LETTER OF TRANSMITTAL.

DEPARTMENT OF COMMERCE,
BUREAU OF THE CENSUS,
Washington, D. C., June 24, 1919.

SIR:

The Council of National Defense began the Standard Nomenclature of Diseases, Pathological Conditions, Injuries, and Poisonings for the United States, but was unable to complete the work because of other pressing problems. The Council therefore recommended that the nomenclature be completed by the Bureau of the Census. This recommendation was indorsed by the Surgeon Generals of the Army, Navy, and Public Health Service, and the President of the United States allotted the necessary funds.

Emphasis should be given to the fact that this Standard Nomenclature is a first edition and it is hoped that criticisms will be so freely made that a better second edition will result. This publication has been prepared in the Bureau of the Census under the direct supervision of William H. Davis, M. D., chief statistician for vital statistics, and Richard C. Lappin, expert special agent, after consultation with the Advisory Committee on Medical Nomenclature.

Respectfully,

SAM. L. ROGERS,
Director.

To Hon. WILLIAM C. REDFIELD,
Secretary of Commerce.

PREFACE.

The need of a standard nomenclature of diseases and disabilities has long been felt, and repeated but unsuccessful efforts to popularize such a nomenclature cover a period of more than 50 years.

Botanists would have the greatest difficulty in discussing flowers if they did not use one name for each flower, and likewise zoologists in their discussions of animals. So also in American medical literature there should be uniformity of expression.

As cumulative experience is valuable only in direct proportion to its volume and correlative possibilities, uniformity of expression concerning morbid conditions, similar in character, is highly essential to a cumulative grouping of data relating to the incidence of disease and death.

To make possible medical discussion and to facilitate the interchange of ideas, therefore, it is necessary that we all speak the same medical language, that we all call the same diseases by the same names—that we all call, for example, the febrile condition resulting from infection with the bacillus typhosus, either typhoid fever, or else enteric fever. It makes no difference which we call it so long as we all call it by the same term and understand what the term means.

Notable efforts in the use of uniform names for diseases and conditions have resulted in the nomenclatures of diseases issued by the Royal College of Physicians of London and Bellevue and Allied Hospitals of New York. Other hospitals have also had their nomenclatures, and likewise the medical departments of the Army, the Navy, and the Public Health Service. Authors of many of the systems of medicine have used their own judgment in the use of terms so that each has, in a sense, used a nomenclature of his own. This confusion of language is not unlike that alleged to have existed during the construction of the Tower of Babel.

In 1918, at a meeting of representatives of the Army, the Navy, the Public Health Service, the War Risk Insurance, and the Council of National Defense, the possibility and desirability of creating and adopting a standard medical nomenclature were discussed. It became clear

PREFACE.

at once that the original plan for the Government services to adopt and put into immediate use a common nomenclature, meeting all needs of the Army, the Navy, and the Public Health Service, was impossible of accomplishment. The Army had just printed a new nomenclature, and it was apparent that even the preparation of a short combined list of diagnostic terms, meeting all needs, would require several months for completion. It became apparent, however, that the adoption of a common nomenclature of diseases and injuries would be very desirable and would be welcomed by all three Federal services.

The suggestion was made that it would be advantageous if a complete nomenclature could be prepared for general acceptance, each term bearing a serial number. Thereby each service could prepare its own abridged list to meet its own needs, and each list would be standard, as every term taken from the master list would bear its serial number of that list, yet these special lists employed by the different services could always be amplified without difficulty.

Other meetings were held in the offices of the Council of National Defense, and the problems were fully discussed. The following list of representatives present at the meeting held July 19, 1918, will give an idea of the breadth of the movement to prepare a standard medical nomenclature:

- Lieut. Col. ROBERT L. DICKINSON, Medical Section, Council of National Defense.
- Lieut. Col. ALBERT G. LOVE, Sick and Wounded Records, Army.
- Lieut. Comdr. J. R. PHELPS, Navy.
- Surgeon CHARLES E. BANKS, War Risk Insurance.
- Dr. WILLIAM H. DAVIS, Vital Statistics, Bureau of the Census.
- Dr. JOHN W. TRASK, United States Employees' Compensation Commission.
- Mr. CHARLES H. VERRILL, Committee on Statistics and Compensation Insurance
Costs of the International Association of Industrial Accident Boards and Commissions.
- Assistant Surgeon General W. G. STIMPSON, Public Health Service.
- Dr. WILMER R. BATT, Committee on Statistics, Council of National Defense.
- Dr. WILLIAM J. MEANS, Association of Medical Colleges of America, President.
- Dr. FREDERICK L. HOFFMAN, Prudential Life Insurance Co. of America.
- Mr. GEORGE H. VAN BUREN, Statistical Bureau, Metropolitan Life Insurance Co.
- Major JOHN S. FULTON, Conference of State and Provincial Health Officers.
- Dr. CHARLES F. BOLDUAN, Municipal Health Boards.
- Mr. RICHARD C. LAPPIN, American Public Health Association.
- Dr. JOSEPH HENRY BYRNE, Catholic Hospital Association.
- Mr. ELMORE DAVIES, Foreign Nomenclature and Abbreviations.
- Surgeon CARROLL FOX, Division of Sanitation, Navy.
- Major CHARLES B. DAVENPORT, Department of Anthropology, Surgeon General's Office.
- Mr. CHARLES H. WINSLOW, Federal Board for Vocational Education.

PREFACE.

The following representatives were unavoidably absent:

- Dr. JOHN G. BOWMAN, American College of Surgeons.
- Dr. WARREN COLEMAN, Bellevue Nomenclature.
- Dr. ARTHUR HUNTER, New York Life Insurance Co.
- Dr. H. S. PLUMMER, Mayo Clinic.
- Mr. JOHN H. WILLIAMS, Civil Engineers and Scientific Management.
- Dr. ROYAL MEEKER, United States Bureau of Labor Statistics.
- Miss CLARA D. NOYES, American Nurses Association.
- Colonel W. T. LONGCOPE, Internal Medicine.
- Assistant Surgeon General B. S. WARREN, Division of Sanitary Reports and Statistics, Public Health Service.
- Colonel CHAMPE C. McCULLOCH, History of the War, Army Medical Museum.

The associations invited but designating no representatives were the American Medical Association and the American Hospital Association.

The Council of National Defense, confronted with the pressing problem of forming the United States Volunteer Medical Service Corps, found that it could not also continue the preparation of a medical nomenclature, and a recommendation was made that the Bureau of the Census undertake the work. This recommendation was indorsed by the Surgeon Generals of the Army, the Navy, and the Public Health Service. The President of the United States allotted funds to the Bureau of the Census for the preparation of the nomenclature as a war measure.

The Council of National Defense, therefore, turned over all its material to the Bureau of the Census and the preliminary work was then continued by a special corps of expert clerks in the Division of Vital Statistics under the direct supervision of William H. Davis, M. D., chief statistician, and Richard C. Lappin, expert special agent.

The preliminary work and plans for the completion of the nomenclature were discussed with great care in a two-day session of the Advisory Committee on Medical Nomenclature held in the Bureau of the Census May 1 and 2, 1919.

The members of the Advisory Committee on Medical Nomenclature are:

- Dr. WILLIAM H. DAVIS, *Chairman*.
- Dr. WILMER R. BATT.
- Dr. FREDERICK L. HOFFMAN.
- Lieut. Comdr. J. R. PHELPS, U. S. Navy.
- Lieut. Col. ALBERT G. LOVE, U. S. Army.
- Surgeon JOHN W. TRASK, U. S. Public Health Service.
- Dr. WARREN COLEMAN.
- Lieut. Col. ROBERT L. DICKINSON.

PREFACE.

Three members of the Committee were unable to be present—Dr. Coleman being ill with influenza; Lieut. Col. Dickinson, absent in China; and Lieut. Col. Love, who was represented by Lieut. Col. John S. Fulton, U. S. Army.

Particular emphasis should be given to the fact that the medical nomenclature here presented is a first edition and consequently far from perfect. Free criticism is earnestly solicited from all, that each succeeding edition may be an improvement on the preceding one.

The following headnote appears in the section relating to Injuries, Wounds, etc., by External Causes:

In all statements of injuries the cause or manner of the injury should be given and information as to whether the injury was accidental, suicidal, homicidal, or a casualty in action.

Oftentimes physicians are not in a position to say, absolutely, whether an injury was accidental, suicidal, or homicidal. In such cases it is recommended that the physician qualify his statement with the word "probably," as—probably accidental, probably suicidal, probably homicidal.

Occasionally a term under Injuries, Wounds, etc., by External Causes, is not actually an injury or wound by external causes, but does imply the existence or previous existence of such an injury or wound, as, for example, compression by cicatrix, amputation stump, etc.

The nomenclature here submitted is an attempted consolidation of eight nomenclatures, namely: The Bellevue Hospital Nomenclature of Diseases and Conditions; Nomenclature of Diseases and Conditions, United States Public Health Service; Coding Book for Diseases and Traumatisms, Medical Department, United States Army; Nomenclature of Diseases and Injuries, Medical Department, United States Navy; Nomenclature of Diseases and Affections, American Expeditionary Forces; Classification of Diseases, Massachusetts General Hospital; List of Diseases and Pathological Conditions, Stanford University Medical Department, including Lane Hospital; and the Nomenclature of Diseases, Royal College of Physicians of London.

To the terms taken from these nomenclatures have been added terms from standard works on medicine and surgery, the Johns Hopkins Hospital Reports Monographs, New Series No. IV, and such medical dictionaries as Gould, Stedman, and Dorland. When

PREFACE.

authorities differ as to proper spelling of terms and as to preferred terms, Gould has been followed for the most part.

Many terms are given which physicians may regard as symptoms of a known disease. In all such cases the primary disease should be given the preference. The printing of such terms in boldfaced type merely suggests the propriety of using such terms if no better ones can be determined.

"Splenic anemia" is printed in boldfaced type, but if the physician considers such an anemia simply a manifestation of syphilis, then syphilis would be the preferred term.

Again anemia, agraphia, and many other symptoms dependent upon lesions of the nervous system are printed in boldfaced type. But whenever the physician is able to ascertain the underlying cause of these symptoms the cause should be given preference. In the present state of medical knowledge it would be a decided loss to delete all of these symptoms from a medical nomenclature, for oftentimes these symptoms give the only picture of the disease that is obtainable.

Who can say that cancer, diabetes, arteriosclerosis, and all the other diseases of unknown origin will be regarded as separate entities a generation hence? At present, however, there can be no doubt about placing each of these diseases in the acceptable class in a medical nomenclature.

A clear line between symptoms and diseases oftentimes can not be drawn. Many a term which to-day is properly used to describe a pathological condition may to-morrow be considered a symptom of a disease if the etiology of the disease is discovered.

Attention is again called to the fact that this medical nomenclature is a first edition, intended to draw from physicians and all others interested free criticisms which will help to make a later edition of greater value.

EXPLANATORY.

Preferred terms are printed in boldfaced type and are preceded by numbers. The first preferred term in the list of **DISEASES AND PATHOLOGICAL CONDITIONS**, page 11, has the number 1001, the first preferred term under the second letter of the alphabet 2001, and so on.

Terms in the list of **INJURIES, WOUNDS, ETC., BY EXTERNAL CAUSES**, beginning on page 260, are similarly numbered, the letter "A" preceding each number.

Terms in the list of **POISONINGS AND INTOXICATIONS**, beginning on page 310, are similarly numbered, the letter "B" preceding each number.

Synonyms are inclosed in parentheses.

Terms have been carefully cross-referenced so that no index is necessary, as every preferred term will be found either in the list of "Diseases and Pathological Conditions," in the list of "Injuries, Wounds, etc., by External Causes," or in the list of "Poisonings and Intoxications."

Water Deprivation. See **A 4004 Deprivation, Water.**

A 23001 Wound. State location and whether gunshot, incised, lacerated, punctured, or stab.

A 23002 — Contused. State location.

A 23003 — Crushing. State location.

A 23004 — Extensive. State location and whether gunshot, incised, lacerated, punctured, or stab.

A 23005 — Granulating. State location and whether gunshot, incised, lacerated, punctured, or stab.

A 23006 — Gunshot. State location and variety.

A 23007 — Incised. State location.

— Infection. See **A 9001 Infection, Wound.**

A 23008 — Lacerated. State location.

A 23009 — of Abdominal Wall.

A 23010 — — Alveolus.

A 23011 — — Anus.

A 23012 — — Arm.

A 23013 — — Artery. State artery. State whether gunshot, incised,

A 23014 — — Back. lacerated, punctured, or stab.

A 23015 — — Bladder.

A 23016 — — Bone. State bone.

A 23017 — — Brain.

A 23018 — — Breast.

Wou

STANDARD NOMENCLATURE.

- A 23019 **Wound of Bursa.** State bursa.
- A 23020 — — **Buttock.**
- A 23021 — — **Chest Wall.**
- A 23022 — — **Esophagus.**
- A 23023 — — **External Ear.**
- A 23024 — — **Eye.**
- A 23025 — — **Eye-lid.**
- A 23026 — — **Face.**
- A 23027 — — **Finger.**
