OPENING MEETING OF THE NORTH PACIFIC FAIRS. FALL MEETING, 1903, OF THE KING COUNTY FAIR ASSOCIATION SEATTLE, WASH.

AUGUST 8th TO 29th, INCLUSIVE ENTRIES TO ALL HARNESS STAKES AND PURSES CLOSE WEDNESDAY, JULY 15th

No. 1—THE NORTH PACIFIC STAKE, {For 2:17 Pacers } 3 to 5	\$1000	No. 9—THE PROFANITY HILL PURSE, {For 2:20 Pacers } 2 in 3	\$500
No. 2—THE M. & M. STAKE, {Purse Donated by the Business Men } of Seattle, for 2:20 Trotters, 3 to 5	1000	No. 10—THE SEATTLE KENNEL CLUB PURSE, {For 2:25 Pacers } 2 to 3	500
No. 3—THE JUVENILE STAKE, {For 3-year-old Pacers, owned and } bred in North Pacific Fair Association District, 2 in 3	500	No. 11—THE SEATTLE STAR PURSE, {For 2:30 Pacers } 2 in 3	500
No. 4—THE PIONEER STAKE, {For 3-year-old Trotters owned and } bred in North Pacific Fair Association District, 2 in 3	500	No. 12—THE SEATTLE TIMES PURSE, {For 2:12 Trotters } 2 in 3	500
No. 5—THE DEBUT STAKE, {For 2-year-old Pacers, owned and bred } in North Pacific Fair Association District, 2 to 3	300	No. 13—THE MEADOWS PURSE, {For 2:14 Trotters } 2 to 3	500
No. 6—THE PUGET SOUND STAKE, {For 2-year-old Trotters, owned and } bred in North Pacific Fair Association District, 2 to 3	300	No. 14—THE SHERIFF CUDIHEE PURSE, {For 2:17 Trotters } 2 to 3	500
No. 7—THE CITY COUNCIL PURSE, {For 2:10 Pacers } 2 in 3	500	No. 15—THE SEATTLE DRIVING CLUB PURSE, {For 2:22 Trotters } 2 to 3	500
No. 8—THE POST INTELLIGENCER PURSE, {For 2:15 Pacers } 2 in 3	500	No. 16—The ARGUS PURSE, {For 2:25 Trotter } 2 in 3	500
		No. 17—The COMMONWEALTH PURSE, {For 2:30 Trotters } 2 to 3	500
		No. 18—The MATINEE PURSE, {For 2:40 Trotters } 2 in 3	500

In Addition to the Harness Events Liberal Purses will be given for Runners.

CONDITIONS.

Entrance fees five per cent of Stake or Purse (and five per cent additional from money-winners), payable July 15th, when horse must be named.

Horses not winning a heat in four shall not start in fifth heat, except in a field of eight or more starters, and then it must win a heat in five or go to the barn. Horses so ruled out shall have a right to a share of the Stake according to their rank at the close of the last heat.

Right to transfer or substitute entry in any of the above Stakes open to August 1st to horses eligible July 15th

The Association reserves the right to declare off and return payments in any Stake or Purse that does not fill satisfactorily to the Association. Right reserved to declare two starters a walk-over when only two start they may contest for the entrance money paid in, to be divided seventy per cent to first, and thirty per cent to second horse. A horse distancing the field shall be entitled to first and fourth money only, and in no other case will a horse be entitled to more than one money.

Other than specified, rules of the National Trotting Association, of which this Association is a member, to govern, except bobbles are out barred on pacers three years old and upwards.

In addition to the above Special Purses will be offered for Overnight Closing Harness Events.

Any information pertaining to the meeting will be gladly furnished by the Secretary upon application.

Address all communications and inquiries to

Entry must plainly state name, color, sex and breeding of both sire and dam, with owners signature and address.

Two horses may be entered from the same stable in the same class and held but for one entry fee. No conditional entries will be considered.

Drivers must have colors and not fail to mention them when making entries.

Declaration of intention to withdraw a horse must be made by 7:00 P. M. on the day preceding race. The Association reserves the right to use its discretion as to unfavorable weather conditions.

Entry fees to accompany nominations and to be made payable to A. T. Van de Vanter, Secretary and General Manager King County Fair Association.

Applications for stabling must be made to the Secretary, stating the number of horses to arrive. In case of any subsequent change in the movements of the stable, or any part thereof, a prompt notice is earnestly requested. Horses should be shipped in care of King County Fair Association, Seattle.

Arrangements will then be made for their unloading at the race track.

Ample notice of the dates upon which these stakes and purses are to be decided will be given.

A. T. VAN DE VANTER, Secretary and General Manager

San Francisco, Saturday, July 4, 1903.

LOU DILLON seems to be able to furnish a sensational headline for the papers every time she starts and it need not surprise any of our readers if the telegraph flashes the news before October that she has equalled or beaten the record of Cresceus who now holds the championship with a mark of 2:02½ made against time while hitched to a hike. Last Monday her now owner Mr. C. K. G. Billings drove her a mile in 2:04½ hitched to a wagon, which is the world's record at that way of going. The first quarter was made in 31½ seconds, the second in 31½, the third 30½, and the fourth in 30½. The dispatches say the daughter of Sidney Dillon "finished strong and seemingly ready to cover the distance a second time." The fastest mile heretofore on record at the same way of going was 2:05½ made by Lord Derby at Brighton Beach last summer. The little chestnut mare was paced by a runner and he was kept ahead of her about five lengths until the three-quarter pole was reached when he was taken back and kept right alongside of her. She never made a skip or a bobble, but trotted as straight and as square as a die every foot of the way. Lou Dillon seems to be bent on disproving all the stories that have been told about her temper and cranky notions, and has evidently met in Mr. Billings a reinsman who has secured her entire confidence. That Lou Dillon has a temper of her own is fully attested by George Ramage, of the Santa Rosa Stock Farm, who broke her when she was two years old and developed her speed until he had driven her a mile in 2:19, and a half in 1:05½ and who often stated that he did not know how fast she could go because he had never asked her to show her best. In the fall of 1900 Mr. Ramage told the writer that he had a two year old filly by Sidney Dillon out of Lou Milton in his charge at the Santa Rosa Stock Farm that was "the only trotter in the world," and he still believes this description is no exaggeration as he is confident she will yet get the world's record. When Ramage first hitched her up she would throw herself and would not get up until the harness was stripped from her. After two or three experiences of this kind Mr. Ramage concluded he would cure her of the habit and the next time she did it he let her lie on her side for nearly an hour in the hot sun and did not attempt to coax her to get up. When she finally concluded to rise she got up and started off quietly and never after did she make any attempt to throw herself down. The next crank she took was refusing to stand while being hitched and Ramage finally resorted to the twitch to make her stand still. He used this four or five weeks, gradually holding her more loosely with it, and the last two or three times simply putting the stick against her nose until he found he could dispense with it altogether. She was badly mixed gaited at first and heavy shoes and toe weights were tried on her, but to no purpose. Then one day Ramage pulled them off and put a pair of light har plates on her and she struck a gait that surprised him. She was entered in the Stanford Stake of 1901, but contracted the distemper and was very sick so that she was not taken to Sacramento at all. Mr. Ramage handled her from the time he broke her in the spring she was two years old until December, 1901, and always claimed her to be the greatest piece of trotting machinery on earth. She was always a wilful little miss and one of the kind that required the greatest patience to get along with. It would have taken very little to have ruined her for life, but Mr. Ramage says that after she learned to trot she seemed to know nothing else and did not want to go at any other gait. Mr. Ramage has the distinction of having broken and trained her sire Sidney Dillon that he drove a trial mile in 2:22 and a half in 1:06, and also his two daughters Lou Dillon 2:04½ and Dolly Dillon 2:07.

A mare by Altamont, dam a Bayswater mare, is for sale. Apply at this office. She is sound and gentle and a good roadster.

AMONG THE VISITORS to the office of the BREEDER AND SPORTSMAN last week was Mr. D. J. Price, owner of the Australasian champion harness horse, Ribbonwood 2:09, an account of whose defeat of the former champion Fritz 2:13 has appeared in these columns. Mr. Price is accompanied on his visit to California by Mr. James Pettie, also a patron of the trotting turf. Both gentlemen are residents of Upper Ricarton, Canterbury, New Zealand, and came over for the purpose of purchasing a few well bred mares to breed to Ribbonwood. Mr. Price tells many interesting incidents of the great race wherein his little horse won the championship, and any American horseman who listens to his description of the New Zealand tracks will be compelled to admit that he has a great horse in Ribbonwood. The championship race was decided on a track that is five furlongs in circumference, on which the turns are not thrown up in the least but are perfectly flat. It is not a grass track as are many in the Antipodes, but is a soil course, very rough in comparison with good American trotting tracks. Messrs Price and Pettie visited Pleasanton last week and stated they had never seen such a perfect course to work harness horses over. They both agreed that it was at the very least eight seconds faster than the best track in New Zealand and were certain Ribbonwood could turn it in 2:04 or better. They would very much like to see some enterprising American come to New Zealand with either pacers or trotters with fast records and state that they will be willing to match Ribbonwood against them for almost any sum. They realize that outside of a match, however, there are few purses for horses with fast records in New Zealand or Australia unless they start in handicaps as nearly all the races between record horses there are on that plan. Mr. Price expresses the determination, however, to bring Ribbonwood here next winter after the New Zealand racing season is over, and if he reaches California all right will train the horse at Pleasanton and enter him in his class on the Grand Circuit in 1904. Nothing would excite more interest among horsemen than the appearance of the Australasian champion in races here, and after seeing our tracks his owner confidently believes that it will take horses that can pace in 2:02 or better to defeat him. Ribbonwood is only a four year old and was broke and trained by Mr. Price who purchased him when he was two. He states that he has repeatedly driven him quarters in 30 seconds very handily, and has never yet asked him to do his best. He states that Fritz was not himself on the day of the match having been affected by the trip on the water between Australia and New Zealand. Fritz showed a mile in 2:08 in his work two or three years ago and is a square trotter. There is not a particle of doubt but our friends in Kangaroo land have bred some good horses from the foundation stock sent from America.

TEN THOUSAND DOLLARS has been hung up in purses for the harness horses to contest for at the King County Fair, which opens at Seattle August 8th this year. Entries close Wednesday, July 15th, and the full list of purses will be found in our advertising columns to-day. Seattle is one of the great racing centres of the Pacific Coast, and the King County Fair Association is one of the most popular with racing men. Mr. A. T. Van De Vanter is Secretary and General Manager. Send him your entries if you want some of that ten thousand dollars.

Answers to Correspondents.

W. G. D. Los Angeles—Kindly give breeding of Morse Horse 6; had he any reputation as a producer? What is the breeding of Geo. M. Patchen Jr. 31?

Answer—Morse Horse 6 was a gray horse foaled 1834, got by European (McNitt Horse). Nothing is known of the blood of European, but he is described as a gray horse of elegant form, sixteen hands high and was purchased in Canada. He could trot very fast for his day. The dam of Morse Horse was Beck by Hambletonian 2 (Harris) that was by Bishop's Hambletonian, be by imp. Messenger. The second dam of Morse Horse was Mozza by Peacock, also a son of imp. Messenger. Morse Horse was the sire of but one in the standard list—Gray Eddy 2:30. His son, Gen. Taylor, holds the thirty mile record, 1:47:59 however, and his son Norman 25 sired two in the list, had four producing sons and fourteen producing daughters. Norman sired the dam of Norval 2:14½, one of Electioneer's greatest producing sons. The blood of the Morse Horse is considered very valuable in a trotting horse pedigree, as it denotes great stamina and staying qualities.

Geo. M. Patchen Jr. 31 was by Geo. M. Patchen 30. His dam was Belle by Top Bellfounder, a grandson of imp. Bellfounder, sire of Rysdyk's Hambletonian's dam. His grandam is given as "a Hoot-a-Laddie" mare.

Our Pictures.

The half tone engravings on the first page of the BREEDER & SPORTSMAN this week are from photographs taken for this paper at Pleasanton track last Saturday. The handsome filly by Boyfie Direct 2:05½ is a yearling, foaled March 8th, last year. She is owned by Mr. Chas. L. Griffith. Her dam is Petrina by Piedmont 2:17½, second dam the thoroughbred mare Miss Peyton by imported Glengarry. This filly is a trotter and before she was quite one year old trotted an eighth over the Pleasanton track in 21 seconds. She stood 14 hands, 2½ inches high last week. She is entered in \$65,500 worth of stakes in California and the East. The mare by James Madison is in Ben Chaboya's string. She is a magnificent large mare, a square trotter and a great prospect. She should make an ideal road mare, as her disposition is perfect and she looks well in harness. Her breeding is choice as her dam is Muriel Wiley by Steinway, second dam Clytie 2d (dam of Neerhut 2:12½) by Nutwood. The mare Norice by Chas. Derby is five years old. She is a pacer and is out of Naulahka by Balkan, son of Mambrino Wilkes. Mills & Sanders sold her and her mate, also by Chas. Derby, last week to Messrs. Price and Pettie of Canterbury, New Zealand. The mate is a trotter, but few can tell them apart when they are not in action. Both are entirely green, but make a slashing pair as they trot nicely together when not at speed. They will make valuable additions to the breeding ranks of New Zealand and will probably be bred to the champion Ribbonwood 2:09, owned by Mr. Price. They will be shipped to New Zealand in a week or so. The mare Perza by Allie Wilkes is owned by S. Christenson of this city. She is as near the perfect type of a broodmare both in conformation and breeding as one would wish to see. Her dam is Anglia (own sister to Patchen Wilkes, sire of Joe Patchen) by Geo. Wilkes, her second dam the great broodmare Kitty Patchen by Mambrino Patchen, her third dam another great broodmare Betty Brown also by Mambrino Patchen, and her fourth dam by Mambrino Chief 11. Perza has been bred to Bonnie Direct 2:05½ and the produce should have great beauty and speed if there is anything in breeding.

Harness Racing in 1903.

Some idea of the extent of the trotting horse game as it refers to racing, without any reference to matinees or contests on the road, may be gained from the following figures gleaned from the last Year Book: There were over 8000 horses that started in trotting and pacing races for money in 1903. Races were held over 860 different tracks. Over these tracks 1070 meetings were held.

Pleasanton will soon be ranked among the leading summer resorts of the State. Since it has been demonstrated by the management that the famous track there can be kept in good condition during the dry months as well as during the racing season, many more horses are kept in training during the summer and the pretty little town has an added interest. The Rose hotel has its new addition all completed and suites of rooms can now be had that compare favorably with those at first-class hotels in the metropolis. No better outing than a few weeks at Pleasanton can be devised. It is within an hour and half's ride of San Francisco by three different trains and is one of the most healthful spots in California. Messrs. Olney & Son, proprietors of the Rose hotel, will give full particulars and terms to all who correspond with them.

Kelly Briggs 2:10½ made his first start this year at the Valley Track, a half mile ring near Cleveland, Ohio. It was in the free for all pace for a purse of \$400. His competitors in the race were Capt. Sphinx 2:06½, Alvina Wilkes 2:10, Lennie Sears 2:14½ and Frank Rysdyk 2:08½, a pretty hot field. Capt. Sphinx and Kelly Briggs fought out the first heat and made a dead heat of it with Alvina Wilkes, the favorite a poor fourth. The American Sportsman describes the race as follows: "In the first heat Alvina Wilkes did not score good, acting badly and delaying the start several times. When they did get off the California pacer Kelly Briggs took the lead and held it until he made a little break in the back stretch, when the Sphinx horse took it and held it throughout the mile. The finish was a hot one between Capt. Sphinx and Kelly Briggs, and after a long deliberation the judges decided it a dead heat. To those in the grand stand who were watching the finish closely it looked like Capt. Sphinx was the winner of the heat. In the second heat the favorite showed her nose in front at the wire, and justified the faith of the talent by winning as she pleased." The summary of the race is as follows: Alvina Wilkes, 4-1-1-1; Capt. Sphinx, 0-2-2-5; Kelly Briggs, 0-3-3-2; Lennie Sears, 3-4-4-3; Frank Rysdyk 5-5-5-4. Time 2:15, 2:13½, 2:15, 2:17.

Rational Treatment of the Horse's Foot.

EDITOR BREEDER AND SPORTSMAN:—The most important fact in all lines of ownership of property of diverse nature, is whether or not it is worth having. If the answer is no, then let the owner dispose of it the sooner the better; if yes, then it is worth taking care of on the basis of economy.

Is a horse worth having? By close observation I find the majority of the populace of this God's country is kindly disposed to take care of horses the best they know how and actually do so, but there is one thing which is beyond doubt the most essential of all, and yet is sadly neglected, probably for the lack of know how, and that is the horse's feet.

The old adage is: "No foot no horse." The horse's foot is, as everybody knows or ought to know, the very essential part of the animal's anatomy. On the foot of the horse depends all the superstructure above it, and on the perfect symmetry and soundness of the horse's foot depends the graceful action of his limbs and body. The foot being the foundation, if good or bad, what it carries is affected accordingly.

In this country most horses are more or less afflicted with the time immemorial disorder known as the "narrow heel" which is the mother of all other possible evils as a consequence. Thersfrom the "narrow heel" in a horse's foot gives rise to indolence, deformity, corns, quarter crack, progressive atrophy, splints, quitters, side bones, founder, etc. Causing sore feet, but not lame, as horse men speak of a horse not having one sound foot under him, but because he does not limp in moving he is sound and guaranteed to be sound, so as to sell him, at a high price to the unwary intending purchaser.

The narrow heel, causes interfering, over-reaching, scalping, forging, cross-firing, (as termed by horse individuals, when he over-reaches his front foot with the hind foot from the opposite side in moving either slow or fast,) wabbling, stumbling, sprawling, hitching, short gait, springing of knees, swollen and howed tendons, knees knocking, abnormal and excessive knee action, and all other imaginable impediments in his motion, by restricting it to a certain extent.

There is a multitude of causes for narrow heels, but the most common and essential one is climatic influence, which is so trying on the horse's foot in this locality that nearly all of them are more or less affected by it. The next cause is the concussion caused by the pounding of the feet upon the hard pavement; the next in gravity but first in quantity is improper shoeing; the next again is neglect, for the want of "know how" in doing something to correct the causes above mentioned. The consequence is that the most noble of man's faithful servants, the horse, is allowed to go to ruin, and in a great many cases to the hone yard, because his usefulness is a thing of the past. He can not go any longer because his feet have been neglected. "No foot, no horse," as the old adage says. Narrow feet can be remedied; the only thing lacking is the know how and the will power to do the proper thing at the proper time.

The question asked as regards to what ought to be done is of daily occurrence, and the answer is invariably "to correct the cause," which is very easily done. In the first place, all good people know that a drop of prevention is worth a barrel of cure, therefore I say, do something to prevent the trouble, such as, for instance, keeping the horse's feet in a symmetric condition, so as to allow full circulation of blood in the vessels distributing the natural nutrition, consequently keeping it thrifty. Furthermore, get the feet properly pared once a month and give a reasonable amount of moisture. The above is sufficient for prevention.

But for the cure of the above mentioned disorders, directly or indirectly caused by the narrow heel and its consequent complications, it becomes necessary, not only essential but indispensable, to practice a surgical operation so as to cause the hoof to be more elastic and, consequently, to expand itself, having also the effect of causing an easier absorption of the after treatment, which consists of a reasonable amount of moisture. The expansion and absorption are never attained sufficiently to do much good if not preceded by the operation.

But the term "surgical operation" may create some distrust and, possibly, a repulsive impression upon the reader's mind unless he is made acquainted with the real nature of it, and here it follows:

The operation is performed upon the insensitive horny texture of the wall of the hoof, and consists of a thinning thereof in due proportion, governed by the amount of expansion required by the gravity of the case, and, if made by a skillful operator, causes no punishment whatever and no unsatisfactory after results, but on the contrary gives some immediate relief, which increases gradually until the foot is restored to its normal condition without laying up the animal and hiring another one to take his place at work. In fact, it does away with firing, nerving, seasoning, etc., etc., which, to say the least, is mal-treatment, not to say barbarism, besides being very expensive and unsatisfactory.

KEEN OBSERVER.

New Stock Farm in Arizona.

The heaviest purchaser at the recent sale of horses owned by the late Henry Pierce was Mr. J. C. Adams of Phoenix, Arizona, who paid a total of \$2125 for thirteen mares, as follows:

Oakley Russell, h m, 1888, by Happy Russell-Oakley by Orestes.
 Modjeska 2:32½, h m, 1886, by Ulster Chief-Puss by Skenandooah.
 Silver Eye, ch m, 1885, by Ahhotsford-Princess by Henry Williamson.
 Antonette, h f 1899, by Antone-Silver Eye.
 Yedral, h m, 1882, by Nutwood-Lady Patchen by Budd Dohle.
 Effie, h m, 1887, by Piedmont-Esther by Express.
 Nordica 2:19, gr m, 1892, by Advertiser-Sallie Benton by Gen. Benton.
 Princess McCarty, h m, 1891, by Dexter Pricee-Lady Fracture.
 Annie Dillon, ch f, 1900, by Sidney Dillon-Ceta by Piedmont.
 Captive, ch m, 1889, by Piedmont-Clariurso by Electioneer.
 Annie Godiva, h f, 1899, by Bay Rose-Diva by Piedmont.
 Willan, hr m, 1889, by Mamhrino Wilkes-Fancy by Bonner.
 Myrtdedale, ch m, 1896, by Iran Alto-Nettie Nutwood by Nutwood.

Several of these mares are producers and all are bred in producing lines. Mr. Adams owns the producing stallion Oh So 16738, record 2:25½ which he purchased a few months ago in Chicago. Oh So is described as a magnificent horse standing over 16 hands and weighing 1250 pounds, and is a horse show first prize winner. He is a producer, having sired Dunton Oh So 2:08, Lola Mix 2:10½, Augus Oh So 2:12½, Dr. Archibald 2:12, and eight more in the list. He is one of the best bred stallions in the United States as his pedigree shows: His sire is the great Nutwood, champion of all sires, and his dam So So 2:17½ (dam of Syra 2:12½ and four others with standard records) by Geo. Wilkes, second dam Little Ida by Edwin Forrest 49, third dam Ida May by Red Jacket, fourth dam Anna by Kinkead's St. Lawrence, fifth dam by imported Trustee. Mr. Adams has a farm in the famous Salt River Valley, not far from Phoenix where he has a fine herd of Jersey cattle in which he takes great pride, and will add to this a horse breeding farm that should be a paying investment. He has not paid large prices for any of his purchases, but has bought intelligently and selected good individuals that are bred in producing lines. His experiment at breeding trotters will not be a costly one to him, and with the fine climate for which the Salt River valley is noted, together with as fine feed as there is in the world and abundance of it, he should produce horses that will find a ready sale in the Eastern market.

Mr. Adams is an intelligent and successful business man who has great faith in the future of Phoenix and Arizona. He believes that the big irrigation project recently inaugurated there, on which the United States Government is spending about three million dollars for storage reservoirs, will soon make Phoenix a city of between 50,000 and 75,000 inhabitants. Mr. Adams has purchased several mares while here in addition to those he secured at the Pierce sale. We hope he may meet with success in his new venture and succeed in raising a champion or two before many years.

Slow, Careful Preparation.

The most successful trainers in this vicinity, those who go into winter quarters with the largest bank accounts to their credit year after year, are those who give their horses a slow, careful preparation early in the season, says the *Horse Breeder*. They may not figure prominently as winners early in the season, but go into winter quarters sound. They train on year after year and improve with age.

Many young horses and not a few older ones have been ruined for life by giving them a short, hurried preparation and racing them to their limit before they are properly fitted. If such horses do not give out or go badly gaited they often get the name of being quitters when they do not deserve it. A game horse can't race well unless he is properly fitted and in a perfect healthy condition.

Let a good, game horse once lose a race from whatever cause, and outsiders who have backed him will ever after about quitter. This brings to mind the remarks made by the veteran trainer Charles Marvin, in his work on "Training the Trotting Horse." These remarks were called out by comments of horse-men adverse to the courage and stamina of Manzanita (4), 2:16, the world's champion four-year-old trotter of her day, and are as follows:

"The close and logical observer will never jump at conclusions about the qualities of a race horse. You must see him not in one race but in several races, and you must know about his condition in his races before you can determine that a horse is faint-hearted.

The most resolute horse in the world will not trot resolutely if he be ailing, and he cannot trot resolutely if his physical machinery be out of repair. The gamest horse will stop if short of work, and if you do not know that he has had sufficient work, that he is not sore or sick, how are you going to know whether he stops from physical causes or from true quitting, which is a mental quality, cowardice, faint-heartedness."

The racing season is right at hand, in fact, has already opened. Those who have not given their horses a slow, careful preparation, and got them in perfect racing condition, are pretty sure to fall by the wayside early in the season, no matter how good the natural quality of the material of the horses that they are campaigning. It is too late now, for such of those as already have near engagements, to remedy the evil. There are country trainers, however, who are intending to race their horses at the local fall fairs whose chances for winning money and selling their horses for good prices may be greatly improved by following the example of those successful trainers who give their horses a slow, careful preparation.

Another Rational Theory for Breeding Trotters.

Recently there seems to be much discussion as to theories for breeding trotters. Most writers, however, agree that Hambletonian 10 is the principal source to which good sires trace in the male or sire line, but they also attach much importance to outcrosses, such as American Star, Clay, Pilot Jr., etc., in pedigrees of descendants of Hambletonian 10. Now, if it is true, as acknowledged, that Hambletonian 10 is the principal progenitor of the American trotter, and that he is prepotent principally through the sire or male line—that is, through his sons and grandsons—would not the following theory as to breeding be as rational as any yet offered:

The sire of the individual, male or female, and the dam and each of the grandams, as many generations back as possible, should trace in the male line to Hambletonian 10 through sires and grandsires, each of which have produced good performers and each of which have had sons or daughters to produce good performers. Also, get in the pedigree of both sire and dam as many other crosses of Hambletonian 10 as can be obtained, especially those tracing to him through descendants of his sons. In other words, the individual would be bred about as follows: *The sire, the first dam, the second, third, fourth and fifth dams, as many generations back as possible, would trace in the sire line, through only producing sires and grandsires for each generation to Hambletonian 10.*

It appears to the writer that a sire bred in this way, mated to a dam bred in about the same way, would not only get great performers but also great producers. The offspring resulting from the mating of such bred sire and dam would represent such a confluence and concentration of the best producing forces, handed down from Hambletonian 10 through sire lines, as would give an irresistible momentum of superior producing qualities for succeeding generations.

THEORIST.

To Drive Flies Away.

A French chemist has discovered a way to protect horses from flies. His invention consists in rubbing the horses, especially the parts most subjected to attack, with a little concentrated oil of taural. There is not the slightest danger in its use, and the cost is small. Another excellent remedy is asafetida one pound, vinegar half pint, water one pint. If horses are well washed with this, not a fly will settle upon them, as the asafetida will drive them away. This drug has no deleterious qualities as an external application. Take common smartweed and make a strong decoction by boiling in water. When the infusion is cold, apply to the legs, neck and other parts of the body with a brush or sponge. Neither flies nor insects will trouble them for twenty-four hours.

Must Have Taroleum.

BRATTLEBORO, VT., June 17, 1902.
 W. F. Young, Springfield, Mass.
 Dear Sir:—Will you please send me up two cans of Taroleum by express. I find I cannot get along without it.
 J. G. BAKER.

Taroleum \$2 per gallon, express prepaid. Address
 W. F. YOUNG, P. O. D. F., Springfield, Mass.

The Kenney Bicycle Co., 531 Valencia St., is doing a big business in the McMurray Carts and Sulkies. You not only save money by purchasing a McMurray but get the most durable, best made, and easiest running cart or sulky in the market. Investigation will convince a Missourian.

A match race between Prince Alert 2:00, and Anaconda 2:01½, is in the range of probabilities for the Grand Circuit meeting at the Empire City track.

Jackson's Napa Soda does not tangle the feet.

Denver Meeting.

A very successful meeting is being held at Overland Park, Denver. The racing has been interesting and fast and the association deserves much credit for the way it has managed affairs. Our report last week closed with a report of the first two days' racing—Saturday and Monday, June 20th and 22d.

TUESDAY, JUNE 23.

The 2:08 pace brought out a field of four. In the first heat Harry Logan, the California horse, racing head and head with Winfield Stratton from wire to wire, forced the latter to step in 2:07½ in order to land the heat. This is the fastest heat paced so far this season. In the second heat Logan forced Stratton out on the upper turn, allowing Lottie Smart and Miss Williams to come through on the rail, the latter winning the heat.

When the drivers got back to the stand there was much bad blood between them and at one time it looked as if a referee's services would be necessary. Matters reached a climax in the last heat, when McGuire sent Stratton along so fast the California horse was shut out.

This action on the part of McGuire was roundly condemned by the other drivers on the track, and when McGuire returned to the stables Cassidy denounced him in terms more emphatic than elegant. The association, however, realizing the grand struggle Harry Logan had made, handed him third money regardless of the "shut out." This action on the part of the association made it many friends among the drivers. The summary:

Pacing, 2:08 class, purse \$500.

Winfield Stratton, b. h. by Saraway..... (McGuire)	1	2	1	1
Miss Williams..... (Bush)	4	1	2	2
Harry Logan, ob. g..... (Boucher)	2	3	3	ds
Lottie Smart, cb. m..... (Loomis)	3	4	dr	

Time—2:07½, 2:10¼, 2:13¾, 2:11.

In the 2:35 trot there was nothing to it but the big gray Jim Ferry, who won in straight heats "on the bit." At no time was there any contester in the race that could force him to top speed. The interest in the race centered in the struggle between Congressman Sibley and Gitaway for second and third money. Much was expected of the latter, as he came from California touted as a wonder. His backers, however, had the keen satisfaction of seeing their money burned up. The summary:

2:35 trot, purse \$500.

Jim Ferry, g. g. by Orange Wilkes..... (Frank)	1	1	1
Congressman Sibley, b. b..... (Colburn)	3	2	2
Gitaway, cb. g..... (Zibble)	2	3	4
Queen Sign, b. m..... (Dillon)	4	4	3

Time—2:19¼, 2:20¾, 2:21¼.

WEDNESDAY, JUNE 24.

The first race, a free-for-all pace to wagon, one mile heats, best two in three, proved an easy victory for Jess C., owned by R. S. Gutshall. This was the first of two races in which the horses were driven by gentlemen drivers. The first heat was won by Martha B., driven by J. W. Miller; Agnes Le May, the bay mare owned and driven by Edwin Gaylord, finishing second, and Daisy Field third. Jess C., the favorite, was last. The next two heats were won by Jess C. with ease, with Daisy Field second in both heats. In the last heat Agnes Le May was drawn on account of sickness. That she was not in condition was shown in the second heat, when, after a poor race, she finished last.

Free-for-all pace to wagon, prize, one-mile heats, best two in three.

Jess C., ob. g. by Catata.....	5	1	1
Martha B., b. m. by Ashland Wilkes.....	1	4	2
Daisy Field, o. m.....	3	2	5
Dora Delpha, b. m.....	4	3	3
Agnes Le May, b. m.....	2	5	d

Time—2:12¾, 2:15¾, 2:16.

The free-for-all trot to wagon, one mile heats, best two in three, was the second event on the card. But two heats were required to decide the winner of this race as Silver Sign, the favorite, had everything his own way. The famous hay horse, owned by Judge E. A. Colburn, was in excellent form and never showed up to better advantage. But three horses were entered in this race, as Prince L., the gelding bought by George Estabrook in California last winter, was withdrawn. Second money was divided between H. H. and Nancy King.

Free-for-all trot to wagon, prize, one mile heats, best two in three.

Silver Sign, b. b. by Silver Thorn.....	1	1
H. H. H., a. m.....	3	2
Nancy King, bl. m.....	2	3

Time—2:18¼, 2:18¾.

THURSDAY, JUNE 25.

The only harness race on the program was the 2:14 trot. Gold Dust Maid was installed the favorite for this event chiefly on the showing she made previous to her Denver appearance. Just why the talent "fell to her" is one of those inexplicable things that occur on a race track almost daily. It was thought that Loomis was not driving her at top speed, but that good reinsman, when called into the stand, soon convinced the judges that the Silver Thorn mare had trotted a heat faster than ever before.

Notwithstanding that Tom Smith was the proven

"class" of the race, the "wise uns" again went to Gold Dust Maid with a vengeance, only to see her trailing her field in the next heat, which went to Tom Smith. The third heat witnessed Will Lane receive "the flag" after putting first heat to his credit. Tom Smith won the next heat and race, although Loomis forced Zibble to drive for the same and made a close finish of the race. The summary:

2:14 trot, mile heats, best three in five, purse \$500.

Tom Smith, br. b.....	3	1	1	1
Gold Dust Maid, blk. m.....	2	4	3	2
Ed Winslip, b. g.....	4	2	5	3
Will Lane, br. g. by Wilmarob.....	1	3	ds	

Time—2:15¼, 2:15¾, 2:17¼, 2:14¼.

FRIDAY, JUNE 26.

Under the hottest sun that has shone on Overland Park this year six races were conducted Friday in creditable time. It was a day that made the horses' coats shine. The finishes were close, and man and beast went back to the paddock tired.

Interest in the early part of the day centered around the 2:40 pace. At the end of the fifth heat no horse, owing to the jockeying of Raven Dixon's driver, had made three wins, and a sixth was paced between Raven Dixon, Joe Younger and Amble W. They finished in the order named. Amble W. had been favorite during the first of the race. In the third heat Raven Dixon was chosen, he having had some friends all the time. But Johnson seldom tries until the third heat.

Johnson, Dixon's driver, took a sixth place in the first, a fifth in the second heat. Having undoubtedly the best pacer in the field his taking first in the third, when the time was ripe to begin winning, was no surprise. Johnson was fined upon winning the third heat, which showed that he had undoubtedly had the best horse all the time.

A hit of surprise was furnished by Joe Younger, who won the fifth handily after trailing in the earlier heats. His time in this heat was 2:18½, only a second slower than Raven Dixon's performance in the final.

Pacing, 2:40 class, purse \$500.

Raven Dixon, b. b. by George Dixon..... (Johnson)	6	5	1	1	4	1
Amble W., b. m. by Alta Boy..... (Busb)	1	1	4	6	2	3
Joe Younger, bl. b. by Joe Young..... (Dillon)	3	7	6	5	1	2

Time—2:14¼, 2:15¼, 2:14¼, 2:18¾, 2:17¼.

List of entries in the 2:27 pace was reduced to four, Congressman Sibley and Evadne being scratched. Tout, the favorite, won all three heats. Red Fairy and Lady in Gray, second choice at 5 to 1, fought it out for second place, Lady in Gray crossing first. Susie R. got fourth money. The summary:

Trotting, 2:27 class, purse \$500.

The Tout, bl. g. by McKinney..... (Busb)	1	1	1
Lady in Gray, g. m. by Judge Toler..... (Colburn)	2	3	3
Red Fairy, b. m. by Red Gameleon..... (Raybold)	3	2	4
Susie R., bl. m. by Allie Wilkes..... (MacDermid)	4	4	2

Time—2:24¼, 2:24¼, 2:25¼.

SATURDAY, JUNE 27.

The crowd at Overland Park on Saturday was fully as large as on Derby Day, a week previous, eight thousand people passing through the gates. Betting was heavier than on any previous day, and on the fifth race, which was a six-furlong selling affair, the books refused to take bets of less than \$5. There was but one harness race during the afternoon, which was the 2:15 pace for a purse of \$1000. There were ten starters and six heats were required to decide it. The race was won by Stipulator, a horse sired by Titus (own brother to Direct 2:05½) out of Grace Kaiser, the dam of Coney 2:02, etc. While Stipulator did not win the fastest heat in the race, that going to Laura Spuhr in 2:09½, he outgamed his field and lowered his record to 2:13½ in the third heat. Laura Spuhr was the favorite, and there was a heavy play on more than half the starters. The summary of the race follows:

Pacing, 2:15 class, purse \$1000.

Stipulator, blk. s. by Titus.....	6	3	1	3	1
Laura Spuhr, cb. m. by William C. P.....	1	6	2	7	2
Martha B., b. m. by Ashland Wilkes.....	3	5	2	1	2
Jess C., Gayfield, Exodus, Darkaway, Lulu M., Seiden Wilkes and Christobal also started.					

Time—2:11¼, 2:09¾, 2:13¾, 2:12¾, 2:14¼, 2:16¼.

Caustic Balsam Cured Fistula, Poll Evil and Spavin.

MOWERSVILLE, PA., July 4, 1902
 The Lawrence-Williams Co., Cleveland, O.
 I have been using Gombault's Caustic Balsam for a number of years past, treating fistula and poll-evil. Have cured quite a number of horses. Some six years ago cured an old mare of spavin that was so lame she went hopping along with the spavied foot scarcely touching the ground. Had begun to tinker her leg was broken, but I applied Caustic Balsam as per directions in pamphlet, and after one or two weeks' treatment she became sound and well again, and has remained so ever since.

A. W. BRECHTEL.

H. B. Gentry, Gentry Stock Farm, Bloomington, Illinois, reports that McKinney has turned off mares so successfully this season with a single service that he is pretty well through with his hooking. As it is Mr. Gentry could have, with perfect safety, accepted a few more mares.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

Colic in a Horse.

Indigestion assumes one of two forms, either acute or chronic. In the acute form it is one of the most fatal diseases to which the horse is subject, as in nearly every instance the victim will die unless immediate and intelligent treatment is given. A number of causes may produce this condition, chief among which are feeding an extra amount of grain before a long, hard drive, heavy feeding after a prolonged fast, speedy driving with full stomach, or getting loose and having access to the grain bin, overloading its stomach. The symptoms evinced will vary somewhat in the beginning of an attack, but as the disease progresses the symptoms displayed in all cases bear marked similarity. At first the horse may appear to lag if being driven, will appear dull, there will be a full appearance of the flanks and the patient begins to perspire more frequently than usual. If stopped it will in a short time become restless, will paw or try to lie down. If taken out of the harness, in a short time the symptoms become aggravated. The abdomen becomes distended with gas, there is belching up through the gullet, the latter being a distinguishing symptom, for in almost every case this belching of gas, frequently accompanied with more or less of the contents of the stomach discharged through the nostrils will take place.

Two things are very likely to cause death suddenly in acute indigestion—rupture of the stomach from over-distension, or suffocation from the accumulation of gas in the intestines interfering with respiration. Treatment in all cases of colic must be prompt and energetic. If possible administer a physic the first thing to aid in emptying the stomach. A ball or capsule containing from six to eight drams of aloes is best owing to the fact that it is not bulky and will take up but little space in an already over-distended stomach. If, however, this cannot be procured, give from one pint to one quart of raw linseed oil as a drench. Follow the physic with some antacid, such as baking soda two to four ounces, salicylate of soda, hyposulphite of soda or charcoal in about one ounce doses, or chloride of lime or carbonate of ammonia in half ounce doses. Many practitioners add from two to four ounces of cayenne pepper, with the idea that it tends to contract the stomach. Injections of half an ounce of turpentine, combined with six or eight ounces of raw linseed oil, will do good and the patient should be placed in quarters where it is not likely to injure itself by tumbling around or falling down. As in flatulent colic the use of the trocar is often the means of affording quick relief by relieving the bowels of gas.

It is always well to call a veterinarian as soon as possible, as he is the one most competent to cope with an attack of this kind and the only one in fact that should undertake the operation of puncturing the horse. To relieve the intense pain an ounce of chloral hydrate dissolved in water can often be given with advantage and in all cases avoid the foolish practice of forcing the poor suffering animal to walk or trot around, with the idea that by so doing it will obtain relief, for as a general thing it becomes exhausted all too soon. In chronic indigestion a variety of symptoms are often present. The seat of trouble and causes vary in different horses and even in the same one at different times. Among the causes of this form are decayed or faulty teeth, bolting of the food, poor quality of food or an improper quantity, derangement of stomach and bowels from any cause, etc. The characteristic symptoms of chronic indigestion are irregular appetite, refusing all food at times and again eating too much. There is frequently a disposition on the part of the horse to eat dirt, wood, plaster off the walls or manure, the coat is rough or staring, bowels costive, droppings smell bad, or bowels loose, with frequent passage of sour smelling gas, loss of flesh and hidebound appearance.

In treating, the teeth should in all cases be first examined and all irregularities rectified. This, in conjunction with good food and regular exercise, will be all that is necessary if the teeth are the direct cause. If not, other treatment should be given. If due to bolting food, spread grain out over large surface when fed, or mix sufficient dry bran to prevent bolting. Give a physic of one ounce of aloes or a pint of raw oil and follow with some tonic, such as the following: Gentian, ginger and bicarbonate of soda, of each one ounce; nux vomica, half an ounce; mix and give dessertspoonful night and morning in food. A tablespoonful of hyposulphite of soda once a day in food will do much to sweeten the stomach and stop the formation of gas. Indigestion is often due to the presence of worms in the stomach or intestines. The purgative, however, will do much toward aiding their removal. The digestive apparatus is often deranged by improper feeding, either too much, too little or keeping the animal too long on one diet. The horse has a small stomach and will thrive if fed often and not allowed too much at one time.

Notes and News.

Lou Dillon 2:04½.

She will heat Alix's record soon.

John Phipps has taken Dsl Oro and several other horses to the San Joss track.

The Petaluma meeting will be the best trotting meeting of the year in California.

Bankers Daughter 2:13½ worked a mile in 2:18½ at Pleasanton last Saturday without the hoppers.

The next sale of horses belonging to the estate of Henry Pierce will probably be held at Santa Rosa.

The attendance has been good at Denver, as many as eight thousand people being on the grounds in one day.

Major Dslmar, 2:05½, has been a mile in 2:14½, last half in 1:05, for Alta McDonald, at Albany, New York.

Ray Dsl Diahlo has been unlucky at Denver. He won two heats in the 2:23 pace last Monday, but failed to win the race.

Budd Doble has taken a nomination for Kinney Lou in the Pennsylvania \$6000 stake for trotters eligible to the 2:12 class.

El Diablo 2:11½, Kelly Briggs 2:10 and Robert I. 2:10 will represent California in the 2:10 pacing classes over East this year.

John A. McKerron 2:05½, The Monk 2:05½, Lou Dillon 2:06½, and Anzella, 2:06½, ought to be able to defend the Cleveland Challenge Cup this summer.

Clipper worked a nice mile at Pleasanton last Saturday in a shade under 2:10 and from the way he finished it looks as if he might lower his record this year.

Experience has shown where many horses inclined to break when pushed are kept at their gait better by a sulky which is a trifle weighty than by an extremely light one.

Idylwild, the hay trotting mare by McKinny that W. G. Durfee is training at Los Angeles, trotted an eighth last week in 15 seconds, according to a Los Angeles report.

Ed Geers is quoted as saying that he thinks that Prince of Orange 2:07½ will be able to heat both Lord Derby 2:05½, and Major Dslmar, 2:05½, before the season is half over.

Searlight's season is about ended. There are very few mares in his paddock that are not ready to send home. About 75 mares were hooked to Searlight this season.

Robert I. 2:10 (p) left Agricultural Park last week for Cincinnati in charge of trainer William Jukian, where he will be entered in the great \$2000 pace. He will follow the Grand Circuit.

The eastern mare Miss Georgie that is entered in the Chamber of Commerce Stake at Detroit is by the California bred stallion Regal Wilkes 2:11½. She has worked a mile this year in 2:11.

The two-year-old pacer by Altivo in James Thompson's string at Pleasanton worked a nice mile in 2:25 last Saturday with the last half in 1:10. He was not driven at any portion of the mile.

T. H. Griffin has shipped a part of his stable from the Lexington, Ky., track to Detroit, where he will race Prince Selma and Black Bart. They will be driven in their races by Bitley McLaughlin.

The Woodland people are still engaged in trying to raise a fund to assure the success of a good fair and race meeting this year, and although the outlook is good no announcements have been made so far.

Mills & Sanders are having success with their training stable at Pleasanton. They make a specialty of buying, training and selling horses, and have made a number of good trades since they began business.

The match between A. Ottinger's trotter Zambrá 2:16½ and B. Croner's pacing mare Banker's Daughter 2:14½ is off. The man who proposed the match and offered to back the mare failed to put up the coin.

Columbia, McDowell and Creighton, of Manitou, Colo., own a three-legged colt that was foaled on the Frizzell ranch. The foreleg is on the left side in the natural position, and the youngster gets about quite lively.

Billy Red, the pacer that Mr. J. R. Springer purchased from Mose Hart is improving right along. He has already worked a mile in 2:12½ and is capable of a mile in 2:10 or better. Mr. Springer is much pleased with him.

M. E. Sturges is well pleased with the way his horses, Prince Direct 2:07 and Baron de Shay 2:08½, are working for M. E. McHenry at the Cleveland track and hopes to pull off some good races down the line this summer.

John B. Sage, secretary of the Buffalo Driving Club, is not seriously ill, has not retired from the secretaryship, and Mr. E. J. Tranter is only assisting Secretary Sage temporarily. So writes Mr. Tranter, and he ought to know.

A consignment of Hungarian ponies from Mr. A. W. Foster's Hopland farm has been sent to the Occidental Horse Exchange in this city for private sale. They are a very handsome lot of little fellows and are ideal ponies for children.

Owner Ronan of the Pleasanton track, was in the city last week purchasing lumber with which to construct twenty-eight new fox stalls at the track. The demand for stalls at this famous track last winter was greater than the supply.

John P. Ray of Hsmlock Laks, who has for many years been at work to secure the true breeding of George Wilkes' dam, Dolly Spanker, believes he now has indisputable evidence that that great mare was sired by Mambrino Paymaster.

Little Branch, the three year old filly by Nutwood Wilkes out of a mare by Long Branch is one of the most promising youngsters at the Pleasanton track. She is owned by Martin Carter and is entered in the three year old trot at the Breeders Petaluma meeting.

The Memphis meeting, October 20th to 23rd, will afford every horse entered two to four chances to start for the money. At least two dash races will be given every day, and a full card of two in three events for all classes, including two and three year old trotters.

E. H. Harriman, owner of Stamhoul 2:07½ for the best years of that great horse's life, has purchased the new mile track at Goshen, N. Y., and it is believed he will continue to underwrite the meetings which have hitherto been held in that town but on the old half-mile course.

A very clever exhibition of early speed was given the other day on the Empires City track by a seven months old colt by Direct, owned by Mr. Stelnway. John Daly, who has just broken the youngster, allowed him to step a quarter of a mile in 53 seconds, the last eighth in 24 seconds.

Albert H. Merrill, Danvers, Mass., the noted Eastern starting judge, pledges \$100 extra to each of the drivers of the winners of first money in both divisions of the Western Horseman's \$6000 no-entry-fee futurity for foals of 1904. Mr. Merrill is absolutely responsible, and there are "no strings" to his added money.

R. E. Davis, who wintered his stable at Columbia, S. C., has shipped five head to the Empire track to be used by their different owners in the matinees which will be given during the summer by the New York Driving Club. They are Consy 2:02, Chain Shot 2:06½, A. J. D. 2:09½, Plumline 2:12½ and Richard B. 2:21½.

J. C. Quinn of Honolulu, who bought Waldo J. 2:08 three years ago through this office, writes that he sold the gray ghost about nine months since. Mr. Quinn raced him two seasons and never lost a heat or a race. The new owner has had poor luck with the horse however, and has never started him in a race.

Irish, the colt by Monterey 2:09½ that is causing so much talk over East, is out of Juliet D. 2:13½ by McKinney. The next dam is by Creighton, a son of imported Glencoe and the next by Hock Hocking. Irish was a trotter as a two-year-old, but has been shifted to the paces and recently showed a mile in 2:15 at that gait.

The two year old colt by Mendocino out of Coralie by Boodle that Monroe Salisbury purchased for James Butler at Palo Alto sale at Fred H. Chase & Co.'s salesyard in this city January 29th, is being entered in two year old stakes over East under the name California Cresceus, which Mr. Salisbury selected for him.

Some time ago a Michigan veterinarian guaranteed to cure the fast trotter Country Jay of his lameness or get no pay. If he succeeded he was to have \$500. The gelding was placed in his care, but the practitioner failed to get results and Country Jay has been turned out to grass, his lameness making him of no account as a race horse or as a roadster.

A special meeting of the Pacific District Board of Appeals of the National Trotting Association will be held at the office of the Secretary, 36 Geary street, San Francisco, Cal., at 2 o'clock p. m. on Wednesday, July 15, 1903. All communications intended for consideration of this Board at this meeting must be forwarded to the Secretary not later than July 1st.

The classes provided by the California State Agricultural Society for harness races this year will be about as follows: For trotters, the 2:30, 2:24, 2:17, 2:15, 2:11 and a two mile race for the 2:24 class. For pacers, Green class, 2:20, 2:17, 2:13, free-for-all, and three year olds. These, with the Stanford and Occident Stakes will give two races each day for harness horses.

Ed Geers received the following recently from a Nebraska horseman. "I understand that you have hiked sulky to hurn. That being so I wish you would send me one. I have a horse with a mark of 2:13, made to a clumsy old sulky, and I think that with a hike he could lower this figure to 2:08. If you would send me a hike sulky, perhaps I could win enough money with it that by fall I might pay you. You needn't send me a new sulky, an old one will do."

Two weeks ago Brook Curry, Lexington, Ky., sold a lot of yearlings in Philadelphia, the youngsters being mostly the progeny of Silent Brook, 2:16½, Directman, son of Directum 2:05½, and Baron Oakland, son of Oakland Baron 2:09½. The prices realized were fair for the age of the stock offered. The best figure paid was \$300 and quite a number of the colts sold between that and \$200.

James Butler's East View Farm stable opened the campaign at Mineola, L. I., last week and carried off more than its share of the money. The first day the mare Tohscco, by Direct, won second money in the 2:25 class for pacers, and the following day Lady Direct won the 2:30 paces, Hettie G. 2:05½ the free-for-all pace, and Intact 2:19½ the 2:20 trot. Thomas Murphy is doing the race driving for the stable.

Just to show that prices in California are about the same as those obtained all over this country we print the following item from an Illinois paper: "At a sale of trotting stock held by H. J. Merhold at Greenview, Ill., June 3rd, some forty head, mainly youngsters, were sold at an average price of \$150. The top price was \$325 for a young stallion by Grand Baron 2:12½, son of Baron Wilkes 2:18, dam Gustine 2:29½, by Allerton 2:09½."

Alan-a-Dale, the four-year-old chestnut colt by Halma out of Studie McNairy by Enquirer, ran one mile at Washington Park, Chicago, last Wednesday in 1:37½, a new world's record for a circular track. Halma is a son of Hanover and is owned by Mr. Vanderhill, who sent him to his breeding farm in France in July, 1901. Alan-a-Dale carried 110 pounds in his record-breaking performance and defeated the great three-year-old Savahle, that carried 100, by three-quarters of a length.

Several California bred horses are being worked at the Wheaton, Illinois, track. The three year old colt Irish by Monterey 2:09½ has been a mile there in 2:15, last quarter in 32 seconds, and is considered a rare good one. Dan W. 2:17½, the roan gelding that J. R. Alhertson of Fresno campaigned here in 1901, is at Wheaton and worked a handy mile in 2:15 lately. Two two year old fillies by Falrose that Det Bigslov bought for an Illinois man and shipped over there last winter, are showing up well and promise to get standard records when started.

Tom Smith 2:14½ by McKinney won again at Denver last Tuesday, taking his race in straight heats. This horse has doubtless fallen in good hands and Mr. Zihle should have the credit of his excellent showing since he took charge of him, and his owner, Prof. E. P. Heald of this city, is to be congratulated. Tom Smith is out of Daisy S. by McDonald Chief (that is also the dam of Little Mac 2:27½ and Sweet Rose 2:28½) and his grandam Fanny Ross (dam of Columbus I. 2:17 and George Washington 2:16½) by Ethan Allen Jr. 2:09. Tom Smith is a good individual, a square gaited trotter and should make a high class sire. A record of 2:10 is not beyond his reach when he is just right.

John E. Madden, the famous running horseman, whose early associations were those of the harness turf, has notified John Splan to attend to all the wants and needs of the great driver, Orrin Hickok, now in an insane ward in a Cleveland sanitarium, and send the hills for same to him. Hickok is said to be in the most pitiable condition. At times in a vague way he fights the old battles of the turf over again, but his remembrance of the great horses he has driven is now very slight. His physicians say his mind is completely wrecked and he will never fully recover his reason. Still, with all his affliction, he eats well and sleeps naturally, and may yet live for years.—Trotter and Pacer.

The accidents which befell the well-known Texas trainer, Willis O. Foote, and his partner, J. L. Dodge, at St. Louis, Missouri, the other day was more serious than first reported in the papers. Mr. Dodge was killed outright, while Foote was crushed about the feet and lower limbs besides receiving abrasions about the head and perhaps internal injuries. The great trotter Rilma 2:09½, winner of the Transylvania and several other big trotting stakes, was fatally injured and Nutbearer 2:09½ besides several other fast trotters and pacers were so badly damaged as to have to be killed. The list included W. O. Foote, Lew Vaughn 2:09½, Vanity S. 2:17½, Hall Fry 2:18½, Gov. McCauley, Rilma Strong, Princepsita and a matched team worth \$10,000.

Geo. Ramage, who handled the horses in the ring at the sale of the Henry Pierce horses last week, and who has been with that breeding farm for eleven years, states that the filly Clara Oakley and the gelding Arandale, two and three years old respectively, were the choice animals of the sale. They are full brother and sister and were purchased by Messrs. Geary & Grindell of Haywards, who have engaged Mr. Ramage to train them. They are by Sidney Dillon (sire of Lou Dillon 2:04½ and Dolly Dillon 2:07) out of Oakley Russell by Happy Russell 2:21½, second dam by Orestes 1920, third dam by Henry Clay Jr. Happy Russell was by Mambrino Russell out of Odd Stocking by Happy Medium, next dam by American Star. Mambrino Russell was by Woodford Mambrino out of Miss Russell, the dam of Maud S. 2:08½, Nutwood and others. Orestes 1920 was by Cassius M. Clay Jr. 22, dam Princess by Mambrino Patchen, second dam by Mambrino Chief 11, third dam by Rodolph. Mr. Ramage rightfully considers Oakley Russell one of the best bred mares in America. She carries the blood that produced Alix 2:03½, Nancy Hanks 2:04, Kremlin 2:07½ and many other record breakers. A filly of hers by Bay Rose was the fastest green mare ever seen at the Santa Rosa Stock Farm, but was frightened by a runaway horse one day and ever after was afraid of any vehicle. Mr. Ramage thinks both her foals by Sidney Dillon should get low records at the trot.

What is an Unavoidable Accident?

Every season there are a number of cases in races where something occurs that causes some one of the starters in a race to pull up and not go the mile, and then ask the judges to let them start again in the next heat. Sometimes it is due to an accident that just misses being a really bad one, in which the driver who pulls up might have been seriously hurt, and sometimes, more often in fact, it is some case in which the driver decides not to take any chances, but relies on the plea of accident to give him the privilege to start agalo.

In nine cases out of ten there is no real chance of the horse that has been pulled up being allowed to start again if the judges follow the rules, but drivers fancy that because they "break down" from any cause, it must always be termed an "unavoidable accident." The rules certainly give the judges plenty of leeway in the matter of deciding whether an accident is unavoidable or otherwise, but it is a risky thing for a driver to try to figure out for himself in about ten seconds whether his own particular case can come under the head of the unavoidable class or not, and the best way is to try to go the mile, even if shut out a block or a dozen blocks, and take a chance that a little talk will satisfy the judges that the accident was unavoidable in a measure, and that in the case in point distance can be waived.

Actually the only cases in which the plea of unavoidable accident is permissible are those in which some one gets into difficulties through the carelessness or negligence of some one else. Unavoidable accident is only another name for unintentional foul, and the interference has to be caused by some one else in the race or be due to some action of some other driver or horse in the race before the injured party can put in any claim for the privilege to start again.

Broken harness, busted hoppers, a punctured tire, a locked wheel or any other such damage to that particular horse's harness or sulky, that is not caused by some collision with some other horse or with the fence, owing to being crowded into it by some other horse, cannot come under the unavoidable class, and the sufferer cannot start again under the rules if properly enforced. If in any heat there is unavoidable crowding, owing to the track being narrower in width at one point than another, there may be cause for claiming the privilege to start again on account of an unavoidable accident, and to illustrate this point I will quote a case in which I had personal experience, but which luckily did not result in any one having to claim the privilege above mentioned.

It was at a track where seven could score abreast, and where the first turn was so close to the wire that you had no sooner got the word than you were in the turn, and this was so much narrower than the stretch itself that six horses filled it from fence to fence without an inch of waste space. But to make matters worse, as you rounded into the back stretch it became a matter of scientific driving for five horses to travel alongside of each other without "rubbing wheels." Now with such a field as I had the pleasure of traveling with, fourteen starters, on such a track, it was pretty much of a guess whether the bunch would get around to the quarter pole without some one getting pinched, and if a wheel had been hit and put out of business around the first turn, I think it would not be stretching it a very great deal to call it an unavoidable accident.

As it happened in that particular race there was no one who got into any difficulty in that race, so the case was not tested there, but the situation shows just how the track conditions may influence the admission of the plea of the "unavoidable accident." Crowding in such a case could not be avoided, but oftentimes when there is plenty of room on the track for three or four times the number of horses that subsequently get into collision it is equally unavoidable as far as any "intentionality" goes on the part of the offender.

Sometimes a horse in making a break will swerve towards the pole or out from it and force another driver to pull his horse over one way or the other very suddenly to try to avoid being hit, and in doing so he accidentally and purely unintentionally either crowds another horse into the fence or collides with him and causes some damage, such as a broken wheel or something else that makes it impossible for the horse that is interfered with to continue the mile, or if not so badly injured as to make the completion of the mile too dangerous an undertaking, causes the horse in question to break and lose so much ground that he is distanced, or injures him so he can only progress at a slow rate of speed and he gets shut out any way, then that interfered-with horse's driver can claim the right to start again, and with any fair set of judges will be granted it, too.

Unless some other driver in the race is in some measure responsible for the damage that is done, although he may be perfectly innocent of any intention

of causing any accident or interference, there can be no possible grounds for claiming the privilege of starting again on the plea of "unavoidable accident." The only chance is to go the mile even if shut out, and trust to luck that sufficient doubt can be raised in the minds of the judges that there was some interference on the part of some other horse that caused the trouble that resulted in the "said-to-be" interfered-with horse being shut out, then there is just a chance that the distanced horse will be given the benefit of the doubt. All such pleas as broke harness and busted hoppers are of no avail if the judges know their business, and to try to tell them that a twisted wheel that was not caused by some one else hitting it is an unavoidable accident is about as near to a convincing argument as it would be to try to get the judges to not award you the heat after you had won it, because some other fellow away back in the bunch did not try to beat you.

To make any ground for an unavoidable accident it is absolutely necessary to have some other fellow to lay the blame on, whether you can prove it or not, for even if the evidence is insufficient to prove the case, it still leaves a doubt in the minds of the judges as to whether the injured horse met with his accident though his own fault or that of some other horse in the race, and in the majority of cases when such doubt occurs the interfered-with horse will get the benefit of the doubt.—Frederick Watson in *American Horse Breeder*.

Great Tournament at Santa Barbara.

Santa Barbara is to hold a two weeks' carnival of amateur sports from July 13th to 25th on a scale never before attempted in California. There will be all sorts of land and water sports. A dispatch from Santa Barbara says:

"The Riverside, Pasadena and Burlingame polo teams, together with the local team, have accepted an invitation to participate in the events and will send their entire outfits. Frank J. Carolan of Burlingame will be here with his entire stable, and Charles Clark, son of United States Senator Clark, who has recently purchased the Hobart place at Burlingame, will send a full carload of racers and polo ponies. The southern clubs will also be fully represented. The polo pony races will be another feature of the tournament, and, like the other events, handsome prizes will be awarded to the winners.

The gentlemen's driving races, in which none but amateurs may take part, will be participated in by the best known horse fanciers in the State. In addition to Mr. Clark and Mr. Carolan's stables, Messrs. Batchelder, Henry Goodall and John Barneson, all of San Francisco, will take part with their entire string of racers. Three days of the tournament will be devoted to these races and the same time to polo. Scores of horses from the southern part of the State will also participate in the racing. It will unquestionably be the finest meeting of the kind ever held in the west.

Lewis Freeman, the Pacific Coast tennis champion, is now arranging for the tennis portion of the program. He is having new courts built adjoining the Potter Hotel, and their arrangement will be on the most elaborate scale. From the present outlook there will be at least fifty players here, and the events will be continuous until completed. All of the best known players, both ladies and gentlemen, have accepted the invitation to take part.

The ladies of Santa Barbara have taken the greatest interest in the tournament. Nor are their efforts confined to social events alone. Ladies' crews from the south will take part in the boat races, teams from the Corinthian and South Coast Yacht clubs having sent word that they will be present.

An effort is now being made to have the proposed maneuvers of the Pacific Coast naval squadron held in the channel during the tournament. Secretary Moody has been communicated with, and while no reply has yet been received there are reasons to believe that the effort will be successful. It is quite probable, however, that a few ships will be in the harbor at that time, even though the maneuvers do not take place. A scheme of illumination has been arranged that will convert the ocean boulevard into a scene of brilliancy. Thousands of electric lights will be strung along the entire water front and the two pleasure wharfs will be elaborately lighted. State street, the main business thoroughfare, will be strung with vari-colored Chinese and Japanese lanterns and illuminated each night.

There will be no charge to any of the events on the entire program, every feature being free and for the avowed purpose of promoting outdoor sports. The citizens of Santa Barbara will hear the entire expense."

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

The Curb Bit Not Cruel.

I was recently greatly impressed with the remarks of a successful trainer and driver, who of late years has been devoting his time to the coach horse branch of the harness horse game, regarding the curb bit with its apparent clumsy, cruel, and complicated checks and chains. He contended it was the easiest bit for horse and driver as soon as both were properly educated to its use, and in support of his claim named a number of well known trotters that were failures as race horses on account of their noted pulling proclivities that had as a last resort been forced into the coach horse brigade and, after their education in this line, had become good-mannered with an easy mouth and a disposition to let the reinsman do the driving at all times.

On several memorable occasions I have noticed with what poor success a first class coach-horse driver handles a race horse, and, on the other hand, have seen expert race drivers make a funny show of themselves in the ring while trying to handle a coacher. I have also observed a well-educated coacher drive nicely rigged like a trotter, but the latter invariably fights the curbs until properly educated to their use, and is then all the better behaved and easier to handle in his light harness rigging, and under these circumstances am inclined to think there are some grounds for the ex-trainer's claims.

It is a well established fact that the average race horse carries a stiff neck with his nose well out, while the coacher's neck is arched and pliable, and he carries his chin well under. I think both habits are acquired, to a certain extent, by the methods and appliances used, and have no doubt benefits can be obtained by slight modifications of both. I feel quite sure many trotters and pacers that are giving their trainers and owners endless trouble by pulling and lugging on the bit could be greatly improved by a competent coach horse trainer and a few lessons with a "dumb-jock," a rigging used to educate coach horses to the curb bit and to teach them to carry arched necks and nicely poised heads.—Palmer Clark.

A novel feature of the racing to be conducted in connection with the New York State Fair at Syracuse this year will be some heavy harness events, these having been selected as follows: two mile dash for four-in-hands, horses to be changed at the end of the first mile in front of the grandstand; mile dash for dock-tailed horses to runabout wagons; half-mile races for saddle horses, riders to wear colors; mile dash for tandems, wheeler to trot, leader to trot or run; three-furlong dash for ponies under saddle; special class for sporting tandems, outfits to be shown in the ring and then the leaders tried over the jumps. In addition to these events there will be a full program of regular horse show classes, including the jumping events, in some of which ladies will be eligible to compete and some will be open only to horses ridden by ladies. The prizes will amount to \$15,000 in cash and plate.

It may not be generally known that Mr. J. A. Buckland is almost as great an enthusiast in the matter of breeding thoroughbreds as he is with trotters. Referring to the success of Zenda, a mare owned and bred by the New South Wales sportsman, in the Bligh (N. S. W.) Cup and Bracelet, "Milroy," in the *Sydney Mail* says: "Though Mr. Buckland is, doubtless, disappointed over the defeat of his much-beloved Fritz, by Ribbonwood, knowing as he does that the winner's time is not within seconds of the best Fritz has shown him, he takes the loss well, and is game to come again. I was once privileged to time Fritz at Wonobobbie, but I am not privileged to reveal the record. However, it may not be a breach of confidence to say that it was better than the best that Ribbonwood has shown in public."

Jackson's Napa Soda is sold in every city, town and hamlet in the State

Horse Owners Should Use

GOMBALT'S CAUSTIC BALSAM

The Great French Veterinary Remedy. A SAFE, SPEEDY & POSITIVE CURE.

Prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

SUPERSEDES ALL CAUTERY OR FIRING.

Impossible to produce any scar or Membr. The safest best Bit-ter ever used. Takes the place of all liniments for mild or severe action. Removes all Bunches or Blemishes from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

WE GUARANTEE that one tablespoonful of Caustic Balsam will produce more actual results than a whole bottle of any liniment or spavin cure mixture ever made.

Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

San Francisco Fly-Casting Club.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

The Ol' Mill Pond.

On these halmy summer mornin's, 'fore the sun is in the sky, When the shadders turnin' purple tell that day is drawin' nigh;

For the shadowy reflection of the clouds a-sailin' by, A-tintin' of the water with the colors of the sky;

So with the rohin's chirpin' in the harvest apple tree, An' the orryole recitin' of his sweetest song to me;

For the stretch of dewy meadders, full of misty lines all curves, Makes a mighty soothin' poultoe fer a weary feller's nerves;

Whp! the very frogs a-croakin', and the peepers pipin' low, With the moonin' of the cattle in the pasture lot below;

So layin' on the grassy bank an' takin' of my ease, With the sunshine peepin' shyly thro' the branches of the trees;

—George W. Stawson.

Possibilities of Salt Water Fishing Near San Francisco.

Salt water fishing off the California coast in innumerable places is inviting and various in its attractions. In and about San Francisco bay, with the exception of striped bass fishing, the sport is yet in its infancy.

That this conclusion is not a far fetched one will be readily understood when the advancement in the sport by Eastern anglers, particularly in the vicinity of New York, is noted.

Along the ocean shores within easy reach of San Francisco there can be found many good fishing places where surf fishing can be indulged in.

Deep water fishing around about Lime Point, Point Bonita and outside the "heads," to the initiated few, is as an open book, the pages of which are recurrent with new and enlivening material.

Outside fishing, from this city, is most familiar through the excursions of the fishing tugs.

The ocean fishing banks most frequented and nearest to San Francisco are to the westward of the Farrallone islands, which are from twenty five to thirty-three miles from our wharves.

The lines used are hard laid twisted cotton one-eighth of an inch thick (No. 72) and from sixty to seventy fathoms long, hooks 8.0 to 10.0 Limerick or crooked, with lead sinkers from two to five pounds each.

Noonday Rock shoal, which lies about five miles west by north from the North Farrallones islands.

In summer time the weather is frequently windy with damp fog and quite rough sea, causing a large number of passengers to be sea sick.

The fish taken are red rock cod from one to ten pounds, salmon red cod from six to fifteen pounds, a species of codfish from six to forty pounds, a brown and golden colored fish from one to three pounds,

The fishing in the deep water with heavy leads and fish on is as we have remarked a tiring exercise, especially when a strong wind prevails causiog drifting. In very calm weather lighter leads are used and the work is less, and as in all other kinds of hand line fishing skill and experience always make the best catches.

In two instances one summer, salmon weighing from twenty to thirty pounds have been taken by parties on the steamer when their lines were about half way up.

It has always been a cherished belief among freshwater fishermen that their pastime creates a brotherhood of sympathy among its followers; that a sort of masonic feeling exists in the craft.

In the season of hegrira to the mountain and trout streams where rattlesnakes may be in uncomfortable proximity to those seeking out recreation, it behooves those who go to prepare themselves with some snake bite medicine and a good deal of common sense.

A fair day and a west wind were favorable to the manipulation of fishing tackle on the 27th inst. C. R. Kenniff was high rod in the delicacy event, with 90.6-12 per cent. He was closely followed by T. W. Brotherton and E. A. Mocker who each scored 89.7-12 per cent.

The art of the expert angler was well exemplified on Sunday morning at Stow Lake by those members of the Fly-Casting Club who participated in the bait-casting contest at five huogs, ranging from 60 to 100 feet distant from the casting platforms.

At the long distance work, out of eleven members competing seven of them placed their silk lines on the water for over 100 foot casts.

The next meeting at the lake-side will take place August 1st and 2nd.

SATURDAY CONTEST NO. 8—Stow Lake, June 27, 1903. Wind, west. Weather, fair.

Table with columns: Events, 1, 2, 3, 4. Sub-columns a, b, c. Rows include Kenniff, C. R., Young, C. G., Brotherton, T. W., Mocker, E. A., Battu, H., Edwards, G. E., Brooks, Dr. W. E., Kleruff, T. C., Stephens, Dr. C. J., Tormey, P. J.

SUNDAY CONTEST NO. 8—Stow Lake, June 28, 1903.

Table with columns: Events, 1, 2, 3, 4. Sub-columns a, b, c. Rows include Young, C. G., Blade, A. M., Kleruff, T. C., Kenniff, C. R., Golcher, H. C., Haight, F. M., Battu, H., Sperry, H. B., Hugel, C., Tormey, P. J., Brotherton, T. W., Kenniff, J. B., Brooks, Dr. W. E.

NOTE: Event 1—Distance Casting, test. Event 2—Accuracy percentage. Event 3—Delicacy, (a) accuracy percentage, (b) delicacy percentage; (c) net percentage. Event 4—Lure casting percentage.

On the Troutng Streams.

Pleasant weather and streams in splendid condition will be the cause for an unprecedented exodus of anglers from town during the present holidays.

The following notes from a correspondent who wrote on the 29th inst. are indicative of much sport to be had at the localities mentioned:

Sisson—Fishing is now fair in this vicinity and the trout have begun in earnest to take the fly. The Keyser Meadows are now open to all those obtaining permission from the keeper and paying the charge of \$1.00 for the privilege.

Wagon Creek, Sulloway Creek and Cold Creek have afforded several nice catches lately, all with the fly, but are almost too brushy to give satisfaction to outside fishermen.

The Sacramento from mouth of Box Canon to Rain Bow is also reported in good condition and good catches have been made there, but the fish are smaller, ranging from 5 to 10 inches, with only occasionally a large one.

Forks of the Sacramento are a trifle too high as yet, although they have all yielded fair sport for this fly fisherman.

The flies proving the best killers are gray hackle, black hackle, black gnat and royal coachman.

Shasta Retreat—Fly-fishing in the Sacramento north of Dunsuir will be good about the 4th of July and the best flies will be found to be the march brown, caddis (light and dark), coachman and light stone fly. Within the last few days several catches ranging from seven to nine dozen have been made by anglers fishing in the vicinity of the Retreat.

Castilla—Fishing with the fly is steadily improving, another ten days will see a marked change in the conditions around here. The lighter flies have been found most effective. Castle creek will repay any one a trip and the further up one goes the better fishing and all with the fly.

Lamoine—The trout are taking the fly here now, but in a few days will take more kindly to this lure. The flies proving best at this time are royal coachman, brown and gray hackles with psacock body or yellow body, professor, royal governor and light caddis. Most of the fish now being caught are large. There are quite a few salmon now in the river and they will take a spoon readily and give one the battle of his life if he happens to hook on. A gentleman last week got on a big fellow, which he lost after a fight lasting three hours and ten minutes.

Redding—Fishing in Battle creek, a tributary of the Pitt, is reported very good. Last Sunday Messrs. E. Barton and W. Jeffrey made extra good catches. They were up above what is known as Giles Ranch and used the coachman and black gnat, also the spoon successfully.

Reno, Nev.—Fishing has not been at its best for the last few days on account of the Truckee being muddy but by the fourth of July the river will be in good condition again. A Mr. Carr on the 26th caught 25 pounds all on the fly, using the darker varieties. Through the middle of this day a spoon has proved effective and bait fishermen are getting all the fish they want.

Verdi, Nsv.—The Truckee river has fallen about eight inches in the last ten days at the Country Club and the water is now clear. Thirty-five rainbow trout were caught by the guests on the evening of the 26th, all with the fly. The best killers are brown hackle, yellow body, gray hackle and black gnat. The Vatchell brothers have taken 110 fish this week with the flies just named.

Cisco, Cal.—Fishing is very good just now judging from the catches made by Messrs. Huke, Evans and Jeff Wells who have caught all the way from 20 to 70 in a day, weighing from a pound to a pound and one half and also running as high as four, six and even eight pounds. The principal flies are brown hackle, coachman with gray wings and also the professor and black gnat.

The opportunities for surf fishing down south are taken advantage of by a large number of salt water fishermen.

Los Angeles probably has more good fishing beaches within easy reach than any other part of the Southern California coast. With Newport, Long Beach, Terminal Island, San Pedro, the new breakwater, Redondo, Manhattan, Playa Del Rey, Ocean Park, Santa Monica and the Long Wharf, all reached within an hour's time, and many in half that time, it is not to be wondered at that there is such an exodus every Sunday from Los Angeles of those who enjoy the sport of angling, says the *Express*. And this is not all of the attractions. Big fish, and those that are tiny, medium-sized and those just right for the pan, are caught at every point named, and usually in sufficient numbers to make it interesting. Every veteran has his favorite beach, and the new arrival at any of them usually is there, because he has heard the devotee to that particular beach discourse on its attractions and as a place for "the best fishing on the coast."

These are a few of the reasons why visitors to the beaches find so many fishermen at work when they reach there all dressed up in Sunday clothes. Often the new suit or dress is forgotten when they see how fast the fish are being hauled up, and they fly to the dealer to rent a pole and line, and soon are at the sport with the same vim that is displayed by the veteran.

During the last week the reports from the beaches are all that could be asked for. The fish are running in numbers, and the prospect for to-morrow's fishing is excellent. At Playa Del Rey the new wharf is an excellent place to fish for surf and yellowfines. Although the pardinium, or red water, has been found at all the beaches, it has not affected the fishing to any extent, the fish coming in twice a day for their meals. There has not been a great deal of fishing at Terminal or Brighton this week, but to-morrow a crowd of the regulars will go down. China croakers, yellowfines, surf and bass are biting well there, and the regulars expect to have the best day of the year.

At Redondo the mackerel are coming in early in the morning, and during the evening, with an occasional visit during the day. Reports from there to-day say that fishing there never has been better, and it is expected that to-morrow will find both wharves crowded with regulars and occasionals. Mackerel, rock bass, smelt, croakers, herring and an occasional yellowtail can be found at this beach. Many will go to the rocks below Redondo in the morning for bass, as they are reported to be coming in. Trolling outside is excellent, and a good haul of harracuda is now in order by the fishermen who go out in launches.

Hammocks and Lawn Tents.

Minas Prietas hammocks can not be excelled. They are a hand-made Central American product, woven from a light, tough and strong grass fibre and dyed in bright colors with mineral dyes. They are lasting and comfortable; one can roll them up into a small compass the same way as is done with an elk India shawl. Skinner, the Sporting Goods man, 801 Market Street, has just received a new consignment.

Lawn Umbrellas for outfitting, camping, prospectors, invalids, for the summer cottager, etc., 8-foot spread, comfortable for two people. Light weight, very strong, variegated or solid colors, put up in five minutes. Just see Skinner about 'em. You'll sure want one when you see it.

The Atlantic and Pacific Salmon.

There are five species of Pacific salmon; the chinook or quinnat, the red or blusback, the humpback, the silver and the dog salmon. The features that distinguish externally the Pacific salmon from the Atlantic is the greater number of rays (soft spines) in the anal fin of the former, and internally by an increase in number of the coeca or blind intestines. For example, the Atlantic salmon has only nine rays in the anal fin and the coeca are sixty-five in number. The anal rays of the Pacific salmon range from thirteen to sixteen and coeca from forty-five to one hundred and eighty-five, those in the silver salmon only being from forty-five to eighty, and in all the other species seventy-five to the greatest number named.

The Atlantic salmon varies in color and form according to sex, age, food and condition. The adult is brownish above and silvery on its sides, with numerous small black spots, often x or xx shaped, on the head, body and fins, with red patches along the sides on the male. The young (parrs) have about eleven dusky crossbars, hsside black and red spots.

The coloration and form of the Pacific salmon vary in the different species. The quinnat has a stout body, a conic head, small eyes and a deeply forked tail, with a bluish or greenish tinge on the dusky body above the lateral line; the sides and belly are silvery; the head dark with a metallic lustre, with numerous round black spots on the hack and the dorsal and tail fins.

The bluehack salmon is a rather slender fish with a much-forked tail fin; as its name implies, it is a bright blue color above with silvery sides but no spots.

The humpback salmon is very much the color of the bluehack, but has numerous black spots on the back and on the soft or adipose fin and the tail, the largest spots being on the caudal or tail fin. It has a rather slender body.

The silver salmon has a long body, a short head, a blunt snout, and a small eye, also small fins and a deeply forked tail. Its coloration is bluish green above, sides silvery with very few nearly obscure spots on the head, back and dorsal fins, also on the upper rays of the tail fin.

The dog salmon has very much the form of the quinnat, but the head is larger and not so round. It is of dusky color above and on the head, and is somewhat paler on the sides. In some specimens there are very fine spots on the hack and sides. The tail fin is either dusky or finely spotted with black edge; all the other fins are blackish.

The run of the Pacific coast salmon into the fresh water to spawn commences in the latter part of March and continues, with modifications and interruptions until the actual spawning season in October and November, some of them, notably the bluehack, spawning in the lakes of Idaho in August.

The Atlantic salmon run up the rivers to spawn, commencing in April or later according to the temperature of the water, and spawn in October and November. Unlike the Pacific salmon, the fish that have spawned do not, as a rule die; this is probably owing to the short distance they are compelled to travel before reaching their spawning grounds in the Eastern waters. On the other hand, the Pacific salmon, except the late run of fish, are known to travel over fifteen hundred miles to their spawning grounds, none of them afterwards reaching the ocean alive.

The spawning habits of the Western and Eastern salmon are very similar. On first entering a stream they swim about as if playing. They always head towards the current, and this appearance of playing may be due to facing the moving tide. Afterwards, particularly when in deep water, they swim straight up with few interruptions, making from two to three miles a day.

The prevailing impression that salmon have some special instinct that leads them to return to spawn in the same spawning grounds where they were hatched, is doubted by Drs. Jordan and Evermann, at least so far as the Pacific salmon are concerned. It seems more probable that the young salmon hatched in any river mostly remain in the ocean, within a radius of 20 to 40 miles of its mouth. These young fish in their movements about in the ocean may come into contact with the cold waters of their parent rivers or perhaps of any other river, at a considerable distance from shore. Their instinct leads them to ascend these fresh waters, and in a majority of cases, it is believed, these waters will be the same in which they were spawned.

A number of fanciers of Scotch Collie dogs are preparing to make a big exhibit at the Oregon State Fair, to be held at Salem commencing about the middle of September this year. The Collie is fast becoming very popular with the farmer, the stock breeder and also with city people. There is no better place to bring them into public notice than at our state and district fairs. The fair board is offering cash premiums on Collies this year, and invites every one interested to bring out an exhibit. C. D. Nairn, the well-known Collie fancier of Ballston, Ore., will have charge of the exhibit, and he invites those wishing to exhibit to correspond with him at any time.

Free!! Free!! Free!!

The Polk Miller Drug Co. of Richmond, Va., whose advertisements of "Sergeant's Dog Remedy" are appearing now in the columns of this journal, desire us to state that they will furnish absolutely free to our readers a revised copy of their book on "Dogs," which accurately and exhaustively treats of the more frequent diseases with which dogs are afflicted. Enclose them 5c in stamps to cover cost of mailing the book. They have recently made F. W. Braun & Co. of Los Angeles, California, distributing agents for their popular line of "Dog Remedy," and extend an invitation to all persons having sick dogs to write them describing symptoms, etc. Enclose stamp for reply. No charge will be made for information furnished.

The Field Dog.

Very many—good sportsmen, too—think that any dog that has a good nose and is staunch enough to not break is a "bird-dog" and therefore all sufficient, not considering several essential requirements. In these days of infrequent and broken bevies of birds, scattered over immensurable areas of stubble, brush land or hillside, what we want first is a dog that can go fast and stay. As most sportsmen are one-dog men, the dog must be able not only to do his work for one day but for several successive days. For this reason the first and most necessary requirement is good feet—firm, elastic and cat-like—of the rubber-tire order, to take up the resiliance of the swift gait, now needed. A dog whose feet are not firm and elastic cannot endure the hard work required of him. In the first place, he shakes himself to pieces by the perpetual jarring and his feet become sore. He will stand one day of hard work and, perhaps, by the exercise of enthusiastic courage, run through a second, but be practically unfitted for work the rest of the hunt. The good footed dog will sit heartily when his day's work is ended, roll up, sleep soundly, and be ready and fresh in the morning.

Next to feet the field dog needs abundant heart and lung room. Without this he cannot go fast and stay; he chokes up. Speed-fuel, which in men, animals and machines is air, is not supplied in sufficient quantities. Not only must there be abundant capacity but it must be of the right form for free and easy action propelling parts. The shoulder blades must lie flat and play freely; the sides of the fire-ho—which indeed the chest is—must be flat not rounded, if speed is to be attained. What is lost in flattening the sides must be regained by deepening—thus we get the wedge-shaped chest seen in its highest perfection in the modern Greyhound. Of course, of the field dog is not required the tremendous burst of speed the Greyhound is called upon to make, and which, even with his perfect conformation, he can only measurably endure; but the same conformity that enables the Greyhound to make his wonderful bursts at intervals enables the field dog to maintain a high rate of speed for a long time.

The third physical requirement is elastic, wire-like muscle, not bulky but of fine texture, well placed in leg, thigh, quarters, loin and shoulder. As a minor detail, other things being equal, the animal that is longest from hip to hock will have the most speed. A long hack, like a long bridge, cannot be as strong as a short one; hence the coupling of fore and hind quarters should be short and muscular.

So much for the physique. If it was frame alone we wanted we could rest content with the Greyhound; but the field dog wants all that the Greyhound has, plus keen scenting powers and a great intelligence. Without these he would be useless except to range the country haphazard and flush a covey, by chance, here and there.

A field dog must be psychical as well as physical; hence the eye must be bright, beautiful and love-inspiring. A bad-eyed dog—like a had-eyed man—is psychically deformed. The eye takes expression from the spirit within. Although there may be intelligence behind a bad eye, it is perverse and intractable, therefore useless to the sportsman; for he does not want moodish flashes of genius, but a bright, steady light that will be a sure guide at all times.

To a student of character, and there is character to study in all animals, the eye and its expressions will be a great aid to education. Some physiologist has said that the eye cannot lie; at all events an animal's cannot. The bold, keen, fearless-eyed animal can be strongly dealt with, while the mild-eyed, gentle, pleading creature demands a tender, loving schooling.

The nose is the filter by means of which the various taints in the air are assorted, labeled and conveyed to the brain. It should be broad, elastic and sensitive, with wide, dilating nostrils to catch the faintest zephyr.

The muzzle—face—of the field dog should be square and fairly broad, for this is indicative of firmness and dignity. This is seen to perfection in the mastiff and, to a less degree, in the St. Bernard.

The snipe-nosed field dog, as the hatchet-faced man, may be keen and intelligent, but cunning instead of large-minded. One might as well expect a snipe-nosed dog to mark a bird in sight, and, if successful, to bring it to his master with a wink in one eye and a see-what-a-smart-dog-am-I expression in the other. The broad-muzzled dog is sure to be staunch on his point, if properly trained; the firmness and dignity of character would, by the sense of duty, overcome any natural prompting to snatch.

Behind the eyes the head should be capacious and well formed, having plenty of brain not only to differentiate the various scents that are passed, but to prompt and direct action on the ever varying phases of a field dog's experience.

The dogs can differentiate, sportsmen know who follow their canine friends afield, not merely to bag game but to enjoy their intelligent labor of love. A good dog takes pleasure in laboring in his master's cause. As he ages he stores happenings away in his memory for future reference. He gets to distinguish different kinds of game and, to the observant eye, will surely indicate, by a mere trifle it may be, the game before him. So surely is this a fact with some dogs that a change of shells may be made by the gunner.

There is more behind a dog's eyes—yes, of any animal's—than we humans credit in our self-satisfied philosophy. Behind them lies an open scroll engrossed by the hand of the Creator—and it repays our study.

Jackson's Napa Soda untangles the feet.

THE FARM.

State Fair Cattle Premiums.

The Committee on Live Stock of the California State Agricultural Society consisting of Directors F. H. Burke, E. W. Howard and J. Whitaker, has prepared the new premium list for registered cattle and have made many changes in the old one. The premiums have been increased in several instances and the list is a great improvement over those issued during previous years. The breeds for which regular premiums are offered are registered Shorthorns, Herefords, Holstein-Friesans and Jerseys. In addition there are sweepstakes for all standard beef breeds and all standard dairy breeds.

The first prizes for hells and cows have been increased to \$40, while second prizes are increased to \$30 in both cases.

The classes are free to all, and cattle owned anywhere can be exhibited. All these classes, however, are duplicated (when 60 or more animals of one breed are listed) and called the State Class, open only to California-owned cattle that were the property of the exhibitor on the 1st of June, 1903, and owned by him since that date.

The American Shorthorn Breeders Association will duplicate premiums offered on Shorthorn cattle, both in the Open and State classes, under these conditions: No animal will be eligible to compete for any money offered by the American Shorthorn Breeders Association, except the pedigree has been recorded or accepted for record on the books of the American Shorthorn Breeders Association. This applies to both classes of Shorthorns.

Several changes have been made in the rules governing exhibition, among them the following:

After the present fair of 1903, no bull over six years of age and no cow over twelve years of age will be allowed to enter or compete for premiums, either as an individual or member of a herd.

Forage will not be supplied by the society, but instead the premiums have been greatly increased and prizes for entirely new classes formed.

The parades have been reduced from four to two, one in each week, and every head must participate. No excuse.

Animals too sick to parade are not in a condition to show. Those too wild to be led should not be shown.

All bulls two years and over must be shown both in parade and ring, and must be led by strong suitable bull poles.

A quartet of the best known and most competent live stock judges of the entire country will be present for the purpose of passing on the points of the competing herds and to lecture before the assembled stock growers and dairymen who are expected to meet there during the progress of the State Fair.

Professor H. E. Alvord, the head of the Dairy Bureau of the United States Government at Washington, will attend and pass on dairy products. Harry Lowden, the Acting Secretary of the State Agricultural Society, says that the mere mention of Professor Alvord's name in this connection is sufficient to arouse the interest in every man in California who is engaged in the dairy industry, and that the fact that he is to be in Sacramento will attract hither a great many who otherwise would not attend the State Fair.

Negotiations are in progress to have Professor W. E. Carlyle, who judged cattle last fair time, return and perform that duty again.

Mr. Lowden looks on this as another drawing card for the fair.

The reputation of Professor Carlyle spread wide on the Pacific Coast by reason of his method of judging stock. He not only gave decisions carefully, but he explained why he decided thus and so, and

at the same time pointed out the weak lines in the breeding of the different competitors, and by summing up the credit points illustrated the justice and soundness of his judgment.

Professor Majors, head of the Bureau of Animal Industry of the University of California and Professor Leroy Anderson of the State Polytechnic School are to be present and participate in the work of awarding premiums.

Fattening Hogs on Alfalfa.

Some time ago there appeared in these columns a summary of an address delivered before the Nebraska State Swine Breeders' Association by Mr. C. H. Payne of Omaha. Referring to that address we find that Mr. Payne pastured 160 head of hogs on 25 acres of old alfalfa and 5 acres of new, says *The Homestead*. The hogs were turned onto the alfalfa June 14th, at that time averaging 108 pounds. These hogs were fed a half pound of shelled corn per day each, in addition to the alfalfa pasture, from which they made an average of .6 of a pound gain per day each.

In another instance Mr. Payne turned hogs averaging 131 pounds into an alfalfa pasture August 14th and fed them about four pounds of ground wheat and rye per day, from which they made practically one pound of gain per day each.

While gains were made at a small cost in the above instance, considered from the standpoint of grain fed, yet we believe that with corn selling at twenty-eight cents a bushel it will pay to feed these hogs somewhat liberal ration of grain in addition to their alfalfa. However, the matter may be viewed from two standpoints: If it is the aim to make the largest amount of pork with the least outlay for grain it might not be advisable to feed more than two pounds of corn per day to each hog. On the other hand, if one wishes to obtain the greatest weight of pork with the expectation that the price realized will more than offset the extra food consumed, then four or five pounds of corn a day might be fed to each hog in addition to the alfalfa they can consume. In either case it is altogether likely that will pay to feed grain somewhat heavily during the last few weeks of the feeding period, because at that time the hogs will be getting pretty heavy and will not care to do much walking for their food. The last month or six weeks will be the most expensive feeding period, viewed from the standpoint of pounds of gain made for the food consumed, but nevertheless it is generally profitable to give animals what might be called the "last dip," because it is this that springs the selling price and removes one from the field of keenest competition.

What Causes Thumps?

The latest theory regarding thumps in young pigs is that the disease is due to spasms of the diaphragm, probably due to pressure. The symptom is a sudden jerking movement in the flank. When a pig is standing quietly the jerk is very noticeable and may be of such violence as to move the whole body backward and forward. It may be accompanied by a sound that can be heard some distance. These contractions are not rhythmic but may be much more frequent at one time than at another. After exercise the jerking is more violent. The jerking is also more pronounced after a full meal than when the stomach is empty. The causes are probably a full stomach and lack of exercise. The disease occurs mostly in litters from mothers that are exceptionally heavy milkers and always takes the fat est pigs in the bunch. Treatment requires an increase in exercise and the pigs should be turned out into alfalfa pasture. If they are kept in a pen give salts or castor oil. Fifteen to twenty drops of each tincture of laudanum and digitalis every two hours until the animal is relieved is recommended.—*Field and Farm*.

Calf Cholera Remedy.

Last spring I was feeding my cows corn and my calves when first born seemed all right, but when one to three days old they began to show signs of cholera, I tried several remedies but all failed; when, after losing five or six I made some strong lime water by putting a piece as large as your fist in a quart glass bottle and filled with good rain water (or any other clean water would do) and then after shaking well, set it aside to settle. I took the calves, says the *Stockman and Feeder*, when first noticed sick away from their mother a few days; took a little of her milk and put two tablespoonsful of the lime water in it and fed them three times a day. After drinking it, I gave each a dessert teaspoonful of corn starch, moistened with the milk. The corn starch is cool and healing. This saved them.

Another good remedy is laudanum. When the rest were born (some seemed to be affected when born) I gave ten drops of laudanum in their milk twice a day till they were better. Two doses were generally enough as it won't do to give too much. The calves should not be allowed to eat too much at a time.

The sick ones should be kept from the well ones, and the laudanum away from the children. I have used lime water for hog cholera and found it very beneficial. This year we are feeding whole oats and stalk food to the cows and one or two calves were affected a little with cholera. I gave one dose of laudanum as soon as noticed and let them run with the mother, and they are all right now.

A New Way of Fattening Poultry.

Armour & Co. of Chicago have established a large poultry fattening establishment at Marshalltown, Iowa.

The method employed is a most novel one, and has been tried in the East with great success. The old theory that "You can lead a horse to water but you cannot make him drink" has been exploded so far as live poultry is concerned. By the new process they not only lead the chick to the feed, but they also force him to take it into his interior, and, best of all, he fattens on it. The chickens are fed one at a time by machinery. The food used is especially prepared, and is in liquid form and is forced into the fowls through the bill by high pressure.

As soon as they are fed the fowls are put in a dark room, so that they will not, by running around, lose their flesh. They are kept in this room excepting during the feeding time. Ten days are all that are required to make what was a poor, lean chicken a plump, fat fowl.

Many people imagine that they cannot profitably and properly raise a calf unless it is brought up on whole milk. A calf raised on whole milk is generally a very expensive one. The method commonly followed is to let the calf help itself. Sometimes it is allowed to take the first and sometimes the last of the milk, according to the convenience of the owner and without any regard to the fact that the last milk or strippings is generally four or five times as rich as the first milk. By such method, or rather lack of method it cannot be determined how much milk the calf is getting, and there is no regularity in the amount. The advantage is that there is less labor in handling the calf and in milking, but there is also less milk and but little better calf than by other and more economical methods of management. The plan, however, seems to please the most of our western dairymen and so long as they are satisfied with it we have no protest to make, although the whole system is radically wrong and something better should be substituted for it.

Do not expect to get something for nothing in the dairy business. You will be doomed to disappointment if you do.

Raising Mules.

The advantage of a mule over a horse is, he can be taught to turn shorter, thus preventing the breaking down of vegetables or other plants. He can go in rougher places, is not affected by heat as badly as the horse and requires less attention in the way of currying, rubbing, etc. His feet being smaller, he can walk closer to the row of growing plants.

To make a good mule worth from \$50 to \$80 at weaning time, or \$140 to \$160 as a two year old, he should be foaled from a large mare in April or May. He should run with the dam until October 1, then be weaned. At this time he should be at least 5 1/2 inches. Put him in a shed with plenty of light and feed oats, with clover and timothy hay. Too much corn, fevers the legs and produces scratches. The next summer he should have access to pasture, with a little corn each day until cold weather, when he should be brought back to the barn. At two or two and one-half years old he should be 16 hands high, fat and ready for market.

When feeding, care should be given to keep the system cool with green stuff, and keep out scratches. The following is a good cure: Take equal parts of blue stone, white vitrol and verdigris, grind together with equal parts of soapstone, mix with warm water until about as thin as paste, apply with a swab on the end of a stick about three times a week.

Mule colts are no more troublesome than horse colts. The colts run with their mothers, but a separate pasture is required for two year old mules.

Feeding for Egg Production.

Have you ever observed how a hen feeds when out on the range? It is first a blade of grass or leaf of clover then a short chase for a grasshopper or cricket. She now discovers a soft spot in the soil which she believes worth investigating and sets to work with the mining tool which nature has given her, with a view of finding out if it is "pay dirt." A fuzzy weedhead is in her path and she stops to shatter down a few ripened seeds. She is drawn away from her repast by another grasshopper, which springs down in front of her and jumps again just in time to save himself from the dash she made at him. In place of the grasshopper which she didn't get, she nips another clover leaf or blade of grass. Thus the hen feeds a little at a time and consumes hours in obtaining a full meal. It seems to me that any person who has observed the hen feed on range would never throw down a measure of shelled corn on a bare spot for her meal.

In feeding for egg production we must and can well imitate nature. When we remember that fowls produce eggs most abundantly at this season when they have the greatest freedom, plenty of green food and are fed some grain and are able to seek an abundance of meat food in the form of insects, we may have the solution of the whole problem.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

For Sale—Thoroughbreds.

BROOD MARE BY SIR MODRED AND TWO of her get. One, two-year old filly, has been handled but never raced and one yearling colt. All royally bred. W. H. CHRISTIE, 615-616 Hayward Building.

Five Cases of Spavin Cured.

Buffalo, N. Dak., Jan. 25, 1903.
Dr. B. J. Kendall Co.,
Gentlemen:—I have cured five horses absolutely of Spavin in the last four years with your Kendall's Spavin Cure. Very truly yours,
Harry D. Kuestel.

The endorsement of its users guarantees its merits.

Price \$1; six for \$5. As a treatment for family use it has no equal. Ask your druggist for KENDALL'S SPAVIN CURE, also "A Treatise on the Horse," the book free, or address
DR. B. J. KENDALL CO., ENOSBURG FALLS, VT.

Live Stock at St. Louis Exposition.

F. D. Coburn, Chief of the Department of Live Stock of the Louisiana Purchase Exposition, has arranged for a total of over 26,000 prizes in the classifications of horses, cattle, sheep, ewine, poultry, etc., for the World's Fair shows next year. These are unprecedented in amount and are divided among twelve breeds of beef and dual purpose cattle with 2352 prizes; four breeds of dairy cattle, 560 prizes; nineteen breeds of horses, 3458 prizes; eleven breeds of swine, 2772 prizes; fourteen breeds of sheep, 2548 prizes; 375 varieties of poultry and pigeons, 10,300 prizes; fifty-seven breeds of dogs, 2604 prizes. There are thirty-two additional prizes for single cows and herds entered in the dairy demonstration; five for oxen, fifty-five for mules and 1310 for the estimated display of pet stock, vehicles, etc.

Provision has been made for five cash prizes and two honorable mention awards in most sections except poultry. The final arrangements of the classifications may still further enlarge the number of prizes offered.

Up to the present time that feature of the World's Fair at St. Louis pertaining to live stock has been designated as a "section," a title which erroneously seemed to indicate that it was a branch or subordinate feature of some other department.

This has now been changed by the management and Mr. Coburn will hereafter be officially known as the Chief of the "Department of Live Stock." The exposition has added much to its popularity in making live stock an independent department and giving it a separate chief with a prize fund of \$250,000. This substantial recognition will do much to attract attention to the great St. Louis enterprise and secure the hearty co-operation of stockmen, fanciers and others interested. This is the first world's fair to give live stock the prestige and rank of a department with an independent chief, and the great extent and high character of the live stock exhibits already assured the World's Fair confirm the wisdom of this liberal policy.

The general desire of the live stock breeders to have public sales made a feature of the live stock shows at the World's Fair has met with hearty approval by Chief Coburn, and the leading national breeders' associations have already filed requests for dates and have commenced preparations for holding such sales. A representative of a number of leading poultry fanciers has applied for dates for public sales during the poultry displays.

The Louisiana Purchase Exposition will be the first World's Fair to provide for the holding of public sales of pure bred stock, which are assured of crowds of appreciative buyers and good prices. Complete plans have been made for a ring for public sales apart from the main live stock amphitheater, so that sales may be held without interfering with the judging or other features of the exhibition. Public sales of prize winners and other choicely bred animals have come to be a very attractive feature of fat stock shows and the leading State Fairs, but no opportunity for this popular method of selling stock to the highest bidder has ever been offered at a World's Fair.

The sales will be under the auspices of the breeders' associations interested and within the period in which the breed will be on exhibition. The following associations have already asked for assignments of sale dates:

Cattle—American Short Horn Breeders' Association, American Hereford Breeders' Association, American Aberdeen-Angus Breeders' Association, American Galloway Breeders' Association. Horses—American Percheron Horse Breeders' and Importers' Association. Swine—American Potomac China Record Company, National Duroc Jersey Swine Breeders' Association, American Berkshire Association.

An entirely new departure decided upon

as a leading feature of the live stock awards at the Louisiana Purchase Exposition is the premier or sweepstakes championships for each breed. These are intended as grand prizes to recognize both the skill of the breeder and the enterprise of the exhibitor. It is proposed to give a premier championship award to the breeder making the best showing in each class, the showing to be determined by the largest aggregate amount awarded to animals bred by the breeders represented in that class. The premier award to the exhibitor in each class will be made on the same basis.

The large amount to be offered for prizes and the consequent breadth of the classifications and the world-wide character of the shows will make the premier championships of St. Louis an exceptional honor, certain to be strongly competed for and highly appreciated by the exhibitors as well as breeders of the prize animals.

The Right Calf to Raise.

Perhaps you may say, raise those that come from the best cows, suggests T. B. Terry, in the *Practical Farmer*. All right, but that isn't enough. The sire should have been a good individual, with the general makeup and marks that to the practiced eye show that he is such, and then also he should be a pure bred animal. There are plenty of pure bred animals, with long pedigrees, that have no perfect value because they are not by any means perfect types of their class. Better pay a man who is a good judge \$300 to select a sire to head a herd, rather than take an animal on his pedigree only. Yes, I would not buy one at all unless I had the skill to pick him out, or could employ some one who did have. This is pretty strong language, but it is used in all earnestness to help readers, to prevent bitter disappointment in years to come. Now how are you to know which are your best cows? Only by weighing the milk and keeping a record through the year. It will do very well to weigh once in ten days, morning and night, then multiplying by three will give you, closely enough, the amount given in a month. Then, if quality is an important factor with you, as when you are selling butter or cream, you should have a Babcock tester also. Then you can know absolutely which cows give you the most milk and the richest milk. Their calves, from a good, pure bred sire, are the ones to raise, if the calves themselves are all right. Don't have a weak point in this chain anywhere. Don't take it for granted that all the heifer calves will be good from a good sire and mother. They may be, and may not. I would follow the Van Dreser method of selection. Look in the mouth of the new born calf. If there are, say, only two teeth just pricking through do not attempt to raise that calf, no matter what its parents are. The mother lacked vitality enough to fully develop the calf. If there are six or eight teeth well put through, showing vigor and stamina in the mother, all right so far. Next turn the little heifer on her back and examine the teats. If there are four good teats, well spread apart, and two or more rudimentary (extra little teats), then raise the calf. The chances are largely in favor of her not disappointing you when she becomes a milker.

Practical Poultry Points.

Hens kept in confinement, without much variety of food and vegetables, are very apt to lay eggs with light-colored yolks. Such eggs are not equal in quality or food value to those of a richer color, and very few people care for them. Fowls kept under such conditions should have a varied diet of grain, a little fresh meat, and vegetable food, such as half-cooked beet roots, or carrots, fresh grass sods, with now and again a lettuce or cabbage.

There is a certain time when poultry that are being fattened are just ripe and fit to kill. If left even for a few days

beyond this period, they lose rather than gain in flesh, and the extra food given them may be regarded as a useless expense. This condition in the birds, whether fowls, turkeys or ducks, can readily be told by an expert, and any one can, of course, guess it by practice and observation. It is quite worth while for all poultry-keepers to try to gain this knowledge.

Green bone is fresh bone from the butcher's shop. Bones just from the table are quite suitable, and broken into pieces the size of maize, are well suited for the fowls to devour. Boiling for a considerable time does not make them unsuitable. Do not add bone meal or oyster shells to the soft food so as to compel the fowls to devour such substances when they are not necessary even for the hens, which is the case sometimes. An excess of bone forming material injures male birds.

Poultry-keepers who have to keep their fowls in confinement in towns or suburbs should keep a heap of cinders and ashes in the run. The birds will find in them much that is beneficial, and it will help to keep down the grit hill a little.

Mutton Chops.

Sheep are subject at all times to attacks of ticks and lice.

A flock will never thrive when infested with ticks. A dipping tank should be kept ready for use at any time.

The flock should be examined frequently and never allowed to suffer.

At shearing time the ticks leave the sheep and go to the lambs. The lambs should then be dipped.

The demand for well fattened lambs is steadily increasing.

The prices of fat lambs run high at any time of the year compared with mature sheep.

The earlier the lamb is in the market the better the price.

While pushing the fattening keep the sheep and lambs dry on their backs and dry on their feet.

The grain troughs should have wide, flat bottoms so that the grain can be scattered and not bolted in mouthfuls, and they should not be crowded.

Corn and clover hay, or corn and clover pasture, is the best feed to put fat on rapidly.

Wheat and oats cause more growth in frame and muscle than fat.

For raising winter lambs the ram should be turned with the ewes about the first of June.

There is an increasing demand in the large cities for this dainty. This branch of sheep husbandry should not be attempted by persons with little or no experience, but it will pay to work up to it as experience is gained.

Breeding for Color.

Said Director E. W. Howard of the State Agricultural Society, one of the largest breeders of shorthorn cattle in the State, in response to a question by a *Union* reporter as to whether or not breeders are moving toward solid colors of late, "the tendency of most of the breeders is to breed to red, but I do not think it a wise one, as it necessarily restricts the stock from which to breed. In England they breed largely to roans and many magnificent specimens are produced. Last year I brought up a couple of roans in my exhibit, just to show my independence. I had no idea either of them would win a prize, and pinned my faith on a red that I considered the best in the herd. To my astonishment Professor Carlyle placed him third, placing both the roans before him.

"I did not agree with him, but he went over their point by point and convinced me that he was right. He was not only a most competent judge, but he had the faculty of imparting instruction and, what is generally difficult to do, would convince you that you were wrong. I am going to bring up a lot of roans for exhibition this year."—*Sacramento Union*.

In the Matter of the Application of JOSEPH ALBERT CRACKBON, for Change of Name.

The petition of Joseph Albert Crackbon, respectfully shows:

That he is over the age of twenty-one years; that he was born in the City of Sacramento, State of California, and has ever since resided in the State of California, and does now reside at the City and County of San Francisco, State of California.

The petitioner's father is dead, but petitioner's mother, Ada B. Crackbon, is alive and resides at Sacramento, and petitioner's other near relatives are Mrs. Emma Pierce and Mrs. M. W. Wilder, both residing at Sacramento, California, and L. S. Crackbon, petitioner's brother, residing at San Francisco, California.

That petitioner desires to change his name to Joseph Albert Whitney, the name Whitney being petitioner's grandmother's maiden name.

That the reasons your petitioner desires to change his name are: that the name Crackbon is made the subject of ridicule and punning to such an extent as to render the lives of petitioner and his children extremely disagreeable and unpleasant.

WHEREFORE petitioner prays that this Court make an order fixing the time and place of hearing this petition and directing publication thereof, and that upon the hearing of said petition, this Court make an order changing petitioner's name from Joseph Albert Crackbon to Joseph Albert Whitney.

Dated June 12, 1903.

JOSEPH ALBERT CRACKBON, Petitioner.

WM. H. CHAPMAN, Attorney for Petitioner.

Upon reading the foregoing petition, it is hereby ORDERED, that Monday, the 13th day of July, A. D. 1903, at 10 o'clock in the forenoon, he and the same is hereby appointed as the time, and that the Court-Room of Department No. two, of the said Superior Court at the City Hall, in the City and County of San Francisco, State of California, he and is hereby appointed as the place for hearing the application contained in said petition.

AND IT IS FURTHER ORDERED, that publication of said petition be made once a week for four successive weeks in some newspaper, printed in this City and County.

Dated June 17, 1903.

FRANK J. MURASKY,

Judge of the Superior Court.

Endorsed: Filed June 17, 1903.

ALBERT B. MAHONY, Clerk.

By JOSEPH RIORDAN, Deputy Clerk.

The Express Horse.

The lighter classes of the draft type are distinguished by the fact that their work is done almost exclusively at the trot. The first of these is the expresser. This is one of the best highest classes on the market so far as individual excellence is concerned, and horses that fill the requirements are always in demand at strong prices. An expresser is the best finished of all the draft classes. The style of horse wanted is thus described by George M. Rommel, expert of the Bureau of Animal Industry.

Size and Weight—The size and weight vary somewhat, as a matter of course, but, as a general rule, an expresser stands from 15.2 to sixteen hands, and weighs from 1250 to 1500 pounds, or even more, the weight varying with the kind of work, wagon, etc., to which a horse is to be put. In some cases a team hitched to an express wagon will be seen showing all the characteristics of the true drafter, but, as a rule, these horses are for heavy, dray work, and are not looked upon as representative expressers.

Conformation—The most pronounced type of the expresser is a rather upstanding horse with strong, closely coupled body, considerable width of chest and hips, sound, clean legs and particularly sound feet. Special stress is placed on the health, quality and conformation of the feet. Excepting the class following the bussers, no class of draft type has to undergo the same amount of strain on the feet as the expresser. Hauling a loaded wagon at a trot soon tells on any but the best organs of locomotion.

When the expresser is said to be upstanding the inference should not be that he could be dominated as "leggy." This extreme is to be absolutely avoided, and as between the two, a horse with short legs is much preferable. Buyers demand a sensible medium. The most striking features in the conformation of an expresser are (1) his high finish with considerable weight—"a draft horse with coach finish"—and (2) his rather upstanding appearance as compared with other draft classes.

Action—His work makes the trot of an expresser his most important gait. It should above all things, be straight, frictionless, as smooth as possible, and quick and regular. The walk must be similarly developed.

Demand—The express companies constitute the ruling factors in the trade for this class of horses, but other lines of business that require an extra good light delivery horse find in the expresser such an animal as they desire. The lighter teams of the packing companies are heavy expressers, weighing from 1450 to 1550 pounds.

Five companies buy their horses very much after this type, getting a somewhat "tippy" animal that shows much intelligence and courage. Police horses come from somewhat similar sources.

Stock and Dairy Notes.

Flavor does not come by chance. Every intelligent butter-maker is fully aware of the uncertainty and the difficulty of producing a uniform high flavor. Experience has taught us that when certain processes are followed the resulting product is ordinarily of at least fair quality. But even under the best sanitary conditions the product is often strikingly variable in flavor from day to day.

A fairly good cow should give about two hundred pounds of butter in the season with good treatment. Many really good cows give as high as 320 to 350 pounds of butter in a year.

Bear in mind that a gallon of inferior cream that is mixed with other cream in bulk will cause an injurious fermentation to spread through the entire lot, the result being a butter that will go rancid if kept any time after being made.

The longer the calf is left with the mother the harder it will be to teach it to drink. The longer it is left with the cow the harder it will be to wean, and the more foolishly the cow will act when weaning is attempted. To teach a calf to drink will require patience and some tact.

If a cow is fractious a halter passed round her horns gives a man greater power over her than if it is passed round the neck, but there is nothing like patience if she is to be humbled. The owner should stand at her head while the man is milking, and talk to her, giving her a few pieces of apple or beet, and encouraging her in every possible way. If she is roughly used she will only become worse, and probably overturn the pail or put her foot into it more often.

A stabled cow should never be without a lump of rock salt, as it is not only an agreeable condiment, but it often prevents her losing her appetite, and contributes materially to her health.

A cow which is fond of tossing her head when handled and, whether in play or wickedness, endangering the by-stander, should at least have her horns tipped with knobs, for we have known one death and several accidents through lack of this precaution.

Sober up on Jackson's Napa Soda.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

"SAVE-THE-HORSE"

—TRADE MARK—

.....SPAVIN CURE.....

Horse 13 Years Old With Spavin 7 or 8 Years Old Made Sound
4 Bottles CURES 5 Cases.

Received by Registered Mail.

NORTH CHICAGO, ILL., May 11, 1903.

Enclosed find \$5 for one more bottle of "Save-the-Horse." I have used four bottles and cured five cases with your remedy. I bought a colt the other day with two soft curbs which I hope to remove with this bottle.

WILLIAM C. ANDERSON, D. V. S.,
Office—Goss House, North Chicago, Ill.

On receipt of the above we wrote and asked Mr. Anderson if he would kindly favor us with a detailed report of each case.

No stronger facts can be contributed to advance this humane cause than letters like the following.

Note the usual method of terrific torture resorted to now eliminated by treatment with "Save-the-Horse."

NORTH CHICAGO, ILL., May 18, 1903.

Troy Chemical Co., Troy, N. Y.

Gentlemen:—Here is a report of the five cases that I have treated with your "Save-the-Horse" spavin cure.

The first was Chester Chief, thirteen years old, bred and raised by George Hagen of Waukegan. When three years old he was broke and driven for two years by John Swanbrough. Late in the season of the second year he developed a large bone spavin on his left leg, and he was put into the hands of one of the foremost veterinarians in the country. He fired and blistered him. Instead of benefitting the horse, he became so very lame that driving him was out of the question. Hagen became disgusted and sold him. The purchaser put him into my hands, and I tried ———. I put it on good and plenty and let it remain all night, and in the morning a good big hole was bored out in the spavin. I healed the sore, but the horse was still dead lame. I then mixed equal parts of crystal iodine, corrosive sublimate, quicksilver and lard and applied a little every day for five days. It gave the horse great pain, and the entire leg swelled badly. The whole spavin cracked around and looked

as though it would drop out, but it did not. I healed the place up and sent the horse home as lame as ever. There was nothing more done until about five months ago. I then took charge of him again and began using your preparation, "Save-the-Horse." Four weeks' treatment seemed to make him a great deal lamer; hunch became very tender and sore, and remained so for about a week, then he began to get better. I kept right on treating him, and to-day he goes perfectly sound and can trot in thirty, which is as fast as he ever could trot.

The other four—one was a hog spavin and thoroughpin combined. The horse is a four-year-old, a Clyde, and the formation was about a year old and yielded to two months' treatment, when the entire hunch and lameness disappeared.

The others were ringhones on the hind feet. They were not large, but colts were dead lame. Lameness disappeared in about twenty days in each case, but it took me nearly three months to get the bunches down. They were large, heavy colts, a cross between the Hambletonian and Clyde. I used four bottles to effect these five cures.

W. C. ANDERSON, D. V. S.

P. S.—I have been treating spavins for forty years, and "Save-the-Horse" is head and shoulders above anything I have ever tried.

I cured up a case of grease heel of three years' standing with your Veterinary Pixine. I tried to cure this case a year ago, but could do nothing with it. The legs were badly swollen and cracked, a nasty, gummy pus oozing out, legs wet all the time. I told Dr. Colwell I intended to cure it, and he asked if I were going crazy. He said there was not a man living who was able to heal up those legs. I showed him the horse last week, and he examined him and pronounced him sound. He said, "You have discovered the right thing." I took a flannel rag about four feet long and saturated the middle of it with nitric acid, took hold of each end of it and sawed it right into these cracks. Then I went ahead with Veterinary Pixine, according to your directions, and in two months and a half I had the horse well. I hurned it several times more by touching bad places with a feather dipped in nitric acid. He is a draught horse, and was owned by Judge Upton of Waukegan. He sold him five months ago for \$30, but to-day he could not be bought for \$150.

"SAVE-THE-HORSE" CURES WITHOUT SCAR, BLEMISH OR LOSS OF HAIR.

"Save-the-Horse" can be applied at any time, anywhere, any place, and in all conditions and extremes of weather. Horses may be worked as usual with shin or ankle boots, as no harm can possibly result from scalding of limb or destruction of hair.

\$5.00 PER BOTTLE.

Written guarantee with every bottle given under our seal and signature, constructed solely to satisfy and protect you fully. Need of second bottle is almost improbable, except in rarest of cases. Copy of booklet and guarantee sent upon application.

POSITIVELY AND PERMANENTLY CURES

Bone and Bog Spavin, Thoroughpin, Ringbone (except low ringbone), Curb, Splint, Capped Hock, Windpuff, Shoe Boil, Weak and Sprained Tendons and all lameness,

if you have a case different than described in our booklet or advertising we will advise you frankly as to the possibility of the remedy effecting a cure. Give explicit particulars. Give the veterinarian's diagnosis if he is competent. Inform us fully as to the age, development, location and swellings, lameness, action and previous treatment.

QUINN'S OINTMENT FOR HORSES

stands at the head of all veterinary remedies. Such troubles as Spavins, Curbs, Windpuffs, Splints, Bunches have no terrors for a horse if the master keeps and applies Quinn's Ointment. All well known horsemen speak of it in the highest terms:

Miller & Sibley of Franklin, Pa., owners of St. Bel, brother of late Bel Bor, write, "We have used Quinn's Ointment with great success and believe it fulfills all claimed for it. We cheerfully recommend it to our friends." For Curbs, Splints, Spavins or Bunches it has no equal.

Price \$1.00 per package. Sold by all druggists, or sent by mail.

In Addition to the Harness Events Liberal Purses will be given for Runners.

CONDITIONS.

Entrance fees five per cent of Stake or Purse (and five per cent additional from money-winners), payable July 15th, when horse must be named.
Money divided fifty, twenty-five, fifteen and ten per cent of Stake or Purse.
Horses not winning a heat in four shall not start in fifth heat, except in a field of eight or more starters, and then it must win a heat in five or go to the barn. Horses so ruled out shall have a right to a share of the Stake according to their rank at the close of the last heat.
Right to transfer or substitute entry in any of the above Stakes open to August 1st to horses eligible July 15th.
The Association reserves the right to declare off and return payments in any Stake or Purse that does not fill satisfactorily to the Association. Right reserved to declare two starters a walk-over. When only two start they may contest for the entrance money paid in, to be divided seventy per cent to first, and thirty per cent to second horse. A horse distancing the field shall be entitled to first and fourth money only, and in no other case will a horse be entitled to more than one money.
Other than specified, rules of the National Trotting Association, of which this Association is a member, to govern, except hobbles are not barred on pacers three years old and upwards.

Entry must plainly state name, color, sex and breeding of both sire and dam, with owners signature and address.
Two horses may be entered from the same stable in the same class and held but for one entry fee. No conditional entries will be considered.
Drivers must have colors and not fail to mention them when making entries.
Declaration of intention to withdraw a horse must be made by 7:00 P.M. on the day preceding race. The Association reserves the right to use its discretion as to unfavorable weather conditions.
Entry fees to accompany nominations and to be made payable to A. T. Van de Vanter, Secretary and General Manager King County Fair Association.
Applications for stabling must be made to the Secretary, stating the number of horses to arrive. In case of any subsequent change in the movements of the stable, or any part thereof, a prompt notice is earnestly requested. Horses should be shipped in care of King County Fair Association, Seattle.
Arrangements will then be made for their unloading at the race track.
Ample notice of the dates upon which these stakes and purses are to be decided will be given.

In addition to the above Special Purses will be offered for Overnight Closing Harness Events.
Any information pertaining to the meeting will be gladly furnished by the Secretary upon application.
Address all communications and inquiries to

A. T. VAN DE VANTER, Secretary and General Manager

Terms—One Year \$3, Six Months \$1.75, Three Months \$1
STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter addressed to F. W. KELLEY, 36 Geary St., San Francisco, Cal.
Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

San Francisco, Saturday, July 11, 1903.

THE CALIFORNIA CIRCUIT will open at Vallejo Thursday, August 13th and three days' racing will be given, closing on Saturday the 15th. The following week the Grand Army encampment will be held in San Francisco, and as excursion trains from all points will be run to the metropolis that week, no district association will hold a race meeting. On Wednesday, August 26th, the Pacific Coast Trotting Horse Breeders will open their big annual meeting at Petaluma. It will continue four days, ending Saturday, August 29th. The following Monday the California State Fair will open at Sacramento, during which there will be two weeks of racing as usual, closing September 12th. The next move will probably be to Pleasanton where a three day meeting will be held. Woodland may not be in the circuit this year after all, although no official announcement has been made as to whether a meeting will or will not be held there. Los Angeles will give three weeks of racing beginning October 10th, closing the circuit. Never has the California trotting circuit been so demoralized as this year. When Gov. Budd vetoed the appropriations for district fairs, the Breeders Association stepped into the breach and gave several meetings and a number of the districts gave meetings without State aid. This year, however, there has been an apathy on the part of district boards and others that has utterly demoralized the former circuit and harness horse owners will have but little opportunity to earn money in California with their horses. Everything pointed to one of the most successful circuits of district fairs ever held in the State until Governor Pardee cut off the appropriations therefor, but that act led every district board to retire from the field in disgust. The long delay of the Governor in filling the vacancies on the State Board of Agriculture put back the announcements of that association several weeks and its race program which will be announced next week will doubtless suffer much from the delay. Governor Pardee's action in these matters has demoralized a business that pays many thousands of dollars annually to the State treasury in the shape of taxes, and has caused a very heavy loss to the breeders and owners of horses.

LOS ANGELES WILL GIVE A MEETING as usual this year, beginning October 10th and continuing through to the 31st, giving three weeks of racing. Lessee J. W. Brooks has succeeded in getting the permission from the City Council of Los Angeles to hold a meeting at which betting on the races will not be prohibited, and he will bend every effort to secure the best horses that can be brought to Los Angeles to start for the purses and stakes which he will offer. There will be purses for runners, trotters and pacers, with auction pools and mutuals only on the harness events and hooks on the running races. Mr. Brooks has always hung up liberal purses and will try to make the Los Angeles track more popular than ever with all classes of horsemen. He expects to have his program out in a few days. The track will be put into the best possible condition, the club house and grand stand renovated, and everything will be spick-and-span when the meeting opens. There was no appropriation set aside for a fair this fall by the last legislature, but Mr. Brooks has stepped into the breach, and with the aid of the city council, will give an independent meeting. This will add three weeks to the California circuit, and there is every prospect now of there being at least eight weeks of good harness racing for horses that are in California.

A ONE-DAY HORSE SHOW was recently held at Toronto, Ontario, and proved a tremendous success. The show came off on July 3d, and differed from all previous shows heretofore held "inasmuch as it was all over in one afternoon and that despite the fact that as many horses were displayed and judged

as is ordinarily the case with the big metropolitan exhibitions which last a week. The beautiful Queen's Park and University Oval, which furnish a roadway around adjoining circles of more than two miles, were utilized for the exhibition. Throughout the length of this route were ranged upward of five hundred horses and carriages which were entered in the show. Simultaneously several score of expert judges began their work and in less than an hour the prizes had all been awarded. Then the whole exhibition moved in procession around the oval and passed in review before the Governor General, Lord Minto and other dignitaries who occupied the reviewing stand." Here is an idea for Californians who have been demanding a horse show for some time. By holding the show during one day out of doors, four-fifths of the expenses usually attached to an exhibition of this character are saved and the public gets a better chance to inspect the horses than at a show which extends over three or more days and is held during the day and night. The Toronto idea is bound to meet with popular favor and we hope our California horse show enthusiasts may take it up and hold one on the same lines

THE SECOND AND FINAL SALE of the horses belonging to the estate of the late Henry Pierce will be held at the Occidental Horse Exchange in this city on Wednesday, July 22d. The horses consigned are broodmares, geldings, colts and fillies, and seven of the two year olds have worked quarters in 35 seconds or better at Santa Rosa, and among the broodmares are a number of producers. Mr. Layng advertises that there is not an inferior animal listed, and all are sound and without blemish. In the big advertisement which appears in this issue of the BREEDER AND SPORTSMAN, every animal's pedigree is given. The list should be carefully perused by buyers, as it contains the names of many that have made and are making trotting horse history. Catalogues will be out next Tuesday. Send for one.

The Salisbury Horses at Empire Track.

Sam C. Freeman writes under date of July 2d as follows in the *Trotter and Pacer*: "Last Friday the veteran trainer, Monroe Salisbury, took a hand in putting the Empire City track in good shape for speed, and under his instructions it was worked into first-class shape, being good and fast for some workouts which he wanted to send his horses, as well as for the matinee of the Driving Club, Saturday. Ben Walker, who does the driving for the Californian, was kept very busy almost all day Saturday, and Mr. Salisbury showed several of his friends a lot of speed. The California trotter, Monte Carlo 2:09, was given his last fast workout prior to his being shipped to Detroit, where the stable will begin the season across the river at Windson. That good son of Mendocino reeled off a mile in 2:11 without the slightest trouble, negotiating the last half in 1:04, acting very much as though he could have knocked off the seconds and fraction, had he been asked to do it. He was given other miles, but not so fast. The decorated pacer, Mush, which is still just as much of a curiosity to the regular visitors to the track as he was when he first arrived, was also given three or four miles at a good, round clip. His fastest mile was in 2:11, with a final quarter in even 30 seconds. The tight little mare Trilby Direct was the sensation of the morning's work. Her fastest mile was not surprising. It was caught by several watches in 2:15, but she cut loose for a quarter on the hack stretch which she knocked off in 29 seconds as smooth as oil, and the three year old, Daphne Direct, marked up a quarter to her credit in 30 seconds, doing it in excellent style. Judge Green was given three or four miles with the fastest in 2:20, the last quarter in 32 1/2 seconds, and Daniel O'Dell's big mare, M. M. D., went a mile easily in 2:14. The M. & M. candidate Monroe, the giant trotter, worked five easy miles around 2:20, and looks in fine shape. He is quite a favorite with Mr. Salisbury, who thinks he is just about as good a trotter as he ever trained. Some of the stable will be started at the Windsor meeting as a sort of a preliminary lesson, then at Detroit and follow right down the line of Grand Circuit meetings."

Mr. A. B. Gwathmey of New York owns a horse in the trotter Forney 2:19 that furnished the members of the New York Driving Club a sensation one day last week. On a wager of \$500 John Howell attempted to drive Forney a half mile in 1:04. The horse won with ease, trotting the distance in 1:02. Forney is by Sidney Prince, a horse bred by the Estate of the late Count Valensin in this State. Sidney Prince is by Sidney out of Crown Point Maid by Crown Point, son of Speculation and Young Martha by Geo. M. Patchen Jr. Crown Point Maid was bred by Billy Donathan.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

Answers to Correspondents.

Constant Reader—Will you kindly inform me through the columns of your valuable paper as to what constitutes a five-cross thoroughbred?

Ans.—No horse will be classed as a thoroughbred that has less than five uncontaminated crosses. That is, every animal in his pedigree within five removes must be a thoroughbred or recorded as such in the American Stud Book or in a recognized stud book of another country. In the tabulation of a pedigree to five removes there are 62 ancestors. All must be thoroughbreds or recognized as such before the horse can be called a "five-cross thoroughbred" which is a term not generally used however.

R. H. Nason, Woodland—Kindly give me through your good B. & S. the breeding of Mountain Boy the horse brought to this State by our lamented friend By Holly?

Ans.—Mountain Boy 4841, was sired by Kentucky Prince 2470 (son of Clark Chief and Kentucky Queen.) The dam of Mountain Boy was Elsie, a daughter of Messenger Duroc and Green Mountain Maid, the dam of Electioneer

Matinee Racing at Woodland.

The Woodland trainers will hold a matinee this afternoon and have arranged the following program:

The first event will be a match walking race for \$50, between horses belonging to R. H. Nelson, A. B. Rodman and Sam Grigshy.

The second event will be an exhibition mile by Det Bigelow's guideless pacer, to heat the track record.

The first race will be between Economist, John Silvy, Sacramento; Mono, Ora Wright, Davisville; Wild Rose, Leona Lillard, Davisville; Celmar, A. E. Mastin; Glen Rose, R. H. Nason.

The second race will be between Bellrose, R. H. Nason; Penrose, W. Mastin; Smuggler, John Norton, Lena A., Ghilin, Yuba City; Polka Dot, Charles Silvy; Sacramento.

An admission of 25 cents will be charged, and the proceeds will be devoted exclusively to keeping the track in proper condition. There will be no pool-selling and no sale of intoxicating liquors.

"Notionate," not Balky.

"The other evening I went out to my country place on business," said a man. "I walked out—just for the walk—and found I had to stay all night." In the morning, as I started to walk in, a nice old colored man whom I knew came along in an old-fashioned carryall, driving a rather fine looking sorrel horse. Jerry drew up at once and took me in, although I protested that I wanted to walk. The horse, old Charles, stepped along in good style for about an eighth of a mile, then he stopped stock still. Jerry urged him a little; but he didn't budge. Then Jerry whipped him a trifle, but the horse never moved. After about five minutes' waiting, he lifted his hoofs and trotted along.

"Jerry," I said, "what's the matter with your horse? Is he balky?"

"No, sah," Jerry remonstrated, indignantly. "Ol' Charles ain't balky—no he ain't. He has got sense—he knows when he wants to rest—an' he jest stops."

"Just then old Charles stopped again.

"Didn't I tell you?" exclaimed Jerry. "Dat horse knows when he wants ter rest. He ain't no balky horse—he's just sense. He got notions, too. W'y I lent him to a feller once to pull a load o' wood t' town, and after dey got out o' sight, a neigh horcom in' hack this way sez: "Mr. Jerry, you better go down aroun' de hill, an' ten to yo' boss. He won't let that fellew drive him t' town wid dat load o' wood. He's done stop stock still in a mudhole an' gone to sleep."

"Dat wuz so, sah. I had ter take ol' Charles outer dat wood wagon an' fotch him hack home; he's notionate, he is."

"All this time the horse hadn't moved. I told Jerry I must get out and walk, but he said:

"No, sah. Set still; set still. When ol' Charles flics his ears that means he's a-gwine ter start up in a minute. Jest you set still, sah."

"Sure enough, in a minute we jogged on again.

"Onc't I lent dis same boss ter a widda woman t' do some errants," continued Jerry. "Den she wuz t' meet me on de corner, an' we'd trahble hack home. Laws! dat widda woman hed ter send a hoy ter tell me t' round t' de hacksmif shop an' g'lt ol' Charles. He didn't like her; she couldn't make him go."

"The horse stopped again, and I jumped out. 'Thank you, Jerry,' I said, 'I'll have to walk; I guess old Charles don't like me.' Jerry looked humble and apologetic.

"I'se mighty sorry," he said, "but hosses will have der ways—same as folks. Ol' Charles is mighty notionate, but he ain't balky."—*Detroit Free Press.*

JOTTINGS.

OILED ROADS are to be found in nearly every county in southern and central California, and where the work of putting the crude oil on the soil is well done a splendid driveway, free from dust in summer and mud in winter, is the result. Different soils require different treatment, but road masters are fast learning the requirements of their sections and the good roads problem is being solved in California by the aid of crude oil which is now one of the State's greatest products.

Oiling race tracks and speedways has been often suggested but there has been a hesitancy in making the experiment as there is no doubt but where the soil is of the proper kind, water and work in generous quantities applied with good judgment make a better footing for harness horses than any oiled track. Water is an expensive article in California during the dry season which begins in May and continues until November, track workers getting no aid from showers, as is the case in the states beyond the Rockies. Tracks well patronized by trainers can afford to pay for the water necessary, but owners of those not so patronized find the burden a heavy one and the result is there are few good summer tracks in this State.

The Commissioners of Golden Gate Park, in this city, have recently made the experiment of putting oil on the speedway, which gives every hope of being a pronounced success. For several years past the roads in the park have been treated with oil and are now in perfect shape for slow driving. The treatment for roads is to roll them when the oil becomes well mixed with the soil, and a hard smooth surface results. An ideal speedway, however, should not have a hard surface but a cushioned one, which is obtained on watered tracks by daily use of a very light harrow. The Park Commissioners therefore decided to work the speedway with oil the same as they had been doing with water, with the exception of course of making but few applications of the crude petroleum. The experiment was begun three weeks ago, and although a roar went up from road drivers at first, it has died out and words of approval are beginning to be heard. In company with Mr. Thomas Bonner, former superintendent of the Santa Rosa Stock Farm, but now a resident of this city, I drove through this speedway on Tuesday of this week, and from a close observation it appeared to be in excellent shape. There is a good cushion of loose dirt on the surface, and to look at it one would conclude that it would be a very dusty track for fast driving, but a horse moving at 2:40 speed threw up but the slightest amount of dust, so little that it was hardly noticeable. What little dust that was raised settled back quickly, the weight of the small particles or atoms being made too heavy by the oil to be carried away by the breeze that was blowing. We noticed one man driving a pacer at probably a 2:30 gait, and he seemed to be bothered a good deal by the small particles of dirt that were thrown in his face by the feet of his horse, but the same thing is noticeable on any watered track, although the oiled particles, being heavier, sting a little more severely. The small pieces of dirt that fell on our lap robe, which was a light gray in color, did not stain or grease it in the least and were shaken off the same as dry dirt. It will take a week or two more to get the oil thoroughly mixed with the surface soil and it should then be an excellent track to speed horses over. It will not be as good as a well watered track, but vastly superior to one that is not so generously treated.

Australia has furnished this country with quite a number of novelties or new fangled ideas. The numbered saddle cloths and the starting gate were both introduced into America by an Australian, Mr. R. E. deB. Lopez, now a resident of Alameda county in this State. The system of secret ballots now in use in many States of the Union is also an Australian invention. Mr. D. J. Price of Canterbury, New Zealand, owner, trainer and driver of the champion antipodean harness horse, Rihonwood 2:09, is the inventor of an appliance to prevent hopple chafing, that will doubtless be in general use in this country before very long. Mr. Price was greatly surprised to see horses on California tracks that had been the victims of hoppers so placed as to chafe their limbs, and remarked to me that in New Zealand the Society for the Prevention of Cruelty to Animals would take cognizance of such cases and hale the owners or trainers before a magistrate. The hoppers are used in New Zealand and Australia to a greater extent in proportion to the number of horses trained than they are in America.

In the races to saddle, which are very common at the trotting and pacing meetings in the antipodes, hoppers are very frequently used and there is scarcely a race for harness horses where "the straps" are not in evidence. Mr. Price is of an inventive turn, and some time ago devised a protection to the legs of the hopped horse that has since come into general use in Australia and New Zealand. These protective devices are called "blooms" or "bloomers" and are made of thin light leather or glove stock, and fit the legs tightly above the hock and knee. They are cut so as to fit closely and on the hind legs are fastened on the front thereof with elastic bands, so that the expanding of the muscles in action is not interfered with. On the front legs the elastic bands are on the back of the leg. The hoppers are put on over these close fitting leggings, and the result is that horses with chafed legs are not seen on the Australasian tracks. Mr. Price has cut out patterns for these "blooms" as he calls them, for several of our California trainers and the chances are that they will be in general use before long. Mr. Price is fully aware that the idea could be patented in America, but says that he has no ambition to make a profit from it and will be satisfied if the device is generally adopted here as he knows that much pain and misery will be avoided by its use and the horses will get the benefit. These "blooms" are held in position by light straps over the hips and withers, that are attached by buckles or snaps that can be released quickly when the horse is unharnessed. They are a humane invention and I hope the Price bloomers will come into general use wherever hoppers are used in America.

Getting Lively at Vallejo.

As the Vallejo meeting will open the circuit in California this year, the trainers are already heading for that excellent training ground and the track presents a lively appearance on workout days. By the end of this month there will probably be a hundred harness horses in training there for the excellent purses hung up by the Vallejo management and a first class meeting is looked for when the racing begins on August 13th.

Mannie Reams, who has been working a string of horses over the Dixon half mile track for the past two months, has moved to Vallejo. The *News* says: He has five horses in his string, two of which belong to him. One is a two year old trotter called Mamie R. She is by Oro Wilkes, her dam being by Belmont. Mr. Reams has a very good opinion of this filly.

His other horse is a green stallion Oro Le grande, five years old. He is by Oro Wilkes, and should be a consistent performer.

Another very attractive animal is a two year old filly by Demonio. She is the property of Rush & Haile, Suisun, and is named for that prosperous city.

Another Suisun horse in the string is a five year old pacing mare Miriam E., the property of Ed Dinkelspiel of the Solano *Republican*. She is by Bradmore, and will doubtless take a low mark during the season.

Little Bahe, the property of Henry Peters of Vacaville, is the other occupant of the Reams stable. She is entered in the 2:25 class trot here at Vallejo and Mannie says he expects her "to get the money."

G. A. Owens, of Concord, has seven stalls. Two are taken up with the thoroughbreds P. A. Finnegan and Enjoyment. In addition he has Lincoln Allen, a trotter with a record of 2:27, a three-year-old pacer called Presumption, a green pacing mare named Swan-hilda, and Orkney Wilkes, also addicted to the side-wheel gait, at which he has stepped to his record of 2:25. Sid Abbott, a two year old trotter, completes the list. Joe Smith is working the bay gelding Hank 2:23, who is expected to be a useful performer on the circuit. McKinley, by McKinney-Daisy S. also promises well. He is a full brother to the stallion Tom Smith, who took a low mark at Denver last week. Mr. Smith has several others in his string. Other trainers are expected to arrive during the week, when the track will present a lively appearance every day.

So much does Mr. Smathers believe he has a champion in Lord Derby 2:05½, that he is going to point him for the world's trotting record of 2:02½, now held by Cresceus.

"I am going to drive Lord Derby to sulky myself this season," said Mr. Smathers the other night, "just to see if he can get the record. Lord Derby showed some great speed last year to wagon. In fact, some of his performances were wonderful and the speed that he has shown has convinced me that his chances of capturing the record are very bright."

The world's ex-champion trotting queen, Nancy Hanks 2:04, was got by Happy Medium. The dam of the coming champion trotting mare, Lou Dillon 2:04½, was by Milton Medium 2:25½, a son of Happy Medium.

More Good Races for Breeders Meeting.

The Pacific Coast Trotting Horse Breeders Association will have one of the best programs of harness races ever offered the California public when their meeting is held at Petaluma during the last week in August.

The four leading stakes that closed June 1st received large entry lists, which have already been published.

Of the stakes advertised to close July 1st four have been declared filled as follows: The 2:30 class trot, \$500, with eleven nominators of fifteen horses; the 2:17 class trot, \$500, with seven nominators of eight horses; the green class pace, \$500, with ten nominators of eleven horses, and the 2:17 class pace, \$500, with nine nominators of twelve horses.

The stakes that did not fill were the 2:13 pace, free-for-all pace, three-year-old pace and 2:11 trot.

New classes have been opened to close August 1st, as follows:

2:12 class trot, \$500.

2:10 class pace, \$600.

Roadster race, for horses without records owned in Sonoma, Marin, Mendocino and Napa counties.

The list of entries received for the four stakes declared filled is as follows:

NO. 5—2:30 CLASS TROTTING, \$500.

B. Croner, gr m Louise Croner by Wild Boy-Abbie S.; br s Erosmont by Eros-Francoisa.

J. D. Carr, s g Larkin W. by Boodle, Jr.-Isabella McCa by Lottery.

F. D. McGregor, b m Gertie H. by Stone Robin-Mabel by Redwood.

W. W. Mendenhall, h m Rosie Woodburn by Easter Wilkes-Lady Beth by Goldnut.

C. F. White, h m Dollexa by Alexis-Dolly Withers by Aberdeen.

S. H. Hoy, blk g Ora Belmont by Ora Wilkes-by Belmont 64.

C. Whitehead, s g Deputy by Derby Ash-by Priam.

P. W. Hodges Co., hr m Lady Zombro by Zombro-Lady Woolsey by Woolsey; b m Una K. by McKinney-Nellie K. by Gen. Grant, Jr.; br m Sona by McKinney-Nellie K. by Gen. Grant, Jr.

L. B. Daniels, b g Sproul by Cal. Lambert-Dorothy Tenant by Clay.

Mr. Ahlers, b g Telephone by Direct.

J. W. Zibble, ch g Getaway by Strathway; b c Swift B. by Star B.-Swift Bird by Waldstein.

NO. 6—2:17 CLASS TROTTING, \$500.

Jas. A. Smith, hr g Hank by Vasto.

C. A. Durfee, b s Cuate by McKinney-Miss Jessie by Gossiper.

P. W. Hodges Co., br m Grace McK by McKinney-Grace Kaiser by Kaiser; h s Potrero by Redondo-hy Junio.

W. W. Mendenhall, gr g What Is It by Direct-Lassie Jean by Brigadier.

J. W. Sampson, gr g Rozelle by Boh Mason.

E. T. Anderson, b m Twilight by Noonday-Miss Sidney by Sidney.

W. S. Maben, b g Zambra by McKinney.

NO. 8—GREEN CLASS PACING, \$500.

L. B. Daniels, ch g Edwin S. by Dr. Hicks-by La Harp.

W. S. Mahen, h g Wa by Wis-Athlea.

J. W. Sampson, b g Victor by Platte; b g Billie F. by Thos. Rysdyk.

C. Whitehead, b m The Mrs. by Derby Ash-Spurwick Girl by Hawthorn.

W. P. Hammer, h h Joe W. by Bay Prince-by Indicator.

John Offutt, r m Mildred O. by Secretary-Vesper Bell by Dawn.

S. A. Eddy, b g Colonel C. by Glenway-hy Nephew Jr.

H. A. Bell, blk m Black Venus by Rajah-by Dexter Prince.

S. F. Martin, b g Tom Carneil by Diablo-Mountain Maid by Cresco.

NO. 9—2:17 CLASS PACING, \$500.

C. W. Welby, ch m Alice Lee by Ferguson-Raindrop by Robert Lee.

W. Mastin, h g Penrose by Falrose-hy Brigadier.

S. Watson, b g Al Sandy by Wayland W.-Rapid Ann by Overland.

S. A. Eddy, h g Cuckoo by Strathway-Edith M. by Milton R.

John Donahue, s m Happy Maid by Happy Prince-hy Sacramento.

W. P. Hammer, b h Joc W by Bay Prince-by Indicator; b m Dot by Falrose-Bessie by Killarney.

C. Whitehead, b g Cranky Thorn by Hawthorn-hy Gen. McClellan.

J. W. Sampson, h g Victor by Platte; b g Billie F. by Thos. Rysdyk.

J. W. Zibble, ch m Pinky H; ch g Monroe S by Dictator Wilkes.

The Kenney Bicycle Co., 331 Valencia St., is doing a big business in the McMurray Carts and Sulkies. You not only save money by purchasing a McMurray but get the most durable, best made, and easiest running cart or sulky in the market. Investigation will convince a Missourian.

One of the very few living daughters of George Wilkes 519 is Nora Wilkes, dam of Norwood 2:12½, owned by Smyser Bros., Lyndon, Ky., and heavy in foal to Arion 2:07½. Smyser Bros. would like to hear from owners of mares by George Wilkes.

Jackson's Napa Soda does not tangle the feet.

Denver Meeting.

MONDAY, JUNE 29.

tremendous crush of people filled the stands, center stretch and letting ring at Overland Park Monday, when the second week of the meeting ended. The sun beat down hotter than it has on previous days, and this, with the natural heat of large a crowd, wilted collars, caused little streams of water to run down backs and made a lively business for the dealer in cooling beverages. The expected happened in the trot, in which race was alleged in some quarters that a surprise was sprung upon the unknowing. The Tout or Bay Leaf were the horses on which whispers had been heard. But neither was able to come up in time to do damage at all. Bay Leaf was bought a few days before by W. A. Clark Jr. of Montana. She was to have gone out and made Jim Ferry look like a poorly matched two-spot. She failed to show any form at all warrant even the passably good things that had been said about her. The race again brought Jim Ferry forward as an M. & M. possibility. He went a race, having plenty of speed to spare in every

the pace went to Hello Girl, the fast Pueblo mare, for a long and stubborn contest. Rey del Diablo showed all the speed at the beginning of the race, trying to fight out each heat with Bonnie Treasure. The third heat Covey brought up Hello Girl, who took the remainder of the heats. Bonnie Treasure showed more speed and gameness than in his other races here.

Arrowpene, the big green pacer from Durango, has been very short of work all spring, but is rounding up nicely into form. His race Monday has given him more courage and faith in him, so that the big horse will be sent East to start in some of the slow classes, making a good partner for Polar Wilkes.

William Zibble, who drove Nance O'Neill, made his first appearance as a driver. He is a son of J. W. Zibble, the well known driver and trainer. Blast, the Cook horse, was poorly handled in the opening heats and made no showing at all. For the third time a good driver was put in the sulky, but too late—the really good animal had been worried and misdirected until his speed was gone.

Hello Girl and Bonnie Treasure were held at about the same money in the books for the first heat of the pace, Rey del Diablo being so little considered that as high as 12 to 1 was laid against him. The heat was between Diablo and Treasure. Loomis driving the latter desperately in an effort to get the heat. The race was just a little short on speed, as Diablo was rather handily. The odds were shortened materially on Diablo for the second heat, as his performance in the first had shown he had speed. The second was again a contest between the Treasurer and the Devil. The Treasurer was again just short of the requisite speed, finishing well up.

For some reason the bettors were induced to place their faith in Fritz for the third heat, and rushed on him until the books carried all the Fritz money they could. Why this happened no one can tell, for he had no chance at all in the heat. Covey brought Hello Girl up and Zibble pushed Nance O'Neill along the way. Nance was not quite fast enough, yielding first place to the speedy Hello Girl. The heat practically decided the race, for Hello Girl refused to allow any other horse to be in the lead in any of the subsequent heats. The summary:

Pacing, 2:23 class, purse \$500.
Hello Girl, b m by Hello.....(Covey) 8 7 1 1 1
Rey del Diablo, ob g by Diablo.....(Bouober) 4 1 3 5 3
Bonnie Treasure, ob g by Bonnie Bellis.....(Loomis) 2 2 6 3 2
Nance O'Neill, b m by Dexter Prince.....(W. Zibble) 3 3 2 4
Blest, Arrowpene, Fritz, Fay Day and Sir Adlen also started.
Time—2:15 1/4, 2:14 1/4, 2:15 1/4, 2:17 1/4, 2:17 1/4.

Jim Ferry continued his successful campaign as a trotter, winning the 2:35 class event with some ease. Bay Leaf made her first Denver appearance and did not go as fast as had been expected because of her poor performance in the state circuit. Twice she took a carry to the half in remarkably good time, and once she cleared into the stretch. Ferry had her at all times, and usually finished his heats in a jog. It was decidedly the best form he had shown during the meeting.

Geta way, that had appeared to have the speed in a race last week, did not make any kind of a showing. The pace set in the last heat was very much too fast for him. The Tout made a race in only one heat, the third, and then failed to come up to Ferry's speed. The summary:

Trotting, 2:25 class, purse \$1000.
Jim Ferry, b g by Orange Wilkes.....(Frenk) 1 1 1
Arkwood, b b by Silver Thorne..... 2 2 5
The Tout, b k g by McKinney..... 4 3 2
Congressmen Sibley, Geta way and Bay Leaf also started.
Time—2:17 1/4, 2:14 1/4, 2:16 1/4.

TUESDAY, JUNE 30.

The one harness race on the programme at Overland yesterday was decided in four heats, when really three were necessary.

After the accident to Viometa in the first heat of the trot there was only one horse that was at all considered. Tom Smith had the speed for each heat and should have taken them all. The only excuse for not going after the first was that Mar Boy got a start while the driver of Tom Smith was watching Viometa. In the second heat Carr laid up with Mar Boy, which accident was so evident to every one on the grounds that the judges took action. The driver was fined \$25. Thereafter he went out after heats, but was unable to beat the great son of McKiooey. In the first heat Viometa tore shoe and toe weight from one of her feet, putting her so far out of it that she was distanced.

Viometa and Tom Smith were equal favorites for the first heat of the trot, as both were known to have speed of about 2:10. The accident to Viometa put her out of it entirely. That Mar Boy was laid up during the second heat was so plain that the judges fined the driver. Thereafter he stood no chance at all, though he was driven hard in the stretch for both heats. Tom Smith could have made the mile in 2:10 or better if he had been pushed. The summary:

Trotting, 2:17 class, purse \$500.
Tom Smith, b b by McKinney.....(J. W. Zibble) 2 1 1 1
Mar Boy, b g by Delmar, A. M. Carr.....(Cerr) 1 4 2 2
H. H. H., ob m by Allerton, J. W. Miller.....(Miller) 3 2 3 3
C. K. W. and Viometa also started.
Time—2:16 1/4, 2:17, 2:13 1/4, 2:15 1/4.

WEDNESDAY, JULY 1.

Another large crowd was at the track on Wednesday.

The prophets had decreed that Polar Wilkes, who made his first appearance in Denver a year ago, was the natural winner of the 2:11 pace. His owners and his driver declared that the horse was short of work and could hardly win. He was also found to be a little lame. Martha B. was picked by the Pueblo contingent and Lulu M. by those present from Florence. Few believed that Jess C. had much of a chance for the race under any consideration.

The first heat was one of the most heart-breaking heats of the whole race meeting. Lulu M. was set to win it if she had to break a leg. Martha B. was also out for the heat. These two made a race of it for three-quarters of the mile, when they were pretty well pulled out. They went to the first quarter in 31 seconds, and to the half in 1:02 1/4. The three-quarters was reached in 1:37. But from that point in the two leaders fell away, the last quarter being paced in 37 1/2 seconds. The second heat was between Martha B. and Jess C. up to the stretch, when Polar Wilkes came up. Lulu M., Primrose and Monroe S. were in distress through the second heat because of the fast drive in the first. They formed a little bunch that made the mile pretty well in the rear of the others, and when they arrived at the distance pole found the flag down.

The third heat was another duel between Martha B. and Jess C., the Pueblo mare proving a trifle faster in the stretch. Loomis, with Jess C., was also at a disadvantage. He got "pinched" trying to find an opening between sulkies when he might have gone around and made his gain. Both Polar Wilkes and Shecam were reported to have torn off shoes in the heat. The fourth heat found Martha B. at 1 to 2 in the books. Polar Wilkes being at 4 to 1. Polar Wilkes won the heat so easily that the judges were suspicious of the heat. Mr. Miller was ordered down from behind Martha B. and Joseph McGuire was asked to drive in the fifth.

The action of the judges was open to some criticism, for the starter did not protect Martha B. in getting away for the fourth heat as he should. The other horses were under better headway and were in advance of her. Having got the worst of the start, Mr. Miller claims that he was so placed that he would have tired out his mare if he had tried to bring her up on the others and caused her to probably wear herself out and he distanced in the next heat. Mr. McGuire drove one heat and then reported to the judges that the mare was pretty tired, was doing her best and he thought Mr. Miller could bring her up better than any other driver. Mr. McGuire's report was accepted and Miller restored to his sulky.

A tired lot of horses came up for the sixth heat. Jess C. showed an unexpected recuperation and won, all driving fiercely through the stretch. Again in the seventh the race was a good one all the way, hard whipplog being resorted to in the stretch. Again in the eighth only the grit and gameness of the horses kept them going. They had been driven some very hard miles, faster than it was supposed some of them would ever be able to go. Loomis' careful driving of the winner secured the best part of the prize for R. S. Gutshall. The summary:

Pacing, 2:11 class, purse \$500.
Jess C., ob g by Calota.....(Loomis) 3 1 2 4 3 1 2 1
Martha B., b m by Asbland Wilkes.....(Miller) 2 3 1 2 2 1 2
Polar Wilkes, ob b by Eric Wilkes.....(Carr) 4 2 1 1 3 2 3
Shecam, Lulu M., Primrose and Monroe S. also started.
Time—2:14 1/4, 2:13 1/4, 2:12 1/4, 2:17 1/4, 2:15, 2:17 1/4, 2:30 1/4, 2:19 1/4.

Allesandro, the California entry, had the speed in

the two year old trot, though he did not win the first heat. The talent knew that the Californian was the best horse, so that lots of money went into the boxes on him for the first heat. When it was presented to Bi-Carbonate this money was burned. Mr. Zibble, the driver of Allesandro, explained that the Walter Wood horse had been heating him in all the trial workouts on the track, so that he was afraid of the Colorado horse. He came up to the stretch, he said, but found it too late. The other heats went to Allesandro in rather hollow style, proving his right to the careful consideration of those who expect to meet him in two year old contests later. The mark of 2:40, made in the second heat, is the best that has been given a two year old trotter on the Overland park track. Allesandro should be able to enter "the list" before the close of the present racing season. The summary:

Trotting, 2 year olds, purse \$500.
Allesandro, b c by Abeneer, J. W. Zibble.....(J. W. Zibble) 2 1 1
Bi-Carbonate, g o by Carbonate, Walter Wood.....(Wood) 1 3 2
Happy Lotta, b f by Happy Allerton, A. G. Bixler.....(Bixler) 3 2 2
Time—2:40 1/4, 2:40, 2:43.

THURSDAY, JULY 2.

The one harness race of the day was the special pace to wagon. The entry list showed four horses, of which Billy Carrew was selected for the favorite in the first heat. Joe Mack was a second choice. Billy Carrew burned up all the money that was back of him by breaking in the first quarter. His driver was not able to handle him well, so he continually lost ground. The second heat was almost a repetition of the first. Abe B. was shoved into second place in both heats because of the skill of his driver. The summary:

Pacing, special to wagon, purse \$350.
Joe Mac, b g.....(Ed. Woodworth) 1 1
Abe B., b g by Re-Echo.....(J. K. Stuart) 2 2
Billy Carrew, b g by Superior.....(J. A. Osner) 3 4
Queen of Diamond, ob m by C. H. K.....(T. A. Bowen) 4 3
Time—2:20 1/4, 2:20.

No racing was held Friday, owing a heavy rainfall.

SATURDAY, JULY 4.

The Overland race meeting came to a close on the "glorious fourth" with a long program that was most successfully carried out. The crowd was the largest of the meeting and on all sides were heard words of praise and commendation for Secretary Wahlgreen, to whose excellent management was due the success of this, the best meeting ever held in Denver.

The track was very heavy, owing to the rains, and fast time was out of the question, but the harness racing was good throughout. County Attorney and Rey del Diablo were the California bred horses to start in the first race. County Attorney won the first heat, but was outclassed by Laura Spurr in the remaining three heats, which were won by the daughter of W. C. P. much as she pleased. Rey del Diablo was third in the last heat, but got no money.

In the 2:30 class trot the gray gelding Jim Ferry won easily in straight heats. Swift B., the three year old by Stam B., was a starter in this race, and after finishing second in the first heat was third in the next and fourth in the final heat, and got third money. It is asking a good deal of a three year old to start him against aged campaigners that have shown better than 2:15 in their work. The summaries of the day's races follow:

Pacing, 2:17 class, purse \$500.
Loure Spurr, ob m by Wm. G. P.....(Raybould) 3 1 1 1
County Attorney, b g by Arthur Wilkes.....(Perr) 1 2 7 7
Young Hel, Russell S., Rey del Diablo, Raven Dixon, Helen Mer, Blest, Gayfield and Pinky H. also started.
Time—2:18 1/4, 2:17 1/4, 2:17 1/4, 2:16 1/4.

Pacing, free for all, purse \$500.
Winfield Stratton, b b by Saraway.....(McGuire) 1 1 1
Lottie Smart, b m by Roswell.....(Loomis) 2 3 2
Daisy Field, Miss Williams and Dora Delpe also started.
Time—2:15, 2:14, 2:14.

Trotting, 2:30 class, purse \$500.
Jim Ferry, b g by Orange Wilkes.....(Frenk) 1 1 1
Congressmen Sibley, b b by Ceilian.....(Colburn) 3 2 2
Swift B., b b by Stam B.....(Zibble) 2 3 4
Aunie G., ob m by Otto Wilkes.....(Conolly) 4 4 3
Time—2:24, 2:21 1/4, 2:24 1/4.

Millard Sanders Will Train Lou Dillon.

In view of the wonderful performances of Lou Dillon at Cleveland, the following dispatch from that city quoting Mr. Billings' intentions as to the mare's future work, will be of interest: Lou Dillon 2:04, now the world's champion wagon trotter, and John A. McKerron 2:05 1/4, are candidates for the crown of Cresceus 2:02 1/4. "She has done more than I asked of her, and she has left nothing more to be done to wagon," said Mr. Billings of Lou Dillon. "There is only one other laurel that will do her credit now, and that is the world's record to sulky. She deserves an opportunity to win that honor, and it shall be given her. She will be turned over to the exclusive care of Trainer Millard Sanders, and he may handle her as he likes. His object will be to demonstrate that Lou Dillon is the fastest trotter in the world, and I have abundant faith that he will succeed. Lou Dillon is marvellous. I believe no other horse ever possessed such a flight of speed. If she but retains her form nothing can keep her from the greatest triumph that a trotting horse could gain."

Notes and News.

Vallejo meeting opens August 13th.

Seattle entries close next Wednesday.

The State Fair program will be out next week.

Brinsy K. 2:19½ by Strathway is in W. G. Durfee's string this year.

Big fields will be the rule at the Breeders meeting at Petaluma.

W. G. Durfee is expected to arrive at Vallejo with his horses next week.

Ben Walker drove Monte Carlo a mile in 2:08½ at Empire track last week.

Vallejo has opened three additional purses of \$300 each. See advertisement.

Robizola may be a starter in the M. & M. if a nomination can be secured for her.

Millard Sanders worked Robizola a mile in 2:12½, last half in 1:05½, two weeks ago at Cleveland.

You have doubtless noticed that no California horses have been named Governor Pardee this year.

A report comes from Cleveland that Kelly Briggs 2:10½ has been turned over to Millard Sanders.

Gen. Nelson A. Miles is the president of the recently organized Washington Road Drivers' Association.

Det Bigelow of Woodland has a guideless pacer that has worked a mile in 2:20 hitched to a bike without a driver.

Walter Mahen has A. Ottinger's new purchase, Zambra, 2:16½ in his string and will start him at the Breeders meeting at Petaluma.

Note the big advertisement of the second sale of horses belonging to the estate of Henry Pierce. It occupies a half page in this issue.

The State Board of Agriculture will meet at Sacramento to-day. It is expected that a speed program of harness races will be agreed upon.

Castor, a gray gelding by Dictator Wilkes, won the 2:30 pace at Alexandria, South Dakota June 18th in straight heats. The fastest was 2:25½.

Cuáte 2:18, that took his record as a three year old last year is working nicely at San Jose and should reduce his mark several seconds this year.

Mr. A. B. Spreckels left for Chicago last week to be present when his consignment of thoroughbred yearlings was sold. The sale was set for the 10th inst.

Geo. Beckers may go east with Zombro 2:11 next year. He has received some very flattering offers to take McKinney's greatest son across the mountains.

The winner of the two year old trotting division of the Breeders Futurity to be decided at Petaluma next month will earn \$825—quite a neat sum for a two year old to add to his value in one race.

Los Angeles will give three weeks of racing in October and harness races will be on the card every day. Auction pools and mutuals will handle the money on harness events, books being barred.

One week from Monday next the Grand Circuit will open with the big meeting at Detroit. The Chamber of Commerce is to be decided on the first day of the meeting and the M. and M. on the following day.

That Indiana complimentary stake inaugurated by the *Western Horseman* is getting entries from everybody everywhere. It will not be a question of "are you in," but "are you out" when the stake closes.

Trainer Ben Walker rode some fast miles at the Empire City track a week ago last Saturday. He worked Monte Carlo a mile in 2:11½, the green pacer Mush in 2:11, and the speed way trotter Miss Overton in 2:17.

The Memphis shoe has been patented. Now all those inventors who have been claiming that they made shoes on the Memphis plan years ago will have to admit that Mr Lake at least beat them to the patent office.

Coney 2:02 wintered at Columbia, South Carolina, along with Chain Shot 2:06½, and several others belonging to R. L. Davis, but has been sent to Empire City track and will be used in the matinees of the New York Driving Club.

Miss Williams 2:09½ was a contender in the 2:08 pace at Denver last week, and was well to the front with the fast Harry Logan 2:12½ and Winfield Stratton 2:08½. This is her tenth consecutive year at the races. She is a wonderful old mare, but even so dear old aunt Effie Powers 2:08½ antedates her, having started one year previous to Miss Williams' time.

Mr. R. H. Russell of Stockton has sold his hay gelding by Directum to Messrs. Pettie & Price of New Zealand. This horse is a green pacer but quite promising. Fred Cbadbourne has been training him at Piasanton.

The breeding of the dam of Mush has been cleared up and is as follows: By Richard's Elector, out of a mare by Geo. M. Patchen Jr., next dam by Williamson's Belmont. It is said this pedigree can be proven beyond a doubt.

From Cleveland comes the report that Ed. Geers is not having his usual success this season with his string of horsses. His Chamber of Commerce entry, High Pointer, has been sent home, and he has numerous other disappointments.

Horsemen who have visited the Santa Rosa Stock Farm since the track was recoted with soil say that it is better and faster than ever, and is just about perfection for a trotting track. Pity a meeting could not be given there this year.

Katherine A, that took a two year old record of 2:14 last season is training well and recently trotted a quarter in 32 seconds, last eighth in 15½ seconds. It looks as if she would be one of the great three year olds of 1903. She is by Wiggins.

Alberta 2:25 by Altoona owned by Mr. W. Parsons of Salinas, foaled a fine bay colt June 30th by McKinney 2:11½. "He is a top notcher in every respect," writes his owner. He is probably the last colt McKinney sired before he went East.

Now that the racing season is about to open, see that your medicine chest has a supply of Vita Oil. It is the greatest remover of pain and soreness that can be found. It does the work and does not blister, and is as good for men as for horses.

Effie Logan, dam of the whirlwind pacer Sir Albert S. 2:03½, foaled a handsome filly, full sister to that horse, on the 7th inst. Mr. William G Layng has booked Effie Logan to Demonio, full brother to Diablo, and she will be bred to him next week.

Messrs. Price and Pettie of Canterbury, New Zealand, have already purchased five horses for shipment to that country. They will probably select two or three more before their steamer sails. A full list of their selections will be printed next week.

Peter Weber advertises that he has opened a public training stable at Emeryville and will train race horses and polo ponies. Mr. Weber is a vetran with much experience and his system of training keeps the legs and feet sound and in good shape. See his advertisement.

Lou Dillon knocked another half second from the matinee record on the 4th. She pulled a wagon a mile on the Cleveland track that day, driven by Mr. Billings, in 2:04½, within a half second of Alex's sulky record. Millard Sanders has charge of her training again.

Mr. J. H. Fogarty of Bakersfield owner of Richmond Chief, one of the handsomest and gamest trotting stallions in America purchased quite a number of well bred mares at the recent Pierce sale to breed to the little blue horse. It's dollars to apples he gets a 2:15 performer or two out of his first batch of colts.

The Seattle Driving Club proposes to hold an inter-city matinee race meeting some time in August, and members of driving clubs in Portland, Tacoma, Spokane, Everett and other nearby cities will be invited to participate. A handsome silver cup will be awarded the club winning the most events.

Climax, the chestnut mare by Charles Derby that took a record of 2:18½ last year at the Mineola track, New York, started in the 2:16 pace at Brooklyn last week at the meeting of the Parkway Driving Club, and won two heats and record money. She paced one of her heats in 2:18½. The track is a half mile affair.

Dr. Boucher was due to reach Pleasanton to-day with his string of horses that he has been racing at Denver. He has Miss Logan 2:06½, Harry Logan 2:12½ and Rey del Diabolo. The latter reduced his record to 2:14½, but failed to win a race. Harry Logan showed speed but got off and did not win. Miss Logan did not start.

When Billy Red worked a mile in 2:12½ for his new owner, Mr. J. R. Springer of Pleasanton, a few weeks ago, a bystander turned to Mose Hart who sold him to Springer and remarked, "I guess you let a hrd go, didn't you, Mose?" "No," was the rejoinder, "I sold Mr. Springer the 'bird' and he is the one that seems to be 'letting him go.'"

Eula Mao 2:17½, winner of the Occident Stake as a three year old, is now owned by Mr. J. G. Bennett, President of the Pittsburg, Pa., Driving Club. At a matinee there on June 27th, she won over four competitors in straight heats, pulling a wagon in 2:18½ and 2:15½. She trotted an exceedingly game race and won the last heat by a head.

Kenney the hickman of 531 Valencia street sent away two of those handsome McMurray sulkies last week. One went to W. J. White of Hanford and the other to John Phippen, who is training several horses at San Jose. The sulkies are enameled in white with gold trimmings. They are perfect beauties, and will be seen on the circuit this year.

Every one will rejoice to learn that Mr. Lawson's trainer Paige has Boralma 2:07, going sound and well and that the gelding is taking his preparatory work in fine shape. Boralma has not been worked out faster than 2:25 as yet, but the season is yet young. It is said that Mr. Lawson proposes to drive him somewhat in the matinees of the Boston Gentlemen's Driving Club.

James W. Rsa of San Jose has recently been made bappy by the arrival of a couple of foals at the Vendome Stock Farm. Much Better 2:07½ has "the finest filly you ever saw" by McKinney 2:11½ that has been named Mrs. Waller. Iranella (daughter of Iran Alto 2:12½ and the good thoroughbred mare Filirtilla) is also a proud mother and has a McKinney colt at her side. He has been named Alto Kinney.

Mr. T. J. Crowley of this city, who is one of the Directors of the Pacific Coast Trotting Horse Breeders Association, will leave next week for the East on a business trip. Mr. Crowley will be accompanied by his wife and they will aim to be at Cleveland during the week of the Grand Circuit meeting. Mr. C. has promised to tell the BREEDER AND SPORTSMAN'S readers how Grand Circuit racing appears to a Californian.

Frank, the bay gelding by Secretary owned by Mart Demarest, won the 2:09 pace at the Saugus track June 26th. There was a field of seven good ones, among them the fast Gyp Walnut 2:08½ that is considered a 2:05 horse this year. Frank won rather bandily but bad to come the last heat in 2:10½ to win. The other bsats were in 2:12½ and 2:12½. There were three postponements on account of rain and the race was held over a very heavy track.

It was suggested the other day that associations that offer \$300 purses would get larger entry lists were they to divide the purse \$200 to first, \$75 to second and \$25 to third, with nothing additional from money winners other than the original five per cent entrance. A horse winning a race where the purse was \$300 under the above conditions would win as much money as in a \$500 purse where the usual division of four moneys is made with five per cent entrance and five per cent additional from money winners.

Wednesday July 15th, (that's next Wednesday, remember) entries close for the big harness meeting at Seattle, under the auspices of the King County Fair Association. There are eighteen purses for trotters and pacers, two of which are \$1000 each, the remainder \$500 each. This is a big pile of money and the way to get some of it is to enter first and then race for it. Mr. A. T. Van De Vanter is the Secretary and will be pleased to receive your entries and will make it pleasant for you to visit Seattle.

Among the horses sold last month at the big sale of Arabian stock, trotters and road horses, at former Alderman Cowley's Blue Front Auction Mart, in Newburgh, N. Y., was the imported Arabian stallion Gaunlad, bred at the Imperial Stud for the Czar of Russia. The horse was exhibited at the Chicago World's Fair and was also a prize winner at Chicago, Philadelphia and Madison Square Garden, New York. For some years he was used by Sculptor N. K. Bush Brown as a model for his equestrian statues. He brought only \$115.

Indications are that Kansas City will have a greater horse show this season than it has ever had since the inauguration of the great equine exhibit in Convention Hall. The prizes are very large and the list will include no less than five of \$1000 each, thus: the Stillwell for gaited saddle horses, the Woolf for trotters, the Imperial Brewing Co. for g/f horses and the Orient for some local class not yet selected. In addition \$200 will be offered for the best ride shown by a boy under eighteen and \$4000 will be won by the hunters and jumpers.

The final sale of the horses owned by the late Henry Pierce will take place Wednesday, July 22d. It will be held by William G. Layng, the popular live stock auctioneer, at the Occidental Horse Exchange in this city. The broodmares have all been bred this year to Sidney Dillon, sire of the two fastest trotting mares ever sired by one stallion—Dolly Dillon 2:07 and Lou Dillon 2:04½. We understand that Sidney Dillon is not to be sold. That Mr. Ira Pierce will retain him and a few of the broodmares and continue the Santa Rosa Stock Farm in his own name.

Mr. John O'Keefe of 184 Clipper street, this city, purchased the two year old filly Centre Eye at the recent sale of horses owned by the late Henry Pierce and has sent her to Watsonville, where she will be trained by the well known horseman John Hammett, owner of the stallion St. Nicholas. Centre Eye is a very handsome and well built two year old and as well bred as the next one, being by On Stanley 2:17½ (son of the great Direct 2:05½ and Lilly Stanley 2:17½ dam of 3 in the list) out of Silver Eye (dam of two with records below 2:18) by Abbotsford 2:19½, second dam by Henry Williamson son of Williamson's Belmont, and third dam by Jack Hawkins son of Boston.

The pacer Elastic Pointer, the own brother to Star Pointer 1:59½, that paced a mile last season in 2:04½, but that, on account of being a had actor, failed to win a heat in any race in which he started, promises to fulfill some of the expectations his great speed aroused, says *Trotter and Pacer*. John Hussey, who worked patiently on him all last season and all winter, has at last got him shod so that he no longer hits his knees while going around the turns of a track, and with that fault overcome the horse no longer acts in the erratic manner which spoiled him for racing last year. Hussey has him at Louisville, Ky., and he is acting so well in his work that he really looks for him to pace to a record close to two minutes before next fall.

RACING ON THE FOURTH.

AT FRESNO.

About two thousand people were at the Fresno race track on the national holiday to see a good program of racing under the auspices of a committee of local horsemen.

The officers of the day were: T. C. White, presiding judge; M. L. Woy and J. R. McKay, associate judges; A. J. Hudson, clerk of the course, Louis Heilbron and Joe Cutten, timers, and L. Parker Timmins, marshal of the course.

The principal event of the day was a race between Chas. Clark's good trotter Cozad, C. J. Snyder's pacer Jonas A. Basler, and S. Walton's Tish. That Cozad is as good a horse as he was last year is evidenced by his winning the race in two straight heats in 2:14 and 2:13 with Basler second and Tish third.

There were three starters in the second race, viz: Newport driven by J. H. Egan, Selda driven by E. T. Stockdale and Oceana piloted by the veteran Worth Oher. The last named was the favorite but the race went to Newport. The first was a dead heat between Newport and Oceana Belle, time 2:28. Newport also won the second heat in 2:24. In the third heat Newport acted very badly and just saved his distance, the heat going to Selda in 2:30. Newport was himself again in the fourth heat and did the mile in 2:24. Selda got second money.

The third race had four starters—Mabel M., driven by C. E. Clark; Baby Mine, driven by Geo. Knight; Milton Gear, driven by Z. Lowry, and The Gentle, driven by Mr. Leggett. Mabel M. won in straight heats in 2:37 and 2:31, with Milton Gear second, and third and fourth moneys divided between the other two.

The last event of the day was a three furlong dash for runners, with five horses entered and men from various parts of the valley in the saddle. Birdie won, Ada B. second and Annie B. third. Time, 0:37. The rider of George lodged a protest with the judges, claiming that he had been fouled by the winner, but it was disallowed.

PETALUMA RACES.

The largest crowd in the history of the Petaluma track witnessed the races there on the Fourth. It is estimated that 2500 ladies and children were in the grand stand. A. B. Hinkle, one of the veterans of the trotting turf, officiated as presiding judge and his decisions gave complete satisfaction. The results were as follows:

Independence Stake, purse \$250, best two in three—Lottie Derby by Chas. Derby (Lawler), first; Sunny Jim (Grimes), second; Grace McKinney (Stillwell), third. Time—2:31, 2:27, 2:30, 2:29.

Fourth of July Stake, purse \$250, best three in five—Lena Holly (Grimes), first in straight heats; Bahe Sherman (Sherman), second; Lunk (A. W. Bailey), third. Time—2:32, 2:30, 2:33.

Match race, \$500 a side—Kitty D. (W. H. Lorn), first and third heats; Jim Chase (Lawler), second. Time—2:31, 2:27, 2:24.

AT TANFORAN.

There was a large crowd at Tanforan Independence day, the Golden Gate Park and San Francisco Driving Clubs holding a joint meeting. Bookmaking was the system of betting provided to accommodate the public, and there was a row over the fifth race which resulted in it being declared off. Slow time was made in all the races, the track not being in good shape for fast miles.

The officials of the day were: Judges, J. Windrow, W. Simpson and I. Coon; starter, A. J. Martin; timers, W. J. Kenney, R. Pyle and F. Vetter; marshal, W. Taft; assistant starter, W. Higgenbottom; racing secretary, T. J. Douglass.

The results of the first four races were as follows:

First race, green class, San Francisco Club. In both heats—Zulu Lass first, Louey S. second, Star Banner third; time for both, 2:47.

Second race, 2:25 class, Golden Gate Park Driving Association. First heat—King V first, Mack second, Della McCarthy third; time, 2:26. Second heat—King V first, Della McCarthy second, Mack third; time, 2:27.

Third race, 2:40 class, Golden Gate Park Association. First heat—Sea Breeze first, A. B. P. second, Ivy third; time 2:34. Second heat—A. B. P. first, Ivy second, Sea Breeze third; time, 2:31. Third heat—Ivy first, Sid second, Sea Breeze third; time, 2:37. Fourth heat—Ivy first, Sea Breeze second, Sid third; time 2:43.

Fourth race, free for all, San Francisco Club. First heat—Al Sandy first, Echora Wilkes second, Twilight third; time, 2:23. Second heat—Al Sandy first, Twilight second, Echora Wilkes third; time, 2:27.

The fifth race had three starters—Doc, King V and

Mission Queen. Doc won the first heat, with King V second. In the second heat it looked to the judges and everybody else that Doc was pulled to let King V win. The heat was declared off and Watson and O'Kane, drivers of Doc and King V respectively, were fined \$10 each and requested to give up their horses to other drivers. This they refused to do and the race and pools were declared off.

VALLEJO DRIVING CLUB.

An unqualified success was the racing at Vallejo last Saturday under the auspices of the Vallejo Driving Club. J. W. Hartzell, William McGraw and Thos. Smith acted as judges. President Ed Kavanagh and Secretary Frank Willis worked hard and made the club's first effort a success in every way.

The first harness race was a half mile and repeat: Ed Kavanagh's Hank won first heat; time, 1:09. Dexter's Irene D. won second heat; time 1:06. Hank was second in this heat and Irene D. third in first heat and the judges said Hank was entitled to first money, but a final heat was trotted in which Hank won in 1:10 and was declared winner of the purse.

In the 2:40 class J. A. Ladd's Rats won, doing one heat in 2:39 and another in 2:41. Mr. Ladd drove his own horse in good style. Colonel Hartzell's Roscoe was second, being driven by Tom Smith, Jr., the colt performing in excellent style, without much preparation for the race.

Sanderson's Nancy won the saddle horse race ridden by Sbouse in 57 seconds; Mahal second, and George Herbert's Bert third.

Longevity of Trotting Stallions.

[Horse Review.]

Hidalgo (Capt. T. B. Merry), the well known California writer on the thoroughbred horse, in a recent issue of the BREEDER AND SPORTSMAN, discourses entertainingly upon the great ages to which many noted thoroughbred stallions attained and preserved their potency. He cites the case of American Eclipse, who died at 32 and got five living foals that year; of imp. Glenelg, who died at 33; of Norfolk, who died at 29, and of Himyar, still vigorous at 28, among American horses; while among English ones he finds Touchstone to have lived to 31, Hermit, Sir Hercules, Waxy, Comus and several others to 29; Pot-8-os, Orville, Dr. Syntax, Orlando, Voltigeur, King Tom, Birdcatcher, etc., etc., to 28, and numerous others to but slightly less extended ages.

The subject of equine longevity is always an interesting one, especially to those who study the breeding problem with due attention to its biological phases, and the history of the great trotting sires may be profitably drawn on to illustrate it. The extremest historical instances that we know of are those of Volunteer and Sayre's Harry Clay 2:29, each of whom attained the remarkable age of 34 years. We have no data that is official to guide us, but we doubt if either of them paralleled American Eclipse's record of getting five living foals at 32. It is, however, a notable fact that Clayton 2:19, the fastest of Harry Clay's get, was got when his sire was 28, and that Volunteer got the pacer St. Patrick 2:14 at the age of 29.

The Hambletonian and Clay families, to which these two illustrious sires belonged, are both famous for the longevity of many of their foremost members. Abdallah, the sire of Hambletonian, lived to be 31, and was 25 when he begot Hambletonian, who, in his turn attained the age of 27. The number of prominent sons of the "Hero of Chester" that exceeded the average span of equine life is quite remarkable. Volunteer, as noted, lived the longest, 34 years. Middleton died at 31, Dictator and Jay Gould 2:21 at 30. Harold, Strathmore and Administrator 2:29 at 29, Sweepstakes at 28, while numerous others, the precise dates of whose deaths are not recorded, are known to have approximated or exceeded 30 years. George Wilkes 2:22 died at 26. His longest-lived sons are Red Wilkes, still living and potent at 29, and Kentucky Wilkes 2:21 who is the same age but is no longer in the stud. Young Jim died at 28 and Onward 2:25 at 27. Of the Alexander's Abdallah branch of the Hambletonian family Wood's Hambletonian reached the age of 30 and Thorndale 2:22 that of 28. Almont died rather prematurely at 20, but his son Hamlin's Almont Jr. 2:26 is still vigorous at 31, while Bostick's Almont Jr. 2:29 died at 29. Volunteer's longest-lived son was Louis Napoleon. The precise date of his death we cannot at this moment state, but he is known to have lived past 30. His best son, Jerome Eddy 2:16, is still alive at 28. Reveille 2:21, who comes from Hambletonian in the male line through New York, and is maternally a double Volunteer, is alive and potent at 28.

Andrew Jackson is generally referred to as the founder of the Clay family, but the family name is derived from his son Henry Clay. Henry Clay died at 30 years, and among his long-lived descendants, aside from 34-year-old Harry Clay 2:29, aforementioned, were George M. Patchen, Jr. 2:23, who lacked but a year of that age, his career closing at 33. Strader's Cassius M. Clay, Jr., and Clay Pilot each lived to be 30.

The Morgan family, so famed for its wearing qualities, produced many noted horses of unusual longevity. Justin Morgan, its founder, died at 28. His best son, Sherman Morgan, was either 26 or 27—the exact date of his birth being uncertain—when he

died. Sherman Morgan's great son, Vermont Black Hawk, only reached 23, but his celebrated son, Ethan Allen 2:23, reached 27, and Ethan's best son, Daniel Lambert—the best horse ever produced by the Morgan tribe—reached 31. The longest-lived of the great Morgan sires were, however, General Knox and Young Morrill; each died at 32. General Knox's best son, Charles Caffrey, is reported still living in Nebraska at 28, while Young Morrill's noted grandson, Royal Fearnought, is still living in Michigan at 30. Magna Charta, who was of the Woodbury Morgan house, died at 31. Star of the West 2:26, a grandson of Vermont Black Hawk, attained the same age.

Among horses belonging to other trotting families who lived to patriarchal ages may be mentioned Alexander's Norman, 32, and his grandson, Blackwood, Jr. 2:22, 28; Toronto Chief, 30, and his famous son Thomas Jefferson 2:23, 28; Godding's Champion, 30; Reavis' Blackbird 2:22, 30; Bayard (Pilot Jr.'s best son), 28; Tom Hal, the greatest of pacing progenitors, died at 30.

The most extreme instance of longevity in a harness stallion of note that we recall is, however, that of Orange Blossom 2:26. This horse is the sire of Orange Chief 2:13, Mike 2:15 and ten other standard trotters. He was foaled in 1867 and was reported living in Maryland, but a few months ago. As no notice of his death has since appeared, it is presumable that he is still living at 36 years. It is an interesting fact that Orange Blossom is a son of Middletown, the son of Hambletonian previously referred to as having lived to the age of 31; and it is perhaps even more curiously interesting when we trace Middletown's pedigree to find that his dam was by a grandson of American Eclipse, the horse instanced by "Hidalgo" in the article which we quoted at the outset of these notes as having died at 32 and sired five living foals that season.

EFFECTUAL

The most effectual remedy in use for the cure of ailments of horses and cattle is

GOMBAULT'S CAUSTIC BALSAM

Used as a Blister or Lotion.

This preferred remedy is prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

Have You Noticed It?

Palmer Clark, the well known authority on harness horses, says: "It is becoming more and more apparent to all harness horsemen that the auction sale ring is the best place and manner of selling to advantage good horses of all kind, and I have noticed that the consignors who secure the most satisfactory returns through the progressive method are the ones who send their choicest stock in the best condition for absolute sale to the highest bidder, and who make their entries early, thereby securing the benefit of extra advertising and a good location in the catalogues without increased expense."

If you have to sell your horses write at once to

Wm. G. Layng,

LIVE STOCK AUCTIONEER,

246 Third St. San Francisco

THE OCCIDENTAL HORSE EXCHANGE,

which he owns, and in which sales are held will accommodate 2,500 people, and every buyer is assured that no more risks are taken than if these horses were offered at private sales. Mr. Layng refers to any one who has consigned horses to his place since he opened it in 1899.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

County Changes in the Game and Fish Laws.

The deer hunting season, under the State law, will open on Wednesday next and continue until the 1st of November. For the better protection of the game the Supervisors of various counties have seen fit to shorten the season in their respective counties. In some counties the bucks are not in good condition and can be hunted advantageously only earlier or later in the open season, according to the altitude, location or topography of the hunting grounds, as the deer will shift from higher to lower ground, and vice versa, following the varying conditions of temperature and feeding grounds as they prevail at different months in the open season.

Under the State law no person is allowed to kill or have in his possession more than three male deer during any one season, whether killed in this State or shipped into the State from any other State or territory. It is illegal to take or kill at any time does, fawns, elk or antelope or mountain sheep. The possession of deer meat in close season is illegal and the sale of venison is prohibited at all times.

Every person who buys, sells, or exposes for sale, transports or carries any skin, pelt or hide, of any female deer or spotted fawn, or any deer hide or pelt from which the evidence of sex has been removed, is guilty of a misdemeanor.

The dove shooting season under the State law begins July 1st and closes February 15th. A number of changes in the open dove season have also been made by different county governments.

Local sportsmen are much interested in ascertaining just what ordinances are in force in various counties, particularly the hunting grounds in the counties within easy reaching distance of this city. The county laws following are those now in force and embrace the provisions relative to other wild game besides deer and doves as well as the new ordinances and changes in the fish laws.

In Siskiyou county the open season for deer commences on August 15th and closes October 15th, a period of two months only.

In San Bernardino county the open season for deer hunting prevails from September 1st until October 31st inclusive, two months.

Bucks may be hunted and killed in San Mateo county only from August 1st to October 1st, two months. The possession of deer meat in San Mateo during close season, irrespective of the place of killing, is a misdemeanor. It is illegal at any time to shoot tree squirrels or song birds or destroy the nests or eggs of song birds in the county. Cottontail rabbits are protected by a close season, from January 1st to July 1st. The open season for quail is from October 15th until November 15th. The individual taking of more than 100 trout from any stream in the county in one day is a misdemeanor.

The open season on deer in Santa Cruz county is for two months during August and September. Wild birds, other than hawks, owls, bluejays, the shrike or butcher bird, English sparrow and house finch or red-headed linnet, are protected from the careless individual with gun or trap. Song birds, their nests and eggs are also on the prohibited list. A close season for black bass prevails until January 1, 1907. The individual limit on the angler confines him to a catch of fifty trout a day.

Fish nets or seines, spears and fish hooks larger than a No. 3 are prohibited from being used in any stream, lake or lagoon of the county. Gaffs, except with a handle no longer than three feet, cannot be used. This latter prohibition is directed against the taking of large steelhead from the waters by the use of long-handled gaffs. The gaff-hook vandals were doing much damage yearly in robbing the streams of steelhead when the fish were running up to spawn. Tree squirrels are protected by a perpetual close season. This handsome and agile little rodent has been thinned out in many counties. There seems to be an all-round awakening to the fact that the tree squirrel stands a good chance for extermination, hence the effort at this late day to save the few that are left.

Trinity county has made the open season for deer from September 15th until November 1st. In that section the fawns are seldom strong enough to survive the loss of the mother deer as early as the general law permits the hunter to pursue the game, and as many does are killed where promiscuous hunters abound, it was deemed advisable to shorten the season to conform to the best interests of those most directly concerned—the deer themselves. In that territory few bucks are in proper condition to kill before the first fall months.

The Marin County Game Protective Association has issued the following abstract of State and Marin county ordinances now in force. This is of much concern to local sportsmen:

Deer season for Marin county for male deer opens July 15; closes September 15. Killing of does and spotted fawns illegal at all times; no person to kill more than three deer in any one season. Sale of deer meat prohibited.

Doves—Season opens August 1st; closes February 15th; no person to kill or have in his possession more than fifty doves on any one day.

Quail—Season for Marin county opens October 15th; closes January 15th. Trapping and sale of quail pro-

hibited; no person to kill or have in his possession more than twenty-five quail on any one day.

Ducks—Season opens October 15th; closes February 15th. No person to kill or have in his possession more than fifty ducks on any one day. Shooting of ducks between one-half hour after sundown and one-half hour before sunrise of following morning prohibited.

Larks and Birds—Killing of meadow larks and song birds prohibited. Meadow larks, however, may be killed when destroying berries, fruits or crops by owners or tenants of premises.

Robins—Killing of robins prohibited at all times. Squirrels—Killing of tree squirrels from February 1 to August 1 prohibited.

Trout—Season opens April 1; closes November 1; must be caught with hook and line only.

Steelheads must not be caught between February 1 and April 1; must not be caught between September 10 and October 16; must not be caught above tide water between November 1 and April 1 of following year.

Steelheads may be caught in tide water between April 1 and September 10 and between October 16 and February 1 of following year.

Bass—Catching of striped bass less than three pounds in weight prohibited.

Black bass may be caught between July 1 and January 1.

Spearing of any kind of trout, steelheads or salmon prohibited.

Shooting—Shooting on county roads of Marin county or in cemeteries prohibited.

Dogs—Permitting dogs to hunt, track, trail or pursue deer during close season for deer is a misdemeanor.

The dove season in Madera county opens September 1st and closes February 15th following.

The open season for mountain quail in Tuolumne county begins October 15th and closes February 15th following.

In Sonoma county the open season for shooting hucks is from July 15th until September 1st.

In Orange county the season for shooting doves is between September 1st and February 15th.

Santa Clara county—Deer shooting, from July 15th to October 1st.

Kern county—Same as general law, but according to ordinance game must not be shipped out of the county.

San Benito county—Deer shooting, from August 1st to October 1st.

Monterey county—Deer shooting, from July 15th to October 1st; quail shooting, from October 15th to February 15th; dove shooting, from July 1st to February 15th.

Mendocino county—Deer shooting, from July 15th to October 1st.

Fresno county—Deer shooting from September 1st to November 1st; doves from August 15th to February 1st, quail from November 1st to February 1st.

Los Angeles county—Deer season, July 15th to September 15th. Limit on ducks, 25 per day, doves, 35. Trout season open from May 1st to August 1st. Dove shooting from July 31st to October 1st.

Tulare county—No change in the State game laws, but trout under six inches in length must not be taken, and not more than ten pounds of trout in any one calendar day allowed in possession. Black bass catching until July 1905 prohibited.

Orange county—The daily individual limit for sale or shipment of cockles, scollops and cohogs is 25 pounds.

The counties which have not yet announced the adoption of any changes from the State law are: Alameda, Shasta, Mono, Contra Costa, Sacramento, Stanislaus, San Joaquin, San Luis Obispo, Colusa and Humboldt.

In Nevada State the trout season opens March 15th and closes November 1st. Fishways must be maintained by dam owners, and the dumping in streams of matter deleterious to fish is prohibited. Trout under six inches in length cannot be sold. Trout can only be taken by hook and line, and the fish cannot be shipped without the State to be sold. Plume and song birds are protected. Pheasants are protected until September, 1906. The close season on sagehens is from February 15th until July 15th. On grouse and mountain quail, March 1st until September 15th. The daily bag limit of game birds is 20. Birds' nests are protected. No gun larger than a 10-gauge can be used to hunt feathered game. The open season on male deer and antelope is from September 15th until November 15th. A hunter may sell the hucks he kills, but the purchaser of the venison may not resell it.

Fishing Days.

Sing a song of sus-pense,
Pocket flask of rye—
A gang of Bassio fishermen,
All so very dry.
When the flask is opened,
Men begin to sing,
Praising me because I'd
Thought the flask to bring.
'Round goes the bottle,
Underneath the tree—
Oh, will there be a drink left
When it gets to me?

Note—There wasn't.

Chas. F. B.—

Sober up on Jackson's Napa Soda.

Food and Digestion in Fish.

The alimentary canal of fish begins in the mouth (which is more or less furnished with teeth), to which is joined a wide throat with folds running lengthwise. The throat leads into a cylindrical tube, sometimes straight and sometimes more or less twisted, which opens at the anus. In the lampreys the entire alimentary canal is of an even, cylindrical form, and entirely straight; in some fish it is somewhat twisted, but no distinction can be recognized between the stomach and the intestinal canal, while in other fishes the stomach may be easily recognized as a bag-like, or at least as a considerably widened portion of that canal. A microscopic examination of the mucous membrane, which lines the entire alimentary canal, shows that in a large group of fish, to which, among the rest, the carp belongs, the stomach is wanting, so that the intestinal canal begins at the throat.

It is a characteristic feature of the stomach of fish, as well as of warm-blooded animals, that its mucous membrane possesses pepsin glands. These glands secrete a ferment (pepsin) which, together with a free acid produced by the glands of the mucous membrane, digests albuminous matter; that is to say, dissolves it and makes it fit to be received in the organism of fish. In fish which possess a stomach the mucus of the entire intestinal canal connected with it shows no digestive faculties, but serves only to absorb the albuminous matter dissolved by the gastric juice. The gall secreted from the liver, however, goes into the intestinal canal, as well as does a juice secreted by the pancreas and the appendages of the cæcum. Both the pancreas and cæcum are, however, wanting in many fish.

The gall bladder does not digest albuminous matter, but contains a so-called "diastatic" ferment, which transforms starch to sugar and thus renders it fit to be received in the organism. The liquids secreted by the pancreas and the appendages of the cæcum react in a neutral or alkalic manner, digest albumen; and to a limited extent possess the faculty of transforming soaked starch into sugar. Like the gall bladder they also possess the faculty of changing fatty substances to an emulsion, thus preparing them for absorption by the intestinal canal.

Matters are different with those fish which have no stomach, as in the case of the carp. Here the entire intestinal canal from the throat to the anus (though to a much greater extent in the front than in the back part) secretes a liquid, which in its effect resembles that secreted by the pancreas, and which, therefore, digests both albuminous matter and soaked starch, as well as fatty substances. These fish have no appendages to the cæcum, but the liver pours a considerable quantity of gall into the intestinal canal, immediately back of the throat.

It is well known that fish do not masticate their food, as the teeth of predatory fish serve only to take hold and to retain food. Even in those fish which possess strong teeth, worms and the larvæ of insects are only squeezed somewhat. No fish envelops its food in saliva while in the mouth, as is done by mammals, as fish have no salivary glands.

Although the food, therefore, reaches the alimentary canal without any preparation favoring digestion, the alimentary canal in a majority of our fish is comparatively short. While in a cat, for instance, it is three times the length of the body, in man six times, in the horse twelve times, and in the goat twenty-six times, we find that only in a few fish does the length of the alimentary canal exceed that of the body.

The rapidity of digestion depends very much on the quantity of food taken at one time. If a pike swallows a fish half its own size, so that in the beginning the tail protrudes from its mouth, the head is, of course, digested very soon; but gradually there is some delay, as the digestive liquids are only secreted in limited quantities and the dissolved substances can only be absorbed gradually. Pike, however, are not suitable for making observations relative to the time occupied by digestion, as they are in the habit of throwing up very soon some of the prey which they have swallowed, and the perch and hake, with which experiments have been made, serve the best purpose. When the stomach of the perch is gorged with food it becomes entirely empty at the end of about sixty hours; the same result occurs in the hake in much less time. In both experiments the entire intestinal canal, from the throat to the anus, was evenly filled with worms.

Jerry Falvey, an old time rodmaker and fishing tackle repair man, died recently in his shop in New York city of apoplexy. He was 70 years of age, and came from Ireland to New York when a lad. For half a century he had been well known as an expert maker of fishing rods and their fittings, and a number of articles now in common use among rodmakers and in the trade originated in old Jerry's Fulton street shop. Indeed, it is even claimed that the split bamboo was first made in this country by him, and that he invented soft rubber artificial lures. He had a practical knowledge of the uses to which the finest of his rods were put, for angling was his favorite pastime, and he was even better versed in the demands of the trade, though nearly all the orders he received were specials, and not a few of them came from men whose names are well known to the general public. For many years he was in the employ of Jabez Crook, the old Fulton street tackle dealer, but afterwards opened a shop of his own, continuing to do special work for the old firm when his own orders would permit of this.

Take an Outing and Rest.

If you are "all tired out" from hard work indoors a trip to any trout stream will do you good. The gentle exercise, change of air and the country "grub" will bring you to realize you are still living. Skinner, at 801 Market street, S. F. can furnish you the proper tackle and camp outfit, and will tell you where to go and how to get there. Make the catches as reasonable as you can, Skinner goes fishing himself. If your rod or tackle needs looking after, take it to Skinner's.

Skinner, the sporting goods man at 801 Market street, San Francisco, is displaying the finest assortment of razors, strops and general cutlery ever shown in this country. "Stiletto" cutlery once used, always used.

AT THE TRAPS.

Years ago our shooters were accustomed to meet at various road houses and resorts and indulge in both live bird and blue rock trap shooting. This custom, however, was discontinued when the different gun clubs fitted up their own grounds. Last Sunday the initial meeting of what promises to be the opportunity, for those desiring it, of a return to the old style, took place at the Hunters' Inn, on the road to Lake Chahot and near San Leandro.

This resort has been opened by John H. Ravake, a well-known sportsman, who has fitted up his road house with a special view of making it a resort for devotees of the shotgun. Traps for both clay pigeon and live bird shooting have been set up and other conveniences are arranged for the accommodation of visiting sportsmen. In the vicinity of the resort can be found, in season, quail, dove, snipe and rabbit shooting.

Mr. Ravake will endeavor to make a barbecue the leading feature at all future gatherings. If the viands set out last Sunday are any criterion of his abilities in that line, then a large attendance will always be guaranteed, for the barbecue upon this occasion was a success in every particular—beef on long iron skewers grilled over live cherry wood coals, salads, fresh butter, huge loaves of home-made bread, fresh milk, cool lager and tankards of ruby vino with numerous other appetizing accessories were done ample justice to by the Union Gun Club members and a large number of visitors from this city, Oakland, Hayward and San Leandro at the outing of the trap shooters. Mine host Ravake was found to be a genial and palatizing Boniface and looked after his guests in an appreciated manner.

At the trap grounds during the day a program of three events was shot up. The first number was at 15 targets, entrance 50 cents, \$5 00 added by C. Hyer of San Leandro, high guns. The winners were: A. J. Wehh, H. T. Hoyt and C. Carroll. The second number was also a 15 target race, 50 cents entrance, \$5.00 added, high guns. The winners were: J. Burns, Zeiner, G. Sylvester, Dr. Hutton, H. T. Hoyt, Herring and Carroll.

The third event was a merchandise prize race, target handicap, 20 to 25 targets, \$1 00 entrance, high guns, re-entry 50 cents. The winner of the principal prize was George Sylvester, a Remington gun, after shooting off a tie with Patrick, Klevesahl and Herring. Twenty-three prizes were distributed in this event.

A summary of the scores made is the following:

First event, 15 targets—Patrick 10, Webb 13, Hoyt 13, Burns 10, Carroll 13. Iverson 12, Sylvester 12, Masterson 9, Hutton 12, Mitchell 12, Thomas 12, Wollam 9, Walpert 12, Zeiner 7, Shields 8.

Second event, 15 targets—Walpert 11, Masterson 11, Magic 5, Burns 14, Mitchell 10, Hutton 12, Webb 10, Iverson 10, Zeiner 14, Lindstone 5, Hoyt 12, Sylvester 13, Carroll 12, Shields 8, E. Klevesahl 9, Herring 12, "Swedie" 3.

Third event, handicap, 20 to 25 targets—Lindstone, 25 targets shot, at, broke 12; Klevesahl, 22, 17; Westphal, 24, 11; Iverson, 20, 15; Masterson, 22, 13; Wehh, 20, 14; Carroll, 21, 16; Mitchell, 23, 17; Hutton, 23, 17; Monarch, 20, 8; Walpert, 22, 16; Herring, 23, 20; Shurtleff, 25, 14; Morse, 25, 11; Clausen, 25, 18; Wollam 23, 12; Lorenza, 25, 13; Hoyt, 20, 17; Zeiner, 22, 16; Patrick, 25, 12; Sylvester, 22, 15; Burns, 22, 15; Shields, 23, 15.

Re-entries—Iverson, 20, 19; Klevesahl, 22, 20; Hutton, 23, 17; Carroll, 21, 18; Hoyt, 20, 16; Shurtleff, 25, 13; Lindstone, 25, 9; Zeiner, 22, 14; Burns, 22, 17; Shields, 23, 8; Monarch, 20, 11; Patrick, 25, 20; Masterson, 22, 15; Morse, 25, 15; Lorenza, 25, 17; Westphal, 24, 9; Walpert, 22, 18; Mitchell, 23, 14; Wollam, 23, 12; "Swedie", 25, 14.

At the College City Gun Club shoot last Sunday R. C. Reed was high gun in almost every event, besides which, he won 3 club bars for straights of 15, "Edwards" also won a har. A summary of scores is the following:

Medal race, 25 targets—Juster 22, Newcomb 20, De Meritt 18, Reed 24, Baird 14, Searles 19, Edwards 16. Back scores, Newcomb 21, Reed 23, De Meritt 17, Johns 15.

Watch race, 25 targets—Newcomb 19, Juster 15, Reed 22, Edwards 14, F. Baird 6, Searles 15.

Shell race, 25 targets—Searles 17, Edwards 14, Newcomb 15, Reed 24, De Meritt 19, Juster 15, Baird 9. Back scores, Newcomb 22, Newcomb 20, Edwards 16.

Challenge medal race, 25 targets—Newcomb 19, Juster 18, Reed 20, Edwards 20. Shoot-off of tie—Reed 24, Edwards 6, withdrew.

Special race, 15 targets—Juster 8, Searles 12, Reed 13, Edwards 15, De Meritt 5, Johns 9, Juster 8, Reed 12, Baird 7, Searles 12, Johns 6, Edwards 7.

The Union Metallic Cartridge Company has good reason to feel proud of the records made during the last two months with U. M. C. factory loaded Arrow and Nitro Club shells. Since winning the Grand American Handicap the following State championships have been added to the string of victories which bear testimony to the accurate and sure-fire shooting of the "Uniform U. M. C." shells:

- One—Kansas State championship, won by W. H. Heer, April 21, 1903.
Two—Nebraska State championship, first, second, third and fourth places won by U. M. C.
Three—Pennsylvania State live bird and flying targets championship at Philadelphia, May 20, won by Fred Coleman.
Four—Iowa State championship, won by T. B. Nichols (perfect score).
Five—Wisconsin State championship, won by J. M. Hughes (145-150).
Six—West Virginia State championship and high average, won by J. M. Hughes (193-200).
Seven—Indiana State championship, won by Mr. E. Brown (579-600).

Eight—C. W. Budd won high average at New London, Iowa (468-500).
Nine—Open competition medal of Iowa State and L. C. Smith, at Central City, by O. N. Ford. Scores 25 straight (47-50).

At the Maryland county shoot, recently held in Baltimore, the Hundred Target Championship was won by Mr. H. D. Jackson, an amateur, with the perfect score of 100 straight. This is a feat very seldom performed by professionals. It was a perfect score, made by a man shooting perfectly with perfect shotgun shells. The shell Mr. Jackson used in making this perfect score was the celebrated Winchester "Leader." Dr. W. L. Henderson, also an amateur, who was second high man, broke 97 out of 100, itself a winning score. He, too, used the Winchester "Leader" shells. Another remarkable exhibition of target shooting made with the Winchester "Leader" shell, was the performance of Mr. H. C. Hirschy at Inter-City Park, Minneapolis, last week, where he broke 24 straight targets, shattering all North western records.

The following is a list of the averages made by 54 shooters out of 89 who participated in the three-day tournament of the Sportsmen's Association of the Northwest. Out of a total of 600 targets shot at the high scores were:

Table with 4 columns: No., Name, Rank, Total PerCent. Lists 54 shooters and their scores.

ter 'pump' gun and 'Repeater' shells, on a score of 50 straight, which included a shoot-off with A. P. Bigelow at 25 targets. The Ladies' High Average Medal was won by Mrs. W. F. Sheard of Tacoma, with a Smith gun and Winchester 'Leader' shells. The first three high averages of the entire tournament were won by shooters using Winchester 'pump' guns and Winchester shells. G. L. Becker first with 45 lost in the 600 shot at, W. F. Sheard second with 56 lost in the 600 and W. H. Seaver third with 61 lost in the 600. Of the 13 high average prizes, 10 were captured by shooters who shot Winchester 'pump' guns, and 11 by shooters who used Winchester shells. A noticeable feature of the tournament was the four solid squads of five men each all shooting Winchester 'pump' guns and Winchester shells. Of the seven individual trophies shot for during the tournament, five were captured by shooters using Winchester 'pump' guns and the entire seven by those who shot Winchester shells.

DOINGS IN DOGDOM.

Forest Flau, first puppys ('Frisco) this year and a promising young dog, was killed last week by a street car. Flash was by Norfolk Trueman out of Lillian Sage, and was owned by W. J. Foster. "My word," said Mr. George Raper to Foster last April, "but he's a coming dog."

W. G. Kerckhoff of Los Angeles, who has long been an enthusiastic fancier of field trial dogs, has been unfortunate enough to lose his well known English Setter winner and sire Mercury (Dick Bondhu-Sunlit), and up to date no trace of the dog has been found. Mercury was the winner of second in the Pacific Coast Field Trial Club's Derby, 1894, and divided third with J. M. Kilgarif's Sirius (Sportsman-Sweetheart) in the same club's All-Age Stake, 1895. A number of Mercury's get showed well in trials, among which were Peach Mark, Merry Monarch and Midas.

The Collie Club of America, at the recent meeting of the Executive Committee, selected Milwaukee, Wis., for the next annual show, the date to be the week preceding the Chicago show.

The Continental Field Trial Club will hold its ninth annual meeting at Thomasville, N. C., commencing on Saturday, December 5th, with the running of the Members' Stake. The Derby will commence on Monday, December 7th, and will be followed by the All-Age Stake.

Mr. E. Knight Sperry has resigned as president of the Connecticut Field Trial Club, according to a report in an Eastern contemporary. Mr. Sperry has done much for the club, which will be fortunate, indeed, to find one who can acceptably fill his place.

The situation regarding game and cover at the field trial grounds near Washington C. H., Ohio, has never been more satisfactory at this season of the year. In a letter from a prominent handler who lives near the grounds the information is given that birds were never more abundant than now, with a very good hatching season, which will keep in favor grounds that are perhaps considered second to none.

Geo. E. Gray has sent Bangs Hazel by Bang III-Dot's Hazel to be bred to Plain Sam.

Dr. E. R. Hickerson, S. H. Socwell and W. R. Green have been selected to judge the Illinois Field Trial Association's trials.

The Eastern Field Trial Club will hold its trial ahead of that of the United States. This will be welcome news to a majority of handlers, as they will thus be enabled to do their training in Southern Georgia this year, a locality which struck them very favorably last season. Thomasville has an ideal winter climate, with apparently more quails than can be found anywhere in Northern Mississippi or Alabama outside of game preserves. Should the United States trials not take place until some time in February, the trainers will be ready to return to their northern homes at the finish of this trial and the National Championship.

Preliminary arrangements are being made for the annual meet of the South Dakota Field Trial Association, which is to be held on grounds about four miles southwest of Sioux Falls in August. A little later in the season a patrol will be established on the grounds, so that birds will not be molested and driven away, thus insuring some rare sport when the trials are held. Prairie chickens are numerous this year, and the trials should be the most successful and interesting in the history of the association.

Entries for the trials will close July 31st. Although last year's trials were very successful, both in the number of entries and the interest manifested, this year's meet is confidently expected to surpass last year's event in every particular.

Most of the States of the Union will be represented by one or more entries. Invitations have been extended to Thomas Johnson of Winnipeg and C. B. Whitford of Chicago to act as judges of the trials. Both are experienced men. The former acted in a similar capacity during the past two or three annual trials of the South Dakota association, and gave the best of satisfaction.

There will be three stakes this year—the All-Age, the Derby and the Subscription. A change in the division of the prizes has been decided on by the officers of the association. In the All-Age and Derby contests the prizes will be divided as follows: 32½, 27½, 22½ and 17½. In the Subscription stake it will be divided at 50, 30 and 20.

The officers of the association expect that over \$2000 will be distributed in the various purses.

Leading Holstein Bulls.

The two bulls that lead the Holstein breed in the number of officially tested daughters are De Kol II.'s Paul de Kol and Aaltje Salo III.'s Tritonia Netherland, says Dairy and Creamery. The first named has about 45 registered daughters and 31 of them have made tests that have placed them in the advanced registry. Two of them have made officially 29.26 pounds and 28.24 pounds of butter 80 per cent fat in seven days at four years old. This bull had for a dam De Kol II., with a record of 26 pounds 9.2 ounces of 80 per cent butter in seven days, and she was also the dam of three other bulls having taken together 26 registry daughters.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

The fair average day's work for a harness horse is nine or ten miles, in which case exercise is quite unnecessary, says American Cultivator. More harm and injury is done to horses by the grooms when at exercise than in any other way, and unless the man can be fully depended upon the less they are exercised the better. Where the horse is only occasionally worked exercise is of course necessary not only to preserve him in health, but to keep him steady and from getting above himself.

Good dairy cows deserve to have good, intelligent care, and this can only be insured by having the right kind of attendants.

A restive cow is seldom profitable.

PUBLIC TRAINING STABLE.

I am prepared to take race horses and Polo Ponies to train at Emeryville Race Track Stable, Section C. PETER WEBER, Oakland, Cal.

WANTED

A STANDARD BRED STALLION, weighing from 1175 to 1250. Must be a trotter and be at least 4 years old. Color must be bay, brown, black or chestnut. Horse must be perfectly sound, state particulars, price wanted, and where stallion can be seen. WM. G. LAYNG, Occidental Horse Exchange, 246 Third St.

THE VALLEJO RACE MEETING
VALLEJO RACE TRACK, AUGUST 13, 14 AND 15, 1903.
Additional Stakes to Close August 1, 1903.

Table listing stakes: 2:30 Class Trotting Stakes \$300, The Grissim Stakes for 2:12 Class Trotters 300, Green Class Pacing Stakes 300

Remember that Entries must be made on time.

Entries postmarked later than date of closing are not eligible to win. Member National Trotting Association. For further particulars and Entry Blanks address

THOS. SMITH, Manager, VALLEJO, CAL.

The Final and Greatest Sale of Santa Rosa Horses!

—WILL TAKE PLACE AT THE—
OCCIDENTAL HORSE EXCHANGE
246 THIRD STREET, SAN FRANCISCO.
WEDNESDAY, JULY 22, 1903,

COMMENCING AT 10:30 A. M. SHARP.

To Close Out the Estate of Henry Pierce, Deceased.

The Finest Looking and Best Bred Trotters and Pacers, Broodmares, Colts and Fillies of the Santa Rosa Stock Farm will be sold without reserve or limit.

This Sale offers golden opportunities to seekers after the very choicest of Trotting Stock that are "bred in the purple" and show their breeding. No consignment has ever been sent to San Francisco to surpass it. There is not an inferior animal listed. A careful perusal of the pedigrees below and an inspection of all to be offered will convince horsemen, farmers and breeders that it will pay them to attend this sale and secure a few of these, for the demand for good Trotters, Pacers and Broodmares is increasing and they will never be as cheap as they are now.

Table listing horses with columns: Name, Sex, Year Foaled, and Sire; Dam's Family. Includes entries like Alto Russell, Arawana E, Belle Isle, Ben Russell, Bertha Bates, Barbara Allen, Bravo, Bromwell, Biscara Russell, Columbiad, Colonist, Chester, Chestnut, Caromel, Caromelly, Crossout, Credit, Flora Allen, Ascania, Inferlotta, Lady Agnes, Ladywell.

Table listing horses with columns: Name, Sex, Year Foaled, and Sire; Dam's Family. Includes entries like Lilly S, Lilly Stanley, Lisette and colt, Molly Allen, Paceta, Pslo Belle, Palo Russell, Transit of Venus, Easter Lilly, Sid Allen, Aloba, Grisette, Palo King, Lady Paceta, Observer, Prince Allen, Excelsus, Indamont, Rushbelle, Frambelle, Tramper, Moulton, Dandy.

*Inferna 2:24 1/2 was sired by Diablo 2:09 1/2 out of Biscoarl (dam of 4) by Director 2:17.
†Marengo King 2:29 1/2 was sired by McKinney 2:11 1/2 out of By By (sister to Lookheart 2:08 1/2, etc) by Nutwood.
‡Beau B 2:19 1/2 was sired by Wildout out of Nettie Benton (dam of 3) by Gen. Benton, etc.
§L W Russell was sired by Stamboul 2:07 1/2 out of By By (great broodmare) by Nutwood, etc.

With but a few exceptions all the above that are older than yearlings are well broken to drive; some have been and are at present in training on the Santa Rosa track; many are heavily engaged in stakes, and have shown very fast trials for the work they have had. All the Sidney Dillons that have had records have been sold. The amount these four brought aggregated \$28,800. The sum of \$35,000 has been refused for Lou Dillon. Every Sidney Dillon that has been broken to harness is noted for its perfect disposition, frictionless gait and gameness. Dolly Dillon 2:07 was the greatest mare of 1901. B. S. Dillon 2:25 has shown trial miles in 2:09 and Captivity 2:26 1/2 miles in 2:11 before leaving for the East. This will be the last opportunity offered to get such horses. All are standard and eligible for registration. Those by the younger Santa Rosa Stock Farm sires will show for themselves on the day of sale. Catalogues will be ready for distribution Tuesday, July 14th. Send to the office of the BREEDER AND SPORTSMAN or to the undersigned if you want one.

THERE WILL BE MORE GREAT "TROTTING PROSPECTS" OFFERED AT THIS SALE THAN AT ANY EVER HELD IN CALIFORNIA!

Stock at salesyard July 19th.

WM. G. LAYNG, Live Stock Auctioneer

Testing Cows in Denmark.

Report on the Benefits Derived by a Systematic Test and Weeding Out of Poor Cows—Production Increased One-Third and Over.

Farmers who keep cows for milk production should be sufficiently interested in their dairy investment to make that investment pay the largest possible dividends. How it is done in Denmark, with comment on other systems, appears in a recent report by John Speir of Newton Farm, Glasgow, which report in part reads:

"For a long time back it has been customary in this and other countries for persons taking a particular interest in their cows to regularly weigh the milk of each animal. A very few people did so morning and evening, but the bulk of those who kept milk records, and their number is very small, contented themselves by doing so once a week or once a month. Where cows are kept the busiest hour of the day is usually that of milking; the consequence is that, although most breeders are cognizant of the gain to be derived from a milk record, only an enthusiast undertakes the trouble.

Twenty years ago when I first made a tour of Danish farms, I was greatly impressed with the number of average farmers who methodically weighed the milk of each cow night and morning. Few people are so methodical in their habits as the Danes, and none have learned and appreciated so highly the value of a milk record as they have done. The enthusiasm and methodical working of the Danes were not, however, proof against becoming tired of such work. A more satisfactory way had, therefore, to be discovered, and this work has now almost entirely fallen into the hands of small societies, which undertake the work for their members.

These societies, as a rule, are composed of from ten to twenty farmers (twelve is considered the most suitable number) who own among them from 200 to 400 cows. Each society becomes affiliated with the Royal Danish Agricultural Society, and through it get from the Government a grant ranging from one-third to one-half of the total expenses. The society then engages a young man whose duty it is to spend a day at each farm, weigh and test the milk of every cow, and during the winter also weigh the total quantity of food of each class given to the cows for one whole day. It is the duty of each member to board and lodge the young man while at his farm, and convey him and his weighing machine and milk meter to the next farm when finished.

One person can weigh the food and weigh and test the milk of any number up to fifty cows in our day, and, being constantly at it, becomes more expert and does it more reliably than the ordinary farmer. The results for each farm are all tabulated by the parent society, which forwards a copy of the results to every member. Each member contributes in proportion to the number of cows tested, dry cows being left out of the account. According to Danish labor, the cost works out at about $\frac{1}{4}$ d per cow for each double weighing and testing of the milk and weighing of the food used.

As a rule, the visits are made every fortnight, but in some cases every week, and others only once a month.

The first societies were begun in 1895, and the number at the present time is over 300. The work is very popular with the average farmer, as he finds he gets many hints as to cheapening cost of production. Some farmers are found to produce a gallon of milk or one pound of butter at two-thirds of the cost of others, and some herds to produce one-third more than others.

Comparing the Danish records of the first and last years, it seems that the average milk yield of each cow has been increased nearly one-half per cent per annum, while the percentage of fat has been somewhat improved. This

result, which in time will amount to an immense gain, has been brought about principally by breeding from the best milkers and getting rid of the bad ones. The gain in the seven years under review seems steady, and appears likely to be maintained for a considerable time to come.

This system has rapidly spread over both Sweden and Norway, the latter country, owing to the greater variety in the size of its herds, adopting a slightly different system of membership. In Norway each member, besides keeping the weigher for a day and paying the cost in proportion to the number of his cows, pays an arranged-on sum as an entrance fee.

This system of methodically weighing and testing the milk has brought to light numerous instances of families of cows which produce double the milk that the average animal does, and in some cases even more than that. Many instances are also discovered of cows which do not give sufficient milk to even pay for their keep. One notable instance may be mentioned among many of a cow which for fifteen years has averaged over 1400 gallons of milk per annum, or over six tons of milk each year. This cow gives milk of fair average quality, and several of her progeny seem as if they would equal, if not excel, her milk yield. The red Danish cow is a little larger than the average Ayrshire and smaller than the Shorthorn, the live weight running from 8 $\frac{1}{2}$ to 9 $\frac{1}{2}$ cwt.

The following may be mentioned as instances of what can and has been done by selection of good milking types:

Mr. Tisdall, when he began business, bought twelve of the best heifers he could get, and continued to breed from the best of these for twenty years. The average yield of milk the first year was 456 gallons, the tenth year it was 600 gallons per heifer, the twentieth year 868 gallons per heifer for twelve. By the same process Mr. Evans, Burton, Lincoln, had the following: For three years to 1893 his cows averaged 751 gallons; for three years to 1896 his cows averaged 811 gallons; for four years to 1900 his cows averaged 861 gallons—an increase of 110 gallons in ten years. Mr. Evans has one cow, Beauty, which, after her third calf, gave 2051 gallons in eighty-one weeks; after her fourth calf 1622 gallons in fifty-two weeks. Burton Old Profit has given an average of 1200 gallons for seven years."

Warts on Show Cattle.

Prof. H. M. Cottrell, formerly of the State Agricultural College of Manhattan and now with the Odebolt Farm, gives something of his experience in removing warts from cattle. As the *Kansas Farmer* has frequent inquiries about these troublesome and unsightly formations on the skin of cattle, we publish Prof. Cottrell's experience, as follows: "We had much trouble with the pure-bred stock and several successful methods were employed in their extermination. In order to experiment in taking off warts, a Red Poll heifer was selected on which the warts were so thick that it was impossible to place one's hand on her without coming in contact with several large growths. We tried two different ways on different parts of the animal's body. On her head and shoulders were applied castor oil—well rubbed in—twice daily for a week. Shortly after each application a portion of the wart would scuff off and in two weeks the warts were entirely cured without pain to the animal in any respect. On the back and hips of the same heifer we used concentrated acetic acid, applying it with a fountain-pen filler, and soaking the wart up thoroughly after applying grease about the root to keep the acid from eating the flesh. About twelve hours after the operation the warts could be pulled out easily. This was the quicker way, but it caused considerable pain and irritation, and is accompanied by some danger of the acid being dropped upon the skin and thus causing trouble."

The Covered Milk Pail a Factor.

Storrs Agricultural Experiment Station recently issued a very interesting bulletin entitled "The Covered Pail a Factor in Sanitary Milk Production," by W. A. Stocking. The following is a summary of this bulletin:

1. Two sets of tests were made. In one case, milk drawn into an open pail was compared with milk drawn into a pail with a cover devised for excluding dirt during milking. In the other case, milk drawn into an open pail was compared with the same milk immediately after the milking.

2. The amount of dirt in the milk from the covered pail was only 37 per cent of that in the open pail. While the amount of dirt in the strained milk was 53.4 per cent, that in the milk cover excluded 63 per cent, while the strainer removed less than 47 per cent. The differences in the two samples varied more widely in the latter tests than in the former. In the strained milk the amount of dirt removed depended largely upon the nature of the dirt.

3. By the use of the covered pail an average of 29 per cent of the total number of bacteria and 41 per cent of the acid producing bacteria were excluded from the fresh milk. By straining the milk as soon as drawn into the ordinary open pail an average of but 11 per cent of the total number of bacteria and 17 per cent of the acid producing species were removed.

4. After the milk had stood for 50 hours at a constant temperature of 70 degrees F., the samples from the covered pail contained a smaller number of bacteria in the majority of the tests than did the samples from the open pail, yet the covered pail sample frequently contained the larger number. In each test the number of acid producing bacteria was smaller in the sample from the covered pail. In the strained milk, both the total number of bacteria and the number of acid producing bacteria was smaller than in the milk not strained. While the data at hand will not warrant any positive conclusions, yet it is probable that the larger numbers in the strained milk are due to the rapid growth of certain species not removed by straining which are able to develop more rapidly because of the removal of certain other species which if present would antagonize their growth.

5. The milk from the covered pail usually curdled somewhat sooner than that from the open pail, the average difference being about seven hours; likewise the strained milk in most cases curdled sooner than the milk not strained, the average difference being also about seven hours.

The fact that the keeping properties of the milk were not increased is of little practical value, since the milk used in these tests kept on the average nearly two and one-half days at a constant temperature of 70 degrees before curdling. This means that it would have kept for about five days had it been kept at the usual temperatures for hauling and marketing milk. This is considerably longer than milk is ordinarily required to keep.

7. The demand of the public at the present time is not for milk which will keep for a greater length of time, but for that which can be used as food without danger to health. It is an acknowledged fact that large numbers of children, especially in our cities, die each year of cholera infantum, or of other intestinal troubles which are caused by certain species of bacteria taken into the system in cow's milk. The species of organisms which cause these troubles naturally inhabit the filth of the stable and it is highly probable that the exclusion of this filth from the milk supply of our cities would result in greatly reducing sickness and death from this class of diseases.

8. The results of these tests indicate that the covered pail is much more efficient for the production of pure milk than is the straining of milk drawn into an open pail. It is quite evident also, that to keep the dirt out of the milk in the first

place is much better than to strain it out after the milking. A considerable portion of the dirt dissolves quickly in the warm milk and thus introduces a contamination that cannot be strained out.

9. These tests were made in a dairy where the conditions of cleanliness are good, as is shown by the small quantities of dirt found even in milk from the open pail. The use of the covered pail would doubtless prove to be more efficient where the conditions were not so good.

Heavy Cattle Unprofitable.

This is from the *Chicago Drovers' Journal*: "Heavy cattle have been hard to sell for a long time, with any satisfaction, and as the season advances the outlet seems to get smaller. This is because the popular demand is for small cuts, both in steaks and roasts, and buyers have to cater to the public taste. A local butcher said that he would not know what to do with a heavy carcass, as nearly all his customers asked for the small cuts. This is not very encouraging to the man who has put in much time and a great deal of feed raising his steers up to 1500-pound average. Some of the cattle coming now have been feed almost a year, and are hard to sell because they weigh too much. They might better have been marketed three months ago, but many feeders have been holding on, hoping that the market would improve, but in the meantime their cattle have fattened beyond the popular weight."

How Often Shall We Feed?

Cows appear to give better results when fed twice a day than when fed more frequently, says *Dairy and Creamery*. When fed so frequently as three or five times a day they are up on their feet straining and worrying for their feed some time before it gets to them. Investigations have recently taught us that an animal is using energy when standing that, if lying, might go to some other use. Ruminants have large stomachs, and the more quickly the stomach is filled and the animal lies down contented and satisfied the better the returns will be for the owner. It is well understood it will cost less and be more convenient to feed the ration in two feeds than oftener, and it needs also to be understood that much, very much, depends on what is contained in the two feeds given. It does not follow that this means the saving of one feed; not at all.

Prof. Henry of the Wisconsin station claims that American cattle feeders are giving their stock too much grain. He says, in part: "I have spent considerable time going through the literature on the subject and am surprised that the British feeder gives to his fattening heaves but a very small grain allowance. You all know that the turnip, or rutabaga as we call it, is extensively used in feeding operations in Great Britain. On searching authentic sources of information I find that the usual grain allowance for the fattening steer in England and Scotland ranges from six to eight pounds per head daily. In a few cases it reaches ten pounds, and in only one case out of a score or more of reports have I found it stated that so much as twelve pounds of grain were fed to a steer in a single day, and this amount only at the very close of the feeding period. The grains used in Britain consist usually of barley, cornmeal, cotton seed meal and linseed meal. With the small grain ration is fed from fifty to one hundred pounds of sliced turnips, four or five pounds of cut straw and five to ten pounds of hay, either cut or long. On this ration the steer in England and Scotland usually makes a gain of between one and three-fourths and two pounds daily, or say from fifty to sixty pounds per month. There is no need of saying that the English stockman does not fatten his bullocks or that they are inferior to ours when they are sold for the block. The English stockman as a rule has good cattle and he puts them on the market usually in a finished condition.

Turnips for Milch Cows.

The unprecedented drought now prevalent in the Eastern States is likely to give a good opportunity to overthrow the prevailing prejudice against turnips as food for milch cows. In many quarters they are considered unfit for such use on account of danger of tainting the milk with their peculiar flavor. As soon as rains do come, making it possible to plow and for seeds to germinate, every farmer with cattle to winter will need to be on the alert to secure all the forage crops possible before the advent of winter. Corn fodder and millet will be the first recourse, provided rains come in time for them to mature. As a last resort a good big turnip patch will go a long way in carrying a cow through the winter. These can be sown on good land any time after July 20 and before August 20 with every prospect of a full crop. When silage is not available I know of no feed that gives the desirable succulence in winter for milch cows more cheaply. Fed immediately after milking and in connection with grain and hay or other dry fodder, there need be no fear of bad flavor in the milk. I have fed thousands of hnsheis in this way, both when shipping milk to New York and when delivering in bottles to the best family trade here in Middletown, and never had a single complaint of the turnip flavor. The Borden Condensed Milk company, which has a factory here, has a clause in its contracts prohibiting the feeding of either turnips or silage. Those who are up-to-date in winter dairying know that this means higher cost of milk production. They are now to have as active competitors here, the Orange County Milk-Flour Food company, which is erecting a factory here and offering to pay either the New York Exchange price or Borden's prices, without any restrictions as to feed. This, I take it, means deliverance for the farmers of this section at least from the Borden arbitrary rule of prohibiting the use of silage. They have three large factories within a radius of eight miles and as a consequence very few silos have yet been built in their territory. Those who are so fortunate as to secure a supply of turnips for next winter need not fear for a good market for their milk. The new company is to produce cream for the New York market and convert the skim-milk into a milk flour by some new patented process.—O. W. Mapes in *Rural New Yorker*.

Markings of a Good Feeder.

Professor Day, of the Ontario Agricultural College, tells what makes a good feeder as follows:

"The animal should have a good even back well covered with flesh along the part: that are the most valuable. The feeder's animal as well as the beef should be well covered with flesh. He must have a well sprung rib, a large capacity for food and a strong constitution. To have a strong constitution it must have a strong heart girth. It must be a nice deep animal, well apart in front, with a good deep harrel, long rib and under line, as well as a straight top line. For a good feeder I say look to the head. If the animal should have a large prominent eye, a wide nostril, a good big mouth and nice muzzle, you may bank on her as a good feeder.

"The handling qualities in both a butcher's bnlock and a feeder are very important. The best way I can describe that is by saying have a skin that is firm but not hard, mellow but not soft. Flabbiness indicates too much fat and lack of muscle. Get a feeder with a thick furry coat of hair. Such hair denotes good even flesh, while a wiry hair it a sign of a coarse flesh. The shoulder should be neat and smooth and should blend neatly on the neck.

"We want the shoulders to carry a good deal of flesh in proportion to the amount of bone. The neck is cheap meat, it is therefore desirable that we should have a

short, thick neck fitting nicely to the head and the shoulders. The flesh should be uniform in quality all over. The bone should be reasonably fine and in proportion to the size of the animal."

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

TO THE PUBLIC.

NOTICE IS HEREBY GIVEN THAT THE Stallion RONNIE RUSSELL, now at the Glenville, O. track, and entered at Detroit in the M. & M. by Emma Isabel Howard, Los Angeles, Cal., and at other places, is the property of Lonisa B Howard and is now wrongfully in the possession of S. E. Kent and Walter Bordwell. All persons are hereby warned not to purchase the animal. W. W. HOWARD, Los Angeles, Cal.

- No. 7. 2:12 Class Trotting.....\$500
- No. 10. 2:10 Class Pacing..... 600
- No. 11. Roadster Race for Road Horses Owned in Sonoma, Marin, Napa and Mendocino Counties prior to July 1, 1903.

NOTICE—Nomloators have the privilege of naming two horses from the same stable, or owned by the same person, on one entrance fee.

N. B.—It is not the intention of the management to give any special races at this meeting, and if you want to start your horses they must be entered in the regular advertised events. Races will be arranged so that horses entered in several races will have time enough between races to start in each. Entrance 5 per cent. Five per cent of the amount of the purse will be deducted from each money won. Conditions same as heretofore advertised for this year. Member of National Trotting Association. Address all communications to E. P. HEALD, President. F. W. KELLEY, Secretary, 36 Geary St., S. F.

THE GRANDLY BRED STALLION
BY MACK

Sired by McKinney 2114, dam By By by Natwood is offered for sale at the above figure. He is a full brother to Marengo King 2:29 1/4. Address H. L. BARON SMITH, 320 Bush St., San Francisco.

IN THE SUPERIOR COURT OF THE CITY and county of San Francisco, State of California

In the Matter of the Application of JOSEPH ALBERT CRACKBON, for Change of Name.

The petition of Joseph Albert Crackbon, respectfully shews:

That he is over the age of twenty-one years; that he was born in the City of Sacramento, State of California, and has ever since resided in the State of California, and does now reside at the City and County of San Francisco, State of California.

The petitioner's father is dead, but petitioner's mother, Ada B. Crackbon, is alive and resides at Sacramento, and petitioner's other near relatives are Mrs. Emma Pierce and Mrs. M. W. Wilder, both residing at Sacramento, California, and L. S. Crackbon, petitioner's brother, residing at San Francisco, California.

That petitioner desires to change his name to Joseph Albert Whitney, the name Whitney being petitioner's grandmother's maiden name.

That the reasons your petitioner desires to change his name are; that the name Crackbon is made the subject of ridicule and punning to such an extent as to render the lives of petitioner and his children extremely disagreeable and unpleasant.

WHEREFORE, petitioner prays that this Court make an order fixing the time and place of hearing this petition and directing publication thereof, and that upon the hearing of said petition, this Court make an order changing petitioner's name from Joseph Albert Crackbon to Joseph Albert Whitney.

Dated June 12 1903
JOSEPH ALBERT CRACKBON, Petitioner.

WM H. CHAPMAN, Attorney for Petitioner.

Upon reading the foregoing petition, it is hereby ORDERED, that Monday, the 13th day of July, A. D. 1903 at 10 o'clock in the forenoon, be and the same is hereby appointed as the time, and that the Court Room of Department No. two, of the said Superior Court, at the City Hall, in the City and County of San Francisco, State of California, be and is hereby appointed as the place for hearing the application contained in said petition.

AND IT IS FURTHER ORDERED, that publication of said petition be made once a week for four successive weeks in some newspaper, printed in this City and County.

Dated June 17, 1903.
FRANK J. MURASKY, Judge of the Superior Court.
Endorsed: Filed June 17, 1903.

BALLISTITE

The Standard Dense Powder of the World.
CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.
The horse CAN BE WORKED AS USUAL.
For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.
It is very adhesive and easily applied to a watery as well as a dry sore.
Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor.
We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cures preceding that year. This increase was entirely due to its MERITS and from it we feel justified in saying that it is the GALL CURE OF THE 20TH CENTURY.
It is a quick and sure cure for those troublesome skin cracks under the fetlock, which injure and often lay up race horses.
All Trainers Should Have it in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.
Read our "ad." on Campbell's Horse Foot Remedy in next issue of this paper.

GOOD ONLY UP TO AUGUST 15, 1903

We are pleased to announce that we have made arrangements whereby we are able to renew our offer of the **MAMMOTH CHART, SHOWING SKELETON OF THE HORSE** as a handsome premium to new subscribers and others who will pay us \$3 for subscription to the BREEDER & SPORTSMAN between July 1st and August 15, 1903.
This Chart is lithographed on tinted paper and is 22x28 inches. It will be found invaluable to every owner of a horse, as the names of all the Bones are given, as well as the names of the Tendons and Ligaments of the legs. By studying this Chart almost any lameness can be located and the proper remedies applied. The accompanying engraving will afford an idea of its appearance. No

similar Chart has ever before been published. The artist, in preparing this Skeleton, visited the American Veterinary College in New York City and made drawings from actual skeletons, thus insuring absolute accuracy. This Chart sells for One Dollar, but any reader can have it who will remit **THREE DOLLARS**

BEFORE AUGUST 15, 1903.

It will be mailed, carefully packed, in a heavy pasteboard tube for safety. Address

BREEDER AND SPORTSMAN, 36 Geary St., San Francisco.

The Final and Greatest Sale of Santa Rosa Horses!

—WILL TAKE PLACE AT THE—

OCCIDENTAL HORSE EXCHANGE

246 THIRD STREET, SAN FRANCISCO.

WEDNESDAY, JULY 22, 1903,

COMMENCING AT 10:30 A. M. SHARP.

To Close Out the Estate of Henry Pierce, Deceased.

The Finest Looking and Best Bred Trotters and Pacers, Broodmares, Colts and Fillies of the Santa Rosa Stock Farm will be sold without reserve or limit.

This Sale offers golden opportunities to seekers after the very choicest of Trotting Stock that are "bred in the purple" and show their breeding. No consignment has ever been sent to San Francisco to surpass it. There is not an inferior animal listed. A careful perusal of the pedigrees below and an inspection of all to be offered will convince horsemen, farmers and breeders that it will pay them to attend this sale and secure a few of these, for the demand for good Trotters, Pacers and Broodmares is increasing and they will never be as cheap as they are now.

Name, Sex, Year Foaled, and Sire.	Dam's Family.	Name, Sex, Year Foaled, and Sire.	Dam's Family.

Caromolly, blk f, 1901, by Beau B 2:19½	Molly Allen 2:20¼ (sister to Flora Allen (see above)) by Mambrino Wilkes, soo of Geo Wilkes	Observer, b g, 1902, by Marengo King 2:29¼	Transit of Venus (sister to Cupid 2:18, Sidney Dillon, etc.) by Sidney 2:19¼, etc
Crossout, b f, 1901, by Beau B 2:19½	Paceta 2:26 by Looe Pine 2:28¾; 2d dam Ceta by Piedmont 2:17¼; 3d dam Cecil (dam of Cecliao 2:22, etc.) by Gen Benton, etc	Prince Allen, br g, 1902, by Marengo King 2:29¼	Mollie Allen 2:20¼ (sister to Flora Allee, dam of 3) by Mambrino Wilkes, etc
Credit, cb f, 1901, by Beau B 2:19¼	Belle Isle by Piedmont 2:17¼; 2d dam Idabelle (dam of Carlisle 2:26¼) by Hambletonian 10, etc	Excelsus, br g, 1902, by Exc. oer	Lady Agnes (dam of Lady Piedmont 2:21¼, Stewart 2:27¼) by Electioneer etc
Flora Allee, blk m, 1886, by Mambrino Wilkes	Lady Allen (dam of Molly Allen 2:20¼) by Mambrino Wilkes	Iodamoot, br f, 1900, by Altamont 2:36	Myrtle 2:13¾ (dam of Robizola, trial 2:11) by Anteen 2:16¼; 2d dam Luella (dam of Myrtle 2:13¼ and Prince Nutwood 2:12) by Nutwood 2:18¾; 3d dam Ruth Aoo by Bell Alta, son of Williamson's Belmont; 4th dam Jaoo by Boston Boy
Ascania, cb f, 1900, by Sidney Dillon	Maud (dam of Maudie 2:24¼ and Legation 2:23¼) by Nutwood 2:18¾	Rusbbelle, cb f, 1900, by L W Russell 20820	Palo Belle 2:24 by Palo Alto 2:08½; 2d dam Belle Isle by Piedmont 2:17¼
Inferlotta, b f, 1900, by Inferna 2:24¼	Carlotta Wilkes (dam of Volita 2:15¼ and Vollotta a sire) by Cbarley Wilkes 2:21¼; 2d dam Aspasla (dam of 3) by Alcaotara 2:23; 3d dam Miss Bucbaooo (dam of Escape 2:26¼) by Clark Chief 8, etc	Frambelle, b f, 1901, by Fram 2:17¼	Belle Isle by Piedmont 2:17¼; 2d dam Idabelle by Hambletonian 10
Lady Agnes, b m, 1884, by Electioneer 125	Lady Lowell (dam of Ladywell 2:16¼, Lorita 2:16¼ and dam of Alta Vela 2:11¼) by St Clair, stunted to Sidney Dillon	Tramper, ob g, 1896, by Sidney Dillon 23157	Red Rose by Sultan 2:24; 2d dam Lady Baldwin (great broodmare) by The Moor
Ladywell 2:16¼ & c. blk m, 1886, by Electioneer 125	Lady Lowell (dam of 2 aod graodam of 3 in 2:30) by St Clair Has a bandsome foal at foot by Sidney Dillon and is stunted to Sidney Dillon again	Monitoo, blk m, 1896, by Almontoo 2:24¼	Hazel Mao by Director 2:17; 2d dam McCord's Trial by Baldwin
		Daody, rn g, 1893, by Directivo	Dam of Pascora Hayward

*Inferna 2:24¼ was sired by Diabolo 2:09¼ out of Biscari (dam of 4) by Director 2:17.
 †Marengo King 2:29¼ was sired by McKinney 2:11¼ out of By By (sister to Lookheart 2:08½, etc.) by Nutwood.
 ‡Beau B 2:19½ was sired by Wildnut out of Nettie Benton (dam of 3) by Gen. Benton, etc.
 §L W Russell was sired by Stambold 2:07¼ out of By By (great broodmare) by Nutwood, etc.

With but a few exceptions all the above that are older than yearlings are well broken to drive; some have been and are at present in training on the Santa Rosa track; many are heavily engaged in stakes, and have shown very fast trials for the work they have had. All the Sidney Dillons that have had records have been sold. The amount these four brought aggregated \$28,800. The sum of \$35,000 has been refused for Lou Dillon. Every Sidney Dillon that has been broken to harness is noted for its perfect disposition, frictionless gait and gameness. Dolly Dillon 2:07 was the greatest mare of 1901. B. S. Dillon 2:25 has shown trial miles in 2:09 and Captivity 2:26½ miles in 2:11 h-fore leaving for the East. This will be the last opportunity offered to get such horses. All are standard and eligible for registration. Those by the younger Santa Rosa Stock Farm sires will show for themselves on the day of sale. Catalogues will be ready for distribution Tuesday, July 14th. Send to the office of the BREEDER AND SPORTSMAN or to the undersigned if you want one.

THERE WILL BE MORE GREAT "TROTTING PROSPECTS" OFFERED AT THIS SALE THAN AT ANY EVER HELD IN CALIFORNIA!

Stock at salesyard July 19th.

TELEPHONE: Black 586.

Terms—One Year \$3, Six Months \$1.75, Three Months \$1 STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter addressed to F. W. KELLEY, 36 Geary St., San Francisco, Cal. Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

San Francisco, Saturday, July 18, 1903.

HARNES RACING IN CALIFORNIA will not be as extensive as in years past, owing to several causes, but there will be many good contests and some high class horses will be developed during the few weeks of racing that will begin August 13th. In the green classes for trotters and pacers there are several horses entered that will get marks below 2:15 before the season is over, and three or four should get into the 2:10 list. Quite a number of California trainers will take their strings to the Oregon and Washington circuit where eight or ten weeks' racing is assured them, but there will be plenty of horses remaining in California to furnish all the meetings that are given with generous fields in the races for which purses are announced. In fact the absence of a portion of the horses that have been trained here during the winter will make the chances of those remaining still better when they start for the money. The Vallejo meeting gives every promise of being a big success. There is more interest in harness horse matters in that section at the present time than for years past, due in a great measure to the recently organized Vallejo Driving Club, that arranged a program of harness racing for the Fourth of July celebration two weeks ago that drew a tremendous crowd to the track and was splendidly managed. The entry list for the Vallejo meeting is an excellent one, and some great contests are certain. On the 1st of August three additional purses of \$300 each will close. The Grissim Stake for 2:12 trotters is one, the 2:30 class trot another and the green class pace the third. The Vallejo track is in fine shape for training and at least forty horses are now being worked there. The Vallejo meeting will open the circuit in good shape and all horsemen should make it a point to be there.

SYNDICATE BETTING has been the bane of California summer racing for years past. The Sacramento Sunday News proposes to do away with it by the following method:

It is wholly unlikely that the betting on the coming State fair races will be of the syndicate variety which has driven the public from the race track and prostituted the sport of kinds to a mere device of professional grafters. A simple scheme can be proposed to accomplish this result and take the fair speed contests out of the hands of the gambling ring. Here is a plan that can be consummated if there is an earnest desire on the part of the fair directors to take the institution out of the clutches of the gamblers, and it is understood that there is, at least on the part of a comfortable majority. It is easily possible to induce six bookmakers to cut in at a price of \$225 a day each, payable for the twelve days in advance on the pledge of a programme of sixty races or five a day. This would bring \$16,200 to the society instead of \$12,000, which the syndicate paid last year. If more than six desire to get in the cost could be prorated according to the number. The opportunity would be open to all and competition would save the public from the cinch arrangements that have nearly killed racing at the State fair.

The plan set forth by the News looks pretty well on the face of it but when it is remembered that all the leading bookmakers who are willing to give fair odds are not on this Coast during the summer, and that the layers of odds who remain here are not at all averse to forming a syndicate, and in fact always do so, there would be nothing gained by the Sacramento journal's plan. It is a known fact that just about all the money received from the bookmakers is given back to the running horse owners in the shape of free purses. Four running races a day for purses of \$250 each makes \$12,000 for the meeting which was the sum paid last year by the bookmakers for the privilege of taking and keeping the public's money. Why have any books at all? Auction pools and mutuals will furnish all the opportunity necessary for the public to make its wagers, and any State institution that must depend for its maintenance on the sum received for a betting privilege, is not worthy of support. The Pacific Coast Trotting Horse Breeders Association has abolished bookmaking on its races and holds

successful meetings. The Woodland fair last year was a great success and the racing was better than at the State Fair and yet all the betting was by auctions and mutuals—there were no books. The State Agricultural Society has run behind nearly every year since bookmaking was adopted as the betting system on its races. Why not try the old plan once more, especially as the money paid for the privilege is all given away for purses for the runners?

THE STATE FAIR PROGRAM has been issued and the advertisement of purses for the harness races will be found in our business columns to-day. The trotters are provided for with a purse of \$400 for two year olds, one of \$1000 for the 2:24 class, one of the same amount for the free for all class, and purses of \$500 each for the 2:30, 2:17, 2:11 and green classes. For the pacers there is a purse of \$400 for two year olds, one of \$500 for the free-for-all class, one of \$1000 for the 2:20 class, and \$500 each for the 2:17, 2:13 and green classes.

In addition to these purses, the Society has offered purses for two mile races as follows: For 2:20 class pacers a purse of \$700 the race to be two miles and repeat. For 2:24 class trotters the same purse and the same conditions.

A double team race for trotters or pacers for teams that have been owned and driven regularly on the road prior to June 1st this year is also provided. \$500 is hung up for this event, and the team must be driven in the race hitched to a road vehicle and by the owner.

There is a consolation trot and a consolation pace for the classes that have the most starters during the meeting.

The Occident Stake will be trotted on the opening day of the fair and the Stanford Stake on the following Monday. These stakes will be more valuable this year than at any previous year. There will be special races for drummers and members of properly organized driving clubs. The fair will open Monday, August 31st and continue two weeks. Entries to the greater part of the harness events will close Wednesday, August 12th. See advertisement.

Answers to Correspondents.

G. W. Young, Burns, Oregon—Will you publish in your next issue the pedigree of the stallion Vasto 2:16½ and who he was owned by? Can you give the names and records of the sons of John Nelson, and did any of his sons get any fast daughters of note; if so, what were their names?

Answer—Vasto, register number 20072, bay horse, foaled 1888, was sired by Vasco 10996, dam Chess (dam also of Valissa 2:19) by Magic 1451, grandam Betty (dam of Retta 2:28½) by Clark Chief 89. Vasto was bred by J. R. Bascom & Son of Sharpsburg, Kentucky. He was owned by the late James G. Fair of this State and made his record at Woodland, California, August 30, 1894. John Nelson sired four that took standard records, as follows: Aurora 2:27, Gov. Stanford 2:27½, Nemo 2:30 and Nerea 2:23½. He also sired the dams of Albert W. 2:20, Bonanza 2:29½, Alexander Button Jr. 2:26½, Arol 2:24, Hazel 2:28, Maud Y. 2:20½, Sister V. 2:18½, and Valensin 2:23. None of his sons have sired standard speed that we know of.

D. S. M. Ryde—I wish to enquire in regard to castrating colts from four to five months old. Have any of your readers any experience in this line and what luck have they had?

Answer—We have talked with several horse breeders on this subject. The consensus of opinion is that castration is as successful at four or five months as at any age. We have heard of colts being castrated at two weeks old. Perhaps some of our readers can furnish us some personal experiences with colts of this age. We should like to hear of any such.

L. M. L., Martinez—What is the breeding of Direct Filis, formerly owned by the late A. G. Gurnett?

Answer—Direct Filis is by Direct 2:05½. His dam was a mare called Lady W. by Ophir, a son of Skenadoah, but we have no record of the breeding of the second dam.

R. L. N., San Francisco—What horse sired Medico 2:17½?

Answer—Medico, bay gelding, made his record at Napa July 7, 1896. He is by Hewlett's Echo, he by Echo 462. The dam of Hewlett's Echo was by Prlam 1798, second dam by Skenadoah 926.

Robert Eiwert, Alvarado, Cal.—Please give breeding of the sire of dam of Ned Forrest 2:25½. Is there a horse called Frank Murphy 2:13½ trotting. He is said to have been worked on the Alameda track and is described as a large bay gelding.

Answer—Ned Forrest's sire was Blackbird 402, known as Reavis Blackbird. His record is 2:22. He was sired by Blackbird 401. His dam was Jane Smith by Captain Lightfoot, son of Victor, he by Abdallah

1. His second dam was Dolly by Kentucky Eclipse, and third dam untraced. The only Frank Murphy with a record that we know of was sired by Brown Jug, son of Nutwood. His record of 2:24½ was made at Salinas in the fall of 1897. We do not know whether he was ever worked on the Alameda track.

J. C. H.—Can you give the pedigree and race record of a horse called Plumas?

Answer—Plumas, a bay stallion, was by Werner's Rattler out of a mare called Rose Thompson, whose pedigree was untraced. He was bred and owned by John Thomson, Quincy, Plumas County, California. He was foaled in 1862 and had a record of 2:40½. He is registered.

The Columbus, Ohio, Meeting.

COLUMBUS (O.), July 13.—The summer meeting of the Columbus Driving Park Association opened here to-day. Results:

Trot, 2:30 class; purse \$800—Robizola won the second and third heats and race. Time, 2:15½, 2:17½. Patchen Maid won the first heat in 2:14½.

Pace, 2:18 class; purse \$1000—Rampart D. won in straight heats. Time, 2:12½, 2:12½.

Trot, 2:24 class; purse \$1000—Joymaker won in two straight heats. Time, 2:13½, 2:14½.

Pace, 2:30 class; purse \$800—Five Points won in two straight heats. Time, 2:12½, 2:10½.

July 14.—The judges did not think McCarthy was driving Tom Keene out in the first race to-day and McHenry was put up in his place. Track fast. Results:

2:24 pace, purse \$1000—Dr. Madara won in two straight heats. Time, 2:11½, 2:09½.

2:23 trot, purse \$2000—Guy Fortune won second and third heats and race. Time, 2:17½, 2:16½. Maud Carlisle won the first heat in 2:16½.

2:10 pace, purse \$1400—Baron Rodges won in two straight heats. Time, 2:11½, 2:08½.

2:17 trot, purse \$800—Robizola won in two straight heats. Time, 2:13½, 2:16.

July 16.—Track fast. Results:

2:12 pace, purse \$1000—Pauline D. won in two straight heats. Time, 2:08½, 2:07½.

2:19 trot, purse \$1000—Aerolight won in two straight heats. Time, 2:13½, 2:14½.

2:16 pace, purse \$800—George A. Fuller won first and third heats and the race. Time, 2:08½, 2:09½. Miss Ophelia won second heat in 2:09½.

2:22 pace, purse \$800—Five Points won in two straight heats. Time, 2:12½, 2:12½.

Runners and Trotters Compared.

Palmer Clark writes as follows in the Chicago Inter-Ocean of last Sunday:

In the face of the absorbing interest in sporting circles caused by the most successful racing season in the history of Washington Park, now in progress at the South Side track, discussions and comparisons as to the merits and success, past, present and future, of the harness and running horse game are numerous and, at times, heated.

A newcomer to the thoroughbred ranks is puzzled to know how the trotters and pacers manage to keep up year after year, even to a limited extent. Sports of all kinds are, to a great extent, a matter of education, and the kindergarten schools for the running meetings are the big cities, and the very large majority of the schools never get beyond the primer used in these great schools, namely the metropolitan dailies. From personal knowledge and observation I am positive there are thousands in Chicago and vicinity who turn to the running horse news first in picking up a Chicago daily who can tell you all about the horses that are to race that particular day, repeating like a parrot the information gleaned in the past from the same source. They could not tell one horse or rider from another except by comparison of numbers and colors on the score cards; they seldom go to the races, but will bet their last dollar with all the confidence in the world. It will be news to this vast army to know that there are close to a thousand harness horse meetings each year, as compared to about 100 running events in the smaller towns. These meetings, their promoters and followers, as far outclass the running element, as the latter are so confident in claiming for their side in the larger cities.

It would be harder to give a successful running meeting of the first class in Cleveland, strictly a harness-horse center, than a trotting meeting in Chicago, where the runners are so prominent, yet both are possible and a matter of education coupled with good management.

Lexington, Ky., is about the only city where successful meetings of both kinds have been held for years past and where both classes of horses are bred, raised, and developed. I doubt whether there is a fair-minded resident of the Blue Grass section but will concede first honors to the trotter.

The runners are bred to sell and race—trotters the same, but, in addition, the latter are a source of pleasure and recreation to many wealthy, retired business and professional men. For this, from among many good reasons, I, for one, believe the harness horse interests will survive the longer and grow in popularity.

JOTTINGS.

"I EXPECT TO SEE HER go in 2:03 or better this year" was the statement made by Millard Sanders when Lou Dillon was put up for sale at Cleveland last May. Since then the handsome little daughter of Sidney Dillon has made four public trials against the wench held by Father Time. In her first trial she pulled a wagon in 2:06½. Her next trial was to beat that record and she drew the four wheeled vehicle a mile in 2:04½—faster than any other horse had ever drawn one. The next time she started was in an effort to lower the record of Alis 2:03½ to sulky. She failed as the mile was in 2:04½. Last Saturday she again made the attempt and when the mile was finished 2:03½ was the time hung out and Lou Dillon is now the fastest trotting mare the world has yet seen. The beautiful little mare has been written of so often in these columns that there is no need of anything further being said of her breeding, looks or peculiarities. She is undoubtedly the most wonderful trotting mare ever seen on the turf and her flight of speed is as great if not greater than any other trotter. That she will trot a mile in 2:03 as Millard Sanders predicted is as certain as she keeps right and starts some day this year when the weather and track conditions are favorable, and it is the opinion of the writer that she will shade the record of Cresceus 2:02½ a little before the end of the year.

Another good mare that Mr. Sanders is handling is the bay mare Robizola by Robin that he has under lease from her owner Dr. Clark of Santa Rosa. Robizola started twice this week at the Columbus races and not only won both races, but took a record of 2:15½ in the first race and reduced this to 2:13½ in the second. Robizola is by Robin a son of Director and is a very rapid gaited and nery trotter. She will get a mark better than 2:10 this year barring accidents and 2:07 will be nearer her record if she finds a good day and track and a fast field to make her show her best. Dolly Dillon 2:07, Anzella 2:06½ and Lou Dillon 2:03½ is a pretty good lot of records for one trainer to hang up in three successive years and Mr. Sanders is entitled to all the credit that is due a driver of three such trotters. May he add Robizola to his 2:07 list before the summer is over.

Robert Smith left Los Angeles last Thursday evening for Seattle with his own and W. G. Durfee's horses that are to be raced on the North Pacific Circuit. Mr. Durfee will follow some time during the coming week. The horses taken were High Bell, Red Skin, Ama A., Sweet Marie, Rita H., Coronado and Idylwild. Several of these horses are entered at the Vallejo and the Breeders Peteluma meeting but they will hardly be back in time to start there as the time will be too short and then the outlook for a good season of racing is so good up north that few who start in at Seattle will want to come back to California before October unless they have engagements in the large stakes. As Durfee has several fast ones in his string the fact that he has gone to Seattle will doubtless cause the list of starters at Vallejo to be larger than it would have been had he taken his string there. From present appearances the Vallejo meeting will be quite a success this year as the applications for stall room already made show that more horses will be on the grounds when the meeting opens than have been seen there in years.

During a flying visit made to the Vallejo track last Saturday I found several of the old standbys at work. Thos. Smith, who now has the management of the track is working a few, his son Jos. Smith has a half dozen or so, Joe Corey has three or four, Mannie Reams is handling seven or eight, L Leadbetter is working two or three colts; Dr. McDonald, the Concord vet, has a couple there, and during the afternoon J. W. Zibhle came in from Denver with nine head. Several trainers will take their strings there during the coming week. The track is in fine shape—in fact I never saw it look so well. Arrangements just completed with the city authorities of Vallejo will give a liberal water supply from this on and there will be no shortage of this necessary aid to good track making.

Among the horses that got within the view of the

BREEDER'S camera, and which are shown on the title page to-day, were the following:

Swanhilda, a good-looking bay mare owned by W. L. McDonald of Concord, will be a starter in the 2:25 class pace at the Vallejo meeting. She has a nice way of going and wears nothing but a harness and a pair of quarter boots. She has had very little work, but can show a mile in 2:25.

Hank 2:23½ by Vasto is now in Joseph Smith's charge. He is an improved horse in appearance and, if he could get away as well as he can come home, would be a dangerous factor in any company.

The McKinney two year old is owned by L. Leadbetter. This colt is a very handsome youngster, just learning to know what a harness is. His dam is by Secretary and his second dam the dem of Silas Skinner 2:17; so he is bred for looks, speed and staying qualities. He is a square trotter.

Miriam E. is not only a good-looking mare, with size and style, but she is a great prospect. She belongs to E. Dinkelspiel, the Suisun editor, and is being trained by Mannie Reams. Miriam E. is a full sister to Ben F. 2:22, the fast pacer that Fred Chadbourne is training at Pleasanton. Like him she is a "side-wheeler."

Joe Corey turned Donnybrook, full brother to Joe Selby 2:24½, loose to have his picture taken, remarking that the contrast would be too great if he remained in the sulky. Donnybrook is a trotter and can show a lot of speed. He has been in the stud this year and done a fair business. He is one of the best dispositioned of stallions, and is often led about by a little twelve-year-old girl when being cooled out.

The high-headed gelding Roscoe is a five year-old and belongs to the famous McGregor family. He is by Rainbow, son of Silver Bow, and he by Robert McGregor. Roscoe is a trotter and Joe Smith worked him a nice, easy mile in 2:47 just before the picture was taken. This gelding is a bay, good gaited, has been driven by a lady, and is about an ideal read

MILLARD SANDERS AND LOU DILLON 2:03 1-2.

horse and a good prospect for some one to get and train for the races.

Little Babe is the mare by Bradtmoor that won the trotting race on May Day at the Dixon track and took a record of 2:25. She is one of the best prospects I have seen for a 2:15 trotter, and as she has been trained but very little looks like the real goods, as she can show a very fast clip. Mannie Reams has her in his string.

Ascot Park Will Open Christmas Day.

A telegram from Los Angeles dated July 12th says: "Ascot Park, the new race track upon which work is now progressing, will be thrown open on December 25th for a six-days' season of racing. J. W. Brooks, manager of the new track made the announcement to-day. He leaves to-morrow for the East end hopes to induce owners of the best horses to be had to race at the new track. He will visit St. Louis, Cincinnati, Chicago, Louisville, Lexington and New York.

There will be a full season of three weeks' racing at Agricultural Park, of which Brooks is lessee, from October 13 to 31st, inclusive. Ascot Park has large financial backing, and is designed to be one of the first race courses in the country."

It is said that at Bronson, Mich., a five year old broodmare with a foal at foot was started in a matinee race the other day, winning a heat (half mile) in 1:11½. She had on no shoes behind, and the morning of the race was led eleven miles to the track. This marvelous mare is called Little Reanie, and is owned by Stanton & Son, Union City, Mich. Little Reanie is a gray mare, 15 hands, foaled 1898, sired by a son of Pilot Medium, dam Irene 2:27½ by Ira Nutwood. She and her colt were shown after the race, and were led home that night. She was big and fat.

Good Sport at Woodland.

WOODLAND, July 12, 1903.

EDITOR BREEDER AND SPORTSMAN:—As we had a nice day's sport here yesterday, I send an account of it, thinking it will interest your readers.

There were four events on the card. No liquor was sold on the ground and no pool selling was permitted, and as the admission was but 25 cents every one could attend, and there was a fair crowd.

The first event was a walking race between R. H. Nason's Glen Wilkes, A. B. Rodman's Billie and Sem Grigshy's saddle horse. Mr. Grigshy's horse won, Glen Wilkes being second and Billie third. The time for the mile was 9:57.

The second event was the attraction of the day. Mr. C. B. Bigelow's horse, The Kid, has developed into a guideless pacer with but very little experience. He was given a couple of slow heats to harness first and then turned loose for the guideless mile. He went the mile without a skip in 2:23½ and came down the homestretch like an oldtime campaigner. It was something new for the people of Yolo county to see, and it gave great satisfaction. It is predicted by horsemen that this horse will develop into a very fast guideless pacer.

The next event was a race between A. E. Masten's Celmar, John Silva's Economizer and R. H. Nason's Glenrose. The result was as follows:

Celmar by Falrose-Killarney.....(Masten)	1
Economizer by Chas Derby.....(Silva)	2
Glenrose by Falrose.....(Nason)	3
Time—2:24½, 2:29.	

The second race was a very pretty contest and gave great satisfaction. In the second heat of this race Bellrose by Falrose lowered her record by three-fourths of a second. The summary is as follows:

Bellrose by Falrose.....(Nason)	1
Penrose by Falrose.....(Masten)	2
Smuggler by Waldstein.....(Norton)	3
Pulka Dot by Mendocino.....(Silva)	4
Lea A by Lillmont.....(Giblin)	5
Time—2:31, 2:17½.	

The judges who officiated during the day were A. C. Stevens, O. A. Lowe and S. H. Grigshy; Timers, E. Donnelly, S. W. Lillard and H. Edmonds. Clerk J. N. Cradman.

Matinee Racing at Eureka.

A Driving Club has been organized at Eureka, Humboldt county, and held its first matinee on July 4th. A large crowd was present and enjoyed the racing. The results are follows:

First race—For delivery wagon horses, one-half mile. Two started. First, Lohelbe & Vorrath's Maud, second, E. G. Pluke's Black Bess. Time, 1:30.

Second race—One mile. Four started. First, D. D. Ayers' Black Prince; second, John Hanson's Blossom; third, Frank McGrath's Johnny Bright; fourth, Guy Roberts' Eagle. Time, 3:33.

Third race—Free for all, one-half mile. First heat: First, H. Cochran's Priscilla; second, E. L. Hunt's Bolivar. Time, 1:11½. Second heat: First, Priscilla; second, Bolivar. Time, 1:10.

Fourth race—For double teams, one mile. First, Dr. C. C. Falk's team; second, Dr. E. Backenstone's team; third, Dr. Rae Felt's team. Time, 3:40.

Fifth race—Ladies' huggy horses, one mile. Four entries. First, Mrs. H. Cochran's Aurora Don; second, Mrs. Wm. Hall's Lucy; third, Mrs. C. E. Jenney's Beauty; fourth, Mrs. R. E. Baldwin's May. Time 2:50.

Sixth race—Trotting and pacing, one mile. First, J. Loewenthal's Pat Patchen; second, G. R. George-son's Robert G.; third, Dr. C. C. Falk's Bertie. Time, 2:46.

Seventh race—One mile. First, I. Minor's Elmer V.; second, H. Cochran's Aurora Don. Time, 2:40.

An Efficient Controller.

A patent for a folding blinder, which is said to be an efficient means of controlling a vicious horse, was recently granted to Ole Vikoren of Holdrege, Neb. The inventor says that it is positive in its action and is always ready for use, while at the same time its presence is never obtrusive when out of service, for the reason that it is largely hidden away in a casing over the brow-band of the animal's bridle.

The blinder comprises, according to the description of the inventor, the casing or housing curved to conform with the brow-band and fastened to the bridle by suitable straps. This contains a bellows folding-curtain or blind which is normally held in place within the casing by means of spring clips. This curtain is operated by a cord secured to the lower ends of the curtain and passed through the bit-rings and then back to the saddle or the hip-steps of the driving harness, within easy reach of the rider or driver. The moment that this curtain is drawn down in front of a horse's eyes he at once becomes quieted, and can be secured and led away from danger.—Philadelphia Record.

Proposed Five-Mile Trot.

William J. Irvine worked his trotting gelding Talisman by Steinway on Agricultural Park track last Saturday morning a mile in 2:20, last half in 1:03, says the Sacramento Union. He was so well pleased with the performance that he announced his willingness to back his horse with \$500 against any horse, trotter or pacer, owned in Sacramento County for a five-mile out, to be raced on the second or third day of next State Fair, if agreeable to the directors. His idea is to get at least three other owners of good borsés interested, owners, trainers or handlers to drive, and the winner to take all.

This is a somewhat novel proposition, as it is some years since a five mile out was raced in this county. It is none the less commendable, since a five-mile race is undoubtedly a better test of the bottom and stamina as well as of condition than the single mile heats and best two in three to win, which have been in recent years growing in public favor.

Or the thoroughbred course it is the get of four and five-mile horses which are now taking the money, as was instanced by the recent winning by the great three-year-old Afrikaner of the Advance Stakes, in which he broke the Sheephead Bay track record, and the rich Realization Stake. Afrikaner was bred in Sacramento County, and is by imp. Star Ruby, whose last performance before retiring to the Haggin Grant stud was the winning at the Bay of a four-mile race, at one stage of which he was almost a mile behind the leaders.

There is no scarcity of fast harness horses owned in this county and eligible to Mr. Irvine's proposal. Among those which may be mentioned are Frank Wright's Kelly Briggs, Captain Frank Silva's Polka Dot, Frank Rubstaller's Munroe B, Joe Terry's Margaretta, Alex Brown's Artisto and The Bouquet, and L. Tcdhunter's Zombowette. Mr Irvine places much reliance in the abundant strains of thoroughbred blood which are to be found in the pedigree of Talisman. Besides what he gets through his sire, Steinway, he is further enriched in that respect through his dam, Woodline by Woodnut, second dam Maud by Whippleton, and third dam You Guess by Jack Hawkins, a son of old Boston.

The day following the publication of Mr. Irvine's def Captain Charles F. Silva of Sacramento was interviewed and said: "I am more than pleased to accept the challenge of Mr. Irvine, and I can make up a field of three horses in order to make the event interesting. I will race him five miles out for \$500, and my entry will be my mare Polka Dot. I am authorized to state that Frank E. Wright's Margaretta or Florodora—probably Florodora—will enter, which will make the purse \$1500—well worth competing for. If Mr. Irvine is in earnest and will post a \$250 forfeit immediately, I will post a like sum for each of the other two horses, and we can give the race of the fair and draw the biggest crowd. I mean just what I say, and my money is ready to go up. It is up to Mr. Irvine. I think it likely that other owners would also put up the entry fee and start their crack roadsters, but of course I don't know. I don't think there would be any difficulty in getting the race put on, for it would be a big drawing card and would cost the Agricultural Society nothing."

Director C. W. Paine, of the State Agricultural Society and member of the Speed Committee, was seen by a Union representative and asked whether the directors of the society would be willing to put on the race. He said:

"You may say for me that the society will not only put on the race, but will hang up a gold medal for the winner. The race, as proposed, would be the biggest drawing card of the fair, would fill the stands and would cost the society nothing. We will hang up a gold medal for such a race and will be glad to do it. A five-mile trot, even if the starters were not local horses, would be enough of a novelty to draw a great crowd. I know all of the horses mentioned, and I am satisfied that a corking race will result if the parties interested stand by their offers, and as they are all game sportsmen, I think they will do so."

Sam Browne, the Kentucky horseman, used to tell a story about a foreman at his Blue Grass stock farm. The foreman loved horses and whisky, and he was so attentive to each that it was impossible to determine which occupied first place in his affections. He went on record one day, however. A group of stablemen were discussing the size of some nags when one asked: "Why are horses measured by hands?" "I don't know," replied the foreman, "but it's all wrong. Horses should be measured by fingers and whisky by hands."—New York Times.

The Kenney Bicycle Co., 531 Valencia St., is doing a big business in the McMurray Carts and Sulkeys. You not only save money by purchasing a McMurray but get the most durable, best made, and easiest running cart or sulky in the market. Investigation will convince a Missourian.

Jackson's Napa Soda does not tangle the feet.

Hollister Citizens are Showing Enterprise.

HOLLISTER, July 12, 1903.

There is to be quite a change at the Hollister race track. The property is owned by a corporation known as "The San Benito County Land and Improvement Club," but since Gov. Pardee vetoed the appropriation for district fairs all interest seems to have waned. This was about to cripple a very important industry. A few enterprising and prominent citizens realizing that something must be done to foster the raising of good stock, and also realizing that well bred horses with speed undeveloped were practically of no value, determined to see what could be done. As a consequence, a company of prominent men has been organized and has rented the Hollister race track for a term of five years, and before this is in print, a contract will have been let for a ten inch well, a ten thousand gallon tank and frame and a twelve foot windmill. This, in addition to the well, tank and mill now in use, will furnish the necessary water to make a first class track.

There are some first class sires in Hollister such as Dictatus Medium by Dictatus from Belle Medium; Mestoe by Sable Wilkes from Jane E., and Don Patrio by Benton Boy. All these horses' colts should be given a chance. To do so requires a good track. The raising of well bred horses is attracting the attention of our community; the great drawback is the limited number of first class dams. The aim of the new company is to make a fine track that will attract outsiders. We have the climate, water in abundance and that which is good, and the Hollister hay is recognized as the best in California—in fact it is being shipped all over the East for race track purposes. Hollister is centrally located, and there is no reason why this track, once in good order, should not become popular as a training stable. There are twelve horses being worked here now, and a number of others will come from neighboring towns as soon as the track is in first class shape. The intention is to have three days' races at a date to be hereafter made known.

OBSERVER.

Good Words for Trainer Zibble.

Mr. J. W. Zibble, who came to California last winter and located at Fresno with a few horses that he had campaigned successfully on the northern circuit last year, reached Vallejo from Denver last Saturday with a string of nine horses including Prof. Heald's good trotter Tom Smith that he drove to a record of 2:13 1/4 at Denver and won two races with. Mr. A. D. Hughes, a correspondent of the American Horse Breeder, wrote last week in that paper the following complimentary notice of Mr. Zibble, who is a stranger to a majority of California horsemen:

Trainer James W. Zibble, who won a fair share of the money and honors at the Overland Park meeting, will be remembered as the man who brought out Shadeland Onward 2:18 1/4, giving him his early preparation and first race record below 2:30. Last season he had the good, young stallion The Commonwealth 2:18 1/4, a son of Shadeland Onward 2:18 1/4, who gave Mr. Estabrook's fast mare Hallie Hardin a beating in the 2:25 class in June, but was not awarded the race for alleged repeatedly breaking in the last heat. Mr. Zibble is a native of Michigan, one of the hardest workers in the business, and his many friends in and about Fullerton, Neb., will be glad to know that "Jim" has struck a winning streak. He was twice elected sheriff of Nance county, Neb., when the country was new and the citizens none too good, but he made a good officer, having a reputation for fearlessness that bordered on the miraculous.

Which is it On?

The following is from the Western Horseman published at Indianapolis: Of course everyone knows that H. B. Gentry and Sterling R. Holt are not only both very much in the trotting horse business, but they are very good friends. Mr. Gentry stands McKinney 2:11 1/4 at \$200, and it is said he has a fine-blooded dog which serves at the same price. Mr. Holt is also somewhat of a dog fancier himself and owns a female of royal lineage, fully "standard bred", and registered. Mr. Holt desired to make one booking each to McKinney and Mr. Gentry's dog, but was "turned down" because the book of each was full. He was anxious to "get in," however, and pressed Mr. Gentry for the favor of an exception, and being anxious to at least in a measure oblige his friend, Mr. Gentry told Mr. Holt that he—Mr. Holt—might make one booking, taking his own choice as to whether it would be to McKinney or the imported blue-blooded canine. Mr. Holt paid over his \$200 and "hooked" to the canine—so the story goes. Now the query is, among the intimate friends of the two gentlemen, which one is it "on"? The editor of the Western Horseman has been appealed to for a decision on the question, but finds the "scales of Justice" so evenly balanced that they refuse to "break!"

Progress or No Progress.

The following letter was addressed to the New York Sun:

The Sun of July 1st contained an editorial reference to a recent trotting performance to wagon in 2:04 1/4 at Cleveland; and, recalling Nancy Hanks' reduction of Maud S.'s record to 2:04, the question is asked: "Did the mare or the pneumatic tire on the sulky do it?" In turn Alix dethroned Nancy Hanks by trotting to bicycle sulky in 2:03 1/4. The owner of Alix declared that he would put her in special training to high-wheel sulky to also beat Maud S.'s high-wheel record of 2:08 1/4. After due preparation, and when she was thought to be "fit," Alex had her trial, and, much to the surprise of her owner, failed lamentably, her best effort being something like 10 or 11 seconds slower than her record to "bike," or about 2:14 and perhaps a fraction over.

Some of the newspapers of the day mentioned the failure, but in general a very ominous silence ensued, and still seems to prevail, and I can not recall any further attempts in that direction.

When the "bike" sulky first appeared the trainers quite generally agreed that it made "any old skate" into a "ghost." Alix was very far from being a "skate," yet she could trot many seconds faster to "bike" than to high wheels, and ever since her day and failure as mentioned I have pondered this question: If Alix, certainly not above second class to high wheels, could be queen of trotters, in fact trotting champion, to "bike" sulky, what record would Maud S., the champion trotter to high wheels, have attained had she enjoyed the opportunity of trotting to bike? Would she also have trotted 10 or 11 seconds faster than she did, say down to 1:57 1/4 or 1:58 1/4? If Maud S. could be the world's champion trotter under the retarding influence of high wheels, wherein would she have lacked the necessary capacity to be overwhelmingly the world's champion, trotting with no drawbacks whatever?

As to pneumatic-tire wagon records it should not be forgotten that in September, 1900, at Hartford, Conn., The Abbot made a record of 2:05 1/4, while a few weeks later he "worked" a mile in public to wagon in 2:03 1/4, timed by many spectators, and this performance was duly set forth in many newspapers. As The Abbot's sulky record was also 2:03 1/4, his trial to wagon in precisely the same time led to considerable controversy as to whether the bike-wheel wagon was not a little drawback to a horse as the bike sulky.

With these facts before us does it not appear reasonable to assume that the trotter has made no progress since Maud S.? Otherwise would not some owner have discovered the superiority of his horse and have made it manifest to the world by beating 2:08 1/4 to high wheels, on a regulation track, tires of narrow steel and no ball-bearing axles?

Now we are without landmarks to measure our progress in breeding. Would not some enterprising track manager find fame and profit in offering a purse to any trotter beating 2:08 1/4 under the conditions suggested? Should no entry be made then it would indeed be time to formulate a new standard for improving the breed of owners rather than trotters?

I dislike to believe that owners have been cowed by the failure of one champion to prove her capacity and now consider discretion to be the better part of valor. Unless something is soon done, will it not be clear that the bike wheel is a delusion and a snare, and mainly useful in being the "skate's" best friend?

T. B. ARMITAGE.

President Harry K. Devereux of the League of Amateur Driving Clubs announces that this year's inter-city matinee will be held at the Glenville track, Tuesday and Wednesday, September 1st and 2d, unless these dates should not meet the approval of the league members, which condition is unlikely. Of course, the principal events of the two days' card will be the annual pacing cup race and the race for the Cleveland challenge cup for trotters. The Cleveland cup takes the place of the Boston cup, which was won three successive times in straight heats by Mr. Devereux's splendid stallion John A. McKerron 2:05 1/4. There is already much speculation as to the possible starters in the big race. McKerron is by no means a certain contestant. Mr. Devereux plans to have him start for the world's record, and being thus occupied McKerron may not be in position to fill the role of cup defender. But it is sure that Mr. Billings will start one of his horses, either Lou Dillon 2:03 1/4 (matinee) or The Monk 2:05 1/4, while it is reasonably certain that O. G. Kent will have Anzella 2:06 1/4 prepared to start. Whether or not Mr. Smathers' new-found passion for the runners will keep him out of the race is not known, but Lord Derby's recent accident may, although, of course, the former Village Farm gelding may be fit for the race of his life in a few weeks.

N. E. Olin, of Kent, O., was the owner of a valuable pair of horses which died a few days ago from eating the leaves of an oleander tree.

Notes and News.

The new sulky for Lou Dillon weighs twenty-six pounds.

State Fair program is out. Entries for it will close August 12.

The free for all classes are given \$1000 each by the State Fair.

A two-mile race for 2:27 class trotters is on the State Fair program.

This is the year to enter in California races. Most of the very fast horses will race outside the State.

Woodland has given up the idea of giving a fair and race meeting this year.

There will be meetings held at Hollister and Salinas this fall and good programs of harness racing will be given.

Horsemen predict that the two dash races at Memphis this fall will have more than their share of entries.

William Mac 2:05½ paced a mile in 2:07½ over the West Chicago Driving Club's half mile track last Saturday.

Anaconda 2:01½ has not only changed owners lately, but has also had his name changed. He is now called Knox Gelatine King.

Mr. O. G. Kent, of Cleveland, Ohio, believes his mare Anzella 2:06½ can trot as fast a mile as Lou Dillon has yet shown.

Earlma by Earl has joined the list of great broodmares and is the dam of two very good ones, Pan Michael 2:11½ and Boralma 2:07.

The quarters of Lou Dillon's mile last Saturday when she won the world's record for mares in 2:03½ were as follows: 31½, 30½, 30½, 31.

W. P. Hammer of Willows reached Vallejo last Saturday with his string of horses, which he will race on the California circuit this year.

The Monk lowered his wagon record to 2:05½ at Cleveland last Saturday, and Mr. Billings' new purchase, Greenline, paced a half in 0:59 3-5.

Confianza 2:21½, bay mare, (4), by James Madison, dam Ituna by Steinway, in J. H. Thayer's stable, trotted a mile in 2:21, the last half in 1:06½.

Rohin the sire of Rohizola 2:13½ the good mare that Millard Sanders is now campaigning in the east, is owned by Mr. Julius A. Trescoy of Salinas.

Trilhy Direct by Direct worked a mile on Saturday for Dan Malony in 2:09. She will probably be one of the contestants in the Chamber of Commerce stake.

Don't forget the Pierce sale at William G. Layng's Occidental Horse Exchange next Wednesday. This is the final dispersal of the horses owned by the late Henry Pierce.

Lottie Smart 2:07½ is a new arrival in California. She came in with Mr. J. W. Zihhle's string from Denver and is at the Vallejo track. She made her record last year at Baltimore.

Note the advertisement of the hay five year old trotter for sale by a Vallejo party. A picture of the horse appears on our title page to-day. He is called Roscoe and is by Rainbow.

Woodland will be missed from the circuit this year. The Yolo county district fair has always been one of the best held on the coast and it is unfortunate that it cannot be given this year.

Sidney Dillon has sired the fastest mare in the world. There are three fillies by Sidney Dillon and a full sister to him catalogued for the Pierce sale at the Occidental Horse Exchange next Wednesday.

A filly by Sidney Dillon out of a mare that has produced three in 2:18 or better should be worth money. There are two fillies bred like this to be sold next Wednesday at the Occidental Horse Exchange.

Walter Direct, son of the unbeaten Direct. Hal and Ella Brown 2:11½, is being trained by Geers just as he trained Direct Hal. It is said that he can step right at 2:10 now but will be saved for the 1905 races.

Alone 2:09½ by Nearest 2:22 (full brother to John A. McKerron 2:05½) is showing great speed at San Jose and looks to be capable of reducing her record this year. She has worked a mile in 2:10½ recently and a half in 1:02½.

In the parade held at Fresno on the Fourth of July there were many attractive turnouts, but none that made a prettier showing than the tandem driven by Dr. Stimpson the well known veterinary. He drove Kohlan King and his son Kohlan Prince. Both are blacks of beautiful conformation and great style and they were universally admired.

M. M. Donnelly of this city has sold his trotting stallion Young Sallshury 2:18½ by Judge Sallshury 3872, out of Nora Sprague by Gov. Sprague 444, to John Teddy, a New Zealand horseman, and the horse was shipped on the steamer Sonoma last Thursday.

Primrose 2:13 that was purchased in Los Angeles last year by Jos. Barnett of Albuquerque, New Mexico, was sold at Denver two weeks ago to J. Fred Roberts of that city for \$1900. She started in the 2:11 pace at the Denver meeting hut was outside the money.

Marengo King (3) 2:29½ by McKinney, that was bought by J. H. Brown, Detroit, at the last Fasig & Tipton, sale is now in Frank Colhy's training stable at Detroit. He made a short season in the stud and recently stepped a mile in 2:40, last quarter in 33 seconds.

Mr. Watson, one of the drivers fined at the 4th of July meeting at Tanforan Park, informs us that at a meeting of the Golden Gate Park Driving Club held this week the fines were remitted and both he and Mr. James O'Kane exonerated from any wrong doing in the race.

Directina, the black mare by Direct 2:05½ out of Stemminder, the dam of Directum 2:05½, that took a record of 2:16½ in 1897, when a three year old, started in the 2:17 class at Readville week before last and won the first heat in 2:14½. She was beaten the next heats, however, in 2:15 and 2:17½.

Lilly S., a five year old mare by Direct 2:05½, dam Lilly Stanley 2:17½, therefore a full sister to Rect 2:16½ and On Stanley 2:17½, is to be sold next Wednesday at the Pierce sale. She is stinted to Sidney Dillon, the sire of Dolly Dillon 2:07 and Lou Dillon 2:03½, and the produce should be worth a lot of money.

Emaline 2:27½ by Electioneer, foaled a fine colt by Zolock 2:10½ on July 8th. She is owned by Mr. F. A. Ramsey of Riverside. Mr. Ramsey also owns the yearling Hylock by Zolock out of Hytai by Happy Prince. This little colt is a natural trotter and trotted an eighth of a mile about two weeks ago in 30 seconds.

Horsemen will be sorry to know that Tim Murnem, so long with Cresceus 2:02½, was hadly injured at Denver while jogging one of the horses in his stable. The mare stumbled and fell, throwing Mr. Murnem on his head and face. His injuries, while not thought to be serious, will keep him out of the sulky for some time.

T. C. Butler of Salinas has purchased from Geo. A. Davis of Pleasanton the three year old trotting gelding X-Rey by Rey Direct 2:10, dam Midget, the dam of Too Soon 2:24½ by Inca. X-Rey is 15.3 and a handsome hay. He has already shown 2:40 speed and has the making of a fine roadster as he has a splendid disposition.

Kelly Briggs won the 2:11 pace at Cleveland on Saturday on July 4th. The program of the meeting was mostly made up of matinee races, but three purse events were put on and the race won by Kelly Briggs was one of them. He won in straight heats in 2:17½ and 2:14. The other horses in the race were Sadle Baron 2:18½ and Glih, a horse without a record.

El Moro 2:13½, the fast trotter by Longworth, owned by Mr. Graham E. Bahcock of Coronado, has been added to the string of Chas. E. Clark at Fresno, who will soon ship his horses East to race through the Mississippi valley this summer. El Moro has been out of training a couple of years owing to an ailing leg, but is said to be all right again and very fast.

It costs considerable to ship a horse east by express unless he is one of a carload. The rate to Chicago is over \$300 for one horse and something over \$700 for a carload of twelve. There are one or two parties who desire to ship horses east within the next two weeks who would like to hear from others who have the same desire that expenses may be lessened. Apply to this office.

Diodine 2:10½ and Tags 2:11½, both by Diahlo, started in the 2:10 pace at Minneapolis July 1st. The race went to the fast mare Nonamie 2:09½ in straight heats, Diodine taking second money and Tags third. There were five starters in the race and the track was very heavy from rain, while a strong wind blew. The time, 2:12½, 2:12½ and 2:14, was very creditable under the circumstances.

Nearly five hundred horses are in training at the Glenville track. "Doc" Tanner has the largest stable, forty in number. The next highest are Geers with 26, Fred Keyes with 20, Geo. Saunders and W. L. Snow with 18 each, Charlie De Ryder, John Splan, Ed Benyon, Tom Price and Charley Garfield with 17 each, Ben Kenney and Charley Lyons 16 each and Vance Nuckols with 15.

The Napa Stock Farm thoroughbred yearlings brought good prices in Chicago last week. There were twenty-five in the consignment sent over by Mr. A. B. Spreckels and they averaged over \$500 each. The night the colts reached Chicago a fire destroyed the building adjoining the stable where they were stalled, hut Superintendent Geo. Berry was able to get every colt to a place of safety.

O'Brien & Sons, corner of Golden Gate avenue and Polk street, have just received a nice stock of new model Toomey racing sulkies, also some new model jogging carts finished in racing colors, such as white, carmine, straw, green, etc. They have shipped several orders of both sulkies and carts during the past week to racing men in different parts of the State. The Toomey sulky is known wherever there are people who want the best.

Trilhy Direct will be the representative of the Sallshury stable in the Chamber of Commerce Stake at Detroit next Tuesday. She has worked a mile as fast or faster than any done by the big pacer Mush and is in better condition, so Mr. Sallshury will start her. Trilhy Direct is owned by Mr. Juan Galleagos of Mission San Jose and is by Direct 2:05½ out of Bessie Wilkes by Sahle Wilkes.

The Kenney Bicycle Company sold during the past week McMurray racing sulkies to James Pettie of Christchurch, New Zealand, and to Capt. Barneson of this city. They also sold to Mr. H. Schottler of this city, owner of King V., a McMurray cart. As Mr. Schottler weighs 370 pounds, and picked out this cart very carefully, the fact that he selected a McMurray should commend that vehicle to men of weight in the community.

Murray Howe, secretary of the Memphis track, says that the best race that he had on the program last fall was the half mile dash between Prince Alert 2:00½ and Sir Albert S. 2:03½. It was also a big betting race, and the fact that owing to one horse making a break the relative merits of the two horses were still in doubt when it was over, only helped to make the event a strong one for the association. "I could have had twice the crowd to see it the next day," says Secretary Howe. Under the 1812 system a repetition of any race would not draw a handful of people.

The State Agricultural Society has offered \$1000 for a free for all trot and the same amount for a free for all pace. It is to be hoped these races will both fill as they will be attractions worth going to see even though the fields are small. There are quite a number of fast pacers in this State that could enter in the free for all class. Clipper 2:06, Alone 2:09½, Zolock 2:10½, Eagletta 2:11½, Dictatress 2:09½, Harry J. 2:09½, Robert L. 2:10, Harry Logan 2:12½, Daedalion 2:11, El Diahlo 2:11, Topsy 2:10, and several others with records below 2:15 should be candidates for the free for all class this year in California where good purses are offered.

Lilly Stanley 2:17½ was a great mare in her day. When she was owned by Nathan and Frank Coombs of Napa, and was driven by Bill McGraw there was always a crowd present when she was to start in a race. Had she not been injured when taken from a car one day, she would have taken a record of 2:15 or better, as she had shown a mile that fast in her work. She trotted the middle half of a mile at Petaluma in a race in 1:05 and won races of five and six heats repeatedly. In the stud she has been a great success, having produced three with records better than 2:18, viz.: Rokeby 2:13½, Rect 2:16½ and On Stanley 2:17½. Lilly Stanley will go to the highest bidder at the dispersal, sale of the Santa Rosa Stock Farm horses at the Occidental Horse Exchange in this city next Wednesday.

At the Occidental Horse Exchange next Wednesday will be sold a beautiful young mare called Galetta that carries in her veins the blood of the Morse Horse (sire of the renowned Gen. Taylor, the 30 mile champion) from two different ancestors. Her sire is Gaviota Jr. and her dam Aletta by General Taylor, second dam Kate Parker by American Boy Jr., he by Williamson's Belmont. The sire of Gaviota Jr. was Gaviota, a son of Electioneer, and his dam Emma B. by Baywater. The dam of Gaviota was Lady Ellis by Mohawk Chief, second dam Lady Clay by Paymaster, third dam by Morse Horse 6. Few mares are as strongly bred as this one. Galetta is thoroughly broke, gentle and can be driven by a lady. She is 15½ hands high and a good, serviceable young animal.

It is said there is but one living thing that Rowellan 2:15½ likes, and that is a tiny maltese kitten. The horse and kitten occupy a stall in James Golden's stable at Mystic Park. When the horse lies down to rest up hops "Rowella" on his shoulders and begins her play. She capers over his back, rolls over and over, and occasionally scampers into his mane. All of her various caperings disturb not the fast Rowellan. Occasionally he raises his head from the straw pillow and gazes fondly at the kitten. If she is dangerously near the edge it is a good bet he will roll slightly, precipitating the unwary "Rowella" to the straw. Then up jumps the kitten to his back again and the play commences once more.

Messrs. Pettie & Price of Christchurch, New Zealand, who have been in California for the past few weeks, left for home on the steamer Sonoma last Thursday. Both gentlemen made many friends among the California horsemen they met while here and Mr. Price thinks very seriously of bringing his great little horse Ribbonwood 2:09, the champion Australasian harness horse, to America to race next year. Messrs. Price & Pettie purchased four pacers while here, which were shipped on the same steamer. They purchased from Mr. Russell of Stockton a bay gelding by Directum that has never raced and been trained but a few weeks. From Mills & Sanders of Pleasanton they bought Norice, a black mare by Chas. Derby 2:20 out of Naulahka by Balkan. This mare is entirely green, has never started, but has a nice way of going. They purchased from Mr. Albert Joseph of this city the mare by Dictator Wilkes out of a mare by Hawthorne that is known as the Hughes mare. She has never started in a race. From Mr. Lawlor of Petaluma they got the mare Lottie Derby by Chas. Derby. This mare started in her first race on July 4th at Petaluma and took a record of 2:29½. All these pacers are fair prospects but have shown nothing phenomenal and while the prices paid for them were not large the New Zealand gentlemen have used good judgment in making their selections as all are good useful horses.

State Fair Directors Meet.

[Sacramento Bee, July 11]

The Directors of the State Agricultural Society decided by a majority vote, at a meeting held Saturday afternoon, to deed all the property of the Society to the State at the request of Governor Pardee, for the sum of \$45,000. This decision came after a long debate over a resolution offered by Director Thomas Fox, which was finally adopted by a vote of 6 to 4. Those voting for the adoption of the resolution were Directors Thomas Fox, William Johnston, C. W. Paine, J. W. Wilson, James Whitaker and President Benjamin Rush. An amendment by Director Grove L. Johnson, to defer action for sixty days, was lost, after which the resolution was adopted, as stated.

The Directors also voted to do away with the Art Gallery at the approaching Fair, on motion of Director Grove L. Johnson, and the money which has heretofore been appropriated for this purpose will be given for a display to be made by the State Grange. The space in the Art Gallery will be occupied by the display referred to.

The Directors also declined to change the date of the opening of the State Fair, which was fixed at a previous meeting for Monday, August 31st.

The Directors voted to appropriate \$100 for a tennis tournament to be held during the Fair, and to offer several gold and silver medals to stimulate interest in bee culture.

On motion of Director Grove L. Johnson it was decided to allow the Knights of Pythias \$150 for a special day at the Fair.

The Board voted down a motion by Director Frank H. Burke to postpone the opening of the Fair one week.

Director Thomas Fox succeeded in having adopted the following resolution, after a long debate, in which Grove L. Johnson was the principal speaker:

"Whereas, The State of California annually appropriates the large sums of money for the support of the State Fair; and

"Whereas, There is now lying in the State Treasury the sum of \$45,000, appropriated by the State for the purpose of paying a portion of the debts of the State Fair, which appropriation is conditional upon the deeding to the State of the real property under the control of this Board; now therefore be it

"Resolved, By the Board of Directors of the State Agricultural Society that all the property, real, personal and mixed, under the control of this Board, ought to be the property of the State of California; be it further

"Resolved, That the Board holds itself in readiness at the request of the Governor to deed to the State of California all the property now under its control."

Johnson vigorously opposed the adoption of the resolution, and offered an amendment that action be deferred for sixty days. In asking for the delay, Johnson said he had been informed by telephone while at the meeting by P. C. Drescher that a proposition is on foot to give the Society \$40,000 in cash and a new site in exchange for Agricultural Park. Johnson said Fox's resolution was more sweeping than any proposition that had yet been made along these lines, as it contemplated the giving away of everything possessed by the Society. All former propositions have dealt with the transfer of Agricultural Park only.

Johnson pointed out that if the property were deeded to the State, under the Statute only \$27,000 of the indebtedness could be paid, the balance of the money remaining in the State Treasury until such time as it may be required for the purchase of a new site. After considerable discussion, in the course of which all the old straw was threshed out, Fox's resolution was adopted.

It does not follow that the transfer will be made at once, it being understood that Governor Pardee does not care to press the matter.

The Board by almost unanimous vote tabled a motion to reconsider the action whereby it was decided not to elect a secretary until after the coming fair.

W. L. Carlyle of Minnesota and E. W. Majors of Berkeley were appointed to judge the cattle exhibits. Director Grove L. Johnson, Superintendent of the Pavilion, announced the following appointments:

Assistant Superintendent of Pavilion, O. P. Dodge; Superintendent of Poultry Department, M. Coffey; Entry Clerks, Mrs. A. R. Fink, Mrs. Ella G. Clark, Mrs. Mary Ross; Ticket Clerks, P. F. Ruman, W. H. Sherburn, Harry Dodge; Ticket Distributor, Miss Sadie Paine; Captain of Watchmen and Night Superintendent, Timothy Lee; Messenger, Porter Anderson; Janitress ladies' room, Mrs. Lawlor; Janitress gallery exhibits, Mrs. Quigley.

The Board decided to engage the services of Talbot H. Wallis to solicit exhibits for the pavilion display.

The Board will meet again on Saturday, August 1st.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

News from the North.

[Portland Rural Spirit, July 10]

Albany had a horse show last week that drew out many very fine animals. It was gotten up in a hurry, but the boys all responded promptly and made a success of it. More than 100 head of finely bred animals were on exhibition, and after a parade through the principal streets, which was reviewed by many horse lovers, the premiums were awarded by Judge Barton, J. M. Ralston, both of Albany, and Dr. E. A. Pierce of Salem. The task was not an easy one, and some fine points were overcome very nicely. Possibly the longest judging occurred in the standard breeds for yearlings, when the judges scratched their heads many times before tying the ribbons. The blue ribbon was given to Zamona by Zombro.

Le Roi won the free-for-all pace at Grand Forks, B. C., defeating Sam Bowers and Starkey; best time 2:21. Sam Bowers reported lame in last heat.

Tecora by C. M. Clay Jr. is the dam of eight in the list—four pacers and four trotters whose average record is 2:17. The four pacers have an average record of 2:10.

John Green, who has charge of N. K. West's stable at La Grande, writes us that the horses are working very satisfactory. The Commonwealth has not been asked to go faster miles than 2:30, but is working like clock work. Taffeta Silk is stepping easy miles in 2:25, while Satir Royal, a two-year old trotter, is working miles in 2:50, quarters in 40 seconds. Satir Royal is by Bonner N. B. 2:17 and out of Minnie M. (dam of Trumont 2:21) by Rockwood.

J. A. Jones of Springfield has bought the promising three year old trotter Bessie Jones from John Pender. Bessie Jones is by Capt. Jones, out of Ada Rock (dam of Atlas 2:15) by Adirondack; second dam Minnie M. (dam of Trumont 2:21) by Rockwood; third, Sallie M. (dam of Pathmont 2:09, Altao 2:09) by Pathfinder. Bessie Jones is one of the largest and handsomest mares in the State and can trot full miles better than 2:40 with but little track work.

A. T. Van De Vanter, secretary of the King County Fair Association, who is managing the running meeting at Seattle, has not lost his love and admiration for the harness horse. Van has built himself a fine and comfortable home near the fair grounds on the banks of the Duwamish river. Here he has also built a fine training barn where is located his stable and private driving horses. Van is training Harry Hurst 2:23, and intends to race him throughout the circuit; he has a very promising two year old pacer that will be started in the juvenile stakes. For a driving team he has Tickets 2:20, and the good green trotter Kinmont, which he challenges the Northwest to race with amateur drivers. Van will start this team in the matinee races at Seattle and expects to lower the water in the Duwamish river, where he intends soon to be sailing in a fine yacht.

The horses at the State Fair grounds are "hiking" along some. Sam Casto set the speed ball rolling when he drove his two year old trotter Judge Nation a mile in 2:59. Fred Stoppelfeld brought out his two year old pacer Alto Lace by Lovelace, and turned the track in 2:42. Ezra Tilden took a whirl around the ring with his three year old trotter Zipsey by McKinney in 2:40, the last quarter in 36 seconds. W. O. Trine was next seen behind the big three year old trotter Maud Salisbury, owned by an agriculturist up in Linn county. She stepped the full mile in 2:39.

George Beckers, recently from the orange groves of Southern California, brought out his three year old trotter The Jester by Stam B., to see if he could beat the mile made by his half-brother out in Denver recently, and he went the mile by the overland route in 2:23, half in 1:09, last quarter in 33 1/2 seconds. This mile not only beat the Denver mile, but it was the track record for the year. Lord Stoppelfeld not wishing this honor to be held by a California three year old, brought out his green pacer by Lovelace, and stepped a mile in 2:23 flat, last quarter in 32 1/2 seconds, and came in with a smile on his face as long as his arm. Beckers said no Irishman could hold the track record if he had to hitch Zombro to beat him, so he brought out Zombowette, a daughter of his stallion, and turned the track in 2:22 flat, which will likely stand as the track record until Captain Smith takes a whack at it with his whole stable. Ezra Tilden said he didn't have any long distance horses this season of the year, but would show the boys a little speed with a green pacer by Del Norte, which stepped a half in 1:06, last quarter in 32. W. O. Trine then brought out Belle Air and let her step through the stretch in 31 1/2; then the boys all went to dinner.

Report has it that George Garth turned down an offer of \$10,000 for Winnie King, the chestnut daughter of Brandon 2:12, that worked a mile in 2:08 1/2 at Memphis this spring. She is well entered down the line, and her first big engagement is the Chamber of Commerce stake.

Cleveland Track Notes.

[American Sportsman.]

S. E. Kent will start the stallion Bonnie Russell by Conifer at Windsor. He is also entered in the M. & M. and will probably start.

M. E. McHenry will ship his horses to Columbus for their first start. Dan Patch has been a mile in 2:12, Baron de Shay in 2:10 1/2, Prince Direct in 2:10 1/2, and the green pacer Joe Grattan a mile in 2:10 1/2.

Millard Sanders' great trotting mare Robizola is one of the fastest green trotters at the track, and it would surprise us if she did not start in the M. & M. She certainly has speed enough to win at least a part of the purse.

Ed Geers will ship fifteen head of horses to Windsor, where he will make his first start. He will have an entry in nearly all of the classes. Mr. J. E. Butler of New York was here last week to see Cole Direct and King Direct take their work. Mr. Geers gave them good, strong work, and Mr. Butler was pleased with the way they stepped.

Budd Doble has commenced a little strenuous work with Kinney Lou. On Tuesday he scored him with a runner, and let him step a mile in 2:16 accompanied by the runner. He looks fit for a race now. Doble has decided to make his first start at the Cleveland meeting with both Kinney Lou and The Roman 2:09. He says that he expects to drive them in their races, at least that is the way he feels about it now.

Mary Gage, a three year old by Oro Wilkes, trotted a mile accompanied by a runner in 2:17 1/2, last half in 1:05, last quarter in 31 seconds. This filly is owned by W. B. Chisholm, and is in Ben Kenney's stable. Bernardo 2:17 1/2 by Patron, in the same stable, and owned by Mr. Chisholm, trotted a mile in 2:12 1/2. These are two very promising trotters. Mary Gage has some important stake engagements and it looks like she will be able to deliver the goods.

C. K. G. Billings, the noted amateur horseman, has the following to say about the automobile: "The horse and automobile are not rivals. Neither can be used as a substitute for the other. A great deal of pleasure can be derived from both. In these days, when every moment of a busy man's time is valuable, it is impossible to get along without an automobile if you have to do much traveling around New York. It may be years before our rapid transit facilities are developed to anything like a state of perfection. Meantime, the best substitute is found in the automobile properly managed. I would lay stress on the last phrase, because it seems to me that the average man who uses the automobile has to suffer a great deal of annoyance, because of the foolish things done by men who think it is smart to go flying along the public highways at a rate of speed that is unsafe to the automobilist and dangerous to the lives of pedestrians."

Those who are arguing pro and con over Casper Redfield's theory of speed transmittance have two recent examples in The Picket, winner of the American Derby this year, and the new champion trotting mare Lou Dillon. Those who believe with Mr. Redfield that an old stallion will sire the fastest horses can instance The Picket, who was got when his sire Falsetto was 24 years old, while those on the other side of the controversy can refer to Sidney Dillon who sired Lou Dillon when he was a five year old. "You pays your money and you takes your choice."

Jackson's Napa Soda untangles the feet.

**Combault's
Caustic
Balsam**

The Great French
Veterinary Remedy.

A Safe, Speedy and Positive cure
for ailments of
HORSES and CATTLE.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circular, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Save the Song-Birds:

BY JOSEPHINE (CLIFFORD) MCGRACKIN.

President Ladies' Forest and Song-Bird Protective Association of Santa Cruz County.

"Save the Redwoods!" was our watchword and our battle-cry, the grand aim of our aspiration and the object of which we dreamed at night and for which we worked all the day. Not we of the Sempervivens Club alone, but each son and daughter of our Golden State, every loyal citizen of these United States, for when the Big Basin was saved from destruction it was not for California alone, since every State in the Union is benefited by the acquisition of our State Redwood Park.

"Save the song-birds!" is our battle-cry and watchword now, and we of the Ladies' Forest and Song-Bird Protective Association ask through these columns the help not only of the legislative body of the State, but of every inhabitant, man, woman and child, for they all can aid us in our work—a labor of love—but which seems harder to carry on than the work of saving the Redwoods. Men who could grasp the utilitarian idea of redeeming the forest grants from impending doom listen with an indulgent smile to our pleading for the life of our little feathered songsters, convinced in their masculine heart that women are sentimental always, and sometimes worry themselves and others over the most nonsensical things.

Nevertheless, the protection of song and plumage birds—insect-eating birds—has become an object of vital importance, not alone to us farmers and fruit-growers of California. The destruction of our orchards and grain fields by insects, worms and caterpillars, which the birds that are dead can no longer eat, is but a part of the loss accruing from the wanton killing off of song-birds and the still more heartless slaughter of the plumage bird, as carried on at present.

Though no foolish sentimentalism can be charged against us women in our work, I admit that there is a sentimental as well as an economic side to bird protection; and I have pointed out, elsewhere, that to the man who comes here from the Eastern States or foreign countries, the absence of song-birds, the utter lack of bird-life and bird-song in the country, is so serious a drawback that I have known people to change their intention of building up a home in a place where the song-bird had been exterminated. It positively does not pay to kill every bird that dares to take a cherry from a heavy-loaded tree, or is thoughtless enough to spread its bright wings where the net and the snare of the detestable, contemptible milliner-hunter can capture it.

What an impression is made on people fresh from the older states by the wholesale murder of song-birds I can testify to from my own experience. Over thirty years ago, when I first came to California to make my home, I was visiting in the Santa Clara Valley, near San Jose, in June. Mr. D. T. Adams had one of the earliest and finest orchards there, and his cherry trees were especially prolific bearers. The charm of the country was something wonderful to me; the beautiful gardens, the song of the birds in full chorus in the early morning hours, and the orchard with its long rows of thrifty trees. These were naturally the theme of conversation among the guests at the house, new arrivals in California like myself. Mr. Adams was a Yankee from Maine, his wife a Missouri woman; one visitor had been a resident of Illinois, the other was from Wisconsin, and among them there came to be but one opinion—that California with its favorable climate was the only place in which fruit could be grown to perfection, on account of the entire absence of insect pests. Never was there an apple here with a worm in it; never a plum, a prune or a peach troubled with borer, by caterpillar or curculio, such as were found in the older States, and from which the plantations of these men had suffered. It was the climate here, they said, that kept this blessed land clear of all such plagues. What glowing accounts I wrote back to my Missouri friends, and my friends in Iowa and Alabama! I was flourishing and waxing fat on the song of a thousand bird throats in the morning, and the absorption of delicious California cherries all day long. But my enthusiasm came to a sudden end one morning, as I strayed round the orchard and visited the cherry trees. I saw Mr. Adams take up a shotgun that stood against the fruit-house, and thinking he meant to shoot a chicken-hawk, I switched to see it drop. Instead there fell, almost at my feet, a bird, no doubt an oriole, with feathers purple black and orange, and I looked up in alarm, for my host uttered an expression of satisfaction.

I picked up the poor thing in its death struggle, and as it lay on my hand it opened wide its frightened eyes, pleading mutely, "Oh, please don't hurt me any more, I am hurt to death already." I held out my hand and asked, "Did you mean to shoot it?" "Why yes," he replied in the most matter-of-fact manner, "that's what the gun is there for."

I marched straight into the house, and forgetting policy and politeness, I asked his wife, "Do you mean to say that this is what they shoot in the orchard?" "Certainly," was the unhesitating answer, "there's no use being foolish about such things; these birds that sing so beautifully eat the cherries, and the men on the place have orders to shoot them where they see them."

How changed the country all at once looked to me!

I observed the birds more closely after that, and found so many different kinds beside the bluejay, which I hated for his thievish ways and his harsh screeching. I knew he needed killing. But the song-birds, the bright, beneficent creatures that made the morning glorious with their music and lay dead at night, their little bodies tossed to one side by the hood that had murdered them, when there were too many dead to be left under the tree—how could men find it in their heart to kill them?

That was the beginning of the destruction, not of the song-bird alone, but of our orchards and grain fields too; for our climatic conditions have not changed, they still are more favorable for the growing of fruit and grain than those of any other country, but our little efficient aids, the song-birds, from the oriole, the yellow-hammer, the titmouse and the blue hunting, to the robin and the meadowlark—are no longer with us; the Agricultural Department of the United States has had to be appealed to, to become our aid; but all the noxious sprays, all the artifices used in applying fertilizers and manures, will not do the work that our feathered friends did for us.

I am not preaching what I do not practice. A rancher's wife, I have lived for over twenty years on this place which we built up, and I have an eye myself to the gutter on my bread, for we must live on the proceeds of our vineyards and orchards—cherry orchard included. Sometimes I wish that cherry orchards might be abolished, or given into the keeping of only those who can control the greed and the fury that seem to take possession of most men when cherries begin to ripen, and the birds, who have been with us, one kind and another, all through the winter, really do take a few of the earliest kinds. Again I speak from experience and personal observation when I say that the bluejay is the culprit for whom the smaller birds suffer punishment. This blue-coated rascal will pull off the whole cluster of cherries, if only one of them happens to have a red cheek. The mocking-bird alone, outside of the bluejay, would be powerful enough to pull off these clusters, and mocking-birds are not plentiful, and have never been accused seriously of taking fruit of any kind. The smaller song-birds, after getting a bite of the earliest fruit or berries, do very little, if any, injury; certainly not one-thousandth part of what is done by codling-moth, red spider, caterpillar, scale, bark-lice, canker-worm, and not to cherry trees alone, when the birds have been killed and the insect pest takes possession of the field.

The troubles that many orchards are rented out by their owners, and those who have rented them—often foreigners who will never make this country their home—are intent only on getting out of them what they possibly can; they care nothing for the waste and destruction they leave behind them. To be sure, in some cases even the owner of the orchard is short-sighted enough and cruel enough to want every bird killed, even though every bird had eaten three times its weight of harmful insects, to where it had eaten one cherry. But the instinct to kill something lies dormant in every boy's breast and is too often fostered by the foolish parents, who will buy Johnny a pop-gun and boast of his prowess in bird-murder, not considering that when Johnny grows up this murderous instinct will grow up with him, if not checked, and may lead to the killing of some larger game before his life is closed.

A London tackle dealer makes a specialty of large salmon reels made of alloyed aluminum, which, it is claimed, hardens the aluminum so much that reels made of this alloy will wear quite as well as brass, while the weight, as compared with brass, is reduced materially. The weights are given as follows: For a 3½ inch reel, 9 ounces; 4 inch, 12 ounces; and for one of 4½ inches, 14½ ounces. It would be interesting to know how this alloyed aluminum will wear under the action of salt air and salt water. Generally such reels, in this country at least, corrode badly if used for salt water fishing, hence, as a rule, rubber reels reinforced with brass are employed. Any consistent reduction in the weight of a reel of large size is an advantage, especially when used on a heavy rod, and it would seem that aluminum, if so alloyed as to be strong, yet at the same time withstand the destroying effects of salt water and air, has advantages which our manufacturers should not lose sight of. So many improvements have been made in aluminum alloys, and in the processes of manufacture within recent years, however, that better grades of this useful material are constantly being used in manufactured articles, while the prices are gradually but surely being reduced, as the cost of manufacture is lowered. This is especially true respecting articles for sportsmen's uses, such as cooking utensils and the like. They are generally well received because of their cleanliness and light weight. But even these articles have their faults, soap and salt water being their worst enemies, so far as corrosion is concerned.

Outings Made Enjoyable.

When you go to the country or the mountains, dress your feet properly. Ill fitting and improper dress will spoil your pleasure. The Skinner Co., 801 Market St., have made to special patterns, footwear for men and women that is right for all kinds of outdoor work. The prices will suit your purse as well as the shoes fit your feet. Call and see them.

The Self Basting Boiler is one of the New Camp Comforts. It sells for 50 cents, and Skinner has it—Don't fail to see it, if you are going camping or hunting during vacation.

Sober up on Jackson's Napa Soda.

Annual Camp Stew of the Grass Valley Sportsmen's Club.

A TOAST TO OUR GUESTS.

We greet you, brave sportsmen, we greet you to-day,
And wish you a glorious time;
May your hearts be jovial, cheerful and gay,
And your appetites simply sublime.

A motley crowd sure to meet in this place,
Sherwood, Mainhart and others galore;
But alas! I note many a missing face,
Of good fellows whom we'll see no more.

But the Grass Valley sportsmen invite to this board
The brave men of rod and of gun,
And ask you within your proud stomachs to board
Several plates of this stew with the fun.

And now glasses clink, let's drive dull care away,
Let smiles chase away every tear,
For this is the Grass Valley Sportsmen's Club's day,
And we wish nothing here but good cheer.

—Frank DuMaine.

Another camp-stew has been recorded on the pleasant pages of California sportsmen's history with memories of a splendid time and lots of good fellowship. On the 9th inst. the Grass Valley Sportsmen's Club entertained its guests at this famous feast, and the affair outshone any in recent years. The day passed without accident or unpleasantness of any kind to mar the festivities of the occasion, and will certainly never be forgotten by the 300 sportsmen who assembled in the shady grove near Indian Springs.

The day before a party of seven from Grass Valley, consisting of Ed Morgan, Adolph and Frank DuMaine, Henry Williams, Dan Deeble, James Phillips and T. W. Neell, went down to the grounds and prepared for the coming of the jovial multitude. There was fuel to gather, water to carry and kettles and other things to be placed in position. The party camped on the grass all night, and when morning broke was up bright and early. Soon the fires were burning merrily, steaks were sizzling, mingling their odor with the savory smell of big trout, sliced hacon and other meats.

Shortly after 6 o'clock the first batch of arrivals drove up and were regaled with hot coffee and their choice of all the good things on the place. Not the least appreciable were 500 pounds of fine trout contributed by Robert Linder, Robert Richardson, Jerry Goodwin and William Breuning of You Bet, the catch being the result of several days' fishing. The cooks struggled valiantly, serving breakfast up to the noon hour, and a more appetizing meal could not have been prepared in the most favored haunts of the epicure in any quarter of the globe. The cool morning air, heavy with the odor of halmy pines and the smell of the great outdoors whose pure, sweet breath came over the wooded hills, whetted the appetite and made even the most chronic dyspeptic forget his ills and be glad for the pure joyousness of living. And eat—how they did eat! It was a pleasure to watch them. Delicious trout, fried to order, together with so many other tempting viands, disappeared with remarkable speed. It was a happiness to the cooks to prepare food for such appreciative men.

During the afternoon the time was given over to sports for all who felt so inclined. Some raced and others put in the time down in the ravine; others blazed away at bluerocks. The musically inclined were the center of a large throng for hours, singing all the songs they knew and some they didn't know. For the weary mortals who had left home at an early hour, the shading oaks in the background offered a comfortable resting place.

At 3 o'clock Hon. Franklin K. Lane arrived in a four-in-hand, having driven over from Dutch Flat in company with Professor Sullivan of the State University and J. C. Kilgariff and Dr. Sawyer of San Francisco. Their arrival was the signal for deafening cheers.

The social gathering was something new to these gentlemen, but the informality of the greeting and the sincerity of it all at once made them feel as though they were among old friends. Indeed Mr. Lane was. After introductions, Mr. Lane was called upon for a speech. He complied laughingly, and for several minutes addressed the gathering in a happy vein, cheers concluding his words. Professor Sullivan, Dr. Crawford and Dr. Sawyer followed, each being enthusiastically received. Dr. Crawford was present last year and is a prime favorite with all who met him at that time.

The camp stew was ready to serve at 4 o'clock, and it is not a stretch of thought or word to say that at no time or place in California has there been its equal in point of *al fresco* dining, or of notable men from as many places. President Frank DuMaine introduced Mr. T. J. Sherwood as the toastmaster, which enviable position he filled with his usual suavity and to the pleasure of all assembled. At his right was seated Hon. F. K. Lane and at his left B. A. Penhall of South Africa. Among those who spoke were the two gentlemen last mentioned and Dr. Hays of Grass Valley, J. K. Orr of Berkeley, H. T. Payne of San Francisco, Ed Lynn of Sacramento, Col. Forbes of Marysville, Dr. Crawford of Oakland, Hon. J. R. Tyrrell, Major McBride, Hon. J. V. Snyder, John Rector, M. J. Brock, Robert Robinson, and others.

Probably one of the most interesting addresses delivered during the day was that of Dr. I. W. Hays, who was elected president of the club when it was first organized in 1880. E. A. Roberts, now deceased, was the secretary. The club had a short duration, existing only about a year. Dr. Hays moved to San Francisco about that time. In October, 1882, a few of the members of the defunct club were called together and a new organization was affected which consists of the present Grass Valley Sportsmen's Club. The membership of the club was limited to twenty-five. E. A. Roberts, the former secretary, was elected president, George Fletcher secretary. Since that time the club

has been laboring earnestly and energetically to advance the fish and game interests of the state. Probably there is no other similar organization that has accomplished so much in the same time. The present game laws are due in a great measure to the influence and activity of the organization. The senator and assemblyman from that district felt greatly encouraged by the support which the club gave them, and attribute much of their success to this source.

With the aid of the fish commission the club has succeeded in planting in the streams adjacent to Grass Valley 140,000 fish. These fish have multiplied to such an extent that they have furnished good sport for anglers for a number of years.

The club has also succeeded in obtaining some fine Mongolian pheasants which they distributed throughout the lower part of the county. Those who were instrumental in getting them are sorry that they have not propagated faster, though there are still a few of the broods in the county.

There are but two of the charter members of the club now alive, F. G. Beatty and Dr. I. W. Hays. The doctor concluded by saying that the club is full of good sportsmen and that they get all there is worth having out of life. The club is the second oldest in the state but it is second to none in its loyalty to the game interests and its hospitality to its guests.

The following were the charter members of the club: E. A. Roberts, M. Byrne Jr., Charles Barker, Robert Curnow, H. S. Jordan, M. P. Stone, L. V. Dorsey, J. P. Pollard, George Fletcher, Sam C. Hare, I. W. Hays, Samuel Fisher, H. Scadden, Jr., W. R. Bird.

These camp gatherings have been a feature that annually bring sportsmen together, where the spirit of protection to game prevails and it is made to do good work. It is due to the club members to say in their behalf that their annual meetings have been of great benefit to the cause of protection. Men meet and talk of game and fish and the importance of propagation and protection. They return home friends of protection, and their influence is brought to bear on their fellow man. The thirty members are of the best citizens of the county, and it is not the recreation and good time alone that actuates them in an expenditure of \$500 to entertain, as was done last week. They make new friends each year, their members attend the conventions called to revise the laws of protection, and when the Legislature meets their influence is felt among the lawmakers. In fact, from intimate association with and knowledge of their work from the first, writes Hon. T. J. Sherwood in the Marysville Democrat, places the Grass Valley club second only to the State Game and Fish Protective Association in effective results in game protection. As sportsmen they are at the head of the class, and as caterers they have no equal, while as good fellows, like their neighbors and associates, they have made their mark on many hearts.

Of the stew itself nothing need be said. It spoke for itself. It appealed to the hungry gathering of happy spirits more than anything else could have done. Many old timers declared it to be the best they had ever tasted. Into the savory mess 800 doves went, to say nothing of the other ingredients. This part of the day was under the direct supervision of Ed Morgan, whose fame as a camp-stew chef is well known throughout the county. He was ably assisted by Frank Dulmaine and others.

To keep the meal company there were plenty of wet goods, from spring water to long, thin, foamy ones.

The day was a revelation to the guests, a source of happiness to the club members, and when it was concluded with three rousing cheers, the hope was expressed on all sides that next year might find the same jolly, whole-souled lot again in the grove on the Driesbach ranch.

The Hopi Indians and Their Snake Dance.

No more interesting people for the student and traveler than the Hopi Indians of Northern Arizona can be found upon this continent. Civilization has been passing by the Hopi, and their customs, ceremonial life, habits and social relations are the same as they were four centuries ago. Their homes are high on the mesas, and their manner of living, their picturesque manufactures—baskets, mats and blankets—are novel, curious and interesting. A noted Indian authority has designated the Hopis as the "Quaker Indians." This designation tells of their simplicity, honesty and freedom from the objectionable traits and the vices of modern civilization. The snake dance, a mystic ceremonial, wonderful and fascinating, is chief among the Hopi ceremonies, and it is worth going a long way to witness. The sacred ceremonies attending this dance are conducted for nine days in underground chambers and then an open-air dance closes the event. Professor George Wharton James has witnessed the features of this dance many times, and four times he has been privileged to take part. His photographs and his descriptions combine to picture with remarkable vividness this peculiar ceremonial.

For over twenty years Professor James has been making a study of California, the Southwestern United States, and the Indians that inhabit that region. He has become thoroughly familiar with his subjects and is to-day an acknowledged authority on all matters relating to this section of country. Professor James is an Englishman and, like most of his countrymen, is devoted to the "land of out-of-doors." His travels and researches have brought him membership in the Royal Historical Society, the Royal Astronomical Society, Southern California Academy of Sciences, and many other organizations devoted to the encouragement of travel and scientific research. He is a clear and vigorous speaker, carrying by his hearers by the force of his word pictures as well as by his detailed reproduced photographs, to the scenes which he describes. The Professor will deliver an illustrated lecture on this subject Thursday evening, July 23, 1903, at Y. M. C. A. Hall, Ellis and Mason streets, San Francisco, under the auspices of Westminster Presbyterian Society.

Trade Notes.

Fred Coleman, of Hegins, Pa., made some great records for himself and "New Schultze" at the Pennsylvania State Shoot at Wissinoming, Pa., May 19th to 23d last inclusive. On the first day he won high-amateur average with 97 per cent, and on the second day he carried off chief honors by winning the Individual State Championship at targets. At pigeons on the last two days he won about everything, taking the Williamsport trophy emblematic of the individual championship of the State at pigeons, and the Denny-Wilson trophy. He was also a member of the three-men team which won the L. C. Smith trophy emblematic of the State team championship at live birds. Mr. Coleman always uses "New Schultze" in all his shooting. R. E. "Parker" of Carlisle, Pa., won high amateur average at targets on the third day with 96 per cent. He used 3 drams of "New E. C."

W. R. Crosby has recorded an unparalleled achievement, smashing all previous records in the way of target shooting. At Paducah, Ky., on April 25th and 29th last, in the two days' program he shot at 350 targets, breaking 342. The following week at Union City, Ind., May 6th and 7th, he broke 387 out of 400, while on May 11th and 12th, at Crawfordsville, Ind., he eclipsed everything previously recorded by breaking 398 out of 400, losing but one target each day in the program that called for 400 shots. Thus in three consecutive tournaments he broke 1127 out of 1150 shot at, making an average of six days' shooting of 98 per cent. Mr. Crosby's load was his usual one of 44 grs. "E. C." No. 1.

At the Santa Rosa Gun Club shoot on the 12th inst. the popularity of U. M. C. shells was shown in their use by every shooter participating with the exception of one.

Mr. R. Slusser who won the club medal used U. M. C. "Monarch" shells loaded with Ballistite.

T. L. Lewis representing the U. M. C. Co. was a guest of the club. He won first money in the pool shoot, which he donated to be shot for at the next club shoot. Tom shoots a Remington and "Magic" shells.

Mr. C. Slusser who won the principal prize in the merchandise race shot with Ballistite loaded in "Monarch" shells.

For some time past Parker Bros. of Meriden, Conn., have been working upon an automatic ejector which they believe worthy to be attached to the "Old Reliable" Parker gun, thereby adding to its efficiency. They have been slow in adopting this feature, for it was not advisable to offer their patrons anything in the nature of an experiment, and the fact that they believe that their ejector has sufficient merit to justify its introduction is good evidence that its reliability is unquestionable. Experts who have tested this ejector say that it works easily and perfectly. It is as yet applied only to the higher grade Parker guns—\$150 to \$400 list—the cost being \$25 additional to the catalogue price of gun. On account of the demand for Parker guns without ejectors, lower grades can not be furnished with ejectors at present.

The Remington Arms Co., Ilion, N. Y., state that the demand for the new No. 7 rifle has been and continues to be far in excess of the output capacity. The arm was bound to be a good seller, as any experienced rifleman could foresee, for its trim, sensibly designed stock was a strong point in its favor, and hark of this was the sterling reputation of Remington arms in general. The makers claim there is but small profit for them in the No. 7, owing to the great care used in testing and turning out each rifle. But quick sales and small profits form a pretty substantial foundation for business success.

The E. I. Du Pont de Nemours Powder Co., Wilmington, Del., is the name of a new organization incorporated May 19, 1903, to take over under one head the business of the parent company, E. I. Du Pont de Nemours & Co., established about 150 years ago, and several subsidiary companies of like character in which they had a controlling interest, so as to consolidate into one compact organization the various elements, thus economizing in management, distribution of material and other essential details in the conduct of a great enterprise. It is said by those in authority not to be a new combination, as nearly all of the authorized capital of \$50,000,000 will be needed to take in the interests they already control. The capital will be divided into \$25,000,000 cumulative preferred and \$25,000,000 common stock. There will be no bonds and no stock issued to provide working capital; likewise no stock issued to the public. Although the organization is still incomplete, the president is T. Coleman Du Pont and Pierre S. Du Pont, treasurer.

Ballistite is a powder that is used to quite an extent by our trap and field shooters. J. B. McCutchan of Santa Rosa has done some clever trap shooting this season with Ballistite.

Kennel Registry.

VISITS.

Dr. O. P. Roller's Lady Lucille II (Duke D—Princess Louise) to Nalrod Kennels' R. C. St. Bernard Ch. Grand Master II (Ch. Grand Master—Bonnie Doone) July 14, 1903.

WHELPS.

Nalrod Kennels' black Cocker Spaniel bitch Nalrod Beauty (Black Silk II—Plumeria Mignone) whelped six puppies (4 dogs) to Plumeria Tweediepanch (Ch. Hampton Goldie—Omo Girl) July 12, 1903.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

The Outside Dog.

You may sling of your dog, your bottom dog.
Or of any dog that you please;
I go for the dog—the nice old dog—
That knowingly takes his ease.
And, wagging his tail outside the ring
Keeping always his head in sight,
Cares not a pin in his sound old head
For either dog in the fight.

Not his is the house they are fighting for,
And why should my dog sail in
With nothing to gain but a certain chance
To lose his own precious skin?
There may be a few, perhaps, who fail
To see it quite in this light:
But when the fur flies I had rather be
The outside dog in the fight.

I know there are dogs—injudicious dogs—
That think it is quite the thing
To take the part of one of the dogs
And go peeping into the ring
But I care not a pin what all may say
In regard to the wrong or the right—
My money goes, as well as my song,
For the dog that keeps out of the fight.

DOINGS IN DOGDOM.

Mr. N. Ballantyne of Central City announces a bargain or two in Irish Terriers. See classified kennel advertisements on page 15.

Ch. True arrived at Wandee Kennels last week none the worse for his long journey from Gomersal, England.

John Bradshaw has assumed the management of the Pacific Dog Hospital in conjunction with Dr. F. A. Nief, the well known vet. Bradshaw is a practical man and thoroughly understands kennel management. Dr. Nief is a veterinarian of skill and reputation. The hospital is fitted up commodiously and on up-to-date lines. Under the dual management this journal has no hesitation in recommending the Pacific Dog Hospital to its readers for we feel assured that their dogs will receive skilled treatment and proper care and attention.

Mrs. Bradley-Dyne has a full brother of the Irish Terrier Puget Prude, a bitch Mr. Oillard had the bad luck to lose recently. Prude came from Mrs. Bradley-Dyne's kennels and was the first "Mick" bred in her kennels. She thought so much of the bitch that she endeavored to buy her back again, but unsuccessfully. She thinks a deal of the dog she has now and will bring him out next year. So, while expressing her regret for the loss of a good bitch she takes consolation in stating "she has the material in the piece and will have to chop off a few more hits to those two. It's a profoundly successful mating."

Mr. Thos S. Griffiths the most prominent Collie fancier in the Northwest writes from Spokane, Wash. as follows:

"I am pleased to state that through my 'ad' in your paper I sold a fine Collie bitch puppy to Mr. A. M. Day of Anaconda and I have also sold a pair of nice sahle puppies to Mrs. Vessey of North Yakima, Wash. A six-months old dog puppy by imp. Lenzie Prince was sold to J. L. Dorsen of Moscow, Idaho."

"Mr. M. M. Palmer, the Collie judge, has purchased for me and will ship to me in the next few days the imp. Collie Craigmore Conrad No. 14173, whelped Nov. 28, 1901."

He is by Hempleton Bubs (Ch. Balgreggie Hope—Old Hall Ella) out of Hempleton Dolly (Ellwyn Astrologer—Burkeland Kitty). He won second novice and limit and first open and was reserve winner at the late Wissahicon show, he was beaten by Ellwyn Straightaway.

Mr. Palmer wrote that he "knew the dog to be a good one. As he came into the ring before me (Wissahicon outdoor show) he was a much better dog than I ever had anticipated and he would have gone right through, first, in all the classes if it had not been that he was a hit groggy, and did not seem to have his lan' legs. In fact I was so much impressed with the dog that I have practically taken him, even if you do not want him. He is a good one all over, carrying a tremendous coat, which I understand is not at its best and he is teeming with quality from head to stern. His head is of very great length, narrow in skull. Yet there is not a bit of snippiness or bitch-like expression about him. A No. 1 ears, decidedly well carried and put on his head in the right place. A good depth of chest and stands on excellent legs and feet. Good in eye. He is sahle and white and well marked.

This dog has only been shown twice in Scotland and was first at Dalhatis and Kirkcubright. For a dog that has been here for a few days and rather stale from two weeks' travel to accomplish what he did, against a dog of great merit and who had been conditioned since last January—is I think more than a creditable showing. I honestly believe that this dog can come pretty close to stopping the best, and especially within a great many hundred miles of your location he will be the dog."

This Collie is only two years old and has already sired some good puppies.

The ninth annual meeting of the Continental Field Trial Club will be held this season at Thomasville, N. C., commencing with the Members' Stake on Saturday, December 5th, the Derby commencing on Monday, December 7th, and followed by the All-Age Stake. The purses in both of the open stakes will be \$500, divided \$250 to first, \$150 to second, and \$100 to

third. The judges in all of the stakes will be Messrs. N. Wallace, R. P. Huntington and A. D. Lewis.

In the Derby, the entries will close on August 15th, and in the All-Age stake, the entries will close on October 15th.

This will be the second year that this club will have used these grounds at Thomasville, N. C., and persons attending the trials either as spectators or as handlers of dogs will, without doubt, find a most decided improvement over the running of last year. At that time the grounds were very new to all of the officers of the club, but now that they are much better known, the running can be conducted much more advantageously and pleasantly as well. Birds are reported to be very abundant, and with the improved knowledge of the grounds, the popular and efficient judges selected, and also the liberal purses offered, this should be one of the most successful of all of the field trials of the coming season. Persons intending to enter dogs in these trials will do well to remember the dates for closing the entries as mentioned above. Further information, entry blanks, etc., can be obtained by addressing John White, secretary-treasurer, Box 61, Hempstead, L. I., N. Y.

There will be a bench show in Spokane during October, and it is possible it will be under P. K. L. auspices.

On Wednesday the A. K. C. held a meeting in New York in response to the written request of 26 members.

The question considered was "the value of the winners' classes" at shows and the rating of champions. The rule adopted recently in regard to the rating of shows seems to have been of a nature to kick up a general row all along the Eastern canine route. Under the present rule the rating of our local show—should the cash prizes amount to \$1000, which is extremely doubtful—would be one point towards a championship. This would make a coast champion a rare bird indeed. In the desire to suppress walk-over championships, the A. K. C. seem to have gone to the other extreme.

Kennel Suggestions.

A catalogue of the various breeds of worms is not necessary. The average dog owner is mainly concerned with the tape worm and the round worm. Of the former alone in this country there are at least six varieties, and quite three of the latter are familiar to us.

There is hardly any limit to the sources from which a dog may become infested with these pests, reproduced, and handed on with appalling rapidity, says The American Stock-Keeper. He will acquire them from his food, water, heading, motions, in pursuit of the festive flea, and is not infrequently born with them, or, even when that is not the case, they are almost sure to be present by the time he has arrived at the mature age of one week.

Hence it will be at once apparent what necessity there is for the greatest attention to sanitary detail throughout all operations connected with the kennel, as also that the pregnant bitch should be thoroughly overhauled in good time, for, harrng cold, there is no greater cause of mortality among puppies from the age of one to four months, the worms often penetrating the gut, which is tantamount to certain death, and it is difficult to treat them while on the dam.

From six weeks to three months old is, however, their worst time, the round worm in all its three varieties being the chief offender, though tape worms also appear at a very early age.

Of the round, perhaps the most familiar is the pinky-white gentleman, like the ordinary earth worm; then there is one shaped like a piece of whipcord; yet another, finer and shorter, sometimes called a thread worm.

Tape worms, or taenia, are in flatfish sections, easily separated, of varying length and breadth, which reproduce themselves by segmentation, but unless the head, which is fixed to the intestines, be got away, will continue to increase and multiply. Some of them are yards in length.

Almost all worms inhabit the intestines, though they are often found in the stomach, and thence occasionally vomited. The symptoms of worms in puppies are easily recognizable, the first being the appearance of mucus or slime in the faeces, engendered by irritation. This is quickly followed by diarrhoea more or less prolonged or continuous, according as they are affected to a greater or less extent; the coat becomes harsh and staring, eyes red and appetite voracious, the least indulgence of which results in an unsightly bloated appearance caused by gas, and an emaciated, forlorn look elsewhere. The victim may worry through it if of extra strong constitution, to develop into a puny, malformed animal; but in neglected cases the usual sequence is intestinal obstruction, convulsions, great liability to contract any ailment, perforation of the bowels, and finally, and of course, death.

Therefore, as soon as weaned, treatment should begin, since distemper might appear, and then matters would be well nigh hopeless.

In the adult the appetite is capricious rather than voracious, accompanied often enough by a husky cough, with the continual appearance of a man who has been out all night; and no amount of grooming can get the coat to look well, though the condition of weight that is—is not always affected. He also

Something for Nothing

The Polk Miller Drug Co., of Richmond, Va., are manufacturers of Sergeant's Dog Remedies, the most popular line of preparations, intended for dogs, on the market today, having received the highest endorsements of the leading dog men and kennel owners in this country and Canada. Read their advertisements appearing in the columns of our journal each issue. The firm referred to will mail you absolutely free, a copy of their celebrated book on Dogs if you will forward 3 cents to cover postage. If your dog is sick, write them, enclosing stamp, and describe the symptoms as accurately as you can. They will cheerfully furnish the best information on the subject without charge. F. W. Braun & Co., of Los Angeles, California, have recently been made distributing agents for Sergeant's Dog Remedies on the Pacific Coast.

frequently drags himself across the floor, though this is not an invariable accompaniment, nor alone is it a certain sign.

Of course, it is hardly necessary to say that patent worm specifics are, if anything, more numerous than mange cures. In some cases I believe the patient has only to look at the bottle when the worms immediately vanish, and in quite a number of others, I am told, all that is required is to take the cork out. But in all, since the manufacturers have at their disposal only those data and drugs which are within the reach of any individual with an ordinary education and a thirst for knowledge, it is difficult—for me, anyhow—to see why theirs should be superior to all others. There is one good and safe cure for all ages and that is Sergeant's Sure Shot, and I have had good results from Spratts which is in handy pill form.

AT THE TRAPS.

The Golden Gate Gun Club shoot for July took place at Ingleside last Sunday. A strong wind made shooting at times very difficult. In the club race C. C. Nauman made the best score. In the second event, 20 targets, reverse system, the purse was divided by M. J. Iverson, W. J. Golcher, H. Justins and G. Sylvester, who each scored 16 breaks. Nauman and Golcher won the money in the third race, 20 targets, unknown angles, reverse system, use of both barrels being allowed. The fourth race, 20 targets, Sergeant system, one man up, brought C. A. Haight to the front with the only straight event score of the day. Gibson and Nauman divided second money in this race. In a race at doubles Haight and Golcher proved to be the winning shooters.

The meeting closed with a contest for a cup put by Dr. C. W. Hibbard. Six men entered the match at 50 targets. E. J. Forster and H. Justins made a tie with 45 breaks each. Forster won on the shoot-off, 21 to 18 out of 25. The trophy must be won three times before it becomes individual property.

Forster, Justins, Gibson, Haight, Nauman (2) and Murdoch each made the necessary runs of 15 straight to win club bars.

The shoot off. Forster, Justins, Donohoe.

The Empire Gun Club trap shooting season for 1903 was concluded on the 12th inst.

A. J. Webb won the club championship race and the diamond buckle trophy. He broke 113 out of 125 targets, shooting in the five monthly club shoots. R.

C. Reed, second high gun in the club championship race, won the club gold lapped button.

R. C. Reed won the Winchester "pump" gun prize. This contest was decided by a monthly shoot at 20 targets, 10 singles and 5 pairs, 18 yards distance. J. B. Hauer and C. Cullen were second and third respectively in the competition.

For the James P. Sweeney medal the best score for the season was made by R. C. Reed, who made a run of 19 breaks at the May shoot. This contest was shot under a particularly difficult distance handicap, and Reed's win proves to be a clever one.

W. H. Seaver made the next highest score in the race.

The best four scores in the money race were shot by Louis H. Allen, who won a pair of gold cuff buttons therefor. Reed's best four scores were enough to give him second place in this match, for which he received a pair of silver club cuff buttons.

The Union Gun Club shoot to-morrow will be held at Ingleside for the benefit of C. W. Debenham. Mr. Debenham is a well liked sportsman and has been a familiar figure at all of our trap shoots for many years past. Last January he was stricken with paralysis and has since been confined to a hospital, being in a condition entirely unable to help himself.

It is seldom our sportsmen are called upon to come to the aid of an afflicted one in their ranks. In this case, the cause is a most worthy one and we hope to see every event of the day filled out with an entry comprised of the names of every shooter in this city and across the bay.

It will not be necessary to go to Ingleside on Sunday to enter for shooters or friends who cannot attend the shoot on either at the following stores up till Sunday, July 19, 1903. Clabrough, Golcher & Co., 538 Market street, San Francisco; Shreve & Barber Co., 439 Market street and 529 Kearny street, San Francisco; E. H. Ladd, 421 Kearny street, San Francisco; J. W. Orear, 909 Broadway, Oakland; H. E. Skinner, 4th and Market streets, San Francisco.

The program of events is an attractive one. The first race will be a big merchandise prize shoot, entrance \$1 00, 20 targets, distance handicap, class shooting, 9 classes. The list of prizes is headed by Clabrough, Golcher & Co., who donate a Remington shotgun; this is to be followed by an assortment of articles for the various classes that should satisfy an army of trap shooters.

The second event will be for the Union Gun Club cup, 15 targets, 50 cents entrance, to be won under sealed conditions, 16 yards rise. The shoot will begin at 9:30, and we hope to see a representative turnout of shooters at Ingleside in the morning.

The Santa Rosa Gun Club held a merchandise prize and club medal shoot last Sunday. The high score in the club medal shoot was made by R. Slusser. Twenty-six shooters entered in the merchandise race; each won a prize. C. Slusser starting with first choice for the best score. In a pool shoot Thos. L. Lewis, P. Fehrman and J. B. McCutchan were the high guns in the order named.

A summary of the scores in three events is the following:

Merchandise shoot, 25 targets, distance handicap—C. Slusser, 16 yards, broke 21; C. A. Williams, 16-20; R. D. Dixon, 16-20; C. Talmage, 16-19; W. Morrow, 16-19; F. W. Hesse, Jr., 16-19; J. B. McCutchan, 20-19; E. H. Crawford, 16-19; W. H. Lowery, 20-18; R. Slusser, 16-18; N. Cook, 16-17; W. A. Robertson, 20-16; P. Fehrman, 16-16; B. Cook, 16-15; G. Buckmaster, 16-14; A. P. McGehee, 16-13; H. Leggett, 16-12; C. Leggett, 16-10; E. Miller, 16-9; T. L. Lewis, 20-9; J. Mackey, 16-8; J. E. Mootgomery, 16-7; W. A. Dryden, 16-7; C. Beatty, 16-6; A. Farley, 16-4; A. Miller, 16-1.

Club medal race, 30 targets, distance handicap—R. Slusser, 16 yards, broke 22; F. W. Hesse, Jr., 16-20; P. Fehrman, 16-20; W. Morrow, 16-20; J. B. McCutchan, 20-19; C. Talmage, 16-18; D. Dixon, 16-18; C. Slusser, 16-17; W. H. Lowery, 20-16; E. Crawford, 16-15.

Pool shoot, 30 targets, distance handicap—J. B. McCutchan, 20 yards, broke 19; W. A. Robertson, 20-16; W. H. Lowery, 20-16; C. Slusser, 16-17; F. W. Hesse, Jr., 16-20; C. Talmage, 16-18; R. Slusser, 16-22; H. Fehrman, 16-20; D. Dixon, 16-18; E. H. Crawford, 16-15; W. Morrow, 16-20; T. L. Lewis, 18-23; N. Cook, 16-15.

At a meeting of the Chico Gun Club last week the following officers were elected: President, G. S. Johnson; Vice-President, John Loshough; Secretary, George Thomasson; Treasurer, W. H. Miller; Trustees, V. C. Richards, S. C. Salsbury and H. D. White.

The report of the treasurer shows the club to be in strong financial condition. A new trap ground will be selected and equipped for next season.

Change in Game Law of Yolo County.

The supervisors of Yolo county have ordained that the open season on quail in their county shall run from November 1st until and including December 31st, a period of two months only.

The open dove season for that county prevails from August 1st until the end of January only.

The biggest run of salmon in Monterey bay for three years was on Wednesday. Few of the trolling boats returned with less than 10 fish, some had as many as 35, several salmon weighed between 30 and 40 pounds. The fleet from the Capitola camping ground took 1000 pounds by noontime. The fish took bait and spoon with avidity and fought like demons, being fresh run from the ocean and in the best condition.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

THE FARM.

How to Raise Heifer Calves For Milkers.

Following are T. B. Terry's directions for raising heifer calves for milkers: Give them new milk, warm from the mother, for about two weeks. Don't let them suck the mother. Give them only a moderate amount, just enough to keep them growing nicely; never enough to fatten them, as you would for veal. In about two weeks, gradually work them onto skimmed milk. Have a thermometer and see that milk is always warmed to about 100 degrees and always sweet. Work in gradually a very little flaxseed meal. This will give oil to take the place of butter fat that has been extracted. Old-fashioned linseed will do fairly well but has not nearly as much oil in it. Pour hot water on the meal and make a jelly and put in only a teaspoonful or so when you first begin to change from new to skimmed milk. Increase the amount gradually as you see the calf is doing all right. A little wheat middlings can be put in after a time. Put some nice, bright, early cut clover hay in a rack where little calves can pick at it. They will soon do this. By the time they are six or eight weeks old they can eat oats and wheat bran in small quantities, fed dry. Never feed any corn. Do not feed a large amount of skimmed milk. Be moderate. The idea is to feed growing foods and those only, nothing to fatten, during the entire two years that the heifer is getting ready to give milk.

This will not make smooth, plump calves, such as a hatcher would want, but it will make the best possible heifers for giving milk. Of course they may be turned on grass in due season. Often some wheat bran fed with the pasture grass will be a good addition. What one wants is to make them grow, steadily and thriftily, at all times, but never to start the habit of laying on any fat. If this is once done, they will not be as good milkers in the years to come. If pasture is short, always see that the heifers have enough proper food to keep them growing thriftily, such kinds as are named above. During the entire winter season keep them growing, as well as in the summer.

Furnish a dark shed for them to run in when on pasture, so they can get away from flies, or spray them, same as you do the cows. Do not let the flies retard their growth.

In the winter keep them running loose in pens that are warm, comfortable, sunny and dry. You can put them in stanchions while eating, so they will not waste food. Water twice a day and turn them out in a yard to have a run for a time every pleasant day. Each calf should have at least 250 cubic feet of space in pen, and, of course, it should be well ventilated besides.

Don't forget to let the sun shine in and to use bedding enough to keep surface dry. Manure may be allowed to accumulate under them for months if the surface is dusted twice a day with land plaster or acid phosphate, and fresh straw or sawdust added often enough to keep a dry, clean bed for them.

Always be very gentle with them. A good carding daily will pay during winter. The writer has done this many a time, and there was always a good-natured scramble among the calves to get scratched off first. They enjoy it.

I particularly want to caution all friends against keeping the little young calves in dark, wet places. I have often seen them thus cared for, their bed all wet with their own urine. This is dangerous. Their health may suffer as a result and they may even die. If they get sick at this time it will check their growth decidedly. It is very important that they start off well. Sunlight and a dry bed will

help them. Then watch them closely to see that the feed is all right. Be very gradual about making any changes in food.

See that the young calves have pure, fresh water where they can get it at all times. They will not get water enough in the milk, perhaps, particularly after they begin to eat hay and dry grain. Put no salt in their food, but have it where they can lick it.—*Practical Farmer.*

Feeding Terms.

Judging from letters and inquiries received, the terms, scientific and practical, that are used in dairying and feeding are often stumbling blocks before the feet of many of our readers, and it is probable that in many cases readers hesitate to acknowledge, even to themselves, that ignorance of the meaning of these terms forms a decided obstacle to the better understanding of the science of dairying.

Everyone is more or less subject to the same trouble, and the man who keeps up with the procession must be constantly familiarizing himself with the terms that are constantly being formed by scientific workers to explain conditions and methods for which there are no words in English, and which would otherwise require a phrase or even a sentence to explain. Recently we received a new work on animal nutrition and on looking it over we find metabolism, katabolism, anabolism, and a few others of like nature that sent us at once to the dictionary for information.

Unfortunately for the average reader, the dictionary assumes frequently that the seeker for knowledge in a certain branch has a wide assortment of knowledge in other branches. Supposing a dairyman, to whom the terms used in feeding are somewhat new, goes to the dictionary to find out what albuminoids are and he finds the following: "Albuminoids—One of the class of organic principles which form the main part of organized tissues." This may be clear to some, but it does not throw much light to assist the seeker after knowledge.

The fact is that very few of the terms used in feeding can be defined in a few words and carry to the mind of the inquirer any clear meaning of what the term actually means, and this is especially so where there are two words that are used to indicate the same substance. Thus, albuminoids and proteids are used for names of substances containing nitrogen, and that can be used for foods, or that are derived from foods digested and assimilated by the living animal.

Of this class the white of egg and the casein of milk are the most common examples, but they are only two of a long series of bodies that can be used as food and that vary slightly in taste and appearance according to the source from which they are obtained. There is not a living thing in the world, from bacteria up that does not contain albuminoids of some kind, and the number of varieties is probably beyond calculation.

Like all other nutrients, the albuminoids go through a long series of building up and decomposing, continually being made and unmade. The great reservoir and starting point is the air that contains a large per cent of nitrogen. By various methods chemical, physical and bacterial, this nitrogen is changed into bodies that can be used as food by plants. The plants work over these products derived from the air and store them up as albuminoids, which can then be used as food by animals.

The animal works over this material, uses a little of it to supply its own wants and in the process makes a large part of it into substances that can again be used by plants to form more albuminoids, which are again used by animals, etc.

A little of the nitrogen is wasted each time a change is made, and that goes back to the air again, to be finally captured once more and started on its rounds through plant, animal, bacteria—a kind

of perpetual motion as it were—without which all life would come to a sudden stop—*Hoard's Dairyman.*

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

SPECIAL CONDITIONS.
Entries to above races to close with the Acting Secretary, H. Lowden, Sacramento, Wednesday, August 12, 1903, when horses are to be named and eligible, except where otherwise stated.
Five per cent entrance and five per cent additional from money winners.
All races mile heats, three in five, except otherwise stated.
Money to be divided 50, 25, 15, and 10 per cent, unless otherwise specified in conditions.
All races to fill satisfactory to the Board of Directors or they may be declared off.
Distance in all heats 80 yards, but if the field is more than eight, 100 yards. A horse not winning, or making a dead heat in three, to be ruled out but will retain his position in sum mary.
Five or more to start, or it is optional with the Board to declare race off. If there are less than four starters the Society may, if they so decide, allow them to contest for the entrance money only paid in, to be divided 60, 30, and 10 per cent.
A horse distancing the field will only be entitled to first and fourth moneys.
Hoppers barred in trots, but allowed in pacing races, except where otherwise stated.
It is not intended to give any specials. If you want to start your horses or secure stalls, enter in advertised races.
For full and further conditions, see entry blank.

Clean Milk for City Use.

Just at the present time we seem to be on the eve of a revolution in the methods that are being used in handling the milk supply of cities. The authorities are discovering that there is a direct relation between unclean milk and the city health. The only trouble in this crusade is that the producer is being held responsible almost entirely for the quality of the milk. He is, no doubt, to blame to a large degree, but the methods of transportation and handling in the city should certainly come in for their share of the trouble and not put the whole burden on the shoulders of the dairyman. The following gives the view of the subject from the viewpoint of the city milk inspector:

In many of the great cities of this country the milk supply is closely connected with the health and life of the people. This is especially true of the babies in great cities like Chicago. Recently the milkmen of that city have put into force a rule of once a day deliveries. As a result, disease and death have come to many children, as much of the milk is delivered too sour to be used, so the health department claims. Of course, if the milk were clean and cleanly handled it would keep for more than twenty-four hours. But the milk is in such poor condition that it will keep for but a few hours in warm weather. The Board of Health warns the public that the dirty milkman is more dangerous than the dishonest one. An official of the Board of Health said: "The problem is the most serious the department has faced in years. It is a matter of life and death. It is practically impossible to keep milk for twenty-four hours in the congested districts, and it is in these districts, that the greatest infant mortality results. The people there seldom are able to purchase ice. We believe that the milk drivers will see the situation and give the problem serious consideration."

According to the department's statistics, close milk inspection during the last six years has brought a decided improvement in the milk supply of the city. During the previous six years, before stringent methods were enforced, there had been 66,003 deaths of children under five years of age in the city. During the six years now closing there have been but 51,046 such deaths. The under-five-years population, according to the federal census, increased 30 per cent between 1890 and 1900. So that on this basis, instead of 51,046 deaths in the second six year old period there would have been, had the earlier death rate continued 85,083 deaths.

Sour milk is declared to be the cause of the increased death rate recently among babies. One of the health commissioners of Chicago asserts that the increased death rate is due to intestinal diseases caused by the fermentation set up by the attempt to digest sour milk. Chief Milk Inspector T. F. Grady of Chicago says: "Germs thrive wonderfully in the milk detained by the flakes of rust left after the can has been washed. In this way the supply for a whole neighborhood is often polluted, the children being the greatest sufferers. I have devised a red label which is to be pasted tightly on every rusty milk can coming into Chicago. The can will go back to the farmer and his name be retained. If that can ever comes back it will be smashed and the milk in it poured out, as well as any other milk that that farmer sends in. By keeping his name we can tell who uses rusty cans and shall condemn his whole supply for fear of missing the rusty can. The consequences are too grave to be overlooked. We intend also to post a circular on all milk platforms warning dealers that they must sterilize their cans before sending milk in them to Chicago. Sour milk is very common. It might be supposed that formalin would be used to counteract the tendency to sour, but careful tests have revealed none."

The war for clean dairy products should go on till we have not only pure butter and cheese, but pure and clean milk delivered to our cities.—Farmers' Review.

Farmers' Institutes.

Great preparations are being made for the opening of the Farmers' Institute work by the University of California. With the increased funds voted at the last Legislature, these meetings will be conducted during the fall months on a more elaborate scale than ever. Besides the members of the agricultural experiment station staff, there will be a large force of special lecturers, who will discuss the special problems with which they are particularly familiar.

During the last week of this month a big gathering will be held at Long Beach, in Southern California. At this seaside institute, a strong program will be presented, every phase of agricultural work being touched by a corps of speakers, gathered from all sections of the State. Among the men from Berkeley who will deliver addresses and hold round-table

talks are Professor Robert H. Loughbridge, who will speak on "Agriculture and Chemistry"; Professor Leroy Anderson, director of the San Luis Obispo Polytechnic School, who will handle "Dairying and Dairy Animals"; Professor Archibald R. Ward, "Cattle Diseases"; Professor Veranus A. Moore of Cornell University, "Microbe Diseases"; and A. J. Cook, University conductor of the Farmers' Institute, "Entomology for the Orchardist."

Professor Alexander Cray of San Francisco will speak on "Quarantine Against Insects". Other leading men who will be heard during the session are Professor A. J. McClatchie of the Phoenix Experiment Station, President George A. Gates of Pomona College and Elwood Cooper of Santa Barbara.

This institute will begin on July 27th, and will close on August 1st at which date a Farmers' Institute will commence at Pacific Grove. At the conclusion of this meeting the work will be again transferred to Southern California, where a long series of meetings will be inaugurated.

Tuttle's Elixir

has drawn the following expressions of endorsement from its grateful users in every state and territory in the Union:

Invaluable for man or beast. Gives immediate relief. Unequaled for Colic. Very satisfactory results. Best for Spavin. Shoe Boil removed. Wouldn't be without it. Never lost a hair. Saved a heap of money. Speedily relieves pain.

\$5000 REWARD

for every one of the above endorsements that can be proven authentic.

Tuttle's Elixir for use in the stable. Tuttle's Family Elixir for use in the home. Both are unequalled remedies. Fifty cents buys either at any drug store. Sample free for 6c in stamps to pay postage. Used and endorsed by Adams Express Co.

Indications of Constitution in Dairy Cattle.

The *Maritime Farmer*, in an interesting article on "Breeding Dairy Cows for Production," defines constitution in dairy cattle by saying that "the wide chest, good heart girth," are the chief indications of constitution in a dairy cow. It seems to us as if the *Farmer* as well as many other writers has fallen into the old beef-type method of judging constitution in dairy cattle, and for want of better knowledge is still keeping it up. They have only to look at the form of a race horse and his build about the heart and lungs and then compare him to the deep-chested, wide-between-the-forelegs form of the draft horse to see that there is something lacking in this old definition of constitution. Is the race horse deficient in constitution or staying power? Compare the setter and pointer dog with the deep-chested bulldog. Does the hunting dog lack in constitution? Is either the race horse or hunting dog lacking in heart and lung power? Why, one minute of the work of the race horse calls for more breathing capacity and heart action than two days of the slow, steady pulling of the draft horse. And so in like manner it is with the hunting dog and his labor in the field.

The dairy cow does not lack constitution or staying power, in her chosen field, because she does not have the deep brisket and great width between the fore legs that mark the beef animal.

More than this, the beef outline is not an indication of large heart and lungs. We wonder sometimes if these beef outline advocates, ever examined the lungs and heart of a race horse and dairy cow to see whether they were smaller in size and compact for action than those of the draft and beef type. The form of the dairy cow like that of the race horse has been fashioned by the dominating effect of a peculiar function. Function always modifies form, builds it and shapes it to its own purpose.

But constitution is an independent quality, and must be present in all forms and functions, else the animal does not last well in its work. Constitution simply means vitality; power to endure; ability to resist disease and discouraging circumstances. It is largely derived from the brain and nervous system. This is shown more clearly in men.

It is found in men of slight form and fails in men of large chest girth. Its indications must be sought for in other lines than are indicated by the old Short-horn doctrines and outline.

The construction of the walls of the abdomen, strong will and temper, active, alert bearing and action, are much better indications of enduring constitution than the formula generally given of "wide chest and good heart girth."

Strike!—if they don't give you Jackson's Napa Soda when you ask for it

"SAVE-THE-HORSE" TRADE MARK SPAVIN CURE

It isn't words, it isn't type or page advertisements, it is the truths that ring out sound and clear and impressive—actual results like the following from business men whose standing and reliability can be readily ascertained—which have made "SAVE-THE-HORSE" such a success. Their cured horses are living advertisements, absolute certainties as to the possibility of the remedy for your own case, and with every bottle is a guarantee document as binding to protect you as the best legal talent could make it.

Gentlemen:-

Replying to yours of May 18th, I beg to state that I got a bottle of your "SAVE THE HORSE" last year to use on my mare which was affected with some disorder of the coffin joint, which was badly inflamed and kept the mare lame for months.

I tried several remedies but with very slight benefit, I then tried "SAVE THE HORSE", used about 2/3 of bottle and she has been going sound since. With thanks, I am,

Yours very truly,
 J. S. CAFFREY.

Worcester, Mass. June 11th., 1903.

Troy Chemical Co.,
 Troy, N. Y.

Gentlemen:-

I have a Wilkes Pacing Gelding that was turned out last summer and in running in the pasture became lame in the off forward foot. The soreness was just above the hoof, with a tendency to throw out a ringbone. I tried three veterinaries and various advertised remedies which were on the market but without effecting a cure. Also fired and blistered him once. My attention was called to your remedy by a friend who urged me to use it. After one month's trial and the use of one and one-half bottles, we hitched the horse up and drove him and he has never taken a lame step since. Have now been driving him six months on the road, have speeded him on the track and macadam roads and he is as sound as a bullet. It is certainly a wonderful remedy and I feel that I cannot say too much in its praise.

Wishing you every success, I am,

Yours respectfully,

O. B. Wood

WATERBURY, Ct., June, 1903

Gentlemen:-I have used your "Save-the-Horse" and find it excellent in its results. It was recommended to me by H. B. Loucks, liveryman of this city, as a sure cure for bone spavin. My horse had a bone spavin was pin fired once but it did not cure him. Then I used one and a half bottles of "Save-the-Horse." He is now going sound and was not laid up while applying "Save-the-Horse."

Very respectfully,
 A. F. HENCHLEY.

Gentlemen:-Regarding the use of "Save-the-Horse," I used part of a bottle on my horse for a strained tendon. He had been lame for about three months and had been blistered twice with no benefit, and had a bottle of "Save the Horse" cured him. The beauty of the medicine is that it left no scar.

Very truly,
 W. F. DEPUY.

"SAVE-THE-HORSE" Cures Without Scar, Blemish or Loss of Hair.

"Save-the-Horse" can be applied at any time, anywhere, any place, and in all conditions and extremes of weather. Horses may be worked as usual, with skin or ankle boots, as no harm can result from destruction of hair or scalding of limb.

\$5.00 PER BOTTLE.

Written guarantee with every bottle given under our seal and signature, constructed solely to satisfy and protect you fully. Need of second bottle is almost improbable, except in rarest of cases. Copy of booklet and guarantee sent upon application.

POSITIVELY AND PERMANENTLY CURES

Bone and Bog Spavin, Thoroughpin, Ringbones (except low ringbone), Curb, Splint, Capped Hock, Windpuff, Shoe Boll, Weak and Sprained Tendons and all Lameness. If you have a case different than described in our booklet or advertising we will advise you frankly as to the possibility of the remedy effecting a cure. Give explicit particulars. Give the veterinarian's diagnosis, if he is competent. Inform us fully as to the age, development, location and swellings, lameness, action and previous treatment. \$5 a bottle at all druggists and dealers or sent express prepaid.

CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET. IT PENETRATES and DRIES IN quickly and DOES NOT GUM and FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.
It gives natural nourishment to the foot and incites a rapid, healthy growth--ALL DRYNESS AND BRITTLENESS quickly disappears.
QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed. It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.
IT PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH, STRONG, ELASTIC WALL and HEALTHY FROG--A FOOT WHICH WILL STAND WORK on race courses.
Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds, due to its use.
It is a CERAIN CURE for THRUSH and SCRATCHES.
We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.
PRICES:--Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2 1/2-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free.
Don't fail to read "ad." giving information concerning Campbell's Iodoform Gull Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

GOOD ONLY UP TO AUGUST 15, 1903

We are pleased to announce that we have made arrangements whereby we are able to renew our offer of the
MAMMOTH CHART, SHOWING SKELETON OF THE HORSE
as a handsome premium to new subscribers and others who will pay us \$3 for subscription to the BREEDER & SPORTSMAN between July 1st and August 15, 1903.
This Chart is lithographed on tinted paper and is 22x28 inches. It will be found invaluable to every owner of a horse, as the names of all the Bones are given, as well as the names of the Tendons and Ligaments of the legs. By studying this Chart almost any lameness can be located and the proper remedies applied. The accompanying engraving will afford an idea of its appearance. No

similar Chart has ever before been published. The artist, in preparing this Skeleton, visited the American Veterinary College in New York City and made drawings from actual skeletons, thus insuring absolute accuracy. This Chart sells for One Dollar, but any reader can have it who will remit **THREE DOLLARS**

BEFORE AUGUST 15, 1903.

It will be mailed, carefully packed, in a heavy pasteboard tube for safety. Address

SPECIAL CONDITIONS.

Entries to above races to close with the Acting Secretary, H. Lowden, Sacramento, Wednesday August 12, 1903, who horses are to be named and eligible, except where otherwise stated.

Five per cent entrance and five per cent additional from money winners.

All races mile heats, three in five, except otherwise stated.

Moogys to be divided 50, 25, 15, and 10 per cent, unless otherwise specified in conditions.

All races to fill satisfactory to the Board of Directors or they may be declared off.

Distance in all heats 80 yards, but if the field is more than eight, 100 yards. A horse not winning, or making a dead heat in three, to be ruled out but will retain his position in same.

Five or more to start, or it is optional with the Board to declare race off. If there are less than four starters the Society may, if they so decide, allow them to contest for the entrance moneys only paid in, to be divided 60, 30, and 10 per cent.

A horse distancing the field will only be entitled to first and fourth moneys.

Hopples barred in trots, but allowed in pacing races, except where otherwise stated.

It is not intended to give any specials. If you want to start your horses or secure stalls, enter it advertised races.

For full and further conditions, see entry blank.

SAVE-THE-HORSE

TRADE MARK
SPAVIN CURE

It isn't words, it isn't type or page advertisements, it is the truths that ring out sound and clear and impressive—actual results like the following from business men whose standing and reliability can be readily ascertained—which have made "SAVE-THE-HORSE" such a success. Their cured horses are living advertisements, absolute certainties as to the possibility of the remedy for your own case, and with every bottle is a guarantee document as binding to protect you as the best legal talent could make it.

Troy Chemical Company,
Troy, N. Y.

Gentlemen:-

Replying to yours of May 18th, I beg to state that I got a bottle of your "SAVE THE HORSE" last year to use on my mare which was affected with some disorder of the coffin joint which was badly inflamed and kept the mare lame for months.

I tried several remedies but with very slight benefit, I then tried "SAVE THE HORSE", used about 2/3 of bottle and she has been going sound since. With thanks, I am,

Yours very truly,
J. S. CAFFREY.

Troy Chemical Co.,
Troy, N. Y.

Gentlemen:-

I have a Wilkes Pacing Gelding that was turned out last summer and in running in the pasture became lame in the off forward foot. The soreness was just above the hoof, with a tendency to throw out a ringbone. I tried three veterinaries and various advertised remedies which were on the market but without effecting a cure. Also fired and blistered him once. My attention was called to your remedy by a friend who urged me to use it. After one month's trial and the use of one and one-half bottles, he hitched the horse up and drove him and he has never taken a lame step since. Have now been driving him six months on the road, have speeded him on the track and macadam roads and he is as sound as a bullet. It is certainly a wonderful remedy and I feel that I cannot say too much in its praise.

Fishing you every success, I am,

Yours respectfully,

O. B. Wood

WATERBURY, Ct., June, 1903

Gentlemen—I have used your "Save the Horse" and find it excellent in its results. It was recommended to me by H. E. Locks, liveryman of this city, as a sure cure for bone spavin. My horse had a bone spavin was pin fired once but it did not cure him. Then I used one and a half bottles of "Save-the-Horse." He is now going sound and was not laid up while applying "Save-the-Horse."

Very respectfully,
A. F. HENCHY.

CHESTER, ORANGE CO., N. Y., June 1, 1903.

Gentlemen—Regarding the use of "Save-the-Horse," I used part of a bottle on my horse for a strained tendon. He had been lame for about three months and had been blistered twice with no benefit, and half a bottle of "Save the-Horse" cured him. The beauty of the medicine is that it left no scar.

Very truly,
W. F. DEPUY.

"SAVE-THE-HORSE" Cures Without Scar, Bleemish or Loss of Hair.

"Save-the-Horse" can be applied at any time, anywhere, any place, and in all conditions and extremes of weather. Horses may be worked as usual, with skin or oak leaf boots, as no harm can result from destruction of hair or scalding of limb.

\$5.00 PER BOTTLE.

Written guarantee with every bottle given under our seal and signature, constructed solely to satisfy and protect you fully. Need of second bottle is almost improbable, except in rarest of cases. Copy of booklet and guarantee sent upon application.

POSITIVELY AND PERMANENTLY CURES

Bone and Bog Spavin, Thorngripin, Ringbone (except low ringbone), Curb, Splint, Capped Hock, Windpuff, Shoe Boil, Weak and Sprained Tendons and all Lameness. If you have a case different than described in our booklet or advertising we will advise you frankly as to the possibility of the remedy affecting a cure. Give explicit particulars. Give the veterinarian's diagnosis, if he is competent. Inform us fully as to the age, development, location and swellings, lameness, action and previous treatment. \$5 a bottle at all druggists and dealers or sent express prepaid.

San Francisco, Saturday, July 25, 1903.

BRIGHTER GROW THE PROSPECTS for the California circuit. The Breeders will give a meeting at Pleasanton after the State Fair, and Salinas and Hollister will give meetings in all probability. Some of the fast horses have gone to Seattle to race and this has induced owners here to keep up their payments in the stakes at Vallejo and Petaluma and the prospect is for big fields at both places. There seems to be more interest manifested in regard to harness horses by the general public than for several years. On the 4th of July large crowds turned out at Vallejo, Petaluma and other places to see the local races and there is a demand for good horses that seems to be above the supply. The circuit will open at Vallejo August 13th. A good program has been arranged for that meeting and over fifty horses are already at the track there. The Petaluma people are very enthusiastic over the Breeders meeting and promise a big attendance to see the sport. Lots of money will be divided among the horsemen who win there. There is one stake for \$2000, one for \$1500, one for \$1000 and several for \$500 and \$300. The first division of the \$6000 Futurity are to be contested for and about ten thousand dollars will be paid out during the meeting. The State Fair is making an attempt to abolish the syndicate bookmaking that has been the bane of the fair for several years, and the Directors are making every effort to make it a fair for the people instead of for the book makers. The purses for harness races are liberal and should draw a big list of entries. Pleasanton will hang up about \$5000 for harness horses and at Los Angeles there is to be a three weeks meeting at which good purses will be offered for two harness races each day. The circuit begins to assume a quite respectable shape.

Our Pictures.

The horses pictured on our front page to-day are as follows:

Kitty D., chestnut mare by Dictatus, owned by Walter Lord of Sonoma. She is a pacer and a very promising one. She started last Sunday in a match race against the pacer Eden Vale 2:20 but was beaten in straight heats, best time 2:22. Kitty D. fell in the first heat, throwing her driver and injuring him some, but made a close contest in the other two heats.

Mildred O., the roan mare by Secretary, is owned by Mr. John Orfutt of Petaluma. She is a nice going pacer, but has never been started in a race. She will make her debut in the Pacific Slope Stake of \$1500 for 2:20 class pacers at the Breeders meeting next month.

Lomo Wilkes is a good looking bay colt, two years old, by Linwood W. 2:20 out of Flora B. by Whalebone, by Inca. This colt is a square trotter and shows speed.

Centreey is a two year old filly owned by John O'Keefe of San Francisco. Mr. O'Keefe purchased her at the Pierce sale last month and is much pleased with his bargain. She is by On Stanley 2:17½, son of Direct 2:05½ and Lilly Stanley 2:17½. Her dam is Silver Eye 2:17½ by Ahhstorf. Mr. O'Keefe will send her to Mr. John Hammet at Watsonville to be trained.

A. Ottioger, of this city, who owns the McKinrey trotter Zambra 2:16½, has heard about that proposed five mile race for \$500 a side at Sacramento between horses owned by members of the Sacramento Driving Club, states that he would like to enter and put up another \$500. He suggests that the race be made free for all and if the Sacramento gentlemen object to outsiders coming in and carrying off their money he will donate all the stake except his \$500 to any Sacramento charitable institution if he wins. The genial ticket broker wants a race for his horse as he thinks he can win but says he will be satisfied with the fun he gets out of it and does not care for the money.

Grand Circuit Opens at Detroit.

Opening day of the Blue Ribbon inaugural meeting of the grand circuit attracted an immense crowd to Grosse Point track on Tuesday of this week, but heavy rain which set in at 3 p. m. brought the sport to a summary close, when a sensation was developing that promised to make the day memorable. This was in the feature event, the \$5000 Chamber of Commerce purse for 2:24 class pacers.

Elastic Pointer, the heavy favorite, won the first heat as he pleased in 2:10. In the second he sailed over to the half in 1:01½, and appeared to have his field spread-eagled, but tired in the stretch, and "Knapsack" McCarthy brought up Tom Keene a 5 to 1 shot, and beat him home half a length in 2:07½. The heat caused wild excitement in and out of the betting shed, and the complexion of the race at once assumed a most interesting hue, but a downpour necessitated a postponement at this juncture. Elastic Pointer was very tired.

When the finish of the Chamber of Commerce race was called on Wednesday Tom Keene was a heavy favorite. When the word was given Elastic Pointer led to the half, when he tired and fell back, Tom Keene, who had won the last heat Monday, made a bad break on the far turn and was flagged, and Pan Michael won handily. Under the rules only Pointer and Pan Michael were eligible to start again. The latter was made a 100-to-40 favorite, but Elastic Pointer gave the ring a shock by coming out fresh after being apparently all in, and pacing right away from Pan Michael with the utmost ease. Elastic Pointer won first, fourth and seventh heats and race. Time, 2:10, 2:11½, 2:11½. Pan Michael won the third heat in 2:14½, Tom Keene won second heat in 2:07½ and was distanced. Before the race pools sold as follows: Elastic Pointer and Page Hal were equal favorites at \$50 each. Five Points \$30, Trilby Direct \$25, Pan Michael \$20, Tom Keene \$10, and the field \$20. Nick Hubinger, owner of Elastic Pointer, offered \$1000 for the first choice, but Lowry could not get enough against it. James Butler backed Trilby Direct steadily.

The 2:30 trot was a sad blow to the talent, Aerolite, the heavy favorite, was "flagged" in the first heat. Katrinka G. by Steinway, who won this heat, was "flagged" in the third and Scott Hudson's Guy Fortune, who had been at 15 to 1 in the betting, won handily. The 2:15 pace was hardly more than an exercise for Star Hal.

The crowd on Wednesday, the date of the classic M. & M. \$10,000 trot was larger than that of the previous day. It was the fourth race of the day and, as usual, ante-post betting was fast and furious. The first pool sold was as follows: Wainscot, \$200; Nirvana, \$110; Jim Perry, \$100; Rohizola, \$80; Hie Boy, \$75; John Taylor, \$65; Robert Mc, \$55; Cole Direct, \$50; Shady Beatty, \$50; Bonnie Russell, \$15; King Simmons and Miss Jeannette, \$10 each.

In subsequent pools Wainscot remained strong favorite, but John Taylor was made as strong a second choice. The race was practically between these two. In the first heat, to a poor start, Rohizola sailed off in the lead, with John Taylor right after her. He took the lead before reaching the half, and was never headed, Wainscot breaking when Hyde moved him up in the stretch.

In the second heat Wainscot and Taylor had a tremendous duel from the home turn to the wire, and the four year old outgamed Taylor and beat him one and a half length in 2:10½, sparking time for the track.

The third heat was easy for Wainscot, as on the upper turn, when trotting in a compact bunch, about six lengths back of the leader, Hie Roy broke and swerved into John Taylor, Rohizola was right behind and the three piled up together. Hie Roy and Rohizola were stopped but Taylor kicked himself loose from the sulky and ran in third place, stopping on the turn at the finish and returning to the scale with the other horses when he was easily caught. Strangely enough, none of the horses or drivers were hurt.

Non-heat winners now went to the stable, and only Wainscot and Taylor appeared for the fourth heat. The odds were 1 to 4 Wainscot, and 3 to 1 John Taylor. The two horses battled head and head practically every step of the mile, and in the last strides Wilson lifted Taylor a winner by half a neck amid a perfect pandemonium of applause. Darkuses then called a halt and the finish went over.

On Thursday the talent played John Taylor at \$115 to \$100 on account of his advantage in age and in seasoning, and they were correct. Wainscot could not foot with the gray at the score and was never able to get to him except momentarily on the back stretch. He had two lengths back at the head of the home stretch, but broke there and lost two more lengths. Under hard driving he almost got to John Taylor's wheel, but could never bring Wilson to more than a mild drive and at the end he was sitting still.

In the summary Robizola, the only California horse to start was 3-9-9. Jim Perry, the Denver horse was 8-3-2.

Monte Carlo was beaten in the 2:10 trot although he was favorite for the race and a lot of money was lost on him.

The telegraphic reports of the races are so meagre that we will have to wait for the mails to arrive to get a full account of the contests.

The results of the races as far as heat winners are concerned are as follows:

2:15 pace, purse \$1000—Star Hal won both heats. Time, 2:11½, 2:11½.

2:20 trot, purse \$1200, two in three heats—Guy Fortune won second and third heats and race. Time, 2:13½, 2:14½. Katrinka G. won first heat. Time, 2:14½.

2:21 pace, \$1000—Nick Wilson won both heats and race. Time, 2:10½, 2:09½.

2:14 trot, \$1200—Judge Cullen won both heats. Time, 2:15½, 2:14½.

2:05 pace, \$1500 purse—Elder One won both heats. Time, 2:08, 2:10.

2:27 pace, \$1000 purse—Hal Chaffio won second and third heats and race. Time, 2:10½, 2:12. Five points won first heat in 2:10.

2:10 trot, \$1500 purse (unfinished)—Dan T won first heat in 2:09½. Dr. Strong won second heat in 2:10½.

Trotting, 2:12 class, \$2000—Billy Buck won both heats. Time, 2:10½ and 2:11½.

Trotting, 2:18 class, \$1000—Fanfaron won both heats. Time, 2:11½ and 2:12½.

Pacing, 2:17 class, \$2000—Dr. Madara won both heats. Time, 2:09 and 2:08½.

Pacing, 2:09 class, \$2000—Winfield Stratton won both heats. Time, 2:06½ and 2:08.

Pacing, 2:09 class, \$1000—Sadie Baron won both heats. Time, 2:11 and 2:13½.

Acting Secretary Lowden Opposes the Syndicate.

There is a warm controversy on foot between Harry Lowden, acting Secretary of the State Agricultural Society, and B. W. Cavanaugh, the well-known hop-grower and hookmaker, regarding the subject of hookmaking at the coming State Fair. Mr. Lowden has openly declared himself against syndicate bookmaking, and has stated that the State society will not be dependent on the syndicate, but can easily obtain \$16,400 for the privileges in an open betting ring.

Mr. Cavanaugh, on the other hand, claims that this sum of money can not be obtained for the booking privileges, either from the syndicate or for an open ring, and the controversy has gone to such an extent that each of the parties have wagered the sum of \$100 on the ultimate result. The conditions of the wager are as follows:

The conditions of this bet are as follows: The betting to be made at the State Fair races in Sacramento during the racing season of 1903. The privileges for an open betting ring must bring \$16,400 for the racing season. If the Agricultural Society receives \$16,400 for the betting privileges B. W. Cavanaugh loses his bet of \$100; if the said Agricultural Society fail to receive the said sum of \$16,400 for the betting privileges, Harry Lowden loses his \$100.

Dated at Sacramento this 21st day of July, 1903.
(Signed) B. W. CAVANAUGH.
HARRY LOWDEN.

Witnesses—J. J. Campbell and H. Meyer.

In an interview with Mr. Lowden he said: "I claim that the betting privileges, including the hooking and poolselling, should bring to the society enough money to pay all added money to stakes and the purses and the direct expenses of conducting the racing.

"Under the law we are not allowed to use any appropriation made for the society by the Legislature for horse racing and in consequence we are obliged to depend on the amount of money produced by the sale of the hooking privileges to make up our purses. Last year the hooking and betting privileges brought the society \$13,336 and the directors paid out in purses some \$20,090, leaving a deficit of \$6754.

"This does not include the large expenses incurred for preparation for the track, starting and other expenses necessitated in first class racing, such as is pre-empted at the State Fair. At the spring meeting held at the track by the Sacramento Jockey Club the bookmakers paid all the purses and all the attendant expenses with a free gate, and I hold that at no time under syndicate betting has the State Agricultural Society received a proper price for the betting privileges, as the balance sheets of the society will plainly show a loss to the society and unfair prices to those who bet against the hooks."—*Sacramento Union*.

Down in Australia and New Zealand the betting on racing events is done by means of a totalisator or mutual machine and is under direct control of the government as it is in France. Ten per cent commission is taken out of all the money that passes through the totalisator, a portion of which goes to the government for charitable purposes and the rest to the association giving the meeting. The public who attend the races there prefer this system to bookmaking.

The Windsor Meeting.

Across the river from Detroit is the Windsor, Ontario, track, where a meeting is held every year during the week before the opening of the Grand Circuit meeting at the latter place.

Tribly Direct, the handsome little black mare owned by Mr. Juan Galleagos of Mission San Jose was a starter in the 2:30 pace the first day and got second money.

In the 2:21 pace the second day Diablita, by Diablo, also owned by Mr. Galleagos won second money. He took the first heat in 2:13½ and the third in 2:11½.

Billy Buck, the trotter in Ed Geers' string that is said to look very much like The Abbot, won the 2:17 trot in straight heats and got a record of 2:12½.

Monroe Salishury's much talked about pacer Mush was a starter in the 2:25 pace and got third money. The best time was 2:10½. Monroe the big bay trotter by Seymour Wilkes got second money in the 2:30 trot which was won in straight heats, by Ellenwood. The best time was 2:14½.

The meeting wound up on Friday. Kelly Briggs by Bayswater Wilkes was a starter in the 2:09 pace which was won in straight heats by Allerson in 2:08½, 2:09½ and 2:08¾. Kelly Briggs got fourth money. Frank by Secretary was also a starter but was 10th in the summary.

Monte Carlo won the 2:10 trot in straight heats reducing his record to 2:08½, the fastest mile by a trotter in a race this year.

The following are condensed summaries of the results of races held there last week:

Monday, July 13—2:30 pace, purse \$600. Page Hall won in three straight heats. Time—2:11½, 2:11½, 2:12½. Tribly Direct, W. O. Foote, Vernon and Lady Gothard also started.

2:12 trot, purse \$600—Judge Cullen won in three straight heats. Time—2:11½, 2:12, 2:11½. Pug and Black Lady also started.

Tuesday, July 14—2:15 pace, purse \$600. (Unfinished from Monday.) Darcy won first, second and sixth heats and the race. Time—2:11½, 2:10½, 2:10½. Wayne King won the third and fourth heats. Time—2:09½, 2:12½. Maggie Usher won the fifth heat. Time—2:14½. Master Roy, Al McGregor, Prince Vale, Hankie and Minnie Jones also started.

2:25 trot, purse \$600. Wainscot H. won in three straight heats. Time—2:10½, 2:13½, 2:13. Hie Boy, Bonnie Russell, Estrella, Scapegoat and Jennie Scott also started.

2:21 pace, purse \$600. Natalie N. won the fourth, fifth and sixth heats and the race. Time—2:14½, 2:14½, 2:14½. Diablito won the first and third heats in 2:13½ and 2:11½. Hal Chaffin won the second heat in 2:11½. Minaloid and College Queen also started.

2:17 trot, purse \$600—Billy Buck (Geers) won in three straight heats. Time—2:13½, 2:12½, 2:13. Matty Smeltz, Direct View, Millard Sanders, Uncle William, Panforen and Louis E. also started.

Wednesday, July 15—2:30 trot, purse \$600. Ellenwood won in three straight heats. Time—2:18½, 2:14½, 2:16. Monroe, Mary Scott, Preceptress, Josie Wilkes and Sid Thorne also started.

2:14 trot, purse \$600. Gold Standard won in three straight heats. Time—2:13½, 2:12½, 2:13½. The Questor, Wild Wilton and Dick also started.

2:25 pace, purse \$600—King Direct won in three straight heats. Time—2:13½, 2:10½, 2:11. Geary, Musb and Tomboj also started.

Thursday, July 16—Cole Direct won in three straight heats. Time—2:16½, 2:15½, 2:14½. The Parson, Henry L., M. M. D. and The Tout also started.

2:06 pace, purse \$600. William Mc won first, second and sixth heats and race. Time—2:06½, 2:07½, 2:10½. Captain Spinx won the fourth and fifth heats in 2:10 and 2:13. Terrance Queen won the third heat in 2:12½. Only three starters.

2:18 pace, purse \$600. Cleopatra won in three straight heats. Time—2:12½, 2:13½, 2:15. Benoni Jennings, Gallagher, Dacy, Eldorado, Great Guy and Governor Pingree also started.

Friday, July 17—2:09 pace, purse \$600. Allerson won in three straight heats. Time—2:08½, 2:09½, 2:08¾. Nonamie, Cubanola, Kelly Briggs, King Charles, Carthage Girl, Satin Slippers, Dorothy Wilton, Marshal, Frank and Rysdyk also started.

2:10 trot, purse \$600. Monte Carlo won in three straight heats. Time—2:10½, 2:08½, 2:08½. Dan T., Dr. Strong and Prince Zelma also started.

The first Indiana foal by McKinney belonging to the Geary Stock Farm, Bloomington, Ind., put in its appearance at that establishment Monday evening of this week at 9 o'clock. The youngster, Superintendent Shepherd writes us, is a dark bay colt by McKinney, out of Miss Fantastic, by Electric Bell, son of Electioneer; second dam Fantasma, by Red Wilkes; third dam Ida, by Edwin Forrest 48. The youngster is good size, strong and sprightly and both Mr. Geary and Superintendent Shepherd are beginning to associate him with the 2:10 trade-mark of his sire. —Western Horseman.

Sacramento Track to be Improved.

The *Sacramento Union* says: "J. W. Wilson, Superintendent of Agricultural Park, is making preparations to have the racetrack placed in far better shape than it has been in many years, and to accomplish this result he will have the under surface of the old original track, which has been covered nearly six inches with clay, broken up, in order that the moisture from beneath and the moisture produced by the daily sprinkling of the surface may have a chance to work through the clay.

An old track expert who is thoroughly conversant with the condition of the track at the park, in speaking about the matter, said: "The mistake made was in not breaking up the surface of the old track before the new clay was applied. This old surface has become as hard as cement, and the consequence is that no moisture from below can be drawn up through it.

The result is that the new layer of clay that was placed on top of the old surface failed to amalgamate with it, but instead formed a layer on top that became slushy when too much water was put on it, and when dry the clay would cup, or lift, beneath the horses' feet. This condition was very unsatisfactory to horsemen, who were unable to get the best results in their training, and the result has been that they went to other tracks to do their training.

If the hard surface of the old original track were broken up the moisture from below would be drawn to the surface every night, and the moisture produced by sprinkling would sink down in the day time, and this would cause a firm, hard track that would not cup beneath the horses' feet."

Toe Weights and Shoes.

A few ounces in the way of a toe weight or added to the shoe calk gives a trotter stride and action or on the other hand many take away an overplus of stride and lessen action so as to improve speed. Some years ago trotters wore long-heel shoes behind. It was more to catch the hack strap of the toe boots than anything else, yet once in vogue every trotting animal wore them. Long toes forward were the hobby of some trainers, yet when Directum came out with short heels all round the observing trainer abandoned the projecting front toe with a rush and to day rarely sees much foot under a fast one. A horse can be gaited to a nicety at the instance of a shoer. Nowadays leading stables have their own shoers at salaries as high as \$2500 accompanying them around the circuits working under tents. A blacksmith made a set of shoes for Star Pointer that improved his speed from 2:02½ to 1:59½ and was engaged to travel with the great horse, giving up his shop and patronage, so it must have been profitable to him. While at his best no one shod the champion but this one man. He found that Star Pointer's sole was so thin and acute that a pad was necessary for him to stand upon while either forward foot was suspended. To shoe a great horse like Cresceus, The Abbot, Star Pointer, etc., several hours are usually required and the trainer scarcely takes his eyes off horse, shoe or farrier. It means much with engagements dependent on keeping a horse at its highest speed and free from lameness. —*Rural World*.

A correspondent sends us the following from a Maine journal: Will Wadsworth of Gilhertville owns a horse that his children drive to school mornings; and, upon arriving they all go in leaving the horse to go home alone, which he does without accident or loss of time. At night Mr. Wadsworth harnesses him to the wagon and the intelligent animal goes after the children. If he arrives before school is closed, he waits patiently at the door until it is out and his charges are all aboard and then conveys them home. The distance that the sagacious brute thus travels alone is more than a mile. Such an instance of intelligence and sagacity in an animal is rare and can hardly be accounted for on the theory of instinct alone.

The National Trotting Association will do a commendable thing if it will fine every association twenty-five cents for each and every entry that appears on its "list of entries," to which no breeding of any kind is added or a specified statement is made that the entry is of unknown breeding. Section 3 of Rule 6 is not observed in one case in ten around the majority of half-mile track circuits, and the consequence is numerous horses get into the list of standard performers of unknown breeding, in spite of the efforts of statistical compilers to obtain the necessary information.

It seems that Charles Marvin is entitled to much credit for the performance of the running horse Alana-Dale, that lowered the mile running record to 1:37.3-5 recently, for when the horse broke down after winning the Kentucky Derby last year he was turned over to the veteran reinsman, who treated him in the same manner that he would a trotter, with the result that the runner is now in good shape.

Harness Horses.

There is an innate love in civilized man for the good horse of the light harness class, and with increased wealth has culminated a broader demand for these useful and handsome equines. It is not the heavy harness types used to the family coach, but rather the lighter and fleet class used on the speedway and for public entertainment at race meetings, of which we write. The latter grade has been bred for over half a century specifically for a great flight of speed, intelligence, docility and beauty of conformation. The speedway performer and racing campaigner is the elite of the light harness world.

The American roadster is the creation of American genius in breeding and development. His ancestral inheritance traces back for several generations, and in purity and continuity of blood lines his breeding has reached a degree of standard excellence. The lineage of his ancestors are duly recorded in the American trotting register, giving him a standing among the pure-bred equine breeds. The speed and endurance of the American roadster are marvelous and his fame at home has created a broad demand for him in foreign lands. In sensational flights of speed he surpasses all rival breeds and holds the world's record for all distance performances. Exported to Europe he is penalized with a burdensome handicap when competing against competitors, surmounting all inequalities he has excelled at harness achievements abroad.

The home demand for handsome, speedy roadsters by wealthy fanciers has nearly depleted the supply, and the light harness breeding industry is everywhere being rehabilitated. Owners of choice road mares are sending them to the court of some aristocratic sire, with the expectancy that the resultant foal will develop into a fast track animal or a capital speedway performer. There are many well-bred young sires standing for service, and there are older stallions that have won their laurels by the public record of their progeny. There is nothing that succeeds like success, and for profit in immediate sale the foals from a sire with an established reputation will generally declare a better dividend than the off-spring of royal breeding yet unknown to fame. The reputation of owners of stallions will often assist to sell the get of their horses. The owner who is developing the produce of his stallion, exhibiting them at harness meeting, and who is actively interested in increasing the standard record list of his establishment, will directly add value to the foals of his horse bred by outside parties. As between the owner actively interested in pushing the reputation of his stallion's produce to the front or the owner of a sire who is indifferent as to the standing of his stock, the breeder from financial conditions should patronize the former owner's establishment. In the breeding for supreme qualities and extreme prices the breeder must receive the assistance of the progressive owner's reputation in making sales of his surplus, while in the latter instance he will have no encouragement outside of his individual effort. The policy of breeders should stimulate them not only to patronize the best roadster stallions, but the greatest sires heralded by progressive proprietors. There is an urgent demand at high prices for the produce of stallions, whose progeny are prominent at horse shows, speedways and harness race meetings. —*Driver's Journal*.

Roamer's Record.

At the Columbus (Ohio) meeting, August 2, 1902, the pacer Roamer by Moquette paced the second heat in the 2:11 class race in 2:05½, and it was so reported in several of the turf journals. When the Year Book appeared, however, Roamer was credited with a mile in 2:08½ in that heat, and his record of 2:06½, made at Buffalo a few days after, was given as his fastest mark. The National Trotting Association has been investigating the matter, however, and President Johnston has issued the following notice:

THE NATIONAL TROTTING ASSOCIATION,
OFFICE OF THE SECRETARY,
HARTFORD, CONN., July 16, 1903.
NOTICE.

To Whom It May Concern: It is evident, from the sworn statements of all of the Timers and two of the Judges submitted to me, that the record, announcement and publication of 2:08½ as the time made in the second heat of the 2:11 pace at Columbus, Ohio, during the Grand Circuit meeting of 1902, was an error, and that the time actually made in said heat by the horse Roamer, who won it, was 2:05½. It is therefore ordered that the said horse be credited with said record of 2:05½ in said race pending action of the Board of Review. P. F. JOHNSTON, Pres.

Secretary W. H. Smollinger, of Galesburg, Ill., is going to try to persuade Mr. Billings to send Lou Dillon 2:03½, there in August to try for the world's record over the track where the ex-queen, Alix 2:03½, broke it nine years ago.

Santa Rosa Stock Farm Sale.

The second and final closing out sale of the horses owned by the late Henry Pierce came off at the Occidental Horse Exchange on Wednesday of this week. There was a large crowd of buyers and the bidding quite spirited. Mr. William G. Layng, proprietor of the Exchange, announced that Sidney Dillon and the remaining high class horses on the Santa Rosa Farm would be sent east next winter to be sold at auction as there were no buyers in California to pay the price that the sire of Lou Dillon is worth. Mr. Layng also announced that the Santa Rosa Stock Farm was for sale.

The 43 sold brought a total of \$9595, an average of \$223 per head, which made the sale a very successful one. The highest price paid was \$500, which was paid by Mr. James Smith, the well known coal dealer of this city, for the mare Ladywell 2:16½ by Electioneer. Ladywell had a colt at foot by Sidney Dillon and has been bred to him again. This brought her price up to the figure given as she is seventeen years old and has not produced but one standard performer as yet, Local 2:19½ that took his mark as a three year old.

Old Lilly Stanley 2:17½, that has produced three with records better than 2:18 and has been a regular producer until last year, went for \$65. She is 22 years old, but is thought to be in foal to Sidney Dillon.

Transit of Venus, a full sister to Sidney Dillon and but ten years old, with a filly at foot by On Stanley 2:16½ and in foal to Frank S. Turner 2:28, was knocked down to White Hat McCarty for \$185. Had this mare's foal been by some popular stallion like McKinney she would have brought a much larger sum.

The sale on the whole was a very successful one, and the prices, while not large, were good value.

A summary of the sales is as follows:

- Bromwell, ch g, 1900, by Sidney Dillon-Silver Eye by Abbottsford, to James de la Montanya for \$375.
- Lady Agnes, b m, 1884, by Electioneer-Lady Lowell by St. Clair to Mr. Chase for \$55.
- Excelcus, br g, 1902, by Exioneer-Lady Agnes by Electioneer to O. A. Lowe for \$85.
- Paceta 2:26, b m, 1896, by Lone Pine-Ceta by Piedmont, J. H. Speedy for \$225.
- Lady Paceta, b f, 1902, by Marengo King-Paceta 2:26 by Lone Pine, to Henry Sanders for \$75.
- Crosscut, b f, 1901, by Beau B. 2:16½-Paceta 2:26, to Chas. N. Cappelman for \$110.
- Ben Russell, b g, 1900, by L. W. Russell-Paceta 2:26, to F. G. Eastman for \$290.
- Flora Allen, blk m, 1886, by Mambrino Wilkes-Lady Allen by Ethan Allen Jr., to K. G. Rasp for \$85.
- Caromel, blk f, 1901, by Beau B.-Flora Allen, to J. Newman for \$200.
- Bravo, ch g, 1900, by Beau B.-Lou Milton by Happy Medium, to W. J. Woodside for \$190.
- Tramper, ch g, 1896, by Sidney Dillon-Red Rose by Sultan, to S. S. Phillips for \$160.
- Molly Allen 2:20½, blk m, 1889, by Mambrino Wilkes-Lady Allen, J. E. McKiernan for \$120.
- Prince Allen, br g, 1902, by Marengo King-Molly Allen 2:20½, to H. Bussing for \$95.
- Caromolly, blk f, 1901, by Beau B. 2:16½-Molly Allee 2:20½, to J. Lennon for \$145.
- Barbara Allen, blk f, 1900, by Vallotta.30,840-Molly Allen 2:20½, to C. A. McDonald for \$200.
- Lisette, blk m, 1885, by Abdallah Wilkes 7,562-Musette by Startle, to Josie S. Frary for \$235.
- Bertha Bates, blk f, 1900, by Vallotta-Lisette, to J. W. Blower for \$315.
- Chestnut, ch g, 1901, by Inferna 2:24½-Lisette, to William Pierce for \$270.
- Grisette, ch f, 1902, by Marengo King 2:29½-Lisette, to Dr. Farnum for \$165.
- Columbiad, h g, 1901, by Sidney Dillon-Madonna by C. M. Clay Jr., to J. J. Justice for \$190.
- Indamont, br f, 1900, by Altamont 2:26-Myrtle 2:13½, to W. S. Corwin for \$365.
- Ladywell 2:16½, blk m, 1886, by Electioneer-Lady Lowell, to James Smith for \$500.
- Palo Belle, ch m, 1892, by Palo Alto-Belle Isle by Piedmont, to Mr. Price for \$230.
- Alto Russell, b g, 1899, by L. W. Russell-Palo Belle, to J. Layman for \$135.
- Bay gelding, 1898, full brother to Alto Russell, to W. E. Hyde for \$110.
- Rushbell, ch f 1902, by L. W. Russell-Palo Belle, to W. S. Corwin for \$165.
- Palo King, b c 1902, by Marengo King-Palo Belle, to Joes & Hogboom for \$310.
- Chester, ch g 1901, by Inferna 2:24½-Palo Belle, to J. Groom for \$85.
- Belle Isle, b m 1883, by Piedmont-Ida Belle by Hambletonian 10, to Mr. Woodside for \$125.
- Credit, ch f 1901, by Beau B 2:16½-Belle Isle, to J. H. Falken for \$140.
- Framhelle, b f 1902, by Fram 2:17½-Belle Isle, to Thos. Walsh for \$150.
- Lilly Stanley 2:17½, br m 1881, by Whippleton-Dolly McMann, to F. Gomet for \$65.
- Arawana B., b m 1900, by Sidney Dillon-Lilly Stanley 2:17½, to F. Gomet for \$250.
- Colonist, b g 1901, by Sidney Dillon-Lilly Stanley 2:17½, to D. Hutchinson for \$340.
- Easter Lilly, b f 1902, by Sidney Dillon-Lilly Stanley, to K. O'Grady for \$180.
- Lilly S., blk f 1896, by Direct 2:05½-Lilly Stanley 2:17½, to Dr. McLaughlin for \$385.
- Transit of Venus (sister to Sidney Dillon) by Sidney-Venus to Dan McCarty for \$185.
- Observer, b g 1902, by Marengo King-Transit of Venus, to William McDonald for \$100.
- Ascania, ch f 1900, by Sidney Dillon-Maud by Nutwood, to G. E. Stickle for \$200.
- Dillcara, ch o 1902, by Sidney Dillon-Guycara 2:18½

by Guy Wilkes, to Dr. C. E. Farnum for \$375.
 Aloha, ch o 1902, by Sidney Dillon-Adioo by Guy Wilkes, to F. W. Kelley for \$210.
 Biscara Russell, br g 1899, by L. W. Russell-Biscara by Director, to J. De la Montanya for \$475.
 Inferiota, b f 1900, by Inferna 2:24½-Carlotta Wilkes by Charley Wilkes, to Mr. Kahoe for \$400.

Our Cleveland Letter.

The meetings at Windsor, Ont., and Columbus, O., July 13th to 17th, were really curtain raisers for the Grand Circuit which opens at Detroit on July 20th. That California will have a strooger representation than ever before on the big circuit is evidenced by the splendid showing made by the various trotters and pacers from the Pacific Coast at the Windsor and Columbus meetings last week, while Lou Dillon, a product of California, being a daughter of Sidney Dillon, has trotted to a wagon record of 2:04½ over the Cleveland track, and on the 11th inst. reduced the world's record for trotting mares to 2:03½, driven to sulky by Millard F. Saoders. When C. K. G. Billings paid \$12,500 for Lou Dillon at the dispersal sale of the Santa Rosa Stock Farm's campaign stable held here in May, the ever present "knocker" loudly and persistently proclaimed the fact that the handsome little chestnut mare would prove too unsteady and high strung for consistent work and was sure to prove a disappointment. Had it not been for the general impression that prevailed that Lou Dillon was too erratic and unreliable for racing purposes, she would without a doubt have brought twice the amount Mr. Billings paid for her. As it is, within less than two months she has won her way into prominence and is now generally acknowledged a prospective world's champion. The remarkable manner in which she developed speed has been marvelous and it is now announced that on July 29th, during the Grand Circuit meeting in Cleveland, she will attempt to lower her own record of 2:03½, and also endeavor to set a new mark for trotters of any sex. After this effort she will be given a let-up and then prepared for another tilt against the watch at Mr. Billings' Memphis track in October. Millard Sanders gives Lou Dillon all of her work and feels confident that if favored with proper weather and track conditions the daughter of Sidney Dillon is certain to wear the championship crown before the close of the season. An offer of \$50,000, from Eastern parties, was refused for the mare a few days since.

Mr. Sanders brought with him from California the bay trotting mare Robizola by Robin, dam Myrtle by Nutwood, owned by Dr. J. N. Clark of Santa Rosa, Cal. This mare soon attracted attention by her fast work, and a nomination in the \$10,000 Merchants & Manufacturers' Stake at Detroit, one of the classic events of the harness turf, was secured for her, after she has shown a mile in 2:11 in her work here. On July 13th she was started in the 2:30 trot at Columbus, O., losing the first heat and winning the next two in 2:15½ and 2:17½, all events being on the two in three plan. On the following days she won the 2:17 trot in 2:13½ and 2:16. She was started for the third time on July 17th, winning in 2:12½ and 2:16½.

Monroe Salisbury opened the season at Windsor, Ont., last week, Ben Walker doing the driving for the stable. The trotter Monte Carlo by Mendocino won the 2:10 trot in the fastest time of the season, 2:10½, 2:08½, 2:08½, lowerlog his record from 2:09½. During the same meeting the California trotter Monroe by Seymour Wilkes won second money in the 2:30 trot, fastest heat in 2:14½, while the much talked of pacer Mush by Lottery Ticket had to be content with third money in his race. This hig sidewheeler is not in as good form as he was several weeks ago, hut a race or two is expected to get him on edge again, as he beat 2:10 handily in his work before being shipped to Windsor. Monte Carlo promises to prove one of the fastest trotters being raced this season. Trilby Direct by Direct and the pacer Diablita by Diablo are also in this stable.

The green trotting stallion Bonnie Russell, by Conifer, entered in the M. & M. and many other stakes by Emma Isabel Howard, of Los Angeles, Cal., was trained here for six weeks by S. E. Kent, and showed a mile in 2:12 before being shipped to Windsor. In his race at that place last week he won third money, being third each heat in 2:10½, 2:13½ and 2:13, the winner, the Texas gelding Wainscott by Alcy Wilkes, apparently being one of the most promising green trotters now in sight. Wainscott was sold to the well known eastern horseman J. Y. Gatecomb for \$10,000, and may be the favorite in the betting for the M. & M. at Detroit.

Another California horse that has been getting all of his work at Cleveland is the pacing gelding Kelly Briggs 2:10½ by Bayswater Wilkes, that forced Miss Logan out in fast time last fall. Kelly Brilgs is owned by F. E. Wright, of Sacramento, Cal., who is here with his wife, and will spend most of the summer

in the east. Kelly Briggs was 7-4-3, in 2:08½, 2:09½, 2:08½, at Windsor, there being ten starters. He will race at Detroit and Cleveland.

J. M. Nelson, of Alameda, Cal., is training a dozen head at our track, including several California animals. The pacing mare China Maid by McKinney 2:11½, recently worked a mile in 2:12, last half in 1:02½, while the big gelding Richard S. by Grover Clay 2:23½, has beaten 2:15, and has trotted a quarter in 31 seconds.

William Hendricksen, of San Francisco, is getting the trotting stallion Clay S. 2:13½, and a brother to that horse, ready for the later meetings on the Grand Circuit. Pat Gannon is doing the training for Mr. Hendricksen.

The mare Italia 2:23½ by Zombro 2:11, purchased in California in the spring of 1902 by H. K. Devereux, owner of John A. McKerron 2:05½, won a splendid wagon race at our last matinee, trotting the second heat in 2:15½. McKerron is rapidly getting into condition; trotting a mile in 2:11 last week, with the final quarter in 31 seconds, in the face of a strong wind.

Quite a few California bred trotters and pacers are seen at the matinees of the famous Gentlemen's Driving Club of Cleveland, including the following: Charlie Mac 2:07½ by McKinney, John A. McKerron 2:05½ by Nutwood Wilkes, Italia 2:15½ by Zombro, Lou Dillon 2:03½ by Sidney Dillon, and Sir Albert S. 2:03½, by Diablo

Dolly Dillon 2:07 by Sidney Dillon and Dr. Book 2:10 by McKinney, both hailing from California, are now prominent wagon trotters at the Pittsburg, Pa., matinees. At the last matinee held by the Pittsburg club Dolly Dillon won in straight heats, taking a wagon record of 2:14. Dr. Book also pulled down a blue ribbon, fastest heat 2:16½.

GEO. A. SCHNEIDER.

Cleveland, O., July 19, 1903.

Answers to Correspondents.

Reader, Oakland—What is the breeding of Lady Crum?

Answer—Lady Crum was said to be by Brown's Bellfounder a son of imported Bellfounder, sire of the dam of Hambletonian 10. Lady Crum was brought to California in an early day by Samuel Krim or Krum and nothing further is known of her pedigree. She was bred to Geo. M. Patchen, Jr. and produced Alexander 490, the sire of Alexander Button 2:26½ and others. She was also bred to Whipples Hambletonian and produced Gen. Dana 1757, sire of Volunteer 2:27.

Now that Lou Dillon has taken the world's record for mares those who had to do with her early training are beginning to differ as to some of the particulars thereof. The interesting history of the little mare's early life as related by George Ramage, who handled her as a two and three year old at Santa Rosa, is disputed somewhat by Frank Turner, superintendent of the Santa Rosa Stock Farm, who has given the "True Story of her life" to a newspaper scribe and it will be published shortly. It will be read with great interest and no matter how many trainers claim to have given the dainty daughter of Sidoey Dillon her first lessons, there will be no disputing the facts that Santa Rosa Stock Farm bred, and Millard Sanders educated and drove to the world's record the champion trotting mare of the world.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

Warranted to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LA WRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

spect from numerous artificial lures, such as spoon hooks, phantom minnows and the like. Again, when using either the minnow or frog as a casting bait, it will be found that with the smaller frog or minnow, the best results will be had; thus it will be seen that the most essential in this sport is to be able to cast a light and delicate bait perfectly.

Times was when the rod-makers could not be induced to make a bait-casting rod less than eight feet three inches in length, claiming that in constructing a rod of shorter length, the strength, durability and action would be sacrificed. Not so at present, however, for of necessity (at least in the West), the six or six and one-half foot rod has come into general use among expert casters, and has proven beyond dispute that the old-timers were wrong.

A very desirable rod of this length is now in use; it is made of Esthabara wood, with shortened and thick German silver ferrules and shortened reel-seat, thus throwing all the wood construction possible into the rod. A rod of this character, being so short and weighing hardly five ounces, can be handled at any angle desired and in the most complicated surroundings.

I have a rod of this wood weighing four and one-half ounces, six feet four inches in length, and have tested it in many stubbhorn fights with game fish to its utmost capacity, and it has now my entire confidence and admiration. It is invincible, and I should not care to admit that it divides honors with any other wood that grows.

Regarding the reel, too much care cannot be exercised in the selection of this implement of the bait-caster's outfit, if delicacy, accuracy and distance are to be considered in casting light baits. The old-style multiplier has been superseded by the quadruple compensator, and it is conceded by experts to be the only desirable reel to use.

No ordinary reel has the power or strength necessary to withstand the enormous task which the bait-caster's reel is called upon to perform in casting and retrieving the bait, and like the rod, it must be especially adapted for its purpose.

The best reel has steel pivot (conical shape) bearings, which reduce the friction to a minimum, a thumbscrew adjustment making it possible for the reel to be adjusted so it will revolve quietly, run smoothly and start with the slightest effort. A screwdriver and a small can of oil should always be included in the kit, and the reel oiled not less than once a day. A forty-yard reel is the best size to mate with the rod described, being light in weight; lightness of tackle being the chief object of the expert angler. The check and drag with which most reels are provided should never be utilized in making a cast, the thumb being the cardinal feature of success in this sport. The check, if on the rear plate, is a practical idea to prevent the reel from revolving when not in use. The drag in bait-casting should be an unknown quantity, as its use, if persisted in, will ruin any bait-casting reel manufactured. I have removed drags from my reels, believing them to be not only nonsensical, but a detriment that should be abolished.

As with the rod and reel, the line that is desirable for this sport has a separate individuality which adapts it to the requirements of the caster. The main feature of its manufacture is being braided nearly square and becoming perfectly round in use instead of flat, the last-named being the worst feature with most braided silk lines when used for casting. A line with a breaking tension of six pounds is sufficiently heavy to compete with the heaviest of fish if properly handled, for the finer the line the better it will cast when using a light bait. Under no circumstances should the bait-casting line have an enamelled or water-proof dressing, as lines of that description harm their casting or spooling qualities. In spooling the line, special attention should be paid not to overlap, as disastrous results will surely follow. Consequently, when retrieving the line, grasp the rod with the fingers directly under the reel, allowing the upper rim of the reel to nestle in the palm of the hand, and use the thumb to lay the line on the reel-spool, and never attempt to cast with the line spooled imperfectly. By a little practice the line can be laid perfectly and very rapidly. Thumbing the line when casting is a feature that must never be belittled, and under no circumstances should the angler make a cast without gently dragging the line with his thumb while paying off the reel-spool.

The reel in bait-casting belongs on the top or upper side of the rod, and not on the lower side as in fly-casting. This arrangement simplifies the matter of controlling the line with the thumb. The angler, by being particular when making his initial attempts at thumbing the reel, will soon do it instinctively; and, when acquired, it is done unthinkingly, as the mind, in this sport, should not be on the reel, but have other matters of pleasing importance to occupy it. Thumbing the line as it pays off the reel, and spooling it perfectly in retrieving it, should never be neglected; this rule must always be followed to insure good results.

Baits that can be used in this sport are practically unlimited, as any bait ever known to have been taken by a fish can be utilized. If fishing for bass, a #3 Skinner spoon is one of the best killing baits that can be used. A specially constructed spoon, with a hinged device which allows the spoon to lie back against the line in making a cast, thereby offering no air resistance, is manufactured, and is entirely practical. The phantom and quill minnows are also lures worthy of the bait-caster's attention. The invincible live minnow and the deluding influence of the live frog, when delicately dropped from a distance of about one hundred feet, by the skillful bait-caster, in the immediate vicinity of a game fish, are too well known to need any explanations or comments. It will therefore certainly be admitted that the bait-caster is not limited in the item of bait.

Any bait, whether artificial or natural, that shows a tendency to kink or twist the line in retrieving should be overcome by the use of swivels, as a kinked line will not cast properly, and will lead one into the most annoying complications.

Any good hollow-point hook is desirable in this sport, the snell gut hook probably taking precedence.

The methods of bait-casting, when understood and practiced, with proper tackle, are very simple and easy of accomplishment.

The rod, reel and line, together with a compact landing net, make up the main features of the outfit. The landing net should be fitted with a twenty-four-inch minnow dip net, which can be used in catching frogs, as well as in landing the fish. A small variety of spoons, phantom and quill minnows, a few hooks, swivels, connecting links and split shot make up the balance of this very complete and interesting outfit.

There are in casting the bait three styles, known as the left to right, right to left, and forward cast. After mastering these, the other details that may be necessary in casting can be easily learned. In starting the right to left cast, the tip of the rod should be held well up, and the angler should rely on the spring of the rod to quietly and delicately throw the bait. This spring can be produced by a slight movement of the forearm and wrist only. Arm force does not aid the bait-caster with a rod designed to properly cast a bait, but detracts from the work the rod is supposed to perform.

The rod in the cast is held at a side angle of about 45 degrees, with the elbow nearly touching the body. As the rod and bait rise on the first of the circle, make sure to take advantage of the upward spring of the rod and let the bait go, for by holding onto the line until the tip of the rod has reached the 45 degree angle on the opposite side, the bait will be thrown down instead of up and forward. Particular attention must be paid to this point, as it has proven the stumbling block to many tyros in the art.

The left to right cast may seem more difficult to master, but there is much of fancy in this, for again the well constructed rod helps out. The same principle is used as in the right to left cast, the only difference being a back-hand motion. The forward cast is used more in wading than from a boat, and the bait is started from the rear, with the rod pointing over the shoulder at the same angle as is used in the other two casts.

Casting should be practiced with the left as well as the right hand, and anglers will find it a very desirable acquisition, as one rests the other; furthermore, being able to cast with the right and reel with the left, or vice versa, greatly assists the angler, as the rod does not have to be changed from hand to hand in retrieving the line. When casting from a boat never stand up, as it establishes a bad precedent and exposes one to the quick perceptions of game fish.

Taken as a whole, this scientific method of taking game fish becomes a most delightful auxiliary to an outing, and is in every respect worthy of the exalted position it now holds among the many devotees of the true art of modern angling.

A Trio of Panthers.

A hot day in early March—for we do get it hot in some parts of India even so soon. My white tents stand in the grateful shade of a group of mango trees, whose blossoms are just beginning to turn into fruit. At the well close by the patient, laborious bullocks tramp backwards and forwards, drawing the water that runs in a clear, crystal stream through the irrigation channel to fertilize the adjacent patch of cultivation whose green hue presents such a contrast to the surrounding arid waste. Nature slumbers. Even the cicadas are at rest, and the crow which sits near with hawk agape utters no sound. Only in the acacia tree close at hand a pair of doves coo tranquilly over their nest.

I had been some days looking for panthers, and from signs to be read in the book of Nature—on the dust of the paths and the margins of the pools that lay in the shade of the alnas—had come to the conclusion that two of these animals were abroad. One night two of my goats were killed where they were picketed on the border of thick jungle with an interval of about a mile between them. The tracks appeared to show this to be the murderous work of two beasts of prey. We proceeded to heat the farther off of the two localities, beyond which the thick smoke of a jungle fire was rising into the heated atmosphere amid the great birds which circled overhead. We were proceeding to take up our places in the beat when the fire approached with such rapidity across the dry grass that we were in danger of being overwhelmed by it, and had to run for our lives, in company with a hyena and a sounder of swine which were also making their escape from the flames. This spoilt all hope of success in that direction—in fact, what remained of the goat was reduced to cinders, and doubtless the panther had to fly for his life also.

The remains of the other goat lay in a deep ravine, thickly clad with bush jungle. A beat was soon organized, and a great blue bull came trotting past, but nothing else appeared with the exception of a few peafowl and painted partridges. The ground revealed no tracks of egress, and it was impossible to say whether the panther had gone. I concluded that the same animal had killed the two goats, and had lain up by the other one until driven off by the forest fire, so tied up another goat in the same spot. That night the bait was slain and devoured, and a beat next day produced nothing. It was unaccountable. The jungle was sufficiently dense to afford cover for a tiger, and the beat had been well and carefully carried out, nor could any porcupine holes be discovered in the dug out recesses of which the beast might have taken refuge. The surrounding country was then driven, but with no result other than pige and peafowl, which were plentiful. In the meantime the villagers in a different direction had been complaining that a panther had been prowling round their village for several

nights, roaring for hours together, so that their hearts turned to water as they lay trembling in their huts. An examination of the ground revealed pugs which proved the truth of a portion of the story, even allowing for Oriental exaggerations regarding the peregrinations of this mysterious animal. For mysterious it was, as it did not deign even to kill one of the five goats which were picketed out for its special delectation. Much of the jungle on the hills near the hamlet was beaten, but nothing seen save innumerable peafowl and a pig, which was shot for the Brinjaras, a race peculiarly fond of the flesh of the unclean beast.

Meanwhile we had good sport with antelope, gazelle and other small game which abounded in the vicinity. One day I broke the leg of a fine black buck, the bullet striking him very low down. The beast made off at score, and would undoubtedly have escaped, but the good Red Dog was let loose, and after an exciting chase of nearly a mile he pulled the quarry down and held it until the breathless following of men arrived on the scene and despatched the unfortunate creature. Next day a fine blue bull was shot, but only brought to bag after a race of three miles over the hills.

Next morning intelligence arrived that a donkey had been killed and partially devoured during the night close to a village a couple of miles from camp. At the same time the Brinjaras reported that they had seen, in the early morning, and marked down a panther three miles off in another direction. It was decided to deal with the latter first, but the beats that took place between 11 A. M. and 4 P. M. produced only the usual porkers and peafowl, although one man declared he had seen a large panther on the side of a hill that we were driving.

I then decided to sit up over the remains of the donkey as it was too late to beat the jungle in the vicinity. The night would be pitch dark, thus anything not seen against the skyline would be invisible. So a hole was dug in the ground near the unsavory carcass and covered over with branches, and in this I took up my position just as it was getting dusk. Not a very sporting method of shooting, but I had to leave early next morning, so no other plan could be devised. The three or four men with me, having seen me safely ensconced, left hurriedly for the shelter of their huts. They had scarcely gone when, like a ghost from the gloom of night, a great panther appeared within three or four yards, its head and massive neck sharply outlined against the starlit sky. A rapid shot from my Winchester was followed by a roar, a sound of struggling on the ground, and some deep drawn groans, and then all was silent. Five minutes elapsed, when another panther appeared against the skyline and met with a similar fate, uttering no sound and making no movement after the shot was fired. Should I whistle for the men? Surely there were no more panthers, but there was some doubt whether the last one was dead, or even hit. I cogitated for a quarter of an hour; my position was cramped and uncomfortable. I raised the whistle to my lips. But at that moment the carcass of the donkey moved. Something was tugging at it. I grasped my rifle and peered into the murky gloom, perhaps making some slight movement, for the third panther raised his head and appeared to be gazing intently, with ears cocked, in my direction. A flash of flame from my ambush and the beast fell with a heavy groan and died straightway. When the men came up the trio of panthers were found dead, two of them lying one upon the other. They were an old female with two cubs of the same sex nearly as large as herself. The old one had in her dying agony seized the donkey in her teeth, and her stiffened jaws were closed so tight that the piece of flesh had to remain in them, being cut away with a knife, as they could not be forced open.—*The Asian.*

Coming Events.

Rod.

- April 1-Aug. 15—Close season for lobsters and crawfish.
- April 1-Nov. 1—Trout season open.
- April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steel-head in tidewater.
- May 1-Sept. 1—Close season for shrimp.
- July 1-Jan. 1—Open season for black bass.
- Sept. 1-Nov. 1—Close season for crabs.
- Nov. 15-Sept. 10—Season open for taking salmon above tide water.
- Aug. 1—Saturday Contest No. 3 Class series. Stow lake, 2:30 p.m.
- Aug. 1—Sunday Contest No. 3. Class series. Stow lake, 10 a.m.

Gun

- July 1-Feb. 15—Dove season open.
- July 15-Nov. 1—Deer season open.
- Aug. 16—Union Gun Club. Blue rocks. Ingleside.
- July 26—Millwood Gun Club. Blue rocks. Mill Station.
- July 26—California Wing Club. Live birds. Ingleside.
- Aug. 2—College City Gun Club. Blue rocks. Berkeley.
- Aug. 9—Golden Gate Gun Club. Blue rocks. Ingleside.
- Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.
- Oct. 15-Feb. 15—Open season for quail, ducks, etc.

Bench Shows.

- Oct. 6, 7, 8, 9—Danbury Agricultural Society. Danbury, Conn. John W. Bacon, Treasurer.
- Nov. 3, 4, 5, 6—Ladies Kennel Association of America. Madison Square Garden, New York. Mrs. A. G. Evans, Hon. Secretary, Westbury, L. I.

Field Trials.

- Aug. 13—Iowa Field Trial Association. 6th annual trials.
- Aug. 18—Nebraska Field Trial Association. O'Neil, Neb. H. H. McCarthy, Secretary.

Outings Made Enjoyable.

When you go to the country or the mountains, dress your feet properly. Ill fitting and improper dress will spoil your pleasure. The Skinner Co., 801 Market St., have made to special patterns footwear for men and women that is right for all kinds of outdoor work. The prices will suit your purse as well as the shoes fit your feet. Call and see them. The Self-Basting Broiler is one of the New Camp Comforts. It sells for 50 cents, and Skinner has it—Don't fail to see it, if you are going camping or hunting during vacation.

THE FARM.

Feeding Dairy Cows.

In live stock production we may trace the changing of matter from the soil through the plant to the animal. In this industry we should bear in mind that great foundation truth that matter, however it may be changed, cannot be destroyed. The plant secures its nourishment from the soil; the animal from the plant. If the dairy cow, for example, obtains a sufficient supply of the proper kinds of foods she makes the greatest amount of milk and butter that she is individually capable of making. If she does not receive proper feeding her capacity and value are lowered, for she cannot continue to make milk and butter fat unless the proper materials are furnished her.

Now the materials necessary to the life of our animals may be divided into four classes, viz: water, ash, protein and carbohydrates. Good water should always be supplied in abundance, and the ash in the feeds given our dairy cattle, except common table salt, which we give separately, is apparently sufficient for all needs. The proteins and carbohydrates exist in varying proportions in all our cattle foods. Protein goes especially toward building up the animal structure, while the carbohydrates go to provide heat and energy. Although the proportions fed may vary with different types and classes of animals, yet they are both necessary. If the digestible protein and carbohydrates are in the right proportion for the best result from the animal, the ration is said to be balanced; if the protein is in excess we have a narrow ration; if the carbohydrates are in excess, then a wide ration.

Examples of feeds rich in protein are clovers, peas, beans, alfalfa, cottonseed, gluten and bran; of those rich in carbohydrates, corn, corn-fodder, sorghum and timothy. With human foods, lean meat is an example of protein and bread of carbohydrates. Now we cannot live on lean meat alone, neither can we live by bread alone; hence we combine the two. To a certain extent our taste will guide us in the selection of a ration; but with animals it is different, for they must eat what we place before them.

In estimating a ration we take the digestible protein and carbohydrates in the feed from a table that has been worked out by actual experiment. The ratio between the protein and carbohydrates in the given food is called the nutritive ratio of that food. The protein in the food contains nitrogen, while the carbohydrates contain oils, starches and sugars. Space will not permit an extended discussion of the method of determining the nutritive ratio of food or the estimation of rations. The feeder is advised, however, to make a study of this subject from the various publications of the United States department of agriculture, the experiment stations, the agricultural press, and the excellent books on the subject of feeding that may be obtained through any bookseller.

Knowing the needs of the animal, the digestibility of the feeds and the ratio of the ration, we can in a measure use our feeds in such a manner as to obtain the greatest gains per pound of materials fed. But it should be borne in mind that feeding is not an exact science, and we must apply the common sense teachings of observation. We find a great difference in the individual animals, an inherited tendency that we cannot entirely overcome. We notice that with a certain amount of food a cow will produce a large amount of milk and butter at a profit, while with the same amount of feed another animal will not yield enough milk and butter to pay for the food consumed. Again it will

some times pay to feed one cow a high grain ration, while another animal will be more profitable on small grain ration.

These points the intelligent dairyman will discover. In the close study of the ratio of the ration, however, he will avoid other losses; for example, in feeding corn alone, which is a wide ration for a dairy cow, in order to get the necessary protein, she will consume more carbohydrates than she needs, resulting in the excess being lost in the manure, while in feeding a too narrow ration, like bran, she may consume larger quantities of protein than will prove profitable, resulting in the waste of the excess.

Our cattle require materials for making bone, flesh, horn, hair, milk, etc. Besides these materials, food is required for work or energy and for supplying heat. Although the animal may be at rest, there is needed a certain expenditure of food in supplying the action of the heart, lungs, etc., and heat is generated in the animal body only by the consumption of food. Young animals require a larger proportion of protein than fattening animals, for their bodies are increasing rapidly and need building material. Likewise dairy cows, when making large amounts of milk, daily require a great proportion of protein in the ration. Again the carbohydrate is largely the fuel of the food and is likewise the greater source of the fat stored up in the body of the fattening animal, as well as the fat found in the milk.

There are now a great many feeds on the market and the number is constantly increasing. These consist not only of the feeds produced on the farm, but by-products of grist mills, hominy mills, starch mills, oil mills, packing houses, etc. The cost and value will vary somewhat with the locality. The dairyman who makes a study of his business and knows the principles underlying getting the most milk and butter for the least cost will often be able to use these by-products, and sell a crop from his farm for more money.—By D. W. May, in Bulletin No. 106, Kentucky Experiment Station.

Clean Dairy Utensils.

In a new bulletin from the Illinois Experiment Station Professor Wilber J. Frazer says: "One of the first essentials in keeping dairy utensils clean is to have a clean surface. This fact should be kept in mind when purchasing, and if all seams are not flushed smooth with solder this should be done. As soon as the tin is worn off on the inside, exposing the iron, the utensils should be discarded, for they cannot be properly cleaned when in this condition. All utensils should be washed as soon as possible after using, since the longer the milk remains on them the harder they will be to clean. They should first be rinsed with lukewarm water to remove the milk, then washed with hot water and soap or some alkali and scalded with boiling water, or with steam if it is available. Cans should never be tightly closed when not in use, and should be placed on a rack in an inverted position, so that the dust cannot blow into them. If possible, they should be placed where the sun will shine on them, as that will do much towards keeping them pure and sweet."

We do not know whence come some of the old sayings, known on almost every farm. A new one, to the writer, has appeared: "The rain always holds up in the evening long enough to do the milking." This is not always true, but it will do to live in hope of. But it is safer to have sheds.

It has been found that a medium-sized Jersey cow will eat less and give more milk in proportion to her size than a larger one. The larger breeds have a tendency to put on fat, and therefore are not as profitable as one that goes mostly to milk.

New Cattle Era Coming.

Is the country facing a shortage in beef cattle and a consequent return of prices approaching those of the memorable summer of 1902? There are phases of the trade that will point an affirmative answer to the above question. While feeder prices for the last six months have been dangerously close to the selling value of fat cattle, there is a suggestion that it has been short of suitable young cattle and not manipulation of speculators nor bidding prices up on themselves by farmers and inexperienced feeders that has brought about this condition.

In conversation with an old-time commission man a few days ago, a *Live Stock World* man asked the above question, and the answer of this man, who has made as much of a success of cattle feeding as he has of the commission business, was, in substance, that the country is surely facing an era of new conditions and higher prices in cattledom.

"Take for instance," said this man, "our own trade; we find that whereas a few years ago Wisconsin furnished enormous supplies of feeding cattle to this market. Of late years that section has switched and furnishes comparatively few stock cattle. Wisconsin farmers have gone into dairying. There is some attention being paid to breeding improved lines of beef cattle, but the general run of farmers are running to dairy stock and are sending their calves to market. They have found that they can realize almost as much out of a 120-pound veal calf as they can by holding the animal until he is a year old and then putting him on the stocker market. Other northern sections of the country that have been relied upon to furnish large numbers of young cattle to corn belt feed lots are doing the same thing, and it is being felt in a shortage of feeders. We have orders for fully 3000 feeding cattle; other commission houses are also carrying large orders they cannot fill. Prices are too high and the cattle are not in sight. All of which points to an era of higher prices not far ahead for beef cattle."

It is just possible that the dawn of this higher era is not far distant. Studious men of the trade have within the last ten days gone on record with a prediction that good, fat, corn-fed cattle will sell at \$6 before the first of August.—*Chicago Live Stock World*.

A Good Silo.

We have a round silo in use that is in many respects the best one I know, says a correspondent of *Rural New Yorker*. The staves we had sawed two and three-quarters inches thick and six inches wide. This extra thickness has nearly prevented freezing. The width is about right. They are beveled, grooved and tongued. If I could not get the stuff near hand prepared, I would buy it of some silo dealer, just the plain staves jointed, beveled and grooved without hoops, doors or roof. The hoops I would get in steel wire type, or more commonly known as "guy wire," half an inch in diameter. The cost will not be greater and the result more satisfactory, easy to put on as a clothesline, no danger of breaking in cold weather. In fact, they are ideal. They can be fastened with a turn buckle or common nuts through a four-inch scantling. The doors I would put on the outside of silo, hanging them with heavy hinges bolted on.

The hawks and the owls are quite generally condemned for the chicken they kill, and rightfully; but were they at the same time credited with the mice, rats and other destructive farm pests which they kill and eat, the ledger would far overbalance and they would be seen to be the farmer's very valuable friend, despite their occasional depredations in the chicken yard.

Advantages of Silage.

Professor Eckles says in order to secure the best results in feeding dairy cows it is generally considered that some food having that quality known as succulence is necessary. When on pasture the cow, as a rule, does her best, and to make the best of winter conditions something must be provided that has some of the properties of grass. Two methods are used to supply this necessary quality—by the use of root crops, by the use of silage. When attention is given to winter dairying silage should by all means be provided, as it is undoubtedly the cheapest food for this purpose.

There is no way by which the corn crop can be used to better advantage than by putting it in a silo. Probably more feeding value can be secured from an acre of corn put into the silo than from an equal area utilized in any other way. Silo is always relished by cows and furnishes a large part of the roughness required in a cheap and palatable form. The number of silos in use is constantly increasing, especially in the dairy sections. Silage is also growing in favor as a summer feed to supplement pastures.

The advantages of silage as compared with field cured fodder have been summed up by Professor H. J. Waters as follows:

"The practice of preserving the green corn plant in the silo has grown rapidly in favor, especially with the dairy farmer. It commends itself on the ground that—

"First.—A large quantity of material may be stored in a comparatively small space.

"Second.—Green and succulent food is thereby provided for the winter months.

"Third.—The green plant is more palatable, the coarser parts of the stalk being much more completely consumed when made into silage.

"Fourth.—The harvesting is done during the pleasant weather in the early fall, and the drudgery of handling dry stover in winter is obviated.

"Fifth.—It is cheaper on the whole than to be at the expense of husking and grinding the ears and cutting and shredding the stover. It does not appear to affect the digestibility of the material favorably or unfavorably."

An Illinois swine breeder says that in weaning pigs the usual method is to take the pigs away from the sow; but the method is wrong, as the pigs are compelled to endure a double grief—being taken away from their mother and away from the place where they are accustomed. The effect often is seen in the stoppage of all growth for a few days. The pigs should be left in the pen and the sow removed. She can stand the change better than the pigs. If left in the pens the pigs will continue to grow right along.—*American Swine Herd*.

Modern harvesting machines are now in use by farmers of 29 different nations of the earth. They are mostly American types or embody American patents. They are estimated to represent in their ability to harvest crops the labor of 20,000,000 men; and yet the papers are full of the difficulty the farmers have in obtaining hands.

The high grade butter cow will not only give more and better butter than the cow of no breed, but she will make it at less cost; that is, she will convert more of a given amount of food into butter and less into beef, and having a smaller carcass to support, the food required in that direction will be less.

Said an exporter: "Range sheep have not been coming good enough for our purpose this year so far. To go across the Atlantic sheep must not only be strictly fat, but the flesh must be solid in order that the stock may stand the journey and arrive at its destination in good shape."

Preserving Eggs.

Continually are we requested to inform our readers as to how they may preserve eggs from one season to another. It should be perfectly well understood that no matter how we store or keep them, eggs are never so good again as when fresh-laid. With this thoroughly well understood, we shall tell what we know about the methods employed for keeping eggs.

Of all methods, cold storage is by far the best. To succeed with eggs in cold storage, never try to keep those that have been laid in hot weather. If the average weather is above seventy degrees, or if the temperature at any time has gone to eighty degrees, or above, eggs will not keep the best in cold storage. We see considerable in print as to eggs being put into cold storage all summer to compete with fresh-laid eggs in winter, but poor success comes from storing eggs that are laid in hot weather, no matter what process or method is made use of. Remember that non-fertile eggs will keep better than will those that have been fertilized, and that one or more had eggs in a package that is stored may spoil the whole case.

Eggs may be placed in salt or wheat-bran, or in any material that has no tendency to heat. Eggs may be nicely kept in stone jars if packed in salt so as to keep out all the air. If the eggs are packed the same day they are laid, and as soon as they are free from animal heat, and the package kept in a cool cellar that will not freeze, the eggs may be kept fairly well for three or four months. The French cover them up in hutter, or coat them with beeswax or varnish. This, of course, is only valuable for keeping out the air, and to benefit at all must be thoroughly done and the eggs kept in a cool place.

LIMED EGGS.

About the best solution for keeping eggs is made from or by using lime. Take of stone lime, like builders use, one and one-half pounds. Measure two full gallons of water; pour a little of this water on the lime, that has been put into a store jar. Keep adding a little of the water to the lime until well slacked (air-slacked lime is not so good). When thoroughly slacked, pour over the lime the balance of the two gallons of water. Add to this ten or twelve ounces of salt and two or three ounces of cream of tartar. Stir thoroughly three or four times a day for four days; allow to settle, and pour off the clear liquid and imbed fresh-laid eggs in this liquid. It is well to have a surplus jar of the liquor ready to fill in when needed. Keep eggs so stored or packed in a cool place. When taken from the liquor it is well to rinse them in clean water for look's sake, if nothing more; but to do any good it must be done as quickly as possible after taking from the lime mixture. In using all these preparations, remember that sterile eggs will keep by far the best.

TO KEEP EGGS FOR WINTER USE.

Pour a full gallon of boiling water over two quarts of quick-lime and half a pound of salt. When cold, mix into this an ounce of cream of tartar. The day following, put in the eggs. After the lime has been stirred well into the boiling water, a large part of it will settle at the bottom of the vessel, on which the eggs will remain. Keep them covered with the liquor and they will keep for two years.—S. J. Hale.

WATER GLASS.

The nicest way to preserve eggs for a family is to get a quart of sodium silicate (water glass) and add to it ten quarts of water that has been boiled. Put it in any convenient vessel, and as fast as your eggs are gathered drop them into it. They are not so good after they are a day or more old. When this liquid is filled add more of it that is the same as the other—one to ten. Be careful to have your vessel large enough to hold as many eggs as you care to preserve. It will cer-

tainly keep them as fresh as the day they are laid if the directions are followed.—*Dr. E. M. Sante.*

In the use of this preparation, when the eggs are taken from the solution, there is a coating on them like glass. When boiled these small particles are likely to fly into the egg-cup when the shell is broken. To prevent this, wash the eggs in clean water as soon as they come from the liquid and before the solution can dry. This must be done very quickly as it dries very fast.—*The Feather.*

Some Ideas About Breeding Dairy Cattle.

There are two theories before the world on this question: The theory of breeding for specific purpose and type, the theory of breeding for dual purpose and type.

The first theory has behind it the clear, specific experience of those who have established dairy breeds of cattle, such for instance as the Jerseys and Guernseys as advanced butter breeds, giving milk of great richness in butter fat, and the Ayrshires and Holsteins giving milk in larger quantity and of less per cent of fat. Commenting upon the dual purpose agitation, *Hoard's Dairyman* proceeds to say:

These four breeds are called dairy bred cattle because in the main their breeders hold to the idea and purpose of making butter in the one case and milk in the other, the main object of their breeding. In other words, these four breeds of cattle are bred to a specific purpose and to a certain extent to a specific type or form, the so-called dairy form.

Nature has satisfied the purpose of these breeders by granting them increasing development of dairy capacity in their cattle, just as long as they have held steadily to their specific purpose. She has in every case punished them also, sooner or later, with loss of dairy capacity, as well as loss of dairy heredity and prepotency, whenever they have departed from the line of breeding for these specific purposes.

In this way, and only in this way, have we been enabled to establish breeds of cattle of specific dairy prepotency and the power of constant development in dairy productiveness.

Nature at her best is full of confusing variation. Bred as closely as we may to a specific purpose, there will still come to our hand plenty of failures. Too many breeders in the past have poisoned the stream with foolish fads, with ideas of breeding for meat as well as milk and butter, and their ideas have left their detracting effect on the procreative powers of the cattle we are now using. Do the best we can, we will have all the confusing diversity and variation we want, all the loss of dairy capacity we can take care of, without breeding for it on purpose.

Dairy breeders must never lose sight of the great principle that all future development lies in the direction of holding steadfastly to two principles: Breed for the single purpose of dairy capacity and strength of constitution.

By the term "development" we do not mean so much the production of phenomenal cows as that there shall be less and less failures; a larger per cent of certainty that the resulting heifers will prove profitable cows and the resulting bulls the sires of profitable cows.

If the foregoing premises are sound it is plainly evident that no breeder of dairy cattle or dairy farmer can afford to meddle with the confusing heresy of "dual purpose."

Owing to the terrible drouth which has devastated almost the whole of Australia that country is losing many of its best farmers. Every ship scheduled to sail from an Australian port to Canada has her capacity bought up for months in advance and the influx of Australians into the Dominion is almost beyond belief. Lands are being bought beforehand and the purchasers sail as soon as they can find passage on ship.

A Golden Fleece.

The sale of the champion Angora huck Aztec for \$1400 was something more than a streak of sale-ring luck. The twenty-seven dollar fleece of this super-animal tells the story. Long sustained, careful breeding, critical selection, close adherence to blood lines and a looking forward to the day when a great animal with practically kempless fleece should be born is the fitting commentary upon the brilliant work of the silent and patient man who bred and brought out Aztec. Not a drop of Turkish or South African blood in his veins, writes *American Sheep Breeder*, save such attenuated blood as mingles in the free flow of old flocks that trace to importations now almost forgotten. An American Angora horn of American blood and bred by a western breeder, who never used an imported sire or dam in his flock, is an emphatic negation of the claim that we are sorely in need of foreign blood to rescue a valuable national animal industry from decadence. There are a score or more of Angora flocks in this country with blood as nearly pure as any in Asia Minor, or the Cape Colony, and better still, their fleeces are bringing twice and, in some instances, three, four and five times as much as the best foreign fleeces at Port Elizabeth or Bradford.

The Bacon Hog.

Frank Bixby, head buyer for Swift & Co., says: "There is not as great demand for the bacon hog as there used to be. It never has paid in this country to raise it exclusively, nor do I believe it ever will. We get our bacon animals from mixed lots, choosing lengthly animals weighing from 140 to 180 pounds. The Berkshire, in my opinion, is the best bacon hog. Tamworths are quite satisfactory, but there are not many of them here, so we hardly consider them. The thin rind hog is also good for bacon. I do not believe that the American farmer can under present conditions raise as good bacon as the Danes or English."

To Breed Cattle in Hawaii.

The cattle industry of Hawaii is about to receive great impetus. A company which includes among its members Samuel Parker and other capitalists has been formed to go extensively into the raising of hooded cattle. The company has launched its scheme by the spending of \$112,000 in the purchase of 95,000 acres of land suitable for its purpose. It is expected that within a few years Hawaiians will in a great measure be independent of the stock-raisers and hutchers of the Pacific Coast, on whom they now depend for supplies of fresh meat.

A steer-feeding experiment recently completed at the Kansas Experiment Station furnishes proof that corn silage is a superior feeding material for making beef of good quality. It was fed in connection with chopped alfalfa to 10 head of two year old steers, the feeding period extending over 209 days—from November 10 last to June 8. In comparison with a similar number of steers comprising five other lots which were fed different rations the silage-fed cattle made better gains and when slaughtered made a higher per cent of dressed meat and more tallow. Further details of this experiment will be given in a bulletin soon to be issued by the Kansas Station. On the face of the incomplete data at hand corn silage as a factor in beef production has received a significant recommendation.

See that the young calf is kept warm and growing. A stunted calf never—well, hardly ever—makes a profitable cow.

Sober up on Jackson's Napa Soda.

The Corales Ranch, embracing nearly 400,000 acres of land, situated in the State of Chihuahua, Mexico, has just been purchased by M. Sidney Durrell, of Sedalia, Mo., and J. M. Patterson, of New York City. The consideration was about \$1,000,000 in Mexican money. There are 20,000 acres in cultivation. Two towns, having a population of about 1,500 people, are situated on the ranch. Mr. Durrell is said to be the owner of the Fairview Stock Farm at Sedalia.

FOR SALE.

BAY HORSE. FIVE YEARS OLD, WITH black points, good mane and tail, star in forehead, good mannered, gentle in all harness, with or without blinds, fearless of cars, steamboats or automobiles, city broke, weighs 1100 pounds, height 16.2, sound, can trot in 2:40, never been worked for speed, sire Rainbow, Rainbow by Silverbow, Silverbow by Robert McGregor, the sire of Crescentsdam McDonald Maid she by McDonald Chief. This horse is a good prospect for a fast trotter and is an exceptional road horse now. This horse can be seen in Vallejo; price \$350. Apply to J. W. HARTZELL, Vallejo.

The Man Behind the Herd.

A producer of breeding stock should advertise himself fully as much as his herd or flock. While most prospective buyers will walk around an animal several times and try to look wise, yet the majority when they come right down to buying do so on the pedigree of the owner. They would not admit the truth, at least of all to themselves, but they are not expert judges, and the fact that the particular breeder has a reputation goes a long way with them. Acquaintance of the right sort is essential and this is best obtained through the farm and live stock paper that comes each week. In some instances, possibly, any closer acquaintance would not be an advantage; but acquaintance and confidence cut a big figure in influencing buyers of breeding stock and are promoted by the use of printer's ink.

When I was quite a young man I arranged to take my best girl driving to the county seat. I did not have a good roadster, but one mare did tolerably well, being kept for driving by the family because she was safe and sure and not because of any delusion that she was speedy. The night before the drive a cow got into the horse stable and chewed the animal's switch off up to the hone. When I saw that mare the next morning I was up against trouble, but I was hanking on the drive and so cut off the straggling hairs and went. The banker of the town was standing in the doorway as we stopped at the sidewalk and his second word was a compliment for my nag. "Something good you have there!" he said. "Looks like she had speed." It was an hour before I realized the inspiration of that compliment for the old mare—the tail had done the work. It reminded him of what he thought a bang-tail should be like.

The banker was not a judge of live stock, but he was about as near one as three men out of five. If this statement is correct then the business air that a clear-cut advertisement appearing week after week and year after year is essential in attracting custom. Many sales are wholly on the representation of the seller and are possible because he has reputation gotten through the judicious use of advertising. An occasional small breeder says that his sales advertise him sufficiently. He asks little and receives it with exactness. But the breeder whose name appears clearly in the columns of a farmers' paper each week is the one who will make the most sales.

When the average stockman and farmer are concerned, the advertising that pays is in the paper he takes and that is not a journal devoted to a special class of livestock. The aim of a livestock advertisement is to secure inquiries that will bring sales. The transient breeder is served by transient advertising, but the man who has come to stay and has brought something good with him needs an attractive advertisement standing each week ready to catch the eye of the man who wants something good.—Alva Agee in Field and Farm.

The Handling of Sheep.

Successful sheep husbandry depends on the attention to two essential factors, carefully carried through with the utmost regularity. It is quite as essential how feed is given to the flock, as the kind given, to realize the full benefit to the shepherd, writes R. E. Roberts in New York Farmer.

Sheep are not generally thought to be so intelligent as most of our domestic animals. However, they are sensitive to every minute that passes after the usual feeding hour has arrived.

They will announce its arrival by restlessness, which means wear on their system and loss of flesh. Therefore the more regular and aystematic we are in feeding, the less food it will take to keep them in good condition.

The intervals should be so divided as to secure the full digestion of the food. At

each time feed no more than they can consume.

Every shepherd is cognizant of the fact that good feeding is the fundamental principle to better breeding and improvement. Its characteristics are inherited by turning the best feeds into growth, and the greatest percentage of high-priced mutton of early maturity.

Neither can we ignore the results of good feeding upon the fleece. Every setback of the sheep by scanty, damaged or poor feeding is marked by a weak spot in the fleece, in which the fiber breaks, the growth is arrested, and the wool is greatly reduced in value.

Foods vary in composition. Some consist largely of the carbohydrates, or fat-formers, as timothy hay, corn fodder, oat straw, millet and corn. Others are richer in protein, or flesh and bone formers, as clover hay, oats and pea hay, oats and bran.

As a guide in the choice of feeds in common use there are tables with the nutritive ration given. The careful feeder will make up such a ration as will be best for the purpose fed.

Hay, straw and oats are now bringing, especially in the Atlantic Coast States, prices about as high as they ever brought in this country, and the expenses of campaigning a stable of horses is much increased thereby. It will be harder than ever this season to make a trotter or pacer win his expenses, and the feedmen are already beginning to fear that by fall they may possess a good many runners which do not represent the money put into the first cost of the feed they have eaten during the summer.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

HARNESS AT COST

IN ORDER TO DISPOSE OF OUR SURPLUS STOCK AND KEEP OUR PLANT RUNNING AT THIS TIME WE HAVE DECIDED TO SELL

200 Sets of HARNESS AND SADDLES

AT ABSOLUTE COST. SALE FOR THREE DAYS, NEXT MONDAY, TUESDAY AND WEDNESDAY

To cure a Bruise or Strain quickly, proceed as follows: Wring out a sponge in boiling hot water and hold on the affected part, keeping the sponge hot by repeating the operation, for from 15 to 30 minutes. Rub dry and apply

ABSORBINE

rubbing it in well. Use the hot water steaming process once a day and apply the Absorbine from three to four times a day. One or two days usually cures fresh cases. Absorbine is unequalled in removing blisters caused by a bruise or strain from animal or mankind. Vet. size \$2 per bottle, for mankind \$1 per bottle, delivered or furnished by regular dealers. Write for pamphlets. Manufactured by **W. F. YOUNG, P. D. F.** Springfield, Mass.

For sale by Mack & Co., Langley & Michaels & Redington & Co., J. O'Keane, and J. A. McRetton all of San Francisco.

CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL FOR BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY. It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

Read our "ad." on Campbell's Horse Foot Remedy in next issue of this paper.

GOOD ONLY UP TO AUGUST 15, 1903

We are pleased to announce that we have made arrangements whereby we are able to renew our offer of the

MAMMOTH CHART, SHOWING SKELETON OF THE HORSE

as a handsome premium to new subscribers and others who will pay us \$3 for subscription to the BREEDER & SPORTSMAN between July 1st and August 15, 1903. This Chart is lithographed on tinted paper and is 23x32 inches. It will be found invaluable to every owner of a horse as the names of all the Bones are given, as well as the names of the Tendons and Ligaments of the legs. By studying this Chart almost any lameness can be located and the proper remedies applied. The accompanying engraving will afford an idea of its appearance. No

similar Chart has ever before been published. The artist, in preparing this Skeleton, visited the American Veterinary College in New York City and made drawings from actual skeletons, thus insuring absolute accuracy. This Chart sells for One Dollar, but any reader can have it who will remit THREE DOLLARS

BEFORE AUGUST 15, 1903.

It will be mailed, carefully packed, in a heavy pasteboard tube for safety. Address

BREEDER AND SPORTSMAN, 36 Geary St., San Francisco.

GOLDEN ANNIVERSARY. CALIFORNIA STATE FAIR FOR 1903 SACRAMENTO

August 31 to September 12, inclusive.

All Races to be Contested at the State Fair on Days to be Hereafter Designated by the Board of Directors.

Entries to Close with the Acting Secretary, WEDNESDAY, AUGUST 12, 1903,

UNLESS OTHERWISE STATED.

Table with columns: TROTTHING EVENTS, PURSE, PACING EVENTS, PURSE. Lists various race classes and their respective purses.

- 16—Double Team Race, Trotters or Pacers, two in three, for teams that have been owned prior to June 1st and regularly driven on the road; to be driven to a road vehicle by the owner; purse \$500. To close Wednesday, September 2nd.
17—Double Team Race, Trotters and Pacers, two in three, free-for-all, hoppers not barred, purse \$500. To close Wednesday, September 2nd.
18—Consolation Purse for Three-Year-Olds that do not win first or second money in the Occident of Stanford Stakes; purse \$400. To close Wednesday, September 9th.
19—Consolation Trot for the class that has the most starters; purse \$400. To close Thursday, September 10th.
20—Consolation Pace for the class that has the most starters; purse \$400. To close Thursday, September 10th.
21—The Occident Stake will be trotted on Monday, August 31st. The most valuable Occident Stake yet contested. Final payment of \$50 payable thirty days before race.
22—The Stanford Stake will be trotted on Monday, September 7th. The most valuable Stanford Stake yet contested. Final payment of \$20 payable ten days before race.
Special Races for Drummers, and other properly organized Driving Clubs. Conditions will be announced later.

SPECIAL CONDITIONS.

Entries to above races to close with the Acting Secretary, H. Lowden, Sacramento, Wednesday, August 13, 1903, when horses are to be named and eligible, except where otherwise stated. Five per cent entrance and five per cent additional from money winners. All races mile heats, three in five, except otherwise stated. Moneys to be divided 50, 25, 15, and 10 per cent, unless otherwise specified in conditions. All races to fill satisfactory to the Board of Directors or they may be declared off. Distance in all heats 80 yards, but if the field is more than eight, 100 yards. A horse not winning, or making a dead heat in three, to be roled out, but will retain his position in snm many. Five or more to start, or it is optional with the Board to declare race off. If there are less than four starters the Society may, if they so decide, allow them to contest for the entrance moneys only paid in, to be divided 60, 30, and 10 per cent. A horse distancing the field will only be entitled to first and fourth moneys. Hoppers barred in trots, but allowed in pacing races, except where otherwise stated. It is not intended to give any specials. If you want to start your horses or secure stalls, enter in advertised races. For full and further conditions, see entry blank.

BENJ. F. RUSH, President H. LOWDEN, Acting Secretary Sacramento, Cal

FOR SALE. HANDSOME CHESTNUT DRIVING HORSE, 15 1/2 hands high weight 1100, foaled in 1896; sired by Gossiper, dam Maud Fowler, who was also the dam of Sonoma Girl, entered in the 2:23 class at the Breeders meeting. Can trot a mile in 2:30 or better; perfectly gentle, not afraid of cars or automobiles; registered in the American Trotting Register, as Fenton, under Rule 6, Vol. 14. Price \$400. W. S. WEST, P. O. Box 216, Santa Rosa Cal.

OREGON STATE FAIR SALEM

September 14, 15, 16, 17, 18, 19. ENTRIES CLOSE AUGUST 25.

Table listing race events for Monday, Tuesday, Wednesday, Thursday, and Friday, including classes like Pacing, Trotting, and Paclog with their respective purses.

Conditions. Entrance fee 5 per cent of purse and 5 per cent additional from money winners. Money divided 50, 25, 15 and 10 per cent of purse. Two or more horses may be entered from the same stable and held only for one entry fee. In case where two or more horses have been named as one entry, and any horses have been separated from the stable from which they were originally entered, and such separation made according to rule, they shall be eligible to start in the race upon the payment of the regular entry fee. A horse entering a class that does not fill may be transferred to any other class eligible by notifying the Secretary on or before September 5th. A horse not winning a heat in three shall not start in the fourth heat, except in a field of eight or more starters; then he must win a heat in four or go to the barn. Horses so ruled out shall have a right to a share of the purse according to their rank at the close of the last heat. The board reserves the right to declare off and return first payment in any purse that does not fill satisfactorily. Right reserved to declare two starters a walk-over. When only two start they may contest for the entrance money paid in, to be divided 70 per cent to the first and 30 per cent to second horse. A horse distancing the field shall be entitled to first and fourth moneys only, and in no other case shall a horse be entitled to more than one money. Other than specified, rules of the National Trotting Association, of which this Association is a member, to govern, except hoppers not barred on pacers.

Running Races. Two Running Races will be given each day, with entries to close at 6 p. m. day precedog race. W. H. WEHRUNG, Pres. HILLSBORO, OREGON. M. D. WISDOM, Sec'y, PORTLAND, OREGON.

Starting Payments Due August 16, 1903, ON TWO-YEAR-OLDS

ENTERED IN THE PACIFIC BREEDERS FUTURITY STAKES No. 1 \$6000 GUARANTEED

FOR THE GET OF MARES COVERED IN 1900 (FOALS BORN IN 1901) ENTRIES CLOSED SEPTEMBER 1, 1900.

To Trot or Pace at 2 years old in 1903 and at 3 years old in 1904 at either or both ages.

Table showing money divided as follows for 1903 and 1904, listing various race classes and their guaranteed amounts.

Owner of Stallion, sire of Winner of Three-Year Old Trot, when mare was bred, \$100. Owner of Stallion, sire of Winner of Three-Year-Old Pace, when mare was bred, 100.

ENTRANCE AND PAYMENTS—\$3 to nominate mare on September 1, 1900. \$5 January 2, 1901. \$10 on yearlings January 2, 1902. \$10 on two-year olds January 2, 1903. \$10 on three year olds January 2, 1904.

STARTING PAYMENTS—\$35 to start in the two-year-old pace. \$35 to start in the two-year-old trot. \$35 to start in the three year-old pace. \$50 to start in the three-year-old trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place. Nominators must designate, when making payments to start, whether the horse entered is a trotter or a pacer. Colts that start at two years old are not barred from starting again in the three-year-old divisions.

The \$10 payment January 2, 1903, keeps your entry good to January 2, 1904, whether you start at two years old or not. E. P. HEALD, President. F. W. KELLEY, Secretary, 36 Geary St., San Francisco.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Corise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

San Francisco, Saturday, August 1, 1903.

THE \$6000 FUTURITY is the subject of much conversation among California horsemen just at present, as the two year old divisions of stake No. 1 are to be decided at the Breeders meeting this month at Petaluma. Starting payments are due August 16th on two year olds that will start this year and from present appearances these payments will be made on quite a number of youngsters. It is very likely that a half dozen or more two year olds will go to the post in each race and if so they will be notable events. It is several years since a valuable two year old stake was trotted or paced in California and the revival of the interest in breeding and racing colts will therefore be noticeable. The inauguration of this futurity by the Breeders Association has done much to increase this interest which had lagged greatly during the years of business depression. While as yet no phenomenally fast colts have been discovered among those eligible to start this year, the probability is that the winners of both races will have to trot and pace in standard time to win. However, any owner who has a two year old trotter that can now show a mile in 2:40 or a pacer of that age that can pace in 2:30, should have an excellent chance to win part of the money if his colt is eligible to start. The race is not always to the swift and the steady going youngster that can put in a couple of heats in the time mentioned will not be far behind the winner in our opinion.

MR. T. J. CROWLEY of this city, one of California's most enthusiastic trotting horse admirers and an active member of the Board of Directors of the Pacific Coast Trotting Horse Breeders Association is now in the East on a business and pleasure trip accompanied by Mrs. Crowley. They attended a meeting of the New York Driving Club at Empire track, New York, on Thursday of last week, the club officials honoring Mr. C. by asking him to preside in the Judges' stand. In a private letter to the editor of this paper Mr. Crowley says:

"Here I witnessed the best and only real matinee racing I ever saw. I wish some of our California horsemen could just take a look in on one of these matinees. They would doubtless say to themselves, 'What arrant fools we be!' Here one sees gentlemen driving for blood and blue ribbons—no petty gambling, but the best of good feeling and fellowship. When one wins, the defeated contestants shake his hand and congratulate him in the greatest of good humor. I saw Ida Highwood against Swift and Ax-tello trot and win the fastest heat to wagon I ever witnessed—2:03. It is the fastest heat to wagon in a race this year. Although beaten by Swift in the deciding heat in 2:11 she was not disgraced. Mr. Smathers claimed he was carried out by Mr. Cockerill, driver of Swift, but the claim was not allowed as the judges were of the opinion that (as Mr. Smathers expressed it) 'Mr. Cockerill never intended to win otherwise than on his merits.' Empire City Track is a grand one, and a credit to the man who built it. It is a fitting memorial to his memory."

Mr. Crowley has been at Cleveland during the Grand Circuit meeting there this week, and after a short stay in Toledo will start for home, arriving here about August 12th. He has promised to write for us his impressions on harness racing as seen on the Grand Circuit, and as he is a keen observer we shall await the receipt of his manuscript with great interest as will also our readers.

Our Pictures.

The photos for the group of handsome horses shown on our title page this week were obtained by the BREEDER'S camera at the Vallejo track last Saturday.

Allesandro, the two-year-old colt by Athaneer, is owned by Mr. Geo. Warlow of Fresno, who bred him.

Allesandro won the two-year-old stake at the Denver meeting and trotted to a record of 2:40 which is the two-year-old record for the State of Colorado and also for the Denver track. Allesandro is a big masculine colt and will grow into a magnificent horse. His dam is a full sister to Lesterine 2:13½, being by Atladon out of Lustrine by Onward.

Tom Smith 2:13½, as the picture shows (and it does not flatter him in the least), has grown and filled out until he is one of the handsomest horses in California. Mr. Zihhle, who is training him and drove him to his record at Denver, has made a very steady and fast trotter out of this son of McKinney and believes he will mark him in 2:10 this year. Prof. E. P. Heald, who owns Tom Smith, has in him one of the very handsomest of McKinney's sons and one of the strongest bred, and we don't know where there is a son of McKinney that on breeding, individuality, size, speed and gameness is a better horse to head a stock farm. An offer of \$7000 was made for Tom Smith by Eastern parties after he had made his record at Denver.

Lottie Smart 2:07½ was brought to California by Mr. Zihhle in the hopes that a race or two might be arranged for her, as her owner would like to have her record reduced. She is a chestnut mare looking very much like a thoroughbred. Her sire is Roswell, be by Belvoir and he by Belmont 64. Lottie's dam is by Ogallala, a son by Mambrino Russell and her grandam by Stratmore. She was bred by Mr. Francis Smart of Denver and made her record at Baltimore last year.

One of the grandest looking mares ever seen on a race track is the mare Dot 2:26 by Falrose. She is a pacer and took her record at Quincy, Plumas county, last year. Dot is owned by Col. F. G. Crawford of Willows and is trained by W. P. Hamner. Col. Crawford also bred the pacer Don 2:10 by Falrose, a horse that would have taken a record of 2:05 or better had he not met an untimely death after making one of the best winning campaigns ever made by a horse raced in California.

The two year old colt by Gaff Topsail is one of the first of the get of that son of Diablo. This colt is owned by Mr. H. C. Myers of Vallejo and is out of his fast mare Easter D. by Easterwood. He is being trained by Joe Corey.

One of the most talked about three year olds in California is the gelding Swift B. 2:24½ (record made at Denver this year) by Stam B. 2:11½ out of that good mare Swift Bird 2:13½ by Waldstein. Swift B. is the first of the get of Stam B. to be trained and he is a natural, pure-gaited trotter. He is entered in the Occident Stake this year and his mark of 2:24½ made at Denver shows that he will doubtless be one of the contenders for first money when that rich stake is decided on the first day of the State Fair.

One of the greatest pieces of trotting machinery ever seen on the Vallejo track is the little bay filly in Mannie Reams' string that occupies the lower right hand corner of the group on our front page. She is only a two year old and is by a son of Oro Wilkes that President Ben Rush of the State Agricultural Society purchased as a colt at the dispersal sale of the William Corbitt horses at San Mateo. Mr. Reams could not give the full breeding of this filly but she can trot well enough to have the very best that's going in her veins. Reams worked her out with three aged horses last Saturday whose drivers intended to go a mile around 2:30. She went to the quarter with them in about 36 seconds and the spectators all thought her driver would pull her up and drop out of it. He did take her hack but she wanted to go so badly that he gave her her head again and she was right up with the others at the half in 1:17. He took her hack again on the third quarter, but she still wanted to go on and let her step to them again. They finished in a bunch in 2:31 and she was right at them and not over a length or two behind. She is a very clean gaited and good headed filly and should make a very fast mare when she matures, as her gameness is beyond question.

Los Angeles is in line with a big program of harness races for a meeting to be given by the Los Angeles Racing Association of which Mr. J. W. Brooks is President and Capt. Thos. B. Merry, Secretary. There are sixteen stakes offered for trotters and pacers and the classes have been well arranged. One of these stakes is for trotters of the 2:24 class and has a value of \$1000. Another of the same value is for the 2:15 class pacers. The free for all trotters and free for all pacers are each given \$600. All the rest of the stakes are \$500 each. One of the best features of the program are two consolation purses. One is for 2:17 class trotters that have started at the meeting and not won first or second money. The other has the same conditions and is for 2:15 class pacers. The consolation trot will be held October 29th and the pace the following day. The meeting opens October 10th and closes on the 31st. Entries to the sixteen stakes will close September 1st. The Los Angeles track is one of the best in California, and Los Angeles one of the best harness racing towns on the Coast. Be sure and make your entries in time.

Answers to Correspondents.

L. M. R., Eureka, Cal.—If at a matinee at which gate entrance is charged, three or four horses in training at the track at the time be given workouts together, as a compliment to the club and as an entertainment for the grandstand, does the time taken by the judges make a record or a bar?

Answer—If admission fee is charged for exhibitions of this kind and time is taken, it is a bar. Rule 42, Section 1, says: "Any contest between horses for purse, premium, stake or wager, or involving admission fees, on any course and in the presence of judges and timers shall constitute a public race."

July 9, 1903

EDITOR BREEDER AND SPORTSMAN—The following, in quotations, is a copy from a trophy which explains itself:

"Presented by
The Hilo Mercantile Company, Limited,
for the
One Mile, Free for All,
Running Race
Hilo, Hawaii, H. I.,
July 4, 1901."

On the hack is "To he won Twice." In the first race for cup and purse R. Ballentyne entered Billy McCloskey and won. Since then A. Humberg won with Fierro, J. T. Moir with Dixie Land, J. O'Rourke with Carter H. Harrison Jr. and on this Fourth R. Ballentyne won with Bruner. Mr. Ballentyne was lessee of both Billy McCloskey and Bruner. He made no claim to ownership of the horses but does claim that as lessee he is the nominal owner and is entitled to the cup. His claim is disputed by others here. The races were run under the rules of the "California Racing and Blood Horse Association."

We have no jockey club here, the races being (this year) in charge of Citizens Committee. Will you kindly say whether under the conditions a lessee of a horse is considered as the owner and is entitled to the cup. Very truly,

THE HAWAII HERALD,
J. T. STACKER, Mgr.

Answer—An inquiry in regard to this same matter was answered in this column last June, before the last race for this cup was run. It was therein stated that we could not decide in the matter without knowing the original conditions of the race. Cup races and all other races for that matter are governed by certain conditions which are agreed upon or published prior to the first entries being made. The inscription on the cup offers no clue to what the conditions of this race were. It simply states that it is a free for all running race at one mile to be won twice, but does not state whether it is to be won twice by one owner or one horse. As the Hilo Mercantile Company, Limited, offered the cup, it should be the one to state what the conditions governing it are. To ask a newspaper or any other authority to decide in this matter without knowing what the conditions are is like asking a court to interpret a contract it has never seen and has no evidence of.

Woodland Matinee Races.

[Saturday, July 26]

First race—
Cal Brown by Goldrose—Advocatrix..... (Rodman) 1 2 1
Cedar by Falrose..... (Mastin) 3 1 2
Tuberana by Tuberosa..... (Nason) 2 3 dr
Time—2:35, 2:27, 2:25.

Second race—
Penrose by Falrose..... (Mastin) 1 1
Bellrose by Falrose..... (Nason) 3 2
Lena A. by Liamout..... (Bigelow) 2 3
Time—2:19½, 2:18¼.

The judges were A. C. Stevens, and O. A. Lowe. The timers were J. Norton and J. D. Martin. Clerk, S. H. Grigsby.

The Best of Results.

People who hesitate to invest in a bottle of Absorbine can take courage from the experience of others. Here is what one man says:

HAMILTON, ONTARIO, CANADA, March 3, 1902.
W. F. Young, Springfield, Mass.
Dear Sir—I purchased your Absorbine from a local dealer and am using it on my mare with the best of results. The puffs are just about gone. Yours truly,
TOS. PROKMY.

Absorbine 33 per bottle, express prepaid.
Address W. F. YOUNG, P. D. F., Springfield, Mass.

Many horsemen do not realize just how much speed a horse must have in order to make him of any account as a Grand Circuit performer. Scott Hudson was talking about this a few days ago and asserted that a man who went away to the big meetings with a trotter that could not step in 2:10, or a pacer that could not go in 2:05, was simply wasting time and money. The truth of the statement is apparent to those who are familiar with the conditions surrounding Grand Circuit racing. Why, at Columbus and Windsor last week, where the meetings were just preliminary skirmishes of the Grand Circuit brigade, nearly two dozen pacers eligible to the slow classes, but that can pace right around 2:10, failed to win a race, and probably a dozen trotters capable of trotting as fast were not among the winners. In the light of these facts it is no wonder that a large number of trainers prefer to race over the half-mile tracks and minor circuits, where the pace is not so hot.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

JOTTINGS.

MONROE, the big bay gelding by Seymour Wilkes 2:08½, won at Detroit on Friday of last week, getting the second and third heats of the 2:26 trot in 2:14½ and 2:15½. He is the best trotter by Seymour Wilkes to start in a race, I believe, and to move up into the 2:15 list at the second meeting of the year is a pretty good showing for a trotter that nearly all the horsemen thought was too big for a campaigner, although all agreed that he was good gaited and fast. Mr. Salishury, who purchased Monroe from Mr. Fred Talbot of this city, has entered him as out of a mare by Geo. M. Patchen Jr., but although his dam has two crosses to that stallion she was not sired by him.

The correct breeding was given me the other day by an old friend, Mr. P. H. Lennon of Napa, one of the old-time horsemen of California, a man who has probably sold more high class carriage teams and road horses for good prices in San Francisco than any dealer that could be mentioned. "Pat" Lennon, as his friends all call him, retired some years ago from the active busy life of farmer and horse dealer which he led for so many years, and his "old homestead" just south of Napa is now a part of the Napa Stock Farm, where Mr. A. B. Spreckels has established one of the finest thoroughbred breeding farms in the State. With a competence to keep him comfortable in his declining years Mr. Lennon now lives "in town" but retains all his old love for a good trotter and can pick one out in the rough as well as the next man. I met him at Vallejo last Saturday, he having come down on the train fifteen miles that morning "just to see the horses." He knows all about the dam of Monroe and gave me her breeding. Monroe's dam is the McCord mare, and she is by Mr. Lennon's old horse Columbus, he a son of his horse John M. Patchen that died many years ago in Napa, after leaving his impress upon the roadster stock of that county. John M. Patchen was a big high headed fellow that got carriage horses and roadsters of size, good looks and quality, and it was his blood that did so much to sell for good prices the many teams that Mr. Lennon from time to time brought to San Francisco. John M. Patchen was by Geo. M. Patchen Jr., and his dam was the mare Lady Geneva by Hambletonian 10. The dam of Columbus, sire of the McCord mare, was a mare called Mayflower by Eugene Casserly, son of the thirty mile champion Gen. Taylor. The dam of the McCord mare was Lady Sargent, a famous road mare owned by Alex and the late John McCord of this city. "Lady Sargent was such a good one on the road," said Mr. Lennon, "that Alex generally hooked her double with any horse brought in by a countryman to sell, just to make the country horse look cheap." One day Mr. Lennon brought down a horse called Hector that he wanted \$500 for. Alex McCord hooked him up with Lady Sargent and with Mr. Lennon beside him on the seat they drove out to the Park and to the Bay District track. Though McCord drove the Lady to her topmost speed, Lennon's Hector was right there all the time and carried the mare off her feet several times. McCord bought Hector, of course, and as Lady Sargent went lame soon after, she was sent up to John McCord's Napa farm, which adjoined the Lennon homestead and was there bred to Columbus and produced the dam of Mr. Salishury's big trotter Monroe. Lady Sargent was herself a well bred one. She was sired by Queen Sabo, son of Whipple's Hambletonian 725, and her dam was Pinbone by Budd Doble, he by Geo. M. Patchen Jr. The next dam was Milkmaid, a good road mare of the early days owned by Geo. Jefferson. Milkmaid's pedigree was unknown. When Mr. Talbot bought Monroe he was told that the dam was by Geo. M. Patchen Jr., and this has always been supposed to be correct, but there is not a particle of doubt but the pedigree as given by Mr. Lennon is the true breeding of Monroe's dam.

The California horses are racing up in the front row on the Grand Circuit, and, although they do not all land first every time they start, they are nearly all showing speed enough to get a part of the money at least. Little Trilby Direct won the consolation Chamber of Commerce stake on Friday last and paced the two heats in 2:08½ and 2:09. This is fast time, and Mr. Gallegos' little mare is proving that her speed is not all shown in the workouts. Trilby Direct is by Direct and her dam is by Sable Wilkes. The gelding Diablito, also owned by Mr. Gallegos and being raced in the Salisbry string, is showing up well and should get a very low mark this year. He was second to the fast pacer Tom Keene when the latter paced a mile in 2:07½ in the first heat of the 2:18 race at Cleveland on Monday of this week, and was third the next heat in 2:05½, getting second money.

Diablito is one of the kind that will improve if no accident happens him, and he will very likely return home with a record several seconds below 2:10 if he has average luck. It is to be hoped that both these pacers will do well on the Grand Circuit, as their owner is a gentleman who breeds and trains his horses entirely for pleasure and who takes more pride in the records than in the money they earn.

The pedigree experts are now at work trying to dig up the breeding of Venus, dam of Sidney Dillon. There are several who claim to know the facts who say she was by Capt. Webster 10173, son of Williamson's Belmont. Others say that Venture 2:27½ another son of Williamson's Belmont is her sire. There was much controversy over the matter years ago. When Count Valensin owned Venus he spent considerable time in trying to get her correct breeding and in his catalogues gave her as by Capt. Webster, dam by Kentucky Hunter. Like many good broodmares Venus will probably be among those whose pedigree cannot be positively determined but that she is a granddaughter of Williamson's Belmont is as certain as anything that is believed but cannot be sworn to.

Just as I had finished the above paragraph Dan McCarty ("White Hat") came into the *sanctum sanctorum* to protest against Mr. Peter C. Kellogg classifying him among the "departed." In the last issue of the *American Horse Breeder* Mr. Kellogg, discussing the breeding of Venus, dam of Sidney Dillon, referred to a talk he had heard on the subject between "John Goldsmith, W. S. Hobart, Dan McCarty, and G. Valensin, all of whom are dead." While Messrs. Goldsmith, Hobart and Valensin have all crossed the divide Dan McCarty is very much alive and a hard one to kill. After the wearer of the historical white hat had denied the story of his death and stated that he was ready at any time to make affidavit that he was alive and knew it, I asked him about the breeding of Venus.

"I bought Venus," said he, "from Billy Lyle, who had purchased her from Sabe Harris who bred her. Harris brought her dam across the plains with him, and I have heard him state her breeding but have forgotten it now. He told me he bred the mare to Venture 2:27½ and the produce was Venus. Billy Lyle always claimed that Venture was the sire of Venus and I think there should be no doubt about this. I sold Venus to Count Valensin and I don't know what information he got that led him to give her sire as Capt. Webster, but I shall always think that Venture was the sire of Venus."

At the Pierce sale last Wednesday Dan purchased for \$185, the mare Transit of Venus, own sister to Sidney Dillon. She had a filly foal at foot by On Stanley 2:16½, son of Direct 2:05½ and Lilly Stanley 2:17½. This filly is a black and Dan says is "the greatest trotter on earth, bar none." He had the mare led behind a saddle horse on Van Ness avenue the other day and he says that the filly trotted alongside her at a three minute clip without raising her nose. The filly was foaled with a deformed caudal appendage and "looks like a hloomin hackrey" according to McCarty, but she is the next world's record breaker or the wearer of the white hat is not a prophet.

T. W. Barstow of San Jose, who bred and owns the pacing mare Alone 2:09½ by Nearest, own brother to John A. McKerron 2:05½, tells me that he will not race her this year, as there are no classes for her on this coast. He will drive her an exhibition mile at the Breeders Petaluma meeting however, and will also send her a half mile at that meeting, which will be very close to one minute. Alone hasn't a spot or a pimple on her, and is as sound as the day she was foaled five years ago. She is sixteen hands and an inch high and weighs about 1200 pounds and can be driven by anyone that can sit still in a buggy or hike. She took her record of 2:09½ last year in a race and was the fastest four year old mare of the year. Then she carried eight ounces all around, but this season has three ounces less on each foot and is faster than ever. She paced a half in 1:02½ at San Jose last week, covering the second quarter in exactly 29 seconds. That she can equal or beat one minute for a half mile is certain, and when Mr. Barstow turns her loose on the Petaluma track the greatest speed of the year in California will be seen. Alone will probably be sent a full mile to beat 2:04½ (Lady of the Manor's record) at Petaluma, and her performance will be a drawing card for the meeting.

Always Has a Supply of Caustic Balsam.

POMEROY, PA., Dec. 26, 1902.
The Lawrence-Williams Co., Cleveland, O.
Kindly send me a supply of your pictures of famous horses. I have used your Gombault's Caustic Balsam with great success for past two years. Always have a supply in my stable.
JAMES DARLINGTON.

Jackson's Napa Soda does not tangle the feet.

Seattle Entries.

2:17 Pace, \$1000—Highhall, Harry Hurst, Ama A., Rita H., Miladi B., Adimont, County Attorney, Prince Tom, Ollie M., Bensusba, Polka Dot, El Rio.

2:20 Trot, \$1000—Red Skin, H. H. H., Mark Hannabus, Duke of Waldstein, Idylwild, Sweet Marie, Briney K., Monicrat, Capt. Clapperton, Lady Jones, Belladi, Helen Norte, Bay Leaf, Harry Marvin, Idle Boy, Louis Z., Phil N.

Two Year Old Pace, \$300—Marie C., Jules Bedel, Free Love, Altolace, Loveless, Pricemark, Pricelist.

2:10 Pace, \$500—Highball, Harry Hurst, Ama A., The Freak, Martha D., Le Roi, Sam Bowers, Red Seal, Francisco.

2:15 Pace, \$500—Harry Hurst, Ama A., The Freak, Christabel, County Attorney, Ollie M., Starkey, Francisco, Bensusba.

2:20 Pace, \$500—Harry Hurst, Highhall, Ama A., Chehalis Maid, Maplemont, Christabel, Prince Tom, Ollie M., Portia Knight, Polka Dot, Economist, El Rio, Rita H.

2:25 Pace, \$500—Charlie S., Direct C., Ama A., Tidal Wave, Rita H., Chehalis Maid, Alcounter, Prince Tom, Vision, Princess Chehalis, Portia Knight, Polka Dot, Economist.

2:30 Pace, \$500—Charlie S., Direct C., Highball, Tidal Wave, Even Tide, Rita H., Taffeta Silk, Vision, Adlace, Princess Chehalis, Portia Knight, Bensusba, Glengarry, Patchen, Queen B.

2:12 Trot, \$500—Arketa, Briney K., Coronado, Sweet Marie, The Commonwealth, Mar Boy, Will Lane, McBriar, Oveta, Chico, Doc Bunnell, Mack Mack.

2:14 Trot, \$500—Arketa, Coronado, Sweet Marie, Briney K., The Commonwealth, Will Lane, Mar Boy, Oveta, Doc Bunnell, Mack Mack, Chico.

2:17 Trot, \$500—H. H. H., Coronado, Sweet Marie, Briney K., Lady Jones, The Commonwealth, Master Delmar, Bay Leaf, Harry Marvin, Louis Z., Doc Bunnell, Phil N.

2:22 Trot, \$500—H. H. H., Mark Hannabus, Duke of Waldstein, Idylwild, Capt. Clapperton, Lady Jones, Belladi, Helen Norte, Bay Leaf, Harry Marvin, Prince Howard, Sweet Marie.

2:25 Trot, \$500—Red Skin, Mark Hannabus, Zealous, Monicrat, Capt. Clapperton, Lady Jones, Belladi, Helen Norte, Bay Leaf, Louis Z., St. Patrick, Sweet Marie.

2:30 Trot, \$500—Red Skin, Lord Kitchener, Idylwild, Zealous, Monicrat, Capt. Clapperton, Thelma, Belladi, Louis Z., St. Patrick, Altaho, Sweet Marie.

2:40 Trot, \$500—Beulah, Idylwild, Zealous, Monicrat, Capt. Clapperton, Thelma, Belladi, Louis Z., St. Patrick.

The Juvenile Stakes for three year old pacers, the Pioneer Stakes for three year old trotters and the Puget Sound Stakes for two year old trotters did not fill and are declared off.

"Aurelius" is Now Bishop Hendrick.

Rev. Father T. A. Hendrick, who over the non-depen of Aurelius, was one of the most prolific and brilliant of the contributors to the journals devoted to the trotter in the era of 1886-'93, and who, of late years, owing to his increasing duties and authority as a churchman, has been obliged to relinquish his pleasant labors as a writer on trotting topics, has just been the recipient of signal honors in his church. He has for some time past been pastor of St. Bridget's church, Rochester, N. Y., and he now gives up that post to accept that of Bishop of Cebu, Philippine Islands. He has received official notice of his appointment from the apostolic delegate at Washington, Mgr. Falconio, who was informed by Cardinal Rampolla that Pope Leo XIII. nominated Father Hendrick June 30th.

Father Hendrick was born in Pen Yan, N. Y., in 1850 and received his early education there. Later he attended Fordham College and completed his classical studies at Seton Hall College, South Orange, N. J., the late Archbishop Corrigan being president of that institution at the time of his graduation. From there Father Hendrick entered the theological seminary of the province of New York, St. Joseph's, situated at Troy. After graduating from the seminary he was ordained at Troy by Bishop Wadlams of Ogdensburg in 1873. After his ordination Father Hendrick went to Rochester and was appointed by Bishop McQuaid assistant rector of St. Mary's church. Later he was made pastor of the Charlotte church, where he erected a new building. He also erected a handsome church for the people of Parma, called the Church of the Holy Ghost. Father Hendrick was then made pastor of the Union Springs church, where he remained until appointed to St. Bridget's church in 1891.

Michael J. Hendrick, now United States Consul at Belleville, Ont., formerly of Union Springs, N. Y., is well known in western New York as a breeder of trotters, and is a brother of the new Bishop.—*Horse Review*.

Notes and News.

Lou Dillon 2:03½ by Sidney Dillon.
Monte Carlo 2:08 by Mendocino.
Tribby Direct 2:08½ by Direct.
Rohizola 2:12½ by Robin.
Monroe 2:12½ by Seymour Wilkes.
This is a pretty good showing so far for the Pleasant-trained horses racing over East.

Star Hal 2:09½ is the ninth 2:10 pacer to the credit of Brown Hal 2:12½.

Vallejo meeting opens one week from Thursday next. Don't miss it.

John A. McKerron has been a mile in 2:11, last quarter in 31 seconds.

Anzella 2:06½ has been taken out of training and will be given a year's rest.

Clipper 2:06 will go east in James Thompson's charge about September 1st.

Onward is again the leading sire of 2:10 performers. He now has ten to his credit.

Situation is wanted by a competent and experienced coachman. See advertisement.

The privileges of the Breeders Petaluma meeting are advertised for sale in this issue.

A three year old filly by Sidney Dillon is offered for sale. See advertisement in this issue.

China Maid stepped a mile in 2:10½ at Cleveland on Tuesday, July 21st. She came the last half in 1:02½ and last quarter in 29¾ seconds.

The sulky pulled by Lou Dillon in 2:03½ was the one made for and used by Prince Direct 2:07, McHenry's pony, last season. It weighs 26 pounds.

Geers did well at Windsor. He got some of the money every time he started. With nine starts he won five firsts, two seconds and two thirds.

Monroe Salishury says he likes Monte Carlo better than he did Azote 2:04½. Monte Carlo now wears tenounce shoe forward and needs no toe-weights.

Imp, the pacer by Diablo, won a heat in 2:16 at a Seattle matinee two weeks ago. He pulled both hind shoes in the heat and was withdrawn from the race.

It is stated that Mr. Billings purchased Greenline 2:07½ for the purpose of hitching him double with Sir Albert S. 2:03½ and trying for the world's pacing team record.

Frank by Secretary is making a good showing this year. He won the 2:11 pace at Rome, New York, July 17th, taking three straight heats in 2:13, 2:12½ and 2:14½.

Those who have seen Mush in his races think his name is not an inappropriate one, after all. He has been out of condition somewhat, however, and may do better later on.

Lady Ellen by Carr's Mambrino is the dam of six standard trotters. Helena 2:11½, Eugeneer 2:28½, Elleneer 2:28½, Ella 2:29, Ellene 2:28½ and Ellenwood 2:14½ were produced by her.

The Tanforan track is having the light sandy surface scraped from it and will soon be in fine condition for harness horses. On the stretch where the scraping has been done the track is fast.

The brown gelding Louis Z. by Upstart, that is entered on the Northern Circuit in the green classes, is quite a trotter. He stepped a half in 1:05 over the Irvington track at Portland last week.

J. R. Freeman advertises several well bred horses for sale. Among them is a stallion by Sable Wilkes, a mare by Stamboul, and a four year old and a yearling filly by Zomhro 2:11. See advertisement.

Ida Highwood, Mr. E. Smather's beautiful mare, won the first heat of her race at a matinee held by the New York Driving Club last week, in 2:03½. This is the fastest mile to wagon this year in a race.

At Pekin, Illinois, July 21st, the bay gelding Oakland Baron by Barondale won the 2:20 pace, getting a record of 2:16½ in the fourth heat. There were eleven starters. The Barondales are all showing well this year.

Dr. James Hammond of Byron, Contra Costa county, is the owner of a 1903 colt by Nutwood Wilkes out of Blue Bells by San Diego 8776 that he was offered \$300 for before it was a month old. The doctor declined the offer with thanks.

Audubon Boy 2:03½ will not start in the 2:04 pace at Readville, for the reason that it is the purpose of the owner to add him to the two-minute class this season. Audubon Boy will attempt to break into the 2:00 set at the Readville Grand Circuit meeting August 24-28th.

Entries close to-day for the following purses: For the Breeders Petaluma meeting the 2:12 trot, \$500; the 2:10 pace, \$600. For the Vallejo meeting the 2:30 trot, \$300; the 2:12 trot \$300, and the green class pace \$300. These are the last races that are open for these meetings.

Sweet Marie will not be at Vallejo to start in the \$1000 stake in all probability as she is now in Seattle with Will Durfee's string, but there are several horse-men who have entries in that race who believe that should Sweet Marie be there and start she will have to trot the race of her life to win.

With two trotters trying for the world's record this year—Lou Dillon and John McKerron—a California bred animal may wear the crown before the season is ended. The consensus of opinion among horsemen is that these are the only ones that have an even chance to dethrone King Cresceus 2:02½ this year.

Dan Patch paced a half mile in 57¾ seconds last month at Columbus. This equals the record made by Prince Alert in his race against Sir Albert S. It shows that the son of Joe Patchen has as much speed as ever and has it earlier in the season. He should knock a half second from Star Pointer's record this year.

Funston by Dictatus, the roan horse that Sandy Smith purchased from P. W. Hodges for eastern parties in 1901 and took East, was a starter in the 2:21 pace at Detroit on the second day of the meeting. Funston was third in both heats and won third money. Dick Wilson was the winner, pacing the heats in 2:10½ and 2:09½.

Pleasanton will have one of the best meetings on the circuit during the week following the State Fair. Messrs. Olney & Son, proprietors of the Rose Hotel, are making preparations to feed all and furnish lodgings to a portion of the big crowd that will be there. The rose is newly furnished, electric lighted, and thoroughly up to date in every particular.

Det Bigelow left Woodland this week with carload of horses belonging to himself, Grigsby & Lowe, Tryon & Silva, and others that will be raced on the Oregon circuit. A dispatch from Woodland says: These animals have been trained here in anticipation of a district fair. The veto of the district fair appropriations has driven many horsemen out of the State.

Dr. P. O. O'Rear, the veterinary and horse owner of Indianapolis, died July 13th in that city from typhoid fever. He was a member of the Indianapolis Racing Association and professor of surgery at the Indiana Veterinary College. Dr. O'Rear was the gentleman who induced H. B. Gentry to buy McKinney, and came to California last year to examine and pass upon that great sire.

W. A. Valentine of Hermosa, Cal., was the purchaser of the beautifully bred three year old pacing filly Inferlotta that was sold at the Pierce sale at the Occidental Horse Exchange last week. Inferlotta is by Inferna 2:24½ (son of Diablo and Biscara) and is out of the great brood mare Carlotta Wilkes by Charley Wilkes, second dam by Alcantara, third dam by Clark Chief.

The Vallejo meeting will bring out several good fields of horses. The horsemen have entered quite liberally there and all that are training at Vallejo speak in high terms of the track. As it is the first meeting of the year it will be the place to get a line on the trotters and pacers that are entered through the circuit, and we expect to see a large attendance of those who admire the harness horses.

At Pittsburg, Pennsylvania, July 11th, the California-bred horses made a fine showing at the matinee of the Driving Club. Boodler by Boodle won the first trot in straight heats, 2:24½ being the best time. Dolly Dillon was started and took two heats in a jog in 2:15½ and 2:14. Eula Mac was a starter in race No. 4 and won handily, her best heat being the second in 2:13½. Dr. Book won a heat and made a dead heat with Senator K. in 2:16½ and 2:16½.

Lou Dillon 2:03½ has the unique distinction of being the only trotter that has made a world's record since 2:30 was first beaten that had never started in a race previous to the time when she made her record. The performance is also the fastest to the credit of any horse, either trotter or pacer, that has taken a record the first season out. The record is also the best ever made by a five year old trotter of any sex. Also the best ever made by any trotter so early in the season.

Several inquiries have been received as to what became of Gazote, the two year old by Nazote that Millard Sanders took East for the Blue Ribbon sale in May, as his name did not appear in the list of horses sold. Henry Sanders tells us that Gazote was put up, but that a bid of \$200 was the best received and Millard would not permit him to be knocked down at that figure and led him from the ring. He afterwards sold him at private sale for \$2200, which was nearer his real value.

According to the Melbourne Sportsman, Mr. Buckland, owner of the Australian trotter Fritz 2:13 is ready and willing to make another match for \$5000 a side against the pacer Ribhonorwood 2:09. Doubtless Mr. Price will accommodate Mr. Buckland when he reaches home from his California trip which will be some time this week. Mr. Buckland must have a tremendously good horse in Fritz if he is willing to hack him again in a race with the young pacer Ribhonorwood. Fritz is about twelve years old while Ribhonorwood is coming five.

Fred H. Chase of this city was requested to manage the betting at Santa Barbara last week for the racing given during the athletic and sporting carnival held there. Mr. Chase took a mutual box with him and all the betting was done on that system. The club and those who wagered on the races were highly pleased with the manner in which Mr. Chase managed the business for them. He will go to Del Monte this week in the same capacity.

Mr. H. W. Meek has sold the four year old pacer Cavalier by Welcome to parties in Seattle. The son of Welcome was shipped north this week and will be a member of the string trained by John Lance, owner of that fast horse Sam Bowers 2:11. Cavalier is a fast horse as well as a handsome one and wears no hopples or much of anything but a harness. He has never started in a race but is a good prospect for a record below 2:20. His dam is Carmelita, a full sister to Cricket 2:10.

Searchlight 2:03½ is to make a fall season at Pleasanton from August 1st to October 1st. There is little that can be said about this great horse that our readers do not already know. He is one of the greatest individuals ever bred. His record as a game race horse is almost unequalled and his list of winning races is a record of extreme speed, endurance and gameness. Write to Ed. Mills, his owner, at Pleasanton and get a card giving Searchlight's pedigree and performances.

The much talked of match between Mejar Delmar 2:05½ and The Abbot 2:03 came off at Albany, New York, on Thursday of this week, but owing to the fact that the track was slippery and slow was not much of a race. Mejar Delmar won in 2:15½ and 2:14½. Neither driver appeared to be anxious to ask his charge to step at full speed. The track was slippery and unsafe, and as they will meet again next week at Poughkeepsie, the risk of ruining such valuable horses was too great.

An Eastern gentleman who resides at San Jose, recently purchased from A. O. Hatch of that place an unbroken two year old gelding by Nearest 2:22, dam by Weatherhead's Nutwood. The colt is nicely halter broken and is one of the best steppers to better that anybody ever saw on a track. The eastern man was so taken with the handsome appearance and splendid action of the colt that he paid Mr. Hatch \$400 for him and now says that ten times that price will not induce him to part with him.

It is a rare thing for harness speed breeders to be favored with an opportunity to engage their speed-hred foals in a rich futurity stake "free gratis for nothing," but this is practically the case with *The Western Horseman* \$6200 No-entry-fee Futurity for foals of 1904. Two dollars pays for *The Western Horseman* for one year, and with each yearly subscription one mare bred this year may be nominated in this stake absolutely free, and if the subscription is kept paid up the foal will be eligible to start in the race at the age of three years. Does any breeder want an "easier thing" than this?

During the recent meeting at the Readville track Mr. Knox, the new owner of Anaconda 2:01½, and Dr. J. C. McCoy got together and after a little talk made arrangements whereby the latter is to race the pacer. Jack Curry, who is doing the driving for the McCoy stable, will now have the opportunity, which he has wanted for several years, to try the erratic son of Knight. Curry has been very successful with horses with dispositions such as Anaconda possesses and should be able to drive him in 2:00 if anyone can. Jack always thought that Anaconda was the fastest pacer living, and we hope that he will be able to prove it.

There will be a week of sports at Del Monte beginning Monday next. There will be running and trotting races, nony racing, polo, etc. The polo tournament and races will be under the auspices of the Pacific Coast Polo and Pony Racing Association. Ten events have been arranged, in all of which either purses or prizes are offered. They are as follows: First race, three-sixteenths of a mile, for ponies; second race, 250-yard dash, for qualified polo ponies; third race, quarter of a mile, for ponies; fourth race, half a mile, for race horses; fifth race, three-quarters of a mile, for ponies; sixth race, half of a mile, for ponies; seventh race, three quarters of a mile, for horses ridden by United States Army officers; eighth race, three-quarters of a mile, for vaquero or saddle horses; ninth race, five-eighths of a mile, for ponies; tenth race, one mile, for ponies.

The Los Angeles Express of Monday last says: Information comes from Chicago that J. W. Brooks, the horseman, will return to Los Angeles about August 3d. He is now in Kentucky, visiting friends and relatives, and will be in Chicago in a few days and will start west the last of the week. Mr. Brooks has been talking Los Angeles as a winter racing center, first, last and all the time, during his absence, and has had no trouble in securing promises of many good horses for the proposed meeting at Ascot Park. It is said Corrigan will send several carloads of his best horses here, and others will contribute to the success of the meet. Several Chicago hookmakers also say they will visit Los Angeles this winter, if there is a running meeting. Out at Ascot Park grounds, just south of Slauson avenue, men and teams are at work grading, and carpenters are building the fence to enclose the grounds. Work will be rushed on these grounds from this time on, and every effort made to have the opening of the new park take place Christmas Day, or, at the least, the first of the year. The park will be reached by electric cars by way of the San Pedro line to South Park avenue, thence to the gate entrance to the park, or by the Central avenue line to Slauson avenue.

Cleveland Grand Circuit Meeting.

CLEVELAND, July 27.—The grand circuit trotting meeting opened at Glenville track to-day without pool selling, Mayor Goff of that suburb having scared away hookmakers with a vigorous crusade against them.

The meeting was the first trial of the entire card of two in three-heat races and was a success from a standpoint of speed, there being no doubt that the time attained was better than under the old three in five heats system.

The meeting was the first trial of the entire card of two in three-heat races and was a success from a standpoint of speed, there being no doubt that the time attained was better than under the old three in five heats system.

Trot, 2:11, purse \$2000. Alfrewood, h. h. by Allie Wilkes..... (Miller) 1 1 Hawthorne 2-1, Dr. Strong 3-3, Leola 4-4 Francis B and Lilly Young also started.

Trot, 2:20, purse \$1000. Aerolite, h. m. by Acolyte..... (Saunders) 3 1 1 Lucy Lee 1-2-3, Judge Greene 2-3-2.

Trot, 2:25, purse \$1000. John Taylor, g. h. by Dispute..... (D. Wilson) 1 1 Monroe 2-4, Gray Gem 5-2, Bermuda Maid 3-3, Kinley Mc 4-5.

Pace, 2:18, purse \$1000. Tom Keene, g. g. by West Egbert..... (McCarthy) 1 1 Diahitto 2-3, King Direct 5-2, Dlok Wilson 3-5, Sadie Baron 4-4.

July 28.—Fanfaran, the Chicago mare, which surprised the talent by winning the 2:18 trot at Detroit last week, gained new laurels here to-day by capturing the 2:17 trot from a field of twelve fast ones.

In spite of the vigilance of special officers placed at Glenville track by Mayor Goff to suppress betting, a number of hand hooks did a big business about the ring, the bookmakers handing out green tickets to their patrons.

The sport throughout the afternoon was high class with close finishes, while the fast time kept up high interest, despite the absence of the regular bookmaking stands.

Billy Buck apparently outclassed his field in the 2:14 trot, and Geers drove him to an easy victory in straight heats.

In the 2:23 pace Elastic Pointer was forced to reduce his record to 2:06 1/2, but won without difficulty.

Joe Pointer, in the 2:09 pace, was another to reduce his mark, going a mile in 2:05 1/2—the fastest time of any son of the champion pacer, Star Pointer.

The 2:16 pace furnished the greatest excitement of the day. The first heat ended with a four-horse finish, which, from the grand stand, seemed a dead heat, but which the judges gave to King More, a horse which had made up a lot of ground and won out in the final stride.

In the second heat of the same race, through the fault of the driver of Queen of Spades, Hal Patron, John W. Patterson and Queen all went down. The two former were allowed to start in the final heat, and Hal Patron took down third money.

Trot, 2:14, purse \$2000. Billy Buck, h. g. by Saint Clair..... (Geers) 1 1 Norrie 3-2, Joymaker 2-3, Alfred Star 4-5, Black Lady 5-4.

Pace, 2:23, purse \$3000. Elastic Pointer, h. h. by Brown Hai..... (Pussey) 1 1 Hal Chaffin 3-2, Mary Anna 2-3, Harry D 4-4 Fred H, Ella Hai, Miss Georgie and Major Willisoo also started.

Fanfaran, h. m. by Tommy Britton..... (Fullager) 3 1 1 Bernalda 1-11-5, The General 2-2-6, Prince Greenlander 11-5-2, Millard Sanders, He Boy, Dillon Boy, Direct View, Nicolette, Jim Fenton, Elma O. and Berkshire Chimes also started.

Pace, 2:09, purse \$1500. Joe Pointer, h. h. by Star Pointer..... (McClary) 1 1 Allerson 2-2, Surfreet 5-3, Cubanola 3-3. Birdina, Mustard, Rosebud, Lady Alhright, Schley Pointer and Kelley Briggs also started.

Pace, 2:16, purse \$1000. Ebooy King, h. g. by Atlantic King..... (Bogash) 4 1 1 Kingmore 1-3-4, Hal Patron 2-2-2, Lord Geny 3-2-5 John W. Patterson, Robert D., Dacy, Little Splunk, Funston and Queen of Spades also started.

July 29.—Adverse weather conditions to-day ruined what would have been a great afternoon at the Grand

Circuit meeting. Lou Dillon 2:03 1/2 was down to go against her world's record for trotting mares and the announcement was sufficient to draw an immense crowd to Glenville track in the face of a heavy track and a sky that threatened more rain immediately.

The horses from California proved somewhat of a disappointment. Monte Carlo could only land fourth money in the 2:08 trot, while the pacers, Mush and Trilby Direct, were both outside the coin.

Trotting, 2:23 class; purse \$3000. Caspian, h. g. by Patron..... (B. Hank) 1 1 Guy Fortuoe 2-2, Kinoy Lou 4-3, King Simmons 3-7.

Pacing, 2:15 class; purse \$2000. Dr. Madara, ch. g. by Simmons..... (Hudson) 1 1 Star Hal 2-2, Volta 3-3, Theroo Powers 4-4.

Pacing, 2:15 class; purse \$1000. Illinois, h. h. by Antella..... (McMahon) 3 1 1 Guy Red 1-5-4, Doona McGregor 4-2-2, Joe Shiley 2-4-3.

Trotting, 2:08 class; purse \$1500. Rhythmic, h. h. by Oakland Baron..... (Hudson) 1 1 Ferero 2-4, Baron de Shay 6-2, Mooto Carlo 3-5.

Pacing, 2:20 class; purse \$1000. Tom Keene, ch. g. by West Egglebert..... (Saunders) 3 1 1 Geary 1-7-2, Page Hal 4-3-2, Governor Pingree 7-3-4.

Joe Grattan, Trilby Direct and Berodette also started. July 30.—The Grand Circuit races to-day had several distinct features, of which the most interesting was the ovation tendered to the veteran reinsman, Budd Doble, when he drove The Roman to victory in the 2:10 trot.

Doble has returned to the sulky this season as a race driver after an absence of eight years, and to-day drove his first victory. His appearance elicited applause when the horses scored for the first heat, and when the gelding came through in the stretch and nipped Dan T. at the finish, there was loud cheering.

Millard Sanders took another race with his good mare Robizola, although Ben Walker won the second heat of this race with the Seymour Wilkes gelding Monroe, reducing his record to 2:12 1/2.

Had there been any heating the defeat of Anaconda by Dan R. in the free-for-all pace, would have brought the talent a barrel of money. The famous snake horse seemed far from good to-day, while the lean and lank Dan R. was cherry ripe and paced him to tired breaks in the stretch in both heats.

Jay McGregor's win in the 2:19 trot was impressive, as he smothered his field when ready and was almost eased up in the first heat in 2:10 1/2. It looked as if he could have beaten the 2:10 trotters had he been in against them.

Pacing, 2:11 class, purse \$1000. Miss Williamot, h. m. by Rosticks Almost Jr..... (Miller) 3 1 1 Pauline G. 1-2-2, Joclesco 2-3-4, Polar Wilkes 4-4-3.

Trotting, 2:19 class, purse \$2000. Jay McGregor, h. h. by Jay Hawker..... (Hudson) 1 1 Gray Gem 3-2, McAdams Jr. 2-5, Katrinka G. 4-8.

Free-for-all pace, purse \$1500. Dan R., ch. g. by Tasco..... (Jolly) 1 1 Anaconda 2-2, Coney 3-3.

Trotting, 2:10 class, purse \$1500. The Romao, h. g. by McKinney..... (Doble) 1 1 Dan T. 2-2, Dan Wilkes 3-4, A. J. D. 4-3, Silver Sign 5-5.

Trotting, 2:21 class, purse \$1000. Rohlzola, hay mare by Robiz (driven by Millard Sanders), won the first and third heats and the race. Time—2:12 1/2, 2:12 1/2.

Monroe, hay gelding by Seymour Wilkes, won second heat in 2:12 1/2. Lucy Lee, Parthia, Dark Secret and Maud Carlisle also started.

If Lou Dillon belonged to a poor man, or to one who followed the Grand Circuit for a living, she would be the means of making a fortune this summer in exhibitions alone. Already the Billings stable at Glenville has been the receiving station for numberless telegrams from track managers in all sections of the country, offering inducements to Billings to let the mare trot over their tracks.

How Women Should Ride.

One of the most important things for women to realize when they commence to ride is that ten, twenty or forty lessons will not make experienced horsewomen of them. Riding should be considered an art as well as a sport; and I do not think any rational persons would think of calling themselves finished singers, pianists or painters after ten or twenty lessons.

Any woman possessed of the normal amount of courage has every chance to become a good horsewoman. She will not have the advantage of years of youthful practice, but close application will do much and she can always bear in mind the true saying, that "Horsewomen are born, not made."

But being one of the "born" is not enough. It is a great thing to have the material there; yet a strictly "ready made" rider is a had thing. A certain knowledge of form and detail is necessary to produce a finished horsewoman.

We have been asked many times of late our opinion of women riding astride. I think that in some cases, as in games, it is permissible, even advisable; and some women hunt that way. In polo, for instance, where so much depends upon getting away quickly, riding straight, and rapid turning, the advantage of a leg on each side of a horse must be great.

Many people have an idea that riding astride is safer than the sidesaddle; that there is less danger of being dragged and more chance of escape if a horse falls. But with a safety skirt and safety stirrups, there is no chance of dragging from a sidesaddle.

The more plainly one dresses for the saddle the better. Safety skirts should always be worn. These are made in two different ways. One is practically nothing but an apron, and gives the effect of a skirt when in the saddle, but is awkward when one is dismounted. The other is more convenient. It is more like the ordinary habit skirt, but has an open seam, which is provided with fasteners permitting it to be closed when off the horse and readily opened preparatory to mounting.

Habits are preferably made of whipcords, or roughish dark materials. Black cloth habits are best for the show ring and park riding. The coats should be single breasted, tight fitting and long enough to touch the horse in the back. Covert coats are quite smart for outdoor riding. Norfolk jackets look well on slight people and children, and are most comfortable for country use.

Habits are preferably made of whipcords, or roughish dark materials. Black cloth habits are best for the show ring and park riding. The coats should be single breasted, tight fitting and long enough to touch the horse in the back. Covert coats are quite smart for outdoor riding. Norfolk jackets look well on slight people and children, and are most comfortable for country use. Khaki makes a desirable habit for summer. Also duck or crash; these latter stand tubbing, and look smart and cool at all times.—Miss Belle Beach in Milwaukee Sentinel.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Judging Puppies.

In the matter of judging puppies there is frequently considerable misunderstanding. Some judges are apt to pass the awards without a very clear conception of the principles on which such awards should be based. Exhibitors without understanding the principles either but keenly alive to the inconsistencies of judges feel themselves aggrieved. Yet the whole point lies in a nutshell. At shows, where both puppy and open classes are provided, a puppy is eligible for both. This is, of course, obvious; the puppy class is especially intended for puppies, the open class is open to all dogs over six months old—irrespective of age, in fact. But the aspect from which a puppy is viewed, according as it is judged in a puppy or an open class, is entirely different. In the puppy class, it is—or rather should be—judged as a puppy; in the open, it has to meet matured animals as competitors and to be judged from their standard. That is the poser of the situation; it should be sufficiently obvious, but it does not appear to be so.

The usual definition of a puppy, is a dog over six and under twelve months of age on the date of the show concerned. Considering how puppies alter between six or twelve months of age the range is a very wide one. But, with the accepted definition, that can not be helped, the class provides for dogs within certain limits of age, and the conditions being met, all puppies fulfilling them are entitled to be judged on their merits. A puppy of eleven and a half months is so matured that its form can be told at a glance; the form of those of eight, nine or ten months of age may not be in much doubt, the ultimate merit of a six or seven months old youngster is frequently a very different thing; still they are all entitled to their chance. Very young puppies will always be, to a certain extent, handicapped in competition with older ones, and provided that the latter possess conspicuous merit, this is only fair. For if the older puppies possess the advantage of age in the exhibition of their good qualities, it must be remembered they have also the same opportunity of showing their defects.

The number of ways in which a promising puppy of six months of age can go wrong between that age and twelve months, is legion. It then frequently becomes a battle between certainties and probabilities, and the judge has no easy task to fulfill. The more experienced the judge, and the stronger the class in older puppies, the less the chance perhaps for those of tender age, but this is speaking very generally. The raw judge is, however, apt to unduly favor a promising six months youngster. At that age a puppy has often grown all the head it is going to have. It exhibits a length of head out of all proportion to its size. The disproportion disappears in later life, but the inexperienced judge is not infrequently deceived, particularly so in the case of Fox Terriers. Moreover the six months old puppy will often display a sturdiness and strength of bone, which is very taking to the uninitiated eye but which as often as not means nothing whatever; another three or four months and it may prove just the reverse. The experienced judge is not likely to be deceived in this respect, and young puppies, unaccustomed to restraint, are unable to stand the ordeal of chain and collar, and the confinement of prolonged shows. Still there it is, in puppy classes the exhibits are to be judged as puppies, by their present merits and defects, and their future promise, their age being always taken into consideration.

When, however, puppies appear in open classes the position is wholly changed. They are no longer entitled to puppy considerations, they are competing with matured dogs, and the standard of points of maturity should be the only standard of guide. The judge should regard all alike from the point of view of grown dogs. That being the case, it is obvious a very young puppy can possess no possible chance. It can, for instance, possess no chance on the point of size. The size of a six months' puppy will naturally not be that of a full grown dog. A matured dog of that size would be a dwarf, and would be dismissed as such. If only on that ground the puppy must therefore go. But there are many other points beyond immaturity of size, and yet young puppies, unfit to be entered in an open class at all, which no seasoned breeder or owner would dream of entering, not infrequently win merely on the strength of what the judge, rightly or wrongly, considers their early promise. But it is not a question of promise, it is purely a question of what the exhibits are, at the time, in the ring, in accordance with the authorized matured standard, age not being taken into account.

It follows, therefore, that a very young puppy in an open class, unless indeed the other exhibits are conspicuously bad, cannot win. But it does not follow that no puppy can win. In fact, it is common enough to see a puppy, on its debut, run through the gamut of its classes and win first in puppy novice, limit and open with probably several specials to boot. To accomplish this feat, a puppy must be sufficiently old to compete with matured dogs on the same footing. It will probably be not much under the twelve months, though it may possibly be only eight. Some puppies mature at an extraordinarily early age, while others, especially hitches, may not furnish till well on in their second year. And early puppies have often exceptional chances. Certain puppies, those of the lasting sort, will sometimes go on improving with age, up to

a certain limit, say four years. Some may go on winning till they are seven. But, as a rule, youth will have its day, and puppies which make a debut to the flourish of trumpets will often wholly disappear from view altogether, or endeavor to earn their keep at stud on the strength of a few early successes. In Terriers, for instance, a ten months' old puppy may have a perfect front. In later life it may grow wide in chest, out at elbows, or coarse in shoulder. In puppyhood its skull may be lean and narrow; in matured life the head may be thick and stumpy. A hard coat may develop into a woolly one. Feet may play as superincumbent weight increases. It may grow too large in size. There is scarcely any end to possible future defects.

The puppy has, therefore, ample chances in puppyhood even in open classes. It has frequently more success than it deserves. It is judged in open classes as it is at the time. Its front may be clean and narrow, its size may be correct, it may be known that time may produce over size and coarseness of build; but, unless it is a close thing, the judge has not to take future probabilities into account, he is purely concerned with the open exhibits as they are. A case is known where a judge dismissed a puppy from an open class, although he subsequently said he considered it the best in the class, because he considered that it would eventually grow too large. It is contended that he was wrong. If the puppy was not too large at the time for a matured dog, it was entitled to be judged on its merits. A judge may think a puppy will be too large, but this was not an instance of any certainty. A large, over-grown puppy will frequently

THOS. S. GRIFFITH'S COLLIE "MORETON VESTA."

suddenly stop growing at an early period of its puppyhood, just as a backward youngster will often develop size at a comparatively late period; there is really no telling what a puppy is going to do. In this particular case, the puppy died shortly afterwards and the question remained unsolved, but whether the judge's predictions were correct or not, it is held that his judgment was at fault. The point is that in puppy classes, a judge is compelled to take futurities into consideration; in open classes, he is concerned with the present, and it is thought a study of these principles will help judges to avoid many inconsistencies that have hitherto obtained.

The result of the recent A. K. C. meeting relative to the value of winners' classes is embodied in the following resolution which was presented by Mr. Carnochan and adopted:

Resolved, "That the Rules Committee be instructed to report the following at the annual meeting as an amendment to the rules:—That each show be guaranteed one point towards championship. All shows to be rated on the actual number of dogs entered as follows: 1000 dogs or over, 5 points, 750 dogs and under 1000, 4 points; 500 dogs and under 750, 3 points; 250 dogs and under 500, 2 points; under 250 dogs, 1 point. On the Pacific Coast 400 dogs or over, 5 points; 300 dogs and under 400, 4 points; 200 dogs and under 300, 3 points; 100 dogs and under 200, 2 points; under 100 dogs, 1 point. The total number of points required for a championship to be 15, but the dog must make one win at a show whose rating is three points. Specialty clubs holding shows confined to their own breeds, 4 points.

Considerable amusement was created on Main street near the Stockton Courthouse late one afternoon recently by the efforts of a Bull Terrier to get the better of a movable lawn sprinkler in full operation. Somebody had given the hose a jerk and the own the sprinkler to one side, and the dog immediately darted for it. He got the sprinkler in his mouth and held on with the determination characteristic of the breed, although the sprinkler was sending streams of water down his throat. When half drowned he desisted for a few seconds, but tackled the sprinkler again with the same result as before. This was kept up for ten minutes before the dog acknowledged himself vanquished and turned his attention to the hose instead.

Pacific Northwest Field Trials.

A letter from Seattle states that the Pacific Northwest Field Trial Club, at a recent meeting, decided to hold its fourth annual trials on September 29th. Derby, all-age and membership stakes will be run. The entries for the Derby will close August 1st, forfeit \$5 and \$5 additional to start. The all-age entries will close September 1st, \$5 forfeit and \$10 additional to start. The starting fee in the membership stake is \$3.

The club is making a special inducement to bidders this year by offering a purse of \$50 (contributed by five of the members of the Board of Governors), which is offered as follows: \$15 to the bidder starting the largest number of dogs in the Derby and \$10 to the handler with the second largest string; \$15 to the handler starting the largest number of dogs in the all-age stake and \$10 to the second.

The Pacific Northwest Field Trial Club has some twenty members, and the annual dues are \$5. The officers of the club are: J. Ridelheimer, president; L. B. Youngs, first vice-president; T. J. A. Tiedemann, second vice-president; C. L. Lundy, third vice-president; E. B. Roy, fourth vice-president, and the Board of Governors are W. J. Miller, J. W. Considine, C. B. Yandell, N. A. Weedene and John Rippling.

A number of dogs from British Columbia, Oregon and Washington are already in training for the stakes, and good material seems to be well in evidence. California bidders will be accorded every possible consideration, and a goodly number of strings from them is to be looked for. The practical work which California dogs get the benefit of here in their work on bob-white quail has been found to be most beneficial to their field trial development.

Mr. F. A. Pontius of Seattle, who is the popular secretary and treasurer of the club, made a trip to Whidly Island recently and made all necessary arrangements for the trials, securing for the club

similar privileges as were enjoyed last year. The trials will be run on practically the same grounds as heretofore, and as the present season has been specially favorable for young birds, they are reported to be more plentiful than ever before. These trials are run on bob-white quail in wheat stubble.

The secretary will give all inquiries prompt and deserved attention. Address New York Block, Seattle, Wash. The club's energies heretofore have been well rewarded with a good entry, and the present season promises to be no exception. The entire entrance money is divided on a percentage basis for the purses in the several stakes.

The opportunity offered by Kenwood Kennels for getting a good, broken Pointer or Setter is a timely chance for a sportsman to get a good dog. An owner can become thoroughly acquainted and the dog well used to the master by the time the fall shooting season is on. Mr. Coutts' abilities as a trainer of field dogs is too well known to be further extolled here. See the announcement on page 15.

We notice in the advertising columns of an Eastern exchange the following extraordinary announcement: "For sale cheap, Great Dane dog, 13 months old, 44 inches high." After extolling the dog's good points, etc., the ad concludes "or will trade for Boston Terrier bitch."

We wonder if the dog's height was taken in his stocking feet? We have mentioned a local dog or two that were over 32 inches high, which statement was noticed in a quizzing way by Eastern scribes, but 44 inches is a corker. Maybe the types played a not unusual joke on all concerned and mixed things. Possibly the animal for sale was a giraffe instead of a Great Dane, or maybe, the ad should read 34 instead of 44 inches. Even at that, the presumption arises, that they must breed dogs in Buffalo for utility, alternating between picking fruit and hanging out clothes. The offer to trade a giant for a pigmy is evidently going from one extreme to the other.

Mr. Thos. S. Griffiths of Spokane has purchased the Collie brood bitch Craigmore Ethel, whelped April, 1902. She is by imp. Brandane Ranger out of Antoinette by Edgbaston Royal, and is in whelp to imp. Braehthead Commander, a big winner in Scotland and also at the Collie club show at Stamford, Conn. Moreton Vesta has a litter of six very fine puppies that are coming on well.

It is to be hoped that the contemplated field trials to be run by Nevada sportsmen will come off. The matter has the endorsement and good will of all of the Coast sportsmen and will be an inducing feature, possibly, in the creation of an annual Coast circuit. Full particulars and further information can be obtained by addressing Dr. C. E. Wilson, Elko, Nev.

W. B. Coutts recently sold a broken English Setter, Modic Chief (Buck Gladstone-Blanche H.) to Mr. Van Berger of this city. A promising young Pointer went to J. N. Peyton of Spokane, Wash.

We are pleased to announce that Mr. Norman J. Stewart will arrive in California again about the end of next week.

Save the Birds.

Prof. F. E. L. Beale, of the United States Department of Agriculture, is about to finish his studies of California birds in the orchards and vineyards, and will soon return to Washington to prepare his report, which will be of great value and a guide to all fruit growers in their attitude toward the feathered folk. Prof. Beale has devoted eleven years to the examination of 20,000 bird stomachs. He is the head of the economic ornithology at the United States Department of Agriculture. He was sent to California in response to the cry of the bee men and fruit men, that the birds are eating up their profits.

"We will prove or disprove their claims," says Prof. Beale to a writer for the Los Angeles Times, "by the examination of the stomachs of your birds; and if a remedy can be found to reduce the destruction of the linnet to the fruit or the king birds to the bees, it will be offered."

It is the work of the department of ornithology to study the economic production and distribution of birds and mammals in the United States, and to pass on the advisability of any importations. The department has in fifteen years accumulated, catalogued and preserved a collection of over 50,000 bird stomachs, and is in a position to place any bird on trial as to its economic assistance or injury to agriculture and mammal life.

The method is through the study of its digestive apparatus, and this study deals with minute things. Most of the work is done with the microscope magnifying four or five times, but at times more powerful lenses are used in the study of starch granules. As an example, finding these starch granules he is able to know what kind of grain the bird has eaten.

Botanists know little of seeds, especially weed seeds, which birds eat freely, and it is part of the work while here to make a collection of seeds for reference. One seed, of the myrica, or wax herry, defied investigation for three years, but was discovered. On the outside of this seed is a coating of wax. Under this coating is a layer of granules, surrounding a solid nut in the center like the paving stones in a street. In the stomach of the bird it would seem that there were three kinds of seeds, after the parts separated, while the whole berry is no bigger than a very small pea.

The seed of the poison oak is similar to the wax herry, and Beale says: "Herein some of your birds cause trouble. Many of your birds eat this seed for the wax, and then the hard seed part is disgorged, and will grow if it falls on the soil. This is the reason poison oak almost always grows along fences." California birds also eat the pepper herry and disgorge it again, and when it falls upon a tin roof and rolls along often puzzles one who hears it. In Kansas, fossils, glass beads and rubber bands and buttons have been found in the stomach of the crow.

"Perhaps the most interesting eater of California birds," said Prof. Beale, "is the road runner. I find they eat lizards, small snakes, mice, gophers, bugs, and I believe are an enemy of the tarantula. Your linnet is destructive to the fruit, because the bird is superabundant and has no enemies but the popgun.

The turtle dove, so common in California, is a good bird to destroy weeds. In one stomach I found over 9000 weed seeds, representing about twelve varieties. In the stomach of a red-winged flicker I found over 5000 ants, the kind so offensive to the sense of smell. The stonger the flavor of the insects the better birds seem to like them, and science cannot discover why poison oak, hurtful to man, is harmless to birds.

"The black scale is a bad thing in this country, but there are three birds here that eat it freely—the bush tit, Bullock's oriole and black-headed grosbeak. Owls and hawks are generally thought of as pests, but they do much more good than harm in killing mice, rats, moles and insects. The butcher bird or shrike is a freak, having the head of a hawk, but no claws to hold its prey. It pins small birds to the forks of trees or hangs mice on barbed wire or thorn bushes, there to be eaten at leisure.

"Even as people eat more oysters at one time of the year than another, so have birds their seasons of fruits and relishes. One reason birds damage fruits in California is because there are so few wild fruits or berries. The mocking bird loves the domestic blackberry, at times almost living on it."

So far President Beale has found little ground for the claims of the California bee men against the king bird.

There is cause for gratification, we think, from all sportsmen and those who take pride in the achievements of their country, that the American Team which went to England this month to compete against all nations for the Palma Trophy, should have been victorious from all points. It seems to us that not only the men who took part in the shoot are to be congratulated, but also those who manufactured the ammunition and rifles should come in for their meed of praise.

With what elation must the following cablegram have been sent:

LONDON, July 11, 1903.

To President Roosevelt, Oyster Bay,
American rifles, ammunition and men won victory to-day over Great Britain, Canada, France, Norway, Australia and Natal, and bring back Palma Trophy.
(Signed) LIEUT. ALBERT S. JONES,

Sec'y of the National Rifle Association of America. The New York Herald, in commenting on the event, said: "This sweeping victory for America and the extraordinary score of 1570 out of a possible 1800, were made with 30-40 regular factory cartridges, manufactured by the Union Metallic Cartridge Company, and were selected after exhaustive trials by the entire American Team in preference to all others for their wonderful uniformity and extreme accuracy."

Making Artificial Flies-- Amateur Work.

Amateur fly-trying is not only a pleasant recreation for odd and reminiscent hours but is practical as well. Most anglers who indulge in the practice of tying their own flies follow certain stereotyped lines in preparing their flies. The method employed by a well known fisherman and angling authority, Mr. Thos. S. Morrell, is interesting and is in brief as follows:

"The way in which I tie my flies," says Mr. Morrell, "is somewhat different from any I have seen described in point, and I believe superior to the old method in neatness and durability. I use the fingers only, dispensing with the vise. I discard wax, do not soak the gut nor hite it into ridges before fastening to the hook."

"Having all the materials before me, I select the hook, length of gut, tinsel, duffing, silk, hackle and wing feathers. I take a two-ounce vial, fill it quarter full of nicely broken gum shellac; then nearly fill the bottle with alcohol, and shake until thoroughly dissolved. The cork has a sharp-pointed stick running through it so as to just immerse the point of the stick into the liquid.

Take the hook by the left thumb and forefinger by the bend, the barb pointing downwards. Touch the shank all around down to the edge of the fingers with the shellac. Then take red sewing silk, fine but strong, and wind from six to a dozen turns, according to size of hook, from the fingers to the end of shank; turn over one loop and draw tight. Now place the silk worm gut under the shank and wind down to the fingers tightly and closely.

Take two half hitches, and again around the length of the part wound, with shellac; lay it away ten minutes and it will dry enough to proceed. Take a piece of gold or silver tinsel, four to six inches long; fasten one end by two half hitches just below the snell to the hook, and wind down on the bend one-quarter of an inch; then hack again and fasten as before leaving the end of the tinsel hanging loose. Take two or more fibers of feather and fasten on top for a tail, just above the tinsel; see that it sets straight and well up.

If you intend the body to be slender, fasten a small piece of floss silk of the color you intend the body to be, and wind with silk thread to within a quarter inch of the end of the shank. If you intend a full body, take a short piece of worsted yarn and fasten to the hook just above the tinsel, and wind smoothly and evenly to a quarter of an inch of the end of the shank; fasten, and cut off the end of the yarn close. Now wind hack your silk thread, closely and smoothly, so as to entirely cover the worsted yarn, to the tail. Then take the tinsel and thread together and wind tightly hack towards the end of the shank, leaving as much of the silk body visible as you think best to make a good finish; take two half hitches after touching the thread with shellac, draw tight, and cut end of tinsel off closely.

Now take the hackle you have selected, clip off the tip-end fibers and fasten just where your thread hangs, or, if you choose, a quarter of an inch lower, in which case wind hack your thread and take a half hitch at the desired point; fasten the hackle by the stub where you clipped off the fibers, and wind with both hackle and thread, closer as you approach the end of the shank. Fasten by a half hitch of the thread, and cut off the stub of the hackle closely. Touch the thread with shellac, and take one more half hitch. You are now ready for the wings.

Most trout flies have only one wing, but the best and most difficult to make are the two-winged. We will suppose only one. Take the feather or feathers you have selected and lay the stub end on top of the shank, the tip of the wing pointing away from it; hold in this position by the left thumb and forefinger. Touch your thread with shellac and take two half hitches drawn tightly, then turn hack the wing over the hook; touch the thread again with shellac, and take two half hitches over the bent feathers and around the hook as closely to the end as you can and not slip off. See that the wing sits right and does not lie too flat on the hack. Draw very tightly and cut off the thread close and your fly is complete, except the loop in the gut, which can be made either before or after the fly is made. To make this loop the gut must be soaked fifteen minutes. This is known as the reversed wing fly.

The two-winged fly is not usually made by reversing the feathers, although it can be so made. Each wing is put on separately; and it is much more difficult to make the head small. Neatness of finish requires that the head should be very small. This is always the great trouble with beginners. It is the correct thing for trout flies, but salmon and bass flies are often made with large heads. For trout flies, nature should be copied closely, but the large flies for salmon, bass and pickerel resemble no living insect, and the amateur can suit his own fancy. Trout flies are rarely made with mixed wings, and are worthless when so made. For salmon and bass the mixed wings or wing is very beautiful and most attractive.

It requires the eye of an artist to mix colors rightly either in painting or fly-making, and it is best, though many colors are used, to have one color predominate in each fly.

Have five or six colored feathers before you; clip off, say, a dozen fibres of each, and separate each fiber carefully. Make as many flies as you have colors, and lay a fiber of each color on each pile. Try to have the fibers of equal length. Now, if you wish your fly to have, say, a bluish shade, take double the number of blue fibers (or even more) to any other color.

We will suppose you have tied on your silkworm gut, tail is fixed, body made (the latter being of the same color that predominates in the wing), hackle on (you can make it the whole length of the body, or at the head to represent legs only), and all ready for the wings. Roll all the piles of fibers together in one

hunch carefully, so that the stub ends are even. You can tie them together if you choose, but this is not my practice. Touch your silk thread attached to the shank of the hook with shellac for about an inch, spreading it on the thread smoothly and evenly. Place your hunch of fibers on top of the shank and fasten by two or three half hitches drawn closely and tightly. After the shellac has thoroughly stiffened, say ten minutes, clip off the stub of the feathers closely and cover with the silk thread. Touch the head all over with shellac and the fly is complete; or you can make a head by taking a few turns of peacock herl, which is common in both salmon and bass flies.

For bass flies I usually dress the top of the wings with dark brown feathers, and for salmon flies with golden pheasant. Both are matters of choice or taste. The very gay flies should be on large hooks, the modest colors on medium size, and the very plain dark colors on small hooks.

The wings for most flies either for trout or salmon should stand well up. Most flies have the wings too flat on the hack, which I think a mistake.

The plain hackles are sometimes very successful in waters rarely fished or in preserved ponds; but in much-fished streams, where the trout are educated by great experience, only the young fry from four to six ounces can be so easily seduced. Neatness of finish, smallness of size, and a copy as nearly as possible of the natural fly latest on the water will call up the old patriarchs and he conducive to a full basket. There are a few flies that are almost always successful, because the natural fly they represent is more or less constantly on the water. The hackles may do very well on same days and in a particular state of the water and atmosphere when the trout cannot see clearly; but on bright, clear days and low water you must imitate nature closely to deceive the wary trout. This is my experience, and is not theory or book education."

Stocking Trout Streams.

Twenty thousand young rainbow trout were sent to Napa last week from the hatchery at Sissons for distribution in the streams of that vicinity. Twenty-five thousand young trout were also sent to St. Helena, and 30,000 to Calistoga from the same hatchery.

Wm. West and Wm. DeCarteret took 14,000 of the little fishes to Millikan Canyon, planting them both above and below the falls. C. R. Look took the remaining 6000 received at Napa to Saco creek and distributed them in that stream. Thirty thousand of the cut-throat variety were planted in the lake in Wild Horse Valley.

The Fish Commissioners have made the local angling fraternity happy for the time being in the distribution and planting of thousands of young fry in streams nearby this city.

These young fish are the Eastern brook trout variety (fontinalis) and have been received in this city during the week in consignments. One shipment of 40,000 brook trout fry came from Verdi, Nevada, and will be distributed in Paper Mill and in Lagunitas creeks, near Camp Taylor, Marin county. The North Shore Railroad will assist in the distribution of them. In addition to this shipment another of 75,000 arrived for streams in Monterey county, and are to be distributed in the Carmel river and other streams. They were brought from the Sisson hatchery.

In a few weeks 60,000 more will come from Sisson, in Siskiyou county, near the headwaters of the Sacramento river, to supplement the first shipment. These last will be distributed in Marin and Sonoma counties, and the work will be continued as far north as Cazadero.

The streams of Santa Clara are also to have a generous distribution of trout very soon. Dr. A. M. Barker, president of the Fish and Game Association of Santa Clara County, states concerning the fish to be sent to the streams in the Santa Clara valley by the Fish Commissioners:

"We expect to receive notice of a shipment of rainbow trout at an early date, which will arrive some time during the early part of August, instead of at the end of this month, as we had anticipated. We will probably receive between 75,000 and 100,000 fish. Last year we had about 50,000, and in 1901 not quite that number. Our fish will come from the hatchery at Sissons. They are given to us by the Fish Commission, and are transported without charge by the railroad company.

The fish are placed for shipment in large cans similar to milk cans. A man is sent with the trout to care for them. He must see to the cooling of the water with ice and keep it properly aerated. The constant motion of the cans in some measure aerates the water, but the guide must travel in the car with the fish in order to insure their protection, as they are easily killed. The matter of distributing the fish is left to volunteer workers, and there are always plenty of sportsmen ready to assist in this part of the distribution."

The Fly-Casting Club members will resume the casting contests at Stow Lake this afternoon and tomorrow morning.

Hammocks and Lawn Tents.

Minas Prietas hammocks can not be excelled. They are a hand-made Central American product, woven from a light, tough and strong grass fibre and dyed in bright colors with mineral dyes. They are lasting and comfortable; one can roll them up into a small compass the same way as is done with a silk India shawl. Skinner, the Sporting Goods man, 801 Market Street, has just received a new consignment.

Lawn Umbrellas for outing, camping, prospectors, invalids, for the summer cottager, etc., 8-foot spread, comfortable for two people. Light weight very strong, variegated or solid colors, put up in five minutes. Just see Skinner about 'em. You'll sure want one when you see it.

Jackson's Napa Soda untangles the feet.

County Exhibits at State Fair.

It has been decided by those who have charge of the arrangements of the coming State Fair that no competition will be made by the exhibit of Sacramento county against the exhibits of the other counties of the State on the ground that the fruit and vegetables raised in that county could be renewed each day if necessary and this would give Sacramento an undue advantage in the competition.

In addition to this the State Fair managers and their volunteer assistants will insist that fresh and perishable fruits can be renewed only on such days as will suit all of the counties, so that no one county will have an advantage over another in this respect.

The matter of getting up separate county exhibits will be given special attention and sub-committees will visit every county in the State and lay before the various Boards of Supervisors the ad-

vantages to be derived by an exhibit of their various products. Those exhibits may be made at little cost to the counties and yet be very interesting to the public at large.

Oiled Roads a Big Success.

Supervisor T. J. Field has had the road leading from Salinas to Monterey oiled for almost the entire distance and it is now one of the longest stretches of oiled roadway in the State. The work has been done in a thorough and satisfactory manner. Patrons of the road were inconvenienced only a few days after the oil had been spread along the road, but now they are blessed with a smooth, thoroughly packed and dustless highway, one over which it is a pleasure to drive.

A balky horse is a very annoying animal. It takes very careful management to cure him. Try working him to a harrow, or a plow, the middle one of three; then with two, being careful not to overload. If he cannot be cured he is practically useless.

English Butter Laws.

The Mark Lane Express reviews the various measures adopted or brought before the English Parliament to do away with fraudulent practices in the butter business. The latest measure under consideration is sweeping. One of the most difficult matters which the English board of agriculture has to deal with is the so-called "blended" butter, made by working in large quantities of moisture, which of course the consumer pays for at butter rates.

plainly on every package in letters at least half an inch long with the designation "Margarine" or "Adulterated Butter," as the case may be. None of the marks previously used, such as "milk blended butter," will be allowed. This is a hard blow, as it is not likely that many buyers will care to use a product plainly marked adulterated.

A horse turns 34 per cent of what he eats into power, an engine turns 20 per cent of fuel into power. Horse power, therefore, under some conditions is less expensive than an engine.

FOR SALE.

SIDNEY DILLON FILLY; A GREAT PROSPECT; kind and gentle in every way; 3 years old; will weigh about 950; without a fault or blemish. Price \$750. 1766 Ninth Avenue, East Oakland.

The World's Greatest Shooting Record

FRED GILBERT, of Spirit Lake, Ia., since Jan. 1, 1902, has shot in competition at 5765 Targets, breaking 5532 or 95.9 per cent, using a

THE BEST PLACE! THE BEST TRACK! THE BIGGEST MEETING! LOS ANGELES RACING ASSOCIATION LOS ANGELES

Three Weeks' Racing. OCTOBER 10 to 31, inclusive. ENTRIES TO HARNESS RACES CLOSE SEPTEMBER 1, 1903.

TROTTING STAKES.

Table listing Trotting Stakes: No. 1—THE SOUTHERN CALIFORNIA STAKES...2:24 Class...\$1000, No. 2—THE HOTEL STAKES...2:30 ".... 500, etc.

PACING STAKES.

Table listing Pacing Stakes: No. 10—THE LOS ANGELES STAKES...2:15 Class. \$1000, No. 11—The Green Class (horses without records)... 500, etc.

CONSOLATION CLASSES.

TROTTERS. A PURSE OF \$400 will be given for Trotters eligible to the 2:17 Class who have started at this meeting and not won first or second money. PACERS. A PURSE OF \$400 will be given for Pacers eligible to the 2:15 Class who have started at this meeting and not won first or second money.

Nominators have the privilege of naming two horses from the same stable or owned by the same person on one entrance fee. Nominators in any race that should fail to fill may on September 8th transfer their entry to any other class that filled in which their horse is eligible.

MAKE YOUR ENTRY ON TIME

And be sure that it is postmarked not later than September 1, 1903.

CONSIDER THIS! You can enter the same horse in three or more classes and have plenty of time between races. The length of the meeting permits of the program being arranged so that every horse in attendance can be started in several races. Added Money Stakes for Running Horses will be published in this paper at an early date.

CONDITIONS.

Entries to close Tuesday, September 1, 1903. Entries not declared out at 4 o'clock P. M. on the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track. Stakes will be divided into four moneys: 50, 35, 15 and 10 per cent. Entrance fee five per cent of Stake. 2 1/2 per cent of Stake in cash, draft or check MUST accompany Entry, balance due and must be paid the first day of the meeting. 5 per cent of the amount of the Stake additional from money winners.

J. W. BROOKS, President.

CAPT. THOS. B. MERRY, Secretary ROOM 506 BRADBURY BUILDING, LOS ANGELES, CAL.

Sale of the Brothertown Herd.

The closing out sale of this herd of purebred Holstein-Friesians held at Deansboro, N. Y., on July 15th was a notable event in the history of dairy cattle breeding. The sale was made to settle a partnership and the herd itself had been collected together but two or three years, the animals which gave it fame having been purchased within two years. To Holstein-Friesian breeders the sale was chiefly interesting because it included the world's record butter cows, Sadie Vale Concordia, thirty pounds 10.5 ounces and Mercedes Julip's Pietertje, twenty-nine pounds 5.7 ounces and several representatives of these families. Both of these cows bore official records, which were made under the auspices of the State Experiment Station representatives, who determined the weight of the milk and the butter fat. These tests are the largest ever scientifically determined, and gave great fame to all representatives of the families from which they sprang. Sadie Vale Concordia was bred by the firm of Yeomans & Sons of Wolworth, N. Y., and it would appear from her blood lines that this great richness and amount of product was due to a skillful blending of the blood of America, Concordia and Netherland Prince, each famous animals of their day.

The Mercedes Julip's Pietertje lines take their richness perhaps most largely from the famous Mercedes, winner of the Breeder's Gazette Challenge Cup early in the breed's history in competition with the great Jersey cow, Mary Anne of St. Lambert, in a thirty-day test.

Sadie Vale Concordia was purchased by Hon. L. J. Fitzgerald of Cortland, N. Y., at \$2,200, and added to an already very superior collection of cattle of this breed. Her son, Sadie Vale Concordia's Paul De Kol, four years old, brought \$2,300, being actively bid for by Mr. Fitzgerald, C. F. Hunt of Manlius, N. Y., and F. E. Gaus of Utica, N. Y., finally dropping to Mr. Fitzgerald. Three other animals of this family, one three-year-old and two yearlings, brought \$1,310, making a total for the five head of \$5,810.

Mercedes Julip's Pietertje, last year's world's champion, developed by South Side Farm, White Bear Lake, Minn., with a test of twenty-nine pounds 5.7 ounces, was the subject of a spirited competition in bidding between Mr. Fitzgerald Mr. O. U. Kellogg of Cortland, N. Y., and Mr. Gaus, who carried her up to \$1,700, when Dr. W. T. Housinger of West Chazy, N. Y., took a hand and the bidding advanced at \$25 jumps between Messrs. Housinger and Gaus, finally going to Dr. Housinger at \$2,200.

A three-year-old daughter of this cow was sold to Mr. Gaus at \$665 and a ten-month's calf to Mr. Fitzgerald at \$400, making \$3,065 for the three members of the family.

Sixty-three head were sold for \$17,500, an average of \$280 per head, a figure the highest since the flush times of the "eighties." The three mature hulls sold at an average of \$1,148, and the calves at \$110 average.

The thirty-one mature females (dropping out four defective cows that averaged \$87.50), brought \$10,360, an average of \$334. These results are very gratifying to breeders and indicate the widely spread demand for and popularity of this great dairy breed, and this point is still further emphasized by the fact that of this entire number of cows less than one-third were possessed of official records and were sold simply on their merits as breeding animals.

Although a hog is an omnivorous animal and will eat almost anything, the quality of the ration must be good. Poor corn, poor wheat, poor bran, poor slop will not bring good results, no difference what the breed of hogs.

The horse, although the most useful of our animals, is the most abused.

The Average Farmer and Pure Bred Poultry.

It may take some time to induce the average farmer to invest in pure bred poultry. There are several reasons why this happens to be true. One of them is that the average farmer is not one that is in the habit of spending his money with a free hand; he wants to be sure he is going to better himself before he will invest his hard-earned money. Pure bred poultry is not a new subject to the average farmer, and many of them have improved their stock with a pure bred male, but a majority of them will take time to think the subject over and consider it from every point of view before he will pay the price of pure bred stock. By the average farmer I don't mean the progressive one—the progressive farmer's poultry is now away above the average. If we glance back over the last few years, look into the different interests of the country and compare them with the present time I think we will find that no branch of the agricultural development has turned out as well as the poultry industry. We don't have to turn back many pages of memory to the time when only a few fresh eggs could be had in the coldest days of winter, and when the farmer that paid more than market price for a change of blood for his fowl was looked upon as the man who bought a gold brick. The change for the better has come through the efforts of these progressive farmers and poultrymen who saw the chance of making a few dollars from better poultry, and the reward has not only been in dollars and cents, but it has been a pleasant task for those that love the art of standard breeding, and it has aroused the ambition of the average farmer and has put him to thinking.

The original ancestors of the up-to-date fowl of to-day are no more to be compared with their prize-winning descendants than is the ox-cart of the past compared with the automobile of the present. It is up to the average farmer to spend a few dollars for pure bred poultry, thereby so improving his stock that he may be able to send to the market and his customers better quality of stock and eggs, and which will return to him better profit and a handsome profit. To sum it all up the farmer who is to engage in breeding poultry must breed the "real thing" unless he is satisfied to do a small local business and sell at low prices. Pure bred stock of all varieties is having a "boom" at present; you can't call it a "fad," but simply a part of the general progress in the line of better farming, for poultry is the "finished" product of the farm, the source of the greatest immediate profit and the best assurance of future success. What a small number of people out of the great multitude that have any idea of the greatness of the poultry business.

Alfalfa Don'ts.

- Don't sow alfalfa on poor soil.
- Don't sow alfalfa on wet soil.
- Don't forget to clip it three times the first year.
- Don't turn any stock on it until the next May.
- Don't let alfalfa hay get dry before raking.
- Don't fail to cut your hay in time. That means to be ready to cut by June 1.
- Don't ever let your stock on alfalfa meadows in cold weather.
- Don't sow alfalfa seed on unprepared soil, as you do clover.
- If it fails with you, manure the land and try again.—Joseph E. Wing, in *National Stockman and Farmer*.

With pork as high as it is, few things will be too good for the brood sow. In trying to "push" her there may be danger in overdoing the matter. Corn produces too much fat; feed as much clover, oats, grass, etc., as she will eat.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

Sheep Notes.

Size is very important in a show animal but quality must not be sacrificed to obtain it.

Keep the baby-fat on your lambs; when they have lost that they have lost their growth.

Weed out all the poor ewes at weaning time. Let the quality of the lamb be the criterion of the quality of the dam.

Among the best investments a sheep-breeder can make is the buying of a dipping tank and a few gallons or cases of dip.

Play sly of a sheep that "wobbles" as he walks; he has been overfed and is nothing less than a foundered and useless animal.

Don't attempt to wean your lambs on a dry burnt-up pasture. Nothing affords a more favorable weaning ground for the lamb than the rape field or second growth clover.

Every lover of pure-bred sheep should make every effort to attend his state fair for no better opportunity offers for seeing really good individuals of the various breeds than do such fairs.

If you have occasion to dock or emasculate lambs at this season of the year some agent by way of preventing the attacks of the blow-fly should be employed. Tar is one of the best for this purpose.

Among the most important factors in the successful feeding of show sheep are regularity in feeding, regular and gentle exercise, and abundant supply of succulent rations and the avoidance of excessively heating foods.

Aged rams are very liable to suffer from stoppage of the water. One of the best remedies for this trouble is a dose of epsom salts, followed by a dose of sweet nitre. Should this not give relief in about five or six hours give eight grains of belladonna.

Nowhere can we find bloom in a higher state of perfection than in the healthy suckling lamb and the ewe that has lost her lamb and become fat on common pasture. Either of these are as mellow and firm to the touch as velvet and gutta-percha and no flabby foreflanks or rickety legs are found in their company.

In cases where a dram of hyposulphite of soda, a dram of ginger and three drams of spirits of ammonia do not prove effectual in curing the bloot, the trocar should be employed. In its use care should be observed that the kidneys are not pierced. It should be inserted in the most prominent distention on the left side of the victim.

Foot-rot must be attacked by the shepherd in the most determined manner if he ever hopes to cope with the disease successfully. The most important part in the treatment of this scourge is the getting at the seat or foundation of same with the knife and caustics. Every loose or detached piece of hoof should be cut away and any of the caustic preparations recommended in past numbers of this paper applied.

In-Breeding.

Be sure you know what you are doing before attempting much in the way of in-breeding. If you decide to raise say two litters of in-bred pigs it had better be some time when you are pretty sure you will have at least two litters more than you will need. The chances are you will get nothing at all. In most cases the results will be disastrous from all points of view.

While this is true the fact remains that in most breeds of live stock, and in hogs particularly, most of the improvement and advancement has come from at least line breeding and from in-breeding. Probably the best animal the writer ever produced was from the mating of litter brother and sister. But a good animal produced in this way is nearly certain to be very costly if the number of failures are taken into consideration.

For a very great majority of breeders

the best, safest and most profitable method is to get a complete outcross every year. To a certain extent this is like crossing of breeds, which from a pork standpoint is always a good thing for the first cross. But a thoroughbred conducted upon the theory of absolute freedom from in-breeding is rarely if ever a uniform one. That is, uniform to such an extent as to show a "herd type," which is the thing more than any other that marks the genuine "bog man."

Complete, or what are sometimes termed violent, outcrosses will not produce uniformity. This also holds true of the mating of animals that are strikingly dissimilar, as a coarse boar on a fine sow or vice versa. The best results, or at least the surest results, are obtained by having a similarity of form and characteristics between the boar and sow, and then if the breeding is slightly similar, it is not likely to be a detriment when intelligently used.

Little pigs will do well when raised by hand if fed on sweet milk. They will soon eat soaked corn, or oats and corn without any soaking. A good pasture and a clean bed will keep them from getting mangy.

A bull can be safely bred at one year of age. Breed to only two cows a week until he is eighteen months old.

Sober up on Jackson's Napa Soda.

A Body Wash

that will take out and prevent colds, pneumonia, etc., is absolutely essential to the race horse owner.

Tuttle's Elixir

will do all of these things better and more surely than any like preparation ever known. As a Leg Wash it keeps the speed end of a horse always in perfect tune. Apply to legs and bandage lightly. Sponge the body with it and throw on light blanket.

Tuttle's American Condition Powders—a specific for impure blood and all diseases arising therefrom.

Tuttle's Family Elixir is unexcelled as a remedy in the home. We send a sample free for 6c in stamps, merely to pay postage.

Send at once for our 100-page book, "Veterinary Experience," which we mail free. Tuttle's Elixir Co., 437 O'Farrell St., San Francisco, Cal.

Beware of so-called Elixirs—none genuine but Tuttle's. Avoid all blisters; they offer only temporary relief, if any.

SITUATION WANTED.

COACHMAN OR GROOM—By a thoroughly competent, experienced man. Best of recommendations as to ability, sobriety and honesty. Country or city. Has been with some of the best families in Ireland. Address JOHN CONNELLY, care of Mrs. Edwd. Ford, 14 Eugenia St., city.

Typhoid from Milk.

Last April a cow at an Oregon experiment station was fed on pure cultures of typhoid bacilli for fifteen successive days. Cultures were made from the milk night and morning, but only two colonies of typhoid developed. These were probably accidental inoculations. At the same time examinations and cultures of the excreta and urine of the cow were made, but no colonies of typhoid could be induced to grow. The experiments had no effect upon the health of the animal. Similar experiments were made with various other kinds of bacilli, but colonies could be developed in neither the milk nor the urine, nor the excreta of the cow.

In order to determine whether typhoid bacilli would enter the cow's udder through the teat, by the cows wading in stagnant water containing this germ, the teats were inserted in a bottle which contained pure cultures of the bacilli. Twelve hours later and just before milking each teat was disinfected. This operation was repeated morning and evening for five days, but no colonies of typhoid appeared. The cow was a Jersey, about four years old, and a fair subject for the experiment. The report of the experiment says:

It is evident that outbreaks of typhoid fever come not from the milk as it leaves the cow, but from vessels which have been washed with contaminated water. The results obtained by this investigation are conclusive, first, that a pure culture of typhoid bacilli, mixed with water and given to the cow to drink, did not pass into the milk; second, that the bacilli did not pass alive from the cow with the excreta; third, that they did not pass alive from the cow with the urine; fourth, that they were not taken into the udder by capillary attraction through the teat orifice.

It is generally believed that micro-organisms gain access to the milk in a cow's udder through the teat, but in this case they did not. However, the result might not be the same with all cows. A teat possessing weak sphincter muscles is imperfectly closed at its extremity, and must necessarily be more accessible for bacteria. Another teat having good muscular contracting power would be less likely to admit germs.

It does not follow that the danger from a cow's using polluted water does not exist. All cows may not have the power of rendering the germ inert, and continuous use of such water for a great length of time might yield far different results. If a cow becomes sick from any cause it is difficult to tell how the ailment may affect the mammary glands or milk secretion. It would certainly be far better that she be permitted to drink only the purest water. Sloughs and stagnant water ponds in pastures should be fenced off so as to keep cows from them.

Stagnant water does not always contain typhoid fever germs, yet it is a very likely place to find them. A pond of stagnant water contains an immense number of germs, which in warm weather multiply

rapidly. As they are at that time in an active condition of life, they must feed upon something in the water. If they live and feed they must also secrete. Their secretions are chemicals and compounds not found in pure water. Therefore water charged with these germ products is often unwholesome both to the human and to the animal body. Although such water may be freed from germs by boiling or other means, the chemicals remain.

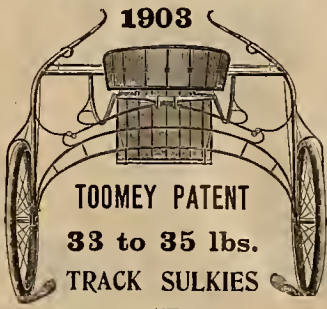

These experiments were conducted by E. F. Pernot, of the chair of bacteriology.

Cream Separator in Farm Dairy.

Among other things that have assisted in improving the quality of butter produced on the farms is the increased use of cream separators in the home dairies, says *Goodall's Farmer and Drover*. The deep pan and shallow pan methods of setting the milk each have their advocates, but all who have once used the separator will testify that it is superior to all other methods of taking the cream from the milk. In the first place, no difference how carefully the milk is handled from cow to churn, more or less impurities get mixed in it, which will injure the quality of the butter. The separator will remove every vestige of dirt and impurity of every nature, and turn out the cream without taint of any kind. In the second place, more cream can be secured from a given quantity of milk by its use than from the same quantity by the usual method of setting and skimming. In fact, the increased amount of butter made from a fair-sized herd by the use of the separator will pay for the machine in a few months. In addition to the saving in the amount of cream gathered and the elimination of impurities the skim milk can be fed to the pigs and chickens almost as warm and fresh as it comes from the cow, and it will be much more palatable and acceptable to them. Butter fat is too expensive to feed pigs and chickens on, but they get considerable of it when they are given milk skimmed by the usual method. When fed to calves it is very much superior to the ordinary farm skim milk, notwithstanding the fact that all the butter fat has been removed. When fed to them almost fresh from the cow, with flaxseed meal added, if desired, it will give much better results than the sour skim milk which is fed cold or scorched in a pan in an endeavor to warm it. The separator should have a place on every farm where any attention is paid to butter production beyond the needs of the home table. Experience has proved that where the farm dairy herd comprises eight or ten cows it will pay to invest in a separator, although one lady who is milking five cows claims that the use of the separator increases her output as much as another cow would, and she finds it an excellent investment even in her small herd.—*St. Louis Journal of Agriculture*.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Used Ten Years
For Spavins, Ringbone, Splints, Curbs, and all forms of Lameness, Lurches or bony enlargements.

CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET. IT PENETRATES and DRIES IN quickly and DOES NOT GUM and FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements. It gives natural nourishment to the foot and incites a rapid, healthy growth--ALL DRYNESS AND BRITTLENESS quickly disappears. QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed. It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed. It PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH, STRONG, ELASTIC WALL and HEALTHY FROG--A FOOT WHICH WILL STAND WORK on race courses. Many of the best owners and trainers state that to track work nothing equals it. In many cases horses have reduced their records several seconds, due to its use. It is a CERTAIN CURE for THRUSH and SCRATCHES. We Guarantee That It Will Do What We Claim and Will Refund Money If It Fails. PRICES:--Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2 1/2-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free. Don't fail to read "ad." giving information concerning Campbell's Iodoform Gall Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others. JAS. B. CAMPBELL & CO. Manufacturers, 412 W. Madison St., CHICAGO, ILL.

GOOD ONLY UP TO AUGUST 15, 1903

We are pleased to announce that we have made arrangements whereby we are able to renew our offer of the MAMMOTH CHART, SHOWING SKELETON OF THE HORSE

as a handsome premium to new subscribers and others who will pay us \$3 for subscription to the BREEDER & SPORTSMAN between July 1st and August 15, 1903. This Chart is lithographed on tinted paper and is 22x28 inches. It will be found invaluable to every owner of a horse as the names of all the Bones are given, as well as the names of the Tendons and Ligaments of the legs. By studying this Chart almost any lameness can be located and the proper remedies applied. The accompanying engraving will afford an idea of its appearance. No

similar Chart has ever before been published. The artist, in preparing this Skeleton, visited the American Veterinary College in New York City and made drawings from actual skeletons, thus insuring absolute accuracy. This Chart sells for One Dollar, but any reader can have it who will remit THREE DOLLARS

BEFORE AUGUST 15, 1903.

It will be mailed, carefully packed, in a heavy pasteboard tube for safety. Address

BREEDER AND SPORTSMAN, 36 Geary St., San Francisco.

An Australian Pacing Horse that holds the World's Record
of 6.50 for Three Miles

THE BEST PLACE! THE BEST TRACK! THE BIGGEST MEETING!
LOS ANGELES RACING ASSOCIATION
LOS ANGELES

Three Weeks' Racing. OCTOBER 10 to 31, inclusive.
ENTRIES TO HARNESS RACES CLOSE SEPTEMBER 1, 1903.

TROTGING STAKES.

Table with 3 columns: No., Name, and Amount. Includes items like 'THE SOUTHERN CALIFORNIA STAKES' and 'THE HOTEL STAKES'.

PACING STAKES.

Table with 3 columns: No., Name, and Amount. Includes items like 'THE LOS ANGELES STAKES' and 'The Green Class'.

CONSOLATION CLASSES.

TROTTERS. A PURSE OF \$400 will be given for Trotters eligible to the 2:17 Class who have started at this meeting and not won first or second money.

PACERS. A PURSE OF \$400 will be given for Pacers eligible to the 2:15 Class who have started at this meeting and not won first or second money.

Nominators have the privilege of naming two horses from the same stable or owned by the same person on one entrance fee. Nominators in any race that should fail to fill may on September 8th transfer their entry to any other class that filled in which their horse is eligible.

MAKE YOUR ENTRY ON TIME

And be sure that it is postmarked not later than September 1, 1903.

CONSIDER THIS!

You can enter the same horse in three or more classes and have plenty of time between races. The length of the meeting permits of the program being arranged so that every horse in attendance can be started in several races

Added Money Stakes for Running Horses will be published in this paper at an early date.

CONDITIONS.

Entries to close Tuesday, September 1, 1903. Entries not declared out at 4 o'clock P. M. on the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

The Association reserves the right to start any heat after the fourth score, regardless of the position of the horses. All stakes not filling satisfactorily to the Board of Directors may be declared off.

J. W. BROOKS, President.

CAPT. THOS. B. MERRY, Secretary

San Francisco, Saturday, August 8, 1903.

VALLEJO WILL OPEN THE CIRCUIT on Thursday next with the best lot of harness horses that has ever congregated at the Navy Yard town's track. There are two races on the program which are alone worth going to see. These are the 2:23 trot and the 2:17 pace. The latter will doubtless be held on the opening day and it will bring out a field of horses that cannot be excelled in good looks by any field of like size that will start in the United States this year. And there are a number of them that can pace a mile in 2:15 or better so that fast time is certain. The 2:23 trot is also certain to prove a great race. It will have a big field of starters and will bring out some of the best green horses in training in California this year. All the other races on the program have good fields. The Vallejo track was never in as good shape as it is at the present time and all that is required to make the meeting a big success is a good attendance. Manager Thos. Smith will have everything ready when the bell taps for the first race on Thursday next, and we suggest to our San Francisco readers that they cannot pass a pleasanter day than will be afforded by a trip to Vallejo during the meeting. Vallejo can be reached by either train or boat. The Southern Pacific trains run to the Navy Yard town, and passengers can take the boats at 7:30 or 10 A. M. from the foot of Market street, which connect with these trains at the Oakland mole. Then the steamer Gen. Frisbie, that plies between Mission street wharf and Vallejo, furnishes a delightful bay trip at the small cost of one dollar for the round trip. The Gen. Frisbie leaves San Francisco at 9:45 A. M. landing her passengers in Vallejo by noon, and leaves Vallejo on her return trip at 6 P. M., giving her passengers the entire afternoon to view the races, and reach home by 8 P. M.

PLEASANTON, where the best winter training track in the world is located, where more champion trotters and pacers have been made than anywhere, and which has held for years and is still entitled to the name, "The Horse Centre," will be the scene of a high class harness meeting this year in September. The Breeders' association has accepted the invitation of its citizens and will hold a four days' meeting at the historic track during the week immediately following the State Fair. The Pleasanton track is not only the best winter training track that has been built in America up to date, but the new management has clearly demonstrated during the past few months that there is no better summer track in California. Work and water have not been spared and the footing is as firm and safe on all parts of it at the present time as during any part of the winter months. The Breeders Association has prepared an excellent program for the Pleasanton meeting which appears in our advertising columns to day. Fifteen events have been opened. The Pleasanton Stake, \$800 is for 2:24 class trotters and the Livermore Stake, \$800 is for 2:20 class pacers. In addition to these stakes, there are six races for \$400, two for \$350, and five for \$300 each. The entries to these races will close Saturday August 22d, which is after the Vallejo meeting and just prior to the opening of the Breeders meeting at Petaluma. Pleasanton is such a convenient centre for horsemen to meet that there is certain to be a big entry list, and the attendance will doubtless equal that at any meeting held in the State this year. A large number of new box stalls have recently been constructed at the Pleasanton track, and manager Kelly says he will have the fastest and best track of the circuit when the Breeders call the first race of the meeting.

NOTE THE CHANGES in the advertisement of the State Fair this week. Look over the list of purses offered and make as many entries as you can. It is the duty of horsemen to help make the State

Fair a big success this year. The new Board of Directors cannot make every reform necessary at once, but it is doing its best to make the fair what it should be and what it was intended to be. The live stock display will be high class this year, and the county exhibits promise to be ahead of anything heretofore shown. The racing furnishes the amusement end of the program and harness horse owners especially should see that the harness events have large lists of entries and furnish good contests. The track will be better than it ever has been. The work being done on it now is just what has been needed for several years and there is every promise of the track being not only fast but safe. The California State Fair has been one of the State's best institutions. Let all help to improve it this year and make it the equal of any State Fair in the Union.

ONE OF THE GREATEST RACE MEETINGS held annually is the autumn meeting of the Westchester Racing Association, at Morris Park, New York. Here all the best thoroughbreds of the year congregate and as the races are run under the auspices of the Jockey Club and the National Steeplechase and Hunt Association they have a class that is equalled at few tracks in the world. In our business columns to-day will be found advertised a list of stakes for this meeting, which are to close at midnight, Saturday August 15th, and also a number of stakes to be run in 1904, 1905 and 1906. The Withers and the Belmont Stakes for 1905 and 1906 have been increased. The Withers will have \$5000 added, and Belmont of 1906 will be a \$25,000 stake with the distance restored to a mile and three furlongs. There is every probability that the races of 1905 and 1906 will be run over the new Belmont course and if so it may be run in June, somewhat later in the season than heretofore. Every breeder of thoroughbreds should enter his colts and fillies in the big stakes provided for them. In no other way can he add to their value at the annual sales held each year. A colt eligible to the big Eastern stakes will attract the attention of the wealthy Eastern buyers when more promising colts that are unstaked will be passed by unnoticed. Remember the date of closing these stakes is August 15th.

LOU DILLON has again lowered her record. Last Friday she trotted a mile at the Cleveland track in 2:02½, lowering her former record three-fourths of a second and leaving but a half second between her present mark and the world's championship. Her quarters were in 0:31¼, 1:00¾, 1:31¼ and 2:02¾. Lou Dillon has never started in public so far but she has lowered her former mark. That she will dethrone Cresceus is believed by nearly every horseman in America, and that she will be the two-minute trotter is expected by some. It is a long way between 2:02 and 2:00 however, and it seems like asking a little too much of the little mare to expect her to reach the two-minute mark. But she is beyond question the fastest trotting mare the world has ever seen, and that is glory enough for her first year, even though she fails to trot faster than her present record. Millard Sanders is driving Lou Dillon in all her contests against time, and if any man on earth can get her around the oval in two minutes he is the one that can accomplish the wonderful feat. There is not a person in California but would throw up his hat and cheer to see him do it.

Program for Breeders Meeting.

The Board of Directors of the Pacific Coast Trotting Horse Breeders Association met Thursday of this week and arranged the program for its four days' meeting at Petaluma as follows:

WEDNESDAY, AUGUST 26.

- 1—2:30 Trot..... 11 eligible
- 2—Pacific Slope Stakes..... 22 eligible
- 3—2:15 Trot..... 9 eligible

THURSDAY, AUGUST 27.

- 1—Three Year Old Trot..... 12 eligible
- 2—Breeders Futurity Pace
- 3—Free For All Trot (not closed)

FRIDAY, AUGUST 28.

- 1—2:17 Pace..... 9 eligible
- 2—Breeders Futurity Trot
- 3—Free For All Pace (not closed)

SATURDAY, AUGUST 29.

- 1—Green Class Pace..... 10 eligible
- 2—California Stakes..... 21 eligible
- 3—2:17 Class Trot..... 7 eligible

The list of eligibles for the two big stakes offered by the association are as follows:

THE CALIFORNIA STAKES, 2:24 CLASS TROT—\$2000.
Geo. W. Kingsbury's h g Charles H.
C. A. Arvedson's h s Sutter Maid.

C. Whitehead's s g Deputy.
F. C. Lusk's b g Sproul.
S. K. Dougherty's br m Sonoma Girl
J. D. Carr's ch s Larkin W.
C. E. Clark's b g Rapides.
H. W. Goodall's ch g Dr. Hammond.

Pacing, 2 year olds; Solano County horses—B. F. Rusb, b f Suisun; W. L. McDonald, h g Sid Abbott; Geo. V. Kennedy, g f Sweetheart; B. Shouse, s c Abe Lincoln.

JOTTINGS.

VALLEJO WILL OPEN THE CIRCUIT on Thursday next, and some of the best racing ever seen in California will be given. This is not an idle boast, written for advertising purposes, but a statement made with all sincerity after looking over the list of eligibles to the purses offered. The 2:23 trot and the 2:17 pace give every prospect of being up to Grand Circuit class. In both these events the class of horses entered is fully equal if not better than has been seen on a California track in the slow classes for years. It need not surprise anyone if there are ten starters in each race, and as nearly every owner thinks he has a chance for first money the result should be a hot contest and fast time. In the 2:23 trot there were seventeen original entries and nearly every one has been paid up or a substitute named. There are four or five of these entries that have shown miles as good as 2:15 in their work and one or two have beaten this quite a bit. But work-outs in 2:15 are not guarantees that a horse can trot heats in that time in the race, and there will be several starters that will not show within ten seconds of their "working" time when they get the word to start for the money. However, I expect to see 2:15 equalled or beaten in the race. All the heats will not be that fast, however, and the horse that trots all his heats as fast as 2:18 will not be behind the money in my opinion. Among the most promising candidates for first money are Capt. Goodall's Dr. Hammond that took a pacing record of 2:14 last year but is now a clean gaited trotter; Little Babe, a handsome black mare by Bradtmoor that took a mark of 2:25 over the Dixon half mile track this year in the first race in which she ever started; Louise Croner by Wildboy, a gray mare that has shown very fast halves and may be in shape to go the route; Chln Wa a Fresno gelding that has shown some very fast trials; T. C. by Nutwood Wilkes that has beaten 2:20 several times this spring, and Tom Smith's mare Tribby that is showing well this year. It is not likely that Sweet Marie by McKinney will be here as she started at Seattle last Saturday and she will hardly be shipped south before the Breeders meeting, if then.

The 2:17 pace for \$1000 will probably be held on the opening day of the Vallejo meeting. If there is any money among the harness horse followers in California this year this should be a hot betting race with three or four horses selling out, and about six or more in the field. I shall expect to see the field win. Among the entries that have shown winning speed are Rajah that is reported to have beaten 2:08 at San Jose last week, Miss Georgia that is credited with a mile in 2:09½, Ben F. that has shaded 2:11, Tom Carneal that has beaten 2:15 more than once, The Mrs. that was a close second in 2:13 last year on two occasions but failed to get a mark, Cuckoo, one of the slickest moving hopped pacers on the coast, Monroe S. that took a mark of 2:16½ last year and has been working quarters in 31 seconds, and several others "too numerous to mention." As a certain raiser for the circuit this race will be worth being on hand to see.

The program of the Breeders meeting at Petaluma, which is printed in this issue of the BREEDER AND SPORTSMAN, is one of the best ever arranged for a harness meeting in California. I doubt if there is a state of the Union, outside of New York and Ohio, where so many local entries could be secured for a four days' meeting. A program like the one arranged for Petaluma by the Breeders would draw five thousand people every day on any of the Grand Circuit tracks. When it is remembered that the programs at Detroit, Cleveland, Buffalo and the other places down the Grand Circuit draw horses from all parts of the United States, the showing made by the Breeders and other associations in California each year is wonderful and proves that all the talk about the decadence of the harness horse business here on the coast is unwarranted. It is true that nearly all the big stock farms have gone out of existence, but there are as many individual breeders as ever and the breeding, training and racing of trotters and pacers continues to have a strong hold on the people. There have been more well bred mares bred to good stallions in California during the past three years than during any previous three years of the State's history, and we believe there are more people interested in harness horses now than ever before. The horse breeding industry is in much the same condition as the mining of gold. In "the days of '49," when the creek beds and gulches of California were giving up their stores of the yellow metal to whosoever chose to dig for it, it was the State's leading industry, but now the raising

of wheat and fruit are overshadowing it and not half the interest is attached to the digging of gold as was formerly the case, although there is more of it being done than ever. When Senator Stanford, L. J. Rose, Count Valensin and others were among those who made heavy entry lists each year, and were starting horses for records at every meeting, and selling colts at fabulous prices, the harness horse industry filled a large space in the public eye. Now that 2:15 speed is common and a 2:10 horse no sensation, there is not so much talk about trotters and pacers, although there are more stallions in service and more mares bred than ever before.

T. W. Barstow of San Jose, who owns the stallion Nearest 2:22 that is an own brother to John A. McKerron 2:05½, was in the city the other day and gave me a picture of a two weeks old colt he owns that holds a world's record. The colt has been named Nearest McKinney as he is by McKinney out of a mare by Nearest. The record he holds is in regard to the manner in which he was bred. His sire and dam were

not within two miles of each other when he was got as he is one of the "artificial" colts that are becoming so numerous. The strange part of it is, however, that his dam was got in the same way. If anybody besides Mr. Barstow owns a machine colt out of a machine dam the fact has not been published. This colt is a big strong, lusty fellow that stood 43 inches high the day he was two weeks old and as will be seen by his picture herewith is not lacking in good looks.

Budd Doble's return to the sulky last week at Cleveland shows that his hand has not lost its skill, and that after eight years' retirement he is still one of the best reinsmen the country has produced. His first start was with his horse, Kinney Lou that is still big and fat and not up to a bruising race. In two heats won by Caspian in 2:15½ and 2:12 Kinney Lou finished fourth in the first heat and third in the second, an excellent showing for a first start and one that gave him third money. On Thursday Mr. Doble started The Roman and won the race handily. The dispatches state that he was given an ovation by the large crowd present and the applause and cheers continued so long that he was compelled to go into the judges' stand and repeatedly bow his acknowledgements. Like all men who are truly great in their profession Budd Doble is very quiet and extremely modest in his demeanor and we expect he blushed like a school girl at the reception given him. May he win more races with The Roman and Kinney Lou, both California productions, and lower the world's trotting record for the fourth time before he retires finally from the sulky is the earnest wish of all his California friends whose name is legion.

An experienced Eastern turfman gives these as his ideas of reform: The shortening of racing contests, jimiting all races to best two in three contests, with dash races at different distances. Hiring of professional judges and excluding the "prominent citizen" from the judges' stand. Awarding of the four moneys to the horses in accordance with how they finish in each heat—viz., placing a horse that stood 3, 3, 3, ahead of one which stood 2, 9, 9, with the exception of heat winners, who are entitled to be placed owing to the penalty of getting a record. The formation of an association to include only the larger tracks, after the manner of the American Jockey Club, requiring all horses to be registered and all drivers to be licensed.

State Agricultural Director J. W. Wilson, who is superintendent of the track at Agricultural Park, Sacramento, states that the track will be in better condition this year than ever before known. Mr. Jones' new track making machine is at work and is doing splendid execution. It is cutting through the surface of the old track that has been so long complained of by horsemen. This will allow the moisture from below to come to the surface so that there will be no "cupping" when the horses are going over it. Mr. Wilson says the track will be ready for training purposes in a few days.—Union.

The Seattle Meeting.

[From our Special Correspondent.]

Favored with beautiful weather and a fast track, the Fall meeting of the King County Fair Association opened auspiciously last Saturday. The meeting is the opening one of the North Pacific Fair Association Circuit, which circuit embraces continuous racing through Oregon, Washington, Idaho and British Columbia until the middle of October.

The program consisted of seven events, the first two of which were special harness races on the dash system, and judging by the close and exciting contests they both furnished they must be regarded as being already firmly installed as fixtures on the daily card here. The first was a one-mile dash for 2:20 class pacers, and six horses scored down for the word, as follows: Rita H, Ollie M, Harry Hurst, El Rayo, Imp, and Christobel. They got off well together at the first score, went to the quarter in 34, the half in 1:06½, the three-quarter in 1:39½, and came home in the order above named, Rita H, who was admirably driven by W. G. Durfee, eventually winning after a drive by a neck in the good time of 2:13½. This admirable performance adds another to the list of McKinney 2:15 performers.

The second event was for 2:16 trotters and a high class field took the word. Owing to Oveta, Will Lane and The Commonwealth being a little short of work it took four scores ere they were finally sent away to a good start, a good race ensued to the three-quarter between Sweet Marie, Oveta and Briney K., however the McKinney, when asked, gave that proof of her quality as a race mare that landed her the winner by a length from Oveta, Briney K. third, The Commonwealth fourth, Dr. Bunell fifth and Will Lane sixth. Time—0:34, 1:09½, 1:44½, 2:17½. This gave Will Durfee his second winning drive and he was loudly applauded upon returning to the stand.

The other events call for no particular mention. The harness program is well filled and all the owners and drivers are well satisfied with the track and their surroundings. There are already 90 harness horses here and at least 40 more from Portland, Spokane and British Columbia will arrive before the regular harness meeting commences, which will be on August 8th.

R. L.

From San Jose Track.

SAN JOSE, CAL., August 3, 1903.

BREEDER AND SPORTSMAN:—I thought possibly you would like to hear what is going on here as regards speed.

The horses in the good stable of Captains Goodall and Bennett are stepping some. Dr. Hammond trotted a mile in 2:10½ and could have trotted much faster, and Rajah paced a mile in 2:07½ and the last quarter a shade better than 30 seconds; they have just shipped away this evening to Vallejo.

I have a three year old filly by Barondale with nine weeks' work trotted a mile in 2:29, and quarters in 36 seconds and one-eighth in 17½ seconds. She will trot in 2:20 this Fall. I have the greatest 14 months' old colt in America by Barondale. The fifteenth time harnessed I drove him a quarter in 46 seconds; the thirtieth time hitched I drove him a quarter in 44 seconds, and the thirty-fourth time hitched I drove him a quarter in 39½ seconds barefooted to cart. I am sure in thirty days or less I can drive him a quarter in 35 seconds, a 2:20 gait. Have a ticket on him next year at Detroit in the Chamber of Commerce stake; he will make it good for you.

You ought to have been here last night, when the earthquake occurred. I think you would have stepped some yourselves. It was the "darndest" rattling out of the box I ever heard, and did lots of damage to buildings. One can see the effect on most every street.

Yours very truly,

TOM JAMES.

A big sale of broken and unbroken horses has been going on the past week at Miles City, Montana, says an exchange, and the prices obtained have been very satisfactory to raisers. A. B. Clarke is the promoter of the sale and some of the prices obtained are as follows: J. R. McKay sold 22 head at \$108 each and 7 at \$70 each. A couple of cars sold by E. B. Holt, a car of yearlings at \$21 each and a car of mares and colts at \$48 each. Buyers were present from Hudson Bay, Alabama, Tennessee, New Orleans and from all over the new northwest. The single method of selling was employed by the local men and better results were obtained than by selling in lots or car lots. Outside men who have shipped in carloads desire to sell in that shape. About 500 horses have been sold singly to date which would seem a great success. There is no difficulty in disposing of stock in any section of the United States if it is properly advertised in the class papers.

Auduhon 2:03½ is going to try and give Father Time an argument for two-minute honors. If right this chestnut horse ought to be able to put up a pretty stiff argument.

Australian Horse Holds World's Record.

For the first time since the establishment of a breed of trotting and pacing horses, a world's harness record has been earned by a horse bred outside the United States. On the title page of the BREEDER AND SPORTSMAN to-day is a photo-engraving of this horse—Almont, a bay stallion by Rothchild out of Puella by Berlin. Almont took a three mile pacing record of 6:50 at the Ascot race course, Melbourne, Australia on July 13th, this year.

The former record for the distance has been held by the pacer Joe Jefferson since 1891, when he paced the Sioux Falls, Iowa, track, three miles in 7:33½ against time for a purse of \$10.

The trotting record for the distance is held by the mare Nightingale by Mambrino King and is 6:55½. This record was made in 1893. The noted Flora Temple had a three mile record of 7:33½ made in 1860.

It will be seen that the record of the Australian horse is 43 seconds faster than the American pacing record, and while few will question the prediction that there are American horses capable of getting the record back to this country, it will be no easy task for those in the 2:12 class to which Almont belongs.

Mr. And. Robertson, a prominent farrier of Australia arrived in San Francisco on the last steamer and left this week for New York. He will remain in the East two or three months during which time he will study the latest methods of shoeing trotting and pacing horses. Mr. Robertson is a brother of the trainer of Almont and has written for us the following about the performance of that horse:

EDITOR BREEDER AND SPORTSMAN: A little news from the other side of the world will doubtless interest you. On June 29th on the Ascot race course, Melbourne, for a purse of fifty sovereigns, Almont made a successful attempt to lower The Australian record held by Fritz 2:13. He was driven by Lou Robertson, and covered the distance in 2:12. This establishes a new record for Australia. He went the first half in 1:08 and the last half in 1:04.

On July 6th Almont tackled the Australian two-mile record of 4:35, held by Ribbonwood. He was again successful, leaving the two miles behind him in 4:32.

A week later, July 13th, he went out to lower the world's three-mile record. I have not that record at hand, but Almont went the journey in 6:50, nearly at the rate of 2:16 for each mile. If a suitable track can be procured Almont is going to have a fly at the world's pacing two-mile record, held by Chehalis 4:19½. You will doubtless think Robertson is shooting at rather a high mark but he is confident under favorable conditions he can chip a little bit off that mark. The above performances are no measure of Almont's speed, when I tell you the conditions under which they were registered, you will say with me, it is only reasonable to suppose that he can go much better. In the first place, it was midwinter when these records were put up, and the season being an exceptionally wet and cold one, I don't need to tell you the horse was not at his best, and it must also be remembered the track was not a mile track but something over one-half mile and a poor one for speed. In his mile of 2:12 and his two miles of 4:32 he was not driven to his limit. He only went out to do a certain time and he did it easily.

I think, Almont's three miles in 6:50 is a wonderful performance, considering the smallness of the track, and that he was trained and driven by a colonial. What would you expect him to do driven by an American on one of your best mile tracks?

In a match race two-mile dash for \$600, Almont vs. Lightfoot, Almont won easily by over 100 yards; time 4:36. As he was never extended in any part of the race, and the track a turf one, this was a good performance.

Almont is a colonial bred horse and his sire and dam are also colonial bred, but from imported American stock. His pedigree follows: By Rothchild, son of Child Harold, dam Puella by Berlin, second dam Woodburn Maid by Woodburn.

Yours truly,
AND. ROBERTSON.

Says the Salinas Journal: "County Clerk J. D. Kalar has purchased of J. A. Trescony of San Lucas the five year old pacing filly by Dictatus out of a mare by Sidney, second dam Kate Ewing 2:21½ by Berlin 3514, a son of Reavis' Blackbird 402, third dam Lady Washington by American Boy Jr. This mare is very speedy and we are willing to risk our "hoss" reputation on the prognostication that she will prove a crack-a-jack. Carl Parsona has also purchased of Mr. Trescony the three year old black pacing gelding out of the same dam by Mr. Trescony's stallion Robin, sire of Rohizola. This colt is a natural pacer, is unbroken, but has a nice way of moving, and on the score of breeding and conformation ought to develop extreme speed."

Jackson's Napa Soda does not tangle the feet.

State Fair Directors Meet.

The State Board of Agricultural Directors held a meeting last Saturday, with the following present: President Benjamin Rush, William Johnson, C. W. Paine, William Land, L. J. Rose, James Whittaker, J. W. Wilson, F. H. Burke, E. W. Howard and Thomas Fox.

The report of the Committee on Speed Program, both running and harness events, was received and adopted.

A communication was received from the John Breuner Company offering to pay a lump sum to the society and make the opening night at the pavilion a free gate. They also agree to advertise this opening night in eight-four country newspapers.

The board agreed to the proposition and arranged that the firm should have the opening night at the pavilion for the sum of \$500.

The secretary was directed to advertise for bids for privileges.

The following are the particulars of the call for bids for letting privileges:

No. 1. Cash bids for auction pools sold on final result of all races.

No. 2. Percentage bid on result of all races.

No. 3. Cash bid for auction pools sold on final result of harness races only.

No. 4. Percentage bids for auction pools on harness races only; privilege will be allowed to charge a 5 per cent commission on all sales. On a percentage bid a satisfactory bond must be given.

No. 5.—Bookmaking privilege only on races, heats and results, both harness and running races, as a whole, six races daily.

No. 6.—Open hookmaking privilege on all races, and results, both harness and running events, allowing any reputable hookmakers, six or more, to cut in on the basis of \$2700 each for twelve days; if less than pro rata per day; if more, a decreased pro rata. Any reputable individual allowed to cut in on deposit of cash or a certified check of 50 per cent, balance to be paid on Saturday, August 29th, on or before 5 P. M. Six races a day guaranteed.

No. 7.—Combination hook privileges for the twelve days.

No. 8.—Bid for all and every betting privilege as a whole.

Bids will also be received for the program privilege, for a uniformed band of musicians and for policing the park and pavilion.

The bond of Dwight Miller as treasurer of the society was received and approved.

On motion of Director Burke, seconded by Director Fox it was agreed that in every case "where every condition is not filled in stake races, with the advertised conditions, that all such entries be ineligible to start.

After this had been adopted Secretary Lowden announced that under the conditions of this motion only three entries in the Stallion Stake of 1903 would be eligible to start.

This brought on a lively discussion, which resulted in the motion being rescinded until the Speed Committee had time to consult with some authority on horse law and find out the exact status of this Stallion Stake at the present time.

Director Land presented a contract from a local contractor agreeing to clean up the pavilion, make all repairs to floors and roofs, etc., for the sum of \$416. Last year this work cost about \$2600. The offer was accepted and the contract let.

R. D. Stephens of the Citizens' Fair Committee appeared before the board and stated that his committee had been meeting with good success in every way, and then presented a strong argument in favor of lowering the price of admission to the park. His proposition did not meet with favor by the members of the board, who held that the prices adopted were low enough. It was pointed out that a family ticket to park and pavilion could be procured for \$7.50, or a commutation ticket for twelve admissions to park and pavilion for \$10, and that while a single admission to the park would cost \$1, it would be the same as that of former years, when it cost 50 cents to enter the park and 50 cents for a seat in the grand stand. Under the present arrangement the \$1 ticket admitted one to all portions of the park and stands.—*Sacramento Union.*

The Kenney Bicycle Co., 531 Valencia St., is doing a big business in the McMurray Carts and Sulkeys. You not only save money by purchasing a McMurray but get the most durable, best made, and easiest running cart or sulky in the market. Investigation will convince a Missourian.

In the Chamber of Commerce Stake only one starter, Kingmore, wore hoppers. He finished 3-7 in the heats of Tuesday. Another starter, W. O. Foote, pulled the first long shaft sulky ever seen in a Grand Circuit race and finished in 5-6.

Volunteer's Opinion of Monte Carlo.

"Volunteer" of Chicago Horse Review, visited Detroit during the Blue Ribbon meeting and in a long and interesting letter to his paper containing his observations there, has the following to say of Monte Carlo.

"There were many turnovers at Detroit, but in some ways the fall that Monte Carlo gave his admirers was one of the heaviest thuds heard during the week. The only thing that one can say about him is that he acted the part of a sucker horse. In the first heat he sailed over to the half in 1:03½, in a sort of see-how-easy-I-can-do-it way that would give the spectator the idea that one of his legs might have been tied up and he could still make Dan T. and Dr. Strong look like cart horses. But when they came up alongside of him in the stretch and Walker asked him to go on, he simply said: 'Here boys take it away.' He not only stopped to nothing, but he also jumped off his feet, which was an additional surprise, as everybody had said that if he did get beaten he would be beaten on a trot. Walker, I believe, laid the loss of this heat to the fact that he had been so sure of winning it that he did not think it necessary to take his whip with him, but in the next heat when he drew his gad on Monte Carlo on the same spot, while the horse did not break, he stopped just a little bit harder. The experts said that it was the footing that beat him, and they were so sure of it that almost to a man they declared that he would win the next day, but he practically repeated the exhibition, though perhaps he did not give it up quite so badly. Monte Carlo's gait is indescribably perfect. It absolutely could not be surpassed, and besides, he looks good enough to eat. He had also tramped all over the two horses that beat him the week before at Windsor. Add to this that the Kingmaker had pronounced him a better horse than Azote, and you can imagine just the effect that his showing had upon his followers. Of course, it remains to be said that a hand of prophets have always maintained that Monte Carlo had a soft streak in him; that periodically when the track was right and the day right and he felt like it, he was a 2:05 trotter, but that the rest of the time a good 2:08 or 2:09 trotter that was game could beat him. This race looks as if they had figured him about right."

With due deference to the opinions of the wise men of the East who think Monte Carlo a "sucker" horse, there are many of us here in the West who will pin our faith to him for a while yet. It would be strange if Monte Carlo remained in first class racing condition all through the season and it is more than likely that he has trained off a little. Perhaps it is this that causes the breaks he has been making in his races. We think the son of Mendocino will prove before the year is out that he does not belong to the class that give it up when tackled by a faster horse.

Last Day at Cleveland.

Trotting, 2:27 class, purse \$1000.
Robinzola, b m, by Robin (Sanders) 1 1
Judge Green, b g (Walker) 2 2
King Simmons, blk h (Bogasb) 4 3
Bennie Russell, b h (Kent) 3 4
Crown Princess and Elwood also started.
Time—2:12¼, 2:13.

Judge Cullen, blk g, by Raven Wilkes (Cares) 1 4 1
Jim Ferry, g g (Frank) 3 1 2
Belle Kuser, b m (Hudson) 2 2 3
Pug, g g (Marrfield) 4 3 4
Crescent and Lady Constantina also started.
Time—2:10¼, 2:10¼, 2:10½.

Trotting, 2:15 class, purse \$1000.
George Muscovite, b b, by Muscovite (Bond) 1 1
Norie, b g (E. Shank) 2 6
Jockey, b b (McCoy) 7 2
Ber Hall, b g (Turner) 3 4
Walter Smith, The Questor, Mattie Smeltz, Miss Fearing, Dick M., Alfred Star and Viometta also started.
Time—2:10¼, 2:11.

Pacing, 2:07 class, purse \$1000.
Windell Stratton, cb b, by Saraway (McCure) 1 1
Captain Sphinx, b g (Hopkins) 2 3
Charley Hayt, b b (Snow) 3 4
Birdina, b m (Davis) 4 3
Time—2:07¼, 2:06¼.

Pacing, 2:22 class, purse \$1000
Ebony King, blk g, by Atlantic King (Bogasb) 1 1
Trily Direct, blk m (Walker) 2 4
Al Book, blk b (Busb) 4 2
Joe Grattan, cb g (McHenry) 3 3
Margaret Warner and Cleopatra also started.
Time—2:10¼, 2:11.

Trotting, to heat 2:03¼.
Lou Dillon, cb m, by Sidney Dillon (Sanders) 1
Time 2
Time by quarters—0:31¼, 1:00¼, 1:31¼, 2:02¼.

Special exhibition pacing—Dan Patch, br s, by Joe Patchou.
Time by quarters—0:30¼, 1:02, 1:33, 2:02¼

A well-known starting judge recently asserted that he would much rather start a whole afternoon's program of professional races than one race for amateurs. "If you wish to lose your friends in short order," said he, "just go to the track or speedway with a lot of them and attempt to get them away in good shape in a matinee race." And there is a lot of truth in what he says. A starter has no way of controlling a field of amateur drivers, and if he insists in giving every one an equal chance, or if he gets disgusted and lets them go away to a ragged start, some of them will get mad. It makes little difference which course he takes—he will have less friends when it comes night than he had in the morning.—*Raymond.*

Notes and News.

James Gatecomb now owns Wainscot 2:10½, having paid \$10,000 for him.

Rohizola has won more races than any other horse on the Grand Circuit.

Trilhy Direct 2:08½ is the seventh of the get of Direct 2:05½ to enter the 2:10 list.

Lily Young 2:09½, is 12 years old and is therefore the oldest trotter to enter the 2:10 list.

Kelly Briggs was distanced in the first heat of the race, in which he started at Cleveland.

Owyhee 2:11 made a heavy season in his new home in Australia and his owner had to turn mares away.

Dan Patch, Lou Dillon, Auduhon Boy and John A. McKerron will probably be sent after new records at Readville.

The first prize for an exhibit made by a county at the State Fair this year will be \$500, which is worth trying for.

Democracy 2:07½ continues his winning campaign in Manitoba, as he recently beat Harry O. 2:06, in the free for all.

There were thirteen final payments made in the Occident Stake for 1903, and the stake will be worth about \$3800.

James Sutherland of Pleasanton recently sold a fine pair of black carriage horses to a resident of Newman, Cal., for \$750.

W. H. Gocher will issue a second volume of Tales of the Turf in the fall. It will be a larger volume than the first book.

Briney K. by Strathway won at Seattle on Wednesday of this week and reduced his record to 2:13¾. Dish races are the rule at Seattle.

The Eureka Fair Association will hold a fair and race meeting this year during the week of September 14th. A six days' fair will be given.

It looks like big fields in the 2:23 class trot and 2:17 pace at Vallejo, and the man that can pick the winner in either race will get good odds for his money.

The Sacramento track will be ready for fast work by the 20th of this month. "Old man" Jones and his new track machine are doing good work on it.

The Vallejo track is in better shape than it ever has been and the horse men who are training their strings there all speak of it in terms of praise.

The 2:04 pacing event at Detroit resulted in the three fastest heats of the year—2:05¾, 2:04¾ and 2:06. Dan R. and Little Squaw were the heat winners.

Kremlin 2:07¾ has six new 2:30 performers so far this season, which places him equal with Direct 2:05½ as the leading sires of new performers for the year.

Dolly Dillon 2:07 by Sidney Dillon stepped a mile at the Brunots Island track, Pittsburgy, Saturday, in 2:09½. She was driven by her owner, Mr. J. D. Callery.

The Del Norte Agricultural Association will hold a fair and race meeting at Crescent City this year. The dates are September 16th, 17th, 18th and 19th.

Lady Suffolk, Highland Maid, Flora Temple, Goldsmith Maid, Maud S., Sunol, Nancy Hanks, Alex and Lou Dillon, have held the world's trotting records for mares.

From all appearances it looks as though King Direct 2:10½ is all that was claimed for him. "Pa" Geers is very sweet on him and thinks he will be another sensational pacer.

Buyers in California are paying good prices for mules to ship to Missouri. Any person that would have predicted such a state of affairs ten years ago would have been laughed at.

The Los Angeles program meets the approbation of the horse men, and there will very likely be a large entry list. See the advertisement in this issue. Entries close September 1st.

The city of Melbourne, Australia, is recognizing the growing regard for harness horses and is building a fine speedway around a lake that is but ten minutes' drive from the heart of the city.

Mr. Juan Gallegos of Mission San Jose, who went East to see his pacers Trilhy Direct and Diahltto race, will return home this week. He sold Trilhy Direct for \$500 while he was at Cleveland.

John Taylor, winner of the M. & M., is owned by John Merrill, of Lockhaven, Pa., who purchased him of Mr. H. Reardon, of Indianapolis. It is said that he refused an offer of \$10,000 for the horse after the race.

A two year old filly by Bingen 2:06½ trotted a work-out mile at Readville a few days since in 2:20 flat. The dam of this filly is Now-a-day, that trotted to a record of 2:14½ at Lexington, Ky., in 1899 when a three year old.

The M. & M. reminded many circuiters of the 1896 Transylvania, which was won by a gray horse, Senator A., after an accident and he had run away. It was also a five heat race, in which the deciding heat was trotted next day.

Some of the Eastern papers are giving the dam of Rohizola 2:12½ as Myrtle (the dam of Tom Shirley 2:21½) by Nutwood. Rohizola's dam is Myrtle 2:13½ by Anteeo, grandam Luella, the dam of Prince Nutwood 2:12½ by Nutwood.

Oreno 2:27½, by Dr. Sparks, dam Miladi by Baron Wilkes, has been exported to Germany. The purchaser was looking for a fast mare of good breeding, show mark and much speed and on trial Oreno was found to be just the animal wanted.

The fact is impressed upon harness horse owners more and more every year that there should be an organized circuit of harness races in California at which the tracks will be prepared especially for this class of horses and no runners permitted.

At the Columbus meeting two weeks ago the guideless pacer Cute went a mile alone in 2:04½ in an advertised effort to beat 2:05, but failed to beat 2:10 booked to sulky. In England a month ago the guideless trotter Lady R. went a mile in 2:14½ trying to beat 2:17. This is the fastest mile ever trotted in the old country.

At the track of the West Chicago Driving Club at Austin The Swift 2:09½ dropped dead last week in the second heat of the special pace in which she was a starter. At the turn for home the second time around she staggered and fell, having burst a blood vessel. The Swift was rated one of the fastest roadsters in Chicago.

RITA H. 2:13 1-4

A new 2:15 performer by McKinney.

The 2:12 trot and 2:10 pace advertised for the Breeders Petaluma meeting failed to fill. The association now offers \$500 for a free for all trot and \$500 for a free for all pace, for this meeting, entries to close next Wednesday. It is hoped that four or five entries can be had in each class, and if so they will be declared filled.

Robert I. 2:10 and Stipulator 2:14½, both California horses, started in the 2:09 pace for a purse of \$500 at Freeport, Illinois, July 31st. The race was won by Stranger O. in straight heats in 2:08¾, 2:09½ and 2:09½. Robert I. was 5-3-5 in the summary and got fourth money. Stipulator was seventh in the first heat and was then withdrawn.

Sacramento is doing itself proud this year. The Supervisors of the county have appropriated \$1000 to aid the State Fair, and the business men of the city have already subscribed over \$3000 to the same end. In addition to these generous contributions the entire community of the capital city is working to make the State Fair a success.

Harry McKerron, a two year old son of John A. McKerron 2:05½, trotted a half mile over the Cleveland track on Thursday of last week in 1:09½. On the same day John A. McKerron trotted a mile in 2:07. The day was so windy that Lou Dillon did not attempt to lower the record as advertised, but the trial was postponed until the following day, the result of which is told elsewhere in these columns.

The Bouquet, a four year old mare in the string which Charley Spencer is training for the Walnut Grove Stock Farm has been declared out of the 2:24 class trot at the Breeders meeting, and the mare Daisy B. substituted in her place. The Bouquet was entered in the Occident and Stanford Stakes last year but her stable companion Aristo was started. This year The Bouquet worked a fourth heat on the 3d of July in 2:17½, going the first three eighths in 50 seconds, and the last three eighths in the same time. She was undoubtedly one of the most promising four year olds in California, but struck herself and had to be thrown out of training. Aristo is a great horse this year and trotted the last quarter of a mile in 2:25½ in 30¾ seconds. Both Aristo and The Bouquet are by Nushagak, Walnut Grove Farm's premier stallion.

A steamer recently landed at New York that brought over from Europe ninety-seven fine Belgian stallions that were sent to Indiana and Illinois for breeding purposes. Among them was one weighing over 2800 pounds, and the lot included some of the finest specimens of draught breeding animals ever brought into this country. The horses stood the voyage well and arrived in perfect condition.

Mr. J. B. Iverson of Salinas sold a pair of mares to Agent Schwerin of the Southern Pacific Company last week, who secured them for the American Minister to Japan. The mares were not large, but a nice driving team and were half sisters, one being by Mr. Iverson's stallion Eugencer, the other by Ah. Waltham, a son of Boh Mason. The dam of the mares is by a son of Nutwood. The price paid for the pair was \$350.

L. B. Daniels has a couple of good green horses in training at the Vallejo track. Both look as if they were receiving the best of care and are stepping at a fast clip in their work. They are the chestnut gelding Edwin S. by Doc Hicks that is entered in the 2:25 class pace at Vallejo, and the trotter Sproul a bay gelding that is expected to make a good showing in the 2:27 trot. Mr. Daniels will race both horses through the California circuit.

Major Delmar is trotting right along toward the guiding record. He trotted the Albany, New York, track last Saturday in 2:04½, which equals Azotes record, but is a second and a quarter behind the record of The Abbot. That he will reach the latter's record is pretty certain, if he keeps right, as the Albany track is proverbially slow, its former record being 2:10½. Major Delmar's previous record was 2:05½, made last year at Memphis.

Starting payments are due August 16th on the entries that will start in the two year old divisions of the Breeders \$6000 Futurity. There are at this date 122 eligibles to these divisions on which starting payments of \$25 on pacers and \$35 on trotters will be due and payable on the 16th if they are to start in those events. \$1250 of the stake is for two year old trotters and \$750 for two year old pacers. There should be large fields in both events.

Up at Seattle last Wednesday the brown mare Uletma, owned by W. F. Robb, smashed the world's record for three and one-half furlongs. In doing so she not only set a new mark for sprinters, but incidentally defeated Judge Thomas, the world's quarter horse, who made his record on the Butte track last Spring. Uletma's time was 0.41. Uletma is by Salgado, son of Salvador, and is out of Imp Oran by Ben D'or. Salgado is owned by the Liberty Stables Stud of this city.

Word reaches us from Salem, Oregon, that William Murray, owner of the famous stallion Diablo 2:09½ is lying dangerously ill in that city with typhoid fever, and that his life is despaired of. Mr. Murray has a naturally robust constitution and it is to be sincerely hoped that it will enable him to withstand the ravages of the dread disease from which he is suffering. He has been doing well at Salem with his great stallion and was greatly pleased with the prospects for a very successful season. No horseman in California has a greater list of friends than genial big hearted "Bill" Murray.

S. A. Eddy of Hanford, the owner of the pacers Colonel C. and The Cuckoo was in the city this week and states that Secretary Fred Howard of the new Association which is in control of the Hanford track is corresponding with the managers of the tracks at Lemoore, Tulare, and Bakersfield to arrange a circuit of three days meetings to be given on these tracks after the Pleasanton meeting. A. J. Hudson, Secretary of the Fresno Driving Club, says that in case a circuit can be arranged in that part of the State for three or four meetings the Driving Club will join in and give two or three days racing on the Fresno track.

Although most of the Grand Circuit tracks have announced their programs for this year, the Empire City Trotting Club is the only one that has made any radical change in the plan of racing. This club, for its meeting which starts at the Empire City track on August 10th, make it a condition that all horses which do not stand for money after two heats must retire. This means that any horse which does not stand for a share of the four moneys after two heats have been trotted or paced will have to go to the barn, and the third heat will be for the four money winners. This, it is believed, will tend to decrease the laying-up of heats, as the race is too short to permit of a driver taking chances.

On the steamer for Sidney, New South Wales, which left San Francisco on Thursday of this week, were a standard bred yearling colt and a four year old filly consigned to Mr. J. A. Buckland, Gulgong, Australia, who is the owner of the noted Australian trotter Fritz 2:13. These horses were sent by Superintendent F. W. Covey of the Palo Alto Stock Farm. The colt was bred on the farm and is by Mendocino, sire of Monte Carlo 2:08 and Idolita 2:09½, and is out of the famous old broodmare Sallie Benton, dam of Serpal 2:10, Starlight 2:15½, Nordica 2:19½ and Sero-lita 2:25½. No better bred colt ever left the Palo Alto farm, and he will be a great addition to the breeding ranks of Australia. The mare sent was bred by Mr. Harry P. Moore of Menlo Park, and is by his stallion Boxwood (son of Nutwood and Belle Patterson by Williamson's Belmont) out of the mare Etta by Neuhuc. Etta is the dam of Cora C. 2:22½, Like Like 2:25, Black Prince 2:36½, and the mare Blue Bells that paced trials in 2:13. Mr. Covey selected this mare to fill Mr. Buckland's order, as she is not only a fine individual and well bred, but was stunted this Spring to James W. Rea's good stallion Iran Alto 2:12½, son of the great Palo Alto 2:08½.

Our Cleveland Letter.

The authorities of the village of Glenville, a suburb of Cleveland, and in which place the Glenville track is located, were successful in having their threat of "no pool selling" enforced by the courts, on the strength of an obsolete law, that like hundreds of other state statutes, has been thought dead for many years. The fact that no pool selling, or betting of any kind was permitted, cast a damper on the entire meeting, and what promised to prove one of the best and most successful Grand Circuit meetings ever held in Cleveland, was turned into what resembled a matinee meeting. Hundreds of out of town horsemen that had engaged hotel accommodations, cancelled their orders, and the attendance was mostly made up of local enthusiasts. The one sensational feature of the entire week was furnished by the California mare Lou Dillon, by Sidney Dillon, owned by C. K. G. Billings and driven by Millard F. Sanders, for several years trainer for the Santa Rosa Farm. Lou Dillon was booked for an attempt to lower the world's record for trotting mares of 2:03½, established by herself two weeks ago. Owing to a heavy track on Wednesday, caused by rain, the event was postponed until Thursday. However, a perfect gale blew all the afternoon, and after having been given the usual warming up work, the mare was announced to go on Friday. The track on that day was just to her suiting, being firm and hard, and not apt to break away from under her. But there was still a strong wind blowing when she was brought out, accompanied by two runners, to act as pacemakers.

A mile in 2:04 was what was expected by the horsemen generally, and they were not prepared for the sensational mile the handsome little California mare trotted. The quarter was reached in 30½, and the half in 1:00½, at which point she was right at the runner, that was setting pace directly in front of her. The watches clicked at 1:31½ at the three-quarters, and the mile was finished, strong and true as when she started, in 2:02½, making her the next fastest trotter, by record, to Cresceus 2:02½. Every practical horseman that witnessed the performance is satisfied that with perfect weather conditions Lou Dillon will trot to championship honors. The mare and driver were given a hearty ovation at the finish. Another effort will be given on Saturday, August 8th, at the Glenville track, after which the mare will be shipped East and given a chance to try her ability over some of the big tracks there. The remarkable burst of speed Lou Dillon possessed is evidenced by the fact that on Thursday she was timed a quarter in 25½ seconds.

Dan Patch 1:59½ paced a mile in 2:02½ on Friday afternoon, and finished so fresh and strong that it looks as if the pacing crown were at his mercy. He will start against Star Pointer's record of 1:59½ over the Empire City track, Yonkers, N. Y., in two weeks. He paced a half in 57½ seconds at Columbus, O., two weeks since. While Dan Patch cannot be called a perfect gaited pacer even now, his gait is much improved over last year, as he does not sprawl so much behind, and gathers himself quicker.

Millard Sanders was a prominent figure at the meeting here this week, as in addition to his splendid drive behind Lou Dillon, he also started the bay mare Robizola in the 2:27 trot and 2:21 trot, on successive days, winning both races, trotting three of her winning heats in 2:12½ and the fourth in 2:13, both events being on the two in three order. Robizola is a consistent performer and should take a record right at 2:10 before the season is far advanced. One of the most popular wins of the week was that scored by the veteran reinsman Budd Doble with The Roman 2:09½, a son of McKinney, in the 2:10 trot. This was Doble's first appearance on the turf in eight years, and the splendid manner in which he piloted the gelding to victory over a strong field, brought the crowd to its feet. Monroe Salisbury's gelding Monroe by Seymour Wilkes made two starts, getting second money in both races. In the first he was defeated by John Taylor, winner of the M. & M. at Detroit, while in his second race he won a heat in 2:12½ from Robizola, but could not beat the mare the next trip around. Monte Carlo 2:09½, Salisbury's pet, again proved a disappointment, being obliged to content himself with fourth money, Rhythmic, Baron de Shay and Feren leading him in the summary, in 2:11½ and 2:09½, over a heavy track.

Budd Doble's much talked of stallion Kinney Lou by McKinney, made his debut in the 2:23 trot, which had eight starters. No extreme effort was made with him, but he won third money, being close up in 2:12½, and acting like a seasoned campaigner. A few easy races will find Kinney Lou ready for heats around 2:10. The blind pacing stallion Elastic Pointer was up against a strong field in his race, but he acted good headed and won as he pleased, both heats being in 2:06½. One of the best contested races of the meeting was the 2:06 pace, Little Squaw taking the first heat

in 2:04½, the fastest racing heat of the year. The next two found Fanny Dillard outfinishing the Squaw in the stretch, in 2:06½ and 2:06½. Tom Keene won the 2:18 pace but only after being forced out the first heat in 2:07½ by Ben Walker with Diablito, and in 2:05½ the next heat by Ed Geers with King Direct. Geers has a high class trotter in Billy Buck by St. Clair, a gelding owned by him personally. He annexed the 2:14 trot in straight heats, fastest mile in 2:11½. A field of nine well matched sidewheelers scored for the word in the 2:09 pace, Joe Pointer, a son of the champion Star Pointer, winning out in 2:07½ and 2:05½, with the grey stallion Allerson by Allerton 2:09½ right at his saddle each heat. Kelley Briggs 2:10½, the Sacramento, Cal, pacer, hit his knee two weeks ago and has not quite recovered from his injury. Anaconda 2:01½ has had his name changed to Knox's Gelatine King, and this long title seems to interfere with his racing, as he was beaten handily in the free for all by Dan R., 2:04½, both heats being paced in 2:05½. The ex-California pacer Coney 2:02 was third starter, but he was not at himself at all finishing behind the flag in the second heat.

John A. McKerron 2:05½, by Nutwood Wilkes has been placed in Ben Kenney's stable and on Thursday trotted a mile in 2:07. He will be started against his record at the Empire City meeting in New York, also at Readville, Mass., and Memphis, Tenn. The fast stallion was never in such good condition as right now, and a merry mile can be expected when he turns for the word. A two year old by McKerron, and out of Henrietta G. 2:19½ by Elyria 2:25½, was shown between heats this week, trotting a half in 1:09½, one of the quarters being in 33½ seconds. This youngster was broken but four months ago, and can brush close to a two-minute clip. Next week finds the circuit flyers at Buffalo, N. Y., from which point I will forward an account of their doings.

Cleveland, O., August 1, 1903.

GEO. A. SCHNEIDER.

Occident Stake of 1903.

There are thirteen colts and fillies on which final payment has been made for the Occident Stake to be trotted at the State Fair this year and which will be worth about \$3800. Assistant Secretary Lowden has sent us the list and they are a high bred lot and a good race should result. As has been the case for several years past the McKinneys are most in evidence, there being three of that stallion's get named. From what we have heard and seen of some of the eligibles to this big stake the record of the race which is 2:17½ will very likely be broken by the winner. The list of those on which final payment was made is as follows:

- Alex Brown, b c, La Correcta by Arthur B.
- T. C. Cobby, br c, Grecco by McKinney.
- Ben Davis, blk f, Dixie S. by Zolock.
- C. A. Durfee, br c, Jim Rea by McKinney.
- G. W. Kingsbury, b c, D. B. Knight by Lynmont.
- La Siesta Ranch, b c, Search Me by Searchlight.
- P. W. Hodges, b c, Owynex by Stelnway.
- B. Chaboya, b f, Tuna by James Madison.
- J. Smith, blk c, Duplicate by McKinney.
- L. H. Todhunter, br c, The Jester by Zombro.
- Valencia Stock Farm, blk c, Amado by Direct Heir.
- J. A. Richardson, b c, Swift B. by Stam B.
- J. de La Montanya, ch c, Bromwell by Sidney Dillon.

Grand Circuit Horses at Buffalo.

The Grand Circuit horses are at Buffalo this week and started out Monday with fast time in every race. The slowest heat of the day was 2:15½ and that was made in the three year old race. Five races were decided during the day and the California horses were in evidence. Trilby Direct was second in both heats of the 2:18 class pace and got second money. Diablito by Diablo won the 2:12 class pace and reduced his record to 2:11½. Monte Carlo won the first heat and second money in the 2:09 trot but Geers beat him with Dan T. The Roman started in this race but was outside the money. The summaries follow:

- Pacing, 2:18 class, purse \$1200.
- Tom Keene, ob g, by Wost-Egbert.....(G. W. Saads) 1 1
- Trilby Direct 2-2, Ebony King 4-3, Saddle Baron 3-d, Rector d.
- Time—2:09, 2:10½.
- Trotting, 2:12 class, purse \$3000.
- Billy Buck, b g, by St. Clair.....(S. Geers) 4 1 1
- Frances B. 1-4-4, Aille Wood 2-2-3, Hawthorne 3-3-2, Anna Held 5-5-d.
- Time—2:13¾, 2:10½, 2:11½.
- Pacing, 2:12 class, purse \$1000.
- Diablito, b g, by Diablo.....(Walker) 1 4 1
- Hal Chaffin 4-1-4, Stratblime 2-2-2, Missa Williamot 3-2-5, Donna McGregor, Plumblime and Merry Master also started.
- Time—2:11¾, 2:10¾, 2:11¼.
- Trotting, 2:09 class, purse \$1200.
- Dan T., b g, by Crawford.....(Ceers) 8 6 1 1
- Monte Carlo 1-3-5-2, Lord Vincent 3-1-4-3, Dulce Cor 2-2-3-7
- The Roman, Maxine, A. J. D. and Baron de Shay also started.
- Time—2:09, 2:10¼, 2:09¾, 2:12¾.

- Trotting, 2:25 class, three year olds, purse \$1000.
- Tireless, b g, by Electric Bell.....(Miller) 1 2
- Mary Gage 2-2, Lord Roberts 3-3.
- Time—2:14½, 2:15½.

WEDNESDAY, AUGUST 5TH.

A heavy rain caused the postponement of Tuesday's racing until Wednesday. In the 2:30 class trot the big bay horse Judge Green by Directum, won the second and third heats and the race. This horse is owned by Judge W. E. Greene of Oakland, Cal. When Monroe Salisbury entered him throughout the circuit he gave him the name of the honorable judge who owns him, much to the latter's discomfiture, and he wrote on to Mr. Salisbury to change it. But Mr. S. thought the son of Directum was good enough to have a good name and has been starting the big bay trotter under the appellation he first selected for him.

The Denver pacer Winfield Stratton met defeat Wednesday, after winning a beat in the 2:08 pace, but the Denver trotter Jim Ferry won his race in straight heats. The results of the races Wednesday:

First race, 2:30 class trot, purse \$1000—Judge Green won the second and third heats in 2:17½, 2:20½. Margaret Bathgate won the first heat in 2:17½. Yankee Boy, Crown Princess, King Simmons and Gray Gem also started.

Second race, 2:18 class trot, purse \$2000, Queen City stake—Millard Sanders won the second and third heats in 2:15½ and 2:15½. Allebrieve won the first heat in 2:14½. Lady Patch, Guy Fortune, John Mac, Monroe and Hattie Mac also started.

Third race, 2:08 class pace, Iroquois Hotel stakes, purse \$2000—Joe Pointer won the second and third heats in 2:08½ and 2:09½. Winfield Stratton won the first heat in 2:09. Nervola, Sufreet, Cubanola and Viceregal also started.

Fourth race, 2:14 class trot, purse \$1000—Jim Ferry won two straight heats in 2:16½ and 2:12½. George Muscovite, Norrie, Dillon Boy, the Questor and Hie Boy also started.

THURSDAY, AUGUST 6TH.

Four races were completed at the Buffalo track Thursday. In the 2:25 trot Kinney Lou, driven by Budd Doble, was a starter and got second money, being third in two heats and second in one. The California bred mare Katrinka G. was also a starter in this race, but was outside the money. These were the only California horses to start during the day. The summaries follow:

First race, 2:10 class, pace, purse \$1000—Noramie won third and fourth heats in 2:12, 2:16. Birdina won the second heat in 2:13½. Five Points won the first heat in 2:12, but was distanced in the third. Donna McGregor and Carthage Girl also started.

Second race, 2:25 class, trot, best three in five, Electric City stakes, purse \$5000—Jay McGregor won three straight heats in 2:12, 2:13½, 2:14½. Kinney Lou, McAdam Jr., Prince Caton, Cole Direct, Katrinka G. and Bonnie Birchwood also started.

Third race, 2:04 class, pace, purse \$1000—Harold H. won the second and third heats in 2:08, 2:08½. Fanny Dillard won the first heat in 2:10½. Captain Sphinx and Dan R. also started.

Fourth race, 2:14 class, pace, purse \$2000. Empire State stake—Star Hal won two straight heats in 2:12½, 2:10½. Laura Spurr, Page Hal, Don Cozine and Harry D. also started.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hook, Strained Tendons, Founder, Wind Puffs, and all lamenesses from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. If send for descriptive circulars, testimonials, etc. Address
The Lawrence-Williams Co., Cleveland, O.

Dog Meat.

With garb uncouth and grimed face marked
By many a furrowed line;
With tear and sigh and moan he said,
"My name is Christian Klein.

I was an East Side butcher, sir,
For many happy years;
A false love slaughtered my fond hopes—
So pray excuse these steers!

"Oh, fickle Katie Dinkelspiel!
Why for you did I yearn?
Why give to you my fresh heart, and
Ask skewers in return?

"I said I'd carve my way to wealth;
She vowed she'd marry me.
Infatuated I: the time,
How brisket seemed to flee!

"But she proved false. One day she wrote—
It was no tenderline—
I love the banker, and I am
Frankfurter own it, Klein!

"I liver lone for him, and oh!
He finds his knead in me.
I never sausage love as his!
He suets me to a T!"

"I read, then cried, 'She's tongue me deep!
A viper have I nursed.'
Oh, sir, of all bad cuts I've had,
That was the very wurst!

"One thought is branded on my brain—
Your pity, pray, allow—
Where my poor head she fondled once,
His head cheese pressing now!"

Then paused the uncouth butcher man,
And fierce his eyes did glare:
And, closing tight his brawny fist,
Right furiously he swore:

"False Katie Dinkelspiel!" he cried,
"I'll haunch ye till I die!
But saddle ho my lonely lot!"
"Pork Christian Klein!" quoth I.

The good man dried his tearful eyes,
And said, "It's bock beer time;
Oh, Sir! Oh, could you favor me
Bolognaing me a dime!"

—N. Y. Sun.

Faking.

Presuming that the initials R. F. M. stand for the well-known journalist and judge of dogs, Reginald F. Mayhew, the letter he sends to the *New York Herald* is very interesting to the terrier men who would doubtless like to bear a little of the history that concerns their breeds. It is also mighty refreshing to hear the self-complacent English Kennel Club handled without gloves. No club or organization ever did become a virile institution without heeding outspoken criticism that is founded on principle and common sense, and the fact that the English Kennel Club has been pampered, so to speak, probably accounts for the "Well, what are you going to do about it" air that pervades the Club's treatment of the general body of fanciers.

It is interesting in this connection to relate that it was reported that the *English Stock-Keeper*, having had the temerity to criticize the Kennel Club, all official advertising and the courtesy of stand space at the Club's show would be withheld from the paper that had the "gum" to say what it thought on the late registration rumous. *En passant*, one cannot refrain from comparing the situation there with this country, where the attempt to give a club a fictitious rating at the expense of the fancy at large met with a well merited rebuke from the clubs that make the American Kennel Club possible, which only emphasizes the suggestion, made by a critic of the late new rule, that the A. K. C. had better, whenever such important matters are to be considered, give due parliamentary notice so that the question may be well considered by those most concerned. Jack rabbit legislation is generally humiliating in the end. But to return to our mutton.

The writer we allude to by the initials, takes as his text the recent stringent rules issued by the English Club in regard to malpractices in getting dogs ready for the ring, a copy of which we have recently published, and which took effect July 1st. After remarking that the English exhibitors had enjoyed immunity from official correction so long that their practices had become flagrantly opposed to the old rules, he goes on to say that, in the rough haired varieties, plucking, singeing and compositions to give the coat a harsh feel have become so glaringly practiced that he who refrains has been regarded with commiseration. The unqualified statement is made that dyeing and faking in Pomeranians, Yorkshire Terriers and Black and Tans has drifted into a universal system, while Retrievers, curly and flat coated, Poodles, Collies and Old English Sheepdogs have been shown in the ring and under artificial conditions which some years ago would have resulted in a severe sentence. But the writer places the blame where it belongs—upon the judges, and to a less degree upon the Kennel Club for its laxity during the thirty years it has handled the reins over English dogdom. Judges who know their business should have full power to deal with the subject, though this would suggest in our amateurish system of judge appointments, that a special school of faking be instituted, so that the five

minute dogmen may be made wise to the meanings of the crude operator who thinks he is faking—always the most dangerous individual. But this is again by the way, for K. F. M., goes to say:

Judges have been so lacking in moral courage and have clinched their eyes so firmly to flagrant and impudent faking, that exhibitors have had to float with the tide or sink.

But for these weak-kneed judges and the sickly attitude in which the Kennel Club has blandly smiled whenever cases have been brought to their notice, woolly coated wire Terriers, flat coated Pomeranians, false colored Pomeranians, and faked eared Collies would never have been tolerated as winners.

Some fifteen years ago a puritanical contingent of the English Fox Terrier Club took upon itself the questionable task of branding the majority of wire haired Fox Terrier exhibitors as black sheep, and went so far as to call a special meeting to expunge the organization from all connection with the rougher variety. The motion was defeated, and by a strange irony of fate, one of the most prominent in the crusade bes for the last two years at least, been a leading winner in the wire division, and his successes have been gained with specimens possessing not only a most undesirable texture of coat, but one which required trimming in the most artistic manner.

At the time that the Fox Terrier Club's fruitless crusade occurred, the Kennel Club, influenced by one or two of the former's members, instructed Mr. Lindsay Hogg, who judged in 1887 at the Barn Elms show, to particularly discountenance all evidences of trimmed jackets. By a strange coincidence, Mr. Frank Redmond made his debut as a wire haired exhibitor, and, showing a second rate bitch by my dog, Brittle, in her old, rough, ragged coat, won the Grand Challenge cup. Her victory was such a travesty that the fervor against showing rough Fox Terriers trim and natty was choked in its birth.

Since then, however, judges have allowed matters to drift so far that it has been necessary to call a halt.

It is said that the Kennel Club is aiming at the professional exhibitor. As a matter of fact the latter will be benefited. He has the preparation of a dog for a show down to a science, and all the laws of the universe cannot affect the adept. It is only the man who thinks he knows, but doesn't, that will suffer. In other words, the clumsy "fakir," who has been immune, must either keep his hands off or suffer the penalty.

In this country dog showing is not the fine art it is in England. Ninety-nine per cent of those who attempt to "improve" their dogs make such a mess of things that a judge can only smile at their blundering efforts.

If a judge knows his business nothing—without detection—can give a soft coat the desired "feel." Knowledge, care and attention can modify the weakness, and assiduous attention can improve a long, soft jacket, where a shortish, harsh one is requisite. Chemical matter of any nature cannot be overlooked by a keen judge. Hence the reason that rampant faking lies with the judges, not exhibitors.

The English Kennel Club since its foundation has been noted for its puerile selection of judges, taking the list as a whole. Social status, not deep knowledge, has ever been the desideratum, and now it is hearing the fruits of its narrow Dombeylike policy.

In spite of its front, trimming will continue just the same and glaring faking will exist so long as men with a superficial knowledge are appointed as judges.

While we perfectly agree with what this writer says the fact will always remain that while one may be morally certain that a dog is faked, it is not so easy to prove it, and we believe our Kennel Club has yet to investigate its first case on this score.

Our Kennel Club should certainly interest itself in the matter and arrange rulings on what is right and what is wrong after the plan of the English organization, for at present all these slips from the paths of virtue come under the head of "improperly tampered with," which, one must admit, is rather vague, especially when the question—what is improper, is to be left to the imagination of a body of men who, with one or two exceptions, have not the experience that would justify them in tackling the subject. One thing should, however, be settled and that is the degree that trimming a rough haired terrier is permissible. Should a terrier that shows unmistakable evidence of having been recently plucked—we won't say singed or shaved, but done over with finger and thumb and put down in that bare unnatural condition that reminds one of a man who has had a close crop after wearing comparatively long hair, be turned out of the ring, peoalised or what? Several terriers have been exhibited in this shape, and have passed muster, in fact, while it was acknowledged they had been "done" too recently or too much, whichever one likes, no action was taken detrimental to the exhibitor. Of course, the excuse is—growing a new coat, and here is where the new judge should have powers to decide. It is pretty well conceded that the frownsness of a terrier and Collie may be legitimately overcome so that he looks natty and smart, but the line should be drawn somewhere, and one cannot help admiring the good sense of a handler who knows his business, when he bows his Terrier in the rough, because he finds he has not the time to properly even him up, and does not attempt to show him with a trimmed head and neck while his body looks as if the rats had been at it, in the "emarty's" clumsy efforts to do as the other chap did, without the gumption to know that this work is not a matter of hours or minutes, but days and weeks, as the case may be. As the above writer well says, the new English rulings will fall upon the know-it-alls and not the experts.—*The American Stock-Keeper*.

Delverton Cippi, a clever little black Cocker, who won first novice and reserve winners at Frisco and first open and winners at Oakland last year, is now in the stud. The announcement appears in the classified ads. on page 15.

The Kissing of Pet Animals.

A recent case in Birmingham, England, has brought into special prominence the danger arising from the pernicious practice of kissing pets. This has brought out some pertinent comment by the English press at large. From these we quote.

The *Globe*, in an article upon the subject, says: "The constant habit of kissing and fondling pet dogs and cats, in which many women indulge, has always been objected to as a somewhat dangerous practice. In the case lately reported from Birmingham a young woman contracted a form of blood poisoning, which showed itself in ugly and unpleasant breakings out in various parts of the face and body. The disease was rather peculiar, but it was distinctly traced to infection from a pet dog which the girl was in the habit of kissing. This is probably by no means an isolated case, for the poison does not always show itself in so marked a manner; but that such diseases are acquired by contagion from animals is beyond doubt. No one who has watched a dog or cat can hesitate for a moment to believe that these creatures are unclean animals. A dog, especially, will thrust its nose into anything, and that it should then be fondled and kissed by its mistress is so objectionable that only the commonness of the practice enables it to escape the reproach it deserves. Just now the lengths to which dog women will go in the worship of their pets passes all bounds; and as diseases have a way of appearing in cycles, perhaps it is now the turn of the contagion from flesh-eating animals. As this particular disease seems to take the form of a disgusting swelling of the lips, it will no doubt put an end to a habit which reason alone is powerless to stop."

The *Bazaar*, in dealing with the same subject, says: "More than once we have written of the danger that is likely to accrue to those unwise owners who persist in kissing their canine pets. Despite the intelligence and utility of the average dog, he is certainly not a pet that can boast of being over-particular as to what he indulges in by way of fare. Anything, in fact, from the most disgusting filth and carrion to the flesh of a dainty chicken, is taken at times with gusto, and knowing the number of injurious germs that lurk in the former, it seems a little insane, if nothing more, to kiss and caress, maybe, the mouth-parts of a dog that has been indulging in the filthy habits characteristic of his race. However, that it is done is very well known, though the evil results accruing do not as often come to light.

"The subject is again prominent by reason of the fact that a young woman in Birmingham has just had to suffer severely through indulging in the senseless and reprehensible practice. She had been, it appears, in the habit of kissing a pet dog, and from so doing had set up blood poisoning. Her lips were fearfully disfigured, and there were other eruptions upon the face and body. Such a case should act as a salutary warning to those who are in the habit of kissing dogs. To be kind is one thing; but to caress and fondle dogs and cats that are often little better than scavengers when out of the sight of their owners, is fraught with considerable risk."

DOINGS IN DOGDOM.

Obina Lady, H. M. Papst's Chow bitch whelped five little Chow Chows last week. Three of the pups are bitches; the litter is solid in colors, blacks and reds.

Nairo Kennels have recently purchased from Robert E. Riley of Atlanta, Ga., the good little black Cocker bitch Black Beauty III (No. 59460) 2nd novice at Providence 1901. Beauty stands a trifle over 10 inches, and weighs a little over 18 pounds. She is a very perfect little specimen, cobby built, with perfect head and long well set ears, silky flat coat, good bone, and fine feather. Her new owner expects her to give some of the best of them a run for the money.

Mr. Dorian has also recently imported from Japan, a very fine pair of specially selected Japanese Spaniels; the male particularly being an exceptional specimen. In selecting this pair, their owner had the assistance of a personal friend who is a well known Tokio fancier of the breed, and he believes he has in them the smallest and most thoroughly typical pair on the Coast. The dog will be placed at service.

Practical Dog Education, is the title of an interesting publication by "Recapper." The work comprises a series of articles on dog training that are effective and commendable. The fact that success in training the dog may be secured without the use of force, is becoming more widely known and appreciated among sportsmen, and "Recapper's" experienced advice is offered in the hope that it will do much to aid the trainer and encourage the trained.

The work is published by the M. T. Richardson Company of New York and is worthy of perusal.

The Fox Terrier bitch recently sold by Woodlawn Kennels to Dr. Holland of Hilo, H. I., is in help to Dictator (Cb. Norfolk Veracity—Eclipse Blanche).

Something for Nothing

The Polk Miller Drug Co., of Richmond, Va., are manufacturers of Sergeant's Dog Remedies, the most popular line of preparations, intended for dogs, on the market today, having received the highest endorsements of the leading dog men and kennel owners in this country and Canada. Read their advertisements appearing in the columns of our journal each issue. The firm referred to will mail you absolutely free, a copy of their celebrated book on Dogs if you will forward 3 cents to cover postage. If your dog is sick, write them, enclosing stamp, and describe the symptoms as accurately as you can. They will cheerfully furnish the best information on the subject without charge. F. W. Braun & Co., of Los Angeles, California, have recently been made distributing agents for Sergeant's Dog Remedies on the Pacific Coast.

GOSSIP FOR SPORTSMEN.

Ed Carberry, a farmer on the Sacramento river on the Yolo side, about fifteen miles up stream from Sacramento, reports the breeding of wild ducks in the vicinity of his farm and between the Feather and Sacramento rivers as the largest ever known.

The following interesting hit of natural history and side light on bird life is related in the Yuma Sun by S. B. Hinds, who recently witnessed a most peculiar combat between a roadrunner and a pair of Gambel quail while en route from his home to town.

Hunting casualties, have thus far this season been luckily few in number. One lamentable tragedy could have been avoided had the shooters adopted the simple precaution of making sure that the object fired at was a deer, or other animal, and not a human being.

Robert Van Zandt was mistaken for a deer in the brush and shot to death by John L. Pragher, near Philo, Mendocino county, Wednesday afternoon. The men were neighbors, Pragher being Postmaster of Philo and a leading citizen there.

Van Zandt was out hunting with a party of companions, but had wandered away from them in the hope of scaring up a buck in the undergrowth. It was while in the thick brush that he received his death wound.

The Board of Supervisors of Shasta county have shortened the open season for deer shooting fifteen days. This was done because a like change had been made by adjoining counties and the Shasta fathers felt that they must do so in order to avoid having hunters from adjoining counties flocking into their hunting grounds.

G. M. Silva, of Salinas, who was spending his vacation down the coast at the home of A. Brazil on the Sur, has killed the biggest huck ever shot in that locality, the deer weighing one hundred and forty pounds after it was dressed.

Game Warden Reed arrested a man named George for shooting quail out of season on the Dorn ranch in Green valley last Tuesday evening. The warden not only arrested the man but secured substantial evidence of his guilt in the shape of a bird.

The Fish and Game Commission scored a notable victory in a decision which was handed down by the full bench of the State Supreme Court this week. The case in question is that of the People vs. Ah King. Ah King is a local Chinese who was arrested some time ago for catching shrimps in the close season, which extends from May 1st to September 1st.

When the case was tried in the Superior Court Judges Dunne and Lawlor decided for the people, but Judge Cook wrote a dissenting opinion in which he held that, because more than one subject was covered by the act, as for example, the close season for various varieties of fish, it was indeed prolix within the legal meaning of the term.

Had Judge Cook's opinion been sustained, not only this act, which also regulates the taking of striped bass, black bass, lobster and sturgeon, but the entire system of existing game laws, would have been vitiated. A number of suits which were being delayed awaiting the determination of the Ah King case will probably now be settled out of court.

D. Rappio, a striped bass fisherman, was convicted on a jury trial in San Rafael Saturday for having striped bass in his possession less than three pounds in weight. He was fined \$40 by Justice McGee Thursday. The significance of the present act of justice is in reference to the fact that in the past many violators of the law are said by the Fish Commissioners to have appealed to the sympathies of the jurymen.

Justice A. B. Provines, in imposing a \$50 fine on a recent offender, up for the killing of a fawn, took occasion to remark that deer other than grown bucks could not be killed at any time. He added that in the future all offenders will be dealt with severely, which is taken as a sure indication of heavier fines.

Deer hunters are meeting with good success in most localities. In Sonoma and Marin counties a number of fine bucks have been taken. P. J. Walsh of Black Point killed two fat bucks on the Pacheco ranch near Ignacio a week ago. W. Williamson got a forked horn and a spike buck in the same locality last Sunday.

R. E. Graham, County Clerk of Marin county, and George Woods of San Rafael hagged three big bucks between them last week. Graham's deer tipped the beam at 153 pounds.

William Tanforan of Ignacio killed a monster huck last week that has evaded many hunters since the season opened. The deer weighed 165 pounds dressed and had antlers thirty inches in length.

The open season on bucks in Marin county will be closed on September 15th.

The season in San Mateo county opened on the 1st inst. A party of Spanishtown hunters are credited with five hucks hagged near Bald Knob, about eight miles south of Halfmoon Bay.

Orlow O. Wehber, former district attorney of Sonoma county, who was hunting with a party of San Francisco and Oakland sportsmen in Mendocino county and who was recently reported lost in a wild and rough hunting country, has turned up safe and sound and we are pleased to note.

A hunting party composed of the following Marysville gentlemen, Charles Dietz, J. Sellinger, Jesse Rathburn and Jim Flowers, went as far as La Porte and were camped ten days at Buck's Ranch, and also spent a few days at Little Grass Valley. They had a very pleasant trip and fair success with gun and fishing tackle, a number of deer also being secured.

Attorney George P. Burke, who returned last week from Andrew Church's place near Tassajara Springs, states that the Watsonville deer hunters located at that place, consisting of Dr. Waters, O. Tuttle, C. A. Palmtag, and H. C. Wyckoff, have found lots of good hunting there and have killed several deer. He also reports that the Loring Cornell party of young men from Watsonville have their headquarters in Ross valley, above Church's, and have also met with good luck.

AT THE TRAPS.

In giving the list of averages made by shooters in the recent Northwest Tournament at Dayton, Wash., Mr. E. E. Ellis of Seattle, Wash., should have been given third place instead of W. H. Seaver of this city. Mr. Ellis broke 540 targets out of 600.

The August shoot of the Golden Gate Gun Club will be held at Ingleside to-morrow.

On September 13th the club will give a grand merchandise shoot. This will be the club's final shoot for the season.

The Millwood Gun Club will hold a merchandise shoot at Mill Valley on September 9th. The shoot will be so arranged that there will be a prize for every entry. Another feature will be the method of distributing the prizes. Heretofore the big plums have rarely fallen to anyone else but the crack shots. On this occasion the shooters will draw envelopes from a hat, each envelope will entitle the holder to a prize, in this manner the distribution of prizes will be determined by chance. The list of articles to be awarded is a large and appreciable one.

The California Wing Club will close their live bird season on September 6th.

The California Wing Club shoot for August was attended by sixteen shooters last Sunday at Ingleside. Weather conditions and pigeons were favorable to the shooters. A summary of scores made during the day is the following:

Club race, 12 pigeons, distance handicap, \$75 added, 5 moneys, high guns—

Table with 3 columns: Name, Yds., and Score. Includes names like Donohoe, 'Slade', McConnell, Fendner, Klevesahl, Nauman, Barker, Mndock, Sweeney, Golcher, Haight, Justins, and Shields.

Back scores

Table with 3 columns: Name, Yds., and Score. Includes names like Sweeney and Fendner.

Twelve bird race, distance handicap, \$5 entrance, high guns—

Table with 3 columns: Name, Yds., and Score. Includes names like Donohoe, McConnell, Shields, Haight, Gibson, Barker, and Nauman.

Twelve bird race, distance handicap, high guns—

Table with 3 columns: Name, Yds., and Score. Includes names like Gibson, Nauman, McConnell, Barker, Donohoe, Shields, Haight, Klevesahl, Golcher, Fendner, 'Slade', and Justins.

Six bird pool, distance handicap, \$2 50 entrance, high guns—

Table with 3 columns: Name, Yds., and Score. Includes names like Nauman, Shields, Donohoe, and Barker.

Six bird pool, \$2.50 entrance, distance handicap, high guns—

Table with 3 columns: Name, Yds., and Score. Includes names like Haight, Donohoe, Shields, and Barker.

Novelty race at six birds, each shooter using another's gun—

Table with 3 columns: Name, Yds., and Score. Includes names like Nauman, McConnell, Gibson, and Barker.

Kennel Registry.

VISITS.

Mrs. Du Jardin's black Cocker Spaniel bitch Honey Du (Black Bart-Queen) to same owner's Delverton Cappl, August 1, 1903. Nairo Kennels' black Cocker Spaniel bitch 'Imp' No. 64,666 (Black Trophy-Stella Silk) to Ch. Hampton Golde No. 53,100 (Ch. Red Mack-Hampton Queen Reagle) July 17, 1903.

SALES.

Woodlawn Kennels sold an Irish Terrier dog puppy (Irish-Lady Powers) to H. C. Raap, Pacific Grove, July 25, 1903. Woodlawn Kennels sold a Bull Terrier dog puppy (Ch. Woodcote's Wonder-Newmarket Queen) to Mignon Baker, San Francisco, July 24, 1903.

Coming Events.

April 1-Aug. 15—Close season for lobsters and crawfish. April 1-Nov. 1—Trot season open. April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater. May 1-Sept. 1—Close season for shrimp.

Bench Shows.

Oct. 6, 7, 8, 9—Danbury Agricultural Society. Danbury, Conn. John W. Bacon, Treasurer. Nov. 3, 4, 5, 6—Ladies Kennel Association of America. Madison Square Garden, New York. Mrs. A. G. Evans, Hon. Secretary, Westbury, L. I.

Field Trials.

Aug. 18—Iowa Field Trial Association. 6th annual trials. Aug. 18—Nebraska Field Trial Association. O'Neil, Neb. H. H. McCarthy, Secretary. Sept. 1, 4—Minnesota-North Dakota Field Trial Association. 4th annual trials. Ironquols, S. D. Dr. W. A. Moore, Secretary-Treasurer. St. Paul, Minn. Sept. 8—Manitoba Field Trial Club 17th annual trials. Carman, Man. Oct. 25—Monongahela Field Trial Association. 9th annual trials. Nov. 2—Michigan Field Trial Association. Annual trials. Nov. 2—Ohio Field Trial Association. 6th annual trials. Nov. 9—Missouri Field Trial Association. Annual trials. Nov. 9—International Field Trial Association. 15th annual trials. Nov. 9—Independent Field Trial Club. 5th annual trials. Nov. 10—Western Irish Setter Club 2d annual trials. Nov. 16—North American Field Trial Club. 5th annual trials. Nov. 16—Kentucky Field Trial Association. 4th annual trials. Nov. 16—Illinois Field Trial Association. 5th annual trials. Robinson Ill.

THE FARM.

Plain Directions for Budding.

Budding is nearly always done on small seedling trees not larger than half an inch in diameter at the base. Larger ones, or the small branches of large trees may be budded, but they are rarely suitable, because the contrast in size between the stock and bud is so great that too rank growth is developed the first year and not as some suppose because the bud will not take on a large stock, for it will if other things are right. A weakly, stunted stock is not fit to receive a bud for if it does grow fast it will rarely make much growth. The bark must peel readily or the work will fail. During a very dry time budding is rarely successful, although after rain has fallen the same stocks may work very easily and the buds take well.

The common style is known as shield budding and is usually done in late summer or early autumn. It may be done any time after the buds on the new growth are well formed and before the stocks have stopped growing. The scions should be cut from trees about which there is not the slightest doubt of variety and from the thickest part. The whole of the present year's growth should be taken and every leaf cut off quite close to the buds. Any weakly or undeveloped buds near the tip of the shoot should be cut away entirely. Such a scion is called a bud stick. Each variety should be tied in separate bundles and plainly labeled. If they are not to be set at once they should be wrapped in moist cloths or moss and kept in a cool place. If properly packed they may be sent thousands of miles or kept for a week or more in perfect safety. Some tying material should be provided, with which to bind the bark of the stock firmly over the bud.

The buds are set three inches from the ground and on any side most convenient. If a branch on a larger tree is to be budded, set the bud on the upper side so the shoot that grows from it the next season may press towards the stock by its own weight rather than from it. A smooth place should be selected to set the bud by trimming off all small branches or rubbing off leaves for a distance of three or four inches. This may be done several days beforehand if convenient, in order to have everything ready to do the budding. To cut the bud from the stock, take it in the left hand and begin to cut about half an inch towards the butt from the bud and go just deep enough to take a little of the wood, and continue the same distance beyond the bud.

The knife may be allowed to slope upwards and out, thus severing the bud-shield from the stick; or, remove the knife when yet in the wood and make a square cut to detach the shield. Some persons take the wood out of the bud, but most do not. It takes less time to leave it in and it is stiffer and may be inserted more quickly and with less danger of injury. To set the bud, take it in the right hand and insert the point beneath the raised corners of the bark of the stock and with the corners of the thumb press against the stump of the leaf stem, pushing it entirely under the bark. It should be tied quite soon, beginning from the back side and crossing the band back and forth until the bark is bound tightly over the shield, but being careful not to cover the bud. There is nothing more to do for at least two weeks, when the hands may be cut, and where any failed they may be rebudded.

Stock is largely what it is made by feed. Hogs fed on clover or alfalfa have large bones. They also like charcoal, ashes and salt. All of these build a good, strong frame.

Stock in Fly-Time.

The direct loss occasioned by flies and other insect pests is too seldom considered by many dairymen and stock-raisers. Many of these pests propagate their kind by depositing their eggs in manure. Thus an increase of insects is ordinarily about in proportion to the number of animals kept. Of course, it is impossible to entirely exterminate these pests, but some precautions, both in regard to protecting the animals and in keeping their quarters well cleaned and sanitary, will result in a pronounced gain in the comfort, thrift and profit of the stock.

Some of the home-made and potent insect "scare-alls" have considerable efficiency for a short space of time after application, but the tendency is to make use of them only spasmodically, while the following recommendations are valuable in more ways than one, and are more likely to be given systematic attention:

The first precaution should be to allow no manure to accumulate in the stables, and to keep in use sufficient absorbents, litter and deodorizers to keep the stables sweet and wholesome, which is impossible where the flooring allows of leakage and accumulation of filth and reeking gases beneath it. The yards and lanes leading to the stables will also soon become a breeding place for myriads of flies unless kept clean and scraped frequently. The saving in fertilizers from this source is an item well worth the necessary labor expended.

Where the number of stock kept is not too large, it will be found profitable to arrange the stables or sheds with screened and darkened windows and openings, where the stock can go at will for rest and protection during the heat of the day. The colts, and horses when not in use, will especially appreciate and profit by such provision when the hot-flies and other insect torments make many of the daylight hours a worry and gain and growth an impossibility.

Where large dairies are kept, the loss resulting from diminished milk-yield is seriously felt, and the protection of stock is a much more difficult problem. After considerable experience, the writer is convinced that it is profitable to systematically stable the dairy animals about six hours daily when the flies are most annoying, giving a feed of green cut fodder or ensilage provided especially for that purpose. During the combined annoyance of heat and insect pests cows are much like a goodly portion of humanity in their aversion to exertion. They will frequently lie still fighting flies, and go hungry instead of grazing. Especially is this true when pastures are dried up and are uninviting. Early milking hours morning and evenings, with the animals taken up and stables from about noon until evening milking time, will not materially increase the dairyman's labor after the feed supply is provided for, and will afford a most gratifying surprise in the improved and extended yield from his animals.

Hogs can best be protected by a clean mud-wallow—not a filth-hole, as described in a former paper—and sheep may be kept practically free from this particular fly pest by a well tarred salt trough.

B. F. W. THORPE.

Woodland Creamery Report.

The report of the secretary of the Woodland Creamery, a co-operative association, covering all statistics since its organization, has recently been published and shows an average price of 22½¢ per pound for butter for the last five years. The patrons pay 3¢ per pound for manufacturing, thus leaving 19½¢ as the price paid them for the above period. The report also shows that the average has been 4½ pounds of butter to every 100 pounds of milk received.

You must keep the cows comfortable and happy if you expect good returns from them.

A Great Feature.

In order to secure a large and attractive exhibit of the best individuals from leading cattleherds throughout the entire State in all classes the State Agricultural Society's directors have offered greatly increased premiums for all registered breeds and an entirely new classification throughout.

The livestock department of last year's fair was quite an educational feature and of great benefit to all classes of breeders, both large and small, for they had the benefit of Professor Carlyle as to the accepted ideal of type of individuals that are required to win in the show ring and sell for good prices for breeding purposes. This season Professor E. W. Major will be associated with Professor Carlyle in passing upon the livestock exhibits. The judging by these authorities, will be one of the most interesting features of the fair. They will in their talk set forth the points on which prizes are awarded and afford all information as to the "why and wherefore" of the decision and answer any questions that exhibitors or interested breeders may request.

Seats will be arranged around the judging ring for the convenience of all interested in livestock. Their remarks will be taken down by a stenographer and afterward published.

Students of the Agricultural College

will be invited to attend. The educational value to the State can hardly be overestimated. These judges, who are recognized as authorities, can be relied upon to place before visitors and exhibitors the up-to-date ideal standard required for competition in the show ring for breeding purposes.

In dairying, one thing should not be emphasized more than another. Each one has its comparative importance. They start with the mao, then come the cows, utensils, management, feed, etc. Where you find success you usually find them all. They may be acquired one at a time. But all must come with much success.

Joseph E. Wing, who is now making a visit to the flocks and herds of Great Britain, says after viewing the lambs on sale at the different meat markets that we still have a lot to do to bring our average mutton sheep up to the foreign standard of excellence.

Many a man is in the live stock business through a force of circumstance. He succeeds or fails in proportion to the amount of intelligent study and effort he puts forth.

Pigs and Poultry.

Here is a good combination, always ready to turn the waste into money. Three or four well bred brood sows ought to turn considerable profit during the year with their litters. Pure bred stock is always worth the money either for sale, breeding or fattening purposes. As I see it the summer problem with pigs is easy of solution. The skim milk, house slops and other wastes supplemented with rape and pumpkins will bring them through to fattening time with very little cash outlay. The winter season with the brood sows represents more outlay, but a good summer will silverplate that. A half acre of rape on rich moist soil will keep several sows busy a good portion of the summer. The poultry business has to be learned, and the way to learn it is to do it. As to the egg or meat production, your knowledge of the markets there would be the safest guide. In either case a small beginning is most sure of later success, and experience will dictate as to expansion. Corn, oats and potatoes sandwiched with clover and cowpeas are easy of rotation, and, barring potatoes, every pound produced would return to the farm or pocket-book.—*J. E. Morse in Rural New Yorker.*

Just how far can the milk producing machinery of a cow be increased without a breakdown is a very important question to a whole lot of folks out in this country who have not yet acquired the prescience of alfalfa stuffing in connection with cli-

matic exuberance. The wild and wooly cow of the range with but small under capacity knows little of udder troubles, because though small it has great resisting power to disease and the action of bacteria. It requires but little examination of herd records to realize how much time is lost by udder troubles. Garget in all its hideous forms and names is an ever present malady and the lessened resistance of a highly developed gland together with the increase in number and potency of the trouble-producing bacteria is bringing about a condition that requires careful consideration. Who ever heard of a case of garget among short grass cattle—the kind that a fellow has to "ketch" with a rop before they can be milked?

A springhouse is an ideal place for milk. The milk seems better and the cream richer than any other place. However, the separator is driving out the old-fashioned method of setting milk for cream. But it will be a long time before every farm has one. Many of us will die of old age before all the spring houses are abandoned.

Alfalfa furnishes ideal pasture for hogs during their growing season. It does the alfalfa no harm and does the hogs good. It is also good for them in the winter. It does them good in any quantity they will eat.

Strike!—if they don't give you Jackson's Napa Sodas when you ask for it.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Carise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR—the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

All starting payments to be made ten days before the first day of the meeting at which the race is to take place. Nominators must designate, when making payments to start, whether the horse entered is a trotter or a pacer. Colts that start at two years old are not barred from starting again in the three-year-old divisions.

The \$10 payment January 2, 1903, keeps your entry good to January 2, 1904, whether you start at two years old, or not.

E. P. HEALD, President.

F. W. KELLEY, Secretary,

SPECIAL CONDITIONS FOR HARNESS RACES.

Entries to above races to close with the Acting Secretary, H. Lowden, Sacramento, Wednesday August 12, 1903, when horses are to be named and eligible, except where otherwise stated. Five per cent entrance and five per cent additional from money winners. All races mile heats, three in five, except otherwise stated. Moneys to be divided 50, 25, 15, and 10 per cent, unless otherwise specified in conditions. All races to fill satisfactory to the Board of Directors or they may be declared off. Distance in all heats 80 yards, but if the field is more than eight, 100 yards. A horse not winning, or making a dead heat in three, to be ruled out but will retain his position in summary, except otherwise stated. Five or more to start, or it is optional with the Board to declare race off. If there are less than four starters the Society may, if they so decide, allow them to contest for the entrance moneys only paid in, to be divided 60, 30, and 10 per cent. A horse distancing the field will only be entitled to first and fourth moneys. Hopples barred in trots, but allowed in pacing races, except where otherwise stated. The Society reserves the right to start any heat after the fourth score, regardless of the position of the horses. The Board of Directors reserve the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry. The right reserved to declare off or postpone any or all races on account of weather or other sufficient cause. Racing colors should be claimed with entries must be named by 5 p. m. on the day preceding the race, and must be worn on the track in all races. Colors will be registered in the order in which they are received, and if not named, or when colors conflict, drivers will be required to wear colors selected by the Secretary. Drivers must weigh in by 12 o'clock noon day of race they are to drive. The Board reserves the right to inflict penalties for non-compliance with the above conditions. Otherwise than as herein specified, Rules of the National Trotting Association (of which this Society is a member) to govern. Settlement in full of racing accounts will be made only Monday, September 14th.

RUNNING EVENTS.

- No. 1. **TOM FOX STAKE**—For all ages. Entrance \$10, to accompany nomination; \$15 additional for horses not declared by 4 p. m. the day preceding the race; \$300 added by the Society, of which \$50 to second and \$25 to third. Six furlongs.
- No. 2. **BELLA VISTA STAKE**—For two-year-old fillies. Entrance \$10, to accompany nomination; \$15 additional if not declared by 4 p. m. the day preceding the race; \$300 added by the Society, of which \$50 to second and \$25 to third. Five furlongs.
- No. 3. **THE GOVERNOR'S STAKE**—A handicap for three-year-olds and upward. Entrance \$10, to accompany nomination; \$20 additional for horses not declared by 4 p. m. the day preceding the race; with \$350 added by the Society, of which \$70 to second and \$30 to third. One mile and a furlong.
- No. 4. **GROVE L. JOHNSON SELLING STAKE**—For three-year-olds and upward. Entrance \$10, to accompany nomination; \$15 additional for horses not declared by 4 p. m. the day preceding the race; \$30 added by the Society, of which \$50 to second and \$30 to third. Winner to be sold at auction.
- No. 5. **CALIFORNIA STATE FAIR ANNUAL STAKE**—Handicap for two-year-olds. Entrance \$10, to accompany nomination; \$30 additional for horses not declared by 4 p. m. the day preceding the race; with \$350 added by the Society, of which \$70 to second and \$30 to third. Seven furlongs.
- No. 6. **THE PRESIDENT'S STAKE**—A handicap for three-year-olds and upward. Entrance \$15, to accompany nomination; \$25 additional for horses not declared by 4 p. m. the day preceding the race; \$350 added by the Society, of which \$70 to second and \$30 to third. One and one-quarter miles.
- No. 7. **THE VINCOR STAKE**—For three-year-olds and upward. Entrance \$10, to accompany nomination; \$20 additional for horses not declared by 4 p. m. the day preceding the race; with \$350 added by the Society, of which \$70 to second and \$30 to third. One mile.
- No. 8. **THE MACKAY SELLING STAKE**—For two-year-olds. Entrance \$10, to accompany nomination; \$15 additional for colts not declared by 4 p. m. the day preceding the race; with \$300 added by the Society, of which \$50 to second and \$25 to third. Six furlongs.

The State Agricultural Society's regular and special rules to govern all running races, except where conditions are otherwise. All declarations and claims for allowances due at 4 p. m. the day preceding race, unless otherwise specified in conditions. Owners and trainers will be held responsible for same. Entrance and declaration money to go to winner. No added money for less than four starters in different interests. In selling races, beaten horses not liable to claim. Right to use starting gate is reserved.

PARK PRIVILEGES.

- Bids will be received by the Directors up to Saturday, August 15th, at 1:30 p. m., at the office of the Society, new pavilion at 15th and M streets, Sacramento, Cal. Fifty per cent of the amount of each bid must accompany each bid, either cash or a certified check. The Directors reserve the right to reject any or all bids.
- No. 1—Cash bid for Auction Pools sold on final result of all races.
- No. 2—Percentage bid on result of all races.
- No. 3—Cash bid for Auction Pools sold on final result of harness races only.
- No. 4—Percentage bid for Auction Pools on harness races only; privilege will be allowed to charge a 5 per cent commission on all sales. On a percentage bid a satisfactory bond must be given.
- No. 5—Bookmaking Privilege only on Races, Heats and Results, both Harness and Running Races as a whole six races daily.
- No. 6—Open Bookmaking Privilege on all races, heats and results, both harness and running events, allowing any reputable bookmakers, six or more, to put in on the basis of \$2700 each for twelve days; if less, then pro rata per day; if more, a decreased pro rata. Any reputable individual allowed to put in on deposit of cash or a certified check of \$50 per cent, balance to be paid on Saturday, August 29th, on or before 5 p. m. Six races a day guaranteed.
- No. 7—Combination Book Privilege for the twelve days.
- No. 8—Bid for all and every betting privilege as a whole.
- In event of a person or firm bidding on one or more privileges, one check covering 50 per cent of the aggregate bids is all that will be required.

BENJ. F. RUSH, President **H. LOWDEN, Acting Secretary**

CONSOLATION CLASSES.

TROTTERS. A PURSE OF \$400 will be given for Trotters eligible to the 2:17 Class who have started at this meeting and not won first or second money. Horses to be named overnight. Entrance fee 5 per cent; nothing from winners. Money divided 70%, 20%, 10%. Race to take place October 29.

PACERS. A PURSE OF \$400 will be given for Pacers eligible to the 2:15 Class who have started at this meeting and not won first or second money. Horses to be named overnight. Entrance fee 5 per cent; nothing from winners. Money divided 70%, 20%, 10%. Race to take place October 30.

Nominators have the privilege of naming two horses from the same stable or owned by the same person on one entrance fee. Nominators in any race that should fail to fill may on September 8th transfer their entry to any other class that filled in which their horse is eligible. Entrance 5 per cent, of which 2½ per cent must accompany the entry and 2½ per cent to be paid on the opening day of the meeting.

MAKE YOUR ENTRY ON TIME

And be sure that it is postmarked not later than September 1, 1903.

CONSIDER THIS!

You can enter the same horse in three or more classes and have plenty of time between races. The length of the meeting permits of the program being arranged so that every horse in attendance can be started in several races.

Added Money Stakes for Running Horses will be published in this paper at an early date.

CONDITIONS.

Entries to close Tuesday, September 1, 1903.
 Entries not declared out at 4 o'clock P. M. on the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.
 Stakes will be divided into four moneys: 50, 25, 15 and 10 per cent.
 Entrance fee five per cent of Stake. 2½ per cent of Stake in cash draft or check MUST accompany Entry, balance due and must be paid the first day of the meeting. 5 per cent of the amount of the Stake additional from money winners.
 If there are less than four starters they may contest for the entrance money paid in, to be divided 50, 30 and 20 per cent.
 The Management reserves the right to declare two starters a walk over. When only two start they may contest for the entrance money paid in, to be divided 66⅔ per cent to the first and 33⅓ per cent to the second.
 A horse distancing the field shall only be entitled to first and fourth moneys; but in no other case will a horse be entitled to more than one money.
 All harness races, unless otherwise specified, mile heats, three in five.
 Distance in all heats shall be 80 yards, but if the field is more than eight 100 yards.
 Hopples barred in trotting races, but will be permitted in pacing races.

The Association reserves the right to start any heat after the fourth score, regardless of the position of the horses.
 All Stakes not filling satisfactorily to the Board of Directors may be declared off.
 Racing colors should be claimed with entries, must be named by 5 P. M. on the day preceding the race, and must be worn on the track in all races. Colors will be registered in the order in which they are received, and if not named, or when colors conflict, drivers will be required to wear colors selected by the Secretary.
 The management reserves the right to change the hour or date of any race, and the right is reserved to declare off or postpone any or all races on account of the weather or other sufficient cause. Conditional entries will be treated the same as regular entries, and nominators held under the rules.
 Any race that may be started and unfinished on last day of the meeting may be declared ended and money divided according to the rank of horses in the summary.
 Otherwise than as herein specified in these conditions, Rules of the National Trotting Association (of which this Association is a member), except Rule 4, to govern.
 Send all communications to

J. W. BROOKS, President.

CAPT. THOS. B. MERRY, Secretary

NOTICE: Nominators have the Privilege of Naming Two Horses from the Same Stable or Owned by the Same Person on one Entrance Fee.

Nominators in any Race that should Fail to Fill may, on August 26th, Transfer their Entry in such Race to Any Other of the Above Classes that Filled in which their Horse was Eligible on August 22, 1903.

N. B.—It is not the intention of the management to give any special races at this meeting, and if you want to start your horses they must be entered in the regular advertised events. Races will be arranged so that horses entered in several races will have time enough between races to start in each. For conditions see Entry Blanks. Members National Trotting Association. Address all communications to

E. P. HEALD, President.

F. W. KELLEY, Sec'y. 36 Geary St., San Francisco.

The 2:25 pace at Vallejo to-day should be a corking good race. There will very likely be six or eight starters and the winner hard to pick.

The record of 2:08 3/4 made by Musb, in a winning race last Monday at Empire City track, shows that Mr. Salishury's big pacer is not as soft as his name, after all.

Rita H. the handsome McKinney mare sold by Sam Loy of Winters to Byron Erkenbrecher of Los Angeles, won again at Seattle last Monday. She took two straight heats and did not have to pace within one second of her record of 2:13 1/4 to win.

The dropping of one figure makes quite a difference in the price of a horse. Last week the types made us say that Mr. Juan Gallegos of Mission San Jose, breeder of that fast little pacing mare Trilby Direct 2:08 1/4, received but \$500 when he sold her last month. The fact is that \$3,500 was the sum paid M. Gallegos for Trilby Direct when he sold her.

MUSH 2:08 3-4 by LOTTERY TICKET

Auduhon Boy 2:03 1/2 is the latest aspirant for world's honors in the pacing line. He will make a special effort to beat the best on record at his way of going at the coming Readville Grand Circuit meeting and some there are who say that this one is the coming champion. He is counted on by his trainer and those who know him best to cause 2:00 at least to be hung out by the timers almost any day now.

A three year old racing filly by Nutwood Wilkes stepped a mile in 2:21 1/2 at Pleasanton last week, coming the last half in 1:06 1/2 and the last quarter in 32 1/2 seconds. She is called Irvington Girl and is a full sister to Irvington Boy 2:17 1/2, and Irvington Belle 2:18 1/2. The dam of these pacers is Lady Mine by California Nutwood and is out of Lew G. (dam of Bob Angersoll 2:14 1/2 and Who Is She 2:25) by Albert W.

Onward 2:25 1/2, when Miss Ophelia went into the 2:10 list with a mark of 2:09 1/2 at Columbus, O., enjoyed the proud position at the head of all sires of 2:10 speed. He then had ten performers in that select list. Onward's 2:10 list reads thus now: Beuzetta 2:06 1/2, Onward Silver 2:08, Pilatus 2:09 1/2 and Cornelia Belle 2:10, rotters; Pearl Onward 2:06 1/2, Gazette 2:07 1/2, Colbert 2:07 1/2, Miss Ophelia 2:09, Colonel Thornton 2:09 1/2 and Major Mason 2:09 1/2, pacers.

Hope runs high among track managers this season but both the trotting and pacing records of the world will be broken, the first by Lou Dillon and the latter by Dan Patch. Nothing draws crowds like prospect-verified record breaking, and the fortunate owners of these great horses will command large sums of money for their exhibitions. And this is not all. Some people believe, and with reason, that Auduhon Boy and Prince Alert will both step inside the 2:00 ring this year.

In view of what has been accomplished by Lou Dillon in the way of lowering the trotting records during the past few weeks, Mr. Ketcham, the owner of the champion Cresceus, has awoke to the fact that the record of his famous horse is in danger, and something must be done. A day or two ago Mr. Ketcham announced that the great Cresceus would be at once set into training at the Cleveland track and remain there until August 27, on which date he will be sent against his record, 2:02 1/2, at Dayton, Ohio. Cresceus will then go on an exhibition trip through the West which will end at Omaha, Oct. 1. The contemplated trip to the Pacific coast has been abandoned as satisfactory dates could not be secured. Mr. Ketcham now has a new idea in his head and is considering the project of taking Cresceus to Honolulu later in the fall.

Monte Carlo has again reduced his record and won good race. At the Empire City track on Monday he won the \$5000 New York stake for 2:09 class others, beating Ed Geers' good horse Dan T. and a lot of nine more high-class campaigners. Monte Carlo won the first heat in 2:07 1/2, the fastest heat in a trotting race this year up to that time. Dan T. won a record heat in the same notch making honors over. Monte Carlo won the next heat and the race in 2:07 1/2. This is the fastest three-heat race of the year. There is anything in this showing that makes Monte Carlo entitled to the name "sucker horse" which some of the eastern turf writers have given him, we fail to see. Any trotter that can win a first and third heat in 2:07 1/2 and 2:07 1/2 in a field of eleven horses is no sucker. He is a race horse.

Marengo King 2:29 1/2 by McKinney, owned by J. H. Brown, Detroit, stepped a mile at the Detroit matinee Saturday in 2:26 1/2. Those who saw this performance say that this good son of McKinney will beat 2:20 before fall.

Direct Line 2:25 1/2 is dead. He was kicked by a mare and so badly injured that he had to be destroyed. Direct Line was by Director, dam Lida W. 2:18 1/2 (dam of Nutwood Wilkes 2:16 1/2) by Nutwood 2:18 1/2. He was owned at Huntington Park Farm, Cheviot, Ohio.

In the discussion of the breeding of Venus, dam of Sidney Dillon, which has been going on in some of the Eastern papers recently, Samuel Gamble of this city, who was acquainted with nearly all the owners of the mare, states that, to the best of his recollection, the late Count Valensin found, in looking up the mare's breeding, that her dam was bred to Venture and Capt. Webster, both the same year. Valensin investigated the matter as far as he could and finally came to the conclusion that the date of Venus' birth showed her to be by Capt. Webster, and he so gave it in all his catalogues.

George A. Fuller, the famous trotting horse driver, is in a precarious condition at his home in Tennessee. Fuller, who is now 75 years old, was stricken at Cleveland some ten days ago, and had to be removed to his Tennessee home. His ailment is principally disability, brought on by old age. Fuller is among the oldest as well as the most famous of living trotting horse drivers, and has been a knight of the sulky for close to half a century. He made his first big success with J. C. McFerran & Son at the celebrated Glen View Stud Farm, near Louisville, developing there many crack trotters, including the two one time champions, Orisa and Patron. When the elder McFerran died and the famous stud was dispersed at public sale, Fuller took charge of a public stable and trained until six or seven years ago, when he went to Russia and took charge of a school for educating trainers. He returned home last September, and though his age was telling on him, started out with a small string of horses again this season. Fuller is well off.

The good showing being made by Dolly Dillon 2:07 since she became the property of Mr. J. D. Callery of Pittsburg, Pa., is due in a great measure to the attention given her by our California trainer Bert Webster, for several years trainer for Mr. C. L. Griffith, owner of the great stallion Bonnie Direct 2:05 1/2. Bert has been in Mr. Callery's employ since the Blue Ribbon sale at Cleveland last May and has Dolly Dillon and all the rest of Mr. Callery's horses in charge. When Dolly Dillon was turned over to him after the sale her feet were in bad shape—contracted and afflicted with corns, so had in fact that a mile in 2:25 shortly after the sale lamed her so that she could not get out of the stall. Bert went to work on her feet and the showing she made at the matinee where Mr. Callery drove her a heat in 2:09 1/2, is evidence that the mare is in good shape again. Bert Webster's many California friends will always be glad to hear of his continued success.

At Pittsburg, August 4th, the brown gelding Boodler by Boodle 2:12 1/2 beat a field of good trotters in a five-heat race, among them the fast horse, Dr. Book 2:10. The race is described as follows: Dr. Book won the first heat in the fourth event in 2:16 1/2. Brother Al came at Dr. Book in the stretch, and by a magnificent drive by Mr. John Werner, just nipped the second heat at the wire in 2:16. The third heat was most anybody's at the head of the stretch. Brother Al was seen to swerve, and when he righted himself staggered to the width of the track and fell. Fortunately, by this time, the others had passed him, and no accident occurred. Mr. Werner had him almost stopped when he fell, and so escaped uninjured. Chas. D. Jacobs won this heat from Dr. Book at the wire in 2:19 1/2. Boodler came on and won the next from Jacobs at the wire in 2:21. The fifth heat Dr. Book was drawn, and just as the word was given Boodler made a break and was apparently out of it, but by coming the last half in 1:07 won the heat and race, time 2:23. This makes the third hard race won by Boodler this season.

The trotting and pacing track records at Petaluma were both made in 1893, just ten years ago. Advertiser by Electioneer, trotted to his record of 2:15 1/2 in a contest with Faber Time on that track August 24th 1893, and two days later Truman, another son of Electioneer took a record in the same mark in the first heat of the free for all trot. Truman took the second heat in 2:15 1/2 and then old Shylock, went on and won the next three heats in 2:16 1/2, 2:17 1/2 and 2:19. The time made by Advertiser and Truman have never been beaten by a trotter over the Petaluma track since. At the same meeting Diablo won the free for all pace in straight heats, beating the home favorite Plunkett and the Steinway gelding W. Wood in 2:10 1/2, 2:12 1/2 and 2:14 1/2. The time made by Diablo in the first heat is still the pacing record of the track. Will these records be broken at the Breeders meeting week after next? The probability is that both will have to go, but it will take pretty good horses to lower them, even though the breeding of trotters and pacers has progressed greatly during the past ten years.

A press dispatch sent out from Lexington, states that Prof. W. W. Milam had protested first money won by Lady Gail Hamilton 2:11 1/2 in the Hartford futurity last fall. The grounds on which the protest is based is that the races were advertised under the N. T. A. rules, which provide for two-in-three heats for three-year-old races and under. It will be remembered Lady Gail Hamilton won the first heat and John Mac the second and third. Milam claims that the race ended with the third heat, but no one seems to have discovered anything wrong with the race before Lady Gail Hamilton went on and won the fourth and fifth heats and was given first money.

The Walla Walla Race Track and Fair Association has chosen permanent officers to manage its affairs for the coming season in the selection of the following: Superior Judge Thomas H. Brents, president; R. J. Johnson, vice-president; R. B. Caswell, secretary; R. E. Guichard, treasurer. The new Walla Walla race track has just been completed and is a mile track. Joseph McCabe, chairman of the board of trustees, says the track is one of the fastest on the Coast and that already arrangements are being perfected for some good races and a rousing fair, which will open October 19th.

The first "bicycle sulky" as it was called then, that ever came to California was given its first trial on the Petaluma track. Superintendent Frank Covey of Palo Alto Stock Farm purchased it through the firm of J. O'Kane of this city, and received it in time for the Petaluma meeting which opened August 30th, 1892. It had just arrived at the track when an accident happened to the well known trainer, J. W. Gordon, who was thrown from a sulky and had his leg broken. Mrs. F. H. Burke of La Siesta Farm, San Jose, who was present at the fair with the farm's exhibit of fine stock, immediately joined with others in arranging a benefit for Mr. Gordon. Superintendent Covey loaned the use of the new bike, it was put in a tent, and Mrs. Burke acted as doorkeeper. Twenty-five cents was charged for admission and a big crowd passed in to inspect the new speed accelerator, and incidentally assist the unfortunate driver. Thus was our first bike put to a much different use than it was built for. At that meeting the bike looked very awkward to the spectators present, but should a horse appear in a race at the Petaluma meeting this year hitched to one of the old high wheels the appearance would be more grotesque than that of the bike eleven years ago.

In a letter from Cleveland to the Chicago Horse Review, under date of August 3d, Volunteer says: John A. McKerron was turned over to Ben Kenney Thursday morning. The occurrence was a surprise to everyone, including Kenney himself, except a very few. The facts are that "Doc" Tanner felt obliged to give up the horse as his obligations to his matinee patrons made it impossible for him to continue to give McKerron the almost undivided attention he deserves. It is the intention to start the Boston cup winner against his record and the record of Cresceus also, several times before the season closes, the first essay to be made week after next at Brighton Beach and to be followed by others at Readville, Memphis, etc. McKerron is now in magnificent form, all that he needs being the addition of the feather edge that a master trainer alone can put on a champion. Mr. Devereux and Tanner, after considering the abilities of various trainers that they favored, at last decided on Kenney, whose reputation needs no comment and

FUNSTON by DICTATUS
Beaten two lengths by Mush in 2:08 3/4

whose stable this season is not so large as to preclude his being able to give McKerron the closest attention and best preparation possible. When Tanner made the proposition to Kenney the latter was both surprised and gratified. He said that he considered the offer an honor, but had doubts as to whether he ought to accept it, as, while he had trained and driven many horses to fast records, he had never before in his life undertaken the task of giving a champion a special preparation for record-breaking. Tanner replied that he was aware of this, but that Mr. Devereux and himself both felt satisfied that no one else was more competent to do so. Kenney then agreed to take the horse, who was at once turned over to him, and that afternoon he drove him an exhibition mile in 2:07. Messrs. Devereux and Tanner believe that McKerron has been trained over the Cleveland track so long that a change will do him good, and so he will be shipped to Buffalo with Kenney's stable and thence taken on East by him. In his 2:07 mile at Cleveland he acted as if he could have beaten his record of 2:05 1/2 right then and there, and just how fast he may trot in a month or so more is an interesting question.

How Lou Dillon Won the Record.

The capturing of the world's trotting record for mares by Lou Dillon at Cleveland on July 31st, 1903, has been written and talked of a great deal, but the first complete accounts of the great feat only reached us by mail last Monday. The following written by "Volunteer" (Editor Hervey of the *Horse Review*), is the most complete and best of any that have appeared in the turf journals, and we reproduce the same for the benefit of our readers.

The letter is written under date of July 31st, the evening of the day on which the wonderful little mare made her record. "Volunteer" says:

This morning the outlook was anything but good, as the sky was overcast with gray clouds, the wind damp, and gusty, and the prospect for further showers imminent. However, about 10 o'clock the breeze switched around to the northwest, the sky began to clear, and the sun came out. The track was alive with horses all the morning, and from the time that they made in their work it was apparent that the footing was approaching feather edge. Consequently it was felt that if the wind would but subside, the wished for opportunity had at last arrived. Owing to the continued postponements, the crowd was not large, there probably being not to exceed three thousand people present. Five thirty was the hour set for the trial, which was delayed as late as possible in the hope that the wind would lie down. This hope, however, proved fruitless, as a strong breeze continued to blow stiffly from the northeast all the afternoon, the big flags on the grand stand flying in the gale and the tops of the trees in the infield shaking and tossing. In addition to this, the air was very cold, so much so that it felt more like an afternoon in late September than in July. Almost all the ladies in the boxes were wearing their wraps and many gentlemen could be seen with their overcoats on. The general sentiment was "it's a poor record day," and as the time approached for the trial to be made all hope of success was for the third time given up, and it is probable that had not two postponements been already made, the trial would have been abandoned altogether. But rather than completely disappoint the spectators who had come to the track for the third time in hope to see Lou Dillon trot, Mr. Billings decided that the mare should make an effort. No idea was entertained that there was any possibility of her trotting a record-breaking mile under the conditions; and in consequence the announcement was made from the stand that she would trot as fast a mile as possible, but that anything phenomenal need not be expected, as it was out of the question.

The mare first appeared on the track at about four o'clock, hitched to a long-shaft cart, and jogged a 2:30 mile. At five she was given one to sulky in 2:13½, the quarter time being 0:35, 1:09, 1:41½. It was 5:40 when she came out for the formal attempt. Two pacemakers were employed to assist her, and mapping out the plan of the mile, considerable hesitancy was felt as to the best method to pursue. On account of the strong wind which she would have to breast up the hack stretch and around the far turn, it was felt that one pacemaker should precede her to the last-named point in order to break the force of the wind, but as she had never been worked in this manner, Mr. Sanders felt somewhat dubious as to its success; in fact, it was at one time settled that it should not be pursued, but he finally agreed on condition that the pacemaker should keep several lengths in front instead of a few feet, as is customarily the case.

The start was given on the first score, the mare moving very fast and strong, preceded by the first pacemaker, driven by Doc Tanner, who was about three lengths in front, while the second, driven by Scott McCoy, was to the outside and trailing several lengths back. Lou Dillon darted away as if upon wings, and took the turn like a swallow and at the most terrific speed, Tanner being obliged to drive the runner furiously in order to keep his position in front. As they reached the quarters, the timers flashed out 30½ seconds, and there was a great buzz of excitement from the watching thousands. As Lou Dillon turned into the hack stretch and started on the straightaway flight to the half-mile pole, although she was beginning to breast the wind, she accelerated her speed to a gait that was simply dizzy. At the three eighths pole she was trotting such a clip that it seemed as if she would literally run over Tanner and his pacemaker, as she drew to them with a burst of speed that was amazing. Her momentum was so great as they neared the half that Sanders was obliged to call to Tanner to pull out from the pole with the runner, as the mare in her anxiety was beginning to pull out in order to go around him, and Millard was obliged to take a strong hold on her to prevent her doing so. Tanner consequently pulled out and let her through. She reached the half in 1:00½, having trotted the second quarter in 0:30½. As the time was flashed, there was a roar from the crowd of "She'll do it," and the excitement, which had been intense from the start, began to rise to fever heat. The flying mare now turned into the bend around the far turn, and directly

into the teeth of the northeast wind, but she kept on at the same killing clip, and seemed to skim the earth as she scudded around the fast turn close to the rail with both pacemakers thundering at her heels. The third quarter was trotted in 0:31, full against the breeze, and the three-quarters reached in 1:31½. At this point the entire assemblage broke into loud cheers and hurrahs, for it was felt to be certain that owing to the mare's marvelous gameness her record was surely beaten. As he swung into the home stretch, Sanders brought Lou out into second place and McCoy shot his pacemaker inside her next the pole, while Tanner brought the other up on the outside and so the three started for the wire neck and neck, in one of the most exciting and spectacular drives ever witnessed. They raced through the stretch to the distance with apparently undiminished speed, but at this point it was evident that the mare's effort was beginning to tell on her as she seemed to be slackening her speed a trifle. At the draw gates Millard reached out and flocked her lightly on the neck a couple of times with his whip. Tanner and McCoy were both yelling like Comanches to encourage her, and with a last desperate effort she sprang away again and finished on her course, tired, but dead game in 2:02½.

Pandemonium had reigned in the grand stand and on the lawn from the moment she left the three-quarters pole, cheer after cheer greeting her at every step as she came through the stretch. Hundreds of watches were held on her, and the first glance showed to the holders that the record had been broken. It was not necessary to wait for the official announcement, but it was made in a moment—2:02½. A perfect tornado of applause then broke forth, rolling out in wave after wave of unrestrained enthusiasm. As the mare came jogging back in her peculiar dainty way she was given a tremendous ovation, while the friends of Mr. Billings and the prominent horsemen present thronged about him and Millard Sanders to tender their congratulations.

The three official timers were Messrs. H. E. Chapman, A. H. Hough and C. S. Britton, of Cleveland, while Mr. W. S. McCrea of Chicago held a fourth watch. Mr. McCrea's watch registered 2:02 3/5; of the other three, two showed 2:02½ and the third 2:02½. A canvass was made among the outside watches held directly under the wire. Mr. Billings himself caught the mile in 2:02 3/5, as did Mr. Fred Hartwell of Chicago and Frank Jones of Memphis. Ed Geers caught it 2:02½, Scott Hudson 2:02 3/5, and Murray Howe 2:02½. Of scores of others all but one showed some one of these figures quoted. So far as is known, the only watch that showed as slow as 2:03 was that of M. E. McHenry, whose timer marked 2:03 flat; but Mr. McHenry said that it seemed habitual with him to time slow on such occasions, for in all the fast miles that he had driven Dan Patch he had, with but a solitary exception, always caught him from a quarter to a half second slower than the officials. It is probable that a majority of the watches held upon Lou Dillon caught the time faster than 2:02½, so the authenticity of the record is perhaps more conclusive than that of any record-breaking mile ever trotted.

Mr. Billings is not a demonstrative man by nature, but his happiness was plainly evident and tears of pure pleasure stood in his eyes as he watched Lou Dillon led out for her cooling walk five minutes after she finished. He had not looked for a mile better than 2:05, and anything as fast as that would have answered his most sanguine expectations. Millard Sanders has the most unlimited confidence in Lou Dillon, having always predicted that she was the fastest trotter that has ever lived, but even he had not anticipated any such mile as the one she trotted. The average opinion in the crowd had been that she would finish in 2:05 to 2:06. Scott Hudson, who had never before seen her go a fast mile, predicted 2:06, but after the finish said that he believed she was destined to trot in 2:00, if not this season, at least next. Mr. Geers, who has himself driven The Abbot to the world's record and witnessed and timed both of the miles trotted by Cresceus below 2:03 in 1901, said that in his opinion Lou Dillon's mile was undoubtedly the greatest ever trotted and that her beating 2:02½ was merely a matter of the first time she found a perfect day and track. In conversation with M. E. McHenry the latter stated that in his opinion the wind cost Lou Dillon at least a second. He had driven Dan Patch an exhibition mile in 2:02½ but a few moments before, and it was his judgment that a breeze as strong as that prevailing must have cost as small and light a mare as the daughter of Sidney Dillon at least a full second during the half-mile that she was obliged to trot against it. He therefore gave it as his unqualified opinion that had the day been warmer and there been no wind, the time would have been 2:01½ instead of 2:02½. One of the most striking features of the performance was, indeed, the way in which it was received. I have in past years witnessed many record-breaking miles, by the champion trotters and pacers alike, but never before have I seen one received with such exultation and pleasure by every horseman who had the pleasure of witnessing it as was this by Lou Dillon. There seems to be not a trace of jealousy, nor the slightest tendency to criticize her, in any quarter. All horsemen unite in paying her the most hearty and spontaneous homage as by far the most wonderful trotter that they have ever seen.

Aside from the effect which the wind may have had upon Lou Dillon, Mr. Sanders told me after the finish that she lost at least a half-second on the hack-stretch, owing to the inability of the pacemaker in the lead to keep out of her way. When the mare made her terrific burst and came to him so fast, near the half, she began to rush and pull out in order to get past him, and in so doing commenced to pull on one rein. In order to steady her Millard was obliged to take a very strong hold upon her, which, he says, he never has done before in a fast mile, and which, in his judgment, cost her at least a half-second. In fact, it is probable that the pacemaker in the lead was, on the whole, a hindrance rather than a help. In order to have

effectually broken the wind he should not have preceded her by more than six feet, but, as previously stated, owing to the mare's unfamiliarity with such a method of prompting it was thought best to keep him several lengths ahead. It is very doubtful if, excepting for the few rods on the back-stretch when she came to him so fast as to be directly behind him, he really broke the effects of the breeze in the least, and it is probable that she would have gone as fast or faster had he kept at her side or wheel, as has been the case in her previous record-breaking miles. While the mare was visibly tired at the finish, she blew out very quickly, and was not distressed in the least, standing firm on her legs and showing no evidences of fatigue.

An analysis of the mile reveals the extraordinary gameness and courage of Lou Dillon, as it will be seen that not a single quarter in it was trotted as fast as 0:30. It was a most beautifully rated mile, though in the strict sense it was not really rated, as Mr. Sanders says the mare must always to a great degree be permitted to rate herself. Consequently, her extreme flight of speed is not apparent at any place to the reader who scans the fractional time of the performance. That it would have been under other conditions would undoubtedly have proven the case, and on this account it is generally felt that when conditions do favor she must assuredly shatter the world's record. When Cresceus trotted in 2:02½, he went to the half in 0:59½, and it is the widespread opinion that any time that Lou Dillon reaches the half in 1:00 or better she will come home in at least 1:02. Another thing in estimating the merit of this mile that must be carefully reckoned is the fact that she had been prepared originally and was ready to start upon Wednesday. Yesterday afternoon she was also again held in readiness, being given four miles, the last three of which were trotted in 2:16, 2:14½ and 2:09½, the last quarter of the last mile being trotted in 0:28½. When the decision was finally reached to make the second postponement, the mare had already been breezed out the first three miles, and after the crowd had left the track late Thursday evening, Sanders brought her out to give her a final heat in about 2:12, with the last quarter in about 0:31. He would have succeeded in this, as he went to the three-quarter pole at the desired rate, but there the runner came to him by agreement to accompany Lou Dillon through the stretch, and she was so full of go that he decided to allow her to step home as fast as she wanted to. Although the wind was then blowing smartly, and directly in her teeth, she came to the wire at a rate of speed never before witnessed in a trotter. A dozen or fifteen gentlemen had remained to witness the heat, and among them only one watch registered as slow as 0:29. This was held by Jas. A. Murphy, of Chicago. Of the others, all showed either 0:28½ or 0:28 3/5. The first eighth was caught in 0:14½, and the last in 0:14½. The mare did this entirely of her own free will, as Millard simply gave her her head, and when "Doc" Tanner, who was driving the runner, started to shout encouragement to her near the finish, he told him to desist, as she was going well enough without. It was at first thought by the timers when they looked at their watches that a mistake had been made, as the mare was trotting with what seemed to be the most perfect ease, but comparison immediately showed that they had just witnessed the most wonderful flight of speed ever displayed by a trotter. Several of those present had expected to leave the city that night, but the majority of them at once made up their minds to stay over for her trial next day as they felt assured if the conditions were favorable she was certain to beat 2:03, and might, if everything favored, beat 2:02½. That these enthusiasts feel doubly and trebly repaid goes without saying.

In her trial Lou Dillon was rigged as usual. She wore only a white felt bell quarter-hoot forward, and a very light shin, ankle and speedy cut hoot behind, and was driven without any check rein. She pulled a brand-new red Faher sulky, built expressly for the trial, which weighed 27 pounds, and Millard Sanders weighed in at 155 pounds.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

WILL NOT SCAR OR BLEMISH.

GOMBAULT'S CAUSTIC BALSAM

is the safest and most effective lotion or blister for ailments of

HORSES and CATTLE

and supersedes all cautery or firing.

It is prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.00 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Fishing.

Loafing with a rod and line
Where the waters swirl about,
Whipping up the stream—it's fine
When the speckled trout are out.
Working up the sparkling shallows
Where the sun the water hallows:
Laughing when the fish begin
Rolling, tumbling, falling in:
Loafing with a rod and line—
Ain't it fine!

Leaving all our care behind,
Leaving all the daily toil;
Going out to feel the wind
And to hear the ripples boll.
Going where the sun is gleaming,
Nature with her joys is teeming—
Whipping up and down the stream
In a piscatorial dream;
Loafing with a rod and line—
Ain't it fine!

Loafing with a rod and line
Where the waters swirl about,
Whipping up the stream—it's fine
When the speckled trout are out.
Reeking naught of business trouble
While the happy waters bubble,
When the speckled trout begin
Rolling, tumbling, falling in:
Loafing with a rod and line—
Ain't it fine!

Care of Tackle in Winter.

There are some phases, and occasionally unpardonable ones, in the general "make up" of an angler, which usually indicate his temperament and the lines he is apt to follow when he goes a-fishing and in the care of his tackle. There is the impetuous, enthusiastic angler who dashes into the planning of his first outing, and into the stream when he gets there, with the glow of the sport radiating, as it were, from every pore of his body, thoughtless of every condition except that of being afield and of catching fish. His reel, rod, and water gear are all awry, for he has given little thought or attention to his tackle during the winter, and is often compelled to buy a new outfit, though the old ones would, with care, have lasted several seasons. One of his companions on the outing, it may be, is of a more sedate turn of mind but not less sensitive to the enjoyment of his environment and pastime. One of his striking characteristics may be noted in the extreme care with which he tests his leaders before attaching them to the reel line, and the precise lining of the rings and guides of his rod. His entire impedimenta is in perfect order; the click of his fly reel emits no jar or rattle, but is perfect in cadence and in smoothness of action. His rod is straight as an arrow, and its ferrules are bright, and fit into each other with exactness, never becoming metal-bound. He has taken good care of his tackle during the off months of winter; and it would be well if all anglers followed his example, not only because of the economy of it, but in the increased pleasure of a projected fishing trip. For the benefit of the careless ones, a few practical directions on the care of tackle in winter are here given:

The Rod—A well-made split bamboo or wood rod should last for years if proper care is taken of it. Each joint, after a day's fishing, should be wiped dry very carefully and bent into shape, if it has a set, before putting away; and a drop or two of sperm oil should be rubbed over the rod before going out again with it. When laying a rod aside for the season, it should be carefully examined and all damages repaired; the ferrules and hands should be thoroughly cleaned and new plugs fitted to the joints. Take the rod apart, wipe the joints dry, and lay them away in their case in an apartment where the temperature will be dry and uniform, not over 50 degrees. If a case is used, do not tie the strings or bands too tightly; this would be likely to bend the tip and second joints. Under no circumstances let the rod stand near the chimney or furnace flue, and the other extreme of cold in a garret or outholding should be avoided. Changes of temperature destroy the pliancy and stiffness of a rod. To insure the continued equal distribution of strength the rod should be laid flat on the floor or a shelf, instead of being stood on end in a corner, and under no condition should it be left jointed and hung on pegs.

The Reel—Should be taken apart, thoroughly cleaned, and then oiled slightly. Put the parts together, and place the reel in a dry drawer or closet of moderate temperature.

Lines—All lines should be reeled off and stretched from end to end on a sunny morning, and left in the air for a few hours. They should then be overrun lightly with a bit of woolen cloth or chamois to remove any taint of mildew or other matter, and then be wound upon the reel, but not too tightly. If frayed portions are discovered, the line should be condemned, and the good parts kept for miscellaneous uses, which will be found frequent enough.

Leaders—Will keep for years if laid away in a dark place, where it is not too warm or too damp, but they should be tested before using, and stand a strain of four pounds for bass or trout and at least seven pounds for salmon.

Flies—The best thing to keep flies in is a pasteboard box, tightly and closely wrapped in a newspaper. They will then need no moth preventive. There is a

moth-proof tin box sold by tackle dealers which answers a good purpose. An old angler recommends a flat cardboard or other box, with a thin layer of wool or wadding, upon which the flies are placed, covering them with a piece of cardboard, which, by means of corks at the corners of the box, is prevented from pressing on them. This cardboard box is then placed in a tin box.

Fly Books—Should be perfectly dry and wrapped tightly in a newspaper. If placed in a cardboard box, which is also wrapped in a newspaper, they will be doubly protected.

Hooks—Do not stick their points in cork and stow them away, for if the atmosphere is slightly damp, or the cork not absolutely dry, rust will occur. The best plan is to wrap the hooks in oiled paper (kerosene is good) before putting them away for the winter.

Bait-hoxes and creels should be thoroughly cleansed with warm soda-water, and when dried it is well to sprinkle them with a little carbolic acid, or a wash of carbolic acid soap can be used.

Fish Lines.

The most prevalent parasite inhabiting the black bass is a red-thread worm known as *Filaria Solitaria*, which infests other fishes than the black bass and is also found in frogs. It is more commonly found during the cold weather, although it may be present at all seasons, particularly in low and sluggish waters. Fishes, as a rule, are much infested with parasites, and unless present in large quantities in comparison with the bulk of the fish, do no harm to the fishes as food. When the latter are cooked, the parasites enter into the sum of nutritive matter. Dr. Joseph Leidy, of the University of Pennsylvania, was considered quite an authority on the subject of fish parasites, and is reported to have said once in answering a question on this subject, that he thought the parasitic worms in fishes improved their flavor as well as nutritive qualities, adding, however, "I confess I prefer the fishes without the parasites, and when I eat the roe of a herring I first scrape off the 'gingers-head worms' that are usually seen adherent to the surfaces."

For some time past there has been a strange species of fish noticed in a pool near the fish hatchery at Ukiah. One of these fish was gilled recently with a common hay fork and thrown from the spring which is the source of the pool. The specimen was taken to Colonel LaMotte, superintendent of the hatchery, who is an authority on things pertaining to species of fish. He at once pronounced it an Austrian "mirror" carp. This is said to be one of the most toothsome fish known, but the manner in which they came to be planted in this spring is a puzzle. Old settlers have known of this fish being in the spring for many years, but did not give it sufficient thought to ascertain its species. In color it is golden, has a decidedly pretty contour and is almost without scales. The few scales possessed by the fish are a dark golden color, making a decided contrast with the lighter hue of its body. Colonel LaMotte intends to make an investigation and determine, if possible, the manner in which the species came to be transplanted in that vicinity.

The railroad fish hatchery has been doing an immense business this year and only recently 300,000 young trout were planted in Mendocino County streams. Of these 75,000 were placed in Reeves Mill Creek this week. There are countless thousands of young trout ready for transplanting and they are being sent out as fast as possible. The water in the streams of Mendocino County is unusually low for this season of the year, which is a disadvantage in the placing of young fish.

A consignment of 120,000 trout from the State hatchery at Sisson arrived via the Southern Pacific Railroad safely at San Bernardino last week, and under the direction of deputy Fish Commissioner James H. Boyed, the infant fish were hurried to the mountains and safely planted in the mountain streams. There were twelve cans of fish, around each can was placed a certain amount of ice so that the fish might not die because of the heat.

Deputy Fish Commissioner English and an assistant accompanied the fish to San Bernardino, he says they are the finest specimens of trout ever turned out by the State hatchery. He does not believe they were harmed by the long trip from the northern part of the State, and he also believes that the precautions taken by Mr. Boyed for their transportation to the mountains will result in their being safely planted without suffering any loss.

The fish were taken to the following mountain streams: Devil canyon, Lytle creek, Bear valley, Lefevre City creek, Warm creek, Dark canyon, Waterman canyon, Little Bear valley, Mill creek, upper Santa Anna, Deer creek and Santa Ana above Bear creek.

The fish for the eastern section of the valley were shipped to Craftonville on the same train and loaded into wagons from there.

Outings Made Enjoyable.

When you go to the country or the mountains, dress your feet properly. Ill fitting and improper dress will spoil your pleasures. The Skinner Co., 301 Market St., have made a special pattern. Footwear for men and women that is right for all kinds of outdoor work. The prices will suit your purse as well as the shoes fit your feet. Call and see them.

The Self Basting Broiler is one of the New Camp Comforts. It sells for 50 cents, and Skinner has it—Don't fail to see it, if you are going Camping or Hunting during vacation.

The Boy's Gun.

Perhaps there is no other piece of mechanism that has ever been invented, for which the average boy has more admiration than he has for his gun. The reader can doubtless recall with what pride and pleasure his first handled a real fowling-piece, which in all probability he has not outgrown to this day.

And it is but natural that a boy should regard a gun with awe and admiration, embodying to his mind, as it does, the utmost of power and force which the skill of man is able to produce. What wonder is it that he should aspire to own one, and look forward with intense longing to the day when he can possess one of his own! Few indeed are the boys that do not manage to get possession of one, in one way or another, sooner or later, and the day on which it is purchased is the proudest in all the whole round of a life's history.

Many a lad has resorted to ends, in order to raise the money necessary to buy his first gun, which doubtless bring a smile of amusement to his face as he recalls them in after years. And the fact that the prize was so dearly won did not detract from its value when at last secured, may be taken for granted to be only too true.

The desire and ambition to own a gun has been the incentive which has inspired many a man in youth to earn his first dollar, and so stirred him to the first real endeavor of his life. But it contains its dangers also which are not insignificant, by any means. The first of these is the fact that in his haste to buy, many a lad made his purchase before he had succeeded in saving enough money to pay for a respectable piece, and the consequence was that his arm when purchased was pretty sure to be about as poor and worthless an affair as could be found anywhere in the neighborhood.

The second difficulty arose from the circumstance that in nine cases out of ten, the young purchaser kept his intended bargain strictly to himself, not making hold to tell of his aspiration for fear of being exposed to ridicule, and thus was compelled to rely upon his own judgment instead of securing the assistance of an older and wiser head.

When the bargain was finally struck, it was pretty sure to be a poor one. What utterly worthless and good for nothing affairs have been seen in the hands of boys! The wonder is that we do not hear more often than we do of accidents from these thoroughly untrustworthy pieces which have found their way into the hands of the young and inexperienced. A veteran of many years experience would hardly make hold to use some of them, so worn and dangerous is their condition, and yet a boy would not hesitate to put them to the test, through ignorance of their character.

Horse-pistols, cast away muskets of earlier days, arms rehomed and altered, no one knows to what extent, rifles made into shot guns and flint locks converted into breech loaders by some ingenious but inexperienced blacksmith in his leisure hours, these and many more, fire arms of the most unusual sort will be found in the hands of boys, of some of which it would be difficult indeed to trace out the history and origin.

"I can recall from my boyhood days an incident which impressed upon me especially the dangerous character of these odd unreliable arms, for which no one is willing to stand sponsor," said an old sportsman on this subject. "I was out hunting ducks with a companion of about my own age, and as we were standing on the lake shore, scanning the tossing waters before us for a sign of an approaching duck, of a sudden the piece with which my associate was armed, a musket altered from muzzle to breech loader, suddenly went off as he held it under his arm. Fortunately neither of us was hit with the charge, but the pebbles on the beach at our feet were thrown about in a lively manner, many of them striking us in the legs and feet, and for a moment we both thought that we had been shot. We took the gun to a gunsmith on our return, as the hammer would no longer stay at full cock, and he informed us that the accident had been occasioned by the crumbling away of the tumbler, it being of soft metal had given away before the constant pressure of the spring. That occurrence opened my eyes to the danger to which an unreliable gun exposes its owner on all occasions, and from that day began my education in the merits of the several makes of guns to be met with on every hand. Reliability and superiority were qualifications which had never occurred to me up to that time."

Now it is a duty which every parent owes to a son, to see to it that he is not trifling with any of the dangerous and untrustworthy apologies for a gun which are more likely to fall into his hands than those of anyone else, simply because an unscrupulous individual is sure to take advantage of his ignorance, if occasion offers.

Let a boy have a gun if he wants one, teach him the proper use of it and the correct method of handling it so as not to expose others to danger from it, and best of all, see that he is supplied with a new and reliable and proper piece for his handling. There are a number of both shot guns and rifles which are made especially for boys, put onto the market just to meet this very difficulty, which it is here the endeavor to outline, and every dealer carries them in stock—Parker Bros., L. C. Smith, Remington, Winchester or Clahrough makes are standard. These are the guns which should be put into the hands of boys and the worthless trash which so many of them to-day are handling should be taken from them and cast away—into the scrap iron pile. That is where they belong and where these dangerous fire-irons will be out of harm's way.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

Hank's Mourners.

It wa'n't quite Christlanlike, but when
Hank went the way of mortal men
No one in all our neighborhood
Could say a word that sounded good.
No one could give a hint that he
Would find a mild eternity;
All ruther 'lowed that, like as not,
He'd get his just deserts served hot.
The parson, not to go amiss,
Just read from Job and Genesis.
And, not to stray off in the dark,
Made no extemp'ory remark.
Without a friend! It struck us hard
As we returned past Old Hank's yard,
Leaving him in his lonely bed,
Where not a single tear was shed.
Without a friend! And then a cry
That gave our thought at once the lie—
A wall of grief that passed all bounds
From Hank's three yaller, wuthless hounds.

Collie Trials at the World's Fair.

It is possible that one of the features at the St. Louis World's Fair next year will be a trial of working Collies. These trials are frequent in England and Scotland and are drawing cards. Similar contests are held on the Continent, particularly in France; the dogs competing there are "sheep dogs" essentially, but whether they are Collies, or a cross-bred dog or not, we are not fully posted. As to the practical value of such trials there can be no question. In the United States such exhibitions are not held as often nor is the interest shown as extensively as it should be. The bench show Collie and the working Collie seem to be essentially different in many respects. As to the former dog, while he seems to be a thing of beauty and a joy forever to his owner, his working qualities, as a rule, are of so latent a nature as to excite either ridicule or disgust when put to the test—generally on claimed abilities to do everything in the drover's field but talk. The dog which does the work are generally a rather nondescript individual of undoubted Collie origin and popularly known as a "sheppard dog" and usually called "Shep" by owners and drovers.

This latter class of dogs are thought highly of by reason of their intelligence, courage and great working abilities and are valued accordingly. Just what they can do, and how far they can go, in comparison to the working Collies across the sea, and what their particular standard is beside the working Collie, which latter dog is typical of the breed as well as a practical working animal, is a question we are not in position to answer.

Possibly some of our readers may be able to shed a little light in this subject, for the development of the working Collie and trials of these dogs is a matter that is worthy of systematic development and organized effort to that end.

A communication from F. D. Coburn, Chief of the Department of Live Stock, is suggestive of inducements for concerted action of breeders and fanciers and is as follows:

"EDITOR BREEDER AND SPORTSMAN—

Dear Sir:—Parties interested in a possible trial of Collie dogs as a feature of the World's Fair in 1904, have suggested the enclosed rules for its government.

Is there in your opinion any sufficient interest among the breeders and users of Collie dogs in a public trial of the character named to make it creditable to and worthy of recognition at a Universal Exposition?

This department would be pleased to receive from you any suggestions as to the advisability of such a trial, and rules therefor."

The rules already suggested for a possible trial of Collie dogs at the Louisiana Purchase Exposition are the following:

The Collie trials will be held under the personal direction of the superintendent in charge, and for these trials blank applications for entry, containing columns for name, age, sex, color-marks, etc., of the dog may be obtained of the secretaries, up to the time of running. Kennels will be provided for the dogs. No dog can be entered except for trial.

Each dog competing will be required to take five sheep from a pen, drive them a certain distance to another and pen them there.

A fresh flock will be provided for each dog. He, in driving, may bark or not as may be his habit, but biting his sheep will be a demerit.

Each shepherd may take his dog over the ground before the sheep are brought in, and show or tell him what he wants him to do.

The shepherd may precede or follow the sheep as he may choose; he will not be permitted to assist his dog, except by voice or gesture. Hallooing, berating, or much bidding, or noise, will detract from the estimate of the performance of the dog.

When a dog is working, no other dogs shall be present to distract his attention.

No person, excepting the person in charge, and the members of the jury, shall enter the sheep ring while the dog is working.

The jury will carefully note the disposition and docility of the different flocks of sheep, and make due allowance for those which are more wild than others.

Each shepherd will have the privilege of exhibiting the working of his dog by choosing his own kind of work with the sheep after the regular trial has been completed. He may also show the training of his dog for other practical purposes as a farm or house dog.

Dogs and hitches fifteen months old, or over, must compete in the aged class. Puppies under fifteen months having competed in the puppy class will also be eligible for entry in the aged class.

All ties will be run off on flocks of three sheep. Tractability, ready obedience, steadiness in driving, gentleness in working the sheep, and general aptitude in the dog for the business before him will have due influence with the jury in making their awards.

Ethics of Breeding.

Oh, she's just a brood bitch, is the passing remark of the breeder who is showing his kennels to the visitor. How often we have heard this, and cast our eye upon some faultily constructed female dog that bore but scant resemblance to the crack show dogs of the kennel. Still to one who was familiar with the breed represented by the animal, there might appear certain tokens of strong character and type, which all her conspicuous faults could not hide from the man who knew the game, and then again, and this is more often the case, she might have no further excuse for being there beyond the fact that she was a female and could shell out puppies. How many there are of this sort of dog in kennels that ought to be better supplied. It is the result of the idea that anything is good enough for a brood bitch, and that perhaps is why we make such slow progress as a dog breeding nation in comparison to the British.

The science of breeding has engaged the attention of a few who are interested in the dog cult, and we have had many beautiful theories evolved that look like finding winners—on paper, but somehow these clover chaps who have the game down to mathematical or alphabetical exactness, are never high up in prize lists with their stock, which would argue that nature is not a scholar and has her own homely ways of doing things, and the many inexplicable upsets of carefully laid plans would seem to bear out the accusation that Nature is a very contrary jester. Yes, she is at times.

We have only a lay kennel man's idea of mixing the different faults and good points so as to bring out what we want as a winner, but of the theories and constructions put upon breeding ethics we think that "Mac Siccors" deductions embody a lot more horse sense than the average. Furthermore, we know that the writer has been and is one of the most successful breeders of Scottish Terriers on the other side. When in the hunting field, in a strange country, we used to follow the man who rode straight on the line of the hounds, not the man who cut corners with the idea of beating the fox, and the same applies here. The theories that are tangible and that one can see through without a binocular, are the safest to follow, and you get more sport. In our esteemed contemporary, "Illustrated Kennel News," "Mac Siccors'" "Ethics of Breeding" is a common sense talk, and the subject is handled with a Darwinian force.

This writer takes as his text the difficulty of breeding first class Scottish Terriers, but what he says, while it applies, in the beginning of his article, more especially to the breed mentioned, it becomes so general in its application, that any breeder, if he knows his breed intelligently, may readily apply the arguments. To more distinctly bring out the points, we have taken the liberty of heading the different paragraphs, says *The American Stock-Keeper*.

DIFFICULTY OF BREEDING FIRST CLASS "SCOTTIES"

Judging from the puppies that are to be seen at shows, the difficulty of breeding first class Scottish Terriers is a great one. The average is improving, but the first class dog is as rare as ever if not more so. What can we do and whither can we turn to remedy this? I cannot set myself up as an authority, and point the royal road, but it may help matters if one struggles along the thorny way expresses his thoughts and his inferences.

SHOW RING FAILURES AS BROOD BITCHES.

The first thing that occurs to me is that few breeders are sufficiently particular about the hitches they breed from. We are all tempted to give a bitch that is a failure in the show ring a chance to prove herself at stud. We say to ourselves: "Here's a bitch, short in head, long in back and loose at shoulders; but her sire was a good dog, her dam's sire a good dog, and if we mate her with a good dog, long in head, closely coupled and good fronted, she should throw us, at any rate, one good pup." But in this we deceive ourselves. I cannot deny it may happen; long shots have a knack of coming off in their turn. All things being equal, an 100 to 1 chance will happen once in every hundred and one times; but should that once be early in the game, it does not increase the probability on a large average, or afford proof that the chance is better than we anticipated. The dam of Isinglass is said to have been sold for £25, but it does not follow that all mares sold for £25 will breed Isinglasses. To suggest such a thing is absurd, is it not? Yet many people breed on this hypothesis, or an equally illogical one. It is unfair to the dog to expect that he will give to the progeny of the bitch all the good points she so lamentably lacks. Poor fellow, he may have faults of his own, sadly in need of correction, and even his good points may not be so firmly fixed in him. He may have been a one-in-a-hundred chance himself—for all practical purposes a sport—and be much in need of a mate possessing his own virtues, in order to fix them more securely in his strain. Long chances will lead to nothing but disappointment; for a brief period the owner of a happy fluke may flutter like the busy bee in the sur gathering in honey, but next generation will find him little further forward than before, and possibly further back.

DAM EQUAL TO SIRE.

It is all very well to "Regardez le sieur," but it is of more importance to "Cherchez la femme," if I may so use these phrases. The dam should be a breeder's first consideration, and in her he must have something to work upon. There are three kinds of hitches—the show bitch, the brood bitch, and the rubbishy bitch, and it is not necessary that each individual should be only allowed to carry one of those

tickets. In fact, the good show bitch ought also to be the good brood bitch, while it is no uncommon event to find the rubbishy bitch in the prize list. The title, "a good brood bitch," has to cover a multitude of sins, and, as a rule, includes a fine array of faults. The good show bitch should be a good brood bitch, and the good brood bitch should only differ from the good show bitch in having to excess the points most difficult to obtain in the breed in general, and in the strain from which she comes in particular. While we want in the show bitch good length of head and fair strength, we do not want to lose the sense of femininity, and while we want nice hone, we do not want so much as to give the feeling of clumsiness. In the brood bitch we cannot have too much length of head or strength of muzzle or hone, as the whole tendency of previous ancestry is toward a diminution of these requirements, which must be counteracted by excess in the individual. There is room for disagreement as to whether the good brood bitch should be longer in body than the good show bitch, but I hope the day will never come for Scottish Terriers when an idea of the perfect show bitch will necessitate a body too short for the requirements of successful breeding. We cannot, however, hope to possess nothing but perfect show and brood bitches, and the point of practical value to breeders is, how far we can depart from perfection in the hitches we breed from.

VALUE OF PEDIGREE.

The answer to this depends largely upon the ancestry from which they come, and brings into review the value of pedigree; but, before going into this, there are one or two general matters worth attention. Some breeders aver they like a brood bitch to be big, heavily-boned, and even a trifle coarse. Heavily-boned is all right, but size is another matter. As a rule, our stud dogs are on the big side, and many consider a big dog more likely to impress his good features than a small dog. If this be so, then, in using big bitches we are breeding to size on both sides, and the only thing that will counteract a steady growth of size will be excessive in-breeding, with its attendant evils of loss of physical and nerve force. As to coarseness, we have enough of that in Scottish Terriers to make us avoid it as much as ever we can. What is most wanted at the present time is quality, and we can never get that if we use coarse bitches.

INFLUENCE OF THE DAM.

Does the sire exercise greater influence on the progeny than the dam is also a question of some importance, but I must refer the reader to books on the whole question of reproduction. Whatever conclusion they arrive at, I feel safe in affirming that few breeders give sufficient weight to the influence of the dam and s reference to our most successful sires in the past will show that they possessed dams of considerable merit. Personally, I am inclined to pay every bit as much respect to the characters of the bitches in a pedigree as to those of the dogs, and I ascribe failure in breeding to too little cognisance being taken of bitches and too much of dogs; therefore, in my estimation of the value of pedigree, I shall place equal value on sire and dam.

COMPONENT INFLUENCES.

Each individual animal is a component production, the component parts being the sire and dam and their predecessors. While I cannot say how much each generation of ancestry influences the individual, a rough and ready value may be placed on them by putting the influence of the combined parents at one-half, the grandparents at one-quarter, the great-grandparents at one-eighth, and so on. This gives to each parent the influence of one-quarter and to each grandparent the influence of one-eighth. Before we apply these figures, it must be understood that the repetition of an individual in a pedigree—that is, in-breeding—tends towards an increase in value of the good and the bad points of that individual.

To avoid the abstruse, let us assume we have a bitch too short and weak in head, too big in ears, and too bad in front, to be of any use on the show bench, and what have we to decide, should we breed her? The first question we should ask is: Has she any virtues in excess, or is she merely a passable bitch with three outstanding faults? If she is so we should condemn her, as three prominent faults and no prominent virtues is too much to look to the dog to correct, as well as his own faults, unless there is a plea for mercy to be found in her pedigree. Now, the pedigree must be examined from the point of view of the expected puppies, to whom our bitch in question will have the value of one-quarter according to our table; another quarter will be the sire of our selection the third quarter his ancestry, and the last quarter our bitch's ancestry. We know that one-quarter's influence on the prospective puppies is short and weak in head, big in ear, and bad in front, and what we have to inquire into is whether the percentage of these defects is, or is not, increased by the remaining three-quarters. It is very unlikely that our bitch derived her defects from none of her progenitors. It is also unlikely that we will be able to find a sire who has not some of these defects, either in himself or his immediate forebears. Our examination may, in the end, show that short, weak heads are to be traced to one-half of the total value of the puppies, that had fronts amount to three-quarters, and big ears to one-quarter. A mathematical calculation will therefore show that it is ten to one against our puppies having good heads, ears and front: and we have left out entirely the prospects of the union reproducing others of the faults to be found in individual members of the pedigree. It will be contended, no doubt, that nature does not work on a mathematical basis, but the use I have made of fractions is an idiomatic one, to show in simple form the basis of scientific breeding, and if pedigree is to be of any use to the breeder, it must be applied in some such form as shown.

(To be continued.)

Irish Terriers.

Those who have not read Mr. Rawdon Lee's work on the Terriers, of which the last edition recently came out, may be interested with some extracts showing peculiarities of the breeds. As to color, it seems that the Irish Terrier was of several colors, and we read: "Before railways were introduced, interbreeding in certain localities caused a type which might have varied slightly in different districts, and as color was a minor consideration we so often find puppies, even to the present day, black and tan, gray or brindle in color. This does not show bad breeding, but rather the contrary. At an early Irish show, in 1874, there were classes given for Irish Terriers under five pounds weight, clearly showing that small Terriers were fashionable then. The foundations of the present generation of show Terriers are nearly all descended from Mr. Waterhouse's Killiney Boy, and it is a difficult matter to find one that has not some drop of his blood in his veins. The red or yellow are now considered the correct color, and the dark puppies are usually destroyed; but as the dam of Killiney Boy was a rough black and tan, color is merely a question of fashion. When red puppies were born in the same litter as black and tans, the former are nearly always a good bright red; but the black and tans have better coats, invariably as hard as pin wire. I am by no means certain that by not using the latter to breed from we are losing the hard, waxy coats and brighter red color, and were it not for the art of trimming, many of our winning Terriers would have coats almost as shaggy as are found on the mountain sheep. Nearly all our best Terriers trace their pedigrees back to a bitch named Erin, bought by the late Mr. W. Graham of Belfast, before being shown at Dublin in 1879. This bitch was, perhaps, the best Irish Terrier ever seen, and I very much doubt if any Terrier of to-day is her superior, if her equal."

DOINGS IN DOGDOM.

It will be a great pleasure to many of our readers and to the Coast fancy at large to know that a much esteemed sportsman and a royal good fellow, Norman J. Stewart, has arrived again in California. Mr. Stewart is at present in San Jose.

The Pacific Northwest Field Trials will begin on September 29th. This is earlier than usual, but it is expected that the greater number of birds to be found at that time will more than compensate for the earliness of these trials. Two prizes of \$15 and \$10 will be given to the bandlers starting the largest number of dogs in these trials.

The Texas State Fair people propose to transfer their franchise to a Texas Kennel Club and furnish it a ball to hold a show in, if held on its grounds during the fair. A Texas dog show is badly needed; it means business for the dog fanciers, and this liberal proposition should be accepted. If it should be a small one, composed of Texas dogs only, it would be a start and worth money to the men who would exhibit. If the rounders or professional bandlers are cut out, so much the better. There are men in Dallas or in the state who can superintend it, and if regular cash prizes cannot be paid, then award honors only.

The practical utility of using Bloodhounds, so called, in the tracking of criminals has again been proven almost useless in the recent attempts to capture the escaped convicts from the Folsom prison. As a sport, man-hunting with Bloodhounds may be rather diverting, as has been shown in Bloodhound trials in this country and England, but for practical purposes in the direction irresponsible correspondents of the dailies suggest and recommend we must dismiss it from our minds as so unlikely to prove its value that we may as well at once remark that the game is not worth the candle—or rather the Bloodhound.

Entry blanks for the Nevada field trials have been sent out. Dr. C. E. Wilson of Reno, Nev., will furnish further particulars or send entry blanks to sportsmen interested.

Wandee Kennels are now in charge of Mr. S. Lomas, a clever Manchester lad not unknown to the English fancy through his connection with a prominent English fancier's establishment. The new kennel-master arrived here last week and is warmly endorsed by George Raper.

Wandee Kennels will have representatives on the Eastern show circuit this fall and next spring.

The Fox Terrier Sea Breeze has arrived here in good shape and is now at the kennels. It will be remembered this dog and Champion True were purchased for Mr. Harley in England by Mr. Raper.

Two Fox Terrier bitches, in whelp, were brought out by Mr. Lomas, who, by the way, has been making the acquaintance of our local fanciers and breeders during the week and has already won a number of friends by his pleasant unassuming manner under which, however, it is not difficult to plainly see that he is in "the know." One of the bitches he brought out is Rowton Cherry.

We regret to state that John Grace, the veteran coursing judge, was seriously injured while judging the coursing at Union Park last Sunday. Early in the running of the open stake event Judge Grace's horse stumbled and fell, carrying his rider down in such a way that he was pinned under the animal. When released from his position under the horse the field stewards found that Grace was badly injured, and he was immediately sent to his home at 1900 McAllister street. Dr. A. T. Leonard, Jr. was called and discovered that the veteran had sustained a fracture of all but one rib on the left side, a fractured collar

bone and a dislocated shoulder, also on the left side. His injuries are terribly painful, and it will be many weeks before Judge Grace is again in the saddle.

An examination of the horse by a veterinary surgeon revealed a peculiar cause for the accident. It is the veterinary's opinion that the animal "over-reached" himself when he settled into his stride as the judge urged him up the field. In doing so the left hind hoof struck the left fore leg behind the knee, splintering the bone and bringing the animal to earth. Fortunately, the horse made no effort to move after he had fallen, and Judge Grace was rescued from his perilous position without difficulty.

For more than thirty-five years John Grace has been judging coursing races, and he is considered one of the best authorities at the sport in America. During his career he has passed judgment on more than 80,000 coursing races, refereeing as many as 7000 contests in a single season. Grace is now 60 years of age, and his physician is unwilling to forecast the result of his injuries, as on Sunday night the patient was suffering a great deal from shock. His condition has shown but little improvement during the week.

Mr. John Bradshaw has asked us to state that he has withdrawn from the management of the Pacific Dog Hospital.

AT THE TRAPS.

There was quite a gathering of sportsmen at Ingle-side last Saturday afternoon, the occasion being the live pigeon shoot of the Hellbender Club for a band. Some silver cup donated to the club by Frank Dickey. The trophy was won by Dr. E. G. McConnell, who grassed 25 pigeons straight, shooting at 29 yards rise. Dr. McConnell shot in splendid form and surprised some of the veteran trap-shooters by his clever shooting. Hip Justus scored 24 birds straight. His third bird, heavily bit with both barrels dropped to the ground beyond the boundary fence and was lost. Justus shot at 28 yards. The other shooters in this contest were: Clarence A. Haight, 31 yards, 23 birds out of 25; Ed Donohoe, 32 yards, 22 birds; C. C. Nauman, 36 yards, 22 birds; James V. Coleman, 28 yards, 23 birds; Cal McMabon, 28 yards, 21 birds; and Dr. Birdsall, 26 yards, 20 birds.

B. L. Woodward, who had a national reputation as a trap shooter, passed away on the 10th inst. at his home in Brockton, Mass., aged 32. He was considered one of the best marksmen in the country and was a member of the All-American team which took part in the international shooting contests two years ago in England.

The scores in the various events at the Golden Gate Gun Club shoot last Sunday at Ingle-side are given below. E. Klevesahl was the winner in the challenge race for the Hibbard trophy.

Club race, 25 targets, distance handicap, 50 cents entrance, 7 moneys—

Table listing names and scores for club race: Fendner, 14 yds; Forster, 18; McConnell, 13; Haight, 16; Klevesahl, 16; Murdoch, 15; Golcher, 16; Wands, 16; Nauman, 20; Wattles, 14; Sylvester, 13; Roberts, 18; Donohoe, 16; Iverson, 14.

Second event, 20 targets, reverse system—

Table listing names and scores for second event: Murdoch, 18; Haight, 17; Golcher, 17; Nauman, 17; Iverson, 15; Sylvester, 15; Klevesahl, 12; Fendner, 11; McConnell, 11; Lewis, 6.

Third event, 20 targets, 1 man up, distance handicap, \$1.40 entrance, 3 moneys—

Table listing names and scores for third event: Nauman, 20; Sylvester, 17; Fendner, 17; Haight, 17; Lewis, 16; Robertson, 15; Golcher, 15; Donohoe, 14; Iverson, 12.

Fourth event, doubles, 10 pairs—

Table listing names and scores for fourth event: Nauman, 11-15; Golcher, 10-13; Donohoe, 10-12; McConnell, 10-12; Fendner, 10-9; Haight, 10-9.

Fifth event, reverse system, unknown angles, use of both barrels—

Table listing names and scores for fifth event: Haight, 11-17; Nauman, 12-17; Golcher, 12-14; Fendner, 10-13.

Sixth event, 15 targets, Seargent system—

Table listing names and scores for sixth event: McConnell, 11-15; Haight, 11-12; Nauman, 11-12; Wands, 9; Golcher, 9; Donohoe, 9.

Seventh event, Challenge contest for C. W. Hibbard trophy, 50 targets, \$1 00 entrance—

Table listing names and scores for seventh event: Klevesahl, 45; Robertson, 43; Murdoch, 40; Forster, 37; McConnell, 34.

GOSSIP FOR SPORTSMEN.

The angling fraternity find recreation and use for the rod in numberless pleasant resorts these August days. Along the Truckee from Boca to Verdi are located quite a number of local sportsmen who are enjoying the fly-fishing on the famous trout stream.

At Big Meadows the fishing is still attractive, one day this week A. B. Finch creeled a catch of 33 pounds of rainbows on flies and light tackle.

Reports from the McCloud are inviting, the royal coachman and brown backles are receiving much attention from the trout in that rusbing mountain stream.

Eel river is credited with a run of steelhead thus early, this favorite water, however, will receive the close attention of anglers next month.

Point Reyes is still a favorite resort of a number of anglers, the stream above the railroad bridge seems to be pretty low. Most of the fish are now caught in the tide water fishing spots.

Black bass angling at Duncan's Mills and about Camp Vacation is good enough to induce several of the experts to stay on the Russian river banks for days and weeks.

Salmon, and fine big fellows too, are daily being caught in Monterey bay. The best fishing ground seems to be Capitola; barracuta and seabass are also to be caught. The barracuta are lively customers when one of them has booked himself on your bone jig. Thomas E. Flynn, of this city, and O. A. Hale, of Petaluma, each booked and took a 40-pound salmon this week. Monterey bay is full of sardines upon which fish the salmon are fattening.

Spoon trolling would be most effective had not the boatmen, every one of them, seemed to demonstrate to the angler just how slow they can propel a boat, hence the baited hook (the boatmen sell bait, too) is the caper for the boat. In the launches the sportsmen get the proper speed and consequently have much sport with the spoon.

Striped bass fishing in and about the bay waters is picking up, a number of fine fish have been caught recently. A 20 pounder was among the fish taken in the "straits." Al M. Cumming caught 20 fish one day this week in San Antonio creek. Near Fairville a number of nice fish have been booked.

J. F. Fatjo, a well known and liked local angler, proprietor of the Lake Merritt boat house is away on a honeymoon trip at Point Arena. Meanwhile the Lake Merritt bass contingent have been assiduously taking bass out of the lake and wising "Jack" and his pretty bride all the good luck in the world.

Why cast-off and bend were invented was probably not to compel a man to take unnecessary aim, but to enable him to see his mistake when it arose. When had shooting comes on, confidence is shaken, and without confidence good shooting cannot be restored. We believe that the ability to align the rih is a ready means to the restoration of confidence. It has often happened with our experiments in trying new guns that we start by doing really good shooting with a gun that we are unable to align. Then suddenly shooting goes off; and this very inability to align has always prevented us getting into form again; whereas, with our own guns nothing is easier than this recovery. The reason is that with a gun that can be aligned we know what we are doing, and where we shoot; whereas, with another weapon we only know we miss, nothing more. Now we are not going to fall into the mistake we condemn, of judging others by our own weaknesses. We prefer to take the majority as our own guide when we can. In advocating bend and cast-off, we are merely repeating the arguments that have influenced all experts, from Joe Manton (the father of modern gunmaking) to the makers of to-day. We have frequently been told that the modern bend and cast-off is abnormal, but we do not think it is so. It is the very straight stocked guns that are the outcome of pigeon shooting that are abnormal.

Save the Birds.

A recent discovery in Suisun valley shows conclusively that the white owl is a valuable bird as an exterminator of goppers, and some measure should be taken to protect them from the ravages of bunters, who kill them for pastime. Some time ago, says the Solano Republican, some boys found a nest of white owls containing several young ones. A few days later the nest was again visited and near it were found twenty goppers which had been caught and carried there as food for the young by the mother owl.

It has been the practice of the Japanese and some of the white boys of the valley to kill these white owls by the wholesale. They are harmless and do no damage to vegetation of any kind. On the contrary, they are of great value as exterminators of goppers and rats, which are nothing but pests.

Another bird which should be protected from the bunters is the pheasant, a particular species of which was introduced in the wooded lands of Gordon valley by E. J. Okell some years ago and the surrounding groves had become well populated with them, but of late they have been almost exterminated by bunters. They should be protected from indiscriminate shooting.

Free!! Free!! Free!!

The Polk Miller Drug Co. of Richmond, Va., whose advertisements of "Sergeant's Dog Remedies" are appearing now in the columns of this journal, desire us to state that they will furnish absolutely free to our readers a revised copy of their book on "Dogs," which accurately and exhaustively treats of the more frequent diseases with which Dogs are afflicted. Enclose them 3c in stamps to cover cost of mailing the book. They have recently made F. W. Braun & Co. of Los Angeles, California, distributing agents for their popular line of "Dog Remedies," and extend an invitation to all persons having sick dogs to write them describing symptoms, etc. Enclose stamp for reply. No charge will be made for information furnished.

THE FARM.

Live Stock at the State Fair.

SACRAMENTO, July 29, 1903.—The State Fair of 1903 will approach nearer than any fair of recent years to the standard which the State Fair of a great agricultural State like California ought to strive for. The livestock exhibits, especially, promise to be up to this standard of excellence.

It has been the policy of the directors to give every incentive to the breeders of this State and neighboring States to exhibit their herds of improved pure-bred horses, cattle, sheep and swine of every breed by increasing the premiums offered and by a thorough revision of the premium list to meet modern conditions.

The State of Iowa will be represented by an exhibit of Clydesdale and Shire horses and Polled Angus cattle.

Nevada will be represented by the well-known Hereford herd of Governor Sparks and the equally well-known J. Marzen herd of short horns. Up north in Oregon such breeders as Ladd of Portland, owner of the Oak Hill Stock Farm, and W. O. Minor, both breeders of short horns and other improved breeds, are preparing to battle for the blue ribbon.

California also will be well represented and her herds will take their share of the honors. The short horns will be out in force, for we hear that Isaac Bird of Merced, J. H. Glide of Sacramento, Robert Ashburner and the Quinto herd, property of the William H. Howard estate, P. H. Murphy and W. Gibson will all be on band, as well as other breeders of the noble breed to prove the merit of their respective herds.

Whitaker's Herefords from Galt and Cone's herd of Herefords from Red Bluff will vie with the Alamo herd of Governor Sparks from across the mountains.

The Shafter herd and herds of the North and South Jersey associations will compete for honors in the Jersey classes. The Holsteins will have a strong representation. La Siesta Ranch of San Jose, Pierce Bros. of San Joaquin, Minnewawa Stock Farm of Fresno and other representative breeders will show. Sheep and swine will be legion; individuals from Ohio, Iowa, Oregon, Illinois and New York will be exhibited.

Although the success of an exhibit of this kind depends largely upon the quality of the exhibits a competent judge is the most important factor. There can be no more instructive object lesson, none more fruitful of results to the farmer and the cattleman than that of an expert of animal industry judging a class of cattle, especially his exposition of the good and bad points of the various individuals.

Judging livestock is no haphazard process of arriving at an opinion as to which is the most pleasing to the eye, but is an exact science, with utilitarian considerations as a foundation. A competent judge must be conversant with the uses to which each animal or breed is to be put and must know what type of that breed best fills the requirements.

Hence the beef breeds are judged good, bad or indifferent, in the measure that they show early maturity, aptitude to fatten, and a dozen other requirements of form, etc. The dairy breeds from an entirely different point of view, and as this applies to the breed it applies to the individual. Professor W. L. Carlyle, expert in Animal Industry of the University of Wisconsin, will be the judge, and associated with him will be Professor E. W. Major of the University of California.

The judging is the greatest educational feature of the fair, and no farmer or stockman can afford to miss it. Those that had the good fortune to hear Professor Carlyle, at last year's fair, one and all say that they would not have missed it for anything. The layman will do well

also to take advantage of this great opportunity, both for the pleasure derived and for the practical knowledge obtained. There is no need for a man being stuck by his butcher with cheap meats when he is paying for choice cuts; no need of his buying for a family cow one fit only for the block. Let him go and learn, and return home a wiser and broader man.

E. W. HOWARD,
Vice-President State Board of Agriculture.

World's Fair Cow Demonstration.

The cow demonstration proposed as one feature of the World's Fair cattle exhibits at St. Louis next year has been definitely arranged, and on a much broader scale than anything of the sort heretofore attempted. It has been designated as a "cow demonstration" because, while not in any way neglecting the dairy test idea developed at former world's fairs, it is intended to illustrate in a comprehensive way the practical adaptabilities of the pure-bred cow. The strictly dairy breeds are given opportunities to make a large showing, while features not in the least conflicting with their privileges enable the dual-purpose breeds to demonstrate their value for both dairying and beef production. This means a demonstration rather than a competitive test, and will enable each breed participating to show its own peculiar advantages.

The Jersey, Short-horn, Brown Swiss and French Canadian associations have already entered. Entries will be permitted from individuals on behalf of other breeds if received before December 1st. Prizes will be awarded to herds and to individual cows, and entries of from five to twenty-five cows may be made by representatives of any one breed. The same cows may compete for herd and individual prizes.

The tests will continue 100 days, beginning Monday, May 16, 1904, and will be conducted in four classes, designated as Tests A, B, C, and D. Test A is for the demonstration of the economic production of butterfat and butter; B, of milk for all purposes related to dairying; C, of all the products of the cow; and D, for demonstrating the greatest net profit in producing market milk. In Class C the calf will be judged for its beef merits. A cow may be entered in more than one class.

Copies of the rules may be had by applying to E. D. Coburn, Chief of Department of Live Stock, World's Fair, St. Louis, Mo.

The Growing Scarcity.

There is food for reflection in the following from the last issue of the *Breeders Gazette*, published in Chicago:

"What significance is to be attached to the presence of such an unusual number of three-year-old drafters in the wholesale marts? For some weeks past Illinois and Iowa shippers have been paying good prices for drafters of this age in the country and sending them to Chicago, where they have been eagerly bought up at prices ranging from \$150 to \$210 by Eastern feeders or rather dealers who make a specialty of supplying the Eastern feeders with their stocks each year. In former years quite a good many four-year-olds have gone East as feeders, but never before has a business been made of shipping colts a year younger. What is the more extraordinary is that quite a few of these three-year-olds are mares and that a farmer or breeder should sell a good draft-bred three-year-old filly in these times passes comprehension. Surely that is a most suicidal policy and, what is more, it is a real injury to the breeding interest, for once a filly gets into the hands of the feeder she is lost as a producer for many years, at least for all her best years. It is certain that if shippers and feeders are buying three-year-olds it is because they are sure the supply will be shorter than ever next season and if that is true horses will be higher in price than they are now.

What reason then is there for farmers to let go of their colts? And if there is none when the males are under discussion, what must be said of the sense of the farmer who sells his fillies? We believe that every indication favors still higher values in 1904, whatever may come after that, and in the meantime nothing but the roundest sort of a figure should part a holder from his good young draft-bred horses. The fillies be should maintain for seed stock or advertise them for sale as such. If the man who has a few well-bred large draft fillies and wants to sell them will advertise them properly he will find ten men ready to purchase every animal he has to offer."

Improve by Selecting.

All over this country farms and farmers have grown poorer through method of selling off continually and not bringing anything back to the land. The same is true to a large extent with all our live stock, poultry included. For years the husker has come along, and each time he passes he selects the very best of all your poultry to buy for the market. By the time he has bought all you have to sell you will have left for your own use the culls of all you grew. This continues until we hear you say, "the huskster or commission man is too particular to buy our stock," when the facts are there are nothing left but weeds.

Under this way of doing the farm goes to weeds, all the stock goes to weeds, and the farmer and his family into rags. To avoid all this never sell the best of anything unless there is more of it than you need. With fowls be sure to select all of the best for your breeding and for egg producing, and sell those you do not want. Never sell the best; keep them to breed from. The best are none too good for this. By thus selecting year after year we shall soon have a flock the poorest of which will excel the best of former years.—N. P. Farnier.

The Silo and Beef Making.

Now, when we come to the producing of beef, my knowledge is mostly second-hand; but I am acquainted with a number of feeders in our rich limestone valleys of southern Pennsylvania who are making beef by the use of silage in combination with other suitable feeds, and they market the finest animals at the best prices, writes L. W. Lightly in *Stockman and Farmer*. They sell a lot of hay at big prices and have more money to spend or put at interest than any one else. For these and other reasons I believe that silage will reduce the cost of beef production as much as in dairy products. In growing young dairy animals I found silage to do wonders. Occasionally I meet a man who tells me that silage makes animals delicate and they can not stand the cold. Possibly cattle that are expected to "rough it" had better be fed on dry feed. Succulent feed of any kind has a relaxing effect on the system; hence it is not in condition to withstand extremes. Whith improved feeding we should adopt improved shelter.

Senator Chapman of Illinois, recently performed the unusual feat of topping the Chicago cattle market three times in one day. He forwarded that day three loads of heaves. There was one load of short-horns which made \$5.60, averaging 1,322 pounds, one load of Herefords which made \$5.60, averaging 1,231 pounds, and one load of Angus which sold for \$5.55 and averaged 1,223 pounds. These cattle sold at the extreme top among receipts of over 24,000 head and the occurrence has never been duplicated. The top price, too, is within a nickel per cwt. of the very highest made in the Chicago market for three months.

Sober up on Jackson's Napa Soda.

Losses From Destructive Insects.

Insects are such insignificant things that, even when we know them to be injurious, we rarely comprehend the extent of damage they do and the amount of loss they cause us. Dr. H. C. McCook, in an article in *Harper's Weekly*, gives some figures in this matter that are startling to one who has never studied it. The chinch bug, he says, caused a loss of \$30,000,000 in 1871, upwards of \$103,000,000 in 1874, and \$80,000,000 in 1877. The Rocky Mountain locust in 1874 destroyed \$100,000,000 of the crops in Kansas, Missouri, Nebraska and Iowa. The cotton caterpillar causes an average loss of \$15,000,000 in the Southern States, while in 1866 and 1873 this loss was doubled. The grain weevil inflicts an annual loss on us of \$40,000,000, and the codling moth destroys from \$30,000,000 to \$40,000,000 of our fruit annually. These are but a few of the destructive insects which are working in our crops, and, if it were possible to compute the damage done by all, the figures given above would appear insignificant. It is a fortunate thing that for most of our destructive insects nature has provided enemies that keep them in check, or it is doubtful whether these insignificant specks in the animal world would not drive the lord of creation himself off the earth.

Keep a Few Geese.

Geese are scavengers, like sheep. They will thrive in summer on any rough pasture accessible to water. A bog meadow covered with wild grass just suits them. They will foul more food than they will eat, if allowed to roam with stock in clean meadows. They should not be permitted to have the freedom of the farm, if kept in any considerable numbers. We do not think a large flock requires special facilities, when a small flock can be trusted to take care of themselves for nine months in the year. Geese are as much grazing animals as horses or cattle. In summer they need very little grain if they have grass and vegetables. In winter they will enjoy life better and make better breeders in the spring if their diet is composed principally of cut hay, corn stalks and vegetables. For shelter a rough shed with a good roof is all they require. A Toulouse gander and Embden geese make a good market combination.—*Exchange*.

A correspondent of *Rural New Yorker* writes: "I intend to put clover in our silo and feed during the summer. I do not want to run it through the cutter. Shall I put it in green or let it wilt a little?"

In reply, through the same medium, H. E. Cook says: "You cannot put the clover in too green. I should expect, if put in uncut, that you would have to use water and do considerable treading unless the amount put in is large and consequently makes for a heavy pressure. If cut fine the water in the stalks and leaves will equalize and appear as though water had been added. It might be more convenient and it certainly would handle much easier to allow it to wilt for an hour and then run water on after putting in. We must not forget that all forage plants contain less water than corn and are therefore not as easily kept in the silo. Keep in mind also that silage for immediate use should have the same attention that we give for the winter food. There is often a disposition to use less care when it is to be fed out at once. I thought so myself some years ago, but found the error of my way when we fed the stuff. I should, if the job was mine and the quantity not large, cut it and pack it just the same as for winter use."

FOR SALE.

MIRIAM E. OWEN SISTER TO BEN F. 2:11 1/2, winner of the 2:17 pace at Vallejo, Thursday, August 13th. MIRIAM E. is a very handsome large black mare, five years old, a natural pacer, and though worked but very little can show great speed. She will be sold right, as a fine roadster and a grand prospect for a race mare. Is sound and all right every way. Apply to EDW. DINKELSPIEL, Suisun, Cal.

The Bacon Hog.

The bacon hog has been bred extensively in England for over sixty years, and of late is coming into prominence in the United States. The advancement of this type of hog has been slow, but it seems only a matter of time until it will hold a high place in this country. A few farmers have been breeding these hogs and have been successful, states the *Dairy Farmer*.

The Iowa State Agricultural College keeps a herd of hotb Tamworth and Yorkshire hogs and has had good results from this work.

Our packing houses are demanding the bacon hog, and good prices are paid for them.

The Morrell Packing Company of Ottumwa have been introducing the Yorkshire hog in the farming district surrounding that city, and considerable interest is taken in the work. This company formerly shipped a large part of its produce to England in the form of lard, and, seeing the opportunity to sell bacon, has undertaken to substitute it in place of its lard exports.

The bacon type of hog has often been misconstrued, and in many cases ridiculed; but this is done more because of lack of knowledge of the real bacon type than anything else. This type does not demand a thin hog, as is often thought, but a hog with a thick covering of firm flesh. It is, of course, highly important that this flesh be lean, and this will follow if the true bacon breeds are raised. The bacon hog must possess extreme length and depth. He must be smooth and evenly fleshed from the shoulders to the hips, presenting a neat and trim appearance. While to a large number of people these hogs are still strangers, it would be well for every farmer to watch their progress, as they are becoming more numerous each year.

Live Stock Farming.

It has been demonstrated both by experience and practice that the farmer who sells beef, pork and mutton that he has produced from the corn and grass raised and fed on the farm makes more money per acre of his land and per dollar of his capital than the one who grows only wheat or corn or cotton and sells it, say Prof. Famel of Iowa. It is not necessary to entirely discontinue raising these crops, but if we are to produce a surplus to be sold in foreign markets it is best to export that surplus in the most condensed and marketable form, as meat and animal products rather than in the original crude and bulky state.

To the long run the farmer will make the most money who devotes his fields to the growing of forage crops to feed stock, making use of all the raw products at home, thereby saving not only much of the cost of transportation, but maintaining the fertility of the soil. By doing so, corn-belt farmers will maintain their pre-eminence in agricultural lines. Experience of the past few months has shown that the men who stuck to feeding and were not tempted by high prices to sell their corn have made the most money. Anything that will enhance the productive capacity of our soils for the production of forage conditions will help the farmer.

Course in Dairying.

A special course of instruction in dairy husbandry will be offered by the University of California in connection with the College of Agriculture, beginning Tuesday, October 6, and closing Thursday, December 17, 1903. A similar course was given during the fall of 1902, and was attended by thirty students, representing nearly all sections of the State.

This course is designed to meet the needs of all persons who are engaged in the various lines of dairy manufacture and desire to make themselves more familiar with the principles underlying

the manufacture of milk products and the application of those principles to actual practice, to the end that they may know how to turn out an improved product. The method of instruction and work done will appeal equally to the needs of all those who are manufacturing milk products, whether it be in the ranch dairy, using improved appliances, or in the large creamery or cheese factory. The advance in dairy practice has been so rapid and the intimate relation of science to dairying has been shown to be so close during the past few years, that it is difficult for the person in ordinary practice to fully understand all that has been done and the benefits it may bring him in his work. The Dairy School, with its equipment of modern machinery and in the hands of trained instructors, is designed to offer an easy and quick means to come into quick touch with what science is doing for the dairy industry and to learn the *why* as well as the *how* of scientific methods in dairying.

Keeping Quality of Butter.

Prof. G. L. McKay and C. Larsen of Iowa Experiment Station, Ames, have issued Bulletin 71, covering the results of their recent and very thorough investigations into butter quality. Every butter-maker should get this bulletin and learn its contents so thoroughly that he shall forever after be able to use the information in his business of butter making. Without going into the details of each experiment, the conclusions reached are presented as follows:

1. Water contains germs which cause butter to deteriorate in quality.
2. These germs can be removed or destroyed in a practical and inexpensive way by two processes, viz.: pasteurization and filtration.
3. Butter washed in pasteurized wash water will keep normal much longer than the same butter washed in unpasteurized water.
4. Butter made from pasteurized cream and washed in pasteurized water retains its normal flavor about twice as long as butter made from unpasteurized cream and wash water.
5. Unwashed butter made from good and well-ripened cream keeps as well and in some instances better than the same butter when washed in unpasteurized water.
6. Salt improves the keeping quality of butter.
7. It pays to pasteurize the wash water as well as the cream. The cost of pasteurization of milk and water after pasteurization has been purchased is about one-tenth of a cent per pound of butter. The amount gained per pound of butter by pasteurization when the butter is about a month old is .8 of a cent, leaving a profit of .7 of a cent per pound of butter.
8. Butter of medium firmness loses about .3 per cent of moisture for every revolution it is worked in excess.

Feed and Dairy Products.

A good illustration of the influence of food on the quality of dairy products is shown when dairying animals eat garlic in the early spring. The milk of one such animal will spoil the product of the entire dairy, and a very few the output of a large creamery or factory.

A consideration of these facts shows forcibly the important relation of feeds to products, and should teach us the folly of allowing our dairy animals to become forced to eat rank-flavored and ill-smelling herbage when pastures are short, or to practice the feeding of equally injurious plants in cured fodders or ensilage.

Dairymen of too pronounced instincts of thriftiness will sometimes feed spoiled fodder from the bottom of the hay or the edges of the silo, and moly grain from the bin, simply because their animals will eat when very hungry, but such practice is always at the expense of the health

of the animals and the quality of their products.

The successful dairymen are becoming more and more the ones who make perfection of quality their watchword, and by so doing are enabled to obtain and retain customers who are willing to allow them a fair margin of profit—*Farm and Fireside*.

The question of "whether to churn sour or sweet cream" is constantly renewed. It has been demonstrated again and again that good, sweet butter can be churned only from ripened, or cream that has a certain degree of sourness. Experience will tell when it is just right: then is the time to churn.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

\$100 Reward

Used and Endorsed by Adams Express Co.

For long years we have offered to pay this amount for any case of Lameness, Curb, Splint, Contracted Cord, Colic, Distemper, etc., which cannot be cured by

Tuttle's Elixir

We have never been obliged to pay the reward for obvious reasons. It's infallible in all cases of Thrush, Cracked and Grease Keel and all forms of Lameness.

Tuttle's American Condition Powders—a specific for impure blood and all diseases arising therefrom. Tones up and invigorates the entire system.

Tuttle's Family Elixir—is unequalled as a remedy in the home. We send a sample free for 6c in stamps, merely to pay postage. Send at once for our 100-page book "Veterinary Experiences," which we mail free.

Tuttle's Elixir Co., 437 O'Farrell St., San Francisco, Cal. Beware of so-called Elixirs—none genuine but Tuttle's. Avoid all blisters; they offer only temporary relief, if any.

Good Ones For Sale.

CYRUS WILKES, brown stallion (standard bred) by Sabie Wilkes, dam Menlo Belle by Menlo 1828; next dam by Speculation #28 etc. Aged 6 years, weighs 1150; sound, now in training and showing speed.

Mare by Stamboul, 10 years old, bandsome, great buggy mare and high class brood mare, with a

4 y.o **Zombro Filly**, coal black, very handsome good size, stylish, fine driver and a

Yearling Filly by Zombro. Entered in Occident Stakes. Handsome bay in color and very promising.

Will Be Sold Cheap.

Address **J. R. FREEMAN, Red Bluff, Cal.**

CAN YOU AFFORD IT?

You certainly cannot afford to have horses lame from Spavin, Ring Bone, Splint, Curb, when they may be cured by simply using

Kendall's Spavin Cure.

It cures all these and all other forms of lameness. Think about it and then act. Price \$1; 6 for \$5. As a liniment for family use it has no equal. All druggists. Book "A Treatise on the Horse" mailed free. Address **DR. B. J. KENDALL CO., ENOSBURG FALLS, VT.**

FOR SALE.

Glanders Affect Three Persons.

Glanders among human kind is said to be very rare, but that it can be contracted is evidenced by the following report of the State Board of Health of Minnesota:

"Early in 1901 a health officer in the northern part of the State," says the report, "telephoned the secretary of the State Board of Health that he had a young man with a very peculiar eruption, suggesting even the possibility of small-pox. This latter disease was excluded. In a few days the young man died. Soon after a brother of this patient was taken ill with similar symptoms. He too died. "Material was taken from the second patient and sent to the laboratory of the State Board of Health for examination with the result that the disease was shown to be glanders.

"The laboratory worker who had charge of this investigation accidentally became inoculated, and has now been ill with glanders for a year, with a fair prospect of complete recovery.

"Examination demonstrated the fact that the first patient received his infection from his own horses that were suffering from glanders. The second patient may have had his infection either from his brother's horses or his brother who took care of the patient during his illness."

To the eye of one who is not an expert the disease is said to resemble small-pox. The illness sometimes begins with a headache, followed by disinclination to exertion. Vague muscular pains in the back and legs, loss of appetite and diarrhea are other symptoms. Later rose-colored spots similar to those of typhoid fever appear on the patient's body and the patient becomes talkative and delirious.

Color of Percherons.

A horseman of La Perche, France, the home of the Percheron, regrets that the American fashion made it an object for French breeders to change the traditional and historic dapple grey color of the Percheron to black. He says that in France the old color is still the favorite and likely to ever remain so. No other blood was used to secure the black color, for there have always been some black Percherons, but to increase their number careful selection and preservation of all animals of that color have been practiced since Americans began to demand it. Naturally this Frenchman does not say so, but it is a reasonable inference that in using black Percherons for breeding no attention was paid to any point but color, and with what possible result can be easily imagined by those who recall what the color craze has done with dairy cattle and other livestock in this country. Whenever in the breeding of domestic animals a fad or fashion of any kind subordinates everything else to its demands disaster has generally followed.

This item would be good if true but the fact is that the Black Belgian was part of the foundation stock used by the French Government to create the original Percheron.

Hog Cholera.

The following is the prescription recommended by Dr. Salmon of the Bureau of Animal Industry:

- One part wood charcoal.
 - One part sulphur.
 - Two parts sodium chloride (salt).
 - Two parts sodium bicarbonate (soda).
 - Two parts sodium hyposulphite.
 - One part sodium sulphate.
 - One part antimony sulphite.
- Pulverize and mix thoroughly. Dose, one tablespoonful for each 200 pounds weight of hog once a day.

A poor, starved, mangy calf will not make a good cow, although she may come from a good breed. She should be well fed, well watered and well gentled. During the hot summer time she should have plenty of good water, shade, and protection from flies.

A dispatch from Grass Valley, Nev. d county, says: Despite every effort to prevent it, blackleg continues to spread in the vicinity of Chicago Park. Within the week it is said over sixty head of cattle died from the disease. Vaccination goes on with all rapidity, and cattlemen are busy collecting and burning carcasses. The disease is no longer confined to calves, but is attacking full-grown animals. Today three valuable cows belonging to Wm. George died from blackleg. Cattlemen are much alarmed fearing the disease may wipe out a large portion of the herds.

The *Plumas Bulletin* says: Plumas county has begun an action against Wheeler & Ridenour to collect license on 8000 sheep grazed in this county. Tax Collector Short demanded the license on these, but the defendants refused to pay on the entire number, claiming that 3501 of the 8000 were lambs and that under the State law as amended by the State Legislature they were under no legal obligation to pay a license for pasturing lambs—that a lamb is not a sheep. Hence the suit to collect the license on the 8000.

"SAVE-THE-HORSE" — TRADE MARK — SPAVIN CURE.

From three to five bottles of "SAVE-THE-HORSE" will permanently cure any one case of hip or whirlbone, stifle, shoulder or sweeny lameness, and we will protect any purchaser fully who is willing to see case through, whether it should require three or five bottles. This marvelous and unfailing power of "SAVE-THE-HORSE" lies in its concentrated, penetrating, stimulating and absorbing qualities.

We will be pleased to advise as to any case on receipt of full description of the case.

BOXWOOD.

R. E. GRISWOLD,
BOXWOOD,

November 22nd 1902

The Troy Chemical Co.,
Troy, N. Y.

P. O. Box No. 125.

LYME, CONN. November 19th 1902

The Troy Chemical Co.

Troy, New York.

My dear Sirs:

I would be pleased when from your relative to the best condition. I had a horse that went lame but seemed apparently in the hip joint - formerly called "white bone", turned him out for two months and used a stimulating treatment, but he got no better. About two months since I commenced using "Save the Horse" even if your guarantee did not cover the case and I have used very nearly two bottles. The horse is not sound yet but has improved ever since I commenced it and I think continued applications of it would in time cure him. It is much better than at first and I am about improving all the time, but the cost will prevent my continuing it much longer and I must say I am sorry I shall have to give it up on that account. I know it is one of the most difficult kinds of lameness to cure and in an experience of over 33 years with horses, I have never thus a case permanently cured and hate to give this up as it looks so firming. I of course cannot claim anything from you as your guarantee does not specify the trouble, but thought I would write and see if for the sake of the experiment you would help me out. I have a bad case to try "Save the Horse" for Spavin, but cannot report results as not enough time has elapsed to judge. I shall keep watch of the case and report by you if favorable results are accomplished. I shall be glad to hear from you certainly can speak a good word for "Save the Horse" from what I see so far.

Dear Sirs: -
I received your letter of the 17th inst. I can only say that the horse is so nearly cured that I consider him practically as sound as he has been for years. He sometimes shows a very little lameness for a few steps when starting from the barn or after he has been standing, but it passes away before he has gone any distance. I am now nearly through the fourth bottle (have one more to use) and feel sure he will get over even the slight trouble before the fifth is used. "Save the Horse" is indeed a wonderful remedy, and has in this case done what I did not think anything would do. The horse has no other trouble but the lameness in the hip and no one would notice that, unless they were told it had been there. If there are any other question you would like to ask I shall be glad to reply to them.

Very truly yours,
R. E. Griswold

Very truly yours,
R. B. Champion

BOXWOOD.

LYME, CONN. July 15th 1903

The Troy Chemical Company,

Troy, New York.

My dear Sirs:-

Noting your remarks in your letter of the 17th inst. I can only say that the horse is so nearly cured that I consider him practically as sound as he has been for years. He sometimes shows a very little lameness for a few steps when starting from the barn or after he has been standing, but it passes away before he has gone any distance. I am now nearly through the fourth bottle (have one more to use) and feel sure he will get over even the slight trouble before the fifth is used. "Save the Horse" is indeed a wonderful remedy, and has in this case done what I did not think anything would do. The horse has no other trouble but the lameness in the hip and no one would notice that, unless they were told it had been there. If there are any other question you would like to ask I shall be glad to reply to them.

Very truly yours

R. E. Griswold

No other treatment of any account was used on the horse as far as I was heard of would cure the trouble, and I purchased "Save the Horse" as an experiment, not having much faith in it or anything else doing much good. I must say, I have been surprised at the result, not only in my case, but in other cases that I see, and it certainly saved me the expense of trying another kind.

Very truly yours,
R. B. Champion

It isn't words, it isn't type or page advertisements, it is the truths that ring out sound and clear and impressive—actual results like this case from business men, whose standing and reliability can be readily ascertained, which have made "SAVE-THE-HORSE" such a success. Their cured horses are living advertisements, absolute certainties as to the possibility of the remedy for your own case, and with every bottle is a guarantee document as binding to protect you as the best legal talent can make it.

"SAVE-THE-HORSE" Cures Without Scar, Blemish or Loss of Hair.

Can be applied at any time, anywhere, any place, and in all extremes of weather. Horses may be worked as usual with shin or ankle boots, as no harm can result from destruction of hair or scalding of limb.

POSITIVELY AND PERMANENTLY CURES

Bone and Bog Spavin, Thoroughpin, Ringbone (except low ringbone), Curb, Splint, Capped Hock, Windpuff, Shoe Boil, Weak and Sprained Tendons and all lameness.

\$5.00 PER BOTTLE.

Written guarantee with every bottle given under our seal and signature, constructed solely to satisfy and protect you fully. Need of second bottle is almost improbable, except in rarest cases. Copy of booklet and guarantee sent upon application.

\$5.00, all druggists and dealers, or sent express prepaid.

San Francisco, Saturday, August 22, 1903.

THE BREEDERS' MEETING will open at Petaluma next Wednesday with the highest prospects for the best meeting, the fastest racing and the highest attendance for years. The Breeders Association has made every effort to have all the details of the meeting complete in every way, and the program will be carried out with a vigor and snap that will add zest and interest to every feature. The class of horses is high and promise to bring out more than one 2:10 performer in both trotting and pacing divisions. The main event for the opening day is the 2:20 pace for a stake of \$1500, the largest sum given in California for a pacing event for years. Among the starters will be Ben F. that won at Vallejo last week and took a record of 2:11; Miss Georgie that was second to him in that race; Jonesa Basler another winner at Vallejo with a record of 2:11 made in the race; Mildred O., a roan mare by Secretary that has turned the Petaluma track better than 2:12 in her work; Rajah, a horse that can pace heats better than 2:08 in his work, and will yet do it in a race; Colonel C., that took a record of 2:15 in his first race this year and can go faster, and several others that have paced trials below 2:12 in their work this year. This race will be one of the great events of the season. There will be two more good races on the opening day—the 2:30 trot with 11 entries and the 2:15 trot with 9. The second day the three year old trotters will race, the pacing division of the Breeders Futurity he decided, and the free for all trot held with five high class starters. The 2:17 pace, the Breeders Futurity trot and the free for all pace are down for Friday, and on Saturday the meeting winds up with a grand program of three races as follows; Green class pace with 10 entries, California Stakes, \$2000 for 2:24 class trotters, with 21 eligibles, and the 2:17 class trot with 7 entries. The \$2000 trot is attracting the attention of horsemen all over the Coast. Among the starters will be Dr. Hammond that won at Vallejo and took a record of 2:13; Deputy that won a heat in 2:15 at the same meeting, Daisy B. the mare that was second in every heat in the same race, Telephone a son of Director that has been showing wonderful speed at San Jose, Louise Croner a gray mare that is very fast and liable to make the winner step the first heat in 2:12 to heat her, Suomia a big four-year-old by Zomro that has a high rate of speed, H. D. B. one of the horses that is always up close to the money, McPherson a very handsome and fast four-year-old by McKinney, and several others that will give a good account of themselves. On Saturday, the last day, an excursion is to be run from Ukiah to the Petaluma meeting and it is expected a thousand people will take advantage of the low rate of fare to see one of the greatest racing programs of the year in California. Wednesday, the opening day of the meeting, will be Petaluma day and a half holiday has been declared by the merchants to give all an opportunity to enjoy the sport. The Petaluma track is in fine shape and everything in tip-top order for fast racing and close contests.

On Saturday the California Northwestern Railway have made an excursion rate to Petaluma and return for \$1.50. The races will be finished each afternoon in time to catch the 5:35 train for San Francisco. The trip across the bay and through the Sonoma Valley to Petaluma and return, taking in the race meeting, makes a very pleasant day's outing. Ladies will be admitted to the track free.

A GOOD OPPORTUNITY to get a very handsome and fast mare is offered in our advertising columns. The mare Miriam E. full sister to the great pacer Ben F. 2:11 is offered for sale at a bargain. She is thoroughly broken but has had hardly any track training and is sound and all right every way. She is a great prospect for a fast pacer. See the advertisement in this issue.

A GREAT SALE of standard bred horses is announced by Fred H. Chase & Co. to be held at the salesyard 1732 Market street, this city, on Tuesday, September 22d. The Meek Estate of Haywards, has consigned to this sale all the standard bred horses belonging to the estate. Mr. H. W. Meek is owner of the stallion William Harold 2:13½ by Sidney, and Mr. W. E. Meek owns the stallion Welcome 2:10½ by Arthur Wilkes. They also own a few mares and colts, but the estate's horses, consisting of a number of high class brood mares, colts, fillies and geldings are to be sold. The mares are grand individuals and elegantly bred. They have foals at foot by Wm. Harold and Welcome and have been stunted again to those stallions. The dam of that wonderful mare Janice 2:08 is among them, and there is a sister to Janice and a sister to the great brood mare Cricket 2:10 to be sold. The young stock is broken and in fine shape. There are as many prospects in this sale as have been sent to the auction block in this State by any farm making no larger a consignment. On the same date a consignment of all the remaining horses on the Gabilan Stock Farm, some twenty-five head will be sold, together with that grand young horse Boodle Jr. that is one of the most promising young sires in California. Several very handsome and well bred fillies by Nutwood Wilkes 2:16½ are in this lot and they should be eagerly snapped up by buyers. We have not the space in this issue to do more than announce this great sale but will devote more attention to it next week. The animals are not surpassed in looks and breeding anywhere in the country and it will give buyers an opportunity to get some very choice mares and young horses.

LOS ANGELES ENTRIES for the big meeting in October will close September 1st, the second day of the California State Fair. A fine list of stakes for harness horses is advertised and the meeting is bound to be one of the best yet held in Southern California. Manager J. W. Brooks has received a letter from President Thos. H. Williams of the California Jockey Club, that horses racing at this Los Angeles meeting will in no manner be barred from racing at Oakland, Ingleside or Tanforan, so that the runners should be at the southern metropolis in large numbers when the meeting opens. Mr. Brooks writes that the management desires to have an open betting ring and will be pleased to hear from all bookmakers who may wish to cut in.

THE PLEASANTON MEETING to be held during the week following the State Fair will be under the management of the Breeders Association and will give horsemen a chance to race over the best and most famous track in California. The purses offered are liberal, all classes are provided for and four days of racing will give all a chance to start. Entries close today and should be addressed to F. W. Kelley, Secretary, 36 Geary street, San Francisco. This will be strictly a harness meeting and the track will be fast and safe.

BY ELECTRIC LIGHT, on Monday evening, September 14th, a great sale of trotting and pacing horses will be held by William G. Layng at his pavilion on Third street in this city. The horses are all young and well broken and are by McKinney, Diablo, Hart Baswell, Truman, Advertiser and other well known stallions. Catalogues are to be issued immediately. The sale takes place after the State Fair closes and before the Breeders meeting at Pleasanton. Send for a catalogue.

At a meeting of the State Board of Agriculture last Saturday bids for hookmaking privileges were opened and discussed. The proposition of an open book for six hookmakers to cut in at the rate of \$2000 each day for six races, aggregating \$14,400, was accepted on condition that auction pools be sold on the results of every race. These must be conducted to the satisfaction of the Board. If they are not done so, the Board is to be allowed to place its own auctioneer and conduct the sale of pools on all races. Representatives of the following hookmakers agreed to this: George Bement, Caesar Young, George Rose, Hughey Jones, J. Davies and J. Coleman. The Morse detective agency was awarded the contract to patrol the track and pavilion. The following appointments were made: R. Harvey, starter; H. Cassidy, marshal; Fred Chase, entry clerk; J. Bronner, clerk of course; W. Lampert and F. Delong, timers.

Farmer Bunch arrived in Sacramento last Friday with the pacer Kelly Briggs 2:10½. It was the intention to keep the speedy pacer on the Eastern circuit all summer, but several days ago, while racing at the Cleveland meet, a horse that was pressing him fell dead, striking the sulky that was drawn by the local horse, throwing him out of his stride, and severely injured one of his knees. Inasmuch as the horse could not again start, Mr. Wright decided to send him back here for the State Fair, providing any good ones can be found to go against him. Mr. Wright will not return for some time yet.

Getting Ready at Sacramento.

(Sacramento Union, Aug. 15.)

The track at Agricultural Park is being harrowed and scratched and scraped and rolled and wet down and scratched again. In short, it is being worked into first-class condition, and promises to be one of the fastest, if not the fastest, in the State when the big State Fair meet is opened.

"Pap" Jones knew what he was talking about when he told the directors of the State Agricultural Society that he knew how to make the local track the best and fastest in the State. He, according to men who know, is doing just what he said he would do. He is making such a track as was never before seen in this city, and the directors of the Agricultural Society are more than satisfied.

"I am satisfied with the work that is being done on the track," said J. W. Wilson, who is in charge of the Park, to a Union reporter yesterday, "and judging from the work already done I do not hesitate to say that the track will be in better condition than ever before. The surface is being thoroughly worked two or three inches deep, and then is watered, scraped, stirred and rolled until it is as smooth as a floor and as fast as it is possible to make it.

"The machine used to do the work leaves the track as level as a billiard table. No material is used, and none should be. Experience has taught that a clay track beats them all when it is properly cared for. We have found out how to care for it, and I am more than satisfied with the results that are being obtained.

"The work on the training track has made a great improvement to it, and it is faster than ever before.

"Aside from this a general cleaning up is going on, and the park is being put in the best possible condition. The stalls are being renovated and patched, and we are ready for stock as soon as owners can get it here. Heretofore we have discouraged the bringing in of stock, but we are now ready to stable it properly."

A Union reporter visited the track yesterday and found the track as Mr. Wilson described it—in first-class condition. The pulverizing machine was at work, and the small clods were being ground into small particles. The track, after the machine passed, was as smooth and level as a floor and as firm as earth could be to retain the springiness necessary to make a perfect track.

Plans are well advanced for the new speed track, polo field and athletic grounds in Golden Gate Park. Superintendent McLaren has staked out the ground and finds he has room for a three-quarter mile course instead of a half-mile as at first supposed. The trotting track will be sixty feet wide. Inside this and six feet below it will be a track for athletes. Inside this again will be the polo field, of which much is expected. Stabling will be provided among the trees for the horses between heats. The grounds will be in the center of a natural amphitheater and the contests can be viewed by a large number of people. Seats will be provided on sloping banks. The street cars will run within a short walk of the grounds.

Col. C., winner of the first heat in the 2:25 pace at Vallejo, will give a better account of himself later on. He stood the hardest kind of a drive in the first, second and third heats, took a record of 2:15 in the first and was only beaten a couple of lengths in 2:11 in the second and a short neck in 2:14 in the third. He bolted from the track in the fourth heat at the gate leading to the stall and was distanced, but had the gate been closed as it should have been, he would have gone on all right and made a game finish. Col. C. may turn the tables on Jonesa Basler later on.

We would call especial attention to the page advertisement of Save the Horse which appears in our issue to-day. This remedy is undoubtedly all that is claimed for it and has endorsements from leading horsemen all over the country who have tried it. The guarantee given with this medicine all that any fair minded person could ask. Save the Horse will not cure a broken leg or bring a dead horse to life, but it will cure the ailments which the advertisement claims and has saved many a horse.

Zolock 2:10½ and Eagletta 2:11½ were stabled at Morshead's, in this city, a couple of days during the first of the week while on their way to Oregon, where they will be raced this season. It is unfortunate that there are but few races with small purses for the fast class pacers in California this year, as some high-class racing could be had in the free for all and 2:10 classes were purses a little larger here.

Ed Mills is getting a consignment of horses together which he will shortly ship to Salt Lake. Among those being prepared are a two year-old half brother of Osmont, Monkey, by Direct, a recent purchase from L. C. Walter, a black horse with a record of 2:12½; and a four-year-old by Chas. Derby who worked the last quarter of a mile the other day in 30½ seconds—*Pleasanton Times*.

Mr. Thos. Bonner, formerly of Santa Rosa where he was for years superintendent of the Santa Rosa Stock Farm, has accepted a position with the well known and popular sales firm of Fred H. Chase & Co. and assumed charge of the salesyard 1732 Market street, this city. Mr. Bonner is a thorough horseman and popular with buyers and sellers all over the Coast.

Notes and News.

Dan Patch is champion.

Pleasanton entries close to-day.

Breeders meeting opens on Wednesday next.

There should be a new 2:10 pacer or two when the Petaluma meeting is over.

Fifty-seven horses were taken by the steamer Sunol from Vallejo to Petaluma last Sunday.

A sister to Cricket 2:10 will be in the Meek Estate dispersal sale, Tuesday, September 22d.

Los Angeles entries close September 1st. Everything points to the most successful meeting held there in years. See the big advertisement in this issue.

If you want a shetland pony or several of them, attend the sale of the Meek Estate horses at Fred H. Chase & Co's salesyard 1732 Market street on Tuesday, September 22d.

The final payment in the Stanford Stake of 1903 is due and payable to-day, Saturday, August 22d. Send the money to H. Lowden, Acting Secretary of the State Agricultural Society, Sacramento, to-day without fail.

Can you guess the winners of the two-year-old divisions of the Breeders \$6000 Futurity? Both races will come off at Petaluma next week, and the youngsters that are to contend will put up good contests.

Rita H. the hay mare by McKinney 2:11½, dam Smut by Prompter, won her fourth consecutive start at Seattle last Wednesday. She started out without a record and now has a mark of 2:12½. She has won every race in which she has started this year.

Millard Sanders said he could have given Janice 2:08½ a record of 2:04 to a certainty had she not died. He ranked her as only second to Lou Dillon. The dam of Janice and a sister to her will be sold by Fred H. Chase & Co. at the Meek Estate dispersal sale, Tuesday, September 22d.

Dr. Hammond's good race Friday last at Vallejo stamps the big gelding by Chas. Derby as a race horse. His three winning heats were all below 2:15 and the last heat the fastest—2:13½. He is a square trotter and a mark of 2:10 is within his reach as he has worked a mile within a half second of that time.

Mr. Sid Liebes of this city has purchased the hay gelding Vic Schiller 2:11½, by Hambletonian Wilkes, and will use him as a road horse. Vic Schiller is a good-looking horse with plenty of substance and should be a very attractive looking roadster and one that it will take a very fast horse to head.

At a meeting of the Multnomah Fair Association held last Tuesday it was decided to hold a five days' racing meeting, beginning September 21st and ending September 26th. In addition to the race meeting, there will be a fat stock show, which it is expected will attract exhibitors from all over the Northwest.

Dexter Prince has a new 2:15 performer in Crown Princess that won the 2:24 trot at Brighton Beach last Tuesday in straight heats in 2:13½ and 2:14. Crown Princess is a pure gaited trotter and brought the top price, \$2275, of Mr. A. B. Spreckels' consignment to the Blue Ribbon sale of 1902. Her dam is Point Lace by Antevolo, second dam by Speculation, and her

Gen. Vallejo—Dick Havey Cp.

third dam is Young Martha (dam of Crown Point 2:24 and Hancock 2:29) by Geo. M. Patchen Jr. Sandy Smith worked Crown Princess an eighth in 16 seconds over the half-mile track at Mr. Spreckels' Aptos farm, a few weeks before the sale, and she showed a quarter in 32½ seconds at Cleveland a few days before the sale opened. She did not start last year. She has every chance to be a 2:10 performer before the season is ended.

Ben F. 2:11½ was bred by Rush & Haile of Suisun, and was named for the senior member of the firm, Mr. Ben F. Rush, who is now the President of the State Agricultural Society.

When Rajah gets off just right and keeps his feet during the entire mile he will make the pacers in his class get a wiggle on that will land the horse that beats him at the wire in about 2:06.

Martin Carter's little three year old filly Little Branch by Nutwood Wilkes made a fair showing against aged horses in the 2:27 trot at Vallejo. She was a good second in 2:26½ and was also second in the last heat and won third money.

Robert Direct is the name of the handsome two year old colt by Direct that is pictured on this page of the BREEDER AND SPORTSMAN. He is owned by Mr. R. O. Newman of Visalia and is a beautiful rapid-gaited trotter and destined to be one of the top notchers of the sons of the mighty Direct 2:05½. The dam of this colt is by Robert Basler (sire of the fast pacer Jonesa Basler 2:11½), his second dam is by Pasha (sire of the dam of Toggles 2:08½), third dam by A. W. Richmond, (sire of the dams of New Richmond 2:08½ and Waldo J. 2:08), fourth dam a mare brought to this country by Dr. Stanway of Los Angeles and said to be thoroughbred. Robert Direct stands 15.3 and as his picture shows is a fine individual. He is a natural trotter and will be put in training next May after a short season in the stud. Mr. Newman thinks so highly of this colt that he is seriously contemplating shipping him dam to New York next spring to be again mated with Direct.

Stone Robin, that took his pacing record of 2:20 under the name of Cock Robin is now a producing sire, his daughter Gertie H. having won two heats in the 2:27 trot at Vallejo last week, taking a record of 2:26½. Both Stone Robin and Gertie H. are owned by F. D. McGregor of Santa Rosa.

Diablo has a new 2:10 performer in Diablito 2:08½. This gives him three in that exclusive list. Diablito was bred and is owned by Mr. J. Gallegos of Mission San Jose and is out of Jetta Richmond by Soudan, second dam Jane Hading by A. W. Richmond, third dam by Ben Wade thoroughbred son of Woodburn.

The free for all trot at Petaluma on Thursday, the second day of the Breeders meeting should be a good race. There are six entries as follows: P. W. Hodge's bay horse, George W. McKinney 2:14½, by McKinney and brown mare Grace McKay 2:21½, by McKinney; E. P. Heald's brown horse, Tom Smith 2:13½, by McKinney; W. W. Mendenhall's bay gelding, Forest W. 2:14½ by Wayland W.; J. Groom's bay horse Liege 2:12½, by Lobasco, and J. W. Sampsell's gray gelding, Rozell 2:17½ by Bob Mason.

On the second day of the Vallejo meeting Hi Hogoboom was a good winner on the mare Daisy B. in the 2:23 class trot. Mr. Hogoboom did not think she could heat Dr. Hammond, but remarked that as she was a daughter of his old stallion Waldstein, holder of the world's five mile record, she would be a stayer and he played her for place in every heat. She was second in all four heats and Hi won quite a sum though the odds were rather short towards the last. Charley Spencer handled the mare admirably and she is a born trotter.

A match race that is the subject of considerable discussion among the road drivers of San Francisco has been made to come off at Tanforan track September 9th, between Mr. E. Aigeltinger's bay gelding Dolador 2:20 by Advertiser, and Mr. J. Plageman's bay gelding Gen. Vallejo by Woodside son of Woodnut 2:16½. Gen. Vallejo has no record but has worked a mile in 2:21½. He is a handsome roadster and is out of Daisy S. the dam of Tom Smith 2:13½, Little Mac 2:27½ and Sweet Rosie 2:28½. Both horses are square trotters and very evenly matched so far as their present speed is concerned. Dolador is an all day trotter and one that can put in three or four heats in about 2:20 or perhaps a couple of seconds faster. As the race will come off at the Admission Day meeting of the Golden Gate Park Driving Club there is certain to be a large crowd present and it will in all probability be one of the best betting races of the year as both horses will be driven to win in the shortest possible time. The winner will probably have a record better than 2:20 when the race is over.

Bertha by Alcantara is destined to be one of the greatest producers of extreme speed in the world. She now has to her credit Don Derby 2:04½, Diablo 2:09½, Elf 2:12½, Ed Lafferty 2:16½ and Jay Eff Bee yearling record 2:26½. She has two more sons either of which can take a record below 2:15 when in condition for a fast mile. They are the stallions Demonio owned by Rush & Haile of Suisun, and Arner the property of Mr. C. Brannin of San Lorenzo.

The sale of horses from the Meek Estate to be held at Fred H. Chase & Co's salesyard, 1732 Market street, this city, September 22d, will offer an opportunity to secure choice animals that should not be overlooked. They are mostly the get of William Harold 2:13½ and Welcome 2:10½ and have size, breeding, good looks and speed.

Palmer Clark, who is one of the turf writers who owns a thinker and uses it, says: "There is a growing feeling among officials, owners, and trainers that a return of the straight 10 per cent entrance plan would involve less risk to associations, insure better sport for the public, and more races to owners, who with the present limited fields are never certain of a race when they make an entry."

The two year old filly in Marnie Refrains' string that

Robert Direct—Two-year-old Son of Direct.

is attracting so much attention by the speed she is showing at the trot is bred as follows: Her sire is by Oro Wilkes out of Auntie by Dawn, second dam by Anteeo. The dam of the filly is Moscovia by Belmont 64, second dam Mosa, dam of five in the list, by Woodford Mambrino, third dam Hermosa by Edwin Forest. There is no better bred filly in the State.

The Morgan blood won in the 2:27 trot at Vallejo. Sproul, the winner, is a bay gelding by California Lambert 2:27, a stallion that the late L. U. Shippee of Stockton owned. California Lambert was by Ben Franklin a son of the best of all the Morgans, Daniel Lambert and his dam was Maud a daughter of Daniel Lambert. Sproul took a record of 2:24½ in the third heat of the race which was a five heat affair.

The horses to be sold by Fred H. Chase & Co. at auction on Tuesday, Sept. 22d, are a high-class lot and will no doubt be eagerly sought for by buyers. They are from the Meek Estate at Haywards, and the last of the horses from Jesse D. Carr's Gahlan Stock Farm. There are colts and fillies by McKinney 2:11½, Nutwood Wilkes 2:16½, Welcome 2:10½, William Harold 2:13½, Boodle Jr. and other good sires, and all out of well bred mares. Don't miss this sale.

Deputy, the horse that won the first heat in 2:15½ in the 2:23 trot at Vallejo and got second money in the race made an excellent showing for the training he has had. Mr. Whitehead got him up in January and began working him on the 8th day of April, this year. He is by Derby Ash, first dam by Priam, second dam by Huston's Chieftian, third dam by Corsair, a thoroughbred horse. Deputy will be a 2:12 horse in another year.

The Petaluma Argus says: Kenilworth Park now presents an animated appearance and is livelier than at any time since the good old days of fair week. Over 200 horses are now in training and more are expected daily. The track is in fine shape and a splendid restaurant is being conducted. A number of the horse owners who arrived on the Sunol on Sunday, brought their families with them and have secured accommodation in town.

At Davenport, Iowa, August 12th, the brown gelding Tom by Durango Chief, won a five heat race for a purse of \$1000, and took a trotting record of 2:18½. Tom is an eight year old gelding and is owned by Mr. Walter Bennett, Mayor of Phoenix, Arizona. Tom was never hooked to a hike until this spring, but he showed so well as soon as he was worked a few weeks that Mr. Wheat, owner of the Phoenix track took him East and has started him four times, winning two races, being second once and third once.

Jonesa Basler, winner of the 2:25 pace at Vallejo is one of the smoothest going pacers on the circuit. He wears no hoppers and nothing much but a harness, and his record of 2:11½ made in the second heat of the race did not look to be the limit of his speed by considerable as he was going easy. He is a hocky built black stallion by Robert Basler, a horse that is full of running blood being by Antevolo out of a mare by Bill Arr, a thoroughbred. The dam of Jonesa Basler is by the pacing stallion Hanford Medium 2:11½ one of the fastest horses ever bred in this State. Jonesa Basler makes an occasional break and does not gain anything by them, but when he is on his feet he moves like a piece of machinery that is well oiled and has perfect hearings. He will be in the 2:10 list before the season ends if no accident happens him.

Princess Moquette 2:08½ is the eighth 2:10 pacer out of a Blue Bull dam.

Direct 2:05½, now has seven 2:10 performers, Trilby Direct 2:08½ being the latest addition,

The Denver show and trotting mare Viometa 2:14½ has been turned over to Millard Sanders to train.

Tom Keene holds a world's record. He is the first pacer that has ever won four races in two weeks on the Grand Circuit.

Ten thousand dollars in prizes will be given for the horse show which will be held in connection with the New York State Fair.

Geers recently refused an offer of \$10,000 for Billy Buck 2:07. He bought him for \$2000 after he had made a record of 2:16½.

Don Derby's heat in 2:04½ at Poughkeepsie is the pacing race-record of the year to date, tying Little Squaw's Cleveland mile.

The three year old colt Irish, by Monterey 2:09½, has paced a mile in 2:11½, with the last half in 1:03. He will not be raced until next year.

A meeting of the stewards of the Grand Circuit will be held during the Lexington meeting. If reports are to be believed several new rules governing racing will be adopted.

Senator Mills, that won at the recent Glens Falls meeting and lowered his record from 2:29½ to 2:12½, is the horse that the late William B. Fasig had selected to place at the head of his stud.

After the collision in the M. & M. at Detroit John Taylor, the winner, was hitched to the same sulky that Rhythmic drew when he won the event last year. That should have been a hunch for the superstitious bettors.

The *Horse Review* says that the scribe who set aloft the paragraph that Mr. Billings bought Greenline 2:07½ to drive to pole with Sir Albert S. 2:03½, was "hitting the pipe." Sir Albert's legs are very shaky and he is on the dry-dock.

After watching the races at Detroit and Cleveland, Secretary Jewett, of the New England Breeders' Association, has come to the conclusion that the day of the three in five races is ended. He even goes so far as to say that it will not be long before the dash system is in vogue.

A track manager wrote to Mart Demarest the other day asking if he would enter in a free for all pace with Dan Patch a possible starter. The answer went back "Prince Alert has been ready to race any pacer living for the past two years. He is still in training and will start wherever the money is hung up."

H. B. Gentry, owner of McKinney, has purchased from Mrs. J. L. McCord, of Sacramento, the mare Mary Lou 2:17 that is the dam of Budd Doble's horse Kinney Lou 2:07½, and will breed her to McKinney. Mary Lou is in good shape, and does not look to be more than ten years of age, although she was foaled in 1885.

Information from Atlantic City, N. J., is to the effect that the famous summer resort is to have a gentlemen's driving park, with a half-mile track, located centrally. The plan, as outlined, is to merge the ball park and an adjoining park, both controlled by railroad corporation, which has assented to the project.

Creseus 2:02½ was shipped from the Ketcham Farm, Toledo, O., to the Cleveland track on Monday of last week. He had made a heavy stud season, but is not high in flesh. His best mile before leaving home was 2:28, but a day or two after reaching Cleveland he was breezed a quarter in 0:31½. Eddie Mitchell has him in charge. His first start will be at Lima, O., August 27.

Millard Sanders has driven four mares into the 2:10 class in the past two years and when Robizola gets into that charmed circle the list will be five. The latter won five races in three weeks. Robizola resembles Dolly Dillon a good deal, and although she is bred on entirely different blood lines, still the resemblance goes so far as to be noted in the manner in which both carry their head and also in their gait.

A novel plan has been devised for contesting the Cleveland Challenge Cup for trotters at the inter-city matinee next month. In the event that eight or more horses are entered for the race, the field will be divided by lot, and each division will have a race on the two-in-three heat plan. Then the winners of each of the races so trotted will meet on the second day in a single dash of one mile, the winner to hold the cup for one year.

The program for the inter-city matinees to be held at Glenville, September 1 and 2, has been announced. The leading event for trotters will be the free for all trot to wagon for the Amateur Drivers Challenge Trophy, the \$2500 gold cup, and the top line event for pacers will be the championship cup free for all. Any matinee club member may enter for these prizes, but to compete in the class events a driver must be a member of the league of Amateur Driving Clubs. The classes for trotters are: 2:09, 2:11, 2:13, 2:15, 2:17, 2:19 and 2:21, and for pacers 2:08, 2:12 and 2:18. Making a total of twelve events. The league is represented in Boston, New York, Syracuse, Pittsburg, Columbus, Chicago, Memphis and Cleveland.

Harry McKerron, the two-year-old son of John A. McKerron 2:04½, that is trotting so fast, was entirely unbroken when he went into Keyes' stable in April. At first Keyes thought he never would be able to transform the rough-going, gaitless son of John A. McKerron into a trotter, but constant work with the youngster has had its effect and now Harry not only trots, but does so in an oily manner and at a speed remarkable for his age.

Col. E. H. Greely's young stallion Columbo, that took the blue ribbon in the class for stallions six years old and over at the late meeting of the Eastern Horse Breeders Association, is inbred to both the Wilkes and Electioneer strains, and is from producing ancestors on both sides. His sire Bingin 2:06½ is by May King 2:20, son of Electioneer. His dam is by Allerton 2:09½, and his second dam a full sister of Gov. Stanford 2:21, by Electioneer.

The *Horse World* says: "The grandam of John Taylor 2:10 was by Aristos, son of Daniel Lambert. The Morgan cross again," and still again when Kinney Lou beat John Taylor and took a record of 2:07½. Kinney Lou's dam, old Mary Lou, has lots of Morgan in her veins. Her sire Tom Benton's grandam was by Green Mountain Morgan that was by Black Hawk 5, and Mary Lou's dam was by a son of David Hill 857, and her grandam by Black Hawk 767.

Seven trotters have taken records better than 2:05 as follows: Major Delmar 2:04½, Cresceus 2:02½, Lou Dillon 2:02½, The Abbot 2:03½, Alix 2:03½, Nancy Hanks 2:04 and Azote 2:04½. Three of the seven are by sons of Electioneer—The Abbott 2:03½ by Chimes 2:30½, Azote 2:04½ by Whips 2:27½, and Major Delmar 2:04½ by Delmar 2:16½. Cresceus 2:02½ was bred in Ohio, Lou Dillon 2:02½ and Azote 2:04½ in California, The Abbot 2:03½ and Major Delmar 2:04½ in New York, Alix 2:03½ in Iowa, and Nancy Hanks 2:04 in Kentucky.

A. H. Merrill, who started the races at Glenville, is something of a mascot for record breaking feats by both trotters and pacers. He was the starter that gave the word when Cresceus took his world's record of 2:02½ at Columbus two years ago, when Dan Patch paced in 1:59½ at Readville last fall, when Prince Alert paced in 2:04½ upon a half-mile track, a world's record, and when Star Pointer paced his famous mile in 1:59½, and now he is able to say that he gave the word to Lou Dillon when she reduced the record for mares to 2:02½.

Already nearly three-quarters of the \$25,000 to be raised by public subscription to help build and equip a first-class mile track at Libertyville, not far from Chicago, for harness racing has been pledged and many prominent Chicago business men have supported the enterprise liberally from the start. George A. Mason, Highland Park, has agreed if that amount is forthcoming to construct the track and put up 500 stalls. It is proposed to make the new course the training headquarters for all horses owned in Chicago and many more.

Certain gentlemen prominently identified with the trotting turf expected to meet at Cleveland during the Grand Circuit meeting at Glenville and discuss plans for the betterment of racing, but owing to the absence of J. Malcolm Forbes, who was to preside as chairman of the formal conference, the meeting did not materialize. It is said Mr. Forbes has been requested to call another meeting for Lexington in October, and probably at that time some well matured plans for the improvement of light harness horse sport will be presented for adoption.

The *American Sportsman* of Cleveland says: "One of the really swift horses at the track is the fast mare China Maid by McKinney, in the stable of J. M. Nelson. Mr. Nelson gave her her work a few days ago, stepping her a mile in 2:08 with quarters and the last half at a much higher rate of speed. After this work, to let some of her friends know how fast she really was, he stepped her an eighth in 13½ seconds. It is a misfortune that she is not well staked for this year, but Mr. Nelson will hold her over, stake her through the Grand Circuit and race her. She is undoubtedly the greatest green pacer in sight."

Ben Kenney, the man who has been chosen to train and drive the stallion John A. McKerron 2:05½, in his efforts to beat Cresceus' record of 2:02½, is the man who educated and brought out the former champion trotter, Nancy Hanks 2:04. Kenney drove Nancy to a record of 2:14½ as a three-year-old and when she was turned over to Budd Doble, after she became the property of J. Malcolm Forbes, that trainer pronounced her the best broken and best mannered trotter he had ever handled. Since he brought out Nancy Hanks, Kenney has been out with many noted performers and he appears to have all the qualities necessary to enable him to use McKerron's speed to the best possible advantage.

Our correspondent at Cleveland, Ohio, writes as follows under date of August 2d: The mare Italia 2:23½ by Zombro 2:11, owned by W. P. Murray, of Cleveland, and purchased by him in California in the spring of 1902, is coming to her speed fast, and defeated Darwin 2:13 and Charlie Mac 2:07½ at the Cleveland matinee yesterday, trotting her miles in 2:17½ and 2:14½, the final quarter of the first heat being in 32½ seconds, and of the second mile in 32½ seconds. She was driven by H. K. Devereux. The latter gentleman's John A. McKerron 2:05½ has been shipped to New York, and will trot against his own record at several of the Eastern meetings. Ben Kenney, who has developed several champions, will train and drive the fast son of Nutwood Wilkes, and as McKerron was never in as fine fettle as right now, a mile right at the world's record notch may be looked for.

King Direct is considered by many to be the handsomest son of Direct. He has stepped a last half of the mile in 1:01 and his breeding is such as to suggest that he will make one of the best sires of his family. His dam is Welcome Bunker, by Mambrino King, and his second dam is Lady Bunker, the dam of Guy Wilkes, 2:15½ and El Mahdi 2:25½, and the sire of Declaration, sire of nine; El Mahdi, sire of nine; Guy Wilkes, sire of seventy-nine; William L., sire of ten, including Axtell, by Mambrino Patchen.

For the Challenge Trophy this year the Cleveland Club will be represented by either Lou Dillon or The Monk. John A. McKerron will be off on a record-breaking expedition, and Anzella is out of training. For New York Lord Derby will start Syracuse will enter Miss Whitney and Columbus will be represented by Chase. Among the probabilities are Dolly Dillon of Pittsburg, Susie J. of Boston, and Major Delmar. Should the latter start he will be a particularly dangerous candidate. The pacing cup race is not likely to have more than three starters. C. K. G. Billings will doubtless start Greenline, C. F. Emery will enter Anadias, last year's winner, and E. E. Smathers can be depended upon to nominate Shadow Chimes. Johnny Ray's Tiger and Charlie Otis' Dutch Mowry are possible, but not probable contenders.

A. B. Gwathmey of the Cotton Exchange, New York has a very fast horse in the Virginia-bred trotter Forney by Sidney Prince, dam by Bendee, purchased in the spring from James C. Smith of Richmond. This tall, racy looking gelding was bought by Mr. Gwathmey to drive on the Harlem river speedway, but showed so much speed that he was placed regularly in training and will be kept over and raced in 1904. John Howell, Mr. Gwathmey's trainer, has driven Forney a quarter to cart in 30½ seconds, while to sulky the son of Sidney Prince has worked a half already in 1:02½. Among the other fast ones in the Gwathmey stable are Tiverton 2:12½ and Senator Mills, both of whom won at Glens Falls and defeated good fields. To win the 2:14 trot Tiverton had only to go two heats in 2:14 each, but Senator Mills had to set a livelier clip and made a new mark of 2:12½, a reduction of seventeen seconds in his record. Tiverton and Senator Mills were also winners at Albany last week, where the latter captured a \$2000 stake.

Much interest has been taken in the journey made by Lieutenant-General Nelson A. Miles on horseback from Fort Lill to Fort Reno, Okla. Great curiosity has existed in many circles as to the real reason which prompted General Miles, within a few days of his retirement under the age law, to ride 90 miles across a rough country. This reason he is reported to have supplied as follows: "I wanted to satisfy myself as to the character of the horses with which the cavalry is being supplied and the effect of different animals over different roads on their riders. I wanted to compare the cavalry horses of to-day with those of the past and draw conclusions that might be of benefit to the army. There have been some complaints that not so much care is now taken in the selection of cavalry horses as formerly and that this has been the cause of desertions in that arm of the service. By riding nine horses selected at random over a ninety mile stretch I believed I could best secure all of the information I wanted—and I did."

Says the *American Horse Breeder*: "The Anteeo branch of the Electioneer family gained additional honors at Buffalo on the 5th inst. Judge Green, that won the 2:30 trot and took a record of 2:17½ in the second heat, is by the champion Directum 2:05½, and his dam is by Anteeo Jr., 2:25½, a son of Anteeo 2:16½. The bay gelding Millard Sanders that won the 2:18 trot, taking the second and third heats in 2:15½, 2:15½, is by Anteeo 2:16½, and his dam is Mayenne, by Wedgewood 2:19. Both Judge Green and Millard Sanders have a stout, thoroughbred inheritance on both sides. The dam of Directum 2:05½ was by the running-bred Venture 2:27½. The dam of Anteeo 2:16½ was a daughter of the famous thoroughbred mare Columbia, by imported Bonnie Scotland, and the dam of Wedgewood 2:19, sire of Mayenne, was by Woodford, a thoroughbred son of Kosciusko. There is nothing equal to a good, stout, thoroughbred, racing cross for giving speed ability, stamina and racing instinct to a trotter or pacer."

Don Derby, full brother to Diablo, paced the Poughkeepsie track in 2:04½, reducing his record from 2:06 and also reducing the track record. Don Derby is owned by James Butler, who owns about as many, if not more, horses that are being raced than any other one man. He has several in the stable of Ed Geers, while the majority of the horses looked after by Monroe Salisbury are owned by him, and still another string that is being raced by Thomas Murphy through the Hudson and Mohawk Valley Circuit. Last year Mr. Butler kept Don Derby for matinee racing, but this spring, when Murphy took charge of a number of the Butler horses, this horse was in the lot. Mr. Butler had little confidence that Murphy would reduce the horse's record, and horse-men had still less, but Murphy after working the horse some believed that he could get him ready and lower his mark. With this end in view he took the horse along when he shipped his stable to the race, with the result above stated. Don Derby has always possessed phenomenal speed, but in previous years his speed has always been uncontrollable. He would race to the half-mile pole at a clip that no horse could maintain, and as was natural to expect, in the language of the horse-men, "he stayed there." It was next to impossible to rate him away, and if such tactics were tried he would take such a strong hold that more was taken out of him than if he was allowed to go on. Murphy, by careful nursing, has got the gelding so that he can rate him away, and without the horse pulling a ton.

Ethics of Breeding.

(Continued from Last Week.)

This examination, too, will show that every time we make use of an unworthy dog or bitch we are introducing an element we shall subsequently have to eliminate, and if we breed from a second-rate dog or bitch we should only do so with the definite object of attaining some merit such animal may have in excessive degree, and take care that the puppy we select to keep is the one which possesses, in most marked degree, the merit we aim at. Breeding is a matter of compromise, and the bitch must have something to give in exchange for what she takes. Another matter of importance is that the longer a feature has been in existence the greater power it has of reproducing itself. Thus, a fault which has been handed down for several generations is harder to eradicate than one that has been intermittent. The figures themselves bear this out, but the reproductive force is probably greater than is shown by the figures. A good rule, therefore, to set before ourselves is, "Never breed from the second generation of a fault." It is a rule circumstances may make it impossible for us to follow; but, none the less, it is a good standard to aim at. The influence of inbreeding also tends to disturb the figures unduly, for it is generally recognized that the close repetition of the same individual in a pedigree exercises an increased force. Many breeders have a very primitive idea of the value of inbreeding, or line breeding, as they sometimes call it. I have known a breeder disappointed with the results of the union of the son and daughter of a celebrated sire. Both son and daughter possessed all the faults of the sire to an extreme extent, and it was possible also to find in them all the faults of the champion's ancestry; yet the breeder failed to realize that what he was inbreeding to was not the virtue of his prototype, but the defects. Considering the forces of inbreeding, it is of additional importance, when we make use of it, that we should be certain that the extraneous blood we use is free from the predominating faults of the animal inbred to, and that the individuals we breed from are strong in the points where the prototype is weak.

I do not wish the impression to be formed, from what I have written, that it is no good breeding unless the breeder possesses, or can afford to possess, bitches of undoubted merit. We cannot command success even with the most perfect brood stock, as there are elements in nature we cannot control; but there are three occasions for the exercise of the breeder's influence—in the selection of the dam, the selection of the sire and the selection of the offspring, and it is in these selections we should leave as little as possible to chance. Should a breeder possess but one bitch, and that an indifferent specimen, and he is unable to afford to purchase a better, he must do his best with what he has by the exercise of the other two opportunities of selection left him; but, if a breeder has two indifferent bitches, I would counsel him to select the least bad and center all his attention upon her and her offspring. Many a breeder, however, has three or four bitches, all of whom possess few claims to merit, and he wastes his time, his temper and his money in breeding from the lot. Much less trying to his temper and much less expensive on his purse it would be were he to apply a spotlight to two of them, and, with the additional space and time at his command, endeavor to breed out the faults of the third by careful retention of the puppies nearest his aim, and careful selection of the sires he breeds to. Most breeders spoil their chances of success on the show bench by having too many bitches in their possession. The small man grumbles because the man with the large kennel sweeps off all the prizes, yet one of our largest, most successful and cleverest breeders once assured me that the man with four selected bitches was in the best position to achieve successful results, and with this dictum I am in entire agreement.

If a man can afford to keep and breed from three bitches, he should be sure his three are good ones, or else he should make sure that he has one good one and no bad ones. One good bitch will save its cost, as compared with three indifferent ones, in a very short time, and the result will be very much more satisfactory. He may not have so many weeds to throw upon the market at a guinea or two; but I am not writing in the interests of the dealer, and I feel sure that, even from the pecuniary point of view, he will find discriminating selection of the dam a paying game. Let, therefore, the breeder's watchword be "discard." Let him discard even the best bitch in the litter if she does not possess those points for which he has been breeding, and possesses even in a slight degree what he is endeavoring to eliminate, provided he has another not, perhaps, so good on the show bench, but whose faults are less fixed in the pedigree, and whose virtues are what he aims at. In the selection of the dam, of the sire and of the puppy, let his motto be "breed to breed." Let the plan be forms be a continuous policy. In conclusion, take the old advice: "Cut your losses and hang on to your profits." In this instance the losses are the "misfits"—discard them ruthlessly; the profits are the successes, do not be tempted to part with them. If you have any definite scheme of breeding, they are of much more value to you than to any one else. Your "cast-off" may be the groundwork of some other breeder's success; but let not that disturb you. If, in piquet, a bad discard is followed by a lucky pick-up, it does not prove you played the right game, and the man who plays the right game consistently will win in the long run. Don't breed for to-day as much as for to-morrow.

These remarks on breeding are but sketchy—the subject is immense—in all but one respect they are given with considerable diffidence for daring to deal

with the matter at all. The one exception made is largely the cause of the whole article, and that exception is the worthless stuff so largely used by most breeders. I am confident that no great progress will be made with the breed until a far higher standard is set up than exists as to what ought and ought not to be bred from. At present the only qualification seems to be that the animal is of the female sex.

DOINGS IN DOGDOM.

"The value of a pure bred dog, even for use, over a mongrel, is exemplified in a letter received from New Zealand, says a writer in the Australasian. The correspondent in question went out pig hunting with a high class Bull Terrier and a mongrel-bred one, and coming across a boar of considerable reputation, owing to repeated failures to get him, a fearful encounter ensued, the gentleman of formidable tusks again escaping, despite the indomitable courage of the Bull Terrier. Though in the end becoming knocked out through loss of blood, this wonderful bitch, who not only weighs but 40 pound, but had just reared a large litter of puppies, returned again and again to the fight, being severely ripped no less than seven times. Absolutely the only assistance she got from her miserable kennel-mate was the questionable encouragement of much noise, and an occasional snap at the porcine quarters at times when the more dangerous end of their opponent was engaged with the Bull Terrier." Blood, indeed, will tell.

Jos. E. Terry, of Sacramento, has donated a handsome silver cup to be given as a prize in one of the stakes at the Nevada field trials.

Mr. William Ollard, of Tacoma, writes us as follows concerning Irish Terriers: "Bantry Bawn, a bitch owned by Mr. C. P. Curtis, Tacoma, was served by his Bolton Woods Despot, July 1st, and is now heavy in whelp.

Brimsall Doreen whelped August 10th four dogs and one bitch puppy to his Bolton Woods Despot. The pups are coming on fine.

Bantry Bawn owns Ch. Masterpiece, of New York City, for sire. \$100 was paid for Bantry Bawn in New York when she was three months old, and all risks taken by purchaser. Last year, being her first season, she was sent to the Rusden Kennels for service, traveling on the round trip over 3000 miles. This, at least, shows we have enthusiasm and the correct qualifications for the growth of the fancy here on the Pacific Coast. However, it will not be necessary to send so far for a stud service again, as the Coast can now boast of most excellent blood and some very typical specimens of the true Irish Terrier. One of the latest importations being Bolton Woods Despot direct from the well known Bolton Woods Kennels, England."

San Francisco Fly-Casting Club.

SATURDAY CONTEST NO. 10—Stow Lake, August 15, 1903. Wind, southwest. Weather, fair.

Table with columns: Events, 1, 2, 3, 4. Sub-columns a, b, c under event 3. Rows include Young, C. G., Brotherton, T. W., Brown, H., Brooks, Dr. W. E., Kenniff, C. R., Edwards, G. C., Kierulff, T. C.

SUNDAY CONTEST NO. 10—Stow Lake, August 16, 1903. Wind, none. Weather, fine.

Table with columns: Events, 1, 2, 3, 4. Sub-columns a, b, c under event 3. Rows include Young, C. G., Kenniff, C. R., Brotherton, T. W., Kenniff, J. B., Golchert, H. C., Battu, H., Haight, F. M., Huyck, C., Kierulff, T. C.

NOTE: Event 1—Distance Casting, feet. Event 2—Accuracy percentage. Event 3—Delicacy, (a) accuracy percentage, (b) delicacy percentage; (c) net percentage. Event 4—Lure casting, percentage.

The fractions in lure casting are 15ths.

Reports from reliable sources this week give the following angling data:

Klamath Springs, Siskiyou Co.—The trout fishing in Shovel creek this year has been phenomenal. Catches have been made all the way from 100 fish to 400 for a days sport and all caught on the fly. The best killers have been the blackgnat, royal coachman, grizzly king and the hackles tied on No. 12 or 14 hooks. The salmon fishing is just commencing in the Klamath river and promises to be fine this year on account of the dam being a thing of the past at Klamathton. Several fine catches of these game fish have already been made and by reason of their early appearance the sport should be great this year.

Capitola and Santa Cruz—Wonderful salmon fishing continues, catches averaging from 15 to 60 to the boat and weighing on the average from 4 to 50 pounds. There are immense schools of sardines in the bay and the sport promises to last the rest of the month. Smelt are also running in large quantities and can be caught off any of the wharves running into Monterey bay.

Lake Tahoe—Fishing continues good in the lake and with the fine weather that usually occurs in September the sportsman will find everything he can wish for by making a trip into this section during that period.

Jackson's Napa Soda untangles the feet.

Success in Angling.

The success of an angler depends largely on the amount of common sense exercised.

The bunter when in quest of game exerts all his cunning which consists of careful forethought coupled with good judgment. If the game is wary, he takes into consideration the direction of the wind and bow he can best approach with the least possible noise or lure the game to him without being seen until the quarry is within range.

It is quite probable that fish are possessed of as much instinct or intelligence regarding their self-preservation as most birds and animals; certainly they are as quick to discern any unnatural movement and take instant flight, and when in this state they have no idea of taking food.

It is very rarely the case that the angler gives the proper attention and careful consideration necessary to get within fishing range. The two senses which are most prominent in the organization of fishes are those of feeling and seeing. Most anglers of experience take heed of the latter sense, but the former as a rule is not given due consideration. A heavy jar of any kind in the vicinity of the bank of lake or stream is communicated to the water, and fish will frequently take greater alarm from an unseen disturbance than something that can be detected by vision, as in one case the nature of the foe is unknown, while in the other their instinct has taught them the ways and means to best protect themselves from threatening danger. While it is undoubtedly true that fish will become accustomed to the presence of an angler if he remain quiet, and will return to their usual quarters after a time, still, much time is lost through lack of careful approach before they will again resume feeding. The skill of an angler in hooking or landing a fish or the fitness of equipment is of no avail provided they are not in a state of perfect tranquility when the lure is presented.

In the art of angling there is scarcely a limit to the amount of skill that can be displayed in all the details necessary for success. It matters little how much time or study one has devoted to the subject, there is constantly some new phase presenting itself or something of an interesting nature to be learned. In the preparation of selection of the tackle the skill of one angler over another is really a question of common sense. Eliminate all the scarecrows possible, have your tackle as fine as you can and answer the purpose; give the fish credit for at least enough intelligence not to take anything which exhibits the fraud too prominently; always keep as close to nature as the component parts of your tackle will permit, and use the same caution you would in creeping on a flock of ducks around a bend in the river or any other game that one has to exercise great care and forethought to outwit.

It is a common saying with many anglers that they can sit all day with rod in hand in perfect contentment without getting even a nibble. While there is no question but that to the overwrought mind the refreshing breezes and delightful scenery is invigorating and restful, after months of hard labor amidst the humdrum and clatter of city life, and the sense of relaxation is more than pleasant to contemplate, nevertheless the enjoyment must be infinitely more keen and both mind and body receive greater benefit when a feeling of enthusiasm pervades the system and a desire to excel in this, one of the noblest of sports.

Even among the most indifferent, the sensation of a sharp tug on the line and the bend of the rod will set the blood tingling and awaken the dormant energy to a strong desire and determination to win the fight if possible, and land the fish which is bravely and heroically putting forth all his strength and resources to escape from his unknown and unseen foe. When the capture has been effected and the beauty lies before you, one cannot help but admire the pluck and endurance of the vanquished, and almost wish that he had been the victor.

The common sense fisherman will tell you that when fishing from a boat he throws his bait as far as possible in order to avoid being seen, and also that the conditions surrounding the fish may not be disturbed; he will tell you that he endeavors to present the lure in life-like and appetizing manner, and give it a motion approaching nature to the best of his ability. The tackle will be fine, and the hook so well concealed that the fish sees nothing but the bait. The following taken from an unrecalled writer on angling topics aptly illustrates this common-sense principle:

"By observation you will soon know that you must not show yourself to the intended capture, and therefore you must not be too close to the water's edge; if it is necessary for casting your fly, you must make yourself as little visible as possible."

After all these points have been taken into consideration it will be seen that while skill in the manipulation of rod and reel is desirable, and only long years of experience can attain this, that the most important factor and the one which was responsible and contributed most to the weight of the basket on the homeward march was allopathic doses of horse sense applied when and where most needed.

Hammocks and Lawn Tents.

Minus Prietas hammocks can not be excelled. They are a hand-made Central American product, woven from a light, tough and strong grass fibre and dyed in bright colors with mineral dyes. They are lasting and comfortable: one can roll them up into a small compass the same way as is done with a silk India shawl. Skinner, the Sporting Goods man, 801 Market Street, has just received a new consignment.

Lawn Umbrellas for outing, camping, prospectors, invalids, for the summer cottager, etc., 8-foot spread, comfortable for two people. Light weight very strong, variegated or solid colors, put up in five minutes. Just see Skinner about 'em. You'll sure want one when you see it.

GOSSIP FOR SPORTSMEN.

Sportsmen who have a taste for venison and are endowed with a sure eye and stout limbs to withstand the labor and fatigue involved in a trip through rough country are amply rewarded these days, the prize for the venture being a fat buck. Hunters returning from points far and near have generally come back to this city, after having had a glorious outing, with a dressed deer or two, or at least a head and antlers. This latter trophy of the chase is generally turned over to a taxidermist and when properly mounted is hung conspicuously on the wall of the dining-room or den and will no doubt be the subject of many future hunting reminiscences.

Among the doughty Nimrods who have bagged bucks recently are John B. Hauer who dropped a fat deer that tipped the scales at 123 pounds when dressed. The buck was secured in one of the canyons of the Division ranch below Inverness, Marin county. In the hunting party were J. P. Sweeney, Mr. Underwood of Berkeley and Mr. Beatty of this city. The party hunted over private ground, for which pleasure they had a permit.

On this particular occasion it was a wonder that anything larger in the line of game than a jackrabbit was bagged. And still more wonderful is it that another hunting casualty did not take place, for this whole section of the country was on that particular day alive with hunters, and bullets were flying in every direction. Hauer and his companions took the wise precaution of garlanding their shoulders with red handkerchiefs so that in going through brush or working along the canyon sides or ridges some impetuous rifleman would not mistake them for deer and send a few leaden messengers of death in their direction.

Marin county has been a prolific hunting ground for many deer hunters this season so far. Among the members of the Country, Tamalpais and Point Reyes Sportsmen's clubs over a score of bucks have been accounted for. W. S. Kittle had already secured two bucks up to Wednesday last, when he again went over to the Country Club preserve in the hope of getting his quota of three deer for the season in the shape of a big buck, in view of this he let several opportunities go by to bring down a small animal. Shortly after the opening of the season on Division ranch, Payne Shafter, Henry Brainerd, ex-Mayor of Petaluma, and Herbert Brainerd brought down a 135-pound buck. The party started on the chase at 10 o'clock a. m. and were back from the hunt at 11 o'clock. The deer was jumped by the dogs and was in range of the trio of huntsmen, who each fired a shot, the three shots each being effective, thus leaving the honor of getting the deer an open one between the hunters. J. J. Moore and Master Moore Saturday week downed two hucks near Inverness. One was a big three-pointer which weighed 125 pounds, and the other was a 115 pound spike buck.

That deer are plentiful and tame in Marin county is shown by the following incident. Last week a party of Santa Rosa people who had been in camp near Olema saw a buck, accompanied by a doe and well grown fawn, on the public road near Hicks valley. The animals trotted along the road for some distance and finally disappeared in the brush on an adjoining hillside.

Recent reports state there are many deer to be found in the southeastern part of Santa Clara county. The big fellows are being driven further back into the hills but they are still to be found in accessible localities. Pipe Ridge is a place where hunters are meeting with good luck at present. A few miles further back on Middle Ridge the bucks are more plentiful while still further back on what is known as Blue Ridge big game is found in abundance. This region is but sparsely populated and very hard to get at, but when one once gets there it is an easy matter to secure game.

The cool mornings and evenings have had a tendency to bring the deer more out into the open and it affords hunters a better opportunity of getting their game. Although the past few weeks have yielded good sport, it is expected that the month of September will yield far better returns for the sportsmen.

Hunters returning from San Mateo county report a scarcity of deer in that country, notwithstanding that the open season in the county is still young. Those who claim to know say that the reason is that the law has been disregarded, and shooting out of season was indulged in for several weeks prior to August 1st, the date when the county season opened. It is reported to be the very common practice for hunting parties to be made up about the middle of July each year. These parties leave ostensibly on a camping and fishing expedition for the southern sections of the county. The real object, however, is to be in the midst of the good hunting ground for the purpose of getting two weeks' start on the law-abiding sportsman. It is claimed that a good field for a zealous game warden can be found in the southern part of San Mateo county two weeks before the season opens annually.

The honors of the chase are by no means entirely monopolized by the sterner sex. Miss Lou Cochran of San Rafael recently killed in the Blue river basin a buck that weighed 150 pounds. This animal is the record deer in the county so far this season, and probably will remain so.

Mrs. George O. Young is the first woman of the season in Santa Clara county to cause a monarch of the forest to fall before her rifle. She, with her husband and a relative by the name of Harry Meese of this city, returned from a deer hunt to the San Antonio valley. Mrs. Young was the lucky one of the party as she killed a fine buck. Harry Meese had an exciting encounter with a large wildcat. The animal came out second best. It was one of the largest specimens of the kind ever seen in that vicinity.

Otto M. Feudner recently got two big bucks in Plumas county near the Big Meadows. One buck had a set of the most symmetrical antlers shown in this city during the present season. They were still

in the velvet. This head will make a most beautiful mounted specimen.

E. N. Hecht and G. H. Taubles have returned from a three weeks' outing in the wilds of Humboldt county. They camped at Big Bend on Mad river and on Pilot creek. One four-point buck, a forked horn and a large Pacific blue buck was the big game bag. Doves and trout were not wanting in the camp larder by any means. The hunters report plenty of brook trout in Grouse creek, Pilot creek and Mad river. Grouse are also very plentiful in that region.

Andrew Jackson and George H. T. Jackson left the city Saturday on a deer hunting trip. Ben Baum and Vic Sartori will remain in the vicinity of Fort Ross for a week, deer hunting and trout fishing being good in that locality at present.

R. Sangster and party left during last week for a month's hunting and fishing in the Big river country, Mendocino county. The hunters will reach their destination by stage from Ukiah.

A singular hunting misadventure befell E. A. Boyles of Gridley, Butte county, recently whilst deer shooting in the mountains of Plumas county. A letter from the hunter tells of his strange experience in that wild country. Returning from a day's hunting trip, he stepped into an old mine tunnel, and being attracted by the character of the rock of the walls of the tunnel, he struck a match and walked some distance into the incline. As he turned to go back to the mouth of the opening he saw a deer standing in a patch of light at the entrance to the tunnel. He raised his rifle and fired and immediately a mass of rock fell in front of him and partly covered him. He was not seriously injured, but was horrified to find that his exit had been cut off by a cave which had doubtless been started by the shock following the discharge of the rifle.

Boyles then followed the tunnel backward, relieving the darkness by striking matches, and found that it led to a shaft. The timbers of the shaft were rotten and there was no ladder, but there was a chance to climb downward. He let himself down the old shaft and finding another tunnel at the lower level wandered along its length and after squeezing through over parts of the roof that had caved in he reached the outer air near the bed of a creek. The tunnel through which he escaped was an old drainage way and still carried off the water of the mine, making pools through which he had to wade up to his waist. When he got out it was dark, and being confused by his experience he lost his way and did not reach camp until the following morning.

There is reported an abundance of quail and grouse in the vicinity of Lake Tahoe, an old resident of that section reports that he has never seen this kind of game so plentiful before, hunters are also bringing in the same reports. The season for mountain quail and grouse in Placer county, is from September 15th to February 15th and the sport will no doubt be of the finest this year. The deer season in Placer county is from September 1st to October 15th and there are several fine places in the vicinity of Lake Tahoe where the hucks are plentiful this year.

Salt water anglers are elated over the improving conditions of striped bass fishing. This season, as contrasted with results during corresponding dates last year, is far behind.

Some good catches have been made in the "straits" during the last week. One day Jake Christianson landed a twenty-pounder and several smaller fish.

In San Antonio creek, Mr. Al Cumming succeeded in landing twenty bass one day last week.

Midshipman slough near its confluence with Sonoma creek has been discovered to be a good bass fishing ground. Among the lucky anglers have been Dr. Ed Knowles, Frank Dolliver, George Banker and others.

A number of bass have been taken in the slough near Bear's Point. Edgar Forster, James Maynard, Charles Breidenstein, Jules Bruns, Ed. Schultz, J. Suib and John Karney fished Midshipman slough last Sunday.

Lake Merritt is still the resort of bass anglers. Charles Hollywood, one day last week, hooked five nice bass in the lake.

Floyd Judah and B. Beattie prospected Elkhorn slough from the Empire Gun Club house Sunday. The slough is full of the striped fellows, and the luck of the two anglers justifies the anticipation of much sport for the club members in the future. Among the other members who were at the club headquarters on the Monterey preserve were J. P. Sweeney, J. B. Hauer, Bert Patrick, L. H. Allen, Mr. Schumacher and others.

A party composed of San Jose and San Mateo sportsmen made the biggest salmon catch of the season Sunday at Capitola. The members of the party were County Assessor C. D. Hayward, County Recorder J. F. Johnson, County Treasurer P. P. Chamberlain, D. J. Mills and Lon Cook, all of San Mateo county, and Jean Prindville, H. D. Kooser and Bert Herrington, of San Jose.

It was early in the morning when the party left the wharf at Capitola in a launch. They beaded for the favorite fishing grounds about four miles out off Aptos Point. There was a great run of fish and the sportsmen lost no time in beginning to haul the big fellows aboard. Before noon there were 52 fine, large salmon lying in the launch and the party agreed that they had enough fish to last them several days, for the combined catch netted several hundred pounds. There were several large ones among the number. Hayward hooked a 48 pounder with a rod and reel, and it took him just one hour and ten minutes to land the big fellow. Most of the salmon were caught with a rod and reel.

All the men are old salmon fishermen but they say the sport they had Sunday was better than they had ever before experienced.

Dove shooting seems to be hardly up to the average of many seasons past. Near this city the hunting fields formerly yielding good dove shooting are apparently abandoned by the "coopers."

Prospects for good quail shooting this fall have not been better for years past. From almost every section the reports are that the quail were never more plentiful.

The open season for mountain quail and grouse commences on September 1. A more than average good hunting ground for these game birds, it is reported, may be found in the vicinity of Tahoe, this State, in which county (Placer) the season begins on September 15th. A recent letter from that section states there never have been so many mountain quail and grouse seen in the vicinity, and the prospects for sport in September are enticing.

Rev. Mr. Gardener and Dr. Logan, retired doctors of divinity, killed two does near Larkspur on the 19th inst. and were arrested deservedly for this, under the circumstances, flagrant violation of the law, and are now in the bands of the law officers. Gardener pleaded guilty before a J. P. on Wednesday night and is subject to a fine of from \$25 to \$500. Dr. Logan pleaded guilty and was fined \$50. In these cases a maximum fine would not be a harsh penalty.

The does were killed in a canyon near Mount Tamalpais. After killing the deer the carcasses were secreted and at night the ministers returned, skinned the animals, cut off the heads and having made way with the evidence, as they thought, hung the meat up in a tree in sacks. The matter was reported to San Rafael officers by Larkspur residents, with the result that the ministers were arrested.

The does were illegally killed on the property of Mr. Wm. Kent. It is claimed that five does have been killed in that section in ten days. The ground is private property and posted. To prevent, if possible, any further prying invasion with the purpose in view of illegal deer slaughter, steel traps have been set out in different places and the chances are strongly that, if the nefarious practice is continued, that some of the malefactors will be caught. How would it look if a clergyman had one of his legs ornamented with a bear trap? Whew!

AT THE TRAPS.

The trap shooting feature next month will be the Golden Gate Gun Club prize merchandise shoot on September 16 at Ingleside. The program embraces several events, one of which provides for ten classes with five prizes in each class.

The many sportsmen friends of C. W. Debenham, a popular trap shooter who has been ill since last January, will be pleased to hear that the stricken man is improving and that his chances for permanent recovery are now considered to be good.

The trap shooting fraternity will cease their attention to the elusive blue rock next month. The California Wing Club will close their season September 6 at Ingleside. The final club contest will be at twenty live birds. On Admission Day the Millwood Gun Club will hold a big merchandise shoot at Mill Valley. The closing shoots for the season will take on place on August 30 and September 27.

Fine weather drew out a large attendance at the monthly shoot of the Union Gun Club, Sunday last, at the Ingleside grounds. Harry Hoyt won the first class medal in the medal shoot. Dr. Hanson and Dr. Hutton tied for the second class medal. In the shoot-off, a ten-bird race, Hutton won by a score of 9 to 6. The scores follow:

Club race, 25 targets—Iverson 21, G. Sylvester 19, H. Hoyt 18, Gordon 19, Daniels 19, C. Sylvester 22, Fish 19, Leary 16, Hanson 17, E. Klevesahl 15, Lidstone 16, J. H. Hall 21, Robertson 24, Clark 18, Lewis 16, Haight 21, Justins 18, Hutton 17, Shreve 9, Birmingham Jr. 21, Donohoe 20, Muller 22, Klevesahl 15, J. Burns 15, Dr. Hanson 14, Peter Hanson 10, P. J. Walsb 9, Bell 10, Nickels 7, J. Pisani 17.

Robertson won first money. C. Sylvester and Muller divided second. G. Sylvester, Gordon, Daniels and Fish divided third. Lidstone, Lewis and Leary, fourth money. P. Hansen and Bell, sixth money.

Medal race, handicap, 25 to 30 targets, 16 yards—Fish 27 targets, broke 23, Robertson 25-19, E. Klevesahl 27-19, Leary 28-16, C. Sylvester 26-20, Justins 25-20, H. Hoyt 27-25, Gordon 27-23, Hutton 27-17, W. Hanson 27-21, Haight 26-23, Clark 27-18, Pisani 27-21, Shreve 30-4, Birmingham, Jr. 26-19, Hall 26-20, Iverson 27-21, George Sylvester 27-23, E. Klevesahl 28-24, Muller 26-20, Donohoe 29-20, Lidstone 18-13, Dr. Hanson 28-17, T. J. Walsb 30-21. At 18 yards—Daniels 27-21, Lewis 23-11.

Added money race, handicap, 20 to 25 targets, 20 yards—Daniels, 22 targets, broke 21, Gordon 22-17, Iverson 23-20, Hutton 23-17, Justins 22-19, Lidstone 24-15, G. Sylvester 23-14, W. Hanson 24-19, C. Sylvester 23-23, Birmingham, Jr. 23-12, Donohoe 23-18, Muller 23-17, E. Klevesahl 23-20, Clark 24-13, Haight 20-17, Pisani 23-16, Robertson 20-16, Burns 23-22, Hall 23-18, Irvine 25-19, Fish 23-13, Lewis 25-11, Burfield 23-17, J. W. Humble 25-13, Byer 25-11.

In the shoot-off Daniels won first money, Sylvester second and Klevesahl third money.

Second added money race, shot at 20 targets from 16 yards—Daniels 18, Iverson 17, G. Sylvester 16, Hoyt 16, Irvine 12, W. Hansen 16, Robertson 17, C. Sylvester 18, Haight 17, Lewis 12, Donohoe 16, Hutton 19, Fish 15.

Dr. Hutton won first money, Daniels and C. Sylvester second money.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

THE FARM.

Save the Heifers.

Butter has been very high, and so are cows and heef. There are other cau.es. evidently, besides the cost of grain that have kept the prices of butter at such unusual figures during a time of the year when they are pretty apt to go the other way.

Cows may not have done as well since last fall as in most seasons, from various causes, and this would to some extent account for the diminished yield of butter and higher prices. At the latter part of April the receipts of the Eastern markets were fully a quarter less than a year ago, and it has been more than this for the previous two months.

There is undoubtedly much change being made in some parts of the country, particularly in the West, from dairying to heef raising. While this might not reduce the number of cows kept, it would naturally tend to a less production of butter than where strictly dairy breeds of cows are kept.

Again, on account of the short crops of corn raised and also of hay in some parts of the country, it is probable that some of the poorer cows were disposed of at the commencement of winter, thus reducing the number to some extent.

An argument is also presented by some writers in undertaking to account for the diminished butter product, that the hitherto free pasturage at some places in the West are becoming largely curtailed by settlement. While this may be the case, yet if these government lands are being taken by the farmers, it would seem that more stock—and especially more cows—would be kept by them than there used to be in years past.

The *New England Homestead*, in an article on "Future Dairy Prices," produces these facts to account for the rise and probable continuance of higher prices for dairy products, which appear to be worthy of credence: The most important factor is the shortage of milch cows in the United States, compared with the population. While population has gained 22 per cent since 1900, the number of milch cows during the same period gained less than 4 per cent. In other words, population has increased several times as fast as the number of cows on which dependence must be made for supplies of milk, butter and cheese.

This is the average for the whole United States, yet there is a greater difference in some parts than in others. In Michigan, Wisconsin, Minnesota, Iowa, Nebraska and Illinois population increased nearly 21 per cent in the last decade, while the number of milch cows gained but 5.7 per cent. In New England the gain in number of cows was 8.6 per cent, while the population made a gain of 19 per cent. The poorest showing was in the great dairy States of New York, Pennsylvania and Ohio, where the population increased 19 per cent and the dairy herds only 8 per cent, or a little more.

The increasing amount of milk and cream that is continually being called for by the people in the cities and large villages, necessitating the extending of the routes for their collection farther and farther into the country, is also a fact that should not be overlooked in this matter of demand and supply.

These are some of the causes, at least, that show conclusively that there is a deficiency in dairy stock that farmers should undertake to supply.

The high prices for meat results in the feeding of many calves for the butcher. At such times it is quite a profitable business, but it should be properly pursued. Farmers should not be induced to sell their most promising heifer calves, even at good prices, for they should be worth much more on the farm for cows,

or if not all are wanted, they will sell very readily either as heifers or cows to those who desire superior stock.

Notes on Foreign Farming.

John Redmond, English member of Parliament, thinks that the very moment the Irish land bill becomes law, and people become owners of the land, the soil of Ireland will produce double the value it produces at present.

The normal British hay crop is about ten million tons, worth about \$20 per ton. As a specimen of the hay-time wages which are being paid this season in the north of England, we may quote the figures at the Kirkby Stephen hirings last week. First class men receive \$32 to \$36 per month, with board and lodgings; second-rate men \$22 to \$29, and youths \$9.75 to \$14.50.

The annual sheep returns for the year ending April 30, 1902, issued by the government of New Zealand show that the number of sheep in the colony on that date was 20,342,727, an increase of 109,628 as compared with the previous year. The number of owners was 18,803, of whom 7035 owned less than two hundred sheep, while 131 owners had over twenty thousand sheep.

In Canada there has been a very great demand for farm hands during the last three months, but this has now been fairly well satisfied both in the eastern Provinces and the northwest by the large number of emigrants who have arrived in Canada this summer. There will be plenty of work during the next few weeks, but after the harvest is over men must be prepared to find other employment. There is a large demand for female servants all over Canada, but not for female factory hands, who are for the most part poorly paid.

It is probable that the sheep-stock in Argentina has reached its maximum number. This is usually stated at 120 millions, an estimate which must be accepted with some distrust until the approaching census confirms it. The bulk of Argentine sheep are Lincoln cross-breeds, and the wool produced by this type of sheep is that which has suffered most in the drop in values dating from 1899.

In New South Wales good rains have recently fallen, but over a large part of the pastoral districts of the State work has been very seriously hindered by the long drought, and the best opening has been in scrub cutting to keep the starving sheep alive; the total number of sheep decreased from forty-two millions at the end of 1901 to 25½ millions at the end of 1902, and these great losses in the pastoral industry affect the general demand for labor. In Victoria the effects of the drought continue, and there is no demand for labor. In Queensland the drought has caused great losses in the central districts and elsewhere; but since rains have fallen both pastoral and agricultural prospects have improved.

The sunflower crop is one of the best paying in Russia, and a good crop is worth, as it stands in the field, \$30 an acre. The seeds are sold by the farmer for about \$1 a bushel, then the merchants retail at a good profit.

Care and Handling of Milk.

Two great problems confront the milk producer. One is the producing of milk of a certain chemical composition or richness, and the other is the producing of milk of a good keeping quality. The one depends on conditions previous to milking, while the other depends largely on care and condition of animal immediately before milking, the operation of milking, the care and handling of the milk after it is drawn, its storage and its transportation.

The presence of bacteria in the milk must be constantly fought. The first source is the udder, itself. If the cow is suffering from any disease, the milk will be infected and should not be used. Most

diseases will color the milk or decrease its flow.

If animals are healthy the only channel of bacterial invasion is the teat. Some cows have teats which can best be described as leaky, and the entrance through them, of bacteria is made very easy. Too great care cannot be taken that all surroundings may be clean and healthy. Care must also be taken during milking that particles of dust and dirt do not enter the pail. As the teat and milk cistern are the seat of the greatest number of bacteria, it is well to reject the first few streams from each teat, as they are rich in bacteria.

After being drawn the milk should be immediately transferred from the stable to the room where the milk is strained, aerated, cooled and stored.

As soon as possible the straining should be done. After many experiments, no better strainer has been found than one made of a wire gauge and four layers of cheese cloth.

No matter with what care milk has been drawn and strained, it will contain some bacteria. Their growth must be checked and it can best be done, by keeping the milk cool, as they require warmth to grow and multiply. Sometimes, milk is heated to the boiling point, to destroy the bacteria, but that method imparts a cooked taste and renders the milk less digestible. If heated to a temperature just below boiling, the bad effects will not be apparent and the bacteria will be destroyed.

Transportation of milk, especially long distances to the city, has been a great problem, but the use of refrigerator cars has made it simple. Most roads have their milk trains well equipped and the chief difficulty now is keeping the milk cool after it leaves the milk room and before it reaches the car. Bottled milk put in boxes and covered with ice, will arrive at its destination in better condition than that shipped in cans.—*Bulletin Cornell Experiment Station.*

Last spring Secretary A. B. Hostetter of the Illinois Farmers' Institute distributed among a large number of Illinois farm

boys packages of seed corn, each containing about 500 grains. Each boy receiving a package was directed to plant 300 kernels in a square and the remainder of the seed in two rows on the south and west sides to fertilize and protect the inside rows. Other conditions imposed are that the boy shall cultivate the corn, harvest it and exhibit ten ears at his home county Farmers' Institute, the ten or more for exhibition to be taken from the inside square and nowhere else. "It is further agreed by the boy receiving the corn that he will comply with the rules governing the exhibit of corn at his county institute, and that he will attend at least one session of the institute, and that he will follow, as far as possible, the suggestions on the back of the package in regard to keeping record of growing the corn." Prizes will be awarded next fall and winter to boys exhibiting the best samples of corn in their respective counties. The plan is a good one and it has awakened keen interest among farm boys in corn-growing.

The market for condensed milk is much greater than most people not acquainted with the trade suppose. Beside that packed in small cases for family use much of the milk is shipped in barrels for consumption by large manufacturing establishments, such as his-cuit and ice cream companies. It is said that about ninety per cent of the ice cream manufactured in the large cities is produced from condensed milk.

An extraordinary story comes from Montana to the effect that sheep men in two or three districts have recently lost large numbers of sheep from poison being scattered over the grazing grounds. On one range over 2000 sheep died and on another more than half that number.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

TEAM FOR SALE.

PACERS—ONE 7 AND ONE 8 YEARS OLD; bay in color and weigh about 1100 pounds—BILLY F. by Thos. Rysdyk, dam by Hercules; VICTOR PLATE by Plate, dam by Romeo W. Well matched for size, color, conformation and disposition. Stylish, good gaited and pleasant drivers. Can show mile better than 2:30 together. Can be seen at the Petaluma track until August 29th. Address FRED FANNING, Petaluma, Cal.

CLEARING OUT SALES
TUESDAY, SEPT. 22, 1903,

At Fred. H. Chase & Co.'s Salesyard,
1732 Market Street, San Francisco.

THE MEEK ESTATE, HAYWARDS, CAL., will sell all the Standard-bred Horses belonging to the Estate, comprising 35 head. There are Fillies, Mares and Geldings—3, 4, 5 and 6 years old—by McKinney, Nutwood Wilkes, Welcome and William Harold, nearly all well broken to drive and all balted broken and gentle. The mares have colts at foot by William Harold 2:13½ and Welcome 2:10¼, and have been bred back. Among them are the dam and a full sister to Janice 2:08¼, a sister to Cricket 2:10 and many other highly bred ones. A fine lot of Shetland Ponies will also be sold to close out the horses belonging to the Estate.

GABILAN STOCK FARM OF HON. JESSE D. CARR will, at this time, close out all its Trotting-bred Horses. There are also the grand young Stallion BOODLE JR. by Boodle out of Nina B. by Electioneer. He is one of the greatest young stock horses in California. The young stock is by Booodle Jr., Nutwood Wilkes and other good sires.

THE SALE IS POSITIVE AND WITHOUT RESERVE.
Send for Catalogues.
FRED. H. CHASE & CO.
1732 Market Street, San Francisco.

UNDER ELECTRIC LIGHT

Grand Auction Sale of Trotting Horses

Consisting of Sons and Daughters of
McKinney 2:11 1-4, Diablo 2:09 1-4, Truman 2:12 Hart Boswell, Advertiser 2:15 1-4, Richards Elector, Lustrion, El Benton, Good Gift, Etc.

Some of the Finest Ever Offered in California.

This is a splendid opportunity to get some of the best bred as well as the finest looking youngsters (all well broken) to be sold this year. Catalogues will be issued immediately. Any one having horses they wish to dispose of at this great sale will have an opportunity by sending to me for blanks and terms of sale. This will be one of the best sales to be held, and as it will take place after the State Fair closes and before the Breeders meeting at Pleasanton begins, owners should not hesitate to list their horses.

The fine location, splendid box stalls, and myriads of electric lights and magnificent pavilion with its 1000 chairs where all visitors can see these horses offers advantages not approached by any other sales place west of Chicago. Sale will take place

MONDAY EVENING, SEPT. 14, 1903.

Commencing promptly at 8 o'clock at the famous OCCIDENTAL HORSE EXCHANGE,
246 Third St., near Folsom, San Francisco
Horses at salesyard Sept. 14th.

Visit to the English Cattle Show.

The exhibition of the Royal Agricultural Society is an affair approaching national importance. It is usually attended by hundreds of thousands of visitors, including sometimes, members of the royal family.

Location is near, about six miles out of London, on a well-arranged area of 116 acres. Exhibitions are held earlier in the season than in the United States, the dates including the last week of June. This year the total entries of livestock exceeded 2160. Of 944 cattle the Jerseys made a good show, with 185 entries for the seven classes. Shorthorns numbered 131, an average of nineteen per class. The remaining entries of cattle, numbering 682, were included in seventy-six classes. In the sheep classes the Southdowns, Hampshire Downs and Shropshires were well represented, whilst the Romney Marsh breeders sent in no less than fifty-one entries. The pigs were above the average in numbers, there being 212 entered in twenty-four classes. The total value of prizes offered for livestock, including champion prizes and medals provided by various breed societies, was nearly \$40,000 of which horses are not a very prominent feature. There were collections showing the results of various agricultural experiments.

From the Royal Veterinary College were exhibited sets of English, German and French horse-shoes and preserved specimens illustrating the effect of various animal diseases, etc.

This year the society adopted the Smithfield plan of only having one judge in the livestock sections instead of two. The rings were lined with spectators from an early hour, a party of French agriculturists being noticed amongst the crowd. Among the American visitors was Joseph E. Wing, a well known Illinois agriculturist, whose impressions of British shows, as given in a letter to the *Breeders' Gazette*, as follows, give a vivid idea of the differences compared with the great American fairs.

HOW IT IMPRESSED AN AMERICAN.

What is my impression of the show? I like it. It is clean. There is not a hawling fakir there nor a single "side show." The exhibits alone are the show, and they are interesting enough so that nothing else is needed. Besides the stock there is a wonderful array of exhibits—machinery, stock foods, greenhouses and rustic summer houses. These latter are beauties, and we could so easily make them. They are portable, and serve for small "afternoon teas" on the lawn. And then there are exhibits of nature study work for the schools.

The prettiest thing I have seen is the hutter exhibit. Imagine a snowy tent with long benches therein, and these benches covered thick with fresh-springing, delicately green grass, the hutter in small bricks setting on white tiles down amid the grass. This grass is from fresh sown seed, perhaps gotten started a fortnight ago. It is very sweet and clean-looking and beautiful.

The feature of issuing a complete and correct catalogue and putting up plain numbers conspicuously over each animal is worthy of all praise. Even the machinery exhibits are so catalogued. And machinery exhibits have generally the price of the article in the catalogue. With such a source of information at hand the show is of many times the value to the people that it would be without. Nearly every one carries his catalogue and studies it. We should imitate this. There is no valid reason why we should not get entries made in time to permit catalogue being made up, and once made it would be a source of profit to exhibitors and exhibition alike.

I think every American is impressed with the idea of arranging cattle according to classes. It adds immensely to the value and interest of the show. Objection has been made in America that the animals would be restless, try to fight and all that. I see no trouble at all from that cause here. The daily parades of animals

are most interesting. We could easily adopt that plan, too. The fact is we have not learned to make of our fairs real shows. Exhibitors feel that they are for the purpose of winning prizes. They do not realize their duty toward the association in the way of making their exhibit attract paying visitors. Thus we must fall back on horse racing and demoralizing tent shows to attract paying crowds. We will change all that in time. Not that the horse part need be dropped. They find that useful here; it is mostly in exhibitions of hunters and hurdle-jumping contests, a fine sight in its way.

The show of sheep is more interesting than with us, from the fact that all the animals are bred on the owners' farms. There is not much having of show stuff to make the rounds. They have been honestly shorn, and while in short fleece now that only makes them more attractive as mutton sheep. The shepherds feed trifolium (which is our crimson clover), vetches, mangels, oilcake, wheat bran and crushed beans and peas. They feed liberally, heavily would not be too strong a term. I believe animals and men require more food here, at least can endure more.

Following is the text of a dispatch sent out from Washington, D. C.: "There is a probability that the Government may take drastic measures to prevent the introduction of foot and mouth disease into this country. Consuls stationed in countries where the disease has been known to exist were cautioned to personally attend to the disinfection of hides and wool before they were exported to America, but according to Secretary of Agriculture Wilson, the effort has been anything but successful. He declares that the Government will sooner or later be compelled to require this disinfection at ports of entry in this country or else prohibit trade altogether. Argentine and a number of countries in Europe are referred to particularly. 'The danger of outbreak in the United States from the importation of hides and wool,' said the Secretary, 'is imminent in the future. The recent epidemic in the New England States cost the Government \$125,000. This is serious from a money standpoint, but if one of the outbreaks should occur in the West

or Southwest it would require much more money to eradicate it.'"

SITUATION WANTED.

COACHMAN OR GROOM—By a thoroughly competent, experienced man. Best of recommendations as to ability, sobriety and honesty. Country or city. Has been with some of the best families in Ireland. Address JOHN CONNELLY, care of Mrs. Edw. Ford, 114 Eugenia St., city.

Vita Oil
Used Between the Heats

CONSOLATION CLASSES.

TROTTERS. A PURSE OF \$400 will be given for Trotters eligible to the 2:17 Class who have started at this meeting and not won first or second money. Horses to be named overnight. Entrance fee 5 per cent; nothing from winners. Money divided 70%, 20%, 10%. Race to take place October 29.

PACERS. A PURSE OF \$400 will be given for Pacers eligible to the 2:15 Class who have started at this meeting and not won first or second money. Horses to be named overnight. Entrance fee 5 per cent; nothing from winners. Money divided 70%, 20%, 10%. Race to take place October 30.

Nominators have the privilege of naming two horses from the same stable or owned by the same person on one entrance fee.

Nominators in any race that should fail to fill may on September 8th transfer their entry to any other class that filled in which their horse is eligible. Entrance 5 per cent, of which 2½ per cent must accompany the entry and 2½ per cent to be paid on the opening day of the meeting.

MAKE YOUR ENTRY ON TIME

And be sure that it is postmarked not later than September 1, 1903.

CONSIDER THIS!

You can enter the same horse in three or more classes and have plenty of time between races. The length of the meeting permits of the program being arranged so that every horse in attendance can be started in several races.

Added Money Stakes for Running Horses will be published in this paper at an early date.

CONDITIONS.

Entries to close Tuesday, September 1, 1903.
 Entries not declared out at 4 o'clock P. M. on the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.
 Stakes will be divided into four moneys: 50, 25, 15 and 10 per cent.
 Entrance fee five per cent of Stake. 2½ per cent of Stake in cash draft or check MUST accompany Entry, balance due and must be paid the first day of the meeting. 5 per cent of the amount of the Stake additional from money winners.
 If there are less than four starters they may contest for the entrance money paid in, to be divided 50, 30 and 20 per cent.
 The Management reserves the right to declare two starters a walk over. When only two start they may contest for the entrance money paid in, to be divided 66⅔ per cent to the first and 33⅓ per cent to the second.
 A horse distancing the field shall only be entitled to first and fourth moneys; but in no other case will a horse be entitled to more than one money.
 All harness races, unless otherwise specified, mile heats, three in five.
 Distance in all heats shall be 80 yards, but if the field is more than eight 100 yards.
 Hopples barred in trotting races, but will be permitted in pacing races.

The Association reserves the right to start any heat after the fourth score, regardless of the position of the horses.
 All Stakes not filling satisfactorily to the Board of Directors may be declared off.
 Racing colors should be claimed with entries, must be named by 5 P. M. on the day preceding the race, and must be worn on the track in all races. Colors will be registered in the order in which they are received, and if not named, or when colors conflict, drivers will be required to wear colors selected by the Secretary.
 The management reserves the right to change the hour or date of any race, and the right is reserved to declare off or postpone any or all races on account of the weather or other sufficient cause. Conditional entries will be treated the same as regular entries, and nominators held under the rules.
 Any race that may be started and unfinished on last day of the meeting may be declared ended and money divided according to the rank of horses in the summary.
 Otherwise than as herein specified in these conditions, Rules of the National Trotting Association (of which this Association is a member), except Rule 4, to govern.
 Send all communications to

J. W. BROOKS, President.

Oregon Derby A handicap for Three-year-olds and upwards; \$30 to nominate and \$30 additional to start. Entries close Tuesday, August 25th; weights announced Wednesday, September 16th, at 10 a. m.; declarations due at 2 p. m. 1 1-4 miles. \$1000

Conditions. Entrance fee 5 per cent of purse and 5 per cent additional from money winners. Money divided 50, 25, 15 and 10 per cent of purse. Two or more horses may be entered from the same stable and held only for one entry fee. In case where two or more horses have been named as one entry, and any horses have been separated from the stable from which they were originally entered, and such separation made according to rule, they shall be eligible to start in the race upon the payment of the regular entry fee. A horse entering a class that does not fill may be transferred to any other class eligible by notifying the Secretary on or before September 5th. A horse not winning a heat in three shall not start in the fourth heat, except in a field of eight or more starters; then he must win a heat in four or go to the barn. Horses so ruled out shall have a right to a share of the purse according to their rank at the close of the last heat. The board reserves the right to declare off and return first payment in any purse that does not fill satisfactorily. Right reserved to declare two starters a walk-over. When only two start they may contest for the entrance money paid in, to be divided 70 per cent to the first and 30 per cent to second horse. A horse distancing the field shall be entitled to first and fourth moneys only, and in no other case shall a horse be entitled to more than one money. Other than specified, rules of the National Trotting Association, of which this Association is a member, to govern, except hobbles not harred on pacers.

Running Races. Two Running Races will be given each day, with entries to close at 6 p. m. day preceding race.

1145-1147 MARKET ST. SAN FRANCISCO

QUINN'S OINTMENT FOR HORSES

stands at the head of all veterinary remedies. Such troubles as Spavins, Curbs, Windpuffs, Splints, Bunches have no terrors for a horse if the master keeps and applies Quinn's Ointment. All well known horsemen speak of it in the highest terms:

Miller & Sibley of Franklin, Pa., owners of St. Bel, brother of late Bel Boy, write, "We have used Quinn's Ointment with great success and believe it claims for it. We cheerfully recommend it to our friends." For Curbs, Splints, Spavins or Bunches there is no equal.

Price \$1.00 per package. Sold by all druggists, or sent by mail. W. B. EDDY & CO., WHITEHALL, N. Y.

CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL. For BARBED WIRE CUTS, CALKS, SCRATCHES, SORES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY. It is a quick and sure cure for those troublesome skin cracks under the feet which injure and often lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

THE FIRST AND ONLY TWO-MINUTE TROTTER
LOU DILLON

Chestnut Mare by Sidney Dillon, dam Lou Milton by Milton Medlum. Bred at Santa Rosa Stock Farm, Santa Rosa, Cal.
Owned by C. K. G. Billings Trained and Driven by Millard F. Sanders

RECORD 2:00 Made at Readville Track, Mass., Monday, August 24, 1903. Time by Quarters: 0:30 1-4—0:30 1-2—0:30 1-4—0:29.

"SAVE-THE-HORSE"

— TRADE MARK —

SPAVIN CURE.

PURCHASERS ACKNOWLEDGMENT.

Having this day purchased from M^r. R. B. Champion of Troy, N. Y., a bottle of "SAVE-THE-HORSE" with said Company's written guarantee to refund to me the sum of Five Dollars, the price paid by me for said bottle, in case no cure results after using the contents of said bottle on a case of what is or appears to be Hip Joint Lameness on my horse My horse. Now as evidence of good faith on my part, and in conformity with the spirit in which said guarantee is given, I agree to apply the same faithfully and systematically as directed until the contents of one bottle has been used on said case, and in the event of a cure of said disease or injury not then being effected, I will promptly notify said Company, and furnish to it satisfactory evidence of such failure, after such use; when it will be my right to demand and receive back the purchase price of \$5.00 as agreed.

R. B. Champion
City, State and County of purchase as record of sale, and name of the person to whom sold.

P. O. Box No. 128.

LYME, CONN. November 19th 1902

The Troy Chemical Co.
Troy, New York.

My dear Sirs:

I would be pleased when from your relative to the below condition. I had a horse that went lame last summer apparently in the hip joint - formerly called "White Bone", turned him out for two months and used a stimulating liniment, but he got no better. About two months since I commenced using "Save the Horse", even if your guarantee did not cover the cost and have used very nearly two bottles. The horse is not sound yet but has improved ever since I commenced its use and I think continued applications of it would in time cure him. It is much better than at first and I think improving all the time, but the cost will prevent my continuing it much longer and I must say I am sorry I shall have to give it up on that account. I know it is one of the most difficult kinds of lameness to cure and in an experience of over 33 years with horses, I have never known a case permanently cured, and hate to give this up as it looks so promising. I of course cannot claim anything from you as your guarantee does not specify the trouble, but thought I would write and see if you the sale of the "experiment" you would help me out. I have advised what to try "Save the Horse" for Spavin, but cannot report results as yet enough time has elapsed to judge. I shall keep watch of the case and report to you if favorable results are accomplished. I shall be glad to hear from you certainly can give a good word for "Save the Horse" from what I've seen so far.

Very truly yours
R. S. Griswold

The Troy Chemical Co.
Troy, N. Y.

Sir:

Received your letter of the 19th inst. and gladly accept your offer of sending me 3 bottles for the same. I am much pleased at being able to continue the treatment and hope by the time the remedies are used that the horse will be practically over his lameness. If it is, it will be the first case that I have known cured, and will show that "Save the Horse" is even more than you claim it to be. I will report when the remedy is used.

R. S. Please send by Adams Express

Very truly yours
R. S. Griswold

BOXWOOD.

LYME, CONN. July 15th 1903

The Troy Chemical Company,
Troy, New York,

My dear Sirs:-

Noting your remarks in your letter of the 15th inst. I can only say that the horse is so nearly cured that I consider him practically as sound as he has been for years. He sometimes shows a very little lameness for a few steps when starting from the barn or after he has been standing, but it passes away before he has gone any distance. I am now nearly through the fourth bottle (have one more to use) and feel sure he will get over even the slight trouble before the fifth is used. "Save the Horse" is indeed a wonderful remedy, and has in this case done what I did not think anything would do. The horse has no other trouble but the lameness in the hip and no one would notice that, unless they were told it had been there. If there are any other question you would like to ask I shall be glad to reply to them.

Very truly yours

R. S. Griswold

No other treatment of any account was used on the horse as far as I was heard of would cure the trouble, and I purchased "Save the Horse" as an experiment, not having much faith in it or anything else doing much good. I must say I have been surprised at the results, not only in my case, but in other cases that I've seen, and it certainly saved me the expense of buying another horse.

R. S. Griswold

It isn't words, it isn't type or page advertisements, it is the truths that ring out sound and clear and impressive—actual results like this case from business men, whose standing and reliability can be readily ascertained, which have made "SAVE-THE-HORSE" such a success. Their cured horses are living advertisements, absolute certainties as to the possibility of the remedy for your own case, and with every bottle is a guarantee document as binding to protect you as the best legal talent can make it.

"SAVE-THE-HORSE" Cures Without Scar, Blemish or Loss of Hair.

Can be applied at any time, anywhere, any place, and in all extremes of weather. Horses may be worked as usual with shin or ankle boots, as no harm can result from destruction of hair or scalding of limb.

POSITIVELY AND PERMANENTLY CURES

Bone and Bog Spavin, Thoroughpin, Ringbone (except low ringbone), Curb, Splint, Capped Hock, Windpuff, Shoe Boil, Weak and Sprained Tendons and all lameness.

\$5.00 PER BOTTLE.

Written guarantee with every bottle given under our seal and signature, constructed solely to satisfy and protect you fully. Need of second bottle is almost improbable, except in rarest cases. Copy of booklet and guarantee sent upon application.

\$5.00, all druggists and dealers, or sent express prepaid.

San Francisco, Saturday, August 29, 1903.

LOU DILLON 2:00.—A California five year old mare, bred by the late Henry Pierce at the Santa Rosa Stock Farm, Santa Rosa, Sonoma County, California, is the holder of this record that has been the dream of trotting horse breeders for years. She is by Sidney Dillon, sire of Dolly Dillon 2:07, a son of Sidney, and out of Lou Milton, dam of three others in the list, by Milton Medium, son of Happy Medium. Lou Dillon is strictly a California production. She is far and away the greatest trotter the world has ever seen, or is likely to see for some time. It is a pity that Mr. Henry Pierce could not have lived to see the first two minute mile trotted by a mare of his own breeding. No breeder of the light harness horse would have taken more genuine satisfaction and pleasure out of the performance than he, and he would have considered the great feat as full payment with a big rate of interest added, for all the time, study and money that he had expended on the breeding of the light harness horse. No money would have tempted him to part with her, and his aim would have been to lower her record with a son or daughter of the champion mare. But man proposes and God disposes, and though Henry Pierce has crossed the great divide, Lou Dillon has given him the honor of being the breeder of the first two minute trotter, a wreath of laurel for his tomb that, could he look down upon it, would be prized by him as much as any tribute that could be placed there.

THE STATE FAIR will open on Monday next. There will be good racing and large exhibits in every department. The Occident Stake will be trotted on the opening day. The total value of the stakes paid in and added money is now \$3920, of which \$2512 is to go to the winner, \$1056 to second and \$525 to third. The following have been declared eligible to trot in this event: Alex Brown, b c La Correcta by Arthur B.; T. C. Cabney, br c Grecko by McKinney; Ben Davis, blk f Dixie S. by Zolock; G. W. Kingsbury, b c D. E. Knight by Lynmont; La Siesta Ranch, b c Search Me by Searchlight; P. W. Hodges, b c Owynex by Steinway; B. Chaboya, b f Tuna by James Madison; J. Smith, blk c Duplicate by McKinney; L. H. Todhunter, hr o The Jester by Zombro; Valencia Stock Farm, blk c Amado by Direct Heir; J. A. Richardson, b c Swift B. by Stam B.; J. de La Montanya, ch c Bromwell by Sidney Dillon.

LOS ANGELES ENTRIES will close on Tuesday next, September 1st, and every Californian who has a trotter or pacer in training to race should have one or more entries in the events advertised in this issue. The Los Angeles meeting will be one of the best on the circuit and no pains are to be spared to make everything pleasant and agreeable for the horsemen who attend the meeting which comes off in October. There has been but little opportunity for harness racing in California this year and the Los Angeles Association deserves great credit for announcing such a liberal program. It offers the best opportunity from this on to win purses of good value, and a liberal entry list will make the racing good at this the last meeting of the year. Don't let the date slip your mind but fill out your blanks and get them mailed on Tuesday.

PLEASANTON entries failed to fill and a new program has been arranged and purses are reopened to close Tuesday next, September 1st. As all records made at Vallejo and Petaluma as well as those made on the first two days of the State Fair will bar the horses making them from competing in classes slower than their records, there will be a good chance for the horses that have not won heats prior to the date of closing to get some of the money at Pleasanton. See the advertisement in this issue.

THE DISPERSAL SALES which the Meek Estate of Haywards and the Gabilan Stock Farm of Salinas have ordered for September 29th, in this city at the popular salesyard of Fred H. Chase & Co., are attracting a great deal of attention. At no sale held in this city for years has there been a collection of sound, standard bred horses that contained so many that were thoroughly broken single and double and fit for anyone to drive. There are at least half of the fifty or sixty head consigned that are fit for a lady to drive and they will be sold entirely on their merits and pedigree. They are not old horses either but young and in their prime in nearly every instance. Their breeding and looks cannot be surpassed by the horses from any farms in California, and they will be sold to be just as represented. It will be the best opportunity of the year to get something choice and valuable at the buyers' own prices. Catalogues will be out next week and particular mention and description given of the horses in our next issue.

WILLIAM MURRAY, owner of the stallion Diablo 2:09½, and for many years past a prominent horseman of California, died at Salem, on Friday, August 21st, of typhoid fever. Mr. Murray was a native of Canada and aged about fifty years. Few men were better known or had more friends among the horsemen of this Coast than genial "Bill" Murray. For several years he was connected with the Oakwood Park Stock Farm and while there purchased Diablo as a colt, trained and drove him to his record and owned him at the time of his death. Mr. Murray resided at Pleasanton for several years, but three years ago moved to Woodland, Yolo county, where Diablo had an extensive patronage. Mr. Murray was a born horseman and few men ever lived who could command obedience from horses with as quiet demeanor or more kindness than he, and yet he held complete mastery over them. Bill Murray was a genial, whole souled, honest man. May the turf rest lightly over him.

AT HIS FIRST ATTEMPT to lower his record this year the California bred stallion John A. McKerron by Nutwood Wilkes has knocked a half second off his former record and now has a mark of 2:04½ and is the second fastest trotting stallion in the world. That he will still further reduce this record is as certain as he keeps in condition and meets with no accidents, and he will likely equal the record of 2:02½ held by Cresceus. Should he lower it a little California will have the honor of producing the fastest trotting stallion in the world as well as the fastest trotting mare. Here's good luck to him and hoping he may do it.

CRESCEUS must be reckoned with. He is no beaten by a good deal. In his first start this year at the Dayton, Ohio, half mile track, he lowered the former world's record of 2:09½ held by himself, to 2:03½. This is a great performance for his first time out this year, and stamps him as all right and in line to tackle the 2:00 mark of Lou Dillon, which he will doubtless be trained to equal or reduce if possible.

Wm. G. Layng's Coming Sale.

On Monday evening, September 14th, this well known auctioneer will sell about fifty head of finely bred trotters and pacers at the Occidental Horse Exchange, 246 Third street. In the consignments are more sons and daughters of McKinney 2:11½ and Diablo 2:09½ than have ever been collected at a place before. Besides these are perfectly broken, not afraid of cars or automobiles. All of them can show quarters in from 33 to 38 seconds. These are all stylish, handsome and sound. One of them, Don Fulano by McKinney 2:11½, is, without doubt, the finest and most promising green McKinney trotter in this city. Then there are sons and daughters of Hart Boswell, Advertiser 2:15½, Chas. Derby 2:20, Montesol son of McKinney 2:11½, Direct 2:05½, Falrose 2:19½, Bayswater Wilkes, Antevolo 2:19½, Cubit, El Benton, Brigadier 2:21½, mares with foals by their sides, and no finer individuals were ever offered or will be this year at public auction. There are three four and five year olds that have everything in their favor. Many are from the Rockbridge Stock Farm, which was recently sold to the Realty Syndicate; some are from Woodland, some from San Jose and others from San Francisco. These horses have been kept for some time in readiness for the sale because Mr. Layng was so busy attending to the closing out sales of the late Henry Pierce's horses, he could not attend to it. Besides these there will be sold some buggies, harness, saddles, etc., belonging to the estate of T. Hunsaker. Catalogues will be issued next Wednesday.

Abbie Strathmore by Strathmore now has a record of 2:07½.

Lou Dillon Not Brutally Scourged.

The wonderful flight of speed exhibited by C. K. G. Billings great trotting mare, Lou Dillon, Monday afternoon at Brighton, was something to remember for a lifetime. She did more than was expected of her, considering that the track was not exactly to her liking, and trotted the fastest half ever seen on any track. She was urged a little going to the wire; but that she was brutally whipped by her driver, as was stated in two morning papers, was a monstrous stretch of some one's imagination—the work of the small-minded kicker that can see evil in everything. Millard Sanders, who drove and trained the mare, said he was somewhat used to the work of kickers and knockers, and did not mind straight and fair criticism; but that the story of his brutal use of the whip went far beyond the pale of criticism and was scarcely worthy of notice. "I swished the whip over the mare's back and struck the shafts with it. She would have been pretty well striped if I had plied the whip according to a couple of reports, but there was not a mark on her.

"I might be open to criticism for going to the half so fast. In fact, I went there much faster than I wanted to; but it could not be helped. Mr. Tanner driving the runner, came too close and fast behind for which he can not be blamed, and the mare pulled me so that I had to let her go. He could not have been aware of the fact and drove the runner just as he thought was right. I am satisfied that the mare's pulling, however, took more out of her than her rate of speed did."

That explains what so many horsemen could not understand. "Sanders was criticised for going to the half too fast," said a popular road driver. "We find it quite easy to find fault sitting back here and looking on; but I think we would have more right to criticise if we would wait until we have developed as much speed as Sanders has. He has shown by his work that he knows what he is about. When we do his half as well we can talk."—"Marque" in *Horse Review*.

No Longer Necessary.

If one takes into consideration the time that is being made over the trotting tracks of the present season, it would seem that there is no reason for the making up of a 2:30 list any more. At one of the big meetings held some time ago one of the prominent drivers on the Grand Circuit thus expressed himself: "Unless a man has a trotter that could step in 2:10, or a pacer capable of 2:05, he had better stay at home." No one will agree with this statement because he has placed the speed rate too low for the harness horse to be raced profitably, but, as one writer puts it, "not so much too low as might at first appear." No one at the present time regards a 2:30 trotter, or a 2:25 pacer, in any sense of the term, as a fast horse, and if that is the extent of an animal's speed he is worth absolutely nothing as a racing machine, nor of no more value than a three minute horse would have been a decade or two ago. Every year brings its changes and probably in the speed of harness horses it is more marked than in any other field. Years back when the 2:30 table was first adopted as the standard it was of much value, but that day has long passed, and a compilation of such records not only brings extra work to the compiler, occupies much space in the Year Books, but it really is of no interest to any one. It is merely a lot of deadwood encumbering the published volumes. The proper authorities could well give this matter a little consideration.—*Spirit of the West*.

Has a Great Future.

In the opinion of Harry K. Devereux, Harry McKerron, the two year old son of John A. McKerron, the colt who surprised everyone at Glenville a few days ago by trotting a half mile in 1:09½, will be a 2:10 trotter as a three year old. "I do not believe I ever saw a better trotter at his age," said Mr. Devereux, a few days ago. "He has all the characteristics of John A., and will, in my opinion, be a worthy son of a worthy sire. The youngster is owned by Fred F. Camp of Homer, O., and nothing could tempt Mr. Camp to part with the great colt. Mr. Camp is a wealthy farmer and Harry McKerron is his pet. He became his owner rather accidentally. His brother owned the mare Henrietta G. 2:19, by Elyria, and brought her to Cleveland to be bred to McKerron when the latter had not achieved the fame he has at the present time. She was the first mare to be bred to the Boston cup winner and Harry McKerron was the result. Deciding to go out of the breeding business, Mr. Camp sold both mare and colt to his brother, who says that he expects to see the day when Harry will trot to a faster mark than his sire ever did. On the day the colt trotted his half in 1:09½ Mr. Camp was present with a large number of his neighbors, whom he brought up from Homer to see the youngster perform."

JOTTINGS.

THE TWO MINUTE TROTTER has arrived. Her name is Lou Dillon and she is a product of the glorious climate of California, as her sire and dam were before her. She did not come down "through a long line of illustrious ancestors" that had been bred to eventually produce the two minute trotter, nor is she the result of any theory or plan by which such an animal was to be produced. Like Topsy she "just grewed," although she has the advantage over that creature of having her parentage known. It was at famous Readville Park near Boston that she performed the wonderful feat of covering 5230 yards in 120 seconds of time, and the date was Monday, August 24th. She was driven by Millard Sanders who has had her in charge since December 1901, and to his masterly skill in preparing and educating the dainty, willful little Miss, is much of the credit of the great performance due. While Lou Dillon has been more than once heralded by some of the more enthusiastic as the two minute trotter there are very few who really believed she would so soon prove it, and anyone who had possessed the temerity to wager money on her trotting a mile in two minutes could have had thousands of dollars covered at odds of ten to one. It is only a few weeks since the anti two minute theorist Dr. Geo. H. Bailey of Portland, Maine, offered to wager that neither Lou Dillon nor any other trotter would accomplish the feat this year or next, and while there were many who were ready to combat the Doctor's theory with pen and tongue, there were none ready to cover his money, or in other words to back their judgment with their coin. In fact, the two minute trotter has arrived a little sooner than was expected by even the most enthusiastic and optimistic of breeders and trainers, but she is here in the flesh and is California bred and horn. So much has been written during the past few months of Lou Dillon, her pedigree and performances, that her mile in two minutes is not surprising to the public even though it was not expected.

Now that the wonderful feat of trotting a mile in two minutes has been accomplished, the manner in which it was done will be studied by those who look for this record to be still further reduced. The time by seconds for each quarter was as follows: First 30 1/2, second 30 1/2, third 30 1/2, fourth 29. The supreme effort was wisely left to the last, and when the last burst of speed was demanded of the little mare, she had "something left" as none of the previous quarters had been trotted at her limit. In a previous trial she had covered the first quarter in 28 3/4 seconds, which is faster than any other trotter has shown. In her two minute mile, consequently, she did not reach the limit of her speed at any time and it was this harboring of resources, as it were, that enabled her to accomplish the mighty task. In his greatest mile, Cresceus went to the first quarter pole in 29 1/2 seconds, was at the half in 0:59 1/4, at the three quarters in 1:30, and was then so tired that it took him just 32 seconds to reach the wire. His mile in 2:02 1/2 was a world beating performance, but had Cresceus gone away a little slower he would now have a record nearer the two minute mark by considerable than the one he now holds. No horse, be he runner or trotter, can speed at his limit for a full mile.

The accomplishment of the theoretical trotting horse breeder enthusiast's dream of a mile in two minutes is the greatest encouragement ever given the practical trainer, breeder and owner, as it is the work of a mare whose breeders never expected her to be a record breaker until she had demonstrated her wonderful speed. For years the family of Sidney, her paternal grandsire, has been called a "soft" family by four-fifths of the horsemen who race. Sidney Dillon was not considered even by his owners, to be a two minute sire, as they bred their best mares, or those they considered the best to other stallions. When Lou Dillon was two years old she was offered for the insignificant sum of \$150 with no takers, and only when Geo. Ramage began working her, was it finally ascertained that her speed was marvelous. She was then given to Millard Sanders to handle when a three year old and now she is the first and only two minute trotter. Her sire Sidney Dillon could neither pace nor trot (and he had both gaits) fast enough to be looked upon as a profitable horse to race and he was bred to Lou Milton because he was the only stallion on the place when the time came to breed her. Lou Milton was a good looking, highly nervous mare, that was of no account as a race mare. Mart Rollins of Santa Rosa talked with Thos. Bonner, then Superintendent of the Santa Rosa Stock Farm about her, and Mr. Bonner advised Mr. Pierce

to buy her at the price asked—\$1000. Mr. Pierce instructed Mr. Bonner to offer \$800 for her, which he did and got her. After Lou Dillon was foaled, Lou Milton was bred to Beau B. because Beau B's sucklings were a better looking lot that year than were the Sidney Dillons. Thus I hold that the breeding of Lou Dillon was more accident than anything else and here is where the encouragement to the trainers and owners comes in. There is much in breeding as blood will tell, but it takes training to ascertain whether horses are trotters or not. Would the best expert on harness horse breeding that ever lived have predicted that a horse by the unregistered horse St. Clair out of a mare by Cleveland another unregistered horse, would win some of the best races on the Grand Circuit this year, get a mark of 2:07 1/4 and sell for \$15,000? As the boys say, "Not on your life." And yet that is the history of Billy Buck 2:07 1/4. He is well bred—all good horses are, but he was unknown until he was trained. Lou Dillon was born great, but without the primary training she got from George Ramage, and the finishing course she received in Millard Sanders speed school, she would not now be the two minute trotter, holder of the world's record, and very acme of the harness horse breeders' aim and desire. There are hundreds of horses with 2:10 in their reach that will never get a standard record just as true as there are "flowers born to blush unseen, and waste their sweetness on the desert air."

So I claim that training is the thing that is most necessary in the production of race horses. There is now no excuse for the existence of a poorly bred harness horse. Every State that makes any pretensions to the breeding of the American trotter or pacer has stallions and mares within its borders that are able to produce other two minute horses. But the world will not know it unless the colts and fillies are trained. It takes a great war to produce great generals, and Alexander, Napoleon, Wellington, Grant and Lee would now be unknown names in military history, were it not that actual warfare furnished the opportunities for them to become great.

A combination of circumstances has made Lou Dillon. First she had the blood in her veins, then the California climate and soil helped her to grow strong and muscular, and then she fell into the hands of men who knew how to develop all her faculties and conserve all her powers. They conditioned and fitted her and then she was given the opportunity to show what she could do. She stands to-day without a peer and, perhaps, the most highly valued piece of horseflesh in the world.

And right here I want to say, and it will give every Californian pleasure to know, that the story wired here last week of the little mare's abuse by her driver at Brighton Beach is indignantly denied by all horsemen who were present on that occasion. Owing to the condition of the track it was announced from the stand that Lou Dillon would not be sent to beat her record but would show a fast mile. She went away so fast that Sanders had to pull her very hard to keep her back, and it was this pull and her great speed that took so much out of her that she could not finish the last quarter at her speed. Sanders simply cracked the whip on the shafts of the bike and there was not a mark on her delicate hide when she was unhitched. Several of the New York papers denounced the foolish attack that was made on Mr. Sanders, and we will say for his California friends that none of them believed it in the first place.

Bonner Memorial Went to Hawthorne.

NEW YORK, August 21.—The mare Hawthorne, driven by Scott Hudson, won the \$20,000 Bonner Memorial at Brighton Beach to-day. The largest crowd of the trotting season cheered itself hoarse when the young man from Kentucky carried his charge home ahead of all others in the rich stake.

Enthusiasts had gone to Brighton confident all was over save the shouting, that Billy Buck, the favorite, was as good as bracketed, and that to Ed Geers belonged the victor's wreath. So thought the public generally. The amount wagered on this race, first to last, ranks with the largest ever bet on a single contest in the history of harness racing, and probably one-fourth of the whole sum was the money of Smathers, who paid \$15,000 for Billy Buck a few days previous to the race. Just how much he wagered is a matter of conjecture, but one commissioner alone placed \$10,000 for him on Thursday, aside from the large sum the owner is credited with betting in person on that day. To day he wagered a large additional sum. A conservative estimate of the amount he put into the pool-sellers' box would be \$25,000. Of course it was lost, for there was never a chance to hedge a dollar.

Billy Buck sold for \$1000 to \$700 for the field. The

favorite won the first heat by half a length from Jim Ferry, with Swift a close third, but in the second he was beaten in a close and exciting finish by a rank outsider, Hawthorne, with Tiverton second. In the third heat at the first turn, Swift stumbled and swerved into Hawthorne, and both went down, the horses being soon caught. In the meantime, Kinney Lou had got the lead, and won the heat by a narrow margin, amidst a volley of cheers for the driver, Budd Dohle.

For the fourth heat, Kinney Lou led to the top of the home stretch, with Billy Buck and Hawthorne close up, but here Hawthorne came up with a splendid burst of speed and won easily by a length. The next heat was close from start to finish, Hawthorne winning by two lengths, with the other two tired out. She sold for \$190 in a \$2000 pool.

The opening event of the day, the 2:03 pace, was won by Dariel. Dan R. was made favorite at \$100; Harold H., \$80; Dariel, \$50. Al Bock merely joggled two heats to win the 2:24 class pace. The 2:09 class trot went to Maxine in three heats.

The John H. Shulta \$5000 stake for 2:25 class four year old trotters, was won by the California gelding, Judge Green, in straight heats. Wainscott, the \$10,000 young trotter, that J. Y. Gatscomb bought to win the M. and M. stake at Detroit, got second money.

Dillon Boy won the 2:16 class trot in three driving finishes. The meeting closes tomorrow with a good programme. Major Delmar will be sent to beat the world's trotting-race record. Summaries:

Pacing, 2:03 class, purse \$1000.
Dariel, b m, by Alcantara.....(A. P. McDonald) 2 1 1
Harold H. 1-2-2, Dan R. dr.

Time—2:04 1/2, 2:12, 2:09.
Trotting, 2:12 class, the Bonner Memorial \$20,000, 3 in 5
Hawthorne, r m, by Jay Bird.....(Hudson) 10 1 12 1 1
Billy Buck 1-3-8-2-2, Kinney Lou 6-6-1-3-3, Tiverton 7-2-2, Jim Ferry 2-8-6, Frances B. 5-7-5, Promise 9-4-3, El Milagro 8-12-7, Geo. Muscovite 12-5-4, Judge Cullen 4-13-11, John Mc 11-9-10, Authoress 12-11-9, Swift 3-10-dr.

Time—2:08 1/2, 2:08 1/2, 2:09 1/2, 2:09, 2:09 1/2.
Pacing, 2:24 class, purse \$1000.
Al Bock, blk s, by Nedwood.....(Curry) 1 1
Fred H. 4-2, Ethel Mac 2-6, Burnadet 3-3, Virginia 6-4, Blon Girl 5-5.

Time—2:11 1/4, 2:11.
Trotting, 2:09 class, purse \$1000.
Maxine, b m, by Jack Daw.....(Ecker) 1 8 1
Wainworth 8-1-2, Baron de Shay 2-4-4, Walnut Hill 7-2-3, Willone 4-3-5, Dulce Cor 3-10-5, Idolita 6-5-10, Palm Leaf 8-9-7, A. J. D. 9-6-9, The Roman 10-7-8.

Time—2:08 1/2, 2:07 1/2, 2:09 1/2.
Pacing, 2:12 class, purse \$1000.
Strathline, b g by Online.....(Borns) 1 1

Pacing, 2:08 class, 1 1/4 mile dash, purse \$1000.
Nervolo, b b by Colbert.....(Hudson) 1
Albert 2, Lucanda 3, Miss Willamont 4, Brown Heels 5, Herdina 6, Tritby Direct 7, Council Chimes 8, Noemie 9, Suffret 10.

Time—2:38.
NEW YORK, Aug. 22.—The closing day of the Grand Circuit meeting at Brighton Beach was not marked by any sensational performances. Every race save one was won in straight heats, and that would have been hut for an offending horse that spoiled the first start and caused the favorite, Major Delmar, to break and narrowly miss the distance flag.

Joe Pointer 2:05 1/2, who swamped his backers last week at Empire Park, was not made favorite in the 2:05 pace, but Carl Wilkes was selected as the good thing. When it came to the racing, Joe Pointer was at his best form and he won each heat.

Every starter in the 2:13 class trot had friends, and it proved the best betting race of the day. Masetto made short work of the event and won it in fast time and easy fashion.

The 2:17 class pace can scarcely be called a race. Al Bock made his third start for the week and joggled two heats for his share of the money. The others followed as best they could.

In the 2:04 trot Prince of Orange took the first heat, but Major Delmar won the other two heats and the race.

The pacing dash, at half a mile, had only two starters and was easily won by Prince Alert. Summaries:

Pacing, 2:05 class, purse \$1000.
Joe Pointer, b s, by Star Pointer.....(McClary) 1 1
Terrace Queen 2-5, Carl Wilkes 6-2, Winfield Stratton 4-3, Shadow Chimes 3-6, Little Squaw 7-4, Roemer 5-7, Charley Hayt Dis.

Time—2:07, 2:06.
Trotting, 2:13 class, purse \$1000.
Masetto, blk g, by Constantine.....(Dickerson) 1 1
Lill Barr 2-5, Mary D. 5-2, Guy Fortune 8-3, Crescent 4-6, Pog 10-4, Allabrieve 6-8, Anna Held 7-10, Lady Constantine 8-9, Monroe 9-7, Oxford Chimes Dis.

Time—2:10 1/2, 2:10 1/2.
Pacing, 2:17 class, purse \$1000.
Al Bock, blk s, by Nedwood.....(Curry) 1 1 1
Bertha W. 2-2, Direct L. 3-3.

Time—2:13 1/4, 2:11.
Trotting, 2:04 class, purse \$2500.
Major Delmar, b g, by Delmar.....(A. P. McDonald) 4 1 1
Prince of Orange 1-4-2, Rhythmic 3-2-3, Monte Carlo 2-3-4.

Time—2:09 1/2, 2:07 1/2, 2:07 1/2.
Pacing dash, half mile.
Prince Alert, b g, by Crown Prince.....(Demarest) 1
Anaconda 2.

Time—0:59 1/4.

Jackson's Napa Soda does not tangle the feet.

Notes and News.

Lou Dillon.

She's the two minute trotter.

Aud is California bred.

Ben F. 2:11½ is a high-class race horse.

Lucre 2:13½ is out of the dam of Searchlight 2:03½.

John R. Gentry 2:00½ has a new 2:15 performer in Dart 2:13½.

Little Squaw 2:04 now holds the world's record for pacing mares.

It is proposed to hold a four days race meeting at Hollister this fall.

Mush was 15 to 1 in the hooks when he won at Empire City Park.

Judge Greene 2:10½ by Directum is the best four year old trotter of the year so far.

The Denver show and trotting mare Viometta 2:14½ has been turned over to Millard Sanders to train.

During the Empire City Track meeting 40,000 people paid for admission at the gate \$1 each.

\$100,000 is to be offered for forty-two races at the Kentucky Trotting Horse Breeders meeting this year.

Arion and Nancy Hanks, sire and dam of the three-year-old colt Lord Roberts, cost J. Malcolm Forbes \$166,000.

Beauseant's record is now 2:06½. The son of Bow Bells is wonderfully fast, but about as erratic as they make them.

Noilo 2:15 by Welcome 2:10½ looks like a coming 2:10 trotter. He is good looking, good gaited and a stayer from Stayville.

Jonesa Basler carried a wire screen at Petaluma to prevent the dirt from hitting his nose, but it seemed to retard his speed.

Major Delmar's mark of 2:04 made at Empire track was made so cleverly that it is thought the gelding record is within his reach.

David Lamar of New York has sold his Speedway horses, including Nathan Straus 2:05½ and others, and has retired from the game.

Irene W. 2:14½ is a new 2:15 performer for Waldstein. She made this record in the fifth heat of the 2:25 pace at Pekin, Illinois, last month.

The report that E. E. Smathers had purchased the noted trotter Swift from J. F. Cockerill of New York is denied. Swift is still owned by Cockerill.

Oh, "lovely" Lou, Lou Dillon, how could you be so mean. To waken Dr. Bailey from his "two-minute" dream And smash all his derisions as well as records, too, By trotting in two minutes, Lou Dillon, "lovely" Lou!

The Occident Stake will be decided on Monday next, opening day of the State Fair. It is worth \$3800 and Swift B., a son of Stam B. will probably be the favorite.

Ed. Lafferty, who has been handling several two year olds for Mr. E. J. Molero of Monterey, has turned them out and will not take them up again until along in the winter.

Kinney Lou 2:07½ was bred by the late John L. McCord of Sacramento, and not by Douglas Come as some of the San Francisco daily papers have repeatedly stated.

Vita Oil is in demand by the leading horsemen. Will Durfee sent a telegram to the Vita Oil Company last Wednesday for a half gallon to be sent him by express immediately.

Bertina 2:20½ by Directum out of a mare by Piedmont is winning some good races over the half mile tracks in Ohio and Pennsylvania. She was bred by the Green estate at Dublin, Cal.

Dave McDonald, Pittsburg, Pa., has bought of Homer Sewell, Mansfield, Ohio, the hay trotter Almerion 2:19½ by Clayone 2:12½ for \$4000, and will race him for a wealthy Pittsburg matinee man.

Welcome's get are as game as pebbles. Note Noilo's race at Petaluma last Wednesday. There will be several Welcomes in the Meek Estate sale at Chase & Co's salesyard in this city September 29th.

Little Thorne 2:04½ won the first heat of a race at Beloit, Wisconsin, last week in 2:17½, and was then beaten by Robert Wilkes in 2:18½, 2:16½ and 2:13½. The little fellow should have a year or two's rest.

Deputy 2:15½ won his race easily at Petaluma. He is a big, rangy and rather angular sorrel gelding, and a clean gaited trotter that seemed to consider a mile in his record time an easy task. Charley Whitehead gave him an admirable drive.

In the last heat of the 2:15 pace at Greensburg, Pa., on the 12th inst., the bay mare Miss Carrie Lansing, owned by A. L. Walter of Canal Dover, Ohio, broke her leg. She was sold the week previous for \$4500.

Budd Doble won another \$5000 race with Kinney Lou at Readville on Monday last. Kinney Lou stepped out in 2:11½, 2:08½ and 2:09½, winning in straight heats. The time is the record for the stake—the Blue Hill.

Cozad, owned and driven by Charles E. Clark of Fresno, won the 2:12 trot at Decatur, Illinois, August 19th. The purse was worth \$500 and there were four starters. Gavatta won the first heat in 2:12½, and Cozad took the remaining three in 2:13½, 2:13½ and 2:14.

Robert I. by Hambletonian Wilkes, won the 2:10 pace at Decatur, Illinois, August 18th, in straight heats defeating the favorite, Joe Interest, and a field of nine other fast pacers. Robert I. reduced his record in the second heat to 2:08½. He was driven by Julian.

The handsome mare Rosie Woodburn that W. W. Mendenhall resurrected this year did very well in her first start at Petaluma, where she won second money and was second each heat to Deputy. Rosie Woodburn is just ten years old and will get a mark close to 2:15 this year.

Mush 2:08½ was a very sick horse at Empire track soon after reaching there from Pleasanton. "Marque" of the *Horse Review* quotes Mr. Salisbury as saying recently "I want to put 150 pounds more flesh on Mush's big frame and then I will show you a high class 2:06 pacer."

O. G. Fairchild, of Geyserville, Sonoma county, has leased for three years the stallion by Mack son of McKinney 2:11½ and By By by Nutwood. By the terms of the lease Mr. Fairchild will become owner of a half interest in the horse at the time of the expiration of the lease.

Mr. J. De La Montanya, owner of the good three-year-old Bromwell, by Sidney Dillon, entered in the Occident stake, has purchased a handsome white enameled sulky, of the McMurray make from the Kenney Bicycle Company, to which Bromwell will be hitched next Monday.

Looks now as if The Monk would represent the Billings stable in the race for the Challenge Trophy at Cleveland. The gelding has been showing very fast in his work lately, having trotted a mile in 2:07. Some good judges look upon Chase as The Monk's most formidable competitor.

Four new McMurray sulkies were received by the Kenney Bicycle Co., 531 Valencia street, San Francisco, this week. Two are finished in white enamel and trimmed with gold. The others are enameled a beautiful carmine. Six carts of the same make and that can't be beat were received on the same car. The prices are right.

Ukiah will hold a five days' race meeting in October. There will be purses for trotters, pacers and runners and all classes will be provided for. Ukiah holds one of the best of the smaller county fairs, and has a half mile track that is not only safe but fast and is kept in the pink of condition. A good list of purses will be advertised shortly.

One of the handsomest horses ever seen on a track is the gelding Allendale by Falrose, that Sam Hoy is racing for Mr. E. Dudley of Dixon. Allendale is a little outclassed by such pacers as Ben F., Miss Georgie and Col. C., but he can about 2:16 three times and might show a mile in 2:12. He wears no hobbles and the fewest boots and is a picture in or out of harness.

Samuel Gamble says that if he owned Lou Dillon he would breed her next year to Directum 2:05½, the following year to John A. McKerron 2:05½ and the year after that to Stam B. 2:11½. If the last named should be the sire of a filly from this union, the filly would be bred to Directum. The produce from such matings Mr. Gamble would confidently expect to be a heritage worth leaving to his posterity.

William Harold 2:13½, sire of Janice 2:08½ is a son of Sidney, as is Sidney Dillon sire of the only two minute trotter. Get some of the Sidney blood if you want to breed extreme speed. At the Meek Estate sale in this city September 29th, there will be some highly bred sons and daughters of William Harold offered. There is a full sister to Janice in the consignment, also Fenella, the dam of that great mare.

Before the great race won by Monte Carlo at Empire track he was a big favorite in the pools, which sold as follows: Monte Carlo \$100, Dulce Cor \$50, Walnut Hall \$50, Dan T. \$40, Idolita \$25, Ida Highwood \$25, Wilque \$25, and the field comprising four horses \$25. It is pretty good betting where the backers of the favorite can get \$240 to \$100 for their money. This shows the advantage of the auction pool system.

The eighteen year old stallion Monroe S. 2:20 by Monroe Chief was a starter in the 2:20 pace at Petaluma Wednesday. Of course, he was up against the best pacers on the circuit and did not finish inside the money, but the game old fellow was up close to it. He finished fourth in the second heat and stood to win fourth money but the next heat he was sixth which made him fifth in the summary. Hi Hogohoom gave the old horse a good drive, and thought it not good judgment to start him, but to accommodate the owner, an old friend, agreed to sit behind him in the race.

We have a lot of second-hand hke buggies, runabouts, and top buggies for sale. Also a lot of carts and huggies from the Studebaker fire which are slightly damaged by smoke, all of which are bargains at the prices asked. Call and see them before they are all gone. Also an elegant turn-under surry with rubber tires and canopy top, with pole and shafts, at the Kenney Bicycle Co., 531 Valencia street, S. F. Phone Church 971.

Little Prince Direct 2:07 showed very fine this year in his early work, but while being led by a stable boy at Cleveland, he slipped into a ditch and threw out a curb. McHenry was, of course, very much disappointed, but had the ailing limb fired at once, and for two weeks gave the Little Prince slow work only. He has been stepping him some lately and while a mile in 2:11 is the best he has had, he shows no ill effects from the curb, which is fast disappearing.

At Lexington, Kentucky, August 13th, the four year old filly Angle by Axtell, was driven a public trial in 2:10. This is the fastest mile ever trotted over the Kentucky Breeders' Association track this early in the season, and few 4-year-old fillies have ever beaten it in trotting race history. Angle is owned by J. J. McDonald, Cuthbert, Ga. She is out of Lena Rivers, by Gambonito, 2:19½ son of Gambetta Wilkes. Angle will not be raced this year, but reserved for the M. and M. and other big events of 1904.

One of the features of the opening day of the Breeders meeting at Petaluma was a handsome blue silk badge worn by visitors from Santa Rosa. It was printed in gold letters with the inscription "Lou Dillon, record 2 minutes flat, bred at Santa Rosa Stock Farm, Santa Rosa, Cal." Nearly every Santa Rosan wore one—and among those especially proud of the adornment was Dr. William Finlaw, proprietor of the Rosedale Stock Farm, the home of Washington McKinney, St. Whips and Daly 2:15.

Sweet Marie has been protested nearly every time she has started up north and there must be considerable money tied up with the National Trotting Association on her account. Will Durfee, her trainer and driver, carries with him, however, affidavits of the officers of the Los Angeles Driving Club, in which it is stated that she has no record that bars her from the classes in which she is entered as all her performances at Los Angeles were strictly matinee affairs and in no case were the rules in regard to records and hars violated.

Those who thought that Miss Georgie might have won at Vallejo where she met Ben F. and got second money, had their suspicions removed at Petaluma. Georgie B. was driven for all she was worth at the latter place on Wednesday, but there was no time that Ben F. did not have the speed to go by her. She led to the half in 1:05½ in the third heat, but when Fred Chadbourne gave the gelding his head he sailed by the McKinney mare with ease. Miss Georgie is a good mare, fast and game, but she will have to improve considerable to beat the Bradmoor pacer.

Dan Patch 1:59, the champion pacer, is a brown stallion, 7 years old, bred by Dan A. Messner, Oxford, Ind.; sired by Joe Patchen (p) 2:01½, dam Zelica by Wilkesberry 2:30, grandson of George Wilkes 2:22; grandam Abdallah Belle by Pacing Abdallah, son of Alexander's Abdallah. He is owned by M. W. Savage of Minneapolis, Minn., who bought him from M. E. Sturges of New York for \$60,000 last fall. Dan Patch has never lost a race in the four years he has been on the turf and was defeated in but two heats, the first of which was in his four-year-old form, when he was laid up, and the second when hitched to a new sulky his hock struck the axle-bar and he was pulled up. M. E. McHenry, the Illinois driver, has driven him in all of his great races and trips against the watch.

Just before his retirement from the command of the United States Army, Gen. Nelson A. Miles issued an order forbidding the docking of tails of army horses. "Any alterations in the length or shape of the tails, manes or forelocks of public horses by docking, banging or clipping is hereby prohibited, and only such reasonable trimming and plucking as may be necessary to prevent shagginess of appearance will be permitted." The army regulations forbid the purchase of docked-tailed horses by purchasing agents, but it would appear that some officers, under the influence of fashion or for some other reason, have docked their horses after coming into their hands. Nothing presents a more ragged, unkempt appearance than a cavalcade of horses part with flowing tails and part docked, and it is no wonder that the docking of tails of army horses has been forbidden.

N. W. Hubinger has transferred the trotter Metallus 2:11 from the stable of E. F. Geers to that of John Hussey. The son of Mambrino King cost Mr. Hubinger \$12,000 two years ago, when, to all appearances, he was one of the greatest trotting stallions on the turf, but he has never been able to earn his campaigning expenses since. Last season John Hussey had the horse and after a lot of work he got him to going steady and right, and along in September he could step three heats right around 2:07, and appeared to be in a way to fulfill the brilliant future that had been predicted for him. This spring, however, in Geers' hands he has not been what he was expected to be, and, so far as known, his fastest mile just equaled his record of 2:11. Hussey will endeavor to straighten him out again and get him to earning some money for his owner. If any man can do it he can, for, as shown by the perseverance and patience he displayed in getting the blind pacer, Elastic Pointer, to race kindly, no other trainer exceeds him in the qualities essential to succeed with horses of Metallus' kind.

GOOD RACING AT PETALUMA.

Trotting Horse Breeders Association Holding Successful Meet.

Kenilworth Park, as Mr. Harry Stover has named his splendid property once owned by the Sooma and Marin Agricultural Society at Petaluma, presented a lively scene on Wednesday of this week when the Pacific Coast Trotting Association opened its annual meeting.

The track was rather hard but fast and good time was the rule in every event. In the Judge's stand Director A. H. Cohen presided and acted as starter assisted by Director Robert S. Brown and Dr. McClay of Petaluma, all these gentlemen being thorough horsemen and filling their positions in a dignified and able manner.

President E. P. Heald and Secretary F. W. Kelley looked after the details and saw that everything was in smooth running order, and there were very few hitches and little delay in getting off the program of three races carded for the opening day.

Hurlick & Co. of San Francisco handled the betting which was by means of auction pools on the results and pari mutuels on the heats.

A brass band furnished excellent music and kept the crowd entertained between heats. The day was almost ideal for racing and though quite a breeze came up in the afternoon, which the horses had to face on the back stretch, it was not strong enough to prevent fast time in all the events.

The first race on the program was the 2:30 trot for a guaranteed stake of \$500, in which there were seven starters. Before the race the sorrel gelding Deputy by Derby Ash, owned by Deputy Sheriff Mart Smith of Stockton, Cal., and trained and driven by Charles Whitehead, ruled favorite at about two to one, over the others sold in the field.

The main event of the day was the Pacific Slope stake, \$1500, for 2:20 class pacers. There were twelve starters. In the auctions Ben F. ruled favorite at \$20 against \$5 for Rajah, Miss Georgie \$3, Jonesa Basler \$3, and the field \$3.

At the half mile pole Ben F. was in fifth position and then Chadbourne began his drive. He went around the leaders one after another, catching Miss Georgie half way down the stretch, paced the last quarter in 30 1/2 seconds and landed winner in 2:12 pulled up. It was seen that he outclassed his field and there was not much hetting on the remaining heats.

In the third heat Cecil pursued a little different tactics with Miss Georgie. He took her out in front as soon as he got the word and drove her for all she was worth. She led Ben F. at the quarter about three lengths and set sail for the half at increased speed.

The 2:15 class trot for a purse of \$1000 was the only race of the day that the talent failed to guess. There were but five starters and of these the Silas Skinner gelding Ole was made favorite, but by hunching all the others in the field even money was played against his chances.

cuts with the whip and the son of Welcome seemed to suddenly come to a realization of the fact that he could trot. When they were given the word McDooald began driving and lifting Iloilo from the start, and he soon had Ole tip toeing.

Trotting, 2:30 class, stake \$500. Deputy, s g, by Derby Ash-dam by Priam... (Whitehead) 1 1 1 Rosie Woodhurn, b m, by Easter Wilkes... (Carlin) 2 2 2 Dollexa, b m, by Alexis Chad... (Groom) 5 4 3

Pacing, 2:30 class, Pacific Slope stake \$1500. Ben F., b g, by Bradmoor-dam by Stelaway (Chadbourne) 1 1 1 Miss Georgie, b m, by McKinney... (Cecil) 2 2 2

Ole, b g, by Silas Skinner-dam by Nutwood... (Quinn) 1 1 2 3 3 Louise Croner, g m, by Wild Boy... (W. Brown) 2 3 4 2 2 Verona, b m, by Nutwood Wilkes... (Frellson) 3 2 3 5 5

Trotting, 2:15 class, stake \$1000. Iloilo, b g, by Welcome-dam by Nutwood Wilkes (McDonald) 4 4 1 1 1

Alone, the five-year-old pacing mare by Nearest, own brother to John A. McKerron, furnished a sensation at the track on Thursday by pacing a half mile in 59 1/2 seconds.

Three races were carded for the second day. The first was the three-year-old trot, in which there were five starters. Tuna, a filly by James Madison, owned and driven by Harry Sanders was the favorite.

The two-year-old pacing division of the Pacific Breeders \$6000 Futurity had but three starters—Seymow, a bay colt by Diawood 2:11, owned by J. E. Montgomery of Davisville, California, was the winner

The free for all trot was won by the gray gelding Rozelle, beating the favorite Tom Smith who acted badly. The time was not fast and the race not a good one. The summaries: First race, three year old trotting stake, heats, 3 in 5, value \$600.

Second race, two year old pacing division, Breeders' Futurity stakes; heats, 2 in 3, value \$750. Seymow, b c, by Diawood-Nancy H., by Upstart... (Spencer) 1 1 Friskarina, b f, by Bayswater-Wilkes... (Hoy) 2 2 My Way, g f, by Stoneway... (Walton) 3 3

Third race, free for all trotting stake; heats, 3 in 5, value \$500. Rozella, g g, by Bob Mason... (Sampall) 1 4 1 1 Tom Smith, b r, by McKinney... (J. W. Zibble) 4 1 3 4

The Kenney Bicycle Co., 531 Valencia St., is doing a big business in the McMurray Carts and Sulkies. You not only save money by purchasing a McMurray but get the most durable, best made, and easiest running cart or sulky in the market.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Seattle Harness Races.

[FROM OUR SPECIAL CORRESPONDENT]

August 19.—The special pace for 2:10 pacers produced more ante-post speculation than any other harness event so far decided at the meeting.

Favored by the pole Francisco won the first heat in 2:12 1/2, a terrific drive to the wire resulting in his victory by a head from Le Roi, who was a neck in front of Bowers.

The second heat was a display of gameness on the part of Martha B. seldom excelled. Starkey was second and Le Roi, who was given an easy mile, third, Sam Bowers, who was badly cut off, being fourth.

The judges were not satisfied with the showing made by Le Roi and called upon Sanford to take Childs' seat in the sulky. Their judgment was verified and Le Roi won easily.

In the fourth and deciding heat Le Roi unfortunately cast a shoe at the half when going easily. This undoubtedly militated against his chances greatly, and he was ultimately easily beaten in the slow time of 2:16 1/2.

The 2:25 pace proved another gift for the Durfee stable, Rita H. having no trouble in winning in straight heats.

Purse of \$350 for 2:10 class pacers. Martha B., by Ashland Wilkes... (Miller) 5 1 2 1 Le Roi, by Alsomont... (Childs and Sanford) 2 3 1 2

Rita H., by McKinney... (Durfee) 1 1 Oma A., by Dictatus... (I. C. Mosher) 2 2 Polka Dot, by Mendocino... (W. Tryon) 3 4

August 20th.—The Sheriff Cudihee purse for 2:17 trotters was decided to-day, the race was deemed a gift for Sweet Marie, and she easily acquitted herself of the task.

Sweet Marie, by McKinney... (Durfee) 1 1 Briney K., by Strathway... (Smith) 2 2 The Commonwealth, by Shadeland Onward... (J. Green) 3 4

The above is the third consecutive victory of Sweet Marie at the meeting and she looks to have all the events on the Circuit for which she is entered completely at her mercy.

TRACK NOTES.

W. H. Berry, the owner of Briny K. left for his home in Los Angeles on Sunday.

Jas Misner has taken Lady Jones, Harry Marvin, and Lord Kitchener by Zomhro to Salem.

The purse races at Everett and Whatcom did not fill and have been reopened.

The 2:10 pacers felt the heat very much, and this, no doubt, accounts for the poor time made.

The track is improving, but with five running races daily can hardly be kept in harness horse condition.

AUGUST 24TH.

The 2:15 pace on Saturday was productive of a duel royal between Oma A. and Ollie M. in which, thanks to her indomitable gameness in two hard drives, the latter proved victorious, though her victory was attained but by scant margins.

The Argus purse on Monday was another gift for Sweet Marie, and her presence seemed to imbue the drivers with an oppressive listlessness from which they could not free themselves.

Readville Summaries.

MONDAY, AUGUST 24.

Trotting, 2:30 class, the Blue Hill stake, \$5000.

McKinney Lou, b.s by McKInney..... (Doble) 1 1 1
 Patchen Maid 2-3-2, Margaret Bathgate 4-2-3, Katrina G. 3-9-4.
 Texas 5-4-5, Boreazelle 6-5-4, McAdams Jr. 7-6-7, George Caton
 8-7-8, Kyrrille ds, Crowshade ds.
 Time—2:11¼, 2:08¾, 2:09¼

Pacing, 2:08 class, purse \$1500.

Nervolo, b.s by Colbert..... (Hudson) 1 1
 Loocanda 2-2, Kavalle 3-3, Terrill S 4-5, Dandy Chimes 6-4,
 Armored 5-7, Sufrest 7-6, Council Chimes 8-8.
 Time—2:06¼, 2:06¼

Pacing, 2:16 class, purse \$1000.

Al Book, blk s by Nedwood..... (Curry) 1 1
 Centric 2-3, Merry Master 5-2, Lucy May 3-1, Lexington 4-5,
 Double Z, ds.
 Time—2:10, 2:09¼

Trotting, 2:14 class, purse \$1500.

Dillon Boy, b.h by Baron Dillon..... (Hudson) 1 1
 The Questor 3-2, Norrie 6-3, Dreamer 4-5, Prince Greenlander
 9-1, Oxford Chimes 7-6, Admiral Dewey 8-7, Crescent 2-de, Summer
 Fern 6-ds.
 Time—2:09¼, 2:09¼

Trotting, to beat 2:02¾.

Lou Dillon, ch m by Sidney Dillon-Lou Milton by Milton
 Medium..... (Millard Sanders) 1
 Time—Quarter 39¼, half 1:00¼, three-quarters 1:31, mile 2:00.

Rain prevented any racing at Readville on Tuesday.

WEDNESDAY, AUGUST 26.

The Norfolk, 2:24 class, pacing, purse \$5000—Elastic
 Pointer won the first, third and fourth heats in 2:12¼,
 2:13¼, 2:13¼. Pan Michael won the second heat in
 2:11¼. Trilby-Direct, Page Hal and Mary Anna also
 started.

2:12 class trotting, purse \$1500—Belle Kuzer won the
 second and third heats in 2:13¼, 2:13¼. Promise won
 the first heat in 2:13. Van Zandt, Lill Bars, Anna
 Held, Dainty Daffo, Dick Berry, Rohizola, Silver Glow
 and Tudor Chimes also started.

2:10 clas, trotting, purse \$2000—McKinney won the
 second and third heats in 2:12¼, 2:13. Jim Ferry won
 the first heat in 2:13. Nell Gwynne, Wentworth, The
 Roman, Palm Leaf, Wilque and A J D also started.

2:11 class, pacing, purse \$1000—Frank Yoakum won
 two straight heats in 2:09¾, 2:09¾. King Direct,
 Onota, Diahlito, Bob, Ebony King, Jessie S and Clay-
 mos also started.

THURSDAY, AUGUST 27.

The Massachusetts, 2:12 class trotting, purse \$15,-
 000; best three in five—Billy Buck won the second,
 third and fourth heats in 2:07¾, 2:08¼, 2:09¼. Swift
 won the first heat in 2:08¼. Caspian, Hawthorne,
 Mary D, Tiverton, George Muscovite, Authores, El
 Milagro, Erances B., Vanscott and Judge Cullen also
 started.

2:20 class trotting, purse \$1500; best two in three—
 Queen Wilkes won two straight heats in 2:11¼, 2:11¼.
 Dodie K., Ida Gray, Kamares, Albert C., Lizzie A.,
 Deadwood, Trico, Dark Secret, Tonga Bermuda,
 Maid Dreamwold, Oxford Boy and Kyrrille also started.

2:16 class trotting, purse \$3000; best three in five—
 Mezzeto won the first, fourth and fifth heats in 2:09,
 2:11, 2:10¼. Jay McGregor won the second and third
 heats in 2:09¾, 2:08¾. Lady Patchie, John Mac,
 Millard Saunders, Navidad, Horace W. Wilson and
 Direct View also started.

The Tyro, three year olds, \$2000; best two in three
 —Sadie Mc won two straight heats in 2:12¼, 2:15.
 Mary Gage, Blossom, Oakley Baron and Sporty also
 started.

Pacing to beat 1:59.

Den Patch, b s, by Joe Patchen..... Lost
 Time—¼, 6:30¼; ½, 1:00¼; ¾, 1:30¼; mile, 2:00¼
 Trotting to beat 2:05¼.
 John A. McKerron, b s, by Nutwood Wilkes..... Won
 Time—¼, 6:32¼; ½, 1:03¼; ¾, 1:34; mile, 2:04¼.

The Petaluma Argus says: "Owing to the big race meet of the Breeders Association in this city this week, the contemplated meet for runners in September has been cancelled by the Kenilworth Park Association and instead there will be a thirty days' meet beginning on about May 1, 1904, and continuing throughout the month. The association will hang up such purses that will induce the Eastern horse owners who are on the Coast for the winter meeting of the California Club to bring their good horses to Petaluma, and as a result some fine races will be given. There will later be a grand meeting of one week for pacers and trotters and it will be so dated that it will be the first meet of the California harness horse circuit for 1904. Two free for all events for purses of \$2000 and \$1500 will be features of the meet and it will be largely advertised throughout the Coast. Manager Stover when seen on Friday fully confirmed the truth of the above published statements and added that the association is being greatly encouraged in regard to the harness meet, by prominent horse owners of the Coast."

It has often been remarked this summer that Dan Patch is a better gaited horse than last season, says the Horse Review. He has more action but less side motion, and goes quicker and trappier. Speaking of this Mr. McHenry said that during the winter he had the boys put a slight blister on his heels every few weeks with a view of promoting their growth. When Mr. McHenry got him last spring (1902) the horse's heels were short, and while they were built up some during the summer, he never had them high enough to suit him till this spring. His hind toes are particularly short, and the foot is at an angle of 57 degrees. In other words, Dan, like a society belle, wears French heels. After his toes were cut down he found difficulty in walking, but got used to it in a few days. "To tinker with a horse that can pace any time right at two minutes is a delicate undertaking," said Mr. McHenry, "but I believe it has done his gait a lot of good." "Will he beat the championship trick?" was asked, and Mac, smiling confidently, said: "Yes. He will go in 1:58 for a certainty."

Kinney Lou Wins Again.

At Readville last Monday, the day that Lou Dillon trotted her marvelous mile in two minutes, another California-hred horse won new laurels. This was Kinney Lou that Budd Doble drove to victory in straight heats in the Blue Hill \$5000 stake for 2:30 class trotters. It is the second \$5000 stake won by this son of McKInney.

Mrs. J. L. McCord of Sacramento has been in San Francisco this week, and while here transferred the ownership of the mare Mary Lou 2:17, dam of Kinney Lou 2:07¼, to Mr. Harry Doble, brother of Budd Doble, for the consideration of \$1000. It is understood that the mare is to be sent to Mr. H. E. Gentry, owner of McKInney 2:11¼, whose stock farm is at Bloomington, Indiana, and that she will be again mated with that horse. The statement was made in one of the San Francisco dailies recently that Kinney Lou was bred by Douglas Cone of Red Bluff, from whom Budd Doble purchased the now great trotter. This is an error. As is known to all California horsemen, Kinney Lou was bred by the late John L. McCord of Sacramento, who handled him as a colt during the last year of his life. Kinney Lou was afterwards sold to Douglas Cone of Red Bluff, who in turn sold him to Budd Doble. The following from the New York Herald is a graphic description of the \$5000 race at Empire track on August 12th, when Kinney Lou won the race and took a record of 2:07¼.

Driving Kinney Lou, a green trotter that had never taken a heat, a horse not long ago pledged by the once wealthy veteran of the turf to raise \$4000 in a time of necessity, Budd Doble at the Empire City track won more than \$5000 and achieved a triumph which moved thousands of spectators to unbounded enthusiasm. Unsurpassed, declared the expert turfmen in the throng, was the skill with which the man who gave Dexter his record of 2:17¼ a generation ago urged his horse on to victory, and long continued and stirring were the cheers which they gave at the finish.

The scene was the Grand Circuit meeting, and Kinney Lou, in a pool of \$485, sold for \$15. A purse of \$5000 was at stake in the contest, and, in addition to this prize, now his, it is understood that Doble receives a share in the winnings of E. E. Smathers, who wagered a large sum and literally captured the pool box.

Budd Doble is now 63 years old, and though he could once write his check for \$250,000 or more, it is no secret that he has lost his savings in unfortunate investments in the last fifteen years. It was said last winter that he had pawned Kinney Lou, the only promising horse he owned, to a wealthy Boston fancier, to raise a sum of which he was in imperative need. Doble redeemed the horse, or repurchased him in the spring, in time to train him for the campaign of 1903. He started at Cleveland in July, but was beaten in comparatively slow time by commonplace horses. At Buffalo last week he suffered another defeat through the speed of Jay McGregor, the then unconquered Kentucky stallion which started favorite in yesterday's race.

When the Grand Circuit horses reached New York Doble's bread-winner was scarcely considered in the betting. In one pool sold yesterday Jay McGregor brought \$250; John Taylor, another unbeaten trotter and winner of the \$10,000 Merchants and Manufacturers' Stakes, brought \$200; while Kinney Lou sold for \$15 and the field for \$25.

John Taylor here indicated the indications of a winner as he drew clear of the big field on the far turn in the first heat and came on through the homestretch with a clear lead to the seven furlong pole. Suddenly and unexpectedly Kinney Lou drew onward, looming up before the astonished gaze of the spectators, and, the speed increasing every instant, challenging the gray leader just as he passed the draw-gate, not a hundred yards from the wire. Volleys of applause arose, but far greater than the admiration for the brave racer was the tribute to the horseman who, with an art of its kind unrivalled and as if years had spared their hennumbing touch, bore the animal up until the goal was reached, and his opponent, "Dick" Wilson, John Taylor's driver, dumfounded, was beaten by a short head.

Veterans like Monroe Salisbury, "Billy" Weeks, John Turner and "Dan" Walton declared they had never seen such a masterly exhibition of driving as Doble had given. He was surrounded by his friends as he dismounted from the sulky and returned to "weigh in." Senator J. W. Bailey, Brayton Ives and many other prominent men were among those who grasped his hand.

"Three cheers for Budd Doble!" shouted an enthusiast on the lawn, and they were given repeatedly with a will.

Even after Kinney Lou had won his heat in 2:09 circuit followers would not believe he would win the race. Pools sold—Kinney Lou \$60, the field \$100, before the second heat.

Doble took his horse out in front at the start, and from end to end never let the others approach him. He trotted the middle half in 1:01¼—a 2:03 gait—and finished the heat, drawing away from John Taylor and Jay McGregor, in 2:07¼. The time of this heat is the fastest ever made by a trotter in his first winning race, and it goes on record as the best one a green horse ever won.

Budd Doble is not the oldest driver on the trotting turf, but he has been prominent longer than any other reinsman now in the sulky, and has gained a place no other driver ever occupied in public estimation. In his long career he has never been implicated in questionable methods. He has driven three trotters to the world's record, namely, Dexter 2:17¼, Goldsmith Maid 2:14 and Nancy Hanks 2:04. With Goldsmith Maid he won \$365,000 in purses and prizes. Until this season he has not driven a race for ten years.

Pleased at Lou Dillon's Performance.

SAN FRANCISCO, August 25, 1903.

EDITOR BREEDER AND SPORTSMAN:—I am greatly pleased to learn through the daily journals, that I have lived to see an animal that has at last accomplished that surprising, marvelous performance of trotting a mile in two minutes. California has at least, so the records prove, produced the first two minute trotter, and a large per cent of the best race horses, as well as the finest horses on the globe, and shows that they are not made out of mud. Education is a matter that cannot be omitted. The inborn inclination to trot, if not kept alive and strengthened by education will diminish in succeeding generations for the simple reason that the Almighty has established an infallible rule for the gifts, mental or physical, bestowed upon man and horse. There are many theories on breeding the great American production, the trotting horse, and with only a superficial examination it would seem that all of them may be proven from the records the natural trotter, that is the horse which under the severest urging persists in maintaining the trotting gait, both in her youth and maturity is the ideal of the breeder of trotting horses. That ideal can never be reached except by a gradual process of improvement. Such will be effected by combining breeding and education. Kings and queens shall their ancestors be, not so declared simply by the judgment of man, but by unimpeachable performance of themselves and their offspring. It is too bad that the late Henry Pierce, one of California's foremost business men and breeders, could not have been spared to see the first two-minute trotter and be present at this marvelous performance of the sweet little Miss Lou a mare of his own breeding.

I congratulate her breeder, this natural horse producing land California, her owner and trainer, end driver and all those who were connected with her from her birth to this hour, and last but not least her faithful care-taker. Accept my best wishes for the future success of other breeders of the two-minute trotter. Yours, SAMUEL GAMBLE.

Two amateur horsemen of this city who have had good luck and show good judgment with their purchases are Messrs. Herbert Levy and M. Schweitzer of the firm of J. Schweitzer & Co. Mr. Levy was at one time the owner of the pacer Frank by Secretary that he sold to Eastern parties and that has since taken a record of 2:10 and proved a good race winner. Mr. Levy also owned Billy Red and sold him to Mr. Springer of Pleasanton who has since worked the horse in 2:12 and has in him a much faster horse. Mr. Schweitzer not long since purchased Mell S., a gelding by Strathway that is proving a second Toggles, and last week he sold him to Col. J. C. Kirkpatrick of this city, who will doubtless take him East as he gives every promise of being a 2:10 trotter. Messrs. Levy and Schweitzer put the purchase and sale of these horses in the hands of the well known horseman Mose Hart of this city and he has made for them a neat profit on every deal. Nothing depresses the spirits of an amateur reinsman more than buying a "gold brick" horse and these gentlemen have thus far avoided this. Mr. Hart had all these horses placed into H. R. Ward's hands at Pleasanton who put them in fine shape and assisted materially in their improvement. Neither Frank, Billy Red nor Mell S. could be repurchased for the prices obtained for them but as the sellers made a good profit in every instance they are willing the "other fellow" should also make something. Few men in business have as good an eye for a good prospect as Mose Hart.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

EFFECTUAL

The most effectual remedy in use for the cure of ailments of horses and cattle is

GOMBAULT'S CAUSTIC BALSAM

Used as a Blister or Lotion.

This preferred remedy is prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address: THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Trout Fishing on Rapid Streams.

Having stated, in a previous article, that the trout in small rapid streams are generally feeding, and that their food is various, it will behoove us well to consider our best means of taking advantage of the trout's voracity, and of accommodating our resources to the variable desires of the fish, in order that we may not only always select the bait which by preference he may be taking in most abundance at any particular time, but also that we may employ that which will assist us most materially in attracting him, and favor our own seclusion and deception.

As to the resources we have of varying our allurements, we have only to remember that the trout feeds on all fish smaller than himself, on all insects found on or near the water, or such as in passing over fall into the water, as well as worms, grubs of all sorts, and the spawn of other fish. Having then so large an assortment for our selection, it will be well for us as early as possible to understand why at one time one bait should be adopted and another at another time, before attempting to learn the mode of using each particular bait. And as a preliminary point, let us briefly consider which of all these articles of food is best adapted for deceiving the fish. And perhaps, to one not practically acquainted with our art, the solution of the question may seem obvious, and to depend simply on the fondness of the trout for any one article in particular, which of all others would therefore appear to be most advantageous to the fisherman as a bait. This has in part been alluded to before, and we mentioned that the voracious trout is not solely and at all times guided by simple appetite, or peculiar inclinations and love of any article of food; but that he may be excited to feed by the particular manner of his prey, tempting him by greater attraction or conspicuity, so that one of many small flies or fish will often be especially selected, not for any apparent superiority in condition or appearance in form, but simply from arousing the trout's beligerent passions, or awakening him from indifference by extraordinary provocation. Hence, in our determination of a bait, we must find one that will not only be agreeable to the fish as a viand, but one, which of all others, will be most exciting to him; nor is this all, for inasmuch as a third party is to be introduced, namely—the fisherman himself—no little attention must be given to the importance of his share in the proceeding; consequently, the bait must not only be of all others the most alluring in every way, but of all others be such as is best adapted to the process and use the fisherman will adopt, besides being favorable to his own convenience.

If we turn our attention to the natural fly, it would appear from what we have remarked, that it would best answer the purposes required as far as the fish is concerned, (and this is true of it as an enticement); but we should find the living fly very troublesome to use on rapid streams, from its delicate structure giving much annoyance in constantly necessitating a change of bait; every fish that touches it, independently of the action of the water itself, taking it off, besides being inconvenient to obtain at all times in sufficient numbers. We want, then, that which will be as attractive and enticing as the natural fly, and be more convenient to the fisherman.

Next would suggest itself fern webs, and some beetles, and in them many objections are done away with, and certainly a most excellent bait is before us, but these cannot be obtained at all times, and the trout will only take them at particular seasons. But as we intend to remark specially on each particular bait, we now proceed with the flies, and finding inconvenience in the natural delicacy of the living fly, call art to our assistance, and imitate the insect we should otherwise use,—imitate with precision when we wish and are obliged to rely solely on our deceptive power, as in slow water, or deep and still streams; but where we wish rather to take advantage of the natural infirmity of the trout, their voracity—and are able to do so without exposing too much of our deception, as in rapid streams, we so far imitate nature in general appearance and color, as to lead the trout to imagine an insect, or at least something eatable is before him, but rely more upon our bait as an attraction, than an actual deception of a particular fly, and its manner of employment, as an excitement to the fish, which from his habits, we judge he cannot resist. And taking still water, and shallow rapid streams or cascades, as two extremes, we would say with regard to artificial flies, that in still water we should rely upon the deceptive power of the fly, and judge of the value of flies by their representation and exactness of similitude to the natural insect. Whereas in rapid streamlets, we should rely mainly on our mode of using the artificial fly, whose good qualities would consist in the greatest conspicuity, provided such did not so far exceed the likeness of anything natural and edible as to frighten the trout. And as in rivers we find every gradation of distinction between the still waters and rapid brooks, so shall we hereafter observe every degree of indifference between the gaudy, conspicuous, and insulting bait for the rapid—and the sober, quiet, deceptive, artificial fly, for the still water.

Again, as regards baits, we have worms, slugs and small fish—as minnows; which are usually such stimulants to the gustatory and predatory dispositions of the trout as few, even the oldest and most cunning can resist. And every fisherman ambitious of captur-

ing large trout ought to be made acquainted with the use of these baits—as for bottom fishing no legitimate means of capture is equal to the minnow or worm. We would advise every student in the art of fishing to make himself well acquainted with the best methods of using the natural, the artificial fly, the worm and the minnow, with such resources as these, provided there be rapidity of stream, and plenty of trout, a good day's sport may at any time with certainty be relied on.

In using each and all of these baits, we have one constant difficulty to overcome, with some greater than others, but more or less ever to be contended with, never to be forgotten, and this is to avoid alarming the trout. We shall find so far as our bait alone is concerned that the trout is not by any means easily frightened; but we must ever remember that the trout most mercifully to him is endowed with a wonderfully acute sense, viz., that of vision. To what extent trout hear or smell we do not pretend to decide, these senses, however, much or little developed, will not either assist or oppose us in our practice; but the wonderful acuteness of the sight of trout will be found the greatest difficulty we have to contend with, and most especially careful must we always be to prevent the trout seeing us, not only our whole body but not even a hair of our head, and to avoid causing any unnatural movements of familiar objects within his range of vision, as well as to avoid frightening any other trout below where the fish we want to catch is lying, lest he should start off and in his terror tell his brethren something is moving, a stranger is in proximity.

In order to prevent the trout seeing us in our approach, which must be for subsequent success as near to him as possible, the simple precaution of fishing whenever we can, up, or against the streams will be of the greatest assistance to us. The position of the trout's eye in his head, and the mechanical arrangements of muscles for moving the globe of the eye, are such as to be best adapted for observing objects immediately above, or above and in front of, the heads he sees indeed upward and forwards, but cannot direct his eye to take in rays of light falling from behind forwards, or only to a very limited extent, consequently the lower in height we are, and the more immediately behind the trout we are placed, the less able will he be to see us. We must then have recourse to every stratagem to obtain such a position, and in advancing, for example, to any spot we believe to contain a trout, we should place ourselves as nearly on the level of the water as possible, below it if we can, and proceed if even obliged to crawl on the ground from below, upwards, or as regards the direction of the fish, from behind, forwards. Should a high bank border the stream, rather than stand high above the eye of the trout and far off, we had better get down to the water's edge below where he is lying, and then cautiously make our advance, and in so doing keep the rod out of view. A thousand points in detail of means of securing ourselves might be enumerated, such as getting behind trees, stones, rocks, into ditches or deep gutters, of our most appropriate dress, etc., all of which common sense sufficiently indicates, and which will be attended to and adopted, provided the principle of always avoiding the sharp and watchful eye of the trout be remembered.

In 'The Art of Angling,' by Charles Bowler, published in London in 1830, appears the following quaint lines, which may be old to some readers, but will doubtless prove new to many more.

SIGNS OF RAIN.

[Forty reasons for not accepting the invitation of a friend to make an excursion with him.]

BY THE LATE DR. JENNER.

- 1. The hollow winds begin to blow,
2. The clouds look black, the grass is low;
3. The soot falls down, the spaniels sleep,
4. And spiders from their cobwebs peep,
5. Last night the sun went pale to bed,
6. The moon in haloes hid her head;
7. The boding shepherd heaves a sigh,
8. For see, a rainbow spans the sky.
9. The walls are damp, the ditches smell.
10. Closed is the pink-eyed pimpernel.
11. Hark how the chairs and tables crack,
12. Old Betty's joints are on the rack;
13. Loud quack the ducks, the peacocks cry,
14. The distant hills are seeming high.
15. How restless are the snorting swine,
16. How husky flies disturb the kine;
17. Low o'er the grass the swallow wings;
18. The cricket, too, how sharp he sings;
19. Puss on the hearth with velvet paws,
20. Sits weeping o'er her whiskered jaws.
21. Through the clear stream the fishes rise,
22. And nimbly catch th' unconscious flies.
23. The glow-worms numerous and bright,
24. Illumine the dewy dell last night.
25. A dink the snaild road was seen,
26. Hopping and crawling o'er the green.
27. The whirling wind the dust obeys,
28. And in the rapid eddy plays.
29. The frog has changed his yellow vest,
30. And in a russet coat is dressed.
31. Though June, the air is cold and still;
32. The mellow blackbird's voice is shrill.
33. My dog, so altered in his taste,
34. Quits mutton bones on grass to feast;
35. And see yon rooks, how odd their flight—
36. They imitate the gliding kite.
37. And seem precipitate to fall,
38. As if they felt the piercing hail.
39. 'Twill surely rain, I see, with sorrow,
40. Our jaunt must be put off to-morrow.

Jackson's Napa Soda untangles the feet.

Nevada Field Trials Derby Entries.

Dr. C. E. Wilson, secretary of the Nevada Field Trials Club, writes us that the entries for the Nevada Derby comprises eight Pointers and eleven Setters, nineteen all told. This is indeed an encouraging send-off for the initial sagebrush trials. Entry blanks for the All-Age stake, etc., and further information may be obtained by addressing Dr. C. E. Wilson, Elko, Nev.

The list comprises the following:

ENGLISH SETTERS.

John Schumacher's (Los Angeles) white, black and tan bitch Valita (California Bell Boy-Rod's Lark), whelped April 20, 1902. Breeder, W. W. Van Arsdale.

Alexander Hamilton's (San Francisco) black and white dog Lady's Lad (Clipper W.-Lady), whelped June 16, 1902. Breeder, J. E. Terry, Sacramento.

W. W. Van Arsdale's (San Francisco) white and orange bitch Count's Gitt (Count's Mark-Verona Schoolgirl), whelped April 10, 1902. Breeder, owner.

Same owner's black, white and tan dog Klamath (California Bell Boy-Rod's Lark), whelped April 20, 1902. Breeder, owner.

Same owner's white, black and tan bitch Keepsake (California Bell Boy-Peach Blossom), whelped August 22, 1902. Breeder, owner.

C. E. Worden's (San Francisco) black, white and tan bitch Count's Cash (Count Whitestone-Sport's Belle), whelped July 12, 1902. Breeder, C. Black-hurn, Olathe, Kan.

H. H. Dunn's (Elko, Nev.) white, black and tan bitch Hoosier Belle (Marie's Sport-Fairlyland Queen), whelped June, 1902. Breeder, W. J. Baughn, Ridgeville, Ind.

Dr. C. E. Wilson's (Elko, Nev.) lemon and white bitch Rosie O'Grady (Marie's Sport-Isabella Maid), whelped April, 1902. Breeder, H. B. Ledbetter, Missouri.

Same owner's black, white and tan bitch Sweet Marie. Same breeding.

J. W. Considine's (Seattle) black, white and tan bitch Hick's Bah (Doc Hick-Woodcraft), whelped May 23, 1902. Breeder, owner.

T. J. A. Tiedemann's (San Francisco) white, black and tan dog Robert Llewellyn (Llewellyn Drake-Miss Maud), whelped July 30, 1902. Breeder, Thomas Plimley, Victoria, B. C.

POINTERS.

Stockdale Kennels' (Bakersfield, Cal.) black and white bitch Dodge's Stella II (Cuba Jr.-Winnipeg Fly), whelped February 8, 1902. Breeder, owner.

Same owner's liver and white bitch Cuba's Ivywood (Ch. Cuba of Kenwood-Petronella), whelped January 22, 1902. Breeder, owner.

Same owner's liver and white dog Cuba's Sinew (Ch. Cuba of Kenwood-Florida), whelped April 2, 1902. Breeder, owner.

W. B. Coutt's (Kenwood, Cal.) black and white dog Glen Rose (Glendale-Kenwood Rose) whelped April 12, 1902. Breeder, owner.

Dr. A. T. Leonard's (San Francisco) liver and white dog Wallace Bruce (Kenwood Dan-Whisper), whelped September 10, 1902. Breeder, Tod Sloan.

W. W. Van Arsdale's white and liver bitch Senorita (Dr. Daniels-Nancy Jingo), whelped June 30, 1902. Breeder, owner.

Bango.

C. A. Sage's black and white dog Sport (— — —) whelped July —, 1902. Breeder, S. H. Stone, Ogden, Utah.

DOINGS IN DOGDOM.

Delverton Cappi is too good a little Cocker to be overlooked by breeders and should do well in the stud.

During Mr. Byron Erkenbrecher's visit to this city, last week, he purchased a handsome little Cocker Spaniel from Woodlawn Kennels. The dog is a year old, house broken and a most companionable and intelligent little pal. We feel safe in stating that he will go over any Cocker in Southern California.

Tbos. S. Griffith writes us from Spokane as follows: "I have just received word from my superintendent that Craigmore Ethel, by Imp. Brendane Ranger, whelped nine puppies at her new home. They are sired by the prize winner Imp. Braebred Commander. There are four dogs and five bitches. There ought to be some prize winners in this litter. They are all nicely marked and coming on finely."

Something for Nothing

The Polk Miller Drug Co., of Richmond, Va., are manufacturers of Sergeant's Dog Remedies, the most popular line of preparations, intended for dogs, on the market today, having received the highest endorsements of the leading dog men and kennel owners in this country and Canada. Read their advertisements appearing in the columns of our journal each issue. The firm referred to will mail you absolutely free, a copy of their celebrated book on Dogs if you will forward 3 cents to cover postage. If your dog is sick, write them, enclosing stamp, and describe the symptoms as accurately as you can. They will cheerfully furnish the best information on the subject without charge. F. W. Braun & Co., of Los Angeles, California, have recently been made distributing agents for Sergeant's Dog Remedies on the Pacific Coast.

Moccasins. Bicycle Goods.

Jackhack moccasins are the best article in this line ever offered sportsmen in this city. Thick, flexible bottoms, durable, easy fitting, just the thing for still hunting, camping and outfitting. They are so superior to what is usually sold as moccasins there is no comparison on merit. Skinner has them. The Skinner Co., 801 Market St., are unpacking and putting on sale everything in the bicycle sundry line. They are agents for the cheapest and best tires ever shown in this city and it looks almost incredible that such goods can be produced for the prices they are selling them.

The Winchester Automatic Rifle.

The Winchester Model 1903 is a ten-shot, automatic, hammerless, takedown rifle, adapted to a new .22 caliber rimfire cartridge loaded with smokeless powder and the Winchester greaseless bullet. It is simple in construction and operation, and is the first automatic rifle on the market and the only automatic arm using the inexpensive rimfire ammunition that can be easily taken down. The rifle has grace of outline, light weight, certainty of operation, ease of manipulation and novelty of action, making it a most desirable and up-to-date gun. There are innumerable uses for which the Winchester automatic rifle will be found particularly well adapted, among them being wing shooting or fancy shooting. We predict with the advent of this gun a new era in rifle shooting. It will be used by true lovers of sport in open places upon moving game—ducks, geese and small animals—in many places where shot guns are now used. Its loading without movement of the firer enables continued accurate aim and rapid discharge heretofore unknown, and only to be appreciated after trial. One brain shot with this gun instantly killed a horse, and a hog weighing 370 pounds was also killed at one shot. In the automatic action of the Model 1903, there are no moving parts outside the gun to injure the bands, catch in the clothing, brush, etc., and, being simple

Winchester Automatic .22, Model 1903.

in construction, it is not apt to get out of order with any ordinary use. After filling the magazine and throwing a cartridge into the chamber, all that is necessary to do to shoot the ten cartridges that the magazine holds is to pull and release the trigger for each shot. The rifle can be shot as fast as the trigger can be pulled; and with its rapidity of fire is combined the accuracy for which all Winchester rifles are famous. When a shot is fired, the recoil from the exploded cartridge ejects the empty shell, cocks the hammer and throws a fresh cartridge into the chamber.

The Winchester Model 1903 automatic rifle is made with blued trimmings, a plain walnut stock and forearm, not checked, and a 20-inch round barrel, fitted with open front and rear sights. Weight about 5½ pounds. The stock is 13½ inches long; drop at comb, 1½ inches; drop at heel, 3½ inches; length of gun over all, 36 inches. Fancy walnut stocks and forearms and plain or fancy walnut pistol grip stocks, checked or unchecked, are the only variations from the standard gun that will be furnished.

The California, or Valley Quail.

In the California, or valley quail we have another instance of an interesting American game bird once formerly abundant, and now surviving in numbers materially lessened and with habits that have sustained somewhat of a change.

Twenty years ago these birds were found in many regions of California in numbers such as fairly to surpass belief. A bag of 50, 100, 200, even 250 quail a day to the gun was not only possible, but not unusual. The bird itself, although not so toothsome as the Bob White quail, offering, as it does a flesh somewhat dryer and less savory than that of its Eastern cousin, none the less was edible and none the less abundant.

Hence it was deemed the legitimate prey of the market hunters, and it is no doubt that the continuous shooting at all seasons by the market hunters did more to cut down the numbers of the valley quail than all other causes combined, although naturally the great numbers and the accessibility of the bird caused it to be pursued very generally by resident and visiting sportsmen. For once in a way the tremendous fecundity of the glorious State of California was not sufficient to the demands made upon it. Presently localities which had once swarmed with these birds showed but a few scattered flocks. The species seemed to be about to disappear, such was the relative disparity between the numbers in the past and in the present. Then came a more sensible view of the situation and a better appreciation of the value of this beautiful bird. To-day there is a limit of twenty-five birds to the day to the gun, and it is only fair to say that the man who kills his limit has done a good day's work. There are many shooters in different parts of the country who have tacitly set for themselves the limit of twenty-five game birds a day, no matter what the species, whether of ducks, quail or grouse, and the doctrine of twenty-five head a day, no more, is an excellent one to promulgate in these times.

The valley quail is not altogether a creature of the lowlands, although it resorts to the valleys and to the neighborhood of the ranches in great numbers. It overruns the low mountain ranges and may be found up to five thousand or six thousand feet elevation in the mountains.

Its natural home is in the chemical and cactus scrub, native to its range, and well enough suited does it seem to survive in that environment. There

is no game bird more active or sprightly than the valley quail, and it seems to be continually moving about, running hither and thither, and animated by a mental activity apparently as great, continually chirping and twittering and squeaking to itself. It is a beautiful bird, with its slaty blue and cinnamon, and its handsome crest. It is not quite so plump as the Bob White, but is a trifle longer and racier in build. Some think that it is swifter upon the wing than Bob White, but this is hardly the case, the greater apparent difficulty in shooting it arising not so much from its spread of wing as the twists and angles of its flight, and the difficulties of the cover in which it is found. In grouse or quail shooting the sportsman has now and again found himself engaged in a bit of sidehill shooting, and has noticed how much more frequent are his misses than upon the level ground. Bob White is in many cases shot over level country and not on steep mountain sides or canyon faces. By comparison the soberer bird and its environment has rather the best of it over its gaudy cousin, with its painted uniform and its crest like that of a militia colonel. In nearly all ways except that of personal appearance this bird of the southwest suffers in a sporting comparison with the Bob White quail, and the only redeeming feature is or was, the great numbers in which the valley quail is found. Yet this latter feature is not altogether a recommendation, for it seems to be the rule of nature that when a large number of animals are gathered together there is greater wariness and shyness. The

great bands of elk or antelope, the great flocks of wild geese or of the packed prairie grouse are much harder to approach than small bodies of these same creatures. Hence, although the valley quail is to be found in numbers, this fact does not always signify the best of sport. The bird itself never had its thoroughbred racing outline for naught. It is a racer, and upon foot it is nearly as swift as upon wing.

Its first thought when seeking safety is to run, and unless closely pursued the birds will not take to wing. Followed hard and put up they will alight running, and unless the follower be sound of wind and swift of foot they are apt to run quite away from him before he gets up with them at all. Such sport of wing shooting as is afforded by the valley quail is rather incidental and occasional than regular, and is due not so much to settled habits on the part of the bird as to occasional deviation from habits which may be called settled and determinable. Its pursuit is difficult to be sure, but it requires something more than sheer difficulty of capture to entitle a bird to a high reputation as a sporting factor. As an extractor of good wing shooting skill the quality of this quail cannot be denied, for it offers to the gun all kinds of sudden and unexpected angles, up hill and down hill, out above the canyons, around behind the clumps of cactus, and now and again low and close to the chaparral. These complications in its flight constitute practically the only recommendation of the bird from the wing shooter. There are those who do not scorn to shoot the valley quail upon the run, and it is to be imagined that many a tenderfoot new at this sort of quail shooting has not scorned to swell his bag in that way. Yet this is not sport, even where it is difficult as wing shooting and the sporting conscience does not reconcile itself to the idea of shooting a feathered creature upon the ground, no matter if it be but touching the ground occasionally and in the higher places.

The valley quail does not present much inducement for the use of the hunting dog, and indeed to the ordinary pointer or setter of the East, unused to the hot, dry climbing and sharp elevations of the southwestern regions it is a puzzle and an annoyance, and rare indeed is it that the Eastern dog does not wear himself out to no avail in his first experience with the birds. Suppose that one runs across a great band of these valley quail—perhaps several hundred or more than a thousand of them, as might once easily have been the case. The birds themselves are so abundant as to require no dog for their discovery. Indeed they announce their presence by a continued series of chirps and clucks. Thither the sportsman bends his steps, his dog all excitement, for even that hot, dry air is full of the scent where the birds have crossed and criss-crossed. At fifty, sixty or seventy yards, perhaps at even greater range, the birds begin to take wing, the scattered ones on the edges of the flock being the first to arise, usually out of range. Both hunter and dog press on, both somewhat excited. At last with a great rolling roar a cloud of blue rises and breaks over the nearest elevation. Perhaps the flight extends upon the average not more than a couple of hundred yards.

The shooter, if he is an Easterner acquainted only with the habits of the Bob White quail, believes now that he has a day's sport cut out for him and close at hand. Vain hope! When he reaches the spot where he first saw his great mass of color go down he finds scarcely a bird, for they have all taken to their feet again and have run as fast as deer. The poor dog, hurrying thither and thither, is perturbed as much as his master, and a few hours of this repeated is usually enough to take his measure. It is not enough for either dog or shooter to get an occasional sight of the wild rising bird, or an occasional sniff at a bird occasionally put in pocket. There is too much excitement, too much hard climbing, too much hot sunshine and too much hurry and confusion to call this very good fun for dog or man, and during his

first few experiences at this sort of thing the beginner is apt to be much confused and not a little disgusted.

There is, however, always a way of outwitting any game creature, and a careful study of the habits of this bird will enable the sportsman to hunt it to better effect. The old timer who is out for a day's shooting on valley quail is not particular about the first or perhaps second rise of the big bodies of birds. His attempt is to get as close to the flock and as quickly as possible. Then he runs among them, fires over them rapidly, and often, perhaps, the second or third rise, he finds the birds are cowed, perturbed or subdued. The great bulk of the flock may go on, or the outlying stragglers may run away, yet none the less he will find himself in the middle of a few acres of ground over which there may be scattered 200 or 300 quail which, for a time at least, will lie close enough to be hunted by the dog and accounted for by the man in something like sportsmanlike fashion. Under such circumstances the pointing dog is useful and agreeable, and it is under such surroundings that a big bag of these birds is most apt to be made. Of course, in a country where there are literally hundreds of quail running about hither and yon it would be surprising if one did not get occasional shots even when he least expected it, or at more or less practical ranges. Yet this does not represent any problem solved, any situation mastered, nor any sport reduced to what might be called a sporting system. The whole thing is too apt to be called a sprinting match. It is far enough for a sportsman to run, red in the face and shouting to his dog, but when the sportsman and the dog are obliged to engage in a foot race to get up with the game, the latter does not resolve itself into a pleasing and enjoyable fashion of shooting, however excellent it may be as a means of physical training.

The above remarks as to great numbers of valley quail apply rather to the old days than to the present time. Nowadays the present flocks of quail are not so common and one is more apt to find not more than a few score birds at best in one of the bands which he puts up.

He will find it far more difficult to find the birds now than formerly, for they seem to have learned wisdom with the years and do not engage in the same riot of glad sounds which formerly marked their courtesies. Today if they fancy that the hunter is about, they stand and watch him and bawl their peace. If he comes their way they take to their legs at even greater speed than of yore, running farther and faster, and they lie worse, giving longer rises to the gun. Whereas, once their flight was not longer than that of the Bob White, they may now fly a quarter of a mile instead of 100 yards or so. They may top a little crest, and then instead of alighting, go on across the next crest hundreds of yards and then having alighted, they may take to their heels and put yet more space between them and their pursuer. Under such surroundings a bag of 30 or 40 birds is a good one. The dog is more useful now than of yore, since the birds are not so easily discovered. It requires a highly specialized dog, one of good lungs and tireless legs and a great fund of patience. True, this sort of shooting takes one out of doors, and it is sport at flying feathers, yet not sport to compare with the steady, dignified and regular methods which are so possible and so enjoyable in some of the better Bob White regions, such as those of the Southern States. None the less the valley quail is desirable of retention as a game bird, and it is pleasing to believe that it is coming more and more into its rights in the big Pacific country, and that it will long endure as one of the native Californians. Indeed, the species is becoming more abundant now than it was a few years ago for the market shooting has been regulated to some extent and the laws are better enforced.

The valley quail feeds on such seeds and small insects and grains as may be found in the wild country or cultivated fields. When not molested it becomes quite tame and shows something of the fearlessness of the Bob White quail. When alarmed these birds have a sort of chirping note, something like a sharp "quit-quit!" mingled with many moans and croaks of o-o-o-s and u-u-s. Scattered in the cover the birds rapidly run together, and their assembly call is a picturesque mingling of consonantal and vowel voicings, sometimes sounding like "o-w-y-o," or, again, like "kuk-kuk-koo." There is something attractive, indeed fascinating, about this beautiful and animated bird. It is certainly a hustler and able to take care of itself, like everybody and everybody on the Pacific slope. Its pursuit is no occupation for a laggard, and after one has learned to lay aside the traditions of his earlier shooting on the Bob White quail, the sport gains an interest of its own. The country beyond the Sierras is an empire of itself, with ways of its own, different from the rest of the United States, and this one may expect when he goes there even for the enjoyment of the sports of the field. If he be not too much bigot, and if he possess that catholicity of spirit which enables the real sportsman to enjoy himself wherever he may be or whatever may be the game, he will soon learn to like this pursuit of the running game bird.

As to his proper equipment, he should have a care to go dressed light, for the work will be somewhat exacting and the climbing a bit warm. His gun may be the 12 gauge or something smaller if he is accustomed to it. No 8 is the right shot for all the quail family upon the average, one day with another, and for proper wing shooting at partridges the double cylinder, or cylinder and modified choke in the right gun; yet in this sort of shooting, where the range is apt to be a long one for some or all of the time, there will be many who prefer the closer shooting here, which at least they fancy will give them better average results, although the latter statement is much to be doubted if the cylinder be used day in and day out.

The Valley Quail (Laportyx Californicus). Common names: Valley quail; California quail. Description: The short, upright crest is black. Anterior portion of the body and upper parts plumbeous. Wings and back tinted with olive brown. Anterior

half of head furnished yellow. Shafts of the stiff feathers black; a transverse white band passes back of the side of the crown. Top and back of head light brown, chin and throat black, marked out by a white band, which begins behind the eye and runs down the side of the neck. Belly pale buff, with round orange brown patch in middle. Side feathers like those of the back, streaked entirely with white. Tail colors buff, broadly streaked with brown.

Female smaller, except that the white of the head is absent. The feathers of the throat in the female are burnished yellow tinged with brown. The buff and orange brown of the belly is wanting in the female. The crest is shorter.

Length: 9.50; wing, 4.32; tail, 4.12; weight, 8 ounces.

Range: The valleys and foothills of the Pacific coast states, and as far south as Caps St. Lucas.

Habits: The favorite abodes of the bird may be found in the grain fields of the lower lands, in the thickets along the streams, and in general in the close covers of the lower altitudes. The male bird occasionally perches on a stump or branch near the nest of the female and utters its cry, less melodious than that of the Boh White; commonly a sort of "kuck-kuck kuck-kuck-kes." This bird does not frequent the deeper forest nor the upper ranges of the mountains. It is a prolific breeder, generally hatching its brood in June. It has been successfully introduced in Washington, near Puget sound, attempts of this nature having been made as early as 1857. This bird when put up frequently perches in trees, after the less occasional fashion of the Boh White quail. It is easily domesticated. The nest is usually made of grass, and is built sometimes quite in the open, though more frequently under some shrub or shrub. Eggs, 12 to 16 in number, varying in markings, but yellowish white, spotted with dark brown.—E. Hough in Texas Field.

The Working Collie.

The working Collie is beginning to take hold of the public mind and particularly the minds of those who own Collies. Now, the average owner of Collies, I think, hardly realizes the extent of the interest that would be created by exhibitions of working Collies and not too many that own Collies know much about their abilities or working propensities. Of course, like the sporting dogs, Collies that work are of all sizes, shapes and colors, and it is as often as not "handsome is as handsome does," but the point of beauty is a factor that can be studied in the working dog as well as in the show dog, and it has never been satisfactorily proved that it is necessary for a Collie to be homely to be a good working dog.

Having had quite a little experience with working dogs I may say that some of the handsomest were the best in the field. A very handsome dog that won second at Birmingham, England, was the sire of a very beautiful dog that was, as a worker, phenomenal. This young dog later took prizes in good company and was himself the sire of good workers also as good looking. I am now talking of away back in the seventies. Many of the early Black and Tans that were good looking and very good workers were small, as we look at Collies now, with the tan a very light lemon color and not much of it, and many that had good dogs wanted them as correctly marked as the Black and Tan Terriers or the Gordon Setter.

Many of these dogs were not so profusely coated yet had not the Gordon Setter blood in them. In opposition to these were dogs that carried a heavy coat and a big frill. Again, the smooth was much as we see him to-day, is an old sort and as often as not a good worker; for there was no marketable value to a smooth Collie unless he could work, and these dogs until lately were not much in evidence as show dogs and so have not been bred so very many years without being worked.

As we said before, working dogs are of many sorts and sizes and of many different colors, though there is little doubt that the character that the Collie had for smartness largely helped him in his early bid for popularity as a show dog and companion; and there is little doubt but that if the Collie was demonstrated at work, for instance, at our Fall fairs, which are usually well fitted for the purpose with race courses, which are laid out on most of the grounds, and would be admirable places for the trials, and the public could obtain a splendid view of the trials from the grand stand, it would greatly help the breed. Few people have much idea of the severity of the trials given to really expert dogs or the great intelligence displayed by them or the perfection of the combination between dog and man.

Many owners that have a dog are satisfied when they have a dog that will drive cows, but the brightest and best Collies, as seen in their own country, are not much used for cattle but for sheep; and it is when working the timid, rather stupid and perverse animal, the sheep, that the Collie shows his wonderful ability. One instance of the peculiarities of sheep is well instanced and well known to the rancher out West, viz., that in taking a bunch of sheep any distance along a trail, and where many water courses are encountered, the sheep vary a great deal in the way they take these; and it is a common occurrence that when coming to a large and dangerous river with a swift current, the sheep will go over at the first or second attempt, though the hank of the river is far distant and the shore not so easy to see.

But when coming sometimes to a small creek, that each and every sheep could easily jump over, the flock will stay there a week before the spirit moves them to cross this stream, that would hardly wet their feet, yet they will take the big river without any hesitation. Why the sheep is thus we none of us know, but it is just such idiosyncracies as this that, multiplied,

have made the working shespdog what he is, an animal with a keenness of insight into the moods of his sheep and with a knowledge of their peculiarities that is often far beyond that of his master; and in fact in penning sheep at a trial the master of the dog may be ever so clever, but if the dog has not a mind of his own and his eye fixed on every movement, and the slightest movement of the sheep, the penning cannot be done. So smart are these dogs that often when the sheep cannot be driven into the pen, and as often as not they cannot, the dog pretends to rush them and gets them on the flight and backing away from him—as a sheep will do while bluffing with his head—and the first thing the sheep know is that the dog has hacked them into the pen without their knowing it.

The distance to be traveled at trials, and the time, are matters of choice, but in Australia, probably, the hardest course is mapped out, and there the dog has to take three wild and strange sheep from different flocks round a course mapped out with flags and through hurdles laid out in a malted cross, and then into the pen with an opening eighteen inches wide for agats.

Many stories are told of the intelligence of the shespdog, but they have senses and insight that is not vouchsafed to man, who not having these senses cannot gauge them. For instance, when driving sheep in Australia to the coast to sell, in hands of 2,000 or so in a hand, it is often necessary to go through the runs of other owners. On the passage through these runs it is not uncommon to accidentally pick up two or three strays, but before leaving the stranger's run these must be taken out of the band and left behind. In order to do this the sheep are sent through a narrow gateway and the dog is stationed at this gate with orders to take out the strays, and this he does with consummate ease and like a flash. His master would be incapable of telling which were his own, at any rate not with anything like the certainty of the dog nor with a thousandth part of the speed or accuracy with which a dog will pick three or four strays out of a flock of 2,000.

In Scotland at the fairs when the sheep are brought from the mountains to be sold they are held in the open market square or in a large field, perhaps without any pens, and as often as not one sheep of a flock will dart away from his herd and into another hand, but the dog is away after him like a shot, and runs, if need be, over the backs of the other sheep and pins his sheep by the ear and brings it back to the proper flock in short order.

As I said before, we want different dogs for different kinds of work. We want a dog for the wild black-faced mountain sheep, and another for the sheep of the lowlands, where the sheep are bigger, heavier and more docile; but with any kind of sheep that want difficult handling we do not want a dog that heels, but one that goes at the head of the sheep to turn them. When a sheep suddenly leaves a flock a dog that is only a heeler, or cow dog, runs at the sheep's tail and drives him out of the country, not back to his flock; the good sheepdog goes in front of the sheep, gets at his nose and barks in the sheep's face and will not leave it till he turns it and heads it for the flock.

A dog I once owned was clever with lambs on the prairie. And knowing that when a lamb that had gone to sleep and let the flock drift away from it, when aroused would run for miles if suddenly disturbed, he had adopted a mode of action of his own. When told to hunt a stray, he located the tuft of grass or bush that held the lamb; then keeping his eye on the main flock he would draw up to the lamb like a cat stealing on a mouse or bird, and getting close to the lamb he quietly stuck his nose under the lamb and tossed him up in the air; so that when he lit running—and which was his first instinct—he should be started running in the direction of the flock and would soon find himself in the hand before he knew it. Having accomplished this feat the dog would turn round and show his teeth and grin and shake with laughter at his own smartness. When the flock was far away and Bob found a stray he caught it without further ceremony, put it down and sat on it till some one came and relieved him. This dog had a genius for saving himself trouble and in this way often showed wonderful brain power, especially when he was getting old.

The old country shepherd takes the puppy out when about four months old and the pup absorbs his knowledge by degrees and from the older dogs, and these latter often take the law into their own hands and administer the necessary chastisement to the puppies if they do not behave themselves, and thus relieve the master of the trouble.

One of the best sheepsdog trainers I ever knew never whipped his dogs, but if one behaved very badly he put a rope round his neck and hung it up for a short time just clear of the ground and scolded it. For, as he said, fogging them made them afraid of the hand that beat them, and it was good-by to waving from a distance or hand signals at even short or long distances.—Field and Fancy.

AT THE TRAPS.

A blue rock shoot will be given by the California Powder Works on the grounds of the Home Gun Club at Pinole to-morrow. The affair is strictly an invitation shoot and promises to be well attended by shooters.

The California Wing Club final shoot for the season took place last Sunday at Ingleside. High average for the club season of 1903 was won by C. C. Nauman, who lost but four birds out of a total of 100 in seven shoots. He was decidedly aided by shooter's luck on Sunday as he apparently did not shoot up to form. Three birds retrieved after they had been practically given up, saved the cup for him, and cut Ed. Donohoe out of first honors. One pigeon circled about, threatening to fly beyond the fence, but finally fell dead within

bounds. Another bird was only saved from landing out of bounds by striking the fence a bare margin of an inch or two from the top and fell back inside to count. The third pigeon, badly hit, lit in some weeds, got entangled therein and could not escape. This bird was strong enough to get away and was thought to be the bird to spoil Nauman's straight. Ed Donohoe scored straight and shot in fine form, in fact outshot his club competitors on this day, he was but two birds behind Nauman for the season. G. W. Gibson, Dr. A. M. Barker and Dr. E. G. McConnell also scored straight strings. The day was somewhat warm and unfavorable for the sport. The birds supplied were only an averging lot. Following the club race an eight bird pool was shot in which eight shooters each grassed clean. The scores and handicap follow:

Club match, 20 pigeons, distance handicap, \$150 added, 7 moneys, high guns—

Table listing scores for club match with names like Nauman, Donohoe, Gibson, etc., and scores such as 33 yds—23112, 12322, etc.

Eight bird match, \$5 entrance, club shoot, districe handicap, high guns—

Table listing scores for eight bird match with names like Halght, Keane, Nauman, etc., and scores such as 21112 111-8, 11112 112-8, etc.

The following are the averages of the shooters of the Davisville Blue Rock Club up to date for the gold and silver medals to be given to the highest and second highest average, the award to be made on October 1st for the season, which will close on that date. F. P. Smith has a strong lead thus far for the gold medal: F. P. Smith 91 1-5, Jones 86 3/4, G. Hoag 86 2-5, F. Hoag 86, H. Zentner 85, D. Grieve 82 2-5, Ed. Fissell 80 4-5, Harold Zentner 70, J. Montgomery 79, C. Snider 78, Wm. Grieve 72 3/4, E. Montgomery 66 3/4, Doc Burnett 60.

Coming Events.

- List of events including Rod, Gun, and Bench Shows with dates and locations like April 1-Aug. 15—Closa season for lobsters and crawfish, April 1-Nov. 1—Trout season open, etc.

- List of events including Field Trials with dates and locations like Aug. 18—Iowa Field Trial Association, Aug. 18—Nebraska Field Trial Association, etc.

- List of events including Jackson's Napa Soda is sold in every city, town and hamlet in the State.

Poultry Notes.

Too much weight is undesired in owls.
 All hard food is better for poultry than all soft food.
 When fowls lay soft eggs give plenty of lime and green food.
 Sunflower seed fed in small quantities impart a beautiful gloss to the plumage.
 While ducks are apparently very ready in their habits at the same time they are easily satisfied.
 It will lessen disease among poultry if all of the buildings are kept covered with whitewash put on thick.
 All breeds of fowls have certain strong points in their favor. So that purpose must always be considered.
 When a large number of fowls are kept under one roof the dangers of disease are very materially increased.
 One of the best things in which to set a hen at this time is a thick turf a foot or more square turned upside down.
 Wheat, chiefly owing to the amount of nutriment and albumen it contains, is the grain to feed for the production of eggs.
 Sell all of the old hens, especially the

poorest layers and all that for any reason it is unprofitable to keep longer.
 In breeding fancy chickens it is best to mark the young chickens while they are with the hen to avoid possible mistakes.
 Good food and care are essential to success in poultry raising, but there is no necessity in constantly fussing with them.
 In nearly all cases fowls confined in close quarters should have soft food once a day; early in the morning is a good time to give it.
 While there may be some advantage occasionally in cross-breeding, in a majority of cases it is throwing away good blood for mongrel.
 Since roosts, platforms and nests are the principal rendezvous for lice, they should be easy of access and so arranged as to be readily cleaned.

FOR SALE.

THE PACING MARE SWANHILDA. She is a handsome bay, coming seven years old, a natural pacer and with but little track work can pace a mile below 2:30 with ease. Gentle and kind and has been driven by ladies to buggy. She is a fine roadster and with proper training will make a great race mare. For pedigree and further particulars address
 W. L. McDONALD, Concord, Cal.

Re-Opened

To Close Tuesday, Sept. 1, 1903.

Pacific Coast Trotting Horse Breeders Association Race Meeting

—AT—

PLEASANTON

September 16, 17, 18 and 19

Entries Close Sept. 1st.

PROGRAMME:

FIRST DAY, SEPTEMBER 16.

- 1. 2:30 Class Trotting Stakes.....\$300
- 2. Green Class Pacing Stakes (Horses without records) 300
- 3. 2:11 Class Trotting Stakes..... 400

SECOND DAY, SEPTEMBER 17.

- 4. 2:19 Class Trotting Stakes.....\$300
- 5. Free-for-All Pacing Stakes..... 400
- 6. 2:20 Class Pacing Stakes..... 600

THIRD DAY, SEPTEMBER 18.

- 7. 2:17 Class Pacing Stakes.....\$400
- 8. Three-year-old Trotting Stakes..... 300
- 9. 2:13 Class Pacing Stakes..... 400

FOURTH DAY, SEPTEMBER 19.

- 10. 2:23 Class Trotting Stakes.....\$600
- 11. 2:23 Class Pacing Stakes..... 300
- 12. 2:14 Class Trotting Stakes..... 400

Conditions same as heretofore advertised for this meeting. Entries to close with GEO. A. KELLY, Pleasanton, and with the Secretary.

E. P. HEALD, President. F. W. KELLEY, Secretary.

All Druggists and Harness Dealers, or VITA OIL CO., 1533 Buchanan St., San Francisco. J. A. McKerron and J. O'Kane, Agts

CLEARING OUT SALES TUESDAY, SEPT. 29, 1903,

At Fred. H. Chase & Co.'s Salesyard, 1732 Market Street, San Francisco.

THE MEEK ESTATE, HAYWARDS, CAL., will sell all the Standard-bred Horses belonging to the Estate, comprising 35 head. There are Fillies, Mares and Geldings—3 4, 5 and 6 years old—by McKinney, Nutwood Wilkes, Welcome and William Harold, nearly all well broken to drive and all halter broken and gentle. The mares have colts at foot by William Harold 2:13 1/4 and Welcome 2:10 1/4, and have been bred back. Among them are the dam and a full sister to Janice 2:08 1/4, a sister to Cricket 2:10 and many other highly bred ones. A fine lot of Shetland Ponies will also be sold to close out the horses belonging to the Estate.

GABILAN STOCK FARM OF HON. JESSE D. CARR will, at this time, close out all its Trotting-bred Horses. There are 25 head of Yearlings, Two-year-olds and Three-year-olds; also a few highly bred Mares and Geldings. Also the grand young Stallion BOODLE JR. by Boodle out of Nina B by Electioneer. He is one of the greatest young stock horses in California. The young stock is by Boodle Jr., Nutwood Wilkes and other good sires.

THE SALE IS POSITIVE AND WITHOUT RESERVE

Send for Catalogues.

FRED. H. CHASE & CO.

1732 Market Street, San Francisco.

The Calf and the Cow.

The dairy calf, to be raised economically and with the greatest chance of developing into a valuable dairy cow, must be raised by hand, says J. H. Grisdale, in *Farmers' Review*. True, considerable skill and careful attention are necessary to succeed along this line, but careful observance of four or five principles will insure success. First, regularity of feeding; second, uniformity in quantity of food; third, uniformity in quality of food; fourth, uniformity in temperature of food; fifth, cleanliness. The young calf should be fed at least three times a day for two or three weeks, and preferably four times. The ration the first week or ten days should consist of whole milk fed at a temperature of about 100 degrees Fahr. This ration may be gradually changed to skim milk by introducing a small amount into the whole milk ration and gradually increasing the proportion, being careful to feed always at the same temperature. The place of the fat removed in the cream may be taken by oatmeal or flaxseed meal boiled, being careful to make but a very slight addition in the usual amount at any one time. Most ills that calves are heir to arise from a violation of some one of the principles I have mentioned or from a lack of cleanliness. Almost every case of scours or indigestion may be traced to some sudden change in the time of feeding, the quantity or temperature of food fed. "The boy is father of the man" is a trite saying, but even more surely the calf is mother of the cow. The ill-fed, dyspeptic, unthrifty calf can never hope to develop anything but a commonplace cow, and two or three successive generations of calves so treated are surely enough to chill the aspirations of the most sanguine dairyman. The calf once past the age of three months is usually safe, the danger from that time on lying in the risk of getting too much and no less. I believe a creameryman should know, where he furnishes a set of tests, that he would be able to go before court and swear they are correct. It does not take the patrons of a creamery long to find out whether the testing is being done carefully or not. I do not believe it pays for a man to attach an air of mystery to the method of testing or to keep the time of testing a secret and allow no patrons to be present. Rather announce the time the testing is to be done, and invite all to be present, and demonstrate how simply the system is carried out. Let a factory manager once gain the confidence of his patrons by accurate, careful work and the trouble over this question at the factory is about over.

World's Fair Score Card for Butter.

The management of the Louisiana Purchase Exposition have adopted the following scale of points for scoring the butter made on the exposition grounds, from the milk of cows entered in the competition for determining the capacity of the different breeds as dairy animals:

Flavor	30
Aroma	15
Grain	25
Color	15
Salt	10
Package	5

Total..... 100

This is practically the same scale of points which was used at the World's Fair in Chicago, and has been used by the different associations where butter has been entered for competition, except that the 45 points heretofore allowed for flavor have been divided, 15 being given to aroma and only 30 to flavor proper.

The old-fashioned way of marking and branding dairy cattle is rapidly becoming a thing of the past. We see it suggested that a leather strap be used, on which a brass check is slipped, the check bearing the number, name and pedigree of each animal.

Exercise the Bulls.

Above all things that a bull needs, and not nearly enough of them get, is plenty of exercise daily. On many farms where this item of expense is not counted, a man will walk and lead a bull for an hour daily, and while it is doubtless efficient, few of us wish to spend our time in this way. By far the cheapest and best way to exercise a bull is in a tread power, and we have so exercised our bulls for the past ten years. Nearly all of them learn it readily even if old, and it will do no harm to work them an hour each day. More than that, they can easily earn their board, running separator, or other light machinery. It will not do to have the power very steep, for they will slip. Another excellent way to exercise a bull is to work him in harness. There are many other ways to exercise a bull, but I think the best way is to tie him by a rope around his horns to an overhead wire or rope 50 to 100 feet long. Set a post 15 feet long, four feet in the ground, and run a wire from the top of this post to a tree or building. If the wire runs through a hole in the top of the post to a short post close to the ground, you can readily arrange a tightener with a rod with nut on the end. We use about the same plan to give our bull a sun bath, but use a rope running through a pulley at the top of post, and with a 100-pound weight on which will allow some give and take, but the rope is always tight. Many bulls, tied out in this way will not work around enough, and if you have such a one, let a yearling bull or two out to scrap with him, and both will get plenty of exercise. —Exchange.

Dairy Notes.

No man is infallible. Get all the best information you can and use your own cow sense.

Wash the milk bucket in cold or tepid water before scalding. Soda added to the washing water makes it more effective.

Clean pastures make clean feed, and clean feed makes sweet milk and cream, and these make nice, sweet butter. Try it.

A writer in the *Breeder's Gazette* says: "The ideal animal is now in sight and all the breeds are racing to satisfy this ideal."

To prevent cheese from growing hard keep it in a cloth wrung out of water. Remove the cloth only when the cheese is to be used.

There is no more critical time in the heifer's life than when carrying her first calf. Give her plenty of what she likes to eat. It will be the making of a good cow and a good calf.

Twenty-eight dairy cows were killed recently in Ohio by a stroke of lightning. The lightning struck a tree and ran along a wire fence near which they were standing.

Doubtless the best guide to the future is a careful study of the present in the light of the past. All animals, though differing from each other, have their merits.

Breaking the Colt.

The farm colt should be handled from the day he is born and a halter should be introduced to him while suckling. When he is once well halter-broken and can be led, a long step in the direction of making a gentle, tractable animal out of him has been taken. As he grows older he should be familiarized with harness, and they should be put gently on him, a piece at a time and allowed to wear it until he no longer minds it. After the halter, the next thing he should be accustomed to wearing is the collar. Manage to get it around his neck and fasten it without getting him excited, and after he has worn it several hours, take it off, and at the next convenient time put it on him again. When he no longer fears the halter nor the collar, the rest of the harness may be put on him and then taught the use of the reins by being driven around the yard. Instead of being the fearless rough rider

that many young men assume to be when breaking a horse, a man should be just as careful and tender as if he were teaching a child to do some kind of work, and the more patient and level-headed the trainer is, the better horse will be turned out. The practice of breaking a team of colts is always great fun for the boys, but it is a very bad practice and often results in making one or more horses with bad faults. Two unbroken colts should never be worked the first time together. When a colt is to be broken to work to a wagon he should be hitched in beside some old, steady and sensible animal that will not get excited, but will set a good example before its less experienced companion.

Bristles.

Don't let the pigs get too fat; see that they get plenty of exercise.

Wean from seven to ten weeks old, as it does not pay to let them pull the sow down to a skeleton.

First remove two of the strongest members of the litter to a separate pen; after two or three days take one or two more until all are away. In this way the milk flow of the dam will gradually grow less.

Do not put more than twenty pigs in one lot and grade the sizes. Put the smaller pigs by themselves, as the larger ones will rob them and often injure them.

Do not let the hogs at pasture go short of water for a single hour.

Suckling pigs should at all times have access to good, fresh water. Milk causes thirst that only water can satisfy.

Have only a good sire. Rapid and satisfactory growth for food consumed is the quality most desired in a pig, and you can't get it from a scrub.

It does not pay to allow a runt pig to battle for his life. His stronger brothers crowd him away from his food and he stands little chance.

If the runts are given to the boys and girls they will coddle them and make them pay. How the children do enjoy caring for a pet pig or lamb, and the money the animal brings at selling time is a special delight. —Farm Journal.

Flesh and Fat in Beef.

Kansas Agricultural College Bulletin No. 118 treats of flesh and fat in beef.

Four animals were secured by the college for experiments, a steer 3 years old past that had been fed a grain ration from the time it was weaned and weighed 1,600 pounds and was very fat. The second animal was a pure bred Hereford, and was 3 years old at the time of the demonstration and weighed 1,240 pounds on foot. A canner cow was bought that weighed 975 pounds, also a young heifer to represent baby beef. When the carcasses were cut up it was found that the heavier steer furnished beef that had a higher percentage of fat consequently more waste than the Hereford; that he was overfed and superfluous fat put on him that was a waste when he came to the block. The canner cow had too much waste and only furnished 41 per cent of beef to her live weight, while the Hereford furnished 65 per cent. The Hereford brought \$5.25 per hundred live weight against \$1.50 for the canner.

In the cooking test the flesh of the Hereford and the baby beef were preferred in about the same proportions. There was great waste of fat in the heavy steer.

The college calls the attention of breeders of beef animals to this test and warns them and feeders to rather make an animal that will carry flesh in place of fat.

Keep an account with each of your cows, and learn if they are helping to support you or not. Get returns for your care and trouble.

Only the rich man can afford to keep poor cows; the poorer the farmer, the better the cows should be.

What Is the Value of Skim Milk?

Three things chiefly govern in answering this question which is constantly being submitted to the Dairyman.

1) The condition of the skim milk, its richness, sweetness and purity. We believe that skim milk from a centrifugal separator, fed sweet and fresh within an hour after it is separated, night and morning, is worth double in its feeding value and value, what ordinary skim milk is worth, when separated either by settling, open setting, or the common method of the creamery. In this connection it should not be forgotten that an important part of the nutritive value of skim milk as a food lies in its purity. Freshly separated skim milk is in its best condition in this respect, if it is fed in clean vessels.

2) The second important consideration that governs value is the age and character of the animals it is fed to. In hog feeding, for instance, it is important to feed skim milk to young pigs rather than old hogs, if the largest profit is expected. A pig weighing 50 to 100 pounds will make nearly double the profit on skim milk that the same animal will make weighing 150 to 200 pounds. Here comes in also the question of the kind of animals it is fed to. In our own experience we find the highest profit in feeding our skim milk, freshly separated from the farm, to registered and grade heifer calves. A likely, three-quarter-grade heifer calf at eight months of age will consume about 4000 pounds of skim milk. With it should be fed, say fifty parts worth of blood meal, a dollar's worth of oats, and the same value in good hay or pasture. The returns in cash will be found considerably greater than if the milk is fed to pigs of the same value to start with.

3) Now we come to the most important equation of all—the man who feeds it.

So much depends on the knowledge and understanding of the farmer. Has he made any special study of how to feed skim milk? Does he know that if fed to pigs in conjunction with some other food, say middlings, corn meal, boiled potatoes, etc., that the value is greatly enhanced? This point was finely illustrated in an experiment made by C. P. Goodrich of Wisconsin. He found that a hundred pounds of good skim milk would make five pounds of pork when fed alone, so that a bushel of shelled corn would make ten pounds of pork when fed alone. It is not to be found to his surprise that if the skim milk and corn meal were mixed and fed together, the gain from the union was 100 per cent. Then, besides, there is an understanding of the value of cleanliness of pails and other feeding utensils. This is particularly important with calves. If only a calf has sickened and gone wrong because of the filthy condition of the feeding pail.

All these considerations are important to get the last full profit out of our skim milk.

In Europe the farmers have a much higher idea of the feeding value of skim milk than is entertained by the farmers in the United States. The Belgian farmers fix the value of this important food at 10 cents per 100 pounds. But this value is obtained by the fact that the Belgian farmers are thoroughly well posted in the art of feeding and developing young animals. This is a great consideration. Not long since a very successful dairy farmer said to us:

"The more I study this business of raising the stronger is my conviction that the key-note to the whole question is in developing the calf. If a man gets wrong there he is apt to be wrong all everywhere."

"There is a world of truth in that statement and it is easy to see what a bearing it has on the profit a man gets from his skim milk.—Hoards Dairyman.

Order up on Jackson's Napa Soda.

Points About Hog Feeding.

Nothing has yet been found which fills the bill so well as a ration of which the basis is skim milk in conjunction with finely ground oats or barley and shorts. All these are flesh formers, says Up-to-Date Farming. Corn is a fat former. A very satisfactory mixture consists of finely ground oats 5 parts, finely ground barley 2 parts, shorts 2 parts and oil meal 1 part.

Provide private runs for the pigs, in which place a shallow trough containing a gruel made of skim milk or buttermilk and the meal mixture. Start with shorts, adding the coarser meals as the pigs become older. No corn should be fed until the pigs are three months old. By this treatment, coupled with plenty of exercise, they develop good, healthy frames.

In weaning the common method is to shut the pigs up and let the sows go out in the pasture. Then the music begins. Better have a feeding floor adjoining the hog house. The feeding can be done here. Shut the sows in on this floor and allow the pigs every access to them. Feed the sows all the oats they can eat; give them all the water they can drink. The pigs are fed all they can eat. They go in and can get to the sows. By the end of a week the sows will be dry, and the pigs so disgusted going in and finding nothing that they'll just quit. You will find by the end of the week not a pig will go near its mother. You can turn the sows right out to pasture with the pigs and there is no more trouble. This is not a theory, for it is a very easy thing to dry a sow by feeding nothing but oats on a dry floor, and letting her have plenty of water.

The cow that yields the greatest number of pounds of butter fat at the least cost per pound is the most valuable cow for the dairyman, and it does not matter whether she is fat enough for the butcher or is so thin that all her ribs show.

The Chicago beef trust cases are now in the Supreme Court of the United States, counsel for the packers having appealed from the decision of Judge Grosscup granting final and permanent injunction.

Sadie Vale Concordia, the Holstein-Friesian cow which topped the females in the sale of McAdam & Von Heyne at \$2200, has been sold by L. J. Fitzgerald who then sold her to C. F. Hunt, the well known New York breeder of those black and white dairy cattle. Mr. Hunt has also bought from Mr. Fitzgerald the famous bull Paul de Kol, which is a son of Sadie Vale Concordia and for which Mr. Fitzgerald paid \$2300, the highest price at the vendue named.

One Experience

with a lame horse is enough. You lost money on that one. You will never need to do so again if you will use

Kendall's Spavin Cure

the old reliable remedy for Spavins, Ringbones, Splints, Curbs, etc., and all forms of Lameness. Cures without a blister as it does not blister. Price \$1 in six for \$5. As a liniment for family use it has no equal. Ask your druggist for KENDALL'S SPAVIN CURE, also "A Treatise on the Horse," the book free, or address DR. B. J. KENDALL CO., ENDSBURG FALLS, VT.

Dr. Smith's Vita Oil Used after the Race Takes out soreness, lameness and all aches and pains. Try it.

BEST BY TEST FOR MAN AND BEAST. All Druggists and Harness Dealers or Vita Oil Co., 1533 Buchanan St. San Francisco, Cal.

UNDER ELECTRIC LIGHT! GRAND AUCTION SALE OF TROTTING HORSES

Consisting of Sons and Daughters of McKinney 2:11 1-4, Diablo 2:09 1-4, Truman 2:12, Hart Boswell, Advertiser 2:15 1-4, Richards Elector, Lustridon, El Benton, Good Gift, Etc.

Some of the Finest Ever Offered in California.

This is a splendid opportunity to get some of the best bred as well as the finest looking youngsters (all well broken) to be sold this year. Catalogues will be issued immediately. Any one having horses they wish to dispose of at this great sale will have an opportunity by sending to me for blanks and terms of sale. This will be one of the best sales to be held, and as it will take place after the State Fair closes and before the Breeders meeting at Pleasanton begins, owners should not hesitate to list their horses.

The fine location, splendid box stalls, and myriads of electric lights and magnificent pavilion with its 1000 chairs where all visitors can see these horses offers advantages not approached by any other sales place west of Chicago. Sale will take place

MONDAY EVENING, SEPT. 14, 1903.

Commencing promptly at 8 o'clock at the famous OCCIDENTAL HORSE EXCHANGE,

Horses at salesyard Sept. 12th. 246 Third St., near Folsom, San Francisco WM. G. LAYNG, Auctioneer.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA. TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD. The EMPIRE PARLOR—the PALM ROOM, furnished in Carlose, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unequalled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

Pedigrees Tabulated and type written ready for framing Write for prices. BREEDER AND SPORTSMAN, 36 Geary street, San Francisco, Cal.

FOR SALE.

MIRIAM E. OWN SISTER TO BEN F. 2:11 1/4, winner of the 2:17 race at Vallejo, Thursday, August 13th. MIRIAM E. is a very handsome large black mare, five years old, a natural pacer, and though worked but very little can show great speed. She will be sold right, is a fine roadster and a great prospect for a race mare. Issued and all right every way. Apply to EDW. DINKELSPIEL, Suisun, Cal.

TEAM FOR SALE.

CONSOLATION CLASSES.

TROTTERS. A PURSE OF \$400 will be given for Trotters eligible to the 2:17 Class who have started at this meeting and not won first or second money. Horses to be named overnight. Entrance fee 5 per cent; nothing from winners. Money divided 70%, 20%, 10%. Races to take place October 29.

PACERS. A PURSE OF \$400 will be given for Pacers eligible to the 2:15 Class who have started at this meeting and not won first or second money. Horses to be named overnight. Entrance fee 5 per cent; nothing from winners. Money divided 70%, 20%, 10%. Races to take place October 30.

Nominators have the privilege of naming two horses from the same stable or owned by the same person on one entrance fee. Nominators in any race that should fail to fill may on September 8th transfer their entry to any other class that filled in which their horse is eligible. Entrance 5 per cent, of which 2½ per cent must accompany the entry and 2½ per cent to be paid on the opening day of the meeting.

MAKE YOUR ENTRY ON TIME

And be sure that It is postmarked not later than September 1, 1903.

CONSIDER THIS!

You can enter the same horse in three or more classes and have plenty of time between races. The length of the meeting permits of the program being arranged so that every horse in attendance can be started in several races.

CONDITIONS.

Entries to close Tuesday, September 1, 1903.
Entries not declared out at 4 o'clock P. M. on the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.
Stakes will be divided into four moneys: 50, 25, 15 and 10 per cent.
Entrance fee five per cent of Stake. 2½ per cent of Stake in cash—draft or check—MUST accompany Entry, balance due and must be paid the first day of the meeting. 5 per cent of the amount of the Stake additional from money winners.
If there are less than four starters they may contest for the entrance money paid in to be divided 50, 30 and 20 per cent.
The Management reserves the right to declare two starters a walk over. When only two start they may contest for the entrance money paid in, to be divided 65% per cent to the first and 33% per cent to the second.
A horse distancing the field shall only be entitled to first and fourth moneys; but in no other case will a horse be entitled to more than one money.
All harness races, unless otherwise specified, mile heats, three in five.
Distance in all heats shall be 80 yards, but if the field is more than eight 100 yards.

Hopples barred in trotting races, but will be permitted in pacing races.
The Association reserves the right to start any heat after the fourth score, regardless of position of the horses.
All Stakes not filling satisfactorily to the Board of Directors may be declared off.
Racing colors should be claimed with entries, must be named by 5 P. M. on the day preceding the race, and must be worn on the track in all races. Colors will be registered in the order in which they are received, and if not named, or when colors conflict, drivers will be required to wear colors selected by the Secretary.
The management reserves the right to change the hour or date of any race, and the right reserved to declare off or postpone any or all races on account of the weather or other sufficient cause.
Conditional entries will be treated the same as regular entries, and nominators held under rules.
Any race that may be started and unfinished on last day of the meeting may be declared ended and money divided according to the rank of horses in the summary.
Otherwise than as herein specified in these conditions, Rules of the National Trotting Association (of which this Association is a member), except Rule 4, to govern.

STAKES FOR RUNNERS

Entries Close September 19, 1903.

Los Angeles Derby. \$500 ADDED. For Three-year-olds. Entrance \$10; \$30 additional to start. \$500 added, of which \$75 to second and \$50 to third. Colts to carry 122 lbs.; geldings, 119 lbs.; fillies, 117 lbs. Winners in 1903, of a stake of the value of \$1100, to carry 3 lbs.; of two such or one of \$3000, 5 lbs. extra. Non-winners of a stake in 1903 allowed 5 lbs.; non-winners of a race of \$500 in 1903, 3 lbs. Non-winners of a race of \$400 in 1903, 10 lbs. Maidens 17 lbs. Allowances not accumulative.

Jonathan Club Stakes. \$400 ADDED. For Two-year-olds. Entrance \$5; \$25 additional to start. \$400 added, of which \$60 to second and \$40 to third. Winners of a stake of the value of \$1000 to carry 3 lbs.; of two of any value, 5 lbs. extra. Non-winners of a stake allowed 3 lbs.; and if such have not won three races, 5 lbs.; two races, 8 lbs. Maidens, 15 lbs. Five and a half furlongs.

The Chanslor Selling Stakes. \$400 ADDED. For Three-year-olds and upward. Entrance \$5; \$25 additional to start. \$400 added, of which \$60 to second and \$40 to third. The winner to be sold at auction. Those entered to be sold for \$1800 to carry weight for age. Allowances: 1 lb. for each \$100 to \$1000; then 2 lbs. for each \$100 to \$300. Winners of a race of the value of \$900, or of two races other than selling purses after the closing of this stakes not to be entered for less than \$800. Starters to be named with selling price, through the entry box the day preceding the race, at the usual time of closing. Seven furlongs.

The Pasadena Stakes. \$100 ADDED. For all ages. Entrance \$5; \$25 additional to start. \$400 added, of which \$60 to second and \$40 to third. Three-year-olds to carry 100 lbs.; three-year-olds, 115 lbs.; four-year-olds and upward, 120 lbs. Non-winners of a race of \$500 in value this year allowed 5 lbs.; of \$300, 8 lbs. Maidens, 12 lbs. Allowances accumulative. Six furlongs.

The Mott Handicap. \$400 ADDED. For three-year-olds and upward. Entrance \$5; \$25 additional to start. \$400 added, of which \$60 to second and \$40 to third. Weights to be announced at 10 a. m. the day before the race. Winners of other than selling purse race after the announcement of the weights to carry 5 lbs. extra. One mile and a sixteenth.

The Long Beach Handicap. \$400 ADDED. For all ages. Entrance \$5; \$25 additional to start. \$400 added, of which \$60 to second and \$40 to third. Weights to be announced at 10 a. m. the day before the race. Winners of other than selling purse race after the announcement of the weights to carry 5 lbs. extra. Six furlongs.

The Santa Anita Handicap. \$400 ADDED. For three-year-olds and upward. Entrance \$5; \$25 additional to start. \$400 added, of which \$60 to second and \$40 to third. Weights to be announced two days before the race. Winners of other than a selling purse race after the announcement of the weights to carry 5 lbs. extra. One mile and a furlong.

BALLISTITE

The Standard Dense Powder of the World.

STILL LEADS AT THE TRAPS OR IN THE FIELD.

Ballistite wins from the limit marks in distance handicaps, at either live birds or flying targets, as it always gives the highest velocities with the closest and most even patterns at all ranges. Ballistite is absolutely unvarying in results being waterproof, smokeless, odorless, without residue, resurfaces lower than black powder, unaffected by age or climatic changes, and never pits, rusts or corrodes the barrels. Ballistite is sold with above guarantee.

Take No One's Word. Try It for Yourself.

BALLISTITE

The Standard Dense Powder of the World.

CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.

IT PENETRATES and DRIES IN quickly and DOES NOT GUM and FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS AND BRITTLENESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed. It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.

It PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH, STRONG, ELASTIC WALL and HEALTHY FROG—a FOOT WHICH WILL STAND WORK on any surface.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds, due to its use.

It is a CERTAIN CURE for THRUSH and SCRATCHES

We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:—Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2 1/2 Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free.

Don't fail to read "ad." giving information concerning Campbell's Iodoform Gall Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

JAS. B. CAMPBELL & CO. Manufacturers, 412 W. Madison St., CHICAGO, ILL.

SURE SHOT

DESTROYS WORMS

The puppy is liable to destruction from worms. 'Tis the critical period in a dog's life. Canine worms meet "sure" destruction when

SURE SHOT

is administered. After that, it builds up the growing dog's constitution, develops bone and muscle. It makes thin, puny and weak puppies plump, animated and strong. 50c. by mail, prepaid.

SERGEANT'S CONDITION PILLS

are the best liked and easiest to give of all alteratives and tonics. Incidentally any disease that a dog is likely to have will be speedily relieved and ultimately cured. Of dealers, 50c and \$1.00. By mail, prepaid.

Sergeant's Carbolic Soft Soap

is the "best ever" and for sale everywhere. 25c. of dealers. By mail 35c.

An order, or 8c. in stamps will entitle you to our LATEST Dog Book and Pedigree blank, mailed FREE.

GRAND AUCTION SALE OF TROTTING HORSES

Consisting of Sons and Daughters of
McKinney 2:11 1-4, Diablo 2:09 1-4, Truman 2:12, Hart Boswell, Advertiser 2:15 1-4, Richards Elector, Lustridon, El Benton, Good Gift, Etc.

Some of the Finest Ever Offered in California.

This is a splendid opportunity to get some of the best bred as well as the finest looking youngsters (all well broken) to be sold this year. Catalogues will be issued immediately. Any one having horses they wish to dispose of at this great sale will have an opportunity by sending to me for blanks and terms of sale. This will be one of the best sales to be held, and as it will take place after the State Fair closes and before the Breeders meeting at Pleasanton begins, owners should not hesitate to list their horses.

The fine location, splendid box stalls, and myriads of electric lights and magnificent pavilion with its 1000 chairs where all visitors can see these horses offers advantages not approached by any other sales place west of Chicago. Sale will take place

MONDAY EVENING, SEPT. 14, 1903.

Commencing promptly at 8 o'clock at the famous OCCIDENTAL HORSE EXCHANGE,
246 Third St., near Folsom, San Francisco
Horses at salesyard Sept. 12th. WM. G. LAYNG, Auctioneer.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

San Francisco, Saturday, Sept. 5, 1903.

NO BETTER OPPORTUNITY was ever offered in California to get good horses at auction than the sale of the Meek estate and Gabilan Stock Farm horses will afford at Fred H. Chase & Co.'s salesyard, 1732 Market street, San Francisco. The sale will be in the evening by electric light, and the date is Tuesday, September 29th. The Meek estate horses are sold to close out the horses belonging to the estate. They are by such stallions as William Harold 2:13½, Welcome 2:10½, Direct 2:05½, McKinney 2:11½, Nutwood Wilkes 2:16½; Sidney 2:19½, Fallis, Azmoor, Richards Elector, Guide Lustre, the great Steinway and others, and nearly all trace to Bonnie Belle, the great race mare by Williamson's Belmont. It is fashionable blood and high-class race winning blood. The Meek Estate has had some very fast race winners from the mares to be sold at this sale. Nearly every animal to be offered is broke so that a lady can drive it. The Gabilan Stock Farm horses are mostly young horses and there are many great prospects among them by Nutwood Wilkes, Boodle Jr., and other good stallions. This will be the best sale of the year.

THE GOLDEN GATE FAIR Association of Alameda county is out with an announcement for a meeting to be held at the track of the California Jockey Club at Oakland beginning Saturday, September 19th, and closing Saturday, September 26th. There will be two harness races and three running events each day. Entries to the harness races, which are for purses of \$300 and \$250 will close Monday, September 14th, two days after the closing of the State Fair. This will give all the horsemen a chance to race here before going south to Hanford and Los Angeles. See advertisement.

THE PLEASANTON MEETING has been declared off. There were not enough entries received for a four days' meeting. The Pleasanton people did not want to give one of shorter length, and the Breeders Association did not think it advisable to put the horsemen to the expense of going to Pleasanton for only one race. It is a disappointment to all concerned.

THE CATTLE EXHIBITS at the State Fair will be judged next week beginning Monday when the beef breeds will be before the judges. Prof. Carlyle of Wisconsin, whose judging was a revelation to California stock breeders last year will judge again this year.

HANFORD will give a week of racing from October 5th to 10th. \$3000 in purses are offered and the list of events will be found in our advertising columns. Hanford has one of the best half mile tracks on the Coast. The races there draw larger crowds than any district fair on the circuit, and the horsemen are well treated. Enter at Hanford and you will enjoy the week spent there. Entries close Tuesday, September 15th.

Races Admission Day.

The San Francisco Driving Club will hold a day of racing at Petaluma track on Wednesday next, Admission Day. There will be five harness races and three running events during the day. The entries to the harness events are as follows:
 First race, 2:40 class—C. E. Finch's Ben, O. Taylor's Bill Ellsworth, W. Peas' Monkey, J. McTigue's Mike, S. Hable's Little Egypt, A. Wolff's Lawrence W, G. Davenport's Dexterity.
 Second race, 2:25 class—L. Jensen's Butcher Boy, D. Leiginger's Cicero, S. Watson's Doc, S. Sprague's Clara L, H. Schottler's King V.
 Third race, green class—H. Schottler's Lady Dinna, E. Buck's Zulu Lass, A. Wolff's Toughy A, B. Levy's Monaca, Dr. McLaughlin's Pat Carroll.
 Fourth race, free for all—B. Smith's Echora Wilkes, S. Watson's Al Sandy, J. O'Kana's Sandow, C. Becker's Dan Aldan.

Close of the Breeders Meeting.

One of the most successful meetings held for years by the Pacific Coast Trotting Horse Breeders Association came to a close at Petaluma on Saturday last. There have been many meetings held by this association where there was a larger attendance and more numerous entries in the stakes and purses, but never has there been cleaner or better races than the contests at Petaluma this year and the association will have no deficit to face when the accounts are balanced. The racing of the first two days of the meeting was described in our issue of last week. On Friday three events were on the card. The 2:17 pace had five starters and after the chestnut gelding Monroe S. by Dictator Wilkes had won the first heat and reduced his record to 2:13½, the Strathway gelding Cuckoo, well handled by trainer Leggett won the next three heats and the race, taking a record of 2:13½ in the third heat.

The two year old division of the Breeders Futurity had but two starters and the Direct colt Almaden had a calk walk, trotting the first heat in 2:25½ and the second in 2:22½ all but distancing the colt Marvin Wilkes.

The roadster race brought out a surprise in the gelding Dan Frasier, by Secretary, that Joe Cuicello landed first money with easily in straight heats. The Secretary horse trotted the last heat in 2:20½ and Mr. Cuicello immediately secured a lease on him from the owner, D. McGovern of Petaluma. As Cuicello has won a race with the horse since reaching Sacramento his judgment of his abilities was evidently about right.

The last day saw one of the largest crowds that has been seen at a harness meeting in California for some time. The grand stand was packed and all available space around it was filled with people to see the races.

The first race of the day was the green class pace with six starters. Colonel C. was thought to have a mortgage on first money, but after he had won the initial heat in 2:13½, L. B. Daniels got the good looking chestnut gelding Edwin S. to the front in the next three and got the big end of the stake. Edwin S. is by the stallion Dr. Hicks, a son of Durfee 11,256. The dam of Dr. Hicks is Gazelle, by Buccaneer, and Gazelle is the grandam of Kelly Brigs 2:10½. In the third heat of this race the mare Lady Glenway got tangled in her hobbles and broke her leg. The association gave her owner third money. All the other horses were distanced.

The California, the \$2000 stake for 2:24 class trotters, the largest stake offered for a harness race in California, had a field of eleven starters and a better looking bunch of trotters could not be found on any track.

Dr. Hammond on his splendid showing at Vallejo was installed favorite, but ran up against a better horse in George G., the best gaited green trotter that has appeared on the circuit for a long time. He was the longest kind of a shot in the betting and his owners, Messrs. Boust and Albertson of Fresno must have won quite a sum on his victory. George G. won the first heat handily from Daisy B. in 2:14½, who was lame. In the second heat George G. made a bad break going away and the chestnut gelding Deputy won, reducing his record to 2:13½ with Daisy B. again second. The third heat was taken by George G. in 2:12½ with Dr. Hammond a good second, but out trotted. Daisy B. was tenth and was then withdrawn. The deciding heat was much like the third and was trotted in the same notch with Dr. Hammond in second place and Deputy third. Seven of the eleven starters remained in until the finish.

The last race was the 2:17 class trot which was won by the good gray trotter Rozelle 2:17½ in straight heats without equalling his record. What Is It was second and Hank third, and the best time 2:18½. The meeting was a pronounced success throughout. The full official summaries will be found on page seven of this issue.

The Two Year Olds.

Both two year old divisions of the first Pacific Breeders Futurity were decided at the Breeders meeting this week and the record made by the winning trotter was three fourths of a second lower than that made by the winning pacer. The pacing division as reported last week had but three starters which comprised all upon which the starting payment was made. These were Seymow by Diawood 2:11, Friskarina by Bayswater Wilkes 2:25½ and My Way by Strathway 2:19. Seymow won first and third money, and Friskarina was second, My Way being distanced in the last heat which was paced in 2:23, good time for a two year old.

Seymow is by Diawood 2:11 son of Diablo and this performance makes Diawood the first producing son of Diablo. The dam of Seymow is Nancy H. by Upstart. Upstart is by Sterling 6223, out of Claribel by

Privateer 8135. The second dam of Seymow is by a son of Gen. Taylor and the third dam by the thoroughbred horse Leinster. Seymow was bred by Elmo Montgomery of Davisville, Yolo County, Cal.

Five two year olds were paid up on in the trotting division of the stake, but only two came to the post. The race was won handily by Mrs. C. A. Durfee's black colt Almaden in straight heats in 2:25½ and 2:22½. Almaden finished the second heat strong and could doubtless take a record close to 2:15 this year, but there are no more races for him and he will be thrown out of training.

Almaden is a black colt and one of the best gaited trotters ever seen in California. He is by Direct 2:05½ and his dam is Rose McKinney a daughter of the great McKinney 2:11½, next dam by Forrest Clay 1934. Mrs. C. A. Durfee, wife of the well known horseman Charles Durfee is the owner of Almaden. Mr. Durfee trained the colt at San Jose this spring and when he and his wife left for a trip to the East last month the colt was turned over to Mr. J. W. Zibble who drove him in the race and handled him well. Mr. Zibble is very enthusiastic over the prospects of Almaden and thinks he will surely be a 2:10 trotter at three years of age.

State Fair Program.

The regular harness events for which entries have closed have been programed for the balance of the State Fair meeting as follows:

Saturday, Sept. 5th—2:20 pace, \$1000—Jonesa Basler, Miss Georgie, Tom Carnal, Edwin S., The Mrs., Colonel C., Al Sandy, Swanhilda, Dot, Monogram Allendale, Nance O'Neill, George, Mildred O., Ira, Lady Petrina, Ben F.

Monday, Sept. 7th—Stanford Stake, three year old trotters, value \$1790—La Correcta, Queen Mab, Dixie S., Electro Mac, California Poppy, D. E. Knight, Owynex, Tuna, Swift B., Bromwell, The Jester, Amado, Acme.

Tuesday, Sept. 8—2:30 trot, \$500—Louise Croner, Nipper, Sproul, McPherson, Rosie Woodburn, Dollexa, Sonoma Girl, Gertie H., Una K., Donnybrook, Moor Rose, Daisy B., Larkin W., Getaway, Jupiter B., Tee Dee Cee.

Wednesday, Sept. 9th—2:17 pace, \$500—Dakan D., Miss Georgie, Smuggler, Cuckoo, Al Sandy, Dot, Billy F., Monogram, Penrose, Allendale, Monroe S., Ira, Ben F.

Thursday, Sept. 10th—2:17 trot, \$500—McPherson, What Is It, Portrero, Rozelle, Verona, Hank, Lady Rowena, Ole, Zambra.

Friday, Sept. 11th—Consolation trot for three year olds that do not win first or second money in Occident or Stanford Stakes, \$400 Consolation trot for horses entered in Green class trot, \$400.

Saturday, Sept. 12th—Consolation pace for the class that has the most starters during the meeting, \$400. Consolation trot for the class that has most starters during the meeting, \$400.

Layng's Auction Sale.

The sale of horses to be held in the Occidental Horse Exchange on Monday evening, September 14th, by Wm. G. Layng is attracting a great deal of attention. A perusal of the catalogue shows that there never was such a number of McKinney and Diablo colts, fillies, geldings and mares offered by public auction in this city before. There is a beautiful stallion by Sable Wilkes 2:18 out of Menlo Belle, also a sister in blood to Eula Mac 2:17, the three year old that swept her field. There are some trotters and pacers by Falrose 2:19, Hart Boswell, Sidney 2:19½, Gossiper 2:13½, Clarence Wilkes 2:28½, and in fact, there are, in these consignments, forty-five representative descendants from all the representative sires in California.

There are five splendidly matched teams; one team can pace in 2:20, and are perfect in size, color, gait and speed. One McKinney gelding that is so well known to the horsemen in San Francisco that he will be recognized at once when led into the ring, and that is, the trotting horse Don Fulano. Very few horses have ever out trotted him on the speed track. El Primo, that marvelous "guideless wonder," by Diablo 2:09½ is to be sold. He is as near perfection as a horse can be. There are no culls in this sale. These horses and mares have all been selected by Mr. Layng. He is not offering anything that he cannot guarantee. Besides the trotters and pacers there are several fine carriage teams, saddle horses and all purpose horses. The sale is peremptory, and, as it commences promptly at 7:45, the chairs in the big pavilion should be filled by that time. This sale is to supply a long-felt want among seekers of good, useful, well-bred, well-trained trotting and pacing horses that are ready to be hitched up and driven immediately after the sale. Catalogues will be distributed Tuesday next. Horses at salesyard next Saturday.

JOTTINGS.

THE BLOOD OF WILLIAMSON'S BELMONT is coming to the front year after year in the California bred trotters and pacers. Directum 2:05½ had it, John A. McKerron 2:04½ carries it, Lou Dillon, the only two minute trotter was aided in her marvelous flight against time by it, and Tuna, the little filly that won the Occident stake at the State Fair last Monday, and the three year old trot at the Breeders meeting the week previous, carries a goodly quantity of the same hot blood. Tuna is by James Madison 2:17½, and Ituna, her dam, is by Steinway out of Nettle Ward by Echo 462; next dam the Mills mare by Goldfinder a son of Boston, and next dam by Langford son of Williamson's Belmont. James Madison 2:17½ was by Anteeo 2:16½, second dam Lucy Patchen by Geo. M. Patchen Jr., and third dam the thoroughbred mare Fanny Branham by American Boy Jr. a son of the same horse that sired Williamson's Belmont. The Belmont blood is the very best thoroughbred strain that has been used in breeding the trotter in California.

If all the owners and trainers in California carry out their avowed intentions to race their horses on the other side of the Rocky Mountains, next year, there will not be enough horses left in this State to get up a two-days' meeting. The cutting off of the district fair appropriations by Gov. Pardee has made a worse wreck of our circuit of fairs than anything that ever happened it. The consequence is that the horse owners are all disgusted, the trainers in the same frame of mind, and they are planning now to make their campaign of 1904 beyond the Rockies or up in Oregon and Washington. There should be enough enterprise left in California to organize a harness racing circuit of eight or ten weeks and announce the purses and stakes therefor early in January, but there is not much chance of any such thing being done, and I look to see a regular hegira of harness horses to the East in June and July next season.

When one stops to figure on the amount of money that is paid out every year by California owners for harness, bikes, carts, shoeing, railroad fare, hay and grain and other things necessary to the training and racing of trotters and pacers, to say nothing of the salaries of trainers, and caretakers, some idea of the business can be gained, and it will be a shame if harness racing is permitted to die out in this State. The money that has been paid to breeders in past years for trotting bred stock by Eastern men of means is a very large sum, and could be increased every year were the annual circuit of fairs to be maintained. The Governor's veto of the district fair appropriations has cost California horse breeders at least a million dollars this year, and it will be more next year unless some plan is arranged to hold a circuit of harness meetings without State aid.

The class of three year olds racing this year in California is a very good one, and there are some that may yet take a very low record, if not this year at some future date when they are older. But when we look back to the year 1895, when Zombro, Stam B., Jasper Ayers, Dr. Puff, Iran Alto and several other well known three year olds were battling for first money, the comparison of these of 1903 with those of 1895 is not of that nature that makes a breeder grow enthusiastic over the progress that has been made. It is not that we have gone backward instead of forward in the breeding of trotters, however, that is the cause of the comparatively poor showing this year, but it is that a very large reduction in the number of meetings given has stopped the majority of breeders from training and racing their three year olds. The year 1895 was a year of depression in all business in California, and horse value were low in comparison to what they had been, but there were ten horses raced then to one this year, and all owing to the fact that a good circuit was organized and advertised early in the year. The circuit opened July 20th that season with the Breeders meeting at Sacramento, and the harness horses went from there to Oakland, Napa, Petaluma, Woodland, State Fair, Stockton, San Jose, Salinas, Hollister, Santa Ana and Los Angeles. The dates for all these meetings were claimed early and advertising of purses and stakes was begun as early as March. Every association offered a good purse for three year olds, and as colts and fillies of this age thereby had an earning capacity many were put in training. If the same conditions had existed this year there is no doubt but there would have been as many trained, and colts that could trot in 2:12 in a race would have been developed. It is the chance to

earn money that induces owners to incur training expenses. Few men will hire a trainer and spend money on a string of horses unless there is a good circuit of meetings in sight near home. After waiting until July this year several California associations concluded not to give meetings because there were not horses enough in training. Had a half dozen of the larger associations organized a circuit last February and advertised some good purses and stakes there would have been plenty horses to have filled all the events necessary to give a good meeting. Every owner and trainer is wondering if the situation will be different next year. It is doubtful and that is the reason they are all figuring on an Eastern trip in 1904.

On another page of this week's BREEDER, Mr. Ira Pierce, owner of Sidney Dillon, corrects some statements made in the "Jottings" department last week. The statements were made to me by one who was for years an employee of the Santa Rosa Stock Farm, and while there were a few minor discrepancies in them, owing, no doubt, to a slight lapse of memory, they were in the main correct, as Mr. Pierce's article shows. That both Sidney Dillon and Lou Milton had speed, has at no time been questioned by those who have investigated their history in the least. But that they showed class enough to be deemed profitable race horses is disproved by the fact that they were not raced. It is a pleasure to know that Sidney Dillon was regularly trained, as in one of the Stock Farm's regular paid announcements of 1901, it is there stated that "he was never trained." While I am not one of those who believe that development is necessary in a sire to make him transmit speed, I hold that breeding to sires that have proved they possess that quality is the safest way. Lou Milton was a cranky mare according to the statements of those who had much to do with her, and prior to her producing Lou Dillon, she had given to the world the following record holders: Redwood 2:21½, Ethel Mack 2:25 and Alien 2:26½, all by Anteeo. Redwood has sired Fannie Foley 2:19½, Red Oak 2:21 and the dam of Miss Kate 2:24½. Alien produced Mowitza 2:20½ and Sister,

and they were Venus 2d 2:11½, Lottie Parks 2:16½ and Psyche 2:17½. The latter has since knocked a second off that record, and all are now in the broodmare ranks—Venus 2d having a fine suckling colt at foot by Cresceus the champion trotting stallion. This is a pretty fashionably bred colt when one stops to consider his pedigree. By the champion trotting horse and out of a mare sired by an own brother to the sire of the champion trotting mare. It is the only one in existence bred that way.

The best trotter that has shown thus far on the California circuit is the bay gelding George G., winner of the California Stake of \$2000 for 2:24 class trotters at the Breeders meeting at Petaluma and also winner of the green class trot at the State Fair last Tuesday. George G. has been trained and is driven by J. R. Albertson of Fresno, who had little to say of his horse before the racing season opened, and consequently had a dark one to spring when the money was in sight. George G. is a good looking bay gelding and a natural easy gaited trotter that looks as if 2:10 would be easy for him. He is good enough to go over East and race against the horses in his class and should be a money winner there as well as here.

George G.'s first start this year was at Vallejo in the 2:23 trot won by Doctor Hammond, the fastest heat of which was the last in 2:13½. In this race George G. was 10-8-5-4 in the summary, finishing outside the money. His third and fourth heats in 2:12½ at Petaluma were won in such a handy fashion that it is unlikely if there is a trotter in California this year in any class that can take his measure. He is by Homeward 2:13½, a son of Strathway with a thoroughbred cross in the second generation, out of a mare by Junio, son of Electioneer. Mr. Albertson, who trains and drives him, has the gelding in good shape and it does not look as if he would have to give him any faster mark to win the other races in which he has entered.

By winning a heat in the green class pace at Sacramento in 2:11½ the pacing stallion Demonio, driven by Sam Hoy and owned by Rush & Haile of Suisun, gave the wonderful mare Bertha another new standard performer and her fourth with a record better than 2:13. Demonio is a full brother to Diablo 2:09½, Don Derby 2:04½ and Ed Lafferty 2:16½, and half brother to Elf 2:12½. For some time Demonio's legs have been under suspicion, and after winning the first heat at Sacramento last Monday he showed a slight lameness and could not finish better than third in the next. Mr. Hoy then asked the privilege to withdraw the horse, which was granted him. Few mares have lived that have been as uniform producers of speed as this daughter of Alcantara. She is now 19 year old and is a strong, vigorous mare. She was leased this year from Oakwood Park Stock Farm by Mills & Sanders and bred to Searchlight. The next of Bertha's sons to get a record will be the stallion Arner, like the most of her produce, by Charles Derby. He is owned by Mr. C. L. Brannin of San Lorenzo, and is capable of a mile in 2:15 or better.

One of the San Francisco dailies heads its account of the State Fair races of Tuesday with "George G. disappoints many admirers at Sacramento." As George G. won in three straight heats in 2:15, 2:16 and 2:18, I fail to see wherein the disappointment lies. Probably the press representative thought that as the son of Homeward had trotted a heat in 2:12½ at Petaluma that he should have been driven to his limit in every heat at the State Fair no matter how far his contestants were behind him. There are some people who are always disappointed unless a horse beats his record every time he starts, and an easy win comes like a light to their hopes and a crushing blow to their expectations.

The pacing record of the Petaluma track, 2:10½, made by Diablo in 1895, was not broken at the recent meeting held by the Pacific Coast Trotting Horse Breeders Association in that city, Ben F.'s two heats in 2:11½ being the fastest miles made during the meet. The track trotting record of 2:15½ was broken on the first day, however, by both Deputy and Hoilo, who trotted heats in 2:15, and still further reduced on Saturday when Deputy made a mile in 2:13½, and George G. two in 2:12½.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Demonio 2:11½-4, Sam Hoy Up

matinee record 2:20½. It is a pity that Lou Milton is, in all probability, beyond usefulness in the breeding ranks as a full sister or brother to Lou Dillon, the two minute trotter, would be worth much to the Santa Rosa Stock Farm and more to the breeding industry.

And this leads one to the thought that had the last sale of the Santa Rosa Stock Farm horses been held after instead of prior to Lou Dillon's great performance there would have been a much larger average to record. Among the animals sold that it was hard to get bids on was the mare Transit of Venus, an own sister to Sidney Dillon with a filly at foot by On Stanley, and in foal to Frank S. Turner 2:28. This mare is only ten years old according to the catalogue, but there was hardly any bidding on her and she was finally knocked down to "White Hat" McCarty for \$185. There were horsemen in the crowd who had the faith but not the money who begged some of the prominent breeders to buy her but they turned her down and refused to bid. Had Lou Dillon's two minute mile been on record at the time, probably there would have been a different story to tell.

While Sidney Dillon is occupying the centre of the stallion stage at the present time it must not be forgotten that a full brother of that horse, the stallion Cupid 2:18 is still owned in California and is in use upon the Aptos Farm by Mr. A. B. Spreckels. Cupid began to attract attention as a sire in 1899, when he put three of his produce in the standard list out of but three that were trained. These were all mares

STATE FAIR OPENS.

Filly Bred at Oakwood Park Farm Wins the Occident Stake.

The State Fair opened at Sacramento last Monday with a pretty good attendance for the first day. The Directors are doing their best this year and by curtailment of many former useless expenditures have a chance to see a profit instead of the usual deficit when the fair is over.

All bets on the harness events were handled by the auction pool system, while book betting was resorted to in the running races, four bookmakers cutting in. The judges of the day were Benjamin F. Rush of Suisun, President of the society, and Frank Covey of Palo Alto.

California's trotting classic, the Occident Stake, opened the first day's racing program. There were nine starters, of which but one was a filly, but that little miss proved to be the best trotter of them all and won her race.

Before the start Swift B., son of Stam B. 2:11 1/4, was the favorite in the auction pools, selling as first choice for \$10, to \$7 for Tuna and \$7 for the other seven in the field.

Swift B. led into the stretch in the first heat, but went to a break and the filly won easily in 2:18 1/2. While Sanders finished pretty well in front he did not take his filly back any and six of the nine starters were behind the flag.

Tuna went off her feet just after the word was given for the second heat and Sanders gave her an easy mile, Swift B. winning in 2:22. Pools now sold Tuna \$10, field \$10, so that the public's confidence in the little mare was not shaken.

The next race was for the green class pacers, and six of the side wheelers lined up for the word. Jonesa Basler was made the favorite and won in straight heats after Demonio had marched the first mile in 2:11 1/4, an effort that he could have repeated three times had his legs been sound, but they were so bad that he had to be withdrawn after the second heat and Basler had it all his own way in very slow time.

Four running races completed the day's racing, which was most successful for an opening day. The summaries:

Table with 3 columns: Name, Result, and Value. Includes Occident Stake, Trotting, and Running results.

Table with 3 columns: Name, Result, and Value. Includes Pacing, Green class, and Running results.

Five and a half furlongs, purse \$235—A. Leach's br f Heather Honey, 106 by Odd Fellow—Annie Clark, 11 to 1, (Henderson), won; Edinborough, br b, 112 (See), 3 to 1, second; Little Margaret, ch f, 105 (Burke), 7 to 1, third. Time, 1:08 1/4. Merwan 111, Tamm 111, Little Secret 117, Jack Richelleu Jr. 117 and Von Zollern 112 also ran.

Six furlongs, selling, purse \$225—V. Gilbert's ch g Troy, 110, by Stanton-Lulu IV. (Hildebrand), 4 to 1, first; Royal F., br b, 110 (Benett), 20 to 1, second; Elmore, ch g, 107 (Tullett), 7 to 1, third. Time, 1:14 1/4. Honduran 104, E. M. Britain 113, Kitty Kelly 105 and Wandering Boy 112 also ran.

A fair attendance saw some ordinary racing on the second day. The \$500 purse for green class trotters brought out but five starters of the thirteen originally entered. George G. the Fresno horse, on his Petaluma showing was made him a big favorite, and he won in straight heats, with Deputy second each time.

Trotting, green class, purse \$500. George G. b g, by Homeward—dam by Junio... (Albertson) 1 1 1 Deputy, ch g, by Derby 4th & 3rd... (Whitehead) 2 2 2 Louise Croser, gr m, by Wild B... (Croser) 3 3 3

Maldens, four and a half furlongs, purse \$300—Charlie Schwelzer, b g, by Libertine-Arosa, 106 (Powell), 3 to 1, won; Dr. Birdsall, 111 (See), 3 to 1, second; Dusty Rhodes, 106 (Tullett), 3 to 1, third. Time, 0:56. Maude Brown, Easter Lady, Pat Bulger, Honovia, Hops Morgan, also ran.

Seven and a half furlongs, purse \$200—Chileno, ch g, by Tenny-Chemuck, 104 (Henderson), 7 to 1, won; Dark Secret, 101 (Hildebrand) 10 to 1, second; Dr. Shorb, 112 (Smart) 25 to 1, third. Time, 1:24 1/4. Flamolo, Legal Maxim, Little Gun and Buck Taylor also ran.

Five and a half furlongs, purse \$225—Mamie, ch f, by Thornhill-Lady Jackson, 99 (Crossthalte), 10 to 1, won; Dwightway, 112 (Powell), 2 1/2 to 1, second; Doris, 83 (Hildebrand), even, third. Time, 1:03. Light Braid, Duke, Marmonduce and St. Wilde also ran.

Ringling Bros. Circus played an afternoon and evening engagement at Sacramento the third day of the State Fair and it took the crowd, the races at the park and the exhibit at the pavilion getting but a slim attendance. There was but one harness race on the program at the track, a dash of a mile and a half in which five horses started. The race was won by Joe Cuicello's Petaluma discovery, the road horse Dan Frazier, by Secretary. The time was 3:32 1/4, a 2:20 gait. Five running races completed the program.

Table with 3 columns: Name, Result, and Value. Includes Trotting, one mile and a half dash, 2:30 class, purse \$325.

Maldens, five furlongs, purse \$225—Wandering Boy, b g, by Brutus-Wandering Nuu 112 (See), 4 to 1, won; Piratical 106 (Tullett), 6 to 1, second; Samar 93 (Hildebrand), even, third. Time, 1:01 1/4. Little Secret, Wiggins, Vonzollern, Honduran, Royal Copper, J. T. S. and Chennano also ran.

Six furlongs, selling, purse \$225—Tamm, b o, by Lew Weir-Brook 108 (Frawley), 3 to 1, won; Gold Scratch 114 (Benett), 3 to 1, second; Legal Maxim 114 (Tullett), 2 to 1, third. Time, 1:15 1/4. Dwight Way, Dark Secret, Dug Martin and Little Gun also ran.

Five furlongs, selling, purse \$225—Royal F., ch g, by Royal Flush-Slydell 111 (See), 2 1/2 to 1, won; Little Margaret 104 (Jaakson), 7 to 5, second; Annie Marie 92 (Hildebrand), 2 to 1, third. Time, 1:01. Heroules also ran.

The Kenney Bicycle Co., 531 Valencia St., is doing a big business in the McMurray Carts and Sulkies. You not only save money by purchasing a McMurray but get the most durable, best made, and easiest running cart or sulky in the market. Investigation will convince a Missourian.

A Correction From Mr. Ira Pierce.

EDITOR BREEDER AND SPORTSMAN:—In order that the statement made in your esteemed journal of last week may not mislead those who do not know the facts regarding the great sire, Sidney Dillon, I wish you would correct the following statement:

The sire, Sidney Dillon, could neither pace nor trot (and he had both gaits) fast enough to be looked upon as a profitable horse to race, and he was bred to Lou Milton because he was the only stallion on the place when the time came to breed her. Lou Milton was a good looking, highly nervous mare that was of no account as a race mare. * * * After Lou Dillon was foaled Lou Milton was bred to Beau B. because Beau B.'s sucklings were a better looking lot that year than were the Sidney Dillons.

Sidney Dillon was a little mixed-gaited, like most of the fast trotters, when the late John Rogers took him in hand. It was not long before he trotted three heats in one day in 2:24, 2:23 and 2:21, last quarter in 32 seconds. When Rogers was stricken with his last illness, Charles Neulinger, Sidney Dillon's attendant, jogged and drove him miles repeatedly in 2:25, and a more perfect trotter was never hitched to a sulky. Rogers wanted to race him, and would have done so had he not been taken ill. Lou Milton trotted miles in 2:25 and quarters in 32 seconds. Mart Rollins of Santa Rosa can verify this. William Corbit of San Mateo saw this mare trot and offered \$2500 for her, but Mr. McFadyen, her owner, would not deliver her in San Francisco, so the trade fell through. I tried for a year to get her and finally succeeded. She was bred to Bay Rose 2:20 1/4 and had a colt that trotted a trial in 2:25 as a three-year-old. This youngster was sent East and sold. The following year (1897) she was bred to Sidney Dillon and the produce was Lou Dillon, the champion. The next year she was bred to L. W. Russell and the produce was a filly which trotted quarters for Millard F. Sanders in 33 seconds. The next year she had a filly by Beau B., now a three-year old, that has not been trained. The reason Lou Milton was bred to these stallions was because I considered her a very high-class mare and I wanted to give the Santa Rosa Stock Farm stallions a reputation. There were other stallions on the farm when Sidney Dillon was bred to Lou Milton. All of Lou Milton's produce were fast. She was bred to Anteeo 2:16 1/4 and had three good performers. When I bought her she was in foal to Silver Bow, but the produce, a filly, met with an accident and was killed. I believe that the Russell and Beau B. fillies will show that I made no mistake in purchasing Lou Milton. Respectfully yours, IRA PIERCE.

Curry and Alix.

Jack Curry is "near about daffy" in regard to a three year old filly by Directum out of Ecstasy. "She has as much speed as Alix, and just as sweet tempered and good gaited," says Jack. In speaking of Alix, and how he sweetened up her disposition, which as a two and a three year old was none too good when it came to standing still in harness, turning around, etc., Curry said, "I had become acquainted with about a dozen nice girls in Kenosha, and when I jogged the little mare it was about town on the roads. Every now and then I would meet one of the girls who would nearly always have some valuable piece of information to impart to me, and when I would dare to stop it was only for an instant, for about the second time Alix would toss her head; if I didn't give her the signal to go on, she would rear up and throw herself over backwards. So I had to figure out some plan to correct this, to me, very serious fault. One morning I filled my pocket with loaf sugar, and the first girl I met I threw her a lump of sugar and told her to feed it to the mare. She did so and it worked like a charm. I called on some of the girls, and they always liked to pet the mare and humor her by feeding her sugar. In this way she was made reliable, and often when jogging her she would see a woman coming towards her, she would "siddle" up to her and would seem greatly disappointed if she did not get the usual lump of sugar and caresses.

It was a shame and kind of hurt, too, when she lost the honor of queen of all the trotters.

Worked Wonders on the "Epitomist" Experimental Farm.

We had several of our best horses laid up from lameness, the result of various causes. One from being severely kicked by another horse and the other from a severe wrenching or strain were readily cured with Gombault's Caustic Balsam, and none were laid up long—thanks to this great remedy which we would not think of being without for several times its price, and it is not a cheap preparation either. It has simply worked wonders for us, and by having it on hand for immediate use has undoubtedly saved us from having two very bad cripples on our hands.—Manager Dairy Department, Epitomist Experiment Station, Spencer Ind. [In Agricultural Epitomist for October, 1902]

Combination George 2:18, an old time pacer of unknown parentage, died at Tacoma recently.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

Breeders Meeting --Official Summaries Petaluma Track.

WEDNESDAY, AUGUST 26.

Table with 3 columns: Name, Sire, Dam, and Time. Races include Trotting 2:30 class, stake \$500.

Table with 3 columns: Name, Sire, Dam, and Time. Races include Pacing 2:20 class, Pacific Slope Stake \$1500.

Table with 3 columns: Name, Sire, Dam, and Time. Races include Trotting 2:15 class, stake \$1000.

Table with 3 columns: Name, Sire, Dam, and Time. Races include Three year old trotting stake, value \$600.

Table with 3 columns: Name, Sire, Dam, and Time. Races include Breeders' Futurity Stakes, two year old pacing division, value \$750.

Table with 3 columns: Name, Sire, Dam, and Time. Races include Trotting stake, free for all, value \$500.

Table with 3 columns: Name, Sire, Dam, and Time. Races include Pacing 2:17 class, purse \$500.

Table with 3 columns: Name, Sire, Dam, and Time. Races include Breeders' futurity, two year old trotting division, value \$1250.

Table with 3 columns: Name, Sire, Dam, and Time. Races include Trotting, roadsters owned in district, \$150.

Table with 3 columns: Name, Sire, Dam, and Time. Races include Pacing, green class, purse \$500.

Table with 3 columns: Name, Sire, Dam, and Time. Races include Trotting, The California, 2:24 class, stake \$2000.

Table with 3 columns: Name, Sire, Dam, and Time. Races include Trotting, 2:17 class, purse \$500.

Table with 3 columns: Name, Sire, Dam, and Time. Races include Pacing, green class, purse \$500.

Table with 3 columns: Name, Sire, Dam, and Time. Races include Trotting, 2:17 class, purse \$500.

Close of Seattle Meeting. Jupiter Pluvius showed his contempt for hopped pacers by descending in liberal quantities on Monday night so that when an inspection of the track was made by the Judges it was deemed to be unsafe for their performance.

several owners declined to start, but six came for the word with the result that half that number had the distance flag in front of them when the winner passed the wire.

Ollie M's previous campaigns amongst the Oregon mists stood her in good stead and she eventually proved an easy winner from Ama A., Maplemont who had finished strongly in the first heat going to a hsd break through wrenching off a shoe in the sticky going and also getting the 'Banper.'

The Seattle Times Purses for 2:12 trotters was decided on Thursday, improved weather conditions justifying Mr. Durfee starting Sweet Marie, and she easily won in two heats 2:17 and 2:15. The latter must be considered a great performance as the track was at least seven seconds slow.

The Debut Stakes for two-year-old district bred colts and fillies was also decided. McManus the old pilot of Prince Direct introduced to public notice a half sister of the world's double team champion, in the shape of a very handsome well grown and shapely black filly by Montana Director out of the famous old Rosie C.

Possibly the most interesting race of the meeting took place to-day, Friday, when the City Council Purses for 2:10 pacers was decided. Opinions were divided as to whether Martha B., Le Roi or Sam Bowers would prove the winner. With the waywardness of her sex Martha B. declined to yield pride of place for even one heat and despite game efforts on the parts of Le Roi in the first and Sam Bowers in the second heat, she won in two straight heats, in the good time of 2:12 and 2:14.

Table with 3 columns: Name, Sire, Dam, and Time. Races include The Profanity Hill Purses of \$500, for 2:30 class pacers.

Table with 3 columns: Name, Sire, Dam, and Time. Races include The Seattle Times Purses of \$500 for 2:12 class trotters.

Table with 3 columns: Name, Sire, Dam, and Time. Races include The Debut Stakes for two year old pacers, purse \$300.

Table with 3 columns: Name, Sire, Dam, and Time. Races include The City Council Purse for 2:10 pacers, purse \$500.

A Tribute to Mr. Salisbury. An exchange observes: "There is one thing about the California turfman, Monroe Salisbury, and that is, he is always out to win and he is never found mixed up in any combinations to give the public other than a square race"

The \$20,000 Bonner Memorial was truly a great race. The slowest of the five heats was trotted in 2:09, and of the thirteen starters all but four were as good as fourth in some one heat.

Millard Sanders Springs a New One.

("Marque" in Horse Review.)

Ralyo days are conducive to conversation, and it was during the rainy Thursday afternoon at Brighton that the time-worn argument of the relative speed of the wagon and sulky hitch was reargued by a group of drivers. All the old reasons for or against either vehicle were advanced when Millard Sanders sprung a new ooe. It was new at least to all that heard it and I am pretty certain it is a view that needs only consideration to make one think there is something in it.

Sanders' own experience since getting the information has been that when his horses had free use of their tails they required less weight and little checking. Lou Dillon 2:02 is always hitched well out to the ends of the thills and her tail rests in Sander's lap when she is speeding. When Mr. Billings hroke the wagon record with her she was hitched far enough from the cross-bar to permit her tail to switch at will.

Great Success. 260 West 128th Street, NEW YORK CITY, N. Y., March 8, 1903. Dr. B. J. Kendall Co., Enosburg Falls, Vt.

Some one was telling Ed Geers the other day about a fast trotter that had pulled a wagon a mile in 2:08 and remarked: "If you had her, Mr. Geers, you could drive her three seconds faster."

On a hot day drink Jackson's Napa Soda lemonads and be refreshed.

Combault's Caustic Balsam. The Great French Veterinary Remedy. A Safe, Speedy and Positive cure for ailments of HORSES and CATTLE.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

“Outlaw” Is Dead.

There is always something pathetic in the fall of a champion, be it man, beast or machine. “Outlaw” was a mule tail deer who ruled deersdom in the Siskiyou mountains, and the majesty of his bearing would have shamed a king. He was tall and sleek with an enormous spread of antlers. He was keen of eye and no crackling of a twig escaped his attention and to approach him from the windward was a hopeless task. A man without a gun was known to him as a harmless creature and he scorned to even trot to cover, hence he had been seen for years within a radius of twenty-five miles of Klamath Springs.

He had one arch enemy in George Cook, a half-breed guide, who, I believe, can track the flight of a hawk by the imprint of its shadow. At any rate, and as making a long story short is a difficult task to a lay writer, I will endeavor to give an account of this particular hunt.

At the suggestion of J. W. Rooch, a famous deer hunter who had trailed the “Outlaw” himself, we went to Klamath Springs and engaged George Cook, the guide, and with the addition of Joe Hessick to handle the pack horses, we struck out over the ridges to invade the “Outlaw’s” chosen domain. Arriving at

After supper we broke camp and moved as above mentioned. That night we had a chance to sleep in a barn. “Oh! the luxury,” no pine boughs for me when a barn is not busy. At any rate I think I had been asleep about ten or fifteen minutes when I was routed out and told it was three o’clock and time to start. I was so sore and tired, I said, “To ——— with the deer, I’m going to sleep.”

Geo. Cook said, “We’ll have a deer by 10 o’clock,” so I got “easy” again and then we filled up on bacon, bread and onions, coffee and coffee grounds. After breakfast we all felt pretty good, that is, I was all right, except when I sat down. The memory of that ride will be a lasting one, and its effects for the time being were calculated to make me understand that eating meals off a mantle piece was as practical and comfortable as is claimed for it.

We started out by the light of the north star and a few starlets, the guide and I in the lead. I taught him to say “Sure, Mike,” instead of yes; “Not on your life,” for no, just to remind me of good old Frisco, and was soon happy and anxious, particularly as Cook said we might run across “Outlaw,” and if we did we’d have a chance for a week’s talking. The new ground was more to my liking as I was stationed on the edge of a glade where the deer would likely cross and I didn’t have to ride and didn’t have to sit down, if I didn’t want to. In about an hour the sun rose

fittest is the order of events in nature’s wilderness. At my feet lay “Outlaw,” the most magnificent specimen of animal life I have ever seen. I don’t believe I was happy, and I moralized to myself and said: “If you were alive again, old boy, damned if I’d shoot you.”

I heard a shot, just one shot, from over the ridge and presently out came Joe Hessick for a horse and a rope to carry out another deer which my brother had shot. I was again full of excitement and scanned the fringe of the glade for another shot, my finger on the trigger nervously.

What manner of men are we sportsman? “Outlaw” dressed at 206 pounds and was in just fair condition. This noble animal had been so frequently wounded and hunted that he never had a chance to get fat. The Klamath Indians stood verily in awe of this buck, and long ago had ceased to hunt him, believing that he had a charmed life and that he could not be taken by ordinary means and that it was “bad medicine” to molest him. The other buck was fat and in splendid condition and tipped the beam at 232 pounds. His antlers were magnificent and bad five points.

The hunting party was composed of Dr. Clyde Payne, the narrator of the foregoing story, Dr. Redmond Payne, both of this city, J. W. Rooch, Joseph Hessick and George Cook. The trip took a week, the territory covered in the hunt was found within the radius of twenty-five miles of Klamath Hot Springs.

“Outlaw’s” head and hide is now in the hands of H. F. Lorquin, the taxidermist. The buck will be skillfully mounted, life-size, by the artist and will have an honored place in the home of Jobn I. Sabin, Esq., to whom the trophy has been presented by his son-in-law, Dr. R. Payne.

The fractions in lure casting are 15ths.

Bench Show at Spokane.

The Spokane Kennel Club, which is a member of the Pacific Kennel League, will hold its first annual bench show October 7 to 10, inclusive, at Spokane, Wash., in connection with the Spokane Interstate Fair. The officers of the club are: President, T. S. Griffith; vice-president, John M. Bunn; treasurer, A. B. Jackson; secretary, A. C. Klein; bench show committee, A. B. Jackson, A. F. Wisemann, H. W. Peel, L. C. Walker, C. M. Graves and Dr. E. L. Kimball; veterinary, Dr. Pike; judge, Hon. E. Davies. Entries will close September 20. First, second and third prizes are offered in all classes, a silver medal, bronze medal and diploma respectively. A number of special cash prizes are offered by the Spokane Kennel Club, viz: Twenty dollars each to the following: Handler showing largest string from California; ditto, from British Columbia; ditto, from Washington outside of Spokane; ditto, from Oregon; Ten dollars for handler showing largest string of dogs in show. A number of other valuable specials are also offered. The Pacific Kennel League’s rules for the government of dog shows will govern this show.

Nevada Field Trials.

It is possible that Henry L. Betten will be selected to judge the Nevada field trials. Mr. Betten is a well known Coast breeder and handler of English Setters and would undoubtedly give the Sagebrush trials a most satisfactory judging. The attendance of local and Coast sportsmen in Paradise Valley promises to be a good one. The grounds are said to be excellent and birds are plentiful. Dr. C. E. Wilson has already left Elko and is now located in Paradise, Humboldt County, Nevada, at which place he may be addressed until the trials are finished.

Moccasins. Bicycle Goods.

Jacknack moccasins are the best article in this line ever offered sportsmen in this city. Thick, flexible bottoms; durable, easy fitting, just the thing for still hunting, camping and outing comfort. They are so superior to what is usually sold as moccasins there is no comparison on merit. Skinner has them. The Skinner Co., 801 Market st., are unpacking and putting on sale everything in the bicycle sundry line. They are agents for the cheapest and best tires ever shown in this city and it looks almost incredible that such goods can be produced for the prices they are selling them.

Two of the Largest Deer Ever Shipped In to San Francisco. Shot by Drs. R. and C. Payne.

the camp we made a bed of pine boughs, and slept soundly until morning. I might mention that a fifteen mile horseback ride in Siskiyou county will cure any insomnia on earth.

At three o’clock, Joe woke us up and prepared breakfast of steak cut right off of the back of the neck of some pensioned bull, hut with the bacon and bread and hot coffee it beat any Palace Grill breakfast to a standstill. Appetitesatisfied, we saddled and followed George Cook over the roughest country I have ever seen or gone through, not a sign of a trail, fallen logs and rocks followed one upon another with an occasional clump of dense underbrush. At daylight we struck the top of the ridge and I filled the magazine of my 30.40, expecting every minute to hag a big buck. George Cook finally balted and we tied out the horses, he then in a whisper told us of “signs” and pointed to a fresh deer track and hade us follow him. I was close up, and be followed that track over rocks, through the dry pine needles where I’ll testify I could not see an indentation. George confided to me that the big huck was not very beavy and that he was not lazy and would be hard to get, and he was right. We finally lost the track, apparently, hut Cook said: “The old cuss is trying to shake us off,” and he showed me where the deer would make a jump of fifteen feet, then back track, then take an open glade, over rocks leaving, apparently, not the slightest trace, but it was the Indian in George Cook that was on his trail. Well, I followed all day until compelled to give up and went back to camp with Joe Hessick, to be followed an hour later by the guide and my brother; all of us were exhausted and somewhat disappointed by reason of not getting any game. “We’ll pick up the trail in the morning,” said George Cook, “the old buck is as tired as we are and he’ll lay down as soon as we let up on him.”

The next day we followed the same routine and likewise the following day until evening, when Geo. Cook weakened and suggested that we break camp and go about five miles farther over a ridge and try new grounds. Personally I was “all in” and remarked that there was certainly two ways to get a run for your money and that was deer hunting and mining, now I have had a chance at both.

and gave promise of making things warm for us, and it did.

Presently I noted Cook at the opposite side of the glade motioning me to come over where he showed me the fresh track of the “Outlaw” distinguishable by its extraordinary size and a long cracked toe.

“We’ll get him this time because we have enough men to cover all the openings and he’s bound to come out as his horns are still in the velvet and he won’t run in the brush.” Then we all took positions at the openings to command a full view thereof, Cook then set out on the “Outlaw’s” track. I had lost confidence in the game myself and incidentally said “I’d bet five million dollars to a doughnut that we would not see a deer.” My brother Redmond couldn’t resist the odds and took me up—well I lost the five million, hut did not have to pay up because he did not have the doughnut to make good.

Talk about luck, my brother got tired waiting and wanted a match and came over to my stand and woke me up and got the match and was smoking my last cigar, when suddenly he threw down that cigar and placed a shell into his rifle and ran around a little clump of brush in answer to a slight noise he heard in the thicket and then I heard him fire. Well, I was on the firing line in three seconds and saw an enormous deer down and attempting to rise again. I fired five shots, two taking effect. Approaching closer, the deer was defiant and looked dangerous; another shot, of mercy, dropped the poor devil dead. We examined his feet the first thing and sure enough there was the crooked toe, and the enormous antlers, four feet long with a five foot spread and five points on one side and six on the other. It was the “Outlaw.”

We were all delighted. Cook told us there was another one in the brush and then he stationed the other boys again but I stayed with the “Outlaw.” It was food for reflection alone there in the mountains, miles from civilization. A hawk passed over darting swiftly after some small birds screaming to cover, a jay on the flat below me feasting on grasshoppers. I thought of the fish hawk I had seen the day before carrying a trout in its talons, and of the constant vigil of the doe to protect her fawns from the wild cats and panthers. I tell you the survival of the

Teaching a Retriever.

Few occupations are more interesting or more profitable to the sportsman than the education of a dog—but often enough the intelligence bestowed upon the bringing up of the creature is less than its own. Lieutenant-Colonel Henry Smith's magazine article on "Retrievers and how to break them," may, therefore, be commended to every sportsman and particularly to every trainer. A retriever, the well-informed author lays down, should be an "all-round" dog in the widest acceptance of the term. He should behave himself like a gentleman in the house, he should enter a dogcart, boat, train, or motor-car with equanimity; he should run in couples, answer to whistle, enter his kennel instantly when told, and do many other things of more or less importance, which the exercise of a little patience and common-sense will teach him; and not the least useful lesson he can learn is to look on sheep and chickens without excitement, even when the sheep suddenly take fright and holt in all directions, this part of his education being perfected by taking him into an enclosure in the lambing season. You need not, when you do so, be the least solicitous for the safety of the lambs. It is your dog you must take care of; for should he show an inclination either for lamb or mutton, the ewes will soon settle the question, and establish a funk which, in nine cases out of ten, is permanent. A gun-shy dog, it goes without saying, is useless to a sportsman. The very mention of the word carries consternation with it. The wretched animal proved to be suffering from this vice, or disease, or whatever you please to call it, is straightway doomed to destruction; and were he the handsomest and best-tempered dog in the kennel, the sentence is ruthlessly carried out without loss of time. A gun-shy dog is simply a timid dog mis-mooged in breaking. The same dog would almost to a certainty be a whip-shy dog, or an umbrella-suddenly-oopeed-in-his-face-shy dog, to make rather a long adjective of it.

Dogs and human beings are in no wise different from one another in some important particulars. Some are constitutionally bold, others timid, and the more timid a dog is, the greater the distance should be between him and the gun when he hears it for the first time, and when you propose to accustom him to the sound of it. If trainers appreciated this axiom, and would take a little trouble, a gun-shy dog would be a rara avis indeed; and I am bold enough to say that any dog can be put beyond the possibility of becoming gun-shy in half a dozen lessons of ten minutes each. Some trainers and keepers take a considerable amount of trouble in teaching their dogs to fetch and carry; but it never enters into their calculations that a puppy may fail in the most important particular, or that it is in their power to avert what possibly may happen on the first day of the season. A young and rather timid dog is taken out, generally on a cord; a right and left, perhaps from more than one gun, is suddenly fired nearly over his back. The noise frightens him, the restraint of the cord makes matters worse, and he is thoroughly cowed, "Damn the brute, he's gun-shy," says some intelligent sportsman; "shoot him." "So he is," says Donald. "That is a peety; the very puppy the maister picket oot for hissel'—the best looking o' the lot." Neither he nor his master, when he draws him aside that evening and tells him with bated breath the result of the puppy's first day, has the slightest idea that anyone has been wanting in his duty. It is a dispensation of Providence—the puppy has "turned out" gun-shy, and the beautiful young dog's first day is also his last.

Gun-shyness in a dog is no more hereditary than train-shyness in a horse. The gun-shy dog and the train-shy horse have been made so by mismanagement. Both can be cured, and can be also made in time to look on their pet aversions, the gun and the train, with equalmity—nay, more, in the case of the dog with affection; but take my advice, educate the animals in question properly; you will find it very much easier than curiog them when spoilt. If you have a pair of young horses that have never seen a train, to put them in the family barouche containing the wife of your hosom, drivethem to a level crossing, and after fastening them to the gates, wait contently for the approach of the "Flying Express," would be—putting it mildly—injudicious. Instead of adopting this plan, you halt your horses on the approach of a train at some considerable distance from the line, and if they are not frightened, take them a little nearer on the next opportunity; or—what is better—you turn them out when still young into a field by the side of the railway, and leave them absolutely free and unfettered to gallop away as far as they like when they hear the engine coming. The very fact their being free robs the situation of half its terrors, the gallop gets shorter day by day, and before very long they take little or no notice of its approach. Pursue the same tactics with your dog when accustoming him to the gun. The modus operandi—simple enough in all conscience—should be as follows:

Take him into a courtyard with a gate to it, or into a field behind a wire fence, or into any enclosed space where he can see what is going on outside. Do not restrain him by a cord or chain. Leave him free to run about or retreat should he feel so inclined. Send your keeper a long way off—say 150 yards (the more timid the dog remember the greater should be the distance)—make him fire a shot, watch the dog, and you will at once see how much nearer—if at all—the shot should be fired next time. After a few shots he will probably be eager to get up to the gun, more especially if you make the day a pleasant one, and give him something to look for. A thing I detested and eschewed altogether was a whip; now I am never

without one, because I have learned how to use it. If you see a dog afraid of a keeper when he cracks his whip, or skulking behind, or inclined to bolt, you can have no surer proof of the man's imbecility and cruelty. When you call to a dog and crack a whip to emphasize your order, he should come bounding up to you, not run away from you. "Here I am," he says; "I've done nothing wrong, and I'm not afraid." He should look on the whip—and dogs which have been broken by a capable, eye-tempered, and humane keeper do look on it—simply as a deterrent. They know when they deserve punishment, and they know when they don't; and it is beautiful to see a hold and dashing, yet perfectly steady, dog, with as much confidence in his master as his master has in him—a dog which, after his education is finished, is never touched with the whip from one year's end to the other.

Kennel Suggestions.

Outside of the skin diseases perhaps there is no more common trouble in dogs than retention of urine. Dogs are seen to suffer but really there is little done by the average dog owner to ameliorate the trouble. After his attempts the dog goes about as usual and little more is thought of the matter until the owner happens to notice the dog again. This is a mistake and instant advice should be obtained and a cure attempted.

Constipation is also one of the general troubles dogs are afflicted with that do not receive the attention that their danger to the dog entitle them to. In Ashmont's new book on kennel diseases, there is a very good chapter on this trouble that, if neglected, leads to all manner of harm to the general system. We are convinced that kennel owners do not observe their dog's habits sufficiently and in only this way may the careful owner be advised of his dog's general health and condition internally.

During the first days of a fever of any kind constipation is the rule, although in occasional instances diarrhoea occurs. The former is then purely a symptom, and the essential treatment but a part of that.

Champion Hanover Monarch

required by the existing disease. Herein, therefore, it will be considered only as an independent affection.

It has a great variety of causes; and since many of them are identical with those that act in the same way among members of the human family, and with which all must be quite familiar, it is merely necessary to dwell on the influences which generally give rise to the affection in dogs.

The first appears in the diet when it consists largely of substances which are capable of being absorbed into the blood, and leave but little to pass out by the bowels. For example, a dog fed almost wholly on meat would not have near the usual amount of refuse; or, strictly speaking, he would naturally be costive, this term meaning that not only are the movements less frequent than natural, but of less amount. And the effect would be the same were he denied sufficient food.

Another common cause is deprivation of sufficient pure, fresh drinking-water, in consequence of which the blood in some degree is lacking in this very essential constituent, the secretory action of the glands of the large intestines is less powerful than it ought to be, and there is an over-dry state of the lining membrane throughout the bowels. As a consequence of all this the fecal matter is dryer and harder, and its expulsion more difficult.

Lack of sufficient exercise is another cause of constipation; indeed, lazy indoor pets are especially prone to the affection. But with them there are doubtless other causes equally active, and notably neatness and restraint; their outings being dependent upon the convenience and caprices of their owners rather than their own wants. And if nature's promptings are continually disregarded or resisted, the inevitable result is a lessening of the sensibility of the lower bowel, also of its contractility and expulsive power; and the constipation in corresponding degree becomes more pronounced and unconquerable.

A uniform and unvaried diet, day after day, tends to impair the activity of the bowels. So, too, the habitual use of very coarse foods; the bowels becom-

ing fatigued, as it were, by the continued strain or effort made to expel so large a residue.

It is only within the last decade that physicians have duly appreciated the possibilities of self-poisoning, and the frequency with which it occurs. For instance, food substances that are ordinarily easily and well disposed of, under certain conditions and in consequence of impairment of some one or more of the organs concerned in the process of digestion, may undergo deleterious changes, and the poisons be absorbed and seriously affect the entire system. Constipation furnishes another illustration of self-poisoning. Let the refuse be too long retained in the upper parts of the large intestine, and not only is its fluid portion largely absorbed and taken up by the blood, but there is likely some absorption of the poisonous solids as well. And hereby is explained many instances of so-called "biliousness," that are characterized by loss of appetite, foul breath, languor, etc., the same being merely cases of self-poisoning attributable to imperfect action on the part of the bowels.

As a rule, the remedy for constipation should be in the feeding-pan. Assuming that the diet consists principally of meat, substances which furnish a large amount of refuse should enter into it in goodly quantity; and of these such vegetables as cabbages and the so called greens—spinach, candelion, nettles, beet tops, and the like—are the most serviceable. Certain breads also act well in the same way; the coarse qualities, which contain the bran, tend to prevent clogging, keep the bowels active, and assist in the assimilation of other foods. On the other hand, the popular "white bread" made from fine wheat flour favors constipation.

The various meals, as Indian, also have a beneficial action on a sluggish bowel, provided always they are not given to excess. Indeed, let a dog affected with constipation be fed on, say, two parts meat, one part Graham bread, or one of the meals, and one part vegetables; unless they are diseased his bowels should come right. But of course it may be necessary to increase or decrease from time to time the proportions of these laxative constituents, as their action is deficient or excessive.

Exercise has rightly been termed the "grand eliminator of waste," and without it not only the bowels but all other excretory organs are more or less indolent. Consequently this simple remedy must be applied in goodly amount in every case of constipation.

As implied in the foregoing, dogs should always be well supplied with pure, fresh drinking water, for otherwise not only are their bowels likely to be sluggish, but their general health must be impaired. In truth, under the deprivation, nutrition can never be good; the victims invariably lose flesh, fall off in coat, and sooner or later suffer from disease, which as a rule first attacks the skin.

While habitual treatment should consist of dietetic and hygienic measures, oftentimes it will be necessary to at once relieve the constipation, and in such instances medicines must generally be given.

Of the many remedies of this nature castor oil is the most popular. It is certainly efficient, but there are some objections to its use except in selected cases, and sweet or olive oil, alone or with an equal quantity of the syrup of buckthorn, acts quite as powerfully and leaves the bowels in rather better condition.

The syrup of buckthorn is rightly highly esteemed as a cathartic. Combined with sweet oil, a tablespoonful of each may be given to the dogs of large size. Double that quantity of the huckthorn might be given if used alone, and brisk and free action is desired.

In attacks of sickness in which there is fever it is generally advisable to unload the bowels, and then calined magnesia acts well, either alone or combined with powdered rhubarb. The dose of the former is a full teaspoonful for large dogs; and if a good purging is deemed necessary, with it should be mixed nearly half a teaspoonful of the latter.

Among the purgatives in pill form the so-called compound cathartic pill is as good as any if the bowels are not irritated; and three for dogs of the largest size, two for the medium, and one for fox-terriers and the like, are suitable doses. As for the smallest toys, magnesia is the best for them.

In occasional cases the retained refuse is so dry and hard, that cathartics are very slow in having their effect; and in such, also in every instance in which it is desirable to have the bowels move at once, an injection should be given. For the purpose a simple and efficient mixture may be made of strong soap-suds and water, to which has been added a teaspoonful of molasses and the same quantity of table-salt. As an injection, sweet oil also acts speedily and well when generous quantities are used. A cupful would be none too much for the largest breeds. Another efficient remedy is glycerine, of which only a little need be injected to move the bowels—from a teaspoonful to a tablespoonful, according to the size of the patient.

Copies of Ashmont's new work on Kennel Diseases can be procured at the office of the BREEDER AND SPORTSMAN. This book has been long in preparation and is valuable to all dog owners. It is devoid of technical terms and so compiled as to be valuable and helpful. Price \$3.

Free!! Free!! Free!!

The Polk Miller Drug Co. of Richmond, Va., whose advertisements of "Sergeant's Dog Remedies" are appearing now in the columns of this journal, desire us to state that they will furnish absolutely free to our readers a revised copy of their book on "Dogs," which accurately and exhaustively treats of the more frequent diseases with which Dogs are afflicted. Enclose them 3c in stamps to cover cost of mailing the book. They have recently made F. W. Braun & Co. of Los Angeles, California, distributing agents for their popular line of "Dog Remedies," and extend an invitation to all persons having sick dogs to write them describing symptoms, etc. Enclose stamp for reply. No charge will be made for information furnished.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

THE FARM.

Are You Farming For a Living or as a Business?

Wallace's Farmer.

There are two classes of farmers: one which farms because they do not know how to do anything else and because it is the easiest way to make a living and get along some how for the time being. The other class farm, not so much for a living, as because it is their chosen business. They do not think of getting along somehow, but of getting ahead, accumulating, improving the farm, increasing its fertility, all with the object of making it a better manure acting plant and a better business proposition.

The man who farms as a business adopts business methods as far as they are applicable to farm operations, keeps books, knows his income and outgo, takes an inventory of stock, has system in all his methods, and knows approximately what every crop each year has cost him in cash or its equivalent in labor. We have small hopes of a man who is simply farming as a means of getting through the world somehow. Our past experience is that he does not take hold of the problems that are represented to him from week to week in the farmer's papers. The probability is that he does not take a farmer's paper at all and would not read it if he did. He wants some paper that is cheap and will not compel him to think too much, and won't get after him. It is the man who farms as a business, farming for dear life, farming to make a success of it and to make a success of himself and family, that is the kind of farmer we are looking for. We can get his attention.

These men may not believe all we say; they differ from us in a good many things, and we think none the less of them for that, but we can do them some good. We

have not much hope of doing the other fellows very much good, even if we could reach them. Our only hope is in reaching their boys.

Economy in Feeding.

There is no economy in starvation. We feed stock not for the purpose of merely keeping them alive but for the purpose of converting that feed into something of greater intrinsic value. Twenty dollar pieces are a much more convenient medium of exchange than haystacks. And haystacks reach not the full height of their glory till they are converted into gold. Now the longer it takes to produce that transformation the greater the loss of economy. A cow hawling for food is constantly wasting more strength than the owner could afford to let her spare. The miller can expect no flour with no grain in the hopper. Why look for a pail of milk from a bundle of dry hones? We have known men to farm it with an old slabsided team, when a few bushels of oats would have been worth more than a new plow point. There is nothing to be gained by starvation. Of course we are not to overfeed. The economy of feeding comes in through the right use of right material in due quantities.

Well cut feed sprinkled with bran is one source of economy in feeding. Providing that the cutting machine can be run without too much expenditure of time. Cut feed will unquestionably go farther than uncut feed. There is little or no waste. To carry out this plan we must have the feeding stable conveniently arranged. The arrangement should be such that the work can be accomplished with the least time and effort. Dispatch has money in it. This is as true in farming as foot racing or railroad.

Feed what the cow will relish and in quantities sufficient for good nourishment and of the kind of material that will produce the best results and economy is assured.

— o —

Jackson's Napa Soda does not tangle the feet.

Mutton Chops.

Weed out the old ewes and feed to turn into mutton before cold weather comes. It does not pay to keep a ewe after she begins to show signs of age unless she is an especially good breeder and mother. Pick out the lambs and wethers that you intend to turn off and put them by themselves where they can have a fattening feed.

Put them in uniform lots. They will feed together better, will fatten more evenly and sell to better advantage. Every flock master should have a standard of excellence and keep this in mind in

culling his flock. This is the only way in which to improve the flock.

It is useless to try to breed a fine, uniform flock of sheep from the runts and culls.

Have the ewes gaining in flesh at mating time. Better results can be looked for in this way than if the ewes are thin and half hearted.

CONDITIONS.

Entries to close Monday, September 14, 1903, when horses are to be named, and to be eligible to the class in which they are entered. Stakes not falling satisfactory to the management may be declared off. Stakes will be divided into four moneys: 50, 25, 15 and 10 per cent. Entrances 5 per cent, and 5 per cent of the amount of the Stake will be deducted from each money won. The management reserves the right to declare two starters a walk over. When only two start they may contest for the entrance money paid in, to be divided 66 2/3 per cent to the first and 33 1/3 per cent to the second horse. A horse distancing the field shall be entitled to first and fourth moneys only, and in no other case will a horse be entitled to more than one money. The management reserves the right to change the hour and day of any race, except when it becomes necessary to ante-date a race, in which instance the nominators will receive three days notice by mail to address of entry. The right reserved to declare off or postpone any or all races on account of weather or other sufficient cause.

The management reserves the right to start any heat after the fourth score, regardless of the position of the horses. Entries not declared out by 5 o'clock p. m. on the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track. When there is more than one entry to any Stake by any one person or in one interest, the horse to be started must be named by 5 o'clock p. m. on the day preceding the race. Trotting and racing colors must be named by 5 o'clock p. m. on the day preceding the race and must be worn upon the track. Colors will be registered in the order in which they are received. Hopples barred in trotting races, but will be permitted in pacing races. Conditional entries will be treated same as regular entries and nominators held under the rules. Any race that may be started and unfinished on last day of the meeting may be declared ended and money divided according to the rank of horses in the summary. Otherwise than as herein specified in these conditions, National Trotting Association Rules, (of which this association is a member) except Rule 4, to govern.

For Entry Blanks and further particulars address

JOS. I. DIMOND, Secretary, 457 Twelfth St., Oakland, Cal

THE WORLD'S BEST JERSEYS.

Best of Cows Assembled in Illinois in Training for World's Fair Dairy Test.

The most valuable herd of Jersey cattle ever assembled at any one point may be seen on a model farm at Jerseyville, Jersey county, Illinois. The worth of this herd can only be approximated, for the cattle are not for sale. An offer of \$15,000 for a single member was promptly declined and not an animal would bring less than \$500 if placed on the market to-day.

The cows are the property of individual members of the American Jersey Cattle Club and they are assembled because they are the best qualified to make up a herd that will represent the Jersey breed in the great dairy demonstration arranged for the World's Fair at St. Louis in 1904 by F. D. Coburn, Chief of Live Stock.

Unequaled care and attention is being given these cattle. No athlete trained for an event requiring the development of strength, endurance and skill ever received more attention than is being bestowed on these full-blood Jerseys. When the Louisiana Purchase Exposition opens its gates on April 30th, next year, the herd will have been in constant training for a

pronounced ideal for the purpose and there the work of getting the Jerseys in condition is going forward.

C. T. Graves of Maitland, Mo., a well-known breeder of Jersey cattle, and an expert on all matters pertaining to the dairy, was selected to take charge of operations, and with his family he moved to Jerseyville early in 1903 and began the interesting work. It was planned to construct on Mr. Auten's farm a model dairy and accessories, and under Mr. Graves' personal directions this has been done.

First he designed a cow stable which was completed early in July, and it is probable that not another barn in the world is as complete in every respect as this. It is a square with stable wings on the north and west. The north wing has stalls for twenty-four cows, and the west wing has stalls for twelve cows and six roomy box stalls.

The barn and stables are marvels of convenience and cleanliness. An electric plant in a separate building furnishes light and power. The numerous windows are perfectly screened and electric fans, numerous placed, keep the air in constant motion. There are no unpleasant odors and the stalls extend the full length of the wings. The cows are so placed that their heads are at the rows of win-

15-foot promenade extends around the barn, and the visitor may see every cow and may observe the feeding and milking. A screen protects the animals, behind which no one save the attendants can go.

Every ounce of food and water given each cow will be carefully weighed and a record kept.

A huge silo will be built adjoining the stables. A field of twenty acres of corn is now growing near Clayton, and this will be stored in the great silo for food next summer. Alfalfa will also be brought from Colorado.

All feeding and milking will be done in the stables. The milk will be turned over to the dairy department, and in a model dairy in the Palace of Agriculture it will be converted into butter and cheese, and a careful record of each cow's participation in the test will be kept.

With the herd will be Flying Fox, the famous Jersey bull owned by Thomas W. Lawson of Boston. Mr. Lawson recently refused an offer of \$15,000 for the bull.

Among the prominent Jersey cattle breeders who have made entries are C. J. Hood of Lowell, Mass., and George Vanderbilt of Biltmore, N. C.

If a cow doesn't pay her board, let someone else board her.

place a machine and settle for it even so far as to tell the farmer that once a day is often enough to wash it. This pernicious idea comes, as a matter of course, from agents of those machines which are difficult to clean and is in answer to the farmer's query about how he is to be expected to keep such a wonderfully lot of complicated junk clean and sweet. The truth of the matter is the farmer does not as a rule succeed in keeping it clean and sweet, even though he washes it twice a day.

If you think he does, just stick your nose into one of those patent protected split wing contraptions, with forty pieces or more inside the bowl, after the housewife has spent an hour or so doing her best to make it clean. You will find that nine times out of ten there is plenty of good, strong starter left hidden somewhere within the devious recesses of that marvelous device. Some creameries are trying to hlow this starter out after the cream reaches the factory. I am not prepared to say that there is no virtue in either of these plans, for I have not tried them, preferring to let the other fellow do that kind of experimenting, but my candid opinion is that the time to pasteurize is before the cream becomes sour and if that is done there will be no need of blowing it and the question of quality will be solved for good and all.

The Interests Should be Mutual.

The last census informs us that the percentage of American farms operated by tenants is thirty-five, or more than one-third. The increase in twenty years amounts to 10 per cent, and since 1890, of 7 per cent, showing that the rate of increase is growing higher as time passes. This shows that we are drifting toward a system of landlordism. It is not denied that tenant farming is bad for the farm, and that farms worked by tenants not only do not increase in value, but often decrease in value compared with farms worked by owners. The common custom of landlords is to spend as little of money or labor as possible to make the farm attractive to the better class of tenants. What is wanted is the cash where money rent is stipulated, or the lion's share of the crop when that is the agreed rental. Therefore the less the landlord spends in making the farm a good one, the greater his net profit at the end of the lease. Some landlords provide all needed conveniences for their tenants, such as comfortable houses, vegetable gardens, fruit trees, poultry houses, lots, stables and pens for live stock, with a little ornamentation about the tenement thereon to please the wife and children. On farms thus managed the best tenants will be found, and they remain until ready to move into a home of their own and cultivate their own acres. The tenant of the skin-flint landlord has to change his place and his landlord before he will be able to buy a home. There are many ways in which the landlord may benefit his tenant while benefiting himself. He can counsel with him, unselfishly advise him. He can furnish him reading matter that will increase his crops, for farmers as well as farms need fertilizing. He should advise the tenant to take good agricultural papers, to attend and participate in farmers' institutes, and in every way he can encourage him to do better farming. For, between landlord and tenant there should be such a community of interest that what is for the benefit of one, is also for the benefit of the other.—*Farm and Ranch.*

When more eggs than chickens are desired the proper kinds of fowls must be kept to produce them, while if an abundance of meat is wanted different breeds must be kept.—*Texas Farm.*

If you have no ice this summer, buy a separator. It can be bought cheaper than ice can be banded, anyway.

A Typical Jersey Bull

full year, and will be in the pink of condition.

Twenty-five cows will participate in the test at the World's Fair and fifteen cows are held in reserve, to be substituted should occasion require. Great caution and judgment was exercised in the selection of these candidates. The committee was free to select from any of the 250,000 registered Jerseys in America, and the animals thus come from all sections of the United States.

The owners of the cattle are prosperous, and they and the Jersey club to which they belong determined to spare no expense in making a perfect showing. The cows, selected from widely separated points, some coming from Maine and some from Oregon, some from the north and others from the south, could not give satisfactory results until they were accustomed to the St. Louis climate, so a point near St. Louis was desired for assembling the herd, and as A. O. Auten of Evanston, Ill., a member of the club, tendered the use gratuitously of his 400-acre farm on the outskirts of Jerseyville, his proposition was accepted.

This farm, forty miles from St. Louis, and one of the best in Illinois, has been

dows, and the air they breathe is always pure and fresh from the fragrant fields. The floors are all concrete. Between the rows of cows, at their rear, is a granitoid passage way, affording the cows' caretakers plenty of room to work at feeding and milking time.

The mangers are also of concrete, and are different from anything ever before designed. The walls slope toward the cow's head, and while the tendency is for the animal to push the food away from her, the sloping walls bring it right back. A gate is at the cow's head. It is so arranged that it may be put forward or back so as to fit the cow's length and keep her rear hoofs on the edge of the floor of the stall, adjoining which is a gutter. A chain at the back passes under the hollow of the cow's rear legs, preventing her from stepping into the gutter, which slopes toward the center.

On the Jersey farm there is a creamery and many other conveniences, all of which will be duplicated or improved upon when the World's Fair stables are erected for the final test.

In all former dairy tests at international expositions the stables have not been open to the public. At St. Louis a

The Way Cream is Obtained.

[Charles Harding.]

This hand separator movement, which just at present is upsetting all the old-fashioned theories about how the world's butter should be made, is raising at the same time some very interesting and important problems as to the best way to handle the product from the dairy farm to the churn, which will very soon be crying aloud for solution. Most of us who are now taking the initiative in the movement in any large way have been more concerned about volume of business than anything else. Indeed the growth in many qualities has been so rapid that it has been practically impossible to work out a system for the proper care of cream.

The demand for machines has been so great that many creameries have been content simply to place the machine with the farmer, show him as quickly as possible how to skim milk, take his note and go on to the next man, simply throwing a circular of instruction about shipping at him and telling him to send in his cream. Of course this sort of thing is going to make trouble. We hear frequently of separator agents, who in their zeal to

Dehorning Dairy Cattle.

A bulletin on the dehorning of stock, No. 78, has been gotten out by Prof. C. F. Doane, of the Maryland agricultural experiment station. Some of the points of interest are as follows:

The first dehorning in this country, on a large scale of which there is any record, was done by an Illinois farmer, who was engaged in the production of beef cattle.

Previous to this there has been sufficient experience in the necessary surgical work of veterinarians to know that the horns would be removed from a mature animal without any particular danger to its life. At different places in Europe, dehorning had been practiced for a number of years and it is very likely that it was the reports from these places that first led to the practice in this country.

It was not long after the first dehorning in Illinois that its advantages were realized and the practice spread rapidly. The beef herds were the first dehorned, and then the dairy herds, as it was seen that, at times, horns were a disadvantage among milking stock. The idea spread east and west, to some extent, and now, in any part of the country, herds of dehorned cattle are a familiar sight; while, in the middle West, among the large beef

amount of butterfat produced by the cows was as much or more than it would have been had the cows not been dehorned. At another time at the same station, twelve cows were dehorned at a loss of 5 per cent in the total yield of milk six days after dehorning, and a gain of 4 per cent in the total amount of fat produced in the same time. A record of the weights of the cows before and after showed practically no loss due to the operation.

At the Minnesota station nine cows produced 7 per cent less milk in three milkings following dehorning than they had given in the three previous milkings, and produced 3 per cent less total butterfat in the same period. Six cows which had been kept where they could see the excitement and smell the blood, lost 3 per cent in their milk yield and 1 per cent in their total butterfat in the same time, showing that the slight loss of the dehorned cows was due partially to excitement. A weak feature in this record was that three milkings were selected, making two nights' and one morning's milking in one period, and two mornings' and one night's milking in the other period. Cows seldom give the same at morning and night, and the test nearly always varies at these two milkings.

At the Georgia station nine cows made

the cows came back to their natural flow of milk in less than a week, often in two days. Judging from this there is no amount of pain suffered by the cow, and practically no loss in product resulting from the operation. It must be emphasized that as far as our knowledge of the dairy cow goes at the present day, we would be practically sure that any protracted pain, or any great physical shock, would lead to a material reduction in the amount of milk produced. It seems that the excitement of struggling with the cows operated on, and handling them in a manner to which they are not accustomed, is almost as operative in reducing the milk flow as the dehorning itself.

Raising Calves Without Milk.

It is an extremely unwise policy to feed for veal or for beef the heifer calves from valuable and good milking cows. There are far too many unprofitable cows in the country, and the heifer calves from good milkers ought to be grown to take the place of their mothers when their days of usefulness shall cease, and also to replace the poor cows. As milk is an article of diet in increasing demand, many farmers are desirous of getting the calves off their natural food as early as possible, and the

latter preferably. The calves are taken at seven to ten days o'd. and at first are fed twice a day on a ration of three pounds whole milk and one-half pound of the above mixture, in a few days—four to seven, depending on how the calf thrives—it is put on the full ration of calf meal. Wheat flour tends to keep the howels from becoming too loose. Coconut meal contains 20 per cent protein and 9 per cent fat.

C. G. F.

Dairy Pointers.

- You cannot clean dirty milk.
- Clean milk never comes from a dirty can.
- Sal soda is better than soap for cleaning dairy utensils.
- Care of milk and cream has much to do with price received for butter.
- You cannot get milk from a starved cow.
- Unless your cows turn their feed into milk instead of beef, they have no place in the dairy barn.—*Epitomist.*

In buying a flock of sheep be sure to get strong, healthy animals. Do not buy sheep that have been fed for show. They have been overstimulated and you can't keep them up to it.

A Famous Holstein Cow

raisers and even among the dairymen, the great majority of the herds are dehorned. Especially is this true among the working heads of cattle. In show herds the consideration of the natural appearance of the animal retains the horns.

At a number of the experiment stations exact records of the daily milk yield before and after dehorning have been kept. In a few instances the per cent of butterfat has also been noted at each milking for a few days before and after dehorning, and from these we can make a pretty fair estimate of the effect of dehorning on the dairy cow.

At the Wisconsin experiment station a record of ten cows was kept for the four milkings before dehorning, and for milkings immediately following dehorning. The ten gave 289 3 pounds in the four milkings before, and 243 6 pounds in the four milkings after dehorning—a loss of 45.7 pounds or 16 per cent. Each cow was tested much lower the milking immediately after dehorning than it had tested the two milkings before dehorning. But the test gradually increased until it was much higher than it had been in the milkings previous to dehorning, and the actual

an actual gain in milk yield the day following dehorning.

At the Tennessee station, nineteen cows were dehorned, and in ten days they lost only 34.2 pounds of milk from a total previous ten days' yield of 2,784.8 pounds.

The New York station, at Cornell, found that five cows lost an average of a pound a day for four days following dehorning. Seven cows not dehorned lost an average of one-half pound a day in the same time. One of the dehorned cows lost an average of four pounds per day in the record time.

At the North Dakota station fourteen cows were dehorned. Most of them fell off in their milk slightly, but gained in per cent of butter fat, and at the fourth milking all were back to their normal flow. The fourteen cows made about one pound less in the two days following dehorning than they had made in the two previous days.

From these reports it appears that there is a very small percentage of loss in the total amount of milk produced, and very little, if any, loss in the total fat produced in the first few milkings following dehorning. In the majority of recorded trials

problem to be solved is how to keep and grow the young animals.

Several excellent calf meals and milk substitutes are on the market, and a man may now sell all his milk and still raise the calves from his best cows, so as to build up and strengthen his own herd, and also supply better material, if he has it, to his neighbors for the same purpose. Some persons, however, prefer their own mixtures. The following formula will make a very fair milk substitute, Flour 16½ pounds, linseed meal 33½ pounds, finely crushed linseed cake fifty pounds. Two and a half pounds of this mixture per day will be required for each calf. Scald it in boiling water, then add enough more water to make two gallons, and add a little sugar and salt before feeding.

As the result of a considerable amount of experimental work, the following mixture is said to give most satisfactory results: Wheat flour, 30 pounds; coconut meal, 25 pounds; nutrium, 20 pounds; linseed meal, 2 pounds; dried blood, 2 pounds. One pound of this is added to six pounds of hot water, stirred for a few moments, allowed to cool to 100°, then fed to the calf from a pail or calf-feeder, the

FOR SALE.

MIRIAM E. OWN SISTER TO BEN F 2114, winner of the 2:17 pace at Vallejo, Thursday, August 13th. MIRIAM E. is a very handsome large black mare, five years old, a natural pacer, and though worked but very little can show great speed. She will be sold right is a fine roadster and a great prospect for a race mare. Is sound and all right every way. Apply to EDW. DINKELSPIEL, Suisun, Cal.

1145-1147 MARKET ST. SAN FRANCISCO

CLEARING OUT SALES

TUESDAY, SEPT. 29, 1903,

AT 7:45 P. M., BY ELECTRIC LIGHT

At Fred. H. Chase & Co.'s Salesyard,
1732 Market Street, San Francisco.

THE MEEK ESTATE, HAYWARDS, CAL.

will sell all the Standard-bred Horses belonging to the Estate, comprising 35 head. There are Fillies, Mares and Geldings—3, 4, 5 and 6 years old—by McKinney, Nutwood Wilkes, Welcome and William Harold, nearly all well broken to drive and all halter broken and gentle. The mares have colts at foot by William Harold 2:13 1/4 and Welcome 2:10 1/4, and have been bred hack. Among them are the dam and a full sister to Janice 2:08 1/4, a sister to Cricket 2:10 and many other highly bred ones. A fine lot of Shetland Ponies will also be sold to close out the horses belonging to the Estate.

GABILAN STOCK FARM

OF HON. JESSE D. CARR will, at this time, close out all its Trotting-bred Horses. There are 25 head of Yearlings, Two-year-olds and Three-year-olds; also a few highly bred Mares and Geldings. Also the grand young Stallion BOODLE JR. by Boodle out of Nina B. by Electioneer. He is one of the greatest young stock horses in California. The young stock is by Boodle Jr., Nutwood Wilkes and other good sires.

THE SALE IS POSITIVE AND WITHOUT RESERVE.

Send for Catalogues.

CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.
The horse CAN BE WORKED AS USUAL.
For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.
It is very adhesive and easily applied to a watery as well as a dry sore.
It will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1903 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.
It is a quick and sure cure for those troublesome skin cracks under the fetlocks which injure and often lay up race horses.

All Trainers Should Have it in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

Some of the Finest Ever Offered in California.

This is a splendid opportunity to get some of the best bred as well as the finest looking youngsters (all well broken) to be sold this year. Catalogues will be issued immediately. Any one having horses they wish to dispose of at this great sale will have an opportunity by sending to me for blanks and terms of sale. This will be one of the best sales to be held, and as it will take place after the State Fair closes and before the Breeders meeting at Pleasanton begins, owners should not hesitate to list their horses.

The fine location, splendid box stalls and myriads of electric lights and magnificent pavilion with its 1000 chairs where all visitors can see these horses offers advantages not approached by any other sales place west of Chicago. Sale will take place

MONDAY EVENING, SEPT. 14, 1903.

Commencing promptly at 8 o'clock at the famous

OCCIDENTAL HORSE EXCHANGE,

Horses at salesyard Sept. 12th.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the **FINEST IN THE WORLD.**

The **EMPIRE PARLOR**—the **PALM ROOM**, furnished in **Carise**, with **Billiard** and **Pool tables** for the ladies—the **LOUIS XV PARLOR** the **LADIES WRITING ROOM** and numerous other modern improvements, together with the unexcelled **Cuisine** and the **Most Convenient Location** in the City—all add much to the ever increasing popularity of this most famous **HOTEL.**

QUINN'S OINTMENT.
 CURBS, SPLINTS, SPAVINS, WINDPUFFS,
 —and all enlargements, absolutely removed by—
QUINN'S OINTMENT.
 It has the unqualified endorsement of our leading horsemen and veterinarians.
 MR. C. E. DINEHART, Cashier State Bank, Stanton, Minn., says:
 "One bottle cured a very bad case of blood spavin on a mare for which I have since been offered \$500. I would not be without it if it cost \$5.00 a bottle."
 We have hundreds of such testimonials.
 Price \$1.00 per package. Ask your Druggist for it. If he does not keep it, we will send prepaid on receipt of price.

Money should be sent by postal order, draft or by registered letter addressed to F. W. KELLEY, 36 Geary St., San Francisco, Cal. Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

San Francisco, Saturday, Sept. 12, 1903.

PRESIDENT BEN F. RUSH of the California State Agricultural Society expresses the opinion that seven days at the most is a long enough time for racing at the State Fair to continue each year. Prof. Carlyle who came here from Colorado to judge the cattle exhibits at the State Fair says that two weeks is too long to keep the animals penned in the sheds at Agricultural Park; that one week is long enough and would draw a larger list of entries. This journal has been agitating a one-week State Fair for some time and it begins to look as if the next fair will not be for more than seven days. The program of racing given at the fair this year, had it been put into six days would have been very satisfactory to the horsemen and the spectators, as all the made-up skate races would have been eliminated. The present Board of Directors contemplate many improvements and innovations next year which they could not bring about this year owing to the fact that vacancies on the Board were unfilled until too late to accomplish anything. They have saved many thousands of dollars in expenses, however, and it is hardly possible that the fair will not show a deficit this year as has been the almost constant rule for years past. A good fair of one week with the syndicate hooking eliminated and no races given, either running or trotting, except those that are regularly filled before the fair opens, will make the State Fair a popular and profitable institution.

THE SACRAMENTO TRACK has been in better shape this year than for many seasons. It has been often said that the old track was worn out and that it would never again be fast until it was entirely recoated with new soil. A few weeks before the fair opened, however, "Pap" Jones of Fresno arrived at the Capital city with a track machine of his own invention. He showed it to Director Wilson who superintends the track this year, and Mr. Wilson immediately concluded it was worth a trial and put Mr. Jones at work. The machine and Jones and Wilson made a great combination, as the track has been fast and good throughout the two weeks of harness and running races. As is usual, about ten or twelve feet of the track has been cut up next the pole for the runners and this has made the harness horses go a long mile which has prevented them making as fast time as they otherwise were capable of. There has been little complaint from any of the horsemen, however, except the owners of a few "dicky legged" runners who wanted the whole width of the track harrowed deeply to accommodate their skates. It is very noticeable, however, that in every running race the sound horses are invariably taken out on the hard part of the stretch when they are being ridden out to win. The mare Divina that took the record for mares last Monday, by running a mile in 1:38½, ran her mile on the hard ground the most of the distance.

CATALOGUES WILL BE READY by the first of the week for the big sale of horses from the Meek estate and the Gablian Stock Farm. There are sixty horses catalogued in all, and we can say without reserve that a better looking, better bred or more useful lot of horses has never been consigned to a sale in California. The Meek estate horses are thirty-five in number and by such stallions as McKinney, Direct, Hawthorne, Guide, Richards Elector, Sidney, Fallis, Wm. Harold, Welcome, Azmoor and Steinway. The Gablian farm sends twenty-five to the sale, including that very handsome and grandly bred young horse Boodle Jr., that in good hands can earn from \$1000 to \$2000 yearly in the stud, as his breeding and conformation are of the sort to attract the patronage of those who breed for good looks, substance and size as well as speed. Besides several young horses by Boodle Jr., Mr. Carr has consigned

a number by the great Nutwood Wilkes, and by Dictatus, Lottery, Ecce, Mambrino Jr., Fairmont and Thor, a son of Electioneer. There has not been a sale held in years for which so many applications have come in for catalogues as breeders recognize that few such opportunities as this sale affords are ever offered. The catalogues will be ready by the first of next week. Send your name and address to Fred H. Chase & Co., 1732 Market street, San Francisco, if you want one. Remember that the sale will take place by electric light on Tuesday evening, September 29th.

THAT ELECTIONEER BLOOD cannot be kept back. Now comes Major Delmar, a grandson of the old hero of Palo Alto and trots the Syracuse track in 2:01½, putting him second to none but Lou Dillon and three-quarters of a second ahead of the mighty Cresceus who now stands third in the list of the fastest trotters. Major Delmar is a six year old gelding and is by Del Mar 2:16½, son of Electioneer and the great brood mare Sontag Dixie, dam of five in the list. Sontag Dixie was by Toronto Sontag, out of Dixie, a daughter of the thoroughbred horse Billy Townes. Dixie's dam was by the thoroughbred Sir Charles, son of Sir Archy. Del Mar was a horse bred by the late Senator Stanford according to his idea of having the thoroughbred close up, as in Palo Alto 2:03½ and others. That Lou Dillon, a mare with a large quantity of thoroughbred blood in her veins has been the first to reach the two minute mark and Major Delmar the son of a horse bred that way, holds the next fastest record, is a pretty good vindication of the Senator's theories of breeding.

OWNERS OF RUNNERS should not forget that entries to the stakes offered by the Los Angeles Racing Association will close September 19th which falls on Wednesday next. There are seven stakes. The Los Angeles Derby has \$500 added, the others have \$400 added. The meeting opens October 10th and ends on the 31st. No bar will be placed on horses starting at this meeting by any other association.

Ben F.'s Record.

Ben F. the first 2:10 horse of the year in California is nearly twelve years old and from his behavior since coming into Fred Chadbourne's hands no one would imagine that he was once a bad actor. It is said that he was not half so bad as he has been painted, however, and that two or three runaways when a youngster are the extent of his bad behavior. However, a good story is told in this connection by President Ben F. Rush of the State Agricultural Society who bred this pacer and for whom he was named. Mr. Rush states that while a number of visitors to the State Fair this year were passing around the stalls inspecting the horses a group of ladies and gentlemen stopped in front of Ben F.'s stall. After admiring him and being told that he won every start he had made this year, one of the ladies asked:

"What is his record?"

A swipe from one of the stables whose horse had been shut out by the son of Bradtmoor in one of the races, and who knew of his former record for smashing things, immediately answered the lady's query as follows:

"Eighteen huggies, three carts, and the Lord knows how many sulkies."

It is needless to add that the swipe exaggerated a little, but "the laugh went round."

The best drivers sometimes do things that make them look like amateurs, says the *Horse World*. During the Buffalo meeting two of the best known and most skillful drivers following the Grand Circuit, each lost a race by turning to see what was going on in the rear. In each case the look back was taken in the stretch during a heat that, if won, would have given the race to the driver who looked back. A young driver, fresh from the half-mile tracks, would have been laughed at had he acted similarly, but few seemed to notice these experts when they lost races in this manner.

There is a grandly bred young colt running at the side of its dam at Nutwood Stock Farm. The mare is the property of James Paris, Jr., of Sacramento, and was bred at Palo Alto Farm. Her name is Edith and she is by Geo. Wilkes, one of that great sire's few remaining daughters. She is the dam of Idolita 2:09½ and also of the sire Hummer. The colt at her side is by Monbells, son of Mendocino and Beautiful Bells. Edith is 22 years old but is a vigorous mare and was bred to Nutwood Wilkes this year.

The person who buys the gray pacing mare Monogram 2:24½ that will be offered at the sale of Hon. Jesse D. Carr's horses in this city, Tuesday evening, September 29th, will get a pacer that but very few will head on the road. She has a regular whirlwind brush of speed, and can show a quarter in 30 seconds almost any time. She is a straight, easy goer, a nice driver and has a perfectly clean set of legs that are as hard as nails. The sale is at 1732 Market street, by electric light.

Golden Gate Park Driving Club Races.

A good program of harness racing was given by the Golden Gate Park Driving Association at Tanager Park on Wednesday, September 9th.

The main event was to have been the match race between F. P. Plageman's bay gelding Gen. Vallejo and Edw. Aigeltinger's bay gelding Dolador for \$500 a side. Mr. Plageman's horse was lame and was taken from the track the day before Dolador was ready to race and was driven around the track by Jos. Cuicello. Mr. Aigeltinger was awarded the race and claims the money which is his by all rules. The summary of the day's racing is as follows:

Three-minute class—First heat, Old Guy won, Miss Washington second, Fred T. third. Time, 2:48. Second heat, same order. Time, 2:38; purse \$115.

Second race, 2:25 class—First heat, Sandow won, Mack second, Della McCarthy third, Ethel H. fourth. Time, 2:21½. Second heat, Della McCarthy won, Mack second, Ethel H. third, Sandow fourth. Time, 2:22½; purse \$175.

Third, match race between E. H. Aigeltinger's Dolador and F. P. Plageman's General Vallejo, given to Dolador by default.

Fourth, 2:30 class—First heat, Victor won, Lafayette second, Victor Ivy third. Time 2:31. Second heat, Ivy won, Lafayette second, Victor distanced. Time, 2:32½. Third heat, Ivy won, Lafayette second, Victor third. Time, 2:31½.

Betting was conducted by means of a mutual box, tickets being sold for \$2 each.

Old Guy paid \$2.85 and \$2.65; Sandow, \$1.25 and \$3.90, the field in the second heat paying \$6.45; Victor, \$3.40, and the field the same in the second heat, Ivy being a prohibitive favorite in the last.

The following persons served as officers: Judges, G. L. Swett, L. Richardson, W. Thompson; starter, R. Ledgett; timers, A. B. Spreckels, I. B. Dalziel, T. Crowley; marshal, John Holland; secretary, Fred W. Thompson.

The New Track at Los Angeles.

The Los Angeles *Express* of last Tuesday contained the following: "This morning work was begun on the foundation for the new steel grandstand to be erected at Ascot Park, on Slauson avenue. This is to be the central figure at this new place of amusement, and it will be the finest in the country. It will cost about \$75,000. The stand will face east, extending 300 feet along the track, and is to be 107 feet wide. Inside the building will be lavatories and dressing rooms for women, a club room for men and a thoroughly equipped restaurant where meals will be served at all times. North of the grandstand, and connected with it by a covered walk, will be the saddling paddock. Opposite the stand, and from thirty to fifty feet from the outside fence of the track will be the row of barns for horses. There will be twenty-five of these barns, several of them containing twenty stalls and the others forty stalls. They will be perfectly ventilated and a trainer or owner can stand in the doorway of the stall and watch a race around the track. Fifteen of these barns are practically completed and the framework is up for five more.

It is expected that the park will be in condition for the opening Christmas day, and it will represent an expenditure of more than \$250,000, exclusive of the cost of 160 acres of land. The park will be reached by five electric car lines, and it is probable that two or three of these will be run into the grounds to a point within 100 feet of the grand stand. These lines touching the park are the Maple avenue, Central avenue, Main street, San Pedro street and Long Beach.

Ample provision has been made against fire, as the club owns the water works on the ground, and it will be used for irrigating purposes as well as for fire protection. The barns are being built in an orchard of walnut trees, and these will be irrigated. Lawns are being laid out, and the entire park will be beautified in every way. J. W. Brooks, manager of the association, has been East, where he arranged for a large number of the fast and famous horses of the country to race here this winter. He promises that the meeting at Ascot Park will surpass any ever given on the coast."

The Fastest Running Mare.

The State Fair this year has developed the fastest running mare in the United States. This is Divina, a four year old brown filly bred by John Mackay, Superintendent of the Rancho del Paso. She is by the imported sire Basselaw and her dam is Angeliqne by imported Dahren or Warwick, second dam Altitude by Alarm, third dam Beresina by Kentucky. Divina ran a mile on Monday last with 106 pounds up in 1:38½ and on Thursday carrying 114 pounds won the mile handicap in 1:39 eased up.

Notes and News.

They call it the "Skindicate" book at Sacramento.

Kinney Lou 2:07½ is the fastest new trotter of the year.

Anzella 2:06½ is lame and has been thrown out of training.

The Airship, 2:11 pacing, now carries a record of 2:13½ trotting.

Lexington will have an open hetting ring at the October meeting.

George Ketcham has purchased a white automobile to be used as a pacemaker for Cresceus 2:02½.

McKinney 2:11½ has five trotters in the 2:10 list. No other stallion has more than four.

Dolly Dillon 2:07 has reduced the trotting record for the Pittsburg matinee meetings to 2:09½.

Here are the eighths of Lou Dillon's mile: (1st) 15½, (2d) 15, (3d) 15, (4th) 15½, (5th) 15, (6th) 15½, (7th) 15, (8th) 14.

El Primo, "the guideless pacing wonder," will be sold at the Occidental Horse Exchange next Monday night.

Crown Princess 2:13½, by Dexter Prince, was bred by Mr. A. B. Spreckles and is owned by Mr. Bailey of the great Barnum & Bailey Circus.

There should be a rule to prevent great horses from being used in races simply to advertise some gimcrack manufacturing firm. It is not true sport.

C. F. Bunch who has quite a string of horses at Sacramento will again locate at Pleasanton after the racing is over and will train a public stable there.

If you want a first-class stallion or broodmare that is standard and bred right, attend the sale next Monday night at the Occidental Horse Exchange. Catalogues are issued.

The catalogues of Wm. G. Layng's great sale next Monday night contain the names and descriptions of some of the choicest trotters and pacers ever offered at auction in California.

Mr. Casper Redfield has doubtless got this item in his scrap book: "Jay Bird was twenty years old when he got Hawthorne 2:03½, his fastest performer, and her dam was twenty three years of age."

John Dickerson gave seven trotters standard records in one day at a recent New York meeting. Five of them were by the stallion Bellini, making a total of eight he has marked so far this season to the credit of this great son of Artillery.

Billy Buck won the famous Charter Oak stake worth \$10,000 at Hartford Thursday. Mr. Geers landed him at the wire first three times in succession and the time was 2:07½, 2:09½ and 2:11. This lowers the former record for the stake.

There is a prospect of a hot race at Hollister during the meeting there this month between a couple of yearlings. One is by McKinney, the other by Dictatus Medium. Both are said to be 2:30 trotters, and a half-mile in 1:15 is certain if they come together.

Lou Dillon is to start to-day at Cleveland to beat the record of Maud S. 2:08½, to high wheel sulky which was made at the same place July 30, 1885, a little more than eighteen years ago. Lou Dillon worked out a mile to the high wheels last Wednesday in 2:10½.

Budd Doble met with an accident at Hartford last Tuesday. He had won two heats with The Roman, and in the fifth heat of the race a boot came loose on his horse, throwing The Roman near the half-mile post. Doble was slightly bruised, and his horse was distanced.

At a meeting which will be held on Long Island next week the races will be for both trotters and pacers. The management has decided that the pacer outclasses the trotter three seconds in point of speed so that a trotter with a mark of 2:15 can race with pacers of the 2:18 class.

There are seven McKinneys ranging from three to six years of age, four Diablos, besides about forty others sired by the most famous stallions in California, having size, color, soundness, and all are thoroughly broken, to be sold at Layng's great sale next Monday night. Mr. Layng says there is not a cull nor a cripple nor an unsound horse in the consignment.

To the late Pierre Lorillard is attributed the following epigram, which certainly has more than a modicum of truth in it: "In this world, if you live long enough, you will grow tired of everything, of men and women, of yachts and dinners, of politics and money making; but when the fascination of the race horse gets into the blood it never leaves. It is the greatest sport and the poorest business ever devised by man."

The Hollister Race Track Association will give a fall race meeting of four days commencing September 23d. Fourteen races have been advertised and a good meeting should be the result. The Hollister track is in first class shape and everything will be made convenient and pleasant for horsemen.

At Charter Oak track, Hartford, last Tuesday the McKinney stallion Ben Liebes, won the \$1500 purse for the 2:23 class trotters in straight heats without being pressed any part of the mile. The heats were in 2:17, 2:19½ and 2:17½. Ben Liebes has been in Ed Geers string since last May and this is his first start.

Dan Patch broke the world's pacing record of 2:04½ on a half-mile track on the Lima, Ohio, driving track last Monday afternoon in the presence of 10,000 persons. Better time would have been made but McHenry had to hold him up on the last turn on account of his nearly breaking. Time by quarters, 0:31, 1:01, 1:32½, 2:04.

John J. Scannel, owner of The Abbott 2:03½, Idolita 2:09½, and others, is very much annoyed about the reports that the famous gelding has seen better days. He says that the horse is in better condition than at any time since he has had him. He also says that he expects The Abbott to lower his record before the season is over.

There are three fillies, two by Dictatus and one by Boodle Jr., all from first-class mares, that are entered in the Breeders \$6000 Futurity for next year, and that will be sold at the clearing out sale of Gabilan Stock Farm at Fred H. Chase & Co.'s salesyard, 1732 Market street, San Francisco, Tuesday evening, Sept. 29, 1903. Here is a chance to get a prospective stake winner at your own price.

Larkin W. the four year old gelding by Boodle Jr., that will be in the sale of the Gabilan Farm horses at Fred H. Chase & Co.'s salesyard, 1732 Market street, on Tuesday evening, Sept. 29th, is a splendid young horse and a great prospect. He is not only a good looker but is one of those good gaited flat footed trotters that is a pleasure to drive. He trotted a quarter in 34 seconds at the Sacramento track last week.

The other day fifty carloads of range horses were sold at auction at St. Louis. The top price of the sale was realized by a few head of broken horses at \$53, while the highest price for a full load of range horses was \$49.50. One carload of very choice, fat, small or rather medium horses were bought by a southern buyer at \$40 and several loads went at from \$31.50 to \$36. Weanlings sold at \$10 and yearlings at \$12 to \$14.

An exchange says: "The practice of having the pace-maker precede the trotter or pacer and thus act as a wind shield in trials against time seems legitimate when it is remembered that the same thing is done every day in races. Ed Geers almost invariably takes advantage of the principle when he drives a race, trailing close behind the leaders nearly the full mile and then pulling out and making his drive through the stretch."

Here's another evidence that the Sidney blood backed up by the right kind of thoroughbred is all right. Al Bock, the pacer that has been such a good winner on the Grand Circuit is out of Countess by Sidney, grandam Gray Dale (dam of Longworth 2:19) by Hollenback's American Boy, Jr., third dam Grey Polly by Winfield Scott, son of Everett Everett 51, fourth dam Sorrel Polly by Sir Henry and fifth dam, a daughter of Printer.

SIDNEY DILLON

Sire of LOU DILLON, the Two-Minute Trotter

Stipulator, the black horse by Titus own brother to Direct 2:05½, dam Grace Kaiser, dam of Coney 2:02, reduced his record to 2:13½ and won a good race at Monmouth, Illinois on Thursday of last week. He started in the 2:12 pace for a purse of \$300 and after Jackmont had won the first two heats in 2:12½ and 2:10½, Stipulator took the next three in 2:13½, 2:15½ and 2:15. Pretty good time for a half mile track.

Lildine Wilkes, the name given a two year old filly by Nutwood Wilkes, should be a rare good one on her breeding. Her dam is by Boodle, second dam by Carr's Mambrino, third dam by Owen Dale and fourth dam by Williamson's Belmont. This is the sort to raise another two-minute trotter from. She is to be sold at the clearance sale of Hon. Jesse D. Carr's horses which will take place at Fred H. Chase & Co.'s salesyard, 1732 Market street, in this city, Tuesday evening, September 29th, by electric light.

What a wonderful horseman is this Budd Doble! Thirty-six years ago he drove Dexter to a world's record of 2:17½. Seven years later he drove Goldsmith Maid to another world's record of 2:14. Twenty years later he again drives a champion trotter, Nancy Hanks 2:04. Now almost ten years after that, he drives Kinney Lou to victory in a great race. Is it any wonder that the horse world cheers this perennial reinsman? When trotting racing was in its infancy Budd Doble was a lad and for forty years he has been a conspicuous horseman, conspicuous for his rare ability as a trainer, his skill as a driver and his strict integrity in business. Forty years in the sulky—what wonders time has wrought in that period.—Kentucky Stock Farm.

The daily papers have nearly all stated that Rio Alto won the Stanford stake in 2:16½. This is a mistake. Rio Alto won the \$5000 stake for three year olds at the State Fair in 1894 in 2:21½, 2:21½ and 2:20½. His record is 2:16½ and was made at San Jose November 2d of the same year in a race for three year olds which was won by John Bury. Rio Alto took the first and second heats in 2:16½ and 2:19. John Bury won the next three in 2:22, 2:23½ and 2:23½.

The breeding of the good four year old Judge Green 2:10½ now in Monroe Salisbury's string is as follows: Sire Directum 2:05½, dam by Anteeo Jr. 2:2372, second dam by Geo. M. Patchen Jr. 31, third dam by Primus 255, fourth dam Fannie McCourtie, said to be by Harry Clay 45. Anteeo Jr. was by Anteeo 2:16½, dam Lady Signal by Signal 3327, second dam by Langford thoroughbred son of Williamson's Belmont. Primus 255 was by Marshall Chief 452 and was brought to California from Michigan in 1864 or 1865 by Jesse Wall.

Margaretta, the black pacing mare by Direct 2:05½ that has won both her starts at Sacramento during the State Fair, is said by Farmer Bunch, who has been training her, to be an exact match to the mare Trilby Direct that Mr. Juan Gallegos sold over East this year and that has taken a record of 2:05½. Bunch says that as Direct Hal and Prince Direct, both sons of Direct took the pacing team record last year, it would be quite a novelty if Trilby Direct and Margaretta two daughters of the same sire could be hitched together and sent for the team record for pacing mares. Bunch is confident they could pace together in 2:10 or better.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

The Barefoot Fisher Boy.

Where sumachs nodding to and fro
Their crimson tassels spread
The wary trout is lying low
Blue is the sky o'erhead.

The barefoot fisher knows how best
To lure them from their haunts;
No tacking grand attends his quest—
It's only fish he wants.

A goodly string is dangling down
His brier-embroider'd calves;
He'll do some city Izaak brown—
'Twill not be done hy halves.

Alack, the fish are in the pan,
The barefoot fisher's gay;
He eats them like a little man—
No Izaak passed his way.

—Horace Seymour Keller.

Save the Birds!

Articles from the pen of Mrs. Josephine Clifford McCrackin which appeared in the columns of this Journal, elicited a response from Mrs. Alma Keitb, a San Francisco milliner.

This action of the city tradeswoman seems to be in disparaging contrast to the deference the trade and dealers have paid public sentiment and the Federal and State laws in other cities of this country, notably so in Cincinnati. In the latter city, we will mention, several arrests and convictions of divers milliners for illegally having certain skins and plumage of indigenous song birds in their possession might possibly have had something to do in bringing about a change in the hearts of those who were commercially interested in the destruction of song birds.

The cause is progressing materially in the East in favor of the protection of song and insectivorous birds, and a like condition here should have the unanimous support of our citizens generally.

Mrs. Keitb, evidently, is unacquainted with the methods employed by the plumage hunter, or she would not have committed herself in defense or endorsement of so callous a vocation, the pursuit of which is tainted with cruel and brutal features of so gross a nature as to meet with universal condemnation.

The following vigorous reply appeared in the San Jose *Mercury* of August 18th:

"Editor *Mercury-Herald*: It was only on my return from a visit to the coast that the *Mercury-Herald* of July 26th containing a lady's criticism on song bird protection came into my hands and I beg that you grant me space for a few words of reply.

Without malice and with no unkind feeling toward this lady, I must still speak in defense of the stand taken by the Ladies' Forest and Song Bird Protective Association.

Two wrongs never yet made one right, and we are perfectly consistent when we object to the killing of song or plumage birds for the purpose of cooking and eating them, as well as for the purpose of trimming women's hats. We do not insist on having bluejays killed on account of their harsh voices, but we are doing all in our power to save both song and plumage birds and feel that we are carrying out the principle advocated by our government—national and local—that those ordinances shall obtain which confer the greatest amount of good on the largest number of individuals.

There are many more farmers, orchardists and grain growers in these United States than there are milliners and their employes, and what these manufacture out of slaughtered birds and their feathers are only articles of luxury and can be more easily dispensed with than fruits, vegetables and grain for bread. And vegetables, grain and fruit, we maintain, will be destroyed by insects, worms and caterpillars if the song and plumage bird is killed off; hence our war on the 'milliner-hunter' of whom I have spoken with contempt.

That a milliner must have artistic taste in order to be successful I am well aware of, nor do I say one word to belittle the occupation, and it needs not the added explanation that women in this manner often support those dependent on them. We are all wage-earners—the king on his throne, Teddy Roosevelt in his chair of state, the general at the head of the army, and the editor on his tripod, while the hodgecarrier climbing the ladder with his load of bricks is entitled to as much respect as are these others. But the fellow who goes out as "milliner-hunter," knowing that he is breaking the law when he carries trap and net with which to snare harmless birds and tear off their wings while still alive and puts their eyes out or pulls off the entire skin with the feathers, is not a wage-earner, but a miscreant and the most contemptible being the sun shines on.

So far from taking hack one single word I have written or said about this class of people, I am rather proud of the articles published in BREEDER AND SPORTSMAN of July 18th and July 25th, in which I have expressed with still greater emphasis my opinions on this subject. For although I write and act only in conformity with the wishes and views of our association, I consider myself personally responsible for every word I write or say.

Josephine Clifford McCrackin,
President Ladies' Forest and Song Bird Protective Association
of Santa Cruz County."

The Golden Plover.

This bird, sometimes locally known as the frost bird, hullhead or hullhead plover, is perhaps the most widely traveled of all the game birds which offer sport to the inhabitants of the United States. Altogether migratory in its nature, it appears far to the North, in the Great Slave Lake country and through the arctic regions of the coast of Labrador, or generally in that remote Sub-Arctic North of which we know so little, the land of long winters but of swift, hot summers. It reaches its northern limits sometime in the latter portion of the month of May and before the middle of the month of June. By the first of September it is again to be found, south bound, with its young raised brood, crossing the timbered zone, and heading almost as far to the South as it has been to the North. It reaches the lower shores of Patagonia in its Southern migration, and is very abundant in the pampas of the Argentine Republic. It crosses the Southern states, crosses Mexico and Central America, and even works as far to the westward as the Hawaiian Islands. It is found on the Pacific Coast, but is not numerous there. From its eastern coast it deviates as far as the Bermudas and the West Indies. It winters in these warmer regions of the southern country, and returning once more begins its long journey, under that strange compelling migratory instinct whose intensification is one of those things for which even science does not attempt adequate explanation.

There are two great natural fly-ways of the golden plover, that of the Atlantic coast and that of the Mississippi valley, these being indeed great fly-ways for all the water fowl as well as for this strange migratory upland bird. Upon the eastern coast it usually makes its appearance in the fall about September 11th, the time of the first frost, whence the name of "frost bird." It crosses the State of New York and is found at scattered spots in the Middle States, in New Jersey, Pennsylvania, and so on south. It is counted upon as a more or less steady factor of sport in such regions as it visits in its migratory movements, and is a bird perhaps better understood by the Eastern sportsman than by his brother of the West.

To-day, however, it is perhaps in the middle western regions of the United States that the sport of golden plover shooting may be best enjoyed, although even there it is not what it formerly was. The great Mississippi valley flight formerly was composed of thousands upon thousands of these birds. Audubon reports a most remarkable flight of golden plover which he saw near New Orleans, and describes graphically the destruction made in the ranks of the birds. That was in the muzzle-loading days, of course. Since that time the muzzle-loaders and breech-loaders have kept steadily at work upon the golden plover, twice a year, from south to north, and from north to south, across the American continent, so that to-day the bird is in no wise so numerous as it was a couple of decades ago.

The golden plover does not seem to accommodate itself to the advance of civilization as does the grouse or the Bob White quail, nor yet does it seem to alter its fly-ways, it numbers not so many now, less each year, yet still holding the old aerial ways and still existing as a fairly abundant species of a distinctly interesting nature.

The golden plover, more especially in the height of the breeding season, when the plumage is at its best, is a handsome bird. At that time its breast is a deep black and its back is mottled with brown and gold, from which latter color its popular name is derived. Its plumage, shot full of this mass of yellow flecks is striking and beautiful, although the bird itself lacks the raciness and game-like contour which seem to speak from every line of the Bob White quail or the lusty grouse. Simple, fatuous, unsuspecting and confident, this bird has no great sporting quality of its own. It does not seem to change its habits with the change of the years, although it may become a little more wary in localities where it is steadily pursued. It has not learned, like the ruffed grouse, the value of individual initiative. Strictly gregarious, it goes forth in large numbers and announces its whereabouts plainly and confidently.

Moreover, so far from seeking out deep and protective covering or even choosing a feeding ground with which its own plumage would harmonize after the scheme of protective coloration, this plover has the habit of exposing itself in the most open manner upon the short grasses of the early meadows, or the burned-over tracks where there is absolutely no cover to conceal, its plump little figure.

To be sure, it will not allow the hunter to walk up deliberately and pot it upon the ground, yet it seems to have no concerted plan of defense. As a species it would be doomed to speedy extermination were it not for its migratory nature.

On the table it is delicate and desirable—not so much so as the woodcock, not so much so as the quail or the grouse, but still enough so as to cause it to command a price in the markets about even with that of the Wilson snipe. In bulk it is between that of the latter bird and the full grown Bob White quail. Its food is made up of tender grasses and of insects found among those grasses. It is very fond of a bit

of country which has been burned off and upon which, in the early spring, a new growth of short grass appears. It feeds also to some extent upon the winter wheat fields of the Middle West, or may now and again be seen stalking about in close packed ranks upon the pasture grounds. Showing dark against the general background, its round, full body renders it a mark tempting to the upland shooter.

It is during its northbound flight that the golden plover carries longest at the latitude of the temperate zones, and it is during that time that these birds are shot in greatest numbers in those parts of the United States which it visits. The first flight comes in at the 42nd parallel—that which crosses well up in the states of Illinois, Indiana and Michigan—at about the middle or the latter half of April. The last week of April is that which ordinarily witnesses the greatest flight, and the first two weeks in May were those in which the bird was most successfully bunted in the early times, preceding the day of the more rigorous game laws in the Western states. Whether in the spring or in the fall, the habits of the bird are pretty much the same, although in the fall the young birds, not yet full plumaged and still more innocent and credulous than their thick witted parents, offer easy prey to the upland hunter.

There are three ways of bunting the golden plover, only one of which can be counted productive of great sport or be described as a proper one for the pursuit of the bird. Fly-way shooting is in some localities practical, and of course it offers a certain degree of skill; yet this is too uncertain in these days of scarcity to entitle it to much regard as a means of taking the golden plover. Its only possibility rests in the fact that these birds, for some mysterious reason, appear to have regular crossing places at any given section. Thus the old fly-way across upper Indiana, west of the town of Rensselaer, Gillman, Ill., was another place, situated on the high rolling prairies, which was always crossed by these birds on the northern flight. The fly-way then came in west of the Calumet country, at the foot of Lake Michigan, the flat high ridges which bound the second beach of Lake Michigan. The little town of Summit, located by a short distance from the city of Chicago—indeed now within the confines of that city—was directly in this northern fly-way, and even to-day the birds bang about this locality as though they could not accommodate themselves to the changes wrought by the advancing civilization of modern times. The Desplaines valley was followed on to the north by the old northbound flight of plover, and the high prairies located to the west of the great city of Chicago were touched upon the way. Thence on across Wisconsin the unbroken pathway of the air led on and on, until finally the birds made their way to the extreme Arctic country which is their summer home.

Thus, anyone living fifty miles west of Chicago might miss a great part of the flight of the golden plover, and anyone residing fifty miles east of Gillman, Ill., might in his turn miss the few days which represented the cream of the sport on any given spring. There were even certain fields, certain swales or ridges, which seemed to have been selected by the birds as their land marks.

The sportsman well acquainted with this well established fly-way, or similar ones elsewhere, was able now and again to post himself in some convenient bedge or behind some little blind and secure fairly good sport at golden plover shooting when the flight was at its best; say in the latter part of April. It might be for only a few days in the week, perhaps only for a few hours on one or two days, yet while it lasted one could easily understand the description of Audubon as applied to the distinctive fly-way shooting in Louisiana long ago.

Yet another form of pursuing golden plover is that of stalking it by the aid of a horse, preferably by a team and vehicle. Although these birds while feeding will not ordinarily allow a shooter to walk up to them within range, they now and again will permit one to drive close enough to shoot them. This method, of course, has gone out of vogue in the later days of smaller fields and more numerous fences, and it never was entitled to be called more than a makeshift in the pursuit of this bird. Sometimes a party of three or four guns would go out across the prairies in the early days, and by dint of diligently following up a flock time and again would be able to kill fifty or sixty, or even one hundred, of these handsome and fat little birds in the course of an afternoon's shooting.

It has been long since such a thing has been possible in any part of the Mississippi valley—that is to say, possible with any sort of regularity although now and again there might be a chance day when the flight dropped in, during which a good bag of golden plover might be made in this fashion.

The most sportsmanlike form of pursuing the sport of shooting the golden plover is by means of blind and decoys, precisely as one hunts ducks, with the exception that the decoys are placed out upon the dry hills and not in the neighborhood of swamps and waterways. There is no bird in the world which decoys more handsomely than the golden plover, and providing that one has studied the species carefully, he can have at times very exciting sport in this sort of decoy shooting. In the first place he must understand the habits of the birds and must, of course, have located their natural fly-way and their feeding grounds. In the next place he must be able to imitate the call of the birds, and to imitate it in such way that it can be heard at a great distance. Unless he be a good caller he will lose the greater part of his sport, for a really good imitation of the note of the golden plover can be sent down wind a distance of three-quarters of a mile, or even a mile, and the birds will readily come to the note at no matter what distance they hear it, when they are swinging around aimlessly across the country in search of feeding grounds. The call itself is not difficult of fairly close imitation, being a shrill repetition of the note "wheet, wheet, wheet, wheet-wheet!" Some callers produce this note by means of an artificial call, but the best

Oregon Field Trials.

Mr. Tudor J. Tiedemann, than whom there is no greater field trial enthusiast on the Coast, expresses the following views in favor of field trials in Oregon.

"If there is one state on this Pacific Coast possessing an abundance of game and suitable field trial grounds, that state is Oregon. Residing in the state are some of the most gentlemanly sportsmen one could find anywhere. Owned by these good sportsmen are many valuable Setters and Pointers. From a bench show point of view the relative merits of a large proportion of these dogs are known. Not so, however, from the standpoint of field trials, therefore all the more reason why Oregon should have a field trial club and assist in forming a coast circuit. My friend, Multnomah, whose many articles on the subject of Oregon field trials I have read with interest, has the idea that it will be necessary to have a sufficient number of Bob White or California quails and English partridges before field trials can be attempted in Oregon, and explains his reasons by saying that it is his opinion that an effort to hold trials on the Mongolian pheasants would not prove at all satisfactory. Right here is where I differ with Multnomah and will put myself on record as saying that after having carefully watched the habits of and run my Setters on California quails, I would just as soon agree to try them on young Mongolian pheasants, being thoroughly of the opinion that were such trials held during the month of August or the early part of September, more points and better bird work would be the result than has been the case during the past few years with the Pacific Coast Field Trials Club, holding trials on California quails. The Mongolian pheasants when grown may run faster than our California quails, but they are not much if any more tricky or cunning.

Let the trials be held, as before said, in August, when the cover is good, and before the young pheasants have become disturbed or shot at, and I will guarantee they will lie plenty close enough to insure good results from the competing dogs. In the vicinity of Corvallis are large tracts of land owned by gentlemen who forbid shooting thereon. These fields have splendid cover and many pheasants, and would, if permission were given to hold trials on them, and if properly patrolled, prove ideal field trial grounds. Careful patrolling of the grounds would be absolutely necessary to insure good bird work.

I feel that I can speak advisedly on this subject, as all my Setters, including Northern Huntress, were broken on Mongolian pheasants, and in support of my assertions regarding the adaptability of young pheasants for field trial purposes, I, in June last, sent two young Setters to the Oregon Training Kennels to be broken on that bird. I expect to visit Portland and other Oregon towns in a few days, at which time I shall interview some of its sportsmen on this subject."

Delverton Cappi, a sound and handsome Cocker, is announced in the stud in our advertising columns.

W. B. Coutts and J. E. Lucas, we are informed, are now located on Whidly Island with their strings of Derby and All Age dogs. The trials of the Pacific Northwest Club will start on the 29th inst.

A note from Victoria, B. C., states that Mrs. J. J. Bostock's Rejane, sister to Ch. Dukedown, by Ch. Cesario ex Ch. Duchess of Durham, whelped on July 9th two dogs and three bitches to Dusky Crack, by Daunter ex Dame Gossip. Dusky Crack is now in Honolulu.

The same owner's Reminiscence, by Brockenhurst Minor ex Dainty Pickle, whelped four dogs and two bitches to Mr. F. W. Welsh's Reconquest, by Ch. Doungton ex Ombra.

Mr. Thos. S. Griffiths of Spokane, Wash., writes: "I have just purchased by wire the Collie stud dog Imp. Rippowam Archer. Color, black, tan and white; he is a winner in England and America and a sire of winners. His breeding is very fashionable. Sire, Ellwyn Astrologer, who figures in the breeding of lots of prize winners. Dam, Ellwyn Gem, a noted winner. Mr. M. M. Palmer, the well known Eastern Collie judge says he has ideal ears and head. I have also just sold a pair of Lenzie Prince puppies to John Gracey, Milan, Wash."

GOSSIP FOR SPORTSMEN

Poaching and illegal shooting of ducks has been in vogue for some little time past on the marshes in the vicinity of Alvarado, Newark and Alviso. This reprehensible practice has been in vogue now, we are reliably informed, for many seasons past. During open season for ducks, there is no section that we know of where the law against night shooting has been so persistently violated. Many big bags of ducks have already been shot on the marshes mentioned and this slaughter bids fair to continue until the season is open on October 15. The officials across the bay are, it seems, as apathetic as of yore. It behooves the sportsmen who are interested in preserves in that section to take measures for the protection of their shooting grounds.

The ducks killed now are all home bred birds. It will not take long to drive away enough birds to make the first days of the season ones of disappointment to the law abiding sportsmen unless measures are taken to stop the work of the privateers.

Striped bass angling has received an impetus this week, the effect of which will be noticed at the various fishing resorts to-day and to-morrow.

A catch big was made in Sonoma creek at Schellville by Harry Baum, B. Bieberheimer, Geo. Rumpf, A. Martin and others in the beginning of the week. The three days' catch weighed over 400 pounds, the largest fish taken scaled 21 pounds. A number of bass were

caught at Sears Point on Sunday by J. Bruns, Jack Karney, C. Breidenstein and J. Suich. Anglers state that the net fishermen have set nets across Midshipman slough on the Petaluma side, this illegal practice prevents the fish from coming up the slough.

Reports from Rodeo, Vallejo and Port Costa state that striped bass, although generally small, are being caught plentifully.

John Fatjo, of the Lake Merritt boat house, has put up a prize, consisting of a rod and reel outfit valued at \$20, to be given to the angler who catches the largest bass from Lake Merritt between September 1st and December 1st. Coupons can be procured at the boat house, the weight of bass entered in the contest must be recorded with Wm. Orear at 909 Broadway, Oakland.

The open deer season closes today in the following counties: Marin, Yolo, Napa, Riverside, Santa Barbara and Los Angeles. The season in Sonoma county closed on September 1st.

Is the tuna of the Pacific waters a gamier fish than the tarpon of the Atlantic ocean? Gen. J. Fred Pierson of New York, an enthusiastic sportsman, who holds the record of the east coast of Florida for tarpon fishing, came across the continent recently to solve that perplexing question. He returned to Los Angeles subsequently after a week's visit at Catalina, where he trolled the waters each day in an endeavor to test the gaminess of the tuna, but failed to coax them to the tempting bait, getting neither a nibble nor a bite. The tuna were not running. Yellowtail were all the general could secure, but he found that fish both gamy and plentiful, making several good catches during his stay at Avalon.

General Pierson made his celebrated catch of tarpon at San Lucie Inlet, one of the numerous inlets to the Indian river, on the east coast of Florida. It tipped the scales at 205 pounds, and gave the General a most exciting fight. It made a strike at the bait, catching it with a precision that landed the hook into its throat, and the battle royal began, which lasted for hours. The monster leaped into the air six times, once making a leap that would put all the best pole vaulters in the world to shame. It jumped fully eleven feet into the air. This sounds fishy, but there is a way of modifying the story for the benefit of skeptics. The fish's head only was eleven feet out of the water, while its tail did not reach quite that altitude in its flight.

In speaking of the merits of the tarpon and tuna fishing, one from the point of view incident to many years' experience in the sport and the other through the eyes of an acquaintance who has been so fortunate as to have landed tunas, General Pierson claims:

"Tarpon fishing must be the gamier of the two, but I am not convinced that such is the case, and not until I have reeled in a tuna will I be satisfied as to their respective merits for putting up a fight for liberty. I am familiar with the tarpon's mighty efforts to be liberated when hooked, having had many battles with him on the Florida coast, and comparing him with the descriptions of the landing of the tuna, which I have read, and those furnished by friends, I would say without hesitation that the tuna is no match for the tarpon, so far as fighting spirit is concerned. But, I am not speaking of the tuna from my own experience—only from what the Catalina fishermen and my friends have told me.

"The mighty leaps of the tarpon in his struggle to free himself alone suggests a high order of sport. His air flights are not confined to one or two, but many. Sometimes as many as eight or nine leaps are made before the fish succumbs to the inevitable and allows himself to be pulled up to the boat, but by that time he is nearly dead, and a gaff ends his struggle. This feature is not the only one which makes it appear that he is the gamier. The difference in the rod, line and reel used in catching the two fishes also contributes toward that impression. The rods practically are the same, but the line used by the tuna fisherman is much heavier, being either No. 20 or 21, while the tarpon line is about No. 15. The reel in use for tuna fishing is provided with a drag, which is wanting in the tarpon reel, the sportsman depending wholly upon his fingers and a thumb stop in the controlling of the tarpon when reeling. Both these differences would indicate that the tarpon fisherman depends a great deal upon his skill in manipulating the line and reel during the gyrations of the fish, while the tuna fisherman places considerable dependence upon the strength of his tackle."

Fall Shooting Outfits.

Open season for ducks and quail is only one month off—it's a short time, so get ready early. Skinner has some decoys, wooden and canvas pneumatic, that cannot be beat. Racine built duck boats, to see one is to want it. Rain coats, hats and pants of a special tulle color. The latest wrinkle in ammunition cases, leather or metallic. For upland shooting, be the proper thing in comfortable clothing and footwear. See Skinner, 801 Market street, for a complete outfit for the shooting season.

SALES.

C. F. Charles sold a Cocker Spaniel dog puppy (Ch. Dufferin Pastime-Nairod Imposter) to N. W. Hall, August 25, 1903. C. F. Charles sold a Cocker Spaniel dog puppy (Ch. Dufferin Pastime-Nairod Imposter) to David H. Hogan, August 26, 1903.

Dog Owners!! Read This!!

We are carrying in the advertising columns of this journal an advertisement of "Sergeant's Dog Remedies," a popular line of preparations for which F. W. Braun & Co. of Los Angeles, California, have been made distributing agents on the Pacific Coast. The goods have few equals and no superiors on the market today having received the biggest endorsements of the leading dog men and kennel owners of this country and Canada.

They are manufactured by Polk Miller Drug Co. of Richmond, Va., who invite all persons having sick dogs to write (enclosing stamp) describing symptoms, and they will cheerfully furnish the best possible advice without any charge whatever. A revised copy of their book on "Dogs" sent free on receipt of 3c in stamps to cover postage.

AT THE TRAPS.

There will be a number of clay bird events at Pinole to-morrow on the Home Gun Club grounds.

The Golden Gate Gun Club prize shoot to-morrow at Ingleside should prove a drawing card. The main event is an open to all re-entry merchandise prize shoot, 20 targets, \$1 entrance, best score to count. In this race there will be ten classes, five prizes in all but the last class, for which there is four cash prizes. The list of articles offered, besides cash, comprises an assortment of general value and utility such as has rarely been offered at a shoot of the kind.

The ties (if any) for the Remington gun will be shot off at 25 targets, balance of ties, 10 birds miss and out. Event No. 3 will be a re-entry cup shoot, 15 birds, 50 cents entrance. Event No. 4 novelty shoot, 25 birds 75 cents entrance. Conditions, 5 birds at 14 yards, 5 at 16 yards, 5 at 18 yards, 5 doubles at 14 yards. \$15 in cash for five classes will be added.

The final live bird shoot for this season on the Ingleside grounds came off last Monday. The main event was a 25 bird race for the Compagno cup. Sixteen shooters entered the race which was won handily by Mr. W. G. Keane, a trap shooter hailing from Australia, where he was a well known devotee of the sport. Mr. Nauman, shooting from the 34 yard mark lost his twenty-fourth bird. C. A. Haight was unlucky enough to lose his fifth bird dead out. R. C. Reed, Dr. Derby and Ed Fay also scored twenty-four birds each. In a six bird pool which followed, the purse was divided by W. J. Golcher, Ed Donohoe, C. C. Nauman and C. A. Haight. The scores and distance handicaps were as follows:

Compagno Handicap Trophy shoot, 25 pigeons, entrance free, birds paid for only, high gun—

Table with names and scores for the Compagno Handicap Trophy shoot.

Six bird pool, \$2.50 entrance, 3 moneys, high guns—

Table with names and scores for the six bird pool.

Fifty-two shooters were in attendance at the merchandise shoot of the Millwood Gun Club on Wednesday. Nearly every shooter who entered won a prize, the distribution of which was on the grab bag system. The numbers for each prize were placed in a bag, the highest score took the first pick followed in succession by the next high scores.

The entries and scores made in the prize shoot at 20 targets, entrance 75 cents, were: Hunt 11, Lewis 12, Beattie 16, Leary 14, Walpert 19, Iverson 19, G. Sylvester 17, C. H. Kewell 14, F. Kewell 9, Turpin 17, Mersfelder 15, Gordon 19, Collins 17, Patrick 10, Sbreve 7, White 18, Van Norden 11, Falkenstein 4, F. Kewell 5, W. Price 15, Zeiner 15, Farrell 10, Sollom 7, E. Klevesahl 18, Fisher 11, O. Feudner 17, Johns 14, Murdoch 18, Forster 18, Kerrison 15, Ashlin 16, C. H. Kewell 14, Smith 16, Ostrander 19, Daniels 16, Price 15, Baum 12, Defenbach 14, Patrick 10.

In a four man race, names drawn from a hat; 20 birds to a man, the winners were: W. Murdoch 17, H. Hoyt 17, S. Leary 14, C. H. Kewell 15.

Coming Events.

- List of coming events including Rod, Gun, and Bench Shows with dates and locations.

Gun.

- Specific gun events including Dove season open, Deer season open, Millwood Gun Club, etc.

Bench Shows.

- Specific bench show events including Ottawa Kennel Club, Toronto Industrial Exposition, etc.

Field Trials.

- Specific field trial events including Western Canada Club, Winnipeg, etc.

THE FARM.

Getting the Cows.

If dairymen would depend upon rearing their dairy animals themselves, the result would be much more satisfactory, as a rule, than to buy from stockmen or speculators in a haphazard way any "pick-ups" that are offered. In order to begin right in rearing our own dairy stock, calves should be selected whose granddams on both sides had a good record at the pail or churn; then there will be a reasonable hope that the calf will evolve into a profitable member of the dairy. If we are in the dairy business for milk, then the attention is drawn toward the animal which will turn her food and energies into furnishing an abundance of milk; but if the aim of the dairyman be cream or butter, he does not care whether the amount of milk be large or small, so it yields a proper amount of butter fat. But if the dairyman deems the rearing of calves only a "side issue," and as a result gives only indifferent treatment, he might just as well buy his cows; for a stunted calf is a pitiable object and will never fulfill its destiny, no matter what its after-treatment may be. Extravagance in the feeding of the calf is pardonable — parsimoniousness, never. Extravagant feeding—it would be so called by many—means milk fresh from the cow or new milk for at least three weeks after the birth of the calf; and the calf that is not worth what new milk it can consume during the first few weeks of its life is not worth the rearing. Let me emphasize that the first weeks of the calf's existence determine its value later on.

I advocate letting the calf remain with its mother for a day or two, not from any sentiment on the subject, although I confess to a feeling of pity when the cow's maternal instinct is ignored and the offspring is removed from her sight as soon as born, but I believe it tends towards the betterment of both cow and calf, besides being more natural. When the calf is removed from the mother, be it sooner or later, if the season is cool, then a stall should be given which insures light, is clean and, last but not least, is warm. The new-born animal, whether of high or low degree, is a "creation of warmth." Therefore, the calves stall should provide warmth. The food of the calf should be of the same temperature as the blood of its mother upon which it was nourished until its birth—blood warm. New milk is richer than blood—at least the milk from a good cow is—so it is best to dilute the new milk with water to a reasonable extent. Solid food is not fit for the stomach of a young calf, but at a reasonable age, sweet skim-milk may be substituted for new milk gradually—the weaning process should be a slow one. Later on, corn meal may be added, leading to corn ensilage, clover hay, etc.

The decline in dairy profits can be traced to keeping unprofitable cows. Inbreeding has been the cause of more failures in dairying than any other one thing, and almost in no kind of business is it more necessary to be accurate. The amount of butter fat per day which each individual of the dairy herd yields ought to be known by the owner of such herd. If the Babcock test cannot be applied, then use a home-made test, thus: Keep the milk from each cow separate, and weigh the butter when churned. This test, applied once a month, will give the value of the cow in butter fats. You will doubtless be surprised in making this test. The cow which you consider the "leader" of the herd will probably be found anything but a "leader" in yield of butter fat, while the cow of most unimpressive appearance proves to be the best cow of the herd. This has happened in many cases. Many dairymen are

looking through "blue glasses" now, would not have been the case if they had not trusted to outward appearance, instead of making an accurate and adequate test of their herd. Cull out those profitless "rubber cows" and let the survival of the fittest be the motto of dairymen in general.—A. C. McPherson in *Country Gentleman*

Treatment of Colic.

Green feed is apt to cause colic in horses. On this subject a prominent veterinarian says:

"It is of great importance in the treatment of colic to first ascertain what has brought on the attack. If it is due to the consumption of a quantity of dry food, and there is reason to believe there is a hardened mass of dry, undigested feed in the intestines, common sense will tell us that this mass needs to be moved.

"Therefore, more is needed than mere stimulants. Physic is demanded. And what shall this physic be? Shall it be aloes? No, because they increase the secretions of the mucous membranes, and are so far good, but not sufficient to wet up that dry mass.

"What then shall it be? Oil oil, oil every time, sufficient to soften up and emulsify this mass of dry food. How much, it may be asked. It is difficult to say.

"But start with a pint of pure, raw linseed oil (never boiled). Give with a round teaspoonful of ginger, and if there is much pain add an ounce of sulphuric ether, or half an ounce of hydrate of chloral dissolved in water and add.

"In an hour repeat, and continue to repeat until there is a natural rumbling of the bowels.

"Also use the syringe by injecting a gallon of warm, soapy water up the rectum, and repeat hourly until the pain succumbs or a passage is made. In bad cases wring cloths out of hot water and apply to the abdomen.

"In cases where the attack may be due to the consumption of a quantity of soft food or to drinking much cold water, digestion is in a measure stopped and certain gases are formed by chemical action.

"Nothing will better neutralize the gas thus generated than half an ounce of carbonate of ammonia dissolved in a pint of water and poured down from a bottle. This will relieve the bloating, and can be repeated hourly.

"Also, if the pain is severe, give the hydrate of chloral as before recommended, with the ginger, and repeat if necessary every half hour until the pain is relieved."

It is conceded that the operation of pasteurization of milk affects deleteriously its value as food, though to what extent is a question. Dr. Salmon does not believe this to a very great extent. He admits that the medical profession has very generally taken the ground that pasteurization is harmful to milk. Milk, he says, should be produced by sufficiently clean methods to need no pasteurization; but if it is impossible to procure milk of known cleanliness, then the slight loss in food value from the pasteurization will be overbalanced by the knowledge that the process has killed the harmful germs. Pasteurized milk or cream is that which has been heated to a temperature of about 155 deg. F., which does not kill all bacteria, but only those which are in a vegetating condition and ready to begin their activity at once. Sterilized milk or cream, speaking exactly, is that in which all the germs have been destroyed (usually by repeated boiling, 212 deg. F.), but in dairy practice the term is applied to milk or cream which has been heated once to a temperature of about 212 deg. F.

Many of the best dairy cows, when first fresh, are milked three times a day for a month or two. When tests for butter are being made they are milked as often as four times a day.

Roan Bulls and Red Bulls.

A prominent California breeder of Shorthorn cattle recently referred to the popular fondness of Western breeders for red cattle as "a kind of a fad." Now, although we heartily agree with him that the roan is the most typical of the breed and, in fact, is a color to which advanced breeders are very partial, yet the stockmen of California, Arizona, New Mexico and Texas are given to breeding bulls of a solid red color for several reasons that under the conditions will be admitted to be sound.

In a range country such as Southern Arizona, New Mexico, Western Texas and Northern Mexico, cattle must necessarily travel long distances to water and back again to the feed. The hot sun continually beating down upon them produces the light, bleached out colors so frequently met with in the cattle. These conditions give you a class of stock in which light colors inevitably predominate. Now it is the opinion of our older range men that there is a decided tendency for roan bulls to produce roan or spotted offspring. A roan bull, therefore, combined with the influence of climate, might, in a herd of poorly graded, or ungraded, Western cows, produce what we formerly termed a "calico-colored" bunch of cattle. For these reasons we know that range men in these districts like a very dark red bull. Even with the Hereford, we have time and again seen range men show preference for the bull with the deepest color of red.—*Fresno Live Stock and Dairy Journal*.

Great Sale of Beef.

Red Bluff *Sentinel* says: "John Finnell recently closed one of the largest sales of beef ever made in the State, as the deal amounted to about \$125,000. Tehama county is not only famed for its fruit, grain, lumber and wood, but it produces the finest quality of beef, and the big hand sold by Mr. Finnell is a fine lot of cattle. He sold 2500 beef steers to the Western Meat Co. of San Francisco at 8 cents a pound, and the steers will average about \$50 each. They are to be delivered at the rate of 400 a week and the first 400 has already been shipped from Tehama."

Dairy Notes.

Sorghum is greatly relished by cows. It temporarily increases the flow of milk.

As the pastures increase or diminish, the grain ration should be increased or diminished.

The good cow, or the bad one, like a boy, is largely made in what his parents and grand parents were.

The plan of having cows lie on a cement floor is not natural, and cannot be com-

fortable. Wood or dry earth is preferable.

Food and water for dairy cows should always be clean. Filthy water and food injures the cow's health, thereby preventing her doing her best.

While it is best never to let the calf suck, it should be given its mother's milk for three or four days. Then it should have new milk for three or four weeks.

If the calf received one-half the attention given a pig it would give more profitable results. On most farms they are turned out to rustle for themselves.

The hands should not be used in working hutter, as the warmth in them makes the hutter oily. Working hutter with the hands is also uncleanly.

Where cows are kept up all the time, the stables should be cleaned twice a day. Cows are naturally neat, and do not enjoy unclean stables nor unpleasant odors.

Dairying and hog raising is a paying combination, with dividends sure.

Do not feed warm milk today and cold milk tomorrow. Feed warm milk all the time.

Screens are used in many dairy barns to keep out the flies. The flies are a nuisance. The cows would soon pay for the wire in the increased amount of milk.

The most important part of the day's work comes in the morning and evening when the cows are to be milked. Take plenty of time, be kind and quiet, and seek in every way for the best results.

"Over and above all," says a writer, "we want educated men to handle dairy cattle from callhood to maturity, whose reliability will insure the proper raising and development of their capabilities.

A New York dairyman feeds his cows three times a day; feeding corn silage eight and morning, hay at noon, with grain three times a day—equal parts of dried brewery grains, wheat bran and gluten meal.

One of the reasons given for taking the Philippine Islands was that it would benefit our trade. Most of the butter that is now used in those islands comes from Australia, and but little comes from this country. Although the cost of these islands has already reached well up toward the billion dollar mark, and this sum has been paid by the American people, not a dairyman in the United States can get a pound of his butter into those islands unless he pays 2½ cents a pound duty on it. That is, before an American dairyman can send his butter from one part of the United States to another part of our country, he must pay a duty of 2½ cents a pound for the privilege of doing so.—*Farmers Tribune*.

VETERINARY PIXINE

The Model Shorthorn.

The following interesting description of the model shorthorn is given by an expert in the English *Live Stock Journal*:

"A model shorthorn should, I think combine the good points for which several of the leading strains are respectively remarkable. In a bull the head is a feature of the highest importance. The forehead is very wide between the eyes and a little dished. Under it the face tapers gradually to the muzzle, where it becomes slightly wider round in the nostrils, which are prominent and full. The nose is of a rich flesh color tint, and any blueness or spots are to be condemned. Curling hair on the carp is becoming to a bull. The eyes are prominent, bright, and bold looking, showing high blood and spirited character. The ears are rather long, thin, erect, and well covered with hair. The horns, which are of a creamy and waxlike color, and sometimes inclined to be flat, spring well from the coronet, are short and thick, and, with age, bend rather inward towards the face. Upward growing horns are very objectionable, and destroy the contour of a head which may be otherwise well formed. There is always much grandeur displayed in the head of a high class bull, and every really great sire that ever lived possessed it.

"Thomas Bates, and indeed, all great breeders, attached great importance to the head of a sire, being assured that it indicated, more than anything else, his value as a stock getter. He selected Belvedere to cross the Duchesses chiefly on account of his grand head, and the double cross of that bull resulted in the production of the royal prize winner, Duke of Northumberland, which was admitted by breeders of different parties to be one of the best bulls they had ever seen.

"His head and crest, his very prominent eyes, and the general grandeur of his appearance and gait were never forgotten by many of the eminent breeders who admired him. The ideal head must be, so to speak, well chiseled, yet displaying all the strength and vigor which go to make up a thoroughly masculine appearance and expression.

"The head is nicely set on to the neck, which is wide, of good length, deep and muscular, with a strong development of crest which adds immensely to the appearance of a bull. The neck vein is well filled out, so as to carry the neck back into the shoulders, without any appearance of hollowness at their junction.

"The breast is wide, full, prominent, and deep, so that the dewlap is not far from the ground. Richard Booth used to say that a 'bull should stand with his forelegs well outside him.'

"A bull's shoulders should be wide and strong, yet not coarse. They need not be too fine at the points, for this is heiferlike, but they must be oblique, sloping back, and wide on top, where they should melt, as it were, into the crops, which must also be wide and well fleshed. From the crops to the forearm, that is to say, in the girth, there must be little or no depression or slackness, but the foreribs should come out as wide as the shoulders.

"The animal is then thick through the heart and wide of chest, an essential to good constitution. The forelegs are short, the arm being very stout and wide, and the hock is fine below the knee."

"From the shoulder to the tail the line is straight, the back is wide and level, the ribs growing out roundly from it and extending well back towards the hips, which must not be too wide in a bull, else he would be found fault with as being cowhipped.

"The ribs are deep and the flank thick, heavy, and well let down, so that the underline from behind the forearm to the junction of the flank with the hind leg will be straight. Thus there are even lines under and over

"The hindquarters are long and wide, the rumps, so valuable as meat, being

well filled and almost concealing the prominence of the hips. The tail is set on neatly and well covered at its root, no lumpiness being seen. The twist is wide and deep, and the thighs heavily fleshed down to the hocks, an essential point in a sire, but seldom seen at its best.

"The hocks and hind legs are straight and wide apart, the legs being short and set firmly on the ground. The hair is abundant, of fine texture, soft and mossy. A rich color, red or roan, is an important point. Deep flesh is one of the greatest essentials in a Shorthorn. There must be abundance of heavy flesh of fine quality.

"The skin must not be thin; it should be rather thick and soft, and there should be felt underneath it that peculiar mellowness which is an evidence of thriftiness, and a faculty to produce beef with a moderate expenditure of food, or, in other words, to make beef economically."

"The female Shorthorn has, of course, most of the characteristics which belong to males. The head of the female is finer, longer, smaller, and more tapering. It is full of gentleness and beautiful feminine character.

"The eyes are more placid, and the horns are much smaller and gracefully bent or curled. Again, the neck is thinner and much finer at its junction with the head. The brisket is not so deep as it becomes a bull to have it.

"A heifer's shoulders are very neat, and not so strong or wide as those of the male; they are also thinner at the

top where they join the crops. Mr. Carr, in speaking of a handsome heifer, said that 'she had shoulders like a salmon.' A heifer does not need the amount of beef to the hocks which is looked for in a bull, and, furthermore, it is no fault in a cow to be rather wide of her hips, but she must not be extravagant in that point, as it would be injurious to symmetry.

"The udder should extend well forward, and have well formed and square set teats of moderate size, and placed well apart."

The Oregon experiment station in an endeavor to learn the value of different crops for sheep feed and to determine the amount of mutton that could be produced on an acre found that a combination of corn for silage, clover for hay and oats for grain feed grown on an acre in the proportions of corn sixteen per cent, clover 31 per cent and oats 53 per cent would feed one sheep for 630 days. They also found that fall wheat could be pastured quite closely in early spring without serious injury and could be made to very profitably supplement the grain feed in fattening for market at that time. On one plot of 1 1/2 acres a gain of \$8 in value of meat was produced by pasturing the wheat two weeks, while on an adjoining plot the same size but not pastured, the yield of wheat was only one bushel greater than on the pastured lot. In the great wheat belts much profit can be made out of sheep and the fertility of the soil can be increased at the same time.

Sober up on Jackson's Napa Soda.

"SAVE-THE-HORSE" SPAVIN CURE.

It isn't words, it isn't type or page advertisements, it is the truth that ring out sound and clear and impressive—actual results from business men whose standing and reliability can be readily ascertained—which have made "Save-the-Horse" such a success. Their cured horses are living advertisements, absolute certainties as to the possibility of the remedy in your own case, and with every bottle is a guarantee document as binding to protect you as the best legal talent could make it.

The fire iron is uncertain and invariably only aggravates the disease or injury; blistering is less effective than the fire iron, and both necessitate laying up the horse three or four weeks to several months. Mercurial and poisonous compounds produce irreparable injury.

"Save-the-Horse" eliminates all these factors: Cures without scar, bluish or loss of hair; can be applied at any time, anywhere, any place, and in all conditions and extraneous of weather. Horses may be worked as usual with shin or ankle boots, as no harm can result from destruction of hair or scalding of limb.

Positively and Permanently Cures Bone and Bag Spavin, Thoroughpin, Ringbone (except low ringbone), Curb, Splint, Capped Hock, Windpuff, Shoe Boli, weak and Sprained Tendons and all Lameness.

\$5.00 per Bottle. Written guarantee with every bottle given under our seal and signature, constructed solely to satisfy and protect you fully. Need of second bottle is almost improbable, except in rarest of cases. Send for booklet and copy of guarantee. If your case is different than described in our booklet or advertising, we will advise you frankly as to the possibility of the remedy effecting a cure. Give explicit particulars. Give the veterinarian's diagnosis, if he is competent. Inform us fully as to the age, development, location of swellings, lameness, previous treatment and describe the way the horse carries and holds leg. \$5.00 per bottle at all druggists and dealers, or sent express prepaid.

Short Course in Husbandry.

BERKELEY, August 31.—The agricultural college has just issued its announcement for the short course to be given in dairying, horticulture and agriculture this fall. Any person over seventeen years of age and possessed of a common grammar school education is eligible to elect the course. The term will open October 6 and run to December 17. The curriculum is as follows:

"Physics and Chemistry of Soils," Professor E. W. Hilgard and R. H. Doughridge; "Fertilizers," Professor Doughridge; "Grasses and Forage Plants," Professor E. J. Wickson; "Sugar Beet Culture," Professor G. W. Shaw; "Farmers' Business Methods," C. A. Colmore; "California Horticulture," Professor Wickson; "Plant Propagation," Professor A. V. Stuebenrauch; "Viticulture," Professor E. H. Twilight; "Economic Entomology," Professor C. V. Woodworth; "Scale Insects," Professor Woodworth and E. F. Quayle; "Insecticides," Professor F. R. Calby; "Milk and Its Products," Professor F. W. Taylor; "Dairy Bacteriology," Professor J. R. Ward; "Dairy Chemistry," Professor M. E. Jaffa; "Breeds and Breeding," Professor Major; "Veterinary Science," Professor Ward; "Feeding Farm Animals," Professor Jaffa; "Human Foods," Professor Jaffa.

quality of the milk. It is as rich while feeding in pasture as on dry feed in winter, and its composition varies but little from day to day. These tests will surprise some people. It is almost universally believed that turning a cow on green pasture in spring will increase the milk yield, and that the milk is richer as the calf is older. It must be remembered that in these tests the cows were given the maximum feed, both in quantity and quality, and they got nothing more except variety, when they were pastured than they did when they were kept up.

Cures Spavins

Like magic. Read the testimony below and then resolve to suffer no longer from Spavin, Ringbone, Splints, Curbs and all other forms of Lameness. Kendall's Cures them all.
Hershey, Maine, Jan. 1, 1903.
Dr. B. J. Kendall Co.,
Gentlemen—I have used your Kendall's Spavin Cure and it works like magic on Spavins. Will you be so kind as to send me one of your "Treatise on the Horse and his Diseases." Very truly yours,

Period of Largest Flow.

Everybody knows that a cow when fresh will give more milk than when the calf is old, but sometimes it is desirable to know at what time a cow will make her best record. From 239 records it was found that the largest flow of milk is given during the second and third week, beginning four days after calving. Tests for five years show that a cow's milk is as rich when a heifer as when she is matured. The milk is as rich the first month as it is later, except during the last few weeks when she is drying off. There is very little difference in the season as to the

Conditions. Entrance fee 5 per cent of purse and 5 per cent additional from money winners. Money divided 50, 25, 15 and 10 per cent of purse. Two or more horses may be entered from the same stable and held only for one entry fee. In case where two or more horses have been named as one entry, and any horses have been separated from the stable from which they were originally entered, and such separation made according to rule, they shall be eligible to start in the race upon the payment of the regular entry fee. A horse entering a class that does not fill may be transferred to any other class eligible by notifying the Secretary on or before September 5th. A horse not winning a heat in three shall not start in the fourth heat, except in a field of eight or more starters; then he must win a heat in four or go to the barn. Horses so ruled out shall have a right to a share of the purse according to their rank at the close of the last heat. The board reserves the right to declare off and return first payment in any purse that does not fill satisfactorily. Right reserved to declare two starters a walk-over. When only two start they may contest for the entrance money paid in, to be divided 70 per cent to the first and 30 per cent to second horse. A horse distancing the field shall be entitled to first and fourth moneys only, and in no other case shall a horse be entitled to more than one money. Other than specified, rules of the National Trotting Association, of which this Association is a member, to govern, except hoppers not barred on pacers.

Running Races. Two Running Races will be given each day, with entries to close at 6 p. m. day preceding race.

In addition to the Harness Events Three Running Races will be given Each Day.

CONDITIONS.

Entries to close Monday, September 14, 1903, when horses are to be named, and to be eligible to the class in which they are entered.
Stakes not filling satisfactory to the management may be declared off.
Stakes will be divided into four moneys: 50, 25, 15 and 10 per cent.
Entrance 5 per cent, and 5 per cent of the amount of the Stake will be deducted from each money.
The management reserves the right to declare two starters a walk over. When only two start they may contest for the entrance money paid in, to be divided 80 per cent to the first and 20 per cent to the second horse. A horse distancing the field shall be entitled to first and fourth moneys only, and in no other case will a horse be entitled to more than one money.
The management reserves the right to change the hour and day of any race, except when it becomes necessary to ante-date a race, in which instance the nominator will receive three days notice by mail to address of entry.
The right reserved to declare off or postpone any or all races on account of weather or other sufficient cause.

The management reserves the right to start any heat after the fourth score, regardless of the position of the horses.
Entries not declared out by 5 o'clock p. m. on the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.
When there is more than one entry to any Stake by any one person or in one interest, the horse to be started must be named by 5 o'clock p. m. on the day preceding the race.
Trotting and racing colors must be named by 5 o'clock p. m. on the day preceding the race and must be worn upon the track. Colors will be registered in the order in which they are received.
Hoppers barred in trotting races, but will be permitted in pacing races.
Conditional entries will be treated same as regular entries and nominators held under the rules. Any race that may be started and unfinished on last day of the meeting may be declared ended and money divided according to the rank of horses in the summary.
Otherwise than as herein specified in these conditions, National Trotting Association Rules, (of which this association is a member) except Rule 4, to govern.

Advice on Oiling Roads.

The following article was written by James W. Abbott for the Department of Agriculture, Washington, D. C.:

The utility of crude petroleum on public highways was first tested by the supervisors of Los Angeles county in 1898. Six miles were oiled, and from this the practice has grown in favor all over California. More than twenty-five counties use it satisfactorily.

Oil was used primarily to lay dust, but it also prevents the roads from becoming muddy during the rainy season. One treatment lasts through the season. If treated again during the following year the roads will remain in good condition in this State for two seasons.

Oil is used not only to bind together particles of dust, but also the coarser portions of the soil, forming a tough stratum. When the stratum is broken it is repaired until a strong, impervious road is secured. The stratum grows harder and firmer until a first class road is the result.

Oiling roads is the first consideration toward economy. Oiled roads are impervious to water and will not wash but the expense of construction is money thrown away if the oil is applied to wet soil. It will not adhere, and the ground will become flaky or lumpy, and the oil will not evenly distribute. Where the work is properly done no washing will occur.

Some precautions should be considered. The oiled roads should not be used before ready, as oil and lumps will be picked up by vehicles.

Soil from oiled roads after some months' application produces no stain on clean muslin. Bicycles run better. Oiling gives the roads a seal brown color, easy for eyes. Oiling preserves the planking for wooden bridges, affording protection to it from water and vehicles.

The road should be prepared to slope about four inches to every eight feet from the center to the side. The road is then thoroughly wet with a road sprinkler and rolled with a light roller and then left undisturbed until the water dries, but good results may be obtained otherwise. After the road surface has dried it is well to use a sharp toothed harrow to loosen it to a depth of three inches; this will insure an oil crust three inches in thickness, provided the soil will absorb the oil to that depth, which may be determined by a slight experiment. While the roads are being treated to oil travel must be kept off of them. A special sprinkler must be used. After oiling the roads the soil is stirred. The road can be used in about two days after treatment. On hard soil, not porous clay nor macadam, the oil is best applied after heating to good results come from the oil heated by the sun after its application on road. For the oil that remains on the surface in this case a coating of sand must be used. The road can thus be built up layer after layer.

Ordinarily for a sixteen-foot roadway between 250 and 400 barrels of oil of forty-two gallons each are required to the mile. Two applications would probably be sufficient for a porous or clayey soil. Upon macadam one coat of oil is enough. After the crust has formed twenty-five barrels to the mile will keep the roads in repair. As the "stitch in time" is to the needlewoman, so is timely repair to the oiled roads.

It is economy to oil the roads. The practice saves wear and tear of horses and vehicles and cost of keeping roads in shape. From the standpoint of health and general comfort oiled roads are a success.

If you cannot afford a good bull of a dairy breed, get some of your neighbors to club in with you and get one. It will pay you.

Regularity, cleanliness and good cows are important factors in successful dairying.

BALLISTITE

The Standard Dense Powder of the World.
STILL LEADS AT THE TRAPS OR IN THE FIELD.

Ballistite wins from the limit marks in distance handicaps, at either live birds or flying targets, as it always gives the highest velocities with the closest and most even patterns at all ranges. Ballistite is absolutely unvarying in results being waterproof, smokeless, odorless, without residue, resurges lower than black powder, unaffected by age or climatic changes, and never pits, rusts or corrodes the barrels. Ballistite is sold with above guarantee.

Take No One's Word. Try It for Yourself.

BALLISTITE

The Standard Dense Powder of the World.

CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET. IT PENETRATES and DRIES in quickly and DOES NOT GUM and FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements. It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS and BRITTLINESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed. It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.

It PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH, STRONG, ELASTIC WALL and HEALTHY FROG—a FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds, due to its use.

It is a CERTAIN CURE for THERUSH and SCRATCHES. We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:—Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2 1/2 Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free. Don't fail to read "ad." giving information concerning Campbell's Iodoform Gall Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

WINCHESTER "LEADER" SHELLS LEAD

At the Third Annual Target Tournament of the Dominion of Canada Trap Shooting and Game Protective Association, held in Toronto, August 12th to 15th, inclusive, winnings were made as follows:

1st Day: High average for day by Mr. Higginson of Backlogham, Quebec.
2d Day: Two Men Team Championship of Canada, 20 targets per man, won by Messrs. McGill and Wakefield of Toronto, with score of 37. High average for day won by F. Westbrook of Brantford.
3d Day: Parker Gun won by J. Hovey of Clinton, who also won high average
4th Day: Grand Canadian Handicap, 100 targets, won by Mr. Craig of Sherbrooke, with a score of 93.

"Mall Trophy," the most important trap shooting trophy in Canada, emblematic of Five Man Team Championship of Canada, won by Brantford Gun Club Team, with score of 222 out of 250.
The Montreal Rolling Mills Company Cup, emblematic of Individual Championship of Canada, won by Mr. Bain of Winnipeg, with a score of 48 out of 50 targets.
High average for the day—"Beresford Cigar" Cup—won by Mr. Hovey.

All these splendid victories were won with Winchester "Leader" Shells, and are a forcible testimony to the uniformity of these goods.

THE WEEKLY
BREEDER AND SPORTSMAN

F. W. KELLEY, PROPRIETOR.

Turf and Sporting Authority of the Pacific Coast.

—OFFICE—

36 GEARY STREET, SAN FRANCISCO.

P. O. BOX 2300.

TELEPHONE: Black 586.

Terms—One Year \$3, Six Months \$1.75, Three Months \$1 STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter addressed to F. W. KELLEY, 36 Geary St., San Francisco, Cal. Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

San Francisco, Saturday, Sept. 19, 1903.

CATALOGUES ARE OUT for the big dual dispersal sales of the Meek Estate and Gahilan Stock Farm to take place on Tuesday evening, September 29th at Fred H. Chase & Co.'s iron pavilion at 1732 Market street, San Francisco. There has not been a sale announced in years where a better bred lot of horses has been offered at auction. The Meek Estate animals are nearly all thoroughly broken, and when this is said it means that the horses are broken so that any person who can handle a pair of lines can drive them. They are broke to steam and electric cars and many of the handsomest and best bred mares in the consignment can be driven by children. These are the horses that are profitable to buy, as they can be put into use at once and will earn a profit for their owners on the road or at light farm work. Many of the best bred and best lookers of the consignment have hauled fruit and vegetables from the Meek Farm to the railroad stations and have not found the loads too heavy for them. Some have even been worked to light plows and harrows, and others have pulled a surrey full of children to and from school. There are no old superannuated mares or horses in this consignment but all without exception are strong and vigorous.

The consignment of Mr. Jesse D. Carr's Gahilan Farm are mostly young horses, but they are grand lookers and royally bred. There are several that will make high class road horses. There is Monogram, a gray mare that has a pacing record of 2:24 and can now show a quarter in 30 seconds. She is a wonderfully fast mare in a hush on the road and seems to have her speed all the time. Larkin W. is a very handsome gelding that is a square trotter and equal to a record of 2:20. He should make some one a great road horse. The stallion Boodle Jr. has proved his value as a stock horse and will be a good money earner in any good man's hands. He has size, style and breeding to recommend him. The colts and fillies by Nutwood Wilkes in this sale are grandly bred and very promising.

We advise those who have not received catalogues to apply at once to Fred H. Chase & Co. for them, as the demand is large already. This is without doubt one of the best opportunities to secure choicely bred and good looking horses that has been offered for some time.

THE BELLE MEADE STUD. What horseman has not heard of this great thoroughbred breeding farm, owned by the late Gen. William H. Jackson, and located near Nashville, Tennessee. Since the General died, it was hoped the great farm would be kept up, but it will be dispersed and all the great stallions and brood mares will go under the hammer. On the opposite page will be found a full list of the stallions and mares to be sold by the Fasig-Tipton Company at their paddocks at Sheepshead Bay, October 13th and 14th. Among the stallions to be sold is Imported Loyalist. This horse is a full brother to Paradox, being by Sterling out of Casuistry, by The Miner. Sterling is the sire of many cracks, including Isonomy, Enterprise, Enthusiast, and Harvester. The first of Loyalist's get to start was the brilliant Lissak, that is now a very successful sire. Another stallion to be sold is The Commoner that met and defeated the best of his time and retired with many rich stakes to his credit. The Commoner is by the great Hanover that is destined to be one of the greatest progenitors of speed that ever lived. The Commoner started 32 times and won 18 races. He was unplaced but four times. Huron, son of Iroquois, Inspector B. by Enquirer, and Mont d'Or by Rayon d'Or are also to be sold. There are sixty-four brood mares, representing one of the grandest collections of producers that was ever gathered on one farm, besides about 35 weanlings, foals of this year. California breeders who want to bid at this sale should send their commissions to the Fasig-Tipton Company if they cannot be present.

THIRD PAYMENT of \$5 will be due and must be paid by Thursday, October 1st, this year, on the colts and fillies entered in the Pacific Breeders \$6000 Futurity for foals of this year. This stake closed last year. There is a substitution clause in the conditions which permits a nominator, in case his mare has proven barren or had a dead foal, to substitute another colt or sell the nomination. Now the way to get your money back is not to forfeit. Pay up, and then sell the nomination if your colt is dead. If you do not pay you are out of it; but if you do there is a good chance to get your money back, as you have until April 1st, next year, to substitute.

Horses at the World's Fair.

The \$93,640 allotted for horses, asses and mules at the World's Fair is divided among twenty-four classes as follows: Trotter, Thoroughbred, Percheron, French Draft, Clydesdale and Shire horses, \$6,205 each; jacks and jennets, \$5,425; French Coach, German Coach, Hackney, Morgan, Belgian and Saddle horses, \$4,390 each; Suffolk Punch and Arabian, \$1,115 each; mules, \$3,415; Shetland ponies, \$3,410; ponies in harness, \$900. Harness horses are allotted \$4,800. Roadsters are given \$1,700, divided equally between "roadsters for dealers" and "roadsters for others." Business horses have been given \$2,315 and horses of commerce have \$1,485. These sums are exclusive of any special prizes. The class for German Coach includes East Friesland Coach, Hanoverian, Holstein Coach, Oldenburg Coach and Trakehnen. Under the English Coach are included the Cleveland Bay and Yorkshire Coach.

The American Percheron Horse Breeders & Importers Association has set aside \$2,000 for special prizes for Percherons at the World's Fair. The association has suggested to Chief Courn an arrangement of this sum for an offering of thirty-seven prizes to provide a number of classes for the especial encouragement of American breeders and of the display of stock bred by exhibitors. The National French Draft Horse Association has offered \$1000 in World's Fair special prizes for that breed. The total amount in regular and special prizes for Percheron and French Draft horses is \$15,410.

The "horse of commerce" class in the World's Fair prize list provides a new and deserved recognition of the market types of horses. "This class," the prize list announces, "provides for an exhibit of horses of the leading types that find a ready sale at trade centers and that are especially deserving of the attention of breeders who appreciate the advantages of a profitable home and foreign market for all worthy specimens." In this class a first prize of \$75, a second of \$50, a third of \$40 and highly commended and commended awards are offered for artillery, cavalry, coach, saddle, omnibus and fire department horses and for drafters, expressers and roadsters. Exhibits in this class are confined to geldings four years old or over with the exception that mares will be eligible in the section for saddle horses. Animals will be shown in harness or under saddle. Judges in this class will be experienced buyers on the market or United States army officers.

The World's Fair classification for horses presents a remarkable series of awards in the breeding rings, offering nearly \$80,000 for these classes alone. A single stallion may win \$500 solely on his individual merit in any of the more important classes. As the sire of pure bred colts he may win \$100 additional, and in the stud rings he may help to win \$750 more. The appropriations for grade geldings and mares by recorded sires aggregate \$10,840 in the World's Fair breeding rings.

The Record of Maud S. Shattered.

That dainty and wonderful piece of horseflesh, Lou Dillon, the first and only two-minute trotter, has taken a tilt at another record and shattered it completely. This time it is the high wheel sulky record that the Santa Rosa Stock Farm mare has met and lowered. Since Maud S. the chestnut daughter of Harold trotted a mile hitched to a high wheel sulky at the Glenville track July 30th, 1885, covering the distance in 2:08 1/2 seconds her performance has been held up as one that no other champion could duplicate. The advent of the high wheel sulky in 1892 has helped lower the trotting record by stages until the two minute mark was finally reached by the California mare Lou Dillon, at Readville, on the 24th of last month, but during all the intervening eighteen years the record of Maud S. to high wheels has been referred to as the one performance that seemed to be unheatable. In 1891 the mare Sunol, by Electioneer, bred at Palo Alto, trotted a mile over the Stockton course, hitched to a high wheel sulky, in 2:08 1/2 a half second faster than Maud S.'s record, but the fact that the performance was over a kite shaped track has led the sticklers for "similar conditions" to re-

fuse to recognize it as a lowering of the time made by the famous daughter of Harold and Miss Russell.

At the same Glenville track at Cleveland, however, where Maud S. performed her record breaking contest against time, Mr. C. K. G. Billings saw that time lowered three and three quarters seconds on Saturday last by his beautiful and peerless little mare Lou Dillon, driven by Millard Sanders who has trained her for and driven her in all her races. The dainty Lou was hitched on this occasion to one of the old style sulkies weighing eight pounds more than the one Maud S. pulled on her trip against the watch. It was none of the new fangled hall hearing kind but one of the old axle type, with steel tires on the wheels and hearing the weight of several years. Lou Dillon's mile to this hitch was in 2:05 flat and the fractional time was 0:32 1/2, 1:04, 1:35, 2:05, or giving it by quarters 0:32 1/4, 0:31 1/4, 0:31, 0:30, showing a constantly increasing speed for every quarter of the distance. Lou Dillon is truly a thrice crowned queen of the trotting turf, holding the world's record to hiki sulky, high wheels and wagon. She is indeed a wonderful mare.

A Testimonial.

BREEDER AND SPORTSMAN:—I have just received a catalogue of the Meek Estate sale to be held September 29th and conducted by that well-known sales firm, Fred. H. Chase & Co. I was pleased beyond measure to note the simplicity of details and the royal blood for sale as compiled within its covers. This sale of stock is from one of the best known stock farms in the State. The Meek Estate is certainly one of the most highly respected breeders of California.

Breeders and lovers of the light harness horses within the borders of this great horse producing state need not fear any of the statements in regard to this sale. This stock farm is located near Haywards, Cal., has been prominently identified with the breeding industry for more than a dozen years, during which time they have bred some phenomenally speedy animals. The establishment was founded by a gentleman of observation and intelligence, and above all we can place implicit reliance in all the statements

I believe that William Harold will become a very useful, and successful sire in the near future. First from the fact that Sidney, his sire, has for years ranked as one of the very greatest of speed producers. Second, Harold was himself a very fast horse on a pace, with good trotting action. Third because he has a very rich speed inheritance from the best branches of Hambletonian 10, and thoroughbred families and in addition to that his renowned dam Cricket 2:10, pacing, is a speed producer and by the only Steinway 2:25 1/2 at three years old.

Welcome, pacing record 2:10 1/2, his farm companion is a stallion that the breeders and horsemen should not pass by, his royal blood lines must be useful to all breeders of the light and heavy harness. I really do look for many prizes to be drawn at that sale September 29th, as they are bred in lines of blood of the speedest quality. Yours, SAMUEL GAMBLE.

Answers to Correspondents.

W. & B., Olympia, Wash.—There is no stallion registered by the name of Redwood that is by Marwood and out of a mare by Commoner. There may be a horse of that breeding, but he is not registered under the name of Redwood.

Robert Nohle, Fortuna, Cal.—We can find no thoroughbred stallion registered by the name of Wellworth. Grand Moor was got by the Moor 870, dam Vashti by Mambrino Patchen 58; g. d. Kate Taber by Mambrino Messenger (Dunkin Horse) son of Mambrino Paymaster; g. g. d., a mare of Messenger descent. He was bred by the late L. J. Rose, San Gabriel, California.

Gaviota a three year old chestnut filly bred by Mr. A. B. Spreckels at his Napa Stock Farm won a good race at Gravesend on Thursday last at 50 to 1. The race was at a mile and seventy yards and was run in 1:47 1/5. Gaviota is by Mr. Spreckels' handsome stallion imported Crichton that took the first prize two years in succession at the San Francisco Horse Show in the thoroughbred class. Gaviota's dam is Nellie Bell by Prince of Norfolk.

At St. Paul, Minnesota, on the 5th instant, in the 2:09 pace for a purse of \$1000, Robert I. got second money, El Diablo third and Diodeo fourth. As there were nine starters in the race, and the heats were in 2:05 1/2, 2:08 and 2:11, the three California horses mentioned made a good showing. Robert I. is being driven in his races over East by Willie Julian, who was with W. G. Durfee last year and took care of Petigru.

One of the greatest races on the Grand Circuit this year was fought out Thursday at Readville track between Nervolo and Locanda in the 2:08 class pace. There were five heats, the first two going to Locanda and the others to Nervolo. The track was heavy and there was a high wind, but the time was 2:06 1/2, 2:05 1/2, 2:08 1/2, 2:06 1/2 and 2:11 1/2.

Los Angeles Harness Program.

On September 1st the Los Angeles Racing Association closed and declared fourteen stakes filled, amounting to \$8800. It is the intention of the Association to give one harness race each day of their meeting which commences on October 10th and ends October 31st. To complete their program they will require three more races.

The list of the entries was published last week and the following is the arrangement of the program:

- Saturday, October 10—The Hotel Stakes, 2:30 trotters, \$500.
Monday, October 12—Three year old trot, \$500.
Tuesday, October 13—The Van Nuys Stakes, 2:25 pacers, \$500.
Wednesday, October 14—The Southern California Stakes, 2:24 trotters, \$1000.
Thursday, October 15—Not closed.
Friday, October 16—The Canfield Stakes, 2:18 pacers, \$500.
Saturday, October 17—The Winship Stakes, 2:20 trotters, \$500.
Monday, October 19—Not closed.
Tuesday, October 20—Not closed.
Wednesday, October 21—The Catalina Stakes, 2:27 trotters, \$500.
Thursday, October 22—The Los Angeles Stakes, 2:15 pacers, \$1000.
Friday, October 23—The Green Class Pace, \$500.
Saturday, October 24—The Harrison Stakes, 2:17 trotters, \$500.
Monday, October 26—The Silkwood Stakes, 2:10 pacers, \$500.
Tuesday, October 27—The Potter Stakes, 2:14 trotters, \$500.
Wednesday, October 28—The Stimson Stakes, 2:20 pacers, \$500.
Thursday, October 29—The Consolation Trot, \$400.
Friday, October 30—The Consolation Pace, \$400.
Saturday, October 31—The Garland Stakes, 2:12 trotters, \$500.

At the close of the State Fair three carloads of harness horses left for Los Angeles and a number of trotters and pacers will be present at the meeting that are now racing in Oregon.

The race going public in Southern California and especially in the vicinity of Los Angeles has always been partial to harness racing and it is the intention of the Los Angeles Association to give the harness end of the meeting as good a show as possible and to limit the betting to auctions on the result and mutual pools on heats.

A Great Three Year Old.

The best three year old trotter of the year by considerable is the bay filly Sadie Mac that won the Hartford Futurity and defeated that other good filly Ethel's Pride in a four heat race. The time of the last heat 2:11 1/2 is the three year old record of the year. Sadie Mac is not only one of the fastest three year olds ever produced, but she is one of best bred ones having an inheritance of early trotting speed that is intense. Her sire is Peter the Great that took a three year old record of 2:12 1/2 when winning the Kentucky Futurity, and reduced that record to 2:07 1/2 the following year as a four year old. Peter the Great is a son of Happy Medium out of the great brood mare Santos by Grand Sentinel. The dam of Sadie Mac is Fannella 2:16 1/2 that took her record this year. Fannella is by Arion 2:07 3/4, that still holds the worlds two year old trotting record of 2:10 3/4 made to a high wheel sulky. The dam of Fannella is Directress 2:28 3/4 by Director 2:17, sire of Directum 2:05 1/2 the champion four year old trotter. The dam of Directress was Aloha by A. W. Richmond and her grand dam Guadalupe by Crichton, a son of imp. Glencoe. It will be seen that the blood lines of Sadie Mac's dam are intensely Californian. The Horse World in speaking of this remarkable filly says: "Sadie Mac is a bay filly, 15 1/2 hands high, with black points, and is what horsemen would call an Electioneer-gaited trotter. By this is meant full round action forward with not much hock action, and a line trotter. She wears few hoots, quarter and shin forward, and shin and ankle hoots behind; a six-ounce shoe forward, and four-ounce behind. She drives on an easy rein, and seems to know nothing but trot, having never made a break. She has stepped an eighth in better than 15 seconds, and a quarter in 30 seconds. A sounder one was never foaled."

Daniel, the beautiful mare by Alcander, equalled the world's pacing record for mares of 2:09 1/4 at the New York State Fair, last Tuesday. She earned the record in the first heat of the 2:05 pace.

The Layng Combination Sale.

One of the most successful combination sales held in this city for some time came off at the Occidental Horse Exchange on Monday evening last, at which time Auctioneer William G. Layng disposed of fifty-four head for different parties. The total amount received was \$8605, an average of \$159, which was an excellent average and shows that there is a good demand for horses that will make fair drivers. Only one of the horses had a record, but for size and good looks they averaged well. The pavilion was crowded, there being probably 2000 people present. The summary of the sale follows:

- Agnes T, b m, 1898, by Ibex 10,675, dam by Tilton Almont; to C. M. Finch for \$145.
Ruby L, b m, 1895, by Del Rey 2:33, dam by Billy Campbell; to Sam Hables for \$145.
Ruby's First, b f, 1900, by Alexander Button, dam by Del Rey; to R. Teddy for \$180.
Ruby's Second, b f, 1901, by Alexander Button, dam by Del Rey; to J. J. Murphy for \$150.
Hinsbaw, b g, 1896, by Cbas. Derby; to Leroy Hough for \$190.
Cordie N., b m, 1897, by McKinney, dam Knightbood by Brigadier; to Andrew Clunie for \$375.
Det B, b g, 1901, by Alexander Button, dam Cordie N. by McKinney; to F. C. Talbot for \$90.
Kitty B, 2:21 1/4, b m, by Sidney, to J. Faris for \$100.
Miss Masten, b f, 1902, by Gossiper Jr, dam by Mambrino Wilkes; to George Ryan for \$90.
Nellie Coil, b f, 1901, by Falrose, dam Director Maid by Director; to Robert Pringle for \$85.
Don Fullano, b g, 1897, by McKinney, dam Nora D. by Del Sur; to Andrew Clunie for \$400.
Cbris Knight, b g, 1900, by Falrose, dam Agnes T. by Ibex; to William Kent for \$325.
Herbert, b g, 1901, by Falrose, dam Agnes T. by Ibex; to George Maloney for \$155.
Cbas McKinney, b g, 1897, by McKinney, dam Hawthorne Maid, by Hawthorne; to Henry Seblitz for \$170.
Lomo Wilkes, b c, 1901, by Linwood Wilkes, dam Flora B. by Whalebone; to Cbas. Becker for \$185.
Primrose, cb m, 1899, by Green's Rufus, dam by Nugget 1398; to George Maloney for \$170.
Poco, b g, 1897, by Fairmont, dam untraced; to G. E. Purdon for \$150.
Jim Black, b g, 1901, by Alexander Button, dam Gift by Election; to J. N. Batt for \$90.
Lucie, b g, 1901, by Boodle, dam Wild Bee by Piedmont; to George Samuels for \$85.
Queen Mab, cb f, 1900, by Diablo 2:09 1/4, dam Mab by Napa Wilkes; to Dr. I. B. Dalziel for \$125.
Silk Hose, blk m, 1896, by Silkwood, son of Nutwood; to A. Bardmuss Jr. for \$130.
Taffy, b g, 1898, by Hart Boawell, dam Trilby by Truman; to K. O'Grady for \$155.
Monte Gallardo, b g, by Montesol, dam by Abbotsford Jr; to H. Trask for \$70.
Billy Truman, br g, 1900, by Gossiper Jr., dam by Truman; to W. A. Preston for \$100.
Bay mare, to Scott & Van Arsdale for \$125.
Bay mare, to F. Neilson for \$95.
Sancho, b g, 1899; to J. D. West for \$80.
Duke, cb g, 1897; to O. Weisman for \$225.
Marach, b g, 1896, by Nephew Jr.; to Cbas. Fay for \$85.
Kalgoole, cb m, 1898, by El Benton, dam Lurline by Steinway; to A. J. Montell for \$135.
Trilby, b m, 1895, by Truman, dam Wild Bee by Piedmont; to Charles Fay for \$75.
Woodland, b g, 1899, by Falrose, dam by Alex. Button; to C. D. Bates Jr. for \$185.
Black Beauty, blk m, 1700 lbs; to Charles Fay for \$165.
King Clarence, br g, 1897, by Clarence Wilkes, dam by Tilton Almont; to J. B. Holt for \$125.
Waxreno, b m, 1899, by Senator B, dam Maud Merrill by Antevolo; to Cbas Fay for \$250.
Alta S., b m, 1897, by Alexander Button, dam Fannie by Tinner; to William Kent for \$250.
Gertie A., cb m, 1898, by Diablo, dam Lola, said to be by Sidney; to Victor Veribac for \$345.
Lasse Grannard, br f, 1900, by McKinney, dam Igo by Antevolo; to Mr. Coakley for \$110.
Tom Snider, br g, 1895, by Ibex, dam by Alexander Button; to M. A. Walden for \$135.
Josie R., b m, 1897, by Alexander Button, dam by Cubit; to J. Perry for \$175.
Evening Star, b m, 1898 by McKinney, dam Mountain Hare by Young Venture; to Dr. R. Felt for \$170.
Lady Rbenke, b f, 1902, by Gossiper Jr., dam Belle by Mambrino Wilkes; to George Maloney for \$120.
Crescendo, b f, 1901, by Gossiper Jr., dam by Alcona 730; to H. F. Bietben for \$100.
Evergreen, b m, 1898, by McKinney, dam Lady Bird by Winwood; to W. J. Irvine for \$170.
Egg Nog, b m, 1899, by McKinney, dam Lady Bird by Winwood; to W. J. Irvine for \$180.
Mabel McKinley, b m, 1897, by Little Mid, dam by Artburton Wilkes; to C. Hansen for \$65.
Cyrus Wilkes, b s, 1897, by Sable Wilkes, dam Menlo Belle 2:30, by Menlo; to W. J. Irvine for \$300.
Billy F., b g, 1897, by Tbos. Rysdyk, dam by Hercules, to Pastene Produce Co. for \$225.
Prince Wilkes, blk g, 1898, by Apts Wilkes, dam by Dexter Prince; to W. J. Landers for \$160.
Martin, b g, to J. W. Miller for \$135.
Early Bird, b g, 1896, by Enos 2:25 1/4; to Fred Harkins for \$360.
Black Diamond, blk g, to C Masters for \$140.
Hampton, b g, 1895, by Enos, dam by Mountain Boy; to J. Mullen for \$210.
Miss Rea, b m, 1896, by Antinous; to Le Roy Hough for \$320.
Sixteen other horses not catalogued were sold at fair prices.

The Kenney Bicycle Co., 531 Valencia St., is doing a big business in the McMurray Carts and Sulkies. You not only save money by purchasing a McMurray but get the most durable, best made, and easiest running cart or sulky in the market. Investigation will convince a Missourian.

Jackson's Napa Soda untangles the feet.

Athalie's Seventh Standard Performer.

When Walter Maben won the first heat of the 2:20 pace at the California State Fair on the 5th instant with the four-year-old Ira by Iris, giving him a record of 2:10, he also gave to Geo. Warlow's great brood mare Athalie by Harkaway, her seventh standard performer. On the title page of this issue of the BREEDER AND SPORTSMAN is a photo engraving of this grand old mare taken last year which shows what a well preserved mare she is at the age of seventeen years. The names of her produce that have taken records are as follows: Athanio 2:09 1/4, Ira 2:10, Athnio 2:14 1/2, Athavis 2:18 1/2, Athinx 2:20, Athablo 2:24 1/2 and Athadon 2:27, the last named making his record as a yearling to a high wheel sulky.

Athanio took a record of 2:10 in this country and reduced this to 2:09 1/2 after he was exported to Austria. He is the sire of The Aristocrat 2:16 1/2. Athadon, whose yearling record of 2:27 in 1891 was the fastest made by a colt that year, is the sire of Sue 2:12 1/2, Listeriae 2:13 1/2 and Donatrine 2:26 1/2, all trotters, besides the pacer Daken D. 2:16 1/2. It will be seen that Athalie is founding a family that is destined to be one of the most famous in brood mare history.

Although the Year Book gives the breeding of the dam of Athalie as untraced, research has established the pedigree as follows: She was called Mag and was owned by H. C. Stone of Jacksonville, Kentucky, who bred her to the stallion Harkaway 11,808, son of Strathmore and Wait-a-Bit by Basil Duke, the produce being Athalie. Mag was by Alcalde 103, son of Mambrino Chief 11 and a mare by Pilot Jr. 12. Mag's dam was by Cy Kinney Vandal and her grand-dam by Bold Hornet.

Ira, the seventh of Athalie's produce to enter the list was foaled March 2, 1899, and this is his first season out. Walter Maben, who trains him, states that he is one of the most level headed young horses he has ever driven, and believes he can give him a mark of 2:05 next year. Ira is owned by Mr. Joseph Chancellor of this city, who is one of the firm of Chancellor and Canfield that has made a fortune in Coalings and Bakersfield oil properties.

Trotting in New Zealand.

A report of the annual conference of the Affiliated Trotting Clubs of New Zealand reached us by the last mail from the antipodes. It was held at Wellington July 14th and shows that the sport of harness racing is in a very flourishing condition in that country. The Metropolitan Trotting Club seems to be the leader. It gave four meetings during the year, with a total of eleven days racing during which 89 races were pulled off, an average of a little over eight races per day. The added money given over and above the entrance fees at these meetings was a little over \$32,000. The betting is all done by means of the totalisator, which handled during the eleven days the sum of \$350,000. These figures show that there is good betting on the harness races at Canterbury. Many clubs have but one day's racing during the year, but there are always from six to eight events on the card. There were in all New Zealand 32 meetings during the year, which gave 58 days of racing and 439 races. The total amount of added money given during the year was close to \$90,000 and the amount of money wagered in the totalisator was in round numbers \$800,000.

Another Race Filled.

In the list of harness races filled for the Los Angeles meeting that was printed last week, the 2:15 class pace was given as having failed to fill. This was an error. There were but five entries but the race will go. Those entered are Highball, blk g, by Silkwood, dam by Harvester; Colonel Smith, ch g, by Red Regent, dam by Ashland Wilkes; Athnio, br g, by Junio, dam Athalic by Harkaway; Tidal Wave, ch c, by Nutwood Wilkes, dam by McKinney; Penrose, b g, by Falrose, dam by Brigadier.

Sam Freeman writes as follows of Louise Mac, the little mare that Mr. A. B. Gwathmey of New York at one time tried to buy Mr. A. B. Spreckels' mare Dione 2:07 1/2 to mate: "The fast little trotter, Louise Mac 2:09 3/4, formerly one of A. B. Gwathmey's Speedway and matinee string, has been cutting quite a swath in the races of the Pittsburg matinee club. She was bought for the purpose of racing for the Pittsburg champion cup and was taken to the 'Smoky City' last year, prepared and driven by W. S. Steele, and won the race under very adverse circumstances. Some of the members of the club held the opinion that her victory was somewhat of a fluke; but they hought the trotter, Col. Wilkes, to best her this year, although he did not start in the race the other day. Dolly Dillon 2:07, was selected to beat her, however, and Josephine Dixon 2:10 3/4, was also started against her. They made a great effort and a hard race, but under the skillful driving of Mr. Steele, the swift daughter of Little Corporal won the race and the cup for the second time."

Notes and News.

Hanford's fair and race meeting will open October 5th.

The demand for serviceable horses is increasing every day.

The Hollister fair and race meeting will open on Wednesday next.

Birdina 2:08½ and Al Bock 2:08½ are both out of daughters of Sidney 2:19½.

Centric 2:09½ is the tenth 2:10 performer for the great stallion Baron Wilkes.

Billy Buck is the biggest money winner of the year, having over \$25,000 to his credit.

Highhall by Silkwood took a record of 2:11½ in the 2:20 class pace at Salem, Oregon, last Monday.

A very handsomely illustrated State Fair number was issued by the *North Pacific Rural Spirit* last week.

Jack Curry was fined \$250 for drawing Crescent from the 2:12 trot at Providence without permission of the judges.

Katrinka G., full sister to Chas. Derby 2:20, Klatawaw 2:05½ and others, took a record of 2:14½ at Hartford in the 2:19 class trot.

Eighteen thousand dollars has been offered Dr. J. C. McCoy for his three year old filly Ethel's Pride. The offer was refused.

Dariel equalled the world's best record for pacing mares, 2:04½, in the 2:05 pace at Hartford on Tuesday, and came right back in 2:04½.

Edith W. 2:05 earned the half mile track pacing record for mares in the free for all pace at Anderson, Indiana, by winning a heat in 2:07.

A four year old by Bow Bells 2:19½ out of Sorrento, dam of Jay Hawker 2:14½, etc., in training in Kentucky, is very fast at the pacing gait.

J. M. Nelson has sold to C. A. Sarber, of Cleveland, the trotting gelding Richard S. 2:18 by Grover Clay, dam Belle by Whippleton. He will be used in the matinees by Mr. Sarber.

E. E. Smathers made owner W. S. Harms an offer of \$30,000 for the champion gelding Major Delmar 2:00½ this week, but the offer was declined.

The Electioneer family holds the record for fast trotting geldings. Azote 2:04½, the Abbot 2:03½ and Major Delmar 2:00½ are all grandsons of Electioneer.

The Oakland race meeting opens to-day. There will be one harness race and five or more running races each day. The races will be over-night events.

C. W. Williams, of Galesburg, Ill., has a four year old filly by Expedition 2:15½, dam Minna Wilkes, dam of the pacers Mustard 2:08½ and Refina 2:08½, that is trotting quarters in her work in 32 seconds.

The trotting mare Julia M. by Zombro, who was at the Glenville track last spring in W. L. Snow's stable and who came nearly dying from blood poison, has been sent to her owner, having fully recovered.

John A. McKerron knocked another quarter of a second off his record at Syracuse, New York, on the 7th inst, and President Roosevelt was there to see him do it. The stallion's record is now 2:04½.

Prince Alert smashed all former half-mile records last week at Bethlehem, Pennsylvania by pacing a mile in 2:03½ over the half-mile track there. His fractional time was 31½, 1:02½, 1:33½, 2:03½, the last quarter being in 30 seconds.

Tidal Wave, the very handsome chestnut colt by Nutwood Wilkes, out of a sister to Coney 2:02 by McKinney, won the Inland Empire Stake, \$500, for three year old pacers at the Oregon State Fair last Tuesday. The best time was 2:21½.

One of the cleanest gaited horses that has shown up in California this year is the pacer Edwin S., that took a record of 2:14½ the day he won the green class pace at Petaluma. He does not wear a hoot of any kind and never touches a hair when speeding.

The mare Our Lady by Nearest 2:22 that the late Dr. O'Rear purchased when he came to California to pass on McKinney for H. B. Gentry, has been sold to Mr. Gentry by Mrs. O'Rear for \$2000. Our Lady's weanling by McKinney was included in the sale.

M. Henry of Haywards has gone to Pleasanton with two prominent colts by his horse Educator and will put them in training there. George Ramage has also taken a couple of youngsters to Pleasanton to train. They are both by Sidney Dillon and out of Oakley Russell by Happy Russell. They are the property of Geary & Grindell of Alameda county.

Another good three year old has shown up in the filly Lizzie A., that won the \$2000 trot for foals of 1900 at Readville last Tuesday. Lizzie won in two straight heats in 2:18½ and 2:14½. She is a daughter of the Santa Rosa bred horse Alfred G. by Anteeo.

The owners of Major Delmar 2:00½ offered before the gelding's record was better than 2:04, to match him against any trotter in the world for from \$5000 to \$20,000 a side, the race to be a mile dash, two heats in three or three best in five. The offer is still open.

The chestnut mare Peggy from Paris, is the general utility horse in Mr. Billing's stable. She has trotted a mile in 2:30, has been seen at the horse shows as a high actor, and was one of the pacemakers when Lou Dillon trotted her record breaking mile at Readville.

It is probable that Jack Curry will come West with Monroe Salisbury when the latter returns to Pleasanton with his string and will train Mr. Salisbury's horses at Pleasanton next winter. Mr. Salisbury and Ben Walker parted company at Providence, according to an Eastern paper.

Another of the descendants of old Mary by Flaxtail got into the 2:20 list at Petaluma, September 9th, at the meeting of the San Francisco Driving Club which was held on that date. This was Clara I. a daughter of Apex 2:26, he by Prompter out of Mary. Clara I. took a record of 2:19½ at Petaluma.

Diablo 2:09 is still at Salem, Oregon, where he made a good season this year. Mrs. William Murray has received several offers for the great son of Chas. Derby since the death of her husband, but has not yet decided whether she will sell the stallion or retain him and locate him permanently at Woodland.

The Los Angeles Driving Club is arranging for a grand matinee on Thanksgiving Day this year and proposes to make it one of the best ever held by this popular club. Not only will there be many horses entered but the class will be better than ever and it is believed that all the club's records will be broken.

George Ketcham has purchased of W. E. Taylor, of Washington C. H., O., the trotting mare Annie Burns, paying for her the modest sum of \$750. The mare has a record of 2:08½, and two years ago won \$15,000 on the Grand Circuit. After that season she went lame, and has shown no speed since. She will be used for breeding purposes.

Geo. W. Hughes, formerly of this State, has been located in Oregon for the past few years and though working steadily at his trade of blacksmithing, finds time occasionally to work a horse or two for speed. He trained a very promising pacer last spring for Mr. F. P. Norton of Marshfield, and thinks he is a sure 2:10 horse barring accidents. The horse is by Coeur d'Alene, dam by Altamont.

Authoresse trotted into the 2:10 list at Syracuse, August 31st, taking a record of 2:09½. This makes her dam, Lucy Homer, also dam of Lecco 2:09½, the third mare that has produced two 2:10 trotters, and the first and only one that has produced two that have both beaten 2:10. Lucy Homer is by Homer, son of Mambriño Patchen and her dam is Dinnie 2:25, by Rochester, son of Aberdeen.

Swift B. won second money in the 2:25 trot at the Oregon State Fair on the opening day. This makes three Mondays in succession that this three year old has started and won second money each time. The first was in the Occident Stake, Monday, August 31st at Sacramento, the second in the Stanford Stake the following Monday at the same place, and the third time at Salem, Oregon, last Monday.

Among the trotters to enter the 2:10 list this year are Kinney Lou 2:07½ by McKinney, Jay McGregor 2:08½ by Jay Hawker, Dillon Boy 2:09½ by Baron Dillon, Swift 2:08½ by Antonio, Masetto 2:09 by Constantine, Hawthorne 2:08½ by Jay Bird, Prince Greendale 2:09½ by Greendale, Caspian 2:07½ by Patron, George Muscovite 2:09½ by Muscovite, Allewood 2:09½ by Alis Wilkes, and Lou Dillon 2:00 by Sidney Dillon.

Col. E. H. Greely's young stallion Columbo, that took the blue ribbon in the class for stallions six years old and over at the late meeting of the Eastern Horse Breeders Association, is inbred to both the Wilkes and Electioneer strains, and is from producing ancestors on both sides. His sire Bingen 2:06½ is by May King 2:20 son of Electioneer. His dam is by Allerton 2:09½, and his second dam a full sister of Gov. Stanford 2:21, by Electioneer.

Stipulator, the Los Angeles pacer by Titus, own brother to Direct 2:05½, is improving as the season progresses. At Milwaukee on the 12th inst he started in the 2:12 pace, and after acting badly in two heats, got steady and won the next three, beating a field of nine good horses. Stipulator reduced his record to 2:11½ in the third heat, the fastest of the race. The slowest heat was the last in 2:13½. El Diablo started in the same race but was behind the money.

If you want to look over any of the horses to be sold by the Meek Estate at Fred H. Chase & Co's salesyard in this city Tuesday evening, September 29th, take a run over to Haywards any day before the 26th, and they will be shown to you by the Superintendent Geo. Gray. The farm is only a half mile from Haywards and is reached by the Southern Pacific steam line or the Haywards electric line. The horses will be brought to the salesyard on the 26th inst.

Most of the harness horses at the State Fair were shipped direct to Los Angeles for the race meeting that commences there on October 10th. By shipping direct to Los Angeles a considerable saving was made in freights. The few of the horses that were shipped to Oakland and were entered there were not enough to fill the races for the Golden Gate race meeting; consequently it was decided to declare off all of the races originally advertised for Oakland, and the management decided to give over-night events for the horses present.

Hon. Jesse D. Carr's Gahilan Stock Farm clearance sale is attracting much attention from buyers. The young stallion Boodle Jr. should be in demand, as he is not only a grand-looking young horse but a producer of good-looking colts. The fillies and colts to be sold are by such speed producers as Nutwood Wilkes, Dietatus and other sires, and all out of well-bred mares. These horses will all be at the salesyard, 1732 Market street, San Francisco, on the 26th inst. Prior to that time they can be seen at the Gahilan Farm, near Salinas.

The railroad made a rate of a little over \$5 per horse for the horses shipped from Sacramento to Los Angeles after the State Fair was over, and many horsemen took advantage of the rate to send their strings to the southern metropolis instead of waiting to take part in other meetings that might be given in this section. The Los Angeles meeting will open October 10th and promises to be one of the most successful ever held there. While there will be but one harness race each day, the class of horses competing will make the racing good and some close contests with fast time may be expected.

The annual race for the European trotting championship was won at Baden near Vienna, Austria, August 16th, by the four year old colt Wig Wag by Wiggins out of Edgelight by Edgemark, second dam Birthmark by Kentucky Prince. Wig Wag took a record of 2:16½ last year as a three year old and was sold by Douglas Thomas for export to Europe. He is now owned by Mr. Louis W. Winans, the well known American resident of England. Wig Wag beat Caid, Freund Fritz, Contralto, Away, Alice Russell and Prosperity Bill. Wig Wag was driven by Andy McDowell. The best heat won by Wig Wag was 2:13 3-5.

The big \$2000 stake for 2:17 class pacers which was decided at the Oregon State Fair last Wednesday went to the mare Rita K. by McKinney, owned by Mr. Byron Erkenbrecher of Los Angeles and driven by W. G. Durfee. This is Rita H's fifth start and fifth win this year, and she is proviog one of the gamest and most consistent of the McKinneys. Mr. Erkenbrecher is highly pleased with her. He purchased her from Mr. S. H. Hoy of Winters, who bred her. Her dam is Smut by Prompter. Mr. Hoy owns a half brother to her by Bayswater Wilkes that he says shows more speed than Rita H. did with the same amount of work, and he believes him to be a very high-class horse.

At the sale of the Meek Estate horses to come off at Fred H. Chase & Co's salesyard 1732 Market street, Tuesday evening, September 29th, among other grandly bred ones to be sold is a five year old mare named Molly Mac, by McKinney 2:11½, dam Fontanita by Antevolo, second dam Fontana, the dam of Silas Skinner 2:17 (sire of Ole 2:15), Flora Belle 2:25 and San Diego, sire of Lottie 2:15. Molly Mac is a good looking hay mare that has been used on the road and was trained some. She showed a quarter in 33 seconds and should make a fast trotter. Her blood lines are unsurpassed, as she is from producing families on both sides. Fontanita, dam of this mare is to be sold at the same sale.

Hawthorne's victory in the Bonner Memorial has directed general attention to her sire. The Jay Bird tribe has contributed to the trotting turf not a few of its brilliant lights. From his own loins have come Hawthorne 2:08½, Allerton 2:09½, Early Bird 2:10, Rose Croix 2:11½, Miss Jay 2:11½, Invader 2:11½, Ed Winter 2:12½, Jay Hawker 2:14½, while from his sons have come the following: From Allerton—Gayton 2:08½, Alves 2:09½, Altoka 2:10½, Precision 2:10½. From Jay Hawker—Jay McGregor 2:08½, Susie J. 2:06½, Country Jay 2:10½, Nella Jay (3) 2:14½. From Jack Daw—Maxine (4) 2:08½. From Eagle Bird—Eagle Flanagan 2:07½, Alamito 2:10, Monhars 2:11½. Very few pacers have been sired by Jay Bird and his sons. The old horse himself has sired but six pacers out of a total of over eighty standard performers. Jack Daw is not credited with a single pacer; Allerton has sired twenty-three out of a total of one hundred performers; Eagle Bird ten out of a total of forty-two standard performers, and Jay Hawker none.

Aristo 2:17½, by Nushagak that won both the Occident and Stanford stakes last year, is one of the greatest prospects for a 2:05 trotter there is in California. He has grown and filled out into a grand looking four year old. He has been trained this year but not with the intention of starting him. At the State Fair he was in Chas. Spencer's string of horses from the Walnut Stock Farm and was worked out one morning in 2:11, stepping the last half in 1:03½ with a dozen watches held on him. A handsome offer of \$7500 was made for him by a gentleman who was representing a wealthy Eastern horseman, but the offer was declined. Aristo has the size, color, gait, speed and good looks that make him a very high class horse, and that he is a race horse was proven last year when he beat his fields in the three year old stakes in a bandy fashion although two weeks before this race was trotted he was such a sick colt that it was though impossible to get him ready for those races. Spencer believes that Aristo will trot in 2:05 or 2:06 next year barring accidents.

Close of the State Fair.

The racing program during the last three days of the California State Fair, which closed last Saturday, was not such as to arouse enthusiasm among admirers of harness horses. On Thursday there was one harness race, the 2:17 class trot, which had a field of seven starters. The race was won by the Silas Skinner gelding Ole in straight heats and good time—2:15½, 2:16 and 2:17. Lady Rowena was second and Rozell third. After this race was over eight running races occupied the rest of the afternoon.

On Friday the program was devoted entirely to the runners, and on Saturday one harness race, a consolation purse for the green class trotters, opened a program that was otherwise made up of six running races. This race went to the stallion Sutter by Noonday in straight heats, the best time being 2:22. The summaries:

THURSDAY, SEPT. 10TH.

Table with 3 columns: Race Name, Class, and Time. Includes Trotting 2:17 class, purse \$500, and Running section with five furlongs and one mile races.

RUNNING.

Five furlongs, selling, purse, \$225—Nellie May, cb m, by The Bishop-Easter Sunday, 109, (Howson), 3 to 1, won; Blondura, 103, (Chandler), 7 to 5, second; Miss Dividend, 102, (Frawley), 3 to 1, third. Time, 1:02. Tom Mitchell, Quidado, Honduran and Light Braid also ran.

Five furlongs, selling, purse, \$225—Hercules, ch g, by Kit Orson Jr.-Unknown, 117, (Frawley), 6 to 5, won; Maresa, 114, (Hildebrand), 8 to 5, second; Skirmish, 114, (Hobart), 4 to 1, third. Time, 1:00½. Matalakia and Skip Me also ran.

One mile, handicap, purse, \$500—Divina, by Bassetlaw-Angelique, 114, (L. Jackson), 3 to 4, won; Horatius, 107, (Powell), 8 to 5, second; Step Around, 85, (Lewis), third. Time, 1:39. Hagerdon also ran.

One mile and one-eighth, the Governor's stake—Grafter, b g, by Cicero-Leap Year. Walkover.

Six furlongs, stallion stake, for two year olds—Instructor, b c, by Brutus-Imitation, 118, (See), 7 to 10, won; Dr. Rowell, 113, (Howson), 2 to 1, second; Eva D, 107, (Chandler), 15 to 1, third. Time, 1:15. H. L. Frank, Dr. Birdsall and Zenonian also ran.

Six furlongs, selling, purse \$225—Ultruda, b g, unknown, 116 (Lewis) 8 to 5, won; Montebank, 111 (Frawley) 3 to 2, second; Cambaceres, 116 (Howson) 3½ to 1, third. Time, 1:14½. Jack Richelieu Jr., The Miller and Myrtle H. also ran.

One mile and 100 yards, selling, purse \$225—Miss Vera, br f, by Amigo-Fame, 102 (See) 3 to 2, won; Dark Secret, 113 (Hildebrand) 3½ to 1, second; Dwightway, 112 (Bozeman) 7 to 1, third. Time, 1:48. Dr. Shart, Malplaquet and Bill Young also ran.

One mile, handicap, purse \$300—Solon, b g, by Clevedon-Arebusa, 116 (Howson) 4 to 1, won; Cbilleo, 100 (Henderson) 3 to 1, second; Kitty Kelly, 105 (Chandler) 8 to 5, third. Time, 1:40. Ilawabo and Constellator also ran.

FRIDAY, SEPTEMBER 11TH.

RUNNING.

Five furlongs, selling, purse \$225—Ruvia, c f, by Rubicon-Leonara II, 115 (Lewis), 8 to 1, won; Pat Bulger, 102 (Frawley), 5 to 5, second; Charlie Schweitzer, 108 (Burke), 6 to 5, third. Time, 1:03. Nora also ran.

Five furlongs, selling, purse \$225—Czarlette, b f, by Bloomsberry-Czarina, 89 (Hildebrand); 4 to 5, won; St. Wilda, 107 (Frawley), 6 to 1, second; Little Secret, 104 (Lewis), 6 to 1, third. Time, 1:02¼. Winifred, Weir, Samar and Frielenne also ran.

One mile, purse \$225—Meebanus, ch b, by Golden Garter-Fedelma, 112 (L. Jackson), 4 to 5, won; David S, 112 (Chandler), 2 to 1, second; Anvil, 102 (Hildebrand), 5 to 5, third. Time, 1:40½. No others.

Five furlongs, selling, purse \$225—Miss Dividend, bm, by Belmont-Maggie W., 107 (Frawley), 7 to 2, won; Mamie, 102 (Jackson), 10 to 1, second; Quadoo, 110 (Bozeman), 5 to 2, third. Time, 1:02¼. Doris, Dusty Rhodes, Taona and Tom Mitchell also ran.

Six furlongs, selling, purse \$225—Madame Bishop, ch m, by The Bishop-Easter Lady, 105 (Chandler), 4 to 1, won; Tamm, 110 (Frawley), 3 to 5, second; Royal S, 110 (Hildebrand), 5 to 1, third. Time, 1:14½. Roltaire, Rubino and Isabelita also ran.

Six furlongs, selling, purse \$225—El Piloto, b g, by Gano-Claudimoro, 110 (Frawley), 8 to 5, won; Judge Voorbies, 107 (Powell), 8 to 5, second; Maresa, 110, (Hildebrand), 3 to 1, third. Time, 1:13¾. Wandering Boy and Gold Scratch also ran.

SATURDAY, SEPT. 12.

Table with 3 columns: Race Name, Class, and Time. Includes First race—Consolation purse for green trotters, and Second race—Five and a half furlongs, selling, purse \$225.

Third race—Five and a half furlongs, selling, purse \$225. B. F. Hobart's on m Skirmish, by War Song-Lady Lyons, 113 (Powell) 4 to 1, first; Skip Me, 112 (Tullett) 8 to 1, second; Little Margaret, 106 (Hildebrand), 5 to 4, third. Time, 1:07¾. Gold Scratch and Steparound also ran.

Fourth race—One mile and a quarter, President's stake. G. Webb's b g Solon, by Clevedon-Arebusa, 102 (Powell), even, first; Ilawabo, 108 (Jackson), even, second; Cambaceres, 90 (Hildebrand) 4 to 1, third. Time, 2:07¾. Constellator also ran.

Fifth race—Five furlongs; handicap, purse \$225. Elmwood Farm's b c Instructor, by Brutus-Imitation, 120 (See), 1 to 2, first; Annie Marie, 113 (Bozeman) 2 to 1, second; Metlakia, 100 (Jackson), 2 to 1, third. Time, 1:01¼. Miss May Bowdish also ran.

Sixth race—Five and one half furlongs, selling, purse \$225. J. D. Miller's g b E. E. Brattain, by Captive-Leora, 108 (Burk), even, first; Blissful, 104 (Chandler), 7 to 5, second; Glendennig, 113 (Hildebrand) 2 to 1, third. Time, 1:08¾. Royal E. also ran.

Seventh race—Seven furlongs; selling, purse \$225. C. Mulholland's m Miss Vera, by Amigo-Fame, 111 (See) 5 to 3, first; The Miller, 114 (Powell), even, second; Limber Jim, 114 (Frawley), 8 to 1, third. Time, 1:27¾. Blondura and Miss Remsen also ran. Honduran left at post.

The Ukiah Race Meeting will open Tuesday, October 13th and continue five days. The events are mostly for running horses at short distances, owing to the fact that the meeting was not arranged for until too late to prepare a good program for trotters. On the fourth day there is a purse of \$200 for trotters, and on the fifth day a free for all trot for a purse of \$350. Entries to the races are all over night. Ukiah has one of the best half mile tracks in the State.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Major Delmar 2:00 1-4.

This is a wonderful year for harness horses. Nearly every record that amounts to anything has been smashed and when the new Year Book is made up there will be more changes in the Table of Fastest Records than have been made for years.

At Syracuse, New York, on Friday of last week the gelding Major Delmar, driven by Alta McDonald, sailed out to beat his previous record of 2:01½ made the week previous on the same track, and not only accomplished the feat, but trotted the mile in 2:00½, just a quarter of a second slower than the mile made by Lou Dillon that has set the whole world by the ears, and made her name a household word all over the horse world.

This remarkable exhibition of speed was made in the presence of an immense crowd of people who nearly went wild when the result was announced and it was realized that Lou Dillon, the two-minute trotter, alone stood between Major Delmar and the world's trotting record, and that by only a quarter of a second.

The early actions of Delmar did not promise the splendid achievement which was to follow. Twice McDonald nodded his head as he drove Delmar down the stretch accompanied by a runner, and twice did the gelding break, first at the eighth and then at the quarter pole, and was returned for another start.

This time there was no fluke. With the regularity

Tidal Wave 2:14 1-4 by Nutwood Wilkes

of clock work Delmar settled down to his work. The quarter was reached in 0:31½, the same time made by Delmar in Wednesday's trial. Soon after passing the quarter pole the gelding faltered slightly, but soon recovered himself and reached the half in 1:01, having gained three quarters of a second over his time on Wednesday. At the half Delmar and his running mate were joined by a second runner, and the real contest began. Side by side flew the three horses, while the spectators almost held their breath in suspense. Glances at watches showed that the third quarter had been done in 0:29½, and a mighty cheer went up. Coming into the stretch McDonald gave Delmar a light touch with the whip and the gelding in response made a magnificent spurt, which brought him under the wire in 2:00. Both driver and horse were enthusiastically cheered.

Pony Racing Association.

The California Polo and Pony Racing Association has been incorporated under the laws of this State. There are one thousand shares of stock of a par value of \$25 each.

In order to promote the breeding of fine pony stock the association will plan races after the character of the futurities given by the leading jockey clubs. Charles Clark has offered a \$1000 gold cup for a pony stallion race, and there also is to be an annual pony race for mares for a \$1000 trophy. According to present plans there will be winter meetings at Riverside and Burlingame, beginning January 4, and February 22, respectively. Summer meetings are being planned for Santa Barbara and Del Monte.

Officers of the association are: President, C. W. Clark; vice-presidents, Francis J. Carolan and Rudolph Spreckles; secretary, Thomas A. Driscoll; treasurer, R. M. Tohin; directors, John C. Cravens of Pasadena, C. Maud of Los Angeles, G. L. Waring of Santa Monica, John L. Colby of Santa Barbara, E. J. Boesseke of Santa Barbara and Robert Lee Betner of Riverside.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

Oregon State Fair Races.

The California horses are winning all the big purses at the Oregon State Fair this year. The Fair opened on Monday of this week. High Ball, the Los Angeles pacer by Silkwood, took first money; Cristabel, an Oakwood Park mare by Chas. Derby, won second; and Harry Hurst, a son of Sam Gamble's broken legged horse Delwin, was third. Highhall took a record of 2:11½ in this race.

The 2:20 trot went to Helen Norte, an Oregon mare, and Swift B. by Stam B., was second.

On Tuesday the two year old trot was first on the program and was won by Lovely Dell, a filly by Lovelace. The Inland Empire stake for three year olds was won by the chestnut colt Tidal Wave, son of Nutwood Wilkes. The two year old trot went to Loveless, a filly by Lovedell.

Wednesday saw the big \$2000 Greater Salem stake for pacers of the 2:17 class decided. The winner was Rita H. by McKinney, owned by Byron Erkenbrecher of Los Angeles, and driven by Will Durfee. It was a straight heat affair and the mare reduced her record to 2:12. The great northern champion of last year, Sam Bowers, was looked upon to win the \$1000 purse for 2:11 pacers on the same day, but Durfee captured the race with Zolock, Ben Davies' good son of McKinney. The best time was 2:11½.

According to a dispatch from Salem sent by the Associated Press, there was an unfortunate occurrence

on Thursday when the Lewis & Clark \$2000 trot for horses of the 2:20 class came off. W. G. Durfee won the first heat with Sweet Marie, and was third in the second heat which was won by Dr. Hammond. The judges charged Durfee with pulling his mare and ordered him to turn her over to another driver. This he refused to do and started to take her from the track. A marshal tried to prevent him from taking the mare from the course, and a fight ensued but was stopped before anyone was hurt. Durfee was then permitted to leave the track with his mare. All bets on the race were declared off. The race then went to Dr. Hammond, with Briney K. second and Beladi third. The same evening the judges, Robert Leighton, R. L. Harriman and W. O. Trine, permanently suspended Durfee and the mare Sweet Marie.

The Wehfoot Stake of \$500 for three year old trotters was won by Swift B. son of Stam B. His best heat was 2:16½, a new mark for him and equalling the record made by Tuna when she defeated him at Sacramento last week. Helen Norte was second.

Tidal Wave by Nutwood Wilkes won his second race of the week by annexing the 2:25 pace and reducing his record to 2:14½.

Full summaries of the races at the Oregon Fair will not reach us until next week.

Death of Wilton 2:19 1-4.

Wilton, one of the handsomest of the sons of Geo. Wilkes, died of pneumonia at the farm of his owner, J. D. Grover, Georgetown, Kentucky, on the 17th of last month. Wilton was foaled in 1880 and his dam was Alley who was also the dam of Alhert Fame 2:20½, and grandam of Earl Baltic 2:17, Baroness Russell 2:23½, Baron Russell 2:24½ and Alpha Sparks 2:24½. Alley was by Hambletonian 10, and her dam was Lady Griswold by Flying Morgan. W. L. Simmons bred Wilton, and the horse at the age of twenty-three was the sire of ninety-eight standard trotters and fifteen standard pacers, while thirteen of his daughters have produced seventeen trotters and two pacers in the list. The most celebrated trotters credited to Wilton are Bessie Wilton 2:09½, Moquette 2:10, Rubber 2:10, Dainty Daffo 2:13½, Wilask 2:11½, Lady Wilton 2:11½, Town Lady 2:11½, Mackey 2:13½, Silicon 2:13½, Al Kalone 2:14½ and Ernest Wilton 2:15. Wilton's greatest pacers are Will Leyburn 2:06 and Vera Capel 2:07½. Among the most celebrated of those produced by his daughters are Cayton 2:08½, Dorothy Redmond 2:10½ and Lady Thisbe 2:11½, and the following of his sons have made reputations for themselves as sires: Bernadotte, Ernest Wilton, Moquette Red Wilton, Wilton W. and Wilmarch.

A New York paper says that Theodore Maxfield will come to California with Monroe Salisbury to work that gentleman's horses at Pleasanton during the winter. Maxfield has been at East View Farm in the employ of James Butler for some time. Mr. Butler and Mr. Salisbury are interested together in several horses.

Readville Summaries.

The Grand Circuit horses are back at Readville gain this week for the New England Trotting Horse Breeders Association meeting. The feature of the opening day was the attempt of Major Delmar to lower his record of 2:00 1/2 made at Syracuse the previous week. The day was favorable in every way and while the great gelding failed to lower the record he trotted a mile in 2:00 3/4 and was loudly cheered. The two-year-old Tolara by Bingen won the two-year-old trot and took a record of 2:17 1/2 in the second heat. Monroe Salishbury's colt California Cresceus by Menocino was second. Judge Green won third money in the four-year-old trot which went to Margaret Bathgate in fast time. The summaries:

Trotting, foals of 1901, two in three; purse \$1000. Tolara, b, f, by Bingen.....(Titer) 1 1 California Cresceus 2-2; Pierpont Morgan dis. Time-2:19 1/2, 2:17 1/2.

Trotting, foals of 1899, three in five; purse \$3000. Margaret Bathgate, b m, by Silent Brook.....(Titer) 1 1 1 Wamscott 2-2-3; Judge Green 3-2-2; Kyville 5-5-4; I Live 4-4-6. Time-2:13, 2:11 1/2, 2:11 1/4.

Pacing, 2:07 class, two in three; purse \$1000. Major C. B. by Coastman.....(Cox) 1 1 Locanda 2-2; Splinx S. 3-3; Surflee 4-4; Major Muscovite 7-4; Prince Direct 5-5; Trilby Direct 6-7. Time-2:04 1/2, 2:04.

Trotting, 2:13 class, two in three; purse \$1000. Crescent, blk g, by Silent Chalmers.....(Andrews) 1 1 Crescent 2-3; Guy Fortune, 4-2; Pug 3-4; Aicy 5-5; Anna Held 6-6. Time-2:10 1/2, 2:11.

Special, against time, trotting to beat 2:00 1/2—Major Delmar, b (McDonell). Time-1/4, 0:30 1/2, 1:00 1/4, 1:30 1/4, 2:00 1/2.

TUESDAY, SEPT. 15.

George Starr was thrown from his sulky and severely injured in the second heat of the 2:13 pace Tuesday. He was driving Double Z. and had just turned into the hack stretch close to the pole when the high wheel of the sulky struck a board which extended from the railing, throwing him to the ground. While lying on the ground he was run over by the sulky of Burr Oak, while the horse went along driverless. He was examined by a doctor who had him removed to a hospital, suffering from internal injuries and bruises about the head. Cozad was the only California horse to start during the day and he made a poor showing, finishing next to last in the 2:11 trot. Fast time was made by the winner, however, in every heat. The summaries:

Pace, 2:20 class, purse \$3000. Pen Michael, ch s, by Boreal.....(Hyde) 1 1 1 Cascade 2-3-4, Mush 5-5-5, Day Book 8-6-2, Dr. Madara 4-5-3, Jim Kyle 2-4-6, Dick Wilson 6-7-7, Young Beyer 7-8-8. Time-2:07 1/2, 2:08 1/4, 2:08 1/4.

Trot, foals of 1900, purse \$2000. Lizzie A., ro f, by Alfred G.....(Cox) 1 1 Sporty 4-2, Lord Roberts 2-5, Leonado 3-4, Delight 6-3, Libby Queen, 5-6. Time-2:18 1/4, 2:14 1/2.

Trot, 2:11 class, purse \$1000. McKinley, b s, by George St. Clair.....(Boone) 2 1 1 Belle Kuser 1-2-3, Nell Gywnne 4-3-5, Ven Zandt 8-4-4, Edgewood 5-6-6, Cozad 6-5-3, Hallie Rocket 7-7-7. Time-2:08, 2:08 1/4, 2:07 1/4.

Pace, 2:18 class, purse \$1000. Daphne Direct, blk m by Direct.....(Curry) 1 1 Direct L. 4-2, Burr Oak 3-3, Double Z. 2-4. Time-2:13 1/4, 2:14 1/2.

WEDNESDAY, SEPT. 16.

A new two heat record for this year was made in the 2:09 class trot at Readville on Wednesday by Caspian, a son of Patron. He won his race in straight heats, both in 2:07 1/2. There were ten starters in the race, The Roman and Idolita being the last two in the final summary. Budd Doble won a heat and second money in the \$2000 trot for horses of the 2:20 class with Kinney Lou, but was beaten by Jay McGregor. The day's summaries follow:

Trotting, 2:20 class, purse \$2000; three in five. Jay McGregor, b h, by Jay Hawker.....(Hudson) 2 1 1 1 Kinney Lou 1-2-2-3, John Taylor 3-3-4-2, Navidda 5-5-3-4, Karmars 4-4-4. Time-2:09 1/4, 2:08 1/4, 2:10 1/4, 2:11 1/4.

Pacing, 2:13 class, purse \$1000; two in three. Claymore, b g, by Claycoys.....(Knapp) 2 1 1 Centriflo 1-3-5, Ecetatic 4-3-2, Hale 3-4-3, Don Cozine 5-5-4. Time-2:09, 2:07 1/4, 2:10 1/4.

Trotting, 2:19 class, purse \$1000; two in three. Alberto, ch g, by Bolina.....(Dickerson) 1 1 Miss Jeanette 2-2, Christina Bellew 3-3, Tonga 5-4, Black Beauty 4-5, Kaholeua 7-6, Cleude V 6-8, Crowhede 9-7, Delgola 8-9, The General dis. Time-2:15 1/4, 2:13 1/4.

The 2:09 class, trotting, two in three; purse \$1000. Caspian, b g, by Patron.....(Shank) 1 1 Hewitt 2-3, Maxine 5-2, Dulce 3-4, George Muscovite 4-5, Alice Carr 6-9, Lord Vincent 10-5, Wentworth 7-8, The Roman 9-7, Idolita 8-10. Time-2:07 1/2, 2:07 1/4.

THURSDAY, SEPTEMBER 17.

Trot, 2:14 class, purse \$3000. Masetto, blk g, by Constantine.....(Dickerson) 1 1 1 Norrie 2-2-2, Dillon Boy 3-3-3, John Mao 5-4-4, Nuk Berry 4-6-6, Direct View 6-5-5, Oxford Chimes d. Time-2:11 1/4, 2:10 1/2, 2:10 1/2.

Pace, 2:08 class, purse \$3000. Nervolo, b h, by Colbert.....(Hudson) 2 2 1 1 Leonada 1-1-2-2, Terrill S. 4-3-3-3, Miss Willumont 3-4, Diablo to 5-4, Brown Heels 6-4. Time-2:06 1/2, 2:05 1/2, 2:06 1/2, 2:06 1/2, 2:11 1/4.

Trot, 2:15 class, purse \$1000. Rowellan, b g, by Abdell.....(Golden) 1 1 Millard Senders 2-2, Midnight 6-3, Dreamer 3-6, Mary Rachael 4-5, Katrinka G. 5-4, Helgar d. Time-2:13 1/4, 2:11 1/4.

Trot, amateur, to wagon. Ackerland, b g.....(C. H. Belledenp) 1 1 Silver Glow 2-2, Crowhede 2-5, Fashion 4-3, Altwood 5-4. Time-2:15, 2:14 1/2.

Sober up on Jackson's Napa Soda.

Care of the Horse's Foot.

The general treatment of the foot of the horse when suffering from various diseases, says a writer in The Field, has been described in several previous articles; it now remains to consider what steps should be taken in dealing with a horse whose feet are sound for the purpose of keeping them as far as possible in that desirable condition. It will be obvious that the feet are, of all the organs of the body, most unfortunately situated as soon as the animal is brought under the influence of domestication. The respiratory organs may be kept in fairly good condition by careful attention to ventilation, the regulation of the amount of exertion which the animals is called upon to undergo, and the same thing may be said of the organs concerned in the circulation of the blood. Derangement of the digestive organs may be averted by attention to the quality and quantity of food which the animal consumes; but, in the case of the feet, it is a matter of necessity that certain disturbing influences must be accepted to render the animal capable of working either as a draught horse, hunter, or hack. In the first place, the horse cannot be left, as he would be in a natural condition, with his hoofs unprotected, as the difference between the surface on which the animal would tread in a state of nature and that of the modern road, good or bad, is such that in ordinary circumstances the ground surface of the foot would be worn through, and the horse thereby rendered useless in the course of a few days; and it must have been recognized from the first that as soon as the horse was brought into use it was necessary to protect the feet by artificial means. The primitive idea of strapping sandals to the feet was very soon abandoned as ineffectual, and as an outcome of various experiments it was at length determined that the only possible method of saving the hoofs from destruction was the attachment to the bottom of the organs of an iron plate or ring held in position by the use of nails driven through the horny material and clenched on the surface of the wall of the foot, very much in the same way that a carpenter would attach any hard substance, iron or anything else, to a piece of wood.

So far as protection was concerned, this method answered admirably, but by raising the foot from the ground by the interposition of a piece of metal, a result followed which was probably not thought of at the time, namely, the natural wear of the horse's foot being prevented, excessive growth from above downwards took place, and it became necessary to remove the shoe and cut away the excess of horny material before it could be re-applied. From a cursory view of the matter it would seem that the attachment of a small portion of the protecting iron to the bottom of a horse's foot was a comparatively unimportant matter, not likely to be attended with any mischief, but in reality the process of shoeing, as it is called, with its attendant use of the knife and rasp to cut away the superfluous horn, and so represent as nearly as possible the natural wear of the foot, has been the cause of all the ills from which the foot has suffered, and to some extent continues to suffer still. Most likely if the mechanic had been content to rasp or otherwise get rid of the additional growth of horn, and apply the shoe without any further cutting or rasping of the horn everything would have gone well. Somehow the idea seems to have entered the head of the shoeing smith, by whatever name he might be called, that before the shoe was applied the whole of the hard, rough horn of the sole of the foot must be cut away until the surface became concave, and thus removed altogether from contact with the ground. Certain other trimmings of the part soon became fashionable, such as paring the frogs, cutting away a certain amount of horn between the broad part of the frogs and the heel, and finally altering the shape of the foot to meet the taste of the owner by scraping, cutting or rasping until the desired form was secured. It is in only comparatively recent years that this custom has been abolished, and even now all that can be said in favor of the most perfect system of shoeing which is adopted is that it is a necessary evil.

Again, the feet invariably suffer from the hard roads on which the horse is compelled to travel, and, as a consequence of the severe concussion to which the organs are sometimes exposed, various morbid conditions of a sub-acute or chronic character are from time to time developed, rendering the horse temporarily, and in some cases permanently, lame. It is, as a matter of course, impossible to alter this state of things; but, by care in shoeing and by keeping the feet in the condition which is most favorable for resisting the adverse influences, a great deal of the mischief may be escaped. To this end the ordinary precautions which are fortunately taken by experienced shoeing smiths in preparing the feet and fitting and fastening the shoe are in the highest de-

gree helpful. The old-fashioned idea of keeping the bottom of the feet soft by stopping has long since been abandoned, and it is now perfectly well understood by most owners of horses who take any interest in their animals that the natural and most desirable condition of the bottom of the horse's foot is one of hardness instead of softness, and that so far from its being desirable to reduce the bulk of the frogs and to cut away the bottom of the sole so as to keep both from contact with the ground, the ideal system of shoeing will provide for the preservation of these parts in their entirety, so that the horse may tread upon a flat surface, of which the shoe forms the boundary.

It is constantly a subject of remark that the feet and joints of the horse suffer from the practice, which in large establishments can hardly be avoided, of making the floor of the stable on an incline from the front of the stall where the manger is placed back to the channel which forms the main drain. In small establishments this difficulty is disposed of by the use of a central drain, which terminates on the outside of the building. The flooring being inclined from all sides toward the centre renders it possible for the animal always to keep his feet on the same level either in a box or stall. The loose box, it need hardly be observed, is most conducive to the healthy condition of the feet, as it allows the animal an amount of freedom of movement which is impossible when the horse is tied by the head in the front of a narrow stall. Most horses are compelled to spend a large portion of the twenty-four hours in the stable, even those animals which are worked most severely, and the result naturally is that when they are unable to move about the stationary position has a tendency to produce congestion of the vessels of the feet, laying the foundation for contraction, brittle hoofs, and other disorders. In the general management of the horse's foot in the stable all hoof ointments excepting for ornamental purposes—that is, with a view of giving a temporary polish to the hoof, may safely be discarded. The only good they can possibly do is to prevent a certain amount of evaporation. The application of cold water to the feet from time to time is the only kind of dressing which need be applied. It is not desirable that the horn should be allowed to become extremely dry, and in hot, dry seasons the frequent use of water is a necessity.

An Eastern paper says: "The pacing mare Alone, which is thought by some people in California to have speed enough at the pace to dethrone Dan Patch, recently went half a mile in 59 1/2 seconds in a flight against the watch. Sixty days after Dan Patch was placed in training this spring he went the same distance in 57 1/2 seconds." While "some people" here in California know that Alone is a wonderfully fast mare and believe her able when just right to shade Lady of the Manor's record of 2:04 1/2 a little, there are none within our knowledge who ever entertained the idea that she can dethrone Dan Patch. It will take a horse that can show a half mile in 57 seconds to do that in our opinion. We Californians may claim much in the horse line, but we do not claim everything in sight.

Boodle Jr., Monogram by Fairmont, and Larkin W. by Boodle Jr. are all at the Oakland track in charge of Farmer Bunch, who will be pleased to show them at any time prior to September 26th, when they are to be removed to Fred H. Chase & Co.'s salesyard, 1732 Market street, San Francisco. They are to be sold at the clearance sale of Hon. Jesse D. Carr's Cahilan Stock Farm on the 29th of September. Parties wanting choice animals should take a look at these horses.

Horse Owners. Look to your interests and use the safest, speediest and most positive cure for ailments of your horses, for which an external remedy can be used, viz: GOMBALT'S CAUSTIC BALSAM. Prepared exclusively by J. E. Gombault, Veterinary Surgeon to the French Government Stud. SUPERSEDES ALL CAUTERY OR FIRING. Impossible to produce any scar or Memish. Takes the place of all treatments for mild or severe action. Removes all Bunches or Blemishes from Horses or Cattle. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

South Dakota Field Trials.

The fourth annual field trials of the South Dakota Field Trials Association which were held near Sioux Falls, the last week in August, seem to have been the subject of some little criticism in the Eastern journals.

One account states: "The range of ground was constricted, with the obvious result that the same ground had to be gone over day after day, and the already wild prairie chickens were made wilder than ever. Then [again the arrangements] were not what they might have been, nothing had been arranged in the shape of quarters for visitors, and owners and visitors had to hunt the town for rooms and accommodation for their dogs when they arrived. This was not all, even the liverymen had formed a combine, and practically refused to rent their horses out, and many of the handlers were obliged to borrow from their more fortunate friends. The judging was not at all satisfactory, and despite the many letters written against the Field Trial Handlers' Association, the latter organization must be approved of only to hold in check so great a farce as this meeting proved in the matter of judging. The meeting was poorly attended. Among the prominent visitors were: Hon. C. W. Mullan, Attorney General of the State of Iowa, and O. W. Miller, both of Waterloo; W. W. Titus, West Point, Miss.; W. J. Baughn, Ridgeville, Ind.; C. D. Stuart, Benton Harbor, Mich.; F. L. Bills, Urbana, Ill.

The weather was against the association also. Rain fell on Wednesday, Thursday, Friday and Saturday, prolonging the trials and making them not only tedious but unsatisfactory.

The Derby was won by Rap's Pointer, by Young Rip Rap, out of Miss Pointer. Rip ran in the Nebraska Derby, where he distinguished himself but failed to get into the money. He is a very wise puppy on birds and handles them like an old dog.

Plain Rex, second, was the winner of the Nebraska Derby. He also is wise on his game, but he will never make a class dog, from the fact that he is not built that way.

Third fell to Sport's Dan, a big black, white and tan dog, with a whole lot of Setter character. He is good on his birds, is fairly fast and a good ranger. Sport's Dan is by Marie's Sport.

Lad's Meally, fourth, should have been second. There was no question about this in the eyes of those who followed the running closely. The judges, so it seemed at least, tried to run her off her legs but didn't do it. In speed and range she was the equal of any dog in the stake, and while she frittered away some time with small birds, it must be borne in mind that she is a mere baby, both in size and age. Meally won second place in the Derby at O'Neill.

The All-Age and Subscription stakes were won by the English Setter dog McKinley, owned by Thomas Griffith of Grand Forks, S. D. McKinley has but two faults, to our way of thinking, one of which is that he drops to his points, and being one of the widest, coupled with consistent, ranging dogs we have ever seen on the prairies, much time is lost when he is down on a covey point in searching for him. Twenty minutes was consumed looking for him in one of his trials. The other fault is that he has very little tail action while running. When on scent he has a merry tail action. But aside from his qualities as a bird dog he is a beautiful animal, is nicely marked and has a lovely disposition. He is probably the equal, if not the superior, on prairie chickens of any dog living. Game as the proverbial pebble, he goes fast and wide, and when he points it is generally with exact precision and confidence.

Capt. Jack, placed second, we say placed, as he did not win the position. He, like some others we might mention, is a newspaper dog. He has any amount of quality, is fast, stylish, a smooth running dog, but his bird work has never been good, and until he shows us something more in this line we will believe he should have fought it out with some other dogs in the stake for fourth place. He should never have been placed over Alpine Lad or Lad of Jingo, third and fourth placed dogs. Alpine Lad ran very consistently, and his bird work was of the right sort; so was that of Lad of Jingo's when he had an opportunity. McKinley practically had no competition in the Subscription stake. He was in a class all by himself and has earned undying fame among his kind by winning over some of the best dogs of past seasons.

Cowley's Rodfield Pride, second, was not in fighting trim. He was soft, and, after a few minutes' run, slackened both speed and range.

Third place was given to Sport's Count Danstone, a grand going dog, but his work on birds was abominable for such a high-class dog. There is no better handler than Jack Gude.

Contra to the foregoing is the review by one of the judges, Mr. C. B. Whitford, who states:

"It took sixteen trials, including the bye, to find the four winners among the seventeen dogs which started in the South Dakota Derby. This amount of running was made necessary because of the scarcity of birds. During the running of these sixteen trials in three series, fifteen points and fifteen flushes were made, as the judges would not place dogs which did not point, no matter how much "class" they might have, it may be readily seen that they had a difficult task in making their selections, and in order to do justice to all the dogs by giving them an opportunity on game,

they were forced to run some of the youngsters rather long trials.

In the end, however, all had been given a fair trial on game, and the four dogs selected for the places were clearly entitled to them. The order in which they were placed was generally acceptable to the competitors and the best judges who had followed the running closely.

As between Plain Rex, Sport's Dan and Lad's Meally, respectively second, third and fourth there was room for a difference of opinion as they were separated by very close margins. Lad's Meally was the choice of the "gallery" for second long before she had finished her second trial, and she was never out of favor for the place by those who had been impressed with her persistent way of going. The difference, however, between the judges and the critics respecting her merit was due largely to a difference of opinion as to wherein the point ceases and the flush begins.

It may be said in this connection that the judges are "class" judges and tried hard to place the class dogs. But they held that a class bird dog that would not find and point birds had no right to be named among the winners. Lad's Meally was given a third trial, and after making one point was taken up.

Plain Rex and Sport's Dan placed over her were not nearly so fast, but both ran with great judgment. Plain Rex was a little the best in this respect, but not quite so stylish on game as Sport's Dan. Both are good bird finders and behave well on game. The judges had no difficulty in placing Raps Pointer first and Lads Meally fourth, but between Plain Rex and Sport's Dan there was very little difference.

Another thing of importance happened in the running of the Derby that deserves special consideration, first, because it was rather unusual; second, because there was objection to it, and finally because it was a good thing and was in effect the carrying out of a request made by the handlers in form of a rule. I cannot quote the rule, but the sum and substance of it is that the judges give all dogs a good opportunity to show their quality on game and not to take them up when birds are scarce in an allotted time on the pretext that they have had equal opportunities.

The judges ran Lad's Meally one hour in her second trial without getting any result on birds by which they could fairly place the dog or put her out of the stake. They might have said she had a fair chance and put her out. But they chose rather to run her further because birds were scarce and she appeared to be trying hard. They gave her another long race, and as soon as she pointed she was taken up. Had any one charged that she had been favored a little by having such an unusual opportunity to show what she could do on game, I would have felt at least that there was much ground upon which to base the charge. But when her handler and others complained that she had been overworked to her disadvantage I felt like asking the Handlers' Association to reprimand their member who complained at judges who had carried out one of their rules. In fact, the carrying out of the one rule involved the carrying out of the other. I would suggest that the handlers put these two good rules together and then add another good one, something like this: "Any handler who objects to the carrying out of these rules by judges shall be reprimanded by the Handlers' Association, the reprimand to be made public." If the handlers are going to make running rules they should see to it that they are respected by the handlers themselves.

Before dismissing the Derby let me say that it looked easier to the judges at the end of the first series than it did at the end of the second. Much was expected of Cleopatra, Oakley Hill's Pride and Copper Coin. They had lots of class, but after they had been thoroughly tried it was found they were lacking in quality on birds. It was therefore necessary to run many dogs until those were found that showed a well balanced performance.

McKinley stood alone in the All-Age Stake. There were several stars down in this stake, but they behaved badly on game. Captain Jack placed second, had one good point to his credit and made one flush. He went wide and fast and was easily the most stylish dog in the stake. He goes with his head well up, has good tail action, is always bold and never potters. There is more character in one of his flushes than there is in several points some dogs wiggle into. His single point was not seen by the majority of the spectators, although it was made in plain view. The dog stopped. Gude held up his hand to call attention to the point, the judges recognized him by holding up their hands, and finally waived him on. Gude walked in and put up a small covey. Captain Jack meanwhile drawing up with him, stopping as the birds flushed. The crowd saw the end of the performance and did not credit Captain Jack with the good piece of work he did. And for that reason thought he was placed too high in the list of awards.

While Captain Jack was on his birds Alpine Lad was pointing out a single bird close by, to which point the attention of the crowd was directed. Just a moment before Alpine Lad had flushed single birds twice in succession. Before the flushes he had run on both sides and very close to birds that were flushed by the wagons as they came up. It was all very poor work on the part of Alpine Lad, so poor, in fact, his handler complained at the time that the seating conditions were so poor a dog could not do good work—passing birds he should have pointed, and flushing two single birds he should have pointed—put Alpine Lad in third instead of second place. As a result of his running he

had two points to his credit, two flushes and two false points. He had good pace and range and showed himself a persistent hunter. However, he lacks style when compared with Captain Jack and puts his nose to the ground occasionally."

SIoux FALLS, S. D., August 13, 1903.—South Dakota Field Trial Association's fourth annual Derby for Pointers and Setters, horn on or after January 1, 1902. Entries closed July 31, with thirty-eight entries, seventeen of which started, five Pointers and twelve English Setters. The purse consisted of the entry fees, less expenses, the stakes pro rata of the trial, divided as follows: Thirty-two and one-half per cent to first, 27½ per cent to second, 22½ per cent to third, 17½ per cent to fourth. Judges, C. B. Whitford, L. Stuehmer and E. H. Gregory.

Oakley Hill's Pride, white, black and tan English Setter dog (Oakley Hill-Gleam's Daisy). Mrs. John Crowley, owner; Er Shelley, handler.

With Topsy's Dot, white and lemon Pointer bitch (Trix S-Topsy). A. A. Walters, owner; W. J. Wilson, handler.

Pioneer, white and orange English Setter dog (Count Whitestone-Graie Gladstone). Titus-Hoover Kennels, owners; Er Shelley, handler.

With Sport's Dan, white, black and tan English Setter dog (Marie's Sport-Spotty Gladstone). A. Albaugh, owner and handler.

Rachel Rodfield, white, black and tan English Setter bitch (Cincinnati's Pride-Florence Rodfield).

With Piquet, white and liver Pointer bitch (Fryphoon-Rancocas Belle) W. H. Hammond, agent and handler.

Gath's Lady, white, black and tan English Setter bitch (Sport's Gath-Bessie Perry). Albert Lieber, owner; Lockwood, handler.

With Kalmia Black-patch, white, black, tan and ticked bitch (Morrow-Kaimia Hope). R. Kelley, owner; W. H. Hammond, handler.

Miss Irish, white and orange English Setter bitch (Ruby's Dan-Snowflake III). Arthur Stearn, owner; W. H. Hammond, handler.

With Plain Rex, white, black and tan English Setter dog (Dan Bo-Theima S). Thomas Griffiths owner; Nat Neshitt, handler.

Rap's Pointer, white and liver Pointer dog (Young Rip Rap-Miss Pointer). Er Shelley, owner and handler.

With Lakefield Pride, white and orange English Setter dog (Rodfield Pride-Phoebe Wind'em). Lakefield Kennels, owners; J. Gude, handler.

Peggy, white, black and tan English Setter bitch (Domino's Mark-Pet). Arthur Stearn, owner; W. H. Hammond, handler.

With Cleopatra, white, black and tan English Setter bitch (Tony Boy-Lady Clinton). F. P. Harter, owner; Er Shelley, handler.

Lad's Meally, white and liver Pointer dog (Lad of Jingo-Margaret). W. P. Austin, owner; A. B. Caldwell, handler.

With Cornell, black, white and tan English setter dog (Rodfield-I. T. Carter, agent and handler).

Copper Coin, white and liver Pointer dog (Lad of Jingo-Hal's Belle). W. P. Austin, owner; A. B. Caldwell, handler.

II
Oakley Hill's Pride with Sport's Dan.
Plain Rex with Rap's Pointer.
Peggy with Lad's Meally.
Cleopatra with Copper Coin.

III
Plain Rex with Cleopatra.
Pioneer with Lad's Meally.
Sport's Dan with Copper Coin.
Rap's Pointer, a bye.

RESULT.
1st, Rap's Pointer; 2d, Plain Rex; 3d, Sport's Dan; 4th, Lad's Meally.

SIoux FALLS, S. D., August 28, 1903.—South Dakota Field Trial Association's fourth annual All-Age Stake for Pointers and Setters which have not won a prize in open field trials. Entries closed July 31st with sixty-four dogs, sixteen of which started, five Pointers and eleven English Setters. The purse consisted of the entry fees, less the stake's pro rata expenses of the trial, divided as follows: Thirty-two and one-half per cent to first, 27½ per cent to second, 22½ per cent to third and 17½ per cent to fourth. Judges, C. B. Whitford and L. Stuehmer.

May Fly, imported white and orange English Setter dog (May Prince-Glory). G. O. Smith, owner; A. B. Caldwell, handler.

With Chief Other Day, white and liver Pointer dog (Sahnie's Rip Rap-Sue's Dottie). H. M. Giles, owner; Nat B. Neshitt, handler.

Pride of Rodfield, white, black and tan English Setter dog (Rodfield-Sue Gladstone II). Dr. F. W. Samuel, owner; Ed Garr, handler.

With Lakefield Rod, white, black and tan English Setter dog (Rodfield-Kate N.). Lakefield Kennels, owners; Jack Gude, handler.

Jingo's Jerry, white and liver Pointer dog (Jingo-Rose Le Hessen). John Otten, owner; Ed Garr, handler.

With Lad of Jingo, white and liver Pointer dog (Jingo-Dot's Pearl). W. P. Austin, owner; A. B. Caldwell, handler.

Prince Lyndon, white, black and tan English Setter dog (Marie's Sport-West Wind). John Crowley, owner; Er Shelley, handler.

With McKinley, white, black and tan English Setter dog (Hickory Gladstone-Thelma S.). Thomas Griffiths, owner; Nst B. Neshitt, handler.

Jingo's Mike, white and liver Pointer dog (Jingo-Nellie Cresteth). Smith & De Pauw, owners; Ed Garr, handler.

With Northern Huntress, white, black and tan English Setter bitch (Joe Cumming-Mecca II). Tudor J. A. Tiedemann, owner; Er Shelley, handler.

Dad's Frank, white and lemon English Setter dog (Mat Eills-Belle Wilson II). Nitta Yuma Kennels, owners; Ed Garr, handler.

With Patentee, white, black and tan English Setter dog (Lady's Count Gladstone-Sue Hope). Nichols & Heisey, owners; A. Albaugh, handler.

Jessie Rodfield's Count Gladstone (Lad's Count Gladstone-Jessie Rodfield). Jesse Sherwood, owner; Er Shelley, handler.

With Sport's Boy Jr., white and lemon English Setter dog (Sport's Boy-Queen W. H.). Frank A. Warnke, owner; A. Albaugh, handler.

Alpine Lad, white and liver Pointer dog (Lad of Jingo-Fanny Flash). Charles Proctor, owner; Ed Garr, handler.

With Captain Jack, white, black and tan English Setter dog (Colone R-Sport's Girl). A. M. Masters, owner; Jack Gude, handler.

II
McKinley with Jingo's Jerry.
Lad of Jingo with Northern Huntress.
Jessie Rodfield's Count Gladstone with Alpine Lad.
Captain Jack with Sport's Boy Jr.

III
Lad of Jingo with Alpine Lad.
McKinley with Captain Jack.

RESULT.
1st, McKinley; 2d, Captain Jack; 3d, Alpine Lad; 4th, Lad of Jingo.

SIoux FALLS S. D., August 29, 1903—South Dakota Field Trial Association's Subscription Stake, for Setters and Pointers, regardless of previous winnings \$10 dollars to nominate and \$15 to start.

Sport's Count Danstone, white; black and tan English Setter dog (Count Danstone—). William Brett, owner; J. A. Gude, handler.

McKinley, white, black and tan English Setter dog (Hickory Gladstone-Thelma S.). Thoe. Griffith, owner; Nat B. Nesbit, handler.

Jingo's Rippo, white and liver Pointer bitch (Jingo-Rippo). Dr. G. T. Page, owner and handler.

Count Whitestone, white and lemon English Setter dog (Lady's Count Gladstone-Jessie Rodfeld). Titus-Hoover Kennels, owners; Er Shelley, handler, A. bye.

McKinley with Sport's Count Danstone. Count Whitestone with Cowley's Rodfeld's Pride.

1st, McKinley; 2d, Cowley's Rodfeld's Pride; 3d, Sport's Count Danstone.

Victoria Show.

The first open air dog show held under the auspices of the Victoria Kennel Club, took place Saturday afternoon, August 22, at the Caledonia grounds.

AWARDS.

St Bernards—Puppy dogs—1 Mrs H E Davies' Victoria Chief. Open dogs—1 W F Hall's His Highness. Winners, dogs—1 Victoria Chief, ree His Highness.

Bull Terriers—Novice dogs—1 W W Murray's Jerric. Open dogs—1 Harry Keown's Walter. Winners—1 Walter, ree Jerric.

Fox Terriers (smooth coated)—Puppy dogs—1 Mrs J J Bostock's Result, 2 Mrs H H Anderson's Tim, 3 H Hern's Kitchener. Novice dogs—1 Result, 2 Tim.

Cocker Spaniels (black)—Novice dogs—1 C E Stephen's Silver King, 2 F Clyde's Prince, 3 Mrs W Savage's Victor. Limit dogs—1 Silver King, 2 Phil A Goodwin's Douglas, 3 Prince.

Cocker Spaniels (other than black)—Open dogs—2 Dr G L Milne's Red Rex. Puppy bitches—1 Mrs J W Creighton's Jessamond Ravenel, 2 Mrs Trimen's Little Duches.

Irish Water Spaniels—Puppy dogs—1 C P LeLievre's Mike L; 2 A W Vowell's Judge. Novice dogs—1 Mrs G F Dunn's Murphy. Limit and open dogs—1 G F Dunn's Tim Dee; 2 Murphy.

Irish Terriers—Novice dogs—1 J Rogers' Pat. Novice dogs—1 E Carlow's Punch, 2 Pat. Limit and open dogs—1 R C Hall's Nipper, 2 Punch, 3 Pat.

Cocker Spaniels (parti-color)—Limit and winners—1 Miss Skinner's Bonnie Charlie. Special prize for best Cocker Spaniel in the show was won by J W Creighton's Jessamond Pearl.

English Setters—Puppy dogs—1 T P McConnell's Count Rego; 2 W Armetrong's Dandy; 3 A G Davies' St Nicholas, v h c R G Monteith's Roh. Novice dogs—1 Count Rego; 2 H Twyman's Mafeking; 3 H E Davies' Curnow Shag Dee, h c L M Burnie's Jack.

Irish Setters—Novice dogs—1 J K Bellamy's Dan. Limit dogs—1 George Jay's Mike; 2 J R Jennings' Laddie; 3 J Cottle's Patrick. Open dogs—1 Dr Garcesche's Hector; 2 Mike; 3 Patrick.

Pointers—Novice dogs—1 F Bowness' Wasco Imp; 2 H Donkin's Victoria Joe. Limit, open and winners dogs—1 Victoria Joe; 2 Wasco Imp. Novice bitches—1 F Bowness' Alberta Queen. Limit bitches—1 F A Fletcher's Duchess; 2 Alberta Queen.

Skye Terriers—Open—1 Mrs Gavin Burne' York; 2 Mrs Burns' Kelpie. The retrieving contest was won by J R Jennings' Irish Setter Laddie.

Sunday Contest No. 12—Stow Lake, Sept. 12, 1903. Wind west. Weather, fair. Judges, Messrs. T. C. Kierulf and W. E. Brooks; Referee, Mr. Kenniff; Clerk, Mr. Brotherton.

Table with columns: Events, 1, 2, 3, 4. Rows: Young, C. G.; Kenniff, C. R.; Brotherton, T. W.; Kierulf, T. C.; Brooks, Dr. W. E.

San Francisco Fly-Casting Club. SUNDAY CONTEST No. 12—Stow Lake, Sept. 13, 1903. Wind, none. Weather, fair.

Table with columns: Events, 1, 2, 3, 4. Rows: Young, C. G.; Brooks, Dr. W. E.; Brotherton, T. W.; Kenniff, C. R.; Golcher, H. C.; Hurch, C.; Haight, F. M.; Kenniff, J. B.; Sperry, H. B.

NOTE: Event 1—Distance Casting, feet. Event 2—Accuracy percentage. Event 3—Dexterity (a) accuracy percentage, (b) dexterity percentage; (c) net percentage. Event 4—Lure casting, percentage. The fractions in lure casting are 15ths.

AT THE TRAPS. The Union Gun Club shoot to-morrow will be the final club blue rock meeting at Ingleside for this season.

The Golden Gate Gun Club trap shoot at Ingleside Sunday was attended by over 80 sportsmen, a number of them coming from distant points to take part in the club's final blue rock shoot for this season.

The first event shot was the regular monthly club shoot. For this occasion the shooters had 50 targets instead of 25 to shoot at. The club purse of \$100 and the Hlbhard silver cup were the prizes in this race.

Novelty shoot, 25 targets—Daniels 23, Nauman 22, Reed 22, Webb 21, Kincannon 21, Sylvester 21, Haight 20, Karney 19, E. Klevesahl 19, Potter 18, H. Klevesahl 18, Hoyt 17, Schultz 17, Forster 17, Donohoe 16, Aeshland 16, Justins 16, Iverson 16, Beattie 15, Gihson 15, Hutton 14, Pisan 14, Burns 14, Franzen 13, Price 13, Lewis 13, Hesse 12, Patrick 12.

Donings in Dogdom. British Columbia sportemen have for some time been discussing the advisability of forming a field trial club to run trials on Mongolian pheasants, and at a meeting held at Vancouver, August 15th, the British Columbia Field Trial Club was organized.

The club intends running a Derby and All-Age Stake, and has been promised the support of all the

The second event was the feature of the day. It was a shoot for a wholesale collection of merchandise prizes, which embraced a miscellaneous lot of articles, enough to stock a small store. This race was open to all. Each shooter shot at 20 targets and was privileged to enter as often as he desired.

Forty-four shooters shot in the next event for a silver cup. The conditions were sealed and obligated the man who broke 13, 14 or 15 pigeons to shoot again, as follows: 15 birds at 18 yards, 14 birds at 16 yards and 13 birds at 14 yards.

Final monthly club shoot, 1903, \$100 added, 5 moneys, high guns, members only: Nauman 49, Haight 47, Klevesahl 47, Golcher 45, Donohoe 43, Feudner 42, Gihson 42, Murdock 41, "Slade" 39, E. F. Forster 38, Wande 37, Sylvester 37, Justine 36, Iverson 33.

Re-entry merchandise shoot, 20 birds. Best scores to count, \$1.00 entrance, 112 entries, class shooting, 10 classes:

Nauman 20, Webb 20, Kincannon 19, Haight 19, Daniels 18, O Feudner 18, Karney 18, Thom 18, Reed 18, E. Klevesahl 18, F. Feudner 17, Hutton 17, Beveridge 17, Donohoe 17, Schultz 17, Potter 16, Kerrison 16, Slade 16, Justins 16, Magistrini 16, Burnett 16, Ed Forster 16, Muller 16, Lidstone 15, Beattie 15, Gihson 15, Patrick 15, O'Hara 15, King 15, Hesse 14, Bowen 14, Sylvester 14, Brun 14, Gordon 14, Pisan 14, Murdock 13, Montoya 13, Iverson 13, Hoyt 13, Walpert 13, Ashland 13, Carlson 13, Ostrander 13, Franzen 12, Price 12, Hodapp 12, Hunt 12, Clark 12, Fischer 12, Herring 12, Burns 12, Lewis 11, Kewell 11, Hayes 11, H. Klevesahl 11, Lansing 11, Eug Forster 11, Burnell 10, Wands 10, Bell 10, Grim 9, Dr. Sylvester.

Cup shoot, sealed conditions, 15 targets—Nauman 15, Haight 15, Webb 14, Kincannon 14, Lewis 14, Gihson 14, Hoyt 14, Pisan 13, Reed 13, Karney 13, Donohoe 13, Justins 13, Gordon 12, Brun 12, Schultz 12, O. Feudner 12, Ostrander 12, Kewell 12, Justins 12, Potter 12, Carroll 12, Kerrison 12, Iverson 12, Golcher 11, Donohoe 11, Beattie 11, Hunt 11, Ed Forster 11, Clark 10, Hanson 10, Burnell 10, Hesse 10, Ashland 10, Franzen 10, Hutton 10, Price 0, Hodapp 9, Walpert 9, Fischer 8, Hayee 8, Grim 8, Lidstone 7, Patrick 7, Childs 6.

Novelty shoot, 25 targets—Daniels 23, Nauman 22, Reed 22, Webb 21, Kincannon 21, Sylvester 21, Haight 20, Karney 19, E. Klevesahl 19, Potter 18, H. Klevesahl 18, Hoyt 17, Schultz 17, Forster 17, Donohoe 16, Aeshland 16, Justins 16, Iverson 16, Beattie 15, Gihson 15, Hutton 14, Pisan 14, Burns 14, Franzen 13, Price 13, Lewis 13, Hesse 12, Patrick 12.

Doing in Dogdom. British Columbia sportemen have for some time been discussing the advisability of forming a field trial club to run trials on Mongolian pheasants, and at a meeting held at Vancouver, August 15th, the British Columbia Field Trial Club was organized.

The following officers elected: J. M. Bowell, president; R. D. Cowan, Thomas Plimley, H. S. Rotson, D. Sweede, vice-president; C. Cocking, treasurer; N. F. Lynne, secretary.

Field trial grounds located in the vicinity of Steveston, fifteen miles south of Vancouver, were decided on to hold the initial trials, and it is claimed the first in America to run on pheasants.

Owing to the late start made this season, it was considered advisable to make the first competition a provincial affair, open only to dogs owned in British Columbia.

The club intends running a Derby and All-Age Stake, and has been promised the support of all the

Setter and Pointer men, practically, in the province. Great enthusiasm has been shown at all meetings, and according to Secretary Lynne, "we anticipate a royal time at our first trial, even if the old cock pheasants won't wait to be pointed; but I think they will in many instances, if handled properly, but that will remain to be seen."

Entries closed September 15th, and trials commence October 9th.

A drought has made Paradise valley as dry as the proverbial bone. Conditions are now such as have caused the Nevada field trials to be postponed until November 7th. Should there be no rains in the valley by October 15th the meeting will be declared off.

We hope that a favorable change may enable the Sagebrush sportsmen to hold their initial trials, for there has been much interest and enthusiasm shown by both Nevada and outside Coast sportsmen and a successful first meeting means much for the welfare of the sport in Nevada.

John Lucas was very unfortunate in having to, at the very last moment, cut out his trip to Whidby Island with a string of dogs for the Northwest trials. The last goodbyes and greetings had been said here in this city and everybody supposed that the Mt. View Kennels' string was off on the train—but dis-temper, that scourge of the young dog cropped up and it was all off with Munzie for the Washington field trials. Too bad!

A bench show here in December, 2nd to 5th, is now a settled fixture. The show will be given under the auspices of the Pacific Collie and Old English Sheep Dog Club, and will be held at the Mechanics' Pavilion in conjunction with the Oakland Poultry Association.

The Oakland "feather" fanciers will hold the first "chicken" show given in this city for a decade. For several years past, the California Collie Club has held a dog show at the same time and place (Oakland) as the annual poultry show.

The Oakland pavilion was recently torn down and there being no other suitable place across the bay, it was determined to hold the poultry exhibition in this city. A number of the fowl fanciers are also interested in doggy affairs, naturally the doggy fellows selected to erect their tents on this side of the bay, in the enthusiastic hope and reasonable expectation that the combined show will be the success and pass off on the same plane of pleasant associations and features such as have prevailed at their past Oakland shows.

We have heard some few expressions of criticism, tinged with disappointment, at this move. The intimation being that it was designed to impair the foothold of the local club and, in fact, finally supplant the A. K. C. on the Coast, and eventually must the parent kennel interests entirely.

This view, we are credibly informed, is entirely erroneous, the show here in December was prompted entirely by the conditions above stated and is the accident of time and change more than the creation of design.

The Pacific Collie and Old English Sheep Dog Club was organized this month in San Jose and is intended to be a Coast club, in distinction to a purely local specialty club. The officers are: P. W. Morse, of Santa Cruz, president; Chas. R. Harker, of San Jose, vice-president; Norman J. Stewart, of San Jose, secretary; O. J. Albee, J. C. Berrett, and Chas. R. Harker, bench show committee. There will also be a ladies' auxiliary committee. The club has started off with a showing of strength and a good list of membership. We will probably have more complete information next week, the organization having not been completed in several details at this writing.

The California Collie Club is still vigorous and has a large list of membership. The club's exhibit will be in evidence at the December show.

A kennel club is to be organized in San Jose within a fortnight.

Ch. Woodcote Wonder, never in better fettle nor looking finer since his arrival on the Coast nearly three years ago, was sent to Bonnybred Kennels, New York, a week ago yesterday. With the sturdy old champion went American Belle and two Woodcote Wonder—Newmarket Queen bitch puppies, Woodlawn Dorcas and Woodlawn Phyllis. Belle was in splendid shape and should prove a valuable brood bitch in Mr. Wackerman's kennels. The two young bitches had been placed out and reserved by John Bradshaw, for they were the most promising of any Wonder puppies he has yet seen—that they must have been good ones is evidenced by Wonder's sons and daughters that have been shown here and on the Coast, for they have beaten all of the Coast bred dogs as well as dogs from the East, and promise to hold their own for some time yet. Belle is, without doubt, the best bitch of her age on the Coast. Her departure is a distinct loss to the breeders and fanciers on the Coast.

The price paid Woodlawn Kennels was a good one, one report claims \$1500. Through this purchase Bonnybred Kennels have now the best stock of Bull Terriers in the United States or Canada. The recent importation of the best bred young stud dogs that could be procured on the other side, will possibly put the kennels in the lead in this country or England for Bull Terriers.

The purchase of Woodcote Wonder by the New York Kennels was in keeping with the spirit of enterprise they have shown from the start. They have some of Wonder's best sons and daughters and to be consistent put up a little bunch of money to keep the head of the family where he would be a star feature.

Wandee Kennels, according to the following press dispatch purchased the Fox Terrier Champion Raby Coastguard:

NEW YORK, September 17.—Fox Terrier enthusiasts will be surprised to hear that the famous English champion, Raby Coastguard, is destined for this country. Raby Coastguard has been purchased from George Raper by Mr. C. K. Harley of San Francisco, and will probably make his first appearance in this country at the Danbury show, the first week in October.

Mr. Harley, it is reputed, paid \$3,000 for him and offered \$5,000 for Raby Coastguard and Hellgart b Vilda, a champion bitch, also owned by Mr. Raper.

Beach Hills Kennels' Ch. Hanover Monarch is in demand, apparently. A bitch from Tacoma and two other bitches were sent to the San Jose dog last week.

A Borzoi kennel will soon be established by a San Jose fancier.

GOSSIP FOR SPORTSMEN

The deer season in the following counties will close on October 1st: Mendocino, Monterey, San Benito, San Mateo, Santa Clara and Santa Cruz.

Indications for good duck shooting this fall are assuring. Already the vanguard of the northern flight is noticed in bunches of birds flying about here and there to get the lay of the feeding grounds. Home birds have bred plentifully in the bay counties' marshes and the tule regions. The opening of the season in Oregon on the 1st inst. was commenced with a vigorous bombardment that has not at all abated. This will tend to send lots of ducks south sooner than they would come naturally.

Mrs. W. W. Van Arsdale recently bagged a spike buck whilst hunting near Fort Bragg. The head will be mounted as a souvenir of the lady's marksmanship and woodcraft.

Sea trout have been taken in plentiful numbers at various places along the Marin shores this week. The cove at the end of Belvedere island has been a favorite resort for salt water anglers. The fish are all of nice size and in fine condition. This fish is a handsome colored and beautifully spotted fish. It will take a red fly on a No. 4 to 6 hook and a spinning spoon as well as bait. With light tackle they will put up a lively fight. It is a bottom feeding fish; in quiet water, where there is not much current, one can get down with a light line and sinker.

Recent reports from Santa Clara county according to the San Jose Mercury state:

There has been a decided cessation in the cannonading of deer in the mountains during the past week, owing to the fact that attractions of the holidays and rush of work in the fruit orchards has kept sportsmen from going out in search of game. But now that the season is drawing to a close and hunting is better than at any time since the season for deer opened, there will be a general exodus of sportsmen to the hills during the next few days.

Only three more weeks remains of the open season for deer in this country, and many large parties are being made up to go out during the remaining days in search after big game. Many of the hunters are preparing to go over back of Mount Hamilton in the vicinity of Blackbird valley, where deer are very plentiful. Reports are that the deer are feeding on acorns, which are beginning to drop in great quantities, and that the big bucks can frequently be seen feeding during the day time. The running season is now beginning and the bucks are becoming restless and are running about over the country, making their easy marks for the sportsmen's rifles.

The big fires which have been raging in the mountains from Los Gatos south to Morgan Hill have been very detrimental to hunting. All the game has been driven back into the inaccessible canyons for shelter.

One of the largest deer of the season was bagged the other day a few miles below Sargents Station by Attorney Ed Rea of San Jose. The buck was a monster, weighing over 200 pounds. His antlers were the largest seen in this county for years, they having thirteen points, seven on one side and six on the other. The antlers were sent to San Francisco to be mounted. The lucky hunter returned to San Jose for more supplies and left almost immediately for the scene of his successful chase. S. F. Bernal killed a 165-pound buck a few miles below Kings City last week. He states that deer are very numerous in that section.

C. Avlia, an old and experienced hunter, who resides near Kings City, was in this city during the week and a large party of San Joseans are going to return with him for a couple of weeks' hunt. Avlia knows the Kings River country well and acts as guide to many hunters during the season.

P. G. Legue bagged a fat buck back of Mount Hamilton during the week. L. Maggini and C. Beffa have returned from an extensive trip through Calaveras and Tuolumne counties. They even went so far as Nevada during their outing. They report excellent hunting in the Sierras and especially on the Nevada side, where many deer are being killed by the Indians for their hides.

Fall Shooting Outfits.

Open season for ducks and quail is less than a month off—it's a short time, so get ready early. Skinner has some decoys, wooden and canvas pneumatic, that cannot be beat. Reeling built duck boats, to see one is to want it. Rain coats, hats and parts of a special tule color. The latest wrinkle in ammunition cases, leather or metallic. For upland shooting, he has the proper thing in comfortable clothing and footwear. See Skinner, 801 Market street, for a complete outfit for the shooting season.

The Passing of a Pioneer Sportsman.

Julius Francis Bekeart, veteran sportsman and as kindly hearted an old gentleman as we have ever met, passed to his final reward, in this city on September 4th.

Mr. Bekeart will be well and lovingly remembered by many sportsmen, for his little store on Fourth street near Howard was the Mecca, three decades ago, of about all the younger shooters and fishermen of this city.

There was no powder (black powder in those days) that could equal the brands he sold and his duck and quail shot was sworn by. He was the fidus achates of legions of youths when it came to repairing or purchasing firearms, for who could we get who so skillfully would repair the miscellaneous collection of modern and antique guns, pistols and rifles, such as were in vogue those days, and as for bargains in new guns and trades, we believed kind Providence had especially deputized the genial gunsmith to minister to our anxious desires, and he did. For this and his kindly hearted ways and his goodly advice on sporting topics, young and old loved "Old Man Bekeart."

He was born in London, England, in 1822. Coming to this country while a youth, he afterwards entered and served apprenticeship at gunmaking with Joseph Hall, a well known gunsmith of that time, on Long Island, New York. After learning the art he was engaged for a time at Iliou, New York, in the Remington gun works. This famous establishment at that time employed a force of seven men besides Mr. Remington, Sr., the latter, during Mr. Bekeart's engagement, used to grind the gun barrels. Subsequently, he went to Syracuse where he was employed by Rector, a rifle maker of renown. In 1844, Mr. Bekeart opened a gun and sporting goods business at 118 Fulton Street, New York.

When General Fremont's expedition was organized, Mr. Bekeart was engaged to accompany the Pathfinder and his sturdy men as the armorer of the enterprise. He was, however, stricken with fever and remained in Saint Jo, Mo., until he recovered. When he was on his feet again, being imbued with the spirit of adventure and enterprise, part of the virile Western atmosphere, he turned his footsteps southward, becoming, in fact, a journeyman gunsmith and rifle maker. While at Baton Rouge, he determined to espouse the cause of his adopted country and enlisted for service in the Mexican War under Col. Davis, Company A, 2nd Regiment. He served through the war bravely and with honor, and was in a number of battles and in different arduous campaigns.

After being mustered out he returned to New York and from there set out for this State in 1845, arriving in this city April 1st, 1849. From here he went to Embarcadero and Sutter's Fort, now Sacramento. From thence he went to Coloma, El Dorado county—this historic spot was where Sutter's mill was then located, where Marshall electrified the civilized world by his discovery of a shining nugget of gold in the mill race. Mr. Bekeart mined and conducted a gun store at Coloma and Placerville until 1865. After the placer mines petered out in that section he came back to San Francisco in 1865. He opened a gun store first on Fourth street subsequently removing to Third street near Folsom where he remained until he retired from business in 1890. His demise, the result of old age, took place at the residence of his son Phil B. Bekeart in this city.

Mr. Bekeart was a member of both the Mexican Veteran Society and the Society of California Pioneers. He was a good linguist, speaking Spanish, German and French fluently. For his service in the Mexican War he received the usual amount of land scrip. The land which this particular scrip called for was located in Indiana, this section is now in the heart of the city of Indianapolis and worth millions of dollars. The original scrip was sold by Mr. Bekeart to a broker in New York for a trifling sum.

The announcement that the Marysville Gun Club would hold a big blue rock tournament in that city on Sunday, October 11, 1903, had the effect of bringing a number of shooters before the traps Sunday afternoon and excellent scores were made. A meeting of the club was held on the 13th inst and arrangements for the big shoot will soon be perfected.

The following scores were made Sunday: J. L. Hare 10, A. Woodworth 9, Ed Heisch 9, C. Lipp 9, Herman Berg 8, W. Bedesau 8, F. S. Marshall 8, G. Peacock 7, J. S. Collins 7, Dr. Smith 7.

SALES.

The Beach Hill Kennels (San Jose) have sold a sable and white Collie bitch puppy (Spartan Westridge Star) to W. D. Rutherford (San Jose) September 14, 1903.

VISITS.

Beach Hill Kennels' sable and white Collie bitch Pensarn Ora (Imp. Pensarn Guard-Shadeland Daisy) to same owner's Ch. Hanover Monarch (Ch. Ellwyn Astrologer-Ch. Old Hall Moon) September 3, 1903.

Geo. N. Bentley's (Sacramento) sable and white Collie bitch New Mexico Flora 55961 (Snowball II-Shadeland Lillie) to Beach Hill Kennels' Ch. Hanover Monarch (Ch. Ellwyn Astrologer-Ch. Old Hall Moon) September 11, 1903.

Something for Nothing.

The Polk Miller Drug Co., of Richmond, Va., are manufacturers of Sergeant's Dog Remedies, the most popular line of preparations, intended for dogs, on the market today, having received the highest endorsements of the leading dog men and kennel owners in this country and Canada. Read their advertisements appearing in the columns of our journal each issue. The firm referred to will mail you absolutely free, a copy of their celebrated book on Dogs if you will forward 3 cents to cover postage. If your dog is sick, write them, enclosing stamp, and describe the symptoms as accurately as you can. They will cheerfully furnish the best information on the subject without charge. F. W. Braun & Co., of Los Angeles, California, have recently been made distributing agents for Sergeant's Dog Remedies on the Pacific Coast.

THE FARM.

Live Stock Notes.

Pumpkins make good feed for all kind of stock.

Fattening stock should be fed often. Do not feed more than they will eat up clean.

Sow rape in mid-July. It will be available for fall pasture, and is excellent for sheep.

Oats and bran make a better feed for horses at work than corn, during the hot weather.

Corn as a food for hogs is all right. Do not use it exclusively. Use judgment in feeding.

Well-oiled machinery and wagons is a kindness to the team and an economy to the owner.

Ashes, in which there is a liberal supply of charcoal and salt, should be kept where hogs can get it.

If you succeed in raising stock you will have to provide better shelter than a hard wire fence.

Feed skim milk to hogs. It will give them strong bone and a good foundation for development.

As population increases in density the steer as a food producer disappears and the cow increases in number.

Every farm has room for a few sheep. They will materially improve your pasture as no other animal can.

Young pigs should not be stunted by short feed and dry pastures. It takes a long time for them to get over it.

Skeletons of famous horses mounted on frames are to be included in the exhibit of Kentucky at the World's Fair.

Good feeding means all the stock will eat without waste or loss of appetite. It takes close watching to accomplish this.

Horses that are to be fattened should be taught to take water before the morning meal. In fattening, water has an important part.

Brood sows of desirable qualities should be kept for several years, and two of these qualities should be a quiet disposition and good milking qualities.

The highest priced carload of work horses ever sold on the Chicago market were produced by a combination of Shire and Percheron blood. The most perfect carriage horse was a cross between a French Coach and trotting blood.

Young pigs make rapid growth on a ration of skim milk fed in one-third corn meal and two-thirds wheat middlings. Let them run on a clover pasture, if you have one.

Trotting horses are sold higher in the United States than in any other country. The time in which the horse can make a given distance offsets everything else. Speed is valued above beauty.

If selection could be made, a brood sow should be the fairest of a good litter from a good sow. When she farrows she should be careful of her pigs, a good nurse, and should have brought a fair number.

Clipping the long hair from horses is practiced to add to their appearance and comfort. A sheared horse needs a blanket for a while after he has thus been robbed of his coat, if the weather is cold.

Corn or corn meal, if fed in large quantities, is too fattening for growing stock. Bran and oats are better.

Sows which prove profitable should be kept for several years. Not every female hog makes a good mother.

The colt should be taught to stay at home. It is a source of annoyance to both man and colt when the colt is allowed to follow the mare four or five miles to town and back. You can easily teach it to stay at home.

Probably it is more profitable to breed good draft horses than any other kind. There is always ready sale for them at a good price. Heavy horses require no more time, nor feed, than inferior weights.

There is a movement among Eastern horsemen to encourage the long jump at fairs, instead of the high jump. It would require some new conditions in the way of trackage for starting and lighting. But these will be easy to meet. It is predicted that thirty-six feet, or more, will be attained.

Every word used in the handling of horses should have a meaning, and one of the first things to do in training a horse is to teach him the meaning of each word.

Vita Oil

The Great California Liniment.

For Lameness, Soreness and Deep-seated Pain; good for man or horse; used by every prominent horseman on the race tracks because it's the best—money can buy.

COCOANUT OIL CAKE

THE BEST FEED FOR STOCK, CHICKENS AND PIGS FOR SALE IN LOTS TO SUIT BY EL DORADO LINSEED OIL WORKS CO. 208 California Street, San Francisco, Cal.

used while working him; and the next thing is to make him obey each word to the fullest extent.

As a rule the object of the general farmer should be to raise, as far as possible, everything that his family and his live stock will eat, and have a surplus of that product that can be most readily marketed and yet will take the least quantity of fertilizing elements from his soil. In this way he reduces his outlay to a minimum and gives himself an opportunity to realize on a variety of products.

Dairymen are becoming more particular in selecting their cows. One says: "When possible I find animals that are able to make a record of 20 pounds of butter, or more, in seven days. They

probably will produce daughters that will make a 20-pound record, or better, in the same time. In selecting my dairy herd I have spent three or four days looking over 200 different cows."

Chicken Chatter.

The best perch is flat. Sell your surplus cockerels. Dry feed is best for little chicks. Narrow perches cause deformed birds. Give salt to the poultry, but put it in the mash.

See that the chickens have daily some kind of green food.

It is the pullets that do the fall and early winter laying.

After a rain is the time to scatter lime around the poultry-yards.

Third Payment \$5.00 EACH

DUE AND MUST BE PAID BY THURSDAY, OCTOBER 1, 1903, on entries in the Pacific Breeders Futurity Stakes No. 3, \$6000, for get of mares covered 1902, foals of 1903. Stake closed December 1, 1902.

DON'T FAIL TO MAKE IT!

Remember the substitution clause: Should your mare have proved barren, or had a dead foal, you can sell your nomination at any time up to April 1, 1904, in case you have nothing to substitute.

DON'T FORFEIT, BUT PAY UP.

F. W. KELLEY, Sec'y. 36 Geary St., S. F.

"SAVE-THE-HORSE" SPAVIN CURE.

It isn't words, it isn't type or page advertisements; it is the truths that ring out sound and clear and impressive—actual results from business men whose standing and reliability can be readily ascertained—which have made "Save-the-Horse" such a success. Their cured horses are living advertisements, absolute certainties as to the possibility of the remedy in your own case, and with every bottle is a guarantee document as binding to protect you as the best legal talent could make it.

The fire iron is uncertain and invariably only aggravates the disease or injury; blistering is less effective than the fire iron, and both necessitate laying up the horse from four weeks to several months. Mercurial and poisonous compounds produce irreparable injury.

"Save-the-Horse" eliminates all these factors; Cures without scar, bluish or loss of hair, can be applied at any time, anywhere, any place, and in all conditions and extremes of weather. Horses may be worked as usual with shin or ankle boots, as no harm can result from destruction of hair or scalding of limb.

Positively and Permanently Cures Bone and Bog Spavin, Thoroughpin, Ringbone (except low ringbone), Curb, Splint, Capped Hock, Windpuff, Shoe Boli, weak and Sprained Tendons and all Lameness.

\$5.00 per Bottle. Written guarantee with every bottle given under our seal and signature, constructed solely to satisfy and protect you fully. Need of second bottle is almost improbable, except in rarest of cases. Send for booklet and copy of guarantee. If your case is different than described in our booklet or advertising we will advise you frankly as to the possibility of the remedy effecting a cure. Give explicit particulars. Give the veterinarian's diagnosis, if he is competent. Inform us fully as to the age, development, location of swelling, lameness, previous treatment and describe the way the horse carries and holds legs. \$5.00 per bottle at all druggists and dealers, or sent express prepaid.

TROY CHEMICAL CO., TROY, N. Y., also Manufacturers of Veterinary Pixine.

VETERINARY PIXINE CURES

Grease Heel, Scratches and Hoof Rot,—chronic, ulcerated, complicated—of the most deep seated character; Cracked or chapped teats, caked bag, cow pox and all inflammatory affections of the udder; Saddle and Collar Galls, Hopple Chafes, and Abscesses, Old chronic Sores, the result of pressure by badly fitting harness or by irritating masses of dirt, sweat and hair under the harness. It makes a positive and permanent cure by producing healthy granulations, building up new cellular tissues, healing naturally from the bottom without scab or scar and stimulating growth of hair, natural color. It penetrates, soothes and heals while horse works.

Absolutely Guaranteed. Money back if it fails.

2 oz. 25c; 8oz. 50c; 5lb. pkg. \$4.00.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

QUINN'S OINTMENT FOR HORSES

stands at the head of all veterinary remedies. Such troubles as Spavins, Curbs, Windpuffs, Splints, Bunches have no terrors for a horse if the master keeps and applies Quinn's Ointment. All well known horsemen speak of it in the highest terms:

Miller & Sibley of Franklin, Pa., owners of St. Bel, brother of late Bel Boy, write, "We have used Quinn's Ointment with great success and believe it fulfills all claimed for it. We cheerfully recommend it to our friends." For Curbs, Splints, Spavins or Bunches it has no equal.

Price \$1.00 per package. Sold by all druggists, or sent by mail.

CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL. For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1907 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY. It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

WINCHESTER "LEADER" SHELLS LEAD

At the Third Annual Target Tournament of the Dominion of Canada Trap Shooting and Game Protective Association, held in Toronto, August 12th to 15th, inclusive, winnings were made as follows:

- 1st Day: High average for day by Mr. Higginson of Buckingham, Onehec.
- 2d Day: Two Men Team Championship of Canada, 20 targets per man, won by Messrs. McGill and Wakefield of Toronto, with score of 37. High average for day won by F. Westbrook of Brantford.
- 3d Day: Parker Gun won by J. Hovey of Clinton, who also won high average.
- 4th Day: Grand Canadian Handicap, 100 targets, won by Mr. Craig of Sherbrooke, with a score of 93.

"Mall Trophy," the most important trap shooting trophy in Canada, emblematic of Five Man Team Championship of Canada, won by Brantford Gun Club Team, with score of 222 out of 250.

The Montreal Rolling Mills Company Cnp, emblematic of Individual Championship of Canada, won by Mr. Bain of Winnipeg, with a score of 48 out of 50 targets.

High average for the day—"Beresford Cigar" Cup—won by Mr. Hovey.

All these splendid victories were won with Winchester "Leader" Shells, and are a forcible testimony to the uniformity of these goods.

San Francisco, Saturday, Sept. 26, 1903.

THE YEAR ALL RECORDS WERE BROKEN is the manner in which 1903 will be alluded to by future historians of the harness horse. One picks up his morning paper now and as the news is glanced over is almost disappointed unless the telegraph has reported a lowering of some one of the champion records. The world's pacing record was reduced this year to 1:59 by Dan Patch, then came Lou Dillon who trotted a mile in two minutes "while all the world wondered," then Cresceus lowered the half mile track trotting record to 2:08, Mr. Billings drove The Monk and Equity a mile in 2:09½, lowering the team trotting record two and a half seconds, Major Delmar made the eyes of horsemen "bug out" by trotting a mile in 2:00½, the world's gelding record and only a quarter of a second behind Lou Dillon's championship mark, the handsome mare Dariel paced a mile in a race in 2:03½ lowering the world's record for mares, and now comes Prince Alert, hero of many a bard fought race, and though eleven years old, caps the climax of all pacing records with a mile in 1:57 at Empire City Track last Wednesday. It is a wonderful year for the light harness horse and this performance by Prince Alert must stand alongside the two minute mile of Lou Dillon's as the two most marvelous feats of a year of marvels. Prince Alert was foaled in 1892. He started out fast and has kept in that course ever since. He was first introduced to the track as a three year old and started three times that year. His first race was at Shelbyville, Indiana, Sept. 4, 1895, where he won a five heat race. The purse was a paltry \$150 for 2:30 class pacers. A horse called Billy W. won the first heat in 2:30, and Billy Lincoln took the second heat in 2:23½. Then the three year old Prince Alert won three heats and the race in 2:26½, 2:24½ and 2:26½. He then went to Indianapolis and started for a purse of \$500 offered for three year olds of the 2:25 class. Here he met hot company. The race was another five heat affair. Argoreat, that afterwards took a record of 2:09½, won the first heat in 2:15½. Prince Alert got the next one in 2:17½ and Cavatina the next in 2:15½. Argoreat won the next two in 2:21½ and 2:25½, and Prince Alert was a good second in the last heat. He made one more start that year. It was at Richmond, Indiana, and there were four heats to the race. He won the fastest heat of the race, the second, in 2:15½, but the other three heats went to Bessie Lulu, whose mark of 2:18½ made in the first heat is still her best record. Prince Alert did not start as a four year old, but the following year made a big campaign, won many races and earned a five year old record of 2:07½. He knocked a half second off this the following year when he was again extensively and successfully campaigned. He has been on the circuit every year since. In 1899 he reduced his record to 2:05½ and won many races. In 1900 he still further lowered his mark to 2:02, and began to be talked about as a coming two minute pacer. He closed the season of 1901 with a record of 2:00½, and in 1902 knocked the fraction off this and put 2:00 opposite his name in the year book and had nothing but the 1:59½ of Star Pointer and the 1:59½ of Dan Patch between him and the championship. This year Dan Patch, the mighty, knocked the fraction off his record and took the champion's crown but was destined to retain it but a short time. The reduction of full two seconds in the record by Prince Alert is such an astounding performance that none but a wild enthusiast would predict that the son of old Joe Patchen can regain the champion laurel. Prince Alert is another of the short bred champions, and his breeding recalls the story of the young fellow who remarked after a couple of hours spent in turning over the leaves of the Year Book: "That old mare 'Untraced' was a wonderful producer." Prince Alert was sired by Crown Prince, a non standard horse, and is out of Till, a mare whose pedigree is untraced. Crown Prince has but one

other standard performer—the pacing mare Julia S. 2:16½. The sire of Crown Prince was Artemas 1793, a representative of the Hambletonian-American Star cross, as he was by Hambletonian 10 out of old Dolly Mills by American Star 14, dam of Orange Girl 2:20. Dolly Mills has four producing sons and her daughters have produced seven with standard records. Artemas sired 20 in the list, and nine of his sons and seven of his daughters have produced. The dam of Crown Prince is by Young Proud American a non standard horse that is said to have a large proportion of thoroughbred blood in his veins. As the dam of Artemas traces to imported Diomed, the "hot blood" in the veins of Prince Alert is conspicuous as it is in every great record breaker.

A BIG CROWD will be in the iron pavilion at Fred H. Chase & Co.'s salesyard, 1732 Market street, this city, next Tuesday evening, when the horses from the Meek Estate and Hon. Jesse D. Carr's Gabilan Stock Farm are to be sold. Buyers recognize that this is one of the best opportunities to get good ones that has been offered for years. Horses that are bred right, have size and good looks, and are thoroughly broken, one cannot lose on. They are profitable property to own. Horses that are well broke are in demand and the demand is increasing. Good mares will increase in value for the next five years. Three and four year olds are being used for work at the present time in San Francisco, New York and Chicago. Three years ago horses of that age could not be sold to city expressmen and teamsters. Now is the time to buy. Good road horses are in lively demand at present. The breeders of standard bred horses are the only ones that can supply this demand. If you want a prospective trotter, or a good serviceable animal that you can hitch to your buggy and use every day, attend this sale. The horses sold are guaranteed to be just as represented. They will be at the salesyard to-morrow, and Sunday will be an excellent time to look them over. Don't miss this sale if you want horses that will be worth more than you have to pay for them.

THE BELLE MEADE DISPERSAL is the talk of thoroughbred breeders all over the world. As an Eastern journal says: "Belle Meade for nearly a century occupied one of the prominent places in the great history of the great American thoroughbred. A magnificent property of about 3500 acres, comprising some of the best land for breeding purposes even in that unrivalled section, and although, as in every other case the great Civil war played havoc with its development, its record from 1870 to 1890 shows a total of \$2,000,000 won by its produce in stakes and purses, while 1891 one hundred and twenty-five racing thoroughbreds from its meadows won \$300,000 in four hundred and fifty races. The year of 1892 was practically along the same lines, and since then it has been exceedingly productive of winning stock, sending each year a heavy of magnificent colts and fillies to the yearling sales. In 1878 to 1890 inclusive, the get of Enquirer alone accounted for a winning total of \$465,000. From 1875 to 1892 there were 695 foals sold realizing \$600,000 and over seventy per cent of these won races." All the stallions and broodmares of this great farm are to be sold by the Fasig-Tipton Company at Sheepshead Bay, New York, October 13th and 14th. The advertisement occupying all of the opposite page will give the particulars.

THE EIGHTH National Stallion Stake offered by the Westchester Racing Association, to be run for by then two-year-olds during the spring meeting of 1905, will close for entry of stallions on the first day of October, which falls on Thursday next. Every owner of a thoroughbred stallion should see that his horse is named in this stake. The subscription for stallions is \$50 each, or only \$25 for stallions which have not sired a winner prior to December 15th, this year. The Westchester association adds \$5000 to this stake, which will be worth anywhere from \$30,000 to \$50,000. Read the conditions of this great stake in our advertising columns.

DON'T FORGET IT. We mean that third payment on entries in the Pacific Breeders Futurity Stake No. 3, worth \$6000, for foals of this year. This payment is due and must be paid by Thursday, October 1st. Five dollars is the payment on each entry. You have the right of substitution according to the conditions of the stake up to the first of next April. That is, if you are paid up. If you fail to make the third payment October 1st, you will lose all chance of winning any part of that \$6000.

Three handsome large stallions by Prince Airlie, son of Guy Wilkes are offered for sale. They are all well bred and ready to earn money in the stud in the spring. See advertisement.

The Los Angeles Outlook.

Ralph H. Tozer, the well known authority and writer on thoroughbred topics arrived in San Francisco this week from Chicago, and will leave on the first of October for Los Angeles where he will act as Clerk of the Scales and Associate Judge during the meeting to be given by the Los Angeles Racing Association which will open October 10th. In speaking of this meeting Mr. Tozer said:

"The coming nineteen day meeting at the Los Angeles Fair grounds bids fair to prove the best, from a racing standpoint, ever given at that time-honored course. The speediest light harness horses on the Coast are gathering to do battle in the southern metropolis, while there will be by far the best aggregation of gallopers ever seen at any fair meeting in this part of the world, and that is saying not a little, for there have been many high class meetings at Los Angeles and Sacramento in the past fifteen or twenty years. Six carloads of horses with winning ways are now bound westward from Chicago, with Los Angeles as their destination, they being the property of E. J. Baldwin, C. T. Henshall, Charles Sanders, Joseph Cooper, James Curl, James Woods, J. H. McHugh, A. E. Linnell, Lester Reiff, and last, not least, Barney Schreiber, who sends a carload. With the 300 horses racing on the California circuit, there will be close to 400 thoroughbreds ready to run to their best notch. Mr. Henshall is a new comer to the Coast. He owns three good ones in imp. Martinmas, Huntressa and Ernshee, while the consistent gray horse, Callant, will probably sport his colors. Joe Cooper has Warte Nicht, a colt which has developed wonderfully in Chicago until he was considered a handicap animal close to the top of the three year old list. Mr. Curl, among others, brings out the high classed Bragg, while in the Baldwin stable is Cruzados, Americano and Atlantico. It is quite among the possibilities that Charles T. Boots will race Instructor and others of his string at the fair meeting and later on at the Ascot Park meet.

"Speaking of Ascot Park reminds one that this is to be the finest and widest race course west of New York and that it will be the most thoroughly equipped racing plant on this side of the Alleghenies as well. A. M. Allen, who built the Ingleside, Oakland and Tanforan courses, is making the Ascot Park tracks, as well as the grand stand, betting ring, paddock and offices, and it is extremely doubtful if Mr. Allen has an equal at this sort of work in all the world. There will be a three-furlong "chute" to start the baby racers out of, a six and one-half furlong "chute" as well and one of the finest steeplechase courses to be found anywhere. The purses will range from \$300 and \$350 for the cheap sprinters to \$400 and \$600 for the horses of good class, while the stakes have from \$1500 to \$3000 in added money, making the winners' share anywhere from \$2,200 to \$5,000. Five electric lines come to the gates, while a sixth passes close at hand. With a climate for winter racing unequalled on the globe, with about one-fifth the number of rainy days during a season had by San Francisco, that Los Angeles is destined to be the greatest winter racing resort in the world can not be doubted by anyone giving the matter a moment's thought. "The southern metropolis will average 50,000 visitors in the winter time, and as fully one-half of these are people of wealth in search of recreation and pleasure, it can easily be seen that the average daily attendance should be at least 4,000, and the class of horses that will be on hand when the inaugural hell rings will insure sport of the best character."

Fair at Eureka.

A fair and race meeting was held at Eureka, Humboldt county, last week, which was one of the best attended ever given in that thriving city. The pavilion was crowded every evening, and there were large crowds at the track every day. Mr. Geo. W. Kingsbury, proprietor of the Lick House in San Francisco, attended the fair and acted as Presiding Judge at the races. Several little jobs were nipped in the bud and Mr. Kingsbury's decisions gave eminent satisfaction. There were five harness races, mostly mixed events.

The 2:40 trot was won by Dewey, after Robert G. had taken a heat. The time was 2:46, 2:41, 2:42½.

A race for both trotters and pacers was won by Seven Oaks. The three year old colt Young Monterey took the second heat of this race in 2:24½, the fastest heat of the race.

Armeda won the two year old event, best time 2:58. Cassiar won the first heat of the 2:25 trot or pace in 2:26, after which Patricia took the next three in 2:29, 2:29, and 2:27.

The free for all pace on the last day was a hot race. The starters were Fredericksburg 2:12½, Banker's Daughter 2:13½, Nelly R. and Jack. The first named was favorite and won the first and second heats in 2:17 and 2:18. Nelly R. won the next three heats in 2:19, 2:19 and 2:21. In the third heat Banker's Daughter finished in front, but was set back by the judges to last position on account of a foul.

In hot weather there is no drink like Jackson's Napa Soda—plain or fn a lemonade.

JOTTINGS.

THE BEST TROTTER that has come out of the green class on the Pacific Coast this year is undoubtedly the hay gelding George G. that J. R. Albertson of Fresno won the California \$2000 stake with at the Breeders meeting at Petaluma. The photo engraving of the horse which appears on our front page this week is an excellent likeness of this unsexed son of Homeward 2:13½. George G. would not be called a handsome horse, neither is he one of the raw-boned angular kind that comes under the head of homely trotters. He is simply plain in his appearance, and one that would be passed by at a fair or horse show with the remark "There is one that can probably go all day but is not very stylish." He is a hay in color, with both hind legs white nearly half way to the hocks. He has an intelligent eye and a nice head, and shoulders that excite the admiration of everyone. He is high in the withers, and his neck is like a thoroughbred's. Many horses are deeper through the heart perpendicularly but his girth is greater than one would guess. No horse ever had a cleaner or better set of legs under him and he stands so straight or them that it was difficult to get him in a pose where they would be far enough apart to look well in a picture. His hind legs are models and have none of the "sickle" conformation that is so often seen on fast trotters. His hips are not round and smooth but a little drooped and angular. There is no surplus flesh on them at the present time however. When he is out of training and carrying more weight, his looks will probably improve considerably. George G. has a splendid set of feet under him and is an easy horse kept in condition. He is five years old, having been foaled in 1898. He was taken up last January for the first time and was not a very promising trotter at first, but was a steady improver and is now one of the fastest trotters ever seen in California. George G. was bred by the late Frank Wickersham of Fresno and was sired by Homeward 2:13½. His dam is a mare called Mabel by Junio. A short tabulation of his pedigree will best show his blood lines:

GEORGE G.	Homeward 2:13½	{	Steinway 2:25¼
			Countess by Hambletonian 2:25
	Ida May.....	{	Grosvenor 1833
			Susie K. by Alaric
	Mabel.....	{	Electioneer 125
			Nelly by Grauger
Daughter of.....	{	El Capitán 18396	
		Deerface by Nordale	

The fourth dam of George G. was the Selby Mare, dam of Maude 2:20. She was owned by the late John Layng, father of William G. Layng, former editor of the BREEDER AND SPORTSMAN. Nordale was a son of Norfolk out of Blue Dale by Owen Dale, son of Williamson's Belmont.

There is the blood of Strathmore, Electioneer, Nutwood and thoroughbred in this pedigree and a large proportion of developed ancestors.

The first appearance of George G. on the circuit was at Vallejo where he was one of the eleven starters in the 2:23 trot for \$1000. Deputy took the first heat in 2:15½ and Dr. Hammond the next three. George G. finished tenth in the first heat, eighth in the second, fifth in the third and fourth in the last heat. The next start was in the \$2000 stake at Petaluma. This was also a big field of horses, but Albertson had reason to believe that George G. was a race horse and sent him out for the money from the first. He won the first heat in 2:14. In the second heat he made a break just after getting away and the heat went to Deputy in 2:13½. George G. won the next heat handily in 2:12½, and repeated in the same time.

At the State Fair he was started in two races during the first week. On September 1st he won the Green Class trot in straight heats in 2:15, 2:16 and 2:18. Deputy being second. September 4th he won the 2:24 class trot, again in straight heats, the time being 2:16½, 2:15½ and 2:16½. In this race he beat Jupiter B., Rosie Woodhurn, Deputy, Sutter and others. Both these events were easy for him. On Thursday the second week of the fair Mr. Albertson gave George G. a workout. The track was good where the harness horses went, but was harrowed deep at least twelve feet from the pole, so that the horse had to go a very long mile. After a couple of slow heats, Albertson drove George G. a mile in 2:10½ coming the last half in 1:03½ and the last quarter in 31½ seconds. There were a dozen watches held on him and all the horsemen present expressed the opinion that the mile would have been better than 2:10 had it been possible to have driven him closer to the pole. It was in the fourth heat of this workout, however,

that George G. made the marvelous hurst of speed that set all the horsemen talking. Albertson drove him to the three-quarters at a 2:30 gait and then let him step home. He covered the distance in 2¾ seconds, and three or four watches made the time a fraction better. There is little doubt that this gelding has as great a flight of speed as any trotter in training. His action forward is not excessive, but straight and quick. Behind he has a very deceptive gait. He does not reach out with his hind feet like most record breakers, and one would guess his stride as much shorter than that of Lou Dillon, Monte Carlo or any of the fast trotters that have been trained on California tracks in recent years. In all his races and workouts George G. has never shown any evidences of distress, and Mr. Albertson believes he has in him a high-class racehorse. The gelding is owned by Mr. Gus Candrau of Sanger, Fresno county, who has leased him to Mr. Albertson for two years. The horse will be wintered at Pleasanton together with several other promising young horses, and Mr. Albertson expects to race him through the East next year.

The Golden Gate Race meeting opened at the Emeryville track last Saturday and came to a close the same evening. Such a false pretense meeting should never have been begun and it is a matter for congratulation that it "died a bornin." Thanks are due President Thos. H. Williams of the New California Jockey Club for the suppression of the meeting. He would not permit the meeting to be held unless there was an open hetting ring and harness racing each day. The latter requirement was easily complied with by the syndicate of hookmakers that conducted the affair. A purse of \$150 was to be hung up each day for a harness race, entries to close over night. The first day four starters appeared for this lone harness feature, whose drivers agreed before making their entries to cut the purse up into four equal parts, giving them \$37.50 each. The hookmakers were careful to lay no odds against any horse in this race, and the four pacers went round the track twice and retired. The majority of the crowd present paid but little attention to this farcical curtain raiser. A good work-out would have excited much more interest.

The requirement that open hooking be allowed was the one that caused the meeting to end so abruptly. The syndicate had four hooks on, and four outsiders appeared and asked the privilege of "cutting in." Secretary Treat of the New California Jockey Club was present to see that they were not denied this privilege. His ultimatum to the hookmakers who managed the Golden Gate Race Meeting was to permit any reputable layer of odds to cut in or give up the track. So the four outsiders paid their \$10 a race and the meeting went on for the afternoon, but when the last race was run the announcement was made that it was over.

The harness racing circuit in California this year was the poorest ever seen on the Coast since a circuit was first organized. There was one really good meeting, that of the Breeders Association at Petaluma, and every owner and trainer who participated in it has since spoken in terms of praise of the racing given there during the last week in August. There were good fields, good contests and a good attendance. No hooks laid odds, but the popular old system of auction pools and mutuals provided means for those who wanted to speculate on the races. And the meeting paid a profit. Not a large one, of course, but the receipts were somewhat larger than the expenditures and a large amount of money was distributed among the horsemen.

The same state of affairs prevailed at the Oregon State Fair this year. Bookmakers were harred and the only means of hetting was by auction pools and mutuals. There were two harness and three running events each day. The fair was a great success and money maker. If the Breeders Association and the Oregon State Fair can give a program of racing without hooks, why cannot the California State Fair and the district associations do the same thing? There is nothing that has done so much to make the California State Fair so unpopular as syndicate hookmaking and a program that puts the harness horses on the outside of the track and gives the larger part of the afternoon's sport over to the runners. Had the racing program this year been limited to not over seven days, with two harness events and three running races each day, and the hetting limited to the auction and the mutual systems the racing end of the California State Fair would have not only been a success from a racing standpoint but would have in all probability been a greater success financially.

The smashing of records that has been going on this year on the Grand Circuit has undoubtedly

aroused a renewed interest in the breeding and training of trotters and pacers, and though the year has been a most successful one financially for associations and winning owners, next year promises to be even better. While we have had no circuit to speak of out here in California, nearly every man one meets is talking horse, and twice as many horses will be in training next spring as were handled on the California tracks this year. Pleasanton as usual will be the horse centre. Stalls have already been engaged there by over a dozen trainers and at least twenty more have made application for room for their horses. Thirty new stalls were recently completed by Mr. Thos. Roman, owner of the property, and it is probable that fifty or sixty more will have to be put up to fill the demand. San Jose and Santa Rosa are also talked about very favorably by some of the leading horsemen and it is said both places will have some of the crackerjack strings. Nearly every trainer one meets at the present time has his eyes turned wistfully eastward and vows he will go there to race next season if he has any sort of string by the time entries for the big stakes close. If, however, a movement that is now under way comes to anything, there will be so many announcements of California meetings made by February 1st, next year, that most of the California trainers will conclude the home circuit is worth racing on, and the eastern hegira will be confined to a few strings containing material worth paying entrances on in the big stakes and purses.

The movement toward the formation of a harness circuit in California that has been talked about recently is not all talk. The plan is to get five or six of the principal tracks to become members and announce programs not later than February 1st. Purses and stakes will range from \$500 to \$2000. A circuit of this magnitude, in addition to the Breeders meeting and the State Fair will make training worth while once more in California. And there will be no syndicate hookmaking on this circuit.

The *Western Horseman* says: Another son of Beautiful Bells has joined the list of stallions that are sires of 2:10 race trotters. Adhell, yearling record of 2:23½, is represented by Rowellan 2:09½, a winner at Providence. Adhell was one of the younger sons of Beautiful Bells, and was sired by the Indlaoa stallion, Advertiser 2:15½, son of Electioneer. Other mares may become the dams of ten 2:30 trotters; one mare has already equaled the record of Beautiful Bells so far as numbers of standard performers are concerned, but it will be many a long year before any other mare with ten in the list is represented by as many sons who are the sires of extreme speed. Beautiful Bells is certainly in a class to herself. She is the only mare in the world that is the dam of ten 2:30 trotters. She is the dam of the world's champion trotting yearling, Adhell 2:23½. She is the dam of Chimes, with more trotters in the 2:06 list than any sire, living or dead. Eight of her sons are sires of speed; four of them sires of 2:10 performers. Several of her grandsons are sires of 2:10 performers, and three at least of her granddaughters are dams of 2:10 performers. Ten 2:30 trotters should be glory sufficient for one mare, but when the other features are added it may be clearly seen that Beautiful Bells, by The Moor, is far and away the greatest broodmare known to students of harness horse statistics.

A curious complication has arisen in connection with the Matron Futurity opened by the Terre Haute Trotting Association some years ago. When this association, so the story is told, decided to give no more trotting meetings but to change over to a fair with running races and so forth, it declared the futurity off and refunded money. An Iowan, Noah Woods, Waterloo, declined to receive his check and notified the association that he would be on hand with his colt ready for the word. This he did, presented himself in the stand and demanded to be given the word. The judges told him they were engaged with running races, so the Iowan told his driver to score down, gave the word himself and took the time. Now he says he will bring suit for the money, probably about \$700, the officials having no right to declare off the stake without the consent of all concerned.

A curious story attaches to the trotting mare Fanella and her produce Todd and Sadie Mac. Fanella was hogotten at the time her sire, Arion 2:07½, stood at a fee of \$2500. The mare was later sold at auction for \$525. At that time she had at foot the colt Todd, by Bingen 2:06½, and had been bred to Peter the Great 2:07½. Todd as a two year old showed a mile in public in just a fraction slower than 2:20 and was sold for \$4000, his purchaser refusing, it is said, \$17,000 for him. The mare foaled to the service of Peter the Great the filly Sadie Mac, which is the fastest three year old seen out this season and which now has a mark of 2:11½. Sadie also brought \$4000 and the original purchaser still owns Fanella. As she did not get with foal this spring she was put in training and recently took a record of 2:13.

The Kenney Bicycle Co., 531 Valencia St., is doing a big business in the McMurray Carts and Sulky. You not only save money by purchasing a McMurray but get the most durable, best made, and easiest running cart or sulky in the market. Investigation will convince a Missourian.

Jackson's Napa Soda untangles the feet.

THE SALEM MEETING.

Tremendous Crowds Witness Racing at Oregon State Capital.

[FROM OUR SPECIAL CORRESPONDENT]

SALEM, OR., Sept. 14, 1903.—The annual State fair and race meeting commenced to-day. The purse list aggregates \$15,000 in purses, of which the major portion is given to the harness races. The Greater Salem Stakes for 2:17 pacers and the Lewis & Clark Stakes for 2:20 trotters are the leading events of the program. Each is for the respectable purse of \$2000. The liberality displayed has been amply rewarded by liberal entries from California, Montana, Colorado, Idaho, and other States. The track was never in better condition, and when the bell sounded for the 2:20 pace, the opening event of the meeting, there was a larger crowd present than ever before on opening day.

The judges were Robert Leighton, who also acted as starter in the harness races, and Messrs. Westgate and Redmond. The timers' stand was occupied by Messrs. Kiger, Tongue and Durbin.

In the first heat Highhall was somewhat unsteady, four scores being necessary ere they got the word. However, when they did go, Highhall made the pace to the half, where Rockford broke badly. Here Christabel moved up in front and a battle royal between Mr. Clark's mare and Highhall ensued until the latter left his feet. Christabel won by a length from Harry Hurst, who closed very strongly, in the good time of 2:11.

In the second heat Christabel and Hurst went to the half as a team. Here the mare broke badly and Highhall, who was pacing perfectly, moved to the front and was never headed, eventually winning, pulling up, in 2:12.

The third heat was a jog for Highhall, Christabel being hopelessly tired and only just saving her distance. Time, 2:13.

The 2:25 trot had five starters and was productive of two sensational finishes between Helen Norte and Swift B. The heats in 2:17 and 2:17 1/2 were two seconds faster than three-year-olds had ever before trotted here. Every excuse must be made for Swift B., as he was only just off the cars, and in both heats he went like a racehorse. He was admirably driven by Willard Zibbell, whose initial effort it was behind the colt. The summaries:

Pacing, 2:20 class, purse \$500. Highball by Silkwood (Jas. Sandford) 5 1 1 Christabel by Charles Derby (Hayes) 1 3 4 Harry Hurst by Delwin (J. Green) 2 2 2 Polka Dot by Mendocino (J. Silva) 4 4 3 Rockford by Caution (Tilden) ds Vision by Vanquish (Lindsey) ds Time—33, 1:05, 1:37 1/2, 2:11 1/2. 33 1/2, 1:06 1/2, 1:40 1/2, 2:12 1/2. 34, 1:06 1/2, 1:39 1/2, 2:13 1/2.

Trotting, 2:25 class, purse \$500. Helen Norte by Del Norte (Rutherford) 1 1 Swift B by Stam B (Zibbell) 3 2 Bay Leaf by Telephone (Hayes) 2 3 Mark Hannabus by Planter (J. Green) 4 4 Package by Factious (Tilden) ds Time—33 1/2, 1:10, 1:44, 2:17 1/2. 35 1/2, 1:10, 1:44 1/2, 2:17 1/2.

TUESDAY, SEPT. 15TH.

Three harness races were on the card Tuesday, all for the youngsters. There was a trot for the two year olds, besides a three year old pace and a two year old pace. Daughters of Lovelace won hntb the two year old events. The three year old pace went to Tidal Wave, a grandly bred and very handsome young stallion by Nutwood Wilkes, out of a full sister to Coney 2:02. The summaries:

Trotting, two year olds, purse \$600. Lovely Dell, by Lovelace (Hellman) 1 1 Royal Satin, by Bonner N. B. (Green) 2 2 Dr. Jones, by Capt. Jones (Sandford) 3 ds Dave Hanna, by Mark Hanna (Tilden) 4 ds Time—43 1/2, 1:20 1/2, 2:04, 2:47 1/2. 43 1/2, 1:18 1/2, 1:57 1/2, 2:37

Pacing, three year olds, purse \$500. Tidal Wave, by Nutwood Wilkes (Mosber) 1 1 Hallie Hinges, by Pricemont (Hellman) 2 2 Lotie B, by Lovelace (Tryon) 3 3 Economist, by Chas. Derby (Silver) 4 4 Bessie L., by Montana Director (O'Brien) 5 5 Annex and King Alexis distanced. Time—35, 1:11, 1:46 1/2, 2:21 1/2. 34 1/2, 1:10 1/2, 1:45 1/2, 2:22.

Pacing, two year olds, purse \$400. Loveless, by Lovelace (Rutherford) 1 1 Pricemont, by Pricemont (Hellman) 2 2 Time—3:06 1/2, 3:04.

WEDNESDAY, SEPT. 16TH.

The 2:17 Greater Salem Stakes was the piece de resistance today, and in honor of the event and Salem day, all the stores closed, and in fact the entire population seemed on the Fair grounds.

That large stakes are appreciated is evidenced by the fact that there were no fewer than 28 subscribers to this stake thus making a handsome profit to the association. Twelve horses took the word.

Pools over night sold Highhall \$5 and the field \$10. Considerable delay was occasioned through the vagaries of Highhall (who was on his bad behavior) ere the start was effected. However when he did

condescend to pace the son of Silkwood would not be denied and quickly threading his way through, placed a handsome gap between himself and his field and won easily.

In the second heat Rita H. stalled off Highhall and won amidst loud applause. An unavoidable collision between Harry Hurst and Rajah occurred just after the start, and on account of the large number of horses starting, though both finished behind the flag, they were allowed to start in the third heat.

The third heat was easily won by Rita H. In the fourth she only secured winning honors by a head from Ama A. Highhall who absolutely refused to pace, was distanced.

The 2:11 pace was won by Zolock over the favorite Sam Bowers, the best time 2:12 being slow for this class of pacers.

The 2:25 pace was won in straight heats by Tidal Wave who was well driven by I. C. Mosher, who was loudly applauded by the occupants of the stand at the conclusion of the race. It is safe to say the old veteran never received any more satisfaction in his life than this prompt recognition of appreciation on his old camping ground. Summaries:

The Greater Salem stakes for 2:17 class pacers, 3 in 5, purse \$2000. Rita H., by McKinney (W. Durfee) 8 1 1 1 Olie M., by Westfield (J. Ervine) 5 4 2 3 County Attorney, by Arthur Wilkes (Hayes) 2 5 4 6 Oma A., by Director (Hogaboom) 7 6 7 2 Bensusra, by Tom Benton (Tryon) 3 3 3 4 The Mrs., by Derby Asb (Whitehead) 6 8 5 5 Monroe S., by Dictator Wilkes (Zibbell) 4 7 6 w High Ball, by Silkwood (J. Pacing, 2:25 class, purse \$500. Tidal Wave, by Nutwood Wilkes (Mosber) 1 1 Prince Tom, by Tom V. (W. Durfee) 3 3 Portia Knight, by Vinmont (Helman) 3 3 Geo. D., by Del Norte (Thompson) 4 5 Rockford, by Caution (Tilden) 5 4 Princess Cebalis, by Cebalis (D. Bruze) 6 ds Jessie M., unknown (Davidson) ds Time—32, 1:05 1/2, 1:39 1/2, 2:14 1/2. 34, 1:07 1/2, 1:41 1/2, 2:15 1/2.

THURSDAY, SEPT. 17TH.

To-day was Portland day and that city sent up a contingent some five or six thousand strong to represent it, and witness the division of the \$2000 Lewis & Clark Stake for 2:20 class trotters.

The race unfortunately resulted in a fiasco. After winning the first heat and shutting out five of the field, Sweet Marie in the second heat was not driven out and finished third to Dr. Hammond and Briny K. The judges were so dissatisfied with Durfee's driving that they decided to substitute another driver. This Durfee absolutely refused to allow, preferring to withdraw the mare and suffer the extreme penalty rather than permit a stranger to drive. A rather riotous scene ensued and the upshot was the mare was ordered from the track, which left the race at the mercy of Dr. Hammond.

The judges after carefully considering the case in all its aspects ruled Durfee and the mare off. They considered the case too grave an infringement of the rules to admit of a lighter penalty.

The Consolation pace for non money winners in the Greater Salem Stakes produced another exciting contest, as after again winning the first heat Highball went to the had and eventually had to put up with second position. The winner Vision is trained by another veteran of the trotting turf in Luke Lindsey, who has been racing horses on the Lone Oak track for twenty years.

It took five heats to decide the 2:30 trot, both Getaway and St. Patrick being tired and lame.

The meeting has been the most successful ever held in Oregon, and the running races have been free from the taint of suspicion. Summaries:

The Webfoot stakes, 3 year old trotters, \$500. Swift B. by Stam B (Zibbell) 1 1 Helen Norte, by Del Norte (Rutherford) 2 2 Time—35, 1:11 1/2, 1:40 1/2, 2:14 1/2. 33, 1:07, 1:41 1/2, 2:10 1/2.

The Lewis and Clark Stake, 2:20 class trotters, purse \$2000. Dr. Hammond, by Chas. Derby (Hughes) 3 1 1 1 Briny K, by Stratway (R. A. Smitb) 2 2 2 2 Belladi, by Cebalis (Rutherford) 4 4 3 3 Sweet Marie, by McKinney (W. Durfee) 1 3 dr Marbo, by Delmar (Hayes) 5 dr Louis J., by Upstart (C. P. Webb) ds H. H. H. by Allerton (J. W. Miller) ds Deputy, by Derby Asb (Whitehead) ds Mark Hannabus, by Planter (J. Green) ds Idol, by Copper King (Helman) ds Time—33, 1:06, 1:40, 2:13 1/2. 33, 1:05, 1:39, 2:12 1/2. 33 1/2, 1:06 1/2, 1:39 1/2, 2:13 1/2. 34 1/2, 1:08 1/2, 1:43, 2:18.

Pacing, Consolation for 2:17 class, \$500. Vision, by Vanquish (Lindsey) 7 1 1 Higball, by Silkwood (Hogaboom) 1 5 2 Bensusra, by Tom Benton (W. Tryon) 2 7 3 Monroe S., by Dictator Wilkes (Zibbell) 4 2 7 Portia Knight, by Vinmont (Goodall) 3 3 5 The Mrs., by Derby Asb (Helman) 5 4 6 The Mrs., by Derby Asb (Whitehead) 6 8 4 Mladl B., by Cebalis (Rutherford) ds Time—32 1/2, 1:05 1/2, 1:39, 2:13 1/2. 33 1/2, 1:05 1/2, 1:39 1/2, 2:15 1/2. 33 1/2, 1:06, 1:40 1/2, 2:15 1/2.

Trotting, 2:30 class, purse \$500. Getaway, by Stratway (Zibbell) 3 1 1 3 1 St. Patrick, by Nutwood Wilkes (Hartnago) 1 2 3 1 2 Lord Kitchener, by Zombro (Misoer) 2 3 2 2 2 Time—38 1/2, 1:18 1/2, 1:53 1/2, 2:29 1/2. 37 1/2, 1:14, 1:49, 2:24 1/2. 38 1/2, 1:12 1/2, 1:47 1/2, 2:24 1/2. 38 1/2, 1:15, 1:52, 2:25 1/2. 37 1/2, 1:13 1/2, 1:50, 2:28 1/2.

SATURDAY, SEPT. 19.

To-day was the closing day of the fair and a more than ordinary large crowd turned out to witness the decision of the 2:17 and 2:20 consolation trots. In the 2:17 class Master Delmar was very unsteady and refused repeatedly to trot. He was finally sent off, and breaking badly at the turn, swerved to the outside causing The Commonwealth to collide with him. Hayes' sulky was so badly damaged that he was unable to finish. The judges took the view that the collision was unavoidable and allowed him to continue in the race which he afterwards won.

The consolation 2:20 trot was won by Deputy in two straight heats, though H. H. H. and Idol gave him a battle royal before conceding him first honors.

The betting both on the running and harness events during the week has been strictly confined to auctions and mutuels, and the management and public were both well satisfied with the mediums of speculation.

The purses and stakes were all paid promptly, and the horsemen left thoroughly satisfied with their visit to the Blue Ribbon Fair.

The occupants of the judges stand were: Roht. Leighton, presiding judge; W. O. Trine and C. W. Redmond, associate judges; timekeepers, Messrs Sam Jones, R. Kiger and W. Durbin; clerk of the course, Frank Davy; starter in the running races, W. Hogaboom. The summaries follow:

Trotting, 2:17 class, purse \$200. Master Delmar by Delmarcb (Ted Hayes) 4 1 1 2 1 Red Skin by Red Cloak (Hogaboom) 1 3 2 1 2 Idylwild by McKinney (R. A. Smitb) 1 3 2 ro The Commonwealth by Shadel and Onward (J. Green) 3 4 4 ro Dr. Bunell by Ingram (J. Lance) ds Time—34, 1:07, 1:41 1/2, 2:16 1/2. 34 1/2, 1:08, 1:43 1/2, 2:17 1/2. 34, 1:08 1/2, 1:43, 2:17 1/2. 33 1/2, 1:08, 1:42 1/2, 2:15 1/2. 36, 1:12, 1:48, 2:19 1/2.

Trotting, consolation, 2:20 class, purse \$500. Deputy by Derby Asb (C. Whitehead) 1 1 H. H. H. by Allerton (J. W. Miller) 2 3 Idol by Copper King (Elroy Smith) 3 2 Mark Hannabus by Planter (Fred Brooker) 4 4 Louis Z. by Upstart (J. Erwin) 5 5 Time—34 1/2, 1:08, 1:43 1/2, 2:15 1/2. 34 1/2, 1:07 1/2, 1:44 1/2, 2:19 1/2.

Last Two Days at Hartford.

THURSDAY, SEPT. 10.

Trotting, 2:16 class, purse \$1500. Belle Kuser, br m, by Colonel Kuser (Hudson) 1 2 1 1 Primrose 2-1-2-2, Pug 3-3-3-3, Dainty Daffo 4-4-4-4, Cozad dis. Time—2:10 1/2, 2:11, 2:11 1/2, 2:12 1/2.

Pacing, 2:08 class, purse \$1500. Locanda, hr b, by Allerton (Brodline) 2 1 1 1 Tribby Direct 1-4-3-4, Strathline 5-2-2-3, Noname 3-3-4-2, Dandy Chimes 4-5-5-5. Time—2:10 1/2, 2:09 1/2, 2:11 1/2, 2:13 1/2.

Trotting, 2:09 class, Charter Oak stake; worth \$10,000. Billy Buck, br g, by St. Clair (Geers) 1 1 1 1 Walnut Hall 2-2-9, Hawthorne 8-3-2, Swift 19-5-3, Dulce Cor 3-7-6, Baron Desbay 5-4-4, Idollita 4-6-10, Maxine 6-8-5, Monte Carlo 10-11-7, Lord Vincent 11-9-8, Jig Ferry 12-10-11, Prince Greenlander 7-2-2. Time—2:07 1/2, 2:07 1/2, 2:11.

FRIDAY, SEPTEMBER 11TH.

Old Colony, 2:30 trot, purse \$3000. Judge Green, br g, by Director (Curry and Walker) 1 2 1 1 Texas 3-3-2-3, Prince Patton 4-4-3-2, Patchou Mald d. Time—2:14, 2:13, 2:14 1/2, 2:20 1/2.

2:10 pace, purse \$1500. Star Hal, br h, by Brown Hal (Snow) 1 1 1 1 John T. 2-2-2, Jestle S 5-3-4, Olive Wood 3-4-3, Brown Heels 4-5-5 Time—2:09 1/2, 2:07 1/2, 2:09 1/2.

2:05 pace, purse \$1500, best two in three. Nervolo, b b, by Colbert (Hudson) 1 1 1 1 Carl Wilkes 2-3, Terrace Queen 3-2, Fanny Dillard 4-5, Riley B 5-4 Time—2:06 1/2, 2:06 1/2.

2:17 trot, purse \$1500, best two in three. Dan T., b g, by Crawford (Geers) 4 1 1 1 Ferno 1-3-3, Susie J. 2-4-2, Charley Herr 3-2-4, Monte Carlo 5-5-4, Rhythmic d. Time—2:07 1/2, 2:08 1/2, 2:10.

Homer Davenport, the noted cartoonist, who for some months had charge of the Barb stallion which the Sultan of Morocco sent to this country to be shown at the St. Louis world's fair, recently sent as a present to the Sultan the roan pacing gelding Edward W., 2:21, which was well known to patrons of the Speedway, as he was driven in many brushes last year by Mr. Davenport. Last month Mr. Davenport received a paper, published in Tangier, which contains a news item to the effect that Mr. Langermann had arrived in that city with a celebrated roan "racking" horse from America, sent as a present to the Sultan. The "racking" horse stood the voyage in fine style and that the present is highly appreciated by the Sultan was evidenced by the fact that he sent 1500 of his best soldiers to escort the horse from Tangier to Fez, nearly 200 miles inland. Edward W. is a good pacer, having taken his record at Chatham, N. Y., in the fall of 1899 and has shown greater speed than that on the Harlem river drive; but he was never noted as a "racker," although he may develop speed at that way of going if the great son-of-the-Propbet elects to use him under saddle.—Trotter and Pacer.

Notes and News.

Gee whiz!

Prince Alert 1:57!

And he wears hopples!

Get a move on, Mr. Dan Patch!

When will this record smashing end?

Meek and Carr sales next Tuesday.

Monroe 2:12, the big trotter in the Salishury string, is in the hospital.

Lou Dillon's strides when she trotted the mile in 2:00 were 19 feet, 3 inches.

Directum 2:05½ has made a season to 66 mares this year in his Minnesota home.

Up to Saturday last, Mr. Geers had counted the earnings of Billy Buck at \$30,600.

Geers' winnings to date for the season are \$51,280. Hudson is a close second with \$50,290.

Did Prince Alert do it to prevent that assessment of Dan Patch from being raised too high?

Notwithstanding the small fields, the Grand Circuit at Charter Oak, Hartford, was a financial success.

A McKinney stallion and a team are offered for sale by a Santa Rosa advertiser. See advertising columns.

Fabella (dam of Sadie Mac 2:11½) by Arion 2:07¾, trotted to a record of 2:13 at Readville, September 14th.

There will be ten or twelve starters in the Transylvania this year. Billy Buck will be a starter in all probability.

Lou Dillon will make her next public appearance at Lexington during the October meeting in an effort to beat her own record of 2:00.

Mack Mack won his race and reduced his record to 2:14¾ at Portland last Wednesday. This makes the fifth new 2:15 performer for McKinney this year.

In a matinee race at Brunots Island track, of Pittsburgh, Dolly Dillon 2:07 trotted a mile in 2:10, making it the fastest beat trotted over that track this year.

It is said that J. F. Cockerill will not permit Swift 2:08½ to race hereafter in professional events, but will drive him a mile at the Empire City meeting next week against his record.

D. C. Palmeter thinks that Barongale is a better and faster three year old than Peter Sterling 2:11½. He must be "bot stuff" if that's the case. He will be a starter in the Kentucky Futurity.

At the coming trotting and pacing meeting at Lexington, Ky., the first race is to be called daily at 12:30. Secretary Shanklin hopes by this means to secure the completion of the program each day.

The four year old filly by Sahle Wilkes 2:18, dam Alix 2:03¾, is a pacer. The two year old filly by Hand-spring 2:18, dam Alix, is a trotter, and resembles her dam, both in conformation and gait.

Vita Oil is being used on the horses in the Russian Czar's racing stables. American trainers are employed there and American trainers know what is best to cure lameness and muscular soreness in horses.

In October, Ed Geers will sever his connection with the Village Farm racing stable, and locate in Memphis, where he has leased capacious stables. Mr. Geers has been with the Village Farm since 1891.

Say, Dan Patch,
Come up to scratch
And make a mighty spurt;
Beat 1:57
Or lose horse heaven—
Now held by Prince Alert!

The opinion of the majority of horsemen who have seen the fast three year old Sadie Mac 2:11½ race say that she will surely step a mile in 2:10 later in the fall if any of the three year olds are fast enough to make her step.

Baron Dillon 2:12 has three new 2:10 performers to his credit this year in George A. Fuller 2:08½, Baron Rogers 2:08½, and Dillon Boy 2:09½. The latter is in the stable of Scott Hudson and is the best trotter in his stable.

Wm. Loeh, Jr., secretary to the President, has purchased for the White House stable a team of handsome hay horses. They are 16 hands high and suitable for heavy carriage work. They have been bought to replace two old horses in the White House stables, one of which has been condemned. The condemned horse is Ramrod, which has, it is said, been in service in the White House stables for almost twenty years.

A quarter-mile track is being built on the infield of the Empire City course near New York with the object in view of using it for the Westchester Horse Show which as announced is to be held at Empire City Park this fall.

The three year old filly Daphne Direct that won the pacing division of the Hartford Futurity, is another 2:15 performer to the credit of Direct. In the same race Silver Patch, a full brother to Dan Patch 1:59, was distanced in the second heat.

One of the best opportunities offered in years to secure well broke standard bred horses and mares will be at the sale of the Meek Estate and Gahilan Farm horses at Fred H. Chase & Co.'s big iron pavilion next Tuesday evening, Sept. 29th. The sale will open at 7:45 P. M.

Trotting the last half of a mile in 1:02½ and finishing through the home stretch at a 2:00 clip, Brayton Ives' bay mare Nora McKinney by McKinney won a wagon race in sensational style at the meeting of the New York Driving Club at Empire City Park, Saturday. She was driven by her owner.

Larkin W. by Boodle Jr. has the making of a great road horse. He is only four years old and is a flat-footed trotter that can speed a 2:20 gait. He will be sold at the clearance sale of Hon. Jesse D. Carr's Gabilan Farm horses at Fred H. Chase & Co.'s sales-yard 1732 Market street, next Tuesday evening.

M. E. McHenry, after driving Dan Patch in 1:59, said: "I first took charge of Dan Patch in 1901. It was not long before I knew he was a wonderful horse. Last year I was convinced two minutes would not stop him. He paced the Boston track in 1:59, and the Providence track in 1:59½. I said this spring that I

The pacer Al Sandy, that is well known to those who have attended the meetings of the Golden Gate Park Driving Association, is offered for sale. He can pace heats around 2:18 and is a good prospect to race. He can brush very fast on the road. Doc 2:28, a good looking black pacer that can lower his record several seconds and is an excellent road horse, is also offered for sale. Apply to Mr. S. Watson, 235 Douglas street, this city.

The Central California Fair opens at Hanford, October 5th. There will be four or more races each day, and the largest gathering of pure bred live stock ever exhibited in that part of California. Ten thousand people attended the Hanford Fair last year in one day, and it is one of the greatest fairs held on the Coast. Persons desirous of making a pavilion or live stock exhibit at this fair should apply for space at once. F. L. Howard, Hanford, is secretary.

General Tracy said some time ago that "there was every reason why a horse with developed speed is to be preferred over one that has not been developed. Every required habit receives strength and intensity by use, and an animal that is trained to a particular use is more likely to transmit to his offspring a natural tendency to that habit than one who has not been so trained. The horses of the United States surpass the horses of every other nation because our people almost universally drive the light harness horse."

The Gentleman's Magazine of 1737 contains notice of the accidental death of a cart gelding owned by Richard Fendall, of the Grange, Southwark, London, England. The horse died from the effects of a cut on the knee, he having somehow got into a difficulty with a large garden hell glass used for forcing melons. This horse had been forty-four years in Mr. Fendall's possession, and had been the property of his former owner for fifteen years, whence it would seem

The New Champion Pacer, Prince Alert 1:57

thought Dan capable of a mile in 1:57, and I stick to it."

Zomhro 2:11 made a good showing at the California State Fair. He won first prize for the best standard stallion four years old or over, and the gold medal for best standard trotting stallion with five of his get. His colt Tee Dee Cee took a record of 2:19½, thus giving this young horse four in the list. The mare Italia by Zomhro took a matinee record of 2:11½ in a winning race at Cleveland recently.

Championship honors are claimed for the young trotting sire Red Medium which is owned in Indianapolis, Ill. This horse is six years old and last year when he was five his two year old son Red Timoka took a record of 2:27 trotting. A short time ago at the Decatur meeting three more of the get of Red Medium took standard records, giving the six year old sire no less than four performers in the standard circle. To top off with, Red Medium was given a record of 2:23½ which he took in a very easy mile. This stallion is by Red Wilkes, dam Camille 2:20½, by Happy Medium, second dam Bess, by Volunteer, third dam Jennie by American Star, the two last named mares being noted producers of speed in their day.

Walter Hine, a member of the Road Drivers' Association of Philadelphia, has offered \$60,000 for Lou Dillon, but it is a certainty that she will be owned by Mr. Billings as long as he lives, and it is doubtless if three times that amount would get him to part with his queen of the track. Mr. Hine said: "It has long been my ambition to own the fastest horse in the world, and last night I sent to C. K. G. Billings, the owner of Lou Dillon, a written bid of \$60,000 for the mare. Probably Mr. Billings is proud of the honor of owning the fastest trotter in the world and may not sell. I have had no encouragement, but merely made the offer as a flyer, so to speak. I know she can again repeat her performance by trotting another mile in 2:00 or maybe a little better.

he was fifty-nine years old when he met with the accident which caused his death.

Mr. Chas. E. Berry of Kelseyville, Lake county, Cal., is the owner of a colt foaled this year that he considers as well bred as any youngster in that section. He is by Tago 32975, son of San Diego 8776, and his dam is a mare by Count Anteeo, grandam Tickets by Milton Medium. As Milton Medium was owned in Lake county and made several seasons there, there are quite a number of his daughters and their produce still owned in that section. Since Lou Dillon made her record of two minutes the Milton Medium stock has had quite a boom in Lake county.

Mr. I. J. Drais of Farrington has been in the city this week and was a caller at this office. Mr. Drais informs us that he will send his stallion Guy McKinney to Pleasanton this winter to have him trained with a view to giving him a record. Guy McKinney is one of the grandest individuals in California and his breeding is unsurpassed. He is by McKinney 2:11½, dam by Guy Wilkes 2:15½, second dam by Onward, third dam by Mamhrino Patchen, fourth dam by Houghton's Privateer and fifth dam by Abdallah 15. Guy McKinney has speed, but has never been regularly trained although with a little handling he showed a 2:20 gait.

Thomas W. Murphy, who has been campaigning a number of horses for James Butler, proprietor of the East View Farm, has had a most successful season, and has only been outside the money three or four times out of the large number of races in which he has started and of which he has won about thirty. Last week he added to an already long list of winning races one with Marie's Baby by Directum Kelly 2:08½, winning a seven-heat race with her and giving her a new record of 2:20½, the mare being the first of the get of this son of Direct 2:05½ to take a record. Murphy has expressed the opinion that Marie's Baby is one of the gamest trotters he ever drove.

EMPIRE CITY TRACK.

Prince Alert Lowers the World's Pacing Record Two Seconds.

NEW YORK, Sept. 23.—Prince Alert, the pacing hero of a hundred races and the champion of a score of half-mile tracks, went against the world's pacing record of 1:59, held by Dan Patch, and beat it most decisively to-day at the Empire City track. It was the first day of the autumn meeting of the Empire City Trotting Club, and in addition to a strong card of four races Prince Alert was billed for what looked like the impossible feat of heating the record. Prince Alert had recently won the half-mile track championship in 2:03, which had been won only the week before by Dan Patch in 2:04, and good judges were sanguine of his success. The weather and the track were perfect, and the wind, which was high early in the day, subsided, so that the conditions were favorable. Mart Demarest, the trainer and driver of the Prince, on account of overweight decided to get John Curry to drive, and Demarest drove the thoroughbred pacemaker with the wind shield sulky. At the third time the starter gave the word, and pacing like a perfect piece of machinery Prince Alert shot away to the quarter pole in 29½ seconds. As he reached the hackst'etch he increased his speed, and was at the half in 55 seconds. Then the crowd realized that they were witnessing the fastest mile of the century, and cheers and shouts of "Come on!" came from the spectators in the grand stand and on the lawn. Without a break he flashed by the three-quarter pole in 1:26½, and without any urging came on with a superb burst of speed, crossing the wire in 1:57. Summary:

Pacing, 2:05 class, purse \$800—Nonamie won two straight heats in 2:06½, 2:07½. Armorer, Trilby Direct, Berdina, Olivewood, Gold Brick, Merry Master and Cubanola also started.

Special against time to beat the world's pacing record of 1:59—Prince Alert, h.g. by Crown Prince (Curry) won. Time—0:29½, 0:58, 1:26½, 1:57. Time by quarters—0:29½, 0:28½, 0:28½, 0:30½.

Trotting, 2:08 class, purse \$800—Swift won two straight heats in 2:08½, 2:07. George Muscovite, Westworth and Idolita also started.

Pacing, 2:25 class, purse \$600—Susie G. won the second and third heats in 2:14½, 2:15½. Jean M. won the first heat in 2:15. Ogden Smith and Manuel A. also started.

Trotting, 2:20 class, purse \$500—Dark Secret won two straight heats in 2:15½, 2:13½. Carnage, Maconomo, Hazel E., Fruition, King Muscovite and Possibility also started.

Sept. 24—The big event at the Empire City track to-day was the effort of Major Delmar to heat his own record of 2:00. Before his trial it was announced that he had been bought for \$40,000 by E. E. Smathers, the owner of Lord Darby, McChesney and other fast horses. In his effort he went to the quarter in 0:30½, half in 0:59½ and the three-quarters in 1:29½. There he broke and came home in 2:05. He will go again Friday. Summary:

2:30 class trot, purse \$500—Leonora won second and third heats in 2:18½, 2:19. Leonata won the first heat in 2:15½. Dal Gregor, Biker, Majestic, Delgoa, Miss Hibbard, Northland, Carolyn, Minnie Bradstreet and Miss James also started.

2:11 pace, purse \$500—Annie M. won two straight heats in 2:11½, 2:14. Piccolo, Tommy Wilton, Hal B., Hero, Alcyrion and Lucrek also started.

Special against time to heat 2:00—Major Delmar. Time, 2:05.

2:15 pace, purse \$500—Little Fred won two straight heats in 2:09½, 2:11½. Daphne Direct, Garnet, B. O. S., Clover, B. S. Dillon, Sultana, Tommy N., Cinder, Sloppy Weather and Warren B. also started.

2:16 class trot, purse \$500—Annie Little won two straight heats in 2:12½. Millard Sanders, Direct View, Dark Secret, Sonata and Wild Wind also started.

Columbus Races.

COLUMBUS, (O.), Sept. 21—The grand circuit meeting at the Columbus Driving Park opened to-day. The weather to-day was clear and warm and the track fast. The attendance was the largest ever recorded on an opening day at the local track. Summary:

Trot, 2:12 class, purse \$1000—Bell Kuser won three straight heats in 2:12½, 2:11½, 2:09½. Patchen Maid, Topsy, Fanforan, Norman, Baron Bell and Robizola also started.

Pacing, 2:22 class, three in five, purse \$1000—King Direct won the second, third and fourth heats in 2:09½, 2:09½, 2:13½. Tom Keene won the first heat in 2:08½ and was distanced in the third. Hazel Banks, Dick Wilson and Fred H. also started.

Trotting, 2:14 class, purse \$2000—Jay McGregor defeated The Questor in two straight heats. Time, 2:09½, 2:08.

Pacing, 2:21 class, purse \$800—Cotillon won in two straight heats in 2:12½, 2:10. Dutch Mowry, Sadie Hal, Johnny O., Margaret Warner, Charles C., Fantom, Irish Elder, Foxy Quiller, Jimmy O., May Shehernt, Go Direct, Angus, Pointer, Winnie King and Bare Boy also started.

Sept. 22.—Fanny Dillard of the W. L. Snow stable became the champion of pacing mares when she circled the Columbus track this afternoon in 2:03½, half a second better than the best efforts of Lady of

Manor, Mazette and Dariel. The race was the 2:06 pace, and it was bitterly fought. Major C. was th 10-to-4 favorite, and he was laid up in the first heat, Joe Pointer winning in a drive from Fanny Dillard. Major C. shot to the front in the second heat, and was carried to the half by Captain Sphinx in 1:01½. Here both horses gave it up, and Fanny Dillard set sail for what proved to be a record. The time by quarters were 0:30, 1:01½, 1:32½, 2:03½. There had no trouble in heating Joe Pointer home in the last heat.

John Taylor won the 2:23 trot easily. He was a 4 to-1 favorite. Victory came to Billy Buck in the 2:17 trot, and the horse acted as if the two heats were nothing more than a work-out. John M. was sold at even money with the field in the 2:15 pace. He was never in danger of losing. Summaries:

Trotting, 2:23 class, purse \$2000—John Taylor won three straight heats in 2:13½, 2:12 and 2:14. Cole Direct, Belle Sligo, Ben Paito and Kingmount also started.

Pacing, 2:06 class, purse \$800—Joe Pointer won first beat in 2:05½; Fannie Dillard won second and third in 2:03½ and 2:05; Terrace Queen, Capt. Sphinx, Harry O., Riley B., Larrie Ginter, Allerson and Major C. also started.

Trotting, 2:17 class, purse \$2000—Billy Buck won in two straight heats. Jobn Mac and Dillon Boy also started. Time—2:09 and 2:10.

Pacing, 2:15 class, purse \$1000—John M. won in three straight heats. R. On Time, Columbia Hal, Queen of Spades, Daisy Elder, Ethel Mack, American Boy, Roxie T., Robert M., Star Onward, Credette, Robert M. and Colonel Taylor also started. Time—2:09½, 2:09½ and 2:09½.

Sept. 23.—Ten thousand persons witnessed the grand circuit races at the Columbus Driving Park to-day. The special attraction was Dan Patch's race against time to heat his record of 1:59. The track was fast and the weather perfect, but the best the pacer could do was 1:59½. The 2:08 class pace was unfinished after five heats had been paced in fast time. Nervolo, Winfield Stratton and New Richmond were the heat winners. Summary:

Trotting, 2:11 class, purse \$2000—McKinley won the second, third and fourth heats in 2:07½, 2:07½, 2:07½. Hawthorne won the first heat in 2:10½. Dr. Strong and Dorothy Redmond also started.

Trotting, 2:21 class, purse \$800—Bessie Brown won the first and third heats in 2:13½, 2:13½. Bermuda Maid won the second heat in 2:14½. Allen W., Winnie Right, Kirkwood Jr. and Crescent Route also started.

Pacing, 2:17 class, purse \$800—Black Pete won two straight heats in 2:10½, 2:08½. Tess, Hard Case, Rose Mason, Allie H., May Sherry, Walter H., Charlie C., Dutch Mowry, C. O. D. Geers, Judge Pryor, Holly Dillon, Jimmie O., Barr Boy, Mary Gordon, Margaret Warner, Line o' Gold and Maurice also started.

Special to beat 1:59—Dan Patch paced in 1:59½.

Sept. 24.—The contest between The Questor and Norrie in the 2:15 trot was the feature of the Grand Circuit Meeting to-day. The race went to five heats and was won by the Questor, the favorite, who won the first heat from Midnight in a drive, lost the next two to Norrie, and then, in a desperate whipping finish, won the fourth and fifth heats and the race.

The judges gave Gray Gem the second heat of the 2:19 trot, when the spectators thought O. I. had clearly won. A protest went up and then the officials moved their station to the outside of the track and there was no more trouble. Gray Gem was an even money favorite and had no fight after the second heat. Summary:

Pacing, 2:08 class, purse \$2000 (five heats Wednesday)—Nervolowon the first, fifth and sixth heats in 2:06½, 2:07½, 2:08½. Winfield Stratton won the second and fourth heats in 2:07½, 2:07½. New Richmond, Surfbeat, Pinchom Wilkes, Council Chimes, Colonel Loomis and Jolisco also started.

Pacing, 2:13 class, two in three, purse \$2000—Star Hal won two straight heats in 2:09½, 2:09½. Dolly Carr was second. Page Hal, Lady Bollehorg and Little Sphinx also started.

Trotting, 2:19 class, purse \$1000—Gray Gem won the second, third and fourth heats in 2:12½, 2:13½, 2:13½. O. I. won the first heat in 2:13½. The Parson, Almerion, Laundry Boy, Brownie Wilton, Monticola, Poindexter, Gayosa, Factor J. and Countess Alice also started.

Pacing, 2:04 class, purse \$800—Harold H. won two straight heats in 2:06½, 2:08. Little Squaw and Edith W. also started.

Trotting, 2:15 class, purse \$800—The Questor won the first, fourth and fifth heats in 2:11½, 2:11½, 2:13. Norrie won the second and third heats in 2:12½, 1:22½. Midnight, Walter Smith, Stockton, Pat Ford, Dick M., Maggie V. and Poteen also started.

The Monk and Equity broke the pole record of 2:12½ made by Belle Hamlin and Honest George when they trotted the Cleveland race track last Saturday in 2:00½. Belle Hamlin and Glohe were bred at Village Farm and were owned by the Messrs. C. J. and Harry Hamlin when they broke the pole record. The Monk and Equity were also bred at Village Farm, but are owned by C. K. G. Billings.

Alta McDonald, who drives Major Delmar 2:00½, is said to be anxious to trot a match of heats, two in three, with the gelding against Lou Dillon 2:00. He is said to be willing to wager \$10,000 against a similar amount that Delmar can win. As it is well known that Mr. Billings, who owns the queen, never races his horses for money there is small likelihood of the match taking place.

Horse Breeding.

[By James Wilson, Sec'y of Agriculture.]

Perhaps in no other one line of work has there been such a lack of systematic study among farmers in America, and in the practical application of known principles, as in horse breeding. Farmers throughout the entire country have practiced haphazard methods of breeding for many years. They simply bred and reared horses without any regard to the demands of the consumer. In any business which is carried on without any definite purpose or object in view sooner or later a crisis will come. During the years of 1893 to 1896, inclusive, the farmers of this country were taught a valuable lesson pertaining to the advisability of breeding horses at random. Nearly every farmer in this country had unsalable horses on his farm—horses that, while sound, were of no class and could not be sold even at low figures. As a result of this depression farmers came to the conclusion the horse market was gone forever, and they quit breeding and disposed of their surplus stock, by selling at low figures, giving away or destroying their horses. In a few years these same men were in the market as horse buyers, when horses were scarce and hard to secure even at high prices. A reaction has taken place and farmers are once more breeding horses, the majority of them in the same old way. If the present methods of horse breeding are not changed, history will surely repeat itself. Farmers should profit by past mistakes and aim to produce horses for a definite purpose. They should cater to the demands of the consumer, who will take care of the surplus horses. If one but look back and studies the market, he will be convinced there never was a time, even when depression was at its worst, when a good individual of any of the recognized classes would not fetch a fair price and the time is far distant when such will not be the case.

Horse breeding, when judiciously carried on, has always been and is likely to be a reasonably profitable business for the American farmer. The great danger in the business is that at the present time, owing to the fact that horses are scarce, the horse of 10 particular breed or class is commanding a fair price, and many farmers are led to regard a horse of this kind as a profitable animal to produce. Such horses should not be bred, because, even when the greatest care and precaution possible are taken in breeding for definite types, there will always be a large number of the so-called misfits, which are the first class of horses to be affected by overproduction or any other thing that is likely to cause a depression in the market.

If horses are bred with a definite object in view the breeder will not be seriously affected by overproduction. There has always been, and there always will be, a fair demand for any of the recognized market types of horses. One of the greatest evils in the horse-breeding business is the patronage of the impure bred sire, whose services can be had at a low fee. Nothing but pure bred sires of the highest quality should be used.

Under existing conditions there are at least four distinct classes of horses which farmers can profitably produce. The first and most important is the heavy draft horse, next the carriage or coach horse, then the roadster horse, and the saddle horse. There is a market for other classes of horses at the present time, but none of them command high prices, and most of them are the misfits which are bound to appear from time to time in the effort to produce horses of the first four classes mentioned.

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for
Curb, Splint, Sweeney, Capped Hock,
Strained Tendons, Founder, Wind
Puffs, and all lameness from Spavin,
Ringbone and other bony tumors.
Cures all skin diseases or Parasites,
Thrush, Diphtheria. Removes all
Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism,
Sprains, Sore Throat, etc. it is invaluable.
Every bottle of Caustic Balsam sold is
warranted to give satisfaction. Price \$1.50
per bottle. Sold by druggists, or sent by ex-
press, charges paid, with full directions for
its use. Send for descriptive circulars,
testimonials, etc. Address
The Lawrence-Williams Co., Cleveland, O.

ROD, GUN AND KENNEL.

Conducted by J. N. De WITT.

Story of an Invention Dear to the Angler.

When Ben F. Meek passed away at Frankfort, Ky., every fisherman realized that he had lost a friend, for probably no other man has contributed so much to the enjoyment of those who find their greatest pleasure in angling. The strangest part of the story of the life of this man, who, by his invention of the famous Meek reel, brought about a new era in the pursuit of game fish, is that he himself was no fisherman, and his friends can recall no instance in which he joined them on their fishing trips.

The first Meek reel was manufactured in 1835, sixty-eight years ago. It was one morning in March 1835, just after the fish in Kentucky's streams had begun to bite freely. Ben Meek, with his brother, J. F. Meek, had a little watch-making shop in Frankfort. On that morning, Judge Mason Brown, a son of John Brown, aide-de-camp to Lafayette and the first Senator from Kentucky, sauntered into the shop where Ben Meek and his brother were at work repairing watches. The Judge was an enthusiastic angler, and the conversation naturally drifted to the subject of fishing. According to Judge Brown, the only drawback to the sport was the lack of a satisfactory reel.

"I will make you a reel, Judge, which shall leave nothing to be desired by the most exacting fisherman," Ben Meek remarked. Judge Brown accepted the offer, and the first Meek reel was shortly afterwards made. The reel was a revelation to fishermen, for it was the first time the quadruple multiplying gear and other improvements were used. Judge Brown was delighted with his new reel, and he told all his friends and neighbors of the reel. Orders began to come in so frequently that the Meek brothers built an addition to their little shop for the manufacture of the reels. Ben Meek soon afterwards turned over the watch-making business to his brother, and devoted himself to the manufacture of the reels.

A party of New York sportsmen once visited the shop, and an English nobleman in the party bought one of the reels and carried it home. Soon thereafter orders began to come from England. Thus the fame of the reel spread, until now orders are received from every country in the world. From the location of the factory, the reels became known as the Frankfort reel.

In 1882, Mr. Meek moved to Louisville, and, up to six years ago, the old gentleman manufactured the reels in a little shop on Seventh street, between Walnut and Chestnut. Six years ago he was forced to give up his work on account of advancing age. He sold the rights of the manufacture and all his machinery, which he had designed himself, to a stock company. He received enough for the invention to keep him in comfort for the remainder of his life. After giving up his work, he returned to his old home at Frankfort, where he died in July, 1901. A number of the first reels he made are still in active use and they differ but little from the reels made today.

Ben Meek was an autocratic old man, and apparently cared nothing for money. He refused to take out a patent on his reel. "If any man can make a reel as well as I can, he is welcome to all the money he can make from it," he was wont to remark with a quiet smile, when urged to patent his invention. He sold his reels cheaply, provided the purchaser did not ask the price when giving the order. To have the price asked first angered him. It is told that a titled Englishman with a fondness for fast horses was making a tour of the American race tracks about twelve years ago. He owned a complicated stop watch, for which he had paid a fabulous price. It got out of repair often, and he took it to the best watchmakers whenever he went to have it repaired. He went to Louisville to attend the races and whilst there took the watch to a jeweler.

"I believe there is but one man in this country who can repair that watch, and that is Ben Meek," the jeweler told him. The two went to the little shop on Seventh street. Meek was busy at his workbench. "Can you repair this watch?" the Englishman asked, handing it to Meek. The latter examined it, and replied that he could. "What will it cost me," the man asked. Meek's face flushed, and he carelessly replied that it would cost \$100. The Englishman at once agreed to the price, and asked how soon the work would be done. "In about fifteen minutes," replied Meek.

The nobleman at once began to object paying Meek

\$100 for fifteen minutes' work. "You agreed to pay me that, and you will have to do it before you leave the room," Meek replied. The Englishman handed over the money. Meek opened the back of the watch-case, removed a tiny screw, and slid the end of it. He then changed the position of a wheel, closed the case, and handed it back to the man, who left without a word.

Meek was proud of his workmanship. It was his boast that in the sixty-two years he manufactured reels he never lost a cent from a bad customer. This was remarkable, because, whenever he received an order, whether it was from New York or Australia, whether he had ever heard of the purchaser or not, he immediately sent the reel.

"When a man gets one of my reels," he used to say, "he will open the package, and, when he finds out the kind of reel he has, the chances in nine cases out of ten are that he will send me a check for it. If he does not, the first time he is out on the river-bank fishing there will be a small voice speak to his conscience from that reel. He will wind up his line and go home and send me the money." And the old man's faith in his reel as a conscience awakener was never disappointed.

The revolution which was introduced into reel making by Ben Meek and his brother is that of spiral gearing. With a reel having a spiral gearing, skillfully made and applied, the angler can handle an eight-pound fish with as much ease as he could a four-pound fish with a reel having an ordinary gearing. Mr. Meek was also the pioneer in jewelling the pivot bearings of fishing reels in such a manner as to have

Raccoon Straits, a Famous Bass Fishing Resort.

the pivots run directly on the jewels. The care used by Mr. Meek in the manufacture of his reels will appear when it is told that he and his two sons counted seven as the extreme number of fishing reels that they could complete in one month.

An Important Fish Hatchery.

The California Northwestern Railway Co. have had a very successful season with their fish hatchery and spawning station work at Ukiah and Willits in Mendocino county. The backward spring retarded the seasonal run of trout at their spawning station about one month later than usual, and fears were entertained that the catch would prove very light, but the copious rain fall during the early part of March changed conditions materially, and resulted in a very successful catch of eggs, amounting to over a million. The fish taken at this station are of the "rainbow" variety, locally called "steel head" and are considered among sportsmen to be of the finest variety of trout on the Pacific Coast. Being indigenous to these waters, they are already acclimated to their environment and grow more rapidly and make more vigorous fish than any of the introduced varieties. Under favorable conditions of food and water usually attaining a growth of eight inches in twelve months from the egg, and make good sport for the angler the following season from their planting.

The work of the spawning station consists in the capture of the wild fish on their way to their spawning beds, relieving them of their eggs and then putting the eggs through the eying process; they are then transferred to the hatchery at Ukiah, where their incubation is finished and the fish reared until they are large enough to transfer to the streams. This work of distribution has been successfully accomplished and the large number of streams stocked this season assure the lovers of sport an abundant field in which to test their prowess when the season opens next spring.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

Fish Lines.

Rock cod fishing along the Marin shores is reported to be excellent.

The striped bass anglers have been getting fair catches at Rodeo wharf recently.

John Butler starts for Eel river today. Col. C. G. Young is at present at Point Arena, enjoying steel-head fishing in the Garcia.

Immense schools of smelt are now running in the bay and wharf anglers are catching big strings of these excellent fish daily. Sausalito and Tiburon are good places for a day's smelt fishing.

Lake Merritt continues to be the resort of a large number of bass fishermen. Results have been good, the fish taken, however, rarely run over six or seven pounds, and usually average about three pounds.

The final class re-entries of the San Francisco Fly-Casting Club will take place this afternoon and tomorrow morning at Stow lake. The cast-off and final meetings at the lakeside for this season are dated for October 3rd and 4th.

Trout fishing still holds good in many streams. The Truckee, McCloud and Upper Sacramento are yet attractive to anglers who find some of the most pleasant fishing of the year just now on these grand streams. Nearby resorts, Sonoma creek and Olema creek can still be counted on for a fair catch of trout.

Reports from Eel river state that steelheads, in large schools are running up the river. Big fish are fairly numerous and have given much sport to anglers who trolled for them in boats or who fished the deep pools. Salmon roe has been the most tempting lure found so far. The autumn run of big steelheads should begin pretty soon now.

A pumping plant has been placed in the Santa Cruz tannery, the proprietor of which was arrested last month for allowing waste tanbark water to run into the San Lorenzo river. This prior nuisance and recent violation of law was, it is claimed, the means of annually destroying thousands of fish. The purchase of a \$600 pump is not too much of a hardship on the tanner for forty years' destruction of fish. The action is in the nature of a compromise on a prosecution started by W. W. Richards, A. E. Mocker and other sportsmen, for the abatement of the nuisance and law violation.

The possibilities of fall sport in the vicinity of Klamath Hot Springs are enthusiastically described in the following communication from a well known young local sportsman, Mr. Floyo Judah:

"Have had a most elegant time so far and sport has been fine. Mr. Lembeck, my friend from Washington, D. C., and myself got in last night from a hunt with Geo Cook, the celebrated guide, and we brought in a magnificent specimen of the black tail deer which we killed about six miles from the hotel, on the high slopes overhanging Shovel Creek, and the wildest and roughest spot on earth. The huck weighed 175 pounds dressed and he had six points on one side of his horns and seven on the other. He came from the same country where the famous "Ontlaw" was killed by Drs. Redmond and Clyde Payne on August 30th. The huck we got showed marks of narrow escapes from hunters in the past and we only got him after a long and hard trip.

The fishing has been very good also and I have been getting some fine rainbows ranging from one to three pounds in weight, and all of them put up a game fight in the rushing Klamath. Before the 10th inst I had great sport with the salmon which are running up the Klamath in immense numbers this year and are in good condition as there is now no obstructions in the river to hold them back. I got hold of an eight pounder fresh from the sea on the 7th and he gave me a big fight before he was landed. I have caught several others ranging from two pounds up to eight and some have been taken up to twelve, fifteen and even twenty-five pounds, all on rod and reel. The brook trout fishing on Shovel Creek is good this year and the best results were had with the royal coachman fly; the best fishing is found at a distance of from six to ten miles from the hotel. I have caught several nice messes, also had great sport in the Klamath with big rainbows which are now running and can be taken on a spoon, the No 3 Wilson copper and silver proving the best killer."

Mr. Judah and party went from the Springs to Pelican bay, where the sport is at its best at present.

A Paradise for Anglers and Hunters.

The California Northwestern Railway have just issued a neat and attractive illustrated booklet descriptive of the transportation facilities for Marin, Sonoma, Mendocino and Lake counties in which are located the Marin, Sonoma, Santa Rosa, Russian river, Ukiah and Willits valleys, which regions are full of interest and attraction for the hunter and angler.

The illustrations portray a short and interesting trip, six miles across the bay to Tiburon, and thence nine miles by rail to San Rafael, said to be the prettiest suburb in California. Two views shown depict the striped bass fishing grounds in Tiburon cove and Raccoon straits. Copies can be procured at No. 650 Market street, or by addressing R. X. Ryan, General Passenger Agent, Mutual Life Ins. Bldg., Cor. Sansome and California streets, San Francisco.

An Alaskan Dog Case.

What is a dog? Most people would consider this, but a United States District Judge in Alaska, over 4000 words to define the canine in question. A man who is accused of stealing the animal was satisfied with this elaborate elucidation, and has appealed the United States Circuit Court of Appeals to uphold it. "A dog is a chattel," says the Alaskan court. Maybe it is, but that doesn't keep a dog thief out of jail.

Because Congress failed to enumerate a dog in the category of four-footed things, the theft of which did constitute larceny anywhere else in the United States, one of the strongest cases ever carried up to the United States Court of Appeals for this district received this week. P. C. Burkal, a resident of Rampart, Alaska, was arrested during July and charged with the theft of a dog. The office of the Peace of that place committed him, and he appealed the matter to the United States District Court of Alaska. Not receiving satisfaction in this tribunal, his attorney carried the case up to the higher court.

Burkal, in his petition, claims that he is restrained in his liberty and imprisoned in the jail at Rampart, United States Marshal George G. Perry. He alleges that he is held on a pretended commitment of Lindley Green, a Justice of the Peace at Rampart, in complaint of larceny, viz: the stealing of a dog. In his imprisonment, he declares, is illegal, because facts as adduced in the Justice's court were insufficient to constitute a crime.

The United States District Judge Wickersham of Alaska rendered an elaborate opinion, covering some twenty rewritten pages.

It seems that dog flesh in Alaska is of some work-value, the canine that Burkal is accused of stealing was listed at \$34, and for the crime of stealing the animal the Justice sentenced him to nine months at hard labor in the Rampart Jail.

Judge Wickersham emitted the following jewels in rendering his opinion:

The dog is not specifically mentioned in the statute of Alaska among the animals or other property subject to larceny. If it is property whose taking is larceny, it must be because it is included in the meaning of "goods and chattels" whose taking is made larceny by Section 41 of the Penal Code. * * * Section 43 does not specifically mention swine or sheep as the subject of larceny, yet it will not be deemed that they may be taken without punishment. Gold dust is not mentioned in either section, yet has never been doubted that its theft might be punished as larceny. A distinction, however, is made between the theft of these classes of property and that of dogs, and this distinction is based upon the allegation that swine, sheep and gold dust are property, the theft of which is punishable at common law while the taking of a dog never was and is not punishable at common law. Nevertheless, a dog is a chattel. * * * Whoever has made even the slightest study of the ethnology of Alaska or has any idea as to its present development a minute's thought will convince him that the dog has been, next to man, the most important factor in its past and present history.

* * * When the news of the discovery of the Yukon and Nome gold fields attracted thousands of American miners into this region, he was found to be the most ready, useful and active animal in aiding man to reach the mines. From that day to this he has been the constant companion of the prospector, the miner and the freighter, and without his aid and the efforts of even American miners to exploit the gold fields must have languished. He served the cause of justice and aided in the punishment of the courts, and the judge of this case has traveled hundreds of miles along Alaska's coast each winter, upon vehicles drawn by the dogs, to see the performance of his official duties.

Last winter a whole population of civilized men and women invaded the dense wilderness of the Tanana Valley, crossing the snowy mountains amid the yards of Arctic blasts, and established permanent mining and mining camps there, depending upon the dog as their sole beast of burden and only means of transportation. Hundreds of animals of the best breeds have been imported into the territory of the States as well as from the British territories, the dog has a fixed and definite value as a beast of burden in Alaska, second to no other animal. He is the far northland what the horse was to the development of the great plains west of the Mississippi. It cannot be presumed that Congress was ignorant of history and value to the people of Alaska when it enacted the Penal Code. This court will not, by a technical construction, exclude the dog from the protection of the Penal Code of Alaska nor ought it to do so to the well established rule of decisions denigrating the animal not the subject of larceny under common law.

However, I am satisfied that in our condition in this territory a dog is property of a high pecuniary value, and is the subject of larceny under the very simple upon which the common law determined the question.

When the prisoner at the bar was rightfully tried and convicted for the larceny of a dog and cannot be discharged upon habeas corpus."

"That learned body, the United States Circuit Court of Appeals, is asked to answer the question, 'What is a dog?' Upon their definition depends the liberty of one P. C. Burkal. By the time the decision is rendered, no doubt he will have long served his sentence, but he will have the satisfaction of knowing that a dog is, if he can get the idea from a decision of over a thousand words or so.

The appellate tribunal might, with equal concision, answer defendant's appeal with the question, 'What is a Jackass?' Time will be saved and a conserved in reply, by the laconic use of the personal pronoun; to which the Alaskan District Judge might add, 'Concurred, canis lobarsterius, us curiae.'

Minnesota--North Dakota Field Trials.

The second annual trials of the Minnesota-North Dakota Field Trials Club was run at Huron, N. D. commencing on the 1st inst. The meeting is generally credited with being a successful one. Weather conditions were pleasant, but rain would have been welcome, in laying the dust, this being quite a drawback to the working of the dogs.

The Derby was not as satisfactory as the All-Age. In the former stake few chickens were found which left bird work at a minimum. The All-Age was run on better ground, grass and stubble, which produced more game.

Jessie Rodfield's Count Gladstone, winner of the Derby, was unplaced at the Nebraska All-Age and went as far as the second heat of the South Dakota All-Age. He afterwards did not get any further than the first heat in the All-Age at this meeting. Speck's Jingo Boy took second in the Derby.

Copper Coin, third, stayed until the third heat of the South Dakota Derby and was unplaced at the Nebraska trials. This dog is spoken of very highly by Eastern critics. Lad's Meally, fourth, was also fourth in the Derby at South Dakota and second in the same stake at O'Neill. This dog is expected to do great work on quails. She is already credited with being one of the best on chickens put down this season.

Alford's John turned up winner of the All-Age, just a place over McKinley who won the South Dakota All-Age and likewise second in the Nebraska All-Age. Lad of Jingo, a well known field trial performer took third and Alpine Lad fourth, a reversal of the South Dakota result. Alpine Lad was given a second over McKinley at Nebraska. The class of the Minnesota All-Age winners is referred to as of a very high standard.

Summaries of the two stakes run are the following:

HURON, S. D., Sept 2, 1903.—Minnesota-North Dakota Field Trials Club Derby Stake, for Setters and Pointers whelped on and after September 2, 1901, that have not won first place at any field trial prior to July 1, 1903. Entries closed August 2, 1903. Five dollars forfeit and \$10 for starters for non-residents of Minnesota and North Dakota and all members, \$10 forfeit and \$10 for starters for residents that are not members at time of entry. Judges, N. Wallace of Farmington, Conn., E. E. Magoon of Muskegon, Mich., and Dr. W. A. Moore of Minneapolis, Minn.

Copper Coin, liver and white Pointer dog (Lad of Jingo-Hal's Belle). W. P. Austin, owner; A. B. Caldwell, handler.

Lakefield's Pride, orange and white English Setter dog (Cowley's Rodfield's Pride-Phoebe Whitestone). Lakefield Kennels, owners; J. Gade, handler.

Peggy, black, white and tan English Setter bitch (Domino's Mark-Pet). Arthur Stern, owner; W. H. Hammond, handler.

Count's Clip, black, white and tan English Setter bitch (Lady's Count Gladstone-Jessie Rodfield). Charles Askins, agent; J. H. Johnson, handler.

Speck's Jingo Boy, liver and white Pointer dog (Young Rip Rap-Speck's Jingo). Mrs. Charles Hyde, owner; J. T. Jones, handler.

Cleopatra, black, white and tan English Setter bitch (Tony Boy-Lady Clinton). F. P. Harter, owner; E. Shelley, handler.

Jessie Rodfield's Count Gladstone, black, white and tan English Setter dog (Lady's Count Gladstone-Jessie Rodfield). E. Shelley, agent and handler.

General Jackson, orange and white English Setter dog (Count Glad-Donna Rodfield). Dr. O. R. Wright, owner and handler.

Baby Ale, liver and white Pointer bitch (Jingo's Coin-Fannie Ale). George Cooper, owner; W. D. Gilchrist, handler.

Valley Girl, liver and white Pointer bitch (King Cyrano-Josie Brighton). Gus Clay, owner and handler.

Brett's Sport, black and white English Setter dog (Sport's Count Danstone-Pride's Belle). Charles Askins, agent; J. H. Johnson, handler.

Verona Chief, black, white and tan English Setter dog (Iroquois Chief-Verona Spice). Verona Kennels, owners; F. Richards, handler.

Superior's Queen, black, white and tan English Setter bitch (Fulton's Rod Count Gladstone-Oakley Belle Gladstone). L. R. Fulton, owner; Frank Diamond, handler.

Miss Irish, orange and white English Setter bitch (Ruby's Dan-Snowflake III). Arthur Stern, owner; W. H. Hammond, handler.

Dervish Girl, black, white and tan English Setter bitch (Robert Count Gladstone-Fleety A.). American-Llewellyn Kennels, owners; W. W. Updike, handler.

Osseo, white, black and tan English Setter dog (Count Danstone-Marie's Dot). Dr. E. R. Hickerson, owner; Ed Garr, handler.

Kate Cyrano, black and white Pointer bitch (King Cyrano-Josie Brighton). Dr. H. W. Arndt, owner; Ed Garr, handler.

Pioneer, orange and white English Setter dog (Count Whitestone-Gracie Gladstone). T. Kells, owner; E. Shelley, handler.

Lad's Meally, liver and white Pointer bitch (Lad of Jingo-Margaret). W. P. Austin, owner; A. B. Caldwell, handler.

Oakley Hill's Pride, black and white English Setter dog (Oakley Hill-Gleam's Daisy). Mrs. John Cowley, owner; E. Shelley, handler.

Verona Dot, lemon and white English Setter bitch (Count Whitestone-Verona Gladstone). Verona Kennels, owners; F. Richards, handler.

Pearl's Cloe, liver and white Pointer bitch (Jingo's Pearl-Ruby's Cloe). Albert Lieber, owner; F. C. Lockhart, handler.

Piguet, liver and white Pointer bitch (Fryphoon-Ranococas Belle). W. H. Hammond, agent and handler.

Flintstone, white, black and tan English Setter dog (Robert Count Gladstone—). American-Llewellyn Kennels, owners; W. Updike, handler.

Plain Rex, black, white and tan English Setter dog (Dan Bo-Thelma S.). Thomas Griffith, owner; Nat B. Nesbitt, handler.

Rap's Pointer, liver and white dog (Young Rip Rap-Miss Pointer). E. Shelley, owner and handler.

Jessie Rodfield's Count Gladstone with Lad's Meally.

Verona Chief with Copper Coin.

Speck's Jingo Boy with Pioneer.

Osseo with Brett's Sport.

General Jackson with Dervish Girl.

Kate Cyrano with Pearl's Cloe.

Baby Ale with Miss Irish.

Copper Coin with Pioneer.

Lad's Meally with Osseo.

Jessie Rodfield's Count Gladstone with Speck's Jingo Boy.

RESULT

1st, Jessie Rodfield's Count Gladstone; 2d, Speck's Jingo Boy; 3d, Copper Coin; 4th, Lad's Meally.

HURON, S. D., September 4, 1903.—Minnesota-North Dakota Field Trial Association's All-Age Stake, for Setters and Pointers of any age that have not won first place at any recognized field trials in any previous year. Entries close August 2, 1903. Five dollars forfeit and \$10 starter for non residents of Minnesota and North Dakota and all members. Ten dollars forfeit and \$10 for residents that are not members at the time of entry. Full payment of membership fee will be applied as part payment of one starting fee for the current year in either of above stakes.

Domino III., black, white and tan English Setter dog (Domino-Little Landress). Arthur Stern, owner; W. H. Hammond, handler.

With

Von Rip, black and white Pointer dog (Young Rip Rap-Miss Von Gull). — Armstrong, agent; J. T. Jones, handler.

McKinley, black, white and tan English Setter dog (Hickory Gladstone-Thelma S.). Thomas Griffith, owner; Nat B. Nesbitt, handler.

With

Lakefield Rod, black and white English Setter dog (Rodfield-Kate N.). Lakefield Kennels, owners; John Gade, handler.

Philadelphia, black, white and tan English Setter dog (Cincinnati's Pride—). E. A. Burdett, owner; Frank Richards, handler.

With

Chief Other Day, liver and white Pointer dog (Sabine's Rip Rap-Susie's Bottle). H. M. Giles, owner; Nat B. Nesbitt, handler.

Sure Shot, black, white, tan and ticked English Setter dog (Lady's Count Gladstone-Jessie Rodfield). Charles Askins, agent and handler.

With

Pride of Rodfield, black, white and tan English Setter dog (Rodfield-Lou Gladstone II). Dr. F. W. Samuel, owner; Ed Garr, handler.

Teddy Hotspur, black and white Pointer dog (Plain Sam—). Verona Kennels, owners; Frank Richards, handler.

With

Slap Dash, black, white and tan English Setter dog (Lady's Count Gladstone-Maude). P. Lorillard, owner; Will Tucker, handler.

Josie Brighton, black and white Pointer bitch (Brighton Joe-Jingo's Flora). Gus Clay, owner and handler.

With

Blue Danstone, blue belton English Setter dog (Count Danstone-Fairland Dot). T. A. Turner, owner; W. D. Gilchrist, handler.

May Fly, orange and white English Setter dog (May Prince-Glory). G. O. Smith, owner; A. B. Caldwell, handler.

With

Verona Cap, orange and white English Setter dog (Lady's Count Gladstone IV-Daisy Croft). Verona Kennels, owners; Frank Richards, handler.

Lady Babbie, black, white and tan English Setter bitch (Lady's Count Gladstone-Maude). P. Lorillard, owner; Will Tucker, handler.

With

Jingo's Mike, liver and white Pointer dog (Jingo-Pat's Nellie). Thomas Smith, owner; Ed Garr, handler.

Jingo's Jerry, liver and white Pointer dog (Jingo-Rose Le Hesen). John Allen, owner; Ed Garr, handler.

With

Sam B. Lemon and white Pointer dog (Jingo's Light-Phil). W. C. Banks, owner; W. D. Gilchrist, handler.

Alford's John, liver and white Pointer dog (Dave Kent-Cleade). Foust & Dickey, owners; J. E. Jones, handler.

With

Prince Lynden, black, white and tan English Setter dog (Marie's Sport-West Wind). J. Cowley, owner; E. Shelley, handler.

Jessie Rodfield's Count Gladstone, orange and white English Setter dog (Lady's Count Gladstone-Jessie Rodfield). J. Sherwood, owner; E. Shelley, handler.

With

Lad of Jingo, liver and white Pointer dog (Jingo-Dot's Pearl). W. P. Austin, owner; A. B. Caldwell, handler.

Sport's Boy Jr., lemon and white English Setter dog (Sport's Boy-Queen W. H.). Frank Warnke, owner; A. Albaugh, handler.

With

Victor Okaw, black, white and tan English Setter dog (Lady's Count Gladstone-Vic's Vic). N. B. Pantler, owner; W. D. Gilchrist, handler.

Verona P. Gladstone, black, white and tan English Setter bitch (Count Gladstone IV-Countess K.). Verona Kennels, owners; F. Richards, handler.

With

Sport Webster, black, white and tan English Setter dog (Marie's Sport-Peg's Girl). F. Towlerion, owner; W. D. Gilchrist, handler.

Dad's Frank, lemon and white English Setter dog (Mat Ellis-Belle Wilson II). Nitta Ynna Kennels, owners; Ed Garr, handler.

With

Rip's Lass, black, white and ticked Pointer bitch (Young Rip Rap-Garth). Keller & Rison, owners; W. D. Gilchrist, handler.

Rush of Sam II, black, white and ticked Pointer dog (Rush of Sam-Lady C.). W. W. Collins, owner; J. T. Jones, handler.

With

Alpine Lad, liver and white Pointer dog (Lad of Jingo-Fanny Flash). Charles Proctor, owner; Ed Garr, handler.

King Dodo, black, white and tan English Setter dog (King Bo-Ciperigo). E. E. Kraal, owner; —, handler.

II.

McKinley with Alford's John.

Sure Shot with Lad of Jingo.

Jingo's Jerry with Sam B.

Alpine Lad with Jingo's Jerry.

RESULT.

1st, Alford's John; 2d, McKinley; 3d, Lad of Jingo; 4th, Alpine Lad.

DOINGS IN DOGDOM.

C. F. Charles advertises for sale, two good Cocker Spaniel brood hitches and some fine Ch. Dufferin Pastime puppies.

Concerning Wandee Kennels' new one the wire hair Rahy Coastguard, Mr. J. J. Pim, who judged at the Darlington Show, England, last July, says: "The show of Fox Terriers was as usual a good one. The wire-hairs (particularly in the open dog class) were, I hear, the best show of the year. Open dogs, (wire-hairs) a grand class. Raper's Rahy Coastguard, first and championship, a grand terrier, with such quality! His skull is perhaps a little thick, but is set off with such perfect ears, eye and expression, grand bone, legs, feet and front, good coat, stern, and a perfect size. Brumby's Briar Sportsman, 2nd, a beautiful hard coated young dog, with perfect neck, shoulders, long, hody, front, legs, feet, body and hind-end, good long head, wanting more coat on muzzle, and hut for his ears might have won, they want to wrinkle and tick upon head; time may or may not help this. Horsman's Briar Cackler, 3rd, is still the good dog he was; a little thick in skull and wavy in coat, about his only faults, front, bone, neck and shoulders A1. Warburton's Northfield Knockout, reserve, another grand terrier, with the very best head, eye, ear, and expression, his coat, legs and feet told against him in this highest company, but he will win many more prizes, all the same. The Duchess' Captain of Notts,

who, another grand terrier, had to go back for size, he was looking at his best. Winder's Sailor Prince, who, I never remember seeing before, he is quite a nice one, and will win in most classes. I do not remember ever judging four Champion dogs in a class before."

The Pacific Northwest field trials will start at Whidby island, near Seattle, on next Tuesday.

The initial open air show in this State will be held by the California Collie Club at Oak Grove, the country residence of Mr. and Mrs. O. J. Albee whose kind permission has been given for the holding of a one day show early in February next.

A meeting will be held in San Jose on the evening of the 30th inst. for the purpose of organizing a kennel club.

The prize list for the third annual bench show of the Ladies Kennel Association of America, is a very interesting one.

The money prizes in each class will be \$15, \$10 and \$5, and there is a magnificent list of special prizes. The classification is very liberal in all breeds, there being twenty classes in Cocker Spaniels; eleven in Field Spaniels; twelve in Curly Poodles; fifteen in Bulldogs; thirteen in Bull Terriers; sixteen in Beagles; twelve in Pomeranians; eleven in Collies; twelve in French Bulldogs and Boston Terriers; thirteen in Pointers; ten in English Setters; eleven in Great Danes, and a similar liberality in the rest of the classes.

The officers of the Ladies Kennel Association at present are, President Mrs. James L. Kernochan, Vice-President Mrs. J. J. Vatable, Treasurer Mrs. Perry Belmont, Secretary Mrs. D. W. Evans.

The Dog Show Committee is as follows: Mrs. James L. Kernochan, Mrs. D. W. Evans and Miss L. Alger. Mr. E. W. Oldham is Superintendent of the Show and Dr. Thos. G. Sherwood is the Veterinarian. The judging will be done by Mr. Harding Cox, England, Mr. James Mortimer, Hempstead, L. I., and Mr. H. W. Lacy, Boston, Mass.

From the foregoing it will be seen that like the previous shows given by the ladies this one will be a success, and no effort will be spared by the committee or the superintendent to eclipse their own record in dog shows.

"Dog Society News" is the head under which a department in a Benton Harbor, Mich., newspaper is conducted. The matter is collected and edited by a bright young woman, and she has made the newspaper bit of Michigan's chief fruit-shipping port. The reporter, in making her rounds about the city, was told so much about pet dogs, cats and horses that she was provided with an item or two each day, and publishing them she found that they made friends and subscribers for the paper, so she is keeping it up. The doings of dogs of all degrees are accurately chronicled. The city has a large number of blooded dogs, and when an item about one gets into print it creates more talk than does a paragraph about a human being.

Kennel Registry.

WHELPS.

Dr. O. P. Roller's R. C. St. Bernard bitch Lady Lucile II. (Duke D-Princess Louise), whelped September 15, 1903. nine puppies (4 dogs) to Nairod Kennels' Ch. Grand Master II. (Ch. Grand Master-Bonnie Doone).

Nairod Kennels' black Cocker Spaniel bitch Imp (Black Trophy-Stella Silk), whelped September 15, 1903, four black puppies (2 dogs) to Plumeria Kennels' Ch. Hampton Goldie (Ch. Red Mack-Hampton Queen Readie).

VISITS.

Nairod Kennels' black Cocker Spaniel bitch Nairod Maid (Woodland Jersey-Woodland Countess) to Wm. F. Roeder's black Cocker Spaniel Rex (Ch. Dufferin Pastime-Sweetheart) September 19, 1903.

Free!! Free!! Free!!

The Polk Miller Drug Co. of Richmond, Va., whose advertisements of "Sergeant's Dog Remedies" are appearing now in the columns of this journal, desire us to state that they will furnish *absolutely free* to our readers a revised copy of their book on "Dogs," which accurately and exhaustively treats of the more frequent diseases with which dogs are afflicted. Enclose them 5c in stamps to cover cost of mailing the book. They have recently made F. W. Brann & Co. of Los Angeles, California, distributing agents for their popular line of "Dog Remedies," and extend an invitation to all persons having sick dogs to write them describing symptoms, etc. Enclose stamp for reply. No charge will be made for information furnished.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.

April 1-Nov. 1—Trout season open.

July 1-Jan. 1—Open season for black bass.

Aug. 15-April 1—Open season for lobsters and crawfish.

Sept. 1-Nov. 1—Close season for crabs.

Sept. 1-May 1—Open season for shrimp.

Sept. 10-Oct. 16—Close season in tidewater for steelhead.

Sept. 26—Saturday Contest. Class re-entries. Stow lake, 2:30 p. m.

Sept. 27—Sunday Contest. Class re-entries. Stow lake, 10 a. m.

Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15—Dove season open.

July 15-Nov. 1—Deer season open.

Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.

Sept. 27—Millwood Gun Club. Blue rocks. Mill Station.

Oct. 15-Feb. 15—Open season for quail, ducks, etc.

Bench Shows.

Oct. 6, 7, 8, 9—Danbury Agricultural Society. Danbury, Conn.

Oct. 20, 21, 22, 23—Frederick County Agricultural Society. Frederick, Md.

Oct.—Bench Show in Spokane, Wash.

AT THE TRAPS.

The feature of the Union Gun Club blue rock shoot at Ingleside, Sunday, was the contest for the Phil B. Beckett trophy between George Sylvester and C. C. Nauman. The race was at 100 targets and was won by Nauman, who broke 94 blue rocks against Sylvester's score of 84. This trophy has now been won three times by Mr. Nauman. The prize, an elegant silver cup, is a perpetual challenge trophy, the holder is bound by the conditions to enter a race and defend his title against any and all comers before the traps. The conditions are 100 targets at 16 yards rise, each challenger to post \$5 before the race. The winner of each shoot to receive the challenge money posted and the loser or losers to pay for the birds. The cup was first shot for July 15, 1901, at Ingleside. The initial winner was A. J. Webb, who scored 94 out of 100. The other contestants and scores made were: M. O. Feudner 90, Fred Feudner 84, C. A. Haight 83, Ed Schultz 88, J. Bruns 83 and W. J. Golcher 88. The next race took place August 19, 1901. It was between Webb and Feudner. Webb won again, the score being 95 to 93. On September 22d, M. J. Iverson broke 93 birds and won the cup, beating C. C. Nauman 89, A. J. Webb 90, Mr. Denzell 90 and G. Sylvester 84.

The next contention for the cup was February 22, 1903. Nauman broke 96 targets and won over M. J. Iverson 73, O. Feudner 85, G. W. Gibson 72, G. Sylvester 89, and Captain Whitworth, U. S. Army, 88. Another smokeless powder argument was had on April 10, this year, when Nauman again captured the trophy with a record of 92 against D. Daniels 88, Iverson 84, T. L. Lewis 47, Jack Fanning 85 and G. Sylvester 83. The cup is still open to competition, which will take place when the season opens again next year. All the above shoots took place at Ingleside.

The final shoot of the Millwood Gun Club will take place to-morrow near Mill Valley. The John R. Orr trophy, the M. O. Feudner medal and the club badge will be shot for by the winners respectively of these prizes at each of the club monthly shoots this season.

The Union Gun Club closed the club trap season for this year at Ingleside last Sunday. M. J. Iverson was the winner of first medal and F. Herring second medal each shooter having won these particular trophies oftener during the year.

Club race, re-entry, 25 targets—Hoyt 22, Walpert 15, Kincannon 18, Patrick 13, Knick 14, "Slade" 22, Jansen 18, Daniels 23, Leary 16, C. Sylvester 16, Hutton 17, Fish 19, Lidstone 16, F. Feudner 21, G. Sylvester 23, Iverson 21, Nauman 22, Sburdell 15, Lewis 12, Fuller 19, W. Hansen 15, Gordon 19, Pisani 19, H. Klevesahl 14, Westphal 18, Pratt 10, Wallam 13, Liebert 16, Walsh 14, P. Finnochio 16, Sbreve 9, Burns 14, Masterson 15, Herring 11, Barber 9, Muller 19, E. Klevesahl 19, W. Robertson 23.

Winners first class—Daniels, Sylvester and Robertson. Second class—Hoyt and Nauman. Third class—Fish, Fuller, Gordon, Pizzani and Muller. Fourth class—H. Sylvester, Leary, Liebert, P. Finnochio and E. Klevesahl. Fifth class—Patrick and Wallam. Sixth class—Shreve and Barber.

Club handicap medal race, 25 to 30 birds—Leary 17, Fish 17, Walpert 21, Hutton 18, Jansen 21, Kincannon 20, C. Sylvester 26, Patrick 19, Lidstone 14, Knick 20, Iverson (18 yards) 22, Daniels (18 yards) 16, Gordon (18 yards) 17, Hoyt (18 yards) 16, Lewis (18 yards) 17, P. Finnochio (18 yards) 19, Nauman 17, Fuller 16, George Sylvester 18, W. Hansel 14, Herring 17, Pisani 16, Liebert 5, Wallam 17, Walsh 15, Westphal 20, Barber 16, Burns 16, Muller (18 yards) 16, Robertson 25.

Added money race, 16 yards rise, handicap on birds, 20 being possible—Kincannon shot at 23, broke 20; Gordon 23-19, E. Klevesahl 23-16, W. Hansen 25-19, Patrick 25-18, Lidstone 24-19, Fish 23-20, Hoyt 21-18, Finnochio 24-20, Hutton 23-18, Iverson 21-20, F. Feudner 22-20, C. Sylvester 21-18, Burns 24-13, G. Sylvester 21-16, Knick 25-19, Nauman 20-11, Daniels 20-18, Walpert 23-13, Robinson 22-19, Masterson 25-18. King 23-22.

Leo Kincannon, C. S. Fish, M. J. Iverson and F. Feudner were the winners in this race.

Shoot at five pairs of doubles—Sylvester 8, Barber 2, Patrick 6, Westphal 6, Pisani 4, Masterson 3, Lidstone 5, King 6.

Team shoot, 4 men, 15 targets per man—

E. Klevesahl, captain, 12; C. Sylvester, 12; Murredoek 12; Knick, 10. Total 46.

Finnochio, captain, 13; Masterson, 11; Daniels, 13; Hutton, 8. Total 45.

Nauman, captain, 15; Walpert, 11; Kincannon, 12; Westphal, 6. Total 44.

Pratt, captain, 7; F. Feudner, 13; Gordon, 14; Fuller, 10. Total 44.

Burns, captain, 8; H. Klevesahl, 9; Lewis, 7; Wallom, 9. Total 33.

Fish, captain, 6; Pisani, 7; Patrick, 9; Herring, 10. Total 32.

Iverson, captain, 11; Barber, 4; Lidstone, 7; T. Walsh, 9. Total 31.

W. Hansen, captain, 6; G. Sylvester, 10; Hoyt, 10; Liebert, 3. Total 29.

Dr. J. A. Hutton of Berkeley won a special 100-bird match, the scores being Dr. Hutton 92, Barber 90 and Wallam 80.

C. C. Nauman scored 94 out of 100 targets in a contest with G. Sylvester for the Phil B. Beckett challenge cup; the latter broke 84 targets.

Fall Shooting Outfits.

Open season for ducks and quail is less than a month off—it's a short time, so get ready early. Skinner has some decoys, wooden and canvas pneumatic, that cannot be beat. Racie's built duck boats, to see one is to want it. Rain coats, hats and pants of a special tan color. The latest wrinkle in ammunition cases, leather or metallic. For upland shooting, he has the proper thing in comfortable clothing and footwear. See Skinner, 801 Market street, for a complete outfit for the shooting season.

GOSSIP FOR SPORTSMEN

Mountain quail and grouse are very plentiful in Truckee. Frank Rutherford of Marysville recently bagged 20 quail and 4 grouse in a day's shooting the banks of Pole creek.

At a meeting of the Solano Board of Supervisors this week the matter of strictly enforcing the game laws was brought up, it having been reported that had been violations of the same in certain parts of county. The Supervisors have decided to take every precaution this year to prevent the killing of game before the season opens, making special reference to the duck hunting season, which commences on October 15th. All officers of the county will be instructed to keep a keen lookout for all violators of the law.

The Watsonville Rod and Gun Club propose to take a band in aiding Game Warden Reed to enforce the game laws in that part of Santa Cruz county. The hunting of game out of the season should be deemed an obsolete custom.

Live specimens of mountain quail, cinnamon teal, butterball and "ring neck" ducks are desired for Eastern collector. The editor would feel under obligations if any one who is able to furnish such birds would send in a communication stating particulars.

Shooting wild pigs is the latest hunting divers of big Jim Jeffries, the champion pugilist.

Accompanied by his old-time friend, Dave Bran Jeffries left Los Angeles this week for Yuma, with the double purpose of inspecting a promising mine claim, and shooting a few of the wild hogs which rapidly making the Lower California country famous among lovers of dangerous game.

The party of two is making a flying trip this time and will probably be gone only a week, but this is a abundant time to allow the pair two or three day first class sport.

At Yuma, they took a boat, with an Indian guide already engaged, and went down the river to Mexico. About thirty miles run on the swift current of the Colorado will take them into first class country. On each side of the river are extensive tule marshes. Millions of ducks, geese, bay snipe and other water birds may be found in the Colorado estuary there. But it is in the tules themselves that the characteristic game of the section is found.

Herds of hundreds of big black pigs, not the best coarse swine of the pen, clean built, athletic and with tusks several inches long, keen as razors, and the speed of a deer, dangerous game to hunt, as well as splendid meat when in the larder, make their home in the river marshes. Their origin is rather doubtful, but those familiar with the country believe they are the progeny of escaped domestic hogs, wild and gone back to the state of nature. Any one who has seen a Georgia razorback boar can have a good idea of what these wild Colorado hogs look like.

As their principal food is the pungent tule roots, creatures attain a peculiar delicate and pleasuring flavor, it is said, and being on the run much of the time they do not become greasy like most hot climate pork. They form the principal food of the miner who live in this section, and hunters report it is possible to pay the expenses of a trip and equipment shooting hogs and selling their carcasses to these consumers, who are too busy to kill their own meat.

Hunting the Colorado river pigs is a work of enormous danger to satisfy nearly any pursuer of big game. Like their smaller cousins, the peccaries, they are very fierce when disturbed. Their speed and agility makes them a different proposition from an ordinary hog. They lay in the tules all day and hunters who make a business of pursuing them, have a small party of muzzled dogs, half Hound, half Bull Terrier, which are slipped in to rout out the porkers. Without muzzles, they would get into a fight with the hunters and be killed, but with their jaws closed they can root and worry the game until it bursts from the tules with a series of loud grunts and starts across cleared land for another lair, perhaps some hundred yards away. At these times the hunters get their deadly work, and often a dozen hogs will strewn in front of a pair of shooters as the troop of one drive.

The danger of hunting lies in the direction the pigs take when coming out of the tules. If they should head direct for the hunters, there is every prospect of a hand-to-hand encounter, and perhaps fatal injury. For this reason hunters usually shun from horse-back, or erect small platforms using this purpose the stubby trees of the country where practicable. Often when repeatedly routed out, hogs become very ugly, and go out of their way to make trouble. Some Los Angeles shooters who once tried the Colorado pig game report being tired out by night by a drove of them, and the sensation of gnawing tusks, frothing mouths, and occasional blows to the tree butt was by no means a pleasant one.

A Road Into the Big Basin.

At a recent meeting of the Santa Cruz Board of Supervisors it was by resolution declared to be the intention of the Board to construct the Boulder Crater and Pescadero road, providing that deeds for an obstructed right of way be given to the county and that this county (Santa Cruz) complete the road from the Santa Cruz county line to Pescadero towards the cost of construction, \$6000, the sum of \$2 has been subscribed.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

THE FARM.

District Fairs Needed.

Mr. E. C. Peart, one of the leading merchants and stock raisers of Colusa county, writes as follows to the Sacramento Bee:

Permit me space to express my opinion in regard to your State Fair that has just closed.

I am reliably informed it fell below, both in attendance and enthusiasm, any fair held in years at your beautiful city.

In order to make the State Fair or any other enterprise at the State Capital a drawing card or success, it is important to interest the people from every section of the State. You cannot succeed by interesting your home people only, you have them with you, anyway.

Allow me to say, the greatest drawback to you this season and one that will continue to grow, was the lack of district fairs. The district fair is simply a feeder to your State fair.

Show me an enterprising stock raiser who could afford to keep or put a string of good racing material in condition simply to attend and compete at a State fair. It takes time, money and enterprise to condition stock of his class. With district fairs they have the means of competing at different places for purses and premiums.

Let us take, for instance, twenty or thirty counties in California that hold these fairs. Each locality has good stock. When they start around the circuit; each particular place has a large following, and with each meeting the interest in the fairs increase. After these District Fairs are over, they all look forward to a gala time at State Fair. This is your success. Every man has influence. When there is interest you get the people; when the interest dies out people remain at home. That was the case this year. How about District Fairs in 1903? Did we bear of any? I think not.

To what cause do we attribute this? A County Fair must be an agricultural fair. It cannot be held without State aid. You will remember we have had a small appropriation for such fairs for several years until 1903. This money has been expended strictly within the letter of the law, viz, for premiums on stock and agricultural products. Not one penny of these appropriations is allowed to go for speed contests. Did the State treat the people right in 1903 in not allowing these appropriations as heretofore for said fairs? I voice my sentiments, and think I can get 10,000 good American citizens and voters of California who will endorse my ideas. Men that are interested in breeding and raising fine stock who will say, "No," emphatically "No."

Next, does it change the rate of taxation to make these small appropriations? No.

If we will look back a few years, I think every taxpayer will say no.

Then, we must have these appropriations back with increased amounts. Otherwise you will be forced by circumstances over which the dear people have no control, to turn the Agricultural Park track over to the Automobile Association, where the machines may run at a two-minute gait. But I would tremble to see my good friend the Governor, and Commissioner Ryan, on one, as the explosion of a tire would land a man in eternity without even a chance to say good-bye to his mother-in-law.

E. C. PEART.

Colusa, September 15th.

No definite time can be specified for breeding stock. When they are large enough and strong enough, breed.

Feeding and Breeding Hogs.

To begin with one must have hogs which are good feeders, prolific and with strong constitutions. For a good many years I have been raising Duroc-Jerseys and find them very satisfactory, writes H. F. Hartman in *Orange Judd Farmer*. The sows are good mothers, farrow large litters of pigs and this breed is quite free from disease.

I never keep a sow that does not raise from 18 to 20 pigs a year. Last summer four of my Duroc sows farrowed 42 pigs and raised 38 of them. I do not breed them for a litter. My sows run on a pasture all the time. I think this has much to do with their being able to raise large litters. I run them in a 30-acre weeds pasture and then supply in addition rye or rape for green feed and use slop stuff and bran, but seldom feed much corn until the pigs are four to six months old. I feed turnips to all my breeding stock during the winter and spring, until the grass comes. This gives them a variety and in my opinion is instrumental in building up good hogs.

Anyone can put fat on hogs, but it requires some skill to secure a good frame. I took a trip through Kansas recently and found that many Kansas farmers had fed little but corn and kept their sows too fat. As a result they secured small litters and pigs which were not healthy. That kind of hog raising does not pay. Feed less corn and more oats and bran.

I use single hog houses for my sows, measuring 7x7 feet, with a slanting roof 5 feet above the ground in front and 3 feet above at the back. I place a 2x4 as a fender 6 inches from the wall all around, to keep the sows from killing their young pigs.

Begin with the pigs when three or four weeks old. They will soon learn to eat a mixture of bran and milk and this will make them grow very rapidly. Make a thick slop of this and add a handful of oil meal to each pail of the mixture. I have had pigs weigh 40 to 60 pounds at two months old, at which time I begin feeding a little corn. For two months more I feed corn rather lightly and then if I want to send my hogs to market, I begin to feed more heavily, often securing a 200-pound pig at six months. However, if you want to keep the pigs as breeders, do not crowd them so rapidly. A breeding pig need not weigh more than 150 pounds at six months and 175 to 200 pounds at eight to ten months.

Causes of Tainted Milk.

The Swiss scientist, Dr. Gerber, gives the following causes of bad or tainted milk:

1. Poor, decayed fodders, or irrational methods of feeding.
2. Poor, dirty water used for drinking water or for the washing of utensils.
3. Foul air in cow stable, or the cows lying in their own dung.
4. Lack of cleanliness in milking; manure particles on udder.
5. Keeping the milk long in too warm, poorly ventilated and dirty places.
6. Neglecting to cool the milk rapidly directly after milking.
7. Lack of cleanliness in the care of the milk, from which causes the greater number of milk taints arise.
8. Poor transportation facilities.
9. Sick cows, udder diseases, etc.
10. Cows being in heat.
11. Mixing fresh and old milk in the same can.
12. Rusty tin pails and tin cans.

Experts estimate that Great Britain will this year have to import 210,000,000 bushels of wheat to supplement the crop, which is estimated at 40,000,000 bushels. Crop conditions in France indicate that the British appetite for bread will have to be satisfied from the American crop.

Jackson's Napa Soda does not tangle the feet.

Dairymen's Union.

The dairymen of the counties about the bay who furnish milk to the markets of San Francisco have for several months been doing their business under a combination of interests. They have organized under the title of the Bay Counties Commercial Company and have offices at 405 Front street. The company includes dairymen of Marin, Alameda, Contra Costa, San Joaquin, San Mateo, Santa Clara and San Francisco counties, and at present it controls about 90 per cent of the milk that is shipped to this city and delivered by retailers. Last February the company was incorporated. It buys the milk from the producers at a fixed price delivered in the city, and it sells to the dealers and deliverers.

The directors of the company are M. T. Frietas, a large milk shipper of Marin county and commission merchant of this city who is also its president; R. D. Hatch of Novato; M. Johnson, who has a herd of about a thousand cows in San Joaquin county; N. Hansen of San Francisco; F. Machado of San Mateo and F. Pohlman of Alvarado. F. J. McGuire is the secretary and business agent of the company. Sixty of the largest dairymen in these counties are interested in the company.

This company was formed shortly after efforts were started to absorb the interests of the various milk distributors of the city into one large concern. Its inception was mainly due to the fact that the city dealers had united and raised the prices of milk to the consumers and the producers concluded that if the consumers were obliged to pay more for the product they should at least share in the increase. The company by its efforts now disposes of the milk to the distributors and the city dealers at 14 cents a gallon, while a short time ago the price the producers received was only 10 cents. The company on the strength of this increased price contracts with the dealers and deliverers that it will supply them with milk of the best quality and it demands of the shippers that the milk sent to the city shall at least be of a standard of three and six-tenths of butter fat and it is the purpose of the company to employ an expert to test closely all the milk that the company receives and puts out.

In raising hand-fed animals, one of the greatest mistakes is in expecting them to eat too much.

Live Stock Notes.

A mule gets along better than a horse because he looks out for himself better.

Pigs confined in a pen need plenty of green food; give them weeds, green corn, green fruit, etc.

Fat, corn-fed sows are apt to have small litters of pigs; those in lower flesh are more prolific.

In handling fractious cattle a rope around the horns gives a man a great advantage. But nothing subdues like persistent kind treatment.

In Japan stable doors open at the front and the horse is backed into his stall. When needed, the door is opened and the horse is led out.

Few things have been found equal to skim milk and ground oats as a ration for hogs. Corn is too fattening unless the object is to fatten.

Eastern papers say that the fad for docking horses is on the wane. Horse shows, also, have taken action against it and require all horses to have long tails.

In Europe horse beans are common feed for horses, and are considered the necessary food for them when performing long journeys or severe labor.

We read of a cattle raiser who provides a shed in the pasture for his stock. It is hung with hurlap sacks, so that they may walk between them and rub off the flies.

It is a growing opinion that teams need water, when at work, oftener than three times a day, and should have opportunity to take a small drink every time a man is thirsty.

Much care should be taken of a sow with her first brood, because what she does then will largely determine what she will do hereafter. One litter of pigs a year is enough for her.

In feeding horses, it is recommended that hay be fed first, followed by grain. They say that it is like eating pie and cake first, to feed grain first and the substantial afterward.

When horses rest at noon, the harness should be taken off. If the work has been heavy, the shoulders should be bathed with cold water. This should be done especially in the evening.

FOR SALE.

THE PACING GELDING, AL SANDY 2:26 by Wayland W. dam Rapid Ann by Overland. Can pace three heats better than 2:30. Can brush very fast on the road. Also the black pacing gelding, DOC 2:28, one of the best roadsters in the city. Can lower his record several seconds. Both horses are excellent prospects to race. For prices and further particulars address S. WATSON, 235 Douglas street, San Francisco.

F. L. HOWARD, Secy.

N. P. DUNCAN, Pres

Waste of Dairy Products on Farms.

Year in and year out the farmers who make butter for market accept a lower price for it than the creameries demand and get. Fresh creamery butter will average 23 or 24 cents per pound during the entire year in California. Farm butter sells for an average of less than 13 cents and down as low as ten cents per pound. Why this difference? *Kimball's Dairy Farmer* explains it:

In the first place, it cannot be supposed that the farmer's wife, who makes most of the farm butter, can use starters, pasteurize cream, etc., under present conditions. This is impractical for they seldom make more than 3 to 5 pounds at a churning; and, further, if they did try these creamery methods the probabilities are the butter would be no better than at present, for one needs special training in these methods.

But it is a fact that the greater portion of farm dairy butter is very poor, and it is also a fact that this same butter could be made considerably better if different methods were used.

In the first place, the cream should be taken from a single day's milking. Skim it thick and dilute with good, clean sweet milk till it is what we would call good table cream.

Put this into a cylindrical-shaped can and set this can in water tempered to 65 degrees F. Allow it to stand over night. As a usual thing you will find the cream sour in the morning, and, if care has been taken, the sour flavor is clean and sharp. Cool this cream to 58 degrees F. and churn. As soon as the butter breaks and the granules become the size of a grain of wheat, stop churning. Draw off the butter milk, running it through a strainer so that the fine particles of butter will not be wasted. Now wash the butter with good, clean water tempered at 52@56 degrees F.

After allowing the butter to stand in the water for a few minutes draw off the water in the same manner as the butter milk was drawn.

Place the butter upon the butter worker or in the bowl and then sprinkle good dairy salt over it evenly.

Now work for a few minutes at a time, until the salt is all dissolved and evenly distributed throughout the butter. This will require about one hour, but do not work it more than five times during this hour nor longer than two or three minutes at a time.

If this method is followed your butter will generally be very good.

Do not under any consideration churn your butter until it gathers up into a lump. When you do this it is impossible to wash out all the butter milk, and in addition, considerable casein is incorporated in the butter. Casein and butter milk prevent butter from keeping—this being one of the most prominent characteristics of farm butter—it will not keep.

Do not attempt to work all the water out of the butter—the more water left in the butter, the better will be its flavor and the longer it will generally keep.

Variety and Palatability.

In hog raising, one of the most difficult lessons for the beginner to learn, is the importance of furnishing, throughout the entire year, a large variety of good, wholesome food. His one idea usually is corn, or corn and swill, possibly; at any rate, corn forms the basis of the dietary.

The writer, after long experience and repeated trials has discarded the old grain feeding system, except at fattening time. I now pay more attention to nitrogenous, or muscle-forming foods and green pasture. The sow before farrowing is kept on pasture during the spring, summer and fall months, with little or no grain according to the quality of green food furnished by the pasture. If there is a goodly proportion of alfalfa, clover or

rape in connection with either grass or sown sorghum, no corn is fed.

On the other hand, should the supply of forage be deficient in leguminous plants, a mixed sloop of skim-milk, ground oats, shorts and barley is fed at least once a day.

Strictly speaking, rape is not a legume, but in feeding value as a green forage it ranks next to clover and the soybean as a feed for growing hogs and brood sows.

I always try to feed what the animals like best, and where one has a large variety, he will find that the appetites of hogs, are as variable as those of men.

When the pigs are old enough to need a more solid diet than their mother's milk, if kept on pasture they have every opportunity to gather what soits them best. We often feed in addition to regular diet a sloop of ground cereals, in a pen separate from the sows.

In winter, the diet is as varied as in summer. Of course, a little more grain is fed, as it is necessary to provide some heat producing element to the ration. But roots of all kinds are utilized, clover hay, sorghom from the stack or silo, alfalfa hay, pumpkins, stock melons or anything the animals will eat in this line. I find it not only economical, but much better for the digestive organs of the hogs as well. We have not had a diseased hog on our premises in years, and attribute it to the new method of feeding—C. B. Barrett.

Lumpy Jaw.

This disease more often affects cattle than other animals. It is due to a fungus sometimes called the ray fungus or actinomycosis. The fungus occurs upon grass and other vegetation and it is only when it becomes introduced into the tissues that it causes trouble. The disease comes from eating and outside sources and is not contagious in the usual sense of the word. Several animals may become affected while on the same pasture, but this is due to all being exposed alike. Some years the number of cases is greater than others, owing to the greater development of this fungus. The disease affects the jaw more than other parts, due to the fact that the tissues are sometimes broken in the act of chewing and thus permitting infection. Any part of the body may be attacked. The disease is comparatively easy to treat. A drachm of iodide of potash is given twice a day for two weeks to twenty days. For cattle weighing

twelve hundred pounds or more the dose is somewhat increased, and lessened for calves. If pus be present in the lump, it should be let out by incision. In a few refractory cases a second period of treatment may be required after resting for ten days. About eighty per cent of recoveries may be expected. Affected animals should be kept away from the healthy and off the pasture field. In the case of milch cows the milk should not be used.—A. W. Biting, Veterinarian, Purdue University Experiment Station.

It costs as much to feed a mongrel as a thoroughbred and without as good returns for the money spent. Why not save money by keeping the best?

Saves Money **Saves Horses**

The Test of Time

Proves to show that for Spavins, Ring Bones, Curbs, Splints and all forms of Lameness nothing is sure but Kendall's Spavin Cure. When men write like the below after years of experience they know what they are talking about.

Silverton, Col., Jan. 4, 1903.
Dr. B. J. Kendall Co., Enosburg Falls, N.Y.
Dear Sir:—Kendall's Spavin Cure for twenty years has been my cure-all for both horse and man, and has always given satisfaction.
Very truly yours, W. N. SIBSON.

Price \$1.00 for \$5. As a liniment for family use it has no equal. All druggists. Book "A Treatise on the Horse" mailed free. Address DR. B. J. KENDALL CO., ENOSBURG FALLS, YT.

WESTCHESTER RACING ASSOCIATION
(UNDER THE AUSPICES OF THE JOCKEY CLUB.)

Race Course, Morris Park, Westchester, N. Y.

Office, Room 201, 571 Fifth Avenue, New York "The Windsor Arcade."

THE EIGHTH NATIONAL STALLION RACE WITH \$5000 ADDED

To Be Run For by Then Two-Year-Olds During the SPRING MEETING of 1905

ENTRIES FOR STALLIONS TO CLOSE AND NAME Thursday, October 1, 1903

Conditions for Entry of Stallions.

Nominations of Stallions to close and name by midnight of Thursday, October 1, 1903, by subscription of \$50 each, or only \$25 each for stallions which have not sired a winner prior to December 15, 1903. Of the subscriptions for Stallions the nominators of the sires of the first, second and third horses shall receive 25 per cent, 15 per cent and 10 per cent, respectively. The remaining 50 per cent to the winner.

Conditions for the Entry of Foals of 1903, to Close and Name by Midnight, Tuesday, December 15, 1903.

Foals of 1903, the progeny of Stallions duly nominated to be entered and named by midnight of Tuesday, December 15, 1903. Colts and Geldings at \$10 each, Fillies at \$5 each, the only forfeit if declared by December 15, 1904. If left in after December 15, 1904, and declared by April 20, 1905, Colts and Geldings to pay \$30 each, Fillies \$15 each. If left in after April 20, 1905, Colts and Geldings to pay \$60 each, Fillies \$30 each. Starters—Colts, Geldings and Fillies to pay \$100 each additional.

The Westchester Racing Association to add \$5000 and the remaining 50 per cent of the Stallion entrances, of which \$1200 to the second and \$600 to the third. The nominator of the winner to receive \$1000 out of the subscriptions and starting money. Of the subscriptions for Stallions, the nominators of the sires of the first, second and third horses shall receive 25 per cent, 15 per cent and 10 per cent, respectively. Colts to carry 122 lbs., Geldings and Fillies 119 lbs.

The produce of Stallions which have not produced a winner prior to December 15, 1903, allowed 5 lbs. if claimed at time of entry. By filing with the Westchester Racing Association, prior to December 1, 1904, an accepted transfer of the foal's entry, the original subscriber shall be released from liability as to the engagement of the horse, except for the original forfeit of \$10 or \$5.

LAST FIVE FURLONGS OF THE ECLIPSE COURSE 1906.

The Eighth Matron, for Mares covered in 1903, Foals of 1904, to run at the Autumn Meeting, 1906, will close Tuesday, December 15, 1903, for which entry blanks will be duly mailed.

For Entry Blanks apply at the office of the BREEDER AND SPORTSMAN, 36 Geary Street, San Francisco, Cal.

H. G. CRICKMORE, Clerk of the Course.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Carise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

McKinney Stallion AND Fast Road Team FOR SALE.

STALLION TWO YEARS OLD. Dam one of the best bred mares in the State. Colt only fairly broken and can show quarters better than forty seconds. Large and handsome. Entered in all California stakes.

Team well matched, gentle and sound. Will sell separately. Well-broken single, and very fast.

JAMES H. GRAY, Santa Rosa, Cal.

FOR SALE.

Three Standard-Bred Trotting Stallions WILKES STOCK.

One Seal Brown, 16 bands, foaled May 2, 1898; first dam Fearless by Falls 4781 (record 2:23); second dam Jean Perant by Signal 3327.
One Golden Bay, 16.1 bands, foaled March 5, 1898; first dam Signal by Del Sur 1098 (record 2:24); dam of Guy Line 2:29; second dam Lady Signal by Signal 3327.
One Brown, white points, 16.1 bands, foaled April, 1899; full brother to the bay.
These colts are all sired by Prince Airlee 28045, son of Guy Wilkes 2807 (record 2:15 1/4), and bred by Wm. Corbett, San Mateo, Cal. They are pure gaited and show wonderful speed for the little work they have done.
For further particulars apply to P. H. McEVoy, Menlo Park, Cal.

ABSOLUTELY REMOVES CURBS, SPLINTS, SPAVINS, WIND PUFFS, BUNCHES.

Quinn's Ointment

Your stable is not complete without Quinn's Ointment. An infallible cure for all ordinary horse afflictions. Follow the example set by the leading horsemen of the world and your stable shelf will always hold a bottle of

A. L. Thomas, Supt. Canton Farm, Juliet, Ill., remarks, "I enclose you a amount for six bottles of Quinn's Ointment. After one year's trial must confess it does all you claim for it." For Curbs, Splints, Spavins, Windpuffs or Bunches.

Price \$1.00 per package. Sold by all druggists, or sent by mail.

W. B. EDDY & CO., Whitehall, N. Y.

TRY IT.

Chicken Chatter.

Never fail to feed your birds a well-cooked mash once a day.
Specialists are the order of the day; specialize and be successful.
Keep chicks of the same age together; especially at the feeding time.
Both chickens and orchard will profit by the chickens having free range there.
After caponizing give freely of water but sparingly of food for two or three days.
Stone drinking-vessels keep the water cooler than tin, and therefore are better for the birds
Sunflowers furnish fine shade in the chicken-yard and the seeds make excellent food for the fowls.
Well-ventilated houses where there are no draughts, with clean roosts, nest boxes and floors, assure health.
Add to this perfect absence of dampness within the house, and the impossibility for insect vermin to exist, and all will be well
A tablespoonful of linseed meal added to the mixed feed three times a week is very beneficial for moulting fowls.
Corn and cornmeal fed to fowls two weeks before killing them for market will make them heavier and of better quality.
Cockerels to be caponized should be kept without food and water from twenty-four to forty-eight hours before the operation.
Save your two best spring cockerels for next year's breeding; it is a mistake to keep the late hatched ones that in all probability will be stunted.
It is always best to have a covering of clean, dry soil or sand scattered over the floor. This can be so easily sifted and screened and kept clean.

Sober up on Jackson's Napa Soda.

"SAVE-THE-HORSE" SPAVIN CURE.
It isn't words, it isn't type or page advertisements; it is the truth that ring out sound and clear and impressive—actual results from business men whose standing and reliability can be readily ascertained—which have made "Save-the-Horse" such a success. Their cured horses are living advertisements, absolute certainties as to the possibility of the remedy in your own case, and with every bottle is a guarantee document as binding to protect you as the best legal talent could make it.
The fire iron is uncertain and invariably only aggravates the disease or injury; blistering is less effective than the fire iron, and both necessitate laying up the horse from four weeks to several months. Mercurial and poisonous compounds produce irreparable injury.
"Save-the-Horse" eliminates all these factors; Cures without scar, bluish or loss of hair, can be applied at any time, anywhere, any place, and in all conditions and extremes of weather. Horses may be worked as usual with shin or ankle boots, as no harm can result from destruction of hair or scalding of limb.
Positively and Permanently Cures Bone and Bog Spavin, Thoroughpin, Ringbone (except low ringbone), Curb, Splint, Capped Hock, Windpuff, Shoe Bolt, weak and Sprained Tendons and all Lameness.
Written guarantee with every bottle given under our seal and signature, countersealed solely to satisfy and protect you fully. Need of second bottle is almost improbable, except in rarest of cases. Send for booklet and copy of guarantee. If your case is different than described in our booklet or advertising we will advise you frankly as to the possibility of the remedy effecting a cure. Give explicit particulars. Give the veterinarian's diagnosis, if he is competent. Inform us fully as to the age, development, location of swelling, lameness, previous treatment and describe the way the horse carries and holds leg. \$5.00 per bottle at all druggists and dealers or sent express prepaid.
TROY CHEMICAL CO., TROY, N. Y., also Manufacturers of Veterinary Pixine.

THE MEEK ESTATE, BAYWARDS, CAL.,

will sell all the Standard-bred Horses belonging to the Estate, comprising 35 head. There are Fillies, Mares and Geldings—3 4.5 and 6 years old—by McKiney, Nutwood Wilkes, Welcome and William Harold, nearly all well broken to drive and all halter broken and gentle. The mares have colts at foot by William Harold 2:13 1/4 and Welcome 2:10 1/4, and have been bred back. Among them are the dam and a full sister to Janice 2:08 1/4, a sister to Cricket 2:10 and many other highly bred ones. A fine lot of Shetland Ponies will also be sold to close out the horses belonging to the Estate.

GABILAN STOCK FARM OF HON. JESSE D. CARR will,

at this time, close out all its Trotting-bred Horses. There are 25 head of Yearlings, Two-year-olds and Three-year-olds; also a few highly bred Mares and Geldings. Also the grand young Stallion BOODLE JR. by Boodle out of Nina B by Electioneer. He is one of the greatest young stock horses in California. The young stock is by Boodle Jr., Nutwood Wilkes and other good sires.

THE SALE IS POSITIVE AND WITHOUT RESERVE.

The Means of Getting a Living.

The attitude of the people toward farming and farm life and their estimate of them have greatly changed in the past few years. It is a change which betokens better things and better conditions of living for a far larger number of human beings. Formerly the general notion was that farming was a dull, simple, uninteresting kind of drudgery—simply a means of getting a living for people who could not get it any other way. And the farmer was by too many regarded an out-of-date, simple-minded, old-fashioned kind of person. Anybody could farm—one did not have to learn how, but just knew how without learning. There was not much to learn about it anyway. There was no science, no art about it. We did not go to school to learn how to farm better, but to learn how to do something else. Only those people farmed who could not make something else go.

This has all changed. Now we regard agriculture as the great first business in the world. Now we see that in its practice and in its processes the best of minds may find full, profitable and ennobling exercise for every faculty. Now we know that farm life may be made the safest, happiest, most satisfactory of any. Now we know that in no country and at no time can civilization take and hold a single step in advance of agriculture. Now we know that the state and condition of agriculture at any time, in any country, is the just measure of the state of its civilization. We see and know that agriculture goes before all, gives life to all, sustains all that is of worth and use in what we call civilization. We know that every other trade, art, profession, craft or calling whatsoever is secondary to and dependent upon agriculture, because none could have being, place or use until agriculture gave it birth and sustenance.

Agriculture is the mother and father of them all. We are astonished that we did not sooner see it in this light. Formerly we built colleges and universities to fit our youth for anything and everything except farming. Now we have in the United States and territories more than fifty colleges and stations equipped and manned to acquire agricultural knowledge, develop agricultural science and to teach this science and disseminate this knowledge. In the world there are nearly a thousand such institutions wherein every other science is made to subservise the master science of agriculture. Are we not near to a time when, instead of being astonished at meeting intelligent farmers, it will be a matter of astonishment and even of sadness to meet any who are not intelligent? Already we begin to expect of the farmers we meet that they look and speak and act as men who know and understand, honor and magnify their great calling to farm.—L. H. Herrick.

Points of a Good Feeder.

The whole body of a good feeder must have length and roundness, giving what is generally termed a deep barrel. The deep barrel gives room for the capacious paunch in which the material is gathered from which the blood is derived; and yet the belly will not hang down. It also gives a wide breast projecting well in front of the fore limbs, showing sufficient room for the heart and lungs to perform their proper functions. The animal should be ribbed home—that is, there should be very little space between the ribs and hip bone. This shows a propensity to fatten. The neck should be large where it joins the shoulders and taper well to where it joins the head. The legs should be moderately short and the hocks not large, they should be fleshy to the knee and hock, but not below. The hoofs should be small, the horns fine and the ears thin, eyes prominent and bright. The hide should be thin, mellow and movable and covered with fine, soft hair. It will make considerable difference in the possible profits whether or not the right kind of cattle are selected for feeding.

Vita Oil

No racing stable should be without the greatest of all horse liniments. Cures Rheumatism, Sprains, Cuts, Bruises, Cramps, Colic, Stiffness, Soreness, Aches and Pains. A single trial will prove all we could say.

BALLISTITE

The Standard Dense Powder of the World.

STILL LEADS AT THE TRAPS OR IN THE FIELD.

Ballistite wins from the limit marks in distance handicaps, at either live birds or flying targets, and always gives the highest velocities with the closest and most even patterns at all ranges. Ballistite is absolutely unvarying in results, being waterproof, smokeless, odorless, without residue, and fires lower than black powder, unaffected by age or climatic changes, and never pits, rusts or corrodes the barrels. Ballistite is sold with above guarantee.

Take No One's Word. Try It for Yourself.

CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET. IT PENETRATES and DRIES IN quickly and DOES NOT GUM and FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS AND BRITTLINESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed.

It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.

IT PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH, STRONG, ELASTIC WALL and HEALTHY FROG—a FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds, due to its use.

It is a CERTAIN CURE for THRUSH and SCRATCHES. We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:—Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2½-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied. Don't fail to read "ad." giving information concerning Campbell's Iodoform Gall Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

WINCHESTER "LEADER" SHELLS LEAD

At the Third Annual Target Tournament of the Dominion of Canada Trap Shooting and Game Protective Association, held in Toronto, August 12th to 15th, inclusive, winnings were made as follows:

1st Day: High average for day by Mr. Higginson of Buckingham, Quebec.
 2d Day: Two Men Team Championship of Canada, 20 targets per man, won by Messrs. McGill and Wakefield of Toronto, with score of 37. High average for day won by F. Westbrooke of Brantford.
 3d Day: Parker Gun won by J. Hovey of Clinton, who also won high average.
 4th Day: Grand Canadian Handicap, 100 targets, won by Mr. Craig of Sherbrooke, with a score of 93.

"Mall Trophy," the most important trap shooting trophy in Canada, emblematic of Five Man Team Championship of Canada, won by Brantford Gun Club Team, with score of 222 out of 250.

The Montreal Rolling Mills Company Cup, emblematic of Individual Championship of Canada, won by Mr. Bain of Winnipeg, with a score of 48 out of 50 targets.

High average for the day—"Beresford Cigar" Cup—won by Mr. Hovey.

All these splendid victories were won with Winchester "Leader" Shells, and are a forcible testimony to the uniformity of these goods.

Peoltcece II, ch m, 1893, by imp. Great Tom-Irrepentance by Iroquois; Merol by imp. Woodlands. Bred to The Commoner.
Preteoce, ch m, 1886 (dam of The Parader, winner of the Realization Stakes, &c, and six other winners), by Plenip. Bred to The Commoner.
Fansy Blossom, br m, 1887 (dam of Sergeant, The Bobby, &c), by Bramble-Paney by imp. Glengarry. Bred to Inspector B.
Salaire, cb m, 1891 (a winner), by Salvator-Sozodont by Longfellow; Sally Morgan by Revenue. Bred to imp. Loyalist.
Sulsun, hr m, 1891 (a stake winner of 14 races), by Strathmore-Beatrice by imp. Bonnie Scotland-Banastar's family. Bred to The Commoner.
Soh Rosa, b m, 1891 (a winner), by imp. Sir Modred-Rosa G. (dam of eight winners) by Leinster; Ada A by Asteroid. Bred to Inspector B.
Satellite, hr m, 1891 (a winner and dam of winners), by Luke Blackburn-Marvie B. by Longfellow. Bred to The Commoner.
Sif Jr., b m, 1892 (dam of winners), by Emperor-Sif by imp. Pizarro; Susan Ann by Lexington-Ihora's family. Bred to Inspector B.
Rosa Bookden, h m, 1886 (dam of five winners), by imp. Rossifer-Krick by imp. Buckden. Bred to Inspector B.
Tulla Fonso, h m, 1896 (a winner), by Fonso-Tulla Blackhurn (25 winners) by Luke Blackburn-Levity family. Bred to The Commoner.
Treachle, b m, 1895 (half sister to Buck Massie's dam), by imp. Great Tom-Triangle by Gilroy. Bred to The Commoner.
Touch Not, h m, 1894 (dam of Tom Kenny, &c), by Tremont-Touch-Me-Not by imp. Great Tom. Bred to The Commoner.
Taffeta, ch m, 1891 (dam of Dr. Riddle, &c), by imp. Great Tom-Bridesmaid by imp. Bonnie Scotland-Levity family. Bred to imp. Loyalist.
Talaria, ch m, 1891 (dam of Amoroso), by imp. Great Tom-Vanilla by Jack Malone. Bred to Inspector B.
Tommie Belle, h m, 1887 (dam of eight winners), by imp. Great Tom-Bonnie Belle by imp. Bonnie Scotland. Bred to Inspector B.
Valeriana, h m, 1894 (dam of Sans Pareil II), by imp. Great Tom-Valerian by Vandal. Bred to imp. Loyalist.
Vestige, h m, 1895 (dam of Stand Pat), by imp. Great Tom-Valerian by Vandal. Bred to The Commoner.
Wauda, ch m, 1892 (a great stake winner and dam of winners), by imp. Mortemer-Minnie Minor by Lexington. Bred to The Commoner.

Weanlings.

Bay Colt by The Commoner-All Mine.
Bay Filly by The Commoner-Euphrasia.
Chestnut Colt by The Commoner-Great Annie.
Chestnut Colt by The Commoner-imp. Landstip.
Chestnut Colt by The Commoner-Lythe.
Bay Colt by The Commoner-Mountain Mist.
Chestnut Colt by The Commoner-Maud Ward.
Chestnut Colt by The Commoner-Penitence II.
Chestnut Colt by The Commoner-Pretense.
Chestnut Colt by The Commoner-Plazza.
Chestnut Colt by The Commoner-Satellite.
Bay Colt by The Commoner-Treachle.
Bay Filly by The Commoner-Tulla Fonso.

THE WEEKLY

BREEDER AND SPORTSMAN

F. W. KELLEY, PROPRIETOR.

Turf and Sporting Authority of the Pacific Coast.

—OFFICE—

36 GEARY STREET, SAN FRANCISCO.

P. O. BOX 2300.

TELEPHONE: Black 586.

Terms—One Year \$3, Six Months \$1.75, Three Months \$1 STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter addressed to F. W. KELLEY, 36 Geary St., San Francisco, Cal. Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

San Francisco, Saturday, Oct. 3, 1903.

MAJOR DELMAR, son of Delmar, he by Electioneer, is the second trotter to take a record of two minutes. He accomplished the feat at Empire City track on Friday of last week, just a month and a day after Lou Dillon had set the world's record in the same notch. Great was Major Delmar's achievement as there was a strong wind blowing at the time. His mile was not rated as well as the mare's, as he was at the three-quarter pole in 1:59, too fast a clip for even a two minute horse and he tired coming home. The time of his second quarter was 28½ seconds, which is the fastest quarter a trotter has ever been timed, and shows him to be one of the trotting marvels of the age. When Lou Dillon trotted a quarter in 28½ seconds in her only futile effort to lower the record, horsemen were astonished at her marvelous flight of speed, but Major Delmar has beaten that wonderful quarter by a fraction of a second. It will be pleasant to remember in years to come that during the season of 1903, the year when the most famous breeding farm of the world, Palo Alto, was finally dispersed, a trotter sired by Delmar, a horse bred by the honored founder of the great farm according to his theory of having the thoroughbred cross close up, trotted to the world's record of two minutes and showed the greatest flight of speed ever shown by a trotting horse.

ANOTHER \$6000 STAKE has been started by the Pacific Coast Trotting Horse Breeders Association. It is Stake No. 4 and is for the get of mares bred in 1903, to trot or pace as two year olds in 1906 and as three year olds in 1907. Owing to the popularity of these stakes in the past, the association has decided to reduce the amount of the first payment to \$2, instead of \$3 as formerly required. In the advertising columns of this issue of the BREEDER AND SPORTSMAN will be found the full particulars and conditions of Pacific Breeders Futurity No. 4, the title of this stake, and we ask every breeder to read the advertisement carefully. There is no question but the very best investment a breeder can make is the money he pays out for entrance in stakes as it is not wasted even though he does not win. It advertises his stallion, mares and his farm, and leads to sales and business in many ways. Then, if one gets a winner the glory and the profit are great. Stakes are the very life of the breeding business and every stake aids in keeping up the value of harness horses. Don't fail to nominate your mare bred this year in the Pacific Breeders Futurity Stake No. 4. It will be a good investment.

BEAUTIFUL BELLS is once more in the lead as the dam of more standard performers than any other mare living or dead. At Lexington a couple of weeks ago Adehel, her daughter by Advertiser trotted to a record of 2:29½, making the eleventh standard trotter produced by the daughter of The Moor. The same week Rowellan by Adhell, son of Beautiful Bells took a record of 2:09½, making Adhell the fourth of her sons to produce a 2:10 performer. Beautiful Bells has eight producing sons and two producing daughters. The grand old mare is still enjoying good health at Palo Alto farm at the age of 31 years. Her last foal was Monhells 2:23½, foaled in 1897, and that many believe will prove her greatest producing son.

SOME BIG STAKES will be announced not later than February next by the Pacific Coast Trotting Horse Breeders Association for the meeting of 1904. The Directors have found that early closing stakes of good value are profitable to the horsemen as well as to the association, and will offer larger stakes next year than heretofore. The Directors of the State Agricultural Society are also in favor of making early announcements next season, and giving several big stakes for harness horses. It begins to look as if there is to be a general waking up all along the line of the harness circuit.

Successful Auction Sale.

A crowd that filled every seat and all the standing room in Fred H. Chase & Co's big iron pavilion was there last Tuesday evening, the date of sale of the Meek Estate and Gablian Farm horses. It was the most successful sale held in this city for some time, bidding being lively and prices good. In some instances horses were sold for less than their value and in others more money was bid than the owners expected, but the average was good and fairly shows the condition of the market in this city. The highest price brought by any of the Meek Estate horses was \$610 paid by Mr. W. Landers of this city for Fancy 2:27, a four year old mare by Welcome 2:10½. The largest figure of the Gablian Farm horses belonging to Hon. Jesse D. Carr was \$500 paid by Eugene Cerciat of this city for Larkin W., a chestnut trotting gelding by Boodle Jr. The sale was splendidly managed by Fred Chase, and his able assistants, Thos. Bonner, W. W. Mendenhall and the auctioneer W. H. Hord. The record of the sale is as follows:

CONSIGNMENT OF MEEK ESTATE.

Cyrene 2:27½, blk m, 1891, by Guide 2:16¼ dam Alice R., by Nauduc, to E. A. Howard for \$184.
 Leonora, b m, 1891, by Lustre 2:22, dam Eleanor by Richard's Elector, to Jas. Irvine for \$135.
 Facy 2:27, b m, 1899, by Welcome 2:10½, dam Nancy by Delegate to W. Landers for \$610
 Fanny, ch m, 1894, by Nutwood Wilkes 2:16½, dam Patti by Nutwood Wilkes to E. B. Buckman for \$320.
 Directress, blk m, 1895, by Direct 2:05½, dam Dusk by Mambrino Wilkes, to M. C. Delano for \$260.
 Linda, br m, 1890, by Hawthorne, dam Bonnie B., by Chieftain 721 to L. M. Ladd for \$160.
 Winnie, b m, 1895, by McKinney 2:11¼, dam Edwina 2:21½, by Sicy, to E. B. Buckman for \$230.
 Edwina 2:21½, ch m, 1891, by Sidney, dam Lady Bell, by Chieftain 721, to A. E. Buckman for \$300.
 Nancy, blk m, 1890, by Delegate, dam Fly by Jonathan, to Geo. B. M. Gray for \$145.
 Fenella, b m, 1889, by Fallis 4781, dam Patti by Nutwood, to James Faris, Jr. for \$260.
 Judith, br m, 1897, by William Harold 2:13¼, dam Fenella by Fallis, to James Faris, Jr. for \$215.
 Dan Burns 2:15, br g, 1899, by William Harold, dam Linda by Hawthorne, to King Bedley for \$150.
 Bay gelding 1899, by Azmoor 2:40½, dam Elsie by Gen. Benton, to J. B. Hoyt for \$155.
 Carmelita, br m, 1892, by Steinway, dam Witch by Dolphin, to W. Bellini for \$130.
 Swift, b g, 1898, by Welcome, dam Vidu, by Grand Moor, to J. H. Glide for \$230.
 Ethel, b f, 1899, by Welcome, dam Norella by Lustre 2:22, to Cass Havens for \$210.
 Alberta, b f, 1901, by Welcome, dam Norella by Lustre, to H. Scheller for \$125.
 Norella, b m, 1892, by Lustre 2:22, dam Eleanor by Richard's Elector to C. K. Nessen for \$120.
 Welbird, br f, 1900, by Welcome, dam by Cleveland Bay stallion, to E. B. Stone for \$125.
 Devey, b g, 1900, by Welcome, dam Lenora by Lustre, to Jos. Cuccello for \$115.
 Miriam, b f, 1900, by William Harold, dam Eleanor by Richard's Elector, to J. B. Hoyt for \$125.
 Birdie, b m, 1899, by Welcome, dam by Cleveland Bay stallion, to Geo. B. M. Gray for \$160.
 Lucy Long, b m, 1899, by Welcome, dam Lucy by Combination, to J. B. Hoyt for \$175.
 Louisa, br m, by Welcome, dam Lenora by Lustre, to J. H. Glide for \$275.
 Rose, b m, 1894, by Will Tricks, dam by Local Option, to W. Bellini for \$80.
 Tom, b g, 1895, by Bay Rose, dam Belle Isle by Piedmont, to J. H. Glide for \$160.
 Sis, ch m, 1895, by Will Tricks, dam Adeline by Roe Allen, to L. M. Ladd for \$135.
 Fred, b g, 1900, by Welcome, dam Kate by Jim Lick, to J. Paulsen for \$100.
 Dick, br g, 1900, by Welcome, dam Belle by King, to E. B. Stone for \$150.
 Fontanita, br m, 1898, by Antevolo 2:19¼, dam Fontana by Almont 33, to C. J. Schuster for \$65.
 Molly Mac, b m, 1898, by McKinney 2:11¼, dam Fontanita by Antevolo, to Jos. Cuccello for \$300
 Total for 29 head \$5277, an average of \$201.

CONSIGNMENT OF J. D. CARR.

Cheerful, br f, 1901, by Boodle Jr., dam Delight by Eugeneer to Geo. Dally for \$80.
 Laila, b f, 1901, by Boodle Jr., dam Alameda C. by Gablian, to R. W. Kenney for \$95.
 Larkin W., ch g, 1899, by Boodle Jr., dam Isabella McCa by Lottery, to Eugeneer for \$500.
 Monogram, g m, 1896, by Fairmont, dam Nancy H. by imp. Lawyer, to J. D. Hannah for \$275
 Metrees, ch f, 1891, by Dictatus 2:17, dam Nina B. by Electioneer, to R. Brown for \$125.
 Hermitania, b f, 1901, by Boodle Jr., dam Martha by Mambrino Jr., to A. E. Buckman for \$80.
 Neva G., br f, 1901, by Boodle 2:12¼, dam Surprise by Abbottsford, to C. L. Jones for \$75.
 Lildine Wilkes, ch f, 1901, by Nutwood Wilkes, dam Lildine by Boodle, to James Faris, Jr for \$190.
 Sellm, br g, 1901, by Boodle Jr., dam Epha by Eugeneer, to John McCormick for \$160.50.
 Uncle Ned, b g, 1901, by Boodle Jr., dam Sausal Maid by Gablian, to R. W. Kenney for \$45.
 Kumbucks, b f, 1901, by Dictatus 2:17, dam Juanita by Bay Rum, to Dan McCormick for \$147.50.
 Peggotty, b f, 1901, by Boodle Jr., dam Flora by Reno, to James Quinn for \$75.
 Gold Coin, b g, 1900, by Boodle, Jr., dam Isabella McCa by Lottery, to G. W. Hind for \$300.
 Del Monte, b g, 1900, by Boodle, Jr., dam Rita V. by Direct Line, to G. W. Hind for \$150.
 Lady Bird, b f, 1901, by Boodle, Jr., dam Lady Palmer by Carr's Mambrino, to A. L. Murphy for \$60.
 Esperanza, br f, to Dan McCarty for \$72.50, by Carr's Mambrino, to W. Boodle, Jr., dam Flossie by Carr's Mambrino, to W. Hill for \$50.
 Oliver C., blk g, 1899, by Ecco 15,993, dam Eunike by Carr's Mambrino, to The Swift Co. for \$125.
 Kitty S., ch f, 1900, by Nutwood Wilkes, dam Flossie by Carr's Mambrino to Jos. Cuccello for \$300.
 Martha, b m, 1896, by Mambrino, Jr., dam Gablian Maid, by Carr's Mambrino, to Dan McCarty for \$72.50.
 Dora, b m, 1890, by Reno, dam Martha by Mambrino Jr., to G. W. Scott for \$40.
 Lady Palmer b m, 1887, by Carr's Mambrino, dam Vitress by Luciona, to H. Borenuo for \$25
 Total for 21 head, \$3242.50, an average of \$153.33.

At the conclusion of this sale seven geldings and mares, the property of different parties, were sold at prices varying from \$100 to \$200.

While it will be at least a year before the half mile oval speed track is constructed in Golden Gate Park, it will be one of the most perfect tracks in the country when completed. The track will be eighty feet wide and thrown up well on the turns. In the infield there will be a lawn covered polo field, a cinder path and athletic grounds for collegiate and public school field days. It will be a great acquisition to San Francisco's great park.

Passing of Palo Alto.

Palo Alto has been selling and weeding out for years, and the breeding stud has been gradually reduced until now it is a fraction of what it was ten years ago. With the decrease in numbers came an increase in quality, for there was always the hope that on a reduced scale the breeding of trotters would be continued indefinitely at the world-famous establishment. Such, however, is not to be, for the final dispersal takes place at the "Old Glory" auction next November in Madison Square Garden. There is not a stallion or mare now remaining in this far-famed stud that is not of special value from a breeding standpoint.

The stallions include Monhells 2:33½ by Mendocino 2:19½ out of Beautiful Bells 2:29½; Nazote 2:28½ the brother of Azote 2:01½, and Exioneer, a six year old black by Boodle 2:12½, out of Expressive 2:12½ at three years.

Among the mares are eight daughters of Electioneer with records—all from great broodmares—three of them already noted as dams of winners. There are five mares by Palo Alto 2:08½—four with records below 2:20 as two and three year olds. The advanced breeder who believes in early speed would class these as practically priceless—more especially when the merit of their dams is taken into account. The fifth is Aerolite from Mannette (dam of Arion (4) 2:07½), now with foal to Mendocino 2:19½, sire of Monte Carlo 2:07½. Two of the famous speed producers are Elden (3) 2:19½, dam of Eleata 2:08½ (largest winner of 1901), and Rowena (3) 2:17, dam of Rowellan 2:09½ (winner of Horse Review Stake at three years, defeating Hawthorne, etc.) Lulu Wilkes, dam of Advertiser 2:15½, with a daughter and granddaughter, are in the sale. There are two daughters of Elsie and one of Elaine 2:20, her dam. This is the most successful line of three generations of great broodmares that exists—Green Mountain Maid, Elaine, Elsie. Wildmont (2) 2:27 and Sweetwater (2) 2:26 are out of champion trotting fillies, viz: Wildflower (2) 2:21 and Manzanita (4) 2:16. Beautiful Bells 2:29½, the greatest mother of trotters, has a daughter and two granddaughters in the consignment. Besides these are daughters of Clarabel, May Queen 2:20, Columbine, Lady Ellen 2:29½, Sprite, Emma Rohson, Suzette 2:23½, Lucyneer, Esther, Ashby—all good broodmares. Sunalite by Advertiser 2:15½, out of Waxana, dam of Sunol 2:08½ will not be overlooked. These mares have been bred to Nutwood Wilkes 2:16½ (sire of John A. McKerron 2:04½), Mendocino 2:19½ (sire of Monte Carlo 2:07½), Monhells 2:23½ (youngest son of Beautiful Bells 2:29½), or Nazote (the brother of Azote 2:04½).

The members of the Los Angeles Driving Club will hold their annual meeting next Monday. At that time officers will be elected, reports of the present officers read and plans made for the season's racing, which is to open as usual Thanksgiving Day, with a matinee. The club is in a prosperous condition and has on its membership roll owners of many of the speedy animals in Southern California. Others have applied for membership and next year gives promise of being the best in the history of the organization. This club has done more to create interest in harness racing in Los Angeles than any other organization. At the time the club was organized races were given about once a year, at the fair meeting. Enthusiasts in this sport took hold of it, and the driving club was the result. Now the matinees of the club are well attended and the interest taken is great. The fact that the horses are started and raced on merit and for love of the sport makes it all the more pleasing.—Los Angeles Express.

JOTTINGS.

THE CENTURY MAGAZINE'S EDITOR has been huncued. A fellow by the name of John Gilmer Speed has written, and the afnresaid magazine has printed in its September number an article entitled "The Horse in America," which is featured as the leading article of that issue, but is simply an advertisement. Mr. Speed probably was aware that few people know much of the technical side of horse breeding, (the esteemed editor of the *Century* doubtless among them) and has cunningly foisted upon the magazine an article that is conspicuous for its mis-statements and very ingeniously worded and illustrated to advertise the breeding farm of Mr. Randolph Huntington, a very worthy gentleman who has spent a fortune vainly trying to produce a type of horse that is certainly in demand, but which is produced, as the records of the horse shows prove, by other men who have less money but the practical common sense that teaches them to use the blood of the American trotter to accomplish their purpose. Mr. John Gilmer Speed for some reason has formed a great dislike to the American trotting horse, and to those who breed, own or train them. He says the latter "are looked upon with suspicion" and "visited with social exclusion," making it very evident that such men as the late Robert Bonner, Senator Stanford, B. F. Tracy, Senator Jones, and others too numerous to mention did not move in his set. He makes an attack upon Hambletonian 10 presumably because the Hero of Chester is dead, and does it so viciously and dramatically that one can almost see his heels striking the dead lion's carcass and hear the exulting hee-haws with which he accompanies the onslaught. The entire burden of Mr. Speed's song is that the American trotter is a failure for anything but the race track and that he is a failure there, as according to his figures but two per cent of those bred have speed enough to earn anything. He asserts that the Clays, the Morgans and the Gold-dusts are the only American horses that can reproduce their type, and makes the brilliant statement that the Morgan type was fixed by Arabian blood before the birth of the horse Justin Morgan that has been supposed to have founded the family. Mr. Speed also claims that it is the blood of the Arab horse, the horse of the desert, that alone can establish a type, and to show to his readers what this type is he reproduces in his article a couple of fixed up and exaggerated drawings of the two stallions sent President U. S. Grant by the Sultan of Turkey in 1879. He also prints several photo-engravings of Mr. Huntington's Americo-Arab horses that show them to be pretty fair looking specimens but not the equal in looks, size, substance or quality of hundreds, yes thousands of standard bred trotters that are seen on the tracks and in the salesrings every day.

Among other statements made by Mr. Speed is this: "The American trotting horses have not the substance for carriage horses." If he will look the Horse Show Blue Book through carefully he will find that nearly all the blue ribbon winners in the carriage classes are trotting bred, and a large proportion standard and registered.

Again he says: "They are coupled too long to carry weight under the saddle," and yet the English, German and French army experts assert that the American cavalry is the best mounted in the world and every horseman knows that a vast majority of the horses used in the American army were sired by American trotting bred stallions. Mr. Speed should start himself out on a tour of investigation before he writes another article on a subject he knows so little about.

Let him take his note book and pencil and go through the streets of any American city or the parks where the people drive. Let him stop all persons that are driving good looking horses of the types most desirable for carriage, trap, coach, gig, brougham, run-about, surry or speed wagon and ask how the horses drawing the vehicles are bred. If he will pursue this search honestly for one day or one week, he will not only have learned something about horses, but he will have a list of names long enough to convince him that the trotting bred horse is the horse used most by Americans and that he fills the bill as to size, style, conformation, endurance and everything else that goes to make up the rich man's or the poor man's ideal horse.

Mr. John Gilmer Speed evidently made the editor of the *Century* believe he is an authority on matters pertaining to the American horse, but from his article in question one is led to surmise that all his knowledge of horses was gained in his early childhood, and consisted of committing to memory and

reciting some Friday afternoon Caroline Elizabeth Norton's poem entitled "The Arab to His Horse," and beginning

"My beautiful, my beautiful; thou standest meekly by,
With proudly arched and glossy neck and dark and fiery eye."

After any person at all acquainted with the American trotting bred horse reads the *Century* article he will naturally ask himself the question, "If one of the leading American magazines publishes such utter rot on the question of horse breeding, is it not likely that it prints articles on other subjects that, while given out as the work of experts, may be as untrue and misleading as this one of Mr. John Gilmer Speed's?" and like the historical razors peddled by "a fellow in a market town," simply made to sell.

It is now thought that Lou Milton, the dam of Lou Dillon 2:00, is again in foal to Sidrey Dillon. It was thought the old mare was beyond the age of usefulness, but Mr. William G. Layng, who is preparing a catalogue of all the stock remaining on the Santa Rosa Stock Farm, tells me that Lou Milton gives every indication of being in foal once more. Frank Turner, superintendent of the farm, told me some time ago that the old mare has been in splendid shape this year, and one would never guess her to be more than ten or twelve years old. If she should produce a brother or sister to Lou Dillon the value of the foal would be almost priceless, and the chances are that the old mare would breed again. An effort is being made to trace, if possible, the pedigree of Lou Milton's dam. There are many people, who claim to be acquainted with the facts, who say that the Relston mare was not her dam, but that a mare once owned in Lake county is entitled to the honor of having produced Lou Milton. The fact that Milton Medium was owned in Lake county and made several seasons there lends color to this theory, and it may be that something definite may yet be learned about the grandam of the first two-minute trotter. There are two or three parties who have been corresponded with in the matter who may be able to give reliable and accurate testimony, and the pedigree of Lou Dillon may yet be cleared up. The writer has received letters from several different parties who claim to know something of the mare's pedigree, but until further investigation is had and more definite proof furnished I do not feel justified in publishing these claims.

Now that Major Delmar has trotted a mile in two minutes and tied the world's record made August 24th by Lou Dillon, he is being given considerable space in the papers, but as my friend Sam Gamble says, not half as much as he deserves. Major Delmar is a great horse, in my opinion a greater trotter than Lou Dillon if the records are taken as the test. It may be that in the future contests against the scythe bearer that the little California mare will still further lower the record and set a mark that even Major Delmar cannot reach, and I hope so, as she is purely a California production, but at present the son of Delmar has it over her a little. In the first place he is a game and tried race horse. Last year he was campaigned on the Grand Circuit and won nine races and \$22,625 in purses, ending the season with that memorable race at Memphis where he beat Monte Carlo and others in the novelty race taking the first heat, a mile, in 2:05½, the second heat, a mile and an eighth in 2:22½ and the third heat, a half mile in 1:01½. This year Major Delmar has trotted four heats better than 2:01, which is more than Lou Dillon has done. He has also equalled her record of 2:00. On Friday last he accomplished this feat at Empire City Track and a comparison of the quarters of his mile with those of Lou Dillon will be interesting:

	1 QR	2 QR	3 QR	4 QR
Lou Dillon	30¼	30¼	30¼	29
Major Delmar	30½	28½	30	31

The elapsed time at each quarter was as follows:

	¼	½	¾	mile
Lou Dillon	30¼	1:00½	1:31	2:00
Major Delmar	30½	0:59	1:29	2:00

Major Delmar went the first quarter a quarter of a second slower than Lou Dillon, but trotted the next quarter two full seconds faster than she did, getting to the half a second and three-fourths sooner. This wonderful flight of speed did not stop him much, as he took but 30 seconds to negotiate the third quarter and was two seconds ahead of Lou Dillon at that point. The tremendous pace told on him, however, and the last quarter was in 31 seconds, just two seconds slower than the finish of the daughter of Lou Dillon. Had the three-quarter pole been reached in 1:30 instead of 1:59, Major Delmar would very likely have been able to lower the world's record a shade under two minutes. Lou Dillon's mile was the most perfectly rated of any mile trotted by a record breaker in recent years. There is much satisfaction to California breeders in the fact that the first two minute trotter is strictly California bred, and the second has a California bred stallion for a sire. A strange coinci-

dence is that neither Mr. Henry Pierce, the breeder of Lou Dillon, nor Mr. W. E. Spiers, the breeder of Major Delmar, lived to see the two minute mile trotted.

Since the little Santa Rosa mare made her wonderful mile the daily press all over the country has been filled with accounts of "brothers" and "sisters" to Lou Dillon that are in training here and there. Lou Dillon has no brother or sister. There are quite a number of the get of Sidney Dillon in training in California and elsewhere, but Lou Dillon is the only foal Lou Milton has produced to the cover of Sidney Dillon. I saw in a Chicago daily not long since that a full sister to Lou Dillon called Crosscut was owned in British Columbia. Now, Crosscut was bred at the Santa Rosa Stock Farm, but she is by Beau B. 2:16½ out of Paceta 2:26 by Lone Pine, and about the only close relationship she bears to Lou Dillon is that she probably played in the same yard when she was a weanling in 1901 that "Dainty Lou" played in a few years before.

A Handsome Son of Direct 2:05 1 2.

The sons and daughters of Direct 2:05½, "the little black rascal," as Mr. Monroe Salisbury usually called him have made a great showing this year. No less than ten new performers have been added to his standard list, and two of them have records below 2:10, giving him eight in that exclusive list. The Directs starting in the races this year have shown that they possess that hull dog quality for which the family is famous. On the front page of this issue is a recent picture of I. Direct 2:12½ one of the best bred and gamest of all the sons of Direct, and one that should now have a mark close to 2:05. I. Direct is now owned by the wealthy young real estate and mining owner and speculator of this city Mr. Mahry McMahan, who has had him turned out at his place near San Mateo for several months and intends putting him in the stud next season. Two weeks ago Mr. McMahan felt compelled to decline an offer of \$5000 for this handsome young stallion made by a gentleman who desired to place him at the head of a stock farm. I Direct has won some hard fought races, and all California horsemen will remember his game fight for the now famous heat won by the ringer Walter K. in 2:08 at Santa Rosa in 1900, which heat led to the identity of Walter K. being discovered. In that heat I. Direct was but a length behind Walter K. at the finish and his mile was in 2:08½. Ed Laferty, who trained him that season says no gamer horse than I. Direct ever started, and if raced again should get in the 2:10 list.

He is one of the best bred sons of Direct, his dam being Francisca (dam also of Sable Frances 2:15½, Guycisca 2:26 and Earl Medium, sire of Maybud 2:13½, Tom Martin 2:14½, Kanawha Star 2:14½, etc.) by Almont 33, second dam Frances Breckenridge by Sentinel, third dam by Bayard 53, fourth dam Luna by Swigert's Lexington, and fifth dam the famous mare Eagles by imported Glencoe.

Mr. McMahan has owned some good horses during the last five or six years, among them Tom Ryder 2:13½, that with Bille Button held the team race record of 2:16½ for eight years. Prince Almont 2:13½, Bishop Hero 2:21, for several years holder of the world's five mile record, Chris. Peterson 2:13½ and Jesse P. 2:19½, but in I. Direct he has the best one he has ever owned.

A Fast Baby at Hollister.

HOLLISTER, Sept. 28, 1903.

BREEDER AND SPORTSMAN:—The four days' races here were well attended. The sensation of the whole program was the exhibition one quarter mile pace by Al Wilson's yearling Little Medium, sired by R. P. Lathrop's Dictatus Medium 32499. The little fellow fairly flew down the stretch, the cheering and hand clapping deterring him somewhat, as he was not accustomed to it, but, nevertheless, on a soft track with a heavy wind, he paced the quarter of a mile in 38½ seconds, a 2:33 gait. He had previously gone the same distance in 36½ seconds, 2:26 gait, but this day he was a trifle timid. He is a bright bay, good size, level headed, and a race horse from the word go. His dam is Little One by Benton Boy and from a Patchen mare. Little One has a record of 2:30, made on Hollister track. This is the first Dictatus Medium colt to be trained, but several others will be worked very soon. Dictatus Medium, the sire, has worked out in 2:12 and is well known as a game race horse, and is as well bred as any in California. His sire is Dictatus and his dam Belle Medium, the dam of Stam B. 2:11½.

Respectfully.

OBSERVER.

On a hot day drink Jackson's Napa Soda lemonads and be refreshed.

Notes and News.

Major Delmar.

Another two minute trotter.

His sire was bred at Palo Alto.

The California blood will get to the front.

Coronado won at Portland last week and reduced his record to 2:18½.

Margaret Bathgate, 2:11½, is the fastest four year old filly of the year.

Simmassie, 2:08½, is the third new 2:10 performer out of a Sidney mare.

Foxie Curd, 2:07½, is another fast pacer to the credit of Gambetta Wilkes, 2:19½.

Direct Hal, 2:04½, will not be raced this year, as he has been sent back to Village Farm.

The Los Angeles meeting will open next Saturday. There is every prospect for a good meeting.

They are now saying that Prince Alert is a dope horse, and cannot do his best unless given a "ball."

Eula Mac, by McKinney, won a matinee race to wagon at Pittsburg, Pa., August 8th, in 2:16½ and 2:17½.

B. S. Dillon, a pacer by Sidney Dillon, sire of Lou Dillon, took a half-mile track record of 2:16½ week before last.

Dolly Dillon 2:07 will start at Lexington and Memphis. The daughter of Sidney Dillon is said to be in great form.

Polka Dot, the pacing mare by Mendocino won at North Yakima, Washington. The heats were in 2:14½, 2:15 and 2:14½.

McKinney is credited with seven new performers this year, which makes his total list number fifty-five standard performers.

The trotting race record of the year is 2:07½, made by four different horses, Billy Buch, Major Delmar, McKinley and Caspian, in order.

The *Chicago Horse Review* says that the stallion John A. McKerron 2:04½ is suffering from a splint and will not be started again this year.

Electioneer has not increased his number of 2:30 performers this year, neither has Nutwood. Onward so far has one new one to his credit.

When they catch a fellow ringing a horse in a race in Michigan they send him to jail as it is a felony according to the laws of that State.

The Pacific Breeders Futurity Stake No. 4 has been opened. Its value like its predecessors is \$6000, but the entrance fee has been reduced to \$2.

Earalma, by Earl, is the dam of two 2:10 performers, Boralma, 2:07 trotter, and Pan Michael, 2:07½ pacer. Both were sired by Boreal, 2:15½.

James Butler, owner of East View Farm, recently sold the fast pacer, Don Derby, 2:04½, to James A. Murphy, of Chicago. He will be used on the New York speedway.

Joe Interest has started eleven times this year and won nine races for Dick McMabon and now has a record of 2:09½. He will be raced at Columbus, Oakley and Memphis.

Rita H. has another race to her credit. She took the free for all pace at North Yakima on Wednesday last and reduced her record to 2:11½ in the last heat. She has not lost a race this year.

On Wednesday of this week Mr. Springer, of Pleasanton, drove his gelding Billy Red, that he purchased from Mose Hart, a half in 1:01½. The first quarter was in 31½ and the last in 30 seconds.

The green trotter Graydon, by Day Bell, the dead son of Palo Alto 2:08½ and Beautiful Bells 2:29½, won a \$1000 stake for 2:30 horses at Plattsburg, N. Y., Sept. 11th, trotting the second, third and fourth beats over the half-mile track in 2:20½, 2:18½, 2:19.

It is said that the Ohio State Fair at Columbus, last month, cleared over \$10,000, and the New York State Fair, at Syracuse, at least \$30,000. And it was the harness races that brought the crowds.—*Horse Review*.

J. R. Albertson, of Fresno, has moved his string of horses to Pleasanton where he will spend the winter. The gelding George G. 2:12½ is at the head of the string. Mr. Albertson had shipped to him from San Francisco this week a filly by Steinway and one by Charles Derby, hot pacers and owned by Mr. W. Van Arsdale of this city, also a chestnut gelding by Sidney Dillon, the property of Dan McCarthy.

Swift B. 2:16½, the three year old by Stam B., was started in the 2:14 trot at North Yakima last Thursday and got third money. Mack Mack won the race in 2:14½. Swift B. is a good three year old in any company.

The Hollister races were well attended and everybody went away well satisfied with the way the meeting was managed. It has been determined to give a good meeting next year and larger purses will be offered.

Birchtwig, formerly owned in Denver, started at Roswell, New Mexico, the other day to break the territorial record of 2:14½ and lowered it at first to 2:12½ and again to 2:09. Birchtwig is a pacer with a record of 2:05½.

A week ago Saturday A. B. Gwatbmev's two good trotters, Senator Mills 2:12½ and Tiverton 2:11½, were driven a mile at Empire track, to pole, in 2:18. It was the first mile they had been stepped together and they did it very easily.

The Horse Review \$5000 stake for three year olds was won at Cincinnati last Monday by Ethel's Pride, bay filly by Directum. Her fastest beat in the race was 2:15. This seems to be a great year for fillies as they have won nearly all the big stakes.

The longest race on the Grand Circuit to date was the 2:19 trot at Providence—seven heats. It was won by the black gelding Navidad, his three winning heats being 2:11½, 2:12½ and 2:12. The first and last heats of the race being the fastest. Navidad is by Sable Wilkes 2:18.

At the Westchester Horse Show several four in hands were raced against time. The horses were put to their utmost speed on the run, and the finishes were very exciting. The winning team was driven by Alfred De Cernea and covered the distance in 38½ seconds.

Diablo 2:09½ won first prize for the best standard bred stallion at the Oregon State Fair. He is a grand looking horse, and his win was for the best individual, breeding and quality. Diablo has won first prize in every ring in which he has been shown. He made a splendid season in Oregon this year.

Joe Cuicello objects to the printed reports of the Occident Stake which put his three year old Bromwell by Sidney Dillon among those that were distanced. Bromwell did not start in the stake, in fact he has never started. The mistake was made by having "dis" put opposite Bromwell's name in the summary instead of "dr."

Heatherbloom, the high jumping horse, made a new world's record at the Bryn Mawr horse show, near Philadelphia, September 25th. He cleared the bars at 7 feet 8 inches, winning \$250 and a costly cup. He was ridden by Dick Donnelly. The sum of \$1000 is offered by the Chicago Horse Show for a jump of eight feet and it is thought Heatherbloom can win the prize.

An error was made by the judges at the Eureka fair in allowing the running horse Meadow Lark to start in the third heat of a half mile and repeat race although he had neither won or made a dead heat in either of the previous heats. According to the rules governing running races Meadow Lark should have been sent to the barn, and the next heat contested for by the heat winners.

A new world's record for a three heat race by two year old trotters was set at Cincinnati this week in the Horse Review stake. The first heat was won by Grace Bond by the Bondsman out of Grace Boyd by Ashland Wilkes in 2:14½, and the next two heats and the race went to Alta Axworthy, a filly by Axworthy 2:15½ out of Alta Thomas by Nutpine 2:15½. These two heats were in 2:15½ and 2:16½.

Vet Tryon and Walter Masten have changed places. Mr. Tryon has leased the Woodland track and will take his string of harness horses there to train, and Mr. Masten has moved to Sacramento with his good stallion Falrose and his string of pacers and trotters. There is a rumor current in Woodland that Superintendent John Mackay, of Rancho del Paso, will purchase the Woodland track property, but the rumor has not been confirmed.

Confienza, record of 2:21½ as a three-year-old, own sister to Tuna, 2:16½ winner of this year's Occident and Stanford stakes, is a very fast four-year-old. At Lexington, Kentucky, one day last week, Confienza stepped a mile in 2:10½, last half in 1:05½ and last quarter in 32½ seconds. She is owned by Edwin Gaylord, of Denver, and is in Jos. T Bayer's string. Ituna, the dam of these fillies, is but nine years old. Confienza was foaled when Ituna was five years old and Tuna the following year.

Quite a crowd of spectators was at the five eighthths track at Sixteenth street station, Oakland, last Sunday, to witness a race between several Oakland horses. The most exciting contest was between Mr. Doran's Della McCarthy, Mr. Baker's bay pacer and Mr. Moran's bay mare by Grand Moor. Mr. Doran's mare won in straight heats. Mr. Bellingall, Jr., intended to start in this contest with his mare by Secretary, but just as they were getting ready to score his mare pulled a shoe and he drove home to reset it. He did not get back until they were scoring for the second heat and started with them and beat them all out. The time made for the five eighthths was around 1:40 each beat. There will be several contests at the same track tomorrow.

The three beats paced in the free for all at Providence is not the world's record for three heats. The best three heats ever paced are 2:02, 2:02½, :03, made by Anaconda and Coney (who won the first heat) at Detroit, July 17, 1901.

A. H. Miller, the Buffalo man who for several years has owned and raced trotters and pacers, has become an enthusiastic automobilist, and will this fall sell all his horses. He owns, among others, Council Chimes 2:12½, Julia M. by Zombro and Ho Ladyship, a fast three year old by Wilkes Boy.

Mr. J. W. Zibbell, who had a string of horses on the circuit this year, has located for the present at 34 20th avenue, this city, near Point Lobos avenue where he has a half dozen horses, among them Loti Smart 2:07½, Tom Smith 2:13½, Nance O'Neil 2:2 Lady Rowena 2:18, Alessandro two year old record 2:40, McKinney Jr., a six year old stallion by Mr. Kinney out of Nora Y. by Admiral, and one or two more. Mr. Zibbell intends building a training and sale stable near the Chutes and close to one of the main entrances to Golden Gate Park, which he declares is the greatest place to winter horses he has yet seen, and says he is ready to buy, sell and train track and road horses.

The *Napa Register* of last week says: "Henry T. Oxnard, the sugar magnate, one of the most prominent men of Southern California and a prospective candidate for United States Senator to succeed Senator Bard, will move from Lexington, Kentucky, to Napa valley, his famous stock farm. Mr. Oxnard was in Napa Sunday advising with Mr. A. B. Spreckels on the subject. He has practically, if not actually, purchased over 800 acres near Napa, will immediately begin the expenditure of some \$150,000 in improvements thereon, and will also commence soon the task of moving his thoroughbreds from Kentucky to their new home in this valley. Mr. Oxnard is the owner of Bracelet, the \$15,000 broodmare, the dam of St. Valentine; also of Songstress, Wealth, Lux Castor, and other famous racers. His decision to locate his farm near Napa is a great thing for this city and county, as it will be even more extensive than the big institution of Mr. Spreckels south of town." There is also some talk of Mr. Spreckels purchasing the Napa race track property. If he does he will make it a model training track for his thoroughbreds.

Empire City Track.

New York, Sept. 25.—Pacing, 2:18 class, purse \$500—Arzille won the second and third heats in 2:12½, 2:12½. Joe S. Nelson won the first beat in 2:13½. George K. Beck, Burr Oak, San Freta, Rose Electrice, David Muscovite and Clover also started.

Trotting, 2:12 class, purse \$800—Marion Wilkes won the first and third heats in 2:08½, 2:11. Promise won the second heat in 2:10. Queen Wilkes, Van Zandt, Edgewood and Neil Gwynne also started.

Special, to beat 2:00½—Major Delmar, b g, by Delmar-Expectation, by Autograph (McDonald) won. Time—0:30½, 0:59, 1:29, 2:00. Time by quarters—0:30½, 0:59, 1:29, 2:00.

Sept. 26.—Trotting, 2:18 class, purse \$500 (unfinished from Friday)—Byrnie won first and third heats in 2:13½, 2:15. Alfonso Maid won the second heat in 2:12½. Joe N., Cordovan, Ballerton, Hie Boy also started.

Pacing, 2:09 class, purse \$500 (unfinished from Friday)—Theron Powers won the third and fourth heats in 2:08½, 2:11½. Nonamie won the first beat in 2:08½. Birdina won the second heat in 2:09½. Diablotto, Gyp, Walnut, Gold Brick and Frielmont also started.

Pacing, 2:13 class, purse \$500—Don Cozine won the second and third heats in 2:10, 2:12½. Garnet won the first heat in 2:10. Indiana John, J. W. Patterson, Little Fred, Piccolo, Lucre and Hero Alcyoner also started.

Trotting, 2:13 class, purse \$500—Allablene won the first and fourth heats in 2:10½, 2:12½. Direct View won the third heat in 2:14½. Crescent won the second heat in 2:11½. Pug and Annie Little also started.

Pacing, 2:05 class, purse \$800—Dariel won in two straight heats in 2:05½, 2:05. Shadow Chimes, Sir Alcantara and Frank Yoakum also started.

Columbus Races.

COLUMBUS, Ohio, Sept. 25.—Favorites swept the card at the getaway day of the Grand Circuit meeting, but Tom Keene was the only horse to win without a desperate struggle. Summary:

Pacing, 2:10 class, purse \$2000, two in three—Tom Keene won two straight heats in 2:08½, 2:10. Ravenna Wilkes, Hal Chaffin, Dick Willson, Go Direct, Fred H. Purity and Ella H. also started. Second and third money divided.

Trotting, 2:07 class, purse \$1000, two in three—Dan T won the second and fourth heats in 2:07½. Rytmie won the first beat in 2:06½. Charley won the third beat in 2:08½. Foreno and Prince of Orange also started. Second and third money divided.

Pacing, 2:10 class, purse \$800, three in five—Johnny Wiseman won second, third and fourth heats in 2:08½, 2:07½, 2:07½. G. W. D. won first beat in 2:10. Foxy Curd, Mary Anna, Joe Interest, Cascade, Jolisco, Illinois, Star Pugh, Alvina Wilkes, Kingsmore, Honest John, Salem, Red Patchen and Byrl Wilkes also started.

Trotting, 2:09 class, purse \$800, two in three—Walnut Hall won third and fourth heats in 2:10½, 2:11. Belle Kuser won second heat in 2:08½. Mabel Onward won first beat in 2:09½. Maxine and Lord Vincent also started.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Will Trot in 1:50.

"The American trotting horse will trot a mile in 1 minute and 50 seconds. He will never make better time than that, and it may take fifty years for him to reach that speed," says Prof. Wm H. Brewer of Yale University, in reference to the coming trotter.

Mr. Brewer is professor of agriculture at the Sheffield Scientific School, and twenty-five years ago he made the prophecy to his class that the two-minute trotter would appear in the first decade of the 20th century. When Lou Dillon recently made that time many of the former students recalled Prof. Brewer's prophecy, and wrote to him calling his attention to the fact.

His calculations were based on a mathematical chart with tracings of the different speeds of the famous trotting horses of the country. In speaking of that prophecy Prof. Brewer says:

"As a professor of agriculture in the Sheffield Scientific School, I have every year delivered a series of lectures to my classes on 'Breeding.' In this connection I have been particularly interested in horses, and as far back as '66 I began to make tables of the records of trotting horses and collect all the data possible on the subject.

"About 10 years later, when I had accumulated considerable material along this line, I told my pupils one day that breeding was sure to develop the two-minute trotter, and that, according to the mathematical curve I had drawn, he should appear some time during the earlier portion of the 20th century. I did not feel confident of my mathematical ability to state the time more definitely than that.

"At that time there were less than 1000 horses that could trot in 2:30 or better. I began cataloguing the horses when there were less than 200 in this class, and I kept up the work until, in 1873, according to my table, there were 1025 trotting horses who had made a record of 2:30 or better.

"In making out this table from which I deduced my mathematical curve I had to depend on written evidence largely for the horses that trotted before 1843. Up to that time there were no stud books kept and no records authentically taken, so that my deductions were on 'records' after 1843, and on time made before that period.

"For my information in regard to the earlier horses I have searched through libraries and newspaper files, and collected large numbers of hooks. But comparatively little attention was paid to the trotting horse in the early part of the century. Racing was forbidden by law in many of the northern states, and it was this ruling against racing that developed the American trotting horse.

"Up to that time the only horses bred for racing were the racing horses or runners. Horse racing was the vogue in England and was the sport of the aristocrat. In New England it was associated with everything aristocratic, and was therefore frowned upon. At that time there was no notion of any kind of a race with only one horse. A horse race was a running match. To this day horses are the only animals that ever race alone.

"With the strict law prohibiting racing in Connecticut and New York, men began to take interest in horses that would make a good clip on the road. A good deacon who frowned on horse racing generally could see no harm in letting his friend hold his watch while he trotted his horse a mile in the best time possible.

"The first printed account of a trotting race that I know of was in the Connecticut Record of June 19, 1806, when the following notice appeared:

"Fast trotting—Yesterday afternoon the Haerlem race course of one mile's distance was trotted around in 2 minutes and 59 seconds by a horse called Yankey, from New Haven, a rate of speed, it is believed, never before excelled in the country.—*N. Y. Spectator.*"

"To evade the law these trotting races were advertised as trials of speed, and to this day the country fairs refer to their 'trials of speed' in advertising their horse races.

"The first trotting for money recorded is said to have taken place in New York. Frank Forester says that trotting for money began in 1818, when at a jockey club dinner Col. Bond of Maryland bet Maj. Jones of Long Island that 'no horse could be produced that could trot a mile in three minutes.' There was much side betting, and the odds against it were heavy. But Boston Blue won handsomely, and Col. Bond lost his \$1000."

In his records of horses from 1808 down to the present time Prof. Brewer has the names and time of all the racers who were the stars of their time. He has the "record" of each horse, where made, and the date, and of the earlier horses the places at which they made their reputations and the time in which they trotted.

In speaking of the famous trotters, Prof. Brewer

said that of them all Top Gallant, who made the first mile in 2:40, was regarded as perhaps the most wonderful trotter, and even now he says old men will refer to 2:40 as surprising time.

In 1873, about the time that Prof. Brewer predicted the coming two-minute trotter, his table had over 1000 horses in the 2:30 or better class. In the 2:25 or better class were 270; in the 2:23 class or better were 129; in the 2:21 or better were 68; in the 2:19 or better were 24; in the 2:17 or better were 9, and in the 2:15 or better were 4.

In reference to the racing horse, Prof. Brewer says that practically the limit in time has been reached. "The racing horse," continued he, "as a breed has reached its ultimate limit of perfection. I do not expect that the time of the racing horse will be improved, for 2000 racing horses have come within 5/4 seconds of the best time made, while never have more than twelve trotting horses ever come within 5/4 seconds of the best time. This shows that the trotting horse has not reached its limit, while the racing horse has."

When asked if he regarded the wind shield used this year as an unfair advantage that the present trotters had over those of former years, Prof. Brewer said that while it might make a second or two difference in some cases, he was under the impression that it made little difference.

Prof. Brewer is a lover of horses and is intensely interested in their development. He has the largest library in New England, if not in the country, on horses. The University of Pennsylvania claims the largest and best library in the country on horsemanship, but on the animals themselves Prof. Brewer's private collection is unsurpassed.

Grand Circuit Racing at Oakley Park.

CINCINNATI, Sept. 28.—The Grand Circuit meeting opened at Oakley Park this afternoon under favorable auspices. The weather was superb and track moderately fast. The sport was first class, though the five events which made up the card were decided in straight heats. Four favorites won. Summary:

The Horse Review purse \$5000, for 3 year old trotters, three in five—Ethel's Pride won three straight heats in 2:15, 2:17, 2:16. Baron Gale, Delight, J. N. Blakemore and Sporty also started.

Trotting, 2:11 class, purse \$1200, two in three—Dr. Strong won two straight heats in 2:10, 2:09. Mary D., Marion Wilkes, Norman B. McKinley, Palm Leaf, Belle Kuser, Fanfare and Dorothy Redmond also started.

Trotting, 2:19 class, three in five, the Queen City purse \$2000—Jay McGregor won three straight heats in 2:12, 2:12, 2:10. Kinney Lou, Lady Patchie, Patchen Maid, Katrina G., Margaret Barthgate, Cole Direct, Judge Green, and Annie Dillon also started.

Pacing, 2:25 class, two in three, purse \$1000—Director Miller won two straight heats in 2:10, 2:11. Dutch Mowry, Ethel Mack, Lady May, Margaret W., Angus Pointer, Stein, Doctor B., Jimmy O., Mary Gordon, Wilson Girl, and Line of Gold also started.

Pacing, 2:11 class, two in three, purse \$1000—Jessie S. won two straight heats in 2:09, 2:11. Mr. Marvin, Lazare, Illinois, Stipulator and Cascade Dove also started.

Sept. 29.—The Ohio Stake of \$5000, three heats of one mile each for trotters of the 2:09 class at the Grand Circuit meet at Oakley to-day proved a disappointment. Casplan won easily.

The Horse Review purse of \$3000 for two year old trotters went to Alta Axworthy after she had lost the first heat to Grace Bond. It was the best race of the day and resulted in the establishment of a new world's record for the three fastest heats ever trotted by two year olds. Summary:

The Horse Review, purse \$3000, for two year old trotters, two in three—Alta Axworthy won the second and third heats in 2:15, 2:16. Grace Bond won the first heat in 2:14 3-5. The Hermit, Madge Wildfire, Alice Edgar, California Cresceus, Bequeath, Jessie Renyon and Major Cuthlein also started.

2:08 pace, purse \$1200, two in three—Council Chimes won the second and fourth heats in 2:08, 2:09. Larry Ginter won the third heat in 2:08. Baron Rogers won the first heat in 2:07. Allerson, Johnny Wiseman, Robert I., Trilby Direct, Dick Wilson, Mustard, Padden Wilkes, Dora Delpha, Hal Chaffin and Camhria Maid also started.

2:09 trot, the Ohio Stake, \$5000, three heats of one mile each—Casplan won the first and second heats in 2:09, 2:10. Hawthorne won the third heat in 2:09. The Roman, Dulce Cor, Maxine and Walnut Hal also started. The money was divided, Casplan \$2250, Hawthorne \$1800, The Roman \$400, Dulce Cor \$550. 2:30 trot, purse \$1000, two in three—Bessie Brown won two straight heats in 2:15, 2:13. Baron Wedgewood, Alberta, Bessie Kinley, Sidnut, Clara Belle, Gayoso and Grocery Maid also started.

2:19 pace, purse \$1000, two in three—Irish Elder won two straight heats in 2:12, 2:13. C. O. D., Hard Case, Cotillon, Charley C., Judge Pryor, Holly Dillon, Walter H., Kate Renals, Line o' Gold, Belle Mac, Flicker, Money Musk, Direct L. and Ola Mapes also started.

CINCINNATI, Sept. 30.—Major Delmar was driven by Alta McDonald against the world's trotting record

of 2:00 at Oakley Park today and completed the mile in 2:00, which is his fourth mile this season better than 2:01 and the fastest mile ever trotted in Ohio. The track was in grand shape, but there was a stiff breeze blowing up the stretch.

The first eighth was passed in 0:15, but Delmar shifted from the trot to the pace. McDonald pulled him up and came back. The next time he came down he was going steadily, but seemingly not so fast. He drew in closer to the rail as they rounded the first turn, but the track was deeper there and McDonald pulled out a yard or so by the time they got to the quarter in 0:30. Along the back stretch the gamelittle gelding struck a most perfect stride and he fairly flew. He made the half in 0:59. Around the far turn he came with a swing that set the great crowd cheering lustily. As regularly as a piece of machinery he strode past the three-quarters in 1:29. The runner in front tired so perceptibly about 200 yards from the wire that McDonald was forced to pull out for fear of a spill. Under the wire he came as strong as he went away and was striding with astonishing ease. The time, 2:00, was received with a great demonstration. Summary:

The Horse Review purse \$1000, for three year old pacers, three in five—Miss Daphne Direct won three straight heats in 2:11, 2:18, 2:13. Eliza Douglas and Tomango also started.

Trotting, 2:06 class, two in three, purse \$1200—Ferne won two straight heats in 2:08 and 2:06. Susie J., Charlie Herr, Rhythmic, Prince of Orange and Dan T. also started.

Trotting, 2:14 class, three in five, purse \$2000—George Muscovite won second, third and fourth heats in 2:10, 2:11, 2:12. Jay McGregor won first heat in 2:12. Norrie, John Mc. and Miss Jeannette also started.

To beat the world's trotting record of 2:00, Major Delmar, b g, by Delmar (A. McDonald), lost. Time, 2:00. Time by quarters, 0:30, 0:59, 1:29, 2:00.

Pacing, 2:10 class, two in three, purse \$1000—Foxy Curd won two straight heats in 2:09, 2:07. Lizzie H., Mary Anna, Star Pugh, G. W. D. and Joe Interest also started.

Pacing, 2:15 class, two in three, purse \$1000—John M. won two straight heats in 2:09, 2:10. Hazel Banks, On Time, Queen of Spades, Credette, Tess, Colonel Tyler, Star Onward and Taylor H. also started.

Oct. 1.—There was great racing at Oakley Park today. The four heats in the 2:20 pace were hotly contested by Pan Michael and King Direct, and in the last three it took the decision of the judges to determine the winner.

Scott Hudson, with Guy Fortuno up, upset all calculations in the 2:23 trot. He took it in two heats.

Dan Patch was driven by Myron McHenry against his pacing record of 1:59, but failed to beat it. Summary:

The Buckeye, 2:20 pace, purse \$2000—Pan Michael won second, third and fourth heats in 2:09, 2:10, 2:09. King Direct won first heat in 2:09. Diablita, Fantine, Jim Kyle, Mary Gordon, Go Direct and Kingmore also started.

2:06 pace, purse \$1200—Fannie Dillard won second and third heats in 2:06, 2:07. Terrace Queen won first heat in 2:08. Nervola, Riley B., Winfield Stratton and Roamer also started.

2:13 trot, purse \$1000—Guy Fortuno won two straight heats in 2:12, 2:11. The Questor, Norrie, Topsy, Crescent, Dodie K., Kent, Pug, Walter Smith, Declaimer and Newton also started.

To heat his record of 1:59, pacing—Dan Patch, b s, by Joe Patchen (Myron McHenry) lost. Time by quarters, 0:30, 0:59, 1:30, 2:01.

2:20 tros, purse \$1000—The Parson won two straight heats in 2:14, 2:15. Miss Leo Rex, Claymont, Ballast, Bermuda Maid, Allan W. and Tonga also started.

WILL NOT SCAR OR BLEMISH.

GOMBAULT'S CAUSTIC BALSAM

is the safest and most effective lotion or blister for ailments of

HORSES and CATTLE

and supersedes all cautery or firing. It is prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc. it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

Sunday, September 20th, 1903—

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Arizona Blue Rock Tournament.

The eleventh annual tournament of the Arizona Sportsmen's Association took place last week at Prescott, Arizona.

The tournament started Friday morning, September 18th, and continued three days.

The tournament was given under the auspices of the Prescott Gun Club, under the direction of Jake Marks, M. E. Morin, H. C. Burmister and D. D. McDonald, who were the officers for the past year of the Arizona Sportsmen's Association.

Phoenix was ably represented by J. M. Aitken, H. H. Harrison, W. L. Pinney, W. D. Tanner and Del Morrell.

Jerome sent over the old stand-bys, W. C. Miller, A. S. Knoblock, T. E. Campbell, L. A. Hawkins and W. A. Jordan, all good fellows and gun pointers.

Tucson sent Dr. Purcell, Chas. Weher and Julian. The three shooters added very much to the success of the shoot.

Bisbee was represented only by Ives. Mr. Ives is an excellent shot and an honorable sportsman. E. W. Muller, of the Big Bug country, was on hand and shot a stiff game, making a great showing on the last day.

Prescott was represented by a number of shooters, some of whom shot in every event during the whole tournament. Marks, Pickett, Morin, Burmister, McDonald, Merideth, Archambeau, Manderfeld, Bate, Wilson and Hildreth, all of Prescott, shot in the tournament.

W. H. Seaver, representative of the Winchester Repeating Arms Company, was on hand early for the shoot and stayed until the last target was broken. He had his tent stretched on the grounds and generously allowed the shooters who choosed so to do to use the gun rack inside its shade, and make the tent a general headquarters as well.

Thursday afternoon previous to the tournament, most of the shooters went out to the grounds to shoot a few targets in order to get used to the grounds.

Ives shot strong and broke 96 out of 100 shot at. Several other good scores were made, but Mr. Ives was high by a large majority. Mr. Ives had the shooters "buffaloeed" that afternoon.

The principal events of the first day included the shoot for the Gwynne trophy and the Individual Championship medal. The Gwynne trophy was won by the Prescott team with the splendid score of 87 out of 90.

The next medal shot for was the Individual Championship medal. The contest was at 50 targets to each shooter. Tanner and Morin tied with 48 each. In the shoot-off at 10 targets Morin won with a straight. Tanner, it was claimed, possibly would have won the medal had he not failed to shoot at one of his targets.

The second day of the shoot, Saturday, was a very delightful day. The wind blew in fitful gusts in the afternoon, however, making the targets more difficult to locate, but at that they were broken by the thousands.

The main event of the second day was the race for the team championship of the territory. The Copper Queen event was also a very important affair, as the winner would be entitled to hold the fine cup for a year.

Morn started off on one of his good gaits and broke a straight. He had to have that straight, for Aitken, Tanner, McDonald, Purcell and Morrell all made 24. Morn won the cup at Bisbee, last year, also.

When the big shoot for the team championship was called all was excitement. It was generally anticipated that there would be some good scores made and a close contest for the diamond badge.

Aitken stood up the longest in this event and won the whole purse, \$38. Several shooters stood in line until fifteen had been shot and broken to the man. Then they began to drop out. Aitken also won the pump-gun in the Winsor event. The automatic repeating pistol, in the Brown Bros. event, went to Morrell with a straight score of 25.

The third and last day of the tournament was one of the most interesting days of the shoot in many respects.

The McVeagh Handicap event, distance handicap, was a very exciting race. The contestants were handicapped according to the scores made by the various individuals in the shoot up to that time.

Aitken, Tanner, Morin and Burmister shot from 22 yards; Morrell, Harrison, Hawkins and Campbell shot from 21 yards; Miller, Ives, McDonald, Muller, Julian and Knoblock shot from 18 yards, and Bate from 14 yards. Tanner won the medal with a score of 23 out of 25.

The Razzle Dazzle event, in which the use of both barrels was allowed, Tanner, Weher and Ives broke straight. Aitken, McDonald and Seaver made 24 each.

The last event of the tournament, the Two-Man championship event, formerly shot by one high average man and one who had made less than 70 per cent, was changed to fit the occasion, allowing of one man who had shot under 80 and one who had shot over 80 per cent. The entries were Harrison and Bate; Aitken and Hastings; Miller and Knoblock; Campbell and Emerson; Burmister and Marks; Morin and Archambeau; Tanner and Pinney.

Tanner and Pinney walked off with the prize in a canter. Pinney, who was the entry as the low man, broke 24, while Tanner only broke 22. That won the medal with the best score ever made in this event.

The longest run made during the tournament was 60, made by Weher. He made 85 straight, counting the 85 made in the Razzle Dazzle event, but that run did not count in the high average events. Morin and Seaver each made 50, while Aitken made 55. Tanner made 54. Other runs of 40 and upwards were made by several shooters.

The high average for the shoot was carried off by Tanner with the very good average of 95 1/2 per cent. There has never been made such an average in the territory in a three-days' shoot.

The fine carving set given under sealed conditions by Mr. Sessions, was also by Knoblock. The gun case given by McVeagh also under sealed conditions was won by McDonald. Head and Ives were tied and McDonald won in the shoot-off. The gun case given by the Pacific Steel and Hardware Company was won by Miller. Pickett won 250 cartridges in the same event. The Sweepstake medal was won by Weher. Tanner and Weher tied for the medal and Weher won in the shoot-off with a straight score. Tanner made 9.

The following are summaries of the scores made during the tournament:

Summary of scores for Friday, September 18, 1903. Table with columns for NAME, SHOT AT, and various score points (10, 15, 20, 30, 20, 50, 15, 15, 15).

Saturday, September 19, 1903—

Summary of scores for Saturday, September 19, 1903. Table with columns for NAME, SHOT AT, and various score points (15, 15, 25, 25, 50, 25, 20, 25).

Team shoot, championship of Arizona: Prescott—Burmister 47, Morin 45, Pickett 44, McDonald 44. Total 180. Phoenix—Aitken 42, Tanner 49, Morrell 44, Harrison 44. Total 179. Jerome—Miller 48, Campbell 43, Hawkins 42, Jordan 44. Total 177.

Table of SHOT AT results for September 20th, 1903. Columns include NAME, SHOT AT (15, 25, 25, 25, 25), and scores (15, 20, 25).

In the entire tournament, in events which count for average, the following scores were made:

Table of average scores for the tournament. Columns include NAME, SHOT AT, BROKE, and MISSED.

AT THE TRAPS.

The members of the Millwood Gun Club held their closing blue rock shoot for this season at Mill Valley last Sunday. A good attendance of shotgun enthusiasts enjoyed a pleasant day and smashed clay pigeons in the various events.

The features of the meeting were the contests for three prizes. For the club gold badge the highest score, 23 out of 25 targets, made Captain George Collins the winner. William L. Arnold won the John K. Orr trophy. This was his third victory in this contest, he having won it twice before. His score was 23 breaks out of 25 targets.

The scores made in the club race at 25 targets were: C. H. Kewell, 18; W. J. Bearing, 17; R. Van Norden, 20; A. Childs, 15; George Collins, 23; W. H. Price, 17; J. Newlands, 16; C. J. Ashland, 19; W. Falkenstein, 17; R. Haas, 22; C. J. Ashland, 20; G. A. Urquhart, 15; J. K. Orr, 17.

A five-man team shoot at 15 targets per man was won by W. L. Arnold, G. Collins, W. H. Price, J. K. Orr, and J. Newlands on the score of 49 out of 75 targets. C. J. Ashland, R. Haas, R. Van Norden, W. J. Bearing and C. H. Kewell scored 36.

George Collins was captain for the day. W. L. Arnold won the high average prize. The club will wind up the season with a hanquet on October 9th.

Under the auspices of the Jackson Miners' Union, a blue rock shoot took place on September 20th, at Peek's Hill, near Jackson, Amador county.

Thirty shooters entered the shoot for two prizes. The first prize was won by Mr. Meeks who scored 21 out of 25 targets. For the second prize, M. D. Nixon, A. Grainger and F. Valvo tried with 19 each out of 25; Grainger won on the shoot-off. The scores made were the following:

First squad, 25 targets—C. Gilbert 16, L. Balovich 11, Wm. Fuller 12, Gus Laverone 10, C. Valvo 19, J. Giusti 12. Second squad—C. E. Jarvis 17, T. K. Norman 18, Geo. Poggi 17, C. Ardito 15, Dr. Wilson 9, M. S. Union 19.

Third squad—O. Riebling 6, F. Valvo 12, Mr. Dal Porto 14, Geo. Thomas 19, F. Fuller 12. Fourth squad—Dan Bona 15, F. A. Giannini 18, Ed Giannini 11, John Holtz 14, J. Garharini 11, Herbert Meeks 21.

Fifth squad—W. C. Hees 11, Dr. Herrick 8, Henry Leam 4, Chas. McKenney 10, John Milovich 4, Jas. Poggi 2.

A Hint on Gun Repairing.

Get your gun overhauled or repaired now! Do not wait until the last day, for you may be disappointed and not have your favorite gun to shoot with on the 15th—close at hand. See Skinner for big class gunsmithing and repairing. Everything in this line done promptly and satisfactorily. Be forehanded and have your gun in proper working order. Skinner's place is at 801 Market street, the big sporting goods emporium.

Sober up on Jackson's Naps Soda.

Wandee Kennels will also, it is rumored, have some other good ones at this show and on the Eastern circuit.

Coastguard is a young dog well thought of by the fancy. He was claimed by George Raper, at an English show this year where he had been entered by the Duchess of Newcastle. The catalogue price was \$200. The only litter by Coastguard in this country is one out of Alfreton Flirt, owned by Cairnsmuir Kennels, there is five puppies in the litter and all are doing nicely up to last reports.

Mrs. Chas. K. Harley, we hear, is desirous of joining the Ladies' Kennel Association of New York.

Mr. W. Ballantyne writes us from Central City, Colorado, as follows:

"BREEDER AND SPORTSMAN—Dear Sir: Please insert the enclosed advertisement in your next issue. I have sold the past week three Irish Terrier bitches in whelp to Ch. Royal Sportsman, and two maidens to M. B. Porter of Denver. Also the St. Bernard that I advertised in your paper, he goes to New York City, where he was raised. I have coming two Irish Terrier bitches and a dog, one bitch by Breda Muddler and one by Balmoral Bill, both from the 'old sod.' The dog's pedigree I have not had, but he is suitable for the bitches. They have all done a hit of winning over there, and I think that I should now have some 'Micks' second to none on the Coast."

GOSSIP FOR SPORTSMEN

The California Powder Works advertisement will be found on page 15. The attention of sportsmen is called to their factory loaded "Pattern" shells. This shell is charged with C. P. W. smokeless—a load that makes a superb pattern. At a recent shoot at Pinole a number of local shooters experimented with "Pattern" loads and were unanimous in endorsing the strong shooting qualities of this load.

The record large-game bag for this season was made within two weeks by Dr. E. G. McConnell, Dr. Bonner McConnell and Dr. Birdsall of this city, who, with Ed McNulty and Clem Patterson of Yreka, have been on a hunting trip in the Siskiyou mountains. The party returned September 25th. On the hunt they bagged fourteen hucks and eighteen bears, black and cinnamon. This is a record bag for that region. The hunters had the services of an Indian guide. Dr. E. G. McConnell is familiar with the country hunted over, and has organized an annual hunting party for that region for many seasons past.

Striped bass anglers have been jubilant over the prospects of good fishing again in the "straits" and around Angel Island. Last Saturday evening ten fish were taken and the following morning seventeen more were landed. The twenty-seven bass weighed 273 pounds, an average of over ten pounds. The largest fishes scaled eighteen pounds. They were taken on the "fog bell" course, the "westside" and at Petticoat point, Angel Island, all on Wilson 6 and 7 spoons. This take of big bass is looked upon as an indication of the fall appearance of the large fellows, in our bay and tributary waters, from the ocean, it is the belief among the more experienced anglers that the large bass put to sea after spawning and stay out in the ocean waters until fall.

The fishing has been good in the waters mentioned and about Belvedere all this week. The fish seemed to be plentiful everywhere about the Marin shores and are evidently not running in schools.

Al Cumming recently in three trips to San Antonio slough caught 76 bass, they were, however, rather small fish. The bass fishing in the sloughs, San Pablo bay and adjacent waters should be good from now on until the rains, the water is very clear now.

Reports from Rodeo and Point Richmond state that the bass are being caught at each place frequently.

Lake Merritt bass fishing is still good, most of the fish are caught in the evening however.

Wild ducks are plentiful in many of the marsh and tule districts of the bay counties. Early arrival of sprig and teal are noted everywhere. Mallard and teal ducks have also bred numerous this season. The noted Pringle ponds were black with ducks one day this week and the Stewart ponds contained more ducks than were on the Suisun marsh, it was estimated.

Widgeon ducks are also very numerous thus early in the season, these birds are probably Oregon ducks, as it is most too soon for the appearance of the real northern flight of widgeon.

Gray geese have also appeared, this variety will be followed by brant, then white geese will come and lastly the honkers will make their appearance, these latter are the latest arrivals here in the fall and they are the first variety of the species to get away in the spring.

The Montezuma Gun Club, recently organized, will shoot ducks this season near Collinsville. The members are W. W. Richards, Bert Wyman, J. L. Nickel, T. J. Walsh and "Billy" Swain. The club preserve, near Collinsville, embraces some 600 acres, upon which is located a winding tule fringed pond three-fourths of a mile long that has the reputation of being second to none for duck shooting. A snipe patch nearby is said to be one of the best in the State. The club house is a comfortably furnished two story six roomed cottage with a nine foot glass enclosed porch in front. The kitchen and dining room is located on the upper floor. The club house is fitted up so that the members can take their respective wives to a resort where they will find all the comforts of home.

The members are all cooks and do not propose to allow the women folks to get near the cook stove. In improving the house and grounds, etc., \$2000 has been

expended. The cottage is but ten minutes walk from the steamer landing. Canvashack ducks can be shot within 150 yards of the club porch, in fact, last winter teal were shot from the front door. Five blinds have been made and "position" will be taken by the shooters by lot. When two or more shooters are in the club blinds, the aggregate bag for the day will be divided, so that when a member is in a blind on the pond that is given the "go by" by the ducks, he can complacently see his companions burning powder for his benefit.

One day last winter Mr. and Mrs. Walsh bagged sixty-eight "cans" at one blind, of these the madam dropped eighteen. The members' wives are all good shots, Mrs. Richards being quite an adept with the rifle as well.

We believe that in no other part of the United States within easy traveling distance of a large city can a district be found where in one day a sportsman may bag four kinds of feathered game and basket three varieties of trout such as can be found in and about Webber lake and Sierra Valley. Within a radius of sixteen miles of Webber lake Al Cummings last week shot English snipe in the marshy snipe patches, a short distance away in sagebrush covered country he had the pleasure of haggng sage hens and in the chemise and brushy foothills adjacent he turned his attention to mountain quail and grouse. In the streams of that district Eastern red speckled brook trout, rainbow and cutthroat trout rose to the fly. Surely this is a country that an Eastern sportsman would not believe could be found—and only a day's journey away from this city.

Mr. and Mrs. A. M. Cumming and George Lowenberg have just returned from a three weeks' outing in the Sierra fairland. Mr. Cumming states that the fishing in Webber and adjacent lakes will be good from now on until November 1, when the season closes. The trout fishing in Fordyce, White Rock, French and Webber lakes was excellent for two weeks past.
