Public Assistance Grant Raised By 15%.
Good News to Rehabilitation of Needy Family.
Individual Guidance will be Given by Case-Worker.

12 June 1949

A good news regarding the increase of public assistance grant which will be retroactive to May 1 in accordance with the amendment of Daily Life Security Law was brought out to so-called " Card Class ",which are getting along under the public assistance, such as the family which has no breadearner, the old aged suffering from disease, or the widow in distress with children.

Upon receiving an official information from Pref. on June 9, Sendai City has come to put it into being wihtout delay. In consequence, held the M.I. meeting on June 10, where the city introduced the revised parts of the Law, at the same time appointed full time case workers as an entire new trial so that guidance upon the rehabilitation of needy persons can be given more effectively.

The major points of Amendment of the Law of this time will be shown as follows;

1) In accordance with raising up the cost of staple foodstuff effected on and after 14 April, staple food expense was revised, while housing, light and fuel expense have also been raised.

2) As the result of overall abolishment of control upon vegitable ration system, its expense was consolidated into one item of subsidiary food expense.

3) All food expense has so far been worked out based upon the premise that both man and woman is engaging in some light work, however in the revised law, in case of woman who has more than 2 children of 4 years old, shall be regarded middle class labourer, and persons who are taking care of the invalidity are granted to receive ¥ 300 per person as an additional living expense ~~for~~ for the reason.

4)As for fuel expense, in case of more than 5 persons, fuel expense shall be raised to ¥ 475 a month (¥ 170 in old system) based on 24 bags of charcoal a year.

5) As for education expense, total of both text book expense and stationery expense shall be granted according to the classes which shall be provided as ¥ 750 (360) to 1st year grade of Elementary school, ¥ 1,975(876) to 3rd years grade of Junior Secondary School, monthly.

6) In case of the assistance for the inmate of institutions, discrimination by age and sex was abolished and ¥ 1,155 to per inmate of Home for Aged and ¥ 1,330 to per inmate of the institutions shall be granted repectively a month.

Generally speaking, public assistance grant raised by 15%, and abolishment of sexual discrimination under 13 years old, foodstuff expense based on calorie, simplification of grant base are the remakable changes in this new system.

There are at present in Sendai city 1,750 households, 6,300 persons of recipient of P.A. under D.L.S.L., and 70 % of whom are widows, and disbursement of P.A. for whom was expected aproximately ¥ 1,740,000 a month and ¥ 19,650,000 a year, but has come to be approved to increase by 15% and education expense of which raised by 100%.

DECLASSIFIED E. O. 12065 SECTION 3-402 / NNDG NO. 775013

For instance, in an old system, public assistance, in case that monthly income of a family of 5 persons is ¥ 3,500 while its monthly expense is ¥ 4,475, was ¥ 1,875, but by the amendment of this time, living expense of such family for a month is counted ¥ 5,935 and ¥ 100 of educational expense shall be added to it, therefore, ¥ 2,535 shall be granted.

Such public assistance grant has hitherto been taken care of by M.I. but for the necessity of scientical and professional individual guidance in order to dispose the cases by grabing an actual condition of their life, the city appointed 6 full time case-workers, 4 in charge of public assistance relations and one in each Child Welfare relations and Vagabond and Sick-traveller relations.

At the same time the system of Appeal Board, to which applicant may bring up his complain if he has against the decision made by city upon his application for public assistance grant and that the city is supposed to make within 14 days after receiving the application and notify him in writing, was put on the statute book and, consequently, assistance measures have come to be extended more and more warmly upon destitute peoples.

Opinion of Sendai City
Prepared By Mr. Hoshi

May 27 '49

1. Process of Functional Classification and Systimatization in the same Administrative Unit.

consulted with 4 workers in his office

A) Theoritical Review.

The proposed classification of " case work "," group work "," administration ","and " social insurance " is the one based entirely upon fuction alone, I think.

When classification based purely upon fuction come into systimatization as an actual working body on an administrative basis, we have to admit the fact that it is subjected to be changed and modified in proportion to quantity of work.

That is to say, if the quantity of a certain work within the same function is very large, the more staff will will be needed naturally, and the work should be independent from the initial unit of work, and form the equal system.

On the contrary, when the quantity of a work which should be functionally included in another class, is very small, it is to be combined into other system which have more or less connection with it.

In some cases, regardless function or quantity, a system can be organized due to a political purpose (in other word, in expecting the future necessity of it, or enhancing people's interest).

Generally speaking, within the same administrative unit, that providing an independent system, separating from the function of administration, is not existing in City, Town & Village administration, which is different from that of Department, Bureau, Central Government and Prefectures. They just distinguish the person in charge of administration from others.

B) Relation between System and Functional classification in Social Section of Sendai City.

1) A sub-section of housing is a part of "Group Work", however, an independent system should be given to it and is actually being given now, because of (1) its large amount of work, (2) its political purpose---- Housing problem is now conciderd a most important factor in the field of the social resources and at the same time an important key point of the current social problems.

2) A greater part of work of sub-section of social affairs belong to " Group Work," but works relating to vagabonds and child welfare should be transfered into the sub-section of protection which deals mainly with case work, as the former work belong to case work from its nature.

DECLASSIFIED E. O. 12065 SECTION 3-402 / NNDG NO. 775013

3) Chief and sub-section chief are responsible for matters regarding personnel, planning, administration and statistics, instead of having an independent system.

2. 4) Number of case worker desiable.

Sendai City is now being divided into 18 school districts and 6 branch districts.
It is, therefore, desirable on an ideal basis to have 24 case worker in all, supposing to put one case worker in each district, making Min Minsei-iin their helper.
But now 6 officials are available as case worker in our section as cleared in the aforementioned classification.

3. Function

It is ideal to assign case worker for all work required a solution on an individual basis.
However,
1) 4 of them (6) are to be called Family Case Worker who mainly handle livelihood assistance.

2) One of them is the case worker who mainly handle the matters regarding child welfare.

3) The other one is the case worker who mainly handle vagebond, sick traveller and such dead.

4) Of course, each of 6 case workers should be familier with the whole work, but their respective duty is being distinguished from others just for the sake of convenience.

4) Qualification desired.
I don't think their education and training of to-day is enough, but the following is my personal idea for the qualification.
a. Age: 30 years and above.
b. Married man and women.
c. More than 2 years experience in social work.
d. Person who pass the examination of qualification required.
e. Letting them take short training course (about 6 month's).

G. Matters relating to activities of J.R.C.

As a ring of Red Cross Organization, the Chapter and Iin-bu (or Committee Dep't.) are being placed respectively in Miyagi and Sendai, and Mayor is in the honorable position of chairman, so the fundamental Red Cross activities in this city shall be performed by Social Section of the city.
In consequence, we are engaging in various works such as securing new members, formation of Volunteer Service Group and so forth.

H. Matters relating to Community Chest Fund Drive.

Community Chest Fund Drive should essentially be conducted by civilian circles and the role of public body lies just in giving guidance and supervision.
As far as Campaign expenditure and people's old trust toward public body concerned, however, the public body can't help but getting a touch with the drive in the local level under the present social conditions.

DECLASSIFIED E. O. 12065 SECTION 3-402 / NNDG NO. 775013

DECLASSIFIED E. O. 12065 SECTION 3-402 / NNDG NO. 775013

A Study of The Reorganization which Aimed At
Perfect Operation of Social Work Administration
In Sendai City.
(Subject of the conference of M. G., Prefecture and
3 cities, held on Feb. 25)

1. The opinion, regarding the reorganization, which suggested to have under the chief of Social section certain numbers of officials who shall operate general administrative works such as section-budget, personal affairs, works & planning, survey, etc .... is considered to be accord with the situation of actual activities of the present organization which is consisting of 3 sub-sections, social affairs, relief, housing, under the section chief, and sub-section chiefs, in cooperating with the section chief, operate budget, personal affairs, works & planning, surevey of their respective sub-section.

2. Whether or not the suggestion which suggested to allote Sendai Administrative Area to officials of Social section and let them operate social work administrations of the alloted is actually effective, shall be decided after considering over the ratio between the loads of following 3 categories which include all administrative works (social works in its extended meaning) which so far Sendai Social Section is operating or supposed to operate.

(1) Works which can be alloted.
   A. Operation of D.L.S.L.
   B. Operation of G.W.L.
   C. Every consultations and operations which aimed at individual relief.

(2) Works which can not be alloted.
   A. Administrative works concerning vagabonds, waifs, sick travellers. (peoples who have no definite residence.)
   B. Administration of Red Cross, Community Chest.
   C. Appointment of Minse-iin and recommendation or other administrative and procedure works involved there-in.
   D. Registration of Foreign Nationals.
   E. Guidance & supervision on private social work agencies.
   F. Operation of goods distribution to repatriates and indigent persons. (Goods from Government or LARA goods which are directed to distribute at once)
   G. Administrative works concerning construction and maintenance of peoples' house.
   H. Administrative works concerning Disaster Relief.
   I. Administration concerning war-dead and measures for unrepatriates and the undemobilized.

DECLASSIFIED E. O. 12065 SECTION 3-402 / NNDG NO. 775013

The works from A to I can be considered as the administrative works concerning individual relief, but it can not, however, be alloted as the means to operate administration.

(3) Works which are the results of (I) and which can not be alloted.

Works of procedure from the decision to grant assistance until the recipient's receiption of assistance.

The ratio of loads of (I) to of (2,3) is 3 to 7 and by a simple reason that most of (2) were not existed in pre-war, you can easily see that such phenomenon and tendency are the characteristic of social work administration in post-war Japan.

Then, what relations are there between the above and the fact that, in small town or village, all welfare affairs are hundled by only 1 or 2 officials ?

It is just because there are none of (AGE), of (2), almost none of (D), very few of (DCFHI) in small town or village.

3. Divide Sendai administrative area into certain numbers of wards (several or scores wards) and allote the works of (1) of 2 to them in order to examine the shortcomings of the present Minsei-iin system, which is the ~~necessary~~ prerequisite to the decision and consideration on whether or not the way of social work administration is effective.

(1) Works of minse-iin are increasing in loads.
(2) Cases are requiring more scientific and technicla attitude of minsei-iin.
(3) General lowering of economic of Japanese livelihood is causing peoples who are qualified to be minsei-iin to have less spare time and to fall from econimically rich position, therefor, both spirits of voluntary service and persons of this spirits are decreasing
(4) Some of ~~whom~~ are desiring to become minsei-iin, have a political ambitions behind their desire. (Though they are not allowed to hold both, member of the assembly and minsei-iin, at the same time but to make the area as territory for his future candidcy.)
(5) The guiding spirit of minsei-iin has put its emphasis on warm-heartedness and benevolent enthusiasm hitherto, and therefor, relation between minsei-iin and recipient had easily become relation of feudalistic subject or relation between master and servant.

The above shortcomings are considered as indicating inevitable change of minsei-iin system to paied minsei-iin system, and in order to maintain the present system as the mean to operate administration, the followings have to be considered :

To grant some kind of honor to them.
To make special distribution of goods which are necessary in fulfilling their duties.
To make an effort to decrease their clerical burdens.

DECLASSIFIED E. O. 12065 SECTION 3-402 / NNDG NO. 775013

If the present minsei-iin system were revised, minsei-iins should be replaced with less number of profesional social workers and be remained as side-helper.

In this case, if the consederation were not made over character and qualification, training and adequate pay of social workers, the new system would be inferior than the present.

However, the above things shall be realized only through the revision of Laws and Regulations or by directives of Central Government.

4. Number of required persons and adaptability in case Sendai city decided to have profesional social workers.

One profesional worker is required, at minimum, for two elementary school area (population--20,000 No. of house--400, needy family--200 to 250) and in total 14 persons are required for Sendai city, and this number is the newmember to be added to Social section.

Regarding this, it is prereqisited to solve difficulties of finding emphasistic and good trained persons, and at the trainning, beside general cultures and techniques of social work, they will be trained to be democratic officials.

Furthermore, they shall not be transferred frequently in order to make them more familiar with their area.

5. Number of required person and adaptability in case allotement of area system were realiged with present organization and members. Because the realization of 4 is considered to be fifficult by financial and other various reason.

Minimize No. of officials who are in charge of (2) of 2, thus will make possible to put 4 officials for (1) of 2. In this case, officials, in charge of alloted area, shall make an actual servey on his responsi-able area, and also, launch into positive guidance on minsei-iin, therefore, public assistance shall be operated more properly.

But the extent and responsibility of function of officials and minsei-iins are even cleared to them, frictions and confrontations between two may esily break out, which will cause political problems (resignations, complaints, blames.....), even though Appeal Board like the one in Sendai city is avilable for such cases.

Special attention must be paied to this point.
