100.	19.04
Deutosulphuret	100.	28.21
Persulphuret	100.	38.8

The persulphuret is a conductor of electricity, and its specific gravity is 3.5.—*Sulphuret of palladium* is rather paler than the pure metal, and extremely brittle. It consists of about 100 palladium + 24 sulphur.—*Sulphuret of antimony* is a leaden-grey compound, of about 100 antimony + 29.870 or 37.000 sulphur, according to different experiments. Its specific gravity is about 4.368.—*Sulphuret of molybdenum* is found native in the metallic ore called *molybdena* in nearly the proportions of 100 molybdenum + 66.5 sulphur.—*Sulphuret of tungsten* is a greyish-black compound in nearly the proportions of 100 tungsten + 33.26 sulphur.

Alloys.

Metals undergo changes, by combination, in their ductility, malleability, hardness, &c. Their malleability and ductility are mostly impaired; thus gold forms brittle alloys with lead, tin, and other metals. Their hardness is frequently increased so, that iron, by a small addition of gold, is said to acquire a hardness superior to steel. Their colour is varied: thus the addition of a small quantity of arsenic to copper renders it white, and the alloy of antimony and copper is of a violet colour. The specific gravity of the alloy is seldom the mean of its component parts. In some cases it is superior, and in others inferior; as in the case of gold with zinc, tin, bismuth, antimony, and cobalt, where the specific gravity of the alloys is greater than the mean of their components; and in the case of gold with silver, iron, lead, copper, iridium, and nickel, their specific gravity is less; and so, likewise, in the case of other alloys. The fusibility of the alloys is in many instances increased; thus platinum is rendered easily fusible by arsenic; and the alloy of lead, tin, and bismuth, melts at a temperature below that of boiling water, although bismuth, the most fusible of the three, requires a much higher degree of heat. The alloy of iron and arsenic is found native, and is known among mineralogists by the name of *mispickel*; that of tin and iron is a useful alloy called *tin-plate*, and in Scotland white iron, which is formed by dipping thin plates of iron into melted tin. Tin and zinc are combined into the alloy, which is called *pewter*, which is much harder than zinc, and much stronger than tin.

The alloy of tin and lead is called *ley pewter*; and also *tin-foil*, which latter being more soluble than either of the other metals separately, is used by plumbers as a solder. The alloy of copper and arsenic is called *white copper* or *white tombac*; that of copper and zinc is known by the name of *brass*; and if zinc in the metallic state be melted with copper or brass, the alloy is known by the name of *pinchbeck*, *Prince's metal*, *Prince Rupert's metal*. The alloys of copper and tin are employed for a variety of purposes, under the names of *bell metal*, *canon metal*, *bronze*, *tinned copper*, and the like. The alloy of silver and copper is employed in most countries for coinage. The standard or sterling silver of Britain is a compound of 12½ silver, and 1 alloy, i. e. 1 copper. Its specific gravity, after simple fusion, is 10.200. Gold is alloyed with either silver or copper, or both for coinage. Sterling or standard gold consists of pure gold, with one-twelfth of alloy. The specific gravity of gold, alloyed with one twenty-fourth of silver and one twenty-fourth of copper, is 17.344. The bulk of the metals, before combination, is 2.700, after it 2.767. The alloy of antimony and copper was originally called by the alchemists the *regulus of Venus*.

The following table exhibits a view of the most important alloys, in the order of the different substances as they have been given.

Arsenic	and	Potassium Sodium Iron Zinc Tin Copper Lead Bismuth Cobalt	Copper	and	Bismuth Lead Tin Arsenic Tellurium Potassium Iron Zinc Bismuth

Acids.

The acids are now chemically distinguished by the following properties: they possess an acid taste, change the blue colours of vegetable substances to red; and if these blues have been previously converted to green by alkalis, the acids restore them again. They moreover unite with water in almost any proportion; and, by combining with alkalis, earths, and most of the metallic oxides, they form with them the compounds called *salts*.

The acids may be distinguished, according to their base, into those that contain oxygen, chlorine, iodine, fluorine, and cyanogen, in which order they may be most conveniently arranged as follows:

Acids containing oxygen. The acids having oxygen united to a combustible or combustibles are as follow:—*Nitric acid*, otherwise called *water of nitre* and *spirit of nitre*, but more commonly known by the name of *aqua fortis*, is a gaseous body obtained from nitre, which consists of 100 oxygen and 35 nitrogen or azote. The order of its affinities is nearly as follows:

Nitric acid.

Barytes
Potash
Soda
Strontites
Lime
Magnesia
Ammonia
Glucina
Alumina
Zirconia

Oxide of
Zinc
Iron
Manganese
Cobalt
Nickel
Lead
Tin
Copper
Bismuth
Antimony
Arsenic
Mercury
Silver
Gold
Platinum.

Nitrous acid, another combination of nitrogen with a larger portion of oxygen, consists of 100 nitrogen and 230 oxygen.—*Carbonic acid*, a gaseous body, otherwise called *carbonic acid gas*, consists of 100 carbon and about 250 oxygen. Carbonic acid extinguishes a candle, and is unfit for respiration. Its specific gravity is 1.527. The order of its affinities is nearly as follows:

Carbonic acid.
Barytes
Strontites
Lime
Potash
Soda
Magnesia
Ammonia
Glucina
Zirconia
Metallic oxides.

Boracic acid is procured from borax in the form of a powder, which is sparingly soluble in water, but readily dissolves in alcohol. The order of its affinities is nearly as follows:

Boracic acid.
Lime
Barytes
Strontites
Potash
Soda
Magnesia
Ammonia
Glucina
Zirconia
Metallic oxides
Water
Alcohol.

Phosphoric acid is a compound of 100 phosphorus and about 114.6 oxygen, which dissolves readily in water, and is not volatile. The order of its affinities is nearly the same as that of the nitric acid.—*Phosphorous acid* is a compound of 100 phosphorus and about 76 oxygen. The order of its affinities is nearly as follows:

Phosphorous acid

Lime
Barytes
Strontites
Potash
Soda
Ammonia
Glucina
Alumina
Zirconia
Metallic oxides.

Hypophosphorous acid is a compound of 100 phosphorus and about 37.44 oxygen.—*Sulphuric acid*, formerly called *oil of vitriol*, is a compound of 100 sulphur and about 150 oxygen; it is colourless like water, somewhat of an oily consistency, without smell, but of an acrid taste. *Sulphuric acid* is nearly twice as heavy as water, the specific gravity being at least 1.850, and it boils at the temperature of 620°. Its affinities are nearly in the same order as those of the nitric acid.—*Sulphurous acid* is a compound of equal parts of sulphur and oxygen. The order of its affinities in forming sulphites is nearly as follows:

CHEMISTRY.

Sulphurous acid.

Barytes
Lime
Potash
Soda
Strontites
Magnesia
Ammonia
Glucina
Alumina
Zirconia.

Arsenic acid, a white solid compound of 100 arsenic and about 52·631 oxygen; its specific gravity is 3·391; when heated strongly it melts, and is converted into a glass; it dissolves slowly in cold, but readily in hot water, and is decomposed by the simple acidifiable combustibles. The order of its affinities is nearly as follows:

Arsenic acid.

Lime
Barytes
Strontites
Magnesia
Potash
Soda
Ammonia
Glucina
Alumina
Zirconia.

Arsenious acid, formerly called *white arsenic*, or simply *arsenic*, is a compound of 100 arsenic and from 32·979 to 34·930 of oxygen. Both these acids are noxious.—*Antimoniac acid*, a straw-coloured powder, consists of 100 antimony and about 35·536 oxygen.—*Antimonious acid*, or the *deutoxide of antimony*, consists of 100 antimony and from 23 to 29 oxygen.—*Chromic acid*, a compound of a deep red colour, and a sharp metallic taste, is composed of 100 chromium and about 87·72 oxygen; it gives different coloured precipitates with solutions of nitrate, of mercury, of silver and copper, &c.—*Molybdic acid* is a white powder which is soluble in 960 parts of boiling water. The solution is a pale-yellow. The specific gravity of the acid is 3·460.—*Tungstic acid* is a tasteless yellow powder insoluble in water. The order of its affinities is the same as that of arsenic acid.

Acids with two or more bases. These acids contain oxygen united to more than one substance as a base. They have been commonly called vegetable acids, because they are mostly derived from vegetable substances. They are as follow:—*Acetic acid* which exists in three states; namely, in that of *vinegar*, when it is first prepared; in that of *acetous acid*, when it is purified by distillation; and that of *acetic acid*, otherwise called *radical vinegar*, when it is concentrated by means of different processes. Vinegar is a liquor procured by bringing wine, beer, &c. into contact with the external air at a temperature of 80°. Its specific gravity varies from 1·0135 to 1·0251; according to the liquid from which it has been procured. It is very subject to decomposition.—*Acetous acid* is a colourless liquor, has an aromatic smell, and evaporates completely when exposed to a moderate heat.—*Acetic acid*, which was formerly distinguished by the name of *vinegar of Venus*, is colourless like the preceding, but has an empyreumatic smell. The specific gravity of distilled vinegar varies from 1·007 to 1·0095, that of acetic acid when at its highest is 1·080, but this varies according to the proportion of water which it contains. Acetic acid, in this state, is extremely acrid and pungent, reddens and corrodes the skin very quickly, is very volatile,

and takes fire rapidly in the open air. It requires, however, a strong heat for its decomposition. The order of its affinities is nearly as follows:

Acetic acid.

Barytes
Potash
Soda
Strontites
Lime
Ammonia
Magnesia
Metallic oxides
Glucina
Alumina
Zirconia.

Benzoic acid, otherwise called *flowers of benzoin*, is a fine light powder procured from the gum benzoin, which is a compound of
Carbon 74·41 + Oxygen 20·43 + Hydrogen 5·16=100.
It is volatilized in white fumes by a moderate heat, requires for solution about twenty-four times its weight of boiling water, and is soluble in alcohol. The order of its affinities is nearly as follows:

Benzoic acid.

White oxide of arsenic
Potash
Soda
Ammonia
Barytes
Lime
Magnesia
Alumina.

Succinic acid, or the *acid procured from amber*, is a compound of

47·888 oxygen + 47·600 carbon + 4·512 hydrogen=100.
It is obtained in the form of crystals, which are soluble in twenty-four times their weight of water. The order of its affinities is nearly as follows:

Succinic acid.

Barytes
Lime
Potash
Soda
Ammonia
Magnesia
Alumina
Metallic oxides.

Moroxalic acid is a compound obtained in the form of crystals from a salt, the production of the wood of the mulberry-tree, that is readily soluble in water and alcohol.—*Camphoric acid* is a compound obtained by distilling camphor, with four times its weight of nitric acid, till about twenty parts of acid have been employed; it has a slightly acid bitter taste, and a smell like saffron; it is soluble in 100 parts of cold water, and readily dissolved by boiling alcohol. The order of its affinities is nearly as follows:

Camphoric acid.

Lime
Potash
Soda
Barytes
Ammonia
Alumina
Magnesia.

CHEMISTRY.

Boletic acid consists of white crystals obtained from the juice of the *boletus pseudo-igniarius*; it resembles tartar in its taste, and requires 180 times its weight of water to dissolve it; when heated it rises in vapour.—*Suberic acid* is obtained in the form of a white powder by digesting one part of suber or cork in six parts of nitric acid. Water, at the temperature of 140°, dissolves one-thirty-eighth of its weight of this acid, and one-eightieth at the temperature of 55°; when heated it melts, and crystallizes on cooling; it precipitates the nitrate of silver, the muriate of tin, sulphate of iron, nitrate and acetate of lead. The order of its affinities is nearly as follows:

Suberic acid.

Barytes
Potash
Soda
Lime
Ammonia
Magnesia
Alumina
Metallic oxides.

Pyrotartaric acid is a sublimate obtained by distilling tartar with potash; it dissolves readily in water, and crystallizes again when subjected to evaporation.—*Oxalic acid*, an acid so called because it has been found to exist, native, in the *oxalis acetosella*, or wood sorrel, was originally called *saccharine acid*, or the *acid of sugar*, because it is obtained by the distillation of sugar with nitric acid in form of crystals, which dissolve in twice their weight of cold, and in an equal weight of hot water; they are also soluble in boiling water, and in ether, though sparingly; they effloresce in the air, and become covered with a white powder, but in a red heat they are entirely decomposed. These crystals, in a perfect state, are found to consist of real acid 77, water 23. The acid is composed of

Oxygen. . 64 + carbon. . 32 + hydrogen. . 4 = 100.

The order of its affinities is nearly as follows:

Oxalic acid.

Lime
Barytes
Strontites
Magnesia
Potash
Soda
Ammonia
Alumina.

Mellitic acid is obtained from a mineral called *mellite*, or the *honey-stone*, in the state of crystals, but is not very soluble in water. It is composed of

Oxygen 52.54 + carbon 47.11 + hydrogen 0.35 = 100.

Tartaric acid is obtained from the common cream of tartar, and forms regular crystals, which require for solution five or six parts of water at 60° Fahrenheit. These crystals are found to consist of real acid 88.75, and water 11.25. The acid is composed, according to different experiments, of

Carbon. Oxygen. Hydrogen.
21.050 or 35.98 69.321 or 60.28 6.629 or 3.79.

The order of its affinities is the same as that of oxalic acid.—*Citric acid* is obtained pure and in a crystallized form, by a particular process, from the expressed juice of lemons mixed with powdered chalk. The crystals consist of real acid 100 and water 26.58. The acid is

decomposed at a high temperature, and found by different experiments to consist of

Oxygen. Carbon. Hydrogen.
59.859 or 54.831 . . 33.811 or 41.369 . . 6.330 or 4.800.

The order of its affinities is nearly the same as that of the oxalic acid. It is exceedingly soluble in water.—*Sacclactic acid*, so called because it was first obtained from sugar of milk, is also procured in the form of a white powder by heating gum arabic, and other mucilaginous substances, with nitric acid. Heat decomposes this acid, and it is soluble in 60 parts of its weight of boiling water. It is composed, according to different experiments, of

Oxygen. Carbon. Hydrogen.
62.69 or 61.465 33.69 or 33.430 3.62 or 5.105.

The order of its affinities is nearly as follows:

Sacclactic acid.

Lime
Barytes
Magnesia
Potash
Soda
Ammonia
Alumina
Metallic oxides.

Uric acid, a white powder obtained from the urinary calculi, is destitute of both taste and smell; it dissolves in 1720 parts of water, at the temperature of 60°, decomposes alkaline hydrosulphurets, and precipitates their sulphur. From the distillation of the uric acid is obtained a sublimate that is said to be analogous to succinic acid. The constituent parts of uric acid are nearly as follow:

Oxygen. Carbon. Hydrogen. Azote.
22.857 + 34.286 + 2.857 + 40 = 100.

Malic acid, a liquid of a reddish colour, is obtained in the greatest abundance from the juice of apples, to which it owes its name; when evaporated it becomes thick and viscid; when heated in the open fire it exhales an acrid fume, and leaves behind it a voluminous coal. It is very soluble in water.—*Sorbic acid*, a transparent colourless fluid obtained from the *pyrus aucupatoria*, or Mountain Ash, which is soluble in alcohol or any portion of water.—*Formic acid*, a liquid procured from the *formica rufa*, or Red Ant; the specific gravity of which is 1.1168. Its constituent parts are found to be

Oxygen 64.223 + Hydrogen 2.807 + Carbon 32.970 = 100.

This acid when cooled becomes solid, but does not crystallize.—*Lactic acid*, procured from sour milk, is of a brownish-yellow colour, which has no smell while cold, but when heated acquires a sharp sour odour; it does not crystallize, but when evaporated to dryness forms a smooth varnish, which dissolves readily in alcohol. The order of its affinities is nearly as follows:

Lactic acid.

Barytes
Potash
Soda
Strontites
Lime
Ammonia
Magnesia
Metallic oxides
Glucina
Alumina
Zirconia.

Zumic acid, an acid liquor obtained from vegetable sub-

CHEMISTRY.

stances that have undergone an acetous fermentation.—*Gallic acid*, a compound substance in the form of transparent plates, or octahedrons, procured from nutgalls, is composed nearly in the following proportions: of

Oxygen 38·36 + Hydrogen 5·00 + Carbon 56·64=100.

When heated it has an aromatic and rather unpleasant smell, is soluble in 1½ parts of boiling water, and in 12 parts of cold water; and also in ether. It occasions a precipitate when poured into solutions of glucina, yttria, and zirconia in acids; and, upon metallic acids, it acts with considerable energy, changing the colour, and produces precipitates in many of them; on which account it has been frequently used as a reagent to detect the presence of metallic bodies.—*Tannin*, or the *tanning principle*, a substance of a reddish-brown colour, and an astringent taste, is to be procured from barks and many vegetable substances, but most readily, and in the greatest purity, from nutgalls and catechu. Tannin prepared from galls is found to consist of

Oxygen 54·654 + Hydrogen 4·186 + Carbon 41·186=100.

The bark of oak is generally preferred for the purpose of tanning; but other barks might be employed for the same purpose, as appears from the following table, which exhibits the quantity of tan afforded by 480 lbs. of different barks:

	<i>lb.</i>		<i>lb.</i>
Middle sized oak cut in spring.	29	Horse chesnut	9
Spanish chesnut	21	Sycamore	11
Leicester willow, large size.	233	Lombardy Poplar	15
Elm	13	Birch	8
Large common willow ..	11	Hazel	14
Ash	16	Black Thorn	16
Beech	10	Coppice Oak	32
		Oak cut in autumn	21
		Larch cut do.	8

The inner cortical layers of all barks are found to contain the greatest quantity of tan, that of oak bark being not less than seventy-two. Tannin forms precipitates with solution of starch, gluten, and albumen, and with many of the metallic oxides. Besides the natural tannin just spoken of, an artificial sort has been prepared from charcoal.

Acids containing chlorine. Chlorine forms acids by combining with oxygen or with a combustible. The principal of these acids are as follow:—*Chloric acid*, a colourless liquid, consists of 100 chlorine and about 111·11 oxygen. The order of its affinities is nearly as follows:

Chloric acid.

Potash
Soda
Barytes
Strontites
Lime
Ammonia
Magnesia
Alumina.

Perchloric acid is a compound of about 100 chlorine and 180 oxygen.—*Muriatic acid*, otherwise called *hydrochloric acid*, is a compound of chlorine and hydrogen in nearly the proportions of oxygen 100, muriatic acid 341·5. Muriatic acid gas, in its purest form, exists in the state of a gas which is permanent over mercury only. It has a very pungent smell, is sufficiently caustic to blister the skin, extinguishes a lighted candle, and detonates when exposed to the light of the voltaic discharge. It is greedily absorbed by water, which takes

up 480 times its bulk, and has its specific gravity increased from 1 to 1·200. The order of its affinities is nearly as follows:

Muriatic acid.

Barytes
Potash
Strontites
Lime
Ammonia
Magnesia
Glucina
Alumina
Metallic oxides.

Chlorocarbonic acid, otherwise called *phosgene gas*, is a compound of chlorine 45, and carbonic oxide 1·75, or of chlorine 4·5, oxygen 1·0, and carbon 0·75. This gas is more disagreeable and suffocating than chlorine, and affects the eyes in a peculiar manner. When tin, zinc, antimony, or arsenic, are dissolved in it, they decompose it by absorbing the chlorine, and setting at liberty the carbonic oxide. It is also decomposed by water, and converted into muriatic acid and carbonic acid.

Acids containing iodine. Iodine combines with supporters and combustibles to produce the following acids:—*Iodic acid*, a white, semi-transparent solid, formed by the combination of iodine with oxygen in nearly the proportions of iodine 761 + oxygen 236=1000, or in the proportion of about 15 to 4. Its specific gravity is considerable, for it sinks rapidly in sulphuric acid.—*Chloriodic acid*, a volatile compound of 100 iodine and 57·6 chlorine. When exposed to the air it deliquesces, and its solution in water contains acid properties.—*Hydriodic acid*, a gaseous compound of about 8·6804 iodine, and 0·0694 hydrogen. Water absorbs this acid with avidity. When exposed to a heat below 262° the water is driven off, and the acid becomes concentrated. Hydriodic acid is colourless, and elastic like common air, having a smell similar to muriatic acid. The specific gravity is about 4·443.

Acids containing fluorine. Fluorine combines with combustibles, and produces the following acids.—*Fluoric acid*, which is obtained from fluor spar, is supposed to be a compound of fluorine and hydrogen. The order of its affinities is said to be nearly as follows:

Fluoric acid.

Lime
Barytes
Strontites
Magnesia
Potash
Soda
Ammonia
Glucina
Alumina
Zirconia
Silica.

Fluoboric acid, a powerful gaseous compound of fluorine and boron, the specific gravity of which is determined to be 2·3709. Water is said to absorb 700 times its volume of this gas. The specific gravity of the liquid thus obtained is 1·77, which is totally unfit for respiration. Its specific gravity is determined to be about 3·5735.

Acids containing cyanogen. Cyanogen combines with chlorine, and with combustibles, so as to form the following acids:—*Chlorocyanic acid*, or the compound of cyanogen and chlorine, is a colourless liquid with a strong smell that provokes tears. Its specific gravity, in the state of

a vapour, is about 2.152.—*Hydrocyanic acid*, or *Prussic acid*, in a pure state, is a limpid and colourless fluid, which was first obtained from the powder well known by the name of *Prussian blue*. It is capable of assuming a gaseous form, in which state it is absorbed by alcohol; is not inflammable, and when received into the lungs is speedily fatal. As a liquid its taste is at first cool, but soon becomes hot and acrid. Its specific gravity varies with the temperature. It is highly volatile, and boils at 79° Fahrenheit. A drop of it placed on paper becomes instantly solid.—*Sulphocyanic acid* is a colourless liquid compounded of sulphur 100 and cyanogen 53.3.—*Ferro-cyanic acid* is a pale lemon-coloured compound of 100 cyanogen, and from 34 to 37 iron. It is destitute of smell, and decomposed by heat, or by exposure to a strong light. The order of its affinities is nearly as follows:

Ferro-cyanic acid.

- Barytes
- Strontites
- Potash
- Soda
- Lime
- Magnesia
- Ammonia.

Compound Combustibles.

Compound combustibles comprehend alcohol, ether, oils, resins, and bitumens.—*Alcohol*, or the spirit of wine, is a transparent liquor, as colourless as water, of a pleasant smell, a strong agreeable taste, and an intoxicating power. It is procured from what is commonly called ardent spirits, as brandy, whiskey, rum, &c. and is properly nothing more than *rectified spirits* deprived of their water as far as is possible. The specific gravity of the alcohol, in its purest state, seems to be about .820 at the temperature of 60°; but the alcohol of commerce, which is not better than rectified spirits, is seldom under .8371. Alcohol has a strong affinity for water, with which it combines in every proportion, and caloric is evolved during the union. It is highly inflammable, remarkably expansible by heat, boils at 176°, but has never yet been congealed by any known method of producing artificial cold; and even when diluted with an equal weight of water it requires a cold of 6° below 0 to congeal it. Alcohol is also a powerful solvent, and acts upon many of the acids, volatile oils, resins, &c. It dissolves many of the salts copiously, others sparingly, and others not at all. The following exhibits the proportions at which some of the salts are taken up by 240 grains.

	Grains.		Grains.
Borate of ammonia ..	1	Nitrate of magnesia ..	694
Fluate of alumine ...	1	———— potash....	5
———— ammonia ..	1	———— soda	23
Muriate of ammonia ..	17	Oxalate of alumine ..	7
———— lime	288	Tartrate of alumine ..	7
———— magnesia	1313	———— ammonia	7
———— potash...	5	———— potash...	7
Nitrate of alumine...	240	Supertartrate of potash	7
———— ammonia..	214	————oxalate of potash	7
———— lime.....	288		

Alcohol is composed of carbon, oxygen, and hydrogen; but in what proportions is not accurately known.

Ethers. Ethers are fragrant and volatile liquors procured by distillation from a mixture of alcohol with different acids, of which the following are the principal:—*Sulphuric ether*, a compound obtained from sulphuric acid and alcohol, was originally called *oleum vitrioli dulce*, and by the Germans at present *naphtha*. It is so vola-

tile that it can scarcely be poured from one vessel into another before it is dissipated. It is composed of oxygen 17.62 + hydrogen 14.40 + carbon 67.98 = 100.00.—*Nitric ether*, which is obtained from nitric acid and alcohol, is a compound of about 34 oxygen, 16 azote, 9 hydrogen, and 39 carbon. It is specifically lighter than water, but heavier than alcohol, highly combustible, and much more volatile than the best sulphuric ether.—*Chloric ether* is a compound formed by the union of equal volumes of chlorine and olefiant gas.—*Muriatic ether* is obtained from muriatic acid and alcohol with some difficulty, and not without the aid of other substances, as manganese, muriate of soda, sulphuric acid, &c.—*Phosphoric ether*, obtained from phosphoric acid and alcohol, is specifically lighter than alcohol, and boils at 100°.—*Acetic ether*, obtained from concentrated acetic acid and alcohol, is a limpid colourless liquid, having a taste different from all other substances. Its specific gravity, at the temperature of 44½° is 0.866. It boils at the temperature of 160°. It burns with a yellowish, whitish flame; and acetic acid is evolved during the combustion.

Oils. Oils are unctuous liquids, which have been divided into two classes; namely, volatile and fixed.—*Volatile oils* are very combustible substances, which have an acrid taste and a strong fragrant smell; are volatilized by a gentle heat, and soluble in alcohol, but imperfectly so in water. They evaporate without leaving any stain on paper, and some of them detonate. These oils are obtained from every part of plants, except the cotyledons of the seed. Their specific gravity varies very considerably, as may be seen from the following table:

Oil of Sassafras...	1.094	Oil of Tansy	946
— Cinnamon ..	1.035	— Carraway seeds..	940
— Cloves	1.034	— Origanum.....	940
— Fennel.....	997	— Spike	936
— Dill.....	994	— Rosemary.....	934
— Pennyroyal.	978	— Juniper berries..	911
— Cummin ...	975	— Oranges	888
— Mint	975	— Turpentine.....	792
— Nutmegs...	948		

These oils are otherwise called aromatic, from their fragrance; and essential, because they are supposed to contain the essence of the vegetable substances which furnish them.—*Fixed oils* are distinguished for the following properties; namely: they are liquid, or easily become so when exposed to a gentle heat, have an unctuous feel, and a mild taste, are very combustible, and perfectly insoluble in water, but partially soluble in alcohol. They leave a greasy stain on paper, and boil at nearly 600°. All fixed oils are greatly lighter than water, but they differ from each other considerably in their specific gravity. The following table contains the specific gravity of such as have been obtained:

Oil of Palm	968	Oil of Beech-nut.....	923
— Hazle-nuts ...	941	— Ben	917
— Poppies	939	— Olives	913
— Linseed	932	— Rape seed.....	913
— Almonds	932	— Cacao	892
— Walnuts	923		

Fixed oils do not begin to evaporate till they be heated above the boiling point of water; and when in a state of vapour they take fire on the approach of an ignited body. It is upon this principle that candles and lamps burn. By exposure to the open air fixed oils become solid; but some retain their transparency in a solid state; while others become opaque, and assume the appearance of tallow or wax: the former are called *drying oils*, and the

CHEMISTRY.

latter *fat oils*. By the combination of alkalies with the fixed oils are made the important compounds called soaps; by their combination with sulphur a compound is formed called the *ruby of sulphur*.

The order of the affinities of the fixed oils is nearly as follows:

Fixed Oils.

Lime
Barytes
Fixed alkalies
Magnesia
Ammonia
Oxide of mercury
Other metallic oxides
Alumina.

Resins. Resins are the inspissated juices of certain vegetable plants, which are generally of a yellow colour, dry, brittle, and inflammable, soluble in alcohol, ethers, and essential oils, but altogether insoluble in water. Both acids and alkalies act upon them, particularly the pure alkalies. The principal resinous substances are balsams and gum resins; of the latter kind are asafetida, gum ammoniac, aloes, gamboge, myrrh, opium, &c.

Bitumens. Bitumens are highly inflammable fossil substances which have a certain resemblance to oily and resinous substances. The principal substances of this kind are naphtha, petroleum, mineral tar, mineral pitch, asphaltum jet, pit-coal, bituminous wood, turf, peat, &c.

Hydrates. Hydrates are those compounds which are formed by the combination of a body with water in such manner as for the water to lose its fluid form; of this description is the substance well known by the name of *slacked lime*, which is a hydrate of lime.

The following Table exhibits the composition of the principal hydrates which have been hitherto investigated:

	Atoms base.	Atoms water.	Weight of water.	Weight of base.
Hydrate of Potash	1	1	100	18.75
Soda	1	1	100	28.10
Lime	1	1	100	31.03
Barytes	1	1	100	67.69
Strontian	1	1	100	17.3
Magnesia	1	1	100	45
Copper	1	1	100	11.25
Tin	1	2	100	24
Boracic acid	1	2	100	78.26
Phosphorous acid	1	1	100	32
Sulphuric acid	1	1	100	22.5
Nitric acid	1	1	100	13.23
Acetic acid	1	1	100	14.5
Crystallized oxalic acid	1	4	100	99.84
Crystallized tartaric acid	1	1	100	13.43
Crystallized citric acid	1	2	100	30.5

Many of the substances mentioned in this list combine with water in more than one proportion, whence they are distinguished into protohydrates, deutohydrates, tritohydrates, tetrathyrates, &c. of which only the protohydrate has been given.

Salts. Salts are now understood by chemists to be those compounds which are formed by the combination of acids with alkalies, earths, and metallic oxides, the most important of which, distinguished in the order of their bases, are as follow:—

Salts of ammonia. The salts of ammonia are all soluble in water, with very few exceptions; are dissipated in vapours by exposure to heat; let fall a white precipitate in a solution of salt of magnesia and phosphate of lime, and an orange precipitate in a solution of platinum.

The following Table exhibits the principal salts of ammonia which have been examined, together with their constituents and specific gravity, according to an average estimate:

Salts,	Acid.	Base.	Water.	Specif. grav.
Muriate of ammonia	100	45.94		1.072
Nitrate	69.5	18.4	12.1	1.5785
Carbonate	55	26.17	18.13	0.966
Bicarbonate	56	19	25	
Borate	37.95	30.32	31.73	
Phosphate	100	47.22		1.8051
Phosphite	100	60.71		
Sulphate	54.66	14.24	31.10	
Sulphite	60	29	11	
Arseniate	100	29.31		
Acetate	62.45	37.55		
Oxalate	100	47.11		1.0816
Citrate	100	29.02		

Observations. The *muriate of ammonia* was formerly known by the name of *sal ammoniac*; the *nitrate*, by that of *nitrum semivolatile* and *nitrum flammans*; the *sulphate*, by that of *secret sal ammoniac*, or *vitriolated ammoniac*.

Salts of potash. The salts of potash are less soluble than those of ammonia. The following list contains the principal of these salts:

Salts.	Acid.	Base.	Water.	Specif. grav.
Nitrate of potash	44	51.8	4.2	1.733
Muriate	58.3	39.2	2.5	1.836
Phosphate				2.8516
Carbonate	43	41	17	2.012
Sulphate	45.2	54.8		2.928
Sulphite	40	60		1.586
Antimoniate	79.2	20.8		
Acetate	47.98	52.02		
Oxalate	100	132.55		
Tartrate	58	42		1.5567
Citrate	55	44		

Observations. The *muriate of potash* was formerly distinguished by the names of *digestive salt*, *regenerated sea-salt*; the *nitrate*, commonly known by the name of *saltpetre*, was formerly called *nitre*, which is one of the principal ingredients in the composition of gunpowder. The *carbonate* was formerly called *fixed nitre*, *salt of tartar*, *vegetable alkali*, &c. The *silicate* was distinguished by the name of *liquor silicum*. The *sulphate*, by the names of *specificum purgans*, *arcanum duplicatum*, &c. still more commonly by that of *vitriolated tartar*. The *sulphite* by the name of *sulphurous salt of Stahl*. The *acetate*, by the names of *arcanum tartare*, *essential salt of wine*, *regenerated tartar*, *diuretic salt*, *digestive salt of Sylvius*. The *binoxalate*, by the name of *essential salt of lemons*. The *tartrate*, by the name of *tartar*; and *bitartrate*, by that of *cream of tartar*.

Salts of soda. The salts of soda are much more soluble in water than the salts of potash. The following Table contains the most important of these salts:

CHEMISTRY.

Salts.	Acid.	Base.	Water.	Specif. grav.
Nitrate of soda	43·	32·		2·0964
Carbonate	14·16	20·60	65·24	1·3591
Muriate	52·	42·	6·	2·120
Borate	34·	17·	49·	1·740
Phosphate	20·33	17·67	62·00	1·333
Ammonio-phosphate	32·	43·	25·	1·509
Sulphate	23·52	18·48	58·00	2·246
Sulphite	24·5	24·5	51·	2·9566
Acetate	36·95	22·94	40·11	2·1
Tartrate				1·746
Citrate	60·7	39·3		

Observations. The nitrate of soda was formerly distinguished by the name of *cubic nitre*. The carbonate of soda is now known, in commerce, by the name of *barilla* or *soda*. The muriate of soda is no other than *common salt*. The borate of soda was formerly called *borax*, and an impure sort of it is distinguished by the name of *tinkal*. The ammonio-phosphate was formerly known by the names of *microcosmic salt* and *fusible salt of urine*. The sulphate by that of *Glauber's salt*.

Salts of lime. The salts of lime are many of them insoluble in water, and some of them which are soluble cannot be crystallized. The soluble salts are thrown down in a white precipitate by potash or soda, and some of them are precipitated by mixing with them the infusion of nut-galls.

The following Table contains the most important of these salts:

Salts.	Acid.	Base.	Water.	Specif. grav.
Nitrate of lime.....	57·44	32 00	10·56	1·6207
Muriate	31·	44·	25·	1·76
Carbonate	34·	55·	11·	2·7
Phosphate	100·	84·53		
Sulphate	46·	32·	22·	2·1679
Sulphite	54·29	45·71		
Arseniate	67·	33·		
Tungstate	80·417	19·4		
Acetate	64·3	35·7		1·005
Camphorate	50·	43·	7	
Oxalate	62·5	37·5		
Tartrate	50·55	27·8	27·81	
Citrate	62·66	37·34		
Kinate	83·	17·		

Observations. The nitrate of lime was formerly called *Baldwin's phosphorus*. The muriate, by the names of *fixed sal ammoniac*, *Homburg's phosphorus*, and *calcareous marine salt*. The carbonate is found in great abundance in nature, under the names of *chalk*, *lime-stone*, *marble*, &c. The sulphate is now known by the name of *gypsum*, and after it has been heated, and forms a powder, by that of *plaster of Paris*.

Salts of barytes. A still greater proportion of the salts of barytes are insoluble in water than of the salts of lime. They are white or transparent, and in general affect a crystalline form. Most of these salts are poisonous.

The following Table contains a general account of the most important of these salts:

Salts.	Acid.	Base.	Water.	Specif. grav.
Nitrate of barytes	38·	50·	12·	2·9149
Muriate	20·	64·	16·	2·8257
Carbonate	22·	78·		4·331
Phosphate	100·	214·46		
Phosphite	24·31	67·24	8·45	
Sulphate	33·96	66·04		4·4
Sulphite	100·	241·79	4·91	1·6938
Arseniate	34·	66·		
Chromate.....	40·16	59·84		
Acetate	39·98	60·02		1·828
Oxalate.....	31·62	68·38		
Citrate.....	50·	50·		
Formate	32·1	67·9		

Salts of strontian. The salts of strontian are generally more soluble than those of barytes, but less so than those of lime. They assume a crystallized form. Solutions of these salts are precipitated by the sulphates, phosphates, and oxalates. The most important salts of strontian are as follow:

Salts.	Acid.	Base.	Water.	Specif. grav.
Nitrate of strontian.....	48·8	47·6	4·	3·006
Muriate	23·6	36·4	40·	1·4402
Chlorate	46·	26·	28·	
Carbonate	30·	69·5	40·5	3·66
Phosphate	36·565	63·435		
Sulphate	43·	57·		
Acetate	52·69	47·31		
Oxalate	39·77	60·23		
Tartrate.....	47·12	52·88		

Salts of magnesia are mostly soluble in water, and capable of crystallizing. They are precipitated by the alkalies and carbonates, and form triple salts, particularly with ammonia. The most important of these salts are as follow:

Salts.	Acid.	Base.	Water.	Specif. grav.
Nitrate of Magnesia	43·	27·	30·	
Muriate	34·	41·	25·	1·601
of Magnesia and Ammonia		73·	27·	
Carbonate	50·	25·	25·	0·2941
Borate	73·5	14·6	11·9	2·566
Phosphate				1·548
of Ammonia and Magnesia		33·3	33·3	
Phosphite	44·	20·	36·	
Acetate	70·65	29·35		1·378
Oxalate	65·	35·		
Citrate	66·66	33·34		

Salts of yttria. There are but few of the salts of yttria which are as yet known. Of this description the most are insoluble in water; but its solutions in acids may be precipitated by phosphate and carbonate of soda, oxalate of ammonia, &c.

Salts of glucina. The salts of glucina are as imperfectly known as those of yttria, and although much more soluble in water, yet they rarely crystallize.

Salts of alumina. The salts of alumina are distinguished by a sweet and astringent taste, and are mostly soluble in water; some few are also capable of crystallizing. The most important of these salts is the *acidulous sulphate of alumina* and *potash*, which is commonly known

CHEMISTRY.

by the name of *alum*, the component parts of which are 49 sulphate of alumina, 7 sulphate of potash, and 44 water. Alum crystallizes mostly in regular octahedrons, but when an unusual quantity of potash is added to alum liquor, the salt loses its usual form and crystallizes in cubes, in which case it is distinguished by the name of *cubic alum*.

It is soluble in 16 or 20 parts water, and when exposed to heat, melts in its water of crystallization; what remains after this process is called *burnt* or *calcined alum*. When alum is exposed to a strong heat, a black substance is formed by the alumina and the potash, which is called pyrophorus. The specific gravity of alum is 1.7109.

The nitrate of alumina was formerly known by the name of *nitre of argil* and *nitrous alum*. It has an austere acid taste, and its specific gravity is 1.645.

Salts of zirconia. The salts of zirconia have a harsh, astringent, and disagreeable taste; are mostly insoluble in water, but their solutions are precipitated by sulphuric acid, carbonate, oxalate of ammonia, an infusion of nut-galls, &c.

Salts of iron. Salts of iron were formerly called *martial*, because Mars was the title given by the alchemists to iron. They are for the most part soluble in water, and the solution has a greenish colour and an astringent taste. Ferrocyanate of potash occasions in them a blue precipitate; hydrosulphuret of potash, gallic acid, or the infusion of nut-galls, a black precipitate; phosphate of soda, a white precipitate; benzoate of ammonia, one of a yellow colour; and succinate of ammonia, one of a flesh colour.

The following Table exhibits a general view of the most important salts of iron:

Salts.	Acid.	Oxide.	Water.	Specif. grav.
Sulphate of iron	39.	23.	38.	1.8399
Carbonate	24.	76.		
Arseniate	38.	43.	19	
Red arseniate	42.4	37.2	20.4	
Phosphate	21.	45.	34.	2.6
Succinate	61.5	38.5		
Oxalate	55.	45.		
Citrate	69.62	30.38		

Observations. The *sulphate of iron* is known in commerce by the name of *green vitriol* or *copperas*. The *carbonate* is that which is commonly known by the name of *rust*.

The *phosphate* is found native, and constitutes the colouring matter called *Prussian blue*. The *gallate* is that salt the solution of which forms what is now a writing-ink.

Salts of nickel. The salts of nickel are generally soluble in water, and the solution has a beautiful green colour. They are also precipitated by ferrocyanate of potash, and the hydrosulphuret. There are but few other particulars respecting these salts which have hitherto been ascertained.

Salts of cobalt. The salts of cobalt are distinguished by the property of changing their colour when heated, and thus forming what has received the name of *sympathetic ink*. They are for the most part soluble in water, and the solution has a reddish colour. They are also precipitated by the alkalies, the ferrocyanate of potash, the hydrosulphuret of potash, and the tincture of nut-galls. The precipitates are blue, black, and white.

Salts of manganese. The salts of manganese are mostly soluble in water, and the solution, when treated with fixed alkalies, deposits a whitish precipitate, which soon becomes black when exposed to the air. The most important of these acids are as follow:

Salts.	Acid.	Oxide.	Water.	Specif. grav.
Carbonate of manganese..	37.93	62.07		
Sulphate	33.05	29.75	37.20	1.834
Acetate	41.46	29.33	29.21	
Benzoate	76.92	23.08		
Succinate	58.13	41.87		

Salts of cerium. The salts of cerium are either white or yellow, and of a sweet taste. Hydrosulphuret of potash, ferrocyanate of potash, oxalate of ammonia, and arseniate of potash, occasion precipitates mostly of a white colour.

Salts of uranium. The salts of uranium are for the most part soluble in water, and the solution has a yellow colour. The alkalies and alkaline carbonates, the ferrocyanate and hydrosulphuret of potash, and the infusion of nut galls, occasion precipitates of different colours.

Salts of zinc. The salts of zinc, for the most part, form a colourless solution in water, and are precipitated by the ferrocyanate, sulphocyanate, hydriodate, and hydrosulphuret of potash, sulphureted hydrogen gas, and the alkalies, the precipitates being mostly white. The most important of these salts are as follow:

Salts.	Acid.	Oxide.	Water.	Specif. grav.
Carbonate of zinc	28.	66.	6.	
Muriate				1.577
Nitrate				2.096
Sulphate	40.	20.	40.	1.912
Citrate	59.	41.		

Observations. The *carbonate of zinc* is found native under the name of *calamine*. The *sulphate* is the substance which in commerce is known by the name of *white vitriol*.

Salts of lead. The salts of lead were formerly distinguished by the name of *saturn*, the name by which lead itself was distinguished. They are scarcely soluble in water without an excess of acid, and the solution is colourless and of a sweetish taste. Gallic acid, infusion of nut-galls, &c. occasion white or black precipitates. The most important of these acids are as follow:

Salts.	Acid.	Oxide.	Water.	Specif. grav.
Nitrate of lead	33.	67.		4.068
Muriate	24.83	75.17		1.8226
Carbonate	16.15	83.85		
Phosphate	100.	300.		
Sulphate	26.5	73.5		1.8742
Sulphite	22.2	77.8		
Arseniate	33.	63.	4.	
Chromate	34.9	65.1		6.
Acetate	26.96	58.71	14.32	2.345
Benzoate	49.66	46.49	3.85	
Succinate	30.86	69.14		
Oxalate	24.54	75.46		
Citrate	34.18	65.82		
Tartrate	37.	63.		
Sublactate	17.	83.		
Tannate	36.5	63.5		

Observations. The *carbonate of lead* is known in commerce by the name of *white lead*. The *acetate* was formerly called *sugar of lead*, *sugar of Saturn*, *salt of Saturn*, &c.

Salts of tin. The salts of tin were formerly distinguished by the name of *Jovial*, because Jupiter was the title

CHEMISTRY.

given to tin. These salts are more or less soluble in water, and the solution is of a yellowish colour. Ferrocyanate and hydrosulphuret of potash, the corrosive sublimate and the muriate of gold, occasion different coloured precipitates.

Salts of copper. The salts of copper were formerly called *salts of Venus*, because Venus was the name given to copper. These salts mostly form a blue or green solution with, and are precipitated by, ferrocyanate and hydrosulphuret of potash, by gallic acid and a plate of iron, when plunged into a liquid salt. The precipitate in this last case is metallic. The most important salts of copper are as follow:

Salts.	Acid.	Oxide.	Water.	Spec. grav.
Nitrate of copper.....	16	67	17	2.1710
Muriate	40.2	59.8		1.6776
Carbonate	100	363.6		
Silicate	33	55	12	
Phosphate	40.22	44.70	15.08	1.4158
Sulphate	33	32	35	2.1943
Sulphite	32.18	56.82	11	
Sulphate of potash and .. ammonia	36.075	21.425	24.5	
Obtuse octahedral arseniate..... }	14.3	50	35.7	2.881
Hexedral arseniate.....	43	39	18	2.548
Acute octahedral arseniate	29	50	21	4.280
Trihedral arseniate.....	30	54	16	
Super arseniate	40.1	35	24.4	
Acetate	25.12	39.41	35.47	1.779
Oxalate	31.08	68.92		
Oxalate of copper and .. ammonia	47.5	25	17	

Observations. The native carbonate of copper is known among mineralogists by the name of *malachite* and *blue copper ore*. The *silicate*, by that of *emerald copper ore*. The *sulphate*, by that of *blue copperas*, and *blue vitriol* in commerce.

Salts of bismuth. The salts of bismuth form a colourless solution with acids; when water is poured into it, a white precipitate falls. Ferrocyanate and hydrosulphuret of potash, gallic acid, a plate of copper or tin, occasion precipitates. The most remarkable of these salts is the nitrate of bismuth, formerly called *magistery of bismuth*, which is a compound of 34.2 nitric acid, 48.8 oxide of bismuth, and 17 water. The paint called *pearl white* is supposed to be a precipitate from this salt by means of common salt or tartar.

Salts of Mercury. Mercurial salts are volatilized and dissipated by the application of a strong heat. Ferrocyanate and hydrosulphuret of potash, muriatic acid, gallic acid and a plate, occasion precipitates of different colours in their solution. There are two oxides of Mercury, and most acids seem capable of combining with them both, so as to produce two sorts of salts, namely, protosalts, many of which may be subdivided into sub and super salts. Of these the following are the principal:

Salts.	Acid.	Oxide.	Water.	Specif. grav.
Pernitrate of Mercury...	12	88		
Carbonate	90.9	9.1		
Borate				2.266
Phosphate	28.5	71.5		4.9835
Sulphate	12	83	.5	
Persulphate	31.8	63.8	4.4	6.444

Observations. The nitrate of Mercury was formerly called

nitrous turpeth, from which is procured a precipitate known by the name of the *red precipitate*. The *muriate* is now called a *chloride*. The *sulphate* was formerly named *turpeth*.

Salts of silver. The salts of silver when exposed to the action of the blow-pipe, are reduced; and precipitates of different colours are occasioned in their solution by sulphate of iron, a plate of copper, gallic acid, &c. The most remarkable salts of silver are as follow:

Salts.	Acid.	Oxide.	Water.	Specif. grav.
Nitrate of silver	30	70		
Muriate	18	82		
Carbonate	15.71	84.20		
Phosphate	17.025	82.975		
Sulphate	25.31	74.69		
Citrate	36	64		

Observations. The nitrate of silver has been called, on account of its exceedingly bitter taste, the *gall of the metals*; after fusion it cools into a black mass, when it is used by surgeons under the name of *lunar caustic*, *lapis infernalis*; and the precipitate which is procured from its solution, by means of ammonia, is called *fulminating silver*. The *muriate of silver* is otherwise called *luna cornea*, or *corneous silver*.

Salts of gold. The two salts of gold hitherto known are the muriate and the nitrate, which form a yellow solution in water. Precipitates of different colours are occasioned in the solution by gallic acid, muriate of tin, a plate of tin, &c.

Salts of platinum. The salts of platinum are nearly as little known as those of gold. The sulphate of platinum consists of 54.5 oxide, 45.5 acid and water, the nitrate of 89 yellow oxide, and 11 nitric acid and water.

Salts of palladium and iridium. The salts of palladium are almost insoluble in water, those of iridium form a red solution in water.

Salts of antimony. The salts of antimony usually form a brownish yellow solution, and in most cases a white precipitate falls when they are diluted in water. Precipitates of other colours are occasioned by gallic acid, a plate of iron or zinc, ferrocyanate and hydrosulphuret of potash, &c. The most remarkable of these salts is the tartrate of potash and antimony, which is known by the name of *tartar emetic*, and consists of 44.21 tartaric acid, 39.76 protoxide of antimony, and 16.03 potash.

Salts of titanium. The salts of titanium are in general colourless, and soluble in water. Alkaline carbonate, ferrocyanate and hydrosulphuret, of potash, a rod of tin, &c. occasion precipitates of different colours in the solutions.

Chemical analysis of natural bodies.

Natural bodies may be considered under the head of the atmosphere, waters, mineral, vegetable, and animal substances.

Atmosphere. The atmosphere, or atmospheric air, was till very lately considered to be a simple homogeneous substance, but it is now universally admitted to be a compound, consisting of the two ingredients oxygen and azotic gas, and in the proportions of from 23 to 30 oxygen gas in 100 parts of atmospheric air; to which have been added two other ingredients, namely, carbonic acid gas, and water, which are also supposed to enter principally into its constitution.

Water. Water, in its purest state, is now supposed to consist of two principal ingredients, namely, oxygen gas, and hydrogen gas; but as it is always impregnated more or less with other substances, it has been distinguished into

CHEMISTRY.

different kinds, as may be seen from the following table, which gives a general view of their ingredients.

<i>Waters</i>	<i>consist of</i>
Rain water,	Air, carbonic acid, carbonate of lime, &c.
Spring water,	Oxygen, carbonic acid, silica, salt, &c.
Well water,	Sulphate of lime, &c.
Sea water,	Common salt, sulphates of magnesia, &c.
Mineral waters,	Air, many acids, alkalies, earths, and salts. [vide <i>Water</i>]

Minerals. The chemical analysis of minerals may be found under the head of *Minerals*.

Vegetable substances. Plants are generally composed of the following ingredients; namely, gum, sugar, jelly, acids, starch, albumen, gluten, an extractive, a colouring, bitter, and narcotic matter, oils, wax, camphor, caoutchouc, resins, wood, tan, suber, alkalies, earths, metals; of which a more particular account may be found in their respective places, also under the head of *Plants*.

Animal substances. A general view of animal substances, and their principal ingredients, is exhibited in the following table:—

<i>Substances</i>	<i>consist of</i>
Blood,	water, febrina, albumen, gelatine, hydrosulphuret of ammonia, soda, phosphates of iron, soda, &c.
Bile,	water, albumen, resin, soda, sulphureted hydrogen, saccharine matter, muriate of soda, phosphates of lime and soda, and iron.
Urine,	water, phosphoric acid, phosphates of soda, ammonia, &c. carbonic acid, uric acid, &c. muriate of potash, sulphur, sulphates of lime, &c.
Milk,	water, oil, curd, gelatine, sugar, muriate of soda and potash, phosphate of lime, and sulphur.
Saliva,	water, mucilage, albumen, muriate of soda, phosphate of soda, &c.
Tears, and mucus,	water, mucilage, soda, muriate of soda, phosphates of lime and of soda.
Cerumen,	albumen, resin, colouring matter, soda, phosphate of lime.
Synovia,	fibrous matter, albumen, muriate of soda, phosphate of lime water.
Semen,	water, mucilage, soda, phosphate of lime.
Liquor of the am- nios,	} mucilage, fat.
Bones,	
Muscles,	fibrina, albumen, gelatine, extractive matter, phosphates of soda, ammonia, and lime, carbonate of lime.
Membranes,	gelatinous matter.
Brain,	water, white and red fatty matter, albumen, osmazome, phosphorus, acids, salts, sulphur.
Skin,	gelatine, mucus, &c.
Intestinal calculi,	magnesia, phosphoric acid, ammonia, water, animal matter.
Biliary calculi,	adipocire, &c.
Urinary calculi,	uric acid, urate of ammonia, phosphate of lime, magnesia, and ammonia, oxalate and carbonate of lime, silica, animal matter.

<i>Substances</i>	<i>consist of</i>
Hair and nails,	gelatine, oil, iron, phosphate and carbonate of lime, silica, sulphur.
Silk,	varnish, resin, wax, &c.
Ivory,	phosphate and carbonate of lime, gelatine, &c.
Hartshorn,	the same in different proportions.
Castor,	carbonate of potash, lime, and ammonia, iron, resin, mucilaginous matter, volatile oil.
Ambergris,	adipocire, resin, benzoic acid, charcoal.
Egg shells,	the same as bones, but in different proportions.
Yolk of eggs,	oil, albumen, &c.

EXPERIMENTAL OR PRACTICAL CHEMISTRY.

Under this head is comprehended a general account of the most important chemical processes, together with the apparatus by which they are performed.

Furnaces. As the application of heat is of the first importance in all chemical processes, the construction of a furnace is the first object of attention to one who wishes to have a laboratory. The furnaces of most general utility are, the *wind furnace*, in which an intense heat may be excited for fusing metals; a *reverberatory furnace*, which is used for the roasting and smelting of metals; a *muffle furnace*, for trying experiments on the habitudes of earths and stones, by long and violent heat: this is otherwise called a cupelling or enamelling furnace, and is exhibited in fig. 5, pl. 30, where *a* shews the fire-place, *b* the chimney, *c* the ash-pit, *d* the door of the ash-pit, *e* a register for regulating the quantity of air admitted to pass through the fuel. That part of the furnace called the muffle, from which it derives its name, is a hollow arched vessel with a flat bottom, as seen apart in fig. 7.

Crucibles. The crucible is employed to contain the materials which are to be submitted to the action of heat in a wind furnace, and is most commonly made of a mixture of clay and sand, consisting, as in fig. 6, of the cover *a*, the body *b*, and the stand *c*.

Cupels. A cupel is a solid paste of bone, moulded into a short cylindrical or truncated pyramidal form, with a shallow circular cavity at the top, as in fig. 10, which is used in the process of assaying metals.

Evaporating vessels. These vessels, which are formed of glass, earthen ware, and of various metals, require always to be of a flat shape, so as to expose them extensively to the action of heat.

Distilling apparatus. This apparatus is employed for a contrary purpose to that of the evaporating vessel; for as in the latter the object is to let the vapour escape, so by the former it is intended to collect the volatile part. This is called *distillation*, which is performed either by the common still or by a vessel called the alembic. This alembic is made of glass or earthen ware, and consists of two parts, namely, the cucurbit, or body, *a*, (fig. 4), for containing the materials, and the capital, or head, *b*, by which the vapour is condensed. Vessels termed *retorts* are likewise used for the same purpose. These are either of the common form, as *a* (fig. 1), or they are *tubulated*, or stoppered, as *a* (fig. 2). When a liquid is to be added at certain intervals, a retort, consisting of a bent tube, with a funnel at the end, may be conveniently added. To the retort a receiver is a necessary appendage, which may either be plain (fig. 1), *b*, or tubulated, as *d* (fig. 2). To some receivers a pipe is added, as *e* (fig. 2), which may partly enter a bottle, *f*. This vessel, which serves principally for re-

moving the distilled liquid at different periods of the process, is termed a *quilled receiver*. The condensation of the vapour is much facilitated by lengthening the neck of the retort with a glass vessel, called an *adapter*, or *adopter*, as *b*, the upper end of which fits into the beak of the retort, and the lower end into the neck of the receiver. When the substance raised by distillation is partly a condensible liquid, and partly a gas, which is not condensed till it is brought into contact with water, a set of receivers is employed to effect this double purpose, called Woolfe's apparatus, as represented in fig. 3, where *a* is an iron stand, *b* a small Argand lamp, very convenient for chemical purposes, being flat and low, *c* a tubulated retort, *d* a tubulated receiver, resting on a tripod, *e*, *f* the conducting tube, with the melter's tube affixed. The receiver *d* is left empty in the beginning of the distillation, and the vapour which does not condense there passes through *f* into the bottle *g*, and through *h* into the bottle *i*. To make the apparatus complete for experiments of research, a bent tube may be fastened in the lateral opening of *i*, conducting to a pneumatic trough, as given in fig. 18. The *tube of safety*, as it is called, which is affixed to the tube *f*, is a single glass tube, bent as it is represented apart at *k*, having a bulb blown in that part of the tube that lies between the upper and lower flexure.

Apparatus for gases. Gases that are producible without a very strong heat may be procured by glass bottles furnished with ground stoppers and bent tubes, as in fig. 8; but for the procuring of gases without the possibility of their escaping into the room during the process, the apparatus represented at fig. 9 is the best adapted. In this manner sulphureted hydrogen gas is to be obtained from sulphuret of iron and diluted sulphuric acid. Suppose the sulphuret of iron, in coarse powder, or iron filings, be put into the body of the gas bottle, *c*, with a proper quantity of water, the acid holder *a* being filled with diluted acid, and the cock *b* shut, it is then fixed into the tubulure of the gas bottle, and acts on the sulphuret of iron. The bent tube *d* being made to terminate under a receiver filled with and inverted in water, the perforated cock *b* is gradually opened; in consequence of which the acid descends into the gas bottle, and acts on the sulphuret of iron. The acid may be supplied at pleasure if the cock *b* be shut, and the stopper which closes the acid holder be removed.

Receiving glasses. For receiving the gases when obtained, glass jars of various sizes, as in figs. 11, 12, 13, are requisite, some of which are furnished with necks at the top, and fitted with ground stoppers, and others with brass caps and screws, for the reception of air-cocks, as at fig. 13.

Pneumatic trough. As in all the common operations of receiving and transferring gases the jars in which they are held must be inverted over water, it is necessary to have a water vessel, called a *pneumatic trough*, which may be made in different forms. One of the most convenient of its kind is that represented at fig. 18, where *a* is a deep oblong trough, made of thin tinned iron, well jappaned, and having a shelf of the same material to extend entirely across the trough, and rather more than a third of its length, and fixed in its situation, when required, by two strong wires. This shelf has also two holes to receive two bottle supporters, as *b*. Then to the mouth of the glass jar *d*, inverted in water, is fitted the tube which connects the jar with the cock *c*.

Gazometer. The gazometer is a vessel of various shapes and contrivances, which serves as a reservoir for holding a considerable quantity of gas. It is made of thin tinned iron plate, and is mostly provided with some contrivance

for measuring the quantity of gas which it contains. The one represented at fig. 16 is of the ordinary construction, where *aa* represents the outer pail, or circular vessel, with a spout at the top. Two tubes, *d* and *e*, are firmly soldered to the sides of the pail. The tube *d* penetrates at the bottom of the pail, and proceeds to the centre, where it joins the termination of the tube *e*, which enters the top of the pail, and proceeds downwards; and from the place of junction, the upright tube, *g*, rises through the middle of the pail a little above the level of its upper rim. The vessel *b* is open only at the bottom, and of less diameter than the pail, into which it is inverted. This cylinder has a solid stem, *c*, which passes through a hole in the wooden cross-bar of the frame round the top of the pail, and serves both to keep the cylinder in a perpendicular direction when moving up and down, and indicates the quantity of inclosed gas by the graduation on its surface. To use this gazometer, first let the cylinder fall to the bottom of the pail, and pour water into the spout of the latter till it is quite full. Then shut the cock *e*, and opening *d*, connect it with the tube which conveys the gas immediately from the retort. In this case the gas rises through the upright tube *g* to the top of the cylinder *b*, which it gradually lifts up, sufficient weight being allowed in the scale-dish to allow the cylinder to move with perfect freedom. When all the gas is obtained, shut the cock through which it passed, and it will remain in the cylinder ready for use. To take out a portion of it, connect with either of the stop-cocks a bent tube, dipping under the jar, or whatever vessel it is to be received in, inverted over water, and at the same time lift up the scale-dish, on which the cylinder will press down by its own weight, and force out the contained air.

Apparatus for obtaining potassium. The apparatus for procuring potash, as given in fig. 19, consists of *c*, a common gun-barrel, curved, and drawn out to rather a smaller diameter at one end. To the end *b* is adapted an iron tube, *a*, for containing the potash; and at the bottom of this tube is a hole, through which the potash gradually flows. To the opposite end of the gun-barrel a tube of safety, *e*, is to be cemented, and into this is poured a sufficient quantity either of mercury or naphtha. Into the gun-barrel are introduced $2\frac{1}{2}$ parts of clean iron turnings, which are pushed as far as the bent part, *c*. The tube, carefully luted, is then to be placed in a small furnace, and provided with a pair of double-blast bellows, the pipe from which is shewn at *f*. A strong heat being now excited in the furnace, the tube containing the potash, as well as the opposite end of the barrel, are in the mean time kept cool by ice; and when the barrel has attained a white heat, the potash in *a* being melted by a small portable furnace, will flow through the hole upon the iron turnings. A considerable quantity of hydrogen gas will be evolved by the decomposition of that portion of water which the potash retains even after fusion. When the furnace is quite cold, the safety tube *e* is to be removed; and if the end of the gun-barrel projecting from this side of the furnace has been kept carefully cooled during the experiment, the metal will be found adhering to it in the form of brilliant laminae.

Apparatus for digestions. A small apparatus is given in fig. 14, which is employed for long digestions on a sand-bath, or other heat. This is now used in the place of the vessel called the *pelican*.

Precipitating glass. The precipitating glass is a very tall jar, with a narrower part at the bottom, in which any precipitate, when produced, may collect by subsidence, and allow the supernatant liquor to be decanted off with more ease, as in fig. 15.

Matrass. A matrass is a thin glass vessel, of the shape of a flask, which will bear a lamp-heat at bottom without breaking. It is useful for effecting the solution of bodies that require heat before they can be dissolved. It is either round at the bottom, or somewhat flattened, as in fig. 17.

CHEMO'SIS (Med.) χημωσις, a swelling in the white coat of the eye, called the *Albuginea tunica*.

CHENALO'PEX (Orn.) χηνάλωπεξ, from χην, a goose, and ἀλώπεξ, a fox; a bird, so called from its being of the goose kind, but crafty like the fox. It answers to what is now called the Sheldrake. *Plin.* l. 10, c. 22.

CHENELLE (Her.) French for streaming; an epithet for a comet which has a stream of light issuing from it. [vide *Comet*]

CHENISCUS (Ant.) χηνίσκος; that part of a ship whereby the anchor is fixed, so called because the figure of a goose is on the stern, as in the annexed cut. *Luc. de Navig.*; *Apul. de Asin.* l. 11; *Scheff. de Mil. Nav.* l. 2, c. 6.

CHENOCOPRUS (Med.) χηνόκοπρος, goose-dung, which was formerly used as a powder, and reckoned resolvent and diuretic.

CHENOLE'A (Bot.) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Characters. CAL. perianth one-leaved.—COR. none.—STAM. filaments five; anthers minute.—PIST. germ superior; style filiform; stigmas two.—PER. capsule round; seed single.

Species. The only species is—*Chenolea diffusa*, seu *Salsola*, &c. native of the Cape of Good Hope.

CHENOPODIUM (Bot.) a genus of plants, Class 5 *Pentandria*, Order 2 *Digynia*.

Generic Characters. CAL. perianth five-leaved; divisions ovate.—COR. none.—STAM. filaments five; anthers roundish.—PIST. germ orbiculate; style two-parted; stigmas obtuse.—PER. none; calyx closed; seed single.

Species. Among the following species, the first is a perennial, the second and third shrubs, and the rest annuals, as—*Chenopodium Bonus Henricus*, *Mercurialis*, *Lapathum Bonus Henricus*, seu *Blitus*, &c. Angular-leaved Goosefoot, English mercury, or All-good, Good Henry, Good King Harry, or Wild Spinach, native of Europe.—*Chenopodium anthelminticum*, native of Pennsylvania.—*Chenopodium multifidum*, Buenos Ayres Goosefoot.—*Chenopodium mucronatum*, native of the Cape of Good Hope.—*Chenopodium murale*, seu *Atriplex*, Wall or Nettle-leaved Goosefoot, native of Europe.—*Chenopodium serotinum*, &c. seu *Blitum*, &c. Fig-leaved Goosefoot, native of Spain.—*Chenopodium album*, seu *Atriplex*, &c. Common or White Goosefoot, native of Europe.—*Chenopodium hybridum*, seu *Stramonii*, *Pes Anserinus*, seu *Atriplex*, &c. Bastard Goosefoot, native of Europe.—*Chenopodium Botrys*, seu *Botrys*, &c. Butt-leaved Goosefoot, or Oak of Jerusalem.—*Chenopodium ambrosioides*, seu *Botrys*, &c. Mexican Goosefoot, or Oak of Cappadocia, native of Mexico.—*Chenopodium vulvaria*, *Atriplex*, *Vulvaria*, seu *Garosmus*, Stinking Goosefoot, native of Europe.—*Chenopodium polysperum*, *Blitum*, seu *Polysperon*, &c. Round-leaved Goosefoot, Upright Blite, or Allseed, native of Europe.—*Chenopodium Scoparia*, *Linaria*, *Osyris*, seu *Scoparia*, &c. Flax-leaved Goosefoot, Belvidere, or Summer Cypress.—*Chenopodium maritimum*, seu *Kali*, &c. Sea Goosefoot, or White Glasswort, native of Europe.—*Chenopodium oppositifolium*, seu *Salsola*, &c. Opposite-leaved Goosefoot, native of Siberia.—*Chenopodium viride*, seu *Blitum*, &c. Green Goosefoot.—*Chenopodium punctulatum*, Dotted leaved Goosefoot.—*Chenopodium triandrum*, Three-stamened Goosefoot, native of New

Zealand.—*Chenopodium laterale*, Branching oblong-leaved Goosefoot.

CHEOP'NA (Com.) the same as *Chopino*.

CHEQUE'R (Mech.) a sort of stonework, in which stones in the facings of the walls have their joints continued in straight lines without interruption.

CHE'RAFIS (Com.) or *tela*, gold medals stamped in Persia.

CHE'RAME'LA (Bot.) a species of the *Averrhoa* of Linnæus.

CHE'RAMIS (Conch.) the hollow of a shell-fish called *myax*.

CHE'RAMITES (Min.) a kind of precious stone. *Plin.* l. 37, c. 10.

CHE'RAS (Med.) a name for a scrophulous humour in which kernels arise.

CHE'RAY (Com.) or *Chahy*, a Persian weight.

CHE'RF (Com.) a small gold coin current in Egypt, equal in value to four shillings sterling.

CHE'RF (Polit.) a title of dignity among the Saracens and Moors, next to a Khalif, or sovereign prince.

CHE'RIO (Alchem.) the heat or cold of things which leaves the substance in which it is contained, and passes into open space. *Paracel. de Grad. et Ccmp.* l. 2, c. 3.

CHE'RION'IUM (Alchem.) is that in which nature cannot be altered; thus a crystal hardened by nature cannot be melted.

CHE'RLERIA (Bot.) a genus of plants, Class 10 *Decandria*, Order 3 *Trigynia*.

Generic Characters. CAL. perianth five-leaved; leaflets lanceolate.—COR. petals none; nectaries five.—STAM. filaments ten; anthers simple.—PIST. germ ovate; styles three; stigmas simple.—PER. capsule ovate; seeds two or three.

Species. The only species is—*Cherleria sedoides*, *Knawel*, seu *Lychnis alpina*, *Sedum*, &c. Stone crop Cherleria, a perennial, native of Switzerland.

CHE'RMES (Bot.) from the Arabic *Charmah*, or *Karam*, Scarlet Grain, or Kermes Berries.

CHE'RMES (Ent.) a genus of animals, Class *Insecta*, Order *Hemiptera*.

Generic Characters. Snout placed in the breast; antennæ filiform; thorax gibbous; hind legs formed for leaping.

Species. The species are distinguished by the names of the plants or animals which they infest.

CHE'RNIBION (Med.) χερνιβιον, a urinal. *Hipp. Epid.* l. 7.

CHE'RNITES (Min.) a stone like ivory that was used in preserving dead bodies.

CHE'RONIA (Bot.) another name for *Centaurium*.

CHE'RRY (Bot.) the fruit of the *Cerasus*, and also the tree itself. The cherry is distinguished into, the Common Red Cherry, the Red Heart, the Black Heart, White Heart, Bleeding Heart, Morello, May Duke, Kentish Cherry, and Cherry-Bay, a species of laurel.

CHE'RSA (Med.) the same as *Fæx*.

CHE'RS'E'TUM (Archæol.) any customary offering made to the parish priest, or to the appropriators of a benefice.

CHE'RS'INA (Conch.) a Land-snail. *Plin.* l. 9, c. 10.

CHE'RSY'DRON (Zool.) χερσυδρον, from χερσαι, earth, and ὕδωρ, water; an epithet for a serpent which inhabits both watery places and dry ground.

CHE'RT (Min.) a species of flint, the *Petrosilex* of Linnæus.

CHE'RU'B (Bibl.) כרוב, in the plural, cherubim, an order of angels composed of various animals, as a man, an ox, an eagle, and a lion.

CHE'RU'B (Her.) is represented in coats of arms with wings on a human head, as "He beareth Jupiter a cherub, having three pair of wings, whereof the uppermost and nethermost are counterly crossed, and the middlemost displayed luna." These were the arms of the cardinal Buocafoco, an Italian prelate.

CHE'RU'BICAL hymn (Mus.) a hymn in the form of "Holy, Holy, Holy Lord God of Hosts," &c.

CHESS.

CHERUB'S head (*Her.*) a human head between two wings displayed. [vide *Cherub*]

CHERUHUNDA (*Bot.*) the *Solanum* of Linnæus.

CHERVIL (*Bot.*) the same as the *Cherophyllum* of Linnæus.

CHERVILLUM (*Bot.*) the *Scandix cerefolium* of Linnæus.

CHE'SLIP (*Ent.*) a kind of insect that lies under tiles and stones.

CHE'SNUT (*Bot.*) a well known tree; the *Fagus castanea et pumilla* of Linnæus.—*Horse Chesnut*, the *Æsculus* of Linnæus.

CHESS (*Sport.*) an ancient and scientific game; was long known in Hindostan by the name of *Chaturanga*, or the four members of an army; namely, elephants, horsemen, chariots, and foot soldiers; and afterwards styled in Persia *chatrang*, the game of king; and by the Arabians *shatranj*, the king's distress: from which words has been derived the English appellation of *chess*. This game is played on a board, consisting of sixty-four squares, alternately white and black, and with thirty-two pieces of different forms, denominations, and powers, divided into two colours or parties, namely, eight pieces each, black and white, consisting of a King, called by the orientals *schah*; a Queen, called *pherz*; a general; two knights or horse soldiers; two Bishops, called *fil*; elephants, and two Rooks or Castles, called *rath*, chariots, or *rohk*, noblemen; and eight pawns, *pedones*, foot soldiers on each side. The king and his officers are ranged at the opposite ends, on the first lines of the board, a white corner of which, numbered 1 or 64, is to be placed towards the right hand of each player. The sub-joined figures exhibit a view of a board numbered, and another with the pieces disposed in order.

Fig. 1. The board numbered.

Fig. 2. The men disposed in order.

White. The white King must be upon the fourth, a black square, marked 61, at one end of the board, reckoning from the right. The Queen on the fifth, a white square, 60, on the left side of her king. The Bishops must be placed on each side their King and Queen, as 59, 62. The Knights on each side of the Bishops, 58, 63. The Rooks at the two corners of the boards, next to the Knights, as on 57, 64; and the Pawns, or common men, upon the eight squares of the second line, on 49, 50, 51, 52, 53, 54, 55, and 56.—**Black.** The black King must be placed on the fifth, a white square, marked 5, at the other end of the board. The black Queen on the fourth, 4, a black square, on the right of her king. The Bishops on 3 and 6; the Knights on 2 and 7; the Rooks on 1 and 8; and the Pawns on 9 to 16 inclusive. The chess-board is technically called the *exchequer*, because it is alternately chequered black and white: the squares are frequently styled *houses*, the ranges of which, in a straight line from left to right, are denominated *ranks*, as 1 to 8, 9 to 16, and 57 to 64; perpendicularly, from one player to another, are termed *files*, as from 1 to 57, 2 to 58, &c.; and the ranges, which are sloping, are termed *diagonals*, as from 8 to 57.

Names of the pieces, &c. The pieces and pawns on the side of each King take their names from him, as those on the side of the Queen do from her, namely, the white or black King's bishop, 62, 6; the King's knights 63, 7; the King's rooks, 64, 8; the King's pawns, 53, 13; the King's Bishop's pawns, 54, 14; the King's Knight's pawns, 55, 15; the King's Rook's pawns, 56, 16. The white or black Queen's bishops, 59, 3; the Queen's knights, 58, 2; the Queen's rooks, 57, 1; the Queen's pawns, 52, 12; the Queen's Bishop's pawns, 51, 11; the Queen's Knight's pawns, 50, 10; Queen's Rook's pawns, 49, 9. The squares are named from the places; i. e. where the King stands is called the *square of the King*; where his Pawn stands is called the *second square of the King*; that before the Pawn is called the *third square of the King*; that beyond it is called the *fourth square of the King*; and so of all the rest.

Moves of the pieces. The Kings move every way, but in general only one square at a time, and must always be at least one square distant from each other. Suppose the King placed on 37, he may be moved thence to 28, 29, 30, 36, 38, 44, 45, or 46. The King may leap once, and only once, in the game, either on his own side, or on the side of his Queen. In this case, the Rook is moved into the next square to the King, and the King moves to the square on the other side of him, which is called *castling*. The Black King castles on his own side, by moving from 5 to 7, and placing the Rook 8 on 6; on his Queen's side by moving to 3, and placing the Rook 1 on 4. The White King castles on his own side by moving from 61 to 63, and placing the Rook 64 on 62; on his Queen's side by moving to 59, and placing the Rook, 57, on 60. The King cannot castle after he has moved, nor after the Rook has moved, nor if there be any piece between him and the Rook, nor when the King is *in check*, nor when the square over which he means to leap is viewed by an adverse man, who would *check* him in his passage. The King is said to be *upon check*, or *in check*, when he is liable to be taken by one of the adversary's pieces or pawns, who warns him of his danger by *crying check*, or *check to the King*; in such case the King must defend himself, either by changing his place, covering himself with one of his own men, or taking the man who assaults; if he can do none of these things, he is said to be *check-mated*, or *chah-mat*, i. e. the King is dead, when the game is lost. The King cannot change his square, if by so doing he goes into check; and when he has no man to play, and

and is not in check, yet is so blocked up that he cannot move without going into check, this position is called a *stale mate*. In this case, the King who is stalemated wins the game in England, but in France this situation makes a drawn game. Thus, suppose the Black King on 33, with Pawns on 30 and 39, the White King on 44, a White Bishop on 34, with Pawns on 38 and 47; if the White King is moved to 35, Black wins the game by a stalemate, because the Black King cannot be moved to 25 or 41, on account of the White Bishop, nor to 26, 34, or 42, owing to the White King, as it is requisite that the Kings should always be at least one square distant from each other; neither can the Black Pawns be moved, their progress being stopped by the white.—The *Queen* can move in all directions the same as the King, but has the advantage of extending over any number of squares: thus, the Queen may be moved from 37 to 1, 5, 16, 33, 40, 58, 61, 64, or any intermediate squares in those directions. Many chess players give notice when the Queen is in danger, by crying *check to the Queen*.—A *Bishop* moves diagonally only, but over any number of squares; as from 36, the Bishop may be moved to 8, 9, 57, or 63, and from 37 to 1, 16, 58, 64, or any of the intervening squares.—A *Knight* moves obliquely backward or forward upon every third square, including that which he stands upon, from black to white, and from white to black, and also over the heads of the men, which no other piece is allowed to do: thus, a Knight may move from 36 to 19, 21, 26, 30, 42, 46, 51, 53, passing over any pieces on 28, 35, 37, 44; and from 37, the Knight can be moved to 20, 22, 27, 31, 43, 47, 52, 54, passing over any thing placed on 29, 36, 38, or 45.—A *Rook* moves in a right line, either forward, backwards, or sideways, through the whole file; can stop at any square, and take at any distance, when no other piece intervenes: thus, a rook placed on 37 may be moved to 5, 33, 40, 61, or any intermediate square.—A *Pawn* moves one square at a time, in a straight line forwards, and takes the enemy diagonally. He may be moved two squares the first move, but never backwards; and is prohibited from quitting his own file, except in case of making a capture, when he is moved into the place of the captive, and afterwards advances forward in that file: thus, suppose a White Pawn to be placed on 37, and a Black one on 28, either of them could take the other; but if the White Pawn be on 37, a Black Rook on 29, a Black Bishop on 28, and a Black Knight on 30, the Pawn then could not take the Rook, but might take either the Bishop or the Knight. A Pawn getting to the head of the board upon the first line of the enemy, is styled *going to Queen*, in which case it may be exchanged for any one of the pieces lost in the course of the game; and the piece chosen must be placed on the square at which the pawn had arrived. The pieces can take the adversaries who stand in their way, provided the road lies open; or they may decline, and must be placed in the same squares from which the contrary men are taken. Suppose the White Queen on 60, and a Black Knight on 46, the Queen can take the Knight, which then is moved off the board, and the Queen placed on 46; but if the Knight be on 45, then the Queen cannot take him, though he can take the Queen, which being removed, the Knight is placed on 60; or, suppose a White Rook on 61, and a Black Bishop on 13, the White Rook can take the Bishop, and afterwards is to be placed on 13. The power of taking is reciprocal; so that any adverse piece which you can take with one of the same kind, may take you. The goodness of play, therefore, consists in having the greatest number of pieces defending; so that in case of

mutual exchanges, you may gain more than your adversary.

Power and value of the pieces. The relative value of the pieces and pawns is as follows:—

King	6½	Knight	9¼
Queen	23½	Rook	15
Bishop	9¾	Pawn	2

The power of the King for attack or defence is as above stated, though from the principle of the game he is invaluable. The power of the pawn is as 2; but, from its chance of promotion, the real value is calculated at 3½. The knowledge of this relative value will enable a person to ascertain the propriety of sometimes sacrificing two inferior pieces for a superior one; as, for instance, a Bishop and Knight for a Queen, the joint value of the two former being 19, and that of the latter 23½.

Different kinds of Check-mates. The following appellations have been given to a variety of mates.—*Queen's mate*, a gracious mate, as White King 27, Queen 26, Black King 25; or White King 22, Queen 15, Black King 8.—*Bishop's mate*, a gentle mate, White King 24, Bishops 22 and 21, Black King 8.—*Knight's mate*, a gallant mate, as White King 26, Knight 19; Black King 9, Bishop 1, Knight 10.—*The Rook's mate*, a forcible mate, as White King 27, Rook 41, Black King 25.—*The Pawn's mate*, a disgraceful mate, as White King 14, Pawn 15; Black King 8, Pawn 16.—*Mate by discovery*, an industrious mate, as White King 11, Rook 57, Bishop 49; Black King 9. Moving the Bishop gives mate by discovery.—*Smothered mate*, a shameful mate, as White King 61, Knight 14; Black King 8, Rook 7, Pawns 15, 16. The White Knight gives a smothered mate.—*Stale mate*, a dishonourable mate, as White King 21, Pawn 13, Black King 5; or White King 18, Queen 19, Black King 2.—*Mate in the middle of the board*, an unfortunate mate, White King 61, Queen 37, Pawn 44; Black King 29, Queen 22, Pawn 20.—*Mate at two moves*, a fool's mate, all the men in their first position.

White King's Knight's Pawn	from 55 to 39
Black King's Pawn	13 21
White King's Bishop's Pawn	54 46
Black Queen gives check mate	4 40

Scholar's mate, the men in their first position.

White King's Pawn	from 53 to 37
Black King's Pawn	13 29
White Bishop	62 35
Black Bishop	6 27
White Queen	60 32
Black Queen's Pawn	12 20
White Queen gives Check-mate	32 14

Difficult checkmates are a Knight and Bishop, or two Bishops, against a King; a Castle and Bishop against a Castle; and a Queen against a Bishop and Knight.

Laws of the Game.

1. If you touch your man you must play it, unless by so doing you should expose your King to check; in which case you are only, when possible, to move the king, and so long as you keep hold you may place the said man where you please; but, having once quitted, you then cannot recal the move.
2. If you touch one of your adversary's men, he may insist upon your taking it; and, when you cannot do so, then you are to move your king, provided that may be effected without putting him on check.
3. If, by mistake or otherwise, you make a false move, the opponent can oblige you to move the king, as in the second article; but, if he plays without noticing the said false move, neither of you can recal it.

4. If you misplace your men, and play two moves, it rests with your adversary to permit you to begin the game afresh or otherwise. 5. When your adversary gives check without warning, you are not obliged to ward it off; but if, on his next move, he warns you, then each must retract his last move, and you must remove your King off check. 6. Should your adversary warn you of check without however giving it, and you, in consequence, touch or move any piece, you are at liberty to retract, provided he has not completed his move. 7. You cannot give check to your adversary's King when, by so doing, you would discover check on your own King; thus, suppose the White King on 53, the Queen on 19, the Black King on 22, with a Knight on 21; then Black must not check the White King by moving the Knight to 36; as by that the Black King would be on check to the White Queen. 8. If you attempt to castle without having any right, your adversary may insist on your moving either your King or that Rook. 9. In each fresh game, the players have the first move alternately; but, where the advantage of a piece or pawn is given, the player giving that advantage is entitled to the first move.

Rules for playing the Game.

Of Opening the game. 1. Move the pawns before your pieces, and afterwards bring out the pieces for their support. 2. Avoid useless checks, because you may lose the move if your adversary can take or drive the piece away. 3. Never crowd your game by having too many pieces together; and, if it be crowded, endeavour to free it by exchanges of pieces or pawns; but when the adversary plays out his pieces before his pawns, attack them as soon as you can with your pawns; by which you may crowd his game, and make him lose moves.

Of Attacking. 4. Never attack the adversary's King without a sufficient force; and if he attack yours, and you cannot retaliate, offer exchanges, by which, if he retire, he may lose a move. 5. Play your men in guard of one another, but never guard an inferior piece or pawn with a better, because this piece may, in such case, be, as it were, out of play. 6. Never attack unless when well prepared to meet all the designs of your adversary, by which he may aim at defeating your project; but when your attack is in a prosperous way, never be diverted from it by any seeming advantage which he may throw in your way for a time. 7. When, in pursuing a well-laid attack, you find by a little fore-cast that you can sacrifice a piece or two to gain your end, never hesitate to make the bold attempt. 8. You should endeavour to have a move in *ambuscade*, that is, to place a pawn, or other piece, before a Bishop, Rook, or Queen, so that, by removing that Pawn or Piece, you discover a check upon your adversary's King; thus, suppose the Black King on 6, a White Bishop on 41, and a White Pawn on 34; by pushing forward the Pawn to 26 you discover a check upon the King by your Bishop. 9. As the Queen, Rook, and Bishop operate at a distance, it is generally better in your attack not to have them near your adversary's King, as they are not so likely to be driven away, and frequently prevent your giving a stalemate. 10. If you have one of your adversary's pieces in your power, which cannot escape, do not be in a hurry to take it; and, when two of your adversary's pieces are in your power, be determined in your choice of which you will take by the value each piece is of at that particular part of the game. 11. When your adversary has a Pawn on a square in front of your King, it is frequently advisable not to take it, because it may chance to be a safeguard and protection to you; thus,

suppose a Black Rook placed on 5, a Black Pawn on 45, and the White King on 53, the Pawn protects the King from the attack of the Rook. 12. When your adversary seems to have left a piece in your power, as it were by oversight, consider whether he has not some important move in ambush.

Of Defence. 13. Never let your Queen stand so before the King as that your adversary, by bringing forwards a Rook or a Bishop, might check your King if she was not there, for you could hardly save her, or perhaps, at best, must sacrifice her for an inferior piece; thus, suppose the White King placed on 61, the White Queen on 53, the Black King on 4, and the Rook on 16, which last, if moved to 13, must be taken by the White Queen, who in return would be taken by the Black King, because the White Queen could not otherwise be moved without putting the King in check to the Black Rook. 14. Your adversary must not be permitted to *fork* two of your pieces, i. e. to advance one of his pawns on two of your pieces; as you would, of course, lose one of them for an inferior piece; so, in like manner, do not permit your adversary's Knight to fork your King and Queen, or King and Rook, or Queen and Rook, or your two Rooks, at the same time; for, in the two first cases, the King being forced to go out of check, the Queen must be lost at best for a worse piece; thus, suppose the White Queen placed on 5, the Rook on 7, and a Black Knight on 37; the latter piece, if moved to 22, will fork both the Queen and Rook, and, consequently, one of them must be lost for the Knight. 15. When your adversary attacks one of your pieces or pawns with two or three pieces at the same time, you should endeavour to have as many pieces to defend it; which, if practicable, should be of inferior value to those with which he attacks you. 16. In order to have as powerful pieces as you can in play, let those that are stationed to guard your other pieces or pawns be of no greater force than is necessary. 17. You must prevent your adversary, if possible, from getting prematurely amongst your pieces, because his Knights and Bishops, supported by his Pawns, and occasionally by his Queen, may decide the game while only half of your pieces are engaged. 18. When you play your King, endeavour, if possible, to place it on a square where one of your adversary's pawns will protect it from the attacks of his Rook; thus, suppose a Black Rook on 4, a Black Pawn on 36, and the White King on 53; by moving the King to 52, the Black Pawn prevents the Rook from giving check. 19. When you have a chain of pawns following one another in an oblique line endeavour to preserve the leading Pawn; thus, suppose four White Pawns on 29, 38, 47, and 56, that on 29 is the leading Pawn. 20. Do not hesitate to double a pawn; two in a direct line are not disadvantageous when surrounded by three or four others; three together are strong, as three White Pawns on 28, 35, and 37; but four, as 44 in addition, that make a square, with the help of other pieces well managed, form an invincible strength, and probably may produce you a queen; on the contrary, two pawns with an interval between, as on 35 and 37, are no better than one; and, if you should have three over each other in a line, as 26, 34, and 42, your game cannot be in a worse condition.

Of Exchanging. 21. Exchanges should not be made without reason; they often give the adversary an advantage, particularly if he be a good player. 22. Avoid, if possible, exchanging your King's Pawn, 13 or 53, for your adversary's Bishop's Pawn, 14 or 54; your Queen's Pawn, 52 or 12, for your adversary's Queen's Bishop's

Pawn, 51 or 11, because the former occupying the centre hinder your adversary from hurting you. 23. Do not be afraid of losing a rook for an inferior piece; for though the rook is next in value to the Queen, yet it seldom comes into play so as to operate until the end of the game; and it is generally better to have an inferior piece in play than a superior out. 24. Should your adversary attack your Queen, and another piece at the same time, and, by removing her, you must lose the piece, it may sometimes be advisable to submit to the loss of her if you can get two pieces in exchange for her.

Of Giving or Covering check. 25. Refrain from useless checks, by which a move, or the piece you check with, may be lost; but, if you thereby deprive the King of his privilege of castling, or gain any other important advantage, it is advisable. 26. Be careful that, while you are intent on giving checkmate, you do not leave your King exposed to be checkmated by a single move of your adversary. 27. When you see the possibility of your adversary giving you checkmate be doubly careful of every move.

Of Castling. 28. After the King is castled, the pawns before it should be guarded as much as possible from the attacks of your adversary. 29. Sometimes it is better to play the King than to castle, as it may enable you best to attack with your pawns on that side. 30. If you purpose to castle on the King's side, you must not move your Knight's or King's Pawns without great necessity, because they form a protection to your King afterwards. 31. If your adversary should castle on the same side of the board as yourself, be cautious how you push forward your pawns, leaving your King unguarded; and rather make the attack with your pieces. 32. When the kings have castled on different sides of the board, you must attack your adversary with the pawns you have on the side on which he has castled, taking care to support them with your pieces.

Of the Conclusions of games. 33. At the close of a game your King must not be idle, as by him you generally gain the move and victory. 34. Each party having only three or four pawns on different sides of the board, and no pieces, the kings must endeavour to gain the move. Thus, suppose the White King on 54, and the Black King on 37, the White would gain the move by playing to 53, or the Black by playing to 38; and in either case the adverse King would be prevented from advancing. 35. A single pawn cannot win if the adverse King be placed in opposition to it: thus, suppose the White King placed on 30, a White Pawn on 22, and a Black King on 14, either side having the move, it must be a drawn game, or the Black wins by a stalemate. 36. A single pawn may win if the King be placed before his pawn. Thus, suppose the situations of the Kings reversed, placing the White on 14, and the Black on 30, the Black cannot prevent the Pawn from being pushed forward to queen. 37. Two pawns against one must win almost in all cases, but the player that has the two pawns must avoid changing one of them for his adversary's pawn. 38. A pawn, and any other piece, must win in all cases, except a pawn and a Bishop when the pawn is on a Rook's file, and the Bishop does not command the square on which the pawn will reach the royal line: thus, suppose the White King placed on 39, a White Bishop on 30, a White Pawn on 24, and the Black King on 6; the player of the Black can prevent the pawn pushing forward to Queen, which he could not do if the White Bishop was on 29. 39. Two Knights without any other piece, or pawn, cannot give check-mate. 40. Two Bishops may win. 41. A Knight

and a Bishop may win. 42. A Rook against a Knight, or a Bishop, makes a drawn game. 43. A Rook and a Knight against a Rook make a drawn game. 44. A Rook and a Bishop against a Rook may win. 45. A Rook and a Bishop, or a Rook and a Knight, against a Queen, make a drawn game. 46. A Queen against a Bishop and a Knight may win, but a Queen against a Rook and two pawns makes a drawn game. 47. A Rook against a Bishop, or Knight, and two pawns, makes a drawn game, because the player who has the Rook cannot be prevented from sacrificing it for the two pawns. 48. At all conclusions of games, when a player does not seem to know how to give the difficult check-mates, fifty moves on each side must be appointed for the end of the game.

Different kinds of games.

There are either *close* games or *open* games, or games that are denominated *gambits*, which commence by pushing the King's and King's Bishop's Pawns, or those of the Queen and Queen's Bishop, two squares each, in lieu of employing one to defend the other.

Philidor's First Party.

This game begins with white, and is illustrated by observations on the most important moves.

1. W. The King's Pawn two squares; 53 to 37.
Obs. The best and most usual opening move.
- B. The same, 13 to 29.
Obs. The best counter-move.
2. W. The King's Bishop at his Queen Bishop's square; 62 to 35.
B. The same; 6 to 27.
3. W. The Queen's Bishop's Pawn one move; 51 to 43.
B. The King's Knight at his Bishop's third square; 7 to 22.
4. W. The Queen's Pawn two moves; 52 to 36.
Obs. This move is intended to prevent your adversary's King's Bishop from playing upon your King's Bishop's Pawn; and also to bring the strength of your pawns into the centre of the board.
- B. The Pawn takes it; 29 to 36.
5. W. The Pawn retakes the Pawn; 43 to 36.
Obs. When the game is in this situation, *i.e.* two pawns in a front line, you must take care not to push either of them before your adversary proposes to change a pawn with you. Pawns, when sustained in a front line, obstruct very much the adversary's pieces from entering in your game, or taking an advantageous part.
- B. The King's Bishop at his Queen's Knight's square; 27 to 18.
Obs. If this Bishop, instead of retiring as he here does, should give check by moving to 34, you will cover the check by moving your Bishop 59 to 52; and in case he takes your Bishop, you must retake the Bishop with your Knight, who will then defend your King's Pawn.
6. W. Queen's Knight to his Bishop's third square; 58 to 43.
B. King castles to 7.
7. W. King's Knight to his King's second square; 63 to 53.
Obs. You must always avoid playing this Knight to 46, until after your Pawn 54 has moved, because the Knight would prove a hinderance to the Pawn.
- B. Queen's Bishop's Pawn one square; 11 to 19.
8. W. King's Bishop to his Queen's third square; 35 to 44.
Obs. The Bishop retires to avoid being attacked by the Queen's Pawn, because you would be forced to take his pawn with yours, which would break the centre of your pawns.
- B. Queen's Pawn two squares; 12 to 28.

CHESS.

9. W. King's Pawn one square; 37 to 29.
 B. King's Knight to his King's square; 22 to 5.
10. W. Queen's Bishop to his King's third square; 59 to 45.
 B. King's Bishop's Pawn one square; 14 to 22.
Obs. He plays this pawn to give an opening to his castle.
11. W. Queen to her second square; 60 to 52.
Obs. If, instead of this, you had taken his Pawn 22, your Pawn 29 would have lost its column; by leaving it to be taken you can afterwards supply its place by your Pawn 36, which may then be supported by moving your Pawn 54 to 38.
 B. King's Bishop's Pawn takes the Pawn; 22 to 29.
Obs. He takes the pawn to pursue his design of making an opening to his castle 6.
12. W. Queen's Pawn takes the Pawn; 36 to 29.
 B. Queen's Bishop to his King's third square; 3 to 21.
Obs. He plays this Bishop to enable him to push afterwards his Queen's Bishop's Pawn 19.
13. W. King's Knight to his King's Bishop's fourth square; 53 to 38.
Obs. Your Pawn 29 not being as yet in any danger, your Knight attacks his Bishop, in order to take him, or have him removed.
 B. Queen to her King's second square; 4 to 13.
14. W. Queen's Bishop takes the Bishop; 45 to 18.
Obs. It is always dangerous to let the adversary's King's Bishop stand on the direct line which attacks your King's Bishop's Pawn.
 B. Pawn takes the Bishop; 9 to 18.
15. W. King castles on his side to 63.
Obs. You castle on this side, in order to support your King's Bishop's Pawn, which you will advance two squares as soon as your King's Pawn is attacked.
 B. Queen's Knight to his Queen's second square; 2 to 12.
16. W. King's Knight takes the Bishop; 38 to 21.
 B. Queen takes the Knight; 13 to 21.
17. W. King's Bishop's Pawn two squares; 54 to 38.
 B. King's Knight to his Queen's Bishop's second square; 5 to 11.
18. W. Queen's Rook to its King's square; 57 to 61.
 B. King's Knight's Pawns one square; 15 to 23.
Obs. He is forced to push this pawn to hinder you from playing your King's Bishop's Pawn 38 upon his Queen, which would give you two pawns in a front line upon his ground.
19. W. King's Rook's Pawn one square; 56 to 48.
Obs. This move enables you afterwards to push forward your King's Knight's Pawn; 55 to 39.
 B. Queen's Pawn one square; 28 to 36.
20. W. Knight to his King's fourth square; 43 to 37.
 B. King's Rook's Pawn one square; 16 to 24.
Obs. He plays this Pawn to hinder your Knight entering into his game and forcing his Queen to retire, which would immediately give an open field to your pawns.
21. W. Queen's Knight's Pawn one square; 50 to 42.
 B. Queen's Rook's Pawn one square; 18 to 26.
22. W. King's Knight's Pawn two squares; 55 to 39.
 B. King's Knight to his Queen's fourth square; 11 to 28.
23. W. Knight to his King's Knight's third square; 37 to 47.
Obs. This move is to enable you to advance your King's Bishop's Pawn 38 to 30, which will then be supported by four pieces; namely the Rook 62, Bishop 44, Knight 47, and Pawn 39.
 B. King's Knight to adversary's King's third square; 28 to 45.
Obs. He plays this Knight to cut off the communication between your pieces and break the strength of your pawns, which he would effect by pushing his King's Knight's pawn 23 to 31; but you prevent his design by sacrificing your castle.
24. W. Queen's Rook takes the Knight; 61 to 45.
Obs. You are obliged to sacrifice this Rook to prevent your game being broken in upon.
 B. Pawn takes the Rook; 36 to 45.
25. W. Queen takes the Pawn; 52 to 45.
 B. Queen's Rook takes the Pawn of the opposite Rook; 1 to 49.
26. W. Rook to its King's square; 62 to 61.
Obs. This move is to protect your King's Pawn 29, and to enable you to push forward your King's Bishop's Pawn 38 to 30.
 B. Queen takes the Queen's Knight's Pawn; 21 to 42.
27. W. Queen to her King's fourth square; 45 to 37.
 B. Queen to her King's third square; 42 to 21.
Obs. The Queen returns to this square to prevent the checkmate which soon follows.
28. W. King's Bishop's Pawn one square; 38 to 30.
 B. Pawn takes the Pawn; 23 to 30.
29. W. Pawn takes the Pawn; 39 to 30.
 B. Queen to her fourth square; 21 to 28.
Obs. The Queen offers to be exchanged for the other Queen, in order to break your scheme of giving checkmate with your Queen and Bishop.
30. W. Queen takes the Queen; 37 to 28.
 B. Pawn takes the Queen; 19 to 28.
31. W. Bishop takes the Pawn in his way; 44 to 26.
 B. Knight to his third square; 12 to 18.
32. W. King's Bishop's Pawn one square; 30 to 22.
Obs. You must observe, that when your Bishop runs upon white squares, you must put your pawns upon black ones; or if your Bishop runs upon the black, you must have your pawns upon the white; because then your bishop may prevent the adversary's pieces getting between your pawns. This rule is hardly ever to be dispensed with, in case you attack and have some pawns advanced; but in case of a defence, the rule must be reversed, and the pawns set on squares of the Bishop's colour.
 B. Queen's Rook to adversary's Queen's Knight's second square; 49 to 50.
33. W. Bishop to his Queen's third square; 26 to 44.
 B. King to his Bishop's second square; 7 to 14.
34. W. Bishop to adversary's King's Bishop's fourth square; 44 to 30.
Obs. Here is an example of the above-mentioned remark; if your Bishop had been on a black square, your adversary's King might now have moved to 21.
 B. Knight to adversary's Queen's Bishop's fourth square; 18 to 35.
35. W. Knight to adversary's King's Rook's fourth square; 47 to 32.
 B. King's Rook gives check; 6 to 7.
36. W. Bishop covers the check; 30 to 39.
 B. Knight to adversary's Queen's second square; 35 to 52.
37. W. King's Pawn gives check; 29 to 21.
 B. King to his Knight's third square; 14 to 23.
Obs. Instead of this move the King might have gone into 6, but with as little chance of success.
38. W. King's Bishop's Pawn one square; 22 to 14.
 B. Rook to its King's Bishop's square; 7 to 6.
Obs. This move is made to stop the progress of the white.
39. W. Knight gives check at his King's Bishop's fourth square; 32 to 38.
 B. King to his Knight's second square; 23 to 15.
40. W. Bishop to adversary's King's Rook's fourth square; 39 to 32.
 B. Plays any where; the White pushing to Queen.
Obs. This game might be prolonged a few moves, but is inevitably lost at this point.

CHESS-APPLE (*Bot.*) a kind of Wild Service Tree.

CHESS-BOARD (*Sport.*) the board on which the game of chess is played, otherwise called the *exchequer*.

CHESS ROOK (*Sport.*) another name for the castles which stand at the outer corners of the chess-board, and serve as frontier-castles.

CHESS ROOK (*Her.*) is a bearing in some coats of arms, as in the annexed figure. "He beareth *azure*, a fess between three chess rooks or," by the name of *Bodenham* of Herefordshire.

CHESS TREES (*Mar.*) in French *poullots d'amure de grande voile*, two pieces of wood which confine the clews of the main sail, and are fixed perpendicularly on each side of the ship.

CHESSOM (*Min.*) a kind of earth, or mould, between clay and sand.

CHEST (*Com.*) an indefinite quantity of goods, so called from the chest in which they are contained.

CHEST of viols (*Mus.*) an old expression applied to a concert, or set of viols, consisting of six, which were generally two bases, two tenors, and two trebles, each with six strings.

CHEST (*Anat.*) the Breast, or Thorax, or that part of the human body which contains the heart and lungs.

CHEST-FOUNDING (*Vet.*) a chronic inflammation in those parts of a horse which are situated immediately above the pleura.

CHEST-ROPE (*Mar.*) a rope added to the breast-rope when the boat is towed at the stern of the ship to keep her steady.

CHEST-TRAPS (*Mech.*) boxes, or traps for catching pole-cats, or other vermin.

CHESTING (*Cust.*) the filling dead bodies with spices to preserve them.

CHESTON (*Bot.*) a species of plum.

CHESTS, ammunition (*Mar.*) in French *Coffres d'ammunition*; chests placed at the top of ships of war, containing the ammunition of the swivels, &c.—*Arm chests*, in French, *coffres d'armes*, chests furnished with a ready supply of muskets, pistols, &c.—*Signal chests*, in French, *coffres de signaux*, chests for holding the signal flags.

CHEVA'GE (*Law*) *chevagium*, from the French *chef*, a head; a kind of poll-money formerly paid to the lord, in acknowledgement, by such as held lands, or tenements, in villenage. *Bract.* l. 1, c. 10; *Britt. Fol.* 79. Lambard writes this word *chivage*; but it should be written *chiefage*, and seems also to have signified a sum of money paid yearly to some chief, head, or leader, for his protection: and, according to Spelman, it also signified a duty paid in Wales *pro filiabus maritandis*. *Co. Lit.* § 140.

CHEVA'L-TRAPS (*Her.*) a military instrument, commonly called by the French *Chausse-traps*, and in English *Caltrops*, [vide *Caltrops*] is occasionally borne in coat-armour, as in the annexed figure: "He beareth *sable* on a pile *argent*, a cheval-trap of the first,"—name *Keuridge*.

CHEVA'LEMENT (*Archit.*) French for a sort of prop made of one or two pieces of timber, with a head laid buttress-fashion on a rest. It serves to support jamps, &c.

CHEVALER (*Man.*) a French term for a horse, when, in passing upon a walk, or trot, his off fore-leg crosses the near fore-leg every second motion.

CHEVALET (*Mil.*) French for a raft to cross rivers upon. —*Chevalet d'armes*, or *faisceau d'armes*, a pile of arms.

CHEVALIER (*Her.*) signifies, in French, literally a horseman, or knight, answering to the English cavalier; but in coat armour it is taken for a horseman armed at all points, as in the annexed figure.

CHEVAN'TIA (*Law*) a loan of money.

CHEVA'STRE (*Surg.*) a double-headed roll.

CHEVAUX DE FRIZE (*Fort.*) a large joist, or piece of timber, about 5 or 6 inches square, and 10 or 12 feet in length; into the sides whereof are driven a great number of wooden pins about 6 feet long and 1½ inch diameter, crossing one another at right angles, and pointed with iron. They are used to stop up breaches, and on numberless other occasions. [vide *Fortification*]

CHEVAUX-LE'GERS (*Mil.*) French for a corps of cavalry, which, during the old monarchy, was composed of two hundred gentlemen, making part of the King of France's guard.

CHEVAUCHE'E (*Polit.*) a journey, or round, which is made on horseback by persons employed officially.

CHEVELEURS (*Bot.*) the fibres of plants or trees.

CHEVELLEE (*Her.*) the same as *Chenelle*.

CHEVERIL (*Mech.*) from the French *cheveau*, a kid; kid-leather.

CHEVERILLUS (*Archæol.*) a cockling, or young cock.

CHEVE'T (*Archit.*) French for a quoin, or wedge; likewise that part of a wooden drawbridge to which the chains are fastened.

CHEVETAINE (*Mil.*) a term anciently used among the French to signify the leader, or company answering to the *capitaine*, or *connétable*, of more modern times; with this difference, that the commission lasted only during the time of hostilities.

CHEVILLE d'affût (*Gunn.*) French for an iron bolt which goes across the whole of a gun carriage.—*Chevillè à oreilles*, a similar iron bolt having rings.—*Chevillè ouvrière*, a large flat-headed nail, which confines the avant-train to the carriage of a piece of ordnance.

CHEVILLE (*Mus.*) the bridge of any instrument.

CHEVILS (*Mar.*) small pieces of timber fixed in the inside of a ship, to which the ropes called sheets or tacks are fastened.

CHEVISA'NCE (*Law*) from the French *chevir*, i. e. *venir à chef de quelque chose*, to come to the end of a business; an agreement or composition; sometimes taken for an unlawful bargain or contract.

CHEVITLÆ (*Archæol.*) or *chevise*, heads of ploughed land.

CHEVRE'TTE (*Mil.*) a kind of gin for raising guns or mortars into their carriages. It is made of two pieces, standing upright on a third, and pierced with holes opposite one another to hold a strong bolt of iron, which may be raised higher or lower at pleasure; and with the assistance of a hand spike raises the gun into the carriage.

CHEVRON (*Her.*) or *cheveron*, is one of the eight honourable ordinaries, representing two rafters of a house joined together in chief, and descending like a pair of compasses to the extremities of the shield, as in fig. 1. The word *chevron* signifies ordinarily a couple, barge-couple, or rafter, answering to the *capreolus* of Vitruvius, and the *capriolo* or *caprioleto* of the Italians. It betokens the achievement of some business of moment, or the finishing of some chargeable and memorable work; and is assigned by heralds to such as have served their king and country. A chevron is, according to some, a third; but according to others a fifth of the field. It is distinguished into the — *Chevron coupèd*, which does not reach the sides of the escutcheon, as in fig. 2. "He beareth *ermine*; a

Fig. 1.

Fig. 2.

Fig. 3.

Fig. 4.

chevron, coupèd *sable*; by the name of Jones."—*Chevron engrailed*, as in fig. 3. "He beareth *azure*, a chevron, engrailed."—*Chevron in chief* is a chevron which rises to the

chief, or the top of the escutcheon, as in fig. 4. [vide *Chief*].—*Chevron abased*, when its point does not approach the head of the chief, or reach farther than the middle of the coat.—*Chevron rompu*, i. e. broke, when one branch is separated into two pieces, as in fig. 5.—*Chevron cloven*, when the upper point is taken off, so that the two pieces touch only at one of the angles.—*Chevron couched*, when the point is turned downwards on one side of the escutcheon.—*Chevron divided*, or *counter chevron*, when the branches are of several metals, or when metal is opposed to colour.—*Chevron inverted*, when the point is towards the base of the coat, and it branches towards the chief.—*Chevron mutilated*, when it does not touch the extremes of the coat.—*Party per chevron*, is an epithet for the field, or a charge, when it is divided by single lines, in

the form of a chevron, as in fig. 6. The sub-divisions of the chevron, are the *chevronel*, as in fig. 7, which is half the chevron; and the *couple-close*, as in fig. 8, which is the fourth of the chevron.—*Chevron counterpoint*, vide *Counterpoint*.

CHEVRONEL (*Her.*) a diminutive of the chevron, which is only half the chevron. Leigh says, that no more than three chevronels can be placed in a field.

CHEVRONNE' (*Her.*) an epithet for a shield laid out in several partitions chevron-wise, as in the annexed figure.

CHEVRONS (*Mil.*) a name for the distinguishing marks on the sleeves of non-commissioned officers.

CHEUSIS (*Med.*) χεῦσις, from χεῖω, χεῖω, or χύω, to pour out; or eliquation or fusion, i. e. an attenuation of the tears; opposed to τὸ πάχης, crassitude. *Foes. in Hippocrat. Epid. l. 6.*

CHEWING-BALLS (*Vet.*) balls composed of several sorts of drugs, which are given to horses to recover a lost appetite.

CHEZANANCE (*Med.*) χεζανάνη, from χεῖω, to go to stool, and ἀνάγκη, necessity; any thing that creates a necessity of going to stool.

CH'IA (*Ant.*) the name of a sweet fig; and also of an earth found in Chios, an island of the Archipelago.

CH'ACUM *collyrium* (*Med.*) a remedy for the eyes. *Paul. Aeginet. l. 7, c. 16.*

CH'ADUS (*Med.*) the same as *Furunculus*, according to Paracelsus.

CHIAN PEPPER (*Bot.*) the fruit of the *Capsicum* of Linnæus. [vide *Cayenne*].—*Chian turpentine*, a resin flowing from the *Pistacia terebinthe* of Linnæus.

CHIA'SMOS (*Med.*) χιασμός, the meeting of any two things in the form of a cross, or letter ζ, from which it derives its name.

CHIASTOLITE (*Min.*) a precious stone of the feldspar family.

CHIA'STOS (*Surg.*) χιαστός, the name of a crucial bandage in Oribasius; so called because it has a cross, or the letter ζ.

CHIA'STRE (*Surg.*) a bandage for the temporal artery, consisting of a double-headed roller.

CHIA'VE (*Mus.*) a cliff.

CHIA'US (*Polit.*) an officer at the Turkish court who acts as usher; and is also an ambassador to foreign courts.

CHIBOL (*Bot.*) a small sort of onion.

CHIBOU (*Bot.*) a spurious species of gum elemi, little known in this country, though common in France.

CHIBER (*Med.*) the same as *Sulphur*.

CH'CHAR (*Ant.*) ככר, a talent, either of silver or gold; the first weighed 3,000 shekels, equal to 353l. 1s. 10d. sterling; and that of gold weighed the same, equal to 5,075l. 15s. 0d. sterling.

CHICHIAOXOCOTL (*Bot.*) a species of the *Macaxacotifera*.

CH'CHINA (*Med.*) vide *Cinchona*.

CHICKEN-POX (*Med.*) an exanthematous distemper. [vide *Varicella*]

CH'CK-PEA (*Bot.*) an annual; the *Cicer arietinum* of Linnæus.—*Chick-Weed*, an annual, the *Alsine Media*.—*Water-Chick-Weed*, an annual, the *Callitriche verna*.

CHICKLING-VETCH (*Bot.*) another name for the *Everlasting Pea*.

CHICO'S (*Ent.*) *chigoes*, *chiegoes*, or *chigres*, small worms which, in warm climates, frequently breed in the muscular parts of the flesh, particularly the feet; also the disease of having such worms in the flesh.

CHIEF (*Her.*) one of the eight honourable ordinaries, containing a third part of the field. As the head is the chief part of a man, so is the chief the head or principal part of the escutcheon. It is determined by one line, either straight, as in fig. 1; crenelle as in fig. 2. "He beareth *gules*; a chief crenelle *or*;" indented, &c. as in

fig. 5. Sometimes one chief is borne upon another, which is called *surmounting*, as in fig. 3. "He beareth *gules*; a chief, *argent*; surmounted of another, *or*." This is usually expressed by the line drawn across the uppermost part of the chief; but a similar line drawn along the lower part of the chief, is called a *fillet*, as in fig. 4. The French had also a *chief couvert*, which was, as it were, shadowed or covered the field with tapestry; and a *chief consu*, which was a chief sewed to the field. When a chief is charged with any thing, it is said to be on chief, as in fig. 5. "He beareth, *or*, on a chief indented, *sable*; three crescents, *argent*, by the name of *Harvey*;" but when any thing is

borne on the top of the escutcheon, it is said to be in chief, as in fig. 6. "He beareth, *argent*, a fess, and in chief, three lozenges, *sable*," by the name *Aston*. Chiefs are likewise distinguished into the *Chief chevroned*, *bended*, or *paled*: when it has a chevron, bend, or pale, contiguous to it, and of the same colour as itself.—*Chiefs supported*, are those which have two-thirds at the top, of the same colour as the field, and the third at the bottom of a different colour.

CHIEF point (*Her.*) is the uppermost point of an escutcheon, which is three-fold, dexter, middle, and sinister.

CHIEF pledge (*Law*) the same as *Headborough*.—*Chief rents*, the same as *Quit-rent*.—*Tenants in chief*, or *tenants in capite*, holding immediately under the king in right of his crown and dignity.

CHIEGO (*Ent.*) vide *Chicos*.

CHIEN-D'ENT (*Bot.*) a French name for the *Gramen Caninum*.

CHIE'RE (*Bot.*) the *Leucoium luteum*, or *Wall-flower*.

CHIESA (*Mus.*) Italian for a church, is frequently em-

played as an epithet to signify that the music is in the church style.

- CHIFFER** (*Alch.*) or *Chifir*, a name for the *Lapis animalis*, according to Libavius, in the preparation of the philosopher's stone. It is supposed to signify sulphur.
- CHIGOE** (*Med.*) the disease otherwise called *chicos*.
- CHIGRES** (*Med.*) vide *Chicos*.
- CHILBLAIN** (*Med.*) *pernio*, an inflammatory affection of the extreme parts of the body, occasioned by cold.
- CHILDERMAS-DAY** (*Fec.*) a feast observed on the 28th of December, in commemoration of the murder of the children of Bethlehem by order of Herod.
- CHILDING** (*Bot.*) an epithet applied to plants when their offsets exceed their ordinary number.
- CHILDWIT** (*Law*) a fine or penalty imposed upon a bond-woman who was unlawfully gotten with child; this was 3s. 4d. in the manor of Writtle, in Essex.
- CHILIADS** (*Arithl.*) from *χιλιάς*, the number 1000; a name given to tables of logarithms, because they were at first divided into thousands: in 1624, Mr. Briggs published a table of logarithms for 20 chiliads, and afterwards increased them to the number of 31.
- CHILIAEDRON** (*Geom.*) from *χιλιάς*, a thousand, and *ἔδρα*, base; a figure of a thousand sides.
- CHILIA'GON** (*Geom.*) from *χιλιάς* and *γωνία*, an angle; a plain figure having 100 sides and angles.
- CHILIA'RCHUS** (*Polit.*) *χιλιαρχος*, from *χιλιάς* a thousand, and *ἄρχος*, a governor; a colonel, or a commander of 1000 men.
- CHILIASTÆ** (*Ecc.*) or *Chiliasts*, a sect of Christians who maintained that before the last or general judgment Christ will come and reign, personally, 1000 years among his saints on earth. This opinion was broached in the early ages of Christianity, but condemned by Justin Martyr, and also by pope Damasus, in a council held against Apollinarius, in 373. *Just. ad Tryphon.*; *Euseb. Hist. Eccles.* l. 7, c. 24; *St. Aug. de Hæres.*; *Baron. Annal. Ann.* 373.—*Anti-Chiliasts* those who opposed the Chiliasts.
- CHILIODYNAMENE** (*Bot.*) *χιλιοδυναμίνον*, from *χιλίοι*, a thousand, and *δύναμις*, power; an epithet for the herb Polemonium, on account of its many virtues. *Dioscor.* l. 4, c. 8.
- CHILIOPHYLLON** (*Bot.*) the herb millefolium.
- CHILLI** (*Bot.*) a species of Indian pepper.
- CHILLOACE** (*Med.*) vide *Chillocace*.
- CHILON** (*Ich.*) an epithet applied to some species of fishes of the Class *Capitones*, i. e. *Labeones*.
- CHILONIAN** (*Rhet.*) or *Chilonic*, a brief compendious style of writing, called the Chilonic style, from Chilo, one of the wise men of Greece, whose sentences were very short.
- CHILPELAGUA** (*Bot.*) a species of pepper which grows in Guinea.
- CHILTERN-HUNDREDS** (*Law*) a hilly district in Buckinghamshire, which has belonged from time immemorial to the crown, and to which is attached the nominal office of Steward of the Chiltern Hundreds. By the acceptance of this office every member of parliament vacates his seat; whence the phrase, "To accept the Chiltern Hundreds."
- CHILTERPIN** (*Bot.*) the same as the *Chilpelagua*.
- CHIMÆRA** (*Myth.*) *χιμαιρα*, a monster, feigned to be like a lion in the fore part, a dragon behind, and a goat in the middle.
- CHIMÆRA** (*Ich.*) a genus of animals, Class *Pisces*, Order *Chondropterygius*.
Generic Character. Head pointed.—*Spiracle* single.—*Tail* ending in a slender thread.
Species. The species are the—*Chimæra monstrosa*, Sea-Monster; and the—*Chimæra collarinchus*.
- CHIMALATH** (*Bot.*) or *Chimalath*, the same as *Corona Solis*.
- CHIMARRHIS**, (*Bot.*) genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

- Generic Characters.* CAL. *perianth* margin entire.—COR. one-petalled; *tube* very short; *border* five-cleft; *segment* lanceolate.—STAM. *filaments* five; *anthers* oval.—PIST. *germ* roundish; *style* filiform; *stigma* bifid.—PER. *capsule* subovate; *seeds* solitary.
- Species.* The only species is the *Chimarrhis cymosa*, a shrub, native of Martinica.
- CHIMB** (*Mech.*) or *Chine*, the end of a barrel, tub, &c.; thence *chine* hoop, that which is next the end.
- CHIMES** (*Mus.*) a kind of periodical music produced at equal intervals of time on clocks, or bells.
- CHIME'THLON** (*Med.*) the same as *Pernio*.
- CHIMIA** (*Chem.*) vide *Chemia*.
- CHIMIA'TER** (*Med.*) from *chimia*, chemistry, and *ιατρί*, a physician; physicians who make the science of chemistry subservient to the purposes of medicine.
- CHIMIA'TRI** (*Med.*) medicines prescribed by chemists.
- CHIMIN** (*Law*) in French *chemin*, a way, of which there are two sorts; namely, *chiminus regius*, the king's highway, in which the king's subjects, and all under his protection, have free liberty to pass and repass.—*Chiminus privatus*, a private way, or the liberty which one or more have of passing through the grounds of another. This is either *chimin in gross*, where a person holds a way principally and solely in itself; or, *chimin appendant*, that way which a man hath as appurtenant to some other thing. *Küch.* 117; *Co. Lit.* 56.
- CHIMINAGE** (*Law*) *chiminagium*, a toll paid by those having a way through a forest. *Co. Lit.* 56.
- CHIMMAR** (*Ecc.*) or *Simar*, a kind of vestment formerly worn by bishops between their gown and rochets.
- CHIMNEY-PIECE** (*Archit.*) the ornamental piece set over a fire-place.
- CHIMNEY-MONEY** (*Law*) another name for hearth-money, a duty, imposed by the crown, of two shillings on every hearth.
- CHIMOLE'A LAXA** (*Med.*) the powders separated from the flowers of saline ores. *Paracel. de Morb. Gall.* l. 2, c. 4.
- CHIMUR** (*Min.*) the dross of the ore.
- CHIN-SCAB** (*Vet.*) a disease in sheep, called by shepherds *the darters*.
- CHINA** (*Bot.*) or *China-Root*, a dry tuberous nodous root, of an astringent quality, and an earthy taste, the *Smilax China* and *Indica* of Linnæus.—Bastard China, the *Senecio Madraspalorius*, &c.—*China China*, the same as the *Cortex Peruvianus*.—*China-Pink*, the *Dianthus Chinesis*.—*China-Rose*, the *Hibiscus Rosa Chinesis*.
- CHINCH** (*Ent.*) a bug.
- CHINCHINA** (*Bot.*) another name for the *cinchona*.
- CHINE** (*Mar.*) that part of the water-way left above the deck.
- CHINE-COUGH** (*Med.*) or *chin-cough*, a violent and convulsive cough incident to young children.
- TO CHINE a *beast* (*Mech.*) to cut him down quite through the back bone.
- CHINENSE** (*Bot.*) or *Sinense pomum*, the China orange.
- CHINESE Smilax** (*Bot.*) the *Smilax China* of Linnæus.
- CHIN'SCI** (*Surg.*) pegs, such as are in a harp, serving instead of *fibulæ*, or braces to fasten axes, crossbeans, &c. *Orib. lib. de Machinam.* c. 4.
- CHINKED** (*Bot.*) *rimosus*, an epithet applied to the outer bark of trees, particularly when they are in a state of decay from age.
- CHINQUAPINE** (*Bot.*) the *Fagus pumella* of Linnæus.
- TO CHINSE (*Mar.*) in French *remplir d' étoupe une coutine*, to thrust oakum into a seam or chink with a chisel or point of a knife.
- CHINTZ** (*Com.*) a fine Indian painted calico.

- CHIO turpentine** (*Bot.*) the resin of the *Pistacia terebinthus* of Linnæus.
- CHIOCCOCCA** (*Bot.*) the *Cestrum nocturnum*, and *Psychotria pauciculata* of Linnæus.
- CHIOCCOCCA** (*Bot.*) a genus of plants, Class 5 *Pentandria*. Order 1 *Monogynia*.
- Generic Characters.* CAL. *perianth* five-toothed.—COR. monopetalous; *tube* long; *border* five-parted; *divisions* equal.—STAM. *filaments* five; *anthers* oblong.—PIST. *germ* inferior; *style* filiform; *stigma* simple.—PER. *berry* roundish; *seeds* two.
- Species.* The species are shrubs, as—*Chiococca racemosa*, *Lonicera*, *Periclymenum*, *Jasminum*, seu *Pandacaqui*, Climbing Snowberry-tree, or David's Root, native of Jamaica.—*Chiococca barbata*, native of the Society Island.
- CHIOLI** (*Med.*) the same as *Kirunculus*.
- CHIONANTHUS** (*Bot.*) a genus of plants, Class 2 *Dian-dria*, Order 1 *Monogynia*.
- Generic Characters.* CAL. *perianth* one-leaved.—COR. monopetalous; *tube* very short; *border* divisions linear.—STAM. *filaments* two; *anthers* cordate.—PIST. *germ* ovate; *style* simple; *stigma* obtuse.—PER. *drupe* round; *seed* nut striated.
- Species.* The species are shrubs, as—*Chionanthus Virgini-ca*, seu *Amelanchier*, &c. Virginia Fringe-tree, or Snowdrop-tree, native of America.—*Chionanthus colini-folia*, native of Ceylon.—*Chionanthus compacta*, native of the Carribbee islands.—*Chionanthus Zeylanica* seu *Thoninia*, &c. Ceylon Snowdrop-tree, native of Ceylon.—*Chionanthus incrassata*, *Mayepea*, seu *Schreberi*, native of Guiana.—*Chionanthus Mayepea*, seu *Mayepea*, &c. a tree, native of Guiana.—*Chionanthus axillaris*, native of the East Indies.
- CHIOPPINE** (*Archæol.*) a high shoe formerly worn by ladies.
- CHIQUE** (*Com.*) a weight for weighing goats' wool in Smyrna, containing 500 drams or rokes, equal to 5 lbs. 10 oz. 7 dr.
- CHIQUES** (*Ent.*) French for worms called *chicos*.
- CHIRA'GRA** (*Med.*) χείραγρα, from χείρ, the hand, and γρα, a capture or seizure; a name for the gout in the hands.
- CHIRAP'SIA** (*Med.*) χειραψία, from χείρ and ψία, a touching or handling; the rubbing a place affected with the itch.
- CHIRCHGEMOTE** (*Law*) *Chirchgemot*, or *Kirkmote*, in Saxon Cīrcgemot; a meeting in a church or vestry. *Leg. Hen. 1, c. 8 apud Brompton; 4 Inst. 321.*
- CHIRIDO'TA** (*Ant.*) χειροδωτά, an epithet for a garment, with long sleeves, which was not usual among the Romans. *Aut. Gell. 1. 7, c. 12.*
- CHIROGRAPHARIUS** (*Ant.*) an epithet for a debtor who has given his note of hand for the sum due; so also *Pecunia chirographaria*, money due by bond.
- CHIROGRAPHER** of *finēs* (*Law*) from χείρ, a hand, and γραφω, to write; an officer in the Common Pleas, who engrosses fines after they are examined and passed in the other office.
- CHIROGRAPHIST** (*Ant.*) the same as *Chirographer*.
- CHIROGRAPHUM** (*Law*) Chirograph, any public instrument, or gift of conveyance, attested by the subscription and crosses of witnesses.
- CHIROGRAPHY** (*Law*) a writ under one's own hand.
- CHIROLOGY** (*Mech.*) χειρολογία, from χείρ, a hand, and λογος, a speech; a talking with the hands by signs.
- CHIROMANCY** (*My.*) *Chiromantia*, a prediction of a person's fortune and condition by the lines in his hands.
- CHIRONAX** (*Ant.*) a manual artificer, or one who follows a mechanic trade.
- CHIRONIA** (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

- Generic Characters.* CAL. *perianth* one-leaved; *leaflets* oblong.—COR. monopetalous; *tube* narrower; *border* five-parted; *divisions* ovate.—STAM. *filaments* five; *anthers* oblong.—PIST. *germ* ovate; *style* filiform; *stigma* headed.—PER. ovate; *seeds* numerous.
- Species.* The species are annuals or shrubs. Of the first kind are the following; namely, the *Chironia triuervia*, seu *Lysintachia*, native of Ceylon.—*Chironia Jasminoides*, native of the Cape of Good Hope.—*Chironia chilensis*, *Gentiana*, seu *Centaurium*, &c. native of Chili.—*Chironia centaurium*, *Gentiana*, *Centaurium*, seu *Eri-thræa*, native of Europe.—*Chironia inaperta*, *Vaillantii*, &c. seu *Centaurium*, native of Europe.—*Chironia maritima*, *Gentiana*, seu *Centaurium*, &c. native of Spain. Of the second kind are the following; namely—*Chironia linoïdes*, seu *Rapuntium*, Flax-leaved Chironia, native of the Cape of Good Hope.—*Chironia baccifera*, seu *Centaurium*, &c. native of Æthiopia.—*Chironia frutescens* seu *Centaurium*, &c. native of Æthiopia.—*Chironia tetragona*, native of the Cape of Good Hope.—*Chironia angustifolia*, native of the Cape of Good Hope.—*Chironia decussata*, native of the Cape of Good Hope.
- CHIRONIA** (*Bot.*) the same as *Gentiana*.
- CHIRONION** (*Bot.*) the herb Centaury.
- CHIRONIUM** (*Bot.*) the *Laserpitium chironium* of Linnæus.
- CHIRONIUM** (*Med.*) χείρωνιον, a malign ulcer difficult to heal, with a hard, callous, and tumid margin, so called from Chiron, by whom it is said to have been first cured.
- CHIRONÓMY** (*Med.*) the same as *Cheironomia*.
- CHRONOMY** (*Rhet.*) a suitable action with the hand in speaking, from χείρ, the hand, and νόμος, a law.
- CHIRONOMON** (*Ant.*) χείρονομῶν, a sort of dance, in which there was much gesticulation with the hands. *Juv. sat. 6, v. 63; Hesychius.*
- CHIROTE'CHNES** (*Med.*) the same as *Chironax*.
- CHIROTHE'CA** (*Anat.*) and *Podotheca*, from χείρ, and τέτις, a foot, and τίθημι, to put; a glove and shoe of the scarf skin, with the nails adhering, which are separated from the flesh in the preparation of anatomical subjects.
- CHIROT'RIBIA** (*Med.*) χειροτριβία, from χείρ and τρίβω, to exercise; the being well versed in the practice of medicine. *Foes. Econom. Hippocrat.*
- CHIROTO'NIA** (*Ecc.*) χειροτονία, from χείρ and τεινω, to extend; an imposition of hands in conferring priestly orders.
- CHIRUR'GIA** (*Surg.*) from χείρ and ἔργον, work; surgery, or that part of medicine which consists of manual operations.
- CHISEL** (*Carp.*) a tool for chipping and paring away wood.
- CHIST** (*Ant.*) the name of a measure. [vide *Sextarius*]
- CHIT** (*Bot.*) is said of seed when it first of all shoots its small root into the earth.
- CHIT-LARK** (*Orn.*) the same as *Tillark*.
- CHITON** (*Con.*) a genus of animals, Class *Vermes*, Order *Testacea*.
- Generic Character.* *Animal* a Doris.—*Shell* consisting of several segments or valves disposed down the back.
- Species.* The principal species are the *Chiton crinatus*, *punctatus*, *ruber*, &c.
- CHITON** (*Med.*) χιτών, a coat or membrane.
- CHITTARA** (*Mus.*) a *cithara*, a guitar.
- CHIVALRY** (*Archæol.*) from the French *chevalier*, a tenure of lands by knight's service.
- CHIUDENDO** (*Mus.*) Italian for ending, is commonly used with some other word, as *chiudendo col aria*, ending with the air.
- CHIVE** (*Bot.*) 1. The name among ancient botanists for the anther. 2. A sort of small onion.
- CHIV'EL** *Sheveti* (*Bot.*) a cucurbitiferous tree, with a fruit as big as a large melon.
- CHIVE'TS** (*Bot.*) the small parts at the roots of plants, by which they are propagated.

CHIVILUILE'NZA (*Bot.*) a name for a species of *Catuputia Minor*.

CHIUM vinum (*Med.*) χῆος ἰνός, Chian wine; a wine from the island Chios, now called Scio. *Dioscor.* l. 5, c. 10.

CHLAMYDIA (*Bot.*) the *Phormium tenax* of Linnæus.

CHLAMYS (*Ant.*) a tunic or loose coat worn over the vest or doublet.

CHL'AROS (*Med.*) χλιαρός, tepid, lukewarm; an epithet for mild fevers, in opposition to the acute. *Gal. Com. Hippoc.* l. 4, aph. 37.

CHLIA'SMA (*Med.*) χλιασμο, from χλιάνομαι, to grow tepid; a tepefactory or warming fomentation of the moist kind. *Hippocrat. de Rat. Vict. in Acut. Morb.; Foes. Econom. Hippocrat.*

CHLO'E (*Bot.*) χλόη, an epithet for the herb or grass.

CHLO'RA (*Bot.*) a genus of plants, Class 8 *Octandria*, Order 1 *Monogynia*.

Generic Characters. CAL. perianth eight-leaved; leaflets linear.—COR. monopetalous; tube shorter than the calyx; border eight-parted; divisions lanceolate.—STAM. filaments eight; anthers linear.—PIST. germ ovate, oblong; style filiform; stigmas four.—PER. capsule ovate, oblong; seeds numerous.

Species. The species are annuals, as—*Chlora perfoliata*, *Gentiana*, &c. *Blackstonia*, &c. seu *Centaureum*, &c. Perfoliate Yellow-wort, or Yellow Centaury, an annual, native of Switzerland.—*Chlora quadrifolia*, seu *Gentiana*, &c. native of the S. of Europe, &c. &c.

CHLORANTHUS (*Bot.*) a genus of plants, Class 4 *Tetrandria*, Order 1 *Monogynia*.

Generic Characters. CAL. none.—COR. one convex petal. STAM. filaments none; anthers four.—PIST. germ obovate; style unequal; stigmas three.—PER. drupe oblong; seed nut oblong.

Species. The only species is, the—*Chloranthus inconspicuus Nigrana*, seu *Creodus*, &c. a shrub, native of China.

CHLORA'SMA (*Bot.*) from χλωρός, a palish green colour, shining with a sort of splendour inclining to watery. It is applied as an epithet to leguminous plants before they come to maturity.

CHLORATE (*Chem.*) the name of salts formed by the combination of chloric acid with different bases, as *chlorate of ammonia*, a salt formed by dissolving carbonate of ammonia in chloric acid; so *chlorate of soda*, *chlorate of lime*, &c. [*vide Chemistry*]

CHLORIC acid (*Chem.*) an acid compound of chlorine and oxygen, in the proportions of about 47 parts chlorine to 53 oxygen. It is destitute of smell, reddens vegetable blues without destroying them, and combines with different bases, so as to form the salts called chlorates. This acid is distinguished into *chloric acid* and *perchloric acid*, according to the proportion of oxygen. [*vide Chemistry*]

CHLORIDE (*Chem.*) a compound of chlorine with a combustible substance, as the *chloride of azote*, the *chloride of manganese*, &c. The chlorides are distinguished into *protochloride* and *perchloride*, according to the proportion of chlorine. [*vide Chemistry*]

CHLORINE (*Chem.*) a gaseous body of a greenish yellow colour, and a suffocating smell, procured from the black oxide of manganese and muriatic acid. It was formerly called *dephlogisticated muriatic acid*, *oxymuriatic acid*, or *oxygenized muriatic acid*. The specific gravity is reckoned to be about 2.395. [*vide Chemistry*]

CHLORIO'DIC acid (*Chem.*) a compound of chlorine and iodine, consisting of about 64 parts iodine and 36 chlorine. [*vide Chemistry*]

CHLORITE (*Min.*) a mineral consisting of oxide of iron united to siliceous and aluminous earths.

CHLOROCARBONIC acid (*Chem.*) a compound of one atom carbon with two atoms of a supporter.

CHLOROCYANIC acid (*Chem.*) chlorine gas with a solution of hydrocyanic acid in water.

CHLORO'SIS (*Med.*) χλωρασις, from χλωρος, green; the Green Sickness; a species of *Cachexy*.

CHLOROXYLON (*Bot.*) the *Laurus Chloroxylon* of Linnæus.

CHNUS (*Med.*) χνῆς, fine soft wool.

CHO'A (*Ant.*) the same as *Chu*.

CHO'ACON (*Med.*) or *choacum*, a black plaister, made of spuma argenti, boiled oil, and resin.

CHOAKED (*Print.*) an epithet applied to the press when, for want of proper washing, the ink gets into the hollow of the face of the letter.

CHOA'NA (*Med.*) χωνη, a cavity in the brain like a funnel.

CHO'ANOS (*Med.*) χωνος, from χέω, to pour; a funnel or furnace for melting metals.

CHOASPITES (*Min.*) a precious stone, of a green colour, and glittering like gold.

CHOA'VA (*Bot.*) the same as *Caffea*.

CHOCK (*Mar.*) in French *cale acore*. 1. A sort of wedge used for confining a weighty body in a certain place. 2. Pieces for fastening some part of the vessel.—*Chock-a-block*, the same as *Block-a-block*.—*Chocks of a rudder*, large pieces of timber to stop the motion of the rudder in case of any accident.

CHOCOLA'TA (*Bot.*) or *cuccolata*, chocolate; a kind of cake prepared of cocoa nuts and other ingredients.

CHO'COLATE-TREE (*Bot.*) the *Theobroma cacao* of Linnæus.

CHO'EAC (*Chron.*) an Egyptian month which is the fourth from Theth. [*vide Chronology*]

CHENICIS (*Surg.*) χενικίς; another name for the trepan.

CHENIX (*Ant.*) χενίξ, an Attic dry measure, containing 3 Cotyla, or Heminæ, i. e. one sectarius and a half. *Bud.*

CHERA'DES (*Med.*) χαιράδες, from χαιρός, a swine; strumous swellings, painful to the touch, and exasperated by medicines.

CHERADOLE'THRON (*Bot.*) χαιραδόλειθρον, from χαιρός, a swine, and δλίθρος, destruction; Highbanc, a name given by Ætius to the *Xanthum*, or louse-bur.

CHEROGRYLLUS (*Zool.*) an hedge-hog.

CHOIR in *nunneries* (*Mus.*) a large hall separated from the body of the church by a grate, where the nuns sing the office.—*Choir of a cathedral*, that part of the cathedral in which divine service is performed.

CHOIR-MAN (*Mus.*) any vocal officiate of a choir.

CHOIRAS (*Med.*) χαιράς, from χαιρός, a hog; the same as *Scrofula*.

CHOIROS (*Zool.*) χαιρὸς, a very little hog, so called by the ancients.

CHOK (*Bot.*) the filamentous or capillary part of an artichoke.—*Choke-pear*, a rough tasted pear.

CHOKE-DAMP (*Min.*) the name given by miners to the noxious air occasionally found in the bottoms of mines and pits.

CHOKING the luff (*Mar.*) the placing the bight of the leading part or fall of a tackle close up between the nest part and jaw of the block.

CHOLA'DES (*Med.*) from χολή, bile; a name for the small intestines which contain bile.

CHOLA'GO (*Med.*) from χολή, the small intestines which contain bile.

CHOLAGOGUES (*Med.*) χολαγωγὰ, from χολή, the bile, and ἄγω, to drive out or evacuate; medicines which expel or evacuate bilious fæces.

CHOLAS (*Anat.*) χολάς, the cavity of the *Hypochondria*, or *Ilium*, so called because it contains the liver, as the strainer of the chole, or bile. *Arist. Hist. Animal.* l. 1, c. 13.

CHOLAS (*Min.*) a precious stone of the emerald kind. *Plin.* l. 37, c. 3.

CHOLE (*Anat.*) the same as *Bile*.

CHOLEDOCHUS (*Anat.*) χοληδόχος, from χολή, bile, and δεχομαι, to receive; a common epithet for the gall bladder, the biliary ducts, and the common gall duct, which communicates with the duodenum, called *Choledochus ducta*.

CHOLEGON (*Med.*) χοληγόν, χολήγιον: the same as *Cholagoga*.

CHOLERA morbus (*Med.*) χολέρα, a disease consisting of an immoderate perturbation of the belly, attended with a discharge of the bile upwards and downwards, of which Hippocrates mentions two sorts, the humid and the dry. *Hippocrat. de Rat. Vict. in Acut. Morb. et Gal. Comm.; Aret. de Caus. et Signis Morb. acut. l. 2, c. 5; Cels. l. 4, c. 11; Paul. Æginet. l. 3, c. 39.*

CHOLERA, in the modern nomenclature, is a genus of diseases, Class *Nemoses*, Order *Spasmi*.

CHOLE/RICA (*Med.*) medicines which relieve the cholera.

CHOLE/RICUS (*Med.*) χοληρικός, choleric; an epithet for one whose constitution abounds with bile.

CHOLIA'MBI (*Poet.*) a sort of Iambic verse, having a spondee in the 6th or last place.

CHOLICE/LA (*Med.*) a swelling on the right side, or rather near the pit of the stomach, from an accumulation of bile in the gall bladder.

CHOLOBAPHINON (*Med.*) χολοβάφινον, from χολή, bile, and βάπτω, to immerge; a metal resembling gold, which appears as if dipped in gall.

CHOLOMA (*Med.*) χόλωμα, from χολός, lame, maimed; a distortion of a limb, according to Galen, in his Commentary on Hippocrates' περι αρθ, but in a particular sense a halting or lameness of the legs.

CHOLOSIS (*Med.*) from χολός, lame; a defect from one leg being shorter than the other.

CHOMER (*Ant.*) or *Coron*, חומר, a measure containing 75 gallons, 5 pints, and 7 solid inches.

CHONDRILLA (*Bot.*) a genus of plants, Class 19 *Syngenesia*, Order 1 *Polygamia Æqualis*.

Generic Characters. CAL. common cylindrical.—COR. common imbricate; corollets equal; proper monopetalous.—STAM. filaments five; anthers cylindrical.—PIST. germ subovate; style filiform; stigmās two.—PER. none; calyx cylindrical; seeds solitary; pappus hairy; receptacle naked.

Species. The species are—*Chondrilla juncea*, Rushy Gum Succory, a perennial, native of Germany.—*Chondrilla crepoides*, an annual, &c.

CHONDRILLA is also the *Apargia tuberosa* of Linnæus.

CHONDRILLÆGENUS (*Bot.*) the *Chicorium spinosum* of Linnæus.

CHONDRIS (*Bot.*) Bastard Dittany.

CHONDROGLOSSUS (*Anat.*) from χόνδρος, a cartilage, and γλώσσα, a tongue; a muscle inserted into the basis or cartilaginous part of the tongue.

CHONDROPHARYNGÆUS (*Anat.*) from χόνδρος, a cartilage, and φάρυγξ, the upper part of the fauces; a muscle which rises from the cartilaginous appendage of the os hyoides, and is inserted in the membrane of the fauces.

CHONDROPTERIGIOUS (*Ich.*) an order of animals, Class *Pisces*, including those genera which have their gills cartilaginous; namely—*Accipenser*, the Sturgeon.—*Chimæra*, the Sea-Monster.—*Squalus*, the Shark; the Dog-Fish.—*Pristis*, the Saw-Fish.—*Raia*, the Ray; Torpedo; Thornback.—*Petromyzon*, the Lamprey.—*Gastrobranchus*, the Hag-Fish, or Glutinous Hag.

CHONDROSYNDESIMUS (*Anat.*) χονδρυσύνδεσιμος, from χόνδρος, a cartilage, and σύνδεσιμος, a ligament; a cartilaginous ligament.

CHONE (*Med.*) χώνη, the same as *Choana*.

TO CHOP about (*Mar.*) in French *sauter*, is said of the wind when it varies frequently and suddenly.

CHOP-CHURCH (*Archæol.*) *Ecclesiarium permutatio*, probably a nickname for those who used to change benefices. 9 *Hen. 6, c. 65.*

CHOPINEL (*Com.*) *Chopine*; a spirit measure at Paris, containing 15½ oz. or 16 oz.

CHOPPINGS (*Com.*) a sort of Venetian shoes with very high heels.

CHORA (*Anat.*) χώρα, from χωρῶς, a place; is used by Galen for the cavities of the cycs. *De Usu. Part. l. 8, c. 6.*

CHORA'GIUM (*Ant.*) the tiring or dressing room in the theatres, for the players; also their dresses and furniture. *Cic. ad Heren. l. 2, c. 48; Vitruv. l. 5, c. 9; Fest. de Sig. Verb.*

CHORA'GUS (*Ant.*) a maker and keeper of dresses. *Sueton. in Aug. c. 70.*

CHORAL (*Mus.*) or *Choristic*, an epithet for what belongs to the choir, or is performed by a plurality of voices, as a choral anthem, a choral service, &c.

CHORA'ULES (*Ant.*) χερουλις, a player on the flute. *Sueton. in Ner. c. 54.*

CHORD (*Geom.*) from the Greek χορδή, and the Latin *chorda*; signifies, literally, a string; but is applied in mathematics to the line which joins the extremities of any arc of a circle, such as the lines A B and D C. A line E O drawn from the centre to bisect a chord is perpendicular to it, and if it be perpendicular to the chord, it bisects both the chord and the arc.

CHORD (*Mus.*) signifies, literally, the line or string from which the vibration of the sensation of sound is excited; but it is also applied, in an extended sense, to a union of the sounds of several strings, pipes, or voices. In practical music there are several sorts of chords, namely—*Fundamental chord*, which consists of the three fundamental consonances, i. e. the 3d, 5th, and 8th, of the fundamental bass; or their inversions.—*Accidental chord*, that which is produced either by anticipation or retardation.—*Anomalous or equivocal chord*, in which some intervals are greater or less than those of the fundamental chord.—*Transient chord*, in which some intermediate notes are introduced not forming any component parts of the fundamental harmony.

CHORDA (*Anat.*) a term sometimes used for a tendon, as *chorda magnalis*.—*Chorda tympani*, the fifth pair of nerves from the brain.—*Chorda Willisii*, cords which cross the veins in the *dura mater*, so called from their discoverer.

CHORDA'PSUS (*Med.*) χορδαψός, from χορδή, a cord, and ἅπτωμαι, to touch; so called from the intestines appearing to be twisted into knots, like pieces of string, in a species of painful colic.

CHORDATA GONORRHŒA (*Med.*) a gonorrhœa attended with a painful tension of the penis.

CHORDE'E (*Med.*) or *Corde*, a painful involuntary erection of the penis.

CHORE'A (*Ant.*) a dance in which many take a part.

CHOREA SANCTI VITI (*Med.*) St. Vitus's dance, a convulsive motion of the limbs, which gives the person affected the appearance of dancing. It takes its name from St. Vitus, who is said to have cured sick persons by the force of his persuasions.

CHOREA, in the modern nomenclature, is a genus of diseases, Class *Neuroses*, Order *Spasmi*.

CHORE'GIA (*Med.*) χορηγία, from χορός, a company of dancers and singers, and ἄγω, to lead; all the apparatus necessary for a physician.

CHOREPISCOPUS (*Ecc.*) the same as *Suffragan*.

CHORE'US (*Poet.*) χορείος, a foot in Greek and Latin verse, consisting of two syllables, one short and the other long, the same as the trochee, according to Cicero and Quintilian; but according to others, it consists of three short

syllables, like the tribacchus. *Cic. Or. ad Brut.* c. 63; *Quintil.* l. 4, c. 9; *Hæphest. Enchirid.*

CHORIAMBUS (*Poet.*) χορίαμβος, or *Choriambic*, a foot of four syllables, one long at each end, and two short in the middle, - ~ - ~, as *æbrictās*. *Hæphest. Enchirid.*

CHORION (*Med.*) χορίον, χορίον: the external membrane of the fœtus.

CHORION (*Mus.*) a hymn sung in honour of Cybele, mother of the gods.

CHORISTER (*Mus.*) one who officiates vocally in a choir.

CHOROBATES (*Ant.*) χοροβάτης, a level with a double square in the form of a T. *Vitruv.* l. 8, c. 6; *Bald. Lex. Vitruv.*

CHOROCITHARISTA (*Ant.*) one who plays on the lute, or harp, to those who dance. *Sueton. in Domit.* c. 4.

CHORODIDA/SCULUS (*Mus.*) the master of the quire.

CHORO-FAVORITO (*Mus.*) an Italian epithet; a chorus in which the best voices and instruments are employed.

CHORO-RECITANTE, the little chorus.

CHOROGRAPHER (*Geog.*) χορογράφος, from χορος, a country, and γράφω, to describe; one who describes particular countries.

CHOROGRAPHY (*Geog.*) χορογραφία, from χορος and γράφω; that part of geography which treats of the description of particular countries, provinces, &c. *Vitruv.* l. 8, c. 2; *Ptol. de Geog.* l. 1.

CHOROIDES (*Med.*) χοροειδής, from χορίον, the chorion, and εἶδος, likeness; an epithet for several membranes, which, on account of the multitude of their blood-vessels, resemble the chorion.—*Choroides plexus*, a plexus of blood-vessels situated in the lateral ventricles of the brain.

CHOROMETRY (*Geog.*) χορομετρία, from χορος, a country, and μετρώ, to measure; the art of measuring or surveying countries.

CHORUS (*Mus.*) 1. A kind of double trumpet. 2. A plurality of voices, or an assembly of vocal performers. *Serv. in Virg.*—*Chorus cicularis*, Barleybreak, a kind of dance in which the performers, taking hands, dance round.

CHOSE (*Law*) is used with various epithets, as—*Chose local*, any thing annexed to a place, as a mill, &c.—*Chose transitory*, any thing moveable that may be taken away and carried from place to place.—*Chose in action*, an incorporeal thing, and only a right, as an annuity, &c.

CHOUAN (*Bot.*) French for a small seed of a yellowish-green colour, which grows on a low exotic plant brought from the Levant.

CHOU-DE-PALMI/STE (*Bot.*) French; the cabbage of the Palm-tree.

CHOUGH (*Orn.*) a bird like a jackdaw, but bigger, which frequents the rocks by the sea-side.

CHOULE (*Orn.*) the crop of a bird.

CHOWDER (*Med.*) an antiscorbutic used on the Newfoundland station.—*Chowder beer*, an infusion of spruce in water, from which beer is prepared in the common way.

CHOYNE (*Bot.*) an American cucurbitiferous plant, with leaves like Bay-leaves, and fruit the size of a moderate Citrul, of which the Indians make drinking-cups. *Raii Hist.*

CHRESTOS (*Med.*) χρηστός, from χρῆσται, to use; useful, good, wholesome, fit. A common epithet. *Hipp.*

CHRISM (*Ecc.*) χρίσμα, or *chrisom*; an unction or anointing of children, as soon as they are born, with some aromatic drug.—*Chrisom-cloth*, the linen, or cloth, laid on the head of a child that is newly baptized.

CHRISMA (*Ecc.*) χρίσμα, an unguent, from χρίω, to anoint. 1. Uction applied to sacred ceremonies. 2. A composition of oil and balsam consecrated by a bishop, and used in the ceremonies of baptism, confirmation, &c.

CHRISMA/LE (*Ecc.*) a chrisom cloth laid over the face of a child at baptism.

CHRISMATIS denarii (*Ecc.*) money paid by the parochial clergy to the diocesan of his suffragan for the chrisom consecrated by them about Easter for the uses of the ensuing year.

CHRISMATORY (*Ecc.*) a vessel in which the chrisom is kept.

CHRISTIAN D'OR (*Com.*) a gold coin current in Denmark for 16s. 6d. sterling. On the obverse of this coin is the head, name, and title of the reigning prince; and on the reverse, a sun and three crowns, with the legend as on the ducat current.

CHRISTIANA (*Com.*) a silver coin of Sweden, value 7d. sterling.

CHRISTIANA radix (*Bot.*) the *Astragalus Christiana* of Linnæus.

CHRISTIANITA/TIS curia (*Ecc.*) the spiritual or ecclesiastical Court, in which all ecclesiastical matters are determined.

CHRISTI manus (*Med.*) an epithet for depurated sugar boiled with rose-water, and cast into troches.

CHRISTMAS (*Ecc.*) i. e. *Christi missa*, i. e. the mass of Christ; a festival observed in the Christian church on the 25th of December, in commemoration of our Saviour's nativity.

CHRISTMAS ROSE (*Bot.*) or Black Hellebore, the *Hel-leborus niger* of Linnæus; so called from the time of its flowering and the colour of its corolla.

CHRISTOLITES (*Ecc.*) the name of some heretics in the sixth century, who maintained that Christ left both body and soul in Hell, and ascended to Heaven with his divinity only. *Johann. Damas. de Hæres.*; *Sander. de Hæres.*

CHRISTOS (*Med.*) χρίστος; applied by unction. *Castell. Lex. Med.*

CHRIST'S-THORN (*Bot.*) the *Rhamnus paliurus* of Linnæus.

CHROMA (*Mus.*) or *chromaticus melos*; a soft kind of music consisting of semitones and minor thirds. It was so called from χρώμα, *color*, either because it was marked by various colours, or, as is mostly supposed, because it was, as it were, a colour between white and black. *Aristoxen. apud Meibom. Mus. Ant.*; *Vitruv.* l. 5, c. 4; *Plut. de Mus.*; *Ptol. Harmon.*; *Macrob. in Somn. Scip.* l. 2, c. 4; *Cæd. Rhodig. Lect.* l. 9, c. 3; *Bald. Lex. Vitruv.*; *Martian. Capell.*

CHROMA (*Rhet.*) a figure of speech which consists in speaking fairly, or giving such a colouring to one's speech as at least not to offend the hearer. *Dionys. Art. Rhet.* c. 8, &c.; *Quintil.* l. 4, c. 2; *Hermog. διαίε*; *Apsin. Art. Rhet.*

CHROMATE (*Chem.*) a salt formed by the union of earthy, metallic, and alkaline bases with chromic acid, as the *chromate of lead*, the *chromate of iron*, &c. which is the *Chromium* of Linnæus. [vide *Chemistry*]

CHROMA/TIC (*Mus.*) the modern name for the chroma of the ancients, [vide *Chroma*] it serves at present to distinguish the parts of melody by successive semitonic intervals.

CHROMATICS (*Opt.*) that part of optics which explains the several properties of the colours of light and of natural bodies. [vide *Optics*]

CHROMATISMUS (*Paint.*) a natural or artificial way of communicating colour.

CHROMBUS (*Ich.*) a kind of fish mentioned by Pliny. *Nat. Hist.* l. 32, c. 11.

CHROME (*Med.*) vide *Chromium*.

CHROMIC acid (*Chem.*) a sort of acid, of an orange red colour, which is obtained by decomposing the chromate of lead by potash, and treating the chromate of potash with nitric or muriatic acid.

CHROMIS (*Ich.*) a species of *sparus*, a fish, which is said by Pliny to make its nest in the water. *Plin.* l. 32, c. 11.

CHRONOLOGY.

CHROMIUM (*Min.*) *Chrome*, a sort of *white* mineral, drawn from an ore called the *red lead* of Siberia, which is used as a paint, and derives its name from *χρῶμα*, colour, because of its property to communicate colour. Its specific gravity is about 5.90; and it contains oxide of lead and iron, and chromic acid in different proportions.

CHRONICA (*Lit.*) *Chronicles* or books, containing an account of events which pass within certain times.

CHRONIC (*Med.*) or *Chronical*, a term applied to diseases which are of long duration, but mostly without fever, in distinction from those which are *acute*.

CHRONICUS (*Ant.*) a chronicler or writer of chronicles.

CHRONOGRAM (*Gram.*) a sort of verse, in which the figurative letters being joined together, make up the year of our Lord, or any other date.

CHRONOLOGICAL (*Chron.*) an epithet for what belongs to the computations of time; as *chronological characters*, &c. [vide *Chronology*]

CHRONOLOGY, from the Greek *χρῶνος*, time, and *λόγος*, the doctrine, is the science which teaches the measure and division of times. It is either theoretical or practical. *Theoretical chronology* is chronology, properly so called, which is the subject of the present article.—*Practical chronology* is the application of this science to history, which will be considered under the head of history. [vide *History*]

Theory of Chronology.

Chronology treats, in the first place, of the nature and divisions of time; and, in the second place, of the characters by which they are distinguished.

Nature and Divisions of Time.

Time is that part of duration which is measured by the motions, or other phenomena of material objects, particularly by that of the heavenly bodies. It is either *proleptic* or *historic*. *Proleptic time* is that which is feigned to have preceded the creation, as the Julian Period, &c.—*Historic time* is that which is reckoned from the Mosaic account of the creation. The principal parts of time are the hour, day, week, month, and year.

Hours. An hour is a part of the day, mostly the twenty-fourth, and often the twelfth. It is either equal or unequal. *Equal hours* are the twenty-fourth parts of the civil day, which are so called because they are always of the same length, being neither greater or less. They are sometimes called *equinoctial*, because they divide the equator into twenty-four equal parts. The *unequal hour* is a twelfth part of the day, as distinguished from the night, which increases or decreases, together with the natural day. There are also *astronomical hours*, which are equal hours, numbered from noon, in a continued series of twenty-four. The hour is now subdivided into *minutes*, *seconds*, and *thirds*; but formerly it was subdivided into *scruples*, each of which was the one thousand and eightieth part of an hour. They were called *Chaldean*, because they were used by the Chaldeans.

Day. The day is a natural division of time, which is deduced from the apparent revolution of the sun. It is distinguished into natural, artificial, and astronomical.—The *natural day* is the space of time which intervenes between sunset and sunrise, and is distinguished from the night.—The *civil day* is that space of time in which the sun performs a complete revolution; or that space of time in which the sun goes round from any given point to the same point again. This kind of day was called by the Greeks *ἡμερησιον*; by Saero de Bosco, *artificial*.—The *astronomical day* is that space of time which is reckoned from noon to noon.

Beginning of the day. The civil day differed in different countries in respect to the point from which it was computed; being reckoned from sunset to sunset by the Jews, Greeks, and Arabians; from sunrise to sunrise by the Babylonians and modern Greeks; from noon to noon by astronomers; from midnight to midnight by the Egyptians, Romans, and the modern Europeans.

Divisions of the day. The division of the day has also varied in different countries. The ancient Hebrews divided the natural day into four proportions; namely, morning, high-day or noon, first evening, and last evening. The division of the night was into three parts, called *watches*; namely, night, midnight, and morning watches. The Romans, and after them the Jews, distinguished the day into four principal parts, which they called vigils or watches. The first began at sunrise, or six in the morning; the second at nine; the third at twelve; and the fourth at three in the afternoon. The night was in like manner divided into distinct portions, called *quarters*, the first of which began at six in the evening, the second at nine, &c. The Greeks, Romans, and Jews likewise divided the natural day into the twelve smaller portions, now known by the name of *hours*, which differed in length at the different seasons of the year, though still equal to each other. They were distinguished into first, second, &c. The first hour, especially at the equinoxes, answered to our seven, the second to our eight, the third to our nine, &c. till we come to twelve, which answered to our six in the evening, and concluded their day. The Jews had their hours of prayer distinguished by the names of the *third hour of prayer*, the *sixth hour of prayer*, &c. Each of these stated times contained the space of three hours; and each space was called by the name of that hour on which it began: thus the *third hour of prayer* was that which began at nine; the *sixth hour* that which began at twelve, &c. The civil day was divided by the Greeks, Romans, and Jews into four quarters, corresponding to the morning, noon, afternoon, and midnight, which are now in use. The first quarter with them contained the interval between sunset and midnight; the second, that between midnight and sunrise; the third, that between morning and noon; and the fourth, between noon and midnight. The Chinese and other oriental nations differ in some particulars from this division of the day and night.

Week. A week, called in the Greek *ἑβδομας*, and in Latin *Hebdomas*, or *septimana*, is a system of seven days that owes its origin to the creation of the world, which, according to the sacred historian, was performed within that space of time. The use of this division was borrowed from the Hebrews by the Egyptians, and from them transmitted to other nations generally; but the Persians, and some other Eastern nations, are said to be ignorant of this division of time; the Greeks had a division of ten days instead of seven; and the Romans appear to have had weeks of eight days. Among the Jews there were also weeks of years as well of days, as we learn from the sacred writings. The days of the week were formerly distinguished by the numbers first, second, third, &c. but afterwards they were named after the planets, as follow:—*Dies Solis*, the Sunday, or day of the Sun.—*Dies Lunæ*, Monday, or the day of the moon.—*Dies Martis*, Tuesday, or the day of Tun, the Mars of the Teutones.—*Dies Mercurii*, Wednesday, or the day of Woden, the Mercury of the Teutones.—*Dies Jovis*, Thursday, or the day of Thor, the Jupiter of the Teutones.—*Dies Veneris*, Friday, or the day of Friga, the Venus of the Teutones.—*Dies Saturni*, Saturday, or the day of Saturn. One day of the seven

has always been held sacred among all nations. Among the Jews the seventh day, or Saturday, was set apart for the commemoration of the creation, which, on that account, was called a *Sabbath*, or day of rest from labour. Among the Christians the first day has been substituted in its place, to commemorate the resurrection of our Lord; whence it has been denominated the Lord's Day.

Month. The month is a system of days, which is regulated by the motion of the moon; it being properly the time in which the moon runs through the zodiac. The month is astronomical or civil.

Astronomical month. The astronomical or natural month is that which is measured by the motions of the heavenly bodies within any given period. The astronomical month is, therefore, distinguished into lunar or solar.

Lunar month. The lunar month is either periodical, synodical, or illuminative.—The *lunar periodical month* is that space of time in which the moon goes from one point of the zodiac to the same again. This is about 27^d 7^h 43^m 8^s.—The *lunar synodical month*, also called a *lunation*, is the time between two conjunctions of the moon with the sun, or between two new moons; the quantity of which is 29^d 12^h 44^m 3^s 1^m.—The *illuminative month* is the interval between the first appearance of one new moon and that of the next which follows. As the moon appears sooner after one change than after another; the quantity of the illuminative month is not always the same. The Turks and Arabs reckon by this month, beginning from the first phasis.

Solar month. The solar month is the time in which the sun runs through one entire sign of the zodiac; the mean quantity of which is 30^d 10^h 29^m 5^{sec}, being the twelfth part of 365^d 5^h 49^m.

Civil month. The civil month is any system of days which is specified and established by the laws of society, or of any particular nation. This is either lunar or solar. The *civil lunar month* consists of 29 and 30 days alternately; the *civil solar month*, of 30 or 31 days, according to the use of which the form of the year was varied in different countries.

Jewish and Greek month. The division of the month among the Jews was into weeks, as is now in use; the Greeks divided their months into three decades or parts, consisting of ten days, called *δεκάμηροι*; the first was called *μηνας ἀρχομένης*, or *ἰσαμένης*, i. e. the decade of the beginning of the month; the second, *μηνας μεσάντης*, i. e. the decade of the middle of the month; the third was *μηνας φθίνοντος*, *πανομένης*, or *λήγοντος*, i. e. the decade of the end of the month. The first day of the first decade was termed *γεωμηνία*, because the month began with the new moon; the second, *δευτέρα ἰσαμένης*; the third, *τρίτη ἰσαμένης*, &c.: the first day of the second decade was *πρώτη μεσάντης*, or *πρώτη ἐπί δέκα*; the second, *δευτέρα μεσάντης*, or *δευτέρα ἐπί δέκα*, &c.: the first day of the third decade was *δικάτη φθίνοντος*; the second, *φθίνοντος ἐνάτη*, *φθίνοντος ὄγδοη*, and so on in a reverse order until the last, which was called *ἐνὴ καὶ νέα*, i. e. old and new, because one part of that day belonged to the old, and the other to the new month; this day was otherwise called *δημητριάς* and *τριημέρις*.

Roman month. The Roman months were divided into calends, nones, and ides, all of which were reckoned backward. The *calends* were the first day of the month; the nones fell on the seventh; and the ides on the fifteenth of March, May, July, and October; but, in all other months, the nones were on the fifth, and the ides on the thirteenth. [vide *Kalendarium*]

Year. The year is a system of months adjusted to the movements of the sun or moon. It is distinguished, as respects its commencement, into *fixed*, if its commence-

ment be fixed to any given point of time; but *erratic*, if it begin at different times; and is moreover distinguished into astronomical and civil.

Astronomical year. The astronomical year is that which is determined by astronomical observation, and is either solar or lunar.—The *solar year* is that space of time in which the sun passes through the signs of the zodiac; this is divided into the tropical or natural, and the sidereal or astral, year. The *tropical year* is that space of time in which the sun goes from any cardinal point and returns to the same again. This, which is the true solar or natural year, contains 365^d 5^h 48^m 48^{sec}. The *sidereal year* is the space of time the sun takes in passing from any fixed star till his return to it again. This consists of 365^d 6^h 9^m 17^{sec}, being 20^m 29^{sec} longer than the true solar year.—The *lunar year* is the space of 12 lunar months, which may be either periodical or synodical.

Civil year. The civil year is that which has been adopted for civil purposes, and which, by setting aside the odd hours and minutes, is supposed to consist of an even number of days; hence the distinction of the solar year into *common*, consisting of 365 days, and *bissextile* or leap-year, which consists of 366 days, by the addition of a day every fourth year. The *civil lunar year* is also *common*, which consists of 12 months, and *embolismic* or *intercalary*, which consists of 13 months.

Forms of the civil year. The forms of the civil year have been very different in different countries. The most important of these forms are as follow; namely—

Roman year. The year of the ancient Romans was lunar, and consisted of 10 months, according to the institution of Romulus, in the following order:

Months.	Days.	Months.	Days.
Martius.....	31	Sextilis.....	30
Aprilis.....	30	September.....	30
Maius.....	31	October.....	31
Junius.....	30	November.....	30
Quintilis.....	31	December.....	30

By the reformation of Numa Pompilius, two months were added to the year, which consisted of the following months and days:

Months.	Days.	Months.	Days.
Januarius.....	29	Quintilis.....	31
Februarius.....	28	Sextilis.....	29
Martius.....	31	September.....	29
Aprilis.....	29	October.....	31
Maius.....	31	November.....	29
Junius.....	29	December.....	29

making in the whole 355 days, which exceeded the civil lunar year by one whole day, and the natural lunar year by 15^h 11^m 21^s 48^m. This year has undergone a still further reformation by Julius Cæsar, and in later times by pope Gregory XIII. which has given rise to the Julian and Gregorian years.

Julian year. The Julian year is a solar year, consisting of 365 days if it be the common year, and 366 if it be bissextile or leap year. The order of the months and number of days in each month are as follow:

Old Roman Months.	Julian Months.	Modern Months.	Days.
Januarius.....	Januarius....	January.....	31
Februarius.....	Februarius...	February.....	28
Martius.....	Martius.....	March.....	31
Aprilis.....	Aprilis.....	April.....	30
Maius.....	Maius.....	May.....	31
Junius.....	Junius.....	June.....	30
Quintilis.....	Julius.....	July.....	31
Sextilis.....	Augustus....	August.....	31

CHRONOLOGY.

<i>Ethiopian. M.</i>	<i>Coptic.</i>	<i>Armenian.</i>	<i>Roman.</i>
Lene	Boua or Baune	Marieri	May
Hamlt	Abib or Abii	Maryats	June
Nahase	Massari	Huetits	July

The intercalation was made in the Egyptian, Coptic, and Ethiopic or Abyssinian years, on the 24th of August in common, and on the 25th in bissextile years. The Armenians added five days to the 5th or 6th of August. The beginning of these years was fixed to the 29th of August.

Syrian year. The Syrian was a solar year, which had a fixed beginning on the beginning of October in the Julian year. The months and days of this year are as follow :

<i>Syrian M.</i>	<i>D.</i>	<i>Rom. M.</i>	<i>Syrian M.</i>	<i>D.</i>	<i>Rom. M.</i>
Tisri I.	31	October	Nisan	30	April
Tisri II.	30	November	Icar	31	May
Canun I.	31	December	Haziran	30	June
Canun II.	31	January	Tamus	31	July
Sabat	28	February	Ab	31	August
Adar	31	March	Elul	30	September

Persian year. The Persian year is a solar year, consisting of 12 months, of 30 days each, with five intercalary days, called *Musteraca*, which were added to the month *Aben*. The following are the names and order of the months to which the *Meh* is added, signifying month.

<i>Pers. M.</i>	<i>Rom. M.</i>	<i>Pers. M.</i>	<i>Rom. M.</i>
Afruden meh	September	Mehar meh	March
Ardchascht meh	October	Aben meh	April
Cardi meh	November	Adar meh	May
Thir meh	December	Di meh	June
Merded meh	January	Behen meh	July
Schaharir meh	February	Affirar meh	August

This year, which is erratic, like the Egyptian Nabonassarean, is also called the *Yesdegerdic year*, to distinguish it from the fixed solar year, called the *Gelalean year*, which the Persians began to use in 1079, and which was formed by an intercalation made six or seven times in four years, and then every fifth year. The *Gelalean year* keeps the solstices and equinoxes to the same day, and is adjusted with considerable accuracy to the motions of the sun, it being in fact a tropical year, which consists of 365 d. 4 h. 49' 15" 0" 48". The vernal equinox is fixed to the 14th of March in this year.

Grecian year. The Grecian year is Attic, Macedonian, Syro-Macedonian, Paphian, and Bithynian.

Attic year. The Attic year was a fixed lunar year, which was either common or embolismic.—*The Common Attic year* consists of 12 months of 30 and 29 days alternately, making in all 354. The months of 30 days were called *πληρεις*, full, and also *δεκαφθνοί*, as ending upon the tenth day; they always preceded those of 29 days, which were called *κόλοι*, hollow; and from their concluding on the ninth day, *εναφθνοί*. The following is the order and names of the months in the Attic year :

<i>Attic Months.</i>	<i>Days.</i>	<i>Roman Months.</i>
Εκατομβαιών	30	June and July
Μεταγειτηνών	59	July and August
Βοηδρομιών	88	August and September
Μαιμακτηριών	118	September and October
Πυανεψιών	147	October and November
Ποσειδεών	177	November and December
Γαμηλιών	206	December and January
Ανθεστηριών	236	January and February
Ελαφηβολιών	265	February and March
Μενυχιών	295	March and April
Θαργηλιών	324	April and May
Χειρροφοριών	354	May and June.

Before the time of Solon the year consisted of 12 months, of 30 days each.—*The embolismic Attic year* consisted of 13 months, which was formed by the repetition of the month *Posideon*. These years fell on the 3d, 5th, 8th, 11th, 14th, 16th, and 19th of a cycle of 19 years.

The beginning of the Attic month is computed from that new moon, the full moon of which immediately followed the summer solstice. The ancient Greeks supposed that the summer solstice fell on the 8th of July, but it was afterwards brought back to the 27th of June.

Macedonian year. The Macedonian year was either lunar or solar. The lunar was the same in form as the Attic year, and the solar year as the Julian year.

These two kinds of years agreed with each other in the names of their months, but differed in their order. The first month, *Δίος*, of the lunar Macedonian year answered to the *Maimacterion* of the Attic year, and its commencement was dated from the autumnal equinox. The names and order of the months are as follow :

<i>Mac. Months.</i>	<i>Attic Months.</i>	<i>Roman Months.</i>
Δίος	Maimacterion	September & October
Απελλαῖος	Pyanepsion	October & November
Αυδωναῖος	Posideon	November & December
Περίτιος	Gamelion	December & January
Δυσρος	Anthesterion	January & February
Ξανθικός	Elaphebolion	February & March
Αρτεμισίος	Munychion	March & April
Δαισίος	Thargelion	April & May
Πανέμος	Scirrhophorion	May & June
Λῶος	Hecatombæon	June & July
Γορπαιῖος	Metageitnion	July & August
Υπερβερεταῖος	Boedromion	August & September.

Macedonian Solar Months. Roman Months.

Αυδωναῖος	January
Περίτιος	February
Δυσρος	March
Ξανθικός	April
Αρτεμισίος	May
Δαισίος	June
Πανέμος	July
Λῶος	August
Γορπαιῖος	September
Υπερβερεταῖος	October
Δίος	November
Απελλαῖος	December.

Syro-Macedonian year, &c. The Syro-Macedonian, Paphian, and Bithynian years differed from the Macedonian solar year only in the names of the months, which are given in the following table, together with the time of their commencement in the Julian year.

<i>Syro-Mac. Months.</i>	<i>Paphian Months.</i>	<i>Byth. Months.</i>	<i>Time of commencement.</i>
Υπερβερεταῖος	Ἄφροδισίος	Ἦρος	Sept. 24.
Δίος	Ἀπογοιῖος	Ἡρμῖος	Oct. 24.
Απελλαῖος	Αἰνῖος	Μητρῶος	Nov. 23.
Αυδωναῖος	Ἰἔλος	Διονυσῖος	Dec. 24.
Περίτιος	Κισάρμιος	Ἡράκλειος	Jan. 23.
Δυσρος	Σεβασῖος	Δίος	Febr. 22.
Ξανθικός	Αυτοκρατορικός	Βενιδάσιος	Mar. 25.
Αρτεμισίος	Δημοαρχεῖος	Στρατήγιος	April 25.
Δαισίος	Πληθύτατος	Ἀρείος	May 25.
Πανέμος	Ἀρχιερεύς	Περειπίος	June 25.
Λῶος	Εσθῖος	Ἰφροδῖος	July 25.
Γορπαιῖος	Γαμμαῖος	Διμήτριος	Aug. 25.

Arabian year. The civil year of the Arabians and Turks is lunar, and consists of 12 lunar months of alternately 30 and 29 days, i. e. 354 d. 8 h. 48'. Their civil year

CHRONOLOGY.

consists of 354 days for the common, and 355 for the intercalary, when a day is added to the end of the year. Hence the Arabian year is erratic, and its beginning passes through every day of the Julian year during a period of 30 years, when it returns to the same day. In this period there are 19 common and 11 intercalary years; namely, the 2d, 5th, 7th, 10th, 13th, 15th, 18th, 21st, 24th, 26th, 29th. These eleven days are formed by multiplying 8^h 48', the difference between the lunar and the civil years, by 30 the length of the period, at the conclusion of which the lunar and civil years of the Arabians are made to agree.

The following table exhibits the names and order of the months in the Arabian and Turkish year, together with the days in the Julian year, to which they answered in the first year of the *Hegira*, and the *feriæ* or days on which they commence.

Arabic Months.	Turkish Months.	Days.		Julian Months.	Feria.
		Single.	Collect-ed.		
1. Muharram	Muharram	30	30	Jul. 16	6
2. Suphar	Sefer	29	59	Aug. 15	1
3. Rabie I.	Rabiul-eueel	30	89	Sept. 13	2
4. Rabie II.	Rabiul-achir	29	118	Oct. 13	4
5. Giumadi I.	Gimaasileueel	30	148	Nov. 11	5
6. Giumadi II.	Gimaasilachir	29	177	Dec. 11	7
7. Regiab	Regeb	30	207	Jan. 9	1
8. Sahaben	Sahaaban	29	236	Feb. 8	3
9. Ramadhan	Ramazan	30	266	Mar. 9	4
10. Schevval	Schevrail	29	295	Ap. 8	6
11. Dulkaiadath	Zilkaade	30	325	May 7	7
12. Dulkagiadath	Zilkigge	29	354	Jun. 5	1
Intercalary	Intercalary	30	355		

These months are composed of weeks, each day of which begins in the evening after sun-set. Our Sunday is the first *feria*, and Saturday the seventh of the Arabic week.

Chronological Characters.

Chronological characters are the marks by which different portions or periods of time are distinguished from each other. These are either natural, artificial, or historical. — *Natural characters* are such as depend on the motions of the celestial bodies, such as eclipses, or the equinoxes, solstices, &c. — *Artificial characters* are such as have been framed for the civil purposes of human life, which are denominated cycles, or periods. — *Historical characters* are any historical facts, or circumstances resting on historical testimony, from which chronological computations may be made. These are denominated æras or epochs.

Cycles and periods. A cycle is a series of years which, being numbered in an orderly manner from first to last, return to the same point of reckoning from which they commenced. The period differs from the cycle only by comprehending a larger space of time, or a greater number of years. The principal cycles or periods invented by the ancients are as follow: — *The cycle of Cleostratus*, or the cycle framed by him 532 years before Christ, and consisting of eight years, or 2922 days, during the course of which, 96 lunations would elapse of 29 and 30 days alternately, together with three intercalary months. By this cycle he proposed to adjust the lunar year to the solar, so that at the conclusion of each cycle the moon should be renewed; but it failed in its object, for at the end of 16 years there was found to be an error of three days, which in the space of 160 years would amount to more than a whole month. — *The Metonic cycle*, a cycle so called from Meton, by whom it

was invented at the commencement of the Peloponnesian war, consisted of 19 solar years, which were nearly equal to 19 lunar years, at the end of which the sun and moon are in the same quarter of the heavens. This cycle, though more accurate than the preceding, is still erroneous, and fails to the amount of eight or ten hours at the end of one period, and of three days in 133 years. It was, however, held in such high esteem by the Grecian states, that they gave it the name of the *golden number*, which is now transferred to the number of each year throughout the lunar cycle. — *The cycle of Eudoxus* was intended, according to Scaliger, to correct that of Cleostratus, by subtracting a month of 30 days from a period of 160 years, which was supposed to be equal to the difference that would subsist at the expiration of that period between the lunar and solar motions. — *The Calippic period* was a period contrived by Calippus at the new moon of the summer, B. C. 331, and was intended as an improvement on the cycle of Meton, which it multiplied by 4, so as to make a period of 76 years, or 27,759 days. As 940 lunations are equal to 97,758^d 9^h 5' 9", which is only 40' 29" 57" less than 76 solar tropical years, it follows that the lunar motion, according to this calculation, did not vary more than 14^h 13' 22", wherefore this period has been chosen to form the basis of the more modern cycle of the moon. — *The cycle of Hipparchus* is a series or cycle of 304 years, obtained by the multiplication of the Calippic period by 4, at the end of which he rejected a whole day, with the view of restoring the new and full moons to the same day of the solar. But he did not succeed completely in his object, for as the quantity of this period is equal to 111,033^d 16^h 16', and 3760 lunations, at 29^d 12^h 44' 3" 11" each, are equal to 111,035^d 0^h 39' 29" 20", it follows that the new and full moons are anticipated at the expiration of this period by 1^d 8^h 23' 29" 20", and consequently not brought to the same day of the solar year. The cycles and periods which have been subsequently invented are as follow; namely — *The solar cycle*, a series of 28 years, at the completion of which the same order of bissextiles and dominical letters return. *The dominical*, or *Sunday letter*, is that letter which marks the Sunday throughout the year; for as the first seven letters of the alphabet have been chosen to distinguish the seven days of the week, it follows that whichever of these letters stands opposite to the first Sunday in the year, the same letter will of course fall throughout the whole year. But the Sunday letter is changed once every common year, and twice in every leap year; the reason for which is, that the common year does not consist of an exact number of weeks, but of 52 weeks and one day; so that if it begin with A set before New-year's day, it ends with A set before the last day; and the year beginning again at A, there will then be two A's falling together, namely, on Dec. 31, and Jan. 1: and if the former of them happen to be Sunday, the other in course must stand for Monday; and then reckoning onward, Sunday must fall upon G, and consequently G will be the dominical letter for the ensuing year. Thus the odd day shifts back the dominical letter every year by one letter; and this revolution would be completed in seven years, were there not the intervention of bissextile, or leap-year, when the dominical letter is again shifted by the addition of another day in February. In order, therefore, to come at a clear account of these changes, the cycle called *the cycle of the sun* was contrived, which should comprehend all the variations of the Sunday letter. By whom this cycle was invented is not known; but it came into use in the early ages of Christianity, to supply the place of the Roman

CHRONOLOGY.

Nundinæ, and it dated its commencement 9 years before the Christian æra. The following table exhibits the changes of the dominical letter for one solar cycle in Julian years, beginning with a leap-year.

1. G F	5. B A	9. D C	13. F E	17. A G	21. C B	25. E D
2. E	6. G	10. B	14. D	18. F	22. A	26. C
3. D	7. F	11. A	15. C	19. E	23. G	27. B
4. C	8. E	12. G	16. B	20. D	24. F	28. A

In order to find the solar cycle and the dominical letter for any given year of the Christian Æra add 9, the date of its commencement before the birth of our Saviour to the given year, and divide the sum by 28, the remainder is the solar cycle; and if there be no remainder, then 28 is the cycle itself. When the year of the cycle is found, the dominical letter opposite to it may be easily found in the foregoing table; suppose it be required to find the solar cycle in Julian years for the year 1715, then $1715 + 9 = 1724 \div 28 = 61$, and the remainder 16, which is the year of the solar cycle; and to which the dominical letter, B, in the foregoing table, answers. If there be two letters opposite to the cycle that is found, then the year is bissextile, or leap-year; thus, in the foregoing table, the double letters, G F, B A, D C, &c. opposite to the numbers 1, 5, 9, &c. denote the bissextiles, or leap-years. But, as this cycle is not perpetual, when computed in Gregorian years, it is necessary, in order to find the dominical letter in the Gregorian year, first to get that which answers to the Julian year in the solar cycle, and then counting three letters backwards you come at the dominical letter in the Gregorian year; thus, suppose the cycle of the sun in 1582, the year of the Gregorian reformation to be 23, and the dominical letter to be G, then counting three letters backward this becomes C; if then C be substituted in the Julian calendar for G, the rest of the letters will follow in a corresponding order. In this manner the dominical letters are regulated, in the Gregorian year, from 1582 to 1700; but as the three centesimal years are, according to this calculation, common, which, in the Julian years, would be bissextile, the same dominical letter runs through all these years, which, in the other case, would be double; whence the change of the cycle for a new century is made in the same manner as if it were a common year; thus, suppose the solar cycle for the year 1700 to be 1, the dominical letter would have been double; namely, B C, had the year been bissextile, but, this being passed over, the letter C runs through the whole year; and, in the second year, B is the dominical letter: on this principle the following perpetual table, for the dominical letters in Gregorian years, is constructed, which exhibits in seven orders all the variations which the series undergoes:

Solar cycle.	Order 1.	Order 2.	Order 3.	Order 4.	Order 5.	Order 6.	Order 7.
1	b, c	c, d	d, e	e, f	f, g	g, a	a, b

	2500	2600	2700	2900	3000	3100	3300
			2800			3200	

In this manner the dominical letter, in Gregorian years, may be found for any year of the Christian æra, and no other order can occur; for, in the year 2500, the letters C and B would be the dominical letters according to the seventh order in the seventeenth year of the solar cycle; but as the leap-year is omitted in this century, the letter C runs through the whole year, and the letter B answers to the eighteenth year of the cycle in this century, which brings the letters back to the first order. *Lunar cycle*, or *cycle of the moon*, is a series of nineteen years, at the completion of which the new and full moons are restored to the same day of the Julian year; but as nineteen years exceed 235 lunations by $1^h 27' 31'' 55''$, it follows, that the new and full moons are not restored exactly to the same point of time; and that in 312 years the error will amount to one whole day. This cycle, which is more accurate than that of Meton, after which it has been constructed, is said to have commenced one year before the Christian year: if, therefore, we add 1 to any given year, and divide by 19, the quotient will give the cycle, and the remainder the golden number, or the number of years which have elapsed in a new cycle: thus, suppose it be required to find the golden number for the year 1822, then $1822 + 1 = 1823 \div 19 = 95$, the cycle, and 18 the remainder, which is the golden number.

Epact. An epact is the excess of any solar revolution above the lunar. The epacts are either menstrual, or annual.—The *menstrual epact* is the excess of the civil month above the lunar month: thus, suppose the New Moon to fall on the first of January, since the lunar month is $29^d 12^h 44' 3''$, and January is 31 days, the menstrual epact is $1^d 11^h 15' 37''$.—The *annual epact* is the excess of the solar year above the lunar year, for since the Julian year is $365^d 6^h$, and the lunar year is $354^d 8^h 48' 38''$, the annual epact is $10^d 21^h 11' 22''$, i. e. of 11 days; consequently, the epact of two years is 22 days, and of three years 33, or rather of 3, because 30 days complete the embolismic

CHRONOLOGY.

month: on this principle the following table is constructed, which shows the order of the epacts within a lunar cycle.

Order of years.	Epacts.	Order of years.	Epacts.
1.....	XI	11.....	I
2.....	XXII	12.....	XII
3.....	III	13.....	XXIII
4.....	XIV	14.....	IV
5.....	XXV	15.....	XV
6.....	VI	16.....	XXVI
7.....	XVII	17.....	VII
8.....	XXVIII	18.....	XVIII
9.....	IX	19.....	XXIX
10.....	XX		

Since, in the nineteenth year, the epact is xxx, or 0, in the twentieth year the epact will be xi; therefore the cycle of civil epacts is completed with the revolution of the lunar cycle, and returns to the point from which the reckoning commenced. Therefore, to find the epact in a Julian year, multiply the lunar cycle by 11, and if the number be less than 30 it is an epact; but if greater, divide it by 30, and the remainder is the epact. Then the epact for the Gregorian year is easily to be found from the Julian year; for, if the Julian epact exceed 10, then subtract that number from it; but if less, add 30 to it, and subtract 10 from the sum. This rule holds good to the year 1700; but, from that year to the year 1900, 11 must be subtracted from the Julian year, and so

on in succeeding centuries in an increasing ratio, as may be seen in the table of the equations of epacts which is given hereafter. The order of the epacts, as established in the Nicene Council, proceeded on the supposition that the lunar months consist of 29 and 30 days, and the civil year of 365 days, with a bissextile every fourth year; but this order is subject to irregularity from a twofold cause. In the space of nineteen years, or a complete lunar cycle, the excess of the Julian above that of the lunar year is reckoned to be 209 days, which is equal to six months at 30 days each, and one month at 29. To adjust, therefore, the motions of the sun and moon, at this period, exactly to each other, the last epact in the cycle, i. e. in the nineteenth year, must be reckoned as 12 instead of 11. In the next place, as the decemnovary cycle anticipates the New Moons one day in 312, this causes a diminution in the epact at the end of that period; and on the other hand, as the suppression of three bissextiles in the space of 400 years, according to the Gregorian computation, throws the new moons a day later, this causes an increase to the epact at the expiration of this period. For these reasons, therefore, the cycle of epacts varies in different centuries, and in order to obtain a full and correct account of the manner in which they correspond with the New Moons, it is necessary to give a series of epacts in thirty different classes, as exhibited in the following table:

TABLE OF THE EPACTS.

CHRONOLOGY.

The Golden Numbers, in the upper horizontal line, are made to commence with 3, because this was the Golden Number at the time of the Nicene Council, when the calendar was regulated. The lines which succeed are marked with the letters of the alphabet in retrograde order. The series marked P are the epacts of the sixth century, which, beginning with a or *, follow in uninterrupted succession, except with the addition of one day, when the Golden Number is 1, or when it passes from 19 to 1, because the last lunation, consisting of only 29 days, causes the New Moons to advance one day, as before observed. This rule of increase is therefore observed down the whole of the same column through the series of letters from N to a. As a further illustration of this subject, the following Table of the Equation of Epacts is added, to show to what centuries each of these cycles of epacts belong.

	A. D.		A. D.	Days omitted.

Suppose you wish to know the cycle of epacts for the year 320, you observe P to be the letter opposite to it in the above table, which, if found in the first table, gives the cycle of epacts *, 11, 22, 3, 14, 25, 6, 17, 28, 9, 20, 1, 12, 23, 4, 15, 26, 8, 19; if you look to the year 800 the letter a is opposite to it, and the corresponding letter in the first table gives the epacts 1, 12, 23, 4, 15, 26, 7, 18, &c. which are increased by one day owing to the lunar equation. In 1100, which is marked by the letter b, the cycle runs 2, 13, &c. because the moon anticipates in the same proportion as before. The year 1582, which is the year of the Gregorian correction, or the New Style, is marked D, and the cycle of epacts opposite to the same letter will be found to have gone backward ten days from the preceding century 1400, in order to adjust them to the correction of the calendar by the suppression of ten days. In the same manner the epacts for the year 1700, marked C, may be found to be 22, 3, 14, &c. and so on with any other succeeding years.

Use of the Epacts. The use of the epacts is to find the age of the moon, but particularly of the full moon, for the purpose of ascertaining the right time of celebrating the festival of Easter; of which more will be said when speaking of the calendar at the end of this article.

Cycle of Indiction. The cycle of Indiction is a series of fifteen years, which was introduced in the reign of Constantine, A. D. 312, and was used instead of the Olympiads for the purpose of keeping accounts, particularly such as related to the tributes, although but little is

known respecting the introduction of this cycle, or the particular purpose for which it was introduced. It was of two kinds, Roman and Grecian. The Grecian Indictions commenced on the first of September, and were employed in the acts of councils, and the *novellio* of the emperors. The Roman Indictions, which commence on the first of January, are still used by the popes in signing their bulls and public acts. To find the cycle of the indiction add 3 to the year of the Christian æra, and divide by 15; the remainder, if there be any, will give the cycle of the year of indiction; but if there be no remainder, then 15 is the cycle itself. In this manner the year of indiction for 1822 is found to be 10.

Dionysian period. The Dionysian period, so called from Dionysius Exiguus, a Roman abbot, by whom it was contrived, was a series of 532 years, formed by multiplying the solar cycle 28 into the lunar 19, for the purpose of restoring the new and full moons to the same day; but it falls short in the computation by 1^d 16^h 58' 59" 40". For the Dionysian period consists of 194,313 days, but 6580 lunations make only 194,311^d 7^h 58' 6" 20", leaving an excess in this period of 1^d 16^h &c. as before observed.

Julian period. The Julian period, invented by Scaliger, and so called because it is adapted to the Julian year, is a series of years formed by the multiplication of the solar and lunar cycles, and the cycle of indiction into one another, making the sum of 7980 Julian years. To find, in any given year of the Julian period, the cycles of the sun, moon, and indiction, divide by 19, by 28, and by 15; what remains in the first division is the cycle of the moon; what remains in the second is the cycle of the sun; and what remains in the third is the cycle of indiction. Let the given year be 2895, it is required to find the cycle of the moon, sun, and indiction; then, from the division of 2895 by 19, is left 7 the remainder, which is the cycle of the moon; from that of 2895 by 28 is left 11, the cycle of the sun; and from the division of 2895 by 15 is left 15, the cycle of indiction. On the other hand, the cycles being given to find the Julian period, multiply the cycle of the moon into 4200, that of the sun into 4845, and that of indiction into 6916, then the sum of all these products, divided by 7980, gives the Julian period: thus, suppose 7 the cycle of the moon, 11 that of the sun, and 15 that of indiction, then $4200 \times 7 = 29400$; $4845 \times 11 = 53295$; $6916 \times 15 = 103740$; and $29400 + 53295 + 103740 = 186435 \div 7980 = 23$, and a remainder 2895, which is the Julian period.

Historical characters. The historical characters are epochas, or æras, which are sometimes distinguished from each other, by supposing the epocha to be the head or beginning of any past time, and æra the series, or continuation of years, reckoned from some fixed point, and numbered onwards to an indefinite period. *Epocha* is, in fact, the Greek term for the point of time from which any reckoning commences, and is still applied to the accounts of years kept by particular cities of Greece, and marked on their medals. [vide *Epocha*] *Æra*, which is a term of later invention, is now generally applied to all historical accounts of time that run on in a continued series. These are all at present reducible in our chronological computations to the vulgar æra.—The *vulgar æra* is the computation made by Dionysius Exiguus from our Saviour's nativity, which is called *vulgar*, because it has been vulgarly, or commonly, adopted, since its introduction, in all Christian accounts of time, although it has been supposed by different writers to vary from the true time of our Saviour's birth by two, three, four, five, and even more years. To find the

CHRONOLOGY.

year of the Julian period that corresponds to the first year of Christ's birth, get the cycle of the sun, the moon, and the indiction, and then proceed as stated under the head of the Julian period; thus, the cycle of the sun for the first year of Christ's nativity being 10, that of the moon 2, and that of the indiction 4, the Julian period for that year will be found to be 4714. Any succeeding year of the Julian period may be found by adding 4713 to the given year of the vulgar æra: thus, if to the present year, 1822, be added 4713, the sum of 6535 will be the Julian period; and, on the other hand, by subtracting 4713 from any given year of the Julian period, you may get the year of the vulgar æra: thus, if from 6396, the year of the Julian period, you subtract 4713, it leaves 1683, the year of the vulgar æra. The most important æras in history, before the vulgar æra, are the æra of the Creation, of the Olympiads, and of the building of Rome, and of Nabonassar; after the vulgar æra is that of the Hegira. There are others of less importance, of which an account will be found under the head of *Æra*. [vide *Æra*]

Æra of the Creation. Riccioli reckons up no less than seventy different computations which have been given of this æra, of which the principal that are used in chronological computations are as follow, namely,—*The historical æra of the Greeks* which is dated from the 787th year before the Julian period; consequently, by the addition of 787 to any given year of the Julian period, the year of this æra may be obtained; and, on the other hand, by subtracting 787 from any year of this æra, the year of the Julian period may be obtained: hence, by the addition of 787 to 4714, the year of the Julian period corresponding with the birth of our Saviour, 5500, is obtained, the year of this æra, which corresponds with the first year of the vulgar æra. In like manner any years of this æra may be reduced to the years of the vulgar æra, and *vice versa*: thus, if from 7215, a given year of this æra, 5500 be subtracted, the remainder, 1715, will be the year of Christ; and if to the year 1715, 5500, the sum 7215 is the year of this æra.—*The ecclesiastical æra of the Greeks* was dated 780 years before the Julian period, and consequently, by the addition of 4714 years, was 5494 years before the vulgar æra; this was otherwise called the Alexandrine æra, and was first employed by Panodorus, an Egyptian monk, in calculating the Easter and other ecclesiastical matters. To reduce the years of this æra to those of the vulgar æra, add or subtract 5493: thus, if 5493 be added to 1822, it gives 7315, the year of the ecclesiastical æra; and if from 7208 be subtracted 5493, it leaves 1715, the year of the vulgar æra. To reduce, therefore, the years of this æra to those of the vulgar æra, and *vice versa*, add or subtract 5508: thus, if to the present year, 1822, be added 5508, it will give 7330, the year of this æra; and if from 7223, the given year of this æra, be taken 5508, it will leave 1715, the year of the vulgar æra.—*The civil æra of the Greeks*, which was used by the Emperors of the East in their public acts, and has since been used by the Russians, is dated 795 years before the Julian period, and 5509 years before the vulgar æra.—*The Jewish æra* of the world is the 953d year of the Julian period; and by subtracting 953 from 4714 leaves 3762, the number of years since the Creation to the vulgar æra; according to this mode of computation, which is still used by the Jews of the present day. To find, therefore, any year of the Jewish æra in a given year of the Julian period, subtract 952, and the number is the year required, which begins in autumn: thus, if from 6535, the present year of the Julian period, 952 be subtracted, 5583 remains, the year of the Jewish æra. Also, to re-

duce the years of this æra to those of the vulgar æra, and *vice versa*, add or subtract 3761: thus, 1822 + 3761 = 5583, the present year of the Jewish æra, and 5583 — 3761 = 1822, the present year of the vulgar æra.—*The Eusebian æra of the Creation* is the 486th year before the Julian period; to which, if 4714 be added, it will give 5200, the years of the Creation before the vulgar æra. If, therefore, the years of the world in the Eusebian chronicle, be less than 5200, subtract them from 5200, and the remainder will be the years before Christ; but if they exceed that number, subtract 5199 from them, and the remainder will be the years after Christ: thus, suppose 5158 of the Eusebian æra be subtracted from 5200, it will leave 42, the year before Christ; but if 5199 be subtracted from 5223, the year of the Eusebian, it will leave 29, the year after Christ. The knowledge of this æra is of use in reading the *Chronicon* of Eusebius and the *Roman Martyrology*. According to Scaliger, the world was created in the 764th year of the Julian period, and consequently 3949 years before Christ; but Usher dates the Creation from the 710th year of the Julian period, and 4004 before the vulgar æra; which computation is the most generally admitted among modern chronologers.

Æra of the Olympiads. The Olympiads are series of four years, each of which dates its commencement from the New Moon of the 3938th year of the Julian period, which was nearest to the summer solstice; and consequently 776 years before the vulgar æra. As the first year of this latter æra corresponds to the 194th Olympiad, all the years of any Olympiad which is less than 194 correspond to years before Christ; and all those of any Olympiad above the 194th are years after Christ. To reduce years of the Olympiads to those of the vulgar æra, take 1 from the given olympiads that you may have complete olympiads, multiply the remainder by 4, and to the product add the single years that are over and above the olympiads; then, if the whole sum be less than 776, subtract it from 776; but if it be less than it, or equal to it, then subtract 775 completed olympiads from it, and the remainder will be the year after Christ. Thus, let the first year of the 114th Olympiad be given to find the year before the vulgar æra, $114 - 1 \times 4 = 452$; then, $776 - 452 = 324$, the year before Christ. Let the fourth year of the 113th Olympiad be given to find the year before Christ, $113 - 1 \times 4 = 448$, to which, if 3 be added for the single years of the Olympiad, the whole sum is 451; then $776 - 451 = 325$, the year before Christ. Let the first year of the 195th Olympiad be given to find the year after Christ, then $195 - 1 \times 4 = 776$, and $776 - 775 = 1$, the first year of the vulgar æra. Let the fourth year of the 202d Olympiad be given to find the year after Christ, then $202 - 1 \times 4 = 804$, + 3 = 807, — 775 = 32, the year after the vulgar æra. On the other hand, to reduce the years before and after the vulgar æra to the years of the Olympiads, let the year before Christ be subtracted from 776, and let 775 be added to the year after, divide the remainder or sum by 4, and that number increased by unity will give the Olympiad required. If there be any remainder, it will be the year of the Olympiad reckoned from the first year. Thus, let it be required to find the year of the Olympiad corresponding to 578 before Christ, then $776 - 578 + 1 \div 4 = 50$, the Olympiad, and a remainder 2, the third year of the Olympiad.

Æra of the building of Rome. The exact date of this æra is not to be ascertained with any degree of precision, as the chronology of the ancient Romans was very imperfectly preserved. According to the different computations of the Roman writers, the building of the city is

CHRONOLOGY.

said to have taken place at different periods between the 23d and 48th Olympiads; and, by modern chronologers, the earliest period, which is the computation of Varro, has been most generally adopted. The year of building the city, therefore, coincides with the 3,961st of the Julian period, the 23d Olympiad, and 753d the year before Christ. To reduce the years of this æra to those of the Julian period, and *vice versa*, add or subtract 753. If the number of years be less than 753, they must be subtracted from 753; if greater, they must be added, to obtain the year before Christ. On the other hand, if 753 be added to the year after Christ, it will give the year of the æra of the city.

Æra of Nabonassar. The æra of Nabonassar, which derives its name from Nabonassar, first King of Babylon, is dated from the 26th of February, of the year 3967 of the Julian, 747 years before Christ. The solar cycle was 19, the lunar 15, and the cycle of indiction 7. To reduce the years of this æra to those of the Julian period, add 3966, if the Nabonassarean does not exceed 227; 3965, if it do not exceed 1688; and 3964, if it be between 1688 and 3149: thus, the 139th year of the Nabonassarean æra begins in the year 4105 of the Julian period; and in like manner the 355th, of the Nabonassarean æra begins in the year 4320 of the Julian period. These rules depend on the nature of the Nabonassarean year, of which mention has already been made. Since the beginning of the Nabonassarean year recedes one day in four years, in the space of 228 years it is anticipated 68 days; but as between the 1st of January and the 26th of February, the day on which the Nabonassarean year commences, there are only 56 days, the beginning of this year does not go back further than from February to December, as long as the Nabonassarean year does not exceed 227; consequently, in this case, 3966 years are to be added, in order to obtain the year of the Julian æra. But since, in the space of 1460 years, the beginning of the Nabonassarean year runs through all the days of the Julian year, and the sum of 1461 and 227 is 1688, and that of 1688 and 1461 is 3149, the reason for the addition of 3965 and 3964 is evident.

To find, therefore, the day on which the Nabonassarean year commences, divide by 4, and subtract the remainder from 57, if the number be less than 57; otherwise from 422; the remainder - 1, will be the day required, if reckoned from the 1st of January: thus, if it be required to find on what day of the Julian year the Thoth of the Nabonassarean year, 230, falls, divide 230 by 4, and the quotient will be 57, which, if subtracted from 422, leaves a remainder of 365; then $365 - 1 = 364$, or the 364th day of the Julian year, i. e. the 30th day of December.

To find the day of any month in the Julian year, which answers to the given day and month in the Nabonassarean year: first let the day of the Julian year, on which the 1st of Thoth commences be found, then because all the months of the Nabonassarean years are 30 days each, let the number of complete months be multiplied by 30, and let the days, if there be any other, be added to the product; lastly, let the days of the Julian year, to the beginning of the complete Nabonassarean year, be added to the number already found; subtract 1 from the sum, and the remainder, if less than 365 in the common year, and 366 in the leap-year, will be the day sought; but, if it exceed either of these numbers, it must be subtracted from them, and the remainder is the day required: thus, what day of the Julian year answers to the 7th of Tibi of the Nabonas-

sarean year 355, then 30, the number of days in the month, multiplied by 4, the number of months from Thoth, $+ 7 = 127$, the collective number of days in the Nabonassarean year, to which, if 334, the number of days in the Julian year, be added, the remainder, - 1, is 460, and $460 - 365 = 95$ days, or the fifth of April. To convert any year of the Nabonassarean year to a year of the Vulgar æra. If the Nabonassarean year be less than 747, let 2 be taken from it, and the remainder subtracted from 747, which will give the year before Christ; but if it exceed 747, but be less than 1688, one only must be subtracted, and 747 be taken from the remainder; if the year exceed 1688, but be less than 3149, let 2 be subtracted from it, and 747 be taken from the remainder: thus, the 554th year of the Nabonassarean æra is found to coincide with the 195th before Christ, and the 859th of the Nabonassarean æra, with the 113th after Christ.

The following table exhibits a comparative view of the years of the above-mentioned æras in a continued series of Olympiads, or every four years:

A. M.	Jul. Per.	Olymp.	U. C.	Ær. Nab.	B. C.

Æra of the Hegira. The æra of the Hegira is that point of time which is dated by the Arabians from the Hegira, or flight of Mahomet from Mecca, which corresponds to the year of Christ 622. To find the year of the Hegira which corresponds to that of the vulgar æra, subtract 621 from the given year, divide the remainder by 33, and add the quotient to that remainder, the sum will be the year of the Hegira sought for: thus, suppose it be required to find the year of the Hegira corresponding to the present year 1822, $1822 - 621 = 1201 \div 33 = 36$, then $36 + 1201 = 1237$, the year of the Hegira required. As the Hegira commences on the 622d year of the vulgar æra, the subtraction of 621 complete years from the given year of Christ would show the number of Julian years which have elapsed since the commencement of that æra, if the Julian and Arabian years were equal; but the Julian year being $365^d 6^h$, and that of the Hegira $354^d 8^h 48^s$, the former is anticipated by the latter $10^d 21^h 12^s$ in every year, making in the space of 33 years $359^d 3^h 36^s$, i. e. one year and $4^d 18^h 48^s$; hence the propriety of dividing by the number 33, which so long as the odd days do not amount to another year, will show the number of years of the Hegira which have passed beyond those of the Julian year. To find the feria or day of the week on which any given year of the Hegira commences, the following rule is necessary. First, let the given year be divided by 210, and the remainder by 30; then multiply the quotient by 5. Out of the remainder, from the second division, distinguish the intercalary from the common years, and multiply the former by 5, and the latter by 4; let both the products be added to the former product; add 6 to the sum of the whole, and divide by 7, the quotient of which is the number of the feria required: thus, let it be required to find the feria on which 1127 of the Hegira commences, $1127 \div 210 = 5$, and a remainder 77; then, $77 \div 30 = 2 \times 5 = 10$; then 6, the number of inter-

CHRONOLOGY.

calary years, $\times 6 = 30$, and 10, the number of common years, $\times 4 = 40$, all which products, together with 6, must be added together: thus, $10 + 30 + 40 + 6 = 86 \div 7 = 12$, the number. Here it is to be observed, that since the cycle of the years of the Hegira is 30, and the feria of the week are 7, the same order of the beginning of the year will return in 210 years; wherefore, if the given year be divided by 210, it shows how often that period has elapsed, and the remainder the year that is entered on in a new period. If this remainder be divided by 30, it will show the number of periods of 30 years that have elapsed, and the remainder the year of a new period. Now a period of 30 years contains 19 common years, and 11 intercalary years, making 10,631 days, or 1518 weeks, with 5 days over; wherefore, if you multiply the number of complete periods by 5, it will give the number of odd days within those periods. In like manner, since a common year contains 4 days above 50 weeks, and an intercalary day 5, if the number of the former above the complete period be multiplied by 4, and that of the latter by 5, the number of days is found that have passed above the weeks, within the years of the current period. Moreover, as the first year of the Hegira fell in the fifteenth cycle of the sun, when the dominical letter was C, its epocha or commencement, which is dated from the 16th of July, fell on the sixth feria, i. e. the Friday; if, therefore, to the odd days that are over and above in the weeks of the complete periods, and those of the current period, you add 6, and divide the sum by 7, you find the number of odd days above the weeks which have passed since the commencement of the Hegira. Thus, it will be found that the feria for the year 1127 was 6.

The following table of the years of the Hegira, compared with those of the Vulgar Æra, and also of the corresponding Feriæ, will serve to illustrate this subject still farther.

The asterisk (*) is affixed to the intercalary year; and the two parallel dates of months in the two last centuries, answer to the Old and New Style. It may be farther remarked, in regard to the adjustment of the Arabian to the Julian year, that 43,830 of the former are exactly equal to 42,523 of the other; and that, when that portion of time has elapsed, the cycles will return to the same points in the Julian year as formerly.

Calendar. By the help of these divisions and characters, different nations have been enabled to take a due account of their civil and religious concerns, in the form of what is denominated a calendar, which has varied according to the constitutions of different countries, as the Roman calendar [vide *Kalendarium*]; and the Christian calendar, which has been adapted to the fasts and feasts observed in the Christian church. The Christian calendar is either Julian or Gregorian, according as it is formed on the Julian or Gregorian computation, otherwise called the *Old and New Style*.

Julian Calendar. The Julian Calendar is that in which the New and Full Moons, but particularly the Paschal Full Moon and the festival of Easter, are determined by the help of the Golden Numbers regularly disposed through the Julian year. The feasts observed in the Christian church are either immoveable or moveable. The *immoveable feasts* are those which are fixed to a given day, of which those that are observed in the church of England are as follow, namely:

Table of Immoveable Feasts and Fasts.

All the Sundays throughout the year	
The Circumcision of our LORD JESUS CHRIST Jan. 1	
The Epiphany 6	
The Conversion of St. Paul 25	
The Purification of the Blessed Virgin Feb. 2	
St. Matthias the Apostle 24, or, in leap-year 25	
Annunciation of the Blessed Virgin March 25	
St. Mark the Evangelist April 25	
St. Philip and St. Jacob the Apostles May 1	
St. Barnabas the Apostles June 11	
The Nativity of St. John the Baptist 24	
St. Peter the Apostle 29	
St. James the Apostle 25	
St. Bartholomew the Apostle Aug. 24	
St. Matthew the Apostle Sept. 21	
St. Michael and all Angels 29	
St. Luke the Evangelist Oct. 18	
St. Simon and St. Jude the Apostles 28	
All Saints Nov. 1	
St. Andrew the Apostle 30	
St. Thomas the Apostle Dec. 21	
The Nativity of our LORD JESUS CHRIST 25	
St. Stephen the Martyr 26	
St. John the Evangelist 27	
The Holy Innocents 28	

The *Moveable Feasts* are those which are not fixed constantly to one and the same day. Of these Easter-day, on which the others depend, is, according to the decree of the council of Nice, always the first Sunday after the Full Moon, which happens upon or next after the 21st day of March; and if the Full Moon happen upon a Sunday, Easter-day is the Sunday after. According to this arrangement, the Easter-day can never fall earlier than the 22d of March, nor later than the 25th of April, which are denominated the *Paschal limits*.

Advent Sunday is always the nearest Sunday to the feast of St. Andrew, whether before or after.

Septuagesima Sunday, nine weeks before Easter.
Sexagesima ——— eight ———
Quinquagesima ——— seven ———
Quadragesima ——— six ———
Rogation ——— five ——— after Easter.
Ascension-day ——— forty days ———
Whit-Sunday ——— seven weeks ———
Trinity-Sunday ——— eight ———

Since, at the time of the Nicene council, the vernal equinox was fixed for the 21st of March, to which day it was supposed that it would remain invariably fixed, the Julian calendar was accordingly framed to make the Easter-day fall on the Full Moon that immediately followed the 21st of March; but it being found, as was before observed, that the Golden Number gave the Full Moons more than four days too late, a reformation was, in consequence, attempted in the Gregorian calendar, by which it was proposed to bring the Full Moon back to the season in which it was found at the time of the Nicene council.

Gregorian Calendar. The Gregorian calendar is that which, by the assistance of epacts rightly disposed through each month, is intended to show the New and Full Moons throughout the year, but in a particular manner the Paschal Moon; for by the help of the epacts the Moon's age is found for any given day of any month in this manner: add to the epact the day of the month and the number of the month, and the sum of these, casting away 30, or 29, as often as it arises, gives the age of the moon. The number of the month in this case

CHRONOLOGY.

implies that number which shows the moon's age at the beginning of each month when the solar and lunar years begin together, which are as follow :

Jan.	Feb.	March	April	May	June
0	2	1	2	3	4
July	Aug.	Sept.	Oct.	Nov.	Dec.
5	6	8	8	10	10

thus, suppose it be required to find the moon's age for the 3d of March, 1822, then 7 the epact + 3 the day of the month + 1 the number of the month = 11 the moon's age.

The following Table exhibits the order of these epacts in the Gregorian calendar throughout the year.

The reader will observe in this calendar that the number 25 is sometimes printed in Roman numerals, to denote that in such places the calendar must have double epacts, namely, 24, 25; for, as twelve classes of epacts, consisting of 30 days each, make 360 days, which ought to make only 354, it necessarily follows, that double epacts must fall on the same day of alternate lunar months; whence the suppression of the epact 24 on the 5th of February, the 5th of April, the 3d of June, the 1st of August, the 29th of September, and the 27th of November.

Since, in the Gregorian calendar as well as the Julian, the vernal equinox is fixed for the 21st of March, and the day of the Full Moon is fourteen days after, if any given epact be found that falls immediately after the 21st of March, and eleven days be reckoned forward, the eleventh day will be the paschal limit, or the day on which the Full Moon falls. On this principle the following Table has been constructed, to show the paschal limits for the Gregorian calendar from 1700 to 1900.

Epacts.	Paschal Lim.	Epacts.	Paschal Lim.
*	3 April E	20	24 March F
11	2 April A	1	12 April D
22	22 March D	12	1 April G
3	10 April B	23	21 March C
14	30 March E	4	9 April A
25	18 April C	15	29 March D
6	7 April F	26	17 April B
17	27 March B	7	6 April E
27	15 April G	18	26 March A
9	4 April C		

To find, therefore, the Easter according to the Gregorian calendar, let the dominical letter and the Gregorian epact be found by the rule and table already given; and in the table of paschal limits, the limit corresponding to the epact with the letter denoting the day of the week; then, if this letter be compared with the dominical letter, it will show how many days must be added to come to Easter-day: thus, for the present year (1822) the Dominical letter is F, the epact is 7, corresponding to which epact is the 6th of April the paschal limit, and E the day of the week on which it falls, consequently the next day F, the 7th of April, is Easter-day.

The Easter may, however, be found by means of the number called the number of direction, which shows how many days after the 21st of March the Easter-day falls. As the paschal limits comprehend 35 days, and the 22d of March is the earliest day on which Easter-day can fall, the two following lines will show the succession of numbers; namely,

Easter-day .. 22, 2

where the column meets, the number of direction is to be found.

Dominical Letters. } Gol. No.	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	
	A	29	19	5	26	12	33	19	12	26	19	5	26	12	5	26	12	33	19	12
	B	27	13	6	27	13	34	20	13	34	20	13	27	20	6	27	13	34	20	6
	C	8	14	7	21	14	35	21	7	28	21	7	28	21	7	28	14	28	21	7
	D	19	15	8	22	15	29	22	8	29	15	8	29	15	1	22	15	29	22	8

	F	24	17	3	24	10	31	24	10	31	17	10	24	17	3	24	10	31	17	10
G	25	18	4	25	11	32	18	11	32	18	4	25	18	4	24	11	35	18	11	

Thus the Dominical Letter for 1822 being F, and the Golden Number 18, then $21 + 17 = 38 - 31 = 7$ the Easter-day. *Scalig. D ct. Temp.*; *Petav. Rat. Temp.*; *Ricciol. Chronol.*; *Wolf. Chron.*

CHRONOMETER (*Hor.*) any instrument for the exact measuring of time, as clocks, watches, dials, &c. from *χρονος*, time, and *μετρον*, a measure.

CHRONOSCOPE (*Hor.*) a name sometimes given to a pendulum or machine for measuring time, from *χρονος*, time, and *σκοπειν*, to observe.

CHROS (*Anat.*) *χρως*, the Ionians, according to Galen, understood by this word whatever is carnosus in the body, as the skin, muscles, membranes, &c. in distinction from bones, cartilages, and ligaments. *Gal. Com. 2, in Lib. de Tract.*

CHROSTA'SIMA (*Min.*) a name for pellucid gems which appear of one simple and permanent colour in all shades of light, such as the diamond, carbuncle, ruby, garnet, amethyst, sapphire, beryl, emerald, and topaz.

CHRU'PSIA (*Med.*) a disease of the eyes in which a person perceives objects of a different colour from the reality.

CHRYPSORCHES (*Med.*) vide *Parorchidium*.

CHRY'SALIS (*Ent.*) *χρυσάλις*, or nymph; the second apparent change of the maggot of any species of insects while it lies hid under a card pellicle, previous to its appearance as a butterfly. It is so called from its bright yellow or gold colour.

CHRY'SALYTES (*Min.*) a figured stone, of a glittering gold and iron colour.

CHRYSA'NTHEMOIDES (*Bot.*) the same as the *Osteospermum* of Linnæus.

CHRYSA'NTHEMUM (*Bot.*) a genus of plants, Class 19 *Syngenesia*, Order 2 *Polygamia Superflua*.

Generic Characters. CAL. common hemispherical; scales close incumbent.—COR. compound radiate corollets hermaphrodite; proper funnel-form.—STAM. filaments five; anthers cylindric.—PIST. germ ovate; style filiform; stigmas two.—PER. none; calyx unchanged; seed solitary; receptacle naked.

Species. The species are either annuals, perennials, or shrubs. Of the first kind are the following, namely—*Chrysanthemum segetum*, seu *Creticum*, Corn or Garden Marigold, native of Europe.—*Chrysanthemum Myconis*, native of Portugal. Of the second kind are the principal, namely—*Chrysanthemum atratum*, &c. seu *Bellis*, &c. Fleahy-leaved Chrysanthemum, native of Switzerland.—*Chrysanthemum leucanthemum*, *Matricaria*, &c. seu *Bellis*, &c. Common Ox-eye or Great Daisy, native of Europe.—*Chrysanthemum montanum*, *Leucanthemum*, Mountain Ox-eye, native of Silesia.—*Chrysanthemum granifolium*, Grass-leaved Ox-eye, native of Montpellier.—*Chrysanthemum coccineum*, seu *foliis*, &c. seu *Bupthalmum*, &c. native of Iberia.—*Chrysanthemum Achilleæ*, seu *Parthenium*, &c. Milfoil-leaved Chrysanthemum, native of Italy.—*Chrysanthemum argenteum*, *Matricaria*, &c. seu *Chamæmelum*, &c. native of the East.—*Chrysanthemum arcticum*, seu *Pyrethrum*, &c. native of North America. Of the third kind are the following, namely—*Chrysanthemum flosculosum*, *Tanacetum*, seu *Balsamita*, Bastard Chrysanthemum, an ever-

green, native of the Cape of Good Hope.—*Chrysanthemum incanum*, native of the Cape of Good Hope.—*Chrysanthemum sentinum aster*, seu *Bellis*, Creeping-rooted Chrysanthemum, &c.—*Chrysanthemum Indicum*, seu *Tis jetti-Pu*, native of the East Indies, &c. *Clus. Hist. Plant. rar.*; *Bauh. Hist. Plant.*; *C. Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*; *Raii Hist. Plant.*; *Tournef. Inst.*; *Phuk. Almag.*

CHRY'SANTHEMUM is also the *Anellus lychnitis* in the Linnæan system.

CHRYSA'SPIDES (*Ant.*) *χρυσάσπιδες*, soldiers armed with golden shields.

CHRYSE (*Med.*) the name of a plaster for recent wounds. *Paul. Eginet. l. 7, c. 17.*

CHRYSELE'CTRUM (*Min.*) amber of a golden yellow colour.

CHRYSIPPE'A (*Bot.*) a herb mentioned by Pliny. *Nat. Hist. l. 26, c. 8.*

CHRY'SIS (*Ent.*) Golden Fly, a genus of animals, Class *Insecta*, Order *Hymenoptera*.

Generic Character. Mouth horny.—*Feelers* unequal.—*Antennæ* short.—*Abdomen* arched.

Species. The principal species are, *Chrysis splendida*, *fulgida*, *ignita*, &c.

CHRY'SIS (*Bot.*) the *Helianthus annuus* of Linnæus.

CHRY'SISCE'PTRON (*Bot.*) White Chamæleon.

CHRYSITES (*Min.*) a kind of precious stone. *Plin. l. 37, c. 10.*

CHRYSITIS (*Min.*) the *Spuma argenti*, or Litharge, so called from its gold colour; recommended in ophthalmic cases. *Hippoc. de Mul. l. 1*; *Plin. l. 26, c. 6.*

CHRYSITRIX (*Bot.*) a genus of plants, Class 23 *Polygamia*, Order 3 *Diœcia*.

Generic Characters. CAL. glumes bivalve; valvelets close.

COR. chaffs extremely numerous.—STAM. filaments solitary; anthers linear.—PIST. common; germ oblong; style filiform; stigma simple.—PER. . . . seed . . .

Species. The only species is the *Chrysitrix Capensis*, a perennial, native of the Cape of Good Hope.

CHRYSOBA'LANUS (*Bot.*) *χρυσοβαλανος*, a drug mentioned by Galen, supposed to be the nutmeg. *Gal. de Simpl. l. 8, c. 3.*

CHRYSOBALANUS, a genus of plants, Class 12 *Icosandria*, Order 1 *Monogynia*.

Generic Characters. CAL. perianth one-leaved; divisions expanding.—COR. petals five.—STAM. stamens very many; anthers small.—PIST. germ ovate; style of the shape and length of the stamens; stigma obtuse.—PER. drupe ovate; seed nut-ovate.

Species. The only species is the *Chrysobalanus Icacœ*, seu *Guaiera*, Cocoa Plum, a shrub, native of South America. *Bauh. Pin.*

CHRYSOBERYLLUS (*Min.*) a crystal stone, shining like gold. *Plin. l. 37, c. 5.*

CHRYSOCA'LLIA (*Bot.*) the same as *Chrysocome*.

CHRYSOCA'RPUM (*Bot.*) a sort of ivy. *Plin. l. 16, c. 34.*

CHRYSOCERA'UNIUS (*Min.*) vide *Cerauniochrysis*.

CHRYSOCHA'LCUM (*Min.*) vide *Aurichalcum*.

CHRYSOCO'LLA (*Min.*) *χρυσοκόλλα*, from *χρυσος*, gold, and *κόλλη*, glue; the name among the ancients for gold solder, or Borax. [vide *Borax*]

CHRYSO'COMA (*Bot.*) vide *Chrysocome*.

CHRYSOCOMA, in the Linnæan system, a genus of plants, Class 19 *Syngenesia*, Order 1 *Polygamia Equalis*.

Generic Characters. CAL. common hemispherical; scales linear.—COR. compound tubular; corollets numerous; proper funnel-form; border five-cleft.—STAM. filaments five; anthers cylindric.—PIST. germ oblong; style filiform; stigmas two.—PER. none; calyx scarcely changed; seeds solitary; pappus hairy; receptacle naked.

Species. The species are shrubs or perennials.—*Chrysocoma comauca*, *Conyza*, seu *Elichrysum*, &c. Great

shrubby Goldylocks, native of the Cape of Good Hope.

—*Chrysocoma cernua, suffruticosa*, seu *Coma*, &c. Small shrubby Goldylocks, native of the Cape of Good Hope.

—*Chrysocoma ciliaris, suffruticosa*, seu *Coma*, &c. native of the Cape of Good Hope.—*Chrysocoma, Aster*, seu *Conyza*, &c. a perennial, native of Siberia.—*Chrysocoma biflora*, Two-flowered Goldylocks, a perennial, native of Siberia.—*Chrysocoma linosyris Asyris*, seu *Linaria*, &c. German Goldylocks, a perennial, native of Europe.—*Chrysocoma oppositifolia, Eupatorium*, seu *Cyanus*, Opposite-leaved Goldylocks, native of the Cape of Good Hope, &c. *Clus. Hist. Plant. rar.; Bauh. Pin.; Ger. Herb.; Raii Hist. Plant.; Tournef. Inst.; Boerhaav. Ind.; Pluk. Almag.*

CHRYSOCOME (*Bot.*) χρυσόκομη, the herb Millefoil, or Yarrow; so called from χρυσός, gold, and κομή, hair because it has corymbs, or leaves, resembling golden locks. The root of the Chrysocome is heating and astringent. *Arist. de Plant. l. 2, c. 7; Dioscor. l. 4, c. 55; Plin. l. 21, c. 8.*

CHRYSOCOME, or *Chrysocoma*, in the *Linnean system*, is the *Conyza inuloides*, the Solidago Lanceolata.

CHRYSOGONIA (*Alchem.*) χρυσόγονία, from χρυσός, gold, and γόνιμα, to be generated; the aurific or gold-making seed, most perfectly concocted from a solution of gold.

CHRYSOGONUM (*Bot.*) χρυσόγονον, Red Turnep; a plant which was reckoned good against the bites of serpents. *Dioscor. l. 4, c. 56.*

CHRYSOGONUM, in the *Linnean system*, a genus of plants, Class 19 *Syngenesia*, Order 3 *Polygamia Necessaria*.

Generic Characters. CAL. common five-leaved; leaflets lanceolate.—COR. compound radiate; corolets very many; proper funnel-form.—STAM. filaments five; anthers cylindrical.—PIST. germ very small; style setaceous; stigma obscure.—PER. none; calyx unchanged; seeds none; receptacle chaffy.

Species. The only species is the *Chrysogonum Virginianum, pumilum*, seu *Chrysanthemum*, &c. native of Virginia.

CHRYSOGONUM is also the *Leontice chrysogonum* of Linnæus.

CHRYSOLA'CHANUM (*Bot.*) a herb, the same as *Atriplex*.

CHRYSOLA'MPIS (*Min.*) a precious stone, fiery by night, and pale by day. *Plin. l. 37, c. 10.*

CHRYSOLITE (*Min.*) vide *Chrysolithus*.—*Chrysolite paste*, a kind of vitreous substance made in imitation of the natural.

CHRYSOLITHUS (*Min.*) Chrysolite, a kind of jasper or green diaphonous gem, shining with a glittering splendour. It is endued with the virtue of stopping hæmorrhages, according to Pliny. *Plin. l. 37, c. 11.*

CHRYSOLITHUS, in the *Linnean system*, is classed under the genus *Geuma*. It is called Chrysolite, or Yellowish-green Topaz, and is found mostly in the East Indies, and sometimes in Europe.

CHRYSOME'LA (*Ent.*) a genus of insects of the Order *Coleoptera*.

Generic Character. Antennæ moniliform.—Feelers six, growing larger towards the end.—Thorax marginate.—Shells unmarginate.—Body mostly oval.

Species. This is a numerous and beautiful tribe of insects, that is found every where in woods and gardens, where they feed on leaves of trees. Their motion is slow, and sometimes when caught they emit an oily liquor of a disagreeable smell. The different species are distinguished generally by their colour.

CHRYSOME'LIA (*Bot.*) the *Citrus aurantium* of Linnæus.

CHRYSOPAIS (*Bot.*) the Indian purging juice, called otherwise *Gummi-Gotta*. *Castell. Lex. Med.*

CHRYSOPA'SIUS (*Min.*) the Topaz. [vide *Chrysoprasus*]

CHRYSOPA'STUS (*Min.*) a precious stone, sprinkled as it were with a gold sand.

CHRYSO'PHRYS (*Min.*) a fish; so called from the gold colour it has over the eyes.

CHRYSOPHYLLUM (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Characters. CAL. perianth five-parted; leaflets roundish.—COR. monopetalous; border five-cleft; segments roundish.—STAM. filaments five; anthers roundish.—PIST. germ roundish; style very short; stigmas obtuse.—PER. berry globular; seeds solitary.

Species. The species are shrubs, as the—*Chrysophyllum cainito, Cainito*, &c. seu *Sideroxylon*, Broad-leaved Star-apple, native of Martinica.—*Chrysophyllum monopyrenum*, native of Jamaica.—*Chrysophyllum microcarpum*, native of Hispaniola.—*Chrysophyllum argenteum*, Narrow-leaved Star-apple, native of Martinica.—*Chrysophyllum rugosum*, native of Jamaica.—*Chrysophyllum pyriforme*, seu *Macoucou*, &c. native of Guiana.—*Chrysophyllum glabrum*, native of Martinica.

CHRYSOPHYLLUM is also the *Jacquinia armillaris*.

CHRYSOPIS (*Min.*) a precious stone, having the appearance of gold, from χρυσός, gold, and ὄψις, the aspect or appearance. *Plin. l. 37, c. 10; Isid. Orig. l. 16, c. 14.*

CHRYSOSPENII FOLII (*Bot.*) the *Diandra Africana*.

CHRYSOSPENIUM (*Bot.*) a genus of plants, Class 10 *Decandria*, Order 2 *Digynia*.

Generic Characters. CAL. perianth four or five parted; divisions ovate.—COR. none, unless the coloured calyx be so called.—STAM. filaments eight or ten; anthers simple.—PIST. germ inferior; styles the length of the stamens; stigmas obtuse.—PER. capsule two-parted; seeds very many.

Species. The two species are the—*Chrysosplenium alternifolium, Saxifraga*, seu *Sedum*, &c. Alternate-leaved Golden Saxifrage, a perennial, native of Sweden.—*Chrysosplenium oppositifolium, Saxifraga, Sedum*, seu *Aschimella*, Opposite-leaved Golden Saxifrage, a perennial, native of England. *Dodon. Pempt.; Lob. Hist. Plant.; Bauh. Hist. Plant.; Ger. Herb.; Park. Theat. Botan.; Raii Hist. Plant.; Tournef. Inst.*

CHRYSOPL'CIUS PULVIS (*Med.*) a kind of powder mentioned by *Helmont*, which causes lead to harden. *Helm. Nat. contra Nesc. Tit. 40.*

CHRYSOPCE'IA (*Alchem.*) χρυσόποιία, from χρυσός, gold, and ποίω, to make; that part of the spagirical art which teaches the making of gold out of more imperfect metals.

CHRYSOPRA'SUS (*Min.*) a kind of green stone mixed with a bright gold colour. It is called by *Isidore Chrysopasius*, and by later mineralogists *Chrysolithus*, or the Topaz. To this stone were ascribed many superstitious virtues. *Plin. l. 37, c. 5; Solin. c. 52; Isid. Orig. l. 16, c. 7; Marbod. de Lapid. pret. c. 9.*

CHRYSO'PTERON (*Min.*) vide *Chrysoprasus*.

CHRYSOS (*Ich.*) χρυσός, Gilt-head; a species of fish, of a gold colour, mentioned by *Pliny* on the authority of *Ovid*. *Plin. l. 32, c. 11.*

CRYSTAL (*Her.*) is sometimes used in blazonry instead of *argent*, or silver, and most frequently pearl.

CRYST'ALLINE (*Min.*) vide *Crystalline*.

CRYSTALLO'GRAPHY (*Min.*) vide *Crystallography*.

CHRYSU'LEA (*Met.*) Aqua-fortis, or the water with which gold-finers wash off gold when mixed with other metals.

CHRYSUN (*Med.*) χρυσόν, an epithet for two collyria for the eyes. *Act.*

CHU (*Ant.*) choa or chus, χῆς; a liquid measure among the Athenians, answering to the congius of the Romans, and containing six sextarii, and twelve attic cotylæ, or nine pints. *Gal. de Mens.*

CHUB (*Ich.*) a river fish, of the carp kind; so called on account of its great head, from the Teutonic *kopff*, a head; wherefore, also, it is denominated in Latin *capito*; Italian *capitone*; French *testard*; and in the *Linnean system* *Cy-*

- pinus cephalus*. The chub is a coarse fish, full of bones, frequents the deep holes of rivers, is very timid, and lives upon worms, caterpillars, and all insects of the coleopterous kind.
- CHU-LAN (*Bot.*) a species of the *Chloranclus*.
- CHUM (*Cus.*) a chamber-fellow to a student at the university.
- CHUNDRILLA MERCURIA (*Bot.*) vide *Zacintha*.
- CHUNNO (*Bot.*) vide *Battatas*.
- CHURCH (*Ecc.*) in Saxon *cýric*, Teutonic *kirche*, is supposed to be abbreviated from *κίριακον*, i. e. *οικία*, a house, and *κύριος*, Lord, i. e. the Lord's House; is taken in its most general sense for the collective body of Christians, who, in respect to community of faith, are called the *catholic* or *universal church*; in respect to their Christian course here on earth, the *church militant*; in respect to their future condition, the *church triumphant*, or the body of faithful already in glory; and, according to the Romanists, the *church patient*, or the body of the faithful who are in purgatory. *Church*, in a limited sense, is taken for particular bodies of professing Christians, who are distinguished, geographically, into the *Latin* or *Western Church*, and the *Greek* or *Eastern Church*; the former comprehending the churches of Italy, France, Spain, Africa, and the northern countries; the latter, the churches of those countries which were formerly subject to the Greek or Eastern empires. The church is moreover distinguished, as respects its doctrine or discipline, into the *Romish Church*, the *Protestant Church*, the *Gallican Church*, the *Church of England*, &c.—*Church*, in the sense of a place of assembly for public worship, is ecclesiastically distinguished sometimes into the *grand church*, for the chief church of a place; and commonly into the *metropolitan church*, the *parochial church*, the *cathedral church*, *collegiate church*, and also by the names of the saints to which they are dedicated, as St. Paul's, St. Peter's, &c.
- CHURCH (*Archit.*) an oblong building much in the form of a ship, which now commonly consists of a nave, or body, aisles, choir, chapel, belfry, &c. The Greek church, when complete, formerly consisted of two porches, namely, the *πρόναος*, or *vault-nave*; the *νάβηξ*, or *ferula*; the *ναός*, or *nave*; the *ambo*, or place where the deacons and priests read the gospels and preached; the *baptistery* or font; the *χορός*, or choir; and the *sanctuary*. The ancient churches were also distinguished, as to their form, into—*Simple Churches*, i. e. churches without aisles.—*Churches with aisles*, i. e. having a row of porticos in the form of vaulted galleries.—*Churches in a Greek cross*, where the length of the traverse part is equal to that of the nave.—*Churches in a Latin cross*, those which have the nave longer than the traverse part.—*Churches in rotundo*, the plan of which is perfectly circular, as the Pantheon at Rome.
- CHURCH-A'LE (*Archæol.*) the same as *Whitsun-Ale*.
- CHURCH-REEVES (*Ecc.*) the same as *Church-Wardens*.
- CHURCH-SCOT (*Law*) or *Churcheset*, a payment or contribution, frequently called *primitiæ seminum*, consisting of a certain measure of wheat paid to the priest on St. Martin's day, as the first fruits of the harvest. It afterwards became part of the tythe.
- CHURCH-SERVICE (*Ecc.*) the public service performed according to the rites and ceremonies of the Church of England.
- CHURCH-WARDENS (*Ecc.*) *ecclesiæ guardiani*, the guardians or keepers of the church, one of whom is most commonly appointed by the minister, and the other by the parish; wherefore the former is called the *rector's warden*. The office of the church-warden is to look to the repairs of the church, church-yard, &c. and to attend to all matters connected with the rights of the church and the decencies of public worship.
- CHURCHING (*Ecc.*) the act of women who attend church for the first time after child-birth, to return special thanks for their delivery.
- CHURL (*Archæol.*) in Saxon *carl*, or *ceopl*, a clown; signified a tenant at will, of which there are two kinds; one who hired the lord's testamentary estate, like our farmers; and the other, that tilled and manured the demesnes, and were therefore called *Sockmen*, or *Ploughmen*.
- CHUS (*Ant.*) vide *Chu*.
- CHYBUR (*Alchem.*) Sulphur.
- CHYDÆTUS (*Ant.*) *χυδαίος*, wine made of palms. *Plin.* l. 14, c. 16; *Pallad. de Re Rust.*
- CHYLARIA (*Anat.*) from *χυλός*, chyle; a white mucous urine of the colour and consistence of chyle.
- CHYLE (*Anat.*) a milky fluid, secreted from the aliments, in the lacteal vessels. It is separated by digestion from the chyme; and is that fluid substance from which the blood is formed. The constituent principles of chyle are water, oily cream, cheese, earth, and animal lymph. The uses of the chyle are to supply matter for the formation of the blood; to restrain, by its accescent nature, the putrescent tendency of the blood; to prevent the thickening of the fluids; and to supply milk for puerperal women.
- CHYLIFERA vasa (*Anat.*) vide *Lactea vasa*.
- CHYLIFICATION (*Anat.*) the first process of digestion carried on in the small intestines, and principally in the duodenum, by which the aliment is converted into chyle.
- CHYLISMA (*Med.*) from *χυλός*, an expressed juice.
- CHYLISTA (*Med.*) Glass of antimony obtunded by levigating it with mastich dissolved in rectified spirits of wine.
- CHYLOPOIETIC (*Anat.*) from *χυλός*, chyle, and *ποιέω*, to make; an epithet for vessels which generate chyle.
- CHYLOSIS (*Anat.*) vide *Chylification*.
- CHYLOSTAGMA (*Chem.*) a fluid distilled from the *The-riaca andromachi*.
- CHYLOUS (*Anat.*) an epithet for what consists of chyle: thus, milk is the chylous part of an animal.
- CHYLUS (*Anat.*) vide *Chyle*.
- CHYMA'TION (*Med.*) the name of a penetrating medicine in Marcellus Empiricus, c. 20.
- CHYME (*Anat.*) in its most general sense, implies any humour increased by concoction; but, in its particular sense, that humour which is immediately prepared from the ingested food; and which, by farther concoction, becomes chyle.
- CHYMIA (*Chem.*) vide *Chemistry*.
- CHYMIATER (*Med.*) vide *Chimiater*.
- CHYMIATRIA (*Med.*) the art of curing diseases by the application of chemistry to medicine.
- CHYMICAL (*Chem.*) vide *Chemical*.
- CHYMICOPHANTA (*Chem.*) a pretended chemist.
- CHYMOLEA (*Med.*) vide *Kymolca*.
- CHYMO'SIS (*Med.*) vide *Chemosis*.
- CHYMUS (*Chem.*) vide *Chyme*.
- CHYNLEN radix (*Bot.*) a cylindrical root, about the size of a goose quill, brought from China. It has a bitter taste, and is reckoned a stomachic when infused in wine.
- CHYSIS (*Med.*) *χύσις*, from *χύνω*, to pour; fusion, or the reducing of solid bodies to a state of fluidity, by means of heat. *Foes. Œconom. Hippocrat.*
- CHYTION (*Med.*) *χύτιον*, a plentiful inunction with oil and water. *Erotian. Lex. Hippocrat.*
- CHYTRA (*Ant.*) *χύτρα*, a pot or pipkin. *Foes. Œconom. Hippocrat.*
- CHYTRACULIA (*Bot.*) the *Calyptanthus* of Linnæus.
- CIACONNE (*Mus.*) the same as *Chacone*.
- CIBAGE (*Bot.*) an eastern tree, much resembling the pine-tree. *C. Bauh. Pin.; Raii Hist. Plant.*
- CIBARIA *Lex* (*Ant.*) a sort of sumptuary law respecting victuals and house-keeping expences. *Macrob.* l. 2, c. 13.

CIBA'RIOUS panis (*Ant.*) Household bread, bolted, or coarse bread, which was given to the slaves. *Cic. Tusc.* l. 5, c. 34; *Isid. Orig.* l. 20, c. 2.

CIBARIUS Sal (*Chem.*) vide *Sal Marinus*.

CIBA'TION (*Med.*) the taking of food.

CIBATION (*Chem.*) an incorporation of bodies. *Castell. Lex. Med.*

CIBDELOPLA'CIA (*Min.*) an old term for a sort of spars, which are much debased by a large admixture of earth. They are opaque, formed of thin crusts, covering vegetables, and other bodies, by way of incrustation.

CIBDELOSTRA'CIA (*Min.*) an old term for such earthy spars as are formed into thin plates.

CIBORIUM (*Ant.*) *κισβήριον*, a sort of drinking cup used in Egypt, which was wide at the top, and gradually decreased towards the bottom.

Hor. l. 2, od. 7,

*Oblivioso levia Massiao
Ciboria exple.*

Athen. l. 3, &c.

CIBORIUM (*Ecc.*) the covering of the altar in ancient churches, consisting of a dome, supported by four columns. *Ceremon. Episcop.* l. 1. c. 12; *Greg. Turon. de Mirab.*

CIBORIUM (*Bot.*) the pod of the Egyptian bean, which resembles the cup above mentioned; also the bean itself, and the whole plant is so called. *Diodor.* l. 1; *Dioscor.* l. 3, c. 148; *Nicand. in Georg. apud Athen.*; *Gal. Theriac ad Pamphil.*; *Aet. Tetrab.* l. 1, serm. 1.

CIBOULS (*Bot.*) a sort of onions nearly allied to the scallions, which form no bulb at the roots; the *Allium fistulosum* of Linnæus.

CIBUS castrensis (*Ant.*) the food which was used by the soldiers in camp. It consisted of bacon and cheese; and, for the drink, vinegar, mixed with water, which was called *posca*. *Spartian Adrian.* c. 10.

CIBUS albus (*Med.*) a sort of jelly; also the name of an American plant.

CICADA (*Ent.*) the *Baulm Cricket*, an insect, common in Italy, but unknown in England. It is very noisy, like the cricket, living on dew, and what it sucks from the dwarf ash. These insects are used, when dried, in colics. *Aldrov. de Insect.*

CICADA, in the *Linnean system*, a genus of animals, Class *Insecta*, Order *Hemiptera*.

Generic Characters. Snout inflected.—*Antennæ* setaceous.—*Legs* formed for leaping.

Species. Animals of this genus live on various plants: the larva is apterous; the pupa furnished with the mere rudiments of wings. The species are divided into the—*Membracis*, which have the antennæ subulate.—*Tettigonia*, or those which have legs not formed for leaping.—*Cercopis*, which have the antennæ filiform.—*Cicada*, which have the lip rounded.

CICATRICE (*Surg.*) a scar of a wound. [vide *Cicatrix*]

CICATRICULA (*Nat.*) a little white speck or vessel that appears in the coat of the yolk of an egg, wherein the first changes appear towards the formation of a chicken.

CICATRISANTIA (*Surg.*) such applications and medicines as dispose wounds to dry up and heal, so as to be covered with a new skin.

CICATRISATUS (*Bot.*) scarred; an epithet for a stem.—*Cicatrissatus caulis*, a stem, marked with the scars from leaves that have fallen off.

CICATRIX (*Surg.*) the seam or scar on the skin after the healing of a wound or ulcer.

CICCA (*Bot.*) a genus of plants, Class 21 *Monoecia*, Order 4 *Tetrandria*.

Generic Characters. CAL. perianth four-leaved; leaflets roundish.—COR. none.—STAM. filaments four; anthers

subglobular.—PIST. germ roundish; styles four; stigmas acute.—PER. capsule subglobular; seeds solitary.

Species. The two species are the—*Cicca disticha*, *Averrhoa*, &c. *Phyllanthus*, &c. *Nelipoli*, seu *Cheramela*, a shrub, native of the East Indies.—*Cicca nudiflora*, a shrub, native of Java.

CICCCUS (*Ent.*) *κικκος*, a young grasshopper.

CICELY (*Bot.*) a perennial, the *Chærophyllum sylvestre* of Linnæus, which communicates a green and yellow dye to wool. According to some, it is a herb grateful to cows, and for that reason called *cow-weed*; but others have asserted that no animal will eat of it except the ass.

CICER (*Bot.*) a small pulse, less than peas; called in the Greek *επίβηθος*; it is supposed to derive its name from *κίκυς*, strength. *Theophrast. Hist. Plant.* l. 8, c. 5; *Dioscor.* l. 2, c. 126; *Columel.* l. 2, c. 10; *Plin.* l. 18, c. 12.

CICER, in the *Linnean system*, a genus of plants, Class 17 *Diadelphia*, Order 4 *Decandria*.

Generic Characters. CAL. perianth five-parted; segments four.—COR. papilionaceous; banner flat; wings obtuse; keel sharpish.—STAM. filaments diadelphous; anthers simple.—PIST. germ ovate; style simple; stigma obtuse.—PER. legume rhomboid; seeds two.

Species. The species are—*Cicer arietinum*, seu *sativum*, Chick-pea, an annual, native of Spain.—*Cicer lens*, &c. *Ervum*, &c. seu *Lens*, &c. an annual, native of Germany.

CICER is also the *Astragalus cicer* of Linnæus.

CICERA (*Bot.*) *εἰχλας*, a kind of pulse like chicklings, good for fodder. *Columel. de Re Rust.* l. 2, c. 11.

CICERA is the *Lathyrus* of Linnæus.

CICERA Tartari (*Med.*) small pills composed of tartar.

CICERBITA (*Bot.*) a species of *Sonchus*.

CICERCULA (*Bot.*) a diminutive of cicer, *λάθυρος*, chicklings, or little chiches. *Plin.* l. 18, c. 12; *Plut. de Quæst. Roman.*; *Columel. de Re Rust.* l. 2, c. 10; *Gal. de Simpl.* l. 1, c. 27.

CICERI affinis (*Bot.*) the *Astragalus* of Linnæus.

CICHO'RIS affinis (*Bot.*) the *Sigesbeskia orientalis*.

CICHORIUM (*Bot.*) *κισβήριον*, Cichory, Succory, or Wild Endive, a salad herb; so called because it grows wild, *διὰ τὸν κισβήριον*, i. e. in the fields. It is cooling and moistening, removes obstructions, and is good for the jaundice. *Theoph. Hist. Plant.* l. 7, c. 7; *Dioscor.* l. 2, c. 160; *Plin.* l. 20, c. 8; *Columel. de Re Rust.* l. 8, c. 14; *Gal. de Simpl.* l. 8, c. 8; *Schol. in Nicand Theriac.*; *Aet. Tetrab.* l. 1, serm. 1; *Paul. Æginet.* l. 3, c. 46; *Geopin. Auct.* l. 12, c. 1.

CICHORIUM, in the *Linnean system*, a genus of plants, Class 19 *Syngenesia*, Order 1 *Polygamia Æqualis*.

Generic Characters. CAL. common calyced cylindrical; scales eight.—COR. compound flat; corollules hermaphrodite, twenty; proper monopetalous.—STAM. filaments five; anther cylindrical-pentagon.—PIST. germ oblong; style filiform; stigmas two revolute.—PER. none; calyx cylindrical; seeds solitary; receptacle somewhat chaffy.

Species. The species are of different kinds, as—*Cichorium intybus*, seu *Intybus*, Garden and Wild Succory, a perennial, native of Europe.—*Cichorium endivia*, *Exdivia*, *Intybum*, seu *Intybus*, Broad-leaved Succory, or Common Endive, an annual or biennial, native of the East Indies.—*Cichorium divaricatum*, an annual, native of Morocco.—*Cichorium spinosum*, seu *Chondrilla*, &c. Prickly Succory, a biennial, native of Crete.

CICHORIUM is also a name for the *Crepis Vesicaria*.

CICHORY (*Bot.*) or *Succory*, the plant classed under *Cichorium*, in the *Linnean system*, is a herb which, in its uncultivated state, called the *Cichorium intybus*, or Wild Cichory, abounds with a milky juice, of a penetrating bitterish taste. The roots are more bitter than the leaves or stalks, and these than the flowers. When cultivated in gardens it loses much of its bitterness. This herb is so

- much like endive, that it was supposed to be the same plant in an uncultivated state; but the salad known by the name of Endive is an annual, and at most a biennial: for which reason they are both brought under one genus *Cichorium*.
- CICI** (*Bot.*) a shrub, in Latin called *Ricinus*, because the seeds of it are like the vermin called *tecks* or *ticks*. *Plin.* l. 15, c. 7.
- CICILIANA** (*Bot.*) vide *Androsæmum*.
- CICINDELA** (*Ent.*) Glow-Worm; was called by the Greeks *λαμπυρίς*, and by Aristotle *πορολαμπιάς*; but by the Roman peasants *stellans volatus*. *Aristot.* l. 5, c. 19; *Plin.* l. 18, c. 26.
- CICINDELA**, in the *Linnean system*, a genus of animals, Class *Insecta*, Order *Coleoptera*.
- Generic Character.* *Antennæ* setaceous.—*Feelers* six filiform.—*Mandible* prominent; *eyes* prominent.—*Thorax* rounded.
- Species.* Insects of this tribe are generally very beautiful, and very rapacious, seizing with great ferocity the other insects which fall in their way. The larva is soft, white, and long; and the species are distinguished into those which have the lip three-toothed, and those which have it entire.
- CICISBEO** (*Cus.*) a male attendant on ladies in Italy.
- CICLA** (*Bot.*) the *Beta cicla* of Linnæus.
- CICONGIUS** (*Ant.*) a measure containing twelve sextaries or pints.
- CICONIA** (*Ant.*) signified properly a stork; but was also used to denote an instrument used by husbandmen for making furrows even. *Isid. Orig.* l. 20, c. 15.
- CICUS** (*Bot.*) a name for the skin that divides the grains or kernels of the pomegranate.
- CICUTA** (*Ant.*) a hollow, intercepted between two knots of the stalks or reeds, of which the ancient shepherds used to make their pipes. *Serv. in Virg.*
- CICUTA** (*Bot.*) in Greek *κώσιον*, the herb which answers to our hemlock, of which, when bruised, the Athenians used to make a poisonous drink for their state criminals who were condemned to death.
- CICUTA**, in the *Linnean system*, a genus of plants, Class 5 *Pentandria*, Order 2 *Digynia*.
- Generic Characters.* *Cal.* umbel universal roundish; *partial* roundish; *involucre* universal none; *partial* many-leaved; *leaflets* short; *perianth proper* scarcely visible. *Cor.* universal uniform; *floscules* all fertile; *proper* inflected.—*Stam.* filaments five; *anthers* simple.—*Pist.* germ inferior; *styles* two; *stigmas* headed.—*Per.* none; *fruit* subovate; *seeds* two.
- Species.* The three species are the—*Cicuta virosa*, *suim*, &c. *Coriandrum*, &c. seu *Cicutaria*, Long-leaved Water Hemlock, a perennial, native of Europe.—*Cicuta bulbifera*, seu *Ammi*, native of Virginia.—*Cicuta maculata*, *Egopodium*, *Angelica*, seu *Myrrha*, a perennial, native of Virginia.
- CICUTARIA** (*Bot.*) the *Chærophillum sylvestre* of Linnæus.
- CID** (*Polit.*) an Arabic word, signifying chief commander or lord.
- CIDARIS** (*Ant.*) from the Hebrew כתר, or the Chaldee כתר, a crown; signifies 1. The high priest's mitre among the Jews. *Hier.* 2. A cap, turban, or sash, which the Persian kings and priests used to wear.
- CIDER** (*Bot.*) שכר, in the Hebrew; *σικερα*, Greek; and *sicera*, Latin; signify all manner of inebriating liquors except wine; and *sakar*, in the Arabic, signifies wine made of dates; whence comes the English word *cider*, to denote the juice of the apple expressed and fermented.
- CIDERKIN** (*Bot.*) a diminutive of the word *cider*, signifying the liquor which is drawn from the cores and rinds of apples after the *cider* has been pressed out.
- CIDO'NIUM** *Malum* (*Bot.*) the quince, the fruit of the *Pyrus Cidonia*.
- CIDONIUM vinum** (*Bot.*) wine made of quinces.
- CIDRA** (*Bot.*) Cider.
- CIELING** (*Archit.*) vide *Ceiling*.
- CIERGE** (*Ecc.*) a wax taper, such as is carried about in processions.
- CIERGE d'eau** (*Archit.*) French for a water spout.
- CIFRA** (*Arith.*) a cypher.
- CIGNUS** (*Ant.*) a measure of two drams.
- CILERY** (*Archit.*) a term for the drapery or foliage that is wrought upon the heads of pillars.
- CILIA** (*Anat.*) *ταρσοί*, the eye-lashes, or extreme parts of the *palpebræ*, or eye-lids, which are cartilaginous, and have the hairs inserted in them. *Ruff. Ephes. de Apell. Part. Corp. Hum.* l. 1; *Gal. de Usu. Part.* l. 10, c. 7; *Plin.* l. 11, c. 37.
- CILIARY** (*Anat.*) an epithet for several parts belonging to the *cilia*, or eye-lashes; as the—*Ciliary Glands*, i. e. excretory ducts in the inner edge of each eye-lid.—*Ciliary ligament*, the circular portion that divides the choroid membrane from the *iris*.—*Ciliary processes*, the white folds at the margin of the uvea of the eye.—*Ciliary Muscle*, that part of the *musculus*, or *bicularis palpebrarum*, which lies nearest to the *cilia*.
- CILIATE** (*Bot.*) an epithet for the leaf, *folium ciliatum*, a leaf, the edge of which is guarded by parallel bristles, longitudinally, that have the appearance of *cilia*, or eye-lashes, as in the *Drosera Crasula*, *Erica*, &c. This epithet is applied in the same sense to the *Stipule*, the *Spike*, and the *Corolla*, as in *Rue*, *Menyanthes*, *Tropæolum*, &c.
- CILIBANTUM** (*Ant.*) vide *Cillibantes*.
- CILICES** (*Ant.*) vide *Cilicia Velamenta*.
- CILICIA Velamenta** (*Ant.*) Garments made of goat's hair, with which the Arabians also made their tents. The ancients frequently used them in the service of the camp, and also at sea. *Vitruv.* l. 10, c. 22; *Varr. de Re Rust.* l. 2, c. 2; *Ascon. in Verr.* l. 1, c. 38; *Serv. in Virg. Georg.* l. 3, v. 311; *Veget.* l. 4, c. 6.
- CILICIA terra** (*Min.*) a bituminous substance which, when boiled, becomes viscous like birdlime, and was applied to the stocks of vines for the protection of the roots.
- CILUM** (*Anat.*) vide *Cilia*.
- CILLIBÆ** (*Ant.*) vide *Cillibantes*.
- CILLIBANTES** (*Ant.*) *κιλλίβαντες*, *cillibæ*, *κιλλίβαι*, rests or tables, with three legs, used by the ancients to lay their shields upon. *Fest. de Verb. Signif.*; *Hesychius*; *Suidas*; *Schol. in Aristoph.*
- CILLO** (*Med.*) one who is affected with a perpetual trembling of the upper eye-lids; a *cillendo*, i. e. *molitando*, from being in a continual agitation.
- CILLO'NES** (*Ant.*) Minstrels using filthy or obscene gestures.
- CILLO'SIS** (*Med.*) a spasmodic trembling of the eye-lids.
- CILO** (*Med.*) one who has a head with a sharp crown like a sugar loaf. *Fest. de Verb. Signif.*
- CIMA** (*Bot.*) the top of an herb.
- CIMA** (*Archit.*) or *Sima*, a moulding something like an S; what is now called an O. G. *ogee*; and by the Greeks *κυμάτιον*, *cymatium*, a small wave, signifying a wave-like ornament.—*Cima recta*, or the *Cima reversa*. [vide *Architecture*]
- CIMA'TIUM** (*Archit.*) vide *Cima*.
- CIME'LIARCH** (*Ant.*) *κειμηλιαρχης*, the chief keeper of the plate, vestments, and *κειμηλία*, treasures of the church in general. *Cæl. Rhodig. Antiq. Lect.* l. 1, c. 9.
- CIMELIARCHIUM** (*Ant.*) *κειμηλιαρχεῖον*, the place where the treasures of the church were kept.
- CIMELIUM** (*Archæol.*) from *κειμήλιον*, a treasure; and a treasury has been used to signify a cabinet of medals.
- CIMETER** (*Mil.*) vide *Scymeter*.
- CIMEX** (*Ent.*) *κόρις*, Bug or Wall-louse; a fetid sort of

vermin which breeds in wood, paper, straw, &c. and infests the persons of those who are asleep. They are said to be good against the bites of serpents, and to cure the ague. *Dioscor.* l. 2, c. 36; *Aet. Tetrab.* 1, serm. 1; *Isid. Orig.* l. 12, c. 6.

CIMEX, in the *Linnean system*, Bug, a genus of animals, Class *Insecta*, Order *Hemiptera*.

Generic Character. Snout inflected.—*Antennæ* longer than the thorax.—*Back* flat.—*Thorax* margined.

Species. The species are distinguished into, 1. Those which have the *antennæ* inserted before the eyes. 2. Those which have the lip long and subulate. 3. Those which have the thorax spinous; and, 4. Those which have the thorax unarmed.

CIMICIFUGA (*Bot.*) a genus of plants, Class 13 *Polyandria*, Order 4 *Tetragynia*.

Generic Characters. CAL. *perianth* five-leaved; *leaflets* roundish.—COR. *nectaries* four.—STAM. *filaments* twenty; *anthers* twin.—PIST. *germs* four to seven; *styles* recurved; *stigmas* longitudinal on the style.—PER. *capsules* oblong; *seeds* very many.

Species. The only species is the—*Cimicifuga fetida*, *Actæa*, &c. seu *Thalictroides*, &c. a perennial, native of Siberia.

CIMIER (*Mil.*) French for a heavy ornament, which the ancient knights, or chevaliers, were accustomed to wear upon their helmets.

CIMOLIA Terra (*Min.*) *κιμωλία γῆ*, an earth; so called from Cimolus, an island in the Cretan sea, where it was found in great plenty. It was reckoned of great use in discussing tumours and repressing inflammations; and was also employed, like our Fuller's earth, for the cleaning of clothes. *Dioscor.* l. 5, c. 176; *Plin.* l. 35, c. 6.

CIMOLIA alba, in the *Linnean system*, *Argilla cimolia*, is now known by the names of Cimolite, Tobacco-Pipe Clay, and Fuller's earth. The *Cimolia purpurascens*, another species, is the same as what is now called Steatites, or Soap Rock.

CIMOLITE (*Min.*) the *Cimolia terra*. [vide *Cimolia*]

CINABARIS (*Bot.*) vide *Cinnabaris*.

CINABRE (*Her.*) vide *Gules*.

CINA-CINÆ (*Bot.*) the same as *Cinchona*.

CINÆDI (*Ant.*) Dancers and tumblers among the ancients.

CINÆDUS (*Orn.*) *κίναδος*, the name of a sea-bird, the gall of which Galen recommends for rubbing the eyelids when the superfluous hairs in a trichiasis are pulled off. *Gal. de Comp. Med. sec. loc.* l. 4, c. 8.

CINAMOMUM (*Bot.*) vide *Cinnamomum*.

CINARA (*Bot.*) the same as the *Cineraria*.

CINAROIDES (*Bot.*) the *Protea cinaroides* of Linnæus.

CINCHONA (*Med.*) the name of the Peruvian bark, which is the bark of the tree called *Cinchona*.

CINCHONA (*Bot.*) the name of a tree growing in the hilly parts of Peru, which yields the bark called Peruvian bark.

CINCHONA, in the *Linnean System*, a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* one-leaved.—COR. monopetalous; *tube* long; *segments* lanceolate, or linear.—STAM. *filaments* five; *anthers* linear.—PIST. *germ* inferior; *style* the length of the stamens; *stigma* thick.—PER. *capsule* bipartite; *seeds* many.

Species. The species are shrubs, as the *Cinchona officinalis*, seu *Quinquina*, Common Jesuit's-bark, or officinal *Cinchona*, native of Peru.—*Cinchona pubescens*, Pubescent *Cinchona*, native of Peru.—*Cinchona macrocarpa*, Long-fruited *Cinchona*, native of Santa Fé.—*Cinchona caribæa*, Caribæan *Cinchona*, native of the Caribbees.—*Cinchona corymbifera*, Corymbiferous *Cinchona*, native of the South Sea islands.—*Cinchona lineata*, native of St. Dominica.—*Cinchona floribunda*, *Quinquina*, &c. seu *Trachelium*, native of Jamaica.

CINCINNA'TI, *Order of* (*Her.*) an order formed in America after the revolution, by the officers who had borne a part in the contest.

CINCINNUS (*Anat.*) the hair on the temples.

CINCLISIS (*Med.*) or *Cinclismus*, *κίγκλισις*, or *κίγκλισμός*, a small and frequently repeated motion, as it is applied by Hippocrates. *Hippoc. de Art.*

CINCTICULUM (*Ant.*) a short garment that was girded about the waist, and went down to the middle of the leg. *Plaut. Bacch. act. iii. sc. 3, v. 28.*

CINCTURA (*Ant.*) a cincture; a girded tunic. *Quintil.* l. 11, c. 3.

CINCTURE (*Arch.*) a list, or fillet, at the top or bottom of a column; that at the top is sometimes called *collier*, and sometimes *amulus*.

CINCTUS (*Ant.*) a kind of short coat girded a little below the breast.—*Cinctus Gabinus*, a sort of garment worn by the Gabii, who threw one part under their right arm, and the same lappet back again over the left shoulder. It is supposed to have been introduced into Rome on the occasion of a Gabinian excursion, when the enemy was repulsed. It was used by the priests who officiated at the sacrifices, as we learn from Lucan.

Lucan. l. 1, v. 595.

*Pontifices, sacri quibus est permissa potestas,
Turba minor ritu sequitur succincta Gabino.*

Also by the consul on opening the Temple of Janus, and declaring war, as Virgil informs us:

Virg. Æn. l. 7, v. 612.

*Ipsæ Quirinali trabea, cinctuque Gabino
Insignis, reserat stridentia limina Consul.*

It was likewise worn on other solemn occasions, as in the case of Decius, who devoted himself to death for his country: also by the generals when they burned the spoils of the enemy, and the like. *Liv.* l. 8, c. 9; *Appian. Mithrid. Bell.*; *Serv. in Virg.*

CINEFACTION (*Chem.*) the reducing any substance, but particularly vegetable substances, to the state of ashes, or powder.

CINERARIA (*Eccl.*) Ash-Wednesday, or the first day of Lent.

CINERARIA (*Bot.*) a genus of plants, Class 19 *Syngenesia*, Order 2 *Polygamia Superflua*.

Generic Characters. CAL. common simple leaflets equal.—COR. compound, radiated; *corollets* hermaphrodite; *proper funnelshaped*.—STAM. *filaments* five; *anther* cylindrical.—PIST. *germ* oblong; *style* filiform; *stigmas* two.—PER. none; *calyx* unchanged; *seeds* solitary; *pappus* hairy; *receptacle* naked.

Species. The species are mostly shrubs, and natives of the Cape of Good Hope, as the *Cineraria nivea*, &c. seu *Doria*, &c.—*Cineraria incisa*, seu *Doria*.—*Cineraria pinnatifida*, seu *Doria*.—*Cineraria bipinnata*.—*Cineraria filifolia*.—*Cineraria geifolia*, *Solidago*, &c. *Othonga*, seu *Jacobæa*, &c. *Kidney-leaved Cineraria*.

Of the second kind are the following, namely, the—*Cineraria malvæfolia*, native of the Canaries.—*Cineraria Sibirica*, *Othonna*, seu *Jacobæastrum*, *Jacobæoides*, seu *Solidago*, &c. native of Siberia.—*Cineraria palustris*, *Solidago*, *Jacobæa*, seu *Conyza*, Marsh *Cineraria*, native of Europe.—*Cineraria integrifolia*, seu *Jacobæa*, &c. Mountain *Cineraria*, or *Fleawort*, native of Austria.—*Cineraria Senecio*, *Solidago*, seu *Jacobæa*, &c. Heart-leaved *Cineraria*, &c. But the *Cineraria longifolia* *Othonna*, seu *Jacobæa*, native of Austria, is a biennial; and also—*Cineraria campestris*, seu *Othonna*, &c. native of Sweden. *C. Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*; *Rau Hist. Plant.*

CINERARIUM (*Chem.*) the ash-hole of a chemical instrument.

CINERARII (*Ecccl.*) a name for those who venerated the ashes of the martyrs.

CINERARIUS (*Ant.*) a sort of tire-man who attended to the ashes which were used for the colouring the hair of the females.

CINERES *Russici* (*Med.*) vide *Clavellati cineres*.

CINERITIOUS (*Anat.*) ash-coloured; an epithet applied to the cortical substance of the brain, from its resemblance to the ash-colour; also to other substances resembling ashes in colour, or consistence.

CINERITIUM (*Chem.*) a cupel, or test; so called from its being commonly made of the ashes of vegetables.

CINERULAM (*Chem.*) a name for Spodium.

CINETUS (*Anat.*) a name for the diaphragm.

CINGULARIA (*Bot.*) another name for the *Lycopodium*.

CINGULUM *mercuriale* (*Med.*) or *Cingulum sapientiae*; a sort of belt, or girdle, invented by Rulandus, which consisted of a woollen cloth sufficiently impregnated with mercury, and filled with hog's lard.

CINGULUM veneris (*Palnis.*) a semicircle drawn from the space between the middle and fore-finger to that between the little finger and the ring-finger.

CINIFICATUM (*Chem.*) vide *Calcinatum*.

CINIFLO (*Chem.*) a name for a vain boaster in chemistry.

CINIPHES (*Ent.*) a name for certain flies which sting severely, and are therefore supposed to have been one of the plagues of Egypt.

CINIS *livivius* (*Chem.*) lye made of ashes.

CINNA (*Bot.*) a genus of plants, Class 1 *Monandria*, Order 2 *Digynia*.

Generic Characters. CAL. *glume* one flower.—COR. *glume* bivalve.—STAM. *filament* one; *anther* oblong.—PIST. *germ* turbinated; *styles* two; *stigmas* longer.—PER. none; *glume* involving; *seed* one.

Species. The only species is *Cinna arundinacea*, seu *Agrostis Cinna*, a perennial, native of Canada.

CINNABAR (*Min.*) *Cinnabaris*, *κιννάβαρι*: 1. A mixture of the blood of the dragon and the elephant, which was called by the Indians *Minium*. *Plin.* l. 33, c. 7. 2. The gum of an Indian tree, called Dragon's blood. 3. A soft red stone, called also *Minium*, which it resembles in colour. According to Theophrastus and Dioscorides there are two sorts of cinnabar: the *native*, which is dug out of the mines in Spain, and the *factitious*. Cinnabar consists of a bright red sand, which was discovered by one Callias, an Athenian. *Theophrast. de Lapid.*; *Dioscor.* l. 5, c. 109; *Plin.* l. 33, c. 7. Cinnabar, in modern mineralogy, is likewise native and factitious.—The *native Cinnabar* is a ponderous, red, sulphureous ore of quicksilver found in Spain, Hungary, and the East Indies.—The *factitious Cinnabar* is a red sulphuret of mercury, or a preparation of antimony and corrosive sublimate of mercury, which, when reduced to a powder, is known in commerce by the name of *Vermilion*. *Aldrov. Mus. Metall.*

CINNABARINUM Balsamum (*Bot.*) a balsam very similar to the balsam of sulphur.

CINNAMOMUM, in the *Linnean system*, is the *Laurus cinnamomum*.

CINNAMON (*Bot.*) the bark of the Cinnamon-tree, the *Laurus Cinnamomum* of Linnæus, which chiefly grows in Ceylon. This bark yields a fragrant volatile oil of a pungent taste, a water prepared by infusion, and a tincture which is prepared by digestion.—*Clove cinnamon* is the bark of a tree growing in Brazil, the fruit of which is often substituted for real cloves.—*Cinnamon water*, a water distilled from the bark of this tree.

CINNAMONUM (*Bot.*) *κιννάμωμον*, Cinnamon-tree, the name of which is derived from the Hebrew *קינ*, or *קינה*, a reed,

and the Greek *κιννάμωμον*. This tree was found by the ancients both in Arabia and India, and its bark, which was called *Cinnamomum*, or Cinnamon, was reckoned of a heating, emollient, and concocting quality. *Nicand. in Theriac.*; *Theophrast.* l. 9, c. 5; *Aristot. Hist. Anim.* l. 9, c. 20; *Herodot.* l. 3, c. 111; *Dioscor.* l. 1, c. 13; *Plin.* l. 12, c. 19; *Gal. de Simpl.* l. 6.

CINNARIS (*Bot.*) a herb which affords a remedy against poison to the stag and hart. *Plin.* l. 8, c. 7.

CINNIOTUS (*Alchem.*) and *cinnatus*, terms coined by Paracelsus to express the total destruction and corruption of mineral bodies. *Parac. Chirurg.* l. 5, c. 7.

CINQUAIN (*Mil.*) an order of battle in former times, which consisted of five battalions drawn up so as to make three lines, i. e. a van, main body, and reserve.

CINQUEFOIL (*Bot.*) or five-leaved grass, a perennial, the *Potentilla reptans* of Linnæus. The root of this plant has a bitterish taste, and is used in medicine as a styptic.

CINQUEFOIL (*Archit.*) an ornament in the pointed style of architecture, consisting of five cuspidated divisions.

CINQUEFOIL (*Her.*) this plant, as a charge, answers to the five senses of man, and denotes that the bearer conquers his affections and appetites. Among the modern examples of this charge is that in the annexed figure, being the arms of the Marquis of Abercorn, "Quarterly, for Hamilton 1st and 4th *gules* three cinquefoils pierced argent. For Arran 2d and 3d *argent*, a ship with her sails furled."

CINQUE-PORTS (*Law*) a name for the five ports towards the coast of France, namely, Dover, Sandwich, Romney, Winchelsea, and Rye; which it was formerly thought expedient to watch with particular vigilance: for which reason a Lord Warden of the Cinque Ports was appointed, and other privileges were granted to them. 4 *Inst.* 222.

CINQUENILLES (*Mil.*) French for thick ropes used in the artillery service for throwing pontoons across a river.

CINTRE (*Archit.*) or *ceintre*, the figure of an arch, or any curved timber, which is used in roofs, &c.

CINYRA (*Mus.*) in the Hebrew *כנור*, Greek *κινύρα*; a musical instrument of the harp kind used at funerals.

CINZILLA (*Med.*) vide *Zona*.

CION (*Anat.*) *κων*, the name of the *uvula*, from its pyramidal shape. *Arel. de Caus. et Sig. Acut. Morb.* l. 1, c. 2. 2. A diseased enlargement of the uvula. 3. An excrescence of a similar shape in the *pudendum muliebre*. *Hippoc. de Mul.*

CIONIA (*Ich.*) *κωνία*, the middle parts of the wheels and purple-fish near the centre of the *strix*, which, when calcined, are more caustic than the rest. *Dioscor.* l. 2, c. 6.

CIONIS (*Med.*) a diseased enlargement and painful swelling of the *uvula*.

CIPHER (*Arith.*) vide *Cypher*.

CIPHRA (*Arith.*) vide *Cypher*.

CIPOREMA (*Bot.*) a species of Garlic.

CIPPUS (*Ant.*) a small, low column, with an inscription, serving as a memorial of any thing: when placed on a road it indicated the distances of places, and when erected over a grave it contained the epitaph, to which the poets allude.

Hor. l. 1, sat. 8, v. 12.

*Mille pedes in fronte, trecentos cippus in agrum
Hic dabit; hæredes monumentum ne sequeretur.*

Per. Sat. v. 36.

*Assensere viri, nunc non cinis ille poete
Felix? Non levior cippus nunc imprimit ossa?*

As the Romans were buried on their own lands, it was customary to inscribe these letters on the *cippi*, H M H N S, i. e. *Hoc monumentum hæredes non sequitur*, to prevent the

heir from laying claim to the ground occupied by the monument: which explains the allusion in the quotation given from Horace. The *cippi* were also used as landmarks. *Bud. in Pand.* p. 16; *Lay. Comm. Reip. Rom.* l. 3, c. 18; *Bergier. de Vis. Mil.* l. 2, § 38, &c.

Cippus was also the name of other things, as 1. A punishment among the Romans resembling the stocks. *Aul. Gell.* l. 16, c. 7; *Suidas.*—2. A sharp stake, or palisado, in fortifications. *Cæs. de Bell. Gall.* l. 7, c. 73.

CIRCADA (*Ecc.*) a tribute anciently paid to the bishop, or arch-deacon, for visiting the church.

CIRCÆA (*Bot.*) a genus of plants, Class 2 *Diandria*, Order 1 *Monogynia*.

Generic Characters. CAL. perianth two-leaved; leaflets ovate.—COR. petals two.—STAM. filaments two; anthers roundish.—PIST. germ turbinate; style filiform; stigma obtuse.—PER. capsule turbinate, ovate; seeds solitary.

Species. The two species are—*Circæa lutetiana*, *Solanifolia*, &c. seu *Herba*, &c. Common Enchanter's Nightshade, a perennial, native of Europe.—*Circæa alpina*, Mountain Enchanter's Nightshade, a perennial, native of Europe.

CIRCELLIONES (*Ecd.*) vide *Circumcelliones*.

CIRCEENSES *Ludi* (*Ant.*) Circensian games, Roman exercises so called because they were exhibited in the circus. They consisted of fighting with swords, staves, or pikes, wrestling, running, horse-racing, leaping, boxing, quoits, and the like. The first Circensian Games were exhibited on the occasion of seizing the Sabine virgins.

Virg. Æn. l. 8, v. 635.

*Nec procul hinc Romam, et raptas sine more Sabinas
Consessu cavæ magnis Circensibus actis
Addiderat.*

These games were either ordinary, or extraordinary. The ordinary, or grand games, lasted five days, and commenced on the 15th of September. The extraordinary games were exhibited either on the occasion of dedicating a temple, or at the pleasure of the consuls, and the like. *Liv.* l. 44, c. 9; *Tac. Annal.* l. 2, c. 83; *Suet. Aug.* c. 45; *Panvin. de Lud. Cir.*

CIRCENSIS (*Ant.*) of or belonging to the Circus, as *circense tomentum*, coarse flocks, or stuffing made of chaff, which were so called because they were sold in the Circus to poor people.

CIRCEMOT (*Archæol.*) vide *Chirchgenot*.

CIRCINALIS (*Bot.*) an epithet applied to leaves in foliation which are rolled in spirally downwards, the tip occupying the centre, as in the Ferns and some Palms.

CIRCINATION (*Archit.*) a marking or measuring with the compasses. *Vitruv.* l. 9, c. 8.

CIRCINUS (*Geom.*) a pair of compasses. *Vitruv.* l. 9, c. 8.

CIRCITORES (*Mil.*) the soldiers who went the rounds at night. *Veget.* l. 3, c. 8.

CIRCIUS (*Ant.*) a vehement southern wind blowing from France through Italy.

CIRCLE (*Geom.*) a plane figure bounded by a curve line, called the *circumference*, every where equally distant from a point within it called the centre. The circumference of every circle is supposed to be divided into 360 equal parts, called degrees, marked °, each degree into 60 minutes, or primes, marked ', each minute into 60 seconds, marked ", and so on. A right line is said to touch a circle when meeting the same, and being produced, it does not cut it, as in fig. 1. Circles are said to touch each other, which

meeting do not cut one another, as in fig. 1. Right lines in a circle are said to be equally distant from the centre when perpendiculars drawn from the centre to them are equal, as B A, A C, in fig. 2.—A *segment of a circle* is a figure contained under a right line and a part of the circumference of a circle, as in fig. 3. An angle is said to stand on the circumference of a circle when right lines which contain the angle receive any part of the circumference, as in fig. 4. [vide *Geometry*] *Circles of the higher orders* are curves, the properties of which are expressed by the following equations:

$$x^m : y^n :: y : a - x \text{ or } y^m + 1 = x^m a - x$$

$$x^m : y^n :: y^n : a - x^n \text{ or } y^m + n = x^m a - x^n :$$

where *a* is the axis, *x* is the absciss, and *y* the ordinate. Curves defined by this equation, will be ellipses when *m* is an odd number; but when *m* and *n* are each equal to 1 the equation becomes that of the common circle.—*Circle of curvature*, that circle which has the same curvature with any curve at a given point. It is otherwise called the *circle of equicurvature*; also the *osculating circle*, because the circle is said to osculate the curve at the point where it touches. The radius of this circle is called the *radius of curvature*, and its centre the *centre of curvature*.

CIRCLE of the sphere (*Astron.*) is any circle that cuts the mundane sphere, or has the circumference in its surface. These circles are either moveable or fixed.—*Moveable circles* are those whose circumferences revolve with the surface of the sphere, as the meridians, &c.—*The fixed circles* are those which have their circumferences in the immoveable surface, and consequently do not revolve with it, as the Equator and Ecliptic. These circles are also distinguished into great or lesser circles. *Great Circles* are those which divide the sphere into two equal parts, as the Horizon, the Meridian, the Equator or the Ecliptic, the Colures, Azimuth, Vertical Circles, Circles of Declination and of Latitudes.—*Lesser Circles* are those which divide the sphere into two unequal parts, having neither the same centre nor diameter as the sphere. These are the Tropics, the Polar Circles, Circles of Longitude, Circles of Perpetual Apparition and Occultation, Circles of Position, &c. [vide *Astronomy*]—*Circle of the equant* is a circle in the Ptolemaic system, described on the centre of the equant.—*Horary Circle*, or *Hour Circle*, a small brazen circle fixed to the north pole, and divided into twenty-four hours, with an index to point them out, and thereby to show the difference of the meridians in time.—*Circle of illumination* is an imaginary circle on the surface of the earth which separates the illuminated side, or hemisphere of the earth, from the dark side.—*Circles of excursion* are small circles parallel to the ecliptic, and at such a distance from it that the excursions of the planets towards the poles of the ecliptic may be included within them. They are usually fixed at 10°.—*Diurnal circles* are immovable circles, supposed to be described by the stars and other points of the Heavens in their diurnal rotation round the earth.

CIRCLE (*Log.*) the fault of an argument which supposes the principle which it should prove, and afterwards proves the principle by the thing which it seems to have proved.

CIRCLE (*Polit.*) a division of the German empire, which has a right of voting at the diet.

CIRCOCE/LE (*Med.*) from *κίρκος*, a dilatation of a vein, and *κλάη*, a rupture; a varicose distention and enlargement of the spermatic veins.

CIRCUIT electrical (*Nat.*) the course of the electric fluid from the charged surface of an electric body to the opposite surface, into which the discharge is made.

CIRCUIT (*Mil.*) 1. The space immediately round any town, or place. 2. The circuitous march of soldiers, who do not go in a direct course.

Fig. 1.

Fig. 2.

Fig. 3.

Fig. 4.

CIRCUITIO (*Ant.*) going the rounds as soldiers on guard do. [vide *Circitores*]

CIRCUITOR (*Ant.*) vide *Circitores*.

CIRCUITS (*Law*) certain divisions of the kingdom which the judges are appointed to visit twice a year for the administration of justice. Of these circuits there are six, namely—*Midland*, including the counties of Northampton, Rutland, Lincoln, Nottingham, Derby, Leicester, Warwick.—*Norfolk*, including Bucks, Bedford, Huntingdon, Cambridge, Norfolk, Suffolk.—*Home circuit*, including Hertford, Essex, Kent, Sussex, Surrey.—*Oxford circuit*, including Berks, Oxford, Hereford, Salop, Gloucester, Monmouth, Stafford, Worcester.—*Western circuit*, including Southampton, Wilts, Dorset, Devon, Cornwall, Somerset.—*Northern*, including York, Durham, Northumberland, Cumberland, Westmoreland, Lancashire.

CIRCUIITY OF ACTION (*Law*) *circuitus actionis*, a longer course of proceeding to recover a thing sued for than is needful.

CIRCULAR (*Math.*) an epithet for any thing in the form of, or appertaining to, a circle; as—*Circular arcs*, any parts of the circumference of a circle.—*Circular instruments*, otherwise called *reflecting* or *multiplying circles*, instruments which, like Hadley's octant, and the marine sextant, serve for taking the altitudes, distances, &c. of the heavenly bodies, particularly by sea. They derive their name from their figure, which consists of a whole circle instead of a part, and are recommended for their accuracy in diminishing the errors of division and eccentricity at pleasure, by means of reflection.—*Circular lines*, are lines relating to the circle, as sines, tangents, &c.—*Circular numbers* are those numbers whose powers end in the same digits as the roots themselves, as 5, the square of which is 25, the cube 125, &c.—*Circular parts* are the five parts of a right-angled or a quadrantal spherical triangle; namely, the legs, the complement of the hypotenuse, and the two complements of the two oblique angles. They are also called *Napier's circular parts*, because he gave a rule in his logarithms respecting these parts, by which he proposed to comprehend within one theorem, all the rules for the solution of right-angled spherical triangles.—*Circular ring* is the measure or space included between two concentric circles, and the area of it is consequently equal to the difference of the areas of the two circles.—*Circular sailing* is the mode of navigation which is performed upon the arc of a great circle.—*Circular sectors* are the areas bounded by any arc of a circle and two radii.—*Circular segment* is the space bounded by any arc and its chord.

CIRCULAR (*Com.*) or *Circular letter*, a letter printed or written in the same form, which is sent round to any number of persons, to serve in the place of an advertisement.

CIRCULAR (*Bot.*) vide *Orbiculate*.

CIRCULAR VELOCITY (*Astron.*) a term denoting the velocity of a planet or a revolving body, which is measured by the arc of a circle.

CIRCULATE (*Math.*) vide *Circulating*.

CIRCULATING DECIMALS (*Math.*) also called *recurring* or *repeating decimals*, or simply *circulates*, are those decimal numbers in which a figure or figures are perpetually repeated, as $\cdot 646464$, &c.—The circulates are simple, compound, or mixed.—A *simple circulate* is that which consists of one figure repeated, as $\cdot 222$, &c. which is marked $\cdot 2$.—A *compound* or *multiple circulate* is that in which several figures are repeated, as $\cdot 232323$, marked thus $\cdot 2\bar{3}$, and $\cdot 234234234$, marked thus $\cdot 2\bar{34}$.—A *mixed circulate* is that which consists of other figures that are not repeated, as $4\cdot 222$, or $4\cdot 2$ and $45\cdot 5\bar{24}$. That part of the circle which

repeats is called the *repetend*, and the whole repetend, supposed infinitely continued, is equal to a vulgar fraction whose numerator is the repeating figure, and its deno-

minator the same number of nines, as $\cdot 2 = \frac{2}{9}$; $\cdot 2\bar{3} = \frac{23}{99}$;
 $\cdot 5\bar{24} = \frac{524}{999}$.

CIRCULATION (*Anat.*) the circular or circulating action of the blood which passes from the heart through the arteries to every part of the body, and returns back to the heart through the veins. By means of this regular motion, the whole animal economy is kept in order.

CIRCULATION (*Chem.*) the particular motion which is raised in liquors by the application of fire, that causes the vapours to rise and fall.

CIRCULATION of the sap (*Bot.*) is a similar process that goes forward with the sap or juice in plants, as with the blood in the animal body.

CIRCULATION of money (*Com.*) is the passing of money from hand to hand according to some given value.

CIRCULATOR'S (*Ant.*) mountebanks and jugglers who went about amusing the people.

Mart. l. 10, ep. 3.

Et foeda lingua probra circulatoricis.

Apul. Metam. l. 1; *Schol. Juv. sat.* 6, v. 582.

CIRCULATORIUM (*Chem.*) *Circulatory*, a chemical digesting vessel, in which the fluid performs a circulatory motion.

CIRCULATORY LETTERS (*Ecc.*) or *Circular letters*, letters which are sent into different parts of a kingdom or a particular province by archbishops or bishops.

CIRCULATUM (*Chem.*) a preparation from sea salt, so called by Paracelsus, who gave the name of *Circulatum majus* to the preparation of the corrosive sublimate of mercury and sea salt, and that of *Circulatum minus* to the preparation of sea salt, water, the juice of the radish-root, and alcohol of wine. Some affirm that the former is no more than rectified spirits of wine, and the latter only spirit of vinegar.

CIRCULI IGNEI (*Med.*) vide *Eclampsis*.

CIRCULUS (*Anat.*) *κύκλος*, any round or annular part of the body, as the *circulus oculi*, the orb of the eye. *Hippoc. de Morb.* l. 2, &c.; *Gal. de Usu Part.*—*Circulus arteriosus*, the artery which runs round the *iris*, so as to form a circle.

CIRCULUS (*Surg.*) surgical instruments adapted to the different parts of the body. *Scultet. Arman. Chirurg.* tab. 22, 43, &c.—*Circulus quadruplex*, a kind of bandage having a fourfold circle.—*Gal. de Fasc.*

CIRCULUS (*Chem.*) a round iron instrument which is used for cutting off the neck of a glass, and which is otherwise called an *Abbreviatorium*.

CIRCUMAGENTES MUSCULI (*Anat.*) muscles that help to turn the eye about.

CIRCUMAMBIENT (*Nat.*) an epithet for the air that immediately surrounds the earth.

CIRCUMCAULALIS (*Med.*) a name for the *tunica adnata* of the eye. *Aet. Tetrab.* 2, serm. 3, c. 1.

CIRCUMCELLIONES (*Ecc.*) a branch of the Donatists in Africa, in the fourth century, so called because they led a vagabond life, and committed so many irregularities that they called for the interference of the civil power, by which they were suppressed. *St. August. Hæres.* 69; *Baron. Annal. Ann.* 331, &c.; *Prætol. Doctrin. omn. Hæret.*

CIRCUMCIDANEUM VINUM (*Ant.*) wine of the last pressing, after the grape-husks have been all mashed and cut to pieces to be brought to press again.

CIRCUMCISION (*Theol.*) περιτομή, or περιεσπῆ, a rite or ceremony among the Jews, performed by cutting off the *præputium*, or foreskin. This ceremony was first annexed by God, as a seal to the covenant which He made with Abraham, and afterwards taken into the body of Mosaic institutions. Herodotus speaks of this custom as having prevailed among the ancient Egyptians and neighbouring people, who doubtless borrowed it from the Israelites.

CIRCUMCISION (*Ecc.*) or the feast of Circumcision, a festival celebrated in the Christian church on the first of January, in commemoration of our Saviour's circumcision.

CIRCUMDUCTION (*Law*) is a term applied in the Scotch law to the time allowed for bringing proof of allegiances, which being elapsed, if either party sue for circumduction of the time of proving, it has the effect that no proof can afterwards be brought, and the cause must be determined as it stood when circumduction was obtained.

CIRCUMFERENCE (*Math.*) περιφέρεια, the line or lines generally which bound any figure, but particularly the curve line which bounds the circle, and is every where equidistant from the point called the centre. *Euclid. Elem. Def. 1. 1, 3.*

CIRCUMFERENTOR (*Math.*) an instrument used in surveying, consisting of a large box and needle fastened on to the middle of a brass index, with sights at each end of the index, as in the subjoined figure. The quantity of

angles may be taken in the following manner: supposing the angle to be E K G, place the instrument at K, with the flower de luce of the card towards you; then direct the sights to E, and observe what degrees are cut by the south end of the needle, which suppose 295; then turning the instrument about on its stand, direct the sights to G, noting again what degrees are cut by the south end of the needle, which suppose to be 213; then subtracting the less from the greater, the remainder is the quantity of the angle sought; as $295 - 213 = 82$ degrees, the quantity of the angle.

CIRCUMFERUS (*Bot.*) an epithet signifying winding round, as the tendrils of the hop twist round the pole.

CIRCUMFLEX (*Gram.*) an accent which when placed over a syllable makes it long, as this mark (˘), and this (˘) in Latin.

CIRCUMFLEXUS (*Anat.*) an epithet for the muscle of the palate which serves to draw down the *velum pendulum palati*, and then to the side towards the pterygoid process.

CIRCUMFORANEI (*Ant.*) an epithet for mountebanks.

CIRCUMGYRATION (*Anat.*) the turning a limb round in the socket.

CIRCUMNESSION (*Theol.*) a term used by divines for the reciprocal existence of the three persons in the Trinity in each other.

CIRCUMJUVIALISTS (*Astron.*) an epithet applied to Jupiter's satellites.

CIRCUMTIS (*Med.*) a medicine used as a general unction or liniment to any part.

CIRCUMLOCUTIO (*Rhet.*) *circumlocution*, a figure of speech answering to the periphrasis of the Greeks, which consists in expressing by many words what might be expressed by a few; which may sometimes be a beauty and at other times a fault. *Quint. Inst. l. 8, c. 6.*

CIRCUMOSSALIS (*Anat.*) an epithet for what surrounds a bone, as the *periosteum*; also an epithet for what is surrounded by a bone.

CIRCUMPOLAR (*Astron.*) an epithet for such stars as being pretty near our North Pole, move round it. They never set or go below the horizon in our latitude.

CIRCUMPOTATIO (*Ant.*) a funeral entertainment which was given in honour of the deceased to the friends that attended, which being esteemed an absurd custom, is supposed to have been abolished by law. *Lex. Sept. XII. Tab. apud. Cic. de Leg. l. 2, c. 24; Hottman. Antiq. Rom. l. 3, c. 1.*

CIRCUMSCISSUS (*Bot.*) cut round; an epithet for a capsule. — *Capsula circumscissa*, a capsule that opens, not longitudinally or vertically, as most capsules, but transversely and horizontally, like a snuff-box, usually about the middle, so as to fall nearly in two equal hemispheres, as in *Anagallis* and *Hyoscyamus*.

CIRCUMSCRIBED (*Math.*) περιγεγραμμένος, an epithet for any figure so drawn about another as that each of its sides touch all the angles or planes of the inscribed figure. *Eucl. Elem. Def. 1. 4.*—*Circumscribed hyperbola*, one of Newton's hyperbolas of the second order.

CIRCUMSCRIPTION (*Phy.*) the certain bounds or limits of any natural body, which is either external or internal.—*External circumscription* is referred to the place in which any body is confined, and is termed local.—*Internal circumscription* is that which belongs to the essence and quality of any body whereby it has a determinate extension and figure.

CIRCUMSPÉCTE AGATIS (*Law*) the title of a statute made anno 13 Ed. I. stat. 4, relating to prohibitions, prescribing to the judges' cases in which the king's prohibition does not lie.

CIRCUMSTANTIBUS (*Law*) By-standers, a term signifying any number of jurors taken out of such persons as are present, to supply the deficiency after the number has been challenged. *Stat. 35 Hen. 8, c. 6; 5 Eliz. c. 25.*

CIRCUMVALLATION (*Fort.*) or a line of circumvallation, a trench bordered with a parapet thrown up around the besieger's camp, or round a town intended to be besieged.

CIRCUMVENTION (*Law*) in the Scotch law, any act of fraud whereby a person is reduced to a deed by decret.

CIRCUMVOLUTION (*Archit.*) the turns of the spiral line of the Ionic order.

CIRCUNCOLUMNIUM (*Archit.*) περιστόλιον, a place set round with pillars.

CIRCUNCURRENS (*Rhet.*) an epithet for the rhetorical art, because it is not limited to any certain matter.

CIRCUS (*Ant.*) ἵπποδρομος, a large circular building, particularly at Rome, where games were exhibited to the people. They were generally oblong, or nearly in the shape of a bow. In the middle was a bank or eminence, with obelisks, statues, and posts at each end, as in the annexed figure. This served them for the course of their *bigæ* and *quadrigæ*.

Ovid. Fast. l. 4, v. 391.

*Circus erit pompa cæleber, numeroque Deorum:
Primaque ventosis palma petetur equis.*

There were many of these buildings in Rome, but the most remarkable of the kind was the *Circus maximus*, built according to some by Romulus, according to others by Tarquinius Priscus, the length of which was 2187 feet, the breadth 960. It is said by some to have contained 300,000 spectators. *Dionys. Hal. l. 3; Liv. l. 1, c. 35; Plin. l. 8, c. 42; Aul. Gell. l. 5, c. 14; Tertull. de Spectac. c. 9; Chrysost. Serm. de Human; Isidor. Orig. l. 18, c. 27; Panvin. de Lud. Circ. l. 1, c. 13; Buleng. de Circ. c. 9; Ursat. de Not. Rom. apud Græv. Thes. Antiq. Rom. tom. 11, &c.*

CIRCUS (*Orn.*) $\kappa\acute{\iota}\rho\kappa\omicron\varsigma$, a kind of hawk. [vide *Accipiter*]
CIRCUS (*Surg.*) a circular bandage; called also *laqueus plinthius*.
CIRE PREPARE'E (*Mil.*) French for a preparation of yellow wax, tallow, and pitch, for closing up the heads of fuses.
CIRNE/SES (*Med.*) a union of separate things.
CIRRI (*Ich.*) the claws of the polyopus fish. *Plin.* l. 9, c. 28.
CIRRIFERUS (*Bot.*) tendril-bearing; an epithet for a leaf or a peduncle: *folium cirriferum*, a tendril-bearing leaf, as in *Fumaria*; *pedunculus cirriferus*, a tendril-bearing peduncle, as in *Cardiospermum* and *Vitis*.
CIRRHUS (*Bot.*) or *Cirrhus*, a tendril. [vide *Tendril*]
CIRSION (*Bot.*) a species of the *Carduus* of Linnæus.
CIRSIUM (*Bot.*) the *Arctium carduelis* of Linnæus.
CIRSO'CELE (*Med.*) vide *Circoccele*.
CIRSOIDES (*Med.*) from $\kappa\iota\rho\sigma\acute{o}\varsigma$, a varix, and $\epsilon\iota\delta\omicron\varsigma$, the form; i. e. resembling a varix or distended vein; varicous, an epithet applied to the upper part of the brain. *Ruff. Ephes. de Appell Part Hum. Corp.* l. 1.
CIRSOS (*Med.*) $\kappa\iota\rho\sigma\acute{o}\varsigma$, from $\kappa\iota\rho\sigma\acute{o}\omega$, to dilate; a varix, or preternatural distention of a vein.
CISIUM (*Ant.*) a light sort of two-wheeled carriage. *Cic. Rosc. Am.* c. 7; *Scheff. de Re Vhic.* l. 2, c. 18.
CISLEU (*Chron.*) the ninth month of the Jewish ecclesiastical year, and third of their civil year, answering nearly to our November. When this month is 29 days instead of 30 the year is called *deficient*. [vide *Chronology*]
CISSA (*Nat.*) vide *Pica*.
CISSAMPELOS (*Bot.*) a genus of plants, Class 22 *Dioecia*, Order 12 *Monodelphia*.
Generic Characters. CAL. none, unless the corolla be so called.—COR. petals four; nectary the membranaceous disk of the flower wheelshaped.—STAM. filaments four; anthers broad.—PIST. germ roundish; styles three; stigmas three.—PER. berry globular; seed solitary.
Species. The species are perennials or shrubs, as—*Cissampelos pareira*, *Clematis Convolvulus*, &c. *Caapeba*, seu *Abutylon*, native of South America.—*Cissampelos laurifolia*, a shrub, native of the island of St. Thomas.—*Cissampelos convolvulacea*, a shrub, native of the East Indies.—*Cissampelos caapeba*, seu *foliis*, &c. seu *Caapeba*, &c. a perennial, native of South America.
CISSAMPELOS is also the name of the *Pareira* of Linnæus.
CISSANTHEMOS (*Bot.*) $\kappa\iota\sigma\sigma\alpha\theta\epsilon\mu\omicron\varsigma$, a species of *Cyclamen*. *Dioscor.* l. 2, c. 195.
CISSARUS (*Bot.*) the *Cistus Creticus* of Linnæus.
CISSINUM (*Med.*) $\kappa\iota\sigma\sigma\iota\omega\omicron\varsigma$, a plaster for wounds of the nerves, &c. *P. Æginet.* l. 7, c. 17.
CISSITES (*Min.*) from $\kappa\iota\sigma\sigma\acute{o}\varsigma$, ivy; a precious stone, white and shining, with the figures of ivy leaves all over it. *Plin.* l. 37, c. 10.
CISSOID (*Geom.*) a curve of the second order, invented by Diocles, for the purpose of finding two continued mean proportionals between two other given lines, as the curve AM and Am, consisting of two infinite hyperbolic legs, having a right line AB for a diameter, and a right line CC its asymptote; so that calling AB, *a*; the abseiss AP, *x*; and the correspondent semiordinate PM, or Pm, *y*; it will be $y y \times a - x = x^3$. Sir Isaac Newton reckons this, in his *Enumeratio Linearum tertii ordinis*, amongst the defective hyperbolas.

CISSOS (*Bot.*) $\kappa\iota\sigma\sigma\acute{o}\varsigma$, a kind of ivy growing alone without stay. *Plin.* l. 16, c. 34.
CISSUS, in the *Linnean System*, a genus of plants, Class 4 *Tetrandria*, Order 1 *Monogynia*.

Generic Characters. CAL. involucre many-leaved; perianth one-leaved.—COR. petals four; nectary a rim surrounding the germ.—STAM. filaments four; anthers roundish.—PIST. germ roundish; style filiform; stigma simple.—PER. berry round; seed a roundish stone.

Species. The species are shrubs or perennials, as—*Cissus vitiginea*, &c. seu *Arbuscula*, &c. Vine-leaved *Cissus*, native of India.—*Cissus latifolia*, *Funis*, &c. seu *Schunambn*, &c. native of India.—*Cissus sicyoides*, *Vitis*, &c. *Irsiola*, &c. seu *Bryonia*, &c. a perennial, native of Jamaica.—*Cissus quadrangularis*, *Sælanthus*, *Funis*, seu *Planta*, &c. a perennial, native of Arabia.—*Cissus acida*, *Sicyos*, *Irsiola*, *Bryonia*, seu *Bryonioides*, &c. seu *Vitis*, &c. native of America.—*Cissus carnosa*, *Hedera*, seu *Tsjori-valli*, native of the East Indies.—*Cissus pedata*, *Sambucus*, seu *Belulla*, native of the East Indies.

CISSYMBIUM (*Ant.*) $\kappa\iota\sigma\sigma\upsilon\mu\beta\iota\omicron\varsigma$, a cup made of ivy, or bound about with ivy. *Cat. de Re Rust.* c. 110; *Macrob.* l. 5, c. 21.

CISTA (*Archæol.*) a vessel of wine, containing two measures, or a measure and a half.

CISTA (*Ant.*) $\kappa\iota\sigma\tau\eta\ \kappa\iota\sigma\tau\iota\varsigma$, a cupboard to hold provisions, or a trunk for clothes. *Poll.* l. 7, segm. 160.—*Cista mystica*, the mystic chest of Bacchus, which was used in celebrating his orgies.

Catull. carm. 64, v. 260.

*Celebrabant orgia cistis,
Orgia, quæ frustra cupiunt audire prophani.*

Tibull. l. 1, eleg. 7, v. 48.

Et levis occultis conscia cista sacris.

Apul. Met. l. 6.

CISTA Gratie (*Archæol.*) a church coffer in which the alms for the poor were kept.

CISTA (*Med.*) a Cyst, or tumour in which the obstructed matter collects, as in a bag.

CISTA'RTIUM (*Archæol.*) a bread basket.

CISTELA (*Ent.*) a division of the genus *cryptocephalus*, consisting of those species that have the lip bifid, and the body oblong.

CISTELLA (*Archæol.*) a little chest.

CISTERCIAN (*Ecc.*) vide *Cistercian*.

CISTERN (*Mech.*) a vessel, in the form of a box, into which confectioners put their creams to ice them over.

CISTERN (*Archit.*) *Cisterna*, a subterraneous reservoir for water. *Vitruv.* l. 8, c. 7. It is now any reservoir for water.

CISTERNA (*Anat.*) a name for the fourth ventricle of the brain; and also for the concourse of the lacteal vessels in the breasts of women.

CISTERTIAN Monks (*Ecc.*) in French *Cîteaux*, an order of Benedictine monks, instituted by Robert, abbot of Cîteaux, in France, in 1098. *Hel. Hist. des Ord. Mon.* tom. v, &c.

CISTIC oxide (*Chem.*) the name of an animal substance, found in a concrete form, in the human bladder, having the appearance of magnesian limestone.

CISTOIDES (*Bot.*) the *Mahernia pinnata* of Linnæus.

CISTUS (*Bot.*) $\kappa\iota\sigma\tau\omicron\varsigma$, $\kappa\iota\sigma\tau\acute{o}\varsigma$, or $\kappa\iota\sigma\tau\alpha\omicron\varsigma$, a herb, of an astringent quality, which was reckoned good to restrain spreading ulcers. *Theoph. de Hist. Plant.* l. 6, c. 2; *Dioscor.* l. 1, c. 126; *Hesychius*.

CISTUS, in the *Linnean system*, a genus of plants, Class 13 *Polyandria*, Order 1 *Monogynia*.

Generic Characters. CAL. perianth five-leaved; leaflets roundish.—COR. petals five—STAM. filaments numerous; anthers roundish.—PIST. germ roundish; style simple; stigma flat.—PER. capsule roundish; seeds numerous.

Species. The species are shrubs, as—*Cistus Capensis*, seu *arborescens*, &c. Cape *Cistus*.—*Cistus villosus*, Hairy Rock Rose, or Shrubby *Cistus*.—*Cistus populifolius*, *Ledon*, seu *Ledum*, &c. Poplar-leaved *Cistus*, or Rock

Rose.—*Cistus laurifolius*, *Ledon*, &c. seu *Ledum*, &c. Bay-leaved Gum Cistus, a shrub, native of Spain.—*Cistus ledon*, seu *Ladanifera*, *Ledum*, &c. seu *Ladanum*, native of the South of France.—*Cistus umbellatus*, *Ledon*, seu *Helianthum*, Umbelled Cistus, native of Spain.—*Cistus fumarius*, *Chæmécistus*, seu *Helianthemum*, Heath-leaved Cistus, native of France.—*Cistus Anglicus*, seu *Helianthemum*, &c. English Cistus.—*Cistus fruticosus*, *Helianthemum*, *Chamæcistus*, seu *Panax*, Dwarf Cistus, or Little Sun-Flower. But some of the species are annuals, as the—*Cistus plantagineus*, seu *herbaceus*, native of Crete.—*Cistus annuus*, Annual Spotted-Flowered Cistus, native of Italy. *Clus. Hist. Plant. rar.*; *Bauh. Hist. Plant.*; *C. Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*; *Raii Hist. Plant.*; *Tournef. Inst.*; *Linn. Spec. Plant.*

CISTUS is also the name of the *Diosma uniflora* and *Azalea Indica* of Linnæus.

CISTOPHORUS (*Numis.*) κιστοφόρος, an Asiatic coin, in value somewhat more than a denarius, equal to three oboli and a half, or twopence farthing. It was so called, because it bore the impression of the *cista mystica*, or the mysterious chest of Bacchus, as in the annexed figure, which represents the reverse of a medal of Mark Anthony and Cleopatra. *Cic. ad Att. l. 2, ep. 6*; *Beg. Thes. Brand.*

CITADEL (*Mil.*) in French *citadelle*, and Italian *citadella*, a fort of four, five, or six bastions, built near a city, on the most advantageous ground for commanding the place and its vicinity.

CITATION (*Law*) a summons to appear, applied particularly to the proceedings in the spiritual court. *Stat. 23 Hen. 8, c. 9.*

CITERNEAU (*Mech.*) French for a small reservoir, arched over so as to hold water.

CITHARA (*Ant.*) a musical instrument very similar to a lyre, although its exact form is not precisely known.

CITHAREXYLUM (*Bot.*) a genus of plants, Class 14 *Dydynamia*, Order 2 *Angiosperma*.

Generic Characters. CAL. *perianth* one-leaved.—COR. one-petalled; *tube* twice as long as the *perianth*; *border* five-parted; *segments* above villose.—STAM. *filaments* four; *anthers* oblong.—PIST. *germ* roundish; *style* filiform; *stigma* obtuse-headed.—PER. *berry* roundish; *seeds* two.

Species. The species are shrubs, as the—*Citharexylum cinereum*, seu *Jasminum*, &c. Ash-coloured Fiddle-wood, native of South America.—*Citharexylum caudatum*, seu *Berberis*, &c. Oval-leaved or Long-spiked Fiddle-wood, native of Jamaica, &c.

CITHARUS (*Anat.*) κίθαρος, the breast, as Galen explains in his Exegesis. *Erot. Lex. Hippocrat.*

CITHARUS (*Ich.*) a fish called Folio, whose teeth are like a saw. *Aristot. Hist. Anim. l. 2, c. 17*; *Plin. l. 32, c. 10.*

CITIZEN (*Law*) a freeman of a city.

CITOLE (*Mus.*) a musical instrument, which consisted of nothing but a small chest, *cistella*, with strings on the lid or top.

CITRA (*Bot.*) the Citron-tree; a reddish sweet scented wood, of an aromatic flavour, growing in the East Indies.

CITERAGO (*Bot.*) Balm-gentle.

CITRATE (*Chem.*) the name for salts formed by the union of citric acid with different bases, as the *Citrate of Ammonia*, *Citrate of Potash*, &c. [vide *Chemistry*]

CITREA *malus* (*Bot.*) the *Citrus medica* of Linnæus.

CITREUM (*Bot.*) or *Malum citreum*, is the Latin name for the *Citrus medica* of Linnæus, which is called by Theophrastus and Dioscorides μήλον Μηδικόν. *Theoph. Hist. Plant. l. 4, c. 4*; *Dioscor. l. 1, c. 166*; *Plin. l. 12, c. 3*; *Athen. l. 3, c. 7.*

CITRIC acid (*Chem.*) the acid of lemons, which is obtained in concrete crystals, by saturating boiling lemon juice with pulverized chalk, and treating it with sulphuric acid.

CITRINATION (*Nat.*) complete digestion.

CITRINE (*Min.*) vide *Citrinus*.

CITRINELLA (*Orn.*) a bird about the size of a lark; so called from its yellow or lemon colour. *Gessn. de Av.*

CITRINULA (*Bot.*) spearwort, a herb much used by Paracelsus.

CITRINULUS (*Min.*) a stone between a crystal and a beryl. CITRINUS (*Min.*) a peculiar species of sprig crystal, which is distinguished by its beautiful yellow colour. It is called by the jewellers *citrine*.

CITRON (*Bot.*) a pleasant fruit of the lemon kind, which is the fruit of the *Citrus medica* of Linnæus. The inside is white, fleshy, and thick, containing but a small quantity of pulp, in proportion to the size of the fruit.—*Citron water*, a strong water distilled from lemon-peel, orange-peel, and nutmegs in alcohol.—*Citron-tree*, another name for the Candle-wood-Tree.

CITRULUM (*Bot.*) or *Citrullus*, Citrul, a kind of pumpkin or gourd; the *Cucurbita citrullus* of Linnæus.

CITRUS (*Bot.*) the Citron, called by Theophrastus and Dioscorides μήλον Μηδικόν. [vide *Citreum*]

CITRUS, in the *Linnean system*, a genus of plants, Class 18 *Polyadelphia*, Order 3 *Icosandria*.

Generic Characters. CAL. *perianth* one-leaved.—COR. *petals* five.—STAM. *filaments* erect; *anthers* oblong.—PIST. *germ* superior; *style* cylindrical; *stigma* globular.—PER. *berry* nine-celled; *seeds* in couples.

Species. The species are—*Citrus medica*, *Lemon*, *Lemonellus*, seu *Malus limonia*, &c. a shrub, native of Asia. This species comprehends the Citron, the Lemon, and the Lime.—*Citrus aurantium*, *Aurantium*, seu *Malus*, &c. seu *Aurantia*, the Orange, a shrub, native of India.—*Citrus decumana*, &c. *Limo*, *Malus*, *Pumpelmus*, seu *Aurantium*, &c. Shaddock, a shrub, native of India.

CITTA (*Med.*) vide *Pica*.

CITTERN (*Mus.*) vide *Guitar*.

CITTO'SIS (*Bot.*) a disease in vines when grapes fall from the clusters and perish.

CITY (*Polit.*) contracted from the Latin *civitas*, formerly signified any large and populous place, which had, like its original, a particular reference to the inhabitants; but it is now applied solely to such corporate towns as have a bishop's see and a cathedral church. It was sometimes rendered by *civitas*, to denote its importance, sometimes by *oppidum*, the common term for any inhabited place or town; and sometimes by *urbs*, to denote that it was a walled town.

CIVES (*Bot.*) a name for a sort of leeks; the *Allium schnænoprasum* of Linnæus.

CIVET (*Zool.*) an animal of the weasel kind, about the size of a cat; the *Viverra civetta* of Linnæus, which inhabits Æthiopia, Congo, and the Cape of Good Hope. The fat under its tail, near the anus, is the perfume called civet.

CIVET (*Com.*) a perfume which smells like musk, from a bag under the tail of the civet cat and the zibet, two species of the *Viverra* of Linnæus.

CIVET (*Cook.*) a particular way of dressing fowls, by first frying and afterwards stewing them.

CIVICA corona (*Ant.*) the Civic Crown, a garland of oak, which was given to a Roman soldier who had saved the life of a citizen in battle, which was also commemorated on medals, as in the annexed figure, representing the crown, with the words OB. CIVIS. SERVATOS, to be found on the reverse of a medal, struck by Q. Ælius Flaminius.

CIVIERE (*Mil.*) French for a small hand-barrow, carried by two men, and used much in the artillery.

CIVIL Law (*Law*) is commonly defined to be that law which every particular nation or society of people has established for its own use, which is more commonly called *municipal law*; and the term *civil law* is now applied particularly to that law which was used by the Romans, and collected under the auspices of the emperor Justinian into a code or body of Law, consisting of, 1. Institutes, or first principles of Roman Law, which were so called because they served for instruction. 2. The *Digests* or *Pandects*, containing the opinions of eminent lawyers digested in methodical order. 3. Novels or Authentics, i. e. laws so called, because they were new, and authentically translated from the Greek into the Latin tongue. To these branches of the *Civil Law* may be added the *Book of Feuds*, containing the laws of the feudal system; and the *Constitutions of the Emperors*, which were either in the shape of rescripts or edicts. The *Civil Law* is used in England, under certain restrictions, in the Ecclesiastical Courts, Military Courts, or Courts of Chivalry, Courts of Admiralty, and the Courts of the two Universities — *Civil death*, any thing which cuts a man off from civil society, as outlawry, banishment, and the like.—*Civil List* is that which comprehends the whole of the King's revenue in his own distinct capacity, and serves to defray all expenses immediately connected with civil government, as the royal household, officers of state, judges, &c.

CIVIL war (*Polit.*) a war between subjects of the same state, or citizens of the same city.

CIVIL (*Chron.*) is applied as an epithet to different divisions of time, which are framed for the purposes of civil society, in distinction from those which correspond with the motions of the heavenly bodies, as the *civil day*, which is twenty-four hours, including day and night, in distinction from the solar day, which is twelve hours; and the *civil year*, which is 365 days, and in leap year 366, distinguished from the solar year, which is 365^d 6^h 48^m 48^s. [vide *Chronology*]

CIVILIAN (*Law*) a doctor, professor, or student in the Civil Law.

CLACK of a Mill (*Mech.*) a bell that rings when more corn is required to be put into the mill.

to **CLACK wool** (*Law*) to cut off the sheep's mark to make it weigh lighter, in distinction from *forcing wool*, which is to cut off the upper and hairy part; and *barbing wool*, which is to cut off the head and neck from the rest of the fleece. *Stat. 8, Hen. 6, c. 22.*

CLADUS (*Archæol.*) a hurdle or wattle.

CLAFER (*Chem.*) Bone-flour; or a powder prepared from the bones of the cranium of a calf.

CLAIIE (*Mil.*) French for a hurdle which is used during a siege.

CLAIM (*Law*) a challenge of interest in any thing that is in the possession of another, or at least out of a man's own possession, as claim by charter, by descent, &c. A claim is either verbal, when it is made by words; or it is by an action brought, relating sometimes to lands, and sometimes to goods and chattels.—*Continual claim* is where a man has right and title to enter into any lands or tenements, whereof another is seized in fee or in fee-tail.—*Claim of liberty* is a suit or petition to the king to have liberties and franchises confirmed there by the King's Attorney-general.

CLAIR obscur (*Paint.*) vide *Claro obscuro*.

CLAIR-VOGE (*Carpent.*) French for too wide a space between beams and rafters.

CLAIRON (*Mil.*) French for a species of trumpet which is shriller in its sound than the ordinary trumpet.

CLAM (*Com.*) a small weight, and an imaginary coin at Siam.

CLAMEA admittenda in Itinere per Attornatum (*Law*) an ancient writ by which the King commanded the justices in Eyre to admit a person's claim by attorney, who was employed in the king's service, and could not come in his own person. *Reg. Orig. 19.*

CLAMP (*Carpent.*) a little piece of wood in the fashion of a wheel used instead of a pulley in a mortice, as in the flaps of shutters, kitchen tables, and the like.—*Clamp-nails*, such as are used to fasten clamps in building and repairing ships.

CLAMP (*Mar.*) [vide *Cap-square*]—*Clamp* is also a piece of timber applied to a mast for strengthening it.

CLAMP of bricks (*Mech.*) a pile of bricks raised for burning, —*Clamp-irons* at the ends of hearths to keep up the fuel. called also *creepers* or *dogs*.

CLAN (*Polit.*) a term used among the Scotch for a number of families subject to one chief.

CLANDESTINA (*Bot.*) the same as the *Lathræa* of Linnaeus.

CLAP (*Med.*) the *Gonorrhœa impura*.

CLAP (*Sport.*) the nether part of a hawk's beak.—*Clap net*, a sort of net used in birding, which was contrived for catching larks by means of a looking-glass.

CLAP-BOARD (*Carpent.*) a board ready cut for making casks.

CLAPPER (*Sport.*) a place under ground where rabbits breed.

CLAPPER (*Mech.*) that part of a bell with which the sound is produced.

CLARENCE/UX (*Her.*) the second king at arms, appointed by Edward IV. on the death of the duke of Clarence, from whom he received his name. His office is to marshal and dispose the funeral of all knights and esquires on the south of the river Trent.

CLARENDON, *Constitutions of* (*Law*) certain constitutions made in the reign of Henry II. in 1164, whereby the power of the pope and clergy was much curtailed. They were so called from Clarendon, in Wiltshire, the place where they were enacted.

CLARET (*Com.*) a general name for the red wines of France.

CLARE/TA (*Nat.*) the white of an egg.

CLARETUM (*Med.*) a wine impregnated with spices and sugar, otherwise called *vinum Hippocrateum*. There is also a *claretum purgativum*, which is mentioned by Schroeder in his Pharmacopia.

CLARICORDS (*Mus.*) a stringed instrument formerly in use, the strings of which were supported by five bridges. It much resembled a spinnet; but the strings were covered with a piece of cloth, so as to deaden the sound and render it softer.

CLARIFICATION (*Chem.*) the process of making any liquid, clear or free from heterogeneous matter. The substances usually employed for clarifying liquors are whites of eggs, blood, and isinglass.

CLARIGATIO (*Ant.*) 1. A demanding satisfaction for an injury, by an outcry, as it were, *claritate vocis*, which being done, war was proclaimed, as Livy informs us, by the Pater-patrus, who went for this purpose to the enemy's borders. *Liv. l. 1, c. 32; Plin. l. 22, c. 2; Serr. in Æn. l. 9, v. 53.* 2. An arrest or seizure of the person, which was called by the Greeks ἀπολόγησις. *Liv. l. 8, c. 14; Gloss. Lat. Græc. Philox.; Justinian. Novell. 52; Tumul. Adv. l. 21, c. 1.*

CLARINET (*Mus.*) a wind instrument of the reed kind, the scale of which includes every semitone; but it is heard to advantage only on the keys C and F.

CLARINO (*Mus.*) a kind of trumpet, consisting of a narrower tube than ordinary, and sending forth a very shrill note.

CLARION (*Mus.*) an octave trumpet.

CLARION (*Her.*) a bearing which represents an old fashioned trumpet used in war, as in the annexed figure. "He beareth *argent*, a chevron between three Clarions, *gules*, by the name of *Arthur*, of Clopton, in Somersetshire."

CLARMA'RTHEN (*Law*) a term in the Scotch law for warranting stolen goods.

CLARO *obscurus* (*Paint.*) or *Clair-obscurus*, the art of distributing to advantage the lights and shades of a piece, so as to render it most pleasing to the eye, and give at the same time most effect to the whole piece.—*Claro-obscurus*, or *Chiaro-oscuro*, is sometimes employed to signify a design of two colours, as black and white, or black and yellow; also prints of two colours taken off at twice.

CLARY-WA'TER (*Med.*) a water composed of brandy, sugar, clary-flowers, and cinnamon, with a little ambergris dissolved in it.

CLASIS (*Med.*) κλάσις, from κλάω, to break; a fracture.

CLASMIUM (*Min.*) an old term for a certain description of gypsums, which are of a soft texture, and of a dull opaque look.

CLASPER (*Bot.*) another name for the *cirrus* or *tendrill*. [vide *Tendrill*]

CLASS (*Ant.*) vide *Classis* and *Census*.

CLASS (*Nat.*) a term applied to the most general subdivision into which the kingdom of nature is divided. The animal kingdom, in the *Linnean system*, is divided into 6 classes, the vegetable kingdom into 24, &c. Each class includes a certain number of orders, genera, species, &c. of which a description may be found under the respective heads.

CLASS (*Lit.*) is a scholastic term applied to any number of youth in a school who are of the same form, and learn the same thing.—*Class* in the University of Oxford is the division of the candidates who are examined for their degrees according to their rate of merit. Those who are entitled to this distinction are denominated *classmen*, answering to the *optimes* and *wranglers* in the University of Cambridge.

CLASSIARIUS miles (*Ant.*) a seaman, or one who served in the navy. *Cæs. de Bell. Civil.* l. 1, c. 58; *Hist. de Bell. Alex.* c. 11; *Tacit. Annal.* l. 15, c. 51; *Scheff. de Mil. Naval.* l. 2, c. 3.

CLASSICAL (*Lit.*) an epithet for authors and books which have acquired an established authority. [vide *Classicus*]

CLASSICEN (*Ant.*) or *Classicarius*, the trumpeter, or he who sounded the *classicum*.

CLASSICUS (*Lit.*) a term applied in an especial manner to the writings of the ancients in the Latin and Greek.

CLASSICUM (*Ant.*) a flourish with the trumpet, which was sounded by the trumpeter either to assemble the army or to give the signal for battle. *Senec. Œdip.* act 3, v. 733.

Sonuit reflexo classicum cornu.

Varr. de Lat. Ling. l. 5, c. 9; *Liv.* l. 7, c. 36, l. 38, c. 27; *Serv. in Æn.* l. 8, v. 637; *Veget.* l. 2, c. 22; *Isid. Orig.* l. 18, c. 4.

CLASSICUS (*Ant.*) 1. vide *Classicen*. 2. A denizen or freeman; one who is assessed and placed in a certain class of the citizens, but more particularly those who were of the first class, the aldermen or chief men of the city; whence the term *classicus scriptor* in Aulus Gellius for a classical writer, or an author of the first rank and authority.

CLASSIFICA'TION (*Phil.*) in its general sense, implies the disposing of any thing in a certain order, but in its particular sense is applied to the artificial arrangement of natural objects according to their external characters.

CLASSIS (*Ant.*) the class or division which was formed of the Roman people according to the estimate of their estate.

Those of the first class, distinguished by the name of *classici*, were not to be worth less than 200*l.* [vide *Census*]

CLATES (*Fort.*) vide *Clayes*.

CLATHROIDES (*Bot.*) and *Clathroidastum*, a species of the *Clathrus*.

CLATHRUS (*Bot.*) a genus of *Fungi*.

CLAVA *Herculis* (*Bot.*) the *Xanthoxylum clava Herculis* of Linnæus.—*Clava rugosa*. [vide *Calamus aromaticus*]

CLAVA (*Conch.*) a genus of animals, Class *Vermes*, Order *Mollusca*.

Generic Character. Body fleshy and clavate: aperture angle and vertical.

CLAVARIA (*Bot.*) a genus of *Fungi*.

CLAVARIUS (*Archæol.*) a verger or mace-bearer.

CLAVATIO (*Anat.*) a sort of articulation without motion, where the parts are as it were driven in with a hammer, like the teeth in a socket.

CLAVATUS (*Bot.*) an epithet for the Leaf, as in *Anabasis foliosa*; for the Petiole and the Peduncle; for the Calyx, as in *Iclene*; for the Style, as in *Leucoium vernum*; for the Capsule, as in *Papaver Argemone*.

CLAUDERE (*Law*) to inclose land, and *claud*, a ditch, or inclosure. *Ken. Paroch. Antiq.*

CLAUDYACON (*Med.*) κλαυδιakon, a collyrium. *P. Æginet.* l. 7, c. 16.

CLAUDICA'TIO (*Med.*) lameness.

CLAVE (*Mar.*) a stool fourteen inches high, on which the shells are set up with wedges for making the sheave-holes.

CLAVE *Cymbala* (*Mus.*) vide *Clavicembalum*.

CLAVECIN (*Mus.*) vide *Clavicembalum*.

CLAVELLA'TI cineres (*Chem.*) a name for potash, so called from the little billets into which the wood was cut in obtaining it.

CLAVES *Insulæ* (*Law*) or keys of the island; a name given to the twelve weighty men who are chosen in the Isle of Man to determine difficult cases.

CLAVES signatæ (*Mus.*) a name for the coloured lines used by Guido, before the invention of cliffs, to determine the situation and power of notes.

CLAVIA (*Archæol.*) *per serjeantiam clavice*, i. e. by the serjeanty of the club or mace, is a sort of tenure in the counties of Essex and Hertford mentioned in the inquisition of serjeanties in the 12th and 13th of King John.

CLAVICE'MBALUM (*Mus.*) an ancient name for the harp.

CLAVICITHE'RIUM (*Mus.*) another name for the clarichord.

CLAVICULÆ (*Bot.*) vide *Tendrill*.

CLAVICULÆ (*Anat.*) κλαυδες, clavicles; the two channel-bones, or two small bones which fasten the shoulder-bones and breast-bone, being as it were keys situated at the basis or bottom of the neck, above the breast, each resembling a letter S in form. They are aptly enough described by Homer when he speaks of the part which Achilles aimed at in his contest with Hector.

Hom. Il. l. 22, v. 324.

Φαίνεται δ' ἢ κληίδες ἀπ' ὤμων αὐχέν' ἐχέσει
Δευκανίης ἵνα τε ψυχῆς ὠκυγῆος θάερος.

CLAVICULUS (*Bot.*) vide *Tendrill*.

CLAVIGER (*Ant.*) Club-bearer; an epithet for Hercules, who is mostly represented on coins and medals carrying a club.

CLAVIGERATUS (*Archæol.*) a treasurer of a church. *Mon. Angl.* tom. 1, p. 184.

CLAVIS (*Mus.*) cliff, or key. [vide *Cliff*]

CLAVIS (*Lit.*) a key, or whatever serves to decypher or explain.

CLAVIS siliginis (*Bot.*) a name for smutted rye.

CLAVIS (*Chem.*) any menstruum, particularly of minerals, which unlocks them as it were, and penetrates their inner substance.

CLAUSE (*Law*) an article, condition, or provision in a contract, deed, or other instrument.—*Clause rolls*, rolls containing records committed to close writs preserved in the Tower.—*Clause in the Scotch law* is of two kinds, *irritant* and *resolutive*.—*Clause irritant* is any provision which makes a penalty be incurred, and the obligation to be null for the future; or upon any other account makes the right to vacate or resolve.—*Clause resolutive*, a provision whereby the contract to which it is affixed is, for non-performance, declared to have been null from the beginning.

CLAU'SE-ROLLS (*Law*) vide *Close-Rolls*.

CLAU'SIKE (*Vet.*) the first rot in sheep.

CLAU'STRUM *gutturis* (*Med.*) the passage to the throat, which lies immediately under the root of the tongue and the tonsils.

CLAU'SUM *fregit* (*Law*) a writ in an action of trespass; so called because it demands the person summoned to answer *quare clausum fregit*, why he committed such a trespass.—*Clausum paschice*, the end of Easter, or Sunday after Easter-Day, so termed because it concludes that festival.

CLAUSURA (*Med.*) an imperforation of any canal or cavity of the body; thus *Clausura Uteri* is a preternatural imperforation of the uterus.

CLAVUS (*Ant.*) signified, 1. A nail, as *clavus annalis*, the nail which was annually driven into the wall of Jupiter's temple by the Prætor, Consul, or Dictator, on the Ides of September, by which at first an account of the Roman years was kept. *Liv. l. 7, c. 3; Fest. de Verb. Signif. 2.* The rudder or helm of a ship. *Cic. ad Fam. l. 9, ep. 15; Serv. in Æn. l. 5, v. 177. 3.* A knap of purple, which was worn as a badge of distinction by Senators, whence the dignity itself was also called *clavus*; and *clavum tribuere aut adimere*, signified to raise one to the dignity of a senator, or to degrade him from it. The *clavus* was distinguished into the *latus clavus*, which belonged especially to senators, and the *clavus angustus*, which belonged to knights. The former of these is frequently mentioned or alluded to by the poets.

Ovid. Trist. l. 4, eleg. 10, v. 27.

Induiturque humeris cum lato purpura clavo.

Mart. l. 4, ep. 46.

Et lato variata mappa clavo.

This *clavus* was also worn by the priests of Saturn.

Sil. Ital. l. 3, c. 26.

*Discinctis mos thura dare, atque e lege parentum
Sacrificam lato vestem distinguere clavo.*

Sometimes the *clavus angustus* is likewise alluded to.

Mart. l. 5, ep. 17.

*Dum proavos atavosque refers, et nomina magna;
Dum tibi noster Equus sordida conditio est;
Dum te posse negas nisi lato, Gellia, clavo
Nubere; nupsisti, Gellia, cistifero.*

Ovid. Trist. l. 4, eleg. 9, v. 35.

*Curia restabat: clavi mensura coacta est:
Majus erat nostris viribus illud opus.*

Stat. Silv. l. 4.

Contextus areto lumine purpura.

Stat. Sylv. l. 5.

— non sanguine cretus
*Turmalis, trabeaque Remi, nec paupere clavo
Augustam sedem, et Latii penetrale senatus
Advena pulsasti.*

*Varr. de Ling. Lat. l. 1; Hor. sat. 6, v. 28; Strab. l. 3;
Pctron. Arb. c. 32; Quintil. l. 8, c. 5; Tertull. de Pall.
c. 4; Herodian. l. 5, c. 5; Sueton. Claud. c. 24; Ammian.
l. 16, c. 8; Isidor. Orig. l. 9, c. 4.*

CLAVUS (*Med.*) 1. A name for tubercles in different parts of the body, as *clavus pedum*, hard skin on the toes or soles

of the feet, corns; *clavus oculorum*, a staphyloma or tumour on the eye-lids; *clavus uteri*, an indurated tubercle in the uterus. *Cels. l. 7, c. 7; Plin. l. 30, c. 10; Plin. Valer. l. 2, c. 5; Marcell. Empir. c. 34. 2.* A fixed pain in one part of the forehead, not exceeding a thumb's breadth in extent. It much resembles the sensation which the driving a nail into the head might occasion, from which it derives its name. When connected with hysterics, as it is sometimes, it is called *Clavus hystericus*.

CLAWA (*Law*) a close, or small inclosure. *Mon. Angl. tom. 2.*

CLAWING (*Mar.*) or *clawing off*, in French *chicaner*, beating or turning to windward from a lee-shore.

CLAY (*Min.*) a fat clammy sort of earth, which is classed in the Linnean system under *Argilla*. It is distinguished into different kinds, as—Common Clay, or Brick-Clay, *Argilla communis*.—Potter's Clay, *Argilla lithomania*.—Pipe Clay, *Argilla leucargilla*.—Porcelain Clay, *Argilla porcellana*.

CLAYES (*Fort.*) or *Clates*, wattles made of stakes interwoven with osiers, &c. to cover lodgments, having earth heaped upon them; they are also used to lay in ditches that have been drained, and on marshy grounds, &c.

CLAYMORE (*Mil.*) vide *Clymore*.

CLAYTONIA (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Characters. CAL. perianth bivalve.—COR. petals five.—STAM. filaments five; anthers oblong.—PIST. germ roundish; style simple; stigma trifid.—PER. capsule roundish; seeds three.

Species. The species are, the—*Claytonia virginica*, a perennial, native of Virginia.—*Claytonia sibirica*, seu *Limnia*, a perennial, native of Siberia.—*Claytonia perfoliata*, an annual, native of N. America.

CLEAN (*Mar.*) an epithet applied to the sharp part of a ship, both fore and aft.

CLEAN proof (*Print.*) a proof that has but few faults in it.

CLEAR (*Mar.*) an epithet applied to various objects, as a *clear coast*, which is free from rocks, sands, or any thing else to impede the navigation. A cable, &c. is *clear* when it is disentangled. Weather is *clear*, as opposed to the foggy or cloudy.

CLEAR (*Carpent.*) an epithet for joists that are at a proper distance apart from each other.—*Clear story windows* are those which have no transom in their height.

CLEAR vision (*Opt.*) is produced by a great quantity of rays in the same pencil, enlignening the correspondent points of the image strongly and vigorously.

TO CLEAR (*Mar.*) is applied to different objects, as "*To clear the anchor*," in French *degager l'ancre*, to get the cable off the flooks. "*To clear the hawse*," in French *de-faire le croix*, to untwist the cables which are entangled. "*To clear out*," or "*To clear out a ship*," to obtain leave for filling the cargo and sailing out by paying the customs. **TO CLEAR the trenches** (*Mil.*) to drive out those that guard them.

CLEARER (*Mech.*) a tool on which the hemp is always finished for making ropes, &c.

CLEATS (*Mar.*) in French *Taquets de manœuvres*; pieces of wood differently shaped, and occasionally used in a ship to fasten ropes upon. They are of different kinds, according to their form, as—*Belaying cleat*, which is formed with two arms.—*Comb cleat*, which is straight on the inner edge.—*Mast cleat*, which is made with a score to admit a seizing, and a hole in the centre for an under seizing.—*Shroud cleat*, formed like the belaying cleat, but with a grooved edge.—*Single cleat*, formed with one arm only.—*Stop cleat*, nailed on the bowsprit for gammoning collars, &c.—*Thumb cleat*, similar to a single cleat, but smaller.

CLE'AVER (*Mech.*) a butcher's axe for chopping the bones of meat.

CLE/VERS (*Bot.*) the *Galium aperine*, an annual so called because it is a climbing plant that cleaves to other plants for its support.

CLECHE (*Her.*) or *detché*, an epithet for a cross, or any ordinary pierced throughout, so that nothing of it remains except the edgés.

CLE/DONES (*Ant.*) κληδόνες, ominous words or presages drawn from voices or words. This sort of divination was most in use at Smyrna, where, according to Pausanias, they had κληδόνων ἱερόν, a temple, in which answers were returned this way. *Paus.* l. 9; *Hesychius*.

CLEF (*Arch.*) French for the key-stone of an arch.

CLEF de mousquet (*Mil.*) an iron instrument with one square hole and a handle, with which the piece is cocked.

CLEFF (*Mus.*) vide *Cliff*.

CLE/FT-GRAFTING (*Hort.*) a mode of ingrafting by cleaving a tree and inserting a branch.

CLEFTS (*Vet.*) cracks in the pasterns of a horse, supposed to be caused by a sharp humour.

CLEG *goose* (*Her.*) the same as *Barnacle*.

CLEP/DIES (*Anat.*) the same as *Claviculae*.

CLEP/DION (*Med.*) κλειδίων, a pastil described by Galen and Paulus Ægineta. *Gal. de Comp. Med. sec. Loc.* l. 9, c. 5; *P. Æginet.* l. 7, c. 12.

CLEIDOMASTOIDEUS (*Anat.*) a muscle. vide *Sterno-cleidomastoideus*.

CLEINE *alt possanne* (*Mus.*) another name for a Sacbut.

CLEISA/GRA (*Med.*) from κλείς, the clavicle, and ἄγρα, a prey; the gout in the articulation of the clavicles to the sternum.

CLEI/THRON (*Anat.*) vide *Claustrum*.

CLE/MA (*Bot.*) κλήμα, the twig or tendril of a plant.

CLE/MATIS (*Bot.*) κληματίς, a plant so called because it has κλήματα, tendrils. *Dioscor.* l. 4, c. 7; *Plin.* l. 24, c. 15; *Gal. de Simpl.* l. 7.

CLEMATIS, in the *Linnean System*, a genus of plants, Class 13 *Polyandria*, Order 3 *Polygynia*.

Generic Characters. CAL. none. — COR. petals four. — STAM. filaments very many; anthers growing to the size of the filaments. — PIST. germs very many; styles longer than the stamens; stigmas simple. — PER. none; receptacle headed; seeds very many.

Species. The species are shrubs, as the *Clematis cirrhosa*, &c. Evergreen Virgin's Bower, native of Æticia. — *Clematis florida*, &c. Large-flowered Virgin's Bower, native of Japan. — *Clematis viticella*, seu *Clematilis*, &c. Purple Virgin's Bower, native of Italy. — *Clematis viorna*, *Flaminula*, &c. *Scandens*, &c. Leathery-flowered Virgin's Bower, native of Virginia. — *Clematis vitalba*, Common Virgin's Bower, Wild Climbers, or Traveller's joy, native of the south of Europe.

CLEMATIS is also the *Atragene Zeylanica*.

CLEMA/TITIS (*Bot.*) κληματίτις, a plant so called because it climbs up trees by its claspers, or tendrils. *Dioscor.* l. 4, c. 182; *Plin.* l. 25, c. 8; *Clus. Hist. Rar. Plant.*; *Bauh. Pin.*; *Raii Hist. Plant.*

CLEMATITIS is now another name for *Clematis*.

CLEMENTINES (*Eccl.*) a part of the canon law, consisting of decretals or constitutions of Pope Clement V., and enacted into laws by the council of Vienna.

CLE/NCH-BOLTS (*Carpent.*) iron pins in a ship clenched at the ends which are carried through. — *Clench-nails* are such as will drive through a board without splitting it.

CLE/OME (*Bot.*) a genus of plants, Class 15 *Tetradynamia*, Order 2 *Siliquosa*.

Generic Characters. CAL. perianth four-leaved. — COR. four-petalled. — STAM. filaments six; anthers lateral. — PIST. germ oblong; style simple; stigmas thickish. — PER. siliqua long; seeds very many.

Species. The species are shrubs, and annuals, as the *Cleome juncea*, &c. a shrub, native of the Cape of Good Hope. — *Cleome heptaphylla*, seu *Ericago*, *Sinapistrum*, &c. *Pentaphyllum*, &c. Seven-leaved Cleome, an annual, native of the Indies. — *Cleome pentaphylla*, *Sinapistrum*, &c., *Papaver*, &c. *Quinquifolium*, &c. seu *Cupa*, &c. Five-leaved Cleome, an annual, native of the Indies. — *Cleome icosandra*, *Sinapistrum*, &c. seu *Lagansa*, &c. an annual, native of Ceylon.

CLEONIA (*Bot.*) a genus of plants, Class 14 *Didynamia*, Order 1 *Gymnospermia*.

Generic Characters. CAL. perianth one-leaved, upper lip flattish, lower two-parted. — COR. one-petalled, upper lip straight, lower bifid. — STAM. filaments four; anthers crossed in pairs. — PIST. germ four-parted; style filiform; stigmas four. — PER. none; calyx closed with hairs; seeds four.

Species. The only species is the *Cleonia lusitanica*, *Brunella*, &c. *Prunella*, &c. *Clinopodium*, &c. seu *Bugula*, &c. Sweet-scented Cleonia, an annual, native of Portugal.

CLEONICIUM (*Bot.*) the same as *Clinopodium*.

CLEONIS collyrium (*Med.*) a collyrium described by Celsus. *De Re Med.* l. 6, c. 6.

CLEONIS gluten (*Med.*) a medicine described by Orobasisus. *Med. Coll.* l. 4.

CLEP (*Law*) a form of claim, libel, or petition, in the Scotch Law.

CLEPSAMMIDIUM (*Ant.*) an hour-glass which measured time by the running out of the sand.

CLEPSYDRA (*Dial.*) κλεψύδρα, in French *clepsydre*, a water-clock, so called from κλέπτω, to steal, and ὕδωρ, water, because the water steals, as it were, out of the glass. An instrument of early invention for the purpose of measuring time in an hour-glass, by means of running water or sand. Orators, both among the Greeks and Romans, were regulated by this hour-glass, as to their time of speaking, which was called pleading, πρὸς κλεψύδραν, by the clepsydra, to which Martial refers.

Mart. l. 6, epig. 35.

*Septem clepsydras, magna tibi voce petenti
Arbitur invitus Cæciliane dedit.*

Aristot. Poet.; *Demosthen. Orat.* πρὸς παρακρησθ. *Cic. Or.* l. 3, c. 34; *Vitruv.*

CLEPSYDRA (*Surg.*) an instrument mentioned by Paracelsus, for conveying suffumigations to the uterus.

CLE/RGY (*Eccl.*) *Clerici*, now signifies all persons who are in holy orders, and in ecclesiastical offices, as Archbishops, Bishops, Deans, and Chapters; Parsons, who are rectors or vicars, and curates. Formerly the clergy were divided into regulars and seculars. The regulars were such as lived under the rules of some order, as Abbots, Monks, &c. — The seculars were those who lived under no such rules, as Bishops, Deans, and Parsons. [vide *Clerk*] — *Benefit of clergy*, an ancient privilege whereby one in orders claimed to be delivered to his ordinary to purge himself of felony, which was also extended to the laity. [vide *Benefit*]

CLE/RICO *admittendo* (*Law*) vide *admittendo clericus*. — *Clerico infra sacros ordines constituto, non eligendo in officium*; a writ directed to those who have thrust a bailiwick, or other office, on one in holy orders, charging them to release him. *Reg. Orig.* 143. — *Clerico capto per statutum mercatorum*, &c. a writ for the delivery of a clerk out of prison, who is taken and imprisoned upon the breach of a statute merchant. *Reg. Orig.* 69.

CLERK (*Law*) *clericus*, a term peculiarly applied to a clergyman, or one who belongs to the Holy Ministry of the Church. The word is derived from *clerus*, a lot, signifying

to be *de clero Domini*, of the Lord's lot, as the tribe of Levi was in Judca.

Clerk, in another sense, is taken for one who practises his pen in any court or office; so called because formerly these offices were executed principally by the clergy. Clerks are of different kinds, according to their office, viz.—*Clerk of the Acts*, an officer in the Navy Office, whose business it is to record all orders, contracts, bills, warrants, &c. transacted by the Lords Commissioners of the Admiralty.—*Clerk of affidavits*, an officer in the Court of Chancery who files all affidavits.—*Clerk of the assize*, he who writes all things down that are judicially done by the justices of assizes in their circuits. *Crompt. Juris.* 227.—*Clerk of the bails*, an officer who files the bail pieces taken in the Court of King's Bench.—*Clerks in Chancery*, six clerks under the twelve Masters. [vide *Chancery*]—*Clerk of the cheque*, an officer in the King's Court, so called because he has the check and controlment of the yeomen of the guard, and all other yeomen belonging to the King, Queen, or Prince of Wales.—*Clerk of the closet*, a clergyman, otherwise called *confessor to his Majesty*, whose office it is to attend the King at all religious services, and in all spiritual matters.—*Clerk controller of the King's House*, whose office it is to allow or disallow charges of Pursuivants, Messengers, &c. of the Green Cloth, &c.—*Clerk of the Crown*, an officer who frames, reads, and records all indictments against offenders arraigned or indicted of any public crime in the Court of King's Bench: he is otherwise called *Clerk of the Crown Office*, and exhibits informations.—*Clerk of the Crown in Chancery*, an officer in that court who continually attends the Lord Chancellor in person, or by deputy.—*Clerk of the declarations*, an officer that files all declarations in the Court of King's Bench.—*Clerk of the deliveries*, an officer in the Tower of London, whose office it is to take indentures for all stores, ammunition, &c. issued from thence.—*Clerk of the errors*, an officer in the Court of Common Pleas, who transcribes and certifies into the King's Bench the tenor of the records of the cause in action, upon which the writ of error made by the cursitor is brought there to be heard and determined.—*Clerk of the essoins*, an officer belonging to the Court of Common Pleas who keeps the *essoins rolls*.—*Clerk of the estreats*, an officer belonging to the Exchequer, who every term receives the estreats out of the Lord Treasurer's Remembrancer's office, and writes them out to be levied for the King.—*Clerk of the hanaper*, or *hamper*, an officer in chancery, whose office it is to receive all the money due to the King for the seals of charters, &c.; he is so called because the hanaper is an old term signifying *fuscum*, or treasury.—*Clerk of the inrollments*, an officer of the Common Pleas, who enrolls and exemplifies all fines, recoveries, returns, writs of entry, summons, and seisin, &c.—*Clerk of the juries*, an officer belonging to the Court of Common Pleas, who makes out writs of *habeas corpora* and *distringas* for the appearance of juries.—*Clerk of the market*, an officer of the King's house to whom it belongs to take charge of the King's measures, and keep the standards of them, which are the examples of all measures to be used throughout the kingdom. 13 R. 2, c. 4, &c.; *Flet.* 1. 2, c. 8, 9.; 4 *Inst.* 274.—*Clerk Marshal of the King's Household*, an officer that attends the Marshal in his Court, and records all proceedings.—*Clerk of the nichils*, or *nilis*, an officer belonging to the Court of Exchequer, who makes a roll of all such sums as are nililed by the sheriffs upon their estreats of green wax.—*Clerk of the ordnance*, an officer of the Tower, who registers all orders touching the King's ordnance.—*Clerks of the outlawries*, a servant, or deputy, to the Attorney General,

who makes out writs of *capias ut lagatum*, after outlawry.—*Clerk of the Paper Office*, an officer in the Court of King's Bench who makes up the Paper-books of special pleadings and demurrers in that court.—*Clerk of the papers*, an officer of the Common Pleas, who has the custody of the papers of the warden of the Fleet; enters commitments and discharges of prisoners, &c.—*Parish Clerk*, vide *Parish*.—*Clerk of the Parliament Rolls*, an officer who records all things done in the high court of Parliament.—*Clerk of the patents*, or of the letters patent under the Great Seal of England.—*Clerk of the peace*, an officer belonging to the sessions of the peace, whose duty it is to read indictments, enrol proceedings, draw the process, &c.—*Clerk of the Pells*, a clerk belonging to the Exchequer, whose office it is to enter every teller's bill into a parchment roll, or skin, called *pellis receptorum*, and to make another roll of payments, called *pellis exituum*.—*Clerk of the petty bag*, an officer of the Court of Chancery, whose office it is to record the returns of all inquisitions out of every shire, to make out patents, &c.—There are three of these officers, of which the Master of the Rolls is the chief.—*Clerk of the Pipe*, an officer in the Exchequer who has the accounts of the debts due to the King, and charges them down in the great roll, called the *pipe*, from its shape, which resembles a pipe: he was formerly called *Ingrossator magni Rotuli*, *Stat.* 33, H. 8, c. 22.—*Clerk of the Pleas*, an officer in the Court of Exchequer, in whose office all the officers of the court, upon special privilege belonging to them, ought to sue, or be sued in any action.—*Clerks of the Privy Seal*, four officers which attend the Lord Privy Seal, to write and make out all things that are sent by warrant from the Signet to the Privy Seal.—*Clerk of the Remembrance*, an officer who assists the Clerk of the Pipe.—*Clerk of the Rolls*, an officer who makes search for and copies, deeds, offices, &c. in the Court of Chancery.—*Clerk of the Rules*, he who draws up and enters all the rules and orders made in the Court of King's Bench.—*Clerk of the Sewers*, an officer belonging to the Commissioners of Sewers, who takes account of all their proceedings.—*Clerk of the Signet*, an officer continually attendant on his Majesty's Principal Secretary, who has the custody of the privy signet. There are four of these officers who attend in turn, and dine at the Secretary's table.—*Clerk of the King's Silver*, an officer in the Court of Common Pleas, who receives all fines that have passed the office of the *custos brevium*.—*Clerk of the supersedeas*, an officer in the Court of Common Pleas who makes out writs of *supersedeas* upon a defendant's appearing to the exigent on an outlawry, whereby the sheriff is forbidden to return the exigent.—*Clerk of the treasury*, an officer of the Common Pleas who has the records of the court in his charge, and is the servant of the Chief Justice. He is removeable at pleasure, in distinction from other clerks, who are for life. There is also a secondary, or *under clerk of the treasury*, who has one key of the treasury-door, and an *under-keeper*, who has another.—*Clerk of the King's great wardrobe*, one who keeps account of what belongs to the royal wardrobe. *Stat.* 1 Edw. 4, c. 1.—*Clerk of the warrants*, an officer of the Common Pleas who enters all warrants of attorney, deeds of indentures, of bargain and sale, &c.

Clerk is also applied in the sense of one who prays for benefit of clergy; thus the *clerk attaint* is one who prays for benefit of clergy after judgment has been given upon him for felony; *clerk convict*, one who prays for benefit before sentence is passed upon him.

CLERK (Com.) this term has been transferred from the law to commerce, in the same sense, to denote one who executes

any office with his pen in a counting-house, or any other trading concern.

CLERK (*Ecc.*) *clericus sacerdotis*, a parish clerk, or an inferior assistant to the priest.

CLERKS (*Her.*) the company of clerks, called *parish clerks*, is ancient, being incorporated in the 17th of Henry III. Their arms are, "Azure, a fleur-de-luce, or, on a chief, gules, a leopard's head betwixt two books, or."

CLERODENDRUM (*Bot.*) a genus of plants, Class 14 *Didynamia*, Order 2 *Angiospermia*.

Generic Characters. CAL. *perianth* one-leaved.—COR. one-petalled; *tube* slender; *border* five-parted.—STAM. *filaments* four; *anthers* simple.—PIST. *germ* roundish; *style* filiform; *stigma* simple.—PER. *drupe* roundish; *seed* one.

Species. The species are shrubs, as the—*Clerodendrum infortunatum*, *Petasites*, &c. seu *Peragu*, native of India.—*Clerodendrum fortunatum*, Entire-leaved *Clerodendron*, native of India.—*Clerodendrum calamitosum*, &c. seu *Volkameria*, &c. native of Java.—*Clerodendrum phlo-moides*, seu *Volkameria*, &c. native of the East Indies.

CLE'ROMANCY (*Ant.*) *κληρομαντεία*, a mode of divination, wherein they made conjectures by throwing *κλήροι*, lots.

CLERONIMUS (*Archæol.*) an heir.

CLEROPE/PLUM (*Ecc.*) the tippet or scarf worn by clergymen.

CLE'ROS (*Nat.*) *κλήρος*, a miscarriage among the bees when, by reason of the hardness and bitterness of the wax, they do not bring forth their young, but both they and the comb rot together. Aristotle calls the *cleros* an insect which destroys the combs of the bees. *Aristot. Hist. Animal.* l. 8, c. 27; *Plin.* l. 1, c. 18.

CLE'RUS (*Ent.*) a division of the genus *Attelabus*, consisting of those species of insects which have the jaw one-toothed, the hind feelers hatchet-flashed.

CLERUS (*Ecc.*) a clerk or clergyman, one who is *de clero Domini*, i. e. of the Lord's lot or portion.

CLETCH (*Her.*) vide *Cleche*.

CLE'THRA (*Bot.*) a genus of plants, Class 10 *Decandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* one-leaved; *leaflets* ovate.—COR. *petals* five.—STAM. *filaments* ten; *anthers* oblong-erect.—PIST. *germ* roundish; *style* filiform; *stigma* trifid.—PER. *capsule* roundish; *seeds* very many.

Species. The species are shrubs, as the—*Clethra alnifolia*, seu *Alnifolia*, &c. Alder-leaved *Clethra*, native of Carolina.—*Clethra paniculata*, Panicked *Clethra*, native of North America.—*Clethra arborea*, Tree *Clethra*, native of Madeira.—*Clethra tinifolia*, *Tinus*, &c. *Volkmeria*, &c. seu *Baccifera*, &c. native of Jamaica.

CLEVERS (*Bot.*) the same as *Cleavers*.

CLEW (*Mar.*) in French *point d'une voile*, the lower corner of square sails, which reaches down to where the tackles and sheet ropes are fastened; whence the expressions "From clew to earing," signifying from the bottom to the top. "To clew up," in French *carguer une voile*, to haul up the clews of a sail to its yard by means of the clew-lines. To the *Clews* belong—*Clew-garnets*, in French *cargues-points de basses voiles*, a sort of tackle fastened to the clews of the main and foresail to truss them to the yard.—*Clew-Lines*, in French *cargue-points des voiles quarrées*, for the same purpose as the clew-garnets, only that the latter are solely appropriated to the courses; but the clew-lines are employed for all the square sails.—*Clews of a Hammock*, in French *points d'une hamac*, the combination of small lines, by which the hammock is suspended.

CLEYE'NA (*Bot.*) the same as the *Ternstroemia*.

CLIBA'DIUM (*Bot.*) a genus of plants, Class 21 *Monoecia*, Order 5 *Pentandria*.

Generic Characters. CAL. *common* imbricate; *scales* ovate.—COR. *compound corollules* of the disk many, of the ray three or four.—STAM. *filaments* five; *anthers* oblong.—PIST. *germ* very small; *style* filiform; *stigma* simple.—PER. *common* none; *calyx* ventricose; *seed* one.

Species. The only species is *Clibadium Surinamense*, native of Surinam.

CLIBANA'RIOUS (*Ant.*) *κατάφρακτος*, a man or horse armed with complete armour, a cuirassier. *Ammian.* l. 16; *Nazar.* in *Panegy.* *Constant.*

CLICH (*Mil.*) a sabre in use among the Turks, having a crooked broad blade.

CLIC'KETING (*Sport.*) a fox is said to go clicketing when he goes after the female.

CLICKS (*Mar.*) small pieces of iron falling into notched wheels attached to the winches in cutters, &c. and thereby serving the office of pawls.

CLID'IUM (*Ich.*) the throat of the tunny. *Plin.* l. 9, c. 15.

CLIE'NS (*Ant.*) a Roman citizen who was under the protection of some great man, who, in that relation, was called his patron, and assisted him with his counsel and support in all matters of dispute.

Hor. l. ii, ep. 1, v. 104.

*Rome dulce diu fuit, et solenne reclusa
Mane domo vigilare, clienti promere jura.*

The client, on the other hand, was always devoted to the interests of his patron, and ready to pay every outward mark of respect. The poets allude to the morning salutations which the clients used to give to their patrons.

Mart. l. 2, epig. 18.

*Mane salutatum venio; tu diceris esse
Ante salutatum; jam sumus ergo pares.*

Juv. sat. 5, v. 19.

— *Habet Trebius propter quod rumpere somnum
Debeat, et ligulas dimittere, sollicitus ne,
Tota salutaris jam turba peregerit orbem
Sideribus dubiis.*

Senec. de Brev. Vit. c. 14.

CLIE'NT (*Law*) one who retains a lawyer or counsellor to manage or plead his cause.

CLIENTELA'RIS (*Law*) belonging to a vassal or tenant, *prædium clientelare*, a fee-farm.

CLIENTS (*Mil.*) noblemen who formerly served in the French armies under the pennant of a knight, the banner of a banneret, &c.

CLIFF (*Mus.*) or *clef*, a certain character or mark placed on one side of the lines, from which the proper places of all other notes in a piece of music are discovered; or it is a letter marked on any line which explains and points out the name of all the rest. It is called the *clef* or *key*, because thereby are known the names of all the other lines and spaces; and, consequently, the quantity of every interval. Formerly every line had a letter marked for a cliff, but now a letter on one line suffices; since by this all the rest are known reckoning up and down in the order of the gamut. The cliff which is thus marked is called the *signed cliff* or *clef*, of which there are three; namely, C, F, G. The cliff of the highest part in a song, called *treble* or *alt*, is G, as in *fig. 5*, set on the second stave or line, reckoning upwards. The cliff of the bass, or lowest part,

is F on the fourth line upwards, *fig. 1*. For the other mean parts, the cliff is C; namely, C, the *tenor cliff*, placed on the fourth line, as in *fig. 2*; C, *counter-tenor*,

or *alto cliff*, placed on the third line, as in *fig. 3*; and *C, soprano*, or *canto cliff*, placed on the first line, as in *fig. 4*.

CLIFFORTIA (*Bot.*) a genus of plants, Class 22 *Dioccia*, Order 11 *Polyandria*.

Generic Characters. CAL. *perianth* three-leaved; *leaflets* ovate.—COR. none.—STAM. *filaments* capillary; *anthers* twin.—PIST. *germ* oblong; *styles* two; *stigmas* simple.—PER. *capsule* oblong; *seeds* solitary.

Species. The species are shrubs, and natives of the Cape of Good Hope, as the—*Cliffortia odorata*.—*Cliffortia serrata*.—*Cliffortia ferruginea*.—*Cliffortia cuneata*.—*Cliffortia ilicifolia*, seu *arbuscula*, &c. Ilex-leaved *Cliffortia*.—*Cliffortia tridentata*.—*Cliffortia ruscifolia*, seu *Frutex*, &c. Butchers' broom-leaved *Cliffortia*.—*Cliffortia strobilifera*, seu *Cedrus*, &c.

CLIFT (*Vet.*) a deficiency in the new, soft, rough, and uneven hoof that grows on horses' feet upon the hoof-cast.

CLIMACION (*Mech.*) κλιμακίον, the round or step of a ladder.

CLIMACTER (*Mech.*) vide *Climacion*.

CLIMACTERES (*Med.*) or *anni scansilcs*, i. e. years ascending like steps, applied particularly to certain critical periods of a man's life.

CLIMACTERICAL years (*Med.*) certain years observable in a man's life, which are supposed to be attended with some great mutation. [vide *Climacterics*]

CLIMACTERICS (*Med.*) the climacter, climacterical, or critical periods in a man's life, which were the 7th, the 21st, made up of 3 times 7; the 27th, made up of 3 times 9; and the 81st, made up of 9 times 9; thus, every 7th or 9th year is said to be climacterical.—*Grand Climacteric*, the 63d and 81st, in which, if any sickness occur, it is accounted very dangerous.

CLIMATE (*Geog.*) a part or portion of the earth between two circles parallel to the Equator, and of such a breadth that the longest day, in the parallel nearest to the equator, exceeds the longest day in that next the equator by some certain space, as half an hour, or an hour, or a month. The beginning of the climate is a parallel wherein the day is shortest; the end of the climate is that wherein the day is the longest; the climates, which are forty-eight in number, being reckoned from the equator to the poles. Each climate differs from its contiguous ones by being longer or shorter, by half an hour, in one place than in the other, as far as the polar circles, when the climates commence to be what is called hour-climates and month-climates. An *hour-climate* is a space comprised between two parallels of the equator, in the first of which the longest day exceeds that in the latter by an hour; a *month-climate* is a space between two circles parallel to the polar circles, whose longest day is longer or shorter than that of its contiguous one by a month, or thirty days.

CLIMATICS (*Nat.*) a sort of earth-quake, which, proceeding in an oblique direction, sweeps every thing down before it. *Ammian.* l. 17, c. 7.

CLIMAX (*Med.*) a name given to some antidotes, which, in a regular scale of proportion, increased or diminished their ingredients.

CLIMAX (*Rhet.*) κλίμαξ, a figure of rhetoric called, by Cicero and Quintilian, *gradatio*, where the discourse proceeds by degrees from higher to higher subjects; as "Africano virtutum industria, virtus gloriam, gloria emulationem comparavit." *Cic. Academ.* l. 4, c. 16; *Demet. Eloc.* § 270; *Quint.* l. 9, c. 3; *Athen.* l. 2, c. 2; *Eustath.* l. β; *Voss. Rhet. Inst.* l. 5, p. 294.

CLIMBERS (*Bot.*) another name for the *Clematis*.

CLIMBING-BIRTHWORT (*Bot.*) the *Aristolochia Clematitis* of Linnaeus.

CLIMIA (*Min.*) the *Cadmia Fornacum*.

TO CLINCH (*Mar.*) in French *étaler un cable*, a parti-

cular method of fastening large ropes by a kind of knot, which is principally used in fastening the cable to the ring of the anchor.

CLINCHED (*Her.*) an epithet for the hand shut.

CLINCHER built (*Mar.*) an epithet for a vessel made with clincher-work.—*Clincher-Work*, that disposition of the planks in a boat or vessel, when the lower edge of every plank overlays the next under it like the slates on the roof of a house.

CLINCHING (*Mar.*) 1. The operation of fastening the point of a bolt or nail on a ring by hammering it so as to make it spread. 2. A kind of slight calking used about the ports when foul weather is expected about a harbour. This is done by driving oakum into the sides to keep out the water.

CLINICE (*Med.*) vide *Clinical*.

CLINICAL (*Med.*) κλινικός, an epithet relating to a bed, from κλίνη, a bed; as a *clinical physician*, one who attends on bed-ridden people: *clinical medicine*, which treats of visiting patients who are confined to their beds: so likewise *clinical lectures*, notes, &c.

CLINICUS (*Med.*) a patient who is confined to his bed from sickness.

CLINIS (*Mus.*) a name given by the Greeks of the middle ages to one of their notes.

CLINKERS (*Mason.*) bricks impregnated with a considerable quantity of nitre or salt-petre, which, by the violence of the fire, run and are glazed over.

CLINK-STONE (*Min.*) a brittle mineral of the basalt kind, which is common in Scotland and Germany.

CLINOIDES (*Anat.*) *Clinoid*, of the shape of a bed, from κλίνη, a bed, and εἶδος, the form; an epithet for the processes surrounding the *sella turcica* of the sphenoid bone.

CLINOMASTOIDEUS (*Anat.*) vide *Cleidomastoideus*.

CLINO/PETES (*Med.*) κλινοπέτης, one who is confined to his bed from sickness.

CLINOPODIUM (*Bot.*) κλινοπόδιον, a herb, so called from the resemblance which it bore to πῦς, the foot, and κλίνη, a bed. *Dioscor.* l. 3, c. 109; *Plin.* l. 24, c. 15.

CLINOPODIUM, in the *Linnean system*, a genus of plants, Class 14 *Didynamia*, Order 1 *Gymnospermia*.

Generic Characters. CAL. *involucre* many bristled; *perianth* one-leaved. COR. one-petalled; *tube* short.—STAM. *filaments* four; *anthers* roundish.—PIST. *germ* four-parted; *style* filiform; *stigma* simple.—PER. none; *calyx* contracted round the neck; *seeds* four.

Species. The species are perennials, as the—*Clinopodium vulgare*, Wild Basil, native of Europe.—*Clinopodium Egyptianum*, native of Egypt.—*Clinopodium incanum*, *Serpentaria*, seu *Origanum*, &c. Hairy *Clinopodium*, native of North America.—*Clinopodium rugosum*, Wrinkled *Clinopodium*, native of Carolina.—*Clinopodium capitatum*, seu *Hyptis*, &c. native of Jamaica.

CLIO (*Conch.*) a genus of animals, Class *Vermes*, Order *Mollusca*.

Generic Character. *Body* oblong, nayant.—*Arms* wing-like processes.—*Tentacula* three, besides two in the mouth.

Species. The principal species are the *Clio caudata*, *pyramidata*, *retusa*, &c.

CLIPPERS (*Law*) those who debase the coin of the realm by cutting or paring the edge of it. Clipping of coin was made treason by Stat. 3, Hen. 5, c. 1.

CLIPPING of wool (*Agric.*) cutting off the coarse ends of the wool before it is washed.

CLISSUS (*Chem.*) a term denoting mineral compound spirits.

CLITONES (*Polit.*) a term used for all the sons of the King, but particularly the eldest, in the charter of King Ethelred. *Matth. Par.* p. 158; *Seld. notes on Edmer.*

CLITORIA (*Bot.*) a genus of plants, Class 17 *Diadelphia*, Order 3 *Decandria*.

Generic Characters. CAL. *perianth* one-leaved.—COR. *papilionaceous*; *standard* very large; *wings* oblong; *keel* shorter than the wings.—STAM. in two brotherhoods; *anthers* simple.—PIST. *germ* oblong; *style* ascending; *stigma* obtuse.—PER. *legume* very long; *seeds* many.

Species. The species are perennials, as the — *Clitoria ternata*, *Flos*, &c. *Schlonga*, &c. *Lathyrus*, &c. seu *Phaseolus*, &c. Winged-leaved Clitoria, native of the East Indies.—*Clitoria multiflora*, native of St. Domingo.—*Clitoria Brasiliana*, Brazilian Clitoria, native of Brasil. *Clitoria Virginiana*, Small flowered Clitoria, native of Virginia.—*Clitoria mariana*, seu *Clitorius*, &c. Maryland Clitoria, native of North America.

CLITORIDIS-FLOS (*Bot.*) a beautiful flower in the island of Ternate.

CLITORIDIS *musculus* (*Anat.*) or *Erector Clitoridis*, a muscle arising from the *crus* of the *os ischium*, which serves to draw the *clitoris* downwards and backwards.

CLITORIS (*Anat.*) from *κλισιω*, to inclose, or be hid, because in its natural state it is inclosed in the *vagina*, a small glandiform body situated above the *nymphæ*.

CLITORISMUS (*Med.*) a morbid or preternatural enlargement of *clitoris*, such as is visible in hermaphrodites.

CLIVERS (*Bot.*) the same as *Cleavers*.

CLIVINA *avis* (*Ant.*) a bird that, in soothsaying, gave a sign that a thing was not to be done. *Plin.* l. 10, c. 14; *Fest. de Verb. Signif.*

CLOACA (*Ant.*) the jakes, or common sewer.

CLOACA (*Anat.*) the canal in birds, through which the egg descends from the ovary in its exit.

CLOACARIUM (*Ant.*) a tax or assessment for cleaning the common sewers. *Ulp.*

CLOCHES (*Mil.*) a military tax which was imposed upon bells.

CLOCK (*Hor.*) an instrument for measuring time and its sub-divisions with great exactness. [vide *Horology*]

CLOCK-BEETLE (*Ent.*) or *Don*, a beetle that flies about in an evening in a circular direction with a loud noise; the *Scarabæus stercorarius* of Linnæus.

CLOCK-WORK (*Mech.*) that part of the movement which strikes the hours, &c. on a bell, in distinction from that part called the *Watch-work*, which is designed to exhibit the time on a dial-plate.

CLODIA *Lex* (*Ant.*) a name for several laws enacted by the tribune Clodius, which tended to increase the power of the people.

CLODIANA *vasa* (*Ant.*) a kind of vessels, so called from their inventor. *Plin.* l. 33, c. 11.

CLOG (*Mech.*) a piece of wood fastened about the legs of beasts to keep them from running away.

CLOSTER (*Archit.*) a place in a monastery with piazzas; also the monastery itself.

CLOMPANUS (*Bot.*) the *Sterculia balanhus* of Linnæus.

CLO'NIC *spasms* (*Vet.*) a morbid contraction of the muscles.

CLONODES (*Med.*) *κλονόδες*, an epithet for a sort of pulsation which is vehement, large, and, at the same time, unequal. *Castell. Lex. Med.*

CLOSE (*Mus.*) is either the end of a strain, which is called an *imperfect close*; or the end of a tune, which is a *perfect close*.

CLOSE (*Her.*) an epithet for any bird which is represented in coat armour with its wings close down upon it, i. e. not displayed, or in a standing position.

CLOSE (*Agric.*) a piece of ground fenced or hedged about for pasturage.

CLOSE ROLLS (*Law*) and *close writs* are letters from the king, sealed with his Great Seal, but closed up, and directed to particular persons, in distinction from letters patent, or open letters, which contain grants of land, &c. from the crown.

CLOSE-STRING (*Archit.*) a staircase in dog-legged stairs without an open newel.

CLOSE *fight* (*Mar.*) a name for bulk-heads erected fore and aft in the ship for the men to stand behind in close engagement, and to fire on the enemy; or if the ships be boarded to scour the enemy.

CLOSE-HAULED (*Mar.*) in French *au plus près*, the arrangement or trim of a ship's sails when she endeavours to make a progress in the nearest direction possible towards that point of the compass from which the wind blows.—*Close-quarters*, strong barriers of wood stretching across a merchant ship, to serve as a place of shelter in case the vessel is boarded, and from which the crew can fire their small arms on the enemy.

CLOSED *behind* (*Man.*) an imperfection in the hind-quarters of a horse.

CLOSER (*Mason.*) the last stone laid in the horizontal length of a wall.

CLOSET (*Her.*) the half of the bar, which latter ought to contain a fifth of the field. [vide *Bar*]

CLOSET (*Archit.*) a small retired apartment within another room.

CLOSH (*Vet.*) a distemper in the feet of cattle similar to the founders.

CLOSHE (*Sport.*) the game answering, as is supposed, to what is now called *nine pins*, which was forbidden by statute 18 Ed. 4.

CLOTH (*Com.*) signifies generally any kind of stuff that is woven or manufactured in the loom, whether it be composed of wool, hemp, or flax; but in a more particular sense it implies a web or tissue of woollen threads interwoven, whereof some, called the *warp*, are extended in length from one end of the piece to the other; and the rest, called the *woof*, disposed across the first, or breadth-wise of the piece.

CLOTH-WORKERS (*Her.*) or *clothiers*, were incorporated the 22d of Henry VIII. in 1530, and form the 12th company in the City of London. Their arms are, as in the annexed figure, "sable a chevron ermine, in chief; two crabbets, argent, in bezel or beazel, or."

CLOTHED (*Mar.*) a mast is said to be clothed

when the sail is so long as to reach down to the gratings of the hatches, so that no wind can blow below the sail.

CLOTHIER (*Com.*) one who manufactures woollen cloth. [vide *Clothworkers*]

CLOTHING *of the bolsters* (*Mar.*) laying several thicknesses of worn canvass well tarred over them, to make an easy bed for the shrouds.

CLOTHS *in a sail* (*Mar.*) are the breadths of canvass in its whole width.

CLOTTINGS *of wool* (*Com.*) the hard and clotted wool on the breech of the sheep, which are otherwise called *breechings*.

CLOUDS (*Nat.*) a congeries of particles, chiefly watery, drawn or sent out of the earth in vapours into the middle region of the air. It is computed by some that they are never above one half or three-fourths of a mile above the earth.

CLOUD-BERRY (*Bot.*) a plant growing on Pendle Hills, in Lancashire, so called as if it came out of the clouds.

CLOVE (*Bot.*) a spice, the fruit of the clove-tree.—Clove-Tree, the *Caryophyllus aromaticus* of Linnæus, which grows in the Dutch Spice-islands.—Clove-Bark, the bark of the *Myrtus caryophyllata*, so called because it smells like cloves.—Clove-Gilliflower, or Clove-pink, the *Dianthus caryophyllus*.

CLOVE (*Com.*) the two-and-thirtieth part of a weight of cheese, equal to eight pounds. *Stat.* 9 H. 6, c. 8.

CLOVE-HITCH (*Mar.*) in French *deux demi-cles*, a knot or noose by which a rope is fastened.

CLOVER (*Bot.*) or Clover-Grass, the *Bufolium pratense* of Linnæus; an excellent feed for cattle.

CLOUGH (*Com.*) an allowance of two pounds to every three hundred weight, for the turn of the scale, that the commodity may hold out weight when sold by retail.

CLOUGH (*Mech.*) a sort of sluice for retaining or letting out the water of a canal, pond, &c.—*Clough-arches*, crooked arches in canals, through which the water is conveyed on drawing up the cloughs or paddles.

CLOUT nails (*Carpent.*) nails that are used in the nailing on of clouts to the axle-trees of carriages.—*Clouts*, the axle-tree clouts are iron plates nailed to the end of the axle-tree of a cart or waggon, to save it from wearing, and to the two cross-trees that hold the sides of a cart together.

CLOUTS (*Gunn.*) thin plates of iron nailed on that part of the axle-tree of a gun-carriage which comes through the nave.

CLOWN'S ALL-HEAL (*Bot.*) a perennial, the *Stachys palustris* of Linnæus.

CLOYED (*Gunn.*) an epithet for a piece of ordnance when any thing is got into the touch-hole.

CLOYED (*Vet.*) an epithet for a horse when he is pricked with a nail in shoeing.

CLUB *Law* (*Cus.*) a law by which every one is obliged to pay an equal share of the reckoning.

TO CLUB-HAUL a ship (*Mar.*) a method of tacking by letting go the lee-anchor as soon as the wind is out of the sails, which brings her head to the wind.

CLUNCH (*Min.*) a blue substance found in coal-pits.

CLUNES (*Anat.*) the buttocks, consisting of the skin, fat, and muscles, principally those called the *Glutæi*.

CLUNESIA (*Med.*) an inflammation of the buttocks.

CLUNIAC *Monks* (*Ecc.*) an order of monks founded in the year 900, by Bernard, abbot of Cluny, in Burgundy.

CLYPEA (*Ich.*) a genus of animals, Class *Pisces*, Order *Abdominales*.
Generic Character. Head compressed; mouth rough within; jaws unequal; tongue short, rough, with inverted teeth; gills sctaceous; body compressed, elongated; tail forked.
Species. The principal species are—*Clupea harengus*, the Herring.—*Clupea pilcardus*, the Pilchard.—*Clupea alosa*, the Shad.—*Clupea sprattus*, the Sprat.—*Clupea encrasicolus*, the Anchovy, &c.

CLUSIA (*Bot.*) a genus of plants, Class 23 *Polygamia*, Order 1 *Monoecia*.
Generic Characters. CAL. perianth four; leaflets concave.—COR. petals four.—STAM. filaments many; anthers simple.—PIST. germ ovate, oblong; style none; stigma flat.—PER. capsule ovate; seeds numerous.
Species. The species are shrubs, as, the—*Clusia rosea*, seu *Cenchramidia*, &c. Rose-coloured Balsam-tree, native of Carolina.—*Clusia alba*, White-flowered Balsam-tree, native of America.—*Clusia flava*, seu *Terebinthus*, &c. Yellow-flowered Balsam-tree, native of Jamaica.—*Clusia venosa*, Vein-leaved Balsam-tree, native of Martinica.

CLUSTERED (*Bot.*) or crowded. [vide *Confertus*]

CLUSTERED (*Archit.*) an epithet denoting the coalition of two or more members which penetrate each other: thus, a *clustered column* is one composed of two or more pillars, attached to each other, but having a distinct base and capital.

CLUTARIUM (*Mech.*) a smithery forge where clouted shoes or horse shoes are forged.

CLUTIA (*Bot.*) the *Clutia* and *Androgynia* of Linnæus.

CLUYTIA (*Bot.*) a genus of plants, Class 22 *Dioecia*, Order 14 *Gynandria*.
Generic Characters. CAL. perianth five-leaved; leaflets ovate.—COR. petals five; claws flat; nectaries, exterior five, interior five.—STAM. filaments five; anthers round-

ish.—PIST. germ none; style cylindrical.—PER. capsule globular; seeds solitary.

Species. The species are shrubs, as—*Cluytia alaternoides*, *Croton*, &c. *Sithymulus*, seu *Chamælea*, seu *Alaternoides*, Narrow-leaved Clutia, native of the Cape of Good Hope.—*Cluytia polygonoides*, seu *Chamælea*, native of the Cape of Good Hope.—*Cluytia daphnoides*, *polygonoides*, &c. seu *Alaternoides*, &c. native of the Cape of Good Hope.—*Cluytia ericoides*, native of the Cape of Good Hope.—*Cluytia retusa*, *Corni*, &c. *Scherunam*, &c. *Arbor*, &c. native of the East Indies.—*Cluytia Eluteria*, *Croton*, *Ricinus*, seu *Maritima Clutia*, or Sea-side Balsam, a shrub, native of India.

CLYDON (*Med.*) κλυδών, a flatulency or fluctuation in the stomach and intestines.

CLYMA (*Min.*) the fæces of silver and gold.

CLYMENOS *Dioscoridis* (*Bot.*) the *Scorpioides folio Bupleuri*. *Boerh. Ind.*

CLYMENUM (*Bot.*) κλύμενον, a plant with a stalk like a bean, which is supposed to have received its name from King Clymenus, the discoverer. *Theoph. Hist. Plant.* l. 9, c. 19; *Dioscor.* l. 4, c. 13; *Plin.* l. 25, c. 7; *Gal. Oribas.*

CLYMENUM Chickling Vetch is now the *Lathyrus clymnum* of Linnæus. *Boerhaav. Ind.*

CLYPEA (*Ich.*) vide *Clupea*.

CLY-MORE (*Mil.*) or *Claymore*, a large two-handed sword, formerly in use among the Highlanders, two inches broad, and doubly edged.

CLYPERLIS cartilago (*Anat.*) the *Theroid cartilage*.

CLYPEARIA (*Bot.*) the same as the *Adenanthera*.

CLYPEOLA (*Bot.*) a genus of plants, Class 15 *Tetradymia*, Order 1 *Siliculosa*.
Generic Characters. CAL. perianth four-leaved; leaflets ovate oblong.—COR. four-petalled; petals oblong.—STAM. filaments six; anthers simple.—PIST. germ roundish; style simple; stigma obtuse.—PER. silicle orbiculate; valves orbiculate; seeds orbiculate.
Species. The three species are, the—*Clypeola Jonthlaspi*, *Thlaspi*, &c. *Jonthlaspi*, &c. Annual treacle mustard, or Buckler mustard, an annual, native of Italy.—*Clypeola tomentosa*, seu *Alyssum*, &c. Hoary treacle mustard, a perennial, native of the Levant—*Clypeola maritima*, *Alyssum*, seu *Thlaspi*, &c. Sea treacle mustard, or Churl's mustard, a perennial, native of the South of France.

CLYPEUS (*Ant.*) a shield made of brass, which was less than the *scutum*, and was round instead of square.

CLYPEUS (*Ant.*) a sort of register belonging to the ancient baths, so called from its form. The use of it was to increase or diminish the heat, by excluding or letting in the air.

CLY'SMA (*Med.*) a glyster.

CLYSSIFORMIS distillatio (*Chem.*) a distillation of such substances as are subject to take fire and fulminate by a tubulated retort.

CLY'SSUS (*Chem.*) a term among the ancient chemists, importing a mixture formed by blending the essences of different substances, as oil, salt, and spirit.—*Clyssus anti-moniæ*, a weak acid of sulphur.

CLY'STER (*Med.*) κλύστρον, from κλύζω, to wash; a glyster, or instrument for the injection of any fluid.

CNEMODACTYLE'US (*Anat.*) a muscle; the *Extensor digitorum longus*.

CNEORUM (*Bot.*) κνέρον, a plant which, according to Dioscorides, was the same as the *Gnestron* and *Thymelæa*, of which Hippocrates recommends a decoction as a purge for phlegm and bile. *Hippocrat. de Mul.* l. 1; *Dioscor.* l. 4, c. 173; *Plin.* l. 13, c. 21.

CNEORUM, in the Linnæan system, a genus of plants, Class 3 *Triandria*, Order 1 *Monogynia*.

Generic Characters. CAL. perianth very small.—COR. petals three.—STAM. filaments three; anthers small.—PIST. germ obtuse; style erect; stigma trifid.—PER. berry dry; seeds solitary.

Species. The only species is, the—*Cneorum tricoccum*, seu *Chamaelea*, &c. Widow-wail, or Spurge-olive, a shrub, native of Spain.

CNE/SIS (Med.) κνήσις, a painful itching.

CNESTRON (Bot.) vide *Cneorum*.

CO (Geom.) a contraction for complement, introduced by Gunter, as in the words co-secant, co-tangent, co-versed sine. [vide *Cosecant*, &c.]

CNICELÆON (Bot.) κνικέλαιον, the oil of *Cnicus*, drawn from its seeds. *Dioscor.* l. 1, c. 44.

CNICION (Bot.) κνικίον, Trifolium. *Dioscor.* l. 1, c. 123.

CNICUS (Bot.) κνίκος, or κνίκος, a plant which, according to the description of the ancients, is supposed to be what is now called *Carthamus*. The whole plant is very bitter, except the root. *Theophrast. Hist. Plant.* l. 6, c. 4; *Aristot. Hist. Anim.* l. 5, c. 19; *Dioscor.* l. 1, c. 38; *Plin.* l. 21, c. 15.

CNICUS, in the Linnean system, a genus of plants, Class 19 *Syngenesia*, Order 1 *Polygamia Aqualis*.

Generic Characters. CAL. compound ovate; scales ovate.—COR. compound tubular; corollets equal; proper funnel-form; border five-cleft.—STAM. filaments five; anthers cylindric.—PIST. germ short; style filiform; stigma oblong.—PER. none; calyx closed; seed solitary; down plumose; receptacle flat.

Species. The species are mostly perennials, as the—*Cnicus palustris*, *Carduus*, seu *Cirsium*, native of Europe.—*Cnicus helenioides*, *Carduus*, seu *Cirsium*, &c. native of Siberia.—*Cnicus serratuloides*, *Carduus*, &c. seu *Cirsium*, &c. native of Siberia.—*Cnicus medius*, seu *Cirsium medium*, native of Italy.—*Cnicus centauroides*, seu *Centaureum*, Artichoke-leaved *Cnicus*, native of the Pyrennees.—*Cnicus uniflorus*, seu *Centaurea*, native of Siberia.—*Cnicus pygmaeus*, *Carduus*, *Cirsium*, seu *Serratula*, Pygmy *Cnicus*. But some are biennials, as the—*Cnicus lanceolatus*, native of Europe.—*Cnicus ferox*, native of Siberia.—*Cnicus eriophorus*, native of England; and the following are said to be annual—*Cnicus acarna*, *Acarua*, seu *Chamaeleon*, Yellow *Cnicus*, native of France.—*Cnicus Syriacus*, native of Spain.—*Cnicus pinatifidus*, *Carduus*, seu *Jacea*, native of Spain.

CNIDE (Bot.) a name for the *Urtica*, or nettle. *Dioscor.* l. 4, c. 94.

CNIDELÆON (Chem.) κνιδέλαιον, the oil prepared from the *Grana cnidia*. *Diosc.* l. 1, c. 43.

CNIDIA grana (Bot.) Cnidian berries, recommended by Hippocrates as a purge. They are supposed to be the fruit of the *Thymelæda*. *Foes. Hippocr. Æconom.*

CNIDUS (Bot.) vide *Cnidia Grana*.

CNIDOSIS (Med.) κνιδωσις, an itching stimulating sensation, such as is excited by the *cnide*, or nettle. *Hippocrat. Prorrhët.* l. 2.

CNIDUS (Bot.) vide *Cnidia Grana*.

CNIPES (Ent.) a kind of small worms which infest vines.

CNIPOTES (Med.) κνιπότης, as expounded by Galen, signifies itching, but by Erotian it is taken for the dry ophthalmy. *Gal. Exeges.*; *Erot. Vocab. Hippocrat.*

CNISSOREGMIA (Med.) κνισσορηγμία, an acid eructation.

CNO'DAX (Mech.) κνωδάξ, the gudgeon in the spindle of a wheel, an iron spike. *Vitruv.* l. 10, c. 6; *Bald. Lex. Vitruv.*

CNYMA (Med.) κνώμα, from κνίω, to scrape, grate; a rasure, puncture, or vellication. *Gal. Exeges.*

CO'A vestis (Ant.) a garment of silk so thin that one might see the body.

COA (Bot.) a name given by Father Plumier to a plant in

honour of Hippocrates. It is the same as the *Hippocatea* of Linnæus.

COACERVA'TION (Phy.) a heaping up together.

COACH (Mar.) or *Couch*, a chamber or apartment on board a ship, near the stern. It is generally occupied by the captain.

COACH-MAKERS (Her.) the coach-makers' company, which is of late incorporation, have for armorial ensigns, as in the annexed figure, "azure a chevron between three coaches or." The crest is Phæbus drawn in a chariot, and the supporters two horses argent armed; on their motto *Post nubila Phæbus*.

COACT'PLIS (Ant.) coarse and thick woollen cloths for packages. *Plin.* l. 8, c. 48; *Capitolin. in Pertin.* c. 3; *Ulpian. leg. argum.*

COA'CTIO (Med.) vide *Anance*.

COACTIO (Vet.) a disease in cattle when they are tired or over-wrought. *Veget.* l. 1, c. 37.

COA'CTOR (Ant.) a collector or receiver of taxes.—*Coactor agminis*, a bringer up of the rear.

COADJ'UTOR (Ecc.) one who during the life-time of the bishop was chosen to be his future successor, and assisted him in the discharge of his episcopal functions. *Pet. Marc. de Concord. Sacerd. et Imper.* c. 8.

COADUNA'TÆ (Bot.) a name for the fifty-second of Linnæus' Natural Orders.

COADUNA'TE (Bot.) *coadunatus*, an epithet signifying joined together, as *coadunata folia*, coadunate leaves, or leaves united at the base; so *coadunati lobi*.

COAGMENTA'TION (Chem.) a melting any matter by casting in powders, and afterwards making it concrete or solid.

COAGMENTUM (Ant.) the thickening of wool, and making felt of it.

COA'GULABLE lymph (Anat.) a component part of the blood, of glutinous consistence, obtained by stirring it about with a stick.

COAGULA'NTIA (Med.) such medicines as coagulate the blood, and juices flowing from it.

COAGULA'TION (Chem.) the *coagulatio* of the Latins, and κρήσις of the Greeks; the reducing any liquid to a thicker consistence, which is either *coagulatio per segregationem*, i. e. by the separation of the glutinous or viscid particles from the fluid or diluted particles, or *coagulatio per comprehensionem*, when the whole substance, without the loss of its parts, is reduced to such a consistence.

COA'GULUM (Chem.) any curded or coagulated substance, such as may be formed by putting acids into any fluid: thus *coagulum lactis*, the curds of milk. *Dioscor.* l. 3, c. 94; *Plin.* l. 22, c. 23.—*Coagulum aluminis*, a coagulated substance formed by beating up the white of an egg with a little alum, which is recommended as an application to the conjunctive membrane of the eye when in a relaxed state.

COAGULUM (Med.) the blood and other fluids when they assume a jelly-like consistency.

COAGULUM (Nat.) κίττω, or τέμνωσις, the concreted milk found in the stomach of young quadrupeds, commonly called *Rennet*, which was prescribed by the ancient physicians, particularly on account of its astringent virtues. *Hippocrat. de Mul.* l. 2; *Aristot. Hist. Anim.* l. 3, c. 16; *Varr. de Re Rust.* l. 2, c. 4; *Dioscor.* l. 2, c. 85; *Plin.* l. 71, c. 41; *Columel. de Re Rus.* l. 7, c. 8; *Cæsar. Aurel. de Tard. Pass.* l. 1, c. 4; *Gal. de Medic. Facult.* l. 10, c. 2; *Pallad. de Re Rust.* l. 6, Tit. 9; *Aver. apud Mercur. de Morb. Mul.* l. 3, c. 5.

COAGULUM (Surg.) a curdled substance growing in the hollow of a disjunct bone.

COAK (*Min.*) vide *Coke*.

CO'AKING (*Mar.*) the operation of uniting two or more pieces of wood together in the centre by means of small tabular projections, formed by cutting away the solid of one piece into a hollow, so as exactly to make a projection on the other, in such manner that they may exactly fit; whence the expression of "*Coak and plane*," to signify that a coak is formed, and a plane follows between.

COAKS (*Mar.*) 1. The metal holes in a sheave, through which the pin runs. 2. Certain oblong ridges left on the surfaces of main-masts by cutting away the wood round them. The intermediate part between them is called the plane. 3. *Chain coaks*, which are formed one on the end of the other, on the opposite sides of the centre line.

COAL (*Min.*) a solid inflammable substance, of a bituminous nature, which serves the purpose of fuel.—*Pit-coal*, or *Lithanthrax*, is distinguished by chemists into three kinds, namely—1. *Brown coal*, which contains a portion of the vegetable principle unaltered, from which they evidently derive their origin. Some, as the *Bovey-coal*, contains a resinous substance besides the bitumen and charcoal, which are its principal constituents: others are said to contain a vegetable extract. 2. *Black coal*, which contains no traces of vegetable principle, but is composed of bitumen, charcoal, and an earthy matter, in different proportions, as Cannel Coal, *ampelites*, of a dull black colour, which burns with a lively flame, and is said to consist of 75·2 charcoal, 21·7 bitumen, and 3·1 earth, in 100 parts; the specific gravity about 1·232. *Slate coal*, which contains a quantity of argillaceous earth, and burns slowly, with little flame. Its constituent parts are said to be nearly in the proportion of 47·6 charcoal, 32·5 bitumen, 19·9 earth; specific gravity 1·426. A variety of this coal is called *culm*. The Newcastle coal, which is among this class, contains less earth than all others, except Whitehaven and Wigan coal: the specific gravity of the first is nearly 1·271, of the second 1·257, of the third 1·268. 3. *Glance coal*, which comprehends those sorts of coal that contain only charcoal and earth, as the Kilkenny coal, consists of 97·3 charcoal and 3·7 earth; specific gravity 1·400. This sort of coal burns with less smoke and flame, and more intensely, than cannel coal; but it yields no volatile products, whereas those of the second class afford abundance of heavy inflammable air, a bituminous oil, at first fluid, then of the consistence of tar, and water impregnated with ammonia. The residue is *coke*, a sort of charcoal much used in manufactories.

COAL (*Com.*) is distinguished into *pit-coal*, in respect to the place where it is dug from, namely, the pit, or mine, and *sea-coal*, in respect to the manner in which it is conveyed, namely, by sea.

COAL-CRIMPS (*Com.*) a kind of factors, who sell ship-loads of coals by commission to wholesale dealers.

COAL-METER (*Law*) an officer in London, whose duty it is to inspect the measuring of coals that go from the wharf.

COAL-MERCHANT (*Com.*) one who contracts for coals to be brought from the pit, which he sells out to private families and retail dealers, but never in less quantities than a chaldron.

COAL-FISH (*Ich.*) a sort of cod-fish: the *Gadus carbonarius* of Linnæus.

COALIER (*Mar.*) vide *Collier*.

COALESCENCE (*Phy.*) the cleaving or uniting together of the small fine parts which compose any natural body.

COALESCENCE (*Surg.*) the closing of a wound, or the growing together again of any parts which before were separated.

COALTERN (*Med.*) a term applied by Bellini to two fevers which come periodically, and as one attacks the patient the other recedes, and so alternately.

CO'AMINGS of the hatches (*Mar.*) certain raised borders about the edges of the hatches of a ship, to prevent the water on the deck from running down into the lower apartments.

COANE (*Chem.*) a name, as is said, for a sort of tutty among the Greeks.

COANENEPIILLI (*Bot.*) the *Passiflora normalis* of Linnæus.

COAPOIBA (*Bot.*) vide *Caopoiba*.

COARCTA'TION (*Med.*) a strengthening or pressing together; rendering the canals narrow, or a contraction of the vessels.

COARCTA'TUS (*Bot.*) an epithet signifying squeezed or pressed together, as *coarctati rami*, condensed branches, opposed to *divergentes*; *coarctati pedunculi*, condensed peduncles, opposed to *patuli*; *coarctata panicula*, a close or contracted panicle, opposed to *diffusa*.

COARTICULA'TIO (*Anat.*) vide *Abarticulatio*.

COASSA'TIO (*Archit.*) the boarding or laying a floor. *Vitruv.* l. 7, c. 1.

COAST (*Geog.*) the country lying along the edge of the sea.

CO'ASTER (*Mar.*) a vessel employed in going from one port to another on the same coast, and consequently seldom going out of sight of land.

COASTING (*Mar.*) in French *aller terre à terre*, the act of sailing within sight of land, or within the soundings of land.—*Coasting pilot*, in French *pilote cotier*, a pilot who conducts vessels from one port to another on the coasting trade.

COASTING (*Husband.*) is the transplanting a tree, and placing it towards the same point of the compass as before.

COAT (*Mech.*) in general whatever serves as a covering for any substance, as a coat of paint, or of plaster to a wall, &c.

COAT (*Anat.*) the membranous cover of any part of the body, as the coats of the eye, of the arteries, nerves, &c.

COAT (*Mar.*) a piece of tarred canvas put about the mast at the partners, and also about the pumps at the decks, that no water may go down there.

COAT of Mail (*Mil.*) a piece of armour made to fit the body, and wrought over with many rings of iron.

COAT-ARMOUR (*Her.*) or *Coats of arms*, armorial ensigns or bearings, which were originally painted on the coats of arms, and afterwards transferred to seals, which is said to have begun first in the reign of Richard I.

COATED (*Bot.*) an epithet for bulbs which are composed of concentrated layers, as the bulb of the onion; also for some stems which are clothed with membranes.

CO'ATING (*Chem.*) or *Corication*. [vide *Cement*]

CO'ATLER (*Bot.*) another name for *ben*.

COAXA'TIO (*Arch.*) vide *Coassatio*.

COAXOCHI'TL (*Bot.*) the Indian name for the *Ta-jetes*.

COB (*Com.*) a coin current in Gibraltar and the south of Spain, equal to 4s. 6d. English.

CO'BALT (*Min.*) a mineral of a grey colour, from which arsenic is obtained in the greatest quantities. When melted with glass, and pounded, it is termed *smalt*, and is much used in staining glass blue. In the Pharmacopœia it is called *cadmia metallica*; and in the Linnæan system it is classed as a genus of metals, under the name of *cobaltum*. It has never been found pure in nature, but mostly in the state of an oxide, or alloyed with other metals. In the state of an oxide it forms the *black cobalt ore*; or combined with arsenic acid, the *red cobalt ore*; but in alloy with other metals, it forms the *white cobalt ore*. Its specific gravity is above 8. [vide *Chemistry*]

CO'BALUS (*Myth.*) the name of a spirit which in former times was supposed to haunt mines, whence it is supposed that the metal *cobalt* derives its name.

COBA'STOLI (*Chem.*) Ashes.

COBBAN (*Bot.*) a small tree, resembling a peach-tree, that grows in Sumatra. *C. Bauh. Pin.; Raii Hist. Plant.*

COBBE (*Bot.*) another name for the *Rhus* of Linnæus.

COBBING (*Mil.*) a mode of punishment for petty offences committed in barracks or elsewhere, which is inflicted on the offenders by soldiers among themselves, and consists principally in strapping with a belt, and the like.—*Cobbing, on board a vessel*, is also a sort of punishment, which consists in giving the offender a certain number of blows on the breech with a board called the *cobbing-board*.

COBELLA (*Zool.*) a species of Coluber.

COBILE (*Com.*) *Covid*, or *Coude*, a long measure used in several parts of India, which varies as the aune or ell does in Europe.

COBIO (*Ich.*) vide *Gobio*.

COBION (*Bot.*) a kind of spurge. *Plin. l. 26, c. 8.*

COBTIS (*Ich.*) a fresh-water fish mentioned by Pliny and Aldrovandus.

COBITIS, in the *Linnean system*, a genus of animals of the Class *Pisces*, Order *Abdominales*.
Generic Character. Head small, oblong, naked.—*Eyes* in the upper part of the head.—*Vent* nearer the tail.

COBLE (*Mar.*) a boat used in the turbot fishery, twenty feet long and five feet broad, and about one ton burthen.

COBO'B (*Cook.*) a dish among the Moors, which is made of several pieces of mutton wrapped up and roasted in a cawl.

COBOOZE (*Mar.*) in French *fogon*, a sort of box or house to cover the chimney of some merchant ships.

COBRA DE CAPELLO (*Zool.*) the Rattle-Snake, or *Crotalus horridus* of Linnæus, the stone or bone of whose head was reckoned an antidote to some poisons.

COBRE VERO (*Zool.*) vide *Bojubi*.

COBRE'LLO (*Med.*) vide *Epilepsia*.

COBWEBBED (*Bot.*) *arachnoideus*, an epithet for a leaf, a peduncle, or a calyx, which is covered with a thick interwoven pubescence.

COBUS DE CIPO (*Zool.*) vide *Boitiapo*.

CO'CA (*Mar.*) or *Cocacelle*, a cog, or little boat, which is used in fishing.

CO'CAO (*Bot.*) vide *Cocao*.

COCAZO'CHITL (*Bot.*) the Mexican name for the *Tajetas*.

COCCA CNIDIA (*Med.*) or *Gnidia*, vide *Cnidia*.

COCCA BAPTICA (*Ent.*) vide *Chermes*.

COCCA'RIMUM (*Med.*) a very small pill. *Oribas. Synop. l. 3.*

COCCE'IRA INDICA (*Bot.*) the *Cocos coccifera* of Linnæus.

COCCI ORIENTALIS (*Bot.*) vide *Cocculus Indicus*.

COCCY'FEROUS (*Bot.*) an epithet for such plants or trees as bear berries.

CO'CCIGIS OS (*Anat.*) vide *Coccygis os*.

COCCINE'LLA (*Ent.*) a genus of animals, Class *Insecta*, Order *Coleoptera*.
Generic Character. *Antennæ* clavate.—*Anterior feelers* hatchet-shaped.—*Thorax* and *Shells* margined.—*Abdomen* flat.
Species. Animals of this tribe feed on plant-lice. They are distinguished principally by the colour of their shells.

COCCINELLO'IDES (*Ent.*) a species of *Nitidala*.

CO'CCION (*Med.*) *κοκκίον*, a weight mentioned by Myrepsus, the same as *siliqua*.

COCCOBA'LSAMUM (*Bot.*) the fruit of the true balsam.

COCCOCYPSELUM (*Bot.*) a genus of plants, Class 4 *Tetrandria*, Order 1 *Monogynia*.
Generic Characters. *CAL. perianth* one-leaved; *segments* acute.—*COR.* one-petalled; *tube* longer than the calyx. *STAM.* filaments four; *anthers* erect.—*PIST. germ* ovate; *style* the length of the stamens; *stigmas* simple.—*PER.* berry roundish; *seeds* numerous.
Species. The species are—*Cocccocypsilum repens*, seu her-

baceum, &c. a perennial, native of Jamaica.—*Cocccocypsilum uniflorum*, seu *Fernelia*, &c. a shrub, native of the island of the Mauritius.

COCCOLO'BA (*Bot.*) a genus of plants, Class 8 *Octandria*, Order 3 *Trigynia*.
Generic Characters. *CAL. perianth* one-leaved; *divisions* oblong.—*COR.* none.—*STAM.* filaments three; *anthers* roundish.—*PIST. germ* ovate; *styles* three; *stigmas* simple.—*PER.* none; *calyx* berried; *seed* nut ovate.
Species. The species are shrubs.—*Coccoloba uvifera*, *Coccolobis*, *Polygonum*, *Uvifera*, *Guaiabara*, &c. seu *Prunus*, &c. Round-leaved Sea-side Grape, or Mungrove Grape-tree, native of America.—*Coccoloba pubescens*, seu *Scor-tea*, &c. Great-leaved Sea-side Grape, Native of America.—*Coccoloba excoriata*, *Coccolobis Guaiabara*, seu *Arbor*, &c. Oval-leaved Sea-side Grape, or Mountain Grape-tree, a shrub, native of America.—*Coccoloba punctata*, *Coronata*, *Coccolobis*, &c. seu *Uvifera*, &c. Spear-leaved Sea-side Grape, native of America.

COCCONILEA (*Bot.*) the *Rhus cotinus* of Linnæus.

COCCONES (*Bot.*) the *acini*, or grains of the Pomegranate.

COCCOTHR'AUSTES (*Orn.*) a bird of the finch kind, so called because it feeds on the kernels of cherry-stones.

CO'CCULUS (*Bot.*) the *Menispermum cocculus* of Linnæus, which produces a poisonous berry, well known by the name of the *Cocculus Indicus*, which is one of the deleterious ingredients employed in the making of beer, the use of which is expressly prohibited by act of parliament.

CO'CCUM (*Ant.*) or *Coccus tinctoria*, *κόκκος βαφικῆς*, the grain with which cloth was dyed; it had an astringent virtue, according to Dioscorides and Pliny. *Dioscor. l. 4, c. 172; Plin. l. 24, c. 3; l. 27, c. 9.*

Coccum, taken by itself, signifies *Grana Cnidia* in Hippocrates.

CO'CCUS (*Bot.*) vide *Coccum*.—*Coccus* is also the *Cocos nucifera* of Linnæus.

Coccus (*Ent.*) *Cochineal*, a genus of insects of the *Hemipterous* Order.
Generic Character. *Snout* seated in the breast.—*Antennæ* filiform.—*Abdomen* bristly behind.—*Wings* two, erect in the male, but without poisers.
Species. These insects inhabit various parts of plants, and are extremely troublesome in hot-houses. The male is very active, having an oblong body, an ovate abdomen, and a tail furnished with bristles. The female is slow, and has a body nearly globular. Several of the species, when dried, produce a colouring matter, but the *Coccus cacti*, that inhabits the *Cactus opuntia*, is the best fitted for this purpose. The female of this insect is the true cochineal of the shops, which is well known for its great use in dyeing and painting.

CO'CCYGÆ'US (*Anat.*) a muscle of the *Os coccygis*, by which it is moved forward.

CO'CCYGIS OS (*Anat.*) or *coccyx*, a cartilaginous kind of bone, joined to the extremity of the *os sacrum*; so called because it resembles the cuckoo's bill.

COCCY'GRIA (*Bot.*) or *Coccymania*, the *Rhus cotinus* of Linnæus.

CO'CCYS (*Bot.*) the *Palma coccifera*.

CO'CCYX (*Anat.*) vide *Coccygis os*.

COCE'TUM (*Ant.*) hotch-potch, or a food made of honey and poppy seed.

COCH (*Med.*) an abbreviation for *cochleare*, a spoonful.

CO'CHIA (*Med.*) a sort of officinal pills, one variety of which consists of colycinth and aloes, &c.

COCHILIA COLUMNA (*Ant.*) a pillar with winding stairs for ascending.

COCHINE'AL (*Ent.*) an insect which in the *Linnean system* is called *Coccus* and *Coccinelli*, and in commerce is well

known for its use in dyeing a rich scarlet. In their dried state these insects have the appearance of small grains. When dried, pounded, and prepared, the colour is sold in the shops under the name of *carmine*.—*Cochineal Grain*, the red berry which grows on an American tree, called the *Coccus cacti*, *Coccus Americanus*, or *Ficus Indianus*, is, on account of the beautiful scarlet dye that it yields, a great article of commerce. The insects which bear the same name, resemble these berries so much in appearance that they have been taken to be one and the same thing.

COCHLACÆ (*Nat.*) round stones in the rivers that look like snails.

COCHLEA (*Ant.*) 1. A pump for drawing up water, invented by Archimedes. *Diodor.* l. 5; *Vitruv.* l. 10, c. 11. 2. A kind of door belonging to the cavea of the Circus. *Varr. de Re Rust.* l. 3, e. 5. 3. The screw or spindle of a press. *Bud. in Pandect.* p. 172.

COCHLEA (*Anat.*) the internal cavity of the ear; so called from its resemblance to the spiral shape of a cochlea, or snail's shell. In it are observed the *modiolus*, or *nucleus*, extending from its basis to the *apex*, the *scala tympani*, *scala vestibuli*, and *spiral lamina*.

COCHLEA (*Mech.*) one of the five mechanical powers, otherwise called the *screw*.

COCHLEA'RE (*Med.*) a spoonful, which in prescriptions is abbreviated to *Coch*.

COCHLEA'RIA (*Bot.*) a genus of plants, Class 15 *Tetradynamia*, Order 1 *Siliculosa*.

Generic Characters. CAL. *perianth* four-leaved; *leaflets* ovate.—COR. four-petalled; *petals* obovate; *claws* narrow.—STAM. *filaments* six; *anthers* obtuse.—PIST. *germ* heart-shaped; *style* simple; *stigma* obtuse.—PER. *silicle* heart-shaped; *seeds* about four in each cell.

Species. The species are annuals, biennials, and some perennials, as the—*Cochlearia officinalis*, *Batava*, seu *Nasturtium*, &c. Common Scurvy-grass, an annual or biennial, native of Europe.—*Cochlearia Danica*, seu *Thlaspi*, &c. Danish Scurvy-grass, an annual or perennial, native of Denmark.—*Cochlearia Anglica*, seu *Britannica*, seu *vulgaris*, English or Sea Scurvy-grass, a biennial, native of England.—*Cochlearia Groenlandica*, seu *minima*, Greenland Scurvy-grass, an annual, native of Norway.—*Cochlearia coronopus*, *Lepidium*, *Coronopus*, *Nasturtium*, &c. seu *Ambrosia*, &c. seu *Pseudo-ambrosia*, Wild Scurvy-grass, or Swine's-cress, an annual, native of Europe.—*Cochlearia armoracia*, *Nasturtium*, &c. seu *Raphanus*, &c. Horse-radish, a perennial, native of Europe.—*Cochlearia macrocarpa*, seu *foliis*, *Glastifolia*, seu *Lepidium*, &c. Woad-leaved Scurvy-grass, a biennial, native of Rattisbon.—*Cochlearia draba*, seu *Lepidium*, &c. seu *Draba*, &c. a perennial, native of Austria.

COCHLEA'RIMUM (*Ant.*) a very small measure among the Romans, which, according to Columella, was the fourth part of the *eyathus*. *Colum. de Re Rust.* l. 12, e. 21.

COCHLEATA (*Bot.*) the *Medicago lupulina*.

COCHLEATUS (*Bot.*) screw-shaped; an epithet for a pod.—*Legumen cochleatum*, a pod that is turned like a screw.

COCHLIA'XON (*Mech.*) κοχλιάζων, name for part of a machine described by Oribasius. *De Machinam.* e. 24.

COCHLI'DIUM (*Con.*) κοχλιδίον, and κοχλίς, a small shell-snail.

COCHLITA (*Min.*) a stone of the shape and figure of a certain shell-snail.

COCHLITES (*Min.*) a precious stone. *Plin.* l. 37, c. 12.

COCHONE (*Anat.*) κοχών, according to Galen, the juncture of the *Ischium* near the seat or breech. *Hesychius*.

COCLIO (*Med.*) the weight of eleven ounces.

COCK (*Or.*) the male of most birds, but particularly of the well known domestic fowl in a farm yard.—Black Cock, the *Tetrus* of Linnæus. [vide *Black*]

Cock (*Her.*) this bird, which Guillim calls the knight among birds, is blazoned in coats of arms by the epithets *armed*, *crested*, *jellopped*; sometimes also *wattled* and *membered*; as "he beareth *Azure*, three cocks, *argent*, armed, crested, and jellopped, *proper*."

Cock (*Mech.*) the name for a part of several instruments, as 1. That part of the lock of a musket which sustains the jaws, or two small pieces of iron, between which the flint is put. 2. The pin of a dial or gun. 3. The needle of a balance. 4. The wrought piece which covers the balance in a clock or watch.

Cock (*Mar.*) vide *Cockboat*.—*Cocks* in a ship are small pieces of brass, with holes in them, which are put into the middle of large wooden shivers to prevent them from splitting or being galled by the pin or block of the pulley on which they turn.

COCK-CHAFFER (*Ent.*) or Tree-Beetle, a mischievous insect, the *Scarabæus melolontha* of Linnæus, which devours the leaves of trees, &c. The *grub* is soft and grey, with testaceous head and legs, remains in the earth for three years before it is transformed into the perfect insect, and devours the roots of vegetables.

COCK-FEATHER (*Archer.*) that feather of the shaft which stands upright in due notching.

COCK-HORSE (*Man.*) a tall kind of horse.

COCK-LOFT (*Husband.*) the highest loft or garret.

COCK-PIT (*Mar.*) vide *Cockpit*.

COCK-PIT (*Sport.*) a place where cocks fight.

COCK-ROACH (*Ent.*) the *Blatta* of Linnæus, which, with its larva, wanders about by night, and secretes itself by day. Insects of this tribe are fond of warmth, and haunt houses, where they devour meal and other provisions.

COCK-ROADS (*Fowl.*) a net chiefly used for catching woodcocks.

COCK-SWAIN (*Mar.*) vide *Cockswain*.

COCKTHRO'PLED horse (*Vet.*) one whose thropple or windpipe is so long, that he cannot fetch his breath so easily as others do, which are loose thropled.

to COCK a gun (*Mil.*) to fix the cock so as to have the piece ready for discharge.

COCKA'DE (*Mil.*) a ribbon worn by the soldiers in their hats.

COCKA'L-BONE (*Anat.*) vide *Astragalus*.

COCKAROUSE (*Polit.*) a name among the Virginian Indians for one who was of the king's privy council.

COCKATOO' (*Or.*) a species of the parrot or *Psittacus* of Linnæus, having a short tail, even at the end.

COCKBOAT (*Mar.*) a small boat used on rivers, or near the shore, which is of no service out at sea, because it is too small or feeble.

COCKCHAFFER (*Ent.*) vide *Cock*.

COCKEIN (*Com.*) an imaginary specie, used in Japan, like the pistole in many parts of Europe. It is equal to ten French livres.

COCKET (*Law*) *Cockettum*, the office at the custom-house, where the goods to be exported are entered; also the custom-house seal, or the parchment sealed and delivered by the officers of the customs to merchants, as a warrant that their goods are customed.

COCKET (*Law*) a measure made use of for the distinction of bread in the statute of bread and ale. 51 H. 3, stat. 1; *Flet.* l. 2, c. 9.

COCKETA'TA lana (*Law*) wool duly entered at the custom-house, and cocketed or allowed to be exported.

COCKETTUM (*Law*) 1. The custom-house seal. [vide *Cocket*] 2. The office belonging to the custom-house, where cockets are to be procured.

COCKFEATHER (*Archer.*) vide *Cock*.

COCKHORSE (*Man.*) vide *Cock*.

COCKING cloth (*Sport.*) a frame made of coarse canvass, tanned, with two sticks set across to keep it extended, and a hole through which the muzzle of a gun may be put, to shoot pheasants, &c.

COCKING (*Carpent.*) a method of securing beams to wall-plates, by notching each beam at the end, and cutting reverse notches in the wall-plate.

COCKLE (*Bot.*) the *Agrostema githago* of Linnæus, an annual, and a weed that infests corn fields; it is otherwise called corn-rose.

COCKLE (*Conch.*) a sort of shell-fish; the *Cardium* of Linnæus.

COCKNEY (*Cus.*) a nickname given to one who is born and bred in the city of London, within the sound of Bow-bell.

COCKPIT of a ship of war (*Mar.*) a place where the wounded are dressed, on the lower floor or deck, lying between the platform or lower deck and the steward's room, where are partitions for the purser, the surgeon, and his mate.—*The Fore-Cockpit*, a place leading to the magazine passage, and the boatswain's, gunner's, and carpenter's store-rooms.

COCKPIT (*Polit.*) an apartment in the treasury where the king's speech is read before the meeting of Parliament, and also appeals in prize causes are heard.

COCKPIT (*Sport.*) vide *Cock*.

COCKREL (*Sport*) a young cock bred for fighting.

COCKS for blocks (*Mar.*) little square pieces of brass with holes in them, and put into wooden sheaves to keep them from splitting and galling by the blocks in which they move.

COCK'S-COMB (*Bot.*) an annual, the *Celsia* of Linnæus.—Cock's Foot-Grass, the *Dactylis*, a perennial.—Cock's Head, the *Hedysarum caput galli*, &c. a perennial.

COCKSWAIN (*Mar.*) vulgarly *Cockson*, in French *patron de chaloupe*, an officer of a ship who takes care of the cockboat, with all its furniture.

COCKS' WALK (*Sport.*) a place where cocks are bred for fighting.

COCOA-NUT (*Bot.*) the nut or fruit of the *Cocos nucifera*. This fruit is properly a berried drupe, and the shell is of a bony substance, containing a kernel, and also a sweet refreshing liquor. The kernel is very nourishing, and much used as a substitute for almonds in cookery; and in medicine a pure sweet oil is extracted from it, which is also of great use. From the tree is drawn a sort of wine, called *toddy*, from which, when sour, is distilled the spirituous liquor called *arrack*. The husk of the shell is used for making chocolate; and the shell itself serves for many domestic purposes.—Cocoa Plum, the *Chrysobalanus* of Linnæus.

COCOLATA (*Bot.*) Chocolate.

COCOMICA (*Med.*) a term used by Paracelsus, which seems to signify the effects produced upon the human body by blasts. *De Podag.* l. 2.

COCOS (*Bot.*) a genus of plants, Class 20 *Monœcia*, Order 6 *Hexandria*.

Generic Characters. CAL. *spathe* universal; *spadix* branching; *perianth* three-parted; *divisions* concave.—COR. *petals* three.—STAM. *filaments* six; *anthers* sagittate.—PIST. *germ* scarcely manifest; *styles* three; *stigma* obsolete.—PER. abortient; *seed*, nut very large; *kernel* hollow.

Species. The species are shrubs, as the—*Cocos nucifera*, seu *inermis*, seu *Coccus*, &c. seu *Palma*, &c. seu *Callappa*, &c. seu *Tenga*, seu *Inaja*, seu *Maron*, *Cocconut-tree*, native of Asia.—*Cocos chilensis*, &c. native of Chili.—*Cocos butyracea*, seu *inermis*, seu *Pindora*, native of America.—*Cocos aculeata*, a shrub, native of Martinica.—*Cocos fusiformis*, seu *Palma*, &c. native of Jamaica.—*Cocos maldivica*, native of the Maldives.—*Cocos guineensis*, *Bactris*, &c. seu *Palma*, &c. Prickly

Pole, native of South America.—*Cocos Nypa*, seu *Nypa*, native of the Philippines.

Cocos is also the *Palma coccifera*.

COCOXIHU'TL (*Bot.*) the *Bocconia frutescens* of Linnæus.

COCTILIA (*Ant.*) Charcoal, or wood burnt and dried, that it might not smoke.

COCTION (*Med.*) in Greek *πέψις*, and Latin *coctio*, boiling or digesting; signifies, 1. The reduction of the aliments to a sort of emulsion or chyle. 2. The reduction of morbid matter, or the matter which forms a disease to a natural and healthy state: this may be produced spontaneously, or by the force of medicine. The period of time in which the disease is undergoing that process is called its state of coction.

COCTURA (*Med.*) vide *Coctio*.

CO'CU'LA (*Archæol.*) a small drinking cup in the shape of a boat.

CO'CU'LUS Indicus (*Bot.*) vide *Cocculus*.

COCU'STA (*Bot.*) the tree which produces the *gum animé*.

COCY'TA (*Med.*) vide *Malis*.

COD (*Ich.*) a well known fish which inhabits the Northern seas; the *Gadus* of Linnæus.

COD-FISHER (*Mar.*) a vessel employed in the curing of cod; also the person so employed.

COD-PIECES (*Mil.*) iron appendages attached to ancient armour, to prevent the consequences of violent shocks in battle.

CODA (*Mus.*) Italian for a small number of bars at the end of a composition.

CODAGAM (*Bot.*) the *Hydrocotyle Asiatica* of Linnæus.

CODAGA Pala (*Bot.*) a tree growing in Malabar; the *Nerium antidysentericum* of Linnæus.—*Codaga pelavi*, the *Morinda citrifolia*.

CODDA-PULLIS (*Bot.*) vide *Carcapulli*.—*Codda-Panna*, the *Corypha umbraculifera*.

COD'DED Corn-violet (*Bot.*) the *Campanula hybrida* of Linnæus.

CODE (*Law*) vide *Codex*.

CODESELLA (*Med.*) vide *Carbunculus*.

CODEX (*Law*) signifies literally a volume or roll; but is particularly applied to the volume of Civil Law, collected by the emperor Justinian from all the pleas and answers of the ancient lawyers, which were in loose scrolls or sheets of parchment; these he compiled into a book, which goes by the name of the codex.

CO'DIA (*Bot.*) a term formerly used for the top or head of any plant, but particularly that of the poppy.

CODIA, in the Linnæan system, a genus of plants, Class 8 *Octandria*, Order 2 *Digynia*.

Generic Characters. CAL. common four-leaved; proper four-leaved.—COR. *petals* four.—STAM. *filaments* eight; *anthers* ovate-angulate.—PIST. *germ* very small; *styles* two; *stigmas* simple; *receptacle* common villose.

Species. The only species is the—*Codia montana*, a shrub, native of New Caledonia.

CODIÆ'UM (*Bot.*) a species of the *Croton* of Linnæus.

CODIA'MINON (*Bot.*) a herb which blossoms twice a year. *Plin.* l. 21, c. 21.

CODIA-VA'NACU (*Bot.*) an under-shrub growing in the East Indies; the juice of which, boiled in oil, is a restorative in case of weakness; and the *Tragia chamela* of Linnæus. *Raii Hist. Plant.*

CODICAR'IÆ naves (*Ant.*) ships or barges made of thick planks. *Non. ex Varr.*

CO'DICIL (*Law*) *Codicillus*, a supplement to a will, by which the testator adds to, explains, or retracts what he has done.

CODI'NIAC (*Med.*) marmalade of Guinea.

CO'DLIN-TREE (*Bot.*) a variety of the *Pyrus malus*, or

Apple-Tree.—Codlins and Cream, a perennial, the *Epilobium hirsutum* of Linnæus.

CODOCELE (*Med.*) a bubo. *Fallopian*.

CODON (*Bot.*) a genus of plants, Class 10 *Decandria*, Order 1 *Monogynia*.

Generic Characters. CAL. perianth one-leaved; leaflets subulate.—COR. one-petalled; border equal; nectary ten-celled.—STAM. filaments ten; anthers thick.—PIS. germ superior; style simple; stigmas two.—PER. two-celled; seeds several.

Species. The only species is *Codon Royeni* seu *aculeatum*, an annual, native of the Cape of Good Hope.

CODONES (*Ant.*) κώδωνες, little bells. *Hesychius*.

CODONOPHORI (*Ant.*) κωδωνοφόροι, those who at funerals go before, ringing bells. *Schol. in Aristoph.*; *Hesychius*; *Suidas*.

CODOSCELE (*Med.*) vide *Codocele*.

COE (*Min.*) a name which miners give to the little lodgement that they make underground for themselves as they work lower and lower.

CŒCA' LIS (*Anat.*) a vein so called, which is a branch of the concave side of the *vena mesaraica*.

CŒCUM (*Anat.*) vide *Cæcum*.

COEFFICIENTS (*Algeb.*) a term first employed by Vieta to denote any known quantity that is multiplied into any of the unknown terms of the equation; thus, in $3a + b x - c x^2$, 3, b and c are the coefficients which are thus multiplied into a , x , x^2 . When no number is placed 1 is understood to be the coefficient, as x , which is equivalent to $1 x$. *Vieta Isagog.* c. 8.—*Coefficients of the same order*, are such as are prefixed to the same unknown quantities in different equations, as in the equations $a x + b y + c z = m$, $d x + e y + f z = n$, $g x + h y + k z = p$; a , d , g , are coefficients of the same order, being coefficients of the letter x ; b , e , h , are coefficients of the same order, being coefficients of y ; and so likewise c , f , k , which are coefficients of z .—*Opposite coefficients*, are those which are taken each from a different equation, as a , e , k , or a , h , f , in the foregoing equations.—*Coefficients of any generating term in fluxions*, is the quantity arising from the division of that term by the generated quantity.

CŒLA (*Ant.*) κείλα, the cavities or hollows, as they are called, of the eyes: the one in the superior eyelid is properly the κείλον, in distinction from the other in the inferior eyelid, which is the ὑπόκειλον: κείλα of the feet are those parts which are at the bottom of the feet adjacent to the heel.

CŒLESTIAL (*Astron.*) vide *Cælestial*.

CŒLESTINUS Colour (*Med.*) sky colour, a term used by Paracelsus to denote that a circle of this colour, in the urine of women, is a sign of leprosy in the matrix.

CŒLIA (*Anat.*) κοιλία, κοιλίη, a cavity in any part of the body, but particularly in the viscera. It was divided by the ancients into ἡ ἄνω κοιλίη, the stomach; ἡ κατω κοιλίη, the belly.

CŒLIAC artery (*Anat.*) *arteria cæliaca*, the first branch given off from the *aorta* in the cavity of the abdomen, which sends branches to the diaphragm, stomach, liver, pylorus, duodenum omentum, and spleen.—*Cæliac vein*, that which runs into the *intestinum cœcum*.

CŒLIAC Passion (*Med.*) *cæliaca passio*, κοιλιακή, a disorder of the stomach, which is so called from κοιλία, the part affected. This disorder is defined by the ancients to be a sort of *diarrhœa*, in which the aliment passes off in a dissolved but crude state. The disorder is not mentioned by Hippocrates; but those affected with it are called by Aretæus κοιλιακοί, and by Cælius Aurelianus *ventriculosi*: Celsus also speaks of a disorder under a similar name, which however differs materially, according to his description, from the one above-mentioned. *Aret. de Caus. et*

Sign. acut. Morb. l. 2, c. 7; *Cæl. Morb. Chron.* l. 4, c. 3; *Cæl.* l. 4, c. 12. The *Cæliac Passion* is defined variously by the moderns, but Cullen considers it to be a sort of *diarrhœa*.

CŒLI-FLOS (*Bot.*) or *Cælifolium*, Starfall; the *Tremella nostoch* of Linnæus.

CŒLI-ROSA (*Bot.*) the *Agrostema* of Linnæus.

CŒLIT-LAWAN (*Bot.*) the *Laurus culilaban* of Linnæus.

CŒLOMA (*Med.*) a hollow round ulcer in the horny tunic of the eye.

CŒLON (*Nat.*) a kind of sil, or painter's colour.

CŒLOSTOMIA (*Med.*) κωλοστομία, a defect in speaking; when a person's speech is obscured in such manner as to sound as if it came from a cavern.

CŒLUM (*Anat.*) a name for the cavity of the eye towards the corner.

CŒMENTATIO (*Mech.*) vide *Cement*.

CŒMETERIUM (*Ecc.*) Cemetery, a burying place.

COEMPTIO (*Law*) a solemnity of the civil law whereby the man and wife (that were to be) did, as it were, buy one another, so, as by that means, they had a right to each other's goods. *Cic. Or.* l. 1. c. 56; *Ulp. Instant. apud. Boeth.* top. 3.

CŒNA (*Ant.*) the principal meal among the Greeks, Jews, and Romans, which was so called from κοινή, common, because it was the meal at which all the family met; it began at the ninth hour, or three in the afternoon, and corresponds, therefore, to the modern dinner, although the word is most frequently rendered by supper. This meal consisted of three courses; namely, the *First course*, δειπνῶ προόμιον, *cœna præfatio vel gustatio*, consisting of eggs, oysters, fruit, &c.—The *second course*, δεῖπνον, *cœna*, or κεφαλή δειπνῶ, *caput cœnæ*, which was supplied with dainties of various sorts.—The *third course*, δευτέρα τραπέζα, *secunda mensa, mensa pomorum*, consisted of the desert, which was the richest part of the meal. The Romans distinguished it into different kinds, as the—*Cœna adjicialis*, an extraordinary entertainment, when something particular, *adjiciebatur*, was added to the elegance of the feast.—*Cœna adventitia*, a feast of welcome given to friends on their return home.—*Cœna auguralis*, an augural supper, and the like. *Plaut. Bacch.* act. 3, Scen. 6; *Cic. ad Fam.* l. 9, ep. 26; *Plin.* l. 10, c. 20; *Plin.* l. 3, epist. 1; *Tacit. Annal.* l. 2, c. 65.

CŒNACULA'R IUS (*Ant.*) a tenant living in a garret, or upper room of the house; also he who lets lodgings.

CŒNACULUM (*Anat.*) 1. The room set apart for supper. 2. A chamber or room in an upper part of the house. *Fest. de Verb. Signif.*

CŒNATIO (*Ant.*) a banquetting room.

CŒNIPE'TA (*Ant.*) a toad-eater, or smell-feast; one who hangs on another for a meal of victuals.

CŒNOBIA'RCHA (*Ecc.*) the superior of a convent, an abbot, or prior.

CŒNOBITA (*Ecc.*) Cœnobites, they who are of the society of a monastery, or college of priests. *Cæl. Rhodig.* l. 10, c. 4.

CŒNO'BIUM (*Anat.*) from κοινός, common, and βίος, life; a community of living, as in a monastery or convent. *Isid. Orig.* l. 15, c. 4.

CŒNOLOGIA (*Med.*) κοινολογία, a consultation of physicians, from κοινός and λογός, speech.

CŒNOTAPH (*Ant.*) vide *Cenotaph*.

CŒNOTES (*Med.*) κοινότης, signifies literally community, but was applied, by physicians of the methodic sect, to those disorders which arise both from relaxation and stricture, in distinction from those which arose from either one or the other singly.

CŒRULEUS *Lapis* (*Min.*) the sulphate of copper.

COETANEUS (*Chron.*) an epithet for a person living

at the same time with another, or for any thing that happens in the same age.

COETERNAL (*Theol.*) an epithet applied to the three persons in the Holy Trinity.

COETUS (*Ant.*) though taken generally for any assembly, was more frequently used to denote an unlawful or seditious meeting.

COEUR (*Her.*) or *party en coeur*, signifies a short line of partition in pale in the centre of the escutcheon, which extends but a little way, much short of the top and bottom, and is there met by other lines which form an irregular partition of escutcheon.

COEVAL (*Chron.*) an epithet for any persons or things which are in the same age, or of the same duration.

COFFEA (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* five-toothed.—COR. one-petalled; *tube* cylindrical; *border* flat; *divisions* lance-shaped.—STAM. *filaments* five; *anthers* linear.—PST. *germ* roundish; *style* simple; *stigmas* two.—PER. *berry* roundish; *seeds* one or two.

Species. The species are shrubs, as the—*Coffea sambucina*, seu *foliis*, &c. native of the Friendly Isles.—*Coffea opulina*, native of New Caledonia.—*Coffea odorata*, native of the Friendly Isles.—*Coffea arabica*, *Jasminum*, *Evo-nymo*, &c. seu *Bon*, Eastern Coffee-tree, native of Jamaica.—*Coffea triflora*, seu *foliis*, &c. native of Otaheite.—*Coffea occidentalis*, *Pavetta*, &c. seu *Jasminum*, &c. Western Coffee-Tree, native of America.

COFFEE (*Bot.*) the berry, or fruit of the Coffee-Tree; the *Coffea* of Linnæus, from which the well-known drink is prepared that goes by the same name.

COFFER (*Mech.*) a chest or trunk; also a long square box or trough, in which tin ore is broken to pieces in a stamping mill.

COFFER (*Fort.*) a hollow trench or lodgment cut in the bottom of a dry ditch.

COFFER (*Archit.*) a square depression or sinking in each interval between the modillions of the Corinthian cornice, and in other parts.

COFFER (*Mar.*) in inland navigation, a large wooden vessel with moveable ends to receive the barge or vessel. It answers the purpose of a lock.

COFFER-DAM (*Archit.*) or *Battardeaux*, in bridge building, a case of piling fixed in the bed of a river for the purpose of building a pier dry.

COFFERER (*Law*) the second officer in the King's household, next to the comptroller, who has the oversight of the other officers, and pays them their wages.

COFFILA (*Com.*) or *Bahar*, a weight used at Bencoolen, Malacca, and other parts of India, equal to 564 lbs. weight.

COFFIN (*Vet.*) the whole hoof of the horse's foot above the coronet, including the coffin-bone, the sole, and the frush.—*Coffin-bone*, that bone which lies within the hoof, as in a coffin.—*Coffin-Joint*, that which connects the pastern with the wheel.

COFFIN of Paper (*Com.*) a triangular piece, such as grocers put up pepper, &c. in form of a cone.

COFFIN (*Print.*) the framework of the printing-press, in which the stone is bedded.

COFFRE d'une batterie (*Fort.*) the solid work which covers the pieces of ordnance that are planted in a battery.—*Coffre à feu*, a machine filled with combustible materials for the purpose of doing mischief to a scaling party.—*Coffres des galeries de mine*, a sort of platform made of planks, which serve to support the galleries of a mine.

COG (*Mar.*) or *coggle*, a kind of little ship or vessel used in the river Ouse. *Stat.* 23 *Hen.* 8, c. 10.

COG (*Mech.*) vide *Cogs*.

COGGLE (*Mar.*) vide *Cog*.

COGNA'TI (*Law*) relations by the mother's side, in distinction from the *agnati*, who are on the father's side.

COGNA'TIONE (*Law*) a writ of cousenage, a writ that lies where the *tresail*, that is, the father of the *besail*, or great grandfather, dying, seized of lands and tenements, a stranger enters upon the heir and abates. *Stat.* 9 *Hen.* 4, c. 5; 8 *Hen.* 6, c. 26; *Brit.* c. 89; *F. N. B.* 221.

COGNISANCE (*Law*) signifies the hearing of a thing judicially; also the acknowledgement of a fine; and, in replevin, the answer given by a defendant who has acted as a bailiff, &c. to another in making a distress. But the term cognizance is particularly taken in the sense of *cognizance of pleas*, which is a privilege granted by the King to a city or town to hold the plea of all contracts, &c. within the liberty of the franchise.

COGNISE'E (*Law.*) vide *Cognisor*.

COGNISOR (*Law*) is one who passes or acknowledges a fine of lands or tenements to another, in distinction from the *cognisee*, to whom the fine of the said lands, &c. is acknowledged. *Stat.* 32 *Hen.* 8, c. 5.

COGNITIO (*Law*) the trial or hearing of a cause.

COGNITION (*Law*) in the Scotch Law, is the process whereby molestation is determined.

COGNITIO'NES (*Archæol.*) ensigns and arms.

COGNITIO'NIBUS *admittendis* (*Law*) a writ to a justice, or other person, who has power to take a fine, and having taken acknowledgement of a fine, delays to certify it in the court of Common Pleas, requiring him to do it.

COGNITOR (*Ant.*) one who managed the cause of another, or defended his cause. *Ascon. in Cic.* p. 17.—*Cognitor* is also the name of one who bore testimony that he knew a man to be a Roman citizen, who wanted to escape the ignominious punishment with which he was threatened. *Cic. in Verr.* l. 5, c. 65.

COGNIZANCE (*Her.*) a badge which subordinate officers, and even soldiers, bore on their shields, for distinction sake, in the place of the crest, which was worn only by superiors.

COGNOMEN (*Ant.*) a surname, or a family name which a man has from his father, as Caesar, the *cognomen*; in distinction from Julius, the *nomen*. *Suet. Jul.* c. 20; *Diomed.* l. 1; *Priscian.* l. 2, c. 578, *Putsch. Ed.*; *Sigon. de Rom. Nom.* c. 1.

COGNOVIT *actionem* (*Law*) is when a defendant acknowledges and confesses the plaintiff's cause against him to be just and true; and, before and after issue, suffers judgment to be entered against him without trial. In this case confession extends no farther than to what is contained in the declaration.

COGS (*Mech.*) the teeth of a mill-wheel.

CO'GWARE (*Com.*) a sort of coarse cloths made in different parts of England, of which mention is made in *Stat.* 13 *Rich.* 2, c. 10.

COHÆRARIUS (*Ant.*) a coheir, or joint heir; and likewise a partner in any office.

COHE'SION (*Phy.*) that power or property by which the homogeneous particles of substances are kept attached to each other, in distinction from adhesion, which is a partial union between substances similar or dissimilar.

COHI (*Com.*) a large dry measure used in the kingdom of Siam for corn, &c. equal to five thousand pounds of European measure.

CO'HOB (*Chem.*) vide *Cohobation*.

COHOBATION (*Chem.*) or *cohob*, *cohobatio*, the returning of liquor distilled from any substance back again upon the same substance, and distilling it again.

CO'HOL (*Chem.*) vide *Alcohol*.

COHOL (*Med.*) a dry *collyrium* for the eyes. *Avicen. apud Castell. Lex. Med.*

COHORS (*Ant.*) a military body, which constituted the tenth part of a legion, and consisted in general of about 600 men. The first cohort exceeded all the rest in number and dignity, being chosen out of the *evocati*, and appointed to attend upon the Prætor; whence it was called *cohors Prætoria*. Its place, in the order of battle, was the right of the first line, and so of the rest in order. On medals and coins *cohors* is abbreviated COH. or COHORT. for *cohortis*, &c. *Varr. de Lat. Ling.* l. 4, c. 16; *Liv. passim.*; *Veget.* l. 2, c. 16; *Lips. de Milit. Rom.* l. 2, c. 4; *Salmas. de Mil. Rom.* c. 2; *Schel. in Polyb. apud Græv. Thes. Antiq. Roman.* tom. 10, &c.

COHORTALES (*Ant.*) a kind of commissaries, or masters of the horse, to Lieutenants or governors of Provinces; also, in general, any attendants or retainers to magistrates.

COHUA'GIUM (*Archæol.*) a tribute paid by those who met together promiscuously in a market or fair.

CO'HUM (*Ant.*) a thong wherewith the ox-bow and yoke were tied together.

COIANG (*Com.*) both a weight and measure of Cambaye in the East Indies.

COIF (*Anat.*) a name given by Winslow to the aponeurotic expansion which covers the head like a cap, and is spread round the neck, and on the shoulders like a riding-hood.

COIF (*Law*) a sort of hood, or cap for the head: whence *Serjeants of the Coif*, a title for the serjeants at law who formerly wore a coif of lawn on their heads under their caps. This is now worn upon the hinder part of their wigs.

COIL (*Mar.*) the ring or circle formed by a cable in coiling or winding it.—*Coil*, in French *cueiller*, the manner in which ropes are disposed in a vessel by winding them in the form of a ring, and making the circles to lie one upon another.

COILA'NTHIA (*Bot.*) the *Gentiana purpurea* of Linnæus.

COILING of the stud (*Man.*) the selecting of a colt or young horse for service.

COILOPHYLLUM (*Bot.*) the *Sarracena flava et purpurea* of Linnæus.

COILOTAPHALUS (*Bot.*) the *Cecropia peltata* of Linnæus.

COIN (*Ant.*) vide *Moneta*.

COIN (*Com.*) a piece of metal stamped with certain marks, and made current as money for a certain value. [vide *Coinage*]

COIN (*Archit.*) vide *Coins*.

COIN (*Print.*) vide *Coins*.

COIN (*Mar.*) vide *Coins*.

COINAGE (*Com.*) signifies either the act of coining, or the thing coined, of which it is a collective term equivalent to the word *coins*. The materials used for coinage are gold, silver, copper, brass, and sometimes even iron; the two first of which, from their high value, are denominated the precious metals, which, when in a state for converting into coin, are called *bullion*, and the pieces of bullion are called *bars* or *ingots*.

Standard. When any baser metal is mixed with gold or silver in coinage it is called an *alloy*, in distinction from the pure metal called *fine*. The fixed proportion in which this mixture is made is denominated the *standard of fineness*, and the weight of each piece or coin is the standard weight. The standard of silver coin has, with occasional variations, always been eleven ounces two pennyweights fine and eighteen pennyweights alloy; the weight twenty-four grains to each penny. This was also denominated *sterling*, a term which, from the high esteem in which this standard has always been held, is now made to signify the standard of excellence. Gold is estimated by carats and grains, each carat consisting of four grains. The Old Standard for gold consisted of 23 carats $3\frac{1}{2}$ grains fine and half a grain alloy; the New

Standard of 22 carats fine and 2 carats alloy; both of which have been subject to occasional variation.

Mint. The place where the coinage of a country is carried on is called the *mint*, the officers of which, among the Saxons, were in general called *moneyers*, whose names are met with on the Saxon coins, together with that of the place where the coin was struck. Plate No. I. (31.) The officers which have been since appointed are very various, as the Master, Wardens, and Comptroller of the Mint, Assay-Master, &c. [vide *Mint*]

Process of Coining. Coining was formerly carried on by means of the hammer, but now more expeditiously by means of a machine called a *mill*. [vide *Mill*] The piece of metal which is cut and prepared for the mill is called the *planchet* or *blank* before it is struck, and the steel masses on which the figures are marked are called the *dyes*, between which the planchet is pressed by the force of screws, so that at one pull the impression is made on both sides. Money coined by the hammer is called *hammered*, and that by means of the mill *milled*.

Assay. The act of ascertaining the purity of bullion gold, or the standard fineness of coins, is called the *assay*; and the pieces or coins selected for this purpose are called the *trial pieces*: of these two are selected, one for the private assay of the mint, and the other for the public trial by a jury of twelve goldsmiths, which is called the *trial of the pix*, from the *pix*, or box, in which the pieces are contained. The quantity or weight from which these two pieces are taken is called a *journey*, namely, of gold fifteen pounds, and of silver sixty-five; and the sum total of any monies coined within a given period, or out of any number of journeys, is called a *delivery*, several of which are collected together for examination at the stated times of trial. At this trial the jury determine whether the monies so coined are of the standard fineness required by the *indenture*, or warrant, and return their verdict according as they find them within the *remedy*; i. e. within the legitimate allowance for deficiency or not.

Profits of the mint. The profits of the mint, which formerly constituted a considerable branch of the royal revenue, are known by the names of *seignorage*, which was a deduction from the bullion that was coined; *moneyage*, a triennial tax, which was imposed in the place of seignorage; and the *profit of the shere*, which was derived from the allowance for the *remedy*. But, in the lieu of these, a parliamentary allowance has been granted, to defray the expences of the coinage.

Coins. The several pieces of metal which are struck by the process of coining are denominated coins; having two sides, called the *obverse*, or face, on which the head or profile is put; and the *reverse*, which is the same as the back. The letters engraven in the field, or middle, are called the *inscription*; those on the *exergue*, or outer rim, the *legend*. Coins, according to their materials, are distinguished into *gold*, *silver*, *copper*, &c. to which may be added a sort of money formerly coined, called *black money*, which was copper washed with about one-fifth part of silver, in distinction from *white money*, which was standard silver. Coins are, moreover, distinguished according to the country in which they are current, into *Foreign* and *English*.

Foreign Coins. The following Tables comprehend a general account of the most important foreign coins in silver and gold that are now current; the first column contains the names of the coins in alphabetical order; the second, that of the country in which each is current; the third, the assay, or average standard of fineness; and the fourth, the average value, nearly, in sterling money.

English Coins. The coins comprehended under this name are the British, or those which were current among the first inhabitants of Britain, of which a few specimens are given in Plate No. I. (31). The Saxon coins, the earliest of which are commonly distinguished by the name of *scotta* [vide Plate No. I. (31)]. The English coins, properly so called, comprehend those which have been coined from the time of the conquest to the present period, of which the following Table exhibits a general view: the first column containing the year of the reign, the king's name, and the year of our Lord in which the coins were struck; the second, the name of the species or pieces which were coined; the third, the standard fineness; the fourth, the standard weight; and the fifth, the value of the pound by tale.

Explanation of the Plates.

Plate, No. I. (31)

BRITISH COINS. *Fig. 1.* A brass coin; obverse a rude bust; reverse a Briton driving his chariot over a prostrate warrior.—*Fig. 2.* A tin coin; obverse an unknown head; reverse an eagle, apparently copied from a Roman standard.—*Fig. 3.* A tin coin; obverse two rudely drawn animals, resembling dogs erect, with a ring between them suspended by their fore paws; reverse two swine in the same posture.—*Fig. 4.* A gold coin of Cunobelinus; obverse the legend CAMV. for *Camulodunum*, Colchester; reverse two horses and a wheel; the legend CVNOBILI.—*Fig. 5.* A silver coin of Cunobelinus; obverse a bust, but whether of the monarch or not is doubtful; legend TASCIO VAN; reverse Apollo playing on a lyre, as he is represented on the Roman coins.—*Fig. 6.* A brass coin of Cunobelinus; obverse a bust which seems to be intended for the portrait of Augustus; legend CUNOBELINI; reverse a centaur winding a horn; legend TASCIO VANI.

SAXON COINS. *Fig. 1.* A sceatta, which is now known to contain on the obverse a rude representation of a bird; the characters on the reverse are unknown.—*Fig. 2.* Another sceatta bearing on the obverse the figure of a bird; and on the reverse the rude figures of Romulus and Remus, with the wolf.—*Fig. 3.* A coin of Egbert, bearing on the obverse a rude bust of the monarch; legend ECGBEARHT REX; reverse, the legend OBA MONETA, the cross, and a monogram, supposed to be Dorob. C.—*Fig. 4.* A coin of Alfred, bearing on the obverse a bust of the king, ornamented with a plain double fillet, and jewel in front; legend ELFRÉD REX; reverse, the name of the moneyer TILEVINE MONETA and LONDINIA, in a monogram.—*Fig. 5.* A coin of Edward I., bearing the bust of the king, with a plain double fillet, and legend EDWARD REX. Rev. the representation of a church, as is supposed, legend VVLFESIGE.—*Fig. 6.* A coin of Ethelred, bearing on the obverse the bust, adorned with a single fillet, having the ends pendent, and terminated with pearls, legend ÆTHELRED REX ANGLORUM. Rev. in the centre, *a* and *w*, with the hand of Providence, legend VALTFERTH. MOGIP. i. e. Ipswich.—*Fig. 7.* A coin of Canute, bearing on the obverse a bust of the

king, with a kind of bonnet or helmet, surrounded by a fillet; both that and the bonnet have the ends pendent and ornamented with pearls; also a sceptre, surmounted with a *fleur de lis*, legend CNU. REX. Rev. MO-KULFON STAM. i. e. Stamford.

ENGLISH SILVER COINS. *Fig. 1.* A penny of William, which is ascribed to the Conqueror, from the circumstance of the double sceptre, to which his son Rufus had no pretension; the sceptre in his right hand is surmounted with a cross paté, or holy cross; that in his left is surmounted with three pellets or pearls crosswise at the point, legend WILLEM REX ANGLOR, the Saxon *W* (*W*), being invariably used on these coins. Reverse, a cross, with four sceptres, *bottonné* or *pointonné* in the quarters, in form of an escarbuncle.—*Fig. 2.* An Irish halfpenny of King John; obv. full face, in a triangle, which is supposed to represent the Irish harp, legend JOHANNES REX. Rev. in a triangle, a crescent, and blazing star, with a small star in each angle of the triangle, legend WILLEM ON DL., i. e. Dub.—*Fig. 3.* An Irish farthing of King John, very similar to the former, except the blazing star in the triangle, and the legends on the obverse WILLEM ON: reverse JOHANES DW. i. e. Dublin.—*Fig. 4.* A groat of Edward I., II., or III.; obverse a head full faced, bearing an open crown, with three *fleur de lis*, and pearls between; hair much extended in a double tressure of four arches, with mullets and roses, legend EDWARDUS DI. GR. REX ANGL. Rev. a cross, fleury, extending to the outer edge of the piece, the pellets within the inner circle; legend in the outer circle DNS HIBNE DUX AQUT. inner circle CIVI. LONDONIA. Ireland and Aquitaine occur, for the first time, on the coins of this king, although the latter was inserted upon the Great Seals of Henry II. The crosses of different forms were laid aside in this reign, and a double or single cross with pellets, as in the figure, was introduced, and continued in use till the reign of Henry VII.; a crown of this form was also in use until his time.—*Fig. 5.* A shilling of Henry VII. Obv. Profile of the king to the left, with a crown of one arch only; mint mark a *fleur de lis* on both sides; legend HENRIC SEPTIM. DI. GRA. REX. ANGL. Z. FR. Rev. The arms of France and England quarterly, in a plain shield, surmounted by a cross fourchy. In the smaller coins is a key on each of the lower quarters of the cross below the base of the shield; legend POSUI DEU. ADIUTOREM MEU. The coins of this reign were distinguished from those of preceding reigns by several particulars: the arms of England and France took place of the pellets; numerals, as VII, were first used on some coins to distinguish the kings of the same name, besides the exchange of the side face for the full face: a practice which has continued ever since, with this difference only, that the heads are sometimes turned to the right, and sometimes to the left.—*Fig. 6.* A crown of Henry VIII, which is supposed to have been struck upon Henry's assuming the supremacy, and to have served more as a medal than a coin. Obv. Face nearly full, bust to the waist, crown of *fleurs de lis*, and plain crosses; in the right hand a sword, resting upon his shoulder, and in his left the orb, with the cross, denoting thereby that he was ready to defend his dominion and faith by the sword; legend HENRIC. 8. DEI. GRATIA. ANGLIE. FRANCI. Z HIBERN. REX. Rev. The royal arms crowned and supported by a lion and a dragon; legend ANGLICE Z HIBERNICE ECCLESIE SUPREMUM CAPUT, and beneath the shield, H. R.—*Fig. 7.* A crown of Edward VI. Obv. The king crowned, and in armour, with a naked sword, held upright close to his right side, mounted,

superbly caparisoned, and curvetting; mint mark the letter Y on both sides; legend EDWARD VI. D. G. AGL. FRA. Z. HIBE. REX.; beneath the horse, 1551. Rev. Arms in a plain shield, surmounted by a cross fourchy.—*Fig. 8, 9.* Two testoons, or shillings, of Edward VI. Obverse, only the head of Edward; legend, EDWARD VI. D. G. AGL. FRA. Z. HIB. REX.; mint mark in *fig. 8*, a swan; in *fig. 9*, a rose, counter-marked, a portcullis in the one, and a greyhound in the other; these counter-marks were put on the base testoons, or shillings, which were reduced in value to sixpence; and in the reign of queen Elizabeth to fourpence, and even lower.—*Fig. 10.* A shilling of fine money of Edward VI. Obv. A bust of the king full-faced, crowned, and in Parliament-ropes, with a chain of the order of the garter; on one side of the face a double rose, and on the other XII. to denote the value; mint mark a ton on each side; legend as before. Rev. The arms as before. This is supposed to be the first and only English coin or medal, whereon the collar of the order of the garter is to be seen; but, whether from the mistake of the engraver, or any other cause, this is different from the collar of the order appointed by the statutes of Henry VIII., which was to be composed of double roses encompassed with the garter; whereas this has single roses of four leaves only, without garters, and without knots between. The silver coins of this reign were the last on which the heads of any of our princes have been represented with a full face.—*Fig. 11.* A sixpence of Philip and Mary. Obv. A profile bust of the King and Queen facing each other, with the crown of England above, between the date 1554. The King bare-headed, with short hair, mustachios, and large beard, is in armour, with the order of the Golden Fleece, suspended by a ribbon on his breast. The queen is in her ordinary habit; legend PHILIP ET MARIA D. G. R. ANG. FR. NEAP. PR. HISP. Rev. A shield, crowned, and ornamented with the arms of Philip and Mary impaled. Above the shield, XII. for the value; legend POSUIMUS DEUM ADIUTOREM NOSTRUM.—*Fig. 12.* A half-crown of Queen Elizabeth. Obv. Bust of the queen, having the hair curled in two rows next the face, and turned up behind, ruff, and gown richly ornamented; sceptre fleury in the right hand, globe or mound in the left; mint mark on both sides the Arabic figure 1; legend ELIZABETH D. G. ANG. FRA. ET HIBER. REGINA. Rev. The arms and legend as before.—*Fig. 13.* A half-crown of Elizabeth, which is a specimen of the money, called Portcullis Money, which was struck for the convenience of the East India Merchants. Obv. The royal shield between the letters E & R. all crowned; mint mark on both sides, a large annulet; legend as before. Rev. A large Portcullis crowned; legend POSUI, &c.—*Fig. 14.* A half-crown of James I. Obv. The King on horseback, in profile to the left, crowned, and in armour. In his right hand a drawn sword; the horse ambling; on the housing a rose crowned; mint mark on both sides a thistle; legend JACOBUS D. G. ANG. SCO. FRAN. ET HIB. REX. Rev. In an escutcheon, highly ornamented, the royal arms, quarterly—first and fourth, England and France, quartered; Scotland in the second; Ireland in the third. The arms of Ireland now appear for the first time upon the coins.—*Fig. 15.* A shilling of Charles I. Obv. Bust of the King turned to the right, crowned, and in armour, with long hair, the object of puritanical abhorrence; mint mark, on both sides, an anchor; legend CAROLUS D. G. MAG. BRI. FRA. HIB. REX. Rev. Arms of England, France, Ireland, and Scotland, on a plain square shield, and cross fleury; legend CHRISTO AUSPICE.—*Fig. 16, 17.* Obsidional, or

siege picces, of Charles I. during the rebellion. The first an irregular piece, stamped on each side with 3 dwts. 21 grs.; the second, an octagonal picce, a castle, with a streamer flying on the highest tower. Above the castle the letters P. C.; on the right side OBS, and a hand with a sword erect, issuing out of the left; beneath 1648. On the reverse, which is not here given, is a crown with C. R.; and the legend DUM SPIRO SPERO.—*Fig. 18.* A sixpence of the Common Wealth. Obv. St. George's Cross between a branch of palm and laurel; mint mark the Sun; legend THE COMMON-WEALTH OF ENGLAND. Rev. Two escutcheons joined, the first charged with St. George's Cross, the other with the Irish harp; over the shield v.—*Fig. 19.* A shilling of Cromwell. Obv. Bust in profile to the right, laureat, with a Roman mantle; legend OLIVAR. D. G. R. P. ANG. SCO. HI. &c. PRO. Rev. In a shield, surmounted by an Imperial Crown, quarterly, first and fourth, St. George's Cross for England; second, St. Andrew's Cross for Scotland; third, the harp for Ireland. On an escutcheon of pretence a lion rampant; legend PAX. QUÆRITUR. BELLO. 1658.—*Fig. 20.* A crown of Queen Anne. Reverse only; in the top and bottom shields England and Scotland impaled, to denote the union of the two kingdoms; on the dexter side Ireland, and on the sinister France; a plume of feathers in each quarter. The position of France, in the sinister or third quarter, has prevailed to the present time, whenever the shields have been placed separately on the coins.

Plate, No. II. (32)

ENGLISH GOLD COINS. *Fig. 1.* A quarter florin of Edward III. Obv. In a field *semé de lis* a helmet with lambrequins; crest a lion passant, gardant crowned; legend EDWR. R. ANGL. Z. FRANC. D. HIB. Rev. A cross fleury, with a rose in the centre; legend EXALT. ABITUR IN GLORIA. The lambrequin is a mantling formerly worn upon the helmet, as well for ornament as to keep off the sun. Edward III. is the first of our monarchs who bore this crest upon his helmet on the reverse of his great seal. Although the regular commencement of the gold coinage is dated from this reign, of which there are many specimens extant, yet Henry III. is said to have coined a gold penny that was in circulation for some time.—*Fig. 2.* A Noble of Edward III. Obv. The King, armed and crowned, standing in a ship, which has a streamer at the mast-head, with St. George's Cross, a naked sword in his right hand, and in his left a shield, bearing the arms of France (*semé de lis*) quartered with those of England. On the upper part of the side of the ship are lions passant gardant, towards the left, and fleurs de lis alternately, under these two tiers of ports, the lower of which has four projecting spikes placed alternately with the ports; legend EDWARD DEI GRA. REX. ANGL. Z. FRANC. D. HIB. Rev. In a double tressure of eight arches, with trefoils in the outward angles, a cross fleury voided. Over each limb of the cross a fleur de lis. In the quarters the Lion of England under a crown. In the centre a rose of four leaves, pointed with as many trefoils saltire-wise, including the letter E: legend IHC. (i. e. *Jesus*) AUTEM TRANSIENS PER MEDIUM IL-LORUM IBA (or *ibat*). In some coins of this prince he is styled also DNS. AQUIT. i. e. Dominus Aquitaniæ.—*Fig. 3.* An Angel of Edward IV. Obv. The Archangel Michael standing with his left foot upon the dragon, and piercing him through the mouth with a spear, the upper end of which terminates in a cross crosslet; legend, EDWARD DEI. GRA. REX ANGL. Z. FRANC. Rev. A ship with a large cross for the mast,

with the letter E on the right side, and a rose on the left; on the side of the ship the usual arms: legend, PER CRUCEM TUA' SALVA NOS XPE REDEMPT.—*Fig. 4.* A half rial of Edward IV. Obv. The type as before, with a full blown rose on the side of the ship, and a square flag at the stern, with the letter E, for *Edward*: legend, EDWARDI GRA. REX ANGL. Z FRANC. DNS. 'IB. Rev. In the usual tressure a sun of sixteen rays instead of the cross; in the centre a rose; mint mark, the sun: legend, DOMINE NE IN FURORE TUO ARGUAS ME. The sun is here put in commemoration of his victory at Mortimer's Cross.—*Fig. 5.* A Sovereign, or Double Rial, of Henry VII. Obv. The King sitting on his throne, in royal robes, crowned; in his right hand a sceptre, fleury, in his left the orb, the back ground diapered with fleurs de lis. This is said by Mr. Leake to be the first time that the orb and cross on the king's hand is to be met with on coins, though used on other occasions. Rev. In a double tressure of ten arches, with trefoils in the outer angles, the English Lion and Fleurs de Lis alternately, within a double rose. In the centre a plain escutcheon of France and England: legend, IHS. AUTEM TRANSIENS PER MEDIUM ILLORUM IBAT HE. The white rose is here united with the red, in respect to the union of the Houses of York and Lancaster.—*Fig. 6.* A double sovereign of Henry VIII. Obv. Within the inner circle, engrailed, and pointed with fleurs de lis, the King sits, crowned, in a chair of state, the back network; on each arm of it a cross patonce, as on the sceptre; at his feet the portcullis; mint mark on this side a fleur de lis, on the other a cross crosslet: legend, HENRICUS DEI GRATIA REX ANGLIE ET FRANC. DNS. HIB. The Portcullis is a badge which is said to have been assumed by Henry VII. in respect to his mother's descent from the Beauforts, signifying, as Leake says, that as the Portcullis was an additional security to the gate, so his descent from his mother strengthened his other titles. Hence this coin has been ascribed by some to this latter king.—*Fig. 7.* A Rial of Queen Elizabeth. Obv. The Queen in a large ruff, with her crown, sceptre in her right hand, and orb in her left, standing in a three-decked ship, turned to the right, with guns out, the usual rose on the side, and square flag at the head, on which is inscribed, the letter E: legend, ELIZAB. D. G. ANG. FR. ET HIB. REGINA. Rev. IHS. &c. as in *fig. 5.* This legend was adopted by Edward III. on the occasion of his victory over the French fleet, and continued to be used on the coins of his successors until the reign of Elizabeth, after which it went out of use.—*Fig. 8.* A unit, or twenty shilling piece, of King James, whereby he laid aside the crown to take up with the laurel, which has ever since been in use. Obv. Bust in profile to the right, laureat; mustachios turned upward; mantle tied on the shoulder; xx. for the value, behind the head; mint mark on both sides a spur-rowel: legend, JACOBUS D. G. MAG. BRI. FRAN. ET HIB. REX. Rev. In the old cross fleury a plain escutcheon of the royal arms, crowned: legend, FACIAM EOS IN GENTEM UNAM.—*Fig. 9.* A Guinea of William and Mary. Obv. Heads of William and Mary in profile to the left; his laureat; necks bare: legend, GULIELMUS ET MARI DEI GRATIA. Rev. In an escutcheon garnished and crowned quarterly, first and fourth, France and England quarterly, second Scotland, third Ireland; on an escutcheon of pretence Nassau: legend, MAG. BR. FR. ET HIB. REX ET REGINA. It will be seen from the table of English coins that guineas were first struck in the reign of Charles II. and derive their name from Guinea, on the coast of

Africa, whence the gold was brought, of which they were made.

COINCIDENS (*Math.*) an epithet for lines, points, or figures, which being placed one upon another exactly agree or cover one another.

COINDICANTIA (*Med.*) coincinations or signs which do not indicate by themselves alone, but in connexion with other circumstances assist the physician to form a judgment of the disease.

COINS (*Archit.*) or *quoins*, from the French *coin*; signifies the angle formed by the two sides of any building, as the coin or corner of two walls.—*Rustic coins*, stones projecting out of a wall to which other buildings may be joined. They are so called because of their rustic appearance.—*Coin* signifies also a block cut obliquely, on which rests a column or pilaster.

COIN *de manœuvre militaire* (*Mil.*) a particular manner in which the ancients used to dispose their troops, in order the better to break the enemy's line, it resembling the figure of a wedge, the sharp extremity of which formed the front.

COINS (*Print.*) wedges used to fasten the composed matter into the form or chase.

COINS (*Gunn.*) large wedges of wood for the levelling, raising, or lowering a piece of ordnance.

COINS (*Mar.*) small wedges or pieces of wood to lay between casks, otherwise called *canting coins*, in distinction from *standing coins*, which are pipe-staves or billets to make casks fast.

COIRA (*Bot.*) vide *Acacia*.

COITION (*Nat.*) the mutual tendency of bodies one to another, for which the word *attraction* is more commonly substituted.

COITION of the moon (*Astron.*) is when the moon is in the same sign and degree of the zodiac with the sun.

COITS (*Sport.*) or *Quoits*, a kind of iron rings, resembling a horse-shoe, which is thrown to a certain distance at a certain point.

COIX (*Bot.*) a genus of plants, Class 21 *Monococia*, Order 3 *Triandria*.

Generic Characters. CAL. glume two-flowered; valves oblong ovate.—COR. two-valved; valves ovate lanceolate.—STAM. filaments three; anthers oblong.—PIST. germ ovate; styles short; stigmas two.—PER. none; seed solitary.

Species. The species are shrubs and perennials, as the—*Coix lachryma*, *Lithospermum*, &c. *Lachryma*, &c. *Catricoada*, seu *Salce*, Job's tears, a shrub, native of the East Indies.—*Coix agrestis*, *Lithospermum*, &c. *Salce*, &c. seu *Lachryma*, &c. a perennial, native of Amboina.—*Coix arundinacea*, a perennial.

COKE (*Chem.*) a hard sonorous kind of charcoal which arises from the burning of black pit-coal.

COL. (*Ant.*) an abbreviation in medals and in inscriptions for *colonia*.

COLATION (*Chem.*) the passing any thing through a strainer.

TO COLATION books (*Print.*) vide *To Collate*.

COLATORIA-LACTEA (*Med.*) vide *Fluor Albus*.

COLATORIUM (*Ant.*) a vessel full of holes at the bottom.

COLATURE (*Chem.*) that which after being boiled is percolated or strained through a sieve.

COLCAQUAHUITE (*Bot.*) an American plant recommended in palsies and uterine disorders. *Raii Hist. Plant.*

COLCHICUM (*Bot.*) *κολχικόν*, a name given by some of the ancients to the poisonous plant *Ephemerum*, because it grew in Colchis. *Dioscor.* l. 4, c. 84; *Plin.* l. 28, c. 9.

COLCHICUM, in the *Linnean system*, a genus of plants, Class 6 *Hexandria*, Order 3 *Trigynia*.

Generic Characters. CAL. none.—COR. six-parted; tube angulated; divisions of the border erect.—STAM. filaments six; anthers oblong.—PIST. germ buried within the root; styles three; stigmas reflex.—PER. capsule three-lobed; seeds many.

Species. The species are perennials, as—*Colchicum autumnale*, Common Meadow Saffron, native of Europe.—*Colchicum montanum*, seu *foliis*, &c. native of Spain.—*Colchicum variegatum*, seu *foliis*, &c. seu *Chionense*, Variegated Meadow Saffron, native of Chios.—*Colchicum Byzantinum*, native of Constantinople.

COLCHICUM is also a name for the *Bulbocodium vernum*.

COLCHICUS (ORN.) or *Phasianus colchicus* of Linnæus, the Common Pheasant.

COLCOTHAL (CHEM.) the dry substance which remains after the distillation of vitriol; it is now commonly called *caput mortuum*.

COLCOTHAR (CHEM.) vitriol calcined over a strong fire. It is applied surgically to wounds, for stanching blood, &c.

COLD (NAT.) denotes not only the sensation of cold, but also the state of any body which causes the sensation.

COLDENIA (BOT.) a genus of plants, Class 4 *Tetrandria*, Order 3 *Trigynia*.

Generic Characters. CAL. perianth four-leaved; leaflets lanceolate.—COR. one-petalled; border patulous.—STAM. filaments four; anthers roundish.—PIST. germs four; styles as many; stigmas simple.—PER. none; fruit ovate; seeds two.

Species. The only species is—*Coldenia procumbens*, seu *Teucris*, an annual, native of India.

COLE (BOT.) Colewort, or Kale, a sort of winter cabbage, which is a variety of the *Brassica* of Linnæus.—Cole-Seed, the seed of the *Napus sativa*, or long-rooted narrow-leaved *rapa*, called in English Navew, which is reckoned by Linnæus as a variety of the *Brassica napus*. It is much cultivated on account of the oil which is expressed from it, as also for the feeding of cattle. It is sown about the middle of June, and the ground is prepared as for turneps.

COLE-MOUSE (ORN.) a species of the Titmouse, the *Parus ater* of Linnæus.

COLEOPTERA (ENT.) the first order of insects in the Linnæan system, comprehending the genera which have four wings, the upper crustaceous, with a straight suture. The genera are furthermore distinguished into, 1. Those having the antennæ clavate, as *Scarabeus*, the Beetle; *Synoderon*, *Lucanus*, *Dermestes*, the Leather-Eater; *Melysis*, *Byrrhus*, *Silpha*, the Carrion-Beetle; *Tritoma*, *Hydrophilus*, one species of which is called the Water-Clock; *Tebratoma*, *Hister*, *Bostrichus*, *Anthrenus*, *Nitidula*, *Coccinella*, one species of which is the Lady-Bird; *Curculis*, *Pausus*. 2. Those having the antennæ moniliform, as, *Brentus*, *Attelabus*, *Erodium*, *Staphylinus*, *Zygia*, *Maloë*, *Tenebris*, *Cassida*, *Opatrum*, *Mordella*, *Chrysomela*, *Horia*. 3. Those having the antennæ filiform, as, *Apalus*, *Mantecora*, *Pimelia*, *Gyrinus*, *Cucujus*, *Cryptocephalus*, *Bruchus*, *Plinus*, *Hispa*, *Buprestis*, *Necydalis*, *Lampyris*, Fire-Fly, Glow-Worm, *Cantharis*, *Notoxus*, *Elater*, *Calopus*, *Alurnus*, *Carabus*, *Lytta*. 4. Those having the antennæ setaceous, as, *Serropalpus*, *Cerambyx*, *Leptura*, *Rhinomacer*, *Zonitis*, *Cucindela*, *Dytiscus*, *Forficula*, Earwig.

COLES (ANAT.) or *colis*. [vide *Penis*]

COLE-SEED (BOT.) vide *Cole*.

COLET (MECH.) that part of a ring where the stone is set.

COLETTA VEETLA (BOT.) the *Barleria prionitis* of Linnæus.

COLEWORT (BOT.) a well-known variety of the Cabbage, or *Brassica* of Linnæus, which grows through the winter.

COLGIAT (MIL.) a large glove which the Turks wear in the field, covering the arm up to the elbow.

COLI *dextrum Ligamentum* (ANAT.) the fold of that particu-

lar lamina which is turned to the right side, where the mesentery changes its name for that of mesocolon, near the extremity of the *ilium*.—*Coli sinistrum Ligamentum*, a contraction of the mesocolon a little below the left kidney.

COLIAS (ICH.) *κολίαις*, Bastard-Tunny, supposed by some to be Mackarel. *Plin.* 1. 32, c. 10; *Athen.* 1. 3.

COLIBARTS (LAW) tenants, or villeins, made free; persons of a middle condition, between servants and freemen.

COLIBUS (ORN.) another name for the Humming-bird.

COLICA (MED.) Colic, a pain in the abdomen, particularly in the intestine called the *colon*, from which it takes its name. This name, as well as the disorder itself, was first known, according to Pliny, in the reign of Tiberius; but Celsus is of opinion that it had been earlier described by the same name. *Cels.* 1. 4, c. 9; *Plin.* 1. 20, c. 12.

Colic is now distinguished according to the different causes and circumstances of the disorder, into the *bilious colic*, when accompanied with vomiting of bile; *flatulent or windy colic*, when attended with distention from flatulency; *inflammatory colic*, or *enteritis*, when attended with inflammation. When the disorder rises to a great height it is called the *Iliac passion*. It is placed by Dr. Cullen as a genus of diseases in the Class *Neuroses*, Order *Spasmi*.

COLICULUS (BOT.) a diminutive of *colis*; signifies the little stalk or tender branch of a plant, as the *coliculus fabæ*, the young stalk of a bean.

COLIFORME OS (ANAT.) another name for the *os cribrorum*.

COLING (BOT.) a long pale apple.

COLINIL (BOT.) the *Convolvulus nil* of Linnæus; an American plant, the juice of which with a little honey, is said to be good for pustules in the mouth.

COLIPHIMUM (ANAT.) a sort of coarse bread which wrestlers used to eat, in order to make them strong and firm-fleshed; so called from *κόλα*, limbs, and *ίφος*, robust; or, according to some, from *κόλλειξ*, a sort of cake mentioned by Athenæus.

Plaut. Pers. act. 1, scen. 3, v. 12.

*Collyria facite ut madeant, et coliphia
Ne mi hæc incocta detis.*

Mart. 1. 7, ep. 67, v. 12.

*Cum coliphia sedecem comedit.
Post hæc omnia cum libidinatur,
Non fellat:*

Juven. sat. 2, v. 53.

Luctantur pauca; comedunt coliphia pauca.

Athen. 1. 3.

COLIUS (ORN.) *Coly*, a genus of animals, Class *Aves*, Order *Passeres*.

Generic Character. Bill convex above, and flat beneath; *nostrils* small, at the base of the bill, and nearly covered with feathers; *tongue* jagged at the tip; *tail* long.

Species. The birds of this tribe, which inhabit the Cape of Good Hope and Senegal, are principally distinguished by their colour.

COLLA (NAT.) any thing glutinous, or of the nature of gluc.

COLLA'PSUS (MED.) a wasting or shrinking of the body or strength.

COLLAR (HER.) an ornament for the neck, worn by knights of any order, which serve as a badge of the order. [vide *Heraldry*]—*Collar days*, festival days, whereon the knights of the garter wear their collars.

COLLAR (MAR.) 1. In French *collier d'étai*, the lower part of any of the lower stays of the masts, or the part by which the stay is confined at its lower end. 2. A rope fastened about the beak-head of a ship, into which the pulley called dead-man's-eye is fixed, that holds her fore-

stay; also one about the main-mast-head, called the collar or garland, which serves to prevent the shrouds from galling.

COLLAR (*Archit.*) a ring or cincture.—*Collar-beam*, a beam in the construction of a roof, placed above the lower ends of the rafters or base of the roof.

COLLARAGE (*Law*) a tax or fine formerly laid on the collars of horses that draw wine.

COLLA'RE (*Ant.*) a collar so called, from *collum*, the neck, because it was worn about the neck. It was a sort of chain put round the necks of runaway slaves, with an inscription stating their name and offence, with which, till the time of Constantine, they were branded on the forehead; but afterwards it was engraved upon the collar itself, of which several examples are given by antiquarians, as one quoted by Pignorius: TENE ME. QUIA. FUGI. ET. REVOCA ME. DOMINO. MEO BONIFACIO. LINARIO. *Turneb. Adv.* l. 29, c. 17; *Pignor. de Serv.* p. 31; *Spon. Misc. Erud. Act.* sect. 9, p. 300.

COLLARED (*Her.*) an epithet for any one having the collar of an order about his neck.

COLLARINO (*Archit.*) that part of a column which is included between the fillet and the astragal.

to **COLLA'TE books** (*Print.*) to examine the whole number of sheets belonging to a book, in order to see if they are all gathered properly and placed in the order of their signatures. This is the business of the warehouseman, and has been vulgarly called *collationing*, and the person doing it the *collationer*. To *collate manuscripts*, is to arrange and compare them, so as to bring them into due order and connexion, &c.

COLLA'TERAL (*Law*) *collateralis*, from *latus*, a side; that is sideways, or not direct, as—*Collateral kinsmen*, those who descend from one and the same common ancestor, but not from one another, in distinction from *lineal kinsmen*; as if a man has two sons who have each issue; these issues are lineally descended from him as their common ancestor, but they are *collateral kinsmen* to one another; so collateral warranty, &c. [vide *Warranty*.]—*Collateral issue*, is where a criminal convict pleads any matter allowed by law, in bar of execution, as pregnancy, the king's pardon, and the like, which issue is to be tried by a jury instanter.—*Collateral assurance*, that which is made over and above the deed itself.—*Collateral security*, a bond that is attached to the deed itself for the due performance of covenants between man and man.

COLLATERALES (*Anat.*) a name for the *Erectores Penis*.

COLLA'TIO BONORUM (*Law*) is where a portion, or money advanced by the father to a son or daughter, is brought into hotch-pot, in order to have an equal distributory share of his personal estate.

COLLA'TION (*Cus.*) a treat, or entertainment, given between meals, or in the place of a meal; it mostly consists of cold dishes, when it is called a cold collation.

COLLA'TION to a benefice (*Law*) the bestowing of a benefice by the bishop or other ordinary when he hath right of patronage.—*Collation of seals*, was, in old deeds, when one seal was set upon the back of another upon the same libel.

COLLA'TIONE facta uni post mortem alterius (*Law*) a writ which enjoins the justices of the Common Pleas to send out their writ to a bishop to admit a clerk in the place of another presented by the king, who died during the suit between the king and the bishop's clerk.—*Collatione Hermitagii*, a writ whereby the king was wont to confer the keeping of a hermitage upon a clerk.

COLLA'TITIUM (*Archæol.*) a sort of food prepared of the flesh of a capon or pullet bruised and then mixed with mutton broth, and exhibited with verjuice or lemon juice.

COLLA'TIVE ADVOWSON (*Archæol.*) that which is lodged in the bishop. [vide *Advowson*.]

COLLEAGUE (*Polit.*) a partner or sharer in any office.

COLLECT (*Ecc.*) a short prayer with the epistle and gospel, appropriated to any particular day or occasion in the Christian church. *Papias; Anastas. Hist. Eccles. Ann.* 21; *Hist. Tripart.* l. 1, c. 10.

COLLECTA'NEA (*Lit.*) things written or gathered out of many works; notes, collections, &c.

COLLE'CTION (*Lit.*) an assemblage of things collected together for some specific object; as, a collection of coins, of medals, of paintings, &c.

COLLECTION of light (*Astrol.*) a term applied to two principal significators which cast their aspect to a more dignified planet and do not behold each other.

COLLE'CTIVE (*Gram.*) an epithet for any noun which comprehends many persons or things in the singular number; as a *multitude*, *company*, *army*, &c.

COLLE'CTOR (*Elect.*) a small appendage to the prime conductor of the electrical machine, which serves to receive the electricity both positive and negative.

COLLEGATA'RIOUS (*Law*) a partaker of a bequest or legacy with another.

COLLÈGE (*Polit.*) *collegium*, from *colligo*, to collect or associate together; a particular corporation, company, or society of men, having certain privileges, founded by the king's licence; as, the *college of physicians*, which includes the body of physicians in London.

College is also a corporate body erected for the purpose of training up young men to any particular course of life, and provided with statutes for its maintenance; as, the *colleges* of the Universities, or the military *colleges*, &c.

COLLE'GIAN (*Lit.*) a fellow or member of a college.

COLLE'GIATE (*Ecc.*) an epithet for a church that is endowed, for a society, body corporate, a deanery, &c.

COLLE'GIUM (*Ant.*) a company or fraternity, of which there were many kinds among the Romans; as, the *Collegium augurum*, *artificum*, &c. *Cic. Orat. pro Sex.* c. 15; *Plin.* l. 8, c. 28; *Plut. in Num.*; *Flor. Hist. Roman.* l. 1, c. 6; *Sigon. de Ant. Roman. Jur.* l. 2, c. 12.

COLLET (*Gun.*) French for that part of a cannon which is between the astragal and the muzzle.

COLLE'TICA (*Med.*) conglutinating medicines.

COLLI'CIÆ (*Ant.*) ὀφθαλμοὶ, ὑψηλοί, gutter-tiles; and also drains in the field. *Plin.* l. 18, c. 10.

COLLI'CIÆ (*Anat.*) the union of the ducts which convey the humours of the eyes from the *Puncta lachrymalia* to the cavity of the nose.

COLLI'FULÆ (*Anat.*) vide *Nymphææ*.

COL'LIER (*Com.*) one who works in coals or at the coal mines.

COLLIER (*Mar.*) a ship that is loaded with coal.

COLLIERS (*Mech.*) French for iron or brass holdfasts, which are employed in flood-gates.

COLLIERY (*Com.*) the place where coals are worked and laid up.

COLLIFLOWER (*Bot.*) or Cauliflower, the finest sort of cabbage, a variety of the *Brassica oleracea* of Linnæus.

COLLIGAMEN (*Anat.*) a ligament.

COLLIGENDUM, *Bona defuncti ad*, (*Law*) letters granted to certain persons, who, in default of administrators and executors, are thereby authorized to collect the goods of the defunct, and to keep them in safe custody for the benefit of those who are entitled to the property of the deceased.

COLLIMATION, *Line of* (*Opt.*) the line, in a telescope, that passes through the intersection of those wires that are fixed in the focus of the object-glass and the centre of the same glass.

COLLINSO'NIA (*Bot.*) a genus of plants, Class 2 *Diandria*, Order 1 *Monogynia*.
Generic Characters. CAL. *perianth* one-leaved; *upper lip* three-cleft; *lower lip* two-parted.—COR. one-petalled; *tube* funnelform; *border* five-cleft; *upper divisions* obtuse; *lower lip* longer.—STAM. *filaments* two; *anthers* simple.—PIST. *germ* four-cleft; *style* bristleform; *stigma* bifid.—PER. none; *seed* single.
Species. The principal species are the—*Collinsonia Canadensis*, seu *serotina*, &c. Nettle-leaved *Collinsonia*, a perennial, native of Canada.—*Collinsonia scabriuscula*, seu *foliis*, &c. seu *præcox*, &c. Rough-stalked *Collinsonia*, a perennial, native of Florida.

COLLIQUAMENTUM (*Nat.*) an extremely transparent fluid observable in an egg after two or three days incubation, which contains the rudiments of the chicken.

COLLIQUITIO (*Med.*) a term applied to the blood when it loses its *crasis*, or balsamic texture.

COLLIQUATIVE (*Med.*) an epithet for any excessive evacuation which melts, as it were, the strength of the body, as a *colliquative perspiration*, a *colliquative diarrhœa*.—*Colliquative fever*, one attended with a diarrhœa, or profuse sweats from too lax a contexture of the fluids.

COLLIRI'DIANS (*Ecc.*) a sect of heretics in the fourth century, who worshipped the Virgin Mary as a goddess, and offered sacrifice to her. *S. Epiphan. Hæres.* 78, 79; *Baron. Annal. ann.* 373; *Sand. Hæres.* 92.

COLLISION (*Nat.*) the percussion or striking of bodies against each other.

COLLISIO (*Med.*) vide *Contusio*.

COLLIX (*Med.*) κόλλιξ, a sort of troche or pastil in a round flat form.

COLOBO'MA (*Med.*) the growing together of the eyelids, from κολάζω, to glue together.

COLLOCA'TIO (*Ant.*) προθέσεις, a ceremony at the funerals of the Greeks and Romans, which consisted in laying out the dead upon a bier, or on the ground. The place where the corpse was thus laid out was at the entrance of the house, near the threshold, in order that all might see whether the deceased had met his death by violence or not. *Poll. Onom.* l. 8, seg. 53.

COLLOCO'CCA (*Bot.*) the *Cordia collococca* of Linnæus.

CO'LLOP (*Cook.*) a slice of stewed meat.

COLLOQU'IUM (*Law*) the talking together, or affirming a thing laid in declarations for words in actions for slander, &c. *Mod. Cas.* 203.

COLLUSION (*Law*) a fraudulent contrivance, or compact between two or more parties, to bring an action, one against the other, for some deceitful end, as the defrauding a third person of his right, &c. This collusion is apparent when it shows itself on the face of the act, or secret when it is covered with a show of honesty. *Stat. Westmin.* 13 Ed. 1, c. 33; *Co. Lit.* 109. 360; *Plow.* 54.

COLLUTHE'ANS (*Ecc.*) heretics in the fourth century, so called after their leader, one Colluthus, who held many of the doctrines of the Arians and Manicheans. *S. Athanas. Apol.* l. 1, c. 8; *S. August. Hæres.* c. 65; *S. Epiphan. Hæres.* c. 69; *Philast. Hæres.* c. 8; *Baron. Annal.* ann. 315.

COLLUTO'RTUM *oris* (*Med.*) vide *Gargarismus*.

COLLYBUS (*Ant.*) κόλλυβος, 1. A coin on which was engraved the image of an ox. *Hesychius.* 2. The exchanging of money, as a lesser coin for a greater, or the current money of the country for foreign coin, for which the exchanger had an allowance in consideration. *Cic. in Verr. orat.* 3, c. 78; *ad Attic.* l. 12, ep. 6; *Poll.* l. 3, c. 9; *Suet. in Aug.* c. 4; *Bud. in Pandect.* p. 134; *Sigon. de Ant. Jur. Liv. Roman.* l. 2, c. 11.

COLLY-FLOWER (*Bot.*) vide *Colliflower*.

COLLYRA (*Ant.*) κόλλυρα, a sort of bread baked in the ashes. *Hesychius.* 2. A little round loaf.

COLLYRIOM (*Or.*) another name for the *Blackbird*.

COLLYRITE (*Min.*) a sort of stone of the *Lythomarge* family.

COLLY'R'IUM (*Med.*) κόλλυριον, a medicinal composition, so called from κόλλα, glue, and ἕρσις, a tail, because these medicines were originally made up with something glutinous, and in the form of a rat's tail. The term is now only applied to a fluid application for the eyes, commonly called *eye-water*. *Cel.* l. 5, c. 28; *Oribas. Med. Coll.* l. 10, c. 23; *Scribon. Larg.* c. 69.

COLO'BIUM (*Ant.*) κολόβιον, a short garment without sleeves worn by monks and hermits. It is called by *St. Jerom. tunica succinea et lineus saccus*. *Cassian. de Ægypt. Mon. Colob.* l. 1, c. 5; *Epiphan. Hæres.* c. 64; *Ammian.* l. 14, c. 9; *Isid. Orig.* l. 19, c. 22; *Serv. in Æn.* l. 9, v. 616; *Petav. in Them. Orat.* l. 14; *Doroth. Abbas. Doctrin.*; *Alcuin. de Divin. Offic.*; *Gregor. Tur. de Vit. Pat.* c. 8.

COLOBO'MA (*Med.*) vide *Colloboma*.

COLOBO'MATA (*Med.*) κολοβάματα, called by *Celsus Curta*, are deficiencies in any part of the body, particularly in the ears, lips, or alæ of the nostrils.

COLOCA'SIA (*Med.*) κολοκασία, from κόλος and κάσαι, to adorn; the *faba Ægyptiaca*, or *Ægyptian-bean*.

COLOCA'SIUM (*Bot.*) vide *Colocasia*.

COLOCHIERNI (*Bot.*) a plant differing but little from the *Atractylis*.

COLOCYN'THIS (*Bot.*) κολουκυνθίς, a plant, so called from κόλον, the colon, and κινέω, to move, on account of its purgative quality. *Hippocrates* speaks of this plant under the name of the κολουκυνθη αγρία, and *Theophrastus* gives it the name of κολουκύντη. *Hippocrat. Theoph.* l. 1, c. 22; *Dioscor.* l. 4, c. 178; *Plin.* l. 19, c. 19; *Gal. Exeges. Vocab. Hippocrat.*; *Athen.* l. 2, &c.

COLOCYNTHIS, in the *Linnean system*, is the same as the *Cucumis*, which is better known by the name of *Coloquintida*. [vide *Coloquintida*]

COLO'GNE earth (*Paint.*) a substance used by painters as a water colour approaching to umber in its structure, and of a deep brownish-tinge.

COLOME'STRUM (*Bot.*) Dogbane.

CO'LN (*Anat.*) κόλον, contracted from κούλον, hollow, because of its great capacity; the greater portion of the large intestine which proceeds from the liver by a transverse arch to the other; and, descending into the *pelvis*, forms what is termed the *sigmoid flexure* when it becomes the intestine called the *rectum*. *Ruff. Ephes. de Appcll. Part. Corp. Hum.* l. 1, c. 27.

COLON (*Gram.*) from κόλον, a member, signifying the member of a sentence, but it is now applied to the point marked thus (:), which divides an entire member of a sentence from the rest. *Isid. Orig.* l. 1, c. 19.

COLONADE (*Archit.*) a range of pillars running quite round a building, and standing within the walls of it. The intervals between the columns measured by the inferior diameter of the column is called the *intercolumniation*, and the whole space between every two columns is an *intercolumn*. Intercolumniations are distinguished into the *Pycnostyle*, *Systyle*, *Eustyle*, &c.: also the colonade itself, according to the number of columns, into the *Tetrastyle*, *Hexastyle*, &c. [vide *Architecture*]

CO'LONEL (*Mil.*) the first in command of a regiment, whether of horse, foot, dragoons, or artillery, in England; but in France and Spain, and other southern nations, Colonels of horse are called *Maitres de camp*.—*Lieutenant-Colonel*, the second in command, who is the next to the colonel.

COLONE'LLI (*Archit.*) Italian for trussposts, or the posts of a trussframe.

CO'LONGELLING (*Mil.*) a colloquial term which signifies beating about for troops, &c.

COLO'NNE (*Mil.*) French for a column. [vide *Column*].—*Colonne d'artillerie*, the march or movements of a corps of artillery in regular order.—*Colonne d'equipages*, the line of march which is observed by baggage waggons.

COLO'NIA (*Ant.*) *ἀποικία*, a colony; a company of people transplanted from one place to another with an allowance of land for their tillage, by which means the city was disburthened of its multitudes, the poor were provided for, and the borders of the empire, whither they were for the most part sent, were secured against the inroads of the enemy. The *colonia* is commonly marked in inscriptions and on medals by the abbreviations C. or COL.; and the common symbol is a husbandman driving oxen, as in the annexed figure of a medal of Gordianus III; on which, also, are to be observed military-standards, to denote that it was colonized by veteran soldiers. The inscription COL. CAES. ANTIOCH., with the letters S. R., i. e. *senatus Romanus*, signifying that the colony had been formed with the approbation of the senate. *Vaillant. Colon.; Beg. Thes. Brand.*

COLONY (*Polit.*) is applied, in the sense of the ancient *colonia* [vide *Colonia*], to signify any number of persons who go under the sanction of government to inhabit a distant country, and cultivate a place that has been before uncultivated.

COLO'NUS (*Law*) an husbandman, or villager, who was bound to pay yearly a certain tribute, and at certain times to plough some of the lord's land; whence comes our English word *clown*.

COLOPHONIA *Resina* (*Bot.*) *κολοφώνια*, Colophony; the resin which the pine-tree yields, so called from Colophon, a city of Ionia, whence it was first brought. *Dioscor. l. 1, c. 92; Plin. l. 14, c. 20; Gal. de Comp. Med. per Gen. l. 7, c. 3.*

COLOPHONIA signifies now the black resin which remains in the retort after distilling the common resin with a strong fire.

COLOPO'ON (*Bot.*) vide *Colpoon*.

COLOQUINTIDA (*Bot.*) or Bitter Apple, the fruit of the wild gourd; the *Cucumis colocynthis* of Linnæus; the pulp, or internal part, which is light, spongy, and white, is also remarkable for its intense bitterness.

COLOR (*Opt.*) or *colour*, was supposed by the ancients to be an inherent property of the colored substance, and was, therefore, defined to be the sensation produced by looking on any colored body, or the quality in bodies which produces this sensation; but, according to the doctrine of Sir Isaac Newton, which is now generally admitted, the difference of colour lies in the different rays of light, so that colour may be defined the property possessed by the elementary rays separated by any means whatever of exciting different sensations according to their different degrees of refrangibility. *Colors* are either primary or secondary. The *primary*, or *original colors*, are the colors of simple or homogeneous light, or produced by rays that have the same degree of refrangibility, and the same magnitude of their parts: of these colors there are seven; namely, violet, indigo, blue, green, yellow, orange, and red, which all admit of infinite gradations.—*Secondary*, or *heterogeneous colors*, are those which are compounded of the primary ones: of this kind of colors the most remarkable is that of whiteness, which requires all the primary colors to enter into its composition; whereas, on the contrary, black is produced by the absorption of all the rays of light, so that being suppressed in the black body they are not reflected outward. According to this theory the difference of colors in natural bodies is supposed to arise from the disposition which they possess to reflect rays of this or that color alone, or of this or that color more abundantly than any other,

which disposition is ascribed to the different degrees of density which exist in different bodies.

COLOR (*Paint.*) is a term applied both to the drugs and to the tints produced by those drugs variously mixed and applied. Colors are divided by painters, in the first place, into opaque and transparent.—*Opaque colors* are such as, when laid over paper, wood, &c. cover them fully, so as to efface any other color or stain that may have been there before; such as white-lead, red-lead, vermilion, &c.—*Transparent colors* are those which leave the ground visible on which they are laid; of which kind are the colors used for *illuminating maps*. Colors are moreover divided, as respect their composition, into oil-colors or water-colors, simple or mineral.—*Oil-colors* are such as are prepared for painting in oil.—*Water-colors* are such as are mixed with water.—*Simple*, or *vegetable colors*, are those which are extracted from vegetables, and will not bear the fire, as the yellow made of saffron, lacca, &c.—*Mineral colors* are those which are extracted from metals, and from their property of standing fire are used by enamellers. Colors have also been distinguished into changeable or permanent, dark or light, true or false.—*Changeable colors* are such as depend on the situation of the objects with respect to the eye, as that of a pigeon's neck, taffetas, &c.—*Permanent colors* are not exhibited by refraction, but by reflection.—*Dark colors* are black, and all others that are obscure and earthy, as umbre, bistre, &c.—*Light colors* comprehend the white, and all that approach to it.—*True colors* are such as retain their color without fading, in distinction from *false colors*, which either lose their color, or change to some other.

Colors are prepared either by grinding, washing, or steeping; the following are the principal colors used in painting:—*White*; namely, white-lead, eggshells burnt, pearl-white, Spanish-white, spodium, ceruss, &c.—*Black*; namely, lamp-black, ivory-black, blue-black, Indian-ink, and verditer burnt.—*Red*; namely, carmine, lake, rose-pink, red-ochre, Venetian-red, vermilion, red-lead, scarlet-ochre, common Indian-red, burnt terra di sienna, &c.—*Green*, i. e. green-bice, green-pink, verdigrise, sap-green, pink mixed with bice, and Prussian-blue mixed with some other color, &c.—*Yellow*; namely, orpiment, masticot, deep and light saffron, pink-yellow, dark and light, gamboge, turpeth mineral, yellow-ochre, Roman-ochre, gall-stone, &c.—*Blue*; namely, ultramarine, indigo, Prussian-blue, smalt, blue-bice, blue-verditer, &c.—*Brown*; namely, umber, Spanish-brown, brown-bistre, Cologne-earth, rust of iron, mummy, &c.

The colors used in dyeing are five, called *primary* or *mother colors*; namely, blue, red, yellow, brown, and black, from the various mixture and combination of which other shades of color are produced.

COLOR (*Bot.*) the following is a table of the primary colors, with some of their shades, which are enumerated by botanists.

WHITE, <i>albus</i> .	Iron-color, <i>gilvus</i> .
Full-white, <i>candidus</i> .	RED, <i>ruber</i> .
Water-color, <i>hyalinus</i> .	Flesh-color, <i>incarnatus</i> .
Ash-colored, <i>cinereus</i> .	Blood-colored, <i>sanguineus</i> .
Milky, <i>lacteus</i> .	Scarlet, <i>coccineus</i> .
BLACK, <i>niger</i> .	PURPLE, <i>purpureus</i> .
Pitch-black, <i>ater</i> .	Hyacinth, <i>hyacinthinus</i> .
Sooty, <i>fulliginosus</i> .	Rosy, <i>roseus</i> .
BROWN, <i>fuscus</i> .	Violet-color, <i>cæruleo-purpureus</i> .
YELLOW, <i>luteus</i> .	BLUE, <i>cæruleus</i> .
Saffron, <i>croceus</i> .	Sapphire, <i>sapphirinus</i> .
Bright-yellow, or straw-color, <i>flavus</i> .	Azure, <i>cyaneus</i> .
Flame-color, <i>fulvus</i> .	GREEN, <i>viridis</i> .

COLOR (*Man.*) the principal colors of horses are the Bay, the Chesnut, the Black, the Brown, the Grey, the Sorrel, and the Roan, which is a mixture of various colors.

COLOR (*Her.*) is the tincture with which the field, or any part of an escutcheon or a bearing, is distinguished; of these there are seven; namely, *Yellow*, blazoned by the French word *or*, represents *sol*, the Sun, among the planets; *aurum*, Gold among metals; the Topaz among stones; and Wisdom, Riches, and Magnanimity among virtues.—*White*, blazoned by the French word *argent*, represents *luna*, the Moon, among planets; *argentum*, Silver among metals, Pearl among precious stones, and Chastity among virtues. These two are generally called metals rather than colors.—*Red*, blazoned by *gules*, represents Mars among the planets, Ruby among the stones, and Boldness among virtues.—*Blue*, blazoned *azure*, represents the planet Jupiter, the Sapphire among the stones, and great Renown among the virtues.—*Black*, which is blazoned *sable*, represents the planet Saturn, the Diamond among stones, and Constancy among virtues.—*Green*, in blazon *vert*, represents Venus among the planets, the Emerald among stones, and Joyful Love among the virtues.—*Purple*, in blazon *purpure*, represents Mercury among the planets, the Amethyst among stones, and Temperance among the virtues. To these may be added—*Orange*, which is compounded of red and yellow, and blazoned *tenne*, representing the Dragon's Head, one of the nodes, and the Hyacinth among stones.—*Murrey*, in blazon, *sanguine*, i. e. blood-red, represents the other node, the Dragon's Tail, and the Sardonyx among the precious stones. Colors and metals, when engraved, are distinguished by points, hatched-lines, &c. as small dots or points for *or*, plain for *argent*, &c. [vide *Heraldry*]

COLOR (*Law*) signifies a plea that is probable, though really false, which is put in with an intent to draw the trial of the cause from the jury to the judges.—*Color of office*, an evil or unjust act committed by the countenance of an officer, or under the color of an office.

COLOR (*Mil.*) vide *Colors*.—*Color-Guard*, vide *Guard*.

TO COLOR *strangers' goods* (*Law*) is when a freeman permits a foreigner to enter goods in his name at the custom house to pay but single duty when he ought by law to pay double duty.

COLOR-MAN (*Com.*) one who prepares and sells colors.

COLORATION (*Metal.*) the brightening of gold or silver.

COLORATUS (*Bot.*) coloured, an epithet for a leaf that is of any other color than green, as the calyx in *Bartsia*.

COLORING (*Paint.*) the manner of applying colors to a picture, so that, by their apt union and blending, they may give a due proportion of light and shade, an agreeable contrast or opposition, a suitable degradation or management of their degrees, &c.

COLORS (*Mil.*) banners, flags, and ensigns used in the army. This word is used in the same sense in speaking of the navy.—*Camp-colors* are a small sort of colors placed on the right and left of the parade.—*A pair of colors* is a term in the British service denoting an ensign, or the first commissioned appointment in the army.

COLORS (*Ecc.*) in the Latin and Greek churches, serve to distinguish several mysteries or festivals, as white for the mysteries of our Saviour, the feast of the Virgin, &c.; red for the holy sacrament, &c. They were formerly more used than they are at present.

COLOSSINUS *color* (*Ant.*) a bright purple color, so called from Colossis, a city of Troas. *Plin.* l. 21, c. 9.

COLOSSUS (*Ant.*) a large statue at Rhodes representing a giant, which was seventy cubits high, and between whose legs ships sailed; hence all very high or large figures are called colossal. *Plin.* l. 34, c. 7; *Fest. de Verb. Signif.*

COLOSTRATI (*Ant.*) children sucking the first milk after their birth. *Plin.* l. 28, c. 9.

COLOSTRATIO (*Nat.*) a disease incident to the young which suck the dam's milk two days after the birth. *Plin.* l. 11, c. 31.

COLOSTRUM (*Med.*) from *κόλλα*, glue; the first milk of any animal after bringing forth, which is commonly called *Beestings*. This milk is found to be a purgative, and serves both as an aliment and a medicine.

COLOTOIDES (*Med.*) *κωλωτοιδής*, from *κωλώτης*, a spotted lizard, and *εἶδος*, the likeness, variegated like colotes; an epithet applied by Hippocrates to the excrements.

COLOUR (*Opt. &c.*) vide *Color*.

COLOURS (*Mil.*) vide *Colors*.

COLPOCELE (*Med.*) from *κόλπος*, the vagina, and *κῆλη*, a tumor; a hernia forced into the vagina.

COLPODA (*Conch.*) a genus of animals, Class *Vermes*, Order *Infusoria*.

Generic Character. Worm invisible to the naked eye, very simple and pellucid.

Species. The principal species are the *Colpoda meleagris*, *cucullus*, *pyrum*, &c.

COLPOON (*Bot.*) a species of the *Euonymus* of Linnæus.

COLPOPTOSIS (*Med.*) from *κόλπος*, vagina, and *πίπτω*, to fall; a bearing down of the vagina.

COLTER (*Husband.*) or *Coulter*, a piece of iron in a plough, which serves to cut up the ground.

COLT-EVIL (*Vet.*) a preternatural swelling in the testes of horses.

COLTS-FOOT (*Bot.*) a perennial plant of a rough mucilaginous taste, much esteemed for its demulcent and pectoral virtues. It is the *Tussilago farfara*, &c. of Linnæus.

COLT'S-TOOTH (*Vet.*) an imperfect or superfluous tooth in young horses.

COLUBER (*Zool.*) Viper, a genus of animals, Class *Amphibia*, Order *Serpentes*.

Generic Character. Plates on the belly.—Scales under the tail.

Species. The species of this tribe are very numerous, but principally distinguished by the number of plates or scales on the body, or by their colour.

COLUBRINA (*Bot.*) Wild Briony.

COLUBRINUM *Lignum* (*Bot.*) Snakewood, a sort of wood brought from the Indies, which is so called from the snake-like contortions of its roots. It is solid, ponderous, acrid, extremely bitter, and inodorous.

COLUM (*Chem.*) a filtre.

COLUMBA (*Bot.*) vide *Calumba*.

COLUMBA (*Orn.*) Pigeon, a genus of animals of the class *Aves*, order *Passeres*.

Generic Character. Bill straight.—Nostrils half covered with a soft tumid membrane.

Species. The principal species are the—*Columba domestica*, the Dove and Pigeon, of which there are many varieties. [vide *Dove*, *Pigeon*]—*Columba montana*, Partridge Pigeon.—*Columba Caribbea*, Ring-tailed Pigeon.—*Columba coronata*, the Great-crowned Indian Pigeon.—*Columba cristata*, Lesser-crowned Pigeon.—*Columba oenas*, Stock Pigeon.—*Columba palumbus*, Ring Dove, having a white crescent on each side its neck.—*Columba Suratensis*, Surat Turtle.—*Columba viridis*, Green Turtle.—*Columba melanocephala*, Black-capped Pigeon.—*Columba Turtur*, Turtle Dove.—*Columba risoria*, Collared Turtle.—*Columba migratoria*, Passenger Pigeon, &c.

COLUMBAC *Noachi* (*Astron.*) Noah's Dove, a small constellation in the southern hemisphere consisting of ten stars.

COLUMBAR (*Ant.*) 1. A sort of chain for the neck, so called from its resemblance to a pigeon hole, a pillory.

Plaut. Rud. act. 3, scen. 6, v. 50.

— *Illic in columbum, credo, leno vertitur, Nam in columbari collum haud multo post erit.*

Prisc. de Art. Gram. l. 5. 2. Holes in the sides of ships

resembling pigeon holes, through which the oars were put. *Fest. de Verb. Sig.; Isid. Orig.* l. 19, c. 2. 3. The mortise holes wherein the ends of rafters were fastened; also holes and spaces whereout the water ran after it was taken up by the watermill-wheel. *Vitruv.* l. 10, c. 9; *Gyrald. Nav.* c. 11; *Cæl. Rhodig. Ant. Lect.* l. 21, c. 21; *Bald. Lex. Vitruv.*

COLUMBIC acid (*Chem.*) an acid supposed to be produced from *columbium*.

COLUMBINE (*Bot.*) a perennial, the *Aquilegia* of Linnæus.

COLUMBINE (*Her.*) this flower is borne in the arms of the company of cooks. [vide *Cooks*]

COLUMBITE (*Min.*) a mineral ore, a species of *Tantalum*.

COLUMBIUM (*Min.*) a mineral. [vide *Tantalum*]

COLUMBOLE (*Bot.*) vide *Calumba*.

COLUMELLA (*Bot.*) the central pillar in a capsule, which connects the inside with the seeds, and, taking its rise from the receptacle, has the seeds fixed to it all round.

COLUMELLA (*Med.*) an inflammation of the *uvula* and *clitoris*, when they are extended in length like a little column.

COLUMELLA (*Conch.*) the upright pillar in the centre of most of the univalve shells.

COLUMELLARRES (*Anat.*) the dog-teeth. *Varr. de Re Rust.* l. 2, c. 7.

COLUMN (*Archit.*) in Latin *columna*, so called because it sustains columnen, i. e. *culmen*, the top or upper part of a building; a cylindrical pillar formed for the support and ornament of a building. It is the principal part in an architectural order, and is composed of three parts, the *base*, the *shaft*, and the *capital*, each of which is subdivided into smaller members, called *mouldings*. [vide *Architecture*] The column is distinguished in respect to construction and form, materials, decoration, disposition, and destination.

Columns, as to their construction and form, are distinguished into the—*Doric column*, a delicate column of the Doric order, adorned with flutings, the height of which is between seven and eight diameters. The Grecian Doric, which is the original form of this order, has no base, and varies in many other respects from what now bears this name, which is only an imitation made by the Romans.—*Ionic column*, a still more delicate column than the preceding, being nine diameters long. It is distinguished from the rest by the volutes in its capital.—*Corinthian column*, the richest and most delicate of all, is ten diameters in height, and its capital is adorned with caulicles or rows of leaves.—*Composite column*, which is also ten diameters in height, is adorned with angular volutes like the Ionic, and with leaves like the Corinthian.—*Tuscan column* is the simplest and shortest of all, its height being 7 diameters, or 14 modules, and it diminishes $\frac{1}{4}$ of its diameter. Besides this distinction of orders, there are also—*Columns in bands*, or *tambours*, so called when the shaft is formed of courses of stone of a less height than the diameters of the column.—*Columns in trencheons*, when the shaft is formed in courses of greater height than the diameter of the column.—*Banded columns*, when the shafts of columns consist of plain or ornamented cinctures.—*Attic column*, an insulated pilaster, having four equal faces of the highest proportion.—*Conical column*, that which has the superior diameter of its shaft less than the inferior.—*Conoidal column*, that which has also the superior diameter of the shaft less than the inferior, but its exterior sides are convex.—*Cylindrical columns*, those which have the extreme diameters of the shafts of equal circles.—*Cylindroidal*, or *elliptic columns*, those whose sections are all similar, and equal ellipses alike situated.—*Gothic column*, one that is too short for its bulk, or too slender for its height.—*Polygonal columns*, those having the horizontal sections of their shafts similar, polygons alike situated.

Columns, as to their materials, are distinguished into—*Moulded columns*, those which are formed by cementing gravel and flints of different colours.—*Fusible columns*, those which are formed of fusible matter, as metals, glass, &c.—*Transparent column*, a column formed of transparent materials, as the columns in the church of St. Mark, formed of transparent alabaster.—*Scagliola columns*, those which are constructed with a kind of plaster, in such manner as to imitate marble both in the polish and the colour.—*Masonic columns*, columns built of rough stone or compass bricks, and cased with stucco.—*Incrusted columns* are formed of several ribs or thin shells of fine marble, or other rare stone, cemented upon a mould of stone or brick.—*Joinery column*, a column made of strong timbers, joined, glued, and pinned together. This is mostly hollow, and fluted.—*Water column*, one whose shaft is formed of a large jet d'eau, which being hollow, serves to send forth a column of water.

Columns, as to their decoration, are distinguished into—*Pastoral column*, one that represents the trunk of a tree, with the bark and knots.—*Diminished column*, one that diminishes from the base upwards, in imitation of trees.—*Carolitic columns*, those which are adorned with foliage.—*Cabled*, or *rudented columns*, which have the flutings of the shafts filled with astragals to about one-third of their height.—*Fluted columns*, those which have flutes cut in their sides, otherwise called *channelled*, or *striated columns*.—*Twisted columns*, those which make several circumvolutions in the height of the shaft.—*Serpentine column*, a column formed of three serpents twisted together, the heads of which form the capital.

Columns, as to their disposition, are distinguished into—*Angular columns*, those which are insulated in the corners of a portico, or any building.—*Canted columns*, those which are placed one at each corner of a square pier.—*Coupled columns*, those which are disposed in pairs in the same range or line, so as to touch at their bases.—*Doubled columns*, those which in any range of columns seem to have their two shafts penetrating each other.—*Engaged columns*, such as seem to penetrate the wall.—*Insulated columns*, those which are free, and detached on all sides.—*Flanked column*, one that has a semipilaster on each side of it.—*Grouped columns* stand in threes or fours on the same pedestal.—*Inserted column*, one that is let into a wall.—*Median columns*, two columns of a portico, which are placed in the middle of the range, at a wider interval than any other two in the same range.—*Niched column*, one placed in a niche.

Columns, as respect their destination, are distinguished into—*Agricultural columns*, which are raised for the purpose of agricultural information.—*Astronomical column*, an observatory consisting of a single column, with a winding staircase.—*Boundary or limitrophus column*, one that marks the frontiers of a country.—*Chronological or historic column*, one that bears an inscription of historical events in the order of time, or the account of any particular event. [vide *Columna*]—*Funeral column*, one that is placed over a tomb, bearing an inscription relative to the deceased.—*Gnomonic column*, a cylinder on which the hour of the day is represented by the shadow of the style.—*Triumphal column*, a column erected in honour of any distinguished person, as the columns of Trajan and Antonine. [vide *Columna*]—*Itinerary columns*, columns constructed with several faces, and placed at the intersection of two or more roads, to point out the different routes by suitable inscriptions.—*Legal column*, a column created in a public place among the Lacedæmonians, on which were inscribed the fundamental laws of the state.—*Zoophoric column*, a kind of statuary column bearing the figure of some animal.

COLUMN (*Mil.*) a body of troops in deep files and narrow front, so disposed as to move in regular succession. Several bodies may move in columns who are intended to march successively in order of battle. A column is *close* which forms a compact body with little space between, and *open* when it has intervals between the divisions.

COLUMN (*Print.*) any printed matter in a page where the words are ranged vertically in an even order one after the other.

COLUMNNA (*Ant.*) the column was in frequent use among the Romans, of which the following are the principal entitled to notice, namely—*Columna lactaria*, or *lactary column*, a column erected in the herb market at Rome, where children were placed that had been abandoned by their unnatural parents. *Fest. de Signif. Verb.*—*Columna milliaria*, or *milliarium aureum*, a gilded pillar erected by Augustus in the forum where all the highways met in one common centre, and from which the miles to different parts were reckoned. This pillar is said to be still extant. [vide *Milliarium*]—*Columna rostrata*, a pillar erected in commemoration of a naval victory, and adorned with the beaks or prows of the ships which were taken, the first of which was erected on occasion of the naval victory gained by Duillius, of which the annexed figure, on the reverse of a medal of Titus, affords an illustration, bearing the inscription TRIBUNITIÆ POTESTATE IX. IMPERATOR XV. CONSUL VII. PATER PATRIÆ. *Quint. l. 1, c. 7.*—*Columna bellica*, a small pillar behind the circus, which was so called because the herald used to throw a spear from that point, as an act of defiance to the enemies of Rome, and as the prelude to a proclamation of war. *Ovid. Fest. l. 6.*—*Columna Trajani* and *Columna Antonini*, triumphal columns so called from the emperors whose exploits were commemorated thereon. Trajan's pillar, which was set up by the senate in honour of him, consists of 24 large pieces of marble, is 128 feet high, and ascended by a staircase of 185 steps, having 45 windows. The pillar of Antoninus is 176 feet high, having 56 windows, and a staircase of 106 steps. Both these columns are still standing, the former in Trajan's Forum, and the latter in the Campus Martius. *Plin. l. 35, c. 5; Nardin. Rom. Vet.; Marlian. Topogr. &c. apud Græv. Ant. Rom. tom. 4.*

COLUMNA (*Ant.*) a name given to several parts of the body resembling a column or pillar in shape, as—*Columna nasi*, the fleshy and lowest part of the nose.—*Columna oris*, the same as the *uvula*.—*Columna cordis*, or *columnæ carneæ*, small long fleshy productions in the ventricles of the heart.

COLUMNAR (*Bot.*) an epithet signifying like the shaft of a column. [vide *Teres*]

COLUMNARIA (*Ant.*) vent-holes in aqueducts. *Vitruv. l. 8, c. 7.*

COLUMNARI (*Ant.*) bankrupts and spendthrifts, who being much in debt, were often sued and brought to the *Columna-Mœnia*, where actions for debt were tried. *Cic. ad Fam. l. 8, ep. 9; Manut. in Cic.; Turneb. Adv. l. 17, c. 12.*

COLUMNARIUM (*Ant.*) a tribute that was exacted for the pillars of private houses. *Cæs. de Bell. Civ. l. 3, c. 32; Cic. ad Attic. l. 13, ep. 6.*

COLUMNÆA (*Bot.*) a genus of plants, Class 14 *Didynamia*, Order 2 *Angiospermia*.

Generic Characters. CAL. *perianth* one-leaved; *divisions* erect.—COR. one-petalled; *tube* long; *border* two-lipped; *upper lip* straight; *lower lip* three-parted.—STAM. *filaments* four; *anthers* simple.—PIST. *germ* ovate; *style* filiform; *stigma* bifid.—PER. *capsule* two-celled; *seeds* numerous.

Species. The species are shrubs, as—*Columnnea scandens*, Climbing Columnnea, native of the Caribbees.—*Columnnea hirsuta*, *Achimenes*, &c. seu *Rapunculus*, &c. Hairy Co-

lumnea, native of Jamaica.—*Columnnea rutilans*, native of Jamaica.—*Columnnea longifolia*, *Achimenes*, &c. *Babel*, &c. seu *Sesamum*, &c. Long-leaved Columnnea.

COLUMNIFERÆ (*Bot.*) the name of the thirty-fourth order in Linnæus' Fragments of a Natural Method, &c. including the *Malvaceous*, or Mallow-like plants, which are to be found in the class *Monadelphia*.

COLUMNULA (*Bot.*) the same as *Columella*.

COLUPPAL (*Bot.*) the *Illicium sessile* of Linnæus.

COLURA (*Ant.*) a name given to beasts without a tail, which it was not lawful to offer in sacrifice.

COLURES (*Astron.*) *κόλυροι*, two great imaginary circles which intersect one another at right angles. They are so called because to all, who are not living under the equinoctial, they appear *κόλυροι*, mutilated; i. e. as if with the tail cut off. The colures are called equinoctial and solstitial.—The *equinoctial colure* is that which passes through the Pole and the points *Aries* and *Libra*, making the seasons Spring and Autumn. The *solstitial colure* shows the solstitial points cutting *Cancer* and *Capricorn*, and making Summer and Winter. [vide *Astronomy*, and *Globe*] *Hipparch. ad Phænom. Eudox. l. 1, c. 27; Proc. de Sphær.; Cleomed. de Sphær.; Macrob. in Somn. Scip. l. 1, c. 15.*

COLURIUM (*Surg.*) a tent to thrust into a sore, to prevent a defluxion of humours.

COLUS JOVIS (*Bot.*) the same as *Sclarea*.

COLUSTRUM (*Nat.*) vide *Colostrum*.

COLUTEA (*Bot.*) *κολυτρία*, Bladder-Senna, a plant described by Theophrastus. *Hist. Plant. l. 3, c. 17.*

COLUTEA, in the *Linnean system*, a genus of plants, Class 17 *Diadelphia*, Order 4 *Decandria*.

Generic Characters. CAL. *perianth* one-leaved—COR. *papilionaceous*.—STAM. *filaments*, diadelphous; *anthers* simple.—PIST. *germ* oblong; *style* ascending; *stigma* is a bearded line extended from the middle of the style to its tip.—PER. *legume* very large; *seeds* several.

Species. The species are shrubs, annuals, biennials, and perennials. The following are shrubs, namely—*Colutea arborescens*, &c. seu *Vesicaria*, Common Bladder-Senna, native of England.—*Colutea Pocockii*, seu *foliolis*, &c. seu *halepica*, &c. seu *istria*, &c. Pocock's Bladder-Senna, native of the East.—*Colutea frutescens*, Scarlet Bladder-Senna, native of the Cape of Good Hope. The following are annuals or perennials, namely—*Colutea herbacea*, seu *foliolis*, &c. seu *annua*, &c. seu *Africana*, &c. Annual Bladder-Senna, an annual or biennial, native of the Cape of Good Hope.—*Colutea perennis*, Perennial Bladder-Senna, a perennial, native of the Cape of Good Hope, &c. *Dod. Pempt.; Bauh. Hist. Plant.; Park. Theat. Botan.; Raii Hist. Plant.; Tournef. Institut. &c.*

COLY (*Orn.*) a bird that inhabits the Cape of Good Hope, the *Colius* of Linnæus.

COLYDIUM (*Ent.*) a division of the genus *Dermestes*, including those insects which have four clavate feelers, the last joint longer than the other.

COLYMBÆDES (*Ant.*) pickled olives, so light that they swim in the pickle.

COLYMBUS (*Orn.*) a genus of animals, of the Class *Aves*, Order *Anseres*.

Generic Character. *Bill* toothless, pointed.—*Throat* toothed.—*Nostrils* linear.—*Legs* fettered, and unfit for walking.

Species. This genus of animals is distinguished, in English, into the Guillemots, which have feet three-toed; the Divers, which have feet four-toed and palmate; and Grebes, which have their feet four-toed and lobed.

COLYTEA (*Bot.*) vide *Colutea*.

COMA (*Bot.*) a sort of *Bractæ*, which terminates in a tuft, or bush, as in Crown Imperial, &c. A spike of flowers terminated by a *coma* is called *comose*.

COMA (*Med.*) κῶμα, a preternatural propensity to sleep, according to the explanation of the term as given by Galen in his Exegesis, and elsewhere. It is now generally taken for a lethargic drowsiness.—*Coma Vigil*, a strong disposition to sleep without being able to do so, which Hippocrates denominates κῶμα ἐξ ὑπνῶδες ἢ ἀγρυπνοι, and considers it as a usual symptom of a phrenitis. *Hippocrat. Epid.* 1. 3; *Foes. Econom. Hippocrat.*; *Gal. Comm. in loc cit.*—*Coma somnolentum*, when the patient continues in a profound sleep, and on waking finds himself unable to keep his eyes open.

COMA Berenices (*Astron.*) Berenice's Hair, a modern constellation, in the Northern Hemisphere, composed of unformed stars to the number of forty-three, between the Lion's Tail and Bootes.

COMAGENA (*Bot.*) a kind of herb, (so called from Comagene,) a country of Syria, from which was made an ointment called *Comagenum medicamentum*. *Plin.* 1. 10, c. 22.

COMARCHUS (*Ant.*) the governor of a town or city.

COMAROIDES (*Bot.*) a species of the *Potentilla*.

COMARUM (*Bot.*) the fruit of the Arbuté-tree. [*vide Comarus*]

COMARUM, in the *Linnean system*, a genus of plants Class 12 *Icosandria*, Order 5 *Polygynia*.

Generic Characters. CAL. *perianth* one-leaved; *alternate divisions* smaller.—COR. *petals* five.—STAM. *filaments* twenty; *anthers* lunular.—PIST. *germs* numerous; *styles* simple; *stigma* simple.—PER. none; *common receptacle of the seeds* ovate; *seeds* numerous.

Species. The only species is *Comarum palustre*, *Fragaria*, &c. *Potentilla*, &c. *Quinquefolium*, &c. seu *Pentaphyllum*, &c. *Marsh Cinquefoil*, a perennial, native of Europe.

COMARUS (*Bot.*) κόμαρος, the fruit of which, κόμαρον, is called in Latin *Unedo*, which, according to Pliny, signifies not to be eaten more than one at a time on account of its unpleasant taste. According to Theophrastus it is a species of the *arbutus*. *Theophrast.* 1. 3, c. 16; *Plin.* 1. 15, c. 24.

COMATA (*Med.*) an order of diseases in the class *Neuroses* in Cullen's system, consisting of those disorders in which the power of voluntary motion is suspended.

COMATOSE (*Med.*) having a strong propensity to sleep.

COMB of a ship (*Mar.*) a small piece of timber set under the lowest part of the beak-head, which assists in bringing the tacks a-board.

COMBARONES (*Law*) formerly signified the fellow barons, or commonalty of the Cinque Ports; but, the title of baron being now given to their representatives in parliament, it implies a colleague, or fellow member, as the baron and his combaron. *Placit. Temp. Ed. 1. & Ed. 2.*

COMBAT (*Mil.*) a battle between individuals, in general not more than two.

COMBATANT (*Her.*) an epithet for two lions in a coat of arms, when they are borne rampant with their faces towards each other in a fighting posture.

COMBATANTS (*Mil.*) in French *Combattans*, troops engaged in action; in distinction from *Non-Combattans*, persons about an army, whose employments are purely civil.

COMBER (*Ich.*) a kind of fish, the *Labrus comber* of Linnaeus.

COMBINATION (*Chem.*) a union of two or more substances in such a manner as to form a new compound, in distinction from a mere mechanical mixture, in which each substance retains its own properties.

COMBINATION (*Math.*) the alternations or variations of any number of quantities, letters, sounds, and the like in all possible ways: thus, the number of combinations which the twenty-four letters of the alphabet are said to amount to is 1,391,724,288,887,252,999,425,128,493,402,200. On the same principle two square pieces, each divided diagonally

ally into two colours, may be arranged and combined sixty-four different ways.

COMBINATION (*Rhet.*) a figure of speech which consists in the immediate repetition of the same word.

COMBLEAU (*Mil.*) French for a cord which is used in loading and unloading pieces of artillery, &c.

COMBRETUM (*Bot.*) a genus of plants, Class 8 *Octandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* one-leaved.—COR. *petals* four or five.—STAM. *filaments* eight or ten; *anthers* a little oblong.—PIST. *germ* inferior; *style* bristleform; *stigma* acute.—PER. none; *seed* single.

Species. The species are perennials or shrubs, as the—*Combretum laxum*, seu *Gawia*, &c. a perennial, native of South America.—*Combretum secundum*, seu *laxum*, &c. a shrub, native of Carthage.—*Combretum purpureum*, a shrub, native of Madagascar.—*Combretum decandrum*, seu *Cristaria*, &c. a shrub, native of the East Indies.—*Combretum alternifolium*, a shrub, native of Carthage.

COMBUST (*Astrol.*) i. e. burnt; an epithet for a planet which is not above 8 degrees 30 minutes distant from the sun.

COMBUSTIBLES (*Mil.*) combustible materials used in offensive and defensive operations.

COMBUSTIBLES (*Chem.*) a term applied to all substances which have the property of uniting with the supporters of combustion. [*vide Combustion*] Combustibles are either simple, compound, or combustible oxides.—*Simple Combustibles* are sulphur, phosphorus, carbon, hydrogen, and all the metals except, as is supposed, gold, silver, and mercury.—*Compound Combustibles* are compounds formed by the simple combustibles uniting together two and two.—*Combustible Oxides* are simple combustibles combined with a dose of oxygen.

COMBUSTIO PECUNIAE (*Law*) the ancient way of trying mixt and corrupt money, by melting it down upon payment into the Exchequer.

COMBUSTION (*Astron.*) *vide Combust.*

COMBUSTION (*Chem.*) the decomposition of certain substances by means of fire, or, as in modern language, decomposition accompanied with light and heat. Substances may be divided, as respects combustion, into combustibles, supporters of combustion, and incombustibles.—*Combustibles.* [*vide Combustibles*]—*Supporters, or Supporters of Combustion*, i. e. bodies not, strictly speaking, capable of undergoing combustion; but which must needs be present in other bodies that are to undergo this process.—*Incombustibles*, or bodies not capable of undergoing combustion, or supporting combustion, of which there is at present only one such body known, namely *Azote*. In the process of combustion every combustible body unites with its supporter, from which combination arises a new compound, called the *Product of Combustion*, which is always either an acid or an oxide. [*vide Chemistry*]

COME (*Mar.*) an order given on different occasions on board a vessel, as "Come not near!" in French, *pas au vent*, for the helmsman not to steer so near the wind. "Come up the capstan!" in French, *deuire, ou cavire au cabestan*, to turn it the contrary way to which it was steering. "Come up the tackle-fall!" in French, *largue le palan*, to slacken it gently. "To come home," is said of the anchor when it loosens from the ground by the effort of the cable, and approaches the place where the ship floated at the length of her moorings. "To come up with," in French, *joindre*, is to overtake a vessel which is pursued.

TO COME (*Mil.*) is used in different phrases, as "To come in," speaking of soldiers who offer themselves as volunteers, recruits, &c. "To come over," said of those who join the enemy's forces. "To come into," i. e. to come to

the help of a person, army, or body of men. "To come up," to overtake a force that is retreating.

COME (*Husband.*) a name given to the acrospire, or sprout, that comes out at the end of malt.

COME' (*Mus.*) Italian for *as*, is used some times in compositions or music books, as *come sopra*, as above, or as before, alluding to the style of some performance before mentioned. *Come sta*, as it stands, implying that the performer is not to embellish, but to take it as it stands.

COMEDO'NES (*Ent.*) a sort of worms which eat into the skin and devour the flesh.

COMES (*Mus.*) Latin for a companion or follower; a term formerly applied to the voices or instruments which followed the *dux*, or leading performer.

COMET (*Astron.*) κομήτης, a heavenly body appearing at uncertain periods, which has, during the time of its appearance, a motion very similar to those of the planets, except that its orbs are more eccentric. It derives its name from κομᾶω, to be hairy; because of its hairy appearance.

Comets are vulgarly called Blazing Stars, and distinguished into *tailed*, *bearded*, and *hairy*, according to the different appearances which they assume in different positions with the sun; but by astronomers it is divided into distinct parts, namely, the *Nucleus*, *Head*, *Coma*, and *Tail*.—The *Nucleus* is the dense part of the comet, supposed to be of a nature similar to that of other planetary bodies.—The *Head* is that part in which the *nucleus* is involved, which appears with a fainter light.—The *Coma* is a faint light surrounding the head; and the *Tail* is the long train of light with which these bodies are commonly attended.

The nature of comets has been a subject of much dispute among naturalists. Aristotle supposed them to be accidental meteors; but Seneca regarded them as permanent bodies, which is now become the general opinion.

COMET (*Her.*) This celestial body is occasionally borne in coat-armour, as in the annexed figure. "He beareth azure a blazing star or comet streaming in bend proper." Name *Cartwright*.

COMETA'RIMUM (*Mech.*) a machine constructed to represent the revolution of a comet about the sun.

COMETES (*Bot.*) a genus of plants, Class 4 *Tetrandia*, Order 1 *Monogynia*.

Generic Characters. CAL. involucre three-flowered; leaflets oblong.—COR. none.—STAM. filaments four; anthers roundish.—PIST. germ roundish; style filiform; stigma three-cleft.—PER. capsule tricocous; seed solitary.

Species. The only species is the *Cometes alterniflora*, seu *Clinopodium*, an annual, native of Surat.

COMETO'GRAPHY (*Astron.*) from κομήτης, a comet, and γράφω, to describe; a description of, or a discourse upon, comets.

COMFREY (*Bot.*) a herb, the *Symphitum* of Linnæus, the root of which abounds in a pure tasteless mucilage, and is therefore useful as an emollient or demulcent.

COMIC (*Poet.*) an epithet for what belongs to comedy, as the comic muse, or a comic actor.

COMING-TO (*Mar.*) or *Coming-up*, in French *embardeur au vent*, the place where the vessel stops in approaching the wind.

COMINGE (*Mil.*) French for a shell of extreme magnitude, which takes its name from the person who invented it.

COMITA'TU *commisso* (*Law*) a writ of commission, whereby the sheriff is authorized to take upon him the charge of the county.—*Comitatu et castro commisso*, a writ whereby the charge of the county, together with the keeping of a castle, is committed to the sheriff. *Reg. Orig.* 295.

COMITA'TUS (*Archæol.*) 1. A county. 2. A territory or jurisdiction of a particular place. *Maith. Parr. Ann.* 1234.

COMITIA (*Ant.*) an assembly of the people convened by proper authority, for the purpose of choosing magistrates and making laws. It was likewise called *comitia calata*, from the old Latin *calo*, to call or summon; because it was summoned by the public crier on special occasion. The comitia was first held in the Campus Martius, but afterwards, occasionally, in the Comitium. [vide *Comitium*] The people also, originally, gave their votes *vivâ voce*; but in process of time this was superseded by the use of *tabellæ*, or tablets.

The comitia was distinguished, according to the mode of voting, into the *Comitia curiata*, the *Comitia centuriata*, and the *Comitia tributa*.—*Comitia curiata*, so called because the people gave their votes by *curia*, or parishes, was instituted by Romulus, and most commonly held for the purpose of choosing the priests, or making particular laws.—*Comitia centuriata*, at which the people gave their suffrages by centuries, was instituted by Servius, not only for the appointment of the chief magistrates, but for making laws, deciding causes, and determining the most important concerns of state. As the consuls were specially chosen at this comitia, it was also called, on that occasion, the *Comitia consularia*, which was held at the end of July, or the beginning of August. At its first institution the kings alone had the power of calling the *comitia centuriata*, but afterwards this right was vested in the chief officers, and exercised most commonly by the consuls.—*Comitia tributa*, so called because the people gave their votes by tribes, is supposed to have been instituted in the year 263 U. C. when it was convened by Sp. Sicinius, the tribune, on the occasion of Coriolanus. This assembly was convened by the tribunes independently of the senate, for the purpose of enacting such laws as were proposed by the plebeian officers, which enactments were distinguished by the name of *plebis-cita*. *Dionys. Hal.* l. 4, &c.; *Liv.* l. 1, c. 44, 60, &c.; *Aul. Gel.* l. 13, c. 15; l. 15, c. 27; *Manut. de Com.*; *Sigon. de Antiq. Jur. Civ. Roman.* l. 1, c. 17 *apud Græc. Thes. Antiq. Rom.* tom. 1, &c.

COMITIA' LIS MORBUS (*Med.*) another name for the epilepsy, or falling sickness; so called, because if any person in the Roman comitia was attacked with it, the assembly was dissolved.

COMIT' SÆ PULVIS (*Med.*) Peruvian Bark.

COMIT'VA (*Archæol.*) 1. A companion or fellow traveller. *Brompt. Regn. H.* 2. 2. A band of robbers. *Walsingh. Ann.* 1366.

COMITIUM (*Ant.*) a part of the Roman Forum where the *Comitiata curiata* used sometimes to assemble, and causes were heard.

Plaut. Poen. act. 3, scen. 6, v. 12.

Cras mane quæso in comitio estote obviam.

Plaut. Curc.

Qui perjurum convenire vult hominem mitto in comitium.

Varr. de Ling. Lat. l. 4, c. 32; *Cic. in Verr.* 3; *Liv.* l. 1, c. 36; *Plin.* l. 4, ep. 2; *Sigon. de Jud. &c. apud Græc. Thes. Antiq. Rom.* tom. 1.

COMMA (*Gram.*) κόμμα, one of the points or stops used, marked thus (,) to denote the smallest pause, or rest, between words or sentences.

COMMA (*Mus.*) a name formerly given to the 9th part of a tone, or the interval whereby a semitone or a perfect tone exceeds the imperfect.

COMMAGE'NUM (*Med.*) vide *Comagena*.

COMMA'ND (*Mil.*) or *the word of Command*, a term used by the officers, in exercise or upon service; also, "To have in command," a form of expression used by any one writing with the authority or instruction of the Commander-in-

Chief.—*Command*, in French *commandement*, signifies also a particular situation in a fortification, which is differently distinguished, as—A *command in front*, when any eminence is directly facing the work which it commands.—A *command in rear*, when the same is behind the work.—A *command by enfilade*, when an eminence is situated along the line of any work.

COMMANDANT (*Mil.*) the officer who has the command of a garrison, fort, castle, &c. in distinction from the *commander*, which is commonly used for one who commands a body of men.

COMMANDANT (*Mar.*) that officer on whom the command devolves in absence of the commander-in-chief, to which it is usual to prefix his rank, as Lieutenant-Commandant, Captain-Commandant.

COMMANDE (*Mil.*) French for a rope made use of in pontoons.

COMMANDE' (*Mil.*) a French term signifying to be under orders.

COMMANDEMENT (*Mil.*) a French term signifying any spot that is higher than another; it is called *simple* when the difference between the two heights is 9 feet only; *double* when 18, and so on progressively. [vide *Command*]—*Commandement ordre de*, a right of command which formerly existed in the French service, between officers of infantry and cavalry. In fortified towns this right belonged to the infantry, and in the open country to the cavalry.

COMMANDER (*Mil.*) he who has the command of a body of men.—*Commander in chief*, in the British army, is he who has the supreme command over all his Majesty's land-forces in Great Britain, and acts immediately for the King.

COMMANDER in chief (*Mar.*) the chief admiral in any port, or on any station, appointed to hold command over all other admirals within that jurisdiction.—*Commander*, otherwise called the *Master*, is an officer next in rank to a post-captain, who has the command of a ship of war under 18 guns, a sloop of war, armed ship, or bomb-vessel.

COMMANDER, Knight (*Her.*) vide *Knight*.

COMMANDER (*Mech.*) a beetle or rammer used by paviers.

COMMANDEY (*Archæol.*) a certain benefice belonging to a military order; as the messuage and tenements of lands, which belonged to the priory of St. John of Jerusalem, which were given to Henry VIII. was called a *commandery*. *Stat. 32, Hen. 8, c. 20.*

COMMANDING ground (*Mil.*) a rising ground which overlooks any strong place: this may be either front, reverse, or enfilade. [vide *Command*]

COMMANDING signs (*Astron.*) the first signs of the zodiac are so called, namely, Aries, Taurus, Gemini, Cancer, Leo, and Virgo.

COMMANDEMENT (*Law*) is when either the King or his justices commit a person to prison upon their authority.

COMMANDMENT (*Fort.*) is the height of nine feet which one place has above another.

COMMANDEMENT (*Med.*) vide *Apoplegmatismus*.

COMMANDEMENT (*Archæol.*) confines of land.

COMMANDEMENT miles (*Ant.*) a soldier who is allowed meat and commission bread for his pay.

COMMANDEMENTURA (*Archæol.*) another name for a *commandery*.

COMMELINA (*Bot.*) a genus of plants, Class 3 *Triandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *spathe* cordate.—COR. *petals* six; *nectaries* three.—STAM. *filaments* three; *anthers* ovate.—PIST. *germ* superior; *style* subulate; *stigma* simple.—PER. *capsule* naked; *seeds* two.

Species. The species are perennials or annuals. The following are perennials, namely, the—*Commelina africana*, African *Commelina*, native of Æthiopia.—*Commelina benghalensis*, &c. seu *Ephemerum*, &c. East Indian *Commelina*, native of Bengal.—*Commelina erecta*,

seu *corollis*, &c. seu *foliis*, &c. a native of Virginia.—*Commelina virginica*, seu *Ephemerum*, &c. native of Virginia.—*Commelina tuberosa*, seu *corollis*, &c. seu *foliis*, &c. seu *radice*, &c. Tuberos-rooted *Commelina*, native of Mexico.—*Commelina communis*, seu *procumbens*, Common American *Commelina*, native of America.—*Commelina vaginata*, native of the East Indies.—*Commelina nudiflora*, seu *Ephemerum*, &c. native of the East Indies.—*Commelina spirata*, Spear-leaved *Commelina*, an annual, native of the West Indies.—*Commelina Zanonina*, seu *Zanonina*, &c. seu *Tradescantia*, &c. Gentian-leaved *Commelina*, native of the West Indies.

COMMEMORATION (*Cus.*) the solemn remembrance of some remarkable event, particularly the public solemnity every year at Oxford, in honour of the founders and benefactors.

COMMENCEMENT (*Cus.*) an academical convention, or an annual public assembly of the University in Cambridge, answering to the *Act*, or more properly the *Commemoration* at Oxford. [vide *Commemoration*]

COMMENDAM (*Law*) a void benefice *commended* to an able clerk till it be otherwise disposed of. In this case the living is said to be held in *Commendam*, and he who holds it is called the *commendatory*. There are different sorts of *commendams*, as—*Commendam semestris*, a provisional supplying of the benefice for six months only.—*Commendam retinere*, i. e. for a bishop to retain benefices on his preferment.—*Commendam recipere*, to take a benefice, *de Novo*, in the bishop's own gift, or in the gift of some other patron whose consent must be obtained. *25 H. 8, c. 21.*

COMMENDATARY (*Law*) one holding a church living in *Commendam*.

COMMENDATORS (*Law*) secular persons upon whom ecclesiastical benefices are bestowed; so called because the benefices were *commended* and intrusted to their oversight, not as proprietors, but as tutors.

COMMENDATORIUM (*Med.*) an epithet for the traumatic balsam, and other medicines, on account of their singular virtues and usefulness.

COMMENDATORY Letters (*Law*) Letters sent from one bishop to another in behalf of any of the clergy, or others, of his diocese, in order to ensure them a good reception.

COMMENDATI Homines (*Archæol.*) Men living under the protection of, and doing homage to, some superior lord. Sometimes they depended on several lords, and did homage to each, when they were called *Commendati demidii*. They had likewise persons under them who were called *Sub-commendati*.

COMMENSURABLE (*Math.*) *σύμμετρος*, an epithet for either magnitudes or numbers, which will measure one another, or which may both be measured by some third quantity, as in the annexed.

$$\begin{array}{l} \text{figure; if A B, two mag-} \\ \text{nitudes, one 5 and the} \\ \text{other 3, be measured ex-} \end{array}$$

actly by C, a third magnitude, supposed to be 1, then the magnitudes A B are commensurable. Numbers, whether integers or fractions, are commensurable, when any other number will measure or divide them without a remainder; as 6 and 8, which may both be divided by 2, and $\frac{2}{3}$ or $\frac{3}{2}$, which may be divided by $\frac{1}{3}$ or $\frac{1}{2}$, are respectively commensurable numbers.—*Commensurable in Power*, *δυνάμει σύμμετροί*, is said, according to Euclid, of right lines, when their squares are measured by one and the same space or superficies. *Euc. Def. Elem. l. 10.*—*Commensurable surds* are such, as being reduced to their least terms, become true figurative quantities of the kind, and are therefore as a rational quantity to a rational.

COMMENSUS (*Math.*) Commensuration, *σύμμετρον*, the measure of one thing in proportion or comparison to another. *Vitruv. l. 3, c. 1.*

COMMENTA/CULUM (*Ant.*) a wand which those who were going to sacrifice held in their hand, to make people stand out of the way. *Fest. de Verb. Signif.*

COMMENTARIE/NSIS (*Archæol.*) a clerk, or one who kept a register of any thing, both in civil and military matters. *Ulp. leg. Div. § 1 ; ff. de Von. Damn. Paull.*

COMMENTARIUS (*Archæol.*) a brief register, or account of things as they occur.

COMMENTARY (*Lit.*) a note, or something added to the text by way of illustration.

COMMERCE (*Com.*) *Commercium*, i. e. *commutatio mercium*, or an exchange of commodities; signifies a trafficking or dealing with foreign countries, by means of exports and imports, according to specific laws, called the *Lex mercatoria*.—*Chambers of commerce*, assemblies of merchants and traders, established by virtue of letters patent from the sovereign, who are invested with certain privileges, particularly that of hearing and deciding causes, or matters of dispute, between individuals relative to trade. They are most numerous in France where every principal town has its chamber of commerce.

COMMERSO'NIA (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 5 *Pentagynia*.

Generic Characters. CAL. *perianth* one leaf; *divisions* ovate.—COR. five-petalled; *petals* linear; *nectary* five-parted; *divisions* lanceolate.—STAM. *filaments* five; *anthers* roundish.—PIST. *germ* globular; *styles* five; *stigmas* globular—PER. *capsule* globular; *cells* two, seeded; *seeds* ovate.

Species. The only species is the—*Commersonia echinata*, *Restiaria*, &c. scu *Dasyogon*, a tree, native of the Society Isles.

COMMETICS (*Med.*) a name for certain things which give beauties not before in being; as paints to the face. They are said to differ from cosmetics, which are only useful in preserving beauties, of which one is already in possession.

COMMI (*Bot.*) κόμμι, gum, which, without any epithet, signifies Gum Arabic. The κόμμι λευκόν, mentioned by Hippocrates, in his second book *de Mulieribus*, is the same. *Foes. Econom. Hippocrat.*

COMMINATION (*Ecc.*) a ceremony in the Christian church, which consists in the recital of God's denunciations.

COMMINUION (*Mech.*) a breaking or bruising of things into very small parts.

COMMIS (*Com.*) French for a clerk, or inferior person, employed in any counting-house or office.

COMMISSARY (*Ecc.*) *Commissaire*, a church officer, who supplies the bishop's place in the exercise of ecclesiastical jurisdiction, in the remote parts of his diocese, or in such parishes as are peculiar to the bishop, and exempted from the archdeacon's visitation. 4 *Inst.* 338.—*Commissary court*, a court in Scotland, originally constituted for executing a certain jurisdiction in their name. It was modelled by Queen Mary, and has continued in being ever since.

COMMISSARY (*Mil.*) a civil officer, who was appointed to inspect musters, &c. They are distinguished by different names, according to their office, as—*Commissary-general of the Musters*, or *Muster-Master-General*, in French *Commissaires des guerres*, who takes account of the strength of every regiment.—*Commissary general of stores*, who has charge of the stores, and is accountable to the office of ordnance.—*Commissary of accounts*, who examines and controls all accounts in the army to which he is attached.—*Commissary-general of provisions*, in French *Commissaire des vivres*, has the charge of furnishing the army in the field with all sorts of provisions, forage, &c.—*Chief commissary*, in French *Commissaire ordonnateur*, the person to whom the chief management of the commissariat department is entrusted.

COMMISSION (*Law*) the warrant or letters patent, by which all persons exercising any jurisdiction, have authority to hear and determine causes, &c. Commissions are of different kinds, according to the nature of the duty to be discharged; namely,—*Commission of anticipation*, a commission, formerly under the great seal, to collect a tax or subsidy before the day.—*Commission of assize*. [vide *Assize*]—*Commission of association*, a commission to associate two or more learned persons with the justices, in the several circuits and counties of Wales, &c.—*Commission of bankruptcy*, a commission under the Great Seal to five or more commissioners, to inquire into the particular affairs and circumstances of the Bankrupt, and to act for the benefit of his creditors, according to the statute made for this purpose.—*Commission of charitable uses*, one issuing out of Chancery to the bishops, to inquire into any abuse or misapplication of lands given to charitable uses.—*Commission of delegates*, a commission, under the Great Seal, to certain persons, generally spiritual lords, to sit upon an appeal to the King in the Court of Chancery, in any ecclesiastical cause. 25 H. 8, c. 19.—*Commission of enquiry into faults against the law*, an ancient Commission, set forth on extraordinary occasions and corruptions.—*Commissions of the peace*, special commissions under the Great Seal to fit and proper persons appointed, in different parts of the kingdom, for the upholding the laws, and maintaining the public peace, who, on that account, are called Justices of the Peace.—*Commission of the Peace* is also one of the commissions of assize. [vide *Assize*]—*Commission of lunacy*, a commission out of Chancery, to inquire whether any person be a lunatic or not: so that, in the former case, the King may have the care of his estate, &c.—*Commission of Oyer and Terminer*, one of the five commissions of assize. [vide *Assize*]—*Commission of rebellion*, otherwise called a *writ of rebellion*, issued against a man, who, after proclamation, makes default in his appearance.—*Commission of sewers*, directed to certain persons, to see to the state of the drains, &c.—*Commission of treaty with foreign princes*, a commission granted to ambassadors and ministers, for the making of treaties, &c.—*Commission to take up men for war*, a commission for impressing men into the king's service in time of war.—*Commission of Teinds*, a court at Edinburgh, which came in the place of the committee of Parliament, for erecting new parishes, and valuing teinds for the support of the clergy.

COMMISSION (*Com.*) the order by which any person trafficks for another; also the per-centage given to factors and agents for transacting the business of others.—*Commission del credere*, an absolute engagement to the principal, from an insurance broker in effecting an insurance, which makes him liable in the first instance, and at all events, though the principal may resort to the underwriter as a collateral security.

COMMISSION (*Mil.*) the warrant or authority by which an individual holds any post in the army.—*Commission of array*, was a commission issued in the reign of Henry II. and his successors, to certain experienced officers, to draw out fit men for the service in each county. These commissions have been superseded by the statutes regarding the militia.—*Commission militaire*, French for a temporary court or tribunal, appointed to inquire into capital offences.

COMMISSIONED (*Mil.*) an epithet for an officer who has a warrant or commission, in distinction from the *non-commissioned* officers, or such as are immediately above the rank and file, as serjants, &c.

COMMISSIONER (*Law*) one who has a commission to execute any public office, either by letters patent, the public seal, or any other way, as the Lords Commissioners of the Treasury, the Commissioners of Excise, the Com-

missioners of Customs, &c.—*Commissioners for the valuation of teinds*, those appointed by the Parliament for the valuation of the teinds or tithes in Scotland.—*The King's High Commissioner*, the person who represents the King in Scotland.

COMMISSURA (*Anat.*) any suture or juncture, particularly the corners of the lips where they meet together; and certain parts of the brain, which cross and join one hemisphere to the other, as the—*Commissura anterior cerebri*, the substance which crosses the anterior part of the third ventricle of the brain.—*Commissura magna cerebri*, the substance, otherwise called the *Corpus callosum*.—*Commissura posterior cerebri*, the substance which crosses the posterior part of the third ventricle.

COMMISSURE (*Mech.*) a close joining of planks, stones, &c. COMMISSURE (*Anat.*) vide *Commissura*.

COMMISSURES (*Nat.*) a term used by some authors for the small pores of a natural body, or the little cavities or clefts that are between the particles of a body, especially when the particles are rather broad and flat, like thin lamellæ or plates.

COMMITMENT (*Law*) the sending to prison, by warrant or order, a person who stands charged with the commission of any crime.

COMMITTEE (*Law*) He or they to whom the ordering of any matter is referred by some court, or other persons concerned, as in the Parliament, where different committees are appointed for different purposes, as Committees of Privileges, Committees for private bills, Election Committees, &c.—*Committee of the King*, a widow of the King's tenant, so called as being committed by the ancient law of the land to the King's care and protection. *Kitch. fol.* 160.—*Committee of a lunatic*, &c. the person to whom the care and custody of such lunatic is committed by the Court of Chancery.

COMMIXTION (*Law*) a method of acquiring property in the Scotch law, by mixing or blending substances belonging to different proprietors.

COMMODATE (*Law*) *commodatum*; the loan or free concession of any thing moveable, or immoveable, on condition of restoring again the same individual thing after a certain time. It is distinguished from a loan by being gratuitous, and not transferring the property; so that, in such case, the thing must be returned in essence, and without impairment.

COMMODITY (*Com.*) any ware, or merchandize, which a person deals or trades in.—*Staple commodities*, such wares and merchandizes as are the proper produce or manufacture of the country.

COMMODORE (*Mar.*) in French *Commandant provisoire d'un escadre*; a general officer in the British Navy invested with the command of a detachment of ships of war destined for any particular enterprise. His vessel is distinguished from the inferior ships in his squadron by a broad red pennant tapering towards the outer end.—*Commodore* is also a title given by courtesy to the senior captain where three or more ships are cruising in company.—*Commodore of a convoy* is the name given to the leading ship in a fleet of merchantmen, who carries a light in her top to direct the rest and keep them together.

COMMOIGNE (*Ecc.*) a brother monk residing in the same convent.

COMMON (*Gram.*) is an epithet which denotes belonging equally or alike, in which proper sense it is applied to nouns. A *common noun* is a name common to many things of the same kind, as man, horse, in distinction from a *proper noun*, or a name for a particular individual, as Alexander, Bucephalus. *Common* is also applied to the gender of nouns which are both masculine and feminine; and also to verbs which denote both action and passion.

COMMON (*Law*) as a noun, implies the right which one or more persons claim in another man's lands, waters, woods, &c. without having any property therein.—*Common of pasture*, or the right of pasture in common with others, is the most usual kind of common; but there is also *Common of piscary*, or *fishing*, and *Common of estovers*, *Common of turbary*, and the like. Common of pasture is divided into common in gross, common appendant, common appurtenant, and common *per cause de vicinage*.—*Common in gross* is a liberty to have common alone, without any lands or tenements granted by deed to a man and his heirs, &c. F. N. B. 37.—*Common appendant*, a right, appended or attached to a man's arable land, of putting beasts commonable into another man's ground. F. N. B. 180.—*Common appurtenant* differs from the preceding only in this, that it may be severed from the land whereto it appertains.—*Common per cause de vicinage*, or common by reason of neighbourhood, is a liberty that tenants of one lord have to common with the tenants of another lord.

Common is also attached as an epithet to many other things, namely—*Common Bench*, *banus communis*, a name formerly given to the Court of Common Pleas.—*Common Council*, a court in the city of London, composed of the Lord Mayor, Aldermen, and a certain number of the citizens, called common-councilmen.—*Common or Town Clerk*, an officer in a city who keeps the original charters, &c. of the city.—*Common Cryer*, an officer in the City who, with the Serjeant at Arms, summons all executors and administrators of freemen to appear and to bring inventories of their estates, &c.—*Common day of a plea in land* signifies an ordinary day in court as *Octabis Hilarii Quindena Paschæ*, &c. mentioned in stat. 51 H. 3; stat. 2 and stat. 3.—*Common field land*, the same as *Common of Pasture*.—*Common fine*, a small sum of money which the resiants of some leets pay to the lord.—*Common hunt*, an officer in the City who has charge of the hounds belonging to the Lord Mayor and citizens, and attends them in hunting when they please.—*Common intendment*, the common meaning or understanding according to the subject matter, not strained to any unusual interpretation.—*Common Law*, the law of this kingdom, grounded on the general customs of the realm, as it was holden before any statute was enacted in Parliament to alter the same, whence the King's courts of justice are called Common Law Courts.—*Common Pleas*, or *Court of Common Pleas*, one of the King's courts now held in Westminster Hall, although formerly moveable. In this court all actions popular, and actions penal, of debt, &c. are tried before four judges, who are created by letters patent. The other officers of this court are the *Custos Brevium*, *Prothonotaries*, their *Secondaries*, *Chirographer*, fourteen *Filers*, four *Exigenters*, *Clerk of the King's Silver*, of the *Treasury*, of the *Essoins*, of the *Warrants*, &c. [vide *Custos*, *Clerk*, &c.]—*Common Prayer*, the liturgy, or public form of prayer prescribed by the Church of England to be used in all churches and chapels at stated periods.—*Common Serjeant*, one of the City officers who attends the Lord Mayor and Court of Aldermen on court-days, and is in council with them on all occasions, within and without the precincts of the City.—*Common weal* is understood in our law to signify *publicum bonum*, which is the thing most consulted; and on that account monopolies, and whatever interferes with free trade, and the like, are void in law.

COMMON centering (*Carpent.*) a centering without trusses, having a tie-beam at the bottom.—*Common joists*, the beams in single, naked flooring, to which the joists are fixed.—*Common rafters*, those to which the boarding or lathing is fixed.

COMMON (*Math.*) an epithet for any angle, line, or measure, &c. that belongs to two or more figures, &c. of the same kind, as a common angle, a common side, a common base, &c.—*Common measure*, or *common divisor*, that number which measures or divides two others without a remainder: thus, of 8 and 12 the common measure is 4. The *greatest common measure* is the greatest number that can measure two other numbers: so of 8 and 12 the greatest common measure is 4.

COMMON (*Bot.*) an epithet applied, in the general sense of the word, to several parts of plants, as *communis gemma*, a bud containing both leaves and flowers; *pedunculus communis*, a peduncle bearing several flowers; *perianthium commune*, a perianth which is common to several flowers, or encloses several distinct fructifications, as in *Syngenesia*; *receptaculum commune*, a receptacle which connects several distinct fructifications, as in the *Syngenesia*.

COMMON-COUNCIL-MAN (*Law*) a citizen of London who is a member of the Common-Council.

COMMON-PLACE-BOOK (*Lit.*) a book, or register, which a person keeps for himself, and in which he notes down all that he sees, hears, or reads of, that is worthy of observation.

COMMON PLACES (*Rhet.*) are the same as what are more generally called topics. [vide *Topics*]

COMMON RAY (*Opt.*) a right line drawn from the point of concurrence of the two optical axes, through the middle of the right line passing through the centre of the pupil of the eye.

COMMON SENSORY (*Anat.*) is that part of the brain which is supposed to be the seat of all sensation, where the soul takes cognizance of the objects which present themselves to the senses.—*Common receptacle*, the name for a receptacle which is supposed to receive the chyle and the lymph, although its existence is not yet ascertained.

COMMON SIGNS (*Astrol.*) a name given to *Genini*, *Virgo*, *Sagittarius*, and *Pisces*.

COMMON TIME (*Mus.*) is four or two crotchets in a bar.—*Common chord* is the combination of the third, fifth, and eighth of any note.

COMMONALTY (*Polit.*) the middle sort of the King's subjects, or such of the Commons as being raised above the peasantry are eligible to offices, and are only one degree inferior to burgesses.

COMMONER (*Polit.*) a member of the House of Commons.

COMMONER (*Cust.*) a member of the university of Oxford who is on the usual footing, in distinction from the *gentleman commoner*, who enjoys certain privileges.

COMMON PLEAS (*Law*) vide *Common*.

COMMONS (*Polit.*) in the general sense, the whole people of England, in distinction from the nobility; but, in the restricted and more usual acceptation, the body of Knights, Burgesses, &c. who represent the Commons in Parliament.—*House of Commons*, or *Commons House of Parliament*, the lower House of Parliament, so called because they represent the Commons of the realm.

COMMONS (*Cus.*) the provision which each member in a college takes at the common meal.

COMMONS (*Law*) or *Doctors' Commons*, sometimes termed the *college of Civilians*, a college founded by Dr. Harvey, dean of the Arches, for the professors of civil law residing in London, who live in a collegiate manner communing together. To this college belong thirty-four proctors, who manage causes, &c.

COMMONWEALTH (*Polit.*) is that form of government in which the administration of public affairs is open, or common to all or many persons, without special regard to rank or property, as distinguished from monarchy or aristocracy. In this sense the government of England, after

the death of Charles I, was distinguished by the name of the Commonwealth until the Protectorate of Oliver Cromwell.

COMMORANCY (*Law*) an abiding dwelling, or continuing as an inhabitant in any place. It consists properly in lying usually in any place.

COMMORTH (*Law*) from the British Cymmorth, i. e. *subsidium*; a contribution which was gathered at marriages, and when young priests said or sung their first masses, &c. *Stat. 4 Hen. 4, c. 27; Stat. 26 Hen. 8, c. 6.*

COMMO'SIS (*Nat.*) *χόμμοσις*, the first stratum of gummy matter with which bees line their hives.

COMMO'SIS (*Mech.*) vide *Commetics*.

COMMOTE (*Law*) 1. Half a *cantred*, or hundred, in Wales, containing fifty villages. *Stat. Wall. 12 Ed. 1.* 2. A great seignory, or lordship, including divers manors. *Co. Lit. 5.*

COMMUNA (*Law*) the Common of pasture.

COMMUNANCE (*Law*) a title anciently given to the body of commoners, who had a right of communing in open fields, &c.

COMMUNE *Concilium* (*Law*) the common council of the king and people assembled in parliament.—*Communis Custodia*, a writ which anciently lay for the lord whose tenant, holding by knight's service, died and left a son under age, against a stranger who entered the land, and obtained ward of the body. *Fitz. Nat. Brev. 89; Reg. Orig. 161.*—*Communia Placita non tenenda in Scaccario*, an ancient writ directed to the treasurer and barons of the Exchequer forbidding them to hold plea between common persons, i. e. not debtors to the king, where neither of the parties belong to the same.

COMMUNIBUS LOCIS (*Lit.*) a term often used by writers for some medium, or mean relation between several places, as taking one place with another: thus, as Dr. Keil supposes the ocean is a quarter of a mile deep, *communibus locis*, i. e. at a medium, or taking one place with another.—*Communibus annis* is said, in respect to time, as the former phrase is in respect to place. The depth of rain, according to Mr. Derham, were it to stagnate on the earth, would amount, *communibus annis*, i. e. one year with another, to 42½ inches in Lancashire, 19 at Paris, 32½ at Zurich, &c.

COMMUNICANT (*Ecc.*) one who partakes in the communion of the Lord's Supper.

COMMUNICANTES febres (*Med.*) a name for two fevers which afflict a person at one and the same time, the paroxysm of the one beginning as the paroxysm of the other ceases.

COMMUNICATING doors (*Archit.*) doors which, when open, throw two apartments into one.

COMMUNICATIO (*Law*) a discourse between several parties without coming to an agreement, upon which no action can be grounded.

COMMUNICATION, *Line of* (*Mil.*) a term in strategy, or modern tactics, to denote the line which communicates with the line of operation, and proceeds from the base point.

COMMUNICATION, *Lines of* (*Fort.*) trenches made to preserve a safe correspondence betwixt two posts or forts, or at a siege between two approaches.

COMMUNICATION of motion (*Mech.*) that act of a moving body, by which it gives motion, or transfers its motion to another body.

COMMUNICATION (*Rhet.*) *ἀνακοίνωσις*, a figure of speech, in which the orator holds a conference, as it were, with his audience. *Cic. Or. 1. 3, c. 53; and Orat. c. 39; Quintilian. Instit. 1. 9, c. 2; Jul. Rufinian. p. 26.*

COMMUNICATION of Idioms (*Theol.*) the communication of the attributes of one nature in our Saviour to those of another.

COMMUNION (*Ecc.*) a name given to the Sacrament of the Lord's Supper, from the common participation of the faithful therein.—*Communion service*, the office for the administration of the Holy Sacrament in the church of England.—*Communion table*, the table erected at the east end of the church, round which the communicants kneel to partake of the Lord's Supper.

COMMUNITY (*Law*) vide *Commonalty*.—*Community* signifies also sometimes the joint property in effects between husband and wife. It is either tacit or continued.—*Tacit Community* is that which is contracted between a man and woman by the mere mingling of their effects, provided they have lived together a year and a day.—*Continued Community* is that which subsists between two persons joined in marriage, and the minor children of that marriage, when the survivor has not made an inventory of the effects in possession during the marriage.

COMMUTATION, *Angle of* (*Astron.*) the distance between the sun's true place from the earth, and the place of a planet reduced to the ecliptic. [vide *Angle*]

COMMUTATION (*Rhet.*) ἀντιμεταβολή, a figure of speech whereby a complete transposition of the words takes place; as "I do not live that I may eat, but I eat that I may live." *Cic. ad Heren.* l. 4, c. 48; *Quintil. Instit.* l. 9, c. 3.

COMMUTATIVE Justice (*Law*) that justice which ought to be observed in buying and selling, &c.

to **COMMUTE** (*Law*) to substitute one punishment in the place of a greater.

COMOCLADIA (*Bot.*) a genus of plants, Class 3 *Triandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* one-leaved.—COR. *petals* three. STAM. *filaments* three; *anthers* roundish.—PIST. *germ* ovate; *style* none; *stigma* obtuse.—PER. *drupe* oblong; *seed* nut membranaceous.

Species. The species are shrubs, as the—*Comocladia integrifolia*, seu *Paunus*, &c. native of America.—*Comocladia dentata*, native of South America.—*Comocladia ilicifolia*, *Ilex*, &c. seu *Dodonæa*, &c. native of the Caribbee Islands.

CO'MORTH (*Archæol.*) vide *Commorth*.

COMO'SÆ (*Bot.*) one of Linnæus's Natural Orders, consisting of plants with comose spikes.

COMO'SE (*Bot.*) an epithet for the spike of a flower which terminates with a *coma*, or tuft.

COMPACT (*Law*) an agreement or bargain.

COMPACT (*Bot.*) an epithet for a leaf having its pulp of a close firm texture.

COMPACTION (*Phy.*) the drawing together, or strengthening a body or substance by its having less parts, or by the closer adhesion of the parts; it is usually opposed to diffusion.

COMPAGNE (*Mar.*) French for a room or cabin belonging to the chief of a galley.

COMPAN (*Com.*) a silver coin current in several parts of India, and worth about nine sols French money, but its value is subject to fluctuation.

COMPANAGE (*Archæol.*) any sort of victuals which is eaten with bread.

COMPANION (*Her.*) a term applied to knights of some orders, in distinction from commander, &c.; as C. B., Companion of the Bath; C. G., Companion of the Garter, &c.

COMPANION (*Print.*) the fellow press-man, or he who works with another at the press; also a fellow compositor, or one who is engaged with others on the same work.

COMPANION (*Mar.*) a sort of wooden porch placed over the entrance or stair-case of the master's cabin.—*Companion-Ladder*, in French *échelle de commandement*, the ladder in ships of war, by which the officers ascend to, and descend from, the quarter-deck.

COMPANY (*Law*) a society, or corporate body, such as the chartered companies of tradesmen in the city of London.

COMPANY (*Com.*) a trading association in which several merchants form a joint stock, with which they trade for the common interest of the stock-holders. The most important company of this kind is that known by the name of the East India Company.

COMPANY (*Mil.*) an indeterminate number of foot or artillery, varying from 50 to 120, commanded by a captain, lieutenant, and an ensign.—*Free Company*, an irregular corps acting like a detached army, either by itself, or in conjunction with some of its own kind.—*Independent Company*, a company which is not incorporated.

COMPANY (*Mar.*) the whole crew of a ship, including the officers.—*Company*, a fleet of merchantmen, who make a charter-party among themselves to sail together on certain conditions for mutual protection.

COMPARATES (*Log.*) things compared with one another, as "The life of a man with a leaf."

COMPARATIVE degree (*Gram.*) the second degree of comparison, as better, the middle degree between good and best.

COMPARATIVE Anatomy (*Anat.*) the anatomy of animals for the purpose of comparing the corresponding parts in different animal bodies.

COMPARISON of Ideas (*Log.*) the setting of two ideas together for the purpose of observing their agreement or difference.

COMPARISON (*Rhet.*) a figure of speech by which things are considered in relation to others for the purpose of heightening the effect of the representation.—*Parallel comparison* is the putting of two persons or things together in order to observe their agreement or difference.

COMPARTIMENT (*Archit.*) vide *Compartment*.

COMPARTITION (*Archit.*) the graceful distribution of the whole ground-plot of a building.

COMPARTMENT (*Archit.*) or *compartment*, a proportionable division in a building; a particular square, or some device marked in an ornamental part of the building.—*Compartment of Tiles*, an arrangement of white or red tiles varnished for the decoration of a roof.—*Compartment* is also the symmetrical disposition of figures to adorn pannels.

COMPARTMENT (*Paint.*) a regular orderly disposition of figures about any picture, map, or draught, &c.

COMPARTMENT (*Hort.*) a bed, border, or knot, being a design composed of several different figures disposed with symmetry to adorn a parterre.

COMPARTMENTS (*Her.*) are partitions and quarterings of the escutcheon, according to the number of coats in it, when the arms of several families are borne in one and the same coat, in consequence of marriages, &c.

COMPASS (*Mar.*) or *Mariners' compass*, an instrument used by mariners to point out the course at sea, which is said to have been invented about the fourth century. It consists

of a card or fly, a needle, and a box.—The *card* is a circle of stiff varnished paper representing the horizon, and divided into thirty-two parts, as in the annexed figure, by lines drawn from the centre to the circumference, called *points*, or *rhumbs*; [vide *Rhumbs*] the four principal of which are called *cardinal points*; namely, North, South, East, and West.—The *needle* is a small bar of steel made magnetical, which has the

property of pointing one of its ends to the North pole.—The *box*, which immediately contains the card and needle, is made of brass, and is hung within a wooden one by two concentric rings, called *gimbals*, so fixed by cross centres to the box, that the inner one, or compass box, retains its horizontal position in all motions of the ship. The top of the box is covered with glass to prevent the wind from disturbing the needle.—*Azimuth compass* differs from the common compass in that the circumference of the card or box is divided into degrees; and an index is likewise fitted to the box with two sights through which observations of the sun or stars may be taken.—*Variation of the compass or needle*. [vide *Variation*].—*Compass dials*, small dials fitted into boxes, for the pocket, to show the hour of the day by the needle that indicates how to place them right; for, by turning the dial about, the cock or style stands directly over the needle.

COMPASS-SAW (*Carpent.*) a saw with an edge so broad, and the back so thin, that it may easily follow the broad edge without having its teeth set. Its use is to cut a round, or any other compass kerf.

COMPASS-TIMBER (*Mar.*) timber incurvated or arched for the building of ships.

COMPASSES (*Math.*) or *pair of compasses*, a mathematical instrument which consists of two sharp-pointed branches or legs of brass, &c. for describing circles, measuring, and dividing lines, &c. They are distinguished according to their particular construction, form, use, &c. into—*Beam compasses*, which consist of a long straight beam or bar carrying two brass cursors, and are used for drawing large circles.—*Bow-compasses*, a small sort of compasses which serve to describe arcs or circumferences with a very small radius.—*Caliber compasses*. [vide *Caliber*].—*Clock-maker's compasses* are jointed like the common compasses, with a quadrant or bow, like the spring compasses, serving to keep the instrument firm at any opening.—*Cylindrical*, or *spherical compasses*, consist of four branches joined in a centre, two of them being circular, and two flat. Their use is to take the diameter of cylindrical bodies.—*Elliptical compasses*, or those which are used for drawing ellipses, are of a complicated structure.—*German compasses* have the legs bent out a little, so that when shut the points only meet.—*Hair-compasses*, a sort of compasses so contrived withinside, by a small adjusting screw to one of the legs, as to take an extent to a hair's breadth.—*Proportional compasses*, those whose joint lies not at the end of the legs, but between the points terminating each leg.—*Spring compasses*, or *dividers*, are made of hardened steel, with an arched head, which, by its spring, opens the legs.—*Triangular compasses*, the common compasses with the addition of a third leg or point, which has a motion every way. Their use is to take three points at once.—*Trisecting compasses*, for the trisecting angles mechanically.—*Turn-up compasses* differ from the common sort only by having two other points added towards the bottom of the legs; the object of which is to save the trouble of changing points.

COMPASSING (*Mar.*) the act of bending timber into a curve for the building of ships.

COMPELLATIVUS (*Archæol.*) an adversary, or accuser. *Leg. Athelstan.*

COMPENDIUM (*Ant.*) 1. Whatever is got by saving. 2. An abridgement.

COMPENDINATIO (*Ant.*) a delay of the action or pleading until the third day following. *Ascon. in Cic. p. 76; Manut. de Leg. e. 22; Bud. in Pandect. p. 32.*

COMPERTORIUM (*Law*) a judicial inquest in the civil law, made by delegates or commissioners, to find out, and to relate the truth of a cause.

COMPETENCE *Militaire* (*Mil.*) French for military cognizance.

COMPETENCY (*Law*) the power of a judge, or of any court, to take cognizance of the matter in question.

COMPETITOR (*Polit.*) a rival candidate, or one who sues for the same office.

COMPITALIA (*Ant.*) *Compitalitia*, or *Ludi Compitales*, feasts in cross-ways solemnized by the friends of those who died in foreign parts. *Cat. de Re Rus. c. 5; Dionys. Halicarn. l. 4; Varr. de Lat. Ling. l. 5; Cic. ad Attic. l. 7, e. 7; Plin. l. 36, c. 27; A. Gell. l. 10, c. 24; Fest. de Verb. Signif; Ascon. in Cic. p. 159; Macrob. Sat. l. 1, c. 7; Gyrald. Syntag. Deor. l. 17; Laz. Comm. Reip. Rom. l. 10, c. 4; Turneb. Adv. l. 21, c. 15.*

COMPITUM (*Ant.*) a cross-way, or place where several roads met together, and at which the rustics used to keep their holidays, and celebrate their wakes. *Vet. Interp. Per. sat. 4, v. 27.*

COMPLAINANT (*Law*) one who prefers a complaint against another, a plaintiff at law.

COMPLEMENT (*Geom.*) παραπλήρωμα, a name for the two smaller parallelograms, A K and K C, formed by drawing the two right lines, H G and E F, through the point K in the diagonal. These are in every parallelogram equal to one another, as A K = K C. *Eud. Elem. prop. 43.*—*Complement of an arc*, what an arc wants of 90°, or the quadrant of a circle.—*Complement of an angle*, what an acute angle wants of a right angle.

Eud. Elem. prop. 43.—*Complement of an arc*, what an arc wants of 90°, or the quadrant of a circle.—*Complement of an angle*, what an acute angle wants of a right angle.

COMPLEMENT of the Course (*Mar.*) the number of points the course wants of 90°, or the fourth of the compass.

COMPLEMENT of the Curtain (*Fort.*) that part in the interior side of a fortification which makes the demi-gorge.—*Complement of the line of Defence*, the remainder of the line of defence after the flank-angle is taken away.

COMPLEMENT (*Mil.*) the full establishment of a regiment.

COMPLEMENT (*Mus.*) that quantity which is wanting to any interval to fill up the octave.

COMPLEMENT (*Her.*) signifies the full moon.

COMPLETE (*Mil.*) in French *complet*, a term applied to any regiment or company that has its established number.

COMPLETE (*Bot.*) an epithet for a flower; *flos completus*, a complete flower, or one that has the calyx, corolla, stamen, and pistil.

COMPLETION (*Med.*) another word for *plethora*.

COMPLETORIUM (*Ecc.*) the *complines*, or midnight devotions in the Romish church.

COMPLEX (*Log.*) an epithet applied either to the ideas or the faculty of the mind by which they are apprehended; thus, complex ideas are those which are composed of several simple ideas, and complex apprehension that which takes in several objects in their order, as "A reed in the hand."

COMPLEXIO (*Med.*) the constitution or temperament.

COMPLEXIO (*Log.*) the conclusion of a syllogism or argument. *Cic. de Invent. l. 1, e. 31.*

COMPLEXIO (*Rhet.*) a figure of speech which embraces both repetition and conversion, answering to the Greek *symploce*. [vide *Symploce*] *Quint. Inst. l. 9, e. 3.*—*Complexio verborum* signifies also a full period, taking in the context and series of a discourse. *Quintil. l. 1, c. 5.*

COMPLEXUS (*Anat.*) a muscle situated in the back part of the neck.

COMPLICATE (*Bot.*) *complicatus*, i. e. folded together, as the valves of the glume or chaff of some grapes.

COMPLICATIO morbi (*Med.*) a complication of diseases when several subsist in the same subject at the same time.

COMPLINES (*Ecc.*) the last prayers, or conclusion of the evening prayers in the Romish church.

COMPLUVIUM (*Archit.*) a pent-house, or eaves, down

which the water glides. *Varr. de Lat. Lin.* l. 4, c. 33; *Vitruv.* l. 6, c. 3.

COMPO'NY (*Her.*) or *counter company*, when a border, pale, bend, or any other ordinary, is made up of two rows of squares, consisting of metals and colours.

TO COMPOSE (*Mus.*) to invent music, or pieces of music, according to the rules of art.

COMPOSED (*Fort.*) an epithet for a bastion, so called when the two sides of the inner polygon are very unequal, which makes the gorges unequal.

COMPOSER (*Mus.*) one who composes pieces of music.

COMPOSING (*Print.*) vide *Composition*.

COMPOSING *stick* (*Print.*) a compositor's tool, made of iron plate, into which he gathers the letters, and thus composes the matter in printing. It consists of different parts, as in the subjoined figure; *a* the *Head*, *bb* the *Bottom*, *cc*

the *Back*, *d* the lower sliding Measure, or *cheek*, *e* the upper sliding Measure, or *cheek*, *ff* the Male Screw, *g* the Female Screw.—*Composing Rule*, a sort of brass rule used by compositors for regulating their lines.

COMPOSITÆ (*Bot.*) the name of the twenty-first order in the Fragments of Linnæus' Natural Method, comprising the plants with compound flowers.

COMPOSITE order (*Archit.*) one of the five orders of architecture, so called because it is composed of the Ionic and Corinthian orders. [vide *Architecture*]

COMPOSITE numbers (*Arith.*) such numbers as some other number besides unity can measure, as 12, which is measured by 2, 3, 4, and 6. *Composite numbers between themselves* are such as have some measure besides unity, as 12 and 15, which may both be measured by 3.

COMPOSITES (*Med.*) medicines made up of any simple ones as syrups, electuaries, &c.

COMPOSITIO *mensurarum* (*Archæol.*) the title of an ancient ordinance for measures.

COMPOSITION (*Mus.*) a piece of music composed according to the rules of art.

COMPOSITION (*Print.*) more commonly called *composing*, the act of disposing the type into a form fit for printing.

COMPOSITION (*Rhet.*) the act of arranging one's thoughts into a certain order, and clothing them with suitable words, aptly disposed.

COMPOSITION (*Math.*) or *synthetical method*, which is the reverse of the analysis, or analytical, is a mode of reasoning which proceeds upon principles self-evident, or otherwise demonstrated step by step, until it brings us to the knowledge of the thing sought for. [vide *Analysis*]—*Composition of forces or motion* is the union or assemblage of several forces or motions that are oblique to one another into an equivalent one in another direction.—*Composition of numbers*. [vide *Combination*]—*Composition of proportions*, is when of four proportionals the sum of the 1st and 2d is to the 2d as the sum of the 3d and 4th is to the 4th; as if $a : b :: c : d$, then by composition $a + b : b :: c + a : d$, or in numbers, if $2 : 4 :: 9 : 18$, then by composition, $6 : 4 :: 27 : 18$.—*Composition of ratios*, is the adding of ratios together, which is performed by multiplying their corresponding terms together, namely, the antecedents together and the consequents together, for the antecedent and consequent of the compounded ratio: thus the ratio of 2 : 4, added to the ratio of 6 : 8, makes the ratio of 12 : 32, or the compound ratio compounded of the ratio of 2 to 4, and of 6 to 8.

COMPOSITION (*Paint.*) is the putting together the several parts of a picture so as to set off the whole to the best advantage.

COMPOSITION (*Law*) is when a debtor, not being able to discharge his whole debts, agrees with his creditors to pay them a part of what is due.

COMPOSITION (*Chem.*) the same as combination; but by some it has been taken for a simple mixturc. [vide *Combination*]

COMPOSITION (*Med.*) the mixing of several ingredients together.

COMPOSITOR (*Print.*) a workman in the printing-office who does the part of composing the matter for the press.

COMPOSITUS (*Bot.*) compound. [vide *Compound*]

COMPOSIZIONE *da Tavolino* (*Mus.*) Italian for convivial melodies, or songs for the table.

COMPOST (*Hort.*) a compound mixture of dung and earths, &c. to serve as manure for the land, or as mould for the finer sort of plants.

COMPOTE (*Cook*) fruit or meat stewed.

COMPOUND quantities (*Algeb.*) such as are connected together by the signs + and -, and expressed by different letters, or else by the same letters unequally repeated, as $a + b - c$, and $bb - b$.

COMPOUND ratio (*Geom.*) the ratio that the product of the antecedents of two or more ratios has to the product of their consequents, as 6 to 72 is in a ratio compounded of 2 to 8, and of 3 to 12.

COMPOUND motion (*Mech.*) that which is produced by several forces conspiring together, as when the radius of a circle moves about the centre, and at the same time a point be conceived to go forwards along with it.—*Compound pendulum*, one that consists of several weights, keeping the same distance both from each other and from the centre, about which they oscillate.

COMPOUND interest (*Arith.*) that interest which arises from the principal and interest put together; also the rule by which this interest is to be found on any given sum. [vide *Interest*]—*Compound Addition*, *Subtraction*, *Multiplication*, and *Division*. [vide *Addition*, &c.]—*Compound fraction*. [vide *Fraction*]—*Compound number*. [vide *Composite Number*]

COMPOUND interval (*Mus.*) any interval composed of two others; thus the 9th is composed of the second and the eighth.—*Compound measures* are marked by double characters.

COMPOUND terms (*Gram.*) those that are composed of two simple terms, as *thankful*, *householder*, &c.

COMPOUND (*Bot.*) *compositus* is an epithet for a petiole, flower, raceme, spike, corymb, umbel, fructification, &c.; *petiolus compositus* is a petiole supporting more than one leaf; *flos compositus*, a species of aggregate flower enclosed in a common perianth, and on a common receptacle, with the anthers connected in a cylinder, as in the class Syngenesia; *racemus compositus*, a raceme composed of several racemes, or smaller racemes; *spica composita*, a spike composed of several spicules, or spikelets; *corymbus compositus*, a corymb having all the flowers elevated upon pedicels, sitting upon the common peduncles; *umbella composita*, an umbel having all the rays or peduncles bearing umbellules, or small umbels, at the top; *fructificatio composita*, a fructification consisting of several confluent florets.

COMPOUNDED (*Bot.*) vide *Compound*.

COMPOUNDING *felony* (*Law*) or *Theft-bote*, where the party robbed not only knows the felon, but also takes his goods again, or any other amends, upon agreement not to prosecute, which formerly made a man an accessory, but is now punished with fine and imprisonment.

COMPREHENSIO *verborum* (*Rhet.*) the whole compass of a sentence included in a full period. *Cic. Brut.* c. 44.

- COMPREHENSION (*Log.*) that act of the understanding whereby it takes a full view of the object presented to it, so as to have a thorough knowledge of all its parts and bearings.
- COMPREHENSION (*Ecc.*) the name of a scheme which was once proposed for relaxing the terms of conformity in such manner as to admit of protestant dissenters into the communion of the church of England.
- COMPREHENSION (*Rhet.*) a figure of speech whereby the name of a whole is put for a part, and that of a part for a whole.
- COMPRESSÆ (*Surg.*) compresses or folded pieces of linen cloth contrived to make a gentle pressure upon any part.
- COMPRESSED (*Bot.*) *compressus*, i. e. flatted; an epithet applied to a stem, a leaf, a silique, &c., as *caulis compressus*, a stem having its two opposite sides flat; *folium compressum*, a leaf which is pulpy, having its sides more flattened than the disk, in distinction from depressed: *siliqua compressa*, a silique which has the opposite sides approaching to each other.
- COMPRESSIBILITY (*Phy.*) that property in a solid or fluid of yielding to the pressure of another body or force, so as to be brought into a smaller compass.
- COMPRESSSION (*Surg.*) a diseased state of the body arising from the pressure of something on the brain.
- COMPRESSION, *globe of* (*Mil.*) an excavation of a globular form which is made in the earth, and is filled with gunpowder.
- COMPRESSIVES (*Med.*) medicines which cause a dryness in an affected member.
- COMPRESSOR *naris* (*Anat.*) a muscle of the nose that compresses the *ala* towards the *septum nasi*.
- COMPRESSUS (*Bot.*) vide *Compressed*.
- TO COMPRI'NT (*Law*) to print by stealth a copy or book belonging to another, to his prejudice.
- COMPROMISE (*Law*) a promise of two or more parties at difference to refer their dispute to the decision of arbitrators.
- COMPROMISSARIUS (*Ant.*) an arbiter or umpire chosen by compromise to deal indifferently betwixt both parties.
- COMPTESSAS (*Mech.*) a French word from *compter les pas*, to count or measure steps; an instrument by which the ground a person has passed over is measured.
- COMPTONIA (*Bot.*) a genus of plants, Class 21 *Monoecia*, Order 3 *Triandria*.
- Generic Characters.* CAL. *ament* cylindric; *perianth* two-leaved; *leaflets* equal.—COR. none.—STAM. *filaments* three; *anthers* six.—PIST. *germ* roundish; *styles* two.—PER. none; *seed nut* oval.
- Species.* The only species is the—*Comptonia asplenifolia*, *Liquidambar*, &c. *Myrica*, &c. *Gale*, &c. seu *Myrti*, &c. Fern-leaved *Comptonia*, a shrub, native of New England.
- COMPROLLER (*Law*) one who examines the accounts of collectors of public money.—*Comptroller of the Pipe*, an officer of the Exchequer that writes out summonses twice every year to the sheriffs to levy the farms and debts of the Pipe; he also keeps a contra-rollment of the Pipe.
- COMPROLLER of the Artillery (*Mil.*) a civil officer who formerly inspected the musters of artillery.—*Comptroller of the Navy*, one of the Commissioners of the Navy Board, at which he presides to direct the inferior and civil department of the marine service.
- COMPULSORES (*Ant.*) those that forced people to quit or abandon a fort that had surrendered. *Ammian. Marcell.* l. 25, c. 9.
- COMPUNCTIO (*Med.*) a puncture.
- COMPURGATOR (*Law*) one that by oath justifies another's innocence.
- COMPUTATION (*Math.*) the manner of estimating time, weights, measures, &c.
- COMPUTATION (*Law*) the true account and construction of time in which the law rejects all fractions and divisions of the day.
- COMPUTO *reddendo* (*Law*) a writ to compel a bailiff, receiver, or accountant, to yield up his accounts; founded on the statute of Westm. 2, c. 12. It also lies against guardians. *Reg. Orig.* 135.
- COMRADE (*Mil.*) a fellow soldier in the same regiment or company.
- CON (*Mus.*) an Italian preposition answering to the English *with*, which is used in music, as *con affetto*, to signify that the music must be performed in a moving, tender, and affecting manner, consequently rather slow than fast.
- CONARIUM (*Anat.*) a name for the *pineal gland*, from its conical shape.
- CONATUS of motion (*Phy.*) that disposition or aptitude in a body to go on, unless it be prevented by other causes; it is the same as attraction or gravitation in a body without motion.
- CONCÆDES (*Ant.*) the cutting down trees to keep off the enemy's horse, either in a retreat or about a camp. *Tac. Annal.* l. 1, c. 50; *Ammian.* l. 16, c. 2; *Veget.* l. 3, c. 21.
- CONCAMERATIO (*Archit.*) *καμάρωσις*, an arching or a vault. *Vitruv.* l. 2, c. 4.
- CONCATENATION (*Phy.*) a term mostly applied to denote the dependance of second causes on each other.
- CONCAVE (*Bot.*) an epithet for a leaf; *concavum folium*, a leaf having the margin more contracted than the disk, and the disk consequently depressed. This epithet is also applied to the calyx, the corolla, and the valves of the glume of grasses.
- CONCAVE glasses (*Mech.*) such as are ground hollow on the inside, so as to reflect on the hollow side.—*Concavo-concave*, implies concave on both sides.—*Plano-concave*, concave on one side, and plane on the other side.—*Concavo-convez*, concave on one side, and convex on the other.
- CONCAVE (*Gunn.*) the bore of a piece of ordnance.
- CONCAUSA (*Med.*) a cause which operates with another in the production of a disease.
- CONCAVUS (*Bot.*) vide *Concave*.
- CONCEALERS (*Law*) *Concelatores*, from *concelando*, signifying, by antiphrasis, *revealers*; those who were used to find out concealed lands; i. e. such lands as are privily kept from the king by common persons having nothing to show for their title and estate therein. *Stat. 39 Eliz.* c. 22.
- CONCENTO (*Mus.*) Italian for harmony resulting from many voices and instruments in concert.
- CONCENTOR (*Mus.*) one who sings with another.
- CONCENTRANTIA (*Med.*) concentrant medicines, those whose acids are so moderated by alkalies that neither of them predominate.
- CONCENTRATION (*Chem.*) the volatilizing part of the water of fluids, in order to improve their strength.
- CENTRICAL (*Astron.*) or *Concentric*, an epithet for circles that have the same centre.
- CONCEPTACLE (*Bot.*) or Follicle, *conceptaculum*, or *folliculus*, a pericarp of one valve opening longitudinally on one side, and having the seeds loose in it, as in *Apocynum*, *Asclepias*, *Stapelia*, &c.
- CONCEPTACULUM (*Mech.*) any thing hollow that is fit to receive or contain any substances.
- CONCEPTIO *Formularum* (*Ant.*) the drawing up of bills and legal instruments.
- CONCEPTIO (*Med.*) the impregnation of the *ovulum*, or *semen*, in the *ovarium*, or *uterus*, of the female.
- CONCEPTION (*Ecc.*) or the feast of the Immaculate Conception, is a feast in the Christian Church, celebrated on the 8th of December, in honour of the immaculate conception of the Blessed Virgini.
- CONCEPTION (*Log.*) the simple apprehension which we have of a thing, without proceeding to affirm or deny any thing of it.

CONCEPTIVÆ *feriæ* (*Ant.*) festivals not fixed to any certain day in the year, the celebration of which was determined by the magistrates.

CONCEPTUS (*Anat.*) the very first rudiments of the fœtus in the uterus after conception.

CONCERT (*Mus.*) vide *Concerto*.

CONCERTANTE (*Mus.*) those parts of a piece that play throughout the whole, to distinguish them from those that play only in some parts.

CONCERTO (*Mus.*) Italian for a piece of music consisting of several parts that are all to be performed together.—*Concerto grosso*, the grand chorus of the concert, or those parts in which the whole is performed together at the same time.—*Concerto spirituale*, Italian for a miscellaneous concert, consisting of pieces selected from sacred music.

CONCESSI (*Law*) "I have granted," a phrase used frequently in conveyances creating a covenant; in distinction from *dedi*, which makes a warranty. *Co. Lit.* 334.

CONCESSIO (*Rhet.*) *συγγνώμη*, a certain form of defence adopted in pleading, where the defendant admits the charge, and pleads for indulgence. *Cic. de Invent.* l. 1, c. 11; 1 *Jul. Rufin.* p. 28.

CONCESSIT *solvere* (*Law*) an action of debt upon simple contract, and lies by custom in the courts of the cities of London and Westminster.

CONCHA (*Ant.*) a liquid measure among the Athenians, which contained two mystra, or half an ounce. *Gal. de Ponder.*; *Gorr. Def. Med.*; *Pct. de Roman. & Græc. Mensur. apud Græv. Thes. Ant. Rom.* tom. ii. p. 1649.

CONCHA (*Con.*) *κόγχη*, a shell fish with two shells, as an oyster, an escallop, &c.

CONCHA (*Anat.*) a term applied to different parts of the body, as *Concha auris*, the hollow of the ear, or the cartilage of the outer ear; *Concha narium*, the inferior spongy bones of the nostrils, &c.

CONCHA (*Mus.*) a musical shell. [vide *Trumpet*]

CONCHIFOLIA (*Bot.*) vide *Manga*.

CONCHIS (*Bot.*) an unshelled bean, or a bean in the husk, which, according to Apicius, was reckoned a delicacy among the Romans, when dressed with aromatic substances.

CONCHOID (*Math.*) the name given to the curve invented by Nicomedes, as in the annexed figure. Let the line Q Q be drawn, and A C perpendicular to it in the point E; then from the point C draw several right lines, C M cutting the right line in Q Q in Q, and make Q M = Q N, A E = E F; i. e. equal to an invariable line; then the curve wherein are the points M M, is the first conchoid; and the other, wherein are the points A C, is the second conchoid: the line Q Q is called the *Directrix*, and the point C the *Pole*.

CONCHOLOGY, from *κόγχη*, a shell, and *λόγος*, a discourse or doctrine; is that branch of natural history which treats of testaceous animals. These animals, which constitute the *testacea*, or third Order of the *Vermes* in the Linnæan system, have a permanently testaceous covering, by which they are distinguished from the crustaceous animals, as lobsters, crabs, and the like, although they are both included under the name of *shell fish* in English.

Conchology may be considered under three heads, namely, the parts, figures, &c. of shells; the classification of shells; and the animals which inhabit shells.

Parts, Figure, &c. of Shells.

Parts of Shells. The principal parts of shells are, *valvula*, the Valve; *apex*, the Summit, or Tip; *basis*, the Base; *margo*, the Margin; *apertura*, the Aperture, or Mouth;

rostrum, the Beak; *cardo*, the Hinge; *spira*, the Spire; *ligamentum*, the Ligament; *varices*, the Veins, &c.

Valve. The valve is the principal piece of which the shell is composed, and by which shells are distinguished into—*Univalves*, or those which consist of only one valve.—*Bivalves*, or those which are composed of two valves.—*Multivalves*, or those which consist of more than two valves. [Plate 33]

Valves are distinguished into—*Right valve*, or that which corresponds to the left of the observer, supposing the front or aperture of the shell to face him.—*Left valve*, that which corresponds to the right of the observer. When the right valve corresponds with the left in size, they are said to be equal.—*Superior valve*, is that valve which is not attached to solid bodies, in distinction from the inferior, or the one that is attached.—*Keelshaped valve*, *valvula carinata*, when one part of the convexity presents a sharp edge.—*Chambered valve*, *valvula concamerata*, when it exhibits testaceous plates in its cavity.—*Spinous valve*, a valve furnished with spinous processes.—*Banded valve*, *valvula fasciata*, exhibiting large transverse bands or stripes.—*Lamellated valve*, when the surface is furnished with plates.—*Radiated valve*, one exhibiting divergent or coloured rays.—*Sinuated valve*, *valvula lacunosa*, when one of the valves has a sensible depression at the middle of its margin, and a corresponding elevation of the opposite valve.—*Striated valve*, one that is marked with striae.

To the valves belong the *Ligament*, or cartilage, the horny substance by which the valves of the shell are connected, *c*, fig. 8, 14. Some multivalve shells are connected by the parts of one valve fitting into another, as *ll*, fig. 1.—*Sides*, the right and left parts of the valves.—*Inside*, the concave part of a valve.—*Seam*, i. e. the line between the valves when they are closed.—*Disk*, the convex centre of the valves, as *d*, fig. 10.—*Margin* or *Limb*, the circumference of the valves from the disk to their edges, as *m*, fig. 6.

Apex. The Apex, or Summit, in a univalve shell, is the extreme point of the spire, as *a*, fig. 28: in bivalves it is the most elevated point of that part of the shell in which the hinge is placed. The pre-eminent part in the *Patella* is called the *vertex*.

Base. The base is the extremity or part opposite to the apex. In shells with a rostrum or beak, it implies the lowest part of the beak, as fig. 28, 29. In shells without a beak it is the lowest part, as *b*, fig. 1, or that part which is next the aperture, by which the multivalve shell in some cases is fixed to the rock, as *b*, fig. 1, 2.

Margin. The margin of the shell is the whole circumference or outline of the shell, as *m m*, fig. 6. This is either anterior, posterior, or superior.—The *anterior margin* is that which commences at the side of the ligament on the fore part of the beak, supposing the shell to be placed on its beak.—*Posterior margin* extends to one-third of the circumference from the beaks of the valves behind.—*Superior margin* includes the upper part of the circumference between the two preceding parts.—*Margin of the valves* is the whole interior circumference of the valves, and is distinguished into the furrowed, notched, toothed, folded, and striated margins.—*Crenulated margin*, a fine saw-like edge of most of the cockles, which correspond to the notch in the opposite valve. It is not uncommon in other shells, as the *Donax*, *m m*, fig. 15.

Rostrum or Beak. The beak is the extreme point in bivalves which turns downwards in the form of a beak, or to one side, as *rr*, fig. 10. The beak in univalveshells is the lengthened process or continuation of the canal, as *r*, fig. 29.

To the beak in bivalves belong *auriculæ*, the ears, two processes on each side the beak, particularly in that division of the genus *Ostrea*, known by the name of Scallops, as *e e*, fig. 7. These ears are sometimes distinguished into superior and inferior.

Area, or *Slope*. The area, or slope, is either anterior or posterior. The *anterior slope* is that space in which the ligament is situated.—The *posterior slope*, or *areola*, is that part of the shell opposite to the anterior slope; in the viewing of which in the front the beaks point to you. The anterior slope is distinct, inflex, literate, &c.; the posterior, marginate, patulous, serrate, &c. In the Venus tribe is a spatulated mark formed by the union of the valves on the posterior and anterior slopes, which is called the *vulva*. There is also another mark or spot near the slopes, of a crescent-like form, called the *lumule*.

Hinge. The hinge is the solidest part of the circumference of the valve, and is the point by which bivalve shells are united, as *hh*, fig. 6, 8. It is on the peculiar construction of the hinge that the generic character of bivalve shells is principally founded. The hinge is either compressed, lateral, oblong, reflected, terminal, or truncated. Near the hinge, on the posterior side, is a depression called the *anus*. To the hinge belong the *teeth*, the projections in one valve which fit into the sockets or cavities of the opposite valve, by which the hinge is articulated. The teeth are of different forms and differently placed, as the *primary teeth*, which are placed about the centre, and are broad, large, and often elevated, as *p*, fig. 13, 14, 15, 16; *lateral teeth*, which diverge from the *umbo*, and are generally long and flat, as *l*, fig. 12, 13; *double teeth*, as *d*, fig. 12; *incurred teeth*, those which are bent round, as *i*, fig. 17. The teeth are likewise complicated, when they form an acute angle; duplicate, i. e. deeply cleft, or bifid; depressed, or turned inward; erect, i. e. perpendicular to the plane of the hinge; longitudinal, &c. Some hinges have no visible teeth, and are termed *inarticulate*; and some have numerous teeth, and are called *multarticulate*, as the hinges of the Arca, which are set in rows, as *n n*, fig. 20.—*Cavity of the hinge*, is the hollow depression in which the ligament of the ostrea is situated, which is generally of a triangular form, as *c*, fig. 18.

Operculum or *Lid*.—The operculum or lid in multivalves consists of four small valves in the *Lepas*, which is, however, in a certain degree, stationary, as *o*, fig. 2, and consequently distinguished from the operculum of the univalves, or that appendage to some of the turbinated shells which is affixed to the animal, and is sometimes a testaceous, and sometimes a cartilaginous substance. It is calculated for the protection of the animal when it retires within its dwelling, which it thus shuts up, as with a nicely fitted door. Of this description is the cartilaginous operculum of the *Turbo littoratus* of Linnæus, or the Common Periwinkle, which has a brown horny appearance, and must in general be removed before the animal can be taken out when boiled.

Aperture. The aperture or mouth is that opening in the univalves through which the animal protrudes itself, as fig. 27, 29. This is one of the principal distinctions of univalve shells, and differs very much in shape, some being bimarginate, i. e. having a lip with a double margin; bilabiate, i. e. with a double lip; gaping, the lower part of the lip distended; coarctate, i. e. straight; effuse, i. e. having the lips separated by a sinus or gutter; reflex, spreading, resupinate, &c. To the aperture belong the lip and the canal.—*Labium*, Lip, is the internal or columellar margin of the aperture, as *o*, *p*, fig. 31. This is, in respect to position, exterior, ante-

rior, or posterior, in respect to form coarctate, digitate, disengaged, cloven, mucronate, &c.—*Canal* is the continuation or prolongation of the aperture along the beak, which forms a gutter from its commencement to the extremity, as *c*, fig. 29, 31.

Spire. The spire is all the whorls collectively, except the lower one, as *s*, fig. 30. The spire is a prominent feature of the univalve shell, and is either convex, crowned, capitate, or obtuse, exerted, or much attenuated, pointed, flattened, retuse, elevated, depressed, &c.—*The suture of the spire* is a fine spiral line, which separates the wreaths or whorls, as *s*, fig. 29.

Whorl. The whorl is one of the wreaths or convolutions of the shell, as *w*, fig. 34. The whorls are bifid, channelled, keeled, contiguous, crowned, leafy, imbricate, lamellate, lineate, striate, sulcated, &c. The contraction of the whorls, so as to correspond with the internal dissepiments or divisions, are called *geniculations*.

Body. The body is the first or lower whorl of the shell, which is in general longer than the remaining whorls, as *b b*, fig. 30, 32. To the body belong the venter and umbilicus. The *venter*, or *Belly*, is the most prominent part of the body, generally situated in the vicinity of the lip, and formed by the convexity of the aperture, as *v*, fig. 34.—The *umbilicus* is in general a circular perforation, in the base of the body of many univalves, and common to most of the *Trochi*, as *u*, fig. 27.

Columella or *Pillar*. The columella or pillar, *ccc*, fig. 32, is that process which runs through the centre of the shell in the inside, from the base to the apex in most univalve shells, and appears to be the support of the spire, or in fact to form that part of the shell. It is either abrupt, i. e. truncate at the base, elongated, i. e. so as to project beyond the body; flat, plaited, &c.

Chambers. Chambers are the divisions formed by partitions, at regular intervals, as in the Nautilus, *cc*, fig. 35. To the chamber belongs the *Siphunculus*, or *Sipho*, a small round perforation, which forms a communication between the chambers of the nautili, running through the whole spire of the shell, as *s*, fig. 35.

Ribs. The ribs are those longitudinal protuberances which are in many of the univalve shells, as *r*, fig. 36.

Furrows. Furrows are those impressions or interstices between the ribs, or rays on the surface of the valves, as *ff*, fig. 2, which are square, lamellated, &c.

Varices or *veins*. Varices are longitudinal or gibbous sutures, formed in the growth of the shell, at certain proportionable distances on the whorls. They are continuous, decussate, furrowed, &c.

Intestinal Ligature. The intestinum, or intestinal ligature, is a membranaceous tube, by which some species of the genus, *Anomia*, adhere to foreign substances.

Seam. The seam is the line between the valves when they are closed, as *s*, fig. 11.

Peduncle. The peduncle, or pedicle, is the support of the *Lepas anatifera*, and its corresponding species, by which they are attached to wood, &c. as *pp*, fig. 1. It is a kind of membranaceous substance, similar to a bladder, but materially thinner, and filled with a liquid, which affords nourishment to the animal.

Feelers. Feelers are the crenated arms evolved from the side of the *lepas anatifera*, and other shells of the genus *lepas*. While the animal is in the water, it continually moves its feelers for the purpose of entangling marine insects for food, as *ff*, fig. 1.

Byssus or *Beard*. The beard is an appendage composed of filaments, of a silky texture, by which some of the bivalves fasten themselves to their beds, such as the muscle, *b*, fig. 11.

CONCHOLOGY.

Figures or forms of Shells. Shells are distinguished, as to their form, into—*Antiquated*, i. e. longitudinally sulcate, or furrowed, but interrupted by transverse accretions, as if lesser valves were periodically added to the apex or beak.—*Bearded*, i. e. superficially covered with rigid hairs.—*Compressed*, when the valves are flattened.—*Dorsal*, when the back is obtusely keeled.—*Gaping*, when the valves close partially.—*Navicular*, being in the form of a boat.—*Pectinate*, i. e. longitudinally sulcate, or striate.—*Radiate*, i. e. with diverging rays flowing from the apex longitudinally to the circumference.—*Fastigiate*, leaving off transversely at the base.—*Saccate*, i. e. gibbous towards the summit.—*Rooted*, when it is attached to a solid, by a ligament proceeding from its base.—*Imbricated*, when the surface is covered with parallel scales, so arranged as to cover each other.—*Turbinated*, when the belly of the shell is large in proportion to the whorls, which seem to proceed from its centre.—*Bordered*, when the two sides of the aperture are broader and thicker than the rest of the diameter.—*Chambered*, when it is internally divided by dissipiments, chambers, or partitions.—*Convolute*, when the whorls turn round a lengthened coin, nearly vertical to each other.

Dimensions of shells. The length of the shell is taken from the ligament, or the beak, to the opposite margin, *ee*, fig. 9. The breadth of the shell is measured from the most extreme edge of the anterior and posterior slopes, being in a contrary direction from its length, *bb*, fig. 9. Many shells are broader than they are long, as the *Myæ*, *Solen*, *Tellina*, &c. Others are longer than they are broad, as the *Mytilus*, *Ostrea*, *Pinna*, &c.

Classification of Shells.

The classification of shells has been undertaken by different authors on different systems, of which the following are the principal:—*Lister's system*. The work of Dr. Lister, published in 1685, was divided into four Books; namely, Lib. I. *De Cochleis terrestribus*. Lib. II. *De Turbinibus et Bivalvibus aquæ dulcis*. Lib. III. *De Testaceis bivalvibus marinis*. Lib. IV. *De Buccinis marinis quibus etiam verniculi dentalia et patellæ numerantur*.—*System of Langius*, published in 1722, was divided into three parts. Pars I. *Testacea marina univalvia non turbinata*. Pars II. *Cochleæ marinæ, seu testacea marina univalvia turbinata*. Pars III. *Conchæ marinæ, id est testacea marina bivalvia quæ duabus constant valvis in cardine, &c.*—*System of Breynius*. In this system, which was published in 1732, shells are divided into eight classes; namely, 1. *Tubulus*. 2. *Cochlidium*. 3. *Polythalamium*. 4. *Lepas*. 5. *Concha*. 6. *Conchoides*. 7. *Balanus*. 8. *Echinus*.—*Tournefort's system* divided shells into *Monotoma*, *Ditoma*, and *Polytoma*.—*D'Argenville's system* comprehended shells within four divisions; namely, 1. Sea-shells. 2. Freshwater-shells. 3. Land-shells. 4. Fossil-shells.—*Klein's system*. Klein divided shells into six parts; namely, 1. *Cochlis*. 2. *Conchæ*. 3. *Polyconchæ*. 4. *Niduli testacei*. 5. *Echinus marinus, seu echinodermata*. 6. *Tubulus marinus*.—*Adamson's system*. This system, which was published in 1757, consists of three classes; namely, 1. *Limaçons*. 2. *Les Congues*. 3. *Les conques multivalves*.—*Geoffrey's system*, which was published in 1767, is very similar to that of Adamson.—*Muller's system*, which was published in 1776, arranges testaceous animals into three families; namely, 1. *Testacea animalia*. 2. *Testacea bivalvia*. 3. *Testacea multivalvia*.

In the preceding systems it is observable that in those of the earliest date, the characters are taken from the

shells; but in the three last, the marks of discrimination are gathered from the animal as well as the shell. But this latter mode is not generally preferred, on account of the imperfect knowledge which has hitherto been obtained respecting the animals that inhabit shells. The *Linnean system*, which is the one now universally followed, notwithstanding the objections which have been started against it, is built entirely on the external character of the shell. It consists of the three usual divisions, or orders; namely, Univalves, Bivalves, and Multivalves, which are divided altogether into thirty-six genera, as follow:

MULTIVALVES.

- | | |
|--------------------------------|---|
| 1. <i>Chiton</i> . | 3. <i>Pholas</i> , Piddock or Pierce Stone. |
| 2. <i>Lepas</i> , Acorn Shell. | |

BIVALVES.

- | | |
|--|----------------------------------|
| 4. <i>Mya</i> , Gaper. | 10. <i>Venus</i> . |
| 5. <i>Solen</i> , Razor or Sheath-Shell. | 11. <i>Spondylus</i> , Spondyle. |
| 6. <i>Tellina</i> , Double Wedge-Shell. | 12. <i>Chama</i> . |
| 7. <i>Cardium</i> , Cockle or Heart-Shell. | 13. <i>Arca</i> , Ark-Shell. |
| 8. <i>Macra</i> . | 14. <i>Ostrea</i> , Oyster. |
| 9. <i>Donax</i> , Wedge Shell. | 15. <i>Anomia</i> , Bowl-shell. |
| | 16. <i>Mytilus</i> , Muscle. |
| | 17. <i>Pinna</i> , Nacre. |

UNIVALVES.

- | | |
|--|-------------------------------------|
| 18. <i>Argonauta</i> , Argonaut or Sailor. | 27. <i>Trochus</i> , Button-Shell. |
| 19. <i>Nautilus</i> . | 28. <i>Turbo</i> , Whorl or Wreath. |
| 20. <i>Conus</i> , Cone Shell. | 29. <i>Helix</i> , Snail. |
| 21. <i>Cypræa</i> , Gowry or Cowry. | 30. <i>Nerita</i> . |
| 22. <i>Bulla</i> , Dipper. | 31. <i>Haliotis</i> , Sea Ear. |
| 23. <i>Voluta</i> , Rhomb-Shell. | 32. <i>Patella</i> , Limpet. |
| 24. <i>Buccinum</i> , Whelk. | 33. <i>Dentalium</i> , Tooth-Shell. |
| 25. <i>Strombus</i> , the Screw. | 34. <i>Serpula</i> , Worm-Shell. |
| 26. <i>Murex</i> , the Caltrop, or Rock-Shell. | 35. <i>Teredo</i> . |
| | 36. <i>Sabella</i> . |

Animals inhabiting shells. The animals which inhabit shells are of the Order *Mollusca*, in the Linnean system, of which the following list contains a general account; namely,

Animal.	Inhabiting.
Doris,	<i>Chiton</i> .
Triton,	<i>Lepas</i> .
Ascidia,	<i>Pholas</i> , <i>Mya</i> , <i>Solen</i> , <i>Mytilus</i> .
Tethys,	<i>Tellina</i> , <i>Cardium</i> , <i>Macra</i> , <i>Donax</i> , <i>Venus</i> , <i>Spondylus</i> , <i>Chama</i> , <i>Arca</i> , <i>Ostrea</i> .
Limax,	<i>Pinna</i> , <i>Conus</i> , <i>Cypræa</i> , <i>Bulla</i> , <i>Voluta</i> , <i>Buccinum</i> , <i>Strombus</i> , <i>Murex</i> , <i>Trochus</i> , <i>Turbo</i> , <i>Helix</i> , <i>Neritas</i> , <i>Haliotis</i> , <i>Patella</i> .
Terebella,	<i>Dentalium</i> , <i>Serpula</i> , <i>Teredo</i> .
Nereis,	<i>Sabella</i> .

To these may be added, the *Sepia* and *Clio*, if, as is supposed by some, they are the inhabitants of the *Argonauta*.

Explanation of the Plate (33).

Multivalves. Fig. 1. The *Lepas anatifera*, *b* the base, *pp* the peduncle, *ff* the feelers, *ll* the ligament, *w* a piece of wood to which the peduncle is affixed.—Fig. 2. The *Lepas rugosa*, *o* the *Operculum*, or lid, *b* the base, *ff* the furrows, *s* the stone to which the base of the shell is affixed.—Fig. 3. The *Chiton marginatus*.—Fig. 4. The *Lepas tintinnabulum*.—Fig. 5. The *Pholas crispatus*.

Bivalves. Fig. 6. The *Solen antiquatus*, *c* the cartilage, *m* the margin, or limb, *h* the hinge.—Fig. 7. The *Ostrea levis*, *s* the longitudinal and transverse *striae*, *e e* the ears, or auricles.—Fig. 8. The *Tellina fabula*, *c* the cartilage, or ligament, *h h* the hinge.—Fig. 9. The *Mytilus edulis*, *c* the cartilage, *l l* the length of the shell, *b b* the breadth of the shell.—Fig. 10. The *Chama cor*, *d* the disk, *r r* the rostrum, or beak.—Fig. 11. The *Mytilus edulis*, *b* the byssus, or beard, *s s* the seam.—Fig. 12. Hinge of the *Solen siliqua*, *l* the lateral teeth.—Fig. 13. Hinge of the *Mya pictorum*, *p* primary tooth, *d d* double teeth.—Fig. 14. Hinge of the *Tellina radula*, *pp* primary teeth, *c* cartilage.—Fig. 15. Inside of both valves of the *Donax trunculus*, *a* the left valve, *b* right valve, *l* lateral teeth, *p* primary complicated tooth, or cleft in the middle, *m m* crenulated margin.—Fig. 16. Hinge of *Venus gallina*, *p p* primary teeth, *l* lateral tooth.—Fig. 17. Hinge of *Spondylus Gæderopus*, *i i* incurved teeth.—Fig. 18. Hinge of *Ostrea varia*, *c* cavity of the hinge, *e* superior ear, *i* inferior ear.—Fig. 19. Hinge of the *Cardium aculeatum*, *l* lateral tooth, *m m* middle teeth, *s s* spines.—Fig. 20. Hinge of *Arca pilosa*, *n n* numerous small teeth the distinguishing characteristic of the genus *Arca*.—Fig. 21. The *Solen ensis*.—Fig. 22. The *Mya arenaria*.—Fig. 23. The *Maetra lutraria*.—Fig. 24. The *Arca Noæ*.—Fig. 25. The *Chama cor*.—Fig. 26. The *Mytilus incurvatus*.

Univalves. Fig. 27. The *Trochus umbilicatus*, *a* the aperture, *u* the Umbilicus.—Fig. 28. The *Helix vivipera*, *a* the apex, *b* the base, *w* a whorl, *f* *Fasci*, or bands.—Fig. 29. The *Murex muricatus*, *a* the aperture, *b* the base, *c* the canal, *r* the rostrum, *s s s s* the sutures of the spire, or whorl.—Fig. 30. The *Helix subulata*, *s* the spire, *b* the body, *p* the pillar-lip.—Fig. 31. The *Strombus pugilis*, *s* the spire, *f* the front, *o o* the outer lip, *p* the pillar-lip, *c* the canal, or gutter.—Fig. 32. The *Turbo terebra*, *b* the shell rubbed through in the back, to show the pillar, or columella, *b* the body, *c c c* the columella.—Fig. 33. The *Argonauta argo* in the act of sailing, *m* the double membrane which it spreads and directs to answer the purpose of a sail, *a a a* the arms which it throws over the shell to answer the purpose of oars.—Fig. 34. The *Helix putris*, *b* the back, *v* the venter, *w* the whorl, or volution.—Fig. 35. The *Nautilus spirula*, *c c c c c* the chambers, *s* the siphunculus.—Fig. 36. The *Turbo costatus*, *r* the ribs.—Fig. 37. The *Turbo labiatus*, *s* reversed, or heterostrophe spire, *t* teeth of a univalve.—Fig. 38. The *Serpula triquetra*.—Fig. 39. The *Teredo navalis*.—Fig. 40. The *Dentalium entails*.—Fig. 41. The *Sabella tubiformis*.

CONCHYLIA *fossilia* (Con.) Fossil Shells.

CONCHYLIIUM (Con.) all sorts of shell-fish, particularly that from which the purple dye is procured, which is also called by the same name. *Plin.* l. 9, c. 35.

CONCHYROIDES (Anat.) vide *Coracoides Processus*.

CONCIDENTIA (Med.) a decrease of bulk in the whole or any part of the body; also the subsiding of a tumour.

CONCILIATOR *Furti* (Ant.) one who espied and watched whilst a theft was committed. *Ascon.*

CONCILIATORS (Ecc.) a title which has been given to writers of the Romish Church, who advocate the cause of their church in the fairest manner.

CONCINNOUS (Mus.) an epithet for a performance in concerts, which is executed with delicacy, truth, and spirit.

CONCIONATORES (Law) Common-councilmen; freemen called to the hall, or the Common-council of the city of London as most worthy to be chosen.

CONCISO'RIOUS (Ant.) a smith's tool with which horses' hoofs were pared; a butteris, or paring knife.

CONCLAMATIO (Ant.) a funeral cry over the body of a deceased person previous to its being burnt, by which it was expected to recall the departed soul, and to awaken the deceased, as it were, from his sleep. When this failed, he was given up for lost, which was expressed by the phrase *conclamatium est*. The poets allude to this custom. *Prop.* l. 4, eleg. 7, l. 23.

*At mihi non oculos quisquam inclamavit euntes:
Unum impetrassem, te revocante, diem.*

Ovid. Trist. l. 3, eleg. 3, l. 43.

*Nec mandata dabo; nec cum clamore supremo
Labentes oculos claudet amica manus.*

Serv. in Virg. Æn. l. 6, v. 218.

CONCLAVE (Ecc.) *conclave*, a closet, or inner room, shut up under lock and key; more especially the room in the Vatican, where the cardinals meet to choose a pope; whence the assembly itself is commonly distinguished by this name.

CONCLUSION (Law) is when a man, by his own act upon record, has charged himself with a duty.

CONCLUSION (Log.) the third proposition of a syllogism, so called after it has been proved, or drawn as a conclusion from the other two. Before it has been proved it is called the *Question*.

CONCOAGULATION (Chem.) the coagulation, concretion, or crystallization, of several different salts, first dissolved together in some fluid.

CONCOCTION (Med.) is said to be such an operation of nature upon morbid matter, by the power of nature, and generally with the assistance of art, as renders it fit for separation from the healthy parts of our fluids, and to be thrown out of our bodies. Concoction, however, in its more obvious sense, is taken for digestion.

CON COMMODO (Mus.) Italian, signifying with an easy quickness.

CONCORD (Gram.) that part of Syntax which treats of the agreement of words according to their several inflections. There are three principal concords, namely, between the Nominative and the Verb; the Adjective and the Substantive; and the Relative and the Antecedent.

CONCORD (Law) 1. An agreement made between two or more persons upon a trespass committed, by way of satisfaction for the damage done, &c. This concord is either executory or executed. *Plowd.* 5, 6, 8. 2. An agreement between parties who intend the levying a fine of lands one to the other, as to how and in what manner the land shall pass.

CONCORD (Mus.) in French *Accord*; the union of two or more sounds in such manner as to render them agreeable to the ear. *Concords* are either perfect or imperfect. *Perfect concords* consist of the fifth and eighth. *Imperfect concords* of the third and sixth, which are subdivided into the greater and less. *Concords* are moreover divided into *consonant* and *dissonant*.—*Consonant concords* consist of the *perfect concord*, and its derivatives; *Dissonant concords* of all other concords. Concord is applied also to the state of an instrument, as "The instrument is not in concord."

CONCORDANCE (Lit.) a general alphabetical index of all the words in the Bible.

CONCORDANT *verses* (Poet.) such as have in them several words in common, but by the addition of other words have a quite different meaning, as

*Et {canis } in silva {venatur } et omnia {servat. }
{lupus } {nutritur } {vastat. }*

CONCORDANT (Mus.) the French for what is commonly called *Tenor*. It is also an epithet for any thing harmonious, or agreeable in sounds.

CONCORDATE (Ecc.) a public act of agreement between the Pope and any prince.

CONCORDIA (*Ant.*) Concord was worshipped as a goddess among the Romans, and is most generally represented on medals by two hands joined, or by persons shaking hands. [vide *Manus*]. *Concordia militum* was sometimes represented on coins, as on that of Didianus Julianus in the annexed figure, representing a female holding two military standards, the inscription CONCORD. MILIT. *Tristan. Comm. Histor.; Beg. Thes. Brand.*

CONCQUE (*Mil.*) French for a piece of ordnance wider about the mouth than at the breech. A kind of shell used formerly instead of a trumpet.

CONCRÉMATIÖN (*Chem.*) the same as calcination.

CONCRETE (*Phy.*) a body, either *natural* or *factitious*, made up of different principles. Antimony is a *natural concrete* compounded in the bowels of the earth: soap, on the other hand, is a *factitious concrete* prepared by art.

CONCRETE (*Log.*) is an epithet for any quality considered with its subject, as snow is white, in distinction from the abstract when the quality is considered separately, as whiteness, which may belong to snow, paper, bones, &c. but is considered separate from them all.

CONCRETE (*Arith.*) is an epithet for numbers considered in connexion with some subject, as 3 men, 4 horses, 5 pounds, &c.; whereas, if nothing be joined to the number, it is taken abstractedly, as 5, which signifies simply an aggregate of five units, whether men, horses, pounds, or whatever else.

CONCRETION (*Phy.*) the growing together, or composition of several substances, or particles of substances, into one body.

CONCRETION (*Chem.*) the condensation of any fluid substance into a more solid state.

CONCRETION (*Surg.*) the growing together of parts which ought to be separate, as the concretion of the fingers.

CONCRETION (*Med.*) otherwise called morbid concretions, substances formed in the animal body, either by the condensation of things into a harder state than is natural, or by the growing together of different substances into one body. When the concretion approaches the nature of a bone it is termed an *ossification*, and when it resembles that of a stone it is called a *calculus*.

CONCUBA'RIA (*Archæol.*) a fold, or pen, where cattle lie.

CONCUBEANT (*Law*) lying together. *Stat. 1 H. 7, c. 6.*

CONCUBINAGE (*Law*) an exception against a woman that sues for her dower, on the ground that she is a concubine, and not a wife.

CONCUPISCIBLE *Faculty* (*Eth.*) the animal or irrational part of man, which is susceptible of inordinate concupiscence.

CONCURRING *Figures* (*Geom.*) those figures which, being applied to one another, will exactly concur, or coincide at all points.

CONCUSSION (*Phy.*) a shock occasioned by two bodies moving in contrary directions.

CONCUSSION of the brain (*Med.*) a sudden violent motion of the brain and the adjacent parts from a fall or blow. Concussions are mostly unattended by any fractures, and followed by almost immediate death.

CONCUSION (*Law*) the extortion of a public officer, who by threats, or pretence of authority, attempts to pillage the people.

to **COND** (*Mar.*) to conduct or guide a ship in a right course; to direct the steersman how to steer.

CONDA'LIIUM (*Ant.*) or *condalus*, κόνδαλος, a kind of ring that slaves wore. *Plaut. Trin. act 4, scen. 3, v. 7; Fest. de Verb. Signif.*

CONDENSANTIA (*Med.*) medicines which condensate or inspissate the juices.

CONDENSATION (*Phy.*) the reducing of a body to a less

bulk or space, by which it is rendered more dense and compact.

CONDENSATION (*Chem.*) generally signifies the stoppage and collection of vapours made by the top of an alembic, whereby it is returned in the form of a liquid, or as it is raised in the head or receiver, there to harden into a permanent and solid substance, as in sublimation of all kinds.

Condensation and *Compression* are frequently used promiscuously, the one for the other; but they differ in this, that the compression of a body into a smaller bulk is the effect of external force, but condensation takes place without any external application, as in the inspissation of juices by cooling.

CONDENSATION (*Med.*) the contraction of the cutaneous pores by means of refrigerating, astringent, or drying medicines.

CONDENSED (*Bot.*) an epithet for branches *coarctati*, squeezed very close together.

CONDENSER (*Pneum.*) a pneumatic machine or syringe, by which an extraordinary quantity of air may be forced into a given space.

CONDERS (*Com.*) persons who stand upon high places near the sea-coast at the time of the herring fishery, to point out, with boughs or otherwise, which way the shoal passes.

CON DILIGENZA (*Mus.*) an Italian phrase, used in musical books, signifying with diligence or care.

CONDIMENT (*Cook.*) a pickle or preserve.

CON DISCREZIONE (*Mus.*) an Italian phrase used in music books, signifying with judgment.

CONDITAMENT (*Med.*) a composition of conserves, powders, and spices, made up in the form of an electuary, with a proper quantity of syrup.

CONDITIO sine qua non (*Phy.*) a term used in speaking of some accident or circumstance which is not essential to the thing, but is yet necessary for the production of it.

CONDITION (*Law*) a bridle or restraint annexed to a thing, so that by the non-performance of it the party shall receive prejudice or loss, but by the performance benefit and advantage. Conditions are of different kinds, i. e.

—*Conditions in a deed*, or *express*, when joined by express words to a feoffment, lease, or other grant.—*Conditions in law*, or *implied*, when, as in the case of granting any office, the law allows the grantor to dispossess the grantee of his office if he do not justly execute all things belonging to it.—*Condition precedent*, when a lease or an estate is granted to one for life, upon condition that if the lessee pay to the lessor a certain sum on such a day, then he shall have fee simple.—*Condition subsequent*, when a man grants to another his manor in fee, upon condition that the grantee shall pay him on a certain day such a sum, or his estate shall cease.—*Conditions inherent*, such as descend to the heir with the land granted.—*Condition collateral*, that which is annexed to any collateral act.—*Conditions affirmative*, which consist of doing something.—*Conditions negative*, which consist in not doing.—*Conditions copulative*, which require the doing several things.—*Condition disjunctive*, when one of several things is required to be done.

CONDITIONS, Equation of (*Flux.*) certain equations in the Integral Calculus, of this form, $\frac{\dot{A}}{y} = \frac{\dot{B}}{x}$, useful in ascertain-

ing whether a proposed fluxion will admit of finite integration or a finite fluent.

CONDITIONS of Peace (*Polit.*) the terms upon which peace is concluded.

CONDITION (*Vet.*) a phrase of the turf, implying the particular good state of a horse, in point of strength, make, and general appearance, which renders him peculiarly fit for the purpose to which he is destined. The term is used either in a good or a bad sense, as a horse may be in good or bad condition.

CONDITIONAL conjunctions (*Gram.*) those which express some condition, as *if, unless, provided, &c.*

CONDITIONAL Propositions (*Log.*) are propositions consisting of parts connected by the conditional particle *if.*

CO'NDORIN (*Com.*) a small weight which the Chinese, particularly those at Canton, use in weighing the silver received and paid in trade.

CON dolce maniera (*Mus.*) an Italian phrase used in music books, signifying after a sweet and delicate manner.

CONDUCT (*Law*) is used in the phrase *safe conduct*, to signify the security given by a prince, under his Great Seal, to a stranger for his quiet coming into and passing out of the realm. A safe conduct is given to enemies, a passport to friends or subjects.

CONDUCT safe (*Mil.*) a guard of soldiers who serve to protect any individual or individuals from the attacks of a hostile force.

CONDUCTEUR (*Mil.*) a person entrusted with the conveyance of military stores, &c. *Conducteur* signifies also one who acts as a guide to an army.

CONDUCTIO (*Med.*) a spasm or convulsion, according to Cælius Aurelianus.

CONDUCTOR (*Mil.*) an assistant to a commissary of military stores, to conduct depôts or magazines from one place to another.

CONDUCTOR (*Mus.*) he who superintends and conducts the performances in a concert.

CONDUCTOR (*Surg.*) otherwise called a *Director*, a surgical instrument which serves to conduct or direct the course of the knife on several occasions.

CONDUCTOR (*Elect.*) a term first applied by Dr. Desaguliers to those substances which are capable of receiving and transmitting electricity, in distinction from *electric*, in which the matter or virtue or electricity may be accumulated or retained.—*Prime Conductor* is an insulated conductor so connected with the electrical machine as to receive the electricity immediately from the excited electric.

CONDUCTOR of Lightning (*Elect.*) a pointed metallic rod which was contrived by Dr. Franklin to be fixed to the upper parts of buildings, to secure them from the effects of lightning.

CONDUCTOR, marine (*Mar.*) in French *paratonnerre*, a thick metal wire, generally of copper, extending from above the maintop-gallant-truck into the water, for the purpose of defending the ship from lightning.

CONDUIT (*Mech.*) a pump or water-course for the conveyance of water.

CONDUPLICA'TIO (*Rhet.*) a figure of speech in which, by reason of amplification and illustration, the same word or words are repeated.

CONDUPLICA'TIO (*Bot.*) doubling together, a term in veneration or foliation; *vernata conduplicata*, conduplicate leafing, is said of a bud when the two sides of a leaf are doubled over each other at the mid-rib, as in the Rose, Ash, Walnut, &c. This term is also applied to the sleep of plants; *conduplicans somnus* is when the leaves, during the night, fold together like the leaves of a book.

CONDUR (*Orn.*) a large kind of American vulture, the *Vultur gryphus* of Linnæus, measuring, with the wings extended, from tip to tip, 12 or 16 feet. It preys on birds, lambs, kids, and even children. Two are said to be able to kill and devour a cow. When passing near the ground they make a tremendous deafening noise.

CONDURDUN (*Bot.*) a plant which, when hung about the neck, represses strumous swellings. *Plin.* l. 26, c. 5.

CONDU'RI (*Com.*) a Malayan name for a small bean used in weighing gold and silver.

CO'NDYLE (*Anat.*) vide *Condylus*.

CONDYLOIDÆ (*Anat.*) Apophyses, or what are called *Productions*, more commonly *processes*.

CONDYLO'MA (*Med.*) *κόνδυλίωμα*, from its resemblance to *κόνδυλος*, a joint; a tubercle or callous eminence which rises in the folds of the *anus*, or a hardening and swelling of the *rugæ*. These tumours also frequently happen about the orifice of the *uterus*, and other parts, and have different names, as that of *ficus, crista, or thymus*, according to their resemblance to the fig, &c. *Cels.* l. 16, c. 18.

CO'NDYLUS (*Anat.*) *κόνδυλος*, a knot in any of the joints, formed by the epiphysis of a bone; in the fingers it is called the knuckle.

CONE (*Geom.*) from the Greek *κωνίος*, is, according to Euclid, a solid figure, having a circle for a base, and being produced by the entire revolution of a right-angled triangle about its perpendicular leg, called the axis of the cone, as in *fig. 1*, where ABV is the cone, DV the axis, and ACB

the circular base. When the axis is greater than the base of the triangle or the diameter of the circular base of the cone, namely, ADB, the cone is said to be *acute-angled*, *fig. 4*, i. e. the angle at the vertex AVB is acute; but if the axis be less than the diameter of the base, then AVB would be an obtuse angle, and the cone an *obtuse-angled cone*, *fig. 5*; if they be equal, then the angle AVB would be a right angle, and the cone *right-angled*, *fig. 6*. Cones are moreover divided into *right* and *scalene*, according to the position of the axis in respect to the base: if the axis be perpendicular, as in *fig. 1*, it is a *right cone*; but if the axis be not perpendicular, it is a *scalene* or *oblique cone*, as LMNO, *fig. 2*, where MO is oblique in respect to LN.—*Frustum of a cone* is that which is formed by cutting off the upper part of a cone by a plane parallel to the base, as ABCD in *fig. 3*.—*Cones of the higher kind* are those whose bases are circles of the higher kinds.

CONE of Rays (*Opt.*) includes those rays which fall from any point of a radiant on the surface of a glass, as in the annexed figure, where A is the point in any object, from which the rays fall on the surface of the glass BCD, then BCDA is the cone of rays.

CONE (*Bot.*) the fruit of several evergreen trees, as of the Fir, Pine, Cedar, Cypress, &c. so called from its conical shape, being broad at the base, and tapering towards the end. It is composed of woody scales, that are usually open, each of which has a seed at the end. Linnæus has given to this fruit the name of *Strobilus*; but this term is of more extensive signification, comprehending several fruits, as that of the *Magnolia*, not commonly distinguished by the name of *cone*.

CONE (*Con.*) the *Comus* of Linnæus, a beautiful sort of shell, inhabited by the *Limax*, which is generally found on rocky shores. These shells mostly bear the highest price of any, one species being valued as high as a hundred pounds.

CONESSI (*Bot.*) a sort of bark which is reckoned a specific in diarrhœas. It is a production from the tree called in the Linnean system the *Nerium antidys entericum*.

CON o senza violini (*Mus.*) Italian, signifying either with or without violins.

CONY-BURROWS (*Law*) places where conies breed and haunt. Commoners cannot lawfully dig up coney-burrows for a common.

CONFALON (*Ecc.*) a confraternity of seculars in the church of Rome, called Penitents.

CONFARREATIO (*Ant.*) a solemnization of marriage by the offering made with the bridal cake. *Plin.* l. 18, c. 2.

CONFECTA (*Med.*) confects, or seeds crusted over with dry sugar.

CONFECTIO (*Med.*) a medicinal composition of gums, powders, syrups, &c. made up into one substance.

CONFECTOR (*Cook.*) a maker and seller of confects and sweetmeats.

CONFEDERACY (*Polit.*) an alliance between princes and states, for their defence against a common enemy.

CONFERENCE (*Polit.*) a discourse held between several persons on some matter of public interest.

CONFERTUS (*Bot.*) crowded, or clustered; an epithet for leaves, branches, or a whorl; *conferta folia*, are leaves so copious as to occupy the whole of the branches, scarcely leaving any space between, as in the *Antirrhinum*, *Lunaria*, &c.; *conferti rami*, are branches crowded close, in a similar manner; *confertus verticillus*, is a whorl, in which the peduncles, or flowers, stand as it were squeezed close together.

CONFERTVA (*Bot.*) River-Weed, a genus of plants, Class *Cryptogamia*, Order *Algæ*.
Species. Withering has given upwards of one hundred and twenty species of the *Conferva* of British growth. The *Conferva corallina* is remarkable for its singular irritibility; for when quite fresh, and immersed into fresh water, several fibres have been observed to move in a horizontal direction, with a quick convulsive twitch, and then to stop suddenly, which they will continue to do for some time. The same effect is not observable in salt water.

CONFESSIO (*Ecc.*) 1. The confessional. 2. The office of confession. *Card. Bon. Rev. Liturg.* l. 2, c. 5.

CONFESSIO of faith (*Ecc.*) a public declaration of one's faith, or the faith of any particular community, as—*Confession of Augsburg*, or the articles of public faith which were drawn up by Luther, and presented to Charles V. at the diet of Augsburg.—*Auricular confession*, a private confession in the Romish church, which every man makes to his confessor; so called because it is made by whispering in his ear.

CONFESSION (*Rhet.*) vide *Concessio*.

CONFESSIO (*Ecc.*) or *Confessional*, the chair in which the priest sits to hear confessions. *Harnulf.* l. 4, c. 27.

CONFESSOR, *Father* (*Ecc.*) a priest of the Romish church who hears the confessions of penitents, and gives them absolution.

CONFESSORS (*Ecc.*) those who sealed the confession of their faith by their blood. *Anastas. Bibl. in S. Fab. Sidon. Apollin.* l. 7, ep. 17, &c.

CONFIGURATION (*Phy.*) the outward figure which bounds bodies, and gives them their exterior aspect or appearance, and by which bodies are principally distinguished from each other.

CONFIGURATION (*Astrol.*) the conjunction or mutual aspect of stars.

CONFIRMANTIA (*Med.*) strengthening medicines, or medicines which tend to confirm the strength of the body,

or any part of it; also medicines which fasten the teeth in the gums.

CONFIRMATIO (*Rhet.*) *βεβαιωσις*, a figure of speech, which consists in giving strength or force to the things which have been advanced. *Cic. de Invent.* l. 1, c. 24; *Quintil.* l. 4, c. 3.

CONFIRMATIO (*Polit.*) the rendering any title, claim, treaty, or public act, valid and indisputable.

CONFIRMATIO (*Ecc.*) a holy rite or ceremony in the Christian church, whereby baptized persons are confirmed in a state of grace, and take upon themselves their baptismal vow. *Tertull. de Præscript.* c. 40; *de Baptis.* c. 7; *Cyprian. epist.* 70—73; *Cyrril. Catech.* l. 2, c. 3; *Ambros. de Initiand.* c. 6; *Dionys. de Eccles. Hierarch.* c. 2; *Aleuin. de Offic. divin.*—*Confirmation* is performed by the bishop, according to the rites of the Church of England, by laying of hands on all such as, on application, shall be found duly qualified, in point of age and Christian knowledge, to be admitted to this ceremony.

CONFISCATE (*Law*) forfeited to the public fisque, or king's treasury; as, the goods found in the possession of a felon, which he disavows.

CONFLUENT (*Bot.*) *confluens*, rendered by Withering *thronging*; is an epithet for leaves or lobes; *folia confluentia* are leaves united at the base, growing in tufts so as to leave the intermediate parts of the stem bare; *lobi confluentes*, lobes running one into another, in opposition to distinct.

CONFLUENT Small-pox (*Med.*) vide *Variola*.

CONFLUENTIA (*Med.*) a term used by Paracelsus, to express the conjunction or confederation of the microcosm with the stars; also of a disease with the remedies.

CONFORMATION (*Anat.*) a term applied to the parts which compose the human body; hence, *mal-conformation*, to denote some defect in the first rudiments, whereby a person comes into the world crooked, or with some of the viscera, &c. unduly proportioned; as when persons are subject to incurable asthma from too small a capacity of the thorax, or the like.

CONFORMIS (*Bot.*) an epithet signifying, in the same form, or, in the same way; *folium conforme*, a leaf in all parts the same; *torsio conformis*, the twisting of a stem always the same way.

CONFORMIST (*Ecc.*) one that conforms to an establishment, or an established form of church discipline, particularly that of the Church of England; the seceders, or dissenters from whom, are known by the name of Non-conformists.

CONFORTANTIA (*Med.*) comforting medicines.

CONFRAIRIE (*Ecc.*) or *Confrérie*, a fraternity, brotherhood, or society; as, the *Confrairie de St. George*, or *les chevaliers de la bleu gartier*, the honourable society of the Knights of the Garter.

CONFRAIRES (*Ecc.*) or *Confrères*, brethren in a religious house; fellows of one and the same society. *Stat.* 32 H. 8, c. 24.

CONFRERES (*Ecc.*) vide *Confratres*.

CONFRACTIO (*Med.*) the reducing of any thing to powder by rubbing it with the hands.

CONFRONTE (*Her.*) an epithet in blazoning, signifying facing one another, or full-faced.

CONFUSÆ FEBRES (*Med.*) a sort of fevers mentioned by Bellini, which come together alternately in the same person, but do not keep their periods and alterations so exactly as to be easily distinguished from one another.

CONFUSANEUS PANIS (*Archæol.*) coarse brown bread.

CONFUSIO (*Med.*) a disorder of the eyes, which happens when, upon a rupture of the internal membranes which include the humours, they are all confounded together.

CONFUSIO (*Chem.*) a mixture of liquid or fluid things.

CONFUSION (*Log.*) a term applied to the understanding when the idea of a thing is presented imperfectly, and mingled with that of other things.

CONFUSION (*Law*) *Property by confusion*, where the goods of two persons are so intermixed that the several portions cannot be distinguished.

CONFUTATIO (*Rhet.*) *ἀσπίς*, a disproving of that which has been advanced: an answer to objections. *Cic. ad Heren.* l. 1. c. 3.

CONG. (*Med.*) an abbreviation for *Congius*.

CONGE' (*Mil.*) a term which formerly signified leave of absence.

CONGE (*Archit.*) a moulding which imitates the ring at the end of a wooden pillar.

CONGEABLE (*Law*) lawful, or lawfully done; done with permission; as entry congeable, &c.

CONGE' D'ACCORDER (*Law*) French for leave to accord or agree, mentioned in the statute of fines. *Lit. Sect.* 420.—*Congé d'élire*, French for leave to choose; the King's licence or permission to a Dean and Chapter to choose a bishop.

CONGELA'TI (*Med.*) persons afflicted with a catalepsy, so called because they seem to be deprived of all sensation.

CONGELA'TION (*Chem.*) a condensation of any fluid or liquid substance by means of cold.

CONGELATIVES (*Med.*) medicines which refrigerate and inspissate.

CONGENERES (*Anat.*) an epithet for muscles which are of the same kind or office.

CONGER (*Ich.*) *κονγρός*, *Conger-Eel*, the *Muraena conger* of Linnæus, an eel of extraordinary size, and extremely voracious, which preys on carcases and on other fish. It is said that congers sometimes weigh a hundred pounds. *Aristot. Hist. Anim.* l. 8, c. 15.

CONGER (*Com.*) or *Congre*, probably from *congruo*, to meet together; a society of booksellers who join together in the publication of any work or works.

CONGES (*Archit.*) vide *Conge*.

CONGESTION (*Med.*) a collection of humours gradually formed.

CONGESTIVUS LOCUS (*Archit.*) false or loose ground, unfit for the foundation of a building.

CONGESTUS (*Bot.*) an epithet signifying heaped together; *panicula congesta*, a panicle which has a great number of flowers, but not so squeezed or compressed as the *confertus*, or crowded.

CONGIARIUM (*Ant.*) a largess sometimes made to the people by the emperors, in order to gain their favour. It is distinguished from the *Donativum*, which was made only to the soldiers. *Liv.* l. 25, c. 2; *Sueton. in Aug.* c. 41; *Ursat. de Not. Roman. apud Græv. Thes. Antiq. Roman.* tom. 11, p. 636.

CONGIUS (*Ant.*) or *Congium*, from *congerendo*, i. e. increasing by augmentation; a liquid measure answering to the Chus of the Athenians, containing six sextaries, i. e. ten pints of wine, and nine of oil, equal to about our gallon; or at least somewhat more than our pottle. According to Pliny, Tully's son drank two of these at a draught. *Isid. Orig.* l. 14, c. 25.

CONGIUS (*Archæol.*) an ancient measure containing about a gallon and a pint.

CONGIUS (*Med.*) a gallon or eight pints.

CONGLACIATIO (*Med.*) the same as *Coagulation*.

CONGLOBATA GLANDULA (*Anat.*) a conglobate gland, or a round gland formed by the contortion of the lymphatic vessels.

CONGLOBATE (*Bot.*) an epithet for cotyledons which are formed into a sphere.

CONGLOMERATA GLANDULA (*Anat.*) a conglome-

rate gland, or a gland composed of a number of glomerate glands, whose excretory ducts all unite in one common duct.

CONGLOMERATE (*Bot.*) an epithet for the peduncle; *pedunculus conglomeratus*, a peduncle which bears flowers on a very short pedicle, closely heaped and compacted together without order, as in *Dactylis glomerata*.

CONGLUTINANTIA (*Med.*) healing medicines, or such as unite parts that are disjointed by accident.

CONGREGATION (*Phy.*) a term sometimes used to denote the least degree of mixture in which the parts of the mixed body do not touch each other more than in one point. This sort of mixture is said to be peculiar to water and other fluids.

CONGREGATION (*Ecc.*) an assembly of persons who meet together for purposes of divine worship.

CONGREGATIONALISTS (*Ecc.*) a sect of Protestants who reject all Church-government except that of a single congregation with a pastor at the head. They correspond to what are called Independants, in England.

CONGRESS (*Polit.*) an assembly of envoys, commissioners, deputies, &c. from different courts, meeting to agree on terms of political accommodation and pacification.—*Congress*, a general assembly of deputies from the different states in the republic of America.

CONGRESS (*Law*) a trial made by appointment of a judge, in the presence of surgeons and matrons, to determine whether a man be impotent or not, in order to dissolve a marriage.

CONGRUITY (*Rhet.*) signifies, in general, suitableness and propriety; but is applied, particularly, to any theme or composition which is clothed in apt and coherent language, free from any fault of grammar.

CONGRUITY (*Math.*) a term applied to figures, lines, &c. which exactly correspond when applied the one to the other.

CONGRUITY (*Eth.*) a certain fitness or apt relation between things, which determines their suitableness to form a coalition.

CONGRUS (*Ich.*) vide *Conger*.

CONGYLIS (*Bot.*) a rape root.

CONIC (*Math.*) an epithet for what appertains to a cone.

CONIC Sections (*Geom.*) imply the curve lines and plane figures which are produced by the intersection of a plane with a cone. A cone is a solid contained by a conical superficies and a circle; thus suppose, as in *fig. 1*, a straight line, *A V D*, be drawn through the point *V*, and extended indefinitely both ways, and this point remain fixed while the line *A V D* be moved round the whole circumference of the circle, two superficies will be generated by its motion, called a *conical superficies*; and these mentioned together are called *opposite superficies*. [vide *Cone*]

Sections. If a cone be cut by a plane, their common intersection is called a conic section, of which there are five different kinds; namely, the Triangle, Circle, Ellipse,

Parabola, and Hyperbola, although the three last only are peculiarly called Conic Sections.

Triangle. If the cutting plane pass through the vertex of the cone and any part of the base, the section will be a triangle, as *V A B*, *fig. 2*.

CONIC SECTIONS.

Circle. If the plane cut the cone parallel to the base, or make no angle with it, the section will be a circle, as BAD , *fig. 3*; but if the oblique cone, VAB , or Vab , *fig. 4*, having the circular base AEB , or aeb , be so cut by a plane, DEC , that the angle $D = \angle B$, or the $\angle C = \angle A$, then the cone is said to be cut by this plane in a *subcontrary position*, and the section in this case, DEC , which is always a circle, is called the *subcontrary section*.

Ellipse. The section is an ellipse which cuts the cone obliquely through both sides, or when the plane is inclined to the base in a less angle than the side of the cone, as DAB , *fig. 5*.

transverse and conjugate. The *transverse diameter* is that which passes through the principal vertices, and is otherwise called the *axis*, as AB in the ellipse and hyperbola, *fig. 8, 9*, and Ab in *fig. 6* or *10*. In the ellipse this is the longest diameter, but in the hyperbola it is the shortest. The *conjugate diameter* is the line drawn through the centre, and parallel to the tangent of the curve at the vertex; thus, HI is the conjugate of the axis AB in the ellipse and hyperbola, *fig. 8, 9*, and is parallel to the tangent AM at A ; and FG , a conjugate to DE , is parallel to the tangent at D , *fig. 8, 9*. Hence the conjugate of the axis is perpendicular to the same, but the conjugates of all other diameters are oblique to them.

Parabola. The section is a parabola when the cone is cut by a plane, as ADE , *fig. 6*, parallel to the side VB , or when the cutting plane and the side of the cone make equal angles with the base.

Hyperbola. The section is an Hyperbola, as DAB , *fig. 7*, when the cutting plane makes a greater angle with the base than the side of the cone does; and if the plane be continued to cut the opposite cone, this latter section is called the *opposite Hyperbola* to the former, as BbE . Hyperbolas are said to be mutually conjugate where two pairs of opposite hyperbolas come together, as in *fig. 15*, where the curves DAB , FbG , and dae , fbg , are mutually conjugate.

Parts of the Sections. The principal parts of the three sections, namely, the Ellipse, Parabola, and Hyperbola, are as follow:—

Vertex. The Vertices of any section are the points where the cutting plane meets the opposite sides of the cone, or the sides of the vertical triangular section, as A and B , *fig. 5, 6, 7*; hence the ellipse and opposite hyperbolas have each two vertices, but the parabola only one, unless the other be considered to be at an infinite distance.

Centre. The Centre is that point in a figure in which every straight line passing through it, and terminated by the curve, or opposite curves, is bisected; as C in the ellipse, *fig. 8*, and C in the hyperbola, *fig. 9*; but the centre of a parabola is infinitely distant from the vertex.

Diameter. The Diameter is any straight line passing through the centre, and terminated by the curve, or opposite curves, as AB and DE , *fig. 3, 5, 7*, or *fig. 8, 9*. The Diameters of the parabola are infinite, because they are drawn through the centre point at an infinite distance, and they are also parallel to the side of the cone, as Ab , *fig. 6*. The diameters are of two kinds; namely,

Ordinates. An Ordinate to any diameter is a line parallel to its conjugate, or to the tangent at its vertex, and terminated by the diameter and curve, as LE , which is parallel to AM , the tangent at the vertex A , in *fig. 9*; DK is also an ordinate to the axis AB and MN ; NO are ordinates to the diameter DE . Hence the ordinates of the axis are also perpendicular to it, but the ordinates of other diameters are oblique to them. The line LP and LE , on each side of the diameter AB , in *fig. 8*, is called the *double ordinate*.

Absciss. An absciss is a segment of a diameter contained between its vertex, and an ordinate to it, as AK or BL , and DN or EN , *fig. 8* and *10*. Hence, in the ellipse and hyperbola, every ordinate has two abscisses, but in the parabola only one; the other vertex of the diameter being infinitely distant.

Parameter. The Parameter of any diameter, otherwise called the *Latus rectum*, is the third proportional to any two conjugate diameters in the ellipse or opposite hyperbolas, or to any absciss and its ordinate in the parabola. From this relation Apollonius deduced one of the primary properties, by which the ellipse, hyperbola, and parabola, are distinguished, and from which they derive their names; thus, suppose GF to be an ordinate to the diameter AB of the ellipse or hyperbola BG , *fig. 11, 12*, ED to be the conjugate diameter, and BH the parameter, or third proportional, between AB and ED . Moreover complete the rectangle $LABH$, let LH meet FK in M , and let KN , the side of the rectangle KB opposite to BF , meet BH in N ; then, in *fig. 11*, the square of the ordinate FG is less than the rectangle under the absciss FB , and the parameter BH , by the rectangle MN , similar to LB , and having one of its sides equal to BF ; but, in *fig. 12*, the square of the ordinate FG is greater than the rectangle under the absciss BF , and the parameter BH , by the rectangle MN , similar to LB , and having one of its sides equal to BF . From this, $\epsilon\lambda\lambda\epsilon\psi\iota\epsilon$, deficiency, comes the name of Ellipse, in the first case; and from the $\upsilon\pi\epsilon\rho\beta\omicron\lambda\iota$, or excess, that of Hyperbola. On the other hand, the Parabola derives its name from $\pi\alpha\rho\alpha\beta\omicron\lambda\iota$, the equality which the square of HK , the ordinate, in *fig. 13*, bears to the rectangle under P and BK ; supposing ABC to be a parabola, BK the diameter, AG and HK , the ordinates to it, and P the parameter, or third proportional to BG , the absciss, and AG its corresponding ordinate.

Focus. The Focus, or Umbilicus, is that point in the axis where the ordinate is equal to half the parameter, as K

and L, *fig. 8, 9*, where DK or EL is equal to the semi-parameter. Hence the ellipse and hyperbola have each two foci, but the parabola only one.

Fig. 13.

Fig. 14.

Asymptote. The Asymptotes are two right lines which continually approach nearer and nearer to some curve, in such manner that, when they are both indefinitely produced, they are nearer together than by any assignable distance: suppose CP to be the diameter of the hyperbola RAS, and CD the semiconjugate to it, then, if FE be a tangent at the point A, and AE = AF = CD; then the lines CG, CG, drawn from the centre C, through the points E and F, will be the asymptotes to the hyperbola RAS, and may in like manner be produced so as to be the asymptotes to any opposite hyperbola. In the same manner the diagonals HCK and ICL, of the rectangle HIKL, are the asymptotes to the curves of the conjugate hyperbolas in *fig. 15*.

Fig. 15.

Directrix. The Directrix is a right line perpendicular to the axis of a conic section. [*vide Directrix*]

CONIC (*Bot.*) or *conical*, an epithet for a receptacle which is round, broad at the base, and tapering to a point like a cone, as in *Bellis*, the Common Daisy.

CONICAL (*Math.* & *Bot.*) *vide Conic*.

CONJECTA'NEA (*Ant.*) books which contain the conjectures of writers.

CONIFERÆ (*Bot.*) the fifteenth Order in Linnæus's Fragments of a Natural Method, and the fifty-first of his Natural Orders, containing the cone-bearing trees, as the Fir, Pine, Cypress, &c.

CONINGERIA (*Law*) a coney-burrow, or a warren of conies. *Inquis.* anno 47, ii. 3.

CONJOINED in *Lure* (*Her.*) an epithet for two wings joined together with their tips downwards, as in the annexed figure. [*vide Conjunct.*]

CONJOINT (*Mus.*) or *Conjunct Degrees*, two notes which immediately follow each other in the order of the scale, as *Ut, Re.*—*Conjoint tetrachords*, two tetrachords where the same chord is the highest of the one, and the lowest of the other.

CONJUNCT (*Her.*) or *conjoined*, an epithet for charges which are joined together, as "*Gules*, two lions conjoined under one head, gardant, argent; name *Kellum*."

CONISSA'LÆ (*Min.*) an old term for a class of fossils which were not inflammable, nor soluble in water; of which number was sand, and other gritty substances.

CONISTERIUM (*Ant.*) the place where the wrestlers, after they had been anointed with oil, were besprinkled with dust, that they might take the surer hold of one another. *Vitruv.* l. 5, c. 10.

CONJUGAL Rights, Restitution of (*Law*) a species of matrimonial suit, which may be brought either by the husband or the wife against the party who is guilty of the injury of subtraction, or of living in a state of separation.

CONJUGATES (*Rhet.*) an epithet for what comes from one original, as when from one word we argue to another of the same original; as "*Si risus gaudium est, ergo ridere est gaudere.*" *Cic. Top.* c. 9; *Quint.* l. 5, c. 10.

CONJUGATE (*Geom.*) an epithet to denote the junction of two lines, as a *Conjugate axis*, that which crosses another axis. [*vide Axis*].—*Conjugate Diameter*, the shortest axis in an ellipsis. [*vide Diameter*].—*Conjugate Hyperbolas*, hyperbolas having the same axes, but in contrary order. [*vide Hyperbola and Conic Sections*]

CONJUGATE (*Bot.*) *conjugatus*, an epithet for a leaf, or a raceme; *folium conjugatum*, a pinnate leaf which has only one pair of leaflets; *racemus conjugatus*, a raceme having two racemes only united by a common peduncle.

CONJUGATES (*Rhet.*) are such things as qualities, &c. which are derived from an original, as merciful, mercifully, from mercy.

CONJUGATES (*Log.*) is when from one word we argue to another, as "*If weeping is to sorrow, then to weep is to sorrow.*"

CONJUGA'TING (*Gram.*) the act of going through the inflection of a verb according to its several moods, tenses, and persons.

CONJUGATION (*Gram.*) signifies generally the coupling or yoking of things together, but particularly the inflection of verbs; also the inflections themselves.

CONJUGATION (*Anat.*) a term for a pair of nerves, or for two nerves arising together, and serving for the same operation, sensation, or motion.

CONIUM (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 2 *Digymia*.

Generic Characters. CAL. *umbel* universal; *partial* similar; *invulcre* universal many-leaved; *partial* halved; *perianth* proper.—COR. *universal* uniform; *proper* of five petals.—STAM. *filaments* five; *anthers* roundish.—PIST. *germ* inferior; *styles* two; *stigmas* obtuse.—PER. none; *fruit* nearly globose; *seeds* two.

Species. The species are of different sorts, as—*Conium maculatum*, *Cicuta*, *Cicutaria*, *Coriandrum*, &c. Common Hemlock, a biennial, native of Europe.—*Conium rigens*, &c. Fine-leaved Hemlock, a shrub, native of the Cape of Good Hope.—*Conium africanum*, seu *Caucalis*, &c. Rue-leaved Hemlock, an annual, native of Africa.—*Conium Royeni*, seu *Caucalis*, &c. native of Egypt.

CONJUNCT (*Med.*) an epithet for the immediate cause of a disease; also for those signs of a disorder which are pathognomic.

CONJUNCT Fiers (*Law*) in Scotch Law when several people are conjunctly infelt, or otherwise have a joint fee.

CONJUNCTI morbi (*Med.*) a name for two diseases which come together, and are distinguished into *conexi* and *consequentes*, the former subsisting at the same time, and the latter following one another.

CONJUNCTION (*Astron.*) a termed applied to two planets which meet in the same degree of the zodiac, which is one of the principal aspects, marked thus [♌]. Conjunction is either apparent or true.—*Apparent conjunction* is when a right line, drawn through the centre of two planets, does not pass through the centre of the earth.—*True*, or *real conjunction*, is when a right line, passing through the centres of two planets, and being produced, passes also through the centre of the earth.

CONJUNCTION (*Gram.*) is a part of speech which joins words and sentences, and is distinguished, according to its use, into—*Copulative conjunctions*, because they join both the words and the sense, as *and*, *also*, &c.—*Disjunctive conjunctions*, are such as join the words, but disjoin things in the sense, as *neither*, *nor*, *either*, *or*, &c.—*Causal conjunctions*, which denote a reason, as *because*, *for*, &c.—*Conditional conjunctions*, which express a condition, as *if*, *unless*, &c.—*Enclitic conjunctions* are such, in Latin, as

throw back the accent on the syllable going before, as *que, ne, ve, &c.*

CONJUNCTIVA *tunica* (*Anat.*) vide *Adnata*.

CONJURATIO (*Law*) signifies, 1. An oath, and *conjurator*, one who is bound by the same oath; and *conjurare* is where several affirm a thing on oath. *Mon. Ang.* tom. 1, p. 207. 2. A plot, or compact, made by several persons, who combine by oath to do some public harm; but it is particularly applied to the secret compact which persons were supposed to enter into with the evil spirit to work some mischief. It differs from witchcraft, inasmuch as conjurers endeavour by enchantments to raise the devil, but witches bargain with the evil spirit to do what they desire of him. Sorcerers, on the other hand, try, by force of incantations, to produce strange effects above the ordinary course of nature.

CON Moto (*Mus.*) an Italian phrase in Music-books, signifying with agitation.

CONNA (*Bot.*) the *Cassia fistula* of Linnæus.

CONNARUS (*Bot.*) a genus of plants, Class 16 *Monadelphia*, Order 5, *Decandria*.

Generic Characters. CAL. *perianth* one-leaved.—COR. *petals* five.—STAM. *filaments* ten; *anthers* roundish.—PST. *germ* roundish; *style* cylindrical; *stigma* obtuse.—PER. *capsule* oblong; *seed* single.

Species. The species are trees and shrubs, as—*Connarus monocarpus*, *Rhus*, *Phaseolus*, Ceylon Sumach, a tree, native of the island of Ceylon.—*Connarus Africanus*, a shrub, native of Sierra Leone.—*Connarus Asiaticus*, seu *monocarpus*, seu *Phaseolus*, a shrub, native of the East Indies.—*Connarus decumbens*, seu *Hermannia*, a shrub, native of the Cape of Good Hope.—*Connarus pinnatus*, seu *Perim*, a shrub, native of the East Indies.—*Connarus Santaloides*, *Santaloides*, &c. a shrub, native of the East Indies.—*Connarus mimosoides*, a shrub, native of the islands of Nicobar.

CONNATE (*Bot.*) *connatus*; an epithet for leaves, filaments, and anthers; *folium connatum* is said of two leaves, which are so united at their bases as to have the appearance of one leaf, as in the Garden Honeysuckle. Filaments and anthers are also called connate when united into one body, as in the Class *Monadelphia* and *Syngenesia*.

CONNETA'BLE de France (*Polit.*) Constable of France; an officer under the old regime, who succeeded the Grand Sénéchal de France. It was originally not a military place of trust, but merely an office belonging to the King's Household.

CONNETA'BLE de France (*Mil.*) was a particular corps immediately under the command and direction of the Marshal of France, composed of a provost-general, four lieutenants, four exempts, and forty-eight mounted guards, who wore a nouqueton for the King's service.

CONNEXION (*Anat.*) the same as *Symphysis*; a sort of articulation. [vide *Articulation*]

CONNING (*Mar.*) or Cunning, the art of directing the steersman to guide the ship in her proper course.

CONNIVENS (*Bot.*) vide *Converging*.

CONNIVENTES GLANDULÆ (*Anat.*) those wrinkles which are found in the *Ilium* and *Jejunum* intestines.

CONNOISSE'UR (*Lit.*) a person well versed or thoroughly skilled in any science.

CONNUTRITIOUS (*Nat.*) that food which becomes habitual to a person from his particular diet.

CONOB'E'A (*Bot.*) the *Conopea aquatica* of Linnæus.

CONOCARPODEN'DRON (*Bot.*) the same as *Protea*.

CONOCAR'PUS (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* one-leaved; *divisions* subulate.—COR. *petals* five.—STAM. *filaments* either five

or ten; *anthers* globose.—PST. *germ* large; *style* single; *stigma* obtuse.—PER. none distinct from the seed; *seed* single.

Species. The species are shrubs, as the—*Conocarpus erecta*, seu *Manghana*, &c. seu *Foliis*, &c. seu *Alnus*, &c. seu *Alni*, &c. seu *Rudbeckia*, &c. seu *Innominata*, Jamaica Button-tree, native of Jamaica.—*Conocarpus procumbens*, seu *Rudbeckia*, native of Cuhā.—*Conocarpus racemosa*, seu *Mangle*, native of the Caribbees.

CONOCRA'MBE (*Bot.*) the *Theligionum conocrambe* of Linnæus.

CONO'DIS (*Com.*) a small coin used at Goa, and in all the kingdom of Cochin.

CONOID (*Geom.*) a figure resembling a cone, except that its sides are curved instead of straight: it is generated by the revolution of a conic section about its axis, and is therefore denominated an elliptical, hyperbolic, and parabolic conoid.

CONOIDES (*Med.*) an epithet for the Pineal gland, from its resemblance to a cone in figure.

CONOPE'A (*Bot.*) a genus of plants, Class 14 *Didynamia*, Order 2 *Angiospermia*.

Generic Characters. CAL. *perianth* one-leaved; *segments* erect.—COR. one-petaled; *tube* oblong; *upper lip* erect; *lower* trifid.—STAM. *filaments* four; *anthers* sagittate.—PST. *germ* roundish; *style* filiform; *stigma* two-lobed. PER. *capsule* roundish; *seeds* very many.

Species. The only species is *Conopea aquatica*, seu *Cono-bea*, &c. native of Guiana.

CONOPHORA (*Bot.*) the *Protea conocarpa* of Linnæus.

CONOPS (*Ent.*) a genus of animals, Class *Insecta*, Order *Diptera*.

Generic Character. Mouth with a proboscis; *antennæ* clavate.

Species. Insects of this tribe extract animal juices, and the species are distinguished into those that have a sucker geniculate at the base, and those that have a sucker geniculate at the base and the middle.

CONQUASSA'TION (*Med.*) a species of comminution, or an operation by which moist concrete substances, and the vegetables, fruits, &c. are by bruising in a mortar, as fresh affusion of some moist liquor, reduced to a soft pulp.

CONQUEST (*Law*) a feudal term for *purchase*.

CONRE'TA *pellis* (*Archæol.*) a skin, or hide dressed.

CONSANGUINEO (*Law*) a writ mentioned in the *Register Originalium Brevium*. [vide *Cosinage*]

CONSANGUINEUS *frater* (*Law*) a brother by the father's side.

CONSANGUINITY (*Law*) a kindred by blood and birth, in distinction from *affinity*, which is a kindred by marriage. [vide *Law*]

CONSCIENCE, *courts of* (*Law*) courts for the recovery of small debts.

CONSCRIPTA *Veterum* (*Ant.*) the writings of the ancients.

CONSCRIPTI (*Ant.*) or *Patres conscripti*, Conscript Fathers; an appellation for the Roman senators, who were so called because they were enrolled from the Equestrian order or the knights, for the purpose of completing the number of the senators. *Liv.* 1. 2. c. 1.

CONSCRIPTS (*Mil.*) a revolutionary term applied to the recruits for the French army.

CONSECRA'TIO (*Ant.*) was a religious rite among the Romans, by which they set any person or thing apart for sacred purposes, as their high priests, &c.; or made it sacred, and a fit object of divine worship: as the emperors, their wives, or children, who, in this manner, were enrolled among the number of the gods. This was sometimes called *apotheosis*, but on medals it is distinguished

by the name of CONSECratio, and is symbolically represented either by an altar, as in the subjoined figure 1;

Fig. 1.

Fig. 2.

or by the effigy of a person mounting to heaven on the back of an eagle, as fig. 2; and in other forms. The first of these figures represents the reverse of a medal of Claudius Gothicus, the second that of Salomonius, the son of Gallienus. *Dionys. Ant.* l. 2; *Liv.* l. 1, c. 16; *Sueton. Claud.* c. 2; *Herodian* l. 4, c. 2; *Firmic. de Error. Prof. Rel.*; *Lactant. de Fal. Rel.* l. 1, c. 15; *Gyrald. de Var. Sepél. Rit.* c. 16; *Panvin. Pastor.* l. 2; *Guther. de Jur. Man. apud Græv. Thes. Antig. Rom.* vol. xii.

CONSECRA'TION (*Ecc.*) a ceremony in the Christian Church of hallowing, or making sacred, particular places, that are set apart for holy purposes.

CONSECTARIUM (*Rhet.*) consecratory; a brief argument, wherein the conclusion necessarily follows the antecedent. *Cic. de Fin.* l. 3, c. 7.

CONSECTARY (*Geom.*) some consequent truth obtained from a demonstration.

CONSECUTION month (*Chron.*) a name given to the lunar month, or the space between the conjunction of the moon with the sun.

CONSECUTIVE (*Mus.*) an epithet for two chords, one of which immediately succeeds the other.

CONSENT (*Eth.*) our simple approbation of means, as we judge them proper for our purpose when they are placed within our reach, or power; and those means, when they are placed within our reach and power, employ the two acts of the will, called *Eliciti* and *Imperati*.

CONSENT of Parts (*Anat.*) the mutual sympathy and correspondence between the several parts of the body; as when one nerve is affected with the hurt that is received by another; thus the head is mostly affected by what passes amiss in the stomach.

CONSENTIA (*Ant.*) sacrifices to the deities, called *Consententes*. [vide *Deity*] *Fest. de Verb. Signif.*

CONSEQUENCE (*Log.*) an inference, or conclusion.

CONSEQUENCE (*Astron.*) or in *Consequentia*. vide *Consequentia*.

CONSEQUENT (*Log.*) the last part of an argument, in distinction from the former part, called the *antecedent*.

CONSEQUENT (*Math.*) the latter of two terms of proportion, in distinction from the former, or antecedent, as in the ratio $a : b$, a is the antecedent, and b the consequent.

CONSEQUENTIA *Signa* (*Astron.*) the signs of the zodiac, as they follow in order from east to west; whence the direct motion of the planets is called a motion in *Consequentia*, in distinction from the motion in *Antecedentia*, or the contrary order. [vide *Antecedentia*]

CONSEQUENTIAL LOSSES (*Law*) or consequential damages: such losses or damages as arise out of a man's act, for which, according to a fundamental principle in law, he is answerable, in case he could have avoided them: as if a man should keep a savage beast, it is at his peril to keep him up; and he is answerable for all the consequences of his breaking loose.

CONSERVATIO (*Med.*) pickling, or preserving from putrefaction.

CONSERVATIVA *medicina* (*Med.*) that part of medicine which relates to the preservation of health.

CONSERVATOR (*Law*) a standing arbitrator appointed to adjust differences that should arise between two parties.—*Conservator of the Peace*, an officer whose special charge

it was to see that the king's peace was kept. This office is now performed by all judges and magistrates, but particularly by what are now called *Justices of the Peace*.—*Conservator of the Truce and Safe Conducts*, an officer appointed by the King's letters patent, to take charge of all offences done on the high seas out of the liberties of the Cinque Ports. *Stat. 2 H. 5*, st. 1, c. 6.—*Conservators*, in the Roman Catholic universities, are two persons, one of whom is the *conservator* of the royal privileges, or those granted by the King, taking cognizance of all causes between the regents, students, &c.; and the other the *conservator* of the apostolical privileges, or those granted by the pope.

CONSERVATORII (*Mus.*) Italian for the public music-schools in Italy.

CONSERVATORY (*Cus.*) a place to keep or lay up things that are to be preserved.

CONSERVATORY (*Hort.*) a place where plants are kept, which is commonly attached to the green-house.

CONSERVE (*Med.*) a medicine of the consistence of a pulp, prepared of flowers, herbs, and fruits.

CONSIDERATIO *Curia* (*Law*) the judgment of the Court.

CONSIDERATION (*Law*) the material cause of a bargain, or contract, either expressed or implied, without which the latter would not be effectual and binding.

to CONSIGN (*Com.*) vide *Consignment*.

CONSIGNATION (*Law*) the putting a sum of money into sure hands till the decision of a controversy, or lawsuit, of which it is the subject matter.

CONSIGNE (*Mil.*) a French term for a person who is not permitted to go beyond certain limits, or to leave a house wherein he is detained by superior command.

CONSIGNE'E (*Com.*) he to whom goods are sent, or consigned, for the purpose of being disposed of by sale.

CONSIGNMENT of goods (*Com.*) the sending over of goods to a correspondent, or factor, to have them disposed of at the best market.

CONSIGNMENT (*Law*) vide *Consignation*.

CONSIGNOR (*Com.*) he who consigns goods to another for sale.

CONSLIGO (*Bot.*) Hellebore.

CONSILIUM (*Med.*) the advice given by one or more physicians relative to the state of a patient.

CONSILIIUM (*Law*) or *Dies Consilii*, a time allowed for the accused to make his defence, and now more commonly used for a day appointed to argue a demurrer.

CONSIMILI casu (*Law*) a writ of entry which, with the writ in *Casu proviso*, lay not at common law, but are given by statute, *Gloc. 6 Ed. 1*, c. 7. *Westm. 2*, 13 *Ed. 1*, c. 24, for the reversioner after alienation. *F. N. B.* 205, 206.

CONSISTENT bodies (*Phy.*) bodies that hold together, and preserve their form, by their own solidity, in distinction from fluids, that must be kept within a certain boundary.

CONSISTENTIA (*Med.*) in respect to the state of a disease signifies its acme; but when applied to the humours, or excrements, it imports its consistence, or power of holding together.

CONSISTOR (*Archæol.*) a magistrate.

CONSISTORIUM (*Ant.*) a council-house, or place of audience. *Sidon.* l. 2, ep. 2; *Anmian.* l. 14, c. 7; *Orderic. Vital.* l. 2.

CONSISTORY (*Ecc.*) the principal court held by the Pope with much splendour and solemnity.—*Consistory* or *Consistory-court*, the session or assembly of ecclesiastical persons, held by the bishop, his chancellor, or his commissary, for the determination of ecclesiastical causes. *Stat. 24, H. 8*, c. 12; 4 *Inst.* 338.—*Consistory* signifies likewise the tribunal, or place of justice, where the consistory courts are held.

CONSOLATIO (*Rhet.*) one of the topics which consists in assuaging the grief of another. *Cic. Or.* l. 3, c. 35.

CONSOLE (*Archit.*) *ancon*; an ornament cut upon the key of an arch, in the form of a bracket or shoulder-piece, as in the annexed figure, having a projecture, and serving to support a cornice or busts, vases, &c. *Vitruv.* l. 3, c. 2; *Philand.* l. 8, c. 6; *Bald. Lex. Vitruv.*

CONSO'LIDA (*Bot.*) another name for *Gomfrey*.

CONSOLIDA'NTIA (*Med.*) Medicines calculated for promoting the cure of wounds, by removing the several impediments to their agglutination.

CONSOLIDA'TION (*Nat.*) the uniting or hardening of any substance into a solid mass.

CONSOLIDATION (*Surg.*) the uniting strongly together the parts of broken bones, or the lips of wounds.

CONSOLIDATION (*Law*) in Civil Law, the conjunction of the usufruct with the propriety of the thing. 2. In Common Law, the joining two benefices in one.

CONSOLS (*Com.*) a sort of transferable stocks. [vide *Funds*]

CONSONANCE (*Gram.*) is when two words have a similarity of sound at the end that causes them to rhyme.

CONSONANCE (*Mus.*) an agreement of two sounds, one grave and one acute, which are combined together in such a manner as to produce harmony. A unison is the first consonance, an eighth is the second consonance, &c. When the interval of a consonance is invariable, it is called *perfect*; but when it may be either major or minor, it is *imperfect*.

CONSONANT (*Mus.*) an epithet for those intervals which produce consonant concords.

CONSONANT (*Gram.*) a letter which, having no sound by itself, requires the union of a vowel.

CONSONANTE (*Mus.*) an Italian epithet for all agreeable intervals.

CONSORT (*Mus.*) a piece of music, consisting of three or more parts, mostly written *concert*.

CONSORT (*Mar.*) any ship keeping company with another.

CONSPYRACY (*Law*) originally signified an agreement of two or more persons to indict one, or procure him to be indicted; but it is now generally employed to denote an agreement of two or more persons to do any thing that may wrongfully prejudice a third person, either in the case of subjects conspiring against their prince, or workmen against their masters, &c.—*Conspirations*, or a writ of conspiracy, which a person has after his acquittal, against others who have conspired to indict him, or cause him to be indicted. 33 *Ed.* 1, stat. 2; 7 *H.* 5; 18 *H.* 6, c. 12.

CONSPIRING Forces (*Mech.*) such forces as conspire or combine to act on bodies so as to impel them in a certain direction

CON SPIRITO (*Mus.*) an Italian phrase in music books, signifying to be played with spirit.

CONSTABLE (*Law*) in French *Connétable*, from the Latin *comes stabuli*, signified a master of the horse, or a commander of the cavalry. It has since been employed to denote a civil officer, as—*Constables of the Hundred*, *Chief* or *High Constables*, in distinction from *Constables of the Bille*, or *Petty Constables*, who act under the Head Constable, for the preservation of the peace. *Stat. of Winton and Winchester*; 13 *Ed.* 1, c. 6; 3 *Ed.* 4, c. 1; 5 *Eliz.* c. 4.—*Constable* is likewise a name of particular officers mentioned in our statutes and elsewhere, as—*Lord High Constable of England*, an officer of the highest dignity and importance in the realm, who took place of the Earl Marshal in the Marshal's court; and was also the leader of the king's armies. 13 *R.* 2, st. 1, c. 2; *Mad. Hist. of the Excheq.* p. 27.—*Constables of Castles*, Keepers or Governors of Castles, such as the *Constable of the Tower*, and the *Constable of London*, &c., some of which offices remain to this day. They are likewise called *Constables of the Fees*. *Mag. Chart.* cc. 17. 20; *Stat. West.* 1 (3. *Ed.* 1),

c. 13; 5 *H.* 4, c. 10; 2 *Inst.* 31.—*Constable of the Exchequer*, mentioned in *Stat. de District. Scaccar.*; 51 *H.* 3, st. 5; *Flet.* l. 2, c. 31.—*Constable of the Staple*, mentioned in *Stat.* 27 *Ed.* 3, c. 8; 15 *R.* 2, c. 9; 23 *H.* 8, c. 6.

CONSTANT Quantities (*Math.*) such as remain the same, while others decrease or increase: thus, the semidiameter of a circle is a constant quantity, for while the absciss and semiordinates increase, it remains the same.

CONSTANT forces (*Mech.*) such as remain and act continually the same for some determinate time.

CONSTAT (*Law*) a certificate given out of the court of exchequer of all there is upon record relating to any matter in question. *Stat.* 3 & 4 *Ed.* 6, c. 4; 13 *Eliz.* c. 6; *Co. Lit.* 225.

CONSTELLATION (*Astron.*) a company of fixed stars, which are imagined to represent the form of some creature, or thing, as a bear, a man, the ship *Argo*, &c. The constellations are divided into Northern, Southern, and Zodiacal, of which the ancients reckoned altogether 48; but this number has since been considerably increased. [vide *Astronomy*, and Plate 16, 17.]

CONSTELLATUM unguentum (*Med.*) an ointment made of earthworms, cleansed, dried, and powdered.

CONSTIPATION (*Med.*) a tightness or hardness in the alvus which prevents the necessary discharges.

CONSTIPATION (*Phy.*) a term used by naturalists for the union of a body which is closer than it was before.

CONSTITUENT (*Polit.*) one who constitutes, or by his vote elects, a member of parliament.

CONSTITUTION (*Polit.*) implies literally the form of government constituted in any country; but is particularly applied to the popular part of our own government, as distinguished from the monarchy.

CONSTITUTIONS of Clarendon (*Law*) vide *Clarendon*.

CONSTITUTIONS (*Ecc.*) ordinances for the discipline of the church, particularly the Apostolical Constitutions, and a collection of regulations, attributed to the Apostles, and supposed to have been collected by St. Clement, whose name they bear.

CONSTRUCTION (*Med.*) vide *Adstriction*.

CONSTRUCTION (*Phy.*) the crowding of any parts close together for the purpose of producing condensation.

CONSTRUCTOR (*Anat.*) an epithet for the muscles which contract any orifice of the body, as the—*Constrictor Labium*, that which purses up the mouth.—*Constrictor Alarum Nasi*, that which draws the *alæ* downwards—*Constrictor Ani*, vide *Sphincter Ani*.—*Constrictor Pharyngis*, a muscle which compresses the Pharynx.

CONSTRUCTOR (*Zool.*) an epithet for the *Boa*, a fierce sort of serpent. [vide *Boa*]

CONSTRUCTORII (*Med.*) diseases attended with constriction and spasmodic affections.

CONSTRINGENTIA (*Med.*) astringent medicines.

CONSTRUCTION (*Geom.*) drawing figures, schemes, lines of a problem, &c.

CONSTRUCTION of Equations (*Algeb.*) the finding the unknown quantities or roots of an equation, either by straight lines, or by curves: thus, quadratic equations may be constructed by means of a right line and a circle. [vide *Algebra*]

CONSTRUCTION (*Gram.*) the natural and regular disposing of words in discourse, so as to make proper intelligible sense.

CONSTRUCTIVE Treason (*Law*) Treason construed or implied from the statute, in distinction from that which is positively declared. This sort of construction is not admitted in the law of treason. 1 *Hawk. P. C.* 34.

CONSUALIA (*Ant.*) Feasts and games instituted by Romulus at the time when he stole the Sabine virgins, in honour of Neptune, whom, in consequence of the plot succeeding, he called Consus, or the God of Counsel. *Varr. de Lat. Lin.* l. 5, c. 3; *Dion. Hal.* l. 2; *Liv.* l. 1,

c. 9; *Plut. in Rom.*; *Gyrard. Syntag. Deor.* l. 5, p. 162, &c.; *Parvin. de Lud. Circ.* l. 1, c. 3.

CONSUBSTANTIAL (*Theol.*) an epithet signifying of the same substance; thus, in the second article of our church. Christ is declared consubstantial, or of one substance with the Father.

CONSUBSTANTIATION (*Theol.*) the doctrine of the Lutherans who maintain the substantial presence of the body and blood of Christ in the Lord's supper, together with the substance of the bread and wine.

CONSUETUDINARIUS (*Ecc.*) a ritual or book, containing the rites and forms of divine offices, or the customs of abbeys and monasteries.

CONSUETUDINIBUS et SERVITIIS (*Law*) a writ of right lying against the tenant, that forfeith the lord of the rent or service due to him. *F. N. B.* 151.

CONSUETUDO (*Med.*) a term sometimes used in respect to non-naturals.

CONSUL (*Ant.*) a *consulendo*, i. e. from giving counsel, a title given to the chief magistrates at Rome, of whom there were two, who continued in office for one year. Consuls were elected on the expulsion of Tarquin, U. C. 244, and continued, nominally, until the fall of the Roman empire. The names of those who filled this office have been handed down, with little interruption, from its institution to the year U. C. 1659, A. D. 306. Their power was regal during the year they were in office, and they were chosen from the Patricians only, till the year 387, U. C. when the people obtained the privilege of electing one from among themselves. The chief badges of their office were the *prætexta*, afterwards changed for the *toga picta*, or *palmata*; the *lictors*, the *fascæ*, and *securis*, of which the annexed figure gives a representation, as it is found on the reverse of a medal, struck by Brutus after the assassination of Cæsar, and alluding to the first appointment of the consuls in the person of his ancestor Junius, and L. Tarquinius Collatinus, the two first consuls, who are supposed to be here represented, the one before and the other between the lictors. *Beg. Thes. Brand.* vol. ii.

CONSUL (*Law*) a name given to the chief governors of cities; and, according to Bracton, it signified an Earl, as *comes* signifies a count. *Bract.* l. 1, c. 8.

CONSUL (*Com.*) an officer appointed by virtue of a commission from any sovereign prince or government, to attend in a more especial manner to the commercial interests of the state from whom he receives his commission.

CONSULTA Ecclesia (*Archæol.*) a church full or provided for.

CONSULTATION (*Law*) a writ, whereby a cause having been removed by prohibition from the Ecclesiastical Court to the King's Court, is returned thither. *Statute of Writ of Consultations.* 24 Ed. 1.; *New Nat. Brev.* 119; *Reg. Orig.*

CONSULTATION (*Med.*) the asking of advice from a physician or more commonly the taking of counsel, as is usual among physicians, who assemble in numbers to deliberate on particular cases, when they are said "To hold a consultation."

CONSULTORIA hostia (*Ant.*) the victim which was slain in order to have its entrails examined by the Aruspices, in distinction from the *hostia animalis*, which was slain as an offering to the gods. *Fest. de Verb. Signif.*

CONSUMMATION (*Law*) the most intimate union of a married couple, which is essential to make a marriage binding.

CONSUMPTION (*Med.*) vide *Phthisis*.

CONSUMPTION (*Mil.*) the waste or expenditure of stores.

CONSUMMATUM (*Med.*) a broth; so called because it was made of sufficient strength to concrete into a jelly.

CONTABESCENTIA (*Med.*) vide *Atrophia*.

CONTABULATION (*Ant.*) a joining of boards or planks together; the boarding of a floor.

CONTACT (*Math.*) $\acute{\alpha}\phi\alpha$, the relative state of two things which touch each other; as a line, plane, or body touching another. The parts which thus touch are called the *points of contact*; as H; and the *angle of contact*, is that made by a curve line, and a tangent to it at the point of contact; as I H K, or K H L, formed by the line I H, with the curve H K M, or the circle of H K M with H L N.

CONTAGION (*Med.*) the spreading or catching a disease.

CONTEMPLATIVES (*Ecc.*) Friars of the order of Mary Magdalen, who wore black upper garments, and white ones underneath.

CONTEMPERANTIA (*Med.*) the same as *Temperantia*.

CONTEMPORARY (*Chron.*) one living, or any thing happening at the same time, or in the same age.

CONTEMPT (*Law*) a disobedience to the rules, orders, or process of a court: the word may likewise be applied in the same sense to the king's prerogative, by refusing to assist him for the public good, &c.; and also to an act of Parliament, by refusing to comply with it.

CONTENEMENT (*Law*) 1. Freehold land which lies near a man's dwelling-house. 2. A man's countenance, or credit, which he has by reason of his freehold. *Stat.* 1, Ed. 3. 3. That which is necessary for the support and maintenance of men according to their several qualities, conditions, or states of life. *Mag. Chart.* c. 14; *Glanvil.* l. 9, c. 6.

CONTENTA (*Med.*) a name given to the fluids which are contained in the solid parts of the body.

CONTENT (*Math.*) a term used for the measurement of bodies and surfaces, whether solid or superficial, the capacity of a vessel, and the area of a space, being the quantity either of matter or space included within certain bounds or limits.

CONTENTS (*Com.*) the wares contained in any cask, &c.

CONTESTATIO (*Ant.*) the trial of a cause, by putting in the plaintiff's declaration, and the defendant's answer. *Cic. Rosc. Com.* c. 11; *Ad Attic.* l. 16, ep. 15; *Fest. de Verb. Signif.*; *Macrob. Saturn.* l. 3, c. 9; *Hotom. de Form. apud Græv. Thes. Antiq. Rom.* tom. ii, p. 1912.

CONTEXT (*Lit.*) the general series of a discourse; the parts which precede and follow the sentence quoted.

CONTIGNATIO (*Archit.*) the laying of rafters together; also a flooring. *Vitruv.* l. 6, c. 5.

CONTIGUOUS (*Bot.*) *contiguus*; an epithet for cotyledons whose internal surfaces touch each other in every point.

CONTIGUOUS Angles (*Geom.*) Angles which have the same vertex, and one leg common to both. [vide *Angle*]

CONTINENS (*Rhet.*) $\tau\omicron\ \sigma\upsilon\nu\epsilon\lambda\omicron\nu\omicron$, is the name for that which is the foundation of a defence, and without which no further plea could be advanced. *Cic. de Invent.* l. 1, c. 26; *Quintil.* l. 3, c. 11.

CONTINENS Febris (*Med.*) a continued fever, which proceeds regularly in the same tenor, without either remission or intermission.—*Continens causa*, that cause on which a disorder so much depends, that it continues as long as the cause continues, and no longer: thus, a stone sticking in the ureter is the continent cause of the stoppage of urine.

CONTINENT (*Geog.*) a great extent of land, which comprehends several kingdoms and regions not separated by a sea.

CONTINENTIA Verba (*Gram.*) words which are connected together by means of conjunctions.

CONTINGENCIES (*Mil.*) the items is an army account, consisting of casual expences.

CONTINGENT (*Mil.*) the quota of armed men, or pecuniary subsidy, which one state gives to another.

CONTINGENT Line (*Math.*) the same as *Tangent line*.
CONTINGENT Legacy (*Law*) vide *Legacy*.—*Contingent remainder*, where an estate in remainder is limited to take effect, either to a dubious or uncertain person, or upon a dubious and uncertain event.—*Contingent use*, a use limited in the conveyance of land, which may or may not happen, to vest or put into possession, according to the contingency expressed in the limitation of such use.
CONTINUA Febris (*Med.*) a continual fever; or one attended with light exacerbations and remissions, but no intermissions.
CONTINUAL Claim (*Law*) is a claim made from time to time within every year and day to land or other things, which cannot be attained without incurring some danger.
CONTINUAL Fever (*Med.*) vide *Continua*.
CONTINUAL (*Math.*) or *Continued Proportionals*, a series of three or more quantities compared, so that the ratio is the same between every two adjacent terms, i. e. between the 1st and 2d, the 2d and 3d, the 3d and 4th, &c.; as 1, 2, 4, 8, 16, &c.
CONTINUANCE (*Law*) is in Common Law the same as *prorogation* in the Civil Law, as “Continuance till the next assizes,” i. e. putting off the trial.
CONTINUANDO (*Law*) a word used in a special declaration of trespass when the plaintiff would recover damages for several trespasses in the same action, where, to avoid a multiplicity of suits, a man may, in one action of trespass, recover damages for many trespasses, laying the first to be done with a *continuando* to the whole time in which the rest of the trespasses were committed. In this form *continuando*, i. e. by continuing the trespass aforesaid, &c. from the day aforesaid, &c. until such a day, including the last trespass.
CONTINUATO (*Mus.*) an Italian word signifying, in musical books, to continue a sound, or note, in an equal strength or manner; or to continue a movement in an equal degree of time all the way.
CONTINUED FEVER (*Med.*) vide *Continens*.
CONTINUED FRACTIONS (*Math.*) vide *Fractions*.—*Continued proportion*, that in which the consequent of the first ratio is the same as the antecedent of the second, as in these $3 : 6 :: 6 : 12$ in distinction from *discrete Proportion*. [vide *Discrete*]—*Continued proportionals*, vide *Continual*.
CONTINUED body (*Phy.*) a body whose parts are no ways divided.
CONTINUED quantity (*Phy.*) that quantity whose parts are so joined and united together that you cannot tell where the one begins and the other ends, which is called *continuum*.
CONTINUED BASS (*Mus.*) is the same as *thorough bass*, because it goes quite through the composition.
CONTINUITY (*Surg.*) denotes that state in the parts of the body which are so united as to constitute an undivided whole.
CONTINUO (*Mus.*) Italian for thorough, or continued, as *basso continuo*, continued bass.
CONTORSIO (*Med.*) Contortion, or twisting, is taken in different senses to signify the iliac passion; a luxation of the vertebrae, &c.; an incomplete dislocation; a spasmodic contraction of the muscles in the head; a palsy of the antagonist muscles, &c.
CONTORSIO (*Bot.*) vide *Torsio*.
CONTORTÆ (*Bot.*) the twenty-ninth order of plants in Linnæus’ Fragments of a Natural Method, and the thirtieth of the Natural Orders, in his *Genera Plantarum*.
CONTORTRIX (*Zool.*) a species of Boa.
CONTORTUPLICATUS (*Bot.*) vide *Writhed*.
CONTORTUS (*Bot.*) twisted; an epithet for a corolla and a pericarp; *contorta corolla*, a twisted corolla, having the edge of one petal lying over the next in an oblique direction, as in *Vinca*; *contortum pericarpium* is that which has the apex in a different line from the base.

CONTOUR (*Paint.*) the outline, or that which determines and defines a figure, making what is called a draught or design.
CONTOUR (*Archit.*) the outline of any member, as that of a base, a cornice, &c.
CONTOURNE' (*Her.*) an epithet for a beast, standing or running with his face to the sinister side, as in the annexed figure, being always supposed to look to the right. 
CONTOURNIATED (*Numis.*) an epithet for a sort of medals with a kind of hollowness all round leaving a rim on each side, the figures having scarcely any relieve compared with other medals.
CONTRA Antiscion (*Astrol.*) a term denoting the degree and minute in the ecliptic opposite to the antiscion.
CONTRA Apertura (*Med.*) a counter-opening, or an opening made opposite to the one that already exists, whether made by a bullet, a puncture, or otherwise.—*Contra Fissura*, a fissure in the skull opposite to the part in which the blow was given.—*Contra Indication*, a symptom attending a disease which forbids the exhibition of the remedy ordinarily employed.—*Contra-lunaris*, an epithet for a woman who conceives during menstruation.
CONTRA harmonical proportion (*Geom.*) that relation between three terms wherein the difference of the first and second is to the difference of the second and third as the third is to the first; thus, for example 3, 5, and 6, are numbers contra-harmonically proportional, for $2 : 1 :: 6 : 3$.
CONTRA Formam Feoffmenti (*Law*) a writ for a tenant who is feoffed by the lord’s charter to make certain suit and service to his court, and is afterwards distrained for more than is contained therein.—*Contra formam collationis*, a writ lying where a man has given perpetual alms to any religious house, &c. and the governor has alienated the lands contrary to the donor’s intent. *Stat. Westm. 2, c. 1*; *Vet. Nat. Brev. 162*; *Reg. Orig. 176*.—*Contra mandatio placiti*, a respiting, or giving a defendant further time to answer, i. e. properly a countermand of what was formerly ordered. *Leg. H. 1. apud Brompton*.—*Contra mandatum*, a lawful excuse, which a defendant in a suit by attorney allegeth for himself; to show that the plaintiff hath no cause of complaint.—*Contra positio*, a plea or answer. *Leg. H. 1. apud Brompton*.—*Contra Formam Statuti*, “Contrary to the form of the statute made and provided,” the usual conclusion of every indictment, &c. laid on an offence created by statute.
CONTRA-BA'SSO (*Mus.*) Italian for counter-bass.—*Contra-Basso*, Italian for the instrument called Double Bass.—*Contrapunto*, the Italian word for counterpoint. [vide *Counterpoint*]—*Contra-tenor*, [vide *Counter-tenor*]
CONTRA-SEMEN (*Bot.*) vide *Artemisia*.
CONTRABAND (*Com.*) an epithet for such goods as are forbidden by act of Parliament to be exported or imported.
CONTRACAUSATOR (*Law*) a criminal, or one charged with, and prosecuted for, a crime. *Leg. H. 1, c. 61*.
CONTRACT (*Law*) a covenant, or agreement between two or more persons, with a lawful consideration or cause. Contracts are called *good* when some consideration, however small, has been given, as when a sum of money is given for the lease of a manor. Contracts are *bad* and *nude* where no such consideration has been given.
CONTRACTA'TION HOUSE (*Com.*) a place where agreements or contracts are made for the furtherance of trade.
CONTRACTIBLE (*Anat.*) an epithet applied to the muscles, or such parts of the body as admit of contraction.
CONTRACTILE Force (*Mech.*) that inherent force by which a body, when extended, has the property of drawing itself up to its former dimensions.
CONTRACTILITY (*Phy.*) a power, inherent in some bodies, of contracting themselves into a shorter compass.

CONTRACTION (*Phy.*) the diminishing the extent, or dimensions of a body.

CONTRACTION (*Anat.*) a term applied particularly to the muscles, heart, and arteries.

CONTRACTION (*Log.*) a method in logic whereby the thing reducing abridges the thing reduced.

CONTRACTION (*Gram.*) the reducing two syllables into one, as *don't* for *do not*, *receiv'd* for *received*, &c. which is inadmissible in good writing or speaking.

CONTRACTION (*Arith.*) the shortening certain operations, or performing the rules by a shorter course, as in Multiplication, Division, and Extraction of the Square Root, &c.

CONTRACTURA (*Surg.*) a rigid contraction of the joints, which Cullen has placed as a genus of diseases, Class *Locules*, Order *Dyscinesie*.

CONTRADICTORY *Opposition* (*Log.*) is the contrariety of two propositions both in quantity and quality.—*Contradictory propositions*, such as consist of a universal and a particular, one affirmative and the other negative, both of which cannot be true, nor both false; as “All men are animals;” “Some men are not animals.”

CONTRAFACITIO (*Law*) Counterfeiting.

CONTRA-FISSURA (*Surg.*) vide *Contra*.

CONTRA-FORMAM (*Law*) vide *Contra*.

CONTRA-HARMONICAL (*Geom.*) vide *Contra*.

CONTRAHENTIA (*Med.*) medicines which have the power of shortening the fibres, as in the case of astringents.

CONTRA-INDICATION (*Phy.*) vide *Contra*.

CONTRALTO (*Mus.*) Italian for Counter Tenor.

CONTRAMANDA'TIO *Placiti* (*Law*) vide *Contra*.—*Contramandatum*, vide *Contra*.

CONTRALUNARES (*Med.*) vide *Contra*.

CONTRAMURE (*Fort.*) a little outwall built before another partition wall, or about the main-wall of a city, &c. to strengthen it.

CONTRAPPOSITION (*Law*) a plea or answer. *Leg. Hen. 1*, c. 34.

CONTRAPOSITION (*Log.*) that sort of conversion of propositions which consists, besides transposition also, in changing the terms from finite into infinite, as animal or man into not-animal not-man, which are called *infinite*; thus, “Something animal is not man, therefore something not man is an animal.” [vide *Conversion*]

CONTRAPUNTO (*Mus.*) vide *Counter-Point*.

CONTRAPUN'TIST (*Mus.*) a musician skilled in counter-point.

CONTRA'RIENTS (*Polit.*) the name given to those Barons who took part with Thomas, Earl of Lancaster, against King Edward II.

CONTRARIES (*Log.*) a name for things directly opposed to each other, as light and darkness.

CONTRARY *Flexure* (*Geom.*) vide *Curve*.

CONTRARY *Propositions* (*Log.*) such as consist of two universal propositions, one affirming and the other denying; both of which may be false, but both cannot be true; as “All men are wise;” “No man is wise.”

CONTRARY *Coned* (*Her.*) an ancient term for gironny.

CONTRARY *Motion* (*Mus.*) when one part ascends, and another descends simultaneously, they are said to be in contrary motion.

CONTRAST (*Paint.*) the due placing the different objects and parts of the figure.—*Well contrasted figures* are such as are lively and express the motion of the whole piece, or of any particular group.

CONTRAST (*Mus.*) the opposition and relief produced by the varieties of style in the several movements of a piece.

TO CONTRA'ST (*Archit.*) avoiding the repetition of the same thing in order to please by variety.

CONTRATE-WHEEL (*Hor.*) the wheel in a watch, which is next to the crown-wheel; the teeth and hoop of which lie contrary to those of the other wheels.

CONTRATENERE (*Law*) to withhold. *Leg. Alfred. apud Bromph. c. 9.*

CONTRAVALLATION *line* (*Fort.*) a trench guarded with a parapet, and usually cut round a place by the besiegers to secure themselves, and stop the sallies of the garrison. It is generally a musket shot from the town, so that the whole army carrying on the siege lies between the lines of circumvallation and contravallation.

CONTRAVE'NTION (*Law*) the infringement of a contract.—*Contravention*, in the Scotch Law, is the action founded on the breach of Law-Burrows.

CONTRAYERVA (*Bot.*) a plant from the Spanish West Indies, the *Dorstenia contrayerva* of Linnæus, which is so called from *contra*, counter, and *yerva*, poison, because it is reckoned good against poisons. There is another *Contrayerva*, which is little inferior to the former, and is the root of the *Psoralea pentaphylla* of Linnæus.

CONTRE (*Her.*) French for Counter. [vide *Counter*]—*Contre escartillé*, the same as Counter-quartered. [vide *Counter*]

CONTRE-COUP (*Med.*) French for the fracture called *Contra-fissura*]

CONTRIBULES (*Archæol.*) or *Contribunales*, kindred or cousins. *Lamb. p. 75.*

CONTRIBUTION (*Law*) a joint giving of money towards any affair of importance.—*Contributio facienda*, a writ for those who are put to the burden of a thing to compel others equally obliged to bear an equal share.

CONTRIBUTION (*Mil.*) a tax paid by the inhabitants of any place to a hostile military force to save themselves from being plundered; whence the phrase “To put under contribution,” in French *Mettre a contribution*.

CONTRIBUTIONE facienda (*Law*) vide *Contribution*.

CONTRITIO (*Phy.*) the same as *Comminution*.

CONTRO'LLER (*Law*) an overseer, or officer relating to public accounts; of which there are different kinds, as—*Controller of the King's household*, who has charge of the inferior officers.—*Controller of the Haniper*, an officer in Chancery who attends on the Lord Chancellor, and takes charge of things sealed and inclosed in a bag.—*Controller of the Poll*, an officer of the Exchequer, who keeps a controlment of Receipts and outgoings.—*Controller of the Pipe*, an officer in the exchequer who writes out summons to the sheriffs to collect the debts of the pipe.—*Controller General*, an officer in the artillery.—*Controller of the Navy*, the officer who sees to all payments.—*Controller of the Mint*, whose business it is to see that the money be made to the just assize, to overlook the officers, &c.

CONTROVERTED *Election* (*Polit.*) the same as *contested Election*.

CONTUO'LI (*Anat.*) an epithet for eyes looking narrowly. *Fest. de Verb. Signif.*

CONTUSA (*Surg.*) bruises or wounds caused by contusion.

CONTUSION (*Surg.*) a bruise which destroys the continuity in the parts of the bones and the flesh, though the skin appears whole.—*Contusion of the skull* is such a hurt of the skull-bone that, although no fracture appears outwardly, yet the whole is separated in the inside.

CONVALESCENCE (*Med.*) that space from the departure of a disease to the recovery of the strength lost by it.

CONVALESCENT (*Med.*) one recovering or returning to a state of health.

CONVALESCENTS, *List of* (*Mil.*) a return made out by the surgeon of the battalion, hospital, &c. of such as may be shortly expected to do duty.

CONVALLARIA (*Bot.*) a genus of plants, Class 6 *Hexandria*, Order 1 *Monogynia*.

Generic Characters. CAL. none.—COR. monopetalous; border six-cleft.—STAM. filaments six; anthers oblong.—

- PIST.** *germ* globose; *style* filiform; *stigma* obtuse. —
PER. *berry* globose; *seeds* roundish.
- Species.** The species are perennials, as — *Convallaria maialis*, *Polygonatum*, seu *Lilium*, Sweet Scented Lily of the Valley. — *Convallaria japonica*, Grass-leaved Lily of the Valley, native of Japan. — *Convallaria spicata*, Spiked Lily of the Valley, native of Japan. — *Convallaria verticillata*, seu *Polygonatum*, &c. Narrow-leaved Solomon's seal, native of Europe. — *Convallaria polygonatum*, seu *Polygonatum*, &c. Single-flowered Solomon's Seal, native of Europe. — *Convallaria multiflora*, seu *Polygonatum*, &c. Many-flowered Solomon's Seal, native of Europe. — *Convallaria latifolia*, seu *Polygonatum*, &c. native of Austria. — *Convallaria racemosa*, Cluster-flowered Solomon's Seal, native of Virginia. — *Convallaria trifolia*, seu *Phalangium*, native of Siberia. — *Convallaria bifolia*, *Majanthemum*, *Unifolium*, *Lilium*, &c. seu *Monophyllum*, &c. Least Solomon's Seal, or One Blade, native of Europe. — *Convallaria latifolia*, Broad-leaved Solomon's Seal, native of Austria. *Dod. Pempt. Clus. Hist. rar. Plant.*; *Bauh. Hist. Plant.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*; *Raii Hist. Plant.*
- CONVENABLE** (*Law*) agreeable. *Stat. 27 Ed. 3, c. 21.*
- CONVENIENCE** (*Archit.*) the disposing the several parts of a building, so that they may not obstruct or interfere with one another.
- CONVENT** (*Ecc.*) *conventus*, signifies the fraternity of an abbey, or priory, as *societas* does the number of fellows in a college.
- CONVENTICLE** (*Law*) *Conventiculum*, signified properly a private meeting or assembly for the purposes of devotion, but was afterwards applied to the illegal meetings of the Non-conformists, mentioned in the statutes 2 *Hen. 5, c. 15*; 1 *Hen. 6, c. 3*; 16 *Car. 2, c. 4.*
- CONVENTION** (*Polit.*) any assembly of the states of the realm, particularly that which is held on particular occasions without the sanction of the sovereign, as the *Convention Parliament*, which restored king Charles II.
- CONVENTION** (*Mil.*) an agreement entered into by troops that are opposed to one another for the evacuation of some post, the suspension of hostilities, &c.
- CONVENTIONE** (*Law*) a writ which lies for any covenant in writing that is unperformed.
- CONVENTIONER** (*Polit.*) the member of a convention.
- CONVENTUAL Church** (*Ecc.*) a church that consists of regular clerks professing some order of religion.
- CONVENTUALS** (*Ecc.*) religious men united together in a convent or religious house. *Math. Par. ann. 1233.*
- CONVENTUS** (*Ecc.*) *συναγωγὴ*, a meeting or coming together for devotional purposes, which, according to Eusebius, took place at the cemeteries of the primitive Christians; also a convent. *Euseb. Ecc. Hist. l. 9, c. 2*; *Concil. Tolit. ann. 4, can. 35*; *Order. Vital. l. 4, p. 542.*
- CONVERGING Series** (*Math.*) a method of approximating still nearer and nearer to the true root of any number or equation.
- CONVERGING** (*Geom.*) or *Convergent Lines*, those lines which continually approximate, or whose distance becomes continually less and less the farther they are continued; in distinction from divergent lines. — *Converging Hyperbola*, one whose concave legs bend in towards one another, and run both the same way.
- CONVERGING Rays** (*Opt.*) those rays that issue from divers points of an object, and incline towards one another till at last they meet; and, if they cross each other, then they become *Diverging*, as in the annexed figure, where A B and C B converge towards the point B,

and thence diverge or run off from each other in the lines BD and BE.

CONVERGING (*Bot.*) *convivens*, an epithet applied to the corolla, the anthers, and the sleep of plants; *corolla convivens*, a converging corolla that has the tops of the petals meeting so as to close the flower, as in *Trollius*; *antheræ conviventes*, converging anthers, or those which incline towards each other, as in the Class *Didynamia*. Plants are said to be converging in sleep when the leaves are so closely applied as to seem one leaf.

CONVERSE Proposition (*Math.*) one proposition is converse of another when, after drawing a conclusion from something first supposed, we return again by making a supposition of what had been before concluded, and draw as a conclusion what had been before a supposition; as if, from the supposed equality of two sides of a triangle, it be demonstrated that the angles opposite to the equal sides are equal; then the converse of this proposition is, from the supposed equality of the two angles, to prove the equality of the sides opposite to them.

CONVERSE Direction (*Astrol.*) is when a significator is brought to the place of the promissors by the motion of the highest sphere, called *primum Mobile*, contrary to the succession of the signs.

CONVERSION (*Rhet.*) *ἀντιστροφή*, or *ἐπιστροφή*, a figure of speech by which we repeat continually the same word, as "Pænos Populus Romanus justitia vicit, armis vicit, liberalitate vicit." *Cic. in Orator. c. 39*; *Quintil. l. 9, c. 31.*

CONVERSION of Proposition (*Log.*) changing the subject into the place of the predicate, and still retaining the quality of the proposition. Conversion is of different kinds, as—*Simple Conversion*, where the quantity remains the same; as "No man is a brute," therefore "No brute is a man." — *Conversion per Accidens*, when the quantity is diminished; as "Every man is an animal," therefore "Some animal is man." — *Conversion per Contra-positionem*, when the terms are changed from finite into infinite; as man or animal into not man, not animal, which are called infinite terms. [vide *Contra-Position*]

CONVERSION of ratios (*Geom.*) *ἀναστροφή λόγων*, is the comparing the antecedent with the difference of the antecedent and consequent; in other words, when of four quantities the first is to its excess above the second as the third is to its excess above the fourth, as suppose $8 : 6 :: 4 : 3$, then d *convertendo*, or by conversion, $8 : 2 :: 4 : 1$, or $a : b :: c : d$, then by conversion $a : a - b :: c : c - d$. *Eucl. Def. Elem. l. 5.*

CONVERSION of equations (*Algeb.*) the peculiar manner of altering an equation when either the quantity sought, or any member of it, is a fraction.

CONVERSION (*Mil.*) French for that movement which is called wheeling.

CONVERSION (*Theol.*) a turning to any profession of religion, in its most general sense, but in particular the turning to God, and to a sense of true religion.

CONVERSION (*Law*) is where a person finding or having in his possession the goods of another converts them to his own use without the consent of the owner, and for which the proprietor may maintain an action of *trover* and *conversion* against him.

CONVERSIONS (*Law*) a name formerly given to the Jews who were converted to Christianity in England, for whom King Henry III. built a house in London. *Co. Lit. 291, b.*

CONVERTIBLE terms (*Log.*) terms which admit of being converted without altering the truth of the proposition, as "Every living creature is an animal," and "Every animal is a living creature."

CONVEX (*Math.*) an epithet signifying curved and protuberant outwards, as a convex lens, mirror, &c. [vide *Lens*, &c.]

CONVE'XUS (*Bot.*) convex, an epithet for a leaf or a receptacle; *folium convexum* is that which rises in the centre, opposed either to the *depressus* or the *concavus*; *receptaculum convexum*, a receptacle which rises in the middle, as in *Chrysanthemum*, *Buphthalmum*, *Matricaria*, &c.

CONVEY'ANCE (*Law*) a deed or instrument by which lands, &c. are conveyed or made over to another. The most common conveyances now in use are, deeds of gift, bargain and sale, lease and release, fines and recoveries, settlements to uses, &c.

CONVEY'ANCER (*Law*) the person who follows that part of the legal profession which consists in drawing up conveyances.

CONVIC'T (*Law*) one who is found guilty of an offence by the verdict of a jury. *Staudf. P. C.* 186.—*Convict recusant*, one who has been indicted and convicted for refusing to come to church; a term formerly applied to persons of the Romish persuasion.

CONVICTION (*Law*) the finding a man guilty of an offence by the verdict of a jury, or when a man who is outlawed appears and confesses.

CONVICTION (*Theol.*) the first degree of repentance, or the assurance which a man has in his mind of the evil nature of sin, and his own guiltiness.

CONVIV'IUM (*Ant.*) a banquet or entertainment, which, as Cicero defines it, implied a conjunction of living among friends, and is therefore more expressive than the Greek *Symposium*, *Compotatio*, *concaenatio*, and the like. *Cic. de Senect.* c. 13.

CONVIV'IUM (*Law*) the same thing among the laity as *procuratio* among the clergy, i. e. when the tenant, by reason of his tenure, is bound to provide meat and drink for his lord's table once or oftener in the year.

CONVOCA'TION (*Ecc.*) the assembly of the representatives of the clergy, which consists of an *Upper House*, where the archbishops and the bishops sit by themselves, and of the *Lower House*, where the inferior clergy sit. All the members have, for themselves and their officers, the same privileges as members of Parliament.—*Convocation House*, the place where the convocation is held.

CONVOLUTA *ossa* (*Anat.*) the turbinated bones of the nose, which are superior and inferior.

CONVOLUTUS (*Bot.*) *convolute*, an epithet in veneration for a bud, petal, stigmas, and tendrils. *Gemma convoluta* is a bud, the nascent leaves of which are rolled together like a scroll, as in *Arum*, *Piper*, *Solidago*, *Brassica*, &c. It is applied to the petals and stigmas in the same sense as in *Crocus*; but *cirrus convolutus* is a tendril twisted into rings or spirals.

CONVOLVULUS (*Ent.*) a little hairy worm which infests vines. *Cato de Re Rust.* c. 95; *Plin.* l. 17, c. 28.

CONVOLVULUS (*Bot.*) Bindweed, a plant, the root of which yields a concreted juice called *scammony*. It is supposed to answer to the *Smilax* of the ancients. *Plin.* l. 21, c. 5.

CONVOLVULUS, in the *Linnean system*, a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* five-parted.—COR. one-petalled.—STAM. *filamentis* five; *anthers* ovate.—PIST. *germ* superior; *style* filiform; *stigmas* two.—PER. *capsule* roundish; *seeds* in pairs.

Species. The species are mostly perennials or shrubs; some few annuals. Of the first sort are the following—*Convolvulus arvensis*, *Smilax*, &c. seu *Helxine*, &c. Small or Field Bindweed, native of Europe.—*Convolvulus sepium*, *Smilax*, seu *Volubilis*, &c. Great or Hedge Bindweed, native of Europe.—*Convolvulus Wheleri*, &c. *Sagittaria*, seu *Ipomoea*, &c. native of Barbary.—*Convolvulus scammonia*, &c. *Syriacus scammonia*, seu *Scammonium*, &c. Syrian Bindweed, or Scammony, native of Syria.—*Convolvulus angustifolius*, seu *Ipomoea*, &c. native of the

East Indies.—*Convolvulus japonicus*, seu *Kos*, native of Japan.—*Convolvulus panduratus*, seu *Megalorhizus*, Virginian Bindweed, native of Egypt.—*Convolvulus batatas*, *Batatas*, seu *Kappa Kelengu*, Tuberous-rooted Bindweed, or Spanish Potatoes, native of the Indies.—*Convolvulus maximus*, seu *Yiru-tali*, native of Ceylon.—*Convolvulus umbellatus*, seu *Polyanthos*, &c. Umbelled Bindweed, native of Martinica.—*Convolvulus turpethum*, *Zeylanicus*, seu *Turpethum*, Square-stalked Bindweed, or Turbith, native of Ceylon.—*Convolvulus verpens*, Dwarf Bindweed.—*Convolvulus saxatilis*, *Campanula Lychnis*, seu *Lychnidis*. Among the shrubs the following are the principal—*Convolvulus malabaricus*, seu *Kattukelengu*, native of Malabar.—*Convolvulus canariensis*, seu *foliis*, &c. Canary Bindweed, native of the Canary Isles.—*Convolvulus grandiflorus*, seu *Munda-Valli*, native of India.—*Convolvulus speciosus*, &c. seu *Nervosus*, &c. Broad-leaved Bindweed, native of the East Indies.—*Convolvulus Jalapa*, seu *Bryonia*, Jalap Bindweed, native of Mexico. The following are annuals, namely *Convolvulus hederaceus*, Ivy-leaved Bindweed, native of India.—*Convolvulus nil*, seu *Ipomoea*, &c. Blue or Azure Bindweed, native of America.—*Convolvulus purpureus*, Purple Bindweed, native of America.—*Convolvulus tricolor*, Trailing Bindweed, native of Africa.—*Convolvulus soldanella*, seu *Soldanella*, &c. Sea Bindweed, native of England.—*Convolvulus pes capræ*, seu *Schouanna*, &c. Thick-leaved Bindweed, native of the East Indies.—*Convolvulus macrocarpus*, Long-fruited Bindweed.—*Convolvulus quinquefolius*, Smooth five-leaved Bindweed, &c. *Clus. Hist. Plant. rar.*; *Bauh. Hist. Plant.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*; *Raii Hist. Plant.*; *Tournef. Instit.*; *Marcgr. Pis. Brasil. Hist.*

CONVOY (*Mar.*) a fleet of merchant ships protected by some vessels of war.

TO CONVOY is said of the vessels of war which attend merchant ships by way of protection in time of war.

CONUS *Fusorius* (*Chem.*) a vessel resembling an inverted cone, intended for separating *reguluses* from their respective *scoriae*.

CONUS (*Conch.*) *Conc*, a genus of animals, Class *Vermes*, Order *Testacea*.

Generic Character. *Animal* a limax; *shell* univalve; *aperture* effuse, longitudinal; *pillar* smooth.

Species. The species are distinguished into, 1. Those which have their spire or turban truncate. 2. Those which have the spire pyriform, with a round base. 3. Those which have their spire elongated, or rounded at the base. 4. Those which are ventricose in the middle, and contracted at the end. The cones inhabit the ocean, and are generally found on rocky shores. Many of the shells are beautiful, and fetch a very high price.

CONUS (*Bot.*) vide *Cone* and *Strombilus*.

CONUSANCE of *Pleas* (*Law*) a privilege which a town or city hath to hold pleas.

CONUSANT (*Law*) knowing or understanding; as if the son be concusant, and agreeing to a feoffment. *Co. Lit.* 159.

CONVULSION (*Med.*) an involuntary contraction of the muscles.

CONVULSIVE *Motions* (*Med.*) are sudden and swift convulsions and shakings that cease and return again by turns.

CONY'ZA (*Bot.*) *κόρυζα*, Fleabane; a plant so called because its leaves, when strewed and burned, kill gnats and fleas. It is commended much by the ancients for its medicinal virtues, and particularly for promoting the menses and curing the stranguary. *Hippocrat. de Morb. Mul.* l. 2; *Theoph. Hist. Plant.* l. 6, c. 2; *Dioscor.* l. 3, c. 136; *Plin.* l. 59, c. 8.

CONYZA, in the *Linnean system*, a genus of plants, Class 19 *Syngenesia*, Order 2 *Polygamia Superflua*.

Generic Characters. CAL. common imbricate; scales acute. —COR. compound tubulose; corolllets numerous; proper funnel-form; border five-cleft. —STAM. filaments five; anther cylindric. —PIST. germ oblong; style filiform; stigma two-cleft. —PER. none; calyx converging; seeds solitary; down simple; receptacle naked.

Species. The species are of different kinds, as—*Conyza squarrosa*, seu *Baccharis*, &c. Great Fleabane, or Spikeweed, a biennial, native of Germany. —*Conyza scabra*, Rough Fleabane, native of the East Indies. —*Conyza foliolosa*, native of the East Indies. —*Conyza patula*, seu *Serratula*, an annual, native of China. —*Conyza bifrons*, seu *Eupatoria*, &c. Oval-leaved Fleabane, a perennial, native of Canada. —*Conyza purpurascens*, seu *odorata*, &c. seu *major*, &c. an annual, native of Jamaica. —*Conyza Urinervis*, &c. native of the Brazils. —*Conyza serratula*, &c. native of the Brazils. —*Conyza madagascariensis*, &c. native of Madagascar. —*Conyza stricta*, &c. an annual, native of the East Indies. —*Conyza canescens*, &c. seu *pinifolia*, native of the Cape of Good Hope. —*Conyza oleaefolia*, seu *orientalis*, &c. a perennial, native of Armenia. —*Conyza candida*, seu *saxatilis*, &c. seu *Jacobæa*, &c. seu *Aster*, &c. Woolly Fleabane, a shrub, native of Crete. —*Conyza verbascifolia*, seu *Verbasci*, &c. seu *Aster*, a shrub, native of Sicily. —*Conyza cinerea*, seu *Senecioides*, seu *Senecio*, &c. seu *Olus*, &c. seu *Eupatorium*, &c. Ash-coloured Fleabane, an annual, native of the East Indies. —*Conyza Egyptiaca*, *Erigeron*, seu *Jacobæa*, &c. Egyptian Fleabane, an annual, native of Sicily and Egypt. —*Conyza Gouani*, seu *Erigeron*, &c. an annual or perennial, native of the Canaries. —*Conyza Senegalensis*, seu *foliis*, &c. native of Senegal. —*Conyza dentata*, seu *foliis*, &c. native of Senegal. —*Conyza fetida*, *Erigeron*, seu *Senecio*, &c. a perennial, native of Africa. —*Conyza sordida*, *Gnaphalium*, seu *Helichrysum*, *Stoechadi*, *Stoechas*, seu *Ageratum*, &c. Small-flowered Fleabane. —*Conyza saxatilis*, *Gnaphalium*, *Helichrysum*, seu *Stoechadi*, &c. Rock Fleabane, a shrub, native of Italy. *Bauh. Hist. Plant.; Park. Theat. Botan.; Raii Hist. Plant.*

CONYZA is also the *Baccharis ivifolia*, &c. of Linnæus.

CONYZELLA (Bot.) or *Conyzoides*, the same as the *Erigeron*.

COOK (Ich.) a small fish inhabiting the Cornish coasts; the *Clabrus coquus* of Linnæus.

COOK-ROOM (Mar.) the room in a ship where the cook and his mate dress the provisions.

COOKS, *Company of* (Her.) was incorporated in the year 1481, and confirmed by Queen Elizabeth, and afterwards by King James II. Their armorial ensigns are, as in the annexed figure, "argent a chevron engrailed sable between three columbines." The crest is a pleasant standing on a mount (upon a helmet and torse), the supporters a buck and doe, each vulned, with an arrow all proper. The motto, *vulnerati non victi*.

COOLER (Mech.) a vessel used by brewers for cooling the beer after it is drawn off.

COOLERS (Med.) medicines which produce an immediate sense of cold.

COOLING the wool (Agric.) spreading it out in the air after it has been sheared.

COOM (Nat.) soot which gathers over the mouth of an oven.

COOMB (Com.) a measure of corn containing four bushels.

COOP (Mar.) or *Fish-coop*, a vessel made of twigs, in which they catch fish in the Humber.

COOPERS, *Company of* (Her.) was incorporated in 1530, by the name of Master and Wardens, or Keepers of the commonalty of the freemen of the mystery of coopers in London. Their armorial ensigns are, as in the annexed figure, "Party per pale gules and or, a chevron between three hoops in a chief azure."

COOPERY (Mech.) the art of making casks, barrels, &c. with boards bound by hoops. The boards of which casks are made are called in their rough state *clap-boards*, and when fit for use, *staves*.

CO-OPERTIO (Anat.) signifies properly a covering, in which sense it is applied to the membranes of the *fœtus*, the *uterus*, &c.

CO-OPERTIO (Archæol.) the head and branches of a tree cut down.

CO-OPERTO'RIMUM (Anat.) the *Cartilago theroida*.

CO-OPERTURA (Archæol.) a thicket or covert of wood. *Chart de Forest. c. 12.*

CO-O'RDINATE pillars (Archit.) pillars standing in equal order.

CO-O'RDINATES (Geom.) a term applied to the *absciss* and *ordinates* when taken in connexion.

CO-ORDINATION of causes (Phy.) an order of causes wherein several of the same kind concur in the production of the same effect.

CO-O'STRUM (Anat.) the middle part of the *diaphragm*.

COOT (Orn.) a water-fowl, mostly of a black colour, called also a moor-hen, the *Fulica atra*, &c. of Linnæus. These birds frequent lakes and still rivers, where they make their nests among the rushes, &c. floating on the water, so as to rise and fall with it. They lay five or six eggs, of a dirty whitish hue, and sometimes they have been known to lay as many as fourteen.

COPA'IBA (Bot.) the balsam of Copaiva, a yellow resinous juice which flows from the *Copaifera officinalis* of Linnæus. It has an agreeable smell, and a bitterish biting taste. By distillation in water the oil is separated from the resin, in the former of which the taste and smell of the balsam are concentrated.

COPAIFERA (Bot.) a genus of plants, Class 10 *Decandria*, Order 1 *Monogymia*.

Generic Characters. CAL. none. —COR. petals four. —STAM. filaments ten; anthers oblong. —PIST. germ round; style filiform; stigma obtuse. —PER. legume ovate; seed single.

Species. The only species is, the — *Copaifera officinalis*, seu *Copaiva*, seu *Copaiba*, seu *Coapoiba*, Balsam of Capevi-tree, a shrub, native of the Brazils. *Marcgrav. Pis. Brasil. Hist.*

COPA'IVA (Bot.) vide *Copaiba*.

CO'PAL (Nat.) an American name for all odoriferous gums; it is particularly applied to a resinous substance imported from Guinea, where it is found in the sand. It is of a yellow colour, transparent, tasteless, and while cold inodorous. Its principal use is in laxities of the gums, but it is likewise accounted a cephalic.

COPALLI (Bot.) the *Rhus copallinum* of Linnæus.

COPALXACTL (Bot.) a tree like the cherry-tree, the fruit of which abounds much in a gelatinous juice. *Raii Hist. Plant.*

COPARCENERS (Law) those who have an equal share in the inheritance of an ancestor. *Bract. l. 2, c. 30.*

COPAU (Bot.) a sort of wood which grows in Brasil resembling that of the walnut-tree. *Raii Hist. Plant.*

COPE (Archæol.) signifies, in Domesday Book, a hill; but in the mines it was applied to the tribute of sixpence per load which was paid to the King, or the lord of the manor, out of the lead-mines in some parts of Derbyshire.

COPE (*Ecc.*) a priest's vestment fastened with a clasp before, and hanging down from the shoulder to the heels.
 TO COPE (*Archit.*) to jut out as a wall.
 TO COPE (*Falcon.*) to pare the beak or talons of a hawk.
 COPE *Sale and Pins* (*Mech.*) irons that fasten the chains of one ox with other oxen to the end of the cope of a waggon.
 CO'PECK (*Com.*) a small coin in Russia equal to about one farthing English.
 COPELLA (*Chem.*) vide *Cupel*.
 COPE'RNICAN *system* (*Astron.*) a particular system of the sphere proposed by Pythagoras, and revived by Copernicus, in which the sun is supposed to be placed in the centre, and all the other bodies to revolve round it in a particular order. [vide *Astronomy*]
 COPER'NICUS (*Mech.*) an instrument invented by Whiston, to display the Copernican system of the planets.
 COPE'S *mate* (*Com.*) a partner in merchandise.
 COPEY'A (*Bot.*) a tree in the Spanish West India islands, which yields pitch like the pine. *Raii Hist. Plant.*
 CO'PHER (*Chem.*) vide *Camphor*.
 CO'PHOS (*Zool.*) κώφοι, a sort of toad mentioned by Nicander.
 COPHO'SIS (*Med.*) κώφωσις, deafness, dumbness, or dulness, in any of the senses.
 COPIA *Libelli deliberandi* (*Law*) a writ that lies in a case where a man cannot get the copy of a libel at the hands of a judge ecclesiastical. *Reg. Orig.* 51.
 COPIA'BA (*Bot.*) vide *Copaiba*.
 COPING (*Mason.*) the stone covering on the top of a wall, which serves to strengthen and defend it from the injuries of the weather. It is of different kinds, as *Parallel Coping*, of equal thickness, used only on inclined surfaces.—*Feather-edged Coping*, thinner on one edge than the other for throwing off the water.—*Saddle-backed Coping*, which is thin at each edge, and thick in the middle.
 COPING-IRON (*Falcon.*) an instrument for paring the beak or talons of a hawk.
 COPIS (*Ant.*) κοπίς, a kind of falchion, or hooked sword, such as the Persians wore. *Xenoph. Cyropæd.* l. 1; *Quint. Curt.* l. 8, c. 14; *Plut. in Camill.*; *Suidas*; *Cæl. Rhodig. Antiq. Lect.* l. 8, c. 3; *Leun. clav. in Pandect Turcic.* c. 172.
 COPISCUS (*Nat.*) κόπισκος, an inferior sort of frankincense. *Dioscor.* l. 1, c. 81.
 CO'POS (*Med.*) κόπος, lassitude, or a morbid sensation of lassitude. *Gal. Comm. in Hippocrat.* l. 4, *Aph.* 31.
 CO'POVICH-OCCASSOU (*Bot.*) a tree in the West Indies, the leaves and fruit of which resemble those of a pear-tree.
 CO'PPA (*Archæol.*) a cop, cap, or cock of hay, or corn, which was originally a titheable portion. *Thorn in Chron.*
 CO'PPEL (*Chem.*) vide *Cupel*.
 CO'PPER (*Chem.*) one of the six primitive metals, and the lightest of all except iron and tin, and the hardest of all but iron. It mixes in fusion with both gold and silver, to both of which it serves as an alloy. It is the most liable to rust of all the metals; for all kinds of salts, and all unctuous bodies, and, in short, almost every thing in nature, is a solvent for it. It is remarkably sonorous, being the basis of all the compound metals in which that quality exists; and its divisibility is so great, that a grain dissolved in an alkali will give a sensible colour to 500,000 times its weight of water. The specific gravity of copper is from 7.788 to 8.584. It was formerly called Venus, and represented by the annexed character [♀].
 CO'PPERAS (*Chem.*) a name given to blue, green, and white vitriol, or the factitious sulphate of iron.
 CO'PPERED (*Mar.*) or *Copper-bottomed*, an epithet for a vessel sheathed with thin plates of copper to prevent the worms from eating into the planks.—*Copper-fastened*, fastened with bolts of copper instead of iron.

CO'PPICE (*Agric.*) a small wood consisting of underwood, which may be cut at the growth of twelve or fifteen years.
 CO'PPIN (*Mech.*) the cone of thread which is formed on the spindle of the wheel by spinning.
 COPRAGO'GUM (*Med.*) a gently cathartic electuary.
 COPRIEMETOS (*Med.*) κοπρημετος, from κόπρος, excrement, and ἐμῶν, to vomit; a person who vomits up his excrements, which happens in the last stage of the iliac passion.
 COPROCRITICA *medicamenta* (*Med.*) gentle cathartics, from κόπρος, excrement, and κρῖνω, to separate.
 COPROPHO'RIA (*Med.*) from κόπρος, excrement, and φορέω, to bring away; a purgation.
 COPRO'SMA (*Bot.*) a genus of plants, Class 23 *Polygamia*, Order 1 *Monoccia*.
Generic Characters. CAL. perianth one-leaved.—COR. one-petalled; segments acute.—STAM. filaments five; anthers oblong.—PIST. germ oblong; styles two; stigmas simple.—PER. berry ovate-globular; seeds two.
Species. The two species are the—*Coprosma fetidissima*, seu *floribus*, &c. native of New Zealand.—*Coprosma lucida*, a shrub, native of New Zealand.
 COPROSTA'SIA (*Med.*) from κόπρος, excrement, and ἵστημι, to stop; a constriction of the *alvus*.
 COPTA'RION (*Med.*) κοπτάριον, a medicine formed in the shape of a very small cake.
 CO'PTE (*Med.*) or *copton*, from κόπτω, to beat or pound a sort of cake made of vegetable substances, formed by beating the ingredients into a paste.
 COPTIC (*Gram.*) vide *Alphabet*.
 CO'PULA (*Anat.*) the name for a ligament.
 COPULA (*Log.*) the verb which joins any two terms in an affirmative or negative proposition, as "Man is an animal," in which case *is* is the copula.
 CO'PULATIVE (*Gram.*) an epithet for conjunctions which join the sense as well as the words, as *and*, *also*, &c.
 COPULATIVE *propositions* (*Log.*) those which include several subjects, or several attributes joined together by an affirmative or negative conjunction, as *and*, *nor*, *neither*, &c.
 CO'PY (*Law*) is the duplicate or transcript of an original writing.—*Copyhold*, a tenure for which the tenant has nothing to show but the copy of the rolls made by the Lords' Court, on such tenant being admitted to any parcel of land, or tenement, belonging to the manor; it is called *base tenure*, because held at the will of the lord, and also, as Fitzherbert says, *tenure in villenage*. The fundamental principles of a copyhold are, that it has been demised time out of mind by copy of court-roll, and that the tenements are part of, or within, the manor; for which reason no copyhold can be made at this day. [vide *Copyholder*]—*Copy-Right*, the exclusive right of printing and publishing copies of any literary performance.
 COPY (*Print.*) the original after which the compositor sets his type. *Good copy* is that which is full of breaks and clearly written. *Bad copy* is that which has much close matter, with many interlineations, bad writing, &c. They are jocularly termed *fat* and *lean*.
 COPYHOLDER (*Law*) *tenant per copie*, according to Lyttleton, was called by statute 14 *Hen.* 4, c. 34, *tenant per le verge*; by 4 *Ed.* 3, c. 25, *tenant per roll*; by 4 *Ed.* 1, *customarius tenens*; and, according to Bracton, *villanus sockmannus*, not because he was a bondsman, but held by base tenure. *Bract.* l. 2, c. 8; *Brit. Fol.* 165; *Flet.* l. 1, c. 8; *Lit.* § 73.
 COQ (*Med.*) an abbreviation for *coquo*, as *coq ad med consumpt.* boil it down to half the quantity; *coq in S Q Aq.* i. e. boil it in a sufficient quantity of water; *coq S A.* i. e. boil it according to art.
 COQUENTIA *medicamenta* (*Med.*) medicines which promote digestion.

COQUILLES à boulet (*Mil.*) French for shells, or moulds, made of brass, that are used for casting cannon-balls.

COR (*Anat.*) the heart.

COR (*Bot.*) the inward, soft, pithy part of a plant.

COR CAROLI (*Astron.*) Charles's Heart; a name first given to a single star, but afterwards to a constellation consisting of three stars in the Northern hemisphere.—*Cor Hydrae*, a star of the second magnitude in the heart of the constellation Hydra.—*Cor Leonis*, the Lion's Heart, or Regulus, a star of the first magnitude in the heart of Leo.—*Cor Scorpii*, vide *Antares*.

COR (*Chem.*) another name for gold; also for an intense fire.

CO'RA (*Com.*) a sort of coin current at Athens.

CORA (*Anat.*) the apple of the eye.

COR'AGE (*Law*) *Coragiū*, a sort of extraordinary imposition on particular occasions, probably consisting of corn. *Bract.* l. 2, c. 116.

CORACIAS (*Orn.*) the Roller, a genus of animals, Class *Aves*, Order *Picæ*.

Generic Character. Bill sharp-edged.—*Tongue* cartilaginous.—*Legs* short.—*Feet* formed for walking.

Species. The principal species are—*Coracias garrula*, Common Roller.—*Coracias varia*, Pied Roller.—*Coracias strepera*, Noisy Roller, &c.

CORACINE (*Med.*) *κορακίνη*, a sort of pastil. *Gal. de Comp. Med.* l. 5, c. 11.

CORACINI LAPIDES (*Ich.*) vide *Coracinus*.

CORACINUS (*Ich.*) *κακίνος*, Crow-fish, a sort of black fish, peculiar to the Nile. *Plin.* l. 9, c. 16; *Gal. de Simpl.*; *Oppian. Hal.* l. 1, v. 133; *Rondelet. de Pis.* l. 5, c. 8; *Aldrov. de Pisc.*

CORACLE (*Mar.*) a sort of small boat used by fishermen in the river Severn.

CORACOBO'TANE (*Bot.*) the *Laurus Alexandrina*.

CORACOB'ACHIA' LIS (*Anat.*) from *κόραξ*, a crow, a muscle situated in the *humerus*; so called on account of its resemblance to a crow's beak. Its use is to raise the arm upward and forward.

CORACOHYOIDÆ'US (*Anat.*) a muscle arising from the upper end of the scapula, near the neck, and inserted into the *os hyoides*, which it pulls obliquely downwards.

CORACI'DÉS (*Anat.*) an epithet for a process of the shoulder-blade; so called because it resembles a crow's beak in form.

CORACUM *Empastrum* (*Med.*) a plaster which was used as a topic for spreading ulcers. *Paul. Æginet.* l. 7, c. 17.

CORAL (*Conch.*) a hard brittle calcareous substance, which is inhabited by the Isis, a genus of animals, Class *Vermes*, Order *Zoophyta*. [vide *Corallium*]

CORAL-TREE (*Bot.*) the *Erythrina* of Linnæus, a beautiful tree of America, bearing scarlet flowers, the seeds of which are red, like coral.—*Coral-Wort*, a bulbous root, otherwise called Tooth-Wort, the *Dentaria* of Linnæus.

CORALLIUM (*Bot.*) *κοραλλίον*, or *κεραλλίον*, from *κορή*, a daughter, and *ἄλος*, the sea, because it is gathered out of the sea; a marine production which grows in the sea like a shrub, and when taken out waxes hard like a stone. While it is in the water it is of a greenish colour, but when it is dressed the best sort of it is red and smooth.

Ovid. Met. l. 15, v. 415.

*Sic et Coralium, quo primum contingit auræ
Tempore durescit.*

Dionys. Per. v. 1103.

Πάντη ἀ λίθος ἐστὶν ἐρυθρῆ κεραλλίονο.

The medicinal virtues of coral are those of a cordial, astringent, and sweetener of the blood. *Dioscor.* l. 5, c. 139; *Plin.* l. 32, c. 2; *Solin.* c. 2, p. 16; *Oribas. Med. Coll.* l. 13; *Geopon. Auct.* l. 15, c. 1; *Marbod. de Lapid. Pret.* c. 20.

CORALITICUS LAPIS (*Min.*) a white kind of marble, found near a river of Phrygia.

CORALIUM (*Bot.*) vide *Coral-tree*.

CORALLA'RIA (*Bot.*) the same as the *Adenantha*.

CORALLINA (*Con.*) Sea Coralline, or Worm-seed, a marine production resembling a plant, which is a calcareous substance, and administered to children as an anthelmintic.

CORALLINA, in the *Linnean system*, a genus of animals, Class *Vermes*, Order *Zoophyta*.

Generic Character. Animal growing in the form of a plant.

—*Stem* fixed, mostly jointed.

Species. The principal species are the *Corallina elongata officinalis*, *squamata*, &c.

CORALLOACHA'TES (*Min.*) a sort of agate resembling coral. *Plin.* l. 37, c. 10.

CORALLODE'NDRON (*Bot.*) from *κοραλλίον*, coral, and *ἄνδρον*, a tree; the Coral-tree of America, the *Erythrina* of Linnæus. *Bauh. Pin.*; *Raii Hist. Plant.*

CORALLOIDES (*Bot.*) from *κοραλλίον*, coral, and *εἶδος*, appearance; coral-wort, a fungous substance, the *Clavaria coralloides* of Linnæus, so called from its resemblance to coral.

CORALLORHIZA (*Bot.*) the *Ophrys corallorhiza* of Linnæus.

CORAL-TREE (*Bot.*) vide *Coral*.

CORAL-WORT (*Bot.*) vide *Coral*.

CORAM non *judice* (*Law*) is when a cause is brought into a court out of the judge's jurisdiction.

COR'ANICH (*Cus.*) a name for the custom of singing and howling at funerals, which was formerly prevalent among the Scotch and Irish, and is still practised among the latter to this very day.

CORA'NTO (*Mus.*) Italian for a certain air, consisting of three crotchets in a bar.

COR'BAN (*Theol.*) in Hebrew קרבן, a gift or offering made on the altar; is a term denoting the treasure that was kept for the use of the temple or the priests at Jerusalem.—*Corban* is also the ceremony among the Mahometans of performing solemn sacrifices, and also the day on which these sacrifices were made, which was the tenth of the last month in the year.

CORBA'TUM (*Min.*) Copper.

CORBEILLES (*Fort.*) French for large baskets which are filled with earth, and placed upon the parapet to serve as a protection for the besieged against the shot of the assailants.

COR'BEILS (*Arch.*) a piece of carved work representing baskets filled with flowers or fruits to finish some ornament.

COR'BEL (*Archit.*) 1. *Corbel*, *Corbet*, or *Corbil*, a shouldering-piece jutting out in walls to bear up a post, summer, beam, &c. 2. *Corbel*, or *Corbetel*, a nich in the wall of a church or other edifice in which an image is placed. 3. The vase in the Corinthian capital, which is in the form of a basket.—*Corbel-Steps*, steps in the gables of some old buildings which might serve either as an ornament, or the purpose of escape in case of fire.—*Corbel-Stones*, smooth polished stones in the front and outside of the Corbels and Niches.—*Corbel-Table*, a series of arches which project from the wall like brackets.

CORBELS (*Fort.*) vide *Corbeilles*.

CORBELS (*Archit.*) vide *Corbeils*.

COR'BET (*Archit.*) vide *Corbel*.

COR'BIE (*Her.*) or *corby*, a name for a raven.

CORBS (*Archit.*) ornaments for buildings.

COR'CHORUS (*Bot.*) or *Corchoron*, *κόρχορον*, *κάρκορος*, or *κόρχυσις*, from *κορή*, the pupil of the eye, and *κορέω*, to cleanse; a name for Pimpernel, or Chickweed, because it was thought to purge the eyes of rheum. Nicander also recommends it as a remedy against the poison of serpents. *Theophrast.*

- Hist. Plant.* 1. 7, c. 7; *Nicand. in Theriac.*; *Dioscor.* 1. 2, c. 209; *Plin.* 1. 21, c. 22; *Schol. in Nicand.*; *Suidas.*
- CORCHORUS**, in the *Linnean system*, a genus of plants, Class 13 *Polyandria*, Order 1 *Monogynia*.
- Generic Characters.* CAL. *perianth* five-leaved; *leaflets* acute.—COR. *petals* five.—STAM. *filaments* numerous; *anthers* small.—PIST. *germ* oblong; *style* thick; *stigma* two-cleft.—PER. *capsule* oblong; *seeds* very many.
- Species.* The species are annuals, as—*Corchorus olitorius*, Bristly-leaved Corchorus, or Common Jews Mallow.—*Corchorus aestuans*, *Alcea*, seu *Triumfetta*, Horn-beamed Corchorus.—*Corchorus capsularis*, Heart-leaved Corchorus. But the *Corchorus*, *hirsutus*, *Japonicus*, &c. are shrubby plants.
- CORCULUM** (*Bot.*) a diminutive of *cor*, the heart: the Circle or essence of the seed, the rudiment of the future plant, which is attached to, and involved in, the cotyledons. It consists of *plumula*, the Plume, or scaly ascending part; and *rostellum*, the Rostel, or Radicle, the simple descending part. [vide *Botany* and *Seed*]
- CORD** (*Mus. &c.*) vide *Chord*.
- CORD** (*Vet.*) Chord. 1. A strait sinew in the fore leg of a horse, which comes from the shackle-vein to the gristle of his nose. 2. That part by which the testicle of the male animal is suspended, and which passes through the abdominal ring in each groin.
- CORD of wood** (*Com.*) a parcel of firewood four feet broad, four feet high, and eight feet long.
- CORDDAGE** (*Mar.*) a general term for all ropes, but particularly for those which belong to the rigging of ships.
- CORDATURA** (*Mus.*) a collective term for the open strings of any stringed instrument, as G, D, A, E, which form the cordatura of the violin. C, E, G, and their octaves, form the cordatura of the guitar.
- CORDATUS** (*Bot.*) cordate, or heartshaped: an epithet for a leaf; *folium cordatum*, a cordate leaf, or a leaf resembling a heart in its shape. [vide *Botany*] The term cordate is sometimes compounded with other epithets, as *cordate oblong*, signifying heartshaped and lengthened out; *cordate-lanceolate-sagittate*, &c. to signify that the leaf partakes of all these forms.
- CORDEX** (*Ant.*) κορδαξ, a kind of rustic dance. *Hesychius*.
- CORDEA'U** (*Men.*) French for a cord used in measuring ground.
- CORDED** (*Her.*) an epithet for a cross which is wound about with cords, but yet so that the cords do not hide all the cross, as in the annexed figure.
- CORDELIERS** (*Ecc.*) or Grey Friars, monks of the Franciscan order, who wear a cord full of knots about their middle. *Heliot. des Ord. Mon.*
- CORDIA** (*Bot.*) a genus of plants, named, by Plumier, after Enricus Cordus, a German botanist in the sixteenth century; Class 5 *Pentandria*, Order 1 *Monogynia*.
- Generic Characters.* CAL. *perianth* one-leaved.—COR. one-petalled; *tube* petulous; *border* erect-spreading; *divisions* obtuse.—STAM. *filaments* five; *anthers* oblong.—PIST. *germ* roundish; *style* simple, with bifid divisions; *stigmas* obtuse.—PER. *drupe* globose; *seed* a furrowed nut.
- Species.* The species are trees, as—*Cordia myxa*, *Myxa*, *Nidi-Maram*, *Sebesten*, *Sebestena*, *Cornus sanguinea*, seu *Prunus Sebestena*, Smooth-leaved Cordia, or Assyrian Plum.—*Cordia Sebestena*, *Sebestena nigra*, *Caryophyllus*, seu *Novella*, Rough-leaved Cordia.—*Cordia macrophylla*, seu *Collococcus*, Broad-leaved Cordia.—*Cordia collococca*, *Collococcus*, seu *Cerusus*, Long-leaved Cordia.—*Cordia Patagonula*, seu *Patagonula*, &c. *Bauh. Hist. Plant.*; *Bauh. Pin.*; *Raii Hist. Plant.*; *Tournef. Inst.*
- CORDIA** is also the *Chretia bourreria*.

- COR'DIALS** (*Med.*) cardiac medicines, to comfort the heart.
- COR'DIER** (*Min.*) a sort of beryl.
- COR'DINEMA** (*Med.*) a head-ache attended with a vertigo.
- COR'DING-QUIRES** (*Com.*) the outside quires in a ream of paper.
- CORDO'LIIUM** (*Med.*) the heart-burn.
- CORDON** (*Archit.*) a plinth or edging of stone on the outside of a building.
- CORDON** (*Fort.*) a stone jutting out between the rampart and the base of the parapet, which goes quite round the fortification.
- CORDON** (*Mil.*) French for a chain of posts, or a line of separation between two armies, either in the field or in winter quarters.—*Cordon* also signifies ribbon, as the *cordon bleu*, the blue ribbon, the badge of the Order of the Holy Ghost.
- CORDOSUM filum** (*Med.*) a contorted thread.
- CORDOVAN** (*Mech.*) a sort of leather made of goat-skins, at Cordova in Spain.
- CORDU'BA** (*Bot.*) the *Asparagus albus* of Linnæus.
- CORDUBANARIUS** (*Law*) the name given to a cordwainer in the statutes, as 3 *H.* 8, c. 10; 5 & 6 *Ed.* 6, c. 13; &c. &c.
- COR'DWAINER** (*Mech.*) a shoemaker, so called from the Cordovan leather.
- COR'DYLA** (*Ich.*) another name for the Thunny.
- COR'DYLINE** (*Bot.*) the same as the *Yucca* of Linnæus.
- CORES** (*Archit.*) the interior part of any work in a building, as the main stones in a wall.
- COREMATA** (*Med.*) from κορέω, to cleanse, and κορήματα, brushes; is used to signify medicines for cleansing the skin. *Oribas. Med. Coll.* 1. 7, c. 15.
- COREOPSIS** (*Bot.*) a genus of plants, Class 19 *Syngenesia*, Order 3 *Polygamia frustanea*.
- Generic Characters.* CAL. doubled.—COR. compound rayed; *corollets* hermaphrodites, numerous in the disk; females, eight in the ray.—STAM. in the hermaphrodites, *filaments* five; *anthers* cylindric.—PIST. in the hermaphrodites, *germ* compressed; *style* filiform; *stigma* bifid, acute; in the females, *germ* like the hermaphrodites; *style* and *stigma* none.—PER. none; *calyx* scarcely altered; *seed*, in the hermaphrodite, solitary; in the female, none.
- Species.* The species are mostly perennials, as—*Coreopsis auriculata*, Ear-leaved Coreopsis.—*Coreopsis baccata*, Berried Coreopsis, &c.
- COREOPSIS** is also the *Rudbeckia angustifolia*.
- CORE'TA** (*Bot.*) the *Corchorus siliquosus* of Linnæus.
- CORE'TES** (*Archæol.*) pools or ponds.
- COR'IA** (*Mason.*) the rows or courses of bricks as they are laid by the bricklayer. *Vitruv.* 1. 7, c. 3; *Bald. Lex. Vitruv.*; *Salmas. Exercitat. Plin.* p. 1233.
- CORIA'GO** (*Vet.*) a disease in cattle, which consists in being hide-bound. *Columel. de Re Rust.* 1. 6, c. 12.
- CORIA'NDRUM** (*Bot.*) κοριανδρον, κοριον, or κοριαννον, Coriander, which Nicander and Dioscorides reckon among the deleterious drugs.
- Nicand. in Alexiph.*
- Ἦν γε μὲν εἰσμενον γε ποτὸν κερύσιο δυσάλξις
Αφραδῶς διαείσων ἀπεχθήμενοισι πάσιται.
- Hippocrat. de Intern. Affect.*; *Theophrast. Hist. Plant.* 1. 7, c. 3; *Dioscor.* 1. 37; *Pin.* 1. 20, c. 20; *Gal. de Simpl.* 1. 7; *Schol. in Nicander*; *Hesychius*.
- CORIANDRUM**, in the *Linnean system*, a genus of plants, Class 5 *Pentandria*, Order 2 *Digynia*.
- Generic Characters.* CAL. *umbel universal* with few rays; *partial* with many rays; *involucre universal* scarce, one-leaved; *partial* three-leaved.—COR. *universal* difform;

floscules of the disk abortive; *proper of the disk* hermaphrodite; *petals five*; *proper of the ray* hermaphrodite.—**STAM.** *filaments* simple; *anthers* roundish.—**PIST.** *germ* inferior; *styles* two; *stigmas of the ray* headed.—**PER.** none; *fruit* spherical; *seeds* two, hemispheric.

Species. The two species are annuals, as the—*Coriandrum sativum*, seu *majus*, Common or Great Coriander.—*Coriandrum testiculatum*, seu *minus*, Small or Twin-fruited Coriander. *Bauh. Hist. Plant.*; *Bauh. Pin.*; *Ger. Herb*; *Park. Theat. Botan.*; *Raii Hist.*; *Tournef. Inst. &c.*

CORIANNON (*Bot.*) vide *Coriandrum*.

CORIA'RIA (*Bot.*) a genus of plants, Class 22 *Dioecia*, Order 10 *Decandria*.

Generic Characters. **CAL.** *perianth* five-leaved—**COR.** *petals* five.—**STAM.** *filaments* ten, the length of the corolla; *anthers* oblong; in the female, barren.—**PIST.** *germs* five, compressed; *styles* five, long bristleform; *stigmas* simple.—**PER.** none; *petals* five, covering the seed; *seeds* five, kidneyform.

Species. The species are shrubs, as—*Coriaria myrtifolia*, seu *Rhus myrtifolia*, Myrtle-leaved Sumach.—*Coriaria ruscifolia*, &c.

CORIBANTIA (*Nat.*) sleeping with open eyes like a hare. *Plin.* l. 11, c. 37.

CORICEUM (*Archit.*) an exercising room belonging to the Gymnasium. *Vitruv.* l. 5, c. 2; *Bald. Lex. Vitruv.*

CO'RIDIS folia (*Bot.*) the *Linconia alopecuroidea*.

CO'RIDOR (*Fort.*) vide *Corridor*.

COR'INDUM (*Bot.*) the same as the *Cardiospermum*.

COR'INE (*Zool.*) a sort of antelope, the *Antilopa corinna* of Linnæus.

COR'INTHAS (*Bot.*) a herb which, being sodden in water, heals the stinging of serpents. *Plin.* l. 24, c. 27.

COR'INTHIAN Brass (*Ant.*) vide *Æs*.

CORINTHIAN Order (*Archit.*) the third and noblest of the five orders, invented by Callimachus. *Vitruv.* l. 4, c. 1. [vide *Architecture*]

CO'RION (*Bot.*) vide *Coriandrum*.

COR'IOTRAGEMATODE'NDROS (*Bot.*) another name for the *Myrica*.

COR'IS (*Bot.*) κόρις, a plant, the seeds of which were supposed to promote urine and menstruation, and to be good against the bite of serpents. It was otherwise called *Hypericum*. *Dioscor.* l. 3, c. 174; *Plin.* l. 26, c. 8; *Gal. de Simpl.* l. 7.

CORIS, in the *Linnean system*, a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Characters. **CAL.** *perianth* one-leaved, bellied; **COR.** one-petalled; *tube* the length of the calyx; *border* five-parted; *divisions* oblong.—**STAM.** *filaments* five, bristleform; *anthers* simple.—**PIST.** *germ* roundish; *style* filiform; *stigma* thickish.—**PER.** *capsule* globose; *seeds* very many.

Species. The only species is the *Coris Monspeiliensis*, seu *Symphytum petraeum*, Montpellier Coris.

CORIS is also the *Euphrasia linifolia*.

CORISPERMUM (*Bot.*) a genus of plants, Class 1 *Monandria*, Order 2 *Digynia*.

Generic Characters. **CAL.** none.—**COR.** *petals* two, compressed.—**STAM.** *filaments* one, shorter than the petals; *anthers* simple.—**PIST.** *germ* acute, compressed; *styles* two; *stigmas* acute.—**PER.** none; *seeds* single, oval.

Species. The two species are annuals, namely, the—*Corispermum hyssopifolium*, seu *Rhagostris*, Hyssop-leaved Tickseed.—*Corispermum squarrosum*, seu *Rhagostris foliis arundinaceis*, Rough-spiked Tickseed.

CO'RIUM (*Ant.*) any thing which serves as an integument or covering for a substance of which it forms a part; as the skin of man, the hide of an animal, the shell of an egg,

&c. so called because it covers *caro*, the flesh. *Isid.* l. 11, c. 1.

CORIUM foris facere (*Law*) to undergo a whipping; and *corium perdere*, the same; but *corium redimere*, is to compound for a whipping.

CORK (*Bot.*) the bark of the *Quercus suber* of Linnæus, which was formerly employed as an astringent, and yields an acid.—**Cork-tree**, the *Quercus suber* of Linnæus, resembles the oak in every thing but its bark, and grows in several parts of Spain and Italy.

CORK-JA'CKET (*Mech.*) in French *chemise de liège*, a machine made in the form of a seaman's jacket, by the help of which the wearer may keep himself up in the water.

CORMORANT (*Orn.*) vulgarly used for *Corvorant*.

CORN (*Med.*) vide *Clavus*.

CORN (*Vet.*) a horny substance which grows on the sole of a horse's foot, arising from inflammation.

CORN (*Agric.*) the grain of wheat, barley, rye, &c.

CORN-RENTS (*Law*) rents paid in corn, as by statute 18 Eliz. c. 6, on college leases, one-third of the old rent shall be reserved in wheat, or malt, &c.

CO'RN-FLAG (*Bot.*) the *Gladiolus* of Linnæus, a perennial.—**Corn-Flower**, or **Corn-Bottle**, an annual, the *Centaurea cyanus* of Linnæus.—**Corn-Marigold**, the *Chrysanthemum segetum*, &c. mostly perennials.—**Corn-Sallad**, the *Valeriana dentata*, &c. a perennial, and a wholesome succulent plant, which is cultivated in gardens among the early salads.

CO'RNACHINI pulvis (*Med.*) a powder consisting of scammony, antimony, diagnidium, and cream of tartar, in equal quantities.

CO'RNAGE (*Law*) *Cornagium*, a tenure in grand sergeanty, the service of which was to blow a horn when any invasion of the Scots was perceived, by which tenure many persons held their estates northward of the wall called the Picts' wall. *Co. 1 Inst.*; *Cambd. Brit.*

CORNA'RE (*Archæol.*) to blow a horn. *Math. Par.* p. 181.

CORNE (*Fort.*) or *ouvrage à corne*, French for the hornwork in a fortification.

CO'RNEA LUNA (*Chem.*) a rough tasteless mass, almost like horn, made by pouring spirit of salt, or strong brine of salt and water, on prepared crystals.

CORNEA Tunica (*Anat.*) the second coat of the eye, otherwise called *Sclerotes*, and *Tunica dura*, which proceeds from a membrane or skin in the brain, called the *Dura meninx*. It is transparent in the fore part, to admit the rays of light to pass.

CORNEA'TA OPERA (*Archæol.*) work that was agreed on by the day, until candle-light.

CO'RNEL-TREE (*Bot.*) the *Cornus mascula* of Linnæus, a shrub. The wood of the Cornel is much recommended for its durability in wheel-work, pins, and wedges, where, according to Evelyn, it will last as long as the hardest iron.

CORNELIA (*Bot.*) the *Ammiana baccifera* of Linnæus.

CORNE'LIAN-CHE'RRY (*Bot.*) the *Cornus mascula* of Linnæus.

CORNE'LIAN (*Min.*) or *carnelian*, in French *carnoline*, Italian *carnolino*, a precious stone of which rings are made, probably so called from *caro*, flesh, which it resembles.

CORNER (*Archit.*) is the common word for angle.

CO'RNER-TEETH (*Vet.*) the four teeth of a horse placed between the middle teeth and the tushes, two above and two below. They put forth when a horse is four years and a half old.

CORNERS (*Man.*) the angles of the volt, or the extremities of the four lines of the volt when working in a square.

CORNES de Bélier (*Fort.*) low flanks, in lieu of tenailles, for the defence of the ditch.

CORNESTA (*Chem.*) a retort.

CO'RNET (*Archæol.*) 1. A linen or laced head-dress of

women. 2. A scarf of black taffety, which doctors of law or physic used to wear on the collar of their robes.

CORNET (*Vet.*) an instrument used in letting blood, otherwise called a *Fleam*.

CORNET (*Chem.*) a paper head, in form of a cone, to cover a vessel.

CORNET of paper (*Com.*) a piece of paper wound about in the shape of a horn, such as grocers, &c. wrap up small wares in.

CORNET (*Mil.*) an instrument very similar to the trumpet. When the cornet was sounded alone, the ensigns were to march without the soldiers; but when the trumpet only sounded, the soldiers were to move forward without the ensigns.

Cornet is also the third commissioned officer in a troop of horse or dragoons, subordinate to the captain and lieutenant, and equivalent to the ensign among the foot.

CORNETTE (*Mil.*) French for the Cornet.—*Cornette* was also the term used to signify the standard peculiarly appropriated to the light cavalry.—*Cornette blanche*, an ornament of distinction for the superior officers in the French service, which used formerly to be worn on the top of the helmet.

CORN-FLAG (*Bot.*) vide *Corn* and *Corn-flower*.

CORNI SPECIES (*Bot.*) the *Cluytra* of Linnæus.

CORNICE (*Archit.*) *coronis*, any moulded projection which crowns or finishes the part to which it is affixed, as the cornice of a room, a door, &c.

Cornice signifies particularly the third and highest part of the Entablature, which is of different kinds, as the —*Architrave Cornice*, that immediately contiguous to the architrave.—*Coving Cornice*, which has a great case-mate or hollow in it, commonly lathed and plastered upon compass sprockets or brackets.—*Cantaliver Cornice*, that has cantalivers underneath it.—*Modillion Cornice*, that has modillions underneath.—*Mutilated Cornice*, one whose projecture is cut or interrupted to the right of the larmier, or reduced into a platband with a cimaise.

CORNICE-RING (*Gunn.*) that which lies next the trunion-ring in a piece of ordnance.

CORNICEN (*Ant.*) the trumpeter, or one who played the cornet, in the Roman army. *Veget.* l. 2, c. 12.

CORNICULA (*Surg.*) an instrument made of horn, almost in the form of a cupping-glass, except that at the more slender extremity there is a perforation.

CORNICULARIS (*Anat.*) the Coracoid process.

CORNICULATE (*Bot.*) or *Cornute*. [vide *Cornutus*]

CORNICULUM (*Ant.*) a military ornament attached to the crest of the helmet, which was given as a mark of distinction for good service. *Liv.* l. 10, c. 44; *Plin.* l. 10, c. 43.

CORNISH CHOUGH (*Her.*) a sort of crow, of a fine blue or purple-black colour, with red beak and legs, which was reckoned the finest of the species, and was therefore borne in coats of arms, as in the annexed figure. "He beareth *argent* three Cornish choughs *proper*: the name *Thomas*, M. A. of University College, Oxford."

CORNIX (*Orn.*) the Carrion Crow, the *Corvus cornix* of Linnæus.

CORN-MARIGOLD (*Bot.*) vide *Corn*.

CORNMUSE (*Mus.*) a sort of Cornish pipe, formerly much in use, and blown like the bagpipe.

CORNO (*Mus.*) Italian for the French horn.

CORN-SALLAD (*Bot.*) vide *Corn*.

CORNU-CE'RVI (*Med.*) hartshorn; or the horn of several species of the stag, from which are procured a liquor

commonly called Hartshorn, an oil, and a salt; and, by calcination, a powder called *Calcined hartshorn*.

CORNU (*Bot.*) a horn or spur at the back of some flowers. CORNUA *Exercitus* (*Ant.*) *κίρρα*, *ala*, the Roman name for what are now called the wings of an army, which were assigned as the station for their auxiliaries. *Polyb. de Rom. Mil. Liv.* l. 27, c. 2, &c.; *Ælian. Tact.*; *Polyæn. Strateg.* l. 1.—*Cornua Antennarum*, *ἀκροκίρρα*, the yard-arms of the sails.

Virg. Æn. l. 3, v. 549.

Cornua velatarum obvertimus antennarum.

Vitruv. l. 10, c. 8; *Tertull. adv. Jud.* c. 10; *Gyrald. de Navigat.* c. 12; *Scheff. de Mil. Nav.* l. 2, c. 5.—*Cornua librorum*, the gilt bosses of the stick about which the ancients rolled their books as we do our maps.

Tibull. l. 3, eleg. 1, v. 13.

Atque inter geminas pingantur cornua frontes.

Auson. Profess. Burdigal. epig. 24, v. 1.

*Quos legis a prima deductos menide libri
Doctores patriæ scito fuisse meæ.*

—*Cornua fluminum*, the turnings and windings of a river. CORNUA (*Med.*) corns, or horny excrescences which usually form on the joints of the toes.

CORNUA Uteri (*Anat.*) the horns of the womb, or the four corners which are observable in the wombs of some quadrupeds resembling horns.

CORNUCOPIA (*Ant.*) the horn which Hercules broke off from Achelous' head when he turned himself into a bull. This the nymphs filling with flowers and all manner of fruits, was afterwards applied to denote abundance. [vide *Abundantia*]

CORNUCOPIÆ (*Bot.*) a genus of plants, Class 3 *Triandria*, Order 2 *Digynia*. It is so called from the manner in which the flowers grow in the involucre, like a *cornucopia*, or horn of plenty.

Generic Character. CAL. *perianth* commonly one-leaved, funnel-form.—COR. one-valved.—STAM. *filaments* three capillary; *anthers* oblong.—PIST. *germ* turbinate; *styles* two capillary; *stigmas* cirrose.—PER. none, the corolla including the seed; *seed* single.

Species. The two species are annuals, namely—*Cornucopiæ cucullatum*, Hooded Cornucopiæ, and the *Cornucopiæ alopecuroides*, both of which are nearly allied to the *Alopecurus*.

CORNUCOPIÆ is also the *Valeriana Cornucopiæ*.

CORNUM (*Bot.*) vide *Cornus*.

CORNUMUSA (*Chem.*) a retort.

CORNUS (*Bot.*) in the Greek *κάρεια*, the name of a tree, so called from *κίρα*, because its wood resembled the horn in its hardness and toughness, on which account the ancients made their arrows of this wood.

Virg. Æn. l. 10.

Conjecto sternit jaculo, velat Itala cornus.

Claud.

Apta fretis obies, bellis accomoda cornus.

Theophrast. Hist. Plant. l. 3, c. 12; *Hesychius*; *Suidas*.

CORNUS, in the *Linnean system*, a genus of plants, Class 4 *Tetrandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *involucre* generally four-leaved; *perianth* very small.—COR. *petals* four, oblong.—STAM. *filaments* four, subulate; *anthers* roundish.—PIST. *germ* roundish, inferior; *style* filiform; *stigma* obtuse.—PER. *drupe* roundish; *seed* nut heartshaped.

Species. The species are trees, or shrubs, as—*Cornus mascula*, the Cornel-tree, or Cornelian Cherry, which, in a wild state, rises no higher than a shrub, but when cultivated it shoots up into a tree. It is a native of European countries.—*Cornus sanguinea*, Common Dogwood,

seu *Virga sanguinea*, Female Cornel, Dogberry-trees, &c. a shrub.—*Cornus florida*, Great-flowered Dogwood.—*Cornus alba*, White-berried Dogwood.—*Cornus sericea*, Blue-berried Dogwood, or Dwarf Honeysuckle, native of Russia, &c.—*Cornus suecica*, *Periclymenum*, seu *Chamaepericlymenum*, Herbaceous Dogwood, native of Canada, &c. *Chus. Hist. rar. Plant.*; *Bauh. Hist. Plant.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*; *Raii Hist. Plant.*

CORNU'TA (*Ich.*) a sort of sea-fish, which, according to Pliny, derived its name from its horny appendages, which it used to rear out of the water; it is supposed to answer to what is now called the Gurnard. *Plin.* l. 9, c. 27.

CORNU'TIA (*Bot.*) a genus of plants, called, by Plumier, after Jacob Cornus, a botanist and physician of Paris, Class 14 *Didynamia*, Order 1 *Gynnosperma*.

Species. The two species, namely, the *Cornutia pyramidata*, and the *Cornutia quinta*, are American trees.—*Cornutia* is also the *Prenna integrifolia*.

CORNUTUM *argumentum* (*Log.*) a subtle or sophistical argument, which is, as it were, horned.

CORNUTUS (*Bot.*) cornute, or hornshaped; an epithet for the anthers and some other parts of plants.

COROCO'TTA (*Zool.*) a kind of mongrel beast in Ethiopia, bred of a lion and a dog, or a wolf.

CORODIS habendo (*Law*) a writ for exacting a corody of an abbey or religious house. *Reg. Orig.* 264.

CORODY (*Law*) a sum of money, or an allowance of meat, drink, and clothing allowed by an abbot out of the monastery to the king for the maintenance of any one of his servants.

COROLLA (*Bot.*) from *corona*, a crown, the second of the seven parts of fructification, formed, according to Linnæus, of the *liber*, or inner bark, of the plant. It is commonly to be distinguished from the perianth by the fineness of its texture and the gayness of its colours; the perianth being rougher, thicker, and always green. The corolla is composed of one or more leaf-like pieces, named petals, according to the number of which it is distinguished into a one, two, three, or many-petalled corolla. When a corolla consists of one petal only, the lower contracted part is named the *tube*, as *a* in *fig. 2*, and the upper dilated part *limbus*, the limb; when a corolla is formed of two petals, the inferior narrow part of each is named the *claw*, as *fig. 4*, and the superior expanding part the *lamina*; in this case the whole of the dilated part, or border of the corolla, is named the *limb*. The corolla is moreover distinguished, according to the divisions, proportions, &c. into *bifida*, two-cleft, *trifida*, three-cleft, &c.; *regularis*, regular, when equal in the figure, magnitude, and proportion of the parts; *irregularis*, irregular, when the parts of the *limb* differ from each other; *inequalis*, unequal, when the parts do not correspond in size; *diformis*, difform, when the petals or their segments are of different forms. According to their figure, into *campanulata*, campanulate, or bell-shaped, as *fig. 1*, where *a* marks the perianth, and *b* the

Fig. 1.

Fig. 2.

Fig. 3.

Fig. 4.

corolla; *infundibuliformis*, funnel-shaped, as in *fig. 2*; *hypocratiformis*, flat, and fixed upon a tube, as in *fig. 3*, where *a* is the tube, *b* the limb; *personata*, personate [vide *Personate*]; *ringens*, ringent; *papilionacea*, papilionaceous [vide *Papilionaceus*]; *rotata*, rotate; *cyathiformis*, glass-shaped; *urceolata*, pitcher-shaped; *cruciata*, cruciform, as in *fig. 4*, where *a a* are the claws, *b* the laminas of the petals, *c* the receptacle; *concaua*, concave; *patens*

spreading; *rosacea*, rose-like; *undulata*, undulated; *placata*, plaited; *revoluta*, revolute; *torta*, twisted. In respect to the margin, into *crenata*, crenate; *serrata*, serrate; *ciliata*, ciliate. In respect to the surface, into *villosa*, villos; *tomentosa*, tomentose; *sericea*, silky; *pilosa*, hairy; *barbata*, bearded.

CORO'LLULA (*Bot.*) *Corollule*, or *Corollet*, a small corolla is a term applied to the florets in aggregate flowers.

CORO'LLARY (*Math.*) or *Consectary*, a consequence drawn from some proposition already proved or demonstrated; as if from the proposition, "That every triangle having two sides equal has two angles equal," this corollary be drawn that every equilateral triangle is also equiangular. These were called *porisms* by the ancients.

CORO'NA (*Ant.*) a crown or cap of dignity was worn as a badge of regal dignity by most of the Roman emperors; but crowns were bestowed upon military merit and success among the Romans on various occasions; wherefore it was a common emblem of victory on medals, sometimes in the mouth of the eagle, sometimes in the hand of the goddess of victory, and sometimes by itself, as in *fig. 1*, on the reverse of a monetal coin of L. Vinicius, representing four crowns, emblematical of four victories obtained by Augustus, namely, over Sextus Pompey, over the Pannonians, &c. at Actium, and lastly over Cleopatra, in Egypt.

Fig. 1.

Fig. 2.

Fig. 3.

The principal crowns bestowed on military men were as follow—*Corona civica*, a civic crown (as in the annexed figure) given to him who had rescued the life of a citizen, which was made of oak leaves. [vide

Civica]—*Corona navalis*, a naval crown given to him who first boarded an enemy's ship. It was made of gold, and beaked after the manner of ships, as in *fig. 2*, which represents the obverse of a coin of Agrippa; the legend *AGRIPPA Lucii Filii COSul. III.*—*Corona muralis*, given to him who first scaled the walls of an enemy's garrison, representing the pinnacles of a wall, as in *fig. 3*, which is also the head of Agrippa thus adorned.—*Corona castrensis*, given to him who first entered the enemy's camp; it was made in the form of a trench. These three last were of gold.—*Corona obsidionalis*, an obsidional crown, given to the general who raised a siege. It was made of the grass of the place which had been besieged.—*Corona triumphalis*, given to a general on the day of triumph, was first made of laurel, and afterwards of gold.—*Corona ovalis*, which was of myrtle, and given to a general who was entitled to an ovation. To these might be added, the *corona pectilis*, made of rose leaves stitched together; *corona oleagina*, a crown of olive leaves; *corona plectilis*, a crown plaited with flowers, grass, ivy leaves, and the like. *Plin.* l. 22, c. 45; *Gell.* l. 5, c. 6; *Paschal. de Coron.* l. 2, c. 16, &c.; *Mader. de Coron. apud Græv. Thes. Antiq. Roman.* tom. viii.; *Buleng. de Triumph.* &c.

CORONA (*Archit.*) Crown, or *Crowning*, the flat and most advanced part of the cornice, so called because it crowns the cornice and entablature. It is called in the language of the workmen the *drip*, because it serves by its projection to carry the rain off from the rest of the building. *Vitruv.* l. 2, c. 8; *Bald. Lex. Vitruv.*

CORONA (*Bot.*) vide *Crown*.—*Corona imperialis*, the same as the *Fritillaria*.—*Corona solis*, the *Bupthalmum frutescens* of Linnæus.

CORONA imperialis (*Conchol.*) a kind of *volvula*.

CORONA (*Opt.*) a luminous circle, otherwise called a *halo*, which is observable round the sun, moon, or largest planets, and usually coloured.

CORONA Borealis (*Astron.*) πρώτος εὐφαιος, Northern Crown, one of the 48 old constellations in the northern hemisphere, containing 8 stars, according to Ptolemy, Tycho, and Hevelius, 20 according to Bayer, and 21 in the British Catalogue; one of which, namely, *Lucida Coronæ*, is of the second magnitude.—*Corona Australis*, or *Meridionalis*, ὑπενίσκος, the Southern Crown, a constellation of the southern hemisphere, which contains 13 stars, according to Ptolemy, and 12 in the British Catalogue. It is called by Proclus κρονοειδῆ. *Arat. Phanom.* v. 71; *Ptol. Almag.* l. 7, c. 5; *Manil. Astron. Poet.*; *Procl. de Sphær.*; *Ricciol. Almag.* Nov. l. 6.

CORONA'LIS sutura (*Anat.*) coronal suture, from *corona*, a crown or garland, so called because the ancients wore their garlands in that direction; the suture of the head, which extends from one temple to the other, uniting the two parietal bones with the frontal.

CORONA'RE filium (*Law*) to make one's son a priest, which the lords of manors anciently prohibited those of their tenants from doing who held by villenage, as ordination changed the condition of such persons, by making those free who might otherwise have been claimed as servants.

CORONA'RIA (*Bot.*) the *Agrostema coronaria* of Linnæus.

CORONARIA vasa (*Anat.*) coronary vessels, the arteries and veins of the heart, so called because they encircle it after the manner of a *corona*, or crown. The arteries of the stomach are also called by the same name.

CORONA'RIÆ (*Bot.*) the ninth Order in Linnæus' Fragments of a Natural Method, and the tenth of his Natural Orders, containing a part of the liliaceous plants, and such as, from their natural beauty, are adapted to the making of garlands.

CORONARY (*Bot.*) an epithet for plants that are adapted for making garlands.

CORONA'TION (*Polit.*) the ceremony of investing with the crown; a term particularly applied to kings. It is however employed to denote the ceremony of investing the pope with his sacerdotal dignity and character, of which a memorial has been left on the medals of Adrian VI. as in the subjoined figures, where, as in *fig. 1*, he has on the

sacerdotal robe called the *pluviale*, and in *fig. 2* that called *planeta*.

CORONATORE eligendo (*Law*) a writ directed to the sheriff to call together the freeholders of the county in order to choose a new coroner. *F. N. B.* 163; *Reg. Orig.* 177.—*Coronatore Exonerando*, a writ for the discharge of a coroner for negligence or insufficiency in his duty. *F. N. B.* 164; *Reg. Orig.* 177; *2 Inst.* 32.

CORONA'TUS Homo (*Ecc.*) one who had received the first tonsure preparatory to superior orders; so called because the tonsure was in the form of a *corona*, or crown of thorns.

CORO'NE (*Anat.*) from κροων, a crow; the acute process of

the lower jaw-bone, so called from its supposed resemblance to a crow's bill.

CORONE (*Law*) French for crown; under which head were formerly brought all matters of the crown, as treason, felony, &c.

CORONE'OLA (*Bot.*) a rose which flowered in autumn. *Plin.* l. 21, c. 4.

CORONER (*Law*) an officer so called from *corona*, a crown, because, with the assistance of a jury of twelve men, he makes inquisition into the untimely deaths of any of the king's subjects. *Bract.* l. 3, tract 2, c. 5, &c.; *Britt.* c. 1; *Flet.* l. 1, c. 18; *Mirror.* c. 1, § 3; *2 Inst.* 31, &c.—*Sovereign coroner*, the Lord Chief Justice of the King's Bench.—*Coroner of the verge*, an officer who has jurisdiction within the verge or compass of the King's Court. *Crompt. Jur.* 102.

CORONET (*Her.*) a small crown worn by the nobility, as a Duke's, Marquiss', Earl's, Viscount's, and Baron's crown. [vide *Duke*, &c.]

CORONET (*Vet.*) or *Cronet*, the upper part of a horse's hoof, where the hair grows down; or it is the lowest part of the pastern, which runs round the *coffin*.

CORONILLA (*Bot.*) a diminutive of *corona*, is the name of a genus of plants in the *Linnean system*, Class 17 *Diadelphica*, Order 4 *Decandria*.

Generic Characters. CAL. *umbellule* simple; *perianth* one-leaved, compressed.—COR. *papilionaceous*; *standard* heartshaped; *wings* ovate; *keel* acuminate, compressed.—STAM. *filaments* diadelphous; *anthers* simple.—PIST. *germ* columnar; *stigma* obtuse.—PER. *legume* very long, two-valved; *seeds* many.

Species. The species are mostly perennials, and natives of the South of Europe, as—*Coronilla emerus*, *Emerus*, seu *Colutea*, *Scorpion* Sena.—*Coronilla*, seu *Polygala*, *Linnear-leaved Coronilla*.—*Coronilla glauca*, seu *Colutea*, *Great shrubby Coronilla*.—*Coronilla minima*, the *Least Coronilla*.—*Coronilla scandens*, *Climbing Coronilla*. But the *Coronilla securidaca*, *Securidaca*, seu *Hedysarum*, *Hatchet Vetch*, is an annual. *Clus. Hist. rar. Plant.*; *Bauh. Hist. Plant.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*; *Ravi Hist. Plant.*; *Tournef. Inst.*

CORONILLA is also the *Galega villosa*.

CORONIS (*Archit.*) vide *Cornice*.

CORONIS'MA (*Ant.*) κορωνισμα, a begging sort of song among the Rhodians, sung by persons carrying about a crow or jackdaw, whence they were called *coronistæ*, from κροων, a crow. *Athen.* l. 8, c. 15.

CORONO'IDES (*Anat.*) from κροων, a crow, and εἶδος, likeness; an epithet for different parts of the body bearing a resemblance to a crow's beak; as the *Coronoides Apophysis Ulnæ*; *Coronoides Apophysis maxillæ*, &c.

CORO'NOPUS (*Bot.*) κρονοπυς, a vulnerary plant; so called from the resemblance which its leaves bear to the foot of κροων, a crow. It is reckoned efficacious against the bites of venomous creatures. *Theophrast. Hist. Plant.* l. 7, c. 9; *Dioscor.* l. 2, c. 158; *Plin.* l. 22, c. 19.

CORO'PHIUM (*Ich.*) κοροφίον, a kind of crab fish.

COROZO'RE (*Bot.*) another name for the *Sedum*.

CORPORA Albicantia (*Anat.*) Glands of a white colour in the brain.—*Corpora cavernosa*, two hollow crura forming the *Penis*.—*Corpora fimbriata*, the flattened terminations of the posterior crura of the fornix of the brain.—*Corpora lobosa*, the cortical part of the kidney.—*Corpora nervospongia*, or *nervosa*, the nervous spongy bodies of the penis.—*Corpora olivaria*, the two external prominences of the medulla oblongata.—*Corpora pyramidalia*, the two internal prominences of the medulla oblongata.—*Corpora quadrigemina*, vide *Tubercula quadrigemina*.—*Corpora striata*, two prominences in the lateral ventricle of the brain.

CORPORAL (*Law*) an epithet for any thing belonging to the body, as corporal punishment.

CORPORAL (*Mil.*) a rank and file man, with superior pay to that of common soldiers, and with nominal rank under a serjeant.—*A Lance Corporal*, in French *corporal breveté*, one who acts as corporal, receiving pay as a private.

CORPORAL Oath (*Law*) is a name given to the ordinary oath administered in courts of law, because the party who takes it is obliged to lay his hand on the Bible.

CORPORAL of a ship (*Mar.*) an inferior officer, whose business it is to look after all the small shot, arms, &c.

CORPORALE (*Ecc.*) a communion cloth used in the Romish church, being a square piece of linen, on which the chalice and host are placed by the priest at mass. *Leg. Alphons. Reg. Castell.* part 1, tit. 4, leg. 57; *Amalar. de Eccles. Offic.* c. 19.

CORPORATION (*Law*) a body politic or incorporate, so called because the persons composing it are made into one body. *Corporations* are of different kinds as to the persons, as a—*Sole corporation*, when in one person, as in the King.—*Aggregate corporation*, when consisting of many, as a Dean and Chapter.—*Temporal corporation*, which is either *temporal by the King*, where there is a Mayor and Commonalty, as in many towns; or *temporal by the Common Law*, as the Parliament, consisting of the King as the head, and the two Houses which are the body.—*Spiritual corporation*, as consisting of Bishops, Deans, &c.—*Mixed corporation*, composed of persons spiritual and temporal, as the Heads of Colleges, Hospitals, &c.—*Corporations*, as to their object, are either *Ecclesiastical* or *Lay*. Lay Corporations are of two kinds, *civil* and *elemosynary*. Of the former sort, are those erected for the good government of a town; of the latter, are colleges, hospitals, &c.

CORPOREAL Inheritance (*Law*) that which consists of houses, lands, &c.

CORPOREITY (*Phy.*) a term among the schoolmen for the nature of a body.

CORPORIFICATION (*Chem.*) the giving to a spirit the same, or a similar, body to what it had before.

CORPOSANT (*Nat.*) in Italian *Corpo santo*, another name for the volatile meteor, called the *Ignis fatuus*.

CORPS (*Archit.*) any part that projects or advances beyond the naked wall, and serves as a ground for some decoration.

CORPS (*Mil.*) French for any body of forces; of which there are different kinds, as—*Corps d'armée*, the whole army.—*Corps de Garde*, the Guards.—*Corps de Garde avancée*, advanced post of the cavalry.—*Petit corps de Garde*, the quarter guard, which is more in front.—*Corps de reserve*, the troops in reserve.—*Corps de Bataille*, the whole line of battle.—*Corps de Garde* signifies the place, i. e. guard-house, as well as the men who occupy it.—*Corps de Casernes*, the barracks.

CORPUS (*Anat.*) a name given to several substances, or parts in the body, as *Corpus callosum*, *luteum*, &c.—*Corpus callosum*, the white medullary part joining the two hemispheres of the brain.—*Corpus glandulosum*, the prostate gland.—*Corpus luteum*, the granulous papilla which is found in that part of the ovarium of females from which an ovum has proceeded.—*Corpus mucosum*, or *reticulare*, vide *Rete mucosum*.—*Corpus pampiniforme*, or *corpus pyramidale*, a name given to the spermatic chord, and the thoracic duct.—*Corpus sesamoideum*, a little prominence at the entrance of the pulmonary artery.—*Corpus spongiosum urethrae*, the spongy substance of the Urethrae in male animals; the end of which, next to the prostate gland, is, on account of its bigness, called the *Bulb* of the Urethra.

CORPUS (*Lit.*) a term used to denote any matter of learning

that is collected and digested into a regular and uniform whole, as *corpus canonum*, a body of canon law, &c.

CORPUS Christi Day (*Ecc.*) a moveable festival appointed by the church of Rome in honour of the sacrament of the Lord's supper. It is mentioned in the statute 32 Hen. 8, c. 21.

CORPUS cum Causa (*Law*) a writ issuing out of Chancery to remove both the body and record touching the cause of any man lying in execution upon a judgment for debt into the King's Bench, &c. there to lie till he has satisfied the judgment. *F. N. B.* 251.

CORPUSCLES (*Phy.*) the smallest parts or physical atoms of a body.

CORPUSCULAR Attraction (*Phy.*) that power by which the minute component parts of bodies are united and adhere to each other.—*Corpuscular Philosophy*, that scheme, or system of physics, in which the phenomena of bodies are accounted for from the motion, rest, position, &c. of the corpuscles or atoms of which bodies are composed.

CORR (*Ant.*) in the Hebrew כורר, a Hebrew measure containing two quarts English. *Isid. Orig.* l. 14, c. 25.

CORRAGO (*Bot.*) the herb Bugloss.

CORRE (*Anat.*) from κείρω, to shave; that part of the jaws where the beard grows.

CORRECTIO (*Rhet.*) *ἰπαραβολή*, a figure of speech by which the orator recalls what he has said, and substitutes something fitter in its place. *Cic. Or.* l. 3, c. 54; *Quintil.* l. 9, c. 2; *Rutil. Lup.* p. 5; *Georg. Trapezunt. Rhet.* l. 5, p. 79; *Jul. Rufinian.* p. 32.

CORRECTION (*Print.*) the correcting of proofs as they come from the compositors' hands, in order to free them from all faults, and fit them for the press. Corrections are placed on the margin as well as the text, and denoted by different marks, according to the nature of the fault; as δ , i. e. dele, for any thing to be effaced; \wedge , caret. i. e. wanting, for what is to be added; \sim , to denote that words, letters, &c. are too distant from each other; $\#$, to show that they are too close, &c. [vide *Printing*]

CORRECTION (*Med.*) is when a salt, or any other thing, is added to a medicine to quicken it.

CORRECTING-STONE (*Print.*) a large slab of marble, or Purbeck-stone, placed on a stand, at which the compositor corrects the formes from the proofs that are returned to him.

CORRECTIVES (*Med.*) medicines which serve to correct the qualities of other medicines.

CORRECTOR of the press (*Print.*) one especially appointed in a printing office to correct the proofs as they come rough from the compositors' hands; in distinction from the *reader*, who looks over the revises, or after-proofs of the same sheet, and fits them finally for the press.

CORRECTOR of the staple (*Com.*) an officer of the staple, who records the bargains of merchants made there.

CORRECTORES (*Ant.*) provincial magistrates in Italy. *Panciroi. Not. Dignit. Imp. Orient.* c. 99.

CORREGIDOR (*Polit.*) a chief magistrate in a Spanish town.

CORRELATIVES (*Phy.*) things that bear a natural relation to each other, as a father to a son.

CORRELET (*Mil.*) vide *Corslet*.

CORRESPONDENCE (*Mil.*) a written or unwritten intercourse kept up between officers at the head of an army who communicate together in order to act in concert.—*Secret correspondence* is secret communication, or intelligence, which subsists between the commander and some confidential agent acting in another quarter.

CORRESPONDENT (*Com.*) he who corresponds, or carries on a commercial intercourse by letter with another person at a distance.

CORRIDOR (*Fort.*) the covert-way lying round about the whole compass of the fortification of a place, between the outside of the moat and the pallisades.

CORRIDOR (*Archit.*) a long gallery leading to several chambers.

CORRIGIOLA (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order *Trigynia*.
Generic Character. CAL. *perianth* five-leaved; *leaflets* ovate.—COR. *petals* five, ovate.—STAM. *filaments* five, subulate; *anthers* simple.—PIST. *germ* ovate; *style* none; *stigmas* three, obtuse.—PER. none; *seed* single.
Species. The single species is the *Corrigiola litoralis*, *Polygonifolia*, *Polygonum littoreum*, seu *Alsine palustris*.

CORRIGIOLA is also the *Illecebrum verticillatum*.

CORRIRA (*Orn.*) a genus of birds of the Order *Grallæ*.
Generic Character. Bill short, without teeth.—Thighs longer than the body.—Feet four-toed, palmate.
Species. The single species is the *Corrira Italica*.

CORROBORANTIA (*Med.*) corroborative or strengthening Medicines.

CORRODENTIA (*Med.*) medicines which consume, or eat away proud flesh.

CORRODY (*Law*) vide *Corody*.

CORRODY (*Mil.*) a defalcation from an allowance or salary for some other than the original purpose; thus, an officer, who retires on the full pay of a short company or troop holds a corrody.

CORROSION (*Chem.*) a dissolution of mixed bodies by *corrosive menstrua*.

CORROSIVE *Sublimate* (*Chem.*) or *Corrosive muriate of mercury*, is a perchloride of mercury, an extremely acrid and violently poisonous preparation.

CORROSIVES (*Chem.*) saline menstrua, which have the property of dissolving bodies.

CORRU'DA (*Bot.*) a herb called wild Asparagus. *Plin.* l. 20, c. 13.

CORRUGANT (*Anat.*) an epithet for muscles which help to knit the brows, or to draw the skin into wrinkles.

CORRUGATOR *Supercilii* (*Anat.*) the muscle which pulls down the skin of the forehead so as to make it wrinkle.

CORRUPTICOLÆ (*Ecc.*) a sect of heretics in Egypt, in the sixth century, who maintained that the body of Jesus was corruptible.

CORRUPTION (*Phy.*) the destruction of the form, or proper mode of existence of any natural body.

CORRUPTION of blood (*Law*) an infection growing to the blood, estate, and issue of a man attainted of treason.

CORRUSCATION (*Phy.*) a flash of lightning, or of light from a sudden spark of fire.

CORSAIR (*Mar.*) in French *pirate barbaresque*, a name for the piratical cruisers on the coast of Barbary, which plunder the merchant ships of European nations, with whom they are at peace.

CORSE-PRESENT (*Law*) from the French *corps present*, a mortuary; so called, probably, because where a mortuary became due on the death of any man, the best or second best beast was presented to the priest, and carried with the *corps*. *Stat. 21 Hen. 8, c. 5.*

COR'SLET (*Mil.*) from the Latin *corpusculum*, a little body; the name of an ancient piece of armour, with which the body or trunk of a man was protected. It was used by the pikemen. 4 & 5 P. & M. c. 2.

COR'SNED-BREAD (*Archæol.*) or *ordeal-bread*, a piece of bread consecrated by the priest for that purpose, which was eaten by the Saxons when they would clear themselves of any crime laid to their charge; in which case they wished it might be poison, and kill them if they were guilty.

CORSOÏDES (*Min.*) vide *Amianthus Lapis*.

CORTALON (*Bot.*) Groundsel.

CORTARIUM (*Archæol.*) vide *Cortularium*.

CORTEGE (*Cus.*) French for the train, or retinue, that accompanies a person of distinction.

CORTES (*Polit.*) the states, or the assembly of the states of Spain and of Portugal.

CORTEX (*Bot.*) the outer bark of a plant, or the second integument of the *epidermis*, so called from *corium*, the hide or skin, and *tego*, to cover.

CORTEX (*Med.*) this word taken absolutely signifies Peruvian-bark, but it is applied with an epithet to many sorts of bark, which are used medicinally, as—*Cortex angelicæ*, the bark of a tree growing in Grenada.—*Cortex Chinchinæ*, the cinchona.—*Cortex tavola*, a bark supposed to belong to a tree which affords the *Anisum stellatum*, &c.

CORTEX Cerebri (*Anat.*) the cortical substance of the brain.

CORTICAL-BUD (*Bot.*) *gemma corticalis*, a bud having its origin from the scales of the bark.

CORTICALIS substantia (*Med.*) the external substance of the brain, which, being of a darker colour than the internal, is, on that account, called *cortical*.

CORTICATUS (*Bot.*) Corticate, an epithet for a capsule; *capsula corticata*, a capsule in which the outer hard part is lined by an inner soft layer, as in *Swietenia*, &c.; or when the outer spongy or cork-like part covers the proper crust of the capsule, as in *Triumfetta*, &c.

CORTIN (*Fort.*) or *curtain*, the wall or distance between the flanks of two bastions.

CORTINA (*Ant.*) 1. A cauldron, or kettle, in which wool was dyed. *Cat. de Re Rust. c. 67.* 2. The tripods sacred to Apollo, from which the oracles were delivered. *Plin.* l. 34, c. 3; *Suet. in August. c. 5.* 3. The bar, or that place in a court of law where the counsellors, the secretaries, &c. sate. *Tac. de Orat. c. 19.*—*Cortina Theatri*, the convex capacity of the theatre. *Virg. Ætn. v. 294.*—*Cortina cæli*, the hemisphere of the heavens. *Ennius, apud Varr. de Lat. Ling. l. 6, c. 3.*

CORTULARIUM (*Archæol.*) or *cortarium*, a yard adjoining to a farm.

CORTUSA (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.
Generic Character. CAL. *perianth* five-cleft; *divisions* lanceolate.—COR. one-petalled; *tube* scarce any; *border* flat, five-parted; *divisions* ovate; *throat* with an elevated ring.—STAM. *filaments* five, obtuse; *anthers* two-plated oblong.—PIST. *germ* ovate; *style* filiform; *stigma* almost headed.—PER. *capsule* ovate, acuminate; *seeds* numerous; *receptacle* columnar.
Species. The two species are—*Cortusa Matthioli*, *Sanicula montana*, seu *Cortusa Matthioli*, a biennial, and native of Austria.—*Cortusa Gmelini*, very similar to the former. *Clus. Hist. rar. Plant.; Ger. Herb.; Park. Theat. Botan.; Raii Hist.*

CORU-CANARICA (*Bot.*) a quince-like tree of Malabar, which is antidysenteric.

CORVET (*Man.*) vide *Curvet*.

CORVETTE (*Mar.*) French for any vessel under twenty guns.

CORVINUS lapis (*Min.*) a stone, found in India, remarkable for making a noise like thunder when heated.

CORVITORES (*Ant.*) tumblers and merry-andrews. *Fest. de Verb. Signif.*

CORVINDUM (*Min.*) a sort of adamantine earth.

CORVORANT (*Orn.*) vulgarly called *Cormorant*, an exceedingly voracious bird of the pelican tribe, the *Pelicanus carbo* of Linnæus. It builds on the highest cliffs hanging over the sea, and is tamed by the Chinese to catch fish.

CORVORANT'S foot (*Conch.*) a sort of testaceous animal, the *Strombus pes pelecani* of Linnæus.

CORVUS (*Ant.*) vide *Caurus*.

CORVUS (*Ant.*) *κόραξ*, a kind of iron-hook or grapple in the form of a crow's beak, which was used in war, particularly in ships. *Polyb. l. 1, c. 22; Diodor. l. 17; Vitruv. l. 10, c. 19; Curt. l. 4, c. 2; Bald. Lex. Vitruv.*

CORVUS (*Orn.*) a genus of animals of the Class *Aves*, Order *Pica*.

Generic Characters. Bill convex, sharp-edged.—*Nostrils* covered with setaceous recumbent feathers.—*Tongue* cartilaginous, bifid.—*Feet* fit for walking.

Species. The species of this tribe are distinguished in the English into the Raven, Crow, Rook, Jay, Nutcracker, and Magpie; as—*Corvus corax*, the Raven.—*Corvus corone*, the Carrion Crow.—*Corvus cornix*, the Hooded Crow.—*Corvus frugilegus*, the Rook.—*Corvus Monedula*, the Jackdaw.—*Corvus glandarius*, the Jay.—*Corvus cristatus*, the Blue Jay.—*Corvus caryocatactes*, the Nutcracker.—*Corvus pica*, the Magpie.

CORVUS (*Astron.*) in the Greek *κόραξ*, in the Arabic *Algorab*; the Raven, one of the forty-eight old constellations in the Southern hemisphere, containing seven stars, according to Ptolemy, Tycho, and Bayer, and nine in the British catalogue. This bird is fabled to have been translated to heaven by Apollo, for discovering to him the infidelity of the nymph Coronis. *Arat. Phœnom.* v. 444; *Eratosth. Characterism*; *Ptol. Almag.* l. 7, c. 5; *Hygin. Poet. Astron.*

CORYBANTES (*Ant.*) priests of Cybele. *Strab.* l. 10; *Plin.* l. 21, c. 37.

CORYBANTIAN (*Ant.*) *κορυβαντιαν*, to sleep with one's eyes open, after the manner of the Corybantes, when they watched over Jupiter in his infancy. *Plin.* l. 21, c. 37.

CORYCUS (*Med.*) *κόρυκος*, a sort of ball among the ancients, probably made of leather, and stuffed with the acini of the fig, or with bran, &c. for weak persons, but with sand for stronger persons; with which, when it was suspended from the ceiling, they used to exercise themselves in throwing it from them and catching it again.

CORYDALES (*Bot.*) the twenty eighth order of Linnæus' Fragments of a Natural Method, and the twenty-fourth of his natural orders.

CORYDALIS (*Orn.*) the Lark.

CORYLUS (*Bot.*) the Hazle-Nut, a well-known tree, both among the ancients and moderns, is, in the Linneæan system, a genus of plants, Class 21 *Monœcia*, Order 8 *Polyandria*.

Generic Character. CAL. ament common imbricated; scales one-flowered.—COR. none.—STAM. filaments eight; anthers ovate, oblong.—Female flowers remote from the males.—PIST. germ roundish.—PER. none; seed nut ovate.

Species. The species are trees, which bear the well-known nut, called the Hazle-Nut, or Filbert, which are varieties of the *Corylus avellana*.

CORYMB (*Bot.*) *corymbus*, signifies literally a cluster of ivy berries, but is employed in modern Botany to denote a sort of inflorescence which is formed from a spike, each flower being furnished with a proper peduncle, and proportionally elevated. The *corymb*, the *cyme*, and the *umbel*, bear a strong resemblance to each other; but they may be distinguished as follow. In the *corymb*, fig. 1,

the peduncle or pedicels, *a a a a*, take their rise from different heights; but the lower ones being longer, they all form nearly an even surface at top. In the *umbel*, fig. 2, the peduncles *c c c c* take their rise from the same centre; and the whole is disposed with remarkable regularity. In the *cyme*, fig. 3, the peduncles, as in fig. 2, also take their rise from the same centre; but the sub-divisions are irregular. [*vide Botany, Inflorescence*]

CORYMBIATE (*Ant.*) set about and garnished with clusters of ivy berries.

CORYMBIFERÆ (*Bot.*) the name of one of Ray's classes; and of the third sub-division in the order of compound flowers in Linnæus's Natural Arrangement.

CORYMBION (*Bot.*) the herb *Lychnis*.

CORYMBITES (*Bot.*) a kind of spurge with broad leaves.

CORYMBIUM (*Bot.*) a genus of plants, Class 19 *Syngenesia*, Order 6 *Monogamia*.

Generic Character. CAL. perianth two-leaved; leaflets erect.—COR. one-petalled.—STAM. filaments five; anthers oblong.—PIST. germ hirsute; style simple.—PER. none; seed single; receptacle naked.

Species. The species are mostly natives of the Cape of Good Hope, as—*Corymbium scabrum*, *glabrum*, *filiforme*, &c.

CORYNOCA'RPUS (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Character. CAL. perianth five-leaved.—COR. five-petalled; nectary with five leaflets.—STAM. filaments subulate; anthers oblong.—PIST. germ superior; style short; stigma obtuse.—PER. nut club-shaped; seed an oblong kernel.

Species. The single species is the *Corynocarpus lævigata*, native of New Zealand.

CORYPHA (*Bot.*) a genus of palms, of which the principal species is the *Corypha umbraculifera*, *Palma montana*, *Codda-panna*, seu *Laribus*, a native of Malabar, which scarcely flowers before it is thirty or forty years old.

CORYPHÆNA (*Ich.*) a genus of animals, of the Class *Pisces*, Order *Thoracica*.

Generic Character. Head sloping suddenly downwards.—Gill-Membrane five-rayed.—Dorsal fin as long as the back.

Species. The principal species are the—*Coryphæna hippuris*, *equisetalis*, *cœrulea*, &c.

CORYPHÆUS (*Ant.*) *κορυφαῖος*, from *κορυφή*, a top; the leader of the dance, or the band. *Suidas*.

CORYPHE (*Anat.*) *κορυφή*, the vertex or top of the head.

CORYTHIA (*Ich.*) a kind of purple fish. *Plin.* l. 32, c. 7.

CORYZA (*Med.*) *κόρυζα*, rendered by Celsus *gravedo*, by Cælius Aurelianus *catarrhus ad Nares*, signifies a defluxion from the head by reason of cold. *Cels.* l. 4, c. 2; *Cæl. Aurelian.*

COSCINOMANCY (*Ant.*) *κοσκινομαντεία*, from *μαντεία*, a divination, and *κόσκινον*, a sieve; a sort of divination by means of a sieve, used particularly in discovering suspected persons. The sieve was suspended in a room, and the diviner muttered a formula of words, repeating the name of the suspected person, when, if the sieve moved or shook, the suspicion was confirmed.

COSECANT (*Geom.*) the secant of an arc, which is the complement of another arc to 90 degrees.

CO'SENAGE (*Law*) a writ for the rightful heir against an intruder. *Brit. c.* 29; *F. N. B.* 221.

CO'SENING (*Law*) any thing done deceitfully, whether by contracts or not, which cannot be designated by any other name. *West. Symb.* p. 2, sect. 68.

CO'SHERING (*Law*) a prerogative which some lords of manors had, to sleep and feast with their retinue at the houses of their tenants.

CO'SIN (*Law*) or *cosen*, a cousin.

CO'SINE (*Geom.*) the right line of an arc, which is the complement of another to 90 degrees.

COSMÊTA (*Ant.*) from *κοσμέω*, to adorn; a dresser or keeper of the wardrobe. *Schol. in Juv. sat.* 6, v. 476.

COSMÊTA (*Chem.*) Antimony.

COSMÉTICS (*Med.*) *κοσμητικά*, from *κοσμίω*, to beautify; preparations which whiten and soften the skin, or in general any thing which tends to beautify the complexion.

- COSMIA'NA** *Antidotus* (*Med.*) an antidote mentioned by Marcellus Empiricus, c. 29.
- COSMIA'NUM** (*Med.*) a very sweet ointment; so called from one Cosmus, a perfumer.
- COSMIA'TICUM** (*Ant.*) from κοσμίω, to adorn; a tax on female ornaments.
- COS'MICAL** (*Astron.*) a term denoting one of the poetical risings and settings of the stars. A star is said to rise *cosmically*, when it rises with the sun; and to set *cosmically*, when it sets at the same time as the sun rises. [vide *Astronomy*]
- COSMO'GRAPHY** (*Lit.*) κοσμογραφία, from κόσμος, the world, and γράφω, to describe; the science of describing the several parts of the visible world, delineating them according to their number, position, &c.
- COSMOLABE** (*Mech.*) from κόσμος, the world, and λαβείν, to take; an ancient mathematical instrument for measuring distances both in heaven and earth.
- COSMO'LOGY** (*Lit.*) from κόσμος, the world, and λόγος, discourse; the study of the world in general.
- COSMO'METRY** (*Math.*) from κόσμος, the world, and μέτρον, to measure; the measurement of the world by degrees and minutes.
- COSMO'POLITE** (*Polit.*) from κόσμος, the world, and πολίτης, a citizen; a citizen of the world.
- COS'MOS** (*Med.*) κοσμός, a term used by Hippocrates for the order and series of critical days.
- COSS**, *Rule of* (*Algeb.*) another name for algebra, signifying the "Rule of the Thing," the unknown quantity being called the *Cosa*, or thing: whence also the term *cosmic numbers*.
- COS'SACKS** (*Mil.*) a sort of irregular troops attached to the Russian army, who followed originally a predatory system, for which their enterprising temper and hardy habits peculiarly qualified them. They are at present distinguished principally by their dress and accoutrements.
- COS'SET** (*Hus.*) a lamb, colt, calf, &c. brought up by the hand without the dam.
- COS'SIC Numbers** (*Algeb.*) the powers of numbers, as the roots, the squares, the cubes, &c.
- COS'SUM** (*Med.*) a virulent ulcer of the nose.
- COS'SYPHUS** (*Ent.*) the name given by Fabricius to some species of insects of the genus *Lampyris*, having their feelers hatchet-shaped.
- COST** (*Her.*) or *Cottise*, an ordinary, which contains a fourth part of the bend or half. When only one is borne, it is called a *Cost*; but if they be borne by couples, as they mostly are between a bend, they are then called *Cottises*; as "He beareth *sable*, a bend, *argent*, between two *cottises*, dancette, or, by the name of *Clopton* of Suffolk."

- COSTÆ** (*Anat.*) the ribs, which are in number 24, on each side of the vertebræ of the back. They are distinguished into *veræ*, true, and *falsæ*, false.—*Costæ veræ* are the seven uppermost ribs; so called because their cartilaginous ends are received into the sinus of the sternum.—*Costæ falsæ*, the five lowermost ribs; so called because they are shorter and softer, and not joined to the extremity of the sternum.
- COSTARD** (*Bot.*) an early summer apple, so much esteemed formerly that the sellers of these apples were called *Costard-mongers*.
- COSTMARY** (*Bot.*) the *Tanacetum balsamita* of Linnæus, a perennial, and odoriferous plant.
- COSTO-HYOIDES** (*Anat.*) from *costæ*, a rib, and *hyoideus*, the hyoidal bone; a muscle so called from its origin and insertion.
- COSTS** (*Lav.*) *Expensæ litis*, those expenses which necessarily ensue from the prosecution of any suit in a court of law, consisting of stamps and duties to the government,

- to the officers of the court, &c. These are in some cases recoverable from the party who lose the causes.
- COSTUS** (*Bot.*) κόσος, a kind of shrub growing in Syria and Arabia, the root of which has a most grateful spicy smell; it is a stomachic and deobstruent, being also of use in vertiginous disorders. *Theoph. Hist. Plant.* l. 9, c. 7; *Dioscor.* l. 1, c. 15; *Plin.* l. 12, c. 12; *Gal. de Simpl.*
- COSTUS**, in the *Linnean system*, a genus of plants, Class 1 *Monandria*, Order 1 *Monogynia*.
- Generic Characters.* CAL. perianth three-toothed—COR. petals three-lanceolate; nectary one-leaved; lower lip broader than the upper; border spreading.—STAM. filament supplied by the upper lip of the nectary, to which grows a twofold anther.—PIST. germ inferior; style filiform; stigma headed.—PER. capsule roundish; seeds many.
- Species.* The species are natives of the Indies, as the—*Costus Arabicus*, seu *Toganakua*.—*Costus glabratus*, &c.
- COSTIVE** (*Med.*) a term denoting the constipation of the alvus.
- COT-GARE** (*Husband.*) refuse wool, so clotted together that it cannot be pulled asunder. It is mentioned in statute 13 R. 2.
- COTA** (*Bot.*) the *Anthemis cotula* of Linnæus.
- COTANGENT** (*Geom.*) the tangent of any complementary arc, or what the arc wants of a quadrant, or 90°.
- COTARIA** (*Min.*) a quarry or mine out of which whetstones are dug.
- COTARIUS** (*Archæol.*) a cottager, or one who held by a free socage tenure.
- COTARO'NIUM** (*Alch.*) a word coined by Paracelsus to denote the liquor into which all bodies and even their elements may be dissolved.
- COTER** (*Mensur.*) in French signifies to mark upon the plans and profiles of works of fortification, the exact measurement thereof divided into toises, feet, inches, and lines.
- COTERELLI** (*Archæol.*) a sort of straggling thieves or plunderers, like the moss-troopers on the borders of Scotland.
- COTE'RELLUS** (*Archæol.*) a servile tenant who held lands in mere villenage.
- COTER'VE** (*Cus.*) a French term signifying literally a trading partnership; is taken also for a club, or social party, formed for amusement.
- COTE'SIAN Theorem** (*Math.*) a particular property of the circle; so called from Mr. Cotes, by whom it was discovered.
- COTESWALD** (*Archæol.*) a place for sheep-cotes and sheep feeding on hills, from the Saxon cote and wald, a wood.
- COTHON** (*Ant.*) a key or wharf. *Fest. de Verb. Sig.*
- COTHURNUS** (*Ant.*) κόθορνος, a sort of buskin and shoe, which was worn by tragedians and hunters of both sexes. *Virg. Æn.* l. 1, v. 336.
- Virginibus Tyriis mos est gestare pharetram,
Purpureoque atè suras vincire cothurno.*
- Ovid. Amor.* l. 3, el. 1, v. 14.
- Lydius apta pedum vincla cothurnus erat.*
- Whence a man who sided with both parties was called a *cothurnus*. *Xenoph. Hist. Græc.* l. 2; and also the tragic muse was called by the same name.
- Virg. Ecl.* 3, v. 10.
- Solu Sophocleo tua carmina digna cothurno.*
- Horat. Art. Poet.* v. 89; *Poll. Onym.* l. 6, sect. 16, &c.; *Serv. in Virg. Æn.*; *Hesychius.*; *Isid.* l. 19, c. 34.
- COTICE** (*Her.*) vide *Cost*.
- COTICED** (*Her.*) or *Cotised*, an epithet for any thing that is accosted, sided, or accompanied by another.
- COTILLON** (*Mus.*) a lively animated kind of dance.
- COTINUS** (*Bot.*) the same as the *Rhus*.
- COTIS** (*Anat.*) κοτίς, a term used by Hippocrates for the posterior part of the head, or the hollow of the neck.

COTLAND (*Law*) Land held by a cottager, whether in so-
 cage or villenage. *Paroch. Antiq.*

COTONEA (*Bot.*) a herb smelling sweetly like thyme.
Plin. l. 26, c. 7.

COTONEA, in the *Linnean System*, is another name for the
Cydonia.

COTONEA/STER (*Bot.*) the *Mespilus chamæ*.

COTONE/UM (*Bot.*) a quince.

COTSCJOPIN (*Bot.*) another name for the *Gardinea*.

COTSE/THLA (*Archæol.*) a little dwelling belonging to a
 small farm.

COTSE/THUS (*Law*) a cottager or cottage-holder, who, by
 servile tenure, was bound to work for the lord.

COTTA (*Com.*) a sort of measure, used for measuring of
 cauries or cowries, of which it holds 12,000.

COTTEM (*Bot.*) the *Mentha periculooides* of Linnæus.

COTTANUM (*Bot.*) a small kind of Syrian fig.

COTTISES (*Her.*) vide *Cost*.

COTTISED (*Her.*) vide *Cotticed*.

COTTOIDES (*Ich.*) a species of *Perea*.

COTTON (*Com.*) a sort of linen or cloth, which is manu-
 factured from spun cotton.—*Cotton hank*, a skain of spun
 cotton done up ready for sale.

COTTON (*Bot.*) a sort of wool or flax which encompasses the
 seed of the tree, called, in the Linnean system, *Gossypium*,
 which is cultivated much in the East Indies, and yields
 materials for clothing to all parts of the habitable world.—
 Cotton-Grass, the *Enophorium*, a perennial of the Grass
 tribe; so called because its seeds have a downy substance
 attached to them which resemble cotton, and has been
 used in its stead.—*Silk cotton*, the downy substance pro-
 duced from a tree, which, in the Linnean system, is called
 the *Bombax*, and much resembles the *Gossypium*.—Cotton-
 Thistle, *Onopordium*, an herbaceous plant, with a biennial
 root, which is so called because it has downy leaves.
 —Cotton-Weed, the *Athanasia maritima*, a perennial; so
 called on account of its downy leaves.

COTTO'YER *une armée* (*Mil.*) a French term, denoting to
 keep a parallel line with the enemy, so as to prevent him
 from crossing a river.

COTTREL (*Mech.*) a trammel to hang or set a pot over
 the fire.

COTTUS (*Ich.*) Bull-head, a genus of animals, of the Class
Pisces, Order *Thoracica*.
Generic Character. Head broader than the body.—*Eyes*
 vertical.—*Body* round without scales.
Species. The principal species are the—*Cottus cataphrac-*
tus, Pogge or armed Bull-head.—*Cottus scorpius*, Father
 Lasher.—*Cottus Gobio*, Miller's Thumb, or River Bull-
 head, &c.

COT'UCHANS (*Archæol.*) boors or husbandmen.

COTULA (*Bot.*) a genus of plants, Class 19 *Syngenesia*,
 Order 2 *Polygamia Superflua*.
Generic Characters. CAL. common convex.—COR. com-
 pound the length of the calyx; corollules hermaphrodite;
 proper of the hermaphrodites tubular; of the females
 scarcely any.—STAM. filaments in the hermaphrodites
 four, very small; anthers tubular.—PIST. germ obovate;
 style filiform; stigmas two obtuse.—PER. none; seeds
 solitary.
Species. The species are mostly annuals, as—*Cotula an-*
themoides, *Ananthocylus*, seu *Chrysanthemum*, Dwarf
 Cotula, native of the Southern parts of Europe.—*Cotula*
stricta, *Lidbeckia*, seu *Lancisia*, Silvery Cotula, native
 of the Cape of Good Hope.—*Cotula coronofolia*, *Anar-*
thocylus, *Chrysanthemum*, Bellis Bucks-horn Cotula.—
Cotula turbinata, *Chamamælum*, seu *Lancisia*, a Cape
 plant.—*Cotula Capensis*, *Lancisia*, *Matricaria*, seu
Chamamælum, &c.

COTURNIX (*Or.*) the quail; the *Tetras Coturnix* of Lin-
 næus. *Plin.* l. 10, c. 13.

COTYLE (*Ant.*) *cotyla*, or *cotula*, *κοτύλη*, signified not only
 a drinking cup of a deep capacity, but any thing having a
 cavity, as the hollow of the hand, &c. *Athen.* l. 11, c. 8.
 —*Cotyld* is also a measure about a pint or a pound. *Gal.*
de Pond. et Mensur.; *Ceual. de Pond. et Meus. apud Græv.*
Thes. Antiq. tom. ii. p. 1451.

COTYLE (*Anat.*) any deep cavity in a bone, in which another
 bone is articulated; but more particularly that cavity called
 otherwise the *acetabulum*, which receives the thighbone.

COTYLEDON (*Anat.*) certain glandular bodies adhering
 to the chorion of some animals; but no such substances
 are observable in the human chorion. The gapings, how-
 ever, in the veins of the matrix of women are sometimes
 called *cotyledons*.

COTYLEDON (*Bot.*) *κοτυληδών*, from *κοτύλη*, a cavity, is the
 name of a plant mentioned by Dioscorides and Pliny,
 which, according to the former, was so called, because its
 leaf was of a hollow, orbicular form. The juice of this
 herb was recommended as an application to tumors and
 inflammations. *Dioscor.* l. 4, c. 92; *Pliny*, l. 28, c. 17.

COTYLEDON, in the *Linnean system*, is a genus of plants,
 Class 10 *Decandria*, Order 5 *Pentagymia*.

Generic Character. CAL. perianth one-leaved, five-cleft.
 —COR. petal bellshaped, five-cleft; nectary consisting
 of a concave scale. — STAM. filaments ten, subulate;
 anthers erect, four-furrowed.—PIST. germs five, oblong;
 styles subulate; stigmas simple.—PER. capsules five, ob-
 long; seeds very many, small.

Species. The principal species are as follow, namely—
Cotyledon umbilicus, *Sedum*, seu *Umbilicus Veneris*, Com-
 mon Navelwort, Kidneywort, or Wall Pennywort, a
 perennial, and native of Great Britain, &c.—*Cotyledon*
Hispanica, Spanish Navelwort, a biennial.—*Cotyledon*
orbiculata, seu *Sedum*, Round-leaved Navelwort, a biennial,
 and native of the Cape of Good Hope.—*Cotyledon*
laciniata, *Telephium*, seu *Planta Anatis*, cut-leaved
 Navelwort, a biennial.—*Cotyledon viscosa*, an annual.
Bauh. Hist. Plant.; *Bauh. Pin.*; *Ger. Herb.*;
Park. Theat. Botan.; *Raii Hist. Plant.*; *Tournef. In-*
stit. &c.

Cotyledon, as a species, is the *Crassula coccinea* and *aqua-*
tica, the *Hydrocotyle vulgaris*.

Cotyledon, as the part of a plant, is the lobe or placenta
 of the seed destined to nourish the heart, and then to
 perish. It is, in the language of Linnæus, *Corpus laterale*
seminis, *bibulum*, *caducum*, i. e. the lateral body of the
 seed, bibulous or imbibing moisture, and caducous or
 falling off quickly. The greater part of seeds have two
 of these cotyledons, or lobes, whence the distinction of
 all plants into *Acotyledones*, *Moucotyledones*, *Dicotyle-*
dones, *Polycotyledones*, which forms the basis of Jussieu's
 Natural Arrangement.

COTYLEDONIDES (*Bot.*) the *Crassula tetragona* of
 Linnæus.

COTYLEDUM (*Bot.*) the same as *Cotyledon*.

COTYTTIA (*Ant.*) *κοτυττία*, a nocturnal festival in honour
 of Cotytto, the goddess of wantonness, which was cele-
 brated by rites supposed to be most acceptable to such a
 goddess. Her priestesses were called *Baptae*, because they
 painted themselves in a meretricious manner. *Schol. in*
Juv. sat. 2, v. 92.

CO'VALUM (*Bot.*) a tall tree growing in Malabar and the
 island of Ceylon, the fruit of which resembles a round
 apple in shape.

COUCH (*Mech.*) a seat, or small moveable bed, to lie on.
Couch (*Husband.*) a layer, or heap of malt or barley, which
 is disposed for the purpose of drying it into malt.

Couch (*Paint.*) a term signifying the ground, bed, or basis
 on which the colour lies: thus, paintings are covered with
 a couch of varnish; and a canvass to be painted must first
 have two couches of size before the colour be laid on.

COUCH (*Mech.*) is a term used in a similar sense in application to different arts: thus the leather-gilders lay a couch of water and whites of eggs on the leather before they apply the gold or silver leaf. Gilders apply a couch of gold or silver leaf in gilding or silvering of metals. The gold wire-drawers also apply a couch of gold or silver to the mass which is to be gilded or silvered, before they draw it through the iron that is to give it the proper thickness.

to **COUCH** (*Surg.*) vide *Couching*.

to **COUCH** (*Sport.*) to lie down or along, after the manner of a lion, a tiger, or a cat.

to **COUCH** (*Mil.*) to set a lance on the rest.

COUCH-GRASS (*Bot.*) the *Triticum repens* of Linnæus, a perennial, and a troublesome weed in gardens and arable land, which runs very far into the ground. It is otherwise called Quick, Dog's grass, Creeping Wheat, &c.

COUCHANT (*Her.*) an epithet denoting the posture of lions and other wild beasts lying on their belly with the head erect, as he beareth "*sable* three lioncels couchant, *argent*, by the name of Bateman of Essex."

COUCHE' (*Her.*) couched; an epithet for any thing lying along, as a *chevron couché*, a chevron lying sideways, having its top turned to the right or left side, as in the annexed figure, "He beareth, *or*, a chevron couched, *gules*, name Tourney."

COUCHE (*Carpen.*) French for a piece of timber which is laid flat under the foot of a prop, or stay.

COUCHER (*Com.*) or Courcher, a factor that continued abroad in some place for traffic. The name is mentioned in statute 37 *Edu.* 3, c. 16.

COUCHER (*Law*) the general book in which a corporation register their acts. 3, 4 *Edu.* 6, c. 10.

COUCHER en joue (*Mil.*) French for to take aim with a firelock.

COUCHES (*Archit.*) Courses, or layers of sand, which are spread about one foot deep over the boarding of a wooden bridge in order to place the stones upon it.

COUCHING (*Surg.*) a surgical operation, which consists in removing the opake lens out of the axis of vision by means of a needle constructed for the purpose, and called a *couching needle*.

COUCHING (*Her.*) vide *Couchant*.

COUCHING (*Sport.*) the lodging of a wild boar.

COUDE' (*Fort.*) any line that turns back from the end of the trenches, and runs almost parallel with the place attacked.

COUDE'E (*Com.*) a measure taken from the elbow to the hand.

COVE (*Geog.*) a little harbour for boats, or small vessels.

COVENABLE (*Law.*) in French *convenable*; a term used for what is suitable or agreeable in, Stat. 31 *Edu.* 3, c. 2.

COVENANT (*Law*) *Conventio*, an agreement or consent of two or more by deed, or writing. Sealed Covenants are either in fact or in law.—*A covenant in fact*, is that which is expressly agreed upon between the parties.—*Covenant in law*, that which the law intends and implies.—*Covenants* are also real or personal, &c.—*Real covenant* is that whereby a man ties himself to pass a thing real.—*Personal covenant*, where the same is annexed to the person, as if a person covenants with another to build him a house.—*Inherent covenant* is that which tends to the support of the land or thing granted.—*Collateral covenant*, which is collateral to it.—*Affirmative covenant*, where something is to be performed.—*Negative covenant*, where any thing is to be left undone.—*Executed covenant*, as to what is already done.—*Executory covenant*, as to what is to be done.—*Covenant to stand seised to Uses* is when a man, having a wife, children, or kindred, doth, by covenant in writing under hand

and seal, agree, that for their, or any of their provision, or preferment, he or his heirs will stand seised of land to their use. Stat. 27 *Hen.* 8. c. 10.—*Covenant*, or the *solemn League and Covenant*, a seditious conspiracy so called, which was set on foot in Scotland in the time of the Rebellion, and voted illegal by Parliament; against which provision is made by Stat. 14 *Car.* 2, c. 4.

COVENANTER (*Law*) one who makes a covenant.

COVENANTER (*Hist.*) one who joined the Presbyterian Covenant in the time of the rebellion.

CO'VENTRY (*Mil.*) or to send to *Coventry*; a phrase applied to any officer who is excluded from the usual intercourse with his brother officers.

CO'VENTRY BELLS (*Bot.*) a sort of *Campanula*.

CO'VER (*Mil.*) in French à *couvert*, a term to express security, or protection, as to lay under cover of the guns.

to **COVER** (*Mil.*) such a nice disposition of the men in a company, or squad, as, that when each man looks exactly forward to the neck of the man who leads him he cannot see the second man from him. "To cover ground," to occupy a certain proportion of ground, either individually or collectively.

COVER (*Mech.*) that part of the slating in the slater's work which is covered, in distinction from the *margin*, or that part which is left visible.

CO'VERER (*Mil.*) the serjeant, corporal, or private, that is posted in the rear of the leader.

CO'VERLET (*Mech.*) a covering for a bed.

CO'VERED SINE (*Geom.*) the remaining part of the diameter of a circle after the versed sine is taken from it.

CO'VERT-Way (*Fort.*) a space of ground level with the field, on the edge of the ditch, three or four fathoms broad, ranging quite round the half-moons and other works towards the country. The *Second Covert-Way*, called by the French *Avant-chemin-couvert*, is the covert-way at the foot of the glacis.

COVERT *baron* (*Law*) or *femme couverte*, a married woman, so called because she is covered by, or under the protection of, her husband.

COVERT (*Sport.*) a thicket, or shady place for deer, or other animals.

COVERTURE (*Law*) the state of a married woman who is under the power and protection of her husband by law, and therefore disabled to contract with any person to the damage of herself or her husband. *Bract.* 1. 1, c. 10, &c.

COUGH (*Med.*) *Tussis*; the well-known malady that frequently attends an affection from cold.

COUGH (*Vet.*) otherwise called the *husk*; a disorder incident to young bullocks when their windpipes are choked with taper-worms.

COUHAGE (*Bot.*) vide *Cowhage*.

COVIN (*Law*) a deceitful assent, or agreement, between two or more persons, to the prejudice of another.

CO'VING (*Archit.*) the projection in houses beyond the groundplot, which is lathed and plastered, so as to form a cover in wet weather.—*Coving cornice*, one that has a large *carate*, or hollow in it.

COUIT (*Com.*) a sort of ell-measure used at Mocha for measuring linens.

CO'UL (*Mech.*) a tub, or vessel with two ears.—*Coul-staff*, a pole on which the coul is carried.

to **COUL** (*Archer.*) to cut the feather of a shaft high or low.

CO'ULER *une pièce de canon* (*Mech.*) to melt down the metal for casting in a mould.

COULE'VÉRINE (*Mil.*) a culverin.

CO'ULIS (*Mason.*) French for plaster well mixed for the purpose of filling up the joints of stones, and keeping them together.

CO'ULTER (*Husband.*) vide *Colter*.

COUMAROUNA (*Bot.*) the *Dipterix odorata* of Linnæus.

COUNCIL (*Ecc.*) a synod, or assembly of prelates and other ecclesiastical persons, for the purpose of regulating all matters of doctrine and discipline in the church. A *National Council* comprehends the prelates of a whole kingdom; a *Provincial Council*, of a particular province; and an *Œcumenial*, or *General Council*, of the prelates in all Christendom.

COUNCIL (*Polit.*) an assembly of the different members of any government, who meet to consult about affairs of state. It is called in England the *Privy Council*, or, by way of eminence, the Council wherein the King himself and his privy counsellors meet in the King's Court, or Palace, on matters of state.—*Cabinet Council* consists of those Ministers of State who are more immediately honoured with his Majesty's confidence, and are summoned to consult upon the important and arduous discharge of the executive authority.—*Common Council*, an assembly of a select number of citizens, chosen out of every ward to manage the public affairs of the city within their several precincts, and to act in concert with the Lord Mayor and Court of Aldermen. Council is also an assembly of the members of Lincoln's Inn.

COUNCIL of War (*Mil.*) an assembly of the chief officers in the army and navy, called by the general or admiral to concert measures on their conduct.

COUNCIL-MAN *common* (*Polit.*) a member of the Common Council.

COUNSEL (*Law*) or Council. *vide* *Counsellor*.

COUNSELLOR (*Law*) *Consellarius*, a person who is retained by a client to plead his cause in a court of law; a barrister.—*Privy Counsellor*, a member of the Privy Council.

COUNT (*Polit.*) in French *Comte*, probably from the Latin *comes*, is equivalent to the English earl.

COUNT (*Law*) a charge in an indictment; an original declaration of complaint in a real action. It is distinguished from a proper *declaration*, because the former applies to real causes, the latter to those which are personal. *F. N. B.* 16, 60.

COUNT (*Com.*) *vide* *Account*.

COUNT wheel (*Horol.*) a wheel in the striking part of a clock, which moves round in twelve or fourteen hours, by some called the *locking-wheel*.

COUNTEE' (*Archæol.*) an old term for a Count.

COUNTENANCE (*Law*) credit or estimation. *Stat. 1 Ed. 3, c. 4; F. N. B.* 111.

COUNTER (*Gram.*) is generally taken in composition for *contra*.

COUNTER (*Mar.*) in French *contre arcase*, an arc or vault whose upper part is terminated by the bottom of the stern, and the lower part by the wing-transoms and buttock.

COUNTER (*Man.*) the breast of a horse, or that part of his forehead which lies between the shoulders and under the neck.—*Counter-marked*, when the teeth of a horse are artificially made hollow, that he may pass for under six years of age.—*Counter-time*, the defence or resistance of a horse that interrupts his cadence and the measure of his manege.

COUNTER (*Num.*) a piece of brass or any metal with a stamp, formerly used in counting, but now employed in playing at cards.

COUNTER-A'PPROACH (*Fort.*) works made by the besieged when they come out to hinder the approach of an enemy, and when they design to attack them in form.—*Counter-battery*, a battery raised to play upon another.

COUNTER-BOND (*Law*) a bond to save a person harmless who has given a bond for another.

COUNTER-BRACE (*Mur.*) the lee-brace of the fore top-sail, so distinguished because at the time that the ship is tacking or going about, this brace is hauled in to flatten the sail against the leeside of the top-mast, and increase the effort of the wind in forcing her to turn round.

COUNTER-BREAST-WORK (*Fort.*) the same as a false bray.

COUNTER-CHARGED (*Her.*) or transmuted, an epithet for a bearing which consists of an intermixture of several metals, colours, or furs, both in field and charge, occasioned by the opposition of some one or more lines of partition; as he beareth "Party per pale *argent et gules*, a bend countercharged." These arms belonged to the celebrated poet Chaucer.

COUNTER-CHEVRONNED (*Her.*) a field chevronny, or parted by some line of partition.

COUNTER-COMPOUND (*Her.*) Counter-Compone or Compony; an epithet for a border which is compounded of two ranks of panes, or rows of checkers, of different colours, set checkerwise. [*vide* *Compound*]

COUNTER-DRAIN (*Archit.*) a ditch or channel parallel to a canal or embanked water-work, for collecting the soakage water.

COUNTER-DRA'WING (*Paint.*) sketching a design through the medium of oil, paper, or any transparent substance laid on the drawing.

COUNTER-EMBA'TTLED (*Her.*) an epithet for an ordinary embattled or crenellé on both sides.

COUNTER-ERMINE (*Her.*) signifies the contrary to ermine, being a black field with white spots, as in the annexed figure.

COUNTERFEIT (*Com.*) an epithet for any thing so imitated as to be made to pass for what is genuine, as a counterfeit coin, or a counterfeit. Counterfeit taken absolutely, signifies a false coin, as a piece of brass silvered over to pass for a shilling.

TO COUNTERFEIT (*Law*) to imitate falsely, or to forge, as to counterfeit letters. To counterfeit the king's seal is high treason.

COUNTER-FISSURE (*Surg.*) *vide* *Contra-Fissura*.

COUNTERFLO'RY (*Her.*) an epithet denoting that the flowers with which an ordinary is adorned stand opposite to each other.

COUNTER-FO'IL (*Law*) that part of a tally struck in the Exchequer which is kept by an officer of that court; the other being delivered to the person that has lent the king money upon the account. This is called either the foil or the stock.

COUNTER-FORTS (*Fort.*) certain pillars and parts of the walls of a place, about fifteen or twenty feet one from another, which are advanced as much as possible in the ground, and joined to the height of the cordon by walls.

COUNTER-FUGES (*Mus.*) fuges which proceed the one contrary to the other.

COUNTER-GUARDS (*Fort.*) large heaps of earth in form of a parapet, raised above the moat before the faces and points of the bastion, to preserve them.

COUNTER-GAUGE (*Carpent.*) a method of measuring the joints of timbers, by transferring the breadth of a mortise to the place where the tenon of the other timber is to be made, in order to make them fit each other.

COUNTER-HARMO'NICAL (*Math.*) *vide* *Contra-harmonical*.

COUNTER-LATH (*Carpent.*) a lath, in tiling, placed between every two gauged ones, so as to make equal intervals.

COUNTER-LIGHT (*Paint.*) a light striking from an opposite direction on a painting, which will make it appear to great disadvantage.

COUNTERMAND (*Law*) is where a thing formerly executed by some act or ceremony is made void by the party who did it, which is either actual when made void by some formal deed or writing, or implied in law, as when a man by his last will devises his land to A. B. and afterwards

enfeoffs the same land to another, the enfeoffment is an implied countermand.

TO COUNTERMAND (*Com.*) to contradict a former order.

COUNTER-MARCH (*Mil.*) a drawing up of soldiers so as to change the face of the wings of a battalion, whereby those who were on the right take up the ground originally occupied by the left, and *vice versa*.

COUNTERMARK (*Com.*) a mark made to check or correspond with a mark made elsewhere.

COUNTERMARK of a medal (*Numis.*) is a mark made upon a medal some time after it has been struck.

COUNTERMARKED (*Vet.*) vide *Counter*.

COUNTER-MINE (*Fort.*) the subterraneous passage made by the besieged in search of the enemy's mine, in order to give air to it, take away the powder, &c.

TO COUNTERMINE (*Fort.*) to make countermines for the purpose of defeating the enemy's projects.

COUNTER-PAROLE (*Mil.*) a word which is given in time of any trouble or alarm, as a signal.

COUNTER-PART (*Mus.*) a term denoting one part opposite to another, as the bass, which is the *Counter-part* of the tenor.

COUNTER-PART (*Law*) the duplicate or copy of any indenture or deed, so that one copy may be kept by one party and another by another.

COUNTER-PASSANT (*Her.*) an epithet for any two beasts on the same escutcheon, passing and going different ways, so as to look directly opposite ways, as in the annexed figure, representing two lions *counter-passant*.

COUNTER-PERFLEW (*Her.*) vide *Perflew*.

COUNTER-PLEA (*Law*) a cross or contrary plea, which may be either a *counter-plea to the voucher*, which is a replication to Aid Prier; or a *counter-plea to the warranty*, when the voucher is allowed, but the vouchee pleads any thing to void the warranty.

COUNTER-POINTE' (*Her.*) a term to denote that two chevrons meet with their points in an escutcheon, as in the annexed figure, where one rises as usual from the base, the other inverted, setting from the chief, so that they are counter or opposite one to another.

COUNTER-POINT (*Mus.*) the old method of composing parts by setting pricks or points one against another to denote the several concords.

COUNTERPOISE (*Mech.*) whatever acts as a contrary weight to make the balance equal.

COUNTERPOISE (*Man.*) or *Balance of the body*, that liberty of action which a horseman acquires in his seat by practising in the manege.

COUNTER-POTENCE' (*Her.*) or *Potent-counter*, a term denoting pieces in an escutcheon which represent the tops of crutches, called in French *potences*, and in English *potents*, set opposite to each other, as in the annexed figure.

COUNTER-ROLLS (*Law*) the rolls which sheriffs of counties have of their proceedings with the coroners. *Stat. 3 Ed. 1, c. 10.*

COUNTERS (*Law*) vide *Countors*.

COUNTER-SALIENT (*Her.*) leaping contrariwise; an epithet for two beasts leaping in contrary directions.

COUNTERSCARP (*Fort.*) that side of the ditch which is next the camp, or the slope of the moat facing the body of the place; but when the enemy is said to have lodged themselves on the counterscarp, it is generally to be understood of the whole covert way.

COUNTER-SECURITY (*Law*) security given to a party who has entered into bonds for another.

COUNTER-SIGN (*Mil.*) a sign which is exchanged be-

tween sentinels who are on guard and the persons appointed to go the rounds to visit the different posts.

TO COUNTER-SIGN (*Law*) to sign an order of a superior in quality of secretary.

COUNTERSUNK (*Mar.*) a hollow, cut by a bit, round the edge of a hole.—*Countersunk-bit*, a bit having two cutting edges at the end, reversed to each other, which form an angle from the point.

COUNTER-TALLY (*Com.*) one of the two tallies on which any thing is scored.

COUNTER-TENOR (*Mus.*) one of the middle parts, so called because it is as it were opposed to the tenor.—*Counter-Tenor-Cliff*, the name given to the C cliff when placed on the third line.—*Counter-Tenor-Voice*, or *High-Tenor*, a term applied to the highest natural male voice.

COUNTER-TIMBERS (*Mar.*) those short timbers in the stern, put in only for the purpose of strengthening the counter.

COUNTER-TIME (*Man.*) vide *Counter*.

COUNTER-TRENCH (*Fort.*) a trench made against that of the besiegers, which of consequence has its parapet turned towards them.

COUNTER-TRIPPING (*Her.*) an epithet for two beasts in an escutcheon tripping in opposite directions. [vide *Counter-Passant*]

COUNTER-VALLATION (*Fort.*) a counter-line or ditch made round a place that is besieged, to prevent the sallies and excursions of the besieged.

COUNTER-VAIR (*Her.*) vide *Vair*.

COUNTER-WORKS (*Mil.*) works raised in order to ruin or render useless those of the enemy.

COUNTESS (*Her.*) the wife of a count or earl.

COUNTIES *corporate* (*Law*) are cities or ancient boroughs, as London, Bristol, Chester, &c. on which our ancient kings bestowed especial privileges. *2 Inst. 248.*—*Counties Palatine*, so called, a *palatio*, because the owners thereof, namely, the Earl of Chester, Bishop of Durham, and Duke of Lancaster, formerly had in those counties *jura regalia* as fully as the king hath in his palace. *Bract. l. 3, c. 8, § 4; 4 Inst. 20; Seld. Tit. Hon. l. 2, c. 5.*

COUNTING-HOUSE (*Com.*) an office in which a merchant transacts his business.

COUNTING-HOUSE of the king's household (*Law*) a former name for what is now called the Board of Green Cloth.

COUNTORS (*Law*) a name for such serjeants at law as a man retains in a court to plead his cause.

COUNTRY-DANCE (*Mus.*) a lively pointed air calculated for dancing.

COUNTY (*Polit.*) in French *comté*, and Latin *comitatus*; a name which is equivalent to the Saxon word *ryne*, and is employed to denote the several portions into which the kingdom is divided; namely, England into forty; Wales, twelve; Scotland, thirty-three; and Ireland, thirty-two. This mode of dividing England is said to have originated with Alfred. [vide *Counties*]

COUNTY-COURT (*Law*) *curia comitatus*, a court held every month by the sheriff or deputy; also a court held twice every year, which is called a *turn*. *Bracton passim; Glanvil. l. 1, c. 2, &c.; Britton passim; Fleta, l. 2, c. 62; F. N. B. 152; Cromp. Jur. fol. 211.* The power of this court was much reduced by Magna Charta, c. 17, and by 1 Ed. 4, c. 2.

COUNTY-RATES (*Law*) a rate which is assessed on every parish, &c. within the county, collected and paid by the high-constables of hundreds to treasurers appointed by the justices.

COUP (*Mil.*) a French term for stroke, or blow used on different occasions; as—*Coup de Canon*, a cannon shot.—*Coups de Corde*, blows given with a rope's end.—*Coup de Main*, a sudden and unpremeditated attack.—*Coup d'Épée*,

a thrust with the sword.—*Coup fourré*, a double thrust given in fencing.—*Coup de Jarnac*, an underhand blow, or one given unfairly.

Coup de Partance (Mar.) the signal of departure which a fleet, or a ship of war, makes by firing a canon.

Coup d'œil (Nat.) that first glance of the eye with which it surveys any object at large.

Coup de Soleil (Med.) erysipelas, apoplexy, or any disorder suddenly produced by the violence of a scorching sun.

COUPANT (Com.) an oval piece of gold or silver of different sizes used in Japan; the biggest of the gold ones weighs an ounce and three-fourths, and of the silver seven penny-weights and a half.

COUPE (Paint.) French for the rough draught or design which represents the inside of a building, &c.

COUPE-GORGE (Cus.) a cut-throat; also a dangerous spot or avenue where a man might be way-laid.

COUPED (Her.) in French *coupé*, an epithet for the head or limb of any beast in an escutcheon, which is cut evenly and clear off, in distinction from *erased*, as in the annexed figure. When the head is cut off close it is blazoned 'couped close.'—*Couped*, or *Humette*, is also an epithet for a cross that is shortened or cut so that the extremities do not reach the out lines of the escutcheon.—*Couped Pendants* are those pendants that are alternately divided, but in a vertical direction.

COUPE/E (Mech.) a motion in dancing wherein one leg is a little bent and suspended from the ground, and the other makes a motion forwards.

COUPE/LE (Mil.) a kind of tin or copper shovel which is used in the artillery to fill the cartridges with gunpowder, &c.

COUPLE (Mech.) two things of the same kind set together; also a band with which dogs are tied.

COUPLE Close (Her.) an ordinary so termed from its inclosing by couples the chevron. It contains the fourth part of the chevron, and is always borne in pairs, one on each side a chevron; as "*Sable*, a chevron between two couples-close, accompanied with three cinquefoils, or; name *Renton*."

COUPLED Columns (Archit.) columns disposed in pairs so as to make a narrow and wide interval succeed each other alternately.

COUPLES (Carpent.) rafters called *spars*, and framed together in pairs with a tie, which is generally fixed above the feet of the rafters.—*Main couples*, the same as trusses for roofs, which support the roof in different lays.

COUPLET (Poet.) the division of a hymn, ode, or song, &c. wherein an equal number, or an equal measure of verses is found in each part.

COURANT (Sport.) French for a sort of dance.
COURANT (Com.) French for current, as the *price courant*, the well-known, or current price.

COURANT (Her.) an epithet for any beast represented in an escutcheon in a running attitude, as in the annexed figure of a buck courant.

COURANTIN (Mil.) a French term for those fusees which carry the fireworks from one quarter to another by means of a cord.

COURAP (Med.) the Indian itch, a distemper very common in Java, and other parts of the East Indies, which is a herpes on the axilla, groin, breast, and face.

COURBARIL (Bot.) the same as the *Hymenea*.

COURÇON (Mil.) a French term for a strong piece of iron, which serves to connect and secure the moulds for canon.

COURE/URS (Mil.) a French term for a sort of light armed troops that go on reconnoitring or flying parties.

COURGE (Archit.) French for the stone or iron crow which sustains the false mantle-tree of a chimney.

COURIER (Polit.) from the French *courir*, to run; a messenger sent express and in haste.—*Courier de Cabinet*, a state messenger.

COURIERS de Vivres (Mil.) messengers attached to the French army for the conveyance of packages, &c. to and fro.

COURO'N (Com.) a sum equivalent to 10 millions of rupees, or a hundred lacks, which is used in accounts at the court of the grand Mogul.

COURO'NDO (Bot.) a tall evergreen tree that grows in the East Indies, the juice of which, taken in warm whey, cures the dysentery. *Raii Hist. Plant.*

COURO'NNE (Com.) a gold coin in the reign of Philip de Valois, forty-eight of which went to the mark of gold. It was so called from the figure of the crown on the obverse.

COURONNE de Pieux (Mech.) the head of a stake which is sometimes bound round with iron to prevent it from splitting when driven down by the rammer.

COURONNEMENT (Fort.) French for the most exterior part of a work when besieged.

COUROU-MOE/LLI (Bot.) an Indian tree, the bark of which, taken in a decoction, is reckoned an antidote against the bites of serpents.

COURRACIER (Archæol.) a horse courser. *2 Instit.* 719.

COURSE (Archit.) a continued range of bricks or stones of the same height throughout the length of the work.—*Course of the Face of an Arch*, the arch-stones, whose joints radiate to the centre.—*Course of Plinths*, the continuity of a plinth, in the face of a wall, to mark the separation of the stories. It is otherwise called *String-Course*.—*Course, Barge*, vide *Barge Course*.—*Course, Blocking*, vide *Blocking Course*.—*Bonding course*, that which runs further into a wall than either of the adjacent courses for the purpose of binding the wall together.—*Heading course*, the same as *Bonding Course*.—*Springing course*, vide *Springing Course*.—*Course, Stretching*, vide *Stretching Course*.—*Course in Filing*, or *Slating*, a row of tiles or slates disposed with their lower ends in the same level.

COURSE (Mar.) in French *route*, that point of the horizon or compass which a ship steers on. The *Oblique Course* is that which crosses the meridian at equal and oblique angles.

COURSE (Agric.) a turn of hay, &c. laid on a cart.
COURSE of Exchange (Com.) vide *Exchange*.

COURSE Civil (Law) the collection of Roman laws made by Justinian.—*Course Ecclesiastical*, the collection of canon law made by Gratianus.

COURSER (Man.) a race-horse, or a horse for service.
COURSES (Mar.) in French *basses voiles*, a name by which the principal sails are usually distinguished; thus, when a ship sails under the main-sail and fore-sail only, without lacing on any bonnets, she is then said "To go under a pair of her *Courses*."

COURSES (Med.) vide *Catamena*.
COURSEY (Mar.) a space or passage in a galley about a foot and a half broad, on both sides of which slaves are placed.

COURSING (Sport.) is the pursuing of any beast of chase, as the hare, fox, &c. with greyhounds.

COURT (Law) *curia*, the King's palace or mansion, but more especially the place where justice is judicially administered. These are generally distinguished into *superior courts* and *base courts*.—The *superior courts*, otherwise called *courts of record*, are those which have power to hold plea, according to the course of the Common Law, of real, personal, and mixed actions, where the debt or damages is forty shillings or above, as the King's Bench, Common Pleas, &c.—*Base courts*, or *courts not of record*, are such as have power to hold plea of any debt under

forty shillings, such as Courts Baron, County Courts, &c. 1 *Inst.* 58. 117, &c. The following are the principal courts arranged under these two general heads.—*Admiralty*, vide *Admiralty*.—*Court of Arches*, vide *Arches*.—*Court-Baron*, a court which every lord of a manor has within his own precinct, being an inseparable incident to the manor that must be held by prescription, and cannot be created in this day. *F. N. B.* 18; 1 *Inst.* 584; 2 *Instit.* 268.—*Court of Chancery*, vide *Chancery*.—*Court of Chivalry*, otherwise called the *Marshal Court*, *curia militaris*, is said to be the fountain of martial law. It is held by the Earl Marshal, who has both a judicial and ministerial power; being not only one of the judges, but also seeing that execution is done. This court is grown almost into disuse, except for the purpose of keeping up the distinction of degrees and quality by correcting encroachments in matters of coat armour, precedency, &c.—*Court Christian*, in distinction from the *civil court*, or *lay-tribunal*, takes cognizance of matters relating to Christianity only; therefore the archbishops, bishops, archdeacons, &c. are the judges in such courts, which are also called *ecclesiastical courts*.—*Courts of Conscience* are courts for the recovery of small debts by summary process before commissioners appointed for that purpose. They are so called because the decisions are made according to equity and good conscience. The first court of this kind was erected in the City of London in the reign of Henry VIII.; since which time other courts of conscience have been established in different parts of the kingdom.—*Consistory court*, a sort of ecclesiastical court held by every diocesan bishop in his cathedral for the trial of ecclesiastical causes within his diocese.—*Court of Delegates*, or the *Great Court of Appeal*, appointed by the King's commission under his Great Seal, to represent his Royal Person, and hear all causes of appeal now made to him from the other ecclesiastical courts.—*Court of Equity*, any court, such as the Chancery, where decisions are grounded on equity, in distinction from courts of Common Law, such as the court of King's Bench.—*Courts of Guerra*, courts in Scotland holden upon neighbours' feuds and riots.—*Court of Hustings*, the highest Court of Record holden at Guildhall, for the City of London, before the Lord Mayor and Aldermen, the Sheriffs and Recorder, which determines all pleas, real, personal, and mixed.—*Court of Inquest*, vide *Inquest*.—*Court of Inquiry*, a meeting of officers who are empowered to inquire into the conduct of a commander of an expedition, &c.—*Court of the Dutchy of Lancaster*, vide *Dutchy of Lancaster*.—*Court Leet*, or *Leet*, a court belonging to the lord of a manor, in which all offences under high treason are inquired into. It seems to be derived from *leod plebis*, signifying *curia populi*, or folkmote, although the word is not used by any of our ancient law-writers, and does not occur in any statute prior to *Stat. 27 Ed. 3*, c. 28.—*Court of Marshalsea*, a court of record to hear and determine causes between the servants of the King's household, and others within the verge.—*Court Martial*, a court for trying and punishing the military offences of officers, soldiers, or sailors.—*Court of Peculiars* is a branch of the court of Arches, to which it is annexed, having a jurisdiction over all the parishes dispersed through the province of Canterbury, &c.—*Court of Piepowder*, a court held in fairs for doing justice between buyers and sellers, so called, as is supposed, because it is usually held every summer, when the suitors to the court have dusty feet (*piepoudrés*).—*Prerogative Court*, a court established for the trial of all testamentary causes, where the deceased has left *bona notabilia* within two different dioceses.—*Court of Requests*, a court of equity appointed for the help of such petitioners as wish, in conscionable cases, to deal with the King by supplication; but this court

is now quite suppressed.—*Court of the Lord Steward of the King's House*, that in which the Lord Steward, or, in his absence, the Treasurer and Controller of the King's household, or the Steward of the Marshalsea, may inquire into and determine all treasons, murders, manslaughters, &c. committed in any of the King's palaces, residences, &c.—*Court of Star-Chamber*, an ancient court which took cognizance of all maintainers, rioters, and seditious persons, and punished them as if the offenders had been convicted at law by a jury, &c. This court was dissolved by *Stat. 16 & 17 Car. 1*, c. 10.—*University Courts* are the Chancellor's courts in the two Universities of England, Oxford, and Cambridge, wherein these two learned bodies enjoy the sole jurisdiction, in exclusion of the King's courts, over all civil actions and suits whatever, when a scholar, or privileged person, is one of the parties. 28 *Hen. 3*, A. D. 1244; 14 *Hen. 8*; 13 *Eliz.* c. 29.

COURT bouillon (*Cook.*) a particular way of boiling fish in wine, with spices, &c.

COURT-LANDS (*Law*) domains or lands kept in the lord's hands to serve his family.—*Court-Roll*, a roll containing an account of the number, &c. of lands which depend on the jurisdiction of the manor, and the nature of the tenants that are admitted to any parcel of land, &c.—*Court-days*, days in which courts of judicature are open, and pleas held.

COURTAUD (*Man.*) a cropped horse.

COURTAUD (*Gunn.*) a short kind of ordnance used at sea.

COURTESY (*Law*) a tenure not by right, but by the favour of others.—*Courtesy of England*, a tenure whereby a man marrying an heiress possessed of lands in fee simple or fee tail, if he have a child by her, which comes alive into the world, although both she and the child die forthwith; yet, if he were in possession, he shall hold the land during life. *F. N. B.* 149; *Kitch.* 159; *Co. Lit.* 29, 30, &c.

COURTAIN (*Fort.*) vide *Curtin*.

COURT-LANDS (*Law*) vide *Court*.

COUSCOUS (*Cook.*) the African name for a sort of paste made of the flour of millet with some flesh, &c.

COUSIN (*Law*) a kinsman or kinswoman by blood or marriage.

COUSINET (*Archit.*) or *cushion*, the stone which crowns a pier or piedroit, or that lies immediately over the capital of the impost, and under the sweep; also an ornament in the Ionic capital between the *Abacus*, and the *Echinus*.

COUSINET (*Mason.*) the first stone which commences a vault or arch.

COUSSIN (*Gunn.*) in French a sort of wedge, or small piece of wood, which is placed under the breech of a cannon in order to point it properly, and to keep it steady in the proposed direction.

COUSSINET (*Mil.*) French for a wedge fixed between the carriage and the centre of a mortar.—*Coussinet à Mousquetaire*, a bag formerly worn by a French soldier on his left side beneath the cross-belt.

COUSU' (*Her.*) vide *Rempli*.

COUTEAU de Bois (*Mech.*) ou *Spatule*, French for a wooden instrument, in the shape of a short blunt blade, for pressing down earth, &c.

COUTHUTLAUGH (*Law*) one who knowingly cherishes, entertains, or hides any outlawed person.

COUTON (*Bot.*) a tree growing in Candia, resembling the walnut-tree, which yields, by incision, a pleasant juice, resembling Orleans wine. *Bauh. Pin.*

COUTOUBE'A (*Bot.*) the same as the *Picrium* of Linnaeus.

COUVERT (*Her.*) an epithet for the top of a chief, or other ordinary, over which something hangs as a covering.

COVY (*Fowl.*) an assemblage of wild fowls, particularly partridges.

COW (*Zool.*) the female of the species *Bos Taurus* in the Linnean system.

COW-POX (*Surg.*) vide *Vaccination*.

CO'WARD (*Her.*) or *cowed*, an epithet for a lion in an escutcheon, which in a timorous manner clappeth his tail between his legs, as animals do in case of extremity and fear; as he beareth "Argent a lion rampant coward, purpure, name Rowe."

CO'WHAGE (*Bot.*) or *Cow-Itch*, the *Dolichos urens* of Linnæus, an annual.—Cow-Parsley, or Cow-weed, the *Chærophylum sylvestre*.—Cow-Quake, the *Brigamedia*, a perennial.—Cow-Wheat, a weed growing among corn.

COWL (*Ecc.*) a sort of hood, such as is worn by monks.

CO'WNER (*Mar.*) an arched part of a ship's stern.

CO'WPER'S Glands (*Anat.*) three large muciparous glands situated before the prostate gland of the male.

CO'WRING (*Falcon.*) the quivering of young hawks, which shake their wings in sign of obedience to the old ones.

CO'WRY (*Con.*) or *Gowry*, a testaceous animal, the *Cypræa* of Linnæus, the animal of which is a limax, which is said to have the power of leaving its shell, and forming a new one. The shells are univalve, and remarkable for their high polish. These animals live in sand at the bottom of the sea.

COWRY (*Com.*) is used as a coin in India.

CO'WSLIP (*Bot.*) the *Primula* of Linnæus, a perennial.

CO'XA (*Anat.*) another name for the *Ischium*.

CO'XCOMB (*Bot.*) vide *Cockscomb*.

COXE'NDIX (*Anat.*) the hip-joint.

COYNS (*Print.*) vide *Quoins*.

CRAB (*Ent.*) the *Cancer* of Linnæus; a sort of shell-fish which every year cast off their old shells with much pain and difficulty.

CRAB (*Mar.*) in French *petit cabestan*, a sort of wooden pillar which rests upon sockets, like a capstan; also an engine of wood with three claws, used at launching or heaving ships into dock.

CRAB (*Mech.*) a machine fixed in the ground at the lower end of rope-walks, and used in stretching the yarn; also a machine used by masons and others for raising large weights.

CRA'B-TREE (*Bot.*) the *Pyrus malus sylvestris* of Linnæus.

CRA'BBING (*Falcon.*) is said of hawks when they stand too near, and fight with one another.

CRA'B-LOUSE (*Ent.*) a species of *pediculus* which infests the *axilla* and *pubenda*.

CRA'BRO (*Ent.*) the hornet, a large kind of wasp, the *Vespa crabro* of Linnæus. According to Fabricius it includes a division of the genus *Vespa*, having the lips short and horny.

CRA'B'S eyes (*Nat.*) a stone in a crab-fish, resembling an eye, which is used medicinally.

CRA'B-YAWS (*Med.*) the name in Jamaica for a kind of ulcer on the soles of the feet, with callous lips, so hard that it is difficult to cut them.

CRA'CCA (*Bot.*) the *Ervum tetraspermum* of Linnæus.

CRA'CKER (*Mech.*) a kind of firework which cracks and flies about.

CRA'CKING (*Archit.*) a fissure in a building from some defect in the foundation, or in the materials.

CRA'CKNELS (*Cook.*) a sort of cakes baked hard, so as to crackle under the teeth.

CRACKS (*Vet.*) or *Chops* in the heels of horses, which are sores that are either constitutional or arise from uncleanness.

CRADLE (*Mar.*) 1. A standing bedstead for wounded seamen, instead of a hammock. 2. A machine made of stout sail-cloth, for the purpose of shipping and unshipping

horses. 3. A timber frame made along the outside of a ship, in order to conduct her smoothly and steadily into the water when she is to be launched.

CRADLE (*Archit.*) vide *Coffer*.

CRADLE (*Surg.*) a machine of wood to lay a broken leg in that is newly set, to hinder it being pressed by the bed-clothes.

CRA'DLING (*Archit.*) the mass of timber-work disposed in arched or vaulted ceilings for sustaining the lath-and-plaster.

CRAFT (*Mar.*) all manner of lines, hooks, nets, &c. for fishing.—*Small craft* are vessels used in the fishing trade, as hoys, retches, lighters, smacks, &c.

CRAFT (*Mech.*) or handy-craft, any mechanical art or trade.

CRÆPALE (*Med.*) *κραταιάλη*, every disorder of the head produced by the excessive drinking of wine. *Gal. in Hippocrat. sect. 5, aph. 5.*

CRA'IERA (*Mar.*) a small vessel of lading; a hoy or smack mentioned in *Pat. 2, R. 2; Stat. 14 Car. 2. c. 27.*

CRAIL (*Mech.*) an instrument used in catching fish.

CRAKE (*Orn.*) a sort of Starling; the *sturnus cynclus* of Linnæus.

CRA'KE-BERRY (*Bot.*) the *Empetrum nigrum* of Linnæus.

CRA'MBE (*Gram.*) a repetition of words, or saying the same thing over again.

CRAMBE (*Bot.*) *κράμβη*, a name given by the ancients to the *Brassica*, or cabbage, from which it is however distinguished by modern botanists. When boiled or eaten a second time it was reckoned to create nausea; whence the proverb *Δις κράμβη θάνατος*, to which Juvenal alludes. *Juv. Sat. 7. v. 154.*

Occidit miseris crambe repetita magistros.

Cato de R. Rust. c. 157; Dioscor. l. 2, c. 147; Plin. l. 20, c. 10; Athen. l. 9, c. 2; Geopon. l. 12, c. 17.

CRAMBE, in the Linnean system, a genus of plants, Class 15 *Tetradynamia*, Order 2 *Siliquosa*.

Generic Characters. CAL. *perianth* four-leaved; leaflets ovate.—COR. four-petalled, cruciform; petals large, obtuse; claws erect, spreading.—STAM. filaments six; anthers simple; a melliferous gland between the corolla and the stamens.—PIST. germ oblong; style none; stigma thickish.—PER. berry dry, globose; seed simple, roundish.

Species. The species are perennials or shrubs, as—*Crambe maritima*, seu *Brassica maritima*, Sea Colewort, a perennial, and native of Europe.—*Crambe Hispanica*, Spanish Colewort, a perennial.—*Crambe Tartarica*, seu *Tartaria Ungarica*, a native of Hungary and Tartary. But the—*Crambe fruticosa*, Shrubby Colewort, and the—*Crambe strigosa*, seu *Megarum*, Rough-leaved Shrubby-leaved Colewort, are shrubs. *Clus. Hist. Plant. rar.; Bauh. Hist.; Bauh. Pin.; Ger. Herb.; Park. Theat. Botan.; Raii Hist. Plant.; Tournef. Inst.*

CRAMBE is also the *Bunias spinosa*.

CRAMBION (*Med.*) *κράμβιον*, a decoction of cabbage.

CRA'MBO (*Sport.*) a play in rhyming, in which he that repeats a word that was said before forfeits something.

CRA'MP (*Med.*) a spasmodic affection which causes a violent distortion of the nerves, muscles, &c.

CRAMP (*Falcon.*) a disease to which hawks are subject in their wings from cold, which affects them in their soaring.

CRA'MP-FISH (*Ich.*) another name for the *Torpedo*.

CRA'MP-IRONS (*Mason.*) irons which fasten stones in buildings; also grappling irons to lay hold of an enemy's ship.

CRAMP-IRONS (*Print.*) irons nailed to the carriage of the press to run it in and out.

CRAMPIT (*Mil.*) the chape at the bottom of the scabbard of a broad sword, called by the French *Botterolle*. [vide *Boteroll*]

CRAMPONNE'E (*Her.*) an epithet for a cross in coat-armour. A cross cramponnee is so called because it has a cramp or crampon at each end, as in the annexed figure.

CRAMPOON (*Mech.*) vide *Cramp*.

CRAMPOONS (*Mil.*) iron instruments fastened to the shoes of a storming party, to assist them in climbing a rampart.

CRANAGE (*Law*) *cranagium*, money paid for the use of a crane in landing and shipping wares at a wharf.

CRA'NBERRY (*Bot.*) a pale red berry, of a tart taste, which is the fruit of the *Vaccinium oxycoccus* of Linnæus. The berries are also called Mossberries, Moorberries, Fenberries, &c. because the plants grow in bogs and fens. The name of Cranberry, which belongs to the tree as well as the fruit, originates probably in the crookedness of the pedicles at the top, which resemble the head and neck of a crane.

CRANE (*Orn.*) a sort of heron, five feet in length, with a bald head, the *Ardea Grus* of Linnæus.

CRANE (*Astron.*) a southern constellation. [vide *Grus*]

CRA'NE-FLY (*Ent.*) a sort of insect, the *Tipula* of Linnæus, which much resembles the gnat.

CRANEQUIER (*Mil.*) French for an archer who served both on foot and horseback.

CRA'NE'S BILL (*Bot.*) an English name for the *Geranium* and *Erodium* of Linnæus.

CRANE'S BILL (*Surg.*) a pair of pincers.

CRA'NGOR (*Ich.*) the Prawn, a sort of *Squilla*.

CRA'NICHIS (*Bot.*) a genus of plants, Class 20 *Gynandria*, Order 1 *Diandria*.

Generic Characters. CAL. *spathe*s wandering; *perianth* none.—COR. *petals* five, oblong; *nectary* vaulted.—STAM. *anthers* pedicelled.—PIST. *germ* obovate, oblique; *stigma* funnel-form.—PER. *capsule* oblong; *seeds* numerous.

Species. The species are all natives of Jamaica.

CRANIOLARIA (*Bot.*) a genus of plants, Class 14 *Didynamia*, Order 2 *Angiosperma*.

Generic Characters. CAL. *perianth inferior* four-leaved; *leaflets* linear; *perianth superior* ovate, inflated.—COR. one-petalled; *tube* very long and narrow; *border* flat; *upper lip* entire; *lower lip* three-cleft.—STAM. *filaments* four, length of the tube of the corolla; *anthers* simple.—PIST. *germ* ovate; *style* filiform; *stigma* thickish, obtuse.—PER. *coriaceous*, two-valved; *seed nut* woody.

Species. The only species is, the—*Craniolaria annua*, seu *Martynia craniolaria*.

CRANIOLARIA is also the *Gessneria craniolaria*.

CRANIO'LOGY (*Eth.*) from *κράνιον*, the skull, and *λογος*, doctrine; the discovering of men's characters and faculties from the external appearances of the skull, which is a subject of modern enquiry.

CRA'NIUM (*Anat.*) the skull, or superior part of the head, formed by the compages of all the bones of the head, which, like a helmet, defend the brain from external injuries.

CRANK (*Mar.*) or *Crank-sided*, an epithet for a vessel when she cannot bear her sail, or can bear only a small part, for fear of oversetting. A ship is also said to be *crank by the ground* when her floor is so narrow that she cannot be brought on the ground without danger.

CRANK (*Mech.*) a machine resembling an elbow, except that it is in a square form, projecting out of an axis or spindle, which by its rotation serves to raise or lower the pistons of engines for raising water; also the draw-beam of a well.—*Crank-wheel*, a machine for rope-making, fixed on an iron spindle or axis, with a handle for turning it.—*Cranks* are also iron braces which support the lanterns on the poop-quarters.

CRA'NNOCK (*Archæol.*) an ancient measure of corn. *Cas-tular. Abbot. Glaston. MS. f. 39.*

CRA'NTZIA (*Bot.*) the same as the *Tricera*.

CRA'NZIA (*Bot.*) a genus of plants called after Joachim Crantz, a German botanist, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Characters. CAL. *perianth* five-parted.—COR. *petals* five, oblong, sessile.—STAM. *filaments* five, broad at the base; *anthers* roundish, incumbent.—PIST. *germ* subglobular; *style* cylindrical; *stigma* three-lobed, obtuse.—PER. *berry* globose; *seeds* few.

Species. The only species is the—*Cranzia aculeata*, *Scopolia Paullinia Kaka-toddali*, a shrub of Malabar.

CRAPA'UD (*Gunn.*) French for a gun-carriage without wheels, on which a mortar is laid.

CRA'PAUDINE (*Vet.*) an ulcer on the coronet of a horse; called also a *tread upon the coronet*.

CRAPE (*Com.*) a light transparent stuff, resembling gauze, made of a raw silk gummed and twisted in the mill.

CRA'PULA (*Med.*) a surfeit.

CRA'SIS (*Med.*) κρᾶσις, from κρᾶνωμις, to mix; a proper constitution, or due temperament of the humours.

CRASIS (*Gram.*) a contraction of two syllables into one.

CRASPE'DIA (*Bot.*) a genus of plants, Class 19 *Syngenesia*, Order *Polygamia segregata*.

This plant is a native of New Zealand, and but little known at present.

CRA'SPEDON (*Med.*) κρᾶσπεδον, a disorder in the *uvula*, when it hangs down in the form of a thin oblong membrane. *Aret. de Caus. et Signif. Morb. l. 1, c. 8.*

CRA'SSA Arteria (*Anat.*) vide *Aorta*.—*Crassa Meninx*. [vide *Dura Mater*]

CRASSAMENTUM (*Anat.*) the coagulated portion of blood when suffered to cool at rest.

CRASSE'NA (*Med.*) saline, putrefactive, and corrosive particles, which produce ulcers and tumours of various sorts.

CRA'SSINA (*Bot.*) the *Zennia pauciflora* of Linnæus.

CRA'SSULA (*Bot.*) a genus of plants so called from the thickness of its leaves, Class 5 *Pentandria*, Order 5 *Pentagynia*.

Generic Character. CAL. *perianth* one-leaved, five-cleft.—COR. *petals* five, long and linear; *nectaries* five.—STAM. *filaments* five, subulate; *anthers* simple.—PIST. *germs* five, oblong; *styles* the length of the stamens; *stigmas* obtuse.—PER. *capsules* five, oblong; *seeds* many.

Species. The species are natives of the Cape of Good Hope, mostly perennials or shrubs, some few annuals, and biennials, as—*Crassula coccinea*, seu *Cotyledon*, Scarlet-flowered *Crassula*.—*Crassula flava*, seu *Sedum*, Yellow-flowered *Crassula*.—*Crassula perfoliata*, seu *Aloe*.—*Crassula dichotoma*, Forked *Crassula*, &c.—But the *Crassula subulata*, Awl-leaved *Crassula*, is an annual, as also the—*Crassula verticillaris*, Whorl-flowered *Crassula*, &c.; and the—*Crassula barbata*, is a biennial.

CRASSULA is also the *Tillea aquatica*, &c. the *Othonna tenuissima*, and a species of the *Claytonia*.

CRA'STINO (*Law*) *The morrow*; a word used with certain return days of writs in the beginning of terms, as *Crastino Animarum*, the *Morrow of All Souls* in Michaelmas Term; *Crastino Purificationis beatæ Mariæ Virginis* in Hilary Term; *Crastino Ascensionis Domini* in Easter Term; and *Crastino Sanctæ Trinitatis* in Trinity Term. *Stat. 51 Hen. 3, st. 2 and 3; 32 Hen. 8, c. 21; 16 Car. 1, c. 6; 24 Geo. 2, c. 48.*

CRA'TÆ'GONUM (*Bot.*) vide *Melampyrum*.

CRA'TÆ'GUS (*Bot.*) κραταιγος, the *Wild Service-Tree*, a plant, the fruit of which is astringent. *Theophrast. Hist. Plant. l. 3, c. 15.*

CRA'TÆGUS, in the *Linnean system*, a genus of plants, Class 12 *Icosandria*, Order 2 *Digynia*.

- Generic Character.** CAL. *perianth* one-leaved.—COR. *petals* five, roundish.—STAM. *filaments* twenty; *anthers* roundish.—PIST. *germ* inferior; *styles* two; *stigmas* headed.—PER. *berry* fleshy; *seeds* two.
- Species.** This genus consists chiefly of trees or shrubs, hardy and deciduous, as—*Cratægus aria*, *Mespilus*, *Aria*, seu *Sorbus*, White Beam Tree.—*Cratægus torminalis*, *Mespilus*, seu *Sorbus*, Wild Service, Sorb, or Maple-leaved Service.—*Cratægus coccæ*, seu *Oxyacantha*, Great American Hawthorn.—*Cratægus oxyacantha*, Common Hawthorn, or White-thorn.—*Cratægus azarolus*, *Azarolus*, *Azarolier*, &c.—*Cratægus cordata*, Maple-leaved Hawthorn, &c. *Bauh. Hist. Plant.*; *Bauh. Pin. Ger. Herb.*; *Park. Theat. Bot.*; *Raii Hist. Plant.*; *Tournef. Instit.*
- CRATÆOGONUM (*Bot.*) the *Bartsia Alpina* of Linnæus.
- CRATCH (*Huib.*) a rack for hay or straw.
- CRATCHES (*Vet.*) a stinking sore in a horse's heel.
- CRATE (*Mech.*) a large wicker case in which earthenware is packed.
- CRA'TER (*Ant.*) κρητήρ, either from κρατέω, to contain, or κρηρύνωμι, to mix; a very large wine-cup, a goblet, out of which the ancients poured their libations at feasts. *Poll. Onomast.* l. 4, § 16.
- CRATER (*Nat.*) the hole or vent, as in Mount Ætna, which belches out fire. *Suet. in Cal.* c. 51.
- CRATER (*Falcon.*) any line on which hawks are fastened when reclaimed.
- CRATER (*Astron.*) κρητήρ, the cup; a southern constellation, the number of whose stars, according to Ptolemy, is 7; to Tycho 8; to Hevelius 10; and in the British catalogue 31. This is supposed by Hyginus to be the cup which Apollo gave to the Corvus, or Raven. *Hygin. Astron. Poet.*; *Ptol. Almag.* l. 7, c. 5.
- CRA'TES (*Ant.*) 1. Engines of war used by the ancients to cover their workmen as they approached a besieged town. *Cæs. de Bell. Gall.* l. 7, c. 81; *Veget.* l. 4, c. 6; *Lips. Poliorc.* l. 1, c. 7. 2. An iron grate used before prisons.
- CRATE'VA (*Bot.*) a genus of plants, Class 11 *Dodecandria*, Order 1 *Monogynia*.
- Generic Character.** CAL. *perianth* one-leaved, four-cleft.—COR. *petals* four; *claws* slender.—STAM. *filaments* sixteen or more, bristleform; *anthers* erect, oblong.—PIST. *germ* on a very long filiform pedicle; *style* none; *stigma* sessile, headed.—PER. *fleshy*.
- Species.** The species are trees, as—*Cratæva gyaundra*, seu *Anona*, Thin-leaved Crateva.—*Cratæva tapia*, *Tapia*, seu *Anona*, *Apioscorodon*, seu *Malus Americana*, Smooth Crateva, or Garlic Pear, native of the West Indies, &c.—*Cratæva Marmelos*, *Cydonia exotica*, *Bilanus*, seu *Covallam*, Prickly Crateva, native of India.—*Cratæva religiosa*, called in Otahete *Pura taruru*, which is planted in their burial places, and is supposed to be sacred to their idols. *Bauh. Hist.*; *Marcgr. Pis. Brasil.*; *Raii Hist. Plant.*
- Crateva is also the same as the *Capparis*.
- CRATICULA (*Chem.*) the bars, or grating, which cover the ash-hole in a furnace.
- CRAVA'RE (*Archæol.*) to impeach.
- CRA'VEN (*Law*) or Cravent, a term of reproach in the ancient trial by battle, which the vanquished party used when he yielded. If the appellant joined battle, and cried *cravent*, he was to lose *liberam legem*: if the appellee, he was to be hanged. 2 *Inst.* 248, &c.
- CRAW (*Orn.*) the stomach of a bird.
- CRAW-FISH (*Ent.*) vide *Cray-fish*.
- CRAWL (*Mar.*) a sort of pen, or place of confinement, by the sea-side, formed by a barrier of stakes for the purpose of confining fish.
- CRAX (*Orn.*) Curassow, a genus of animals, Class *Aves*, Order *Gallinæ*.
- Generic Character.** *Bill* strong, thick.—*Tail* large, straight, expansile.
- Species.** The principal species are, the—*Crax alector*, the Crested Curassow.—*Crax Pauxi*, Cushew Curassow.—*Crax vociferans*, Crying Curassow.
- CRAY (*Falcon.*) a disease in hawks which hinders their muting; it is much like the pantass.
- CRAYER (*Mar.*) a sort of small sea-vessel.
- CRAY-FISH (*Ich.*) a small sort of lobster, the *Cancer astacus* of Linnæus.
- CRA'YON (*Paint.*) a pencil of any sort of colouring stuff made into paste, and dried for drawing in dry colours on paper, &c.
- CRE'A (*Anat.*) vide *Tibia*.
- CREACENTRUM (*Ant.*) a hollow iron for interlarding meat.
- CREAM (*Nat.*) the thickest, richest, and most substantial part of milk.—*Cream-water*, has a kind of oil upon it, which, when boiled, serves various medicinal purposes.
- CREAM of Tartar (*Chem.*) or the *Bitartrate of Potash*, a salt prepared from the lees of wine.
- CREANCE (*Falcon.*) or *Criance*, a fine, small, long line, fastened to a hawk's leash when she is first lured.
- CREAN'SOR (*Law*) or *Creditor*; one who trusts another with any debt, money, or wares. *Stat.* 38 *Ed.* 3, c. 5; *F. N. B.* 66.
- CREAST (*Her.*) vide *Crest*.
- CREAT (*Man.*) an usher to a riding-master, or a gentleman educated in a riding-school for the purpose of teaching the art of horsemanship.
- CREDENTIALS (*Polit.*) letters of credit, particularly those which are given to ambassadors and plenipotentiaries.
- CRE'DIT (*Law*) a right which lords had over their vassals, to oblige them to lend money for a certain time.
- CREDIT (*Com.*) a mutual loan of merchandises, &c. on the reputation for honesty and solvency of the parties negotiating.—*Letters of credit*, letters given by merchants to persons whom they can trust to draw money from their correspondents.
- Credit*, or *Creditor*, is also the name for that side of a Merchant's Account book, which contains what is owing to him, or he has to receive in distinction from the *debit*, or *debtor* side, containing what he has to pay.
- CREED (*Ecc.*) a summary of the principal articles of the Christian faith, of which three are allowed by the canons of the church, viz. The *Apostles' Creed*, the *Athanasian Creed*, and the *Nicene Creed*. [vide *Apostles*, &c.]
- CREEK (*Com.*) that part of a haven where any thing is landed from the sea. It is also said to be a shore, or bank, whereon the water beats, running in any small channel from the sea.
- CRÉE'PER (*Mech.*) an instrument of iron resembling a grapnel, for dragging along a river.
- CRÉEPER (*Orn.*) a name for a sort of birds, the *Certhia* of Linnæus, which are dispersed through every country of the globe. They have an arched bill, and feet formed for walking.
- CRE'MAILLE (*Fort.*) the inside line of a parapet, which is broken in a manner to resemble a saw.
- CREMA'STER (*Anat.*) a muscle of the *testes*, by which they are suspended and drawn up.
- CREMENTUM *Comitatus* (*Law*) the name given by the sheriffs in their accounts to the improvement of the King's rents. *Hale Sher. Acc.* p. 36.
- CRÉMER (*Med.*) a sort of *crapula*.
- CRÉMNŌI (*Med.*) κρημνοί, the lips of ulcers; also the *labia* of the female *Pudenda*.
- CREMŌNA (*Mus.*) an appellation for the superior sort of violins, which were originally made at Cremona.
- CRÉMOR (*Chem.*) Cream, or any substance floating on the top of a liquid, and skimmed off.
- CRÉ'NÆ (*Bot.*) Incisions in the edges of leaves.
- CRENA'TUS (*Bot.*) crenate; an epithet for leaves that are jagged, or have the edges cut with angular or circular incisions, as in *Prunula farinosa*. When the edge of the

leaf is cut into segments of small circles it is said to be *obtusely crenate*, and when the larger segments have smaller ones upon them, it is said to be *doubly crenate*. The same epithet is applied to the corolla in *Linum*, *Dianthus*, *Chinensis*, &c. and to the nectary in *Narcissus triandrus*. When the edge of a leaf is cut into very small notches, Linnæus applies the epithet *crenulate*.

CRENAUX (*Fort.*) French for small openings, or loop-holes, which are made through the walls of a fortified town.

CRE/NKLES (*Mar.*) or *crengles*; small ropes spliced into the bolt-ropes of the sails of the main-mast and fore-mast, and fastened to the bowing bridles to hold by when the bonnet-sail is taken off.

CRENELLA'TED PARAPET (*Fort.*) an embattled parapet with loop-holes to fire through.

CRENELLE' (*Her.*) or embattled; one of the lines by which ordinaries of all kinds may be diversified. It is made in form like the battlements of a castle, from which it takes its name, as in the annexed figure, "He beareth azure, a bend crenellé or," which were the arms of Scarron, the famous jester and comic writer, whose wife was mistress to Lewis XIV.

CRE/NULATE (*Bot.*) vide *Crenate*.

CRE/OLE (*Polit.*) a person born in the West Indies, but of European origin.

CRE/PANCE (*Vet.*) a chop, or scratch, in a horse's leg, given by the shoe of a hinder foot, which often degenerates into an ulcer.

CREPA'RE *oculum* (*Law*) to put out the eyes; the punishment for which was a fine of 60s. *Leg. H. 1, apud Brompton.*

CREPA'TIO (*Med.*) or *Crepatura*; the breaking or cracking of any seed in the boiling.

CREPATU'RA (*Med.*) an intestinal hernia, according to Paracelsus.

CRE/PIS (*Bot.*) a plant mentioned by Pliny. *Plin. l. 21, c. 16.* CREPIS, in the Linnæan system, Class 19 *Syngenesia*, Order 1 *Polygamia aequalis*.

Generic Character. CAL. common double.—COR. compound imbricate; corollæ hermaphrodite; proper one-petalled.—STAM. filaments five, capillary; anther cylindrical.—PIST. germ somewhat ovate; style filiform; stigmas two, reflex.—PER. none; calyx roundish; seed solitary; receptacle naked, with cells.

Species. The species are of different kinds, as—*Crepis barbata*, seu *Hieracium*, Spanish or bearded Crepis, or Purple-eyed Succory Hawkweed, a biennial.—*Crepis fetida*, *Senecio*, seu *Erigeron*, Stinking Crepis, or Succory Hawkweed, a biennial, and native of Britain, &c.—*Crepis tectorium*, *Hedynois*, seu *Cichorium*, Smooth Crepis, or Yellow Succory, an annual, &c. *Dod. Pempt.*; *Bauh. Hist. Plant.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*; *Raii Hist. Plant.*

CREPIS is also the *Apargia hirta*.

CREPITA'TION (*Chem.*) the crackling noise made by some salts during the process of calcination, otherwise called *detonation*.

CREPITATION (*Surg.*) the noise made by the bones when the surgeon moves a limb to assure himself by his ear of the existence of a fracture.

CRE/PITUS *lupi* (*Bot.*) vide *Lycoperdon*.

CREPU'NDIA (*Ant.*) signifies generally the swath-bands and other apparel proper for young children, but particularly those things which were exposed with young children, as rings, jewels, &c. by which they could be recognised, or which would serve as an inducement for others to take charge of them.

Plaut. Cist. act 3, scen. 1.

Nam hic crepundia insunt, quibuscum illa olim ad me detulit; Quæ mihi dedit, parentes te ut cognoscerent.

Terent. Heaut. act. 4, scen. 1.

— quum exponendam do illi, de digito annulum Detraho; et eum dico ut una cum puella exponeret, Si moretur, ne, expers partis esset de nostris bonis.

The crepundia were called *γναρίσματα* by the Greeks. *Heliod. Æthiop. l. 4*; *Don. in Terent.*; *Long. Pastor. l. 1*; *Salmas. in Vopis. Aurel. c. 4*; *Scheff. de Torq. c. 5, &c.*

CREPU'SCULUM (*Astron.*) The Twilight, or the time from the first dawn, or appearance of the morning, to the rising of the sun; and in the evening the decline of the day, until the setting of the sun. This usually begins and ends about 18 degrees below the horizon.

CRESCEN'DO (*Mus.*) or abbreviated *cresc*; an Italian term in music-books, signifying that the notes of the passage over which it is placed are to be gradually swelled.

CRE/SCENT (*Astron.*) an appellation for the new moon, which, as it begins to recede from the sun, shows a small rim of light terminating in horns, or points. [vide *Astronomy*]

CRESCENT (*Archit.*) a range of buildings disposed in the form of a crescent, or half-moon.

CRESCENT (*Her.*) is the half-moon with the horns turned upwards, as in the annexed figure. It is used either as an honourable ordinary, or as a mark of distinction for the second sons of families, and those descended from him. It is said to be *montant* when the points look towards the top, as in the annexed figure; *inverted* when the points look towards the bottom; *turned* when they look to the dexter side of the shield; and *con-turned* when they look to the sinister side. Two crescents are said to be *adossed* which have their backs towards each other, and *affronted* when their points look towards each other.

CRESCENT, *Order of the* (*Her.*) an order instituted by Mahomet II. emperor of the Turks, who declared himself chief and head of it. The insignia consisted of a gold crescent, with sinople or green enamel, encircled by precious stones, or diamonds. The motto is, "Donec totum impleat orbem."

CRESCENT (*Vet.*) a defect in the foot of a horse when the coffin-bone falls down, and presses the sole outwards.

CRESCENT-SHAPED (*Bot.*) vide *Lunate*.

CRESCENTED (*Her.*) an epithet for a cross having a crescent at each end.

CRESCENTIA (*Bot.*) a genus of plants, called after Pietro Crescentio, an Italian writer on agriculture, Class 14 *Didynamia*, Order 2 *Angiospermia*, in French *Calebassier*, *Couis*, in English *Calabash-Tree*.

Generic Characters. CAL. perianth one-leaved, two-parted; divisions roundish.—COR. one-petalled; tube gibbous; border erect, five-cleft.—STAM. filaments four, subulate; anthers incumbent.—PIST. germ pedicelled, ovate; style filiform; stigma headed.—PER. berry oval; seeds very many.

Species. The two species are the—*Crescentia cujete*, seu *Cujete*, Narrow-leaved Calabash-Tree.—*Crescentia cucurbitina*, Broad-leaved Calabash-Tree.

CRE/SPINUS (*Bot.*) another name for the *Berberis*.

CRE/SPULUM (*Bot.*) another name for the *Bupthalmum*.

CRESS (*Bot.*) or Ladies Smock, the *Cardamine*, some species of which are biennials, the rest perennials.—Bastard Cress, the *Thlaspi*, a biennial.—Garden Cress, the *Lepidium sativum*, an annual, which is cultivated as a salad.—Indian Cress, the *Tropæolum*, an annual.—Rock Cress, another name for a species of Candy-tuft, the *Iberis nudicaulis*.—Rocket Cress, the *Vella*, an annual.—Swines Cress, the *Cochlearia coronopus*.—Water and Winter Cress, the *Sisymbrium nasturtium*, a perennial, or, according to some, an annual.

CRE/SSA (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 2 *Digynia*.

Generic Character. CAL. *perianth* five-leaved; *leaflets* ovate.—COR. one-petalled; *tube* bellied; *border* five-parted.—STAM. *filaments* five, capillary; *anthers* roundish.—PIST. *germ* ovate; *styles* ovate; *stigmas* simple.—PER. *capsule* ovate; *seeds* single.

Species. The two species are the—*Cressa Cretica*, *Anthyllis*, *Quamoclit*, seu *Chamæpithys*, &c.—*Cressa Indica*. They are both shrubs and natives of Crete.

CRE/SSËT (*Mil.*) any great light upon a beacon or watch tower.

CRE/SSIS (*Bot.*) vide *Cardamum*.

CREST (*Her.*) any figure placed upon a wreath, coronet, or cap of maintenance above the helmet or shield.

CREST (*Mil.*) a tuft of feathers; a plume or tassel generally worn on the helmet; the use of which is of great antiquity. [vide *Crista*]

CREST of a *Parapet* (*Fort.*) or of the *Glacis*, the superior surface, or top of the parapet, &c.

CREST (*Mech.*) an imagery or carved work to adorn the head, or top of any thing, like our cornice.

CREST (*Bot.*) vide *Crested*.

CREST (*Nat.*) the tuft of feathers on the head of a bird.

CREST *Fallen* (*Vet.*) is said of a horse when the upper part of the neck on which the mane grows, does not stand upright, but hangs either on one side or other.

CREST-TILE (*Archit.*) a tile on the ridge of a house.

CRESTED (*Her.*) an epithet for a cock, or any other bird, having its comb, in an escutcheon, of a different tincture from its body. The tincture, in that case, must be named; as a "cock, *argent*, crested, or, &c."

CRESTED (*Bot.*) *cristatus*, an epithet for some flowers and anthers that have an appendage, like a crest or tuft.

CRE/SWELL (*Mech.*) the broad edge or verge of the shoe sole.

CRETA (*Min.*) a genus of earths, of the *Calcareous* Order, which, by a chemical analysis, is found to consist of carbonate of lime, carbonic acid gas, with a few extraneous substances. It is friable; effervesces with, and is soluble in acids; calcines in the fire, but does not vitrify.

Species. The principal species are as follow:—*Creta scriptoria*, seu *Calx creta*, Common Chalk.—*Creta pulverulenta*, Native Lime.—*Calx granulata*, seu *Calx testacea*, a calcareous substance, which serves as a nidus for the *Testudo Midas* to lay its eggs in. It is composed of shells and corals.—*Creta squamosa*, Agaric Mineral, &c.

CRETA/CEOUS *Acid* (*Chem.*) vide *Carbonic acid*.

CRE/TE (*Fort.*) the earth thrown out of the ditch in a fortification, trench, &c.—*Crête d'un chemin couvert*, the highest peak, or part of a covered way, or any other work.

CRE/THMON (*Bot.*) vide *Crithmum*.

CRE/TIS (*Ant.*) from *cerno*, to decide; a space of time which is given by a testator to an heir before he enters upon an estate. If he did not resolve, at least within one hundred days, he was to lose his estate. *Cic. ad Attic.* l. 11, ep. 12; *Varr. de Lat. Ling.* l. 5, c. 8; *Isid. Orig.* l. 5, c. 24.

CRE/VET (*Mech.*) a melting pot used by goldsmiths.

CRE/VICE (*Fort.*) a chasm or hollow in a piece of ordnance.

CRE/VISSE (*Ent.*) Cray-fish.

CREW (*Mar.*) the company of sailors belonging to a ship, boat, or any kind of vessel.

CRE/WEL (*Mech.*) fine worsted.

CRE/WET (*Mech.*) or *cruet*, a phial or narrow-mouthed glass to hold oil or vinegar.

CREUX (*Sculpt.*) a term signifying the reverse of relief; thus, to engrave, *en creux*, is to cut below the surface.

CRI (*Mil.*) French for the motto written upon colours.

CRI/ANCE (*Falcon.*) vide *Creance*.

CRI/BBAGE (*Sport.*) a sort of game played with cards.

CRI/B-BITING (*Man.*) a bad habit among horses, which is often occasioned by their uneasiness in breeding of teeth.

CRI/BBLE (*Husband.*) coarse meal, a little better than bran.

CRI/BRA'TION (*Chem.*) the sifting of powder through a fine sieve.

CRI/BRIFORME (*Anat.*) or *cribrosum*, a name for the ethmoid bone.

CRIC (*Gunn.*) or *Cricq*, French for a machine, which is used for dragging up a piece of ordnance. *Cric* is also the name of a poignard used by the Malayan people.

CRI/CELA'SIA (*Med.*) *κρικηλάσια*, from *κρίκος*, a ring, and *ελαύνω*, to drive; the name of an ancient exercise, very similar to the modern one, of driving a hoop. *Oribas.* Med. l. 6, c. 26.

CRICK (*Med.*) a sort of cramp or pain in the neck.

CRICKET (*Ent.*) a little insect haunting ovens, &c.

CRICKET (*Sport.*) a game with bat and ball, &c.

CRICO *arytænoides* (*Anat.*) from *κρίκος*, a ring, *αρυτῆς*, a drinking cup, and *εἶδος*, likeness; two muscles of the glotta, called *lateralis* and *posticus*, which open the *rima* by pulling the ligaments from one another.—*Crico-Pharyngeus*, vide *Constrictor-Pharyngis*.

CRICOIDES (*Anat.*) from *κρίκος*, a ring, and *εἶδος*, likeness; a cartilage of the *Larynx*, or wind-pipe.

CRICO-THYROIDES (*Anat.*) from *κρίκος*, a ring, *θύρεος*, an helmet, and *εἶδος*, likeness; an epithet for a pair of muscles, arising from the fore part of the *cricoides*, and ending in that called *scutiformis*.

CRIMINAL (*Law*) relating to crimes, or having the character of a crime, as—*Criminal Law*, *Criminal Conversation*, &c.—*Crim. Con.*, abbreviation for criminal conversation.

CRIMNO/DE (*Med.*) *κρικηνώδης*, from *κρίμνον*, bran, and *εἶδος*, likeness; branny, an epithet for urine which deposits a branny sediment.

GRIMNON (*Med.*) *κρίμνον*, a coarse sort of meal, made of zea and wheat, from which a drink was made, recommended often by Hippocrates. *Hippocrat. de Morb.* l. 3, &c.; *Gal. Exeges. Vocab. Hippocrat.*

CRIMP (*Com.*) an agent for Coal-Merchants.

CRIMPS (*Polit.*) persons who decoy others into the land or sea-service.

CRIMSON (*Paint.*) a fine deep red colour.

CRIMSON GRASS-VETCH (*Bot.*) the *Lathyrus nissolia* of Linnæus.

CRINA/LE (*Ant.*) a hairpin.

CRINA'TA (*Bot.*) the *Pavetta caffra* of Linnæus.

CRINA'TED (*Bot.*) the same as *Crinite*. [vide *Crinitus*]

CR/INED (*Her.*) an epithet for any animal having its beard of a different tincture from the rest of the body.

CR/INELLS (*Falcon.*) vide *Crinites*.

CRINES VITIUM (*Nat.*) the tendrils of the vines.—*Crines Polypi*, the fins of the polypus.

CR/INGLE (*Mar.*) in French *herseau de boulines*, a small hole formed in the bolt-rope of a sail, by intertwisting the strand of a rope alternately round itself and through the strands of the bolt-rope till it becomes threefold and assumes the shape of a ring.

CRIN/ITES (*Falc.*) or *Crinells*, small black feathers in a hawk, like hair about the sere.

CRINI/TUS (*Bot.*) *crinite*, an epithet for some flowers having long hair, or beards resembling hair, as in *Phleum crinitum*; also an epithet for fronds.

CRINODE/NDRON (*Bot.*) from *κρίνον*, a lily, and *δένδρον*, a tree; a genus of plants, Class 16 *Monodelphia*, Order 4 *Decandria*.

Generic Characters. CAL. none.—COR. bellshaped; *petals* six, oblong.—STAM. *filaments* ten, erect; *anthers* ovate.—PIST. *germ* superior, ovate; *style* subulate.—PER. *capsule* coriaceous; *seeds* three, roundish.

Species. The single species is a superb evergreen branching tree, with a body of seven feet in diameter, a native of Chili.

CRINODES (*Med.*) from *crinis*, the hair; a name for collections of a fluid in the cutaneous follicles of the face and breast, which appear like black spots.

CRINOMENON (*Ant.*) το κρινόμενον, the issue in a suit of law, which Cicero calls the *Quæstio*. *Cic. Or.* 1. 2, c. 10.

CRINOMYRON (*Med.*) κρινόμυρον, from κρινον, a lily, and μυρον, ointment; an ointment of lilies.

CRINON (*Bot.*) κρινον, a red lily; so called by the Greeks, according to Pliny. Dioscorides also speaks of the crinon as a purple flower. *Plin.* 1. 21, c. 5; *Dioscor.* 1. 3, c. 116.

CRINONES (*Med.*) a sort of cutaneous worms which breed in the flesh of children.

CRINUM (*Bot.*) from κρινόν, a lily; a genus of plants, Class 6 *Hexandria*, Order 1 *Monogynia*.

Generic Characters. COR. one-petalled; tube oblong; border six-parted.—STAM. filaments six, subulate; anthers oblong, linear.—PIST. germ inferior; style filiform; stigma three-cleft—PER. capsule subovate.

Species. These species have bulbous roots, of which the two following are the principal:—*Crinum Asiaticum*, *Bulbine Asiatica*, *Amaryllis*, *Lilium Zeylanicum*, *Radix loxicaria*, seu *Bellutta-pala-taly*.—*Crinum Americanum*, seu *Lilio-asphodelus*, Great American Crinum, &c.

CRINUM is also the name of the *Agapanthus*, the *Amaryllis falcata*, *latifolia purpurea et zeylanica*; *Cyrtanthus obliquus*, and the *Cyrtanthus angustifolia*.

CRIOBO'LIIUM (*Ant.*) from κρίς, a ram, and βάλλω, to knock down; the sacrifice of a ram by knocking it down with a hatchet. *Firmic. de Error. Prof. Relig.* p. 37; *Turneb. Adv.* 1. 27, c. 21; *Salmas. in Lamprid. Heliogab.* c. 7.

CRIOCERIS (*Ent.*) a division of the genus *cryptocephalus*, according to Fabricius, comprehending those insects of that genus that have the jaw bifid and the body oblong.

CRIOGENES (*Med.*) κριογενεις, an epithet for certain trochees recommended by Paulus Ægineta for cleansing sordid ulcers. *P. Aginet.* 1. 7, c. 12.

CRIOMYXUS (*Med.*) κριομυξος, an epithet for persons abounding with mucus in the nose.

to **CRIPPLE** (*Mar.*) to damage a ship in her masts, rigging, yards, &c.

CRIPPLINGS (*Carpent.*) short spars or piles of wood against the side of a house.

CRISIMOS (*Med.*) κρίσιμος, critical; an epithet applied to those days on which a crisis happens.

CRISIS (*Med.*) κρίσις, from κρίνω, to determine; most commonly signifies that sudden change in the symptoms of a disorder from which a judgment may be formed of its termination, whether it will be favourable or unfavourable. This is divided into an imperfect or perfect crisis; the former not clearly determining the disease; the latter that which terminates decisively either one way or another. *Hippocrat. de Affect.* &c.

CRISIS is likewise used by Hippocrates for the solution of a disorder which precedes recovery. *Hippocrat. Præcept.* Also for the secretion of any noxious humour. *Hippocrat. de Art.*; *Gal. Exeges.*

CRISOM (*Ecc.*) vide *Chrisom*.

CRISPATURA (*Med.*) a spasmodic contraction of the membranes and fibres.

CRISPED (*Bot.*) vide *Crispus*.

CRISPIN (*Cus.*) a name given to shoemakers, of whom St. Crispin was said to be the patron.

CRISPUS (*Bot.*) curled, an epithet for a leaf. [vide *Curled*]

CRISTA (*Ant.*) λήφος, the crest; the upper part of the helmet, which served either for ornament or terror among the ancients.

Virg. Æn. 1. 9, v. 365.

Tum galeam Messapi habilem, cristisque decoram Indult.

Æn. 1. 8, v. 620.

Terribilem cristis galeam, flammisque vomentem.

The custom of wearing crests was introduced, according to Herodotus, by the Ethiopians, who used either horse-hair or the feathers of birds. *Herodot.* 1. 7, c. 69, &c.; *Polyb.* 1. 6, c. 21; *Strab.* 1. 14; *Sil. Ital.* 1. 10, v. 399; *Plin.* 1. 7, c. 56; *Lamprid. in Heliogab.* c. 19; *Veget.* 1. 1, c. 20, &c.; *Lips. de Milit. Roman.* 1. 3, dial. 5.

CRISTA (*Bot.*) the *Cæsalpina pulcherrima* et *crista* of Linnæus.—*Crista Galli*, the *Rhinanthus crista galli*.—*Crista Pavonia*, the *Guilandina bonducella*.

CRISTA GALLI (*Anat.*) a process of the *Os Ethmoides*.

CRISTATUS (*Bot.*) crested. [vide *Crested*]

CRITHE (*Med.*) κριθή, barley; a grain much recommended by Hippocrates.

CRITHMUM (*Bot.*) κριθμον, and κριθμουν, a plant which strengthens the stomach, provokes urine, and opens obstructions in the uterus. *Hippocrat. de Nat. Mul.*; *Dioscor.* 1. 2, c. 157; *Plin.* 1. 26, c. 8.

CRITHMUM, in the *Linnean system*, the *Echinophora spinosa*.

CRITHODES (*Anat.*) from κριθος, barley, and ἰδος, like; protuberances shaped like barley.

CRITICAL DAYS (*Med.*) are those days whereon there happens a sudden change of the disease, or on which it comes to the crisis.—*Critical signs*, signs taken from a crisis, either towards a recovery or otherwise.

CRITICI (*Med.*) critical fevers, which terminate with a lateritious sediment in the urine.

CRITONIA (*Bot.*) the same as *Kuhnia*.

CRIZZELLING (*Mech.*) a kind of roughness which arises on the surface of some kinds of glass, particularly that which is made of black flints, a crystallized sand, &c.

CROATS (*Mil.*) a regiment of horse formerly in France; so called because at first they were of the country of Croatia.

CROATS (*Man.*) or *Cravats*, horses brought from Croatia, in Hungary, which for the most part beat upon the hand, and bear up to the wind; viz. bear their necks high, thrust out their noses, and shake their heads.

CROBYLUS (*Ant.*) κροβυλος, a caul to wear on one's head, or a roll of hair braided, which belonged to the men, in distinction from the *corymbus*, which belonged to the females; and the *scorpius*, peculiar to boys. *Thucyd. Hist.* 1. 1, c. 6; *Poll.* 1. 2, § 3; *Petron.* 70; *Interpres in Thucyd.*; *Tertull. de Virg. Vel.* c. 10; *Salmas. Exercit. Plin.* p. 536.

CROCARDS (*Com.*) a sort of money for some time current in England.

CROCHES (*Sport.*) the little buds about the top of a deer's horns.

CROCHET DE TRANCHEE' (*Fort.*) the further end of a trench or boyau, which is purposely carried to conceal the boyau, in order to prevent it from being enfiladed.

CROCI (*Bot.*) another name for the anthers.

CROCIA (*Archæol.*) the crozier or pastoral staff so called, a *similitudine crucis*, which bishops, &c. had the privilege of bearing.

CROCARIUS (*Archæol.*) the cross-bearer, who, like our verger, went before the prelate, and bore his cross.

CROCIAS (*Min.*) a precious stone so called from its resemblance in colour to the crocus or saffron. *Plin.* 1. 37, c. 11.

CROCIDE Confectio (*Med.*) a confection recommended by Myrepsus de *Antidot.*

CROCIDIXIS (*Med.*) κροκιδίξις, a fatal symptom in some diseases, where the patient gathers up the bed-clothes, and seems to pick up substances from them.

CROCINUM (*Med.*) κρόκινον, the oil of saffron. *Dioscor.* 1. 1, c. 64.

CROCIS (*Bot.*) κροκίς, a herb so called from its colour. *Plin.* l. 27, c. 17.

CROCKET (*Archit.*) from the French *croc*, a hook; an ornament placed at the angles of pediments, canopies, &c. resembling the buds of trees and the opening leaves in the spring season.

CROCODES (*Med.*) a name for trochees of a saffron colour.

CROCODILE (*Zool.*) an amphibious animal of the lizard tribe, the *Lacerta crocodilus* of Linnæus, which is an inhabitant of the Nile. It is covered with hard scales, which cannot easily be pierced, except under its belly. It has a wide throat, with several rows of teeth, sharp and separate, which run into one another. Though its four legs are very short, yet it runs with great swiftness, but cannot easily turn itself. It is very long-lived, has a very piercing sight, and buries its eggs in the sand, that the heat of the sun may hatch them. [vide *Crocodilus*]

CROCODILE'A (*Ant.*) κροκοδελία, the sweet excrement of the land crocodile, from which women made an excellent wash for the face. *Plin.* l. 28, c. 8.

CROCODILOIDES (*Bot.*) the same as the *Atractylis*.

CROCODILUS (*Num.*) the crocodile, which is a native of Egypt, was employed as a symbol of that country on medals, as in the annexed figure of a medal of Julius Cæsar. The inscription AEGYPTO CAPTA. *Goltz. Numis.*

CROCOMA'GMA (*Med.*) κροκόμαγμα, from κρόκος, saffron, and μάγμα, dregs; a trochee made of the dregs of oil of saffron, and other spices. *Plin.* l. 21, c. 20.

CROCO'TA (*Ant.*) a woman's garment of saffron colour, of which Aristophanes speaks under the name of κροκωτός. *Interpres in Aristoph. Ran.; Plaut. Aul. act. 3, scen. 5, v. 47; Cic. de Arusp. Resp. c. 20; Apul. Apol. p. 422; Salmas. ad Tertull. de Pall.*

CROCOTA'RII (*Ant.*) dyers of saffron-coloured garments. *Plaut. Aul. act. 3, scen. 5, v. 47.*

CROCO'TTA (*Zool.*) vide *Corocotta*.

CROCUS (*Bot.*) κρόκος, saffron or crocus, a bulbous plant celebrated by the poets of antiquity for the beauty of its colour and its fragrance.

Hom. Hymn. in Pan.

—— τόθι κρόκος ἴδ' ὕκκινθος
Εὐώδιος θαλέων καταμίσηται ἀκριτα πόσιν.

Theocrit. Idyl. 8.

Λι δ' αὐτε ξανθίσι κρόκος λυοίσσα εθείρη
Δρέπτον εριδμυίνισσι.

Virgil. in Cir.

—— Aut suave rubens narcissus
Aut crocus alternâ conjungens lilia calthâ.

Stat. l. 3, sylv. 1.

Et tenues Arabum respirant gramine sylva
Sicanisque crocis—

On account of its fragrance, an infusion in wine was sprinkled in the theatre, and on the spectators.

Mart. l. 5, epig. 25.

Hoc rogo non melius, quam rubro pulpita nimbo
Spargere, et effuso permauisse croco.

Lucret. l. 2.

Et cum scena croco Cilici perfusa recens est,
Araque Panchæus exhalat propter odores.

It was supposed by some to derive its name παρά τὸ ἐν κρύει θάλλειν from blowing in the cold weather; but Ovid ascribes its name to the youth Crocus, who was changed into this flower.

Ovid. Metam. l. 4.

Et Crocum in parvos versum cum Smilace flores.

As to its medicinal virtues, saffron was reckoned a most

noble cordial, a strengthener of the heart and vital spirits, a resister of putrefaction, and good in all kinds of malignant disorders. *Theophrast. Hist. Plant. l. 7, c. 3; Cic. de Orat. l. 3; Dioscor. l. 1, c. 25; Sen. Epist. 90, &c.; Plin. l. 21, c. 6; Sucton. in Ner. c. 25.*

CROCUS, in the *Linnean system*, a genus of plants, Class 3 *Triandria*, Order 1 *Monogynia*.

Generic Characters. CAL. spathe one-leaved.—COR. tube simple; border six-parted; divisions ovate.—STAM. filaments three, subulate; anthers sagittate.—PIST. germ inferior; style filiform; stigmas three, convolute.—PER. capsule three-celled, three-valved; seeds several, round.

Species. Two species of this well-known bulbous plant are distinguished, namely—*Crocus officinalis, sativus, seu autumnalis*, Official Crocus, or Saffron, and—*Crocus vernus*, Spring Crocus. The former of these has, according to Haller, a three-horned stigma that is odorous and aromatic, which the vernal crocus has not. It is not known of what country the crocus is indigenous.

CROCUS is also the name of the *Ixia bulbodicum*.

CROCUS (*Chem.*) a name given by the old chemists to several metalline preparations calcined to deep red or saffron colour, as—*Crocus Antimoni*, or *Metal-lorum*, sulphuretted oxide of antimony. *Crocus Martis*, green vitriol exposed to the fire till it becomes red, which was marked by the character  fig. 1.—*Crocus Veneris*, copper calcined, marked with the character  fig. 2.

CROFT (*Archæol.*) a little close adjoining to a dwelling-house, enclosed for pasture, arable, or any particular use.

CROISA'DE (*Mil.*) vide *Crusade*.

CROISES (*Ecc.*) pilgrims who wore a cross on their garments.

CROIX DE ST. LOUIS (*Mil.*) the Cross of St. Louis, a French military order instituted by Lewis the Great in 1693, of which the King is grand master. The cross consists of an enamelled golden fleur de lis, which is attached to the button-hole of the coat by means of a small ribbon, crimson-coloured and watered. On one side is the cross of St. Louis, with this inscription, *Ludovicus magnus instituit 1693*; on the reverse a blazing sword, with the words *Bellicæ virtutis præmium*.

CROME (*Husband.*) a fork with long prongs.

CROMMYXYRE'GMA (*Med.*) κρομμυξορυγμία, acid and fetid eructations resembling the smell of onions.

CRONE (*Mech.*) French for a round low tower, covered at the top like a windmill, standing by the sea-side, or the river-side, and turning on a pivot, for the purpose of loading and unloading cargoes.

CRO'NET (*Vet.*) or coronet, the hair which grows over the top of a horse's hoof.

CRO'NET (*Mech.*) the iron at the end of a tilling spade.

CROOKS (*Mus.*) curved tubes occasionally applied to trumpets and horns, and made moveable, for the purpose of tuning them to different keys.

CROO'TES (*Min.*) a substance found about the ore in lead mines.

CROP (*Husband.*) the produce of any thing which is sown in a field.

CROP (*Orn.*) the craw of a bird.

CRO'PIO (*Bot.*) a small fruit like the Ethiopian pepper. *Clus. Hist. Rar. Plant.*

CROPPING (*Vet.*) an operation of cutting the ears or tails of horses short.

CRO'QUANTS (*Polit.*) a faction which committed great depredations in some parts of France during the sixteenth century.

CROQUETS (*Cook.*) a certain compound made of a delicious faræ.

CROSE'TTES (*Archit.*) the trusses or consoles on the flanks of the architrave under the cornice.

CRO'SIER (*Ecc.*) a bishop's staff made in the shape of a shepherd's crook, intimating that they are spiritual shepherds.

CRO'SLET (*Her.*) a name for a cross that is crossed at each end, as in the annexed figure. "He beareth *argent* a chevron, *gules* between three cross crosslets, fitchy *sable*, all within a double tressure flowered and counterflowered with fleurs de lis of the second *or*." These are the arms of the Kennedy family.

CROSS (*Ant.*) vide *Cruz*.

CROSS (*Her.*) one of the most ancient and noble of all the honourable ordinaries, which contains one-fifth of the field, and is formed by the meeting of two perpendicular with two horizontal lines near the fess point, where they make four right angles: the lines are not continued throughout, but discontinued the breadth of the cross, as *fig. 1*, "He beareth *azure* a cross *or*, by the name of Shelton, Norfolk."

The cross is the most varied in its form of any ordinary. The plain cross is simply denominated the cross, as in *fig. 1*; but crosses are likewise diversified with crooked lines, namely,—*engrailed*, as *fig. 2*, "*Or* a cross engrailed *sable*;"—*voided and coupé*, as *fig. 3*, "*Argent* a cross voided and coupé *sable*;"—*raguled*, as *fig. 4*, "*Ermine* a cross raguled *gules*." To these may be added the cross indented, wavy, pierced, &c. There are other forms of crosses which are peculiar to them, of which the following are the principal—*Cross potent*, a cross terminating with the head of a crutch, called a potent, as *fig. 5*.—*Cross*

fitchy, i. e. sharp at the end, as *fig. 6*, "*Azure* a cross potent fitchy *or*," which was borne by Ethelred, King of the West Saxons, in 946.—*Cross pattée*, or formy, one that is sharp in the centre and broad at the ends, as in *fig. 7*.—*Cross pall*, which in Scotland is called a *Shake-fork*, as in *fig. 8*.—*Cross-milrine*, a cross like a mill link.—*Cross-flory*, the ends of which terminate with fleurs de lis.—*Cross-avelane*, the quarters of which resemble a filbert-nut.—*Cross pommée*, having a ball at each end.—*Cross botonnée*, the ends of which resemble trefoil.—*Cross-moline*, the ends of which turn both ways.—*Cross degraded*, with steps at each end.—*Cross Calvary*, with steps at the base.—*Cross patriarchal*, with two horizontal lines.—*Cross mascally*, composed of masles.—*Cross bezanty*, composed of bezants.—*Cross of four ermines*,—*cross of four pheons*, &c.—*Order of the Cross*, an order of ladies instituted in 1668 by the Empress Elconora de Gonzagna, wife of the Emperor Leopold, on the occasion of miraculously recovering a little golden cross from the flames, when the box which contained it was entirely consumed. In this little cross were said to be deposited two pieces of the true cross.—*Cross* is also the name of a knight wearing the cross as a part of the insignia of his order, as the Grand Cross is the first of the three classes into which knights of the order of the Bath are now divided.

CROSS (*Min.*) two nicks cut on the surface of the earth, + which the miners make when they take the ground to dig for ore. This cross gives them three days' liberty to make and set on stones; and for each of these crosses they may have a mear of ground in the vein, provided the stones be set on within the three days.

CROSS (*Num.*) a name given to the right side or face of a coin, the other being called the pile, or reverse: it was so called because the figure of a cross was represented on this side previous to the custom of stamping the head of a prince.

CROSS (*Law*) the figure of a cross made as a signature to a deed, &c. by those who cannot write. This custom originates, without doubt, in the sacredness of the thing represented, and the frequency of its use in all other cases.

CROSS, *invention of the* (*Ecc.*) a feast anciently solemnized on the third of May, to commemorate the discovery which St. Helena, the mother of Constantine, made of the cross, buried deep in the ground of Mount Calvary, on which spot she erected a cross.—*Exaltation of the cross* was another festival, kept on the 14th of September, in memory of the restoration by Heraclitus of the true cross to Mount Calvary, which had been taken away by Chosroes, King of Persia.

CROSS, *Sr.* the ensign or grand standard borne by the crusaders, many of whom also bore the cross on that occasion as a part of their coat armour; whence the use of the cross has since become so frequent in coats of arms. [vide *Cross* under *Heraldry*] A *St. George's cross*, or the red cross in a field *argent*, is now the standard of England.

CROSS (*Mech.*) an instrument used in surveying for the purpose of raising perpendiculars. It consists merely of two pair of sights set at right angles to each other.

CROSS (*Archit.*) any building which is in the figure of a cross, as churches in a *Greek cross*; so likewise a *Market cross*, a pillar in this form erected in a market-place, &c.

CROSS (*Man.*) a term applied to the movements of a horse, as "To make a *cross* in ballotades," or "To make a *cross* in corvets," i. e. to make a sort of leaps or airs with one breath, forwards, backwards, and sideways, in the form of a cross.

CROSS in the hawse (*Mar.*) in French *croix dans les cables*; a phrase applied to a ship when, moored with two bars, she has turned the wrong way, so that the two cables lie across each other.

CROSS-BANDED (*Carpent.*) an epithet applied to hand-railing when a veneer is laid upon the upper side of the rail, with the grain of the wood crossing that of the rail.

CROSS-BARS (*Carpent.*) bars laid across one another. The cross-bar in a carriage, sometimes called the *splinter*, or *master-bar*, is that part into which the shafts are fixed.

CROSS-BARS (*Mar.*) round pieces of iron, bent at each end, and used as levers to turn the shanks of the anchor.

CROSS-BAR-SHOT (*Gunn.*) a round shot having a long iron spike cast as if it were let quite through the middle.

CROSS-BATTERY (*Mil.*) vide *Battery*.

CROSS-BEAM (*Carpent.*) any beam that goes across another.

CROSS-BEAM (*Mar.*) a great piece of timber which goes across two other pieces, called *bites*, to which the cable is fastened when it rides at anchor.

CROSS-BEARER (*Ecc.*) an officer in the Romish church who bears the cross before the pope, or any primate. A prelate bears a single cross, a patriarch a double cross, and the pope a triple cross, in his arms.

CROSS-BILL (*Law*) an original bill, by which the defendant prays relief against the plaintiff.

CROSS-BILL (*Orn.*) a sort of Grosbeak, the *Loxia curvirostra* of Linnæus, so called because the mandibles of its beak cross each other.

CROSS-BOW (*Mil.*) called by the Latins *arcus balistarium*, a military weapon of defence, in the use of which the English were formerly distinguished. [vide *Bow*]

CROSS-BREED (*Husb.*) a term applied generally to animals, but particularly to horses, dogs, and sheep, where the male is one breed and the female of another.

CROSS-CHOCKS (*Mar.*) in French *espece d'accotars*, pieces of timber fayed across the dead-wood in midships, to make good the deficiency of the lower heels of the futtock.

CROSS-EXAMINATION (*Law*) a close and rigid examination on the part of the adversary, consisting of cross questions, in order to elicit the truth.

CROSS-GARNETS (*Carpent.*) a sort of hinges made in the form of the letter T.

CROSS-GRAINED (*Carpent.*) an epithet applied to building-stuff or timber with fibres in a contrary direction.

CROSS-JACK (*Mar.*) pronounced *cojeck*, in French *vergue sèche*, the lower yard on the mizen-mast, which is hence called the *cross-jack* yard, and the sail which is bent to that yard the *cross-jack* sail.

CROSS-MULTIPLICATION (*Arith.*) vide *Duodecimals*.

CROSS-PAWLS (*Mar.*) pieces of timber which keep the ship together whilst in her frame.

CROSS-PIECE (*Mar.*) in French *rateau*, *ratelier*, a rail of timber extended over the windlass of a merchant ship from the knight-heads to the belfry.

CROSS-SPALES (*Mar.*) pieces of timber placed across the ship, and nailed to the frames, securing both sides of the ship together till the knees are bolted.

CROSS-STAFF (*Mar.*) vide *Fore-staff*.

CROSS-TIPING (*Husband.*) a method of harrowing cross-wise.

CROSS-TREES (*Mar.*) in French *barres traversières des hunes*, pieces of oak timber supported by the cheeks and trestle-trees at the upper ends of the lower and top-masts, athwart which they are laid.

CROSS-TRIP (*Sport.*) a term used in wrestling when the legs are crossed within one another.

CROSS-WORT (*Bot.*) the *Valantia* of Linnæus, an annual.

CROSSOPETALUM (*Bot.*) another name for the *Rhocomma*.

CROSSOSTYLIS (*Bot.*) a genus of plants, Class 16 *Monadelphina*, Order 6 *Polyandria*; so called from *κροστος*, a fringe, and *στυλις*, a little pillar, because the stigma is fringed or jagged.

Generic Character. CAL. *perianth* turbinate; *segments* ovate.—COR. *petals* four, elliptic; *claw* narrow; *nectary* consisting of corpuscles.—STAM. *filaments* twenty, *filiform*; *anthers* small.—PIST. *germ* convex; *style* cylindrical; *stigmas* four, trifid.—PER. *hemispherical*; *seeds* very many.

Species. The single species is the *Crossostylis biflora*, a native of the Society Isles.

CROTALARIA (*Bot.*) a genus of plants, Class 17 *Diadelphina*, Order 4 *Decandria*; so called from *crotalum*, a rattle, which the legume resembles.

Generic Character. CAL. *perianth* three-parted.—COR. *papilionaceous*; *standard* cordate; *wings* ovate; *keel* acuminate.—STAM. *filaments* ten, connate; *anthers* simple.—PIST. *germ* oblong; *style* simple; *stigma* obtuse.—PER. *legume* short; *seeds* one or globose.

Species. The plants of this genus are either annuals or shrubs, and mostly natives of the Cape of Good Hope.

CROTOLARIA is also the name of the *Sophora alba*.

CROTALIA (*Ant.*) *κροτάλια*, jewels so worn as to jingle by striking against one another. *Plin.* l. 9, c. 35.

CROTALUM (*Ant.*) the cymbal.

CROTALUS (*Zool.*) a Rattle-Snake, a genus of animals, Class *Amphibia*, Order *Serpentes*.

Generic Character. *Plates* on the belly.—*Plates* and *scales* under the tail.—*Tail* terminated by a rattle.

Species. The species, which are not numerous, are distinguished principally by the number of plates.

CROTAPHAGA (*Orn.*) Ani, a genus of animals, Class *Aves*, Order *Picæ*.

Generic Character. *Bill* semioval—*Nostrils* pervious.

Species. The species are the—*Crotophaga Ani*, the Lesser Ani.—*Crotophaga major*, the Greater Ani.—*Crotophaga ambulatoria*, the Walking Ani.

CROTAPHI (*Anat.*) *κροτάφοι*, the temples; whence *Crotaphites*, the temporal muscles; *Crotaphium* and *crotaphos*, a pain in the head near the temples.

CROTCHES (*Mar.*) in French *fourcats*, Italian *croccia*, the crooked timbers placed upon the keel in the fore and hind-parts of a ship, upon which the frame of her hull grows narrower below as it approaches the sternpost abaft.—*Crotches*, in French *cornes*, are also pieces of wood or iron, whose upper part opens into two horns or arms like a half-moon. They serve principally to support booms, &c.

CROTCHETS (*Print.*) are marks after this manner [] to separate what is not a necessary part of a sentence.

CROTCHET (*Surg.*) a curved instrument with a sharp hook for extracting the fœtus.

CROTCHET (*Mus.*) a note of time marked as in *fig. 1*, being of the sixth degree in length, equal in duration to one thirty-second part of a large, the sixteenth of a long, the eighth of a breve, the quarter of a semibreve, and half of a

Fig. 1.

Fig. 2.

minim.—*Crotchet rest*, marked as in *fig. 2*, is a character of silence equal in duration to the crotchet.

CROTCHETS (*Sport.*) the master teeth of a fox.

CROTELS (*Sport.*) the ordure, or dung of a hare.

CROTON (*Bot.*) *κρότων* or *κρίσι*, a shrub mentioned by Dioscorides; the seed of which resembles the insect called the *croton* or *tick*; whence it derives its name. From this shrub was extracted an oil that was used for food. *Dioscor.* l. 4, c. 164; *Plin.* l. 15, c. 7.

CROTON, in the *Linnean system*, a genus of plants, Class 21, *Monoecia*, Order 9 *Monadelphia*.

Generic Character. Female flowers remote from the males on the same plant.—CAL. *perianth* cylindric.—COR. *petals* oblong, obtuse.—STAMEN in the Males; *filaments* ten or fifteen; *anthers* twin.—PISTIL in the Females; *germ* roundish; *styles* three; *stigmas* reflex.—PERICARP in the Females; *capsule* roundish; *seeds* solitary.

Species. Plants of this genus are shrubs or annuals, and mostly aromatic, and natives of the Indies. Among the principal shrubs are the following; namely—*Croton tacciferum*, *Ricinoides*, *Ricinus*, *Halecus*, seu *Lacca*, *Lac Croton*, a shrubby tree which exudes a very fine lac spontaneously, but this is distinct from what is called Gum Lac in Europe, which is the work of the red ants. *Croton lineare*, seu *Cascarilla*, Willow-leaved Croton, called in Jamaica Rosemary-tree, because it resembles the Rosemary in smell and appearance.—*Croton tiglium*, seu *Pinus Indica*, Purging Croton.—*Croton Rinocarpus*, seu *Rinocarpus*, Surinam Croton, &c. Among the annuals are the following:—*Croton tinctorium*, *Ricinoides*, seu *Heliotropium tricoccum*, Official Croton, which is the only native of Europe, and from which the dye called *turnsol* is extracted.—*Croton palustre*, *argenteum*, &c. *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*; *Raii Hist. Plant.*; *Tournef. Instit.*

CROTONNE (*Bot.*) *κροτώνη*, a fungous excrescence growing on trees. *Theophrast. Hist. Plant.* l. 1, c. 13.

CROTONNE (*Med.*) a fungous tumour on the Periosteum.

CROUCH *mass* (*Ecc.*) or *Crouch-mass-day*, a festival observed by the Roman Catholics, in honour of the holy cross, on the 14th of September.

CROUMATA (*Mus.*) κρούματα, from κρούω, to beat; the musical tones resulting from the pulsation of instruments, which are mentioned by *Hippocrates de Vict.* 1. 1; *Foes. Econom. Hippocrat.*

CROUP (*Vet.*) the hindmost part of a horse, including the buttocks and tail, from the haunches to the dock.—*Racking Croup* is when a horse's fore-quarters go right, but his croup in walking swings from side to side. "To gain the *Croup*" is when one horseman makes a demi-tour upon another in order to take him upon the croup. "Without slipping the *Croup*," signifies without traversing, or letting the croup go out of the volt, or the tread of the gallop.

CROUPE (*Man.*) a leap higher than a curvet, in which the horse keeps his fore and hind quarters of an equal height.

CROUPER (*Man.*) a device put under the tail of a horse to keep the saddle more steady.

CROUTADE (*Cook.*) a peculiar manner of dressing a loin of mutton.

CROW (*Or.*) a prolific, social, and clamorous bird, which constitutes, a genus of birds, in the Linnean system, under the name of *Corvus*. The food of the crow is partly animal and partly vegetable.

Crow (*Mech.*) an iron instrument for raising heavy bodies. It is formed to act as a lever, and is employed particularly in moving of timber.

Crow (*Astron.*) vide *Corvus*.

CROW-BERRY (*Bot.*) the *Empetrum nigrum* of Linnæus.—*Crow-Foot*, the *Ranunculus gramineus, pyrenæus, &c.* a perennial.—*Crow-Garlick*, the *Allium vineale*, a bulbous root.

CROW-FOOT (*Mar.*) in French *arraignée*, a complication of small cords spreading out from a long block, like the small parts which extend from the back-bone of a herring.

CROW-NET (*Sport.*) an invention for catching wild fowls in the winter season.

to **CROWD** (*Mar.*) to carry an extraordinary force of sail in a ship.

CROWLE (*Mus.*) an old English instrument, called by the French *chrotta*, which was supposed to resemble the flute.

CROWN (*Ant.*) vide *Corona*.

CROWN (*Her.*) a cap of state worn by sovereign princes. Crowns are divided generally into royal and imperial.—*Royal Crowns* were the ancient crowns, which were open and worn by Kings.—*Imperial crowns*, first worn by emperors, are the closed crowns, which have now generally taken place of the open ones. Crowns are moreover distinguished, according to the sovereigns or princes by whom, and the circumstances under which, they are worn, &c.—*Crown of England* is that with which the kings of England are crowned. It is called *St. Edward's Crown*, because it is made in imitation of the ancient crown supposed to have been worn by that monarch, which was kept in Westminster Abbey, for the use of his successors, till the rebellion, when it was sold with the rest of the Regalia. The one now in use was made after the pattern for the coronation of Charles II, and has remained unaltered for his successors ever since. This very rich imperial crown, as given in *fig. 1*, is embellished with pearls and precious stones of divers kinds, as diamonds, rubies,

Fig. 1.

Fig. 2.

emeralds, and sapphires, having a mound of gold upon the top of it, which is surmounted by a cross of gold; both these are embellished with precious stones: the mound is also encircled with a band or fillet of gold; and the cross is enriched with three very large oval pearls. This crown is composed of four crosses, pattees, and as many fleurs-de-lis of gold placed on a rim or circlet of gold, all embellished with precious stones. From those crosses arise four circular bars or arches, which meet at the top in the form of a cross, at the intersection whereof is a pedestal, on which the mound is placed. The cap within this crown is of purple velvet lined with white taffeta, and turned up with ermine.—*Crown of State*, so called because it is always worn by the King when he goes in state to Parliament, is distinguished by a very large ruby set in the middle of the four crosses, and by the mound being of one entire stone of a seawater-green colour, known by the name of *aqua marine*. This is made for every succeeding king; and, of course, subject to variation. The one given in *fig. 2*. is the crown which was worn by his late Majesty, George III. A representation of the crowns worn by some of his predecessors may be seen on their coins. [vide *Plates 31, 32*]—*Queen's Crown*, or that worn by the Queen Consort at her coronation, was made for Catherine, Queen of Charles II, in commemoration of Egitha, the Queen Consort of King Edward. This is also a very rich imperial crown similar to King Edward's, but much lighter and smaller. The queens have also a cap called a *circlet of gold*, with which they proceed to the coronation; and also a particular crown, which they wear on other occasions. Among the foreign crowns, the following are the principal.—*Charlemagne's Crown*, vide *Charlemagne's Crown*.—*Papal Crown*, otherwise called the *Triple Crown*, *tiara papalis*, which is a high cap of silk environed with three crowns of gold, one above another. [vide *Papal Crown*]—*Imperial Crown*, vide *Imperial*.—*Iron Crown*, the crown with which the kings of Lombardy were anciently crowned, which was afterwards used by the Emperors of the West for the same purpose. The emperor Henry VII is said to have introduced the use of four crowns at his coronation in 1310; namely, the *iron crown*, by which it was intended to signify that the monarch would defend his dominions with the sword against all his enemies; a *crown of different metals* to imply that he would select men as his counsellors who were endowed with diverse talents; a *silver crown* to denote that he would be liberal and munificent; and a *gold crown* to denote his superiority over all other men. Buonaparte chose the iron crown for his coronation as King of Italy; and, upon that occasion, instituted the Order of the Iron Crown, which has not survived his fall.—*Turkish Crown*, vide *Turkish Crown*.

CROWN (*Ecc.*) a little circle of hair shaven from the crown of the head, which is the mark and character of the Romish ecclesiastics.

CROWN (*Anat.*) the vertex, top, or highest part of the head.

CROWN (*Mech.*) the upper work of the rose diamond among jewellers, which centers in a point at the top.

CROWN (*Geom.*) a ring comprehended between two concentric peripheries.

CROWN (*Astron.*) vide *Corona*.

CROWN (*Numis.*) a coin in value five shillings, which was first struck in the reign of Henry VIII. and so called from the figure of the crown upon it. [vide *Plate 31*]

CROWN (*Com.*) is a name given to the French *ecu*, and other foreign coins, nearly equal in value to five shillings.

CROWN (*Archit.*) the uppermost member of a cornice, comprehending the *corona* and its superior members.—*Crown of an arch*, the most elevated line or point that can be taken on its surface.

CROWN of an anchor (*Mar.*) in French *le collet d'une ancre*; the lowest end of the shank of an anchor where the arms are united.—*Crown of a cable*, the bights which are formed by the several turns.

CROWN-GLASS (*Mech.*) the finest sort of window-glass.

CROWN-IMPERIAL (*Bot.*) a well-known beautiful flower, the *Fritillaria imperialis* of Linnæus, a perennial.

CROWN-OFFICE (*Law*) an office belonging to the Court of King's Bench, of which the King's coroner or attorney there is commonly Master. The Attorney General, or the Clerk of the Crown, exhibits informations in this office for crimes and misdemeanors, the one *ex officio*, and the other by the order of the court.

CROWN-POST (*Carpent.*) the principal upright in truss-roofing, better known by the name of the King-Post.

CROWN-SCAB (*Vet.*) a mealy white scurf growing on the legs of horses.

CROWN-WHEEL (*Mech.*) the upper part of a watch next the balance that drives it by its motion.

CROWN-WORKS (*Fort.*) bulwarks advanced toward the field to gain some hill or rising ground; being composed of a large gorge and two wings, which fall on the counter-scarp near the faces of the bastion.

CROWNED hornwork (*Fort.*) a hornwork with a crownwork before it.

CROWNED-TOP (*Sport.*) the first head of a deer, the crotchets and buds being raised in the form of a crown.

CROWNING (*Archit.*) the part that terminates any piece of architecture, generally in the form of a Crow's Bill, &c.

CROWNING (*Mar.*) in French *culde pore*; the finishing part of a knot made on the end of a rope. It is performed by interweaving the ends of the different strands artfully among each other, so that they may not become loosened or untwisted.

CROWS-BILL (*Surg.*) a kind of forceps for drawing bullets, &c. out of wounds.

CROWS-FEET (*Mil.*) another name for the *Caltraps*.

CROWS-STONES (*Min.*) a sort of petrefaction, the *Anomia gryphus* in the Linnean system.

CROY (*Archæol.*) Marsh-land. *Ingulph.*

CROY (*Law*) in *Scotch Law* a satisfaction that a judge, who does not administer justice as he ought, is to pay to the nearest of kin to the man that is killed.

to **CROYN** (*Sport.*) to cry as fallow deer do at rutting-time.

CROYSES (*Archæol.*) a term used by Britton for pilgrims, because they wear the sign of the cross on their garments.

CRUCHES à feu (*Mil.*) French for earthen pots with two handles filled with grenades, having the intervals between them filled with powder.

CRUCIAL (*Anat.*) an epithet for some parts of the body which cross each other, as the crucial ligaments of the thigh.

CRUCIAL Incision (*Surg.*) an incision made in some fleshy part of the body in the form of a cross.

CRUCIALIS (*Bot.*) Mugweed, or Crosswort.

CRUCIAN (*Ich.*) a fish of a dusky green colour of the carp kind, the *Cyprinus carassius* of Linnæus.

CRUCIANELLA (*Bot.*) a genus of plants, Class 4 *Tetrandria*, Order 1 *Monogynia*, so called from *crux*, a cross, because the leaves are placed crosswise.

Generic Character. CAL. *perianth* two-leaved; *leaflets* lanceolate.—COR. one-petalled, funnel-formed; *tube* cylindrical; *border* four-cleft.—STAM. *filaments* four; *anthers* simple.—PIST. *germ* compressed; *style* two-cleft; *stigmas* two, obtuse.—PER. *capsule* two, connate; *seeds* solitary.

Species. Plants of this genus are herbaceous annuals, as —*Crucianella angustifolia*, seu *Rubra*, Narrow-leaved Crucianella.—*Crucianella latifolia*, Broad-leaved Crucianella, &c.

CRUCIATUS (*Bot.*) vide *Cruciform*.

CRUCIATUS (*Anat.*) a muscle of the thigh.

CRUCIBLE (*Chem.*) a melting pot, made of earth, tempered so as to endure the strongest fire, for the melting metals and minerals. This was formerly represented by the annexed characters. ☒ ☒

CRUCIFIX (*Ecc.*) a figure representing our Saviour on the cross.

CRUCIFORM (*Bot.*) or cross-shaped, *cruciformis*, or *cruciatum*; an epithet for a corolla, *corolla cruciformis*, a corolla consisting of four petals, that spread out in the form of a cross, as in the *Brassica oleracea*. These flowers constitute the fifth class in Tournefort's system, and are a principal character in the class *Tetradynamia*. A stigma is also said to be cruciform which is divided into four parts, standing opposite to each other.

CRUCITA (*Bot.*) another name for the *Cruzita*.

CRUDARIA (*Min.*) a vein of silver at the top of the mine. *Plin.* l. 33, c. 6.

CRUDITY (*Med.*) a term applied not only to unripe fruits, but to undigested substances in the stomach, and uncocted humours in the body.

CRUISE (*Mar.*) in French *compagnie de croisière*; a voyage, or expedition, in quest of an enemy's vessels; so called, because it consists chiefly in sailing to and fro, or crosswise.

CRUISER (*Mar.*) a vessel appointed for cruising.

CRUMA (*Ant.*) *κρήμα*, the tumbrel, or tabor, and the music made by such instruments. *Mart.* l. 6, ep. 71.

CRUMENTATA (*Zool.*) an epithet for animals furnished with a pouch, or bag, wherein to receive their young in time of danger, as the Opossum.

CRUNION (*Med.*) *κρήνιον*; a compound medicine described by Ætius, so called from its diuretic power.

CRUOR (*Med.*) blood in general; or venous blood, and coagulated blood in particular.

CRUPELLARII (*Ant.*) Nobility among the Gauls, who were armed with a complete harness of steel. *Tacit.* l. 3, c. 43.

CRUPINA (*Bot.*) a species of the *Centaurea*.

CRUPPER (*Man.*) vide *Crouper*.—*Crupper-Buckles*, large square buckles fixed to the saddle-tree behind for fastening the crupper.

CRURA (*Anat.*) the plural of *crus*, the leg, is applied to some parts of the body which resemble the leg in form, as —*Crura Cerebri*, two medullary columns proceeding from the basis of the brain.—*Crura Clitoridis*, the two spongy substances which form the *Clitoris*.—*Crura Medullæ oblongatæ*, the two largest roots, or legs, of the *Medulla oblongata*.

CRURÆUS musculus (*Anat.*) or *Cruralis*; a muscle of the leg which serves to assist the *vasti* and *rectus musculus* to extend the leg.

CRURAL (*Anat. &c.*) belonging to the leg, as the *Crural Artery*, the artery of the thigh which spreads itself among the muscles.

CRURALIS (*Anat.*) vide *Cruræus*.

CRUREUS (*Anat.*) vide *Cruræus*.

CRUS (*Anat.*) otherwise called *magna Pes*, is all that part of the body which reaches from the Buttocks to the Toes, including the Thigh, Leg, and Foot.

CRUS corvi (*Bot.*) the *Panicum crus corvi* of Linnæus. — *Crus galli*, the *Cratægus crus galli*.

CRUSADE (*Mil.*) in French *croisade*, from *crux*, the cross, is a well-known term for the expeditions undertaken by the princes of Christendom for the conquest of the Holy Land, in which every soldier bore a crucifix on his breast, as an emblem of spiritual warfare. The crusades were likewise denominated Holy Wars.

CRUSADE (*Com.*) vide *Cruzado*.

CRUSMA (*Ant.*) vide *Cruma*.

- CRUST (*Nat.*) vide *Crusta*.
 CRUSTA (*Ant.*) wood or stone finely inlaid into vessels, so as to form various devices.
 CRUSTA (*Med.*) the scurf and scab of a sore.—*Crusta lactea*, a disease to which young children at the breast are particularly subject, consisting of a scurf, or crusty scab, that breaks out on the face and other parts.
 CRUSTA *vermicularis* (*Anat.*) the covering or skin of the intestines.—*Crusta villosa*, the inner coat of the stomach.
 CRUSTA (*Nat.*) the shells of lobsters, &c.; also the cocar, crust, or cream, which forms on any liquor, as coagulated blood, urine, &c. or on fermentable liquors at a particular stage of the fermentation, as the crust of wine.
 CRUSTA *ollæ* (*Bot.*) the *Edenlandia repens* of Linnæus.
 CRUSTULA (*Med.*) *Ecchymosis*, a discolouration of the flesh from a bruise, where the skin is entire, and covers it over like a shell.
Crustula among oculists is also a disease in the eye, occasioned by the falling of blood from the wounded arteries into the *tunica conjunctiva*.
 CRUSTUM (*Archæol.*) a garment of purple mixed with many other colours. *Mon. Angl.* tom. i, p. 210.
 CRUSTUMIA *pyra* (*Ant.*) Pears, much admired by the Romans. *Columnel. de Re Rust.* l. 5, c. 10.
 CRUSTUMINATUM (*Med.*) *κρεσσυμίνατον*, a sort of rob, made of the juice of apples and pears, boiled up with rain-water and honey. *Act. Tetrab.* 2, serm. 1, c. 138.
 CRUSULY (*Her.*) an epithet for a field or charge strewed with crosses.
 CRUTCH (*Mar.*) in French *corne de gui*, a support for the main boom of a brig, cutter, sloop, &c.
 CRUTCHES (*Mar.*) pieces of knee timber placed within side the ship, for the security of the heels of the cant-timbers abaft.
 CRUX (*Ant.*) the cross or gibbet on which the Romans hanged their malefactors. It was an ignominious punishment inflicted on slaves, or the lowest sort of people.
Juv.

Pone crucem servo.

And for its cruelty was denominated *summum*, or *supremum supplicium*; whence *cruciatu*s, or suffering the death of the cross, also signified torment. And the cross or tree which was used for this purpose was denominated *arbor infelix*, *infame lignum*, *cruciatu*s *servilis*, &c.; whence *Sil. Ital.* l. 1, v. 165.

Quem postquam diro suspensu roborem videt.

- Scourging commonly preceded crucifixion, after which the offender was either nailed or tied with ropes to the tree, sometimes in an erect posture, and frequently with the head downwards. The figure of the cross also varied much. *Cic. pro Rab.* c. 4; *Dionys. Halic.* l. 5; *Senec. ad Marc.* c. 20; *Val. Max.* l. 2, c. 12; *Tacit. Hist.* l. 4, c. 7; *Suet. in Galb.* c. 9; *Justin.* l. 18, c. 7; *Sigon. de Judic.* l. 3, c. 16, *apud Græv. Thes. Antiq. Roman.* vol. 4, &c.
 CRUX-ANDRÆE (*Bot.*) the *Axyrum crux andrææ* of Linnæus.
 CRUX-CERVI (*Anat.*) the bone of a stag's heart.
 CRUZADO (*Com.*) a Portuguese gold coin, value about 2l. 9s. sterling. The cruzado of 400 rees was somewhat less in value. The new cruzado has on the obverse the name of the reigning sovereign, over it a crown, and under it two palms, with 400 at the bottom; on the reverse a cross, with the legend IN. HOC. SIGNO. VINCES.
 CRUZITA (*Bot.*) a genus of plants, Class *Tetrandria*, Order *Digynia*.
Generic Character. CAL. *perianth* three-leaved.—COR. *petals* four, ovate.—STAM. *filaments* four, capillary; *anthers* small.—PIST. *germ* ovate, obtuse; *style* two,

- parted; *stigmas* simple.—PER. none; *corolla* converging; *seed* single.
Species. The single species is the—*Cruzita hispanica*, native of South America.
 CRY de Pais (*Law*) the *hue and cry* which the country, in the absence of a constable, is obliged to set up after any offender, when a robbery or any felony has been committed. 2 *Hales P. C.*
 CRYMODES (*Med.*) *κρυμωδης*, an epithet for a fever wherein the external parts are cold. *Act. Tetrab.* 2, serm. 1, c. 138.
 CRYOLITE (*Min.*) a sort of aluminous salt.
 CRYPSIS (*Bot.*) a genus of plants, Class 2 *Diandria*, Order 2 *Monogynia*, of the Natural Order of Grapes; so called from *κρύπτω*, to hide, because the spike of the flowers is concealed within the sheath of the leaf.
Generic Character. CAL. *glume* one-flowered, two-valved; *valves* oblong.—COR. *glume* two-valved.—STAM. *filaments* two, capillary; *anthers* oblong.—PIST. *germ* superior; *styles* two; *stigmas* hairy.—PER. none; *corolla* including the single seed.
Species. The single species, an annual, is the—*Crypsis aculeata*, *Schæanus*, *Phleum*, *Anthoxanthum*, *Antitragus*, seu *Phalaris*, Prickly Crypsis, native of Siberia.
 CRYPSORCHIS (*Med.*) from *κρύπτω*, to conceal, and *ἄρχη*, a testicle; the state of the testicles when they lie hid in the belly.
 CRYPT (*Ecc.*) vide *Cryptæ*.
 CRYPTA (*Archit.*) *κρύπτω*, from *κρύπτω*, to hide; Crypt, a hollow place or vault under ground.
Juven. sat. 5, v. 106.
Et solitus mediæ cryptam penetrare Suburra.
Vitruv. l. 6, c. 8; *Sueton. in Cal.* c. 58; *Bald. Lex. Vitruv.* These crypts were afterwards used for religious purposes. [vide *Cryptæ*]
 CRYPTÆ (*Ecc.*) *Crypts*, subterraneous places, where the martyrs were buried, and the primitive Christians used to perform their devotions; whence the custom originated of building underground chapels, which were also called Crypts, as that of St. Faith's, under St. Paul's, London. *S. Hieron.* l. 12; in *Ezek.* XL.; *Gregor. Turon. Hist.* l. 1, c. 39.
 CRYPTÆ (*Anat.*) from *κρύπτω*, to hide; the little rounded appearance at the end of the small arteries.
 CRYPTOCEPHALUS (*Ent.*) a genus of animals, Class *Insecta*, Order *Coleoptera*.
Generic Character. *Antennæ* filiform.—*Feelers* four.—*Thorax* margined.—*Body* cylindrical.
Species. The species are distinguished into those which have the feelers equal, those which have the feelers unequal, and those which have the hind ones hatchet-shaped.
 CRYPTOGAMIA (*Bot.*) the name of the twenty-fourth Class in Linnæus' artificial system, comprehending the vegetables whose fructification is concealed, or at least too minute to be observed by the naked eye: whence the origin of the term, which is derived from the Greek *κρύπτω*, hidden, and *γάμος*, nuptials. It is divided into four Orders; namely, 1. *Filices*, Ferns. 2. *Musci*, Mosses. 3. *Algæ*, Flags. 4. *Fungi*.
 CRYPTOGRAPHY (*Mech.*) the art of writing in cyphers, or with sympathetic ink, or in general in any concealed manner, from *κρυπτός*, hidden, and *γράφω*, to write.
 CRYPTO-PORTICUS (*Archit.*) a gallery closed on all sides for coolness in summer; a sort of cloister. *Plin. Epist.* l. 5, ep. 6; *Sidon.* l. 2, ep. 2; *Bald. Lex. Vitruv.*
 CRYPTOPYICA *Ischuria* (*Med.*) a suppression of urine, from a retraction of the penis within the body.
 CRYPTOSTOMUM (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

CUB

Generic Character. CAL. *perianth* one-leaved, funnel-formed.—COR. one-petalled; *tube* very short; *border* five-cleft; *nectary* broad, arched, and fastened to the base of the corolla.—STAM. *filaments* none; *anthers* five.—PIST. *germ* roundish; *style* cylindric; *stigma* capitate.—PER. *berry* globular, three-celled; *seeds* solitary.

Species. The only species is the—*Cryptostomum Gujanense*, seu *Montabea*, a shrub of Guiana.

CRYSTAL (Min.) κρύσταλλος, a kind of glass or precious stone, frozen, as it was thought, into that bright substance. The crystal, otherwise called rock crystal, is a species of stone belonging to the quartz or siliceous genus. When the crystals are semi-transparent, or intermixed with opaque veins, they are called *milk crystals*; when in the form of pebbles, they are called *crystals*.

CRYSTAL (Chem.) that part of a salt which assumes a regular and solid form on the gradual cooling of its solution.

CRYSTALLI (Med.) eruptions about the size of a lupin, which sometimes break out over the whole body. They are also called *Crystallinæ*.

CRYSTALLINÆ Manus (Med.) κρυστάλλιναι χεῖρες, hard hands, so cold that they seem almost to be frozen. *Hippocrat. Epidem.* l. 7.

CRYSTALLINÆ (Med.) vide *Crystalli*.

CRYSTALLINE Heavens (Astron.) two spheres, conceived by the ancient astronomers, between the *primum Mobile* and the *firmament*, by the first of which they explained the slow motion of the fixed stars, which advance a degree in 70°; by the other, they accounted for the motion of *libration* or *trepidation*.

CRYSTALLINE Humour (Anat.) or the *Crystalline Lens*; so called from its transparency like crystal, the pellucid humour of the eye, which serves to transmit and refract the rays of light.

CRYSTALLINUM (Chem.) a name for white arsenic from its transparency.

CRYSTALLION (Bot.) vide *Psyllium*.

CRYSTALLIZATION (Chem.) the reducing of any salt into a regular solid form, by dissolving it in a menstruum, and allowing it to cool, until it shoots into the bodies called crystals. By far the greater number of salts assume the crystalline form; and it has been observed, both by chemists and mineralogists, that every substance has a particular form which it, for the most part, affects when it crystallizes. Thus, common salt is observed to assume the shape of a cube; alum that of an octohedron; saltpetre that of a six-sided prism; sulphate of magnesia that of a four-sided prism; and carbonate of lime is often found in the state of a rhomboid; but this is necessarily subject to great diversity.

CRYSTALLOGRAPHY (Lit.) the description of crystals.

CRYSTALLOIDES tunica (Anat.) the crystalline coat of the eye.

CRYSTALLUM Minerale (Chem.) the *Sal Prunellæ* purified by solution and crystallization.

CRYSTALLURGY (Chem.) vide *Crystallization*.

CRYTHE (Med.) a hard scirrhus immovable stian in the interior part of the eyelid, containing a pellucid body.

CTEDONES (Anat.) from κτεδών, a rake or comb; the name given to the fibres.

CTEIS (Anat.) from κτείς, a rake; a name for the incisores, from their likeness to a rake.

CTESIPHONTIS Malagma (Med.) a plaster, described by Celsus, l. 5, c. 18.

CUB (Nat.) the young of particular beasts; as a fox or a bear.

CUBA (Ant.) a horse-litter or bed.

CUBÆA (Bot.) a genus of plants, Class 10 *Decandria*, Order 1 *Monogynia*.

Generic Character. CAL. *perianth* one-leaved.—COR. *petals* five, oblong.—STAM. *filaments* ten; *anthers* oblong.—

CUB

PIST. *germ* oblong, pedicelled; *style* capillary; *stigma* acute.—PER. *legume* long, coriaceous; *seeds* several.

Species. The species are trees and natives of Guiana, as the—*Cubæa paniculata* and *Cubæa trigona*.

CUBARIS (Ent.) vide *Aselli*.

CUBATURE (Math.) the finding exactly the cubical solid content of any proposed body, in inches, feet, yards, &c.

CUBBRIDGE heads (Mar.) the bulk heads of the fore-castle and the half deck.

CUBE (Math.) a regular solid body, supposed to be generated by the motion of a square plane along a line equal and perpendicular to one of its sides. It is inclosed by six equal sides or faces, which are square, as in the annexed figure. A die is a small cube.—*Duplication of the cube.* [vide *Duplication*]

CUBE (Arith.) or *Cubic Number*, the third power of a number, which is formed by multiplying the number or quantity into itself, and then again into the product; as $3 \times 3 = 9 \times 3 = 27$, the cubic $a \times a = a^2 \times a = a^3$.—*Cube root* is the side of a cube number; thus 3 is the root of 27.

CUBEB (Bot.) *cubebæ*, a small round fruit, less than pepper, the fruit of the *Piper cubebæ*, or *Piper caudatum*. This fruit is aromatic, and good for strengthening the stomach.

CUBICULARIUS (Archæol.) a chamberlain or groom of the chamber.

CUBIC EQUATION (Algeb.) that in which the unknown quantity rises to the third dimension, as $x^3 = a^3 - b^3$; or $x^3 + r x x = p^6$; or $x^3 + f x x - a b x = m m n + p q r$, &c.—*Cubic Foot* is so much of any thing as is contained in a cube whose side is one foot.—*Cubic Hyperbola* is a figure expressed by the equation $x y^2 = a$, having two asymptotes, and consisting of two hyperbolas lying in the adjoining angles of the asymptotes.—*Cubic Number*, vide *Cube*.—*Cubic Parabola*, a curve, as B C D in the annexed figure, having two infinite legs, as C D, C B, tending contrary ways; and if the absciss A P, or x , touch the curve in C, the relation between A P (x) and P M (y) is expressed by the equation $y = a x^3, b x^2, c x, d$; or when A falls in C, by the equation $y = a x^3$, which is the most simple equation of the curve.

CUBIDIA (Min.) a genus of spars.

CUBILE SALUTATORUM (Ant.) a little chapel or closet in a house, wherein the images of the household gods were placed. *Plin.* l. 15, c. 2; *Turneb. Adv.* l. 13, c. 28; *Casaub. in Suet.* p. 78.

CUBILE (Archit.) a ground work, or course of stones in building. *Vitruv.* l. 2, c. 8.

CUBING a Solid (Men.) vide *Cubature*.

CUBIT (Ant.) a measure frequently mentioned in Scripture, equal to one foot nine inches and 888 decimal parts, according to Arbuthnot.

CUBIT (Anat.) *cubitus*, from *cubo*, to lie or rest, because the ancients used to rest upon it at their meals; the Fore-arm, or that part between the elbow and the wrist.

CUBIT Arm (Her.) the hand and arm couped at the elbow, as in the annexed figure.

CUBITANS (Anat.) an epithet for two muscles of the wrist, one of which, called the *externus*, serves to extend the wrist; and the other, the *internus*, to bend it.

CUBITAL (Ant.) a foresleeve for the arm to the elbow downwards.

CUBO-CUBE (Geom.) the sixth power of any number, i. e. the cube cubed; thus, 64 is a cube cubed, being raised from the multiplication of the root 2 five times into itself.

CUBOIDES (*Anat.*) a name for the seventh bone of the tarsus of the foot.

CUCI (*Bot.*) the fruit of a species of the palm. *Bauh. Hist. Plant.*

CUCKING-STOOL (*Archæol.*) i. e. a choaking-stool; because those who were put into it were almost choaked with the water; a punishment formerly inflicted on scolds and brawling women, who were placed in such a stool and immersed in water, sometimes in a muddy pond.

CUCKOLD-TREE (*Bot.*) the *Mimosa cornigera* of Linnæus. CUCKOW (*Orn.*) a well-known bird, the *Cuculus* of Linnæus, which is heard about the middle of April, and ceases to sing at the end of July. It deposits its eggs in the nests of other birds, generally that of the hedge-sparrow, and leaves the care of the young to foster-parents. The eggs are reddish-white, thickly-spotted with black brown spots.

CUCKOW-FLOWER (*Bot.*) a perennial and well-known flower of the field, the *Cardamine pratensis*.—Cuckow-Pint, or Pintle, the *Arum macula*, a tuberous root.

CUCKOW SPITTLE (*Ent.*) the froth observable on plants, in which the larva of the *cicada spinaria* is found enveloped.

CUCUBALUM (*Bot.*) or, *Cucubalus*, a herb whose leaves are good against the stinging of serpents. *Plin.* l. 27, c. 8.

CUCUBALUS, in the Linnæan system, a genus of plants, Class 10 Decandria, Order 3 Tryginia; Natural order of *Caryophyllei*.

Generic Characters. CAL. *perianth* one-leaved, tubular.—COR. *petals* five; *claws* the length of the calyx; *border* flat.—STAM. *filaments* ten, subulate; *anthers* oblong.—PIST. *germ.* oblong; *styles* three, longer than the stamens; *stigmas* pubescent.—PER. *capsule* acuminate; *seeds* very many.

Species. The species are mostly perennials, as—*Cucubalus bacciferus*, *Silene*, *Lychnis*, *Lychnanthus*, *Viscago*, *Cucubalum*, seu *Absine*, Berry-bearing Campion, White Bottle, White Corn-Campion.—*Cucubalus behen*, *Viscago*, *Lychnis*, *Papaver*, seu *Behen*, Bladder Campion, or Spatling Poppy.—*Cucubalus Tartaricus*, Hyssop-leaved Campion.—*Cucubalus otites*, *Viscago*, *Lychnis otites*, &c. *samoïdes*, *Muscipula*, Spanish Campion, or Catch-Fly: but the following are biennials, namely—*Cucubalus fabarius*.—*Cucubalus viscosus*, and—*Cucubalus Italicus*. *Dod. Pempt.*; *Bauh. Hist. Plant.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*; *Raii Hist. Plant.*; *Tournef. Inst.*; *Boerh. Ind.*

CUCUJUS (*Ent.*) a genus of animals, Class *Insecta*, Order *Coleoptera*.

Generic Character. *Antennæ* filiform.—*Feelers* four, equal.—*Lip* bifid.—*Body* depressed.

Species. The principal species are the *Cucuju depressus*, *sulcatus*, *rufipes*, &c.

CUCULA'TUM MAJUS (*Chem.*) Spirits of wine.

CUCULLA (*Anat.*) or *Cucullaris*, hoodshaped; the muscle otherwise called *Trapezius*.

CUCULLA'NUS (*Con.*) a genus of animals, Class *Vermes*, Order *Intestina*.

Generic Character. *Body* sharp.—*Mouth* orbicular.

Species. The species are mostly viviparous and intestinal, infesting the mammalia, birds, reptiles, and fish.

CUCULLA'RIA (*Bot.*) the *Valantia filiformis*.

CUCULLA'TUS (*Bot.*) cowled, or hoodlike; an epithet for a leaf, or the corona; *folium cucullatum*, a leaf which is wide at top, and drawn to a point below, in the form of a conc, as in *Geranium cucullatum*; *corona cucullata*, a crown which covers the pistil like a hood, as in *Asclepias*.

CUCULLUS (*Ant.*) a cowl or hood, which was anciently used as a covering for the head, to keep off the rain and cold. *Mart.* l. 10, ep. 76.

Pullo Mævius alget in cucullo.

It was likewise called *Cucullio*. *Colum. de Re Rust.* l. 1, c. 8; *Capitol. Ver.* c. 4; *Lamprid. Heliog.* c. 33; *Ferrar. de Re Vest.* l. 2, c. 1.

CUCULLUS was also a cornet of paper that apothecaries and grocers used to put their spices in. *Mart.* l. 3, ep. 2.

CUCULLUS (*Ecc.*) the cowl or hood; was adopted by the monks as a monastic habit. *Niceph. Hist.* l. 9, c. 14; *Cassian de Hab. Monach.* c. 4.

CUCULUS (*Orn.*) Cuckow, a genus of animals, Class *Aves*, Order *Picæ*.

Generic Character. *Bill* smooth, a little curved.—*Nostrils* surrounded by a small rim.—*Tongue*, arrowed, short.—*Feet* formed for climbing.

Species. The principal species are the—*Cuculus canorus*, Common Cuckoo.—*Cuculus glandarius*, Great Spotted Cuckoo.—*Cuculus cristatus*, the Crested Black Cuckoo.—*Cuculus ridibundus*, Laughing Cuckoo.

CUCUMBER (*Bot.*) a well-known garden vegetable, the common sort of which is the *Cucumis sativus* of Linnæus.

CUCUMIS (*Bot.*) *σίκος*, *cucumber*, i. e. *curvimer*, Cucumber; a plant, so called from its round form. The fruit of this plant was reckoned cooling to the stomach, quenches thirst, and provokes urine; but it is indigestible, and produces phlegmatic humours. *Hippocrat. de Diet.* l. 2; *Theophrast. Hist. Plant.* l. 7, c. 4; *Varr. de Lat. Ling.* l. 4; *Dioscor.* l. 4, c. 154; *Plin.* l. 19, c. 5; *Columel.* l. 2, c. 3; *Gal. de Simpl.* l. 1; *Pallad. in Mart. Tit.* 9; *Geopon. Auct.* l. 12, c. 19.

CUCUMIS, in the Linnæan system, a genus of plants, Class 21 Monoecia, Order 10 Syngenesia; Natural Order of *Cucurbitaceæ*.

Generic Character. CAL. one-leaved, bellshaped.—COR. five-parted; *divisions* ovate.—STAMEN in the males only; *filaments* three, converging; *anthers* lines creeping upwards and downwards; *filaments*, in the females without anthers.—PISTIL, in the females only, *germ* inferior, large; *style* cylindric; *stigmas* three, thick.—PERICARP, in the females only; *pome* three-celled; *seeds* numerous.

Species. This genus comprehends all annuals with herbaceous scandent stems, distinguished in English by the names of the Gourd, Cucumber, and Melon. The following are the principal, namely—*Cucumis colocynthis*, seu *colocynthis*, the Coloquintida, Bitter Gourd, or Cucumber.—*Cucumis sativus*, seu *Cucumber*, Common Cucumber.—*Cucumis melo*, seu *Melo*, Common or Musk Melon.—*Cucumis anguria*, seu *Anguria*, Round Prickly-fruited Cucumber, &c. *Dod. Pempt.*; *Bauh. Hist. Plant.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*; *Raii Hist. Plant.*

CUCUMIS is also a name for the *Anguria trifoliata*.

CUCUPHA (*Med.*) a cover for the head, made of cephalic spices sown in a cap, and worn against catarrhs, &c.

CUCURBIT (*Chem.*) a chemical vessel of glass, for distillations and rectifications, which is made in the shape of a gourd, as in the annexed figures. 

CUCURBITA (*Bot.*) a genus of plants, Class 21 Monoecia, Order 10 Syngenesia; Natural order of the *Cucurbitaceæ*.

Generic Characters. CAL. *perianth* one-leaved, bellshaped. COR. five-parted; *divisions* veiny, rugose.—STAMEN, in the males, *filaments* three, converging; *anthers* creeping upwards: STAMEN, in the females, *margin* surrounding.—PISTIL, in the females, *germ* large; *style* conic; *stigma* three-cleft.—PERICARP, in the females, *pome* three-celled; *seeds* very many.

Species. The plants of this genus resemble those of the *Cucumis* very much, being distinguished from them chiefly by the swelling rim of the seed. The principal species are as follow:—*Cucurbita lagenaria*, Bottle Gourd, or Long Gourd.—*Cucurbita pepo*, seu *Pepo vul-*

garis, Pompion, or Pumpkin Gourd.—*Cucurbita melopepo*, seu *Melopepo*, Squash Gourd.—*Cucurbita citrullus*, *Anguria*, seu *Citrullus*, Water Melon. *Bauh. Hist. Plant.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*; *Raii Hist. Plant.*; *Tournef. Inst.*; &c.

CUCURBITA is also the name for the *Tricosanthes anguina*.
CUCURBITACEÆ (*Bot.*) the forty-fifth order in Linnæus' Fragments of a Natural Method, and the thirty-fourth of his Natural orders.

CUCURBITIFERA (*Bot.*) a species of the *Cratæva*.

CUCURBITINI LUBRICI (*Ent.*) broad worms resembling the seeds of a gourd in shape, that breed in the human intestines, &c.

CUCURBITULA (*Med.*) or Cucurbita, *σικύδα*, a cupping-glass, or hollow vessel, made of tin, horn, &c. which was frequently applied to the body in the bath, either with or without scarification. The cucurbita used without scarification was called *Cucurbita cæca*, or dry Cupping. *Hippocrat. Aphor.* &c.; *Aret. de Curat. Acut. Morb.* l. 1, c. 10; *Cels.* l. 4, c. 2; *Cæl. Aurelian. de Acut. Morb.* l. 1, c. 11; *Plin.* l. 28, c. 1; *Gal. Isagog.* c. 15.

CUD (*Vet.*) the first stomach of ruminating beasts; and also the food which it contains.

CUD-WEED (*Bot.*) the *Athanasia maritima*, a perennial.

CUDDY (*Mar.*) a sort of cabin or cook-room in the fore-part, or near the stern, of a lighter, or barge of burden.

CUDE Cloth (*Archæol.*) a face cloth formerly used in the baptizing of young children.

CUDUPARTI (*Bot.*) a tree of Malabar, the leaves of which, if bruised and boiled in milk, and applied to the head, relieve vertigoes.

CUE (*Lit.*) an intimation given to performers what or when they are to speak.

CUI *ante Divortium* (*Law*) i. e. to whom before divorce; a writ empowering a divorced woman to recover her lands from him to whom her husband did alienate them during the marriage, because she could not gainsay it. *F. N. B.* 240; *Reg. Orig.* 233; *New Nat. Brev.* 454.—*Cui in vita*, i. e. to whom in the life of (namely, her husband), a writ of entry for a widow upon her lands alienated by her husband in his life-time, which must contain in it, that during his life she could not withstand the alienation. *F. N. B.* 187, 193; *Reg. Orig.* 232.

CUJATRUS (*Bot.*) the *Psidium pyrififerum* of Linnæus.

CUJETA (*Bot.*) the *Crescentia cujete* of Linnæus.

CUINAGE (*Mech.*) the making up of tin into pigs, &c. for carriage.

CUPPOUNA (*Bot.*) a tree growing in Brazil, from whose bark is expressed a juice good for cleansing ulcers. *Raii Hist. Plant.*

CUIRASS (*Mil.*) a piece of defensive armour, made of iron plate, to cover the body from the neck to the girdle.

CUIRASSIERS (*Mil.*) a sort of heavy cavalry armed with cuirasses.

CUISINE (*Mil.*) in French signifies literally a kitchen, but is applied to the holes which soldiers dig in rear of the camp for the purpose of cooking their victuals.

CUISSES (*Mil.*) armour for the thighs.

CUTE (*Min.*) French for the preparation of the saltpetre which is used in making gunpowder.

CUL-DE-FOUR (*Archit.*) or *Cu-de-Four*, a sort of low vault, like an oven.—*Cul-de-Four* of a niche is the arched vault on a plan that is circular.—*Cul-de-Lamp*, a name for several decorations in vaults and ceilings.

CUL-DE-CHAUDRON (*Mil.*) the hollow or excavation left after the explosion of a mine.

CULAGENIN (*Mar.*) *culage*, the laying up a ship in the dock to be repaired.

CULATUM (*Chem.*) calcined.

CULBICIO (*Med.*) a sort of strangury, or heat of urine.

CULDEE'S (*Ecc.*) a sect of monks in Scotland so called, *a colendo Deum*, i. e. from worshipping God, because they were much addicted to praying and devotional exercises.

CULEUS (*Ant.*) or *Culleus*, a leathern sack for wine or oil.

Fest.

CULEUS is also a bag in which such as murdered their parents were sewed up and thrown into the sea.

Juv. sat. 8, v. 214.

Cujus supplicio non debuit una parari Simia, nec serpens unus, nec culeus unus.

Anian. Vet. Interpres de Parricid.; *Zonar. Annal.* l. 2; *Isid. Orig.* l. 5, c. 28.

CULEUS was also a measure containing twenty barrels, or forty urns, equal to 180 gallons. *Scæv. Cult. de Pignorat.*; *Columel.* l. 3, c. 3; *Cenul. de Ponder. ac Mensur. apud Græv. Thes. Antiq.* tom. 11, p. 1471.

CULEX (*Ent.*) the Gnat, a genus of animals, Class *Insecta*, Order *Diptera*.

Generic Character. Mouth with a single valved exerted flexile sheath; feelers of three articulations; antennæ approximate.

Species. The principal species are, the—*Culex pipicus*, the Common Gnat, called in the West Indies the Musquito Fly.—*Culex trifurcatus*, *pulicaris*, *reptans*, *morio*, *equinus*, &c.

CULILABAN (*Bot.*) the *Laurus culilaban* of Linnæus.

CULINA (*Ant.*) 1. A kitchen. *Varr. de Re Rust.* l. 1, c. 13.

2. That part of the funeral pile in which the banquet was consumed. *Fest. de Verb. Sig.* 3. *Culina*, in the plural, a public burying ground for the poor. *Frontin. de Contr. Agror.*

CULINARY Fire (*Nat.*) a portion of pure elementary or solar fire, attracted by the oily or sulphureous parts of the fuel with such velocity as to break and attenuate them until they are dispersed into air.

CULLENDER (*Mech.*) a sieve or large strainer used by cooks, &c.

CULLERS (*Husband.*) a name for the worst sort of sheep, or those which are left of a flock when the best are picked out.

CULLEUS (*Ant.*) vide *Culeus*.

CULLION (*Bot.*) a round root of any herb.

CULLION Head (*Fort.*) a sconce or blockhouse; the same as a bastion.

CULLIS (*Cook.*) a strained liquor made of meat boiled.

CULM (*Bot.*) *culmus*, the stalk or stem of corn or grasses, which is usually jointed and hollow. In speaking of the dry stalk of corn it is commonly called *straw*.

CULM (*Min.*) a sort of coal in Wales, very brittle, and burning with little or no flame; the *Bitumen oxygenatus* in the Linnæan system.

CULMEN (*Archit.*) the Latin word answering to the ridge piece of a roof. *Vitruv.* l. 5, c. 1.

CULMEN *cæli* (*Astron.*) the highest part in the heavens to which a star can rise in any given latitude; whence a star is said to *culminate* when it comes to that point.

CULMIFERÆ (*Bot.*) the same as *Calamariæ*.

to CULMINATE (*Astron.*) is said of a star when it comes to the meridian, or the highest point in the heaven.

CULMINIÆ (*Bot.*) the twenty-sixth order in Linnæus' Fragments of a Natural Method.

CULMUS (*Bot.*) the culm or stalk of grasses, &c.

CULPRIT (*Law*) a word of form used by the clerk of arraignments in trials to a person indicted for a criminal matter when he has registered the prisoner's plea, *Not Guilty*. It is in all probability composed of the words *culpa*, fault, or crime, and *prit*, French for *prehensus*, taken, i. e. taken in the fact, or as some will have it, *prit*, for *prêt*, ready, i. e. ready to prove the fact.

CULREACH (*Law*) a caution in the Scotch law given by a lord of regality to punish a malefactor whom he has replevied from the sheriff.

CULTELLATION (*Mensur.*) a measuring of heights by parts, and not all at one operation.

CULTER (*Ant.*) from *colo*, to till, *cultus*, tilled, a kind of short plough, from which our word *coulter* is derived. *Plin.* l. 18, c. 18.

CULTER was also the knife used in the sacrificing of victims. *Ovid. Metam.* l. 15, v. 134.

— *Percussaque sanguine cultros
Inficit.*

Senec. Thyest. act 4, scen. 1, v. 688.

Tangerese salsa victimam culter mala.

CULTER venatorius, a wood-knife, or small sword, shorter than the *venabulum*, or boar-spear. *Plaut. Aul.* act 3, scen. 2, v. 2; *Tac. Annal.* l. 3, c. 43; *Suet. in Aug.* c. 19; *Turneb. Adv.* l. 9, c. 23; *Barth. Adv.* l. 10, c. 20.

CULTER (*Anat.*) the third lobe of the liver, so called from its resemblance to a knife.

CULVERIN (*Mil.*) a piece of ordnance which, of the least size, is five inches diameter at the bore, carrying a ball of fourteen pounds weight; of the ordinary size, is five inches and 1 quarter diameter at the bore, carrying a ball of 17 pounds weight; of the extraordinary size, five inches and a half diameter at the bore, carrying a ball of 20 pounds weight.

CULVERTAGE (*Law*) the escheat or forfeiture of the vassal's lands to the lord of the fee.

CULVERTAIL (*Carpent.*) or dovetail, the particular manner of fastening boards, by letting one piece into another.

CULVERTAIL (*Mar.*) the fastening the ship's carlings into the beam.

CUMANA (*Bot.*) an Indian tree resembling the mulberry, both in its appearance and fruit; the latter of which, when boiled and made into a cataplasm, cures the colic.

CUMANDA-GUA'CA (*Bot.*) a large sort of Indian Kidney-beans.

CUMBULU (*Bot.*) a tall tree growing in Malabar, the root of which, in a decoction with a little rice, is said to be of service in a symptomatic fever attending the gout.

CUMERUM (*Ant.*) a kind of large basket used at weddings for carrying the bride's goods and household stuff covered.

CUMIN (*Bot.*) the *Cuminum cyminum* of Linnæus, an annual.

CUMINI (*Bot.*) the *Myrtus cumini* of Linnæus.

CUMINOIDES (*Bot.*) the same as the *Dagoe*.

CUMINUM (*Bot.*) *κμίνον*, cumin, a plant, the seeds of which are hot, and if drank in wine were thought to produce paleness; whence Horace calls it *ersanguè*, bloodless, and Juvenal *pallens*, pale.

Hor. l. 1, ép. 19, v. 17.

— *Quod si
Pallarem casu, biberent ersanguè cuminivum.*

Jur. Sat. 5, v. 55.

— *Pallentis grana cumini.*

Dioscor. l. 3, c. 68; *Plin.* l. 20, c. 14.

CUMINUM, in the Linnean system, a genus of plants, Class 5 Pentandria, Order 2 Dignia, Natural Order of Umbellata, or Umbellifera.

Generic Character. CAL. umbel universal, and partial four-parted; perianth proper, scarcely visible.—COR. universal uniform; proper five-petalled.—STAM. filaments five; anthers simple.—PIST. germ ovate; styles two; stigmas simple.—PER. none; fruit ovate; seeds two, ovate.

Species. The only species is the—*Cuminum cyminum*, seu *sativum*, Cumin, an annual, native of Egypt.

CUMINUM is also the name for the *Cuminum hypocoum* of Linnæus.

CUMMIN-SEED (*Bot.*) the seed of the *Cuminum* of Linnæus, is a long slender seed, not so thick as anise-seed, but much longer, of a rough texture, not easily powdered, unctuous when bruised, of a strong smell, and an acrid pungent taste.

CUMMIN-SEED (*Chem.*) in a chemical analysis is found to yield a quantity of essential oil, an austere phlegm, containing an acid, and a urinous salt.

CUNACANTHE (*Bot.*) a shrub bearing grapes like a vine.

CUNA-CERVISIE (*Archæol.*) a tub of ale, as mentioned in Domesday-Book.

CUNANE (*Bot.*) the large fruit of an Indian tree, which is dried, roasted, and eaten as a remedy against the headache. *Raii Hist. Plant.*

CUNEA'LIS sutura (*Anat.*) the suture by which the *os sphenoides* is joined to the *os frontis*.

CUNEI (*Archit.*) the coins of walls in buildings. *Vitruv.* l. 7, c. 4.

CUNEIFORM (*Bot.*) or wedgeshaped, an epithet for a leaf.

CUNEIFORMIA ossa (*Anat.*) the three bones of the *tarsus*.

CUNE'OLUS (*Surg.*) a crooked tent to put into a fistula.

CUNETTE (*Fort.*) a deep trench, about three or four fathoms wide, sunk along the middle of a dry moat, to make the passage more difficult.

CUNEUS (*Ant.*) signifies literally a wedge, but is applied to the seats and benches on which the spectators sat in a theatre, which were narrow near the stage, and broad behind.

Jur. sat. 6, v. 61.

— *Cuneis an habent spectacula totis
Quod securus ames?*

Wherefore Ausonias speaks of *theatrum cuneatum*.

Auson. de Urb. c. 4, v. 5.

Circus et inclusi moles cuneata theatri.

Vitruv. l. 5, c. 6; *Sueton. in Aug.* c. 44; *Apul. Flor.* p. 799; *Bald. Lex. Vitruv.*; *Salmas. Exercitat. Plin.* p. 645.

CUNEUS (*Mil.*) a company of foot drawn up wedgewise, or like a triangle, in this form [Δ] the better to break the ranks of the enemy. *Liv.* l. 8, c. 10, l. 22, c. 47, l. 32, c. 17; *A. Gell.* l. 10, c. 9; *Veget.* l. 3, c. 19; *Agath. Hist.* l. 2: *Suidas*.

CUNEUS (*Archæol.*) a mint or place to coin money; whence *cuneum Monetum*, the king's stamp for coining money.

CUNICULUS (*Ant.*) a coney-burrow, or a mine under the earth. *Cæs. de Bell. Gall.* l. 7, c. 22; *Joseph. de Bell. Ind.* l. 3, c. 12; *Veget.* l. 4, c. 24.

CUNILA (*Bot.*) *κνίλα*, the name for the *Origanum*, according to Dioscorides. *Dioscor.* l. 3, c. 32.

CUNILA, in the Linnean system, a genus of plants, Class 2 Diandria, Order 1 Monogynia.

Generic Character. CAL. perianth one-leaved.—COR. one-petalled.—STAM. filaments two, filiform; anthers twin.—PIST. germ four-parted; style filiform; stigma two-cleft.—PER. none; seeds four.

Species. The principal species are—*Cunila mariana*, seu *satureia*, Mint-leaved Cunila, a perennial, native of the North of Europe.—*Cunila pulegioides*, seu *Melissa*, Penny-Royal-leaved Cunila, an annual, native of the South of France, &c.

CUNILAGO (*Bot.*) Fleabane, a kind of savory.

CUNNING a ship (*Mar.*) directing the person at the helm how to steer her.

CUNNINGHAMIA (*Bot.*) a genus of plants, Class 4 Tetandria, Order 1 Monogynia.

Generic Character. CAL. perianth one-leaved.—COR. one-

petalled; *tube* short.—**STAM.** *filaments* four; *anthers* roundish.—**PIST.** *germ* roundish; *style* filiform, bifid; *stigmas* obtuse.—**PER.** *berry* ovate; *seed* single.

Species. The single species is, the—*Cunninghamia camentosa*, a shrub.

CUNONIA (*Bot.*) a genus of plants, Class 10 *Decandria*, Order 2 *Digynia*, called after J. C. Cuno, a Dutch botanist and poet.

Generic Character. **CAL.** *perianth* five-leaved.—**COR.** *petals* five, obovate.—**STAM.** *filaments* ten, subulate; *anthers* roundish, twin.—**PIST.** *germ* conic, *styles* two; *stigmas* obtuse.—**PER.** *capsule* oblong; *seeds* very many.

Species. The only species is, the—*Cunonia Capensis*, a shrub, and a Cape plant.

CUNONIA is also a trivial name for a species of *Antholyza*.

CUNTEY-CUNTEY (*Law*) a kind of trial mentioned by Bracton, which seems to signify a trial by the ordinary jury. *Bract.* l. 4, tract. 3, c. 18.

CUNTOR (*Orn.*) an American Eagle. [vide *Condur*]

CUP (*Mech.*) a vessel of various forms, and for various domestic purposes, but particularly for drinking out of.

CUPA (*Ant.*) a large round vessel which was used for holding wine. Vessels of the same name, when empty, were also used for bearing up the hulls of ships when they were careened.

Luc. l. 4, v. 420.

Nanque ratem vacuz sustentant unidique cupæ.

Varr. apud Nonn. l. 2, c. 113; *Herodian.* l. 4, c. 8; *Capitol. Maximin.* c. 22; *Veget.* l. 3, c. 7; *Casaub. Salmas. in Capitol.*; *Scheff. de Mil. Nav. Addend.* p. 320.

CUPA'MINI (*Bot.*) the *Azalea Indica* of Linneus.

CUPANIA (*Bot.*) a genus of plants, Class 8 *Octandria*, Order 1 *Monogynia*.

Generic Character. **CAL.** *perianth* five-leaved.—**COR.** *petals* five-cowled.—**STAM.** *filaments* eight; *anthers* incumbent.—**PIST.** *germ* ovate; *style* short; *stigma* obtuse.—**PER.** *capsule* coriaceous; *seed* solitary.

Species. The species are trees, as the—*Cupania tomentosa*, seu *Trigonis*.—*Cupania glabra saponarides*, &c.

CUPELLA (*Chem.*) a chemical vessel made of earth, ashes, or burnt bones, and in which assay-masters try metals. It suffers all baser ores, when fused and mixed with lead, to pass off, and retains only gold and silver. [vide *Chemistry*]

CUPELLA'TIO (*Chem.*) the process of purifying the perfect metals by the addition of lead, which, at a due heat, becomes vitrified, and in that state carries off all other vitrified metals of the baser sort, leaving those of the perfect kind in a state of purity.

CUPERO'SA (*Min.*) Copperas.

CUPHE'A (*Bot.*) the *Lythrum cuphea* of Linnæus.

CUPHOS (*Med.*) $\kappa\upsilon\phi\omicron\varsigma$, an epithet signifying properly light; but when applied to aliments it imports easily digestible; and to humours mild and gentle.

CUPI (*Bot.*) a species of the *Condeletia* of Linnæus.

CUPOLA (*Archit.*) a roof, or vault, rising in a circular or elliptic form, otherwise called the *Tholus*, or *Dome*.

CUPPING-GLASS (*Surg.*) a sort of glass vessel applied to the fleshy part of the body, for the drawing away corrupt blood and humours.

CUPRESSO-PINULUS (*Bot.*) a species of the *Brunea* of Linnæus.

CUPRESSUS (*Bot.*) $\kappa\upsilon\pi\acute{\alpha}\rho\omicron\varsigma$, Cypress; a tree that grew to a remarkable height, particularly in Crete, the wood of which being very durable was used for the building of ships, as we learn from the prophet Ezekiel, xxiii. 5. Among the Greeks and Romans it was planted at the doors of the great when they died, and served as an emblem of death.

Lucan. l. 3, v. 442.

Es non plèbeios luctus testata cupressus.

Wherefore it is called by Virgil *atra* and *feralis*, by Horace *invisa*, &c. by Statius *mæsta*, &c.

Virg. Æn. l. 3.

*Aggentur tumulo tellus, stant manibus atræ
Ceruleis mæstæ vittis, atrèque cupressu.*

Virg. Æn. l. 6.

*Ingenium struxere pyram cui frondibus atris
Intixerunt latera, et ferales ante cupressos
Constituunt.*

Hor. Carm. l. 2, od. 14, v. 22.

— *Neque harum, quas colis, arborum
Te, præter incivis cupressos,
Ulla brevem dominum sequetur.*

Stat. Sylv. l. 4.

— *tempus nunc ponere frondes
Phæbe tuas, massique comam damnare cupresso.*

According to Ovid the cypress derives its name from Cyparissus, the son of Amicleus, who was changed into this tree. *Plat. de Leg.* l. 3; *Thucyd.* l. 2, c. 34; *Theophrast. Hist. Plant.*; *Cato de Re Rust.*

CUPRESSUS, in the Linnean system, a genus of plants, Class 21 *Monoecia*, Order 9 *Monadelphia*, Natural Order *coniferæ*.

Generic Character. Male flowers disposed in an ament, female flowers heaped into a roundish cone on the same plant.—**CAL.** *ament* common in the male; *strobile* common; in the females roundish.—**COR.** none.—**STAM.** in the males; *filaments* none; *anthers* four, borne on the calycine scale.—**PIST.** in the female; *germ* scarcely evident.—**PER.** none; *seeds* in the females several, oblong.

Species. The principal species are the—*Cupressus sempervirens*, seu *Cupressus*, the Evergreen Cypress.—*Cupressus disticha*, Deciduous Cypress-Tree.—*Cupressus thyoides*, White Cedar, or Arbor Vitæ.—*Cupressus pendula*, Portugal Cypress.—*Bauh. Pin.*; *Raii Hist. Plant.*

Cupressus is also the name of the *Thuja articulata*.

CURA avenacea (*Med.*) a decoction of oats and succory roots.

CURASSON (*Orn.*) a bird of South America, the *Craz* of Linnæus, three feet long, which inhabits the mountains and woods, feeding on fruits and roosting on trees.

CURATE (*Ecc.*) *Curator*; he who represents the incumbent of a parson, or vicar, and takes care of divine service in his stead.

CURATE'LA (*Law*) the office of an administrator to an infant, or lunatic.

CURATE'LLA (*Bot.*) a genus of plants, Class 13 *Polyandria*, Order 2 *Digynia*.

Generic Character. **CAL.** *perianth* five-leaved.—**COR.** *petals* three or four, roundish.—**STAM.** *filaments* very many; *anthers* roundish.—**PIST.** *germ* two-parted; *styles* two; *stigmas* headed.—**PER.** *capsule* two-celled; *seeds* in pairs.

Species. The single species is the *Curatella Americana*.

CURATOR (*Ant.*) signified generally an overseer, surveyor, or commissioner, to which some other word was affixed to designate his office as—*Curator Aquarum*, surveyor of the water-works; *Curator Anonæ*, overseer of the public granary, or clerk of the market; *Curator Calendarii*, he who controlled the public accounts of each city, and put out the public monies to interest; *Curator Ludorum*, master of the public games; *Curatores Viarum*, commissioners of the high ways, &c. to which frequent allusions are made in the inscriptions as well as writings of the Romans. *Cic. ad Attic.* l. 1; *Varr. de Lat. Lin.* l. 7, c. 13; *Tacit. Annal.* l. 11, c. 35; *Plin.* l. 5, ep. 15; *Plut. in Cas.*; *Lamprid. Alex. Sever.* c. 33; *Cassiod. Var.* l. 7, c. 13; *Panciroli. Nolit. Dign. Imper.*; *Occident. de Magistr. Mu-*

- nicip. et Descript. Urb. Rom. apud Græv. Thes. Antiq. Roman. tom. 3.*
- CURB** (*Man.*) a chain of iron made fast to the upper part of the branches of the bridle; whence the phrase, "To give a leap upon the curb," i. e. to shorten the curb by laying one of the mails, or S like joints of the chain, over the rest.
- CURB** (*Vet.*) a tumour situated on the back part of the hinder leg of a horse immediately below the hock.
- CURB** (*Archit.*) signifies generally whatever serves as a check or restraint, and is applied to different parts of a building, as a—*Curb for Brick steps*, a timber-nosing to prevent them from wearing.—*Curb Plate*, a wall-plate in a circularly ribbed dome, &c.—*Curb Rafters*, the upper rafters on both sides in a curb roof.—*Curb Roof*, a particular kind of roof consisting of four sides.—*Curb-stones*, the stones which separate the carriage-way from the foot-path.
- CURCAS** (*Bot.*) the Barbadoes nut; a drastic purge. It is the *Iatropha curcas*, in the Linnean system.
- CURCULIGO** (*Bot.*) a genus of plants, Class 23 *Polygamia*, Order 1 *Monoecia*; so called because its seed has a process resembling the *rostrum*, or beak of the *Curculio*.
- Generic Character.* Hermaphrodite flowers few, male flowers many.—*CAL.* none.—*COR.* petals six, oblong.—*STAM.* filaments six; *anthers* linear.—*PIST.* in the hermaphrodite flowers; *germ* sessile; *style* very short; *stigma* large, tapering.—*PER.* capsule three-celled; *seeds* one to four.
- Species.* The only species is the *Curculigo orchioides*, a tuberous root.
- CURCULIO** (*Ent.*) a genus of animals, Class *Insecta*, Order *Coleoptera*.
- Generic Character.* *Antennæ* clavate; *feelers* 4, filiform.
- Species.* The larvæ of this tribe have six scaly legs, and a scaly head. They infest granaries, and live upon the grain. The species are distinguished into those which have the jaw cylindrical toothed, called by Fabricius the *Curculio*; and into those having the lip bifid and the jaw bifid, called the *Anthrribus*.
- CURCUMA** (*Bot.*) Turmeric, an Indian plant, which was formerly called *cyperus*.
- CURCUMA**, in the Linnean system, a genus of plants, Class 1 *Monandria*, Order 1 *Monogynia*.
- Generic Character.* *CAL.* perianth superior.—*COR.* one-petalled; *nectary* one-leaved.—*STAM.* filaments five; *anthers* adnate.—*PIST.* *germ* roundish; *style* length of the stamens; *stigma* simple.—*PER.* capsule roundish, three-celled; *seeds* very many.
- Species.* The species are mostly perennials, as—*Curcuma rotunda*, Round-rooted Turmeric.—*Curcuma longa*, seu *Amomum Curcuma*, Long-rooted Turmeric; but the—*Curcuma pallida* is an annual.
- CURD** (*Nat.*) the coagulum of milk.
- CURE** (*Falcon.*) a medicine given to hawks in form of little balls, or pellets of hemp, cotton, or feathers, to imbibe or drink up their phlegm.
- CURFEW** (*Law*) contracted from the French *couvre-feu*, i. e. cover or put out the fire; a law made by William the Conqueror that all persons should put out their fires and lights, and go to bed at eight o'clock on the ringing of a bell.—*Curfew* signified also the bell, and the ringing of this bell, which announced the hour for putting out fire and candle.
- CURIA** (*Ant.*) the place where they conducted *curas publicas*, the public concerns, the council-house, or state-house. According to Varro, the *Curia* were of two kinds; those which were set apart for the priests to settle the religious concerns of the state, and those which were devoted to civil matters, as the senate-house, and the hall, or moot-house of every tribe, or ward. The *Curia* was
- was also the assembly or ward itself. *Varr. de Lat. Ling.* l. 4; *Aul. Gell.* l. 14, c. 7; *Sigon. de Ant. Jur. Roman.* l. 1, c. 3; *Manut. in Cic. Ep. ad Famil.* l. 4.
- CURIA** (*Law*) signifies generally a court, but it was taken particularly for the assemblies of bishops, peers, and great men of the realm, whom the kings of England used to call together at the chief festivals, which were named *solenis curia*, *Augustalis curia*, *curia publica*, &c. It is also used sometimes for the feudatory, or other customary tenants, who did their suit and service at the court of their lord.—*Curia advisare vult*, the deliberation which a court of judicature sometimes takes where there is any point of difficulty before they give judgment in a cause.—*Curia Cursus Aquæ*, a court held by the lord of the manor of Gravesend for the better management of barges and boats using the river Thames.—*Curia claudenda*, a writ to compel another to make a fence or wall which he ought to make between his land and the plaintiff's. *Reg. Orig.* 155; *New. Nat. Brev.* 282, &c.—*Curia Domini*, the lord's hall or court, where all the tenants attend at the time of keeping courts.—*Curia penticiarum*, a court held, by the sheriff of Chester, in a place there called *Pendice* or *Pentice*.
- CURIALES** (*Ant.*) 1. Those who were of the same curia, ward, or tribe. *Dionys. Hal.* tom. ii. p. 124; *Cic. de Offic.* l. 2, c. 18. 2. The chiefs in every city answering to the head-boroughs, or tithing-men of modern times. *Isidor. Orig.* l. 9, c. 4; *Turneb. Adv.* l. 30, c. 31; *Salmas. in Topisc. Aurel.* c. 33.
- CURIATA** (*Ant.*) vide *Comitia*.
- CURIMENTOS** (*Med.*) a Portuguese name for pains in the limbs, which are relieved by a warm bath.
- CURLED** (*Bot.*) *crispus*, an epithet for a leaf or nectary; *folium crispum* is a leaf, the periphery of which is larger than the disk admits, wherefore it becomes waved, as in *Curled Parsley*; *nectarium crispum*, a nectary having the cups waved or curled, as in *Narcissus pseudo-narcissus et minor*.
- CURLEW** (*Orn.*) a waterfowl with blue legs and black wings, the *Scolopax aquatica* of Linnæus, which inhabits moist and fenny places, feeds on worms and marsh insects, and lays four eggs of an olive-brown colour. The same name is also given to several species of the *Scolopax*.
- CURLING** (*Carpent.*) an epithet for timber, the grain of which turns or curls about so as to make it less manageable by the tool.—*Curling-stuff* is near akin to what is termed *cross-grained*.
- CURLINGS** (*Sport.*) the little spotted curls with which the burr of a deer's head is powdered.
- CURMI** (*Med.*) *κέρμι*, a drink made of barley answering to our common ale. *Dioscor.* l. 2, c. 110.
- CURNOCK** (*Archæol.*) a measure containing four bushels, or half a quarter. *Flet.* l. 2, c. 12.
- CURRANT** (*Com.*) vide *Current*.
- CURRENT** (*Bot.*) the well-known fruit of a shrub, classed under the *Ribes* in the Linnean system.
- CURRANTO** (*Mus.*) or *currant*, a running French dance; also a musical air consisting of triple time.
- CURRENCY** (*Com.*) the paper, stamped in the English colonies, which passed current for money: the term has since been employed for paper-money in general issued by authority.
- CURRENT** (*Nat.*) the slope of any ground which serves to discharge the water.
- CURRENT-MONEY** (*Com.*) that which passes at a fixed value.
- CURRENTS** (*Mar.*) impetuous streams of water, which, in certain latitudes, run and set on particular points of the compass.
- CURRICULUS** (*Archæol.*) the year, or the course of a year.
- CURRIER** (*Mil.*) a kind of piece, formerly used in sieges,

of the same calibre and strength as a harquabuss, but having a longer barrel.

CURRIERS, *Company of (Her.)* were incorporated in 1438, in the 12th of King Henry I, and bear, for their armorial ensigns, "Sable, a cross engrailed, or, between four pair of shears in saltire, argent." The crest two arms, the hands holding a share. The supporters a buck, or, and a goat, argent. The motto *Spes nostra Deus*.

to CURRY a horse (*Man.*) to rub him down with the curry-comb.

CURRY-COMB (*Husband.*) an iron tool for the dressing of horses.

CURSITOR (*Law*) an officer belonging to the Chancery, who makes out original writs for any particular county or shire.

CURSO'NES terræ (*Archæol.*) ridges of land.

CURSOR (*Mech.*) a little brass ruler representing the horizon.

CURSORES (*Ant.*) 1. *Ἐπιδρόμοι*, runners at a race. *Poll. Onom.* l. 3, segm. 146. 2. The vancouriers of an army. *Ammian. Marcell.*

CURSUMA (*Bot.*) vide *Chelidonium*.

CURSUTA (*Bot.*) vide *Gentiana*.

CURTAIL (*Man.*) the name given to a horse's tail after it has been docked.

CURTAIL double (*Mus.*) an instrument, formerly so called, that played the bass.

CURTAIN (*Fort.*) the front of a wall, or fortified place between two bastions.

CURTANA (*Archæol.*) or *curteyn*, a name for King Edward the Confessor's sword without a point, an emblem of mercy, which is carried before the Kings and Queens of England at their coronation.

CURTATE distance (*Astron.*) the distance of a planet's place from the sun reduced to the ecliptic. [vide *Astronomy*]

CURTATION of a planet (*Astron.*) the difference between the distance of a planet from the sun and curtate distance.

CURTESY (*Law*) vide *Courtesy*.

CURTEYN (*Archæol.*) vide *Curtana*.

CURTI cone (*Geom.*) a cone whose top is cut off by the plane parallel to its basis.

CURTILAGE (*Archæol.*) a piece of ground lying near a dwelling house. *Stat. 4 Ed. 1, c. 1; 35 Hen. 8, c. 4; 39 Eliz. c. 10.*

CURTILES terræ (*Law*) court-lands, or lands properly belonging to the court or house of a lord of the manor. *Spelm. of Feuds. c. 5.*

CURTISIA (*Bot.*) a genus of plants, Class 4 *Tetranaria*, Order 1 *Monogynia*, called after Curtis, the botanist, and author of the *Flora Londinensis*.

Generic Character. CAL. *perianth* one-leaved four-parted.

—COR. four-petalled.—STAM. *filaments* four; *anthers* ovate.—PIST. *germ* superior; *style* subulate; *stigma* four or five-cleft.—PER. *drupe* subglobular; *seed* nut roundish.

Species. The single species is *Curtisia faginia*, seu *Sideroxyylon*, Beech-leaved Curtisia, or Hassaquay-Tree, native of the Cape of Good Hope.

CURVATURE of a line (*Geom.*) is that bending or flexure by which it becomes of any particular form, &c. as the curvature of a circle, the property of which is that every point in the circumference is equidistant from a point in the interior called the *centre*.—*Circle of Curvature*, or *circle of the same curvature*, is a circle which touches a curve in a point so that no other circle, touching it in the same point, can pass between it and the curve. This is otherwise called the *osculating circle*, because it is the most intimately connected with the curve.—*Radius of*

curvature is the radius of the circle of curvature.—*Double Curvature* is a term applied to the curvature of a line which twists so that all the parts of it do not lie in the same plane as the rhumb-line, or the loxodromic curve.

CURVE (*Geom.*) a line whose parts incline different ways, in distinction from a straight line, which lie in the same direction. The principal parts of every curve are the Diameter, the Vertex, the Axis, the Ordinates, or Applicates, Absciss, and the Centre; thus, in the annexed figure, the line A D, which bisects all the parallel lines, M N, is called a *Diameter*; the point A, where the diameter meets the curve, is the *Vertex*; when the line A D bisects all the parallels at right angles it is called the *Axis*; the parallel lines M N, M' N', M'' N', &c. are the *Ordinates*, P M or P N the *Semiordinate*; or, as is more usual, the latter is the ordinate, and the former the double ordinate: any portion of the diameter, as A P between the vertex and another fixed point, is called the *absciss*, and that point in which all the diameters meet is called the *Centre*. This definition of a diameter, however, respects the Conic Sections only. [vide *Conic Sections, Ordinates, Diameter*]

Curves are distinguished into Algebraical or Geometrical, and Transcendental or Mechanical.—*Algebraical or geometrical curves* are those in which the relation of the absciss A P to the ordinates P M can be expressed by a common algebraic equation;

thus, suppose the curve to be a circle, and the radius A C = r, the absciss A P = x, the ordinate P M = y; then, according to the nature of the circle, the rectangle A P × P B being always = P M²; therefore the equation is x . (2 r - x) = y², or 2 r x - x² = y², which is the equation that defines this algebraical curve. Curves have been distinguished into different orders, according to the number of the equation expressing the relation between its ordinates and abscisses. Curves of the First Order comprehend the circle and conic sections. Those of the second order, according to the enumeration of Sir Isaac Newton, are reducible to the four following cases of equations, expressing the relation between the ordinate and absciss; namely,

In the 1st case,	$x y^2 + c y = a x^2 + b x + c x + d$
2d	$x y = a x^2 + b x + c x + d$
3d	$y^2 = a x^2 + b x + c x + d$
4th	$y = a x^2 + b x + c x + d$

Under these cases are included curves of different forms, which he distinguishes, as follows, into—*Inscribed hyperbola*, which lies wholly within the angle of the asymptotes.—*Circumscribed hyperbola*, which cuts the asymptotes, and contains the parts cut off within its own periphery.—*Ambigonal hyperbola*, having one of its infinite legs inscribed, and the other circumscribed.—*Converging hyperbola*, one whose legs tend towards each other.—*Diverging hyperbola*, when the legs tend different ways.—*Cross-legged hyperbola*, which has its legs convex different ways.—*Conchoidal hyperbola*, when the asymptote has a concave vertex and diverging legs.—*Angular hyperbola*, that which cuts asymptote with contrary flexures.—*Cruciform hyperbola*, which cuts its conjugate across.—*Nodated hyperbola*, which, returning around, cuts itself.—*Cuspidated hyperbola*, one whose parts concur in the angle of contact, and there terminate.—*Pointed hyperbola*, one whose conjugate is oval

and infinitely small.—*Redundant hyperbola*, is that whose number of legs exceeds that of the conic hyperbola.—*Deficient hyperbola* has but one asymptote, and only two hyperbolic legs, &c. *Newton. Enumerat. Lintesh. Ord. &c.*

Parabolas are in like manner denominated *converging*, *diverging*, *cruciform*, &c.

Transcendental or *mechanical curves* are such as cannot be so easily defined or expressed by an algebraical equation.—*Rectification, Inflection, Quadrature of Curves.* [vide *Rectification, &c.*]—*Curves of double curvature*, a curve, all the parts of which are not in the same plane.—*Family of curves*, an assemblage of several curves, of different kinds, all defined by the same equation, of an indeterminate degree, but differently, according to the diversity of their kind: thus, suppose an equation of an indeterminate degree, $a^{m-1}x = 7^m$, if $m = 2$, then will $ax = y^2$; if $m = 3$, then will $a^2x = y^3$; if $m = 4$, then will $a^3x = y^4$, &c.; all which curves are said to be of the same family or tribe.—*Catacaustic* and *diacaustic curves.* [vide *Catacaustic, &c.*]—*Exponential curve*, that which is defined by an exponential equation, as $a^x = y$.—*Logarithmic curve.* [vide *Logarithmic*]—*Curve reflectoire*, is so called because it is the appearance of the plane bottom of a basin covered with water, to an eye perpendicularly over it.—*Radical curves*, a name given by some authors to curves of the spiral kind.—*Regular curves* are such as have their curvature turning regularly and continually the same way, in distinction from the *irregular curves*, or those which have points of contrary flexure.

CURVED (*Bot.*) *incurvus*, bowed or bent inwards; an epithet applied to legumes and prickles; curved or bowed outwards, *recurvus*, an epithet for leaves and prickles.

CURVET (*Man.*) an air in which the horses legs are more raised than in the demivolts, being a kind of leap up and a little forwards.

CURURU-APE (*Bot.*) a scandent tree growing in Brazil, bearing pods, which contain seeds like beans. The green leaves bruised and applied to recent wounds are said to cure them by the first intention.

CURUTA-PALA (*Bot.*) a shrub growing in Malabar, the bark of whose root, when bruised and drank with warm water, cures the diarrhoea.

CURULIS (*Ant.*) *Curule*, from *currus*, a chariot; an epithet for what appertained to a chariot, was applied to magistrates, their dignity, &c.—*Curules magistratus*, were consuls, censors, prætors, and ædiles, who were so called, as some suppose, because they were carried in a chariot. On this account the ædiles were, in an especial manner, called *Curule*.—*Curulis sella*, the curule chair, a chair of estate, which was made of ivory, and placed in a chariot, wherein the head officers of Rome were carried to the council.

Lucan. l. 5.

Lentulus è celsa sublimis sede profatur.

Hor. l. 1, ep. 6, v. 53.

*Cuilibet hic fasces dabit, eripietque curule
Cui volet, importunus, ebur.*

Juv. sat. 5, v. 91.

— illi sellas donare curules
Illum exercitibus præponere, &c.

Ovid. Pont. l. 4, el. 5, v. 18.

Signa quoque in sella nossem formata curuli.

It was also taken for the tribunal or seat of justice.

Mart. l. 11, ep. 99, v. 17.

*Sedeas in alto tu licet tribunali
Et è curuli jura gentibus reddas.*

Silius Italicus deduces its origin from the town of Vetulonia, now Viterbo.

Ital. l. 8, v. 147, speaking of this town,

Hæc altis eboris decoravit honore curules.

CURURLET (*Orn.*) a sort of plover, the *charadrius* of Linnæus.

CUSCUTA (*Bot.*) a genus of plants, Class 4 *Tetrandria*, Order 2 *Digynia*.

Generic Character. CAL. *perianth* one-leaved, cup-formed.

—COR. one-petalled, ovate; *nectary* of four scales.—

STAM. *filaments* four, subulate; *anthers* roundish.—

PIST. *germ* roundish; *styles* two, erect; *stigmas* simple.

—PER. *fleshy*; *seeds* in pairs.

Species. Plants of this genus are parasitical and annual; as

—*Cuscuta Europæa*, seu *Cuscuta*, *Cassitha*, seu *Cassutha*,

Common Dodder.—*Cuscuta epithymum*, seu *Epithymum*,

Small Dodder, &c.

CUSCUTA is also the name of the *Basella rubra*.

CUSP (*Geom.*) the point or corner formed by two parts of a curve meeting, and there terminating.

CUSP (*Astron.*) a term denoting the points or horns of the moon.

CUSP (*Astrol.*) the first point of the twelve houses in a figure or scheme of the heavens.

CUSP (*Archit.*) a term introduced by Sir James Hall in his essay on Gothic architecture to express any one of the pendants of a pointed arch. Two cusps form a trefoil, three a quatrefoil, &c.

CUSPIDIA (*Bot.*) a species of *Gorteria*.

CUSPIDATE (*Bot.*) *cuspidatus*, an epithet for a leaf; *folium cuspidatum*, a cuspidate leaf, having the end sharp like the point of a spear, or terminating in a bristly point.

CUSPIDATED hyperbola (*Math.*) an hyperbola whose two parts concur, and terminate in the angle of contact.

CUSPIS (*Anat.*) which properly signifies the point of a spear, is applied as an epithet to the glans penis.

CUSSONIA (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 2 *Digynia*; so called after the botanist Cusson.

Generic Character. CAL. *perianth* one-leaved, truncate.

COR. *petals* five, acute.—STAM. *filaments* five; *anthers*

ovate.—PIST. *germ* inferior; *styles* filiform; *stigmas*

obtuse.—PER. *twin* compressed; *seeds* solitary.

Species. Plants of this genus are shrubby, and natives of the Cape of Good Hope.

CUSTARD apple (*Bot.*) the *Annona* of Linnæus.

CUSTODE *admittendo* (*Law*) a writ for admitting a guardian; and *Custode amovendo*, a writ for removing a guardian. *Reg. Orig.*

CUSTODES Libertatis, &c. (*Law*) the title assumed by Oliver Cromwell and his party, during the grand rebellion, in the making out writs and processes. It was declared traitorous by the statute of 12 Car. 2, c. 3.

CUSTODIA *Militaris* (*Ant.*) the name for that sort of custody practised by the Romans, where the keeper and his prisoner were bound together by the same chain, that they might not be asunder. *Sen. de Tranquill. l. 1, c. 10; Athen. l. 5, c. 11; Suet. Domit. c. 14.*

CUSTOM (*Law*) an unwritten law, or that which has been established by a long use, and the consent of our ancestors, *ultra tritavum*, i. e. beyond the third generation, commonly accounted about 100 years; which is deemed as a right in law.

CUSTOM (*Com.*) a duty paid by the subject to the king upon the importation or exportation of commodities; so called because tonnage and poundage were only granted by Parliament for certain years, till the time of Henry VI.; but then constantly and for a perpetuity; thence called *customs*, or customary payments.—*Custom-house* is a ware-

house or building in sea-port towns, where the King's customs are received.

CUSTOMARY tenants (*Law*) such as hold, by the custom of the manor, the same as copyholders. [vide *Copyholders*]

CUSTOMER (*Com.*) one who buys any thing of another.

CUSTOMS and services (*Law*) belong to the tenure of lands, and are such as tenants owe unto their lords, which, being withheld, he may have a writ of customs and services.

CUSTOS (*Ant.*) 1. One who was set to watch the plaintiff, that he might not tamper with the defendant. *Ascon. in Cic.* 2. One who was employed, during the elections, to see that no fraud was committed with the urns that held the votes. *Cic. Sen. post Red.* c. 11; *Varr. de Rust.* l. 3, c. 5. 3. One who was set to watch at feasts that the jewels were not taken out of the cups. *Juv. sat.* 5, c. 37. —*Custos armorum*, an officer who had the tackle and all the appurtenances of the ships in his charge. *Schæff. de Mil. Nav. Adden.* p. 333.

Custos Brevium (*Law*) the principal clerk belonging to the Common Pleas.—*Custos Rotulorum*, Keeper of the Rolls, he that has the keeping of the records of the Sessions of the Peace; he is always Justice of the Peace, and of the *Quorum*, in the county where appointed. *Lamb. Eiren.* l. 4, c. 3.—*Custos Placitorum Coronæ*, an officer similar to what is now called a *Custos Rotulorum*. *Bract.* l. 2, c. 5. —*Custos of the spiritualities*, he that exercises jurisdiction during the vacancy of a see.

Custos Oculi (*Surg.*) an instrument for preserving the eye from being hurt in some operations.

CUSTREL (*Archæol.*) a servant to a man of arms, or a prince's life-guard.

CUT (*Mil.*) an action in the broad-sword exercise, or in fencing, which consists in using the edge of an instrument, in distinction from the thrust, which consists in using the point. There are six cuts established for the use of the cavalry, to be made with the broad-sword or sabre: from this action arise several military phrases, as "To cut up," to destroy promiscuously: "To cut through, sword in hand," to make a passage through an enemy's ranks by means of the sword.

CUT (*Mar.*) another name for a canal, or the branch of a canal, which is artificially cut for the purpose of inland navigation.

CUT (*Carpent.*) the cut which is made in the thickness of a deal, with a saw, for the purpose of dividing it into parts called leaves; thus a five-cut deal is divided into six leaves.

CUT-BRACKETS (*Archit.*) those which are moulded on the edge.—*Cut-Roof*, a truncated roof.—*Cut-Standards*, a name for shelves, the front edge of which is cut into mouldings.

CUT-BASTION (*Fort.*) vide *Bastion*.

CUT-PURSE (*Law*) a sort of thieves who rob by means of cutting the purses of the people.—*Cut-Throat*, a murderer.

CUT-WATER (*Mar.*) an epithet for a ship, to denote the sharp edge with which it cuts or divides the water as it makes way. This word *cut* is also employed in other phrases, as "To cut a feather," is said of a well-bowed ship, which passes so swiftly through the water that it foams before her, and in a dark night seems to sparkle like fire: "To cut and run," to cut the cable and sail immediately: "To cut the sail," to unfurl it and let it fall down.

to **CUT the Round** (*Man.*) or *To cut the Volt*, i. e. to change the hand when a horse volts upon one tread, so that dividing the volt in two, he turns and parts upon a right line to recommence another volt.

CUTAMBULI (*Med.*) certain worms, either in the skin or under it, which cause an uneasy sensation by their creeping: also, wandering scorbutic pains, which resemble the sensation of crawling worms.

CUTANEOUS muscles (*Anat.*) the muscles by which animals are enabled to shake their skins, so as to throw off dust or whatever adheres to it.

CUTANEOUS diseases (*Med.*) those diseases which affect the skin, as the itch, leprosy, &c.

CUTICLE (*Anat.*) *Cuticula*, *Epidermis*, or Scarfskin; a thin pellucid membrane, which is the outermost covering of the animal, which defends the true skin, and is connected with it by means of the hairs, the exhaling and inhaling vessels, and the *reta mucosum*.—*Cuticularis membrana*, the same as the *Dura mater*.

CUTICULOSUS (*Anat.*) vide *Sphincter ani*.

CUTILLÆ (*Med.*) cold fountains in Italy, which were used as baths.

CUTIO (*Ent.*) an insect with many feet.

CUTIS (*Anat.*) the *derma*, or inner skin, which lies under the cuticle or scarfskin; it is full of pores, and consists of the filaments or veins, arteries, nerves, fibres interwoven with each other and with glandules, lymphatic ducts, &c. It is called the *Cutis vera*, or true skin, in distinction from the cuticle.—*Culis anserina*, the rough state into which the skin is thrown by the action of the cold, which makes it resemble the skin of a goose in appearance.

CUTLER (*Mech.*) a maker and seller of knives and all cutting instruments.

CUTLERS, Company of (*Her.*) This company was first incorporated in 1413, and bear for armorial ensigns, "Gules six daggers in three saltire crosses, argent handled and hilted, or pointing towards the chief." The supporters two elephants argent. The crest, a third elephant with a castle on his back.

CUTLET (*Cook.*) any slice of veal in the fleshy part.

CUTPURSE (*Law*) vide *Cut*.

CUTT (*Mar.*) a sort of flat-bottomed boat, formerly used in the channel for transporting horses.

CUTTER of the Tallies (*Law*) an officer in the Exchequer, to whom it belonged to provide wood for the tallies, and to cut on them the sums paid, &c.

CUTTER (*Mar.*) a small vessel commonly navigated in the Channel of England, furnished with one mast and a straight running bowsprit that can run in on the deck occasionally. It is used in the illicit trade, and also by Government in seizing the smuggling vessels.

CUTTER is also a small boat attached to a man of war.

CUT-THROAT (*Law*) vide *Cut*.

CUTTING (*Vet.*) vide *To interfere*.

CUTTING (*Paint.*) the laying one strong lively colour on another without any shade or softening.

CUTTING-DOWN-LINE (*Mar.*) a curved line used by shipwrights in the delineation of ships, by which they determine the thickness of all the floor-timbers, and likewise the height of the dead-wood afore and abaft.

CUTTING the Neck (*Husband.*) the cutting the last handful of standing corn, which being done, the reapers give a shout and go to merry-making.

CUTTINGS (*Bot.*) branches or sprigs of plants cut to set again.

CUTTLE-FISH (*Ich.*) a sort of sea fish, the *Sepia* of Linnaeus, which is armed with a dreadful apparatus of holders and suckers, wherewith it secures most effectually its prey, and conveys it to its mouth. It has the property of emitting from itself a black fluid, which is said to form an ingredient in the composition of Indian ink, and from its back is procured a bone which is converted into pounce. The eggs of the female resemble a bunch of grapes, and are of a white colour until they are impregnated by the male, when they turn black.

CUTTS (*Mar.*) vide *Cutt*.

CUTTEE' (*Mech.*) the box to hold the quills in a weaver's loom.

CUTWATER (*Mar.*) vide *Cat.*

CU'VA (*Archæol.*) a vessel for brewing.

CUVETTE (*Fort.*) or *Cunette*, a trench sunk in the middle of a great dry ditch.

CUYNAGE (*Com.*) vide *Cuinage.*

CUZ (*Print.*) a jocular title for one who is admitted to the fraternity of a printing-office.

CYAMEA (*Min.*) a kind of precious stone resembling a bean when it is broken. *Plin.* l. 37, c. 11.

CYAMOS (*Bot.*) the Egyptian bean.

CYAMUS (*Ent.*) a woodlouse rolled up in the form of a bean, into which form these insects put themselves upon the apprehension of any danger.

CYANA (*Bot.*) a species of the *Gentian.*

CYANELLA (*Bot.*) a genus of plants, Class 6 *Hexandria*, Order 1 *Monogynia.*
Generic Characters. CAL. none.—COR. petals six, oblong.—STAM. filaments six; anthers oblong.—PIST. germ three-corned; style filiform; stigma somewhat sharp.—PER. capsule superior, roundish; seeds many.
Species. Plants of this genus are perennials, and natives of the Cape.

CYANITE (*Min.*) an argillaceous sort of stone, which is a species of the *Zcolithus* in the Linnean system.

CYANOGEN (*Chem.*) a name for carbon combined with azote.

CYANOIDES (*Bot.*) a species of the *Centaurea.*

CYANUS (*Bot.*) Blue Bottle; a plant so called, according to Pliny, from its colour. *Plin.* l. 21, c. 8, &c.

CYANUS, in the *Linnean system*, the same as the *Centaurea.*

CYANUS (*Min.*) a kind of jasper of an azure colour; answering to what is now called *Lapis lazuli.* *Plin.* l. 37, c. 9.

CYAR (*Anat.*) the orifice of the internal ear.

CYATHIFORMIS (*Bot.*) glass-shaped or cupshaped; an epithet for the calyx and corolla; *calyx cyathiformis*, a calyx widening a little at the top, as in *Mauritia*; *corolla cyathiformis*, as in *Peziza cyathoides.*

CYATHUSCUS (*Surg.*) the hollow part of a probe, formed in the shape of a small spoon.

CYATHOIDES (*Bot.*) a species of the *Peziza.*

CYATHUS (*Ant.*) κύαθος, a cup, or drinking vessel; of which the Romans used to drink as many as there were Muses, or letters in the name of their patron, or mistress. It was also a measure both of the liquid and dry kind, equal to about an ounce, or the twelfth part of a pint, or, according to Pliny and Galen, to 10 drachmas. *Plin.* l. 21, c. 33; *Gal. de Mensur. et Ponder.*; *Isidor. Orig.* l. 14, c. 25; *Bud. de Ass.*; *Pæt. de Pond. apud Græv.*; *Thes. Antiq. Rom.* tom. 3, &c.

CYBELES *ponum* (*Bot.*) a pine-apple.

CYBITOS (*Anat.*) vide *Cubitus.*

CYBIUM (*Ant.*) 1. A piece of salt fish cut into a square form. 2. A sort of fish. *Mart.* l. 5, ep. 79, v. 5; *Plin.* l. 9, c. 15, &c.; *Athen.* l. 3.

CYBOIDES (*Bot.*) vide *Cuboides.*

CYCAS (*Bot.*) a genus of plants, which was classed by Linneus first among the Palms, and afterwards among the Ferns.

CYCEON (*Med.*) κυκίων, a sort of pap made of flour and water, sometimes mixed with honey and wine.

CYCIMA (*Min.*) Litharge.

CYCHRAMA (*Orn.*) a bird which accompanies the quails on their leaving any country. *Plin.* l. 10, c. 23.

CYCLAMEN (*Bot.*) κυκλάμινος, a plant so called από τῆς κύκλας, from the circular form of its leaf, or the orbicular form of its root. It is otherwise called *tuber terræ.* *Theophrast. Hist. Plant.* l. 11, c. 10; *Dioscor.* l. 2, c. 184; *Plin.* l. 25, c. 9.

CYCLAMEN, in the *Linnean system*, a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia.*
Generic Character. CAL. perianth half, five-cleft.—COR. one-petalled; tube globose.—STAM. filaments five; anthers straight.—PIST. germ roundish; style filiform; stigma sharp.—PER. berry globose; seeds very many.
Species. The species are tuberous, of which the following are the principal.—*Cyclamen corum*, Round-leaved Cyclamen, or Sow-Bread.—*Cyclamen Europæum*, Common Cyclamen, &c.

CYCLAMINUS (*Bot.*) vide *Cyclamen.*

CYCLAS (*Ant.*) a sort of gown for females, with a long train. *Propert.* l. 4, ep. 7, v. 36.

Hæc nunc aurata cyclade signat humum.

It was so called because it had a border which the Greeks called κύκλος. *Joseph. Antiq. Jud.* l. 19, c. 1; *Sueton. in Cal.* c. 52; *Vopisc. Saturn.* c. 9; *Alex. Gen.* l. 5, c. 18.

CYCLAS (*Bot.*) a genus of plants, Class 10 *Decandria*, Order 1 *Monogynia.*

Generic Character. CAL. perianth one-leaved; tube short. COR. none.—STAM. filaments ten, capillary; anthers ovate.—PIST. germ ovate-oblong; stigma obtuse.—PER. roundish; seeds single.

Species. The two species are trees and natives of the Caribbee Islands, as—*Cyclas spicata*, seu *Apalatoa spicata* and *Cyclas aromatica*, seu *Touchiwa.*

CYCLE (*Chron.*) *cyclus*, from κύκλος, a circle; a continual revolution of numbers as applied to a series of years which go on without any interruption from first to last, and then return to the same order as before. Such cycles have been invented for the purpose of measuring the periodical motions of the heavenly bodies, and of obtaining a more exact computation of time. These cycles are either periods, [vide *Period*] or cycles properly so called; the principal of these latter are the Cycle of the Sun, the Cycle of the Moon, and the Cycle of Indiction.—*Cycle of the Sun*, or *solar cycle*, is a period or revolution of 28 years, beginning with 1, and ending with 28, at the end of which the Dominical or Sunday Letters, and those that express the other feasts, &c. return nearly the same as before.—*Cycle of the Moon*, or *lunar cycle*, a period of 19 years, in which time the new and full moons return nearly to the same day of the Julian year.—*Cycle of Indiction*, a series of 15 years. [vide *Chronology*]

CYCLIDIUM (*Ent.*) a genus of animals, Class *Vermes*, Order *Infusoria.*

Generic Character. Worm invisible to the naked eye, simple, pellucid, and orbicular.

Species. The principal species are the *Cyclidium, bulla, radians, nucleus, pediculus, &c.*

CYCLISCUS (*Surg.*) from κύκλος, a circle; an instrument in the shape of a half-moon, formerly used for scraping rotten bones.

CYCLOGRAPH (*Mech.*) from κύκλος, a circle, and γράφω, to describe; an instrument used for describing the arcs of circles.

CYCLOID (*Geom.*) a kind of mechanical curve, as ADB generated by the rotation of the circle AE along a line AB. The circle AE is called the *Generating Circle*, the line AB the *Base*, and the perpendicular DC the *Axis*.

Cycloids are either *curtate*, *prolate*, or *common*.—The *curtate* or *contracted Cycloid* is the path described by some point without the circle.—The *prolate* or *inflected Cycloid* is the path described by some point within the circle.—The *common Cycloid* is the path described by

some point in the circumference of the circle, as *a* in the above figure.

CYCLOIDAL (*Geom.*) the space contained between the curve, or crooked line, and the subtense of the figure.

CYCLOMETRY (*Math.*) the art of measuring cycles.

CYCLOPÆDIA (*Lit.*) κυκλοπαίδια, from κύκλος, a circle, and παιδία, discipline; the circle of sciences, or universal knowledge; also the book which treats on the whole circle of sciences. This is commonly arranged in alphabetical order.

CYCLOPHORIA sanguinis (*Anat.*) the circulation of the blood.

CYCLOPION (*Anat.*) κυκλώπιον, the white of the eye.

CYCLOPTERUS (*Ich.*) Sucker; a genus of animals, Class Pisces, Order Branchiostegei.

Generic Character. Head obtuse.—Tongue short, thick.—Body short, thick, without scales.—Ventral Fins united into an oval concavity.

Species. The species are the *Cyclopterus lumpus*, *minutus*, *nudus*, *ventricosus*, &c.

CYCLOS (*Anat.*) κύκλος, a circle, is applied by Hippocrates to the orbits of the eye.

CYCLUS (*Chron.*) vide *Cycle*.

CYCNARION (*Med.*) κυκνάριον, a collyrium, mentioned by Galen and Paulus Ægineta. *Gal. P. Æginet.* l. 7, c. 11.

CYDAR (*Min.*) Tin.

CYDER (*Husb.*) vide *Cider*.

CYDONATUM (*Med.*) κυδωνάτον, a preparation of quinces mixed with aromatics. *Paul. Æginet.* l. 7, c. 11.

CYDONIA (*Bot.*) the *Cratæva Marmelos*.

CYGNET (*Nat.*) a young swan.

CYGNET royal (*Her.*) a term in blazoning given to swans when they are collared about the neck with an open crown, and a chain affixed thereto, as in the annexed figure. "He beareth azure, a bend engrailed between two cygnets royal argent, gorged with ducal crowns with strings reflexed over their backs or; name *Pitfield*." It is otherwise blazoned. "A swan argent, ducally gorged and chained or."

CYGNUS (*Astron.*) κύκνος, or ὄρνις, the Swan; an old constellation of the Northern hemisphere, containing, according to Ptolemy, 19 stars, to Tycho 18, to Bayer 36, to Hevelius 47, British Catalogue 81. This is fabled to be the Swan into which Jupiter transformed himself in order to deceive Leda. *Arat. Phænom.* v. 274; *Eratosth. Character.*; *Ptol. Almag.* l. 7, c. 5; *Ricciol. Almag. nov.* l. 6, c. 4.

CYTTES (*Min.*) vide *Ætites*.

CYLICHNE (*Med.*) κυλίχνη; a small vessel, or galley-pot, for holding medicines.

CYLINDER (*Geom.*) κύλινδρος, from κυλίω, to revolve; a figure conceived to be generated by the rotation of a rectangle about one of its sides, as the figure *ABCD*, which is generated by the revolution of the rectangle *PBDQ* about the side *BQ*. This side is called the axis, which connects together the centres of the two circular ends.

When the line is perpendicular to the ends, the cylinder is called a *right cylinder*, as in fig. 1; and if otherwise *oblique* as in fig. 2, *LMNO*, which is an oblique cylinder, conceived to be generated by carrying a right line parallel to itself about the circumference of two equal and parallel circles. *Euc. Def. Elem.* l. 11.

CYLINDER (*Gunn.*) or *concave cylinder*, all the hollow length of the piece, or bore.—*Charged cylinder*, the chamber of a great gun, or that part which receives the powder and ball.—*Vacant cylinder*, that part of the hollow, or bore, which remains empty when the piece is loaded.

CYLINDRIC Ring (*Geom.*) a solid which may be conceived by supposing a cylinder to be bent round into a circular form.—*Cylindric Ungula*, a solid formed by a plane passing obliquely through the side and base of a cylinder, as *EDG*, in the annexed figure, passing through the base *ABG* of the cylinder.

CYLINDRICAL Ceiling (*Archit.*) a ceiling which is either a semicylinder, or a segment less than a semicylinder.

CYLINDRICAL (*Bot.*) another name for *Columnar*.

CYLINDROID (*Geom.*) a solid resembling the common cylinder, except having elliptical instead of circular ends.

CYLINDRUS (*Ant.*) 1. A stone roller for levelling paths, &c. *Vitruv.* l. 10, c. 6; *Virg. Georg.* l. 1, v. 178. 2. The trunk of a tree, several of which were laid out in the way to impede the progress of an enemy on their march. *Veget.* l. 4, c. 8; *Ammian.* l. 31, c. 15. 3. A precious stone of a round form that was worn in the ear. *Plin.* l. 37, c. 5; *Tertull. de Hab. Mul.* c. 7.

CYLISTA (*Bot.*) a genus of plants, Class 17 *Diadelphica*, Order 4 *Decandria*.

Generic Character. CAL. perianth one-leaved, four-parted.—COR. papilionaceous.—STAM. filaments diadelphous; anthers roundish.—PIST. germ superior; style subulate; stigma subcapitate.—PER. legume ovate, oblong; seeds two, oval.

Species. The single species, the *Cylista villosa*, is a shrub.

CYLLOS (*Med.*) κύλλος, one affected with a kind of luxation, which bends outwards, and is incurvated or hollow inwards, *Hippocrat. et Gal. Comm. in Hippocrat. de Art.*

CYMA (*Archit.*) *Sima*, or *Cymatium*, κυμάτιον, vulgarly called ogee; a member or moulding of the cornice, whose profile is waved, i.e. concave at top and convex at the bottom. It is so called from κυμαίνω, to undulate, because of its undulated form. When the concave part of the moulding projects beyond the convex part, the *cymatium* is denominated a *Sima-recta*; but when the convex part forms the greatest projection, it is a *Sima reversa*. Vitruvius speaks of the *Tuscan Cymatium*, supposed by Philander to be an ovolo, or quarter round; the *Doric Cymatium*, probably a cavetto; and the *Lesbian Cymatium*, which has its projection subduple of its height. *Vitruv.* l. 5, c. 7; *Philand. in Vitruv.*; *Bald. Lex. Vitruv.*

CYMA (*Bot.*) vide *Cyme*.

CYMATODES (*Med.*) κυματόδες, from κύμα, a wave, undulating; an epithet for the pulse.

CYMBA (*Ant.*) a skiff or fishing-boat. *Cic. de Offic.* l. 3, c. 14; *Plin.* l. 7, c. 56; *Non.* l. 13, c. 14.

CYMBA (*Anat.*) a bone of the wrist, so called from its supposed likeness to a skiff or fishing-smack.

CYMBACHNE (*Bot.*) a genus of plants, Class 23 *Polygamia*, Order 1 *Monoecia*, Natural Order *Grasses*.

Generic Characters. CAL. two-valved in hermaphrodite and one-valved in female flowers.—COR. two-glumed; in female flowers none.—STAM. in hermaphrodite flowers, filaments three; anthers black.—PIST. germ minute; style simple; stigmas two.

Species. The single species is the *Cymbachne ciliata*.

CYMBALARIA (*Bot.*) the *Antirrhinum cymbalaria et pilosa* of Linnæus.

CYMBALARIS cartilago (*Anat.*) a name for the *Cricoid cartilage*.

CYMBALUM (*Mus.*) κύμβαλον, a cymbal, so called from κύμβος, a cavity; a musical instrument in use among the ancients, as in the annexed figure.

Catull. Carm. 63, v. 29.
Leve tympanum remugit, cava cymbala receperant.

Liv. l. 39, c. 8; *Plut. Sympos.* 8; *Quest. Propert.* l. 3,

el. 16; *Clemens. Alexand. Protrept.* p. 11; *Arnob.* l. 7, p. 237; *August. in Psalm.* 130; *Gregor. Nyssen. in Psalm.* c. 9.

CYMBARIA (*Bot.*) a genus of plants, Class 14 *Didynamia*, Order 2 *Angiospermia*, so called from its boat-shaped fruit. It is distinguished from all other plants by its ten-toothed calyx. The whole plant is hoary, and nearly allied to the *Antirrhinum*.

CYMBIFORME (*Anat.*) the name of a bone in the heel.

CYMBIFORMIS (*Bot.*) vide *Boat-shaped*.

CYME (*Bot.*) signifies properly a sprout or shoot, but is used by Linnæus to denote a species of *inflorescence*, in which the florets do not all rise from the same point. [vide *Corymb*]

CYMIA (*Mech.*) vide *Carora*.

CYMINUM (*Bot.*) the *Cuminum cyminum* of Linnæus.

CYMO'SÆ (*Bot.*) the sixty-third of Linnæus' Natural Orders, consisting of such flowers as are disposed in the form of a cyme.

CYMO'THOS (*Ent.*) a division of the genus *Oniscus*, according to Fabricius, consisting of those species of insects of this tribe which have no feelers, and four antennæ.

CYNA (*Bot.*) a tree in Arabia, resembling the palm-tree in its leaf, of which garments are made.

CYNAMO'LGUS (*Orn.*) a bird in Arabia, so called from its building its nest on the cinnamon tree. *Plin.* l. 33, c. 10.

CYNA'NCHE (*Med.*) *κυνάνχη*, a species of quinsy, so called from *κύων*, a dog, and *ἀγχω*, to suffocate.

CYNANCHE, in the modern nomenclature, is classed by Cullen as a genus of diseases, under the Class *Pyrexia*, Order *Phlegmatia*.

CYNA'NCHICA (*Med.*) a name for medicines that are good for the quinsy.

CYNA'NCHUM (*Bot.*) a genus of plants which are all shrubs or undershrubs, and mostly twining; but the structure of its parts is so minute that botanists are not agreed on its character.

Species. The principal species are as follow—*Cynanchum viminalis*, *Euphorbia*, *Apocynum*, seu *Fel Tavit*, Naked *Cynanchum*.—*Cynanchum hirtum*, *Periploca*, seu *Apocynum*, Hairy *Cynanchum*, &c.

CYNA'NTHÉMIS (*Bot.*) the *Cotula fetida*.

CYNANTHRO'PIA (*Med.*) madness occasioned by the bite of a mad dog, from *κύων*, a dog, and *ἄνθρωπος*, a man.

CYNA'PIUM (*Bot.*) the *Æthusa Cynapium*.

CY'NARA (*Bot.*) *κίναρα*, *ἀκίναρα*, or *κίναρα*, a plant which answers nearest to the description of the artichoke. *Poll.* l. 6, c. 9; *Dioscor.* l. 3, c. 10; *Gal. de Alim. Fac.* l. 2, c. 51.

CYNARA, in the Linnean system, a genus of plants, Class 19 *Syngenesia*, Order 1 *Polygamia Equalis*.

Generic Character. CAL. ventricose.—COR. compound tubulous; proper one-petalled.—STAM. filaments five; anthers cylindric, double.—PIST. germ ovate; style filiform; stigma simple.—PER. none; seeds solitary; receptacle bristly.

Species. This plant, which is well known by the name of the Artichoke, was classed by the ancient botanists under the head of the *Carduus*, and is called *Cinara* by Tournefort. *Bauh. Hist. Plant.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*; *Raii Hist. Plant.*; *Tournef. Instit.*

CYNCHNIS (*Med.*) *κυνχίς*, a small box for holding medicines.

CYNE'BOTE (*Law*) a mulct formerly paid by one who killed another, to the kindred of the deceased.

CYNEGETICS (*Lit.*) *κυνηγετικά*, from *κύων*, a dog, and *ἡγέομαι*, to lead, books or treatises on hunting.

CY'NICKS (*Ant.*) *κυνικοί*, a sect of philosophers first instituted by Antisthenes, who were so called from *κύων*, a dog, on account of their curish and churlish behaviour.

CY'NIPS (*Ent.*) Gall-Fly, a genus of animals, Class *Insecta*, Order *Hymenoptera*.

Generic Character. Mouth with a short-toothed membranaceous jaw.—Feelers four, unequal.—Antennæ moniliform.—Sting spiral.

Species. Animals of this tribe are distinguished principally by the trees which they infest.

CY'NNIA (*Mech.*) vide *Carora*.

CYNOBO'TANE (*Bot.*) the *Cotula fetida* of Linnæus.

CYNOCEPHALE'A (*Bot.*) a herb called by the Egyptians *Osirilis*, after their god Osiris. *Apul. de Herb.* c. 86; *Plin.* l. 13, c. 2.

CYNOCEPHALIS (*Zool.*) a sort of ape with a head like a dog, from *κύων*, a dog, and *κέφαλος* a head. *Plin.* l. 6, c. 29.

CYNOCO'TANUM (*Bot.*) a name for the *Aconite*.

CYNOCO'PRUS (*Med.*) from *κύων*, a dog, and *κόπρος*, dung; the dung of a dog.

CYNOCRAMBE (*Bot.*) Dog's Mercury.

CYNOCRAMBE, in the Linnean system, the *Mercurialis perennis*.

CYNOCYTISIS (*Bot.*) vide *Cynosbaton*.

CYNODECTOS (*Med.*) *κυνόδηκτος*, an epithet for a person bitten by a mad dog.

CYNODESMION (*Med.*) *κυνόδεσμιον*, from *κύων*, which imports sometimes the lower part of the prepuce, and *δέω*, to bind; a ligature by which the prepuce is bound to the glans. *Gorr. Def. Med.*

CYNODO'NTES (*Anat.*) from *κύων*, a dog, and *ὀδὴς*, a tooth; dog-teeth betwixt the fore-teeth and the grinders, in each jaw two, one on one side and the other on the other. *Plin.* l. 11, c. 37.

CYNOGLOSSA (*Bot.*) the *Cynoglossum Apenninum* of Linnæus.

CYNOGLOSSOIDES (*Bot.*) the *Borago Indica* of Linnæus.

CYNOGLOSSUM (*Bot.*) *κυνόγλωσσος*, from *κύων*, a dog, and *γλῶσσα*, a tongue, Hound's-tongue; a plant so called from the similarity in the form of its leaves to that of a dog's tongue. The leaves are vulnerary and detersive. *Dioscor.* l. 4, c. 129; *Plin.* l. 25, c. 8.

CYNOGLOSSUM, in the Linnean system, a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Character. CAL. perianth five-parted.—COR. one-petalled, funnel-form.—STAM. filaments five; anthers roundish.—PIST. germs four; style subulate; stigma emarginate.—PER. none; seeds included in four arils.

Species. The principal species are as follow—*Cynoglossum officinale*, Common Hound's Tongue, a biennial, and native of Europe.—*Cynoglossum cheirotolium*, Silvery-leaved Hound's Tongue, a perennial.—*Cynoglossum linifolium*, Flax-leaved Hound's Tongue, or Venus' Navelwort.—*Cynoglossum omphalodes*, *Borrago*, seu *Symphytum*, Comfrey-leaved Hound's Tongue, &c. *Clus. Hist. Rar. Plant.*; *Bauh. Hist. Plant.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*; *Raii Hist. Plant. Tournef. Instit.*

CYNOLO'PHA (*Anat.*) *κυνόλοφα*, the asperities in the dorsal vertebrae. *Poll. Onom.* l. 2, seg. 180.

CYNOLYSSA (*Med.*) vide *Lyssa*.

CYNO'MAZON (*Bot.*) *κυνόμαζον*; a herb so called from *κύων*, a dog, and *μάζα*, bread, because when put into a piece of bread it kills dogs.

CYNOME'TRA (*Bot.*) a genus of plants, Class 10 *Decandria*, Order 1 *Monogynia*.

Generic Character. CAL. perianth four-leaved, oblong.—COR. petals five, lanceolate.—STAM. filaments ten; anthers oval.—PIST. germ boatform; style filiform; stigma simple.—PER. legume crescent-shaped; seed single.

Species. The species are trees, and natives of the East Indies.

CYNOMORIUM (*Bot.*) a genus of plants, Class 21 *Monoc-*

cia, Order 1 *Monandria*, Natural Order *Amentaceæ*. The male flowers of which are disposed in an imbricated ament with the female flowers.

CYNOMORIUM is also the name of the *Cynometra cauliflora*.

CYNO'MYA (Bot.) vide *Psyllium*.

CYNOPHALOPHOROS (Bot.) the *Capparus Cynophalophorus* of Linnæus.

CYNOPS (Bot.) the *Plantago Cynops* of Linnæus.

CYNOPTICON (Med.) vide *Dacneron*.

CYNORE'XIA (Med.) a canine appetite. [vide *Bulima*]

CYNORRHODON (Bot.) from *κύων*, a dog, and *ρόδον*, a rose; the dog-rose, or wild rose; also the flower of the red lily. *Plin.* l. 25, c. 2.

CYNORRYNCHIUM (Bot.) the *Chelone pentistemon* of Linnæus.

CYNO'SBATON (Bot.) vel *Cynosbatos*, the Eglantine or Sweet-Briar; also the Caper-Bush. *Theophrast. Hist. Plant.* l. 3, c. 18; *Plin.* l. 16, c. 37.

CYNOSOR'CHIS (Bot.) the herb Dog-Stones. *Plin.* l. 27, c. 8. [vide *Orchis*]

CYNOSORCHIS, in the Linnean system, is the *Orchis globosa* et *pyramidalis*.

CYNOSPA'STON (Bot.) vide *Cynosbaton*.

CYNOSU'RA (Astron.) from *κύων* *ἄρα*, dog's tail; the lesser bear-star, or the star in the tail of the lesser bear.

CYNOSURA (Nat.) *κύων* *ἄρα*, dog's-tail; an epithet for addled eggs, especially in the dog days. *Plin.* l. 10, c. 60.

CYNOSU'RUS (Bot.) a genus of plants, Class 3 *Triandria*, Order 2 *Digynia*, Natural Order *Gramina*, or Grasses.

Generic Character. CAL. glume many-flowered, two-valved.—COR. two-valved, awnless; nectary two-leaved.—STAM. filaments three; anthers oblong.—PIST. germ turbinate; styles two, villose; stigmas simple.—PER. none; seed single in the corolla.

Species. The species are mostly perennials, as—*Cynosurus cristatus*, seu *Phleum*, Crested Dog's-Tail Grass, or Bent-Grass.—*Cynosurus durus*, *Lolium*, seu *Poa duras*, Rigid Dog's-Tail Grass.—*Cynosurus corocanus*, *Panicum*, seu *Eleusine*, Thick Spiked Dog's-Tail Grass. But the—*Cynosurus Indicus*, Indian Dog's-Tail Grass, is an annual. *Bauh. Hist.*; *Bauh. Pin*; *Ger. Herb.*; *Park. Theat. Botan.*; *Raii Hist.*

CYNOSURUS is also the name of a species of the *Alopecurus*.

CYNOXYLON (Bot.) the *Nyssa integrifolia* of Linnæus.

CY'NZOLON (Bot.) a stinking weed of the thistle kind. *Plin.* l. 22, c. 18.

CY'ON (Anat.) *κύων*, a dog; signifies also the inferior part of the prepuce.

CYOPHORIA (Med.) *κυφορία*, from *κύημα*, the fœtus, and *φίω*, to bear; gestation, or the time of gestation, applied to pregnant women.

CYPARI'SSÆ (Ant.) Fiery meteors, or appearances in the air at night.

CYPARI'SSIAS (Bot.) the largest kind of spurge. *Plin.* l. 26, c. 8.

CYPARISSIAS, in the Linnean system, is the *Euphorbia cyparissias*.

CYPARI'SSUS (Bot.) vide *Cupressus*.

CYPERE'LLA (Bot.) the same as the *Schoenus*.

CYPERI genus (Bot.) a species of the *Sciapus* of Linnæus.

CYPERIS (Bot.) an Indian herb like ginger.

CYPEROIDES (Bot.) the same as the *Carer*.

CYPERUS (Bot.) or *Cyperum*, *κύπερος* or *κύπερος*, a kind of angular rush, white at bottom, and black at top. *Theophrast. Hist. Plant.* l. 4, c. 11; *Varr. de Re Rust.* l. 3, c. 16; *Cels.* l. 3, c. 16; *Dioscor.* l. 4, c. 22.

CYPERUS, in the Linnean system, a genus of plants, Class 3 *Triandria*, Order 1 *Monogynia*, Natural Order *Calamariæ*.

Generic Character. CAL. spike imbricate; scales ovate.—COR. none.—STAM. filaments three; anthers oblong.—

PIST. germ very small; style filiform; stigmas three, capillary.—PER. none; seed single.

Species. Most of the species have three-cornered culms or stems, are perennials, and natives of the Indies, having a grateful smell. The root is bulbous or tuberos. The most important species of this plant is the—*Cyperus papyrus*, or the Egyptian Papyrus, of which paper was originally made.

CYPHI (Med.) *κύφι*, a composition of honey, wine, cyperus, rosin, and many other ingredients, which was much used in Egypt. *Gal. de Antidot.*; *Suidas*.

CYPHIA (Bot.) the *Lobelia bulbosa* of Linnæus.

CYPHILLA (Bot.) a little cup, or a peltated concavity, with a raised rim, which is found on the underside of some *Algæ*, as *Lychnis sylvaticus*.

CYPHOMA (Med.) *κυφωμα*, from *κυφῶω*, to bend; a preternatural incurvature of the dorsal vertebræ outwards.

CYPI'RA (Bot.) vide *Curcuma*.

CYPRÆA (Conch.) *Cowry*, or *Gowrie*, a genus of animals, Class *Vermes*, Order *Testacea*.

Generic Character. Animal a slug.—Shell univalve, involute.—Aperture effuse at each end.

Species. The principal species are the—*Cypræa pediculus*, *bullata*, *exanthema*, &c.

CYPRESS (Bot.) a tree celebrated in antiquity. [vide *Cupressus*]

CYPRINUM oleum (Med.) *κύπρινον ἔλαιον*, the flowers of cyperus, calamus, cardamus, &c. boiled in olive oil. *Dioscor.* l. 1, c. 65.

CYPRINUS (Ich.) a genus of animals, Class *Pisces*, Order *Abdominales*.

Generic Character. Mouth small.—Body smooth, generally whitish.

Species. The species are distinguished into, 1. Those that are bearded, as the—*Cyprinus carpio*, the Carp.—*Cyprinus barbatus*, the Barbel.—*Cyprinus gobio*, the Gudgeon.—*Cyprinus tinca*, the Tench. 2. Those with the tail nearly even at the end, as—*Cyprinus curassius*, the Crucian.—*Cyprinus cephalus*, the Chub, &c. 3. Those having the tail three-parted, as—*Cyprinus amatus*, the Gold-Fish.—*Cyprinus ophthalmus*, the Telescope Carp, &c. 4. Those having the tail bifid, as—*Cyprinus leuciscus*, the Dace.—*Cyprinus rutilus*, the Roach.—*Cyprinus orfus*, the Finscale or Rud.—*Cyprinus erythrophthalmus*, the Red-Eye.—*Cyprinus alburnus*, the Bleak.—*Cyprinus brama*, the Bream, &c.

CYPRIPEDIUM (Bot.) a genus of plants, Class 20 *Gynandria*, Order 1 *Diandria*.

Generic Character. CAL. *spathæ* vague; *spadix* simple.—COR. petals four or five, lanceolate; nectary slipper-form.—STAM. filaments two, very short; anthers erect.—PIST. germ long; style very short; stigma obscure.—PER. capsule obovate; seeds numerous; receptacle linear.

Species. Plants of this genus have bulbous roots. The principal species are the—*Cypripedium calceolus*, *Calceolus*, seu *Helleborine*, Common Ladies' Slipper.—*Cypripedium bulbosum*, *Bulbous Ladies' Slipper*, &c. *Dod. Pempt.*; *Bauh. Hist.*; *Bauh. Pin.*; *Ger. Herb.*; *Park Theat. Bot.*; *Raii Hist. Plant.*; *Tournef. Inst.*

CYPRIPEDIUM is also the *Arethusa ophioglossoides*.

CYPRUS (Bot.) the *Lawsonia spinosa* of Linnæus.

CYPSELE (Med.) *κυψέλη*, the wax in the ear.

CYPSELUS (Orn.) a martin, which builds its nest like, *κυψέλη*, a capsule, a little box. *Plin.* l. 10, c. 39.

CYRÆ'NIA (Chem.) the fœces of saffron infused in oil.

CYRBA'SIA (Med.) *κυρβάσια*, properly a tiara, or a cap for Persian monarchs, is applied by Hippocrates to a covering for the breasts of women. *Hippocrat. de Morb. Mul.*

CYRE'BIA (Bot.) *κυρηβία*, the husks of barley or other corn.

CYRENAICUS *sal* (Chem.) Sal Ammoniac, produced in Cyrene.

CYRIPCRISE (Law) a breaking into the church, which was sacrilege, according to the laws of Canute.

CYRICKSCEAT (Archæol.) a tribute or duty anciently paid to the church among the Saxons.

CYRILLA (Bot.) a genus of plants, Class 14 *Didynamia*, Order 2 *Angiosperma*; so called from Dominico Cyrillo, a botanist of Naples.

Generic Character. CAL. *perianth* superior; five-leaved. COR. one-petalled.—STAM. *filaments* four; *anthers* ovate.—PIST. *germ* villose; *style* filiform; *stigma* two-lobed.—PER. two-celled; *seeds* numerous.

Species. The single species is the—*Cyrilla pulchella*, seu *Achemines*, a beautiful plant, native of Jamaica.

CYRSE'ON (Anat.) the podex or anus.

CYRTA'NDRA (Bot.) the *Besleria biflora* of Linnæus.

CYRTA'NTHUS (Bot.) a genus of plants, Class 6 *Hexandria*, Order 1 *Monogynia*.

Generic Character. CAL. none.—COR. one-petalled.—STAM. *filaments* six; *anthers* oblong.—PIST. *germ* inferior, ovate; *style* filiform; *stigma* trifid.

Species. The two species are bulbous roots, from the Cape of Good Hope, as—*Cyrtanthus angustifolius*, seu *Crinum*, Narrow-leaved Cyrtanthus.—*Cyrtanthus obliquus*, seu *Amaryllis*, Oblique-leaved Cyrtanthus.

CYRTO'MA (Med.) *κύρτωμα*, a humour in any part of the body.

CYSSARIS (Anat.) the podex or anus.

CYSSITES (Min.) the *Lapis Aëtiles*.

CYSSOID (Geom.) vide *Cissoïd*.

CYSSO'TIS (Med.) vide *Proctalgia*.

CYSTEOLITHOS (Med.) from *κύστις*, the bladder, and *λίθος*, a stone; a stone in the bladder.

CYSTHEPATICI Ductus (Anat.) Cysthepatic ducts, which convey the bile from the liver to the gall-bladder.

CYSTICÆ Arteriæ (Anat.) the cystic arteries, the two principal branches of the hepatic artery.

CYSTICA'PNOS (Bot.) the same as the *Fumaria*.

CYSTIDES (Med.) Encysted tumours, or such as have their substance included in a membrane.

CYSTINX (Anat.) *κύστις*, a small bladder.

CYSTIPHLOGIA (Med.) from *κύστις*, the bladder, and *φλέγω*, to burn; an inflammation in the bladder.

CYSTIRRHA'GIA (Med.) from *κύστις*, the bladder, and *ρρηγνύμι*, to break forth; a discharge of blood from the bladder.

CYSTIS (Anat.) from *κύστις*, a bag, the bladder; any receptacle of morbid humours.—*Cistis choledocha* or *fellea* is the gall-bladder.

CYSTITIS (Med.) from *κύστις*, the bladder; an inflammation in the bladder; a genus of diseases, according to Cullen, in the Class *Pyrexia*, Order *Phlegmasia*.

CYSTOCELE (Med.) from *κύστις*, the bladder, and *κίλη*, a rupture.

CYSTOLITHICA Ischuria (Med.) a suppression of urine from *κύστις* λίθος, a stone in the bladder.

CYSTOPHLEGICA (Med.) from *κύστις*, the bladder, and *φλέγω*, to burn; an epithet for an *ischuria*, or a suppression of urine from an inflammation in the bladder.

CYSTOPHLEGMATICA (Med.) from *κύστις*, the bladder, and *φλέγμα*, phlegm; an epithet for an *ischuria*, or suppression of urine, from too much matter or mucus in the bladder.

CYSTOPROCTICA (Med.) from *κύστις*, the bladder, and *πρωκτός*, anus; an epithet for an *ischuria*, or a suppression of urine, caused by wind, inflammation of the rectum, &c.

CYSTOPTO'SIS (Med.) from *κύστις*, the bladder, and *πτῶσις*, a fall; a protusion of the inner membrane of the bladder through the urethra.

CYSTOSPA'STICA (Med.) from *κύστις*, the bladder, and *σπασμα*, a spasm; an epithet for an *ischuria*, or suppression of urine, from a spasm in the sphincter of the bladder.

CYSTOSPYICA (Med.) from *κύστις*, the bladder, and *πύσις*, pus; an epithet for an *ischuria*, or suppression of the urine, from purulent matter in the bladder.

CYSTOTHROMBOIDES (Med.) from *κύστις*, the bladder, and *θρόμβος*, coagulated blood; an epithet for an *ischuria*, or suppression of urine, from a concretion of grumous blood in the bladder.

CYSTOTOMIA (Med.) from *κύστις*, the bladder, and *τίμνω*, to cut; the operation of cutting, or piercing the bladder.

CYTHARUS (Ich.) a sea-fish of the turbot kind.

CYTHION (Med.) a collyrium mentioned by Celsus.

CYTINUS (Bot.) *κυτόνιον*, the fruit of the pomegranate.—*Cytinus hypocistis*, the plant from whose fruit the *succus hypocistis* is procured. *Theoph. Hist. Plant.* l. 1, c. 22; *Nicand. Alex.*; *Dioscor.* l. 1, c. 102; *Plin.* l. 23, c. 6.

CYTINUS, in the Linnean system, a genus of plants, Class 20 *Gynandria*, Order 7 *Octandria*.

Generic Character. CAL. *perianth* one-leaved, tubular.—COR. none.—STAM. sixteen; *filaments* none; *anthers* oblong, growing on the style under the stigma.—PIST. *germ* inferior; *style* cylindrical; *stigma* eight cleft.—PER. *berry* crowned; *seeds* numerous.

Species. The single species is the—*Cytinus hypocistis*, *Hypocistus orobanche*, seu *Asarum*, Rape of Cistus, is a parasitical plant, growing at the roots of the Cistus. *Bauh. Pin.*; *Ger. Herb.*; *Raii Hist. Plant.*

CYTISUS (Bot.) *κυτόσις*, Bean Trefoil-tree, a plant which was much liked by cattle, and reckoned good for their milk. *Virg. Ecl.* 2, v. 64.

*Torva leana lupum sequitur, lupus ipse capellam
Florentem cytium sequitur lasciva capella.*

It is supposed to have taken its name from *Cythus*, an island of the Cyclades, where it was first found. *Theophrast. Hist. Plant.* l. 4, c. 20; *Dioscor.* l. 4, c. 113; *Columel.* l. 9, c. 4; *Plin.* l. 13, c. 24; *Gal. de Antid.* l. 1, c. 4.

CYTISUS, in the Linnean system, a genus of plants, Class 17 *Diadelphia*, Order 4 *Decandria*.

Generic Character. CAL. *perianth* one-leaved, bell-form. COR. papilionaceous; *standard* ovate; *keel* acuminate.—STAM. *filaments* diadelphous; *anthers* simple.—PIST. *germ* oblong; *style* simple; *stigma* obtuse.—PER. *legume* oblong; *seeds* few.

Species. Plants of this genus are shrubs, without spines, the principal of which are—*Cytisus Laburnum*, *Laburnum*, seu *Anagyris*, Laburnum, formerly called Bean-Trefoil-Tree.—*Cytisus sessilifolius*, Common Cytisus.—*Cytisus Cajan*, seu *Phaseolus*, Pigeon Cytisus, or Pigeon Pea.—*Cytisus supinus*, Trailing Cytisus, &c. *Clus. Hist. Plant. rar.*; *Bauh. Hist.*; *Bauh. Pin.*; *Ger. Herb.*; *Raii Hist. Plant.*; *Tournef. Instit.*, &c.

CYZICE'NUS *Stater* (Ant.) a sum the value of sixteen shillings and four-pence.

CYZICENUS (Med.) the name of a plaster mentioned by Galen. *Gal. de Comp. Med. per Gen.*

CZAR (Polit.) a title of honor assumed by the emperors of Russia, contracted no doubt from Cæsar.

CZARINE (Polit.) title of the empress of Russia.

CZAROWITZ (Polit.) title of the eldest son of the Czar or Czarine.

D.

DAC

- D.** (*Ant.*) as an abbreviation, stands for *Divus, Decius, Decimus, &c.* [vide *Abbreviations*] As a numeral it denotes 500.
- D.** (*Lit.*) stands for Doctor. [vide *Abbreviations*]
- D.** (*Her.*) as a sign, stands for the Honour point in the escutcheon. [vide *Escutcheon*]
- D.** (*Chron.*) as a sign, is one of the seven letters which, in its order, is the Dominical or Sunday Letter. [vide *Chronology*] As an abbreviation, it stands for *Domini*. [vide *Abbreviations*]
- D. C.** (*Mus.*) as an abbreviation, stands for *da capo*, i. e. to the head. [vide *Da*] As a sign, it is the nominal of the second note in the natural diatonic scale, to which Guido applied the monosyllable *re*.—*D flat*, the flat seventh of E flat.—*D in alt*, the fifth note in alt.—*D in altissimo*, the fifth note in altissimo.
- DA** (*Law*) a word equivalent to *yes*.
- DA** (*Mus.*) an Italian preposition used in music books, as—*Da Camera*, music for the chamber.—*Da Capella*, music for the chapel.—*Da Capo*, to the head or beginning; an expression written at the end of a movement, to direct the performer to return to, and end with, the first strain.
- DA'ALDER** (*Com.*) a Dutch coin, worth thirty sols, a guilder and a half, or about 2s. 7d. sterling.
- DAB** (*Ich.*) a flat fish, thinner and less than the flounder; the *Pleuronectes Limander* of Linnæus.
- DABE'STIC** (*Zool.*) a tortoise.
- DABURI** (*Bot.*) vide *Achiott*.
- DACE** (*Ich.*) a river fish of the carp kind; the *Cyprinus leuciscus* of Linnæus.
- DACE/TON** (*Med.*) δακτὸν, from δάκνω, to bite; an epithet for such animals as bite.
- DA'CHEL** (*Bot.*) the Palma major.
- DA'CNANES** (*Orn.*) a sort of bird mentioned by Festus.
- DACNE'RON** (*Med.*) δακνηρόν, biting, from δάκνω, to bite.
- DACROIDES** (*Med.*) vide *Dacryodes*.
- DACRY'DION** (*Bot.*) vide *Scammonium*.
- DACRYGELO'SIS** (*Med.*) from δακρῖν, to weep, and γελᾶν, to laugh; a species of insanity, which consists in laughing and weeping at the same time.
- DACRYO'DES** (*Med.*) δακρυῶδες, an epithet for an ulcer that runs.
- DACRYO'MA** (*Med.*) from δακρῖν, to weep; a closing of one or more of the *puncta lachrymalia*, so as to cause a weeping.
- DACRYON** (*Med.*) δάκρυν, a tear.
- DACRYOPÆOS** (*Med.*) δακρυοποιός, an epithet for things which excite tears by their acrimony, as onions, horse-raddish, &c.
- DA'CTYLE** (*Poet.*) a foot or measure, in Greek or Latin verse, consisting of three feet, the first long, and the two last short, as *dōminūs*.
- DACTYLE'THRÆ** (*Med.*) δακτυλήθραι, from δάκτυλος, a finger; a topical medicine intruded into the stomach to create vomiting. *Oribas. Med. Coll.* l. 8, c. 6.
- DACTYLE'TUS** (*Bot.*) the *Hermodactylus*.
- DACTYLIC** (*Gram.*) an epithet for verses which end with a dactyle instead of a spondee, as in the following instance from Virgil.
- Æn.* l. 6, v. 33.

Bis patriæ cecidere manus; quin prōtinūs omniū.

DACTYLIOMA'NCY (*Ant.*) δακτυλιμαντεία, a divination by enchanted rings made according to some position of the celestial bodies. The ring was held suspended by a fine

DÆ

- thread over a round table, on the edge of which were made divers marks with the twenty-four letters of the alphabet; and, the ring stopping at certain letters, they composed out of these the answer they sought for.
- DACTYLIOS** (*Med.*) from δάκτυλιος, a ring; a trochee in the shape of a ring mentioned by *Hippoc. de Mul.*
- DACTYLIOTHE'CA** (*Ant.*) from δάκτυλος, a ring, and θῆκη, a box; a box to hold rings.
- DACTYLIS** (*Bot.*) δακτυλίς, a long grape like a finger; a date raisin. *Plin.* l. 14, c. 3; *Colum.* l. 3, c. 2.
- DACTYLIS**, in the *Linnean system*, a genus of plants, Class 3 *Triandria*, Order 2 *Digynia*. Natural order of Grasses.
- Generic Character.* CAL. glume many flowered two-valved.—COR. two-valved, the lower valve larger, the inner lanceolate; *nectaries* two lanceolate.—STAM. filaments three capillary; *anthers* oblong.—PIST. germ ovate; *styles* two spreading; *stigmas* feathered.—PER. none; *seed* single oblong.
- Species.* The species are perennials, as—*Dactylis cynosuroides*, American Cocks-foot Grass, native of Virginia.—*Dactylis glomerata*, *Bromus*, seu *Gramen spicatum*, &c. Rough Cocks-foot Grass, native of England and Portugal.—*Dactylis stricta*, seu *Spartum essexianum*, &c. Sea Cocks-foot Grass, native of Portugal.
- DACTYLIS** is also the name of the *Phœnix dactylifera*.
- DACTY'LOGY** (*Mech.*) a discoursing by signs made with the fingers from δάκτυλος, the finger, and λόγος, speech.
- DACTYLON** (*Bot.*) is the *Panicum dactylon* of Linnæus.
- DACTYLO'NOMY** (*Arith.*) from δακτύλος, a finger, and νόμος, a law or measure; the art of numbering on the fingers.
- DACTYLOS** (*Ant.*) δάκτυλος, the shortest measure among the Greeks, being the fourth part of a palm, and the sixteenth part of a foot, the same as *digitus* among the Latins.
- DACTYLOS** (*Gram.*) vide *Dactyle*.
- DACTYLOTHE'CE** (*Surg.*) from δάκτυλος, a finger, and θῆκη, a case; the name for an instrument for raising a finger or a thumb when pendulous from some hurt received.
- DACTYLOS** (*Bot.*) vide *Dactylis*.
- DA'DDOCK** (*Bot.*) the heart or body of a tree thoroughly rotten.
- DA'DO** (*Archit.*) a common name for the dye, which is the part in the middle of the pedestal of the column betwixt its base and cornice; also for the lower part of a wall.
- DADU'CHI** (*Ant.*) δαδουχοί, from δαίς, a torch, and ἔχω, to hold, priests of Cybele so called because they ran about the temple with lighted torches in their hands. *Poll. Onom.* l. 1, c. 1, seg. 31.
- DÆDALA** (*Ant.*) δαίδαλα, festivals celebrated in Greece, particularly at Plataea, when the inhabitants, assembling in a large grove, and exposing in the open air pieces of sodden meat, carefully observed whither the crows that came to prey upon them directed their flight, when they hewed down all the trees on which the birds alighted, and made them into statues called δαίδαλα, after the ingenious artificer Dædalus. A similar festival was observed in other parts of Bœotia, by carrying about the statue of a woman which they called δαίδαλα.
- DÆDALEUS** (*Bot.*) dædaleus, an epithet of a leaf, *folium*.
- DÆ'DIS** (*Ant.*) δαίδις, a solemnity in Greece which lasted three days, during all which time torches, δαίδις, were burned, which gave occasion to the name. *Lucian. Pseudomant.*
- DÆMONES** (*Med.*) such distempers as cannot be assigned to a natural cause, and supposed to arise from the influence of some evil spirit.

- DÆMONOMANIA** (*Ant.*) a madness which was supposed to arise from the possession of some dæmons.
- DAFFODIL** (*Bot.*) a species of the Narcissus, the *Narcissus Pseudo Narcissus* of Linnæus.—Sea Daffodil, the *Pancretium* of Linnæus.
- DAG** (*Mil.*) an obsolete word for a hand-gun, so called from its serving the purpose of a dagger.
- DAGGER** (*Mil.*) a short sword or poignard about twelve or thirteen inches long.
- DAGGER** (*Mar.*) a piece of timber that crosses all the puppets of the bilgeways to keep them together; the plank that secures the heads of the puppets is called the *dagger plank*; and the pieces, whose sides are cast down and bolted through the cramp, are called *dagger-knees*, or *lodging-knees*.
- DAGGER-POINTED** (*Bot.*) *mucronatus*, an epithet for a leaf; *folium mucronatum*, a leaf ending in a point like that of a dagger, as in *Bromelia ananas*; so also in application to the calyx.
- DAGGES** (*Husband.*) the skirts of a fleece when cut off.
- DAHLBERGIA** (*Bot.*) vide *Dalbergia*.
- DAFDALA** (*Ant.*) vide *Dædala*.
- DAIL** (*Mar.*) a trough in which the water runs from the pump over the deck.
- DAILY** (*Astron.*) vide *Diurnal*.
- DAIRY** (*Husband.*) *Dayeria*, signified originally the daily yield of milch cows, or the profit made by them; whence its present signification of a place, and accommodation, for keeping cows and milk.
- DAIS** (*Med.*) *δαΐς*, a sort of pine-tree, and also the substance of that tree recommended by Hippocrates for the expulsion of the fœtus, &c. *Hippocrat. de Morb.*
- DAIS**, in the *Linnean system*, a genus of plants, Class 10 *Decandria*, Order 1 *Monogynia*.
Generic Character. CAL. involucre four-leaved; leaflets scariose; perianth none.—CAL. one-petalled funnel form; tube filiform.—STAM. filaments ten; anthers simple.—PIST. germ somewhat oblong; style filiform; stigma globose ascending.—PER. berry ovate; seed single ovate.
Species. The species are shrubs of the deciduous kind, as—*Dais cotinifolia*, *Cotinus*-leaved Dais, native of the Cape of Good Hope.—*Dais octandria*, native of India.—*Dais disperma*, native of Tongatabu.
- DAISY** (*Bot.*) the *Bellis* of Linnæus.—Great Daisy, or Ox-eye, the *Chrysanthemum Leucanthemum* of Linnæus.—Blue Daisy, the *Globularia vulgaris* of Linnæus.
- DAITIDES** (*Bot.*) *δαΐτιδες*, signify literally "great torches," but are metaphorically applied to heads of garlic. *Gal. Exeges. Vocab. Hippocrat.*
- DA'KER** (*Archæol.*) a number of ten hides.
- DAL** (*Mus.*) Italian for *for* or *by* in music books.
- DALBERGIA** (*Bot.*) a genus of plants, Class 17 *Diadelphia*, Order 4 *Decandria*.
Generic Character. CAL. perianth one-leaved.—COR. papilionaceous; standard large; wings oblong.—STAM. filaments ten; anthers roundish.—PIST. germ oblong; style subulate; stigma simple.—PER. legume oblong; seed single or few.
Species. The two species are—*Dalbergia lanceolaria*, a tree, native of Malabar and Ceylon.—*Dalbergia monettaria*, a shrub, native of Surinam.
- DA'LEA** (*Bot.*) the *Eupatorium dalea*, the *Lippia ovata*, and the *Psoralea dalea* of Linnæus.
- DALECHAMPIA** (*Bot.*) a genus of plants, Class 21 *Monocœcia*, Order 9 *Monodelphia*, called after Jacobus Dalechampius.
Generic Character. CAL. involucel two-leaved; scales numerous; perianth proper.—COR. none.—STAM. filaments many; anthers roundish.—PIST. germ roundish; style filiform; stigma perforated.—PER. capsule roundish; seed solitary.

- Species.* The two species are biennials, as—*Dalechampia colorata*, Coloured-Dalechampia, native of the West Indies.—*Dalechampia scandens*, seu *Lupulus*, native of New Granada.
- DALIBARDA** (*Bot.*) the *Rubus dalibarda* of Linnæus.
- DALLOPS** (*Agric.*) patches of grass, or weeds among corn.
- DALMATICA** (*Ecc.*) an exterior vest of a priest or bishop, with sleeves, in distinction from the *Colobium*. [vide *Colobium*]
- DALUS** (*Archæol.*) a certain measure of land; whence *Dali Prati*, narrow slips of pasture land.
- DAM** (*Law*) a boundary or confinement, as to dam up, or to dam out; *infra damnum suum*, within the bounds or limits of his own property or jurisdiction. *Bract.* l. 2, c. 37.
- DAMA** (*Zool.*) Fallow-Deer, the *Cervus Dama* of Linnæus.
- DAMAGE cleer** (*Law*) a duty formerly paid to the prothonotaries and other clerks, being a third, sixth, or ninth part of the damages recovered upon a trial in any court of justice. This duty was taken away by *Stat.* 17 *Car.* 2, c. 16.—*Damage faisant*, i. e. doing hurt or mischief; a term used when the beast of a stranger gets into another man's ground and feeds, there spoiling grass or corn; in which case the occupier of the ground may distrain or impound them as well in the night as in the day. *Stat.* 51 *Hen.* 3; *Stat.* 4, 1 *Inst.* 142; 2 *Danv. Ab.* 364.
- DAMAGES** (*Law*) *damnum*, any hurt or hindrance which a man receives in his estate, particularly what the jurors are to inquire of, or bring in, when an action passeth for the plaintiff. *Co. Lit.* 257.
- DAMAS** (*Mil.*) a sabre made of Damascus steel. [vide *Damascus*]
- DAMASCENE** (*Bot.*) *Prunus damascena*, the Damask Plum, or Damson, a variety of the *Prunus domestica* of Linnæus.
- DAMA'SCUS STEEL** (*Com.*) a very fine kind of steel made at Damascus, remarkable for its excellent temper.
- DAMASK** (*Com.*) a silk stuff with a raised pattern, consisting of figures and flowers. The *caffart damask* is an imitation, made in France, of the true Indian damask.
- DAMASK ROSE** (*Bot.*) a rose of a red colour, the *Rosa centifolia* of Linnæus.
- TO DAMASK wine** (*Cook.*) to warm it a little, in order to take off the edge of the cold.
- DAMASKEENING** (*Com.*) a kind of Mosaic work, which consists in ornamenting iron, steel, &c. by making incisions therein, and filling them up with gold or silver wire.
- DAMASONIUM** (*Bot.*) vide *Damascene*.
- DAMASONIUM** (*Bot.*) a genus of plants, Class 6 *Hexandria*, Order 5 *Hexagynia*.
Generic Character. CAL. spathe one-leaved; perianth one-leaved.—COR. petals three.—STAM. filaments three; anthers linear.—PIST. germ oblong; styles six; stigmas villose—PER. berry oblong; seeds many.
Species. The single species is the *Damsonium alismoides*, *Seratiotes*, *Alismoides*, seu *Ottel-ambel*, native of the East Indies, Malabar, and Ceylon.
- DAMASONIUM** is also the name of the *Alisma flava*, *damasonium*, &c.
- DAMA'SSE** (*Com.*) or *petite venise*, a kind of wrought linen, made in Flanders; so called from the fashion of its large flowers, something like those of damasks.
- DAMELO'PRE** (*Mar.*) a kind of vessel used in Holland, for conveying merchandise from one canal to another.
- DAME-SIMONE** (*Hort.*) a particular way of forcing cabbage lettuce.
- DAM'SES-VIOLET** (*Bot.*) another name for the Rocket.
- DAMIANISTS** (*Ecc.*) a branch of the Acephali. [vide *Acephali*]
- DAMISE'LLA** (*Law*) a light damosell, or miss. *Stat.* 12 *Ed.* 1.
- DAM'IUM** (*Ant.*) a kind of sacrifice; so called from *δαμῖον*,

dorice pro, ἄμιον, the people; because it was made for the people in honour of *Bona Dea*.
DAMNATA TERRA (*Chem.*) *Caput mortuum*.
DAMNUM (*Law*) Damages. [vide *Damages*]
DAMPERS (*Mus.*) certain moveable parts in the internal construction of the piano-forte, which are covered with cloth in order to deaden the vibration.
DAMPS (*Min.*) noxious exhalations in mines which sometimes suffocate those that work in them. They are distinguished into different kinds, as—the *Pcas-bloom Damp*, in the mines of the Peak of Derbyshire, which are supposed to proceed from the multitude of red trefoil flowers, called honey-suckles, with which the meadows there abound.—*Fubninating Damps*, common in coal mines, which explode when they catch fire.—*Common Damps*, which affect persons with shortness of breath and difficulty of respiration.—*Globe Damps*, supposed to arise from the effluvia of the candles and the bodies. These ascend into the highest part of the vault, and condensing into an incrustation, corrupt and become pestilential.
DAMSIN (*Bot.*) vide *Damascene*.
DAN (*Archæol.*) formerly a title of honour for the better sort of men in this kingdom, answering to the Spanish *Don*.
DAN'CKERIES (*Mus.*) French for collections of galliards, allemandes, ballad-tunes, and other lively tunes.
DAN'CES (*Mus.*) tunes composed for or used in dancing, as the minuet, reel, hornpipe, &c.
DANCETTE (*Her.*) an epithet signifying indented in a particular manner. The lines *dancette* and *indented* differ not in form but in quantity, the acute angle in the former being much larger and deeper than in those of the latter. The difference may be further observed by the two subjoined figures, as *fig. 1*: "He beareth *azure* a fesse *dancette*, or, between three cherubims heads *argent*, crined of the second; name *Adye*:" *fig. 2*, "He beareth *azure* two bars indented or, a chief *argent*;" name *Storr*."—*Double dancette* is an epithet applied particularly to the bend, as *fig. 3*, "He beareth *azure* a bend *double dancette argent*, by the name of *Lorks*."

Fig. 1.

Fig. 2.

Fig. 3.

DANDELION (*Bot.*) the *Leontodon* of Linnæus.
DANDE-PRAT (*Num.*) or *Dande-Part*, a small coin said to have been coined in the reign of Henry VII.
DANDRIF (*Med.*) a scurfy sort of disorder in the heads of young children. [vide *Pityriasis*]
DAN'EGELT (*Archæol.*) a tax of one shilling, and afterwards of two shillings, for every hide of land, imposed by king Ethelred on his subjects, in order to clear the seas of Danish pirates, and to purchase a temporary peace with that people. *Hovedon. par post. Annal. Ann. 344; Seld. Marc. Claus.*
DAN'ELAGE (*Archæol.*) the laws which were in force in England during the time of the Danish government.
DAN'E-WORT (*Bot.*) another name for the Dwarf Elder.
DANGE'RIA (*Law*) or *Dangerium*, a payment of money anciently made by the forest tenants to their lords, that they might have leave to plough and sow in the time of pannage or mast-feeding. *Main. For. Law.*
DANK (*Com.*) a small silver coin current in Persia and Arabia, weighing one-sixth of a draehm, and of correspondent value: also a small weight for precious stones in Arabia.

DAN'TIA (*Bot.*) the *Isnardia palustris*.
DAOURITE (*Min.*) a kind of schorl-stone.
DAPHNE (*Bot.*) δάφνη, the Laurel or Bay Tree, a plant; so called from the nymph Daphne, who was fabled by the poets to have been changed into a laurel. [vide *Laurel*] *Theophrast. l. 3, c. 11; Ovid Metamorph. l. 1; Dioscor. l. 1, c. 106.*
DAPHNE, in the *Linnean system*, a genus of plants, Class 8 *Octandria*; Order 1 *Monogynia*.
Generic Character. CAL. none.—COR. one, one-petalled.—STAM. filaments eight; anthers roundish.—PIST. germ ovate; style very short; stigma headed.—PER. berry roundish; seed single.
Species. The species are shrubs, as—*Daphne mezereon*, *Thymelea*, *Laureola*, *Daphnoides*, seu *Chamelea*, native of the north of England.—*Daphne thymelæa*, seu *Sanamunda*, native of Spain, Italy, and the South of France.—*Daphne tartomaria*, seu *Tarton raire*, Silvery-leaved Daphne, or Tartoniana.—*Daphne laureola*, seu *Laureola*, Spurge-Laurel, native of Britain, France, Switzerland, &c. &c.—*Daphne tinifolia*, seu *Laurus*, native of Jamaica.—*Daphne Gnidium*, seu *Gnidium*, Flax-leaved Daphne, native of the South of France, &c.—*Daphne cneoum*, seu *Cneoum*, Trailing Daphne, native of France, &c.
DAPHNE is also the name of the *Strumsia maritima*.
DAPHNELÆON (*Nat.*) δαφνελαιον, from δάφνη, the bay-tree, and ἔλαιον, oil; oil of Bay.
DAPHNE'PHAGI (*Ant.*) δαφνηφάγοι, from δάφνη, the laurel, and φάγω, to eat; diviners and prophets, who after eating the laurel or bay-leaves, became inspired.
 Ως ἔφασαν κούραι μεγάλα δὲς ἀρτιπέτσιαι
 Καί μοι σκῆπτρον ἔδωκ, δάφνης ἐπιφιλίας ὄζον
 Δρέψασθαι βητόν ἐπέπνευσαν δὲ μοι αὐδῆν
 Θειή, ὅσπε κλυτὰ τὰ τ' ἐσσόμενα πρό τ' ἔοντα.
Lycoph. v. 6; Eustath.; Cassian. Bass. in Virg. Georg. l. 2, c. 3.
DAPHNEPHORIA (*Ant.*) δαφνηφορία, a novennial festival celebrated by the Bœotians in honour of Apollo, to whom boughs of laurel were offered. The priest who performed the ceremony was called the δαφνηφορος, i. e. laurel-bearer. *Pausan. Bœot.*
DAPHNIA (*Min.*) a precious stone, said to cure the epilepsy. *Plin. l. 37, c. 10.*
DAPHNIN (*Chem.*) the Bitters, or the bitter principle extracted from the *Daphne Alpina* of Linnæus.
DAPHNOIDES (*Bot.*) the *Daphne mezereon*.
DAP'IFER (*Polit.*) a *dapes ferendo*, i. e. from serving the feast on the table; a domestic officer like to our Steward of the Household, or rather *Clerk of the Kitchen*; but it was afterwards used for the chief steward or bailiff of an honor or manor.
DAP'PLE (*Vet.*) an epithet for the colour of a horse, which is of a light grey shaded with spots of a deeper grey.
DARA'PTI (*Log.*) an arbitrary term expressing the first mood of the third figure of syllogisms, where the two first propositions are universal affirmatives, and the last a particular affirmative; as,
 D a All believers are loved by God;
 R a P All believers are afflicted; therefore,
 T i Some afflicted are beloved by God.
DARATOS (*Med.*) an epithet for bread that is unfermented.
DARD à feu (*Mil.*) a javelin trimmed with fireworks to be sent against ships or any places intended to be set on fire.
DARE ad Remanentiam (*Law*) to give away in fee or forever. *Glanv. l. 7, c. 1.*
DAREA (*Bot.*) the *Trechomanes membranaceum crispum hirsutum*, &c. &c. of Linnæus.

DA'RIC (*Ant.*) *δαρικός*, a gold coin, so called from Darius, by whom it was struck. It is said to have been made of very fine gold, and is supposed to have been equal to 25s. of our money. In Scripture the darics are called *Adarkonim*.

DA'RII (*Log.*) an arbitrary term for a mode of syllogisms of the first figure, wherein the major proposition is a universal affirmative, and the minor and conclusion particular affirmatives; thus,
d A All men are endued with reason;
r I Some animals are men; *ergo*,
 I Some animals are endued with reason.

DARK CHAMBER (*Mech.*) vide *Camera obscura*.—*Dark Tent*, a portable *Camera Obscura*, made somewhat like a desk, and fitted with optic glasses, &c.

DARKING-COCK (*Orn.*) a variety of the *Phasianus Gallus* of Linnæus.

DARNEL-GRASS (*Bot.*) the *Lolium*; most of the species are perennials, but the *Lolium temulentum* is annual.

DARREIN (*Law*) a corruption of *dernier*, last; as, the *darrien presentment*, the last presentment, an assize or writ against a stranger who preferreth to a church, the advowson whereof belongs to another. *F. N. B.* 31; *2 Inst.* 355.—*Darrein Continuance* is when, after the continuance of the plea, the defendant pleads a new matter.

DARSE (*Mar.*) French for the interior of a port which is shut with a chain, where galleys and other small craft are sheltered.

DA'RSIS (*Med.*) *δαρσις*, an exulceration of the skin.

DA'RTARS (*Vet.*) a kind of seab or ulceration on the skin, to which lambs are subject.

DA'RTER (*Orn.*) a bird with a small head and long slender neck, the *Plotus* of Linnæus. It lives principally upon fish, which it catches by darting forward the head whilst the neck is contracted like the body of a serpent.

DA'RTOS (*Anat.*) *δαρτος*, the coat which immediately covers the testes.

DA'SYPUS (*Zool.*) *δαρύπυς*, from *δαρὺς*, rough, and *πύς*, the foot; an epithet for a hare or rabbit. *Gal. de Simpl.* l. 5, e. 9.

DASYPUS, in the Linnean system, *Armadillo*, a genus of animals, Class *Mammalia*, Order *Bruta*.
Generic Character. Tusks none; *grinders* short, cylindrical, seven or eight in each jaw.—*Body* covered with a bony shell, intersected by zones or bands.
Species. Animals of this tribe feed on roots, melons, insects, worms, &c.; are gentle; rest by day and wander in the night; burrow in the ground, and roll themselves into a globular form when they apprehend any danger: females bring forth every month; flesh eatable. The species mostly inhabit South America, and are distinguished by the number of their bands.

DA'SYS (*Med.*) *δαρὺς*, rough; is a term applied by Hippocrates to the tongue condensed and exasperated with heat and dryness. *Cal. Comm. in Hippocrat.*; *Prorrhætic & Coac.*

DASYSTEPHANA (*Bot.*) the *Gentiana asclepoides*.

DATA (*Math.*) such things or quantities as are supposed to be given or known, in order to find out thereby that which is unknown or sought for.

DATARY (*Ecc.*) the chief officer in the chancery of Rome, through whose hands most vacant benefices pass.

DATE (*Chron.*) the number which marks the day of the month when any writing, coin, &c. was made.

DATE (*Bot.*) the fruit of the Date Tree.—Date Plum, the *Diospyros* of Linnæus.

DATE TREE (*Bot.*) the *Phoenix dactylifera*.

DATHFATHUM (*Bot.*) a coarser kind of frankincense of the second gathering. *Plin.* l. 2, c. 14.

DATHOLITE (*Min.*) a sort of spar stone.

DATISCA (*Bot.*) a genus of plants, Class 22 *Dioccia*, Order 10 *Dodecandria*.

Generic Character. CAL. *perianth* five-leaved.—COR. none.—STAM. *filaments* scarcely any.—PIST. *germ* oblong.—*styles* three; *stigmas* simple.—PER. *capsule* oblong; *seeds* numerous.

Species. The species are perennials, as—*Datisca cannabina*, *Cannabis*, seu *Luteola*, native of Candia, or Crete—*Datisca hirta*, Rough-stalked Bastard Hemp, native of Pennsylvania.

DATISI (*Log.*) an arbitrary term for a mode of syllogisms in the third figure, wherein the major proposition is a universal affirmative, and the minor and conclusion are particular affirmatives; as,
d A All believers are dear to God;
t I Some believers are afflicted; *ergo*,
s I Some afflicted are dear to God.

DATIVE (*Law*) signifies that which may be given or disposed of at will and pleasure. *Stat. 9, R. 2, c. 2.*—*Dative Tutelage*, in Civil Law, the tutelage of a minor appointed by a magistrate.

DATIVE (*Gram.*) from *do*, to give; is the third case of nouns; so called because thereby we show that something is given or taken away. *Priscian. et alii. Vet. Gram. Putsch. Ed.*; *Isidor. Orig.* l. 1, c. 6.

DATURA (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.
Generic Character. CAL. *perianth* one-leaved.—COR. one-petalled.—STAM. *filaments* five; *anthers* oblong.—PIST. *germ* ovate; *style* filiform; *stigma* thickish.—PER. *capsule* ovate; *seeds* numerous.
Species. The species are annual, as—*Datura ferox*, seu *Stramonium*, Rough Thorn-Apple, native of China.—*Datura stramonium*, seu *Solanum*, Common Thorn Apple. *Bauh. Hist.*; *Bauh. Pin.*; *Park. Theat.*; *Raii Hist.*; *Tourn. Inst.*

DAVA'TA terra (*Law*) a portion of land so called in Scotland.

DAUBE' (*Cook.*) or *à la daube*, a particular way of dressing a leg of veal, &c.

DA'UCUS (*Bot.*) *δαῦκος*, Carrot, the well-known garden vegetable, is said to derive its name, *ἀπὸ τοῦ δαίειν*, from its hot quality. It was also called *Dircæus*, according to Dioscorides. *Theoph.* l. 2, c. 5; *Diosc.* l. 3, e. 83.

DAUCUS (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 2 *Digynia*. Natural order of *Umbellatæ* or *Umbellifera*.
Generic Character. CAL. *umbel* universal.—COR. *universal* difform.—STAM. *filaments* five; *anthers* simple.—PIST. *germ* inferior; *styles* two; *stigmas* obtuse.—PER. none; *seeds* two.
Species. The species are biennials and annuals. Of the first kind the following are the principal:—*Daucus barota*, *Caucalis*, seu *Staphilinus*, Wild Carrot, or Bird's Nest.—*Daucus mauritanicus*, seu *Pastinaca*, Fine-leaved Carrot, native of Italy, Spain, Barbary, &c. Of the second kind are the following; namely—*Daucus visnaga*, seu *Visnaga*, Spanish Carrot, or Pick-Tooth, native of the South of Europe, Barbary, and Mount Libanus.—*Daucus gingidium*, seu *Gingidium*, Shining-leaved Carrot, native of the South of France, &c. *Clus. Hist.*; *Bauh. Hist.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat.*; *Raii Hist.*; *Tourn. Inst.*

DAUCUS is also the name of several species, as the *Æthusa cynapium*, the *Ammi glaucifolium*, the *Athamanta libanotes sicula*, et *Cretensis*; the *Caucalis grandiflora*, the *Phellandrium mutillina*, the *Pimpinella peregrina*, the *Seseli glaucum*, et *elatum*; the *Sium verticillatum*, et *siculum*.

DA'VIDISTS (*Ecc.*) a set of fanatics in the 16th century, so called after their leader one George David, a glazier, of Ghent, who pretended to be the Messiah.

St. DAVID'S DAY (*Cus.*) the first of Mareh, kept by the

Welsh in honour of St. David, bishop of Miney, in Wales, at which time they wear leeks in their hats, in commemoration of a singular victory obtained by them, under the conduct of St. David, over the Saxons.

DAVID'S STAFF (*Mar.*) an instrument made use of in navigation.—*David's quadrant*, the common back quadrant.

DA'VIT (*Mar.*) a short piece of timber used on board a ship, to hale up the flook of an anchor and fasten it to the bow of the ship.

DAULONTAS FRUTEX (*Bot.*) an American shrub, which has the properties and virtues of chamomile.

DA'UMUR (*Zool.*) a species of serpent.

DAUPHIN (*Ant.*) an ancient military instrument. [vide *Delphinus*]

DAUPHIN (*Polit.*) the title of the next heir to the crown of France, which is supposed to have originated with the Dauphins of Viennois, who were sovereigns of the province of Dauphiny, and bore a dolphin for their arms. The last of those princes having no issue gave his dominions to the crown of France, upon condition that the heir to the crown should be called Dauphin, and ever after bear a dolphin for his arms.

DAUPHIN'S CROWN (*Her.*) a circle of gold set round with eight fleur-de-lis, closed at the top with four dolphins whose tails conjoin under a fleur-de-lis, as in the annexed figure.

DAUPHINS de Canons (*Mil.*) French for the dolphins which are made in relief on the trunnions of field pieces.

DA'URA (*Bot.*) vide *Helleborum*.

DAW (*Orn.*) vide *Jackdaw*.

DAWN (*Astron.*) the commencement of the day when the twilight appears.

DAY (*Ant.*) vide *Dies*.

DAY (*Chron.*) a space of time reckoned from the apparent motion of the sun. It has been divided into the *day*, properly so called, in distinction from the night, which Sacro de Bosco calls the *artificial day*; and into the *natural day*, as he calls it, including both day and night, which by others is called the *artificial day*. [vide *Chronology*] The day is moreover distinguished into civil and astronomical.—The *civil day* is a space of twenty-four hours, which has been reckoned from different points, by different nations; namely, from sunset to sunset, or from sunrise to sunrise, &c.—*Astronomical day* is also a space of twenty-four hours, reckoned from twelve o'clock at noon till the next succeeding noon, i. e. beginning when the sun's centre is in the meridian of any given place. This day is divided accordingly into two parts; namely, A. M. *ante meridiem*, i. e. before noon; and P. M. *post meridiem*, i. e. after noon. [vide *Chronology*]

DAY (*Law*) is taken, 1. For the civil day, or the space of twenty-four hours, including day and night; so that if the fact be done in the night, it must be stated in law proceedings in the night of the same day. 2. Day is also taken for the *day of appearance* of the parties, or the continuance of the suit, where a day is given, &c. whence the phrases "To be dismissed *without day*," to be finally dismissed the court. "To be put *without day*," i. e. when the justices, before whom causes are depending, do not come on the day to which they have been continued. A day of appearance in court is, by the writ, the roll; *by writ*, when the sheriff returns the writ; *by roll*, when the sheriff not returning the writ, the defendant, to save his freehold, loss of time, imprisonment, &c. may appear by the day he hath by the roll. *Co. Lit.* 134, 135.—*Common days*. [vide *Dies*].—*Special days*. [vide *Dies*].—*Days of grace*. [vide *Dies*].—*Return days*, certain days in term for the return of writs, which, if they happen on a Sunday, or

any festival, as Ascension Day, St. John Baptist, and the like, the day following is taken instead of it.—*Days in Bank*. [vide *Dies*]

DAY-FLY (*Ent.*) the *Ephemera* of Linnæus, an insect; so called from the shortness of its existence, which rarely exceeds a day, and sometimes not an hour. The larva lives under water, is six-footed, and active; the pupa is similar to the larva, but it has also the rudiments of future wings.

DAY-LILY (*Bot.*) the *Hemerocallis* of Linnæus; a plant so called because the beauty of its flower is of short duration, seldom exceeding a day.

DAY-NET (*Sport.*) a particular sort of net for catching larks, martins, hobbies, &c.

DAY-RULE (*Law*) vide *Day-Writ*.

DAY-WERE of land (*Archæol.*) *diurnalis diuturna*, as much land as could be ploughed up in one day's work, or in one journey, as it is called.

DAY-WRIT (*Law*) or *Day-Rule*, a rule or order of court permitting a prisoner in custody, in the King's Bench prison, &c. to go without the bounds of the prison for one day.

D'AYENIA (*Bot.*) the *Ayenia pusilla* of Linnæus.

DAYER (*Archæol.*) an old word in Lorrain and Champagne for the meeting of the day-labourers, to give an account of their daily work.

DAYERIA (*Archæol.*) a dairy. [vide *Dairy*]

DAY-LILY (*Bot.*) vide *Day*.

DAYS ember (*Ecc.*) vide *Ember*.

DAYS intercalary (*Chron.*) vide *Chronology* and *Intercalary*.

DAYS of grace (*Com.*) are a customary number of days allowed for the payment of a bill of exchange, &c. after the same becomes due. Three days of grace are allowed in Britain, where they are given and taken as a matter of course; but in other countries, where the time allowed is much longer, it would be reckoned dishonourable for a merchant to avail himself of it. Bills are, therefore, paid on the very day they fall due.

DAY'S-MAN (*Archæol.*) a term for an arbitrator, or mediator, in any matter of dispute.

DAYS of grace (*Law*) vide *Dies*.

DAY'S WORK (*Mar.*) the reckoning, or account of a ship's course, and distance run, during twenty-four hours, or from noon to noon.

DAZE (*Min.*) a kind of glittering stones, found in the tin and lead mines.

DE (*Law*) a preposition used in many law phrases, as—*De bene esse*, as, to take a thing *de bene esse*, i. e. to allow or accept of it for the present, till the matter shall come to be more fully debated.—*De non decimando Modus*, a writ to be discharged of tithes.—*De non Residentia clerici Regis*, &c. an ancient writ, to excuse a person employed in the King's service, &c. and to discharge him of non-residence.—*De Novo damus*, the clause of a charter, which, in fact, renders it a new charter.—*De Onerando pro Rata Portionis*, an ancient writ, where a person was distrained for rent that ought to be paid proportionably by others. *F. N. B.* 234; *New. Nat. Brev.* 586; *2 Inst.* 624.

DE'ACON (*Ecc.*) *διάκονος*, *diaconus*, from *διακονέω*, to minister to; a minister or servant in the church, whose office it is to assist the priest in divine service, &c. *S. Jonat. Epist. ad Trullian.*; *Clemens. Constit. Apost.* c. 4; *Justin. Apolog.* l. 2.; *S. Cyprian. de Laps.*; *August. Quæst.* 101; *Isidor. de Eccles. Offic.* l. 2, c. 28; *Alcuin de Divin. Offic.* l. 3, c. 8, &c.

DEAD (*Mar.*) a term used in many sea-phrases, as—*Dead-doors*, doors fitted to the outside of the quarter gallery doors, in case the quarter gallery should be carried away.—*Dead-eye*, a sort of flat block, encircled with a rope, and

pierced with three holes through the flat part, to receive the rope called the lanyard.—*Dead-flat*, a name for the midship bend.—*Dead-lights*, strong wooden posts fitted to the cabin windows, in which they are fixed in case of a storm.—*Dead-men's-eyes*, little blocks and pullies, with many holes, wherein the lanners run.—*Dead-neap*, a low tide.—*Dead reckoning*, the estimation which the seamen make of the place where the ship is, by keeping an account of her course without any observation of the heavenly bodies. This is found, by keeping an account of the distance she has run by the log, and of her course steered by the compass, and then rectifying these data by the usual allowances for drift, lee-way, &c. according to the ship's known trim.—*Dead-rising*, or rising line of the floor, in French *la large des façons*, those parts of a ship's floor or bottom throughout her whole length, where the floor timber is terminated upon the lower futtock.—*Dead-ropes*, those which do not run in any block.—*Dead-water*, in French *remoux de sillage*, the eddy of water, which appears like little whirlpools, closing in with the ship's stern as she sails through it.—*Dead-wind*, in French *vent de bout*, the wind right against the ship, or that blowing from the very point to which she wants to go.—*Dead-wood*, in French *courbes de remplissage*, certain blocks of timber laid upon the keel, particularly at the extremities, afore and abaft. This dead-wood is equal in depth to two-thirds that of the keel, and as broad as can be procured, so as not to exceed the bread of the keel.—*Dead-works*, in French *œuvres mortes*, a name given to all that part of a ship which is above the water when she is laden.

TO DE'ADEN a ship's way (Mar.) to impede her velocity through the water.

DEAD-EYE (Mar.) vide *Dead*.

DEAD-LANGUAGES (Gram.) those languages which have ceased to be spoken by any nation or community of people. Under this name are commonly included the Latin, Greek, and Hebrew, to distinguish them from the living languages that are now in regular use.

DEADLY Carrot (Bot.) the *Thapsia villosa* of Linnæus.—*Deadly nightshade*, the *Atropa* of Linnæus.

DEAD-MEN'S-EYES (Mar.) vide *Dead*.

DEAD-NETTLE (Bot.) the *Lamium* of Linnæus, a plant of the nettle tribe; which is so called because it is without stings.

DEAD-PLEDGE (Law) vide *Mortgage*.

DEAD-RECKONING (Mar.) vide *Dead*.

DEAD-RISING (Mar.) vide *Dead*.

DEAD-ROPE (Mar.) vide *Dead*.

DEAD-WATER, &c. (Mar.) vide *Dead*.

DEAD'S-PART (Law) the remainder of the defunct's moveables, besides what is due to the wife and children.

DE-AFFO'RESTED (Law) *deafforestata*, discharged from being a forest, exempt from the forest laws. 17 Car. 1, c. 16.

DEAL (Carpent.) the wood of the fir-tree cut up for the purpose of building. It is cut again into various thicknesses, which are called *boards* or *leaves*, and the deal so divided is called two, three, four, five, &c. *cut stuff*.—*Whole Deals*, are one inch and a half thick.—*Slit Deals* are the half of that.

DE-ALBATION (Mech.) the process of whitening any thing.

DEAN (Ecc.) a dignified clergyman, who has power over ten or more canons.—*Dean and Chapter*, a corporate body, composed of the dean and his prebendaries.

DE-ARTICULATION (Anat.) vide *Abarticulation*.

DE-ASCIA'TIO (Surg.) the same as *Aposceparnismus*.

DEATH, civil (Law) is where a man, though not actually dead, is adjudged so by law; as if any person, for whose life any estate hath been granted, remain beyond sea, or is otherwise absent seven years, no proof being made of his

being alive, he shall be accounted dead. Stat. 19, l. 2, c. 6; 6 Ann. c. 18.

DEATH-WATCH (Ent.) the *Pinus pulsator* of Linnæus; a little insect which inhabits old wooden furniture, and is distinguished by a peculiar ticking which it makes with the fore part of its head, something like the beating with a nail upon a table. This it does in seven, nine, or eleven distinct strokes, which were formerly looked upon as ominous to the family where they were heard; and gave rise to its vulgar name. It has since been ascertained that this ticking is only a call of one sex to the other. [vide Plate 35]

DEBA'NEMENT (Mil.) a French term expressing the act of being out of the line.

DEBA'UCHER (Mil.) French for enticing a soldier from the service of his king and country.

DEBELLA'TION (Mil.) the subduing a people by military force.

DEBENTURE (Law) an instrument in the nature of a bond or bill to charge government, &c. There are different kinds of debentures; as, *custom-house debentures*, certificates by which a person is entitled to receive a drawback; *debentures in the King's household*, by which the King's servants can claim their wages.

DE'BÉT (Law) he owes; the form of a writ of debt, which is more frequently put *debet et detinet*, or *detinet* alone, i. e. he owes and detains, or keeps back from paying the debt. F. N. B. 119, &c.—*Debet et solet*, a writ of right, as if a man sue for any thing which is now denied, having been enjoyed before by himself, and his ancestors before him. F. N. B. 98; Reg. Orig. 140.

DEBILITIES (Astrol.) certain affections of the planets, by which they are weakened, and their influences become less vigorous.

DEBILLER (Mar.) French for taking the horses off, that are employed in dragging boats up a river.

DE'BIT (Com.) a term used in Book-keeping to express the left-hand page of the ledger, to which are carried all articles supplied or paid on the subject of an account, or that are charged to that account.

DEBIT (Law) vide *Debet*.

DE'BITUM (Law) vide *Debt*.

DEBLA'YER (Mil.) signifies, commonly, to make holes or excavations in the earth; but *deblayer un camp*, to evacuate a camp, for the purpose of clearing and purifying the ground; *deblayer les terres d'un fossé*, to clear away the superfluous earth from the parapet.

DEBOUCHE' (Mil.) French for an outlet of a wood, or narrow pass; *Debouché de tranchée*, the opening made at the extremity of a trench, in order to carry the work forwarder.

DEBO'UCHEMENT (Mil.) French for the marching of an army from a narrow place into one that is more open.

DEBO'UCHER (Mil.) French for to march out of a défile or narrow pass, &c.; also to begin a trench or *boyau* in fortification: *Deboucher une grosse bouche à feu*, to take the wadding out of a heavy piece of ordnance.

DEBO'UT (Mil.) Up! a word of command in the French when troops kneel upon one knee in the presence of the consecrated host.

DEBR'IS (Mil.) French for the remains or wreck of an army that has been routed.

DEBRUISED (Her.) an epithet for a bend, or other ordinary, placed over some animal, as in the annexed figure. He beareth "Gules a lion rampant or, debruised by a bend argent, charged with three crosses formy sable."

DEBT (Law) *Debitum*, in common parlance is a sum of money due from one person to another; in a legal sense it is an action which lieth where a man oweth another a certain sum of money, either by a debt of re-

cord, by specialty, or by simple contract. *F. N. B.* 120, &c.; *New Nat. Brev.*

DEBTS and Credits (*Mil.*) a title given to the monthly accounts given in by the captain of every troop, or company, in the British service.

DEBUSQUER (*Mil.*) French for to drive an enemy's party from an ambuscade, or advantageous position.

DECACHORDUM (*Ant.*) an instrument of ten strings.

DEACLINION (*Ant.*) a dining-chamber with couches for ten persons.

DECADE (*Chron.*) the number, or space, of ten days, which formed the third part of the Attic month. [vide *Chronology*]

DECADE (*Lit.*) the number of ten books which was formerly the division of some volumes, particularly on historical subjects, as the decades of Livy.

DECAGON (*Geom.*) δεκάγωνος, from δέκα, ten, and γωνία, a corner; a plane geometrical figure, consisting of ten sides and ten angles. If all the sides and angles are equal, it is a regular decagon, otherwise not.

DECAGYNIA (*Bot.*) from δέκα, ten, and γυνή, a wife; the name of one of the orders in Linnæus' Artificial System, comprehending those flowers which have ten styles, as in the Class *Decandria*. [vide *Decandria*]

DECALOGUE (*Ecc.*) δεκάλογος, from δέκα, ten, and λόγος, a discourse; a name for the Ten Commandments.

DECAMERON (*Lit.*) a name given to a division of a volume into ten books, as the Decameron of Boccaccio.

TO DECAMP (*Mil.*) to march an army from the ground where it lay encamped; also to quit any place in an unexpected manner.

DECAMYRON (*Med.*) from δέκα and μύρον, ointment; a malagma mentioned by Oribasius, containing ten ingredients. *Oribas. Med. Collect.*

DECANDRIA (*Bot.*) from δέκα, ten, and άνδρ, a man; ten-stamened; a name for the tenth class of Linnæus' Artificial system, comprehending those plants which have ten stamens. It consists of six orders, namely—*Monogynia*, *Digynia*, *Trigynia*, *Tetragynia*, *Pentagynia*, *Decagynia*. The following are the principal genera under the several orders, namely—*Monogynia*, *Cercis*, Judas Tree; *Bauhinia*, Mountain Ebony; *Hymenæa*, Locust Tree; *Cæsalpinia*, Brasiletta; *Guilandina*, Bonduc, or Nicker Tree; *Dictamnus*, Fraxinella; *Hæmatoxylon*, Logwood; *Melia*, Bead Tree; *Swietenia*, Mahogany; *Guaiacum*, Lignum Vitæ; *Ruta*, Rue; *Tribulus*, Caltrop; *Zygophyllum*, Bean Caper; *Monotropa*, Yellow Bird's Nest; *Pyrola*, Winter Green; *Dionæa*, Venus' Fly-trap, &c. — *Digynia*, as *Scleranthus*, Knapel; *Chrysopleurean*, Golden Saxifrage; *Selene*, Catchfly; *Sopponaria*, Soapwort; *Dianthus*, Pink, &c. — *Trigynia*, as *Areuaria*, Sandwort; *Stellaria*, Stichwort; *Cucubalus*, Campion, &c.—*Pentagynia*, as *Cotyledon*, Navelwort; *Sedum*, Stonecrop; *Spergula*, Spurrey; *Cerastium*, Mouse-Ear Chickweed; *Agrostemma*, Cockle; *Oxalis*, Wood-Sorrel; *Spondias*, Hog Plum, &c.

DECANDRIA is also the name of an order in the classes *Monadelphia*, *Diadelphia*, *Gynadria*, and *Dicecia*.

DECANTATION (*Chem.*) the pouring off the clear part of any liquor by inclination, so that it may be without any sediment.

DECANTER (*Mech.*) a glass bottle made so as to hold the wine which is for immediate use.

DECANUS (*Ant.*) the leader or foreman of a file of soldiers, which was ten deep. *Veget.* 1. 2, c. 8; *Panciroll. Notit.*; *Dignit. Imp. Orient.* c. 20.

DECANUS also signified formerly a juggler, according to Galen. *De Simpl.* 1. 6.

DECANUS (*Ecc.*) a dean. [vide *Dean*]

DECANUTE (*Astrol.*) or Decury, is ten degrees, attributed to some planet within which it is said to have one dignity.

DECAPHYLLOUS (*Bot.*) *decaphyllus*, ten-leaved; an epithet for a calyx, as in *Hibiscus*.

DECAPITATION (*Law*) the punishment of putting a person to death by taking off his head.

DECAPROTI (*Archæol.*) δικάπρωτοι, i. e. *decem primi*, the ten chief officers of the empire.

DECARCHUS (*Ant.*) a tithing-man, or headborough.

DECASPERMUM (*Bot.*) the *Psidium Decaspermum* of Linnæus.

DECASTICH (*Poet.*) an epigram, or stanza consisting of ten verses.

DECASTYLE (*Archit.*) or *decastylos*, from δέκα, ten, and στυλος, a column; a colonnade, consisting of ten columns. *Vitruv.* 1. 3, c. 1.

DECATORRES (*Ant.*) δεκατορόγοι, tithe-gatherers.

DECATORTHOMA (*Med.*) a medicine made of ten ingredients.

DECEIT, writ of (*Law*) a writ that lies for one that receives damage or injury from him that doth any thing deceitfully in the name of another person.

DECEIVED (*Man.*) a horse is said to be deceived upon a demivolt of one or two treads: when working, as for instance, to the right, and not having furnished above half the demivolt, he is pressed one time or motion forwards with the inner leg, and then is put to a reprice upon the left, in the same cadence.

DECEMBER (*Chron.*) *Decembris*, i. e. *decimus mensis*, the tenth month; the last month in the year, when the sun enters the tropic of Capricorn, making the winter solstice. This month was a season of festivity among the ancients, in which all games were allowed that were otherwise prohibited by the laws. *Mart.* 1. 4, ep. 14, v. 7.

*Dum blanda vagus alea December
Incertus sonat hinc et hinc fritillis.*

Juv. Sat. 7, v. 96.

*Tunc par ingenio pretium: tunc utile multis
Fallere, et vinum toto nescire Decembri.*

Ovid. Fast. 1. 3, v. 50.

Acceptus geniis illa December habet.

Senec. Epist. 18; *Plutarch. Quæst. Roman.* 34; *Macrob. Saturn.* 1. 1, c. 7; *Stuck. Ant. Conv.* 1. 1, c. 33, &c.

DECEMFIDUS (*Bot.*) ten-cleft; an epithet for a calyx that is cut into ten parts.—*Decemlocularis*, ten-celled; an epithet for a pericarp that is divided into ten cells.

DECEMPEDA (*Ant.*) δικάπτε, a perch or pole ten foot long to measure land with. *Hor. Carm.* 1. 2, od. 15, v. 14.

*Nulla decempedis
Metata privatis opacam
Porticus excipiebat Arcton.*

Augustus assigned the decempeda as a weapon to a deserter, or runaway, instead of a spear. *Cic. Phil.* 14, c. 4; *Suet. in Aug.* c. 25; *Veget.* 1. 3, c. 8.

DECEM tales (*Law*) a writ which gives to the sheriff *appouere decem tales*, i. e. to appoint ten such men, for the supply of jurymen when a sufficient number do not appear to make up a full jury.

DECEM primi (*Ant.*) the ten chief men, or senators, of every city or borough, called by Livy *Decem principes*. *Cic. Rosc. Am.* c. 9; *Liv.* 1. 29, c. 15; *Sigon. de Ant. Jur. Ital.* 1. 2, c. 8.—*Decemviri*, extraordinary magistrates created A. U. C. 302, for the particular purpose of collecting the laws of the twelve tables, which they gathered out of the writings of Solon. They were also entrusted with the government of the city in the stead of consuls; but this lasted only a short time. *Dionys. Hal.* 1. 4, p. 260; *Liv.* 1. 3, c. 33.

Decemviri were also particular magistrates appointed by the decrees of the senate to determine particular causes. *Cic. Orat.* c. 46; *Pompon. in Orig. Juris.*; *Siccam. de Jud. Centumvir.* c. 9, 10.

DECENNA'LIA (*Ant.*) or Decennia; a festival every ten years instituted by Augustus, on the occasion of his resuming the imperial authority at the end of that term. The same festival was observed by his successors. *Dio.* l. 53.

DECE'NNARY (*Law*) a town, or tithing, consisting originally of ten families of freeholders. Ten of these Decennaries constituted a *Hundred*, the origin of which is ascribed to Alfred.

DECEPTIO (*Law*) vide *Deceit*.

DECER'MINA (*Ant.*) boughs and leaves that *decerebantur*, were plucked for the purpose of being used at lustrations. *Fest. de Verb. Sig.*

DECHARGE'URS (*Mil.*) French for men who were appointed to attend the park of artillery, and assist the non-commissioned officers.

DECHOU'ER (*Mar.*) French for getting afloat a ship that has been stranded.

DE'CIDENCE (*Med.*) a decay, or tendency to any distemper.

DECI'DUUS (*Bot.*) deciduous; an epithet for a leaf, calyx, corolla, stipules, bractes, and legumes; *folium deciduum*, a leaf that falls off in autumn; whence also plants which lose their leaves in autumn are called deciduous; *perianthium deciduum*, a perianth that falls after the corolla opens, as in *Berberis*, and the class *Tetradynamia*; *corolla decidua*, a corolla that falls off with the rest of the flower; *stipula decidua*, a deciduous stipule, as in *Padus*, *Cerasus*, *Populus*, *Tilia*, *Ulmus*, *Quercus*, and many other trees.

DE'CIES tantum (*Law*) i. e. ten times as much; a writ which lies against a juror (who had been bribed to give his verdict) for the recovery of ten times as much as he took. *Stat.* 38 Ed. 3, c. 12; *Reg. Orig.* 188; *F. N. B.* 171.

DE'CILE (*Astron.*) a new aspect invented by Kepler, when two planets are distant 36 degrees.

DE'CIMÆ (*Archæol.*) Tenths or Tithes.

DE'CIIMAL (*Math.*) an epithet for any thing proceeding by tens, as Decimal Arithmetic, decimal Fractions, decimal Scale, &c.—*Decimal Arithmetic* signifies, in a general sense, that arithmetic, or mode of computation, which proceeds on the scale of ten figures. [vide *Notation*]; but in a particular sense it implies simply—*Decimal fractions*, which are such as have 10, 100, 1000, 10,000, &c. for their denominator, as $\frac{1}{10}$, $\frac{1}{100}$, $\frac{1}{1000}$, $\frac{1}{10000}$, &c. which, for brevity sake, are expressed with a point thus $\cdot 5$ for $\frac{5}{10}$.—*Decimal chain*, a chain for measuring of lands, divided decimally, or into an hundred equal parts, marks being placed at every ten.—*Decimal scales*, flat rules, or scales divided decimally.—*Circulating Decimals*. [vide *Circulating*]

DECIMA'TION (*Ant.*) a military punishment among the Romans, inflicted upon such as behaved themselves ill in the field, by selecting from among the number every tenth man who was to be put to death. *Polyb.* l. 6, c. 36; *Dionys. Hal.* l. 9; *Cic. Cluent.* c. 46; *Liv.* l. 2, c. 59; *Plutarch in Crass.*; *Veget.* l. 3, c. 4; *Sigon. de Ant. Jur. Civ. Rom.* l. 1, c. 15; *apud Græv. Thes. Antiq.* tom. 3.

DECIMATION (*Archæol.*) a tithing, or paying a tenth part.

DE'CIMIS solvendis, &c. (*Law*) a writ against those who had farmed the prior-alien's lands of a king, for the rector of the parish, to recover his tithes from them.

DE'GINERS (*Law*) *Decenniers*, or *Dosiners*, such as had the jurisdiction over ten friburghs for keeping the King's peace.

TO DECI'PHER (*Lit.*) to find out the meaning of any manuscript, which is written with ciphers.

DECK (*Mar.*) a planked floor on which the guns lie, and

the men walk. *Decks* are of different kinds, as—*Cambering Deck*, which rises higher in the middle than at each end—*Flush Deck*, fore and aft, which lies upon a right line without any fall.—*Half-Deck*, which reaches from the mainmast to the stern.—*Lower-Gun-Deck*, which is the first deck in first and second rate ships.—*Middle Deck*, which is the second deck.—*Upper*, or *Main-Deck*, which is much slighter than the two preceding.—*Quarter-Deck*, which is above the upper deck.—*Gun-Deck*, in frigates and sloops, is the main or upper deck.—*Spar-Deck*, that which is continued in a straight line from the quarter-deck to the fore-castle, and appropriated for the reception of spars, cables, &c. It is otherwise called the Orlop. "To raise a deck," is to put it up higher, and "To sink a deck," to lay it lower. [vide *Navigation*]

DE'CKER (*Mar.*) a term implying the rate of force in a ship of war, as "A two or three *Decker*," i. e. a vessel with two or three entire tiers, or ranges of cannon.

DECLAMA'TION (*Rhet.*) a set speech, made for the sake of exercise upon a given subject.

DECLARA'TION of war (*Polit.*) the public proclamation of a state, by which it declares itself to be at war with any foreign power, and forbids all and every one to aid and assist the common enemy, at their peril.

DECLARATION (*Law*) *Declaratio*, *Narratio*, a legal specification on record of the cause of action by a plaintiff against a defendant. *Declarations* are of two kinds, namely—*Declaration de bene esse*, or *By-the-by*, which is made on the return-day, conditionally until special or common bail be filed.—*Declaration in chief*, which is after the filing of bail.

DECLARA'TOR (*Law*) an action in the Scotch law whereby we pray something to be declared in our favour.—*Declarator of property*, is when the complainer, declaring his right to lands, desires he should be declared sole proprietor.—*Declarator of redemption* is when, after a process before the Lords against a wadsetter who refuses to renounce after the order of redemption is used, the Lords force him to renounce, and by decree declare the lands redeemed.

DECLA'RATORY Actions (*Law*) are those actions in the Scotch law, wherein the right of the pursuer is craved to be declared; but nothing claimed to be done by the defender.

DECLI'NSION (*Gram.*) the inflection of cases to which nouns are subject; also the act of going through these inflections.

DECLENSION of a disease (*Med.*) that abatement in a distemper which follows when it is come to its height.

DECLINA'TION (*Astron.*) the distance of any star, or point of the Heavens, from the Equator. The greatest declination of the sun is 23° 30'. The declination is either North or South, as it is North or South of the Equator. It is also apparent or true.—*Apparent declination*, the distance of the apparent place of a planet from the Equator.—*True declination*, the distance of the true place from the Equator.

DECLINATION of the mariner's compass (*Mar.*) its variation from the true meridian of any place.

DECLINATION of a wall (*Hor.*) or a plane for dials; an arc of the horizon comprehended either between the plane and the prime vertical circle, if it be reckoned from the East or West, or else between the meridian and the plane, if from North or South.

DECLINA'TOR (*Mech.*) a mathematical instrument to take the declination of the stars.

DECLINATORY (*Mech.*) a box fitted with a compass and needle, to take the declination of walls for dialling.

DECLINA'TUS (*Bot.*) declined or declining, that is, bending towards the earth; an epithet for a stem, peduncle,

- stamen, style; but *folium declinatum* is a leaf bent downwards like the keel of a boat.
- DECLINERS (*Math.*) or *Declining Dials*, are those which cut obliquely either the plane of the prime vertical, or the plane of the horizon.
- DECLIVIS (*Med.*) declining; an epithet for the abdominal muscle, so called on account of its posture.
- DECOCT (*Med.*) a name for water once boiled, or heated, which was afterwards cooled in the snow to make it a more grateful drink, which, according to Pliny, was the emperor Nero's invention. *Plin.* l. 31, c. 3; *Gal. de Meth. Med.* l. 7.
- DECOCTION (*Med.*) a medicinal liquor, or diet-drink made of roots, herbs, &c. boiled.
- DECOCTUM (*Med.*) vide *Decoet*.
- DECOIFFER *une fusée* (*Mil.*) French for to take off the wax, or mastic composition, by which the inflammable matter in a fusée is confined.
- DECOLLATIO (*Surg.*) the loss of a part of the skull, so called from *decollo*, to behead.
- DECOLLATION (*Ecc.*) signifies literally beheading, but is seldom applied except to the beheading of John the Baptist.
- DECOLORATION (*Mcch.*) the staining or marring a colour.
- DECOMBRES (*Mil.*) French for the rubbish which is made by any breach that is effected in the works of a fortification.
- DECOMPOSITE (*Gram.*) vide *Decompond*.
- DECOMPOSITE (*Chem.*) an epithet for a metallic or other body composed of the metal and a menstruum, &c.
- DECOMPOSITE (*Med.*) vide *Decompositum*.
- DECOMPOSITION (*Chem.*) the reduction of a body into the parts of which it is composed.
- DECOMPOSITUM (*Med.*) a term which augments the signification of *compositum*. *Composita* are things which suffer corruption, and are compounded. *Decomposita* are things united in composition by means of corruption and generation.
- DECOMPOUND (*Gram.*) an epithet for a word which is compounded of two or more words, as Ware-house-man.
- DECOMPOUND (*Bot.*) *decompositus*, an epithet for a leaf, an unbel, and a flower; *folium decompositum*, a leaf which has its primary leaf so divided that each part forms a compound leaf. These leaves are distinguished into the *bigeminate*, *bitermate*, and *bipennate* [vide *Bigeminate*, &c.]; *umbella decomposita* is the same as *prolifera*; *flos decompositus*, a flower compounded of compound flowers, or containing within a common calyx smaller calyces, as in the Order *Segregata*, Class *Syngenesia*.
- DECOMPTÉ (*Mil.*) a liquidation, or balance, which from time to time was made in the old French service between the captain and every private soldier for monies advanced or in hand.
- DECORATIONS (*Archit.*) the ornaments in churches, or other public buildings, that tend to increase its beauty.
- DECORTICATION (*Bot.*) from *de*, and *cortex*, bark; the pulling off the outward bark of a tree.
- DECORUM (*Archit.*) or *decor*, the suiting all the parts of a building so that they may best become the situation. *Vitruv.* l. 1, c. 2.
- DECOUPLE (*Her.*) the same as *uncouple*.
- DECOY (*Sport.*) an enclosed aviary; a place fitted for catching of wild fowl.—*Decoy duck*, a duck which goes abroad and decoys others into the place, where they become a prey.
- DECOY (*Mar.*) a stratagem employed by a small ship of war to draw a vessel of inferior force into an incautious pursuit, until she is come within the range of her cannon, or, as it is called, within gun-shot.

- DECOY (*Mil.*) a stratagem to carry off the enemy's horses in a foraging party.
- DECREASE of the Moon (*Astron.*) another name for the wane.
- DECRE'E (*Law*) a judgment in a court of equity on a bill preferred, as a decree in Chancery, &c.
- DECREES (*Lit.*) vide *Decretals*.
- DECRET *cognitionis causa* (*Law*) is, in the Scotch law, when the *apparent heir* is called to hear the debt constitute, it not being already clearly constitute by writ; and the appearing *heir* renounces, being charged to enter Heir.—*Decreet cognitionis causa against Executors* is when the nearest of kin are pursued by the Executor Creditor, who hath no writ to instruct his Debtor to hear the debt constitute.—*Decreet of comprising* is when, at the day appointed in the letters, the Debtor being called, the messenger offers him his lands for the money, which, if he have not ready, the Inquest declares the lands to belong to the creditor for his payment.—*Decreet of exoneration*, a decreet of the Commissars against the Creditors, or nearest of kin, wherein it is proved that the executor hath executed the whole testament, and that all is exhausted by lawful sentences.—*Decreet of locality*, a decreet modifying a stipend to a minister, dividing and proportioning the same among the heritors.—*Decreet of modification* is modifying a stipend to a minister, but not dividing it.—*Decreet of valuation*, a sentence of the Lords, determining the extent and value of teinds.
- DECREMENT (*Her.*) the wane of the moon, which in this state is said to be a *moon decrescet*. [vide *Decrescent*]
- DECREMENT equal of life (*Math.*) a term in the doctrine of annuities, signifying that out of a certain number of lives there should be an equal annual decrease within a given period of years; as suppose that out of 56 persons at the age of 30 one die every year, so that in fifty-six years they should all be dead.
- DECREMENTS (*Phy.*) are the small parts by which a variable and decreasing quantity becomes less and less.
- DECREMENTS (*Cus.*) fees paid by the students at the Universities for the damage of things which are in their use.
- DECREPITATION (*Chem.*) the crackling noise which arises from salt being thrown into an unglazed earthen pot.
- DECRESCENDO (*Mus.*) Italian for decreasing or sinking, as opposed to *crescendo*.
- DECRESCENT (*Her.*) a term in blazoning to denote the state of the moon when she declines from her full to her last quarter, when she has her horns turned to the sinister side of the escutcheon, as he beareth "Azure a moon decrescet proper, by the name of De la Lune."
- DECRETALS (*Law*) or *Decrees*, a collection of the canon law made by Gratian, a monk of the Order of St. Benedict.
- DECRETALS (*Ecc.*) are rescripts and letters of a Pope, whereby some point or question in the ecclesiastical law is solved or determined. *Nicol. I. Ep.* 6.
- DECRETORY (*Law*) a definitive sentence.
- DECRETUM (*Law*) vide *Decree*.
- DECRUSTATION (*Mech.*) an uncrusting or taking away the uppermost crust or rind of any thing.
- DECUMÆ (*Ant.*) the tenth or tithes of all goods which were given as an offering to any of the gods, or paid as a tribute to the state. *Plant. Stich. act.* 1, scen. 3, v. 81; *Cic. in Verr. Orat.* 3. c. 7; *Plutarch. in Syll.*; *Dio. c.* 78; *Appian. de Bell. Civ.* l. 1.
- DECUMANUS (*Ant.*) belonging to the tenth, as *Decumani*, i. e. *milites*, soldiers of the tenth cohort; also collectors of the tenths, or tithes.—*Decumanus limes*, a line or meer dividing the field from East to West, in distinction from the *cardo*, which divided it from North to South.—*Decumanus*;

- ager*, a field that pays tithes. *Plin.* l. 17, c. 22; *Columel. de Re Rust.* l. 4, c. 18.
- DECUMARIA** (*Bot.*) a genus of plants, Class 11 *Dodecandria*, Order 1 *Monogynia*.
Generic Character. CAL. *perianth* superior.—COR. *petals* ten.—STAM. *filaments* from sixteen to twenty-five; *anthers* twin.—PIST. *germ* top-shaped; *style* cylindrical; *stigma* gibbose.—PER. *capsule* eight-celled; *seeds* solitary.
Species. The single species is a tree, as the—*Decumaria barbara Forsythia*, seu *Clausia*, Climbing *Decumaria*, native of Carolina.
- DECUMBENS** (*Bot.*) decumbent, an epithet for a flower on a stem; *flos decumbent*, a flower having its stamens and pistils declined, or bending down to the lower side of it, as in *Cassia*; *caulis decumbens*, a stem lying on the ground, with the base higher than the other parts.
- DECUMBITURE** (*Astrol.*) a scheme erected for the moment that the disease invades or confines one to his bed or his chamber.
- DECUMBITURE** (*Med.*) a lying down in consequence of sickness.
- DECUPLE** (*Arith.*) a term of proportion implying tenfold, or ten times as much as another.
- DECURIA** (*Ant.*) a band or company of ten men, whether soldiers or judges. *Cic. pro Dom.* c. 5; *Ascon. in Cic.*; *Plin.* l. 33, c. 1.
- DECURIO** (*Ant.*) *δεκάδραχος*, a captain over ten horse or foot. *Polyb. Varro. de Lat. Ling.* l. 4, c. 1; *Veget.* l. 2, c. 24.—*Decurio* was also an alderman in a corporation, answering to a senator at Rome.—*Cic. pro Sext.* c. 5.—*Decurio Pontificum* presided over the *decuriæ curiatae*, according to an inscription. D. M. C. MALERI. PETRONIANI. DECUR. PONTIF. SACERD. JUVEN. MED. CAUSID.—*Decurio Ostiariorum*, steward of the household, an officer mentioned in an inscription, T. FLAVIUS. AUG. DECURIO. OSTIARIORUM. FECIT. SIBI. ET. HADRÆ. OCRIBILLÆ.
- DECURRENS** (*Bot.*) an epithet for a leaf, a petiole, and a stipule; *folium decurrens*, a sessile leaf, having its base extending downwards along the stem, as in *Symphytum*, *Verbesina*, *Carduus*, &c.
- DECURSIO** (*Ant.*) a ceremony, called in Greek *περιδρομή*, of going three times in solemn procession round the funeral pile of any one to whom they wished to show respect. In this decursion the motion was to the left, to indicate sorrow. *Hom. Il.* l. 23, v. 13; *Virg. Æn.* l. 11, v. 188; *Luc.* l. 8, v. 734; *Stat. Theb.* l. 6, v. 213; *Tac. Annal.* l. 2, c. 7; *Dio.* l. 56; *Suet. in Claud.* c. 1; *Appian. de Bell. Civ.* l. 1.
- DECURIO**, a military exercise, consisting of a running march. *Sen. ep.* 18; *Suet. Ner.* c. 7, &c.; *Veget.* l. 1, c. 9, &c.
- DECURSIVELY-PINNATE** (*Bot.*) *decursivo-pinnatum*, an epithet for a leaf having its leaflets decurrent, or running along the petiole.
- DECUSSATE** (*Bot.*) *decussatus*, an epithet for leaves and branches which, growing in pairs, alternately cross each other at right angles; so that if the stem be viewed vertically, or the eye be directed right down it, the leaves or branches will appear to be in fours.
- DECUSSATION** (*Opt.*) the crossing of any two rays, &c. when they meet in a point, and then go on, parting from one another.
- DECUSSIS** (*Ant.*) a coin or piece of money of the value of the Roman penny, ten asses, and ten pounds weight. *Vitriv.* l. 3, c. 1.—*Decussis* is also the figure of the letter X, which being parted in the middle makes another figure of V. *Plin.* l. 18, c. 34.
- DECUSSIVE** (*Bot.*) vide *Decussate*.
- DECUSSORIUM** (*Surg.*) a surgeon's instrument for pressing the *Dura mater* in the case of a fractured skull.
- DEDACHORD** (*Mus.*) a harp or lyre with ten strings.
- DEDBANA** (*Archæol.*) a man slayer.
- DE'DI** (*Law*) i. e. I have given; a term in a warranty in law to a Feoffee and his heirs. *Co. Lit.* 304.
- DEDICATION**, *Feast of (Theol.)* a feasting among the Jews which was kept in memory of Judas Maccabæus, by whom the temple and altar had been dedicated anew after its profanation by Antiochus Epiphanes.
- DEDICATION-DAY** (*Ecc.*) *Festum dedicationis*, a festival in honour of the saint and patron of a church, which was celebrated on the day of its dedication, or the anniversary of that day.
- DEDIMUS potestatem** (*Law*) a writ whereby commission is given to a private man for the speeding of some act appertaining to a judge; by the Civilians it is called *delegation*.—*Dedimus Potestatem de Attornato faciundo*, a writ or power by which the defendant could make an attorney in any action or suit. *New. Nat. Brev.* 55, 56.
- DEED** (*Law*) an instrument written on parchment or paper, consisting of three things, signing, sealing, and delivery, and comprehending a contract between two or more parties. There are two sorts of deeds, indented and polled, according to their form or fashion.—A *deed indented*, or an *indenture*, is that which is cut in and out at the top, or in the side, consisting of two or more parts, for there are deeds tripartite, quadripartite, and septempartite; in which it is expressed that the parties thereto have, to every part thereof, set their several seals.—A *deed poll*, or *polled*, is a plain deed without indenting, which is used when the vendor, for example, only seals, and there is no need of the vendee's sealing a counter-part. *Co. Litt.* 171, &c.
- DEEMSTERS** (*Law*) a kind of judges in the Isle of Man, chosen from among, and by, themselves, who, without process, writing, or charge, decide controversies there. *Camd. Brit.*
- DEEP-SEA-LEAD** (*Mar.*) a lead, at the bottom of which is a coat of white tallow to bring up stones, shells, &c. in order to learn the difference of the ground.—*Deep-Sea-Line*, a small line tied to the sea line, with which seamen sound in deep waters.—*Deep-Sea-Line-Block*, a small wooden snatch-block, from nine to eleven inches long.—*Deep-waisted*, in French *haut accostillé*, the distinguishing fabric of a ship's decks, when the quarter deck and the fore-castle are elevated from four to six feet above the level of the upper or maindeck, so as to leave a space called the *waist on the middle deck*.
- DEEP** (*Mil.*) a term applied to the disposition and arrangement of soldiers, as two deep, or three deep, i. e. two, ranks one before the other, &c.
- DEER** (*Zool.*) a well-known animal classed by Linnæus under the genus *Cervus*. The two principal species so called are the Rein-Deer, *Cervus tarandus*; and the Fallow-Deer, *Cervus dama*. [vide *Cervus*, &c.]
- DEER** (*Sport.*) one of the wild beasts of the forest.—*Deer-hayes*, inclosed places for the preservation of deer.
- DEE'SIS** (*Rhet.*) *δέσις*, *obsecratio*; a figure of speech in which the orator beseeches or implores the Gods. *Jul. Rufinian.* fig. 16.
- DE essendo punctum de Telonio** (*Law*) a writ that lies for those who are by privilege freed from the payment of toll.—*De Expensis Civium et Burgensium*, a writ for levying two shillings per diem for every citizen and burgess.—*De expensis militum*, a writ which requires the sheriffs to levy so much per diem for the expenses of the knight of the shire serving in Parliament. *12 Rich.* 2, c. 12; *23 Hen.* 6, c. 10; *4 Inst.* 46.
- DE FACTO** (*Law*) i. e. in deed; a term used to denote a thing actually done; a King *de Facto* is a King who is in

- actual possession of the crown, in distinction from a King *de jure*.
- DEFA'IT (*Her.*) an epithet for a beast whose head is cut off smooth.
- DEFALCA'TION (*Polit.*) a failure or falling off in any public accounts.
- DEFAMA'TION (*Law*) the speaking slanderous words of a person so as, *de bona fama aliquid detrahere*, to hurt his good fame.
- DEFAM'ED (*Her.*) an epithet for any beast that has lost its tail, which is a mark of infamy.
- DEFAULT (*Law*) a non-appearance in court without sufficient cause made out, although it extends to any omission of that which we ought to do. *Bract.* l. 5, tract. 3; *Co. Lit.* 259.
- DEFA'ULTER (*Mil.*) the same as a *Deserter*.
- DEFAULTER (*Com.*) one who is deficient in his accounts, or fails in making his accounts correct.
- DEFE'ASANCE (*Law*) a condition relating to a deed, which, being performed, the act is made void.
- DEFECA'TION (*Chem.*) a purging from dregs.
- DEFEC'TION (*Polit.*) a falling off either from church or state.
- DEFEC'TIVE nouns (*Gram.*) such nouns as want the ordinary cases or numbers.—*Defective verbs*, verbs which have not all their moods and tenses.
- DEFEN'CE (*Law*) the reply which the defendant makes after the declaration is produced, and then proceeds either in his plea or to imparlance.—*Defence of the Realm*, any legislative provision which is made in time of war for the better securing the kingdom against the attacks of an enemy.
- DEFENCE (*Fort.*) any work that covers or defends the opposite posts, as flanks, parapets, &c.—*Active Defences*, consist of every offensive operation to annoy the besiegers, as the discharge of artillery, &c.—*Passive Defence* is chiefly confined to inundations.—*Distant Defence* consists in being able to interrupt the enemy's movements by circuitous inundations.—*Line of Defence*, that which flanks a bastion; it is either *fichant* or *razant*; the *fichant* is that which is drawn from the angle of the curtain to the flanked angle; the *razant* is that which is drawn from a point in the curtain razing the face of the bastion.—*Defence of Rivers* is the effort made to prevent an enemy from passing.—*To be in a posture of Defence* is to be prepared to resist an enemy with all the means of defence in our power.
- to DEFEND (*Law*) signified formerly to forbid, from the French *defendre*; it is used in this sense in a statute entitled *De defensione portandi arma*. 7 *Ed.* 1. "God defend" is still used in some parts for "God forbid."
- DEFENDANT (*Law*) is one who is sued in an action personal, as a *tenant* is one who is sued in an action real.
- DEFENDENDE'MUS (*Law*) a word in a feoffment which bindeth the donor and his heirs to defend the donee. *Bract.* l. 2, c. 16.
- SE DEFENDE'NDO (*Law*) is a plea used by one who kills another in his own defence, which justifies the fact.
- DEFEN'DER of the Faith (*Ecc.*) a title given by Pope Leo X. to King Henry VIII. for writing against Luther. *Lord Herbert. Hist. Hen.* 8.
- SE DEFEN'DERE (*Law*) a term in Doomsday-book signifying to be taxed for a certain quantity of land.—*Se defendere per suum corpus* was to offer combat or Duel as an appeal or trial at law. Similar to this was the expression *Defendere unica manu*. *Bract.* l. 3, c. 26.
- DEFEN'DERS (*Ecc.*) vide *Defensores*.
- DEFENSA (*Archæol.*) a park, or place fenced in.
- DEFENSATIVES (*Med.*) medicines which divert humour from a part affected.
- DEFEN'SES (*Fort.*) vide *Defence*.
- DEFEN'SITIVE (*Surg.*) a plaister or bandage to keep on a dressing, and secure the wounds from the air.
- DEFEN'SIVA (*Archæol.*) the Lords or Earls of the Marches, the defenders or wards of the county.
- DEFEN'SIVA (*Med.*) Defensives, medicines which resist infection.
- DEFEN'SIVES (*Med.*) vide *Defensiva*.
- DEFEN'SO (*Law*) or *in defenso*, a term applied to that part of an open field upon which there was no commoning.
- DEFEN'SO'RES (*Polit.*) officers of state, or dignitaries in the church, who undertook to guard or protect the privileges of particular towns or churches.—*Defensores Civitatum* were the same as *Syndics*; the *Defensores Ecclesiarum* were otherwise called *Advocates*. *Chrysost. et Ecam. in Act. Apost.* X.; *Ammian.* l. 20, c. 7, &c.; *Justin.* Nov. 15, d, &c.
- DEFEN'SUM (*Archæol.*) any inclosure, or fenced ground. *Mon. Angl.* tom. ii. p. 114.
- DEFERENT (*Astron.*) an imaginary circle or orb, in the Ptolemaic system, that is supposed, as it were, to carry about the body of the planet, being the same as the eccentric.
- DEFEREN'TIA vasa (*Anat.*) two white solid flattened tubes arising from the *Epididymis*, which are so called from *defero*, to carry down, because they convey the semen to the *vasiculae seminales*.
- DEFI'CIENT Hyperbola (*Geom.*) a name given by Newton to a curve having only one asymptote, and two hyperbolic legs running out infinitely towards the sides of the asymptote, but the contrary ways. *Newt. numerat. Lin. tert. Ordin.*
- DEFI'CIENT Numbers (*Arith.*) are such whose aliquot parts added together make less than the integer whereof they are the parts; as 8, whose parts, being 1, 2, 4, make but 7; and 16, whose aliquot parts are 1, 2, 4, 8, make but 15.
- DEFI'CIENT year (*Chron.*) the Jewish year, so called when the month Cisleu is twenty-nine days instead of thirty.
- DEFI'LE (*Mil.*) a narrow lane or passage, through which a company of soldiers can pass only in file.
- to DEFI'LE (*Mil.*) to reduce divisions or platoons into a small front so as to march through a defile, or any narrow place.
- DEFI'LEMENT (*Fort.*) the art of disposing all the works in a place that they may be commanded by the body of the fortress.
- DEFI'NITION (*Log.*) the explaining the signification of a word, or determining the nature of things by words, which serve as limits or boundaries to distinguish them from other things. A *definition* is *nominal* when it explains one word by another; *real* when it explains the nature of the thing. A *real definition* is again *accidental*, or a description of the accidents, as causes, properties, effects, &c.; or *essential*, which explains the constituent parts of the essence. An *essential definition* is moreover *metaphysical* or *logical*, defining the genus and difference; or *physical*, which distinguishes the physical parts of the essence: thus, for example, "A man" is defined *nominally* by the derivation of *homo* from *humo*, the ground; *accidentally*, "A biped without wings;" *metaphysically*, "A rational animal;" *physically*, "A natural being consisting of body and soul."
- DEFI'NITIVE (*Polit.*) positive and express, as a definitive treaty.
- DEFI'NITOR (*Ecc.*) an assessor, or counsellor to a general, or superior in religious orders.
- DEFLAGRA'TION (*Chem.*) the kindling, or burning off in a crucible, a mixture of salt, or some mineral body, with a sulphurous one in order to purify it.—*Deflagration*, a gradual sparkling combustion of any substance without violent explosion; a term particularly applied to combustion produced by nitre.
- DEFLE'XION (*Phy.*) the turning of any thing out of its true course.

- DEFLEXION** (*Mar.*) the tendency of a ship from her true course by reason of currents, &c.
- DEFLEXION of the Rays of Light** (*Opt.*) a property distinct from reflection and refraction, being made perpendicularly towards the opaque body. It is called by Newton *Inflection*.
- DEFLEXUS** (*Bot.*) bowed, or bent down archwise, an epithet for a leaf.
- DEFLORATUS** (*Bot.*) an epithet for a flower which has discharged its pollen.
- DEFLUVIUM** (*Bot.*) a disease in trees whereby they lose their bark.
- DEFLUVIUM capillorum** (*Med.*) a preternatural falling off of the hair.
- DEFLUXIO** (*Med.*) from *fluo*, to flow, and *de*, down; the falling of a humour from a superior upon an inferior part.
- DEFOLIATIO** (*Bot.*) defoliation, or shedding the leaves.
- DEFORCEMENT** (*Law*) a withholding lands or tenements by force from the rightful owner.
- DEFORCEOR** (*Law*) *Deforciator*, one that overcometh and casteth out by force. *Stat. 23 Eliz. c. 23.*
- DEFORCIATO** (*Law*) a distress or holding goods for satisfaction of a debt. *Paroch. Antiq. 239.*
- DEFOSIO** (*Ant.*) burying alive; a punishment inflicted by the Romans on the vestal virgins who were found guilty of incontinence.
- DEFRUTUM** (*Husband.*) from *deservendo*, must; or a decoction of new wine made by boiling away one-third. *Plin. l. 14, c. 9; Columel. l. 12, c. 20; Isid. Orig. l. 19, c. 3.*
- DEFUNCT** (*Law*) a term used for one that is deceased, or dead.
- DEFUNCTION** (*Law*) the final performance of any office.
- DEGAGEMENT** (*Archit.*) French for a private passage, or small back staircase.
- DEGARNER une Fortresse, &c.** (*Fort.*) French for to dismantle a fortress.
- DEGAST** (*Mil.*) French for laying waste an enemy's country.
- DEGLUTITIO** (*Med.*) from *deglutio*, to swallow; deglutition, or the act of swallowing.
- DEGMOS** (*Mcd.*) *δερμωδός*, from *δέρνω*, to bite; a biting pain at the orifice of the stomach.
- DEGORGEOR** (*Mil.*) French for a steel pricker used in examining the touch-hole of a cannon.
- DEGORGER une embrasure** (*Fort.*) to lower the earth of an embrasure so as to afford a view of any object against which a gun is planted.
- DEGOUTE'** (*Vet.*) a French epithet for a horse that goes off his feed.
- DEGRADATION** (*Ecc.*) an ecclesiastical censure, whereby a clergyman is divested of his holy orders: it is distinguished from *deposition*, which is simply a displacing or suspension from his office. *Seld. Tit. of Hon.*
- DEGRADATION** (*Law*) at Common Law, is the depriving a lord, knight, &c. of his rank, title, and honor.
- DEGRADATION** (*Mil.*) the depriving an officer for ever of his commission, rank, and degree of honour; also, the reducing of non-commissioned officers to the rank and station of private soldiers, which is necessary before they can receive corporal punishment.
- DEGRADATION** (*Paint.*) is the lessening and rendering confused the appearance of distant objects in a landscape, so that they may appear there as they would to an eye placed at that distance from them.
- DEGRADED** (*Hcr.*) an epithet in blazoning for a cross that has steps at each end, as in the annexed figure. "He beareth argent a cross degraded, sable. Name *Wyntworth*."
- DEGREE** (*Math.*) the three-hundred-and-sixtieth part of the circumference of a circle. It is subdivided into sixty parts called *minutes*, and each of

- those again into sixty parts more, called *seconds*.—*Degree of Latitude*, a portion of land between two parallels of latitude, equal to 60 miles.—*Degree of Longitude*, a portion of land between two meridians, equal to 60 miles.
- DEGREE** (*Algeb.*) the power of the unknown quantity in an equation: if the index be 2, the equation is of the second degree; if 3, of the third degree; thus, $x^3 = p$ is an equation of the third degree.—*Parodic*, or *parodical degrees* are the indices of the powers when they ascend or descend orderly in an arithmetical progression in the equation; thus, $x^3 + m x^2 + n x = p$. The parodical degrees are 3, 2, 1, 0, the indices of the terms regularly descending.
- DEGREE** (*Law*) an interval in kinship, by which proximity and remoteness of blood are computed.
- DEGREES of comparison** (*Gram.*) are the inflections of adjectives which express different degrees of the same quality: these are three, namely, *positive*, which is the first degree, or the adjective itself, as *good*; *comparative*, the second degree, as *better*; *superlative*, the highest degree, as *best*.
- DEGREES of heat** (*Chem.*) are four, the first of which is the gentlest of all; the second sufficient to warm a vessel sensibly; the third sufficient to boil five or six quarts of water in a vessel; the fourth is the highest degree that can be procured by a furnace.
- DEGREES** (*Lit.*) titles of honour conferred by a University on any person for his merit in the arts and sciences.
- DEGREES, theoretical** (*Mus.*) are the differences of position or elevation between two notes. Degrees are either conjunct or disjunct.—*Conjunct Degrees* are those which are so situated as to form the interval of a second.—*Disjunct Degrees* are those which form a third.
- DEHISCENTIA** (*Bot.*) the gaping or opening of capsules, also the season in which this takes place.
- DEHORS** (*Law*) a term used in ancient pleading for *without*; as *dehors* the land, or *dehors* the point in question, &c.
- DEJECTIO** (*Med.*) from *deicio*, to cast out; the discharge of excrement by stool.
- DEJECTION** (*Astrol.*) is said of the planets when they are in their detriment, i. e. when they have lost their force or influence, by reason of being in opposition to some others which check and counteract them.
- DEJECTORIA** (*Med.*) from *deicio*, to cast out; purging medicines.
- DEINCLINERS** (*Dial.*) or *Deinclining Dials*, such as both decline, incline, or recline, at the same time.
- DE injuria sua propria absque tali causâ** (*Law*) words used in replications in actions of trespass.
- DEI JUDICIUM** (*Law*) the old Saxon trial by ordeal, so called because it was supposed to be an appeal to God.
- DEINOSIS** (*Med.*) *δεινωσις*, from *δεινω*, to exaggerate; an enlargement of the supercilia. *Hippocrat. de Rat. Vict. in Acut.*
- DEIPNOSOPHISTS** (*Ant.*) from *δειπνον*, a supper, and *σοφιστής*, a sophist; a company of wise men who discoursed on philosophical matters at supper; whence the title of Athenæus' book, which recounts such discourses.
- DEIRA** (*Anat.*) vide *Cervix*.
- DEIS** (*Archæol.*) the high table of a monastery.
- DEISM** (*Theol.*) the belief in the existence of a God as deduced from reason. This is called *Natural Religion*, in distinction from *Revealed Religion*, or the belief that is drawn from *Inspired Writings*.
- DE JURE** (*Law*) by right. [vide *De Facto*]
- DEL** (*Mus.*) Italian for *by*, as *del Corelli*, by Corelli.
- DEL** (*Paint.*) an abbreviation for *delineavit*, placed in copper-plates, by the name of the draughtsman, to denote by whom it was designed.
- DELACRYMATIVA** (*Med.*) from *de* and *lachryma*, a tear; medicines which dry the eyes, first purging them of tears.

- DELA'PSIO** (*Med.*) from *delabor*, to slip down; a falling down of the anus, uterus, intestines, &c.
- DELA'TIO** (*Ant.*) the informing against another; a secret accusation. [vide *Delatores*]
- DELATIO** (*Med.*) vide *Indicatio*.
- DELATO'RES** (*Ant.*) common informers; a description of persons much encouraged by Domitian and the worst of the Roman emperors. *Tacit. Annal.* l. 4, c. 30; *Suet. in Domit.* c. 12. The *delatores* of the French were equally busy in the time of the French Revolution.
- DELATURA** (*Law*) an accusation, and sometimes taken for the reward of an informer.
- DEL CREDERE** (*Com.*) Italian for the word *guarantee* or *warranty*, as applicable to factors, who, for an additional premium, become bound when they sell goods upon credit to warrant the solvency of the parties. This is called a *Commission del credere*.
- DELEGATES** (*Law*) commissioners of appeal, appointed by the king under the Great Seal, in cases of appeal from the ecclesiastical court. *Stat. 25 H. 8*, c. 19.
- DELEGATION** (*Law*) is a term in the Civil Law when a debtor appoints one who is a debtor to him, to answer a creditor in his place.
- DELETERIOUS** (*Med.*) *δολητήριος*, from *δολέω*, to injure; an epithet importing pernicious, injurious, or poisonous, as applied to drugs or medicines.
- DELETITIOUS** (*Ant.*) an epithet for paper on which one may write things and blot them out again, to make room for new matter.
- DELF** (*Archæol.*) a quarry or mine where stone or coal is dug. *Stat. 31 Eliz.* 7.
- DELF** (*Her.*) the first of the nine abatements. [vide *Abatement*]
- DELIA** (*Ant.*) *ἡλία*, a quinquennial festival in the island of Delos, instituted by Theseus at his return from Crete, in honour of Venus, by whose assistance he had met with success in his expedition. *Thucyd.* l. 3, c. 104; *Callim. Hym. in Del.*; *Plut. in These.*
- DELICATEZZA** (*Mus.*) Italian for delicacy, as *con delicatezza*, with delicacy of expression.
- DELIGATIO** (*Surg.*) from *de*, and *ligo*, to tie; the application of bandages for the binding up of wounds, ulcers, &c.
- DELIMA** (*Bot.*) a genus of plants, Class 12 *Polyandria*, Order 1 *Monogynia*.
Generic Character. CAL. *perianth* five-leaved.—COR. none.—STAM. *filaments* numerous; *anthers* roundish.—PIST. *germ* superior; *style* cylindrical; *stigma* simple.—PER. *berry* larger; *seeds* two.
Species. The single species is a tree, as the *Delima sarmentosa*, seu *Peripu*, native of Ceylon.
- DELIQUA'TION** (*Chem.*) from *deliquo*, to melt. [vide *Solution*]
- DELIQUIUM** (*Chem.*) or *deliquescence*, implies a spontaneous solution which some salts experience by exposure to the air. [vide *Chemistry*]
- DELIQUIUM** (*Med.*) vide *Syncope*.
- DELIRIUM** (*Med.*) from *deliro*, to rave or talk idly; a febrile symptom, consisting in a person's acting or talking unreasonably.
- DELIVERANCE** (*Law*) a term used by the clerk in court to every prisoner who puts himself on his trial by pleading *not guilty*, to whom he wishes a good *deliverance*.—To *wage deliverance*, to give security that a thing shall be delivered up.
- DELIVERY** (*Law*) or *Gaol-Delivery*, a term applied to the sessions at the Old Bailey, by which the gaol is delivered or cleared of the prisoners.—*Clerk of the deliveries*, an officer who draws up orders for the delivering stores or provisions.—*Delivery*, a term in the mint implying the moneys which have been coined within a certain period.

- DELLIS** (*Mil.*) French for a select body of men from Albania, who volunteer to serve in the Grand Seignior's army.
- DELOCA'TIO** (*Surg.*) from *de* and *locus*, a place; a dislocation, or putting any part out of its proper place, particularly applied to the bones that are put out of joint.
- DELPHICA** (*Ant.*) a kind of table or cupboard with three legs, like that at Delphos, at which the priestess sat, who gave the oracle.
Mart. l. 12, ep. 67.
Argentum atque aurum non simplex Delphica portat.
Vet. Interp. Juv. Sat.; *Procop. de Bell. Vandal.* c. 21.
- DELPHINIA** (*Ant.*) *δελφινία*, a festival at Egina in honour of the Delphinian oracle. *Pind. Schol. Olymp.* 8.
- DELPHINIUM** (*Bot.*) *δελφίνιον*, a plant; so called, according to Dioscorides, because the flower before it opens was supposed to bear some resemblance to a dolphin.
Dioscor. l. 3, c. 83, 84.
- DELPHINIUM**, in the *Linnean System*, a genus of plants, Class 12 *Polyandria*, Order 3 *Trigynia*.
Generic Character. CAL. none.—COR. *petals* five.—STAM. *filaments* many; *anthers* erect.—PIST. *germs* three; *stigmas* simple.—PER. *capsules* three; *seeds* very many.
Species. The species are perennials or annuals. The following are the principal perennials, as the—*Delphinium intermedium*, seu *americanum*, Palmated Bee Larkspur, supposed to be a native of Siberia or Tartary—*Delphinium elatum*, seu *aconitum*, Common Bee Larkspur, native of Switzerland.—*Delphinium exaltatum*, seu *elatum*, American Larkspur. The following are the principal annuals:—*Delphinium consolida*, seu *Consolida*, Branching Larkspur.—*Delphinium ambiguum*, Doubtful Larkspur, native of Barbary. *Clus. Hist.*; *Dod. Pempt.*; *Bauh. Hist.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat.*; *Raii Hist.*; *Tourn. Inst.*
- DELPHINUS** (*Ant.*) or *Delphinos*, an ornament on vases, couches, &c. in the likeness of a dolphin. The same name was also given to certain pillars in the middle of the circus, which bore the figure of the dolphin, in honour of Neptune. *Plin.* l. 33, c. 11; *Dio.* l. 49; *Tertull. de Spectac.* c. 8.
- DELPHINUS**, *δελφίς*, a leaden machine of immense weight, which was thrown on board the enemy's ship, during an engagement, for the purpose of sinking it. It was so called probably because it was made in the form of a dolphin, and the ship which carried it was called *δελφινόφορος*. *Thucyd.* l. 7; *Aristoph. Schol. Equit.* act. 2, scen. 3; *Vitruv.* l. 10, c. 13; *Poll. Onom.* l. 1, c. 9; *Suidas.*; *Gyrald. de Navig.* c. 12; *Scheff. de Mil. Nav.* l. 2, c. 5; *Salmas. Solin.* p. 570, &c.
- DELPHINUS** (*Zool.*) the Dolphin, is described by the ancients as the swiftest of all animals, either by land or sea; and, according to Aristotle, so agile in leaping, that it will clear ships. Their love of music, and attachment to the human species, is mentioned by Herodotus and other writers. According to Juvenal, it was less than the *Balæna*.
Juv. sat. 10, v. 14.
Quantò delphinis balæna Britannica major.
- The dolphin of the Nile was reckoned no less an enemy to the crocodile than the ichneumon. *Herodot.* l. 1, c. 24; *Aristot. Hist. Animal.* l. 1, c. 11, &c.; *Senec. Nat. Quæst.* l. 4, c. 2; *Plin.* l. 8, c. 25; *Ælian. Hist. Animal.* l. 6, c. 15; *Salmas Solin.* p. 445.
- DELPHINUS**, a genus of animals, Class *Mammalia*, Order *Cete*, having teeth in each jaw.
Species. The species are—*Delphinus phocæna*, the Porpoise.—*Delphinus delphis*, the Dolphin.—*Delphinus Orca*, the Sword Grampus, the dorsal fin of which resembles a scymetar.

DELPHINUS (*Astron.*) δελφίς or δελφίν, a constellation of the northern hemisphere, having, in Ptolemy's catalogue, 10 stars, in Tycho's 10, Hevelius' 14, and in Flamstead's 18. The Dolphin is fabled to have been translated to heaven by Neptune. *Arat. Phæn. v. 316; Eratosthen. Characterismi; Hygin. Poet. Astron.; Manil. Poet. Astron.; Ptolem. Almag. Nov. l. 7, c. 5; Ricciol. Almagest Nov. l. 6.*

DELPHYS (*Med.*) δελφύς, the uterus, or *pudendum muliebri*.

DELTA (*Ant.*) δέλτα, the Greek letter Δ.

DELTOIDES (*Mid.*) δελτοειδής, from δέλτα, the Greek letter Δ, and εἶδος, likeness; the name of a very thick triangular muscle covering the upper part of the arm, and forming what is termed the stump of the shoulder.

DELTOIDES (*Bot.*) or *Deltoideus*, deltoid; an epithet for a leaf which has something of the figure of a delta.

DELVE (*Com.*) a quantity of coals dug at the mine or pit.

DEM (*Med.*) Human blood.

DEMAGOGUE (*Polit.*) from δῆμος, the populace, and ἄγω, to lead; a leader of the people, i. e. the head of a faction.

DEMAIN (*Law*) or *demesne*, an inheritance; a term employed to distinguish those lands which the lord of a manor has in his own hands, or in the hands of his lessee; from other lands of the said manor which belong to freehold or copy-hold.—*Ancient-demain*, a tenure by which crown lands were held in the time of William the Conqueror.

DEMARCHEUS (*Ant.*) δημαρχος, from δῆμος, a township or village, and ἄρχος, a ruler; the name of a magistrate in a borough, particularly of Neapolis in Greece. *Spartian. in Adrian. c. 19; Turneb. Adv. l. 29, c. 12.*

DEMAND (*Law*) a calling upon a man for any thing due. There are three sorts of demands:—one in writing without speaking, as in every *Precipe*; one without writing, being a verbal demand of the person who is to do or perform the duty. These two are called *Demands in deed*. The third is a *Demand in law*, as in cases of entries on lands, &c.

DEMANDANT (*Law*) the pursuer in real actions, in distinction from the plaintiff. *Co. Lit. 127.*

DEMEASE (*Law*) vide *Denise*.

DEMENTIA (*Med.*) from *de* and *mens*, mind, i. e. without mind; madness, delirium, absence of intellect.

DEMERUS (*Bot.*) from *demergo*, to sink down; an epithet applied to the leaves of aquatic plants, which are sunk or grow below the surface of the water.

DEME'SNE (*Law*) or *demeine*, vide *Demain*.

DEMETRIA (*Ant.*) otherwise called *Cerealia*, a festival in honour of Ceres, who was called by the Greeks Δημητριάς. *Poll. Onom. l. 1, c. 1; Hesychius.*

DEMI (*Ant.*) δῆμοι, a term particularly applied to the townships into which all Attica was divided.

DEMI (*Gram.*) a term which, used in composition, signifies half, as demi-god, &c.

DEMI' (*Cus.*) a half-fellow at Magdalen College, Oxford.

DEMI (*Her.*) vide *Demij*.

DEMI-APR (*Man.*) vide *Demivolt*.

DEMI-CANNON (*Gunn.*) a sort of great gun carrying a ball of about six inches in diameter.

DEMI-CHA'ISE-BOOTS (*Cus.*) a sort of riding boots for summer.

DEMI-CROSS (*Mar.*) an instrument for taking the height of the sun and stars.

DEMI-CULVERINE (*Gunn.*) a piece of ordnance, varying in length from nine to ten feet, and in the diameter of the bore from four inches and a half to four inches and three-quarters. It requires a charge from six to seven pounds of powder, and a ball of three or four inches in diameter.

DEMI-DISTANCE (*Fort.*) the distance between the outward polygons and the flank.

DEMI-DITONE (*Mus.*) the same as *Tierce minor*.

DEMI-GA'NTLET (*Surg.*) a bandage used in setting dis-jointed fingers.

DEMI-GOD (*Myth.*) heroes who were accounted of human nature, but enrolled among the gods.

DEMI-GORGE (*Fort.*) half the gorge or entrance into the bastion, but not taken from angle to angle where the bastion joins the courtin, but from the angle at the flank to the centre of the bastion.

DEMI-HAGUE (*Gunn.*) vide *Hague*.

DEMI-QUAVER (*Mus.*) the same as *Semi-quaver*.

DEMI-SA'NG (*Law*) the same as *Half-blood*.

DEMISE (*Law*) *Demissio*, a letting or make of lands, tenements, &c. by lease or will. *2 Inst. 483.—Demise and Re-demise*, a conveyance where mutual leases are made from one to another on each side.—*Demise of the King*, implies a demise or transfer of his crown, dignity, &c. to his royal successor on his death. It is therefore equivalent to his death.

DEMIVOLT (*Man.*) one of the seven artificial motions of a horse when his foreparts are more raised than in the *terra a terra*, but the motion of his legs is not so quick.

DEMIURGI (*Ant.*) or *Damiurgi*, officers among the Achæans, who proposed to the assembly the matter on which they were to deliberate, equivalent to the speaker in our Parliament. *Liv. l. 32, c. 22.*

DEMO'CRACY (*Polit.*) δημοκρατία, from δῆμος, the people, and κρατέω, to exercise power; a form of government in which the supreme power is lodged in the people at large, or persons chosen from among them. *Aristot. l. 3, c. 8.*

DEMOCRATIS theriaca (*Med.*) a theriaca, described by Ætius. *Tetrab. 1, serm. 1, c. 3.*

DEMOISE'LE (*Mech.*) French for a pavier's instrument.

DEMONO'CRACY (*Theol.*) from δαίμων, a demon, and κρατία, government; the government or influence of devils.

DEMONSTRATIO (*Rhet.*) ἐπιδείξις, called also *Ostensio*, a mode of pronunciation, or figure of speech, so clear and evident, as to set the thing, as it were, before the eyes of the hearers. *Cic. ad Hevem. l. 3, c. 13; Quintil. l. 2, c. 10, &c.; Geogr. Trapez. Rhet. l. 4; Aquila. Rom. de Fig. p. 186.*

DEMONSTRATION (*Math.*) a proof, or chain of argument, founded on self-evident or admitted principles. Demonstrations are *geometrical*, which are proved from the elements of Euclid; or *mechanical*, when proved from the rules of mechanics.

DEMONSTRATION (*Log.*) a chain of deduction, so powerful as to produce an invincible proof of the truth of a proposition. Demonstrations are either positive or negative, à priori, or à posteriori.—*A positive Demonstration* is one which, proceeding by positive or affirmative propositions, ends in the thing to be demonstrated.—*A negative Demonstration* is that whereby a thing is shown to be true, by proving the absurdity of a contrary supposition.—*Demonstration à priori* is that whereby an effect is proved from a cause, or a conclusion is drawn from something, previously proved, whether a cause or an antecedent.—*Demonstration à posteriori*, is one whereby either a cause is proved from an effect, or a conclusion by something posterior, either an effect or a consequent.

DEMONSTRATIVE (*Rhet.*) one of the genera or kinds of eloquence used in panegyrics, invectives, &c. *Quintil. l. 3, c. 7.*

DEMONTER (*Mil.*) French for laming a horse, or otherwise rendering it unfit for service.

DEMOTIVUS elapsus (*Med.*) sudden death.

DEMPSTER (*Law*) vide *Deenster*.—*Dempster of court*, another name in Scotland for the common hangman.

DEMULCENTIA Medicamenta (*Med.*) are medicines which render the acrimonious humours mild.

DEMURRAGE (*Com.*) an allowance to a master of a ship for staying in a port longer than the time first appointed.

DEMURRER (*Law*) a pause or stop upon a point of difficulty, which must be determined by the court before any farther proceedings can be had in any action. *Demurrers* are *general* where no particular cause is shown, or *special* where the particular causes of demurrer are set forth.

DEMY (*Her.*) an epithet for any charge that is borne, half, as a demy-lion, in the annexed figure. "He beareth, or, a demy-lion, rampant, *gules*. Name Mallory."

DEM'Y (*Cus.*) *vd e Demi.*

DEMY (*Com.*) the name of paper, of particular dimensions, as it comes from the manufacturer. It is so called because it is half the size of a sheet of columbier.

DEN and *Strond* (*Archæol.*) liberty for a ship to run aground, or come ashore.

DENA (*Archæol.*) a term in Doomsday-Book for a hollow place between two hills.

DENARIA'TA terræ (*Archæol.*) the fourth part of an acre of land.

DENARII de Caritate (*Ecc.*) customary oblations made by parochial churches to the cathedral or mother church.

DENARIUS (*Ant.*) an epithet for any thing pertaining to the number of ten, as *Denariæ fistulæ*, conduit pipes ten feet long; and *Denariæ ceremoniæ*, ceremonies which were observed for ten days. *Fest. de Verb. Signif.* Denarius signified particularly a Roman coin, equal in value to eightpence in our money, marked with the letter X, to signify ten asses. It was of the same weight with the attick drachm or groat, and was reckoned for some time at four Sesterces.

DENARIUS (*Archæol.*) an old name for the English penny, in French *denier*.—*Denarius Dei*, God's Penny, or Earnest Money given and received by the parties to contracts.—*Denarius S. Petri*, Peter-Pence, an annual payment from every family of one penny to the pope.—*Denarius tertius comitatus*, a third part or penny, reserved for the Earl of the county, from fines and other profits of the County-Courts.

DENBERA (*Archæol.*) a place for the runnings of hogs.

DENCHED (*Her.*) the same as *Indented*.

DENDE (*Bot.*) the oriental name for a species of *Ricinus*, called also *Abelmoluch*.

DENDRACHA'TES (*Min.*) δένδραχάτης, a precious stone of the agate kind, with streaks like the branches of a tree in it. *Orph. de Lapid.*; *Plin.* l. 37, c. 10.

DENDRITIS (*Min.*) δένδριτις, a precious stone mentioned by *Pliny*. *Nat. Hist.* l. 17, c. 10.

DENDROC'SSOS (*Bot.*) a kind of ivy growing by itself, like other trees.

DENDROIDES (*Bot.*) from δένδρον, a tree, and εἶδος, a likeness; a name for plants which grow like trees.

DENDROLI'BANUS (*Bot.*) from δένδρον, a tree, and λιβανος, frankincense; the herb Rosemary.

DENDRO'LOGY (*Bot.*) from δένδρον, a tree, and λόγος, a discourse; a treatise or discourse on trees.

DENDROMA'LACHE (*Bot.*) from δένδρον and μάλαχον, the mallow; a name for the *Malva arborescens*.

DENDRO'METER (*Mech.*) from δένδρον, a tree, and μέτρον, a measure; an instrument for measuring trees.

DENDRO'PHORI (*Ant.*) from δένδρον, a tree, and φέρω, to carry; those who carried branches of trees in the solemn processions which were made in honour of Bacchus, Sylvanus, Cybele, or any other god. They were also employed in cutting down and collecting wood, and are mentioned in several inscriptions on basso relievos, marbles, &c. *Cod. Theodos. de Pagan. et Templ.* l. 14, tit. 8; *Voss. de Idolol.* l. 1, c. 20; *Turneb. Adv.* l. 29, c. 16; *Ursat. de Not.*

Roman. apud Græv. Thes. Antiq. tom. 11, p. 632; *Spon. Misc. Erudit. Ant.* sect. 2, art. 11, p. 56.

DE'NEB (*Astron.*) an Arabic word, signifying tail, is the name of the bright star in the Lion's tail.

DENICA'LES feriæ (*Ant.*) a kind of solemnity on the tenth day in the house where a person had died, for the purpose of cleansing it.

DENIE'R (*Numis.*) one of the earliest French coins, so called from the Latin *denarius*, answering nearest to our penny. They were first made of silver, but afterwards with an alloy of copper, or altogether of copper, until they finally fell into disuse. The denier was the twelfth part of a sol, and was either *Parisois*, i. e. Parisian, or made at Paris, or *Tournois*, i. e. made at Tournay, the former of which was worth a quarter more than the latter. The annexed figure is a representation of a Denier in the time of Pepin; on the obverse the inscription *PEPINUS*, and on the reverse *R. F.* i. e. *Rex Francorum*; the import of the marks on these coins is not known. *Blanch. Trait. Hist.*

DENIZEN (*Law*) i. e. *donation*; an alien born who has obtained, *ex donatione regis*, letters patent to make him an English subject.

DENODATIO (*Med.*) from *denodo*, to loosen; dissolution.

DENOMINA'NS (*Log.*) *vide Denominativum.*

DENOMINATIVUM (*Log.*) the name for any term that is derived from another, as prudent from prudence, which is called *Denominans*; and the word for the thing or person denominated prudent, as a man, &c. is termed *Denominatum*.

DENO'MINATOR of a fraction (*Arith.*) that part of a fraction which stands below the line of separation, and denominates or denotes the number of parts into which the integer is divided, as in $\frac{3}{10}$ 10 is the denominator.—*Denominator of any proportion* is the quotient arising from any division of such a ratio by its consequent.

DENOMINATUM (*Log.*) *vide Denominativum.*

DE non decimando (*Law*) a modus to be discharged of tithes.—*De non residentia*, *vide De.*—*De novo damus*, *vide De.*

DENS (*Anat.*) quasi edens, from *edo*, to eat, or from ὀδύς, ὀδοντος, a tooth, &c.

DENS caninus (*Bot.*) the *Panicum* of Linnæus.—*Dens canis*, the *Erythronium* of Linnæus.—*Dens Leonis*, the *Arnica crocea*; the *Apargia hispida*, *hirta*, et *cambialis*, &c.; the *Hyoseris fatida*, *radiata*, et *lucida*, and the *Hypocheris helvetica*.

DENSE (*Bot.*) *densus*; an epithet for a panicle having an abundance of flowers very close.

DENSHIRING (*Husband.*) the practice of cutting off the turf of land, and, when it is dry, laying it on heaps and burning it to ashes, which is so called from Devonshire, the place where this was first done.

DENSITAS (*Med.*) πυκνότης, from *densus*, thick. Denseness is sometimes opposed to *raritas*, thinness, and then signifies closeness, or compactness. *Hippoc.* l. 5, aph. 62.

DENSITY (*Phy.*) that property in bodies by which they contain a certain quantity of matter under a certain bulk or magnitude.

DENTAGRA (*Surg.*) ὀδοντάγρα, from ὀδύς, a tooth, and ἄγρα, a capture; a surgeon's instrument, or forceps for extracting teeth.

DENTA'LIS Lapis (*Med.*) the tartareous and tephaceous matter, which, being formed of a coagulation of vitreous particles, adheres to the teeth, and is consolidated into almost a stony hardness.

DENTALIUM (*Con.*) the Dog-like Tooth Shell, a genus of animals, Class *Vermes*, Order *Testacea*.

Generic Character. Animal a Terebella.—Shell univalve, tubular, and open at both ends.

Species. The principal species are the—*Dentalium entalis*, *imporforatum*, *glabrum*, &c.

DENTARIA (Bot.) from *dens*, a tooth, so called because its root is denticulated; Septfoil toothwort and Coralwort.

DENTARIA, in the Linnæan system, a genus of plants, Class 15 *Tetradynamia*, Order 2 *Siliquosa*, Natural Order of *Siliquosæ*.

Generic Character. CAL. perianth four-leaved.—COR. four-petalled.—STAM. filaments six; anthers cordate.—

—PIST. germ oblong; style very short; stigma obtuse.

—PER. siliqua long; seeds many.

Species. The species are perennials, as the—*Dentaria enneaphylla*, Nine-leaved Toothwort; *coralloides*, seu *ceratia*.—*Dentaria Bulbifera*, Bulbiferous Toothwort, or Coralwort.—*Dentaria pinnata*, Seven-leaved Toothwort.—*Dentaria pentaphylla*, Five-leaved Toothwort.

DENTARIA is also the *Lathrea squamaria* and *Tozzia alpina*.

DENTARIUS (Surg.) ἰδαντικός, a physician or surgeon who professes the art of drawing and curing the teeth. Gal. ad *Thrasyb.* c. 24.

DENTARPA'GA (Surg.) from ὀδύς, a tooth, and ἀπάξω, to fasten upon; an instrument for drawing teeth.

DENTATUS (Bot.) toothed, an epithet for a root; *radix dentata*, a root consisting of a concatenation of joints resembling a necklace; *dentatum folium*, a toothed leaf, having horizontal points, with a space between each.

DENTATUS (Med.) from *dens*, a tooth, the second vertebra of the neck; so called from its having a tooth-like process at its upper part.

DENTE'LLA (Bot.) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Character. CAL. perianth five-parted.—COR. one-petalled.—STAM. filaments five; anthers oblong.—PIST.

germ roundish; style cylindrical; stigmas two.—PER. capsule globular; seeds many.

Species. The single species is the—*Dentella repens*, native of Carolina.

DENTE'LLA'RIA (Bot.) from *dentella*, a little tooth; the herb Toothwort, the *Knoxia zelanica* and *Plumbago europæa* of Linnæus.

DENTES (Anat.) vide *Teeth*.—*Dentes sapientiæ*, a term applied to the two double teeth behind the rest; so called because they come when persons are arrived at years of maturity.

DENTICLE (Archit.) vide *Dentil*.

DENTICULA'TUS (Bot.) toothletted, i. e. having small teeth or notches; an epithet for a leaf, as in the *Hyperis*.

DENTIL (Archit.) *Denticulus*, which signifies literally a little tooth, is applied to a member of a cornice, square, and cut out at convenient distances, so as to give it the form of a set of teeth. Vitruv. l. 1, c. 2; Bald. Lex. Vitruv.

DENTIDUCUM (Med.) from *dens*, a tooth, and *duco*, to draw; an instrument for drawing of teeth.

DENTIFRICIUM (Med.) ἰδαντικός, dentrifice; a medicine for rubbing the teeth, and purging them from sordes.

DENTILLA'RIA (Bot.) from *denticula*, a little tooth; a name for the *Plumbago quorundam*, Leadwort.

DENTISCA'LPIUM (Surg.) ἰδαντόγλυφον, from *dens*, a tooth, and *scalpo*, to scrape; a surgeon's instrument for cleansing the teeth.

DENTI'TIO (Med.) ἰδαντοφυα, from *dentio*, to breed teeth, Dentition; the breeding of the teeth in children.

DEN'TO (Med.) from *dens*, a tooth; one whose teeth are raised and prominent to an extraordinary degree.

DENTODUCUM (Med.) vide *Dentiducum*.

DENU'DA'TÆ (Bot.) the seventh of Linnæus' Natural Orders, comprehending some genera of flowers that appear

at a different time from their leaves, and therefore have a naked appearance, as the *Colchicum*.

DENU'DA'TIO (Med.) γυμνώνω, from *denudo*, to make bare; a term applied to parts that are laid bare by the flesh being torn from them.

DEO'BSTRUENTIA (Med.) from *de* and *obstruo*, to obstruct; medicines that are exhibited with a view of removing any obstructions.

DE'ODAND (Law) i. e. *Deo dandum*; any thing forfeited to the king, to be applied to pious uses, and distributed in alms by his high almoner, is the forfeiture commonly levied on the personal chattel of any person that has been the immediate occasion of the death of any reasonable creature. *Fleta*, l. 1, c. 25; *Bract.* l. 3, c. 5; 1 *H. P. C.* 419; 3 *Inst.* 57.

DE onerando pro rata portione (Law) a writ which lies for one that is distrained for a rent that ought to be paid by others proportionably with him.

DEOPPILA'NTIA (Med.) from *de* and *oppilo*, to stop up; medicines which serve to open obstructions.

DEOXIDIZING rays (Chem.) rays of light which were supposed to deprive metals of their oxides.

DEPALA'TIO (Ant.) a term used by Vitruvius to express the increments or increases in the length of the day.

to DEPA'RT (Chem.) a particular operation, whereby the particles of silver are made to depart or separate from gold, when being before melted in the same mass they could be separated no other way.

DEPART (Law) vide *Departure*.

DEPARTERS (Chem.) artists who part and purify the precious metals from the coarser sort.

DEPARTURE (Law) or *depart from the plea*, is when a man pleads in bar of action, and reply being thereto made, he shows another matter, contrary to his first plea.—*Departure in spite of the court*, is when the defendant appears to the action brought against him, and makes a default afterwards.

DEPARTURE (Mar.) the easting or westing of a ship with respect to the meridian it departed or sailed from.

DEPARTURE of gold and silver (Metal.) the parting or dividing of those metals from others that are coarser.

DEPA'SCENS (Med.) νεωάδης, from *depassco*, to eat down; is an epithet for a putrid ulcer corroding and spreading itself over the adjacent parts. Gal. in *Hipp.* l. 6, aph. 45.

DEPE'NDENS (Bot.) from *dependo*, to hang from, dependent, hanging down, pointing towards the ground; an epithet for a leaf, and also applied to the sleep of plants, when the leaves which are erect in the day hang down in the night.

DEPERDI'TIO (Med.) ἀποθροά. [vide *Abortus*]

DEPE'RIR (Mil.) a French term applied to an army wasting away by disease, or any other accident.

DEPE'STA (Ant.) δέπαστρον, wine vessels which the Sabines in their sacrifices used to set upon the tables of their gods. *Varr. de Ling. Lat.* l. 4, c. 26; *Athen.* l. 11, c. 5; *Alex. Gen. Dier.* l. 3, c. 10; *Stuck. Antiq. Conviv.* l. 2, c. 27.

DEPETI'GO (Med.) from *de* and *petigo*, a running scab; a ring worm or tetter.

DEPHLEGMAT'IO (Med.) from *de* and *phlegma*, phlegm; the operation of rectifying or freeing spirits from their watery parts.

DEPHLEGMAT'ION (Chem.) the depriving any liquid of the superfluous water it may contain, which has the effect of concentration; in this manner sulphuric acid is dephlegmated by boiling, when, for a time, it loses nothing but water.

DEPHLOGI'STICATED air (Chem.) another name for Oxygen.

DEPILA'TIO (Med.) ψίλασι, a falling off, or defluxion of the hair.

DEPILATO'RIMUM (Med.) ψίλωθρον, from *de* and *pilus*, hair; a medicine which destroys the hair.

DEPILIS (*Med.*) ἄτρις, vide *Alopecia*.

DEPLOYMENT (*Mil.*) in French *deploiement*, the act of unfolding or expanding any given body of men so as to extend its front.

DEPLUMATIO (*Med.*) πτελοσι, from *de* and *pluma*, a feather; a disease of the eyelids, which causes the hair to fall off. *Act. Tetrab.* 2, serm. 3, c. 78.

DEPONENT (*Law*) one who gives information on oath before a magistrate.

DEPONENT *verb* (*Gram.*) a verb which has an active signification, but a passive termination. It is so called because *deponit* it, lays aside its passive participle future in *du*. *Isid. Orig.* 1. 1, c. 8.

DEPONTANI (*Ant.*) old men past threescore years of age, and no longer fit for public service. They were so called from the *pontes*, or narrow boards, over which the people passed into the *septa* or *ovilia*, when they went to give their votes; so that persons who were disqualified were said to be *de ponte dejecti*. *Fest. in Sexagenarios*. *Non.* 1. 12, c. 22; *Manut. de Leg.* c. 7; *Sigon. de Ant. Jur. Civ. Rom.* 1. 1, c. 17.

DEPOPULATO'RES agrorum (*Archæol.*) a term applied to great offenders, who, as it were, unpeopled, and laid waste the lands.

DEPORTATION (*Ant.*) a severe sort of banishment among the Romans, which consisted in sending the offender to a distant island, confiscating all his property, and depriving him of all his rank and dignity. It was distinguished from *Relegatio*, in which the estate of the exile was not touched. *Dio.* 1. 57; *Ulp.* 1. 1, § *deportatos. ff. de legat.* 3; *Rhodig. Ant. Lect.* 1. 27, c. 15; *Manut. de Leg.* c. 23.

DEPOSIT (*Com.*) any thing given by way of security, as the deposit-money on the purchase of a house.

DEPOSITION (*Law*) the testimony of a witness, who, on that account, is called the *deponent*, which is taken down, and, after being read over, and signed by him, is admitted as evidence. *Deposition* is also the information given on oath before a magistrate. *Deposition* is likewise taken in the sense of depriving of a dignity [vide *Degradation*]; and also for a man's death; *Dies depositionis*, the day of one's death.

DEPOT (*Mil.*) in French *depôt*, any particular place in which military stores are deposited; also a place of reception for recruits, or detached parties belonging to different regiments; and, in a fortification, a particular place at the tail of the trenches out of the reach of the canon where the besiegers assemble.

DEPOUILLE (*Mil.*) or *mettre en depouille*, French for stripping a cannon, when it has been cast, of its matting, clay, &c.

DEPREHENSIO (*Med.*) from *deprehendo*, to catch unawares; the epilepsy is so called from the suddenness with which persons are seized with it.

DEPRE'SSED *Gun* (*Gunn.*) any piece of ordnance having its mouth depressed below the horizontal line.

DEPRE'SSIO (*Med.*) ἰσπλασις, from *deprimo*, to press down, depression; when the bones of the skull are forced inwards by fracture, they are said to be depressed.

DEPRE'SSION (*Mil.*) the placing of a piece of ordnance so that its shot be thrown under the point blank line.

DEPRESSION of an Equation (*Algeb.*) the reducing an equation to lower degrees, as a biquadratic to a cubic equation, or a cubic to a quadratic; as if, in the equation $x^3 - 6x^2 + 11x - 6 = 0$, it be discovered that x is equal to 2, then $x - 2$ will be the divisor, with which, if the equation be divided, it is depressed to the quadratic $x^2 - 4x + 3 = 0$; the two roots of which are 1 and 3.

DEPRESSION of a star (*Astron.*) or of the Sun, &c. below the horizon, is the distance of a star from the horizon below, and is measured by an arc of the vertical circle or azimuth

passing through the star, intercepted between the star and the horizon.

DEPRESSION of the Pole (*Mar.*) is said of a person sailing or travelling from the Pole to the Equator, because so many degrees as he approaches nearer the Equator so many degrees will the Pole be nearer the Horizon.—*Depression of the visible Horizon*, or *dip of the Horizon*, its sinking or dipping below the true horizontal plane by the observer's eye being above the surface of the sea, as in the annexed figure; suppose the eye to be at E, then is AE the height above the surface of the earth whose centre is C, EA is the true horizon, Eh the visible horizon lower than the former by the angle H E h by reason of the elevation of the eye.

DEPRESSION of a planet (*Astrol.*) is when the planet is in a sign opposite to its exaltation.

- DERBIA (*Med.*) a name given by some surgeons to the *impetigo*.
- DERELICT (*Law*) *derelictus*, forsaken, or left; *derelict lands*, lands which the sea has suddenly left; *derelict goods*, as spirits and tobacco, which are liable to duties as if legally imported; *derelict ships*, vessels forsaken at sea.
- DERIVATIO (*Med.*) *παροχέτισις*, from *derivo*, to draw from; is when a humour, which cannot be conveniently evacuated at the part affected, is attracted thence and discharged at some more proper place in its vicinity.
- DERIVATIVE (*Gram.*) any word which takes its origin from another called the *primitive*, as manhood, deity, &c. The word derivative is also an example, being derived from the Latin *rivus*, a channel or source.
- DERIVE (*Mar.*) French for the driving of a ship.
- DERMA (*Med.*) *δερμα*, the skin.
- DERMATODES (*Med.*) *δερματοδεις*, from *δερμα*, skin, and *ειδος*, likeness, resembling skin or leather; an epithet applied to the *dura mater*.
- DERMATOLOGIA (*Med.*) from *δερμα*, the skin, and *λογος*, a discourse; a treatise on the skin.
- DERMESTES (*Ent.*) the Leather Eater, a genus of Insects of the Hemipterous Order.
Generic Character. *Antennæ* clavate, the club perfoliate.—*Thorax* convex.—*Head* inflected and hid under the *Thorax*.
Species. Insects of this tribe are distinguished into those which have jaws bifid, and those which have the jaw one-toothed, called by Fabricius *apate*. The *larva*, or grubs, of this tribe, devour dead bodies, skins, leather, and almost any animal substance, being exceedingly destructive in museums and libraries. They are of a lengthened oval shape, with more or less hair on the body. The most familiar species are the *Dermestes lardarius* and *pellis*.
- DEROUTE (*Mil.*) French for the total overthrow of an army.
- DERRICK (*Mech.*) a contrivance to serve the temporary purpose of a crane for hoisting up goods.—*Derrick*, in French *martinet d'artimon*, a tackle used at the outer quarter of a mizen-yard, consisting of a double and single block.
- DERRIS (*Ent.*) a genus of worms of the Order *Mollusca*, having a cylindrical body, a terminal mouth, and two feelers: it inhabits the coast of Pembroke-shire.
- DERSE (*Med.*) an occult fume or vapour of the earth, from whence all ligneous substances have their rise and growth. *Paracel. Philos. ad Athenian.* l. 3, text. 4.
- DERTRON (*Med.*) *δερτρον*, from *δερμα*, the skin; the omentum, or peritonæum, so named from its skinlike consistence.
- DERVISE (*Theol.*) an order of religious persons among the Turks who practise great austerities on themselves.
- DESARMER (*Gun.*) a French term which signifies literally to disarm, but when applied to a piece of ordnance it imports to draw the charge out, or altogether to dismount it.
- DESCANT (*Mus.*) a term used by old musical writers to denote the art of composing in several parts. It is plain, figurative, and double.—*Plain descant* is the groundwork of a musical composition which consists in the orderly placing of many concords.—*Figurative*, or *florid descant*, is that wherein discords as well as concords are concerned.—*Double descant* is when the parts are so contrived that the treble may be made the bass, and, on the contrary, the bass the treble.
- TO DESCANT (*Mus.*) is to run a division, or variety, with the voice upon a musical ground in true measure, and metaphorically signifies to paraphrase ingeniously upon any subject.
- DESCENDENS (*Bot.*) vide *Descending*.
- DESCENDER, writ of *Formedon in (Law)* a writ which lieth where a gift in tail is made, and the tenant in tail alienes the land entailed and dies; then the heir in tail shall have this writ against him who is then the actual tenant of the freehold. *F. N. B.* 211, &c.
- DESCENDING (*Astron.*) an epithet opposed to ascending, as descending degrees, signs, stars, &c.—*Descending node* is that where the planet descends from the north to the south side of the Equator.—*Descending latitude* is the latitude of a planet in its return from the nodes to the Equator.
- DESCENDING (*Bot.*) *descendens*; an epithet for the *caudex*, or that part of a plant which goes down into the earth: *caudex descendens* is the same as the root.
- DESCENDRE (*Mil.*) a French term for, to quit on being relieved, as *descendre la garde*, to come off guard; *descendre la tranchée*, to quit the trench.
- DESCENSIO (*Med.*) *κατάβασις*, from *descendo*, to move downwards, is properly spoken of the moderate or gentle motion of the body or humour downwards.
- DESCENSION (*Chem.*) is the falling downwards of the essential juice, dissolved from the distilled matter.
- DESCENSION (*Astron.*) an arc of the equator which descends or sets with any sign or point in the zodiac. It is either right or oblique, according as it takes place in a right or oblique sphere.—*Right descension* is the arc of the equator which descends with a point of the zodiac in a right sphere.—*Oblique descension* is an arc of the equator which descends with a point of the zodiac in an oblique sphere.—*Refraction of Descension*, vide *Refraction*.
- DESCENSIONAL Difference (*Astron.*) the difference between the right and oblique descension of a star, or any point in the heavens.
- DESCENSORIUM (*Chem.*) from *descendo*, to move downwards; a vessel in which the distillation *by descent* is performed.
- DESCENSUS (*Chem.*) Distillation is said to be *per descensum*, by descent, when the fire is applied at the top and round the vessel whose orifice is at the bottom, whereby the vapours are caused to distil downwards.
- DESCENT (*Chem.*) vide *Descensus*.
- DESCENT (*Phy.*) is the tendency of heavy bodies towards the earth.
- DESCENT into a moat, &c. (*Fort.*) is a digging deep into the earth.—*Descents* are the holes and hollows made by undermining the ground.
- DESCENT (*Mil.*) or to make a descent upon a country, is to land on it with a hostile force, for the purpose of invasion.
- DESCENT (*Her.*) a term in blazonry used to signify coming down. "A lion *in descent*" is a lion coming down, i. e. with his heels up towards one of the points, as though he were leaping down from some high place.
- DESCENT (*Law*) *Descensus*, hereditary succession; the title whereby a man, at the death of his ancestor, obtains his freehold by right of representation as his heir at law. Descent is of two kinds, lineal and collateral.—*Lineal Descent* is that which is conveyed down in a right line from the grandfather to the father, and from the father to the son.—*Collateral Descent* is that which springs out of the side of the line, or blood, as from a man to his brother, nephew, &c. [vide *Law*]
- DESCENTS (*Fort.*) vide *Descent*.
- DESCRIBENT (*Geom.*) a line, or superficies, by the motion of which a superficies, or solid, is described. [vide *Dirigent*]
- DESCRIPTION (*Log.*) an imperfect kind of definition, which includes some accidents, or circumstances, peculiar to it, so as to distinguish it from others, generally without defining its nature precisely.
- DESCRIPTION (*Law*) in deeds and grants of lands must con-

tain an exact account of the lands, the place where they lie, and of the persons to whom they are granted.

DESCUREA (*Bot.*) another name for the *Sisymbrium*.

DESEMPARER *un camp* (*Mil.*) French, to break up the camp, to strike the tents.

DESENCLOUER (*Mil.*) French for to take the nail out of a gun that has been spiked, or out of a horse's foot, &c.

DESEKTER (*Mil.*) one that runs away from his colours, or goes over to the enemy.

DESHA'CHE (*Hor.*) a term in French blazonry for a beast that has his limbs separated from his body.

DESICCA'TIO (*Med.*) from *desicco*, to dry up, ξηρανσις, drying; a term used by the chemists formerly in the sense of calcination.

DESICCATIVES (*Med.*) drying medicines.

DESICCATIVUM (*Med.*) an epithet for an ointment, or plaister, for drying up thin humours flowing from an ulcer.

DESIDERATUM (*Lit.*) from *desidero*, to desire, or want, is used for whatever is an object of particular desire, or want; in this sense a book is denominated a desideratum, if it be of a nature to fill up a chasm in literature, or to supply the wants of any number of readers.

DESIGN (*Paint.*) the first draught or sketch of any picture, which serves to give the general idea which the artist has formed in his mind of his subject; in a particular sense, the drawing of a building to be executed; comprehending the invention and disposition of the whole. The design of a building consists of three parts; namely, the *plan*, or ground-plan, which shows the distribution of the parts; the *elevation*, which shows the exterior; and the *section*, which exhibits the interior.

DESIGNATOR (*Ant.*) an officer who assigned seats to the spectators at the games called by the Greeks ἐπιδείκται. *Plaut. Poen. Prol. v. 19.*

*Neu designator, prater os obomulet
Neu sessum ducat, dum histrio in scenâ siet.*

He also marshalled the order of funeral processions, and had lictors assigned to him.

Hor. l. 1, epist. 7, v. 6.

— cum ficus primus calorque
Designatorem decorat lictoribus atris.

There were also *designatores decumæ* in the provinces. *Senec. de Benefic. l. 6, c. 38; Dio. l. 56; Quintil. Declam. 6; Donat. Adelp. act. 1, scen. 1, v. 7; Tertull. de Spectac. c. 10; Panciroll. de Magistrat. Municip. c. 25; Ursat. de Not. Roman. apud Græc. Thes. Ant. Rom. tom. 11, p. 670.*

DESIPIENTIA (*Med.*) παραφροσύνη, from *desipio*, to dote; a defect of reason, a symptomatic phrenzy.

DESME (*Med.*) δεσμη, from *deia*, to bind; a bandage, or ligature.

DESMIDION (*Surg.*) δεσμίδιον, from *δεσμη*, a handful; a small bundle, or little bandage.

DESMOS (*Surg.*) δεσμός, is an affection of the joints after luxation in manner of a tie, or ligature. *Hippoc. Lib. de Fract.*

DE son tort demesne (*Law*) vide *De injuriâ sua propriâ*.

DESPERATE (*Med.*) ἀεὶληπις, is an epithet applied to incurable diseases.

DESPOTISM (*Polit.*) from the Greek δεσπότης, a lord, or master; a form of government where the monarch rules by his sole and sovereign authority.

DESPUMATION (*Chem.*) from *despumo*, to clarify; is the clarification of a liquor by elevating its impurities in a spume or froth, and then taking them off.

DESEQUAMATION (*Surg.*) from *de*, privative, and *squama*, the scale of a fish, generally means the same as *Abrasio*.

DESEQUAMATORIUM (*Surg.*) from *desquamo*, to scale off; an epithet for a trepan.

DESUDA'TIO (*Med.*) εφιδρωσις, from *desudo*, to sweat down; an unnatural and morbid sweating.

DESULTORII (*Ant.*) or *Desultores*; persons of great agility, who used to leap from one horse to another at the Circensian games. *Liv. l. 23, c. 29; Hygin. Fab. 80; Artemidor. l. 1, c. 58; Cassiodor. l. 3, c. 51; Veget. l. 1, c. 18.*

TO DETA'CH (*Mil.*) to send a party of soldiers upon any particular expedition.

DETA'CHED pieces (*Fort.*) are demi-lunes, hornworks, or crownworks, and even bastions, when separated from the body of the place.

DETACHIA'RE (*Law*) to seize, or take into custody a man's goods, or person.

DETA'CHMENT (*Mil.*) a certain number of men, drawn out from several regiments, or companies, for particular employments, or expeditions.

DETAINDER (*Law*) a writ for holding any one in custody.

DETA'INER (*Law*) is commonly coupled with *forcible Entry*, as *Forcible Entry and Detainer*, signifying violently taking and keeping possession of lands and tenements; but a *Detainer* may be forcible whether the entry were forcible or not; as when a tenant keeps possession of the land at the end of his term against the landlord, it is a forcible detainer. *Co. Lit. 256, &c.; 1 Hawk. P. C. c. 64.*

DETE'NTIO (*Med.*) from *detineo*, to stop, or hinder; a name for the epilepsy, from the suddenness with which it seizes the patient.

DE'TENTS (*Hor.*) are those stops which, being lifted up, or let fall down, do lock or unlock a clock in striking.

DETE'NT-WHEEL (*Hor.*) called also the *hoop-wheel*, which has a hoop all around it, except in one part, where the clock locks.

DETERGENTS (*Med.*) ῥιπτων, deterring, from *detergeo*, to wipe off; medicines which cleanse and remove such viscid humours as adhere to and obstruct the vessels.

DETERMINATE (*Math.*) an epithet for a number, and a problem. A *determinate Number* is that which is referred to a given unity, as three, in distinction from the indeterminate, which refers to some imaginary or variable unity, called *Quantity*.—A *determinate Problem*, a problem that has but one solution, or limited number of solutions, in distinction from indeterminate problems, which admit of infinite solutions.

DETERMINATION (*Phy.*) the disposition or tendency of a body towards one way; also the action by which the cause is restrained to act, or not to act, in this or that manner.

DETERMINED problem (*Geom.*) a problem which has either but one, or but one certain number of solutions.

DETERRA'TION (*Phy.*) the removal of sand, earth, &c. from higher grounds to lower.

DETERSORIUM (*Ant.*) an apartment at the baths, where the sweat was deterged and the body anointed.

DETERSORIUS (*Med.*) ῥιπτικός, detersive; a common epithet of medicines endued with a cleansing quality, whether inward or outward.

DE'TINET (*Law*) i. e. he detains; a writ which lies where a man owes an annuity to another, and refuses it; or, in general, where he withholds from another what is due. *F. N. B. 119.*

DE'TINUE (*Law*) a writ which lies against him who refuses to deliver goods or chattels which are delivered him to keep. *1 Inst. 295.*

DETONATION (*Chem.*) from *detono*, to make a noise; that noise and explosion which some substances make on the application of fire or heat.

DETRACTA'RI (*Archæol.*) to be torn in pieces by horses. *Flet. l. 1, c. 37.*

DETRA'CTIO (*Med.*) vide *Catharsis*.

DETRA'CTOR (*Med.*) from *detraho*, to draw down; an epithet for a muscle whose office it is to draw down the part to which it is attached.

- DETRAHENS QUADRATUS** (*Anat.*) vide *Platysma Myoides*.
- DETRANCHÉD** (*Her.*) an epithet in blazonry for a line that falls bend-wis.
- DETRIMENT** (*Astrol.*) the greatest of the essential debilities of a planet, i. e. the sign directly opposite to that which is its house; as the detriment of the Sun in Aquarius, because it is opposite to Leo.
- DETRIMENT** (*Her.*) a term applied to the moon in her eclipse.
- DETRIMENTS** (*Cus.*) a term used at the Universities and the Inns of Court, for the charge made to each member to defray loss and damage.
- DETRIPLER** (*Mil.*) French for, to take some files out of a battalion, troop, or company, when the men are drawn up three deep.
- DETRITIO** (*Med.*) vide *Rhacosis*.
- DETRUSOR** (*Anat.*) from *detrudo*, to thrust out; the name of a muscle belonging to the bladder, which serves to discharge the urine.
- DEVADIATUS** (*Law*) an epithet for an offender without sureties or pledges.
- DEVANÇER une armée** (*Mil.*) French for, to get an advantageous position in front of an army by means of a forced march.
- DEVASTAVIT** (*Law*) or *Devastaverunt bona Testa*, a writ lying against an executor or executors for paying legacies and debts, without speciality, before the debt upon the said specialities be due.
- DEUCE** (*Sport.*) in French *deux*, the number two at cards or dice.
- DEVELOPPE'E** (*Geom.*) French for, a curve formed by the opening or unfolding of another curve.
- DEVENERUNT** (*Law*) a writ to the King's escheator on the death of any one of the King's tenants holding *in capite*, commanding him to enquire what lands or tenements came to the King by his death.
- DEVEST** (*Law*) vide *Divest*.
- DEVIATION** (*Astron.*) a term in the ancient astronomy for a motion of the deferent either towards or from the ecliptic.—*Deviation of a falling Body*, that deviation from the perpendicular which falling bodies experience in their descent; in consequence of the rotation of the earth on its axis.
- DEVISE** (*Paint.*) a representation of some object with a motto serving as an emblem of some virtue or good quality in a person or thing.
- DÉVIL IN A BUSH** (*Bot.*) another name for the *Nigelia*.
- DEVIL'S-BIT** (*Bot.*) an epithet for the *Scabiosa præmorsa*, because it has its root pre-morse, i. e. bitten off as it were at the end.—Devil's-Guts, the *Cuscuta epithimum* of Linnaeus.
- DEVISE** (*Law*) a gift of lands, &c. by a last will and testament. The giver is called the *Devisor*, and the person to whom it is given the *Devisee*.
- DEVISE'E** (*Law*) he to whom the devise or bequest is made.
- DEVISOR** (*Law*) he who makes the devise.
- DEVUNX** (*Ant.*) a weight of eleven ounces, or eleven-twelfths of a pound, or of any entire quantity.
- DEVOIRES of Calais** (*Law*) the customs due to the King for merchandise brought to or carried out from Calais when our staple was there. *Stat. 34 Ed. 1, c. 18; 2 Rich. 2, st. 1, c. 3.*
- DEVOURING** (*Her.*) vide *Vorant*.
- DEUS** (*Ant.*) θεός, the name among the Greeks and Romans for their deities, to whom they paid divine honours. These were divided generally into—*Dii Majorum gentium*, or *Dii Magni*, which are enumerated in these lines of Ennius:

Juno, Vesta, Minerva, Ceres, Diana, Venus, Mars, Mercurius, Jovis, Neptunus, Vulcanus, Apollo.

—*Dii Minorum gentium*, which were otherwise called *Dii Breves*, included all the rest except the—*Selecti Dii*, which were in number eight, and were added to the *Dii Magni*, these were Sol, Luna, Tellus, Genius, Janus, Saturnus, Liber, Pluto. These gods were moreover distinguished by different appellations, as—*Dii Ascriptitii*, those who were, παρεγγραμμένοι, enrolled among the number of the gods, and were of course among the number of the inferior deities.—*Dii averrunci*, among the Greeks ἀλιζήκαιοι, ἀτροπαιοι, those who were supposed able to avert evils.—*Dii caelestes*, another name for the *Dii Magni*.—*Dii communes*, the gods who were worshipped in common by several nations.—*Dii consentes* were *Dii Magni*, the superior gods, so called because they composed the grand assembly of the gods. When mentioned in inscriptions the name of Jupiter is placed before all, as

I.O.M.

CETERISQ

DIS·CONSENTIBUS.

—*Dii geniales*, namely, water, earth, fire, and air, which were the elements of all things.—*Dii genitales*, an epithet applied to the *Dii Magni*, as is supposed, because they were looked upon as the authors of all things.—*Dii ignoti*, θεοὶ ἄγνωστοι, the unknown gods, had altars erected to them both by the Greeks and Romans.—*Dii littorales*, the gods who were worshipped on the sea-shore, as Glauco, Panopea, &c.—*Dii Marini*, θαλάσσιοι θεοὶ, marine gods, were very numerous, of which Neptunus, Nereus, and Oceanus, were the principal.—*Dii natalitii*, the gods who presided at births, of which Jupiter and Juno were the principal.—*Dii nuptiales*, the gods who presided at marriages, as Jupiter, Juno, Venus, Suada or Suadela, and Diana or Lucina.—*Dii patrii*, πατρίοι θεοὶ, gods of one's own country, i. e. such gods as are honoured particularly in one's own country.—*Dii Penates*, ἐπίεστοι θεοὶ household gods, or such as were worshipped at home.—*Dii privati*, those which were worshipped by particular families or communities.—*Dii publici* were those gods which were worshipped in the public temples.—*Dii regales*, θεοὶ βασιλικοί, those who were the special guardians of kings.—*Dii rustici*, or *rusticani*, rustic deities, those who presided over the fields, as Pan, Silenus, the Satyrs, Fauns, Nymphs, and Dryads.—*Dii terminales*, were those who marked the boundaries of fields, and were known by the *lapides termini*, or boundary stones, which were made to represent a certain image.—*Dii viales*, those deities which presided over the highways, as Mercury, Apollo, Bacchus, Hercules, Ceres, Diana, Priapus, Vius, and Fortuna.—*Dii urbani*, another name for the *Dii consentes*, so called because they had their temples and altars in the city. *Cato. de Re Rust. c. 140; Varr. de Ling. Lat. l. 6, c. 5; de Re Rust. l. 1, c. 1; Liv. l. 5, c. 52; Vitruv. l. 1, c. 2; Manil. Astron. Poet. l. 2, v. 433, &c.; Catull. l. 4, Carm. 22; Hygin. Fab.; Plin. l. 33, c. 7; Plut. Alex. Justin. l. 11, c. 15; Tertull. Apolog. c. 13, &c.; Serv. in Aeneid.; Macrob. Sat.; Gyrard. Syntag. Deor.; Turneb. Adv. l. 5.*

DEUTERIA (*Husb.*) δευτερία, from δεύτερος, second; a poor kind of wine which the Latins call *lora*.

DEUTERION (*Med.*) τὸ δεύτεριον, τὰ δεύτερα, from δεύτερος, secundus; the secundines.

DEUTEROGAMY (*Law*) δευτερογαμία, from δεύτερος, the second, and γαμή, marriage; a second marriage.

DEUTERONOMY (*Bibl.*) δευτερονομος, from δεύτερος, the second, and νομος, law; the fourth book of Moses, so called by the Greeks because the law is repeated in it.

DEUTEROPATHIA (*Med.*) δευτεροπάθεια, from δεύτερος, the second, and παθος, an affection; an affection which proceeds from another disease.

DEUTEROPOTMI (*Ant.*) δευτεροπότμοι, those who being thought dead unexpectedly recovered after the celebration of their funeral rites; or who returned safe home after a

long absence in foreign countries where they were believed to have died. It was unlawful for such persons to enter the temple of the Eumenides until they were purified by passing through the lap of a woman's gown that they might seem to be born again.

DEUTZIA (*Bot.*) a genus of plants, Class 10 *Decandria*, Order 3 *Trigynia*.

Generic Characters. CAL. *perianth* one-leaved.—COR. *petals* five.—STAM. *filaments* ten; *anthers* globular.—PIST. *germ* superior; *styles* three; *stigmas* simple.—PER. *capsule* globular; *seeds* several in each cell.

Species. The single species is a tree, as the *Deutzia scabra*, native of Japan.

DEVINDER (*Man.*) French for, the movement of a horse who works upon volts, making his shoulders go too fast for the croupe to follow easily.

DEW (*Nat.*) the moisture which, being exhaled from the earth by means of the sun, and in the form of a vapour, falls down again upon the earth in drops.

Dew of vitriol (*Chem.*) a phlegm or water drawn from that mineral salt.

DEW-BERRY (*Bot.*) the *Rubus cæsius* of Linnæus.

DEW-CLAWS (*Sport.*) the bones or little nails behind a deer's foot.

DEW-LAP (*Zool.*) that part which hangs down under the throat of an ox or cow.

DEW-WORM (*Ent.*) the *Lumbricus terrestris* of Linnæus, a sort of worm which inhabits the earth and decayed wood, feeds on the cotyledons of plants, and is the food of moles, &c.

DEWAN (*Polit.*) a receiver-general and governor of a province in the dominions of the Grand Mogul.

DEWS (*Sport.*) vide *Deuce*.

DEXTANS (*Ant.*) the weight of ten ounces Troy, or tentwelfths of an integer. *Varr. de Lat. Lin.* 1. 5.

DEXTER aspect (*Astrol.*) an aspect which is contrary to the natural order and succession of the signs.

DEXTER epiploic vein (*Anat.*) the second branch of the splenic vein that passes to the caul or epiploon.

DEXTER point (*Her.*) signifies the right-hand side of the escutcheon; whence—*Dexter-Base*, the right side of the base, represented by the letter G.—*Dexter-Chief*, the angle on the right-hand side of the chief, represented by the letter A. [vide *Escutcheon*]

Dexter is also an epithet for any thing on the right-hand side, as "a dexter hand," or "a dexter wing;" and likewise for the male side in an impaled coat of arms.

DEXTRÆ (*Ant.*) the name given to those flutes which the Romans played upon with their right hand, in distinction from those which they played with their left, called the *sinistræ*.

DEXTRA'RIOUS (*Archæol.*) one at the right hand of another. Sometimes this word is used for the light horse.

DEY (*Polit.*) the title of the supreme governor in Tunis, Algiers, and the other states of Barbary.

DIA (*Gram.*) a Greek preposition, signifying *of, by, through, with*, which is often joined to the names of physical compositions, as *Diascordium*, &c.

DIABACANU (*Med.*) *διὰ βακάνου*; an hepatic remedy. *Tral-lian.* 1. 8, c. 2.

DIABATHRA (*Ant.*) a kind of shoes used in Greece. *Fest. de Verb. Signif.*

DIA'BEBOS (*Med.*) *διὰ βεβώε*, an epithet for the *Malleoli*, or ancle bones, not kept asunder but closed together, speaking of a mechanical operation for reducing a gibbosity. *Hippocrat. de Art.*

DIABESA'SA (*Med.*) from *δια* and *βησσα*, Wild Rue; the name of a preparation in which rue forms a part.

DIABETES (*Med.*) from *διαββαίνω*, to pass off; an excessive discharge of crude urine, exceeding the quantity of liquid

drank. In the system of Cullen it is a genus of diseases, Class *Neuroses*, Order *Spasmi*.

DIABOLUS METALLORUM (*Min.*) Tin.

DIABOTANON (*Med.*) *διὰ βοτάνων*, from *βοτάνη*, a herb; a plaister prepared of herbs. *Gal. de Com. Med.* P. G. 1. 6, c. 2.

DIABRO'SIS (*Med.*) *διὰ βρωσις*, vide *Anabrosis*.

DIACADMIAS (*Med.*) *διὰ καδμίας*, from *δια* and *καδμία*, Cadmia, the name of a plaister whose basis is cadmia.

DIACALAMINTHES (*Med.*) *διὰ καλαμίνθης*, from *δια* and *καλαμίνθη*, Calamint; the name of an antidote whose basis is calamint.

DIACARCINON (*Med.*) *διὰ καρκινών*, from *καρκίνος*, a crab or cray-fish; the name of an antidote prepared of those fish, as an antidote against the bite of a mad dog.

DIACARYON (*Med.*) *διὰ κάρυων*, from *κάρυον*, a walnut; a rob made of walnuts.

DIACA'SSIA (*Bot.*) vide *Cassia*.

DIACASTORIUM (*Med.*) from *δια* and *κάστωρ*, castor; an antidote whose basis is castor.

DIACATHOLICON (*Med.*) from *δια* and *καθολικός*, universal; an epithet for a universal purge.

DIACAUSTIC curve (*Math.*) a kind of caustic curve generated by the refraction of rays in a particular direction, so as to form a given ratio with other lines meeting them; thus, suppose an infinite number of

rays, B A, B M, B D, &c. issuing from the same luminous point B refracted to or from the perpendicular M C by the given curve A M D, so that C E, the sines of the angles of incidence C M E, be always in a given ratio to C G,

the sines of the refracted angles C M G; then the curve H F N, that touches all the refracted rays A H, M F, D N, &c. is called the *diacaustic*.

DIACELTATE'SSON (*Med.*) a term in Paracelsus relating to the cure of fevers. *Parac. de vita long.* 1. 2, c. 5.

DIA'CENOS (*Med.*) *διὰ κενός*, from *δια* and *κενός*, empty, void; an epithet for porous bodies, such as sponge or pumice-stone.

DIACENTAURIUM (*Med.*) from *δια* and *κενταυρίον*, centaur; the Duke of Portland's powder is so called because its chief ingredient is centaur.

DIACENTE'TON (*Med.*) from *δια* and *κεντήω*, to prick; the name of a stimulating collyrium. *Act. Tetrab.* 2, serm. 4, c. 110.

DIACERATON (*Med.*) from *δια* and *κέρας*, a collyrium in which hartshorn is the principal ingredient. *Cels.* 1. 6, c. 6.

DIACHALASIS (*Med.*) *διαχάλασις*, from *διαχάλαω*, to relax; a relaxation of the suture of the cranium.

DIACHALCITIS (*Med.*) from *δια* and *χαλκίτις*, *chalcitis*; a plaister whose chief ingredient is *chalcitis*.

DIACHEIRISMOS (*Med.*) *διαχειρισμός*, from *δια* and *χειρ*, the hand; any manual operation.

DIACHELIDONIUM (*Med.*) *διαχελιδόνιον*, from *χελιδών*, a swallow; a preparation of swallows.

DIACHORE'MA (*Med.*) *διαχώρημα*, any excretion or excrement, but chiefly that by stool.

DIACHRISTA (*Med.*) *διάχριστα*, from *χρίω*, to anoint; are medicines applied to the fauces, uvula, palate, and tongue for the absterion of phlegm. *P. Agmeta.* 1. 1, c. 46.

DIACHRY'SU (*Med.*) *δια χρυσῆ*, from *χρυσός*, gold; the name of a plaister for fractures. *Gal. de Dynamid.*

DIA'CHYLON (*Med.*) *διάχυλων*, from *χυλός*, a juice; is an emollient digestive plaister composed of juices. *Gal. de Com. Med. per Gen.* 1. 7, c. 9.

DIA'CHYSIS (*Med.*) *διάχυσις*, from *χύνω*, to fuse or melt; liquefaction or fusion.

DIA'CHYTOÏS (*Med.*) δίαχυτος, an epithet for wine prepared of grapes dried seven days in the sun. *Plin.* l. 14, c. 9.

DIACINE'MA (*Med.*) διακίνημα, from διακινέω, to move or agitate in a slight manner; a slight dislocation. *Galen. de Fract.*

DIACLY'SMA (*Med.*) διάκλυσμα, from κλύζω, to wash out or rinse; a collution of the mouth, held therein for a time, and then discharged.

DIACOCYME'LO'N (*Med.*) διακοκυμήλων, from δια and κοκυμήλων, a plum; an electuary made of prunes.

DIACO'CHLACON (*Med.*) διακοχλάκων, from δια and κόχλακες, flints; an epithet for milk in which red hot flints have been extinguished.

DIACODIUM (*Med.*) from δια and κόδεια, a poppy head; a composition made of the heads of poppies.

DIACOLOCY'NTHIDON (*Med.*) δια κολοκυνθίδων, from δια and κολοκυνθίς, colocynth; a remedy, of which colocynth is a principal ingredient.

DIACOMERON (*Med.*) the name of an antidote. *Myrep. de Antid.* c. 39.

DIA'CONUS (*Ecc.*) vide *Deacon*.

DIA'COPE (*Med.*) διακοπή, from κόπτω, to cut; signifies a deep cut or wound. *Hippocrat.* l. 7, aph. 24.

DIACOPRÆ'GIA (*Med.*) διακοπριγία, from δια, κόπρος, dung, and αἴζ, a goat; a remedy prepared of goat's dung against disorders of the spleen.

DIA'CO'PUS (*Ant.*) a breach in the bank of a river.

DIACOU'STICS (*Nat.*) or *Diaphonics*, the science which teaches the property of refracted sound as it passes through different mediums.

DIA'CRISIS (*Med.*) διάκρισις, from διακρίνω, to distinguish; the distinguishing diseases one from another by their symptoms.

DIACROC'CIUM (*Med.*) from δια and κρόκος, saffron; a collyrium containing saffron.

DIACRO'CU (*Med.*) δια κρόκος, from κρόκος, saffron; the name of a dry Collyrium, whose basis is saffron. *P. Egin.* l. 7, c. 16.

DIACRO'MMYON (*Med.*) from κρόμμυον, an onion; a medicine made with onions.

DIACURCUMA (*Med.*) from δια and κυρκούμα, turmeric; an antidote in which turmeric or saffron is a principal ingredient.

DIACYDO'NIUM (*Med.*) δια κυδωνίων (αήλων), from κυδωνιον (μήλον), a quince; a remedy prepared of the juice of quinces.

DIADA'PHNIDON (*Med.*) δια δαφνιδων, from δαφνίς, the bay-tree, or bay-berry; the name of a drawing plaster prepared of bay-berries and other ingredients. *Celsus.* l. 5, c. 19.

DIADELPHIA (*Bot.*) from δια, twice, and ἀδελφος, a brother, twin brotherhood; the name of the seventeenth class in Linnæus' artificial system, comprehending those plants which bear hermaphrodite flowers with two sets of united stamens. This is a natural class with papilionaceous flowers and leguminous fruits, answering nearly to the *Leguminosæ* of Ray, and the *Papilionacei* of Tournefort. The orders are founded on the number of stamens, and ten being the predominating number in this class, the order *Decandria* is much the largest. [vide Plate 28]

The following are the principal genera, namely—*Hexandria*, as *Fumaria*, fumatory, &c.—*Octandria*, *Polygalia*, Milkwort, &c.—*Decandria*, *Amorpha*, Bastard Indigo; *Erythrina*, Coral-tree; *Spartium*, Broom; *Genista*, Broom; *Lupinus*, Lupin; *Anthyllis*, Kidney Vetch; *Piscidia*, Jamaica Dogwood; *Ulex*, Furze Whins, or Gorse; *Arachis*, Earth-nut; *Ononis*, Rest Harrow; *Colutea*, Bladder Senna; *Phaseolus*, Kidney Vetch; *Lathyrus*, Everlasting Pea; *Vicia*, Vetch, or Tares; *Astragalus*, Milk Vetch; *Phaca*, Bastard Vetch; *Trifolium*, Trefoil; *Clycyrrhiza*, Liquorice; *Hedysarum*, Sainfoin; *Ornitho-*

pus, Bird's Foot; *Scorpiurus*, Caterpillar; *Hippocrepis*, Horseshoe Vetch; *Trigonella*, Fenugreek; *Robinia*, Acacia; *Indigofera*, Indigo; *Cicer*, Chick Pea; *Ericum*, Lentil; *Galega*, Goats' Rue; *Lotus*, Bird's Foot Trefoil; *Medicago*, Medick.

DIADELPHOUS STAMENS (*Bot.*) *stamina diadelfia*; stamens forming two brotherhoods, as in the Class *Diadelphia*.

DIADEMA (*Med.*) διάδημα, from δέω, to bind; in the strict sense signifies a bandage for the head.

DIADEMA (*Polit.*) from διαδέω, to bind round; was a fillet wherewith kings anciently encircled their foreheads, whence it became the emblem of dignity. *Tac. Annal.* l. 42, c. 6; 43, c. 2, &c.; *Plut. in Crass.*; *Curopalat. de Off. Aul. Constantinop.*

DIADEXIS (*Med.*) διάδεξις, from διαδέχομαι, to succeed; a transposition of humours from one place to another.

DIADOCOS (*Min.*) a stone like a beryl. *Plin.* l. 34, c. 10.

DIA'DOSIS (*Med.*) διάδοσις, from διαδίδωμι, to distribute; the distribution of the aliment over all the body.

DIADROME (*Mech.*) διάδρομη; the vibration or swing of a pendulum.

DIÆRESIS (*Med.*) διαίρεσις, from διαίρω, to divide or separate; a division or separation of the vessels.

DIÆRESIS (*Surg.*) the dividing or separating of those parts which by their union hinder the cure of wounds, as of the continuity of the skin in impostumes.

DIÆRESIS (*Rhet.*) the partition of the subjects to be treated of.

DIÆRESIS (*Gram.*) a figure by which one syllable is divided into two, which is usually noted by two points, as *evoluisse* for *evoluisse*.

DIÆRETICA (*Med.*) from διαίρω, to divide; corrosive medicines.

DIÆTA (*Med.*) διαίτα, διαίτη, from διαίττω, to nourish; a way and method of living, comprehending what we call diet.

DIETARI'I (*Ant.*) slaves who attended at meals. *Ulp.* l. 2, ff. nautæ.—*Dietarii Fures*, thieves who watched their opportunity of going into dining-rooms to steal things.

DIÆTETICS (*Med.*) from *diæta*; that part of the science of medicine which prescribes a due regimen with regard to the use of the Non-naturals.

DIAGLAUCION (*Bot.*) διάγλαυκιον, from δια and γλαυκιον; the blue juice of a herb; an eye-water made of the purging thistle.

DIAGLYPHICA (*Sculp.*) διαγλυφικη; the art of cutting or making hollow figures in metals.

DIAGNOSIS (*Med.*) διάγνωσις, from διαγιγνώσκω, to discern; the science which teaches the signs by which a disease may be distinguished from another.

DIAGNOSIS (*Bot.*) the discrimination of plants by their external characters.

DIAGNOSTIC SIGNS (*Med.*) the signs by which diseases are distinguished from each other.

DIAGNOSTIC SIGNS (*Bot.*) the signs or characters by which plants are distinguished from each other.

DIA'GONAL (*Geom.*) a straight line drawn across a figure from one angle to another, which by some is called a diameter. Diagonals principally belong to quadrilateral figures, and divide them into two equal parts, as A C, which divides the parallelogram into the two equal parts B C D and B A D. Two diagonals, as A C, B D, mutually bisect each other, as in the point E.—*Diagonal Scale.* [vide *Scale*]

DIA'GRAM (*Geom.*) a scheme drawn for the demonstrating or proving any thing, as the above figure.

DIAGRAM (*Mus.*) a proportion of measures distinguished by certain notes.

DIAGRA'PHICAL (*Mech.*) an epithet for what belongs to painting or engraving.

DIAGRY'DIUM (*Bot.*) vide *Scammonium*.

DIAH (*Polit.*) or *diat*; a name among the Arabians for the punishment of retaliation inflicted according to the Mahometan law on a murderer by the relatives of the deceased.

DIAHERMODA'CTYLU (*Med.*) δι' ἑρμοδακτύλου, from *διά* and *ἑρμοδακτύλος*, a purging remedy in which the Hermodyctyl is a principal ingredient. *Trallian*. l. 2.

DIAHEXA'PLA (*Vet.*) or *Diahexaple*; a drink for horses, so called from its six ingredients.

DIA'ION (*Med.*) from *διά* and *ἰόν*, a violet; the name of a pastil, in which the violet is a principal ingredient.

DIA'IREOS (*Med.*) from *διά* and *ἴρις*, the Iris; the name of an antidote in which the Iris is a principal ingredient. *Myrep.* sect. 1, c. 103.

DIAL (*Hor.*) from *dies*, the day; any plane upon which are drawn several lines and figures, and a gnomon, or style, so fixed as to show the hours of the day by the shadow of the sun, whence it is called a *sun-dial*. Dials are of different form, construction, and situation, namely—*Erect* or *direct dials*, which directly face any one of the cardinal points, North, South, East, or West.—*Inclining dials*, whose planes incline or bow forward toward the horizon.—*Reclining dials*, whose planes bend backward toward the horizon.—*Parallel dials*, otherwise called *horizontal dials*, lie parallel with the horizon.—*Perpendicular dials*, such as stand perpendicular to the horizon.—*Equinoctial dials* such as are described on the equinoctial plane.—*Vertical dials*, such as are drawn on the plane of a vertical circle.—*Polar dials*, those which are described on a plane passing through the poles of the world, and the East and West points of the horizon.—*Moon dials*, such as show the hour of the night by the light of the moon.—*Mural dials*, such as are placed against a wall.—*Universal dials*, those which serve for all latitudes.

DIALA'CCA (*Med.*) from *διά* and *λάκκη*, the name of an antidote in which *Lacca* is a principal ingredient.

DIALAGOU (*Med.*) from *διά* and *λόγος*; a medicine in which the dung of a hare is an ingredient. *Alex. Trallian*. l. 8. c. 2.

DIALECT (*Gram.*) διαλεκτική; a manner of speech peculiar to some part of a country, and differing from that of other parts, all of which use the same radical language. Such dialects, in modern times, are accounted vulgar corruptions; but among the Greeks there were five dialects, namely, the *Attic*, *Ionic*, *Poetic*, *Æolic*, and *Doric*, which were used by the best writers, either singly or intermixed. Homer wrote in all the dialects.

DIALECTICS (*Log.*) διαλεκτική; the art of logic, which teaches to discourse and reason in mood and figure, and of which the ancient writers on rhetoric made much account. *Aristot. Rhet.* l. 1, c. 10; *Cic. de Or.* l. 1, c. 15, &c.; *Senec. Epist.* 39; *Quintil. Proem.* l. 1, &c.

DIALE'PSIS (*Med.*) διάληψις, from *διαλαμβάνω*, to interpose, or intermit; an intermission, also a space left between a bandage.

DIALI'BANON (*Med.*) from *διά* and *λίβανον*, frankincense; a name of several medicines in which frankincense is an ingredient.

DIALIUM (*Bot.*) a genus of plants, Class 2 *Diandria*, Order 1 *Monogynia*.

Generic Character. CAL. none.—COR. petals five.—STAM. filaments two; anthers oblong.—PIST. germ superior; style subulate; stigma simple.—PER. legume; seed none.

Species. The single species is a tree, as the—*Dialium indicum*, native of the East Indies.

DIALLAGÉ (*Rhet.*) διαλλαγή; a figure of speech which consists in bringing all arguments to bear towards one point, called in Latin *consummatio*. *Rutil. Lup.*

DIA'LLEL (*Math.*) such lines as run across, or cut one another.

DIALLING (*Hor.*) the art of drawing dials on any given surface. [vide *Horologiography*]—*Dialling globe*, an instrument contrived for drawing all sorts of dials, and to give a clear demonstration of the art.—*Dialling sphere*, an instrument contrived to demonstrate the doctrine of spherical triangles, and to give a true idea of drawing dials on all manner of planes.

DIAL'LOES (*Med.*) δι' αλόου; the name of several medicines whose basis is *Aloes*.

DIALOGISMUS (*Rhet.*) διαλογισμός, called in Latin *sermo-inatio*; a figure of speech whereby a man reasons and discourses with himself as though it were with another. *Jul. Rufin.* fig. 20.

DIALO'GO (*Mus.*) an Italian word used in music-books to denote a piece of music for two or more voices, or instruments, which answer one to another.

DIALOGUE (*Rhet.*) διάλογος; a conference or discourse between two or more parties; or a written discourse in which two or more parties are talking together.

DIALTHÆ'A (*Med.*) διαθλαία, from *διά* and *αθλαία*, the mallow; an ointment composed chiefly of mallows.

DIALYSIS (*Med.*) διάλυσις, from *διαλύω*, to dissolve; a dissolution of the strength, or a weakness of the limbs.

DIALYSIS (*Print.*) a mark or character consisting of two points, thus .. placed over two vowels, to show that they must be sounded distinctly, as *Mosäic*, &c.

DIALYSIS (*Rhet.*) διάλυσις, or *διαλελυμενις λέξεις*, i. e. *asyndeton*; a figure of speech in which several words are put together without being connected together by a conjunction, as *veni, vidi, vici*. *Aristot. Rhet.* l. 3, c. 19; *Demet. Elocut.* § 61, &c.; *Dionys. Jud. Isai.* c. 31; *Menand. περί σχημ.*; *Herodian. περί σχημ.*; *Phot. Bibl. Cod.* 79.

DIALYTICA (*Med.*) from *διαλύω*, to dissolve; medicines which heal wounds and fractures.

DIAMARENATUM (*Med.*) from *διά* and *amarenæ*, acid cherries; a confection of acid cherries.

DIAMARGARITON (*Med.*) διαμαργαρίτων, from *διά* and *μαργαρίτης* a pearl; an antidote in which pearls are the chief ingredients. *Myrep.* sect. 1, c. 37.

DIAMA'SCIEN (*Min.*) vide *Æris Flos*.

DIAMASTIGO'SIS (*Ant.*) διαμαστιγώσις; a solemnity at Sparta in honour of *Diana Orthia*, so named από τῆς μαστιγῆς, i. e. from whipping, because boys used to be whipped upon her altars until the blood gushed out. The boys selected for this purpose were called *βαρμονεῖται*, from *βαρμός*, an altar, and *νείκος*, contention, because the boys contended for the honour of enduring the stripes with the greatest fortitude. *Cic. Tusc. Quæst.* l. 2; *Hygin. Fab.* 261; *Plut. Lacon. Instit.*; *Themist. Orat.*; *Tertull. ad Martyr.* c. 4.

DIA'MBRÆ (*Med.*) the name of two medicines in the London Dispensatory.

DIAME'LON (*Med.*) the name of two compositions in which quinces are a principal ingredient. *Trall.* l. 7, c. 7.

DIAMETER (*Math.*) διάμετρος; a line which passes through the centre of any curvilinear figure from one point of its circumference to another.—*Diameter of a circle* is a line which passes through the centre of a circle, and is bounded by the circumference on each side, dividing the circle into two equal parts.—*Diameter of a conic section*, a right line drawn through the centre of a figure, and dividing all the ordinates into two equal parts. These are either conjugate or transverse. [vide *Circle*, *Conic Sections*]

DIAMETER (*Astron.*) the measure of any celestial body, which is either real or apparent.—*Real diameter of the planets*, &c. is their absolute measurement in miles, &c.—*Apparent diameter* is the angles under which they appear to spectators on the earth, which are different under dif-

- ferent circumstances, i. e. according as they are nearer to, or more remote from, the earth.
- DIA'MNES** (*Med.*) an involuntary discharge of urine.
- DIA'MOND** (*Min.*) the hardest and most valuable of all the precious stones. Diamonds are distinguished by lapidaries into *oriental* and *occidental*.—*Cornish diamond*, a name given to the rock crystals found in the tin mines of Cornwall.—*Rough diamond*, a diamond in the state as it is dug out of the earth.—*Rose diamond*, one that is quite flat underneath with its upper part cut in divers little faces, usually triangles.—*Factitious diamonds*, or *Paste*, those which are produced by artificial means.
- DIAMOND** (*Her.*) a name for the sable colour in the arms of the nobility.
- DIAMOND letter** (*Print.*) one of the smallest printing letters.
- DIAMOND** (*Mech.*) an instrument among glaziers for cutting glass, and in the glass trade for squaring large plates or pieces.
- DIAMOND BEETLE** (*Ent.*) an exceedingly beautiful insect, the *Curculio imperialis* of Linnæus, so called from the marks on its wing-sheaths, which, when properly magnified, have the dazzling splendour of the most brilliant gems.
- DIAMONDS** (*Sport.*) one of the four suits of cards.
- DIA'MORON** (*Med.*) *δια μόρων*; the name of a Preparation of Mulberries and Honey.
- DIA'MOSCHU** (*Med.*) from *δια* and *μόσχος*, musk; an antidote in which musk is a chief ingredient. *Myrep. sect. 1, c. 37.*
- DIAMOTO'SIS** (*Med.*) *διαμότωσις*, from *μωτός*, lint; the introduction of lint into a wound or ulcer.
- DIA'NA** (*Chem.*) the silver of Philosophers.
- DIANANCA'SMUS** (*Med.*) *διαναγκασμος*, from *ἀνάγκη*, necessity; the forcible restitution of a dislocated part into its proper place.
- DIA'NDRIA** (*Bot.*) from *δια* and *αηρ*; the second class of Linnæus' artificial system, comprehending all hermaphrodite flowers which have two stamens, consisting of three orders, according to the number of the styles, namely—*Monogynia*, *digynia*, and *trigynia*. The following are the principal genera, namely—*Monogynia*, as *Olea*, Olive; *Ligustrum*, Privet; *Syringa*, Lilac; *Veronica*, Speedwell; *Pinguicula*, Butterwort; *Utricularia*, Bladderwort; *Verbena*, Vervain; *Lycopus*, Water Horehound; *Rosmarinus*, Rosemary; *Circæa*, Enchanter's Nightshade.—*Digynia*, as *Anthoxanthum*, Vernal Grass, &c.—*Trigynia*, as *Piper*, Pepper, &c.
- DIANE'LLA** (*Bot.*) is the *Dracæna* of Linnæus.
- DIANOE'A** (*Rhet.*) *διανοια*; a figure of speech by which an apt sense and interpretation is given to a subject suitable to the occasion.
- DIANTHERA** (*Bot.*) a genus of plants differing somewhat from *Justicea*.
- DIANTHON** (*Med.*) *δι' αὐθῶν*; the name of an Antidote taken from Galen. *Myrep. sect. 1, c. 454.*
- DIA'NTHUS** (*Bot.*) a genus of plants, Class 10 *Decandria*, Order 2 *Dygynia*, Natural Order *Caryophyllei*.
Generic Character. CAL. *perianth* cylindrical.—COR. *petals* five.—STAM. *filaments* ten; *anthers* oblong.—PIST. *germ* oval; *styles* two; *stigmas* bent back.—PER. *capsule* cylindrical; *seeds* very many.
Species. The species are perennials or annuals. The following are the principal perennials, as the—*Dianthus barbata*, *Tunica caryophyllus*, seu *Armeria*, Sweet William.—*Dianthus carthusianorum*, seu *Betonica*, *Carthusian Pink*, native of Germany.—*Dianthus caryophyllus*, Clove Pink.—*Dianthus deltoides*, Maiden Pink, native of Sweden.—*Dianthus cæsius*, Mountain Pink. The following are the principal annuals:—*Dianthus armeria*, seu *Viola*, Deptford Pink.—*Dianthus prolifer*, seu *Viscaria*, *Dianthus diminutus*, &c. Proliferous Pink.
- DIANTHUS** is also a name for the *Gypsophila saxifraga*.
- DIAOPO'RON** (*Med.*) *δια ὀπωρῶν*, a composition of autumnal fruits, as quinces, medlars, &c. *Trallian. l. 7, c. 7.*
- DIAPA'SMA** (*Med.*) from *διαπίσσω*, to sprinkle; a medicine reduced to powder and sprinkled over the body. Also a perfume.
- DIAPA'SON** (*Mus.*) *διὰ πασῶν*, a term in ancient music, signifying an interval of the octave, is now used among instrument makers for a kind of rule, by which they determine the measures of the pipes, and other parts of their instruments. Bell-founders have likewise a diapason for the regulation of the size, weight, &c. of bells. This term is also the appellation of certain stops in an organ; so called because they extend through the whole scale of the instrument.—*Diapason diapente* is an interval, compounded of an octave and a fifth conjoined, i. e. a twelfth.—*Diapason diatesseron*, an interval, compounded of an octave and a fourth conjoined, i. e. an eleventh.
- DIAPEDE'SIS** (*Anat.*) *διαπήδησις*, from *διαπήδω*, to leap through; a transudation of the fluids through the sides of their containing vessels.
- DIAPE'NSIA** (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.
Generic Character. CAL. *perianth* eight-leaved.—COR. one-petalled.—STAM. *filaments* five; *anthers* simple.—PIST. *germ* roundish; *style* cylindrical; *stigma* obtuse.—PER. *capsule* roundish; *seeds* roundish.
Species. The single species, the—*Diapensia Laponica*, is a perennial, and native of Lapland and Norway.
- DIAPENSIA** is also the name of the *Aretia helvetica* and the *Saniculum Europæa*.
- DIAPENTE** (*Mus.*) *διὰ πέντε*, the name by which the Greeks distinguished the interval of the fifth, being the second of the concords.
- DIAPENTE** (*Med.*) from *δια* and *πεντε*, five; a medicine composed of five ingredients.
- DI'APER** (*Com.*) linen cloth wrought with flowers and figures.
- DI'APERED** (*Her.*) a bordure, fretted all over with such things as bordures are commonly charged with, appearing between the frets, as in the annexed figure.
- DI'APERING** (*Paint.*) is when a piece, after the back-ground is quite finished, is overrun with branches or other works.
- DIAPHNE'NICON** (*Med.*) from *δια* and *φαινίζε*, a date; a medicine made of dates.
- DIA'PHANOUS** (*Opt.*) *διαφανής*, transparent like glass.
- DIAPHLYXIS** (*Med.*) *διάφλυξις*, from *διαφλύσσω*, to moisten; an effusion or ebullition.
- DIAPHONIA** (*Mus.*) a term employed by Guido and others, to denote the precepts formerly taught for the use of the organ.
- DIAPHONICS** (*Phy.*) vide *Diacoustics*.
- DIA'PHONI** (*Mus.*) *διάφονοι*, discords, in distinction from the symphony.
- DIAPHORA** (*Med.*) *διαφορά*, from *διαφέρω*, to differ; comprehends the characteristic marks or signs that distinguish one disease from another.
- DIAPHORA** (*Rhet.*) a figure of speech, in which a word repeated is taken in a signification different from what it was at first understood. *Rutil. Lup. l. 1, c. 12.*
- DIAPHORE'SIS** (*Med.*) *διαφορησις*, from *διαφορέω*, to carry through; perspiration or increased cutaneous secretion.
- DIAPHORE'TICA** (*Med.*) diaphoretics, or medicines which promote perspiration.
- DIAPHORICA** (*Mus.*) *διαφορικη*, an epithet for every dissonant interval.
- DIAPHRA'GMA** (*Anat.*) *διάφραγμα*, from *διαφράσσω*, to make a partition, the midriff or diaphragm; a muscle which

divides the thorax from the abdomen. This is frequently called, by Cœlius Aurelianus *Discrimen, Thoracis*.

DIAPHRAGMA'TICÆ (*Anat.*) Arteries belonging to, or connected with the diaphragm.

DIAPHRATTONTES (*Anat.*) another name for the pleura, or membranes which cover the inside of the thorax.

DIAPHTHORA (*Med.*) διαφθορά, from φθείρω, to corrupt; an abortion where the fœtus is corrupted in the womb.

DIAPHYLACTICUS (*Med.*) διαφυλακτικός, from φυλάσσω, to keep; medicines which resist putrefaction or prevent infection.

DIA'PHYSIS (*Med.*) διάφυσις, from διαφύω, to divide; an interstice or partition between the joints.

DIAPISSELÆON (*Med.*) from διά and πιστέλαιον, the oil of pitch; a composition in which liquid pitch was a principal ingredient. *Marcell. Empir.* c. 35.

DIAPLA'SIS (*Med.*) διάπλασις, from πλάσσω, to form; the replacing a luxated or fractured bone in its proper situation.

DIAPLA'SMA (*Med.*) διάπλασμα, from διαπλάσσω, to anoint; an unction or fomentation applied all over the body.

DIAPLA'STICS (*Med.*) medicines proper for a limb that is out of joint.

DIA'PNE (*Med.*) from διαπνέω, to perspire; an involuntary discharge of urine.

DIAPNOË (*Med.*) διαπνοή, from διαπνέω, to perspire; transpiration of vapour through the pores of the skin.

DIAPORE'MA (*Med.*) διαπόρημα, from διαπορέω, to be in doubt; nervous anxiety.

DIAPORE'SIS (*Rhet.*) διαπόρησις, a figure in rhetoric, when the subjects to be handled being of equal worth, the orator seems in doubt which he shall begin with.

DIAPRA'SIUM (*Med.*) διαπράσιον, from πράσιον, horehound; a composition in which horehound is one of the ingredients. *Trallian.* l. 5, c. 4.

DIAPRU'NUM (*Med.*) from διά and prunum, a prune; the name of two compositions which contain prunes.

DIAPSA'LMA (*Ant.*) διάψαλμα, a pause or change of note in singing.

DIAPTE'RNES (*Med.*) from πτέρνα, the heel; a medicine made of the heels of animals and cheese.

DIAPTERO'SIS (*Med.*) διαπτέρωσις, from πτερόν, a feather; the cleaning the ears with a feather.

DIAPYE'MA (*Surg.*) from πύον, pus; an abscess or suppuration.

DIAPYE'MATA (*Surg.*) from διαπύημα, a suppuration; suppurating medicines.

DIA'RIA febris (*Med.*) from dies, a day; a term applied to fevers which last but one day.

DIA'RIUM (*Archæol.*) Daily food, or as much as will last one day.

DIAROMA'TICUM (*Med.*) a medicine compounded of aromatics.

DIARRHAGE (*Surg.*) διάρρηγη, from διάρρήγνυμι, to break asunder; a fracture, particularly of the temporal bones.

DIARRHODOMELI (*Med.*) from διά, ῥόδον, a rose, and μέλι, honey; the name of a composition of scammony, juice of roses, &c.

DIARRHODON (*Med.*) from δια and ῥόδον, a rose; a name for a great many compositions in which roses are the principal ingredients.

DIARRHŒ'A (*Med.*) διάρρηαια, from διαρρέω, to flow through; a disorder which consists in a frequent and plentiful discharge of a thin watery mucous, bilious, or blackish matter from the intestines.

DIARRE'XÆ (*Surg.*) διαρρήγνυμι, to break asunder; interstices betwixt the circumvolutions of bandages.

DIARTHRO'SIS (*Anat.*) from διαρθρώω, to articulate; a moveable connexion of bones.

DIA'RY (*Lit.*) diarium, from dies, a day; an account of what passes within the day.

DIASAPONIUM (*Med.*) from δια and σάπων, soap; an ointment in which soap is a principal ingredient. *Nicol. Myreps.* sect. 3, c. 88.

DIASATYRIUM (*Med.*) from δια and σατυρίον, satyrion; an electuary in which satyrion is a principal ingredient.

DIASCHISMA (*Mus.*) an interval in ancient music, forming the half of a minor semitone.

DIASCI'LLION (*Med.*) from διά and σκίλλα, a squill; oxymel and vinegar of squills.

DIA'SIA (*Ant.*) διασία, a festival at Athens in honour of Jupiter, who was surnamed Διος μυλιχίος, i. e. the propitious Jupiter. It was celebrated about the latter end of Anthesterion. *Thucyd.* l. 1, c. 126; *Aristoph. Schol. in Nub.*; *Suidas*.

DIASCI'NSI (*Med.*) from διά and σκίγγος, skink; a name for Mithridate which originally contained this kind of lizard.

DIASCO'RDIIUM (*Med.*) from διά and σκορδιον, the water germander; electuary of scordium.

DIASE'NA (*Med.*) from δια and σένα, an antidote consisting of sena. *Nicol. Myreps.* sect. 1, c. 112.

DIASERICOS (*Med.*) διά and σήρικος, silk; a composition in which silk is an ingredient. *Trallian.* l. 3, c. 7.

DIA'SMYRNON (*Med.*) διάσμυρνον, from σμύρνα, a myrrh; the several collyria in which myrrh is an ingredient.

DIASO'STICA (*Med.*) from σώζω, to preserve; that part of medicine which relates to the preservation of health.

DIASPERMATON (*Med.*) δια σπερμάτων, the name of two Malagas compounded of seeds. *Gal. de Comp. Med. per Gen.* l. 7; *P. Egineta.* l. 7, c. 18.

DIA'SPHAGE (*Med.*) διασφαγή, from διασφάζω, to separate; an interstice or interval between two branches of a vein. *Foes. Hippoc. Econom.*

DIASPHY'XIS (*Med.*) διά φυξις, from σφύζω, to strike; the pulsation of an artery.

DIAS'TALTIC (*Mus.*) from διατέλλω, to dilate; an epithet for the major third, major sixth, and major seventh, because they are extended or dilated at intervals; also for the grand part of the Melopœia.

DIA'STASIS (*Med.*) διάστασις, from διίστημι, to separate; a separation frequently used with respect to bones which recede from each other.

DIASTE'ATON (*Med.*) from σίαις, fat; the name of an ointment in Marcellus Empiricus, in which the fat of the stag, swine, goose, and hen, is united.

DIA'STEMA (*Med.*) vide *Diastasis*.

DIASTE'MA (*Rhet.*) a modulation of the tones of the voice, by observing due intervals between its elevation and depression.

DIASTE'MA (*Mus.*) διάστημα, an interval or space; sometimes a simple incomposite degree, in distinction from a compound interval.

DIASTOLE (*Anat.*) διαστολή, from διατέλλω, to stretch or dilate; the dilatation of the heart, auricles, and arteries, in distinction from *Systole*, or contraction.

DIASTOLE (*Gram.*) a figure whereby a syllable, short by nature, becomes long.

DIASTOMO'TRIS (*Med.*) διαστομοτρίς, is usually joined with μήλη, a probe, and implies any dilating instrument.

DIASTRE'MMA (*Med.*) διάστρεμμα, from διαστέρω, to distort; a distortion of the limbs.

DIA'STYLE (*Archit.*) διάστυλος, from δια, between, and σῦλος, a column; a sort of sacred edifice, in which the columns stand at a distance of three diameters from each other. *Vitruv.* l. 3, c. 2; *Bald. Lex. Vitruv.*

DIASULPHURIS (*Med.*) from διά and sulphur, brimstone; a prescription containing sulphur, with wax, &c.

DIASYRMOS (*Rhet.*) διασυρμός, a figure of rhetoric, which consists in exaggerating the praises of a person by way of derision. *Longin. Alexand.*

DIATA'MARON (*Med.*) the name of an antidote. *Nicol. Myrep.* sect. 1, c. 25.

DIATA'SIS (*Med.*) διάτασις, from διατρέω, to distend; the extension of a fractured limb with a view to its reduction.

DIATECO'LITHOS (*Med.*) διάτηκόλιθος, from διά and τηκόλιθος, the Jew's stone; an antidote which contains the lapis Judaicus.

DIATERETICA (*Med.*) from δια and τρέω, to preserve; medicines which preserve health, and prevent disease.

DIATESSERON (*Med.*) διατεσσαρον, the name of a composition, so called from the four ingredients it comprehends.

DIATESSERON (*Mus.*) διατεσσαρον, an interval composed of a greater and a less tone, the ratio of which is that of four to three.

DIATESSERON (*Bibl.*) a term applied to the four Gospels.

DIATESSERONA'RE (*Mus.*) a term denoting to sing in fourths.

DIATE'TTIGON (*Med.*) διατεττίγων, from τεττίγξ, a grasshopper; the name of an antidote in which grasshoppers are an ingredient. *Paulus Aegineta*, l. 7, c. 11.

DIA'THESIS (*Med.*) διάθεσις, from διατίθημι, to dispose; an affection or disposition expressive of a particular state of the constitution.

DIA'THYRA (*Arch.*) διάθυρα, a screen or fence to keep out the wind; a rail or fence before a door. *Vitruv.* l. 6, c. 10; *Bald. Lex. Vitruv.*

DIA'TONI (*Archit.*) διάτονοι, diatoni, or frontati lapides, Corner-stones, Band-stones, or Parpen-stones, such as, in building of a wall, reach over the whole breadth.

DIATO'NIC (*Mus.*) διατόνος, diatonicum, an epithet denoting the most ordinary sort of music, proceeding by different tones either in ascending or descending.

DIA'TONOS hypaton (*Mus.*) διατόνος ὑπάτων, the musical note among the ancients answering to that now called *D-sol-re*.—*Diatonus meson*, διάτονος μέσων, another ancient note, answering to what is now called *G-sol-re-ut*.

DIATRAGACA'NTHI species (*Med.*) medicines composed of tragacanth. *Myrep.* sect. 1, c. 98.

DIATRIBE (*Rhet.*) διατριβή, a dwelling or insisting on a particular point, an excursion or episode by way of amplification on a point. *Aristot. Rhet.* l. 3, c. 17; *Cic. ad Heren.* l. 4, c. 45; *Menand. διατριβή*, p. 596; *Lucian. de Cons. Hist.* c. 27; *Hermog. περί δεινότητος*, p. 8; *Gregor. ad. h. l. c. 5*.

DIATRINSA'NTALON (*Med.*) a confect, in which is the santalum.

DIATRION Pipereon species (*Med.*) from δια and τρεῖς, three; a powder prescribed by Galen, which chiefly consists of three peppers.

DIATRITA'RII (*Med.*) an epithet for the Methodics, who recommended the Diatribos.

DIATRIT'OS (*Med.*) διατριτός, from δια and τρίτος, the third; an abstinence of three days enjoined by physicians of the Methodic sect upon their patients, one of the most considerable points in practice, by which they distinguished themselves from other physicians.

DIATU'RIBITH (*Med.*) an electuary of turbitih.

DIATU'REI (*Ant.*) ἐπὶ τῆς διαίτης i. e. from the living, or board, and ἄρεις, a keeper; men who were hired for their board to keep or watch the vessels.

DIATYPO'SIS (*Rhet.*) διάτυπσις, descriptio; a figure of rhetoric, which consists in the lively delineation of a thing, so as to set the object before our eyes. *Longin. de Sublimit.* c. 20.

DIA'ULUS (*Ant.*) δίαυλος, from δις, twice, and αὐλή, a station, signifies a course backwards and forwards, i. e. from the starting place to the goal and back again. *Aristot. de General.* l. 2; *Schol. in Aristoph. Av.*; *Suidas*.

DIAULUS is also a measure of ground, containing two stadii, or furlongs. *Vitruv.* l. 5, c. 2; *Bald. Lex. Vitruv.*

DIAZEU'XIS (*Mus.*) διάζευξις, separation, from διαζυγνύμι,

to separate; the name given by the ancients to the tone which separates two disjunct tetrachords.

DIAZO'MA (*Anat.*) διάζωμα, the Diaphragm.

DIAZO'STER (*Anat.*) διαζωστήρ, a name for the twelfth vertebra of the back, so called because the ζωστήρ, belt, lies upon it.

DIBBLE (*Husband.*) a tool wherewith seeds are sown.

DICA (*Archæol.*) a tally for accounts; also an ancient name for a process or action at law.

DICÆO'LOGY (*Rhet.*) δικαιολογία, a figure of speech wherein the orator, by way of episode, attempts to move the affections of the audience in his favour. *Rutil. Lup.* l. 2, c. 3; *Quint.* l. 9, c. 3; *Eustath. ad Hom. Il.* 14, p. 1050.

DICE (*Sport.*) pieces of bone or ivory, of a cubical form, marked with dots on each of their faces, from one to six, according to the number of the faces.

DICENTE'TON (*Med.*) δικάντητον, the name of a hot and acrid Collyrium described by P. Aegineta, l. 3, c. 13.

DIC'ERA (*Bot.*) a genus of plants, Class 13 Polyandria, Order 1 Monogynia, *Generic Character.* CAL. perianth four or five-parted.—COR. petals four or five.—STAM. filaments twelve to twenty; anthers linear.—PIST. germ roundish; style awl-shaped; stigma simple.—PER. berry ovate; seeds very many.

Species. The species are trees, as the—*Dicera dentata*, seu *Elæocarpus serratus*, native of Zealand.—*Dicera serrata*, native of Zealand.

DICHA'LCON (*Ant.*) δίκυλλον, a weight equal to two cereola, or one-third of an obolus.

DICHA'STERES (*Anat.*) the Dentes incisores.

DICHON'DRA (*Bot.*) a genus of plants, Class 5 Pentandria, Order 2 Monogynia, *Generic Character.* CAL. five-leaved.—COR. five-cleft.—STAM. filaments five; anthers roundish.—PIST. germs two; styles two; stigmas capitate.—PER. capsules two; seeds globular.

Species. The single species is the—*Dechondria repens*, seu *sibihorppia*, native of Jamaica.

DICHO'PHYIA (*Med.*) διχοφύια, a distemper of the hairs, which consists in their growing forked. *Galen.*

DICHORE'US (*Poet.*) διχορέιος, a foot consisting of two trochees, as *aūd'tāmūs*.

DICHO'TOMO-CORYMBOSUS (*Bot.*) an epithet for any flower having corymbs, the pedicles of which divide and subdivide in pairs.

DICHO'TOMUS (*Bot.*) from δίχα, double, and τέμνω, to cut; an epithet for a stem; caulis dichotomus, a forked or dichotomous stem, which continually and regularly divides by pairs from top to bottom, as in viscum, or Mistleto, &c. It is also an epithet for a peduncle.

DICHO'TOMY (*Astron.*) a term denoting an aspect of the moon when she is in her quadrature, or shows just half her disk.

DICHOTOPHYLLUM (*Bot.*) from δίχα, double, and φύλλον, a leaf. [vide *Ceratophyllum*]

DICKER (*Archæol.*) a quantity of leather, consisting of ten hides.

DICKSONIA (*Bot.*) a genus of plants, Class 24 Cryptogamia, Order 1 Felices, Natural order of Ferns. *Generic Character.* Fructifications kidney-shaped. *Species.* The species are perennials, as the—*Dicksonia arborescens*, Tree Dicksonia, native of St. Helena.—*Dicksonia culcita*, seu *Polypodium*, native of Madeira.

DICO'CCOUS (*Bot.*) dicoccus, an epithet for a capsule, which consists of two cohering grains or cells, with one seed in each.

DICO'CTA (*Med.*) δικοκτα, water first heated and then refrigerated with snow. *Galen. de Meth. Med.* l. 7, c. 4.

DICONA'NGIA (*Bot.*) another name for the Itra of Linnæus.

DICOTYLE/DONES (*Bot.*) an epithet for such plants as split into two lobes in germinating.

DICRA ferri (*Archæol.*) a quantity of iron, consisting of ten bars.

DICRANUM (*Bot.*) a genus of Mosses.

DICROTUS (*Anat.*) δίκροτος, from *dis*, twice, and *κρέω*, to beat, an epithet for a certain pulse, in which the artery beats, as it were, double.

DICTAMNITES (*Med.*) διαταμνίτης δίνος, a wine medicated with Dittany, described by Dioscor. l. 5, c. 57.

DICTAMNUM (*Bot.*) the *Origanum dictamnus* of Linnæus.

DICTAMNUS (*Bot.*) διαταμνος, or διαταμος, Penny-Royal; a plant so called either from the Dictæan mountain, in Crete, where it was first found, or από τῆς τίκτεω, from its bringing forth the young of animals, or expelling the fœtus. It is said that the goats and stags of Crete, when they were wounded with arrows, expelled them by eating of this herb.

Virg. Æn. l. 12, v. 412.

*Dictamnus genetrix Creteæ carpit ab Idâ,
Puberibus caulem foliis et flore comantem
Purpureo: non illa feris incognita capris
Gramina, cum tergo volucres hasere sagittæ.*

It is generally reckoned an excellent vulnerary and powerful cordial. *Aristot. Hist. An.* l. 9, c. 8; *Theoph. Hist. Plant.* l. 9, c. 16; *Cic. de Nat. Deor.* l. 2; *Dioscor.* l. 3, c. 38; *Plin.* l. 25, c. 8; *Apul.* c. 72; *Plut. de Solert. Animal.*

DICTAMNUS, in the Linnæan system, a genus of plants, Class 10 *Decandria*, Order 1 *Monogynia*.

Generic Character. CAL. perianth five-leaved.—COR. petals five.—STAM. filaments ten; anthers four-sided.—PIS. germ five-cornered; style simple; stigma sharp.—PER. capsules five; seeds in pairs.

Species. The two species are perennials, as the—*Dictamnus albus*, seu *Frazinella alba*, *Frazinella*.—*Dictamnus capensis*, seu *Pallassia capensis*, native of the Cape of Good Hope.

DICTAMNUS is also a name for the *Origanum dictamnus* of Linnæus.

DICTATOR (*Ant.*) a Roman magistrate, who was invested with sovereign authority during the period of his administration. He was always chosen by the Consul in the night-time, and on some emergency, and laid down his office again as soon as the occasion ceased for which he had been appointed. The first dictator was Titus Largius Flavius, U. C. 253. *Polyb.* l. 3, c. 87; *Dionys.* l. 11; *Cic. de Leg.* l. 3, c. 3; *Liv.* l. 4, c. 13; *Plut. Marcell.*

DICTIONARY (*Gram.*) *dictionarium*, from *dictum*, a word; a collection of the words of a language explained in alphabetical order.

DICTUM de Kennelworth (*Law*) an act, award, or edict made for composing differences between King Henry III. and his barons, who had been in arms against him, anno 51, 52. *Hen.* 3.

DICTYOIDES (*Med.*) δικτυοειδής, from *δικτυον*, a net, and *ειδός*, fern; a name for the *Rete mirabile*.

DICTYOTON (*Archit.*) δικτυωτόν, *reticulata structura*; a sort of structure which consists principally of grating. *Vitruv.* l. 2, c. 8; *Plin.* l. 36, c. 22; *Philander. in Vitruv.*

DIDAPPER (*Orn.*) or Dipper, an aquatic bird, the *Colymbus minor* of Linnæus, which inhabits the fresh waters of Europe.

DIDELPHIS (*Zool.*) a genus of animals, Class *Mammalia*, Order *Feræ*.

Generic Character. Foreteeth rounded.—Tusks long.—Grinders crenate.—Tongue fringed.—Pouch abdominal.

Species. Animals of this tribe, which are well-known in English by the names of Opossum and Kangaroo, are inhabitants of America, where they live in holes, and

climb trees by means of their prehensile tails. The females are distinguished by having several pouches in which they conceal their young in time of danger. The principal species are as follow, namely—*Didelphis opposum*, the Virginian Opossum—*Didelphis marsupialis*, the Amboyna Opossum.—*Didelphis cayopollin*, the Mexican Opossum.—*Didelphis volans*, the Flying Opossum.—*Didelphis sciurea*, the Squirrel Opossum.—*Didelphis orientalis*, the Phalangi.—*Didelphis gigantea*, the Kangaroo.—*Didelphis tridactyla*, the Kangaroo Rat.

DIDELTA (*Bot.*) a genus of plants, Class 19 *Syngenesia*, Order 3 *Polygamia Frustanea*, so called from *dis*, and the Greek letter Δ. Natural order of compound flowers.

Generic Character. CAL. common double.—COR. compound radiated.—STAM. filaments five; anthers cylindrical. PIS. germ inferior; style slender; stigma subulate.—PER. nuts three; seeds small kernels.

Species. The single species is annual, as the *Didelta carnososa*, seu *Polymnia*, native of the Cape of Good Hope.

DIDUS (*Orn.*) the Dodo, a genus of birds, of the Order *Grallinæ*, having a narrow bill, oblique nostrils, wings unfit for flight, and no tail. These birds mostly inhabit the Isle of France and Bourbon.

DIDYME (*Bot.*) διδύμη, a name for the root of the *Orchis*. *Galen Exeg.*

DIDYMÆA (*Med.*) διδυμαία, the name of a malagma or cataplasm.

DIDYMI (*Anat.*) διδυμοι, twin; an epithet for the testes, and also for the two eminences in the brain.

DIDYMO'DON (*Bot.*) a genus of mosses, according to Hedwig.

DIDYMUS (*Bot.*) vide *Twin*.

DIDYNAMIA (*Bot.*) from *dis*, twice, and *δύναμις*, power; a name given by Linnæus to the Fourteenth Class in his Artificial System, comprehending those plants which have hermaphrodite flowers with four stamens in two pairs of different lengths, the outer pair being the longest and the middle pair converging. It is a natural class, containing the *Labiati* and *Pers:nati* of Tournefort; and is divided by Linnæus into two orders, namely, the *Gymnospermia*, or such as have naked seeds; and the *Angiospermia*, or such as have the seeds enclosed in a vessel. The following are the principal genera in the first Order, namely—*Ajuga*, the Bugle or Ground Pine.—*Teucrium*, the Germander.—*Satureia*, the Savory.—*Hyssopus*, the Hyssop.—*Nepeta*, the Catmint.—*Lavendula*, the Lavender.—*Sideritis*, Iron-Wort.—*Mentha*, Mint.—*Lamium*, Archangel.—*Stachys*, Wound-Wort.—*Ballota*, Black Horehound.—*Leonis*, Mother-Wort.—*Clinopodium*, Wild Basil.—*Origanum*, Marjoram.—*Melissa*, Balm.—*Dracocephalum*, Dragon's Head.—*Melitis*, Bastard Balm.—*Ocimum*, Basil.—*Scutellaria*, Scull-Cap.—*Prunella*, Self-Heal, &c. The genera in the second Order will be found under *Angiospermia*.

DIE (*Archit.*) or *Dado*, the middle of a pedestal, i. e. the part lying between the basis and the cornice.

DIECBOLION (*Med.*) διεκβόλιον, a medicine causing abortion.

DE DIE IN DIEM (*Law*) from day to day, in a continued succession.

DIELE/CTRON (*Med.*) διήλεκτρον, a troche; so called from amber, a principal ingredient in it. *Marcel. Empir.* c. 16.

DIEM clausit extremum (*Law*) a writ which lies when the heir of one, who holds land of the king, dies, for the escheator to inquire of what estate he was possessed. *F. N. B.* 251.

DIER'S-BROOM (*Bot.*) the *Genista tinctoria* of Linnæus, a shrub; so called from its flowers, from which is prepared a colour used by dyers in dyeing wool green.—*Dier's-weed*, the *Riseda leuteola* of Linnæus, annual or biennial; so called because from its flowers is prepared a yellow dye.

DIERVILLA (*Bot.*) another name for the *Lonicera* of Linnæus.

DIES (*Ant.*) days among the Romans were distinguished in a variety of ways, the principal of which are as follow:—*Dies agonales*, those days in which the *rex sacrorum* sacrificed a ram, called Agone. *Varr. de Ling. Lat.* l. 5, c. 34.—*Dies Alliensis*, a day of mourning, in commemoration of the defeat of the Romans at the battle of Allia. *Fest. de Verb. Signif.*—*Dies atri*, the same as the *dies nefasti*.—*Dies civilis*, the space of time which is comprehended within one revolution of the sun, which the Roman priests reckoned from midnight to midnight. *Plin.* l. 2, c. 77; *Censor. de Die Nat.* c. 10.—*Dies comitiales*, days in which the comitia were held. *Macrob. Lat.* l. 1, c. 16.—*Dies comperendini*, days of adjournment to the number of twenty, on which the defendant could give bail. *Macrob.* l. 1, c. 16.—*Dies exempli* were days on which no public business was done.—*Dies fasti* were the same as the *dies juridici*, or court-days of modern times, in which it was lawful for the prætor to sit in judgment and, *fari tria verba*, pronounce these three solemn words, *do, dico, addico*. *Liv.* l. 1, c. 19; *Macrob. Sat.* l. 1, c. 16.—*Dies feriati*, or *dies non juridici*, days on which the courts were shut.—*Dies festi*, holidays, or days on which sacrifices, lustrations, and the like, were performed. *Macrob.* l. 1, c. 16.—*Dies inter-cisi*, a sort of half holidays, one half of which was devoted to the ordinary business, and the other half to religious exercise.—*Dies justi* were those days in which *jus*, or the execution of any sentence on a defendant was suspended, which, according to the laws of the twelve tables, was thirty days. *Gel.* l. 15, c. 13.—*Dies lustrici*, days of purification for children. *Plut. Quæst. Rom.*; *Fest. de Verb. Signif.*; *Macrob. Sat.* l. 1, c. 16.—*Dies nefasti* were the opposite to the *fasti*, for on them it was, *nefas*, unlawful to do any public business. *Var. de Ling. Sat.* l. 5, c. 4, &c.—*Dies præliares* were days on which the Romans held it favourable to engage an enemy. *Fest. de Verb. Signif.*; *Macrob.* l. 1, c. 16.—*Dies pro festi* were, in general, all days which were allotted to the civil concerns of men, such as the *fasti, comitiales, &c.*—*Dies religiosi* were fast-days, similar to the *dies atri*.—*Dies sanguinis*, the day on which the priests of Bellona used to cut themselves with knives. *Trebel. Claud.* c. 4; *Tertull. Carm. ad Senat.*; *Gyrald. de Ann. et Mens. Dieb.* c. 1; *Sigon de Judic.* l. 1, c. 27; *Augustin. ad Leg. XII.* § 35; *Ursin. ad Leg. et Seta. apud Græv. Thes. Antiq. Rom.* tom. ii. p. 1354, &c.

DIES (*Archæol.*) a term in doomsday-book, signifying the charge of one day's entertainment for the king.—*Dies marchie*, the day of meeting formerly held on the marshes or borders between the English and Scotch.

DIES (*Law*) is distinguished into—*Dies datus* a respite given by the court to the defendant.—*Dies juridici*, court-days, or days on which the law is administered.—*Dies non juridici* are days on which no pleas are held in any court of justice.—*Dies in Banco*, Days in Bank, i. e. stated days of appearance in the Court of King's Bench during every term.

DIES critici (*Med.*) critical days in which some fevers are supposed to arrive at a crisis; they are otherwise called *dies indicantes*, because they indicate the state of the disease.—*Dies internuncii*, such days as intervene between the increase of a disorder and its decrease.

DIES caniculares (*Astron.*) the Dog-days.

DIES intercalares (*Chron.*) intercalary days. [vide *Chronology*]

DIE/SIS (*Print.*) the mark †; called also a double dagger.

DIESIS (*Mus.*) *δiesis*, a division, signified the smallest interval in the music of the ancients; but is now taken for a tone below a semitone, or a sharp.—*Diesis enharmonical*, the difference between the greater and the lesser semitone.

DI'ET (*Polit.*) a convention of the states or princes of a kingdom or empire; the same thing, in Germany, as a parliament in England.

DIET (*Med.*) *δαιτα*, food regulated by the rules of medicine, on which Hippocrates and the ancients wrote much. *Hippocrat. de Vict. in Acut. Morb.*; &c. &c.—*Diet-drink*, a drink made of medicinal ingredients.

DIETA (*Archæol.*) a day's work or journey.

DIETE/TICS (*Med.*) that part of medicine which considers the way of living with regard to food or diet suitable to any particular case.

DIEU et mon droit (*Her.*) i. e. God and my Right, the motto on the arms of the Kings of England.

DIEU et son acte (*Law*) a maxim in law, that the act of God shall not be a prejudice to any man; thus, if a house be thrown down by a tempest, the lessee shall be free from an action of waste, and shall also have liberty to take timber to rebuild it.

DIEXODOS (*Med.*) *διέξοδος*, from *διὰ* and *ἕξοδος*, a way by which any thing passes; is taken by Hippocrates for the descent or passage of the excrement by the anus.

DIEXODUS (*Rhet.*) a figure of speech by which any thing is diffusely treated, in distinction from brevity of discourse.

DIFFAEM' (*Her.*) vide *Defamed*.

DIFFARREATIO (*Ant.*) a sort of sacrifice which was made by a man and a woman on the dissolution of their marriage. *Fest. de Verb. Signif.*

DIF-FERENCE (*Log.*) *διαφορα*, one of the five predicables which serves to distinguish different species of the same kind one from another. *Porphyr. Institut.* c. 11.

DIFFERENCE (*Math.*) the excess of one quantity above another.

DIFFERENCE (*Mil.*) the sum paid by an officer in the British service when he changes from half to full pay.

DIFFERENCE of Latitude (*Geog.*) is an arc of the meridian included between the parallels of latitude, in which any two places lie; when the latitudes are both North or both South, the less latitude taken from the greater gives the difference; but when the one is North and the other South, they must then be added together to give the difference.—*Difference of Longitude*, an arc of the equator comprehended between the meridians of two places. When the longitudes are both East or West, the one taken from the other gives the difference; but when the one is East and the other West, they are then to be added together to show the difference.

DIFFERENCES (*Her.*) such things in coats of arms as distinguish one family from another, or members of the same family from each other. Gullim divides differences into ancient and modern.—*Ancient differences* were bordures of all kind.—*Modern differences* are the file, crescent, label, mullet, &c. [vide *Heraldry*]

DIFFERENTIAL calculus (*Arith.*) a method of differencing quantities, that is, of finding a differential, or that infinitely small quantity which, taken an infinite number of times, is equal to a given quantity.—*Differential of the first power or degree*, is that of an ordinary quantity, as dx .—*Differential of the second power*, is an infinitesimal of a differential quantity of the first degree, as ddx , or $dx dx$, or dx^2 .—*Differential of the third power*, an infinitesimal of a differential quantity of the second power, as $ddd x$, or dx^3 .—*Differential-differential calculus* is a method of differencing differential quantities, as the sign of a differential is, that of a differential of dx is ddx , and the differential of ddx is $ddd x$, or $d^3 x$, &c., similar to the fluxions \dot{x} , \ddot{x} , &c.—*Differential equation*, an equation involving or containing differential quantities, as the equation $3x^2 dx - 2ax dx + ay dx + ax dy = 0$. The differential equation has been explained by some to signify that which defines the nature of a series.—*Differential method*, a method of find-

ing quantities by means of their successive differences.—*Differential scale*, a name for the scale of relation subtracted from unity.

DIFFLATIO (*Med.*) the same as *Transpiration*.

DIFFLATION (*Chem.*) is when spirits which are raised by heat are blown into the opposite arch of the furnace with a sort of bellows.

DIFFLUVIUM (*Bot.*) a distemper in trees, by which they lose their bark.

DIFFORCIARE RECTUM (*Archæol.*) to take away or deny justice. *Mat. Par. Ann.* 1164.

DIFFORMIS (*Bot.*) Difformed, irregular, or anomalous; an epithet for a flower, the parts of which do not correspond in size or proportion.—*Difformis torsio* is a twisting first one way and then the other; *difformia folia* are leaves of different shapes, on the same plant.

DIFFRACTION (*Opt.*) another word for *Inflection*.

DIFFUSION (*Phy.*) the dispersing the subtle effluvia of bodies into a kind of atmosphere all round them.

DIFFUSUS (*Bot.*) Diffuse, i. e. spreading wide; an epithet for a stem or a panicle; *caulis diffusus*, a stem which has spreading branches, as in the *Teucrium*; *panicula diffusa*, a panicle with pedicles spreading about loosely.

to **DIG** a *Badger* (*Sport.*) to raise or dislodge a badger.

DIGAMMA (*Gram.*) δ'γάμμα, an old Greek letter, as Γ, answering to the letter Γ, which was so called because it was supposed to represent a double Gamma.

DIGASTRICUS (*Anat.*) from δ'ς, importing double, and γαστήρ, a belly; a muscle of the lower jaw.

to **DIGEST** (*Chem.*) vide *Digestion*.

DIGESTA (*Law*) the Digests, or books of civil law.

DIGESTER (*Chem.*) an apparatus for reducing animal and vegetable substances to a pulp or jelly.

DIGESTION (*Surg.*) the disposing an ulcer or wound to suppurate, or discharge good pus, by the application of proper medicines.

DIGESTIVES (*Med.*) medicines which help digestion.—*External digestives*, such as dissolve a swelling or breed good matter in a wound.

DIGESTS (*Law*) *digesta*, the first tome or volume of the Civil Law, so called because the author digested every book and title into a regular form.

DIGESTOR (*Chem.*) vide *Digester*.

DIGIT (*Arith.*) *digitus*, a measure equal to three quarters of an inch.—*Digit* is also a character which denotes a figure; as 1 for one, 2 for two, &c.

DIGIT (*Astron.*) the twelfth part of a diameter of the sun or moon, used to denote the quantity of an eclipse.

DIGITALIS (*Bot.*) the name of a genus of plants, in the *Linnean system*, Class 14 *Didynamia*, Order 2 *Angiospermia*. *Generic Character*. CAL. perianth five-parted.—COR. one-petalled.—STAM. filaments four; anthers two-parted.—PIST. germ acuminate; style simple; stigma sharp.—PER. capsule ovate; seeds very many.

Species. The species are perennials. The following are the principal, as the—*Digitalis lutea*, Small Yellow Fox-glove, native of the South of Europe.—*Digitalis ferruginea*, Iron-leaved Fox-glove, native of the Canary Islands.—*Digitalis scaptrum*, Madeira Shrubby Fox-glove; but the following is a biennial.—*Digitalis purpurea*, Purple Fox-glove, native of Denmark, Germany, Switzerland, and Britain. *Bauh. Hist.*; *Bauh. Pin.*; *Ger. Herb.*; *Raii Hist.*; *Tourn. Inst.*

DIGITALIS is also the *Chelone penstemon*, the *Gerardia purpurea*, the *Mimulus regens*, and the *Sesamum orientale*.

DIGITARIA (*Bot.*) another name for the *Panicum* of *Linneus*.

DIGITATION (*Mech.*) a pointing with the finger; also the form of the same finger in both hands joined together; or the manner of their joining.

DIGITATUS (*Bot.*) from *digitus*, a finger; *digitate*, an epithet for a leaf; *folium digitatum*, a digitate leaf, or one the leaflets of which spread out after the manner of fingers, as in the case of the binate, ternate, and quinate leaves, &c.

DIGITELLUS (*Bot.*) a name for several fungusses.

DIGITIUM (*Med.*) from *digitus*, a finger; a contraction of the joint of a finger, and also a whitlow or sore upon the same part.

DIGITORUM TENSOR (*Anat.*) vide *Extensor Digitorum communis*.

DIGITUS (*Ant.*) finger's breadth, a finger, or digit—*Digiti*, the fingers, were designated by different epithets, as—*Digitus annularis*, the ring-finger, also called *medicus*.—*Digitus index*, δεικτικὸς, from δεικνύμι, to show or point the fore-finger. It was also called *salutaris*, a *salutando*, from saluting.—*Digitus medius*, the middle finger, being used as a mark of supreme contempt, was on that account called *infamis*, *vespus*, *impudicus*, &c. *Cic. ad Heren.* l. 3, c. 20; *Aul. Gell.* l. 10, c. 10; *Macrob. Sat.* l. 7, c. 13; *Isid. Orig.* l. 11, c. 1.

DIGITUS Manus et Pedis (*Anat.*) the finger and toe. The fingers and thumb in each hand consist of fourteen bones, which are distributed into three orders called *Phalanges*. The same applies to the toes of each foot.

DIGLIPH (*Archit.*) an ornament on friezes resembling the triglyph, except that it has only two channels instead of three.

DIGLOSSON (*Bot.*) δ'γλωσσον, from δ'ς, double, and γλῶσσα, a tongue; a name for the *Laurus Alexandrina*.

DIGNITARY (*Ecc.*) one who has authority and jurisdiction in the church, as a dean, a prebend, &c.

DIGNITY (*Law*) honour and authority. Dignities may be divided into superior and inferior, as the titles of Duke, Earl, and Baron, &c. are the highest names of dignity, so those of Baronet, Knight, Sergeant at Law, &c. are the lowest.—*Ecclesiastical Dignity* is defined by canonists to be an administration joined with some power and jurisdiction.

DIGNITIES (*Astrol.*) the advantages which a planet has upon account of its being in a particular place of the zodiac, or in a particular station with regard to other planets.

DIGNOTIO (*Med.*) vide *Diagnosis*.

DI GRADO (*Mus.*) an Italian word signifying that the passage to which it refers moves by conjoint intervals.

DIGYNIA (*Bot.*) from δ'ς, double, and γύνη, a female; an order in *Linneus'* artificial system, comprehending those plants which have two pistils. This order is the second in the first thirteen classes, except the ninth.

DIHEMATON (*Med.*) διὰ τῶν αἱμάτων, from αἷμα, blood; an antidote composed of the blood of many animals. *Galen de Antid.* l. 2, c. 8; *Paul. Aegineta*, l. 7, c. 11.

DIHALON (*Med.*) διὰ ἁλῶν, from ἅλις, salt; a plaster prepared chiefly of common salt and nitre. *Aegineta*, l. 7, c. 17.

DIHELIOUS (*Astron.*) that ordinate in the ellipsis, which passes through the focus in which the sun is supposed to be placed.

DII (*Ant.*) vide *Deus*.

DIJAMBUS (*Poet.*) δ'ιαμβος, a diambic, from δ'ς and ἴαμβος, an iambic, a foot in verse, consisting of four syllables, or two Iambics, i. e. the first and third short, the second and fourth long; as Ἄνακρεων. *Hæphest. Enchirid.*

DIIPETES (*Med.*) διίπετης; an epithet applied to γόνος, semen, and imports a sudden or immediate Defluxion.

DIIPOLIA (*Ant.*) Διίπολεια; a festival celebrated at Athens on the fourteenth of Scirophorion, so named because it was sacred τῷ Διὶ Πολιεῖ, i. e. to Jupiter, surnamed Polieus, or protector of the city. At this festival it was customary to place sacrifice-cakes on a brazen table, and to drive round them a number of oxen, of which the one that eat any of the cakes was immediately slaughtered. The per-

- son killing the ox was called βετίας, or βεφόνια, and the sacrifice itself sometimes βεφόνια, i. e. the ox-slaughter. The origin of this custom is differently accounted for by Pausanias and Ælian. *Ælian. Var. Hist.* 1. 8, c. 3; *Porphyr. de Abstin. ab Anim.; Hesychius; Suidas.*
- DILAPIDATION (Law)** is either the letting a building go to ruin, or the ruin and damage which accrues to a building in consequence of such neglect.
- DILATATION (Med.)** ὑπερμετρία, ἀνευμετρία; an affection of the vessels of the human body when they have their dimensions enlarged.
- DILATATORRES (Anat.)** muscles which dilate the *alæ* of the nose.
- DILATATORIUM (Surg.)** a surgical instrument for dilating the mouth; also for pulling barbed irons out of a wound.
- DILATORY (Surg.)** vide *Dilatorium.*
- DILATRIS (Bot.)** a genus of plants, Class 3 *Triandria*, Order 1 *Monogynia.*
Generic Character. CAL. none.—COR. six-petalled.—STAM. filaments three; anthers ovate.—PIST. germ inferior; style filiform; stigma simple.—PER. capsule globular; seeds solitary.
Species. The species are—*Dilatrix umbellata*, viscera, and *paniculata.*
- DILEMMA (Log.)** an argument consisting of two or more propositions, so disposed that neither of them can be well denied without involving the party denying in equal difficulties.
- DILEMMA (Rhet.)** a figure of speech in which two interrogations being put to the adversary, we are ready to refute him in both; or a double hypothetical proposition, which Cicero calls *complexio.* *Cic. de Invent.* 1. 1, c. 29; *Hermag. περὶ διωκτρ.; Aspin. Rhet.* p. 703; *Ulpian. in Demosth. Olynth.* 3, p. 25.
- DILL (Bot.)** the *Anethum graveolens* of Linnæus; an annual, having a strong aromatic smell.
- DILLENIA (Bot.)** a genus of plants called after Dillenius, a professor of Botany at Oxford, Class 13 *Polyandria*, Order 7 *Polygynia.*
Generic Character. CAL. perianth five-leaved.—COR. petals five.—STAM. filaments scarce any; anthers very numerous.—PIST. germ ovate; styles several; stigmas simple.—PER. roundish; seeds numerous.
Species. The species are trees, as the *Dillenia speciosa*, seu *Syalita*, native of Malabar.—*Dillenia elliptica*, seu *Songium*, native of Amboyna, Celebes, and Macassar.—*Dillenia serrata*, seu *Sangius*, native of the Celebes, Macassar, and Java.—*Dillenia dentata*, seu *Wormia*, native of Ceylon.
- DILOGIA (Rhet.)** a figure of speech which consists in using equivocal terms that mean two things.
- DILUENTS (Med.)** are such things as cause or increase fluidity in substances.
- to **DILUTE (Chem.)** to dissolve the parts of a solid body in a fluid.
- DILUTUM (Med.)** diluted, is spoken of what has passed under the action of Diluents.
- DILYTÆA (Med.)** διλυταία in *Myrepsus*, sect. 3, cap. 12, is, as Fuchsius says, the fat of some animal unknown.
- DIMACHÆ (Ant.)** δμμαχαι; a kind of soldiers who served both on foot and on horseback, answering to the dragons of the moderns. *Poll. Onom.* 1. 1, sec. 132; *Ælian. Tact.* p. 156; *Curt.* 1. 5, c. 13; *Hesychius; Turneb. Adv.* 1. 19, c. 32, &c.
- DIMENSION (Geom.)** a term denoting the affections of a line, surface, or figure, as respect its extension in breadth and thickness: a line has one dimension, namely length; a surface two, namely length and breadth; a solid three, namely length, breadth, and thickness.

- DIMENSION (Algeb.)** is a term applied to the powers of any root in any equation: thus, in a biquadrate equation the highest dimension of the root is 4.
- DIMIDIA'TUS (Bot.)** from *dimidium*, half, halved; an epithet for a spathe, a capitulum, and an involucre.
- DIMIDIETAS (Law)** is used in records for one half.
- DIMINISHED Angle (Fort.)** vide *Angle.*
- DIMINISHED (Mus.)** an epithet for an interval, when, by the application of a sharp or natural to the lower tone, or of a flat or natural to an upper one, it becomes contracted within its natural compass.
- DIMINISHING the Coin (Law)** the reducing of the coin to less quantity or value by clipping, cutting, filing, &c.
- DIMINUENDO (Mus.)** abbreviated *dim.*; an Italian word in music-books, implying that the loudness of the passage over which it is placed is to be gradually lessened.
- DIMINUTION (Mus.)** the abating something of the full quantity of a full note.
- DIMINUTION (Her.)** the defacing of some particular point in the escutcheon.
- DIMINUTION (Archit.)** the lessening a pillar by little and little.
- DIMINUTION (Law)** an omission in the record, or in some part of the proceedings, which is certified in a writ of error on the part of either plaintiff or defendant. *Co. Ent.* 232.
- DIMINUTIVE (Gram.)** a word that lessens the meaning of the original term from which it is derived, as *culter*, a knife, *cutellus*, a little knife.
- DIMISSORY (Ecc.)** an epithet for a letter sent by a bishop; *dimissory letters* are sent from one bishop to another in favour of one who stands candidate for Holy Orders in another diocese.
- DI molto (Mus.)** an augmentative expression in the Italian, as *allegro di molto*, very quick.
- D in alt (Mus.)** the fifth note in alt.—*D in altissimo*, the fifth note in altissimo.
- DIMORPHA (Bot.)** a genus of plants, Class 17 *Diadelphia*, Order 4 *Decandria.*
Generic Character. CAL. perianth one-leaved.—COR. petals very wide.—STAM. filaments diadelphous; anthers incumbent.—PIST. germ short; style longer than the stamens; stigma simple.—PER. legume large; seeds few.
Species. The species are trees, as the—*Dimorpha falcata*, seu *Eperua*, native of Guiana.—*Dimorpha grandiflora*, seu *Parivoa*, native of Guiana.
- DIMORPHOTHECA (Bot.)** another name for the *Calendula* of Linnæus.
- DINICA (Med.)** from *δίνω*, to turn round; medicines against a vertigo.
- DYNOS (Med.)** δῖνος; the vertigo.
- DIOBOGON (Med.)** vide *Scrupulus.*
- DIOBOLUS (Ant.)** a coin equivalent to two oboli.
- DIOCESAN (Ecc.)** a name for a bishop who has the charge of a diocese committed unto him; also one living within the jurisdiction of the diocesan.
- DIOCESE (Ecc.)** the circuit or bounds of a bishop's jurisdiction: of these there are twenty-one in England, and four in Wales. *Co. Lit.* 94; *Wood's Inst.* 2.
- DIOLIA (Ant.)** Διόλια; a spring festival at Megara, in honour of the Athenian Hero, Diocles. *Theocrit. idyl.* 12, v. 27.
- DIODEA (Bot.)** a genus of plants, Class 4 *Tetrandria*, Order 1 *Monogynia.*
Generic Character. CAL. perianth two-leaved.—COR. one-petalled.—STAM. filaments four; anthers versatile.—PIST. germ roundish; style filiform; stigma two-cleft.—PER. capsule oval; seeds solitary.
Species. The species are natives of the West Indies.
- DIODON (Ich.)** a genus of fishes, Order *Branchiostegous*, having bony jaws, a body covered with spines, and no

ventral fins. Fishes of this tribe mostly inhabit the Indian seas.

DIODOS (*Med.*) διόδος, from διὰ, through, and ἴδος, the way; evacuation by stool.

DIŒCIA (*Bot.*) from δις, bis, and ἴκος, a house; the name of the twenty-second Class in Linnæus' Artificial System, comprehending those plants which have no hermaphrodite flowers, but the males and females on distinct individuals. The principal genera are as follow, namely, in—Monandria, as *Pandanus*, Screw Pine; *Brosimum*, Milk-wood.—Diandria, *Cecropia*, Snake-wood; *Salix*, Osier, Willow.—Triandria, *Empetrum*, Crowberry, Crakeberry; *Ruscus*, Butcher Broom; *Osyris*, Poet's Cassia; *Myristica*, Nutmeg-Tree; *Phoenix*, Date Plum.—Tetrandria, *Viscum*, Misseltoe; *Myrica*, Candle Berry; *Anthospermum*, Amber-Tree.—Pentandria, *Pistacia*, Fistic or Pistachio Nut-Tree; *Xanthoxylon*, Toothach-Tree; *Spinacia*, Spinach; *Acnida*, Virginian Hemp; *Cannabis*, Hemp; *Humulus*, Hop.—Hexandria, *Tamus*, Black Bryony, *Bocassus*, Fan Palm.—Octandria, *Populus*, Poplar, *Aspen*, *Tacamahas*.—Enneandria, *Mercuriales*, Mercury; *Hydrocharis*, Frog-bit.—Decandria, *Coriaria*, Sumach.—Decandria, *Datisca*, Bastard Hemp; *Stratiotes*, Water-Soldier.—Monadelphina, *Juniperus*, Juniper; *Taxus*, Yew-Tree; *Ephreda*, Sea-Grass.

DIOŒCOUS (*Bot.*) an epithet for plants that have the male and female flowers on distinct individuals, from which comes the Class *Diœcia*.

DICENANTHES (*Med.*) διὰ ἀνέναντος, the name of an epithem against the *Cholora Morbus*, in Trallian, l. 7, c. 44.

DIOŒMOS (*Med.*) from διώκω, to persecute; distressing palpitation of the heart.

DIOMEDE'A (*Orn.*) the Heron or Hern, so called from Diomedes, whose companions, as the fable says, were converted into Herons.

DIOMEDEA, in the *Linnean system*, a genus of birds of the order *Anseres*.

Generic Character. Bill straight.—*Nostrils* oval, wide.—*Tongue* very small.—*Feet* four-toed.

Species. Birds of this tribe are aquatic, and mostly inhabit the Indian ocean. The principal species are as follow; namely,—*Diomedea exulans*, the Wandering Albatross, or Man of War Bird.—*Diomedea spadicea*, Chocolate Albatross.—*Diomedea Chlororhynchos*, Yellow-nosed Albatross, &c.

DIOMI'A (*Ant.*) Διομεία, a festival at Athens in honour of Jupiter Diomeus. *Eustath. Il.* l. 4.

DION (*Ant.*) Διών, the name of a month in which the autumnal equinox happened: it was in use only among the Macedonians. *Gal. com.* l. in *Hippocrat. Epid.* l. 1.

DIONCO'SIS (*Med.*) διόγκωσις, from ὄγκος, a tumor; tumefaction, ampliation.

DIONŒA (*Bot.*) a genus of plants, Class 10 *Decandria*, Order 1 *Monogynia*.

Generic Character. CAL. perianth five-leaved.—COR. petals five.—STAM. filaments ten; anthers roundish.—PIST. germ roundish; style filiform; stigma spreading.—PER. capsule one-celled; seeds very many.

Species. The species, the *Dionœa Muscipula*, Venus' Fly-trap, is a perennial or biennial, native of Carolina.

DIONIS (*Med.*) the name of a *Colyrium*. *Oribas. Synops.* l. 3.

DIONYSIA (*Ant.*) Διονύσια, solemnities in honour of Διόνυσος, or Bacchus, which were celebrated at Athens in greater splendour than in any other part of Greece. In most cases they were attended with much riot and revelling, particularly on the part of those who officiated as his immediate votaries, who ran about uttering hideous yells, and distorting themselves by every sort of frantic grimace and gesticulation. The festivals of Bacchus were almost in-

numerable, and distinguished by the names of the Διονύσια ἀρχαιότερα, νεότερα, &c. *Thucyd.* l. 2; *Demosth. Orat. in Næaram. et Neptin.*; *Poll. Onom.* l. 8; *Harpocration.*; *Hesychius*.

DIONYSIA (*Surg.*) a sort of plaster for abscesses.

DIONYSIAS (*Bot.*) vide *Androsæmum*.

DIONYSI'SCI (*Anat.*) Διονυσίσκοι, from Διόνυσος, Bacchus, who was represented with Horns; certain bony eminences near the temples.

DIONYSOMPHAS (*Bot.*) from Διόνυσος, Bacchus, and νόμφα, a nymph; a herb which if bruised smells of wine, and yet resists drunkenness.

DIONYSOS (*Med.*) Διόνυσος, the name of a collyrium containing myrrh. *Aet. Tetrab.* 2, serm. 3.

DIOPORON (*Med.*) a medicine for the quinsy. *Cal. Aurelian. de Acut. Morb.* l. 3, c. 3.

DIOP'SIS (*Ent.*) a genus of Insects of the Dipterous Order, having two inarticulate filiform antennæ much longer than the head, at the tip of which are placed the eyes. The body is reddish, and the abdomen clavate.

DIOPTER (*Mech.*) vide *Dioptra*.

DIOPTRA (*Mech.*) or *Dioptra*, δίοπτρα, διοπτρή, from διοπτέω, to take a level or aim; an instrument among the ancients for taking altitudes, levelling water-courses, &c. *Vitruv.* l. 8, c. 6; *Plin.* l. 2, c. 69; *Martian. Capell.* l. 6, c. de posit. terr.

Dioptra is now the name for the index or alidade of an astrolabe.

DIOPTRA (*Surg.*) an instrument to enlarge the womb for the extraction of the fœtus.

DIOPTRICS (*Opt.*) from δίοπτρα, to see through; that part of optics which treats of refracted rays, and their union with one another, according as they are received by glasses of this or that figure.

DIOPTRISMOS (*Surg.*) the operation which consists in dilating the natural passages with a *dioptra* or *speculum*.

DIOROBON (*Med.*) δι' ὀροβῶν, a medicine having vetches as a principal ingredient.

DIORRHOSIS (*Med.*) διάρρησις or διάρρωσις, from ῥῆσις or ῥῥῆσις, serum; a conversion of the humours into water or serum.

DIORTHO'SIS (*Med.*) διόρθωσις, from διορθῶ, to make straight; operations where crooked and distorted members are made straight, and restored to their due shape.

DIOSCŒREA (*Bot.*) a genus of plants called after Dioscorides, Class 22 *Diœcia*, Order 6 *Hexandria*.

Generic Character. CAL. perianth one-leaved.—COR. none.—STAM. filaments six; anthers simple.—PIST. in the female; germ very small; styles three; stigmas simple.—PER. capsule large; seeds in pairs.

Species. The species are perennials, as the—*Dioscorea alata*, *Volubilis*, seu *Ricophora*, Winged-stalked *Dioscorea*, native of the West Indies.—*Dioscorea Bulbifera*, seu *Rhizophora*, native of the Indies.—*Dioscorea villosa*, *Polygonum*, Hairy *Dioscorea*, native of Florida, &c.

DIOSCŒRI (*Anat.*) Διόσκωροι, Castor and Pollux; was the name given to the parotids on account of their twin-like shape and appearance.

DIOSCŒRIA (*Ant.*) Διοσκωρίαι, a festival in honour of Castor and Pollux, particularly observed by the Spartans. *Pausan.* l. 4; *Pindar. Schol. Pyth. od.* 5.

DIOSMA (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Character. CAL. perianth five-leaved.—COR. petals five.—STAM. filaments five; anthers erect.—PIST. germ crowned with the nectary; style simple; stigmas obscure.—PER. capsules five; seeds solitary.

Species. The species are all shrubs, and natives of the Cape of Good Hope, as the—*Diosma oppositifolia spiræa*, seu *Hypericum*, Opposite-leaved *Diosma*.—*Diosma rubra*, seu *Erica*, Red Flowered *Diosma*.—

Diosma cupressina, seu *Brunia uniflora*.—*Diosma uniflora*, *Cistus*, seu *Hartogia uniflora*, One-flowered *Diosma*.—*Diosma pulchella*, seu *Hartogia pulchella*, Oval-leaved *Diosma*.

DIOSPOLITICON (*Med.*) διοπολιτικόν, a compound carminative. *Gal. de sanit. tuend.* l. 4, c. 5.

DIOSPYROS (*Bot.*) διοσπύρος, a fruit like a cherry mentioned by Theophrastus and Galen; the latter of whom reckons it among the aliments of small nutrition. *Theophrast. Hist. Plant.* l. 3, c. 13; *Gal. de Alim. Fac.* l. 2, c. 38.

DIO'SPYROS (*Bot.*) a genus of plants, Class 23 *Polygamia Diœcia*, Order 2 *Octandria Monogynia*.

Generic Character. CAL. perianth one-leaved.—COR. one-petalled.—STAM. filaments eight; anthers oblong.—PIST. in the female; germ roundish.—PER. berry globose; seeds solitary.

Species. The species are Trees, as the—*Diospyros Lotus*, European Date-plum, *Lotus Africana*, *Pseudo-lotus*, *Guaiacum*, *Guajacana*, seu *Zizyphus*.—*Diospyros Virginiana*, American Plum Tree, *Lotus Virginiana*.—*Diospyros Kaki*, seu *Kis Kaki*.—*Diospyros Ebenaster*, seu *Hebenaster*, native of Ceylon.

DIO'TA (*Ant.*) a jar for wine with two handles.

DIOTA (*Chem.*) a circulating or double vessel.

DIOTOTHE'CA (*Bot.*) another name for the *Morina* of Linnæus.

DIOXELÆ'UM (*Med.*) from διὰ, through, ἄξις, acid, and ἔλαιον, oil; a malagma of oil and vinegar, for the gout. *Coel. Aurelian. Chron.* l. 5, c. 2.

DIO'XUS (*Med.*) from ἄξις, acid; a collyrium in which vinegar is the chief ingredient. *Marcell. Empyric.* c. 8.

DIP of the *Horizon* (*Astron.*) vide *Depression*.

DIP of the *magnetic Needle* (*Mar.*) a property which all needles possess, when rubbed with the loadstone, of inclining the north end below the level of the horizon.

DIP'CAD (*Bot.*) vide *Muscari*.

DIPETALUS (*Bot.*) dipetalous, an epithet for a corolla having two petals only, as in *Circœa*, *Commelina*, &c.

DIPHORETICUS SUDOR (*Med.*) a faint, excessive sweat.

DIPH'RHIS (*Min.*) vide *Diphys*.

DIPH'RUX (*Min.*) from δις, twice, and φέρω, to burn, because it is twice burnt; a name for the dregs of brass which remain in the furnace after melting; it is reckoned astringent and a potent cleanser. *Dioscor.* l. 5, c. 120; *Plin.* l. 34, c. 13.

DIPH'THERA (*Nat.*) διφθίρα, an entire goat's skin, which was the habit of a slave. *Aristoph. Vesp.*; *Schol. in Nub.* act. 1, scen. v. 73; *Lucian. Timon.*; *Poll. Onom.* l. 7, seg. 70; *Rhodig. Ant. Lect.* l. 16, c. 10.

DIPH'THONG (*Gram.*) διφθόγγος, from δις and φθίγγομαι, to sound; two vowel sounds united into one.

DIPHY'LLUS (*Bot.*) diphyllous, an epithet for a calyx having two leaves, as the *Papaver* and *Fumaria*. It is also applied to the *cirrus*, or tendril, as in *Lathyrus*; and to the peduncle, as in *Gomphrena*.

DIPHYS (*Min.*) διφυσ, from δις and φύω, to generate; a precious stone of a double kind, or gender, black and white, male and female. *Plin.* l. 37, c. 10.

DIPHY'SA (*Bot.*) a genus of plants, Class 17 *Diadelphica*, Order 4 *Decandria*.

Generic Character. CAL. perianth one-leaved.—COR. papilionaceous.—STAM. filaments ten; anthers ovate.—PIST. germ pedicelled; style rising; stigma simple.—PER. legume linear; seeds oblong.

Species. The single species is *Diphysa carthaginensis*, native of Carthage.

DIPLASIA'SMUS (*Med.*) διπλασιασμός, from διπλόω, to double; a reduplication of diseases.

DIPLE (*Ant.*) a mark formerly used in the margin of books

by way of reference to authorities. *Cic. ad Attic.* l. 8, ep. 2; *Isid. Orig.* l. 1, c. 22.

DIPLINTHIUS (*Archit.*) from δις and πλῆθος, a brick; an epithet for a wall two bricks thick.

DIPLOE (*Anat.*) δισπλόη, the soft medullum which lies between the laminæ of the bones of the cranium.

DIPLOE (*Chem.*) a double vessel. [vide *Diploma*]

DIPLO'MA (*Ant.*) διπλωμα, from διπλόω, double; a letter, patent, or a charter from the prince; so called because it was folded or doubled. *Cic. in Pison.* l. 37; *Plin.* l. 10, ep. 121; *Sueton. Ner. c.* 12, &c.; *Plut. in Galba*; *Macrobi. Sat.* l. 1, c. 23; *Sigon. de Ant. Jur. Prov.* l. 2, c. 5; *Bud. Pandect.* p. 231; *Panciroll. Notit. dignit. imp. Orient.* c. 6; *Laz. Comment. Reip. Rom.* l. 2, c. 4.

DIPLOMA (*Polit.*) a licence for exercising certain functions; as a physician's diploma, &c.

DIPLOMA (*Chem.*) a double vessel. Thus, "To boil in *diplo*ma," is to put the vessel which contains the ingredients into a second vessel, to which the fire is applied.

DIPLO'PIA (*Med.*) from διπλόω, double, and ὄραμαι, to see; a disease in the eye in which the person sees an object double or triple.

DIPOND'IUM (*Ant.*) a weight of two pounds. *Isid. Orig.* l. 16, c. 24.

DIPNOUS (*Surg.*) διπνοος, from δις, double, and πνέω, to breathe; an epithet for wounds which have two spiracula or orifices.

DIPPEL'S animal oil (*Chem.*) a volatile oil, formed during the distillation of different animal substances; so called from the chemist who first observed it.

DIPPING Needle (*Mar.*) an epithet for the magnetical needle, which, when duly poised about an horizontal axis, will have a direction of altitude in an horizontal position above the horizon, besides its direction towards the North.

DIPSACUS (*Bot.*) διψάει, or διψακος, Teasel; a prickly plant so called from διψάω, thirst, because it provokes thirst. *Theoph. Hist. Plant.* l. 4, c. 8; *Dioscor.* l. 3, c. 13; *Plin.* l. 27, c. 9; *Gal. de Simpl.* l. 6; *Act. Tetrab.* l. 1, serm. 1.

DIPSACUS, in the *Linnean system*, a genus of plants, Class 4 *Tetrandria*, Order 1 *Monogynia*.

Generic Character. CAL. perianth common.—COR. proper universal.—STAM. filaments four; anthers incumbent.—PIST. germ inferior; style filiform; stigmas simple.—PER. none; seeds solitary.

Species. The species are biennial, as the—*Dipsacus sylvestris*, seu *Carduus*, Cultivated Teasel.—*Dipsacus sylvestris*, seu *Labium*, Wild Teasel.—*Dipsacus laciniatus*, Cut-leaved Teasel.—*Dipsacus pilosus*, seu *Virga pastoris*, Small Teasel.

DIPSACUS is also the *Scabiosa alpina*.

DIP'SAS (*Zool.*) a sort of serpent; so called because it provokes great thirst in the person who is bitten by it. *Isid.* l. 12, c. 4.

DIP'TERA (*Ent.*) the sixth order of insects in the *Linnean system*, comprehending the genera which have two wings, with a poiser on each side. The genera are distinguished into, 1. Those which have a proboscis and sucker; namely, *diopsis*; *tipula*, the Crane-Fly; *musca*, the Fly; *tabanus*; *empis*; *conops*. 2. Those which have a sucker and no proboscis, as *oestrus*, the Gad-Fly and the Breeze; *asilus*; *stomoxys*; *culex*, the Gnat; *bombylius*, the Humble-Bee; and *hijpobosca*.

DIP'TERON (*Archit.*) διπτερον, a building which has a double wing or isle. *Vitruv.* l. 3, c. 1.

DIP'TERYX (*Bot.*) a genus of plants, Class 17 *Diadelphia*, Order 4 *Decandria*.

Generic Character. CAL. perianth one-leaved.—COR. papilionaceous.—STAM. filaments eight to ten; anthers small.

—**PIST.** germ oblong; style awl-shaped; stigma acute.
PER. legume large; seeds ovate.

Species. The two species are—*Dipteryx odorata et oppositifolia*, which are trees.

DIPTOTES (*Gram.*) διπτωτα, a name for those nouns which have only two cases. *Isid. Orig.* l. 1, c. 6.

DIPTYCHA (*Archæol.*) διπτυχα, from δις, twice, and πτυχι, a leaf or fold; a register so called because it consisted of two leaves, on one of which were written the names of the living, and on the other those of the dead, who were honoured with the distinction of having their names recited in the liturgy.

DIPTYCHUM (*Ecc.*) διπτύχον, a table in which the Greek church enrolled the names of persons baptized; also a register of eminent persons deceased, whose names were rehearsed at the altar.

DIPYRENON (*Surg.*) διπύρνον, from δις, twice, and πυρην, a kernel; a probe having two buttons at one end. *Cæl. Aurel. de Morb. Acut.* l. 3, c. 3; *Gal.*

DIPYROS (*Ant.*) from δις, twice, and πῦρ, fire; an epithet for bread twice baked.

DIRADIATION (*Med.*) an invigoration of the muscles by the animal spirits.

DIRÆ (*Ant.*) another name for the *Furies*.

DIRCA (*Bot.*) a genus of plants, Class 8 *Octandria*, Order 1 *Monogynia*.

Generic Character. **CAL.** none.—**COR.** one-petalled.—**STAM.** filaments eight; anthers roundish.—**PIST.** germ ovate; style filiform; stigma simple.—**PER.** berry one-celled; seeds single.

Species. The single species is a shrub, as the—*Dirca palustris*, seu *Strymella*, Marsh Leather Wood.

DIRECT (*Arith.*) an epithet for a rule; namely, "The Rule of Three Direct," when the proportion of any terms or quantities is in the natural or direct order in which they stand, in distinction from "The Rule of Three Inverse." [vide *Rule of Three*]

DIRECT (*Astron.*) is when a planet, by its proper motion, goes forward in the zodiac according to the natural order and succession of the signs, in distinction from the retrograde.—*Direct sphere*, is the same as *Right sphere*.—*Direct dials*, vide *Dials*.

DIRECT ray (*Opt.*) a ray which is carried from a point of the visible object directly to the eye, without being turned out of its rectilinear direction by any intervening body, opaque or pellucid.—*Direct vision*, that vision which is performed by means of direct rays.

DIRECT (*Mus.*) a certain character placed at the end of a stave, to apprise the performer of the situation of the first note in the succeeding stave.

DIRECT (*Law*) an epithet for the line of ascendants and descendants in genealogical succession.

DIRECTION, *line of* (*Gunn.*) the direct line in which a piece is pointed.

DIRECTION (*Astron.*) the motion and other phænomena of a planet when direct.

DIRECTION (*Astrol.*) a motion by which any star, or part of the celestial sphere, that is supposed to have any influence on mundane affairs, is carried to another star, or another part of the heaven, which has also a signification in reference thereto.

DIRECTION, *line of* (*Mech.*) the line of motion which any natural body observes, according to the force impressed upon it.—*Angle of direction*, the angle comprehended between the lines of direction of two conspiring powers.—*Quantity of direction*, the quantity which arises from the multiplying the velocity of the common centre of gravity by the sum of their masses.

DIRECTION, *number of* (*Chron.*) one of the thirty-five numbers between the Paschal Limits, or between the

earliest and latest day on which Easter can fall, namely, between March 22 and April 25, comprehending a space of thirty-five days. [vide *Chronology*]

DIRECTION Word (*Print.*) the word which begins the next page, that is set at the bottom of the page preceding.

DIRECTOR (*Surg.*) a hollow instrument for guiding an incisor knife.

DIRECTOR (*Mus.*) the person who undertakes the management of a concert.

DIRECTOR'S (*Anat.*) another name for the *Erectores penis*.

DIRECTORY (*Polit.*) a form of public prayer, &c. used in the time of the rebellion instead of the Book of Common Prayer.

DIRECTRIX (*Math.*) a right line, perpendicular to the axis of a conic section, as AB, in the annexed figure, which is so placed, that if any point, F, be assumed without it, and while the line, FD, revolves about F as a centre, a point, D, moves in such a manner, that its distance from F shall always be to CD its distance from the line AB, in a constant ratio: then VD, described by the point D, is a conic section, which is either an ellipse, a parabola, or an hyperbola, according as FD is less than, equal to, or greater than, CD, or FV than VA.

DIRGE (*Mus.*) a song of lamentation sung at funerals.

DIRIBITORES (*Ant.*) 1. Officers at the Roman elections who distributed the tables among the electors who were to give their vote. *Cic. post. Red. in Sen.* c. 11. 2. Servants who distributed the different portions to the respective guests at entertainments. *Apul. Met.* l. 2, p. 53; *Buleng. de Conviv.* l. 2, c. 1.

DIRIGENT (*Geom.*) a term expressing the line of motion along which a describent line or surface is carried in the genesis of any plane or solid figure. Thus, if the line AB move parallel to itself, and along the line AD, so that the point A always keeps in the line AD, and the point B, in the line BC, a parallelogram, ABCD will be formed, of which the line AB is the describent, and the line AD the dirigent.

DIRENGA (*Bot.*) a name for the sweet-scented flag.

DIRK (*Mil.*) a kind of dagger used by the Highlanders, which they generally wear stuck in their belts.

DIVSA (*Bot.*) genus of plants, Class 10 *Gynandria*, Order 1 *Diandria*, Natural Order of *Orchidaceæ*. The species are natives of the Cape of Good Hope.

DISABLED (*Mar.*) an epithet for a seaman who is by wounds rendered unfit for service; and also for a vessel which, by the loss of her masts, sails, yards, &c. is unable to prosecute her voyage.

DISABILITY (*Law*) an incapacity in a man to inherit lands, or enjoy the possession of them, &c. which may happen by the act of the ancestor, who is attainted of treason, &c.; by the act of the party who has disabled himself by entering into a previous obligation; by the act of God, where a person is of non-sane memory, &c.; by an act of the law, as an alien born.

DISALLO'WANCES (*Mil.*) deductions made from military estimates, when the charges against the public do not appear.

DISANDRA (*Bot.*) a genus of plants, Class 7 *Heptandria*, Order 1 *Monogynia*.

Generic Character. **CAL.** perianth one-leaved.—**COR.** one-petalled.—**STAM.** filaments five to eight; anthers sagitate.—**PIST.** germ ovate; style filiform; stigma simple.—**PER.** capsule ovate; seeds ovate.

Species. The species are perennials, as the—*Disandra prostrata*, Trailing Disandra, seu *Sibthorpia*, native of

Madeira.—*Disandra africana*, seu *Chryso splenii*, native of Africa.

DISBANDED (*Mil.*) an epithet for a regiment who, in a body, are discharged from the conditions of military service.

DISC (*Astron.*) or *disk*, the body or face of the sun or moon, as it appears to us. The *illuminated disc* of the Earth is that which is otherwise called the *Circle of Illumination*. [vide *Circle of Illumination*]

Disc (*Opt.*) the magnitude of a telescope glass, or the width of its aperture, whether plane, convex, or of any other form.

DISCARCATIO (*Archæol.*) the unloading of a ship.

DISCENT (*Law*) vide *Descent*.

DISCESSUS (*Chem.*) in general the separation of any two bodies before united; but in particular the separation of gold from silver by *agua fortis*. *Ovid. Met.* l. 10, v. 176; *Poll. Onom.* l. 3, segm. 151, &c.; *Eustath. Hom. Il.* l. 23, v. 774; *Mercur. Gymnast.* l. 2, c. 12; *Stuck. Ant. Conv.* l. 3, c. 12; *Panvin. de Lud. Circ.* l. 2, c. 1.

DISCHARGE (*Law*) a release from confinement, or the restraints of any legal process, when a man who is arrested shall have done what he is required to do.

DISCHARGE (*Mil.*) a remission of the service for the remainder of the time that a man has been engaged.

DISCHARGER (*Elec.*) or *Discharging Rod*, an instrument made of glass, or baked wool, by the help of which an electric jar is discharged.

DISCIPLINARIANS (*Ecc.*) sectaries who pretend to a stricter discipline than those of the established church.

DISCLAIMER (*Law*) a plea, containing an express denial or refusal.

DISCIPLINE (*Mil.*) signifies generally the instruction and government of soldiers; but *marine discipline* the training up of soldiers for sea service.

DISCLOSED (*Falcon.*) a term applied to young hawks newly hatched, and, as it were, put forth from their shells.

DISCOBOLOS (*Ant.*) from *δίσκος*, a disk, and *βάλλω*, to cast; one who was skilled in throwing the disk or quoit. *Plin.* l. 35, c. 2; *Quintil.* l. 2, c. 13.

DISCOMMON (*Cus.*) a term in the universities for depriving the trades-people of their privileges who offend against the statutes.

DISCONTINUANCE of a plea or process (*Law*) is when the opportunity of prosecution is lost, and is not recoverable but by the recommencement of the suit.

DISCONTINUATION of possession (*Law*) is when a man may not enter upon his own land and tenement alienated, whatsoever his right be, but must bring his writ, and seek to recover possession by law.

DISCORD (*Mus.*) a dissonant or inharmonious combination of sounds, in distinction from a concord. There are various *Discords*, as those which arise from the union of the fifth with the sixth, the fourth with the fifth, the seventh with the eighth, and the third with the ninth and seventh.

DISCOVER (*Law*) a term for a woman unmarried, or a widow, i. e. one not within the bonds of matrimony.

DISCOVERY (*Law*) the act of disclosing or revealing by a defendant, in his answer to a bill filed against him in a court of equity.

DISCOUNT (*Com.*) or *Rebate*, an allowance made on a bill, or any other debt not yet become due, in consideration of making immediate payment of the bill or debt.

DISCOUNT (*Arith.*) a rule for making calculations of discount.

DISCRETA purgativa (*Med.*) a sort of purgatives, by which a certain determinate humour is evacuated.

DISCRETE proportion (*Arith.*) is when the proportion disjoins in the middle, or when the ratio of the first term to the

second is not the same as that of the third to the fourth.—*Discrete quantity*, is such as is continued and joined together.

DISCRETIVE proposition (*Log.*) such propositions as have disjunctive or disjunctive particles; as, *but*, *notwithstanding*, &c.; whereby the sense is disjoined.

DISCRETO (*Mus.*) an Italian word, signifying to play or sing with care; moderation or judgment.

DISCRETORIUM (*Anat.*) another name for the *Diaphragm* or *Midriff*.

DISCRIMEN (*Surg.*) a bandage used in bleeding on the forehead and temples.

DISCURSUS (*Log.*) the third part of logic, which consists in ratiocination: it is otherwise called *Argumentation*.

DISCUS (*Ant.*) *δίσκος*, from *δίσσω*, for *δίσσω*, to cast, a disc or quoit; any round substance of stone, lead, or iron, with a hole in the middle, which was used by way of a game, to see which could throw it farthest.

Pind. Isth. 1.

Ἦν ὁ δὲ τε χερσὶν ἀκοντίζοντες αἰχμῶν
καὶ λίθων ὅποτε δίσκος, ἴεν.

Mart. l. 14, ep. 164.

*Splendida cum volitant Spartani pondera disci
Este procul pueri: sit semel ille nocens.*

Propert. l. 3, el. 12, v. 10.

Missile nunc disci pondus in orbe rota.

DISCUS (*Astron.*) vide *Disk*.

DISCUS (*Bot.*) the Disk, or whole surface of a leaf, which is either *supinus*, the upper, or *pronus*, the under surface. The disk of a flower is the central part in radiate compound flowers, consisting generally of regular corollules or florets. It is also applied to other aggregate flowers, the florets of which, towards the middle, differ from those in the circumference.

DISCUSSION (*Surg.*) a dispersing the matter of any swelling, i. e. a discharge of some thin matter which is collected in any part by insensible evaporation.

DISCUTIENT (*Med.*) or *Discussory medicines*, those which dissolve impacted matter.

DISEASE (*Med.*) any settled affection in the body which throws it out of its natural course.

to DISEMBARK (*Mil.*) to land troops from any vessel.

to DISEMBOGUE (*Geog.*) from the old French *disemboucher*, or *des* and *bouche*, a mouth; a term applied to rivers which discharge themselves into the sea.

to DISEMBOGUE (*Mar.*) also a term applied to vessels which pass from the mouth of a strait into the sea.

to DISENGAGE (*Mil.*) to clear a column or line which may have lost its front by the overlapping of any particular division, company, or file.

to DISENGAGE (*Fenc.*) to quit that side of your adversary's blade on which you are opposed by his guard, in order to effect a cut or thrust where an opportunity may present.

DISERMAS (*Bot.*) a species of the *Salvia*.

to DISFRANCHISE (*Law*) to take away the franchise or freedom of any individual, or of any town.

to DISGARNISH (*Fort.*) to take away guns from a fortress.

DISHERISON (*Law*) disinheriting.

DISHERITOR (*Law*) one who puts another out of his inheritance.

DISJUNCT (*Mus.*) *διαζευγμένον*, an epithet for those tetrachords which were so disposed with respect to each other that the gravest note of any tetrachord was a note higher than the acutest note of the tetrachord immediately beneath it.

DISJUNCT proportion (*Math.*) vide *Discrete Proportion*.

DISJUNCTIVE (*Gram.*) an epithet for any particle, such

as *or*, *nor*, &c. which separates the sense, in distinction from the *conjunctive* particles.

DISJUNCTIVE proposition (*Log.*) διαζευγμένον, *disjunctum*, a proposition in which two or more simple propositions are connected by a disjunctive conjunction. *Aul. Gell.* l. 5, c. 11.

DISK (*Astron.*) *discus*, the round face of the sun or moon as it appears to the eye.

DISK (*Bot.*) vide *Discus*.

DISLOCATION (*Surg.*) from *disloco*, to put out of its place; the putting of a bone out of its place, or the removal of the moveable extremity of a bone from the hollow or socket in which it is naturally moved, otherwise called *Luxation*.

DISLOCATION of an army (*Mil.*) is equivalent to its distribution into cantonments.

to **DISLODGE** (*Mil.*) to drive an enemy from any post or station.—*To dislodge a camp* is to strike the tents, &c. and to march away.

to **DISLODGE** (*Sport.*) to rouse beasts of the chase from their lodging, or harbour.

to **DISMANTLE** (*Fort.*) in French *demanteler*, to take off the cloak; to beat or pull down the walls or fortifications of a city.

to **DISMANTLE** (*Mar.*) to unrig a ship, and take out all her stores, guns, &c.

DISMASTED (*Mar.*) an epithet for a ship which is deprived of her masts.

DISMEMBERED (*Her.*) an epithet for an animal, a cross, or any thing else which is, as it were, cut in pieces, but not so as to destroy the form, as “*Or a lion rampant, gules dismembered,*” &c.

DISMES (*Law*) the tithes.

to **DISMISS** (*Mil.*) to take an officer's commission or warrant from him.

to **DISMISS a cause** (*Law*) a term in the court of chancery for removing it out of court without any farther hearing.

to **DISMOUNT** (*Mil.*) to unhorse. “*To dismount the cavalry,*” to make them alight.

to **DISMOUNT a piece of ordnance** (*Gunn.*) to throw or take it down from the carriage.

DISPARAGEMENT (*Law*) the disposing of an heir or heiress in marriage under his or her degree, or against decency. *Magn. Chart.* c. 6; *Co. Lit.* 107.

DISPARAGÓ (*Bot.*) a species of the *Stoebe*.

DISPARATES (*Log.*) opposites, or things altogether unlike one another.

DISPART (*Gunn.*) the thickness of the metal on the mouth and breech of the piece.

to **DISPART a cannon** (*Gunn.*) to set a mark at or near the muzzle-ring of a gun, that a sight-line taken upon the top of the base-ring, against the touch-hole, may thereby be parallel to the concave cylinder of the piece, by which the gunner takes his aim.

DISPARTCHES (*Polit.*) letters sent abroad upon public affairs.

DISPAUPERED (*Law*) put out of the capacity of suing *in forma pauperis*; as if a person, before his suit is ended, have any lands, &c. fall to him, he is then dispaupered, or put out of the capacity of suing in that form.

DISPENSARY (*Med.*) a place where medicines are retailed, or delivered out.

DISPENSATION (*Ecc.*) an indulgence or licence from the pope to do what is otherwise prohibited, as the marriage of first cousins, &c.

DISPENSATION (*Law*) an exclusive privilege to do any thing that is otherwise contrary to law, which is granted by the king in council.

DISPENSATION (*Ecc.*) an indulgence or permission from the pope to do that which is otherwise prohibited by the church.

DISPENSATION (*Med.*) is when the simples of a composition are set in order, lest any of the ingredients should be forgotten.

DISPENSATION (*Theol.*) the gift of divine revelation to man, namely, of the Levitical Law to the Jews, and of the Gospel to Christians.

DISPENSATOR (*Ant.*) a steward, or one who managed the expenses of a family. *Cic. Hort. apud Non.* l. 3, c. 18; *Plin.* l. 33, c. 2; *Suet. Aug.* c. 67.

DISPENSATOR (*Med.*) a name for an apothecary, because he is a dispenser of medicines.

DISPENSATORY (*Med.*) a book which directs apothecaries in the compounding of medicine, defining the ingredient and the quantity, &c.

DISPERMIUS (*Bot.*) *dispermous*, or two-seeded, an epithet for fruit which contains only two seeds, as in *umbellate* and *stellate* plants.

DISPERSION (*Opt.*) the divergency of the rays of light.—*Dispersion of light* is occasioned by the refrangibility of the rays, or the nature of the refracting medium.—*Point of dispersion* is a point from which refracted rays begin to diverge, when their refraction renders them divergent.

DISPERSONARE (*Archæol.*) to scandalize or disparage.

to **DISPLAY** (*Mil.*) in French *deployer*, to extend the front of a column.

DISPLAYED (*Her.*) an epithet for birds having their wings expanded, as he bears “*Azure an eagle displayed, argent armed gules*; on a canton of the second a sinister hand couped as a third.” These were the arms of Sir Robert Cotton, founder of the *Cotton Library*.

DISPOSITION (*Mil.*) the placing an army in such manner as may be most suitable for a vigorous attack or defence. *Faire des dispositions* signifies to make the necessary arrangements for a battle.

DISPOSITION (*Archit.*) the just placing all the several parts of a building. *Vitruv.* l. 1, c. 2.

DISPOSITOR (*Astrol.*) the planet which is lord of the sign where another planet chancs to be.

DISRUPTIO (*Med.*) a violent rupture, penetrating the skin to the flesh.

DISSECTION (*Anat.*) the cutting asunder of animal bodies, in order to come at the knowledge of their parts. [vide *Anatomy*]

DISSIDIUM *dissectio* (*Bot.*) gashed; an epithet for a leaf, as *folium dissectum*, a gashed leaf, which is distinguished from the *lacinate leaf* by the sections being more determinate.

DISSEISEE (*Law*) vide *Disseisin*.

DISSEISIN (*Law*) an unlawful dispossessing a man of his lands, tenements, or other immoveable or incorporeal rights. The person dispossessing is called the *disseisor*, and the person dispossessed the *disseisee*.—*Disseisin upon disseisin* is where the disseisor is put out of possession by another.

DISSEISOR (*Law*) vide *Disseisin*.

DISSENTER (*Ecc.*) one who dissents or departs from the communion of the Christian church, particularly from that part of it established in England.

DISSEPIMENTUM (*Bot.*) a partition, or wall, by which the pericarp is separated into cells; this is *parallelum* when it approaches in breadth, and its transverse diameter to the valves; *contrarium* when it is narrower than the valves.

DISSILIENS (*Bot.*) bursting, or elastic; an epithet for the pericarp, or fruit, which opens with a spring, as in *Hura*, *Dentaria*, *Cardamine*, &c.

DISSIPATION (*Phy.*) a gradual, slow, insensible loss or consumption of the minute parts of a body.

DISSIPATION, *Circle of* (*Opt.*) or *Circle of Aberration*, that circular space on the retina of the eye which is occupied

by the rays of each pencil in indistinct vision.—*Radius of Dissipation*, the radius of the circle of dissipation.

DISSOLVENT (*Med.*) a medicine fitted to disperse collected humours.

DISSOLVENT (*Chem.*) a liquor proper for dissolving a mixed body.

DISSOLVENTIA (*Med.*) dissolvents. [vide *Dissolvent*].

DISSOLUTION (*Med.*) the mingling of mixed electuaries or powders in waters.

DISSOLUTION (*Chem.*) that action by which fluids loosen the texture of immersed bodies, and reduce them into very small parts, as water dissolves sugar, aqua fortis dissolves brass, &c.

DISSOLUTUS morbus (*Med.*) another name for the *Dysentery*.

DISSONANCE (*Mus.*) a discordant interval between two sounds, which being continued together offend the ear.

DISTAFF-THISTLE (*Bot.*) a species of the *Atractylis* of Linnæus.

DISTANCE (*Geom.*) the shortest line between any two points or objects.—*Accessible distances* are measured with a chain, &c.—*Inaccessible distances* are found by taking bearings to them from the two extremities of a line whose length is given.

DISTANCE (*Astron.*) as applied to the planets, and other heavenly bodies, is either apparent, real, or relative.—*Apparent distances* are such as are judged of by the eye.—*Relative distances* are deduced from the theory of gravity.—*Real distances* from the parallex, relative distances, &c.—*Distance of the sun from the moon's node*, or *apogee*, an arc of the ecliptic, intercepted between the sun's true place and the moon's node, or apogee.—*Curtate distance*. [vide *Curtate*]

DISTANCE of the bastions (*Fort.*) the side of the exterior polygon.

DISTANCE (*Geog.*) the arc of a great circle intercepted between two places.

DISTANCE (*Mar.*) the number of miles or leagues which a ship has sailed from any point or place.

DISTANCE, line of (*Perspect.*) a right line drawn from the eye to the principal point.—*Point of distance*, a point on the horizontal line at the same distance from the principal point as the eye is from the same. [vide *Perspective*].

DISTANS (*Bot.*) or *remotus*, distant; an epithet for a whorl, *verticillus distans*, a distant whorl, when the flowers which compose it are few in number.

DISTEMPER (*Vet.*) a well-known disease incident to dogs, horses, and other domestic animals.

DISTEMPER (*Paint.*) a term applied to colours not mixed with oil or water, but with size, whites of eggs, &c.; whence to do a piece in distemper is to paint in such colours.

DISTENSION (*Med.*) a term applied to any parts of the body which are loosened or widened.

DISTICH (*Poet.*) διτχιον, from δις, twice, and τχιον, a verse; a couplet.

DISTICHIA (*Med.*) διτχιαια, a double row of hairs upon the eye-lids.

DISTICHUS (*Bot.*) two-ranked, an epithet for a stem or stalk; *caulis distichus*, a two-ranked stem or stalk, putting forth branches not decussated, but in a horizontal position, as in the Fir. This term is applied in the same sense to a spike; *spica disticha*, a spike with flowers all pointing two ways.

DISTILLATION (*Chem.*) an extraction of the humid parts of things by virtue of heat: it is performed either *per ascensum* or *per descensum*. To distil *per ascensum* is performed by placing the vessel over the fire in which the matter is contained; to distil *per descensum* is to place the fire above the vessel in which the matter is contained.

DISTILLATIONS (*Phy.*) watery vapours drawn up by the sun into the air, which fall down to the earth again when the sun is set.

DISTILLATORY (*Her.*) a part of the arms of the distillers' company.

DISTILLERS, Company of (*Her.*) This company was incorporated in the reign of Queen Elizabeth. Their armorial ensigns are, "Azure a fess wavy, argent between a sun drawing up a cloud, distilling drops of rain; and a distillatory double armed or, with two worms and a bolt-head receiver argent.

DISTINCT BASE (*Opt.*) that distance from the pole of a convex glass at which objects beheld through it appear distinct, and well-defined.—*Distinct vision*. [vide *Vision*]

DISTINCTUS (*Bot.*) distinct; an epithet for leaves or anthers that are quite separate from each other, in distinction from the *connate*: *folia distincta*, distinct leaves, are to be found in several of the *Mysembranthema*: *foliola distincta*, distinct leaflets, as in *Jasminum officinale*, as contrasted with the confluent: *antheræ distinctæ*, distinct anthers, are to be found in most flowers.

DISTORTION (*Surg.*) a term denoting that the parts of an animal body are ill placed or ill figured.

DISTORTOR oris (*Anat.*) a muscle, whose office is to draw the mouth aside.

DISTRACTION (*Chem.*) a forcible separation of substances from one another which were before united, as by calcination, &c.

DISTRACTION (*Surg.*) the act of pulling a fibre or membrane, &c. from its natural extent; and what is so pulled or extended is said to be distracted.

to **DISTRAIN** (*Law*) to seize upon a person's goods for the payment of rent or taxes.

DISTRESS (*Law*) 1. The taking of a personal chattel out of the possession of the wrong-doer into the custody of the party injured, to procure a satisfaction for the wrong committed. *Distresses* are *personal*, which are on a man's moveable goods, and *real*, which are on the immoveable goods. They are also *finite*, when limited by law as to how often it shall be made to bring the party to trial of action, and *infinite* when without limitation, until the party appears.

DISTRESSSES (*Law*) *districiones*, pledges taken by the sheriff from those who came to fairs, for their good behaviour; which, at the end of the fair, or mercat, were delivered back, if no harm was done.

DISTRIBUTION (*Log.*) a resolving the whole into its parts.

DISTRIBUTION (*Rhet.*) an applying to every thing its peculiar property.

DISTRIBUTION (*Med.*) a term applied to the chyle when, after due preparation in the ventricle and intestines, it passes through the lacteal veins, and falling into the subclavian vein, it circulates with the blood.

DISTRIBUTIVE justice (*Law*) that justice which is administered by a judge, arbitrator, or umpire, who, in executing his office, may be said to distribute or give to every man his own.

DISTRIBUTIVE noun (*Gram.*) a noun which betokens the reducing of things into several orders or distinctions.

DISTRICHIA/SIS (*Med.*) vide *Distichia*.

DISTRICKT (*Law*) the circuit within which a man may be bound to appear: also, the place where one hath the power of distraining. *Brit. c. 120*.

DISTRICKTURES (*Law*) vide *Distresses*.

DISTRINGAS (*Law*) a writ directed to the sheriff or any other officer, commanding him to distrain a person for a debt to the king; or for his appearance on a certain day. *F. N. B. 138*.—*Distringas juratores*, a writ directed to the

sheriff, to distrain upon a jury to appear.—*Distringas nuper vice-cometem*, [vide *Venditione exponas*]

DISTRICH (*Med.*) from $\delta\iota\varsigma$, twice, and $\epsilon\pi\iota\zeta$, the hair; a disease of the hair, when it splits and divides at the ends.

DISVELOPED (*Her.*) another name for *displayed*.

TO DISUNITE (*Man.*) is said of a horse that drags his haunches, and gallops false or upon a wrong foot.

DITCH (*Fort.*) vide *Foss* or *Moat*.

DITHYRAMBUS (*Ant.*) a song anciently sung in honour of Bacchus; or, in general, any poem composed with wildness or enthusiasm. Horace, designates the odes of Pindar *dithyrambi*.

DITOCA (*Bot.*) another name for the *Mniarum* of Linnæus.

DITONOS (*Mus.*) $\delta\iota\tau\omega\nu\omicron\varsigma$, a ditone; a double tone, or the greater third.

DITRICHUM (*Bot.*) a genus of mosses.

DITROCHÆUS (*Poet.*) $\delta\iota\tau\rho\chi\alpha\iota\omicron\varsigma$, a foot, consisting of two trochees, as *cântilēnā*. *Hephest. Enchirid.*

DITTA'NDER (*Bot.*) the *Lepidum latifolium* of Linnæus, a perennial.

DITTANY of Crete (*Bot.*) the *Origanum dictamnium* of Linnæus, a perennial.—White Dittany, the *Dictamnus albus*, a perennial.

DITTO (*Com.*) or, abbreviated, *Do*. an Italian word derived from the Latin *dictum*, said, i. e. literally, the aforesaid; is used in statements and accounts to signify the same, in order to avoid the too frequent repetition of the same word or words.

DITTO'LOGY (*Lit.*) $\delta\iota\tau\tau\omicron\lambda\omicron\gamma\iota\alpha$, a double reading, as in most ancient authors sacred and profane.

DITTY (*Mus.*) a song that has the words set to music.

DIVAL (*Her.*) a term, in blazoning, for nightshade:

DIVALLIA (*Ant.*) another name for the Roman festival called Angeronalia.

DIVAN (*Polit.*) the great council or court of justice in Turkey and Persia.

DIVAPORATION (*Chem.*) the driving out of vapours by means of fire.

DIVARICATUS (*Bot.*) divaricate, or straddling, according to Withering; standing out wide, an epithet for branches, a panicle, petiole, and peduncle.—*Rami divaricati*, divaricate branches, i. e. making an obtuse angle with the stem, opposed to *coarctati*; *panicula divaricata*, a divaricate panicle, when the pedicles form an obtuse angle with the main peduncle; so, in the same sense, *pedunculum divaricatum*, a divaricate peduncle; *petiolus divaricatus*, a divaricate petiole.

DIVER (*Orn.*) a water-fowl that frequents lakes, and goes with difficulty on land; the *Colymbus septentrionalis* of Linnæus.

DIVERGENS (*Bot.*) diverging, an epithet for branches; *rami divergentes*, branches diverging or making a right angle with the stem. It is applied also to the sleep of plants; *somnus divergens* is when the leaflets, in their state of repose, approach each other at the base, but spread at the tops.

DIVERGENT (*Math.*) or *Diverging*, an epithet for several things which have the property of diverging.—*Divergent* or *diverging rays*, those rays which issuing from a radiant point do continually recede from each other.—*Divergent lines*, those lines which continually remove to a greater distance from each other.—*Diverging hyperbola*, one whose legs turn their convexities to each other.—*Diverging parabola*, vide *Parabola*.—*Diverging series*, a series the terms of which always become larger the farther they are continued.

DIVERSION (*Mil.*) a movement which is made towards a point that is weak and undefended, in order to draw an enemy off from continuing his operations in another quarter.

DIVERSION (*Med.*) the turning of the course or flux of humours from one part to another by medicinal applications.

DIVERSORIUM (*Ant.*) an inn or place of entertainment for strangers. *Cic. ad Fam.* l. 6, ep. 19.

DIVERSORIUM (*Anat.*) the *Receptaculum chyli*.

DIVERTICULUM (*Anat.*) a mal-formation, or a diseased appearance of any part, owing to its deviation from the usual course.

DIVERTICULUM fluminis (*Ant.*) the turning or arm of a river.

DIVERTIMENTO (*Mus.*) Italian for a light composition, written in a familiar style.

DIVERTISSEMENT (*Mus.*) a French term for certain airs and dances formerly introduced between their operas.

TO DIVEST (*Law*) to take away the possession of a thing from another as opposed to *invest*.

DIVIDEND (*Arith.*) the number to be divided. [vide *Division*]

DIVIDEND (*Com.*) the share of the profits in a joint stock which is to be divided among the shareholders: also that part of a debtor's effects which is to be divided among the creditors.

DIVIDEND (*Cus.*) the share which falls to the fellows of any college, out of the annual income of the foundation.

DIVIDENDS (*Law*) a name for the parts of an indenture.

DIVIDERS (*Math.*) a particular sort of compasses.

DIVIDUALS (*Arith.*) numbers in the rule of Division, being parts of the dividend distinguished by points, &c.

DIVINATIO (*Ant.*) *Divination* was of two kinds; *natural*, that which the bird itself declared by its flight, cry, &c.; the other *artificial*, which consisted in the interpretation of the augur. *Cic. Bell. de Divin.* l. 1, c. 6.

Divination signified likewise a sort of sentence for the purpose of deciding who should be the accuser in cases where two or more persons bring forward the same charge wherefore Cicero's first oration against Verres is entitled *Divinatio*, because he pleaded to be the prosecutor of Verres.

DIVING-BELL (*Mech.*) a contrivance by which persons may descend below the water and remain for some time without serious inconvenience.—*Diving-Bladder* was a contrivance, made by Borelli, to answer the same purpose.

DIVINITY (*Ecc.*) the study which treats of God and Divine Revelation, particularly in regard to the Gospel.

DIVISA (*Archæol.*) goods devised by will.

DIVISI (*Mus.*) an Italian word signifying divided into two parts.

DIVISIBILITY (*Phy.*) the property of being able to be divided to an infinite or indefinite extent.

DIVISION (*Arith.*) one of the four principal rules or operations in Arithmetic, by which we find how often one quantity is contained in another. There are three numbers concerned in this operation, namely, the *dividend*, or that which is to be divided; the *divisor*, or that by which one divides; and the *quotient*, or that number which shows how often the second is contained in the first; thus, suppose 10 to be divided by 5, 10 is the dividend, 5 the divisor, and 2 the quotient, or the result of the division. Division is distinguished into division of integers, division of fractions, division of decimals, algebra, &c.—*Division of integers* is either simple or compound.—*Simple division* is the division of integers of one denomination.—*Compound division* is the division of numbers of different denominations, as pounds, shillings, pence, &c.—*Division of Fractions* is performed by inverting the terms of the divisor, and then multiplying the two numerators together for a new numerator, and two denominators for a new denominator; thus, $\frac{1}{2} \div \frac{3}{4}$ is the same as $\frac{1}{2} \times \frac{4}{3} = \frac{2}{3}$.—*Division of Decimals* is performed

the same as in whole numbers, except, that regard must be had to the number of decimals; viz. making as many in the quotient as those of the dividend exceed those in the divisor.—*Division of Powers* is performed by subtracting their exponents, as, $a^6 \div a^4 = a^{6-4} = a^2$.—*Division of Proportion* is comparing the difference between the antecedent and the consequent with either of them; as if $a : b :: c : d$, then by division $a - b : b :: c - d : d$.

DIVISION (Mus.) dividing the interval of an octave into a number of lesser intervals, as quavers, semiquavers, &c.

DIVISION (Mil.) is a body of men commanded by a particular officer; thus brigades are *divisions* of an army; platoons are *divisions* of a troop or company; also any number of men detached from the main body on military duty is denominated a *division*.

DIVISION (Log.) is an oration which explains any thing part by part.

DIVISION (Print.) a small line which serves to divide compound words, as "Man-hood."

DIVISION of mathematical instruments (Mech.) the dividing them off into degrees, and minutes, &c.

DIVISIONES (Ant.) doles, or donations which persons left in their wills to be made annually to the people, to colleges, &c. on the anniversary of their birth-day. *Paul. l. Civitatibus ff. de Legat. 1.*

DIVISOR (Arith.) the dividing number. [vide *Division*].—*Divisors of a number*, those numbers by which it is exactly divisible.

DIVISORES (Ant.) persons employed at elections by the candidates to distribute money among the poor citizens, to buy up their votes. *Cic. in Verr. Proem. c. 8; Ascon. in Cic.*

DIVORCE (Law) *divortium a divertendo*, a separation of man and wife, which is of two kinds, namely—*Divortium a mensâ et thoro*, which does not dissolve a marriage, and consequently does not debar a woman her dower or bastardize the issue; the second and complete divorce is the *divortium a vinculo matrimonii*, which absolutely dissolves the marriage. *Co. Lit. 235, &c.*—*Bill of divorce*, a writing formerly given to a woman, by which the husband renounced all claim upon her.

DIVOTO (Mus.) an Italian word signifying a serious manner of playing or singing so as to excite devotion.

DIURE'SIS (Med.) from *δια* and *ἔρσις*, the discharge of the urine through the bladder.

DIURETICS (Med.) medicines which by dissolving and fusing the blood, precipitate the serum, and promote the urinary discharge.

DIURNAL (Astron.) an epithet for those planets which contain more active than passive qualities.

DIURNAL (Astron.) an epithet for whatever relates to the day, as—*Diurnal arc*, the arc described by the sun, moon, or stars, between their rising and setting.—*Diurnal circle*, the apparent circle described by the sun, moon, or stars, in consequence of the supposed rotation of the earth.—*Diurnal motion of a planet*, so many degrees and minutes as any planet moves in a hour. *Diurnal* is also used in speaking of the natural day; thus, the diurnal revolution of the earth or sun is its revolution on its own axis in 24 hours.

DIURNALIS (Archæol.) a book for registering things down every day, which has since been called a *journal*.

DIVULSIO URINÆ (Med.) urine with a ragged uneven sediment.

DIYLSMOS (Chem.) *διυλισμός*, from *διύλιζω*, to strain; the percolation or straining of a liquor, for the purpose of its depuration.

D. L. S. (Com.) an abbreviation for double-refined loaf sugar.

D. LA, SOL, RE (Mus.) the fifth note in each of the three septenaries of the gamut.

DO (Mus.) a monosyllable which has been substituted for

ut that was applied by Guido to the first note of the natural major.

Do Law (Law) the same as to make a law.

DOCHME (Ant.) *δοχμή*, a measure of length among the Greeks, equal to the breadth of four fingers.

DO'CHMIUS (Poet.) *δοχμῖος*, a foot of five syllables, a short and two long, a short and long, as *ἀμῖκος ἰένῆς*. *Cic. Orat. c. 6. 4.*

DOCIMASIA (Ant.) *δοκιμασία*, the probation of magistrates previous to their admission into any public office at Athens. *Harpocrat. in Lys.*

DOCIMASTICE (Min.) the art of examining fossils, in order to ascertain what metals or minerals they contain.

DO' CIS (Nat.) *δοκίς*, a fiery impression or meteor, like a beam.

DOCK (Man.) a large case of leather, as long as the horse's tail, which serves it for a cover, and is made fast by the straps to the crupper.

Dock (Bot.) the *Rumex* of Linnæus, a weed that infests corn fields.

Dock (Mar.) a broad deep trench formed on the side of a harbour fitted for the building or repairing of ships. It is either dry or wet.—*Dry Dock*, in French *Bassin de radoub*, is provided with flood-gates for keeping out the water while a ship is either building or repairing. These gates are opened to let in the water when the vessel is to be floated or launched.—*Wet Dock*, in French *Bassin du port*, is a place out of the way of the tide, into which a ship may be hauled so that she may dock herself, or sink herself a place to lie in.—*Dock-yards*, magazines containing timber and all sorts of stores for ship-building.

to Dock (Vet.) to cut off a horse's tail.

to Dock herself (Mar.) is said of a ship when brought into oozy ground she makes herself a place to lie in.

DOCK-CRESSSES (Bot.) a plant, otherwise called Nipple-Wort, or the *Lapsana* of Linnæus.

DOCKET (Com.) a bill with a direction tied to goods, and directed to the person and place whither they are to be sent.

DOCKET (Law) a small piece of paper or parchment, containing the head of a large writing: also, a subscription at the foot of letters patent, by the clerk of the dockets. "To strike a docket," is said of a creditor who gives bond to the Lord Chancellor, proving his debtor to be a bankrupt; in consequence of which a commission of bankruptcy is taken out against him.

to DOCKET (Law) to enter upon the dockets; in this manner judgments in the court of King's Bench, decrees in Chancery, commissions of Bankruptcy, and the like, are docketed.

DOCTILE/TUS (Med.) a medicine which Paracelsus recommends for the cure of the gout.

DOCTOR (Ant.) *διδάσκαλος*, a teacher or preceptor whose office in particular arts is mentioned in inscriptions; as—*Doctor librarius*, one who is supposed to have taught the art of making up books.—*Doctor sagittarius*, one who taught the soldiers the art of shooting. *Reines. Inscript. class 11, n. 123; Spon. Mis. Erud. Ant. sect. 7, p. 256.*

DOCTOR (Lit.) the highest degree in any particular faculty in a university, as D. D. Doctor of Divinity; M. D. Doctor of Physic; D. M. Doctor of Music; LL. D. Doctor of Laws.

DOCTOR'S Commons (Law) a college of civilians. [vide *Commons*]

DOCUMENT (Mil.) or a *Death-bed Document*, a term for the resignation which an officer sends in who supposes himself to be on his death-bed.

DO'CUS (Nat.) *δοκός*, a meteor like a beam.

DODARTIA (Bot.) so called from M. Dodart, a genus of plants, Class 14 *Didynamia*, Order 2 *Angiospermia*.

Generic Character. CAL. *perianth* one-leaved.—COR. one-petalled.—STAM. *filaments* four; *anthers* small.—PIST. *germ* roundish; *style* subulate; *stigma* oblong.—PER. *capsule* globose; *seeds* very small.

Species. The two species are perennials, and natives of India.

DODARTIA is also the name of the *Antirrhinum bellidifolium*.

DODDER (*Bot.*) the *Cuscuta* of Linnæus, a parasitical plant, fastening itself to, and drawing nourishment from, other plants. Its root is said to die as soon as it has fastened itself to another plant.

DODECADA'CTYLON (*Anat.*) another name for the first of the small intestines.

DODECAGON (*Geom.*) from δώδεκα, twelve, and γωνία, an angle; a regular polygon, consisting of twelve equal sides and angles.

DODECAGON (*Fort.*) a place with twelve bastions.

DODECAHEDRON (*Geom.*) δωδεκά ἑδρῶν, a geometrical solid bounded by twelve equal and equilateral pentagons. It is one of the Platonic or regular bodies. [vide *Body*]

DODECA'NDRIA (*Bot.*) from δώδεκα, twelve, and ἄνδρα a man or husband; twelve-stamened; a name for the eleventh class in Linnæus' artificial system, comprehending all those plants which have hermaphrodite flowers, with from twelve to nineteen stamens inclusive. It consists of six orders, namely, *Monogynia*, *Digynia*, *Tryginia*, *Tetragynia*, *Pentagynia*, *Dodecagynia*. The principal genera are as follow: *Monogynia*, *Asarum*, *Asarabacca*; *Garcinia*, *Mangostan*; *Portulaca*, *Purslane*; *Lythrum*, *Loosestrife*.—*Digynia*, *Agrimonia*, *Agrimony*.—*Trigynia*, *Reseda*, *Dyer's-Weed*, &c.—*Dodecagynia*, *Sempervivum*, *House-leek*.

DODECAPHA'RMACUM (*Med.*) from δώδεκα, twelve, and φάρμακον, an ingredient; a composition consisting of twelve ingredients.

DO'DECAS (*Bot.*) a genus of plants, Class 11 *Dodecandria*, Order 1 *Monogynia*.

Generic Character. CAL. *perianth* one-leaved.—COR. *petals* roundish.—STAM. *filaments* twelve.—PIST. *germ* half superior; *style* filiform; *stigma* simple.—PER. *capsule* ovate; *seeds* oblong.

Species. The single species is a shrub, as the—*Dodecas Surinamensis*, native of Surinam.

DODECATEMÓ'RION (*Astron.*) δωδεκατημόριον, the twelve signs of the zodiac, and also the twelfth part of every sign. *Manil.* l. 2, v. 670.

*Perspicie nunc tenuem visu rem, pondere magnam,
Quæ tantum Graio signari nomine possit,
Dodecatemorion, titulus signatio causæ.*

DODECA'THEON (*Bot.*) a kind of herb with leaves like a lettuce, which was so called from δώδεκα, twelve, and θεός, a god; because it was supposed to possess the virtues of the twelve superior gods. *Plin.* l. 25, c. 4.

DODECATEON, in the *Linnæan system*, a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Character. CAL. *involucre* many-leaved.—COR. one-petalled.—STAM. *filaments* five; *anthers* sagittate.—PIST. *germ* conic; *style* filiform; *stigma* obtuse.—PER. *capsule* oblong; *seeds* small.

Species. The single species is the *Dodecatheon Media*, *Media*, seu *Auricula*, Virginian Cowslip, a perennial.

DODO (*Orn.*) a bird larger than a swan, otherwise called the Monk's Swan, which inhabits the Isles of Bourbon and France. It is the *Didus* of Linnæus.

DODONŒA (*Bot.*) a genus of plants, so called from Rembert Dodonæus, a botanist, Class 8 *Octandria*, Order 1 *Monogynia*.

Generic Character. CAL. *perianth* four-leaved.—COR. none.—STAM. *filaments* eight; *anthers* oblong.—PIST.

germ three-sided; *style* cylindric; *stigma* a little acute.—PER. *capsule* three-furrowed; *seeds* in couples.

Species. The species are shrubs, as the—*Dodonœa viscosa*, *Thlapsoides*, seu *Carpinus*, Broad-leaved Dodonœa, native of the Society Islands.—*Dodonœa angustifolia*, Narrow-leaved Dodonœa, native of the Cape of Good Hope, &c.

DO'DRA (*Ant.*) a kind of drink among the Romans, made of nine different ingredients. *Auson. Epigram.* 86.

DO'DRANS (*Ant.*) nine ounces, nine inches, or nine parts out of twelve; so called because *deest quadrans*, a fourth part is wanting, to make up the *as*.

DO'EDYX (*Med.*) vide *Cochleare*.

DOG (*Astron.*) a constellation. [vide *Canis*]—*Dog-days*, the vulgar name for the canicular days. [vide *Canicular*]

DOG-FISH (*Ich.*) a fish of the shark kind, of which there are two sorts, the Spotted Dog-fish, and Lesser Spotted Dog-fish, the *Squalus canicula* and *catulus* of Linnæus.

DOG-LEGGED-STAIRS (*Archit.*) stairs which are solid between the upper flights, having no well-hole.

to DOG-DRAW (*Law*) a term employed in the forest laws for the drawing after a deer by the scent of a dog; of which a man stands chargeable if he be found leading a dog in his hand. [vide *Backberind*]

DO'GA (*Ant.*) from δέχομαι, to receive; a large wine vessel, and also a pipe for conveying water. *Vopis. Aurelian.* c. 48; *Greg. Turon.*

DOGBERRY-TREE (*Bot.*) another name for the *Cornus* of Linnæus.

to DO'GDRAW (*Law*) vide *Dog*.

DOGE (*Polit.*) the chief magistrate of either Venice or Genoa.

DO'GGER (*Mar.*) a small vessel, provided with a well, for the conveyance of fish alive to shore.—*Dogger-men*, fishermen who use such vessels.

DO'GGREL rhyme (*Poet.*) an irregular kind of versification.

DOGMA'TIC sect (*Med.*) an ancient sect of physicians, at the head of which is placed Hippocrates. They supposed principles, and from them drew conclusions which they applied to particular cases, whence they were also called *logici*, as distinguished from the *empirici*, or *methodici*. They answer to what are now called scientific physicians, as opposed to quacks.

DOGMA'TIC philosophy (*Eth.*) a philosophy which is founded on stable fixed principles, as opposed to the *sceptic philosophy*.

DO'G-ROSE (*Bot.*) the *Rosa Canina*.

DO'G'S-BANE (*Bot.*) the *Apocynum* of Linnæus.—*Dog's-Grass*, the *Triticum repens*, a perennial.—*Dog's-Mercury*, the *Mercurialis Perennis*.—*Dog's-Tail-Grass*, the *Cynosurus*.—*Dog's-Tooth*, the *Erythronium dens Canis*.

DO'GWOOD (*Bot.*) another name for the *Cornus*.

DOITKIN (*Com.*) from the Dutch *duytkin*, a small coin in Holland, in value less than one farthing.

DOLABRIFO'RMIS (*Bot.*) hatchet-shaped, an epithet for a leaf; *folium dolabriforme*, a hatchet-shaped leaf, as in *Mesembryanthemum dolibriforme*.

DO'LCE (*Mus.*) an Italian epithet signifying sweet, as *con dolce maniera*, i. e. in a soft agreeable manner, a phrase applied to passages in music books.

DO'LCEMENTE (*Mus.*) Italian; the same as *Dolce*.

DOLE (*Min.*) a pile of ore for sale.

DOL (*Law*) signifies in the Scotch law a malevolent intention, which is essential to constitute a crime.

DO'LE-FISH (*Com.*) from *dole*, *deal*, or the Teutonic *theil*, a part, signifies that portion of the fish caught in the North Seas which the fishermen receive for their allowance.

DOLE-MEADOW (*Archæol.*) one wherein divers persons have a share.

DOLES (*Archæol.*) slips of pasture left between furrows of ploughed lands.

DOLG-BOTE (*Archæol.*) in the Saxon. *dołz*, a wound; a fine for inflicting a wound.

DOLICHOS (*Bot.*) a genus of plants, Class 17 *Diadelphia*, Order 4 *Decandria*.

Generic Character. CAL. *perianth* one-leaved.—COR. papilionaceous.—STAM. *filaments* diadelphous; *anthers* simple.—PIST. *germ* linear; *style* ascending; *stigma* bearded.—PER. *legume* acuminate; *seeds* oblong.

Species. The species are mostly annuals, and natives of the East and West Indies, as the—*Dolichos Lablab*, seu *Phaseolus*, Black-seeded Dolichos.—*Dolichos sinensis*, Chinese Dolichos.—*Dolichos altissimus*, seu *Kakuvalli*, Tall Dolichos.—*Dolichos pruriens*, seu *Phaseolus*, seu *Stizolobium*, Horse eye Bean.—*Dolichos urens*, *zoophthalanum*, seu *Mucuna*, Cow itch Dolichos. But the—*Dolichos Bulbosus*, seu *Cacara*, Bulbous Dolichos, and a few others, are perennials. *Clus. Hist.*; *Bauh. Hist.*; *Bauh. Raii Hist.*

DOLICHOS is also the *Glycine tubola* of Linnæus.

DOLIMAN (*Polit.*) vide *Dolman*.

DOLICHURUS (*Poet.*) *δολιχῦρος* a long-tailed verse, having a foot or syllable too much.

DOLICHUS (*Ant.*) *δολιχος*, a space of ground, containing twelve furlongs.

DOLIOCARPUS (*Bot.*) a genus of plants, Class 13 *Polyandria*, Order 1 *Monogynia*.

Generic Character. CAL. *perianth* five-leaved.—COR. *petals* three.—STAM. *filaments* many; *anthers* compressed.—PIST. *germ* globular; *style* long; *stigma* flat.—PER. *berry* globular; *seeds* two.

Species. The species are shrubs, native of Guiana, as the—*Dolioscarpus rolandri*, *major*, et *calinea*.

DOLLAR (*Com.*) a foreign coin, of different values, from four shillings to four and sixpence, according to the country or place in which it is current.—*Rix Dollar*, from the German *Reichsthaler*, is a money of account as well as a silver coin in Germany, Holland, Sweden, &c.—*Spanish Dollar* is a piece coined either at Mexico or in Spain. The former are called *pillar dollars*, because they bear on the reverse the arms of Spain between two pillars, with the inscription on them NEC PLUS ULTRA. Those coined in Spain have on the obverse the head of the reigning prince, with his name, and the legend DEI GRATIA; on the reverse it has no pillars, and the legend is only HISPANIARUM REX, instead of HISPAN. ET IND. REX, as on the other. The value of this dollar is computed to be 4s. 3¼d. in sterling money.

DOLMAN (*Polit.*) a robe, of which the Grand Signor makes a present to the Janizaries on the first day of their *Ramadan*, or *Lent*.

DOLomite (*Min.*) a sort of stone which is ranked among the calcareous salts.

DOLON (*Ant.*) 1. A great staff or pole, with a small head of iron, and a sword within it. *Suet. Claud. c. 13*; *Hesychius Serv. Æneid. l. 7, v. 664*; *Alex. Gen. Dier. l. 4, c. 5. 2.* A small sail in a ship, called the *trinket*. *Liv. l. 36, c. 44*; *Gyrald. de Navig. c. 14*; *Scheffer de Re Nav. l. 2, c. 5.*

DOLOR (*Med.*) vide *Pain*.

DOLOROSO (*Mus.*) Italian for a soft pathetic style of music.

DOLPHIN (*Astron.*) a constellation. [vide *Delphinus*]

DOLPHIN (*Zool.*) though reckoned among the fishes, from its habit of life, is classed by Linnæus under the *Mammalia*, as a genus by the ancient name of the *Delphinus*. [vide *Delphinus*] It has an oblong body, a narrow sharp snout, swims with great velocity, preys upon fishes, and adheres to whales as they leap out of the water.

DOLPHIN (*Her.*) this animal is mostly represented in an

escutcheon in a curved form, when it is termed *imboved*; but sometimes it is borne straight, and then it is named *extended*, as “He beareth three dolphins extended, *naiant*,” as in the annexed figure. When it is placed perpendicular, with its body in the form of a letter S, as it is commonly represented on ancient medals, then it is termed “A dolphin springing and torqued *hauriant*,” or “A dolphin *hauriant*.”

DOLPHIN of the mast (*Mar.*) a kind of wreath, formed of plaited cordage, to be fastened round the masts, as a support to the puddening.

DOLPHINS (*Gunn.*) handles to pieces of ordnance made in the form of a dolphin.

DOLPHINS (*Ent.*) a name given by gardeners to the small black insects that infest beans, &c.

DOM. (*Polit.*) an abbreviation of *dominus*, for which *Don* is used as a title in Spain.

DOMAIN (*Law*) vide *Demesne*.

DOMBEC (*Archæol.*) or *Domboc*, a statute of the ancient Saxons, containing the laws of preceding kings.

DOMBEYA (*Bot.*) a genus of plants, Class 22 *Dioecia*, Order 13 *Monadelphia*.

Generic Character. CAL. *perianth* none.—COR. none.—STAM. *filaments* none.—PIST. *germ* oblong; *style* none; *stigmas* bivalvc.—PER. none; *seeds* many.

Species. The only species is a tree, as the *Dombeya Chilensis*, native of Chili.

DOMBEYA is also the *Tourretia Cappaca* of Linnæus.

DOME (*Archit.*) a spherical roof raised over the middle of a building, as a church, hall, &c. When it rises higher than the radius of the base it is a *surmounted Dome*; if lower than the radius, it is a *diminished*, or *surbassed Dome*; and if it have a circular base it is a *cupola*. It answers to the *tholus* of Vitruvius. *Vitruv. l. 4, c. 7*; *Isidor. Orig. l. 19*; *Suidas*.

DOME (*Chem.*) an arched cover for a reverberatory furnace.

DOME-BOOK (*Archæol.*) *liber judicialis*; a book composed under the direction of Alfred, for the general use of the whole kingdom, containing the local customs of the several provinces.

DOMESDAY-BOOK (*Archæol.*) *liber judiciarius vel Censualis Angliæ*, an ancient record, made in the reign of William the Conqueror, which is now remaining in the Exchequer, fair and legible, in two volumes: to which belong three other volumes, that consist of abridgments or extracts from the former. The addition of the word *day* is supposed to have been made only for the purpose of giving confirmation and authority to a record which was to be referred to at all times in dooming judgment and justice.

DOMES-MAN (*Archæol.*) a judge appointed to hear and determine law-suits.

DOMESTICI (*Archæol.*) assistants at the court of Constantinople either to the judges on the bench or to the officers in the palace, of which there were different descriptions, as the *domestici Mensæ*, *scholarum Domestici*, *murorum vel regionum Domestici*, &c. *Cassiod. Var. l. 9, c. 13*; *Buleng. de Imp. Roman. l. 4, c. 38, &c.*

DOMICELLUS (*Archæol.*) a title formerly given to the king's natural sons in France, of which we have also examples in the natural sons of John of Gaunt, Duke of Lancaster, in the statute of legitimation. 20 R. 2.

DOMICILIUM (*Archæol.*) a domicile or habitation.

DOMIFYING (*Astrol.*) the dividing or distributing the houses into twelve parts.

DOMIGERUM (*Archæol.*) signified formerly danger, but was more frequently taken for power over another. “Sub domigero alicujus vel manu esse.” *Bract. l. 4, tract 1, c. 10.*

DOMINA (*Archæol.*) a title given to honourable women

- who anciently, in their own right, held a barony. *Paroch. Antiq.*
- DOMINANT** (*Mus.*) the dominant of any mode is that sound which makes a fifth to a final.
- DOMINANT Tenement** (*Law*) a term in the Scotch feudal law, signifying the tenement or subject in favour of which the service is constituted.
- DOMINI, ANNO** (*Chron.*) abbreviated A. D., in the year of our Lord.
- DOMINICA Dies** (*Ecc.*) The Lord's Day.—*Dominica in Ramis Palmarum*, Palm-Sunday.
- DOMINICAL** (*Chron.*) one of the first seven letters of the alphabet, wherewith the Sundays are marked throughout the year in the almanack. It changes every year, and after the term of twenty-eight years, the letters return to the same order as before; whence this period is called the cycle of the Sunday or Dominical Letter. [vide *Chronology*]
- DOMINICANS** (*Ecc.*) an order of friars, founded in the year 1216, by one Dominicus, of Toulouse. They were otherwise called the *preaching friars*. *Hel. Hist. des Ord. Mon.* tom. iii, c. 24.
- DOMINICUM** (*Archæol.*) 1. The sacrament of the Lord's Supper. 2. A demain or demesne.
- DOMINIUM** (*Law*) right or power, of which there are two kinds in the Scotch feudal law: the *Dominium directum*, i. e. the right of the superior or lord; and *Dominium utile*, the right of the vassal, by which he enjoys the whole fruits and produce of the estate.
- DOMINO** (*Ecc.*) a sort of hood worn by canons of a cathedral church; also a mourning vest for women.
- DOMINO** (*Sport.*) a game played by two or four persons with twenty-four pieces of oblong ivory, called cards, plain at the back, but on the face divided by a black line in the middle, and indented with spots from one to a double six. These pieces are distinguished by the names of *double-blank, ace, deuce, trois, four, &c.*; or *ace-blank, double-ace, deuce-blank, deuce-ace, double-deuce, &c.*
- DOMINUS** (*Law*) a word which, when prefixed to a man's name, formerly denoted him to be a knight or gentleman.—*Dominus Litis*, an advocate in the civil law, who, after his client's death, prosecuted a suit to sentence for his client's use.
- DOMIPORTA** (*Con.*) from *domus*, a house, and *porto*, to carry; an epithet for a snail because she carries her house on her back.
- DOMITELLUS** (*Archæol.*) the same as *Domicellus*.
- DOMO reparando** (*Law*) a writ lying against one whose house going to decay, may endanger his neighbour's by its fall. *Reg. Orig.* 153.
- DOMUS conservorum** (*Archæol.*) the ancient name for the house where the Rolls are kept in Chancery-Lane.
- DON** (*Polit.*) a title of honour in Spain, put for *dom* or *dominus*, Sir or Lord.
- DONA'CEA** (*Ent.*) a division of the genus *Leptura*, comprehending those insects which have the lip entire.
- DONARIA** (*Archæol.*) things set apart for sacred use, answering to the anathemata of the Greeks. *Justin. Instit.* § 8 de *Reb. Divin.*
- DONATIA** (*Bot.*) a genus of plants; so called after Vitaliano Donati, Class 3 *Triandria*, Order 2 *Trigynia*.
Generic Character. CAL. *perianth* three-leaved.—COR. *petals* nine.—STAM. *filaments* three; *anthers* twin.—PIST. *germ* inferior; *styles* three; *stigmas* bluntish.—PER. none; *seeds* none.
Species. The single species is the—*Donatia fuscicularis*.
- DONATIA** is also the *Avicennia tomentosa*.
- DONATISTS** (*Ecc.*) a sect of heretics who greatly disturbed the church in the third and fourth centuries. They held, among other tenets, that the Son in the Holy Trinity was less than the Father, and the Holy Ghost less than

- the Son. *Optat. Milvat. de Schismat.*; *Donatist. Epiphani. Hæres.*; *August. Oper.* tom. ix; *Theodoret. de Hæres.*; *Hen. Vales. de Sect.*
- DONATIVE** (*Law*) a benefice given to a clerk by the patron without presentation to the bishop, or institution or induction by his order. *F. N. B.* 35; *Co. Lit.* 344.
- DONATIVUM** (*Ant.*) a largess or benevolence bestowed upon the soldiers by the Roman emperors. *Lamprid. Hellogab.*; *Cassiod. Var.* l. 4, c. 14; *Bud. in Pandect.* p. 258; *Turneb. Adv.* l. 19, c. 21.
- DONATIVUM** (*Archæol.*) a dole or gift made by a nobleman.
- DONATORY** (*Law*) that person, in the Scotch law, on whom the King bestows his right to any forfeiture that has fallen to the crown.
- DONAX** (*Bot.*) the *Arundo Donax* of Linnæus.
- DONAX** (*Conch.*) a genus of testaceous animals, having a bivalve shell and a crenulate margin. The animal is a *tethys*.
- DONÉE** (*Law*) he or she to whom lands, &c. are given.
- DONJON** (*Fort.*) or *dongeon*, a large tower or redoubt where the garrison may retreat in case of necessity, and capitulate with greater advantage.
- DONJON** (*Archit.*) a small wooden pavilion raised above the roof of the house, where any one may command a fine view.
- DONIS DE** (*Law*) a statute so named, *de donis conditionalibus*, which revived the ancient feudal restraints originally laid on alienations.
- DONOR** (*Law*) one who gives lands, &c. to another.
- DOOLIES** (*Mech.*) an Indian word for palanquens, of a particularly easy construction, for the conveyance of the sick.
- DOOMSDAY-BOOK** (*Archæol.*) vide *Domesday-Book*.
- DOPPIA** (*Com.*) an Italian coin, consisting either of a single, double, or quadruple pistole, &c. the pistole being equal to about 16s. 6d.
- DOR** (*Ent.*) or Clock-Beetle, the *Scarabæus stercorarius* of Linnæus, which flies buzzing about of an evening, and is said to foretel a fine day.
- DORA'DO** (*Astron.*) a southern constellation not visible in our latitude. It is otherwise called *Xiphias*, or the Sword-Fish, and is reckoned to have six stars.
- DORÆNA** (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.
Generic Character. CAL. *perianth* one-leaved.—COR. one-petalled.—STAM. *filaments* very short; *anthers* oblong.—PIST. *germ* conic; *style* filiform; *stigma* truncate.—PER. *capsule* ovate; *seeds* many.
Species. The single species is a tree, as the—*Doræna japonica*, native of Japan.
- DORÆA** (*Med.*) a person who can see by day but not by night.
- DORÉE**, (*Ich.*) or John Dory, a fish so called because its sides, varied with light blue and white, have the appearance of being gilt. It is the *Zeus faber* of Linnæus.
- DORÏA** (*Bot.*) the *Athonna arborescens* of Linnæus.
- DORÏAN Mode** (*Mus.*) *δαρισι ἄρμονία*, one of the most ancient modes among the Greeks, which was so called from the Dorians, by whom it was introduced. The character of this mode is serious and grave, but of a gravity so tempered as to render it fit for martial or sacred subjects, on which account Plato deemed it worthy a place in his republic. *Plat. Polit.* l. 3.
- DORÏC Order** (*Archit.*) the most ancient of the Grecian orders, is said to have been made in imitation of the hovels which were erected by the original inhabitants of Greece, consisting of roofs, supported by the trunks of trees. The order, which is at present most generally known by this name, is an imitation of the Grecian Doric made by the Romans. [vide *Architecture*]

DORIC *Dialecti* (Gram.) a particular form of the Greek language, which was so called from the Dorians, by whom it was first used. It was afterwards the language of the Lacedæmonians, Argives, and the inhabitants of Epirus, Lybia, Sicily, Rhodes, and Cyprus. The principal writers in this dialect were Archimedes and Theocritus.

DORIS (Ent.) a genus of animals, Class *Vermes*, Order *Mollusca*.

Generic Character. Body creeping, oblong.—*Mouth* placed below.—*Feelers* from two to four, situated on the upper part of the body, and bent behind on the back.

Species. The species are generally distinguished into those which have two, and those which have four feelers.

DORMANT (Her.) an epithet in blazonry for a lion or other beasts sleeping, as in the annexed figure. He beareth "Gules, a Lion dormant, or, Name *Aylesworth* of *Essex*."

DORMANT-TREE (Carpent.) a great beam which lies across a house. [vide *Dormer*]

DORMANT WRITING (Law) a deed which has a blank to put in the name of a person.

DORMER (Archit.) or *Dormant*, a window made in the roof of a building, or above the entablature, being raised upon the rafters.

DORMITORY (Archit.) a gallery in convents or religious houses, divided into several cells, in which the monks sleep or lodge.

DORMOUSE (Zool.) an animal of the mouse kind, which remains torpid during winter, walks or rather leaps on its hind legs, feeds only on vegetables, burrows under ground, sleeps by day, and watches by night. It is the *Myomys* of Linnæus.

DORONICUM (Bot.) a genus of plants, Class 19 *Syngenesia Polygamia*, Order 2 *Superflua*.

Generic Character. CAL. common, with leaflets.—COR. compound rayed.—STAM. filaments five; anthers cylindrical.—PIST. germ oblong; style filiform; stigmas two.—PER. none; receptacle naked.

Species. The species are perennials, as the—*Doronicum Pardalanchet*, Great Leopards Bane.—*Doronicum Plantaginæum*, Plantain-leaved Leopards Bane.—*Doronicum Bellidiastrium*, Bellidiastrium, seu *Bellemedia*, Daisy-leaved Leopards Bane. *Clus. Hist.*; *Bauh. Hist.*; *Bauh. Pin.*; *Ger. Herb.*; *Parl. Theat. Bot.*; *Raii Hist.*; *Tourn. Inst.*

DORONICUM is also the *Arnica montana*, *Scorpioides crocea*, *Str. &c.*

DORSAL (Med.) an epithet applied to those distempers the seat of which lies in the back.

DORSALS nervi (Anat.) the nerves which pass out from the vertebræ of the back.

DORSALIS (Bot.) an epithet for an awn: *arista dorsalis*, an awn fixed to the back or outer side of the glume, not springing from the end, as in *Bromus* and *Avena*.

DORSI longissimus (Anat.) a great muscle inserted into the transverse processes of the vertebræ of the loins.

DORSIFEROUS (Bot.) an epithet formerly applied to plants of a capillary kind, without stalk, that bear the seeds on the back of the leaf.

DORSTENIA (Bot.) a genus of plants, so called from Theodoras Dorstenius, Class 4 *Tetrandria*, Order 1 *Monogynia*.

Generic Character. CAL. receptacle common.—COR. none.—STAM. filaments four; anthers roundish.—PIST. germ roundish; style simple; stigma obtuse.—PER. none; seeds roundish.

Species. The species are perennials, as the—*Dorstenia Contrayerva*, *Drakena radix*, seu *Cyprus*, native of South America.—*Dorstenia lucida*, seu *Elalostema*, native of the Society Islands

DORSUM (Anat.) the Back.

DORTMANNA (Bot.) the *Lobelia* of Linnæus.

DORTURE (Cus.) *dortier*, or *dortoir*, the common room where all the friars of one convent sleep at nights.

DORYCNIUM (Bot.) the *Lotus Dorycnium*.

DORYPHORI (Ant.) *doryphores*, from *dory*, a spear, and *phero*, to carry; a sort of Persian soldiers, who acted as a body-guard to the monarch. The body-guard of the Roman emperors were called by the same name. *Plin. l. 34*; *Curt. l. 3, c. 3*.

DOSE (Med.) from the Greek *dosis*, a giving; the quantity of any medicine prescribed by the physician to be taken by the patient at one time.

DOSSALE (Mech.) hangings of tapestry, or curtains for a choir.

DO'SSER (Fort.) a sort of basket used by the men in fortified towns to carry earth from one place to another.

DO'SSES (Archit.) French for the thick beams which are laid to secure a foundation.

DO'SSIL (Surg.) lint made into a cylindrical form resembling the shape of dates or olives.

DOTE ASSIGNANDO (Law) a writ for the escheator to assign a dowry to the widow of the King's tenant, swearing in chancery not to marry without the King's leave; these are called the *King's widows*. *Stat. 15 Ed. 4, c. 4*; *F. N. B. 26*; *Reg. Orig. 297*.—*Dote unde nihil habet*, a writ of dower for the widow against the tenant who bought land of her husband, whereof he was solely seised in fee-simple or fee-tail, and of which she is dowable. *F. N. B. 147*.

DOTHEN (Med.) a hard and painful swelling, as large as a pigeon's egg, which proceeds from thickness of blood.

DOTIS ADMENSURATIONE (Law) vide *Admensuramentum of Dower*.

DOTKIN (Com.) vide *Dotkin*.

DOTTED (Bot.) *punctatus*; an epithet for a leaf and a receptacle: *folium punctatum*, a leaf besprinkled or pounced with hollow dots, or points, as in *Anihemis maritima*; *receptaculum punctatum*, a dotted receptacle, as in *Leontodon*, *Cacalia*, &c.

DOTTEREL (Orn.) a foolish bird found in different parts of England, the *Charadrius morinellus* of Linnæus. It is said that it will mimic the actions of the fowler, regardless of the net which he is spreading for it.

DOUBLE (Bot.) *geminus*; an epithet for a leaf, stipule, peduncle, &c.; *folium geminum*, a double leaf connected by one petiole; *stipula gemina*, double stipule, or two and two by pairs; *pedunculus geminus*, double peduncle, or two peduncles from the same point.

DOUBLE trail of marriage (Law) the double of the value of the vassal's wife's tocher due to the superior, because he refused a wife equal to him when offered by the superior.—**Double plea**, a plea consisting of several things that are independent of each other, either whereof is sufficient in bar of plaintiff's action. *Kitch. 223*.—**Double quarrel**, *duplex querela*, a complaint made by a clerk to the archbishop against any inferior ordinary for delaying to do justice in some ecclesiastical matter. It seems to be so denominated because it is most commonly made both against the judge and him at whose suit justice is denied. **Double** is also the same as the duplicate of letters patent.

DOUBLE vessel (Chem.) a name for two matrasses, when the neck of one is well luted into the neck of the other.

DOUBLE horizontal dial (Math.) one with a double gnomon, the one pointing out the hour on the outer circle, the other on the stereographic projection drawn upon it. This dial finds the meridian, the hour, the sun's place, &c.—**Double point**, a point in the higher geometry which is common to two parts or legs, or branches of some curve of the second or higher order, such as an infinitely small ellipse, or

a cusp, or the cruciform intersection of such curves. [vide *Curve*]

DOUBLE STARS (*Astron.*) are those luminous bodies which, though they appear single to the naked eye, are found by the help of the telescope to be composed of two stars.

DOUBLE building (*Archit.*) one in which the walls are carried up double.—*Double doors*, two doors made in the same aperture of a wall to keep an apartment warm.—*Double floor*, one constructed of binding or bridging joists.—*Double-hung sashes*, a window consisting of two sashes, each of which is moveable by means of weights.—*Double margin door*, that which represents two doors in the same breadth, but is in fact only one door.

TO **DOUBLE** (*Sport.*) is said of a hare when she winds about to deceive the hounds.

TO **DOUBLE a cape** (*Mar.*) in French *doubler un cap*, the act of sailing round or passing beyond it, so that the point of land separates the ship from her former situation, and intercepts the view of any distant object. "To double upon a fleet," the act of enclosing between two fires any part of a hostile fleet in a naval engagement, or of cannonading it on both sides.

TO **DOUBLE** (*Man.*) a horse is said to double the reins, when he leaps several times together to throw the rider.

DOUBLEAU (*Archit.*) French for a joist, or the chief arch which reaches from one pile to another.

DOUBLED together (*Bot.*) vide *Conduplicate*.

DOUBLER un Battalion (*Mil.*) to extend the front of a battalion for it to cover twice the ground that it did before.

DOUBLER (*Elec.*) an instrument capable of augmenting a very small electricity, so as to render it more than sufficiently manifest by means of an electrometer.

DOUBLET (*Cus.*) an old-fashioned garment made after the fashion of a waistcoat.

DOUBLET (*Min.*) a false jewel, or stone, being two pieces joined together.

DOUBLETS (*Num.*) two medals of the same sort.

DOUBLETS (*Sport.*) a game with dice inserted in tables.

DOUBLING (*Mil.*) is the placing two or more ranks or files into one. "To double round," is to march by an inversion of a second line on the extremity of a first line, thereby to outflank an enemy.

DOUBLING (*Carpent.*) a term in Scotland for eaves-boards.

DOUBLING-NAILS (*Mar.*) the nails which are commonly used in fastening the linings of the gun-ports, &c.

DOUBLINGS (*Sport.*) the turnings of a hare. [vide *To double*]

DOUBLINGS (*Her.*) the linings of robes or mantles of state.

DOUBLOON (*Com.*) a Spanish coin, the quadruple of the pistole, coined in 1772, equal to 3*l.* 6*s.* sterling. The same name has also been given to the modern pistole, worth about 16*s.* On the obverse of this coin is the head of the reigning king, with the name and the title, "*Dei Gratia Hispaniarum ET INDIARUM REX*;" reverse, arms of Spain with the collar of the golden fleece; the legends various; at the bottom the letter M with a crown over it, to signify Madrid; or M with an O over it, to signify Mexico, the place where it was coined.

DOUBLY compound (*Bot.*) vide *Decomound*.—*Doubly crenate*, an epithet for a leaf that has smaller notches on the larger.—*Doubly pinnate*. vide *Bipinnate*.—*Doubly serrate*, an epithet for a leaf having smaller teeth on the larger.—*Doubly ternate*, or biternate, an epithet for a petiole that has two ternate leaflets, as in *Epimedium*.

DOUCETS (*Sport.*) the testes of the deer or stag.

DOUCINE (*Archit.*) French for an ornament of the highest part of a cornice, or a moulding cut in form of a wave, half concave and half convex, answering to the *simarecta*.

DOUDOU (*Com.*) a copper coin current in many parts of the East Indies, particularly at Pondicherry; it is equal to two French liards.

DOVE (*Orn.*) one of the varieties of the *Columba domestica* of Linnæus. There are three sorts of pigeons known by this name, viz.—The *Ring Dove*, which is the largest of the pigeon tribe, and has a semicircular line of white on the hind part of the neck. It is so wild that it cannot be domesticated.—*Stock Dove*, having a fine bluish gray head, neck, and part of the back. This species is migratory, and roosts in trees.—*Turtle Dove*, a shy and retired bird that lives in the woods. The irides of its eyes are of a fine yellow, the neck is black, back ash-coloured, feathers brown; breast red, and belly white.

DOVE (*Her.*) is borne as a charge in many escutcheons; sometimes, as in the annexed figure, "Field argent, a chevron between three crescents sable, on a canton of the second a dove with an olive branch in her bill, all proper; name *Walker*." Sometimes it is blazoned a *dove volant* upright, beaked and membered; sometimes a *dove rising*, &c.

DOVE'S FOOT CRANE'S BILL (*Bot.*) the *Geranium molle* of Linnæus, a perennial.

DOVE-TAIL (*Carpent.*) a piece of wood formed like the tail of a dove.

DOVE-TAILING (*Carpent.*) a method of joining one board into another by projecting pins cut in the form of dove-tails in one piece, and let it into hollows of the same form in another. Dove-tailing is either *exposed* or *concealed*; concealed dove-tailing is either *lapped* or *mitred*.

DOUGLA'SSIA (*Bot.*) a genus of plants, so called from James Douglas, Class 18 *Polyadelphia*, Order 4 *Polyandria*.

Generic Character. CAL. *perianth* one-leaved.—COR. none.

STAM. *filaments* none; *anthers* many.—PIST. *germ* ovate; *stigma* six-cleft.—PER. *berry* ovate; *seeds* single.

Species. The single species, the *Dougllassia Guianensis*, Guiana Douglassia, is a tree.

DOUILLE (*Mil.*) French for a small iron socket at the heel of the bayonet; and also a cavity at the end of the ramrod.

DOUVILLE'T (*Cook.*) a particular manner of dressing a pig, called *au père douvillet*.

TO **DOUSE** (*Mar.*) in French *molir*, to lower or slacken suddenly, in application to a sail in a squall of wind, &c.

DOUSING-CHOCKS (*Mar.*) pieces fayed across the apron, and lapped on the knight-heads, or inside stuff above the upper-deck.

DOUX (*Mus.*) a term, in music books, for soft, sweet.

DO'WAGER (*Polit.*) signifies literally a widow who enjoys her dower; but is commonly applied as a title to the widows of princes and nobility.—*Queen Dowager* is the widow of the King, who enjoys most of the privileges that belong to the Queen Consort.

DOWELLING (*Mar.*) a method of coaking among shipwrights by letting pieces into the solid, or by uniting two pieces together by tenons.

DOWER (*Law*) *dotarium*, the portion which a widow has of her husband's lands at his decease, for the sustenance of herself, and the education of her children. Dower is of several kinds; namely,—*Dower of the Common Law*, which is a third part of the lands, &c. whereof he is seized.—*Dower by Custom*, i. e. by the custom of any place, which is, of course, various, being in some cases a half.—*Dower ad ostium ecclesie*, a dower made at the Church door immediately after marriage, which could not exceed the third part, though it might be less.—*Dower ex assensu patris* was a species of *dower ad ostium ecclesie*.—*Dower*

- de la plus belle*, a dower of the fairest part of a husband's estate.
- DOWL and Deal (*Archæol.*) signify a division: whence boundary-stones, which parted off lands, were called *Dowles-stones*.
- DOWLAS (*Com.*) a sort of linen cloth.
- DOWN (*Mar.*) a term employed in many see phrases, as "Down all chests," an order for the deck to be cleared of all chests preparatory to an engagement. "Down haul," for letting down a rope of the stay-sail in order to shorten sail. "Down foresail," &c.
- DOWN (*Bot.*) signifies properly any sort of pubescence, but it is used for the *pappus*, or little crown fixed on the top of some seeds, by which they fly, as *Dandelion*, &c.
- DOWNS (*Mar.*) a bank, or elevation of sand, which the sea gathers and forms along its shores.
- DOWNY (*Bot.*) vide *Tomentosus*.
- DOWRY (*Law*) vide *Dower*.
- DOXOLOGY (*Ecc.*) *δοξολογία*, a song, or short hymn of praise said or sung in divine service, as the *Gloria Patri*, i. e. glory be to the Father, &c.
- DOZEN (*Archæol.*) a territory or jurisdiction. *Stat.* 18, *Ed.* 2.
- DRAW (*Com.*) vide *Drap*.
- DRA'BA (*Bot.*) a genus of plants, Class 15 *Tetradynamia*, Order 1 *Siliculosa*.
Generic Character. CAL. *perianth* four-leaved.—COR. *petals* oblong.—STAM. *filaments* six; *anthers* simple.—PIST. *germ* ovate; *style* scarce any; *stigma* headed.—PER. *silicle* oblong.
Species. The species are mostly perennials, as the—*Draba aizoides*, seu *Alyssum*, Hoary-leaved Alpine Whitlow Grass, native of the South of Europe.—*Draba pyrenaica*, seu *Alyssum*, native of Provence.—*Draba hirta*, seu *Bursa pastoris*, native of Lapland: but the *Draba verna*, seu *Alsine*, Common or Spring Whitlow-Grass, is an annual; and the *Draba incana*, seu *Leucocicum*, Hoary Whitlow-Grass, is a biennial.
- DRA'BANTS (*Mil.*) a select body of men, who were commanded in person by Charles IX. King of Sweden.
- DRA'BLER (*Mar.*) an additional part of a sail laced to the bottom of the bonnet on a square sail.
- DRA'BS (*Mech.*) a kind of wooden boxes, in the salt works, for holding the salt when taken out of the boiling pan: they are made shelving that the brine may run off.
- DRA'G (*Myth.*) an imaginary being, who was formerly much dreaded by the country people.
- DRA'G'NA (*Bot.*) a genus of plants, Class 6 *Hexandria*, Order 1 *Monogymia*.
Generic Character. CAL. none.—COR. *petals* six.—STAM. *filaments* six; *anthers* oblong.—PIST. *germ* ovate; *style* filiform; *stigma* obtuse.—PER. *berry* ovate; *seeds* solitary.
Species. The species are perennials, as the—*Dracæna draco*, *Asparagus*, *Palma draco*, seu *Draco arbor*, Dragon Tree, native of Cape Verd Islands.—*Dracæna ferrea*, seu *Terminalis rubra*, Purple *Dracæna*, native of China. *Dracæna ensifolia*, *Dianella*, seu *Gladiolus*, Sword-leaved *Dracæna*, native of the East Indies.—*Dracæna marginata*, seu *Aloe purpurea*, Aloe-leaved *Dracæna*.
- DRA'CHM (*Com.*) a weight used particularly by apothecaries containing just sixty grains. It is now the eighth part of an ounce, though formerly reckoned only the seventh. [vide *Drachma*]
- DRA'CHMA (*Ant.*) *δραχμα*, a coin current at Athens, and other parts of Greece, which was equal in value to $7\frac{1}{2}d$. English money. It was very similar to the Roman *denarius*. *Plin.* l. 21, c. 34; *Plut. Fab.*; *Bud. de Ass.*; *Camerar. de Re numm. apud Græcos. Thes. Antiq. Græc.* tom. 9, &c.

DRA'CHMA (*Med.*) the drachm, or dram, was also formerly a weight used among physicians, which was the seventh part of an ounce, at the rate of eighty-four to the pound. *Scrib. Larg.*

DRA'CMON (*Num.*) vide *Darcon*.

DRA'CO (*Ant.*) *δράκων*, a dragon; a sort of flying serpent, so called, *ἀπὸ τοῦ δρακῶνα*, from seeing, on account of its quick sight.

Draco was also the name of the ensign which bore the figure of a dragon, and belonged to the several companies in the Roman army, as did the *Aquila*, Eagle, to the whole legion; whence the *Draconarius* was the bearer of such an ensign. *Claud. Rufin.* l. 2, v. 365; *Amm.* l. 16, c. 10; *Veget.* l. 1, c. 23; *Isid. Orig.* l. 18, c. 3; *Suidas.*; *Curopol. de Offic. Constanti.*

DRA'CO (*Astron.*) the Dragon, a constellation in the northern hemisphere, which was so called because it was supposed to represent the Dragon that guarded the Hesperian fruit, and was killed by Hercules, after which Juno took it up to heaven, and placed it among the constellations. It contained according to Ptolemy, 31 stars; according to Tycho, 32; Hevelius, 40; Bayer, 33; Flamstead, 80. *Arat. Phenom.* v. 46; *Eratosih. Charact.*; *Hygin. Astron. poet.*; *Ptol. Almag.* l. 7, c. 5; *Ricciol. Almag. nov.* l. 6, c. 4.

DRA'CO (*Zool.*) Dragon, a genus of animals of the Class *Reptilia*, Order *Amphibia*; of which there is but one species, the *Draco volans*. It resembles the lizard, except that it has a lateral membrane by which it supports itself in the air for a short time.

DRA'CO Arbor (*Bot.*) the *Dracæna draco* of Linnæus.—*Draco Herba*, the *Artemisia dracunculus* of Linnæus.

DRA'COCE'PHALOS (*Bot.*) the *Chelone Penstemon*.

DRA'COCE'PHALUM (*Bot.*) a genus of plants, Class 14 *Didynamia*, Order 1 *Gymnospermia*.

Generic Character. CAL. *perianth* one-leaved.—COR. *petals* one.—STAM. *filaments* four; *anthers* cordate.—PIST. *germ* four-parted; *style* filiform; *stigmas* sharp.—PER. none; *seeds* four.

Species. The species are perennials, as the—*Dracocephalum Virginianum*, *Pseudo digitalis*, seu *Lysemachia*, Virginian Dragon's Head.—*Dracocephalum canariense*, *Camphorosma*, seu *Melissa*, Canary Dragon's Head, or Balm of Gilead.—*Dracocephalum Austriacum*, *Hyssopus Ruyschiana*, seu *Chamæpethys*, Austrian Dragon's Head, native of Hungary.—*Dracocephalum canescens*, *Moldavica*, seu *Sideritis*, Hoary Dragons' Head, native of the Levant.

DRA'COCE'PHALUS (*Bot.*) another name for the *Dracocephalum*.

DRA'CONARIUS (*Ant.*) vide *Draco*.

DRA'CONITES (*Min.*) a precious stone taken out of the brain of a dragon whilst alive. *Plin.* l. 33, c. 10.

DRA'CON'TIAS (*Min.*) vide *Draconites*.

DRA'CON'TIC Month (*Astron.*) the time of the moon's revolution, from her ascending node to her return thither, so called from the name of the node, *caput draconis*.

DRA'CON'TIDES (*Anat.*) *δρακοντίδες*, a name for some veins proceeding directly from the heart. *Ruff. Ephes. de Appell. Part. Hum. Corp.* l. 1, c. 33.

DRA'CON'TIUM (*Bot.*) *δρακόντιον*, a plant so called because its stalk resembles the dragon in its form. It is otherwise called *arum*. *Theophrast.* l. 7, c. 11; *Dioscor.* l. 2, c. 196. *Plin.* l. 24, c. 16; *Gal. de Alim. Fac.* l. 2, c. 69; *Erot. Lex. Hippocrat.*

DRA'CON'TIUM (*Bot.*) a genus of plants, Class 20 *Gynandria*, Order 8 *Polyandria*.

Generic Character. CAL. *spathe* boat-form.—COR. *petals* ovate.—STAM. *filaments* seven; *anthers* oblong.—PIST. *germ* ovate; *style* straight; *stigma* obscure.—PER. *berry* roundish; *seeds* many.

Species. The species are perennials, as the—*Dracontium fetidum*, Field Scunkweed, seu *Arum*, native of America.—*Dracontium pertusum*, seu *Arum*, Perforate-leaved Dragon, native of the West Indies.

DRACONTIUM is also the *Arum Dracunculus* of Linnæus.

DRACUNCULI (*Med.*) small worms called *Guinea worms*, which breed in the muscular parts of the arms and legs. *Plut. Sympos.* l. 8, c. 9; *Aet. Tetrab.* l. 4, serm. 2, c. 8; *P. Eginet.* l. 4, c. 59.

DRACUNCULOIDES (*Bot.*) another name for the *Hemanthus*.

DRACUNCULUS (*Bot.*) the *Arum Calea* of Linnæus.

DRAFT (*Husband.*) a name sometimes given to swill or hogwash.

DRAFT (*Com.*) a bill or check by which one person draws upon another for a certain sum of money.

DRAFT (*Mar.*) vide *Draught*.

DRAG (*Mar.*) in French *drague*, a machine consisting of a sharp square frame of iron encircled with a net, and commonly used to rake the mud off from the platform, or bottom of the docks. "To *drag* the Anchor," in French *chasser sur son ancre*, to trail the anchor along the bottom after it is loosened from the ground, by the effort of the wind or current upon the ship.

DRAGANT gum (*Bot.*) the same as the *Tragacanth*.

DRAGACANTHA (*Bot.*) the gum of the *Astragalus*, the same as the *Tragacanth*.

DRAGOMAN (*Polit.*) in modern Greek *δράγμαν*, from *הַרְמַן*; an interpreter in the Eastern countries.

DRAGON (*Zool.*) the *Draco* of Linnæus, a four-footed beast of the lizard tribe, tailed and winged, a native of India and Africa, which wanders about among the trees; it is able, by means of its lateral membrane, to support itself for a short time in the air. [vide *Draco*]

DRAGON (*Bot.*) the *Dracontium fetidum* of Linnæus.

DRAGON (*Mil.*) a short piece or firelock formerly in use, having a barrel sixteen inches in length, and a full musket bore.—*Dragon*, or *Dragon volant*, a French name for an old piece of artillery which was a forty pounder.

DRAGON (*Her.*) though generally supposed to be a fabulous monster, is borne both in coats, crests, and supporters, as in the annexed figure; he beareth, "Gules, three Dragons passant in pale ermine; by the name of *Bloss*, in Suffolk."—*Knights of the Order of the Dragon*, an order instituted by the emperor Sigismund in 1417.

DRAGON Beams (*Carpent.*) two strong braces which stand under a bressummer, and meet in an angle on the shoulder of the King-piece.

DRAGON, flying (*Zool.*) vide *Draco*.

DRAGON, flying (*Nat.*) a fat heterogeneous meteor in the shape of a flying Dragon.

DRAGON-FLY (*Ent.*) a particularly ravenous insect which hovers over stagnant waters. It is the *Libellula* of Linnæus.

DRAGON-TREE (*Bot.*) the *Dracæna dracocephalum* of Linnæus.

DRAGONE'T (*Ich.*) Dragon-Fish, the *Callionymus* of Linnæus.

DRAGONNE (*Mil.*) French for a sword knot at the extremity of which hangs a tassel, which was originally worn by the Germans as a mark of distinction for an officer when in plain clothes.

DRAGONNE' (*Her.*) an epithet for any beast, the lower part of which is in the form of a dragon, as a lion dragonné.

DRAGON'S-BLOOD (*Bot.*) a gum or resin from a tree called *Arbor Draco*, the *Astragalus* of Linnæus. It is a very powerful astringent, incassant, and drier, which is given with great efficacy in diarrhœas, &c.

DRAGON'S-HEAD (*Her.*) the tawny colour in the escutcheon of sovereign princes.

DRAGON'S-HEAD (*Astron.*) and *Dragon's-Tail*, the nodes of the planets, or those points in which the orbit of any planet, particularly the moon, intersects the orbit of the sun, or the ecliptic in an angle of about 5° 18'; the former, marked thus ♁, is the northward point as she ascends from the South to the North; the latter, marked thus ♁, is the southward point as she descends from the North to the South.

DRAGON'S-HEAD (*Bot.*) the *Dracocephalum* of Linnæus.

DRAGON TREE (*Bot.*) vide *Dragon*.

DRAGON (*Mil.*) a soldier who fights sometimes on foot and sometimes on horseback; he is so called from *dragon*, because he was supposed to fight like a dragon.

to DRAGOON (*Mil.*) in French *dragonner*, signifies commonly to bring a person to reason by blows, who cannot be persuaded by fair words; but, in application to a town, it implies to deliver up to plunder.

DRAGS (*Mech.*) floating pieces of timber so joined together that, by swimming on the water, they may carry any load down the river.

DRAIN (*Husband.*) a water-course sunk in a field for the purpose of carrying off the water from the surface of the land.

DRAIN (*Fort.*) a trench cut to clear a moat or ditch of the water.

DRAINING (*Husband.*) or *land-draining*, the process of making drains in the land for the purpose of carrying off the water.

DRAKENA (*Bot.*) the *Dorstenia contrayerva* of Linnæus.

DRAM (*Com.*) or *drachm*, a weight of sixty grains: the one-eighth of an ounce Apothecary's Weight; the one-sixteenth of an ounce Avoirdupoise.

DRAMA (*Poet.*) a play consisting either of tragedy or comedy.

DRAMATIC (*Poet.*) an epithet for what belongs to the drama.

DRANK (*Husband.*) a name for the wild oats which infest corn.

DRA'PER'S Company (*Her.*) were incorporated in the reign of King Henry VI. Their armorial ensigns are, as in the annexed figure, "Azure, three clouds radiated proper, each adorned with a treble-crown."

DRAP de Berry (*Com.*) a sort of frieze, or thick cloth, first made in Berry.

DRA'PERY (*Paint.*) the clothing of a human figure represented on the canvass. It is applied, in the same sense, to the representations in stone. Drapery is also used for hangings, tapestry, curtains, and most other things that are not carnations or landscapes.

DRA'STICS (*Med.*) remedies which work speedily and effectually.

DRAUGHT (*Paint.*) the plan or delineation of any object, particularly in application to things of which the outlines only are represented, as the plans of buildings, fortifications, &c.

DRAUGHT (*Mar.*) the quantity of water a ship draws when afloat, or the number of feet under water when laden.

DRAUGHT (*Mil.*) a certain number of men drawn from a regiment, or larger body.

DRAUGHT (*Com.*) an allowance in weighing commodities.

DRAUGHT Compasses (*Mech.*) compasses which are provided with several moveable points to make fine draughts in architecture, &c.

DRAUGHT-HOOKS (*Gunn.*) large iron hooks fixed on the checks of a gun-carriage, two on each side.

DRAUGHT-HORSE (*Man.*) a coarser breed of horses, which are employed only in waggons, drays, carts, &c.

- DRAUGHTS** (*Sport.*) a game played on a checkered board like the Chess-Board, with twenty-four pieces, which, by angular movements, are enabled to take each other, according to certain rules, until one of the parties has lost all his men, or is placed in a situation to lose them all, when the game is at an end.
- DRAUGHTSMEN** (*Paint.*) those who are bred to the art of regularly taking plans and sketches of buildings and places.
- TO DRAW** (*Com.*) or *to draw on a person*, is to write a bill, sign it, and deliver it to the person to whom it is addressed for payment.
- DRAW-BACK** (*Com.*) a return of some part of the duties paid for goods on importation, which are drawn back on exportation.
- DRAW-BRIDGE** (*Archit.*) a bridge made, after the manner of a floor, to be drawn up, or let down, at pleasure.
- DRAW-GEAR** (*Husband.*) any furniture or harness of cart-horses.
- DRAW-LATCHES** (*Archæol.*) a name for thieves. *Stat. 5 Ed. 3, c. 14; 7 Rich. 2, c. 5.*
- DRAW-NET** (*Sport.*) a net for catching the larger sort of birds.
- DRAWING** (*Paint.*) is the art of representing objects upon a plane surface by means of lines, shades, and shadows, formed either with a pen or a pencil. It is also taken for the representation so made, as drawings in India-Ink, pencil-drawings, &c.
- DRAWING** (*Sport.*) is beating the bushes, &c. after a fox. "Drawing amiss" is when the hounds hit the scent of their chase contrary, i. e. up the wind instead of down. "Drawing in the slot" is when the hounds, having touched the scent, draw till they hit on the same again.
- DRAWN-BATTLE** (*Mil.*) a battle in which both parties claim the victory, or retire upon equal terms as before.
- DRAY** (*Mech.*) a sort of low cart without sides, on which brewers carry their casks of beer.
- DRAY** (*Sport.*) a name for squirrels' nests on the tops of trees.
- DREDGE** (*Com.*) in French *drague pour prendre des huitres*, a kind of drag used with a long rope to catch oysters.
- DREDGEMEN** (*Com.*) or *Dredgers*, those who fish for oysters.
- DREDGING** (*Com.*) a process of removing or dragging the mud in the beds of rivers, &c. in order to catch oysters.
- DREIT-DREIT** (*Law*) a double right, i. e. of possession and dominion.
- TO DRENCH** (*Vet.*) to give a medicinal drink to a horse, cow, &c.
- DRENCHES** (*Law*) or *drenges*, a name for such tenants as, being put out of their estates at the conquest, were afterwards restored by King William, because they were not against him in person, or by their counsels. *Mon. Angl. tom. ii. fol. 298.*
- DRENGAGE** (*Law*) the tenure by which the drenches held their lands.
- DREPANIS** (*Orn.*) *δρεπανίς*, a sea-swallow. *Aristot. Hist. Anim. l. 1, c. 2; Plin. l. 11, c. 47.*
- TO DRESS a line** (*Mil.*) to arrange any given number of men so as to stand perfectly correct with regard to the several points of alignment that have been taken up; whence the soldiers are said to "Dress by one another" in ranks in order to form a continuity of line. "To Dress a battalion," to bring all its relative parts in a line with the object or point, towards which it was directed to move. And "Dress," as a word of command, is equivalent to halt when the men arrive at a particular point of the alignment.
- TO DRESS a ship** (*Mar.*) to ornament her with a variety of colours, as ensigns, flags, pendants, &c.
- TO DRESS a Chase** (*Print.*) or a *Form*, to fit the pages and the chase, or form, of the matter that has been composed.
- DRE/SSSED** (*Mason.*) the preparation of a stone, for the mason's work, by the mallet and chisel.
- DRE/SSERS** (*Mil.*) those men who take up direct or relative points, by which a corps is enabled to preserve a regular continuity of front.
- DRESSING** (*Man.*) the cleaning and trimming which a horse undergoes by means of brushes, curry-combs, cloths, &c.
- DRESSING letters** (*Mech.*) a process among letter founders, by which they fit the letters that have been cast for the immediate use of the compositor, by scraping, bearding, &c.
- DRESSING** (*Husband.*) a term applied to the cleaning of hemp, flax, &c. so as to prepare it for spinning.
- DRE/SSINGS** (*Archit.*) all kinds of mouldings projecting beyond the naked wall.
- DRIFT** (*Mar.*) signifies generally any thing that floats upon the water; a boat is said to drift, or to go a-drift, when it hath nobody in it to row or steer it.—*Drift-sail*, a sail used only under water, which is veered out right a-head upon the sea in a storm to keep the head of the ship right upon the sea.—*Drift-way*, or *Drift*, is the course which a ship makes when she is driven by a storm.—*Drift of a current*, its angle and velocity.
- Drift* also signifies the difference between the size of a bolt and the hole into which it is to be driven. *Drifts*, in the sheer-draught, are those pieces where the rails are cut off.
- DRIFT of a Forest** (*Law*) a view or examination of the cattle that are in a forest in order to know whether it be surcharged or not, or whether the beasts be commonable, &c. *Stat. 32 Hen. 8, c. 13.*
- DRIFT** (*Archit.*) the force which an arch exerts from the pressure of the stones.
- DRIFT** (*Min.*) a passage cut out under the earth betwixt shaft and shaft, or turn and turn.
- DRILL** (*Mech.*) a small instrument for boring holes which cannot be made conveniently with punches.
- TO DRILL** (*Mil.*) to teach young recruits the first principles of military movements; whence "To be sent to *Drill*," to be placed under the command of the Drill-officer. "Knapsack-Drill," a sort of punishment for minor offences, which consists in marching soldiers round the barrack-yard, &c. for a certain time, with 6 or 12 lb. shot tied to their knapsacks.
- DRILLING** (*Mech.*) boring with the drill.
- DRILLING** (*Husband.*) the process of sewing with a machine, called a *drilling machine*, by which the seed is disposed in regular order, and at an equal depth of earth.
- DRIMYPHAGIA** (*Med.*) from *δριμύς*, acrid, and *φάγω*, to eat; the eating of acrid substances.
- DRINK** (*Vet.*) a liquid form of medicine occasionally administered to horses, or other cattle.
- DRINKLEAN** (*Archæol.*) a certain quantity of drink provided by tenants for the lord and his steward.
- DRIP** (*Archit.*) the most advanced part of the cornice, otherwise called the *larmier*, or *caves*.
- DRIPPING** (*Falc.*) a term for a hawk that mutes directly downwards in several drops.
- TO DRIVE** (*Mar.*) is said of a ship when she cannot be held fast by the anchor.
- TO DRIVE** (*Print.*) a term used frequently among printers and letter founders. A compositor is said to *drive out* when he sets wide; the matter in the chase is said to *drive out* when, by the addition of fresh matter, it is obliged to be moved forwards into the next page; a letter *drives out* when it is cast too thick in the shank, &c.
- DRIVER** (*Mech.*) vide *Pile-Driver*.
- DRIVER** (*Mar.*) in French *tappe-cul*, a large sail occasion-

ally set upon the mizen-yard or gaff; also the foremost spur in the bulge-ways.—*Driver-Boom*, the boom on which the driver is extended.

DRIVERS (*Mil.*) pieces of bone or wood made in the shape of a flint.

DROFDENE (*Archæol.*) a thicket.

DROFLAND (*Law*) anciently a quit-rent, or yearly payment, made, by some tenants, to the King, or their landlords, for the liberty of driving their cattle through the manor to fairs and markets.

DROIT (*Law*) the highest writ of all other real writs whatsoever, and that which has the greatest respect, and the most assured and final judgment, therefore it is called a *Writ of Right*, and in the old books *Droit. Co. Lit.* 158.—

Droit de entrie, Right of Entry, or a writ for one seised of land in fee, against the one who has disseised him of it.

DROMA (*Med.*) a plaster so called. *Myrep.* sect. 10, c. 26.

DROMEDARY (*Zool.*) a sort of camel, having two bunches on the back, which is the *Camelus Bactrianus* of Linnæus; and differs from the Arabian Camel principally in being larger.

DROMO (*Ant.*) δρόμων, a sort of caravel or swift bark that scoured the seas. It is called by Sidonius *navis cursoria*. *Sidon.* l. 1, ep. 5; *Cassiodor. Var.* l. 4, c. 15; *Isid.* l. 19, c. 1.

DROMONARII (*Ant.*) the rowers of the dromones.

DRONE (*Ent.*) a large kind of bee or wasp which is without a sting. It is the male of this tribe of insects which takes no part in the labours of the hive or nest, and is therefore killed or expelled by the labourers on the approach of winter.

DROOPING (*Bot.*) *cernuus*, having the top or end pointing to the ground; an epithet for the peduncle or flower, as in *Bidens cernua*.

DROP (*Archit.*) an ornament in pillars of the Doric Order, representing drops or little bells under the triglyphs.

DROP-WORT (*Bot.*) the *Spiræa filipendula* of Linnæus, a perennial; so called because it consists of oval tubes, or solid lumps, hanging from the main body by threads.

TO DROP (*Mar.*) a term used in several sea-phrases, as to *drop astern*, to denote the retrograde motion of a ship; to *drop anchor*, i. e. to anchor; the sail *drops* so many yards, i. e. it is so many yards long.

DROPAX (*Med.*) *Dropacismus*, a stimulant plaster of pitch, wax, &c. for taking off hair.

DROPPING (*Vet.*) a name given to that disease in a cow, which is analogous to the puerperal fever in women.

DROPS (*Med.*) any liquid medicine which is taken by the measure of drops.

DROPSY (*Med.*) a collection of serous fluid in the cellular membrane, viscera, and the circumscribed cavities of the body; as the—*Dropsy of the Belly*, [vide *Ascites*]—*Dropsy of the Brain*, [vide *Hydrocephalus*]—*Dropsy of the Cellular Membrane*, [vide *Anasarca*]—*Dropsy of the Chest*, [vide *Hydrothorax*]—*Dropsy of the Testicle*, [vide *Hydrocele*]

DROP-WORT (*Bot.*) vide *Drop*.

DROSATUM (*Med.*) vide *Rosatium*.

DROSERA (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 5 *Pentagynia*.

Generic Character. CAL. *perianth* one-leaved.—COR. *petals* five.—STAM. *filaments* five; *anthers* small.—PIST. *germ* superior; *styles* five; *stigmas* simple.—PER. *capsule* ovate; *seeds* many.

Species. The species are natives of the Cape of Good Hope, as the—*Drosera rotundifolia*, *Rorella*, seu *Rosolus*, Round-leaved Sun Dew, a perennial.—*Drosera longifolia*, seu *Salsirora*, Long-leaved Sun-Dew, &c.

DROSERON (*Med.*) an ointment so called. *Myrep.* sect. 3, c. 93.

DROSO'MELI (*Nat.*) δροσόμελι, from δρόσος, dew, and μέλι, honey; manna.

DROVED (*Mason.*) a term in Scotland for chiselled, in application to a stone.

DRIVERS (*Com.*) men who are employed to drive cattle for hire or for sale.

DRUGGERIA (*Archæol.*) a druggist's shop.

DRUGGET (*Com.*) a kind of woollen stuff.

DRUGS (*Med.*) all kinds of simples, which are for the most part dry, and form a part of medicinal compositions.

DRUIDS (*Archæol.*) probably from the Greek δρῦς, an oak; a sort of priests among the ancient Gauls and Britons; so called because they celebrated their rites under the oak. *Cæs. de Bell. Gall.* l. 6, c. 13; *Strab.* l. 4; *Plin.* l. 30, c. 1; *Tacit. Agric.* c. 11; *Lamprid. in Sever.* c. 60; *Vopis. in Aurel.* c. 1, &c.

DRUM (*Anat.*) *tympanum*; a membrane of the cavity of the ear.

DRUM (*Mil.*) a well known musical instrument, which is much used in the army, to give notice to the troops of what they are to do, according to the different beats. [vide *Beat*]—*Kettle-drums*, a sort of basin-formed drums, made of brass or copper, which are used by the cavalry.—The *Drum-Major*, he who has the command over the other drummers.—*Drum-Major-General*, an officer formerly in the King's household, without whose licence no one, except the King's troops, could beat a drum.

DRUNGUS (*Ant.*) a body of troops among the Romans, consisting of one thousand and upwards. *Vopisc. in Prob.* c. 19; *Veget.* l. 3, c. 19.

DRUPÆ (*Ant.*) δρουπεῖς, olives ready to fall off from excessive ripeness, from πίπτειν, to fall, and δρῦς, an oak, or any tree in general. *Poll. Onom.* l. 6, c. 8; *Plin.* l. 15, c. 1; *Gal. de Alim. Fac.* l. 2, c. 27; *Athen.* l. 2, p. 56; *Hesychius*.

DRUPA (*Bot.*) a *Drupe*, i. e. a pulpy pericarp or fruit, without valves, containing a nut or stone with a kernel. It is usually a moist succulent fruit like the plum; but sometimes dry like the almond.

DRUPACEÆ (*Bot.*) the thirty-eighth order in Linnæus' *Fragments of a Natural Method*.

DRY Blow (*Med.*) a blow that neither wounds nor sheds blood.—*Dry-Belly-Ache*, the same as the *Colic*.

DRY Rent (*Law*) a rent reserved without clause of distress.—*Dry Multures*, quantities of corn, in the Scotch law, paid to a mill, whether the payers grind or not.

DRY Rot (*Archit.*) a disease incident to timber in floorings, joists, wainscot, &c. which is a sort of putrefaction caused by moisture.

DRYANDRA (*Bot.*) a genus of plants, Class 16 *Dioecia*, Order 4 *Monodelphia*.

Generic Character. CAL. *perianth* two-leaved.—COR. *petals* oblong.—STAM. *filaments* nine; *anthers* minute.—PER. *tricocous*; *seeds* oblong.

Species. The single species is the—*Dryas cordata*, Oil-Tree.

DRYAS (*Bot.*) a genus of plants, Class 12 *Icosandria*, Order 5 *Polygynia*.

Generic Character. CAL. *perianth* one-leaved.—COR. *petals* eight.—STAM. *filaments* numerous; *anthers* small.—PIST. *germs* many; *styles* capillary; *stigmas* simple.—PER. *none*; *seeds* many.

Species. The two species are perennials, as the—*Dryas anemoides*, *anemone*, seu *Carophyllata*.—*Dryas octopetala*, seu *Teucruim*.

DRYAS is also the *Geum potentilloides*.

DRYITES (*Min.*) a precious stone found at the roots of trees, from δρῦς, an oak, or tree in general. *Plin.* l. 37, c. 11.

DRYOPETIS (*Zool.*) a small green frog which lies in thickets.
 DRYOPHONON (*Bot.*) a herb like oak-fern. *Plin.* l. 27, c. 9.

DRYOPHYTE (*Zool.*) a kind of frog.

DRYOPTERIS (*Bot.*) vide *Dryophanon*.

DRYOPTERIS, in the *Linnean system*, the *Polypodium fragrans*.

DRYOS (*Bot.*) a kind of misletoe.

DRYPA (*Bot.*) vide *Drupa*.

DRYPS a genus of plants, Class 5 *Pentandria*, Order 3 *Trigynia*.

Generic Character. CAL. perianth one-leaved.—COR. petals five.—STAM. filaments five; anthers oblong.—PIST. germ obovate; styles three; stigma simple.—PER. capsule roundish; seeds single.

Species. The single species is a biennial, as the—*Drypis spinosa*, seu *Carduus*, native of Barbary.

DRYPIS is also the *Cucubalus stellatus*.

DUAL (*Gram.*) *dualis*, from *duo*, two; the name of a number which signifies only two persons or things, of which the Greek language furnishes examples.

DUAL (*Mil.*) a weapon used by the New-Hollanders.

DUARIUM (*Law*) a wife's jointure. [vide *Dower*]

TO DUB (*Carpent.*) to reduce a piece of timber by means of the adze.

TO DUB a knight (*Her.*) probably from the Saxon *ðuban*, to gird; to confer the honour of knighthood on any one.

DUBBING of a cock (*Vet.*) the cutting off a cock's comb and wattles.

DUBEL-CO-LEPH (*Med.*) a composition of coral and amber.

DUBELECH (*Med.*) the cavity of an imposthume.

DUBHE (*Astron.*) a bright star of the second magnitude in the back of Ursa Major. Right Ascension, for 1812, 162° 36' 25"; Annual variation in Right Ascension 57"; Declination 62° 45' 57" N.; annual variation in the same 19".

DUBLETUS (*Med.*) an incysted tumour.

DUCAL Coronet (*Her.*) a circle of gold, with eight strawberry or parsley leaves, of equal height, above the rim. None of inferior rank can have flowers raised above the circle.

DUCAL Mantle (*Ent.*) a testaceous animal, the *Ostrea Palium* of Linnæus.

DUCAPE (*Com.*) a sort of silk formerly used for women's garmments.

DUCAF (*Com.*) probably so called because it was coined in the territories of a duke; a foreign coin of different values, according to the places where current. The Dutch ducats, which are reckoned the purest gold, are about 9s. 6d. sterling.

DUCATOON (*Com.*) a silver coin in Holland worth about 5s. 6d.

DUCENARIUS (*Ant.*) a captain of two hundred. *Veget.* l. 2, c. 8.

DUCES tecum (*Law*) i. e. bring with thee; a writ commanding a person to appear on a certain day in the Court of Chancery, and to bring with him some writings, evidences, or other things, which the court would view.

DUCK (*Orn.*) a well-known water fowl, the different species of which are classed under the *Anas* of Linnæus. [vide *Anas*]

Duck (*Com.*) or *Russia Duck*, a name for the best sort of canvas.

Duck up (*Mar.*) a term used by the steersman, signifying to haul up, as "Duck up the clew lines of those sails."

DUCK-WEED (*Bot.*) the *Lemna* of Linnæus, an annual, growing in ditches and stagnant waters; so called because it is freely eaten by ducks.

DUCKING Stool (*Law*) vide *Cucking Stool*.

DUCK'S foot (*Bot.*) the *Pedophyllum pellatum* of Linnæus.

—*Duck's Meat*, another name for the *Duck-Weed*.—*Duck-Weed*. [vide *Duck*]

DUCK up (*Mar.*) vide *Duck*.

DUCTARIUS funis (*Ant.*) the rope that runs in a pulley. *Vitruv.* l. 10, c. 3.

DUCTILITY (*Metal.*) the property which bodies possess of yielding to any pressure by which their parts are expanded. This property is particularly observable in metals in which it is found in different degrees. [vide *Chemistry*]

DUCTUS adiposi (*Anat.*) certain bladders of fat about the skin.—*Ductus alimentalis*, the alimentary duct, consisting of the throat, stomach, and bowels.—*Ductus arteriosus*, a duct found in the fœtus, or in very young children, betwixt the pulmonary artery and the aorta, which is closed in adults.—*Ductus ad Nasum*, vide *Canalis nasalis*.—*Ductus auris palatinus*, the Eustachian tube.—*Ductus biliaris*, vide *Choledochus ductus*.—*Ductus hepaticus*, vide *Hepatic Duct*.—*Ductus lachrymalis*, vide *Lachrymal ducts*.—*Ductus lactiferi*, the excretory ducts of the glandular substance composing the female breast.—*Ductus pancreaticus*, a little channel arising from the pancreas, and inserted into the Duodenum.—*Ductus salivales*, the excretory duct of the salival glands.—*Ductus Stenonis*, the duct so called after its discoverer Steno, arises from the excretory ducts of the parotid gland.—*Ductus thoracicus*, the thoracic duct.—*Ductus venalis*, a channel that runs off from the *vena cava*, when it passes the liver in the fœtus.—*Ductus umbilicalis*, the naval passage of a child in the womb.—*Ductus urinarius*, the urinary passage; the same as the Ureter.

DUDAİM (*Bot.*) the *Cucumis dudaim* of Linnæus.

DUELLA (*Ant.*) the third part of an ounce, containing eight scruples, or two drams and two scruples. *Bud. de Ass.* p. 10.

DUEL (*Law*) *Duellum*, originally signified a combat between two persons for the trial of the truth. It now signifies a battle between two persons upon a quarrel precedent; in the which if death ensue, both the principal and seconds are guilty of murder. *H. P.* c. 47.

DUES, ecclesiastical (*Law*) dues or monies due to the clergy; under the names of offerings, oblations, &c. which are cognizable in the spiritual court.

DUETT (*Mus.*) in Italian *duetto*, a name for little songs or airs in two parts.

DUGLASSIA (*Bot.*) another name for the *Douglassia* of Linnæus.

DUKE (*Polit.*) from *dux*, is the title of many princes in different parts of Europe, who possess sovereign authority within their principality.

DUKE (*Her.*) the highest title of honour in England next to the Prince of Wales. He is created by patent, girded with a sword, a mantle of state, a cap and coronet of gold on his head [vide *Ducal*], and a rod of gold in his hand. [vide *Heraldry*]

DUKIGI-BACHI (*Mil.*) the second officer of the Turkish artillery.

DULCACIDIUM (*Med.*) a medicine prepared of acid and sweet ingredients.

DULCAMARA (*Bot.*) the *Solanum dulcamara* of Linnæus.

TO DULCIFY (*Chem.*) to wash the salt off from any mixed body which was calcined with it.

DULCIMER (*Mus.*) a musical instrument.

DULCINISTS (*Ecc.*) a sect of heretics; so called from one Dulcin, their ringleader, who asserted that the Father having reigned from the beginning of the world until the coming of the son; then the reign of the latter began, and lasted till the year 1300, when that of the Holy Ghost began. *Genabrad. in Clemen. V.*; *Prætol. de Doct. Omn.*; *Sander. de Hæres.* c. 159; *Bzov. Hist. Eccles.* Ann. 1330; *Spond. Annal.* Ann. 1307.

DULCIS RADIX (*Bot.*) the *Glycyrrhiza echinata* of Linnæus.

DU'LEDGE (*Mech.*) a peg of wood which joins the ends of six felloes that form the round of a wheel of a gun carriage.

DULECH (*Med.*) a sort of tartar or spongy stone, according to Paracelsus, which, generated in the body, causes great pain. *Parac. de Tartar.*

DULEST (*Bot.*) a sort of Alga. *Raii Hist. Plant.*

DULL (*Mar.*) an epithet for a horse that has white spots round the eye, &c.

DULO'CRACY (*Polit.*) from δούλος, a slave, and κρατία, government; a government in which slaves and base people possess the power.

DUM *fuit intra ætatem* (*Law*) a writ to recover lands that had been sold during a minority. *F. N. B.* 477; *New. Nat. Brev.* 426.—*Dum non fuit compos mentis*, a writ to recover lands made over by one not of sound mind. *F. N. B.* 202; *New. Nat. Brev.* 449.

DUMB-BELLS (*Mil.*) weights which are used in drilling a soldier, who holds one in each hand, which he swings backwards and forwards.

DUMOSÆ (*Bot.*) from *dumus*, a bush; the nineteenth order in Linnæus' Fragments, and the forty-third of the Natural Orders. *Linn. Phil. Bot.*

DUN (*Nat.*) a colour something like brown.

DUN (*Archæol.*) a down.

DUN'A (*Archæol.*) a bank of earth cast on the side of a ditch.

DUN-BIRD (*Orn.*) another name for the Pochard-Duck, or the *Anas ferina* of Linnæus.—*Dun-diver*, the female of the Goosander, the *Mergus Castor* of Linnæus.

DUNG-MEERS (*Husband.*) pits where dung, weeds, &c. are mixed, to lie and rot together.

DUNGEON (*Polit.*) from *donjon*; the darkest, closest, and most secluded part of a prison.

DUNNAGE (*Mar.*) in French *fardage*, a quantity of faggots, boughs, &c. laid at the bottom of the hold, to keep the goods dry in a leaky vessel.

DU'O (*Med.*) a name for some compositions, consisting of two ingredients.

DUODECIMALS (*Arith.*) a kind of multiplication, otherwise called *Cross Multiplication*, which is used by artificers.

DUODECIMO (*Print.*) in the twelfth, or in twelves; a name for a particular sized book, each leaf of which is the twelfth part of a sheet.

DUODENA (*Law*) a jury of twelve men anciently so called. *Walsing.* 256.—*Duodena manu*, twelve witnesses to purge a criminal of an offence.

DUODENALIS arteria (*Anat.*) an artery belonging to the *duodenum*.

DUODENUM (*Anat.*) the first of the intestines, in length about 12 fingers' breadth.

DUPLA'RES (*Ant.*) or *Duplicarii*, soldiers who received double pay. *Varr. de Lat. Ling.* l. 4, c. 16; *Liv.* l. 2, c. 59; *Poll. Onom.* l. 4, c. 23; *Veget.* l. 2, c. 7.

DUPLE (*Math.*) or *double Ratio*, that in which the antecedent is double the consequent, or where the exponent of the ratio is 2; thus 6 to 3 is in a duple ratio. The *subduple Ratio* is that in which the consequent is the double of the antecedent, or in which the exponent of the ratio is $\frac{1}{2}$, as 3 to 6, which is in a subduple ratio.

DUPLEX (*Bot.*) the same as compound, when applied to the parts of plants.

DUPLEX (*Ant.*) vide *Duplares*.

DUPPLICATE (*Lit.*) any manuscript copied after another, i. e. the same matter written a second time; it is particularly applied to deeds, and other legal instruments.

DUPPLICATE ratio (*Geom.*) the product of a ratio multiplied into itself, i. e. the square of a ratio, or the ratio of the squares of two quantities; thus the duplicate ratio of *a* to *b* is the ratio of a^2 to b^2 , or of the square of *a* to the

square of *b*. And in a series of geometrical proportionals the first term to the third is said to be in a duplicate ratio of the first to the second, or as the square of the first to the square of the second; thus in the geometricals 2, 4, 8, 16, the ratio of 2 to 8 is duplicate of that of 2 to 4, or as the square of 2 to the square of 4; wherefore duplicate ratio is the proportion of squares, as the triplicate ratio is the proportion of cubes, &c.

DUPPLICATIO (*Law*) is in the Civil Law what the rejoinder is in the Common Law.

DUPPLICATION (*Rhet.*) the same as *Anadiplosis*.

DUPPLICATION (*Arith.*) the multiplying any number by two.—*Duplication of the cube* is when the side of the cube is found which shall be the double of the cube given.

DUPPLICATURE (*Anat.*) the doubling of any membranes when they go off to some distance and return again.

DUPPLICATUS (*Bot.*) is used frequently in composition, in the sense of doubly, as *duplicato*,—*crenatum*,—*pinnatum*,—*serratum*,—*ternatum*, &c.

DUPPLICITY in pleading (*Law*) offering a double plea, which ought to be avoided.

DUPONDIIUM (*Ant.*) a weight equal to four drams. *Gal. de Pond.*

DURA MATER (*Anat.*) a thick and somewhat opaque membrane which enwraps the brain: it is called *dura* on account of its hardness, when compared with the *Pia mater*; and it is called *mater* because it is supposed to be the mother of all other membranes.

DURANTE (*Law*) a term equivalent to *during*, which is used in some law phrases, as *Durante absentia*, during absence; *Durante minore ætate*, during minority.

DURANTIA (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 3 *Trigynia*.
Generic Character. CAL. *perianth* one-leaved.—COR. *petals* five.—STAM. *filaments* four; *anthers* roundish.—PIST. *germ* inferior; *style* filiform; *stigma* thickish.—PER. *berry* roundish; *seeds* kernels, four.
Species. The species are shrubs, as the—*Durantia Plumieri*, Smooth *Durantia*, seu *Castorea repens*, native of South America.—*Durantia Ellisia*, *Ellisia*, seu *Jasminum*, native of Jamaica.

DURATE (*Mus.*) an epithet for a hard sound, which naturally offends the ear.

DURATION (*Met.*) the continuance of the existence of things abstractedly considered, which is the same as *absolute time*.

DURATION of an eclipse (*Astron.*) the time that the sun or moon, or any part of them, remains eclipsed or darkened.

DURDEN (*Archæol.*) a coppice or thicket in a valley.

DURESS (*Law*) an unjust imprisonment, in which a person is restrained of his liberty contrary to law. 2 *Inst.* 483.

DURIO (*Bot.*) a large tree growing in Malabar, which bears a fruit as big as a melon. *Raii Hist. Plant.* A genus of plants, Class 18 *Polydelphia*, Order 4 *Polyandria*.
Generic Character. CAL. *perianth* one-leaved.—COR. *petals* five.—STAM. *filaments* subulate; *anthers* twisted.—PIST. *germ* roundish; *style* bristle form.—PER. *pome* roundish; *seeds* large.
Species. The single species is a tree, as the—*Durio zibethinus*, native of the East Indies.

DUROIA (*Bot.*) a genus of plants, so called from Phil. Du Roi, Class 6 *Hexandria*, Order 1 *Monogynia*.
Generic Character. CAL. *perianth* one-leaved.—COR. *monopetalous*.—STAM. *filaments* none; *anthers* six.—PIST. *germ* inferior; *style* filiform; *stigmas* two.—PER. *pome* globular; *seeds* many.
Species. The single species is a tree, as the—*Duroia Ericopila*, native of Surinam.

DURSLEY (*Archæol.*) an old word for dry blows, or blows without wounding or bloodshed.

DUSTY foot (Com.) a name for a foreign trader or pedlar, or one who has no settled habitation.

DUTCHY (Polit.) a seignory or lordship established in Great Britain by the King under that title, with several privileges, honours, &c.

DUTCHY court (Law) a court wherein all matters belonging to the Dutchy of Lancaster are decided by the decree of the Chancellor of that court.

DUTY (Com.) that which is paid by way of custom or due on merchandise in general.

DUTY (Mil.) that which enters into the functions of a soldier to do.

DUUMVIRI (Ant.) extraordinary officers in the Roman republic, so called from their number *duo*, two; they were chosen for different purposes, as, *Duumviri Perduellonis judicandi causa*; *Duumviri navales*; *Duumviri ad ædem Junoni Moneta faciendam*, &c. *Liv.* l. 1, c. 26; l. 9, c. 30; l. 7, c. 28, &c.

DUUMVIRI were also magistrates in the colonies, the same as the consuls at Rome: they were sometimes chosen every five years, with censorial power, when they were called *Quinquennales*; and when chosen a second time, *Quinquennales iterum*, as in the annexed figure, which represents the reverse of a medal struck by one of the family of the Æbutii, bearing the inscription, *Publio AEBUTIO Caio JULIO HERACLIDE II VIRIS QUINQUENNALIBUS ITERUM*.

DWALE (Bot.) the *Atropa Belladonna* of Linnæus.

DWARF (Bot.) an epithet for any plants that are below the ordinary size of those of the same genus.

DYE (Sport.) or *Dic*, a small cube of bone or ivory with six faces, marked from 1 to 6.

DYE (Archit.) 1. The middle of the pedestal, or that part which lies between the base and the cornice, frequently made in the form of a cube, or dye. 2. A stone of a cubical form, placed under the feet of a statue, and under its pedestal, to raise it the higher.

DYERS, Company of (Her.) was incorporated in the reign of Henry VI. Their arms are, as in the annexed figure, "Sable a chevron engrailed, three madder bags *argent*, banded and corded or."

DYER'S weed (Bot.) vide *Dier's Weed*.

DYKE-REED (Law) or *Dyke Reeve*, an officer that hath the care and oversight of the dykes and drains in fenny countries: he is mentioned in statute 16, 17 *Car.* 2, c. 11.

DYNAMICS (Mech.) the science of moving powers, particularly of the motion of bodies that mutually act on one another.

DYNAMIS (Med.) *δύναμις*, force, or power, is defined by Galen an efficient cause or substance.

DYNASTES (Ant.) *δυναστis*, a governor or ruler, next to a tetrarch of any place. *Cic. Phil.* 2, c. 12; *Suet. in Tib.* c. 26; *Athen.* l. 3, p. 174.

DYNASTY (Chron.) *δυναστεία*, from *δυναστis*, a ruler; a series of princes who have reigned successively in any particular line or family, especially applied to the Egyptian kings.

DYNOMETER (Mech.) an instrument for measuring the power of animal bodies.

DYOTA (Chem.) a circulating vessel with two ears, resembling in shape a man standing with his arms a kempo.

DYÆSTHESIA (Med.) *δυσαισθησία*, from *δυσ*, difficult, and *αἰσθάνομαι* to feel; an unpaired feeling.

DYÆSTHESIA, in *Cullen's system*, is an order of diseases, in the Class *Locales*.

DYSANAGOGOS (Med.) from *δυσ* and *ανάγω*, to remove; an epithet for viscous matter, which it is difficult to expectorate.

DYSCATAPO'TIA (Med.) from *δύς* and *καταπίω*, to swallow; a difficulty of swallowing, which particularly attends canine madness.

DYSCINE'SIA (Med.) from *δύς*, difficult, and *κινέω*, to move; imperfect motion.

DYSCINE'SIÆ, an order of diseases in *Cullen's Nosology*, under the Class *Locales*.

DYSCRASIA (Med.) *δυσκρασία*, from *δύς*, difficult, and *κράνωμι*, to mix; intemperature; an undue mixture of the fluids that is inconsistent with health.

DYSCRITOS (Med.) *δυσκριτος*, from *δύς*, difficult, and *κρίσις*, crisis; difficult to be brought to a crisis, or brought to an imperfect crisis.

DY'SECOIA (Med.) *δυσσηκοία*, from *δύς*, difficult, and *ἀκέω*, to hear; difficulty of hearing.

DYSE/LCES (Med.) *δυσελκίς*, from *δύς*, difficult, and *ἔλκος*, an ulcer; an epithet for such ulcers as are difficult to cure.

DYSEMETUS (Med.) from *δύς*, difficult, and *εμίω*, to vomit; an epithet for a person who is with difficulty made to vomit.

DYSENTE'RIA (Med.) *δυσεντερία*, from *δύς*, difficult, and *έντεριον*, the intestines; Dysentery, a difficulty or disturbance in the intestines, which impedes their functions, and is attended with exulceration. *Hippocrat. περί πύλ. Aret. de Caus. et Sign. Morb. diuturn.* l. 2, c. 9; *Cels.* l. 4, c. 15; *Cæl. Aurel. de Morb. Chronic.* l. 4, c. 6; *Gal. Def. Med. Foes.*

DYSENTERIA, in *Cullen's Nosology*, is a genus of diseases, Class *Pyrexia*, Order *Profluvia*.

DYSEPULO'TOS (Med.) *δυσεπούλωτος*, from *δύς*, difficult, and *ελύω*, a scar; an epithet for an ulcer which is difficult to be healed.

DYSHÆMO'RRHOIS (Med.) from *δύς*, difficult, and *αιμορροία*, the bloody piles; suppression of the bleeding piles.

DYSHE/LCES (Med.) vide *Duselces*.

DYSIAT'OS (Med.) *δυσίατος*, from *δύς*, difficult, and *ιάομαι*, to cure; an epithet for a disorder that is difficult to be cured.

DYSMENORRHE'IA (Med.) from *δύς* and *μηνόρροια*, the menses; a difficult or painful menstruation.

DYSODES (Med.) *δυσώδης*, from *δύς*, bad, and *ὄζω*, to smell; an epithet signifying fetid. It is also applied by Galen and Paulus Ægineta to a particular malagma. *Hippoc. Prorrhēt.* l. 1; *Gal. de Com. Med. per Gen.* l. 7, c. 12; *Æginet.* l. 7, c. 18.

DYSO'PIA (Med.) from *δύς*, difficult, and *ὄψ*, an eye, difficulty of sight; a genus of diseases in *Cullen's Nosology*, Class *Locales*, Order *Dysæsthenæ*.

DYSORE'XIA (Med.) *δυσοριξία*, from *δύς*, bad, and *ὄρεξις*, appetite; a bad or depraved appetite.

DYSOREXIÆ, an order of diseases in *Cullen's Nosology*, Class *Locales*.

DYSPE'PSIA (Med.) *δυσπεψία*, from *δύς*, difficult, and *πίπτω*, to concoct; indigestion.

DYSPEPSIA is a genus of diseases in *Cullen's Nosology*, Class *Neuroses*, Order *Adynamice*.

DYSPERMATISMOS (Med.) from *δύς*, difficult, and *σπέρμα*, semen; a difficult emission of the semen; a genus of diseases in *Cullen's Nosology*, Class *Locales*, Order *Epicheses*.

DYSPHA'GIA (Med.) from *δύς*, difficult, and *φάγω*, to eat; a difficulty of deglutition.

DYSPHO'NIA (Med.) from *δύς*, difficult, and *φωνή*, the voice; a difficulty of speech.

DYSPNŒ'A (Med.) *δυσπνοια*, from *δύς*, difficult, and *πνέω*, to breathe; difficult respiration. *Hippocrat. et Def. Med.* l. 3, aph. 26; *Gal. Com. in Hippocrat. et Def. Med.*

DYSPNŒA is a genus of diseases in *Cullen's Nosology*, Class *Neuroses*, Order *Spasmi*.

DYSPNOON (Med.) vide *Dyspnœa*.

DYSRACHI'TIS (Med.) *δυσραχίτις* a plaister. *Gal. de Com. Med. per Gen.* l. 5, c. 3.

DYSTHERAPE'NTOS (Med.) *δυσθεράπειτος*, from *δύς* and *θεραπεύω*, to heal; difficult to heal.

DYS

- DYSTO'CIHA** (*Med.*) from *δύς*, difficult, and *τίκτω*, to bring forth; difficult labour, or child-birth.
- DYSTO'E'CHIASIS** (*Med.*) *δυστοίχιασις*, from *δύς*, difficult, and *εὐίχος*, order; an irregular disposition of the hairs in the eyelids.
- DYSUR'IA** (*Med.*) *δυσουρία*, from *δύς*, difficult or painful, and *ουρα*, urine; a painful discharge of urine, by reason of the

DYT

- sharpness of the water, and the inflammation or exulceration of the neck of the bladder.
- DYSURIA** is a genus of diseases in *Cullen's Nosology*, Class *Locales*, Order *Epischeses*.
- DYTI'SCUS** (*Ent.*) a genus of insects of the *coleopterous* order, having setaceous *antennæ*, six feelers, and the hind legs *natorii*, or formed for swimming.

E.

EAR

EAR

- E.** (*Ant.*) as an abbreviation stands for *est*, &c. [vide *Abbreviations*] As a numeral stood for 250.
- E.** (*Law*) vide *Abbreviations*.
- E.** (*Her.*) the Fess Point in an escutcheon.
- E.** (*Mus.*) a name for particular notes in the gamut, as *E flat*, the minor seventh of F, and the second flat introduced in modulating by fourths from the natural diatonic mode.
- E.** (*Log.*) stands for propositions which are universal negatives. [vide *Logic*]
- E. G.** (*Abb.*) *Exempli gratiâ*, i. e. for example.
- EAG'LE** (*Orn.*) a well-known bird of prey, which has been described under the ancient name of *aquila*. [vide *Aquila*] Linnæus has classed this bird under the genus *Falco*. [vide *Falco*]
- EAGLE** (*Her.*) as a bearing is reckoned as honourable among the birds as the lion is among the beasts. It is commonly represented displayed as in the annexed example. "He beareth *per fesse* in chief or, an eagle displayed, *sable*, beaked and legged, *gules*, charged on the breast with two chevrons *argent*; in base paly of six, erminois and *azure*." These are the arms of the A'Court family.—*White Eagle*, a Polish order of knighthood, instituted in 1325 by Uladislav V. The knights of this order were distinguished by a gold chain with a silver eagle crowned.—*Black Eagle*, a similar order instituted in 1701 by the King of Prussia on his being crowned in 1701. The knights of this order wore a black eagle suspended from an orange-coloured ribbon.
- EAGLE** (*Astron.*) a northern constellation.
- EAGLES** (*Com.*) a base coin formerly current in Ireland.
- EAGLE-STONE** (*Nat.*) vide *Etiës*.
- EAGLET** (*Her.*) a young eagle; the name by which the eagle is blazoned when there is more than one in the escutcheon.
- EALDERMAN** (*Archæol.*) vide *Alderman*.
- EALE** (*Zool.*) a beast in India the size of a horse with moveable horns. *Plin.* l. 8, c. 21.
- EALHO'RD** (*Law*) the privilege of selling ale and beer.
- EAR** (*Anat.*) *auris*, the organ of hearing, is divided into external and internal.—The *External ear*, otherwise called *Auricula*, comprehends all that lies without the external orifice of the *meatus auditorius*; and the *Internal* all that within the cavity of the *Os Temporis*.
- The *External Ear* has two portions, the upper one large and solid, called *Pinna*, or wing, and the lower one small and soft, called the *Tibia*, or lobe. The parts of the *Pinna* are—The *Helix*, the large folded border.—The *Antehelix*, a large oblong eminence.—The *Tragus*, the small anterior protuberance below the anterior extremity of the *Helix*, and—The *Antitragus* below the inferior extremity of the *Antihelix*. The cavity formed by the

extremities of the *Helix* and *Antihelix* is called *concha*; the hollow in the middle is the *Alvearium*.

The *Internal Ear* is divided into the *Meatus Auditorius*, a conduit about an inch in length.—*Membrana Tympani*, at the farther end of the *Meatus*.—*Tympanum*, a drum or barrel, a cavity behind the *Membrana Tympani*, formed by the four bones *Malleus*, *Incus*, *Stapes*, and *Os Orbiculare*.—*Eustachian tube*, which goes from the *Tympanum*.—*Labyrinth*, which terminates the *Tympanum*, and consists of the three parts; the anterior called the *Cochlea*, the middle called the *Vestibulum*, and the posterior, which are semicircular canals. The muscles of the ear are either common or proper; the common muscles are the—*Attollens Aures*, *Anterior Auris*, and *Retrahentes auris*, which move the whole ear. The proper are the *Helicis Major* and *Minor*, *Tragicus*, and *Antitragicus*, and *Transversus Auris*, besides those of the internal ear the *Laxator Tympani*, *Pensor Tympani*, and *Stapedius*. The nerves of the external ear are branches of the *Nervus auditorius durus*, those of the internal branches of the *Nervus auditorius mollis*.

EAR (*Man.*) a horse is said to have a brisk hardy ear when he carries it pointed forwards in travelling.

EAR-WIG (*Ent.*) a well-known insect, the *Forficula* of Linnæus.

EAR-WORT (*Bot.*) the *Hedyotis auricularia* of Linnæus, so called because it is supposed to be good for deafness.

EA'RED (*Bot.*) *auritus*, *auriculatus*; an epithet for a leaf, leaflet, and frond having an appendage.

EA'RINGS (*Mar.*) small ropes to fasten the corners of a sail to its respective yard. *Reef Earings* differ from the common *Earings*, inasmuch as the latter are spliced to the cringle, but the former are rove through the cringle.

EA'RITES (*Min.*) the blood-stone.

EARL (*Her.*) a title of nobility between a marquis and a viscount.—*Earl Marshal*, an officer who has the care and direction of funeral solemnities. This office belongs, by hereditary right, to the Duke of Norfolk.

EARL'S Coronet (*Her.*) has no flowers raised above the circle like that of a duke and marquis, but only points rising, and a pearl on each of them as in the annexed figure.

EAR'NEST (*Law*) money advanced to bind the parties to the performance of a verbal bargain.

EARTH (*Chem.*) was formerly considered to be one of the four elements of which the whole system of the material world was composed. Earth is now the name for such substances as have neither taste nor smell; that are incombustible and nearly insoluble in water, the specific gravity being under 5, as lime, barytes, &c. [vide *Chemistry*]

Earths are distinguished according to the ingredient which enters into their composition, into aluminous, argillaceous, calcareous, &c.

EARTH *sealed (Med.)* a name for little cakes of solar earth, which are stamped with impressions. They were formerly esteemed as absorbents, but are now fallen into disuse.

EARTH (Geog.) the habitable globe, the general divisions of which are land and water. [vide *Geography*]

EARTH (Astron.) one of the primary planets, marked by the astronomical character \oplus , which, according to the Ptolemaic system, is immovable in the centre of the system; but, according to that of Copernicus, moves from West to East, so as to occasion the succession of day and night, and also annually with its whole mass round the sun, so as to cause the vicissitudes of the seasons. [vide *Astronomy*]

EARTH-NUT (Bot.) the *Arachis* of Linnæus, so called from its pods, or nuts, which ripen under ground. These nuts yield a considerable quantity of oil.—*Earth-pea*, the *Lathyrus amphicarpos* of Linnæus, an annual, so called because it bears its fruit under ground.

EARTH-WORM (Ent.) a well-known animal, which is commonly denominated an insect, but in the Linnæan system is the genus of a distinct class, namely, the *Lumbricus*, a genus in the Class *Vermes*, Order *Intestina*.

EARTH-BAGS (Fort.) vide *Bags*.

EASE (Mar.) a term used in some sea-phrases, as "Ease the ship," i. e. put the helm close to the lee-side. "Ease off," slacken any rope that is formed into a tackle.

EASE (Mil.) a term used in military phrases, as "Stand at Ease," a command to draw the right foot back, and bring the weight of the body upon it. "Ease arms," a command to drop the right hand to the full extent of the arm.

EASEL (Paint.) a wooden frame on which a painter sets the cloth, &c. to be painted.—*Easel-pieces*, such small pieces as are painted on the easel.

EASEMENT (Law) a service which one neighbour has of another; as a way through his ground, a sink, &c.

EAST (Astron.) one of the four cardinal points of the horizon situated between North and South on the side where the sun rises.

EASTER (Chron.) a solemn festival, in commemoration of our Saviour's resurrection from the dead; in all probability derived from the East, the point of the sun rising, as emblematic of our Saviour's resurrection. [vide *Chronology*]

EASTER-OFFERINGS (Ecc.) or *Easter Dues*, money paid to the parson of a parish at Easter.

EASTERLING (Num.) a money coined by Richard II. in the East, which is supposed by some to have given rise to the present name of Sterling.

EAT inde sine die (Law) "Let him go without day or trial;" words used on the acquittal, &c. of a defendant, signifying to be dismissed.

EAU de luce (Chem.) Spiritus Ammoniaë succinatus.

EAU (Mil.) or *Buvage d'Eau*, a punishment in France answering to the *bread and water* system pursued in the English service.

EAVES (Archit.) the edges of the roof of a house which overhangs the wall, for the purpose of throwing off the water.—*Eaves-lath*, or *eaves-board*, a thick feather-edged board, placed at the eaves of a roof, for raising the bottom of the first course of slates above the sloping plane of the roof.

EAVES-DROPPER (Law) one who stands under the eaves of houses, for the purpose of listening to what passes within. Such persons are called evil members of the commonwealth, in Statute of Westminster 1, c. 33.

EAUX meres (Chem.) the water which remains after the first boiling of saltpetre, in distinction from the *petites Eaux*, the water which remains after the boiling of the saltpetre to a still greater degree.

EBB (Nat.) the retirement or going away of the tide.

EBDOMADARIUS (Ecc.) a weeksman; an officer in ca-

thedral churches, appointed weekly, to overlook the performance of divine service.

EBENASTER (Bot.) or *Ebenum*, the Ebony-Tree; the *Diospyros eben-aster* and *ebenum* of Linnæus.

E' BENUM (Bot.) vide *Eben-aster*.

EBENUS (Bot.) a genus of plants, Class 17 *Diadelphia*, Order 4 *Decandria*.

Generic Character. CAL. *perianth* one-leaved.—COR. *papilionaceous*.—STAM. *filaments* diadelphous; *anthers* roundish.—PIST. *germ* roundish; *style* capillary; *stigma* acuminate.—PER. *legume* ovate; seeds single.

Species. The two species are the *Ebenus Cretica*, Cretan Ebony, a perennial; and the *Ebenus pinnata*, Pinnated Ebony, a biennial, native of Barbary and The Levant.

EBENUS is also the name of the *Amerimum Ebenus* of Linnæus.

EBEREMOTH (Archæol.) in Saxon eberemōð, downright murder.

EBIONITES (Ecc.) a sect of heretics in the second century, who, among other things, denied the Divinity of our Saviour. *Iren.* l. 3; *Tertull. de Præscript.* c. 34; *Origen. contra Cels.* l. 2; *Epiphân. Hæres.* 30; *Euseb. Hist. Eccles.* l. 3, c. 31; *Optat. Milvat.* l. 4; *S. August. de Hæres.*; *Hieron. in Lucifer. Philast.* c. 37; *Theodor. Hæret. Fabular.* l. 2.

EBISCUS (Bot.) vide *Hibiscus*.

EBONY (Bot.) in Latin *ebenum*, from the Hebrew עֲבוֹתִי; a sort of black wood, from the Ebony-tree, or the *Ebenus* of Linnæus.

EBOULEMENT (Fort.) the crumbling or falling away of a wall or rampart.

EBRACTEATUS (Bot.) an epithet for any peduncle or raceme that is without a bracte.

EBRANLER (Mil.) French for to shake or make an impression upon an enemy's forces.

EBRIECATUM (Med.) a term used by Paracelsus to denote a partial privation of reason, such as is caused by drunkenness, or by the infusion of any supernatural spirit. *Paracel. Philos. Sagac.* l. 1.

EBULLITION (Chem.) the effervescence which arises from the mixture of an acid and alkaline liquor.

EBULUS (Bot.) the *Sambucus ebulus* of Linnæus.

ECALCARATUS (Bot.) an epithet for a corolla without a spur.

ECAPATLI (Bot.) the *Senna orientalis*.

ECASTAPHYLLUM (Bot.) another name for the *Dalbergia* of Linnæus.

ECBASIS (Rhet.) ἐκβάσις, from ἐκβαίνω, to go out; signifies literally the event; and is applied to those parts of the proœmium in which the orator treats of things according to their events or consequences. *Quintil.* l. 5, c. 10; *Apsin. Art. Rhet. apud. Ald.* p. 682.

ECBOLE (Rhet.) ἐκβολή, a digression, or a figure of speech wherein the narrator introduces some other person speaking in his own words. *Longin.* l. 3, c. 20; *Hermog. Progygmn.* c. 3.

ECBOLE (Mus.) a change in the enharmonic genus of the Greek music, when a chord was accidentally elevated five Diesis above its ordinary pitch.

ECBOLICA (Med.) Medicines which procure abortion.

ECBOLIUM (Bot.) the *Justicia ecbolium*.

ECBRASMATATA (Med.) ἐκβράσματα, from ἐκβάσσω, to cast out as the sea does; fiery pustules breaking out on the surface of the body. *Gal. Exeges. Vocab. Hippocrat.*; *Myrep. de Emplast.* sect. 10, c. 64; *Gorr. Defin. Med.*; *Foes. Econom. Hippocrat.*

ECBRASMUS (Med.) ἐκβράζω, to be very hot; fermentation.

ECBYRSOMATA (Med.) ἐκβυρσάματα, from βύρσα, a skin;

protuberances of the bones at the joints. *Gal. Com. in Hippocrat. de Art.*; *Foes. Econom. Hippocrat.*

ECCATHARTICA (*Med.*) from καθαίρω, to cleanse; medicines applied to the skin to open its pores. *Gorr. Def. Med.*

ECCE HOMO (*Paint.*) the name of any painting which represents our Saviour given up to the people by Pilate.

ECCE'NTRIC (*Astron.*) vide *Excéntricity*.

ECHINOMELOCACTUS (*Bot.*) the *Cactus molinarius* of Linnæus.

ECCHYLO'MA (*Med.*) ἐκχύλωμα, from χυλός, a juice; an extraction.

ECCHYMATA (*Med.*) vide *Ecchrasmata*.

ECCHYMO'MA (*Med.*) or *Ecchymosis*, ἐκχύμωσις, ἐκχύμωσις, from ἐκχύω, to pour out; a bruise, or a disorder in the superficial parts of the body, when, by a contusion, the capillary vessels are broken, the fluids therein contained are extravasated; and the colour of the part becomes livid or brown. *Hippocrat. κατ' ἰατρ.*; *Gal. Exeges.*; *Oribas. de Morb. Curat.* l. 3. c. 29; *Act. de Meth. Med.* l. 2, c. 11; *Foes. Econom. Hippocrat.*

ECCHYMO'SIS (*Med.*) vide *Ecchymoma*.

ECCLE'SIA (*Law*) literally signifies a church, but is used by Fitzherbert in the sense of a parsonage.

ECCLE'SIÆ SCULPTU'RA (*Archæol.*) the image of a church cut out or cast, which used formerly to be kept as a relic. *Morg. Angl. tom.* 3, p. 309.

ECCLE'SIANS (*Ecc.*) an epithet formerly given to those who stood up for the spiritual authority of the church in opposition to the civil power.

ECCLESIA'STES (*Bibl.*) a book in the Scriptures. [vide *Canon*]

ECCLESIA'STICAL, an epithet for whatever belongs to the discipline and rites, &c. of the Christian Church.—*Ecclesiastical* or *Spiritual Courts* are various, namely, the Archdeacons' Court, the Court of Arches, the Peculiars, the Prerogative, and the Court of Delegates. [vide *Court*, &c.]—*Ecclesiastical corporation*, a corporation consisting of spiritual persons.

ECCLESIA'STIC (*Ecc.*) a clergyman or minister in the Christian Church.

ECCLESIA'STICUS (*Bibl.*) an apocryphal book of Scripture. [vide *Canon*]

ECCLI'SIS (*Med.*) ἐκκλισις, from ἐκκλίνω, to bend; a luxation or a recession of a bone from its proper place.

ECCO (*Mus.*) an Italian word signifying, in music books, the repetition of any part of a song in a low or soft manner, in imitation of a real or natural echo.

ECCOPE (*Med.*) the same as *Excision*.

ECCO'PEUS (*Surg.*) from ἐκκόπτω, to cut out; a knife used by the ancients for cutting out bones, particularly of the head. *Cel.* l. 4, c. 8; *Gal. Isagog. Fin. Med.*; *Paul. Æginet.*; l. 6, c. 90; *Foes. Econom. Hippocrat.*

ECCOPRO'TICA (*Med.*) from κόπρω, dung; mild cathartics which reach no farther than the intestines. *Act. de Meth. Med.* l. 2, c. 8.

ECCRINOLO'GICA (*Med.*) from ἐκκρίνω, to secrete; that part of medicine which treats on the doctrine of excretions.

ECCRISIS (*Med.*) ἐκκρίσις, from ἐκκρίνω, to secrete; the secretion of excrementitious matter.

ECDICUS (*Ant.*) a proctor or attorney for a corporation, who protects the interests of the body.

ECDORA (*Med.*) εκδώρα, from δέρω, to excoriate; excoriation in general, but particularly of the urethra.

ECHANTILLO'N (*Mil.*) French for the plank which is covered on one side with iron, and serves to finish the mouldings, &c. of a piece of ordnance.

ECHAPE' (*Man.*) the name of a horse bred from a stallion and a mare of different breeds and different countries.

ECHARPE' (*Gunn.*) as *battre en echarpe*, i. e. to fire obliquely.

ECHECO'LLON (*Med.*) ἐχέκολλον, a glutinous medicine.

ECHE'IA (*Mus.*) ηχεία, vases used among the Greeks and Romans in their theatres, for the purpose of augmenting the sound of the voices. *Vitruv.* l. 1, c. 1.

E'CHELON (*Mil.*) signifies, literally, a ladder; but in application to military tactics, it signifies the movement in which each division follows the other, like the steps of a ladder.

ECHEMY'THIA (*Ant.*) ἐχέμυθία, the five years' silence imposed by Pythagoras on his scholars. *Aul. Gell.* l. 1, c. 9.

ECHENE'IS (*Ich.*) the Sea-Lamprey, a fish that sticks to the keels of ships.

ECHE'TÆ (*Ent.*) Grasshoppers.

ECHETRO'SIS (*Bot.*) White Briony.

ECHEVIN (*Polit.*) French for a magistrate elected by the inhabitants of a city or town to take care of their common concerns.

ECHIDNY (*Zool.*) the Viper.

E'CHINATE (*Bot.*) an epithet for the seeds of plants that are rough and prickly; also for the pericarp, as in *Datura stramonium*.

E'CHINEIS (*Ich.*) the Sucking Fish, a genus of fishes of the Thoracic Order, having a fat naked head and a naked body. This fish inhabits the Mediterranean seas, and adheres by its head so fast to other fish, and to the sides of vessels, that it is often removed with difficulty.

ECHINOME'TRA (*Ich.*) ἐχινόμετρα, a larger sort of Sea-urchin. *Arist. Hist. Anim.* l. 4, c. 5; *Plin.* l. 9, c. 31.

ECHINO'PHORA (*Ich.*) a sort of shell-fish.

ECHINOPHORA (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 2 *Digynia*.

Generic Character. CAL. umbel universal.—COR. universal difform.—STAM. filaments five; anthers roundish.—PIST. germ oblong; stigmas simple.—PER. none; seeds oblong.

Species. The species are perennials, as the—*Echinophora spinosa*, Prickly Sea-Parsnip, seu *Erithmum*, native of Europe.—*Echinophora tenuifolia*, seu *Pastinaca*, Fine-leaved Sea-Parsnip, native of Apulia.

ECHINOPHORA is also the *Caucalis daucoïdes* of Linnæus.

E'CHINOPS (*Bot.*) a genus of plants, Class 19 *Syngenesia*, Order 5 *Polygamia-Segregata*.

Generic Character. CAL. common.—COR. one-petalled.—STAM. filaments five; anthers cylindrical.—PIST. germ oblong; style filiform; stigmas double.—PER. none; seeds single; receptacle common.

Species. The species are perennials, as the—*Echinops sphaerocephalus*, *Carduus*, *Chalcepos*, seu *Chamaeleon*, Great Globe Thistle, native of the South of Europe.—*Echinops spinosus*, seu *Carduus*, Thorny-headed Globe Thistle, native of Egypt.—*Echinops ritro*, *Ritro*, seu *Crocodylium*, Small Globe Thistle; but the *Echinops strigosus*, *Scabiosa*, seu *Spina*, Annual Globe Thistle, is an annual, and native of Spain. *Dod. Penpt.*; *Bauh. Pin.*; *Park. Theat.*; *Tourn. Inst.*

ECHINOPS is also a species of the *Carthamnus* and the *Rolandia*, &c.

ECHINOPHTHALMIA (*Med.*) from ἐχίνος, a hedgehog, and ὀφθαλμία, an inflammation of the eyelids.

ECHINOPUS (*Bot.*) ἐχινόπους, a prickly plant; so called because it resembles the feet of the hedge-hog, from ἐχίνος, a hedge-hog, and πῦς, a foot. *Plin.* l. 11, c. 8.

ECHINOPUS, in the *Linnean system*, the *Echinops sphaerocephalus*, &c.

ECHINORYNCHUS (*Ent.*) a genus of animals, of the Class *Vermes*, Order *Intestina*, having a round body and a cylindrical retractile proboscis. Worms of this tribe are found fixed very firmly to the viscera of other animals.

ECHINUS (*Conch.*) ἐχίνος, a kind of crab-fish, having prickles

instead of feet; so called, *παρὰ τὸ ἔχειν*, or *συέχειν*, because it contracts itself when it is touched. *Aristot. Hist. Anim.* l. 4, c. 45, &c.; *Varro de Lat. Ling.* l. 4; *Plin.* l. 9, c. 31; *Ælian. Hist. Anim.* l. 7, c. 33; *Plut. de Solert. Anim.*; *Oppian. Halieut.* l. 2, v. 225; *Cassiodor. Varr.* l. 3, cp. 48.

ECHINUS, in the *Linnean system*, a genus of animals, Class *Vermes*, Order *Mollusca*, having a roundish body covered with a bony sutured crust. It is called, in English, Sea-urchin; is an inhabitant of most seas, and has been found frequently in a fossil state.

ECHINUS (Bot.) the *Allamanda cathartica* of Linnæus.

ECHINUS (Archit.) a member or ornament placed on the top of the Ionic capital. *Vitruv.* l. 3, c. 3; *Bald. Lex. Vitruv.*

E'CHII FACIE (Bot.) the *Anchusa angustifolia* of Linnæus.

ECHIOIDES (Bot.) another name for the *Lycopsis* of Linnæus.

ECHION (Bot.) vide *Echium*.

ECHITES (Bot.) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Character. CAL. perianth five-parted.—COR. one-petalled.—STAM. filaments five; anthers oblong.—PIST. germs two; style filiform; stigma oblong.—PER. follicles two; seeds many.

Species. The species are shrubs, as the—*Echites biflora*, seu *Apocynum*, native of the Caribee Islands.—*Echites suberecta*, seu *Nerium Echites scholaris*, seu *Lignum*, Oval-leaved Echites, or Savannah Flower, native of the East Indies.—*Echites costates*, seu *Kametti-valli*, native of the Society Islands.

ECHITES is also the *Carissa calendas* of Linnæus.

ECHIUM, in the *Linnean system*, a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Character. CAL. perianth five-parted.—COR. one-petalled.—STAM. filaments five; anthers oblong.—PIST. germs four; style filiform; stigmas obtuse.—PER. seeds four.

Species. The species are shrubs, as the—*Echium fruticosum*, seu *Buglossum*, Shrubby Viper Bugloss, native of the Cape of Good Hope.—*Echium italicum*, seu *Lycopsis*, Wall-Vipers' Bugloss, native of Italy.—*Echium gigantum*, Gigantic Vipers' Bugloss. But the *Echium vulgare*, Common Vipers' Bugloss, and the *Echium strictum*, Upright Vipers' Bugloss, are biennials.

ECHIUM is also the *Lycopsis echium* of Linnæus.

ECHO (Myth.) is fabled by the poets to have been an airy nymph, who returned an answer in the sounds that were repeated.

ECHO (Archit.) a term applied to vaults, most commonly of the elliptic and parabolic kind, which used to redouble the sounds.

ECHO (Poet.) a name for a sort of verse which returns the sound of the last syllable, like an echo, as *gratia malis his*.

ECHOMETER (Mus.) a rule with a scale divided on it, which serves to measure the duration and length of sounds.

E'CHOS (Med.) ἤχους, a sound; is taken by Hippocrates for the *tinntus aurium*, a ringing in the ears.

ECLAMPSIA (Med.) vide *Eclampsis*.

ECLAMPSIS (Med.) ἐκλαμψις, signifies, literally, effulgence; but is taken for the *Scintillarum Mica*, i. e. scintillations or flashings which dart from the eyes of epileptic patients. *Hippocrat. Epid.* l. 6, &c.; *Cæl. Aurelian. Tard. Pass.* l. 1, c. 4.

ECLICTIC (Med.) from ἐκλέγω, to select; an epithet for a sect of physicians who, after Archigenes, their leader, selected what was best and most rational; hence their medicine was called *Eclectic Medicine*. *Dioscor.* l. 4; c. 30; *Plin.* l. 29, c. 6; *Gal. de Comp. Med. sec. Loc.* l. 8, c. 8; *Or. Med. Coll.* l. 11; *Paul. Ægin. de Re Med.* l. 7, c. 3.

ECLICTICI (Phil.) ἐκλεκτικοί, a sect of philosophers who professed to be guided by no particular sect or system, but

to embrace whatever appeared to themselves as best. *Voss. de Sect. Philos.* l. 3, c. ult.

ECLICTOS (Med.) ἐκλεκτός, from λειχῶ, to lick; a linctus, or soft form of composing a medicine. *Gal. de Comp. Med. sec. Loc.* l. 7; *Aet. Tetrab.* 2, serm. 4, c. 51; *Paul. Ægin. de Re Med.* l. 7, c. 11.

ECLIPGMA (Med.) vide *Ecliptos*.

ECLIPSA'REON (Mech.) an instrument invented by Mr. Ferguson, for showing the phenomena of eclipses.

ECLIPSE (Astron.) in Greek ἐκλειψις, from ἐκλείπω, to fail; an obscuration of the sun, moon, or any of the heavenly bodies. An eclipse is either total or partial.—*Partial eclipse* is when the body is darkened only in part.—*Total eclipse* is when it is wholly darkened. An eclipse is distinguished, as respects the body, into lunar and solar.—*Lunar eclipse* is the depriving the moon of the sun's light by the interposition of the earth between the sun and moon.—*Solar eclipse* is the privation of light which the sun suffers in regard to us by the interposition of the moon between the sun and the earth. [vide *Astronomy*]

ECLIPSIS (Gram.) ἐκλειψις, is when a word is wanting in a sentence.

ECLIPTA (Bot.) a genus of plants, Class 19 *Syngenesia*, Order 2 *Polygamia-Superflua*.

Generic Character. CAL. common.—COR. compound rayed.—STAM. filaments four; anthers cylindrical.—PIST. germ oblong; style middling; stigmas two-cleft.—PER. seeds oblong; receptacle flattish.

Species. The species are annuals, as the—*Eclipta punctata*, seu *Bellis*, Dotted Stalked Eclipta, native of Domingo.—*Eclipta prostata*, Trailing Eclipta, *Verbeina*, *Micrelidium*, seu *Chrysanthemum*; but the *Eclipta erecta*, seu *Eupatoriophalacron*, Upright Eclipta, a biennial, is a native of the West Indies.

ECLIPTIC (Astron.) a great circle of the sphere, in which the sun performs his apparent annual motion. It is supposed to be drawn through the middle of the zodiac, making an angle with the Equinoctial of 23 degrees 30 minutes. It is called ἐκλειπτικόν, the Ecliptic, because the eclipses of the sun and moon always happen under it. In modern astronomy the Ecliptic is the path which the Earth is supposed to describe amidst the fixed stars in performing its annual motion round the sun.

E'CLOGUE (Poet.) ἐκλογή, from ἐκλέγω, to select; a choice piece, particularly the *Bucolics* of Virgil, which are called by that name.

E'CLOGARIUS (Ant.) from ἐκλέγω, to select; a gatherer of scraps from different writers. *Cic. ad Attic.* l. 16, ep. 2.

E'CLOPES (Bot.) another name for the *Relhania* of Linnæus.

E'CLYSIS (Med.) ἐκλυσις, from ἐκλύομαι, to be loosened; a general faintness and feebleness in the frame; also a loosening of the belly by a free and copious discharge by stool. *Hippocrat. Coac.*

ECMA'GMA (Med.) ἐκμαγμα, a kneaded or worked mass. *Gal. Exeges. Vocab. Hippocrat.*

E'COI (Mus.) the tropes or modes sung in the modern Greek churches during *Passion-Week*.

ECOUVILLO'N (Gun.) French for a sponge made use of to clean and cool the inside of a cannon after it has been discharged.

ECPEPIE'SMENOS (Med.) ἐκπεπισμένος, from ἐκπίεζω, to depress outward; an epithet for an ulcer with protuberating lips.

ECPHONEMA (Rhet.) ἐκφώνημα, a breaking out of the voice with some interjectional particle.

ECPHONESIS (Rhet.) ἐκφώνησις, in Latin *exclamatio*; a figure of speech whereby the orator gives utterance to the warmth of his feelings. *Cic. Or.* l. 3, c. 54; *Quintil.* l. 9, c. 3; *Macrob. Saturn.* l. 4, c. 6.

ECPHRA/CTICA (*Med.*) ἐκφρακτικῶς, from ἐκ, privative, and φράσσω, to obstruct: deobstruent medicines, or those which remove obstructions. *Gal. de Comp. Med. sec. Loc. 1. 4, c. 1; Gorr. Defn. Med.*

ECPHYAS (*Med.*) ἐκφύας, from ἐκφύω, to grow out; an excrescence particularly applied to the *Appendicula vermiciformis*. *Gal. de Usu Part. 1. 5, c. 2; Gorr. Defn. Med.*

ECPHYSE/SIS (*Med.*) ἐκφύσσεις, a quick breathing. *Gal. de Mot. Muscul. 1. 2.*

ECPHY/SIS (*Med.*) vide *Ecphyas*.

ECPIE/SMA (*Med.*) ἐπιέσιμα, from ἐκ and πιέζω, to press: 1. A fracture of the *Cranium* when the bones press inwardly on the membranes of the brain. *Gal. Def. Med. Isagog.; Paul. Ægin. de Re Med. 1. 6, c. 90.* 2. The mass remaining after the juices of vegetables have been pressed out: also the juice itself. *Dioscor. 1. 4, c. 160; Cels. 1. 6, c. 5; Gorr. Def. Med.; Foes. Oeconom. Hippocrat.*

ECPIE/SMOS (*Med.*) επιέσιμος, from ἐκ and πιέζω, to press; a disease in the eye when the ball is as it were thrust out of the orbit by reason of humours. [vide *Proptosis*]

ECPLERO/MA (*Med.*) ἐκπλήρωμα, from πλήρωω, to fill up; a small hard ball of leather to fill up the cavity of the armpit in reducing a luxated *Os Humeri* to its place. *Hippocrat. περι ἄρθ.*

ECPLE/XIS (*Med.*) ἐκπλήξις, from ἐκπλήσσω, to terrify or astonish; stupor, stupefaction, as when the patient lies without motion with his eyes open like one in a trance. *Gal. in Hippocrat. 1. 7, aph. 14.*

ECPNEUMATO/SIS (*Med.*) vide *Ecpnoe*.

ECPNOE (*Med.*) ἐκπνοή, from ἐκ and πνέω, to breathe; that of respiration which consists in expelling the breath.

ECPTO/MA (*Med.*) ἐκπτώμα, from ἐκπίπτω, to fall out; the luxation of a bone; also exclusion of the *secundines*; a falling down of the womb, descent of the omentum, &c. *Hippocrat. de Fractur. and 1. 5, aphor. 49, &c.; Gorr. Def. Med.; Foes. Oeconom. Hippocrat.*

ECPTOSIS (*Med.*) vide *Ecptoma*.

ECPY/MA (*Med.*) or *Ecpiesis*, from ἐκ and πύω, pus; a collection of pus in a tumour. *Gorr. Def. Med.*

ECRE/XIS (*Med.*) ἐκρήξις, from ἐκρήνυμι, to break; a laceration of the womb, as applied by Hippocrates. *Gorr. Def. Med.; Foes. Oeconom.*

ECROE (*Med.*) ἐκροή, from ἐκρέω, to flow; any duct or passage by which the humours are evacuated. *Hippocrat. Epid. 1. 2.*

ECRY/SIS (*Med.*) ἐκρυσίς, from ἐκρέω, to flow out; an efflux of the semen not mature enough to be called an abortion. *Hippocrat. περι ἔπταυμ. Arist. Hist. Anim. 1. 7, c. 3.*

ECRY/THMUS (*Med.*) ἐκρύθμιος, from ἐκ privative, and ρυθμός, rythm; a term applied to pulses which are disorderly, or entirely out of order. *Gal. de Different. Puls. 1. 1, c. 9; Paul. Æginet. de Re Med. 1. 2, c. 11; Gorr. Def. Med.; Foes. Oeconom. Hippocrat.*

ECSARCO/MA (*Med.*) from ἐκ and σαρξ, an excrescence of flesh. *Gorr. Def. Med.*

ECSTASIS (*Med.*) ἐκστασις, from ἐξίσταμαι, to be out of one's senses; Ecstasy, a vehement emotion of the mind, or a delirium, according to Hippocrates. *Gal. Com. 2 in Hippocrat. Prorrh. 1. 1; Gorr. Def. Med.; Foes. Oeconom. Hippocrat.*

ECSTA/SIS (*Gram.*) a figure in grammar, whereby a short syllable is made long.

ECSTRO/PHIUS (*Med.*) ἐκστρόφιος, from ἐκστρέφω, to invert, or turn out; an epithet for a medicine which causes the blind piles to appear externally.

ECTA/SIS (*Med.*) ἐκτασις, from ἐκτείνω, to extend; a tension of the skin. *Hippocrat. Epid. 1. 6; Foes. Oeconom. Hippocrat.*

ECTEXIS (*Med.*) ἐκτέξις, from τέκω, to liquefy; a colliquation of the solids.

ECTHELYNSIS (*Med.*) ἐκθηλύνσις, from ἐκθηλύνω, to render

effeminate; a term applied to the skin when lax and soft, and also to a bandage not sufficiently tight. *Hippocrat. Epid. 1. 1; Gal. Comm.; Foes. Oeconom. Hippocrat.*

ECTHLYMMA (*Med.*) ἐκθλιμμα, from ἐκθλίβω, to dash or press out; an exulceration on the surface of the skin made by collision or compression. *Hippocrat. de Fract.*

ECTHLYPSIS (*Med.*) ἐκθλιψίς, from ἐκθλίβω, to dash out; a term applied to swollen eyes, which dart forth corruscations of light. *Hippocrat. de Fract.; Gal. Comm. 2; Gorr. Def. Med.; Foes. Oeconom. Hippocrat.*

ECTHLYPSIS (*Gram.*) the cutting off a vowel or consonant, especially the letter *m* with its vowel, or the letter *h* at the end of a word in Greek and Latin verse, as βῆλαμ' ἔγω for βελάμαι ἔγω; monstr' horrend' informe for monstrum horrendum informe.

ECTHY/MA (*Med.*) ἐκθύμα, from ἐκθύω, to break out; a pustule, or cutaneous eruption. *Hippocrat. Epidem. 1. 2; Gal. Com. 3; Gorr. Def. Med.; Foes. Oeconom. Hippocrat.*

ECTILLO/TICA (*Med.*) from ἐκτίλλω, to pull out, which medicines which consume callous tubercles. *Gorr. Def. Med.*

ECTOME (*Med.*) from ἐκτέμνω, to cut out; excision.

ECTOMON (*Bot.*) Black Hellebore.

ECTOPIÆ (*Med.*) from ἐκ and τόπος, a place; parts displaced; an order of diseases in the *Class Locales* of Cullen's Nosology.

ECTOPOCI/STICA *Ischuria* (*Med.*) a suppression of urine from a rupture, or hernia.

ECTRIMMA (*Med.*) ἐκτριμμα, from ἐκτριβω, to rub off, rubbing or galling; a term for exulcerations of the skin about the *os sacrum*.

ECTROPE (*Med.*) ἐκτροπή, from ἐκτρέπω, to divert; a duct or passage by which the humours are diverted. *Hippocrat. Epid. 1. 2.—Ectrope*, a disease in the eyelid. [vide *Ectropium*]

ECTROPIUM (*Med.*) or *Ectrope*; a disease in the eyelids when they are so inverted, or retracted, that the eyes cannot be sufficiently covered by them. *Cels. 1. 7, c. 7; Gal. Defn. Med. Isagog.; Aet. Tetrab. 2, serm. 3, c. 2; Paul. Æginet. 1. 3, c. 22, &c.; Act. de Meth. Med. 1. 2, c. 7; Gorr. Def. Med.; Foes. Oeconom. Hippocrat.*

ECTRO/SIS (*Med.*) ἐκτρωσις, from ἐκτιτρώσχω, to miscarry; a miscarriage.

ECTRO/TICA (*Med.*) medicines which produce a miscarriage.

ECTYLO/TICA (*Med.*) from τύλος, a callosity; remedies for consuming a callosity.

ECTYPE (*Ant.*) *Ectypum*, from the Greek τύπον, a type or model; a copy taken from an original. *Senec. de Benef. 1. 3, c. 26; Plin. 1. 35, c. 12.*

ECTYPE (*Paint.*) or craticular ectype; the space marked out for an anamorphosis. [vide *Anamorphosis*]

ECZE/MA (*Med.*) from ζέω, to boil; a hot, fiery pustule. *Aet. Tetrab. serm. 1, c. 128.*

EDDY (*Nat.*) the running back of the water at any place contrary to the main tide, or stream.

EDDY-WATER (*Mar.*) the water that falls back as it were on the rudder of a ship under sail.—*Eddy-wind*, a wind checked by the sail, by a mountain reach, or any other thing that makes it recoil or return back.

EDE/CHIA (*Bot.*) the *Laugeria odorata* of Linnæus.

EDELPHUS (*Med.*) a person who makes prognostics from the nature of the elements. *Paracel. de Tartar. 1. 2; Tractat. 2, c. 3.*

EDENTULUS (*Med.*) without teeth.

EDE/RA (*Bot.*) the *Rhus Toxicodendron* of Linnæus.

EDESSENUM (*Med.*) an eyewater of Tragacanth.

to EDGE (*Mar.*) a-term in the sea phraseology for a gradual movement, as "To edge away from a coast," to decline gradually. "To edge in with a ship," to advance gradually towards the shore.

EDGINGS (*Hort.*) a border of grass for a flower-bed.

EDICT (*Polit.*) a public ordinance, or decree, issued by supreme command.

EDICTAL CITATION (*Law*) in Scotch law is the citation of a foreigner who is not in Scotland, but has a landed estate there.

E'DILE (*Ant.*) vide *Ædilis*.

EDITION (*Print.*) the publication of a book, and also its republication.

EDITIONES (*Ant.*) exhibitions of games. *Tacit. Annal.* l. 3, c. 37.

EDITOR (*Print.*) he who undertakes the revisal and republication of any work.

E'DRA (*Med.*) a fracture; also the lower part of the *rectum*.

EDULCORATION (*Chem.*) the washing of things that have been calcined in order to purify them from their salts.

EDULCORATION (*Med.*) the sweetening of any medicinal composition.

E'EL (*Ich.*) a voracious fish, the *Muræna* of Linnæus, which resembles the lizard both in appearance and habit. The bite of this fish is dangerous. [vide *Muræna*]

EEL (*Her.*) the eel is borne in the escutcheon either hauriant or naiant, as in the annexed figure. He beareth "Argent three eels naiant, in pale barways sable, name *Ellis*."

EEL-FARES (*Archæol.*) or Eel-vares, a fry or brood of eels.

EEL-POUT (*Com.*) a young eel.—*Eel Spear*, a forked instrument with which eels are caught.

EEL SPEAR (*Her.*) this instrument is also a charge in an escutcheon, as in the annexed figure. "He beareth *sable* a chevron between three eel-spears by the name of *Strandell*."

E Flat (*Mus.*) vide *E*.

EFFECTION (*Geom.*) the geometrical construction of a proposition; also such problems and practices as are deducible from general propositions are called *effections* of them.

EFFE'CTIVE (*Mil.*) an epithet for any body of men that are fit for service, as "30,000 *effective* men;" also a word to denote the actual presence of an officer or soldier.

EFFE'CTS (*Com.*) the moveables or goods of any merchant, tradesman, &c.

EFFECTS of the Hand (*Man.*) the aids or motions of the hand which serve to conduct the horse. There are four, i. e. four ways of using the bridle; namely, to push the horse forward; to give him head or hold him in; and to turn the hand either to the right or the left.

EFFE'CTUAL adjudication (*Law*) a legal security for a debt on the estate of the creditor in Scotland.

EFFEE'RERS (*Law*) vide *Affeerers*.

EFFELLO'NIE (*Her.*) vide *Rampant*.

EFFENDI (*Polit.*) a title of distinction in Turkey.

EFFERVE'SCENCE (*Chem.*) a violent commotion in the parts of any liquor, accompanied with some degree of heat. It differs from a fermentation only in the violence of the motion. This term is particularly applied to the effect produced by the mixture of an acid with an alkali.

EFFI'CIENT cause (*Phy.*) any cause that actually produces the effect.

E'FFIGY (*Paint.*) any representation whatever which gives the figure of the person, whether in whole or in part. On coins the effigy consists mostly of the head of the prince.

E'FFILA (*Med.*) Freckles.

EFFLORA'TIO (*Med.*) vide *Exanthema*.

EFFLORE'SCENCE (*Bot.*) *efflorescentia*; the flowering season, or the time of the month in which different sorts of plants first show their flowers.

EFFLORESCENCE (*Med.*) a preternatural redness of the skin.

EFFLU'VIA (*Nat.*) such small particles as are continually flowing out of almost all mixed bodies.

EFFLU'VIUM (*Med.*) is taken in an especial manner for the vapours which pass through the pores or insensible holes of the skin.

EFFRACTURA (*Med.*) a species of fracture of the cranium when the bone is broken and much depressed.

EFFRONTES (*Ecc.*) a sect of heretics in the sixteenth century who scraped their foreheads till they brought blood, which they substituted for the ceremony of baptism.

EFFUSIO Sanguinis (*Law*) a fine or penalty imposed by the ancient English laws for bloodshed and murder, which the King granted to many lords of manors.

EFFUSION (*Chem.*) the pouring out a liquor by the inclination of the vessel, in such manner that the sediment may remain behind.

EFFUSION (*Surg.*) the escape of any fluid out of the vessel, or viscus naturally containing it; also the natural secretion of fluids from the vessels.

EFT (*Zool.*) a sort of lizard, the *Lacerta seps* of Linnæus, which has a body covered with truncate scales and a verticillate tail. It is reckoned venomous.

E. G. (*Gram.*) an abbreviation for *exempli gratia*, i. e. for example. [vide *Abbreviations*]

EGESTIO (*Med.*) Excretion; applied generally to evacuations by stool.

EGG (*Nat.*) the fœtus or production of feathered creatures; also the spawn and sperm of other animals.

EGG-PLANT (*Bot.*) the *Solanum Melongena* of Linnæus; so called because the fruit is like an egg.

EGG-SHAPED (*Bot.*) vide *Ovate*.

EGISTMENTS (*Law*) vide *Agistments*.

EGLANDULOSUS (*Bot.*) an epithet for a petiole that is without glands.

EGLANDTERIA (*Bot.*) another name for the *Rosa lutea* of Linnæus.

EGLANTINE (*Bot.*) the Wild Rose.

E'GRET (*Zool.*) an animal of the monkey tribe; the *Simia aygula* of Linnæus.

EGRET (*Orn.*) a bird of the heron kind, of which there is the *Great Egret*, that is about two feet long, and the *Little Egret*, which is a foot long.

EGUI'SCÉ (*Her.*) vide *Aiguisee*.

EHRE'TIA (*Bot.*) a genus of plants; so called after G. D. Ehret, a famous botanist, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Character. CAL. *perianth* one-leaved.—COR. one-petalled.—STAM. *filaments* five; *anthers* roundish.—PIST. *germ* roundish; *style* filiform; *stigma* obtuse.—PER. *berry* roundish; *seeds* four.

Species. The species are trees or shrubs, as the—*Ehretia unifolia*, seu *Cerasso affinis*, Tinus-leaved Ehretia.—*Ehretia Bourreria*, *Cordia*, *Bourreria*, *Pittonia*, seu *Jasminum*, Oval-leaved Ehretia, native of the West Indies.—*Ehretia exsucca*, seu *Rhamnus*, Dry-fruited Ehretia, native of Carthage.

EHRETIA is also the name of the *Lycium Boerhaaviaefolium*.

EHRHA'RTIA (*Bot.*) a genus of plants; so called from Frederick Ehrhart, Class 6 *Hexandria*, Order 2 *Digynia*.

Generic Character. CAL. *glume* one-flowered.—COR. double.—STAM. *filaments* six; *anthers* upright.—PIST. *germ* ovate; *style* compressed; *stigma* simple.—PER. none; *seeds* ovate.

Species. The species are perennials, as the—*Ehrhartia cartilaginea*, seu *Mnemeaia*, native of the Cape of Good Hope.—*Ehrhartia bulbosa*, seu *Trochera*, native of the Cape of Good Hope.—*Ehrhartia calycina*, seu *Aira capensis*, native of the Cape of Good Hope.

EJACULA'NTIA (*Anat.*) or *Ejaculatoria Vasa*, the vessels which receive the seminal fluid, elaborated in the testes,

and convey it to the penis: these are the *Epididymis*, the *Vasa Deferentia*, *Vesiculæ Seminales*, and *Prostatae*.

EIDER-DUCK (*Orn.*) a species of the *Anas* tribe, which is remarkable for the softness of its down. This is gathered in the breeding season, when the bird strips its breast for the purpose of making its nest.

EIDOURANION (*Astron.*) from εἰδούς, heaven, and εἶδος, the form or appearance; an exhibition of the heavens and the heavenly bodies, with their motions, &c.

EJECTIO (*Med.*) the same as *Excretio*.

EJECTIONE custodice (*Law*) a writ lying against one who casts a guardian out from any lands whilst the heir is under age. *F. N. B.* 139; *Reg. Orig.* 162.—*Ejectione firmæ*, Ejectionment, a writ which lies for a term of years, for the lessee who is cast out before the expiration of the term. *F. N. B.* 220.

EJECTMENT (*Law*) a writ by which any tenant or inhabitant of an estate or house, is commanded to depart.

EJECTUM (*Archæol.*) jetsom, or wreck of goods thrown overboard in a storm.

EIGHTH (*Mus.*) an interval comprehending seven conjunct degrees, or eight diatonic sounds.

EIGHTEENTH (*Mus.*) an interval comprehending two octaves and a fourth.

EIGHT-FOIL (*Her.*) or *double quatre foil*, eight-leaved grass, given by Morgan as a difference of the ninth branch of a family.

EIKING (*Mar.*) a piece in ship building, fitted to make good a deficiency in length, as the lower part of the supporter under the cat-head.

EILA'MIDES (*Anat.*) εἰλαμίδες, from ειλέω, to involve; an epithet for the Meninges, or membranes of the brain.

EILEMA (*Anat.*) εἰλημα, from ειλέω, to involve; a painful circumvolution of the intestines.

EILEON (*Anat.*) the *Ilium*.

EIRE (*Law*) the name for the court of justice, itinerant and Eyre; the justices in *Eyre*, are called by Bracton *justiciarios itinerantes*; and the *Eyre* of the Forest is the seat of justice. *Bract. l.* 3, c. 11; *Horn's Mir.*; *Manw. For. Laws Par.* 1. 1, p. 121.

EISBOLE (*Med.*) εἰσβολή, from εἰσβάλλω, to inject; is taken for an access or attack of a particular distemper; and also for an irruption.

EISPNOE (*Med.*) εἰσπνοή, from εἰε, and πνέω, to breathe; inspiration.

EKEBERGIA (*Bot.*) a genus of plants, Class 10 *Decandria*, Order 1 *Monogynia*.
Generic Character. CAL. perianth one-leaved.—COR. petals four.—STAM. filaments ten; anthers ovate.—PIST. germ superior; style cylindrical; stigma capitate.—PER. berry globular; seeds five.
Species. The species is a tree, as the *Ekebergia capensis*.

EKLYSIS (*Mus.*) ἐκλυσις, a particular kind of tuning among the ancients, in which, from a certain sound, the performer dropped by an interval of three quarter tones.

ELA (*Mus.*) a name formerly given to the highest note in the scale of Guido.

ELA-CALLI (*Bot.*) the name of a shrub which grows in sandy soils in the East Indies. The *Euphorbia nervifolia* of Linnæus. *Raii Hist. Plant.*

ELÆACHNUS (*Nat.*) another name for the *Elæagnus* of Linnæus.

ELÆAGNUS (*Bot.*) a genus of plants, Class 4 *Tetrandria*, Order 1 *Monogynia*.
Generic Character. CAL. perianth one-leaved.—COR. none.—STAM. filaments four; anthers oblong.—PIST. germ roundish; style simple; stigma simple.—PER. drupe ovate; seeds nut oblong.
Species. The species are trees, as the *Elæagnus angustifolia*, seu *Oleaster*, Narrow-leaved Oleaster.—*Elæagnus*

orientalis, seu *Zizyphus*, Oriental Oleaster, native of Persia.—*Elæagnus crispa*, Curled-leaved Oleaster.

ELÆGRUS (*Bot.*) the *Elæagnus orientalis* of Linnæus.

ELÆIS (*Bot.*) a genus of plants, Natural Order of Palms.
Generic Character. CAL. perianth six-leaved.—COR. one-petalled.—STAM. filaments six; anthers oblong.—PIST. germ ovate; style thickish; stigmas three.—PER. drupe fibrous; seed nut ovate.
Species. The species is a tree, as the—*Elæis guineensis*, *Nucula*, seu *Palma oleosa*, native of the West Indies.

ELÆOCARPUS (*Bot.*) a genus of plants, Class 13 *Polyandria*, Order 1 *Monogynia*.
Generic Character. CAL. perianth one-leaved.—COR. petals five.—STAM. filaments twenty to thirty; anthers linear.—PIST. germ globular; style filiform; stigma sharp.—PER. drupe oblong; seed nut oblong.
Species. The species are trees, as the—*Elæocarpus dentatus*, seu *Dicera serrata*.—*Elæocarpus copalliferus*, seu *Vateria*, native of the East Indies.

ELÆODENDRUM (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.
Generic Character. CAL. perianth five-leaved.—COR. petals five.—STAM. filaments five; anthers erect.—PIST. germ roundish; style conical; stigma obtuse.—PER. drupe ovate; seed nut ovate.
Species. The two species are trees, as the *Elæodendrum orientale* et *argan*.

ELÆOMELI (*Nat.*) ελαιόμελι, from ἔλαιον, oil, and μέλι, honey; a gum thinner than resin, and thicker than honey, which is of an oily nature, and drops from the olive trees in Syria. *Dioscor. l.* 1, c. 37; *Plin. l.* 23, c. 4.

ELÆOPHYLLON (*Bot.*) the herb Mercury.

ELÆOSACCHARUM (*Chem.*) from ἔλαιον, oil, and σάκχαρον, sugar; a mixture of essential oil with sugar.

ELÆOSELI'NUM (*Bot.*) Water-Parsley.

ELÆOTHESIUM (*Ant.*) ελαιόθεισιον, a place where the ancients used to anoint their bodies after bathing. *Vitruv. l.* 5, c. 2; *Philand. in Vitruv.*; *Bald. Lex. Vitruv.*

ELAIOCA'RPOS (*Bot.*) another name for the *Elæocarpus* of Linnæus.

ELAIN (*Chem.*) a fine oil obtained from tallow and fat.

ELAIS (*Bot.*) another name for the *Elæis* of Linnæus.

ELANULA (*Chem.*) an old name for alum.

EL'OLITE (*Min.*) a species of Felspar.

ELAPHEBOLIA (*Ant.*) a festival in honour of Diana Elaphebolus, celebrated by the Phocensians. *Athen. l.* 14.

ELAPHEBOLION (*Chron.*) ελαφεβολιών, a Greek month; so called from ελαφεβόλος, an epithet of Diana, because she hunts stags. It answers to our December, or, according to Gaza, to our February.

ELAPHICON (*Med.*) vide *Elaphoboscon*.

ELAPHOBO'SCON (*Bot.*) ελαφόβοσκον, a herb commonly called Wild Parsnep. *Plin. l.* 22, c. 22.

ELAPHOSCORODON (*Bot.*) vide *Ophioscorodon*.

ELAPHRIUM (*Bot.*) the *Fagara octandra* of Linnæus.

EL'APHRUS (*Ent.*) a division of the genus *Cicindela*, comprehending those insects which have the lip rounded and entire.

EL'LAPS (*Zool.*) a sort of serpent mentioned by Aetius, the bite of which induces something like the *Iliac Passion*. *Aet. Tetrab.* 4, serm. 1, c. 32.

EL'AS (*Chem.*) Burnt Lead.

EL'ASIS (*Nat.*) Elasticity.

ELASMA (*Med.*) ελασμα, from ελάω, to drive; properly signifies a lamina, or plate of any kind: but is taken for a Clyster-Pipe.

ELASTIC CURVE (*Geom.*) vide *Catenaria*.

ELASTIC (*Phy.*) an epithet for all bodies endowed with the property of elasticity, or springiness; so also the force of

a spring is called its elastic force. Gases are distinguished by the name of *elastic fluids*, because of the property which they possess in a peculiar manner of returning to their former place.

ELASTIC GUM (*Bot.*) the same as *Caoutchouc*.

ELASTICITY (*Phy.*) that property in bodies by which they restore themselves to their former figure. Hence it is that naturalists speak of the *Elasticity of Fluids*, or of the *Air*, which may be compressed into a smaller space, but revert to their former extent when the external force is removed.

ELATE (*Bot.*) the Fir-Tree.

ELATE, in the *Linnean system*, a genus of plants, of the Natural Order of *Palmae*.

Generic Character. CAL. *spathe* two-valved.—COR. *petals* three.—STAM. *filaments* three; *anthers* adnate.—PIST. *germ* roundish; *style* subulate; *stigma* sharp.—PER. *drupe* ovate; *seed* nut ovate.

Species. The single species is a tree, as the *Elate sylvestris*, seu *Palma*, Prickly-leaved *Elate*, native of the East Indies.

ELATER (*Ent.*) a genus of Insects of the Coleopterous order, so called because its thorax terminates in an elastic spine placed in the abdomen, by means of which the insect, when placed on its back, springs up, and recovers its natural posture.

ELATERIUM (*Bot.*) ἐλατρισμῶν, from ἐλάω, to agitate; a plant so called from its purgative qualities. *Cels.* l. 5, c. 12; *Dioscor.* l. 4, c. 155; *Plin.* l. 20, c. 1; *Gal. Exeges. Vocab. Hippocrat.*; *Oribas. Med. Collect.* l. 12; *Act. Te-trab.* l. 1, serm. 1; *Paul. Aeginet.* l. 7, c. 3.

ELATERIUM, in the *Linnean system*, a genus of plants, Class 21 *Monococia*, Order 2 *Monandria*.

Generic Character. CAL. none.—COR. one-petalled.—STAM. *filament* single; *anthers* linear.—PIST. *germ* inferior; *style* columnar; *stigma* capitate.—PER. *capsule* inferior; *seeds* several.

Species. The species are annuals, as the—*Elaterium carthaginense*.—*Elaterium trifoliatum*, seu *Sicyos*, native of Virginia.

ELATERIUM, the same as the *Momordica*.

ELATERIUM (*Phy.*) the elastic property peculiar to the air.

ELATERIUM (*Med.*) the juice of wild cucumbers made up into a thick consistence in fragments of flat or thin cakes.

ELATHERIA (*Bot.*) a name for the Cascarilla Bark.

ELATINE (*Bot.*) ἐλατίνη, from ἐλάσσω, the less; a herb so called because it is a smaller species of the *Helvine*. *Dioscor.* l. 4, c. 40; *Plin.* l. 27, c. 9.

ELATINE, in the *Linnean system*, a genus of plants, Class 8 *Octandria*, Order 4 *Tetragynia*.

Generic Character. CAL. *perianth* four-leaved.—COR. *petals* four.—STAM. *filaments* eight; *anthers* simple.—PIST. *germ* large; *styles* four; *stigmas* simple.—PER. *capsule* orbicular; *seeds* several.

Species. The species are annuals, as the—*Elatine Hydro-piper*, Opposite-leaved Water-wort, seu *Alsinastrum*, native of Denmark.—*Elatine Alsinastrum*, seu *Equisetum*, Whorl-leaved Water-wort, native of Aboa.

ELATINE is also the *Antirrhinum elatine* of Linnæus.

ELATIO (*Ant.*) ἐκκομιδή, the ceremony of carrying out the corpse on the day of the funeral.

ELATOSTEMA (*Bot.*) the *Dorstenia lucida* of Linnæus.

ELBOW (*Anat.*) the outer angle made by the flexure or bend of the arm.

ELBOW (*Archit.*) the obtuse angle of a wall or building.

ELBOW in the *havse* (*Mar.*) a particular twist in the cables, by which a ship rides at anchor.

ELCESAITÆ (*Ecc.*) ἐλκεσῖται, a sect of heretics in the first century, so called from their ringleader Elcasæus, who maintained that denying Christ to escape persecution was an indifferent matter. *Orig. in Homel.*; *Euseb.*

Ecc. Hist. l. 6, c. 48; *Epiphan. de Hæres.* 19. 53, &c.; *August. de Hæres.* c. 32; *Niceph.* l. 5, c. 24; *Baron. Annal.* ann. 105.

ELCŌSIS (*Med.*) from ἔλκος, an ulcer; a disease attended with fetid ulcers.

ELDER (*Mil.*) an epithet for officers whose commissions bear the earliest date; and also for battalions that have been first raised.

ELDER (*Ecc.*) is another name for the presbyter; an officer in the Christian Church mentioned in the New Testament.

ELDER (*Bot.*) a well-known shrub, the *Sambucus* of Linnæus; the two principal species of which are the *Sambucus nigra*, Common Elder; and the *Sambucus ebulus*, the Dwarf Elder.—Marsh Elder, the *Viburnum apulus* of Linnæus, is a shrub, so called from its growing in watery places.

ELECAMPANE (*Bot.*) the *Inula Helimum* of Linnæus.

ELECT (*Polit.*) signifies the same as elected, as the Lord Mayor Elect, i. e. he who is appointed to succeed in the mayoralty.

ELECT (*Theol.*) a Calvinistic term for such as are supposed by this sect to be chosen for salvation by the special grace of God, irrespective of their good or bad deeds.

ELECTARIUM (*Med.*) vide *Electuarium*.

ELECTION (*Polit.*) which signifies properly choice, is particularly applied to a popular choice by vote of a person for any office.

ELECTION of a Clerk of Statutes-Merchant (*Law*) a writ that lies for the choice of a clerk assigned to take bonds called *Statutes-Merchant*.—*Election of a Verder of the Forest*, a writ that lies for the choice of a Verderor in case of a vacancy by death or otherwise.

ELECTION (*Arith.*) the several ways of taking any numbers of quantities given, without having respect to their places.

ELECTIONS (*Astrol.*) certain times pitched upon as fittest for undertaking a particular business.

ELECTIVE Attraction (*Chem.*) another name for the chemical affinities of bodies.

ELECTOR (*Polit.*) a title belonging to certain princes of the German empire, who, according to the institution of Charles IV, have a right to choose the emperors.

ELECTOR (*Law*) signifies generally any one who elects, but is particularly applied to those who have a voice in the election of a member of Parliament.

ELECTORAL Crown (*Her.*) a scarlet cap faced with *ermine*, diademed with half a circle of gold set with pearls supporting a globe with a cross of gold on the top, as in the annexed figure.

ELECTRIC (*Phy.*) from ἤλεκτρον, amber; a term for any substance in which the electric fluid can be excited; so called because this property was first observed by the ancients in amber. *Electrics* are otherwise called *Non-Conductors*, because they accumulate the fluid without transmitting it. To the class of *Electrics*, or *Non-Conductors*, belong resins, bituminous substances, glass, and all vitrifications; dry animal substances, as feathers; paper, white sugar; air, oils, chocolates, calces of metals, &c.

Electric, or *electrical*, is an epithet applied to different things connected with electricity, as—*Electrical air Thermometer*, an instrument for determining the effects of the electrical explosion upon air.—*Electrical Atmosphere*, a stream or mass of the electric fluid which surrounds an electrified body at a certain distance.—*Electrical Balls*, vide *Balls*.—*Electrical Battery*, consisting of a number of coated jars connected with each other, which, being charged or electrified, are then exploded or discharged with prodigious effect.—*Electrical Bells*, a set of bells mounted in a peculiar manner so as to be rung by means of the action of the electric fluid.—*Electrical Machine*, the apparatus so

called, in which electric bodies are subjected to friction so as to excite in them an electrical power. The machine is of various forms, of which the most common is, as given in the annexed figure, where A B C D represents the frame of the machine; E, F, two round pillars which support the cylinder; G, by the axles of the brass or wooden cups; H, turned sometimes by a simple winch, as I in this figure, and sometimes by a pulley and wheel. The rubber is fixed to a glass pillar, K, which is fastened to a wooden basis, L, at the bottom. The conductor, N, is usually made of brass, or tin japanned, and is insulated by a glass pillar, O, screwed into a wooden basis or foot most conveniently placed parallel to the cylinder.—*Electrical Phial*, vide *Leyden Phial*.—*Electrical Rubber*, a part of the electrical apparatus which is made of black oiled silk with an amalgam, &c.—*Electrical Shock*, the sudden explosion between the opposite sides of a charged electric.—*Electrical Star*, vide *Star*.

ELE'CTRICAL Eel (*Ich.*) the *Gymnotus electricus* of Linnæus, a particular sort of fish so called from its power of producing an electrical shock whenever it is touched. By this power it stupifies, and then seizes, such animals as venture to approach it.

ELECTRICITY (*Nat.*) or *Electric force*, that power or property, first observed in amber, of attracting light bodies when excited by heat or friction, which is also capable of being communicated in particular circumstances.

Electricity is also taken for the theory or science which treats on the nature and effects of the electric power.

Electricity, according to the modern system, is distinguished into *positive* and *negative*, according to the ways in which bodies are excited. When to bodies a superabundant quantity of electricity is added they are said to be electrified *positively*; but, when they are deprived of a portion of what they naturally contain, they are electrified *negatively*, or *minus*; they were originally called *vitreous* and *resinous Electricity*. When bodies contain the usual quantity of the fluid, and exhibit no signs of electricity, they are said to be *neutral*. Those which are capable of being excited by friction are called *Electrics*, the others *Non-Electrics*; and those which become electric by being placed in the neighbourhood of an excited body, are called *Conductors*, and those which do not undergo such change are called *Non-Conductors*. [vide *Electric*]

ELECTRO'DES (*Med.*) ἠλεκτράδες, an epithet for stools that shine like amber.

ELECTRO'METER (*Mech.*) an instrument for measuring the quantity, and determining the quality, of electricity in any electrified body.

ELE'CTRUM (*Nat.*) ἠλεκτρον, amber.

ELECTRUM minerale (*Med.*) the tincture of metals.

ELECTUA'RIVM (*Med.*) an Electuary.

ELEEMO'SYNA (*Archæol.*) alms; but *Eleemosyna Regis* was the penny which King Ethelred ordered to be paid for ever towards the support of the poor. *Leg. Ethelred.* c. 1.—*Eleemosynæ*, the possessions belonging to the church.

ELEEMOSYNA'RIA (*Archæol.*) Eleemosynary.

ELEEMOSINA'RIVS (*Archæol.*) the Almoner.

ELEEMO'SYNARY Corporations (*Law*) corporate bodies constituted for the perpetual distributions of free alms, and bounty of the founder.

ELEGI'A (*Bot.*) a genus of plants, Class 22 *Diœcia*, Order 3 *Triandria*.

Generic Character. CAL. *spathes* within *spathes*.—COR. none.—STAM. *filaments* three; *anthers* oval.—PIST. *germ* oblong; *styles* three; *stigmas* simple.—PER.
seed

Species. The single species is the *Elegia juncea*, native of the Cape of Good Hope.

ELE'GIAC Verse (*Poet.*) ἐλεγιακός, a sort of verse used in elegies, which is always pentameter.

ELEGIA'MBIC Verse (*Poet.*) a sort of verse used by Horace in his poems called *Epodes*.

ELE'GIT (*Law*) a writ that lies for him who has recovered debt, or damage, in the King's Court against one not able in his goods to satisfy his creditors.

ELE'GMA (*Med.*) a Linctus.

ELELI'SPHACOS (*Med.*) a sort of sage.

ELE'MBAT (*Chem.*) Alkaline Salts.

ELEMENTARIES (*Myth.*) a sort of fairy beings who were supposed to inhabit the elements.

E'LEMENTS (*Chem.*) the first principles of which bodies are composed. Among the ancients there were reckoned four elements or elementary principles, namely, fire, air, earth, and water; which, as they supposed, entered into the composition of all other bodies, but themselves admitted of no decomposition. In modern chemistry no such elementary principles are admitted, it being supposed that all bodies either are or may be decomposed; thus water is said to consist of hydrogen and oxygen.

ELEMENTS (*Geom.*) the infinitely small parts or differentials of a right line, curve, surface, or solid.

ELEMENTS (*Lit.*) the first principles of any art or science.

E'LEMI (*Bot.*) a sort of gum flowing from the *Amyris elemifera* of Linnæus.

ELEMIFERA (*Bot.*) the *Amyris elemifera* of Linnæus.

ELE'NCHUS (*Log.*) ἐλεγχος, from ἐλεγχω, to confute; a sophistical sort of argument.

ELE'NGI (*Bot.*) a tree of Malabar, the *Minusops elengi* of Linnæus.

ELE'NIA (*Ant.*) ἐλενία, a festival celebrated by the Lacedæmonians in honour of Helena. *Hesychius*.

ELENOPHORIA (*Ant.*) ἐλενοφορία, an Athenian festival, so called from the ἐλεναί, i. e. vessels made of bulrushes, which were carried about at that time.

ELEOCHRYSUM (*Bot.*) vide *Gnaphalium*.

ELEOSELIVM (*Bot.*) the *Apium graveolens* of Linnæus.

E'LEPHANT (*Her.*) is borne as a charge in coat armour, either whole or in parts, as in the annexed figure. He beareth "*Gules* an elephant passant *argent*, tusked *or*;" by the name of *Elphinston*."—*Order of the Elephant*, or *Order of St. Mary*, an order of knighthood instituted by Canute in 1184. Knights of this order wear a blue ribband, with a towered elephant pendant, and an image of the Holy Virgin encircled with rays.

ELEPHANTIA (*Med.*) vide *Elephantiasis*.

ELEPHANTIASIS (*Med.*) or *Elephantia*, ἐλεφαντίασις, from ἐλεφας, an elephant; a species of leprosy; so called because it makes the legs of the person affected appear like those of an elephant. *Aret. de Sig. & Caus Diut. Morb.* l. 2, c. 13; *Cels.* l. 3, c. 25; *Gal. Defin. Med.*; *Cal. Aurel. Morb. Chron.* l. 4, c. 1; *Aet. Tetrab.* 4, serm. 1, c. 120; *Paul. Æginet.* l. 4, c. 1; *Act. de Meth. Med.* l. 2, c. 11; *Avicenn.* l. 22, *Fen.* 3, tract 1, c. 16, &c.; *Foës. Econom. Hippocrat.*

ELEPHANTIASIS is a genus of diseases, Class *Cachætie*, Order *Impetiginæ*, in Cullen's Nosology.

ELEPHANTINI LIBRI (*Ant.*) books among the Romans, in which their public acts were registered. They were so called, as is supposed, because they were made of ivory.

Vopis. in Tacit.; Ulp. l. 52, D. de Legat.; Oisel. in Aul. Gell. l. 2, c. 17.

ELEPHANTINUM EMPLASTRUM (*Med.*) a plaster described by Celsus, and another by Oribasius. *Cels. l. 5, c. 19; Oribas. Synop. l. 3.*

ELEPHANTOPUS (*Bot.*) a genus of plants, Class 19 *Syngenesia*, Order 5 *Polygamia-Segregata*.

Generic Character. CAL. involucre of three broad petals.

—COR. compound tubular.—STAM. filaments five; anthers tubular.—PIST. germ ovate; style filiform; stigmas two.—

PER. none; seeds solitary; receptacle naked.

Species. The species are as follow—*Elephantopus scaber, Scabiosæ affinis, Bidens, seu Echinophora*, Rough-leaved Elephant's Foot, a perennial.—*Elephantopus spicatus, seu Conyza, &c.*

ELEPHANT'S-FOOT (*Bot.*) the *Elephantopus* of Linnaeus, a plant so called, from the form of its lower leaves.

ELEPHANTS' HEADS (*Her.*) are mostly borne *erased*.

ELEPHAS (*Zool.*) Elephant; a genus of animals, Class *Mammalia*, Order *Bruta*, having foreteeth in either jaw, and no lower tusks; upper tusks elongate, and a long prehensile proboscis.

ELEPHUS (*Bot.*) another name for the *Rhinanthus* of Linnaeus.

ELEPHEBOLIA (*Ant.*) vide *Elaphebolia*.

ELETTARI (*Bot.*) the *Amonium Granum paradisica* of Linnaeus.

ELEVATED (*Astrol.*) a planet is said to be elevated above another when, being stronger, it weakens the influence of the other.

ELEVATED (*Her.*) an epithet for wings, signifying the same as *Erect*.

ELEVATION (*Surg.*) a name for a tumour, because it is an elevation of the part affected.

ELEVATION (*Chem.*) the rising up of any matter in the manner of fume and vapour.

ELEVATION (*Gumm.*) the angle which the chace of a cannon or mortar, or the axis of the hollow cylinder, makes with the place of the horizon.

ELEVATION (*Astron.*) a term applied to the Equator, Pole, Star, &c. to denote its height above the horizon.—*Elevation of the pole* is the height of the pole above the horizon, or the number of degrees the pole is raised above the horizon.

ELEVATION of the pole (*Dial.*) the angle which the style makes with the substilar line.

ELEVATION (*Archit.*) a draught and description of the face or principal side of a building, which in common language is called the *upright*. The word is sometimes taken for the perspective representation of the whole body of a building.

ELEVATION of the Host (*Ecc.*) that part of the ceremony of the mass which consists in the priest's raising the host above his head for the adoration of the people.

ELEVATION (*Chem.*) the causing any matter to rise in fume or vapours by means of heat.

ELEVATOR (*Anat.*) an epithet for several muscles which serve to draw the parts of the body upwards, as—*Elevator labii superioris et inferioris*, those which serve to draw up the upper and lower lips—*Elevator oculi*, the muscle of the eye, arising near the place where the optic nerves enter the orbit.

ELEVATORIUM (*Surg.*) a surgeon's instrument, where-with depressed skulls are raised up again.

ELEVENTH (*Mus.*) an interval consisting of ten conjunct degrees, or eleven diatonic sounds.

ELEUSINE (*Bot.*) another name for the *Cynosurus* of Linnaeus.

ELEUSINIA (*Ant.*) ἑλευσινία, one of the most mysterious solemnities of any in Greece, which, on that account was called, by way of distinction, *μυστηρία*, i. e. the mysteries. It was celebrated in honour of Eleusis, or Proserpine, the

daughter of Ceres. *Aristoph. Plut.; Isocrat. in Panegyric.; Diodor. Sicul. l. 6; Poll. Onom. l. 1, segm. 37; Strab. l. 9; Pausan. l. 10, c. 31; Plut. in Demet.; Tertull. adver. Valerian.; Clem. Alexand. Stromat. l. 5; August. de Civ. Dei. l. 7, c. 20; Gregor. Nazian. Orat. περί ἀγίων φάρων; Harpocration; Suidas Tetz. ad Lycoph.; Meurs. de Eleus. &c.; Castellus, &c. apud Gronov. tom. 7.*

ELEUTHERIA (*Ant.*) ἑλευθερία, a festival celebrated at Plataea, in honour of Jupiter Eleutherius, i. e. the assertor of liberty; by delegates from all parts of Greece. This festival was celebrated in commemoration of the signal defeat of the Persians under Mardonius. *Pind. Olymp. l. 7; Strab. l. 9; Plut. Aristid.; Pausan. l. 9, c. 2; Athen. l. 3; Eustath. in Il. l. 2; Schol. Anthol. Epigram. Græc. l. 2, tit. 1, &c.*

ELF-ARROWS (*Archæol.*) flint-stones sharpened and jagged like arrow-heads, which were weapons of offence among the ancient Britons.

ELICHRYSUM (*Bot.*) the *Gnaphalium Stæchas* of Linnaeus.

ELICITI (*Eth.*) an epithet applied to the more immediate acts of the will, as loving, hating, &c.

ELIGMA (*Med.*) a Linctus.

ELIMINATION (*Algeb.*) an operation by which any number *n* of equations containing *n* unknown quantities being given, we find one equation, which involves only one unknown quantity. [vide *Algebra*]

ELIOCARPOS (*Bot.*) the *Ornithogalum umbellatum* of Linnaeus.

ELIQUAMENT (*Chem.*) a fat juice squeezed out of fat or fish.

ELISION (*Gram.*) the cutting off a vowel at the end of a word in a verse.

ELISORS (*Law*) two persons named by the court, and sworn to indifferently choose a jury in cases of challenge to the sheriff and coroners for partiality, &c.

ELIXIR (*Med.*) a medicine made by strong infusion, where the ingredients are almost dissolved in the *menstruum*, and give it a thicker consistence than a tincture. This was formerly held in such high esteem, that the word has since been used to imply any very powerful tincture; and the *grand elixir* is another word for an all-powerful medicine.

ELIXIVATIO (*Chem.*) from *elixo*, to boil; the extraction of a fixed salt from vegetables by an affusion of water.

ELK (*Zool.*) the *Cervus alces* of Linnaeus, a beast of the stag kind, equal to a horse in size, which inhabits all the four quarters of the world except Africa. It has a skin hard enough almost to resist a musket-ball, goes on its hoof with a shambling gait about 50 miles a day, and feeds on the branches of trees and marsh plants.

ELKE (*Bot.*) a kind of yew formerly employed in the making of bows.

ELL (*Com.*) a measure containing three feet nine inches.

ELLEBORINE (*Bot.*) the *Ashantia epipactus* of Linnaeus.

ELLEBORUM (*Bot.*) the *Helleborus viridis et fetidus*. *Oribas. Med. Coll. l. 15; Act. Tetrab. l. 1, serm. 1; Paul. Aegin.*

ELLIPSIS (*Geom.*) ἑλλυψις, a defect, is taken for a conic section, vulgarly known by the name of an oval, which was so called by Apollonius, because in this figure the squares of the ordinates are less than, or defective of, the rectangle under the parameters and abscissee. [vide *Conic Sections*]

ELLIPSIS (*Rhet.*) a figure whereby some part of a discourse is left.

ELLIPSOID (*Geom.*) an elliptical spheroid, being the solid generated by the revolution of an ellipse about either axis.

ELLIPTIC (*Bot.*) an epithet for a leaf that is in the form of an ellipse.

ELLIPTICAL (*Math.*) an epithet for any thing in the form of or appertaining to an ellipsis.

ELLIPTICITY (*Geom.*) of the terrestrial spheroid is the ratio or the difference between the two semi-axes.

ELLIPTOID (*Geom.*) an infinite or indefinite ellipse defined by the indefinite equation, as $y^{m+n} = bx^m (a-x)^n$, where m and n are greater than 1.

ELLISIA (*Bot.*) a genus of plants so called in memory of John Ellis, F. R. S., Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Character. CAL. *perianth* one-leaved.—COR. one-petalled.—STAM. *filaments* five; *anthers* roundish.—PIST. *germ* roundish; *style* filiform; *stigma* oblong.—PER. *capsule* bag-form; *seeds* globose.

Species. The species is an annual, as the—*Ellisia Nyctelea*, *Polemonium*, *Planta*, seu *Scorpiurus*, Cut-leaved *Ellisia*, native of Virginia.

ELLISIA is also the *Durántia ellisia* of Linnæus.

ELLOBOS (*Bot.*) ἑλλοβος, an epithet for such seeds or fruits as are contained in pods or lobes.

ELM (*Bot.*) the *Ulmus* of Linnæus; a sort of tree which grows to a very great height, is raised either by seeds, suckers, or layers, and thrives best in a rich black earth. The sorts most fit for cultivation are, the common Elm, the Witch-Elm, and Witch-Hazle. The timber of elm is next to that of oak for value, being particularly useful for mills, and all other works which are exposed to wet.

ELMINTHES (*Ent.*) worms.

ELODES (*Med.*) an epithet for a fever which is attended with a profuse sweat.

ELOINE (*Law*) from the French *éloigner*, signifies to send to a distance. *Stat.* 13 *Ed.* 1, c. 15.

ELONGATA (*Law*) a return of the sheriff that cattle are not to be found, or are removed so far that he cannot make deliverance.

ELONGATION (*Surg.*) a kind of imperfect disjuncting, when the ligament of a joint is stretched and extended, but not so that the bone is quite out of joint.

ELONGATION (*Astron.*) the removal of a planet to the farthest distance it can be from the sun, as it appears to an observer on the earth.—*Angle of Elongation* is an angle contained under lines supposed to be drawn from the centres of the sun and planet to the centre of the earth. [vide *Astronomy*]

ELOPEMENT (*Law*) the going away from a husband; for which, without voluntary reconciliation to her husband, a wife shall lose her dower; nor is he obliged to allow her any maintenance.

ELOPS (*Ich.*) a genus of Fishes of the *Abdominal* Order, having a smooth head, and a palate rough with teeth.

ELOPHORUS (*Ent.*) a division of the genus *Nitidula*, comprehending the insects which have the lip square.

ELVELA (*Bot.*) another name for the *Helvella* of Linnæus.

ELVERS (*Ich.*) a sort of small gregs or eels.

ELUL (*Chron.*) אֱלוּל, a Jewish month answering to part of August.

ELUTERIA (*Bot.*) the *Cluytia eluteria* of Linnæus.

ELUTRIATIO (*Chem.*) the pouring a liquor out of one vessel into another, in order to separate the subsiding matter from the clear and fluid part.

ELUVIES (*Med.*) the humour discharged in a *Fluor Albus*; also the effluvia from a swampy place.

ELYCHRYSUM (*Bot.*) the *Steakelina dubia* of Linnæus.

ELYMUS (*Bot.*) a genus of plants, Class 3 *Triandria*, Order 2 *Digynia*.

Generic Character. CAL. *receptacle* common.—COR. two-valved.—STAM. *filaments* three; *anthers* oblong.—PIST. *germ* top-shaped; *styles* two; *stigmas* simple.—PER. none; *seeds* covered.

Species. The species are perennials, as the—*Elymus arenarius*, *Triticum*, seu *Gramen caninum*, Sea Lyme-grass, native of Europe.—*Elymus Virginicus*, seu *Hordeum*,

Virginian Lyme-grass.—*Elymus europæus*, Wood Lyme-grass, or Barley-grass; but—*Elymus Caput medusæ*, seu *Avena*, Portugal Lyme-grass, and *Elymus histrix*, Lyme-grass, native of the Levant, are annuals.

ELYMUS is also the *Hordeum jubatum* of Linnæus.

ELYSIAN fields (*Myth.*) a paradise of delightful groves and meadows, into which the heathens imagined that the souls of good men passed after death.

ELYTHROIDES (*Anat.*) the *tunica vaginalis* of the testes.

ELYTRA (*Ent.*) from the Greek ἔλυτρον, a sheath; a name for the wing-sheaths, or upper crustaceous membranes, which cover the wings of the insects of the beetle tribe.

ELYTROCELE (*Anat.*) from ἔλυτρον, a vagina or sheath, and κύλις, a tumour; a hernia in the vagina.

ELYTRON (*Anat.*) ἔλυτρον, a sheath, from ἐλῶν, to involve, is applied by Hippocrates to the membranes which involve the spinal marrow. *Hippocrat. de Artic.*; *Gall. Comm.* 3; *Gorr. Def. Med.*; *Foes. Econom. Hippocrat.*

EMACIANTES (*Med.*) diseases which occasion a wasting of the body.

EMANCIPATIO (*Ant.*) the setting of children free from the power of their fathers. *Signon. de Judic.* l. 1, c. 2.

EMANSIO (*Med.*) cohibition of the menses.

EMANUENSIS (*Lit.*) one who writes what another dictates.

EMARGINATIO (*Surg.*) taking away the scurf about the brims of wounds and sores. *Plin.* l. 28, c. 9.

EMARGINATUS (*Bot.*) an epithet for a leaf that is notched at the end; also for a corolla, as in the *Agrostemma coronaria*, &c.; and for the stigma, as in the Class *Dilynamia*.

EMBA'MMA (*Med.*) ἐμβάμμα, from ἐμβάπτω, to immerge or dip in; a medicated pickle, or sauce for the food. *Marcell. de Med.* c. 30; *Act. Tetrab.* 3, serm. 1, c. 24.

EMBA'PHION (*Med.*) vide *Acetabulum*.

EMBARCADE'RE (*Com.*) the name for places on the coasts of America that serve for the landing of goods.

EMBA'RGO (*Mar.*) a prohibition upon all shipping not to leave any port, which is commonly issued by public authority on the breaking out of a war, &c.

EMBAR'KATION (*Mar.*) the act of going, or putting things on board a vessel for the purpose of sailing.

EMB'BASIS (*Med.*) ἐμβασις, from ἐμβάσις, to go in; a bathing-tub or vessel filled with warm water.

EMBA'SSADOR (*Polit.*) one appointed to act for and represent the person of a prince, or state, in a foreign country.

EMBA'TER (*Ant.*) the hole or sight of a cross-bow. *Vitruv.* l. 1, c. 2.

EMBATEUTICON jus (*Law*) a law by which people might keep things pawned to them, in their own possession.

EMBA'TTELED (*Her.*) in the form of a battlement. [vide *Crenelle*.]

EMBER-DAYS (*Ecc.*) particular days of humiliation in the Ember-Weeks, namely, Wednesdays, Fridays, and Saturdays, so called from the custom of putting ashes on the head.—*Ember-Weeks*, four seasons in the year more particularly set apart for prayer and fasting, i. e. the first week in Lent, and the next after Whitsunday, the 14th of September, and the 13th of December.

EMBERIZA (*Orn.*) a genus of Birds, Order *Passeres*, having a conical bill, and mandibles receding from each other.

Species. Birds of this genus are principally known in English by the name of the Bunting, except the *Emberiza hortulana*, which is called the Ortolan, feeds principally on panic grass, and grows prodigiously fat, when it is esteemed a great delicacy. The Emberiza is a migratory bird, which appears in England before the setting in of frost and snow.

EMBLE'MA (*Ant.*) ἐμβλημα, from ἐμβάλλω, to insert; picture-work of wood, stone, or metal, finely set in divers

EMB

EME

colours, as in seals, chess-boards, tables, and the like: also ornaments embossed which may be taken off or put on at pleasure. *Cic. in Verr. 4, c. 17; Or. 1. 3, c. 43; Varr. de Re Rust. 1. 3, c. 2; Suet. in Tib. c. 71; Dio, 1. 57; Bud. in Pandect. p. 120; Jun. de Pict. 1. 3, c. 1; Salmas in Solin. 736.*

EMBLEMENTS (*Archæol.*) the profits of lands which have been sowed. *Co. Lit. 55.*

EMBLERS *de Gentz (Law)* carrying off people.

EMBLICA (*Bot.*) the *Phyllanthus emblica* of Linnæus.

EMBOÛTEMENT (*Mil.*) French for the closing up a number of men for the purpose of securing the front ranks from injury.

EMBOÛTURE (*Mech.*) French for an iron box screwed over the nave of a wheel, and which covers the axle-tree.

EMBOLE (*Surg.*) ἐμβολή, from ἐμβάλλω, to put in; the reduction or setting of a dislocated bone.

EMBOLIMÆUS (*Chron.*) ἐμβολιμᾶϊς, i. e. intercalary; an epithet for what is commonly called Leap-year.

EMBOLISMUS (*Chron.*) ἐμβολισμὸς, the adding to or putting in a day in any year, as in Leap-year.

EMBOÛLIUM (*Ant.*) an interlude.

EMBOÛLUM (*Ant.*) ἐμβόλον, the beak, head, or stern of a ship. *Poll. Onom. 1. 1, c. 9; Petron. c. 30; Suidas.*

EMBORISMA (*Med.*) Aneurism. *Cic. pro Sext. c. 4.*

EMBOÛSSING (*Sculpt.*) a sort of sculpture, or carving, where the figure is protuberant and projects from the plane in which it is cut; it is called by the Italians *basso mezzo*, and *basso relievo*, according as it projects more or less.

EMBOÛST (*Sport.*) an epithet for a deer that foams at the mouth when he is hard chased.

EMBOÛTHRIUM (*Bot.*) a genus of plants, Class 4 *Tetrandria*, Order 1 *Monogynia*.
Generic Character. CAL. none.—COR. petals four.—STAM. filaments four; anthers oblong.—PIST. germ linear; style none; stigma roundish.—PER. follicle round; seeds ovate.
Species. The species are shrubs, as the *Embothrium umbellatum*, native of New Caledonia.—*Embothrium coccineum*, native of Terra del Fuego.

EMBOTUM (*Surg.*) a funnel which serves to convey fumes into any orifice of the body.

EMBOÛCHURE (*Mus.*) French for the aperture of a flute, or other wind instrument.

EMBOÛWED (*Her.*) an epithet for any thing bent like a bow, as the dolphin; also a sinister arm, couped at the elbow, is said to be embowed.

EMBRACEÛR (*Law*) or *embrasour*, he who, when a matter is in trial between party and party, comes to the bar with one of the parties, and being bribed thereto, endeavours to corrupt the judge. *Stat. 19 H. 7, c. 15; Co. Lit. 369.*

EMBRACERY (*Law*) the offence of an *embraceour*.

EMBRACING (*Bot.*) or stem-clasping; an epithet for a leaf.

EMBRASÛRE (*Archit.*) an enlargement made in the wall to give more light or convenience to the windows, &c.

EMBRASURE (*Gun.*) French for a piece of iron which grasps the trunnions of a piece of ordnance when it is raised upon the boring machine.

EMBRASÛRES (*Fort.*) the holes in a parapet through which the cannons are laid to fire into the moat, or field.

EMBREGMA (*Med.*) ἐμβρηγμα, from ἐμβρέχω, to irrigate; an embrocation, or external kind of remedy, which consists in irrigating the part affected; it is commonly called a *fomentation*.

EMBRING-DAYS (*Ecc.*) the same as *Ember-Days*.

EMBROCAÛTION (*Med.*) vide *Embregma*.

EMBROÛCHE (*Med.*) vide *Embregma*.

EMBROIDERY (*Mech.*) figured work wrought on silk or cloth with gold or silver thread.

EMBRUÛED (*Her.*) an epithet for a weapon, &c. that is bloody.

EMBRYO (*Anat.*) ἔμβρυον, the child, or fœtus, in the womb, so called because, ἐρύει, it pullulates and grows within the womb. Galen divides the time of gestation into four periods, of which the embryo is the third period, when the fœtus begins to develope itself. According to Marcellus the embryo is what a pregnant woman carries in her womb until the period of her delivery. *Hippocrat. 1. 5, aphor. 31, &c.; Gal. de Caus. Symptom. 1. 1; Gorr. Def. Med.*

EMBRYONATUM Sulphur (*Chem.*) Sulphur united with minerals and metals.

EMBRYORECTES (*Med.*) ἐμβρυόρηκτες, from ἔμβρυον and ῥήσσω, to break; an instrument with which a dead child is drawn out of the mother's womb.

EMBYOTHLASTES (*Surg.*) an instrument wherewith they break the bones of a dead child, that it may be more conveniently taken out of the womb.

EMBRYOTOMY (*Med.*) from ἔμβρυον, a fœtus, and τέμνω, to cut; an excision of the child out of the mother's womb. *Paul. Aeginet. 1. 6, c. 74; Gorr. Def. Med.*

EMBRYÛLCUS (*Med.*) vide *Embryorectes*.

EMBULARCHI SUFFUMIGIUM (*Med.*) a suffumigation described by Aetius. *Tetrab. 4, serm. 4, c. 122.*

EMBUSCATUM marmor (*Min.*) the name of a particular kind of marble dug out of Mount Sinai.

EMEÛDALS (*Archæol.*) an old word used in the Inner Temple for what remains in bank, or in the Stock of the House.

EMENDAÛRE (*Law*) to make amends for any trespass or crime committed. *Leg. Edw. Confess. c. 55.* Hence a capital crime not to be atoned for by a fine was called "incendabile." *Leg. Canut.*

EMENDAÛTION (*Law*) an amending or correcting of abuses, as *Emendatio Panni*, the power of looking to the assize of cloth.—*Emendatio Panis et Cervisæ*, the power of super-vising the weights and measures of bread and beer.

EMERALD (*Min.*) a precious stone of a green colour.

EMERALD (*Her.*) another name for *vert*, or the green tincture in coat armour.

EMERGE (*Nat.*) is said of any body specifically lighter than water, which, after being pressed down, forcibly rises again to view.

EMERGENT (*Astron.*) an epithet for a star at the moment that it goes out of the sun's beams, so as to become visible.

EMERGENT year (*Chron.*) the year, or epoch, from which any computation of time is made, as in Christian countries from the time of our Saviour's birth.

EMERIL (*Min.*) or *emery*, a sort of stone used in burnishing metals, &c.; also a glazier's diamond to cut glass.

EMERITUS (*Ant.*) an epithet for a soldier that has served his time, a veteran. *Veget. 1. 2, c. 3; Isid. Orig. 1. 9, c. 3.*

EMEÛRSION (*Astron.*) an epithet for the sun and moon, which become visible just after they have undergone an eclipse; it is also applied to a star that becomes visible after it has been hidden by the rays of the sun.

EMEÛRSUS (*Bot.*) is the *Coronilla camerus* of Linnæus.

EMERUS (*Med.*) a laxative.

EMERY (*Min.*) Ground iron ore. [vide *Emeril*]

EMEÛSIA (*Med.*) or *Emetos*, ἔμετος, from ἐμέω, to vomit; the act of vomiting, particularly applied by Hippocrates to a discharge of the blood from the stomach by the mouth. *Hippocrat. de Morb. 1. 1; Foes. Oeconom. Hippocrat.*

EMEÛTICS (*Med.*) from ἐμέω, to vomit; medicines which provoke vomiting. The word is used in this sense by Cicero in speaking of Cæsar, who, he said, ἐμετικὴν ἄγεβαι, i. e. took an emetic. *Cic. ad Attic. 1. 3, ep. ult.*

EMETOCATHARTICUM (*Med.*) a medicine which both vomits and purges.

EME'U (*Her.*) a sort of bird, otherwise called the Cassowary, which goes by this name among the Heralds.

EMIGRA'TION (*Polit.*) the leaving one's native country to reside in foreign parts.

EMINENCE (*Polit.*) a title of honour given to cardinals.

EMINENCE (*Fort.*) a height which overlooks and commands a place.

EMINENCE (*Med.*) any protuberance or preternatural tumour.

EMINENTIAL Equation (*Algeb.*) an artificial kind of equation, which contains another eminently.

EMIR (*Polit.*) a Turkish prince, or lord, particularly one that is descended from Mahomet.

EMIRA'LEM (*Mil.*) the general of the 'Turks, or the keeper of all their colours.

EMISSA'RIVM (*Med.*) any orifice in the body, either natural or morbid, by which any thing is emitted.

EMISSARY (*Polit.*) a person sent on a secret mission among the people, or into a foreign country, to sound their minds and tempers.

EMISSARY of a gland (*Anat.*) its duct or canal, by which it emits its contents.

EMMENAGO'GA (*Med.*) ἐμμεναγωγὰ, from ἐμμήναι, the menses, and ἄγω, to bring; medicines which promote the menses in women.

EMMENIA (*Med.*) vide *Emmenagoga*.

EMMET (*Ent.*) another name for the ant.

EMMOTOS (*Med.*) from μωτός, lint; an epithet for parts of the body, or any thing which requires the application of lint. *Hippocrat. de Art.*; *Gal. de Comp. Med. per Gen.* l. 2, c. 2; *Gorr. Defin. Med.*; *Foes. Oeconom. Hippocrat.*

EMODIA (*Med.*) a stupor of the teeth.

EMOLLIENTS (*Med.*) μαλακτικῆρια, softening; medicines which soften the asperities of the humours, and render the solids at the same time supple. *Hippocrat. de Mul.* l. 1; *Aret. de Curat. Acut. Morb.* l. 2, c. 7; *Gal. de Simpl.* l. 1, c. 26; *Act. de Meth. Med.* l. 6, c. 9.

EMOU'SSER (*Mil.*) a French term signifying to cut off; the four corners of a battalion which has formed a square so as to give it an octagon figure.

EMPA'LEMENT (*Bot.*) a former name for the calyx of flowers.

EMPA'NEL (*Law*) vide *Impanel*.

EMPA'RLANCE (*Law*) vide *Imparlance*.

EMPA'SMS (*Med.*) medicines composed of sweet powders to take away sweat, and allay inflammation. *Oribas. Med. Collect.*; l. 10, c. 31; *Gorr. Def. Med.*

EM'PETRUM (*Bot.*) a genus of plants, Class 22 *Diodecia*, Order 2 *Triandria*.

Generic Character. CAL. perianth three-leaved.—COR. petals three.—STAM. filaments three; anthers upright.—PIST. germ superior; style scarce any; stignas nine.—PER. berry orbiculate; seeds nine.

Species. The species are shrubs, as the—*Empetrum album*, seu *Erica*, White-berried Heath, native of Portugal.—*Empetrum nigrum*, seu *Erica*, Black-berried Heath, native of Europe.

EM'PETRUM is also another name for the *Begonia* of Linnæus.

EMPHA'TICAL Colours (*Nat.*) colours so called, which are often seen in clouds before the rising of the sun, and after its setting.

EMPHRA'CTICA (*Med.*) ἐμφρακτικὰ, from φράσσω, to obstruct; medicines which have a tendency to stop up any passage. *Gorr. Def. Med.*

EMPHYSE'MA (*Med.*) ἐμφύσημα, from φυσάω, to inflate; signifies generally any flatulent humour; but is particularly applied to the air confined in the cellular membrane. *Hippocrat. Epid.* l. 3; *Gal. de Meth. Med.* l. 14; *Act. de Meth. Med.* l. 2, c. 12.

EMPHYTEU'SIS (*Law*) a renting of land, in the Civil Law, on condition of planting it.

EMPIRIC Sect (*Med.*) from πείρα, to experience; a sect of physicians who practised medicine from experience, and not from theory. *Cels.* l. 1, c. 1; *Gal. de Sect.*

Empirics are now such as deviate from the rules of science and regular practice to follow nostrums and private opinions; they are better known by the name of *quacks*.

EMPIS (*Ent.*) a genus of Insects of the Dipterous Order, having a *mouth* with an inflected sucker and proboscis; *antennæ* setaceous; and *feelers* short.

Species. These minute insects live by sucking the blood and juices of other animals.

EMPLA'STICS (*Med.*) medicines which constipate and shut up the pores of the body so that sulphureous vapours cannot pass. *Gorr. Def. Med.*

EMPLA'STRUM (*Med.*) a plaster.

EMPLE'CTO opus (*Archit.*) a work knit and couched together, when the stones are so laid as to join one in the other.

EMPLATTO'MENA (*Med.*) vide *Emplastics*.

EMPLE'UTUM (*Bot.*) a genus of plants, Class 21 *Monœcia*, Order 4 *Triandria*.

Generic Character. CAL. perianth one-leaved.—COR. none.—STAM. filaments four; anthers oblong.—PIST. germ superior; style none; stigma cylindric.—PER. capsule oblong; seed solitary.

Species. The single species is a shrub, as the *Emplcurum serrulatum*, seu *Diosma*, Cape Empleurum, native of the Cape of Good Hope.

EMPNEUMATO'SIS (*Med.*) ἐμπνευματώσις, from ἐμπνέω, to inflate; an inflation of the stomach, or the womb. *Gal. Def. Med.*; *Marcell. de Med.* c. 20; *Paul. Æginet.* l. 3, c. 70; *Act. de Meth. Med.* l. 2, c. 21.

EMPO'RIVM (*Anat.*) the common sensory of the brain.

EMPRION (*Med.*) ἐμπρίων, from πρίω, to saw; an epithet for a pulse when the artery is serrated or indented like a saw. *Gal. de Puls.*

EMPROSTHO'TONOS (*Med.*) ἐμπροσθίτονος, from ἐμπροσθεν, forward, and τείνω, to bend; a sort of convulsions of the neck, when the chin is immoveably fixed on the breast; in distinction from the οπισθίτονος, when the head is bent backwards; and the τέτανος, when it is immoveably upright. *Aret. de Caus. et Sign. Acut. Morb.*; *Cels.* l. 4, c. 3; *Oribas. Synop.* l. 9, c. 16.

EMPTY'SIS (*Med.*) ἔμπτωσις, from πτίνω, to spit; a spitting of blood, which is limited by Aretæus to such a discharge only as comes from the mouth, and adjacent parts. *Aret. de Acut. Morb.* l. 2, c. 2.

EMPYE'MA (*Med.*) ἐμπύημα, from πύω, pus; a collection of pus, or matter, in any part of the body, particularly in the cavity of the chest. *Hippocrat.* l. 7, aphor. 38; *Aret. de Caus. et Sign. Morb. Acut.* l. 1, c. 8, 9; *Gal. Comm. in Hippocrat. Progn.* l. 3; *Cæl. Aurlcian. de Morb. Chron.* l. 5, c. 10; *Marc. de Med.* c. 7; *Gorr. Def. Med.*; *Foes. Oeconom. Hippocrat.*

EMPYE'MATA (*Med.*) suppurating medicines. [vide *Empyema*]

EM'PYI (*Med.*) ἔμπυοι, an epithet for such persons as have purulent abscesses internally. [vide *Empyema*]

EMPYRÆUM cælum (*Astron.*) the highest of the celestial spheres.

EMPY'REAL air (*Phy.*) the fiery element above the ethereal.

EMPYREU'MA (*Chcm.*) ἐμπύρευμα of ἐμπυράω, to burn; that taste or smell of the fire which, in distillations, happens to some oils, &c.

EMPYREU'MATA (*Med.*) the remains of a fever after the critical time of a disease.

EM'PYROS (*Med.*) ἔμπυρος, one labouring under a fever. *Hippocrat. de Morb.* l. 2.

EM'RODS (*Med.*) vide *Hæmorroids*.

EMU'LGENT (*Anat.*) an epithet for the vessels of the kid-

- neys, so called from *emulgeo*, to milk, because they were supposed to strain, and, as it were, to milk the serum through the kidneys. The emulgent artery is a branch of the *Aorta*, and the emulgent vein of the *Vena Cava*.
- EMULSION (*Med.*) a medicinal drink made of the kernels of seeds infused in a convenient liquor.
- EMUNCTORY (*Anat.*) an epithet for the passage by which any thing vitiated or useless is passed off; thus, the skin is the *emunctory* of the body, the nose the *emunctory* of the brain, and the glands are also *emunctories* of different parts.
- EMUNDANS (*Med.*) an epithet for an external detersive medicine.
- ENÆMOS (*Med.*) ἔναιμος, from ἄημα, blood, a medicine for stopping blood. *Hippocrat. de Art.*; *Cel.* l. 5, c. 19; *Cal. Aurelian. de Morb. Chron.* l. 2, c. 1; *Gal. Com. in Hippocrat.*; *Foes. Econom. Hippocrat.*
- ENÈORE'MA (*Med.*) ἐναίωρημα, from αἰωρία, to exalt; a name for the pendulous substance in the urine, otherwise called *sublimamentum*, or according to Celsus *suspensæ nebecule*. *Hippocrat. Epid.* l. 1, &c.; *Gal. Comm.*; *Gorr. Defin. Med.*; *Foes. Econom. Hippocrat.*
- ENALLAGE (*Gram.*) a figure in grammar where there is a change of one case or mood for another.
- ENALURON (*Her.*) an epithet for a bordure charged with birds. [vide *Bordure*]
- ENAM'EL (*Anat.*) the cortex, or fine exterior covering of the teeth, which is a vitreous substance.
- ENAMEL (*Paint.*) to paint with various mineral colours. *Enamel* is also a kind of coloured glass used in painting in enamel.
- ENANTE'SIS (*Anat.*) ἐναντισις, from ἀντάω, to meet; a meeting, or near approach of the ascending and descending vessels. *Gal.*
- ENANTIO'SIS (*Rhet.*) ἐναντιωσις, a rhetorical figure where, that which is spoken negatively, is to be understood affirmatively.
- ENARGE'A (*Bot.*) a genus of plants, Class 6 *Hexandria*, Order 1 *Monogynia*.
Generic Character. CAL. none.—COR. petals six.—STAM. filaments six.—PIST. germ roundish; style three.—PER. berry three-celled; seeds four.
Species. The single species is the *Enargia marginata*, native of Terra del Fuego.
- ENARICYMON (*Med.*) vide *Aricymon*.
- ENARTHRO'SIS (*Med.*) from ἀρθρον, a joint; the ball and socket joint; a species of *diarthrosis*, or moveable connexion of bones.
- ENBRE'VE'R (*Archæol.*) to write down in short. *Brit. 56.*
- ENCÆ'NIA (*Ant.*) anniversary feasts to commemorate the building a city, the completing or consecrating of any new and public work, &c. St. Augustin interprets the feast of the dedication of the temple by the same word; and the consecration days, in the Christian church, have also been so called. *Quintil.* l. 7, c. 2; *S. August. in Johann.* xlvi. 1; *Suidas.*; *Paul. Diacon. in Justinian.* l. 16; *Gyrald. Syntag. Deor.* l. 17, p. 502; *Rhodig. Ant. Lect.* l. 22, c. 14; *Stuck. de Ant. Conviv.* l. 1, c. 33.
Encænia is used, in modern times, in application to the commemorative festival, at Oxford, at the close of the session, &c.
- ENCAN'THIS (*Med.*) ἐγκανθίς, from κανθός, the angle of the eye; a disease in the *caruncula lachrymalis*, of which there are two kinds; namely, the *Encanthis benigna*, and the *Encanthis maligna*, seu *inveterata*. *Cels.* l. 7, c. 7; *Gal. Defin. Med.*; *Oribas. Synop.* l. 8, c. 54; *Paul. Æginet.* l. 3, c. 22; *Act. de Meth. Med.* l. 4, c. 11.
- ENCAR'DIA (*Min.*) a precious stone bearing the figure of a heart. *Plin.* l. 37, c. 10.
- ENCARDION (*Med.*) ἐγκάρδιον, the heart, or pith of vegetables.

- ENCA'RPIA (*Archit.*) flowerwork or fruitwork on the corner of pillars. *Vitruv.* l. 4, c. 1; *Philand. in Vitruv.*; *Bald. Lex Vit.*
- ENCATALEPSIS (*Med.*) vide *Catalepsis*.
- ENCATHISMA (*Med.*) ἐγκάθισμα, from ἐγκάθημαι, to sit in; a semicupium, or bath for half the body.
- ENCA'UMA (*Med.*) ἔγκαυμα, from καίω, to burn; a pustule contracted by a burn; or the mark left by a burn. *Act. Tetrab.* 2, serm. 3, c. 25.
- ENCA'USIS (*Med.*) the same as *Encauma*.
- ENCA'USTIC (*Paint.*) the art of enamelling or painting with fire, which was in use among the ancients; but is now unknown. *Plin.* l. 35, c. 2; *Salmas. Exercit. Plinian.* p. 164.
- ENCEINTE (*Fort.*) the whole compass of a fortification, or of the ground fortified.
- ENCEPHALOS (*Anat.*) ἐγκεφαλος, the brain.
- ENCE'RIS (*Med.*) ἐγκρίς, from κρίς, wax; small concretions of wax sometimes found in plaisters as they cool. *Gal. de Com. Med. per Gen.*
- ENCHAN'TER'S NIGHTSHADE (*Bot.*) the *Circea* of Linnæus, a perennial.
- ENCHARA'XIS (*Surg.*) ἐγκάραιξις, from χαρασσω, to scarify.
- ENCHIRI'DIUM (*Ant.*) ἐγκηριδίδιον, from χεῖρ, the hand; a manual, or a portable volume.
- ENCHELIS (*Ent.*) a kind of worms so small as not to be visible to the naked eye. They are very simple, and have a cylindrical body.
- ENCHRI'STA (*Med.*) ἔγκρισται, from χρίω, to anoint; unguents or medicines with which to anoint.
- ENCHU'SA (*Bot.*) vide *Anchusa*.
- ENCHYLO'MA (*Med.*) from χυλός, chyle; an inspissated juice or elixir.
- EN'CHYMA (*Med.*) ἔγχυμα, from ἐγχέω, to infuse; an infusion, or liquid medicine to be infused into the eyes, ears, or injected into the thorax: it also implies a fullness of the vessels in regard to themselves, as πλῆθος κατὰ τὸ ἔγχυμα, a fullness from infusions. *Gal. de Mul.* c. 6; *Gorr. Def. Med.*
- ENCHYMO'MA (*Med.*) or *Enchymosis*, ἐγκύμωμα, ἐγκύμωσις, a sudden effusion of blood into the cutaneous vessels, such as takes place in blushing. *Hippocrat. Epid.* l. 2; *Gorr. Def. Med.*; *Foes. Econom. Hippocrat.*
- ENCHYMO'SIS (*Med.*) vide *Enchymoma*.
- ENCHY'TA (*Med.*) from ἐγχέω, to infuse; a funnel by which any thing is instilled into the eyes, &c.
- ENCHY'TOS (*Med.*) ἔγχυτοι, from ἐγχέω, to infuse; a funnel by which any thing is infused or instilled into any cavity of the body.
- ENCLY'SMA (*Med.*) ἐγκλυσμα, from κλύω, to wash; a clyster.
- ENCLITIC (*Gram.*) certain particles joined to the end of a word, as *que, ne, ve*; so called because they cast back the accent to the syllable preceding.
- ENCOELIA (*Anat.*) ἐγκοιλία, from κοιλία, the belly; the abdominal viscera.
- ENCOLA'PTICA (*Mech.*) ἐγκολαπτική, the art of making brass plates, and cutting in letters.
- ENCO'LPIAS (*Ant.*) ἐγκολπίαις, from κόλπος, a creek; winds arising out of creeks and nooks.
- ENCO'MIUM (*Rhet.*) ἐγκόμιον, from κομῆ, a tribe, or assembly; an oration or song in praise of a person.
- ENCOPE (*Med.*) ἐγκοπή, from κόπτω, to cut; an incision or impediment.
- ENCO'RE (*Mus.*) French for, again, once more; a well-known expression at the theatre, when the audience wish for a performance to be repeated.
- ENCO'RED (*Mus.*) an epithet for the performance or piece which has been called for a second time by the audience.
- ENCRAN'ION (*Anat.*) vide *Cerebellum*.

ENCRAIN (*Vet.*) a horse either wrung or spoiled in the withers.

ENCRATI'TÆ (*Ecc.*) a sect of heretics who forbade marriage and affected continence.

ENCRIS (*Med.*) *ἐγκρίς*, a sort of cake made of fine meal and oil.

ENCRO'ACHMENT (*Law*) an unlawful gaining upon the rights and possessions of another; as if, for example, two men's grounds lying together, the one presses too far upon another; or if a tenant owes two shillings rent-service to the lord, and the lord takes three.

ENCYCLOPÆ'DIA (*Lit.*) *ἐγκυκλοπαίδεια*, from *ἐν*, in, *κύκλος*, a circle, and *παίδεια*, learning, i. e. the whole circle or compass of learning; a term now particularly applied to dictionaries which profess to explain the whole circle of sciences.

ENCY'SIS (*Med.*) from *ἐγκύω*, to bring forth; parturition.

ENCYSTED (*Med.*) an epithet for humours which consist of a fluid or other matter enclosed in a sac or cyst.

END FOR END (*Mar.*) a term for a rope that runs all out of the pulley, or off the block.

ENDBITTEN (*Bot.*) vide *Præmorsus*.

ENDECAGON (*Geom.*) *ενδεκάγωνος*, a plain figure of eleven sides and angles.

ENDEIXIS (*Med.*) *ἐνδειξις*, an indication of diseases showing what is to be done.

ENDEMIAL (*Med.*) or *Endemical*, an epithet for disorders which infect a great many people in the same country, or is common to the inhabitants of the same country. *Gal. Comm. 1, in Hippocrat. Epid. l. 1; Foes. Œconom. Hippocrat.*

ENDESIS (*Med.*) *ἐνδεσις*, from *δέω*, to bind; a ligature, or connexion by means of a ligature. *Hippocrat. de Oss.*

ENDICA (*Med.*) the Fæces.

ENDIVE (*Bot.*) an herbaceous plant, and a species of the succory, the *Chicorium endivia* of Linnæus, a biennial.

ENDORSE (*Her.*) the fourth part of a pale, which is seldom borne but when a pale is between them. [vide *Pale*]

ENDORSED (*Her.*) an epithet signifying back to back, the same as *adversed*.

ENDOWMENT (*Law*) the giving or assuring a dower to a woman.

ENDORMI (*Mil.*) or *un soldat endormi*, a soldier asleep on guard.

ENELLAG'MENOS (*Anat.*) *ἐνελλαγμένος*, from *ἐνελλάττω*, to interchange; an epithet for the vertebræ, because of their alternate and mutual insertion.

ENEMA (*Med.*) a Clyster. *Act. Meth. Med. l. 5, c. 10.*

ENEMY (*Law*) signifies properly an alien or foreigner, who in a public capacity, and with a hostile intention, invades any kingdom.

ENERGETICAL BODIES (*Phy.*) such bodies or particles as are eminently active, and produce manifest operations of different natures, according to the various circumstances or motions of those bodies.

ENERGUMENS (*Ant.*) persons supposed to be possessed with an evil spirit.

ENERGY (*Med.*) an active motion of the animal spirits.

ENERGY (*Rhet.*) a figure of speech which consists in great expression.

ENERVATIO (*Med.*) a weakness in the nerves and tendons.

ENERVIUM (*Bot.*) nerveless; an epithet for a leaf.

ENFANS perdue (*Mil.*) i. e. lost children; a term applied in French to those soldiers who, at the head of a detachment, begin an attack, or an assault, &c.

ENFEOFFMENT (*Law*) vide *Infeoffment*.

ENFILADE (*Mil.*) the situation of a post that may be scoured all the length of a straight line.

ENFILADE (*Archit.*) a series or continuation of several things disposed, as it were, in the same thread or line.

ENFILED (*Her.*) an epithet in blazoning, implying that the head of a man, beast, or any other charge, is placed on the blade of a sword.

to **ENFRANCHISE** (*Law*) to make a person a denizen, or free citizen.

ENGASTRIMYTHI (*Ant.*) *ἐγγαστρίμυθοι*, a name given to the Pythias, or priestesses of Apollo, because they were accustomed to deliver their oracles from within, without moving their lips, or even their tongues. *Plut. de defect. Orat.; Schol. in Aristoph. Vesp.* To this mode of prophesying the prophet Isaiah alludes in chapter the eighth, verse the nineteenth, &c.

ENGINE (*Mech.*) from the French *engin*, and the Latin *ingenium*, signifying wit, or contrivance; any mechanical instrument in which various parts and movements concur to produce some considerable effect.

ENGINEER (*Mil.*) in French *engineur*, signifying literally an ingenious person, is now applied to the person who is well skilled in that branch of the military art which consists in the attack and defence of forts.

ENGISCOPE (*Mech.*) from *ἐγγύς*, near, and *σκοπέω*, to view; an instrument for viewing small bodies more distinctly; the same as the microscope.

ENGISOMA (*Med.*) *ἐγγίσωμα*, or *ἐγγίσωμα*, a fissure of the cranium; so called from *ἐγγύς*, near, because the bone lies near the membrane which is under it. *Gal. Def. Med; Gorr. Def. Med.*

ENGISOMA (*Surg.*) a surgical instrument used in fractures of the cranium.

ENGLE'CERY (*Law*) or *Englechire*, the being an Englishman, which it was necessary to prove a man to be in the reign of Canute, in case he was murdered, that the hundred might be exempt from an amercement that was otherwise laid upon it. This law was made to protect the Danes, who were frequently waylaid by the English, and killed.

ENGLISH Mercury (*Bot.*) the *Chenopodium bonus Henricus* of Linnæus, an annual.

ENGOMPHOSIS (*Anat.*) vide *Gomphosis*.

ENGONA'SI (*Astron.*) *ἐγγόνουσι*, i. e. *in genibus*, an epithet for the constellation Hercules, because he is represented resting on his right knee.

ENGO'NIOS (*Anat.*) *ἐγγόνιος*, from *γωνία*, an angle; an epithet applied to the flexure of the cubit.

ENGOÛLE'E (*Her.*) an epithet for crosses, saltires, &c. when their extremities enter the mouths of lions, leopards, &c.

ENGRAILED (*Her.*) vide *Ingrailed*.

ENGRAVING, the art of cutting figures, or the representations of objects on metals, stones, or wood. Engraving is performed in different manners, namely—in strokes with an instrument called the *graver*; and the design having been first traced with a sharp tool called the *dry-point*; in strokes cut with the dry-point, and afterwards eaten in with aqua fortis, which is called *etching*; in *mezzotinto*, which is performed by a dark *barb* or *ground*, being raised uniformly upon the plate with a toothed tool, &c.; in *aqua tinta*, a newly invented method of etching.

to **ENGRÓ'SS** (*Law*) to write the rude draught of a thing fair over in a large hand.

ENGROSSING-BLOCK (*Mech.*) a tool made use of by the wire-drawers.

ENGUAMBA URUVAPENSIVM (*Bot.*) a tree of moderate size, from the fruit of which an oil is expressed that is good for wounds. *Raii Hist. Plant.*

ENHÆMON (*Med.*) *ἐναιμον*, the name of a plaster in Myrepsus.

ENHANCED (*Her.*) an epithet for an ordinary that is placed above its usual situation, which principally happens to the bend and its diminutives. [vide *Bendlet*]

ENHARMONIC (*Mus.*) a term implying a particular manner

of tuning the voice, and disposing the intervals in such manner as to render the music more moving.

ENHYDRIS (*Zool.*) ἔνυδρις, an adder, or water snake. *Plin.* l. 30, c. 3.

ENHYDROS (*Min.*) a round stone containing a liquid in the inside. *Plin.* l. 37, c. 11.

ENHYDRUS is now the name of a genus of incrustated ferruginous bodies, which contain a certain quantity of fluid.

ENIXA (*Surg.*) the same as *Puerpera*.

ENIXUM sal (*Chem.*) a salt which partakes of the nature of an acid and an alkali, as common salt, nitre, &c.

TO **ENLARGE** (*Man.*) to make a horse go large, that is, to make him embrace a larger space of ground.

ENLARGEMENT (*Mil.*) the act of going, or of being allowed to go, beyond the prescribed bounds, as in the case of an officer under arrest.

ENMANCHE (*Her.*) vide *Manche*.

ENNEADECATERIS (*Chron.*) a period of nineteen years, which is known by the name of the *Metonic Cycle*, or the *Lunar Cycle*.

ENNEAGON (*Geom.*) from ἐννέα, nine, and γωνία, a corner; a regular geometrical figure of nine sides and angles.

ENNEANDRIA (*Bot.*) from ἐννέα, nine, and ἀνδρῶν, a man, or husband, nine-stamened; the name of the ninth Class in Linnæus' Artificial Arrangement, comprehending those plants which bear hermaphrodite flowers with nine stamens. It is divided into orders, according to the number of the pistils, namely, *Monogynia*, *Trigynia*, and *Hexagynia*: the principal genera are as follow, *Monogynia*, *Laurus*, *Bay*, *Anacardium*, *Cashew Nut*, &c.—*Trigynia*, *Rheum*, *Rhubarb*, &c.—*Hexagynia*, *Butomus*, *Flowering Rush*, &c.

ENNEAPETALUS (*Bot.*) i. e. nine-petalled; an epithet for a corolla having nine petals, as in *Thea viridis*, *Magnolia*, and *Liriodendron*.

ENNEAPHARMACOS (*Med.*) ἐννεαφάρμακος, from ἐννέα, nine, and φάρμακον, a medicine; a medicinal composition of nine ingredients. *Cels.* l. 5, c. 19; *Gal. de Comp. Med. secund.* Loc. l. 9, c. 6; *Act. Paul. Ægin.* l. 7, c. 24.

ENNEAPHYLLUM (*Bot.*) the *Helleboraster*.

ENNEATICAL (*Med.*) an epithet for what appertains to the period of nine days, as every ninth day of sickness, which is called an enneatical day.

ENNEEMIMERIS (*Gram.*) from ἐννέα, nine, ἕμι, half, and μέρος, a part; the cæsura after the fourth foot, i. e. on the ninth half foot, as in this example.

Illē tā | tēs nīē | ūm mōl | tī fūltūs hūā | cīntho.

ENNOCHS pillars (*Ant.*) two pillars said to have been erected by Enoch, the son of Seth, the one of brick and the other of stone, upon which the whole science of astronomy is said to have been engraven.

ENODIS (*Bot.*) knotless, i. e. without knots; an epithet for a culm.

ENQUIRY, *Writ of* (*Law*) vide *Inquiry*.

ENS (*Med.*) the essence or most efficacious part of any substance.

ENS (*Met.*) signifies literally being; but is taken for that which is conceived in its most abstract form. The schoolmen have divided it into the *ens reale*, or *positivum*, i. e. the real being; and the *ens rationis*, which is an imaginary being.

ENSATÆ (*Bot.*) the fifth Order in Linnæus' Fragments, and the sixth in the Natural Orders, containing some of the liliaceous plants.

ENSELED (*Falcon.*) an epithet applied to a hawk which has a thread drawn through his upper eye-lids, and fastened under the beak to take away his sight.

ENSIENT (*Law*) the being with child, which, in case of a woman condemned for any crime, is no ground to stay judgment; but may afterwards be alleged against execution.

ENSIFORMIS (*Bot.*) ensiform or sword-shaped; an epithet for some leaves, which are two edged, and have the shape of a sword, as the *Gladiole*, *Iris*, &c.

ENSIFORMIS (*Anat.*) an epithet for the lowest part of the sternum.

EN'SIGN (*Mil.*) the banner under which the soldiers are ranged, according to the different regiments they belong.—*Ensign*, or *Ensign Bearer*, is the officer who carries the colours; the lowest commissioned officer in a company of foot, being subordinate to the captain and lieutenant.

EN'SIGNED (*Her.*) an epithet equivalent to ornamented, as in the annexed figure, which represents a man's heart ensigned with a crown, "*Argent*, a man's heart, *gules*, ensigned with an imperial crown, *or*, on a chief, *azure*, three mullets of the field." The bearer of these singular arms was a man of the name of Douglass, and the occasion of his bearing them was his being sent on a pilgrimage to the Holy Land, with the heart of Robert of Bruce.

ENSTA'CTON (*Med.*) ἐνστακτον, from ἐσάζω, to distil a liquid collyrium, called *staeticon* by Paulus Ægineta. *Gal. de Comp. Med. sec. Loc.* l. 4, c. 7; *Paul. Æginet.* l. 7, c. 16.

ENSTASIS (*Med.*) ἐνστασις, from ἐνίστημι, to stand in or adhere to, i. e. a lodgment or inhesion. *Cass. Problem.* 79; *Gorr. Med. Def.*

ENTABLATURE (*Archit.*) that part of a column which is over the capital, comprehending the architrave, frieze, and cornice. Sometimes the entablature is taken for the last row of stones on the top of a building, on which the timber and covering rest. [vide *Architecture*]

ENTA'BLER (*Man.*) the fault of a horse whose croupe goes before his shoulders in working upon volts.

ENTA'DA (*Bot.*) the *Mimosa entada* of Linnæus.

ENTAIL (*Law*) a fee-tail, or fee-entailed, i. e. the estate settled, scanted, or shortened, by which the heir is limited or tied up to certain conditions with regard to the descent.

ENTALI (*Min.*) Fossile Alum.

ENTALIA (*Nat.*) called by the Italians *Entaglia*, are shells or coverings for sea-worms.

ENTASIS (*Med.*) ἐντασις, from τείνω, to stretch; a distension of any part. *Hippocrat. de Rat. Viet. in Morb. Acut.*; *Foes. Œconom. Hippocrat.*

ENTA'TICA (*Med.*) ἐντατικά, medicines which provoke venery. *Cal. Aurelian. de Acut. Morb.* l. 3, c. 18; *Paul. Æginet.* l. 7, c. 17; *Gorr. Def. Med.*

ENTE (*Her.*) an epithet signifying grafted or ingrafted, which is used in the fourth grand quarter of his majesty's arms, as Brunswick and Lunenburgh impaled, with Saxony, *ente en pointe*, i. e. grafted in point.

ENTELECHIA (*Phy.*) ἐντελεχία, a term applied by Aristotle to the soul, the perfections as it were of nature, which he supposed to be distinct from matter. *Aristot. de Anim.* e. 3; *Cic. Tusc.* l. 1, c. 10.

TO **ENTER** (*Carpent.*) to insert the end of a tenon in the mouth or beginning of a mortise.

TO **ENTER** (*Falcon.*) is said of a hawk when she first begins to kill.

ENTERA (*Anat.*) vide *Enteron*.

ENTERADANES (*Anat.*) ἐντερῶδες, from ἐντερον, an intestine, and ἄδην, a gland; the Intestinal Glands.

ENTERENCHYTÆ (*Surg.*) ἐντερηνχύται, from ἐντερα, the viscera, and ἐγχύω, to infuse; surgical instruments for administering elysters.

ENTERITIS (*Med.*) from ἐντερα, viscera; an inflammation of the viscera; a genus of diseases, Class *Pyrexice*, Order *Phlegmasice*, in Cullen's Nosology.

ENTEROCELE (*Med.*) ἐντεροκήλη, from ἐντερον, an intestine, and κήλη, a hernia; a protrusion of any portion of the intestines, either into the navel or the groin, which is

known commonly by the name of a rupture. *Gal. Def. Med.*; *Oribas. de Morb. Curat.* l. 3, c. 52; *Paul. Aeginet.* l. 3, c. 54; *Act. de Meth. Med.* l. 1, c. 22; *Gorr. Def. Med.*

ENTERO-EPIPLOCELE (*Med.*) from *ἔντερον*, an intestine, *ἐπίπλοον*, the epiploon, and *κίλη*, a tumor; a rupture in which a part of the intestine, with a part of the epiploon, likewise is protruded. *Gal. Def. Med.*; *Gorr. Def. Med.*

ENTERO-HYDROCELE (*Med.*) from *ἔντερον*, an intestine, *ὑδωρ*, water, and *κίλη*, a tumor; a watery rupture.

ENTERO'MPHALOS (*Med.*) from *ἔντερον*, an intestine, and *ὀμφαλός*, the naval; an umbilical hernia or rupture, formed by the protrusion of the intestines at the navel.

ENTERON (*Med.*) *ἔντερον*, from *ἐντός*, within; a term applied by Hippocrates to the colon only. *Hippocrat.* l. 4, aphor. 3, &c.; *Foes. Econom. Hippocrat.* *Entera*, *ἔντερα*, in the plural, is also taken for sacks or bags into which fomentations were put. *Hippocrat. de Morb.* l. 3.

ENTEROPHYTON *vulgare* (*Bot.*) the sea chitterling; a plant which grows in the form of *ἔντερον*, an intestine. *Raii Hist. Plant.*

ENTERO'RAPHE (*Anat.*) from *ἔντερον*, an intestine, and *ραφή*, a suture; a suture of the intestines, or the sewing together the divided edges of an intestine.

ENTEROSCHEOCE'LE (*Anat.*) *ἐντεροσχιστικὴ κίλη*, from *ἔντερον*, an intestine, *σχισιον*, the scrotum, and *κίλη*, a tumor; the *Hernia scrotalis*, or rupture of the intestines when they descend into the scrotum.

to **ENTERPE'N** (*Falcon.*) a term applied to a hawk which has his feathers snarled or entangled.

to **ENTERPLEA'D** (*Law*) to discuss a point incidentally falling out before the principal cause can have an end.

ENTERTAINMENT (*Mus.*) a little afterpiece, either musical or dramatic.

ENTERTIEW (*Falcon.*) the second year of a hawk's age.

ENTHÆMON (*Med.*) a medicine made of the tears that drop from olive-trees in Arabia.

ENTHEMATA (*Husband.*) grafts fixed into the cliffs of trees.

ENTHEMATA (*Med.*) medicines applied to green wounds to stop the blood and course of the humours.

ENTHETOS (*Med.*) *ἐνθετός*, from *ἐντιθέμι*, to put in; an epithet for medicines applied to the nose to stop an hæmorrhage.

ENTHLA'SIS (*Med.*) *ἔνθλασις*, from *ἐν* and *θλάω*, to break; a bruise or illision which leaves marks in the place where it has been made. *Hippocrat. de Intern. Affect.*; *Gal. Exeges. Hippocrat. Vocab.*

ENTHUSIASMUS (*Med.*) *ἐνθουσιασμός*, from *θεός*, god; a fanatic perculsion or divine inspiration, as when a person, performing holy rites, loses his reason, and falling into an ecstasy, sees strange sights, and hears strange sounds. *Gal. Def. Med.*

ENTHYMEM (*Log.*) *ἐνθύμημα*, an imperfect syllogism, where either the Major or the Minor is wanting, as being easily to be supplied by the understanding; as "Virtue is a good thing, because no one can abuse it." As a complete syllogism it would be, "That is a good thing, which no one can abuse;" "No one can abuse virtue;" therefore, "Virtue is a good thing." This sort of syllogism was called the *Rhetorical Syllogism*, because it was much in use among rhetoricians. *Arist. Rhet.* l. 1, c. 1; *Cic. Top.* c. 13; *Dionys. in Jud. Lys.* c. 15; *Hermog. de Inven.* l. 3; *Plin.* l. 2, cp. 3; *Demet. de Eloc.* c. 30; *Aul. Gell.* l. 6, c. 13; *Quint.* l. 14, c. 14; *Schol. Hermog. apud Ald. Rhet. tom. ii*; *Cur. Fortunat.* l. 2; *Apsin. Rhetor. apud Ald. Rhet.* p. 703.

ENTIERTE (*Law*) Entireness, as distinguished from moiety.

ENTIRE Tenancy (*Law*) sole possession in one man, as distinguished from several tenancy.

ENTIRE pertransient (*Her.*) a line which crosses the middle

of the shield.—*Entire pertingent*, is the longest line in the partition of the shield, which does not pass through the centre.

ENTIRE (*Mil.*) or *Rank entire*, a line of men side by side.

ENTO'GANUM (*Bot.*) another name for the *Melicope* of Linnæus.

ENTOMOLITHUS (*Min.*) the body or other part of an insect changed into a fossil substance, of which many examples have been found.

ENTOMOLOGY, from *ἔντομος*, an insect, and *λόγος*, the doctrine; is that part of general zoology which treats of insects. An insect, as defined by Linnæus, is a small animal breathing through lateral spiracles, furnished with moveable antennæ and many feet, and covered either with a crustaceous or a hairy skin. He has, however, separated the worms from the class of insects; but throughout this work, except in the present article, they are brought under the head of Entomology, agreeably to the ordinary meaning of the term. Insects may be considered in respect to their anatomy, their metamorphoses, and their classification.

Anatomy of Insects.

The organization of Insects comprehends their external and internal parts.

External Parts.

The body of an insect consists of four principal parts, namely, *caput*, the Head; *truncus*, the Trunk; *abdomen*, the Abdomen; and *artus*, the Limbs or Extremities.

The Head. The Head, which is a distinguished part in most insects, is furnished with *oculi*, Eyes; *antennæ*, Horns; and *os*, a Mouth.

The Eyes. The Eyes are commonly situated on each side the head, and for the most part two in number, destitute of eyelids, and immoveable. In some insects, as spiders, they are eight in number; and, in respect to their structure, they are frequently compound, i. e. consisting of small hexagonal protuberances, placed with the utmost regularity and exactness in lines crossing each other, after the manner of lattice-work. In the two eyes of the *Libellula*, or Dragon-Fly, there have been reckoned not less than 25,000 such protuberances, which are supposed to be so many lenses, or object-glasses.

The eyes are, moreover, distinguished into *oculi approximati*, when placed close together; *colorati*, when of a different colour from that of the head; *concolores*, of the same colour with the head; *contigui*, touching one another; *fasciati*, marked with stripes of a different colour; *fenestrati*, having the pupil glassy and transparent; *hemisphericici*, convex, like the section of a globe; *inferi*, placed on the under side of the head; *interrupti*, broken, but continued either above or below; *lunati*, resembling a crescent or new moon; *obliterati*, having the pupil scarcely distinguishable; *pedunculati*, or *stipitati*, elevated on a stalk or peduncle; *ovales*, eggshaped; *simplices*, furnished with only one lens; *verticales*, placed on the crown of the head.

Ocelli or *Stemmata*. Besides the larger eyes many insects have three small spherical bodies placed triangularly on the crown of the head, called *ocelli*, or *stemmata*. They are simple, and made for viewing large and distant objects.

Antennæ. The Antennæ are two articulated moveable processes placed on the head, which are subject to great variety and form, the principal distinction between the genera in the Linnean system: they are called *setacæ*, setaceous, or bristle-shaped, when they gradually taper towards their extremity; *filiformes*, or threadshaped, when they are of equal diameter throughout, not visibly smaller at the tip than at any other part; *moniliformes*, moniliform, when the joints are shaped like the beads of a necklace, each joint being globular, or nearly so; *cla-*

vatae, clavate, or clubshaped, which thicken at the tip into a knob or small club, as in the major part of the butterflies; *fissiles*, fissile, those which are split or divided at the tip into several lamellæ or flat divisions, as in the *Scarabæi*, or Beetle tribe; *pectinatae*, pectinated, those which are divided into numerous processes resembling the teeth of a comb; *barbatae*, bearded, those which are slightly feathered either on one or both sides with fine lateral fibres or hairs; *perfoliatae*, perfoliate, those which have the joints of a flattened and circular shape, with the stem or body of the antennæ passing through them, after the manner of a perfoliate leaf, as exemplified in some of the beetle tribe: to these may be added *breves*, those shorter than the body; *approximatee*, approximate; *coadunatae*, connected at the base; *plumosae*; *rigidae*; *ramosae*, &c.

The Mouth. The Mouth is commonly situated in the under part of the head, and varies much in different tribes of insects. The parts observable in the mouth of insects are as follow; namely—*Labia*, the Lips, upper and lower. The Upper Lip is a transverse, moveable, soft piece, of a coriaceous or membranaceous nature, known from its situation at the anterior part of the mouth, and very distinctly visible in many of the Coleopterous tribe, as the *Gryllus*, *Apis*, &c. The Lower Lip is situated immediately under the maxillæ; this is frequently lengthened so as to form the process which is called the *ligula*, consisting of a single piece, of a soft texture, and often bifid.—*Mandibulae*, the Mandibles, are two horny substances placed one at each side of the mouth, below the upper lip. They have a lateral motion, by which they are distinguished from the lips which move up and down as in other animals. In rapacious insects the mandibles are stronger than in those that perforate woods; and these latter have stronger mandibles than the herbivorous insects.—*Maxillæ*, the Jaws, two membranaceous substances, differing in figure from the mandibles, under which they are situated, and above the lower lip. They have a lateral motion, and are distinguished, as to their form, into *dentatae*, i. e. set with sharp-pointed processes; *forcipatae*, pincer-shaped; *furcatae*, forked; *lunulatae*, thick in the middle and smaller towards the base and the apex; *prominentes*, placed straight before the head.—*Lingua*, the Tongue, an involuted tubular organ, which constitutes the whole mouth in lepidopterous insects: this is of a setaceous form, and frequently very long, as *fig. 8*, Plate No. II. (35). Through this tube the insect draws the nectarious juices of the flowers on which it subsists. When it takes its food the tongue is exerted; but at other times it is rolled up spirally between the palpi.—*Rostrum*, the Beak or Snout, a moveable articulated member, which forms the mouth in many of the Hemipterous Order, as the *Cicada*, *Cimex*, *Aphis*, *fig. 4, 5, 6*, where the inflected snout is visible. This beak is hollow, and contains, as in a sheath, several very fine bristles, with which these insects perforate the substances from which they extract their nutriment.—*Proboscis*, the Trunk, serves the purpose of a mouth in most of the Dipterous Order. It is fleshy, retractile, and often cylindrical, terminating with two lips, which are supposed to possess the sense of taste in a high degree. The House-Fly and the Bee afford familiar examples of the proboscis.—*Palpi*, Feelers, small moveable filiform organs, placed mostly at each side the jaw, which resemble the antennæ, but are smaller, and more distinctly articulated, as *f*, Plate No. I. (34), *fig. 2, 3*. They vary in number from two to six in different insects. The palpi are distinguished into *clavati*, clubshaped; *elongati*, longer than the mouth; *exserti*, projecting out; *filiformes*, of the same thickness throughout; *incurvi*, turning straight

upwards at the ends; *recti*, straight; *recurvi*, turned back; *setacei*, setaceous; &c.—*Clypeus*, the Shield of the head in coleopterous insects, which corresponds with the front of the head in other insects.—*Vertex*, the Summit or Crown of the head.—*Gula*, the Throat, that part which is opposed to the front of the head.

The Trunk. The Trunk, the second principal division of which an insect consists, comprehends that portion which is situated between the head and the abdomen. The trunk includes *thorax*, the Chest; *pectus*, the Breast; *sternum*, the Breast-bone; and *scutellum* the Scutel or Escutcheon.—*Thorax* is the upper part of the body to which the first pair of legs is attached, as *p*, *fig. 2, 3*. It varies much in form and structure, and is therefore denominated *convexus*, convex; *cordatus*, cordate; *gibbus*, gibbous; *inequalis*, having the surface not flat; *lineatus*, marked longitudinally; *oblongus*, oblong; *punctatus*, marked with points; *villosus*, hairy, &c.—*Pectus*, the Breast, is the under part of the Thorax, to which the four posterior feet are attached, and from which the wings in lepidopterous insects have their origin. This part is capable of being compressed and dilated, as is observable in insects of the butterfly and moth tribe.—*Sternum*, or Breast-bone, a ridge running under the breast, which is conspicuous in some insects.—*Scutellum*, the Escutcheon, is a lobelike process situated at the posterior part of the thorax, as *s*, *fig. 1*, Pl. No. I. (34). Its form is generally triangular, although in the coleopterous tribes it approaches to the heartshape.

Abdomen. The Abdomen, the third principal division, is the posterior part of an insect's body, which is composed of annular joints, or segments, as *o*, *fig. 2, 3*. These rings vary in number in different insects, and the form of the abdomen is also distinguished into *aequale*, when it is of the same breadth with the thorax; *barbatum*, having tufts of hair at the sides or extremity; *fulcatum*, shaped like a sickle; *petiolatum*, attached to the thorax by means of a slender elongated tube; *planum*, flat in the under part; *sessile*, attached to the thorax in its whole breadth, &c. The upper part of the abdomen is called *tergum*, the Back; the inferior, *venter*, the Belly; and the opening at the posterior part, the *vent*; and in most insects the extremity is occupied with the organs of generation. The motion of the abdomen is most visible in those insects of the hymenopterous tribe in particular which have that portion of the body pediculated. This motion is effected by means of muscles inserted in the rings. To the abdomen belong *cauda*, the Tail, and *aculeus*, the sting. The tail is any appendage which terminates the extremity of the abdomen, which is *aristata*, when it terminates in a slender thread; foliaceous, spreading out like a leaf, as in the *Blatta*; *forcipata*, shaped like a forceps; *setacea*, bristle-shaped, as in the *Podura*; *biseta*, having two slender attenuated setæ, &c. The sting, a well-known instrument of offence in some insects, is denominated *simplex*, having one dart; *compositus*, having two or more darts; *exsertus*, projecting, not lying within the body; *retractilis*, capable of being drawn in, as in the bees and wasps; *reconditus*, always hid in the body, or seldom thrust out; *vaginatus*, enclosed in a bivalve sheath. In some tribes of insects it exists in the male, in others the females only are provided with it; but it is seldom met with in both sexes of the same kind.

The Members. The Members, or Extremities, are, *pedes*, the legs; *alæ*, the wings.

Legs. The legs of insects are six in number, but never more; but the larvæ of insects have many others, which are denominated *spurious* feet. The *pedes* are distinguished, according to their form and use, into—*cursorii*, formed for running; *mutici*, without claws or spines; *natorii*,

compressed and formed for swimming; *saltatorii*, with thick thighs fitted for leaping; *serrati*, toothed like a saw; *spinosi*, set with large spines. The leapers are principally found among the Curculio tribe; the genera *Hydrophilus* and *Dytiscus* are examples of the swimmers. The parts of the legs are *femur*, the Thigh; *tibia*, the Shank; and *tarsus*, the Foot, as fig. 4, pl. No. I. (34.) *Femur* is the first or upper joint, which is *arcuatum*, bent like a circular arch; *dentatum*, having a margin with indentations; *hispidum*, set with short rigid bristles; *incrassatum*, growing thicker in the middle; *spinosum*, set with spines; *muticum*, without spines; *saltatorium*, thick and formed for leaping, as in the Locust tribe. That part which connects the thigh to the body is called its *basis*.—*Tibia*, or Shank, the second joint, is that part of the leg which varies its form most, according to the use which is made of the *pedes*, as *t*, fig. 4.—*Tarsus*, the Foot, or last joint, consists of several articulations, which vary in number according to the insect's mode of life. To the apex of the tarsus are attached *ungues*, the claws.

The Wings. The Wings, the well-known organs of flight, are either two or four in number, and consist of—*basis*, a base, or that part by which it is attached to the *thorax*; *apex*, the part opposite to the base; *costa*, the margin between the base and the apex; *discus*, the space between the base, the apex, the margin, and the suture; *pterigostia*, wing-bones, the streaked parts of the wings which are placed between two thin membranes, and constitute the true wings of insects. Wings are placed on each side of the insect so as that each pair should correspond in situation and form, &c.; but where there is more than one pair, the first are mostly larger than those behind. The wings are distinguished according to their form, figure, texture, construction, &c. into *acuminatae*, terminating in a subulated apex; *caudatae*, when the hinder wings are extended into processes; *crenatae*, having the margin notched; *angulatae*, having the margin angular; *denticulatae*, set with teeth; *digitatae*, divided to the base nearly like fingers; *integrae*, without indentations; *incurvatae*, the anterior margin bent like an arch; *nervosae*, full of nerves or vessels; *reticulatae*, the nerves disposed like network, as in the *Libellula*; *maculatae*, or *pictae*, spotted or marked with coloured spots, bands, &c.; *variegatae*, of different colours; *radiatae*, the nerves diverging like rays; *ocellatae*, marked with one or more ocelli, or eyelike spots, of which the central is termed the *pupil*, the exterior one the *iris*; *planae*, which cannot be folded up; *plicatiles*, that admit of being folded up at pleasure; *patentes*, extended horizontally; *erectae*, such as stand erect when the insect is at rest; *incumbentes*, which rest on the upper part of the abdomen; *deflexae*, such as are partly incumbent, or simply bent down, &c. To the wings belong also *elytra*, the Wing-Cases, and *halteres*, the Poisers or Balancers.—*Elytra* are two coriaceous wings, which are expanded in flight; but when at rest serve to cover the abdomen, and to enclose the membranaceous wings. The parts of the elytra are the *base*, the *apex*, the *margo* or outer rim next the belly, and the *sutura*, the part where the elytra meet and form a line in the middle of the back from the base to the apex. They belong to the coleopterous tribe of insects, and are distinguished according to their variety in colour, marks, form, &c. into—*lineata*, marked with depressed lines; *punctata*, marked with very small dots; *pubescentia*, covered with hair; *rugosa*, wrinkled; *hispidae*, set with short bristles; *scabra*, rough, with hard raised points; *spinosa*, the margins set with spines; *dentata*, set with toothlike processes; *præmorsa*, the apex terminating

obtusely; *sinuata*, hollowed as if scooped out; *subulata* linear at the base, and pointed at the apex; *integra*, completely covering the back; *dimidiata*, covering but half the back; *inaequalia*, the surface not flat; *immarginata*, without a margin, or distinct rim; *muricata*, rough with rigid spines; *striata*, slightly channelled; *convexa*, convex, &c.—*Halteres*, Poisers, two globular bodies in insects of the Order *Diptera*, which are placed on slender stalks behind the wings, and seated on the thorax: they are so called because they are supposed to keep the insect steady in its flight.

Internal Organization of Insects.

The internal parts of insects are much less perfect and distinct than those of larger animals, and of that which is visible is very little known.

Brain, &c. The brain of insects is altogether different from the substance which commonly goes by that name, being little more than ganglions of nerves, which are two in number, as observed in the crab, lobster, &c. Each of these is supposed to serve the office of the brain. Their muscles consist of fibres formed of *fasciculi*, and seldom produce more than *two* sorts of motion, namely, that of an *extensor* and a *flector*. There are no salivary glands to be met with in the mouths of insects, but they have a set of floating vessels which secrete a fluid varying in colour in different insects, which is very similar to saliva. The *oesophagus*, or organ of deglutition, is a straight short tube, which consists of annular muscular fibres, of which the trunk of the butterfly, the proboscis of the common fly, and the snout of hemipterous insects, forms a principal part.

Stomach, &c. The organs of digestion consist of the stomach and intestinal canal, which, however, vary materially in different insects. For the most part they have a single stomach, but it is sometimes double, and sometimes manifold. The stomach also varies according to the nature of the food which the insect takes; in some, which subsist on vegetable juices, it is membranaceous, as the Bees, which suck the nectar of flowers, &c.: some, which feed on animal substances, as the Bug, Boatfly, &c. have a muscular stomach; in others this stomach is nothing but a continuation of the *oesophagus*, such as the Cockchaffer, and all Beetles, &c. which feed on leaves and the roots of vegetables. The *double stomach* is found in the coleopterous tribe, which feed on other insects, as the *Cicindela*, *Carabus*, &c.; the first of the two stomachs is muscular, after the manner of a gizzard; the second is a long membranaceous canal. The insects, such as the Cricket and Grasshopper, which have many stomachs, seem to employ them much after the manner of the ruminating animals; some for the reception and digestion of the food, and others for its farther mastication.

Organs of respiration. Although insects have not lungs like other animals, yet it has been ascertained that they have vessels called *spiracula*, which run along each side of the body, and serve for the reception of air; and other vessels proceeding from these pores by the sides, which are called *tracheae* and *bronchiae*, because they serve for the expiration of the air.

Circulation and Secretion in Insects. Of the process of circulation in insects little more is at present known, than that a contraction and dilatation of the vessels is observable in some kinds, particularly caterpillars; but the fluid which is supposed to supply the place of blood is not of the same colour; for which reason insects were reckoned, by the ancients, to be *animalia exsanguia*, bloodless animals. It is, however, now generally admitted, that not only circulation, but also secretion, is

common to insects with other animals. The latter process is supposed to be performed by means of a number of long slender vessels which float in the internal cavities of the body, and serve to secrete the different fluids which are peculiar to different insects. Thus the Bee, the Wasp, SpheX, &c. have two vessels situated at the bottom of the sting, through which they discharge an acrid fluid. The silk of the common Silkworm is said by some to be a fluid. The Carabus and Dytiscus contain an acid which reddens the infusion of litmus. From the ant is extracted an acid well known to chemists, and the like is observable in other insects.

Distinction of sex in insects. Insects are divided, in respect to sex, into the males, or those which have the male organs of generation visible; females, or those furnished with female organs; and the neuters, or those which have no such organs of either kind visible, and are therefore supposed to be of neither sex: although others have imagined that they are females with the organs undeveloped. The neuters are found mostly among insects of the Hymenopterous Order, as bees and ants, where they act the part of labourers for the whole community. The organs of generation are mostly situated near the extremity of the abdomen; except in the Spider, which has them in the feelers; and the Dragon-Fly, the male organ of which is situated in the breast, and that of the female in the abdomen. But besides the organs of generation, insects have also other marks by which the sexes are distinguished, as difference of size, brightness of colours, form of the antennæ, &c. The male is always smaller than the female, and in some cases, as in that of the Termes, the female is two or three hundred times larger than the male; but the latter have the advantage of the former in the bright colours of their wings, and the largeness of their antennæ. In many cases the females have no wings; and in some instances, as that of the bee, the female has a sting, but the male none. The male insects are marked in entomological writings by the character ♂, the same as for Mars; and the female by ♀, the sign of Venus.

Metamorphoses of Insects.

Insects appear in four states, namely, the *Ovum*, or Egg; the Larva, the Pupa, and the *Imago*, or perfect insect.

The *Egg*. The first state in which insects mostly appear is that of an *ovum*, or egg; but there are some examples of viviparous insects, as in the genus *Aphis*, *Musca*, &c.

Larva. From the egg is hatched the insect in its second or Caterpillar state, which is now generally denominated the *larva*, on the authority of Linnæus; although before his time it was commonly called the *eruca*. The *Larvæ*, or Caterpillars of insects, differ very much from each other, according to the tribe to which they belong. Those of the Butterfly and Moth tribe are emphatically known by the name of Caterpillars; those of flies, bees, &c. are generally known by the name of Maggots. The *Larvæ* of the beetle tribe are generally of a thick, clumsy form; those of the Locust and Grasshopper differ but little in appearance from the complete insect, except in being destitute of wings; but those of the Dragon-Fly, and other insects, are of a peculiar form. Vide Plates No. I. II. (34, 35.) It is in the Larva, or Caterpillar state, that insects are observed to be most voracious; for in their complete state, as in the instance of the Butterfly, they are satisfied with the lightest and most delicate nutriment.

Pupa, or Chrysalis. The Pupa, or Chrysalis, is the third state into which insects transform themselves. In order to go through this process they cease to feed, and placing themselves in a quiet situation, they by a labo-

rious effort, frequently repeated, divest themselves of their external skin, or larva coat, and immediately appear in their chrysalis form, which varies in different insects as much as that of the larva. In most of the beetle tribe it is furnished with short legs, but the Pupa of the butterfly tribe is entirely destitute of legs. In most of the fly tribe it is perfectly oval, but in those of the bee tribe it is very shapeless. The term Pupa has been mostly adopted from Linnæus, in lieu of the more ancient term Chrysalis.

Imago. The last and perfect state into which the insect is transformed has been denominated, by Linnæus, *Imago*; in which state it continues until the period of its extinction. This commonly takes place within the period of a year, although some insects, as bees and spiders for example, are supposed to live a considerable time; and many whose existence in the perfect state is not protracted beyond a year, and in some instances not above many hours, will live in the state of larvæ for a considerable time previous to their transformation. This is particularly observable of water-insects, which are found to be of much longer duration than land-insects.

Classification of Insects.

Entomology, in common with every other branch of Natural History, has in an especial manner engaged the attention of writers within the last two centuries, previous to which it was only treated of occasionally, and incidentally. One of the earliest works, in which entomology was considered scientifically, was published by Agricola in 1549, in which he divided insects into 1. Creeping Insects, 2. Flying Insects, and 3. Swimming Insects. Aldrovandus distinguished Insects into *terrestria et aquatica*, which he subdivided into orders, according to the number, nature, position, &c. of their wings. Ray published in 1710 his *Historia Insectorum*, which was the joint labour of himself and Willoughby. In this history, insects are divided into *transmutabilia* and *intransmutabilia*, which were subdivided according to the number of their legs, their place of habitation, size, &c. The *transmutabilia* are divided into four orders: 1. *Vaginipennes*, those which have wings covered with a sheath. 2. *Papiliones*, lepidopterous insects. 3. *Quadripennes*, four-winged insects. 4. *Bipennes*, two-winged insects. These are again subdivided into families.

Linnean System. In 1735 the system of Linnæus was published, which has since been universally adopted, with little or no alteration, except such as he himself thought proper. At first it consisted of only four orders, which he afterwards increased to the number of seven, namely, *Coleoptera*, *Hemiptera*, *Lepidoptera*, *Neuroptera*, *Hymenoptera*, *Diptera*, and *Aptera*, which are founded on the number and construction of the wings.—*Coleoptera*, the first order, contains all those insects whose wings are guarded by horny sheaths or cases, called the *elytra*; among the principal genera of this order are the Beetles.—*Hemiptera*, i. e. half-winged, the second order, comprehends those insects which have the upper half of their wing-sheaths tough and leathery, and the lower part membranaceous. The principal insects of this tribe are the Locusts, Grasshoppers, *Cicadæ*, &c.—*Lepidoptera*, i. e. scaly-winged, the third order, consist of the insects commonly known by the names of the Moth and Butterfly. This Order derives its name from the powder observable on their wings, which is supposed to consist of minute scales, although this has been by some disputed.—*Neuroptera*, i. e. nerve-winged, is the fourth order, which is distinguished by the reticular form of the wing in the insects of which it is composed. The Dragon Fly is the most remarkable among the genera.—

Hymenoptera, the fifth order, comprehends those insects which have four wings, all of them furnished with a sting, or some process similar thereto, of which the Bee and Wasp afford the best examples.—*Diptera*, the sixth order, includes the two-winged insects, as the Fly and the Gnat.—*Aptera*, i. e. wingless, the seventh order, comprehends those insects which are totally destitute of wings, as Spiders, Centipedes, Scolopendræ, &c. under which class Linnæus has also comprehended the Crab and the Lobster, that are generally excluded from the number of insects.

Since his time the number of writers on Entomology has increased incalculably; and some of them, as Degeer, Reitzius, and Fabricius, have attempted to improve the Linnean system by increasing the number of orders, but their alterations have not been generally adopted.

Explanation of the Plates.

Plate No. I. (34.)

The Parts of Insects.—Fig. 1. The *Lucanus cervus*, having *a a*, the clavate antennæ clubpectinate; *p p*, the maxillary palpi; *l l*, the labial palpi; *m m*, the mandibles; *t*, the thorax; *s*, the scutellum; *e*, the elytra; *f f*, the femora; *g g*, the tibiæ; *h h*, the tarsi; *u u*, the unguis. 2. 3. The *Ditiscus*, having *a a*, the setaceous antennæ, or Horns; *f f f*, the feelers; *e e*, the Eyes; *p*, the Thorax; *b*, the breast; *o*, the Abdomen; *m m*, the membranaceous Under-Wings; *t*, the tail; *l l*, the ciliate Legs, formed for swimming. 4. The *Pes* of an insect, consisting of, *f*, the Femur; *s*, the Shank, or Leg; *t*, the Tibia; *u*, the Ungues, or Claws. 5. An insect of the papilionaceous tribe, having, *a a*, the clavate antennæ; *u*, the interior part of the wing; *d*, the disk of the wing; *p*, the posterior part of the wing; *e*, the exterior; *o*, the ocellate, or eye-like spot, having the Pupil in the centre, and the ring round, called the Iris; *t*, the Tail, or process at the end of the wing.—States of the Insect. Fig. 6. *e*, the Eggs; *l*, the Larva; *p*, the Pupa.—Orders of Insects. Order I. *Coleoptera*. Fig. 7. The *Scarabæus Hercules*, or Hercules Beetle. 8. The *Ptinus fatidicus*, or Death-Watch, in its natural size, and magnified. 9. The *Lampyrus*, or Glow-Worm, female and male; *o*, the Ova, or Eggs; *l*, the Larva; *p*, the Pupa. 10. The *Curculio palmarum*, the Palm-Worm and its Larva.

Plate No. II. (35.)

Order II. *Hemiptera*. Fig. 1. The *Mantis oratoria*, or Camel-Cricket. 2. The *Mantis siccifolia*, or Walking leaf. 3. The *Gryllus monstrosus*. 4. The *Cicada lanata*. 5. *Cimex stagnorum*. 6. The *Aphis Rosæ*, or Plant Louse. 7. *Coccus cacti*, or the Cochineal, in the Male; *f*, the Female.—Order III. *Lepidoptera*. Fig. 8. The Sphinx; *l*, the Larva; *p*, the Pupa. 9. *Phalæna mori*, or the Silk Worm; *l*, the Larva; *p*, the Pupa.—Order IV. *Neuroptera*. Fig. 10. *Libellula variegata*, the Dragon-Fly; *l*, the Larva; *p*, the Pupa. 11. *Ephemera*, or the Day-Fly, 12. The *Raphidia Ophiopsis*. 13. The *Hemorobius*.—Order V. *Hymenoptera*. Fig. 14. The *Ichneumon puparum*. 15. *Ichneumon larvarum*.—Order VI. *Diptera*. Fig. 16. *Oestrus*, the Gad-Fly.—Order VII. *Aptera*. Fig. 17. The *Scolopendra morsitans*.

ENTOYER (*Her.*) an epithet for a bordure charged with dead or artificial things, as in the annexed figure; he beareth "Argent a bordure or, entoyer of rests or clarions azure." ENTRAVONS (*Man.*) French for horses' pasterns, being pieces of leather, two inches broad, turned up, and stuffed on the inside, to prevent hurting the pastern.

ENTREE' (*Law*) or *entre*. [vide *Entry*]

ENTREMES (*Mus.*) a short musical interlude much used in Spain.

ENTRE-METS (*Mus.*) French for the inferior and lesser movements inserted in a composition between those of more importance.

ENTREPA'S (*Man.*) the broken pace of a horse that is neither a walk nor a trot, but most resembles an amble.

ENTRESOLE (*Archit.*) a kind of little story contrived occasionally at the top of the first story, for the conveniency of a wardrobe, &c.

ENTREPO'T (*Com.*) a public magazine appointed by the state for the reception of merchandize from foreign countries.

ENTRICHOMA (*Anat.*) the utmost extremity or edge of the eyelid.

ENTRIMMA (*Med.*) vide *Intrimum*.

ENTRIES (*Mus.*) the acts of operas, burlettas, &c.

ENTRIES (*Sport.*) thickets or places through which deer are found to have lately passed.

ENTRING (*Mar.*) the same as *boarding*.

ENTROCHUS (*Min.*) a sort of extraneous fossils, made up of round joints.

ENTRUSION (*Law*) vide *Intrusion*.

EN'TRY (*Law*) in French *entrée*, in Latin *introitus*, or *ingressus*, signifies the taking possession of lands or tenements where a man hath title of *entry*; it is also used for a writ of possession, as—*Entry ad communem legem*, a writ lying, where a tenant for life alienes lands, and dies, for the party in reversion against the person who is in possession.—*Entry ad terminum qui præterit*, a writ which lies for a lessor in case lands being let to a man for the life of another, and he for whose life the lands are leased dies, and the lessee or tenant holds over his term.—*Entry causa matrimonii prælocuti*, a writ lying where lands or tenements are given to a man upon condition that he take the donor to wife, and he marries another, or refuses to fulfil the condition.—*Entry in casu proviso*. [vide *Casu*]—*Entry sine assensu capituli*, a writ lying when an abbot or prior, &c. aliens lands, &c. without the assent of the convent, and dies, &c.

EN'TRY of goods (*Law*) at the Custom House is the passing the bills through the hands of the proper officers.

EN'TRY (*Com.*) the act of setting down the particulars in a merchant's books; this is done either by *single* or *double entry*, which are two distinct modes of book-keeping. [vide *Book-keeping*]

ENVELOPE (*Fort.*) a work of earth, sometimes in the form of a breastwork, or parapet, which is sometimes called a *conservé*, a *lanette*, &c.

ENVELOPED (*Her.*) vide *Enwrapped*.

EN'ULA (*Bot.*) another name for the *Inula* of Linnæus.

EN'LULON (*Anat.*) ἐνυλον, from ἐλον, the gums; the internal flesh of the gums. *Poll. Onom.* l. 2, segm. 94.

ENUMERA'TION (*Rhet.*) a part of the peroration, in which the orator collects the scattered heads of his speech.

ENVOYS (*Mus.*) the old English ballads, as they were formerly called.

EN'URE (*Law*) to be available, or of force.

ENURE'SIS (*Med.*) from ἐνυρεσις, to make water; an incontinency, or involuntary flow of urine, a genus of diseases, *Class Locales*, Order *Opoceneses*, in Cullen's *Nosology*.

ENURNEY (*Her.*) an epithet for a bordure charged with wild beasts, as in the annexed figure, as "Hc. beareth *argent* a bordure quarterly, i. e. ruby, enurny of three lions passant guardant *or*. The second *azure*, verdoxy of as many fleurs de lis *or*. The third is as the second; the fourth as the first."

ENWRAPPED (*Her.*) an epithet for a child's head coupé

- below the shoulder, enwrapped about the neck with a snake.
- ENYSTRON (*Anat.*) ἔνυστρον, the second ventricle of the stomach in ruminating beasts. *Arist. de Part. Anim.* l. 3, c. 14.
- EODORBRICE (*Archæol.*) Hedge-breaking, mentioned in the laws of King Alfred. *Leg. Alfred.* c. 35.
- E'OLIAN (*Mus.*) vide *Æolian*.
- EOLO'PILE (*Hyd.*) vide *Æolopile*.
- EO'RA (*Ant.*) vide *Æora*.
- E'ORLE (*Polit.*) vide *Earl*.
- EPA'CHTHES (*Ant.*) ἐπαχθής, a festival celebrated by the Bœotians in honour of Ceres. *Plut. de Isid. et Osir.*
- EPA'CMAS'TICOS (*Med.*) an epithet for a sort of fever that increases in strength. [vide *Anabasis*]
- EPA'CRIS (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.
Generic Character. CAL. perianth five-leaved.—COR. one-petalled.—STAM. filaments five; anthers incumbent.—PIST. germ roundish; style short; stigma capitate.—PER. capsule globular; seeds numerous.
Species. The species are all natives of New Zealand, as the *Epacris longifolia*, seu *Ardisia*.—*Epacris juniperina*, seu *Stephelinia*, &c.
- E'PACT (*Chron.*) a term denoting the excess of the solar month above the lunar synodical month, or of the solar year above the lunar year of twelve synodical months. [vide *Chronology*]
- EPAGO'GE (*Rhet.*) ἐπαγωγή, from ἐπάγω, to induce, oratorical induction; a figure of speech which consists in demonstrating and proving universal propositions by particulars. *Arist. Rhet.* l. 1, c. 2; *Cic. de Invent.* l. 1, c. 31; *Dionys. Hal. Comp.* 4; *Rufinian.* fig. 26; *Quintil.* l. 5, c. 10; *Plut. sect.* 53; *Suidas*.
- EPAGO'GION (*Med.*) ἐπαγωγή, from ἐπάγω, to induce, or cover over; the prepulse. *Diosc.* l. 3, c. 25.
- E'PAGON (*Mech.*) ἐπάγων, from ἐπάγω, to induce; a truckle in a crane, or such like engine.
- EPAINE'TIC (*Poet.*) from επαίνω, to praise; an epithet for a poem that is spoken in praise of any eminent person.
- EPA'NADIDON'TES *Pureti* (*Med.*) ἐπανιδδόντες πυρετοί, an epithet for fevers which increase in the degree of heat. *Hippocrat. Epid.* l. 6, aphor. 17.
- EPA'NADIPLO'SIS (*Rhet.*) a figure of speech, in which the sentence begins and ends with the same words. [vide *Palilogia*]
- EPA'NADIPLO'SIS (*Med.*) a reduplication. [vide *Anadiplosis*]
- EPA'NALEPSIS (*Med.*) ἐπανάληψις, a restoration to life.
- EPA'NALEPSIS (*Rhet.*) a figure of speech, in which the same word is repeated by way of emphasis. *Hermog. περὶ ἰδ.* apud. *Ald. Rhet.* p. 50; *Demet. de Eloc.* p. 196.
- EPA'NAPHORA (*Rhet.*) vide *Anaphora*.
- EPA'NASTASIS (*Med.*) ἐπανάστασις, from ἐπανίστημι, to raise; a tumor, or tubercle. *Hippocrat. de Coac.*; *Act. de Meth. Med. Præf.* l. 6.
- EPA'NCYLO'TUS (*Med.*) ἐπαγκυλωτός, a sort of bandage described by Galen and Oribasius. *Gal. de Fasc.*; *Oribas. de Laq.*
- EPA'NODOS (*Rhet.*) a figure in which the same or similar words are used in two or more sentences, as "Neither the light without the sun, nor yet the sun without its light."
- EPA'NORTHO'SIS (*Rhet.*) the act of an orator, who, thinking his expressions too faint and weak, corrects his discourse by adding others that are stronger. *Jul. Rufinian.*
- EPA'PHÆRESIS (*Med.*) ἐπαφαίρησις, from ἀφαίρω, to take away; a removal, or taking away; applied particularly to repeated phlebotomy. *Gal. de Curand. Rat. per Sang. Miss.* c. 1.
- EPA'RER (*Man.*) a French term for the flinging and jerking of a horse.

- EPA'RGEMOS (*Med.*) ἐπάργεμος, an epithet for a person affected with the argema. [vide *Argema*]
- EPA'RITA (*Min.*) a sort of argillaceous earth of the colour of the liver.
- EPA'RMATA (*Med.*) the swellings of the glandules, or kernels behind the ears, called *parotides*.
- EPA'RSIS (*Med.*) or *eparma*, ἐπάρσις, ἐπάριμα, from αἶμα, to raise; any sort of tumor, but particularly of the parotid glands.
- EPA'ULE (*Fort.*) the shoulder of the bastion, or the angle of the face and flank; whence that angle is often called the angle of the epaule.
- EPA'ULER (*Fort.*) a French term for raising any work, as *epauler une Batterie*, to raise a battery.
- EPAULE'TTES (*Mil.*) Shoulder-Knots worn as marks of distinction, by the commissioned and warrant officers, on one or both shoulders; those for serjeants are of the colour of the facing; those for the officers are made of gold or silver lace.
- EPAULEMENT (*Fort.*) a sidework made of earth thrown up, gabions, &c.; it is also used for a *demibastion*.
- EPA'ULIER (*Mil.*) the shoulder plate of armour.
- EPAUXE'SIS (*Rhet.*) a rhetorical figure which serves to increase the energy of the discourse.
- EPENCRA'NIS (*Anat.*) ἐπενκρανίς, the cerebellum. *Gal. de Usu. Part.*
- EPENTHESIS (*Gram.*) the putting of a letter or syllable in the middle of a word, as *induperator* for *imperator*.
- EPE'RLANUS (*Ich.*) the Smelt.
- EPE'RNA (*Bot.*) the *Dimorpha falcata* of Linnæus.
- E'PHA (*Ant.*) or *ephah*, פֶּהַיִם, a measure among the Hebrews, both for liquid and dry things; as a liquid measure, it contained the same as the bath; as a dry measure, it was equal to three pecks, three pints, twelve solid inches, and four decimal parts.
- EPHÆ'STIA (*Ant.*) vide *Hephestia*.
- EPHE'BIA (*Ant.*) ἐφηβία, puberty, or the age of fifteen.
- EPHEBI'UM (*Ant.*) ἐφηβείον, the place where young men wrestled and exercised themselves. *Vitruv.* l. 5, c. 2; *Philand. in Vitruv.*; *Bald. Lex. Vitruv.*
- EPHE'DRA (*Bot.*) or *Ephedron*, ἐφεδρον, ἐφεδρον, is another name for the *Hippuris*, or horse-tail. *Dioscor.* l. 4, c. 46; *Plin.* l. 26, c. 7.
- EPHEDRA, in the *Linnean system*, a genus of plants, Class 22 *Dioecia*, Order 12 *Monodelphia*.
Generic Character. CAL. perianth proper.—COR. none.—STAM. filaments seven; anthers roundish.—PIST. germs two; styles simple; stigmas simple.—PER. none; seeds two.
Species. The species are shrubs, as *Ephedra distichya*, seu *Ova Polygonum*, Great Shrubby Horse-tail, or Sea Grape.—*Ephedra monostichya*, Great Shrubby Horse-Tail, &c.
- EPHEDRA (*Surg.*) an instrument for the reduction of luxated bones.
- EPHEDRON (*Bot.*) vide *Ephedra*.
- EPHELCIS (*Med.*) ἐφελκίς, from ἔλκος, an ulcer; an abrasion from an ulcer; also something bloody brought up by coughing in an *Hæmoptysis*. *Gal. de Loc. Affect.* l. 1, c. 1; *Gorr. Def. Med.*
- E'PHELIS (*Med.*) from ἐπι and ἥλιος, the sun; sun-burning, a disorder from exposure to the sun. *Cel.* l. 6, c. 5; *Oribas. de Loc. Affect.* l. 4, c. 52.
- EPHEMERA (*Med.*) ἐφήμερα, from ἐπι and ἡμερα, a day; an epithet for a fever which lasts through the whole course of the day. *Gal. de Cris.* l. 2, c. 9; *Act. de Meth. Med.* l. 2, c. 1.
- EPHEMERA (*Ent.*) the Day-Fly, a genus of insects of the Neuropterous Order.
Generic Character. Mouth without mandibles; feelers four

very short; *antennae* filiform; *stemmata* three large; *wings* erect; *tail* terminating in bristles.

Species. This insect derives its name from the shortness of its existence, which seldom exceeds the space of a day, and sometimes not that of an hour. It is seen every where about waters in the summer.

EPHEMERIDES (*Med.*) an epithet for diseases which attack patients at particular times of the moon.

EPHEMERIS (*Astron.*) ἐφημερίς, from ἡμέρα, a day; a journal, or a calendar, that contains a register of the daily motions or changes of the position of the planets.

EPHEMERUM (*Bot.*) ἐφήμερον, a plant which is reckoned deleterious by Theophrastus, and some other writers, and is supposed to be so called because it was said to kill, in one day, any one who ate of it. It is otherwise called *Colchicum*, because it grew in Colchis.

Nicand. in Alexiph.

ἦν δὲ τὸ Μηδείης Κολχίδος ἐχθρόμενον πῦρ
κεῖνο ποτὶν δέχεται ἐφήμερον, ἔ παραχέλιη
διουμένῃ δυσάλυκτος ἰαπτεται ἔνδοθι κνηθμὸς.

According to Galen there was another plant of this name, which was not poisonous. *Theophrast.* l. 9, c. 16; *Dioscor.* l. 4, c. 88; *Plin.* l. 25, c. 18; *Gal. de Simp.* l. 6; *Oribas. Med. Collect.* l. 11; *Aet. Tetrab.* 1, serm. 2; *Paul. Aeginet.* l. 7, c. 3.

EPHEMERUM, in the *Linnean system*, is the *Commelina Bengelrensis*.

EPHE'SIA (*Ant.*) ἐφεσία, a festival, celebrated in Arcadia, in honour of Diana. *Thucyd.* l. 3, c. 104; *Strab.* l. 14; *Poll. Onom.* l. 1, c. 1; *Pausan.* l. 8, c. 13.

EPHE'SIUM (*Med.*) a plaster described by Celsus. *De Re Med.* l. 4, c. 85.

EPHETÆ (*Ant.*) ἐφέται, from ἐφίμι, to appeal; judges at Athens who tried cases of manslaughter. They were probably so called because appeals were made in an especial manner to them for the decision of causes. They were either instituted originally, or reduced to the number of fifty by Draco, and afterwards had their power considerably reduced by Solon. *Poll.* l. 8, c. 10; *Plutarch. in Solon*; *Harpocration*; *Suidas*; *Sigon. de Rep. Athen.* l. 3, c. 3.

EPHIA'LTES (*Med.*) vide *Incubus*.

EPHIDRO'SIS (*Med.*) ἐφιδροσις, from ἐφιδρώω, to break out into a sweat; a symptomatical sweat which breaks out either over the whole body, or is confined to the face, head, and neck. *Hippocrat. Prorrh.* l. 1; *Gal. Comm.* 2.

EPHIE'LIS (*Bot.*) a genus of plants, Class 8 *Octandria*, Order 1 *Monogynia*.

Generic Character. CAL. *perianth* one-leaved. — COR. *petals* five. — STAM. *filaments* eight; *anthers* roundish. — PIST. *germ* ovate; *style* none; *stigma* blunt. — PER. *capsule* oblong; *seeds* two.

Species. The single species is a tree, as the *Ephielis guianensis*, seu *Mataiba*, native of Guiana.

EPHIPPIUM (*Anat.*) part of the *os sphenoides*, in which the pituitary gland is placed.

EPHIPPIUM (*Ant.*) ἐφίππιον, from ἐπι, upon, and ἵππος, a horse; the trappings or coverings for a horse, whence the saying of Horace, *Optat bos ephippia*, proverbial for a person discontented with his condition. *Xenoph. Cyropæd.* l. 8; *Varr. apud Non.* l. 2; *Cæs. de Bell. Gall.* l. 4, c. 2; *Poll. Onom.* l. 1, scgm. 185; *Dio.* l. 57.

EPHIPPIUS (*Ant.*) a gymnastic exercise among the Lacedæmonians. *Suidas*; *Hesychius*.

EPHOD (*Theol.*) עֶפֶד, a linen garment worn by the Jewish high priest and the other inferior priests.

EPHODOS (*Med.*) ἐφωδος, from ἐπι, and ὄδω, a way; signifies in Hippocrates, 1. The duct or passage by which the excrements are evacuated. *Epid.* l. 6, sect. 2, aph. 25.

2. The periodical attack of a fever. *De Prognos.* 3. The accession of things, similar or dissimilar, which may benefit or hurt the body. *De Diet.*; *Gal. Comm. in Hippocrat.*

EPHORUS (*Ant.*) ἔφορος, from ἐφορᾶν, to inspect, an officer of great power among the Lacedæmonians; so called because he was admitted to an inspection of the greater mysteries of Ceres. The Ephori were five in number, and possessed a power that was more than regal, for they took upon them to punish the Spartan Kings, as in the case of Pausanias and others. *Aristot. Polit.* l. 2, c. 9; *Plut. in Cleom. Pausan.*; *Pausan.* l. 3.

EP'IALOS (*Med.*) ἐπιάλος, from ἥπιος, gentle, and ἀλείνω, to heat; an epithet for a fever attended with a sensation of heat and cold in the same part, and at the same time. *Hippocrat. περί ἐπιάνως.* *Gal. de Diff.* Feb. l. 2, c. 6; *Paul. Aegin.* l. 2, c. 25.

EPIA'ULA (*Ant.*) the name of a popular song among the Greeks, answering to what might now be called the *song of the Millers*.

EPIBADES (*Ant.*) ἐπιβάδες, Passage-boats, or ships to carry burdens.

EPIBATE'RION (*Ant.*) ἐπιβατήριον, verses made on the occasion of a person's return to his country. *Scalig. Poet.* l. 1, c. 50.

EPIBATE'RIMUM (*Bot.*) a genus of plants, Class 21 *Monocœcia*, Order 6 *Hexandria*.

Generic Character. CAL. *perianth* double. — COR. *petals* six. — STAM. *filaments* six; *anthers* roundish. — PIST. *germs* three; *styles* three; *stigmas* compressed. — PER. *drupes* three; *seeds* nut kidney form.

Species. The single species is the *Epibaterium pendulum*.

EPI'BOLE (*Med.*) vide *Incubus*.

EPI'C (*Poet.*) ἐπικός, from ἔπος, a verse; an epithet for hexameter verse, because it is always used in epic poetry. — *Epic Poem*, a poem, the subject of which is always some hero or distinguished person.

EPICA'NTHIDES (*Anat.*) ἐπικανθίδες, the two angles of the eye.

EPICA'RPIUM (*Med.*) ἐπικέρπιον, a medicine applied to the wrist to drive away intermitting fevers.

EPICA'UMA (*Med.*) ἐπίκανυμα, a crusty ulceration on the surface of the pupil of the eye, in distinction from the encauma, which is situated either on the pupil or the white of the eye, and the caligo, which covers the greater part of the pupil. *Gal. Defin. Med.*; *Aet. Tetrab.* 2, serm. 2, c. 2; *Paul. Aeginet.* l. 3, c. 22; *Act. de Meth. Med.* l. 2, c. 7.

EPICE'DIUM (*Ant.*) ἐπικήδειον, a funeral song, or copy of verses in praise of a person deceased. The *Epicedium* is made previous to burial; the *Epitaph* after the burial. *Serv. in Virg.*

EPICE'NE (*Gram.*) ἐπίκανος, i. e. common; an epithet for the gender of such words as are common to both sexes; as *hic*, *et hæc parens*; a parent, father, or mother.

EPICERA'STICA (*Med.*) ἐπικεραιστικά, medicines which moderate sharp humours. *Gorr. Def. Méd.*

EPICHIRE'MATA (*Rhet.*) ἐπιχειρήματα, rhetorical artifices which the orator uses either in proving or persuading, called by Aristotle πείσεις, and by Cicero *argumenta*. *Aristot. Rhet.* l. 2, c. 20; *Cic. de Juv.* l. 1, c. 34; *Dionys. Hal. Jud. in Lys.* c. 15; *Hermog. περί εἰρημ.*; *Apsin. Art. Rhet. περί ἐνθυμημ.*; *Quintil.* l. 5, c. 14; *Minucian. περί ἐπιχειρ.* *apud Ald.* p. 731; *Menander. Rhet. περί ἐπιδεικτ.* *δαιρ.* l. 3, c. 2.

EPICHIRE'SIS (*Med.*) vide *Enchiresis*.

EPICHIROTO'NIA (*Ant.*) ἐπιχειροτονία, the annual ceremony of revising the laws, which was instituted by Solon; it was so called from the manner of giving their suffrages by holding up their hands.

EPICHÓ'LOS (*Med.*) ἐπίχολος, from χολή, the bile; bilious.

- EPICHO'RDIS (*Med.*) ἐπιχορδῖς, from χορδή, an intestine; the mesentery. *Aret. de Caus. et Sign. Acut. Morb.* l. 2, c. 6.
- EPICHO'RIOS (*Med.*) vide *Epidemius*.
- EPICHY'SIS (*Ant.*) a brass vessel like an ewer to pour wine out of.
- EPICITHARIS'MA (*Ant.*) ἐπικιθάρισμα, the last part of the interlude, or a flourish of music after the play was done.
- EPICLI'DIA (*Ant.*) ἐπικληΐδια, an Athenian festival in honour of Ceres. *Hesychius*.
- EPICO'ELIS (*Med.*) ἐπικοιλίς, the upper eye-lid.
- EPICŒ'NUS (*Gram.*) vide *Epicene*.
- EPICO'LICÆ regiones (*Anat.*) the lateral or lumbar regions adjacent to the colon.
- EPICOPHO'SIS (*Med.*) vide *Cophosis*.
- EPICRA'NIUM (*Anat.*) the common integuments, aponeurosis, and muscular expansion which lie upon the cranium.
- EPICRA'SIS (*Med.*) ἐπικρασις, an attemperament of the humours; a cure performed in the alterative way by degrees, and, with attemperating medicines, is called a cure *per Epicrasin*. *Gal. de Meth. Med.* l. 12, c. 8.
- EPICRE'NÆ (*Ant.*) ἐπικρήναι, a Lacedæmonian festival in honour of Ceres. *Hesychius*.
- EPICTE'NIUM (*Anat.*) ἐπικτένιον, the pubes and adjacent parts. It is also used by Hippocrates to signify fine lint. *Gal. Exeges. Hippocrat. Vocab.; Gorr. Def. Med.; Foes. Œconom. Hippocrat.*
- EPICURE'AN Philosophy (*Phil.*) a system of philosophy; so called from its author Epicurus, who maintained that the world was composed of atoms, of various forms and magnitudes, which were united and separated at random, without the intervention of a superior power.
- EPICY'CLE (*Astron.*) a little circle whose centre is in the circumference of a greater, which, being fixed in the deferent of a planet, according to the Ptolemaic hypothesis, is carried along with it, and yet with its own peculiar motion, carries the body of the planet fastened to it round its proper centre. *Ptol. Almag.* l. 3, c. 3; *Copern.* l. 1, c. 15.
- EPICY'CLOID (*Geom.*) a curve generated by a point in one circle, which revolves about its convex or concave circumference; the former is called the *exterior* or *upper Epicycloid*; the latter the *interior* or *lower Epicycloid*, as in the annexed figure, where GEHF represents an exterior Epicycloid. The revolving or generating circle is called the *generant*, as E, and the arc of that circle along which it revolves is called the *base*, as G B F.
- EPICYESIS (*Med.*) ἐπικύσις, from ἐπι and κύω, to conceive; superfœtation, or the conception of one fœtus upon another before conceived; on which subject Hippocrates wrote a book.
- EPIDE'MIA (*Ant.*) ἐπιδημία, private festivals celebrated in honour of friends returned from a journey. *Meurs. Græc. Fer.*
- EPIDE'MICAL (*Med.*) ἐπιδημικός, from ἐπι and δήμος, the people; a disease which, proceeding from some common cause, spreads itself among the inhabitants of a country.
- EPIDE'MIUM (*Med.*) an epidemic disorder.
- EPIDE'NDRUM (*Bot.*) a genus of plants, Class 20 *Gynandria*, Order 1 *Diandria*.
- Generic Character.* CAL. *spathes* vague.—COR. *petals* five.—STAM. *filaments* two; *anthers* covered by the upper lip of the nectary.—PIST. *germ* slender; *style* very short; *stigmas* obscure.—PER. *siliques* long; *seeds* numerous.
- Species.* The species are perennials, as the—*Epidendrum vanilla*, seu *Lotus*, *Vanilla*.—*Epidendrum spatulatum*, seu *Helleborine*, native of the East Indies.—*Epidendrum ferrum*, seu *Thalia*, native of the East Indies.
- EPIDENDRUM is also the name of a species of *Lycopodon*.
- EPIDE'RMIS (*Anat.*) ἐπιδερμῖς, from ἐπι and δέρμα, the skin;

- the cuticle or scarf-skin. [vide *Cutis*] *Ruff. Ephes. de Appell. Part. Corp. Human.*
- EPIDE'RMOS (*Bot.*) the outer, dry, and very thin covering of a plant corresponding with the scarf skin of the animal body.
- EPIDE'SMOS (*Surg.*) ἐπιδέσμος, from δέω, to bind; a bandage by which bolsters, splinters, and the like are secured.
- EPIDICA'SIA (*Ant.*) ἐπιδικασία, a suit instituted between persons who pretended to be nearest allied to an heiress, who, according to the laws of Athens, was obliged to marry her nearest relation. The virgin who was the object of contest, was called ἐπιδίκος.
- EPIDICTICUS (*Rhet.*) another name for *Demonstrative*.
- EPIDI'DYMIS (*Anat.*) ἐπιδιδυμῖς, from ἐπι and δίδυμος, a testicle; a production of the testicle, or a hard vascular oblong substance that lies upon the testicle. *Gal. de Usu Part.* l. 14, c. 14; *Gorr. Def. Med.*
- EPIDO'SIS (*Med.*) ἐπίδοσις, from ἐπιδιδυμι, to add to; a term applied to the enlargement of any part of the body, but more particularly to the growth of a disease. *Gal. de Morb. Temp.* c. 2.
- EPIDRO'MI (*Med.*) ἐπιδρομή, from ἐπι and δρέω, to run; an afflux of humours, as happens when a ligature is made on any part. *Hippocrat. κατ' ἴση.*
- EPIDRO'MIS (*Ant.*) the arming of a net, namely, the ropes, by which it is opened and drawn together. *Plin.* l. 19, c. 1.
- EPIDROMUS (*Ant.*) ἐπιδρομος, the poop or mizen sail in a ship spread backwards. *Isid. Orig.* l. 19, c. 3; *Hesychius*; *Gyrald. de Navigat.* c. 14; *Scheff. de Mil. Nav.* l. 2, c. 5.
- EPIGÆ'A (*Bot.*) a genus of plants, Class 10 *Decandria*, Order 1 *Monogynia*.
- Generic Character.* CAL. *perianth* double.—COR. *one-petalled*.—STAM. *filaments* ten; *anthers* oblong.—PIST. *germ* globose; *style* filiform; *stigma* obtuse.—PER. *capsule* globose; *seeds* many.
- Species.* The two species are shrubs, as the—*Epigæa repens*, seu *Arbutus*, *Creeping Epigæa*, or *Trailing Arbutus*.—*Epigæa cordifolia*, *Heart-leaved Epigæa*, native of Gaudaloupe.
- EPIGEE (*Astron.*) vide *Perigee*.
- EPIGA'STRIC (*Anat.*) an epithet for what belongs to the epigastrium; the—*Epigastric region*, the same as the *epigastrium*.—*Epigastric artery*, a branch of the Iliac artery that distributes itself among the muscles of the *epigastrium*.
- EPIGA'STRIUM (*Anat.*) ἐπιγαστήριον, from ἐπι, upon, and γαστήρ, the belly; the epigastric region, i. e. the forepart of the abdomen or Lower Belly. *Ruff. Ephes. de Appell. Part. Corp. Hum.* l. 1, c. 11; *Gal. Com. in Hippocrat.* l. 7, aphor. 56, &c.
- EPIG'A (*Ant.*) ἐπίγαια, or πείσματα, the cords wherewith ships were tied to the shore. *Poll. Onom.* l. 10, segm. 134.
- EPIGENE'MA (*Med.*) ἐπιγενήματα, from ἐπιγενάω, to grow to or be added to; something grown or closely adhering to another, as applied by Hippocrates to the saliva adhering to the tongue; also an accessory symptom according to Galen. *Hippoc. Coac. Prænot.*; *Gal. de Diff. Symp.* tom. iii; *Foes. Œconom. Hippocrat.*
- EPIGINOMENA (*Med.*) ἐπιγινόμενα, from ἐπιγίνομαι, to succeed, or be an accession; accessory symptoms.
- EPIGLOSSUM (*Bot.*) the *Laurus Alexandrinum*.
- EPIGLOTTIS (*Anat.*) ἐπιγλωττις, of ἐπι, above, and γλωττία, the tongue; the fifth cartilage of the larynx, which serves to cover the opening of the windpipe. *Ruff. Ephes. de Appell. Part. Corp. Hum.* l. 2, c. 4; *Plin.* l. 21, c. 27; *Gal. Def. Med.*; *Oribas. Med. Collect.* l. 25, c. 1; *Gorr. Def. Med.*; *Foes. Œconom. Hippocrat.*
- EPIGLOTTIS (*Bot.*) a species of the *Astragalus* of Linnæus.
- EPIGLUTIS (*Anat.*) ἐπιγλυττις, the superior part of the buttocks.
- EPIGO'NATIS (*Anat.*) ἐπιγονατῖς, the patella or knee-pan.

Ruff. Ephes. de Appell. Part. Corp. Hum. l. 1, c. 16; *Gal. de Comp. Med. per Gen.* l. 1.

EPIGONIDES (*Anat.*) vide *Epigunides*.

EPIGONTUM (*Mus.*) ἐπιγότιον, an ancient instrument which was said to be composed of forty strings. It was called after Epigonus its inventor. *Poll. Onom.* l. 4, segm. 59.

EPIGONON (*Med.*) *Epicycosis*.

EPIGRAM (*Lit.*) ἐπιγράμμα, is usually understood to signify a short witty poem, playing upon such fancies as arise from any particular subject, of which the poems of Martial afford good specimens.

EPIGRA'PHE (*Ant.*) a term among antiquaries for an inscription on a building, statue, &c.

EPIGRA'PHEIS (*Ant.*) ἐπιγράψεις, from ἐπιγράφω, to inscribe; officers who assessed every one according to his ability, of whom taxes were required. *Poll. Onom.* l. 8, segm. 103.

EPIGUNIDES (*Anat.*) ἐπιγυνίδες, muscles inserted into the knee. *Ruff. Ephes. de Appell. Part. Corp. Hum.* l. 1, c. 16.

EPILE'NIA (*Mus.*) ἐπιλήνια, a name for the song of the Grape-gatherers among the ancient Greeks. *Poll. Onom.* l. 4, segm. 53.

EPILE'NTIA (*Med.*) a corruption of Epilepsy.

E'PILEPSY (*Med.*) ἐπιληψία, from ἐπιλαμβάνω, to seize; the *Falling Sickness*, so called because persons affected with it fall down on a sudden. It is otherwise called *Morbus Comitialis*. *Hippocrat. Coac. Prænot.*; *Scribon. Larg. Compos. Med.* c. 2; *Gal. de Different. Morb.* c. 5; *Tral-lian.* l. 1, c. 15; *Act. de Meth. Med.* l. 1, c. 16; *Foes. Econom. Hippocrat.*; *Gorr. Def. Med.*

EPILEPSY, in Cullen's Nosology, is a genus of diseases, Class *Neuroses*, Order *Spasmi*.

EPILE'PTICS (*Med.*) ἐπιλεπτικά, medicines good against the epilepsy.

EPILO'BIUM (*Bot.*) a genus of plants, Class 8 *Octandria*, Order 1 *Monogymia*.

Generic Character. CAL. *perianth* one-leaved.—COR. *petals* four.—STAM. *filaments* eight; *anthers* oval.—PIST. *germ* cylindrical; *style* filiform; *stigma* obtuse.—PER. *capsule* oblong; *seeds* oblong.

Species. The species are perennials, as the—*Epilobium angustifolium*, *Chamænerion*, seu *Lysimachia*, Narrow-leaved or Rose-bay Willow-Herb.—*Epilobium angustissimum*, seu *Pseudolysimachium purpureum*, Linear-leaved Willow-Herb, native of Provence.—*Epilobium hirsutum*, Large-flowered Willow-Herb, native of Europe.

EPILO'GUS (*Rhet.*) ἐπίλογος, Epilogue, the conclusion of a speech; so called because, ἐπιλέγεται, it is added to what has been already said.

EPIME'DIUM (*Bot.*) ἐπιμήδιον, a plant with leaves something like the ivy, which was reckoned good for cataplasms. *Dioscor.* l. 4, c. 22; *Plin.* l. 27, c. 9; *Gal. de Simpl.* l. 6; *Oribas. Med. Collect.* l. 11; *Paul. Æginet.* l. 7, c. 3.

EPIMEDIUM, a genus of plants, Class 4 *Tetrandria*, Order 1 *Monogymia*.

Generic Character. CAL. *perianth* four-leaved.—COR. *petals* four.—STAM. *filaments* four; *anthers* oblong.—PIST. *germ* oblong; *style* shorter than the germ; *stigma* simple.—PER. *silique* oblong; *seeds* oblong.

Species. The single species, the *Epimedium alpinum*, Alpine Barrenwort, is a perennial.

EPIME'LAS (*Min.*) a white precious stone, having a blackish colour over it.

EPIME'LIS (*Bot.*) a sort of wild apple. *Paul. Æginet.* l. 7, c. 3.

EPIME'NIA (*Ant.*) ἐπιμήνια, a monthly tribute sent from Africa to Rome. *Juv. Sat.* 7, v. 120; *Casaub. in Athen.* l. 2, c. 22.

EPIMONE (*Rhet.*) ἐπιμονή, a figure of speech by which any thing is magnified above measure. [vide *Auxesis*]

EPIMORIOS (*Med.*) ἐπιμόριος, superficial; an epithet de-

noting the inequality of time or rhythm in the beating of the pulse. *Gal. De Diff. Pul.* l. 1, c. 9.

EPIMYLIS (*Med.*) ἐπιμυλίς, the patella of the knee, or the kneecap. *Gal. Exeges. Hippocrat. Vocab.*; *Foes. Econom. Hippocrat.*

EPINENEUCOS (*Med.*) ἐπινευκός, from νέω, to nod or incline; an epithet for a pulse that beats unequally in different parts of the artery. *Gal. Isagog. de Puls.*; *Gorr. Def. Med.*

EPINE/PHELES (*Med.*) ἐπινεφέλης, from νεφέλη, a cloud, cloudy; an epithet applied to an enæorema, which appears in the urine. *Hippocrat. Epid.* l. 3; *Foes. Econom. Hippocrat.*

EPINY'CIA (*Ant.*) ἐπινίκια, triumphal songs on the occasion of a victory; also feasts and rejoicings at the same time. *Poll. Onom.* l. 4, segm. 53; *Suet. Ncr.* c. 43; *Meurs. Græc. Feriat.* l. 3, apud *Gronov. Thes. Antiq.* tom. 7, p. 769.

EPINY'CTIDES (*Med.*) ἐπινοκτίδες, sores which make the corners of the eyes water; so called because they are particularly painful in the night. *Cels.* l. 5, c. 28; *Plin.* l. 20, c. 8; *Gal. de Meth. Med.* l. 2, c. 2; *Oribas. de Morb. Curat.* l. 3, c. 54; *Act. Tetrab.* 4, serm. 2, c. 61; *Act. de Meth. Med.* l. 2, c. 11.

EPINO'TIUM (*Anat.*) ἐπινότιον, from ἐπί, and ὥτος, the back; a name for the shoulder-blade.

EPIPA'CTIS (*Bot.*) ἐπιπακτίς, a small shrub with very small leaves, a decoction of which is good against poisons. Boerhaave takes it to be a species of the *Helloborine*. *Dioscor.* l. 4, c. 109; *Oribas. Med. Collect.* l. 11; *Paul. Æginet.* l. 7, c. 3.

EPIPACTIS, in the *Linnean system*, is the *Astrantia epipactis*.

EPIPAROXY'SMUS (*Med.*) ἐπιπαροξυσμός, from ἐπί, and παροξυσμός, a paroxysm; a febrile exacerbation which happens more frequently than usual.

EPIPA'STON (*Med.*) ἐπίπασον, from ἐπί, and πάσσω, to sprinkle; any powdered drugs sprinkled on the body.

EPIPE'CHYS (*Med.*) ἐπίπυχει, from ἐπί, and πῦχυς, the cubit; that part of the arm above the cubit.

EPIPE'PHYCOS (*Med.*) the same as *Adnata*.

EPIPH'ENO'MENA (*Med.*) ἐπιφαινόμενα, from ἐπί, and φαινομένον, a phenomenon; adventitious symptoms, which do not appear before the disease is actually formed. *Hippocrat. Epidem.* l. 6; *Gal. Com.* 2, in *Hippocrat. de Rat. Vict. in Acut. Morb.*

EPIPHANY (*Ecc.*) ἐπιφάνεια, signifies, literally, an appearance of light, a manifestation; whence it has been applied to signify a festival celebrated on the twelfth day after Christmas, or our Saviour's nativity, wherein he was manifested to the Gentiles by the miraculous appearance of a blazing star, conducting the Magi to the place of his abode. *Isidor. Orig.* l. 6, c. 18.

EPIPHLE'BOS (*Med.*) ἐπιφλεβος, from ἐπί, and φλέψ, a vein; an epithet for one whose veins appear prominent.

EPIPHLOGI'SMA (*Med.*) ἐπιφλόγισμα, from ἐπί, and φλογίζω, to inflame; a violent inflammation, attended with a pain and a tumour.

EPIPHONE'MA (*Rhet.*) ἐπιφώνημα, exclamation; a figure of rhetoric, consisting of a smart sentence at the close of the speech. *Hermog. περὶ ενρ.* l. 4, apud *Ald. Rhet.* p. 202; *Schol. in Hermog.* p. 392; *Dionys. Art. Rhet.* c. 10; *Quintil.* l. 8, c. 5; *Eustath. ad Hom.* v. p. 1038.

EPIPHORA (*Rhet.*) ἐπιφορά, or ἐπιφορηκὸς λόγος, a figure of speech, in which the orator inveighs with vehemence. *Sopatr. Διατρ.*

EPIPHORA (*Log.*) a conclusion or consequence drawn from the assumption in a syllogism.

EPIPHORA (*Med.*) from ἐπιφέρω, to carry with force; an impetuous flux of the humours. *Cel.* l. 6, c. 6; *Scribon. Larg.* c. 19; *Columel.* l. 7, c. 17; *Plin.* l. 20, c. 13; *Gal. de Comp. Med. sec. Loc.* l. 4, c. 7; *Marcell. de Med.* c. 8;

Trallian. l. 2, c. 1; *Myrep. de Antidot.* sect. 1, c. 383; *Gorr. Def. Med.*

EPIPHYLLANTHUS (*Bot.*) is the *Xylophyllu angustifolia* of Linnæus.

EPIPHYLLOSPE'RMÆ (*Bot.*) an epithet for plants which bear seeds on the leaf.

EPIPHY'SIS (*Med.*) ἐπιφύσις, from ἐπιφύω, to grow to; a sort of articulation of the bones when they grow to one another by simple and immediate contiguity. *Hippocrat. de Tract.*; *Gal. de Usu Part.* l. 11, c. 18; *Oribas. Med. Collect.* l. 24, c. 1; *Gorr. Def. Med.*; *Foes. Œconom. Hippocrat.*

EPIPLA'SMA (*Med.*) ἐπίπλασμα, the same as *Cataplasma*.

EPIPLERO'SIS (*Med.*) ἐπιπλήρωσις, from ἐπι, and πλήρωσις, repletion; super-repletion, or an excess of repletion.

EPIPLE'XIS (*Rhet.*) ἐπιπλήξις, from ἐπιπλήσσω, a figure in rhetoric, which, by an elegant kind of upbraiding, endeavours to convince. Hippocrates thinks this a desirable talent in a physician. *Hippocrat. Jul. Rufinian.* p. 15, c. 21; *Philostrat. Vit. Apollon.*; *Phot. Cod.* 165.

EPIPLOCE (*Rhet.*) ἐπιπλοκή, a rhetorical figure; a gradual rising of one clause of a sentence out of another. *Hermog. apud Ald. Rhet.* p. 29; *Quintil.* l. 7, c. 1.

EPIPLOCE (*Med.*) vide *Symploce*.

EPIPLOCELE (*Med.*) ἐπιπλοκήλη, from ἐπίπλοον, the omentum, and κήλη, a tumour; a hernia in which the omentum is fallen down. *Cel.* l. 1, c. 18; *Gal. Def. Med.*

EPIPLOICÆ *Appendiculæ* (*Med.*) small appendages to the colon and rectum.

EPIPLO'IS (*Med.*) a branch of the cœliac artery, springing out of the lower end of the *Splenica*, which is either the *Epiplolis postica*, that runs to the back of the omentum, or *Epiplolis sinistra* that runs to the left side of the omentum.

EPIPLO'ITIS (*Med.*) from ἐπίπλοον, omentum; an inflammation of the process of the peritoneum, which forms the omentum.

EPIPLOOCOMISTES (*Med.*) ἐπιπλοοκομιστής, an epithet for a man having a very large omentum. *Gal. Adm. Anat.* l. 6, c. 5.

EPIPLOO'MPHALON (*Med.*) from ἐπίπλοον, and ὀμφαλός, a navel rupture. *Gal. Def. Med.*

EPIPLO'ON (*Med.*) ἐπίπλοον, from ἐπιπλόω, to sail upon; the Greek name for the omentum, or caul; so called because it is mostly found floating as it were on the intestines. *Ruff. Ephes. de Appellat. Part. Corp. Hum.* l. 1, c. 28; *Gal. de Adm. Anat.* l. 6, c. 5; *Oribas. Med. Collect.* l. 24, c. 21.

EPIPLOSCHEOCE'LE (*Med.*) from ἐπίπλοον, the omentum, ἴσχος, the scrotum, and κήλη, a hernia; a rupture of the omentum when it descends into the scrotum.

EPIPOGE'UM (*Bot.*) is the *Satyrium epipogœum*.

EPIPOLA'SIS (*Med.*) ἐπιπόλασις, a redundancy or fluctuation. *Hippocrat. de Nat. Human.* l. 1.

EPIPORO'MA (*Med.*) ἐπιπόρωμα, a callous concretion. *Hippocrat. Prorrhhet.* l. 2.

EPI SARCO'DIUM (*Med.*) vide *Anasarca*.

EPISE'NIUM (*Archit.*) ἐπισκήνιον, the columniation or rows of beams above the scene. *Vitruv.* l. 5, c. 7; *Philand. in Vitruv.*; *Bald. Lex. Vitruv.*

EPI SCHE'SIS (*Med.*) ἐπίσχεσις, from ἴσχω, to stop; a suppression of due excretions. *Gal. Com. 2, in Hippocrat. Epid.* l. 3.

EPI SCHI'DION (*Mech.*) from σχίζω, to cleave; a wedge to cleave wood with. *Vitruv.* l. 10, c. 17; *Bald. Lex. Vitruv.*

EPI SCHION (*Anat.*) ἐπισχίον, from ἐπί, and ἴσχιον, the ischium; the pecten, or *os pubis*.

EPI SCOPACY (*Ecc.*) ἐπισκοπή, in Latin *episcopatus*; a form of church government by bishops.

EPI SCOPAL'ES VALVULÆ (*Anat.*) the same as the *Valvulæ mitrales*.

EPI SCOPAL'IA (*Ecc.*) synodals, pente-costals, and other customary payments from the clergy.

EPI SCOPAL'IANs (*Ecc.*) those who support episcopacy.

EPI SCOPUS (*Ant.*) ἐπισκοπος, from ἐπισκοπέω, to superintend; an Athenian magistrate, particularly one who had the superintendance of the markets.

EPI SCORUS *Puerorum* (*Sport.*) an old custom in former times, for a lay person, at a certain season, to plait his hair; and, putting on the garb of a bishop, to exercise his functions to the entertainment of the rest. *Mon. Angl.* tom. 3, p. 69.

EPI SCY'NIUM (*Anat.*) ἐπισκύνιον, the extreme wrinkle of the eyebrow; also the eyebrow itself. *Ruff. Ephes. de Appell. Part. Corp. Human.* l. 1, c. 1; *Gorr. Def. Med.*

EPI SE'ION (*Anat.*) ἐπίσειον, the pubes. *Ruff. Ephes. de Appell. Part. Corp. Human.* l. 1, c. 11.

EPI SEMA'SIA (*Med.*) the same as *Annotatio*.

EPI SODE (*Poet.*) ἐπισόδιον, from ἐπισόδιος, adventitious; a separate story, or action, which a poet connects with the main plot of his poem, in order to give it diversity; as the story of Dido, in Virgil. *Aristot. de Art. Poet.* c. 12.

EPI SPA'SMOS (*Med.*) ἐπίσπασμος, from ἐπισπάω, to attract; a quick inspiration of the breath. *Hippocrat. Epidem.* l. 6.

EPI SPA'STICS (*Med.*) ἐπισπαστικά, from ἐπισπάω, to draw; medicines which draw blisters. *Cel.* l. 5, c. 18; *Gal. de Comp. Med. per gen.* l. 6.

EPI SPHERIA (*Med.*) the turnings and windings of the exterior substance of the brain.

EPI STAL'MA (*Ant.*) a prince's commission under his hand and seal.

EPI STASIS (*Med.*) ἐπίστασις, from ἐπίστημι, to place upon; the substance swimming on the surface of the urine. *Hippoc.* l. 7, aphor. 34.

EPI STATES (*Ant.*) ἐπιστάτης, the president of the proedri, who had in his charge the keys of the public exchequer, which was thought to be a trust of such magnitude that no one was permitted to hold it more than once. *Aristot. Polit.* l. 6, c. 8; *Demosth. Timocrat.*; *Poll. Onom.* l. 8, serm. 96.

EPI STA'XIS (*Med.*) ἐπίσταξις, from ἐπί, and στάζω, to distil; a repeated distillation of blood from the nose. *Hippocrat. apud Gorr. Def. Med.*

EPI STO'MION (*Mech.*) ἐπιστόμιον, a cock, tap, spiggot, stopper, &c.; also the stop in an organ, to make the sound high or low. *Vitruv.* l. 10, c. 13; *Philand. in Vitruv.*; *Bud. in Pandect.* p. 164.

EPI STROPHE (*Rhet.*) a figure in rhetoric, by which sentences end in the same word, called by Hermogenes *antistrophe*, by Rutilius *epiphora*, by Aquila *anastrophe*. *Jul. Rufinian.*

EPI STROPHÆ'US (*Anat.*) an epithet for the second vertebrae of the back.

EPI STYLE (*Archit.*) ἐπιστύλιον, a mass of stone, &c. laid upon the capital of a pillar. *Vitruv.* l. 3, c. 3; *Bald. Lex Vitruv.*

EPI TA'SIS (*Med.*) ἐπιτείνωμαι, to be heightened; an increase of the paroxysm of a fever. *Hippocrat. Prorrhhet.* l. 2; *Cel. Aurelian. de Morb. Chron.* l. 4, c. 3; *Gorr. Def. Med.*; *Foes. Œconom. Hippocrat.*

EPI TASIS (*Rhet.*) that part of an oration in which the orator addresses himself most forcibly to the passions. *Dionys. Jud. in Isocr.* c. 13; *Longin.* c. 38; *Alexand. περί σκημ;* *Æl. Herod.* tom. ii. p. 90.

EPI THALAM'UM (*Ant.*) ἐπιθαλάμιον, a nuptial song, or a song sung at weddings. *Poll. Onom.* l. 4, segm. 53.

EPI THE'L'UM (*Med.*) the cuticle on the red part of the lips.

EPI THE'MA (*Med.*) ἐπιθήμα, a lotion, or any external application. *Gal. Com. in Hippoc.* l. 7, aphor. 55; *Oribas. Synop.* l. 3; *Æl. Tetrab.* 3, serm. 1, c. 50, &c.

EPI THESIS (*Surg.*) ἐπίθεσις, the rectification of crooked limbs by means of instruments and machines.

EPI THET (*Rhet.*) ἐπίθετον, a word which is joined to another to qualify or explain its signification.

EPITHYMUM (*Bot.*) is the *Cascuta epithymum* of Linnaeus.

EPITIME/SIS (*Rhet.*) ἐπιτίμησις, a figure in rhetoric, by which a rebuke or reproach is conveyed. *Aristot. Poet.* c. 26; *Tiber. Rhetor.* e. 4; *Hermog. περὶ δεινότη.*; *Rufin.* fig. 21; *Alexand. περὶ σχήμα.*; *Ulp. ad Demosth. Olynth.* 1, p. 6.

EPITOME (*Rhet.*) ἐπιτομή, an abridgement, abstract, or short draught of a book.

EPITRITE (*Poet.*) ἐπιτριτός, a foot consisting of four syllables, one of which is short and the rest long ---, as Aristidēs. *Hæphest. Enchirid.*

EPITRITOS (*Arith.*) a proportion containing some number, and the third part added; thus, eight is an epitrite number in regard to six, for two, which is added to six to make the number eight, is the third of six. *Vitruv.* l. 3, c. 1; *Bald. Lex Vitruv.*

EPITROCHA'SMUS (*Rhet.*) ἐπιτροχασμός, a figure in rhetoric wherein we hastily run over several things. *Hermog. περὶ ιδ.* l. 1, *apud Ald. Rhet.* p. 150.

EPITROPE (*Rhet.*) ἐπιτροπή, a figure in rhetoric, in which the orator grants what he may freely deny in order to obtain what he demands. *Quintil.* l. 9, e. 3; *Rutil. Lup.* l. 2, c. 16.

EPIZEUXIS (*Rhet.*) the same as *Anadiplosis*.

EPIZYGIS (*Mech.*) ἐπιζυγίς, the hole wherein the nut of a steel-bow lies. *Vitruv.* l. 10, e. 16; *Turneb. Adv.* l. 2, e. 5.

EPOCHÆ (*Ant.*) ἐποχῆ, a term signifying literally stops, was applied to those resting points or dates from which many of the Grecian cities commenced their computations of time. Some of them dated their Epochs from the building of their cities; but the greater part of those whose epochas are numbered on their coins or medals are reckoned from the restoration of their liberty by the Romans, the remission of their tributes by the emperors, the gaining an independent government, or the liberty of being governed by their own magistrates and laws, &c. *Vail. Num. Græc.*

EPODE (*Med.*) ἐποδὴ, a method of curing diseases by incantations.

EPODE (*Mus.*) ἐπωδός, the name given to the third stanza of the Greek ode. [vide *Ode*]

EPODES (*Ich.*) ἐπόδες, a kind of fish. *Plin.* l. 32, c. 11.

EPO'MIS (*Anat.*) ἐπωμίς, from ἐπὶ and ὤμος, the shoulder; the upper part of the shoulder. *Ruff. Ephes. de Appell. Part. Corp. hum.* l. 1, c. 9; *Gal. Comm. 1 in Hippocrat. de Art.*

EPO'MIS (*Archæol.*) a hood such as graduates, and liverymen, used to wear.

EPOMPHALION (*Med.*) ἐπομφάλιον, from ἐπὶ and ἐμφάλις, the navel; a medicine which purges by being applied to the navel. *Aet. Tetrab.* 1, serm. 3, c. 135; *Paul. Æginet.* l. 7, c. 9.

EPROUVE'TTE (*Gunn.*) a machine for showing the strength and quality of gunpowder.

EP'SOM salts (*Med.*) a purging salt formerly procured by boiling down the mineral water of the spring at Epsom; but now prepared from sea-water. They are in the form of crystals, and consist chiefly of sulphate of magnesia.

EPULARES (*Ant.*) were those who took part in a religious rite, which was celebrated at night, when they fasted together. *Fest. de Verb. Signif.*

EPULIS (*Med.*) ἐπυλίς, from ἐπὶ and ἔλλα, the gums; a sort of tubercle growing on the gums. *Gal. Introd.*; *Oribas. de Loc. Affect. Curat.* l. 4, e. 66; *Aet. Tetrab.* 4, serm. 2, c. 50; *Paul. Æginet.* l. 6, c. 27.

EPULO'NES (*Ant.*) the three public officers in the time of Julius Cæsar, whose duty it was to conduct the banquets in honour of Jupiter, and the rest of the Gods, at their public sports. *Cic. de Orat.* l. 3, e. 19; *Liv.* l. 33, c. 42; *Fest. de Signif. Verb.*; *Aul. Gell.* l. 1, c. 12.

EPULO'TICS (*Med.*) ἐπυλοτικά, from ἐλλή, a cicatrix; topical medicines applied to wounds or ulcers for drying up superfluous humidity, and repressing fungous flesh. *Gal. de Simpl. Med. Fac.* l. 5, e. 15, 16; *Gorr. Def. Med.*

EQUABLE (*Phy.*) an epithet for motion, eelerity, velocity, &c. which is uniform, or without alteration, by which equal spaces are passed over in equal times; whence also *equably*, *accelerated*, or *retarded*, when motion is increased or decreased in equal quantities or degrees in equal times.

EQUAL (*Math.*) an epithet expressing the relation between things that agree in kind, magnitude, quantity, or quality; as *equal circles*, those which have their diameters equal; *equal angles*, whose sides are equally inclined; *equal lines*, lines of the same length; *equal plane figures*, whose areas are equal; *equal solids*, that are of the same space, capacity, or solid content; *equal curvatures*, that have equal radii of curvatures; *equal geometrical ratios*, those whose least terms are similar to some aliquot or aliquant parts of the greater; *equal arithmetical ratios*, those wherein the difference of the two less terms is equal to the difference of the greater.

EQUAL (*Opt.*) an epithet for things seen under the same angle.

EQUALITY (*Math.*) the exact agreement of two things in respect to their quantity. [vide *Equal*]

EQUALITY (*Algeb.*) the comparison between two quantities which are really or effectually equal. The sign of equality, which was introduced by Recorde, and which is now in universal use, consists of two parallel lines, as =; thus, $a - x = d$. [vide *Algebra*] — *Ratio*, or *proportion of Equality*. [vide *Æqualitas*]

EQUALITY, circle of (*Astron.*) vide *Equant*.

EQUANT (*Astron.*) a circle formerly conceived by astronomers to be in the plane of the deferent or eccentric, for regulating certain motions of the planets, and reducing them more easily to a calculus: but, in modern astronomy, this circle is not employed.

EQUATED anomaly (*Astron.*) vide *Anomaly*.

EQUATED bodies (*Math.*) a name on Gunter's Scale for two lines which relate to the comparison of the sphere and the regular bodies.

EQUATION (*Algeb.*) any expression in which two quantities differently represented are put equal to each other by means of the sign of equality, as $7ax + 3x = b$. The quantities composing the equation are called the *terms of the equation*; the terms on each side the sign of equality compose the *sides* of the equation; the *root* is the value of the unknown quantity. *Equations* are, in respect to their construction, *simple*, *affected* or *compound*, *quadratic*, *cubic*, *biquadratic*, *binomial*, *determinate*, *reciprocal*, *transcendental*, *exponential*, &c. [vide *Simple*, &c. and *Algebra*] The operations with equations are *Generation*, *Reduction*, *Solution* or *Resolution*, *Depression*, *Extermination*, *Elimination*, *Transformation*, and *Construction*. [vide *Generation*, &c. and *Algebra*]

EQUATION of payments (*Arith.*) the finding a time, when, if a sum be paid, which is equal to the sum of several others due at different times, no loss will be sustained by either party; according to the rule commonly given, this is found, if each payment be multiplied by the time at which it is due, and then the sum of the products be divided by the sum of the payments for the equatie time.

EQUATION (*Astron.*) a term used to express the correction, i. e. the quantity added to, or subtracted from, the mean position of a heavenly body to obtain the true position: the term may likewise be applied to the correction that arises from any erroneous supposition whatever.—*Equation of the centre* is that which is otherwise called *prosthapheresis*.—*Equation of time* is the difference between mean

- and apparent time, or the reduction of the apparent unequal time or motion of the sun, or a planet, to equal and mean time or motion.—*Equation to corresponding altitudes* is a correction which must be applied to the apparent time of noon in order to ascertain the true time.
- EQUATOR** (*Astron.*) a great circle which is described on the terrestrial sphere, and equidistant from the poles of the world. It is called the Equator because, when the sun is in this circle, the days and nights are equal all over the world; whence it is also called the *Equinoctial*, *Equinoctial line*, and, among mariners, simply the *line*.
- EQUATORIAL** (*Astron.*) or *Portable Observatory*, an instrument which serves for the solution of most problems in practical astronomy.
- EQUERRY** (*Polit.*) an officer who has the care and management of the horses of a king, or any prince.
- EQUES** (*Her.*) a horseman, or man at arms.—*Equus auratus*, or simply *equus*, a knight so called because he was allowed to wear gilt spurs.
- EQUESTRIA** (*Ant.*) seats in the theatre for those of the Equestrian order at Rome. *Senec. de Benef.* l. 7, c. 12; *Suet. Cal.* c. 26; *Turneb. Adv.* l. 4, c. 19, &c.
- EQUIANGULAR** (*Geom.*) an epithet for any figures that have equal angles, as *equiangular triangles*, &c.
- EQUICRURAL** (*Geom.*) an epithet for a triangle that has two of its sides equal.
- EQUIDIFFERENT** (*Math.*) an epithet for such things as have equal differences, or are arithmetically proportional.
- EQUILATERAL** (*Geom.*) an epithet for any figure that has all its sides equal. An *equilateral Hyperbola* is that which has the two axes equal to each other, and every pair of conjugate diameters equal to each other.
- EQUILIBRIUM** (*Mech.*) an equality of weight or poise. The two ends of a balance are said to be *in equilibrio* when they hang exactly even, neither of them ascending or descending.
- EQUIMULTIPLE** (*Geom.*) ἰσάμεις πολλαπλάσιον, any number or quantity which may be multiplied by the same number, as $3a$ and $3b$, which are equimultiples of a and b . *Euc. Elem. Def.* l. 5.
- EQUINOCTIAL** (*Astron.*) *æquinotialis*, a name for the great circle of the sphere on the celestial globe, which corresponds to the equator on the terrestrial globe. *Equinoctial* is also an epithet for whatever belongs to the equinoctial; as the—*Equinoctial Points*, the two points, Aries and Libra, where the Equinoctial and Ecliptic cross each other.—*Equinoctial Colure*, the great circle passing through the Poles of the World, and the Equinoctial points.—*Equinoctial Dial*, one whose plane is parallel to the equinoctial.
- EQUINOXES** (*Astron.*) the times wherein the sun enters the first points of Aries and Libra, so called from *æquus*, equal, and *nox*, night, because the days and nights are equal at those times. The equinox is called *vernal* when it falls in the spring, about the 21st of March; and *autumnal* when it falls in autumn, about the 21st of September.
- EQUINUS barbatus** (*Astron.*) a kind of comet. [vide *Hippeus*]
- EQUIPAGE** (*Cus.*) in French *equipage*, the provision of all things necessary for a voyage or journey; as attire, furniture, horses, attendance, &c. It is frequently used for a coach and a number of footmen.
- EQUIPAGE** (*Mil.*) all kinds of furniture which are made use of by an army; *Camp-Equipage*, or *Field-Equipage*, comprehends tents, kitchen furniture, saddle-horses, baggage-waggons, &c.
- EQUIPOLLENCE** (*Log.*) from the Latin *æquipollentia*, which signifies equal force or value; a term applied to two or more propositions which signifies one and the same thing, though expressed after a different manner; as "Some man is learned," and "Not every man is learned," which are equipollent propositions.
- EQUIRIA** (*Ant.*) games which consisted in horse-racing, that were instituted by Romulus in honour of Mars, and were celebrated on the third of the Calends of Mars, i. e. the 27th of February. *Ovid. Fast.* l. 2, v. 857.
- Jamque duæ restant noctes de mense secundo,
Marsque citos junctis curribus urget equos.
Ex vero positum permansit Equiria nomen,
Quæ deus in campo prospicit ipsa suo.*
- Varr. de Lat. Ling.* l. 5, c. 3; *Marlian. Topograph. Urb. Rom. &c. apud Græv. Ant. Rom.* tom. 3, &c.
- EQUISETUM** (*Bot.*) ἰππις, Horse-tail; a plant so called from the resemblance which it bears to a horse's tail. It is generally admitted to be very vulnerary and astringent. *Aet. Tetrab.* 1, serm. 1.
- EQUISETUM**, in the *Linnean system*, a genus of plants, Class 24, *Cryptogamia*, Order 1 *Felices*. Natural order of ferns. *Species.* The species are perennials, as the—*Equisetum sylvaticum*, seu *Hippuris*, Wood Horse-Tail.—*Equisetum arvense*, Corn Horse-Tail.—*Equisetum palustre*, Marsh Horse-Tail.—*Equisetum fluviale*, River Horse-Tail.—*Equisetum giganteum*, Giant Horse-Tail, &c.
- EQUISETUM** is also the *Ceratophyllum dimersa* of Linnæus.
- EQUITANGENTIAL curve** (*Geom.*) a curve so denominated because the tangent of it is always equal to a constant line.
- EQUITANT** (*Bot.*) a term used in the foliation of plants; *folia equitantia*, leaves that ride, as it were, over one another, i. e. when the inner leaves of a bud are inclosed by the outer ones.
- EQUITATURA** (*Archæol.*) the liberty of riding on horseback; also of carrying grist, &c. from the mill on horseback.
- EQUITY** (*Law*) the correction of the Common Law in cases wherein it is deficient.—*Court of Equity*, a title given, by way of distinction, to the Court of Chancery, because the rigour of the Common Law, and the severity of other courts, is there moderated.
- EQUIVENTER** (*Anat.*) vide *Venter*.
- EQUIVOCAL** (*Log.*) an epithet for words which have a double meaning, and may be applied equally to both.
- EQUIVOCAL generation** (*Nat.*) a term formerly applied to the generation of plants without seeds, and of animals without any sexual intercourse, which is now believed never to happen; but that all bodies are univocally produced.
- EQUIVOCAL signs** (*Surg.*) certain accidents, or signs of the fracture of the skull, which confirm other signs called *universal*.
- EQUULEUS** (*Astron.*) *Equiculus*, or *Equus Minor*, one of the 48 old constellations, having, according to Ptolemy, only four stars, according to Tycho four, to Hevelius six, Flamstead. It is called by Proclus προτομή τῆς ἵππου, a section of the horse. *Ptol. Almag.* l. 7, c. 5; *Procl. de Sphær.*
- EQUUS** (*Zool.*) a genus of animals of the Class *Mammalia*, Order *Belluæ*.
- Generic Character.* Foreteeth, upper six, erect; lower six, more prominent; tusks solitary, included; teats two, inguinal.
- Species.* This tribe of animals comprehends the domestic quadrupeds well known by the names of the Horse, the Ass, and the Mule.
- EQUUS coopertus** (*Archæol.*) a horse set out with a saddle, and other furniture.
- EQUUS Major** (*Astron.*) vide *Pegasus*.—*Equus Minor*. [vide *Equuleus*]
- ERACLISSA** (*Bot.*) the *Adrachne telephoides* of Linnæus.
- ERAGROSTIS** (*Bot.*) the *Briza eragrostis* of Linnæus.

ERADICATED (*Her.*) an epithet for a tree or plant torn up by the root, as in the annexed figure. "He beareth *gules* the trunk of a tree eradicated and couped in *pale*, sprouting out two branches *argent*, name Borough."

ERADICATIVES (*Med.*) medicines that work powerfully, and, as it were, root out the disorder.

ERANGELIA (*Bot.*) another name for the *Galanthus* of Linnæus.

ERANTHEMUM (*Bot.*) a genus of plants, Class 2 *Dianthia*, Order 1 *Monogynia*.

Generic Character. CAL. *perianth* five-cleft.—COR. *one-petalled*.—STAM. *filaments* two; *anthers* subovate.—PIST. *germ* ovate; *style* filiform; *stigma* simple.—PER. *none*; *seeds* none.

Species. The species are undershrubs, as the—*Eranthemum cayense*, *Ephemerum*, seu *Centaureum*.—*Eranthemum angustifolium Thymelæa*, seu *Valerianoides*, &c.

ERASED (*Her.*) an epithet for the head or limb of any creature violently torn from the body, so as to appear jagged, as in the annexed figure. He beareth "*Argent* a lion's head, erased *gules*, name Govis." When Boars', Bears', Wolves', Whales', and Otters' Heads are erased close to the head, it is termed *erased close*.

ERASTIANS (*Ecc.*) a sect of heretics, who maintained, among other things, that the right of excommunication belonged to the civil magistrate.

EREBINTHUS (*Bot.*) the same as *Cicer*.

ERECT (*Bot.*) *erectus*; an epithet for a stem, leaf, flower, anther, &c.; *erectus caulis*, a stem standing perpendicularly from the ground, in opposition to *volubilis*; *folium erectum* is a leaf which makes an angle with the stem, so acute as to be close to it; *flos erectus*, an erect flower, has its aperture directed upwards, as in *Trillium sessile*, opposed to the *nutans*, the nodding; *anthera erecta*, an anther fixed by one end to the top of the filament, in opposition to *incumbens*. This epithet is applied in the same sense to the petiole, peduncle, and stipule.

ERECT (*Her.*) an epithet for any thing upright, or perpendicularly elevated, as wings *erect*, &c.

to **ERECT** a figure (*Astrol.*) to divide the twelve houses of the heavens aright, putting down the signs, degrees, &c. in their right places, according to the position of the heavenly bodies at the moment of time that the scheme is erected.

ERECTIUSCULUS (*Bot.*) an epithet signifying nearly upright.

ERECTORRES (*Anat.*) an epithet for muscles of the *clitoris* and the *penis*. The *Erector Clitoridis* draws it downwards and backwards; the *Erector Penis* drives the urine and semen forwards.

ERGMOS (*Bot.*) ἐργμός, from ἐργνυμι, to break; an epithet for a bean that is decorticated.

ERESIA (*Bot.*) the *Theophrasta americana* of Linnæus.

ERETHISMOS (*Med.*) ἐρεθισμός from ἐρεθίζω, to excite; increased sensibility and irritability. *Hippoc. de Rat. Vict. in Morb. Acut. et Gal. Comm. 2*; *Foes. Econom. Hippocrat.*

ERETRIA terra (*Med.*) ἐρετριᾶς γῆς, Eretrian earth, the best sort of which is ash-coloured. It is reckoned astringent and refrigerating. *Hippocrat. de Morb. 1. 3*; *Dioscor. 1. 5, c. 171*; *Plin. 1. 35, c. 6*; *Gal. de Simpl. 1. 9*; *Oribas. Med. Coll. 1. 15*; *Gorr. Def. Med.*; *Foes. Econom. Hippocrat.*

EREU'MENA (*Med.*) ἐρεύμενα; an epithet for urine that looks cloudy. *Hippocrat. Coac.*

ERGA'SIMA (*Med.*) ἐργασίμη, a bad sort of myrrh. *Dioscor. 1. 1, c. 77*; *Oribas. Med. Coll. 1. 12.*

ERGASTE'RIMUM (*Chem.*) ἐργαστήριον, from ἐργάζομαι, to

work; a laboratory, or that part of a furnace in which is contained the matter to be acted upon.

ERGA'STULUM (*Ant.*) ἐργαστήριον διαμικτῆρον, from ἐργάζομαι, a house of correction; a bridewell, which Juvenal calls a rustic prison.

Juv. 1. 14, v. 24.

Quem mire efficiunt inscripta ergastula, carcer Rusticus?

Liv. 1. 7, c. 4; *Plin. 1. 18, c. 6*; *Plut. in Grach.*; *Salmas. Spart. in Hadrian. 1. 18.*

ERGOT (*Vet.*) a stub, like a piece of soft horn, about the size of a chesnut, placed behind and below the pastern joint of a horse, which is commonly under the tufts of the fetlock.

ER'IACH (*Law*) a recompense or compensation for the murder of a person made, by the Brehon law in Ireland, to the relations of the deceased.

ER'ICA (*Bot.*) ἑρική, a plant very similar to the tamarisk-tree, which is much liked by bees. A fomentation of the flowers is good against the bites of serpents. *Dioscor. 1. 1, c. 119*; *Plin. 1. 11, c. 16*; *Gal. de Simpl. 1. 6*; *Oribas. Med. Coll. 1. 11*; *Paul. Æginet. 1. 7, c. 3.*

ERICA, in the *Linnean system*, a genus of plants, Class 8 *Octandria*, Order 1 *Monogynia*.

Generic Character. CAL. *perianth* four-leaved.—COR. *one-petalled*.—STAM. *filaments* eight; *anthers* two-cleft.—PIST. *germ* roundish; *style* filiform; *stigma* crowned.—PER. *capsule* roundish; *seeds* numerous.

Species. The species are undershrubs, as the—*Erica vulgaris*, Common Heath.—*Erica lutea*, Yellow Heath, native of the Cape of Good Hope.—*Erica halicacaba*, Purple-stalked Heath, native of the Cape of Good Hope.—*Erica Monsoniana*, Bladder-flowered Heath, native of the Cape.—*Erica arborea*, Tree Heath, native of the Cape.

ERICA is also the name of the *Andromeda dabocia*, and the *Frankenia laevis*.

ERICÆFORMIS (*Bot.*) the *Diosma ericoides*.

ERICÆUS (*Nat.*) ἑρικῆος, a kind of honey collected from the Erica. *Dioscor. 1. 1, c. 117*; *Plin. 1. 11, c. 16.*

ERICERUM (*Med.*) ἑρικῆρον, the name of several collyria. *Act. Tetrab. 2. serm. 3, c. 102.*

ERICEUS (*Ant.*) a warlike instrument, full of sharp-pointed nails, resembling a portcullis. *Cæs. Bell. Gall. 1. 3, c. 67*; *Turneb. Adv. 1. 4, c. 8.*

ERICOIDES (*Bot.*) a species of the *Elatine*.

ERICOILA (*Bot.*) the *Gentiana verna* of Linnæus.

ERICU (*Bot.*) the *Asclepias Gigantia* of Linnæus.

ERIDANUS (*Astron.*) Ἡριδανός, or ποταμός, one of the 48 old constellations in the southern hemisphere, in which Ptolemy reckons 34 stars, Tycho 10, and the British Catalogue 84. The principal star of the first magnitude at the extremity of the river is *Achernar*. *Erat. Phænom.*; *Eratosthen. Charact.*; *Ptol. Almag. 1. 7, c. 5*; *Ricciol. Almag. nov. 1. 6, c. 5.*

ERIGERON (*Bot.*) vide *Erigeron*.

ERIGERON, in the *Linnean system*, a genus of plants, Class 19 *Syngenesia*, Order 2 *Polygamia Superflua*.

Generic Character. CAL. *common* oblong.—COR. *compound* rayed.—STAM. *filaments* five; *anthers* cylindrical.—PIST. *germ* small; *style* filiform; *stigmas* two.—PER. *none*; *seeds* oblong.

Species. The species are perennials and annuals: of the first kind the following are the principal, as the—*Erigeron viscosum*, seu *Conyza*, Clammy Erigeron, native of Portugal.—*Erigeron glutinosum*, Glutinous Erigeron.—*Erigeron philadelphium*, Spreading Erigeron.—*Erigeron purpureum*, Purple Erigeron. Of the second kind the following are the principal—*Erigeron graveolens*, Strong-smelling Erigeron.—*Erigeron siculum*, Red-stalked Eri-

geron.—*Erigeron carolinianum*, Carolina Erigeron.—*Erigeron canadense*, Canadian Erigeron, native of North America.

ERIGERON is also the *Conyza Aegyptiaca*.

ERIGERUM (Bot.) ἔριγγον, a plant called by the Latins *Senecio*, because, ἔριγγος, it grows old, ἔρι, very soon. It was reckoned vulnerary. *Theophrast. Hist. Plant.* l. 7, c. 8; *Dioscor.* l. 4, c. 98; *Oribas. Med. Coll.* l. 11; *Aet. Tetrab.* l. 1, serm. 1; *Paul. Aeginet.* l. 7, c. 3.

ERIGERUM, in the *Linnean system*, is the *Senecio vulgaris*.

ERINA'CEA (Bot.) another name for the *Anthyllis* of Linnæus.

ERINA'CEUS (Bot.) another name for the *Hydnum* of Linnæus.

ERINACEUS (Zool.) another name for the *Urchin*.

ERINACEUS, in the *Linnean system*, a genus of animals of the Class *Mammalia*, Order *Feræ*.

Generic Character. Foreteeth, upper, two, distant; lower, two, approximate; tusks, upper, five; lower, three; grinders, four on each side in each jaw; back and sides covered with spines.

Species. This animal is well known by the name of the Hedge-Hog. [vide *Hedge-Hog*]

ERINGO (Bot.) the *Eryngium* of Linnæus.

ERINUS (Bot.) ἔρινος, or ἔρινος, a plant, the leaves of which resemble those of the *Ocymum*. It grows near fountains and rivers, and, mixed with sulphur, was used to relieve pains in the ears. *Theophrast. Hist. Plant.* l. 3, c. 6; *Nicand. in Theriac.*; *Dioscor.* l. 4, c. 29; *Plin.* l. 23, c. 7; *Oribas. Med. Coll.* l. 11; *Paul. Aegin.* l. 7, c. 3.

ERINUS, in the *Linnean system*, a genus of plants, Class 14 *Didymia*, Order 2 *Angiosperma*.

Generic Character. CAL. perianth five-leaved.—COR. one-petalled.—STAM. filaments four; anthers small.—PIST. germ ovate; style very short; stigma headed.—PER. capsule ovate; seeds small.

Species. The species are perennials and annuals: the following are the principal perennials, namely, the—*Erinus alpinus*, seu *aquaticus*, Alpine Erinus, native of the Alps.—*Erinus Africanus*, seu *Buchnera*, native of Africa.—*Erinus capensis*, native of the Cape of Good Hope.—*Erinus frutescens*. The following are the principal annuals, namely, the—*Erinus fragrans*, seu *Selago*, native of the Cape of Good Hope.—*Erinus peruvianus*, seu *Lychnidca*, native of Peru.

ERINUS is also the *Campanula erinus*.

ERIOCAULON (Bot.) a genus of plants, Class 3 *Triandria*, Order 3 *Trigynia*.

Generic Character. CAL. perianth common.—COR. universal convex.—STAM. filaments three; anthers oblong.—PIST. germ slender; styles three; stigmas simple.—PER. none; seeds solitary.

Species. The species are annuals, as the—*Eriocaulon setaceum*, *Randabia*, seu *Grameu Eriocaulon quadrangulare*, native of Cochinchina, &c.

ERIOCEPHALUS (Bot.) a genus of plants, Class 19 *Syngenesia*, Order 4 *Polygamia Necessaria*.

Generic Character. CAL. common upright.—COR. compound rayed.—STAM. filaments five; anthers cylindrical.—PIST. germ small; style simple; stigma sharp.—PER. none; seeds in the females, solitary.

Species. The species are shrubs, as the—*Eriocephalus Africanus*, seu *Abrotanum*, Cluster-leaved Eriocephalus, native of the Cape.—*Eriocephalus racemosus*, Silvery-leaved Eriocephalus.

ERIOPHORUS (Bot.) ἔριόφωρος, a sort of bulb mentioned by *Theophrastus*, l. 7, c. 13.

ERIOPHORUS, in the *Linnean system*, is the *Bombax petandrium*.

ERIOPHORUM (Bot.) a genus of plants, Class 3 *Triandria*, Order 1 *Monogynia*,

Generic Character. CAL. spike on all sides imbricate.—COR. none.—STAM. filaments three; anthers oblong.—PIST. germ small; style filiform; stigmas three.—PER. none; seeds acuminate.

Species. The species are perennials, as the—*Eriophorum vaginalum*, *Zinagrostis*, *Juncus*, seu *Gramen*, Mountain or Single-spiked Cotton-Grass, native of Europe.—*Eriophorum polystachion*, seu *Gnaphalium*, Many-spiked Cotton-Grass.—*Eriophorum angustifolium*, Narrow-leaved Cotton-Grass.

ERIO'PILA (Bot.) the *Duroia eriopila* of Linnæus.

ERISITHALES (Bot.) the *Cnicus erisithales* of Linnæus.

ERISMA (Archit.) ἔρισμα, an arch-buttress, or shore-prop. *Vitruv.* l. 6, c. 11; *Philand. in Vitruv.*; *Salmas. in Solin.* p. 1216.

ERITHA'CE (Nat.) ἐριθάκη, a kind of wax, honey, or red juice in the honey-combs. *Arist.* l. 5, c. 22; *Varr. de Re Rust.* l. 3, c. 16; *Plin.* l. 11, c. 7.

ERITHALIS (Bot.) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.

Generic Character. CAL. perianth one-leaved.—COR. one-petalled.—STAM. filaments five; anthers oblong.—PIST. germ inferior; style filiform; stigma sharp.—PER. berry globose; seeds small.

Species. The species are trees, as the—*Erithalis fruticosa*, seu *Iambicus*, native of Jamaica.—*Erithalis polygamia*, seu *Timoneus*, native of the Society Isles.

ERITHRÆ' (Bot.) the *Gentiana Centaureum* of Linnæus.

ER'IX (Anat.) ἐρίξ, the superior part of the liver.

ER'MINE (Her.) one of the two furs used in coat-armour, which is composed of two or more tinctures, and is supposed to represent the linings and doublings of mantles and robes, the ermine being so called from the skin of the little beast which bears that name. Ermine is represented by a white field powdered or semé with black spots. When the ground is black, and the spots white, it is called *ermine*, &c. [vide *Heraldry*]

ERMINE (Zool.) the *Mustela erminca* of Linnæus, a little animal about the size of a squirrel, which is well known for its valuable fur, and is supposed to derive its name from Armenia, where it was found in the greatest numbers. In Northern climates this animal is white all over, except the tip of the tail, which is black. It lives on the banks of rivers, and in hollow trees, and preys on mice and other small animals. Ermine is also the name of the fur of the ermine.

ERMINE'E (Her.) or a *cross-ermine*, is a cross composed of four ermine spots placed crosswise, as in the annexed figure.

ERMINITES (Her.) is a kind of ermine in which the field is white, and the spots are red and black.

ERMINOIS (Her.) an epithet for a sort of ermine in which the field is or with black spots.

ERMINES (Her.) a sort of ermine in which the field is black with white spots.

ERNES (Archæol.) the loose scattered ears of corn which are gleaned from the field, so called from the German *ernden*, to reap.

ERNO'DEA (Bot.) a genus of plants, Class 4 *Tetrandria*, Order 1 *Monogynia*.

Generic Character. CAL. perianth four-parted.—COR. one-petalled.—STAM. filaments four; anthers erect.—PIST. germ inferior; style filiform; stigma obtuse.—PER. berry roundish; seeds solitary.

Species. The single species is the *Ernodia littoralis*, *Knoxia*, seu *Hymelæa*, native of Jamaica.

ERODENTIA (Med.) ἑροδέντια, *Erosiva Medicamenta*, eroding or corroding medicines, *Hippocrat. Epid.* l. 4;

- Cels. Gal. de Comp. Med. sec. Loc. l. 4, c. 1; Act. Tetrab. 4, serm. 2, c. 52; Paul. Æginet. l. 4, c. 34.*
- ERODI'NIUM** (*Med.*) a prognostic.
- ERODIUM** (*Orn.*) ἐράδιος, a bird of the hawk tribe, so called because in time of treading, ἔαγ ἰδοῖ, it sweats blood. *Suidas.*
- ERODIUM**, in the *Linnean system*, a genus of plants, Class 16 *Monadelphia*, Order 2 *Pentandria*.
- Generic Character.* CAL. perianth five-leaved.—COR. petals five.—STAM. filaments five; anthers oblong.—PIST. germ five-cornered; style awlshaped; stigmas five; seed solitary.
- Species.* The species are perennials and annuals: the following are the principal perennials, as the—*Erodium Romanum*, seu *Geranium*, Roman Crane's bill, native of Italy.—*Erodium incarnatum*, Flesh-coloured Crane's bill.—*Erodium absinthoides*, Wormwood-leaved Crane's bill.—*Erodium chrysanthemum*, Golden-flowered Crane's bill. The following are the principal annuals, as the—*Erodium cicutarium*, Hemlock-leaved Crane's bill.—*Erodium moschatum*, Musk Crane's bill.—*Erodium grunium*, Broad-leaved Annual Crane's bill. *Bauh. Hist.; Bauh. Pin.; Park. Theat.; Raii Hist.; Tourn. Inst.*
- ERODIUS** (*Ent.*) a genus of insects of the coleopterous order, having the antennæ moniliform; feelers 4 filiform; body roundish; thorax transverse; shells closely united; jaw horny, bifid.
- EROMA'NIA** (*Med.*) ἐρομανία, from ἔρος, love, and μανία, madness; melancholy madness occasioned by love.
- EROSUS** (*Bot.*) gnawed, an epithet for a leaf; *folium erosum*, a leaf having obtuse sinuses on its edge that give it the appearance of having been gnawed, or eaten by insects.
- EROSION** (*Med.*) the same as ulceration.
- EROTIC** (*Lit.*) an epithet equivalent to amatory.
- EROTE'MA** (*Rhet.*) ἐρώτημα, interrogatio; a figure of speech which consists in putting questions, in order to aggravate the adverse ease. *Cic. de Orat. l. 3, c. 52; Quintil. l. 9, c. 2.*
- EROTE'UM** (*Bot.*) a genus of plants, Class 13 *Polyandria*, Order 1 *Monogynia*.
- Generic Character.* CAL. perianth five-leaved.—COR. petals five.—STAM. filaments numerous; anthers roundish.—PIST. germ ovate; style erect; stigma obtuse.—PER. berry roundish; seeds oblong.
- Species.* The two species are the *Eroteum theoides* et *undulatum*, natives of Jamaica.
- EROTION** (*Bot.*) the *Apiastrum*.
- ERO'TYLOS** (*Min.*) a precious stone like a flint used in divination. *Plin. l. 37, c. 10.*
- ERO'TYLUS** (*Ent.*) the name given by Fabricius to a division of the genus *Cryptocephalus*, comprehending those insects which have their feelers unequal, and the fore ones hatchet-shaped.
- ERRANT** (*Law*) an epithet applied to justices who go the circuit; also to bailiffs travelling at large.
- ERRANT** (*Her.*) an epithet for knights who were formerly supposed to wander in search of adventures.
- ERRA'TA** (*Print.*) a list of typographical errors which have escaped correction at press.
- ERRA'TIC** (*Astron.*) i. e. wanderers; an epithet for the planets, as distinguished from the fixed stars.
- ERRA'TICUM** (*Archæol.*) a waif or stray beast.
- ERRA'TUM** (*Print.*) a single error left in a work after it is printed.
- ERRHINA** (*Med.*) ἔρρινα, from ῥίρ, the nose; medicines which, when snuffed up the nose, promote a discharge of mucus. *Gal. de Simpl. l. 7; Trallian. l. 1, c. 11; Paul. Æginet. l. 3, c. 5; Act. de Meth. Med. l. 3, c. 6; Nyrep. sect. 15.*

ERRIPSIS (*Med.*) ἔρριψις, from ἔρριπαι, to precipitate; a sinking in the strength of the whole body, or of any particular part. *Hippocrat. de Humor. l. 1, & Gal. Comm. 24; Erot. Lex. Hippocrat.; Gorr. Def. Med.; Foes. Econom. Hippocrat.*

ERROR (*Law*) a fault in pleading, or in the process, whence the writ brought for the remedy of this oversight is termed a writ of error.—*Writ of error*, a writ which lies to redress a false judgment in any court of record.—*Clerk of the errors*, a clerk whose business it is to copy out the tenor of the records of a cause upon which a writ of error is brought.

ERROR Locī (*Anat.*) a term introduced by Boerhaave to denote the deviation which he supposes to take place sometimes in the circulation of the different parts of the blood, as when the larger sized globules force themselves into the lesser vessels not destined for them. This idea is founded on the supposition that there are different-sized globules for the blood, lymph, and serum.

ERTHMIO'TUM (*Archæol.*) a meeting of the neighbourhood to settle differences among themselves. *Leg. Hen. 1, c. 57.*

ERUCA (*Ent.*) a name given to insects in the caterpillar state, now more commonly called the larva.

ERUEA (*Bot.*) the *Arabis canadensis* of Linnæus.

ERUCA'GO (*Bot.*) the *Bunias erucago* of Linnæus.

ERUCA'STRUM (*Bot.*) the *Brassica erucastrum* of Linnæus.

ERUCTA'TION (*Med.*) the discharge of wind from the stomach through the mouth.

ERU'PTION (*Med.*) an issuing or breaking forth in a morbid or preternatural manner, as spots, &c. on the skin.

ERVUM (*Bot.*) a genus of plants, Class 17 *Diadelphia*, Order 4 *Decandria*.

Generic Character. CAL. perianth five-parted.—COR. papilionaceous.—STAM. filaments rising; anthers simple.—PIST. germ oblong; style simple; stigmas obtuse.—PER. legume oblong; seeds four.

Species. The species are annuals, as the—*Ervum Lens*, seu *Lens*, Flat-seeded Tare, or common Lentil.—*Ervum tetraspermum*, seu *Vicia*, Smooth Tare.—*Ervum hirsutum*, seu *Cracca*, Hairy Tare.—*Ervum ervilla*, seu *Orobis*, native of France. *Dod. Pempt.; Bauh. Hist.; Bauh. Pin.; Park. Theat.; Raii Hist.; Tourn. Inst.*

ERUTHEMATA (*Med.*) from ἐρύθειν, to make red; red fiery pustules on the skin.

ERY'NGIUM (*Bot.*) ἔρυγγιον, a prickly plant of an aromatic taste. It is so called from ἐρύγω, to vomit, because when goats eat of it they were stupified, and stood perfectly still until they had vomited it up. *Aristot. Hist. Animal. l. 9, c. 4; Theoph. l. 6, c. 1; Dioscor. l. 3, c. 24; Plin. l. 22, c. 7, &c.; Plut. Sympos. l. 7, quest. 2; Schol. Nicand. in Theriac.; Gal. de Alim. Fac. l. 2, c. 39; Oribas. Med. Collect. l. 11.*

ERYNGIUM, in the *Linnean system*, a genus of plants, Class 5 *Pentandria*, Order 2 *Digynia*.

Generic Character. CAL. receptacle common.—COR. petals oblong.—STAM. filaments five; anthers oblong.—PIST. germ hispid; styles two; stigmas simple.—PER. fruit ovate; seeds oblong.

Species. The species are perennials, as the—*Eryngium aquaticum*, Marsh Eryngo, native of Virginia.—*Eryngium planum*, Flat-leaved Eryngo, native of Austria.—*Eryngium pusillum*, Dwarf Eryngo, native of Spain.—*Eryngium maritimum*, Sea-Holly; but the *Eryngium fœtidum*, Stinking Eryngium, and the *Eryngium tricuspidatum*, Trifid Eryngium, are biennials. *Dod. Pempt.; Bauh. Pin.; Bauh. Hist.; Ger. Herb.; Park. Theat.; Raii Hist.; Tourn. Inst.*

ERYNGIUM is also the *Atractylis cancellata*.

- ERYSIMI** *varietas* (Bot.) the *Sinapis lævigata* of Linnæus. —*Erysimo similis*, the *Turritis hirsuta*.
- ERYSIMUM** (Bot.) ἐρύσιμον, a plant so called from ἐρύω, to draw, because of its astringent virtue. It was reckoned an antidote against poison. *Theophrast. Hist. Plant.* l. 8, c. 7; *Dioscor.* l. 2, c. 188; *Plin.* l. 18, c. 10; *Gal. de Alim. Fac.* l. 1, c. 30; *Oribas. Med. Collect.* l. 11; *Act. Tetrab.* l. 1, serm. 1; *Paul. Æginet.* l. 7, c. 3.
- ERYSIMUM**, in the Linnean system, a genus of plants, Class 14 *Tetradynamia*, Order 2 *Siliquosa*.
Generic Character. CAL. perianth four-leaved.—COR. petals oblong.—STAM. filaments six; anthers simple.—PIST. germ linear; style short; stigma headed.—PER. silique oblong; seeds many.
- Species.* The species are mostly annuals, as the—*Erysimum officinale*, seu *Sisymbrium*, Common Hedge Mustard.—*Erysimum repandum*, Small-flowered Hedge Mustard.—*Erysimum cheiranthoides*, seu *Myagrimum*, Treacle Hedge Mustard; but the—*Erysimum barbara*, seu *Eruca*, Winter Hedge Mustard, is perennial, and the *Erysimum albaria*, Garlic Hedge Mustard, is a biennial. *Clus. Hist.*; *Dod. Pempt.*; *Bauh. Hist.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Bot.*; *Raii Hist.*
- ERYSIPELAS** (Med.) ἐρυσίπελας, a disorder in the skin, vulgarly called St. Anthony's Fire, which consists in a preternatural swelling, accompanied with redness, heat, and pain. The name is supposed by some to be derived from ἐρυθρός, red, and πῦρ, livid. *Hippocrat.* l. 5, aphor. 23; *Cels.* l. 5, c. 26; *Gal. Def. Med. &c.*; *Oribas. de Morb. Curat.* l. 3, c. 47; *Act. Tetrab.* 4, serm. 2, c. 59; *Paul. Æginet.* l. 4, c. 17; *Act. de Meth. Med.* l. 2, c. 12; *Gorr. Def. Med.*; *Foes. Æconom. Hippocrat.*
- ERYSIPELAS**, in Cullen's Nosology, is a genus of diseases, Class *Pyrexia*, Order *Exanthemata*.
- ERYSIPELATOIDES** (Med.) a humour resembling the Erysipelas.
- ERYSISCEPTRUM** (Bot.) a name for the *Aspalathus*.
- ERYTHEMA** (Med.) ἐρυθρῆμα, from ἐρυθρός, red; a morbid redness in the skin, as is observed to accompany a violent inflammatory fever.
- ERYTHRINA** (Bot.) a genus of plants, Class 17 *Diadelphia*, Order 4 *Decandria*.
Generic Character. CAL. perianth one-leaved.—COR. petals five.—STAM. filaments ten; anthers ten.—PIST. germ subulate; style the length of the stamens; stigma simple.—PER. legume long; seeds kidneyform.
- Species.* The species are trees, as the—*Erythrina herbacea*, seu *Corallodendron*, Herbaceous Coral-tree.—*Erythrina Corallodendron*, *Siliqua*, *Mouricou*, *Boa Erathrina*, seu *Gelala aquatica*, &c. *Bauh. Pin.*; *Tourn. Inst.*
- ERYTHRINA** is also the *Piscedia erythrina*.
- ERYTHRINUS** (Ich.) ἐρυθρίνος, a sea-fish all red but the belly, which is white; it is now called Rochet. *Apic.*
- ERYTHRION** (Med.) ἐρυθρίον, a malagina. *Paul. Æginet.* l. 7, c. 18.
- ERYTHROBULBUS** (Bot.) the *Wachendorsia paniculata* of Linnæus.
- ERYTHRODANUM** (Bot.) the plant now called Madder, which dyes use. It is so called from the redness of its root.
- ERYTHROEIDES** (Anat.) from ἐρυθρός, red, and εἶδος, likeness; an epithet for the innermost coat of the testes. *Ruff. Ephes. de Appell. Part. Corp. Hum.* l. 1, c. 32.
- ERYTHRONIUM** (Bot.) a species of *Satyrion*. *Dioscor.* l. 3, c. 144.
- ERYTHRONIUM**, in the Linnean system, a genus of plants, Class 6 *Hexandria*, Order 1 *Monogynia*.
Generic Character. CAL. none.—COR. petals six.—STAM. filaments six; anthers oblong.—PIST. germ turbinate; style simple.—PER. capsule globose; seeds ovate.

- Species.* The single species is a perennial, as the *Erythronium dens canis*, *Dens canis*, seu *Satyrion*.
- ERYTHROPYLON** (Bot.) a genus of plants, Class 10 *Decandria*, Order 3 *Trigynia*.
Generic Character. CAL. perianth one-leaved.—COR. petals five.—STAM. filaments ten; anthers heartshaped.—PIST. germ ovate; styles three; stigmas obtuse.—PER. drupe ovate; seed nut oblong.
- Species.* The species are shrubs, and natives of the West Indies, as the—*Erythroxylon areolatum*, seu *Carthagenense*.—*Erythroxylon havense*, &c. *Clus. Hist.*; *Dod. Pempt.*; *Bauh. Hist.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Bot.*; *Raii Hist.*; *Tourn. Inst.*
- ESAPHE** (Med.) ἰσαφή, from ἰσαθεῖω, to feel with the fingers; a term particularly applied to feeling the mouth of the uterus, so as to discover its state. *Hippocrat. de Mul.*
- ESBRANCATURA** (Archæol.) the cutting off branches or boughs in forests, &c.
- ESCALADE** (Mil.) a vigorous assault made upon a wall or rampart, by means of ladders, upon which the besiegers mount for the purpose of taking a place by storm.
- ESCALDARE** (Law) an ancient tenure in serjeanty.
- ESCALONIA** (Bot.) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.
Generic Character. CAL. one-leaved.—COR. petals five.—STAM. filaments five; anthers incumbent.—PIST. germ oblate; style upright; stigma capitate.—PER. berry roundish; seeds many.
- Species.* The species are shrubs, as—*Escallonia myrtilloides* et *seriata*, &c.
- ESCALLOP-SHELL** (Her.) a frequent bearing in the escutcheon, it having been the pilgrims' ensign in their expeditions to holy places, as in the annexed figure. "He beareth *argent*, on a bend *azure*, three escallop-shells or; name *Browne*."
- 
- ESCALMPIO** (Law) from *cambier*, to exchange; a licence granted to make over *Bills of Exchange* to another beyond sea. *Stat. 5, R. 2, c. 2*; *Reg. Orig.* 194.
- ESCAPATLI** (Bot.) a species of *Sena*.
- ESCAPE** (Law) a violent or privy evasion out of some lawful restraint; as where a man is arrested or imprisoned and gets away before he is delivered in due course of law. *Stauf. P. C. c. 26*, &c.
- ESCAPIO QUIETUS** (Law) he who is delivered from the punishment which, by the laws of the forest, lieth upon those whose beasts are found within the land where forbidden.
- ESCARBUNCLE** (Her.) the heraldic name for the precious stone called the Carbuncle, which is represented as in the annexed figure. "He beareth *argent* two bars *azure*, over all an escarbuncle of eight rays *gules*; pomettee and florette or."
- 
- ESCAUN** (Com.) a Dutch and Flemish silver coin, value sixpence sterling.
- ESCEPPA** (Archæol.) a scepp, or measure of corn. *Mon. Angl. tom. 1, p. 382*.
- ESCHANDERIA** (Archæol.) the chandry, or office where candles were repositied and delivered out for daily use.
- ESCHARA** (Med.) ἰσχάρα, an incrustation from an ulcer, according to Aretæus; or from a caustic medicine and a red hot iron, according to Celsus and Galen. *Arct. de Acut. Morb.* l. 1, c. 9; *Cels.* l. 6, c. 26; *Gal. de Simpl.* l. 1, c. 18; *Scrib. Larg. de Compos. Med.* c. 25; *Marcell.* c. 8.
- ESCHAROPEPA** (Med.) ἰσχαρόπεπα, coarse barley-meal, of which Hippocrates speaks. *Hippocrat. Epid.* l. 4.
- ESCHAROTICS** (Med.) ἰσχαρωτικά, from ἰσχαρώ, medicines which promote the incrustation of a wound or sore.

- ESCHARPE** (*Mil.*) French for the scarf which formerly served to distinguish the military from other persons.
- ESCHE'AT** (*Law*) in French *eschette*, from *escheoir*, or *eschevir*, to fall; any lands or profits that fall to a lord within his manor, either by forfeiture, the death of the tenant, &c.; also the name of a writ for the recovery of escheats, and of the circuit within which the King, or any other lord, has escheats of his tenants. *Flet.* 1. 6; 2 *Instit.* 36, &c.; *Hawk. P. C.* c. 49.
- ESCHE'ATOR** (*Law*) an officer formerly appointed by the Lord Treasurer, &c. in every county, to make inquests of titles by escheats. They are called, by Fitzherbert, officers of record; but having their chief dependance on the *court of wards*, which is done away by Act of Parliament, they are now almost entirely out of date. 14 *Ed.* 3, c. 8, &c.; 8 *H.* 8, c. 16, &c.; *F. N. B.* 100; 2 *Inst.* 206; 4 *Inst.* 225, &c.
- ESCHE'CCUM** (*Archæol.*) a jury or inquisition. *Matth. Par. Ann.* 1240.
- ESCHEVIN** (*Polit.*) a magistrate in France and Holland, very similar to our sheriff.
- ESCHYNOMENE** (*Bot.*) the *Mimosa pudica* of Linnæus.
- ESCLATTE'** (*Her.*) an epithet among the French for a bend, or any other ordinary that is as it were torn away.
- ESCLOPPE'** (*Her.*) an epithet among the French for a bend, that has an indenture or cut in it.
- ESCOPE'CHES** (*Mech.*) French for large pieces of wood used in scaffolding.
- ESCORT** (*Mil.*) a company of armed men attending upon any person or thing, by way of guard, or distinction.
- ESCORTA'TIO MORÆ** (*Archæol.*) the paring of the turf of moorish or sedgy ground for burning.
- ESCOT** (*Law*) vide *Scot*.
- ESCOUA'DE** (*Mil.*) a French term for the third part of a foot company, so divided for the more convenient mounting of guard.
- ESCRO'LL** (*Her.*) one of the exterior ornaments of the escutcheon, representing a slip of parchment or paper, on which is generally put the motto. [vide *Heraldry*]
- ESCRO'W** (*Law*) a deed delivered to a third person, to be the deed of the party making it, upon a future condition when a certain thing is performed, and then it is to be delivered to the party to whom it is made. *Co. Lit.* 31.
- ESCU'AGE** (*Law*) in French *escuage*, a kind of knight's service, called holding the shield, which was a sort of tenure that obliged the tenant to follow his lord to the wars at his own charge. *Escuage* was *uncertain* when it consisted of uncertain services, which the tenant was bound to perform according to circumstance; *certain* when the tenant was set at a certain sum of money to be paid in lieu of such services.
- ESCULENT** (*Bot.*) an epithet for plants, &c. that may be eaten.
- ESCULUS** (*Bot.*) the *Quercus esculus* of Linnæus.
- ESCU'TCHEON** (*Her.*) or *Shield*, is the representation of the ancient shields used in war, on which were borne the ensigns of the individual or his family. It serves now to contain the armorial bearings which are painted on its surface, called the field. [vide *Heraldry*]
- The *Escutcheon* is also one of the Honourable Ordinaries, which, according to Leigh, should contain the fifth part of the field. It is made to represent the shape of the outer escutcheon or shield, as in the annexed figure. "He beareth *ermine*, an escutcheon *gules*, by the name of *Hulgrave*."
- ESDRÆ ANTIDOTUS** (*Med.*) an antidote described by Paulus Ægineta, 1. 7, c. 2.
- E'SEBON** (*Chem.*) Common Salt.

- ESKETO'RES** (*Archæol.*) robbers or destroyers of other men's estates. *Plac. Parl.* 20, *Ed.* 1.
- ESKIPPESON** (*Archæol.*) shipping or passage by sea.
- ESKY-BAS** (*Mil.*) a Turkish soldier who carries the colours; in general he is the senior man in the company.
- ESLISORS** (*Law*) vide *Esllisors*.
- ESNECY** (*Law*) in French *aisnesse*, the right of choosing first in coparcenary, or a divided inheritance on the ground of priority of age.
- ESOCHE** (*Med.*) ἐσώχω, from ἐξίχω, to protuberate; a protuberance about the anus.
- ESOX** (*Ich.*) the Pike, a genus of fishes, of the abdominal Order, having a flat head, a large mouth, jaws toothed, body elongated, dorsal and anal fins very short.
- ESPADON** (*Mil.*) a kind of two-handed sword, having two edges of great length and breadth.
- ESPA'LIER** (*Hort.*) a sort of branching fruit trees that grow on a frame and spread laterally.
- ESPEALTA'RE** (*Archæol.*) the expeditating of dogs.
- ESPERVA'RIUS** (*Archæol.*) a Sparrow-hawk.
- ESPHLASIS** (*Med.*) ἐσφλασις, from ἐσφλάσσειν, an intropulsion, or recession of a part inwards from some external violence. *Hippocrat. de Vulnerib.*
- ESPIGURNA'TIA** (*Law*) the office of Spigurnel, or Sealer of the king's writs.
- ESPIONAGE** (*Mil.*) the act of obtaining and giving secret intelligence of what is passing in the camp or army, &c. of the enemy.
- ESPLANA'DE** (*Fort.*) a declivity or slope of earth commencing from the top of the counterscarp, and losing itself in the level of the campaign, which serves as a parapet for the counterscarp or covered way. The esplanade is now chiefly taken for the void space between the glacis of a citadel and the first houses of a town.
- ESPLEE'S** (*Law*) the full profit that ground yields, as the feeding of pastures, the hay of meadows, &c.; sometimes the word is applied to the lands themselves, as in *Plac. Parl.* 30 *Ed.* 1.
- ESPOU'SALS** (*Law*) a contract or mutual promise between a man and woman. Marriage is said to be an *espousal de presenti*. *Wood's Inst.* 57.
- ESPRE'SSIONE** (*Mus.*) Italian for expression, or that quality in a composition which consists in an appeal to the feelings.
- ESPRINGOLD** (*Mil.*) a warlike engine anciently used for the casting of great stones.
- ESPRIT DE CORPS** (*Mil.*) that species of attachment with which military men are particularly animated to the corps, company, or service, to which they belong.
- ESPRIT**, *Ordre d'* (*Her.*) vide *Holy Ghost*.
- ESQUIRE** (*Her.*) in French *escuyer*, in Italian *scudiero*, Spanish *escudero*, Latin *armiger*, signifies literally an armour-bearer; but has since been employed as a title of honour to the sons of Knights, and to those who serve the King in any worshipful calling, &c.
- ESSAI des armes à feu** (*Mil.*) French for proving fire-arms.
- ESSA'TUM** (*Med.*) the medicinal virtue which is in vegetables and minerals.
- ESSAY** (*Metal*) vide *Assay*.
- ESSAY hatch** (*Min.*) a little trench which miners dig when they are in search of ore.
- ESSAY of a Deer** (*Sport.*) the breast or brisket of a deer.
- ESSEDARI** (*Ant.*) a sort of gladiators who fought *Esseda*, in a chariot. *Cic. ad Fam.* 1. 7, ep. 6; *Petron. Fragm.* p. 8; *Senec. Epist.* 29; *Suet. Cal.* 35.
- ESSE'DUM** (*Ant.*) the chariot armed with scythes which was used by the Gauls and Britons.
- Virg. Georg.* 1. 3, v. 204.

Belgica vel molli melius fert esseda collo.

Propert. l. 2, el. 1, v. 86.

Esseda cœlatis siste Britannia jugis.

These chariots were known in Rome before Cæsar's expedition into Britain, but still more afterwards. *Cic. ad Attic.* l. 6, ep. 1; *Cæs. de Bell. Gall.* l. 4, c. 33; *Serv. in Virg.*; *Jornand. Rer. Goth.* c. 2.

ESSENCE (*Met.*) the same as *Being*.

ESSENCE (*Chem.*) the purest and most subtle part of any body, or the spirit drawn out of certain substances.

ESSENCE (*Med.*) the chief properties or virtues of any simple, collected into a small compass.

ESSE'NDI *quietum de telonio* (*Law*) a writ which lies for the citizens and burgesses of any town or city that has any charter or prescription to free them from toll, in case toll be demanded of them wrongfully. *Reg. Orig.* 258.

ESSE'NES (*Theol.*) a sect among the ancient Jews who separated themselves from the people, and led a kind of monastic life.

ESSENTIAL *debilities* (*Astrol.*) are when the planets are in their fall, detriment, or peregrine.—*Essential dignities*, certain real advantages belonging to planets, by which they are strengthened and fortified, as when they are in proper houses, or in their exaltation.

ESSENTIAL *oils* (*Chem.*) are acrid volatile oils, having a strong aromatic smell, which are drawn from plants by distillation, in distinction from native oils, that are procured by coction. *Boerhuav. Elen.*

ESSENTIAL *properties* (*Log.*) such as necessarily depend upon, and are connected with, the nature and essence of a thing, in distinction from the *accidental*.

ESSENTIAL *salts* (*Chem.*) salts which are procured from plants, and which have the property of crystallizing.

ESSENTIAL *character* (*Bot.*) a term applied to the particular properties or characteristics which distinguish one species of plants from another.

ESSE'RS (*Med.*) eruptions that are rather hard and red, and cause a violent itching as if from the sting of a bee or a nettle.

ESSIEU (*Mech.*) French for a solid piece of timber which runs across the carriage, enters the wheel at both ends, and is fastened by means of an iron.

ESSLI'SORS (*Law*) persons appointed by a court to impanel a jury on challenge to a jury and coroner.

ESSO'DINUM (*Med.*) a certain presage of a future event from the signs that indicate it.

ESSO'IN (*Law*) an excuse for one that is summoned to appear and answer to an action, &c. by reason of sickness, or any other just cause, &c. *Bract.* l. 5; *Britt.* c. 122; *Flet.* l. 6; 2 *Inst.* 125, &c.—*Clerk of the Essoins*, an officer in the court of Common Pleas, who keeps the essoins rolls.—*Essoin day of the Term*, the first return in every term, i. e. the first day in every term whereon the court sits to take Essoins.—*Essoins* and *Proffers*, words used in the statutes 38 *H.* 8, c. 21.

ESSORANT (*Her.*) a French epithet for a bird standing on the ground with its wings expanded, as if they were wet, and it was drying them.

ESSUYER *le premier Feu* (*Mil.*) French for to receive the first fire without attempting to fire first.—*Essayez la Pierre*, is a word of command in the platoon exercise, signifying to try the flint.

ESTABLAGE (*Mech.*) French for the harness which is between the two shafts of a cart.

ESTABLISHMENT of *Dower* (*Law*) the assurance of dower given to a wife or her friends, by the husband or his friends, previous to the marriage. *Britt.* c. 102, &c.

ESTABLISHMENT (*Mil.*) the quota of officers and men in an army, regiment, troop, or company, which, being much greater during war than peace, has given rise to the dis-

inction of a *War-Establishment* and a *Peace-Establishment*. A *Military Establishment* is an establishment in India so called, comprehending the allowances for tents, camels, and drivers.

ESTACA'DE (*Mil.*) French for a dyke constructed with piles in the sea, a river, or morass to oppose the entry of troops.

ESTAFETTE (*Mil.*) French for a military courier sent from one part of an army to another.

ESTA'NDARD (*Mil.*) vide *Standard*.

ESTA'TE (*Law*) the title or interest a man has in lands or tenements.—*Conditional estate*, one that has a condition annexed to it though it be not in writing.

ESTA'TES of the realm (*Polit.*) are in England the distinct parts of the government or constitution; namely, Kings, Lords, and Commons.

ESTE'LE (*Her.*) French for the term erased.

ESTHIO'MENOS (*Med.*) *ἑσθιομένος*, corroding; an epithet for a spreading ulcer.

ESTIVAL (*Astron.*) another name for summer.

ESTO'ILE (*Her.*) French for a star; a charge in the escutcheon, which differs from the mullet, by having six waved points, the former having only five points. [vide *Star*]

ESTO'PPEL (*Law*) an impediment or bar to an action which a man has by his own act and deed.

ESTOUFA'DE (*Cook.*) a particular way of cooking meat.

ESTO'VER (*Law*) from the French *étouffé*, signifies that subsistence which a man, accused of felony, is to have out of his lands or goods during his imprisonment; also an allowance of wood to be taken out of another man's woods.

ESTOVE'RIIS *habendis*, *Writ de* (*Law*) a writ for a woman divorced from her husband, *à mensâ et thoro*, to recover her alimony.

ESTRA'C (*Vet.*) an epithet for a horse that is light bodied and lank-bellied.

ESTRADIO'TTES (*Mil.*) a set of hardy warriors in Italy, who were formerly very expert in managing their horses.

ESTRA'DER, *batteurs d'* (*Mil.*) scouts of horse sent out to get intelligence of the position of the enemy.

ESTRA'DE (*Archit.*) the one half of an alcove or chamber raised above the level of the floor, and richly furnished for the reception of great persons.

ESTRA'NGLE (*Gram.*) a name for the alphabet of the ancient Persian. [vide *Alphabet*]

ESTRA'NGERS (*Law*) foreigners or persons born beyond sea.

ESTRAPA'DE (*Man.*) the action of a restive horse who, by plunging, kicking, and rearing, strives to resist his rider.

ESTRA'Y (*Law*) a tame beast found, without any owner known, which if it be not reclaimed within a year and a day, falls to the Lord of the manor.

ESTRE'AT (*Law*) from the Latin *extractum*, the copy of an original writing; but especially of fines set down in the rolls of a court, to be levied of any man for his offence. *F. N. B.* 57.—*Clerk of the estreats*, a clerk that receives the estreats out of the Lord Treasurers' office, and writes them to be levied of any man for his offence.

ESTRECIA'TUS (*Archæol.*) an epithet for roads, signifying streightened. *Hoved.* p. 783.

ESTREG-BOARDS (*Carpent.*) boards of deal, fir, &c. brought out of the East.

ESTREPÉMENT (*Law*) spoil made in lands and woods by a tenant, for term of life, to the damage of the reversioner.

ESTRO (*Mus.*) an Italian word, signifying gracefulness and elegance in application to movements.

ESTUARY (*Geog.*) any ditch or pit where the tide comes, or which is overflowed by the sea at high-water.

- E/SULA** (*Bot.*) the *Apocynum venetum* of Linnæus.
- E/SURINE Salts** (*Chem.*) salts of a fretting or eating quality, which abound in the air of places situated near the sea coast, and where great quantities of coal are burnt.
- ETA'BLIES** (*Mil.*) a word formerly used in France for what are now called garrisons.
- ETA'GES** *de Fourneaux ou de Mines* (*Min.*) French for the chambers in a mine.
- ETA'MPER** (*Vet.*) French for to pierce a horse-shoe in eight places.
- ETA'NCONS** (*Min.*) French for the stays or supporters that are set up in mines to support the weight of the earth that is laid upon the galleries.
- ETAPIER** (*Mil.*) French for a purveyor to the army.
- ETA'T-MAJOR** (*Mil.*) French for a specific number of officers belonging to the same corps.
- ET'CHING** (*Mech.*) a method of engraving on copper, whereby the lines or strokes are eaten in with aquafortis, instead of being cut with a tool or graver.
- ET'ESIÆ** (*Nat.*) *ετισιαι*, cool winds that blow constantly every year for forty days together in the dog-days. They are so called from *ετος*, a year, because they return every year. *Hippocrat. Epid.* l. 1, &c.; *Plin.* l. 18, c. 34; *Gal. de Temp.* l. 1.
- ETHER** (*Nat.*) vide *Æther*.
- ETHEREAL oil** (*Chem.*) a very fine or exalted oil, or rather spirit of an oily nature which instantly takes fire.
- ETHICS**, the science of moral philosophy, which teaches the springs and principles of human conduct.
- ETHIO'PIAN sour gourd** (*Bot.*) *Adansonia digitalis* of Linnæus.
- ETHMOIDES** (*Anat.*) *ἠθμοειδής*, from *ἠθμος*, a sieve, and *εἶδος*, the form; a bone in the inner part of the nose resembling a sieve in form. *Ruff. Ephes. de Appell. Part. Corp. hum.* l. 3, c. 1.
- ETHOLOGY** (*Rhet.*) a figure of speech which consists in the drawing of characters. *Quintil. Inst.* l. 6, c. 6.
- ETHULIA** (*Bot.*) a genus of plants, Class *Syngenesia*, Order 1 *Polygamia Æquales*.
Generic Character. CAL. common.—COR. compound tubular.—STAM. filaments five; *anthers* cylindrical.—PRST. germ prismatic; *style* filiform; *stigmas* two.—PER. none; *seeds* solitary; *receptacle* naked.
Species. The species are annuals, as the—*Ethulia conyzoides*, seu *Kahira*, Panicled Ethulia, native of the East Indies.—*Ethulia sparganophora*, seu *Sparganophora*, native of the East Indies.—*Ethulia divaricata*, seu *Chrysanthemum*, native of Malabar.
- ETIQUETTE** (*Polit.*) signified originally in French a ticket affixed to a bundle of papers expressing its contents. It is now commonly used for a certain rule observed at courts, and in the higher circles.
- ETO'ILE** (*Fort.*) French for a star-redoubt, or a small work, consisting of four, five, or more points.
- ETRAPADE** (*Archæol.*) a crane and pulley, which was formerly used in France by way of a torture.
- ETYMO'LOGY** (*Gram.*) *ἔτυμολογία*, from *ετυμοσ*, the true origin, and *λέγω*, to speak; a part of grammar which teaches the original of words, in order to fix their true meaning.
- ETYTHOXYLUM** (*Bot.*) the *Brasilium lignum*.
- EVA'CUANTS** (*Med.*) medicines proper to expel, or carry off any peccant or redundant humours in the animal body by the proper way of the emunctories.
- EVACUATION** (*Med.*) any discharge of superfluous humours or excrements out of the body, either by the course of nature, or the force of art.
- EUÆMIA** (*Med.*) from *εὖ*, well, and *ἄμα*, blood; goodness of blood.

- EUALTHES** (*Med.*) *εὐαλθής*, from *εὖ*, well, and *ἀλθέω*, to heal; easy to be healed. *Hippocrat. de Artic.*
- EUANALE'PTOS** (*Med.*) *εὐαναληπτός*, from *εὖ*, well, and *ἀναλαμβάνω*, to recover; easy to be recovered.
- EUANASPHALTOS** (*Med.*) *εὐανασφαλτός*, from *εὖ*, well, and *ἀνασφάλλω*, to recover strength; an epithet for a medicine which serves to recover strength.
- EVANGE'LIA** (*Ecc.*) a term formerly applied to processions and prayers of joy for good tidings, from *εὐαγγέλιον*, a joyful message, or glad tidings. *Anastas. Biblioth. in Pelag.*; *Mon. Angl.* tom. iii. p. 192.
- EVA'NGELIST** (*Bibl.*) *εὐαγγελιστής*, signifies literally a messenger of glad tidings; but is commonly applied to the writers of the Gospel History.
- EVA'NIA** (*Ent.*) a name given by Fabricius to a division of the genus *Sphex*, comprehending those insects which have the *antennæ* setaceous, the lip entire, and no tongue.
- EUA'NTHEMON** (*Bot.*) another name for *Chamæaculum*.
- EUA'NTHES** (*Bot.*) *εὐανθής*, from *εὖ*, well, and *ἄνθος*, a flower, highly florid, or highly coloured; an epithet applied by Hippocrates to the blood and the urine. *Hippocrat. in Coac.*
- EUA'PHION** (*Med.*) a medicine so named for its gentleness, from *εὖ*, well, and *ἄφῆ*, the touch. *Gal. de Com. Med. sec. Loc.* l. 9, c. 7.
- to **EVAPORATE** to a *Pellicle* (*Chem.*) to consume a liquor by a gentle heat till a thin skin is perceived to swim on the top of it.
- EVAPORATION** (*Chem.*) a process in which the superfluous moisture of any liquid substance is dispersed by means of fire.
- EVA'SION** (*Law*) a subtle device to set aside truth, or to escape the punishment of the law, as if a man should tempt another to strike him first, in order that he may have an opportunity of returning it with impunity. In this case, if the person first striking be killed, it is not murder. *H. P. C.* c. 81.
- EVA'TES** (*Myth.*) a branch of the Druids who were reckoned the priests and naturalists.
- EUCALYPTUS** (*Bot.*) a genus of plants, Class 12 *Icosandria*, Order 1 *Monogynia*.
Generic Character. CAL. *perianth* superior.—COR. none.—STAM. *filaments* numerous.—PRST. *germ* inferior; *style* single.—PER. *capsule* four-celled; *seeds* many.
Species. The species are trees, as the—*Eucalyptus obliqua*, Oblique-leaved Eucalyptus, or Red Gum Tree, &c.
- EUCA'RDIOS** (*Med.*) *εὐκάρδιος*, cordial; an epithet for what is grateful to the stomach.
- EUCATASCE'PTON** (*Med.*) *εὐκατάσκηπτον*, from *εὖ*, well, and *κατασκήπτω*, to be incumbent; an epithet for a wound which is properly supported, or rests on something soft.
- EUC'ERA** (*Ent.*) a name given by Fabricius to a division of the genus *Apis*, comprehending those insects which have the tongue seven-cleft, and the lip five-cleft.
- EU'CHARIST** (*Ecc.*) *εὐχαριστία*, from *εὖ*, well, and *χάρις*, grace; signifies literally a thanksgiving; whence it has been in a particular manner applied to the sacrament of the Lord's supper.
- EUCHARISTOS** (*Med.*) an epithet for an antidote in Nicolaus Myrepsus. sect. 1, c. 178.
- EUCHA'STIC** (*Mus.*) an epithet for that part of the Melopœa which constituted the calm and assuaging.
- EUCHOLO'GIUM** (*Ecc.*) a name for the Greek ritual, or Book of Common Prayer.
- EUCHRCE'A** (*Med.*) *εὐχρῶα*, from *εὖ*, well, and *χρῶα*, colour, of a good colour; a plaister so named by Scribonius Largus. *De Comp. Med.* c. 71.
- EUCHY'MIA** (*Med.*) *εὐχυμία*, from *εὖ*, well, and *χυμός*, a humour; goodness of the humours or juices, as well in aliments as in the animal frame. *Gal. Com. de Hippocrat.*

- Aphor.* 1. 5; *Act. de Meth. Med.* 1. 3, c. 12; *Gorr. Def. Med.*
- EU'CLEA** (*Bot.*) a genus of plants, Class 22 *Dioecia*, Order 10 *Dodecandria*.
Generic Character. CAL. *perianth* one-leaved.—COR. one-petalled.—STAM. *filaments* thirteen; *anthers* erect.—PIST. *germ* ovate; *styles* two; *stigmas* obtuse.—PER. *berry* globular; *seeds* single.
Species. The single species is a tree, as the *Euclea racemosa*, seu *Padus*, Round-leaved Euclea, native of the Cape of Good Hope.
- EUCO'PLIA** (*Med.*) *εὐκοπλία*, from *εὖ*, well, and *κοπλία*, the belly; an epithet for cherries, as good for the belly. *Dioscor.* 1. 1, c. 1.
- EUCOMIS** (*Bot.*) a genus of plants, Class 6 *Hexandria*, Order 1 *Monogymia*.
Generic Character. CAL. none.—COR. inferior.—STAM. *filaments* subulate.—PIST. *germ* superior; *stigma* simple.—PER. *capsule* three-celled; *seeds* many.
Species. The species are bulbous, as the—*Eucomis nana*, *fritellaria*, seu *Orcidia*, Dwarf Eucomis, &c.
- EUCRASY** (*Med.*) an agreeable temperament, a suitable mixture of qualities in the body, that tend to keep it in good order.
- EUDIOMETER** (*Mech.*) an instrument by which the quantity of oxygen and nitrogen in atmospherical air can be ascertained.
- EUDOXIANS** (*Ecc.*) heretics so called from Eudoxus, their ringleader, who held impious notions respecting the Son. *Epiphān. Hær.* 76; *Prateol. Dog. Omn. Hæret.*
- EVE'CTICA** (*Med.*) *evectics*, that part of physic which teaches how to acquire a good habit of body.
- EVE'CTION** of the moon (*Astron.*) one of her most considerable irregularities, caused by the action of the sun upon her. Its general effect is to diminish the equation of the centre at the syzygies, and to increase it in the quadrature.
- EVEN number** (*Arith.*) a number which may be divided into two equal parts, without a fraction.—*Evenly even number.* [vide *Evenly*]
- EVENINGS** (*Archæol.*) the delivery at even or night of a certain portion of grass, corn, &c. given to a customary tenant, who performs the service of cutting, mowing, &c. for his lord gratuitously, by way of reward.
- EVENLY even number** (*Arith.*) that which may be divided by 4 without a remainder.—*Evenly odd number*, that which may be divided by 2, but not by 4, without a remainder.
- EVE'NT** (*Mil.*) French for the vent or cavity which is left in cannon, or other fire-arms, after they have been proved and found defective.
- EVERGETES** (*Polit.*) *εὐεργέτης*, from *εὖ* and *εργον*, a work; a title signifying as much as benefactor, which was given to several of the Syrian kings.
- EVERGREEN** (*Bot.*) an epithet for such plants as retain their verdure throughout the year.—Evergreen Thorn, the *Mespilus pipacantha* of Linnæus.
- EVERLASTING** (*Bot.*) the *Gnaphalium* of Linnæus, a shrub.—Everlasting Pea, the *Lathyrus sylvestris*.
- EVERRICULUM** (*Mech.*) a fishing-net, similar to what is now called the drag-net.
- EUE'XIA** (*Med.*) *εὐεξία*, from *εὖ*, well, and *εξίς*, habit; a good habit of body, in distinction from *Cachexia*. *Aret. de Deut. Morb.* 1. 1, c. 16.
- EU'GEOS** (*Med.*) an epithet applied sometimes to the uterus and sometimes to the hymen.
- EUHARMONIA** (*Mus.*) an epithet signifying perfectly harmonious.
- EVICTION** (*Law*) a recovery of lands, &c. by form of law.
- E'VIDENCE** (*Law*) any proof by the testimony of men, or by writings. The former is called *parole evidence*. It is
- called *evidence* because thereby the point in issue in a cause to be tried is to be made evident to the jury. *Co. Lit.* 288.
- EULE** (*Med.*) *εὐλή*, a particular sort of worm that is bred in ulcers.
- EU'LOGY** (*Ecc.*) from the Greek *εὐλογία*, which signifies benediction; is a term used in the Greek church either for the Eucharist itself or for the consecrated bread which was sent to those that were absent.
- EUNOMIANS** (*Ecc.*) a sect of heretics in the fourth century, so called from one Eunomius, their ringleader, who maintained that faith alone was sufficient for salvation without good works. *Epiphān. Hær.* 75; *Theodoret. Hær. Fab.* 1. 4; *Hieron. Adver.*; *Ruffin.* 1. 2, c. 67; *Baron. Annal. Ann.* 356, &c.
- EVOCATI** (*Ant.*) veteran soldiers, who after having served their time entered as volunteers; they were otherwise called *Emeriti*. *Veget.* 1. 2, c. 3; *Isidor. Orig.* 1. 9, c. 3.
- EVOCATIO** (*Ant.*) a religious ceremony observed by the Romans at the commencement of a siege, when they invoked the tutelary deity of the place to come over to them; for which reason the Romans would not allow their tutelary deities to be invoked by name, that they might not be known. *Plin.* 1. 28, c. 2; *Macrob. Sat.* 1. 3, c. 9.
- EVOCATION** (*Gram.*) a figure of construction, which consists in changing the third person into the first or second.
- EUODIA** (*Bot.*) the *Agathophyllum* of Linnæus.
- EVOLVENT** (*Geom.*) a name for the involute or curve resulting from the evolution of a curve, in distinction from the evolute or curve supposed to be open or evolved.
- EVOLUTE curve** (*Geom.*) a curve described from evolution, as Mr. Huygens, the inventor, calls it; if a thread F C M be wrapped or wound round the curve B C F, and then unwound again, the point M will describe the curve A M M, which is the *involute*; the curve B C F is the *evolute*, the part M C of the thread being called the *radius of the evolute*.
- 
- EVOLUTION** (*Arith.*) the extraction of the roots of any power as opposed to involution.
- EVOLUTION** (*Mil.*) any circuitous or complicated movement, by which a body of men change their position in the field.
- EVOLUTION** (*Geom.*) the unfolding or opening of a curve. [vide *Evolute*]
- EVOLVULUS** (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 4 *Tetragymia*.
Generic Character. CAL. *perianth* five-leaved.—COR. one-petalled.—STAM. *filaments* five; *anthers* oblong.—PIST. *germ* globose; *styles* four; *stigmas* simple.—PER. *capsule* globose; *seeds* solitary.
Species. The species are annuals, as the—*Evolvulus nummularius*, seu *convolvulus*, native of Jamaica.—*Evolvulus alcinoides*, Chickweed-leaved Evolvulus, native of the East Indies, &c.
- EVONYMOIDES** (*Bot.*) another name for the *Celastrus* of Linnæus.
- EUO'NYMO similis** (*Bot.*) the *Coffea arabica*.
- EUONYMUS** (*Bot.*) *εὐώνυμος*, i. e. unlucky; a tree so called because it kills cattle. *Theoph. Hist. Plant.* 1. 3, c. 18; *Plin.* 1. 33, c. 22.
- EUONYMUS**, in the *Linnean system*, a genus of plants, Class 5 *Pentandria*, Order 1 *Monogymia*.
Generic Character. CAL. *perianth* five-parted.—COR. *petals* five.—STAM. *filaments* five; *anthers* twin.—PIST. *germ* acuminate; *style* short; *stigma* acute.—PER. *capsule* succulent; *seeds* ovate.
Species. The species are trees, as the—*Euonymus Europæus*, Common Spindle Tree.—*Euonymus latifolius*, Broad-leaved Spindle Tree, native of Austria.—*Euonymus verrucosus*, Warty Spindle Tree, native of the

Carniola. — *Euonymus atropurpureus*, Purple-flowered Spindle Tree. *Clus. Hist.*; *Dod. Pempt.*; *Bauh. Hist.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat.*; *Raii Hist.*; *Tourn. Instil.*

EUONYMUS is also the *Ceanothus americanus* of Linnæus.

EUPAREA (Bot.) a genus of plants, Class 5 Pentandria, Order 1 Monogynia.

Generic Character. CAL. perianth five-leaved.—COR. petals five.—STAM. filaments five.—PIST. germ roundish; style long; stigma simple.—PER. berry globular; seeds many.
Species. The single species is the—*Euparea amoena*, native of New Holland.

EUPATORIA (Bot.) the *Agrimonia eupatoria* of Linnæus.

EUPATOROIDES (Bot.) another name for the *Gnaphalium* of Linnæus.

EUPATORIOPHALACRON (Bot.) the *Eclipta erecta*.

EUPATORIUM (Bot.) *εὐπατόριον*, a plant so called from Mithridates, surnamed Eupator, by whom it was discovered. It was otherwise called Agrimonia, and was reckoned good for complaints in the liver. *Dioscor. l. 4, c. 4*; *Plin. l. 25, c. 6*; *Gal. de Simplic. l. 6*; *Oribas. Med. Collect. l. 11*; *Aet. Tetrab. c. 1, serm. 1*; *Paul. Æginet. l. 7, c. 3*.

EUPATORIUM, in the Linnean system, a genus of plants, Class 19 Syngenesia, Order 1 Polygamia Æqualis.

Generic Character. CAL. common oblong.—COR. compound.—STAM. filaments five; anthers oblong.—PIST. germ small; style filiform; stigmas slender.—PER. none; seeds oblong.

Species. The species are perennials, as the—*Eupatorium dalea*, seu *Dalea*, Shrubby Hemp Agrimony.—*Eupatorium scandens*, seu *Conyza*, Climbing Hemp Agrimony, native of Jamaica.—*Eupatorium album*, White Hemp Agrimony.—*Eupatorium purpureum*, Purple Hemp Agrimony. *Bauh. Hist.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat.*; *Raii Hist.*; *Tourn. Inst.*

EUPATORIUM is also the name of the *Baccharis ivafolia*.

EUPEPSIA (Med.) *εὐπεψία*, from *εὖ*, well, and *πέψω*, to digest; good digestion.

EUPE'TALOS (Min.) a precious stone of four colours, fiery, blue, vermilion, and green. *Plin. l. 15, c. 30*.

EUPHEMISMUS (Rhet.) *εὐφημισμός*, a figure of speech whereby a harsh word is exchanged for one that is unoffending, as Eumenides for the Furies. *Quintil. l. 9, c. 2*; *Demet. Eloc. § 281*.

EUPHONIA (Rhet.) *εὐφωνία*, from *εὖ*, good, and *φωνή*, sound euphony, otherwise called *εὐφροσύνη*, a graceful sound, or smooth flow of words. *Quintil. l. 1, c. 5*; *Aristid. περὶ λόγ. πολλ.*; *Eustath. ad Hom. Il. l. 11, p. 852*.

EUPHORBIA (Bot.) a genus of plants, Class 11 Dodecandria, Order 3 Trigynia.

Generic Character. CAL. perianth one-leaved.—COR. petals four.—STAM. filaments filiform; anthers twin.—PIST. germ roundish; styles three; stigma obtuse.—PER. capsule roundish; seeds solitary.

Species. The species are mostly annuals, as—*Euphorbia antiquorum*, seu *Tithymalus*, Triangular Spurge, native of the East Indies.—*Euphorbia nervifolia*, *Ligularia*, seu *Elacalle*, Olander-leaved Spurge, native of the East Indies, &c.—*Euphorbia hirta*, seu *Esula*, Creeping Hairy Spurge, native of both Indies.—*Euphorbia chamæsyce*, seu *Chamæsyce*, Crenated Annual Spurge, native of the South of Europe.—*Euphorbia pepelis*, seu *Pepelis*, Purple Spurge, native of the South of France. But the—*Euphorbia triaculeata*, Three-spiked Spurge, native of Arabia, and the—*Euphorbia anacantha*, Scaly Spurge, native of the Cape of Good Hope, are shrubs. *Clus. Hist.*; *Dod. Pempt.*; *Bauh. Hist.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Bot.*; *Raii Hist.*; *Tourn. Inst.*

EUPHORBIA is also the *Cynanchum viminalis*.

EUPHORBIA arbor (Bot.) the *Cactus Peruvianus*.

EUPHORBIVM (Bot.) another name for the *Euphorbia*.

EUPHORIA (Bot.) another name for the *Scytalia*.

EUPHRA'TIA (Bot.) a genus of plants, Class 14 Didynamia, Order 2 Angiosperma.

Generic Character. CAL. perianth one-leaved.—COR. one-petalled.—STAM. filaments four; anthers two-lobed.—PIST. germ ovate; style filiform; stigma obtuse.—PER. capsule ovate-oblong; seeds numerous.

Species. The species are annuals, as the—*Euphrasia Odonites*, *Bartsia*, seu *Odonites*, Red Eyebright.—*Euphrasia linifolia*, seu *Coris*, Flax-leaved Eyebright, native of France.—*Euphrasia viscosa*, seu *Pedicularis*, Clammy Eyebright, native of Provence.—*Euphrasia officinalis*, Common Eyebright. *Dod. Pempt.*; *Bauh. Hist.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Bot.*; *Raii Hist.*; *Tourn. Inst.*

EUPHRA'TIA is also the *Bartsia viscosa* of Linnæus.

EUPHRO'SYNUM (Bot.) another name for the herb Bugloss.

EUPNŒ'A (Med.) *εὐπνοία*, from *εὖ*, well, and *πνέω*, to breathe; an easy respiration.

EUPOR'YSTA (Med.) medicines easily prepared.

EUROPE'E (Bot.) vide *Veronica*.

EUROT'IAS (Min.) a precious stone, black, as with a kind of mould upon it. *Plin. l. 37, c. 10*.

EURY'A (Bot.) a genus of plants, Class 11 Dodecandria, Order 1 Monogynia.

Generic Character. CAL. perianth five-leaved.—COR. petals five.—STAM. filaments thirteen; anthers upright.—PIST. germ superior; style subulate; stigmas three.—PER. capsule globular; seeds many.

Species. The single species is the—*Eurya Japonica*, seu *Fisakaki*, native of Japan.

EURYA'NDRIA (Bot.) a genus of plants, Class 13 Polyandria, Order 3 Trigynia.

Generic Character. CAL. perianth five-leaved.—COR. petals three.—STAM. filaments many; anthers twin.—PIST. germ ovate; styles three; stigmas two.—PER. folicles three; seeds some.

Species. The single species is the—*Euryandria scandens*, native of New Caledonia.

EURYTHMIA (Rhet.) a graceful proportion and carriage of the body, particularly in application to an orator. *Quintil. l. 1, c. 10*.

EURITHMY (Archit.) the exact proportion between all the parts of a building. *Vitruv. l. 1, c. 2*.

EURITHMY (Med.) a good disposition of the pulse. *Gal. de Diff. Puls. l. 1, c. 9*; *Gorr. Defin. Med.*

EUSTATHES (Med.) *εὐσταθής*, from *εὖ*, well, and *ἵστημι*, to stand, constant and regular; an epithet applied to the seasons and to diseases.

EUSTA'THIANS (Ecc.) a sect of heretics in the fourth century, so called after one Eustathius, a bishop in Armenia, who, under pretence of greater purity and severity, introduced many irregularities. *Epiph. Hæc. 40*.

EUSTO'MACHUS (Med.) *εὐστομάχος*, an epithet for a good state of the stomach; also for the food that is proper for it.

EU'STYLE (Archit.) *εὐστυλος*, from *εὖ*, well, and *στυλος*, a pillar; a term for a building wherein the pillars are placed at a convenient distance. *Vitruv. l. 3, c. 2*.

EUTHA'NASY (Med.) *εὐθανασία*, a soft and quiet death.

EU'THIA (Mus.) a term in the Greek music.

EUTY'CHIANS (Ecc.) a sect of heretics in the fifth century, called after their ringleader, one Eutyclus, who maintained, among other things, that the flesh of Christ was not like ours. *Baron. Annal. Ann. 448*.

EWA'GIUM (Archæol.) toll paid for water carriage.

EWE (Husband.) the female of the sheep.

EX post (Law) a Latin preposition used on several occa-

sions, as—*Ex post facto*, i. e. from something done afterwards; as, an *ex post facto* law, or a law which operates upon a subject not liable to it at the time the law was made.—*Ex mero motu*, words used in a charter, signifying that the prince does it of his good will and pleasure.—*Ex officio*, i. e. by virtue of one's office: signifying the power a person possesses of doing certain things by virtue of his office: as the *ex officio* informations of the Attorney-General, which he files *ex officio*, i. e. by virtue of his office, without applying to the court for permission.—*Ex parte*, i. e. partial, or of one party; as an *ex parte* commission in Chancery taken out and executed by one party only.—*Ex parte talis*, a writ that lies for a bailiff or receiver, who having auditors assigned to take his account, cannot obtain of them reasonable allowance, but is cast into prison. F. N. B. 129.

EXACERBANTES (*Med.*) remitting fevers.

EXACTION (*Law*) wrong done by an officer, or by one who under colour of office takes more than what the law allows. Between *Extortion* and *Exaction* there is this difference: that in the former case the officer extorts more than his due, when something is due to him; and in the latter case he exacts what is not his due, when nothing is due to him. *C. Lit.* 368.

EXACTOR *Regis* (*Law*) the King's exactor, or collector of taxes; also, sometimes taken for the sheriff. *Liber Niger* *Scarc.* par. 1, c. ult.

EXACUM (*Bot.*) a genus of plants, Class 4 *Tetrandria*, Order 1 *Monogynia*.

Generic Character. CAL. perianth four-leaved.—COR. one-petalled.—STAM. filaments four: anthers roundish.—PIST. germ roundish; style filiform; stigma headed.—PER. capsule roundish; seeds numerous.

Species. The species are mostly annual, as the—*Exacum Albens*, seu *Cenactureum*, native of the Cape of Good Hope.—*Exacum viscosum*, seu *Gentiana*, native of the Canary Islands, &c.

EXACUM is also the *Gentiana filiformis*.

EXAGIUM (*Ant.*) ἔξαγιον, a kind of standard weight. *Suidas*.

EXAGOGA (*Ant.*) ἔξαγογα, the exportation or carrying of goods outward-bound. *Fest. de Verb. Sign.*

EXERESIS (*Surg.*) ἔξεσις, the act of taking away or drawing out of the body things hurtful to it.

EXAGGERATION (*Rhet.*) a figure whereby the orator enlarges or heightens things, making them appear more than they really are.

EXALMA (*Med.*) ἔξιμα, a starting out, from ἔξιμα, to leap out; a term applied by Hippocrates to the starting of the vertebrae out of their places. *Hippocrat. de Artic.*

EXALTATION (*Astron.*) an essential dignity of a planet, next in virtue to being in its own house.

EXALTATION (*Chem.*) an operation by which a thing is raised to a higher degree of virtue, or an increase of the principal property in any body.

EXALTATION of the Cross (*Ecc.*) vide *Cross*.

EXAMBLOMA (*Med.*) and *Examblosis*, ἔαμβλωμα, ἔαμβλωσις, from ἄμβλω, to miscarry; an abortion.

EXAMINERS (*Law*) two officers in the Court of Chancery, who are appointed, on oath, to examine witnesses on either side.

EXAMPLE (*Rhet.*) an imperfect kind of induction or argumentation, whereby it is proved that a thing which has happened on some other occasions, will happen on the present one.

EXANASTOMOSIS (*Anat.*) vide *Anastomosis*.

EXANGUIOUS (*Anat.*) from *exanguis*; or *ex*, privative, and *sanguis*, blood; bloodless, an epithet for the bones and cartilages which are the white parts of the body.

EXANNUAL ROLL (*Law*) a roll, in which fines that

could not be levied, and bad debts, were formerly entered, that they might be annually read over to the sheriff, to see if any thing could not be recovered. *Hale. Sheriff. Acc.* 67.

EXANTHEMATA (*Med.*) pustules that break out on different parts of the body. *Hippocrat. Epid.* 1. 6, & *Gal. Comm.* 2, &c.; *Cels.* 1. 5, c. 28; *Marcell. de Medicam.* c. 18; *Oribas. de Morb. Curat.* 1. 3, c. 21; *Act. de Meth. Med.* 1. 1, c. 20; *Gorr. Def. Med.*; *Foes. Econom. Hippocrat.*

EXANTHROPIA (*Med.*) from ἔξ and ἄνθρωπος, a man, i. e. without the faculties of a man; a species of melancholy madness, in which the patient fancies himself a brute.

EXARAGMA (*Surg.*) from ἔξαργμα, to break; a fracture. *Gal. Exerc. Hippoc. Vocab.*; *Pancird. Notit. Dig. Imp. Occident.* c. 1.

EXARMA (*Med.*) from ἔξαμα, to lift up; an elevated tumour. *Hippocrat. Epid.* 1. 4; *Foes. Econom. Hippocrat.*

EXARSIO (*Med.*) an intemperature from heat, attended with dryness.

EXARTHREMA (*Med.*) from ἔξαρθρον, to suspend; an amulet or charm hung round the neck.

EXARTHROSIS (*Surg.*) from ἔξαρθρις, to put out of joint; a dislocation or lunation.

EXARTICULATION (*Surg.*) the disjoining or putting out of joint.

EXAUCTORATIO (*Ant.*) a partial discharge from military service in the Roman army, in distinction from the *missio*, which was a full discharge. *Tacit. Annal.* 1. 1, c. 26; *Lamprid. in Alex. Sever.* c. 52; *Tertullian. de Coron. Milit.* c. 1; *Veget.* 1. 2, c. 3; *Ulp. ff. de eis qui not. in fam. tit.* 2. 1. 2.

EXCAMBIATORES (*Archæol.*) exchangers of land, who are supposed to have been what we now call brokers.

EXCAMBIUM (*Com.*) Exchange.

EXCATHISMA (*Med.*) vide *Semicupium*.

EXCELLENCY (*Polit.*) a title now given to ambassadors, commanders, and to other persons not entitled to that of highness.

EXCENTRIC (*Geom.*) an epithet for such figures as circles, spheres, &c. not having the same centre.

EXCENTRIC Circle (*Astron.*) or the *excentric*, otherwise called the *deferent*, a circle in the Ptolemaic system, which was the orbit itself that the planets were supposed to describe round the earth. It is now supposed that the planets describe elliptic orbits round the sun.—*Excentric Circle*, in modern astronomy, is the circle described from the centre of the orbit of a planet, with half the greatest axis as a radius; or it is the circle that circumscribes the elliptic orbit of the planet.—*Excentric Anomaly*, or *Anomaly of the Centre*, vide *Astronomy*.—*Excentric place of a Planet* in its orbit is the heliocentric place, or that place in which it appears as seen from the sun.—*Excentric Place in the Ecliptic* is the point of the ecliptic to which the planet is referred as viewed from the sun. This coincides with the heliocentric longitude.—*Excentric Equation*, in ancient astronomy, is an angle made by a line drawn from the centre of the earth with another line drawn from the centre of the excentric. This is the same with the *Prosthaphæresis*. [vide *Equation of the Centre*]

EXCENTRICITY (*Geom.*) the distance between the centres of two circles or spheres not having the same centre.

EXCENTRICITY (*Astron.*) in the Ptolemaic system is that part of the line of the Apsides lying between the centre of the earth and of the Excentric, i. e. the distance between the centre of a planet and the centre of the earth.—*Excentricity*, in modern astronomy, is the distance between the centre of the Ellipse, i. e. between the sun and the centre of the Excentric. [vide *Astronomy*] This is called *Single* or *Simple Excentricity*, in distinction from the *Double*

Exccentricity, which is the distance between the two Foci of the Ellipse, and is equal to twice the Exccentricity.

EXCEPTIO (*Ant.*) Exception, a bar, or prevention, by which the defendant stops the action from going directly to a sentence or condemnation. *Cic. de Inv. Rhet.* 1. 2, c. 20; *Paull. tit. de Except.*; *Sigon. de Indic.* 1. 1, c. 21.

EXCEPTION (*Law*) a stop or stay to an action, consisting either of a denial of the matter alleged in bar to the action; or, in Chancery, of what is alleged against the sufficiency of an answer, &c. Exceptions are distinguished into *dilatory* and *peremptory*. *Bract.* 1. 5, tract 5; *Co. Lit.* 47; 1 *Lev.* 287; *Cro. Ell.* 244.

Exception, in Scotch law, is equivalent to *Defence*. *Exceptio Rei judicatae* is an Exception or defence that the matter has been adjudged in another court or country, and the judgment carried into effect.

EXCEPTION (*Med.*) the embodying or mixing of dry powders with any sort of moisture.

EXCEPTIVE PROPOSITION (*Log.*) any proposition which contains some particle of exception; as *but*, *unless*, &c.

EXCESS, *Spherical* (*Trigon.*) is the excess of the sum of the three angles of any spherical triangle above two right angles.

EXCHANGE (*Law*) *Excambium*. 1. The King's Exchange, or the place appointed by the King for the exchange of plate or bullion for the King's coin, &c. There were formerly divers such places, but now there is only one, namely, the Mint, in the Tower. 2. Any contract or agreement whereby persons or things are exchanged one for another; as—*Exchange of Lands or Tenements*, a mutual grant of equal interest in lands, the one in consideration of the other, which is used peculiarly in our common law for that compensation which the warrantor must make to the warrantee, value for value, if the land warranted be recovered from the warrantee. The word *Exchange*, when taken by itself, applies appropriately to this case in law: it is, however, applied to other things, as *Exchange of Church Livings*, &c.

EXCHANGE (*Com.*) 1. The trucking or bartering one thing for another. 2. The giving a sum of money in one place to be repaid in another, *par pro pari*, value for value, according to the sundry species of coins current. This was called *Cambio commune*, or Common Exchange, when coin was exchanged for coin, in distinction from *Cambio reale*, or Real Exchange, when moneys were paid to the exchanger, and bills were drawn without naming the species, but according to the value of the several coins. [vide *Bill of Exchange*].—*Exchange Brokers* are men who act between one merchant and another in the business of Exchange. 3. *Exchange* also stands for the rate at which one coin is exchanged for another, which depends upon the balance of trade and the political relations which subsist between two countries. 4. The place where merchants meet to negotiate bills and transact all other business.

EXCHANGE (*Arith.*) is the finding what quantity of the money of one place is equal to a given sum of another, according to a certain course of exchange.—*Course of Exchanges* is the current price betwixt two places, which is always fluctuating and unsettled.—*Arbitration of Exchange* is a calculation of the exchanges of different places, to discover which is the most profitable. [vide *Arbitration*]

EXCHANGE (*Mil.*) 1. *Exchange of Prisoners*, the act of giving up men on both sides, upon certain conditions agreed to by the contending parties. 2. *Exchange between Officers*, who remove from one regiment to another, or from full to half pay, for which a consideration is usually given, called the *Difference*.

EXCHANGERS (*Com.*) those who transmit money to foreign parts by bills of exchange, &c.

EXCHEQUER (*Law*) in Latin *scaccarium*, in old French *Peschouier*; the place or office where the King's cash is kept and paid, properly called the receipt of the Exchequer.—*Exchequer Court*, a court of record, in which all causes relating to the crown revenue are determined. It is governed by the Chancellor of the Exchequer, the Lord Chief Baron, and three other Barons, who are the sovereign auditors of England, and the judges of the court. The prerogative court of the Archbishop of York also goes by this name.—*Black-Book of the Exchequer*, a book composed in the reign of Henry II, containing a full account of this court, its officers, &c.

EXCHEQUERED (*Law*) a colloquial term for one who is summoned before the court of Exchequer to answer any charge.

EXCIPULUM (*Chem.*) a chemical receiver.

EXCISE (*Law*) an inland imposition paid sometimes on the consumption of the commodity, or frequently upon its retail sale which immediately precedes the consumption.

EXCISION (*Bibl.*) in the scripture sense, is the cutting off a person from the number of his community, as a punishment for his sins.

EXCITABILITY (*Med.*) and *Excitement*, terms of modern use; the first, to denote the capacity of the body to admit of an increased action; the latter the state of increased action. The causes which produce this increase of action are called *exciting causes*.

EXCLAMATION (*Rhet.*) a figure of speech by which any passion of the mind is expressed. [vide *Ecphonesis*]

EXCLUSA (*Law*) or *Exclusagium*, a sluice for water; and the payment to the lord for the use of such a sluice. *Mon. Angl.* tom. 1, p. 398, &c.

EXCLUSIONERS (*Polit.*) a name given to those members of parliament, who, in the reign of King Charles II, were for excluding the Duke of York from the succession to the throne.

EXCLUSORIUM (*Med.*) a medicine which causes abortion.

EXCOECARIA (*Bot.*) a genus of plants, Class 22 *Dioecia*, Order 3 *Triandria*.

Generic Character. CAL. ament cylindric.—COR. none.—STAM. filaments three; anthers roundish.—PIST. germ roundish; styles three; stigma simple.—PER. berry smooth; seeds solitary.

Species. The species is a shrub, as the—*Excoecaria Agalocha*, seu *Arbor excoecaris*, native of Tongatabu.

EXCOMMUNICATION (*Law*) *Excommunicatio*, an ecclesiastical censure, which is divided into the greater and the less; the former excluding a person from the communion of the church, and the company of the faithful altogether; the latter excluding him only from the communion of the church.

EXCOMMUNICATIO capiendo (*Law*) a writ directed to the sheriff for the apprehension of one who stands obstinately excommunicated forty days.—*Excommunicato deliberando*, a writ to the under sheriff for the delivery of an excommunicated person out of prison.—*Excommunicata recipiendo*, a writ whereby excommunicated persons, who have been unlawfully delivered from prison before they have given caution to obey the authority of the church, are commanded to be sought after and retaken. *F. N. B.* 62; *Reg. Orig.* 37.

EXCORIATION (*Surg.*) the rubbing off or fretting away the skin from any part of the body.

EXCORTICATION (*Bot.*) the stripping a tree of its bark.

EXCREMENTA (*Anat.*) whatever is evacuated from the animal body after digestion. *Ruff. Ephes. de Appellat. Part. Corp. hum.* 1. 1, c. 36; *Act. de Urin.* c. 5.

EXCRESCENCE (*Surg.*) from *ex*, and *cresco*, to grow; any preternatural formation of flesh on any part of the body, as a wart, wen, &c.

EXCRETA (*Med.*) and *Retenta*, fluids thrown out or retained in the body.

EXCRETION (*Med.*) the act of separating and voiding excrementitious humours from the aliments and mass of blood.

EXCUBIÆ (*Ant.*) the watches and guards kept in the day by the Romans, in distinction from *vigiliæ*, which were kept by night. *Isidor. Orig.* l. 9, c. 3; *Serv. in Virg. Æn.* l. 9, v. 159; *Schel. in Polyb. apud Græc. Thes. Antiq. Rom.* tom. 10.

EXCULPATION, *Letters of* (*Law*) a warrant in the Scotch law to an offender indicted for citing witnesses in his own defence.

EXCURSION (*Astron.*) another word for Elongation. [vide *Elongation*].—A circle of *Excursion* is a lesser circle parallel to the ecliptic, and at such a distance from it that the excursions of the planets towards the poles of the ecliptic may be included within them, being usually fixed at 10 degrees.

EXCUSA'TI (*Ant.*) an epithet for slaves who, having taken refuge in a church, obtained pardon from their masters, who bound themselves by an oath to pass over their offence. *Greg. Turon. Hist.* l. 5, c. 3.

EXHEAT (*Ecc.*) a term employed in the permission which a bishop grants to a priest to go out of his diocese.

EXECHEBRONCHOS (*Med.*) ἐξεχέβρονχος, an epithet for one having a prominent βρόγχος, or throat. *Hippocrat. de Art. & Gal. Com.*

EXECHEGLUTOS (*Med.*) ἐξεχέγλυτος, an epithet for one having prominent buttocks.

EXECUTION (*Law*) signifies generally the last performance of an act by a judicial writ, grounded on the judgment of the court from which it issues; particularly the obtaining possession of any thing recovered by judgment of law.—*Prerogative Execution* is an execution for the king's debt, which is always preferred before any other execution.

EXECUTION (*Mil.*) the plunder and waste of a country where the inhabitants refuse to submit to the terms imposed upon them.

EXECUTIONE facienda in Withernamium (*Law*) vide *Replevin*.—*Executione Judicii*, a writ directed to the judge in an inferior court to do execution upon a judgment therein. *F. N. B.* 20; *New Nat. Brev.* 43.

EXECUTIVE (*Polit.*) an epithet signifying capable of executing, is particularly applied to that branch of the government which is invested with the power of executing the functions of governing the state. In all monarchical states this power, called by distinction the *Executive power*, rests in the prince.

EXECUTOR (*Law*) a person nominated by a testator to take care and see his will and testament executed.—*Executor de son Tort*, &c. of or to his own wrong; an executor who takes upon him the office of an executor by intrusion, not being constituted thereto by the testator.

EXECUTORY (*Law*) an epithet for what belongs to an execution. An *executory estate* is, where an estate created by deed, or fine, is to be afterwards executed by entry, livery, writ, &c.; leases for years, rents, annuities, &c. are called *inheritances executory*; an *executory devise* is the devise of a future interest.

EXEGE'SIS (*Lit.*) ἐξεγέσις, an explication of words, or an elucidation of sentences.

EXEGESIS numerosa et linealis (*Math.*) a term used by Vieta for the numeral or lineal solution of the extraction of roots out of affected equations.

EXEGE'TES (*Ant.*) ἐξηγηταί, from ἐξηγήσασθαι, to explain; an interpreter of the laws and religious rites among the Athenians. *Plat. de Leg.* l. 6; *Demosth. cont. Everg.*; *Theophrast. Charact.* c. 17; *Poll. Onom.* l. 8, segm. 124, &c.

EXELCO'SIS (*Med.*) vide *Exulceratio*.

EXELCYSMOS (*Med.*) ἐξελκυσμός, from ἐλκύω, to draw; a depresure of the bones. *Gal. Def. Med.*

EXEMPLIFICATION (*Law*) a duplicate, or copy of letters patent, taken from the enrolled originals.

EXEMPLIFICATIONE (*Law*) a writ granted for the exemplifying an original. *Reg. Orig.* 290.

EXEMPT (*Mil.*) a French term for an officer in the guards, who commands in the absence of the captain and lieutenant.

EXEMPTION (*Law*) a privilege to be free from service or appearance, as knights, clergymen, &c. are exempt from appearing at county court by statute, &c.

EXEMPTS (*Polit.*) persons originally so called from being exempted from certain services, or entitled to particular privileges. The Exons of St. James derive their name from the exempts. In France there were three classes—*Exempts des gardes du corps*, belonging to the body guard.—*Exempts du ban et arrière ban*, persons exempt from that service, and—*Exempts des Maréchaussées*, those belonging to the Marshalsea, who were exempt from all taxes, &c.

EXENNIUM (*Archæol.*) or Exhenium, a gift or present; more properly a new year's gift.

EXERCISE (*Mil.*) the practice of all military movements and use of arms, by which a soldier is instructed how to carry himself in the field, and on duty.

EXERGASIA (*Rhet.*) a figure of speech, by which the same thing is repeated in different terms.

EXERGUE (*Numis.*) a term among medalists denoting the little space around and without the work or figures of a medal for an inscription, &c.

EXFOLIATION (*Surg.*) from *exfolio*, to shed the leaf; the scaling off, or separation of a dead piece of bone in the form of a leaf or scale.

EXFOLIATIVUM (*Surg.*) from *exfolio*, to shed the leaf; an instrument for rasping a bone, so as to clean it from all exfoliations.

EXFREDIARE (*Archæol.*) to break the peace.

EX gravi querela (*Law*) a writ which lies for one who is kept from the possession of his lands and tenements by the devisor's heirs, who enters and detains them from him.

EXHALATION (*Nat.*) a fume, or vapour, which rises out of the earth.

EXHAUSTED Receiver (*Pneum.*) a glass, or other vessel, applied on the plate of an air pump, to extract the air out of it by the action of the pump.

EXHAUSTIONS (*Math.*) or the method of *Exhaustions*, a mode of demonstration founded on the principle of exhausting a quantity by continually taking away certain parts of it.

EXHIBIT (*Law*) a term used in a suit of Chancery, when a deed or other writing is exhibited to be proved by witnesses, and the examiners or commissioners certify on the back, that it was shown to such or such persons at their examination, which is called an *exhibit*.

EXHIBITION (*Law*) in the Scotch law is an action for compelling the production of writings.

EXHIBITION (*Ecc.*) an allowance for meat and drink which was customary among the religious appropriators of churches, who usually made it to the depending vicar; whence the benefactions now settled for the maintaining of scholars at the Universities, not depending on the foundation, are called exhibitions.

EXHIBITIONER (*Lit.*) one who enjoys an exhibition at the Universities. [vide *Exhibition*]

EXHUMATION (*Law*) the act of digging up a body that has been interred in holy ground, by the authority of a judge.

EXIGENDARIES (*Law*) vide *Exigenter*.

EXIGENT (*Law*) or *Exigi facias*, a writ lying where the defendant in a personal action cannot be found, nor any thing of his within that county to be distrained: it is directed to the sheriff to call the party five county days successively to appear under pain of outlawry. *Stat. 18 Ed. 3, c. 1; 6 Hen. 8, c. 4; 31 Eliz. c. 3; 3 Inst. 31, &c.*

EXIGENTER (*Law*) or exigendary, an officer of the court of Common Pleas who makes out exigents and proclamations in all actions in which process of outlawry lies.

EXIGI facias (*Law*) vide *Exigent*.

EXILIUM (*Archæol.*) a spoiling; also an injury done to tenants by altering their tenure, ejecting them, and the like. *Stat. Marl. c. 25; Flet. l. 1, c. 11.*

EXIPO'TICOS (*Med.*) ἔξιπῶτικός, from ἔξιπῶμαι, to press out; an epithet for digesting or detensive medicines.

EXISCHIOS (*Anat.*) an epithet signifying jutting out.

EXITURA (*Med.*) a running abscess.

EXITUS (*Law*) the issues or profits from lands.

EXITUS (*Med.*) a prolapsus, or falling of the anus.

EXLEGALITUS (*Law*) he who is prosecuted as an outlaw. *Leg. Ed. Confes. c. 38.*

EX MERO MOTU (*Law*) vide *Ex*.

EXOACANTHA (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 2 *Digynia*.
Generic Character. CAL. umbel universal.—COR. universal.—STAM. filaments five; anthers roundish.—PIST. germ inferior; styles two; stigmas two.—PER. fruit subovate; seeds two.
Species. The single species is a biennial, as the—*Exoacantha heterophylla*, a native of Nazareth.

EXOCHAS (*Med.*) from ἔξ and ἔχω, to have; a tubercle of the anus. *Paul. Æginet. l. 3, c. 59; Gorr. Def. Med.*

EXOCETUS (*Ich.*) the Flying-Fish; a genus of fishes of the Abdominal Order, having the head scaly, a mouth without teeth, and long pectoral fins that enable the fish to suspend itself for a time in the air.

EXOCYSTUS (*Med.*) from ἔξ and κύστις, the bladder; a prolapsus of the inner membrane of the bladder.

EXODIARIUS (*Ant.*) the performer of the exodium.

EXODIUM (*Ant.*) an interlude, or farce, at the end of a play.
Juven. sat. 6. v. 7.
Urbicus exodio risum movet Atellana.

The actor who performed the exodium was called the *exodiarius*. *Liv. l. 7, c. 2; Schol. in Juv. sat. 3, v. 175.*

EX officio (*Law*) vide *Ex*.

EXOMPHALOS (*Med.*) ἑξομφαλος, a prominence of the ἑμφαλος, or navel; likewise the person having such a prominence, particularly when caused by a rupture, which Paulus calls the ἑξομφαλονπέδιος. *Gal. Def. Med.; Paul. Æginet. l. 6, c. 51; Gorr. Def. Med.; Foes. Econom. Hippocrat.*

EXONCHOMA (*Med.*) from ἔξ and ἔλχος, a tumour; a very large tumour.

EXONEIRO'SIS (*Med.*) ἑξονειρώσις, a species of gonorrhœa, commonly called *pollutio nocturna*, when the semen flows involuntarily in sleep. *Hippocrat. Epidem. l. 6; Foes. Econom. Hippocrat.*

EXONERATIONE Sectæ (*Law*) a writ lying for the king's ward to be disburdened of all suit, &c. during the time of the wardship.—*Exoneratione Sectæ ad Curiam Baroniam*, a writ of the same nature sued by the guardian of the king's ward, and directed to the sheriffs, that they distrain him, &c. for not doing suit of court. *F. N. B. 158, 394; New Nat. Brev. 352.*

EXONS (*Mil.*) vide *Exemptis*.

EXOPHTHALMIA (*Med.*) from ἔξ and ὀφθαλμός, an eye; a protuberance of the eye out of its natural position.

EXORCISM (*Theol.*) ἑξορισμός, the laying or casting out spirits.

EXORDIUM (*Rhet.*) the commencement of a speech, by which the orator prepares the minds of the auditors for what is to follow. *Cic. de Inv. l. 1, c. 5; Quintil. l. 4, c. 1.*

EXORESCENTIA (*Med.*) Exacerbation.

EXOSTOSIS (*Anat.*) ἑξόσσις, from ἔξ and ὀστέον, a bone; a preternatural excrescence of a bone, or a hard tumor. *Gal. de Tumor. c. 14; Foes. Econom. Hippocrat.*

EXOSTOSIS is a genus of diseases, in the class *Locales*, order *Tumores*, in Cullen's Nosology.

EXO'STRA (*Ant.*) a bridge thrust out of a turret by pulleys on the walls, by which the besiegers gained an entrance into the town. *Veget. l. 4, c. 21; Turneb. Adv. l. 20, c. 21.*

EXOTERICÆ (*Rhet.*) ἑξωτερικαί, a term applied to such of Aristotle's lectures as were open to all persons.

EXOTIC (*Bot.*) a term applied to plants which are of foreign origin.

EXPANSION (*Nat.*) the swelling, or increase in the bulk of fluids when agitated by heat.

EXPANSUS (*Bot.*) spread out; an epithet for the calyx, as in *Helianthus*.

EX Parte (*Law*) vide *Ex*.

EXPECTANCY, *Estates in* (*Law*) are those which are created by the act of the parties, called *Remainder*, or those, by the act of law, called a *Reversion*.

EXPECTANT (*Law*) an epithet for whatever has a relation to, or dependance upon, another; in this manner there may be a *fee expectant* after a feetail.

EXPECTATIVÆ gratiæ (*Ecc.*) certain bulls given by popes or princes for future benefices before they become void.

EXPECTORANTS (*Med.*) medicines which promote expectoration.

EXPECTORATION (*Med.*) the discharge of mucus from the breast.

EXPEDITA'TÆ arbores (*Law*) trees rooted up, or cut up by the roots. *Flet. l. 2. c. 41.*

TO EXPEDITATE (*Law*) *expeditare*, to cut out the ball of a dog's fore-foot for the preservation of the King's game; and whoever, living near the forest, kept a dog which was not *expeditated* forfeited to the King 3s. 4d. *Crompt. Jur. 152; Manw. For. Laws. part 1, c. 16; 4 Inst. 308.*

EXPELLENTS (*Med.*) medicines supposed to expel morbid humours from the body.

EXPENDITORS (*Law*) persons appointed by the Commissioners of Sewers to disburse the money collected for the repairs of sewers; also the steward who supervises the repairs of the banks, &c. in Romney Marsh is called an *expenditor*.

EXPENSÆ litis (*Law*) costs of suit.

EXPE'NSIS militum non levandis (*Law*) an ancient writ to prohibit the sheriff from levying any allowance for knights of the shire, upon those that hold lands in ancient demesne. *Reg. Orig. 261, &c.* Also a writ for levying expences for Knights of the Parliament, &c. *Reg. Orig. 191.*

EXPERIMENT (*Phil.*) a trial of the effect or result of certain applications and motions of natural bodies in order to discover something of their laws, nature, &c.

EXPERIMENTAL Philosophy is that philosophy which proceeds on experiments.

EXPERIMENTUM crucis (*Phil.*) such an experiment as leads to the true knowledge of things sought after, in the same manner as the cross on the highway directs the traveller in his course.

EXPIRA'TION (*Anat.*) from *ex* and *spiro*, to breathe; that part of respiration which consists in expelling the air out of the lungs.

EXPLORATOR'S (*Ant.*) scouts, or soldiers, who explored the designs of the enemy. *Appian. de Bell. Punic.; Herod.*

1. S, c. 1; *Præcop. de Bell. Persic.* l. 1; *Veget.* l. 8, c. 5; *Mém. l. omne. f. de Re Milit.*; *Panciroll. Notit. Dignit. Imp. Orient.* c. 154.
- EXPLORATORIUM** (*Surg.*) a surgical instrument better known by the name of a probe.
- EXPLOSION** (*Nat.*) a violent expansion of an aerial or elastic fluid accompanied with a sudden noise, as in the case of gunpowder and some gases.
- EXPONENT** of a Power (*Algeb.*) the number or quantity expressing the degree or elevation of the power: thus, in x^2 , 2 is the exponent or index of the square numbers; in x^3 , 3 is the exponent or index denoting the cube of x ; and so on with higher powers. These exponents were expressed by Diophantes in words, as $\alpha\alpha\alpha$, $\alpha\alpha\alpha\alpha$, $\alpha\alpha\alpha\alpha\alpha$, $\alpha\alpha\alpha\alpha\alpha\alpha$, &c. equivalent to 1 a , a^2 , a^3 , a^4 , &c. Lucas Pacioli, or Lucas de Burgo uses the terms *Cosa*, *Censo*, *Cubo*, *Relatio primo, secundo, tertio*, &c. for root, square, cube, &c.: or the abbreviations *ca*, *ce*, *cu*, and \mathbb{R} for root or radicality. Stifelius and his cotemporaries used the following contractions of these words, \mathbb{Q} , 2, 5. But, besides the above contractions, Stifelius, who introduced the word exponent, also made use of the figures now employed.—*Exponent of a Ratio* is the quotient arising when the antecedent is divided by the consequent.
- EXPONENTIAL Calculus** (*Flux.*) the method of differencing or finding the fluxions of exponential quantities, and of summoning up their fluents.—*Exponential Curve* is that whose nature is defined or expressed by an exponential Equation.—*Exponential Equation* is one in which is contained an exponential quantity, as the equation $a^x = b$, or $x^a = a$, &c.—*Exponential Quantity* is that whose power is a variable quantity, as the expression a^x , or x^a . Exponential quantities are of several degrees, a^x of the first order, a^{x^2} of the second order, a^{x^3} of the third order, and so on.
- EXPOSITOR** (*Lit.*) one who explains the writings of others: it is applied particularly to those who profess to expound the scriptures.
- EX Post Facto** (*Law*) vide *Ex*.
- EXPRESS** (*Polit.*) a messenger sent with direct and specific instructions.
- EXPRESSED Oils** (*Chem.*) such as are procured from any substance by simple pressure, as the oil of olives, &c.
- EXPRESSIÖN** (*Algeb.*) any quantity expressed in an Algebraical form, as $3a$, $2ab$, $\sqrt{a^2 \pm c^2}$. It is sometimes called a *function*.
- EXPRESSION** (*Chem.*) the pressing or squeezing any oil or juice out of vegetables, &c.
- EXPRESSION** (*Mus.*) that part of composition, or performance, which makes its appeal to the feelings.
- EXPRESSIVO** (*Mus.*) an Italian epithet signifying with expression.
- EX PROFESSO** (*Law*) by profession.
- EXPURGATORY Index** (*Ecc.*) a book sent forth by the pope, containing a catalogue of those authors and writings which were thought censurable, and forbidden to be read by the priests.
- EXEQUIAL** (*Mus.*) or *funereal*, an epithet applied to music which is used at the funeral ceremony.
- EXSERTUS** (*Bot.*) protruded, an epithet for stamens, or anthers, that stand out of the corolla, or appear above it, as in some species of the *Erica*.
- EXSTIPULATUS** (*Bot.*) without stipules, an epithet for many plants.
- EXSTASIS** (*Med.*) a species of *Catalepsis*.
- EXSUCATION** (*Med.*) vide *Ecchymosis*.
- EXSUCCUS** (*Bot.*) juiceless, an epithet for leaves, as opposed to the *succulent*.
- to **EXTEND** (*Law*) to value the lands or tenements of one bound by a statute, who has forfeited his bond, at such an

- indifferent rate, as, by the yearly rent, the creditor may in time be paid his debt. [vide *Extendi*]
- EXTENDI Facias** (*Law*) or *Extendi*, a writ of execution, or commission to the sheriff, for the valuing of lands or tenements, and sometimes the act of the sheriff, or other commissioner upon this writ.—*Extent in Aid* is a seizure made by the crown when a public accountant becomes a defaulter, and prays for relief against his creditors.
- EXTENSOR** (*Anat.*) an epithet applied to muscles whose office it is to extend any part, in opposition to the *flexor*; as *extensor brevis digitorum pedis*, the muscle that extends the toes; *extensor digitorum communis*, that which extends all the joints of the fingers, &c.
- EXTENT** (*Mus.*) the compass of a voice, or instrument.
- EXTENT** (*Law*) vide *Extendi facias*.
- EXTENUATION** (*Med.*) the leanness of the whole body.
- EXTENUATION** (*Rhet.*) a figure of speech by which the things are diminished, or made less than they really are.
- EXTERIOR polygon** (*Fort.*) the outlines of the works drawn from one outer angle; or the distance of one outer bastion to the point of another reckoned quite round the works.—*Exterior talus*, the slope allowed the work on the outside from the place towards the champaign, or field.
- EXTERMINATION** (*Algeb.*) or *Exterminating*, the taking away certain unknown quantities from depending equations, so as finally to have only one equation containing one unknown quantity.
- EXTERNAL** (*Math.*) an epithet for those angles which are formed without a figure by producing its sides externally. [vide *Angle*]
- EXTERNAL digestives** (*Surg.*) applications which ripen a swelling, and breed good and laudable matter in a wound, so as to prepare it for cleansing.
- EXTERNUS Auris** (*Anat.*) a muscle, the same as the *laxator tympani*.
- EXTINGUISHMENT** (*Law*) the extinction or annihilation of a right, estate, &c. by means of its being merged or consolidated with another, generally a greater, or more extensive right.—*Extinguishment* is applied to different rights, as Commons, Estates, Copyholds, Debts, Liberties, Services, and Ways.—*Extinguishment of Common* is by purchasing land wherein a person hath Common appendant.—*Extinguishment of Estates* is when a man hath a yearly rent out of lands, and afterwards purchases the lands whereout it ariseth.—*Extinguishment of Copyhold* is by any act of the copyholder's, which denotes his intention not to hold any longer of his lord.—*Extinguishment of debt* is when a *feme sole* takes the debtor to husband.—*Extinguishment of Liberties* is when the liberties or franchises, granted by the king, come to the crown again.—*Extinguishment of Services* is when the lord purchases or accepts parcel of the tenancy, out of which an entire service is to be paid.—*Extinguishment of Ways* is if a man hath a highway as appendant, and afterwards purchases the land wherein the way is.
- EXTIRPATION** (*Surg.*) the complete removal or destruction of any part, either by excision, or by means of caustics.
- EXTIRPATIONE** (*Law*) a writ which lies against one who, after a verdict found against him for land, &c. does spitefully overthrow any house upon it. *Reg. Jud.* 13, 36.
- EXTORTION** (*Law*) the unlawful act of any public officer who, by colour of his office, takes any money, or valuable thing, where none at all is due. [vide *Exaction*]
- EXTRA Constellary Stars** (*Astron.*) such as are not properly included in any space.—*Extra Mundane Space*, the infinite void space which is supposed to be extended beyond the bound of the universe.
- EXTRA-JUDICIAL** (*Law*) is when judgment is had in a

cause not depending in that court where it is given, or wherein the judge has not jurisdiction.—*Extra-parochial*, i. e. out of the parish, an epithet for any thing privileged or exempt from the duties of a parish, as extra-parochial land, &c.

EXTRACT (*Law*) a copy or draught of any writing, or part of a writing.

EXTRACT (*Chem.*) the purer parts of any substance extracted from its grosser parts.

EXTRACT (*Med.*) a solution of the purer parts of a mixed body inspissated by distillation, or evaporation, nearly to the consistency of honey.

EXTRACTA curiæ (*Archæol.*) the issues or profits of holding a court, which arise from customary fines, fees, &c.

EXTRACTION (*Surg.*) the taking extraneous substances out of the body.

EXTRACTION of roots (*Math.*) the finding out of any number or quantity, which, being multiplied by itself once, twice, or three times, &c. gives the respective power, out of which the given root is to be extracted; as the extraction of the square root, the cube root, &c.

EXTRACTOR (*Surg.*) a surgical instrument used in the operation of cutting for the stone.

EXTRA-FOLIA'CEÆ (*Bot.*) an epithet for stipules growing on the outside of leaves, or below them; as in *Betula*, *Tilia*, &c.

EXTRA'DOS (*Archit.*) the outside of an arch, or vault. [*vide Building*]

EXTRAJUDICIAL (*Law*) *vide Extra.*

EXTRAMUNDANE (*Astron.*) *vide Extra.*

EXTRAORDINA'RII (*Ant.*) a chosen body of men in the Roman army picked from the auxiliary forces of their allies, consisting of a third part of the cavalry, and a fifth of the foot. *Polyb.* l. 6, c. 24; *Liv.* l. 34, c. 47, &c.

EXTRAORDINARY (*Polit.*) an epithet for whatever is out of the common course, as an—*Extraordinary ambassador*, one sent to negotiate on some special affair.—*Extraordinary courier*, one sent express on an urgent occasion.—*Extraordinary gazette*, a gazette published on purpose to announce some particular event.

EXTRA-PARO'CHIAL (*Law*) *vide Extra.*

EXTRA-TEMPORA (*Ecc.*) a licence from the pope to take holy orders at any time.

EXTRAVAGANTES (*Ecc.*) decretal epistles published after the Clementines by Pope John XXII. and other popes, and added to the canon law. They were so called because they were not ranged in any order.

EXTRAVAGANZA (*Mus.*) Italian for a sort of composition remarkable for its wildness and incoherence.

EXTRAVASATION (*Surg.*) from *extra*, without, and *vas*, a vessel; a term applied to the fluids which are out of their proper vessels or receptacles; as when the blood is effused on the surface, or in the ventricles of the brain, there is said to be an *extravasation*; or when the urine, in consequence of a wound, makes its way into the cellular substance among the abdominal viscera, it is said to be *extravasated*.

EXTREME and mean proportion (*Geom.*) is when a line is so divided that the whole line is to the greater segment, as that segment is to the less.

EXTREME unction (*Ecc.*) a solemn anointing of any person who is at the point of death; which is one of the seven sacraments in the Romish church.

EXTREMES (*Log.*) the two extreme terms of the conclusion of a syllogism, namely, the predicate and subject.

EXTREMES (*Mus.*) those parts in a composition or piece of harmony which are at the greatest distance from each other in point of gravity or acuteness.

EXTREMES conjunct (*Trigon.*) the two circular parts that lie

next the middle part, in distinction from the *disjunct extremes*, which lie remote from the middle.

EXTRE'MITY (*Mus.*) the last note in any compass of sounds, reckoning from grave to acute, or from acute to grave.

EXTRINSECUS (*Anat.*) an epithet for the external parts of the body, particularly the limbs.

EXUBERES (*Med.*) an epithet for children that are weaned.

EXULCERATION (*Surg.*) an ulceration, or turning to an ulcer.

EXUMBILICATION (*Surg.*) a starting of the navel.

EXUNGULATION (*Chem.*) the cutting off the white part from the leaves of roses.

EXUPERARE (*Archæol.*) to apprehend or seize, as “*Exuperare vivum aut mortuum.*” *Leg. Edm. c. 2.*

EXUVIÆ (*Nat.*) the sloughs of serpents, i. e. the skins which they cast off in the spring.

EYE (*Anat.*) *oculus*, the organ of vision, is divided into external and internal parts. The external parts are the Eyebrows, or *supercilia*; the Eyelashes, *cilia*; the Eyelids, *palpebræ*, to which belong the external *canthus*, the internal *canthus*, and the *tarsus*, or margin of the eyelid; the Lachrymal Glands; the Lachrymal Caruncle; the *puncta lachrymalia*; the Lachrymal Ducts; the Lachrymal Sac; the Nasal Duct; and the *membrana conjunctiva*, called also the white of the eye. The internal parts of the eye compose what is called the Bulb or Globe of the eye, and consist of membranes, chambers, and humours. Among the membranes of the eye are—the *membrana sclerotica*, a horny membrane, which forms the spherical cavity of the eye, the more convex part of which is called the *cornea*; and the *membrana choroidea*, which forms the middle tunic of the bulb. The circular continuation of the choroidea in the anterior surface is called the *iris*; in the posterior surface the *uvea*. The round opening in the centre is called *pupilla*, the Pupil, which can be dilated or contracted at pleasure. The *membrana retina* is the innermost tunic, of a white colour, being an expansion of the medullary part of the optic nerve. The chambers of the eye are the *anterior* and the *posterior*, which are filled with aqueous humour. The humours of the eye are the Aqueous Humour which fills both the chambers; the Crystalline Lens, or pellucid body, included in an exceedingly fine membrane, or *capsula*; the Vitreous Humour, which is a beautifully transparent substance that fills the whole bulb of the eye behind the crystalline lens. The muscles, by which the eye is moved in the orbit, are six in number. They are surrounded with much adeps that fills up the cavities in which the eyes are seated. The arteries are the internal orbital, the central, and the ciliary arteries. The veins empty themselves into the external jugulars. The nerves are the optic, and branches from the third, fourth, fifth, and sixth pair. The bones which form the orbits of the eye are the frontal, maxillary, jugal, lachrymal, ethmoid, palatine, and sphenoid.

EYE (*Bot.*) *vide Hylum.*

EYE (*Archit.*) the middle of the volute of the Ionic capital, cut in the form of a little rose, &c.

EYE (*Print.*) the thickness of the type used in printing, or more properly the top or face of the letter.

EYE (*Archer.*) *vide Bull's-Eye.*

EYE (*Mar.*) *vide Bull's-Eye.*

EYE (*Min.*) *vide Cat's-Eye.*

EYE (*Astron.*) or *Bull's-Eye*, another name for *Aldebaran*.

EYEBRIGHT (*Bot.*) the *Euphrasia*, an annual, so called from its supposed efficacy in disorders of the eyes.

EYE-GLASS (*Mech.*) the glass that is put close to the eye, whether used apart or in any optical instrument.

EYRE (*Law*) *vide Eire.*

F.

FAC

- F. (*Ant.*) an abbreviation for Filius, &c. [vide *Abbreviations*]
 F. (*Archæol.*) as a numeral letter, stood for forty, and with a dash over it thus, \bar{F} , for 40,000.
 F. (*Law*) vide *Abbreviations*.
 F. (*Gram.*) vide *Abbreviations*.
 F. (*Her.*) stands for the nœbril or navel point in an escutcheon. [vide *Heraldry*]
 F. (*Mus.*) the fourth note of the natural diatonic scale. [vide *Cliff*]^o—*F* above the *Base-Cliff Note*, is that *F* which occupies the first space of the treble stave.
 F. stands as an abbreviation for *Fortè*.
 F. (*Law*) the letter with which felons are branded on receiving benefit of clergy.
 F. (*Chron.*) one of the seven dominical letters. [vide *Chronology*]
 F. (*Med.*) or *ft*, an abbreviation in prescriptions for fiat or fiant, as *F. s. a. fiat secundum artem*, let it be done according to art.
 FA (*Mus.*) the name given by Guido to the fourth note of his hexachord, answering to the letter F in the natural hexachord.—*Fa la* was the name of a short song set to music, having the syllables *Fa la* at certain intervals.—*Fa-Burden*, an old term for a sort of counterpoint.
 FA'BA (*Bot.*) the *Vicia narbonensis* of Linnæus.
 FA'BA-DULCIS (*Bot.*) a species of the *Cassia*, the *Mimosa scandens* of Linnæus.
 FABAGINEA (*Bot.*) the *Zygophyllum fabago* of Linnæus.
 FABA'LE (*Bot.*) a bean straw or stalk on which the cod hangs.
 FABA'GO (*Bot.*) the *Zygophyllum fabago et coccincum* of Linnæus.
 FABARIA (*Bot.*) the *Sedum telephium* of Linnæus.
 FABARIA *Calendæ* (*Ant.*) the first of June, sacred to the goddess Carna, to whom beans were then offered. *Macrob. Saturn.* l. 1, c. 12.
 FA'BER (*Ich.*) a kind of fish mentioned by Columella.
 FA'BRIC (*Com.*) a term used to distinguish the different species of the same article, as the *fabric* of St. Quintin, the *fabric* of Valenciennes, &c.
 FABR'ICIA (*Bot.*) a species of the *Melaleuca* of Linnæus.
 FA'BRICK *Lands* (*Law*) lands given towards the re-building or repairing of cathedrals, churches, &c.
 FACE (*Anat.*) $\pi\rho\sigma\sigma\omega\pi\omega\nu$, *facies*, the lower and anterior part of the skull, or *cranium*. *Ruff. Ephes. de Appell. Part. Corp. hum.* l. 1, c. 7; *Cels.* l. 8, c. 1; *Gal. Isagog.* c. 10.
 FACE (*Mech.*) signifies generally any thing that lies before the eye, in distinction from the back; as the *face* of a stone, an anvil, &c.
 FACE (*Archit.*) a member of the Architrave. [vide *Fascia*]
 FACE (*Astrol.*) the third part of a sign, each side being supposed to be divided into faces, each face consisting of ten degrees.
 FACE (*Fort.*) a term applied to many parts of a fortification, as the—*Face of a Bastion*, the two sides, reaching from the flanks to the salient angle, which is the most advanced part towards the field.—*Face prolonged*, or *extended*, that part of the line of defence, *razant*, which is betwixt the angle of the shoulder and the curtain.—*Face of a Place*, the front, comprehended between the flanked angles of the two neighbouring bastions, composed of a curtain, two flanks, and two faces.
 FACE of a gun (*Gunn.*) the superficies of the metal at the extremity of the muzzle.
 FACE of a square (*Mil.*) the side of a battalion, &c. when

FAC

- formed into a square, as "The right *face*," "The left *face*," "The front *face*," and "The rear *face*."
 TO FACE (*Mil.*) to look towards an object: in which sense it is employed in many military phrases, as "To *face* about, to the right, left," &c. a word of command in military exercising. "To *face* the enemy," to oppose a front to him. "In *face* of the enemy," under the line of his fire.
 FACE-PAINTING (*Paint.*) the art of taking portraits.
 FA'CET (*Mech.*) the small side of a diamond, &c. which is cut with a great number of angles.
 FACH (*Med.*) a Turkish medicine, of use as an antidote against poisons.
 FA'CIA (*Archit.*) vide *Fascia*.
 FACIAL (*Anat.*) belonging to the face, as the *facial* nerve, a part of the auditory nerve.
 FA'CIES *Hippocratea* (*Med.*) that particular disposition of the features which immediately precedes the stroke of death; so called from Hippocrates, by whom it has been so justly described in his prognostics. *Cels.* l. 2, c. 6.
 FA'CINGS (*Mil.*) the different movements of the men to the right, left, &c. in order to face an object. Also the lapels, cuffs, and collar of a military uniform, which are generally of a different colour from the rest.
 FA'CTA *armorum* (*Archæol.*) feats of arms, justs, tournaments, &c.
 FA'CTIO (*Ant.*) a name primarily given to the different parties of combatants or charioteers, who were distinguished by different colours, as green, blue, red, and white. *Juven. Sat.* 11, v. 195.

— et fragor aurem
 Percutit, eventum viridis quo colligo panni.

Mart. l. 14, ep. 131.

Si veneto, prasinove faves, qui coccina sumis,
 Ne fias istâ transfuga veste vide.

Sidon. Apollin. carm. 23.

— Micant colores
 Albus vel venetus, virens, rubensque.

- To these colours Domitian added two others. *Petron.* c. 28; *Plin.* l. 8, c. 47; *Plin.* l. 9, ep. 6; *Suet. in Domit.* c. 7, &c.; *Fest. de Verb. Signif.*; *Tertull. de Spectac.* c. 9; *Panvin. de Lud. Cir.* l. 1, c. 10; *Panciroll. Descrip. Urb. Rom. apud Græv. Thes. Antiq. Rom.* tom. iii, p. 357, &c.
 FA'CTION (*Mil.*) French for the duty done by a soldier when he stands sentry, &c. as "Entrer en *Faction*," &c. to come upon duty.
 FACTIONNAIRE (*Mil.*) French for the soldier that does all sorts of duty.
 FACTITIOUS (*Chem.*) any epithet for what is made by art, in distinction from what is natural. Soap is a factitious substance; fuller's earth is a natural one.
 FA'CTO (*Law*) in fact; a term applied to what is actually done. [vide *De Facto*]
 FA'CTOR (*Com.*) the agent for a merchant abroad, who is authorized by a letter of attorney, with a salary or allowance for his care, called *Factorage*.
 FACTOR (*Arith.*) a name given to the two numbers or quantities that are multiplied together; so called because they, *faciunt productum*, make the product.
 FACTOR (*Algeb.*) the quantities so called which constitute an algebraical expression, answering to the *Divisor* in Arithmetic, as $a + b$, and $a - b$, which are the factors of $a^2 - b^2$; also a, b, c, d , are the factors of the quantity $abcd$.

- FACTORAGE** (*Com.*) vide *Factor*.
- FACTORY** (*Com.*) a place in a distant country, where a considerable number of factors reside for the convenience of trade; also the traders themselves collectively.
- FAC-TOTUM** (*Com.*) one who manages all the concerns of another, domestic or mercantile, &c.
- FAC-TOTUM** (*Print.*) a border within which printers inclose an initial letter.
- FACTUM** (*Law*) a man's own act and deed, particularly in the civil law, for any thing stated and made certain.
- FACTUM** (*Arith.*) the product of two quantities multiplied together, as the factum of 3 and 4 is 12; 3 and 4 being the factors.
- FA'FULÆ** (*Astron.*) a name given to certain bright spots in the sun.
- FA'CULTY** (*Phy.*) that power by which a living creature moves and acts: if this power be exerted by the animal body alone, it is called a corporeal or animal faculty; as that by which a man walks, or moves his limbs, &c.: if it belong to the mind or soul of a rational agent, it is called the rational faculty. The faculty may also be distinguished into the *natural*, if it be that by which the body is nourished and increased; and the *vital*, if it be that by which life is preserved, &c.
- FACULTY** (*Law*) is equivalent, in Scotch law, to power.
- FÆ'CES** (*Chem.*) the gross substance, dregs, settlings, or impurities, which settle after fermentation, or remain after the purer, more volatile, and fluid parts have been separated by distillation, evaporation, &c.
- FÆ'CULA** (*Chem.*) small dregs or lees.
- FAGA'GO** (*Bot.*) a species of the *Zygophyllum* of Linnæus.
- FAGA'RA** (*Bot.*) a genus of plants, Class 4 *Tetrandria*, Order 1 *Monogynia*.
- Generic Character.* CAL. *perianth* four-cleft.—COR. *petals* four.—STAM. *filaments* four; *anthers* ovate.—PIST. *germ* ovate; *style* filiform; *stigmas* two-lobed.—PER. *capsule* globular; *seed* single.
- Species.* The species are shrubs, as the—*Fagara euodia*, seu *Euodia*, Sweet-scented Fagara, native of the Friendly Islands.—*Fagara pterota*, *Schenus*, seu *Pterota*, seu *Lentiscus*, Wing-leaved Fagara, or Bastard Iron-Wood, native of Jamaica.—*Fagara Tragodes*, seu *Rhus*, Prickly-leaved Fagara, native of Domingo, &c.
- FAGARA is also the *Xanthoxylon Clava Herculis*.
- FAGONIA** (*Bot.*) a genus of plants, Class 10 *Decandria*, Order 1 *Monogynia*.
- Generic Character.* CAL. *perianth* five-leaved.—COR. *petals* five.—STAM. *filaments* ten; *anthers* roundish.—PIST. *germ* five; *style* awl-shaped; *stigma* simple.—PER. *capsule* round; *seeds* ovate.
- Species.* The species are perennials, as the *Fagonia Cretica*, seu *Trifolium*, the Cretan Fagonia, native of Candia.—*Fagonia Arabica*, Arabian Fagonia.—*Fagonia Hispanica*, Spanish Fagonia. *Chus. Hist.*; *Bauh. Hist.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat*; *Raii Hist. Plant.*; *Tourn. Inst.*
- FAGOPY'RUM**, the *Polygonum divaricatum* of Linnæus.
- FAGOT** (*Ecc.*) a badge which was formerly worn on the sleeve of the upper garments by such persons in the Romish church as had recanted and abjured heresy.
- FAGO'TS** (*Mil.*) French for the men who were hired by the officers to muster, in order to make a false return of companies that were not completed.
- FAGOTTINO** (*Mus.*) or *Fagotto*, Italian for the bassoon.
- FAGRÆ'A** (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 1 *Monogynia*.
- Generic Character.* CAL. *perianth* one-leaved.—COR. one-petalled.—STAM. *filaments* five; *anthers* ovate.—PIST. *germ* superior; *style* filiform; *stigma* peltate.—PER. *berry* ovate; *seeds* smooth.

- Species.* The single species is a shrub, as the *Fagræa zeylanica*, native of Ceylon.
- FAGUS** (*Bot.*) a genus of plants, Class 21 *Monoccia*, Order 8 *Polyandria*.
- Generic Character.* CAL. *perianth* one-leaved.—COR. none.—STAM. *filaments* many; *anthers* oblong.—PIST. *germ* covered with the calyx; *styles* three; *stigmas* simple.—PER. *capsule* large; *seed* nuts, one or two.
- Species.* The species are trees, as—*Fagus Castanea*, seu *Castanea*, Common Chesnut Tree,—*Fagus sylvatica*, Common Beech Tree.—*Fagus ferruginca*, American Beech Tree. *Bauh. Hist.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*
- FAGUS is also the *Fagus betulus* of Linnæus.
- FAIDA** (*Law*) malice or deadly feud. *Leg. H. 1. c. 88.*
- FAILING** of *Record* (*Law*) is when the defendant having a day to prove a matter by record, he fails, or else brings in such an one as is no bar to action.
- FAILLIS** (*Her.*) a term used to denote some failure or fraction in an ordinary, as if it were broken or a splinter taken from it.
- FAILLON** (*Mil.*) a kind of standard formerly made use of in the army for assembling the baggage.
- FA'ILURE** (*Com.*) an unsuccessful termination of a man's mercantile dealings.
- FAINT** *action* (*Law*) is such an one, as, that though the words of the writ are true, yet, for certain causes, there is no title to recover thereby. *Co. Lit. 361.*
- FAINT** *vision* (*Opt.*) is when a few rays make up one pencil, which, though it may be distinct, yet is obscure.
- FAINTS** (*Chem.*) the weak spirituous liquor that runs off from the still after the proof spirit is taken away.
- FAIR** (*Mar.*) an epithet applied to different things, as "A fair wind," in opposition to "A foul wind."—Ropes are said to "lea fair," when they suffer little friction in a pulley.—A *Fair-Curve*, in delineating ships, is a winding line whose shape is varied according to the part of the ship it is intended to describe.—*Fair way* of a *Channel* is the path of a narrow bay, river, or harbour, in which ships usually go in their passage up and down.
- FAIR MAID OF FRANCE** (*Bot.*) the *Ranunculus aconitifolius* of Linnæus, a perennial.
- FAIT** (*Law*) a deed or writing lawfully executed, to bind the parties thereto.—*Fait enrolle* is a deed of bargain and sale.
- FAITOURS** (*Law*) a name for vagabonds or idle livers, mentioned in statute 7 R. 2, c. 5.
- FAKE** (*Mar.*) one roll of a cable or rope which is coiled round.
- FA'KIR** (*Theol.*) or *Faqueer*, a sort of dervises or Mahometan monks.
- FALA** (*Ant.*) a high tower made of wood. *Fest. de Verb. Signif.*
- FALANG** (*Archæol.*) a jacket or close coat.
- FALA'RICA** (*Ant.*) a spear bound with wild fire, to shoot out against a tower or any other object. *Non. l. 18, c. 18*; *Ser. in Virg. Æn. l. 9*; *Vegct. l. 4, c. 18.*
- FALCADE** (*Man.*) a horse is said to make *falcades* when he throws himself upon his haunches two or three times, as in very quick curvets.
- FALCA'RIA** (*Bot.*) the *Sium falcaria* of Linnæus.
- FALCA'TA** (*Bot.*) the *Medicago annata* of Linnæus.
- FALCATED** (*Astron.*) one of the phases of the moon, vulgarly called horned, when she appears in the form of a crescent, like a *falx*, sickle, or reaping hook.
- FALCATURA** (*Archæol.*) one day's mowing performed by an inferior tenant, as a custom for any service due to his lord.
- FALCHION** (*Mil.*) a kind of sword turned up somewhat like a hook.
- FALCIFORM PROCESS** (*Anat.*) a process of the *dura*

mater, in the form of a *falx*, or sickle, that arises from the *crista galli*, and separates the two hemispheres of the brain.

FALCINELLUS (*Orn.*) a sort of heron, so called from the crookedness of its beak.

FALCO (*Orn.*) a genus of birds of the Order *Accipitres*.

Generic Character. Bill hooked, the base covered with a cere; head covered with close-set feathers; tongue bifid.

Species. This genus comprehends the Eagle, Osprey, Kite, Falcon, Buzzard, Hawk, &c. as the—*Falco chrysaetos*, the Golden Eagle.—*Falco fulvus*, the Ring-tailed Eagle.—*Falco ferox*, the Fierce Eagle.—*Falco Harpyga*, the Crested Eagle, which inhabits South America, and is said to be able to cleave a man's skull at a stroke.—*Falco ossifragus*, the Osprey.—*Falco milvus*, the Kite.—*Falco communis*, the Common Falcon.—*Falco nisus*, the Sparrow Hawk.—*Falco palumbarius*, the Goshawk.—*Falco buteo*, the Buzzard.—*Falco gyrfalco*, the Gyrfalcon.—*Falco candidus*, the White Gyrfalcon.—*Falco cyaneus*, the Hen Harrier.—*Falco lanarius*, the Lanner.—*Falco tinnunculus*, the Kestrel.—*Falco subbuteo*, the Hobby.—*Falco esalon*, the Merlin.

FALCON (*Orn.*) a bird, nearly allied to the hawk, which is about the size of a raven, and is capable of being trained for sport, in which it was formerly much employed. The species are classed under the genus *Falco*, in the Linnean system, together with the Eagle, the Hawk, &c. [vide *Falco*]

FALCON (*Gun.*) a small piece of cannon formerly so called.

FALCON (*Her.*) These birds are usually represented with bells on their legs, and when decorated with hood, bells, virols, or rings, and leishes, they are said in blazon to be hooded, belled, jessed, and leished, as in the annexed figure. He beareth "Azure, a falcon volant argent, armed, jessed, and belled or, within a bordure ermine; name *Fainbourne*."

FALCONER (*Falcon.*) one who looks after and trains hawks.

FALCONET (*Gun.*) a small sort of falcon or gun so called.

FALCONRY, the art of keeping and training hawks.

FALDA (*Archæol.*) a sheep-fold.

FALDÆ CURSUS (*Archæol.*) a sheep-walk, or feed for sheep.

FALDAGE (*Archæol.*) the privilege which, anciently, lords reserved to themselves, of setting up folds in any fields of their manors, for the better manuring them; and this not only with their own but their tenants' sheep.

FALDE-FEY (*Law*) or *Faldfee*, a fee or rent paid for the privilege of folding.

FALDWORTH (*Archæol.*) a person of such an age that he may be reckoned of some decennary.

FALERA (*Falcon.*) a disease in hawks.

FALERÆ (*Archæol.*) the tackle or furniture of a cart or wain. *Mon. Angl.* tom. 2, p. 256.

FALE'SIA (*Archæol.*) a great rock, bank, or hill, by the sea side.

FALKIA (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 2 *Digynia*.

Generic Character. CAL. *perianth* one-leaved.—COR. one-petalled.—STAM. *filaments* five; *anthers* ovate.—PIST. *germus* four; *styles* two; *stigma* capitate.—PER. none; *seeds* four.

Species. The single species is the *Falkia repens*, Creeping Falkia, a perennial, native of the Cape of Good Hope.

FALL (*Phy*) the descent or natural motion of bodies towards the centre of the earth.

FALL (*Mil.*) a term equivalent to a surrender when a town ceases to be able to hold out any longer.

FALL (*Mar.*) this term is used in some sea phrases, as—"The fall of a tackle," the loose end of a tackle.—"To fall a-stern," to be driven backwards.—"To fall down," to sail down a river or towards its opening.—"To fall in,"

to meet with a ship.—"To fall off," i. e. not to keep so near the wind as she should do.—"Fall not off!" a command to the steersman to keep the ship near the wind.—*Land-Fall*, when the ship makes or sees land.—*Fall*, among ship-builders, is when one part of the ship has risings above the others.

FALLING-SICKNESS (*Med.*) vide *Epilepsia*.

FALLING OFF (*Mar.*) the movement or direction of the ship to leeward of the point whither it was lately directed. [vide *Fall*] Also the angle contained between her nearest approach to the direction of the wind and her farthest distance from it.

FALLOPIAN TUBES (*Anat.*) two ducts, so named from Fallopius, their discoverer, arising on each side the fundus of the uterus, and extended to the ovaries. They are of great use in the process of conception.

FALLOW (*Husband.*) a piece of land laid up or left to remain untilled for a time; the act of so leaving land is called *fallowing*.

FALLOW DEER (*Zool.*) a species of deer, the *Cervus dama* of Linnæus, having horns branched, recurved, and compressed. This species is the most common in Europe, particularly in England, where it forms one of the ornaments of the park.

FALLOW-FINCH (*Orn.*) or *White-Ear*, a sort of bird, the *Motacilla cananthe* of Linnæus.

FALLS (*Mar.*) vide *Fall*.

FALSE QUARTER (*Vet.*) a rift, or crack in the hoof of a horse, which is an unsound quarter, seeming as if it were a piece put in, and not entire.

FALSE CONCEPTION (*Med.*) the formation of a shapeless mass of flesh, &c. in the uterus.

FALSE FLOWER (*Bot.*) a flower which does not seem to produce any fruit.

FALSE DIAMOND (*Min.*) a diamond counterfeited with glass.

FALSE ARMS (*Her.*) those wherein the fundamental rules of heraldry are violated, as if metal be put upon metal, colour upon colour.

FALSE IMPRISONMENT (*Law*) the trespass of imprisoning a man without lawful cause; also the name of the writ brought upon the commission of such a trespass. *False claim* is when a man claims more than his due.

FALSE (*Mil.*) an epithet employed on many occasions; as *False alarm*, an alarm given either through ignorance, or with the view of trying the vigilance of the men.—*False attack*, a feigned attack made for the purpose of diverting the enemy from the real point of attack.—*False muster*, that in which men, not actually enlisted, pass for soldiers.

FALSE ROOF (*Carpent.*) that part of a house which is between the roof and the covering.

FALSE BRAY (*Fort.*) a small mound of earth, four fathoms wide, erected on a level round the foot of the rampart on the side which is towards the field, bordered with a parapet to defend the moat.

FALSE (*Mar.*) an epithet in sea phrases; as a *False keel*, a second keel sometimes put under the first to make it deeper.—*False stem*, a second stem fastened to one that is too flat.—*False post*, a piece of timber fixed on the aft part of the stern post to make good a deficiency therein.

FALSI CRIMEN (*Law*) fraudulent concealment, in the Civil Law, or subornation with design to darken or hide the truth, so as to make things appear otherwise than what they really are.

FALSIFY (*Law*) to prove a thing to be false; as "To falsify a record," "To falsify a verdict," "To falsify recovery."

TO FALSIFY A THRUST (*Fenc.*) to make a feigned pass.

FALSING OF DOOMS (*Law*) an old term, in the Scotch Law, for an appeal.

FALSO JUDICIO (*Law*) a writ which lies for false judgment

given in the county, hundred, court baron, or other courts that are not of record.—*Falso returno Brevium*, a writ which lies against a sheriff for making false returns of writs. *Reg. Jud.* 43.

FAMA clamosa (*Law*) a judicial procedure of the church of Scotland, wherein a ground of action is laid before a presbytery, against one of its members, independently of any regular complaint by a particular accuser.

FAMILIA (*Law*) signified all the servants that were under one master, or that portion of land which was sufficient to support one family.

FAMILIARS (*Ecc.*) officers of the Inquisition, who assist in the apprehension of such as are accused. They are so called because they assist the inquisitor, and belong to his family.

FAMILY (*Archæol.*) a hide of ploughed land.

FAMILY of Curves (*Math.*) a congeries of several curves of different orders or kinds, all which are defined by the same equation, but in a different manner, according to their different orders.

FAMILY (*Bot.*) a term applied by Linnæus to plants naturally allied to each other; he divides the vegetable kingdom into seven families; namely, 1. *Fungi*; 2. *Algæ*; 3. *Musci*, or Mosses; 4. *Filices*, or Ferns; 5. *Gramina*, or Grasses; 6. *Palmeæ*, or Palms; 7. *Plantæ*, or plants, including all that are not in the foregoing families.

FAN (*Her.*) vide *Winnowing Basket*.

FANAM (*Com.*) a small coin in India, both of gold and silver; the former of which is valued at about 6*d.*, and the latter at 4½*d.*

FANATICI (*Ant.*) a sort of enthusiasts among the Romans, so called because they spent most of their time, *fanis*, in the temples. They pretended to revelations and inspirations, and, in their frantic fits, they committed many extravagances.

FANAUX (*Mil.*) French for lights at the top of a high tower at the entrance of a sea-port.

FANCIES (*Mus.*) lively little airs.

FANDANGO (*Mus.*) a dance much used in Spain, the air of which is lively, and much resembling the hornpipe.

FANG-TOOTH (*Her.*) has been sometimes borne as a charge in the escutcheon.

FANGOT (*Com.*) a quantity of wares, as raw silk, &c. containing from one to two hundred weight, three quarters.

FANION (*Mil.*) in the Italian *Ganfonne*, a particular standard, which was carried formerly in front of the ordinary belonging to a brigade in the French service.

FANNA'TIO (*Archæol.*) a term used, in the forest laws, for the fawning, or bringing forth young hinds.

FANNEL (*Ecc.*) a sort of ornament like a scarf, worn by a mass priest on the left arm when he officiates.

FANNERS (*Husband.*) a machine for winnowing corn.

FANO (*Com.*) a small weight used at Goa, and other places in the East Indies, equal to two Venetian carats.

FANON (*Com.*) a coin, current on the coast of Malabar, worth about five-pence English money.

FAN-PALM (*Bot.*) the *Chamærops humilis* of Linnæus.

FANTA'SIA (*Mus.*) a kind of air in which the composer is not confined to such strict rules as in ordinary cases.

FAONA'TIO (*Archæol.*) vide *Fannatio*.

FAPE'SMO (*Log.*) the fourth imperfect mood of the first figure of a categorical syllogism.

FARAND-MAN (*Archæol.*) a merchant stranger, to whom, according to the practice of Scotland, justice ought to be done with all expedition, that his business and journey be not hindered.

FARATE'LE (*Com.*) a weight, made use of in some parts of India, equal to two pounds Lisbon.

FARCE (*Lit.*) a sort of mock comedy, which contains much of grimace and buffoonery.

FARCES (*Cook.*) meat chopped small and well spiced, &c. fit for a stuffing.

FARCIMINALLIS tunica (*Anat.*) a coat pertaining to a child in the womb, which receives the urine from the womb; it is so called because, in many animals, it resembles a gut pudding. The existence of this membrane in the human subject has been denied.

FARCIN (*Vet.*) a sort of mange among horses and oxen.

FARCTURA (*Med.*) the stuffing any exenterated animal or fruit with medicinal ingredients.

FARCTUS (*Bot.*) stuffed, an epithet for a leaf; *folium farctum* is a leaf of pith, or pulp, in opposition to *tubulosum*, tubular or hollow; it is also applied to a stem and a pericarp.

FARCOY (*Vet.*) a disease in horses something similar to a leprosy.

FARDEL of land (*Archæol.*) the fourth part of a yard of land.

FARDINGALE (*Cus.*) a hoop made of whalebone, by which females formerly used to spread out their petticoats.

FARDING Deal (*Archæol.*) the fourth part of an acre of land.

FARE (*Com.*) money paid for the passage of a person in any vehicle, either by land or water.

FARFARA (*Bot.*) the *Fusselago farfara* of Linnæus.

FARINA (*Nat.*) signifies literally meal or flour; but is also applied to the pulverulent and glutinous part of wheat, and other seeds, before it is ground as well as after.

FARINA'GIUM (*Archæol.*) toll of meal or flour. *Ordin. Insul. de Jersey.* 17 *Edw.* 2.

FARLEU (*Archæol.*) a duty of sixpence paid to the lord of the manor of West Slapton, in Devonshire, in the western parts; *farleu* being the best thing generally, as *heriot* is the best beast.

FARLINGARII (*Archæol.*) whoremongers and adulterers.

FARM (*Law*) a large message of land taken by lease under a certain yearly rent payable by the tenant.

FARMER (*Law*) he who holds a farm, and is a tenant or lessee thereof.

FARRAGO (*Husband.*) a mixture of several sorts of grain sown in the same plot of ground, or afterwards mingled together.

FARREA Nubes (*Med.*) vide *Ptyriasis*.

FARRIER (*Vet.*) signifies literally one who professes to shoe horses, but is also used for a horse doctor, now called *veterinary surgeon*.

FARRIER'S Company (*Her.*) consists of a master, three wardens, twenty-four assistants, and thirty-nine on the livery. Their armorial ensigns are, as in the annexed figure, *argent*, three horse-shoes, *sable*. The Farriers trace their origin to one Henry de Ferrarius, or Ferrers, who was farrier, or master of the horse, to William the Conqueror, from whom he received the Honour of Tutbury, in Staffordshire.

to **FARROW** (*Husband.*) to bring forth pigs.

FARSETIA (*Bot.*) the *Cheiranthus farsetia* of Linnæus.

FARTHELLING lines (*Mar.*) small lines made fast to all the top-sails, top-gallant sails, and the mizzen-yard arm.

FARTHING (*Com.*) in Saxon *feorþhing*, or *feorþhing*, i. e. *fourþhing*; the fourth part of a Saxon penny; there were also farthings of gold, which were the fourth part of a noble, or twenty-pence of silver.

FASCES (*Ant.*) bundles of rods bound round the helve of a hatchet, which were carried before the consuls as the *insignia* of their office. [vide *Consuls*]

FASCETS (*Mech.*) irons, used in a glass manufactory, which are thrust into the necks of bottles to convey them to the annealing tower.

FASCIA (*Surg.*) a swathe, or long bandage.

FASCIA (*Anat.*) the name of any aponeurotic expansion

of muscles which binds parts together.—*Fascia lata*, a thick and strong tendinous expansion sent off from the back, and from the tendons of the *glutei*, and adjacent muscles, to surround the muscles of the thigh.

FASCIA (*Archit.*) a flat member, of which there are three in the architrave, having a great breadth and small projection. *Vitruv.* l. 3, c. 3; *Bald. Lex. Vitruv.*

FA'SCIÆ (*Astron.*) vide *Belts*, and *Astronomy*.

FASCIA'LIS (*Anat.*) an epithet for a muscle which moves the leg.

FASCIA'TION (*Surg.*) a binding up with swaddling bands.

FASCICULARIS (*Bot.*) fascicular, an epithet for a sort of tuberous roots with knobs collected in bundles, as in *Pæonia*.

FASCICULA'TUS (*Bot.*) fascicled, an epithet for leaves growing in bundles or bunches from the same point.

FASCICULUS (*Bot.*) fascicle, a diminutive of *fascis*, a bundle; a species of inflorescence in which several upright, parallel, fastigiate, approximating flowers, are collected together. [vide *Botany*]

FA'SCINES (*Fort.*) small branches, trees, or bays bound up in bundles, which, mixed with earth, serve to fill up ditches.

FA'SCIOLA (*Ent.*) the Gourd-Worm, or Fluke, a sort of worms, of the order *Intestina*, having a flattish body, with an aperture, or pore at the head, and generally another at a distance beneath. These are hermaphrodite and oviparous animals, which are generally found in the intestines of other animals.

FASHION *pieces* (*Mar.*) in French *cornières*; the aftmost or hindmost pieces of timber which terminate the breadth and form the shape of the stern.

FAST (*Ecc.*) an abstinence from food upon a religious account.

FA'STI (*Ant.*) the Roman calendar, in which were set down all days of feasts, pleadings, games, ceremonies, the names of their officers, and all other public concerns throughout the year.

Auson. l. 1, epig. 1.

*Ignota ne sint tibi tempora Romæ
Regibus, et patrum ducta sub imperiis,
Digessi Fastos, et nomina præpetis ævi
Sparsa jacent Latiam si qua per historiam.*

Cic. pro Sext. c. 14, &c.; *Val. Max.* l. 7, c. 2; *Liv.* l. 9, c. 18, &c.; *Tacit. Annal.* l. 1, c. 15; *Isid. Orig.* l. 5, c. 18; *Panvin. Fast.* l. 1.—*Fasti Dies*, days on which pleadings were carried on. [vide *Dies*]

FASTIGIA'TUS (*Bot.*) from *fastigium*, the pointed roof of a house; an epithet for a stem, peduncles, umbel, &c.; as *caulis fastigiatus*, *pedunculi fastigiati*, and *umbella fastigiata*.

FASTIGIUM (*Archit.*) vide *Pediment*.

FA'STING *Men* (*Archæol.*) bondsmen, or pledges, who answered for the peaceable demeanor of their companions.

FA'STNESS (*Fort.*) a strong hold naturally fortified by the bogs, &c. of the surrounding country.

FAT, (*Anat.*) *Adeps*, a concrete oily matter contained in the cellular membrane of animals, of a white or yellowish colour, with little or no smell nor taste.

FAT (*Mar.*) an epithet which is equivalent to broad; thus, if the trussing in or tuck of a ship's quarter under water be deep, they say she has a fat quarter.

FAT (*Mech.*) vide *Vat*.

FA'THEMITES (*Polit.*) the descendants of Mahomet, in the female line, from his daughter Fatima.

FA'THER (*Ecc.*) a title given to bishops, as the Right Reverend Father in God; also to the principal writers among the primitive Christians. This epithet is likewise applied to priests in the Romish Church, as a Father Confessor.

FATHER (*Theol.*) the first Person in the Holy Trinity.

FATHER-LA'SHER (*Ich.*) a voracious fish, the *Coltus Scorpis* of Linnæus, inhabiting the shores of Greenland and Newfoundland, and having spines on its tail, with which it lashes the sharks, and other predacious fish that offer it any molestation.

FATHER-LO'NG-LEGS (*Ent.*) a well-known insect, the *Tipula pectinicornis* of Linnæus, which is remarkable for the length of its legs.

FATHOM (*Com.*) in Saxon *pathom*, a measure of six feet.

FA'UCES (*Anat.*) *Isthmion*, or *Amphibronchia*, a cavity behind the tongue, arch, uvula, and tonsils, from which the pharynx and larynx proceed. It is commonly termed in Greek φάρυγξ. [vide *Pharynx*]

FA'UCHION (*Mil.*) vide *Falchion*.

FA'UCON (*Orn.*) vide *Falcon*.

FAULX (*Mil.*) French for an instrument very similar to a scythe, which was used in fortifications to prevent an enemy from scaling the walls of a besieged town.

FAUNA'LIA (*Ant.*) festivals celebrated, in honour of Faunus, on the Ides of February, and on the Nones of December, of which Horace gives a description in his ode to Faunus.

Hor. l. 3, od. 18, v. 10.

Cum tibi nona redeunt Decembres.

Ovid. Fast. l. 2, v. 193.

*Idibus agrestis fumant altaria Fauni
Hic ubi discretas insula rumpit aquas.*

Gyrald. Syntag. Deor. l. 18; *Jun. Fast. apud Græv. Thes. Ant. Rom.* tom. viii. &c.

FAVO'NIUS (*Ant.*) the western breeze, or zephyr, which, according to Pliny, blew from Crete. *Plin.* l. 4, c. 12.

FAUSE'TUM (*Archæol.*) a faucet or flute.

FAUSSE *braye* (*Fort.*) a low rampart. [vide *False*]

FAUSSE EQUERRE (*Mech.*) an instrument in the shape of a square or rule, which describes angles that are not straight.—*Fausse-lance*, a wooden piece of ordnance, vulgarly called a sham-gun.

FAUSSE-MARCHE (*Mil.*) a feigned march.—*Fausse attaque*, a false attack.

FAUTEAU' (*Mil.*) French for a sort of battering ram formerly used.

FAU'TOR (*Law*) a favourer or abettor.

FA'VUS (*Med.*) a sort of achor, or ulcer, resembling the favus, or honeycomb.

FAUX (*Bot.*) jaws, or throat; the opening of the tube of the corolla.

FAWN (*Zool.*) a young deer; a buck or doe of the first year.

to FAY (*Mech.*) to fit any two pieces of wood, so as to join close together.

FAYA'LL (*Com.*) an imaginary coin, valued by some as the pistole of France, or ten livres.

FAYE'NCE (*Com.*) a name in France for all sorts of crockery ware which come from China.

FA'YTOURS (*Law*) vide *Faitours*.

FE' (*Ecc.*) Spanish for faith, whence the *Auto de Fé*, or act of faith, i.e. the execution of heretics by the Spanish inquisition.

FE'AL (*Archæol.*) i.e. trusty; an epithet for the tenants who were said to be feal and leal, i.e. faithful and loyal to their lord. *Spelm. de Parlament.* 59.—*Feal and Divot*, a right in Scotland similar to the right of Tarbury in England for fuel, &c.

FEAL-dyke (*Husband.*) a cheap sort of fence in Scotland made of feal, or sod.

FE'ALTY (*Law*) changed from *fidelitas*; an oath taken at the admittance of a tenant, by which he binds himself to be faithful to his lord.

FEAR-NOUGHT (*Mar.*) in French *frise*, a particular sort

of thick woollen stuff much used in ships for lining port-holes, &c.

FEAST (*Ecc.*) anniversary times of feasting and thanksgiving, such as Christmas, Easter, Whitsuntide, &c. Feasts are either moveable or immoveable. — The *immoveable Feasts* are those which are celebrated on the same day of the year, as *Christmas-Day*, the *Circumcision*, *Epiphany*, *Candlemas*, *Lady-Day*, *All Saints*, the several days of the *Apostles*, &c. — The *moveable Feasts* are those that are not confined to the same day of the year, as *Easter*, and all that are governed by it, as *Palm Sunday*, *Good Friday*, *Ash-Wednesday*, *Sexagesima*, *Ascension-Day*, *Pentecost*, and *Trinity Sunday*.

FEATHER (*Chem.*) the constituent parts of feathers are similar to those of hair, consisting chiefly of albumen, but with little or no gelatin.

FEATHER (*Mil.*) an ornamental mark worn by officers and soldiers on their caps and hats; the *hackle feather*, which is the round feather taken from the fowl in its natural state, is worn by subalterns; the *flush feather*, a straight smooth feather worn by officers on the staff.

FEATHER (*Mar.*) To cut a feather is said of a ship when she makes the water foam before her.

FEATHER-edged Boards (*Carpent.*) boards that have one edge thinner than the other.

FEATHER (*Man.*) a row of hair turned back and raised on the neck of a horse, which forms a mark just like the blade of a sword.

FEATHER (*Bot.*) a name given to some plants, as the — Prince's Feather, the *Amaranthus hypochondriacus* of Linnæus. — Feathered Columbine, the *Thalictrum aquilegifolium*; the *Stipa*, a sort of perennial grass.

FEATHER is also another name for the *pappus*, or down. [vide *Pappus*]

FEATHERED (*Bot.*) the same as plumose. [vide *Plumosus*]

FEATHERS (*Her.*) or Prince's Feathers, the name given to the ostrich feathers which adorn the cognizance of the Prince of Wales.

FEBRICULA (*Med.*) a diminutive of *febris*, a fever, implying a slight degree of symptomatic fever.

FEBRIFUGA (*Bot.*) the plant Fever-few, or lesser centaury.

FEBRIFUGE (*Med.*) from *febris*, a fever, and *fugo*, to drive away; a name for medicines which possess the property of abating the violence of a fever.

FEBRUA (*Ant.*) an expiatory sacrifice for the ghosts of the dead; a sort of purification.

Ovid. Fast. l. 2, v. 19.

*Februa Romani dixere piamina patres
Nunc quoque dant verbo plurima signa fidem.*

That which was purified by this sacrifice was called *februatum*, and the month in which this purification took place was called *Februarius*. *Cic. de Leg.* l. 2, c. 21; *Varr. de Lat. Ling.* l. 5; *Plut. in Num.*; *Aurel. Vict. de Vir. illust.* c. 3; *Auson. eid.* 8; *Macrob. Sat.* l. 1, c. 13; *Sidon.* l. 2, ep. 14; *Ursat. de Not. Roman. apud Græv. Thes. Antiq. Rom.* tom. 2, p. 714.

FEBRUARY (*Chron.*) *Februarius*, the second month in the year, so called from the expiatory sacrifices, *Februa*. [vide *Februa*]

FEICIALS (*Ant.*) certain Roman priests instituted by Numa Pompilius, who were selected from the best families for the purpose of assisting in all treaties of peace and declarations of war. *Varr. de Ling. Lat.* l. 4, c. 15; *Liv.* l. 1, c. 24; *Plin.* l. 22, c. 2; *Aurel. Vict. de Vir. illust.* c. 5.

FEICULA (*Med.*) a white mealy powder, which subsides and gathers at the bottom of the juices or liquors of divers roots.

FE/CULÆ (*Astron.*) certain spots which are occasionally observable in the disk of the sun.

FEE (*Law*) in Saxon *feoh*, modern Latin *feudum*, is in all probability derived from, or allied to the German *Vieh*, cattle, because the principal right of property was vested originally in cattle. The word *fee* is used in several senses, namely, for the compass or circuit of a lordship or manor, as "The lord of the fee," &c.; for a perpetual right incorporeal, as to have the keeping of prisons, &c. *in fee*; also a rent and annuity granted to one, and his heirs, which is a *fee personal*: but the ordinary use of the term is to denote the right which a man has in land, or some immoveable thing, to use the same, and take the profits of it for himself and his heirs for ever. This is called the *fee-simple*, in distinction from the *fee-tail*, which is a limited sort of fee, or an inheritance whereof a man is seised to him and the heirs of his body limited at the will of the donor. A *fee-tail* is *general* where land is given to a man and the heirs of his body, and *special* where a man and his wife are seised of land to them and the heirs of their two bodies. This latter is also called a *fee expectant*. *Bract.* l. 2, c. 5; *Kitch.* 153; *Co. Lit.* c. 1, &c.; *Old Nat. Brev.* 41. — *Fee-farm*, *feodi firma*, or *fee-farm rent*, is when the lord, upon creation of the tenancy, reserves to himself and his heirs the rent, or something equivalent.

FEED (*Mil.*) a certain proportion of corn and hay given to the cavalry. A *short feed* is a portion less than the regulated quantity. — *Heavy-horse-feed*, a larger proportion given to the heavy dragoons, in distinction from — *Light-horse-feed*, which is given to the hussars and the light horse.

FEEDER (*Mech.*) a cut or channel, sometimes called a carriage or catch drain, by which a stream or supply of water is brought into a canal.

to **FEEL** (*Man.*) is said in certain cases of the movements of a horse, as "To feel a horse on the hand," i. e. to observe that the will of the horse is, in one's hand. "To feel a horse upon the haunches," to observe that he plies or bends them.

FEELERS (*Ent.*) organs fixed to the mouth of insects, generally less than the *antennæ*, and often jointed.

FEEES (*Law*) certain perquisites allowed to officers in the administration of justice, as a recompence for their labour and trouble.

FEIGNED ACTION (*Law*) an action which is brought to try the merits of any question. It is otherwise called a *feigned issue*.

FEINT (*Mus.*) a semi-tone, the same as the *Diesis*.

FEINT (*Fenc.*) a show of making a thrust at one part that you may make it at another with more facility.

FEINT (*Mil.*) a mock attack, generally made to conceal the true one.

FEL (*Med.*) Bile.

FELLAGUS (*Archæol.*) a friend or companion; one who was bound in the decennary for the good behaviour of another, i. e. *quasi fide cum eo ligatus*.

FELAPTON (*Log.*) a technical term for one of the modes in the third figure of syllogisms, which consists of a universal negative, a universal affirmative, and a particular negative, as

Fe No brutes have a sense of religion:

Lap All brutes are animals: *ergo*,

Ton Some animals have no sense of religion.

FELFELTAUIL (*Bot.*) the *Cynachium viminale* of Linnæus. **FELÉ** *homagers* (*Law*) or *Feal Homagers*; faithful subjects. **FELIS** (*Zool.*) a genus of animals of the order *Feræ*.

Generic Character. Fore-teeth intermediate ones equal; grinders three; tongue prickly backwards; claws retractive.

Species. This tribe of animals, comprehended under the names of the Lion, Tiger, Panther, Ounce, Leopard, Tiger-cat, Cat, and Lynx; are temperate in their habits, climb easily, see best at night, alight on their feet when they fall, and suddenly spring on their prey: the females bring forth many young, having eight teats.

FELLIFLUA *passio* (*Med.*) a name given to the *Cholera morbus*.

FELLING of timber (*Husband.*) the cutting down trees close by the roots for the purpose of building.

FELLOES (*Mech.*) or Fellows, the pieces of wood which joined together by duedges, form the circumference, or circular part of a wheel, which is altogether called the fellows of the wheel.

FELLOW (*Mech.*) vide *Felloes*.

FELLOW (*Cus.*) the member of a college in universities who forms one of the corporate body.

FELLOWSHIP (*Arith.*) a rule by which, in divers accounts of divers persons, their several stocks, together with the whole loss and gain being propounded, the loss or gain of each particular person may be discovered. Fellowship is either single or double. *Single Fellowship*, or *Fellowship without time*, is the case in which the times of continuance of the shares of partners are not considered, they being all the same.—*Double Fellowship*, or *Fellowship with time*, is that in which the times of the stocks' continuing are considered, because they are not all the same. In this case the shares of the gain or loss must be proportional, both to the several shares of the stock, and to the times of their continuance, and consequently proportional to the products of the two.

FELO DE SE (*Law*) one who commits a felony by the act of self-murder.

FELONY (*Law*) any offence that is in degree next to petty treason, such as murder, burglary, rape, &c.

FELSPAR (*Min.*) a siliceous mineral found mostly in mountains, in solid masses or crystallized.

FELT-GRAIN (*Carpent.*) the grain of cut timber that runs transversely to the annular rings or plates.

FELTING (*Carpent.*) the splitting of timber by the *felt-grain*.

FELTRE (*Mil.*) a piece of defensive armour, which was a kind of cuirass made of wool well pressed and dipped in vinegar to resist cuts from weapons.

FELUCCA (*Mar.*) a little open vessel with six oars that is much used in the Mediterranean.

FELWORT (*Bot.*) a species of the *Gentiana* of Linnæus.

FEMALE screw (*Mech.*) a screw, the spiral thread of which is cut in the cavity of a cylinder; it is frequently called the *nut*.

FEMALE flower (*Bot.*) *femineus flos*, a flower having pistils or stigmas without stamens, or at least anthers.—Female Plant, *Femina planta*, a plant which has female flowers only.—Female Fern, the *Pteris aquilina* of Linnæus.

FEME (*Law*) a woman, as *Feme covert*, a married woman; *Feme sole*, an unmarried or single woman.

FEMININE planets (*Astrol.*) such as surpass in the passive qualities, i. e. in moisture and dryness.

FEMININE Gender (*Gram.*) a term applied to such nouns as, by their termination, or other sign, denote the female sex.

FEMININUS (*Bot.*) vide *Female*.

FEMORA' LIS Arteria (*Anat.*) a continuation of the external iliac along the thigh.

FEMORIS os (*Anat.*) vide *Femur*.

FEMUR (*Anat.*) the thigh, or thigh-bone, a long cylindrical bone situated between the Pelvis and Tibia. *Ruff. Ephes. de Appell. Part. Corp. hum. l. 3, c. 5; Cels. l. 8, c. 1.*

FENCE (*Carpent.*) the guard of a plane, which obliges it to work to a certain horizontal breadth from the aris,

FENCE (*Bot.*) a term used by Dr. Withering for the involucre.

FENCE (*Mil.*) any guard, security, or outwork.

FENCE (*Husband.*) a hedge, or inclosure.

FENCE month (*Law*) a month in which, according to the forest laws, it is unlawful to hunt in the forest, because in that month the female deer fawn: this is fifteen days before and after Old Midsummer. *Manw. For. Laws part. 2, c. 13; Fleetwood. For. Laws, 5 Stat. 20, Car. 2, c. 3.*

FENCIBLE (*Mil.*) an epithet for regiments which are raised for temporary purposes of defence.

FENCING (*Mil.*) the art of using the sword in the attack of an enemy, or the defence of oneself. To this art belong several movements and positions, which are distinguished as follow; namely,—*Appel*, the sudden beat of your blade on the contrary side to that on which you join your adversary, and a quick disengagement to that side again.—*Beating*, parrying with a sudden short beat.—*Battering*, i. e. striking the feeble of your adversary's blade, &c.—*Back-quarte*, a round quarte over the arm.—*Cave*, a tierce on the quarte side, &c.—*Darting*, defending a blow, and darting a thrust forward.—*Feint-forward*, i. e. advancing your point a little from your line and coming to it again.—*Guard*, the posture proper to defend the body from the sword of the antagonist. [*vide Guard*] *Lurching*, i. e. making an opening to invite your adversary to thrust at you, so that you may find an opportunity of getting a *risposte* at him.—*Locking* is to seize your adversary's sword arm by twining your left arm round it after you close your parade, shell to shell, &c. in order to disarm him.—*Flanconade*, the action of dropping the point of your sword under your adversary's hilt, in seizing with force the feeble of his blade, &c.

to FEND (*Mar.*) is the same as defend, or keep off; as "Fend the boat," prevent its striking against any thing; "Fend off," prevent a boat or vessel from running foul of another.

FENDERS (*Mar.*) pieces of old cable, ropes, or wooden billets, hung over the sides of a ship, to keep other ships from rubbing against her.

FENE'STRA (*Anat.*) a name for two holes in the barrel of the ear, next the drum; one of which is called *ovalis*, and the other *rotunda*.

FENE'STRATE (*Ent.*) an epithet for the naked transparent spots on the wings of butterflies.

FEN'GELD (*Archæol.*) a tax or imposition for the defence of the realm.

FENNEL (*Bot.*) the *Anethum feniculum*; Fennel Flower; the *Nigella*; Giant's Fennel, the *Fecula*, an annual; Hog's Fennel, the *Peucedanum*, a perennial.

FEN'NUGREEK (*Bot.*) the *Trigonella* of Linnæus.

FEN'OD (*Law*) or *feud*, i. e. feed, or in fee, the right which the vassal had in land, or some immoveable things of his lord's, to use the same, and take the profits thereof, rendering unto his lord such fee, duties, and services, as belonged to military tenure. *Spem. of Feuds and Tenures*.

FEN'ODAL (*Law*) an epithet for what appertains to a fee.

FEN'ODARY (*Law*) or *feudatory*, a tenant who holds his lands by feudal service.

FEN'ODUM (*Law*) a fcod, or fec.—*Feodum militis*, a knight's fee.—*Feodum laicum*, a lay-fee, or land held in fee of a lay-lord.

FEOFFEE (*Law*) he that is infeoffed, or to whom a feoffment is made.

FEOFFER (*Law*) the person who puts another in possession.

FEOFFMENT (*Law*) the gift or grant of honours, castles, manors, messuages, lands, or other corporeal or immoveable things, to another in fee-simple, i. e. to him and his heirs for ever, by the delivery of seisin, and the possession

of the thing given. When it is in writing it is called a *deed of feoffment*; and in every feoffment the giver is called the *feoffer*, or *feoffator*, and he that receives by virtue thereof the *feoffee*. The difference between a *feoffer* and a donor is, that the *feoffer* gives in fee-simple, the *donor* in fee-tail. *Litt. l. 1, c. 6.*

FE'OFFOR (*Law*) the same as *Feoffer*.

FE'ORM (*Law*) a certain portion of victuals, and other necessaries, which tenants formerly gave to their thanes, or lords.

FE'RÆ (*Zool.*) the third Order of animals, in the Class *Mammalia*, in the Linnean system, which have from six to ten conic fore-teeth, and one tusk. They comprehend the following genera, namely—*Phoca*, the Seal.—*Canis*, the Dog, the Wolf, the Fox, the Hyæna, and the Jackal.—*Felis*, the Lion, the Tyger, the Panther, the Leopard, the Ounce, the Lynx, and the Cat.—*Viverra*, the Weasel.—*Mustela*, the Otter, the Weasel, the Martin, the Stoat, the Ferret, the Polecat, the Sable, and the Ermine.—*Ursus*, the Bear, the Badger, the Raccoon, &c.—*Didelphis*, &c. [vide *Animal Kingdom*]

FERÆ *Naturæ* (*Law*) beasts and birds that are wild, in distinction from those that are tame.

FE'RAL *Signis* (*Astrol.*) an epithet for *Leo* and *Sagittarius*, because they were supposed to have a certain degree of savage influence.

FERALIA (*Ant.*) solemnities which were celebrated in February and May, and dedicated to the manes. *Ovid. Fast. l. 2, v. 567.*

*Non tamen hoc ultra, quam quot de mense supersunt
Luciferi, quot habent carmina nostra pedes,
Hanc, quia justa ferunt, dixere Feralia lucem,
Ultima placandis Manibus illa dies.*

They were so called *a ferendo*, i. e. from carrying, because the ancients carried victuals to the sepulchres of their deceased relatives. *Varr. de Lat. Ling. l. 5, c. 3; Fest. de Signif. Verb.; Ursat. de Nat. Roman. apud Græv. Thes. Antiq. Rom. tom. 11, p. 715.*

FER (*Her.*) another name for a cross, as *fer de fouchette*, or *croix à fer de fouchette*, i. e. a cross with forked irons at each end.

FER de *Moline* (*Her.*) vide *Moline*.

FERCULUM (*Ant.*) a pageant carried about in triumph, representing victories, &c. *Liv. l. 1, c. 10; Suet. in Jul.; Plut. in Rom.*

FERDELLA *terræ* (*Archæol.*) a fardel of land, or a portion of ten acres.

FERDWIT (*Law*) a formulary by which the king pardoned manslaughter in the army. *Fleta. l. 1.*

FERENTARII (*Ant.*) a sort of light armed soldiers. *Varr. de Lat. Ling. l. 6, c. 3; Fest. de Verb. Signif.; Lips. de Mil. Roman. p. 271.*

FE'RIÆ (*Ant.*) i. e. *ispati*, sacred; holidays, or certain days that were vacant from labour or business. The *feriæ* were distinguished into different kinds, namely—*Feriæ stativæ*, stated festivals, fixed to certain days of the month.—*Feriæ conceptivæ*, moveable feasts appointed by the magistrates and priests for particular occasions.—*Feriæ imperitivæ*, occasional festivals enjoined by the command of the consuls or other magistrates on the breaking out of a war, or any other public occasion.—*Feriæ denicales*, private festivals kept by families on particular occasions, as the death of a relative, &c.—*Feriæ Latinæ*, festivals kept by the fifty Latin towns on Mount Albanus.—*Feriæ nundinæ*, or *novendiales*, festivals kept for nine days on the appearance of any prodigy. *Cic. de Leg. l. 2, c. 22; Fest. de Verb. Signif.; Liv. l. 1, c. 31; Dionys. l. 4.; Macrob. Sat. l. 1, c. 16; Plut. in Camill.; Aul. Gell. l. 2, c. 28; Serv. in Virg. Georg. l. 1, v. 268; Ursat. de Not. Rom. apud Græv. Thes. Ant. Rom. tom. xi. &c. &c.*

FE'RIAL *days* (*Law*) vide *Feriæ*.

FE'RINE (*Med.*) *θρασιώδης*; an epithet properly signifying savage, but when applied to disorders it signifies malignant.

FE'RIO (*Log.*) a mode in the first figure of syllogisms, consisting of a universal negative, a particular affirmative, and a particular negative, as

fE "No men are destitute of reason.

r I Some animals are men; ergo,

O Some animals are not destitute of reason."

FE'RISON (*Log.*) a mood of syllogisms in the third figure, consisting of a universal negative, a particular affirmative, and a particular negative, as

fE "No brutes have a sense of religion.

r I Some brutes are animals; ergo,

sO Some animals have not a sense of religion."

FERLINGA'TA *terræ* (*Archæol.*) a quarter or fourth part of a yard of land.

FERM (*Archæol.*) a house and land let by lease.

FE'RMARY (*Archæol.*) the same as *Infirmary*.

FERME *a ferme* (*Man.*) a term used to signify in the same place, without stirring or parting.

FE'RMEN (*Chem.*) any substance which has the property of causing a fermentation in any other body with which it is mixed, as the acid in leaven.

FERMENTATION (*Chem.*) the intestine commotion in the small insensible particles of a mixed body without any apparent mechanical cause, usually from the operation of some active acid matter. Chemists after Boerhaave have divided fermentation into the *spirituous fermentation*, which affords ardent spirits; *acetous fermentation*, which produces vinegar or acetic acid; and the *putrid fermentation*, which produces volatile alkali. All fermentation requires a certain degree of fluidity, with the aid of heat and of air.

FERMISONA (*Law*) the winter season of killing deer, as *Tempus Pinguedinis* is the summer season.

FE'RN (*Husband.*) a weed very common in dry and barren places, which is very injurious to the land in which it has once taken root.

FE'RN (*Bot.*) vide *Filices*.—Male Fern, the *Polypodium filix mas* of Linnæus.—Female Fern, the *Polypodium filix femina*, and the *Pteris aquilina*.—Flowering Fern, the *Osmunda*.—Mule Fern, the *Hæmionitis*.—Stone Fern, the *Osmunda crispata*.—Sweet Fern, the *Scandia odorata*.

FE'RNIGO (*Archæol.*) a heath, or waste place.

FERRAMENTA (*Mech.*) all instruments of iron, particularly those used in surgery.

FERRANDUS (*Archæol.*) an iron colour, particularly applied to horses which are now called iron grey.

FERRARIA (*Bot.*) a genus of plants, Class 20 *Gynandria*, Order 2 *Diandria*.

Generic Character. CAL. *spathes* two.—COR. *petals* six.—STAM. *filaments* three; *anthers* roundish.—PIST. *germ* inferior; *style* simple; *stigmas* three.—PER. *capsule* oblong; *seeds* roundish.

Species. The species are bulbous, as the—*Ferraria undulata*, *Iris*, *Narcissus*, seu *Gladiolus*, Cape Ferrara, native of the Cape of Good Hope.—*Ferraria pavonia*, seu *Flos Tigris*, Mexican Ferrara.

FE'RRÉOLA (*Bot.*) a genus of plants, Class 22 *Dioecia*, Order 6 *Hexandria*.

Generic Character. CAL. *perianth* one-leaved.—COR. one-petalled.—STAM. *filaments* six; *anthers* oblong.—PIST. *germ* oval; *style* short; *stigma* flat.—PER. *berry* round; *seeds* two.

Species. The single species is a tree, as the *Ferreola buxifolia*, *Ehretia*, *Pisonia*, *Pishanna*, seu *Irumbilli*, native of Coromandel.

FE'RRÉ (*Zool.*) an animal of the weasel tribe, with red eyes, and a long snout, the *Mustela furo* of Linnæus. This animal is much used in catching rabbits: it procreates twice

a year, is gravid six weeks, and brings forth from six to seven young.

FE'RRETS (*Mech.*) the irons with which glass-makers try the melted metal.

FERRIAGE (*Com.*) the hire of a ferry-boat, or money paid for a passage over a river, &c.

FERRO-CYANATE (*Chem.*) a salt formed by the union of ferrocyanic acid with a salifiable base, as the ferro-cyanate of ammonia, of potash, of soda, &c.

FERROCYANIC acid (*Chem.*) an acid composed of protoxide of iron and hydrocyanic acid.

FERRUGINEUS (*Bot.*) ferruginous; an epithet for a colour of rusty iron.

FERRULE (*Mar.*) a small iron hook fixed on the extremities of the yards, booms, &c.

FERRUM (*Min.*) iron; a genus of minerals of the Order of Metals, of a bluish grey colour, easily rusting in the air, very hard, tenacious, elastic, sonorous, exceedingly malleable and ductile, &c. [vide *Chemistry*]

Species. The principal species are, the—*Ferrum nativum*, seu *Nudum*, Native Iron.—*Ferrum selectum*, Magnetic Iron-Stone, or Common Iron Ore.—*Ferrum magnes*, the Magnet-Stone.—*Ferrum hæmatites*, a sort of iron that is not magnetic.—*Ferrum micaceum*, Micaceous Iron Ore not magnetic.

FERRY (*Law*) the liberty to have a boat for passage on a frith or river.

FERRY (*Mar.*) a vessel employed for conveying persons and goods over narrow pieces of water; also the place in a river, &c. where persons are carried over.

FERRY-MAN (*Com.*) one who keeps a ferry-boat for the conveyance of passengers, &c.

FERRÆ (*Med.*) the measles.

FERSCHET (*Archæol.*) in Saxon *fære-rcot*, the ferriage, or customary payment for being ferried over.

FERULA (*Mech.*) an instrument of correction formerly used in schools for striking on the hand.

FERULA (*Bot.*) a genus of plants, Class 5 *Pentandria*, Order 2 *Digynia*.

Generic Character. CAL. *umbel* universal.—COR. universal.—STAM. *filaments* five; *anthers* simple.—PIST. *germ* inferior; *styles* two; *stigmas* obtuse.—PER. *fruit* oval; *seeds* two.

Species. The species are perennials, as the—*Ferula communis*, Common Fennel Giant.—*Ferula ferulago*, seu *Ferulago*, Broad-leaved Fennel Giant, native of Sicily. *Ferula nodiflora*, seu *Libanotes*, Knotted Fennel Giant, native of Austria. *Dod. Pempt.*; *Bauh. Hist.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Bot.*; *Raii Hist.*; *Tourn. Inst.*

FERULA (*Bot.*) is also the *Bubon Galbanum* of Linnæus.

FERULACES (*Bot.*) the *Ferula Galbanifera* of Linnæus.

FERULÆ (*Surg.*) splints used about the binding up of a broken leg.

FERULA'GO (*Bot.*) the *Ferula ferulago*.

FERULA'NA (*Bot.*) a species of the *Ferula*.

FERVOR of the Matrix (*Med.*) a preternatural heat in the womb.

FESCE'NNINA (*Mus.*) a sort of nuptial song, so called from Fescenninum, a town of Campania, where it originated. *Serv. Virg. Æn.* l. 7, v. 695.

FESCUE-GRASS (*Bot.*) the *Festuca*, a perennial sort of grass cultivated for cattle.

FESSE (*Her.*) an honourable ordinary which possesses the third and middle part of the field horizontally, as *fig. 1*, "Argent a fesse gules." A Fesse is borne under various accidental forms, namely, *Transposed*, i. e. placed higher than the centre, as *fig. 2*, "Argent on a fesse transposed a crescent between two stars of the first." *Couped*, i. e. as it were cut off from the sides, as *fig. 3*, "Or a fesse couped

azure." *Wreathed* of different tinctures, in French *tortille* as *fig. 4*, "Argent a fesse tortille, azure and gules."

The fesse is likewise engrailed, invecked, wavy, indented, dancette, embattled, voided. [vide *Ingrailed*, &c.] When figures are contained within the breadth of the fesse it is said to be charged, or they are said to be *on fesse*, as *fig. 2*. When any figures occupy the place of the fesse they are said to be *in fesse*. [vide *Heraldry*].—*Fesse Point*, the middle point of the escutcheon.—*Party per Fesse*, i. e. parted across the middle of the shield, through the fesse point. [vide *Heraldry*]

FESTING Men (*Archæol.*) vide *Fastingmen*.—*Festing-Penny*, the same as *Earnest-money*.

FESTIVO (*Log.*) a mood of syllogisms in the second figure, in which the first proposition is a universal negative, the second a particular affirmative, and the third a particular negative, as

fE s No unbeliever can have salvation through Christ.
tI Some Jews are saved through Christ, ergo.
nO Some Jews are not unbelievers.

FESTOON (*Archit.*) an ornament of carved wood, in manner of wreaths or garlands hanging down, which was anciently used at the gates of temples, &c. [vide *Architecture*, Plate, No. III, (11)].

FESTUCA (*Bot.*) a genus of plants, Class 3 *Triandria*, Order 2 *Digynia*.

Generic Character. CAL. *glume* upright.—COR. two-valved.—STAM. *filaments* three; *anthers* oblong.—PIST. *germ* turbinate; *styles* two; *stigmas* simple.—PER. none; *seeds* single.

Species. The species are perennials, as the—*Festuca ovina*, seu *Bromus*, Sheep's-Fescue Grass.—*Festuca rubra*, seu *Gramen*, Red-Fescue Grass.—*Festuca spadiacea*, *Anthoxanthum*, seu *Poa*.—*Festuca uniglumis*, seu *Lolium*, Sea-Fescue Grass. *Bauh. Hist.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Bot.*; *Tourn. Inst.*

FESTUCA is also the *Agrostis serotina*.

FE'STUCINE (*Min.*) an epithet for a shivery or splintery fracture.

to **FETCH** (*Mar.*) a term employed in some sea-phrases, as "To fetch to windward of an object," to reach it. "To fetch away," to be shaken, or rocked backwards and forwards, as casks, boxes, and the like in a storm. "To fetch the pump," to pour a cann of water into the upper part of it, in order to expel the air which is contained between the lower box and the piston.

FE'TLOCK (*Vet.*) a tuft of hair, as large as the hair of the mane in some horses, that grows behind the pastern-joint.—*Fetlock-joint*, the joint at a horse's fetlock, the ankle-joint.

FE'TTERS (*Law*) a sort of irons put on the legs of male-factors.

FE'TTERED (*Zool.*) an epithet applied to the feet of animals when they are stretched backward, and appear unfit for the purpose of walking, or when they are concealed in the integuments of the abdomen.

FEU (*Law*) a free and gratuitous right to lands, in the Scotch Law, made to one for service performed by him.—*Feu*, or *Feu-holding*, a holding or tenure, whereby the vassal is obliged to pay to the superior a sum of money annually.

—*Feu*, or *Feu annual*, the rent which was due by the *redendo* of the property of the ground, before the house was built within burgh.—*Feu-duty*, an annual rent or duty paid by the tenant.

FEUD, *deadly* (*Archæol.*) a combination of kindred in former times to revenge the death of any of their blood, on the slayer or his posterity.—*Feud-Bote*, a recompense for engaging in a feud or faction.

FEUD (*Law*) vide *Feod*.

FEUDS (*Law*) a volume of the Civil Law; so called because it contains the customs and services done by a vassal to a superior lord.

FEVER (*Med.*) *febris*, from *ferveo*, to burn; a disease characterized by an increase of heat, an accelerated pulse, a foul tongue, and an impaired state of several functions of the body. Fevers, as respect their duration, are distinguished into—*Continual fevers*, which have no intermission, but exacerbations that usually come on twice a day, as the synocha, the typhus, &c.—*Intermittent fevers*, which are known by the *cold*, the *hot*, and the *sweating* stages, in succession, attending each paroxysm, and followed by an intermission or remission.—*Intermitting fevers* are subdivided into—*Quotidian fevers*, or agues, the paroxysms of which return in the morning at the interval of twenty-four hours.—*Tertian fevers*, or agues, the paroxysms of which commonly come on at mid-day, at an interval of forty-eight hours.—*Quartan fevers*, the paroxysms of which come on in the afternoon, with an interval of about seventy-two hours. These have also their varieties, into *semi-tertian*, *double-tertian*, or *quartan*, *triple-quartan*, &c. Fevers are moreover distinguished, according to their symptoms, into—*Inflammatory fever*, which is known by an increased heat.—*Typhus fever*, which has a putrid tendency, and but moderate heat.—*Putrid fever*, which arises from the discharge of some putrid purulent matter from some morbid part, as an ulcer in the lungs.—*Hectic fever*, which is slow, durable, extenuating, and emaciating the body by insensible degrees.—*Scarlet fever*, which is attended with an eruption very similar to that of the measles.—*Miliary fever*, one in which rough pustules appear about the whole body.—*Symptomatic fever*, is that which arises, as an accident, or symptom of some disorder, that is antecedent to them.

FEVER-FEW (*Bot.*) the *Matricaria* of Linnæus.—*Fever-root*, the *Triostium*, a perennial.

FEUILLE'A (*Bot.*) a genus of plants, Class 22 *Diœcia*, Order 5 *Pentandria*.

Generic Character. CAL. *perianth* bell-shaped.—COR. one-petalled.—STAM. *filaments* five; *anthers* twin.—PIST. *germ* inferior; *styles* three; *stigmas* heart-shaped.—PER. *berry* large; *seeds* compressed.

Species. The two species are the—*Feuillea trilobata*, seu *Trichosanthes*, native of the East Indies.—*Feuillea cordifolia*, native of Jamaica.

FIAR (*Law*) in opposition to the renter, in the Scotch law; the person in whom the property of an estate is vested, subject to the life-renter's estate.

FIAT (*Law*) a short order or warrant of some judge for making out and allowing certain processes.—*Fiat justitia* are the words written by the king on his warrant to bring a writ of error in judgement, &c. *Stamf. Prærog. Reg.* 24.

FIBER (*Zool.*) the *Castor fiber* of Linnæus. [vide *Beaver*]

FIBRA *auris* (*Anat.*) the lower part of the ear.

FIBRA'RIÆ (*Min.*) a class of minerals of a fibrous structure.

FIBRE (*Anat.*) *κτῆδών*, *fibra*, a simple filament which is supposed to consist of earthy particles, connected together by an intermediate gluten. Fibres are distinguished, according to their position and course, into direct, transverse, oblique; and by their different arrangement are

formed the membranes, muscles, vessels, nerves, &c. Those fibres which compose muscles are called muscular; those which form nerves, nervous; the rest are distinguished into *carneous* or fleshy, and *osseous* or bony. *Ruff. Ephes. de Appell. Part. Corp. hum.* l. 2, c. 3; *Gal. de Usu. Part.* l. 9, c. 2.

FIBRE (*Bot.*) a name for the minute threads of a root which imbibe moisture from the earth. These fibres properly constitute the roots of plants.

FIBRIL'LA (*Bot.*) the branch or division of a radical fibre.

FIBRILLÆ (*Anat.*) fibrils or small fibres.

FIBRIN (*Chem.*) the name given by chemists to that particular substance which constitutes the fibres of animals.

FIBROLITE (*Min.*) a sort of stone of the schorl family.

FIBRO'SUS (*Bot.*) fibrous; an epithet for a root that consists wholly of fibres, as in many vines.

FIBULA (*Anat.*) a long bone of the leg situated on the outer side of the tibia, and forming, at its lower end, the outer ankle. [vide *Anatomy*, Plate No. 1. (9.)]

FIBULA (*Surg.*) a needle with which wounds are sewed together. *Cels.* l. 7, c. 25.

FIBULA (*Archit.*) an iron clamp with which square stones are held together. *Vitruv.* l. 10, c. 2.

FIBULÆ'US (*Anat.*) another name for the *Peroneus*.

FICARIA (*Bot.*) the *Ranunculus ficaria* of Linnæus.

FICATIO (*Med.*) from *ficus*, a fig; tubercles near the anus and *puddenda*.

FICATUM (*Ant.*) a sort of food made with figs.

FICOIDEA (*Bot.*) the *Aizoon hispanicum* of Linnæus.

FICOIDES (*Bot.*) the *Aizoon canariense* of Linnæus.

FICTIO (*Law*) a supposition of law that a thing is true, without inquiring whether it is or not, that it may have the effect of truth, so far as is consistent with equity: thus, the Seisin of Conusee is a *Fiction in law*, being only an invented form of conveyance.

FICUS *Ruminalis* (*Numis.*) the tree under which the wolf gave suck to Romulus and Remus, of which the memory is preserved on many medals. [vide *Lupus*] It was so called, according to Pliny, because the wolf gave *rumen*, her teat, to the children. *Liv.* l. 10, c. 23; *Plin.* l. 15, c. 18; *Tacit. Annal.* l. 13, c. 58.

FICUS (*Med.*) a tumour, particularly in the anus or *puddenda*.

FICUS (*Bot.*) a genus of plants, Class 23 *Polygamia*, Order 3 *Trioecia*.

Generic Character. CAL. *perianth* proper.—COR. none.

—STAM. in the male, *filaments* three; *anthers* twin.—

PIST. in the female, *germ* oval; *style* subulate; *stigmas* two.—PER. in the female, none; *seed* single.

Species. The species are shrubs or trees, as the—*Ficus carica*, *Caprificus*, seu *Chameficus*, Common Fig-Tree.

—*Ficus sycomorus*, seu *Sycomorus*, Egyptian Fig or Sycomore.—*Ficus pumila*, seu *Itabu*, native of China.

—*Ficus religiosa*, Poplar-leaved Fig-Tree.—*Ficus Bengalentiensis*, Bengal Fig-Tree.—*Ficus Indica*, Indian Fig-Tree. *Dod. Pempt.*; *Bauh. Hist.*; *Bauh. Pin.*;

Ger. Herb.; *Park. Theat.*; *Tourn. Inst.*

FICUS is also the *Cecropia peltata*—*Ficus indica*, the *Cactus ficus indica*.

FID (*Mar.*) or *Mast-Fid*, a square bar of wood or iron, with a shoulder at one end, which used to support the weight of the top-mast. The *Splicing-Fid*, a large pin of *lignum vitæ*, tapering to a point, which is used for splicing of cables.

FIDD (*Gunn.*) or *fuse*, a little oakum shaped like a nail, to put into the touch hole of a gun, which being covered with a plate of lead, keeps the powder dry in the gun.

FIDDLE-DOCK (*Bot.*) the *Rumex pulcher* of Linnæus, a perennial.—Fiddle-Wood, the *Citharexylum* of Linnæus. This wood in French is called *fidelle*, which has been cor-

- rupted in English into *fiddle*, as if it were fit for musical instruments, which is a mistake.
- FIDEICOMMISSUM (*Law*) a feoffment of trust, when a thing is put by will into one's hand upon his honesty, to dispose of to some certain use. *Justin. Instit.* l. 2, c. 23.
—*Fidei jussor*, in the Civil Law, a surety.
- FIDEM *mentiri* (*Law*) is said of a tenant who does not keep the fealty which he has sworn to his lord.
- FIDUCINAL (*Mus.*) an epithet for all stringed instruments.
- FIDUCINALES (*Anat.*) the *combricales*, or muscles of the fingers; so called from their use to musicians.
- FIEF (*Law*) the same as *Fee*.
- FIELD (*Paint.*) the ground or blank space on which figures are or may be drawn.
- FIELD (*Agric.*) arable land, or any portion of land parted off for cultivation.
- FIELD (*Her.*) the whole surface of the shield or escutcheon; so called, probably, because it bore the achievements which were borne in the field of battle.
- FIELD (*Mil.*) the ground chosen for any battle.—*Field-colours*, small flags carried along with the quarter-master-general in marking out the ground for the squadrons and battalions of an army.—*Field-Bed*, a folding bed used by officers in their tents.—*Field-Officers*, officers who command a whole regiment, as the colonel, lieutenant-colonel, and major.—*Field-Marshal*, a commander in chief, or one who has the command of the whole army.—*Field-Pieces*, a sort of cannon, consisting of eighteen pounders and less.—*Field-staff*, a weapon carried by the gunners about the length of a halberd, having a spear at one end.—*Field-Works*, those that are thrown up by an army in besieging a fortress.
- FIELD of *Vision* (*Opt.*) or *Field of View*, the whole space or extent within which objects can be seen through an optical machine at one view, without turning the eye.
- FIELD *Ale* (*Archæol.*) or *Filk-Dale*, a kind of drinking bout among bailiffs of the hundreds, for which they gathered money of the inhabitants. It has long been out of use. *Bract.*
- FIELD-BA'SIL (*Bot.*) the *Thymus acinos* of Linnæus.—*Field-Madder*, the *Sherardia Arvensis*, an annual.
- FIELD-BED (*Mil.*) vide *Field*.
- FIELD-BOOK (*Survey.*) a book used for setting down angles, distances, &c. as they arise in the field practice.
- FIELD-COLOURS (*Mil.*) vide *Field*.
- FIELD-FARE (*Orn.*) the *Turdus pilaris* of Linnæus, a migratory bird that visits England about Michaelmas in vast flocks, and leaves it about March.
- FIELD-MA'DDER (*Bot.*) vide *Field-basil*.
- FIELD-PIECE (*Mil.*) vide *Field*.
- FIELD-STAFF (*Mil.*) vide *Field*.
- FIERAMENTE (*Mus.*) an Italian term, signifying that the movement before which it is placed, is to be performed in a bold, firm, energetic style.
- FIERI *facias* (*Law*) a writ which lies for him who has recovered in an action of debt or damages, against him from whom the recovery is to be had, commanding the sheriff to levy the debt or damages on his goods.
- FIERY *triplicity* (*Astrol.*) those three signs, namely, *Leo*, *Aries*, and *Sagittarius*, which surpass the rest in fiery qualities.
- FIFE (*Mus.*) a shrill wind instrument used in military music, particularly as an accompaniment to the drum.
- FIFE *Rails* (*Mar.*) such as are placed on the bannisters, on each side the top of the poops, &c.
- FIFFARS (*Mus.*) a small pipe, flute, or flageolet, used by the Germans in their army.
- FIFTE'ENTH (*Mus.*) an interval consisting of two octaves.
- FIFTE'ENTHS (*Law*) a tribute or imposition, anciently laid on cities, boroughs, &c.; so called because it consisted of a fifteenth of which each place was valued at.
- FIFTH (*Mus.*) a distance comprising four diatonic intervals, i. e. three tones and a half. The *Sharp Fifth* is an interval consisting of eight semitones.
- FIG (*Bot.*) the well known fruit of the *Ficus*.
- FIG (*Vet.*) a spongy excrescence which grows out on the feet of some horses.
- TO FIG (*Man.*) a trick among horse dealers of applying ginger to the fundament of a horse, to make him hold his tail erect.
- FIGE'NTIA (*Chem.*) such things as have the property of fixing volatile and concentric acids.
- FIGHT (*Mil.*) a combat or battle. A *running Fight* is that in which the enemy is continually chased.
- FIGHTING-MEN (*Mil.*) such as are effective and able to bear arms.
- FIGHTS (*Mar.*) waste clothes which hang round a ship in a fight, to prevent the men from being seen by the enemy.—*Close Fights* are bulk heads, set up for men to stand secure behind, and thence fire on the enemy in case of boarding.
- FIGURATE *Numbers* (*Math.*) such numbers as are formed from the addition of all the leading terms of successive series.
- FIGURATE *Descant* (*Mus.*) otherwise called *florid descant*, is that descant which, instead of moving note by note with the base, consists of a free and florid melody.—*Figurate counterpoint*, that which consists of a mixture of discords with the concords.
- FIGURATIVE (*Rhet.*) an epithet for words which convey a figurative or typical meaning; also for a style which abounds in figures of speech.
- FIGURE (*Geom.*) a surface or space enclosed on all sides, which is *superficial* when it is enclosed by lines, and *solid* when it is enclosed by surfaces. Figures are either straight, curved, or mixed, equal, equiangular, equilateral, circumscribed, inscribed, plane, regular, irregular, or similar, &c. [vide *Straight*, &c.] The exterior bounds of a figure are called its *sides*, the lowest side its *base*, and the angular point opposite the base is the *vertex*.—*Figure of the diameter* is the rectangle under any diameter and its proper parameter, in an ellipse and hyperbola.—*Figures of the sines, cosines, &c.* figures made by conceiving the circumference of a circle, extended out in a right line, upon every point of which are erected perpendicular ordinates equal to the sines, cosines, &c. of the corresponding arcs; and then drawing the curve line through the extremities of all the ordinates, which is called the *figure* of the sines, cosines, &c.
- FIGURE (*Arih.*) the numeral characters by which numbers are expressed in writing, as the ten digits, 1, 2, 3, 4, 5, 6, 7, 8, 9, 0: they are called Arabic, because they are supposed to owe their introduction into Europe to the Arabians.
- FIGURE (*Astrol.*) a description or scheme of the heavens at a certain hour, representing the places of the planets and stars marked down in a figure of twelve triangles.
- FIGURE of an *Eclipse* (*Astron.*) a representation on paper, &c. of the path of the sun or moon during the time of an eclipse, &c.
- FIGURE (*Sculpt. &c.*) any representation of things made in wood, stone, &c.
- FIGURE *apparent* (*Opt.*) that figure or shape under which an object appears when viewed at a distance.
- FIGURE (*Fort.*) the plan of a fortified place, or the interior polygon.
- FIGURE (*Gram.*) any mode of speaking in which words are employed in a form or sense different from that in which

they are ordinarily used. Figures are either grammatical or rhetorical. Under *grammatical figures* are comprehended the ellipse, the hyperbola, the zeugma, the enallage, ecthipsis, synalepha, synæresis, &c. [vide *Grammar*]
Rhetorical figures are either changes of words from their natural signification, which are otherwise called *tropes*, or they are varied forms of expression, suited to the purposes of the orator. [vide *Rhetoric*]

FIGURE (*Danc.*) the several steps made by the dancers, in order and cadence, which mark divers figures on the floor.

FIGURE (*Log.*) the manner of disposing the middle term in a syllogism. [vide *Logic*]

FIGURED (*Mus.*) vide *Figurate*.

FIGURED (*Mech.*) an epithet applied to stuffs on which figures are worked.

FILACER (*Law*) from *filum*, a thread; an officer in the court of Common Pleas; so called because he files those writs on which he makes process.

FILA'CIUM (*Law*) a term for the thread or wire on which deeds or writs, &c. are filed.

FILA'GO (*Bot.*) a genus of plants, Class 19 *Syngenesia*, Order 4 *Polygamia Necessaria*.

Generic Character. CAL. common.—COR. hermaphrodite, funnel form; female scarcely visible.—STAM. *filaments* four; *anthers* cylindric.—PIST. *germ* scarce any; *style* simple; *stigma* acute.—PER. none; *seeds* none.

Species. The species are mostly annuals, as the—*Filago acaulis*, *Eva*, seu *Gnaphalium*.—*Filago germanica* Common Cudweed, native of Europe.—*Filago pyramidata*, Flowering Cudweed, native of Spain.—*Filago arvensis*, Corn Cudweed. But the—*Filago Leontopodium*, seu *Leontopodium*, Lion's Foot Cudweed, is a perennial. *Clus. Hist.*; *Bauh. Hist.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat. Botan.*; *Raii Hist.*; *Tourn. Inst.*

FILAGO is also the *Athanasia maritima*.

FILAMENT (*Bot.*) *filamentum*, the thread-like part of the stamen, supporting the anther, and connecting it with the flower. Filaments in the same flower are *equal*, i. e. all of the same length; *unequal*, i. e. of different lengths; *connate*, or united, alternate, &c. Most filaments are simple; some few are bifid; other tricuspidate or broad, and trifid at the end.

FILAMENTS (*Med.*) little slender rays like threads that appear in urine.

FILAMENTS (*Anat.*) the small fibres or threads which compose the texture of the muscles.

FILA'NDERS (*Falcon.*) small thread-like worms which infest the intestines of a hawk.

FILA'NDRES (*Vet.*) French for white streaks like threads in the wounds of horses.

FILA'RIA (*Ent.*) a genus of animals, Class *Vermes*, Order *Intestina*, which have a round filiform body, and a dilated mouth. They infest the intestines of different animals.

FILBERT (*Bot.*) another name for the *Corylus* of Linnæus, a shrub.

FILE (*Mech.*) 1. An iron tool used by smiths for smoothing of iron, &c. 2. A wire or thread on which papers are strung.

FILE (*Fenc.*) or *Foil*, a sword without edges, with a button at the point.

FILE (*Her.*) the straight line in a label, from which the several points issue.

FILE (*Mil.*) any number of men drawn up in a straight line behind each other. Files are distinguished into *close*, *open*, *double*, &c.—*Flank file*, the extreme file on the right or left of a squadron, troop, &c.—*File-leader*, the soldier placed in the front of any file.

TO FILE (*Mil.*) to advance to, or from, any point by files, as to *file off*, to *file to* the front, to *file to* the rear, &c.

FILELLUM (*Anat.*) the *frenum*, or bridle, by which the prepuce is connected to the glans of the penis.

FILETS (*Cook.*) meat, fowl, or fish, sliced and dressed in a ragout.

FILETUM (*Anat.*) the nervous ligament under the tongue, which midwives usually divide with their nail immediately after the birth.

FILIA'TION (*Law*) the descent from father to son.

FILICA'STRUM (*Bot.*) the *Osmurida struthopteris* of Linnæus.

FILICES (*Bot.*) ferns, the first Order of the Class *Cryptogamia*, in Linnæus' artificial system, and the Fourth Family in his General Distribution of Vegetables.

FILICIFOLIA (*Bot.*) the *Xyloptylla suicata* of Linnæus.

FILICULA (*Bot.*) a species of the *Aerostichum* of Linnæus.

FILIFORM (*Nat.*) thread-shaped, or slender like a thread; an epithet applied to different parts of insects and plants.

FILIGREE (*Mech.*) vide *Filligrane*.

FILIPENDULA (*Bot.*) the *Pedicularis flammea* of Linnæus.

FILIIUS *ante patrem* (*Bot.*) a term formerly applied by botanists to plants whose flowers come out before their leaves.

TO FILL (*Mar.*) in French *faire servir*, to brace the sails in such a manner, as that the wind entering their cavities from behind, dilates them to their full extent.—*To fill a ship's bottom*, to drive a number of nails with broad heads into her, so as to give her a sheathing of iron, to prevent the worms from getting into the wood.

FILLAGREE (*Mech.*) vide *Filligrane*.

FILLET (*Archit.*) a little member that connects the larger members in a column: it is otherwise called a *listel*. [vide *Listel*]

FILLET (*Anat.*) the extremities of the membranaceous ligament under the tongue, more commonly called the *frenum*, or bridle.

FILLET (*Her.*) an ordinary, which, according to Guillim, contains the fourth part of a chief.

FILLET (*Paint.*) a little rule, or ringlet of leaf gold, drawn over certain mouldings, or on the edge of frames, panels, &c.

FILLETTS (*Vet.*) the fore parts of the shoulder next the breast.

FILLIGRANE (*Mech.*) a kind of enrichment on gold and silver, delicately wrought in the manner of little threads or grains, or both intermixed.

FILLINGS (*Mar.*) small pieces of timber, used for the purpose of making the curve fair for the mouldings, between the edges of the fish-front and the sides of the mast.

FILLY (*Vet.*) a young mare.

FILM (*Bot.*) the thin woody skin that separates the seeds in the pods.

FIMLOSE (*Nat.*) ending in a thread-like process; an epithet applied to insects and plants.

FILTRING-STONE (*Min.*) vide *Filtrum*.

FILTRATION (*Med.*) a straining of liquor through paper, which, by reason of the smallness of the pores, admits only the finer parts through, and keeps the rest behind: It was formerly marked by this character 53.

FILTRUM (*Min.*) a Mexican stone, which has the virtue of filtering or purifying waters, by making them deposit a certain quantity of insensible feces. It is commonly known by the name of the *Filtering Stone*.

FILTRUM (*Mech.*) a filter or straining instrument.

FILUM *Aque* (*Archæol.*) the thread or middle of the stream where a river parts two lordships. *Rot. Parl.* 11 H. 4; *Mon. Angl.* tom. i, p. 390.

FILUM (*Mus.*) the name formerly given to the line drawn from the head of a note downwards, now called the *tail* or *stem*.

FILUM *arsenicale* (*Chem.*) corrosive sublimate.

FIMBRIÆ (*Anat.*) the extremities or borders of the *Tubæ*

Fallopianæ, formerly so called because they resemble a fringed border.

FIMBRIATED (*Her.*) an epithet for an ordinary that is edged round with another of a different tincture, as in the annexed figure.

FIN (*Ich.*) the organ in fishes by which they perform all their movements in the water.

FIN (*Mus.*) vide *Finale*.

TO FIN a *chevin* (*Cook.*) to cut up or carve a chevin or chub-fish.

FINAL (*Mus.*) the last sound of a verse in a chant, which, if complete, is on the key note of the chant; if incomplete, on some other note in the scale of that key.

FINAL letters (*Gram.*) any letters which are used solely at the end of words, as in the Hebrew and other oriental languages. [vide *Alphabet*]

FINAL (*Sculpt.*) an emblem of the end of life, being an enrichment placed on monuments; namely, a boy without wings, holding in his hands an extinguished torch, with the flame end fixed on a death's-head at his feet.

FINALE (*Mus.*) the last piece performed in any act of an opera, or that which closes a concert, &c.

FINANCE (*Polit.*) a French term, signifying a fine, or sum of money, paid formerly to the French king for the enjoyment of any privileges; whence the word *finances* has since been generally employed to denote the treasures or revenue of the king.

FINANCIER (*Polit.*) an officer who manages the finances.

FINCH (*Orn.*) a bird well known in Europe. The two principal species are the—Chaffinch, the *Fringilla cœlebs* of Linnæus; and the Goldfinch, the *Fringilla carduelis*.

FINCKLE (*Bot.*) the same as *Fennel*.

TO FIND the *Ship's trim* (*Mar.*) to discover how she will sail best.

TO FIND a *Bill* (*Law*) in French *recevoir l'accusation*, to establish grounds of accusation, which is done by a Grand Jury of the county. *Finding*, in Court's-Martial, is equivalent to finding guilty.

FINDERS (*Law*) officers of the customs, now called searchers.

FINE (*Law*) 1. A penalty, or amends made in money for an offence. 2. A formal conveyance of lands by acknowledging a perfect agreement before a judge. 3. A sum of money paid for lands and tenements let by lease; also for alienations of copyholds paid to the lord, &c.—*Fine annullando levato de tenemento*, a writ directed to the C. B. for making void a fine levied on lands holden in ancient demesne. *Reg. Orig.* 15.—*Fine levando de tenemento*, &c. a writ empowering the justices to admit of a fine for sale of lands holden in *capite*, &c.

FINE (*Mus.*) or *Fin*, Italian for the end, as *Fine del Atto*, end of the act; *Fine del Aria*, end of the air.

FINE-DRAWING (*Mech.*) the art of sewing up the rents of woollen cloth in so fine a manner, that the place where it was torn should not be perceived.

FINERY (*Metal.*) the furnace in which the operation of refining metals is performed.

FIN-FISH (*Ich.*) a smaller sort of whale, the *Cete physalus* of Linnæus.

FINGER (*Anat.*) vide *Digitus*.

FINGER (*Ent.*) a cartilaginous slender appendage sometimes observable in fishes between the pectoral and ventral fins.

FINGER (*Mus.*) a figurative term to imply skill in execution, particularly on keyed instruments.—*Finger-Board*, a thin black covering of wood laid over the neck of a violin, violincello, &c. and on which, in performance, the strings are pressed by the fingers.

FINGERED (*Mus.*) a term applied to piano-forte exercises over or under the notes of which figures are placed to

signify the finger with which each corresponding key is to be struck.

FINGERING (*Mus.*) disposing of the fingers in a convenient, natural, and apt manner, in the performance of any instrument, but more especially the organ and piano-forte.

FINGER'S BREADTH (*Arith.*) a measure equal to the length of a barley-corn, or four barley-corns laid side by side.

FINGRIGO (*Bot.*) the *Pisonia aculeata* of Linnæus.

FINIRE (*Archæol.*) to fine, or pay a fine upon composition, making satisfaction, &c. equivalent to *finem facere*, mentioned *leg. H. 1, c. 53, apud Brompt.*

FINIS (*Mus.*) the same as *finale*.

FINISHING (*Archit.*) the same as a crowning, &c.

FINISHING (*Mar.*) a term used in ship-building for the ornaments to the upper gallery.

FINITE (*Math.*) an epithet for a series, line, &c. which is bounded or limited in extent, duration, &c. in distinction from the infinite.

FINITO (*Mus.*) Italian for finished.

FINITOR (*Man.*) an Italian term for the end of a career, or course.

FINITOR (*Astron.*) the same as the horizon.

FINO'CHIO (*Bot.*) the *Anethum fœniculum* of Linnæus.

FINORS (*Min.*) or *finers*; those who purify gold, silver, &c. from dross.

FINSCALE (*Ich.*) a fish of the carp kind, the *Cyprinus orfus* of Linnæus.

FIRTREE (*Bot.*) the *Pinus* of Linnæus, a tree valuable for the timber, pitch, tar, &c. which it yields in abundance. The resinous roots of the Scotch Fir, the *Pinus sylvestris*, are used instead of tallow candles by the Highlanders. The fishermen make ropes of the inner bark, which the Laplanders even convert into bread. The Silver Fir, *Pinus picea*, is a noble, upright tree, so called from the under side of its leaves being white. The other kinds of firs best known are the Canada Fir, or Balm-of-Gilead Fir, *Pinus balsamæa*, and the Norway Spruce Fir, *Pinus picea*. All sorts of firs are raised best by seeds, which must be sown in April or May.

FIRDEFARE (*Archæol.*) vide *Ferdwit*.

FIRDERINGA (*Archæol.*) a preparation to go into the army. *Leg. H. 1.*

FIRE! (*Mil.*) a word of command to soldiers to discharge their fire-arms, &c. *Fire* is also used to denote the discharge itself, as—*Fire of the curtain*, or *second Flank*, which is from that part of the curtain comprehended between the face of the bastion prolonged and the angle of the flank.—*Fire razant* is produced by firing the artillery and small arms in a line parallel with the horizon.—*Running Fire* is when a rank of men drawn up fire one after another, &c.—*Fire-arrow*, a small iron dart furnished with a match that is impregnated with sulphur and powder. It is principally used for firing the sails of an enemy's ship.—*Fire-balls*, vide *Ball*.—*Fire-brand*, a piece of wood kindled.—*Fire-Cross*, an ancient signal in Scotland for the nation to take up arms.—*Fire-ship*, a ship filled with combustibles to set fire to the vessels of the enemy.—*Fire-arms*, all kinds of arms charged with powder and balls, as guns, pistols, &c.—*Fire-lock*, the gun, piece, or arms, carried by foot soldiers, which is so called because it produces fire by the action of the flint and steel. *Firelocks*, in the plural, signify men or soldiers equipped and actually under arms.—*Fire-master*, an officer who directs all the compositions of fire-works. The *Fire-master's mate*, or assistant *Fire-master*, acts under the direction of the *Fire-master*.—*Fire-pan*, the receptacle for the priming powder.—*Fire-pot*, a small earthen pot into which is put a charged grenade, and covered with powder,

for the purpose of making an explosion.—*Fireworks*, particular compositions made of sulphur, saltpetre, and charcoal, which exhibit a handsome appearance when fired off.

FIRE (*Chem.*) was formerly esteemed one of the four elements; but among the moderns it has been the subject of a dispute, whether fire is a distinct substance, or whether it arises solely from the intestine and violent motion of the parts of bodies. It is now most generally supposed to be a subtle invisible fluid.—*Circulatory* or *reverberatory fire*, vide *Reverberatory*.

FIRE (*Vet.*) a term employed in regard to a horse, as “To give the *fire* to a horse,” i. e. to apply the firing iron red-hot to some preternatural swelling, in order to discuss it.

FIRE-ARMS (*Mil.*) vide *Fire*.

FIRE-ARROW (*Mil.*) vide *Fire*.

FIRE-BALL (*Mil.*) vide *Fire*.

FIRE-BALLS (*Meteorol.*) a kind of luminous bodies usually appearing at a great height above the earth with a splendour surpassing that of the moon.

FIRE-BRAND (*Mil.*) vide *Fire*.

FIRE-CROSS (*Mil.*) vide *Fire*.

FIRE-LOCK (*Mil.*) vide *Fire*.

FIRE-MAN (*Cus.*) one who is employed in extinguishing fires.

FIRE-MASTER (*Mil.*) vide *Fire*.

FIRE-POT (*Mil.*) vide *Fire*.

FIRE-PAN (*Mil.*) vide *Fire*.

FIRE-SHIP (*Mar.*) vide *Fire*.

FIRE-STONE (*Min.*) the vulgar name for the *pyrites*.

FIRE-WORKERS (*Mil.*) officers subordinate to the fire-masters.

FIREWORKS (*Mech.*) vide *Fire*.

FIRKIN (*Com.*) a measure containing eight gallons of ale, and nine of beer.—*Firkin-man*, one who buys small or table beer of the brewer to sell it again.

FIRLOT (*Com.*) a dry measure used in Scotland.

FIRMA (*Law*) victuals, provision, &c.—*Firma alba*, rent of lands paid in silver, not in provision, to the lord's house.—*Firma Noctis*, a custom or tribute anciently paid towards the entertainment of the king for one night, according to Domesday Book.

FIRMA REGIS (*Archæol.*) the same as *villa regia*.

FIRMAMENT (*Astron.*) the sphere of the fixed stars.

FIRMAMENTUM (*Rhet.*) the chief stay and support of any cause. *Cic. de Inv. l. 1, c. 14, &c.*

FIRMAN (*Com.*) a passport granted in Turkey and India for the liberty of trade.

FIRMARATIO (*Archæol.*) or *firmatio*, the doe season, as distinguished from the buck season: also a supplying with food. *Leg. In. c. 34, apud Brompt.*

FIRME (*Her.*) a term for a cross pattee throughout.

FIRMED (*Falcon.*) or full firmed, i. e. well fledged; an epithet for a hawk when all the feathers of his wings are entire.

FIRST fruits (*Law*) the profits of every spiritual living for one year, given to the king.

FIRST (*Mus.*) the upper part of a duett, trio, &c.

FIRSTLING (*Husband.*) the young of cattle which are first brought forth.

FISCAL (*Polit.*) from *fiscus*, the treasury; an office of the exchequer.

FISH *Royal* (*Law*) the Whale and Sturgeon are so denominated, because the king is entitled to them whenever they are thrown on shore, or caught near the coasts.

FISH (*Mar.*) in French *candelette*; a machine employed to hoist and draw up the flooks of ships' anchors towards the top of the bow.—*Fish-Front*, or *Paunch*, in French *jumelle*, a long piece of oak, or fir, convex on one side, and concave on the other, used to strengthen the lower masts or yards.—*Fish-Gig*, in French *foëne*, an instrument used to

strike fish at sea.—*Fish-Room*, the place between the afterhold and the spirit-room.—*Fishes-Side*, two long pieces of fir coaked on the opposite side of a made mast, to give it the diameter required.

FISHERY (*Com.*) the place where fish are caught for the purpose of trade; and also the trade of thus catching fish.

FISHES (*Zool.*) vide *Animal Kingdom* and *Ichthyology*.

FISHES (*Her.*) are borne after divers manners, as *hauriant*, i. e. directly upright; *naiant*, i. e. transverse the escutcheon; *imbowed*, i. e. with the back bent; *extended*, i. e. stretched lengthwise; *endorsed*, i. e. back to back; *devouring*, i. e. feeding, &c.

FISH-GARTH (*Com.*) a dam or wear in a river for the taking of fish.

FISH-GIG (*Mar.*) vide *Fish*.

FISH-GLUE (*Nat.*) the same as Isinglass.

FISHING-FLY (*Sport.*) a bait used for catching divers kind of fish, which is either the natural insect, or an imitation of it, called the *artificial fly*.

FISHING-HOOK (*Mech.*) a small instrument, of steel wire, of a proper form to catch and retain fish.

FISHING-LINE (*Mech.*) a line made of twisted hair, silk, &c. which is fixed to a rod for the purpose of angling.

FISHING-ROD (*Mech.*) a long slender rod or wand, to which the line is fastened for angling.

FISHMONGERS, *Company of* (*Her.*) were formerly two companies; namely, the Stockfish and Salt-Fish-mongers, which were united in 1536. Their armorial ensigns are “*Azure*, three dolphins naiant in pale between two pair of lucies saltirewise proper crowned, or, on a chief, *gules*, six keys in three saltires, the ward ends upwards as the crowns or.”

FISSURA *magna Sylvii* (*Anat.*) the name for a deep narrow sulcus between the lobes of the brain.

FISSURE (*Surg.*) that species of fracture in which the bone is slit, but not completely divided.

FISTIC Nut (*Bot.*) the *Pistachia vera* of Linnæus.

FISTULA (*Anat.*) 1. *σφύριξ*, a musical instrument, a fageolet, made of a reed, or other stuff. *Virg. Ecl. 2, v. 36.* 2. A pipe for the conveyance of water. *Ulp. l. 47; ff. de contrah. empt.*

FISTULA (*Surg.*) *σφύριξ*, a term applied to any long and sinuous ulcer that has a narrow opening sometimes leading to a larger cavity.—*Fistula lachrymalis* is when the little hole in the bone of the nose is grown hard and callous, so that there is a continual defluxion of tears.—*Fistula sacra*, that part of the backbone which is perforated.

FISTULA Pulmonis (*Anat.*) the Wind-Pipe.

FISTULA (*Bot.*) the *Cassia fistula* of Linnæus.

FISTULARIA (*Bot.*) the *Pedicularis sylvatica*.

FISTULARIA (*Ich.*) Tobacco-Pipe-Fish, a genus of fishes of the Abdominal Order, having a cylindrical snout and a round body.

FISTULOSUS (*Bot.*) hollow like a pipe or reed, an epithet for a stem, or a leaf.

FIT for service (*Mil.*) an epithet for healthy men capable of undergoing the fatigues of service.

to **FIT out a ship** (*Mar.*) in French *armer un vaisseau*, to provide a vessel with a sufficient number of men, to navigate and arm her for attack or defence.

FITCHEE (*Her.*) an epithet for a cross that ends in a sharp point, as in the annexed figure. It is supposed to have taken its rise from the practice of Christians formerly carrying the cross with them wherever they went, which they fixed in the ground as they stopped.

FITCHET (*Zool.*) an animal of the weasel or ferret kind that is classed, in the Linnean system, under the *Viverra*.

FITCHY (*Her.*) vide *Fitchee*.

FLETHWHITE (*Law*) a fine imposed upon a person for breaking the peace.

FITT-WEED (*Bot.*) the *Eryngium fatidum*, so called because it is reckoned a very powerful antihysterical.

FIVE (*Bot.*) is an epithet used frequently in composition, as five-cleft, *quinquefidus*; five-fold, *quimus*; five-lobed, *quinquelobatus*; five-parted, *quinquepartitus*; five-toothed, *quinquedentatus*.

FIVE-LEAVED Grass (*Bot.*) the *Potentilla reptans* of Linnæus.

FIXATION (*Chem.*) the making any volatile spirituous body endure the fire, and not fly away either by repeated distillations or sublimations.

FIXED Bodies (*Chem.*) are such as neither fire nor any corrosive menstruum have the power of reducing or resolving into their component elements, as ammonia, and other alkalies. Bodies are likewise called fixed which are not easily reducible to a fluid state; the term is, in both cases, opposed to volatile.

FIXED Air (*Chem.*) a name formerly given to the air which is extricated from lime, magnesia, and alkalies; it is now commonly called *Carbonic acid gas*.

FIXED Signs (*Astrol.*) are *Taurus*, *Leo*, *Scorpio*, and *Aquarius*.

FIXED Stars (*Astron.*) are such as do not, like the planets, or erratic stars, change their positions and distances in respect to one another. [vide *Astronomy*]

FIXED line of defence (*Fort.*) a line drawn along the face of a bastion, and terminated in the curtain.

FIZGIG (*Mar.*) or fishgig, a dart wherewith mariners strike fish while they swim.

FLACO'URTIA (*Bot.*) a genus of plants, Class 22 *Dioecia*, Order 7 *Polyandria*.
Generic Character. CAL. *perianth* one-leaved.—COR. none.—STAM. *filaments* numerous; *anthers* roundish.—PIST. in the female *germ* ovate; *style* none; *stigma* flat.—PER. *berry* ovate; *seeds* in pairs.
Species. The species is a small tree or shrub, as the—*Flacourtia Ramontchi*, *Alamoutou*, seu *Flacourtia*.

FLAG (*Bot.*) or *sedge*, a sort of rush.—Common Flag, or Water Iris, the *Iris Pseudacorus* of Linnæus.—Corn Flag, the *Gladiolus*, a bulbous plant.—Sweet Flag, the *Acorus*, a perennial.

FLAG (*Mar.*) an ensign or banner usually set out on the tops of masts, at the heads of ships, &c. When flags are displayed from the top of the mainmast they are the distinguishing marks of Admirals; when from the foremast, of Vice-Admirals; and when from the mizenmast, of Rear-Admirals. They are likewise distinguished by their colour into red for the first, white for the second, and blue for the third. The first flag in Great Britain is the *Standard*, only to be hoisted when the King or Queen is on board; the second is the *Anchor of Hope*, which is hoisted for the Lord High Admiral, or Lords of the Admiralty; and the third is the *Union*, which is appropriated to the Admiral of the Fleet.

Flag is a term employed in the above sense in many sea phrases, as "To hang out the *white flag*," i. e. to call for quarter. "To hang out the *red flag*," to give the signal of defiance and battle. "To lower or strike the *flag*," to pull it down upon the cap, or to take it in, as a token of respect or submission to a superior power. "To lower or strike the *flag*" in an engagement, is a sign of yielding, or submission.—*Flag-officer*, an officer commanding a squadron.—*Flag-ship*, a ship commanded by a general or flag-officer.—*Flag-staff*, a continuation of the top-gallant mast above the top-gallant rigging.

FLAG'GELLANTS (*Ecc.*) a sect of heretics in the 13th century who reckoned flagellation as essential in order to obtain remission of sins. *Sigon. de Regn. Ital.* l. 19; *Pra-*

teol. de Doct. Omn. Hæret.; *Spondan. Annal. Ann.* 1260, &c.

FLAGELLA'RIA (*Bot.*) a genus of plants, Class 6 *Hexandria*, Order 3 *Trigynia*.

Generic Character. CAL. *perianth* six-leaved.—COR. none.—STAM. *filaments* six; *anthers* oblong.—PIST. *germ* ovate; *style* length of the stamens; *stigmas* three.—PER. *drupe* roundish; *seed* a round stone.

Species. The two species are perennials, as the—*Flagellaria indica et repens*, natives of Cochinchina.

FLAG'GEOLET (*Mus.*) a sort of pipe.

FLAG-O'FFICER (*Mar.*) vide *Flag*.

FLAG'GON (*Mech.*) a large drinking vessel.

FLAGS (*Falcon.*) the feathers in a hawk's wing next to the principal one.

FLAG-SHIP (*Mar.*) vide *Flag*.

FLAG-STAFF (*Mar.*) vide *Flag*.

FLAG-STONE (*Mason.*) or *Flag*, in French *steche*, a species of stone used for smooth pavement.

FLAIL (*Husband.*) the instrument used for threshing corn.

FLAIR (*Mar.*) a term applied to a ship the upper part of which, when housed near the water, hangs over too much.

FLAKE (*Hor.*) a name given by florists to a sort of carnations which are of two colours only, and have very large stripes.

FLAKE (*Paint.*) or white *Flake*, a colour formed by the corroding of lead with the acid of grapes.

FLAKE (*Mar.*) a sort of platform made of hurdles, and supported by stanchions. It is used for drying codfish in Newfoundland.

FLAM (*Mil.*) a signal given with the drum, formerly used in military exercise instead of the word of command.

FLAME (*Nat.*) the most subtle part of fire.

FLAME (*Her.*) is a bearing occasionally in coat armour to denote, as is supposed, fervency of zeal, as in the annexed figure. "He beareth *argent* a chevron voided *azure* between three flames of fire *proper*; name Wells."

FLA'MENS (*Ant.*) priests so called from the hat they wore, which was of a flame colour.

There were three appointed by Numa, who were patricians, to which were added twelve others afterwards, who were plebeians. The Flamens bore the name of the God to whom they were consecrated, as—The *Flamen Dialis*, the priest consecrated to Jupiter, who was chief over all.—The *Flamen Martialis*, the priest of Mars.—The *Flamen Quirinalis*, the priest of Romulus, &c. &c. *Varr. de Lat. Ling.* l. 4; *Dionys. Hal.* l. 2; *Liv.* l. 1, c. 20; *Aul. Gell.* l. 15, c. 27.

FLAM'INGO (*Orn.*) a sort of bird in Africa and South America, the *Phœnicopteros* of Linnæus, which has long legs and neck, is four feet four inches long from the tip of the bill to the end of the tail, feeds on aquatic insects and fishes, and makes its nest on hillocks in shallow water.

FLA'MMULA (*Bot.*) the *Clematis viorna* of Linnæus.

FLANCH (*Her.*) one of the honourable ordinaries formed by an arch line, which begins at the corners of the chiefs, and ends in the base of the escutcheon, as in the annexed figure.

FLANCONA'DE (*Fenc.*) a thrust in the flank or side.

FLANK (*Mil.*) the side of an army or battalion from the front to the rear, of which there are different kinds, as the—*Inward Flank*, in manœuvring the first file on the left of a division, subdivision, or section.—*Outward Flank*, the extreme file on the right or left of a division.—*Leading Flank*, the first battalion, division, &c. which conducts to the attack.—*Flank Files*, the two first men on the right and the two last men on the left.—*Flank Company*, a

certain number of men drawn up on the right or left of a battalion.—*Flank en potence*, any part of the right or left wing formed at a right angle with the line.

FLANK (*Fort.*) any part of a work that defends another work along the outside of its parapet, of which there are different kinds, as the—*Flank of the Bastion*, that part which joins the face to the curtain.—*Oblique or second Flank*, that part of the curtain from which the face of the opposite bastion may be discovered.—*Retired Flank, low Flank, or covered Flank*, the platform of the casemate, which lies hid in the bastion.—*Flank prolonged*, the extending of the flank from the angle of the epaulement to the exterior side.—*Flank fichant*, the flank from which the cannon playing fires directly on the opposite bastion.—*Flank razant*, the point from which the line of defence commences.—*Flanks of a frontier*, the different salient points of a large extent of territory.

to **FLANK** (*Fort.*) to erect a battery which may play on an enemy's works on the right or the left without being exposed to his fire.

to **FLANK** (*Mil.*) to take such a position as to be enabled to attack the enemy's flanks without being exposed to all his fire.—*To outflank*, to outstretch the enemy's forces, so as to get upon his flanks.

FLANKARDS (*Sport.*) the knobs or nuts in the flank of a deer.

FLANKED angle (*Fort.*) vide *Angle*.

FLANKER (*Fort.*) a fortification jutting out so as to command the side or flank of an enemy marching to the assault.

to **FLANKER** (*Fort.*) to fortify the walls of a city with bulwarks or countermines.

FLANKERS (*Mil.*) the most active men and horses in cavalry manœuvres, who are selected to do the duty of flankers. [vide *Flanking Party*]

FLANKING (*Fort.*) the same as defending.—*Flanking angle*, the angle composed of the two lines of defence, and pointing towards the curtain.

FLANKING party (*Mil.*) any body of men detached from the main army to get upon the flanks of an enemy, so as to secure a line of march. The men and horses selected to do this duty are called *Flankers*.

FLANKS (*Vet.*) a wrench or any other harm to the back of a horse.

to **FLARE** (*Mar.*) or to *flare over*, to hang over, i. e. when a vessel is let out broader aloft than the due proportion will allow. *Flaring*, in distinction from falling home, is when a ship's side forward falls out from a perpendicular; then she is said to have a flaring bow.

FLASK (*Mech.*) a measure for holding gunpowder, and measuring it out when the piece is loaded.

FLASK (*Her.*) or *flaque*, an ordinary which resembles the flanch in form, but is smaller. Gibbon makes the flask and flanch to be the same thing.

FLASQUES (*Gunn.*) the two cheeks of the carriage of a great gun.

FLAT (*Mar.*) in French *bas-fond*, or *batture*, a level ground lying at a small depth under the surface of the sea, otherwise called a shoal, or shallow.—*Flat aft*, is the situation of the sails when their surfaces are pressed aft against the mast.—*Flat bottomed*, an epithet for boats built to swim in shallow water.

FLAT (*Mus.*) a character marked thus [b] depresses the note before which it is placed one semitone lower. The *double Flat* depresses a note already flattened another semitone lower.

FLAT (*Bot.*) *planus*; an epithet for a leaf; *folium planum*, a leaf having an even surface.

to **FLAT in the sail** (*Mar.*) in French *traverser la voile*, is to draw in the aftmost clew of a sail towards the middle of

the ship.—*Flat in forward!* an order to draw in the jib and fore-topmast-stay-sail sheets towards the middle of the ship.

to **FLA'TTEN** (*Paint.*) in house-painting, is to give a newly painted wall such a coat of colour as takes off its glossy appearance.

FLATS, in *ship-building*, the name given to all the timbers in midships.

FLA'TUS (*Med.*) flatulencies; air contained in the cavity of the body.

FLAUTINO (*Mus.*) Italian for a small flute.

FLAW (*Gunn.*) any crack or small opening in a gun.

FLAW (*Min.*) a defect in precious stones, metals, &c.

FLAW (*Mar.*) a sudden breeze or gust of wind.

FLAX (*Bot.*) a well-known plant classed by Linnæus under the genus *Linum*. The Common Flax, *Linum usitatissimum*, is an annual, but the other sorts are mostly perennial. The seeds of flax, called linseed, yield, by expression, an oil well known by the name of *linseed oil*.—*Toad Flax*, the *Antirrhinum* of Linnæus.

FLAX (*Min.*) Earth or Mountain Flax, the *Asbestos* of Linnæus.

FLEA (*Ent.*) a well-known insect, the *Pulex* of Linnæus.

FLE'ABANE (*Bot.*) the *Conyza* of Linnæus.—*Flea Grass*, the *Carex pulicaris*, a perennial.—*Flea Wort*, the *Plantago psellium*.

FLEAM (*Surg.*) an instrument for lancing the gums.

FLEAM (*Vet.*) an instrument for bleeding a horse.

FLEAU (*Mech.*) French for a beam or balance of a pair of scales.—*Fleau de porte*, the strong iron or wooden bar which falls across the inside of the gates of a town.

FLE'BILE (*Mus.*) an epithet signifying soft and doleful, applied to a style of performance.

FLE'CTA (*Archæol.*) a feathered arrow.

FLEDWITH (*Law*) from the Saxon *flyghz*, flight, and *þite*, a fine; a discharge from fines where an outlawed fugitive comes to the place of his own accord.

FLEECE (*Her.*) the *golden fleece*, or *toyson d'or*, has been borne in the escutcheon in some instances, as in the annexed figure; he beareth "azure a toyson d'or, by the name of Jason." 

FLEET (*Mar.*) a number of ships together in company, or under one commander.

to **FLEET** (*Mar.*) in French *affaler*, to change the situation of a tackle when the blocks are drawn together.

FLEGME (*Her.*) or *fleam*, is borne in the arms of the company of surgeons.

FLEM (*Law*) an outlaw; whence *flemaflare*, to claim a felon's goods, as may be gathered from a *quo warranto*. *Temp. Ed. 3.*

FLEMAFLA'RE (*Law*) from the Saxon *flyma*, an outlaw, and *flean*, to slay; a claim of a felon's goods.

FLE'MEN (*Med.*) a tumour about the ancles.

FLE'MENEFRIT (*Ant.*) or *Flemenesfrinthe*, from the Saxon *flyma*, an outlaw, and *þymean*, to afford victuals; the receiving or relieving a fugitive or outlaw. *Leg. In. c. 29; LL. H. 1, c. 10.*

FLE'MESWITE (*Law*) from the Saxon *flyma*, a fugitive, and *þite*, a fine; the liberty of challenging the chattels or fines of one's servant who is an outlaw. *Flet. l. 1, c. 47.*

FLE'RESIN (*Med.*) a name for the gout.

FLESH (*Anat.*) the similar and fibrous parts of the body, which is soft and thick. It is distinguished into the *muscular*, or *fibrous*, as of the heart and other muscles; *perenchymous*, as that of the lungs; *viscerous*, as that of the stomach and intestines; *glandulous*, as that of the tonsils; and *spurious*, as the flesh of the gums, lips, &c. *Flesh* is also particularly applied to the red part of a muscle.

FLESH (*Bot.*) the soft pulpy substance of any fruit.

to **FLESH a sword** (*Mil.*) to draw blood by means of a sword.

FLE'SH-POT (*Her.*) was borne formerly in some escutcheons.

FLE'SHY (*Bot.*) an epithet for a leaf that is full of pulp within, as the *sedum*.

FLEUR-DE-LIS (*Her.*) i. e. Flower-de-Luce, a bearing in the arms of France, which consist, as in *fig. 1*, of three fleurs-de-lis, or, in a field, *azure*.—*Fleur-de-lis*, a general

Fig. 1.

Fig. 2.

bearing, signifies, as authors observe, service in France. It occurs very frequently in escutcheons, as in *fig. 2*. He beareth, "Or, a Fleur-de-Lis, *azure*." The *Fleur-de-Lis* is also the distinguishing mark for the sixth son of a family.

FLEURETTE (*Her.*) vide *Fleury*.

FLEU'RONS (*Cook.*) fine puffs of pastry work for garnishing.

FLEURY (*Her.*) an epithet for a cross which is similar to the *Cross-flory*.

FLEXILIS (*Bot.*) flexible, an epithet applied to the stem and the raceme of a plant.

FLEXOR (*Anat.*) an epithet for several muscles whose office it is to bend the parts into which they are inserted, as *flexor carpi radialis*, a muscle of the wrist; *flexor tertii internodii*, a muscle of the thumb; *flexor pollicis brevis*, a muscle of the great toe, &c.

FLEXURE (*Geom.*) or *Flexion*, the bending or curving of a line or figure; thus, when a line first bends one way and then another, the point where the bend changes to the other side is called the *point of contrary flexure*.

FLEXUOSUS (*Bot.*) flexuose, or, according to Withering, zig-zag; an epithet for a stem that changes its flexure, or bending direction, from bud to bud, as in the *Ptelea*, *Smilax*, &c.; also an epithet for a peduncle.

FLIGHERS (*Archæol.*) masts for ships. *Mon. Angl.* tom. i. p. 799.

FLIGHT (*Mil.*) a term applicable to missile weapons signifying a shot, as "A *flight* of arrows," "A *flight* of bombs," &c.—*Flight-shot*, the motion of an arrow shot from a bow.

FLIGHT (*Mech.*) a substance so called, which flies away in the smoke in the melting of lead.

FLINT (*Mil.*) the stone which is fixed into the *jaws* or pieces of iron belonging to the cock of a gun, by which fire is elicited for the purpose of discharging the piece.

FLITCH (*Mar.*) the name of a piece of small timber applied to ships for the purpose of sawing up into boat-timber; so called perhaps from the resemblance which its smaller parts bear to a flitch of bacon.

FLITCHWHITE (*Law*) from the Saxon *flit*, a contention, and *white*, a fine; a fine on account of broils and quarrels.

FLITTERING (*Husband.*) the act of a horse which, fastened to a stake, eats up all the grass within his reach.

FLITTERMOUSE (*Zool.*) another name for the bat.

FLIX-WEED (*Bot.*) the *Sisymbrium sophia* of Linnæus.

FLOAT (*Her.*) an instrument used by the bowyers, which is borne in their arms.

FLOAT (*Mar.*) a raft, or a number of pieces of timber fastened together with rafters athwart, to be driven along a river with the tide or current. "To *float*," to be borne, or wafted along with the tide on the surface of the water.

TO FLOAT (*Mil.*) is said of a column when it loses its perpendicular line in its march, and becomes unsteady.

FLOATAGES (*Law*) vide *Flotages*.

FLOAT-BOARDS (*Mech.*) the boards fixed to the outer rim of undershot water wheels.

FLOAT-BOARDS (*Mech.*) boards fixed to the water wheels of

undershot mills, serving to receive the impulse of the stream.

FLOATING (*Husband.*) the watering or overflowing of meadows.

FLOATING battery (*Mar.*) vessels used as batteries to cover troops in landing on an enemy's coast.

FLOATING (*Bot.*) *natans*, an epithet for a leaf that floats on the surface of the water.

FLOATING bridge (*Mil.*) a bridge made in the form of a redoubt, consisting of two boats covered with planks.

FLOATING light (*Mar.*) a hollow vessel of tinned ironplate made in the form of a boat, &c. with a reflector or lanthorn, for the purpose of saving those who may have the misfortune to fall overboard in the night.

FLOATS (*Mar.*) vide *Float*.

FLOCK (*Husband.*) a number of sheep in company; also a lock of wool.

FLOOD (*Nat.*) in French *le flux*, the flux of the tide, or the time that the water continues rising. When it commences it is called a *young Flood*, after which it is *quarter Flood*, *half Flood*, and *high Flood*.

FLOOD-GATE (*Mech.*) a gate or sluice which may be opened or shut at pleasure for the admission or exclusion of the water.

FLOOD-MARK (*Mar.*) the mark which the sea makes on the shore at the highest tide, otherwise called *high-water-mark*.

FLOOK (*Mar.*) vide *Flouk*.

FLOOR (*Carpent.*) the area, or horizontal surface of a room; if made of brick, it is called a *pavement*; if of plaster, a *lime floor*; if of wood, a *boarded* or *timber floor*. The term *floor* is also applied to that part of a building which is on the same level, as the *basement floor*, the *ground floor*, the *first floor*, *second floor*, &c.

FLOOR of a ship (*Mar.*) so much of a ship as rests on the ground.

FLOORING (*Carpent.*) the act of laying a floor; also the workmanship in a floor, and the hoards which compose the floor. The timbers which support the boarding are called *naked flooring*.

FLO'RAL bud (*Bot.*) an epithet for a bud and a leaf; *gemma floralis*, a bud that contains the flowers; *folium florale*, a leaf that immediately attends the flower.

FLORAL games (*Archæol.*) a ceremony anciently performed in France on May-Day, when poems were rehearsed, and prizes adjudged to the best performances.

FLORA'LIA (*Ant.*) a Roman festival in honour of the goddess Flora, which was celebrated by all sorts of obscenities. *Ovid. Fast.* l. 5; *Senec. epist.* 97; *Val. Mar.* l. 2, c. 10; *Lactant.* l. 1, c. 12; *Panciroll. Descript. Urb. Roman. apud Græv. Thes. Antiq. Roman.* tom. iii. p. 344.

FLO'REN (*Numis.*) vide *Florin*.

FLO'RENCE (*Numis.*) vide *Florin*.

FLO'RENTINE marble (*Min.*) otherwise called *Landskip marble*; a sort of marble in which the figures of buildings, &c. are naturally represented.

FLO'RES (*Chem.*) vide *Flowers*.

FLORESCENCE (*Bot.*) *florescentia*, the flowering season.

FLO'RET (*Bot.*) *flosculus*, the partial or little flower of an aggregate flower, chiefly in the Class *Syngenesia*, of compound flowers properly so called.

FLO'RID Style (*Archit.*) or *Florid Gothic*, a sort of Gothic architecture which is filled with points, ramifications, multilions, &c.

FLO'RID (*Mus.*) an epithet for any composition or performance which is of a fanciful, rich, and embellished style.

FLO'RID (*Rhet.*) any epithet for a discourse which is full of figures and tropes.

FLO'RIN (*Numis.*) or *Florence*, a gold coin so called because it was struck first in Florence, and became afterwards the general name for all gold coin throughout

Europe. The first English Florins were coined in the reign of Edward III. [vide *Coinage*]

FLORIN (*Com.*) is now either a coin of different values, or a money of account in different countries.

FLORINIANS (*Ecc.*) a sect of heretics in the second century, so called after their ring-leader, one Florinus, who maintained, among other impieties, that God not only permitted, but also did evil. *Iren.* l. 5; *Euseb.* l. 5, c. 14; *S. Augst. de Hær.* c. 69; *Theodoret. Hær. Fab.* l. 1; *Philast.* c. 58.

FLORIST (*Bot.*) one who is skilled in the art of cultivating flowers.

FLO'RY (*Her.*) an epithet signifying flowered with the Fleurs-de-Lis.—A cross *flory* has flowers at the ends circumflex and turning down, as in the annexed figure; so likewise a *Bend flory*, &c.

FLOS (*Bot.*) is a general name for the flower. [vide *Flower*]

FLOS is also the name of several species of plants, as—*Flos adonis* the same as the *Adonis* of Linnæus.—*Flos ævis*, the *Epidendrum flos ævis*.—*Flos africanus*, the *Tagetes patula*.—*Flos cœruleus*, the *Clitoria ternatea*.—*Flos cardinalis*, the *Ipomœa quamœlit*.—*Flos clitoridis*, the *Clitoria ternatea*.—*Flos cuculi*, a species of the *Cardamum*.—*Flos globosus*, the *Gomphrena globosa*.—*Flos Passionis*, the *Passiflora perfoliata*.—*Flos pergularis*, the *Purgularia glabra*.—*Flos rigens*, another name for the *Delphinium*.—*Flos solis*, another name for the *Cistus*.—*Flos Susannæ*, the *Orchis Susannæ*.—*Flos trinitalis*, another name for the *Viola*.—*Flos vestivalis*, another name for the *Hibiscus*.

FLOS (*Chem.*) vide *Flowers*.

FLO'TA (*Archæol.*) a fleet.

FLO'TAGES (*Law*) things that float on the sea, or in great rivers.

FLO'TANT (*Her.*) an epithet for a banner, or any thing flying.

FLOTSAM (*Law*) a name for the goods which float upon the sea when a ship is sunk, in distinction from *Jetsam*, i. e. the goods thrown out to lighten the ship in case of danger; *Lagan*, or *ligan*, heavy goods cast into the sea in case of danger; *Wreck*, i. e. the ship or goods cast upon land by the sea. In law these terms are mostly used together. *Bract.* l. 2, c. 5.

FLOUK (*Mar.*) or *Flook*, that part of the anchor which takes hold of the ground. [vide *Anchor*]

FLOUNDER (*Ich.*) a sort of flat-fish, and a species of the *Pleuronectes* of Linnæus. It inhabits the European seas, and enters the rivers; seldom exceeds six pounds in weight, and has short spines on the right side of the fins.

FLOURET (*Bot.*) vide *Floret*.

FLOURISH (*Mus.*) a prelude, or preparatory air, without any settled rule: also the decorative notes which a singer, or instrumental performer, adds sometimes to a passage.

FLOURISH (*Mil.*) is the sounding of the trumpet on receiving any officer or person of distinction.

to FLOW (*Mar.*) is used in some sea-phrases, as “It flows south,” it is high water when the sun is at that point at New or Full Moon. “It flows tide and half tide,” i. e. it will be half flood by the shore before it begins to flow in the channel. “Flown sheets,” i. e. when the sheets are not haled home, or close to the block.

FLOWER (*Bot.*) *flos*, that part of a plant which contains the organs of generation with their covering. A flower, when complete, consists of a *calyx*, *corolla*, *stamen*, and *pistil*; but the essential parts to constitute a flower are the *anther* and the *stigma*, either together, or in separate flowers.

FLOWER is also the name of several species of plants, as—*Flower-de-Luce*, the *Iris pseudacorus* of Linnæus.—*Flower Fence*, a species of the *Adenantha*.—*Flower Gentle*, the

Amaranthus spinosus.—*Flower Fern*, the *Osmunda regalis*.—*Everlasting Flower*, the *Gnaphalium*.—*Sun-Flower*, the *Helianthus*.—*Sultan-Flower*, the *Cyanus*.—*Trumpet-Flower*, the *Bignonia*.

FLOWERING-RUSH (*Bot.*) the *Butomus umbellatus* of Linnæus.

FLOWERS (*Chem.*) the fine mealy matter which, in sublimation, is carried up into the head and aludels, and adheres to them in the form of a powder, as the Flowers of Benjamin, zink, sulphur, &c.

FLOWER-STALK (*Bot.*) the same as the peduncle. [vide *Pedunculus*]

FLOWING (*Mar.*) or *flowing sheets*, the position of the sails when they are loosened to the wind.

FLUATES (*Chem.*) a salt formed by the combination of fluoric acid with different bases, as the *fluat* of ammonia, potash, lime, &c.

FLUCTUATION (*Surg.*) the undulatory motion of any fluid, as pus in an abscess, &c.

FLUE (*Archit.*) the long tube of a chimney, from the fire place to the top of the shaft.

FLUE (*Husband.*) the soft down from feathers, and the skins from rabbits, &c.

FLUELLIN (*Bot.*) the *Antirrhinum elatine* of Linnæus, an annual.

FLUENT (*Flux.*) or *flowing quantity*, the variable quantity which is considered as increasing or decreasing. *Newt. Introd. Quadrat. Curv.*

FLUGEL-MAN (*Mil.*) a well-drilled soldier, who is advanced in front to give the time in the manual and platoon exercises.

FLUID (*Nat.*) or *fluid Body*, is that whose parts, according to Newton, yield to the smallest force impressed, and by yielding are easily moved among each other. Fluids are either *elastic*, as the air, or *non-elastic*, as water, mercury, &c.

FLUIDS, of the Body (*Anat.*) the fluid parts of the body distinguished from the solids, as the blood, chyle, saliva, &c. [vide *Anatomy*]

FLUKE (*Ent.*) or *Gourd-Worm*, an hermaphrodite oviparous animal of the worm tribe, the *Fasciola* of Linnæus.

FLUKE (*Mar.*) vide *Flouke*.

FLU'OR albus (*Med.*) ῥόος λευκός, a cachectic disorder, to which females are subject at all ages, but particularly in the prime of life, consisting of an irregular discharge of impure mucid humour. *Hippocrat. de Morb. Mul.* l. 2; *Aret. diut. Morb.* l. 2, c. 10; *Gal. Def. Med.*; *Oribas. Med. Collect.* l. 6; *Paul. Æginet.* l. 3, c. 13.

FLUOR (*Min.*) or *Fluor Spar*, a species of salt which abounds in nature, and is found to consist of fluoric acid and lime. It is called *Fluor* because it melts readily: it is called *Spar* because it has a sparry form and fracture: and it is called *vitreous Spar* because it has the appearance of glass.

FLUORIC Acid (*Chem.*) an acid which is extracted from the mineral called *fluor*.

FLUOSILIC ACID (*Chem.*) a composition of fluoric acid and silica.

FLURRY of Wind (*Mar.*) a light breeze of wind shifting to different places.

FLUSH (*Carpent.*) a term among workmen, signifying that two bodies joined together make an even surface.

FLUSH fore and aft (*Mar.*) a term applied to a ship when the decks are laid level from head to stern.

FLUSH (*Sport.*) a term in a game at cards where they are all of a suit.

FLU'STRA (*Ent.*) a genus of animals, Class *Vermes*, Order *Zoophyta*.

Generic Character. *Animal* a polypc, proceeding from porous cells; *stem* fixed and foliaceous, consisting of numerous rows of cells.

FLY

- Species.* Animals of this tribe, called in English Horn-wrack, inhabit the seas and oceans, adhering to rocks and shells.
- FLUTE** (*Mus.*) a wind instrument, consisting of a boxen or ivory tube, furnished with holes at the sides for varying the sounds. The common flute was formerly called *Flute à bec*, because one end resembled the beak of a bird. The German flute consists of a tube formed of several joints screwed into each other.
- FLUTED** (*Archit.*) an epithet for a column which has flutes. [vide *Flutes*].
- FLUTED** (*Mus.*) an epithet for the upper and extra notes of a soprano voice.
- FLUTES** (*Archit.*) or *Flutings*, are the hollow channels formed along the surface of a column, which is then said to be fluted. The Doric, Ionic, Corinthian, and Composite columns, are usually fluted all along the body of the pillar from the base to the capital. Each column has 24 flutes, and each flute is hollowed in exactly a quarter of a circle, when a portion of the surface is left between the flutes, this is called the *fillet*.
- FLUVIALIS** (*Bot.*) the *Najas marina* of Linnæus.
- FLUX** (*Med.*) another word for Dysentery.
- FLUX and Reflux** (*Nat.*) the regular and periodical motion of the sea, which happens twice in 24 hours, 48 minutes. The *flux* is one motion of the tide, by which the water rises; and the *reflux*, or ebb, is the other motion, by which it sinks. Between the Flux and Reflux there is a kind of rest when the water is at its highest point, called *High-water*.
- FLUX Powders** (*Chem.*) or, as the French call them, *fondants*, are powders prepared to facilitate the fusion of the harder metals. Powder of antimony is a very good flux in many cases.
- FLUXION** (*Chem.*) the running of metals into a fluid.
- FLUXION** (*Med.*) a flowing of humours or rheum.
- FLUXION** (*Surg.*) that which raises a swelling by the fluidity of its matter.
- FLUXION** (*Math.*) in the Newtonian Analysis, implies the magnitude by which any flowing quantity would be increased in a given time with a certain invariable velocity, in distinction from the *fluent* or flowing quantity, which is constantly and indefinitely increasing.—*Fluxions*, or the *method of Fluxions*, is the analysis of fluxions and flowing quantities. The notation, as introduced by Sir Isaac Newton, is as follows: the letters *v, x, y, z*, stand for the variable or flowing quantity; the same letters, with a dot over them, for the fluxions, as $\dot{v}, \dot{x}, \dot{y}, \dot{z}$; and if the fluxions themselves are variable quantities, their fluxions are denoted by two dots, as $\ddot{x}, \ddot{y}, \ddot{z}$; in the same manner the fluxions of the last fluxions may be continually denoted by the addition of a dot, as $\dot{\ddot{x}}, \dot{\ddot{y}}, \dot{\ddot{z}}$, for the third fluxion; $\ddot{\ddot{x}}, \ddot{\ddot{y}}, \ddot{\ddot{z}}$, for the fourth, &c. If the flowing quantity be a surd, as $\sqrt{x-y}$, its fluxion is denoted by $(\sqrt{x-y})'$; if a fraction as $\frac{xx}{d-y}$ by $(\frac{xx}{d-y})'$; but sometimes the fluxions are denoted by the letter *F*, and the fluent by *f*, as *F*. $\sqrt{x-y}$, the fluxion of $\sqrt{x-y}$; and *f*. $\dot{x} \sqrt{+ax^2}$, the fluent of $\dot{x} \sqrt{+ax^2}$. Invariable quantities are denoted by the letters *a, b, c, d*, &c.
- FLY** (*Ent.*) an insect of different kinds, which is classed under different names and genera. The common *Fly* is the *Musca* of Linnæus. The other kinds, as the Boat-fly, Butter-fly, Day-fly, Dragon-fly, Gad-fly, Golden-fly, Horse-fly, Lanthorn-fly, and Saw-fly, will be found in their respective places.
- FLY** (*Mech.*) a heavy weight applied to certain machines, to regulate their motions, as in a jack; or to increase their effect, as in the coining engine.

FOC

- FLY of the Compass** (*Mech.*) that part of the compass on which the thirty-two points or winds are drawn, and to which the needle is fastened underneath.
- FLY of an Ensign, Pendant, &c.** (*Mar.*) in French *battant d'un pavillon, &c.* the breadth or extent from the staff to the extreme edge or end that flutters loose in the wind.—*Fly-Boat*, a large vessel with a broad bow, used in the coasting trade.
- Fly* is also used in the sea phrase: "To let *fly* the sheets," i. e. to let the sails go out a-main.
- TO FLY (*Falcon.*) is used in some phrases, as "To *fly* gross," said of a hawk when she flies at great birds. "To *fly* on head," i. e. when a hawk, missing her quarry, betakes herself to her next check.
- FLY-BOAT** (*Mar.*) vide *Fly*.
- FLY-CATCHER** (*Orn.*) a sort of bird, inhabiting Asia, Africa, and America, which is so denominated because it feeds on insects, chiefly flies. It is the *Muscicapa* of Linnæus.
- FLY-HONEY-SUCKLE** (*Bot.*) the *Halleria lucida* of Linnæus, a shrub.—Fly-Orchis, the *Orchis mucifera*, a plant, so called from the resemblance it bears in figure to that of a fly.—Venus' Fly-Trap, a kind of sensitive plant, the leaves of which consist of two lobes that close when they are irritated within, and consequently entrap any insect that lights upon them; from which circumstance it derives its name. It is the *Dionæa muscipula* of Linnæus.
- FLYERS** (*Archit.*) a series of steps in a flight of stairs which go straight forward, without winding round, and are made equally broad at both ends.
- FLYING-BRIDGE** (*Archit.*) a bridge composed of two moveable parts, which may be transferred from place to place.
- FLYING-DRAGON** (*Zool.*) a fourfooted reptile, inhabiting Africa and India, which is tailed and winged. It differs from the lizard tribe only by having a lateral membrane, which serves as a wing.
- FLYING-FISH** (*Ich.*) a sort of fish which inhabits the European and American seas: it is so called because it is enabled, by means of its long pectoral fins, to raise itself out of the water and remain suspended in the air for some time, which it does for the purpose of escaping from the jaws of predatory fish. It is the *Exocoetus* of Linnæus.
- FLYING-FISH** (*Her.*) is occasionally borne as a charge in coat-armour.
- FLYING-PINNION** (*Mech.*) that part of a clock which has a fly or fan wherewith to gather the air, and so to check the rapidity of the clock's motion when the weight descends in the striking part.
- FLYING-TYGER** (*Ent.*) an insect in America, spotted like the tyger.
- FOAL** (*Vet.*) a young colt.
- FO'CACHE** (*Archæol.*) Hearth-money.
- FO'CAL DISTANCE** (*Conic.*) the distance of the focus, which, in the parabola, is understood to be its distance from the vertex; and in the ellipse, or hyperbola, from the centre.
- FOCALE** (*Cus.*) a sort of kerchief or muffler, formerly worn about the neck, to guard the fauces from the cold.
- FO'CILE** *majus* (*Anat.*) the greater bone of the arm, called *ulna*; or the greater bone of the leg, called *tibia*. The lesser bone of the arm or leg is called *fo'cile minus*.
- FO'CUS** (*Metal.*) another name for a smelting-house.
- Focus morbi** (*Med.*) *isis*, the part in which a disease was supposed to keep its principal residence, as the *focus* of a fever, of which Galen speaks. *De Marasm.* c. 7.
- Focus** (*Anat.*) was formerly the name given to the first lobe of the liver, from a persuasion that it contributed to concoction.
- Focus** (*Geom.*) certain points in the transverse axis of the

ellipse, hyperbola, and parabola, from which two lines drawn to any point in the curve will bear a certain proportion; namely, their sum in the ellipse or parabola, and their difference in the hyperbola is equal to the transverse axis. [vide *Conic Sections*] They are so called because the rays reflected from all parts of these curves concur or meet, i. e. rays issuing from a luminous point in one focus, and falling on all points of the curves, are reflected into the focus or the line directed to the other focus, viz. into the other focus in the ellipse and parabola, and directly from it in the hyperbola.

Focus (*Opt.*) the point of convergence or concurrence in which several rays meet or are collected, after being either reflected or refracted. It is so called because the rays being here united, their force is increased; but it is worthy of observation, that although denominated a point, it is not strictly so, because it occupies a space of some small breadth.

FODDER (*Law*) a prerogative which the king has, to be provided with corn, &c. for his horses in warlike expeditions.

FODDER of lead (*Com.*) a weight consisting of $19\frac{1}{2}$ hundred weight.

FODDER (*Husband.*) any kind of food for cattle, which is either green or dry. *Green Fodder* consists of grass, tares, hay, vetches, &c. *Dry Fodder* of corn, oats, barley, and beans.

FODERFORIUM (*Law*) provision of fodder, or forage, made to the King's purveyors.

FODINA (*Anat.*) the labyrinth, or lesser pit in the bone of the ear.

FŒMINŒUS (*Bot.*) vide *Female*.

FŒNICULUM (*Bot.*) the *Anethum fœniculum* of Linnæus.

FŒNUM BURGUNDICUM (*Bot.*) the *Medicago sativa* of Linnæus.—*Fœnum Græcum*, the *Ononis ornithopodioides*.—*Fœnum Græcum* is also Fenu-Greek. [vide *Fenugreek*]

FOETA'BULUM (*Med.*) an incysted abscess, or foul ulcer.

FOETUS (*Anat.*) *epicyema*, the child enclosed in the uterus of its mother, so called from the fifth month after pregnancy until the time of its birth. The internal parts peculiar to the fœtus are, *thymus gland*, *canalis venosus*, *canalis arteriosus*, *foramen ovale*, and the *membrana pupillaris*.

FOG (*Nat.*) a mist or meteor, consisting of condensed vapours floating near the surface of the earth or sea.

FOG-BANK (*Mar.*) an appearance in hazy weather, which frequently resembles land at a distance, but which vanishes as you approach it.

FOIL (*Fenc.*) an elastic piece of steel, mounted like a sword, which is used in fencing for exercise.

FOIL (*Sport.*) a fall in wrestling not cleverly given.

FOIL (*Mech.*) a sheet of thin tin to be laid on the back side of looking-glasses.

FOILING (*Sport.*) the footing or treading of deer that are on the grass.

to **FOIN** (*Fenc.*) to make a pass, or thrust, in fencing.

FOINES (*Com.*) from the French *foine*, a weasel; a sort of fur of that animal.

FOISON (*Husband.*) a term sometimes used to denote the natural juice or moisture of the grass, &c.

FOITERERS (*Archæol.*) vide *Faitours*.

FOLCLANDS (*Archæol.*) copyhold lands so called in the time of the Saxons, in distinction from the Boclands. *Spelm. Feuds.* c. 5.

FOLC-MOTE (*Archæol.*) or *Folkmote*, in Saxon *folc-gemot*, from *folc*, the people, and *gemot*, or *mot*, a meeting or assembly; two courts, one now called the County Court, and the other the Sheriff's Turn.

FOLD (*Husband.*) an inclosed place in the fields in which sheep are confined.

FOLDAGE (*Archæol.*) a liberty to fold sheep.

FOLD-NET (*Sport.*) a sort of net for taking small birds in the night.

FOLE (*Vet.*) vide *Foal*.

FOLGAR'II (*Archæol.*) menial servants or followers, in distinction from *Husfastene*, or housekeepers. *LL. H.* 1, c. 9; *Bract.* l. 3, tract. 2, c. 10.

FOLIA'CEUS (*Bot.*) foliaceous or leafy; an epithet for a leaf, or the glands: *spica foliacea* is a spike having leaves intermixed with the flowers; *glandulæ foliææ*, glands situated on the leaves.

FOLIAGE (*Archit.*) a kind of ornament in cornices, friezes, &c. representing the leaves of plants. [vide *Architecture*, Plate No. III.]

FOLIAGE (*Paint. &c.*) branched work in painting, tapestry, &c.

FOLIARIS (*Bot.*) an epithet for a tendril and a bud: *cirrus foliaris*, a tendril placed on a stalk; *gemma foliaris*, a leaf bud containing leaves, not flowers.

FOLIATE (*Geom.*) an epithet for a curve of the second order, expressed by the equation $x^3 + y^3 = a x y$, which is one of the defective hyperbolas.

to **FOLIATE** a *looking-glass* (*Mech.*) to lay the foil on so as to make it reflect the image.

FOLIATIO (*Bot.*) veneration, or leafing; one stage of vegetation, in which the nascent leaves are disposed in a particular manner in the form of a bud. The different modes of foliation are by *Involution*, *Revolution*, *Obvolution*, *Convolution*, *Imbrication*, *Equitation*, *Conduplication*, *Plaiting*, *Reclination*, *Circinal* or *Spiral* direction. [vide *Involution*, &c.]

FOLIA'TUS (*Bot.*) foliate, or leafy; an epithet for a stalk.

FOLIO (*Com.*) the page, or rather the right and left hand page, in a merchant's ledger, which are numbered by the same figure corresponding to each other; whence, to *folio* is to put numbers on the pages.—*Folio* signifies the largest form of paper such as it comes from the manufactory; whence, also, books made in this form are called *folio*.

FOLIOLUM (*Bot.*) a partial or small leaf; a leaflet.

FOLIOSUS (*Bot.*) leafy, an epithet for a *capitulum*, or head, having leaves intermixed with the flowers.

FOLIUM (*Bot.*) vide *Leaf*.

FOLLICULUS (*Bot.*) the diminutive of *follicis*, a bag, signifying a follicle or little bag; a univalvular pericarp, opening on one side longitudinally, and having the seeds loose in it.—*Folliculus* is also the name of little vessels or bags filled with air, called, by *Withering*, *air bags*, as at the root of the *Utricularia*.

FOLLICULUS (*Surg.*) the bag or cystis, resembling a membrane, which contains the matter of anomalous abscesses.

FOLLICULUS fellis (*Anat.*) the gall-bladder.

FOLMAHŪT (*Astron.*) a fixed star, of the first magnitude, in the constellation *Aquarius*, whose mean longitude at the beginning of 1760 was $11^{\circ} 0' 28' 55''$; latitude $21^{\circ} 6' 28''$ South.

FOMENTATION (*Med.*) the bathing any part of the body with a decoction of herbs, &c.—*Dry fomentation* is an application to the body, consisting of bags stuffed with herbs and other ingredients.

FOMES Ventriculi (*Med.*) *Hypochondriacism*.

FOMITES (*Med.*) a name given mostly to such things as are imbued with contagion.

FONS PULSA'TILIS (*Anat.*) vide *Fontanella*.

FONT (*Ecc.*) a basin or place in a church, for baptizing.

FONT (*Print.*) a cast or complete set of letters for printing.

FONTANELLA (*Anat.*) the membranous part found in new-born infants at the coronal and sagittal commissures, which, in length of time, hardens into bone. It is either anterior or posterior.

FONTANELLA (*Surg.*) another name for an issue.

FONTANE/SIA (*Bot.*) a genus of plants, Class 2 *Diandria*, Order 1 *Monogynia*.
Generic Character. CAL. four-parted.—COR. *petals* ovate.
 STAM. *filaments* two; *anthers* oblong.—PIST. *germ* ovate; *style* compressed; *stigmas* two.—PER. *capsule* subovate; *seeds* oblong.
Species. The single species is the—*Fontanesia phyllireoides*, native of Syria.

FONTILAPATHUM (*Bot.*) the *Potamogeton crispum* of Linnæus.

FONTINALIA (*Ant.*) a Roman festival at which wells were crowned with garlands. It was celebrated on the Ides of October. *Varr. de Ling. Lat.* l. 5, c. 3; *Fest. de Verb. Signif.*; *Gyrard. Syntag. Deor.* l. 17, p. 496; *Ursat. de Not. Roman. apud Græv. Thes. Rom. Antiq.* tom. 11, p. 724.

FONTINALIS (*Bot.*) a genus of Mosses.

FONTALIS is also a species of the *Byrum*.

FOOLS-PARSLEY (*Bot.*) the *Æthusa cynapium* of Linnæus.

FOOT (*Arith.*) a measure of length which in England consists of 12 inches: in Holland and other countries it is less than 12; and at Venice above 13 inches.—A *square Foot* is the same measure both in length and breadth, containing $12 \times 12 = 144$ square or superficial inches.—A *cubic Foot* is the same measure in all the three dimensions (length, breadth, and thickness), containing $12 \times 12 = 144 \times 12 = 1728$ cubic inches.

FOOT (*Poet.*) a certain number of syllables which serve for the measuring of verses. The Greek and Roman poets employed feet of two syllables, as the Spondee, Trochee, Iambic, &c.; of three syllables, as the Dactyl, Anapæst, Molussus, &c.; of four syllables, as the Choriambus, Epitritus, Antispastus, &c. [vide *Grammar*]

FOOT of a vertical line (*Perspec.*) that point in the intersecting line which is made by a vertical plane passing through the eye and the centre of the picture.—*Foot of the Eye-Director*, the same point in the directing line.

FOOT (*Mil.*) soldiers who serve on foot, otherwise called *infantry*.

FOOT-BANK (*Fort.*) or *foot-step*, a step about a foot and a half high and three feet wide, raised of earth under a breast-work, upon which men ascend to fire over.

FOOT-FAT (*Vet.*) a term applied to a horse whose hoof is thin and weak so as to be unfit for shoeing.

FOOT-GELD (*Law*) an americiament for not expeditating a dog in the forest.

FOOT-HALT (*Vet.*) a disorder peculiar to sheep, occasioned by an insect that infests the foot.

FOOT-HOOK (*Mar.*) vulgarly pronounced *futtocks*, the compassing timbers, which give the breadth and bearing to the ship.

FOOT-IRONS (*Mech.*) pieces of iron plate fixed to the soles of the shoes of those who dig canals, &c.

FOOT-PACE (*Archit.*) the broad part of a stairs, on which a person may rest after taking four or six steps.

FOOT-ROPE (*Mar.*) the rope to which the lower edge of the sail is sewed.—*Foot-waling*, the whole inside planks or lining of a ship.

FOOT-STALK (*Bot.*) a term used either for the peduncle or the petiole.

FORAGE (*Mil.*) provender for horses in an army.—*Forage-Master-General*, formerly an officer under the marshal, who saw to the forage for the army, which duty is now performed by the Quarter-Master-General.

FORAGIUM (*Archæol.*) straw or stubble after the corn is thrashed out.

FORAGON (*Ant.*) a thread by which spinners mark so much as they spin in a day. *Fest. de Verb. Signif.*

FORAMEN (*Anat.*) a perforation or opening, as—*Foramen cæcum*, an opening at the basis of the cranium; and also

in the middle of the tongue.—*Foramen opticum*, the hole transmitting the optic nerve.—*Foramen ovale*, the opening between the two auricles of the heart of the foetus.—*Foramen ischiûm*, a large hole in the hip-bone.

FORAMINULENTUM (*os* (*Anat.*)) the Ethmoid bone.

FORBALCA (*Archæol.*) a forebalk, or balk lying next the highway.

FORBARRÉ (*Law*) to bar or deprive one of a thing for ever. *Stat.* 9, R. 2, c. 2; 6 *Hen.* 6, c. 4.

FORBATU'DUS (*Archæol.*) one slain in a combat.

FORCE (*Phy.*) otherwise called *Power*, is whatever is or may be made the primary cause of motion in bodies. *Force* is exerted either on a body at rest, or a body in motion, the former is called *Vis mortua*, *Conatus movendi*, *Conamen*, &c. the latter *Vis motrix*, or *Vis viva*. *Forces* are likewise accelerative or retardative, constant or variable, centripetal or centrifugal.—*Accelerative* or *retarditive Force* is that which respects the velocity of the motion only, accelerating or retarding it.—*Constant Force* is that which remains and acts continually the same for some determinate time, in distinction from—*Variable Force*, which is perpetually varying its effect and intensity.—*Centripetal Force* is that by which a body is perpetually urged towards a centre, in distinction from—*Centrifugal Force*, by which it is made to recede. *Newt. Princip.*

FORCE (*Law*) unlawful violence, which is either simple, compound, or mixed.—*Simple force* is that which is so committed that it is not complicated with any other crime.—*Compound*, or *mixed force*, is the violence committed in doing a thing otherwise unlawful.

FORCE (*Mil.*) any body of men collected together for a warlike enterprize. The *effective Force* of an army or a country, is that part which may be brought into action.

TO FORCE (*Mil.*) to take or effect by main force, as “To force a place,” i. e. to take it by storm. “To force a passage,” to oblige an enemy to retire. “To force an adversary's guard or blade,” in the broadsword exercise, to strike away the adversary's sword, so as to be enabled to give a cut at the part which he aims to secure.

TO FORCE Wool (*Husband.*) to cut off the upper and most hairy part of it.

FORCENE (*Her.*) an epithet for a horse rearing or standing on its hinder legs.

FORCEPS (*Surg.*) a surgeon's tongs, pincers, &c. where-with dead or corrupt parts may be removed.

FORCER (*Mech.*) a piston without a valve.

FORCERS (*Surg.*) an instrument with which teeth are drawn.

FORCES (*Mil.*) vide *Force*.

FORCES, Equilibrium of, (*Mech.*) i. e. the Composition or Resolution of Forces, is the conspiring or opposing of forces, so as to balance one another, or keep a body in equilibrio.

FORCIBLE (*Law*) an epithet implying with force, or by means, as a—*Forcible Entry*, i. e. violently taking possession of lands or tenements.—*Forcible Possession*, i. e. violently keeping possession, otherwise called a *Detainer*.

FORCIER (*Archæol.*) a water mill.

FORCING (*Hort.*) a method of obtaining flowers or fruits before their season by artificial means, particularly by the application of heat.

FORCING (*Com.*) a method of fining down wines, so as to render them fit for immediate draught.

FORCING Pump (*Mech.*) a pump that acts by a forcer, or a forcing piston.

FORDA (*Archæol.*) a cow with calf, or a milch-cow.

FORDIKA (*Archæol.*) herbage, or grass that grows on the edges of dikes or ditches.

FORDOL (*Archæol.*) a but or head-land abutting on other lands.

FORE (*Mar.*) the distinguishing character of all that part of a

ship's frame and machinery which lies near the stem; whence "*Fore and Aft*" signifying from stem to stern: so likewise—*Fore-bowline*, the Bowline of the foresail.—*Fore-braces*, belonging to the fore-yardarms.—*Fore-castle*, a short deck in the forepart of the ship.—*Fore-castle-Men*, men stationed at the fore-castle.—*Fore-cat-harpings*, a complication of ropes for the fore shrouds.—*Fore-foot*, a piece of timber terminating the keel at the fore-end.—*Fore-foot* is also said of one ship lying or sailing in another's way.—*Fore-ganger*, a rope to fix on a harpoon when it is intended to strike a whale.—*Fore-hooks*, the same as *Breast-hooks*.—*Fore-Knight*, a piece of timber, carved in the figure of a man's head, and fixed to the deck.—*Fore-land*, a cape or promontory projecting into the sea.—*Fore-lock*, a flat-pointed wedge of iron to drive through a hole at the end of a bolt.—*Fore-mast*, a mast in the fore-castle, or fore part of a ship.—*To Fore-reach upon a ship*, to advance upon, or gain ground of, a ship.—*Fore-runners* of the Log-line, a small piece of red buntin laid into that line at a certain distance from the log.—*Fore-staff*, an instrument formerly used at sea for taking the altitudes of bodies.—*Fore-tackle*, a tackle on the fore-mast.

FORE-CLOSED (*Law*) an epithet signifying barred beforehand, quite excluded.

FORE-FANG (*Law*) the taking up of provisions in fairs and markets before the King's purveyors are served.

FORE-FOOT (*Mar.*) vide *Fore*.

FORE-GANGER (*Mar.*) vide *Fore*.

FORE-GO'ERS (*Law*) purveyors who go before the king and queen when in progress, to make suitable provision for them.

FORE-HARPINGS (*Mar.*) vide *Fore*.

FORE-HOOKS (*Mar.*) vide *Fore*.

FOREIGN (*Law*) out-landish, of another country; an epithet for several things, as—*Foreign answer*, an answer not triable in the county where it was made.—*Foreign attachment*, an attachment of foreigners' goods found within a liberty or city.—*Foreign matter*, is a matter triable in another county.—*Foreign apposer*, or *opposer*, an officer, in the Exchequer, to whom all sheriffs, after they are opposed of their sums out of the pipe-office, repair to be apposed or charged by him of their green wax.—*Foreign plea* is the rejecting of a judge as incompetent, because the matter in hand was not in his precinct.—*Foreign-service* is that whereby a mean lord holds over another, without the compass of his own fee.

FOREIGN service (*Mil.*) in a general sense, signifies every service not British; but, in a limited sense, any service out of the British Isles.

FORE-JUDGED *the Court* (*Law*) is when an officer of any court is expelled the same for some offence; as, for not appearing to an action by bill filed against him.

FORE-JUDGER (*Law*) a judgement whereby a person is deprived of, or put by, the thing in question.

FORE-KNIGHT (*Mar.*) vide *Fore*.

FORE-LAND (*Mar.*) vide *Fore*.

FORE-LAND (*Fort.*) a confined space of ground between the rampart and the moat.

FORE-LOCK (*Mar.*) vide *Fore*.

TO FORE-LOYN (*Sport.*) is when a hound, going before the rest of the cry, meets chase and goes away with it.

FORE-PRIZED (*Law*) a term in conveyancing, which signifies excepting.

FORE-SCHOKE (*Law*) the same as *Forsaken*.

TO FORE-SHORTEN (*Paint.*) is to make a head or face in a drawing appear shorter before.

FOREST (*Law*) a large wood, privileged to hold the king's game of all kinds; so called, as some suppose, *quasi ferarum statio*, the abode of game or wild beasts.

FORESTER (*Law*) a keeper of a forest. *A forester in fee* is one who has that office to him and his heirs.

FORE-STAFF (*Mar.*) vide *Fore*.

TO FORE-STALL (*Com.*) to buy or bargain for corn, &c. as it is coming to market.

FORE-STALLER (*Law*) one who lies in wait to stop deer that have broken out of the forest.

FORE-STALLER (*Com.*) a monopolizer, or one who forestall's the market.

FORET (*Gunn.*) French for a steel instrument to bore the touch hole of a piece of cannon.

FORETHOUGHT-FELONY (*Law*) premeditated killing, in the Scotch Law.

FORFEITURE (*Law*) the effect or penalty of transgressing some penal law.—*Forfeiture of marriage*, a writ formerly lying for a lord against his ward, or tenant under age, who refused a convenient marriage offered him by his lord. *F. N. B.* 141; *Reg. Orig.* 163.

FORFICULA (*Ent.*) the Earwig; a genus of insects, of the *Coleopterous* Order, having setaceous *antennæ*, unequal filiform *feelers*, *shells* half as long as the abdomen, *wings* folded up under the shells, and *tail* armed with a forceps.

FORGABULUM (*Law*) or *forgavel*, a small rent reserved in rent, a quit-rent.

FORGE (*Mech.*) a place where a smith heats his irons, or a large furnace where iron ore is melted.

TO FORGE over (*Mar.*) to force a ship violently over a shoal by the effort of a great quantity of sail.

FORGER of false deeds (*Law*) one who makes and publishes false writings.

FORGERY (*Law*) the fraudulent making or altering any record, deed, writing, instrument, register, stamp, &c. to the prejudice of another man's right.

FORINSECUM manerium (*Law*) a manor which is not included within the liberties of a town.

FORIS-BANNITUS (*Archæol.*) banished. *Mat. Par. Ann.* 1245.

FORISFAMILIARI (*Law*) to be discharged from a family; which is said of a son who accepts lands in his father's life time, and being content therewith can claim no more.

FORK (*Bot.*) *furca*, a divided prickle, called bifid or trifid, according to the number of divisions, as in *Berberis*, *Ribes*, &c.

FORKED (*Sport.*) an epithet for the heads of deer which bear two croches on the top, or have their croches doubled.

FORKED (*Bot.*) *furcatus*, branched or subdivided; an epithet for anthers, bristles, fronds, and stems.

FORLANA (*Mus.*) Italian for a slow kind of jig.

FORLORN-HOPE (*Mil.*) a name given to a body of men put upon the most desperate service.

FORLOYN (*Sport.*) a retreat when the dogs are called off from a wrong scent.

FORM (*Phil.*) the essential and distinguishing modification of the matter of which any substance is composed.

FORM (*Mech.*) a kind of mould in which any thing is wrought.

FORM (*Print.*) a name given to the chase when it is filled with type, or letter: when it is empty it is properly called a chase.

FORM (*Sport.*) the seat of a hare; whence the phrase "The hare *forms*," for she squats.

FORM (*Law*) certain established rules to be observed in processes or judicial proceedings.

TO FORM (*Mil.*) to assume any figure in military movements, according to prescribed rules, as "To *form* line," to wheel to the right or left, so as to present one continued line. "To *form* rank entire," to extend the front by reducing the depth as much as possible. "To *form* echelon," to move so as to produce a diagonal direction in a line. "To *form* two deep, three deep, &c."

FORMA Pauperis (*Law*) a mode of bringing a suit in the character of a pauper, when a man will swear that he is not worth five pounds; in such cases he is released from costs of suit, &c.

FORME' (*Her.*) vide *Paltee*.

FORMED (*Nat.*) an epithet for any bodies, such as stones, spars, &c. which are found in the earth so formed, that their outward shape very nearly resembles muscles, &c.

FORME'DON (*Law*) i. e. *forma donationis*, a writ which lies for one who has a right to lands or tenements by virtue of an entail. *F. N. B. 255, &c.*; *New Nat. Brev.* 476, &c.

FORMERS (*Gunn.*) round pieces of wood fitted to the bore of a great gun, which hold the carriages for the powder.

FORMIATE (*Chem.*) a salt produced by the union of the formic acid with different bases, as *formiate* of ammonia.

FORMIC ACID (*Chem.*) the acid of ants, which is obtained chiefly from the red ant, the *Formica rufa* of Linnaeus.

FORMICA (*Ent.*) the Ant, or Emmet, a genus of insects of the Hymenopterous Order, having four unequal feelers; *antennæ* filiform; females and neuters armed with a sting; males and females with wings.

Species. This gregarious and industrious tribe of insects consists, like bees, of males, females, and neuters, which last are the labourers, who construct the nests, or ant-hills, and guard the *larvæ*, commonly known by the name of *ants' eggs*.

FORMICA (*Surg.*) the name of a black callous wart, that is broad at the bottom.

FORMICA (*Falcon.*) a distemper in a hawk's beak which eats it away.

FORMULA (*Math.*) a general theorem, or literal expression for resolving any part of a problem: thus $x = a \pm \sqrt{a^2 + b}$ is an algebraical formula; hyp. log. $(1 + y) = y - \frac{1}{2}y^2 + 13y^3$; a logarithmical formula and $\sin. (a + b) = \sin. a, \cos. b + \sin. b, \cos. a$, a trigonometrical formula.

FORMULA (*Med.*) a little form or prescription, such as physicians give in extemporaneous practice in distinction from a regular prescription.

FORMULARY (*Law*) a book of forms, or precedents, for law matters; also the written form of an oath to be taken on certain occasions.

FORMULARY (*Mus.*) the name formerly given to the prescribed number and disposition of the ecclesiastical notes.

FORNACALIA (*Ant.*) a festival instituted by Numa Pompilius, at which all the people baked cakes *ad fornacem*, i. e. at the oven. *Fest. Signif. Verb.*

FORNA'GIUM (*Law*) from *fornax*, a furnace; a fee taken by a lord of his tenants who were bound to bake in his oven, or for the liberty of using their own.

FORNAX (*Chem.*) a furnace.

FORNICAT'US (*Bot.*) vide *Vaulted*.

FORNIX (*Anat.*) a part of the *corpus callosum* of the brain, so called because of its resemblance in form to the arch of a vault.

FORNIX (*Bot.*) vide *Arch*.

FORPRI'SED (*Law*) vide *Foreprized*.

FORRAGE (*Mil.*) vide *Forage*.

FORSCHOKE (*Law*) vide *Foreschoke*.

FORSKOHLE'A (*Bot.*) a genus of plants, so called from Forskohl, a Swedish botanist, Class 8 *Octandria*, Order 4 *Tetragynia*, or Class 10 *Decandria*, Order 5 *Pentagynia*.

Generic Character. CAL. *perianth* four or five-leaved.—COR. *petals* eight.—STAM. *filaments* eight or ten; *anthers* twin.—PIST. *germs* four or five; *styles* bristle-shaped; *stigmas* simple.—PER. none; *seeds* four, five.

Species. The species are mostly annuals, as the—*Forskohlea tenacissima*, *Caidbeja*, seu *Chamadriifolia*, *Clammy Forskohlea*.—*Forskohlea angustifolia*, *Narrow-leaved Forskohlea*, native of the Cape of Good Hope; but the *Forskohlea candida*, *Rough Forskohlea*, is a shrub and native of Teneriffe.

FORSPEAKER (*Law*) one who pleads for another.

FORSTAL (*Law*) vide *Forestal*.

FORSTERA (*Bot.*) a genus so called from J. and G. Forster, father and son, Botanists, Class 20 *Gynandria*, Order 2 *Diandria*.

Generic Character. CAL. *perianth* double.—COR. one-petalled.—STAM. *filaments* two.—PIST. *germ* oval; *style* erect; *stigmas* two.—PER. *capsule* oval; *seeds* many.

Species. The single species is the *Forstera sedifolia*, native of New Zealand.

FORSYTHIA (*Bot.*) the *Decumaria barbara* of Linnaeus.

FORT (*Fort.*) a castle, or strong hold of small extent; a work encompassed with a moat, rampart, and parapet, to secure some high ground, or passage of a river, to make good an advantageous post, to fortify the lines and quarters of a siege, &c.—*Royal-fort* is a fortification having at least 26 fathoms for the line of defence.—*Star-fort*, a redoubt which is made of re-entering and saliant angles.—*Field-fort*, otherwise called *fortin* or *fortlet*, and sometimes a *sconce* a small fort built in haste to defend a pass or post.

FORTALIEL (*Archæol.*) a fortress or place of strength.

FORTE (*Mus.*) an Italian word signifying strong, is frequently applied in music books to parts that are to be performed in a strong manner; *piu forte* signifies still stronger; *forte forte* very strong.

FORTHCOMING *action of* (*Law*) an action in the Scotch law in the nature of an attachment.

FORTIA (*Law*) power or dominion.

FORTIFICATION, otherwise called *military architecture*, the art of strengthening and fortifying a place by encircling it with certain works to secure and defend it from the attacks of enemies. Fortification is either theoretical or practical, defensive or offensive.—*Theoretical fortification* consists in tracing plans and profiles on paper with scales, &c.—*Practical fortification* consists in forming the project of a work according to the nature of the ground and other existing circumstances, &c.—*Defensive fortification* is that by which a town is defended in case of a siege.—*Offensive fortification* consists in making and conducting all the works requisite for the attack or siege of a town, &c.—Fortification, in the sense of a fortified place, is either durable or temporary, regular or irregular.—*Durable fortification*, that which is built with a view to remain for a permanency.—*Temporary fortification*, that which is raised on some particular emergency, and only to last for the time required, as field-works, &c.—*Regular fortification*, that in which the bastions are all equal, or which is built in a regular polygon.—*Irregular fortification* is that in which the sides and angles are not uniform, equidistant, or equal, owing to the inequalities in the situation from hills, valleys, rivers, &c.

To a fortification belong lines, angles, solid works, and appurtenances.

Lines of a fortification. The following are the principal lines, namely—*Capital line*, an imaginary right line that divides any work into two equal and similar parts.—*Line of circumvallation*, the line drawn by a fortification of earth round a town intended to be besieged.—*Line of communication*, the space of ground which joins the citadel to the town.—*Line of contravallation*, a line similar to the line of circumvallation. [vide *Contravallation*].—*Line of counter-approach*. [vide *Approaches*].—*Line of defence*, the distance between the saliant angle and the opposite flank. Lines of defence are either *fichant*, *razant*, or *prolonged*. [vide *Fichenti*, &c.]

Angles. The principal angles in a fortification are the *Angle of the Flank*, *of the Bastion*, *of the Epaule*, *of the Tenaille*, *of the Face*, *of the Base*, &c. [vide *Angle*]

Works of a fortification. The works of a place are the fortifications about the place, in distinction from the *outworks*; or such as are detached from the walls of the

FORTIFICATION.

fortification. The principal works are as follow: namely, —*Appareille*, the slope, or easy ascent, which leads to the platform of the bastion. — *Approaches*, roads or passages sunk in the ground by the besiegers, whereby they approach the place. — *Area*, the superficial content of a rampart, or other work. — *Arrow*, a work placed at the salient angle of the glacis. — *Banquette*, a kind of step made on the rampart near the parapet. — *Barriers*, pointed stakes to prevent the horse or foot from rushing in upon the besieged with violence. — *Bastion*, a part of the inner inclosure of a fortification, making an angle towards the field. Bastions are full, flat, solid, hollow, detached, cut, &c. [vide *Bastion*] — *Berme*, a little space or path between the ditch and the talus of the parapet. — *Bonnet*, a work consisting of two faces placed before the salient angle of the ravelin to cover it. — *Breach*, an opening or gap made in a wall or rampart to cover it. — *Caponniere*, a passage made in a dry ditch from one work to another. — *Cascanes*, a kind of cellars made under the capital of a fortification. — *Casemate*, a work made under the rampart with loopholes for the guns. — *Cavaliers*, works raised, generally within the place, ten or twelve feet higher than the rest. — *Cordon*, a semicircular projection made of stone, which goes round the wall. — *Covert-way*, a space, five or six toises broad, that extends round the counterscarp. — *Counterforts*, a sort of buttresses behind the walls. — *Counter-guard*, a work placed before the bastions to cover the opposite flanks. — *Counterscarp*, the exterior talus of the ditch, or that slope which terminates its breadth. — *Crown-work*, a work resembling a crown in form, having two fronts and two branches. — *Curtain*, that part of the body of a place which joins the flank of one bastion to that of another. — *Cuvette*, a small ditch in the middle of a dry ditch. — *Defilement*, the disposing of the works of a fortress in such a manner, that they may be commanded by the body of the place. — *Descents*, vaults and hollow places. — *Ditch*, the trench made round each work, which may be wet or dry. — *Drawbridge*, vide *Bridge*. — *Embrasures*, vide *Embrasure*. — *Envelope*, any work that envelops or surrounds another work, a spot of ground, &c. — *Enceinte*, the interior wall or rampart. — *Epaulement*, vide *Epaulement*. — *Epaule*, the shoulder of the bastion. — *Faces* of any work, those parts where the rampart is made which produce an angle pointing outwards. [vide *Face*] — *Fascines*, vide *Fascines*. — *Flank*, any part of a work which defends another along the outsides of the parapets. Flanks are of different kinds. [vide *Flank*] — *Flèche*, a work of two faces, often constructed before the glacis. — *Gallery*, a passage made under ground, leading to the mines. — *Glacis*, the part beyond the covert way, to which it serves as a parapet. — *Gorge* of any work is that part next to the body of the place where there is no rampart or parapet. — *Half-moon*, an outwork that has two faces which form a salient angle, the gorge of which resembles a crescent. — *Horn-work* is composed of a front and two branches, and is mostly used to take possession of some rising ground. — *Horse-shoe*, a small oval outwork with a parapet, generally made in a ditch. — *Loop-holes*, square or oblong holes in the walls. — *Lunettes*, works made on both sides of a ravelin. — *Merlon* is that part of the breastwork of the battery which is between the embrasures. — *Orilon*, that part of the bastion near the shoulder which serves to cover the retired flank from being seen obliquely. — *Palisades*, stakes fixed in the ground within the covert way to secure it from surprise. — *Parapet*, that part of a rampart which serves to cover the troops placed there to defend it. — *Portcullis*, a falling gate, or door, resembling a harrow in shape. —

Place of arms, a part of the covert way. — *Rampart*, an elevation of earth raised along the faces of any work to cover the inner part. — *Ram's-horns*, low works of a circular form made in a ditch. — *Ravelin*, a work placed before the curtain to cover it. — *Redans*, indented works consisting of lines and facings that form salient or re-entering angles flanking one another. — *Redoubt*, a work placed beyond the glacis, of various forms. — *Retrenchment*, any work raised to cover a post, and fortify it against an enemy. — *Revêtement*, a strong wall built on the outside of the rampart and parapet. — *Rideau*, a small elevation of earth extending along a plain to cover a camp, &c. — *Sapping*, vide *Siege*. — *Sillon*, a work raised in the middle of a ditch to defend it when too broad. — *Swallow's-tail*, an outwork resembling a *tenaille*. — *Talus*, a slope made either on the outside or the inside of a work. — *Tenailles*, low works made in the ditch before the curtains. — *Tenailions*, works made on each side of the ravelin, much like the *lunettes*. — *Terre-pleine*, the horizontal superficies of the rampart. — *Tower-bastions*, small towers made in the form of bastions. — *Traditore* signifies the concealed or hidden guns in a fortification. — *Traverses* are parapets made across the covert-way opposite to the salient angles of the works. — *Trous de loups*, Wolf-Holes, round holes generally made round a redoubt to obstruct the enemy's approach. According to the disposition of these several parts various systems have been formed by different writers, as Pagan, Vauban, Cohorn, Belidor, Blondel, &c. In the annexed plate (36) is given a general view of those parts as they may be disposed according to circumstances. To the attack and defence of a fortification belong cannons, petards, mortars, bombs, chandeliers, chevaux de frises, caltrops, gabions, fascions, chevrettes, caissons, &c. [vide *Canon*, &c. and Plate 36]

Explanation of the Plate 36.

Fig. 1. Plan of a Fortification. A. A single Bastion. B. A double Bastion, or Cavalier, to overlook the enemy's bastions; and scour their trenches. C. A flat Bastion which is made where the line of defence is too long. It is here placed in the middle of the curtain. D. A Half-bastion placed on the side of a river. E. A Bastion tenailed when the angle of the bastion is less than 70 degrees. F. A Ravelin which covers the gates, bridges, and curtains. G. The Glacis. H. A Half-Moon made to cover the flanked angle of the bastion. I. A Counter-guard raised instead of a half-moon. K. A Single Tenaille. L. A Swallow's Tail. M. A Bonnet à *Prêtre*. N. A Hornwork whose head is fortified with two demi-bastions, or epaulements, joined by a curtain, and closed by parallel sides ending at the gorge of the work. N n. A Hornwork whose sides are not parallel. O. A Crown-work to cover a large spot of ground. P. Tenailles to defend the ditch. Q. A Half-Moon covered with R R, Two Counterguards to make it the stronger. S S. Places of Arms on the counterscarp. 3. The Ditch. T T. The Counterscarp, or Covered-way. V. A Retrenchment within or behind. X. A Breach. W. A place for a Magazinc. *aa*. Redoubts. *bbb*. Batteries. *cc*. Lines of Communication. *dd*. Trenches by which the approaches are carried on. *e*. A Mine under the glacis and covered-way of the horn-work. *f*. A lodgement at the foot of the glacis.

Fig. 2. The parts of a piece of ordnance. A B. The length of the cannon. *az*. The bore or caliber. A E. The first reinforce. E F. The second reinforce. F B. The chace. H B. The muzzle. A O. The cascabel, or pomelion. A C. The breech. A I. The breechment. C D. The vent-field. T T. The trunnions.

F I. The chace-girdle. C c. The bare-ring. d. The vent, astragal, and fillets. e, f. The first reinforce-ring and ogee. g, h. The second reinforce-ring and ogee. k. The chace, astragal, and fillets. l. The muzzle, astragal, and fillets. m. The swelling of the muzzle. n. The muzzle mouldings.

Fig. 3. The inside of a piece of ordnance. a. The chace. b. The chamber for the powder.

Fig. 4. A petard.—Fig. 5. A mortar. Fig. 6. Bombs. a a. The fusees.—Fig. 7. Chevaux-de-Frises.—Fig. 8. Caltrops.—Fig. 9. Chandeliers.

FORTITUDE (Archæol.) a fortified place.

FORTIN (Fort.) a fortlet, sconce, or little fort.

FORTIORI (Log.) or à fortiori, an epithet for any conclusion, or inference, which is much stronger than another.

FORTISSIMO (Mus.) an Italian epithet signifying very loud. [vide Forte]

FORTITUDES (Astrol.) certain advantages which planets are supposed to have to make their influences stronger.

FORTLET (Fort.) a little fort.

FORTRESS (Fort.) a general name for all places that are fortified either by nature or art.

FORTUNES (Astrol.) a name for the two benevolent planets, Jupiter and Venus.

FORTU'NIUM (Archæol.) a tournament, or fighting with spears. Math. Par. Ann. 1241.

FORTY-DAYS'-COURT (Law) the court of attachment in forests, or the Woodmote Court.

FORUM (Ant.) a public place in Rome where causes were tried and business transacted. The fora are consequently divided into the *civilia* and the *venalia*.—*Fora civilia* were public courts of justice in which causes were tried and orations delivered to the people. There were six of these, namely, 1. *Forum Romanum*. 2. *Julianum*. 3. *Augustum*. 4. *Palladium*. 5. *Forum Trajani*. 6. *Forum Sallustii*. The *Forum Romanum*, the most noted of all, was in general denominated, by way of eminence, simply the *Forum*; in which was the *Rostrum*, the *Comitium*, the *Sanctuary of Saturn*, &c.—*Fora venalia*, or places of traffic, answered to our market-places. The chief of them were the *forum boarium*, *suarium*, *pistorium*, *cupedinarium*, *olitorium*, &c. according as they were used for oxen, swine, bread, dainties, vegetables, &c. The Grecian ἀγορὰ corresponded altogether with the Roman *Forum*. *Dionys.* l. 2; *Cic. in Ver.* 2, c. 20, &c.; *Ovid. Fast.* l. 3, v. 704; *Liv.* l. 26, c. 2; *Senec. de Ira*, l. 2, c. 9; *Panciroll. Descript. Urb. Rom. &c. apud Græv. Thes. Ant. Rom.* tom. 3, &c.

FORWARD (Mil.) a word of command for soldiers to proceed on their march, having halted.

FOSS-WAY (Mil.) one of the great Roman roads in England, so called from the ditches on both sides.

FOSSA (Law) a ditch full of water, in which women who committed felony were drowned.

Fossa (Anat.) the interior of the *puddendum muliebre*.

FOSSAGE (Law) a composition paid to be exempt from the repairing or maintaining the ditches round a town.

FOSSATO'RUM OPERATIO (Law) foss work, or service formerly done by inhabitants for repairing and maintaining the ditches round a town.

FOSSA'TUM (Archæol.) a ditch or a place fenced within a ditch or trench.

FOSSILES (Min.) *fossilia*, from *fodio*, to dig; a general name for whatever is dug out of the earth, whether it be native, as metals, stones, &c.; or extraneous, i. e. that which has been accidentally buried in the earth, as trees, plants, parts of animals, &c.

FOSSILUS (Anat.) the bone of the leg.

FO'STER-FATHER (Cus.) one who brings up another man's child.

FOSTER-LE'AN (Law) a wife's jointure.

FO'STER-LAND (Law) land allotted for the provision of any persons.

to FO'THER (Mar.) or *Fodder*, in French *aveugler une voie d'eau*; to endeavour to stop a leak in the bottom of a ship while she is afloat, either under sail or at anchor.

FOTHERG'ILLA (Bot.) a genus of plants, Class 13 *Polyandria*, Order 2 *Digynia*.

Generic Character. CAL. *perianth* one-leaved.—COR. none.—STAM. *filaments* many; *anthers* erect.—PIS. *germ* ovate; *styles* two.—PER. *capsule* hardened; *seeds* solitary.

Species. The single species is a tree, as the *Fothergilla anifolia*, native of Carolina.

FOTHERGILLA is also another name for the *Melastoma*.

FO'TUS (Med.) vide *Fomentation*.

FO'VEA (Med.) a sudatory or sweating bath.

FOVEA (Anat.) a sinus of the *Pudendum muliebre*.

FOUGA'DE (Fort.) French for a sort of mine in which are fireworks to blow any thing up.

FOV'ILLA (Bot.) a fine substance, imperceptible to the naked eye, exploded by the pollen in the anthers of flowers.

FOUL (Mar.) an epithet applied mostly in opposition to clean or clear; as, "a *foul* anchor," when the cable is twisted round the stock, &c.—"A *foul* bottom," the bottom of a ship which is very dirty.—"Foul ground of a road, bay, &c." ground that is rocky and full of shallows, &c.—"Foul hawse" cables twisted round each other.—"Foul rope," an entangled rope.—"Foul water," shallow water made foul by a vessel under sail which throws up mud from the bottom.—"Foul wind," a contrary wind.—"To run *foul* of a ship," to get entangled in her rigging.

FOUNDATIO'N (Archit.) that part of a building which is under ground, and serves to support the superincumbent mass.

FO'UNDAY (Archæol.) the space of six days, formerly so called in the ironworks.

FO'UNDER (Ecc.) one who builds and endows a college, church, &c.

to FOUNDER (Mar.) is said of a ship when, by reason of a great leak, &c. or heavy sea breaking in upon her, she takes in so much water that she cannot be freed from it, and eventually sinks.

to FOUNDER a Horse (Vet.) vide *Foundring*.

FOUNDERS, *Company of* (Her.) was incorporated in 1614. Their armorial ensigns are, as in the annexed figure, *azure*, an ewer between two pillars or.

FOUNDLING (Cus.) a child exposed to chance, and found without any parent or owner.

FOUND'RING (Vet.) a defluxion of humours upon the sinews of the legs, occasioned by hard riding, &c. which causes an unusual stiffness in them, so that they lose their usual motion.—*Chest-foundring*, a disease in the chest of horses, very similar to that which affects the feet.

FOUNT (Print.) vide *Font*.

FOUNTAIN (Geog.) a natural source or spring of water rising out of the ground.

FOUNTAIN (Hydraul.) a machine by which water is spouted out; it is also called a *jet d'eau*.

FOUNTAIN (Her.) is drawn as a roundel, barry wavy of six, as he beareth "sable, a bend, or, between six fountains proper." These are the arms of Lord Stourton, which were borne in signification of the six springs which give rise to the river Stour, in Wiltshire.

FOUNTAIN-PEN (Mech.) a pen contrived to hold a quantity of ink, and to let it flow gently, so as to

supply the writer for a long time without the necessity of taking fresh ink.

FOUR (Bot.) a term used frequently in composition as four-cleft or quadrifid, four-cornered, four-leaved, &c.

FOURCHER (Law) in Latin *furcare*, and in French *fourcher*; the delaying or putting off an action which might be determined in a short space of time. *Stat. West.* 1, (3 *Ed.* 1) c. 43; 2 *Inst.* 250.

FOURCHY (Her.) or *Fourchee*, an epithet for a cross. A cross fourchee is one which, as in the annexed figure, is forked at the ends, having its forks composed of straight lines and ends as if cut off.

FOU'MEAU (Min.) the chamber of a mine.

FOURTEENTH (Mus.) the octave or replicate of the seventh; a distance comprehending thirteen diatonic intervals.

FOURTH (Mus.) a distance comprehending three diatonic intervals, i. e. two tones and a half. The *minor or lesser fourth* consists of five semitones; but the *fourth sharp, or greater*, consists of six semitones. The Fourth is the third of the consonances.

FO'WLER (Gun.) the name formerly of a piece of ordnance.

FOWLER (Sport.) one who practises fowling, or the art of hunting birds.

FOX (Zool.) a crafty, lively, libidinous animal, the *Canis vulpes* of Linnæus, which sleeps much in the day, but seeks its prey at night among the poultry, rabbits, hares, and feathered game. It breeds only once a year, and brings forth commonly in April four or five young, which, like puppies, are born blind. It has a remarkably bushy tail, called by sportsmen the *brush*, and its smell is very strong, particularly that of the urine, which is so fetid that the dogs have sometimes been deterred by it from approaching the animal. There is another kind of Fox, called the *Brant Fox*, the *Canis alopec* of Linnæus, which inhabits Asia, is somewhat less, and much darker. The Arctic Fox, *Canis lagopus* of Linnæus, which lives near the Frozen Sea, is remarkable for its hairy feet.

FOX (Her.) as a charge, is supposed to denote a subtle wit, by which a man has served his country. It is borne either whole or in part, as he beareth "*Argent* two foxes counter-saliant in bend, the dexter surmounted of the sinister saltire wise, *gules*, by the name of *Kadrod Hard*, of Wales." There are also examples of Foxes' Heads as a bearing.

FOX (Mar.) in French *tresse de vieux cordages*, a sort of strand formed by twisting several rope-yarns together, and used as a seizin. The *Spanish Fox* is a single rope-yarn untwisted and twisted up the contrary way.

FOX-GLOVE (Bot.) the *Digitalis* of Linnæus, the species of which are mostly perennials.—Fox-Grape, the *Vitis vulpina*, so called because it resembles the scent of a fox.—Fox-Tail Grass, the *Alopecurus*.

FOY (Cus.) from the French *voie*, a way; a treat given to their friends by those who are going a journey.

to FOYL (Husband.) to fallow land in the summer or autumn.

FOYLING (Hunt.) the footsteps of a stag upon the grass.

FRACTION (Math.) a broken number which consists of a part or parts of any quantity considered as unity or a whole; thus, suppose any number to be divided into 5 parts, then 1, 2, 3, &c. of those parts form what is termed the fraction; as $\frac{1}{5}$, $\frac{2}{5}$, $\frac{3}{5}$, &c. The number below the line, namely 5, is the *Denominator*, because it denominates the number of parts into which the unit or quantity is supposed to be divided; and the number above the line, as 1, 2, or 3, is the *Numerator*, because it enumerates how many of those parts are taken.

Fractions are of different kinds, namely—*Vulgar Fractions*, i. e. the common fractions, in distinction from *Decimal Fractions*. [vide *Decimals*]

Proper Fractions have the numerator less than the denominator, as $\frac{1}{2}$, $\frac{2}{3}$, $\frac{3}{4}$.—*Improper Fractions* have the numerator either equal to, or greater than, the denominator, as $\frac{3}{2}$, or $\frac{4}{3}$.—*Simple Fractions* consist of a single numerator or denominator.—*Compound Fractions* consist of several fractions connected by the word *of*, as $\frac{2}{3}$ of $\frac{3}{4}$ of $\frac{4}{7}$, &c.—*Complex Fractions*, those whose numerator and denominator consist of fractions, as $\frac{\frac{3}{4}}{7\frac{1}{2}}$.—*Mixed Fractions*, or *Mixed Numbers*, where an integer and a fraction is joined together, as $7\frac{3}{4}$, $9\frac{1}{10}$, &c.—*Continued Fractions* are fractional quantities running in a series, as $\frac{1}{2} + \frac{1}{3} + \frac{1}{4}$, &c.

Fractions are worked by the rules of Addition, Subtraction, Multiplication, Division, Reduction, &c. in a manner similar to whole numbers, of which more may be seen under the respective words.

FRACTIONAL (Arith.) an epithet for what is in the form of a fraction, as fractional quantities, exponents, &c.

FRACTURE (Surg.) *κλάσημα*, the separation of a bone, by means of violence, into two or more fragments. A *simple Fracture* is that where a bone is broken only in one part.—A *compound Fracture* is when two large bones, contiguous to each other, as the *Ulna* and the *Radius*, are both broken.—A *complicated Fracture* is that which is attended with a train of symptoms, as a wound or ulcer.

The ancients divided Fractures according to their different directions, into *raphanedon*, transverse; *cauledon*, stalk-wise; *sicydon*, *shedacedon*, *alphitedon*, *apothrausis*, *apocope*, &c. of which a further account may be found under the respective words.

FRÆNA'TOR (Anat.) a name for several muscles which serve to move the head.

FRÆ'NULUM (Anat.) a membranous string under the tongue.

FRÆ'NUM (Anat.) the ligament by which the prepuce is bound to the *glans penis*.

FRAGARIA (Bot.) a genus of plants, Class 12 *Icosandria*, Order 3 *Polygynia*.

Generic Character. CAL. *perianth* one-leaved.—COR. *petals* five.—STAM. *filaments* twenty; *anthers* lunular.—PIST. *germs* numerous; *styles* simple; *stigmas* simple.—PER. none; *seeds* numerous.

Species. The species are perennials, as the—*Fragaria vesca*, seu *Potentilla*, Esculent Strawberry.—*Fragaria Monophylla*, seu *Le Frasier*, Simple-leaved Strawberry.—*Fragaria sterilis*, Barren Strawberry. *Dod. Pempt.*; *Bauh. Hist.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat.*; *Raii Hist.*; *Tourn. Inst.*

FRAGARIA is also the *Comarum palustre* of Linnæus.

FRAGARIÆ AFFINIS (Bot.) the *Sibbaldia procumbens* of Linnæus.

FRAGARIUS (Bot) the *Melastoma melabathrica* of Linnæus.

FRAGILITAS OSSIUM (Anat.) brittleness of the bones.

FRAISE (Fort.) stakes fixed in bulwarks made of earth on the one side of the rampart below the parapet.

to FRAIZE a battalion (Mil.) to line it every way with pikes.

FRAMBÆ'SIA (Med.) the yaws; a disease in Africa, somewhat similar to the *lues venerea*: it is arranged by Cullen as a genus of diseases in the Class *Cachexiæ*, Order *Impetiginosæ*.

FRAME (Paint.) a kind of square, composed of pieces of wood joined together, that serves for reducing figures.

FRAMEWORK-KNITTERS, *Company of* (Her.) were incorporated about the year 1664. Their arms are "Or, a chevron between two combs, and as many leads of needles in chief, and an iron jack-sinker in base; a main spring between two small springs;" all which parts belong to a frame.

FRA'MPOLE FENCES (Law) fences set up by the tenants in the manor of Writtle, who are entitled to the wood that grows on them.

FRANC (Com.) vide *Frank*.

FRA'NGA (Bot.) the *Frankenia laevis et hirsuta* of Linnæus.

FRANCHILANUS (Law) a freeman.

FRANCHISE (Law) a privilege or exemption from ordinary jurisdiction; as for a corporation to hold pleas to such a value, &c.; this is otherwise called a Royal franchise.

FRANCIGENÆ (Archæol.) a name formerly for all foreigners.

FRANCI'SCANS (Ecc.) an order of friars, founded by St. Francis, in Italy, in 1198.

FRA'NCLAIN (Archæol.) a freeman or gentleman.

FRA'NCOLING (Falcon.) the name of a bird employed in hawking.

FRA'NGIPANE (Mech.) an exquisite kind of perfume formerly used in perfuming leather.

FRA'NGULA (Bot.) the *Cassine maurocena* of Linnæus.

FRANK (Archæol.) a place to feed boars in.

FRANK (Com.) a French coin worth 20 sols, 1 livre, or 10½d. English money.

FRANK (Law) free, an epithet applied to many things in old law-books, as—*Frank-almoign*, a tenure of lands or tenements bestowed for perpetual arms. *Co. Lit.* c. 94, &c.—*Frank-bank*, vide *Free-Bench*.—*Frank-chase*, a liberty of free chase in a circuit adjoining to a forest. *Crompt. Jur.* 187.—*Frank-fee*, that which is in the hands of the king, or lord of the manor, being *ancient demesne of the crown*; whereas that which is in the hands of the tenant is *ancient demesne* only. *F. N. B.* 161; *Reg. Orig.* 12.—*Frank ferme*, lands or tenements in which the nature of the fee is changed by feoffment, &c. *Britt. c.* 66.—*Frank-fold*, the liberty which the lord has of folding his tenant's sheep on his manor for the sake of manuring his land.—*Frank-Law* is the free enjoyment of all those privileges, which the law allows to a man not found guilty of any heinous offence. *Lib. Assis.* 59; *Crompt. Juris.* 156.—*Frank marriage*, a tenure in land special, whereby a man has land with a woman, to him and the heirs of his body, without doing any service but fealty to the donor. *Bract.* l. 2, c. 7; *Glanv.* l. 7, c. 18; *Flet.* l. 3, c. 11; *West. Symb.* pars 1, l. 2.—*Frank pledge*, an ancient custom for the freemen of England, at fourteen years of age, to find surety for their fidelity to their king, and good behaviour to their fellow subjects.

TO FRANK letters (Law) a privilege of sending letters free of postage, which belongs to Members of Parliament.

FRANKE'NIA (Bot.) a genus of plants, Class 6 *Hexandria*, Order 1 *Monogynia*.

Generic Character. CAL. perianth one-leaved.—COR. petals five.—STAM. filaments six; anthers twin.—PIST. germ oblong; style simple; stigmas three.—PER. capsule oval; seeds many.

Species. The species are mostly perennials, as—*Frankenia laevis*, *Franca*, *Lychnis*, *Erica*, seu *Polygonum*, Smooth Frankenia.—*Frankenia hirsuta*, seu *Nothria*, native of the South of France; but the—*Frankenia puberulenta*, seu *Anthyllis*, Sea Heath, is an annual. *Clus. Hist.*; *Bauh. Hist.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat.*; *Raii Hist.*; *Tourn. Inst.*

FRA'NKINCENSE (Nat.) the gum resin, which is the juice of the *Juniperus lycia* of Linnæus. [vide *Thus*]

FRANKINCENSE (Theol.) or *free incense*, the incense burnt freely upon the altar.

FRANKLI'NIA (Bot.) the *Gordonia franklinia* of Linnæus. **TO FRAP a ship** (Mar.) to pass a large cable-laid rope four or five times round the hull or frame of a ship. "To *frap* the tackle," to cross and draw together the several complications of the ropes so as to increase the tension.

FRAZIER (Her.) another name for a strawberry plant.

FRASSE'TUM (Archæol.) corrupted, from *fraxinetum*; a wood, or woody ground, where ashes grow. *Co. Lit.* 4.

FRA'TER (Law) a brother; *Frater consanguineus*, a brother by the father's side; *Frater nutricius*, a bastard brother; *Frater uterinus*, a brother by the mother's side.

FRATE'RIA (Law) a brotherhood, or society, or religious persons and others.

FRATE'RNITY of arms (Mil.) an alliance, or association of arms, concluded between two knights, who thereby agreed to go together, share their fortunes, and mutually assist each other.

FRA'TRAGE (Law) a partition among brothers or coheirs coming to the same inheritance or succession; also that part of the inheritance that comes to the youngest brothers.

FRA'TRES conjugati (Archæol.) sworn companions, i. e. those who were sworn to defend the King against his enemies. *Leg. W.* 1; *Leg. Ed.* 1, c. 35; *Hoved.* p. 44.—*Fratres pyes*, pied friars, or friars wearing black and white garments. *Walsing.* p. 124.

FRATRIA'GIUM (Law) a younger brother's inheritance. *Bract.* l. 2, c. 35.

FRA'TRICIDE (Law) the killing of a brother; also one who commits the act.

FRA'TRICE'LLI (Ecc.) a sect of heretics in the fourteenth century, who held that there ought to be a community of goods and of women. *Prætol. Doct. omn. Hæret.*

FRAUD (Law) deceit in grants and conveyances of lands, bargains and sales of goods, &c. to the damage of another person.

TO FRAY (Sport.) is said of a deer that rubs her head.

FRAXINE'LLA (Bot.) the *Dictamnus albus* of Linnæus, a perennial.

FRAXINE'TUM (Archæol.) an ash-grove. *Domesd.*

FRA'XINUS (Bot.) a genus of plants, Class 23 *Polygamia*, Order 2 *Dioecia*.

Generic Character. CAL. none.—COR. none.—STAM. filaments two; anthers oblong.—PIST. germ ovate; style cylindrical; stigma thick.—PER. none; seed lanceolate.

Species. The species are trees, as the—*Fraxinus excelsior*, Common Ash-tree.—*Fraxinus rotundifolia*, *Manna*, Ash-tree.—*Fraxinus Ornus*, Flowering Ash-tree.—*Fraxinus Americana*, American Ash-tree. *Dod. Pempt.*; *Bauh. Hist.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat.*; *Raii Hist.*; *Tourn. Inst.*

FREAM (Husband.) arable land worn out of heart.

TO FREAM (Sport.) is said of a boar who makes a noise at rutting time.

FRE'CKLES (Nat.) a kind of reddish dusky spots on the face or hands.

FRE'E-BENCH (Law) *Francus Bancus*, a custom whereby, in certain cities, the wife shall have the whole lands of her husband for dower, &c. in case she live sole and continent. *F. N. B.* 150; *Kitch.* 102.

FRE'EBOOTER (Mil.) a soldier that serves for plunder without pay.

FRE'EBO'RD (Law) *franchbordus*, ground claimed in some places beyond or without the fence. *Mon. Angl.* tom. ii. p. 141.

FREE-BO'ROUGH-MEN (Law) such great men as did not engage, like the Frank-pledge-men, for their decennary.

FRE'E-CHAPEL (*Law*) *libera capella*, one that is exempt from the jurisdiction of the diocesan. *Stat. 3 Ed. 4, c. 4.*

FREED-STOLE (*Archæol.*) vide *Fridstole*.

FREEDOM of a city (*Law*) the right of exercising a trade or employment in a city or town corporate.

FREEHOLD (*Law*) *liberum tenementum*, that land or tenement which a man holds in fee-simple, fee-tail, or for term of life. Freeholds are of two sorts, *Freehold in deed*, which is the real possession of the lands for life; or *Freehold in law*, which is the right a tenant has to such lands or tenements before his entry or seizure. *Bract. l. 2, c. 9; Lit. 57; Co. Lit. 6; Reg. Judic. 68, &c.*

FREEHOLDERS (*Law*) possessors of a freehold estate.

FREEMAN (*Law*) *liber homo*, was distinguished from a vassal under the feudal policy; the former denoting an allodial proprietor; and the latter, one who held of a superior.

FREEMAN is now one who enjoys the freedom of a city, or corporate town.

FREE-SCHOOL (*Cus.*) an endowed school where a certain number of children are taught free of expense.

FREE-STONE (*Min.*) a sort of stone much used in building, which is dug up in many parts of England.

FREETHINKER (*Theol.*) one who professes to think lightly and contemptuously on religion.

FREE-WARRREN (*Law*) the power of granting any one the licence of hunting on any given lands.

FREEZE (*Com.*) a sort of coarse woollen cloth, so called because it was probably first made in Friesland.

FREEZE (*Gunn.*) the same as the muzzle-ring of a cannon.

FREEZE (*Archit.*) *Frize*, or *Frieze*, from the Italian *Fregio*, and French *Frise*, is called in the Greek *ζωφόρος*, a *ferendis imaginibus*, because it has many figures sculptured on it; that part of the entablature of columns which is between the architrave and the cornice. It is distinguished, according to the orders, into the Tuscan, Doric, Ionic, Corinthian, and Composite freezes, which vary in their height and ornaments. The *Tuscan freeze*, according to Vitruvius, is flat and plain; the *Doric* carved with metopes and triglyphs; the *Ionic* with acanthus leaves, lions, &c.; the *Corinthian* like the Ionic; and the *Composite* with cartouches. Subsequent writers have varied, in certain particulars, from these forms. *Vitruv. l. 3, c. 3.*

Freezes are likewise distinguished into *convex*, or *pulvinated*, having the profile a curve; *flourished*, enriched with fantastical flowers; *historical*, adorned with Basso Relievos; *marine*, representing Tritons, sea-monsters, &c.; *rustic*, having the courses rusticated; *symbolical*, adorned with symbols.

FREEZING Mixture (*Chem.*) a composition of ingredients, which, when mixed with other bodies, cause them to congeal.

FREIGHT (*Com.*) the sum agreed on for the hire of a ship, or the carriage of goods, which must be paid in preference to all other debts, for whose payment the goods stand engaged. *Freight* also implies the burden or lading of the ship, the cargo of goods, &c.

FRENCH Crown (*Her.*) a circle decorated with stones, and heightened up with eight arched diadems, arising from as many fleurs-de-lis, that conjoin at the top under a fleur-de-lis, all of gold.

FRENCH-HONEYSUCKLE (*Bot.*) the *Hedysarum coronarium*.—French-Marygold, the *Tagetes patula* of Linnæus, an annual.

FRENDA (*Anat.*) a name for the sockets of the teeth.

FRENDWITE (*Law*) from the Saxon *frend*, a friend, and *wite*, a mulct; a mulct or fine exacted of him who harboured his outlawed friend. *Flet. l. 1, c. 7.*

FREQUENTATIVES (*Gram.*) an epithet for a sort of verbs which express the repetition of an action.

FRE'SCA (*Archæol.*) fresh water, rain, or a land flood.

FRESCA'DES (*Hort.*) Italian for shady cool walks.

FRE'SCO (*Paint.*) an Italian word which signifies literally fresh; but to *paint in fresco* is to paint upon bare walls, &c. newly done, that the colours may sink in and become more durable.

FRESH-WATER-SOLDIER (*Bot.*) the *Stratiotes aloides* of Linnæus.

FRESH (*Law*) *frisca*, in French *fraîs*; an epithet applied to several things, as—*Fresh Disseisin*, that disseisin which a man might formerly seek to defeat of himself, and by his own power, without resorting to the King or the law. *Bract. l. 4, c. 5; Britt. c. 5.*—*Fresh Fine*, a fine, levied within a year past, mentioned in the statute of Westm. 2, 13 Ed. 1, st. 2, c. 45.—*Fresh Force*, a force newly done in any city or borough, for which the party aggrieved may bring Assize, or bill of Fresh Force, within forty days after the force is committed, and recover the lands, &c. of which he is disseized. *F. N. B. 7; Old. Nat. Brev. 4; New. Nat. Brev. 15.*—*Fresh Suit*, otherwise called *recens insecutio*, such a present and earnest following of an offender, where a robbery is committed, as never ceases, from the time of the offence done or discovered, until he be apprehended. *Staudf. Pl. Cor. l. 3, c. 10, &c.; 2 Hawk. P. C. c. 23.*

FRESH (*Mar.*) an epithet used in many sea-phrases, as—*Fresh Water*, in French *eau douce*, water fit to drink, in distinction from salt water.—*Fresh-water-sailor*, a raw inexperienced sailor.—*Fresh-way*, the increased velocity of a ship, which is said to get *fresh-way* when she sails more swiftly.—*Fresh-gale*, a wind that blows immediately after a calm.—*Fresh-spell*, a fresh gang of rowers to relieve those who are fatigued.—*Fresh-shot*, the falling down of any great river into the sea, by means whereof the sea has fresh water.

FRESH-MAN (*Cus.*) a novice, or young student in a university.

TO FRESHEN (*Mar.*) the wind is said to *freshen* when it increases in strength. "To *freshen* the hawse," in French *raffaicher le cable*, to relieve that part of the cable which has, for some time, been exposed to friction in one of the hawse-holes.

FRESHES (*Mar.*) in French *eaux sauvages*, the impetuosity of an ebb-tide increased by heavy rains.

FRET (*Her.*) one of the subordinaries which is composed of a saltire and a mascle, as in the annexed figure; it is supposed to be a badge of fastness and fidelity like a knot or tie of ribbons; whence by some it has been called a *true lover's knot*.

FRET (*Archit.*) an ornament that consists of two lists, or small fillets, variously interlaced or interwoven, as in the annexed figure. Frets were used by the ancients on flat members, as the faces of the corona, or eaves of cornices, under the roofs, soffits, &c.

FRET (*Mus.*) a particular stop on a musical instrument.

FRETS (*Min.*) a term, used among mariners, for openings made in the banks of rivers by land floods.

FRETTED (*Her.*) an epithet for a cross, or any other bearing, which is in the form of a fret, as in the figure above. [vide *Fret*]

FRETT'S (*Min.*) a term used by miners to express the worn side of the banks of rivers in mine countries.

FRETTY (*Her.*) an epithet for a bordure consisting of eight, ten, or more pieces, each passing to the extremity of the shield; interlacing each other figure after the manner of a fret. [vide *Fret*]

- FRET-WORK** (*Archit.*) timber or plaster-work in imitation of fret.
- FRIAR** (*Ecc.*) vide *Frier*.
- FRIBURGH** (*Law*) or *frithburg*, from the Saxon *frith*, peace, and *borge*, a security; a surety for one's good behaviour.
- FRICASEE** (*Cook.*) a dish of fried meat, as rabbits, chickens, &c.
- FRICIUM** (*Med.*) a medicine appointed for the friction or rubbing of the body.
- FRIDAY** (*Chron.*) in the Latin *Dies Veneris*, in the Saxon *Frige-dææg*, i. e. the day of *Friga*, the Venus of the Saxons and other Northern nations, so called from *frigan*, to love; the sixth day of the week.—*Good Friday*, the Friday immediately preceding Easter, which is kept holy in commemoration of our Saviour's crucifixion.
- FRIDSTOLE** (*Archæol.*) from the Saxon *frith*, peace, and *stole*, a stool; a sanctuary, or place of refuge for malefactors.
- FRIENDLESS MAN** (*Law*) a name given to an outlaw, because upon, being expelled the king's protection, he was, after a certain number of days, denied the help of friends. "Nam forisfecit amicos." *Bract.* 1. 3, tract 2, c. 12.
- FRIENDLY SOCIETIES** (*Cus.*) associations, chiefly among the lower class of tradespeople, for affording relief to each other in sickness, or to the widows and children at their death.
- FRIER** (*Ecc.*) or *Friar*, from the French *frère*, Latin *frater*, the name for an order of religious persons, of which there were four principal branches, namely—1. The Minors, Grey Friars, or Franciscans. 2. The Augustines. 3. The Dominicans, or Black Friars. 4. White Friars, or Carmelites; from which all the rest descend. *Stat.* 21 H. 7, c. 17; *Lyndew. de Relig. Dom.* c. 1.—*Friers observant*, a branch of the Franciscan friars who observed their rules more strictly than the conventuals. 25 H. 8, c. 12; *Zach. de Rep. Eccles. de Regular.* c. 12.
- FRIER'S COWL** (*Bot.*) the *Arum arisarum* of Linnæus, a perennial.
- FRIGATE** (*Mar.*) a light nimble ship, built for the purpose of swift sailing. English frigates mount from 20 to 50 guns. *Frigate-built* is an epithet for merchant vessels which have a descent of four or five steps from the quarter-deck and fore-castle into the waist, in distinction from the galley-built, whose decks are in a continued line.
- FRIGATOON** (*Mar.*) a Venetian vessel built with a square stern, without any foremast; it is used in the Adriatic.
- FRIGERANA** (*Med.*) a putrid fever.
- FRIGID** (*Rhet.*) an epithet for a style which is wanting in force, ornament, and elegance.
- FRIGIDIARIUM** (*Ant.*) a place in the Roman baths where people used to cool themselves.
- FRIGORIFIC particles** (*Phil.*) such particles of matter as are supposed, by entering into other bodies, to produce the quality of cold.
- to **FRILL** (*Falcon.*) is said of a hawk when she trembles.
- FRINGED** (*Bot.*) *fimbriatus*, an epithet for a corolla, as in the *Menyanthes trifoliata*.
- FRINGE-TREE** (*Bot.*) the *Chionanthus Virginica* of Linnæus.
- FRINGILLA** (*Orn.*) the Finch, a genus of birds, of the Order *Passeres*, which have a conic and straight bill. The principal species are, the—*Fringilla carduelis*, the Goldfinch.—*Fringilla cælebs*, the Chaffinch.—*Fringilla montefringilla*, the Brambling.—*Fringilla Canaria*, the Canary Bird.—*Fringilla spinus*, the Siskin.—*Fringilla linota*, the Linnet.—*Fringilla cannabina*, the Greater Red-Poll.—*Fringilla linaria*, the Lesser Red-Poll.—*Fringilla domestica*, the House Sparrow.—*Fringilla montana*, the Hedge Sparrow, &c.
- FRI'PERER** (*Com.*) one who new vamps old clothes to sell again.
- FRI'SCUS** (*Archæol.*) fresh uncultivated ground. *Mon. Angl.* tom. 2, p. 56.
- FRI'SEA** (*Bot.*) the *Thesium frisea* of Linnæus.
- to **FRIST** (*Com.*) to sell goods at time, or upon trust.
- FRIT** (*Chem.*) ashes and salt baked and tried together in sand.
- FRITH** (*Archæol.*) from the Saxon *frith*, signifies a wood, woods having been held sacred among the Saxons. *Co. Lit.* 5.
- FRITH** (*Geog.*) from the Latin *fretum*, is now used in Scotland for an arm of the sea.
- FRITH-BRECH** (*Archæol.*) from the Saxon *frith*, peace; a breaking of the peace. *Ld. Ethelred.* c. 6.
- FRITHGEAR** (*Archæol.*) from the Saxon *frith*, peace, and *gear*, year, a year of jubilee.
- FRITHGILD** (*Archæol.*) a guildhall; also a company or fraternity.
- FRITHMAN** (*Archæol.*) one belonging to a frith, or fraternity.
- FRITHSOKEN** (*Law*) from the Saxon *frith*, peace, and *soken*, liberty; a liberty of having frankpledge, or surety of defence.
- FRITHSTOLE** (*Archæol.*) vide *Fridstole*.
- FRITILLARIA** (*Bot.*) a genus of plants, Class 6 *Hexandria*, Order 1 *Monogynia*.
- Generic Character.* CAL. none.—COR. six-petalled.—STAM. filaments six; anthers erect.—PIST. germ oblong; style simple; stigma triple.—PER. capsule oblong; seeds many.
- Species.* The species are bulbous, as the—*Fritillaria imperialis*, *Corona*, seu *Tusai*, Imperial Fritillary, or Crown Imperial.—*Fritillaria persica*, seu *Lilium*, Persian Fritillary, or Persian Lily.—*Fritillaria pyrenaica*, seu *Meleagris*, Black Fritillary, native of France.—*Fritillaria meleagris*, Common Fritillary, or Chequered Lily, native of the South of Europe. *Clus. Hist.*; *Dod. Pempt.*; *Bauh. Hist.*; *Bauh. Pin.*; *Ger. Herb.*; *Raii Hist.*; *Tourn. Inst.*
- FRITILLARIA is also the *Stapelia variegata* of Linnæus.
- FRITTA** (*Chem.*) vide *Frit*.
- FRODMORTEL** (*Law*) or *freomortel*, from the Saxon *fræo*, free, and *mozt-dæod*, man-killing; an immunity or freedom for manslaughter or murder. *Mon. Angl.* tom. 1, p. 173.
- FROG** (*Zool.*) an amphibious animal which has a smooth body, and longer legs than the toad. There are several species of it, which are classed by Linnæus under the genus *Rana*. [vide *Rana*]
- FROG-BIT** (*Bot.*) the *Hydrocharis Morsus ranae* of Linnæus.
- FRO'G-FISH** (*Ich.*) Fishing-Frog, or Angler, the *Lophius* of Linnæus; a sort of fish so called because its shape resembles that of the frog in its tadpole state. It is called the *fishing-frog* because it puts forth the slender horns it has under its eyes, by which it entices the little fish to play around it, when it darts upon them as soon as they come within its reach. It is called by Aristotle *βάρραχος*; by Pliny *Rana piscatrix*; by Cicero *Rana marina*. *Aristot. Hist. Anim.* 1. 5, c. 37; *Cic. de Nat. Deor.* 1. 2; *Plin.* 1. 9, c. 24; *Oppian. Halieut.* 1. 2, v. 86.
- FROND** (*Bot.*) from the Latin *frons*, a leaf, is applied by Linnæus to the peculiar leafing of palms and ferns. He defines it to be a kind of trunk or stem which has the branch united with the leaf, and frequently with the fructification.
- FRONDATION** (*Husband.*) the removal of luxuriant branches.
- FRONDESCENTIA** (*Bot.*) the leafing season, or the time of the year when plants first unfold their leaves.
- FRONDO'SUS** (*Bot.*) *frondose*, an epithet for the stem; also

sometimes for a flower; *frondosus prolifer flos*, a leafy proliferous flower, as is occasionally to be met with in the Rose Anemone, &c.

FRONS (*Anat.*) μέτωπον, that part of the face between the eyebrows and the hairy scalp. *Ruff. Ephes. de Appell. Part. Corp. Hum.* l. 1, c. 4; *Gal. Introd.* c. 10; *Oribas. Med. Collect.* l. 25, c. 27.

FRONT (*Archit.*) the principal face or side of a building, that which presents itself chiefly to the aspect or view.

FRONT (*Perspec.*) the orthographical prospect of an object upon a parallel plane.

FRONT (*Mil.*) the foremost rank of a battalion, squadron, or other body of men.

FRONT (*Fort.*) the face of a work.

FRONTAL (*Man.*) the bridle of a horse.

FRONTAL (*Anat.*) an epithet for what belongs to the forehead, as the *frontal bone* and the *frontal sinus*.

FRONTAL (*Archit.*) vide *Fronton*.

FRONTALE (*Med.*) any external medicine applied to the forehead.

FRONTALIS (*Anat.*) an epithet for a muscle of the forehead which serves to contract the eyebrows.

FRONTIERS (*Geog.*) the limits or borders of a country.

FRONTIGNAC (*Com.*) or *Frontignac*, a sort of rich luscious French wine, so called from the place where it is made.

FRONTIS OS (*Anat.*) one of the bones of the skull which joins the bones of the sinciput and temples by the coronal suture.

FRONTISPIECE (*Paint.*) *frontis spicium*, i. e. *frontis hominis inspectio*, the figure or effigy of a man; the ornament or picture which fronts the book, or forms the first page in a book.

FRONTISPIECE (*Archit.*) the forefront of a building.

FRONTLET (*Cus.*) an attire for the forehead.

FRONTON (*Archit.*) a member which serves as an ornament over doors, windows, &c.

FROST-NAIL (*Mech.*) a nail with a prominent head, driven into the horse's shoes, that it may pierce the ice.

FROUNCE (*Falcon.*) a disease in the mouth of a hawk.

FRUCTED (*Her.*) an epithet for trees bearing fruit of a different tincture.

FRUCTIFICATION (*Bot.*) the temporary part of vegetables appropriated to propagation, which terminates the old and commences the new vegetable. It consists of flower and fruit, comprehending seven parts, namely—1. Calyx. 2. Corolla. 3. Stamen. 4. Pistil. 5. Pericarp. 6. Seed. 7. Receptacle. Of these the four first belong to the flower; the two next to the fruit; and the last is common to both. [vide *Botany*]

FRUGGIN (*Mech.*) a fork to stir about the fuel in an oven.

FRUIT (*Bot.*) *fructus*, is the seed with its pericarp; or if there be no pericarp, the seed itself is the fruit.—*Fruit-stalk*. [vide *Pedunculus*]

FRUITERER (*Com.*) one who deals in fruits.

FRUITERS, *Company of* (*Her.*) was first incorporated in 1604. Their armorial ensigns are, as in the annexed figure, "Azure the tree of Paradise between Adam and Eve, all proper."

FRUITFUL signs (*Astrol.*) are the signs Gemini, Cancer, and Pisces.

FRUITS (*Law*) are in the Canon Law every thing whereof the revenue of a benefice consists, as glebe, tithes, rents, offerings, &c.

FRUMEN (*Anat.*) the upper part of the throat.

FRUMENTACEUS (*Bot.*) an epithet for plants that have their stalks pointed, and their leaves like reeds, bearing their seeds in ears, like corn.

FRUMENTY (*Cook.*) a kind of potage, made of wheat, milk, and sugar.

FRUMGILD (*Law*) the first payment made to the kindred of a slain man, in recompence for the murder. *L. L. Edmund.*

FRUMSTALL (*Archæol.*) the chief seat, or mansion-house. *Leg. Inc.* c. 38.

FRUSCA Terræ (*Archæol.*) waste or desert lands. *Mon. Angl.* tom. 3, p. 22.

FRUSH (*Vet.*) the tender part of a horse's heel, next the hoof.

FRUSSURA domorum (*Archæol.*) housebreaking.—*Frussura terræ*, land newly broken or ploughed up.

FRUSTANEIA Polygamia (*Bot.*) the name of the third Order in the Class *Syngenesia* of Linnæus' Artificial System, comprehending such of the Compound Flowers as have perfect florets in the disk, producing but imperfect florets in the ray, which, for want of a stigma, are barren. [vide *Botany, Plates No. V, &c.*]

FRUSTUM (*Geom.*) the part of a solid next the base, left by cutting off the top or segment by a plane parallel to the base.—*Frustum of a cone*. [vide *Cone*]

FRUTECTUM (*Archæol.*) a place where shrubs or tall herbs grow. *Mon. Angl.* tom. 3, p. 22.

FRUTE SCENS (*Bot.*) frutescent, an epithet for a stem; *caulis frutescens*, a stem growing shrubby.

FRUTICES (*Bot.*) shrubs, a branch of the seventh family of plants, which, according to Linnæus, are distinguished from trees by having no buds.

FRUTICOSUS (*Bot.*) shrubby; an epithet for a stem.

FU'AGE (*Law*) from *feu*, fire; hearth-money, or a tax of 1s. laid upon every hearth in the dutchy of Aquitaine by the Black Prince. *Rot. Parl.* 25 Ed. 3. A similar tax was imposed in the reign of Charles II. [vide *Fumage*]

FUCHSIA (*Bot.*) a genus of plants, Class 8 *Octandria*, Order 1 *Monogynia*.

Generic Character. CAL. perianth one-leaved.—COR. petals four.—STAM. filaments four; anthers twin.—PIST. germ inferior; style simple; stigma obtuse.—PER. berry ovate; seeds many.

Species. The species are trees, as the—*Fuchsia triphylla*, three-leaved Fuchsia.—*Fuchsia coccinea*, seu *Thilea*, Scarlet-flowered Fuchsia, native of Chili.—*Fuchsia ex-corticata*, seu *Skinnera*, native of New Zealand.

FUCOIDES (*Bot.*) a species of the *Fucus*.

FUCUS (*Bot.*) a genus of plants, Class 24 *Cryptogamia*; Order 3 *Algæ*.

Generic Character. Male, vesicles smooth, hollow, with villose hairs within.—Female, vesicles smooth, filled with gelly sprinkled with immersed grains; seeds solitary.

This genus comprehends most of those plants which are commonly called Sea-Weed. They may all be used to manure land, or may be burnt to make kelp, which is an impure fossil alkali. Some of the species are eaten fresh out of the sea, or boiled tender, as the *Fucus saccharinus*, *digitatus*, *palmatius*, &c.

FU'ER (*Law*) flight, or flying, is used substantively in law phrases, and is of two kinds, namely—*Fuer en fait*, when a man doth actually fly; and *Fuer en ley*, when a man being called into the county does not appear till he be outlawed. *Standf. Plac. Cor.* l. 3, c. 22.

FUGA catellorum (*Law*) a drove of cattle; whence *fugatores carrucarum*, waggoners who drive oxen without beating or goading. *Flet.* l. 2, c. 78.

FUGA vacui (*Phy.*) an abhorrence of a vacuum, which the peripatetics and other ancient philosophers ascribed to nature, and by which they explained many of the effects which we daily witness.

FUGA (*Mus.*) Italian for a Fugue. [vide *Fugue*]

FUGACIA (*Archæol.*) a chace; whence *fugatio*, hunting.

FUGAM. fecit (*Law*) the words denoting a flight in law,

which if found against a convicted felon he shall forfeit his goods. *Hawk. P. C. c. 49.*

FUGA'TA (*Mus.*) an Italian epithet for compositions written in the style of fugues.

FUGA'TIO (*Archæol.*) vide *Fugacia*.

FUGAX (*Bot.*) fleeting; an epithet for a corolla which lasts but a short time.

FUGITIVE *pieces* (*Lit.*) little compositions, so called because they are printed on loose sheets, and may be easily lost.

FUGITIVE'S *goods* (*Law*) the goods of him that flies upon felony. [vide *Fugam fecit*]—*Fugitives over sea*, those who departed the realm without the king's licence, which was forbidden to all persons except great men, merchants, and soldiers, by the statutes 9 E. 3, c. 10; 5 R. 2, st. 2, c. 2.

FUGUE (*Mus.*) in Italian *Fuga*, a species of composition in which the different parts follow each other, each repeating in order what the first had performed. There are three distinct kinds of fugues; namely, the simple, double, and counter. The *simple Fugue* contains but one subject; the *Double* two, and the *counter Fugue* is that in which the subjects move in a direction contrary to each other.

FUGUIST (*Mus.*) one who composes fugues.

FUIRENA (*Bot.*) a genus of plants, Class 3 *Triandria*, Order 1 *Monogynia*.

Generic Character. CAL. *ament* oblong; *awn* cylindrical; *flowers* between the scales solitary.—COR. *glume* three-valved; *valves* petal-shaped.—STAM. *filaments* three linear; *anthers* linear, erect.—PIST. *germ* large; *style* filiform; *stigmas* two, revolute.—PER. none; *seed* three-cornered.

Species. The single species is the—*Fuirena paniculata*, a lofty Grass, native of Surinam.

FULCIMENT (*Mech.*) the same as the point of suspension, or that point upon which a *libra* or *vectis* plays, or is suspended.

FULCRUM (*Bot.*) from *fulcio*, to prop, a fulcre, prop or support; a name for those parts of plants which serve for their due sustentation. They are reckoned to be as follow: the Stipule, Bracte, Spine or Thorn, Prickle, Cirrus Clasper or Tendril, Gland, and Pubescence. [vide *Botany* and *Stipule*, &c.]

FULCRA'TUS (*Bot.*) an epithet for a stem having fulcres.

FULGORA (*Ent.*) Lanthorn-Fly, a genus of insects, of the Hemipterous Order, having the *head* hollow and inflated; *antennæ* short; *snout* elongated; *legs* formed for walking.

Species. Insects of this tribe are inhabitants of South America and Africa; and are so called from the strong phosphoric light which they emit.

FULGURATING *Phosphorus* (*Chem.*) a sort of phosphorus, so called because it not only shone in the dark, but communicated its light to any thing it was rubbed on.

FULICA (*Orn.*) a genus of birds, of the Order *Grallæ*, having the *bill* convex; *upper mandible* arched over the lower; *front* bald; *feet* four-toed.

Species. Birds of this tribe frequent waters; and are distinguished in English into the Gallinules, which have their feet cleft, and the upper mandible membranaceous at the base; and the Coots which have the toes surrounded by a scalloped membrane, the mandibles equal, nostrils oval, narrow, and short.

FULI'GINOUS (*Nat.*) an epithet applied to thick smoke, or vapour replete with soot or other crass matter. The fusion of lead causes a great exhalation of fuliginous vapour.

FULL (*Mus.*) an epithet for the *organ* when all its stops are out; for the *score*, the several parts of which are complete; and for a *band*, when all the voices and instruments are employed.

FULLER (*Com.*) one who cleanses cloth from the grease.

FULLER'S-EA'RTH (*Min.*) a sort of clay, the *Argilla*

fullonica of Linnæus, which has the remarkable property of absorbing oil, wherefore it is used by fullers in taking grease spots out of cloth.

FULLUM *Aquæ* (*Archæol.*) a fleam or stream of water which comes from a mill.

FULMART (*Zool.*) another name for a pole-cat.

FULMINANS (*Nat.*) Fulminant, fulminating or thundering; an epithet for any thing that makes a noise like thunder, as *Aurum fulminans*, a preparation of gold, which explodes with a thundering noise.—*Pulvis fulminans*, a preparation of nitre, salt, and sulphur. There is also fulminating silver, quick-silver, &c.

FULMINATING *damp* (*Min.*) vide *Damp*.

FULMINA'TION (*Chem.*) a term applied to the noise which metals make when heated in a crucible.

FUMADEE'S (*Com.*) a name in Italy and Spain for pilchards, garbaged, salted, and dried in the smoke.

FUMA'GIUM (*Archæol.*) dung for soil, or manuring with dung.

FUMAGIUM (*Law*) Fumage, or smoke-money, a tax upon every house that had a chimney.

FUMA'NA (*Bot.*) the *Cistus fumana* of Linnæus.

FUMA'RIA (*Bot.*) a genus of plants, Class 17 *Diadelphia*, Order 2 *Hexandria*.

Generic Character. CAL. *perianth* two-leaved.—COR. oblong.—STAM. *filaments* two; *anthers* three.—PIST. *germ* oblong; *style* short; *stigma* erect.—PER. *silicle* one-celled; *seeds* roundish.

Species. The species are annuals and perennials. The following are the principal annuals.—*Fumaria officinalis*, seu *Capnos*, Common Fumitory.—*Fumaria vesicaria*, seu *Cysticapnos*, Bladdered Fumitory, native of the Cape of Good Hope.—*Fumaria fungosa*, Spongy-flowered Fumitory, native of North America.—*Fumaria semper virens*, Glaucous Fumitory, native of North America.—*Fumaria Siberica*, Siberian Fumitory, native of Siberia. The following are the principal perennials, as the—*Fumaria cucullaria*, seu *Caponorchis*, Naked-Stalked Fumitory, native of Virginia.—*Fumaria nobilis*, Great-Flowered Fumitory, native of Siberia, &c. *Clus. Hist.*; *Dod. Pempt.*; *Bauh. Hist.*; *Bauh. Pin.*; *Ger. Herb.*; *Park. Theat.*; *Raii Hist.*; *Tourn. Inst.*

FUMARIA is also the *Adoxa moschatellina*.

FUMETS (*Sport.*) the ordure or dung of a hare, &c.

FUMIGA'TION (*Med.*) the clearing or purifying the air of any infected place by means of smoke, or vapours, &c.

FUMIGATION (*Chem.*) an erosion or eating away of metals by smoke or vapour.

FUMIGATION (*Surg.*) the raising a salivation by the smoke, or fumes of mercury.

FUMIGA'TION-LAMPS (*Mech.*) a sort of lamps constructed for the purpose of expelling foul air from close places, particularly the holds of ships.

FUMITORY (*Bot.*) another name for the *Fumaria* of Linnæus.—Bulbous Fumitory, the *Adoxa moschatellina*.

FUNA'RIA (*Bot.*) a genus of Mosses.

FUN'CTION (*Med.*) vide *Action*.

FUNCTION (*Algeb.*) an algebraical expression of a certain letter or quantity any how compounded: thus, $a - 4x - ax + 3x^2$, or $2x - (a^2 - x^2)$, is each of them a function of the letter x .—*The Functions of a Calculus*, a branch of analysis which treats of the doctrine of functions.

FUND (*Com.*) from *fundus*, land, or a bottom; the capital or stock of a public company or corporation, particularly applied to the stock which consists of the public money. [vide *Funds*]

FUND of the *eye* (*Anat.*) the part possessed by the choroides and retina.

FUNDAMENTAL (*Mus.*) an epithet for whatever serves as a base or foundation for something else, as a—*Funda-*

mental note, the lowest note of the chord.—*Fundamental chord*, that from which the lowest note is derived.—*Fundamental bass*, that formed by the fundamental notes of every chord.

FUNDAMENTAL diagram (*Math.*) the projection of a sphere upon a plane.

FUNDS (*Polit.*) Public Funds or Stocks, is the national debt formed into different capitals, upon which interest is payable. Those who have any share in the funds are called *fund-holders*, or *stock-holders*; those who buy a share are said to *buy in*; and those who sell their share, to *sell out*. The act of transferring a share from the seller to the buyer is termed the *transfer*; and the days appointed for this transaction are the *transfer-days*. The interest which is received at the stated times of payment is the *dividend*. The largest of the public funds is known by the name of the *consols*, i. e. funds formed by the consolidation of different annuities, which had been severally formed into a capital. When a loan is composed of different funds, they are, collectively, called *omnium*. What remains of any loan unpaid by the subscribers, is noted down under the name of *scrip*.

FUNDUS (*Anat.*) signifies properly a bottom, in which sense it is applied to some parts of the body; as the—*Fundus ventriculi*, the bottom of the stomach—*Fundus uteri*, the bottom of the womb.

FUNDUS plantæ (*Bot.*) that part of a plant where the stalk meets and joins the root.

FUNGI (*Bot.*) Funguses or Mushrooms; the first of the great Families into which Linnæus distributed the whole vegetable kingdom, and the Fourth Order, of the Class *Cryptogamia*, in his Artificial System. [vide *Botany*, Plates No. V, &c.]

FUNGIBLES (*Law*) a name in the Scotch Law for moveable goods, which may be estimated by weight, number, or measure.

FUNGIILLI (*Bot.*) the *Lichen ericetorum* of Linnæus.

FUNGOIDES (*Bot.*) a species of the *Clavaria* of Linnæus.

FUNGUS (*Surg.*) a fleshy tumour or excrescence that arises on the membranous and soft parts of the body.

FUNICULUS umbilicalis (*Anat.*) the Navel-string.

FUNICULAR (*Math.*) an epithet for a curve, which is the same as the Catenary; and also for a polygon hanging freely by its extremities.

FUNIS (*Bot.*) the *Cissus latifolia* of Linnæus.—*Funis mucronarum*, a species of the *Melastoma*.—*Funis musarius*, the *Uvaria zelanica*.—*Funis quadrangularis*, a species of the *Menispermum*.

FUNNEL (*Mech.*) contracted from *fundible* and *infundibulum*, a tube of a particular shape for pouring liquor into a vessel.

FUNNEL-SHAPED (*Bot.*) *infundibuliformis*, an epithet for a corolla, as in *Lithospermum*, *Cynoglossum*, *Pulmonaria*, &c.

FUNZIO'NI (*Mus.*) Italian for oratorios, and other pieces of sacred music, occasionally performed in the Romish church.

FUR-RAN (*Bot.*) a species of the *Epidendrum*.

FUR'BELOW (*Cus.*) from *fur*, formerly served as an ornament to garments.

FURCA et Fossa (*Law*) i. e. the Gallows and the Pit; a jurisdiction formerly granted by the king of punishing felons, the men by hanging, the women by drowning. According to Coke the *fossa* is abolished, although the *furca* remains. 3 *Inst.* 58.

FURCA'LE (*os* (*Anat.*) vide *Furcella*.

FURCAM et Flagellum (*Law*) the meanest kind of tenure, when the bondman was at the disposal of his lord for life and limb. *Placit. Term. Mich.*; 2 *Joh. Rot. Parl.*

FURCARE ad Tassum (*Archæol.*) to pitch corn with a fork in loading a waggon, or in making a rick or mow.

FURCELLÆ (*os* (*Anat.*) the upper bone of the *sternum*, otherwise called the *jugulum*.

FURCHY (*Her.*) vide *Fouchée*.

FURFURES (*Med.*) from *furfur*, bran; a disease of the skin, when the cuticle or scarf-skin separates from the cutis or real skin in small scales like bran.

FURIA (*Mus.*) Italian for fury or violence, as applied to the rapidity of the performance.

FURIA (*Ent.*) a genus of animals, of the Class *Vermes*, Order *Intestina*, which have a linear body, furnished with reflected prickles. These animals inhabit the marshy plains of Bothnia and Finland, and infest both men and horses, by burying themselves under the skin, where they cause excruciating pains, inflammation, gangrene, and sometimes death.

FURIAE (*Myth.*) Furies; a name given to the infernal deities, who were supposed to enter and possess men, for the purpose of punishing and tormenting them.

FURIBONDO (*Mus.*) an Italian epithet applied to parts of compositions which are to be performed with vehemence.

FURIGELD (*Law*) a mulct paid for theft. *LL. Æthelred.*

FURIOUSITY (*Med.*) Madness, as distinguished from Fatuity or Idiocy.

FURIOSO (*Mus.*) or *con furia*, Italian, signifying furiously, or with vehemence.

FURL (*Mar.*) is to wrap or roll the ship's sails close to the yard, stay, or mast, to which they respectively belong.

FURLING in a body (*Mar.*) is a particular method of rolling up a topsail, which is practised only in harbours.—*Furling-lines*, the ropes employed in the operation of furling.

FURLONG (*Arith.*) in Saxon *furlang*; a measure of length, consisting of forty poles, and equal to the eighth part of a mile.

FURLOUGH (*Mil.*) leave granted to a soldier, or non-commissioned officer, to be absent for a given time from his regiment or company, in which case he is said to be on furlough.

FURNACE (*Chem.*) a fire-place employed for melting, distilling, and all other chemical processes. Furnaces are of different kinds, as *moveable furnaces*, *wind furnaces*, &c. [vide *Chemistry*]

FURNA'GIUM (*Law*) a tribute formerly paid to the lord for baking bread in his oven.

FURNA'RUS (*Archæol.*) a baker who kept an oven, whence *furniare*, to bake, or put any thing into an oven. *Matth Par. Ann.* 1258.

FURNISHED (*Her.*) an epithet for a horse when bridled, saddled, and completely caparisoned.

FURNITURE (*Diall.*) a name given to the lines drawn on a dial; as the parallels of declination, length of the day, azimuth, almacantars, &c.

FUROLE' (*Nat.*) the name for a little blaze of fire which has been observed by night on the tops of the sentinels' lances, or the sailyards of ships, which dances from place to place, and soon disappears.

FUROR UTERINUS (*Med.*) vide *Nymphomania*.

FURR (*Com.*) the coat or covering of a beast, which is used either for ornament or warmth. Of these there are different kinds, named after the beasts from which they are taken, as Sables, Beavers, Lucerns, Genets, Foins, Martens, Fitchets or Polecats, Cababars, Squirrels, &c.

FURRS (*Her.*) are a sort of tinctures which are supposed to represent the furs of animals. The principal furs which occur in coat armour are, the—*Ermine*, which has black spots on a white field.—*Ermines*, or *counter ermine*, white spots on a black field.—*Erminois*, black spots on a field or.—*Vair*, in which *argent* and *azure* are represented by figures of small escutcheons ranged in a line, so that the *base argent* is opposite to the *base azure*.—*Counter-vair*,

when the bells or cups of the same colour are placed base against base and point against point.—*Potent-counter-potent*, a field covered with figures like the heads of crutches, called potents. [vide *Heraldry, Ermine, &c.*]

FURRENS (*Mar.*) pieces in ship-building to supply the deficiency of the timber in the moulding way.

FURRING a ship (*Mar.*) laying on double planks on the sides of a ship after she is built, called plank upon plank, for the purpose of making her stronger.

FURRING (*Carpent.*) the fixing of thin scantlings or laths on the edges of timbers, to bring them to the even surface they were intended to form. Thus the timbers of a floor, though level at first, are often obliged to be furred; also the rafters and joists of old roofs require a furring.

FURRINGS (*Carpent.*) the pieces of timber employed in bringing any pieces of carpentry to an even surface.

FURROW (*Husband.*) a trench cast up by a plough.

FURROWED (*Bot.*) *sulcatus*, fluted or grooved; an epithet for a stem.

FURUNCULUS (*Surg.*) *δερμαίς*, a boil, or hard tumour rising in the fat under the skin, accompanied with inflammation, redness, and pain. *Gal. de Tum. c. 15; Cel. l. 5, c. 28; Oribas. Med. Coll. l. 3, c. 3; Paul. Æginet. l. 4, c. 23.*

FURZE (*Bot.*) another name for the *Ulex* of Linnæus.

FUSANUS (*Bot.*) a genus of plants, Class 23 *Polygamia*, Order 1 *Monoecia*.

Generic Character. CAL. *perianth* one-leaved.—COR. none.

—STAM. *filaments* four; *anthers* roundish.—PIST. *germ* large; *style* thick; *stigmas* four.—PER. a drupe.

Species. The single species is a tree, as the *Fusanus compressus*, seu *Colpoon*, Flat-stalked *Fusanus*, native of the Cape of Good Hope.

FUSAROLE (*Archit.*) a moulding or ornament placed immediately under the echinus in the Doric, Ionic, and Composite capitals.

FUSEE (*Gunn.*) *fuse*, or *fuze*, the tube fixed into a bomb or granade shell, which is filled with combustible materials, and furnished with a quick-match on the top of it. It is cut to a length proportional to the distance the bomb is to be thrown, that it may continue burning all the time the shell is in its range, and afterwards set fire to the powder as soon as it touches the ground, which causes the shell to burst.

FUSEE (*Hor.*) the conical part drawn by the spring of a watch, and about which the chain or string is wound.

FUSIFORMIS (*Bot.*) fusiform, or spindle-shaped; an epithet for a root, as in the case of the Radish, Parsnip, &c.

FUSIL (*Mil.*) a small light musquet.

FUSIL (*Her.*) is a sort of artificial charge, which is taken for spindles of yarn, millpecks, or weaver-shuttles, as in *fig. 1*; it differs from the lozenge by being longer. The spindle is likewise blazoned as a fusil in coat armour, as in *fig. 2*. "He beareth *argent* three fusils upon slippers, *gules*, by the name of *Hoby*." When a field is covered with fusils it is said to be *fusilly*, as in *fig. 3*.

Fig. 1.

Fig. 2.

Fig. 3.

FUSILLY (*Her.*) vide *Fusil*.

FUSION (*Metall.*) the act of founding, melting, or running metals by means of heat.

FUST (*Archit.*) the shaft of a column from the astragal to the capital, or that part comprehended between the base and capital, called also the *naked*.

FUSTIAN (*Com.*) a sort of nappy cotton cloth, so called from Fustan, a place in Spain where it was first made.

FUSTICK WOOD (*Bot.*) the *Morus tinctoria* of Linnæus, a tree growing in the West India islands, the wood of which yields a yellow die.

FUTTOCKS (*Mar.*) the middle division of a ship's timbers. Those next the keel are called *ground futtocks*, the rest *upper futtocks*.—*Futtock-plates*, iron plates, the upper part of which is open, like a ring.—*Futtock-staves*, or *foothook-staves*, a short piece of rope served over with spun yarn, to which the shrouds are confined at the cat-harpings.

FUTURE (*Gram.*) the name of a tense in verbs, by means of which the futurity of an action is expressed.

FYRDERINGA (*Archæol.*) *fyrthing*, or *fyrding*, from the Saxon *fýrderung*, a going out to war, or on a military expedition, the omission to do which when summoned was punished by fine at the king's pleasure. *Leg. H. l, c. 10.*
