The FEDERAL REGISTER (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act ( 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register ( 1 CFR Ch. I). The
Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.
The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.
Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see http://www.nara.gov/ fedreg.
The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the Federal Register shall be judicially noticed.
The Federal Register is published in paper and on $24 x$ microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government I'rinting Office. The online edition of the Federal Register www.access.gpo.gov/ nara, available through GPO Access, is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the Federal Register is published and includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.
For more information about GPO Access, contact the GPO Access User Support Team, call toll free 1-888-293-6498; DC area 202$5^{1} 2-1530$; fax at 202-512-1262; or via email at gpoaccess@gpo.gov. The Support Team is available between 7:00 a.m. and 5:30 p.m. Eastern Time, Monday-Friday, except official holidays.
The annual subscription price for the Federal Register paper edition is $\$ 699$, or $\$ 764$ for a combined Federal Register, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the Federal Register including the Federal Register Index and LSA is $\$ 264$. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $\$ 10.00$ for each issue, or $\$ 10.00$ for each group of pages as actually bound; or $\$ 2.00$ for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add $40 \%$ for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, bookstore@gpo.gov.
There are no restrictions on the republication of material appearing in the Federal Register.
How To Cite This Publication: Use the volume number and the page number. Example: 68 FR 12345.
Postmaster: Send address changes to the Superintendent of Documents. Federal Register, U.S. Government Printing Office, Washington DC 20402, along with the entire mailing label from the last issue received.

## Rules and Regulations

## Federal Register

Vol. 68, No. 216
Friday, November 7, 2003

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

## 14 CFR Part 23

## [Docket No. CE199, Special Condition 23-139-SC]

## Special Conditions; Garmin

 International, Inc. EFIS on the Diamond DA-40; Protection of Systems for High Intensity Radiated Fields (HIRF)Agencr: Federal Aviation
Administration (FAA), DOT.
ACTION: Final special conditions; request for comments.
summary: These special conditions are issued to Garmin International, Inc., 1200 E. 151st St., Olathe, KS 66062, for a Supplemental Type Certificate for the Diamond Aircraft Industries DA-40.
This airplane will have novel and unusual design features when compared to the state of technology envisaged in the applicable airworthiness standards.
These novel and unusual design features include the installation of an electronic flight instrument system (EFIS) display, Model G-1000, manufactured by Garmin International, Inc. for which the applicable regulations do not contain adequate or appropriate airworthiness standards for the protection of these systems from the effects of high intensity radiated fields (HIRF). These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to the airworthiness standards applicable to these airplanes. DATES: The effective date of these special conditions is October 22, 2003 Comments must be received on or before December 8, 2003.
ADDRESSES: Comments on these special conditions may be mailed in duplicate to: Federal Aviation Administration, Regional Counsel, ACE-7, Attention:

Rules Docket Clerk, Docket No. CE199, Room 506, 901 Locust, Kansas City, Missouri 64106. All comments must be marked: Docket No. CE199. Comments may be inspected in the Rules Docket weekdays, except Federal holidays, between 7:30 a.m. and $4 \mathrm{p} . \mathrm{m}$.
FOR FURTHER INFORMATION CONTACT: WeS
Ryan, Aerospace Engineer, Standards Office (ACE-110), Small Airplane Directorate, Aircraft Certification Service, Federal Aviation
Administration, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone (816) 329-4127.

## SUPPLEMENTARY INFORMATION:

The FAA has determined that notice and opportunity for prior public comment hereon are impracticable because these procedures would significantly delay issuance of the approval design and thus delivery of the affected aircraft. In addition, the substance of these special conditions has been subject to the public comment process in several prior instances with no substantive comments received. The FAA, therefore, finds that good cause exists for making these special conditions effective upon issuance.

## Comments Invited

Interested persons are invited to submit such written data, views, or arguments, as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Administrator. The special conditions may be changed in light of the comments received. All comments received will be available in the Rules Docket for examination by interested persons, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerning this rulemaking will be filed in the docket. Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must include a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. CE199." The postcard will be date stamped and returned to the commenter.

## Background

On March 6, 2003, Garmin International, Inc., 1200 E. 151st St., Olathe, KS 66062, made an application to the FAA for a new Supplemental Type Certificate for the Diamond Aircraft Industries DA-40 airplane. The DA-40 is currently approved under TC No. A47CE. The proposed modification incorporates a novel or unusual design feature, such as digital avionics consisting of an EFIS that is vulnerable to HIRF external to the airplane.

## Type Certification Basis

Under the provisions of 14 CFR part 21, §21.101, Garmin International, Inc. must show that the Diamond DA-40 aircraft meets the following original certification basis provisions or the applicable regulations in effect on the date of application for the change to the DA-40: Type Certification under 14 CFR part $21, \S 21.29$, including the following requirements: Joint Aviation Requirements (JAR) 23, Initial Issue, dated March 11, 1994. The DA-40 was certificated using the FAA/JAA validation certification procedures and significant regulatory differences were addressed. Therefore, the certification basis is equivalent to 14 CFR part 23, effective February 1, 1965, including Amendments 23-1 through Amendment 23-51. 14 CFR part 36, effective December 1, 1969, including Amendments 36-1 through Amendment 36-21. Special Condition 23-107-SC, applicable to the Model DA-40 for protection of systems for High Intensity Radiated Fields, published on June 7, 2001. Exemptions, if any; and the special conditions adopted by this rulemaking action.

## Discussion

If the Administrator finds that the applicable airworthiness standards do not contain adequate or appropriate safety standards because of novel or unusual design features of an airplane, special conditions are prescribed under the provisions of $\$ 21.16$.
Special conditions, as appropriate, as defined in § 11.19, are issued in accordance with § 11.38 after public notice and become part of the type certification basis in accordance with §21.101.
Special conditions are initially applicable to the model for which they are issued. Should the applicant apply
for a supplemental type certificate to modify any other model already included on the same type certificate to incorporate the same novel or unusual design feature, the special conditions would also apply to the other model under the provisions of $\S 21.101$.

## Novel or Unusual Design Features

Garmin International, Inc. plans to incorporate certain novel and unusual design features into the Diamond DA-40 airplane for which the airworthiness standards do not contain adequate or appropriate safety standards for protection from the effects of HIRF These features include EFIS, which are susceptible to the HIRF environment, that were not envisaged by the existing regulations for this type of airplane.
Protection of Systems From High Intensity Radiated Fields (HIRF)
Recent advances in technology have given rise to the application in aircraft designs of advanced electrical and electronic systems that perform functions required for continued safe flight and landing. Due to the use of sensitive solid-state advanced components in analog and digital
electronics circuits, these advanced systems are readily responsive to the transient effects of induced electrical current and voltage caused by the HIRF. The HIRF can degrade electronic systems performance by damaging components or upsetting system functions.

Furthermore, the HIRF environment has undergone a transformation that was not foreseen when the current requirements were developed. Higher energy levels are radiated from transmitters that are used for radar, radio, and television. Also, the number of transmitters has increased significantly. There is also uncertainty concerning the effectiveness of airframe shielding for HIRF. Furthermore, coupling to cockpit-installed equipment through the cockpit window apertures is undefined.
The combined effect of the technological advances in airplane design and the changing environment has resulted in an increased level of vulnerability of electrical and electronic systems required for the continued safe flight and landing of the airplane. Effective measures against the effects of exposure to HIRF must be provided by
the design and installation of these systems. The accepted maximum energy levels in which civilian airplane system installations must be capable of operating safely are based on surveys and analysis of existing radio frequency emitters. These special conditions require that the airplane be evaluated under these energy levels for the protection of the electronic system and its associated wiring harness. These external threat levels, which are lower than previous required values, are believed to represent the worst case to which an airplane would be exposed in the operating environment.
These special conditions require qualification of systems that perform critical functions, as installed in aircraft, to the defined HIRF environment in paragraph 1 or, as an option to a fixed value using laboratory tests, in paragraph 2, as follows:
(1) The applicant may demonstrate that the operation and operational capability of the installed electrical and electronic systems that perform critical functions are not adversely affected when the aircraft is exposed to the HIRF environment defined below:

|  | Frequency | Field Strength (volts per meter) |  |
| :---: | :---: | :---: | :---: |
|  |  | Peak | Average |
| $10 \mathrm{kHz}-100 \mathrm{kHz}$ |  | 50 | 50 |
| $100 \mathrm{kHz}-500 \mathrm{kHz}$ |  | 50 | 50 |
| $500 \mathrm{kHz}-2 \mathrm{MHz}$ |  | 50 | 50 |
| $2 \mathrm{MHz}-30 \mathrm{MHz}$ |  | 100 | 100 |
| $30 \mathrm{MHz}-70 \mathrm{MHz}$ |  | 50 | 50 |
| $70 \mathrm{MHz}-100 \mathrm{MHz}$ |  | 50 | 50 |
| $100 \mathrm{MHz}-200 \mathrm{MHz}$ |  | 100 | 100 |
| $200 \mathrm{MHz}-400 \mathrm{MHz}$ |  | 100 | 100 |
| $400 \mathrm{MHz}-700 \mathrm{MHz}$ |  | 700 | 50 |
| $700 \mathrm{MHz}-1 \mathrm{GHz}$ |  | 700 | 100 |
| $1 \mathrm{GHz}-2 \mathrm{GHz}$ |  | 2000 | 200 |
| $2 \mathrm{GHz}-4 \mathrm{GHz}$ |  | 3000 | 200 |
| $4 \mathrm{GHz}-6 \mathrm{GHz}$ |  | 3000 | 200 |
| $6 \mathrm{GHz}-8 \mathrm{GHz}$ |  | 1000 | 200 |
| $8 \mathrm{GHz}-12 \mathrm{GHz}$ |  | 3000 | 300 |
| $12 \mathrm{GHz}-18 \mathrm{GHz}$ |  | 2000 | 200 |
| $18 \mathrm{GHz}-40 \mathrm{GHz}$ |  | 600 | 200 |

The field strengths are expressed in terms of peak root-mean-square (rms) values.
or,
(2) The applicant may demonstrate by a system test and analysis that the electrical and electronic systems that perform critical functions can withstand a minimum threat of 100 volts per meter, electrical field strength, from 10 kHz to 18 GHz . When using this test to show compliance with the HIRF requirements, no credit is given for signal attenuation due to installation.
A preliminary hazard analysis must be performed by the applicant, for approval by the FAA, to identify either
electrical or electronic systems that perform critical functions. The term "critical" means those functions whose failure would contribute to, or cause, a failure condition that would prevent the continued safe flight and landing of the airplane. The systems identified by the hazard analysis that perform critical functions are candidates for the application of HIRF requirements. A system may perform both critical and non-critical functions. Primary electronic flight display systems, and their associated components, perform
critical functions such as attitude, altitude, and airspeed indication. The HIRF requirements apply only to critical functions.

Compliance with HIRF requirements may be demonstrated by tests, analysis, models, similarity with existing systems, or any combination of these. Service experience alone is not acceptable since normal flight operations may not include an exposure to the HIRF environment. Reliance on a system with similar design features for redundancy as a means of protection
against the effects of external HIRF is generally insufficient since all elements of a redundant system are likely to be exposed to the fields concurrently.

## Applicability

As discussed above, these special conditions are applicable to the Diamond DA-40 airplane. Should Garmin International, Inc. apply at a later date for a supplemental type certificate to modify any other model on the same type certificate to incorporate the same novel or unusual design feature, the special conditions would apply to that model as well under the provisions of §21.101.

## Conclusion

This action affects only certain novel or unusual design features on one model of airplane. It is not a rule of general applicability and affects only the applicant who applied to the FAA for approval of these features on the airplane.
The substance of these special conditions has been subjected to the notice and comment period in several prior instances and has been derived without substantive change from those previously issued. It is unlikely that prior public comment would result in a significant change from the substance contained herein. For this reason, and because a delay would significantly affect the certification of the airplane, which is imminent, the FAA has determined that prior public notice and comment are unnecessary and impracticable, and good cause exists for adopting these special conditions upon issuance. The FAA is requesting comments to allow interested persons to submit views that may not have been submitted in response to the prior opportunities for comment described above.

## List of Subjects in 14 CFR Part 23

Aircraft, Aviation safety, Signs and symbols.

## Citation

The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. $106(\mathrm{~g}), 40113$ and 44701; 14 CFR 21.16 and 21.101; and 14 CFR 11.38 and 11.19.

## The Special Conditions

- Accordingly, pursuant to the authority delegated to me by the Administrator, the following special conditions are issued as part of the type certification basis for Diamond DA-40 airplane modified by Garmin International, Inc. to add a G-1000 EFIS system.

1. Protection of Electrical and Electronic Systems from High Intensity Radiated Fields (HIRF)

Each system that performs critical functions must be designed and installed to ensure that the operations, and operational capabilities of these systems to perform critical functions, are not adversely affected when the airplane is exposed to high intensity radiated electromagnetic fields external to the airplane.
2. For the purpose of these special conditions, the following definition applies:
Critical Functions: Functions whose failure would contribute to, or cause, a failure condition that would prevent the continued safe flight and landing of the airplane.
Issued in Kansas City, Missouri, on October 22, 2003.
Michael Gallagher,
Manager, Small Airplane Directorate, Aircraft Certification Service.

## DEPARTMENT OF TRANSPORTATION

## Federal Aviation Administration

## 14 CFR Part 39

[Docket No. 2002-NM-157-AD; Amendment 39-13360; AD 2003-22-12]

## RIN 2120-AA64

Airworthiness Directives; Bombardier Model CL-600-1A11 (CL-600), CL-600-2A12 (CL-601), and CL-600-2B16 (CL-601-3A, CL-601-3R, and CL-604) Series Airplanes
agencr: Federal Aviation
Administration, DOT.
ACTION: Final rule.
SUMMARY: This amendment adopts a new airworthiness directive ( AD ), applicable to certain Bombardier Model CL-600-1A11 (CL-600), CL-600-2A12 (CL-601), and CL-600-2B16 (CL-601$3 A, C L-601-3 R$, and CL-604) series airplanes. This amendment requires revising the airplane flight manual to provide the flightcrew with procedures and limitations for operating the airplane with out-of-tolerance angle of attack (AOA) transducers. This amendment also requires, among other actions, measuring the vane angles and voltage of the AOA transducers; reworking the AOA transducer assemblies; repetitive measurements of the resistance of both AOA transducers; and follow-on and corrective actions, as
applicable. This action is necessary to prevent flat spots on the potentiometers of the AOA transducers due to wear, which may cause a delay in the commands for stall warning, stick shaker, and stick pusher operation. This action is intended to address the identified unsafe condition.
DATES: Effective December 12, 2003.
The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of December 12, 2003.
ADDRESSES: The service information referenced in this AD may be obtained from Bombardier, Inc., Canadair, Aerospace Group, PO Box 6087, Station Centreville, Montreal, Quebec H3C 3G9, Canada. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, New York Aircraft Certification Office, 10 Fifth Street, Third Floor, Valley Strean, New York; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

## FOR FURTHER INFORMATION CONTACT:

Luciano Castracane, Aerospace
Engineer, Systems and Flight Test Branch, ANE-172, FAA, New York Aircraft Certification Office, 10 Fifth Street, Third Floor, Valley Stream, New York 11581; telephone (516) 256-7535; fax (516) 568-2716.
SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to certain Bombardier Model CL-600-1A11 (CL-600), CL-600-2A12 (CL-601), and CL-600-2B16 (CL-601-3A, CL-601-3R, and CL-604) series airplanes was published in the Federal Register on February 28, 2003 ( 68 FR 9602). That action proposed to require revising the airplane flight manual to provide the flightcrew with procedures and limitations for operating the airplane with out-of-tolerance angle of attack (AOA) transducers. That action also proposed to require, among other actions, measuring the vane angles and voltage of the AOA transducers; reworking the AOA transducer assemblies; repetitive measurements of the resistance of both AOA transducers; and follow-on and corrective actions, as applicable.

## Comments

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due
consideration has been given to the single comment received.

The commenter concurs with the proposed rule.

## Conclusion

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.
Changes to 14 CFR Part 39/Effect on the AD

On July 10, 2002, the FAA issued a new version of 14 CFR part 39 ( 67 FR

47997, July 22, 2002), which governs the FAA's airworthiness directives system. The regulation now includes material that relates to altered products, special flight permits, and alternative methods of compliance. However, for clarity and consistency in this final rule, we have retained the language of the NPRM regarding that material.

## Increase in Labor Rate

After the proposed AD was issued, we reviewed the figures we use to calculate the labor rate to do the required actions. To account for various inflationary costs
in the airline industry, we find it appropriate to increase the labor rate used in these calculations from $\$ 60$ per work hour to $\$ 65$ per work hour. The economic impact information, below, has been revised to reflect this increase in the specified hourly labor rate.

## Cost Impact

The FAA estimates that 424 airplanes of U.S. registry will be affected by this AD , and that the average labor rate is $\$ 65$ per work hour. The estimated cost impact for airplanes affected by this AD are as follows:

## Table-Cost Impact

| Actions | Work hour(s) | Parts cost | Total cost per airplane |
| :---: | :---: | :---: | :---: |
| AFM revision | 1 | None | \$65 |
| Measurement of the vane angles and voltage of AOA transducers (Part A) ..................... | 5 | None | 325 |
| Rework the AOA transducer assemblies and measurement of the baseline resistance of the applicable AOA transducers (Part B) $\qquad$ | 17 | \$161 | 1,266 |
| Measurement of the resistance of both AOA transducers (Part C) | 1 | None | 65 |
| Inspection of the left- and right-side AOA vane decal ........................................................ | 1 | None | 65 |

The cost impact figures discussed above are based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this $A D$ were not adopted. The cost impact figures discussed in AD rulemaking actions represent only the time necessary to perform the specific actions actually required by the AD . These figures typically do not include incidental costs, such as the time required to gain access and close up, planning time, or time necessitated by other administrative actions.
Manufacturer warranty remedies may be available for labor costs associated with this AD. As a result, the costs attributable to the AD may be less than stated above.

## Regulatory Impact

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national Government and the States,
or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption ADDRESSES.

## List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

## Adoption of the Amendment

- Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

## PART 39-AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:
Authority: 49 U.S.C. $106(\mathrm{~g}), 40113,44701$.

## §39.13 [Amended]

- 2. Section 39.13 is amended by adding the following new airworthiness directive:
2003-22-12 Bombardier, Inc. (Formerly Canadair): Amendment 39-13360. Docket 2002-NM-157-AD.
Applicability: This AD applies to the airplanes listed in Table 1 of this AD, certificated in any category. Table 1 is as follows:

Table 1.-Applicability

| Model | Serial Nos. |
| :---: | :---: |
| CL-600-1A11 (CL-600) series airplanes | 1004 through 1085 inclusive. |
| CL-600-2A12 (CL-601) series airplanes | 3001 through 3066 inclusive. |
| CL-600-2B16 (CL-601-3A and -3R) series airplanes | 5001 through 5194 inclusive. |
| CL-600-2B16 (CL-604) series airplanes ......... | 5301 and subsequent. |

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this $A D$. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative inethod of compliance in accordance with paragraph ( n ) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by
this AD ; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent flat spots on the potentiometers of the AOA transducers due to wear, which may cause a delay in the commands for stall warning, stick shaker, and stick pusher operation, accomplish the following:
Revision of Airplane Flight Manual (AFM)
(a) Before the accumulation of 300 total flight hours, or within 7 days after the
effective date of this $A D$, whichever occurs later: Revise the Limitations, Emergency Procedures, Normal Procedures, and Abnormal Procedures Sections of the applicable Canadair Challenger AFM by inserting a copy of the Temporary Revisions listed in Table 2 of this AD , as applicable. Table 2 is as follows (some Temporary Revisions listed in Table 2 of this AD contain Product Support Publication (PSP) identifiers):

Table 2.-TEmporary Revisions

| Model | PSP | Temporary revision | Date |
| :---: | :---: | :---: | :---: |
| CL-600-1A11 (CL-600) series airplanes ............................................ | None | 600/20 | Nov. 26, 2001. |
|  | None | 600/21 | Nov. 26, 2001. |
|  | PSP 600-1-18 | 600-1/13 | Nov. 26, 2001. |
|  | None | 600-1/17 | Nov. 26, 2001. |
| CL-600-2A12 (CL-601) series airplanes ............................................ | None | 601/25 | Nov. 26, 2001. |
|  | PSP 601-1A-1 | 601/13 | Nov. 26, 2001. |
|  | PSP 601-1A-17 | 601/24 | Nov. 26, 2001. |
|  | PSP 601-1A-18 | 601/25 | Nov. 26, 2001. |
|  | PSP 601-18 | 601/17 | Nov. 26, 2001. |
|  | PSP 601-1B-1 ............................. | 601/12 | Nov. 26, 2001. |
| CL-600-2B16 (CL-601-3A and -3R) series airplanes | PSP 601A-1 ................................ | 601/23 | Nov. 26, 2001. |
|  | PSP 601A-1-1 ............................. | 601/22 | Nov. 26, 2001. |
|  | PSP 601A-1-17 | 601/22 | Nov. 26, 2001. |
|  | PSP 601A-1-18 | 601/21 | Nov. 26, 2001. |
|  | PSP 601A-1-18A ......................... | 601/24 | Nov. 26, 2001. |
|  | PSP 601A-1-20A ......................... | 601/15 | Nov 26, 2001. |
| CL-600-2B16 (CL-604) series airplanes ................................................. | PSP 604-1 ................................... | 604/9 | Nov. 26, 2001. |

## Measurement

(b) Before the accumulation of 300 total flight hours, or within 200 flight hours after the effective date of this $A D$, whichever
occurs later: Measure the vane angles and voltage of the angle of attack (AOA) transducers by doing all actions specified in "PART A-Initial Special Check" of the Accomplishment Instructions of the
applicable alert service bulletin listed in Table 3 of this AD, per the applicable Bombardier alert service bulletin. Table 3 is as follows:

Table 3.-Alert Service Bulletins

| For model | Alert service bulletin | Date | Including |
| :---: | :---: | :---: | :---: |
| CL-600-1A11 (CL-600) series airplanes | A600-0715 | Jan. 7, 2002 | Appendices A and B . |
| CL-600-2A12 (CL-601) series airplanes, and CL-600-2B16 (CL-601-3A and $-3 R$ ) series airplanes. | A601-0550 | Jan. 7, 2002 | Appendices A and B . |
| CL-600-2B16 (CL-604) series airplanes ...................................... | A604-27-011 | Jan. 7, 2002 | Appendices A and B. |

Any Voltage Outside Tolerances: Replacement
(c) If, during the ineasurement required by paragraph (b) of this AD, any recorded voltage is found to be outside the tolerances specified in the applicable Bombardier alert service bulletin identified in Table 3 of this AD , before further flight: Replace the stall protection computer (SPC) with a new SPC and do the follow-on actions (i.e., recording in Appendix A and repeat actions), per "PART A-Initial Special Check" of the Accomplishment Instructions of the applicable Bombardier alert service bulletin identified in Table 3 of this AD.

All AOA Vane Angles Within Tolerances: Disconnection and Measurement
(d) If, during the measurement required by paragraph (b) of this AD, all of the recorded AOA vane angles for both AOA transducers are found to be within the tolerances specified in the applicable Bombardier alert service bulletin listed in Table 3 of this AD. before further flight: Do the follow-on actions (i.e., disconnect breakout box, and measure the baseline resistance of the AOA transducer between certain pins), per "PART B-AOA Transducer Assembly Rework/Baseline Resistance Check" of the Accomplishment Instructions of the applicable Bombardier alert service bulletin identified in Table 3 of this AD. After doing the follow-on actions, the applicable AFM revision required by
paragraph (a) of this AD may be rernoved from the AFM.
One or More AOA Vane Angles Outside Tolerances, But All AOA Vane Angles

## Within Expanded Tolerances

(e) If, during the measurement required by paragraph (b) of this AD, one or more of the recorded AOA vane angles for either or both AOA transducers are found to be outside the tolerances specified in the applicable Bombardier alert service bulletin listed in Table 3 of this AD, but all recorded AOA vane angles are within the expanded tolerances specified in "Table ATolerances" of "PART A-Initial Special Check" of the Accomplishment Instructions of the applicable Bombardier alert service bulletin identified in Table 3 of this AD: Do
the action specified in paragraph (e)(1) of this AD, except as provided by paragraph (e)(2) of this AD .
(1) Before further flight, do the actions specified in paragraph (g) of this AD.
(2) In lieu of doing the actions required by paragraph (e)(1) of this $A D$, do the actions specified in paragraphs (e)(2)(i) and (e)(2)(ii) of this AD.
(i) Before further flight, measure the baseline resistance of the other AOA transducer (with recorded AOA vane angles within the tolerances specified in the applicable Bombardier alert service bulletin listed in Table 3 of this AD) per "Table ATolerances" of "PART A-Initial Special Check" of the Accomplishment Instructions of the applicable Bombardier alert service bulletin identified in Table 3 of this AD.
(ii) Within 150 flight hours after doing the measurement required by paragraph (b) of this AD, do the actions specified in
paragraph ( g ) of this AD.

## Any AOA Vane Angle Outside Tolerances

(f) If, during the measurement required by paragraph (b) of this AD, any recorded AOA vane angle of the AOA transducers is found to be outside the expanded tolerances specified in "Table A-Tolerances" of "PART A-Initial Special Check" of the applicable Bombardier alert service bulletin listed in Table 3 of this AD, before further flight: Do the actions specified in paragraph (g) of this AD.

## Transducer Assembly Rework and Baseline Resistance Measurement

(g) Except as provided by paragraph (e)(2) of this AD, before further flight after doing the measurement required by paragraph (b) of this AD: Rework the AOA transducer assemblies and measure the baseline resistance of the applicable AOA transducers by doing all actions specified in "PART BAOA Transducer Assembly Rework/Baseline Resistance Check" of the Accomplishment Instructions of the applicable Bombardier alert service bulletin identified in Table 3 of this $A D$, per the applicable Bombardier alert service bulletin. After doing the rework, the applicable AFM revision required by paragraph (a) of this AD may be removed from the AFM.
Repetitive Measurements and Corrective Actions
(h) Within 300 flight hours after doing the measurement required by paragraph (b) of
this AD: Measure the resistance of both AOA transducers by doing all actions specified in "PART C--Repetitive Resistance Check/AOA Transducer Assembly Rework" of the Accomplishment Instructions of the applicable alert service bulletin listed in Table 3 of this AD, per the applicable Bombardier alert service bulletin. Repeat the measurement at least every 300 flight hours.
(i) If, during the measurement required by paragraph ( h ) of this AD , any recorded resistance is found to be outside the tolerances specified in the applicable Bombardier alert service bulletin listed in Table 3 of this AD (i.e., more than 20 ohms from its baseline resistance value), before further flight: Do corrective actions (e.g., replace AOA transducer with new AOA transducer; perform a visual inspection of the vane assembly; rework, if necessary; a test; and measure baseline resistance of applicable AOA transducer), as applicable, per PART C-Repetitive Resistance Check/AOA Transducer Assembly Rework" of the Accomplishment Instructions of the applicable alert service bulletin listed in Table 3 of this AD.

## Concurrent Requirements: Inspection

(i) For airplanes identified in paragraphs ( j$)(1),(\mathrm{j})(2)$, and $(\mathrm{j})(3)$ of this AD : Before or at the same time with accomplishment of the requirements of paragraph (b) of this $A D$, inspect the left- and right-side AOA vane decal to verify that the correct decal is installed per paragraph ( j$)(1)$, ( j$)(2)$, or ( j$)(3)$ of this AD, as applicable.
(1) For Model CL-600-2A12 (CL-601) and CL-600-2B16 (CL-601-3A and -3R) series airplanes having serial numbers 3001 through 3066 inclusive, and 5001 through 5194 inclusive, respectively, on which AOA calibration decals, part numbers ( $\mathrm{P} / \mathrm{N}$ ) 600-52267-5 and 600-52267-6, have been installed: Inspect per Bombardier Alert Service Bulletin A601-0519, dated July 30, 1999.
(2) For Model CL-600-1A11 (CL-600) series airplanes having serial numbers 1004 through 1085 inclusive, on which AOA calibration decals, P/Ns 600-52267-5 and 600-52267-6, have been installed: Inspect per Bombardier Alert Service Bulletin A6000693, dated July 30, 1999.
(3) For Model CL-600-2B16 (CL-604) series airplanes having serial numbers 5301 through 5990 inclusive, on which AOA calibration decals, P/Ns 600-52267-5 and 600-52267-6, have been installed: Inspect
per Bombardier Alert Service Bulletin A604-11-009, dated July 30, 1999.

## Concurrent Requirements: Corrective <br> Actions

(k) If either of the AOA vane decals is found to be incorrect during the inspection required by paragraph $(\mathrm{j})$ of this $A D$, before further flight: Replace the AOA vane decal(s) with new vane decal(s), and ensure that the new decal(s) is the correct type, per the applicable alert service bulletin identified in paragraph $(j)(1),(j)(2)$, or $(j)(3)$ of this $A D$; except as provided by paragraph (1) of this AD.
(l) If replacement decals are not available, before further flight: Remove existing decals and do the alignment check(s) of the AOA vane transducers per the applicable alert service bulletin identified in paragraph (j)(1), (j)(2), or (j)(3) of this AD.

## Parts Installation

(m) As of the effective date of this AD, no person shall install an AOA transducer assembly on any airplane, unless the actions required by paragraphs (b) through (1) of this AD, as applicable, have been done.

## Alternative Methods of Compliance

( $n$ ) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, New York Aircraft Certification Office (ACO), FAA. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, New York ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the New York ACO.

## Special Flight Permits

(o) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

## Incorporation by Reference

(p) The actions shall be done in accordance with the following Bombardier service bulletins and Temporary Revisions to the applicable Canadair Challenger Airplane Flight Manual, as applicable:

Table 4.-Service Documents

| Document No. | PSP | Document date |

[Docket No. FAA-2003-16026; Airspace Docket No. 03-ACE-70]

Modification of Class D Airspace; and Modification of Class E Airspace; St. Joseph, MO
agency: Federal Aviation Administration (FAA), DOT.
ACTION: Direct final rule; confirmation of effective date.

SUMMARY: This document confirms the effective date of the direct final rule which revises Class D and Class E airspace at St. Joseph, MO.
effective date: 0901 UTC, December 25, 2003.

FOR FURTHER INFORMATION CONTACT:
Brenda Mumper, Air Traffic Division, Airspace Branch, ACE-520A, DOT Regional Headquarters Building, Federal Aviation Administration, 901 Locust, Kansas City, MO 64106; telephone: (816) 329-2524.

## SUPPLEMENTARY INFORMATION:

The FAA published this direct final rule with a request for comments in the Federal Register on September 12, 2003 ( 68 FR 53674). The FAA uses the direct final rulemaking procedure for a noncontroversial rule where the FAA believes that there will be no adverse public comment. This direct final rule advised the public that no adverse comments were anticipated, and that unless a written adverse comment, or a written notice of intent to submit such an adverse comment, were received within the comment period, the regulation would become effective on December 25, 2003. No adverse comments were received, and thus this notice confirms that this direct final rule will become effective on that date.

Issued in Kansas City, MO on October 23, 2003.

Paul J. Sheridan,
Acting Manager, Air Traffic Division, Central Region.

## Special Local Regulations; World Championship Super Boat Race, Deerfield Beach, FL

agency: Coast Guard, DHS. ACtion: Temporary final rule.
summary: Temporary special local regulations are being established for the World Championship Super Boat Race held offshore of Deerfield Beach, Florida. These special local regulations restrict the movement of non-
participating vessels in the regulated race area and provide for a viewing area for spectator craft. This rule is needed to provide for the safety of life on navigable waters during the event.
DATES: This rule is effective from 11 a.m. on November 4, 2003, until 4 p.m. on November 9, 2003.
ADDRESSES: Documents indicated in the preamble as being available in the docket are part of docket [CGD07-03099] and are available for inspection or copying at Coast Guard Group 1iami, 100 MacArthur Causeway, Miami Beach, FL 33139 between 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.
FOR FURTHER INFORMATION CONTACT: Chief Daniel Vaughn. Coast Guard Group Miami, FL at (305) 535-4317.

## SUPPLEMENTARY INFORMATION:

## Regulatory Information

We did not publish a notice of proposed rulemaking (NPRM) for this regulation. Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing an NPRM. Publishing an NPRM, which would incorporate a comment period before a temporary rule could be issued, would be impracticable and contrary to public interest since immediate action is needed to minimize the potential danger to the public posed by the powerboat race and the number of expected spectator craft.

For the same reasons, under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the Federal Register.

## Background and Purpose

Super Boat International Productions Inc. is sponsoring a high speed power boat race that will take place on November 4, 6, and 9, 2003, from 11 a.m. until 4 p.m. in the Atlantic Ocean off Deerfield Beach, Florida. The race organizers anticipate 80 participants and 200 spectator craft. The event will take place outside of the marked channel and will not interfere with commercial shipping. Recreational vessels and fishing vessels normally operate in the waters being used for the event. This rule is required to provide for the safety of life on navigable waters because of the inherent dangers associated with power boat races. The rule prohibits non-participating vessels from entering the regulated race area offshore of Deerfield Beach, Florida during the event. A Coast Guard Patrol Commander will be present during this event to monitor compliance with this regulation.

## Discussion of Rule

This rule will create two regulated areas, a race area and a viewing area. These regulated areas assist in providing for the safety of life on navigable waters and minimizing the inherent dangers associated with power boat races. These dangers include race craft traveling at high speeds in close proximity to one other, and in relatively close proximity to spectator craft. Due to these concerns, public safety requires the creation of these two regulated areas.

## Regulatory Evaluation

This rule is not a significant regulatory action under section $3(f)$ of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section $6(a)(3)$ of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not "significant" under the regulatory policies and procedures of the Department of Homeland Security (DHS). The rule will be in place in a limited area offshore of Deerfield Beach, Florida. Although the rule will be effective from November 4 until November 9 the rule will only be enforced on November 4, 6 and 9, from 11 a.m. until 4 p.m. each day, corresponding with the scheduled races.

## Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601-612), we have considered whether this rule will have a significant economic impact on a substantial number of small entities. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000 .

This rule may affect the following entities, some of which may be small entities: the owners or operators of vessels intending to transit or anchor in a portion of the Atlantic Ocean near Deerfield Beach, Florida from 11 a.m. until 4 p.m. on November 4, 6, and 9 , 2003. The Coast Guard certifies under U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities because this rule will be in effect for a limited duration, the rule regulates a very small area, and commercial and recreational vessels may be allowed to transit through the zone during breaks in the racing. Moreover, all vessel traffic can pass safely around the zone. Before the effective period, we will issue maritime advisories over VHF-FM radio to allow the maritime community to plan accordingly.

## Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104121), we offer to assist small entities in understanding the rule so that they can better evaluate its effects on them and participate in the rulemaking process. Small entities may contact the person listed under FOR FURTHER INFORMATION CONTACT for assistance in understanding and participating in this rulemaking.

Small businesses may send comments on the actions of Federal employees. who enforce, or otherwise determine compliance with. Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1-888-REG-FAIR (1-888-734-3247).

## Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 35013520).

## Federalism

A rule has implications for federalism under Executive Order 13132,
Federalism, if it has a substantial direct effect on State or local governments and would either preempt state law or impose a substantial direct cost of compliances on them. We have analyzed this rule under that Order and have determined that it does not have implications for Federalism.

## Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531-1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $\$ 100,000,000$ or more in any one year. Though this will not result in such expenditure, we do discuss the effects of this rule elsewhere in this preaınble.

## Taking of Private Property

This rule will not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

## Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

## Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.
Indian Tribal Governments
This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

## Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply.

Distribution, or Use. We have determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

## Environment

We have analyzed this rule under Commandant Instruction M16475.1D, which guides the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA)(42 U.S.C. 4321-4370f), and have concluded that there are no factors in this case that would limit the use of a categorical exclusion under section 2.B. 2 of the Instruction. Therefore, this rule is categorically excluded, under figure 2-1, paragraph (34)(h), of the Instruction, from further environmental documentation. A final "Environmental Analysis Check List" and a final
"Categorical Exclusion Determination" are available in the docket where indicated under AdDRESSES.
List of Subjects in 33 CFR Part 100
Marine safety, Navigation (water), Reporting and record keeping requirements, Waterways.

- For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 100, as follows:

## PART 100-SAFETY OF LIFE ON NAVIGABLE WATERS

- 1. The authority citation for part 100 continues to read as follows:

Authority: 33 U.S.C. 1233; Department of Homeland Security Delegation No. 0170.1.

- 2. Add temporary § 100.35T-07-099 to read as follows:
§ 100.35T-07-099 World Championship Super Boat Race; Deerfield Beach, Florida.
(a) Regulated areas. (1) The regulated race area encompasses all waters located within a line connecting the following positions located offshore of Deerfield Beach, Florida-Point 1: $26^{\circ} 15.70 \mathrm{~N}$, $080^{\circ} 04.90 \mathrm{~W}$; Point 2: $26^{\circ} 15.70 \mathrm{~N}$, $080^{\circ} 04.10 \mathrm{~W}$, Point 3: $26^{\circ} 19.70 \mathrm{~N}$, $080^{\circ} 03.70 \mathrm{~W}$, and Point $4: 26^{\circ} 19.70 \mathrm{~N}$, $080^{\circ} 04.40 \mathrm{~W}$. All coordinates referenced use Datum: NAD 1983.
(2) The regulated viewing area encompasses all waters located within a line connecting the following positions located offshore of Deerfield Beach, Florida-Point 1: $26^{\circ} 15.50 \mathrm{~N} ; \mathbf{0 8 0}{ }^{\circ} 04.20$

W; Point 2: $26^{\circ} 15.50 \mathrm{~N} ; 080^{\circ} 04.00 \mathrm{~W}$; Point 3: $26^{\circ} 19.39 \mathrm{~N} ; 080^{\circ} 03.90 \mathrm{~W}$; and Point 4: $26^{\circ} 19.39 \mathrm{~N} ; 080^{\circ} 04.05 \mathrm{~W}$. All coordinates referenced use Datum NAD: 1983.
(b) Coast Guard Patrol Cominander. The Coast Guard Patrol Commander is a commissioned, warrant, or petty officer of the Coast Guard who has been designated by Commanding Officer, Coast Guard Group Miami, Florida.
(c) Special Local Regulations. From 11 a.m. until 4 p.m. on November 4 , November 6, and November 9, 2003, non-participant vessels are prohibited from entering the race area unless authorized by the Coast Guard Patrol Commander. Spectator craft may remain in the designated viewing area, but must follow the directions of the Coast Guard Patrol Commander.
(d) Dates: This section is effective from 11 a.m. on November 4, 2003, uṇtil 4 p.m. on November 9, 2003.

## Dated: October 31, 2003.

Harvey E. Johnson, Jr.,
Rear Admiral, U.S. Coast Guard, Commander, Seventh Coast Guard District.

RIN 0651-AB0045

## Modification to Temporary Postponement of Electronic Filing and Payment Rules for Certain Madrid Protocol-Related Rules

agency: United States Patent and Trademark Office, Commerce.
ACTION: Final rule; modification to suspension of applicability dates.
summary: The United States Patent and Trademark Office (USPTO) is modifying a temporary postponement of those provisions of the Trademark Rules of Practice that require electronic transmission to the USPTO of applications for international registration, responses to irregularity notices. and subsequent designations submitted pursuant to the Madrid Protocol. That postponement was announced in a document published in the Federal Register on October 24, 2003.

The USPTO is also modifying a temporary suspension, announced in the same Federal Register document, of those provisions of the Rules of Practice
that allow payment of fees charged by the International Bureau of the World Intellectual Property Organization (IB) to be submitted through the USPTO, and those provisions of the Trademark Rules of Practice that require that all fees for international trademark applications and subsequent designations be paid at the time of filing.
The temporary postponements and the temporary suspensions of the Rules of Practice, as well as the modifications to these postponements and suspensions that are announced herein, are in effect from November 2, 2003, to January 2, 2004. If it becomes necessary to extend the suspensions and postponements, and/or the modifications thereto, the USPTO will issue a notice announcing these extensions at least 10 business days before the extensions commence.

The modifications announced herein are procedural in nature and do not affect any substantive rights.
DATES: The applicability date for regulations at 37 CFR 2.190(a), 2.198(a)(1), 7.7(a) and (b), 7.11(a) introductory text and (a)(9), 7.14(e), 7.21(b) introductory text and (b)(7) remains suspended from November 2. 2003, to January 2, 2004.
FOR FURTHER INFORMATION CONTACT: Ari Leifman, Office of the Commissioner for Trademarks, by telephone at (703) 3088910, ext. 155, or by e-mail to ari.leifman@uspto.gov.

## SUPPLEMENTARY INFORMATION:

## Background

The Madrid Protocol provides a system for obtaining an international trademark registration. The Madrid Protocol Implementation Act of 2002, Pub. L. 107-273, 116 Stat. 1758, 19131921 (MPIA) amends the Trademark Act of 1946 to implement the provisions of the Madrid Protocol in the United States.

On September 26, 2003, the USPTO published new regulations to implement the MPIA. 68 FR 55748, posted on the USPTO Web site at http:// www.uspto.gov/web/offices/com/sol/ notices/68fr55748.pdf. These regulations take effect on November 2, 2003. The regulations require that certain submissions that are made to the USPTO in connection with the Madrid Protocol be transmitted using the Trademark Electronic Application System (TEAS). Specifically, 37 CFR 7.11(a) requires that an international application be submitted through TEAS; 37 CFR 7.21 (b) requires that a subsequent designation (a request that protection be extended to countries not
identified in the original international application) be submitted through TEAS; and 37 CFR 7.14(e) requires that where the International Bureau of the World Intellectual Property
Organization (IB) has issued a notice of irregularity to an international applicant, and the international applicant submits a response to that notice through the USPTO, the response must be transmitted through TEAS.

## Madrid Submissions Must Be Prepared Using Paper

On October 24, 2003, the USPTO published a notice in which it announced that it would permit international applications, responses to irregularity notices, and subsequent designations to be submitted on paper rather than through TEAS, for a temporary period of time. The notice accordingly postponed the applicability of 37 CFR 7.11(a), $7.21(\mathrm{~b})$, and $7.14(\mathrm{e})$, to the extent that those provisions require transmission through TEAS. The notice further provided that this postponement would remain in effect until January 2, 2004, and that if the postponement was extended beyond January 2, 2004, a notice announcing such an extension would be published at least ten days before the extension commenced.
The postponement remains in effect, but is modified. The notice of the postponement provided that applicants could make their submission either on paper or through TEAS. However, certain technical difficulties will delay the deployment of those TEAS forms that will be used for Madrid submissions uṇtil some time after November 2, 2003. Therefore, the USPTO hereby announces that all Madrid submissions must be made on paper, until such time as the TEAS forms are posted on the USPTO web site.
The USPTO will issue a notice announcing the posting of the TEAS forms at least five days before such posting occurs.

If the TEAS forms are posted while the postponement of the applicability dates of 37 CFR 7.11 (a), 7.21 (b), and 7.14(e) is still in effect, then notwithstanding the modifications to the postponements that are announced herein, applicants will be able to file international applications, responses to irregularity notices, and subsequent designations either on paper or through TEAS. Under any circumstances, there will be a transition period during which the USPTO will accept both electronic and paper submissions.

## International Fees Must Be Paid Directly to the IB

In addition to requiring that certain submissions that are made to the USPTO in connection with the Madrid Protocol be transmitted using TEAS, the Rules of Practice that take effect on November 2, 2003, also require that international application fees be paid at the time of submission. However, with respect to Madrid submissions that are to be made on paper, the notice of October 24, 2003, temporarily suspended the applicability of those requirements. Thus, the notice suspended 37 CFR 7.11(a)(9), to the extent that it requires that international application fees for all classes and the fees for all designated Contracting Parties identified in an international application be paid at the time of submission. Likewise, the notice suspended 37 CFR 7.21(b)(7), to the extent that it requires that all international fees for a subsequent designation be paid at the time of submission.

The notice of October 24, 2003, further provided that (1) applicants who file Madrid submissions on paper must pay the USPTO certification fee at the time of submission, but must pay the international fees directly to the IB, and that (2) applicants who submit a subsequent designation on paper must pay the USPTO transmittal fee at the time of submission, but must pay the international fees directly to the IB. Additionally, the notice provided that applicants may pay the international fees to the IB either before or after submission of the international application or subsequent designation.

All provisions of the notice of October 24,2003 , that pertain to payment of fees remain in effect. However, the following is noted: these provisions of the notice of October 24, 2003, apply in cases where Madrid submissions are made using paper. Pursuant to the present notice, all Madrid submissions must be made on paper. Hence, the provisions of the notice of October 24, 2003, regarding the payment of fees now apply in all cases where Madrid submissions are made.
If the TEAS forms are posted while the postponement of the effective dates of 37 CFR 7.11 (a)(9) and 7.21 (b)(7) remains in effect, then applicants who elect to use those forms will pay the international fees (1) at the time of submission, and (2) through the USPTO.

## Applicants Should Utilize Madrid Forms Provided by the IB

## Applicants making Madrid

 submissions should use forms providedby the IB for that purpose. These forms may be downloaded from the IB Web site, http://www.wipo.int/madrid/en/. Please note that the IB will not process paper submissions that are not prepared using IB forms.

## Applicants Should Mail Madrid

## Submissions to a Designated Address

Pursuant to 37 CFR 2.190(a), all trademark-related documents submitted on paper must be mailed to the USPTO address at 2900 Crystal Drive, Arlington, Virginia 22202-3514. However, the notice of October 24, 2003, waived that rule with respect to international applications, subsequent designations, and responses to notices of irregularities that are filed on paper The notice further provided that all Madrid submissions made on paper should be mailed to the following address: Commissioner for Trademarks, PO Box 16471, Arlington, Virginia 22215-1471, Attn: MPU.

The limited waiver of 37 CFR 2.190(a) remains in effect. However, the following is noted: pursuant to the notice of October 24, 2003, the waiver, and the instruction to utilize the aboveidentified address, applied to Madrid submissions made on paper. Pursuant to the present notice, all Madrid submissions must be made on paper. Hence, the provisions of the notice of October 24, 2003, regarding the USPTO mailing address apply to all Madrid submissions.

Please note that any trademark-related correspondence other than international applications, subsequent designations, and responses to irregularity notices that is sent to the above-identified address will not be accepted, and will be returned to the sender.

If a submission mailed to the above address pursuant to this notice and to the Notice of October 24, 2003, is delivered by the Express Mail service of the United States Postal Service, the USPTO will deem that the date of receipt of the submission in the USPTO
is the date the submission was deposited as Express Mail, provided that the submitter complies with the requirements set forth in 37 CFR 2.198.
Dated: October 31, 2003.
James E. Rogan,
Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office.

[FRL-7583-7, E-Docket ID No. A-2001-0004 (Legacy Docket ID No. A-90-37)]

## Prevention of Significant Deterioration (PSD) and Non-Attainment New Source Review (NSR): Reconsideration

AGENCY: Environmental Protection Agency (EPA).
ACTION: Notice of final action on reconsideration; amendment to final rules.
SUMMARY: On December 31, 2002 and March 10, 2003, EPA revised regulations governing the major New Source Review (NSR) programs mandated by parts C and D of title I of the Clean Air Act (CAA or Act). Following these actions, the Administrator received a number of petitions for reconsideration. On July 30, 2003, EPA announced its reconsideration of certain issues arising from the final rules of December 31, 2002. We (the EPA) requested public comment on six issues for which we granted reconsideration. As a result of this reconsideration process, we have concluded that two clarifications to the underlying rules are warranted, which are: To include a definition of
"replacement unit" and to clarify that the plantwide applicability limitation (PAL) baseline calculation procedures for newly constructed units do not
apply to modified units. With respect to all other issues raised by the petitioners, we deny the requests for reconsideration.
effective date: This final action is effective on January 6, 2004.
f.DDRESSES: Docket. Docket No. A-9037 (E-Docket ID No. OAR-2001-0004), containing supporting information used to develop the proposed rule and the final rule, is available for public inspection and copying between 8 a.m. and 4:30 p.m., Monday through Friday (except government holidays) at the Air and Radiation Docket and Information Center (6102T), Room B108, EPA West Building, 1301 Constitution Avenue,
NW., Washington, DC 20460; telephone (202) 566-1742, fax (202) 566-1741. A reasonable fee may be charged for copying docket materials.

Worldwide Web (WWW). In addition to being available in the docket, an electronic copy of this final action will also be available on the WWW. Following signature, a copy of the notice will be posted on the EPA's NSR page: http://www.epa.gov/nsr.

## B. How Can I Get Copies of This Document and Other Related Information?

1. Docket. EPA has established an official public docket for this action under E-Docket ID No. OAR-2001-0004 (Legacy Docket ID No. A-90-37). The official public docket consists of the documents specifically referenced in this action, any public comments received, and other information related to this action. Although a part of the official docket, the public docket does not include Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. The official public docket is the collection of materials that is available for public viewing at the EPA Docket Center (Air Docket), U.S. Environmental Protection Agency, EPA West Building, 1301 Constitution Avenue, NW.. Room B108, Mail Code: 6102T, Washington, DC 20460. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to $4: 30$ p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is (202) $566-1742$. A reasonable fee may be charged for copying.
2. Electronic Access. You may access this Federal Register document electronically through the EPA Internet under the Federal Register listings at http://www.epa.gov/fedrgstr/.
An electronic version of a portion of the public docket is available through EPA's electronic public docket and comment system, EPA Dockets. Interested persons may use EPA Dockets at http://wuw.epa.gov/edocket/ to submit or view public comments, access the index listing of the contents of the official public docket, and access those documents in the public docket that are available electronically. Once in the system, select "search," then key in the appropriate docket identification number.

Certain types of information will not be placed in the EPA Dockets. Information claimed as CBI and other information whose disclosure is restricted by statute. which is not included in the official public docket. will not be available for public viewing in EPA's electronic public docket. EPA's policy is that copyrighted material will not be placed in EPA's electronic public docket but will be available only in printed, paper form in the official public docket. To the extent feasible, publicly available docket materials will be made available in EPA's electronic public docket. When a document is selected from the index list in EPA Dockets, the system will identify whether the document is available for viewing in

EPA's electronic public docket. Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the docket facility identified in section I.B.1. EPA intends to work towards providing electronic access to all of the publicly available docket materials through EPA's electronic public docket.
For additional information about EPA's electronic public docket visit EPA Dockets online or see 67 FR 38102, May 31, 2002.

## C. Where Can I Obtain Additional Information?

In addition to being available in the docket, an electronic copy of this final action will also be available on the WWW. Following signature, a copy of the notice will be posted on the EPA's NSR page: http://www.epa.gov/1nsr.

## D. How Is This Preamble Organized?

The information presented in this preamble is organized as follows:
I. General Information
A. What are the regulated entities?
B. How can I get copies of this document and other related information?
C. Where can I obtain additional information?
D. How is this preamble organized?
II. Background
III. Today's Action
A. Six Issues for which Reconsideration Was Granted
B. Remaining Issues in Petitions for Reconsideration
IV. Statutory and Executive Order Reviews
A. Executive Order 12866-Regulatory Planning and Review
B. Paperwork Reduction Act
C. Regulatory Flexibility Analysis
D. Unfunded Mandates Reform Act
E. Executive Order 13132-Federalism
F. Executive Order 13175-Consultation and Cocrdination with Indian Tribal Governments
G. Executive Order 13045- Protection of Children from Environmental Health Risks and Safety Risks
H. Executive Order 13211-Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use
I. National Technology Transfer and Advancement Act
J. Congressional Review Act
V. Statutory Authority
VI. Judicial Review

## II. Background

For a brief history of the NSR rulemaking process that preceded today's final action, see our discussion at 68 FR 44623 (July 30, 2003). On December 31, 2002, we issued a final rule ( 67 FR 80186) that revised regulations governing the major NSR
programs (final rules). ${ }^{1}$ The revisions included five major changes to the major NSR program that will reduce burden, maximize operating flexibility, improve environmental quality, provide additional certainty, and promote administrative efficiency. These elements include baseline actual emissions, actual-to-projected-actual emissions methodology, plantwide applicability limitations (PALs), Clean Units, and pollution control projects (PCPs). The final rules also codified our longstanding policy regarding the calculation of baseline emissions for electric utility steam generating units (EUSGUs). In addition, the final action: (1) Responded to comments we received on a proposal to adopt a methodology, developed by the American Chemistry Council (formerly known as the Chemical Manufacturers Association (CMA)) and other industry petitioners, to determine whether a major stationary source has undertaken a major modification based on its potential emissions; and (2) included a new section that spells out in one place how a major modification is determined under the various major NSR applicability options. This topic had previously been addressed primarily in the definition section of the major NSR regulations. We also clarified where to find the provisions in the revised rules and codified a definition of "regulated NSR pollutant" that clarifies which pollutants are regulated under the Act for purposes of major NSR.

On February 28, 2003, we sent notice to affected States that, consistent with our proposal in 1996. we were revising the references to 40 CFR 52.21 in delegated States' plans to reflect the December 31. 2002 changes in the Prevention of Significant Deterioration (PSD) Federal Implementation Plan (FIP) (40 CFR 52.21 (a)(2) and (b) through (bb)). This FIP applies in any area that does not have an approved PSD program in the State Implementation Plan (SIP), and in all Indian country. The notice was subsequently published in the Federal Register on March 10, 2003 (68 FR 11316).

Following publication of the December 31, 2002 and March 10, 2003 Federal Register notices, and prior to July 2003, the Administrator received numerous petitions, filed pursuant to section $307(\mathrm{~d})(7)(B)$ of the CAA,

[^1]requesting reconsideration of many aspects of the final rules. ${ }^{2}$

On July 30, 2003 ( 68 FR 44624), we granted reconsideration on six issues raised by petitioners who had filed petitions prior to Juiy 2003. ${ }^{3}$ At that time, we did not act on any of the remaining issues in those petitions. Instead, we indicated that we planned to announce our final decision on whether to reconsider the remaining petition issues no later than 90 davs after the publication of the Federal Register notice.

The first of the six issues on which we granted reconsideration involves a document we released in November 2002, entitled "Supplemental Analysis of the Environmental Impact of the 2002 Final NSR Improvement Rules." ${ }^{4}$ Our purpose in granting reconsideration on this issue was to provide the public an opportunity to comment on our analysis and to submit any additional information that they believe to be relevant to the inquiry. The remaining issues for which we granted reconsideration involved five narrow aspects of the final rule as follows:

- Using potential-to-emit (PTE) to determine baseline actual emissions for an emissions unit on which actual construction began after the 24 -month PAL baseline period when establishing a PAL;
- Eliminating synthetic minor limits [(r)(4) limits] under the PAL;

[^2]- Including a "reasonable possibility" requirement for triggering recordkeeping and reporting provisions;
- Using the actual-to-projected-actual test for replacement units; and,
- Effect of redesignation of an area from attainment to nonattainment on Clean Unit status.
We describe these issues at 68 FR 44624. For the reasons indicated at 68 FR 44624, we did not grant a stay of the final rules pending our reconsideration of these issues.
On August 14, 2003, we held a public hearing on the issues for which we granted reconsideration. Twenty-two individuals gave oral presentations at the hearing. The transcript of their comments is located in Docket OAR-2001-0004 (Legacy Number A-90-37), which can be accessed on the internet at http://www.epa.gov/edocket.
We provided a public comment period on the reconsideration issues that ended on August 29, 2003. For issues arising out of the August 14th public hearing, the comment period was extended until September 15, 2003. More than 400 written public comments on the reconsideration issues were received. The individual comment letters can be found in Docket OAR-2001-0004 (Legacy Number A-90-37).

## III. Today's Action

At this time, we are announcing our final action after reconsideration of these six issues. We are also announcing our final decision on reconsideration of the remaining issues that were raised by the petitioners. Today, we are making available a document entitled,
"Technical Support Document for Prevention of Significant Deterioration (PSD) and Non-attainment New Source Review (NSR): Reconsideration," EPA 456/R-03-005 (Technical Support Document). This document contains (1) a summary of comments received on the issues for which we granted reconsideration and our responses to these comments, and (2) a summary of petition issues for which we are not granting reconsideration, and our rationale for denying reconsideration. This document is available on our Web site at http://www.epa.gov/nsr/; and, through the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161; telephone (800) 553-6846, e-mail http:// www.ntis.gov; and, from the US EPA, Library Services, MD C267-01, Research Triangle Park, NC 27711, telephone (919) 541-2777, e-mail library.rtp@epa.gov.

## A. Six Issues for Which Reconsideration Was Granted

We received numerous responses to our request for comment on the "Supplemental Analysis of the Environmental Impact of the 2002 Final NSR Improvement Rule." After carefully considering the information that was submitted, we have determined that none of the new information presented leads us to conclude that the analysis was incorrect or substantially flawed. Therefore, we are re-affirming the validity of the original conclusions. A summary of the comments received and our responses to these comments can be found in our Technical Support Document.
With respect to the five remaining issues on which we granted reconsideration, we have concluded that two clarifications to the underlying rules are warranted. These changes relate to issues raised as a result of our request for comment on: (1) Whether replacement units should be allowed to use the actual-to-projected-actual applicability test to determine whether installing a replacement unit results in a significant emissions increase; and, (2) using potential-to-emit (PTE) to determine the baseline actual emissions for an emissions unit on which construction began after the 24 -month baseline period when establishing a PAL. As explained below, while we are not making any changes to the general approach in the final rules with respect to these issues, we are making two clarifying changes to the regulations. First, we are adding a definition of replacement unit to the final rules. Second. we are clarifying that the potential-to-emit approach for determining baseline actual emissions when establishing a PAL is only available to emissions units that are added to the major stationary source after the 24 -month baseline period, and is not available to emissions units that existed during the baseline period whether or not they have been modified since that time.

We are not making any changes to the final rules with respect to eliminating synthetic minor linits [(r)(4) limits] under the PAL, the "reasonable possibility" requirement for triggering recordkeeping and reporting provisions, or the effect of redesignation of an area from attainment to nonattainment on Clean Unit status. Our reasons for this conclusion, and our response to significant comments received, are summarized in our Technical Support Document.

1. Replacement Units

We have decided to continue to allow the owner or operator of a major stationary source (you) to use the actual-to-projected-actual applicability test to determine whether installing a replacement unit results in a significant emissions increase. However, as we reconsidered this issue and reviewed comments, we found one commenter that recommended that EPA include a definition of "replacement unit" in the regulations. The commenter asked that this definition describe how the replacement unit may differ from the replaced unit. The commenter also recommended that we indicate that the replaced unit must be removed from the. site or rendered permanently inoperable.

We believe that the current rules, as supplemented by the discussion in the December 2002 preamble, are selfimplementing for replacement units. Nevertheless, we agree with the commenter that a definition of "replacement unit" would render implementation easier. Thus, today we are adding regulatory language to further clarify our intentions regarding replacement units. Today's action revises the definition of "emissions unit" to clarify that a replacement unit is considered an existing emissions unit (e.g., §51.166(b)(7)(ii)) and therefore is eligible for the actual-to-projected-actual test for major NSR applicability determinations.
In addition, today's rule revisions add a definition of "replacement unit" that codifies longstanding policy and practice. In the preamble to the 1992 WEPCO rule, we first stated that we would "consider a unit to be replaced if it would constitute a reconstructed unit within the meaning of 40 CFR 60.15, " which is the section of the New Source Performance Standards (NSPS) General Provisions that governs reconstruction. See 57 FR 32323, column 1. We have adopted this threshold in today's rule, by defining "replacement unit" to include reconstructed units, as well as emissions units that completely take the place of an existing emissions unit. See, e.g., §51.166(b)(32)(i).

We note that we have never considered "replacement units" to include replacements that significantly change the nature of the replaced unit; it is this inherent limitation that makes the application of the actual-to-projected-actual applicability test appropriate. It is reasonable to compare the baseline actual emissions from the replaced unit to the projected actual emissions of the replacement unit because the units are effectively the same existing emissions unit. Thus,
consistent with the recently finalized equipment replacement exclusion provisions, the limiting principle here is that the replacement unit must be identical or functionally equivalent and must not change the basic design parameters of the affected process unit (e.g., for EUSGUs this might mean heat input and fuel consumption specifications). See, e.g., §§51.166(b)(32)(ii) and (iii). We also believe, however, that we need not and should not treat efficiency as a basic design parameter, as we do not believe major NSR was intended to impede industry in making energy and process efficiency improvements. We believe such improvements, on balance, will be beneficial both economically and environmentally.

We also believe that it has always been implicit in the concept of a replacement unit that the replaced unit must cease operation. Today's rule makes this principle explicit by requiring you to remove or permanently disable the replaced unit, or take a permit condition to permanently prohibit its operation. In general, if you bring the replaced unit back into operation, it must be treated as a new emissions unit, to which the actual-topotential emissions test applies. See, e.g., §51.166(b)(32)(iv).

Finally, today's rule spells out that you cannot generate an emissions reduction credit from emissions reductions that are attributable to the shutdown of the replaced emissions unit. See, e.g., §51.166(b)(32). This provision addresses concerns about the possible double-counting of emissions reductions that could otherwise occur. Thus, if you use the baseline actual emissions of the replaced unit when applying the actual-to-projected-actual emissions test to measure the emissions increase resulting from the replacement unit, you cannot subsequently take credit for the emissions reductions that occur when you shut down the replaced unit. However, this provision is not intended to prevent you from generating creditable emissions reductions through other activities at the replacement unit. For example, you may be able to generate an emissions reduction credit if you reduce emissions by installing an inherently less-polluting replacement unit and accept an enforceable emission limitation that is lower than the baseline actual emissions of the replaced unit. Such an emissions reduction would be creditable if all other criteria for generating such credit are met.
2. Emission Units for Which You Began Actual Construction After the PAL Baseline Period

We have decided to retain the calculation method that uses potential-to-emit (PTE) to determine the baseline actual emissions for an emissions unit for which you began actual construction after the 24 -month PAL baseline period when establishing a PAL. As we reconsidered this issue and reviewed comments, however, we decided it was appropriate to clarify that this method of calculation applies only to emissions units initially constructed after the PAL baseline period.

As reflected in the July 30, 2003 Federal Register notice, our intent was to limit the use of PTE to emissions units that were not in existence during the baseline period. We explained in the July notice that we included this provision, and the provision requiring the emissions of shut down units to be subtracted from the PAL level, "in recognition that the set of emissions units at your source at the time of PAL permit issuance may be different from the set of emissions units that existed during the baseline period. You may have constructed additional emissions units, permanently shut down previously existing emissions units, or both." See 68 FR 44625, column 3.

However, in providing for the inclusion of PTE for some units, the language of the rule referred only to "units on which actual construction began" after the PAL baseline period. See, e.g., 40 CFR 52.21 (aa)(6).
"Construction" is defined as "any physical change or change in the method of operation (including fabrication, erection, installation, demolition, or modification of an emissions unit) which would result in a change in actual emissions." See, e.g., 40 CFR 52.21(b)(8). Because the definition of "construction" encompasses modifications, we are concerned that, in the future, there might be confusion regarding the intended scope of this provision. It was not our intention to extend this provision to units that merely undergo a modification following the baseline period. Therefore, we are changing the rule language to explicitly exclude such units.

## B. Remaining Issues in Petitions for Reconsideration

We deny the petitioners' requests for reconsideration on the remaining issues raised in the petitions, because they have failed to meet the standard for reconsideration under section 307(d)(7)(B) of the CAA. Specifically,
the petitioners have failed to show: That it was impracticable to raise their objections during the comment period, or that the grounds for their objections arose after the close of the comment period; and/or that their concern is of central relevance to the outcome of the rule. We discuss our reasons for denying reconsideration in the Technical Support Document, which is available on our Web site at http://www.epa.gov/ $n s r$.

## IV. Statutory and Executive Order Reviews

On December 31, 2002, we finalized rule changes to the regulations governing the NSR programs mandated by parts C and D of title I of the Act. With today's action we are promulgating two minor clarifications to the final rules. Accordingly, we believe that the rationale provided with the final rules is still applicable and sufficient.

## A. Executive Order 12866-Regulatory Planning and Review

Under Executive Order 12866 (58 FR 51735, October 4, 1993), the Agency must determine whether the regulatory action is "significant" and therefore subject to Office of Management and Budget (OMB) review and the requirements of the Executive Order. The Order defines "significant regulatory action" as one that is likely to result in a rule that may:
(1) Have an annual effect on the economy of \$100 million.or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;
(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;
(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs, or the rights and obligations of recipients thereof; or
(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

Pursuant to the terms of Executive Order 12866, OMB has notified EPA that it considers this a "significant regulatory action" within the meaning of the Executive Order. EPA has submitted this action to OMB for review. Changes made in response to OMB suggestions or recommendations will be documented in the public record.

## B. Paperwork Reduction Act

This action does not impose any new information collection burden. We are not promulgating any new paperwork (e.g., monitoring, reporting, recordkeeping) as part of today's final action. The OMB has previously approved the information collection requirements contained in the existing regulations ( 40 CFR parts 51 and 52) under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 et seq., and has assigned OMB control number 2060-0003, EPA ICR number 1230.11. A copy of the OMB approved Information Collection Request (ICR) may be obtained from Susan Auby, Collection Strategies Division; U.S. Environmental Protection Agency (2822T); 1200 Pennsylvania Avenue, NW., Washington, DC 20460 or by calling (202) 566-1672.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

## C. Regulatory Flexibility Analysis

The EPA has determined that it is not necessary to prepare a regulatory flexibility analysis in connection with this final rule.

For purposes of assessing the impacts of today's action on small entities, a small entity is defined as: (1) A small business that is a small industrial entity as defined in the U.S. Small Business Administration (SBA) size standards (see 13 CFR 121.201); (2) a small governmental jurisdiction that is a government of a city, county, town, school district, or special district with a population of less than 50,000 ; or (3) a small organization that is any not-forprofit enterprise that is independently
owned and operated and is not dominant in its field.

After considering the economic impacts of today's action on small entities, EPA has concluded that this action will not have a significant economic impact on a substantial number of small entities. In determining whether a rule has a significant economic impact on a substantial number of small entities, the impact of concern is any significant adverse economic impact on small entities, since the primary purpose of the regulatory flexibility analyses is to identify and address regulatory alternatives "which minimize any significant economic impact of the proposed rule on small entities." 5 U.S.C. 603 and 604. Thus, an agency may conclude that a rule will not have a significant economic impact on a substantial number of small entities if the rule relieves regulatory burden, or otherwise has a positive economic effect, on all of the small entities subject to the rule. A Regulatory Flexibility Act Screening Analysis (RFASA), developed as part of a 1994 draft Regulatory Impact Analysis (RIA) and incorporated into the September 1995 ICR renewal analysis, showed that the changes to the NSR program due to the 1990 Clean Air Act amendments would not have an adverse impact on small entities. This analysis encompassed the entire universe of applicable major sources that were likely to also be small businesses (approximately 50 "small business" major sources). Because the administrative burden of the NSR program is the primary source of the NSR program's regulatory costs, the analysis estimated a negligible "cost to sales" (regulatory cost divided by the business category mean revenue) ratio for this source group. Currently, and as reported in the current ICR, there is no economic basis for a different conclusion.

We believe the rule changes in the December 31, 2002 final rule will reduce the regulatory burden associated with the major NSR program for all sources, including all small businesses, by improving the operational flexibility of owners and operators, improving the clarity of requirements, and providing alternatives that sources may take advantage of to further improve their operational flexibility. Today's action consists of two minor clarifications to the December 31, 2002 final rule and does not change our overall assessment of regulatory burden. We have therefore concluded that the rule changes in December 31, 2002 final rule, as clarified by today's action, will relieve regulatory burden for all small entities.

## D. Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104-4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under section 202 of the UMRA, EPA generally must prepare a written statement, including a cost-benefit analysis, for proposed and final rules with "Federal mandates" that may result in expenditures to State, local, and tribal governments, in the aggregate, or to the private sector, of $\$ 100$ million or more in any 1 year. Before promulgating an EPA rule for which a written statement is needed, section 205 of the UMRA generally requires EPA to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, most costeffective or least burdensome alternative that achieves the objectives of the rule. The provisions of section 205 do not apply when they are inconsistent with applicable law. Moreover, section 205 allows EPA to adopt an alternative other than the least costly, most cost-effective or least burdensome alternative if the Administrator publishes with the final rule an explanation as to why that alternative was not adopted. Before EPA establishes any regulatory requirements that may significantly or uniquely affect small governments, including tribal governments, it must have developed under section 203 of the UMRA a small government agency plan.

The plan must provide for notifying potentially affected small governments, enabling officials of affected small governments to have meaningful and timely input in the development of EPA regulatory proposals with significant Federal intergovernmental mandates, and informing, educating, and advising small governments on compliance with the regulatory requirements.

We have determined that today's action does not contain a Federal mandate that may result in expenditures of $\$ 100$ million or more for State, local, and tribal governments, in the aggregate, or the private sector in any 1 year. Although initially the changes in the December 31, 2002 final rule are expected to result in a small increase in the burden imposed upon reviewing authorities in order for them to be included in the State's SIP, as well as other small increases in burden discussed under "Paperwork Reduction Act" in the preamble to the December 31, 2002 final rule, those revisions will ultimately provide greater operational flexibility to sources permitted by the States, which will in turn reduce the
overall burden of the program on State and local authorities by reducing the number of required permit
modifications. In addition, we believe the 2002 rule changes will actually reduce the regulatory burden associated with the major NSR program by improving the operational flexibility of owners and operators, improving the clarity of requirements, and providing alternatives that sources may take advantage of to further improve their operational flexibility. Today's action does not increase regulatory burden but merely clarifies two aspects of the 2002 rule changes. Thus, today's action is not subject to the requirements of sections 202 and 205 of the UMRA. For the same reasons stated above, we have determined that today's action contains no regulatory requirements that might significantly or uniquely affect small governments. Thus, today's action is not subject to the requirements of section 203 of the UMRA.

## E. Executive Order 13132—Federalism

Executive Order 13132, entitled "Federalism" ( 64 FR 43255, August 10, 1999), requires EPA to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications." "Policies that have federalism implications" is defined in the Executive Order to include regulations that have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government."

Today's action does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132. While the final rule published on December 31, 2002 will result in some expenditures by the States, we expect those expenditures to be limited to $\$ 331,250$ per year. This figure includes the small increase in the burden imposed upon reviewing authorities in order for them to revise the State's SIP. However, the revisions contained in the December 31, 2002 final rule provide greater operational flexibility to sources permitted by the States, which will in turn reduce the overall burden of the program on State and local authorities by reducing the number of required permit modifications. Today's action does not increase regulatory burden but merely
clarifies two aspects of the December 31, 2002 final rule. Thus, Executive Order 13132 does not apply to today's action.

## F. Executive Order 13175-Consultation and Coordination With Indian Tribal Governments

Executive Order 13175, entitled "Consultation and Coordination with Indian Tribal Governments" ( 65 FR 67249 , November 9, 2000), requires EPA to develop an accountable process to ensure "meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications." Today's action does not have tribal implications as specified in Executive Order 13175. Thus, Executive Order 13175 does not apply to this action.
The purpose of the December 31, 2002 final rule is to add greater flexibility to the existing major NSR regulations. Those changes will benefit permitting authorities and the regulated community, including any major source owned by a tribal government or located in or near tribal land, by providing increased certainty as to when the requirements of the NSR program apply. Taken as a whole, the December 31, 2002 final rule should result in no added burden or compliance costs and should not substantially change the level of environmental performance achieved under the previous rules. EPA anticipates that initially the changes in the December 31, 2002 final rule will result in a small increase in the burden imposed upon Reviewing Authorities in order for them to be included in the State's SIP. Nevertheless, those revisions will ultimately provide greater operational flexibility to sources permitted by the States, which will in turn reduce the overall burden of the program on State and local authorities by reducing the number of required permit modifications. In comparison, no tribal government currently has an approved tribal implementation plan (TIP) under the Clean Air Act to implement the NSR program. The Federal government is currently the NSR permitting authority in Indian country. Thus, tribal governments should not experience added burden from the December 31, 2002 final rule, nor should their laws be affected with respect to implementation of that rule. Additionally, although major stationary sources affected by the December 31, 2002 final rule could be located in or near Indian country and/ or be owned or operated by tribal governments, such sources would not incur additional costs or compliance burdens as a result of that rule. Instead, the only effect on such sources should
be the benefit of the added certainty and flexibility provided by that rule. For the reasons stated above, we do not believe that today's action, which clarifies two aspects of the December 31, 2002 final rule, would increase burden for tribal governments. In addition, we do not anticipate that today's action would have substantial direct effects on sources located in or near Indian country or sources owned or operated by tribal governments.

In our July 30, 2003 notice, EPA specifically solicited additional comment on today's final action from tribal officials.
G. Executive Order 13045—Protection of Children From Environmental Health Risks and Safety Risks

Executive Order 13045, entitled "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997), applies to any rule that: (1) Is determined to be "economically significant" as defined under Executive Order 12866; and (2) concerns an environmental health or safety risk that EPA has reason to believe may have a disproportionate effect on children: If the regulatory action meets both criteria, the Agency must evaluate the environmental health or safety effects of the planned rule on children, and explain why the planned regulation is preferable to other potentially effective and reasonably feasible alternatives considered by the Agency.

Today's action is not subject to the Executive Order because it is not economically significant as defined in Executive Order 12866, and because the Agency does not have reason to believe the environmental health or safety risks addressed by this action present a disproportionate risk to children. We believe that the December 31, 2002 final rule as a whele will result in equal or better environmental protection than provided by earlier regulations, and do so in a more streamlined and effective manner. Similarly, today's action merely clarifies two aspects of the December 31, 2002 final rule and does not change substantially the level of environmental protection provided by that rule. As a result, today's action is not expected to present a disproportionate environmental health or safety risk for children.
H. Executive Order 13211-Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

Today's action is not a "significant energy action" as defined in Executive Order 13211, "Actions Concerning

Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001) because it is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The December 31, 2002 final rule improves the ability of sources to undertake pollution prevention or energy efficiency projects, switch to less polluting fuels or raw materials, maintain the reliability of production facilities, and effectively utilize and improve existing capacity. That rule also includes a number of provisions to streamline administrative and permitting processes so that facilities can quickly accommodate changes in supply and demand. It provides several alternatives that are specifically designed to reduce administrative burden for sources that use pollution prevention or energy efficient projects. Today's action merely clarifies two aspects of the December 31, 2002 final rule and thus is not likely to have a significant adverse effect on the supply, distribution, or use of energy.

## I. National Technology Transfer and Advanceinent Act

Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104113, 12 (d) (15 U.S.C. 272 note) directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical.

Voluntary consensus standards are technical standards (for example, materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. The NTTAA directs EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards.

Today's'action does not involve technical standards. Therefore, EPA did not consider the use of any voluntary consensus standards.

## J. Congressional Review Act

The Congressional Review Act, §5 U.S.C. 801, et seq., as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing the final rule and other required information to the United States Senate, the United States

House of Representatives, and the Comptroller General of the United States prior to publication of the final rule in the Federal Register. A major rule cannot take effect until 60 days after it is published in the Federal Register. This action is not a "major rule" as defined by 5 U.S.C. § 804(2). The rule will be effective November 7 , 2003.

## V. Statutory Authority

The statutory authority for this action is provided by sections 101, 111, 114, 116, 301, and 307 of the CAA as amended (42 U.S.C. 7401, 7407, 7411, 7414, 7416, and 7601).

## VI. Judicial Review

Under section 307(b)(1) of the Act, judicial review of the December 31, 2002 final rule is available only by the filing of a petition for review in the U.S. Court of Appeals for the District of Columbia Circuit by March 3, 2003. Any such judicial review is limited to only those objections that are raised with reasonable specificity in timely comments. Under section 307(b)(2) of the Act, the requirements that are the subject of the December 31, 2002 final rule may not be challenged later in civil or criminal proceedings brought by us to enforce these requirements.
List of Subjects in $\mathbf{4 0}$ CFR Parts 51 and 52

Environmental protection, Administrative practice and procedure, Air pollution control, Carbon monoxide, Hydrocarbons, Intergovernmental relations, Lead, Nitrogen oxides, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides.
Dated: October 30, 2003.

## Marianne Horinko,

Acting Administrator.
E For the reasons set out in the preamble, title 40, chapter I of the Code of Federal Regulations is amended as follows:

## PART 51—[AMENDED]

- 1. The authority citation for part 51 continues to read as follows:

Authority: 23 U.S.C. 101; 42 U.S.C. 7401$7671 q$.

## Subpart I-[Amended]

- 2. Section 51.165 is amended:
- a. By revising paragraph (a)(1)(vii)(B).
- b. By adding paragraph (a)(1)(xxi).
- c. By revising paragraph (f)(6).

The revisions read as follows:

## §51.165 Parmit requirements.

(a) * *

## (1) * * * <br> (vii) * * *

(B) An existing emissions unit is any emissions unit that does not meet the requirements in paragraph (a)(1)(vii)(A) of this section. A replacement unit, as defined in paragraph (a)(1)(xxi) of this section, is an existing emissions unit.
(xxi) Replacement unit means an emissions unit for which all the criteria listed in paragraphs (a)(1)(xxi)(A) through (D) of this section are met. No creditable emission reductions shall be generated from shutting down the existing emissions unit that is replaced.
(A) The emissions unit is a reconstructed unit within the meaning of $\S 60.15$ (b)(1) of this chapter, or the emissions unit completely takes the place of an existing emissions unit.
(B) The emissions unit is identical to or functionally equivalent to the replaced emissions unit.
(C) The replacement does not alter the basic design parameters (as discussed in paragraph (h)(2) of this section) of the process unit.
(D) The replaced emissions unit is permanently removed from the major stationary source, otherwise permanently disabled, or permanently barred from operation by a permit that is enforceable as a practical matter. If the replaced emissions unit is brought back into operation, it shall constitute a new emissions unit.
(f) * * *
(6) Setting the 10-year actuals PAL level. (i) Except as provided in paragraph (f)(6)(ii) of this section, the plan shall provide that the actuals PAL level for a major stationary source shall be established as the sum of the baseline actual emissions (as defined in paragraph (a)(1)(xxxv) of this section) of the PAL pollutant for each emissions unit at the source; plus an amount equal to the applicable significant level for the PAL pollutant under paragraph $(\mathrm{a})(1)(\mathrm{x})$ of this section or under the Act, whichever is lower. When establishing the actuals PAL level, for a PAL pollutant, only one consecutive 24 month period must be used to determine the baseline actual emissions for all existing emissions units. However, a different consecutive 24month period may be used for each different PAL pollutant. Emissions associated with units that were permanently shut down after this 24month period must be subtracted from the PAL level. The reviewing authority shall specify a reduced PAL level(s) (in tons/yr) in the PAL permit to become effective on the future compliance
date(s) of any applicable Federal or State regulatory requirement(s) that the reviewing authority is aware of prior to issuance of the PAL permit. For instance, if the source owner or operator will be required to reduce emissions from industrial boilers in half from baseline emissions of $60 \mathrm{ppm} \mathrm{NO} x$ to a new rule limit of 30 ppm , then the permit shall contain a future effective PAL level that is equal to the current PAL level reduced by half of the original baseline emissions of such unit(s).
(ii) For newly constructed units (which do not include modifications to existing units) on which actual construction began after the 24 -month period, in lieu of adding the baseline actual emissions as specified in paragraph (f)(6)(i) of this section, the emissions must be added to the PAL level in an amount equal to the potential to emit of the units.

- 3. Section 51.166 is amended:
- a. By revising paragraph (b)(7)(ii).
- b. By adding paragraph (b)(32).
- c. By revising paragraph (w)(6).

The revisions read as follows:
§51.166 Prevention of significant deterioration of air quality.
(b) * * *
(7) * * *
(ii) An existing emissions unit is any emissions unit that does not meet the requirements in paragraph $(\mathrm{b})(7)(\mathrm{i})$ of this section. A replacement unit, as defined in paragraph (b)(32) of this section, is an existing emissions unit.
(32) Replacement unit means an emissions unit for which all the criteria listed in paragraphs (b)(32)(i) through (iv) of this section are inet. No creditable emission reductions shall be generated from shutting down the existing emissions unit that is replaced.
(i) The emissions unit is a reconstructed unit within the meaning of $\S 60.15(\mathrm{~b})(1)$ of this chapter, or the emissions unit completely takes the place of an existing emissions unit.
(ii) The emissions unit is identical to or functionally equivalent to the replaced emissions unit.
(iii) The replacement does not change the basic design parameter(s) (as discussed in paragraph $(y)(2)$ of this section) of the process unit.
(iv) The replaced emissions unit is permanently removed from the major stationary source, otherwise permanently disabled, or permanently barred from operation by a permit that is enforceable as a practical matter. If the replaced emissions unit is brought
back into operation, it shall constitute a new emissions unit.

## (w) * * *

(6) Setting the 10-year actuals PAL level. (i) Except as provided in paragraph (w)(6)(ii) of this section, the plan shall provide that the actuals PAL level for a major stationary source shall be established as the sum of the baseline actual emissions (as defined in paragraph (b)(47) of this section) of the PAL pollutant for each emissions unit at the source; plus an amount equal to the applicable significant level for the PAL pollutant under paragraph (b)(23) of this section or under the Act, whichever is lower. When establishing the actuals PAL level, for a PAL pollutant, only one consecutive 24 -month period must be used to determine the baseline actual emissions for all existing emissions units. However, a different consecutive 24 -month period may be used for each different PAL pollutant. Emissions associated with units that were permanently shut down after this 24month period must be subtracted from the PAL level. The reviewing authority shall specify a reduced PAL level(s) (in tons/yr) in the PAL permit to become effective on the future compliance date(s) of any applicable Federal or State regulatory requirement(s) that the reviewing authority is aware of prior to issuance of the PAL permit. For instance, if the source owner or operator will be required to reduce emissions from industrial boilers in half from baseline emissions of $60 \mathrm{ppm} \mathrm{NO} \mathrm{N}_{\mathrm{x}}$ to a new rule limit of 30 ppm , then the permit shall contain a future effective PAL level that is equal to the current PAL level reduced by half of the original baseline emissions of such unit(s).
(ii) For newly constructed units (which do not include modifications to existing units) on which actual construction began after the 24 -month period, in lieu of adding the baseline actual emissions as specified in paragraph (w)(6)(i) of this section, the emissions must be added to the PAL level in an amount equal to the potential to emit of the units.

## PART 52-[AMENDED]

- 1. The authority citation for part 52 continues to read as follows:
Authority: 42 U.S.C. 7401, et seq.

## Subpart A-[Amended]

- 2. Section 52.21 is amended:
- a. By revising paragraph (b)(7)(ii).
- b. By adding paragraph (b)(33).
- c. By revising paragraph (aa)(6).

The revisions read as follows:
§52.21 Prevention of significant deterioration of air quality.
(b) * * *
(7) * * *
(ii) An existing emissions unit is any emissions unit that does not meet the requirements in paragraph (b)(7)(i) of this section. A replacement unit, as defined in paragraph (b)(33) of this section, is an existing emissions unit.
(33) Replacement unit means an emissions unit for which all the criteria listed in paragraphs (b)(33)(i) through (iv) of this section are met. No creditable emission reductions shall be generated from shutting down the existing emissions unit that is replaced.
(i) The emissions unit is a reconstructed unit within the meaning of $\S 60.15(\mathrm{~b})(1)$ of this chapter, or the emissions unit completely takes the place of an existing emissions unit.
(ii) The emissions unit is identical to or functionally equivalent to the replaced emissions unit.
(iii) The replacement does not alter the basic design parameters (as discussed in paragraph (cc)(2) of this section) of the process unit.
(iv) The replaced emissions unit is permanently removed from the major stationary source, otherwise permanently disabled, or permanently barred from operation by a permit that is enforceable as a practical matter. If the replaced emissions unit is brought back into operation, it shall constitute a new emissions unit.
(aa) * * *
(6) Setting the 10-year actuals PAL level. (i) Except as provided in paragraph (aa)(6)(ii) of this section, the plan shall provide that the actuals PAL level for a major stationary source shall be established as the sum of the baseline actual emissions (as defined in paragraph (b)(48) of this section) of the PAL pollutant for each emissions unit at the source; plus an amount equal to the applicable significant level for the PAL pollutant under paragraph (b)(23) of this section or under the Act, whichever is lower. When establishing the actuals PAL level, for a PAL pollutant, only one consecutive 24 -month period must be used to determine the baseline actual emissions for all existing emissions units. However, a different consecutive 24 -month period may be used for eàch different PAL pollutant. Emissions associated with units that were permanently shut down after this 24month period must be subtracted from the PAL level. The reviewing authority shall specify a reduced PAL level(s) (in
tons/yr) in the PAL permit to become effective on the future compliance date(s) of any applicable Federal or State regulatory requirement(s) that the reviewing authority is aware of prior to issuance of the PAL permit. For instance, if the source owner or operator will be required to reduce emissions from industrial boilers in half from baseline emissions of $60 \mathrm{ppm} \mathrm{NO}_{x}$ to a new rule limit of 30 ppm , then the permit shall contain a future effective PAL level that is equal to the current PAL level reduced ${ }^{\text {b }}$ y half of the original baseline emissions of such unit(s).
(ii) For newly constructed units (which do not include modifications to existing units) on which actual construction began after the 24 -month period, in lieu of adding the baseline actual emissions as specified in paragraph (aa)(6)(i) of this section, the emissions must be added to the PAL level in an amount equal to the potential to emit of the units.

## FEDERAL COMMUNICATIONS COMMISSION

## 47 CFR Part 64

[CC Docket No. 98-67, DA 03-3109]
Telecommunication Relay Services and Speech-to-Speech Services for Individuals With Hearing and Speech Disabilities
agencr: Federal Communications Commission.
ACTION: Final rule; petition for reconsideration, comments requested.
SUMMARY: This document seeks public comment on petitions filed for reconsideration of certain rules adopted by the Commission in the Second Improved TRS Order, published at 68 FR 50973 (August 25, 2003). The petitions request that the Commission waive and reconsider its rules regarding the emergency call handling of TRS calls, and that the Commission waive its rules regarding three-way call processing at telecommunications relay centers.
DATES: Interested parties may file comments in this proceeding on or before October 20, 2003. Reply comments may be filed on or before October 30, 2003. Parties that may have already submitted comments in this proceeding need not resubmit those comments unless they choose to update them.
addresses: Federal Communications Commission, 445 12th Street, SW., Washington, DC 20554.

## FOR FURTHER INFORMATION CONTACT:

Dana Jackson, Consumer \& Governmental Affairs Bureau, Disability Rights Office at (202) 418-2247 (voice), (202) 418-7898 (TTY), or e-mail at Dana.Jackson@fcc.gov.
SUPPLEMENTARY INFORMATION: When filing comments, please reference CC Docket No. 98-67. Comments may be filed using the Commission's Electronic Comment Filing System (ECFS) or by filing paper copies. See Electronic Filing of Documents in Rulemaking Proceedings, 63 FR 24121 (May 1, 1998). Comments filed through the ECFS can be sent as an electronic file via the Internet to http://www.fcc.gov/e-file/ ecfs.html. Generally, only one copy of an electronic submission must be filed. If multiple docket or rulemaking numbers appear in the caption of this proceeding, however, commenters must transmit one electronic copy of the comments to each docket or rulemaking number referenced in the caption. In completing the transmittal screen, commenters should include their full name, Postal Service mailing address, and the applicable docket or rulemaking number. Parties may also submit an electronic comment by Internet e-mail. To get filing instructions for e-mail comments, commenters should send an e-mail to ecfs@fcc.gov, and should include the following words in the body of the message, "get form <your e-mail address>." A sample form and directions will be sent in reply. Parties who choose to file by paper must file an original and four copies of each filing. If more than one docket or rulemaking number appears in the caption of this proceeding, commenters must submit two additional copies for each additional docket or rulemaking number. Filings can be sent by hand or messenger delivery, by commercial overnight courier, or by first-class or overnight U.S. Postal Services mail (although we continue to experience delays in receiving U.S. Postal Service mail). The Commission's contractor, Natek, Inc., will receive hand-delivered or messenger-delivered paper filings for the Commission's Secretary at 236 Massachusetts Avenue, NE., Suite 110, Washington, DC 20002. The filing hours at this location are 8 a.m. to $7 \mathrm{p} . \mathrm{m}$. All hand deliveries must be held together with rubber bands or fasteners. Any envelopes must be disposed of before entering the building. Commercial overnight inail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9300 East Hampton

Drive, Capitol Heights, MD 20743. U.S. Postal Service first-class mail, Express Mail, and Priority Mail should be addressed to 44512 th Street, SW., Washington, DC 20554. All filings must be addressed to the Commission's Secretary. Marlene H. Dortch. Office of the Secretary, Federal Communications Commission, 445 12th Street, SW. Room TW-B204, Washington, DC 20554.

Parties who choose to file by paper should also submit their comments on diskette. These diskettes should be submitted, along with three paper copies, to: Dana Jackson, Consumer \& Governmental Affairs Bureau, Disability Rights Office, 445 12th Street, SW. Room 6-C410, Washington DC 20554. Such a submission should be on a 3.5 inch diskette formatted in an IBM compatible format using Word 97 or compatible software. The diskette should be accompanied by a cover letter and should be submitted in "read only" mode. The diskette should be clearly labeled with the commenter's name. proceeding (including the lead docket number in this case, CC Docket No. 9867 ), type of pleading (comment or reply comment), date of submission, and the name of the electronic file on the diskette. The label should also include the following phrase "Disk Copy-Not an Original." Each diskette should contain only one party's pleadings, preferably in a single electronic file. In addition, commenters must send diskette copies to the Commission's copy contractor, Qualex International, Portals II, 445 12th Street, SW., Room CY-B402, Washington, DC 20554.

Pursuant to § 1.1206 of the Commission's rules, 47 CFR 1.1206, this proceeding will be conducted as a permit-but-disclose proceeding in which ex parte communications are subject to disclosure.
Copies of any subsequently filed documents in this matter will be available for public inspection and copying during regular business hours at the FCC Reference Information Center, Portals II, 445 12th Street, SW, Room CY-A257, Washington, DC 20554. The complete text of this Public Notice may be purchased from the Commission's duplicating contractor, Qualex International, Portals II, 445 12th Street, SW., Room CY-B402, Washington, DC 20554, telephone (202) 863-2893, facsimile (202) 863-2898, or via e-mail qualexint@aol.com.

To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an e-mail to fcc504@fcc.gov or call the Consumer \& Governmental Affairs Bureau at (202)

418-0531 (voice), (202) 418-7365 (TTY). This Public Notice can also be downloaded in Text and ASCII formats at: http://www.fcc.gov/cgb/dro.

## Synopsis

On September 23, 2003, AT\&T Corp. ("AT\&T") filed a petition for limited reconsideration to the Second Improved TRS Order published at 68 FR 50973 (August 25, 2003). AT\&T requests that the Commission grant waivers to certain requirements adopted by the Commission in the Second Improved TRS Order concerning emergency call handling and three-way calling. See AT\&T, AT\&T Petition for Limited Reconsideration and for Waiver, CC Docket No. 98-67, CG Docket 03-123. On September 29, 2003, Verizon filed a petition for reconsideration to the Second Improved TRS Order. Verizon also requests that the Commission reconsider the requirements regarding the handling of emergency calls at telecommunications relay centers. See Verizon, Pétition for Reconsideration of Verizon, CC Docket No. 98-67, CG Docket No. 03-123.
Federal Communications Commission. Margaret M. Egler,
Deputy Chief, Consumer \& Governmental Affairs Bureau.

DEPARTMENT OF TRANSPORTATION

## Federal Motor Carrier Safety Administration

## 49 CFR Part 383

[Docket No. FMCSA-2001-11117]
RIN 2126-AA70

## Limitations on the Issuance of Commercial Driver's Licenses With a Hazardous Materials Endorsement

agency: Federal Motor Carrier Safety Administration (FMCSA), DOT. ACTION: Interim final rule; delay of compliance date; request for comments.

SUMMARY: The FMCSA amends the Federal Motor Carrier Safety Regulations (FMCSRs) prohibiting States from issuing, renewing, transferring or upgrading a commercial driver's license (CDL) with a hazardous materials (hazmat) endorsement unless the Transportation Security Administration (TSA) has first conducted a background records check of the applicant and determined the applicant does not pose a security risk warranting denial of the hazardous
materials endorsement. The compliance date provisions being revised require States to collect fingerprints from individuals applying for, renewing, upgrading or transferring a hazmat endorsement for a CDL beginning November 3, 2003. FMCSA and TSA are changing that date to April 1, 2004, and TSA may postpone that date, in individual cases, to not later than December 1, 2004.
DATES: Effective: This rule is effective on November 3, 2003. Compliance: State compliance with this rule is required beginning April 1, 2004.
Comments: Comments must be received on or before January 6, 2004.
ADDRESSES: You may submit comments identified by DOT DMS Docket Number FMCSA - 2001-11117 by any of the following methods:

- Web site: http://dnns.dot.gov. Follow the instructions for submitting comments on the DOT electronic docket site.
- Fax: 1-202-493-2251.
- Mail: Docket Management Facility; U.S. Department of Transportation, 400 Seventh Street, SW., Nassif Building, Room PL-401, Washington, DC 205900001.
- Hand delivery: Room PL-401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.
- Federal eRulemaking Portal: Go to http://www.regulations.gov. Follow the online instructions for submitting comments.

Instructions: All submissions must include the agency name and docket number or Regulatory Identification Number (RIN) for this rulemaking. Note that all comments received will be posted without change to http:// dms.dot.gov, including any personal information provided. Please see the Privacy Act heading for further information.

Docket: For access to the docket to read background documents or comments received, go to http:// dms.dot.gov at any time or to Room PL401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between $9 \mathrm{a} . \mathrm{m}$. and 5 p.m., Monday through Friday, except Federal Holidays.

Privacy Act: Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act

Statement in the Federal Register published on April 11, 2000 (Volume 65, Number 70; Pages 19477) or you may visit http://dms.dot.gov.

Comments received after the comment closing date will be included in the docket and we will consider late comments to the extent practicable. The FMCSA may, however, issue a final rule at any time after the close of the comment period.
FOR FURTHER INFORMATION CONTACT: Mr. Robert Redmond, Office of Safety Programs, (202) 366-9579, FMCSA, 400 7th Street, SW., Washington, DC 20590. Office hours are from 8:30 a.m. to 5 p.m., e.t., Monday through Friday, except Federal holidays.
SUPPLEMENTAṘY INFORMATION:

## Comments Invited

This IFR is being adopted without prior notice and public comment. However, interested parties are invited to participate in this rulemaking by submitting written data, views, or arguments. All comments received, as well as a report summarizing each substantive public contact with FMCSA personnel on this rulemaking, will be filed in the public docket. The docket is available for public inspection before and after the comment closing date.

See ADDRESSES above for information on how to submit comments.

## Small Entity Inquiries

The Small Business Regulatory Enforcement Fairness Act (SBREFA) of 1996 requires FMCSA to comply with small entity requests for information or advice about compliance with statutes and regulations within FMCSA's jurisdiction. Any small entity that has a question regarding this document may contact the person listed in the FOR FURTHER INFORMATION CONTACT section for information or advice. You can get further information regarding SBREFA on the Small Business Administration's web page at http://www.sba.gov/advo/ laws/law_lib.html.

## Background

On September 11, 2001, several terrorist attacks were made against the United States. Those attacks resulted in catastrophic human casualties and property damage. In response to those attacks, the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT) Act was enacted on October 26, 2001. ${ }^{1}$ Section 1012 of the USA PATRIOT Act amended 49 U.S.C. Chapter 51 by adding a new section 5103a titled
"Limitation on issuance of hazmat licenses." Section 5103a(a)(1) provides:

A State may not issue to any individual a license to operate a motor vehicle transporting in commerce a hazardous material unless the Secretary of Transportation has first determined, upon receipt of a notification under subsection $(\mathrm{c})(1)(\mathrm{B})$, that the individual does not pose a security risk warranting denial of the license. ${ }^{2}$

Section 5103a(a)(2) subjects license renewals to the same requirements.

Section 5103 a (c) requires the Attorney General, upon the request of a State in connection with issuance of a hazardous materials endorsement, to carry out a background records check of the individual applying for the endorsement and, upon completing the check, to notify the Secretary of the results. The Secretary then determines whether the individual poses a security risk warranting denial of the endorsement. The term "Secretary" originally referred to the Department of Transportation, but these functions have been transferred to the Secretary of the Department of Homeland Security (DHS), and subsequently delegated by the Secretary to the TSA Administrator. The background records check must consist of: (1) A check of the relevant criminal history databases; (2) in the case of an alien, a check of the relevant databases to determine the status of the alien under U.S. immigration laws; and (3) as appropriate, a chéck of the relevant international databases through Interpol-U.S. National Central Bureau or other appropriate means.

## Safe Explosives Act

Congress enacted the Safe Explosives Act (SEA) on November 25, 2002. ${ }^{3}$ Sections 1121-1123 of the SEA amended section 842(i) of Title 18 of the U.S. Code by adding several categories to the list of persons who may not lawfully "ship or transport any explosive in or affecting interstate or foreign commerce" or "receive or possess any explosive which has been shipped or transported in or affecting interstate or foreign commerce." Prior to the amendment, 18 U.S.C. 842(i) prohibited the transportation of explosives by any person under indictment for or convicted of a felony, a fugitive from justice, an unlawful user or addict of any controlled substance, and any person who had been

[^3]adjudicated as a mental defective or committed to a mental institution. The amendment added three new categories to the list of prohibited persons: aliens (with certain limited exceptions), persons dishonorably discharged from the armed forces, and former U.S. citizens who have renounced their citizenship. Individuals who violate 18 U.S.C. 842(i) are subject to criminal prosecution. ${ }^{4}$ These incidents are investigated by the Bureau of Alcohol, Tobacco, Firearms, and Explosives (ATF) of the Department of Justice and referred, as appropriate, to the United States Attorneys.

However, 18 U.S.C. 845(a)(1) provides an exception to section 842(i) for "any aspect of the transportation of explosive materials via railroad, water, highway, or air which are regulated by the United States Department of Transportation and agencies thereof, and which pertains to safety." Under this exception, if DOT regulations address the transportation security issues of persons engaged in a particular aspect of the safe transportation of explosive materials, then those persons are not subject to prosecution under 18 U.S.C. 842(i) while they are engaged in the transportation of explosives in commerce.

## The PATRIOT Act Rule

To comply with the mandates of the USA PATRIOT Act, and to trigger the exception in 18 U.S.C. 845(a)(1) for the transportation of explosives, TSA and FMCSA issued interim final rules on May 5, 2003.5 The TSA rule established security threat assessment standards for determining whether an individual poses a security threat warranting denial of a hazmat endorsement for a CDL. Under the rules, TSA determines that an individual poses a security threat if he or she: (1) Is an alien (unless he or she is a lawful permanent resident) or a U.S. citizen who has renounced his or her U.S. citizenship; (2) is wanted or under indictment for certain felonies; (3) has a conviction in military or civilian court for certain felonies; (4) has been adjudicated as a mental defective or involuntarily committed to a mental institution; or (5) is considered to pose a security threat based on a review of pertinent databases.

The rules also established conditions under which an individual who has been determined to be a security threat could appeal the determination, and procedures TSA follows when

[^4]considering an appeal. In addition, the rules provide a waiver process for those individuals who otherwise could not obtain a hazmat endorsement because they had a disqualifying felony, or were adjudicated as a mental defective or involuntarily committed to a mental institution. Finally, the rules prohibit an individual from holding, and a State from issuing, renewing, or transferring, a hazmat endorsement for a CDL unless the individual met the TSA security threat assessment standards.

The FMCSA rule places States on notice that failure to comply with those portions of the TSA rule applicable to States by November 3, 2003, will result in the withholding by DOT of certain Federal-aid highway funds.

The TSA rule requires States to begin collecting fingerprints from individuals applying for, renewing, or transferring a hazmat endorsement for a CDL on November 3, 2003, and to submit those fingerprints to TSA so that TSA can conduct fingerprint-based criminal history records checks (CHRCs).

## Summary of Today's IFR

Elsewhere in today's issue of the Federal Register, TSA is postponing the date on which States are required to collect fingerprints from individuals who are applying for, renewing, upgrading, or transferring a hazmat endorsement for a CDL from November 3, 2003, to April 1, 2004. However, if a State requests a postponement of that date and provides a written justification, TSA may grant an extension, but in no case beyond December 1, 2004. FMCSA is therefore amending its rule to incorporate the same standard: States must comply with the TSA rule requiring the collection of fingerprints by April 1, 2004, unless TSA authorizes a later date under 49 CFR 1572.5(c)(4). After this date, whatever it may be, States that fail to comply with the TSA rule risk the loss of Federal-aid highway funds. FMCSA and TSA are making this change for several reasons.
TSA received comments from departments of motor vehicles and other agencies in over 23 States stating they have neither the infrastructure nor the funding to comply with the requirements of the rule. The main costs identified by States included the costs of purchasing fingerprinting equipment, and hiring and training personnel to operate the fingerprinting equipment. Most of the States requested Federal funding for these costs. The TSA rule discusses the cost issue in more detail. Many States also commented that compliance with the Patriot Act rule, specifically the fingerprinting requirements, would require legislative
changes. In many States, the State legislatures meet only once a year with a few State legislatures meeting biennially. These States requested additional time to make necessary legislative changes.

For these reasons, FMCSA and TSA are moving the date that States must begin collecting fingerprints to April 1, 2004, with the possibility of postponement to a later date.
FMCSA is amending 49 CFR 383.141 paragraphs (a) and (c) to move the date on which States are required to collect fingerprints from individuals who are applying for, renewing, or transferring a hazmat endorsement for a CDL from November 3, 2003, to April 1, 2004, though TSA may extend the compliance date to not later than December 1, 2004. Section 383.141(c) requires States to notify drivers at least 180 days before the expiration date of a hazardous materials endorsement. Because FMCSA's May 5 IFR allowed only slightly more than 180 days before States were required to begin collecting fingerprints, part of which the States would need to establish notification procedures, § 383.141 (c) provides that "Before November 3, 2003, a State must give the holder of a hazardous materials endorsement as much advance notice as practicable" [68 FR at 23850]. In view of today's postponement of the States' compliance date, which will allow them to give drivers a full 180 days of advance notice, the sentence quoted above has been deleted.

## Rulemaking Analyses and Notices

## Justification for Immediate Adoption

FMCSA is issuing this IFR without prior notice and opportunity to comment pursuant to its authority under section 4(a) of the Administrative Procedure Act (5 U.S.C. 553(b)). This provision allows the agency to issue a final rule without notice and opportunity to comment when the agency for good cause finds that notice and comment procedures are
"impracticable, unnecessary or contrary to the public interest." If the agency fails to immediately adopt this interim final rule, States could lose certain Federal-aid funding due to the short implementation deadline for TSA requirements announced in the May 2003 interim final rule ( 68 FR 23852) and an inability to meet those requirements due to lack of infrastructure and funding through no fault of their own and circumstances beyond their control.

This IFR changes the date on which States are required to collect fingerprints from individuals who are
applying for, renewing, or transferring a hazmat endorsement for a CDL. Because this IFR does not impose any new burdens on stakeholders, FMCSA believes that notice and comment procedures are "unnecessary." Due to the short deadline, the agency finds good cause under 5 U.S.C. 553(d)(3) to make this rule effective upon publication.

## Regulatory Evaluation

Executive Order 12866, "Regulatory Planning and Review" (58 FR 51735, October 4, 1993), provides for making determinations whether a regulatory action is "significant" and therefore subject to Office of Management and Budget (OMB) review and to the requirements of the Executive Order. FMCSA has determined that this is a significant regulatory action within the meaning of Executive Order 12866 and under the Department's regulatory policies and procedures because of substantial public interest. This rule does not impose any costs on any public, private, or government sector, therefore further economic analysis is unnecessary.

## Regulatory Flexibility Determination

The Regulatory Flexibility Act of 1980 (RFA), as amended, was enacted by Congress to ensure that small entities (small businesses, small not-for-profit organizations, and small governmental jurisdictions) are not unnecessarily or disproportionately burdened by Federal regulations. The RFA requires agencies to review rules to determine if they have "a significant economic impact on a substantial number of small entities." I certify that the IFR will not have a significant economic impact on a substantial number of small entities. As noted above, this IFR will not impose any costs on any public, private, or government sector.

## Paperwork Reduction Act

Under the Paperwork Reduction Act of 1995 (PRA) ( 44 U.S.C. 3501-3520), a Federal agency must obtain approval from the Office of Management and Budget (OMB) for each collection of information it conducts, sponsors, or requires through regulations. This IFR does not contain any information collection requirements.

## Executive Order 13132 (Federalism)

Executive Order 13132 requires FMCSA to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications." "Policies that have
federalism implications" is defined in the Executive Order to include regulations that have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government." Under the Executive Order, FMCSA may construe a Federal statute to preempt State law only where, among other things, the exercise of State authority conflicts with the exercise of Federal authority under the federal statute.
Although this IFR has direct effects on the States, they are not substantial because the IFR will continue the status quo while allowing States more time to comply with the May 5, 2003, interim final rules. Thus, FMCSA has determined that this IFR does not have sufficient Federalism implications to warrant the preparation of a Federal Assessment.
As discussed in detail in the May 5 IFR [see 68 FR at 23847-23848], the provisions of 49 U.S.C. 31314, which require DOT to withhold certain Federal-aid highway funds from States that fail to comply substantially with the requirements for State participation in the CDL program, apply also to State compliance with those portions of the Transportation Security Administration (TSA) rule implementing Sec. 1012 that apply to States. In addition, 49 U.S.C. 31312 authorizes DOT to prohibit States from issuing CDLs if the Secretary determines "that a State is in substantial noncompliance" with 49 U.S.C. chapter 313. These penalties are available for DOT to use when and if appropriate to encourage State compliance with TSA's Sec. 1012 rule.

## Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards-related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety and security, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. FMCSA has assessed the potential effect of this IFR and has determined that it will not impose any costs on domestic or international entities and thus would have a neutral trade impact.
Unfunded Mandates Reforın Act
Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) requires Federal agencies to prepare a written assessment of the costs, benefits, and other effects of proposed or final
rules that include a Federal mandate likely to result in the expenditure by State, local, or tribal governments, in the aggregate, or by the private sector, of more than $\$ 100$ million in any one year (adjusted for inflation with base year of 1995). Before promulgating a rule for which a written statement is needed, section 205 of the UMRA generally requires FMCSA to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, most cost-effective, or least burdensome alternative that achieves the objective of the rule. The provisions of section 205 do not apply when they are inconsistent with applicable law. Moreover, section 205 allows FMCSA to adopt an alternative other than the least costly, most cost-effective, or least burdensome alternative if the agency publishes with the final rule an explanation why that alternative was not adopted.

This IFR will not result in the expenditure by State, local, or tribal governments, in the aggregate, or by the private sector, of more than $\$ 100$ million annually. Thus, FMCSA has not prepared a written assessment under the UMRA.

## National Environmental Policy Act

FMCSA has analyzed this rulemaking action for the purposes of the National Environmental Policy Act. The agency has determined that implementation of this IFR will not have any significant impact on the quality of the human environment.

## Energy Impact

FMCSA has assessed the energy impact of this rule in accordance with the Energy Policy and Conservation Act (EPCA), Public Law 94-163, as amended (42 U.S.C. 6362). FMCSA has determined that this IFR is not a major regulatory action under the provisions of the EPCA.

List of Subjects in 49 CFR Part 383
Administrative practice and procedure, Commercial driver's license, Commercial motor vehicles, Highway safety, Motor carriers.

- For the reasons set forth in the preamble, the FMCSA amends title 49, Code of Federal Regulations, Chapter III, as follows:

## PART 383-COMMERCIAL DRIVER'S LICENSE STANDARDS; REQUIREMENTS AND PENALTIES [AMENDED]

- 1. The authority citation for part 383 continues to read as follows:

Authority: 49 U.S.C. 521, 31136, 31301 et seq., 31502; Sec. 214 of Pub. L. 106-159, 113

Stat. 1766; Sec. 1012(b) of Pub. L. 107-56 115 Stat. 397; and 49 CFR 1.73.

- 2. Revise § 383.141 paragraphs (a) and (c) to read as follows:

## §383.141 General.

(a) Applicability date. Beginning on April 1, 2004, this section applies to State agencies responsible for issuing hazardous materials endorsements for a CDL, and applicants for such endorsements. Individual State licensing agencies, pursuant to 49 CFR 1572.5(c)(4), may request an extension of the compliance date.
(c) Individual notification. At least 180 days before the expiration date of the CDL or hazardous materials endorsement, a State must notify the holder of a hazardous materials endorsement that the individual must pass a Transportation Security Administration security screening process as part of any application for renewal of the hazardous materials endorsement. The notice must advise a driver that, in order to expedite the security screening process, he or she should file a renewal application as soon as possible, but not later than 90 days before the date of expiration of the endorsement. An individual who does not successfully complete the Transportation Security Administration security screening process referenced in paragraph (b) of this section may not be issued a hazardous materials endorsement.

Issued on: November 5, 2003.
Annette M. Sandberg,
Administrator.

## RIN 1652-AA17

Security Threat Assessment for Individuals Applying for a Hazardous Materials Endorsement for a Commercial Drivers License; Amended Interim Final Rule

AGENCY: Transportation Security Administration (TSA), Department of Homeland Security (DHS).

ACTION: Interim final rule; amendment.
summary: The Transportation Security Administration (TSA) is amending its Interim Final Rule (IFR) that establishes standards for security threat assessments of individuals applying for, renewing, or transferring a hazardous materials endorsement (HME) for a commercial drivers license (CDL). TSA is adding a definition and moving the date on which fingerprint-based criminal history record checks must begin. TSA will not authorize a State to issue HME unless the State is collecting the biographical and criminal history information required with fingerprints and submitting fingerprints by April 1 , 2004. If a State is unable to collect this information by April 1, 2004, the State must submit a request for extension to TSA on or before April 1, 2004. TSA may approve the extension request, but will not extend the due date beyond December 1, 2004. If the State cannot begin submitting fingerprints of HME applicants as of April 1, 2004, the State must submit a plan to TSA outlining the fingerprint process that it will deploy and a timeline to ensure that the State will be submitting fingerprints by December 1, 2004. The plan must be submitted by April 1, 2004, and be consistent with Federal Bureau of Investigation (FBI) fingerprint collection and submission procedures. TSA is not changing the provision in the IFR that requires individuals with a HME to surrender their endorsement if they do not meet the threat assessment standards in the rule.
DATES: Effective Date: This interim final rule is effective on November 3, 2003.
FOR FURTHER INFORMATION CONTACT: FOR technical questions: John Berry, Credentialing Program Office,
Transportation Security Administration Headquarters, East Building, Floor 8, 601 12th Street, telephone: 571-2271757, e-mail: John.Berry1@dhs.gov. Steve Sprague, Maritime and Land,
Transportation Security Administration, West Building, Floor 9, 701 12th Street, telephone: (571) 227-1468,
Steve.Sprague@dhs.gov.
For legal questions: Dion Casey, Office of Chief Counsel, Transportation Security Administration Headquarters, West Building, Floor 8, TSA-2, 601 South 12th Street; Arlington, VA 222024220 telephone: 571-227-2663; e-mail: Dion.Casey@dhs.gov, or Christine Beyer, same office address as above; telephone: 571-227-2657; e-mail: Christine.Beyer@dhs.gov.

## Comments

TSA is not requesting comments to this amended interim final rule. Instead, TSA will publish a notice of proposed rulemaking shortly to address the criminal history background check process for HME applicants, and will solicit comments at that time. With publication of the NPRM, TSA will open a new docket and request comments on the security threat assessment process for HME applicants in its entirety.

## Availability of Rulemaking Document

You can get an electronic copy of this interim final rule (IFR) using the Internet by:
(1) Searching the Department of Transportation's electronic Docket Management System (DMS) Web page (http://dms.dot.gov/search);
(2) Accessing the Government Printing Office's Web page at http:// www.access.gpo.gov/su_docs/aces/ aces140.html; or
(3) Visiting the TSA's Laws and Regulations Web page at http:// www.tsa.gov/laws regs/gov index.shtm. In addition, copies are avāilable by writing or calling the individuals in the FOR FURTHER INFORMATION CONTACT section. Please be sure to identify the docket number when making requests.

## Small Entity Inquiries

The Small Business Regulatory Enforcement Fairness Act (SBREFA) of 1996 requires TSA to comply with small entity requests for information or advice about compliance with statutes and regulations within TSA's jurisdiction. Any small entity that has a question regarding this document may contact the persons listed in the FOR FURTHER INFORMATION CONTACT section for information or advice. You can get further information regarding SBREFA on the Small Business Administration's Web page at http://www.sba.gov/advo/ laws/law_lib.html.

## Background

On May 5, 2003, TSA published an IFR that requires a security threat assessment of commercial drivers who are authorized to transport hazardous materials. ${ }^{1}$ The IFR implements several statutory mandates, discussed below, including criminal history record checks, checks against international databases, and appeal and waiver procedures. (Although the statute does not clearly state that the criminal history background check must be based on fingerprinting, the criminal history databases cannot be accessed without

[^5]submitting fingerprints, when the check is done for a non-criminal justice purpose as is the case here.) In the IFR, TSA also stated that it would provide guidance on the form and manner fingerprints would be collected and adjudicated.

TSA requested and received comments from the States, labor organizations, and trucking industry associations. In addition, TSA held working group sessions with the States to discuss potential fingerprinting systems that would achieve the statutory requirements, but would not adversely impact the States.
Based on the comments received and our working sessions with the States, it appears that the States are in the best position to develop a plan to ensure that HME holders will be fingerprinted. TSA, however, is best situated to examine whether an individual poses a security threat under the other provisions of the rule, such as alien status, and terrorist connections. Under this scheme, TSA would continue to make the final determination as to whether an individual poses a security threat, combining the criminal history information the State develops with the terrorist-related background information, including alien status and terrorist-related databases, that TSA develops. In addition, TSA would continue to administer appeals of the terrorist-related background information for individuals who believe the records on which TSA's determination is made are incorrect or involve mistaken identity. Finally, TSA would administer the waiver program set forth in the IFR for all HME applicants. Shortly after publication of this amended IFR, TSA is issuing a separate notice of proposed rulemaking (NPRM) to explain and solicit comments on the revised process.

## USA PATRIOT Act

The Uniting and Strengthening America by Providing Appropriate Tools Required To Intercept and Obstruct Terrorism (USA PATRIOT) Act was enacted on October 25, 2001. ${ }^{2}$ Section 1012 of the USA PATRIOT Act amended 49 U.S.C. Chapter 51 by adding a new section 5103a titled "Limitation on issuance of hazmat licenses." Section 5103a(a)(1) provides:

A State may not issue to any individual a license to operate a motor vehicle transporting in commerce a hazardous material unless the Secretary of
Transportation has first determined, upon receipt of a notification under subsection (c)(1)(B), that the individual does not pose a

[^6]security risk warranting denial of the license. ${ }^{3}$
Section 5103a(a)(2) subjects license renewals to the same requirements.

Section 5103a(c) requires the Attorney General, upon the request of a State in connection with issuance of a HME, to carry out a background records check of the individual applying for the endorsement and, upon completing the check, to notify the Secretary (as delegated to the Administrator of TSA) of the results. The Secretary then determines whether the individual poses a security risk warranting denial of the endorsement. The background records check must consist of: (1) A check of the relevant criminal history databases; (2) in the case of an alien, a check of the relevant databases to determine the status of the alien under U.S. immigration laws; and (3) as appropriate, a check of the relevant international databases through Interpol-U.S. National Central Bureau or other appropriate means.

## Safe Explosives Act

Congress enacted the Safe Explosives Act (SEA) on November 25, $2002 .{ }^{4}$ Sections 1121-1123 of the SEA amended section $842(i)$ of Title 18 of the U.S. Code by adding several categories to the list of persons who may not lawfully "ship or transport any explosive in or affecting interstate or foreign commerce" or "receive or possess any explosive which has been shipped or transported in or affecting interstate or foreign commerce." Prior to the amendment, 18 U.S.C. 842(i) prohibited the transportation of explosives by any person under indictment for or convicted of a felony, a fugitive from justice, an unlawful user or addict of any controlled substance, and any person who had been adjudicated as a mental defective or committed to a mental institution. The amendment added three new categories to the list of prohibited persons: aliens (with certain limited exceptions), persons dishonorably discharged from the armed forces, and former U.S. citizens who have renounced their citizenship. Individuals who violate 18 U.S.C. 842(i) are subject to criminal prosecution. ${ }^{5}$ These incidents are investigated by the Bureau of Alcohol,

[^7]Tobacco, Firearms, and Explosives (ATF) of the Department of Justice and referred, as appropriate, to United States Attorneys.

However, 18 U.S.C. 845(a)(1) provides an exception to section 842(i) for "any aspect of the transportation of explosive materials via railroad, water, highway, or air which are regulated by the United States Department of Transportation (DOT) and agencies thereof, and which pertain to safety." Under this exception, if DOT regulations address the transportation security issues of persons engaged in a particular aspect of the safe transportation of explosive materials, then those persons are not subject to prosecution under 18 U.S.C. 842(i) while they are engaged in the transportation of explosives in commerce. TSA issued the interim final rule in coordination with agencies within DOT, the Federal Motor Carrier Safety Administration and Research and Special Programs Administration, and triggered this exception. For the reasons set forth below, the action TSA takes now does not affect the application of the exception.

## The Interim Final Rule

To comply with the mandates of the USA PATRIOT Act, and to trigger the exception in 18 U.S.C. 845(a)(1) for the transportation of explosives, TSA issued the IFR ( 68 FR 23852). Under the IFR, TSA determines that an individual poses a security threat if he or she: (1) Is an alien (unless he or she is a lawful permanent resident) or a U.S. citizen who has renounced his or her U.S. citizenship; (2) is wanted or under indictment for certain felonies; (3) has a conviction in military or civilian court for certain felonies; (4) has been adjudicated as a mental defective or involuntarily committed to a mental institution; or (5) is considered to pose a security threat based on a review of pertinent databases.

The IFR also establishes conditions under which an individual who has been determined to be a security threat can appeal the determination, and a waiver process for those individuals who otherwise could not obtain an HME because they had a disqualifying felony, or were adjudicated as a mental defective or involuntarily committed to a mental institution. Finally, the IFR prohibits an individual from holding, and a State from issuing, renewing, or transferring, an HME for a driver unless the individual has met the TSA security threat assessment standards.

## Summary of the Amended IFR

This amended IFR adds a definition and changes language in the original IFR
( 68 FR 23852) regarding the date on which the States cannot issue, transfer, or renew HME unless a fingerprintbased background check has been completed. TSA provides a definition for the term "revoke" in response to comments received from the States. In some States, legislative language does not permit "revocation" of a hazardous material endorsement, but does permit removing authority to transport hazardous materials through disqualification, suspension, cancellation or other similar term. However, the IFR uses "revoke" when referring to individuals who are disqualified from holding a HME. Therefore, as requested by the States, we provide a definition to make clear that revocation is equivalent to cancellation, suspension, annulment, disqualification, or similar term. TSA is delaying the date on which fingerprint-based criminal history record checks must be underway from November 3 for several reasons. First, TSA received comments from 23 States requesting an extension of time so that they can garner needed State legislative changes, funds, and infrastructure to implement the new background check portion of the HME program. The primary concerns identified by States include the cost of purchasing fingerprinting equipment; time needed to hire and train personnel to operate the fingerprinting equipment; and State legislative changes necessary to collect fees and implement the program. Most of the States requested Federal funding to assist with development of the program.

Second, TSA has worked closely with the States and pertinent nongovernmental organizations since the IFR was published and has determined that a "one size fits all" approach for fingerprint collection and adjudication is impractical. Each State currently has a system in place to license commercial drivers and award hazardous material endorsements. Also, each State currently has a system in place to collect fingerprints for criminal justice purposes and transmit them to the Attorney General. The States' systems vary widely in terms of size, complexity, automation, and funding. The States have consistently stated that TSA should not prescribe one detailed fingerprinting program, but should set minimum standards so that the States can make use of their current resources and programs. This should minimize costs, take into account unique State legislative requirements, and accommodate the level of automation each State currently possesses. Based on the foregoing, TSA is delaying the date
on which: (1) The information required in section $1572.5(\mathrm{e})$ of the IFR is collected; and (2) fingerprints are submitted.

## Information Collection

With respect to the first requirement, as of April 1, 2004, the States must be collecting the biographical and criminal history information currently required in section $1572.5(\mathrm{e})$, with the applicant's certification under penalty of criminal prosecution that the information is correct. This requirement applies only to individuals who are applying for, renewing or transferring a HME. The State is not required to gather this information for all current HME holders as of April 1. 2004; however, it must be collecting the information as drivers become due for renewal or seek to transfer or obtain a HME.

This requirement enhances the State's ability to determine whether individuals with disqualifying offenses continue to transport hazardous materials in violation of the law. The individual's signature on the application required in section 1572.5 (e) is a certification under penalty of 18 U.S.C. 1001 that the individual meets the security threat assessment standards set forth in the IFR. If the individual intentionally provides inaccurate information, an enforcement action can be initiated that may include imprisonment of not more than five years or a fine of up to $\$ 250,000$, or both. The government believes this adds a deterrent for HME holders who have committed disqualifying offenses but have not surrendered their HME as required by section $1572.5(\mathrm{~b})$. However, it is important to note that nothing in this requirement alters an individual's ability to apply for a waiver under section 1572.143, if they have committed a disqualifying offense.

If the State is unable to collect the information required in section 1572.5(e) by April 2004, the State may submit a written request to TSA to delay the collection requirement. TSA understands that some States may need to seek legislative changes and fee authority, or raise funds in order to accomplish the collection requirement, and it may be impossible to do so by April 2004. However, TSA will not grant any delays beyond December 1, 2004.

## Fingerprint Submission

## With respect to the second

 requirement concerning fingerprint collection, the amended IFR provides that the State must be collecting fingerprints from individuals applying for, renewing, or transferring a HME andsubmitting them to the FBI as of April 1, 2004. The fingerprint collection must be accomplished in a manner consistent with FBI procedures. If the State is unable to collect fingerprints on or before April 2004, the State must submit a plan to TSA by April 1, 2004 outlining the system it will put in place to capture fingerprints and pertinent information. The States must be collecting fingerprints and the required information for HME applicants no later than December 1, 2004.

As indicated in State comments to the IFR. most if not all States have devoted considerable attention to determining how the fingerprinting of HME applicants can be accomplished and coordinated within the existing hazardous material endorsement and commercial driver licensing programs. In meeting with the States, it has been evident that many States have a clear plan in mind to collect fingerprints and the other information required in section $1572.5(\mathrm{e})$, including the number of staff needed to administer the program, appropriate training for personnel involved in capturing fingerprints, and electronic upgrades necessary to handle increased data. Therefore, TSA does not anticipate that the States will have to expend significant time on developing the fingerprint collection plans. Many States will submit the plans they have been working with since publication of the IFR.

Also, each State currently has fingerprint collection procedures in place that meet the FBI's collection standards, in order to process fingerprints through the FBI for criminal enforcement. These procedures may include electronic capture, or paper capture that can be digitally transmitted to the FBI. In addition, the procedures require an applicant to present proof of identity when the fingerprints are captured and sign a document certifying that all information provided with the fingerprints is true, under penalty of 18 U.S.C. 1001. The State plan must include these procedures or others that the FBI approves in the collection portion of the program in order to be acceptable to TSA.

## Terrorist Checks

Prior to December 2004, pursuant to $\S 1572.107$, TSA will conduct namebased background checks of Federal and international databases relating to terrorist activity. TSA will then conduct (1) checks for wants and warrants for the crimes listed in $\S 1572.103$; (2) checks of an individual's citizenship status under $\S 1572.105$; and (3) checks
utilizing the Interstate Identification Index.

If TSA discovers during the course of these name-based checks that an individual poses a security threat, has committed a disqualifying offense, or is evading law enforcement, consistent with § $1572.5(\mathrm{c})(1)$, TSA will contact the appropriate law enforcement agency and/or direct the State to revoke the individual's HME. If the individual challenges TSA's assertion, TSA or the State will provide the individual with an opportunity to correct underlying records or cases of mistaken identity by submitting fingerprints or corrected court records.

With an estimated population exceeding 3.5 million drivers, the government must prioritize the background check process. TSA believes that these name-based checks enable the agency to focus on individuals who may pose a more immediate threat of terrorist or criminal activity, such as those who are wanted or under a warrant for one of the disqualifying crimes listed in § 1572.103, those who are not citizens or lawful permanent residents of the U.S., and those who may present a potential terrorist threat.

TSA has assessed the risks associated with the transportation of hazardous materials via commercial vehicle and has determined that in conducting name-based checks prior to December 2004 and initiating fingerprint-based criminal history checks as early as April 1,2004 , the risks are effectively addressed. The terrorist-related information that TSA will search prior to December 2004 is the best indication of an individual's predisposition to commit or conspire to commit terrorist acts. Evidence that an individual has been convicted recently of a felony such as theft or assault is important, and may indicate a security threat; but TSA has determined that the more imminent threat is an individual whose background includes terrorism-related information. This approach is consistent with the Patriot Act and the Safe Explosives Act, and meets the needs of the States.

Also, it is important to note that TSA is not delaying the September 2, 2003 compliance date set forth in $\S 1572.5(\mathrm{~b})$ for surrendering a HME. This section requires any HME holder who does not meet the security threat assessment standards in part 1572 to surrender the endorsement beginning on September 2, 2003. For instance, an individual who knows that he or she has committed a disqualifying offense within the prescribed time periods, is required to relinquish their HME beginning September 2, 2003. Nothing in this
amended IFR alters this surrender requirement.

The surrender requirement buttresses TSA's determination that we should attempt to identify potential terrorist threats from terrorism-related information databases before analyzing criminal history records. As of today, all HME drivers are required to self-report any disqualifying offenses that would appear on a fingerprint-based criminal history records check. TSA will work closely with the State Departments of Motor Vehicles, labor organizations, and the trucking industry to communicate this surrender provision widely and to inform affected drivers of the existing waiver process.

Based on the foregoing, the exception found in 18 U.S.C. 845(a)(1) continues to apply, and persons otherwise prohibited from lawfully possessing explosives who are transporting explosives in commerce would not be subject to criminal prosecution under section 842(i).

## Section-by-Section Analysis

TSA is adding a definition to $\S 1572.3$ to make certain that the current IFR, which requires revocation of a HME under certain conditions, will not impose a condition in the HME process that the States cannot complete. As discussed earlier, in some States legislative language prohibits the 'revocation' of a HME legal, but permits the State to cancel, suspend, withdraw, or disqualify a hazardous material endorsement. TSA's new definition resolves this conflict with certain State legislation.

TSA makes several changes to § 1572.5 concerning the date on which TSA's threat assessment based on fingerprint-based criminal history record checks will begin. In paragraphs 1572.5(b) and (c), the new dates reflect TSA's decision to delay the date on which the States must be collecting information and submitting fingerprints to the FBI from November 3, 2003 to April 1, 2004, or under certain conditions to December 1, 2004 at the very latest.

Paragraph 1572.5(c)(4) establishes the requirement that TSA will not authorize - a State to issue, renew, or transfer a HME unless it is collecting the information required in $\S 1572.5(\mathrm{e})$ and submitting fingerprints as of April 1, 2004. If the State cannot collect the required information by that date, the State may submit and TSA may approve a request to delay the collection requirement to December 1, 2004. Also, if the State cannot submit fingerprints from HME applicants by April 1, 2004, the State must submit a plan to TSA
explaining how fingerprint collection and submission will be accomplished before December 1, 2004.

## Compliance

As discussed in detail in the IFR published by FMCSA on May 5, 2003, the provisions of 49 U.S.C. 31314 , which require DOT to withhold certain Federal-aid highway funds from States that fail to comply substantially with the requirements for State participation in the CDL program, apply also to State compliance with those portions of the TSA rule implementing the Patriot Act that apply to States. In addition, 49 U.S.C. 31312 authorizes DOT to prohibit States from issuing CDLs if the Secretary determines "that a State is in substantial noncompliance", with 49 U.S.C. chapter 313. These penalties are available for DOT to use when and if appropriate to encourage State compliance with TSA's rule.

## Future Rulemaking

It is important to note that TSA will publish a NPRM shortly after publication of this amended IFR, to propose minimum federal standards for the fingerprint collection, criminal history adjudication, and appeal process for HME applicants. In the NPRM, TSA will provide greater detail about what each State program should include, minimum standards for adjudication of the criminal history record check results, minimum standards for establishing an appeal process for the adjudication of the criminal history checks, and the potential costs for each portion of the background check.

TSA will rely heavily on the comments the States provide to ensure that no State is forced to adhere to a rigid form beyond its financial or technological capacity. The NPRM will propose minimum components that each State program should include, but would permit the States to determine how it meets the minimum standards.

The NPRM process will also provide TSA with the empirical data and information necessary to complete a comprehensive regulatory evaluation. TSA understands that the IFR and the amended IFR impose financial burdens on the States, some of which may be minimized through State and Federal fee authority. However, there may be States in which this is not possible, and TSA must seek a regulatory regime to prevent unnecessary financial burdens. TSA can achieve this through active participation of the States, the trucking industry, and private entities that may be able to provide low cost operational assistance.

In addition, on October 3, 2003, legislation was enacted ${ }^{6}$ authorizing DHS to collect fees to cover the costs of implementing section 1012 of the Patriot Act. This new authority will aid TSA in completing the security threat assessment check for an estimated 3.5 million commercial drivers. Therefore, TSA is also issuing a separate proposed rule to determine reasonable costs of background checks, on which drivers, the States and other interested parties may comment.

## Rulemaking Analyses and Notices

Justification for Immediate Adoption
TSA is issuing this final rule without prior notice and opportunity to comment pursuant to its authority under section 4(a) of the Administrative Procedure Act (5 U.S.C. 553(b)). This provision allows the agency to issue a final rule without notice and opportunity to comment when the agency for good cause finds that notice and comment procedures are
"impracticable, unnecessary or contrary to the public interest."

The catastrophic effect of the attacks on the World Trade Center and Pentagon on September 11, 2001, revealed the vulnerability of the nation's transportation system to terrorism. National security and intelligence officials have warned that future terrorist attacks are likely. The number of commercial vehicles that carry hazardous materials is far greater than the number of aircraft that might be hijacked by terrorists. A vehicle carrying hazardous materials, if used as a weapon in a terrorist attack, could cause significant loss of life and property damage.

Section 1012 of the USA PATRIOT Act is a measure to increase the security of highway transportation of hazardous materials. Because of the likelihood of future terrorist attacks, and the potential for significant casualties and property damage in the event of a terrorist attack involving a vehicle carrying hazardous materials, TSA believes that immediate action is warranited, and TSA finds that notice and public comment procedures under 5 U.S.C. 553(b) are impracticable and contrary to the public interest.

It is important to note that TSA is not making fingerprint collection or submission of the State plan due upon publication of this document. The intervening months between the date this amended IFR is published and April 1, 2004 will provide additional time for the States to develop a plan for

[^8]fingerprint collection or begin it. As indicated in comments to the IFR, most States have already devoted considerable time to determining how drivers could best be fingerprinted in light of each State's current hazardous material endorsement and licensing program. Submitting a fingerprint collection plan to TSA that reflects this thinking by April 1 should be possible. On the other hand, some States will be prepared to begin fingerprint collection within three months and so need not prepare or submit a new plan to TSA. Therefore, TSA believes that this amended IFR will not impose significant time constraints on the States.

By making the rule effective as of the date of publication, however, TSA can begin name checks of individuals against international and terroristrelated databases as soon as TSA has accurate driver data and is able to adjudicate the results of the checks.

## Regulatory Evaluation

Executive Order 12866, "Regulatory Planning and Review" (58 FR 51735, October 4, 1993), provides for making determinations whether a regulatory action is "significant" and therefore subject to Office of Management and Budget (OMB) review and to the requirements of the Executive Order.
TSA has determined that this action is a significant regulatory action within the meaning of Executive Order 12866 because there is significant public interest in security issues since the events of September 11, 2001. This amended interim final rule responds to the background check requirements of section 1012 of the USA PATRIOT Act by establishing the criteria that will be used in determining whether an individual applying for, transferring, or renewing a HME poses a security risk warranting denial of the endorsement.

TSA has performed a preliminary analysis of the expected costs of this interim final rule, but the figures may change when a full Regulatory Evaluation is completed in the proposed rulemaking that will follow publication of this document. TSA will prepare a full regulatory evaluation based on comments received from the States, the trucking industry, and pertinent nongovernmental organizations, which will improve the reliability of the cost and benefit estimates.

## Initial Regulatory Flexibility Determination

The Regulatory Flexibility Act of 1980, as amended, (RFA) was enacted by Congress to ensure that small entities (small businesses, small not-for-profit
organizations, and small governmental jurisdictions) are not unnecessarily or disproportionately burdened by Federal regulations. The RFA requires agencies to review rules to determine if they have "a significant economic impact on a substantial number of small entities." TSA has determined that the amended interim final rule will not have a significant economic impact on a substantial number of small entities.
Current industry practice is for drivers to obtain their CDL certification as a condition of employment. Individuals are required to have a current CDL with appropriate endorsements to be eligible for employment. This is an employment cost typically borne by the individual employee. This amended IFR will affect the States, but they are not considered "small governmental jurisdictions", such as small towns or boroughs. Therefore, the burden on small business entities from this rule is expected to be de minimis.

TSA conducted the required review of this rule accordingly, pursuant to the Regulatory Flexibility Act, 5 U.S.C. 605(b) TSA certifies that this rule will not have a significant impact on a substantial number of small entities.

## Paperwork Reduction Act

Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501, et seq.), a Federal agency must obtain approval from the Office of Management and Budget (OMB) for each collection of information it conducts, sponsors, or requires through regulations. This amended interim final rule contains information collection activities subject to the PRA. Accordingly, the following information requirements are being submitted to OMB for its review.

Title: Security Threat Assessment for Individuals Applying for a Hazardous Materials Endorsement for a Commercial Driver's License.

Summary: TSA is establishing standards for security threat assessments of individuals applying for, renewing, or transferring a hazardous materials endorsement (HME) for a commercial driver's license (CDL), which in addition to the information already collected by the States for the purpose of HME applications will now include fingerprints as well as the disclosure of the applicant's citizenship, mental health defects, and criminal history. States must also submit a plan to TSA outlining the fingerprint process they intend to implement.

Use of: Truck drivers must complete an application and provide fingerprints for the purpose of conducting a background check. The States and local
agencies will most likely collect this information when individuals apply for, renew or transfer an HME. This information will be used to conduct background checks to ensure that these individuals do not have a disqualifying criminal offense on their record. In addition, the States' fingerprint collection plans will be used by TSA to ensure regulatory compliance, uniformity of standards, and adequacy of process.
Respondents (including number of): The likely respondents to this proposed information requirement are individuals applying for, renewing or transferring an HME and each of the 50 States, for a pool of approximately 3.5 million respondents.

Frequency: Estimates indicate that approximately 3.5 million people have an HME and this number is expected to grow by approximately $2.8 \%$ people per year for a ten-year total of approximately 4.5 million people ( 450,000 annualized). The number of fingerprint applications to be collected over a ten-year period is approximately 8.7 million ( 870,000 annualized). This number includes new applicants and renewals, which occur at least once every five years. States are required to submit their fingerprinting plans upon their completion or amendment.

Annual Burden Estimate: Fingerprint costs consist of a processing fee, processing time, and material. The average cost for the fingerprint process was estimated at approximately $\$ 50$ per set when the original IFR was published. However, empirical data and further research indicate that this estimate is low for the population covered by this rule. We also estimate that it would take an average of thirty minutes to complete an FBI fingerprint card and forward it to the FBI for further processing. Based on this information, TSA originally estimated that the background check process would involve 4.4 million hours over the tenyear ( 436,000 annualized) and would cost $\$ 452$ million over the ten-year period ( $\$ 45.2$ million annualized). However, TSA now believes that these estimates may be low and requests comment from all affected parties concerning cost assumptions that can be made in preparing this analysis.

The agency is soliciting comments

## to-

(1) Evaluate whether the proposed information requirement is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
(2) Evaluate the accuracy of the agency's estimate of the burden;
(3) Enhance the quality, utility, and clarity of the information to be collected; and
(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Individuals and organizations may submit comments on the information collection requirement by January 6 , 2004, and should direct them via fax to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: DHS-TSA Desk Officer, at (202) 395-5806. Comments to OMB are most useful if received within 30 days of publication.
As protection provided by the Paperwork Reduction Act, as amended, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this information collection will be published in the Federal Register after OMB approves it.

## Executive Order 13132 (Federalism)

Executive Order 13132 requires TSA to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications." "Policies that have federalism implications" are defined in the Executive Order to include regulations that have
"substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government." Under the Executive Order, TSA may construe a Federal statute to preempt State law only where, among other things, the exercise of State authority conflicts with the exercise of Federal authority under the Federal statute.

This action has been analyzed in accordance with the principles and criteria in the Executive Order, and it has been determined that this interim final rule does have Federalism implications or a substantial direct effect on the States. The amended interim final rule requires States to collect fingerprints or to submit a plan to TSA outlining how the fingerprint collection process would work. TSA will publish a NPRM shortly that will solicit comments from the States on the fingerprint collection process and other aspects of implementing the HME background check program. TSA will
continue to consult extensively with the States to ensure that any burdens are minimized to the extent possible.

TSA notes that FMCSA has communicated with the States on the requirements of the USA PATRIOT Act. The Assistant Administrator of FMCSA wrote to licensing officials in each State on October 31, 2001, briefly summarizing section 1012 of the USA PATRIOT Act, and asking them to continue issuing and renewing hazardous materials endorsements until the regulations implementing section 1012 were completed. Some States have already enacted legislation they consider necessary to carry out the mandates of section 1012.

## Unfunded Mandates Reform Act

Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) requires Federal agencies to prepare a written assessment of the costs, benefits, and other effects of proposed or final rules that include a Federal mandate likely to result in the expenditure by State, local, or tribal governments, in the aggregate, or by the private sector, of more than $\$ 100$ million in any one year (adjusted for inflation with base year of 1995). Before promulgating a rule for which a written statement is needed, section 205 of the UMRA generally requires TSA to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, most cost-effective, or least burdensome alternative that achieves the objective of the rule. The provisions of section 205 do not apply when they are inconsistent with applicable law. In addition, section 205 allows TSA to adopt an alternative other than the least costly, most costeffective, or least burdensome alternative if the agency publishes with the final rule an explanation why that alternative was not adopted.

This interim final rule will not result in the expenditure by State, local, or tribal governments, in the aggregate, or by the private sector, of more than $\$ 100$ million annually. Thus, TSA has not prepared a written assessment under the UMRA.

## Environmental Analysis

TSA has analyzed this rulemaking action for the purposes of the National Environmental Policy Act. The agency has determined that implementation of this final rule will not have any significant impact on the quality of the human environment.

## Energy Impact

TSA has assessed the energy impact of this rule in accordance with the Energy Policy and Conservation Act
(EPCA), Public Law 94-163, as amended (42 U.S.C. 6362). TSA has determined that this rule is not a major regulatory action under the provisions of the EPCA.

## Trade Impact Assessinent

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. TSA will continue to consult with Mexico and Canada under the North American Free Trade Agreement to ensure that any adverse impacts on trade are minimized. This rule applies only to individuals applying for a State-issued hazardous materials endorsement for a commercial drivers license. Thus, TSA has determined that this rule will have no impact on trade.

## List of Subjects in 49 CFR Part 1572

Commercial drivers license, Criminal history background checks, Explosives, Hazardous materials, Motor carriers, Motor vehicle carriers, Security measures, Security threat assessment.

## The Amendments

- For the reasons set forth in the preamble, the Transportation Security Administration amends 49 CFR Chapter XII, Subchapter D as follows:

## PART 1572-CREDENTIALING AND BACKGROUND CHECKS FOR LAND TRANSPORTATION SECURITY

- 1. The authority citation for part 1572 continues to read as follows:

Authority: 49 U.S.C. 114, 5103a, 40113, 46105.

- 2. Amend $\S 1572.3$ by adding the following definition in alphabetical order to read as follows:

## §1572.3 Terms used in this part.

Revoke means the process by which a State cancels, suspends, withdraws, annuls, or disqualifies a hazardous material endorsement.

- 3. In § 1572.5 , revise paragraphs (b)(2)(i), (b)(2)(ii), (c)(1), (c)(2) introductory text and (c)(3) and add paragraph (c)(4) to read as follows.
§1572.5 Security threat assessment for commercial drivers' licenses with a hazardous materials endorsement.
(b) *
(2) * * *
(i) From November 3, 2003 to December 1, 2004, an individual may submit fingerprints, in a form and manner specified by the State and TSA, when a State revokes the individual's hazardous materials endorsement under paragraph (c)(1) of this section.
(ii) When so notified by the State, an individual must submit fingerprints, in a form and manner specified by the State and TSA, when he or she applies to obtain, renew, or transfer a hazardous materials endorsement for a CDL, or when requested by TSA.
(c)(1) Each State must revoke an individual's hazardous materials endorsement if TSA informs the State
that the individual does not meet the standards for security threat assessment in paragraph (d) of this section.
(2) No later than December 1, 2004:
(3) From November 3, 2003 to June 1, 2005, while TSA is conducting a security threat assessment on an individual, if the individual holds a CDL with a hazardous materials endorsement, and is applying for renewal or transfer of the endorsement, the State that issued the endorsement may extend the expiration date of the individual's endorsement until the State receives a Final Notification of Threat Assessment or Notification of No Security Threat from TSA.
(4) TSA will not authorize a State to issue, renew, or transfer hazardous material endorsements unless the State issuing the endorsement is -
(i) Collecting the information required in §1572.5(e) as of April 1, 2004; or the

State provides written justification for an extension of time not to exceed December 1, 2004 and TSA grants the extension; and
(ii) Submitting fingerprints in accordance with fingerprint collection standards of the Federal Bureau of Investigation and in accordance with procedures approved by TSA as of April 1,2004; or the State submits a plan to TSA that describes how the State will collect fingerprints of individuals applying for, renewing, or transferring a hazardous materials endorsement no later than December 1, 2004.

Issued in Arlington, VA on November 4, 2003.

Stephen McHale,
Deputy Administrator.
[FR Doc. 03-28136 Filed 11-4-03; 4:22 pm]
BILLING CODE 4910-62-P

## Proposed Rules

## Federal Register

Vol. 68, No. 216
Friday, November 7, 2003

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## RAILROAD RETIREMENT BOARD

## 20 CFR Part 321

RIN 3220-AB57

## Electronic Filing of Applications and Claims for Benefits Under the Railroad Unemployment Insurance Act

Agency: Railroad Retirement Board. ACTION: Proposed rule.

SUMMARY: The Railroad Retirement Board (Board) proposes to amend its regulations to permit the filing of applications and claims for benefits under the Railroad Unemployment Insurance Act via the Internet. The Government Paperwork Elimination Act provides that Federal agencies are required to provide "for the option of the electronic maintenance, submission, or disclosure of information, when practicable as a substitute for paper". This proposed new part will permit the filing of applications and claims for benefits under the Railroad Unemployment Insurance Act electronically.
DATES: Submit comments on or before January 6, 2004.
ADDRESSES: Address any comments concerning this proposed rule to Beatrice Ezerski, Secretary to the Board, Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois 606112092.

## FOR FURTHER INFORMATION CONTACT:

Marguerite P. Dadabo, Assistant General Counsel, (312) 751-4945, TTD (312) 751-4701.
SUPPLEMENTARY INFORMATION: The amendments would add a new part 321 to the Board's regulations (20 CFR 321) to permit the filing of applications and claims for benefits under the Railroad Unemployment Insurance Act via the Internet. The Government Paperwork Elimination Act, Public Law 105-277, sections 1701-1710 (codified as 44 U.S.C. $3504 n$ ) provides that Federal agencies are required to provide "for the option of the electronic maintenance,
submission, or disclosure of information, when practicable as a substitute for paper". The proposed part 321 will permit the filing of applications and claims for benefits under the Railroad Unemployment Insurance Act electronically.

The new part 321 provides that both an application and claims for benefits under the Railroad Unemployment Insurance Act may be filed electronically through the Board's Web site utilizing a User ID/PIN/Password system. The new part further provides that determinations regarding those applications and claims will be adjudicated in accord with established procedures.

In establishing the authenticity of the person who is filing an application or claim for benefits, the Board intends to use a User ID/PIN/Password system for identification as a substitute for a signature.

The Board currently uses a User ID/ PIN/password system to allow employers access to RRBLINK to make electronic tax deposits and submit Form DC-1, 'Employer's Quarterly Report of Contributions Under the RUIA" (Railroad Unemployment Insurance Act) electronically. A PIN/password system is used to access the Pay.gov website. The U.S. Department of the Treasury operates the Pay.gov website. Such a system also is consistent with the guidance provided by the Department of Justice regarding the use of electronic processes. The Board has also proposed amending its regulations to permit the filing of an application for benefits under the Railroad Retirement Act using the same User ID/PIN/password system.

The Board, with the concurrence of the Office of Management and Budget, has determined that this is not a significant regulatory action under Executive Order 12866. Therefore, no regulatory analysis is required. The Office of Management and Budget has approved information collections associated with this rule under control numbers 3220-0022, 3220-0039, and 3220-0198.

## List of Subjects in 20 CFR Part 321

Claims, Railroad unemployment insurance, Reporting and recordkeeping requirements.

For the reasons set out in the preamble, the Railroad Retirement Board proposes to amend title 20,
chapter II, of the Code of Federal Regulations by adding a new part 321 to read as follows:

## PART 321-ELECTRONIC FILING OF APPLICATIONS AND CLAIMS FOR BENEFITS UNDER THE RAILROAD UNEMPLOYMENT INSURANCE ACT

Sec.
321.1 Filing applications electronically. 321.2 Filing claims for benefits electronically.
Authority: 45 U.S.C. 355 and 362(1).
§321.1 Filing applications electronically.
(a) Electronic filing. An application for benefits under the Railroad Unemployment Insurance Act may be filed electronically through the Board's Web site, http://www.rrb.gov, utilizing a User ID/PIN/Password.
(b) Adjudication of applications filed electronically. An application filed electronically shall be adjudicated in accordance with the procedures set forth in this part.
(c) Date of filing. The date of filing for an application filed electronically shall be the date that the electronic filing of the application is accepted by the Board's electronic system. If an attempt to file an application through the Board's electronic system is unsuccessful and is rejected by that system, the claimant must submit another application. If the subsequent application, filed either electronically or on paper, is received by the Board within 30 days from the date of the notification that the initial filing attempt was rejected, the Board will establish the filing date of the subsequent application as the date the rejected application was attempted to be filed.

## §321.2 Filing claims for benefits electronically.

(a) Electronic Filing. A claim for benefits under the Railroad Unemployment Insurance Act may be filed electronically through the Board's website, http://www.rrb.gov, utilizing a User ID/PIN/Password.
(b) Adjudication of claims filed electronically. A claim for benefits under the Railroad Unemployment Insurance Act filed electronically shall be adjudicated in accordance with the procedures set forth in this part.
(c) Date of filing. The date of filing for a claim for benefits under the Railroad Unemployment Insurance Act filed electronically shall be the date that the
electronic filing of the claim is accepted by the Board's electronic system. If an attempt to file a claim for benefits under the Railroad Unemployment Insurance Act is unsuccessful and is rejected by the Board's electronic system, the claimant must submit another claim for benefits. If the subsequent claim for benefits, either filed electronically or on paper, is received by the Board within 30 days from the date of the notification that the initial filing was rejected, the Board will establish the filing date of the subsequent claim as the date the rejected claim was attempted to be filed
Dated: November 3, 2003.
By Authority of the Board.
Beatrice Ezerski,
Secretary to the Board.

## 27 CFR Part 9

[TTB Notice No. 22; Re: TTB Notice No. 15]

## RIN 1513-AA41

## Proposed Eola Hills Viticultural Area (2002R-216P)

agency: Alcohol and Tobacco Tax and Trade Bureau (TTB), Treasury
ACTION: Notice of proposed rulemaking; extension of comment period.

SUMmARY: We are extending the comment period for TTB Notice No. 15, a notice of proposed rulemaking published in the Federal Register on September 8, 2003, for an additional 60 days. The proposed rule would amend our regulations to add Eola Hills as an approved American viticultural area in Oregon. We are acting on a request to extend the comment period submitted on behalf of the Eola Hills Wine Cellars of Salem, Oregon.
DATES: We must receive written comments on or before January 6, 2004.
ADDRESSES: You may send comments to any of the following addresses-

- Chief, Regulations and Procedures Division, Alcohol and Tobacco Tax and Trade Bureau, P.O. Box 50221,
Washington, DC 20091-0221 (Attn: Notice No. 15);
- 202-927-8525 (facsimile);
- nprm@ttb.gov (e-mail); or
- http://www.ttb.gov (An online comment form is posted with Notice No. 15 on our Web site).

You may view copies of the petition, the notice of proposed rulemaking, the appropriate maps, and any comments we receive by appointment at our library, 1310 G Street, NW.,
Washington. DC 20005; phone 202-9278210. You may also access copies of the notice and comments on our Web site at http://www.ttb.gov.
FOR FURTHER INFORMATION CONTACT:
Jennifer Berry, Regulations and Procedures Division, Alcohol and Tobacco Tax and Trade Bureau, P.O. Box 18152, Roanoke, Virginia 24014; telephone 540-344-9333; e-mail Jennifer.Berry@ttb.treas.gov.
SUPPLEMENTARY INFORMATION:

## Background

On September 8, 2003, the Alcohol and Tobacco Tax and Trade Bureau (TTB) published a notice of proposed rulemaking (Notice No. 15, 68 FR 52875) to establish "Eola Hills" as an American viticultural area in Oregon. The comment period was to end November 7, 2003.

We have, however, received a request for a 60 -day extension of the comment period from Kevin Crawford, an attorney representing a winery with a similar name to that of the proposed viticultural area, Eola Hills Wine Cellars Inc. of Salem, Oregon. Mr. Crawford requested the extension to allow his client more time to gather evidence to support its comment. In consideration of this request, and in light of the impact that the approval of the proposed Eola Hills viticultural area may have on the Eola Hills Wine Cellars' wine labels, we are extending the comment period for an additional 60 days.

## Public Participation

See the "Public Participation" section of TTB Notice No. 15 for detailed instructions on submitting and reviewing comments. We will carefully consider comments received on or before the new closing date.

We will not recognize any submitted material as confidential. All comments are part of the public record and subject to disclosure. Do not enclose in your comments any material you consider confidential or inappropriate for disclosure. The name of the person submitting a comment is not exempt from disclosure.

## Drafting Information

## ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 122 and 133
[FRL-7584-5]

## National Pollutant Discharge

 Elimination System (NPDES) Permit Requirements for Municipal Wastewater Treatment Discharges During Wet Weather ConditionsAGENCY: Environmental Protection Agency (EPA).
ACTION: Request for comment on proposed policy.

SUMMARY: Today, EPA is inviting comment on a proposed policy regarding NPDES permit requirements for treatment plants in publicly owned treatment works (POTWs) under peak wet weather flow conditions. Regulatory agencies, municipal operators of POTWs, and representatives of environmental advocacy groups have expressed uncertainty about the appropriate regulatory interpretation for such situations. Today's document describes both a proposed interpretation of regulations, as well as draft guidance to implement such an interpretation. EPA's intention is to ensure that NPDES requirements be applied in a nationallyconsistent manner that improves the capacity, management, operation and maintenance of POTW treatment plants and collection systems and protects human health and the environment. DATES: Written comments on this proposed policy must be received by EPA or postmarked by January 9, 2004.
ADDRESSES: Comments may be submitted electronically, by mail, or through hand delivery/courier. Follow the detailed instructions as provided in section I.B. of the SUPPLEMENTARY INFORMATION section.
FOR FURTHER INFORMATION CONTACT: FOT questions about the substance of this proposed policy, contact Kevin Weiss (e-mail at weiss.kevin@epa.gov or phone at (202) 564-0742) at Office of Wastewater Management, U.S.

Environmental Protection Agency (Mailcode 4203M), 1200 Pennsylvania Ave., NW., Washington, D.C. 20460. SUPPLEMENTARY INFORMATION:

## I. General Information

A. How Can I Get Copies of This Document and Other Related

## Information?

1. Docket. EPA has established an official public docket for this action under Docket ID No. OW-2003-0025. The official public docket consists of the documents specifically referenced in this action, any public comments received, and other information related to this action. Although a part of the official docket, the public docket does not include Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. The official public docket is the collection of materials that is available for public viewing at the Water Docket in the EPA Docket Center, (EPA/DC) EPA West, Room B102, 1301 Constitution Ave., NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the Water Docket is (202) 566-2426. You may copy 266 pages per day free of charge. Beginning with page 267 , you will be changed $\$ 0.15$ per page plus an administrative fee of $\$ 25.00$.
2. Electronic Access. You may access this Federal Register document electronically through the EPA Internet under the "Federal Register" listings at http://www.epa.gov/fedrgstr/.

An electronic version of the public docket is available through EPA's electronic public docket and comment system, EPA Dockets. You may use EPA Dockets at http://www.epa.gov/edocket/ to submit or view public comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Once in the system, select "search,' then key in the appropriate docket identification number.

Certain types of information will not be placed in the EPA Dockets. Information claimed as CBI and other information whose disclosure is restricted by statute, which is not included in the official public docket, will not be available for public viewing in EPA's electronic public docket. EPA's policy is that copyrighted material will not be placed in EPA's electronic public docket but will be available only in printed, paper form in the official public
docket. To the extent feasible, publicly available docket materials will be made available in EPA's electronic public docket. When a document is selected from the index list in EPA Dockets, the system will identify whether the document is available for viewing in EPA's electronic public docket. Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the docket facility identified in section I.A.1. EPA intends to work toward providing electronic access to all of the publicly available docket materials through EPA's electronic public docket.

For public commenters, it is important to note that EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing in EPA's electronic public docket as EPA receives them and without change, unless the comment contains copyrighted material, CBI, or other information whose disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in EPA's electronic public docket. The entire printed comment, including the copyrighted material, will be available in the public docket.

Public comments submitted on computer disks that are mailed or delivered to the docket will be transferred to EPA's electronic public docket. Public comments that are mailed or delivered to the docket will be scanned and placed in EPA's electronic public docket. Where practical, physical objects will be photographed, and the photograph will be placed in EPA's electronic public docket along with a brief description written by the docket staff.

For additional information about EPA's electronic public docket visit EPA Dockets online or see 67 FR 38102 (May 31, 2002).

## B. How and To Whom Do I Submit Comments?

You may submit comments electronically, by mail, or through hand delivery/courier. To ensure proper receipt by EPA, identify the appropriate docket identification number in the subject line on the first page of your comment. Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late
comments. Late comments may be considered if time permits.

1. Electronically. If you submit an electronic comment as prescribed below, EPA recommends that you include your name, mailing address, and an e-mail address or other contact information in the body of your comment. Also include this contact information on the outside of any disk or CD ROM you submit, and in any cover letter accompanying the disk or CD ROM. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. EPA's policy is that EPA will not edit your comment, and any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.
i. EPA Dockets. Your use of EPA's electronic public docket to submit comments to EPA electronically is EPA's preferred method for receiving comments. Go directly to EPA Dockets at http://www.epa.gov/edocket, and follow the online instructions for submitting comments. To access EPA's electronic public docket from the EPA Internet Home Page, select "Information Sources," "Dockets," and "EPA Dockets." Once in the system, select "search," and then key in Docket ID No. OW-2003-0025. The system is an "anonymous access" system, which means EPA will not know your identity, e-mail address, or other contact information unless you provide it in the body of your comment.
ii. E-mail. Comments may be sent by electronic mail (e-mail) to OWDocket@epa.gov, Attention Docket ID No. OW-2003-0025. In contrast to EPA's electronic public docket, EPA's email system is not an "anonymous access" system. If you send an e-mail comment directly to the Docket without going through EPA's electronic public docket, EPA's e-mail system automatically captures your e-mail address. E-mail addresses that are automatically captured by EPA's e-mail system are included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket.
iii. Disk or CD ROM. You may submit comments on a disk or CD ROM that you mail to the mailing address
identified in section I.B.2. These electronic submissions will be accepted in WordPerfect or ASCII file format. Avoid the use of special characters and any form of encryption.
2. By Mail. Send an original and three copies of your comments to: Water Docket, Environmental Protection Agency, Mailcode 4101T, 1200 Pennsylvania Ave., NW., Washington, DC 20460, Attention Docket ID No. OW-2003-0025.
3. By Hand Delivery or Courier. Deliver your comments to: EPA Docket Center, EPA West, Room B102, 1301 Constitution Ave., NW., Washington, DC, Attention Docket ID No. OW-20030025. Such deliveries are only accepted during the Docket's normal hours of operation as identified in section I.A.1.

## C. How Should I Submit CBI To the Agency?

Do not submit information that you consider to be CBI electronically through EPA's electronic public dócket or by e-mail. You should send information that you consider to be CBI in one of two ways: (1) By U.S. Mail to: Kevin Weiss, Office of Wastewater Management, U.S. Environmental Protection Agency (Mailcode 4203M), 1200 Pennsylvania Ave., NIV.,
Washington, DC 20460-Attention Docket ID No. OW-2003-0025; or (2) By courier or delivery to: Kevin Weiss, Office of Wastewater Management, U.S. Environmental Protection Agency, EPA East Building (Room 7334), 1301 Constitution Ave., NW., Washington, DC 20004-Attention Docket ID No. OW-2003-0025. You may claim information that you submit to EPA as CBI by marking any part or all of that information as CBI (if you submit CBI on disk or CD ROM, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket and EPA's electronic public docket. If you submit the copy that does not contain CBI on disk or CD ROM, mark the outside of the disk or CD ROM clearly that it does not contain CBI. Information not marked as CBI will be included in the public docket and EPA's electronic public docket without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person identified in
the FOR FURTHER INFORMATION CONTACT section.

## D. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.
2. Describe any assumptions that you used.
3. Provide any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at your estimate.
5. Provide specific examples to illustrate your concerns.
6. Offer alternatives.
7. Make sure to submit your comments by the comment period deadline identified.
8. To ensure proper receipt by EPA, identify the appropriate docket identification number in the subject line on the first page of your response. It would also be helpful if you provided the name, date, and Federal Register citation related to your comments.

## Acronyms Used

$\mathrm{BOD}_{5}$ five-day biochemical oxygen demand
CSO combined sewer overflow
EPA Environmental Protection Agency I/I infiltration and inflow
NPDES National Pollutant Discharge
Elimination System
POTW publicly owned treatment works
SS total suspended solids
SSO sanitary sewer overflow

## II. Background.

## A. Why Is EPA Taking This Action?

Wastewater collection systems collect domestic sewage and other wastewater from homes and other buildings and convey it to wastewater sewage treatment plants for proper treatment and disposal. The collection and treatment of municipal sewage and wastewater is vital to public health in our cities and towns, and to the viability of our receiving waters. The proper functioning of wastewater systems is among the most important factors responsible for the general level of good health enjoyed in the United States. The United States Centers for Disease Control and Prevention named clean water and sanitation technology one of the twentieth century's great public health achievements (see Morbidity and Mortality Weekly Report, April 2, 1999, v. 48, no. 12, pp. 241-243), while the

National Academy of Engineering included such technology on its list of the 20 engineering achievements that had the greatest impact on quality of life in the twentieth century. (National Academy of Engineering, press release, February 22, 2000).

Municipal collection systems and treatment facilities are an extensive, valuable, and complex part of the nation's infrastructure. In the last twenty years, communities have spent \$1 trillion in 2001 dollars on drinking water treatment and supply and wastewater treatment and disposal (see The Clean Water and Drinking Water Infrastructure Gap Analysis, EPA, September 2002). Another source estimates that wastewater treatment and collection systems represent about 1015 percent of the total infrastructure value in the United States. (Fragile Foundations: A Report on America's Public Works. Final Report to the President and Congress. National Council on Public Works Improvement. February 1988.) The collection system and treatment facilities of a single large municipality can represent an investment worth billions of dollars.
The efficiency of wastewater treatment at a wastewater treatment plant depends strongly on the design and performance of the collection system. Many collection systems in the United States are subject to high volumes of infiltration (including rainfall-induced infiltration) and inflow during wet weather conditions. High levels of infiltration and inflow (I/I) increase the hydraulic load on treatment plants, which can reduce treatment efficiency, can exceed the capacity of components within the treatment process, and in extreme situations make biological treatment facilities inoperable (e.g., wash out the biological organisms that treat the waste).

In 1972, the Federal Water Pollution Control Act, also referred to as the Clean Water Act (CWA), dramatically increased the role of the Federal government in protecting water resources by establishing a framework for upgrading the nation's wastewater infrastructure. With respect to the municipal wastewater infrastructure, the 1972 Act: established a minimum pollution control standard based on the application of secondary treatment; mandated the development of more stringent standards where necessary to protect water quality; established the National Pollutant Discharge Elimination System (NPDES) permit program to ensure implementation of standards; and dramatically increased Federal funding for municipal treatment works.

During the 1970's and 1980's the nation's municipal wastewater infrastructure dramatically expanded and improved, particularly with respect to treatment plants. In 1968, 72 percent of the Nation's municipal wastewater plants were providing secondary treatment and less than one percent were providing greater than secondary treatment (out of 14,051 facilities). By 1996, 59 percent of the Nation's municipal wastewater plants were providing secondary treatment and 27 percent were providing greater than secondary treatment (out of 16,024 facilities). During this time, the overall number of people served by municipal wastewater treatment facilities increased from 140.1 million in 1968 to 189.7 million in 1996 (a 35 percent increase).

In the mid-1980's and 1990's EPA increased its emphasis on addressing wet weather conditions and discharges from municipal collection systems and at treatment facilities. In 1989, EPA published the National Combined Sewer Overflow (CSO) Control Strategy which provided recommendations for NPDES permits for CSOs. See 54 FR 37370 (September 8, 1989). In 1994, EPA issued the CSO Control Policy to provide greater national clarity and consistency in the way NPDES requirements apply to flows in combined sewers and to CSO discharges. See 59 FR 18688 (April 19, 1994). In addition, the Agency increased compliance assistance and enforcement activities associated with sanitary sewer overflows (SSOs) during the 1990s. In 2000, EPA issued the Compliance and Enforcement Strategy Addressing Combined Sewer Overflows and Sanitary Sewer Overflows. This strategy called for each EPA Region to develop an enforcement response plan, including an inventory of SSO violations and a description of how $20 \%$ of the priority systems with SSO violations would be addressed each year.

Reducing the frequency and volume of collection system overflows and backups of sewage into buildings, and improving the structural integrity of collection systems have been some of the major objectives of EPA's emphasis on wet weather discharges. Typically, an important component of strategies to reduce collection system overflows and backups into buildings is to increase the conveyance of wet weather flows to the treatment plant. The volume of wet weather flows delivered to treatment facilities can also be increased by measures that reduce exfiltration of wastewater out of a collection system. Increased wet weather flow volumes at
treatment plants, along with increased attention to water quality problems caused by wet weather flows have lead to increased attention to the manner by which POTWs manage wet weather flows.

As these issues received greater attention, regulatory agencies, municipal operators of POTWs, and representatives of environmental advocacy groups have expressed confusion over and requested clarification regarding the proper interpretation of certain regulatory provisions in the context of wet weather flow management at POTW treatment plants. Of particular concern are National Pollutant Discharge Elimination System (NPDES) permit requirements for peak wet weather discharges from a publicly owned treatment works (POTW) treatment plant when the portion of the flow that exceeds the capacity of the biological treatment units is routed around biological treatment units and blended with the flows from the biological units (or other advanced treatment units) prior to discharge. Such re-routing where the capacity of biological (or other advanced) treatment units is exceeded might be necessary to avoid damaging the treatment units. Questions have focused primarily on the situation where the final discharge of these blended waste streams would meet effluent limitations based upon the secondary treatment regulations and any more stringent limitations necessary to meet water quality standards.

Today's proposed policy may affect certain actions under consideration by NPDES permit authorities to address comprehensive sewer collection system and treatment activities by POTWs. The Agency seeks comment on what, if any, impact today's proposed policy may have on Federal or State enforcement actions under the CWA or citizen suit actions under section 505 of the Act, including assurance of implementation of the various criteria identified in the proposed interpretation and draft guidance.

After review of public comments, and following any appropriate revisions, EPA intends that ultimately such policy would provide a framework that (1) ensures appropriate management of wet weather flows at a POTW consistent with generally accepted good engineering practices and criteria for long-term design, (2) clarifies technology-based requirements (3) uses water quality-based effluent limitations to address residual site-specific health and environmental risks, and (4) provides appropriate safeguards,
including comprehensive monitoring and protection for sensitive waters.
B. Sewage Treatment Issues Associated With Wet Weather Flows

Although a number of sewage treatment processes are used to comply with Clean Water Act requirements. most municipalities typically use a series of unit operations and processes to treat wastewater prior to discharge. The typical series of unit processes includes: preliminary treatment or screening to remove large solids; primary clarification (or preliminary sedimentation) to remove floating and settleable solids; and biological treatment units (also referred to as secondary treatment units) to remove biodegradable organic pollutants and suspended solids. The most common type of conventional biological treatment unit, an activated sludge process, typically consists of aerator tanks (also called reactors) followed by separate settling basins or clarifiers. Many treatment facilities also provide disinfection to deactivate pathogens and achieve microbial water quality standards. Some facilities also provide advanced treatment which are designed to reduce constituents, such as nitrogen and phosphorus, that are not significantly removed by biological treatment processes, or are designed to provide greater solids and pathogen reductions than traditional biological treatment processes.
During periods of wet weather, flows received by a POTW's collection system and treatment facility typically increase. Significant increases in influent flow caused by wet weather conditions (e.g., due to infiltration and/or inflow of water into the collection system) can create operational challenges for treatment facilities and potentially adversely affect treatment efficiency, reliability, and control of unit process operations with a treatment plant. Activated sludge systems are particularly vulnerable to high volume peak flows. Peak flows that approach or exceed design capacity of an activated sludge unit can shift the solids inventory from the aeration basin to the clarifier(s), and can result in excessive solids losses from the clarifier(s) (i.e., wash out the biological mass necessary for treatment). The shifting of solids from an aeration basin to a clarifier diminishes treatment rates until after flows have decreased and the solids are returned to the aeration basin. If a clarifier experiences excessive loss of solids, treatment efficiencies can be lowered for weeks or months until the biological mass in the aeration basins is reestablished. In addition to these
hydraulic concerns, wastewater associated with peak flows may have low concentrations of oxygen demanding pollutants, which can also decrease treatment efficiencies.

Generally, biological treatment units are designed and operated to maintain a relatively stable population of microorganisms. See 48 FR 52258 , 52275 (November 16, 1983). This means that biological treatment units generally cannot be designed to accommodate wide variations in flow volumes and influent strength. Primary clarification units are less sensitive to variations in flow volumes and influent strength. In addition, primary clarification units can be brought into operation and taken out of operation to respond to changes in flow volume.
Many POTW treatment plants have been designed with primary treatment capacity that is significantly greater than the biological treatment capacity. These treatment plants often have multiple primary clarification units that are operated in parallel, with one or more primary clarification units not operating during low flow conditions, and brought into service during high flow
conditions. These POTWs typically provide screening and primary clarification of all flows entering the plant, and, in order to protect their biological treatment units, route flows in excess of full capacity of the biological treatment unit around the biological treatment units. In some cases, chemicals are added to the portion of the flow that is routed around the biological treatment units to enhance solids and/or pathogen removal. Another option is to provide other forms of enhanced physical/ chemical treatment for the portion of the flow that is routed around the biological units. Some POTWs discharge flows routed around biological treatment units directly to a surface water, while others blend the flows routed around the biological treatment units with flows that have gone through the biological treatment unit (e.g., for disinfection or other advanced treatment) prior to discharge.

Other design and operational options routinely employed to enhance treatment of wet weather flows without damaging biological treatment capabilities include:

- Increasing the size of secondary clarifiers to accommodate a predetermined amount of peak wet weather flow;
- Providing alternative feed patterns in the aeration basin(s);
- Increasing the returned activated sludge capacities relative to those needed for steady flow;
- Providing flow equalization (i.e. short term storage) prior to the biological unit either at the plant or before flows get to the plant; and
- Decreasing peak flow volumes through I/I removal, sewer separation or rerouting flows to a different treatment plant.
See Design of Municipal Wastewater Treatment Plants Fourth Edition, 1998, Water Environment Federal Manual of Practice 8, ASCE Manual and Report of Engineering Practice No. 76, Volume 2, page 11-5; Prevention and Control of Sewer System Overflows Second Edition, 1999, Water Environment Federation Manual of Practice FD-17. Other facilities may employ other modifications to manage peak wet weather flows. For example, some facilities divert dilute wet weather flows around primary clarifiers to the biological treatment units in order to ensure adequate organic loadings in the biological units. Given the complexity and site-specific nature of collection systems and treatment facilities, sitespecific planning processes are necessary to identify the optimal mix of peak wet weather management measures.

Many States have developed detailed design criteria and/or operating practices for municipal wastewater treatment facilities. EPA has also developed guidance on design considerations and operation of POTWs, including guidance on the composite correction program approach to identify and address performance limitations and to obtain improved performance at POTWs. EPA Technology Transfer Handbook: Retrofitting POTWs, 1989, Hegg, B.A., L.D. DeMers, and J.B. Barber. This guidance identifies specific low cost modifications that can be used to optimize an existing facility's performance which can result in significant improvements of performance at many wastewater treatment facilities without major capital improvements. Hegg, B.A., K.L. Rakness, and J.R. Schultz, 1979, A Demonstration Approach for Improving Performance and Reliability of Biological Wastewater Treatment Plants EPA 600/2-79-035, NTIS No. PB300476, USEPA, Cincinnati, OH.

## C. NPDES Requirements for POTWs

The CWA requires that most POTWs achieve effluent limitations based upon secondary treatment as defined by EPA and any more stringent limitations necessary to meet water quality standards prior to discharging to waters of the United States. NPDES permits are issued by EPA or States, U.S.
Territories, or Tribes authorized by EPA
to do so. Currently, 45 States and one U.S. Territory administer the NPDES permit program. EPA issues NPDES permits in the remaining States and Territories, and in Indian country.

## 1. Secondary Treatment Regulations

Section 301(b)(1)(B) of the Clean Water Act, 33 U.S.C. 1311 (b)(1)(B), requires that publicly owned treatment works (POTWs) achieve effluent limitations based upon secondary treatment as defined by the Administrator of EPA pursuant to section $304(\mathrm{~d})(1)$ of the Act. Section 304(d)(1) of the Act directed EPA to publish information, in terms of amounts of constituents and chemical, physical, and biological characteristics of pollutants, on the degree of effluent reduction attainable through the application of secondary treatment. Section 304(d)(4) of the Act, 33 U.S.C. 1314(d)(4), deems treatment facilities such as oxidation ponds, lagoons, ditches and trickling filters to be the "equivalent" of secondary treatment. That section directed the Administrator to provide guidance on design criteria for such facilities, taking into account pollutant removal efficiencies. Section 304(d)(4) further requires that water quality not be adversely affected by deeming such facilities to be the equivalent of secondary treatment.
EPA promulgated the secondary treatment information regulations at 40 CFR part 133 to define minimum levels of effluent quality for publicly owned treatment works (POTWs) prior to discharge. The secondary treatment regulations were based on performance data for a sample of well-designed and well-operated secondary treatment plants. The 30 -day average effluent limitations in the secondary treatment regulations were based on the 95thpercentile value of data representing well-operated POTWs, excluding values attributable to upsets, bypasses, operational errors, or other unusual conditions. With the exception of section 304(d)(4) facilities eligible for treatment equivalent to secondary treatment, the secondary treatment regulations do not otherwise specify the type of treatment process to be used to meet secondary treatment requirements nor do they preclude the use of nonbiological facilities. Rather, the basic decisions on the choice of a technology or alternative waste management technique were left to a case-by-case cost-effectiveness analysis. See 48 FR 52258, 52260 (November 16, 1983).

The requirements of the secondary treatment regulations are expressed as concentration limitations (seven-day and 30-day average effluent
concentration limitations for total suspended solids and five-day biochemical oxygen demand ( $\left.\mathrm{BOD}_{5}\right)$ ), percent removal requirements (for total suspended solids and $\mathrm{BOD}_{5}$ ), as well as a limitation on pH . The regulations require that percent removal requirements for total suspended solids (SS) and the five-day measure of biochemical oxygen demand ( $\mathrm{BOD}_{5}$ ) be determined according to a 30 -day average. The percent removal requirements were originally established to achieve two basic objectives: (1) to encourage municipalities to correct excessive I/I problems in their sanitary sewer systems, and (2) to help prevent intentional dilution of influent wastewater as a means of meeting permit limits. See 50 FR 23382 (June 3, 1985).

For most types of POTWs, the secondary treatment regulations establish a 30 -day average percent removal requirement of 85 percent for SS and $B O D_{5}$. Facilities eligible for equivalent treatment considerations under section 304(d)(4) are subject to less stringent percent removal requirements. The secondary treatment regulations provide for case-by-case adjustments to the percent removal requirements to address several special considerations. Under § $133.103(\mathrm{a})$, for treatment works that receive flows from combined sewers, the decision must be made on a case-by-case basis as to whether any attainable percentage removal level can be defined when the plant receives highly dilute influent, e.g., during wet weather flows, and, if so, what the level should be. For treatment works that receive flows from separate sewers, § $133.103(\mathrm{~d})$ authorizes the permit issuing authority to substitute a less restrictive 30-day average percent removal requirement or a mass loading limit for the percent removal requirement if the permittee demonstrates that:
(i) The treatment facility will consistently meet its permit effluent concentration limitations but its percent removal requirements cannot be met due to less concentrated influent,
(ii) to meet the percent removal requirements, the facility would have to achieve significantly more stringent limitations than would otherwise be required by concentration-based standards, and
(iii) the less concentrated influent is not the result of excessive I/I. Excessive $\mathrm{I} / \mathrm{I}$ is the quantities of $\mathrm{I} / \mathrm{I}$ that can be economically eliminated from a sewer system as determined by a costeffectiveness analysis that compares the costs for correcting the I/I conditions to
the total costs for transportation and treatment of the I/I to a treatment facility.

For these separate sanitary sewer systems, the determination of whether the less concentrated wastewater is the result of excessive $I / I$ uses the definition of excessive I/I in 40 CFR $35.2005(\mathrm{~b})(16)$ plus the additional criterion that inflow is deemed nonexcessive if the total flow to the POTW (i.e., wastewater plus inflow plus infiltration) is less than 275 gallons per capita per day. See 40 CFR 133.103(d). The 275 gallons per capita per day figure is only a threshold value, and permittees may determine that even higher values of $I / I$ are nonexcessive through a cost-effective evaluation on a case-by-case sewer system basis. See 50 FR 23384 (June 3, 1985) and 54 FR 4225 (January 27, 1989). Guidance for the cost-effectiveness analysis associated with demonstrating that $I / I$ is not excessive is provided in Sewer System Infrastructure Analysis and Rehabilitation, (EPA, 1991, EPA/625/691/030).

EPA adopted this approach to provide flexibility to address facilities experiencing various degrees of less concentrated influent that cannot meet the 85 percent removal requirement without significant additional construction, and, at the same time, encourage cost effective I/I reduction. See 40 CFR 133.101(m) and 133.103(d)(3). The approach was based on the following considerations: (1) In general, I/I programs had not been as successful in reducing excessive I/I as expected; (2) many treatment systems without excessive I/I had relatively low concentrations of $\mathrm{BOD}_{5}$ and SS in the influent; (3) certain treatment technologies could not achieve 85 percent removal under all conditions; and (4) a mandatory requirement of 85 percent removal for all POTWs could have caused overly stringent levels of treatment and use of expensive advanced treatment processes in some cases. See 50 FR 23382 (June 3, 1985).

## 2. Bypass Provision

The NPDES regulations define standard permit conditions which are to be included in all NPDES permits, except that authorized NPDES States are not precluded from omitting or modifying a standard permit condition to impose a more stringent requirement. 40 CFR 122.41 and 123.25 (note). One of those standard permit condition is the "bypass" provision at 40 CFR 122.41(m).

The bypass provision defines bypass to mean the "intentional diversion of waste streams from any portion of a treatment facility." The regulation
prohibits bypasses except for where necessary for essential maintenance to assure efficient operation. 40 CFR $122.41(\mathrm{~m})(2)$. In such cases, the bypass cannot cause effluent limitations to be exceeded. For all other bypasses, the Director of the NPDES program may take enforcement action against a permittee for a bypass, unless:
(A) Bypass was unavoidable to prevent loss of life, personal injury, or severe property damage:
(B) There were no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated wastes, or maintenance during normal periods of equipment downtime. This condition is not satisfied if adequate back-up equipment should have been installed in the exercise of reasonable engineering judgment to prevent a bypass which occurred during normal periods of equipment downtime or preventative maintenance; and
(C) The permittee submitted the required notices. 40 CFR 122.41(m)(4)(i).

In order to satisfy the "no feasible alternatives" criterion, adequate backup equipment should be installed in the exercise of reasonable engineering judgment to prevent a bypass. 40 CFR $122.41(\mathrm{~m})(4)(\mathrm{i})(\mathrm{B})$. The "no feasible alternatives" provision of 40 CFR $122.41(\mathrm{~m})$ requires, among other things, that consideration be given to the feasibility of additional construction to prevent any bypasses that occur because of inadequate capacity. See United States v. City of Toledo, Ohio 63 F.Supp.2d 834 (N.D. Ohio 1999). The regulation at $40 \mathrm{CFR} 122.41(\mathrm{~m})$ also provides that the Director of the NPDES program may approve an anticipated bypass, after considering its adverse effects, if the Director determines that it will meet the three conditions listed in the bypass provision at 40 CFR $122.41(\mathrm{~m})(4)(\mathrm{i})$. As discussed below, EPA provided guidance on approval of anticipated bypasses at POTWs served by combined sewers in the 1994 Combined Sewer Overflow (CSO) Control Policy. An approved anticipated bypass would be a recognition that the permitting authority had considered the adverse impacts of the bypass and has found that the bypass would or does meet the criteria of $40 \mathrm{CFR} 122.41(\mathrm{~m})(4)(\mathrm{i})(\mathrm{A})$, (B) and (C), and would not take enforcement action against a permittee for the bypass. Compliance with 40 CFR 122.41(m)(4)(i), in and of itself, would not shield a permittee from citizen suits for conducting a prohibited bypass. Southern Ohio Coal Company v. Office of Surface Mining, Reclamation and

Enforcement, 20 F.3d 1418, 1427 (6th Cir. 1994).
The bypass regulation does not dictate that any specific treatment technology be employed. Instead, the regulation requires that a system be operated as designed and according to the conditions of the NPDES permit. See NRDC v. EPA, 822 F. 2 d 104, 123 (D.C. Cir. 1987). For example, seasonal effluent limitations which allow the facility to shut down a specific pollution control process during certain periods of the year are not considered to be a bypass provided the variation in effluent limits is accounted for and recognized in the permit which allows a facility to dispense with some unit processes under certain conditions. See 49 FR 37998, 38037 (September 26, 1984).

As noted earlier, all NPDES permits are required to contain a prohibition on bypasses consistent with or more stringent than 40 CFR $122.41(\mathrm{~m})$. See 40 CFR 123.25 (note). The bypass provision at 40 CFR $122.41(\mathrm{~m})$ defines bypass to mean the intentional diversion of waste streams from any portion of a treatment facility. However. the term "treatment facility" is not defined in the bypass regulation. Today's action requests public comment on: (1) A proposed interpretation of the bypass regulations regarding the term "treatment facility" as it relates to the treatment plant at a POTW; and (2) draft guidance on how NPDES authorities can characterize the "treatment facility" in a specific permit for a POTW treatment plant to account for the flow routing scenario. The Agency's proposed policy would be restricted to POTW treatment plant discharges under peak wet weather conditions where flows in excess of the biological or advanced treatment units are routed around the biological or advanced treatment units and blended with the wastewaters from the biological units (or other advanced treatment units) prior to discharge, and where the final discharge would meet effluent limitations based upon the secondary treatment regulations and any more stringent limitations necessary to meet water quality standards.

## 3. Combined Sewer Overflow Control Policy

EPA has provided guidance on the planning, selection and implementation of controls to meet technology- and water quality-based requirements for CSOs under the NPDES program in the National CSO Control Strategy, 54 FR 37370 (September 8, 1989), and the CSO Control Policy, 59 FR 18688 (April 19, 1994). The 1994 CSO Control Policy provides comprehensive guidance for
developing site-specific NPDES permit requirements for combined sewer systems to address wet weather CSO discharges from designed overflow points. The Wet Weather Water Quality Act of 2000 amended the CWA to provide that each permit, order or decree issued after December 15, 2000, for a discharge from a municipal combined sewer shall conform to the CSO Control Policy. 33 U.S.C. 1342(q)(1).
Under the CSO Control Policy, permittees with combined sewer systems were to immediately undertake a process to accurately characterize their sewer systems, to demonstrate implementation of nine minimum controls identified in the Policy, and to develop and implement a long-term CSO control plan that would ultimately provide for compliance with the requirements of the CWA. See 59 FR 18688 (April 19, 1994). The CSO Control Policy identifies EPA's major objectives for long-term control plans.
When developing the CSO Control Policy, EPA recognized that some POTW treatment plants may have primary treatment capacity in excess of their biological treatment capacity. See 59 FR 18693, column 2. The Policy indicates that one effective strategy to abate pollution resulting from CSOs is to maximize the delivery of flows during wet weather to the POTW treatment plant for treatment. This strategy can maximize the use of available POTW facilities for wet weather flows and ensure that combined sewer flows receive at least primary treatment prior to discharge. In addition, this strategy may enable the permittee to eliminate or minimize overflows to sensitive areas. In recognition of the significant water quality benefits of maximizing flow to the POTW treatment plant, the CSO Control Policy includes it as a minimum element of a long-term control plan.
To further the objective of maximizing treatment at the POTW treatment plant, the CSO Control Policy provides guidance on the use of an NPDES permit to recognize approval of anticipated bypasses where the criteria of the bypass provision for such approvals are met. The CSO Control Policy clarifies that normally it is the responsibility of the permittee to document, on a case-bycase basis, compliance with 40 CFR $122.41(\mathrm{~m})$ in order to have an anticipated bypass approved in a permit. The Policy indicates that for some CSO-related permits, the study of feasible alternatives in the long-term control plan, along with other information in the permit record, may provide sufficient support for approval
of a CSO-related bypass in the permit, and to define the specific parameters under which a bypass can be approved. The Policy provides that where a permit includes an approval of a CSO-related bypass, the permit would define the specific wet weather conditions under which a CSO-related bypass would be allowed and would also specify what treatment, monitoring, and effluent limitations would apply to the bypass flow.

The Policy provides that permits with approved bypasses should also make it clear that all wet weather flows passing the headworks of the POTW treatment plant will receive at least primary clarification, solids and floatables removal and disposal, and disinfection where necessary, and any other treatment that can reasonably be provided.

The CSO Policy further indicates that the "no feasible alternatives" requirement of the bypass regulation can be met if the record shows that the secondary treatment system is properly operated and maintained, that the system has been designed to meet secondary limits for flows greater than the peak dry weather flow, plus an appropriate quantity of wet weather flow, and that it is either technically or financially infeasible to provide secondary treatment at the existing facilities for greater amounts of wet weather flow. See 59 FR 18694, column 3. The feasible alternative analysis should include, for example, consideration of enhanced primary treatment-e.g., chemical addition and non-biological secondary treatment. Id. Other bases supporting a finding of "no feasible alternatives" may also be available on a case-by-case basis. As part of its consideration of possible adverse effects resulting from the bypass, the permitting authority should also ensure that the bypass will not cause exceedances of water quality standards. Id.

## D. Water Quality Criteria for Bacteria

In 1986, EPA published Ambient Water Quality Criteria for Bacteria1986, which contained EPA's recommended water quality criteria for bacteria for protection of bathers from gastrointestinal illness in recreational waters. The water quality criteria established levels of indicator bacteria, namely Escherichia coli (E. coli) and enterococci, that demonstrate the presence of fecal pollution and which should not be exceeded in order to protect bathers in fresh and marine recreational waters. Prior to its 1986 recommendations, EPA recommended specific levels of fecal coliforms to be
used as the indicator organism to protect bathers from gastrointestinal illness in recreational waters.
The data supporting the 1986 bacteria water quality criteria were obtained from a series of epidemiological studies that examined the relationship between swimming-associated illness (namely, acute gastrointestinal illness) and the microbiological quality of the waters used by recreational bathers. The epidemiological studies demonstrated that fecal coliforms, the indicator originally recommended in 1968 by the Federal Water Pollution Control Administration of the Department of Interior, are correlated less strongly with swimming-associated gastroenteritis than other possible indicator organisms. Two indicator organisms, E. coli and enterococci, exhibited a strong correlation to swimming-associated gastroenteritis, the former in fresh water only and the latter in both fresh and marine waters. The strong correlation is due to the indicator organisms being more similar to many of the pathogens of concern in their ability to survive treatment and in the environment. Enterococci are also resistant to saline environments, enhancing their utility as an indicator in marine waters. In addition, E.coli and enterococci are less frequently found than fecal coliforms in environmental settings where fecal contamination is known to be absent.

The Beaches Environmental Assessment and Coastal Health (BEACH) Act was enacted on October 10, 2000. Public Law 106-284, 114 Stat. 870 (2000). The BEACH Act addresses pathogens and pathogen indicators in coastal recreation waters. Among other things, the BEACH Act added section 303 (i) to the Clean Water Act to require States and Tribes with coastal (and Great Lake) recreation waters to adopt new or revised water quality standards by April 10, 2004, for pathogens and pathogen indicators for which EPA has published criteria under section 304(a). The BEACH Act also directs EPA to promulgate standards for States and Tribes that fail to adopt standards for pathogens and pathogen indicators for coastal recreation waters that are as protective of human health as those published by EPA.

## III. Proposed Policy

EPA has received requests from many stakeholders to clarify the NPDES requirements for discharges from POTWs where peak wet weather flow is routed around biological treatment units and then blended with the effluent from the biological units prior to discharge where the final discharge meets permit effluent limitations based on the
secondary treatment regulation (40 CFR part 133) or any more stringent limitations necessary to attain water quality standards. Today's proposed policy has two components, (1) a proposed interpretation of the bypass provision ( 40 CFR 122.41 (m)) as it applies to alternative wet weather treatment scenarios at POTW treatment plants that involve blending; and (2) draft guidance on how such an interpretation should be implemented. EPA requests comments on both the proposed interpretation and the draft guidance.
Peak wet weather discharges from POTWs that consist of effluent routed around biological or other advanced treatment units blended together with the effluent from the biological units (or from other advanced treatment units) prior to discharge would not be a prohibited bypass and could be authorized in an NPDES permit if all of the following principles were followed:

1. The final discharge meets effluent limitations based on the secondary treatment regulation ( 40 CFR part 133), including applicable 30 -day average percent removal requirements, or any more stringent limitations necessary to attain water quality standards. For treatment works served by sanitary sewers, the Director of the NPDES permit program may substitute lower 30-day average percent removal requirements or a mass loading limit for the percent removal requirement only if the permittee demonstrates the criteria in § 133.103(d) are met, including that the less concentrated influent is not the result of excessive I/I. For treatment works served by combined sewers, §133.103(a) provides that the decision must be made on a case-by-case basis as to whether any attainable percentage removal level can be defined during wet weather flows, and, if so, what the level should be.
2. The NPDES permit application for the POTW provides notice of, and specifically recognizes, the treatment scenario that would be used for peak flow management. The treatment scenario, including designed capacity of various units, should be consistent with generally accepted practices and longterm design criteria, and designed to ensure that discharges meet effluent limitations based on the secondary treatment regulation and any more stringent limitations necessary to meet water quality standards (including limitations necessary to meet applicable total maximum daily loadings). The application of the generally accepted practices and long-term design criterion typically would include an evaluation of changes to the base and peak design
flows at the treatment plant from the time the peak flow treatment scenario was last recognized by the NPDES authority, and, if circumstances have materially and substantially changed, an evaluation of the cost-effectiveness of a reasonable range of alternatives, which may entail construction of facilities to provide additional wet weather capabilities, such as equalization and/or storage facilities, or high-efficiency physical/chemical treatment for diverted flows. The application of the generally accepted practices and longterm design criterion should be reevaluated as circumstances change materially and substantially, and at permit reissuance. Any permit issued after EPA evaluates public comments received and takes further action on today's proposed policy should specifically recognize or incorporate by reference the treatment scenario that would be used for peak flow management. EPA notes that requiring documentation of the treatment scenario in the permit would ensure that EPA would have an opportunity to review the documentation during its review of permits issued by an authorized NPDES State. In addition, the public would have an opportunity to review and comment on the specific conditions under which blending would be authorized prior to final approval and issuance of the permit.
3. The treatment scenario that would be used for peak flow management should provide, prior to blending, at least the equivalent of primary clarification for the portion of flow routed around biological or other advanced treatment units.
4. The peak flow treatment scenario chosen by the permittee for use when flows exceed the capacity of storage/ equalization units, biological treatment units or advanced treatment units should be operated as it is designed to be operated and in accordance with the treatment scenario reflected in the permit record and conditions set forth in the permit. A portion of the flow should only be routed around a biological or advanced treatment unit when the capacity of the treatment unit is being fully utilized. Additionally, for permits issued after EPA evaluates public comments received and takes further action on today's proposed policy, such a peak flow treatment scenario should only be used when flows exceed the capacity of storage/ equalization units based on generally accepted good engineering practices and long-term design criteria aimed at protecting the structural integrity and function of the treatment units and
under the specific circumstances recognized in the permit.
5. The permit must require monitoring, including type, interval and frequency sufficient to yield data which are representative of the final blended discharge to ensure compliance with applicable water quality-based effluent limitations. See 40 CFR 122.48(b). The permit should require reporting of the date and volume of blended discharges along with appropriate pollutant parameter concentrations. In addition, the permit should ensure that permittees develop additional information to support the development of water quality-based effluent limitations in subsequent permits, including information to: (a) Assess potential water quality impacts associated with blended effluent; (b) evaluate the effectiveness of the treatment of key parameters, such as pathogens, resulting from alternative flow routing scenarios; and (c) characterize ambient levels of such pollutant parameters.
6. The permit must require, at a minimum, that the permittee properly operate and maintain all parts of the collection system over which the permittee has operational control in a manner consistent with 40 CFR 122.41(e). For POTWs served by combined sewers, any permit issued after December 15,2000 , shall conform to the provisions of the 1994 CSO Control Policy, including the development and implementation of a long-term control plan (LTCP), and appropriate requirements for the collection system. As applied to POTWs serving separate sanitary sewers, EPA would interpret "proper operation and maintenance" to include appropriate removal of infiltration and inflow from parts of the collection system over which the permittee has operational control as well as measures to evaluate the structural integrity of the system. Such a demonstration may be made with a program self-evaluation report, appropriate to the size of the system, which includes an identification of program deficiencies and steps to respond to them.

In situations where one or more of the above principles would not be met, EPA would continue to interpret the
"intentional diversion of waste streams from any portion of a treatment facility" at a POTW treatment plant to be a bypass subject to the restrictions of the bypass provision as reflected in the permit. The proposed policy upon which EPA invites comment today is not intended to modify the provision for approval of anticipated bypasses at 40

CFR 122.41(m)(4)(ii). See 59 FR 18693 , column 3.

The principles described above for characterizing the "treatment facility" at a POTW plant (as it relates to the bypass provision) are not intended to address or apply to NPDES permit requirements for treatment of flows at a POTW during dry weather conditions or to discharges from facilities other than POTW plants, including industrial facilities where storm water is treated with non-storm water wastewater. The matters addressed in today's action focus on situations with elevated I/I levels in municipal collection system resulting from wet weather conditions. EPA has not evaluated and does not propose to interpret its regulations to apply to other circumstances.
EPA requests comment on the use of the six principles listed above to define the conditions under which the blending of effluent routed around the biological treatment unit with effluent from the biological treatment unit. prior to discharge would not be a prohibited bypass and could be authorized in an NPDES permit. EPA specifically requests comment on the following issues:
(1) Is the current interpretation of "excessive I/I" under 40 CFR 133.103(d) adequate? What challenges, if any, would facilities face in meeting the percent removal requirements or obtaining an adjustment to percent removal requirements under §133.103(d), including the excessive I/ I provisions, as a pre-condition for authorization of blending in an NPDES permit?
(2) In principle 4, which would require that flow only be routed around the biological or advanced treatment unit when the capacity of treatment and storage units is being fully utilized, should EPA define the term "fully utilized'? Are there situations where system operators might need to keep some treatment or storage capacity in reserve, for example, to help prevent overflows or address other peak flow concerns where exceedences of treatment capacity is likely but has not yet occurred? If so, the commenter should describe the situations.
(3) Principle 5 of this draft policy is designed to ensure compliance with applicable water quality-based effluent limitations, including those based on water quality criteria for bacteria. Would this principle be sufficient to protect against discharges of pathogenic organisms or should principle 5 of this draft policy include an explicit requirement for disinfection of blended effluent prior to discharge, where appropriate?
(4) In developing principle 6, what factors should be considered when evaluating if a permittee is properly operating and maintaining their collection system in a manner consistent with 40 CFR $122.41(\mathrm{e})$ ? Additional considerations for permit writers addressing POTW plants that use peak flow treatment scenarios that consist of effluent routed around biological or other advanced treatment units blended together with the effluent from the biological units prior to discharge should include:
A. To the extent practicable, NPDES permit requirements for discharges of peak wet weather flows at the POTW should be developed in a manner that encourages the permittee to consider the relationship between the performance of the collection system and the performance of treatment plants serving the system.
B. Any POTW receiving wastes from an industrial user to which a categorical pretreatment standard applies may, at its discretion and subject to the conditions of 40 CFR 403.7, grant removal credits to reflect removal by the POTW of pollutants specified in the categorical pretreatment standard. The POTW may grant a removal credit equal to or, at its discretion, less than its consistent removal rate. The permit writer should ensure that the POTW's determination of the consistent removal rate adequately reflects the frequency of use of and treatment effectiveness of the peak flow treatment scenarios in a manner that is consistent with 40 CFR 403.7(b). In a similar manner, the permit writer should ensure that the POTW adequately reflects the frequency of use of and treatment effectiveness of the peak flow treatment scenarios in developing local limits for industrial users.

## C. NPDES Permit Conditions That Are Clear and Enforceable.

Under the interpretation proposed today, NPDES authorities would be able to characterize the term "treatment facility" in a specific permit for a POTW treatment plant to account for peak flow treatment scenarios that are consistent with generally accepted good engineering practices and criteria for long-term design in a manner consistent with the principles previously identified. Where all of the identified principles are followed, flows through a treatment system that is operated as designed and according to the permit would not be considered a bypass, and the permittee would not be required to make each of the demonstrations otherwise required under the bypass provision at $40 \mathrm{CFR} 122.41(\mathrm{~m})(4)(\mathrm{i})$,
including a demonstration that there were no feasible alternatives to the bypass.

Where a POTW treatment facility has multiple primary clarification units operating in parallel to provide excess primary treatment capacity for high flow conditions, removing one or more primary clarification units from operation during low flo conditions would not be considered a bypass provided the capacity of the primary clarification units remaining in operation is not exceeded. Similarly, where chemical addition is used to enhance wet weather treatment performance (i.e., to enhance solids removal or disinfection), discontinuing chemical addition during low flow conditions would not be considered a bypass if the permit does not call for such chemical addition during low flow conditions.

The NPDES regulations require that NPDES permits must include water quality-based effluent limitations to control all pollutants or pollutant parameters which the Director of the NPDES program determines are or may be discharged at a level which will cause, have the reasonable potential to cause, or contribute to non-attainment of any water quality standard (see 40 CFR 122.44(d)). The potential impact of either blended peak wet weather flows discharged from POTWs or peak wet weather flows that receive biological treatment may raise a number of sitespecific water quality issues depending on the performance of treatment technologies under peak flow conditions, the volume of discharges, receiving water conditions, the uses of receiving waters and other factors. Ensuring appropriate characterization of potential human health and environmental risks associated with peak flows with enhanced effluent and ambient monitoring data describing peak flow conditions is important for discharges to receiving waters with designated uses for primary contact recreation and/or drinking water. Additional information may be needed to determine if POTW discharges that occur under peak wet weather flow conditions would cause, have a reasonable potential to cause, or contribute to non-attainment of a water quality standard. Modeling of the collection system, treatment facility and receiving water may be necessary to characterize the impact of peak wet weather flows on receiving water quality and to predict the improvements that would result from different treatment scenarios.

The NPDES regulations authorize permitting authorities to modify permits
for cause. See 40 CFR 122.62 and 124.5. In addition, permits often contain a reopener clause. Examples include general reopener clauses that mirror the causes for modification in the NPDES regulations. Permits also often contain specific reopener clauses for the purpose of modifying conditions based on results of specific pollutant monitoring required in the permit, such as for toxic pollutants. EPA requests comment on whether permits that authorize blending should contain a specific reopener clause. Such a reopener clause could address situations where additional controls are necessary to assure attainment of water quality standards or where new monitoring information justifies the application of different permit conditions.

One of EPA's highest priorities in developing control strategies for wet weather discharges is ensuring adequate control of such discharges to sensitive receiving waters. Sensitive receiving waters, as determined by the NPDES authority in coordination with State and Federal agencies, as appropriate, include: Designated Outstanding National Resource Waters; National Marine Sanctuaries; waters with threatened or endangered species (and associated habitat;) waters with primary contact recreation (e.g., beaches and other points of public access); public drinking water intakes or their designated protection areas; and shellfish beds. See the 1994 CSO Control Policy (59 FR 18688, April 19, 1994). Wherever physically possible and economically achievable, discharges of blended effluent to a sensitive area should not be authorized, except where prohibiting the discharge of blended effluent would provide less environmental protection than additional treatment. Where elimination of the discharge of blended effluent to a sensitive receiving water is not physically possible and economically achievable, the permitting authorities must ensure an adequate demonstration that the discharge will not cause or have reasonable potential to cause or contribute to non-attainment of applicable water quality standards. For such discharges, each subsequent permit term should require a reassessment based on new or improved techniques, or on changing circumstances that influence economic achievability.

EPA strongly encourages States that have not already done so to adopt the recommendations set forth in Ambient Water Quality Criteria for Bacteria1986 or other protective water quality criteria for bacteria based on scientifically defensible methods as
their water quality standards to replace water quality standards based on total or fecal coliforms.

Today's proposed policy would provide guidance to EPA Regional and State permitting authorities as well as to municipal permittees and the general public on how EPA intends to exercise its discretion in implementing the statutory and regulatory provisions related to discharges from POTWs where peak wet weather flow is routed around biological treatment units and then blended with the effluent from the biological units prior to discharge and where the final discharge meets permit effluent limitations based on the secondary treatment regulation (40 CFR part 133) or any more stringent limitations necessary to attain water quality standards. The guidance is designed to implement national policy on these issues.

The statutory provisions and EPA regulations described in this document contain legally binding requirements. Today's document would not substitute for those provisions or regulations, nor is it intended to be a regulation itself. In fact, today's action invites public comment on a proposed interpretation of EPA regulations in a specific context and invites comment on guidance to implement such a proposed interpretation. Thus, this document would not impose legally binding requirements on EPA, States, or the regulated community, and may not apply to a particular situation based upon the circumstances. EPA and State decisionmakers would retain the discretion to adopt approaches on a case-by-case basis that differ from this proposed policy where appropriate. Any decisions regarding a particular facility should be made based on the statute and regulations. Therefore, interested parties are free to raise questions and objections about the substance of this proposed policy and the appropriateness of the application of this proposed policy to a particular situation. EPA intends to and States should, consider whether or not the recommendations or interpretations in the proposed policy are appropriate in that situation. EPA may revise today's proposed policy after consideration of public comment, or at some other time in the future. EPA welcomes public comments on this document and will consider those comments in any future revision of today's proposed policy.

EPA's intention is to reduce confusion regarding appropriate consideration of blending at POTWs. Because of significant interest from various stakeholders, the Agency is inviting public comment on the proposed policy, including the proposed interpretation of

EPA regulations. To date, EPA has not established a national policy (either through rulemaking or through nonbinding guidance to assist in the interpretation of the bypass regulation) regarding whether and under what circumstances wet weather blending at a POTW plant would not constitute a bypass. Prior to today's action, permitting agencies have interpreted and applied the bypass regulation on a case-by-case basis according to the facts and circumstances presented by a particular POTW. Therefore, by today's action, EPA also invites comment on whether or not it should conduct rulemaking to implement the proposed policy, specifically, whether the Agency should revise the text of the regulations specifically to address the matters discussed in today's proposal.

Dated: November 3, 2003.
G. Tracy Mehan, III,

RIN 0648-AQ93

## International Fisheries; Pacific Tuna

 Fisheriesagency: National Marine Fisheries Service (NMFS), NationalOceanic and Atmospheric Administration (NOAA), Commerce.
ACTION: Proposed rule; 2003 management measures for tuna purse seine fisheries in the Eastern Pacific Ocean

SUMMARY: NMFS proposes this rule to implement the 2003 management ineasures to prevent overfishing of eastern tropical Pacific Ocean (ETP) tuna stocks, consistent with recommendations by the Inter-American Tropical Tuna Commission (IATTC) that have been approved by the Department of State (DOS) under the Tuna Conventions Act. The purse seine fishery for tuna in a portion of the Convention Area would be closed for the month of December, 2003. This action is taken to limit fishing mortality caused by purse seine fishing in that portion of the Convention Area and contribute to long-term conservation of
the tuna stocks at levels that support healthy fisheries.
DATES: Comments must be submitted in writing by November 19, 2003.
ADDRESSES: Copies of the regulatory impact review/regulatory analysis may be obtained from the Southwest Regional Administrator, Southwest Region, NMFS, 501 W. Ocean Blvd., Long Beach, CA 90802-4213.
FOR FURTHER INFORMATION CONTACT: Svein Fougner, Sustainable Fisheries Division, Southwest Region, NMFS, 562-980-4040.
This Federal Register document is also accessible via the Internet at the Office of the Federal Register's website at http://www.access.gpo.gov/su-docs/ aces/aces140.html.

## SUPPLEMENTARY INFORMATION: The

United States is a member of the IATTC, which was established under the Convention for the Establishment of an Inter-American Tropical Tuna
Commission signed in 1949. The IATTC was established to provide an international arrangement to ensure the effective international conservation and management of highly migratory species of fish in the Convention Area. The IATTC has maintained a scientific research and fishery monitoring program for many years and annually assesses the status of stocks of tuna and the fisheries to determine appropriate harvest limits or other measures to prevent overexploitation of the stocks and promote viable fisheries. The Convention Area is defined to include waters of the eastern tropical Pacific Ocean bounded by the coast of the Americas, the $40^{\circ} \mathrm{N}$. and $40^{\circ} \mathrm{S}$. parallels, and the $150^{\circ} \mathrm{W}$. meridian. Under the Tuna Conventions Act, NMFS must publish proposed rules to carry out IATTC recommendations that have been approved by DOS. The Southwest Regional Administrator, also is required by rules at 50 CFR 300.29(b)(3) to issue a direct notice to the owners or agents of all U.S. purse seine vessels that operate in the ETP of actions recommended by the IATTC and approved by the DOS.

At its annual meeting held on June 25-27, 2003, the IATTC provisionally adopted a resolution dealing with conservation of ETP tuna stocks. However, one Party to the IATTC indicated that it would have to obtain higher level concurrence before it could officially agree to those measures and ultimately indicated it could not agree. The IATTC then held another meeting October 6-7, 2003, and agreed to measures for 2003. The IATTC agreed to recommend that purse seine fishing for tuna be prohibited in December 2003 in
waters bounded by a line from the point where the $95^{\circ} \mathrm{W}$. long. meridian intersects the west coast of the Americas, south to $10^{\circ} \mathrm{S}$. lat, then west to $120^{\circ} \mathrm{W}$. long., then south to $5^{\circ} \mathrm{S}$. lat., then east to $100^{\circ} \mathrm{W}$. long., then north to $5^{\circ} \mathrm{N}$. lat., then east to $85^{\circ} \mathrm{W}$. long., and then north to the point of intersection with the west coast of the Americas. This is a smaller closure than originally agreed to but will target fishing which has higher catches of juvenile tuna. Thus, there should be improved yields from the stocks later in the year. The IATTC action came after considering a variety of measures, including the use of quotas and partial fishery closures as in 1999, 2000, and 2001 and the full month purse seine closure used in 2002. In addition, the IATTC agreed to broader measures for 2004, which NMFS will consider in a future rulemaking, including a 6-week closure of all purse seine fisheries in the eastern Pacific Ocean beginning August 1, 2004, and limitation of longline fisheries to the bigeye tuna catch levels achieved in 2001. This approach should provide protection against overfishing of the stocks in a manner that is fair, equitable and readily enforceable. The DOS has approved this recommendation.

The proposed 2003 time/area closure is based on 2003 assessments of the condition of the tuna stocks in the ETP and historic catch and effort data for different portions of the eastern Pacific Ocean, as well as records relating to implementation of quotas and closures in prior years. To ensure the continued health of the stocks, the IATTC recommended and the DOS approved a closure in a portion of the Convention Area for the month of December 2003. The closure is targeted to areas with high catches of bigeye tuna in the purse seine fishery and, together with agreed upon restriction for 2004, is believed by the IATTC scientific staff to be sufficient to reduce the risk of overfishing of that stock, especially when considered in combination with the measures recommended for 2004. The IATTC will meet in June 2004 and review new tuna stock assessments and fishery information and will consider that new information in evaluating the need for management measures for 2005 and future years.

The Acting Regional Administrator, Southwest Region, sent a notice October 10, 2003, to owners and agents of U.S. tuna purse seine fishing vessels of the actions that were recommended by the IATTC and have been approved by the DOS.

## Classification

This action is authorized by the Tuna Conventions Act, 16 U.S.C. 951-961 and 971 et seq.
On December 8, 1999, NMFS prepared a biological opinion (BO) assessing the impacts of the fisheries as they would operate under the regulations ( 65 FR 47, January 3, 2000) implementing the International Dolphin Conservation Program Act (IDCPA). NMFS concluded that the fishing activities conducted under those regulations are not likely to jeopardize the continued existence of any endangered or threatened species under the jurisdiction of NMFS or result in the destruction or adverse modification of critical habitat. This rule will not result in any changes in the fisheries such that there would be impacts beyond those considered in that BO. The IATTC has also taken action to reduce sea turtle injury and mortality from interactions in the purse seine fishery so impacts of the fisheries should be lower than in the past. Because this closure does not alter the scope of the fishery management regime analyzed in the IDCPA rule, or the scope of the impacts considered in that consultation, NMFS is relying on that analysis to conclude that this rule will not likely jeopardize the continued existence of any endangered or threatened species under the jurisdiction of NMFS or result in the destruction or adverse modification of critical habitat. Therefore, NMFS has determined that additional consultation is not required for this action.

The eastern Pacific Ocean tuna purse seine fisheries occasionally interact with a variety of species of dolphin, and dolphin takes are authorized and managed under the IDCPA. These quotas do not affect the administration of that program, which is consistent with section 303(a)(2) of the Marine Mammal Protection Act (MMPA). Therefore, this rule is consistent with the MMPA.

This proposed rule has been determined to be not significant for the purposes of Executive Order 12866.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities as follows:
The purpose of this action is to prohibit the use of purse seine gear to harvest tuna in a portion of the Convention Area in December 2003, consistent with the October 2003 IATTC recommendation. The closure is intended to promote conservation of tuna stocks by eliminating purse seine fisling
mortality by vessels from all parties to the IATTC. The proposed closure would apply to the U.S. tuna purse seine fleet, which consists of $10-20$ small vessels (carrying capacity below 400 short tons ( 363 metric tons)) and 4-6 large vessels (carrying capacity 400 short tons ( 363 metric tons) or greater). The large vessels generally fish outside U.S. waters and deliver their catch to foreign ports or transship to processors outside the mainland United States. The large vessels are categorized as large business entities (revenues in excess of $\$ 3.5$ million per year). The closure should not significantly affect their operations as they are capable of fishing in other areas that would remain open. The small vessels are categorizes as small business entities (revenues below $\$ 3.5$ million per year). They fish in the U.S. exclusive economic zone most of the year for small pelagic fish (Pacific sardine, Pacific mackerel) and for market squid in the winter. However, some small vessels harvest tuna seasonally when they are available, usually late in the summer and early fall. The proposed time/area closure should have little effect on small vessels because there is little tuna fishing by small vessels in that time/area stratum. The small vessel fleet should not be affected by the time/area closure as the closed waters are out of the range of almost all the small vessels. In addition, the sniall vessels will be able to target market squid or sardine in December as is their normal pattern. As a result, an Initial Regulatory Flexibility Analysis was not prepared.
Authority: 16 U.S.C. 951-961 and 971 et seq.
Dated: November 4, 2003.
William T. Hogarth,
Assistant Administrator for Fisheries,
National Marine Fisheries Service.

## DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 660
[I.D. 110303A]
RIN 0648-AR35
Fisheries off West Coast States and in the Western Pacific; Notice of Availability of FMP Amendment
agency: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.
ACTION: Notice of availability of an amendment to a fishery management plan; request for comments.
SUMMARY: NMFS announces that the Pacific Fishery Management Council (Pacific Council) has submitted

Amendment 16-2 to the Pacific Coast Groundfish Fishery Management Plan (FMP) for Secretarial review. Amendment $16-2$ would amend the FMP to include overfished species rebuilding plans for lingcod, canary rockfish, darkblotched rockfish, and Pacific ocean perch (POP). Amendment $16-2$ is intended to address the requirements of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) to protect and rebuild overfished species managed under a Federal FMP. Amendment $16-$ 2 is also intended to partially respond to a Court order in which NMFS was ordered to provide Pacific Coast groundfish rebuilding plans as FMPs, FMP amendments, or regulations, per the Magnuson-Stevens Act.
DATES: Comments on Amendment 16-2 must be received on or before January 6, 2004.
addresses: Comments on Amendment 16-2 or supporting documents should be sent to D. Robert Lohn, Administrator, Northwest Region, National Marine Fisheries Service, Sand Point Way NE., BIN C15700, Seattle, WA 98115-0070, attn: Becky Renko

Copies of Amendment 16-2 and the Environmental Impact Statement/ Regulatory Impact Review/Initial Regulatory Flexibility Analysis for the amendment are available from Donald McIsaac, Executive Director, Pacific Fishery Management Council, 7700 NE Ambassador Place, Portland, OR 97220.

## FOR FURTHER INFORMATION CONTACT:

Becky Renko (Northwest Region,
NMFS), phone: 206-526-6150; fax; 206-526-6736 and e-mail:
becky.renko@noaa.gov.

## SUPPLEMENTARY INFORMATION:

## Electronic Access

This Federal Register document is also accessible via the internet at the website of the Office of the Federal Register: http://www.gpoaccess.gov/fr/ index.html.

## Background

The Magnuson-Stevens Act requires each regional fishery management council to submit fishery management plans or plan amendinents to NMFS for review and approval, disapproval, or partial approval. The Magnuson-Stevens Act also requires NMFS, immediately upon receiving a fishery management plan or plan amendment, to publish notification in the Federal Register that the fishery management plan or plan amendment is available for public review and comment. At the end of the comment period, NMFS considers the public comments received during the
comment period described above in determining whether to approve, partially approve, or disapprove the fishery management plan or plan amendment.

NMFS declared the POP and lingcod stocks overfished on March 3. 1999. This was followed by canary rockfish, which was declared overfished on January 4, 2000 ( 65 FR 221) and darkblotched rockfish, which was declared overfished on January 11, 2001 (66 FR 2338). Because the spawning stock biomass levels for these stocks were determined to be below the minimum stock size threshold defined by the FMP, rebuilding plans had to be implemented to return the stocks to their maximum sustainable yield biomass levels (target biomass). Amendment $16-2$, would revise the FMP to include overfished species rebuilding plans for lingcod, canary rockfish, darkblotched rockfish, and POP.

The rebuilding plans being adopted under Amendment 16-2 were approved by the Pacific Council at its June 2003 meeting. These rebuilding plans specify rebuilding parameters for individual stocks and are intended to address the Magnuson-Stevens Act requirement to protect and rebuild overfished species, in particular National Standard 1 on overfishing and section 304(e). When making the recommendation to implement these rebuilding plans, the Pacific Council sought to balance the rebuilding risks to each stock with the short and long-term socio-economic costs borne by groundfish buyers, commercial harvesters, and recreational operators as a result of constraining the fisheries to reduce total mortality of these overfished species.

On August 18, 2003 ( 68 FR 49415), NMFS published a notice of availability for Amendment 16-1 to the FMP. Amendment 16-1 will amend the FMP to require that Pacific Coast groundfish overfished species rebuilding plans be added into the FMP via FMP amendment, and then implemented through Federal regulations. For each approved overfished species rebuilding plan, the following parameters are to be specified in the FMP: estimates of unfished biomass and target biomass, the year the stock would be rebuilt in the absence of fishing, the year the stock would be rebuilt if the maximum time period permissible under the National Standard Guidelines were applied, and the target year in which the stock would be rebuilt under the adopted rebuilding plan.

As required by the standards proposed in Amendment 16-1, the rebuilding plans under Amendment 162 for lingcod, canary rockfish, darkblotched rockfish, and POP include estimates of unfished biomass and target biomass, the year the stock would be rebuilt in the absence of fishing, the year the stock would be rebuilt if the maximum time period permissible under the National Standard Guidelines were applied, and the target year in which the stock would be rebuilt under the adopted rebuilding plan for each species. Amendment 16-2 would add these parameters to section 4.5.4. of the FMP. Other relevant information on each of these overfished stocks, such as stock distribution, fishery interaction, and the rebuilding strategy would also be added to section 4.5 .4 of the FMP. The information described above would be included in the FMP to serve as management benchmarks.

NMFS plans to publish a proposed rule that would codify in Federal regulations the two rebuilding parameters needed to establish annual or biannual optimum yields (OYs). These parameters are the target year for rebuilding and the harvest control rule that is to be used during the rebuilding period. The target rebuilding year is the year the stock will have been rebuilt under the adopted rebuilding plan. The harvest control rule expresses a given fishing mortality rate that is to be used over the course of rebuilding, unless modified in a subsequent rulemaking.

An approved rebuilding plan will be implemented through setting OYs and establishing management measures necessary to maintain the fishing mortality within the OYs to achieve objectives related to rebuilding requirements.

Public comments on Amendment 162 must be received by January 6, 2004, to be considered by NMFS in the decision whether to approve, disapprove, or partially approve amendment $16-2$. A proposed rule to implement Amendment 16-2 has been submitted for Secretarial review and approval. NMFS expects to publish and request public comments on proposed regulations to implement Amendment $16-2$ in the near future.
Authority: 16 U.S.C. 1801 et seq.

## DEPARTMENT OF AGRICULTURE

## Grain Inspection, Packers and Stockyards Administration

## Proposed Posting of Stockyards

Agency: Grain Inspection, Packers and Stockyards Administration, USDA. ACTION: Notice and request for comments.

SUMMARY: We propose to post five stockyards. We have received inforination that the stockyards meet the definition of a stockyard under the Packers and Stockyards Act and, therefore, need to be posted. Posted stockyards are subject to the provisions of the Packers and Stockyards Act. DATES: We will consider comments that we receive by November 24, 2003.
ADDRESSES: Send comments via electronic mail to
comments.gipsa@usda.gov. Send hardcopy written comments to Tess Butler, GIPSA, USDA, 1400 Independence Avenue, SW., Room 1647-S, Washington, DC 20250-3604, or fax to (202) 690-2755. All comments should make reference to the date and page number of this issue of the Federal Register, and will be available for public inspection in the above office during regular business hours ( 7 CFR 1.27(b)). supplementary information: The Grain Inspection, Packers and Stockyards Administration (GIPSA) administers and enforces the Packers and Stockyards Act of 1921, as amended and supplemented (7 U.S.C. 181-229) (P\&S Act). The P\&S Act prohibits unfair, deceptive, and fraudulent practices by livestock market agencies, dealers, stockyard owners, meat packers, swine contractors, and live poultry dealers in the livestock, poultry, and meatpacking industries.
Section 302 of the P\&S Act (7 U.S.C. 202) defines the term "stockyard" as follows:

*     *         * any place, establishment, or facility commonly known as stockyards, conducted, operated, or managed for profit or nonprofit as a public market for livestock producers, feeders, market agencies, and buyers, consisting of pens, or other inclosures, and their appurtenances, in which live cattle, sheep, swine, horses, mules, or goats are received, held, or kept for sale or shipment in commerce.

Section 302(b) of the $\mathrm{P} \& \mathrm{~S}$ Act requires the Secretary to determine which stockyards meet this definition, and to notify the owner of the stockyard and the public of that determination by posting a notice in each designated stockyard. After giving notice to the stockyard owner and to the public, the stockyard will be subject to the provisions of Title III of the Packers and Stockyards Act (7 U.S.C. 201-203 and 205-217a) until the Secretary deposts the stockyard by public notice.

This document notifies the stockyard owners and the public that the following five stockyards meet the definition of stockyard and that we propose to designate the stockyards as posted stockyards.

## DEPARTMENT OF AGRICULTURE

## Grain Inspection, Packers and Stockyards Administration

## Posting of Stockyards

AGENCY: Grain Inspection, Packers and Stockyards Administration, USDA.
ACtion: Notice.
SUMMARY: We posted two stockyards. We determined that the stockyards meet the definition of a stockyard under the Packers and Stockyards Act and, therefore, needed to be posted. Posted stockyards are subject to the provisions of the Packers and Stockyards Act.
supplementary information: The Grain Inspection, Packers and Stockyards Administration (GIPSA) administers and enforces the Packers and Stockyards Act of 1921, as amended and supplemented (7 U.S.C. 181-229) (P\&S Act). The P\&S Act prohibits unfair, deceptive, and fraudulent practices by livestock market agencies, dealers, stockyard owners, meat packers, swine contractors, and live poultry dealers in the livestock, poultry, and meatpacking industries.

Section 302 of the P\&S Act (7 U.S.C. 202) defines the term "stockyard" as follows:

* any place, establishment, or facility commonly known as stockyards, conducted, operated, or managed for profit or nonprofit as a public market for livestock producers, feeders, market agencies, and buyers, consisting of pens, or other inclosures, and their appurtenances, in which live cattle, sheep, swine, horses, mules, or goats are received, held, or kept for sale or shipment in commerce.

Section 302(b) of the P\&S Act requires the Secretary to determine which stockyards meet this definition, and to notify the owner of the stockyard and the public of that determination by posting a notice in each designated stockyard. After giving notice to the stockyard owner and to the public, the stockyard remains subject to the provisions of Title III of the Packers and Stockyards Act (7 U.S.C. 201-203 and 205-217a) until the Secretary deposts the stockyard by public notice.

This document notifies the public that the following two stockyards meet the definition of stockyard and that we posted the stockyards. To post stockyards, we assign the stockyard a facility number, notify the owner of the stockyard facility, and send notices to the owner of the stockyard to post on display in public areas of the stockyard. The date of posting is the date on which the posting notices are physically displayed.

| Facility No. | Stockyard name and location | Date of posting |

## DEPARTMENT OF AGRICULTURE

## Rural Housing Service

Notice of Request for Extension of a Currently Approved Information Collection
agency: Rural Housing Service (RHS), USDA.
ACTION: Proposed collection; comments requested.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the intention of the above-named Agency to request an extension for a currently approved
information collection in support of the Community Facilities Grant Program. DATES: Comments on this notice must be received by January 6, 2004 to be assured of consideration.
FOR FURTHER INFORMATION CONTACT: Derek L. Jones, Loan Specialist, Community Programs, RHS, USDA, 1400 Independence Ave. SW, Mail Stop 0787, Washington, DC 20250-0787. Telephone: (202)720-1504. E-mail: derek.jones@usda.gov.
SUPPLEMENTARY INFORMATION:
Title: Community Facilities Grant Program.

OMB Number: 0575-0173.
Expiration Date of Approval: June 30, 2004.

Type of Request: Extension of a currently approved information collection.

Abstract: Community Programs, a division of the Rural Housing Service (RHS), is part of the United States Department of Agriculture's Rural Development mission area. The Agency is authorized by Section 306(a) of the

Consolidated Farm and Rural Development Act (7 U.S.C. 1926), as amended, to make grants to public agencies, nonprofit corporations, and Indian tribes to develop essential community facilities and services for public use in rural areas. These facilities include schools, libraries, child care, hospitals, clinics, assisted-living facilities, fire and rescue stations, police stations, community centers, public buildings, and transportation. Through its Community Programs, the Department of Agriculture is striving to ensure that such facilities are readily available to all rural communities.

Information will be collected by the field offices from applicants, consultants, lenders, and public entities. The collection of information is considered the minimum necessary to effectively evaluate the overall scope of the project.

Failure to collect information could have an adverse impact on effectively carrying out the mission,
administration, processing, and program requirements.
Estimate of Burden: Public reporting burden for this collection of information is estimated to average .63 hours per response.
Respondents: Public bodies, nonprofit corporations and associations, and federally recognized Indian tribes.
Estimated Number of Respondents: 863.

Estimated Number of Responses per Respondent: 1.96.

Estimated Total Annual Burden on Respondents: 1,070 hours.

Copies of this information collection can be obtained fron Tracy Givelekian, Regulations and Paperwork
Management Branch, at (202) 692-0039.
Gomments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Agency,
including whether the information will have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. Comments may be sent to Tracy Givelekian, Regulations and Paperwork Management Branch, U.S. Department of Agriculture, Rural Development, STOP 0742, 1400 Independence Ave. SW., Washington, DC 20250-0742. All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of publịc record.

Dated: October 28, 2003.
Arthur A. Garcia,
Administrator, Rural Housing Service.
[FR Doc. 03-28061 Filed 11-6-03; 8:45 am] BILLING CODE 3410-XV-P

## COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

## Procurement List; Proposed Additions and Deletion

AGENCY: Committee for Purchase from People Who Are Blind or Severely Disabled.
ACTION: Proposed Additions to and Deletion from Procurement List.
summary: The Committee is proposing to add to the Procurement List products and services to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities, and to delete a product previously furnished by such agencies.

## COMMENTS MUST BE RECEIVED ON OR

 before: December 7, 2003.addresses: Committee for Purchase From People Who Are Blind or Severely Disabled, Jefferson Plaza 2, Suite 10800, 1421 Jefferson Davis Highway, Arlington, Virginia, 22202-3259.

## FOR FURTHER INFORMATION CONTACT:

Sheryl D. Kennerly, (703) 603-7740.
SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51-2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

## Additions

If the Committee approves the proposed additions, the entities of the Federal Government identified in this notice for each product or service will be required to procure the products and services listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

## Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. If approved, the action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the products and services to the Government.
2. If approved, the action wil! result in authorizing small entities to furnish the products and services to the Government:
3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-WagnerO'Day Act (41 U.S.C. 46-48c) in connection with the products and services proposed for addition to the Procurement List. Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

## End of Certification

The following products and services are proposed for addition to the Procurement List for production by the nonprofit agencies listed:

## Products

Product/NSN: Jersey, Flight Deck, Crewman's (The remaining 50\% of the Defense Supply Center Philadelphia's Requirement)

## COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

## Procurement List; Additions

AGENCY: Committee for Purchase from People Who Are Blind or Severely Disabled.
action: Additions to Procurement List.
SUMMARY: This action adds to the Procurement List services to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.
EFFECTIVE DATE: December 7, 2003. ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Jefferson Plaza 2, Suite 10800,

1421 Jefferson Davis Highway, Arlington, Virginia, 22202-3259.
FOR FURTHER INFORMATION CONTACT: Sheryl D. Kennerly, (703) 603-7740.
SUPPLEMENTARY INFORMATION: On
September 12, 2003, the Committee for Purchase From People Who Are Blind or Severely Disabled published notice ( 68 F.R. 53710) of proposed additions to the Procurement List. After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the services and impact of the additions on the current or most recent contractors, the Committee has determined that the services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48c and 41 CFR 512.4.

## Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the services to the Government.
2. The action will result in authorizing small entities to furnish the services to the Government.
3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-WagnerO'Day Act (41 U.S.C. 46-48c) in connection with the services proposed for addition to the Procurement List.

## End of Certification

Accordingly, the following services are added to the Procurement List:

## Services

Service Type/Location: Commissary
Warehousing and Warehouse Custodial, Fort Sill Commissary, Lawton, Oklahoma.
NPA: Trace, Inc., Eagle, Idaho.
Contract Activity: Defense Commissary Agency (DeCA), Ft. Lee, Virginia.
Service Type/Location: Custodial Services, Denver Federal Center, Building 56, Denver, Colorado.
NPA: Aspen Diversified Industries, Inc., Colorado Springs, Colorado.
Contract Activity: GSA/PBS Rocky Mountain Region, Denver, Colorado.

This action does not affect current contracts awarded prior to the effective
date of this addition or options that may be exercised under those contracts.
Sheryl D. Kennerly,
Director, Information Management.

## BROADCASTING BOARD OF GOVERNORS

## Sunshine Act; Meetings

DATE AND TIME: November 12, 2003; 1 p.m. $-4: 30$ p.m.

PLACE: Broadcasting Board of Governors, 330 Independence Avenue, SW., Washington, DC 20237.
CLOSED MEETING: The members of the Broadcasting Board of Governors (BBG) will meet in closed session to review and discuss a number of issues relating to U.S. Government-funded nonmilitary international broadcasting. They will address internal procedural, budgetary, and personnel issues, as well as sensitive foreign policy issues relating to potential options in the U.S. international broadcasting field. This meeting is closed because if open it likely would either disclose matters that would be properly classified to be kept secret in the interest of foreign policy under the appropriate executive order ( 5 U.S.C. 552b.(c)(1)) or would disclose information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action. (5 U.S.C. 552b.(c)(9)(B)) In addition, part of the discussion will relate solely to the internal personnel and organizational issues of the BBG or the International Broadcasting Bureau. (5 U.S.C. 552b.(c)(2) and (6))

## FOR FURTHER INFORMATION CONTACT:

Persons interested in obtaining more information should contact either Brenda Hardnett or Carol Booker at (202) 401-3736.

Dated: November 4, 2003.
Carol Booker,
Legal Counsel.

## DEPARTMENT OF COMMERCE

## Submission For OMB Review; Comment Request

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).
agency: U.S. Census Bureau.
Title: 2003 Service Annual Survey (SAS).

Form Number(s): SA-484, SA-492, SA-493, SA-511, SA-512, SA-513, SA514, SA-523, SA-532, SA-541, SA-560, SA-621, SA-622, SA-623, SA-624, SA711, SA-712, SA-713, SA-811, SA-812, SA-813.

Agency Approval Number: 06070422.

Type of Request: Revision of a currently approved collection.

Burden: 89,930 hours.
Number of Respondents: 44,996.
Avg Hours Per Response: 2 hours.
Needs and Uses: Today, about 50 percent of all economic activity is accounted for by services that are narrowly defined to exclude retail and wholesale trade. The Census Bureau currently measures the total output of most of these service industries annually in its Service Annual Survey (SAS). This survey now covers all or some of the following nine sectors: Transportation and Warehousing; Information; Finance and Insurance; Real Estate and Rental and Leasing; Professional, Scientific, and Technical Services; Administration and Support and Waste Management and Remediation Services; Health Care and Social Assistance; Arts, Entertainment, and Recreation; and Other Services.

The Census Bureau will expand the SAS to provide data on product
composition of service industry output and to provide data that will improve the quality of value-added measures for these service industries.

We will begin to implement, incrementally, the collection of detailed service products defined in the provisional North American Product Classification System (NAPCS) into the 2003 SAS. Provisional NAPCS products were added to the 2001 SAS for most of the Information Sector (NAICS 51, except 512) and Computer Systems Design and Related Services (NAICS 5415). For 2003, we plan to add provisional NAPCS products to the Motion Picture and Sound Recording Industries (NAICS 512). In the 2004 Service Annual Survey, we will begin collecting NAPCS product detail for Professional, Scientific, and Technical Services (NAICS 54); Administrative Support and Waste Management and Remediation Services (NAICS 56); and Hospitals and Nursing and Residential Care Facilities (NAICS 622 and 623). We will complete NAPCS product coverage of all remaining industries in the 2005 Service Annual Survey.

We will also collect annual data on the cost of materials and supplies other than for resale, contract labor, and purchased services in the 2003 SAS for the following: Information (NAICS 51); selected Financial Services (NAICS 5231 and 5239); Professional, Scientific, and Technical Services (NAICS 54); Administrative and Support and Waste Management and Remediation Services (NAICS 56); and Hospitals and Nursing and Residential Care Facilities (NAICS 622 and 623). For the 2004 survey, we will begin collecting these data for all remaining industries covered in the SAS.

Key data items include:

- expensed materials and supplies;
- contract labor;
- computer services with detail breakouts between custom coded software and data processing services;
- purchased communication services;
- purchased electricity;
- purchased fuels (except motor fuels);
- management consulting, administrative services, and other professional services;
- lease and rental costs,
- and all other purchased services.

The availability of these data will greatly improve the quality of the intermediate-inputs and value-added estimates in BEA's annual input-output and GDP by industry accounts. Annual data on purchased services and materials also will be used as indicators to update census year data collected on the Business Expenses Survey.

Affected Public: Businesses or other for-profit; not-for-profit institutions. Frequency: Annually.
Respondent's Obligation: Mandatory. Legal Authority: Title 13 U.S.C.,
Sections 182, 224 \& 225.
OMB Desk Officer: Susan Schechter, (202) 395-5103.

Copies of the above information collection proposal can be obtained by calling or writing Diana Hynek,
Departmental Paperwork Clearance Officer, (202) 482-0266, Department of Commerce, room 6625, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at dhynek@doc.gov).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to Susan Schechter, OMB Desk Officer either by fax; (202) 395-7245, or email; susan_schechter@omb.eop.gov.

Dated: November 4, 2003.
Madeleine Clayton,
Management Analyst, Office of the Chief Information Officer.

## DEPARTMENT OF COMMERCE

## Bureau of Industry and Security

## International Import Certificate

ACTION: Proposed collection; comment request.
SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104-13 (44 U.S.C. 3506(c)(2)(A)).
DATES: Written comments must be submitted on or before January 6, 2004. ADDRESSES: Direct all written comments to Diana Hynek. DOC Paperwork Clearance Officer, (202) 482-0266, Department of Commerce, Room 6625, 14th and Constitution Avenue, NW., Washington, DC 20230.

## FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Ms. Marna Dove, BIS ICB Liaison, (202) 482-5211, Department of Commerce, Room 6622, 14th \& Constitution Avenue, NW., Washington, DC, 20230.

## SUPPLEMENTARY INFORMATION:

## I. Abstract

The United States and several other countries have undertaken to increase the effectiveness of their respective controls over international trade in strategic commodities by means of an Import Certificate procedure. For the U.S. importer, this procedure provides that, where required by the exporting country with respect to a specific transaction, the importer certifies to the U.S. Government that he/she will import specific commodities into the United States and will not reexport such commodities except in accordance with the export control regulations of the United States. The U.S. Government, in turn, certifies that such representations have been made.

## II. Data

## OMB Number: 0694-0017.

Form Number: Form BIS-645P, International Import Certificate.

Type of Review: Regular submission for renewal of a currently approved collection.

Affected Public: Individuals, businesses or other for-profit and not-for-profit institutions.

Estimated Number of Respondents: 1,008.
Estimated Time Per Response: 16 minutes per response.
Estimated Total Annual Burden Hours: 270.

Estimated Total Annual Cost: No start-up capital expenditures.

## III. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they will also become a matter of public record.

Dated: November 4, 2003. Madeleine Clayton,
Management Analyst, Office of the Chief Information Officer.

## License Exception, Humanitarian License

ACTION: Proposed collection; comment request.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the
Paperwork Reduction Act of 1995, Public Law 104-13 (44 U.S.C. 3506(c)(2)(A)).
DATES: Written comments must be submitted on or before January 6, 2004.
ADDRESSES: Direct all written comments to Diana Hynek, Departmental Paperwork Clearance Officer, Department of Commerce, Office of the Chief Information Officer, 202-4820266, Room 6625, 14th and Constitution Avenue, NW., Washington, DC 20230.

## FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Marna Dove, BIS ICB Liaison, Department of Commerce, BIS Office of the Chief Information Officer, Room 6622, 14 th and Constitution Avenue, NW., Washington, DC 20230. SUPPLEMENTARY INFORMATION:

## I. Abstract

Section $7(\mathrm{~g})$ of the EAA, as amended by the Export Administration Amendments Act of 1985 (Pub. L. 9964), exempts from foreign policy controls exports of donations to meet basic human needs. Since the enactment of Public Law 99-74, an exporter had to apply for a bulk Humanitarian license, permitting the export of goods identified in a supplement to the regulation without restriction as to quantity or number of shipments to any of the embargoed destinations. New License Exception procedures contained in this regulation reduce the regulatory burden on these exporters by enabling them to make humanitarian donations with only minimal recordkeeping.

## II. Data

OMB Number: 0694-0033.
Form Number: None.
Type of Review: Regular submission for extension of a currently approved collection.

Affected Public: Individuals, businesses or other for-profit and not-for-profit institutions.

Estimated Number of Respondents: 2.
Estimated Time Per Response: 5 hours per response.

Estimated Total Annual Burden

## Hours: 10.

Estimated Total Annual Cost: No start-up or capital expenditures.

## III. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they will also become a matter of public record.
Dated: November 4, 2003.

## International Trade Administration

[A-570-822]
Certain Helical Spring Lock Washers From the People's Republic of China; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.
ACTION: Notice of preliminary results of antidumping duty administrative review, request for revocation of the antidumping duty order, and determination not to revoke, in part.
summary: We preliminarily find that helical spring lock washers from the People's Republic of China were being sold in the United States below normal value by the Hangzhou Spring Washer Co., Ltd. (also known as Zhejiang Wanxin Group, Ltd. (ZWG)) (collectively, Hangzhou) during the period October 1, 2001 through September 30, 2002. We have also preliminarily determined not to revoke the antidumping duty order on the subject merchandise with respect to this company. Interested parties are invited to comment on these preliminary results.

## Effective date: November 7, 2003.

## FOR FURTHER INFORMATION CONTACT:

Ryan Langan and Audrey Twyman,
Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 482-2613 or (202) 482-3534.

## Background

On October 19, 1993, the Department published the antidumping duty order on certain helical spring lock washers (HSLWs) from the People's Republic of China (PRC) (58 FR 53914), as amended on November 23, 1993 (58 FR 61859). The Department notified interested parties of the opportunity to request an administrative review of this order on October 2, 2002 ( 67 FR 61849). The petitioner, Shakeproof Assembly Components Division of Illinois Tool Works, Inc. (Shakeproof), requested that the Department conduct an administrative review of Hangzhou on October 22, 2002. Hangzhou requested an administrative review and revocation of the antidumping duty order with respect to itself on October 31, 2002. The notice of initiation of this administrative review was published on November 22, 2002 ( 67 FR 70402).

On January 21 and 22, 2003, Hangzhou responded to the Department's December 5, 2002 questionnaire. Next, on February 4, 2003, the Department provided parties with an opportunity to submit information regarding appropriate surrogate values. On February 28, 2003, Hangzhou submitted surrogate value comments. The petitioner submitted factual information, including surrogate value comments, on March 20, 2003. The Department received petitioner's comments on Hangzhou's questionnaire responses on March 14, 2003, and its additional deficiency comments and verification comments on March 26, 2003.

The Department issued its first supplemental questionnaire to Hangzhou on March 31, 2003, and received Hangzhou's responses on April 11 and 15, 2003. On April 22, 2003, Hangzhou submitted additional information about its platers. Shakeproof submitted its second and third sets of deficiency comments on April 29 and May 15, 2003, respectively.
On June 4, 2003, the Department published Certain Helical Spring Lock Washers from the People's Republic of China: Notice of Extension of Time Limit for the Preliminary Results of the Ninth Antidumping Administrative Review, 68 FR 33472. The petitioner filed pre-preliminary determination comments on June 20, 2003. On August 12, 2003, the Department issued its second supplemental questionnaire. Hangzhou submitted its response to that questionnaire on August 27, 2003.
The Department verified Hangzhou's questionnaire response on September 1 through 4, 2003, in Xiaoshan City,
Xinjie Town, People's Republic of China (PRC). Hangzhou submitted its preverification corrections on September 9, 2003, and new databases on October 17, 2003. The Department issued its verification report on October 23, 2003.

## Scope of the Order

The products covered by the order are HSLWs of carbon steel, of carbon alloy steel, or of stainless steel, heat-treated or non-heat-treated, plated or non-plated, with ends that are off-line. HSLWs are designed to: (1) Function as a spring to compensate for developed looseness between the component parts of a fastened assembly; (2) distribute the load over a larger area for screws or bolts; and, (3) provide a hardened bearing surface. The scope does not include internal or external tooth washers, nor does it include spring lock washers made of other metals, such as copper.
HSLWs subject to the order are currently classifiable under subheading 7318.21.0030 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheading is provided for convenience and customs purposes, the written description of the scope of this proceeding is dispositive.

## Period of Review

This review covers the period October 1, 2001, through September 30, 2002.

## Separate Rates Determination

To establish whether a company operating in a state-controlled economy is sufficiently independent to be entitled to a separate rate, the Department analyzes each exporting
entity under the test established in the Final Determination of Sales at Less Than Fair Value: Sparklers from the People's Republic of China, 56 FR 20588 (May 6, 1991) (Sparklers), as amplified by the Final Determination of Sales at Less Than Fair Value: Silicon Carbide from the People's Republic of China, 59 FR 22585 (May 2. 1994) (Silicon Carbide). Under this policy, exporters in non-market economy countries (NMEs) are entitled to separate, companyspecific margins when they can demonstrate an absence of government control, both in law and in fact, with respect to export activities. Evidence supporting, though not requiring, a finding of de jure absence of government control over export activities includes: (1) An absence of restrictive stipulations associated with the individual exporter's business and export licenses; (2) any legislative enactments decentralizing control of companies; and, (3) any other formal measures by the government
decentralizing control of companies. De facto absence of government control over exports is based on four factors: (1) Whether each exporter sets its own export prices independently of the government and without the approval of a government authority; (2) whether each exporter retains the proceeds from its sales and makes independent decisions regarding the disposition of profits or the financing of losses; (3) whether each exporter has the authority to negotiate and sign contracts and other agreements; and, (4) whether each exporter has autonomy from the government regarding the selection of management. (See Silicon Carbide, 59 FR at 22587 and Sparklers, 56 FR at 20589.)

In each of the previous administrative reviews of the antidumping duty order on HSLWs from the PRC, covering successive review periods from October 1, 1993, through September 30, 2001, we determined that Hangzhou and its predecessor, ZWG, merited separate rates. We found, in each review, an absence of government control, both in law and in fact, with respect to Hangzhou's export activities according to the criteria identified in Sparklers, and an absence of government control with respect to the additional criteria identified in Silicon Carbide. During this period of review (POR), we have no evidence of any change in either the Sparklers or Silicon Carbide criteria. Therefore, we have assigned Hangzhou a separate rate.

## Verification

Pursuant to section 782(i) of the Tariff Act of 1930, as amended ("the Act"), we
verified sales and factors of production information provided by Hangzhou in Xiaoshan City, Xinjie Town, PRC, on September 1 through 4, 2003. We used standard verification procedures, including the examination of relevant sales, accounting and production records, as well as original source documents provided by the respondents. Our verification results are outlined in the public version of the verification report, dated October 22, 2003, and located in the public file in the Central Records Unit, Room B-099 of the Department's main building (CRU).

## Export Price

Because Hangzhou sold the subject merchandise to unaffiliated purchasers in the United States prior to importation into the United States and constructed export price methodology is not otherwise indicated, we have used export price in accordance with section 772(a) of the Act.

We calculated export price based on the FOB price to unaffiliated purchasers. From this price, we deducted amounts for foreign inland freight, and brokerage and handling pursuant to section $772(\mathrm{c})(2)(\mathrm{A})$ of the Act. We valued these deductions using surrogate values. We selected India as the primary surrogate country for the reasons explained in the "Normal Value" section of this notice.

## Normal Value

The Department has determined the PRC to be an NME country in all previous antidumping cases. In accordance with section 771(18)(C)(i) of the Act, any determination that a foreign country is an NME shall remain in effect until revoked by the administering authority. None of the parties to this proceeding has contested such treatment in this review. Moreover, parties to this proceeding have not argued that the PRC HSLW industry is a market-oriented industry and, consequently, we have no basis to determine that the information in this review would permit the calculation of normal value (NV) using PRC prices or costs.

Section 773(c)(1) of the Act provides that, in the case of an NME, the Department shall determine NV using a factors-of-production methodology if: (1) The merchandise is exported from an NME, and (2) the information does not permit the calculation of NV using home-market prices, third-country prices, or constructed value under section 773(a) of the Act. Because information on the record does not permit the calculation of NV using
home-market prices, third-country prices, or constructed value, and no party has argued otherwise, we calculated NV based on factors of production in accordance with sections 773(c)(3) and (4) of the Act and 19 CFR 351.408(c).

Because we are using surrogate country factors-of-production prices to determine NV, section $773(\mathrm{c})(4)$ of the Act requires that the Department use values from a market economy (surrogate) country that (1) is at a level of economic development comparable to that of the PRC, and (2) is a significant producer of comparable merchandise. We have determined that India, Pakistan, Indonesia, Sri Lanka and the Philippines are market economy countries at a comparable level of economic development to that of the PRC. (See "Memorandum to Susan Kuhbach from Jeffrey May), dated January 27, 2003. "Ninth Administrative Review for Certain Helical Spring Lock Washers from the People's Republic of China," which is available in the CRU.) In addition, we have found that India is a significant producer of comparable merchandise, i.e., fasteners. (See Memorandum to File from Sally Hastings, dated October 31, 2003, and available in the public file in the CRU.) As in the investigation and eight previous reviews, we have chosen India as the primary surrogate country. Thus, we have used Indian prices to value the factors of production.

We selected, where possible, publicly available values from India which were: (1) Average non-export values; (2) representative of a range of prices within the POR or most contemporaneous with the POR; (3) product-specific; and, (4) tax-exclusive. Also, where we have relied upon import values, we have excluded imports from South Korea, Thailand, and Indonesia. The Department has found that these countries maintain broadly available, non-industry specific export subsidies, and that the existence of these subsidies provides sufficient reason to believe or suspect that export prices from these countries are distorted. See Final Determination of Sales at Less Than Fair Value: Certain Automotive Replacement Glass Windshields From the People's Republic of China, 67 FR 6482 (February 12, 2002) and accompanying Issues and Decision Memorandum (Replacement Glass Windshields). Our practice of excluding subsidized prices has been upheld in China National Machinery Import and Export Corporation v. United States and the Timken Company, Court No. 0101114, slip op. 03-133 (CIT Oct. 15,
2003) (Confidential version; public version not yet issued).
In its submission of June 20, 2003, the petitioner argues that the Department should exclude any import values into India where the exporting country maintains subsidies, i.e., any subsidizing country in addition to Indonesia, South Korea, and Thailand. The petitioner provides a list of countries that are subject to U.S. countervailing duty orders, and countries that have been found to provide "generally available subsidies" or "N.T.E. export subsidies."

In past proceedings, we disregarded input prices where particular and objective record evidence provided the Department with a reason to believe or suspect that these prices may be distorted by subsidies. See, e.g., Tapered Roller Bearings and Parts Thereof, Finished and Unfinished, from the People's Republic of China; Final Results of 1999-2000 Administrative Review, Partial Rescission of Review, and Determination Not to Revoke Order in Part, 66 FR 57420 (November 15, 2001), and accompanying Decision Memorandum at Comment 1; Final Determination of Sales at Less Than Fair Value: Certain Automotive Replacement Glass Windshields from the Peoples Republic of China, 67 FR 6482 (February 12, 2002) and accompanying Issues and Decision Memorandum at Comment 1. In those and a number of other prior proceedings, parties demonstrated, on the basis of record evidence, that certain countries maintained broadly available, non-industry specific export subsidies, or that certain countries provided industry-specific subsidies which may have benefitted certain input products covered by the proceeding.
The information provided by the petitioner in this proceeding (with the exception of certain steel products) does not identify the particular products or the particular subsidies which allegedly distort the prices of these products. Without such evidence, we cannot preliminarily conclude that these input prices should be disregarded. We acknowledge that there may be other information, outside the record of this proceeding, which may be material to the question of whether other input prices are distorted by subsidies. However, it would be impractical for the Department to attempt to identify and consider such information without the parties first having demonstrated, on the basis of record evidence, that certain countries maintained broadly available, non-industry specific export subsidies, or that certain countries provided industry-specific subsidies which may
have benefitted certain input products covered by the proceeding. Therefore, except for valuing steel and steel scrap (discussed further below), we have preliminarily determined not to exclude imports from countries beyond Indonesia, South Korea and Thailand.

## Steel Value

During the POR, Hangzhou imported a portion of its steel input (carbon steel wire rod (CSWR)) from the United Kingdom (UK) and it paid for this input in a market economy currency. The petitioner, in its submission dated June 20, 2003, argues that the Department should disregard the steel import prices reported by Hangzhou because there is "reason to believe or suspect" the steel benefitted from subsidies. In support of its claim, the petitioner points to the Department's finding in the sunset review of cut-to-length carbon steel plate from the UK, in which the Department found a subsidy rate of 12 percent for all UK producers and exporters (see Calculation of Net Countervailable Subsidy: Cut-to-Length Carbon Steel Plate from the United Kingdom, March 29, 2000). Consistent with the above-described practice of disregarding subsidized prices to value NME inputs, we have preliminarily determined not to use the market economy prices paid by Hangzhou for CSWR.
Instead, we have used the value of imports of CSWR into India, based on information from the Monthly Foreign Trade Statistics of India-Imports (MSFTI). In computing this value, we have taken into account that the Department has made final affirmative countervailing duty determinations on steel products from numerous countries. Therefore, we have not included values for imports of CSWR into India from Belgium, Canada, France, Germany, and the UK (as well as South Korea and Thailand). Similarly, in valuing steel scrap, we have excluded values for imports into India from Belgium, France, Germany, South Africa and the UK (as well as Indonesia, South Korea and Thailand).

The remaining inputs are addressed below:

- To value the hydrochloric acid used in the production process, we used per kilogram values obtained from the Indian publication Chemical Weekly.
- To value other chemicals used in the production of HSLWs, we used per kilogram import values obtained from MSFTI. We also adjusted these values to account for freight costs incurred between the supplier and Hangzhou.
- To value plating, we used a March

14,2003 , price quote supplied by the
petitioner in its submission dated March 20,2003 , subsequently resubmitted as a public document.

- To value coal, we used a per kilogram value obtained from the MFSTI. We also made adjustments to account for freight costs incurred between the supplier and Hangzhou.
- To value efectricity, we used the electricity price data from the Energy Data Directory and Yearbook (1999/ 2000) published by the Tata Energy Research Institute. We adjusted the value to reflect inflation using the electricity sector-specific inflation index published in the Reserve Bank of India (RBI) Bulletin.
- To value water, we used the Second Water Utilities Data Book for the Asian and Pacific Region published by the Asian Development Bank in 1997. We adjusted the value to reflect inflation using the wholesale price index (WPI) published by the International Monetary Fund (IMF).
- For labor, we used the regressionbased wage rate for the PRC in "Expected Wages of Selected NME Countries," located on the Internet at http://ia.ita.doc.gov.wages/ correctedoowages/htm.
- For factory overhead, selling, general, and administrative expenses (SG\&A), and profit values, we used information from the September 12, 2002, RBI Bulletin report entitled "Combined Income, Value of Production, Expenditure and Appropriations Accounts of the Selected 1,927 Public Limited Companies (2000-2001)." From this information, we were able to determine factory overhead as a percentage of the total raw materials, labor and energy (ML\&E) costs, SG\&A as a percentage of ML\&E plus overhead (i.e., cost of manufacture), and the profit rate as a percentage of the cost of manufacture plus SG\&A.
- For packing materials, we used the per kilogram values obtained from the MFSTI. Where necessary, we adjusted these values to reflect inflation using the WPI published by the IMF. We also made adjustments to account for freight costs incurred between the PRC supplier and Hangzhou.
- To value foreign brokerage and handling, we used information reported in the New Shipper Review for Stainless Steel Wire Rod from India, 66 FR 27629 (May 18, 2001). See Meltroll Engineering Pvt. Ltd.'s submission dated September 12, 1999. We adjusted this value to reflect inflation using the WPI published by the IMF.
- To value truck freight, we used the freight rates published in the Indian publication Chemical Weekly. We
obtained distances between cities from the following Web sites: http:// www.infreight.com; http:// www.sitaindia.com/Packages/ CityDistance.php; http:// indiatravelinfo.com/distance.html; and, http://www/abcindia.com.
- To value shipping freight, we used a rate reported in a July 14, 1997, letter from the Inland Waterways of India which was used in Certain Helical Spring Lock Washers from the People's Republic of China; Final Results of the Antidumping Duty Administrative Review, 67 FR 8520 (February 25, 2002) (HSLWs-7) and Certain Helical Spring Lock Washers from the People's Republic of China; Final Results of the Antidumping Duty Administrative Review, 67 FR 69717 (November 19, 2002) (HSLWs-8). We adjusted the rate to reflect inflation using the WPI published by the IMF.

For a complete description of the factor values used, see "Memorandum to File: Factor Values Used for the Preliminary Results of the Ninth Administrative Review," dated October 31, 2003 (Factors Memorandum), a public version of which is available in the Public File of the CRU.

## Revocation

The Department "may revoke, in whole or in part" an antidumping duty order upon completion of a review under section 751 of the Act. While Congress has not specified the procedures that the Department must follow in revoking an order, the Department has developed a procedure for revocation that is described in 19 CFR 351.222. This regulation requires, inter alia, that a company requesting revocation must submit the following: (1) A certification that the company has sold the subject merchandise at not less than NV in the current review period and that the company will not sell at less than NV in the future; (2) a certification that the company sold the subject merchandise in each of the three years forming the basis of the request in commercial quantities; and, (3) an agreement to reinstatement of the order if the Department concludes that the company, subsequent to the revocation, sold subject merchandise at less than NV. See 19 CFR 351.222(e)(1).

Pursuant to 19 CFR 351.222(e)(1), Hangzhou requested revocation of the antidumping duty order as it pertains to that company. According to 19 CFR $351.222(b)$ (2), upon receipt of such a request, the Department may revoke an order, in part, if it concludes that (1) the company in question has sold subject merchandise at not less than NV for a period of at least three consecutive
years; (2) the continued application of the antidumping duty order is not otherwise necessary to offset dumping; and, (3) the company has agreed to its immediate reinstatement in the order if the Department concludes that the company, subsequent to the revocation, sold subject merchandise at less than NV.

Based on our analysis of the sales and factors of production information
submitted by Hangzhou, we preliminarily determine that Hangzhou sold the subject merchandise in the United States below normal value during the POR. Thus, we find that Hangzhou has not sold the subject merchandise below NV for a period of at least three consecutive years. Therefore, pursuant to 19 CFR 351.222(b)(2), we preliminarily
determine that Hangzhou does not qualify for revocation of the order on HSLWs from the PRC and that the order, with respect to Hangzhou, should not be revoked.

## Preliminary Results of Review

We preliminarily determine that the following dumping margin exists:

| Manufacturer/exporter | Time period | Margin (percent) |
| :---: | :---: | :---: |
| Hang Zhou Spring Washer Co. Ltd./Zhejiang Wanxin Group, Ltd | 10/1/01-9/30/02 | 29.03 |

The Department shall determine, and the U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries. Upon completion of this administrative review, the Department will determine, and the CBP shall assess, antidumping duties on all appropriate entries. In accordance with 19 CFR 351.212 (b)(1), we have calculated an exporter/importer (or customer)-specific assessment rate for merchandise subject to this review. We calculated importer (or customer)specific ad valorem rates by aggregating the dumping duties due for all U.S. sales to each importer (or customer) and dividing this amount by the total entered value of the sales to that importer (or customer). In accordance with the requirement set forth in 19 CFR 351.106(c)(2), where an importer (or customer)-specific ad valorem rate is less than de minimis, we will direct the CBP to liquidate without regard to antidumping duties. Where an importer (or customer)-specific ad valorem rate is greater than de minimis, we will direct the CBP to apply the ad valorem assessment rates against the entered value of each of the importer's/ customer's entries during the review period. All other entries of the subject merchandise during the POR will be liquidated at the antidumping duty rate in place at the time of entry.

Furthermore, the following cash deposit rates will be effective upon publication of the final results for all shipments of HSLWs from the PRC entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided for by section 751(a)(1) of the Act: (1) For Hangzhou, which has a separate rate, the cash deposit rate will be the company-specific rate established in the final results of review; (2) for all other PRC exporters, the cash deposit rate will be the PRC rate, 128.63 percent, which is the "All Other PRC Manufacturers, Producers and Exporters" rate from the

Final Determination of Sales at Less Than Fair Value: Certain Helical Spring Lock Washers from the People's Republic of China, 58 FR 48833 (September 20, 1993); and, (3) for nonPRC exporters of subject merchandise from the PRC, the cash deposit rate will be the rate applicable to the PRC supplier of that exporter. These deposit rates, when imposed, shall remain in effect until publication of the final results of the next administrative review.
This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

## Public Comment

Pursuant to 19 CFR 351.224, the Department will disclose to parties the calculations performed in connection with these preliminary results within five days of the date of any public announcement, or, if there is no public announcement, within five days of the date of publication of this notice.
Interested parties may request a hearing within 30 days of the date of publication of this notice (See 19 CFR 351.310). Any hearing, if requested, will be held two days after the scheduled date for submission of rebuttal briefs (see below). According to 19 CFR 351.309, interested parties may submit written arguments in case briefs within 30 days of the date of publication of this notice. Rebuttal briefs, limited to issues raised in case briefs, may be filed no later than five days after the date of filing the case briefs. Parties who submit briefs in these proceedings should provide a summary
of the arguments not to exceed five pages and a table of statutes, regulations, and cases cited. Copies of case briefs and rebuttal briefs must be served on interested parties in accordance with 19 CFR 351.303(f)(3).

The Department will publish the final results of this administrative review, including the results of its analysis of issues raised in any such briefs or hearing, within 120 days of publication of these preliminary result.

This administrative review and notice are in accordance with sections $751(\mathrm{a})(1)$ and 777(i)(1) of the Act.

Dated: October 31, 2003.

## DEPARTMENT OF COMMERCE

International Trade Administration [A-570-502]

## Iron Construction Castings from the People's Republic of China: Rescission of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, U.S. Department of Commerce SUMMARY: : In response to a timely request from an interested party, the Department of Commerce (the Department) initiated an administrative review of the antidumping duty order on iron construction castings (castings) from the People's Republic of China (PRC). See Initiation of Antidumping and Countervailing Duty Administrative Reviews and Request for Revocation in Part, 68 FR 39055 (July 1,
2003)(Initiation Notice). This review covers the period May 1, 2002 through April 30, 2003. Powin Corporation (Powin), the U.S. importer which
requested the administrative review, has now withdrawn its request for an administrative review. Accordingly, the Department is rescinding this review in accordance with section 351.213 (d)(1) of the Department's regulations.
effective date: November 7, 2003.
FOR FURTHER INFORMATION CONTACT:
Sean Carey, AD/CVD Enforcement Group III, Office 7, Import
Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington D.C. 20230; telephone (202) 482-3964.

## SUPPLEMENTARY INFORMATION:

## Background

The Department published in the Federal Register an antidumping duty order on castings from the PRC on May 9, 1986. See Antidumping Duty Order: Iron Construction Castings from the People's Republic of China, 51 FR 17222 (May 9, 1986). On May 29, 2003, the Department received a timely request from Powin, a U.S. importer, for an administrative review of the PRC exporter of subject merchandise, Shandong Himight Machinery Co., Ltd. (Shandong Himight). The Department published its initiation of administrative review on July 1, 2003. See Initiation Notice.

On July 24, 2003, counsel for Powin entered an appearance on behalf of Weifang Fangzi Tongbao Foundry and Weifang Fangzi Mucun Foundry, producers of subject merchandise, and Shandong Machinery I/E Corp., a company which facilitated Shandong Himight's exports to the United States. On July 25, 2003, the Department issued its antidumping duty questionnaire. The Department extended the deadline for the questionnaire response on September 3 and again on September 16, 2003 pursuant to Powin's request for an extension of the deadline. In a letter to the Department filed September 30, 2003, Powin withdrew its request for an administrative review.

## Rescission of Antidumping Duty Administrative Review of Castings

The Department is rescinding the antidumping duty administrative review of Powin, covering the period May 1, 2002 through April 30, 2003, in accordance with section 351.213 (d)(1) of the Department's regulations. Although Powin's withdrawal request for this review was not within the normal time limit as prescribed in section 351.213(d)(1) of the Department's regulations, we find that, under the circumstances of this review, it is appropriate to accept the withdrawal
request and rescind the review with respect to Shandong Himight.
According to section 351.213(d)(1) of the Department's regulations, the Department will rescind an administrative review "if a party that requested the review withdraws the request within 90 days of the date of publication of notice of initiation of the requested review." The regulations further provide that the Secretary "may extend this time limit if the Secretary decides that it is reasonable to do so." In the instant case, Powin's withdrawal request was not filed within the 90-day time limit. However, the Department has determined that rescinding the review is appropriate since continuing the review would only require Powin, the domestic industry and the Department to expend time and resources on a review in which the only party that requested the review is no longer interested. Powin has not filed a questionnaire response with respect to Shandong Himight, and the Department has neither released supplemental questionnaires nor conducted verification at this point in the proceeding. Accordingly, the Department does not believe the administrative review has proceeded to a point at which it would be "unreasonable" to rescind the review.
The Department, therefore, determines that it is reasonable to extend the 90-day time limit and to rescind the administrative review for the period May 1, 2002 through April 30, 2003. The Department will issue appropriate assessment instructions directly to the U.S. Customs and Border Protection (Customs) within 15 days of publication of this notice. The Department will direct Customs to assess antidumping duties for this company at the cash deposit rate in effect on the date of entry for entries during the period May 1, 2002 through April 30, 2003.

## Notification to Importers

This notice serves as a final reminder to importers of their responsibility under section 351.402 (f) of the Department's regulations to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and subsequent assessment of double antidumping duties. The Department will issue appropriate assessment instructions to the U.S. Bureau of Customs and Border Protection.

This determination and notice are issued and published in accordance with 19 CFR $351.213(\mathrm{~d})(4)$ and sections $751(\mathrm{a})(1)$ and $777(\mathrm{i})(1)$ of the Act.
Dated: October 28, 2003.
James J. Jochum,
Assistant Secretary for Import Administration.

## Certain Preserved Mushrooms from the People's Republic of China: Notice of Partial Rescission of Fourth Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.
ACTION: Notice of Partial Rescission of Fourth Antidumping Duty Administrative Review.

EFFECTIVE DATE: November 7, 2003. FOR FURTHER INFORMATION CONTACT: Brian Smith or Jim Mathews, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230; telephone: (202) 482-1766 or (202) 4822778, respectively.

## SUPPLEMENTARY INFORMATION:

## Background

On February 3, 2003, the Department published in the Federal Register (68 FR 5272) a notice of "Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity To Request Administrative Review" of the antidumping duty order on certain preserved mushrooms from the People's Republic of China ("PRC") for the period February 1, 2002, through January 31, 2003. On February 25, 2003, Green Fresh Foods (Zhangzhou) Co., Ltd. ("Green Fresh") requested an administrative review of its sales. On February 28, 2003, Guangxi Yulin Oriental Co., Ltd. ("Guangxi Yulin") requested an administrative review of its sales. Also, on February 28, 2003, the petitioner ${ }^{1}$ requested an administrative

[^9]Continued
review of the antidumping duty order for the following companies: China Processed Food Import \& Export Company ("China Processed), Gerber Food (Yunnan) Co., Ltd. ("Gerber'), Green Fresh, Guangxi Yulin, Raoping Xingyu Foods Co., Ltd. ("Raoping'), Shantou Hongda Industrial General Corporation ("Shantou Hongda"), Shenxian Dongxing Foods Co., Ltd ("Shenxian Dongxing"), Shenzhen Qunxingyuan Trading Co., Ltd.
("Shenzhen Qunxingyuan'), Xiamen Zhongjia Imp. \& Exp. Co., Ltd.
("Zhongiia"), Zhangzhou Jingxiang Foods Co., Ltd. ("Jingxiang"), and Zhangzhou Longhai Minhui Industry and Trade Co., Ltd ("Minhui"). On March 6, 2003, Shantou Hongda and Shenxian Dongxing requested an administrative review of their sales. ${ }^{2}$ On March 25, 2003, the Department published a notice of initiation of an administrative review of the antidumping duty order on certain preserved mushrooms from the PRC with respect to these companies. See Initiation of Antidumping and Countervailing Duty Administrative Reviews and Requests for Revocations in Part, 68 FR 14394.

On May 7, 2003, Raoping and Shenzhen Qunxingyuan requested that the Department rescind their respective reviews because they did not export to the United States during the period of review ("POR"). We confirmed the claims of Raoping and Shenzhen Qunxingyuan by reviewing data from U.S. Customs and Border Protection. See Memorandum to the File dated September 29, 2003, on file in Room B099 of the Commerce Department. We received no comments on this memorandum from any party.
On June 12, 2003, the petitioner requested an extension of the deadline to withdraw its requests for review. On June 16, 2003, the Department granted the petitioner's request and extended the deadline until July 10, 2003. On August 7, 2003, the petitioner withdrew its request for an administrative review of Zhongiia and Minhui, following the Department's preliminary decision to rescind the new shipper review with respect to these companies due to the filing of improper certifications. See Certain Preserved Mushrooms from the People's Republic of China: Intent to Rescind Antidumping Duty New Shipper Review, 68 FR 45792 (August 4,

[^10]2003). On August 20, 2003, Zhongjia and Minhui requested that the data submitted on the record of the abovementioned new shipper review be transferred to the record of the fourth administrative review. ${ }^{3}$ The petitioner objected to this request on September 2, 2003. On September 15, 2003, respondents Zhongjia and Minhui submitted a letter in opposition to the petitioner's August 7 review request withdrawal. On September 23, 2003, the petitioner submitted a letter in opposition to Zhongjia's and Minhui's September 15 letter.

## Partial Rescission of Review

Pursuant to section 351.213 (d)(1) of the Department's regulations, the Secretary will rescind an administrative review in whole or in part if a party that requested the review withdraws its request within ninety days of publication of the Federal Register notice that initiated the review. Section 351.213(d)(1) further provides that the Secretary may extend this time limit if the Secretary decides that it is reasonable to do so. The administrative review is still at the early stages of the proceeding, and the Department has not conducted verification or issued a preliminary determination. The Department has determined that it is reasonable to extend the time in which the petitioner can request a witndrawal of its request for the administrative review of Zhongjia and Minhui.

Zhongjia and Minhui contest the petitioners request and argue that the Department should continue with the administrative review covering their sales of subject merchandise. For purposes of our analysis, it is important to distinguish that Zhongiia and Minhui each requested a new shipper review but did not request an administrative review. This is in contrast to the situation in which a respondent requests both a new shipper review and an administrative review. Section 351.214(j) of the Department's regulations provides that if a party requests multiple reviews, the Department may choose to initiate one and not the other after consulting with the party. For example, in Certain InShell Roasted Pistachios From Iran: Notice of Initiation of New Shipper Countervailing Duty Review, 66 FR 59235, 59235-6 (November 27, 2001) (Pistachios from Iran), the respondent requested both a new shipper and an administrative review in a timely

[^11]manner. Pursuant to 19 CFR 351.214(j), the Department only initiated the new shipper review. Had the new shipper review been rescinded in Pistachios from Iran under facts similar to those in this case, the Department would have considered continuing the administrative review. However, in this case, because neither Zhongjia nor Minhui submitted a request for an administrative review of their sales in a timely fashion, as required by 751(a)(1) of the Act, we are rescinding the administrative review of the antidumping duty order on certain preserved mushrooms from the PRC with respect to these two companies, as requested by the petitioner.

Furthermore, as neither Raoping nor Shenzhen Qunxingyuan exported the subject merchandise to the United States during the POR, we are rescinding this review of the antidumping duty order on certain preserved mushrooms from the PRC as to both Raoping and Shenzhen Qunxingyuan. This review will continue with respect to Gerber, Green Fresh, China Processed, Guangxi Yulin, Shantou Hongda, Shenxian Dongxing and Jingxiang.

This notice is published in accordance with section 777 (i) of the Tariff Act of 1930, as amended, and 19 CFR 351.213(d)(4).

Dated: November 3, 2003.
Jeffrey May,
Deputy Assistant Secretary for Import Administration.

International Trade Administration
[A-570-851]

## Notice of Decision of the Court of International Trade: Certain Preserved Mushrooms from the People's Republic of China

AGENCY: Import Administration, International Trade Administration, Department of Commerce. ACTION: Notice of Decision of the Court of International Trade.
summary: On October 17, 2003, in Tak Fat Trading Company, et al., v. United States, Consol. Court No. 00-07-00360, Slip Op. 03-134, a lawsuit challenging the Department of Commerce's final scope ruling that the marinated mushrooms manufactured or exported by the plaintiffs are within the scope of the antidumping duty order of certain preserved mushrooms from the People's

Republic of China, the Court of International Trade vacated the Department of Commerce's scope ruling and entered a judgement order. Consistent with the decision of the United States Court of Appeals for the Federal Circuit in Timken Co.v. United States, 893 F. 2 d 337 (Fed.Cir. 1990), the Department is notifying the public that this decision was "not in harmony" with the Department's original final scope ruling.
effective date: November 7, 2003.
FOR FURTHER INFORMATION CONTACT:
David J. Goldberger at (202) 482-4136 or Rebecca Trainor at (202) 482-4007,
Office of Antidumping and
Countervailing Duty Enforcement, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230.

## SUPPLEMENTARY INFORMATION:

## Background

On February 19, 1999, the Department of Commerce (the Department) published notice of its amended final determination of less-than-fair-value (LTFV) investigation of certain preserved mushrooms from the People's Republic of China (PRC) and the antidumping duty order. See Notice of Amendment of Final Determination of Sales at Less Than Fair Value and Antidumping Duty Order: Certain Preserved Mushrooms from the People's Republic of China, 64 FR 8308 (February 19, 1999).
On January 6, 2000, producers/ exporters, Mei Wei Food Industry Co, Ltd, Tak Fat Trading Co., Leung Mi International, Tak Yeun Corp., and U.S. importer Genex International Corp. (collectively, Tak Fat), requested that the Department determine that certain marinated or acidified mushrooms produced in the People's Republic of China (PRC) are outside the scope of the antidumping duty order on certain preserved mushrooms. See Request for Scope Deterınination: Certain Preserved Mushrooms from the People's Republic of China, January 6, 2000. The Department made a final ruling on this scope request on June 19, 2000, finding that the "marinated or acidified" mushrooms produced, exported or imported by Tak Fat are within the scope of the antidumping duty order on certain preserved mushrooms from the PRC based on their acetic acid content level.

Tak Fat appealed this ruling to the Court of International Trade (CIT). On October 17, 2003, the CIT issued its decision granting Tak Fat's request to
vacate the scope ruling. See Tak Fat Trading Company, et al., v. United States, Slip Op. 03-134.

## Timken Notice

In its decision in Timken Co. $v$. United States, 893 F.2d 337 (Fed. Cir. 1990) (Timken), the Court of Appeals for the Federal Circuit (CAFC) held that, pursuant to 19 USC 1516(e), the Department must publish notice of a decision of the CIT or the CAFC which is "not in harmony" with the Department's determination. Therefore, publication of this notice fulfills this obligation of the Department. In addition, this notice will serve to continue the suspension of liquidation. If this decision is not appealed, or if appealed, if it is upheld, the Department will amend its scope ruling.
Dated: November 3, 2003.

## [A-583-830]

Stainless Steel Plate in Coils from Taiwan: Final Rescission of Antidumping Duty Administrative Review
AGENCY: Import Administration, International Trade Administration, Department of Commerce.
ACTION: Notice of the Final Rescission of Antidumping Duty Administrative Review of Stainless Steel Plate in Coils from Taiwan.
SUMMARY: On June 4, 2003, the
Department of Commerce ("the Department'") published in the Federal Register the preliminary rescission of its administrative review of the antidumping duty order on stainless steel plate in coils from Taiwan. See Notice of the Preliminary Rescission of Antidumping Duty Administrative Review of Stainless Steel Plate in Coils from Taiwan, 68 FR 33472 (June 4, 2003) ("Preliminary Recession'"). This review covers two manufacturers of the subject merchandise, Yieh United Steel Corporation ("YUSCO"), a Taiwanese producer of subject merchandise, and Ta Chen Stainless Pipe Co., Ltd. ("Ta Chen''), also a Taiwanese producer of subject merchandise. The period of review ("POR") is May 1, 2001 through April 30, 2002.

We preliminarily rescinded this review based on record evidence supporting the conclusion that there were no entries into the United States of subject merchandise during the POR by respondents. See Preliminary Rescission. We are now issuing our final rescission of this review based on evidence on the record indicating that there were no entries into the United States of subject merchandise during the POR from the respondents.
effective date: November 7, 2003.

## FOR FURTHER INFORMATION CONTACT:

Catherine Bertrand or Robert Bolling, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone: (202) 482-3207 or (202) 482-3434 respectively.

## SUPPLEMENTARY INFORMATION:

## Background

On May 21, 1999, the Department of Commerce ("Department") published the antidumping duty order on stainless steel plate in coils from Taiwan. See Antidumping Duty Orders; Certain Stainless Steel Plate in Coils From Belgium, Canada, Italy, the Republic of Korea, South Africa, and Taiwan, 64 FR 27756 (May 21, 1999). On May 6, 2002, the Department published a notice of opportunity to request an administrative review of this order for the period May 1, 2001 through April 30, 2002. See Notice of Opportunity to Request Administrative Review of Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation, 67 FR 30356 (May 6, 2002). On May 7, 2002, Petitioners ${ }^{1}$ timely requested that the Department conduct an administrative review of sales by YUSCO, a Taiwan producer and exporter of subject merchandise, and Ta Chen, also a Taiwan producer and exporter of subject merchandise. On June 25, 2002, in accordance with section 751(a) of the Tariff Act of 1930 as amended ("the Act"), the Department published in the Federal Register a notice of initiation of this antidumping duty administrative review of sales by YUSCO and Ta Chen for the period May 1, 2001 through April 30, 2002. See Notice of Initiation of Antidumping and Countervailing Duty Administrative Reviews and Request for Revocation in Part, 67 FR 42753 (June 25, 2002).

On July 10, 2002, the Department issued its antidumping duty

[^12]questionnaire to YUSCO and Ta Chen. On July 15, 2002, Ta Chen stated that it did not have any U.S. sales, shipments or entries of subject merchandise during the POR, and requested that it not be required to answer the Department's questionnaire. On July 18, 2002, YUSCO stated that it did not have any U.S. sales, shipments or entries of subject merchandise during the POR. On October 8, 2002, the Department sent an inquiry to the U.S. Customs and Border Protection ("Customs") to confirm that YUSCO and Ta Chen had no shipments of subject merchandise into the United States during the POR.

On June 4, 2003, the Department preliminary rescinded the administrative review with respect to Ta Chen and YUSCO based on record evidence and the Customs inquiry, both of which it determined supported the conclusion that there were no entries of subject merchandise during the POR. See Preliminary Rescission. On August 15, 2003, Petitioners filed a case brief. Respondents did not file case briefs. On August 21, 2003, Respondent YUSCO filed a rebuttal brief. Respondent Ta Chen did not file a rebuttal brief. Neither Petitioners nor respondents requested a hearing in the instant review.

## Scope of the Review

For purposes of this review, the product covered is certain stainless steel plate in coils. Stainless steel is an alloy steel containing, by weight, 1.2 percent or less of carbon and 10.5 percent or more of chromium, with or without other elements. The subject plate products are flat-rolled products, 254 mm or over in width and 4.75 mm or more in thickness, in coils, and annealed or otherwise heat treated and pickled or otherwise descaled. The subject plate may also be further processed (e.g., cold-rolled, polished, etc.) provided that it maintains the specified dimensions of plate following such processing. Excluded from the scope of this review are the following: (1) Plate not in coils, (2) plate that is not annealed or otherwise heat treated and pickled or otherwise descaled, (3) sheet and strip, and (4) flat bars. In addition, certain cold-rolled stainless steel plate in coils is also excluded from the scope of these orders. The excluded coldrolled stainless steel plate in coils is defined as that merchandise which meets the physical characteristics described above that has undergone a cold-reduction process that reduced the thickness of the steel by 25 percent or more, and has been annealed and pickled after this cold reduction process. The merchandise subject to this
review is currently classifiable in the HTS at subheadings: 7219.11.00.30,
7219.11.00.60, 7219.12.00.05,
7219.12.00.20, 7219.12.00.25, 7219.12.00.50, 7219.12.00.55,
7219.12.00.65, 7219.12.0070,
7219.12.00.80, 7219.31.00.10,
7219.90.00.10, 7219.90.00.20,
7219.90.00.25, 7219.90.00.60,
7219.90.00.80, 7220.11.00.00,
7220.20.10.10, 7220.20 .10 .15 ,
7220.20.10.60, 7220.20.10.80, 7220.20.60.05, 7220.20.60.10, 7220.20.60.15, 7220.20.60.60, 7220.20.60.80, 7220.90.00.10, $7220.90 .00 .15,7220.90 .00 .60$, and 7220.90.00.80.

Although the HTS subheadings are provided for convenience and Customs purposes, the written description of the merchandise under investigation is dispositive.

## Period of Review

The POR is May 1, 2001 through April 30, 2002.

## Analysis of Comments Received

All issues raised in the case brief and rebuttal brief by parties to this administrative review are addressed in the "Issues and Decision Memorandum" ('Decision Memorandum") from Joseph A. Spetrini, Deputy Assistant Secretary, Import Administration, Group III, to James J. Jochum, Assistant Secretary for Import Administration, dated November 3,2003 , which is hereby adopted by this notice. Petitioners argue that the administrative review should not be rescinded because the Department failed to examine the affiliates of YUSCO and did not require Ta Chen to link its POR sales to pre-suspension entries. Respondent YUSCO argues that the administrative review should be rescinded because evidence on the record supports the conclusion that YUSCO had no entries during the POR. We have determined to rescind this administrative review because the Department's interpretation of its statute and regulations, as affirmed by the Court of Appeals for the Federal Circuit, supports not conducting a administrative review when the evidence on the record indicates that respondents had no entries of subject merchandise during the POR. This interpretation is further supported by the fact that the Department has determined that there have been no entries of respondent's merchandise since before the suspension of liquidation, which leads the Department to determine that merchandise resold by respondents during the POR did not constitute subject merchandise.

A complete list of the issues which parties have raised and to which we have responded, are in the Decision Memorandum which is attached to this notice as an Appendix. Parties can find a complete discussion of all issues raised in this review and the corresponding recommendations in this public memorandum which is on file in the Central Records Unit, Room B-099 of the main Department building. In addition, a complete version of the Decision Memorandum can be accessed directly on the Web at http:// ia.ita.doc.gov/frn/summary/list.htm. The paper copy and electronic version of the Decision Memorandum are identical in content.

## Final Rescission of Review

Pursuant to 19 CFR 351.213(d)(3), the Department may rescind an administrative review, in whole or only with respect to a particular exporter or producer, if the Secretary concludes that, during the period covered by the review, there were no entries, exports, or sales of the subject merchandise, as the case may be. In this case the Department is satisfied, after a review of information on the record, that there were no entries of stainless steel plate in coils produced and exported from Ta Chen or YUSCO during the POR. Therefore, we are rescinding this review with respect to Ta Chen and YUSCO in accordance with 19 CFR 351.213(d)(3). The cash deposit rate for YUSCO will remain at 8.02 percent, for Ta Chen the cash deposit rate will remain at 10.20 percent, and for "all other" producers/ exporters of the subject merchandise the cash deposit rate will remain at 7.39 percent, the rates established in the most recently completed segment of this proceeding. See Notice of Final Results and Rescission in Part of Antidumping Duty Administrative Review: Stainless Steel Plate in Coils From Taiwan, 67 FR 40914 (June 14, 2002). These deposit requirements shall remain in effect until publication of the final results of the next administrative review

## Changes Since the Preliminary Rescission

We have made no changes from the Preliminary Rescission.

## Notification of Interested Parties

This notice serves as a final reminder to importers of their responsibility under 19 CFR $351.402(f)(2)$ to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption
that reimbursement of the antidumping duties occurred and the subsequent assessment of double antidumping duties.
This notice also serves as a reminder to parties subject to administrative protective orders ("APOs") of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305, which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

This issuing and publishing this determination in accordance with sections 751(a)(1) and 777(i) of the Act.
Dated: November 3, 2003.
James J. Jochum,
Assistant Secretary for Import
Administration.

## DEPARTMENT OF COMMERCE

International Trade Administration

## Request for Nominations

AGENCY: International Trade Administration, Trade Development. ACTION: Environmental Technologies Trade Advisory Committee (ETTAC), request for nominations.
SUMmARY: The Environmental
Technologies Trade Advisory Committee (ETTAC) was established pursuant to provisions under Title IV of the Jobs Through Trade Expansion Act, 22. U.S.C. 2151, and under the Federal Advisory Committee Act, 5 U.S.C. App.2. ETTAC was first chartered on

May 31, 1994. ETTAC serves as an advisory body to the Environmental Trade Working Group of the Trade Promotion Coordinating Committee (TPCC), reporting directly to the Secretary of Commerce in his capacity as Chairman of the TPCC. ETTAC advises on the development and administration of policies and programs to expand United States exports of environmental technologies, goods, and services and products that comply with United States environmental, safety, and related requirements.

Membership in a committee operating under the Federal Advisory Committee Act must be balanced in terms of economic subsector, geographic location, and company size. Committee members serve in a representative capacity, and must be able to generally represent the views and interests of a certain subsector of the U.S.
environmental industry. We are seeking senior executive-level company or environmental technologies association candidates. Members of the ETTAC have experience in exporting the full range of environmental technologies products and services including:
(1) Air Pollution Control/Monitoring Equipment;
(2) Analytic Services;
(3) Environmental Energy Sources:
(4) Environmental Engineering and

Consulting Services;
(5) Financial Services;
(6) Process and Prevention Technologies;
(7) Solid and Hazardous Waste Equipment and Management; and
(8) Water and Wastewater Equipment and Services.
The Secretary of Commerce invites nominations to ETTAC of U.S. citizens who will represent U.S. environmental goods and services companies that trade internationally, or trade associations whose members include U.S. companies that trade internationally. Companies must be at least 51 percent beneficiallyowned by U.S. persons. U.S.-based subsidiaries of foreign companies in general do not qualify for representation on the committee.

Nominees will be considered based upon their ability to carry out the goals of ETTAC's enabling legislation as further articulated in its charter. ETTAC's Charter is available on the Internet at http:/!
www.environment.ita.doc.gov. Priority will be given to a balanced representation in terms of point of view represented by various sectors, product lines, firm sizes, and geographic areas. Appointments are made without regard to political affiliation.

Nominees must be U.S. citizens, representing U.S. environmental goods and services firms that trade internationally or provide services in direct support of the international trading activities of other entities.

Self-nominations are accepted. If you are interested in nominating someone to become a member of ETTAC, please provide the following information (2 pages maximum):
(1) Name;
(2) Title;
(3) Work Phone, Fax, and, E-mail Address;
(4) Company or Trade Association Name and Address including Web site Address;
(5) Short Bio of nominee including credentials; and
(6) Brief description of the company or trade association and its business activities; company size (number of employees and annual sales); and export markets served.

Please, do not send company or trade association brochures or any other information.
This information may be e-mailed to Corey_Wright@ita.doc.gov or faxed to the attention of Corey Wright at 202-482-5665, and must be received before the deadline. Nominees selected to ETTAC will be notified.

Deadline: This request will be open until December 31, 2003 , from the date of publication in the Federal Register. FOR FURTHER INFORMATION CONTACT: Corey $W_{\text {right, }}$ Office of Environmental Technologies Industries, Room 1003, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; phone 202-4825225; fax 202-482-5665; e-mail Corey_Wright@ita.doc.gov.

Dated: November 4, 2003.

## DEPARTMENT OF COMMERCE

International Trade Administration
Environmental Technologies Trade Advisory Committee (ETTAC)
AGENCY: International Trade
Administration, U.S. Department of Commerce.
ACTION: Notice of open meeting.
DATE: December 12, 2003.
TIME: 9 a.m. to 12 p.m.
PLACE: U.S. Department of Commerce, 14th Street and Constitution Avenue,

NW., Washington, DC 20230, Room 3407.
summary: The Environmental Technologies Trade Advisory Committee (ETTAC) will hold a plenary meeting on December 12, 2003 at the U.S. Department of Commerce.

The ETTAC will discuss administrative and trade issues including the status of negotiations in regards to environmental technologies trade liberalization, the Asia Development Bank, and preparations for a paper on environmental technologies exports issues. Time will be permitted for public comment. The meeting is open to the public.

Written comments concerning ETTAC affairs are welcome anytime before or after the meeting. Minutes will be available within 30 days of this meeting.

The ETTAC is mandated by Public Law 103-392. It was created to advise the U.S. government on environmental trade policies and programs, and to help it to focus its resources on increasing the exports of the U.S. environmental industry. ETTAC operates as an advisory committee to the Secretary of Commerce and the Trade Promotion Coordinating Committee (TPCC). ETTAC was originally chartered in May of 1994. It was most recently rechartered until May 30, 2004.

For further information phone Corey Wright, Office of Environmental Technologies Industries (ETI), International Trade Administration, U.S. Department of Commerce at (202) 482-5225. This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to ETI at (202) 4825225.

Dated: November 4, 2003.
Carlos F. Montoulieu,
Director, Office of Environmental
Technologies Industries.

## COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of an Import Limit for Certain Cotton Textile Products Produced or Manufactured in the Federative Republic of Brazil

November 3, 2003.
AGENCY: Committee for the -
Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the
Commissioner, Bureau of Customs and Border Protection adjusting a limit.

EFFECTIVE DATE: November 7, 2003. FOR FURTHER INFORMATION CONTACT: Roy Unger, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 4824212. For information on the quota status of this limit, refer to the Quota Status Reports posted on the bulletin boards of each Customs port, call (202) 927-5850, or refer to the Bureau of Customs and Border Protection website at http://www.customs.gov. For information on embargoes and quota reopenings, refer to the Office of Textiles and Apparel website at http:// otexa.ita.doc.gov.

## SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.
The current limit for Category 363 is being increased for carryforward.
A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see Federal Register notice 68 FR 1599, published on January 13, 2003). Also see 67 FR 57406, published on September 10, 2002.
James C. Leonard III,
Chairman, Committee for the Implementation of Textile Agreements.
Committee for the Implementation of Textile Agreements
November 3, 2003.
Commissioner,
Bureau of Customs and Border Protection,
Washington, DC 20229
Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on September 3, 2002, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool and man-made fiber textile products, produced or manufactured in Brazil and exported during the twelve-month period which began on January 1, 2003 and extends through December 31, 2003.

Effective on November 7, 2003, you are directed to increase the current limit for Category 363 to $49,503,927$ numbers ${ }^{1}$, as provided for under the Uruguay Round Agreement on Textiles and Clothing.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

[^13]Sincerely,
James C. Leonard III,
Chairman, Committee for the
Implementation of Textile Agreements.

## COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Import Restraint Limits and Guaranteed Access Levels for Certain Cotton, Wool and ManMade Fiber Textile Products Produced or Manufactured in the Dominican Republic
November 4, 2003.
Agencr: Committee for the Implementation of Textile Agreements (CITA).
ACTION: Issuing a directive to the Commissioner, Bureau of Customs and Border Protection establishing limits and guaranteed access levels

EFFECTIVE DATE: January 1, 2004. FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port, call (202) 927-5850, or refer to the Bureau of Customs and Border Protection website at http:// www.customs.gov. For information on embargoes and quota re-openings, refer to the Office of Textiles and Apparel website at http://otexa.ita.doc.gov.

## SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.
The import restraint limits and Guaranteed Access Levels (GALs) for textile products, produced or manufactured in the Dominican Republic and exported during the period January 1, 2004 through December 31, 2004 are based on limits notified to the Textiles Monitoring Body pursuant to the Uruguay Round Agreement on Textiles and Clothing (ATC).

These specific limits and guaranteed access levels do not apply to goods that qualify for quota-free entry under the Trade and Development Act of 2000.

In the letter published below, the Chairman of CITA directs the Commissioner, Bureau of Customs and Border Protection to establish the 2004 limits and guaranteed access levels.

These limits are subject to adjustment pursuant to the provisions of the ATC and administrative arrangements notified to the Textiles Monitoring Body. However, as the ATC and all restrictions thereunder will terminate on January 1, 2005, no adjustment for carryforward (borrowing from next year's limits for use in the current year) will be available.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see Federal Register notice 68 FR 1599, published on January 13, 2003). Information regarding the availability of the 2004 CORRELATION will be published in the Federal Register at a later date.

Requirements for participation in the Special Access Program are available in Federal Register notice 63 FR 16474 , published on April 3, 1998.

## James C. Leonard III,

Chairman, Committee for the Implementation of Textile Agreements.
Committee for the Implementation of Textile Agreements
November 4, 2003.
Commissioner,
Bureau of Customs and Border Protection,
Washington, DC 20229.
Dear Commissioner: Pursuant to section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended; and the Uruguay Round Agreement on Textiles and Clothing (ATC), you are directed to prohibit, effective on January 1, 2004, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool and man-made fiber textile products in the following categories, produced or manufactured in the Dominican Republic and exported during the twelvemonth period beginning on January 1, 2004 and extending through December 31, 2004, in excess of the following levels of restraint:

| Category | Restraint limit |
| :---: | :---: |
| 338/638 | 1,607,332 dozen. |
| 339/639 .... | 1,912,721 dozen. |
| 340/640 .... | 1,654,659 dozen. |
| 342/642 ...... | 1,164,422 dozen. |
| $\begin{aligned} & 347 / 348 / 647 / \\ & 648 . \end{aligned}$ | 3,960,929 dozen of which not more than $2,092,563$ dozen shall be in Categories 647/648. |
| 351/651 ........ | 1,983,653 dozen. |
| 433 ............... | 24,199 dozen. |
| 442 ................ | 82,158 dozen. |
| 443 ................ | 150,309 numbers. |
| 444 ................ | 82,158 numbers. |
| 448 ................ | 42,324 dozen. |
| 633 ............... | 242,787 dozen. |

The limits set forth above are subject to adjustment pursuant to the provisions of the ATC and administrative arrangements notified to the Textiles Monitoring Body.
Products in the above categories exported during 2003 shall be charged to the applicable category limits for that year (see directive dated October 18,2002) to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such products shall be charged to the limits set forth in this directive.
Also pursuant to the ATC, and under the terms of the Special Access Progran, as set forth in 63 FR 16474 (April 3, 1998), effective on January 1, 2004, you are directed to establish guaranteed access levels for properly certified textile products in the following categories which are assembled in the Dominican Republic from fabric formed and cut in the United States and re-exported to the United States from the Dominican Republic during the period January 1, 2004 through December 31, 2004:

| Category | Guaranteed access level |
| :---: | :---: |
| 338/638 | 1,150,000 dozen. |
| 339/639 | 1,150,000 dozen. |
| 340/640 ......... | 1,000,000 dozen. |
| 342/642 ..... | 1,000,000 dozen. |
| $\begin{aligned} & 347 / 348 / 647 / \\ & 648 . \end{aligned}$ | 8,050,000 dozen. |
| 351/651 ......... | 1,000,000 dozen. |
| 433 | 21,000 dozen. |
| 442 | 65,000 dozen. |
| 443 | 50,000 numbers. |
| 444 | 30,000 numbers. |
| 448 | 40,000 dozen. |
| 633 ............... | 60,000 dozen. |

Any shipment for entry under the Special Access Program which is not accompanied by a valid and correct certification in accordance with the provisions of the certification requirements established in the directive of February 25, 1987 (52 FR 6595), as amended, shall be denied entry unless the Government of the Dominican Republic authorizes the entry and any charges to the appropriate specific limits. Any shipment which is declared for entry under the Special Access Program but found not to qualify shall be denied entry into the United States.

These specific limits and guaranteed access levels do not apply to goods that qualify for quota-free entry under the Trade and Development Act of 2000.

In carrying out the above directions, the Commissioner, Bureau of Customs and Border Protection should construe entry into the United States for consumption to include entry for consumption into the

## Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of U.S.C.553(a)(1).

Sincerely,

## James C. Leonard III,

Chairman, Committee for the Implementation of Textile Agreements.

For information on embargoes and quota reopenings, refer to the Office of Textiles and Apparel website at http:// otexa.ita.doc.gov.

## SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.

The import restraint limit for textile products, produced or manufactured in Fiji and exported during the period January 1, 2004 through December 31, 2004 is based on a limit notified to the Textiles Monitoring Body pursuant to the Uruguay Round Agreement on Textiles and Clothing (ATC).

In the letter published below, the Chairman of CITA directs the Commissioner, Bureau of Customs and Border Protection to establish the limit for the 2004 period.

This limit is subject to adjustment pursuant to the provisions of the ATC and administrative arrangements notified to the Textiles Monitoring Body. However, as the ATC and all restrictions thereunder will terminate on January 1, 2005, no adjustment for carryforward (borrowing from next year's limits for use in the current year) will be available.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see Federal Register notice 68 FR 1599,
published on January 13, 2003).
Information regarding the availability of the 2004 CORRELATION will be published in the Federal Register at a later date.

James C. Leonard III,
Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements
November 3, 2003.
Commissioner,
Bureau of Customs and Border Protection, Washington, DC 20229.
Dear Commissioner: Pursuant to section 204 of the Agricultural Act of 1956, as amended ( 7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended; and the Uruguay Round Agreement on Textiles and Clothing (ATC), you are directed to prohibit, effective on January 1, 2004, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton and man-made fiber textile products in Categories 338/339/638/639, produced or manufactured in Fiji and exported during the twelve-month period beginning on January 1, 2004 and extending through December 31, 2004, in excess of $2,368,663$ dozen of which not more than $1,973,889$ dozen shall be in Categories 338-S/339-S/638-S/639-S ${ }^{1}$

The limit set forth above is subject to adjustment pursuant to the provisions of the ATC and administrative arrangements notified to the Textiles Monitoring Body.

Products in the above categories exported during 2003 shall be charged to the applicable category limit for that year (see directive dated October 8, 2002) to the extent of any unfilled balance. In the event the limit established for that period has been exhausted by previous entries, such products shall be charged to the limit set forth in this directive.

In carrying out the above directions, the Commissioner, Bureau of Customs and Border Protection should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.
The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

## COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

## Adjustment of Import Limits for Certain

 Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in the Socialist Republic of VietnamNovember 3, 2003.
AGENCY: Committee for the
Implementation of Textile Agreements (CITA).
ACTION: Issuing a directive to the Commissioner, Bureau of Customs and Border Protection.

Effective date: November 7, 2003. FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port, call (202) 927-5850, or refer to the Bureau of Customs and Border Protection website at http:// www.customs.gov. For information on embargoes and quota re-openings, refer to the Office of Textiles and Apparel website at http://otexa.ita.doc.gov.

## SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.
The current limits for certain categories are being adjusted for swing. A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see Federal Register notice 68 FR 1599, published on January 13, 2003). Also see 68 FR 26575, published on May 16, 2003.

## James C. Leonard III,

Chairman, Committee for the Implementation of Textile Agreements.
Committee for the Implementation of Textile Agreements
November 3, 2003.
Commissioner,
Bureau of Customs and Border Protection, Washington, DC 20229
Dear Commissioner: This directive
amends, but does not cancel, the directive
issued to you on May 12, 2003, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool and man-made fiber textiles and textile products, produced or manufactured in Vietnam and exported during the twelve-month period which began on May 1, 2003 and extends through December 31, 2003.
Effective on November 7, 2003, you are directed to adjust the limits for the following categories, as provided for under the terms of the current bilateral textile agreement between the Governments of the United States and Vietnam:

| Category | Restraint limit ${ }^{1}$ |
| :---: | :---: |
| 333 | 15,440 dozen. |
| 338/339 .................. | 10,063,083 dozen. |
| 434 | 9,096 dozen. |
| 435 ........................ | 26,267 dozen. |
| 448 ........................ | 15,713 dozen. |

${ }^{1}$ The limits have not been adjusted to account for any imports exported after April 30, 2003.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,
James C. Leonard III,

## Information Collection Requirement; Defense Federal Acquisition Regulation Supplement; DoD Pilot Mentor-Protege Program

AGENCY: Department of Defense (DoD). ACTION: Notice and request for comments regarding a proposed extension of an approved information collection requirement.

SUMMARY: In compliance with section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), DoD announces the proposed extension of a public information collection requirement and seeks public comment on the provisions thereof. DoD invites comments on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of DoD , including whether the information will have practical utility; (b) the accuracy of the estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the
burden of the information collection on respondents, including the use of automated collection techniques or other forms of information technology. The Office of Management and Budget (OMB) has approved this information collection for use through March 31, 2004. DoD proposes that OMB extend its approval for three additional years. DATES: DoD will consider all comments received by January 6, 2004.
ADDRESSES: Respondents inay submit comments via the Internet at http:// emissary.acq.osd.mil/dar/dfars.nsf/ pubcomm. As an alternative, respondents may e-mail comments to dfars@osd.mil. Please cite OMB Control Number 0704-0332 in the subject line of e-mailed comments.

Respondents that cannot submit comments using either of the above methods may submit comments to: Defense Acquisition Regulations Council, Attn: Mrs. Karen Fischetti, OUSD(AT\&L)DPAP(DAR), IMD 3C132, 3062 Defense Pentagon, Washington, DC 20301-3062. Facsimile (703) 602-0350. Please cite OMB Control Number 07040332.

At the end of the comment period, interested parties may view public comments on the Internet at http:// emissary.acq.osd.mil/dar/dfars.nsf. FOR FURTHER INFORMATION CONTACT: MIS. Karen Fischetti, at (703) 602-0288. The information collection requirements addressed in this notice are available electronically via the Internet at: http://www.acq.osd.mil/dp/dars/ dfars.html. Paper copies are available from Mrs. Karen Fischetti, OUSD(AT\&L)DPAP(DAR), IMD 3C132, 3062 Defense Pentagon, Washington, DC 20301-3062.

## SUPPLEMENTARY INFORMATION:

Title and OMB Number: Defense Federal Acquisition Regulation Supplement (DFARS) Appendix I, DoD Pilot Mentor-Protege Program; OMB Control Number 0704-0332.

Needs and Uses: DoD needs this information to evaluate whether the purposes of the DoD Pilot MentorProtege Program have been met. The purposes of the Program are to (1) provide incentives to major DoD contractors to assist protege firms in enhancing their capabilities to satisfy contract and subcontract requirements; (2) increase the overall participation of protege firms as subcontractors and suppliers; and (3) foster the establishment of long-term business relationships between protege firms and major DoD contractors. This Program implements Section 831 of the National Defense Authorization Act for Fiscal Year 1991 (Pub. L. 101-510) and section

## 811 of the National Defense

Authorization Act for Fiscal Year 2000 (Pub. L. 106-65) (10 U.S.C. 2302 note). Participation in the Program is voluntary.
Affected Public: Businesses or other for-profit organizations.
Annual Burden Hours: 931 (includes 538 recordkeeping hours).
Number of Respondents: 269.
Responses Per Respondent: 1.5.
Annual Responses: 393.
Average Burden Per Response: 1 hour reporting; 3.7 hours recordkeeping.

Frequency: Semiannually (mentor); Annually (protege).

## Summary of Information Collection

DFARS Appendix I-111(a) requires mentor firms to report on the progress made under active mentor-protege agreements semiannually for the periods ending March 31st and September 30th. The September 30th report must address the entire fiscal year. Reports must include-
(1) Data on performance under the mentor-protege agreement, including dollars obligated, expenditures, credit taken under the Program, applicable subcontract awards under DoD contracts, developmental assistance provided, impact of the agreement, and progress of the agreement; and
(2) For each contract where developmental assistance was credited toward an SDB subcontracting goal, a copy of Standard Form 294,
Subcontracting Report for Individual Contracts, with a statement identifying-
(i) The amount of dollars credited to the applicable subcontracting goal as a result of developmental assistance provided to protege firms under the Program; and
(ii) The number and dollar value of subcontracts awarded to the protege firm(s), broken out per protege.

DFARS Appendix I-111(b) requires the mentor firm and the protege firm to annually provide data on the progress made by the protege firm in employment, revenues, and participation in DoD contracts during each fiscal year of the Program participation term and each of the two fiscal years following the expiration of the Program participation term. During the Program participation term, the firms may provide this data as part of the mentor report required by l-111(a) for the period ending September 30th.

## [OMB Control No. 9000-0094]

## Federal Acquisition Regulation; Information Collection; Debarment and Suspension

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).
ACTION: Notice of request for public comments regarding an extension to an existing OMB clearance.
Summary: Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the Federal Acquisition Regulation (FAR) Secretariat will be submitting to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning debarment and suspension. The OMB clearance expires January 31, 2004.

DATES: Submit comments on or before January 6, 2004.
ADDRESSES: Subinit comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to the General Services Administration, FAR Secretariat (MVA), 1800 F Street, NW., Room 4035, Washington, DC 20405. Please cite OMB Control No. 9000-0094, Debarment and Suspension, in all correspondence.
FOR FURTHER INFORMATION CONTACT:
Craig Goral, Acquisition Policy
Division, GSA (202) 501-3856.
SUPPLEMENTARY INFORMATION:

## A. Purpose

The FAR requires contracts to be awarded to only those contractors determined to be responsible. Instances where a firm or its principals liave been indicted, convicted, suspended, proposed for debarment, debarred, or had a contract terminated for default are critical factors to be considered by the contracting officer in making a responsibility determination. This certification requires the disclosure of this information.

## B. Annual Reporting Burden

Respondents: 89,995.
Responses per respondent: 12.223.
Total Responses: 1,100,000.

Hours Per Response: 0.0833 hrs . Total Burden Hours: 91,667. Obtaining Copies of Proposals: Requesters may obtain a copy of the information collection documents from the General Services Administration, FAR Secretariat (MVA), Room 4035, Washington, DC 20405, telephone (202) 501-4755. Please cite OMB Control No. 9000-0094, Debarment and Suspension, in all correspondence.
Dated: November 3, 2003.

DEPARTMENT OF ENERGY
Office of Nonproliferation Policy; Proposed Subsequent Arrangement
AGENCY: Department of Energy.
ACTION: Notice of subsequent arrangement.

SUMMARY: This notice has been issued under the authority of Section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160). The Department is providing notice of a proposed "subsequent arrangement" under the Agreement for Cooperation Concerning Civil Uses of Atomic Energy between the United States and Canada and Agreement for Cooperation in the Peaceful Uses of Nuclear Energy between the United States and the European Atomic Energy Community (EURATOM).

This subsequent arrangement concerns the retransfer of $266,197 \mathrm{~kg}$ of U.S.-origin natural uranium hexafluoride, $180,000 \mathrm{~kg}$ of which is uranium, from Cogema Resources Inc., Saskatoon, Saskatchewan, Canada to Eurodif Production, Pierrelatte France. The material, which is now located at Cameco Corp., Port Hope, Ontario. will be transferred to Eurodif for enrichment. Upon completion of the enrichment, the material will be retransferred to the Kansai Electric Power Co. Inc, Osaka, Japan, the Chugoku Electric Power Co. Inc, Hiroshima, Japan, and the Tohoku Electric Power Co Inc., Miyagi, Japan for use as fuel. The uranium hexafluoride was originally obtained by the Cameco Corp. from Power Resources, Inc. pursuant to export license number XSOU8744.

In accordance with Section 131 of the Atomic Energy Act of 1954, as amended, we have determined that this subsequent arrangement is not inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy. Trisha Dedik,
Director, Office of Nonproliferation Policy. [FR Doc. 03-28211 Filed 11-6-03; 8:45 am] BILLING CODE 6450-01-P

## DEPARTMENT OF ENERGY

## Office of Energy Efficiency and Renewable Energy

## Energy Conservation Program for Consumer Products: Granting of the Application for Interim Waiver and Publishing of the Petition for Waiver of Fisher \& Paykel Appliances Limited From the DOE Clothes Washer Test Procedure

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.
ACTION: Notice of petition for waiver and solicitation of comments.
SUMMARY: Today's notice grants an Interim Waiver to Fisher \& Paykel Appliances Limited (Fisher \& Paykel), publishes Fisher \& Paykel's Petition for Waiver from the existing Department of Energy (DOE or Department) clothes washer test procedure for its IW model clothes washer which has an adaptive control system, and seeks comment on that Petition for Waiver. The DOE clothes washer test procedure requires manufacturers of non-conventional clothes washers with adaptive control systems other than adaptive water fill control systems to seek such a waiver.

Fisher \& Paykel seeks a waiver because its clothes washer model IW has an adaptive control system with two sensing modes, water level sensing and fabric sensing, to assess the type of load in the washer. This model does not have the conventional "normal" cycle used by the DOE clothes washer test procedure set forth in 10 CFR part 430, subpart B, appendix J, or the energy test cycle for washing cotton or linen clothes used in Appendix J1. Instead, Fisher \& Paykel seeks to test the washer by determining a cycle that is equivalent to the normal cycle and the energy test cycle. The company proposes to test the default cycle that begins when a user pushes the power button to start the washer. This default cycle is the midpoint of the five settings controlled by the washer's "How Dirty" button, setting three. This waiver seeks only to confirm which test cycle to use. Fisher

- \& Paykel will then follow the remaining steps of the existing test procedure to determine the energy consumption of the clothes washer. The Department is soliciting comments, data, and information regarding the Petition for Waiver.
DATES: The Department will accept comments, data, and information regarding this Petition for Waiver not later than December 8, 2003.

ADDRESSES: Please submit comments, data, and information electronically if possible. Comments should be sent to the following Internet address:
clotheswasherwaiver@ee.doe.gov.
Electronic comments must be submitted in a WordPerfect, Microsoft Word, or PDF format, and avoid the use of special characters or any form of encryption. Comments in electronic format should be identified by the case number CW012 , and wherever possible carry the electronic signature of the author. Absent an electronic signature, comments submitted electronically must be followed and authenticated by submitting the signed original paper document. No telefacsimiles (telefaxes) will be accepted.
Written (paper) comments may be submitted to: Ms. Brenda EdwardsJones, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies Program, EE-2J, Case Number CW-012, 1000 Independence Avenue, SW. Washington, DC 20585-0121, (202) 5862945. Please submit one signed copyno telefacsimiles.

You may read copies of the public comments received in the resource room of the appliance office of the Building Technologies Program, room 1J-018 of the Forrestal Building at the U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC, between the hours of 9 a.m. and 4 p.m., Monday through Friday, except Federal holidays. Please call Ms. Brenda Edwards-fones at the above telephone number for additional information regarding visiting the resource room.
FOR FURTHER INFORMATION CONTACT:
Barbara Twigg, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, EE-2J, 1000 Independence Avenue, SW.,
Washington, DC 20585-0121, (202) 5868714, e-mail: barbara.twigg@ee.doe.gov; or Francine Pinto, Esq., U.S. Department of Energy, Office of General Counsel, GC-72, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 5867432, e-mail:

## Francine.Pinto@hq.doe.gov.

SUPPLEMENTARY INFORMATION: Title III of the Energy Policy and Conservation Act (EPCA) sets forth a variety of provisions designed to improve energy efficiency. Part B of title III (42 U.S.C. 6291-6309) provides for the Energy Conservation Program for Consumer Products Other Than Automobiles. Among its provisions, it requires DOE to prescribe standardized test procedures to measure the energy consumption of certain consumer products, including clothes
washers. The intent of the test procedures is to provide a comparable measure of energy consumption that will assist consumers in making purchasing decisions. The test procedures for clothes washers are set forth in 10 CFR part 430, subpart B, appendix J and J1.
The Department's regulations in 10 CFR 430.27, set forth a process by which an interested person may seek a waiver and an interim waiver from the test procedure requirements for a covered consumer product. The waiver process allows the Assistant Secretary for Conservation and Renewable Energy (now known as the Assistant Secretary for Energy Efficiency and Renewable Energy) to waive temporarily test procedures for a particular basic model when a petitioner shows that the basic model contains one or more design characteristics which prevent testing according to the prescribed test procedures, or when the prescribed test procedures may evaluate the basic model in a manner so unrepresentative of its true energy consumption as to provide materially inaccurate comparative data. Waivers generally remain in effect until a revised test procedure becomes effective, thereby resolving the problem that is the subject of the waiver.

An Interim Waiver will be granted by the Assistant Secretary for Energy Efficiency and Renewable Energy if it is determined that the applicant will experience economic hardship if the Application for Interim Waiver is denied, if it appears likely that the Petition for Waiver will be granted, and/ or the Assistant Secretary determines that it would be desirable for public policy reasons to grant immediate relief pending a determination on the Petition for Waiver. 10 CFR 430.27 (g). An Interim Waiver remains in effect for a period of 180 days from the date of issuance or until DOE issues its determination on the Petition for Waiver, whichever is sooner, and may be extended for an additional 180 days, if necessary. 10 CFR 430.27(h).

In addition to the waiver process outlined in 10 CFR 430.27, the clothes washer test procedure published August 27, 1997, specifically requires manufacturers of clothes washers with an adaptive control system, other than an adaptive water fill control system, to obtain a waiver to establish an acceptable test procedure for each such clothes washer. 62 FR 45501, 45514. Neither Appendix J (in effect through December 31, 2003) nor Appendix J1 (effective January 1, 2004) of that test procedure provides a means for determining the energy consumption of
a clothes washer with an adaptive control system.

On March 26, 2003, Fisher \& Paykel filed an Application for Interim Waiver and a Petition for Waiver regarding its clothes washer model IW which has an adaptive control system that affects more than the water fill and cannot be tested accurately using the existing test procedure. Instead of having a means to select a "normal" cycle for testing (per Appendix J) or an energy test cycle for washing cottons and linens for testing (per Appendix J1), the machine features two sensing modes, water level sensing and fabric sensing, to determine the wash action. Both sensing modes employ specific agitator strokes and then assess the load's response to those agitator strokes. When a customer pushes the start button, the IW washer will, like many washers, go through an automatic sensing process to determine the water level. However, it will also sense the fabric type of the load and assign an agitator profile for that cycle. With additional input from the "How Dirty" setting, the washer will automatically select the appropriate wash action. Although users can adjust the "How Dirty" setting according to their assessment of the dirtiness of the load of clothes, if no choice is made, the power/start button will automatically select the midpoint of the "How Dirty" response as the default setting. This midpoint, setting three out of five possible settings, instructs the washer to wash on a medium soil level, the soil level suggested in the Fisher \& Paykel user guide for washing a normal wash load with the IW model. Fisher \& Paykel proposes to test the IW clothes washer on this midpoint, default setting activated by the power/start button, believing that it is the closest equivalent to a "normal" cycle. After the initiation of the default cycle, Fisher \& Paykel will conduct the remainder of the energy consumption test according to the established test procedure.

Fisher \& Paykel states that the "How Dirty" setting only affects the energy consumed by the motor, a small proportion of the total energy consumed by the wash cycle. The company provided test data to show the energy used per cycle by the five "How Dirty" settings, ranging from $0.086 \mathrm{kWhr} /$ cycle to $0.121 \mathrm{kWhr} /$ cycle. Since the variation in energy consumption among the five "How Dirty" settings will be insignificant compared to the total energy consumption of the clothes washer, the selection of the default cycle at the midpoint setting would seem to provide a fair equivalent of the traditional "normal" cycle for testing.

On August 4, 2003, Fisher \& Paykel certified to the Department that it had circulated copies of its Application for Interim Waiver and Petition for Waiver to all known clothes washer manufacturers for comment. On September 15, 2003, the Department received copies of questions submitted by members of the Association of Home Appliance Manufacturers (AHAM) to

- Fisher \& Paykel, in response to the circulated waiver, along with minutes from a conference call held on August 21, 2003, between AHAM Home Laundry Specialists and Fisher \& Paykel, to discuss the waiver. The AHAM members requested clarifications on two points: (1) Confirmation that the \#3 "How Dirty" setting met the 70 percent minimum run time requirement for the test procedure, and (2) Fisher \& Paykel's intent regarding the selection of both maximum and minimum spin cycles. Subsequent to this discussion, Fisher \& Paykel made changes to the waiver to clarify these issues. It added a table to show the wash times for each "How Dirty" setting and language to make clear that both the maximum and minimum spin speeds would be included in the test. Fisher \& Paykel resubmitted its waiver to the Department with the revisions requested by the AHAM clothes washer
manufacturers on August 31, 2003. On September 15, 2003, AHAM reported to the Department that the changes made to the waiver by Fisher \& Paykel were acceptable to its members. DOE received no additional comments.

Based on the above, the Department agrees that the Fisher \& Paykel IW clothes washer, using an adaptive control system without a "normal" cycle, has a design characteristic which prevents the company from testing that model according to the prescribed test procedures. Because Fisher \& Paykel has suggested a reasonable method for selecting an equivalent cycle for testing and will conduct the remainder of the test procedure according to the established DOE test procedure, the Department believes that it is likely that this Petition for Waiver will be granted. To deny Fisher \& Paykel the ability to test and market an adaptive control clothes washer in the United States would discourage innovation, deny consumers new options in clothes washer features, and create economic hardship for the company.

The Department is therefore granting Fisher \& Paykel the Interim Waiver it has requested for its IW clothes washer. Fisher \& Paykel shall be permitted to test its adaptive control clothes washer using the default cycle which begins when a consumer presses the power/
start button and does not manually select an alternative "How Dirty" setting.
This Interim Waiver is based upon the presumed validity of statements and all allegations submitted by the company. This Interim Waiver may be removed or modified at any time upon a determination that the factual basis underlying the Application is incorrect.
This Interim Waiver shall remain in effect for a period of 180 days after issuance or until DOE acts on the Petition for Waiver, whichever is sooner, and may be extended for an additional 180-day period, if necessary. Pursuant to 10 CFR 430.27 (b), DOE is hereby publishing the "Petition for Waiver" in its entirety. The Petition contains no confidential information. The Department solicits comments, data, and information respecting the Petition. Any person submitting written comments to DOE concerning either the Petition for Waiver or Interim Waiver must also send a copy of such comments to the petitioner. 10 CFR $430.27(\mathrm{~b})(1)(\mathrm{iv})$ and 430.27 (d).

Issued in Washington, DC, on October 30, 2003.

David K. Garman.
Assistant Secretary, Energy Efficiency and Renewable Energy.

## Application for Interim Waiver and Petition for Waiver for App J and App J1 of Subpart B, CFR Part 430, Test Method for Clothes Washers with Adaptive Control.

Dear Assistant Secretary,
This application for an Interim Waiver and Petition for Waiver is submitted pursuant to 10 CFR 430.27 , which provides for modification of the test method if the machine has characteristics that prevent it being tested to the relevant Appendix.

Clothes washers must be tested to App J for the EnergyGuide label and to App J1 for EnergyStar. Both these Appendices have a definition for Adaptive Control Clause 1.1. At the end of both of these definitions is a note stating that if a machine has adaptive control then a waiver to establish an acceptable test procedure, must be applied for.

Fisher \& Paykel Appliances seeks to test its IW model washer to the DOE requirements and cannot do so as this model has adaptive control.

This waiver seeks to determine the equivalent of the Normal Cycle for J (and Energy Test Cycle for J 1 ) and hence confirm the test cycle. Once this is determined then either J or J 1 procedures can be applied as is and no deviations are sought in this waiver to either of the actual test procedures.

## IW Washer Description.

IW is a vertical axis high efficiency clothes washer with 1000 rpm spin speed. It is based on the GWL11 model that is currently marketed but has a different user interface. This model has 2 sensing modes:

- Water level sensing.
- Fabric sensing.

Both sensing modes employ special specific agitator strokes and then assess the load's response to those agitator strokes.

The washer has 4 main buttons: a 'Power', 'How Dirty', 'Fabric Care', and 'StartPause' buttons. The washer does not have a 'normal' cycle that the user can select as such. A console photo is attached at the end of this waiver application.

- The 'Power' button turns the washer on and sets it to 'How Dirty' setting 3 and 'Fabric Care' on Auto sensing. .
- 'How Dirty' button is the main customer input. The "How Dirty" level is indicated on the washer console by a column of LEDS ranging from 1 to 5 . The washer is programmed to default to level 3 (midpoint) when the 'Power' button is pushed. It can then be increased or decreased by the customer to suit the requirements for the particular load being washed. The User Guide for this washer states: "For a normal wash load we suggest the medium soil level ..."
- 'Fabric Care' button defaults to 'Auto sensing' when the washer is turned on. This button is only used to select other (than normal) cycles such as Permanent Press, Wool or Handwash. As these are not cycles ever tested by DOE this button is not used for testing.
- 'Start/Pause' starts the washer with either the default settings or with any changes that the customer has made.

There is also an LCD screen with several buttons. This is used to enter other modes such as wash temperature selection, time delay, spin speed etc. The only use for these in $\mathrm{J} / \mathrm{J} 1$ testing is for the wash temperature and spin speed selection. Different values of each of these parameters can be selected by using the LCD screen. The waiver is not required and has no effect on these selections. Hence the screen will be used for selecting both the wash temperature, and the maximum and minimum spin speeds to give values of RMCmax and RMCmin for use in the test method.

When the 'Start/Pause' button is pushed the washer will start to fill and go through an automatic sensing routine to determine the water level. The washer will then sense the fabric type of the load and assign an 'agitator profile' for that cycle.
The agitator profile determines the wash action depending on the 'How Dirty' setting, water level, and type of clothes load. This wash action will come from a table of standard, predetermined wash actions. The wash process is different to traditional washers. The wash sequence is as follows. Washing takes place during items $b, c \& d$.
a) Fill with sufficient water to recirculate.
b) Begin the washing action by recirculating the high concentration detergent solution.
c) Fill to normal wash level.
d) Standard agitate wash.
e) Drain

The times for items b \& d can vary for different 'How Dirty' settings but are incorporated in the software and are not independently variable by the customer. The 'How Dirty' button controls a number of parameters. These include agitator speed as well as recirculation and agitate times. There is no separate wash time setting or adjustment.

Below is a table showing the various wash times for our current production washer for the Australian/New Zealand market. The washer usually senses 'Medium' for the DOE load.

|  | 'How Dirty' Setting - Wash Times. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1 |  |  | 2 |  |  | 3 |  |  | 4 |  |  | 5 |  |  |
|  |  |  |  |  |  | E $\underline{E}$ 5 5 3 3 |  |  |  | $\begin{aligned} & \stackrel{0}{\underline{E}} \\ & \dot{\underline{E}} \\ & \dot{U} \\ & \dot{U} \\ & \mathbb{X} \end{aligned}$ |  |  |  |  | $\begin{aligned} & 0 \\ & \underline{E} \\ & \frac{5}{\infty} \\ & \frac{5}{3} \\ & 3 \end{aligned}$ |
| Medium (Minutes) | 2 | 4 | 6 | 3 | 6 | 9 | 5 | 8 | 13 | 5 | 10 | 15 | 5 | 12 | 17 |

Hence Setting 3 wash time ( 13 minutes), is greater than $70 \%$ of the maximum wash time of Setting 5 ( 17 mins). See clause 2.10.

As stated the 'How Dirty' button has 5 settings. The current default is the midpoint, setting 3. This means that when the washer is turned on (push the 'Power' button), the ' 3 ' LED is illuminated and the washer will wash on this 'medium soil' level when the 'Start/Pause' button is pushed. A customer can adjust the 'How Dirty' setting by pushing either the 'Up' or 'Down' buttons. It is proposed to test the IW on this midpoint, which is the default setting.
Changing the 'How Dirty' setting only affects the energy consumed by the motor. This is a small proportion of the total energy consumed. The following graphs demonstrate this.

Graph 1: Energy/cycle for different "How Dirty" settings.
(Motor only and for complete washer)

The above figures are based on limited, early testing. While the final results may differ slightly, the relative differences should not vary.

The next graph shows the effect on annual consumption
Graph 2: Annual Energy (Equivalent to Energy on 'J1 Label').

## CFR430 Subpart B, App J \& J1

Current Status.
Fisher \& Paykel Appliances intends to market a model of clothes washer that has adaptive control in North America. Adaptive control is not covered by these test methods. Many other washers on the US market have water level sensing but Fisher \& Paykel Appliances knows of no other product that has fabric sensing and hence adaptive control.

Appendix J.
Appendix $J$ defines the Normal Cycle as
Clause 1.14 Normal cycle means the cycle recommended by the manufacturer for washing cotton and/or linen clothes.

The settings for the Normal Cycle are referred to in Clause 2.11.1 as part of the Testing Conditions.

Appendix J1.
Appendix J 1 refers to that cycle as the Energy Test Cycle (Clause 1.7), which is called up in Clause 3.2

[^15]App J1. Clause 1.7 Energy Test Cycle.
For the Fisher \& Paykel IW the Energy Test Cycle is Setting 3 on the 'How Dirty' button. As well as being the midpoint it is where the washer defaults to when turned on.

Other options considered were:

- To test on the highest possible 'How Dirty' setting. Clearly this is unfair as research has shown that about $65 \%$ of customers do not change the setting from default. Those that do change it can either increase it or decrease it. Note however changes to this setting only affect motor energy, which is a small percentage of the total energy.
- Testing to the lowest, midpoint and highest setting and then applying relevant usage factors. There is no relevant data on which to provide a basis for any Usage Factors.
- At the end of both J (Section 7) and J1 (Section 6), there is provision for a field test to provide comparative results. Consideration was given to this. However it is very difficult to test an adaptive control washer. Customers take some time to adapt to using the features especially ones that are totally different to those they have used before.

## Interim Waiver.

Fisher \& Paykel Appliances also requests immediate relief by the granting of an Interim Waiver for washer model IW.

## Likely Success of Waiver.

The Petition for Waiver is likely to be granted as Fisher \& Paykel Appliances is not seeking to drastically change a test method but merely to confirm the cycle to which the existing test method is applied. We do not feel that this is a particularly radical step and that such innovation must be allowed onto the market.

## Economic Hardship.

Fisher \& Paykel Appliances currently markets only 1 model of washer in the US. In its major other markets (Australia \& New Zealand), many models are marketed, including the local equivalent of the IW. Experience there has proved the sensing technology in the IW is an innovation that provides customers with real benefits.

Fisher \& Paykel Appliances needs to introduce a wider model range. Lack of a test method must never be allowed to hinder innovation.

Fisher \& Paykel Appliances wishes to maintain its position as an innovator in the top loading clothes washer market and as such needs to keep producing control systems that optimize customer benefits.

Accompanying this application is the User Guide and an interactive CD that are supplied with the equivalent model locally. These will give a good understanding of the product function.

## DEPARTMENT OF ENERGY

## Western Area Power Administration

Pacific Northwest-Pacific Southwest Intertie Project-Firm and Nonfirm Transmission Service Rates-Rate Order No. WAPA-108
agency: Western Area Power Administration, DOE.
ACTION: Notice of rate order.
SUMMARY: This action is taken to extend the existing Pacific Northwest-Pacific Southwest Intertie Project (AC Intertie) firm point-to-point transmission service rate for the 230/345-kilovolt (kV) transmission system, Rate Order No. WAPA-76, and firm point-to-point transmission service rate for the $500-\mathrm{kV}$ transmission system, and the nonfirm point-to-point transmission service rate for the $230 / 345 / 500-\mathrm{kV}$, Rate Order No. WAPA-91, through December 31, 2006. AC Intertie Project rates will expire December 31, 2003.
FOR FURTHER INFORMATION CONTACT: Mr. Jack Murray, Rates Team Lead, Desert Southwest Customer Service Region, Western Area Power Administration, P.O. Box 6457, Phoenix, AZ 850056457, (602) 352-2442, or e-mail jmurray@wapa.gov.
SUPPLEMENTARY INFORMATION: By Delegation Order No. 00-037.00 effective December 6, 2001, the Secretary of Energy delegated: (1) The authority to develop long-term power and transmission rates on a nonexclusive basis to Western's Administrator; (2) the authority to confirm, approve, and place such rates into effect on an interim basis to the Deputy Secretary; and (3) the authority to confirm, approve, and place into effect on a final basis, to remand, or to disapprove, such rates to the Federal Energy Regulatory Commission (FERC).
Western's firm point-to-point
transmission service rate for the AC Intertie $230 / 345-\mathrm{kV}$ transmission system was revised through Rate Order No. WAPA-76 and submitted to FERC for confirmation and approval on February 8, 1999. On June 22, 1999, in Docket No. EF99-5191-000, 87 FERC II 61,346, FERC issued an order confirming, approving, and placing into effect on a final basis the firm point-to-point transmission service rate of $\$ 12.00$ / kilowattyear for the AC Intertie 230/345kV transmission system. The rate was approved for 5 years from January 1, 1999, to December 31, 2003.

During the firm point-to-point transmission service rate development for the AC Intertie 230/345-kV transmission system (Rate Order No. WAPA-76), Western determined that it would take about 10 years for the AC Intertie $500-\mathrm{kV}$ transmission system to be subscribed to a level sufficient to meet its own revenue repayment requirements. The ratesetting Power Repayment Study (PRS) established for the AC Intertie 230/345/500-kV transmission system (Rate Order No. WAPA-76) reflected the phasing-in of AC Intertie $500-\mathrm{kV}$ transmission system revenues starting in fiscal year (FY) 1999 through FY 2008. The projected firm transmission sales in the $500-\mathrm{kV}$ transmission system PRS assume that in 10 years the $500-\mathrm{kV}$ Project will be economically viable and capable of demonstrating repayment. The PRS was programmed for first year sales of 62.5 megawatt (MW) and annual increases of 100 MW through the tenth year. Based on that projection, the total sales target projected at the end of fiscal year 2003 was 562.5 MW . The $500-\mathrm{kV}$ system contractual commitments are currently 664 MW. The 230/345-kV system contractual commitments are $1,059 \mathrm{MW}$. The total combined firm transmission sales beginning in FY 2004 is projected to be $1,723 \mathrm{MW}$. This ratesetting PRS methodology remains valid. Projected revenue levels from sales of firm and nonfirm point-to-point transmission service and miscellaneous items will recover project expenses and capital requirements through FY 2049 for the AC Intertie 230/345/500-kV

## transmission system.

On August 15, 2000, the Deputy Secretary approved Rate Order WAPA91. This extended the existing firm point-to-point transmission service rate of $\$ 17.23 /$ kilowattyear for the AC Intertie $500-\mathrm{kV}$ transmission system, and the existing nonfirm point-to-point transmission service rate of 2.00 mills/ kWh for the AC Intertie 230/345/500-kV transmission system through December 31, 2003.

Western has decided to extend the existing firm point-to-point transmission service rate of $\$ 17.23$ / kilowattyear for the AC Intertie $500-\mathrm{kV}$ transmission system, firm point-to-point transmission service rate of $\$ 12.00$ / kilowattyear for the AC Intertie 230/345kV transmission system, and the nonfirm point-to-point transmission service rate of $2.00 \mathrm{mills} / \mathrm{kilowatthour}$ for the AC Intertie 230/345/500-kV transmission system through December 31, 2006. This extension will also allow Western time to evaluate impacts of combining revenue requirements of the Desert Southwest Region's transmission
systems and to determine a
methodology to put in place a multisystem transmission rate. Western proposes to extend the current rates pursuant to 10 CFR 903.23. Upon its approval, Rate Order No. WAPA-76 and Rate Order No. WAPA-91 will be extended under Rate Order No. WAPA108. Under 10 CFR 903.23(a)(2), Western did not have a consultation and comment period. Western held an informal public information forum.
Following review of Western's proposal within the Department of Energy, I approved Rate Order No. WAPA-108, which extends the existing firm point-to-point transmission service rate of $\$ 17.23 /$ kilowattyear for the AC Intertie $500-\mathrm{kV}$ transmission system, the firm point-to-point transmission service rate of $\$ 12.00 /$ kilowattyear for the AC Intertie $230 / 345-\mathrm{kV}$ transmission system, and the nonfirm point-to-point transmission service rate of 2.00 mills/ kilowatthour for the AC Intertie 230/ $345 / 500-\mathrm{kV}$ transmission system on an interim basis through December 31, 2006. Rate Order No. WAPA-108 will be submitted to FERC for confirmation and approval on a final basis.

Dated: October 27, 2003.
Kyle E. McSlarrow,
Deputy Secretary.
Order Confirming and Approving an Extension of the Pacific NorthwestPacific Southwest Intertie Project Firm and Nonfirm Transmission Service Rates

The Pacific Northwest-Pacific Southwest Intertie Project (AC Intertie) transmission service rates were established following section 302 (a) of the Department of Energy (DOE) Organization Act (42 U.S.C. 7152(a)). This act transferred to and vested in the Secretary of Energy (Secretary) the power marketing functions of the Secretary of the Department of the Interior and the Bureau of Reclamation under the Reclamation Act of 1902, ch. 1093, 32 Stat. 388 , as amended and supplemented by subsequent enactments, particularly section 9(c) of the Reclamation Project Act of 1939, 43 U.S.C. 485 h (c), and other acts that specifically apply to the project system involved.
By Delegation Order No. 00-037.00 effective December 6, 2001, the Secretary of Energy delegated: (1) The authority to develop long-term power and transmission rates on a non-exclusive basis to Western's Administrator; (2) the authority to confirm, approve, and place such rates into effect on an interim basis to the Deputy Secretary; and (3) the authority to confirm, approve, and place into effect on a final basis, to remand, or to disapprove, such rates to the Federal Energy Regulatory Commission (FERC). This rate extension is issued following the Delegation Order and the DOE rate extension procedures at 10 CFR part 903.

## Background

Western's firm point-to-point transmission service rate for the AC Intertie 230/345-kV transmission system was revised through Rate Order No. WAPA-76 and submitted to FERC for confirmation and approval on February 8, 1999. On June 22, 1999, in Docket No. EF99-5191-000, 87 FERC $\$ 61,346$, FERC issued an order confirming, approving, and placing into effect on a final basis the firm point-to-point transmission service rate of $\$ 12.00 /$ kilowattyear for the AC Intertie 230/345-kV transmission system. The rate was approved for 5 years from January 1, 1999, to December 31, 2003.

On August 15, 2000, the Deputy Secretary approved Rate Order WAPA-91. This extended the existing firm point-to-point transmission service rate of $\$ 17.23$ / kilowattyear for the AC Intertie $500-\mathrm{kV}$ transmission system, and the existing nonfirm point-to-point transmission service rate of $2.00 \mathrm{mills} / \mathrm{kWh}$ for the AC Intertie $230 / 345 / 500-\mathrm{kV}$ transmission system through December 31, 2003.

## Discussion

During development of the firm point-topoint transmission service rate for the AC Intertie 230/345-kV transmission system (Rate Order No. WAPA-76), Western determined that it would take about 10 years for the AC Intertie $500-\mathrm{kV}$ transmission system to be subscribed to a level sufficient to meet its own revenue repayment requirements. The ratesetting Power Repayment Study (PRS) established for the AC Intertie 230/345/500-kV transmission system (Rate Order No. WAPA-76) reflected the phasing-in of the AC Intertie $500-\mathrm{kV}$ transmission system revenues starting in fiscal year (FY) 1999 through FY 2008. The projected firm transmission sales in the 500kV transmission system PRS assume that in 10 years the $500-\mathrm{kV}$ Project will be economically viable and capable of demonstrating repayment. The PRS was programmed for first year sales of 62.5 MW and annual increases of 100 MW through the tenth year. Based on that projection, the total sales target projected at the end of fiscal year 2003 is 562.5 MW . The $500-\mathrm{kV}$ system contractual commitments are currently 664 MW. The $230 / 345-\mathrm{kV}$ system contractual commitments are $1,059 \mathrm{MW}$. The total combined firm transmission sales beginning in FY 2004 is projected to be 1,723 MW. This ratesetting PRS methodology remains valid. Projected revenue levels from sales of firm and nonfirm point-to-point transmission service and miscellaneous items will recover project expenses and capital requirements through FY 2049 for the AC Intertie 230/345/ $500-\mathrm{kV}$ transmission system.

Western has decided to extend the existing firm point-to-point transinission service rate of $\$ 17.23 /$ kilowattyear for the AC Intertie $500-\mathrm{kV}$ transmission system, the firm point-to-point transmission service rate of \$12.00/ kilowattyear for the AC Intertie 230/345-kV transmission system, and the nonfirm point-to-point transmission service rate of 2.00 mills/kilowatthour for the AC Intertie 230/ $345 / 500-\mathrm{kV}$ transmission system through December 31, 2006. This extension will also allow Western time to evaluate impacts of
combining revenue requirements of the Desert Southwest Region's transmission systems and to determine a methodology to put in place a multi-system transmission rate. Western proposes to extend the current rates pursuant to 10 CFR 903.23. Upon its approval, Rate Order No. WAPA-76 and Rate Order No. WAPA-91 will be extended under Rate Order No. WAPA-108. Under 10 CFR $903.23(\mathrm{a})(2)$, Western did not have a consultation and comment period.

## Order

In view of the above and under the authority delegated to me by the Secretary, I hereby extend from December 31, 2003, to December 31, 2006, the existing firm point-to-point transmission service rate of \$17.23/ kilowattyear for the AC Intertie $500-\mathrm{kV}$ transmission system, the firm point-to-point transmission service rate of $\$ 12.00$ / kilowattyear for the AC Intertie 230/345-kV transmission system, and the nonfirm point-to-point transmission service rate of 2.00 mills/kilowatthour for the AC Intertie 230/ $345 / 500-\mathrm{kV}$ transmission system on an interim basis. The existing AC Intertie transmission system rates for transmission service shall remain in effect pending FERC confirmation and approval of their extension or substitute rates on a final basis through December 31, 2006.
Dated: October 27, 2003.
Kyle E. McSlarrow,
Deputy Secretary.

## ENVIRONMENTAL PROTECTION AGENCY

[ER-FRL-6645-3]
Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 564-7167. An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 4, 2003 ( 68 FR 16511).

## Draft EISs

ERP No. D-AFS-J65390-CO Rating EC1, Arapaho National Recreation Area Forest Health and Fuels Reduction Project, Pre-Suppression Measures for Mountain Pine Beetle Infestation Reduction in Stands of Lodgepole Pine, Implementation, Arapaho National Forest, Sulphur Ranger District, Grand County, CO.

Summary: EPA expressed environmental concern due to project
impacts related to disturbances within roadless areas, contiguous terrestrial habitat and watersheds.

ERP No. D-FHW-G40177-LA Rating LO, Kansas Lane Connector Project, Construction between U.S. 80 (Desiard Street) and U.S. 165 and the Forsythe Avenue Extension, U.S. Army COE Section 10 and 404 Permits Issuance, City of Monroe, Quachita Parish, LA.

Summary: EPA has no objections to the selection of the preferred alternative. ERP No. D-FRA-E40799-FL Rating EC1, Florida High Speed Rail from Tampa to Orlando, Transportation Improvement, NPDES Permit and US Army COE Section 404 Permit, Hillsborough, Orange, Osceola and Polk Counties, FL.

Summary: EPA has environmental concerns with the proposed project regarding noise, vibration. hazardous waste sites and potential environmental impacts to air quality, wetlands, floodplains and other aquatic resources.

ERP No. D-NOA-A91069-00 Rating EC2, Atlantic Tunas, Swordfish, and Sharks Fishery Management Plan, To Prevent Overfishing and Rebuild Overfished Species, Update Essential Fish Habitat, Atlantic, Gulf of Mexico and Caribbean Sea.

Summary: EPA expressed concern that the document had not adequately explained alternatives and impact analyses. EPA recommended that the final document summarize data and that it clearly connect to impacts analysis of the proposed action. EPA also requested information on bycatch and the effects of other fisheries on sharks.

## Final EISs

ERP No. F-AFS-K26002-CA, South Tahoe Public Utility District (STPUD) BLine Phase III Wastewater Export Pipeline Replacement Project, Luther Pass Pump Station to U.S. Forest Service Luther Pass Overflow Campground Access Road, Special Use Permit, U.S. Army COE Section 404 and U.S. Fish and Wildlife Service Permits Issuance and EPA Grant, El Dorado and Alpine Counties, CA.

Summary: No formal comment letter was sent to the preparing agency.

ERP No. F-DOD-A11077-00, GroundBased Midcourse Defense (GMD) Extended Test Range (ETR) Project, Construction and Operation, CA, AK, AS, HI and WA.

Summary: EPA expressed environmental concern regarding how soil will be sampled for perchlorate and recommended that the ROD specify a perchlorate sampling plan.

ERP No. F-FHW-J40157-MT, US 89 from Fairfield to Dupuyer Corridors Study, Reconstruction, Widening,

Realignment and Route Connection between Yellowstone National Park to the South with Glacier National Park to the North, Teton and Pondera Counties, MT.

Summary: EPA expressed environmental concerns due to impacts to wetlands and floodplain encroachment. EPA requested a wetland mitigation plan be developed and that the project be designed to adequately pass flood flows, bedload, and provide opportunities for wildlife passage. EPA also suggested that the Montana
Department of Environmental Quality be coordinated with to assure compatibility of proposed highway construction activities with TMDL development for impaired waters.
ERP No. F-NPS-F65031-MN, Grand Portage National Monument General Management Plan, Implementation, Cook County, MN.

Summary: EPA's previous concerns have been resolved; therefore, EPA has no objections to the proposed action. EPA did request that future
environmental assessments on trails be made available for review.

Dated: November 4, 2003.
Joseph C. Montgomery,
Director, NEPA Compliance Division, Office of Federal Activities.

## ENVIRONMENTAL PROTECTION AGENCY

[OPP-2003-0367; FRL-7334-9]

## Atrazine; Notice of Availability of Revised Atrazine Interim Reregistration Eligibility Decision (IRED)

AGENCY: Environmental Protection Agency (EPA).
ACTION: Notice.
SUMMARY: This notice announces the -availability of the revised Interim Reregistration Eligibility Decision (IRED) document for the pesticide active ingredient atrazine. EPA has completed its revised IRED for atrazine consistent with the August 8,2002 , consent decree
between the Natural Resources Defense Council and EPA and with the January 31, 2003, Atrazine IRED released to the public through notices published in the Federal Register on February 28, 2003 ( 68 FR 9652) (FRL-7456-2). As required in the consent decree, the revision to the January 31, 2003 IRED addresses the potential association between atrazine exposure and the incident of prostate cancer and other cancers in humans and the potential effects of atrazine on amphibian endocrinology and development. The revised IRED also includes an ecological level of concern consistent with the Office of Water's (OW) draft aquatic life criteria document that is being released concurrent with the revision to the IRED. In addition, the revised IRED includes a monitoring program in vulnerable watersheds to determine if atrazine levels exceed the Agency's level of concern. The revised IRED summarizes the conclusions in the January 31, 2003, IRED, developments since the IRED, and the Agency's next steps.
DATES: Comments, identified by docket ID number OPP-2003-0367, must be received on or before February 5, 2004.
ADDRESSES: Comments may be submitted electronically, by mail, or through hand delivery/courier. Follow the detailed instructions as provided in Unit I. of the SUPPLEMENTARY

## INFORMATION.

FOR FURTHER INFORMATION CONTACT: EIIC R. Olson, Special Review and Reregistration Division-(7508C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 204600001; telephone number: (703) 3088067; fax number: (703) 308-8041; e-mail address: olson.eric@epa.gov.
SUPPLEMENTARY INFORMATION:

## I. General Information

## A. Does this Action Apply to Me?

This action is directed to the public in general. This action may, however, be of interest to persons who are or may be required to conduct testing of chemical substances under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) or the Federal Food, Drug, and Cosmetic Act (FFDCA); environmental, human health, and agricultural advocates; pesticide users; and members of the public interested in the use of pesticides. Since other entities may also be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action
to a particular entity, consult the person listed under FOR FURTHER INFORMATION CONTACT.

## B. How Can I Get Copies of this Document and Other Related Information?

1. Docket. EPA has established an official public docket for this action under docket identification (ID) number OPP-2003-0367. The official public docket consists of the documents specifically referenced in this action, any public comments received, and other information related to this action. Although a part of the official docket, the public docket does not include Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. The official public docket is the collection of materials that is available for public viewing at the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall \#2, 1921 Jefferson Davis Hwy., Arlington, VA. This docket facility is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The docket telephone number is (703) 305-5805.
2. Electronic access. You may access this Federal Register document electronically through the EPA Internet under the "Federal Register" listings at http://www.epa.gov/fedrgstr/.

An electronic version of the revision to the atrazine IRED is available electronically through the EPA Internet at http://www.epa.gov/oppsrrd1/ reregistration/atrazine/.

An electronic version of the public docket is available through EPA's electronic public docket and comment system, EPA Dockets. You may use EPA Dockets at http://www.epa.gov/edocket/ to submit or view public comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Once in the system, select "search,' then key in the appropriate docket ID number.

Certain types of information will not be placed in the EPA Dockets. Information claimed as CBI and other information whose disclosure is restricted by statute, which is not included in the official public docket, will not be available for public viewing in EPA's electronic public docket. EPA's policy is that copyrighted material will not be placed in EPA's electronic public - docket but will be available only in printed, paper form in the official public docket. To the extent feasible, publicly available docket materials will be made available in EPA's electronic public docket. When a document is selected
from the index list in EPA Dockets, the system will identify whether the document is available for viewing in EPA's electronic public docket. Although not all docket materials may be available electronically, you may still access any of the publicly availabie docket materials through the docket facility identified in Unit I.B. EPA intends to work towards providing electronic access to all of the publicly available docket materials through EPA's electronic public docket.

For public commenters, it is important to note that EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing in EPA's electronic public docket as EPA receives them and without change, unless the comment contains copyrighted material, CBI, or other information whose disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in EPA's electronic public docket. The entire printed comment, including the copyrighted material, will be available in the public docket.
Public comments submitted on computer disks that are mailed or delivered to the docket will be transferred to EPA's electronic public docket. Public comments that are mailed or delivered to the docket will be scanned and placed in EPA's electronic public docket. Where practical, physical objects will be photographed, and the photograph will be placed in EPA's electronic public docket along with a brief description written by the docket staff.

## C. How and to Whom Do I Submit Comments?

You may submit comments electronically, by mail, or through hand delivery/courier. To ensure proper receipt by EPA, identify the appropriate docket ID number in the subject line on the first page of your comment. Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments. If you wish to submit CBI or information that is otherwise protected by statute, please follow the instructions in Unit I.D. Do not use EPA Dockets or e-mail to submit CBI or information protected by statute.

1. Electronically. If you submit an electronic comment as prescribed in this unit. EPA recommends that you include your name, mailing address, and an e-
mail address or other contact information in the body of your comment. Also include this contact information on the outside of any disk or CD ROM you submit, and in any cover letter accompanying the disk or CD ROM. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. EPA's policy is that EPA will not edit your comment, and any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.
i. EPA Dockets. Your use of EPA's electronic public docket to submit comments to EPA electronically is EPA's preferred method for receiving comments. Go directly to EPA Dockets at http://www.epa.gov/edocket/, and follow the online instructions for submitting comments. Once in the system, select "search," and then key in docket ID number OPP-2003-0367. The system is an "anonymous access" system, which means EPA will not know your identity, e-mail address, or other contact information unless you provide it in the body of your comment.
ii. E-mail. Comments may be sent by e-mail to opp-docket@epa.gov, Attention: Docket ID Number OPP-2003-0367. In contrast to EPA's electronic public docket, EPA's e-mail system is not an "anonymous access" system. If you send an e-mail comment directly to the docket without going through EPA's electronic public docket, EPA's e-mail system automatically captures your e-mail address. E-mail addresses that are automatically captured by EPA's e-mail systenı are included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket.
iii. Disk or CD ROM. You may submit comments on a disk or CD ROM that you mail to the mailing address identified in Unit I.C.2. These electronic submissions will be accepted in WordPerfect or ASCII file format. Avoid the use of special characters and any form of encryption.
2. By mail. Send your comments to: Public Information and Records Integrity Branch (PIRIB) (7502C), Office of Pesticide Programs (OPP),
Environmental Protection Agency, 1200

Pennsylvania Ave., NW., Washington, DC 20460-0001, Attention: Docket ID Number OPP-2003-0367.
3. By hand delivery or courier. Deliver your comments to: Public Information and Records Integrity Branch (PIRIB), Office of Pesticide Programs (OPP), Environmental Protection Agency, Rm. 119, Crystal Mall \#2, 1921 Jefferson Davis Hwy., Arlington, VA, Attention: Docket ID Number OPP-2003-0367. Such deliveries are only accepted during the docket's normal hours of operation as identified in Unit I.B.1.
D. How Should I Submit CBI To the Agency?
Do not submit information that you consider to be CBI electronically through EPA's electronic public docket or by e-mail. You may claim information that you submit to EPA as CBI by marking any part or all of that information as CBI (if you submit CBI on disk or CD ROM, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.
In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket and EPA's electronic public docket. If you submit the copy that does not contain CBI on disk or CD ROM. mark the outside of the disk or CD ROM clearly that it does not contain CBI. Information not marked as CBI will be included in the public docket and EPA's electronic public docket without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person listed under FOR FURTHER INFORMATION CONTACT.
E. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.
2. Describe any assumptions that you used.
3. Provide any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at your estimate.
5. Provide specific examples to illustrate your concerns.
6. Offer alternatives.
7. Make sure to submit your comments by the comment period deadline identified.
8. To ensure proper receipt by EPA, identify the appropriate docket ID number in the subject line on the first page of your response. It would also be helpful if you provided the name, date, and Federal Register citation related to your comments.

## II. Background

## A. What Action is the Agency Taking?

EPA has completed its revised IRED for atrazine consistent with the August 8,2002 , consent decree between the Natural Resources Defense Council and EPA and consistent with the Ja.nuary 31, 2003, Atrazine IRED released to the public through a notice published in the Federal Register on February 28, 2003 (68 FR 9652) (FRL-7456-2). As required in the consent decree, the revision to the January 31, 2003, IRED addresses the potential association between atrazine exposure and the incident of prostate cancer and other cancers in humans and the potential effects of atrazine on amphibian endocrinology and development. In each section, the document summarizes the conclusions in the January 31, 2003, IRED, developments since the IRED, including Scientific Advisory Panel meetings, and next steps, as appropriate.

The revised IRED also includes an ecological monitoring and mitigation program developed to address indirect ecological effects of atrazine in watersheds. The ecological level of concern and the monitoring and mitigation program were developed by a cross-Agency workshop that includes the Office of Pesticide Programs (OPP), Office of Water (OW), and the Office of Research and Development (ORD), along with Syngenta Crop Protection, Inc. Concurrent with the release of the revision to the atrazine IRED, EPA's OW is publishing its draft aquatic life criteria document for atrazine for comment elsewhere in this issue of the Federal Register. The OW Draft aquatic life criteria document for atrazine is available electronically through the EPA Internet at http://www.epa.gov/ waterscience/criteria/atrazine/.
Provided that the measures outlined in the revised IRED are adopted, atrazine remains eligible for reregistration. EPA's next step under FQPA is to complete a cumulative risk assessment and risk management decision for the triazine pesticides, which share a common mechanism of toxicity. This revision to the IRED -document for atrazine cannot be considered a final reregistration
eligibility decision until the cumulative assessment is complete.

When the cumulative risk assessment for the triazine pesticides has been completed, EPA will issue its final tolerance reassessment decision for atrazine and further risk mitigation measures may be needed.

## B. What is the Agency's Authority for Taking this Action?

The legal authority for this IRED falls under FIFRA, as amended in 1988 and 1996. Section $4(\mathrm{~g})(2)(A)$ of FIFRA directs that, after submission of all data concerning a pesticide active ingredient
"the Administrator shall determine whether pesticides containing such active ingredient are eligible for reregistration," before calling in product specific data on individual end-use products, and either reregistering products or taking "other appropriate regulatory action."

## List of Subjects

Environmental protection, chemicals, pesticide(s) and pests.
Dated: November 3, 2003.
Betty Shackleford.
Acting Director, Special Review and Reregistration Division, Office of Pesticide Programs.
[FR Doc. 03-28101 Filed 11-6-03; 8:45 am] BILLING CODE 6560-50-S

## ENVIRONMENTAL PROTECTION AGENCY

[OPP-2003-0255; FRL-7331-7]
Paecilomyces Lilacinus Strain 251; Notice of Filing a Pesticide Petition to Establish a Tolerance for a Certain Pesticide Chemical in or on Food

AGEncY: Environmental Protection Agency (EPA).
ACTION: Notice.
SUMMARY: This notice announces the initial filing of a pesticide petition proposing the establishment of regulations for residues of a certain pesticide chemical in or on various food commodities.
DATES: Comments, identified by docket ID number OPP-2003-0255, musi be received on or before December 8, 2003.
ADDRESSES: Comments may be submitted electronically, by mail, or through hand delivery/courier. Follow the detailed instructions as provided in Unit I. of the SUPPLEMENTARY INFORMATION.

FOR FURTHER INFORMATION CONTACT:
Barbara Mandula, Biopesticides and
Pollution Prevention Division (7511C),

Office of Pesticide Programs,
Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001; telephone number: (703) 308-7378; e-mail address: mandula.barbara@epa.gov.

## SUPPLEMENTARY INFORMATION:

## I. General Information

## A. Does this Action Apply to Me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer or pesticide manufacturer. Potentially affected entities may include, but are not limited to:

- Crop production (NAICS 111)
- Animal production on (NAICS

112) 

- Food manufacturing (NAICS 311)
- Pesticide manufacturing (NAICS 32532)

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under FOR FURTHER INFORMATION CONTACT.

## B. How Can I Get Copies of this Document and Other Related Information?

1. Docket. EPA has established an official public docket for this action under docket ID number OPP-20030255. The official public docket consists of the documents specifically referenced in this action, any public comments received, and other information related to this action. Although, a part of the official docket, the public docket does not include Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. The official public docket is the collection of materials that is available for public viewing at the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall \#2, 1921 Jefferson Davis Hwy., Arlington, VA. This docket facility is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The docket telephone number is (703) 305-5805.
2. Electronic access. You may access this Federal Register document electronically through the EPA Internet
under the "Federal Register" listings at http://www.epa.gov/fedrgstr/.

An electronic version of the public docket is available through EPA's electronic public docket and comment system. EPA Dockets. You may use EPA Dockets at http://www.epa.gov/edocket/ to submit or view public coinments. access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Although. not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the docket facility identified in Unit I.B.1. Once in the system, select "search," then key in the appropriate docket ID number.

Certain types of information will not be placed in the EPA Dockets. Information claimed as CBI and other information whose disclosure is restricted by statute, which is not included in the official public docket, will not be available for public viewing in EPA's electronic public docket. EPA's policy is that copyrighted material will not be placed in EPA's electronic public docket but will be available only in printed, paper form in the official public docket. To the extent feasible, publicly available docket materials will be made available in EPA's electronic public docket. When a document is selected from the index list in EPA Dockets. the system will identify whether the document is available for viewing in EPA's electronic public docket. Although, not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the docket facility identified in Unit I.B.1. EPA intends to work towards providing electronic access to all of the publicly available docket materials through EPA's electronic public docket.

For public commenters, it is important to note that EPA's policy is that public comments, whether submitted electronically or on paper, will be made available for public viewing in EPA's electronic public docket as EPA receives them and without change, unless the comment contains copyrighted material, CBI, or other information whose disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in EPA's electronic public docket. The entire printed comment, including the copyrighted material, will be available in the public docket.

Public comments submitted on computer disks that are mailed or
delivered to the docket will be transferred to EPA's electronic public docket. Public comments that are mailed or delivered to the docket will be scanned and placed in EPA's electronic public docket. Where practical, physical objects will be photographed, and the photograph will be placed in EPA's electronic public docket along with a brief description written by the docket staff.
C. How and To Whom Do I Submit Comments?
You may submit comments electronically, by mail, or through hand delivery/courier. To ensure proper receipt by EPA, identify the appropriate docket ID number in the subject line on the first page of your comment. Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments. If you wish to submit CBI or information that is otherwise protected by statute, please follow the instructions in Unit I.D. Do not use EPA Dockets or e-mail to submit CBI or information protected by statute.

1. Electronically. If you subinit an electronic comment as prescribed in this unit, EPA recommends that you include your name, mailing address, and an email address or other contact information in the body of your comment. Also, include this contact information on the outside of any disk or CD ROM you submit, and in any cover letter accompanying the disk or CD ROM. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. EPA's policy is that EPA will not edit your comment, and any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.
i. EPA Dockets. Your use of EPA's electronic public docket to submit comments to EPA electronically is EPA's preferred method for receiving comments. Go directly to EPA Dockets at http://www.epa.gov/edocket/, and follow the online instructions for submitting comments. Once in the system, select "search," and then key in docket ID number OPP-2003-0255. The
system is an "anonymous access" system, which means EPA will not know your identity, e-mail address, or other contact information unless you provide it in the body of your comment.
ii. E-mail. Comments may be sent by e-mail to opp-docket@epa.gov, Attention: Docket ID number OPP-2003-0255. In contrast to EPA's electronic public docket, EPA's e-mail system is not an "anonymous access" system. If you send an e-mail comment directly to the docket without going through EPA's electronic public docket, EPA's e-mail system automatically captures your e-mail address. E-mail addresses that are automatically captured by EPA's e-mail system are included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket.
iii. Disk or CD ROM. You may submit comments on a disk or CD ROM that you mail to the mailing address identified in Unit I.C.2. These electronic submissions will be accepted in WordPerfect or ASCII file format. Avoid the use of special characters and any form of encryption.
2. By mail. Send your comments to: Public Information and Records Integrity Branch (PIRIB) (7502C), Office of Pesticide Programs (OPP),
Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001, Attention: Docket ID number OPP-2003-0255.
3. By hand delivery or courier. Deliver your comments to: Public Information and Records Integrity Branch (PIRIB), Office of Pesticide Programs (OPP), Environmental Protection Agency, Rm. 119, Crystal Mall \#2, 1921 Jefferson Davis Hwy., Arlington, VA, Attention: Docket ID number OPP-2003-0255. Such deliveries are only accepted during the docket's normal hours of operation as identified in Unit I.B.1.

## D. How Should I Submit CBI to the Agency?

Do not submit information that you consider to be CBI electronically through EPA's electronic public docket or by e-mail. You may claim information that you submit to EPA as CBI by marking any part or all of that information as CBI (if you submit CBI on disk or CD ROM, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

In addition to one complete version of the comment that includes any information claimed as CBI, a copy of
the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket and EPA's electronic public docket. If you submit the copy that does not contain CBI on disk or CD ROM, mark the outside of the disk or CD ROM clearly that it does not contain CBI. Information not marked as CBI will be included in the public docket and EPA's electronic public docket without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person listed under FOR FURTHER INFORMATION CONTACT.

## E. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Provide specific examples to illustrate your concerns.
6. Make sure to submit your comments by the deadline in this notice.
7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and Federal Register citation.

## II. What Action is the Agency Taking?

EPA has received a pesticide petition as follows proposing the establishment and/or amendment of regulations for residues of a certain pesticide chemical in or on various food commodities under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346 a. EPA has determined that this petition contains data or information regarding the elements set forth in FFDCA section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the petition. Additional data may be needed before EPA rules on the petition.

## List of Subjects

Environmental protection, Agricultural commodities, Feed additives, Food additives, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: October 28, 2003.

## Janet L. Andersen,

Director, Biopesticides and Pollution Prevention Division, Office of Pesticide Programs.

## Summary of Petition

The petitioner summary of the pesticide petition is printed below as required by FFDCA section 408(d)(3). The summary of the petition was prepared by W. F. Stoneman Company LLC and represents the view of the petitioner. The petition summary announces the availability of a description of the analytical methods available to EPA for the detection and measurement of the pesticide chemical residues or an explanation of why no such method is needed.

## W.F. Stoneman Company LLC

## PP $3 F 6737$

EPA has received a pesticide petition 3F6737 from W.F. Stoneman Company LLC (on behalf of Prophyta Biologischer Pflanzenschutz GmbH), 6307 Mourning Dove Drive, McFarland, Wisconsin 53558-9019, proposing pursuant to section 408(d) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(d), to amend 40 CFR part 180, to establish an exemption from the requirement of a tolerance for residues of the microbial pesticide Paecilomyces Iilacinus strain 251 (P. lilacinus).
Pursuant to section 408(d)(2)(A)(i) of the FFDCA, as amended, W.F. Stoneman Company LLC (on behalf of Prophyta Biologischer Pflanzenschutz GmbH ) has submitted the following summary of information, data, and arguments in support of their pesticide petition. This summary was prepared by W.F. Stonemian Company LLC (on behalf of Prophyta Biologischer Pflanzenschutz GmbH) and EPA has not fully evaluated the merits of the pesticide petition. The summary may have been edited by EPA if the terminology used was unclear, the summary contained extraneous material, or the summary unintentionally made the reader conclude that the findings reflected EPA's position and not the position of the petitioner.

## A. Product Name and Proposed Use Practices

MeloCon ${ }^{\text {TM }}$ WG. For purposes of marketing the product in the U.S.A., the name MeloCon ${ }^{\text {TM }}$ WG was chosen and a registered trademark will be sought. The same active ingredient in the same or similar formulations is sold under other trade names in other countries of
the world including: Paecil, BioACT WG, and Nemachek.

Proposed use practices. MeloConTM WG is a biological nematicide for the control of plant parasitic nematodes. The product is sold as water dispersible granules that are then mixed with water and applied as a soil spray, initially at a rate of 4 pounds per acre. Applications are made to soil before planting, to the soil of seedlings before transplanting, and as a post-plant soil drench.

## B. Product Identity/Chemistry

1. Identity of the pesticide and corresponding residues.

- Product name. MeloConTM WG
- Active ingredient. Paecilomyces Iilacinus strain 251
- CAS No. Not applicable
- Color. Pink
- Physical state. Non-dusty, water dispersible granules
- Odor. Odorless
- Bulk density. $500-550 \mathrm{~kg} / \mathrm{cubic}$ meter
- pH. Before storage, the pH of PBP01001 -I was 6.86 (mean of two replications). After storage at a temperature of $40^{\circ} \mathrm{C}$ for a period of 8 weeks, the pH of the product was 5.52 (mean of two replications).
- Mode of action. Control of plantparasitic nematodes by P. lilacinus is basically achieved by parasitism and subsequent killing of eggs, juveniles and adult females of a range of nematode species. The infective units are spores and mycelia, enabling the fungus to parasitize the host epiphytically or as an endophyte, following penetration of cell walls.

Historical Background. Plant-parasitic nematodes infect a wide range of crops and cause reduction in yield and sometimes death of the crop plant. As early as 1877 parasitism of female nematodes of the species of Heterodera schachtii by a fungus was described, but it took several decades for researchers to discover that fungi play a major role as antagonists of parasitic nematodes. Numerous fungi are known to have nematophagous activity and to act by several mechanisms, including endoparasitic, predacious, and opportunistic parasitism. As opportunistic fungi, P. Iilacinus and Verticillium chlamydosporium have been extensively studied as possible biocontrol agents.
In 1979. P. lilacinus was identified as an effective parasite of Meloidogyne incognita and Globodera pallida eggs on potatoes. Further study revealed that different strains of P.lilacinus differed considerably in their nematophagous potential. Efficient $P$. Iilacinus strains have been registered as biocontrol
agents for plant-parasitic nematodes in the Philippines and South Africa, while registration is pending in Australia.
2. Magnitude of residue at the time of harvest and method used to determine the residue- Analytical method. An analytical method of residues is not applicable.
3. A statement of why an analytical method for detecting and measuring the levels of the pesticide residue are not needed. An analytic method for residues is not applicable. Paecilomyces lilacinus strain 251 is active in the soil, applied to the soil, and incorporated into the soil prior to planting, or drenched onto the soil surrounding plants very early in the growing season. It is not applied directly to the food commodity. Residues of the active ingredient in MeloCon ${ }^{\text {TM }}$ WG are not expected on agricultural commodities.
In most of the crops envisaged for use of the active ingredient no deposit is likely to occur, since soil drench applications rule out a direct contact between the applied product and the fruit. This applies to all crops with above ground harvest, such as grapes, tomato, and tobacco. After harvest any remaining fungal spores on potato, celery and carrots will be exposed to unfavorable conditions (e.g. dryness), and are not likely to germinate and grow on the harvested crop.

Any potentially occurring residual deposits on these crops will not harm humans because the strain shows no toxicity in appropriate tests and any such residues will be very low due to the low enviroumental concentration in soil predicted from maximum field use of the active ingredient.
P. lilacinus is not able to enter plants and infest them. In fact, it enhances plant health and growth. As a saprophytic fungus it would use the resources of the plant host in case access was possible.

## C. Mammalian Toxicological Profile

MeloCon ${ }^{\text {TM }}$ WG is the end use product of the active ingredient $P$. lilacinus strain 251. The active ingredient is in the end use product at a nominal concentration of $6 \%$ by weight (with a minimum concentration of 1 billion spores per gram). The active ingredient was tested for acute Toxicity/ Pathogenicity through oral, dermal, IP injection, pulmonary, skin irritation, eye irritation, and skin sensitization. The results of these mammalian studies indicate no significant human health risks. The table below summarizes the results of the acute studies that were done.

Table 1.-Summary of Mammalian Toxicity/Pathogenicity Studies ${ }^{1}$

| Study | Animal | Dose (mg) | Dose (cfu) | Result |
| :---: | :---: | :---: | :---: | :---: |
| Acute oral, LD ${ }_{50}$ | Rat | $>2,000$ milligrams/kilogram body weight (mg/ kg bwt) | $>4 \times 10^{9}$ colony forming units/kilogram body weight (cfu/kg bwt) | $L D_{50}>2,000 \mathrm{mg} / \mathrm{kg}$ |
| Acute dermal, $\mathrm{LD}_{50}$ | Rat | $>2,000 \mathrm{mg} / \mathrm{kg}$ body. wt | $>4 \times 10^{9}$ cfu/kg body wt | $L D_{50}>2,000 \mathrm{mg} / \mathrm{kg}$ |
| Acute IP injection | Rat | $>2,000 \mathrm{mg} / \mathrm{kg}$ body. wt | $>4 \times 10^{9} \mathrm{cfu} / \mathrm{kg}$ body wt | $\mathrm{LD}_{50}>2,000 \mathrm{mg} / \mathrm{kg}$ Noninfectious; 100\% clearance |
| Acute pulmonary (intratracheal) | Rat | $>125 \mathrm{mg} / \mathrm{kg}$ body.wt | $>2.5 \times 10^{8}$ cfu/kg body wt | $L D_{50}>125 \mathrm{mg} / \mathrm{kg}$ Non-infectious; 100\% clearance |
| Acute skin irritation | Rabbit |  |  | Non-irntant |
| Acute eye irritation | Rabbit |  |  | Non-irritant |
| Skin sensitization (Buehler test) | Guinea pig |  |  | Not sensitizing |

${ }^{1}$ The end product was test substance.

In addition, the temperature profile for this strain of $P$. lilacinus strain 251 indicates that it does not grow at $36^{\circ} \mathrm{C}$ or higher, and therefore, will not be pathogenic to humans. The strain does not produce paecilotoxins or other toxins. The acute toxicity/pathogenicity studies have determined that the end use product containing the organism is not toxic, irritating or sensitizing to the test animals. Strain 251 of $P$. lilacinus has not been reported as a pathogen to humans or as causing any type of adverse effects to humans in the published literature or through commercial manufacture or use.

In conclusion, all submitted toxicological studies and supplemental information on $P$. lilacinus strain 251, prove that this fungus is non-pathogenic and non-infectious to mammals and imposes no health risk for operators, workers, or consumers.

## D. Aggregate Exposure

1. Dietary exposure-i. food. Dietary exposure from use of MeloCon ${ }^{\text {TM }}$ WG and its active ingredient is minimal to non-existent. MeloCon ${ }^{\text {TM }}$ WG is applied to the soil before planting and very early in the plant-growing season. After harvest any remaining fungal spores on potato, celery and carrots will be exposed to unfavorable conditions (e.g. dryness), and are not likely to germinate and grow on the harvested crop.

Any potentially occurring residual deposits on these crops are not relevant as a human health concern in view of the toxicological profile of this strain. The amount of residue, if any, is likely to be very low.
P. hilacinus is not able to enter plants and infest them. As a saprophytic
fungus it would use the resources of the plant host in case access was possible.
Residues of the active ingredient are not expected on agricultural commodities.
ii. Drinking water. Exposure to humans from residues of $P$. lilacinus strain 251 in drinking water is unlikely. The active ingredient of MeloCon ${ }^{\text {TM }}$ WG is not very soil mobile and will not leach to the water table. Following application of the active ingredient to the soil, spores of P.lilacinus strain 251 are likely to establish a population based on the prevailing environmental conditions of the relevant soil ecosystem. Unlimited growth is not expected, given that this species is not a "foreigner" to the naturally occurring soil micro-flora. The active ingredient is a spore and not soluble and therefore non-leaching. In addition, when the product is used as directed, the presence of spores in natural surface waters is not expected.
2. Non-dietary exposure. The potential for non dietary exposure to the general population, including infants and children, is minimal to nonexistent. No approval for consumer uses is expected. The proposed uses are limited to commercial agricultural and horticultural applications. No exposure is expected to the general public during either manufacture or application of the product. If non-dietary exposures were to occur, they would not be expected to pose a risk due to a lack of pathogenicity and toxicity, as demonstrated for this strain in the studies conducted on MeloCon ${ }^{\text {TM }}$ WG. The recommendations for use of personal protective equipment (PPE)
will mitigate the potential exposure of workers.

## E. Cumulative Exposure

No residues are expected to remain in human food and no cumulative effects of this microbial nematicide are expected.

## F. Safety Determination

1. U. S. population. There have been no reports of $P$. lilacinus strain 251 infecting humans, and no reports that the microbe makes toxins or secondary metabolites that might be harmful to humans.

In most of the crops envisaged for use of the active ingredient no residue is expected on the food, since soil drench applications rule out a direct contact between the applied product and the fruit. This applies to all crops with above ground harvest, such as grapes, tomato, and tobacco. After harvest, any remaining fungal spores on potato, celery and carrots will be exposed to unfavorable conditions (e.g. dryness), and are not likely to germinate and grow on the harvested crop.
P. lilacinus strain 251 does not grow at $36^{\circ} \mathrm{C}$ or greater, and therefore, cannot grow in humans. It has been shown to be non-toxic/pathogenic to mammals in acute studies.
2. Infants and children. Residues of $P$. lilacinus strain 251 are not expected to occur on agricultural commodities. There is no reason to expect harm to infants and children from exposure to the active ingredient from the proposed uses on the proposed product label.
G. Effects on the Immune and Endocrine Systems
There is no reason to expect any effects of $P$. lilacinus strain 251 on the human endocrine system. The active ingredient in MeloCon ${ }^{\text {TM }}$ WG does not function as a hormone nor does it produce any known hormones. $P$. lilacinus strain 251 in a naturally occurring, nonpathogenic soil organism.

## H. Existing Tolerances

EPA no tolerance to date.

## I. International Tolerances

Australia has granted a Certificate of an exemption for an active constituent (National Registration Authority, Australia 1998).
[FR Doc. 03-27956 Filed 11-6-03; 8:45 am] BILLING CODE 6560-50-S

## ENVIRONMENTAL PROTECTION AGENCY

[FRL-7583-4]
Administrative Order on Consent for Removal Action, Northwest Oil Drain Superfund Site, Salt Lake City, UT

AGENCY: Environmental Protection Agency (U.S. EPA).
ACTION: Administrative order on consent.

SUMMARY: In accordance with the requirements of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended ("CERCLA"), 42 U.S.C. 9601 et seq., notice is hereby given of an Administrative Order On Consent For Removal Action ("Order"), Northwest Oil Drain Superfund Site, Salt Lake City, UT. This Order provides for the performance of the Work by each Respondent (Salt Lake City Corporation (City), Salt Lake County (County), BP Amoco and Chevron Products Co. (Chevron)) and for the reimbursement of certain response costs incurred by the United States in connection with the property, known as the "Northwest Oil Drain Site" or "NWOD" or the "Site". The Respondents to this Order formed the Northwest Oil Drain Working group to study and implement a removal action at the Site. The total estimated capital cost for the removal action is approximately $\$ 5,102,700.00$. The costs will be fully funded by the Respondents. Additionally, the Respondents will pay $\$ 200,000.00$ for past costs incurred by EPA.
The NWOD is located in northern Salt Lake and in Davis Counties, northwest of downtown Salt Lake City. Utah. The

NWOD is a series of former and existing unlined canals consisting of two systems, the 8.6 mile north west flowing and open section and the non-flowing section $1 / 4$ mile long). The NWOD was constructed in the 1920's and was used to convey stormwater and industrial and municipal discharges into the Great Salt Lake. The sludge/sediment in the NWOD contains elevated concentrations of organics and metals. The removal action consists of the complete physical removal of sediments from the Northwest Oil Drain. Some of these sediments will be deposited in a regulated land farm while other sediments will be side-cast in nearby agricultural and rangelands. The nonflowing section of the canal ( $1 / 4 \mathrm{mile}$ section) will be backfilled with clean fill material.
DATES: Comments must be submitted to EPA on or before 30 days from date of publication.
ADDRESSES: Comments should be addressed to Nancy A. Mangone, (8ENFL), Enforcement Attorney, U.S. Environmental Protection Agency, Region VIII, 999 18th Street, Sujte 300, Denver, Colorado 80202-2466, and should refer to: In the Matter of: Administrative Order On Consent For Removal Action, Northwest Oil Drain Superfund Site, Salt Lake City, UT. FOR FURTHER INFORMATION CONTACT: Nancy A. Mangone, (8ENF-L), Enforcement Attorney, U.S. Environmental Protection Agency, Region VIII, 999 18th Street, Suite 300, Denver, Colorado, 80202-2466, (303) 312-6903.
Dated: October 16, 2003.
Andrew M. Gaydosh,
Acting Assistant Regional Administrator, Office of Enforcement, Compliance and Environmental Justice.

## ENVIRONMENTAL PROTECTION AGENCY

[FRL-OW-7584-6]
Notice of Availability of Revised Draft Aquatic Life Criteria Document for Atrazine and Request for Scientific Views
AGENCY: Environmental Protection Agency (EPA).
ACTION: Notice of availability and request for scientific views.
SUMmARY: This action notifies the public about the availability of a revised draft aquatic life criteria document for atrazine and requests scientific views.

The Clean Water Act (CWA) requires the Environmental Protection Agency (EPA) to develop and publish, and from time to time revise, criteria for water accurately reflecting the latest scientific knowledge. When final, these criteria will provide EPA's recommendations to States and authorized Tribes as they establish their water quality standards as State or Tribal law or regulation. At this time the Agency is not making a final recomendation, rather the Agency is requesting scientific views on the draft document.
DATES: All significant scientific information must be submitted to the Agency on or before February 5, 2004.
ADDRESSES: Scientific views must be submitted electronically, by mail, or through hand-delivery/courier. Follow detailed instructions as provided in section C of the SUPPLEMENTARY INFORMATION section. Copies of the criteria document entitled, Draft Ambient Aquatic Life Water Quality Criteria for Atrazine (EPA-822-R-03023) may be obtained from EPA's Water Resource Center by phone at (202) 5662426 , or by e-mail to
center.water.resource@epa.gov or by conventional mail to: EPA Water Resource Center, 4101T, 1200 Pennsylvania Avenue NW., Washington, DC 20460. You can also download the document from EPA's Web site at http://www.epa.gov/waterscience/ criteria/atrazine/. OPP's risk assessment can be downloaded from http:// www.epa.gov/oppsrrd1/reregistration/ atrazinel.

## FOR FURTHER INFORMATION CONTACT:

Frank Gostomski, Health and Ecological Criteria Division (4304), U.S. EPA, 1200 Pennsylvania Avenue NW., Washington, DC 20460; (202) 566-1105; gostomski.frank@epa.gov.

## SUPPLEMENTARY INFORMATION:

## I. General Information

## A. Interested Entities

Entities potentially interested in today's notice are those that produce, use, or regulate atrazine. Categories and entities interested in today's action include:

| Category | Examples of inter- <br> ested entities |
| :--- | :--- |
| State/Local/Tribal <br> Government. <br> Herbicide Producers <br> Herbicide Users ....... | Midwest "cornbelt" <br> States and Tribes. <br> Syngenta. <br> Growers of corn and <br> sugarcane. |

This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be
interested by this action. This table lists the types of entities that EPA is now aware could potentially be interested by this action. Other types of entities not listed in the table could also be interested.

## B. How Can I Get Copies of This Document and Other Related Information?

1. Docket. EPA has established an official public docket for this action under Docket ID No. OW-2001-0010. The official public docket consists of the documents specifically referenced in this action, any scientific views received, and other information related to this action. Although a part of the official docket, the public docket does not include Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. The official public docket is the collection of materials that is available for public viewing at Water Docket in the EPA Docket Center, (EPA/DC) EPA West, Room B102, 1301 Constitution Ave., NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the Water Docket is (202) 566-1744. To view these documents materials, please call ahead to schedule an appointment. Every user is entitled to copy 266 pages per day before incurring a charge. The Docket may charge 15 cents a page for each page over the 266-page limit plus an administrative fee of $\$ 25.00$.
2. Electronic Access. You may access this Federal Register document electronically through the EPA Internet under the "Federal Register" listings at http://www.epa.gov/fedrgstr/.

An electronic version of the public docket is available through EPA's electronic public docket and comment system, EPA Dockets. You may use EPA Dockets at http://www.epa.gov/edocket/ to submit or view scientific views, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Once in the system, select "search,' then key in the appropriate docket identification number.

Certain types of information will not be placed in the EPA Dockets. Information claimed as CBI and other information whose disclosure is restricted by statute, which is not included in the official public docket, will not be available for public viewing in EPA's electronic public docket. EPA's policy is that copyrighted material will
not be placed in EPA's electronic public docket but will be available only in printed, paper form in the official public docket. To the extent feasible, publicly available docket materials will be made available in EPA's electronic public docket. When a document is selected from the index list in EPA Dockets, the system will identify whether the document is available for viewing in EPA's electronic public docket. Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the docket facility identified in section I.B.

It is important to note that EPA's policy is that scientific views, whether submitted electronically or in paper, will be made available for public viewing in EPA's electronic public docket as EPA receives them and without change, unless your views and information contain copyrighted material, CBI, or other information whose disclosure is restricted by statute. When EPA identifies a scientific view containing copyrighted material, EPA will provide a reference to that material in the version of the scientific view that is placed in EPA's electronic public docket. The entire printed scientific view, including the copyrighted material, will be available in the public docket.

Scientific views submitted on computer disks that are mailed or delivered to the docket will be transferred to EPA's electronic public docket. Scientific views that are mailed or delivered to the Docket will be scanned and placed in EPA's electronic public docket. Where practical, physical objects will be photographed, and the photograph will be placed in EPA's electronic public docket along with a brief description written by the docket staff.

## C. How and To Whom Do I Submit Scientific Views?

You may submit scientific views electronically, by mail, by facsimile, or through hand delivery/courier. To ensure proper receipt by EPA, identify the appropriate docket identification number in the subject line on the first page of your scientific views. Please ensure that your scientific views are submitted within the specified period. Scientific views received after the close of the review period will be marked "late." EPA is not required to consider these late scientific views.

1. Electronically. If you submit electronic information as prescribed below, EPA recommends that you include your name, mailing address, and an e-mail address or other contact
information in the body of your scientific views. Also include this contact information on the outside of any disk or CD ROM you submit, and in any cover letter accompanying the disk or CD ROM. This ensures that you can be identified as the submitter of the scientific information and allows EPA to contact you in case EPA cannot read your scientific views due to technical difficulties or needs further information on the substance of your scientific views. EPA's policy is that EPA will not edit your scientific views, and any identifying or contact information provided in the body of the scientific views will be included as part of the scientific views that are placed in the official public docket, and made available in EPA's electronic public docket. If EPA cannot read your scientific views due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your scientific views.
i. EPA Dockets. Your use of EPA's electronic public docket to submit scientific views to EPA electronically is EPA's preferred method for receiving scientific views. Go directly to EPA Dockets at http://www.epa.gov/edocket, and follow the online instructions for submitting scientific views. To access EPA's electronic public docket from the EPA Internet Home Page, select "Information Sources," "Dockets," and "EPA Dockets." Once in the system, select "search,"' and then key in Docket ID No. OW-2001-0010. The system is an "anonymous access" system, which means EPA will not know your identity, e-mail address, or other contact information unless you provide it in the body of your information.
ii. E-mail. Scientific views may be sent by electronic mail (e-mail) to OWDocket@epa.gov, Attention Docket No. OW-2001-0010. In contrast to EPA's electronic public docket, EPA's e-mail system is not an "anonymous access" system. If you send an e-mail scientific views directly to the Docket without going through EPA's electronic public docket, EPA's e-mail system automatically captures your e-mail address. E-mail addresses that are automatically captured by EPA's e-mail system are included as part of the information that is placed in the official public docket, and made available in EPA's electronic public docket.
iii. Disk or CD ROM. You may submit scientific views on a disk or CD ROM that you mail to the mailing address identified in section I.C.2. These electronic submissions will be accepted in WordPerfect or ASCII file format. Avoid the use of special characters and any form of encryption.
2. By Mail. Send your scientific views to: Water Docket in the EPA Docket Center, Environmental Protection Agency, Mailcode 4101T, 1200 Pennsylvania Ave., NW., Washington, DC 20460, Attention Docket ID No. OW-2001-0010.
3. By Hand Delivery or Courier. Deliver your scientific views to: Water Docket, EPA Docket Center, EPA West, Room B102, 1301 Constitution Ave., NW., Washington, DC, Attention Docket ID No. OW-2001-0010. Such deliveries are only accepted during the Docket's normal hours of operation as identified in section I.B.1.

## D. What Should I Consider as I Prepare My Scientific Views for EPA?

You may find the following suggestions helpful for preparing your scientific views:

1. Explain your scientific views as clearly as possible.
2. Describe any assumptions that you used.
3. Provide any technical information and/or data you used that support your scientific views.
4. Provide specific examples to illustrate your concerns.
5. Offer alternatives.
6. Make sure to submit your scientific views by the deadline identified.
7. To ensure proper receipt by EPA, identify the appropriate docket identification number in the subject line on the first page of your response. It would also be helpful if you provided the name, date, and Federal Register citation related to your scientific views.
II. Background and Today's Action

## A. What Are Recommended Water Quality Criteria?

Recommended water quality criteria are the concentrations of a chemical in water at or below which aquatic life are protected from acute and chronic adverse effects of the chemical. Section 304(a)(1) of the Clean Water Act requires EPA to develop and publish, and from time to time revise, criteria for water accurately reflecting the latest scientific knowledge. Water quality criteria developed under section 304(a) are based solely on data and scientific judgments. They do not consider economic impacts or the technological feasibility of meeting the criteria in ambient water. Section 304(a) criteria provide guidance to States and Tribes in adopting water quality standards. The criteria also provide a scientific basis for EPA to develop Federally promulgated water quality standards under section 303(c).
B. What Is Atrazine and Why Are We Concerned About It?

Atrazine is an organic chemical used as an herbicide throughout the U.S. for control of weeds in agricultural crops. Environmental exposure occurs mainly from its application as an herbicide but may also occur from industrial manufacture, distribution releases, precipitation, field runoff, and drift. Atrazine is moderately volatile and soluble in water, and resistant to natural degradation in water. Because of atrazine's chemical properties and widespread use as an herbicide, concerns have been raised over the potential risks posed by exposure of aquatic organisms to it. For these reasons, EPA has developed the following water quality criteria:

## C. What Are the Notional

Recommended Water Quality Criteria?

## Freshwater

Aquatic life should not be affected unacceptably if the: One-hour average concentration of atrazine does not exceed $1,500 \mathrm{ug} / \mathrm{l}$ more than once every three years on the average (Acute Criterion) and if the Average Primary Producer Steinhaus Similarity deviation for a site is less than $5 \%$ (as determined using the Comprehensive Aquatic Systems Model (CASM) ${ }^{1}$ or other appropriate model and index) and is not exceeded more than once every three years (or other appropriate return frequency sufficient to allow system recovery). The 5\% index for the protection of aquatic plant community should also be protective of most freshwater animals (Chronic Criterion).

## Saltwater

Aquatic life should not be affected unacceptably if the: One hour average concentration of atrazine does not exceed $760 \mathrm{ug} / \mathrm{l}$ more than once every three years on the average (Acute Criterion) and if the thirty-day average concentration of atrazine does not exceed $17 \mathrm{ug} / \mathrm{l}$ more than once every

[^16]three years on the average (Chronic Criterion).
D. How Are the Revised Draft Criteria in Today's Publication Different From the 2001 Criteria?
The revised draft criteria in today's publication incorporate information on the toxicity of atrazine to aquatic plants and invertebrates that had not been available at the time of the 2001 publication. The change in critical endpoints reflects the scientific views of the Agency, the registrant, and those received from the public.

## E. How Has EPA Coordinated

 Development of Ecological Risk Assessments on Atrazine Between the Office of Water (OW) and the Office of Pesticide Programs (OPP)?Concurrent with OW's release of the Draft Aquatic Life Criteria Document for Atrazine at 66 FR 49186, OPP released its Preliminary Ecological Fate and Effects Risk Assessment of Atrazine at 66 FR 49180. Both offices shared their aquatic toxicity data bases for atrazine in the development of their risk assessment documents. OW and OPP also shared scientific views received on their respective risk assessment documents in response to their publication for review by the public.

Today, EPA is notifying the public about the availability of this aquatic life criteria document for atrazine to expand the public's involvement in the criteria development process. Simultaneously, EPA is publishing its Ecological Fate and Effects Risk Assessment for atrazine under FIFRA (http://www.epa.gov/ oppsrrd1/reregistration/atrazine/).

EPA notified the public of its intent to develop aquatic life criteria for atrazine in the Federal Register on October 29, 1999 (64 FR 58409). At that time EPA made available to the public all references identified by a recent literature review and solicited any additional pertinent data or scientific views that would be useful in developing the draft aquatic life criteria for atrazine. EPA then made the draft aquatic life criteria document for atrazine available for public review.

The Office of Water and the Office of Pesticide Programs will continue to work together and with stakeholders (States, Tribes, manufacturers, growers, and other interested parties) to develop an implementation document for States and Tribes to use in their adoption of atrazine criteria in State and Tribal standards. The draft implementation document will be made available for public review. EPA's current thinking is that the document would include:

- Mechanisms for States and Tribes to refine the exposure duration and frequency components of the atrazine criteria to best meet their more specific needs;
- Mechanisms for States and Tribes to best define exposure duration and frequency components of their criteria to clearly establish when a water as impaired (i.e., the water quality criteria are not being attained in stream) due to atrazine contamination;
- Mechanisms to establish screening levels (rolling average concentrations below the criteria) that if met would alleviate the need for States and Tribes to run complex models to determine if the chronic freshwater criteria is being met;

The Office of Water expects that it will obtain the necessary data to support the implementation document through a data generation agreement between the Office of Pesticides Programs and the Registrant. The Registrant will conduct a three year monitoring program in selected waters that will generate the data that EPA would use to provide additional information on how States and Tribes may adjust standards for more localized duration and frequency components of the criteria and more refined definitions of frequency and duration components of their criteria to clearly establish when a water is impaired waters for the purposes of CWA sections 305 (b) and 303(d).
F. What Specific Questions of Science Does EPA Want Views on?

Though the public is welcome to submit scientific views on any component of the atrazine aquatic life criteria document, EPA is specifically interested in scientific views on the following issues of science:

- The use of the Average Primary Producer Steinhaus Similarity deviation of $5 \%$ (as determined using the Comprehensive Aquatic Systems Model (CASM)) as protective of chronic effects to freshwater aquatic life;
- The applicability of the same approach to the protection of chronic effects to salt water aquatic life in place of a Guidelines calculated concentration stated above in II.C. Conceptually, the approach used for fresh water chronic criteria should be equally applicable to salt water chronic criteria. To date, however, salt water toxicity data have not been employed in the model. Additionally, there are fewer atrazine toxicity data available for salt water species than for freshwater species.
G. Where Can I Find More Information on EPA's Revised Process for Developing New or Revised Draft Criteria?

The Agency published detailed information about its revised process for developing and revising criteria in the Federal Register on December 10, 1998 ( 63 FR 68354) and in the EPA document entitled, National Recommended Water Quality-Correction (EPA 822-Z-99001, April 1999). The purpose of the revised process is to provide expanded opportunities for public input, and to make the criteria development process more efficient.

Dated: October 31, 2003.

## FEDERAL RESERVE SYSTEM

## Change in Bank Control Notices; Acquisition of Shares of Bank or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and $\S 225.41$ of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act ( 12 U.S.C. $1817(\mathrm{j})(7)$ ).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the office of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than November 21, 2003.
A. Federal Reserve Bank of Atlanta (Sue Costello, Vice President) 1000 Peachtree Street, N.E., Atlanta, Georgia 30303:

1. John Alfred Melancon, Jr., St. Martinville, Louisiana; to acquire shares of First Bankshares of St. Martin, Ltd., and its subsidiary, First Louisiana National Bank, both of Breaux Bridge, Louisiana.
B. Federal Reserve Bank of San Francisco (Tracy Basinger, Director, Regional and Community Bank Group) 101 Market Street, San Francisco, California 94105-1579:
2. David and Verla Sorensen, Salt Lake City, Utah, and Jeffrey and Sheila Smith, Midland, Texas; to retain voting shares of Community Bancorp, and thereby retain shares of Community Bank of Nevada, both of Las Vegas, Nevada. In addition, David and Verla Sorensen to acquire up to 25 percent of Community Bancorp, Las Vegas, Nevada.

Board of Governors of the Federal Reserve System, November 3, 2003.

## Robert deV. ${ }^{\text {Frierson, }}$

Deputy Secretary of the Board.

## FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 et seq.) (BHC Act), Regulation Y (12 CFR Part
225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States. Additional information on all bank holding companies may be obtained from the National Information Center website at wuw.ffiec.gov/nic/.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than December 1, 2003.
A. Federal Reserve Bank of Cleveland (Nadine W. Wallman, Assistant Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101-2566:

1. PSB Holdings, Inc., New Matamoras, Ohio; to become a bank holding company by acquiring 100 percent of the voting shares of The Peoples Savings Bank, New Matamoras, Ohio.
B. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 2200 North Pearl Street, Dallas, Texas 752012272:
2. Tolleson Wealth Management, Inc., Dallas, Texas, and Tolleson Wealth Management of Delaware, Inc., Dallas, Texas; to become bank holding companies by acquiring 100 percent of the voting shares of Tolleson Tolleson Private Bank, Dallas, Texas.

In connection with this application, Tolleson Wealth Management, Inc., and Tolleson Wealth Management of Delaware, Inc., Dallas, Texas, also have applied to acquire 100 percent of the voting shares of TTG Service, Inc.; Tolleson Private Wealth Management LP; and Tolleson Funding LP, all of Dallas, Texas, and thereby engage in extending and servicing extensions of credit and providing investment and
advisory services pursuant to sections $225.28(\mathrm{~b})(1)$ and $225.28(\mathrm{~b})(6)$ of Regulation Y.
Board of Governors of the Federal Reserve System, November 3, 2003.

## FEDERAL RESERVE SYSTEM

## Notice of Proposals to Engage in Permissible Nonbanking Activities or to Acquire Companies that are

 Engaged in Permissible Nonbanking ActivitiesThe companies listed in this notice have given notice under section 4 of the Bank Holding Company Act (12 U.S.C. 1843) (BHC Act) and Regulation Y (12 CFR Part 225) to engage de novo, or to acquire or control voting securities or assets of a company, including the companies listed below, that engages either directly or through a subsidiary or other company, in a nonbanking activity that is listed in $\$ 225.28$ of Regulation $Y$ (12 CFR 225.28) or that the Board has determined by Order to be closely related to banking and permissible for bank holding companies. Unless otherwise noted, these activities will be conducted throughout the United States.
Each notice is available for inspection at the Federal Reserve Bank indicated. The notice also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether the proposal complies with the standards of section 4 of the BHC Act. Additional information on all bank holding companies may be obtained from the National Information Center website at www.ffiec.gov/nic/.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than November 21, 2003.
A. Federal Reserve Bank of Atlanta (Sue Costello, Vice President) 1000 Peachtree Street, N.E., Atlanta, Georgia 30303:

1. Bonifay Holding Company, Inc., Bonifay, Florida; to engage de novo, in making, acquiring, brokering, or servicing loans or other extensions of credit, pursuant to section 225.28(b)(1) of Regulation Y.

Board of Governors of the Federal Reserve System, November 3, 2003.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

## Office of the Secretary

[Document Identifier: OS-0990-TANF]

## Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Office of the Secretary, Department of Health and Human Services.
In compliance with the requirement of section 3506 (c)(2)(A) of the Paperwork Reduction Act of 1995, the Office of the Secretary (OS), Department of Health and Human Services, is publishing the following summary of proposed collections for public
comment. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.
\#1 Type of Information Collection Request: New Collection;

Title of Information Collection: Survey of State and Locao Contracting Officials on Contracting for Social Services Under Charitable Choice;

Form/OMB No.: OS-0990-TANF;
Use: This data collection will enable HHS to document the extent to which state and local contracting officials in the Temporary Assistance for Needy Families and Substance Abuse Prevention and Treatment programs understand and implement federal charitable Choice regulations governing the provisions of social services by faith-based organizations. The information will be collected via a mail survey of a total of 173 respondents at the state and local levels.

Frequency: One time;
Affected Public: State, local, or tribal governments,

Annual Number of Respondents: 173;
Total Annual Responses: 173;
Average Burden Per Response: 30 to 90 minutes;

Total Annual Hours: 175.
\#2 Type of Information Collection Request: New collection;
Title of Information Collection: Implementation of an Internet \& PaperBased Uniform Data Set for OMH-
Funded Activities;
Form/OMB No.: OS-0990-OMH;
Use: Involves transitioning the developed paper-based UDS modules to the Web-based prototype and will be implemented among OMH-partners. Will be regular system for reporting program management and performance data for all OMH-funded activities.

Frequency: Quarterly;
Affected Public: Business or other for profit, not for profit institutions, State, local, or tribal government;

Annual Number of Respondents: 2,772;

Total Annual Responses: 2,772;
Average Burden Per Response: 1 hour;
Total Annual Hours: 2,772.
To obtain copies of the supporting statement and any related forms for the
proposed paperwork collections referenced above, access the HHS Web site address at http://www.hhs.gov/ oirm/infocollect/pending/ or e-mail your request, including your address, phone number, OMB number, and OS document identifier, to
Naomi.Cook@hhs.gov, or call the Reports Clearance Office on (202) 6905522. Written comments and recommendations for the proposed information collections must be mailed within 60 days of this notice directly to the OS Paperwork Clearance Officer designated at the following address: Department of Health and Human Services, Office of the Secretary, Assistant Secretary for Budget, Technology, and Finance, Office of Information and Resource Management, Attention: Naomi Cook (0990-TANF/ OMH), Room 531-H, 200 Independence Avenue, SW., Washington DC 20201.

## Dated: October 24, 2003.

## John P. Burke III,

Office of the Secretary, Paperwork Reduction Act Reports Clearance Officer.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

Innovative Administration Systems for Vaccines; Meeting
Agencr: Office of the Assistant Secretary for Public Health Emergency Preparedness, HHS.
ACTION: Notice of meeting.
Summary: The Department of Health and Human Services (DHHS) is announcing the following public meeting: Innovative Administration Systems for Vaccines. The topic to be discussed is the latest scientific and clinical developments in innovative administration systems for vaccines. These discussions will facilitate the development of vaccine delivery systems relative to the storage and deployment of vaccines and the rapid implementation of mass vaccination programs. The meeting will include sessions on Jet injector, Transdermal (microneedles, patches) and Transmucosal (oral, nasal, aerosol) systems. A detailed agenda, once finalized, will be posted on the meeting Web site.
dates and time: The meeting will be held on December 18,2003, from 8:30 a.m. to 5 p.m. and on December 19, 2003 from 8:30 a.m. to 4 p.m. LOCATION: The meeting will be held at The DoubleTree Hotel, 1750 Rockville Pike, Rockville, Maryland.

## FOR FURTHER INFORMATION CONTACT:

Inquiries can be addressed to: the e-mail address vaccine750@saic.com or by telephone to 301-228-3124.
REGISTRATION: Registration is available at the following Web site until November 26, 2003: http:// www.seeuthere.com/event/m2c640854475248370 . A nominal registration fee of $\$ 30$ will be charged those registering up to November 26, 2003. After November 26 attendee registration will occur on-site at a $\$ 40$ registration fee.

Limited space is available for exhibitors. Potential exhibitors are asked to inquire via the e-mail address or phone number listed above. An exhibitor fee of $\$ 125$ will be charged.

Dated: November 1, 2003.

[Program Announcement 04004]

## Public Health Conference Grant Program; Notice of Availability of Funds-Amendment

A notice announcing the availability of fiscal year 2004 funds to support a Public Health Conference Grant Program was published in the Federal Register on August 28, 2003, Volume 68, Number 167, pages 51781-51785. The notice is amended as follows: page 51782 , second column, Section D. Funding, third paragraph, delete lines 11 through 15, "Application requests that exceed \$50,000 (CDC) or $\$ 10,000$ (ATSDR) will be determined as noq responsive and will be returned to the applicant without review".
Page 51783, second column, Section G. Content, after the second paragraph, insert:

The LOI should specifically describe the following requirements:

- The name of the organization
- Primary contact person's name
- Mailing address
- Telephone number and, if available, fax number and e-mail
- Title of the proposed conferenceinclude the term "conference," "symposium," or similar designation
- Date(s) of conference-inclusive dates (not a series) of the conference
- Location of city, State, and physical facilities required for the conduct of the meeting
- Project topics, (no more than 2)
- Total conference cost and total requested from CDC
- Intended audience, approximate number, and profession of persons expected to attend.
- Justification for the conference

These changes apply only to Cycles B
and $C$ of the conference support
application and funding process.
Dated: Noveinber 3, 2003.
Edward Schultz,
Acting Director, Procurement and Grants Office, Centers for Disease Control and Prevention.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

## Agency for Toxic Substances and

 Disease RegistryCitizens Advisory Committee on Public Health Service (PHS) Activities and Research at Department of Energy (DOE) Sites: Oak Ridge Reservation Health Effects Subcommittee

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Agency for Toxic Substances and Disease Registry (ATSDR) and the Centers for Disease Control and Prevention (CDC) announce the following meeting.

Name: Citizens Advisory Committee on PHS Activities and Research at DOE Sites: Oak Ridge Reservation Health Effects Subcommittee (ORRHES).

Time and Date: 12 p.m.-8 p.m., December 2, 2003.

Place:DOE Information Center, 475 Oak Ridge Turnpike, Oak Ridge, Tennessee, 37830. Telephone: (865) 241-4780.

Status: Open to the public, limited only by the space available. The meeting room accommodates approximately 50 people.
Background: A Memorandum of Understanding (MOU) was signed in October 1990 and renewed in September 2000 between ATSDR and DOE. The MOU delineates the responsibilities and procedures for ATSDR's public health activities at DOE sites required under sections $104,105,107$, and 120 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or "Superfund"). These activities include health consultations and public health assessments at DOE sites listed on, or proposed for, the Superfund National Priorities List and at sites that are the subject of petitions from the public; and other health-related activities such as epidemiologic studies, health surveillance, exposure and disease registries, health education, substance-specific applied
research, emergency response, and preparation of toxicological profiles. In addition, under an MOU signed in December 1990 with DOE and replaced by an MOU signed in 2000, the Department of Health and Human Services (HHS) has been given the responsibility and resources for conducting analytic epidemiologic investigations of residents of communities in the vicinity of DOE facilities, workers at DOE facilities, and other persons potentially exposed to radiation or to potential hazards from nonnuclear energy production and use. HHS has delegated program responsibility to CDC.

Purpose: This subcommittee is charged with providing advice and recommendations to the Director, CDC, and the Administrator, ATSDR, pertaining to CDC's and ATSDR's public health activities and research at this DOE site. Activities shall focus on providing the public with a vehicle to express concerns and provide advice and recomniendations to CDC and ATSDR. The purpose of this ineeting is to receive updates from ATSDR and CDC, and to address other issues and topics, as necessary.
Matters to be Discussed: The agenda includes a discussion of the final public health assessment on Uranium Release from the Y-12 plant, presentation on the chemical screening process for biota, updates from the Public Health Assessment. Public Health Needs Assessment, Agenda, and Outreach and Communications Workgroup. Agenda items are subject to change as priorities dictate.

For Further Information Contact: Lorine Spencer, Designated Federal Official, or Marilyn Palmer, Committee Management Specialist, Division of Health Assessment and Consultation, ATSDR, 1600 Clifton Road, NE., M/S E-32, Atlanta, Georgia 30333, telephone 1-888-42-ATSDR(28737), fax (404) 498-1744.

The Director, Management Analysis and Services Office has been delegated the authority to sign Federal Register notices pertaining to announcements of meetings and other committee management activities, for both CDC and ATSDR.

Dated: November 3, 2003
Joseph E. Salter,
Acting Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

## Agency for Toxic Substances and Disease Registry

## [ATSDR-196]

Notice of the Revised Priority List of Hazardous Substances That Will Be the Subject of Toxicological Profiles
agency: Agency for Toxic Substances and Disease Registry (ATSDR), U.S. Department of Health and Human Services (HHS).

ACTION: Notice.
SUMmary: The Comprehensive
Environmental Response,
Compensation, and Liability Act (CERCLA or Superfund), as amended by the Superfund Amendments and Reauthorization Act (SARA), requires that ATSDR and the Environmental Protection Agency (EPA) revise the Priority List of Hazardous Substances. This list includes substances most commonly found at facilities on the CERCLA National Priorities List (NPL) which have been determined to be of greatest concern to public health at or around these NPL hazardous waste sites. This announcement provides notice that the agencies have developed and are making available a revised CERCLA Priority List of 275 Hazardous Substances, based on the most recent information available. Each substance on the priority list is a candidate to become the subject of a toxicological profile prepared by ATSDR and subsequently a candidate for the identification of priority data needs. In addition to the Priority List of Hazardous Substances, ATSDR has developed a Completed Exposure Pathway Site Count Report. This report lists the number of sites or events with ATSDR activities where a substance has been found in a completed exposure pathway (CEP). This report is included in the Support Document of the Priority List.
ADDRESSES: Requests for a copy of the report, the 2003 CERCLA Priority List of Hazardous Substances That Will Be The Subject of Toxicological Profiles and Support Document, including the CEP report, should bear the docket control number ATSDR-196, and should be submitted to: ATSDR Information Center, Division of Toxicology, Mail Stop E-29, 1600 Clifton Rd., N.E., Atlanta, Georgia 30333. Requests must be in writing.
Electronic Availability: The 2003 Priority List of Hazardous Substances will be posted on ATSDR's World-Wide Web server on the Internet located at http://www.atsdr.cdc.gov/clist.html. The CEP Report will also be posted at http://www.atsdr.cdc.gov/cep.html.

This is an informational notice only, and comments are not being solicited at this time. However, any comments received will be considered for inclusion in the next revision of the list and placed in a publicly accessible docket; therefore, please do not submit confidential business or other confidential information.
FOR FURTHER INFORMATION CONTACT:
ATSDR, Division of Toxicology,
Emergency Response and Scientific

Assessment Branch, 1600 Clifton Road, N.E., Mail Stop E-29, Atlanta, Georgia 30333, telephone 888-422-8737.
SUPPLEMENTARY INFORMATION: CERCLA establishes certain requirements for ATSDR and EPA with regard to hazardous substances that are most commonly found at facilities on the CERCLA NPL. Section 104(i)(2) of CERCLA, as amended [42 U.S.C. 9604(i)(2)], required that the two agencies prepare a list, in order of priority, of at least 100 hazardous substances that are most commonly found at facilities on the NPL and which, in their sole discretion, have been determined to pose the most significant potential threat to human health (see 52 FR 12866, April 17, 1987). CERCLA also required the agencies to revise the priority list to include 100 or more additional hazardous substances (see 53 FR 41280, October 20, 1988), and to include at least 25 additional hazardous substances in each of the three successive years following the 1988 revision (see 54 FR 43619, October 26, 1989; 55 FR 42067, October 17, 1990; 56 FR 52166, October 17, 1991). CERCLA also requires that ATSDR and EPA shall, at least annually thereafter, revise the list to include additional hazardous substances that have been determined to pose the most significant potential threat to human health. In 1995, the agencies altered the publication schedule of the priority list by moving to a 2 -year publication schedule, reflecting the stability of this listing activity ( 60 FR 16478, March 30, 1995). As a result, the priority list is now on a 2-year publication schedule with a yearly informal review and revision. Each substance on the CERCLA Priority List of Hazardous Substances is a candidate to become the subject of a toxicological profile prepared by ATSDR and subsequently a candidate for the identification of priority data needs.

The initial priority lists of hazardous substances (1987-1990) were based on the most comprehensive and relevant information available when the lists were developed. More comprehensive sources of information on the frequency of occurrence and the potential for human exposure to substances at NPL sites became available for use in the 1991 priority list with the development of ATSDR's HazDat database. Utilizing this database, a revised approach and algorithm for ranking substances was developed in 1991, and a notice announcing the intention of ATSDR and EPA to revise and re-rank the Priority List of Hazardous Substạnces was
published on June 27, 1991 (56 FR 29485). The subsequent 1991 Priority List and revised approach used for its compilation was summarized in the "Revised Priority List of Hazardous Substances" Federal Register notice published October 17, 1991 (56 FR 52166). The same approach and the same basic algorithm have been used in all subsequent activities, including the 2003 listing activity. The algorithm used in ranking hazardous substances on the priority list consists of three criteria, which are combined to result in the total score. The three criteria are: frequency of occurrence at NPL sites; toxicity; and potential for human exposure.
Since HazDat is a dynamic database with ongoing data collection, additional information from the HazDat database became available for the 2003 listing activity. This additional information has been entered into HazDat since the development of the 2001 Priority List of Hazardous Substances. The site-specific information from HazDat that is used in the listing activity has been collected from ATSDR public health assessments, health consultations, and from site file data packages that are used to develop these public health assessments. The new information may include more recent NPL frequency of occurrence data, additional concentration data, and more information on exposure to substances at NPL sites. With these additional data, 11 substances have been replaced on the list of 275 substances since the 2001 publication. Of the 11 replacement substances, 6 are new candidate substances, and 5 are substances that were previously under consideration. These replacement substances and changes in the order of substances appearing on the CERCLA Priority List of Hazardous Substances will be reflected in the program activities that rely on the list for future direction.

The 2003 Priority List of Hazardous Substances includes 275 substances that have been determined to be of greatest concern to public health based on the criteria of CERCLA Section 104(i)(2) [42 U.S.C. $9604(\mathrm{i})(2)]$. A total of 863 candidate substances have been analyzed and ranked with the current algorithm. Of these candidates, the 275 substances on the priority list may become the subject of toxicological profiles in the future. The top 25 substances on the 2003 Priority List of Hazardous Substances are listed below.

| Rank | Substance name |
| :--- | :--- |
| $1 \ldots \ldots .$. | Arsenic. |
| $2 \ldots . . . .$. | Lead. |

| Rank | Substance name |
| :---: | :---: |
| 3 ...... | Mercury. |
| 4 | Vinyl Chloride. |
| 5 ........ | Polychlorinated Biphenyls. |
| 6 ..... | Benzene. |
| 7 ........ | Cadmium. |
| 8 | Polycyclic Aromatic Hydrocarbons. |
| 9 | Benzo(a)Pyrene. |
| 10 | Benzo(b)Fluoranthene. |
| 11 | Chloroform. |
| 12 ...... | DDT, P,P'- |
| 13 | Aroclor 1254. |
| 14 ...... | Aroclor 1260. |
| 15 | Dibenzo(a,h)Anthracene. |
| 16 | Trichloroethylene. |
| 17 ... | Chromium, Hexavalent. |
| 18 ... | Dieldrin. |
| 19 | Phosphorus, White. |
| 20 | Chlordane. |
| 21 | DDE, P, P'- |
| 22 | Hexachlorobutadiene. |
| 23 .. | Coal Tar Creosote. |
| 24 ...... | DDD, P', P'- |
| $25 . . .$. | Benzidine. |

ATSDR and EPA intend to publish the next revised list of hazardous substances in two years, with an informal review and revision performed in one year. These revisions will reflect changes and irmprovements in data collection and availability. Additional information on the existing methodology used in the development of the CERCLA Priority List of Hazardous Substances can be found in the Support Document to the List and in the Federal Register notices mentioned above.

In addition to the revised priority list, ATSDR is also releasing a Completed Exposure Pathway Site Count Report. A completed exposure pathway (CEP) is an exposure pathway that links a contaminant source to a receptor population. The CEP ranking is very similar to a sub-component of the potential-for-human-exposure component of the listing algorithm. The CEP ranking is based on a site frequency count, and thus lists the number of sites at which a substance has been found in a CEP. ATSDR's HazDat database contains this information which is derived from ATSDR public health assessments and health consultations. Because exposure to hazardous substances is of significant concern, ATSDR is publishing this CEP report along with the CERCLA Priority List of Hazardous Substances. Since this CEP report focuses on documented exposure, it provides an important prioritization based on substances to which people are exposed.
The substances on the CEP report are similar to the substances on the CERCLA Priority List of Hazardous Substances. However, there are some substances that are on the CEP report
because they are frequently found in completed exposure pathways, but are not on the CERCLA Priority List because they have a very low toxicity (e.g., sodium). Since the CERCLA Priority List incorporates three different components (toxicity, frequency of occurrence, and potential for human exposure) to
determine its priority substances, substances with very low toxicity are not on the CERCLA Priority List and consequently are not the subject of toxicological profiles. In addition, since the Priority List is mandated by CERCLA, it only uses data from sites on the CERCLA National Priorities List,
whereas the CEP report uses data from all sites with ATSDR activities that have a CEP. Of the 100 substances on the CEP report, the 25 substances found at the most number of sites in a CEP are presented below.

| Substance name | Number of sites with substance in a CEP |  |
| :---: | :---: | :---: |
|  | All sites | NPL sites |
| Lead | 386 | 251 |
| Trichloroethylene ............................................................................................................. | 338 | 280 |
| Arsenic ........................................................................................................................... | 299 | 192 |
| Tetrachloroethylene | 251 | 198 |
| Volatile Organic Compounds, Unspecified ............................................................................... | 187 | 129 |
| Benzene ...... | 184 | 130 |
| Cadmium ......................................................................................................................... | 183 | 126 |
| Chromium ..................................................................................................................... | 178 | 121 |
| Polychlorinated Biphenyls | 168 | 111 |
| Mercury | 144 | 86 |
| Manganese | 144 | 84 |
| Zinc | 143 | 88 |
| 1, 1,1-Trichloroeth | 128 | 108 |
| Copper | 125 | 73 |
| Chioroform | 116 | 90 |
| 1, 1-Dichloroethene | 109 | 93 |
| Polycyclic Aromatic Hydrocarbons .......................................................................................... | 108 | 75 |
| Benzo (A) Pyrene .................................................................................................................. | 105 | 55 |
| Methylene Chloride ........................................................................................................ | 104 | 72 |
| Nickel | 102 | 65 |
| Toluene | 101 | 66 |
| Vinyl Chloride ................................................................................................................... | 100 | 81 |
| Banium .......................................................................................................................... | 95 | 54 |
| Antimony | 92 | 58 |
| 1, 2-Dichloroethane .......................................................................................................... | 89 | 73 |

Note: Sorted by the ALL Sites column.
All Sites = all sites with ATSDR activities that have a CEP; NPL Sites = current and former sites on the National Priorities List, as mandated.
Dated: November 3, 2003.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

## Centers for Disease Control and

 Prevention
## Public Health Genetics Fellowship

Announcement Type: New.
Funding Opportunity Number: 04059. Catalog of Federal Domestic
Assistance Number: 93.283.
Key Dates:
Letter of Intent Deadline: November 26, 2003.
Application Deadline: December 22, 2003.

## I. Funding Opportunity Description

Authority: This program is authorized under Sections 301, $317(\mathrm{C}$ ), and $317(\mathrm{G})$ of the Public Health Service Act, (42 U.S.C. Sections 241, 247b-4, and 247b-8, as amended).
Purpose: The purpose of the program is to establish a cooperative agreement for co-sponsoring a Public Health Genetics Fellowship Program for genetics professionals to be located at the Centers for Disease Control and Prevention (CDC), in Atlanta, GA or other CDC locations. The intent of this program is to introduce genetics professionals to opportunities in public health genetics through education, training and career-enhancing experiences.
Fellowship candidates will include genetics professionals who are at the doctoral (MD and PhD ) and master's levels. Typical fellowships for genetics professionals who recently completed their training will be for a maximum of two years. For mid-career professionals, typical fellowships will be for one year, although appointments of less than one year may be made under special circumstances. Varying lengths of time for fellowship appointments will be considered on the basis of CDC and project needs.

This program addresses the "Healthy People 2010" focus areas of: Arthritis, Osteoporosis, and Chronic Back Conditions; Cancer; Chronic Kidney

Disease; Diabetes; Disability and Secondary Conditions; Heart Disease and Stroke; HIV; Immunization and Infectious Diseases; Maternal, Infant, and Child Health; Mental Health and Mental Disorders; Nutrition and Overweight; Oral Health; Respiratory Diseases; and Vision and Hearing.
Measurable outcomes of the program will be in alignment with the following performance goal for CDC: To develop career opportunities for genetics professionals in association with the recipient organization to work across CDC program areas to improve knowledge concerning genetics-related disease and disability; and to identify causes and risk factors for these conditions in order to develop prevention strategies and evaluate their effectiveness.

## Activities

Recipient activities for this program are as follows:

- In collaboration with CDC, assist with planning and implementation of a fellowship program for genetic professionals in public health. The target number of fellows for this project is up to two a year, although this may be increased if additional funds become available. This plan should include the recruitment, training and mentoring of fellows under the program.
- Provide a senior staff member to serve as co-director to lead fellowship recruitment and assist in the selection and mentoring of fellows.
- Identify and recruit fellowship candidates with expertise in appropriate topic areas and implement a recruitment plan through advertisements, announcements, professional associations, and complementary training programs.
- Assist CDC in the selection of candidates appropriate for the public health genetics fellowship program. Selection of candidates will be made by a committee comprised of members of the recipient organization in conjunction with CDC.
- Provide opportunities for fellows to present their fellowship work and participate in national networking, policy development conferences, and workshops to expand professional growth and skill levels.
- Provide salary and benefits commensurate with the background and experience for fellows selected in the program. This includes recipient support of related costs for the fellowships, including travel and training expenses; and for recipient staff salaries and related technical and administrative costs.
- Collect and report to CDC information on status of fellows for up to five years after completion of the fellowship program in order to assess the impact of the fellowship program on public health genetics.

In a cooperative agreement, CDC staff is substantially involved in the program activities, above and beyond routine grant monitoring. CDC Activities for this program are as follows:

- Assist in the development and implementation of the overall fellowship plan and training program. In that regard, CDC will provide a senior staff member to serve as fellowship codirector in the planning and conduct of the program.
- Provide formal and informal training opportunities to the recipient organization and the assigned fellows.
- Coordinate and facilitate the placement of fellows with appropriate advanced training opportunities at CDC.
- Provide supervisory and mentoring support to fellows to assure optimal developmental experiences under the fellowship assignments.

## II. Award Information

Type of Award: Cooperative Agreement. CDC involvement in this program is listed in the Activities Section above.

Fiscal Year Funds: 2004.
Approximate Total Funding: $\$ 125,000$. This funding level will be modified based on the number of fellowship positions available at CDC , and the capacity of the recipient to provide highly qualified candidates for the fellowship program.

Approximate Number of Awards: One.

Anticipated Award Date: March 1, 2004.

Budget Period Length: 12 months.
Project Period Length: Five years.
Throughout the project period, CDC's commitment to continuation of awards will be conditioned on the availability of funds, evidence of satisfactory progress by the recipient (as documented in required reports), and the determination that continued funding is in the best interest of the Federal Government.

## III. Eligibility Information

Eligible applicants: Assistance will be provided only to a national non-profit organization. This announcement is limited to national non-profit organizations since they would have the capacity to recruit and place doctoral and master's level professionals in career-enhancing programs outside the individual educational institution or place of employment. A national
organization would also have the established ability to recruit throughout the nation.

Other Eligibility Requirements: If your application is incomplete or nonresponsive to the requirements listed below, it will not be entered into the review process. You will be notified that your application did not meet the submission requirements.

CDC plans to make one award to a leading organization/institution which: (1) Has documented access to large number of doctoral students, genetics residents, and genetics professionals in a broad range of areas related to genetics and public health: including but not limited to; cytogenetics, molecular genetics, biochemical genetics, clinical genetics, genetic counseling, population genetics, and genetic epidemiology; and (2) demonstrates a well-established capacity through documented collaborations and affiliations with training programs such as genetic counseling training programs, genetics residencies, and association memberships to enable recruitment of highly qualified candidates for the fellowship program.

Cost Sharing or Matching: Matching funds are not required for this program.

Note: Title 2 of the United States Code Section 1611 states that an organization described in Section $501(\mathrm{c})(4)$ of the Internal Revenue Code that engages in lobbying activities is not eligible to receive Federal funds constituting an award, grant, or loan.

## IV. Application and Submission Information

## Letter of Intent (LOI)

CDC requests that you send a LOI if you intend to apply for this program. The LOI will be used only to gauge the level of interest in this program, and to allow CDC to plan the application review. Failure to submit a LOI does NOT preclude you from submitting an application. The LOI must be written in the following format:

- Maximum number of pages: Two.
- Font size: 12-point unreduced.
- Paper size: 8.5 by 11 inches.
- Page margin size: One-inch
margins.
- Printed only on one side of page
- Single spaced
- Written in English, avoid jargon

The LOI must contain the following information: Name, address, and telephone number of the proposed Principal Investigator, number aud title of this program announcement, names of other key personnel, designations of collaborating institutions and entities, and an outline of the proposed work, recruitment approach, and expected outcomes.

## LOI Deadline Date: November 26,

 2003.LOI Submission Address: Submit your LOI by express delivery service, or email to: Sonja Rasmussen, M.D., M.S., Associate Director for Science, National Center on Birth Defects and Developmental Disabilities, CDC, 1600 Clifton Road, Mailstop E-86, Atlanta, GA 30333, E-Mail Address: skr9@cdc.gov, Telephone: 404-4983908.

How to Obtain Application Forms: To apply for this funding opportunity use application form PHS 5161. Forms, applications, and instructions are available on the CDC Web site, at the following Internet address: http:// www.cdc.gov/od/pgo/forminfo.htm
If you do not have access to the Internet, or if you have difficulty accessing the forms on-line, you may contact the CDC Procurement and Grants Office Technical Information Management Section (PGO-TIM) staff at: 770-488-2700. Application forms can be mailed to you.

Content and Form of Submission: This program announcement is the definitive guide on application format, content, and deadlines. It supersedes information provided in the application instructions. If there are discrepancies between the application form instructions and the program announcement, adhere to the guidance in the program announcement.

You are required to have a Dun and Bradstreet Data Universal Numbering System (DUNS) number to apply for a grant or cooperative agreement from the Federal government. The DUNS number is a nine-digit identification number, which uniquely identifies business entities. Obtaining a DUNS number is easy and there is no charge. To obtain a DUNS number, access http:// www.dunandbradstreet.com or call 1-866-705-5711.

For more information, see the CDC Web site at: http://www.cdc.gov/od/pgo/ funding/pubcommt.htm If your application form does not have a DUNS number field, please write your DUNS number at the top of the first page of your application, and/or include your DUNS number in your application cover letter.

You must submit a signed original and two copies of your application forms. The application should include a separate typed abstract of the proposal consisting of no more than one singlespaced page. The application should include a table of contents for the project narrative and all related attachments.

The application must include a project narrative with your application
forms. Your narrative must be submitted in the following format:

- Maximum number of pages: 20. If your narrative exceeds the page limit, only the first pages which are within the page limit will be reviewed.
- Font size: 12 point unreduced
- Paper size: 8.5 by 11 inches
- Page margin size: one-inch margins
- Printed only on one side of page
- Single-spaced
- Held together only by rubber bands or metal clips; not bound in any other way.

Your narrative should address activities to be conducted over the entire project period, and must include the items cited under Evaluation

## Criteria.

Funding restrictions, which must be taken into account while writing your budget are that project funds cannot be used to supplant other available applicant or collaborating agency funds, for construction, or for lease or purchase of facilities or space.

If you are requesting indirect costs in your budget, you must include a copy of your indirect cost rate agreement. If your indirect cost rate is a provisional rate, the agreement must be less than 12 months from the application due date.

Guidance for completing your budget can be found on the CDC Web site, at the following Internet address: http:// www.cdc.gov/od/pgo/funding/ budgetguide.htm

Additional information may be included in the application appendices. The appendices will not be counted toward the narrative page limit. This additional information may include curriculum and resumes for key project staff, organizational charts, letters of support, etc.; and should be limited to those items relevant to the requirements of this announcement.

Submission Date, Time, and Address:
Application Deadline Date: December 22, 2003.
Application Submission Address: Submit your application by mail or express delivery service to: Technical Information Management-PA 04059, Procurement and Grants Office, 2920 Brandywine Road, Atlanta, GA 30341. Applications may not be submitted by fax or e-mail at this time.

Explanation of Deadlines:
Applications must be received in the CDC Procurement and Grants Office by 4 p.m. Eastern Time on the deadline date. If you send your application by the United States Postal Service or commercial delivery service, you must ensure that the carrier will be able to guarantee delivery of the application by the closing date and time. If CDC receives your application after closing
due to: (1) Carrier error, when the carrier accepted the package with a guarantee for delivery by the closing date and time, or (2) significant weather delays or natural disasters, you will be given the opportunity to submit documentation of the carriers guarantee. If the documentation verifies a carrier problem, CDC will consider the application as having been received by the deadline.

This program announcement is the definitive guide on application format, content, and deadlines. It supersedes information provided in the application instructions. If your application does not meet the deadline above, it will not be eligible for review, and will be discarded. You will be notified that you did not ineet the submission requirements.
If you have a question about the receipt of your application, first contact your courier. CDC will not notify you by mail upon receipt of your application, but if you still have any-questions, contact the PGO-TIM staff at: 770-4882700. Before calling, please wait three days after the application deadline. This will allow time for applications to be processed and logged.

Intergovernmental Review of
Applications: Executive Order 12372 does not apply to this program.

## V. Application Review Information

Review Criteria: You are required to provide measures of outcome and effectiveness that will demonstrate the accomplishment of the various identified objectives of the cooperative agreement. Measures of effectiveness must relate to the performance goals stated in the "Purpose" section of this announcement. Measures must be objective and quantitative, and must measure the intended outcome. These measures of effectiveness must be submitted with the application and will be an element of evaluation.

Under the evaluation criteria noted below, applicants must describe precisely how they will conduct the project toward identifying and recruiting fellows in conjunction with placement opportunities at CDC, what collaborators and national affiliations are now in place to facilitate such recruitment, and how the proposed work plan will assure effective conduct of all components of the work in a timely and successful manner.

Your application will be evaluated against the following criteria:

- Organizational experience that indicates the extent of current work in the training and development of genetics professionals, and the documented capacity to identify
potential fellows for inclusion in this program. ( 35 Points)
- Convincing evidence of, and the extent to which national collaborations, affiliations, association memberships, and internal and external outreach systems are in place for immediate and effective fellowship recruitment and placement. (25 Points)
- Approach and methods to be utilized to conduct all aspects of the project as required under this announcement. ( 20 Points)
- Project timelines, work plan, and the performance measures to be employed and measured. (10 Points)
- Evaluation plan to assess individual components and the overall goals and objectives of the cooperative agreement. (10 Points)
- Budget (Not Scored). This criteria includes the degree to which the budget is reasonable, clearly justified, accurate, and consistent with the purposes of this announcement. The budget justification will not be counted in the stated page limit.
Review and Selection Process: An objective review panel will evaluate your application according to the criteria listed above.

## VI. Award Administration Information

Award Notices: If your application is to be funded, you will receive a Notice of Grant Award (NGA) from the CDC Procurement and Grants Office. The NGA shall be the only binding, authorizing document between the recipient and CDC. The NGA will be signed by an authorized Grants Management Officer, and mailed to the recipient fiscal officer identified in the application.

## Administrative and National Policy

 Requirements
## 45 CFR Part 74 and 92

For more information on the Code of Federal Regulations, see the National Archives and Records Administration at the following Internet address: http:// www.access.gpo.gov/nara/cfr/cfr-tablesearch.html
The following additional
requirements apply to this project:

- AR-9 Paperwork Reduction Act Requirements.
- AR-10 Smoke-Free Workplace Requirements.
- AR-11 Healthy People 2010.
- AR-12 Lobbying Restrictions.
- AR-14 Accounting System Requirements.
- AR-15 Proof of Non-Profit Status.
- AR-16 Security Clearance

## Requirement.

Additional information on these requirements can be found on the CDC

Web site at the following Internet address: http://www.cdc.gov/od/pgo/ funding/ARs.htm.

## Reporting Requirements

You must provide CDC with an original, plus two copies of the following reports:

1. Interim progress report, no less than 90 days before the end of the budget period. The progress report will serve as your non-competing continuation application, and must contain the following elements:
a. Current budget period activities objectives.
b. Current budget period financial progress.
c. New budget period program proposed activity objectives.
d. Detailed line-item budget and justification.
e. Additional requested information.
2. Financial status report, no more than 90 days after the end of the budget period.
3. Final financial and performance reports, no more than 90 days after the end of the project period.

## VII. Agency Contacts

For general questions about this announcement, contact: Technical Information Management Section (PGOTIM), Procurement and Grants Office, 2920 Brandywine Road, Atlanta, GA 30341, Telephone: 770-488-2700.

For program technical assistance, contact: Sonja Rasmussen, M.D., M.S., Associate Director for Science, National Center on Birth Defects and Developmental Disabilities, CDC, 1600 Clifton Road, Mailstop E-86, Atlanta, GA 30333, E-Mail Address: skr9@cdc.gov, Telephone: 404-4983908.

For budget assistance, contact: Susan Kiddo, Grants Management Officer, CDC Procurement and Grants Office, 2920 Brandywine Road, Atlanta, GA 30341, Telephone: 770-488-2605, E-mail: scb7@cdc.gov.

Dated: November 3, 2003.

BILLING CODE 4163-18-P

## DEPARTMENT OF HEALTH AND HUMAN SERVICES <br> Centers for Disease Control and Prevention <br> The Advisory Committee to the Director of the National Center for Environmental Health of the Centers for Disease Control and Prevention: Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Centers for Disease Control and Prevention (CDC) announce the following committee meeting.
name: Advisory Committee to the Director (ACD), National Center for Environmental Health (NCEH).
TIME AND DATES: 1 p.m. $-5: 30$ p.m., December 1, 2003; 8:30 a.m.-4: 30 p.m., December 2, 2003.
PLACE: Hilton Atlanta Hotel, 255 Courtland Street, NE., Atlanta, GA 30303.
status: Open to the public for observation, limited only by the space available. The meeting room accommodates approximately 100 people.
PURPOSE: The Secretary, and by delegation, the Director of the Centers for Disease Control and Prevention, are authorized under Section 301 (42 U.S.C. 241) and Section 311 (42 U.S.C. 243) of the Public Health Service Act, as amended, to (1) conduct, encourage, cooperate with, and assist other appropriate public authorities, scientific institutions, and scientists in the conduct of research, investigations, experiments, demonstrations, and studies relating to the causes, diagnosis, treatment, control, and prevention of physical and mental diseases and other impairments; (2) assist states and their political subdivisions in the prevention of infectious diseases and other preventable conditions and in the promotion of health and well being; and (3) train state and local personnel in health work.
MATtERS TO BE DISCUSSED: The agenda items for the meeting on December 12, 2003, will include but are not limited to an update and discussions on the consolidation of NCEH and the Agency for Toxic Substances and Disease Registry (ATSDR); review of discussions for consolidating the ATSDR Board of Scientific Counselors (BSC) and the ACD, NCEH; discussion on peer review background and process; and an overview of existing ACD and BSC subcommittees and working groups. Agenda items are tentative and subject to change.

## FOR FURTHER INFORMATION CONTACT:

Individuals interested in attending the meeting, please contact Priscilla Patin, CMP, Program Analyst, CDC, 4770 Buford Highway NE, MS F-29, Atlanta, Georgia 30341-3724; telephone 770-488-7629, fax 770-488-7024; e-mail: ppatin@cdc.gov. The deadline for notification of attendance is November 24, 2003.

The Director. Management Analysis and Services Office, has been delegated the authority to sign Federal Register notices pertaining to announcements of meetings and other committee management activities for both CDC and the Agency for Toxic Substances and Disease Registry.
Dated: November 3, 2003.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

## Centers for Disease Control and Prevention

## National Task Force on Fetal Alcohol Syndrome and Fetal Alcohol Effect

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Centers for Disease Control and Prevention (CDC) announces the following Federal advisory committee meeting.

Name: National Task Force on Fetal Alcohol Syndrome and Fetal Alcohol Effect (NTFFASFAE).

Times and Dates: 8:30 a.m.-4:30 p.m., December 8, 2003. 8:30 a.m.-12:30 p.m., December 9, 2003.
Place: Swissotel, 3391 Peachtree Road, NE., Atlanta, Georgia 30326, telephone 404/365-0065, fax 404/3658787.

Status: Open to the public, limited only by the space available. The meeting room accommodates approximately 65 people.

Purpose: The Secretary is authorized by the Public Health Service Act, Section 399G, (42 U.S.C. Section 280f, as added by Public Law 105-392) to establish a National Task Force on Fetal Alcohol Syndrome and Fetal Alcohol Effect to: (1) Foster coordination among all governmental agencies, academic bodies and community groups that conduct or support Fetal Alcohol Syndrome (FAS) and Fetal Alcohol Effect (FAE) research, programs and surveillance; and (2) to otherwise meet
the general needs of populations actually or potentially impacted by FAS and FAE.
Matters to be Discussed: Agenda items include: Discussions will focus on defining essential services needed for children with FAS and other alcoholrelated conditions, strategies for improving access to these services for affected children and families; presentations will include success stories of children with FAS that focus on their strengths. Additional agenda items include: An update on activities from the National Center on Birth Defects and Developmental Disabilities; the Interagency Coordinating Committee on Fetal Alcohol Syndrome; new research and program updates from the CDC and other Federal agencies; working group updates; future topics, and scheduling the next meeting. Agenda items are subject to change as priorities dictate.
FOR FURTHER INFORMATION CONTACT: R. Louise Floyd, DSN, RN, Designated Federal Official, National Center on Birth Defects and Developmental Disabilities, CDC, 1600 Clifton Road, NE., (E-86), Atlanta, Georgia 30333, telephone 404/498-3923, fax 404/4983040.

The Director, Management Analysis and Services Office, has been delegated the authority to sign Federal Register notices pertaining to announcements of meetings and other committee management activities for both the CDC and ATSDR.

Dated: November 3, 2003.
Joseph E. Salter,
Acting Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

[Document Identifier: CMS-565, CMS-9044, CMS-P-0015A, CMS-1491, CMS-R-13, CMS-R-246, CMS-R-204, CMS-304 and 304a]

## Agency Information Collection Activities: Proposed Collection; Comment Request

Agency: Centers for Medicare and Medicaid Services.
In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Centers for Medicare and Medicaid Services (CMS) (formerly known as the

Health Care Financing Administration (HCFA)), Department of Health and Human Services, is publishing the following summary of proposed collections for public comment. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

1. Type of Information Collection Request: Extension of a currently approved collection; Title of Information Collection: Medicare Qualification Statement for Federal Employees and Supporting Regulations in 42 CFR 406.15; Form No.: CMS-565 (OMB\# 0938-0501); Use: The CMS-565 is completed by individuals filing for hospital insurance ([HI] Part A) benefits based upon their federal employment. This information is needed to determine if SSA/CMS can use (deem) federal employment prior to 1983 to provide quarters of coverage so the individual can qualify for free hospital insurance.; Frequency: Other: One-time-only; Affected Public: Individuals or Households, Federal Government, State, Local, or Tribal Government; Number of Respondents: 4,300; Total Annual Responses: 4,300; Total Annual Hours: 717.
2. Type of Information Collection Request: Extension of a currently approved collection; Title of Information Collection: Provider Reimbursement Manual, Part 1Chapter 27, Sections 2721, 2722 and 2725, Request for Exception to End Stage Renal Disease Composite Rates and Supporting Regulations in 42 CFR 413.170 and 413.184; Form No.: CMS9044 (OMB\# 0938-0296); Use: This information collection describes the information End Stage Renal Disease facilities must submit in justifying an exception request to their composite rate for outpatient dialysis services; Frequency: On occasion; Affected Public: Business or other for-profit, Not-for-profit institutions, and Federal Government; Number of Respondents: 125; Total Annual Responses: 125; Total Annual Hours: 6,000.
3. Type of Information Collection Request: Extension of a currently approved collection; Title of

Information Collection: Medicare Current Beneficiary Survey (MCBS): Rounds 38-46; Form No.: CMS-P0015A (OMB\# 0938-0568); Use: The MCBS is a continuous, multipurpose survey of a nationally representative sample of aged and disabled persons enrolled in Medicare. The survey provides a comprehensive source of information on beneficiary characteristics, needs, utilization, and satisfaction with Medicare-related activities; Frequency: Other: 3 times a year; Affected Public: Individuals or Households, Business or other for-profit, and Not-for-profit institutions; Number of Respondents: 16,500; Total Annual Responses: 49,500; Total Annual Hours: 50,325.
4. Type of Information Collection Request: Extension of a currently approved collection; Title of Information Collection: Request for Medicare Payment-Ambulance and Supporting Regulations in 42 CFR Sections 410.1, 410.40, 424.124, 414.601, 414.605, 414.610, 414.611, 414.615, 414.620, and 414.625; Form No.: CMS-1491 (OMB\# 0938-0042); Use: This paper form is completed on an occasion basis by beneficiaries and/or ambulance suppliers. Also, it is submitted to a Medicare carrier to request payment for ambulance services; Frequency: On occasion; Affected Public: Business or other for-profit, Individuals or Households, and Not-forprofit institutions; Number of Respondents: 9,301,183; Total Annual Responses: 9,301,183; Total Annual Hours: 390,493.
5. Type of Information Collection Request: Extension of a currently approved collection; Title of Information Collection: Conditions of Coverage for Organ Procurement Organizations (OPOs) and Supporting Regulations in 42 CFR, Sections 486.304, 486.306, 486.307, 486.310, 486.316, 486.318, and 486.325; Form No.: CMS-R-13 (OMB\# 0938-0688); Use: Organ Procurement Organizations are required to submit accurate data to CMS concerning population and information on donors and organs on an annual basis in order to assure maximum effectiveness in the procurement and distribution of organs; Frequency: Annually; Affected Public: Not-for-profit institutions; Number of Respondents: 59; Total Annual Responses: 59; Total Annual Hours: 59,000.
6. Type of Information Collection Request: Extension of a currently approved collection; Title of Information Collection: Medicare Consumer Assessment of Health Plan Survey-Medicare + Choice (CAHPS-

M+C); Form No.: CMS-R-246(OMB\# 0938-0732); Use: Under the Balanced Budget Act of 1997, CMS is required to provide general and plan comparative information to beneficiaries that will help them make more informed health plan choices. A CAHPS fee-for-service survey is needed to provide information comparable to those data collected from the CAHPS managed care survey; Frequency: Annually; Affected Public: Individuals or Households; Number of Respondents: 168,000; Total Annual Responses: 168,000; Total Annual Hours: 55,450.
7. Type of Information Collection Request: Revision of a currently approved collection; Title of Information Collection: Data Collection for the Second Generation Social Health Maintenance Organization Demonstration; Form No.: CMS-R-204 (OMB\# 0938-0709; Use: The Centers for Medicare and Medicaid Services will continue to use the data collected under this effort to support the operational needs of the congressionally mandated and administratively extended Second Generation of the Social Health Maintenance Organization Demonstration.; Frequency: Annually; Affected Public: Individuals or Households; Number of Respondents: 15,000; Total Annual Responses: 15,000; Total Annual Hours: 4,950.
8. Type of Information Collection Request: Extension of a currently approved collection; Title of Information Collection: Medicaid Drug Rebate; Form No.: CMS-304 and 304a (0938-0676); Use: Section 1927 of the Social Security Act requires State Medicaid agencies to report to drug manufacturers and CMS on the drug utilization for their State and the amount of rebate to be paid by the manufacturer; Frequency: Quarterly; Affected Public: State, local, or tribal government; Number of Respondents: 51; Total Annual Responses: 204; Total Annual Hours: 6,125.
To obtain copies of the supporting statement and any related forms for the proposed paperwork collections referenced above, access CMS's Web site address at http://cms.hhs.gov/ regulations/pra/default.asp, or e-mail your request, including your address, phone number, OMB number, and CMS document identifier, to
Paperwork@hcfa.gov, or call the Reports Clearance Office on (410) 786-1326. Written comments and recommendations for the proposed information collections must be mailed within 60 days of this notice directly to the CMS Paperwork Clearance Officer designated at the following address: CMS, Office of Strategic Operations and

Regulatory Affairs, Division of Regulations Development and Issuances, Attention: Melissa Musotto, Room C5-14-03, 7500 Security Boulevard, Baltimore, Maryland 212441850.

Dated: October 30, 2003.

[Document Identifier: CMS-576, CMS-3427, CMS-R-282, CMS-372S]

## Agency Information Collection Activities: Submission for OMB Review; Comment Request

agencr: Centers for Medicare and Medicaid Services, HHS.
In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Centers for Medicare and Medicaid Services (CMS) (formerly known as the Health Care Financing Administration (HCFA), Department of Health and Human Services, is publishing the following summary of proposed collections for public comment. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

1. Type of Information Collection Request: Extension of a currently approved collection;

Title of Information Collection: Organ Procurement Organization (OPO) Request for Designation and Supporting Regulations in 42 CFR 486.304, 486.306, and 486.307; Form No.: CMS-576 (OMB\# 0938-0512); Use: The information provided on this form serves as a basis for certifying OPOs for participation in the Medicare and Medicaid programs and will indicate
whether the OPO is meeting the specified performance standards for reimbursement of service; Frequency: Annually; Affected Public: Business or other for-profit, and Not-for-profit institutions; Number of Respondents: 59; Total Annual Responses: 59; Total Annual Hours: 118.
2. Type of Information Collection Request: Extension of a currently approved collection; Title of Information Collection: End Stage Renal Disease Application and Survey and Certification Report and Supporting Regulations in 42 CFR 488.60; Form No.: CMS-3427 (OMB\# 0938-0360); Use: Part I of this form is a facility identification and screening measurement used to initiate the certification and recertification of ESRD facilities. Part II is completed by the Medicare/Medicaid State survey agency to determine facility compliance with ESRD conditions for coverage; Frequency: Every three years; Affected Public: Business or other for-profit institutions, Not-for-profit institutions; Number of Respondents: 4000; Total Annual Responses: 1,320; Total Annual Hours: 440.
3. Type of Information Collection Request: Extension of a currently approved collection; Title of Information Collection: Medicare + Choice ( $\mathrm{M}+\mathrm{C}$ ) Organization Appeals and Grievance Data Disclosure Requirements and Supporting Regulations in 42 CFR 422.64, 422.111, and 422.560-422.626; Form No.: CMS-R-282 (OMB\# 09380778); Use: M+C organizations will collect information on appeals and grievance dispositions to help CMS monitor plan performance and to provide information to beneficiaries to help them make informed decisions about their or potential health plans' performance; Frequency: SemiAnnually; Affected Public: Business or other for-profit; Number of Respondents: 211 TTotal Annual Responses: 422 Total Annual Hours: 422.
4. Type of Information Collection Request: Revision of a currently approved collection; Title of Information Collection: Annual Report on Home and Community Based Services Waivers and Supporting Regulations in 42 CFR 440.180 and 441.300-.310; Form No.: CMS-372(S) (OMB\# 0938-0272); Use: States request waivers in order for beneficiaries to have the option of receiving hospital services in their homes. States with an approved waiver under section 1915(c) of the Act are required to submit the CMS-372(S) annually in order for CMS to: (1) Verify that State assurances regarding waiver cost-neutrality are met,
and (2) determine the waiver's impact on the type, amount and cost of services provided under the State plan and health and welfare of recipients; Frequency: Annually; Affected Public: State, local or tribal government; Number of Respondents: 50; TTotal Annual Responses: 277; Total Annual Hours: 20,775.

To obtain copies of the supporting statement and any related forms for the proposed paperwork collections referenced above, access CMS Web site address at http://cms.hhs.gov/ regulations/pra/default.asp, or E-mail your request, including your address, phone number, OMB number, and CMS document identifier, to
Paperwork@hcfa.gov, or call the Reports Clearance Office on (410) 786-1326.
Written comments and recommendations for the proposed information collections must be mailed within 30 days of this notice directly to the OMB desk officer: OMB Human Resources and Housing Branch, Attention: Brenda Aguilar, New Executive Office Building, Room 10235, Washington, DC 20503.

Dated: October 30, 2003.

## Julie Brown,

CMS Reports Clearance Officer, Office of Strategic Operations and Strategic Affairs, Division of Regulations Development and Issuances.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

## Food and Drug Administration

[Docket No. 2003N-0482]

## Agency Information Collection Activities; Proposed Collection; Comment Request; Mammography Facilities, Standards, and Lay Summaries for Patients

agency: Food and Drug Administration, HHS.
ACTION: Notice.
summary: The Food and Drug
Administration (FDA) is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal agencies are required to publish notice in the Federal Register concerning each proposed collection of information, including each proposed extension of an existing information collection, and to allow 60 days for public comment in response to the notice. This notice solicits comments on
information collection requirements for mammography facilities, standards, and lay summaries for patients under part 900 (21 CFR part 900).
DATES: Submit written or electronic comments on the collection of information by January 6, 2004.
ADDRESSES: Submit electronic comments on the collection of information to: http://www.fda.gov/ dockets/ecomments. Submit written comments on the collection of information to the Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. All
comments should be identified with the docket number found in brackets in the heading of this document.

## FOR FURTHER INFORMATION CONTACT:

Peggy Robbins, Office of Management Programs (HFA-250), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-827-1223.
SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501-3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal agencies to provide a 60-day notice in the Federal Register concerning each proposed collection of information, including each proposed extension of an
existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information listed below.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper perforinance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.
Mammography Facilities, Standards, and Lay Summaries for Patients-21 CFR Part 900 (OMB Control Number 0910-0309)-Extension

Public Law 102-539, the Mammography Quality Standards Act of 1992 (MQSA) (42 U.S.C. 263b) as amended by the Mammography Quality Standards Reauthorization Act (MQSRA) of 1998 (Public Law 105-248) establishes the authority for a Federal certification and inspection program for mammography facilities; regulations and standards for accreditation bodies for mammography facilities; and standards for mammography equipment,
personnel, and practices, including quality assurance. MQSRA extended the life of the MQSA program for 4 years from its original expiration date of 1998 until 2002, and also modified some of the provisions. The most significant modification from a report and recordkeeping viewpoint under §900.12(c)(2) was that mammography facilities were required to send a lay summary of each examination to the patient.

FDA, under this regulation, collects information from accreditation bodies and mammography facilities by requiring each accreditation body to submit an application for approval and to establish a quality assurance program. On the basis of accreditation, facilities are certified by FDA and must prominently display their certificate. FDA uses the information to ensure that private, nonprofit organizations or State agencies meet the standards established by FDA for accreditation bodies to accredit facilities that provide mammography services. Information collected from mammography facilities has also been used to ensure that the personnel, equipment, and quality systems has and continues to meet the regulations under MQSA and will be used by patients to manage their health care properly. The intent of these regulations is to assure safe, reliable, and accurate mammography on a nationwide level. The most likely respondents to this information collection will be accreditation bodies and mammography facilities seeking certification.

FDA estimates the burden of this collection of information as follows:

Table 1.-Estimated Annual Recording Burden ${ }^{1}$

| 21 CFR Section | Number of Respondents | Annual Frequency per Response | Total Annual Responses | Hours per Response | Total Hours | Total Capital Costs | Total Operating and Maintenance Costs |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 900.3 | 1 . | 0.33 | 0.33 | 60 | 20 |  |  |
| $900.3(\mathrm{~b})(3)$ | 1 | 0.33 | 0.33 | 60 | 20 | \$50 |  |

| 900.18(e) | 10 | 0.0100 | 0.1 | 1 | 0.1 |  | \$10 |
| FDA Form 3422 | 800 | 1 | 800 | . 25 | 200 |  |  |
| TOTAL |  |  |  |  | 3,095,716 | \$50 | \$1,040 |

Table 2.-Estimated Annual Recordkeeping Burden ${ }^{1}$

| 21 CFR Sec- <br> tion | Number of <br> Recordkeepers | Annual Frequency of <br> Recordkeeping | Total Annual <br> Records | Hours per <br> Recordkeeper | Total Hours <br> Maing and <br> Costs |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| $900.3(\mathrm{f})(1)$ | 5 | 0.02 | 0.1 | 200 | 20 |  |
| $900.4(\mathrm{~g})$ | 1 | 0.33 | 0.33 | 1 | 0.33 |  |
| $900.12(\mathrm{c})(4)$ | 9,200 | 1 | 9,200 | 1 | 9,200 |  |
| $900.12(\mathrm{e})(13)$ | 9,200 | 52 | 478,400 | 0.125 | 59,800 |  |
| $900.12(\mathrm{f})$ | 9,200 | 1 | 9,200 | 5 | 46,000 |  |
| $900.12(\mathrm{~h})$ | 9,200 |  | 18,400 | 0.5 | 9,200 |  |
| TOTAL |  |  |  | 124,220 | $\$ 18,400$ |  |

The most likely respondents to this information collection will be accreditation bodies and mammography facilities seeking certification.
The total capital cost associated with these regulations is $\$ 50(\$ 900.3(\mathrm{~b})(3)$ ). This is a one-time start up cost associated with the application for approval as an accreditation body.
The total operating and maintenance cost associated with these requirements is: $\$ 19,440$. This is the cost that facilities bear to maintain records under the initial and final mammography regulations.

Dated: November 3, 2003. Jeffrey Shuren,
Assistant Commissioner for Policy.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

## Food and Drug Administration

[Docket No. 1999N-1168]
Relative Risk to Public Health From Foodborne Listeria Monocytogenes Among Selected Categories of Ready-to-Eat Foods; Quantitative Risk Assessment and Risk Management Action Plan; Notice of Public Meeting
agency: Food and Drug Administration, HHS.
ACTION: Notice of meeting.
summary: The Food and Drug
Administration (FDA) of the Department of Health and Human Services (HHS) is announcing a public meeting to present the "Quantitative Assessment of the Relative Risk to Public Health from Foodborne Listeria monocytogenes Among Selected Categories of Ready-toEat Foods" and to present information relative to the risk management action plan that has been updated in light of the results of the risk assessment. The risk assessment was conducted by FDA in cooperation with the Food Safety and Inspection Service (FSIS) of the U.S. Department of Agriculture and in consultation with the Centers for Disease Control and Prevention (CDC) of HHS. The notice of availability of the risk assessment was published in the Federal Register on October 24, 2003 ( 68 FR 61006). This public meeting is intended to provide clarification about the results of the risk assessment and information as to how the risk assessment may be utilized. Stakeholders will have an opportunity to ask questions about the risk assessment and the risk management action plan. Questions may also be submitted in advance of the public meeting (see the Contact section of this document).

Date and Time: The meeting will be held on December 4, 2003, from at 8:30 a.m. to 5 p.m. Registration and requests for formal oral presentations by December 2, 2003.

Location: The meeting will be held at the FDA/CFSAN Harvey W. Wiley Building, 1500 Paint Branch Pkwy., College Park, MD 20740-3835.

Contact: Lori Pisciotta, Center for Food Safety and Applied Nutrition (CFSAN) (HFS-006), Food and Drug Administration, 5100 Paint Branch Pkwy., College Park, MD, 301-4362279, FAX: 301-436-2630, e-mail: Ipisciot@cfsan.fda.gov.

Registration and Requests for Oral Presentation: Send registration information (including name, title, firm name, address, telephone and fax number), to the contact person by December 2, 2003. Interested persons inay present data, information, or views orally or in writing, on the issue. If you desire to make a formal oral presentation, you should notify the contact person before December 2, 2003 , and be prepared to give a brief description of the general nature of the information you wish to present. Tine allotted for each presentation may be limited. Written submissions must also be made to the contact person by December 2, 2003.
If you need special accommodations due to a disability, please contact Ms.

Pisciotta (see the Contact section) at least 7 days in advance of the meeting. Transcripts: Transcripts of the meeting may be requested in writing from the Freedom of Information Office (HFI-35), Food and Drug
Administration, 5600 Fishers Lane, rm. 12A-16, Rockville, MD 20857, approximately 15 working days after the meeting at a cost of 10 cents per page. SUPPLEMENTARY INFORMATION: FDA is announcing a public meeting on December 4, 2003, to present the "Quantitative Assessment of the Relative Risk to Public Health from Foodborne Listeria monocytogenes Among Selected Categories of Ready-toEat Foods" and the risk management action plan that has been updated in light of the risk assessment. In the Federal Register of January 19, 2001 (66 FR 5515), FDA and FSIS announced the availability of a draft Listeria monocytogenes risk assessment and a draft risk management plan based on the risk assessment. FDA, FSIS, and CDC held a public meeting on March 19, 2001, to receive comments on the technical aspects of the draft risk assessment on the relationship between foodborne L. monocytogenes and human health. Interested persons were given until March 20, 2001, with extensions to May 21, 2001, and to July 18, 2001, to comment on these documents. The risk assessment has been revised in response to public comments, newly available data, and updated modeling techniques, and was made available to the public in the Federal Register of October 24, 2003 ( 68 FR 61006). Comparable revisions also have been made to the draft risk management action plan.

Dated: October 31, 2003.

## Food and Drug Administration

[Docket No. 2003D-0493]
Draft Guidance for Industry on Powder Blends and Finished Dosage UnitsStratified In-Process Dosage Unit Sampling and Assessment; Availability
agency: Food and Drug Administration, HHS.
ACTION: Notice.
summary: The Food and Drug
Administration (FDA) is announcing the availability of a draft guidance for
industry entitled "Powder Blends and Finished Dosage Units-Stratified InProcess Dosage Unit Sampling and Assessment." The draft guidance is intended to provide recommendations to manufacturers of human drug products on how to develop a single control procedure to demonstrate the adequacy of mix to ensure uniformity and homogeneity of in-process powder blends and finished dosage units.
DATES: Submit written or electronic comments on the draft guidance by March 8, 2004. General comments on agency draft guidance documents are welcome at any time.
ADDRESSES: Submit written requests for single copies of the draft guidance to the Division of Drug Information (HFD240), Center for Drug Evaluation and Research, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857. Send one selfaddressed adhesive label to assist that office in processing your requests. Submit written comments on the draft guidance to the Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. Submit electronic comments to http:// www.fda.gov/dockets/ecomments. See the SUPPLEMENTARY INFORMATION section for electronic access to the draft guidance document.
FOR FURTHER INFORMATION CONTACT: Jon Clark, Center for Drug Evaluation and Research (HFD-003), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-5103. SUPPLEMENTARY INFORMATION:

## I. Background

FDA is announcing the availability of a draft guidance for industry entitled "Powder Blends and Finished Dosage Units-Stratified In-Process Dosage Unit Sampling and Assessment." The draft guidance is intended to respond to industry concerns regarding FDA policies on demonstrating the adequacy of in-process powder mixing and uniform content in finished products under 21 CFR 211.110(a)(3).
In the Federal Register of August 27, 1999 (64 FR 46917), FDA published notice of the availability of a draft guidance for industry on blend uniformity analysis. Although FDA subsequently withdrew the draft guidance on May 17, 2002 ( 67 FR 35120), comments submitted on the draft guidance led to the formation of the Blend Uniformity Working Group (BUWG). The BUWG, which includes representatives from the agency, industry, and academia, conducted a public meeting on September 7 and 8 ,

2000, and developed a draft recommendation, "The Use of Stratified Sampling of Blend and Dosage Units to Demonstrate Adequacy of Mix for Powder Blends," which included the consensus reached by participants in this workshop. The PDA Journal of Pharmaceutical Science and Technology published the recommendation (March/April 2003, pp. 59-74). This draft guidance reflects CDER's effort to incorporate the recommendation into regulatory policy.
Stratified sampling is the selection of in-process dosage unit samples to specifically target locations in the compression/filling operation that have the greatest potential to yield extreme highs and lows in test results. The test results are used to monitor the manufacturing process output that is most responsible for causing finished product variability. These test results can be used to develop a single control procedure to ensure adequate powder mix and uniform content in finished products.
This draft guidance is being issued consistent with FDAs good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the agency's current thinking on "Powder Blends and Finished Dosage Units-Stratified In-Process Dosage Unit Sampling and Assessment." It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statutes and regulations.

## II. Comments

Interested persons may submit to the Division of Dockets Management (see ADDRESSES) written or electronic comments on the draft guidance. Two copies of mailed comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. The draft guidance and received comments are available for public examination in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

## III. Electronic Access

Persons with access to the Internet may obtain the document at either http:/ /www.fda.gov/cder/guidance/index.htm or http://www.fda.gov/ohrms/dockets/ default.htm.

Dated: October 31, 2003.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

## Food and Drug Administration

[Docket No. 2003D-0204]
Guidance for Industry: Institutional Review Board Review of Stand-Alone Health Insurance Portability and Accountability Act Authorizations; Availability
agency: Food and Drug Administration, HHS.

## ACTION: Notice.

summary: The Food and Drug
Administration (FDA) is announcing the availability of a document entitled
"Guidance for Industry: IRB Review of Stand-Alone HIPAA Authorizations Under FDA Regulations," dated October 21,2003. The guidance document provides clarification for institutional review boards (IRBs) of their responsibilities for reviewing and approving stand-alone authorizations under the Health Insurance Portability and Accountability Act of 1996 (HIPAA) Privacy Rule. A stand-alone HIPAA authorization is a document used to obtain permission from an individual for a covered entity to use and/or disclose the individual's identifiable health information for a research study and that is not combined with an informed consent document to participate in the research itself. This guidance is intended to encourage IRBs to permit enrollment of subjects in clinical investigations without the IRB's prior review and/or approval of standalone HIPAA authorizations, even under circumstances in which the IRB's written procedures require such review and/or approval. Because FDA has determined that prior public participation is not feasible or appropriate, this guidance document will be implemented upon posting on FDA's Web site.
DATES: Submit written or electronic comments on agency guidances at any time.
ADDRESSES: Submit written comments on the guidance document to the Division of Dockets Management (HFA305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852.

Submit electronic comments to http:/ /www.fda.gov/dockets/ecomments. See
the SUPPLEMENTARY INFORMATION section for electronic access to the guidance document.
Submit requests for the guidance document to the Division of Dockets Management at the address provided. Your request should include the docket number in the heading of this document.

FOR FURTHER INFORMATION CONTACT:
Catherine Lorraine, Office of the Commissioner (HF-11), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-827-3360. SUPPLEMENTARY INFORMATION:

## I. Background

FDA is announcing the availability of a document entitled "Guidance for Industry: IRB Review of Stand-Alone HIPAA Authorizations Under FDA Regulations," dated October 21, 2003. This guidance is similar to a guidance published by the Office of Civil Rights, Department of Health and Human Services (HHS), entitled "Privacy Guidance about Authorizations for Research and Institutional Review Boards," which is available on the HHS Web site at http://www.hhs.gov/ocr/ hipaa. (FDA has verified the Web site address, but is not responsible for subsequent changes to the Web site after this document publishes in the Federal Register.) The Privacy Rule is a Federal regulation implementing certain provisions of the HIPAA (Public Law 104-191), that protects the privacy of certain health information (see 45 CFR parts 160 and 164). The Privacy Rule is a comprehensive set of minimum requirements intended to safeguard individually identifiable health information while permitting important research and health care activities to continue. The Privacy Rule went into effect on April 14, 2003.

The Privacy Rule establishes the right of individuals, including research subjects, to authorize the use and disclosure of their protected health information by signing an authorization form for uses and disclosures not otherwise permitted by the Privacy Rule (see 45 CFR 164.508). For example, in the context of a clinical investigation, a valid and properly executed HIPAA authorization explains the ways in which a subject's protected health information will be used and disclosed by the clinical investigator and permits the clinical investigator to use and disclose that information as specifically described in the authorization. An HIPAA authorization is different than a subject's informed consent in that an HIPAA authorization focuses on uses and disclosures of information that may
be made. Informed consent, on the other hand, apprises potential research subjects of the possible risks and benefits associated with participating in the clinical investigation and, when executed, indicates their willingness to participate in the clinical investigation and their understanding of those risks and benefits. The Privacy Rule permits but does not require clinical investigators to combine an HIPAA authorization with informed consent documents, known as a compound authorization (see 45 CFR 164.508(b)(3)).

FDA and the HHS Secretary received requests for clarification of IRBs' responsibilities to review and approve stand-alone HIPAA authorizations under the Privacy Rule, Federal regulations governing human subject protection and IRBs (see 45 CFR part 46 and parts 50 and 56 (21 CFR parts 50 and 56)), and international guidelines (see, for example, International Conference on Harmonisation (ICH) Good Clinical Practice guidelines (E6)). The requests expressed concern that when the Privacy Rule went into effect, clinical investigations might be impeded because IRBs would be backlogged with requests to review thousands of stand-alone HIPAA authorizations. The requests further stated that some IRBs would halt enrollment in clinical investigations pending their review of these standalone HIPAA authorizations.

In response, the Office of Civil Rights, HHS, issued a letter, dated April 15, 2003, clarifying that IRBs are not required to review and approve standalone HIPAA authorizations under the Privacy Rule, HHS Protection of Human Subjects Regulations at 45 CFR part 46, ICH guidelines, or FDA regulations, so long as an IRB's written procedures, adopted under $\S 56.108(\mathrm{a})$, do not require such review and approval. The letter also announced FDA's intent to publish guidance on this subject, in accordance with its good guidance practice regulations.

FDA is issuing this guidance to address those cases in which IRBs have adopted written procedures that would require them to review and approve stand-alone HIPAA authorizations. Under $\S 56.108(\mathrm{a})$, IRBs niust follow their written procedures. The guidance announces FDA's intention to exercise ongoing enforcement discretion with respect to the requirements of $\S 56.108(\mathrm{a})$ to the extent that an IRB's written procedures require the review and/or approval of stand-alone HIPAA authorizations. FDA is exercising this discretion in order to encourage IRBs to permit the continued enrollment of
subjects in clinical investigations without IRBs' prior review and approval of stand-alone HIPAA authorizations. FDA believes that enrollment in welldesigned and well-conducted clinical investigations should not be interrupted for the purpose of IRB review and approval of stand-alone HIPAA authorizations. Accordingly, FDA does not intend to take enforcement actions against IRBs that decide not to review stand-alone HIPAA authorizations even though the IRB's written procedures would otherwise require this review and/or approval. FDA's exercise of enforcement discretion in these limited circumstances is intended to allow important studies to proceed in the best interests of the public health.

This guidance is being issued consistent with FDA's good guidance practices regulation $\$ 10.115$ ( 21 CFR 10.115). This guidance document represents the agency's current thinking on IRBs' responsibilities under FDA regulations for reviewing and approving stand-alone HIPAA authorizations. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if it satisfies the requirements of the applicable statutes and regulations.

## II. Comments

FDA is issuing this document as a final guidance that will be implemented upon posting on FDA's Web site. In accordance with $\S 10.115(\mathrm{~g})(2)$ and (g)(3), FDA is implementing this guidance prior to seeking public comment because the agency has determined that this guidance is needed in conjunction with the HHS Office of Civil Rights guidance to help ensure that ongoing clinical trials are not halted while IRBs review HIPAA stand-alone authorizations, and therefore, prior public participation is not feasible or appropriate. However, FDA will review comments received after issuance of the guidance and revise the document when appropriate.

Interested persons may, at any time, submit written or electronic comments to the Division of Dockets Management (see ADDRESSES) regarding this guidance document. Two paper copies of mailed comments are to be submitted, except individuals may submit one copy. Comments should be identified with the docket number found in the brackets in the heading of this document. A copy of the document and received comments are available for public examination in the Division of Dockets Management between $9 \mathrm{a} . \mathrm{m}$. and 4 p.m., Monday through Friday.

## III. Electronic Access

Persons with access to the Internet may obtain the document at either http:/ /www.fdc.gov/oc/gcp/guidance.html or http://wwwv.fda.gov/ohrms/dockets/ default.htm.

Dated: October 31, 2003.

## Government-Owned Inventions; Availability for Licensing

AGERCY: National Institutes of Health, Public Health Service, DHHS. Action: Notice.

SUMMARY: The invention listed below is owned by an agency of the U.S. Government and is available for licensing in the U.S. in accordance with 35 U.S.C. 207 to achieve expeditious commercialization of results of federally-funded research and development. Foreign patent applications are filed on selected inventions to extend market coverage for companies and may also be available for licensing.
ADDRESSES: Licensing information and copies of the U.S. patent application listed below may be obtained by writing to the indicated licensing contact at the Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, Maryland 20852-3804; telephone: 301/ 496-7057; fax: 301/402-0220. A signed Confidential Disclosure Agreement will be required to receive copies of the patent application.
Eosinophil-Derived Neurotoxin, an Antimicrobial Protein With Ribonuclease Activity, Is an Immunostimulant
De Yang et al. (NCI).
U.S. Provisional Patent Application Nos. 60/466,797 and 60/466,796, filed 29 Apr 2003 (DHHS Reference Nos. E-175-2003/0-US-01 and E-191-2003/0-US-01).
Licensing Contact: Brenda Hefti; 301/ 435-4632; heftib@mail.nih.gov. Eosinophil-derived neurotoxin (EDN) has in vitro anti-viral activity that is dependent on its ribonuclease activity. This invention discloses that EDN is a selective chemoattractant and activator of dendritic cells, resulting in dendritic
cell migration, maturation, and a production of a wide variety of cytokines. Based on these potent chemotactic and activating effects on dendritic cells. EDN might be useful as a clinical immunoadjuvant for the promotion of immune responses to specific antigens of tumors or pathogenic organisms.

## Protein Kinase C Inhibitor, Related

 Composition, and Method of Use Shaomeng Wang, Peter Blumberg (NCI), Nancy Lewin (NCI).U.S. Provisional Patent Application No. 60/451,214 filed 28 Feb 2003 (DHHS Reference No. E-073-2003/0-US-01).
Licensing Contact: Brenda Hefti; 301/ 435-4632; heftib@mail.nih.gov. Protein kinase C is a critical component in cellular signaling, involved in cellular growth, differentiation, and apoptosis. It has been identified as a pronvising therapeutic target for cancer, diabetic retinopathy. and Alzheimer's disease, among other indications.

This invention relates to lead compounds that can inhibit protein kinase C isoforms through disruption of their C1 domains. The inventors also found that these compounds possess isoform selectivity, an important feature for therapeutic specificity. Finally, although the disclosed compounds are previously known molecules, novel structures are described in the invention that have further improved specificity.

## Applications for the HMGN1 Pathway

Michael Bustin (NCI).
U.S. Provisional Patent Application No.

60/455,728 filed 17 Mar 2003 (DHHS
Reference No. E-208-2002/0-US-01).
Licensing Contact: Brenda Hefti; 301/
435-4632; heftib@mail.nih.gov.
HMGN1 is a protein that binds to nucleosomes, changes chromatin structure and affects transcription, and the expression of this protein changes during differentiation. Mice lacking this protein have increased growth capacity of several skin components, including epidermis, epidermal appendages, and dermis. Conceivably, this change could be related to an alteration of stem cell differentiation or to cell cycling events. The current invention relates to interference with this pathway, which might lead to increased stem cell differentiation and increased hair cycling and growth in humans as well. This invention might be useful to increase hair growth, enhance wound healing for epidermal and dermal wounds, and enhance stem cell populations for tissue regeneration, gene targeting, or gene therapeutic indications.

## Novel Stable Anti-CD22 Antibodies

Susanna Rybak, Juergen Krauss, Michaela Arndt (NCI).
U.S. Provisional Application No. 60/ 387,306 filed 06 Jun 2002 (DHHS Reference No. E-055-2002/0-US-01); PCT Patent Application PCT/US03/ 18201 filed 06 Jun 2003 (DHHS Reference No. E-055-2002/0-PCT02).

Licensing Contact: Brenda Hefti; 301/ 435-4632; heftib@mail.nih.gov. The current invention relates to engineered LL2 single chain antibodies possessing improved and/or unexpected properties. The first embodiment includes engineered single chain antibodies that have enhanced stability. Specific VH and VL residues were identified which might contribute to the instability, and these were substituted to create scFv variants with improved stability and biological half-life. In the second embodiment, an LL2 single chain Fv antibody was engineered with no linker between the VH and VL sequences. The antibody exhibited the surprising property of acting as a monomer (rather than a trimer or tetramer) and retained specific binding to CD22. This invention might be useful as a general method to produce therapeutic antibodies or immunoconjugates more easily, and for such antibodies or immunoconjugates to be more stable in vivo.

## Dated: October 30, 2003.

Steven M. Ferguson,
Director, Division of Technology Development and Transfer, Office of Technology Transfer, National Institutes of Health.

Isolation of Hybridomas Producing Monoclonal Antibodies (MAbs) Inhibitory to Human CYP2J2
Dr. Darryl Zeldin (NIEHS), Dr. Harry Gelboin (NCI), et al.
DHHS Reference No. E-337-2003/0Research Tool.
Licensing Contact: Marlene Shinn-Astor; 301/435-4426; shinnm@mail.nih.gov.
Cytochromes P450 catalyze the
NADPH-dependent oxidation of arachidonic acid to various eicosanoids found in several species. The eicosanoids are biosynthesized in numerous tissues including pancreas, intestine, kidney, heart, and lung where they are involved in many different biological activities.
The NIH announces three specific monoclonal antibodies that strongly inhibit and/or immunoblot the human cytochrome P450 2J2 (CYP2J2). MAb 6-5-20-8 selectively inhibits CYP2J2mediated arachidonic acid metabolism by more than $80 \%$ and also immunoblots the enzyme. MAb 6-2-161 also selectively inhibits arachidonic acid metabolism by more than $80 \%$, but does not immunoblot the enzyme. MAb $5-3-2-2$ is not inhibitory, but selectively inmunoblots the enzyme. These antibodies can be used to identify and quantify inter-individual variation in physiological functions and to study pharmacological drug metabolism in various tissues.

This research is also described in: Sun et al., Circ. Res. 90: 1020-1027, 2002; King et al., Mol. Pharmacol. 61: 840852, 2002; Yang et al., Mol. Pharmacol. 60: 310-320, 2001; Zeldin, J. Biol. ## TNF- $\alpha$ Converting Enzyme Inhibitory Agents and Stimulatory Agents

Dr. Stewart Levine et al. (NHLBI).
U.S. Provisional Patent Application filed 24 Sep 2003 (DHHS Reference No. E-208-2003/0-US-01).
Licensing Contact: Marlene Shinn-Astor; 301/435-4426; shinnm@mail.nih.gov.

The action of Tumor Necrosis Factor alpha (TNF- $\alpha$ ) has been implicated in such diseases as arthritis, sepsis, ulcerative colitis, multiple sclerosis, Crohn's disease, septic shock, graft rejection, cachexia, insulin resistance, post-ischemic reperfusion injury, tumor metastasis, tissue ulceration, abnormal wound healing, periodontal disease, bone disease, proteinuria, aneurismal aortic disease, degenerative cartilage loss, demyelinating diseases of the nervous system, and HIV infection. TNF- $\alpha$ converting enzyme (TACE) or ADAM 17 (A Disintegrin And Metalloprotease) is a member of a family of zinc metalloproteases, and is an important regulator of inflammation, immune regulation, and cellular proliferation as a consequence of its ability to catalyze the activation of TNF$\alpha$ from a membrane bound to a soluble form.
The NIH announces the identification of a protein, corresponding to the amino-terminus of the TACE prodomain, that possesses a TACE inhibitory activity that is independent of a cysteine-switch mechanism. This TACE inhibitory protein could be used as a new therapeutic agent against chronic inflammatory diseases that are mediated by TNF- $\alpha$.

## Use of Smad3 Inhibitor in the

Treatment of Fibrosis Dependent on Epithelial to Mesenchymal Transition as in the Eye and Kidney
Anita Roberts (NCI).
U.S. Provisional Patent Application No. 60/441,297 filed 17 Jan 2003 (DHHS Reference No. E-062-2003/0-US-01).
Licensing Contact: Marlene Shinn-Astor; 301/435-4426; shinnm@od.nih.gov.
Fibroid scar tissue has been associated with wound healing of the epithelial layer following tissue damage created by surgery or other means.
Examples of which include the opaque scar tissue associated with cataract surgery and the fibroid scar tissue produced in several kidney diseases such as is seen in unilateral ureteral obstruction.

Smad2 and Smad3 are highly homologous cytoplasmic proteins which function to mediate signals from Transforming Growth Factor Beta (TGF$\beta$ ) and activin receptors to promoters of target genes found in the nucleus. The NIH announces a technology wherein Smad 3 is now implicated in TGF- $\beta$ dependent transdifferentiation of epithelial cells to mesenchymal cells (EMT), which blocks the endpoint of fibrosis at an early stage of differentiation of epithelial cell precursors into interstitial fibroblasts. In particular, fibrosis was blocked
following wounding of the lens of the eye and damage created to the kidney. It is believed that an inhibitor of Smad 3 could be used to block fibrosis following cataract surgery and lens implantation in patients, as well as slowing the progression of end-stage renal disease.

Cytotoxic Indeno- and Isoindenoisoquinoline Compounds
Yves G. Pommier (NCI).
U.S. Provisional Patent Application No. 60/469, 718 filed 12 May 2003 (DHHS Reference No. E-253-2003/0-US-01). Licensing Contact: George Pipia; 301/ 435-5560; pipiag@mail.nih.gov.
The present invention is directed to novel indeno- and isoindenoisoquinoline compounds, their derivatives and their pharmaceutical formulations having anticancer activity, as well as methods of treating cancer. The invention is also
directed to methods of preparing these novel compounds. These compounds have been tested against 55 tumor cell lines and have been found to have a strong activity against a wide variety of tumor cell lines, including lung, colon, central nervous system, melanoma, ovarian, renal, prostate and breast cancers, compared with 2-methoxy estradiols. Some of these compounds target topoisomerase I and remain active in camptothecin-resistant cancer cells. It is expected that these compounds will be very useful in the treatment of a wide variety of cancers.

## Identification of Novel Birt-Hogg-Dubé (BHD) Gene

Laura S. Schmidt (NCI).
PCT Application No. PCT/US03/17227 filed 30 May 2003 (DHHS Reference No. E-190-2002/2-PCT-01).
Licensing Contact: George Pipia; 301/ 435-5560; pipiag@mail.nih.gov. Birt-Hogg-Dubé (BHD) syndrome is an inherited autosomal dominant neoplasia syndrome characterized by benign hair follicle tumors and is associated with a higher risk for developing renal cancer, spontaneous pneumothorax and/or lung cysts.
The present invention describes identification of the BHD syndrome associated germline mutations in a novel human gene, herein called BHD gene. This gene encodes for the protein, folliculin, functions of which remain currently unknown.

This discovery makes possible the development of a diagnostic method for BHD syndrome using a simple blood test. The test is particularly useful in detecting BHD mutations in asymptomatic carriers within BHD families.
Patients with kidney tumors can be evaluated for BHD gene mutations using a similar genetic diagnostic test, which will allow for a more accurate diagnosis of a kidney cancer and improved patient prognosis. The BHD encoding sequence is the third gene found to be responsible for inherited kidney cancer, and mutation testing allows for a correct diagnosis and initiation of the proper treatment, which is different for each of the types of kidney cancer caused by the three genes.

Methods of using BHD encoding sequence also allows for a differential genetic diagnosis of spontaneous pneumothorax, or collapsed lung. Since collapsed lung can be caused by several factors, a BHD diagnostic test allows a physician to determine predisposition to and possible recurrence of additional spontaneous pneumothoraces due to mutation(s) in the BHD gene.

The discovery should also lead to the development of novel pharmaceutical products and methods for treating BHD skin lesions using creams containing the BHD gene product, folliculin. Such products and methods of treatment are expected to reduce the size and appearance of the benign hair follicle tumors.
The disclosed technology will provide new and exciting methodologies to correctly diagnose BHD syndrome and should lead to the development of novel pharmaceutical reagents for treatment of BHD skin lesions as well as other skin diseases.

B-Defensins as Activators of Dendritic Cells and Vaccine Carrier
Arya Biragyn and Larry Kwak (NCI).
U.S. Provisional Application No. 60/ 421,488 filed 25 Oct 2002 (DHHS Reference No. E-342-2002/0-US-01).
Licensing Contact: Catherine Joyce; 301/ 435-5031; e-mail: joycec@mail.nih.gov.
Tumor antigens are known to be poorly immunogenic and attempts to elicit immune responses against the epitopes of antigens specific to tumor cells have been largely unsuccessful. The inventors have developed a cancer vaccine comprising a defensin fused to a tumor antigen or viral antigen to enhance the immunogenicity of the . tumor antigen or viral antigen. The inventors have demonstrated, with animal data, that chimeric proteins comprising a defensin fused to a model tumor autigen (lymphoma-derived single-chain Fv) generate a measurable humoral and anti-tumor cellular immune response when administered to a subject. (Biragyn et al., Mediators of innate immunity that target immature, but not mature, dendritic cells induce antitumor immunity when genetically fused with nonimmunogenic tumor antigens, J. Immunology 2001 Dec 1, 167(11):6644-6653. Also, Biragyn et al., DNA vaccines encoding human immunodeficiency virus-1 glycoprotein 120 fusions with proinflammatory chemoattractants induce systemic and mucosal immune responses, Blood 2002 Aug 15 100(4):1153-1159.)

Recently the inventors have further discovered that murine beta-defensin 2 acts directly on immature dendritic cells as an endogenous ligand for Toll-like receptor 4 (TLR-4), inducing upregulation of costimulatory molecules and dendritic cell maturation. (Biragyn et al., Toll-like receptor 4 -dependent activation of dendritic cells by betadefensin 2, Science 2002 Nov 1, 298(5595):1025-1029).

The above-mentioned invention is available for licensing on an exclusive or a non-exclusive basis.

Dated: October 24, 2003.
Steven M. Ferguson,
Director, Division of Technology Development and Transfer, Office of Technology Transfer, National Institutes of Health.

## Putative PEDF Receptor

Sofia P. Becerra, Luigi Notari (NEI).
DHHS Reference No. E-314-2003/0-
US-01 filed 07 Aug 2003.
Licensing Contact: Susan S. Rucker; 301/435-4478;
ruckersu@mail.nih.gov.
This application describes compositions and methods related to Pigmented Epithelium Derived Factor (PEDF). PEDF is a protein, belonging to the serpin family, that has been demonstrated to have neurotrophic, gliastatic, neuronotrophic and antiangiogenic properties. In particular, the compositions and methods described and claimed in this application are related to the isolation, cloning, expression and characterization of the putative receptor for PEDF. The PEDF receptor as described herein is a transmembrane protein having an extracellular ligand-biuding domain, a transmembrane domain and an intracellular domain. The PEDF receptor shares some homology with an orphan receptor identified in the liver and the protein known as adiponutrin.

The isolation and cloning of the PEDF receptor will be useful in basic research to further elucidate the role of PEDF and its receptor in signal transduction
pathways. Furthermore, identification of the PEDF receptor will allow for the development of drug screening assays to identify agonists and antagonists of PEDF activity. In addition, isolation and identification of the PEDF receptor will allow new biological molecules such as monoclonal antibodies and chimeric IgG-receptor constructs to be developed.

This work has not yet been published.
Detection of Antigen-Specific T Cells and Novel T Cell Epitopes by
Acquisition of Peptide/HLA-GFP Complexes
Steven Jacobson, Utano Tomaru, and Yoshihisa Yamano (NINDS).
U.S. Provisional Application No. 60/ 457,006 filed 24 Mar 2003 (DHHS Reference No. E-084-2003/0-US-01). Licensing Contact: Brenda Hefti; 301/ 435-4632; heftib@mail.nih.gov.
This invention relates to a method for identifying specific $T$ cell epitopes and antigen-specific T cells through labeling with an HLA-GFP complex expressed on an antigen-presenting cell. The T cells acquired the peptide-HLA-GFP complex through T cell mediated endocytosis upon specific antigen stimulation. This basic method can be used for several purposes. First, it can be used to generate a T-cell immune response through the attachment of a reporter peptide to the antigenpresenting cell. It can also be used as a way to assay a population of cells to determine whether any T cells specific for a particular antigen are present. This might be useful in applications related to autoimmunity, infectious disease, or cancer. Third, it can be used as a therapeutic to eliminate antigen-specific T cells associated with disease, if coupled to a toxic moiety.
Methods and Composition for the Diagnosis of Neuroendocrine Lung Cancer
Curtis Harris (NCI).
U.S. Provisional Application No. 60/ 423,380 filed 04 Nov 2002 (DHHS Reference No. E-248-2002/0-US-01).
Licensing Contact: Catherine Joyce; 301/ 435-5031, joycec@mail.nih.gov.
The technology relates to the use of cDNA microarrays to facilitate the identification of pulmonary neuroendocrine tumors. In order to identify molecular markers that could be used to classify pulmonary tumors, the inventors examined the gene expression profiles of clinical samples from patients with small cell lung cancer (SCLC), large cell neuroendocrine carcinoma (LCNEC), and typical carcinoma (TC) tumors by cDNA microarray analysis to detect
hybridization between CDNA from tumor cells and DNA from a panel of 8,897 human genes. Gene expression was found to be nonrandom and to exhibit highly significant clustering that divided the tumors into their assigned World Health Organization (WHO) classification with $100 \%$ accuracy. The inventors concluded that pulmonary neuroendocrine tumors could be classified based on the genome-wide expression profile of the clinical samples without further manipulations.

The above-mentioned invention is available for licensing on an exclusive or non-exclusive basis.

## Enhanced HIV-1 Vaccine Cytotoxic T <br> Cell Epitope From Conserved Region of HIV-1 Reverse Transcriptase

Jay Berzofsky, Takahiro Okazaki (NCI). U.S. Provisional Application No. 60/ 459,507 filed 31 Mar 2003 (DHHS Reference No. E-044-2003/0-US-01).

Licensing Contact: Michael Ambrose; 301/594-6565; ambrosem@mail.nih.gov.
Polypeptides derived from the HIV-1 RT Catalytic site. Peptides are modified by replacement of certain key amino acid residues to increase binding to HLA-A2, the most common human class I HLA molecule. Such modified peptides are more immunogenic and can be used for further development of second-generation vaccines,
therapeutics or diagnostic reagents. DNA encoding said modified polypeptides can be used as vaccines (naked DNA, bacterial or viral vector constructs).
Methods and Compositions for Selectively Enriching Microbes
Michael A. Grant (FDA/ORA).
U.S. Provisional Application No. 60/ 435,639 filed 20 Dec 2002 (DHHS Reference No. E-228-2002/0-US-01).
Licensing Contact: Michael Ambrose; 301/594-6565;
ambrosem@mail.nih.gov.
The described technology provides for the methods, reagents and kits for the specific enrichment of microbes for further identification and diagnosis with particular emphasis on E. coli O157:H7 and other $E$. coli.

The technology details a 2 -step process in which the primary sample is held under acid conditions to inhibit or kill competitor microbes within the sample. The acidic conditions can also contain selective agents such as phage or nutrient supplements for further selectivity. After a predetermined time, the sample is then incubated under unrestricted growth conditions for the enrichment of the remaining microbes. These are then carried through for further identification and potential diagnosis.
The technology can be used to selectively enrich for potential medically important bacteria, especially E. coli $\mathrm{O} 157: \mathrm{H} 7$, other pathogenic $E$. coli, Shigella, and other species.

summary: The invention listed below is owned by an agency of the U.S. Government and is available for licensing in the U.S. in accordance with 35 U.S.C. 207 to achieve expeditious commercialization of results of federally-funded research and development. Foreign patent applications are filed on selected inventions to extend market coverage for companies and may also be available for licensing.
ADDRESSES: Licensing information and copies of the U.S. patents and patent applications listed below may be obtained by contacting Michael Ambrose, Ph.D., at the Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, Maryland 208523804; telephone: 301/594-6565; fax: 301/402-0220; e-mail: ambrosem@mail.nih.gov. A signed Confidential Disclosure Agreement will be required to receive copies of any patent applications.
Efficient Inhibition of HIV-1 Viral Entry Through a Novel Fusion Protein Including CD4
James Arthos, Claudia Cicala, Anthony Fauci (NIAID).
U.S. Provisional Application No. 60/ 346,231 filed 25 Oct 2001 (DHHS Reference No. E-337-2001/0-US-01); PCT Application No. PCT/US02/ 34393 filed 24 Oct 2002 (DHHS Reference No. E-337-2001/0-PCT01).

This invention relates to CD4 fusion proteins for use in the treatment of an immunodeficiency virus infection such as human immunodeficiency virus (HIV). These polypeptides have been shown by the inventors to inhibit the entry of primary isolates of HIV-1 into CD4+ T cells by targeting the gp120 subunit of the HIV-1 envelope. The invention claims recombinant polypeptides comprising a CD 4 polypeptide ligated at its C-terminus with a portion of a human immunoglobulin comprising a hinge region and two constant domains of an immunoglobulin heavy chain. The portion of the IgG is fused at its Cterminus with a polypeptide comprising
a tailpiece from the C terminus of the heavy chain of an $\operatorname{Ig} A$ antibody. This protein is very large (greater than 800 kilodaltons), which may contribute to its ability to inhibit entry of primary isolates of HIV-1 into T cells. It presents twelve gp120 binding domains (D1D2) and can bind at least ten gp120s simultaneously. The inventors have shown that the construct efficiently neutralizes primary isolates from different HIV subgroups. Also claimed are use of the construct as a component of a vaccine and as a diagnostic.

Identification of New Small RNAs and ORFs

Susan Gottesman (NCI), Gisela Storz (NICHD), Karen Wassarman (NICHD), Francis Repoila (NCI), Carsten Rosenow (EM).
U.S. Provisional Application No. 60/ 266,402 filed 01 Feb 2001 (DHHS Reference No. E-072-2001/0-US-01); PCT Applicàtion No. PCT/US02/ 03147 filed 31 Jan 2002 (DHHS Reference No. E-072-2001/0-PCT02); U.S. Patent Application filed 25 Jul 2003 (DHHS Reference No. E-072-2001/0-US-03).
The inventors have isolated a number of previously unknown sRNAs found in E. coli. Previous scientific publications by the inventors and others regarding sRNAs have shown these sRNAs to serve important regulatory roles in the cell, such as regulators of virulence and survival in host cells. Prediction of the presence of genes encoding sRNAs was accomplished by combining sequence information from highly conserved intergenic regions with information about the expected transcription of neighboring genes. Microarray analysis also was used to identify likely candidates. Northern blot analyses were then carried out to demonstrate the presence of the sRNAs. Three of the sRNAs claimed in the invention regulate (candidates 12 and 14, negatively and candidate 31, positively) expression of RpoS, a major transcription factor in bacteria that is important in many pathogens because it regulates (amongst other things) virulence. The inventors' data show that these sRNAs are highly conserved among closely related bacterial species, including Salmonella and Klebsiella, presenting a unique opportunity to develop both specific and broad-based antibiotic therapeutics. The invention contemplates a number of uses for the sRNAs, including, but not limited to, inhibition by antisense, manipulation of gene expression, and possible vaccine candidates.

## A Novel Chimeric Protein for Prevention and Treatment of HIV Infection

Edward A. Berger (NIAID), Christie M. Del Castillo.
U.S. Provisional Application No. 60/ 124,681 filed 16 Mar 1999 (DHHS Reference No. E-039-1999/0-US-01); PCT Application No. PCT/US00/ 06946 filed 16 Mar 2000 (DHHS Reference No. E-039-1999/0-PCT02); U.S. Patent Application No. 09/ 936,702 filed 13 Sep 2001 (DHHS Reference No. E-039-1999/0-US-03).
This invention relates to bispecific fusion proteins effective in viral neutralization. Specifically, the invention is a genetically engineered chimeric protein containing a soluble extracellular region of human CD4 attached via a flexible polypeptide linker to a single chain human monoclonal antibody directed against a CD4-induced, highly conserved HIV gp120 determinant involved in coreceptor interaction. Binding of the sCD4 moiety to gp120 induces a conformational change that enables the antibody moiety to bind, thereby blocking Env function and virus entry. This novel bispecific protein displays neutralizing activity against genetically diverse primary HIV-1 isolates, with potency at least 10 -fold greater than the best described HIV-1 neutralizing monoclonal antibodies. The agent has considerable potential for prevention of HIV-1 infection, both as a topical microbicide and as a systemic agent to protect during and after acute exposure (e.g. vertical transmission, postexposure prophylaxis). It also has potential utility for treatment of chronic infection. Such proteins, nucleic acid molecules encoding them, and their production and use in preventing or treating viral infections are claimed.

## Novel Antimalarial Compounds, Methods of Synthesis Thereof, Pharmaceutical Compositions Comprising Same, and Methods of Using Same for Treatment and Prevention of Malaria

Michael R. Boyd (NCI), Gerhard Bringmann (EM), Sven Harmsen (EM) Roland Gotz (EM), T. Ross Kelly (EM), Matthias Wenzel (EM), Guido Francois (EM), J. D. Phillipson (EM), Laurent A. Assi (EM), Christopher Schneider (EM).
U.S. Patent 5,639, 761 issued on 17 Jun 1997 (DHHS Reference No. E-090-1994/0-US-01); U.S. Patent 6,627,641 issued on 30 Sep 2003 (DHHS Reference No. E-090-1994/0-US-07); U.S. Patent $5,552,550$ issued on 03 Sep 1996 (DHHS Reference No. E-

200-1994/0-US-01); U.S. Patent 5,763,613 issued on 09 Jun 1998 (DHHS Reference No. E-200-1994/0-US-02); U.S. Patent 6,140,339 issued on 31 Oct 2000 (DHHS Reference No. E-200-1994/2-US-01); U.S. Patent 6,331,630 issued on 18 Dec 2001 (DHHS Reference No. E-200-1994/2-US-08); U.S. Patent 5,571,919 issued on 05 Nov 1996 (DHHS Reference No. E-201-1994/0-US-01); U.S. Patent 5,789,594 issued on 04 Aug 1998 (DHHS Reference No. E-201-1994/0-US-02); U.S. Patent 5,578,729 issued on 26 Nov 1996 (DHHS Reference No. E-201-1994/1-US-01); U.S. Patent 5,786,482 issued on 28 Jul 1998 (DHHS Reference No. E-201-1994/1-US-03).
According to data recently reported by the World Health Organization (WHO), the death rate from malaria exceeds one million individuals per year. The Public Health Service seeks exclusive or non-exclusive licensee(s) to develop and commercialize the technology claimed within the portfolio of U.S. patents issued and pending, and corresponding international patents issued and pending. These patents and pending applications claim an exceptionally broad universe of novel naphthylisoquinoline alkaloid compounds, and methods of total synthesis thereof. Representative examples of these compounds have been shown to have potent in vitro activity against malaria parasites, including parasites that are highly resistant to available antimalarial drugs.

Representative examples have also been shown to have potent in vivo activity against malaria parasites in animal models. Pharmaceutical compositions comprising these compounds, as well as methods of using the compounds to treat or prevent a malarial infection of a host, are claimed. The relative structural simplicity of this class of compounds, and the ready synthetic access thereto, provide unprecedented opportunities for structure-activity relationship (SAR), lead-optimization and antimalarial drug development. The technology is further described in the following publications: J. Nat Prod. 1997 Jul.;60(7):677-83 and Bioorg. Med. Chem. Lett. 1998 Jul.;8(13): 1729-34.

## Antimicrobial Magainin Peptides

Michael A. Zasloff, Hao-Chia Chen,
Judith H. Brown, John L. Morell,
Charng-Ming Huang (NICHD).
U.S. Patent 4,810,777 issued on 07 Маг 1989 (DHHS Reference No. E-145-1987/0-US-01); U.S. Patent 5,567,681 issued on 22 Oct 1996 (DHHS Reference No. E-145-1987/2-US-03);
U.S. Patent 5,643,876 issued on 01 Jul 1997 (DHHS Reference No. E-145-1987/1-US-03); U.S. Patent 5,221,732 issued on 22 Jun 1993 (DHHS Reference No. E-217-1988/0-US-01).
First isolated from the skin of the African clawed frog Xenopus laevis, magainin peptides have been shown by the inventors to have broad-spectrum antimicrobial properties. Both synthetic and natural magainin peptides are active against many species of bacteria and fungi and induce osmotic lysis of protozoa. Magainin peptides are water soluble, nonhemolytic at effective antimicrobial concentrations, have molecular weights of 2500 or less and are amphiphilic. Compositions and methods for their use are claimed in the patents. These inventions are available for nonexclusive or exclusive licensing. The inventions are further described in Zasloff et al., P.N.A.S. USA 1987 Aug.; 84(15):5449-53; Marion et al., FEBS Lett. 1988 Jan.18;227(1):21-6; Soravia et al., FEBS Lett. 1988 Feb. 15;228(2):33740; Westerhoff et al., P.N.A.S. USA 1989 Sep.; 86(17):6597-601; and Gwadz et al., Infect. Immun. 1989 Sep.; 57(9):2628-33.

Dated: October 24, 2003.

Time: 11 a.m. to 12:30 p.m.
Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, (Telephone Conference Call).

Contact Person: Victoria S. Levin, MSW, Scientific Review Administrator, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, room 3172, MSC 7848, Bethesda, MD 20892, (301) 4350912,levinv@csr.nih.gov.

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

Name of Committee: Center for Scientific Review Special Emphasis Panel Health Education and Disease Management.

Date: November 13-14, 2003.
Time: 8:30 a.m. to 5 p.m.
Agenda: To review and evaluate grant applications.

Place: Holiday Inn Georgetown, 2101 Wisconsin Avenue, NW., Washington, DC 20007.

Contact Person: Claire E. Gutkin, MPH, PhD., Scientific Review Administrator, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3138, MSC 7759, Bethesda, MD 20892, (301) 594-3139.

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

Name of Committee: Center for Scientific Review Special Emphasis Panel Engineering of Enzymes.

Date: November 13-14, 2003.
Time: 5 p.m. to 5 p.m.
Agenda: To review and evaluate grant applications.

Place: Four Points by Sheraton Bethesda, 8400 Wisconsin Avenue, Bethesda, MD 20814.

Contact Person: Michael M. Sveda, PhD, Scientific Review Administrator, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, room 5152, MSC 7842, Bethesda, MD 20892, (301) 4353565, svedam@csr.nih.gov.

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.
Name of Committee: Center for Scientific Review Special Emphasis Panel Member Conflict: Chronic Disease Epidemiology.

Date: November 14, 2003.
Time: 8 a.m. to 5 p.m.
Agenda: To review and evaluate grant applications.
Place: Holiday Inn Chevy Chase, 5520 Wisconsin Avenue, Chevy Chase, MD 20815

Contact Person: Ann Hardy, DRPH,
Scientific Review Administrator, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, room 3158, MSC 7770, Bethesda, MD 20892, (301) 4350695, hardyan@csr.nih.gov.
This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

Name of Committee: Center for Scientific Review Special Emphasis Panel Software Maintenance.

Date: November 14, 2003.
Time: 8 a.m. to $6 \mathrm{p} . \mathrm{m}$.
Agenda: To review and evaluate grant applications.

Place: Holiday Inn Select Bethesda, 8120 Wisconsin Ave, Bethesda, MD 20814.
Contact Person: George W. Chacko, PhD, Scientific Review Administrator, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, room: 4186, MSC: 7806, Bethesda, MD 20892, (301) 4351220, chackoge@csr.nih.gov.
This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.
Name of Committee: Center for Scientific Review Special Emphasis Panel, HT (10) B Hematology, Hematopoiesis and Transfusion.

Date: November 14, 2003.
Time: 8:30 a.m. to 4:30 p.m
Agenda: To review and evaluate grant applications.
Place: Holiday Inn Chevy Chase, 5520 Wisconsin Avenue, Chevy Chase, MD 20815. Contact Person: Chhanda L. Ganguly, PhD, Scientific Review Administrator, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, room 4118, MSC 7802, Bethesda, MD 20892, (301) 4351739, gangulyc@csr.nih.gov.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

## Public Health Service

National Toxicology Frogram; The National Toxicology Program (NTP) Center for the Evaluation of Risks to Human Reproduction (CERHR), Announces Availability of Draft Expert Panel Report on Fluoxetine and Expert Panel Meeting on Fluoxetine; Requests Public Comment on the Draft Report

## SUMMARY: The NTP CERHR

announces-
(1) Availability of sections 1-4 of the draft expert panel report on fluoxetine and solicits written public comments on the report by January 6, 2004.
(2) The fluoxetine expert panel meeting on March 3-5, 2004 at the Holiday Inn Old Town Select, Alexandria, Virginia and invites the public to present oral comments at this meeting.

Questions about the draft expert panel report, submission of public comments, and the expert panel meeting should be directed to Dr. Michael Shelby, CERHR Director (contact information below).

## Draft Expert Panel Report On Fluoxetine Available

The CERHR announces the availability of the draft expert panel report on fluoxetine hydrochloride
(Prozac ${ }^{(8)}$; Sarafem ${ }^{\text {TM }}$, CAS RN 59333-67-4; fluoxetine, CAS RN 54910-89-3). Fluoxetine, an antidepressant, is a widely prescribed drug in the United States. The CERHR selected fluoxetine for evaluation because of (1) sufficient reproductive and developmental studies, (2) human exposure information, (3) changing prescription patterns, and (4) public concern about potential reproductive and/or developmental hazards associated with exposure. Fluoxetine hydrochloride, under the name Sarafem ${ }^{\text {TM }}$, is prescribed to treat premenstrual dysphoric disorder (PMDD), potentially increasing the number of exposures for women of childbearing age.
Furthermore, the Food and Drug Administration recently approved Prozac® for use in 7-17 year-olds thereby increasing exposures of children.

Each draft expert panel report has the following sections:
1.0 Chemistry, Use, and Human

Exposure
2.0 General Toxicological and Biological Effects
3.0 Developmental Toxicity Data
4.0 Reproductive Toxicity Data
5.0 Summary, Conclusions, and

Critical Data Needs (to be written at expert panel meeting)
Sections 1-4 will be available to the public by the publication date of this notice and can be obtained electronically on the CERHR Web site (http://cerhr.niehs.nih.gov) or in hard copy by contacting Dr. Michael Shelby, Director CERHR [NIEHS, 79 T.W. Alexander Drive, Building 4401, room 103, P.O. Box 12233, MD EC-32, Research Triangle Park, NC 27709, telephone: (919) 541-3455; facsimile: (919) 316-4511; shelby@niehs.nih.govj.

## Request for Written Comments on Draft Expert Panel Report

The CERHR invites written public comments on sections 1-4 of the draft expert panel report on fluoxetine. Comments can be submitted in hard copy or electronic format and must be received by the CERHR by January 6, 2004. These comments will be distributed to the expert panel and CERHR staff for consideration in revising the draft report and in preparing for the expert panel meeting. They will be posted on the CERHR website prior to the expert panel meeting. These comments should be sent to Dr. Michael Shelby at the address provided above. Persons submitting written comments are asked to include their name and contact information (affiliation, mailing address,
telephone and facsimile numbers, email, and sponsoring organization, if any).

## Expert Panel Meeting Planned

The CERHR will hold an expert panel meeting March 3-5, 2004, at the Holiday Inn Old Town Select, 480 King Street, Alexandria, VA 22314 (telephone: 703-549-6080, facsimile: 684-6508). The CERHR has asked the expert panel to review the scientific evidence regarding the potential reproductive and/or developmental toxicity associated with . exposure to fluoxetine. The expert panel will review and revise the draft expert panel report and reach conclusions regarding whether exposure to fluoxetine is a hazard to human development or reproduction. The expert panel will also identify data gaps and research needs.
This meeting is open to the public and attendance is limited only by the available meeting room space. The meeting will begin at 8:30 a.m. each day. On March 3 and 4, it is anticipated that a lunch break will occur from noon -1 p.m. and that the meeting will adjourn 5-6 p.m. The meeting is expected to adjourn by noon on March 5; however, adjournment may occur earlier or later depending upon the time needed by the expert panel to complete its work. Anticipated agenda topics for each day are listed below. Following the expert panel meeting and completion of the expert panel report, the CERHR will post the report on its website and solicit public comment through a Federal Register notice.

## Preliminary Meeting Agenda

Meeting begins at 8:30 a.m. each day Lunch break anticipated from noon-1 p.m.

## March 3, 2004

Opening remarks
Oral public comments ( 7 minutes per speaker; one representative per group, see below)
Review of sections 1-4 of the draft expert panel report on fluoxetine
Discussion of Section 5.0 Summary, Conclusions, and Critical Data Needs

## March 4, 2004

Discussion of Section 5.0 Summary, Conclusions, and Critical Data Needs
Preparation of draft summaries and conclusion statements
March 5, 2004
Presentation, discussion of, and agreement on summaries and conclusions
Closing comments

## Oral Public Comments Welcome at Expert Panel Meeting

Time is set-aside on March 3, 2004, for the presentation of oral public comments at the expert panel meeting. To facilitate planning, those persons wishing to make oral public comments are asked to contact Dr. Shelby by February 25 (contact information provided above). Seven minutes will be available for each speaker (one speaker per organization). When registering to comment orally, please provide your name, affiliation, mailing address, telephone and facsimile numbers, email and sponsoring organization (if any). If possible, also send a copy of the statement or talking points to Dr. Shelby by February 25 . This information will be provided to the expert panel to assist them in identifying issues for discussion and will be noted in the meeting record. Registration for presentation of oral comments will also be available at the meeting on March 3, 2004 (7:30-8:30 a.m.). Those persons registering at the meeting are asked to bring 20 copies of their statement or talking points for distribution to the expert panel and for the record.

## Fluoxetine Expert Panel

The CERHR expert panel is composed of independent scientists selected for their scientific expertise in reproductive and/or developmental toxicology and other areas of science relevant for this review.
Expert Panel Members and Affiliation
Ronald Hines, Ph.D., Chair, Medical College of Wisconsin, Milwaukee, WI Jane Adams, Ph.D., University of Massachusetts, Boston, MA
Germaine M. Buck, Ph.D., National Institute of Child Health and Human Development Rockville, MD
Willem Faber, Ph.D., WFT Consulting, LLC, Victor, NY
Joseph F. Holson, Ph.D., WIL Research Laboratories; Inc., Ashland, OH
Sandra W. Jacobson, Ph.D., Wayne State University School of Medicine, Detroit, MI
Martin Keszler, M.D., Georgetown University Hospital, Washington, DC
Robert Taylor Segraves, M.D., Ph.D., MetroHealth Medical Center, Cleveland, OH
Lynn T. Singer, Ph.D., Case Western Reserve University, Cleveland, OH
I. Glen Sipes, Ph.D., University of Arizona, Tucson, AZ
Kennth McMartin, Ph.D., Louisiana State University, Shreveport, LA
Paige L. Williams, Ph.D., Harvard School of Public Health, Boston, MA

Background Information on the CERHR
The NTP established the NTP CERHR in June 1998 [Federal Register, December 14, 1998 (Volume 63, Number 239, page 68782)]. The CERHR is a publicly accessible resource for information about adverse reproductive and/or developmental health effects associated with exposure to environmental and/or occupational exposures. Expert panels conduct scientific evaluations of agents selected by the CERHR in public forums.

The CERHR invites the nomination of agents for review or scientists for its expert registry. Information about CERHR and the nomination process can be obtained from its Home page (http:/ /cerhr.niehs.nih.gov) or by contacting Dr. Shelby (contact information provided above). The CERHR selects chemicals for evaluation based upon several factors including production volume, extent of human exposure, public concern, and published evidence of reproductive or developmental toxicity.
CERHR follows a formal, multi-step process for review and evaluation of selected chemicals. The formal evaluation process was published in the Federal Register notice July 16, 2001 (Volume 66, Number 136, pages $37047-$ 37048) and is available on the CERHR Web site under "About CERHR" or in printed copy from the CERHR.
Dated: October 31, 2003.
Samuel H. Wilson,
Deputy Dircctor, National Institute of Environmental Health Sciences.

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-4815-N-86]
Notice of Submission of Proposed Information Collection to OMB: Request for Occupied Conveyance
Agency: Office of the Chief Information Officer, HUD.
ACTION: Notice.
sUMmARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

The information provides a basis for the management and administration of the property disposition program. In addition, information will determine if
occupants are granted a request of continued occupancy in a single-family property ( 1 to 4 units) after HUD acquires title.
DATES: Comments Due Date: December 8, 2003.
ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB approval number (2502-0268) and should be sent to: Lauren Wittenberg, OMB Desk Officer, Office of
Management and Budget, Room 10235, New Executive Office Building, Washington, DC 20503; Fax number (202) 395-6974; e-mail

Lauren_Wittenberg@omb.eop.gov.

## FOR FURTHER INFORMATION CONTACT:

Wayne Eddins, Reports Management Officer, AYO, Department of Housing and Urban Development, 451 Seventh Street, Southwest, Washington, DC 20410; e-mail Wayne_Eddins@HUD.gov; telephone (202) 708- $\overline{2} 374$. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Eddins.

## SUPPLEMENTARY INFORMATION: The

Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction -Act ( 44 U.S.C. Chapter 35). The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the OMB approval number, if applicable; (4) the description of the need for the information and its proposed use; (5) the agency form number, if applicable; (6) what members of the public will be affected by the proposal; (7) how frequently information submissions will be required; (8) an estimate of the total number of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (9) whether the proposal is new, an extension, reinstatement, or revision of an information collection requirement; and (10) the name and telephone number of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

This Notice also lists the following information:

Title of Proposal: Request to Occupied Conveyance.

OMB Approval Number: 2502-0268.
Form Numbers: Form HUD-9539.
Description of the Need for the
Information and Its Proposed Use: The information provides a basis for the management and administration of the
property disposition program. In addition, information will determine if occupants are granted a request of continued occupancy in a single-family property ( 1 to 4 units) after HUD acquires title.

Respondents: Individuals or households, Business or other for-profit, Not-for-profit institutions, State, local or tribal government.

Frequency of Submission: On occasion, to request occupied conveyance of property.

Reporting Burden: Number of Respondents 12,750; Average response per respondent 5.86;: Total annual responses 74,750; Average burden per response 0.28 hrs .

Total Estimated Burden Hours:

## 21,125.

Status: Extension of a currently approved collection.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. 35 , as amended.

Dated: October 31, 2003.

## Wayne Eddins,

Departmental Reports Management Officer, Office of the Chief Information Officer.

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-4809-N-45]
Federal Property Suitable as Facilities To Assist the Homeless
Agency: Office of the Assistant
Secretary for Community Planning and Development, HUD.
ACTION: Notice.
summary: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

## FOR FURTHER INFORMATION CONTACT:

Mark Johnston, room 7266, Department of Housing and Urban Developnıent, 451 Seventh Street, SW., Washington, DC 20410; telephone (202) 708-1234; TTY number for the hearing- and speech-impaired (202) 708-2565 (these telephone numbers are not toll-free), or call the toll-free Title V information line at 1-800-927-7588.

## SUPPLEMENTARY INFORMATION: In

 accordance with 24 CFR part 581 and section 501 of the Steward B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assistthe homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in National Coalition for the Homeless v. Veterans Administration, No. 88-2503OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/ unavailable, suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.
Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Where property is described as for "off-site use only" recipients of the property will be required to relocate the building to their own site at their own expense. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to Shirley Kramer, Division of Property Management, Program Support Center, HHS, room 5B-41, 5600 Fishers Lane, Rockville, MD 20857; (301) 443-2265 (this is not a toll-free number). HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 24 CFR part 581.

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing its as either suitable/ available or suitable/unavailable.

For properties listed as suitable/ unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.
Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the free information line at 1-800-927-7588 for detailed instructions or write a letter to Mark Johnston at the address listed at the beginning of this notice. Included in the request for review should be the property address (including ZIP Code), the date of publication in the Federal Register, the landholding agency, and the property number.
For more information regarding particular properties identified in this notice (i.e., acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: Army: Ms. Julie Jones-Conte, Department of the Army, Office of the Assistant Chief of Staff for Installation Management, Attn: DAIMME, Room 1E677, 600 Army Pentagon, Washington, DC 20310-0600; (703) 6929223; GSA: Mr. Brian K. Polly, Assistant Commissioner, General Services Administration, Office of Property Disposal, 18th and F Streets, NW., Washington, DC 20405; (202) 501-0052; Navy: Mr. Charles C. Cocks, Director, Department of the Navy, Real Estate Policy Division, Naval Facilities Engineering Command, Washington Navy Yard, 1322 Patterson Ave., SE., Suite 1000, Washington, DC 203745065; (202) 685-9200 (these are not tollfree numbers).

Dated: October 30, 2003.
John D. Garrity,
Director, Office of Special Needs Assistance Programs.

## DEPARTMENT OF THE INTERIOR

## Bureau of Indian Affairs

## Proposed Information Collection

agency: Bureau of Indian Affairs, Interior.
ACTION: Notice of request for comments.
SUMMARY: In compliance with the Paperwork Reduction Act of 1995, this notice announces that we are seeking comments from interested parties to renew the clearance for Application for Training or Employment, OMB No. 1076-0062.
DATES: Written comments must be received by January 6, 2004.
ADDRESSES: Written comments should be sent to: Lynn Forcia, Office of SelfGovernance and Self-Determination, Department of the Interior, 1849 C Street, NW., Mail Stop 2412-MIB, Washington, DC 20240.
FOR FURTHER INFORMATION: FOR additional information or copies of the
forms, call Lynn Forcia, Office of SelfGovernance and Self-Determination, Department of the Interior, 1849 C Street NW., MS 2412-MIB, Washington, DC 20240 and (202) 219-5270 (This is not a toll-free number). You may send requests by facsimile to (202) 208-3664. SUPPLEMENTARY INFORMATION: Pub.L. 84959 and Pub.L. 88-230 authorize the Secretary of the Interior, to help adult Indians who reside on or near Indian reservations to obtain reasonable and satisfactory employment. The information collection documents provide information necesşary to administer the program for Employment Assistance or Vocational Training. The Secretary is authorized to undertake a program of vocational training that provides vocational counseling, guidance, and training in any recognized vocation, apprenticeship, trade, or on-the-job training. The program is available to Indians who are not less than 18 years old and not more than 35 years old who reside on or near an Indian reservation. The acts authorize the Secretary to enter into contracts or ägreements with Federal, State, local government agencies or associations with apprenticeship programs or on-the-job training that leads to skilled employment. The same application form is used for both 25 CFR parts 26 and 27. Information of a confidential nature is protected by the Privacy Act.

You are asked to comment on the necessity of the information collection to fulfill the functions of the bureau; whether the burden estimate is accurate and the methodology and assumptions are valid; the utility, quality, and clarity of information requested; and ways that the burden might be minimized for respondents. All comments are subject to review by the public during regular business hours. If you wish your name or address withheld, you must state this prominently at the beginning of your comments. We will honor your request to the extent allowed by the law. Individuals who represent businesses or companies will have comments available for review by the public. In some cases we may decide to withhold comments from review for good reason.
Please note that an agency may not sponsor or conduct, and a person need not respond to, an information collection unless a currently valid OMB Control Number is displayed.

Title: Application for Training or Employment Assistance 25 CFR 26 \& 27. OMB Control Number: 1076-0062.
Description of Respondents:
Individual Indians living on or near a reservation who seek training or
employment provide the information in order to receive a benefit.

Respondents: 4900.
Burden: 30 minutes to complete.
Total Annual Hourly Burden: 2450 hours.

Dated: October 27, 2003.
Aurene M. Martin,
Principal Deputy Assistant Secretary-Indian Affairs.

## DEPARTMENT OF THE INTERIOR

## Bureau of Indian Affairs

## Notice of Intent To Prepare an

 Environmental Impact Statement for the Proposed Ione Band of Miwok Indians' Trust Acquisition and Casino Project, Amador County, CAAGENCY: Bureau of Indian Affairs, Interior.
ACTION: Notice.
SUMMARY: This notice advises the public that the Bureau of Indian Affairs (BIA), with the cooperation of the Ione Band of Miwok Indians and the National Indian Gaming Commission (NIGC), intends to gather information necessary to prepare an Environmental Impact Statement (EIS) for a proposed casino project to be located within the City of Plymouth in Amador County, California. The purpose of the proposed project is to help provide for the economic development of the Ione Band. This notice also announces a public scoping meeting to identify potential issues and content for inclusion in the EIS.
DATES: Comments on the scope and implementation of this proposal must arrive by December 8, 2003. The public scoping meeting will be held on Wednesday, November 19, 2003, from 6 p.m. to 9 p.m. or until the last comment is received.
ADDRESSES: You may mail or hand carry written comments to Mr. Clay Gregory, Acting Regional Director, Pacific Region, Bureau of Indian Affairs, 2800 Cottage Way, Sacramento, Californià 95825. The public scoping meeting will be held at the Amador County Fairgrounds, 18621 Sherwood and School Streets, Plymouth, California.
FOR FURTHER INFORMATION CONTACT: Mr. William Allan, (916) 978-6043.
SUPPLEMENTARY INFORMATION: The Ione Band of Miwok Indians proposes that $208.06 \pm$ acres of land be taken into trust and that a casino, parking, hotel and other facilities supporting the casino be
constructed on the trust acquisition property. The gaming facility would be managed by IKON Group, LLC on behalf of the tribal government, pursuant to the terms of a management agreement between the tribal government and IKON Group, LLC. The BIA serves as the Lead Agency for National
Environmental Policy Act (NEPA) compliance, with the NIGC, which is responsible for approval of the gaming management contract, acting as a Cooperating Agency.

The project site is located immediately east of Highway 49, and is within $2^{1 ⁄ 2}$ miles of State Highway 16. The City of Placerville is located approximately 20 miles north of the project site, which is also accessible from State Highway 49. The project site consists of 10 parcels of land totaling $208.06 \pm$ acres. Eight of the 10 parcels ( $10.28 \pm$ acres) are located within the City of Plymouth, while the remaining 2 parcels ( $197.78 \pm$ acres) are located on unincorporated land within Amador County.
Phase I of the Proposed Action includes the development of a $120,000 \pm$ square foot casino complex, which would consist of a porte cochere, main gaming hall, food and beverage services, retail space, and administration space. Approximately 65,000 square feet of this building space would be devoted to the main gaming hall, while the balance of the facility would include administration space, small retail shops and food/beverage facilities and a small gift and art shop. The entire complex would be built on land currently within the City of Plymouth. Primary access to the casino complex would be via State Highway 49.

Phase II of the Proposed Action includes the construction of a hotel (250 rooms maximum), which will include small conference style facilities together with food and beverage services. The proposed hotel would also be fitted with a dual plumbing system for the use of potable and recycled water. In addition, site parking would be increased to supply adequate parking for hotel and conference patrons. The hotel is anticipated to be operational no sooner than the middle of year 3-4 of the project. Primary vehicle access to the hotel would be provided by the main casino and surface-parking driveway.

Areas of environmental concern to be addressed in the EIS include land use, geology and soils, water resources, agricultural resources, biological resources, cultural resources, mineral resources, paleontological resources, traffic and transportation, noise, air quality, public health/environmental hazards, public services and utilities,
hazardous materials and waste/worker safety, socio-economics, environmental justice, and visual resources/aesthetics. The range of issues addressed may be expanded based on comments received during the scoping process.

## Public Comment Availability

Comments, including names and addresses of respondents, will be available for public review at the mailing address shown in the ADDRESSES section, during regular business hours, 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. Individual respondents may request confidentiality. If you wish us to withhold your name and/or address from public review or from disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your written comment. Such requests will be honored to the extent allowed by law. We will not, however, consider anonymous comments. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses will be made available for public inspection in their entirety.

## Authority

This notice is published in accordance with section 1503.1 of the Council on Environmental Quality regulations ( 40 CFR parts 1500 through 1508) implementing the procedural requirements of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 et seq.), and the Department of the Interior Manual ( 516 DM 1-6), and is in the exercise of authority delegated to the Assistant Secretary-Indian Affairs by 209 DM 8. Dated: October 9, 2003.
Aurene M. Martin,
Principal Deputy Assistant Secretary—Indian Affairs.

## DEPARTMENT OF THE INTERIOR

## Bureau of Indian Affairs

Notice of Intent To Prepare an Environmental Impact Statement for the Proposed Mandan, Hidatsa, Arikara Nation Clean Fuels Refinery, Ward County, ND

AGENCY: Bureau of Indian Affairs, Interior.
ACTION: Notice.

SUMMARY: This notice advises the public that the Bureau of Indian Affairs (BIA), with the cooperation of the Mandan, Hidatsa, Arikara (MHA) Nation, intends to gather the information necessary for preparing an Environmental Impact Statement (EIS) for the proposed 468acre Fee-to-Trust Transfer and Clean Fuels Refinery Project in Ward County, North Dakota. The purpose of the proposed action is to help meet the land base and economic needs of the MHA Nation.
DATES: You may submit written comnients on the scope and implementation of this proposal through December 8, 2003.
ADDRESSES: You may mail or hand carry written comments to Horace Pipe, 25300 366 Street SW, Makoti, North Dakota 58756.

## FOR FURTHER INFORMATION CONTACT:

 Horace Pipe, (701) 726-5894. supplementary information: The MHA Nation proposes that 468 acres of land be taken into trust, that a clean fuels refinery be constructed on 160 acres of that land. The 468 acres of land to be taken into trust are in the northeast corner of the Fort Berthold Indian Reservation along the south side of North Dakota Highway 23, about 2 miles west of the turnoff to Makoti, North Dakota. The land and refinery, which will be owned and managed by the MHA Nation, will be in sections 19 and 20 of Township 152 North, Range 87 West.The MHA Nation proposes to construct a petroleum refinery to process 10,000 barrels per stream day of synthetic crude from northern Alberta, obtained from a nearby, existing pipeline. The refinery will be a new state-of-the-art facility that will be able to meet current and proposed 2008 EPA regulations. The facility will be the most technologically advanced refinery in the United States and it will produce the cleanest gasoline and diesel fuel in the country. The project would employ 600 to 1000 positions during construction and 65 to 70 positions during operation.
The BIA will serve as the Lead Agency for compliance with the National Environmental Policy Act. The Environmental Protection Agency will be a Cooperating Agency.

The EIS will assess the environmental consequences of BIA approval of the fee-to-trust transfer of land and the refinery project. Areas of environmental concern include effects to socioeconomics; air quality; transportation; ground and surface water; wildlife and their habitats; threatened, endangered, or special-status species; cultural
resources; aesthetics; land uses; and health and safety. The range of issues to be addressed may be further expanded based on comments received during the scoping process.

## Public Comment Solicitation

Comments, including names and home addresses of respondents, will be available for public review at the address shown in the ADDRESSES section, during regular business hours, 7:30 a.m. to 4 p.m., Monday through Friday, except holidays. Individual respondents may request confidentiality. If you wish us to withhold your name and/or address from public review or from disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your written comment. Such requests will be honored to the extent allowed by law. We will not, however, consider anonymous comments. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public inspection in their entirety.

## Meeting Notice for the National Historic Oregon Trail Interpretive Center (NHOTIC) Advisory Board

agency: Bureau of Land Management (BLM), Vale District.
summary: The National Historic Oregon Trail Interpretive Center Advisory Board will meet in a conference room at the Best Western Sunridge Inn (541-523-
6444), One Sunridge Way in Baker City, OR, from 8 a.m. to 12 p.m. (Pacific time), on Thursday, December 18, 2003.

The meeting topics include:
Completing the revision of the strategic plan, a roundtable to allow members to introduce new issues to the board, and other matters as may reasonably come before the Board. The entire meeting is open to the public. For a copy of the information to be distributed to the Board members, please submit a written request to the Vale District Office 10 days prior to the meeting. Public comment is scheduled for 10:15 a.m. to 10:30 a.m., Pacific time. FOR FURTHER INFORMATION CONTACT: Additional information concerning the NHOTIC Advisory Board may be obtained from Peggy Diegan, Management Assistant/Webmaster, Vale District Office, 100 Oregon Street, Vale, OR 97918 (541) 473-3144, or e-mail Peggy_Diegan@or.blm.gov.

Dated: November 3, 2003.

## National Preservation Technology and

 Training Board: Meetingagency: National Park Service, Interior. ACTION: Notice.
Notice is hereby given in accordance with the Federal Advisory Committee Act, 5 U.S.C. Appendix (1988), that the National Preservation Technology and Training Board (the Board) will meet November 14, 2003, in Natchitoches, LA.

The Board was established by Congress to provide leadership, policy advice, and professional oversight to the National Center for Preservation Technology and Training (NCPTT), as required under the National Historic Preservation Act of 1966, as amended (16 U.S.C. 470).

The Board will meet in Lee H. Nelson Hall, 645 College Ave., Natchitoches, LA 71457. On Friday, November 14, the meeting will start at 9:00 a.m. and end no later than 5:00 p.m. The Board meeting's agenda will include NCPTT operations, budget, and program development; NCPTT business and strategic plans; Preservation Technology and Training grants; and the Heritage Education program; PTT Board workgroup reports; and election of PTT Board chair and vice chair.

The Board meeting is open to the public. Facilities and space for accommodating members of the public are linited, however, and persons will be accommodated on a first-come, firstserved basis. Any member of the public may file a written statement concerning the matters to be discussed.

Persons wishing more information concerning this meeting, or who wish to submit written statements, may contact Mr. de Teel Patterson Tiller, Acting Associate Director, Cultural Resources, 1849 C Street NW-3128 MIB, Washington, DC 20240, telephone (202) 208-7625. Increased security in the Washington, DC, area may cause delays in the delivery of U.S. Mail to government offices. In addition to mail or commerçial delivery, please fax a copy of the written submission to Mr. Tiller at (202) 273-3237.
Minutes of the meeting will be available for public inspection no later than 90 days after the meeting at the office of the Acting Associate Director, Cultural Resources, 1849 C Street NW, Room 3128, Washington, DC.

## National Park Service

Clarification of the Term the day in the Definition of Substantial Restoration of Natural Quiet for Grand Canyon NP
Agency: National Park Service, Department of the Interior. ACTION: Notice.
SUMMARY: This notice clarifies the meaning of the term the day as it is used in the National Park Service (NPS) definition of substantial restoration of natural quiet at Grand Canyon National Park (GCNP) pursuant to Public Law 100-91, the National Parks Overflights Act of 1987. It also helps to clarify the definition of substantial restoration of natural quiet recently the subject of litigation before the United States Court of Appeals, District of Columbia Circuit, in the case United States Air Tour Association v. Federal Aviation Administration (Grand Canyon Trust, Interveners). In this case, the Court declared that "* * * the Park Service is entitled to deference for its interpretation of its own definitions" (p. 19). The Court concluded "* * * the FAA's use of an "average annual day" for measuring "substantial restoration of
natural quiet" appears inconsistent with both the Park Service's definition of the term and with the premise upon which that definition was based. * * * We must therefore remand this issue for further consideration" ( $p .22$ ).

Several interpretations of the meaning of the term the day have been advanced by various parties over the past few years, and the different interpretations have major implications for calculating the percentage of substantial restoration of natural quiet achieved at GCNP. This notice clarifies that the term the day in the definition of substantial restoration of natural quiet means any given day, every day, and provides guidance to the Federal Aviation Administration (FAA) concerning the appropriate definition of the day as used in the measurement of substantial restoration of natural quiet at GCNP. Clarification of this term will provide a benchmark for the future alternative dispute resolution process between the FAA and NPS. This clarification does not change the definition of substantial restoration of natural quiet.
ADDRESSES: You may view a copy of this definition through the Internet at: http://www.nps.gov/grca/overflights.

## FOR FURTHER INFORMATION CONTACT: Ken

McMullen, Overflights and Natural Soundscape Program Manager, National Park Service, Grand Canyon NP, 823 N. San Francisco St., Suite B, Flagstaff, Arizona 86001. Telephone: (928) 7792095 , or by e-mail at

## Ken_McMullen@nps.gov.

## SUPPLEMENTARY INFORMATION:

## Background

Public Law 100-91 called for the "substantial restoration of natural quiet and experience of the park" at GCNP. The NPS in its "Report on Effects of Aircraft Overflights on the National Park System" (submitted to Congress in September, 1994, and published in July, 1995) determined that "* * * substantial restoration requires that $50 \%$ or more of the Park achieve 'natural quiet' (i.e., no aircraft audible) for 75100 percent of the day" (p. 182). Although the context of this definition suggested that the day implied each day, every day, or any given day (terms considered to mean the same thing in this context), the term was not further clarified in this report. However, the NPS analysis in the report was consistent with any given day.

In its "Review of Scientific Basis for Change in Noise Impact Assessment Method Used at Grand Canyon National Park" (2000), the NPS provided definitions of terms used, as well as rationale, for its noise impact
assessment methods. In this review the NPS defined substantial restoration of natural quiet to be "* * * a threshold not to be exceeded on any given day. * * *" (p. 16).

The term the day in the definition of substantial restoration of natural quiet was recently the subject of litigation before the United States Court of Appeals, District of Columbia Circuit, in the case, United States Air Tour Association v. Federal Aviation Administration (Grand Canyon Trust, Intervenors). In this case, the Court declared that "* * * the Park Service is entitled to deference for its interpretation of its own definitions" (p. 19). The Court concluded "* * * the FAA's use of an "average annual day" for measuring "substantial restoration of natural quiet" appears inconsistent with both the Park Service's definition of the term and with the premise upon which that definition was based. * * * We must therefore remand this issue for further consideration' (p. 22).

## Clarification of the Term

When used in the definition of substantial restoration of natural quiet, the day means any given day; that is, following the mandate of Public Law 100-91, natural quiet must be substantially restored at GCNP on any given day of the year. As further clarification, to achieve substantial restoration of natural quiet, $50 \%$ or more of the park must achieve "natural quiet" (i.e., no aircraft audible) for 75100 percent of any given day.

Clarification also provides the FAA the guidance from the NPS concerning the appropriate definition of this term and assists in the determination of how to address aircraft noise as discussed in the Department of Transportation/FAA Federal Register Notice of February 27, 2003, Modification of the Dimensions of the Grand Canyon National Park Special Flight Rules Area and Flight Free Zones (Federal Register/Vol. 68, No. 39, pgs. 9496-9498). Clarification of this term will provide a benchmark for the future alternative dispute resolution process between the FAA and NPS.

Significance of using any given day vs. other possible interpretations: Computer modeling of substantial restoration of natural quiet for previous FAA regulations followed FAA procedures and was based upon the number of air tour operations on an "average annual day," as determined by dividing the year's total operations by 365 days. The most recent computer modeling was done as a part of the Supplemental Environmental Assessment (Feb. 2000) accompanying the FAA final rule, "Commercial Air

Tour Limitations in the Grand Canyon National Park Special Flight Rules Area" ( 65 FR 17,708). The modeling used the FAA's Integrated Noise Model (INM) and was based on air tour operations reported for the 12 -month period May 1, 1997 through April 30, 1998. The model indicated that using the "peak day" (any given day) definition, substantial restoration would not occur during the high visitation season, and that restoration of natural quiet would occur in $19 \%$ of the park. In contrast, modeling on the "average annual day" indicated that substantial restoration of natural quiet would occur in $44 \%$ of the park. Thus, when using an "average annual day" standard. substantial restoration of natural quiet would not be achieved during the five summer months and portions of the shoulder seasons'times when the majority of the people visit the park. As the Court observed, "* * * the use of an annual average does not correspond to the experience of the Park's actual visitors. People do not visit the Park on 'average days', nor do they stay long enough to benefit from averaging noise over an entire year. For the typical visitor, who visits the Grand Canyon for just a few days during the peak summer season, the fact that the Park is quiet 'on average' is cold comfort" (p. 21).

In summary, the National Parks Overflights Act of 1987 made clear that the visitors to GCNP are entitled to have the opportunity to experience substantial restoration of natural quiet. The Act did not limit that opportunity to only a portion of the park visitors or a portion of the year. The NPS, in its report to Congress, stated that such restoration would be for the day and, in its "Review of Scientific Basis for Change in Noise Impact Assessment Method * * *’", the NPS further stated that it intended this to be "a threshold not to be exceeded on any given day." Thus, as suggested by the United States Court of Appeals, District of Columbia Circuit, the NPS clarifies the day to mean any given day. On each and every day, visitors to GCNP will have the opportunity to experience natural quiet, that is, $50 \%$ of the park naturally quiet $75-100 \%$ of the time.

Dated: May 15, 2003.

## Notice of Recommendation From the Aircraft Noise Model Validation Study

Agency: National Park Service, Department of Interior. ACTION: Notice.

SUMMARY: Following the recommendation in the recently issued National Park Service Aircraft Noise Model Validation Study, released January 23, 2003, this announcement provides notice that the NOISEMAP Simulation Model is the model of choice for calculating aircraft audibility at Grand Canyon National Park and other National Park Service units.
ADDRESSES: Copies of the National Park Service Aircraft Noise Model Validation Study report are available on computer discs (CDs) and may be requested from Grand Canyon National Park, or viewed on the Grand Canyon National Park Webpage at http://www.nps.gov/grca/ overflights/index.htm.
FOR FURTHER INFORMATION CONTACT: Ken McMullen, Overflights and Natural Soundscape Program Manager, National Park Service, Grand Canyon National Park, 823 N San Francisco Street, Flagstaff, Arizona 86001. Telephone 928-779-2095; or by e-mail at ken_mcmullen@nps.gov.

## SUPPLEMENTARY INFORMATION:

## Background

Public Law 100-91 (1987) tasked the National Park Service (NPS) and the Federal Aviation Administration (FAA) with developing a plan for aircraft use of Grand Canyon airspace that will succeed in "substantially restoring the natural quiet in the park". In its "Report on Effects of Aircraft Overflights on the National Park System" (1995), the NPS defined substantial restoration of natural quiet as occurring when " $50 \%$ or more of the park achieve[s] 'natural quiet' (i.e., no aircraft audible) for 75100 percent of the day". Computer modeling was determined to be the most practical method to assess whether or not natural quiet had been substantially restored at Grand Canyon National Park.

## Model Validation Study

Although models that compute when aircraft are audible over large land areas have not been widely used, two models have been employed to calculate the percent of time aircraft are audible at Grand Canyon National Park. The National Park Service Overflight Decision Support System model (NODSS) was developed for the NPS to
calculate aircraft-produced noise in backcountry settings; NODSS was designed to account for park terrain features, its calculations are based on one-third octave band acoustic spectra information, and it calculates audibility directly. The results from NODSS have been used by the NPS to calculate the percent of substantial restoration of natural quiet achieved by various airspace and operations alternatives at Grand Canyon National Park. A second model, the Integrated Noise Model (INM), version 5.1, is the FAAdeveloped, aircraft noise computation model used internationally to calculate aircraft-produced noise in airport environments. INM bases its computations on A-weighted aircraft sound levels and accounts for differences in site elevation but does not account for shielding due to terrain. Results from INM have been presented in environmental assessments associated with FAA draft and final rules on Grand Canyon National Park airspace regulations. The two models, using Grand Canyon operations data but based on different metrics, produced somewhat different results. To comply with the National Environmental Protection Act's requirement to use "the best available science", a model validation study was designed to compare computer model results with measurements made on-site at the Grand Canyon. A third model, NOISEMAP Simulation Model (NMSIM) developed by Wyle Laboratories, the U.S. Air Force, and the National Aeronautics and Space Administration, was included in this study as was a second version of INM (Research Version). NMSIM, like NODSS, uses spectral information, accounts for park terrain, and computes aircraft audibility. In addition to these capabilities, NMSIM also simulates aircraft flying in the time sequence in which they occurred and includes the directivity of each aircraft type. The Research Version of INM uses spectral, rather than A-weighted, information but is in other major ways similar to INM.

The goal of the study was to:
"Determine the degrees of accuracy and precision that existing computer models provide, in comparison with field measurement, in the calculation of the percent of time tour aircraft are audible in the Canyon. * * *"' In this study, determining "accuracy and precision" is termed "validation".

The NPS Aircraft Noise Model Validation Study was designed through a cooperative process involving the NPS, the FAA, the Volpe National Transportation Systems Center, Wyle Laboratories, and Harris Miller Miller \&

Hansen Inc. After a draft research approach had been developed, a Technical Review Committee (TRC) consisting of internationally recognized experts reviewed and commented on the plan. Suggestions made by TRC members were incorporated into the study design. As results were produced the full team, including TRC members, were involved in review and comment. The full team has reviewed and commented on drafts of the study report. Their comments were incorporated extensively.

Acoustic data for the NPS Aircraft Noise Model Validation Study were collected from some 39 sites at Grand Canyon over a four-day period in September 1999. The collected data were reduced to provide hourly information for modeling tour aircraft audibility and sound levels for each hour of operations, and for then analyzing the results. Each of the four models (NODSS, INM in two versions, and NMSIM) were exercised with the same set of input data. The models were run to produce for each site the hourly values of both the percent of time tour aircraft were audible and the tour aircraft hourly equivalent sound level, $L_{\text {eq. }}$. These values were then compared directly with measured values, site-bysite, hour-by-hour.

In August, 2002, as the NPS Aircraft Noise Model Validation Study report was nearing completion, the United States Court of Appeals, District of Columbia Circuit ((in United States Air Tour Association v. Federal Aviation Administration (Grand Canyon Trust, Intervenors)) declared that the FAA's practice of including only air tour aircraft-produced noise in the calculation of substantial restoration of natural quiet at GCNP should be remanded back to that agency for reconsideration. The Court indicated that noise from all aircraft overflying the park should be included in the noise calculations. Although the NPS Aircraft Noise Model Validation Study was based on data from tour aircraft conducting operations over Grand Canyon National Park, the inclusion of noise from other aircraft sources will not invalidate the results of this study. Similarly, as the models respond to the principles of acoustics and physics, the results of the NPS Aircraft Noise Model Validation Study are applicable to other National Park units.

## Model Validation Study

## Recommendation

The study concluded, "We consider NMSIM to be the model most suited for immediate use in computing percent of
the time tour aircraft are audible" (p. 131).

## Conclusion

Audibility is a fundamental component in the definition and measurement of natural quiet and natural sounds at Grand Canyon National Park and other NPS units. The NPS Aircraft Noise Model Validation study found NMSIM to be the model best suited for computing audibility. Further, the National Environmental Protection Act's requirement for the use of the "best available science" is met with the selection of NMSIM. Therefore, the NPS announces that the NOISEMAP Simulation Model (NMSIM) is the model of choice for calculating aircraft audibility at Grand Canyon National Park and other NPS units.
Dated: June 3, 2003.

## DEPARTMENT OF LABOR

Employment Standards Administration

## Wage and Hour Division

## Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR part 1, appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits
determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wage payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract. work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the Federal Register, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR parts 1 and 5 . Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5 . The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under the Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department.
Further information and selfexplanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., Room S-3014,
Washingion, DC 20210.

## Modification to General Wage Determination Decisions

## General Wage Determination Publication

General Wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage determinations Issued Under the DavisBacon And Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of thee 1,400 Government Depository Libraries across the country.

General wage determinations issued under the Davis-Bacon and related Acts are available electronically at no cost on
the Government Printing Office site at http://uww.access.gpo//davisbacon. They are also available electronically by subscription to the Davis-Bacon Online service (http://davisbacon.fedworld.gov) of the Natiorral Technical Information Service (NTIS) of the U.S. Department of Commerce at 1-800-363-2068. This subscription offers value-added features such as electronic delivery of modified wage decisions directly to the user's desktop, the ability to access prior wage decisions issued during the year, extensive Help desk support, etc.

Hard-copy subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 512-1800.

When ordering hard-copy subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the six separate Volumes, arranged by State. Subscriptions include an annual edition (issued in January or February) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC, this 30th day of October, 2003.
Carl J. Poleskey,
Chief, Branch of Construction Wage Determinations.

Occupational Safety and Health Administration

## National Advisory Committee on Ergonomics, Call for Abstracts

Agency: Occupational Safety and Health Administration (OSHA), Labor.
ACTION: Notice; extension of time to submit abstracts.
summary: On October 6, 2003, OSHA published a notice (68 FR 57713) soliciting abstracts from persons wishing to make presentations at a symposium entitled "Musculoskeletal and Neurovascular Disorders-the State of the Research Regarding Workplace Etiology and Prevention." This symposium is scheduled to be held in conjunction with the fourth meeting of the National Advisory Committee on Ergonomics in January 2004. Abstracts were originally due on November 5, 2003. The Agency has decided to extend the deadline for submission of abstracts. Interested persons are asked to refer to
the original October 6, 2003 notice for details on content and format for abstracts.

DATES: Abstracts are due December 1, 2003. The symposium will take place on January 27, 2004.
addresses: The Symposium will be held in Washington, DC. Submit abstracts to MaryAnn Garrahan, Director, Office of Technical Programs and Coordination Activities, OSHA, U.S. Department of Labor, Room N3655, 200 Constitution Avenue, NW., Washington, DC 20210. Phone: (202) 693-2144; Fax: (202) 693-1644.

## FOR FURTHER INFORMATION CONTACT:

OSHA, Office of Communications, Room N-3647, U.S. Department of Labor, 200 Constitution Avenue, NW. Washington, DC 20210. Phone: (202) 693-1999.
SUPPLEMENTARY INFORMATION: In conjunction with NACE's fourth meeting in January 2004, a symposium is being convened to enable the committee to hear from experts in ergonomics. In its October 6, 2003 Federal Register notice, OSHA provided the public with information on its plans for the symposium, along with detailed materials to help interested persons to submit abstracts for consideration. Abstracts were originally due on November 5, 2003. However, the Agency is now extending the period for submission of abstracts through December 1, 2003.

Rather than repeating all of the relevant information contained in the October 6, 2003 notice, OSHA asks interested persons to refer directly to that notice for guidance in submitting abstracts. The October 6 notice is available on OSHA's Web site at http://www.osha.gov/FedReg_osha_pdf/ FED20031006.pdf.

Authority: This notice was prepared under the direction of John L. Henshaw, Assistant Secretary of Labor for Occupational Safety and Health. It is issued under the Federal Advisory Committee Act (5 U.S.C. App. 2), GSA's FACA Regulations (41 CFR Part 1023), and DLMS 3 Chapter 1600.

Signed at Washington, DC, this 4th day of November, 2003.

## John L. Henshaw,

Assistant Secretary of Labor.

## NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-237 and 50-249]
Dresden Nuclear Power Station, Units 2 and 3; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Exolon Generation Company, LLC (the licensee) to withdraw its December 20, 2002, application for proposed amendment to Facility Operating License Nos. DPR-19 and DPR-25 for the Dresden Nuclear Power Station, Units 2 and 3, located in Grundy County, Illinois.

The proposed amendment would have revised the applicability of facility technical specifications pertaining to Reactor Protection System (RPS) instrumentation, main steam isolation valve closure and turbine condenser vacuum-low functions, to eliminate the requirement for these functions be operable while in Mode 2 with reactor pressure greater than or equal to 600 psig and delete the associated Required Action to align with the revised applicability of these functions.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the Federal Register on March 18, 2003, ( 68 FR 12952). However, by letter dated October 1, 2003, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated December 20, 2002, and the licensee's letter dated October 1, 2003, which withdrew the application for license amendment. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management Systems (ADAMS) Public Electronic Reading Room on the internet at the NRC Web site, http:// www.nrc.gov/reading-rm/adams/html. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC PDR Reference staff by telephone at 1-800-$397-4209$, or $301-415-4737$ or by email to pdr@nrc.gov.
Dated at Rockville, Maryland, this 2nd day of November 2003.

For the Nuclear Regulatory Commission. Maitri Banerjee,
Project Manager, Section 2. Project Directorate III. Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

## NUCLEAR REGULATORY COMMISSION

[Docket No. 40-7580]
Notice of Availability of Environmental
Assessment and Finding of No
Significant Impact for License
Amendment for Fansteel, Inc.-
Muskogee, Oklahoma License No. SMB-911
AGENCY: Nuclear Regulatory
Commission.
ACTION: Notice of availability of
Environmental Assessment and Finding of No Significant lmpact.

FOR FURTHER INFORMATION, CONTACT: James C. Shepherd, Project Manager, Decommissioning Branch. Division of Waste Management, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Mail Stop: T-7F27, Washington. DC 205550001. Telephone: (301) 415-6712: Fax number: (301) 415-5398: E-mail: jcs2@nrc.gov.

## SUPPLEMENTARY INFORMATION:

## I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering the issuance of a license amendment to Material License Number SMB-911. issued to Fansteel, Inc. (the licensee), to authorize decommissioning of its facility located in Muskogee, Oklahoma. NRC has prepared an Environmental Assessment (EA) in accordance with the requirements of 10 CFR part 51 and to determine the environmental impacts of approving the decommissioning plan (DP), subsequent release of the site for unrestricted use (as defined in 10 CFR 20.1402), and termination of the license.

## II. EA Summary

The purpose of the proposed action is to authorize the decommissioning of Fansteel's Speciality Metals facility, in Muskogee, Oklahoma, for unrestricted use to allow for license termination. The Fansteel processing facility produced tantalum and columbium metals for approximately 33 years until operations ceased in 1990. The raw materials used for tantalum and columbium production contain uranium and thorium as naturally ocsurring trace constituents.

The concentration of radioactive species present in the process raw materials is sufficient to cause the ores and slags to be classified by the NRC as source material. Consequently, Fansteel operated under NRC License No. SMB911 for the possession of source material. Fansteel was authorized by the NRC on March 25, 1997, to complete the processing of ore residues, calcium fluoride residues, and wastewater treatment residues containing uranium and thorium, in various site impoundments.
Or July 24, 2003, Fansteel requested that NRC approve the DP for the facility, which when complete, would permit the site to be released for unrestricted use. Final approval for release of the site for unrestricted use and license termination would be contingent upon NRC approval of the licensee's final status survey report and making the findings required by the Commission's regulations following completion of the licensee's decommissioning activities. Fansteel's request for the proposed action was previously noticed in the Federal Register on Àugust 11, 2003 ( 68 FR 47621), along with a notice of an opportunity to request a hearing and an opportunity to provide comments on the action and its environmental impacts.

## III. Finding of No Significant Impact

The staff has prepared the EA in support of the proposed license. amendment to decommission the site, terminate the license, and release the site for unrestricted use. On the basis of the EA, NRC has concluded that there are no significant environmental impacts from the proposed action, and the license amendment does not warrant preparation of an Environmental Impact Statement. It has been determined that a Finding of No Significant Impact (FONSI) is appropriate. The amendment will be issued following the publication of this Notice.

## IV. Further Information

The EA and the documents related to this proposed action, including the application for the license amendment and supporting documentation, are available for inspection at NRC's Public Electronic Reading Room at http:// wnw.nrc.gov/reading-rm.html [ADAMS Accession Nos.: ML030240051, ML030240062. ML030240109, ML030240134, and ML030240432 (Decommissioning Plan); ML032100530 (request for license amendment); ML032100558 (revised
Decommissioning Plan Sections 15.315.5): and ML033040204 (Environmental Assessment, Finding of No Significant Impact). These
documents may also be examined, and/ or copied for a fee, at the NRC Public Document Room (PDR), located at One White Flint North, 11555 Rockville

## Pike, Rockville, MD 20852.

Dated at Rockville, Maryland, this 31st day of October, 2003.
For the Nuclear Regulatory Commission.

## SECURITIES AND EXCHANGE COMMISSION

## Proposed Collection; Comment Request

Upon Written Request. Copies Available From: Securities and Exchange Commission. Office of Filings and Information Services, Washington, DC 20549.

## Extension:

- Rule 17Ad-11; SEC File No. 270-261; OMB Control No. 3235-0274.
Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.), the Securities and Exchange Commission ("Commission") is soliciting comments on the collection of information summarized below. The Commission plans to submit this existing collection of information to the Office of Management and Budget for extension and approval.
Rule 17Ad-11: Reports Regarding Aged Record Differences, Buy-ins, and Failure to Post Certificate Detail to Master Securityholder Files

Rule 17Ad-11 requirės all registered transfer agents to report to issuers and the appropriate regulatory agency in the event that aged record differences exceed certain dollar value thresholds. An aged record difference occurs when an issuer's records do not agree with those of securityowners as indicated, for instance, on certificates presented to the transfer agent for purchase, redemption or transfer. In addition, the rule requires transfer agents to report to the appropriate regulatory agency in the event of a failure to post certificate detail to the master securityholder file within 5 business days of the time required by Rule 17Ad-10. Also, transfer agents must maintain a copy of each report prepared under Rule 17Ad11 for a period of three years following the date of the report. These
recordkeeping requirements assist the

Commission and other regulatory agencies with monitoring transfer agents and ensuring compliance with the rule.

Because the information required by Rule 17Ad-11 is already available to transfer agents, any collection burden for small transfer agents is minimal. The staff estimates that the average number of hours necessary to comply with Rule 17Ad-11 is one hour annually. Based upon past submissions, the total burden is 150 hours annually for transfer agents.

Written comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimates of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

Please direct your written comments to Kenneth A. Fogash, Acting Associate Executive Director/CIO, Office of Information Technology, Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549.

Dated: October 31, 2003.

## SECURITIES AND EXCHANGE COMMISSION

## Proposed Collection; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of Filings and Information Services, Washington, DC 20549.

Extension:
Rule 17Ad-13; SEC File No. 270-263; OMB Control No. 3235-0275.
Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.), the Securities and Exchange Commission
("Commission") is soliciting comments on the collection of information summarized below. The Commission plans to submit this existing collection
of information to the Office of
Management and Budget for extension and approval.

- Rule 17Ad-13 Annual Study and Evaluation of Internal Accounting Control

Rule 17Ad-13 requires approximately 200 registered transfer agents to obtain an annual report on the adequacy of internal accounting controls. In addition, transfer agents must maintain copies of any reports prepared pursuant to Rule 17Ad-13 plus any documents prepared to notify the Commission and appropriate regulatory agencies in the event that the transfer agent is required to take any corrective action. These recordkeeping requirements assist the Commission and other regulatory agencies with monitoring transfer agents and ensuring compliance with the rule. Small transfer agents are exempt from Rule 17Ad-13.

The staff estimates that the average number of hours necessary for each transfer agent to comply with Rule 17Ad-13 is one hundred seventy-five hours annually. The total burden is 35,000 hours annually for transfer agents, based upon past submissions.

Written comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimates of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

Please direct your written comments to Kenneth A. Fogash, Acting Associate Executive Director/CIO, Office of Information Technology, Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549.

## SECURITIES AND EXCHANGE COMMISSION

[Release No. IC-26246; 812-12860]

## Vanguard International Equity Index Funds, et al.; Notice of Application

November 3, 2003.
AGENCY: Securities and Exchange Commission ("Commission") ACTION: Notice of an application for an order under section 6(c) of the Investment Company Act of 1940 (the "Act") for exemptions from sections 2(a)(32), 18(f)(1), 18(i), 22(d), 22(e) and 24(d) of the Act and rule 22c-1 under the Act, and under sections 6(c) and 17(b) of the Act for exemptions from sections 17(a)(1) and (2) of the Act.

SUMMARY OF APPLICATION: Applicants request an order that would permit the following: (a) An open-end management investment company, the series of which consist of the component securities of certain foreign equity securities indices, to issue a class of shares ("VIPER Shares") that can be purchased from the investment company and redeemed only in large aggregations ("Creation Units"); (b) secondary market transactions in VIPER Shares to occur at negotiated prices on a national securities exchange, as defined in section 2(a)(26) of the Act ("Exchange"); (c) dealers to sell VIPER Shares to purchasers in the secondary market unaccompanied by a prospectus when prospectus delivery is not required by the Securities Act of 1933 ("Securities Act"); (d) certain affiliated persons of the series to deposit securities into, and receive securities from, the series in connection with the purchase and redemption of Creation Units; and, (e) the series to pay redemption proceeds, under certain circumstances, more than seven days after the tender of a Creation Unit of VIPER Shares for redemption.
APPLICANTS: Vanguard International Equity Index Funds ("Trust"), The Vanguard Group, Inc. ("VGI"), and Vanguard Marketing Corporation ("VMC").
FILING DATES: The application was filed on July 25, 2002, and amended on October 7, 2003.
hearing or notification of hearing: An order granting the application will be issued unless the Commission orders a hearing. Interested persens may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on November 28, 2003, and
should be accompanied by proof of service on applicants, in the form of an affidavit, or for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.
ADDRESSES: Secretary, Commission, 450 Fifth Street, NW., Washington, DC 20549-0609. Applicants, c/o Barry A. Mendelson, The Vanguard Group, Inc., P.O. Box 2600, Valley Forge, PA 19482.

FOR FURTMER INFORMATION CONTACT:
Stacy L. Fuller, Senior Counsel, or Michael W. Mundt, Senior Special Counsel, at 202-942-0564 (Division of Investment Management, Office of Investment Company Regulation). SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the Commission's Public Reference Branch, 450 Fifth Street, NW., Washington. DC 20549-0102 (telephone 202-942-8090).

## Applicants' Representations

## 1. The Trust is an open-end

 management investment company registered under the Act and organized as a Delaware statutory trust. The Trust currently has three series ("Existing Funds"). Each Existing Fund currently offers separate classes of shares for retail and institutional investors (such classes of shares collectively, "Conventional Shares"). In the future, the Trust or another registered open-end management investment company may offer other series ("Future Funds," and together with Existing Funds, "Funds"). Any Future Fund will (a) be advised by VGI or an entity controlled by or under common control with VGI and (b) comply with the terms and conditions of any order granted pursuant to the application.2. VGI is a Pennsylvania corporation that is wholly and jointly owned by 35 investment companies, and the series thereof (each, a "Vanguard Fund" and collectively, the "Vanguard Fund Complex"). VGI is registered as an investment adviser under the Investment Advisers Act of 1940 and as a transfer agent under the Securities Exchange Act of 1934 ("Exchange Act"). VGI provides each Vanguard Fund, with corporate management, administrative, and transfer agency services at cost. VGI also provides advisory services at cost to certain Vanguard Funds, including each of the Existing Funds. VMC, a wholly owned subsidiary of VGI, is registered as a broker-dealer under the Exchange

Act. VMC provides all distribution and marketing services to the Vanguard Funds, including each of the Existing Funds.
3. Each Existing Fund seeks to track as closely as possible the performance of an international equity securities index (each, a "Target Index"). ${ }^{1}$ In seeking to track their Target Indexes, the Existing Funds use a replication strategy, pursuant to which each Existing Fund holds each of the component securities in the Target Index in about the same proportion as represented in the Target Index itself. Future Funds may use the replication strategy or a representative sampling strategy, pursuant to which they would hold a representative sample of the component securities in the relevant Target Index that resembles the full Target Index in terms of industry weightings, market capitalization, price/earnings ratio, dividend yield and other characteristics. ${ }^{2}$ Applicants state that, measured over virtually any period, the difference between the performance of an Existing Fund and the performance of its Target Index rarely exceeds one percentage point per annum and in almost all cases is significantly less. Applicants expect that, in the future, the Funds will track the relevant Target Indexes with a similar degree of precision, and have a tracking error of less than $5 \%$ per annum. No entity that creates, compiles, sponsors or maintains a Target Index will be an affiliated person. as defined in section 2(a)(3) of the Act, or an affiliated person of an affiliated person, of the Trust, VGI, VMC, or any promoter of the Trust.
4. Applicants state that a small percentage of investors frequently trade in and out of the Existing Funds, often as part of a market timing strategy, and that to meet these investors' redemption requests, a Fund must buy and sell portfolio securities. Applicants state that such purchases and sales of portfolio securities are detrimental in

[^17]that they can increase a Fund's realization of capital gains, increase expenses, and hinder a Fund's ability to achieve its investment objective of tracking the relevant Target Index as closely as possible. Applicants further state that the Existing Funds have adopted policies designed to deter these investors but that such policies have been insufficient.
5. Each Fund proposes to create VIPER (Vanguard Index Participation Equity Receipts) Shares, a class of shares that would be listed on an Exchange and trade in the secondary market at negotiated prices. Applicants state that, by creating an exchangetraded class of shares, the Funds will offer short-term investors an attractive means of investing in the Funds. ${ }^{3}$ Applicants further assert that offering VIPER Shares will benefit holders of Conventional Shares by reducing the portfolio disruption and transaction costs caused by market timing activity.
6. Except in connection with the Conversion Privilege (as defined below) or the liquidation of a Fund (or of the VIPER Share class of a Fund), the Funds will issue VIPER Shares only in Creation Units, aggregations of a specified number of shares ranging from 20,000 to 250,000 shares. The price of a Creation Unit will range from $\$ 500,000$ to $\$ 30,000,000 .^{4}$ Orders to purchase Creation Units must be placed with VMC by or through an "Authorized Participant," which is a Depository Trust Company ("DTC') participant that has executed a participant agreement with VMC. Creation Units will be issued in exchange for an in-kind deposit of securities and cash ("Creation Deposit"). The Creation Deposit will consist of a basket of securities selected by VGI from among the securities contained in the Fund's portfolio ("Deposit Securities"), ${ }^{5}$ and a cash

[^18]payment to equalize any difference between the total aggregate market value of the Deposit Securities and the NAV per Creation Unit of the Fund
("Balancing Amount"). ${ }^{6}$ An investor purchasing a Creation Unit from a Fund will be charged a fee ("Transaction Fee") to prevent any dilution of the interests of remaining shareholders due to the Fund incurring costs in connection with the investor's purchase of the Creation Unit(s). ${ }^{7}$ Each purchaser of a Creation Unit will receive a prospectus for the VIPER Shares (the
"VIPER Prospectus") that discloses the maximum Transaction Fee, and the method of calculating Transaction Fees will be disclosed in the Fund's statement of additional information ("SAI"). A Fund's Conventional Shares will be covered by a separate prospectus (the "Conventional Prospectus").
7. All orders to purchase Creation Units must be received by VMC no later than the closing time of the NYSE on the date the order is placed in order to receive NAV as determined that day. VMC will transmit all purchase orders to the Funds, maintain a record of each Creation Unit purchaser, and send out a VIPER Prospectus and confirmation to such purchasers.
8. The purchaser of a Creation Unit will be able to separate the Creation Unit into individual VIPER Shares. ${ }^{8}$

[^19]VIPER Shares will be listed on an Exchange and traded in the secondary market in the same manner as shares of other exchange-traded funds. One or more Exchange specialists
("Specialists") will be assigned to make a market in the VIPER Shares. The price of VIPER Shares traded on an Exchange will be based on a current bid/offer market, and each VIPER Share is expected to have an initial market value of between $\$ 10$ and $\$ 150$. Transactions involving the sale of VIPER Shares in the secondary market will be subject to customary brokerage commissions and charges.
9. Applicants expect that purchasers of Creation Units will include institutional investors and arbitrageurs. A Specialist, in providing for a fair and orderly secondary market for VIPER Shares, also may purchase Creation Units for use in its market making activities on the Exchange. Applicants expect that secondary market purchasers of VIPER Shares will include both institutional and retail investors. ${ }^{9}$ Applicants believe that arbitrageurs will purchase or redeem Creation Units to take advantage of discrepancies between the VIPER Shares' market price and the VIPER Shares' NAV. Applicants expect that this arbitrage activity will provide a market discipline that will result in a close correspondence between the price at which the VIPER Shares trade and their NAV. Applicants do not expect VIPER Shares to trade at a significant premium or discount to their NAV. ${ }^{10}$
10. Applicants will make available a VIPER Shares product description ("Product Description") for distribution in accordance with an Exchange rule requiring Exchange members and member organizations effecting transactions in VIPER Shares to deliver a Product Description to investors purchasing VIPER Shares, whether on or away from the Exchange. Applicants state that any other Exchange that applies for unlisted trading privileges in

[^20]VIPER Shares will have to adopt a similar rule, requiring delivery of the Product Description. The Product Description will provide a plain English overview of a Fund, including its investment objective and investment strategies, the identity of VGI, the material risks of investing in the Fund, and the composition and frequency of distributions. The Product Description also will provide a brief, plain English description of the salient features of VIPER Shares. The Product Description will advise investors that a VIPER Prospectus and SAI may be obtained, without charge, from the investor's broker or from VMC. The Product Description also will identify a Web site address where investors can obtain information about the composition and compilation methodology of the Target Index. Applicants expect that the number of purchases of VIPER Shares in which an investor will not receive a Product Description will not constitute a significant portion of the market activity in VIPER Shares.
11. Except in connection with the liquidation of a Fund (or of a Fund's VIPER Share class), VIPER Shares will only be redeemable in Creation Unit aggregations through each Fund. An investor redeeming a Creation Unit generally will receive (a) a basket of securities ("Redemption Securities"), which in most cases will be the same as the Deposit Securities required of investors purchasing Creation Units on the same day, and (b) a cash amount equal to the difference in the value of the Redemption Securities and the NAV of a Creation Unit, which in most cases will be the same as the Balancing Amount paid (or received) by investors purchasing Creation Units on the same day. A Fund may make redemptions partly or wholly in cash in lieu of transferring one or more Redemption Securities to a redeeming investor, if the Fund determines that such alternative is warranted. The Fund may make such a determination if, for example, a foreign country's regulations restrict or prohibit a redeeming investor from holding a particular issuer's securities. In order to cover the Fund's transaction costs, redeeming investors will pay a Transaction Fee. ${ }^{11}$
12. The Funds intend to offer holders of Conventional Shares (except those holding Conventional Shares through a $401(\mathrm{k})$ or other participant-directed employer-sponsored retirement plan) the opportunity to exchange some or all of those shares for the Fund's VIPER

[^21]Shares ("Conversion Privilege"). ${ }^{12}$ A Fund would not offer holders of VIPER Shares the opportunity to exchange some or all of their shares for
Conventional Shares. ${ }^{13}$ Applicants state that the Conversion Privilege would facilitate the movement of investors, who currently hold Conventional Shares but desire intraday trading flexibility, out of Conventional Shares and into VIPER Shares in an expeditious and tax efficient manner. ${ }^{14}$ Around the time that a Fund's VIPER Shares begin trading, VGI may send to existing holders of the Fund's Conventional Shares a notice describing the Conversion Privilege and explaining the process by which an investor may exchange his or her Conventional Shares for VIPER Shares. The notice will comply with section 10(b) of the Securities Act and rule 482 under the Securities Act. Comparable information about a Fund's Conversion Privilege also will be contained in a separate section of the Conventional Prospectus. To effect an exchange through the Conversion Privilege, the investor must have a brokerage account and must contact his or her broker to initiate the exchange. The investor will receive a VIPER Prospectus in connection with the exchange transaction, as required by the Securities Act. Subsequent to the exchange, the investor will have to contact his or her broker for account information relating to the VIPER Share holdings.

## Applicants' Legal Analysis

1. Applicants request an order under section 6(c) of the Act for exemptions from sections 2(a)(32), 18(f)(1), 18(i),
[^22]22(d), 22(e) and 24(d) of the Act and rule 22c-1 under the Act; and under sections 6(c) and 17(b) of the Act for exemptions from sections 17(a)(1) and (2) of the Act.
2. Section 6(c) of the Act provides that the Commission may exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision or provisions of the Act, or any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

## Section 2(a)(32) of the Act

3. Section 2(a)(32) of the Act defines "redeemable security" as any security, other than short-term paper, under the terms of which the holder, upon its presentation to the issuer, is entitled to receive approximately his proportionate share of the issuer's current net assets, or the cash equivalent. Applicants request an order under section 6(c) to permit VIPER Shares to be redeemed in Creation Units only. Applicants note that because of the arbitrage possibilities created by the redeemability of Creation Units, it is expected that the market price of a VIPER Share will not vary much from its NAV.

## Section $18(f)(1)$ and $18(i)$ of the Act

4. Section 18(f)(1) of the Act, in relevant part, prohibits a registered open-end company from issuing any class of "senior security," which is defined in section $18(\mathrm{~g})$ to include any stock of a class having a priority over any other class as to the distribution of assets or payment of dividends. Section 18(i) of the Act requires that every share of stock issued by a registered management company be voting stock, with the same voting rights as every other outstanding voting stock. Rule $18 \mathrm{f}-3$ permits an open-end fund to issue multiple classes of shares representing interests in the same portfolio without seeking exemptive relief from section $18(f)(1)$ and 18(i), provided that the fund complies with certain requirements. Applicants state that they will comply in all respects with rule $18 \mathrm{f}-3$, except the requirements that (a) each class have the same rights and obligations as each other class (other than the differences allowed by the rule), and (b) if a class has a different distribution arrangement, the class must pay all of the expenses of the arrangement. Because applicants, therefore, may not rely on rule $18 \mathrm{f}-3$, they request an exemption under
section $6(\mathrm{c})$ from sections $18(\mathrm{f})(1)$ and 18(i).
5. Applicants state that there are three ways in which the Conventional Shares and VIPER Shares of each Fund will have different rights: (a) Conventional Shares will be individually redeemable, while VIPER Shares will be redeemable in Creation Units only; (b) VIPER Shares will be traded on an Exchange, while Conventional Shares will not; and (c) Conventional Shares may be exchanged for VIPER Shares through the Conversion Privilege, while VIPER Shares may not be exchanged for Conventional Shares. Applicants assert that these different rights are necessary if their proposal is to have the desired benefits. Applicants note that a Fund's VIPER Shares will be tradable on an Exchange and redeemable only in large aggregations, and that its Conventional Shares will be exchangeable for VIPER Shares in order to encourage short-term investors to conduct their trading activities in a way that does not disrupt the management of the Fund's portfolio. Applicants assert that there is no reason to make Conventional Shares tradable and that it would be counterproductive to facilitate the ability of market timers to disrupt a Fund by making VIPER Shàres individually redeemable or exchangeable for Conventional Shares.
6. Applicants assert that the different rights do not implicate the concerns underlying section 18 of the Act, including conflicts of interest and investor confusion. With respect to the potential for investor confusion, applicants will take a variety of steps to ensure that investors understand the key differences between Conventional Shares and VIPER Shares. Applicants state that the VIPER Shares will not be marketed as a mutual fund investment. Marketing materials may refer to VIPER Shares as an interest in an investment company or fund, but will not make reference to an "open-end fund" or "mutual fund," except to compare or contrast the VIPER Shares with the shares of a conventional open-end management investment company. Any marketing or advertising materials addressed primarily to prospective investors will emphasize that (a) VIPER Shares are not redeemable from a Fund other than in Creation Units, (b) VIPER Shares, other than in Creation Units, may be sold only through a broker, and the shareholder may have to pay brokerage commissions in connection with the sale, and (c) a selling shareholder may receive less than NAV in connection with the sale of VIPER Shares. The same type of disclosure will be provided in the Conventional Prospectus, VIPER Prospectus, Product

Description, SAI and reports to shareholders. Applicants also note that (a) all references to a Fund's exchangetraded class of shares will use a form of the name "VIPERS" rather than the Fund name, (b) the cover and summary page of the VIPER Prospectus will state that the VIPER Shares are listed on an Exchange and are not individually redeemable, (c) VMC will only market Conventional Shares and VIPER Shares in the same advertisement or marketing material when the advertisement or marketing material contains appropriate disclosure explaining the relevant features of each class of shares and highlighting the differences between the share classes, and (d) applicants have prepared educational materials describing the VIPER Shares.
7. Applicants currently allocate distribution expenses among funds in the Vanguard Fund Complex according to a cost-sharing formula approved by the Commission in 1981 as part of an order allowing the Vanguard Fund Complex to internalize its distribution services (" 1981 Order"). ${ }^{15}$ For those funds in the Vanguard Fund Complex offering multiple classes of shares, applicants apply the formula in the 1981 Order by treating each class as a separate fund ("Multi-Class Distribution Formula").
8. Applicants propose to apply the Multi-Class Distribution Formula to each Fund's class of VIPER Shares. Applicants acknowledge that, because VIPER Shares may have a distribution arrangement that differs from that for Conventional Shares, the proposed allocation method is inconsistent with rule 18f-3. Applicants contend, however, that the Multi-Class Distribution Formula is a fundamental feature of Vanguard's unique, internallymanaged structure, and that the proposed allocation method is consistent with the method approved by the Commission in the 1981 Order. The Multi-Class Distribution Formula has been approved by the board of trustees ("Board") of each Fund, and the Board of each Fund, including a majority of

[^23]the trustees who are not interested persons, as defined in section 2(a)(19) of the Act ("Disinterested Trustees"), will review the application of the MultiClass Distribution Formula on an annual basis and determine that the proposed allocation is in the best interests of each class of shareholders and of the Fund as a whole.
Section 22(d) of the Act and Rule 22c1 under the Act
9. Section 22(d), among other things, prohibits a dealer from selling a redeemable security that is currently being offered to the public by or through an underwriter, except at a current public offering price described in the prospectus. Rule 22c-1 generally requires that a dealer selling, redeeming, or repurchasing a redeemable security do so only at a price based on its NAV. Applicants state that secondary market trading in VIPER Shares will take place at negotiated prices, not at a current offering price described in the VIPER Prospectus, and not at a price based on NAV. Thus, purchases and sales of VIPER Shares in the secondary market will not comply with section 22(d) and rule 22c-1. Accordingly, applicants request exemptions from these provisions under section 6(c) of the Act.
10. Applicants assert that the sale of VIPER Shares at negotiated prices does not present the opportunity for any of the abuses that section 22(d) and rule $22 \mathrm{c}-1$ were designed to prevent. Applicants maintain that while there is little legislative history regarding section 22(d), its provisions, as well as those of rule $22 \mathrm{c}-1$, appear to have been designed to (a) prevent dilution caused by certain riskless trading schemes by principal underwriters and contract dealers, (b) prevent unjust discrimination or preferential treatment among buyers resulting from sales at different prices, and (c) ensure an orderly distribution of investment company shares by eliminating price competition from dealers offering shares at less than the published sales price and repurchasing shares at more than the published redemption price. Applicants state that secondary market trading in VIPER Shares would not cause dilution for existing Fund shareholders because such transactions would not directly or indirectly affect the Fund's assets. A pplicants further state that secondary market trading in VIPER Shares would not lead to discrimination or preferential treatment among purchasers because, to the extent that different prices exist during a given trading day or from day to day, these variances will occur as a result of market forces. Finally, applicants
contend that the proposed distribution system will be orderly because, among other things, arbitrage activity will ensure that the difference between the market price of VIPER Shares and their NAV remains narrow.

## Section 22(e) of the Act

11. Section 22(e) generally prohibits a registered investment company from suspending the right of redemption or postponing the date of payment of redemption proceeds for more than seven days after the tender of a security for redemption. The principal reason for the requested exemption is that settlement of redemptions for the Funds is contingent not only on the settlement cycle of the United States market, but also on currently practicable delivery cycles in local markets for underlying foreign securities held by the Funds. Applicants state that local market delivery cycles for transferring certain foreign securities to investors redeeming Creation Units of VIPER Shares, together with local market holiday schedules, will under certain circumstances require a delivery process in excess of seven calendar days for the Funds. Applicants request relief under section 6(c) of the Act from section 22(e) to allow the Funds to pay redemption proceeds up to 12 calendar days after the tender of VIPER Shares for redemption. At all other times and except as disclosed in the relevant SAI, applicants expect that each Fund will be able to deliver redemption proceeds within seven days. ${ }^{16}$ With respect to Future Funds, applicants seek the same relief from section 22(e) only to the extent that circumstances similar to those described in the application exist.
12. Applicants state that section 22 (e) was designed to prevent unreasonable, undisclosed and unforeseen delays in the payment of redemption proceeds. Applicants assert that their requested relief will not lead to the problems that section 22(e) was designed to prevent. Applicants state that the SAI for each Fund will disclose those local holidays (over the period of at least one year following the date of the SAI), if any, that are expected to prevent the delivery of redemption proceeds in seven calendar days, and the maximum number of days needed to deliver the proceeds for the Fund.
[^24]Section 24(d) of the Act
13. Section 24(d) provides, in relevant part, that the prospectus delivery exemption provided to dealer transactions by section $4(3)$ of the Securities Act does not apply to transactions in a redeemable security issued by an open-end investment company. Applicants request an exemption under section 6(c) of the Act from section 24(d) to permit dealers selling VIPER Shares to rely on the prospectus delivery exemption provided by section 4(3) of the Securities Act. ${ }^{17}$
14. Applicants state that VIPER Shares will be listed on an Exchange and will be traded in a manner similar to other equity securities, including the shares of closed-end investment companies. Applicants note that dealers selling shares of closed-end investment companies in the secondary market generally are not required to deliver a prospectus to the purchaser. Applicants contend that VIPER Shares, as a listed security, merit similar treatment, reducing compliance costs and regulatory burdens that result from the imposition of a prospectus delivery requirement on secondary market transactions. Applicants state that because VIPER Shares will be exchangelisted, prospective investors will have access to several types of market information about the VIPER Shares. Applicants state that information regarding market price and volume will be continually available on a real-time basis throughout the day on brokers' computer screens and other electronic services. The previous day's price and volume information also will be published daily in the financial section of newspapers.
15. Applicants further state that investors that purchase VIPER Shares in the secondary market will receive a Product Description, describing the Fund and its VIPER Shares. Applicants state that, while not intended as a substitute for a prospectus, the Product Description will contain information about VIPER Shares that is tailored to meet the needs of investors purchasing VIPER Shares in the secondary market.

## Sections 17(a)(1) and (2) of the Act

16. Sections 17 (a)(1) and (2) generally prohibit an affiliated person of a registered investment company, or an affiliated person of an affiliated person, acting as principal, from selling any

[^25]security to, or purchasing any security from, the company. Sections $2(a)(3)(A)$ and $(C)$ of the Act define "affiliated person," respectively, as any person who owns $5 \%$ or more of an issuer's outstanding voting securities and any person who controls the fund. Section 2(a)(9) of the Act provides that a control relationship will be presumed where one person owns $25 \%$ or more of another person's voting securities. Applicants state that a large institutional investor or the Specialist could own $5 \%$ or more, or more than $25 \%$, of a Fund's outstanding voting securities and, as a result, be deemed to be an affiliated person of the Fund under section $2(a)(3)(A)$ or $(C)$. Applicants further state that, because purchases and redemptions of Creation Units would be in-kind, rather than for cash, those investors would be precluded by sections 17 (a)(1) and (2) from purchasing or redeeming Creation Units from the Fund. Accordingly, applicants request an exemption under sections 6(c) and 17 (b) of the Act to permit these affiliated persons, and affiliated persons of such affiliated persons who are not otherwise affiliated with the Fund, to purchase and redeem Creation Units through in-kind transactions.
17. Section 17(b) of the Act authorizes the Commission to exempt a proposed transaction from section 17 (a) if evidence establishes that the terms of the transaction, including the consideration to be paid or received, are reasonable and fair and do not involve overreaching, and the proposed transaction is consistent with the policies of the registered investment company involved and the general purposes of the Act. Applicants contend that no useful purpose would be served by prohibiting persons affiliated with a Fund, as described above, from purchasing or redeeming Creation Units from the Fund. Applicants represent that Fund affiliates making in-kind purchases and redemptions would be treated no differently from non-affiliates making the same types of transactions. Applicants state that all purchases and redemptions of Creation Units would be at the Fund's next calculated NAV. Applicants also state that, in all cases, Deposit Securities and Redemption Securities will be valued in the same manner and using the same standards as those securities are valued for purposes of calculating the Fund's NAV. Applicants assert that, for these reasons, the requested relief meets the standards of sections 6 (c) and 17 (b).

## Applicants' Conditions

Applicants agree that the order granting the requested relief will be subject to the following conditions:

1. No Future Fund will issue a class of VIPER Shares unless (a) applicants have requested and received with respect to such Future Fund either exemptive relief from the Commission or a no-action letter from the Division of Investment Management of the Commission, or (b) the Future Fund's VIPER Shares will be listed on an Exchange without the need for a filing pursuant to rule 19b-4 under the Exchange Act.
2. The VIPER Prospectus and the Product Description for each Fund will clearly disclose that, for purposes of the Act, VIPER Shares are issued by the Fund and the acquisition of VIPER Shares by investment companies is subject to the restrictions of section 12(d)(1) of the Act.
3. As long as a Fund operates in reliance on the requested order, the VIPER Shares will be listed on an Exchange.
4. The VIPER Shares of a Fund will not be advertised or marketed as shares of an open-end investment company or mutual fund. The VIPER Prospectus of each Fund will prominently disclose that VIPER Shares are not individually redeemable and will disclose that holders of VIPER Shares may acquire the shares from the Fund and tender the shares for redemption to the Fund in Creation Units only. Any advertising material that describes the purchase or sale of Creation Units or refers to redeemability will prominently disclose that VIPER Shares are not individually redeemable and that holders of VIPER Shares may acquire the shares from the Fund and tender the shares for redemption to the Fund in Creation Units only.
5. Before a Fund may rely on the order, the Commission will have approved pursuant to rule $19 \mathrm{~b}-4$ under the Exchange Act, an Exchange rule requiring Exchange members and member organizations effecting transactions in VIPER Shares to deliver a Product Description to purchasers of VIPER Shares.
6. On an annual basis the Board of each Fund, including a majority of Disinterested Trustees, must determine, for each Fund, that the allocation of distribution expenses among the classes of Conventional Shares and VIPER Shares in accordance with the MultiClass Distribution Formula is in the best interests of each class and of the Fund as a whole. Each Fund will preserve for a period of not less than six years from
the date of a Board determination, the first two years in an easily accessible place, a record of the determination and the basis and information upon which the determination was made. This record will be subject to examination by the Commission and its staff.
7. For six years following the issuance of a Fund's VIPER Shares, the Fund will (a) record and preserve any investor complaints or reports of confusion concerning the Conversion Privilege that are communicated to the Fund, VGI and/or VMC and (b) record data tracking the number of investors that, after VIPER Shares are offered, purchase the Fund's Conventional Shares and, within 90 days, convert those shares into VIPER Shares. The Fund will preserve this information in an easily accessible place, and the information will be subject to examination by the Commission and its staff.
8. Applicants' Web site, which is and will be publicly accessible at no charge, will contain the following information, on a per VIPER Share basis, for each Fund: (a) The prior business day's closing NAV and the midpoint of the bid-asked spread at the time the Fund's NAV is calculated ("Bid-Asked Price") and a calculation of the premium or discount of the Bid-Asked Price in relation to the closing NAV; and (b) data for a period covering at least the four previous calendar quarters (or the life of a Fund, if shorter) indicating how frequently each Fund's VIPER Shares traded at a premium or discount to NAV based on the Bid-Asked Price and closing NAV, and the magnitude of such premiums and discounts. In addition, the Product Description for each Fund will state that applicants' Web site has information about the premiums and discounts at which the Fund's VIPER Shares have traded.
9. The VIPER Prospectus and annual report will include, for each Fund: (a) The information listed in condition 8(b), (i) in the case of the VIPER Prospectus, for the most recently completed calendar year (and the most recently completed quarter or quarters, as applicable), and (ii) in the case of the annual report, for no less than the immediately preceding five fiscal years (or the life of the Fund, if shorter); and (b) the cumulative total return and the average annual total return for one, five and ten year periods (or the life of the Fund, if shorter) of (i) a VIPER Share based on NAV and Bid-Asked Price and (ii) the Fund's Target Index.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-48740; File No. SR-Amex-2002-09]
Self-Regulatory Organizations; Order Approving a Proposed Rule Change and Amendments No. 1 through 11 thereto by the American Stock Exchange LLC Relating to Registered Options Traders Use of the Electronic Entry Device

## November 3, 2003.

## I. Introduction

On February 12, 2002, the American Stock Exchange LLC ("Amex" or "Exchange") filed with the Securities and Exchange Commission
("Commission" or "SEC'), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") ${ }^{1}$ and Rule 19b-4 thereunder, ${ }^{2}$ a proposed rule change relating to registered options traders use of the electronic entry device. The Exchange submitted Amendments No. 1, 2, 3, 4, 5, 6, 7, 83 $9,{ }^{4} 10,5$ and $11^{6}$ on February 25, 2002,

[^26]May 6, 2002, May 29, 2002, June 18, 2002, July 17, 2002, September 16, 2002, January 21, 2003, July 15, 2003, July 25, 2003, August 26, 2003, and September 12,2003 , respectively. The proposed rule change and Amendments No. 1 through 11 were published for comment in the Federal Register on September 25, 2003. ${ }^{7}$ The Commission received no comments on the proposal. This order approves the proposed rule change and Amendments No. 1 through 11.

## II. Description of the Proposed Rule Change

Given the number of series traded for each option class and the necessity for the re-calculating and re-quoting of each series in response to changes in the price of the underlying security, the Exchange developed an automated quotation updating system known as XTOPS. The specialist and registered options traders rely upon XTOPS to calculate and disseminate a single immediately updated quotation for each option series. XTOPS uses option valuation formulas (such as the BlackScholes Model) to generate options quotations based on a number of variables. ${ }^{8}$ It is the specialist's responsibility to determine for each option class the variables used in the XTOPS formula. However, the quotations generated and displayed by XTOPS may result in firm quote obligations of both the specialist and registered options traders to buy or sell options at quoted prices and sizes. ${ }^{9}$ The dissemination of an XTOPS quote can be overridden when a customer limit order represents the best bid or offer or when a registered options trader chooses on a series-by-series basis to better the disseminated bid or offer.

The Exchange is now proposing new Commentary . 04 to Amex Rule 933, to allow registered options traders' direct access to the Electronic Entry Device ("EE Device") to input their own quotes for dissemination as the best bid or offer. ${ }^{10}$ The EE Device would be

[^27]available for registered options traders to use in all option classes traded on the Exchange. ${ }^{11}$ In active option classes where there is currently an Exchangeemployed systems clerk, registered options traders would either input their own quotes or instruct a systems clerk to do so on their behalf. Only registered options traders physically located in the trading crowd would be permitted to directly input quotes into the EE Device or give such instructions to a systems clerk.

Once the registered options trader or systems clerk inputs the quote into the EE Device, the proposed rule would require that: (i) The price improving registered options trader announce loudly and audibly in the crowd that he has improved the dispiayed market to ensure that other crowd participants are aware that the market has been improved, enabling other crowd participants to also quote competitively; and (ii) the specialist be specifically alerted so that a "book bid or offer" indicator is activated and the next otherwise Auto-Ex eligible trade is routed directly to the Amex Options Display Book ("AODB") for allocation to the registered options trader that caused the improved quote to be disseminated. In addition to blocking an otherwise eligible Auto-Ex order from being executed and allocated by the Auto-Ex system, activation of the "book bid or offer" indicator would block an XTOPS calculated quote that is worse than the registered options trader's disseminated quote from being disseminated. Activation would not, however, block a quote that is better than the registered options trader's disseminated quote from being disseminated.

Once an execution occurs and/or the price improving registered options trader is no longer entitled to priority, the specialist would be required to remove the "best bid or offer" indicator so that Auto-Ex eligible orders would again be sent to Auto-Ex and the

[^28]dissemination of XTOPS calculated quotes is resumed. The EE Device would not automatically decrement the size of the disseminated quote when an execution occurs. The quote would be required to be manually adjusted to reflect any revision to the disseminated size.

The price improving registered options trader would be permitted to cancel his quote at any time prior to the execution of a trade through the use of the EE Device (regardless of whether inputted by the registered options trader or the systems clerk), if that was the method in which the quote was entered, or through the specialist, if that was the method chosen. The registered options trader would be required also to alert the specialist that he is removing his quote, so the specialist can in turn remove the "book bid or offer" indicator in XTOPS, and announce loudly and audibly that he is canceling his quote.

Pursuant to the requirements of the Quote Rule and Exchange Rule 958A, the registered options trader as the responsible broker or dealer is obligated to execute any customer order at his bid or offer up to the disseminated size. To be relieved of that obligation with respect to a specific quote, one of the exceptions to the Quote Rule must apply, which generally provide that the responsible broker or dealer must communicate a revised quotation to the Exchange prior to the presentation of an order. Thus, a registered options trader using the EE Device to disseminate quotes would continue to be obligated pursuant to the Quote Rule until he has communicated a revised quote to the Exchange through the removal or cancellation of the quote on the EE Device.

Registered options traders would be required to improve the best bid or offer by an amount equal to at least the minimum price variation as set forth in Exchange Rule 952 for the quote to be inputted into the EE Device. The minimum size quote that could be inputted into the EE Device by or on behalf of a registered options trader would be 20 contracts, unless the AutoEx eligible size parameter for that option class is less than 20 contracts. in which case the minimum quote size would be the same as the lesser Auto-Ex eligible size parameter for that option class. Currently, the EE Device disseminates a default size for each new quote. The disseminated size may be set at a higher or lower amount or increased by the specialist to reflect additional liquidity at that quote. The default size would be set at the minimum quote size as discussed above.

The Exchange represents that there is at least one EE Device unit at every trading post and multiple units at posts where active option classes trade and that the number of devices currently in place on the trading floor would be sufficient to provide registered options traders with ready and easy access to a means for disseminating their quotes. However, since this is a new use for the EE Device, the Exchange represents that it will monitor the uses of the EE Device by registered options traders and activity in the option classes at each trading post and will add additional devices when necessary. The Exchange is able to install additional EE Devices at the trading posts with, preferably, a one-day notice so that they can be installed either before or after trading hours.

The specialist in a given option class may also disseminate or cause to be disseminated his own individual, price improving quote separate from the XTOPS calculated quote, provided he is physically located at the trading post at the time he inputs his quote, has only disseminated one quote per series on the same side of the market, has announced loudly and audibly to the crowd that he has improved the disseminated bid or offer, has improved the best bid or offer by an amount equal to at least the minimum price variation set forth in Rule 952, and has disseminated the minimum quote size. The specialist would not be able to use the EE Device to disseminate his individual price improving quote since he already has the means to input a quote into the Market Data System through XTOPS in the same manner used today to disseminate a customer limit order. Once the specialist has caused his individual quote to be disseminated, he will activate the "book bid or offer" indicator and the next otherwise Auto-Ex eligible trade is routed directly to the AODB for allocation to the specialist.
The specialist would be required to use best efforts to attempt to ensure that the registered option trader responsible for disseminating the best bid or offer receives an allocation of the next incoming order for the amount he is entitled to pursuant to Exchange rules. A specialist who failed to use best efforts to attempt to ensure that the next Auto-Ex execution is appropriately allocated to the price improving registered options trader would be fined pursuant Amex Rule $590(\mathrm{~g})$ of the Exchange's Minor Rule Violation Fine System. In addition to the fine assessed pursuant to the Minor Floor Violation Fine System, violations of this provision would require the payment of
restitution. Restitution would be calculated by multiplying the number of contracts that should have been allocated to the price-improving registered options trader by the number of underlying shares represented by each contract, which would then be multiplied by half of the spread between the option's bid and offer at the time the order was executed.

If more than one registered options trader and/or the specialist has disseminated or caused to be disseminated the same price improving quote, priority would be established for the registered options traders in the order in which the quotes were announced loudly and audibly to the trading crowd. If, however, the sequence in which the disseminated quotes were made cannot be reasonably determined, priority would be afforded to the price improving registered options traders and/or specialist as a group. Exchange Rule 950(d), Commentary . 06 and Exchange Rule 950(n), Commentary .03 govern allocations of contracts when more than one registered options trader and/or the specialist has disseminated the same price improving quote and time priority cannot be established.

However, pursuant to the proposed rule change, the price improving registered options traders' quote would retain priority until one of the following occurs: (i) Auto-Ex execution depleted the disseminated size; (ii) an amount equal to the minimum quote size has been allocated; (iii) the registered options trader withdraws the quote; (iv) the quote is matched or improved by the specialist's automated quotation system quote, provided specialists using an Exchange-approved proprietary automated quotation updating system have not programmed the system to immediately match or improve the price improving registered options trader's quote; ( $v$ ) the quote is improved by another registered options trader; or (vi) the market is improved by an order placed on the limit order display book. With respect to subparagraph (iv) above, the Exchange represents that it will monitor the use of proprietary automated quotation updating systems through the review of complaints from members in the trading crowd as well as observations of Floor Officials and Exchange personnel to determine if the system has been programmed to immediately match or improve the price improving registered options trader's quote.

The Exchange notes that Exchange rules regarding customer priority and parity would continue to apply to the allocation of trades pursuant to the proposed rule change. Exchange Rule

111, Commentary 07 provides that a registered options trader, when establishing or increasing a position, may not retain priority over or have parity with an off-Floor order. Thus, only registered options traders closing or decreasing a position may be on parity with a customer order.

## III. Discussion

After careful review, the Commission finds that the proposed rule change, as amended, is consistent with the Act and the rules and regulations promulgated thereunder applicable to a national securities exchange and, in particular, with the requirements of Section 6(b) of the Act. ${ }^{12}$ Specifically, the Commission finds that approval of the proposed rule change, as amended, is consistent with Section 6(b)(5) of the Act ${ }^{13}$ in that it is designed to facilitate transactions in securities; to prevent fraudulent and manipulative acts and practices; to promote just and equitable principles of trade; to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities; to remove impediments to and perfect the mechanism of a free and open market and a national market system; and in general, to protect investors and the public interest.

The Cominission believes that the proposed rule change, by permitting registered options traders to use an EE Device at the trading post to input their own quotes for dissemination as the best bid or offer and then providing price improving registered options traders with an allocation of the next Auto-Ex execution, should help to encourage competitive quoting. In addition, the Commission believes that providing a method for specialists to input their own price improving quotes separate from the autoquote, and then routing the next otherwise Auto-Ex eligible order to the AODB for allocation to the specialist, should provide an additional incentive for specialists to quote competitively. The Commission believes that the proposal is an important first step towards achieving compliance with the Order's directive to substantially enhance incentives to quote competitively and substantially reduce disincentives for market participants to act competitively.

The Commission notes that the proposal requires the specialist to use best efforts to ensure that a price

[^29]improving registered options trader receives his allocation. The Commission believes that imposition of a fine, under the Exchange's Minor Rule Violation Plan, on a specialist who fails to use best efforts to ensure that the next AutoEx execution is appropriately allocated, as well as the requirement that such specialist pay restitution to the injured registered options trader, should provide sufficient safeguards to help ensure that the manual allocation to the appropriate registered options trader occurs.

## IV. Conclusion

For the foregoing reasons, the Commission finds that the proposed rule change, as amended, is consistent with the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, with Section 6(b)(5) of the Act. ${ }^{14}$

It is therefore ordered, pursuant to Section $19(\mathrm{~b})(2)$ of the Act, ${ }^{15}$ that the proposed rule change (SR-Amex-200209) and Amendments No. 1 through 11 are approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority. ${ }^{16}$
Jill M. Peterson,
Assistant Secretary.

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-48733; File No. SR-BSE-2003-16]

Self-Regulatory Organizations; Notice of Filing of a Proposed Rule Change and Amendment Nos. 1 and 2 Thereto and Order Granting Accelerated Approval to a Proposed Rule Change and Amendment Nos. 1 and 2 Thereto by the Boston Stock Exchange, Inc. Relating to Shareholder Approval of Equity Compensation Plans

## October 31, 2003.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), ${ }^{1}$ and Rule 19b-4 thereunder, ${ }^{2}$ notice is hereby given that on September 15, 2003, the Boston Stock Exchange, Inc. ("BSE" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described

[^30]in Items I and II below, which Items have been prepared by the Exchange. On October 2, 2003, the Exchange filed Amendment No. 1 to the proposed rule change. ${ }^{3}$ On October 29, 2003, the Exchange filed Amendment No. 2 to the proposed rule change. ${ }^{4}$ The Commission is publishing this notice to solicit comments on the proposed rule change, as amended, from interested persons and is approving the proposal, as amended, on an accelerated basis.

## I. Self-Regulatory Organization's

Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is proposing to adopt a new section entitled "Equity Compensation Plans" in Chapter XXVII Listed Securities-Requirements, regarding shareholder approval of equity compensation plans and to amend its rules related to the voting of proxies.

Below is the text of the proposed rule change, as amended. ${ }^{5}$ Proposed new language is italicized; proposed deleted language is [bracketed].

## Chapter XXXVI: Proxies

Secs. 1-2, no change.
Sec. 3(a)-(d), no change.
Proxy Voting on Equity Compensation Plans
(e) A member organization may not give a proxy to vote without instructions from beneficial owners when the matter to be voted upon authorizes the implementation of any equity compensation plan, or any material revision to the terms of any existing. equity compensation plan (whether or not stockholder approval of such plan is required by Chapter XXVII, Listed Securities, Equity Compensation Plans, of these Rules).
Secs. 4-6, no change.

[^31]
## Chapter XXVII: Listed SecuritiesRequirements

## Equity Compensation Plans

Shareholders must be given the opportunity to vote on all equitycompensation plans and material revisions thereto, with limited exemptions explained below.

Equity-compensation plans can help align shareholder and management interests, and equity-based awards are often very iinportant components of employee compensation. To provide checks and balances on the potential dilution resulting from the process of earmarking shares to be used for equitybased awards, the Exchange requires that all equity-compensation plans, and any material revisions to the terms of such plans, be subject to shareholder approval, with the limited exemptions explained below.
Definition of Equity-Compensation Plan
An "equity-compensation plan" is a plan or other arrangement that provides for the delivery of equity securities (either newly issued or treasury shares) of the listed company to any employee, director or other service provider as compensation for services. Even a compensatory grant of options or other equity securities that is not made under a plan is, nonetheless, an "equitycompensation plan" for these purposes. However, the following are not "equity-compensation plans" even if the brokerage and other costs of the plan are paid for by the listed company:

- Plans that are made available to shareholders generally, such as a typical dividend reinvestment plan.
- Plans that merely allow employees, directors or other service providers to elect to buy shares on the open market or from the listed company for their current fair market value, regardless of whether:
- The shares are delivered immediately or on a deferred basis; or
- The payments for the shares are made directly or by giving up compensation that is otherwise due (for example, through payroll deductions).

## Material Revisions

A 'material revision" of an equitycompensation plan includes (but is not limited to), the following:

- A material increase in the number of shares available under the plan (other than an increase solely to reflect a reorganization, stock split, merger, spinoff or similar transaction).
- If a plan contains a formula for automatic increases in the shares available (sometimes called an
"evergreen formula") or for automatic grants pursuant to a formula, each such increase or grant will be considered a revision requiring shareholder approval unless the plan has a term of not inore than ten years.

This type of plan (regardless of its term) is referred to below as a "formula plan." Examples of automatic grants pursuant to a formula are (1) annual grants to directors of restricted stock having a certain dollar value, and (2) "matching contributions," whereby stock is credited to a participant's account based upon the amount of compensation the participant elects to defer.

- If a plan contains no limit on the number of shares available and is not a forinula plan, then each grant under the plan will require separate shareholder approval regardless of whether the plan has a term of not more than ten years.

This type of plan is referred to below as a "discretionary plan." A requirement that grants be made out of treasury shares or repurchased shares will not, in itself, be considered a limit or pre-established formula so as to prevent a plan from being considered a discretionary plan.

- An expansion of the types of awards available under the plan.
- A material expansion of the class of employees, directors or other service providers eligible to participate in the plan.
- A material extension of the term of the plan.
- A material change to the method of determining the strike price of options under the plan.
- A change in the method of determining "fair market value" from the closing price on the date of grant to the average of the high and low price on the date of grant is an example of a change that the Exchange would not view as material.
- The deletion or limitation of any provision prohibiting repricing of options. See the next section for details.

Note that an amendment will not be considered a "material revision" if it curtails rather than expands the scope of the plan in question.

## Repricings

A plan that does not contain a provision that specifically permits repricing of options will be considered for purposes of this listing standard as prohibiting repricing. Accordingly any actual repricing of options will be considered a material revision of a plan even if the plan itself is not revised. This consideration will not apply to a repricing through an exchange offer that
commenced before the date this listing standard became effective.
"Repricing" means any of the following or any other action that has the same effect:

- Lowering the strike price of an option after it is granted.
- Any other action that is treated as a repricing under generally accepted accounting principles.
- Canceling an option at a time when its strike price exceeds the fair market value of the underlying stock, in exchange for another option, restricted stock, or other equity, unless the cancellation and exchange occurs in connection with a merger. acquisition, spin-off or other similar corporate transaction.

## Exemptions

This listing standard does not require shareholder approval of employment inducement awards, certain grants, plans and amendments in the context of mergers and acquisitions, and certain specific types of plans, all as described below. However, these exempt grants, plans and amendments inay be made only with the approval of the company's independent compensation committee or the approval of a majority of the company's independent directors. Companies must also notify the Exchange in writing when they use one of these exemptions.

## Employnent Inducement Awards

An employment inducement award is a grant of options or other equity-based compensation as a material inducement to a person or persons being hired by the listed company or any of its subsidiaries, or being rehired following a bona fide period of interruption of einployment. Inducement awards include grants to new employees in connection with a merger or acquisition. Promptly following a grant of any inducement award in reliance on this exemption, the listed company must disclose in a press release the material terms of the award, including the recipient(s) of the award and the number of shares involved.

## Mergers and Acquisitions

Two exemptions apply in the context of corporate acquisitions and mergers.

First, shareholder approval will not be required to convert, replace or adjust outstanding options or other equitycompensation awards to reflect the transaction.

Second, shares available under certain plans acquired in corporate acquisitions and mergers may be used for certain post-transaction grants without further shareholder
approval.This exemption applies to situations where a party that is not a listed company following the transaction has shares available for grant under pre-existing plans that were previously approved by shareholders. A plan adopted in contemplation of the merger or acquisition transaction would not be considered "pre-existing" for purposes of this exemption.

Shares available under such a preexisting plan may be used for posttransaction grants of options and other awards with respect to equity of the entity that is the listed company after the transaction, either under the preexisting plan or another plan, without further shareholder approval, so long as:

- The number of shares available for grants is appropriately adjusted to reflect the transaction;
- The time during which those shares are available is not extended beyond the period when they would have been available under the pre-existing plan, absent the transaction; and
- The options and other awards are not granted to individuals who were employed, immediately before the transaction, by the post-transaction listed company or entities that were its subsidiaries immediately before the transaction.

Any shares reserved for listing in connection with a transaction pursuant to either of these exemptions would be counted by the Exchange in determining whether the transaction involved the issuance of $20 \%$ or more of the company's outstanding common stock and thus required shareholder approval.

These merger-related exemptions will not result in any increase in the aggregate potential dilution of the combined enterprise. Further, mergers or acquisitions are not routine occurrences, and are not likely to be abused. Therefore, the Exchange considers both of these exemptions to be consistent with the fundamental policy involved in this standard.
Qualified Plans, Parallel Excess Plans and Section 423 Plans

The following types of plans (and material revisions themeto) are exempt from the shareholder approval requirement:

- Plans intended to meet the requirements of Section 401(a) of the Internal Revenue Code (e.g., ESOPs);
- Plans intended to meet the requirements of Section 423 of the Internal Revenue Code; and
- "Parallel excess plans" as defined below.

Section 401 (a) plans and Section 423 plans are already regulated under the Internal Revenue Code and Treasury
regulations. Section 423 plans, which are stock purchase plans under which an employee can purchase no more than $\$ 25,000$ worth of stock per year at a plan-specified discount capped at $15 \%$, are also required by the Internal Revenue Code to receive shareholder approval. While Section 401(a) plans and parallel excess plans are not required to be approved by shareholders, U.S. GAAP requires that the shares issued under these plans be "expensed" (i.e., treated as a compensation expense on the income statement) by the company issuing the shares. An equity-compensation plan that provides non-U.S. employees with substantially the same benefits as a comparable Section 401(a) plan, Section 423 plan or parallel excess plan that the listed company provides to its U.S. employees, but for features necessary to comply with applicable foreign tax law, are also exempt from shareholder approval under this section. The term "parallel excess plan" means a plan that is a "pension plan" within the meaning of the Employee Retirement Income Security Act ("ERISA") that is designed to work in parallel with a plan intended to be qualified under Internal Revenue Code Section 401(a) to provide benefits that exceed the limits set forth in Internal Revenue Code Section 402(g) (the section that limits an employee"s annual pre-tax contributions to a 401(k) plan), Internal Revenue Code Section 401(a)(17) (the section that limits the amount of an employee's compensation that can be taken into account for plan purposes) and/or Internal Revenue Code Section 415 (the section that limits the contributions and benefits under qualified plans) and/or any successor or similar limitations that may hereafter be enacted. A plan will not be considered a parallel excess plan unless (1) it covers all or substantially all employees of an employer who are participants in the related qualified plan whose annual compensation is in excess of the limit of Code Section 401(a)(17) (or any successor or similar limits that may hereafter be enacted); (2) its terms are substantially the same as the qualified plan that it parallels except for the elimination of the limits described in the preceding sentence and the limitation described in clause (3); and (3) no participant receives employer equity contributions under the plan in excess of $25 \%$ of the participant's cash compensation.

## Transition Rules

Except as provided below, a plan that was adopted before the date of the Securities and Exchange Commission order approving this listing standard
will not be subject to shareholder approval under this section unless and until it is materially revised.
In the case of a discretionary plan (as defined in "Material Revisions" above), whether or not previously approved by shareholders, additional grants may be made after the effective date of this listing standard without further shareholder approval only for a limited transition period, defined below, and then only in a manner consistent with past practice. See also "Material Revisions" above. In applying this rule, if a plan can be separated into a discretionary plan portion and a portion that is not discretionary, the nondiscretionary portion of the plan can continue to be used separately, under the appropriate transition rule. For example, if a shareholder-approved plan permits both grants pursuant to a provision that makes available a specific number of shares, and grants pursuant to a provision authorizing the use of treasury shares without regard to the specific share limit, the former provision (but not the latter) may continue to be used after the transition period, under the general rule above. Similarly, in the case of a formula plan (as defined in "Material Revisions" above) that either (1) has not previously been approved by shareholders or (2) does not have a term of ten years or less, additional grants may be inade after the effective date of this listing standard without further shareholder approval only for a limited transition period, defined below.
The limited transition period described in the preceding two paragraphs will end upon the first to occur of:

- The listed company's next annual meeting at which directors are elected that occurs more than 180 days after the effective date of this listing standard;
- The first anniversary of the effective date of this listing standard; and
- The expiration of the plan.

A shareholder-approved formula plan may continue to be used after the end of this transition period if it is amended to provide for a term of ten years or less from the date of its original adoption or, if later, the date of its most recent shareholder approval. Such an amendment may be made before or after the effective date of this listing standard, and would not itself be considered a "material revision" requiring shareholder approval.

In addition, a formula plan may continue to be used, without shareholder approval, if the grants after the effective date of this listing standard are made only from the shares available immediately before the effective date, in
other words, based on formulaic increases that occurred prior to such effective date.

## Transiti on Rules for Proxy Voting on Equity Compensation Plans

Members or member-organizations are precluded from giving a proxy to vote on equity compensation plans unless the beneficial owner of the shares has given voting instructions, as set forth in Chapter XXVI, Proxies, Section 3(e), Proxy Voting on Equity Coinpensation Plans, of these Rules. This provision regarding equity compensation plans will be effective for any meeting of shareholders that occurs on or after the 90th day following the date of the Securities and Exchange Commission order approving this provision.

## II. Self-Regulatory Organization's Statement of the Purpose of, and

 Statutory Basis for, the Proposed Rule ChangeIn its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item III below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.
A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basisfor, the Proposed Rule Change

## 1. Purpose

In conjunction with a review of its corporate listing standards with the goal of enhancing accountability, integrity and transparency of listed companies, the Exchange is proposing listing standards related to shareholder approval of equity compensation plans. ${ }^{6}$

[^32]The Exchange is proposing to adopt a new section entitled "Equity Compensation Plans" in Chapter XXVII, Listed Securities-Requirements, which would require shareholder approval of all equity-compensation plans and material revisions to such plans, subject to limited exemptions. Under the Exchange's proposal, as amended, an equity compensation plan is defined as a plan or other arrangement that provides for the delivery of equity securities (either newly issued or treasury shares) of the listed company to any employee, director or other service provider as compensation for services, including a compensatory grant of options or other equity securities that is not made under a plan. The Exchange is also proposing to provide clarification on certain plans that would not be considered equity compensation plans under this definition, such as plans that do not provide for delivery of equity securities of the issuer (e.g., plans that pay in cash) and deferred compensation plans under which employees pay full current market value for deferred shares.
In addition, the proposal, as amended, provides for certain types of grants that are exempted from shareholder approval. These limited exemptions include: (1) Inducement awards to person's first becoming an employee of an issuer or any of its subsidiaries, to rehires following a bona fide period of employment interruption, and for grants to new employees in connection with a merger or acquisition; ${ }^{7}$ (2) mergers and acquisitions, when conversions, replacements or adjustments of outstanding options or other equity compensation awards are necessary to reflect the transaction, and when shares available under certain plans acquired in corporate acquisitions and mergers may be used for certain post-transaction grants without further shareholder approval; and (3) plans intended to meet the requirements of Section 401(a) of the Internal Revenue Code ${ }^{8}$ (e.g., ESOPs), plans intended to meet the requirements of Section 423 of the Internal Revenue Code, ${ }^{9}$ and parallel excess plans that meet certain conditions. The Exchange also proposes that, in circumstances in which equity compensation plans and amendments to plans are not subject to

[^33]shareholder approval, the plans and amendments still must be subject to the approval of the company's independent compensation committee or a majority of the company's independent directors. In addition, the Exchange proposes that an issuer must notify the Exchange in writing when it uses any of the exemptions from the shareholder approval requirements (assuming that such repricing would not require shareholder approval under other Exchange rules).

The Exchange is also proposing to provide a non-exclusive list of "material revisions" to a plan that would require shareholder approval. Within this list of revisions, the Exchange proposed to define the concepts of "evergreen plans" (i.e., plans that contain a formula for automatic increases in the shares available), "formula plans" (i.e., plans that provide for automatic grants pursuant to a formula), and "discretionary plans" (i.e., plans that contain no limit on the number of shares available and are not a formula plan). The Exchange proposes that each grant under a discretionary plan require shareholder approval regardless of whether the plan has a term of not more than 10 years.
Shareholder approval will be required for plans adopted before the effective date of these proposed amendments that have not been approved by shareholders and have neither an evergreen formula nor a specific number of shares available under the plan. The Exchange is proposing to provide transition rules to clarify when shareholder approval will be required for these pre-existing plans. In addition, during the period prior to the approval, pre-existing plans may be utilized, but only in a manner consistent with past practice. The transition rules provide that an evergreen plan that was approved by shareholders but does not have a tenyear term must be: (1) Approved by shareholders before any shares that become available as a result of a formulaic increase are utilized, or (2) amended to include a term of no more than ten years from the date the plan was adopted or last approved by shareholders. If the plan were amended to include such term, shareholder approval would not be required. No action would be required, however, if a plan were frozen at the level of shares available at the time the rule becomes effective. The transition rules also provide that repricings that have commenced prior to the effectiveness of the proposal (i.e., exchange offers to optionees) will not be subject to shareholder approval.

Finally, the Exchange is also proposing to amend Section 3 in Chapter XXXVI, Proxies, to prohibit member organizations from giving a proxy to vote on the implementation of, or material changes to, equity compensation plans unless the beneficial owner of the shares has given voting instructions. The Exchange proposes a transition period that will make this provision applicable only to shareholder meetings that occur on or after the 90th day following the date of the Commission order approving this rule.

## 2. Statutory Basis

The Exchange believes that the proposed rule change, as amended, is consistent with Section 6 of the Act, ${ }^{10}$ in general, and furthers the objectives of Section 6(b)(5) of the Act, ${ }^{11}$ in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

## B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

## C. Self-Regulatory Organization's

 Statement on Comments on the Proposed Rule Change Received From Members, Participants, or OthersWritten comments on the proposed rule change were neither solicited nor received.

## III. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change, as amended, is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 205490609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the

[^34]Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552 , will be available for inspection and copying at the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR-BSE-2003-16 and should be submitted by November 28, 2003.

## IV. Commission's Findings and Order Granting Accelerated Approval to the Proposed Rule Change, As Amended

After careful review, the Commission finds that the Exchange's proposal, as amended, is consistent with the Act and the rules and regulations promulgated thereunder applicable to a national securities exchange and, in particular, with the requirements of Section 6(b) of the Act. ${ }^{12}$ Specifically, the Commission finds that approval of the Exchange's proposal, as amended, is consistent with Section 6(b)(5) of the Act ${ }^{13}$ in that it is designed to, among other things, facilitate transactions in securities; to prevent fraudulent and manipulative acts and practices; to promote just and equitable principles of trade; to remove impediments to and perfect the mechanism of a free and open market and a national market system; and, in general, to protect investors and the public interest; and does not permit unfair discrimination among issuers.
The Commission has long encouraged exchanges to adopt and strengthen their corporate governance listing standards in order to, among other things, restore investor confidence in the national marketplace. The Commission believes that the Exchange's proposal, as amended, which requires shareholder approval of equity compensation plans and which follows the Commission's approval of similar proposals by the NYSE, Nasdaq, and Amex ${ }^{14}$ is the first step under this directive because it should have the effect of safeguarding the interests of shareholders, while placing certain restrictions on Exchange-listed companies.

In addition, the Commission notes that the Exchange's proposal, as amended, is similar and almost

[^35]identical to proposals by NYSE and Nasdaq requiring shareholder approval of equity compensation plans that have previously been approved by the Commission. ${ }^{15}$ The Commission believes that it has already considered and addressed the issues that may be raised by the Exchange's proposal when it approved these proposals. The Commission notes that approval of the Exchange's proposal, as amended, will conform the Exchange's shareholder approval requirements for equity compensation plans with those of the NYSE and Nasdaq, and will immediately impose the same requirements on the Exchange's issuers as those imposed upon NYSE, Nasdaq, and Amex issuers. The adoption of these standards by the Exchange is an important step to ensure that issuers will not be able to avoid shareholder approval requirements for equity compensation plans based on their listed marketplace.

## A. Exemption From Shareholder Approval for Inducement Grants

The Commission believes that the requirement that the issuance of all inducement grants be subject to review by either the issuer's independent compensation committee or a majority of the board's independent directors, under the Exchange's amended proposal, should prevent abuse of this exemption from shareholder approval. In addition, the Exthange proposes to limit its exemption for inducement grants to new employees or to previous employees being rehired after a bona fide period of interruption of employment, and to new employees in connection with an acquisition or merger. The Commission believes that these limitations should help to prevent the inducement exemption from being used inappropriately.

The Commission notes that the Exchange is proposing to include a requirement, similar to the requirement under the NYSE and Nasdaq's recently approved shareholder approval rules, that, promptly following the grant of any inducement award, companies must disclose in a press release the material terms of the award, including the recipient(s) of the award and the number of shares involved. ${ }^{16}$ The

[^36]Commission notes that the Exchange is also proposing a requirement, similar to the requirements under the NYSE and Nasdaq's recently approved shareholder approval rules, ${ }^{17}$ that an issuer must notify it in writing when it uses this exemption, and/or any other exemption, from its shareholder approval requirement. The Commission believes that these disclosure and notification requirements will provide transparency to investors and should reduce the potential for abuse of this exemption for inducement grants.

## B. Exemption From Shareholder Approval for Mergers and Acquisitions

The Commission notes that the Exchange's exemption from shareholder approval for mergers and acquisitions contains safeguards that should prevent abuse in this area. First, only preexisting plans that were previously approved by the acquired company's shareholders would be available to the listed company for post-transactional grants. In addition, shares under those previously approved plans could not be granted to individuals who were employed, immediately before the transaction, by the post-transaction listed company or its subsidiaries. The Commission also notes that, under the Exchange's proposal, as amended, any shares reserved for listing in connection with a merger or acquisition pursuant to this exemption would be counted by the Exchange in determining whether the transaction involved the issuance of $20 \%$ or more of the company's outstanding common stock, thereby requiring shareholder approval. Finally, the Commission notes that the Exchange proposes an additional requirement that an issuer must notify it in writing when it uses this exemption, and/or any other exemption, from its shareholder approval requirement. Based on the above, the Commission believes that the Exchange has provided measures to ensure that the exemption for mergers and acquisitions is only used in limited circumstances, which should help reduce the potential for dilution of shareholder interests.

## C. Exemption From Shareholder Approval for Tax Qualified and Parallel Nonqualified Plans

The Commission believes that, given the extensive government regulationthe Internal Revenue Code and Treasury regulations-for tax qualified plans and the general limitations associated with

[^37]
## parallel nonqualified plans,

shareholders should not experience significant dilution as a result of this exemption. In addition, the Commission notes that the Exchange proposes to add a limitation under this exemption that a plan would not be considered a nonqualified parallel plan under its proposal if employees who are participants in such a plan receive employer contributions under the plan in excess of $25 \%$ of the participants' cash compensation. The Commission further notes that the Exchange proposes an additional requirement that an issuer must notify it in writing when it uses this exemption, and/or any other exemption, from its shareholder approval requirement. The Commission believes that, taken together, these limitations should reduce concerns regarding abuse of this exemption from the shareholder approval requirements.
In addition, the Commission notes that, similar to the exemptions in the NYSE and Nasdaq's recently approved shareholder approval rules, the Exchange proposes to adopt an exemption from the shareholder approval requirements for an equity compensation plan that provides.nonU.S. employees with substantially the same benefits as a comparable Section 401(a) plan, Section 423 plan or parallel excess plan that the listed company provides to its U.S. employees, but for features necessary to comply with applicable foreign tax law. The Commission believes that this change will conform the Exchange's shareholder approval rule to that of the NYSE and Nasdaq and will provide greater clarity for issuers regarding tax qualified, non-discriminatory employee benefit plans and parallel nonqualified plans for their non-U.S. employees.

## D. Material Revisions to Plans

The Commission notes that the Exchange proposes to provide a nonexclusive list, similar to lists found in the NYSE and Nasdaq's shareholder approval rules, ${ }^{18}$ as to what constitutes a material revision to a plan. As noted above, material revisions to plans will require shareholder approval under Exchange rules. A material revision under the Exchange's amended proposal would include, but is not limited to: a material increase in the number of shares to be issued under the plan (other than to reflect a reorganization, stock split, merger, spinoff or similar transaction); an expansion of the type of awards available under the plan; a material expansion of the class of participants eligible to participate in the

[^38]plan; a material extension of the term of the plan; a material change to limit or delete any provisions prohibiting repricing of options in a plan or for determining the strike or exercise price of options under a plan. The Exchange's proposal, as amended, also describes what would constitute a material revision for plans containing a formula for automatic increases (such as evergreen plans) and automatic grants requiring shareholder approval.

The Commission believes that the Exchange's non-exclusive list of what would constitute a material revision to a plan provides companies with clarity. and guidance for when certain amendments and revisions to plans would require shareholder approval. The Commission also believes that the Exchange's amended proposal to conform its non-exclusive list with the NYSE and Nasdaq's rules on material amendments/revisions should help to ensure that the concept of nuaterial amendments/revisions is consistent among the markets so that differences between the markets cannot be abused.

## E. Repricing of Plans

The Commission notes that the Exchange's proposal, as amended, provides that, if a plan explicitly contains a repricing provision, shareholder approval would be required to delete or limit the repricing provisions. The Commission further notes that the Exchange's proposal, as amended, provides that, if a plan is silent on repricing, it will be considered as prohibiting repricing and shareholder approval would be required to permit repricing under the plan. The Exchange's proposal, as amended, also clarifies that repricings that have commenced prior to the date of effectiveness of its proposal would not be subject to shareholder approval, provided that such repricing does not require shareholder approval under the Exchange's existing shareholder approval rules.

The Commission believes that the Exchange's proposal, as amended, should benefit shareholders by ensuring that companies cannot do a repricing of options, which can have a dilutive effect on shares, without explicit shareholder approval of such provisions and their terms. The Commission also believes that the Exchange's approach to repricings is similar to the NYSE and Nasdaq's respective approaches to repricings, and should offer companies clarity and guidance as to when a change in a plan regarding the repricing of options would trigger a shareholder approval requirement.

## F. Evergreen or Formula Plans and

 Plans Without a Formula or Limit on the Number of Shares AvailableThe Commission notes the Exchange's proposal, as amended, provides guidance for the treatment of evergreen/ formula plans. More specifically, under the Exchange's proposal, as amended, if a plan contains a formula for automatic increases in the shares available or for automatic grants pursuant to a formula, such plans cannot have a term in excess of ten years unless shareholder approval is obtained every ten years. In addition, under the Exchange's amended proposal, if a plan contains no limit on the number of shares available and is not a formula plan, then each grant under the plan will require separate shareholder approval. Furthermore, the Exchange's proposal, as amended, provides that a requirement that grants be made out of treasury or repurchased shares will not alleviate the need for shareholder approval for additional grants.

The Commission believes that these provisions should help to ensure that certain terms of a plan cannot be drafted so broad as to avoid shareholder scrutiny and approval. The Commission also believes that the Exchange's proposed rules relating to the treatment of evergreen/formula plans and plans that do not contain a formula or place a limit on the number of shares available should provide more clarity and transparency to issuers as to when shareholder approval would be required for such plans. Finally, the Commission believes that the provision ensuring that treasury and repurchased shares cannot be used to avoid these additional shareholder approval requirements strengthens the proposal and ensures that companies cannot avoid compliance with the rule.

The Commission further notes that the Exchange has proposed a transition period for evergreen/formula plans and discretionary plans. The limited transition period would end on the first to occur of the following: (1) The listed company's next annual meeting at which directors are elected that occurs more than 180 days after the date of the effective date of the Exchange's proposal; (2) the first anniversary of the effective date of the Exchange's proposal; or (3) the expiration of the plan. The Commission believes that the Exchange's proposed transition period for evergreen/formula and discretionary plans should provide companies with additional clarity and guidance as to when shareholder approval would be required for such plans while in the transition period, and should provide
companies with more time to comply with the Exchange's new shareholder approval requirements for evergreen/ formula type plans. The Commission believes that this period is not so long as to permit abuse of the shareholder approval requirement, and at most, will last one year from the date of this Commission approval order.

## G. Miscellaneous Provisions

The Commission notes that the Exchange's amended proposal similar to the NYSE and Nasdaq's recently approved shareholder approval rules ${ }^{19}$-incorporates the term "equity compensation" and proposes that plans that merely provide a convenient way to purchase shares in the open market or from the issuer at fair market price on equal terms to all security holders would not require shareholder approval. The Commission believes that the Exchange's proposal, as amended, is consistent with the NYSE and Nasdaq's rules in this area and should provide greater clarity with respect to which plans would and would not require shareholder approval.

The Commission notes that the Exchange's proposal, as amended, provides that pre-existing plans, which were adopted prior to the SEC's approval of the Exchange's proposal, would essentially be "grandfathered" and would not require shareholder approval unless the plans were materially amended. Under the Exchange's amended proposal, however, shareholder approval is required for each grant made pursuant to any preexisting plans that were not approved by shareholders and that do not have an evergreen formula or a specific number of shares available under the plan. This is consistent with the NYSE, Nasdaq, and Amex shareholder approval rules on this matter. The Commission believes that this clarification should provide companies with guidance as to which plans would be subject to the Exchange's new shareholder approval requirements.

## H. Elimination of Broker-Dealer Voting on Equity Compensation Plans

The Commission believes that the Exchange's proposed provision, BSE Section 3(e), to preclude broker voting on equity compensation plans is consistent with the Act. The Commission notes that equity compensation plans have become an important issue for shareholders. Because of the potential for dilution from issuances under such plans, shareholders should be making the

[^39]determination rather than brokers on their behalf. The Commission further notes that NASD rules do not provide for broker voting on any matters and NYSE rules prohibit broker voting on equity compensation plans. ${ }^{20}$ Therefore, the Exchange's proposed provision would be consistent with NASD and NYSE rules regarding broker voting on equity compensation plans. The Commission has considered the impact on smaller issuers, such as those listed on Nasdaq and the Amex, in response to the comments on this issue. ${ }^{21}$ The Commission believes that the benefit of ensuring that the votes reflect the views of beneficial shareholders on equity compensation plans outweighs the potential difficulties in obtaining the vote.

The Commission also notes that the Exchange proposes to implement a transition period that would make the new rule eliminating broker voting on equity compensation plans applicable only to shareholder meetings that occur on or after the 90th day from the effective date of the Exchange's proposal.

## I. Summary

Overall, the Commission believes that the Exchange's proposal, as amended, is similar to the NYSE and Nasdaq's recently approved shareholder approval rules. ${ }^{22}$ The Commission therefore believes that the Exchange's amended proposal should provide for more clear and uniform standards for shareholder approval of equity compensation plans. The Commission notes that, even with the availability of the proposed limited exemptions from shareholder approval under the Exchange's amended proposal, shareholder approval under the new standards would be required in more circumstances than under existing Exchange rules. The Commission further notes that the Exchange proposes to adopt a requirement that an issuer must notify it in writing when it uses one of the exemptions from the shareholder approval requirements. The Commission believes that such a requirement, coupled with the additional disclosure requirements for inducement grants, should reduce the potential for abuse of any of the exemptions. ${ }^{23}$ In addition, the Exchange's proposed amendment to BSE Section 3, which would preclude broker-dealers from voting on equity compensation plans without explicit

[^40]instructions from the beneficial owner, is consistent with the standard under current NYSE and NASD rules.
The Commission believes that the Exchange's proposal, as amended, which is similar to the NYSE and Nasdaq's shareholder approval rules, ${ }^{24}$ sets a consistent, minimum standard for shareholder approval of equity compensation plans. The Commission believes that the Exchange's proposal, as amended, should help to ensure that companies will not make listing decisions simply to avoid shareholder approval requirements for equity compensation plans and should provide shareholders with greater protection from the potential dilutive effect of equity compensation plans. Based on the above, the Commission finds that the Exchange's proposal, as amended, should help to protect investors, is in the public interest, and does not unfairly discriminate among issuers, consistent with Section 6(b)(5) of the Act. ${ }^{25}$ The Commission therefore finds the Exchange's proposal, as amended, to be consistent with the Act and the rules and regulations thereunder.

## V. Accelerated Approval of the

 Exchange's Proposal and Amendment Nos. 1 and 2The Commission finds good cause for approving the Exchange's proposal and Amendment Nos. 1 and 2 thereto prior to the thirtieth day after the date of publication of notice thereof in the Federal Register. The Commission notes that the Exchange's proposal, as amended, is similar to the NYSE and Nasdaq's proposals requiring shareholder approval of equity compensation plans. Both the NYSE and Nasdaq's proposals were published for comment in the Federal Register and recently approved by the Commission. ${ }^{26}$ The Commission believes that it already considered and addressed the issues that may be raised by the Exchange's amended proposal in its approval of the NYSE and Nasdaq's proposals. ${ }^{27}$

[^41]The Commission believes that accelerated approval of the Exchange's proposal, as amended, is essential to allow for immediate harmonization of, and consistency in, the shareholder approval requirements for equity compensation plans among the markets. This will prevent issuers from making listing decisions based on differences in self-regulatory organization shareholder approval requirements and should provide equal investor protection to shareholders on the dilutive effects of plans irrespective of where the security trades. The Commission further believes that making the Exchange's new shareholder approval rules effective upon Commission approval will immediately impose the same requirements on the Exchange's issuers as those imposed upon NYSE, Nasdaq, and Amex issuers. Based on the above, the Commission finds good cause, consistent with Sections 6(b)(5) and 19 (b)(2) of the Act, ${ }^{28}$ to approve the Exchange's proposal and Amendment Nos. 1 and 2 thereto on an accelerated basis.

## VI. Conclusion

It Is Therefore Ordered, pursuant to Section 19(b)(2) of the Act, ${ }^{29}$ that the proposed rule change (SR-BSE-200316) and Amendment Nos. 1 and 2 thereto are hereby approved on an accelerated basis.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority. ${ }^{30}$
Jill M. Peterson,
Assistant Secretary.

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-48737; File No. SR-CBOE-2003-45]

## Self-Regulatory Organizations; Notice of Filing and Order Granting Accelerated Approval to a Proposed Rule Change by the Chicago Board Options Exchange, Inc. and Amendment No. 1 Thereto Relating to Shareholder Approval of Equity Compensation Plans and the Voting of Proxies

October 31, 2003.
Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934

[^42]("Act"),' and Rule 19b-4 thereunder, ${ }^{2}$ notice is hereby given that on October 6, 2003, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. On October 29, 2003, the Exchange filed Amendment No. 1 to the proposed rule change. ${ }^{3}$ The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons and is approving the proposal and Amendment No. 1 thereto on an accelerated basis.

## I. Self-Regulatory Organization's

Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend CBOE Rules 31.79, 31.80, 31.85 and 31.96, and CBOE Form 1 under "Forms For Listing," to strengthen listing standards relating to shareholder approval for stock option plans or other equity compensation arrangements and to adopt interpretative material pertaining to shareholder approval for stock option plans or other equity compensation arrangements.

Below is the text of the proposed rule change. ${ }^{4}$ Proposed new language is italicized; proposed deleted language is [bracketed].

Chicago Board Options Exchange, Incorporated
Rules

## Chapter XXXI

[^43]Shareholders' Approval

## Rule 31.79 Options to Officers, Directors, [or Key] Employees or Consultants

Approval of shareholders is required [(unless exempted under paragraphs (a) and (b) below) as a prerequisite to approval of applications to list additional shares reserved for] with respect to the establishment of (or material amendment to) a stock option[s] or purchase plan or other equity compensation arrangement pursuant to which options or stock inay be acquired by officers, directors, employees, or consultants [granted or to be granted to officers, directors or key employees], regardless of whether or not such authorization is required by law or by the company's charter, except for:[.] [The Exchange requires that such shareholder's approval be solicited pursuant to a proxy statement conforming to SEC proxy rules which discloses all of the essential details of the options or of the plan pursuant to which the options will be granted.]
[Note: This policy does not preclude the adoption of a stock option plan, or the granting of options, subject to ratification by shareholders, prior to the filing of an application for the listing of the shares reserved for such purpose.
The Exchange will not require shareholder's approval as a condition to listing shares reserved for the exercise of options when:]
(a) [such options are issued] issuances to an individual, not previously an employee[d] or director of [by] the company, or following a bonafide period of non-employment, as an inducement [essential] material to entering into [a contract of] employment with the company, provided [that] (i) such issuances are approved by either a majority of the company's independent directors or the company's independent compensation committee and (ii) the company discloses in a press release the material terins of the grant, including the recipient(s) of the grant and the number of shares involved, promptly following an issuance of any employment inducement grant in reliance on this exception [the potential issuance of shares pursuant to such options does not exceed $5 \%$ of the company's outstanding common stock];
(b) [such options are to be granted:]
[(i)] [under a] tax qualified, nondiscriminatory employee benefit plans [or arrangement] (e.g., plans that meet the requirements of Section 401(a) or 423 of the Internal Revenue Code) or
parallel nonqualified plans, provided such plans are approved by a majority of the company's independent directors or the company's independent compensation committee, or plans that merely provide a convenient way to purchase shares on the open market or from the company at fair market value [in which all, or substantially all, of the company's employees participate, in a fair and equitable manner, ]; or
(c) Plans or arrangements relating to an acquisition or merger; or
(d) Warrants or rights issued generally to all security holders of the company or stock purchase plans available on equal terms to all security holders of the company (such as a typical dividend reinvestment plan).

The Exchange requires that such shareholder's approval be solicited pursuant to a proxy statement Gonforming to SEC proxy rules which discloses all of the essential details of the options or of the plan pursuant to which the options will be granted.
[(ii) under a plan or arrangement for officers, directors or key employees provided such incentive arrangement for officers, directors or key employees do not authorize the issuance in any one year of more than the lesser of $1 \%$ of the number of shares outstanding common stock, $1 \%$ of the voting power outstanding, or 25,000 shares and provided that all arrangements adopted without shareholder approval in any five-year period do not authorize, in the aggregate, the issuance of more than $10 \%$ of outstanding common stock or voting power outstanding. (For the purpose of calculating the percentage of stork issued in the aggregate, stock to be issued pursuant to options which have expired and/or been canceled shall not be included.)

For purposes of the above policy, the term "options" includes not only the usual type of nontransferable options granted in consideration of continued employment but also any other arrangement under which controlling shareholders, officers, directors or key employees may acquire (other than as part of a public offering) stock or convertible securities of a company at a price below market price at the time such stock is acquired or through the use of credit extended, directly or indirectly, by the company. Thus, the sale to such a person(s) of common stock purchase warrants or rights (not part of a public offering) or the sale of stock to such person who has borrowed money from the company, will normally necessitate shareholder approval.]

## * * * Interpretations and Policies:

. 01 Rule 31.79 requires shareholder approval when a plan or other equity compensation arrangement is established or materially amended. For these purposes, a material amendment would include, but not be limited to, the following:
(1) Any material increase in the number of shares to be issued under the plan (other than to reflect a reorganization, stock split, merger, spinoff or similar transaction);
(2) Any material increase in benefits to participants, including any material change to:
(i) permit a repricing (or decrease in the exercise price) of outstanding options, (ii) reduce the price at which shares or options to purchase shares may be offered, or (iii) extend the duration of a plan;
(3) Any material expansion of the class of participants eligible to participate in the plan; and
(4) Any expansion in the types of options or awards provided under the plan.

While general authority to amend a plan would not obviate the need for shareholder approval, if a plan permits a specific action without further shareholder approval, then no such approval would generally be required. However, if a plan contains a formula for automatic increases in the shares available (sometimes called an "evergreen formula"), or for automatic grants pursuant to a dollar-based formula (such as annual grants based on a certain dollar value, or matching contributions based upon the amount of compensation the participant elects to defer), such plans cannot have a term in excess of ten years unless shareholder approval is obtained every ten years. However, plans that do not contain a formula and do not impose a limit on the number of shares available for grant would require shareholder approval of each grant under the plan. A requirement that grants be made out of treasury shares or repurchased shares will not alleviate these additional shareholder approval requirements.

As a general matter, when preparing plans and presenting them for shareholder approval, issuers should strive to make plan terms easy to understand. In that regard, it is recommended that plans meant to permit repricing use explicit terminology to make this clear.

Rule 31.79 provides an exception to the requirement for shareholder approval for warrants or rights offered generally to all shareholders. An exception is also provided for tax qualified, non-discriminatory employee benefit plans as well as parallel
nonqualified plans as these plans are regulated under the Internal Revenue Code and Treasury Department regulations. An equity compensation plan that provides non-U.S. employees with substantially the same benefits as a comparable tax qualified nondiscriminatory employee benefit plan or parallel nonqualified plan that the issuer provides to its U.S. employees, but for features necessary to comply with applicable foreign tax law, are also exempt from shareholder approval under this section. The term "parallel nonqualified plan" means a plan that is a "pension plan" within the meaning of the Employee Retirement Income Security Act ("ERISA"), 29 U.S.C. § 1002 (1999), that is designed to work in parallel with a plan intended to be qualified under Internal Revenue Code Section 401(a), to provide benefits that exceed the limits set forth in Internal Revenue Code Section 402(g) (the section that limits an employee's annual pre-tax contributions to a $401(\mathrm{k})$ plan), Internal Revenue Code Section 401(a)(17) (the section that limits the amount of an employee's compensation that can be taken into account for plan purposes) and/or Internal Revenue Code Section 415 (the section that limits the contributions and benefits under qualified plans) and/or any successor or similar limitations that may thereafter be enacted. However, a plan will not be considered a parallel nonqualified plan unless: (i) It covers all or substantially all employees of an employer who are participants in the related qualified plan whose annual compensation is in excess of the limit of Code Section 401(a)(17) (or any successor or similar limitation that may hereafter be enacted); (ii) its terms are substantially the same as the qualified plan that it parallels except for the elimination of the limitations described in the preceding sentence; and (iii) no participant receives employer equity contributions under the plan in excess of $25 \%$ of the participant's cash compensation.

Further, there is an exception for inducement grants to new employees because in these cases a company has an arm's length relationship with the new employees. Inducement grants for these purposes include grants of options or stock to new employees in connection with a merger or acquisition. Rule 31.79 requires that such issuances must be approved by the issuer's independent compensation committee or a majority of the issuer's independent directors. The rule further requires that promptly following an issuance of any employment inducement grant in
reliance on this exception, the listed company must disclose in a press release the material terms of the grant, including the recipient(s) of the grant and the number of shares involved.
In addition, plans or arrangements involving a merger or acquisition do not require shareholder approval in two situations. First, shareholder approval will not be required to convert, replace or adjust outstanding options or other equity compensation awards to reflect the transaction. Second, shares available under certain plans acquired in acquisitions and mergers may be used for certain post-transaction grants without further shareholder approval. This exception applies to situations where the party which is not a listed company following the transaction has shares available for grant under preexisting plans that were previously approved by shareholders pursuant to Rule 31.79. These shares may be used for post-transaction grants of options and other equity awards by the listed company (after appropriate adjustment of the number of shares to reflect the transaction), either under the preexisting plan or arrangement or another plan or arrangement, without further shareholder approval, provided: (1) The time during which those shares are available for grants is not extended beyond the period when they would have been available under the preexisting plan, absent the transaction, and (2) such options and other awards are not granted to individuals who were employed by the granting company or its subsidiaries at the time the merger or acquisition was consummated. A plan or arrangement adopted in contemplation of the merger or acquisition transaction would not be viewed as pre-existing for purposes of this exception. This exception is appropriate because it will not result in any increase in the aggregate potential dilution of the combined enterprise. In this regard, any additional shares available for issuance under a plan or arrangement acquired in connection with a merger or acquisition would be counted in determining whether the transaction involved the issuance of $20 \%$ or more of the company's outstanding common stock, thus triggering the shareholder approval requirements of Rule 31.80 (b).

A listed company is not permitted to use repurchased shares to fund option plans or grants without prior shareholder approval.

Pursuant to Rule 31.96(H), a listed company is required to notify the Exchange in writing prior to the use of any of the exceptions set forth in
paragraphs (a) through (d) of Rule 31.79.

## Rule 31.80 Acquisitions

## * * * Interpretations and Policies

.01 Any additional shares available for issuance under a stock option or purchase plan or other equity compensation arrangement acquired in connection with a merger or acquisition are counted in determining whether the transaction involved the issuance of $20 \%$ or more of the company's outstanding common stock as provided in Rule 31.80(b).

Rule 31.85 Giving Proxies by Member Organizations
(a) No change.
(b) When a member organization may not vote without customer instructions-A member organization may not give a proxy to vote without instructions from beneficial owners when the matter to be voted upon:
(1)-(8) No change.
(9) involves a waiver or modification of preemptive rights[, except when the company's proposal is to waive such rights with respect to shares being offered pursuant to stock options or purchase plans involving the additional issuance of not more than $5 \%$ of the company's outstanding common shares];
(10)-(11) No change.
(12) Jauthorizes the issuance of stock, or options to purchase stock to directors, officers or employees in an amount which exceeds $5 \%$ of the total amount of the class outstanding] authorizes the implementation of any equity compensation plan, or any material revision to the terms of any existing equity compensation plan (whether or not shareholder approval of such plan is required by Rule 31.79);
(13)-(18) No change.
(c)-(h) No change.

Rule 31.96 Notices to Exchange
(A)-(G) No change.
(H) Reliance on Shareholder Approval

## Exceptions

A listed company is required to notify the Exchange in writing prior to the use of any of the exceptions set forth in paragraphs (a) through (d) of Rule 31.79.

## Forms for Listing

## Form 1

## Listing Agreement

(the "Company"), in consideration of the listing of its securities, hereby agrees with the Chicago Board Options Exchange, Incorporated (the "Exchange"), that it will:

1. Promptly notify the Exchange of the following:
(a)-(i) No change.
(j) Any diminution in the supply of the security available for trading caused by deposit of the security under voting trust, tender offer or other agreements; [and]
(k) The existence of any technical default or default in interest or principal payment, cumulative dividends, sinking funds, or redemption fund requirements of the Company or any controlled corporation, whether consolidated or unconsolidated; and[.]
(l) the use of any of the exceptions set forth in paragraphs (a) through (d) of Rule 31.79, which notice must be sent to the Exchange in writing prior to such use.
(2)-(28) No change.

## II. Self-Regulatory Organization's Statement of the Purpose of, and

 Statutory Basis for, the Proposed Rule ChangeIn its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item III below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

## A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basisfor, the Proposed Rule Change

## 1. Purpose

The Exchange proposes to amend its non-option rules (i.e., equity rules) that apply to listing standards for stocks that may be listed on the Exchange. CBOE Rule 31.79 currently requires listed companies to obtain shareholder approval for stock option plans and other arrangements in which officers, directors, and key employees participate. However, the current Rule contains two exceptions, one for "broadly based plans," which, under

CBOE Rule 31.79, is a plan in which all or substantially all of the company's employees participate in a fair and equitable manner, even if officers, directors and key employees receive options grants under the plan, and one for de minimis grants. To enhance investor confidence in the national securities markets, the Exchange now proposes to require shareholder approval of all stock option and equity compensation plans, including "broad based plans." The proposed rule change would also provide four exceptions to the shareholder approval requirement based on the proposals set forth in a recent approval order of the New York Stock Exchange, Inc. ("NYSE") and the National Association of Securities Dealers, Inc. ("NASD")/The Nasdaq Stock Market, Inc. ("Nasdaq") proposals related to equity compensation plans. ${ }^{5}$ In addition, the Exchange proposes to eliminate the de minimis exception currently reflected in CBOE Rule 31.79(b)(ii), which generally allows for the grant of the lesser of $1 \%$ of the number of outstanding shares of common stock, $1 \%$ of the voting power outstanding or 25,000 shares without shareholder approval, as this exception is not in accord with the concept of restricting the use of unapproved options.

Proposed CBOE Rule 31.79(a) amends the current exception set forth in CBOE Rule 31.79(a) to provide for inducement grants to new employees or to previous employees following a bonafide period of non-employment with the listed company. The proposed rule change would delete the reference that limits the grant to five percent of the company's outstanding common stock, which would align proposed CBOE Rule 31.79(a) with the Nasdaq/NYSE Proposals. The Exchange does not believe that shareholder approval is necessary for these types of inducement grants since in these cases a company has an arm's length relationship with

[^44]the new employees, and its interests are directly aligned with those of shareholders. The Exchange believes that any potential abuse of the inducement exception would be mitigated by the requirement that the company's independent compensation committee or a majority of the company's independent directors approve the inducement grant. In addition, a listed company relying on the inducement award exception, as set forth in Rule 31.79(a), must disclose in a press release the material terms of the award, including the recipient(s) of the award and the number of shares involved.

Proposed CBOE Rule 31.79(b), a new exception based on the Nasdaq/NYSE Proposals, does not require shareholder approval for tax qualified,
nondiscriminatory benefit plans, as these plans are regulated under the Internal Revenue Code and Treasury Department regulations. However, the listed company's independent compensation committee or a majority of the listed company's independent directors must approve these plans. Along with tax qualified, nondiscriminatory employee benefit plans, proposed CBOE Rule 31.79(b) also proposes an exception for parallel nonqualified plans. The proposed rule change would not impact any shareholder approval or other requirements under the Internal Revenue Code or other applicable laws or requirements for such plans. Additionally, an equity compensation plan that provides non-U.S. employees with substantially the same benefits as a comparable tax qualified, nondiscriminatory employee benefit plan or parallel nonqualified plan that the issuer provides to its U.S. employees, but for features necessary to comply with applicable foreign tax law, is also exempt from the shareholder approval requirements.

Proposed Interpretation .01 to CBOE Rule 31.79 makes clear that a company would not be permitted to use repurchased shares to fund options plans without prior shareholder approval. However, plans that merely provide a convenient way to purchase shares on the open market or from the issuer at fair market value would not require shareholder approval.

With respect to plans or arrangements relating to an acquisition or merger, as set forth in proposed CBOE Rule 31.79(c), proposed Interpretation .01 to CBOE Rule 31.79 makes clear that these plans or arrangements would not require shareholder approval in two situations. First, shareholder approval will not be required to convert, replace
or adjust outstanding options or other equity compensation awards to reflect the transaction. Second, shares available under certain plans acquired in acquisitions and mergers may be used for certain post-transaction grants without further shareholder approval. This exception applies to situations where the party that is not a listed company following the transaction has shares available for grant under preexisting plans that were previously approved by shareholders. These shares may be used for post-transaction grants of options and other equity awards by the listed company (after appropriate adjustment of the number of shares to reflect the transaction), either under the pre-existing plan or another plan, without further shareholder approval, so long as (1) the time during which those shares are available for grants is not extended beyond the period when they would have been available under the pre-existing plan, absent the transaction, and (2) such options and other awards are not granted to individuals who were employed by the granting company or its subsidiaries at the time the merger or acquisition was consummated. The Exchange would view a plan adopted in contemplation of the merger or acquisition transaction as not preexisting for purposes of this exception. The Exchange believes that this exception is appropriate because it believes that it would not result in any increase in the aggregate potential dilution of the combined enterprise.

Finally, proposed CBOE Rule 31.79(d) sets forth a new exception for warrants or rights offered generally to all shareholders. The Exchange believes that this issuance does not raise the same concerns regarding self-dealing and dilution as other, more exclusive stock option plans or arrangements may create.

The Exchange's proposal also clarifies that only material amendments to plans (including existing plans) will require shareholder approval. Proposed Interpretation . 01 to CBOE Rule 31.79 specifies a non-exclusive list of plan amendments that would be considered material. While broad, general authority to amend a plan would not obviate the need for shareholder approval, if a plan permits a specific action without further shareholder approval, then no such approval would be required. ${ }^{6}$ Certain provisions in a plan, however, cannot be amended without shareholder approval. For example, plans that contain a

[^45]formula for automatic increases in the shares available (sometimes called an "evergreen formula") or that automatically grant shares pursuant to a dollar-based formula cannot have a term in excess of ten years, unless shareholder approval is obtained every ten years. In addition, plans that do not contain a formula and do not impose a limit on the number of shares available for grant would require shareholder approval of each grant under the plan. A requirement that grants be made out of treasury shares or repurchased shares will not alleviate these additional shareholder approval requirements. Proposed Interpretation . 01 to CBOE Rule 31.79 also provides that issuers should strive to make plan terms easily understandable and that plans meant to permit repricing should use explicit terminology in this regard.

Proposed Interpretation .01 to CBOE Rule 31.80 reflects the concept set forth in proposed Interpretation .01 to CBOE Rule 31.79, that additional shares available for issuance under a stock option or purchase plan or other equity compensation arrangement acquired in connection with a merger or acquisition are counted in determining whether the transaction involved the issuance of $20 \%$ or more of the company's outstanding common stock. Furthermore, the Exchange proposes to amend CBOE Rule 31.96 and the Listing Agreement set forth on CBOE Form 1 to require issuers to notify the Exchange in writing prior to the use of any of the exceptions set forth in paragraphs (a) through (d) of CBOE Rule 31.79.

In addition, the Exchange proposes to amend CBOE Rule 31.85 to preclude the Exchange's member organizations from giving a proxy to vote on equity compensation plans unless the beneficial owner of the shares has given voting instructions.

## 2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6 of the Act, ${ }^{7}$ in general, and furthers the objectives of Section 6(b)(5) of the Act, ${ }^{8}$ in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. As previously noted, the Exchange believes that the proposed rule change will strengthen shareholder approval

[^46]requirements with respect to stock option plans.

## B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

## C. Self-Regulatory Organization's Statement on Comments on the

 Proposed Rule Change Received From Members, Participants, or OthersWritten comments on the proposed rule change were neither solicited nor received.

## III. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW. Washington, DC 20549-0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR-CBOE-2003-45 and should be submitted by November 28, 2003.

## IV. Commission's Findings and Order Granting Accelerated Approval to the Proposed Rule Change

After careful review, the Commission finds that the Exchange's proposal is consistent with the Act and the rules and regulations promulgated thereunder applicable to a national securities exchange and, in particular, with the requirements of Section 6(b) of the Act. ${ }^{9}$ Specifically, the Commission finds that approval of the Exchange's proposal is consistent with Section 6(b)(5) of the Act ${ }^{10}$ in that it is designed to, among

[^47]other things, facilitate transactions in securities; to prevent fraudulent and manipulative acts and practices; to promote just and equitable principles of trade; to remove impediments to and perfect the mechanism of a free and open market and a national market system; and, in general, to protect investors and the public interest; and does not permit unfair discrimination among issuers.

The Commission has long encouraged exchanges to adopt and strengthen their corporate governance listing standards in order to, among other things, restore investor confidence in the national marketplace. The Commission believes that the Exchange's proposal, which requires shareholder approval of equity compensation plans and which follows the Commission's approval of similar proposals by the NYSE, Nasdaq, and Amex ${ }^{11}$ is the first step under this directive because it should have the effect of safeguarding the interests of shareholders, while placing certain restrictions on Exchange-listed companies.

In addition, the Commission notes that the Exchange's proposal is similar and almost identical to proposals by NYSE and Nasdaq requiring shareholder approval of equity compensation plans that have previously been approved by the Commission. ${ }^{12}$ The Commission believes that it has already considered and addressed the issues that may be raised by the Exchange's proposal when it approved these proposals. The Commission notes that approval of the Exchange's proposal will conform the Exchange's shareholder approval requirements for equity compensation plans with those of the NYSE and Nasdaq, and will immediately impose the same requirements on the Exchange's issuers as those imposed upon NYSE, Nasdaq, and Amex issuers. The adoption of these standards by the Exchange is an important step to ensure that issuers will not be able to avoid shareholder approval requirements for equity compensation plans based on their listed marketplace.

## A. Exception From Shareholder Approval for Inducement Grants

The Commission believes that the requirement that the issuance of all inducement grants be subject to review

[^48]by either the issuer's independent compensation committee or a majority of the board's independent directors, under the Exchange's proposal, should prevent abuse of this exception from shareholder approval. In addition, the Exchange proposes to limit its exception for inducement grants to new employees or to previous employees being rehired after a bona fide period of interruption of employment, and to new employees in connection with an acquisition or merger. The Commission believes that these limitations should help to prevent the inducement exception from being used inappropriately.

The Commission notes that the Exchange is proposing to include a requirement, similar to the requirement under the NYSE and Nasdaq's recently approved shareholder approval rules, that, promptly following the grant of any inducement award, companies must disclose in a press release the material terms of the award, including the recipient(s) of the award and the number of shares involved. ${ }^{13}$ The Commission notes that the Exchange is also proposing a requirement, similar to the requirements under the NYSE and Nasdaq's recently approved shareholder approval rules, ${ }^{14}$ that an issuer must notify it in writing when it uses this exception, and/or any other exception, from its shareholder approval requirement. The Commission believes that these disclosure and notification requirements will provide transparency to investors and should reduce the potential for abuse of this exception for inducement grants.

## B. Exception From Shareholder Approval for Mergers and Acquisitions

The Commission notes that the Exchange's exception from shareholder approval for mergers and acquisitions contains safeguards that should prevent abuse in this area. First, only preexisting plans that were previously approved by the acquired company's shareholders would be available to the listed company for post-transactional grants. In addition, shares under those previously approved plans could not be granted to individuals who were

[^49]employed, immediately before the transaction, by the post-transaction listed company or its subsidiaries. The Commission also notes that, under the Exchange's proposal, any shares reserved for listing in connection with a merger or acquisition pursuant to this exception would be counted by the Exchange in determining whether the transaction involved the issuance of $20 \%$ or more of the company's outstanding common stock, thereby requiring shareholder approval under CBOE Rule 31.80(b). Finally, the Commission notes that the Exchange proposes an additional requiremen! that an issuer must notify it in writing when it uses this exception, and/or any other exception, from its shareholder approval requirement. Based on the above, the Commission believes that the Exchange has provided measures to ensure that the exception for mergers and acquisitions is only used in limited circumstances, which should help reduce the potential for dilution of shareholder interests.

## C. Exception From Shareholder Approval for Tax Qualified and Parallel Nonqualified Plans

The Commission believes that, given the extensive government regulationthe Internal Revenue Code and Treasury regulations-for tax qualified plans and the general limitations associated with parallel nonqualified plans,
shareholders should not experience significant dilution as a result of this exception. In addition, the Commission notes that the Exchange proposes to add a limitation under this exception that a plan would not be considered a nonqualified parallel plan under its proposal if employees who are participants in such a plan receive employer contributions under the plan in excess of $25 \%$ of the participants' cash compensation. The Commission further notes that the Exchange proposes an additional requirement that an issuer must notify it in writing when it uses this exception, and/or any other exception, from its shareholder approval requirement. The Commission believes that, taken together, these limitations should reduce concerns regarding abuse of this exception from the shareholder approval requirements.

In addition, the Commission notes that, similar to the exceptions in the NYSE and Nasdaq's recently approved shareholder approval rules, the Exchange proposes to adopt an exception from the shareholder approval requirements for an equity compensation plan that provides nonU.S. employees with substantially the same benefits as a comparable tax
qualified, non-discriminatory employee benefit plan or parallel nonqualified plan that the issuer provides to its U.S. employees, but for features necessary to comply with applicable foreign tax law. The Commission believes that this change will conform the Exchange's shareholder approval rule to that of the NYSE and Nasdaq and will provide greater clarity for issuers regarding tax qualified, non-discriminatory employee benefit plans and parallel nonqualified plans for their non-U.S. employees.

## D. Material Amendments/Revisions to Plans

The Commission notes that the Exchange proposes to provide a nonexclusive list, similar to lists found in the NYSE and Nasdaq's shareholder approval rules, ${ }^{15}$ as to what constitutes a material amendment/revision to a plan. As noted above, material amendments/revisions to plans will require shareholder approval under Exchange rules. A material amendment/ revision under the Exchange's proposal would include, but is not limited to: A material increase in the number of shares to be issued under the plan (other than to reflect a reorganization, stock split, merger, spinoff or similar transaction); a material increase in benefits to participants, including any material change to (1) permit a repricing (or decrease in exercise price) of outstanding options, (2) reduce the price at which shares or options to purchase shares may be offered, or (3) extend the duration of the plan; a material expansion of the class of participants eligible to participate in the plan; and an expansion of the type of options or awards available under the plan. The Exchange's proposal also describes what would constitute a material amendment/revision for plans containing a formula for automatic increases (such as evergreen plans) and automatic grants requiring shareholder approval.

The Commission believes that the Exchange's non-exclusive list of what would constitute a material amendment/revision to a plan provides companies with clarity and guidance for when certain amendments and revisions to plans would require shareholder approval. The Commission also believes that the Exchange's proposal to conform its non-exclusive list with the NYSE and Nasdaq's rules on material amendments/revisions should help to ensure that the concept of material amendments/revisions is consistent among the markets so that differences between the markets cannot be abused.

[^50]
## E. Repricing of Plans

The Commission notes that, under the Exchange's proposal, if a plan is. amended to permit repricing, such an amendment would be considered a material amendment to a plan requiring shareholder approval. In addition, the Exchange recommended in its proposal that plans meant to permit repricing should explicitly and clearly state that repricing is permitted.
The Commission believes that the Exchange's proposal slould benefit shareholders by ensuring that companies cannot do a repricing of options, which can have a dilutive effect on shares, without explicit shareholder approval of such provisions and their terms. The Commission also believes that the Exchange's approach to repricings is similar to the NYSE and Nasdaq's respective approaches to repricings, and should offer companies clarity and guidance as to when a change in a plan regarding the repricing of options would trigger a shareholder approval requirement.

## F. Evergreen or Formula Plans and Plans Without a Formula or Limit on the Number of Shares Available

The Commission notes the Exchange's proposal provides guidance for the treatment of evergreen/formula plans. More specifically, under the Exchange's proposal; if a plan contains a formula for automatic increases in the shares available or for automatic grants pursuant to a formula, such plans cannot have a term in excess of ten years unless shareholder approval is obtained every ten years. In addition, under the Exchange's proposal, if a plan contains no limit on the number of shares available and is not a formula plan, then each grant under the plan will require separate shareholder approval. Furthermore, the Exchange's proposal provides that a requirement that grants be made out of treasury or repurchased shares will not alleviate the need for shareholder approval for additional grants.

The Commission believes that these provisions should help to ensure that certain terms of a plan cannot be drafted so broad as to avoid shareholder scrutiny and approval. The Commission also believes that the Exchange's proposed rules relating to the treatment of evergreen/formula plans and plans that do not contain a formula or place a limit on the number of shares available should provide more clarity and transparency to issuers as to when shareholder approval would be required for such plans. Finally, the Comınission believes that the provision ensuring that
treasury and repurchased shares cannot be used to avoid these additional shareholder approval requirements strengthens the proposal and ensures that companies cannot avoid compliance with the rule.

## G. Miscellaneous Provisions

The Commission notes that the Exchange's proposal-similar to the NYSE and Nasdaq's recently approved shareholder approval rules ${ }^{16}$ incorporates the term "equity compensation" and proposes that plans that merely provide a convenient way to purchase shares in the open market or from the issuer at fair market price on equal terms to all security holders would not require shareholder approval. The Commission believes that the Exchange's proposal is consistent with the NYSE and Nasdaq's rules in this area and should provide greater clarity with respect to which plans would and would not require shareholder approval.

The Commission notes that the Exchange's proposal provides that preexisting plans, which were adopted prior to the SEC's approval of the Exchange's proposal, would essentially be "grandfathered" and would not require shareholder approval unless the plans were materially amended. Under the Exchange's proposal, however, shareholder approval is required for each grant made pursuant to any preexisting plans that were not approved by shareholders and that do not have an evergreen formula or a specific number of shares available under the plan. This is consistent with the NYSE, Nasdaq, and Amex shareholder approval rules on this matter. The Commission believes that this clarification should provide companies with guidance as to which plans would be subject to the Exchange's new shareholder approval requirements.

The Commission further notes that the Exchange proposes to adopt an exception from the shareholder approval requirement for warrants or rights offered generally to all shareholders. This exception would exclude stock purchase plans available on equal terms to all security holders of the company (e.g., a dividend reinvestment plan). The Commission believes that the adoption of such an exception would make the Exchange's proposal consistent with the rules of other markets in this area.

Finally, the Commission notes that the proposed amendments to CBOE Form 1 concerning Listing Agreements, which requires advance written notice to the Exchange when issuers use any of

[^51]the exceptions from shareholder approval, should help the Exchange to ensure that the use of any exception is consistent with the intent of the shareholder approval requirements for equity compensation plans.

## H. Elimination of Broker-Dealer Voting on Equity Compensation Plans

The Commission believes that the Exchange's proposed amendment to CBOE Rule 31.85 to preclude broker voting on equity compensation plans is consistent with the Act. The Commission notes that equity compensation plans have become an important issue for shareholders. Because of the potential for dilution from issuances under such plans, shareholders should be making the determination rather than brokers on their behalf. The Commission further notes that NASD rules do not provide for broker voting on any matters and NYSE rules prohibit broker voting on equity compensation plans. ${ }^{17}$ Therefore, the Exchange's proposed provision would be consistent with NASD and NYSE rules regarding broker voting on equity compensation plans. The Commission has considered the impact on smaller issuers, such as those listed on Nasdaq and the Amex, in response to the comments on this issue. ${ }^{98}$ The Commission believes that the benefit of ensuring that the votes reflect the views of beneficial shareholders on equity compensation plans outweighs the potential difficulties in obtaining the vote. ${ }^{19}$

## I. Summary

Overall, the Commission believes that the Exchange's proposal is similar to the NYSE and Nasdaq's recently approved shareholder approval rules. ${ }^{20}$ The Commission therefore believes that the Exchange's proposal should provide for more clear and uniform standards for shareholder approval of equity compensation plans. The Commission notes that, even with the availability of the proposed limited exceptions from shareholder approval under the Exchange's proposal, shareholder

[^52]${ }^{20}$ See supra note 5; see also supra note 11.
approval under the new standards would be required in more circumstances than under existing Exchange rules. The Commission further notes that the Exchange proposes to adop: a requirement that an issuer must notify it in writing when it uses one of the exceptions from the shareholder approval requirements. The Commission believes that such a requirement, coupled with the additional disclosure requirements for inducement grants, should reduce the potential for abuse of any of the exceptions. ${ }^{21}$ In addition, the Exchange's proposed amendment to CBOE Rule 31.85, which would preclude broker-dealers from voting on equity compensation plans without explicit instructions from the beneficial owner, is consistent with the standard under current NYSE and NASD rules.

The Commission believes that the Exchange's proposal, which is similar to the NYSE and Nasdaq's shareholder approval rules. ${ }^{22}$ sets a consistent, minirnum standard for shareholder approval of equity compensation plans. The Commission believes that the Exchange's proposal should help to ensure that companies will not make listing decisions simply to avoid shareholder approval requirements for equity compensation plans and should provide shareholders with greater protection from the potential dilutive effect of equity compensation plans. Based on the above, the Commission finds that the Exchange's proposal should help to protect investors, is in the public interest, and does not unfairly discriminate among issuers, consistent with Section 6(b)(5) of the Act. ${ }^{23}$ The Commission therefore finds the Exchange's proposal to be consistent with the Act and the rules and regulations thereunder.

## V. Accelerated Approval of the Exchange's Proposal and Amendment No. 1

The Commission finds good cause for approving the Exchange's proposal and Amendment No. 1 thereto prior to the thirtieth day after the date of publication of notice thereof in the Federal Register. The Exchange has requested that the Commission approve the proposed rule change on an accelerated basis so that the proposed corporate governance listing standards relating to shareholder approval of equity compensation plans may be implemented as soon as possible. The Commission notes that the Exchange's

[^53]proposal is similar to the NYSE and Nasdaq's proposals requiring shareholder approval of equity compensation plans. Both the NYSE and Nasdaq's proposals were published for comment in the Federal Register and recently approved by the Commission. ${ }^{24}$ The Commission believes that it already considered and addressed the issues that may be raised by the Exchange's proposal in its approval of the NYSE and Nasdaq's proposals. ${ }^{25}$

The Commission believes that accelerated approval of the Exchange's proposal is essential to allow for immediate harmonization of, and consistency in, the shareholder approval requirements for equity compensation plans annong the markets. This will prevent issuers from making listing decisions based on differences in selfregulatory organization shareholder approval requirements and should provide equal investor protection to shareholders on the dilutive effects of plans irrespective of where the security trades. The Commission further believes that making the Exchange's new sharelolder approval rules effective upon Commission approval will immediately impose the same requirements on the Exchange's issuers as those imposed upon NYSE, Nasdaq, and Amex issuers. Based on the above, the Commission finds good cause, consistent with Sections 6(b)(5) and 19(b)(2) of the Act, ${ }^{26}$ to approve the Exchange's proposal and Amendment No. 1 thereto on an accelerated basis.

## VI. Conclusion

It is therefore ordered, pursuant to section 19(b)(2) of the Act, ${ }^{27}$ that the proposed rule change (SR-CBOE-200345) and Amendment No. 1 thereto are hereby approved on an accelerated basis.

[^54]For the Commission, by the Division of Market Regulation, pursuant to delegated authority. ${ }^{28}$

## SECURITIES AND EXCHANGE COMMISSION

## [Release No. 34-48721; File No. SR-CBOE-2003-42]

## Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by Chicago Board Options Exchange, Inc. To Amend Rule 6.8, Interpretation and Policy .01, Relating to the Retail Automatic Execution System

October 30, 2003.
Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") ${ }^{1}$ and Rule 19b-4 thereunder, ${ }^{2}$ notice is hereby given that on October 1, 2003, the Chicago Board Options Exchange, Inc. ("CBOE"' or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the CBOE. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.
I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The CBOE proposes to amend CBOE Rule 6.8, Interpretation and Policy .01 to allow broker-dealer orders that are eligible for execution on CBOE's Retail Automatic Execution System ("RAES") to automatically execute against limit orders on the CBOE book in classes designated by the appropriate Floor Procedure Committee. The text of the proposed rule change is set forth below. Proposed new language is in italics.

## Rule 6.8 RAES Operations

## (a)-(g) No change.

## * * Interpretations and Policies

.01 (a) Notwithstanding Rule 6.8(c)(ii), the appropriate Floor Procedure Committee ("FPC") may determine, by class and/or series to allow the following types of orders to be executed on RAES in accordance with the requirements of Rule 6.8 , subject to the

[^55]conditions set forth below in subparagraphs (b) and (c):

1. Broker-dealer orders; or
2. Broker-dealer orders that are not for the accounts of market-makers or specialists on an exchange who are exempt from the provisions of Regulation T of the Federal Reserve Board pursuant to section 7(c)(2) of the Securities Exchange Act of 1934.
(b) The appropriate FPC may permit broker-dealer orders to be automatically executed pursuant to this Interpretation and Policy .01 , subject to the following provisions:
3. Broker-dealer orders entered through the Exchange's order routing system will not be automatically executed against orders in the limit order book unless permitted on a class-by-class basis by the appropriate Floor Procedure Committee. Broker-dealer orders may interact with orders in the limit order book only after being rerouted to a floor broker for representation in the trading crowd. Broker-dealer orders are not eligible to be placed in the limit order book pursuant to Rule 7.4.
4. The maximum order size eligibility for the broker-dealer orders may be less than the applicable order size eligibility for non-broker-dealer orders.
5. Non-broker-dealer orders may be eligible for automatic execution at the NBBO pursuant to Interpretations and Policies .02 of Rule 6.8 , while brokerdealer orders may not be so eligible. In the event broker-dealer orders are not so eligible, they shall instead route to either PAR or BART.
6. The appropriate FPC may determine, by class and/or series, to prohibit access to RAES for brokerdealer orders after 3 pm .
(c) CBOE market-makers must assure that orders for their own accounts are not entered on the Exchange and represented or executed in violation of the following provisions: Interpretations and Policies .02 of Rule 6.55 and Interpretations and Policies 06 of Rule 8.9 (concurrent representation of a joint account), Rule 6.55 (concurrent representation of a market-maker account), and section 9 of the Securities Exchange Act of 1934 (wash sales).
.02-. 09 No change.

## II. Self-Regulatory Organization's <br> Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the CBOE included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed
rule change. The text of these statements may be examined at the places specified in Item IV below. The CBOE has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

## A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

## 1. Purpose

The Exchange's RAES system was created to allow for the automatic execution of retail customer options orders against CBOE market makers at their disseminated prices. In 1999, the Exchange expanded the RAES system to allow incoming RAES orders to execute against customer limit orders on the CBOE book when such booked orders constitute the CBOE's best bid/offer. Recently, the Exchange has allowed broker-dealer orders to be executed on RAES in classes/series designated by the appropriate Floor Procedure
Committee. ${ }^{-}$
The Exchange now proposes to allow broker-dealer orders that are eligible for execution on RAES pursuant to CBOE Rule 6.8, Interpretation and Policy 01 to automatically execute against customer limit orders on the CBOE's book in classes designated by the appropriate Floor Procedure Committee.

## 2. Statutory Basis

Because the proposed rule change will expand the number of orders eligible to trade automatically with booked customer limit orders, the Exchange believes the proposed rule change is consistent with section $6(b)^{5}$ of the Act in general, and furthers the objectives of section 6(b)(5) ${ }^{\text {f }}$ of the Act in particular, because it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

## B. Self-Regulatory Organization's

 Statement on Burden on CompetitionThe Exchange believes that the proposed rule change will not impose any burden on competition that is not

[^56]necessary or appropriate in furtherance of the purposes of the Act.
C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

## III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the CBOE consents, the Commission will:
(A) By order approve such proposed rule change, or
(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

## IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. including whether the proposal is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549-0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person. other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552 , will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of CBOE. All submissions should refer to File No. SR-CBOE-2003-42 and should be submitted by November 28, 2003.

For the Commission. by the Division of Market Regulation, pursuant to delegated authority. ${ }^{7}$
Jill M. Peterson,
Assistant Secretary.
[FR Doc. 03-28078 Filed 11-6-03; 8:45 am] BILLING CODE 8010-01-P

17 CFR 200.30-3(a)(12).

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-48734; File No. SR-CHX-2003-31]
Self-Regulatory Organizations; Notice of Filing of a Proposed Rule Change and Amendment No. 1 Thereto and Order Granting Accelerated Approval to a Proposed Rule Change and
Amendment No. 1 Thereto by the Chicago Stock Exchange, Inc. Relating to Shareholder Approval of Equity Compensation Plans and the Voting of Proxies

## October 31, 2003.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934
("Act"), ${ }^{1}$ and Rule 19b-4 thereunder, ${ }^{2}$ notice is hereby given that on October 6,2003, the Chicago Stock Exchange, Inc. ("CHX" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. On October 30, 2003, the Exchange filed Amendment No. 1 to the proposed rule change. ${ }^{3}$ The Commission is publishing this notice to solicit comments on the proposed rule change, as amended, from interested persons and is approving the proposal, as amended, on an accelerated basis.

## I. Self-Regulatory Organization's

Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend certain provisions of its rules to strengthen listing standards relating to shareholder approval for equity compensation plans. ${ }^{*}$

[^57]Below is the text of the proposed rule change, as amended. Proposed new language is italicized; proposed deleted language is [bracketed].

## Chicago Stock Exchange Rules

ARTICLE XXVIII
Listed Securities
Tier I Corporate Governance and Disclosure Standards

## Corporate Governance

RULE 19. The following Rule 19 applies [only] to Tier I issuers: (a)-(i)No change to text.
(j) Shareholder Approval. Each issuer shall require shareholder approval [of a plan or arrangement under (i) below, or] prior to the issuance of securities under (1), (2), (3) or (4)[(ii), (iii) or (iv)] below[, when]:
(1) Equity Compensation Plans. When an equity compensation plan, pursuant to which options or stock may be acquired by officers, directors, emplovees or consultants, is established or materially amended, except for:
(A) Warrants or rights issued generally to all security holders of the company or stock purchase plans available on equal terms to all security holders of the company (such as a typical dividend reinvestment plan); or (B)(i) Tax qualified, nondiscriminatory employee benefit plans or parallel non-qualified plans, provided such plans are approved by the issuer's independent compensation committee or a majority of the issuer's independent directors; or (ii) plans that provide non-U.S. emplovees with substantially the same benefits as a comparable tax qualified, nondiscriminatory employee benefit plan or parallel nonqualified plan that the issuer provides to U.S. employees, but for features necessary to comply with applicable foreign tax law; or (iii) plans that merely provide a convenient way to purchase shares on the open market or from the issuer at fair market value; or
(C) Plans or arrangements relating to an acquisition or merger where: (i) The issuer is converting, replacing or adjusting outstanding options or other equity compensation awards to reflect the transaction; or (ii) the issuer is using shares available under certain plans acquired in acquisitions or mergers for certain post-transaction grants, as set out in Interpretation and Policy .06; or

[^58](D) Issuances to a person not previously an employee or director of the company, or following a bona fide period of non-employment or nonservice, as an inducement material to the individual's entering into employment with the issuer, provided such issuances are approved by the issuer's independent compensation committee or by a majority of the issuer's independent directors. Promptly following an issuance of any employment inducement grant in reliance on this exception, a company must disclose in a press release the material terms of the grant, including the recipient(s) of the grant and the number of shares.
(E) Each issuer must notify the Exchange, in writing, when it uses one of the exemptions set forth in paragraphs ( $A$ ) through ( $D$ ) above.
[(i) A stock option or purchase plan is to be established or other arrangement made pursuant to which stock may be acquired by officers or directors, except for warrants or rights issued generally to security holders of the company or broadly based plans or arrangements including other employees (e.g., ESOPs) In a case where the shares or options are to be issued to a person not previously employed by the company, as an inducement essential to the individual's entering into an employment contract with the company, provided that the potential issuance of shares pursuant to the options does not exceed $5 \%$ of the company's outstanding stock,
shareholder approval will generally not be required.]
[In the case of the establishment of a plan or arrangement under which the amount of securities which may be issued does not exceed the lesser of $1 \%$ of the number of shares of common stock outstanding, $1 \%$ of the voting power outstanding or 25,000 shares, shareholder approval will generally not be required, provided that all arrangements adopted without shareholder approval in any five-year period do not authorize, in the aggregate, the issuance of more than $10 \%$ of outstanding common stock or voting power outstanding. (For the purpose of calculating the percentage of stock issued in the aggregate, stock to be issued pursuant to options which have expired and/or been cancelled shall not be included).]
([ii]2 No change to text.
([iii]3 No change to text.

([v] 5 No change to text.
([vi]6 No change to text.
([vii] 7 No change to text.

## * * * Interpretations and Policies

. 01 No change to text.
.02-. 05 Reserved.
.06 Shareholder approval of equity compensation plans.
(1) An "equity compensation plan" is a plan or other arrangement that provides for the delivery of equity securities (either newly issued or treasury shares) of the listed company to any officer, director, emplovee or consultant as compensation for services. Even a compensatory grant of options or other equity securities that is not made under a formal plan is an equity compensation plan, for purposes of this rule.
(2) A "material revision" of an equity compensation plan includes, but is not limited to:
(a) any material increase in the number of shares to be issued under the plan (other than to reflect a reorganization, stock split, merger, spinoff or similar transaction);
(b) Any material increase in benefits to participants, including any material change that (i) permits a repricing (or decrease in exercise price) of outstanding options (ii) reduces the price at which shares or options to purchase shares may be offered or (iii) extends the duration of a plan:
(c) Any material expansion of the class of participants eligible to participate in the plan; and (d) Any expansion in the types of options or awards provided under the plan.
(3) In general, if a plan contains a formula for automatic increases in the shares available (sometimes called an "evergreen formula"), or for cutomatic grants pursuant to a dollar-based formula (such as annual grants based on a certain dollar value, or matching contributions based upon the amount of compensation the participant elects to defer), the plan cannot have a term in excess of ten years unless shareholder approval is obtained every ten years. However, if a plan does not contain a formula and does not impose a limit on the number of shares available for grant, each grant under the plan must be approved by shareholders. A requirement that grants be made out of treasury shares or repurchased shares will not alleviate the shareholder approval requiremenis set out in this paragraph.
(4) When preparing-plans and presenting them for shareholder approval, issuers should strive to make plan terms easy to understand. Plans meant to permit repricing should use explicit terminology to make this intent clear.
(5) An issuer is not permitted to use repurchased shares to fund option plans or grants without prior shareholder approval.
(6) Rule 19(j)(1)(C)(ii) provides that plans or arrangements relating to an acquisition or merger do not require shareholder approval where the issuer is using shares available under certain plans acquired in acquisitions or mergers for certain post-transaction grants. This exception applies to situations where the party which is not a listed company following the transaction has shares available for grant under pre-existing plans that were previously approved by shareholders that meet the requirements of Rule 19(j). These shares may be used for posttransaction grants of options and other equity awards by the listed company (after appropriate adjustment of the number of shares to reflect the transaction), either under the preexisting plan or under another plan, without further shareholder approval, provided (a) the time during which those shares are available for grants is not extended beyond the period when they would have been available under the pre-existing plan, absent the transaction, and (b) such options and other awards are not granted to individuals who were employed by the granting company or its subsidiaries at the time the merger or acquisition was consummated. A plan adopted in contemplation of the merger or acquisition is not considered a preexisting plan for purposes of this exception. Any shares available for issuance under an equity compensation plan acquired in connection with a merger or acquisition would be counted in determining whether the transaction involved the issuance of $20 \%$ or more of the company's outstanding common stock, thus triggering the shareholder requirements under Rule $19(j)(3)(b)$.
(7) A "tax qualified, nondiscriminatory employee benefit plan' is one that meets the requirements of Section 401(a) or 423 of the Internal Revenue Code and applicable Treasury Department regulations.
(8) A "parallel nonqualified plan" means a plan that is a "pension plan" within the meaning of the Employee Retirement Income Security Act ("ERISA"), 29 U.S.C. §1002, that is designed to work in parallel with a plan intended to be qualified under Internal Revenue Code Section 401(a), to provide benefits that exceed the limits set forth in Internal Revenue Code Section 402(g) (the section that limits an employee's annual pre-tax contributions to a 401(k) plan), Internal Revenue Code Section 401(a)(17) (the section that limits the
amount of an employee's compensation that can be taken into account for plan purposes) and/or Internal Revenue Code Section 415 (the section that limits the contributions and benefits under qualified plans) and/or any successor or similar limitations that may be enacted. However, a plan will not be considered a parallel nonqualified plan unless: (a) it covers all or substantially all employees of an employer who are participants in the related qualified plan whose annual compensation is in excess of the limit of Code Section 401(a)(17) (or any successor or similar limitation that may be enacted); (b) its terms are substantially the same as the qualified plan that it parallels except for the elimination of the limitations described in the preceding sentence; and (c) no participant receives employer equity contributions under the plan in excess of $25 \%$ of the participant's cash compensation.
(9) The Exchange precludes its member organizations from giving a proxy to vote on equity compensation plans unless the beneficial owner of the shares has given voting instructions. This prohibition is codified in Article XXXIII, Rule 3 and will become effective for any meeting of shareholders that occurs on or after the 90th day following Commission approval of the change.

## Tier II Corporate Governance, Disclosure, and Miscellaneous Requirements

RULE 21. The following Rule 21 applies only to Tier II issuers:
([1]a) No change to text.
(b) Each issuer shall comply with the shareholder approval requirements relating to equity compensation plans set out in Rule 19(j) of this Article and is subject to Interpretation . 06 of that rule.
([2]c) No change to text.
([3]d) No change to text.

## ARTICLE XXXIII

## Proxies

## Instructions of Beneficial Owner

RULE 3. A member organization shall give a proxy for stock registered in its name, at the direction of the beneficial owner. If the stock is not in the control or possession of the member organization, satisfactory proof of the beneficial ownership as of the record date may be required.

A member organization may give a proxy to vote any stock registered in its name if such organization holds such stock as executor, administrator, guardian, trustee, or in a similar representative or fiduciary capacity with authority to vote.
A member organization which was transmitted proxy soliciting material to the beneficial owner of stock and solicited voting instructions in accordance with the provisions of Rule 2, and which has not received instructions from the beneficial owner by the date specified in the statement accompanying such material may give a proxy to vote such stock, except for voting on equity compensation plans as set forth below, provided the person signing the proxy has no knowledge of any contest as to the action to be taken at the meeting and provided such action does not include authorization for a merger, consolidation or any other matter which may affect substantially the legal rights or privileges of such stock.

A member organization may not give a proxy to vote without instructions from beneficial owners when the matter to be voted upon authorizes the implementation of any equity compensation plan, or any material revision to the terms of any existing equity compensation plan (whether or not shareholder approval of such plan is required by Article XXVIII, Rules 19 or 21). The provision will become effective for any meeting of shareholders that occurs on or after the 90th day following Commission approval of the change.

## II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the
places specified in Item III below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

## A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

## 1. Purpose

The Exchange proposes to amend certain provisions of the Exchange's rules to strengthen listing standards relating to shareholder approval for equity compensation plans.

Current CHX Article XXVIII, Rule 19, generally requires issuers to seek shareholder approval of stock option or purchase plans pursuant to which officers or directors might acquire stock. The Rule, however, contains an exception for broadly based plans or arrangements that include other employees, as well as for plans that meet a specific de minimis standard. To enhance investor confidence and to ensure that the Exchange's requirements for shareholder approval of equity compensation plans are not less stringent than those of other markets, the Exchange now proposes to delete both the de minimis exception and the exception for broadly based plans and proposes to expand the rule to require that shareholder approval be obtained whenever an equity compensation plan is established or materially amended, unless a specifically-defined exception applies. ${ }^{5}$ The Exchange proposes to make these requirements applicable to both its Tier I and Tier II issuers. ${ }^{6}$

Exceptions. The Exchange's revised rule would provide exceptions for: (1) Warrants or rights issued generally to all security holders of the company or stock purchase plans available on equal terms to all security holders; ${ }^{7}$ (2) certain tax qualified, non-discriminatory employee benefit plans, parallel non-qualified plans, plans that provide non-U.S. employees with the same benefits as tax qualified, nondiscriminatory employee benefit plans or parallel non-qualified plans or plans that merely provide a convenient way to purchase shares on the open market or from the issuer; ${ }^{8}$ (3)

[^59]certain plans or arrangements relating to an acquisition or merger; ${ }^{9}$ and (4) certain issuances given as material inducements to a person's decision to become an employee of the issuer, so long as the issuances are approved by the issuer's independent compensation committee or by a majority of its independent directors. ${ }^{10}$ Under the Exchange's proposal, as amended, each issuer must notify the Exchange, in writing, when it uses one of these exceptions. ${ }^{11}$
The Exchange believes that these exceptions are narrowly-tailored and appropriate. The Exchange believes that shareholder approval should not be separately required under the Exchange's listing standards for tax qualified, nondiscriminatory employee benefit plans because those plans are regulated under the Internal Revenue Code and Treasury Department regulations, which may already contain provisions requiring shareholder approval. Where that approval is not required, the Exchange believes that the additional protections from any inappropriate use of these plans and parallel non-qualified plans is provided through the requirement that these plans be approved by the issuer's independent compensation committee or a majority of the issuer's independent directors. Similarly, the Exchange believes that shareholder approval of inducement grants to new employees and directors is not appropriate because of the impracticality of seeking shareholder approval during the recruiting process and because these transactions occur when the company has an arm's-length relationship with the new employee and its interests are directly aligned with the interests of its shareholders. The Exchange believes that the exceptions associated with mergers and acquisitions are appropriate because they do not result

[^60]in any increase in the aggregate potential dilution of the combined enterprise.

In its proposed rules, the Exchange includes a definition of the types of "material revisions" of a plan that would cause shareholder approval to be required. Specifically, the rules confirm that a material revision includes, but is not limited to, a material increase in the number of shares to be issued under the plan (other than to reflect a reorganization, stock split, merger or similar transaction); a material increase in benefits to participants; a material expansion of the class of participants eligible to participate in the plan; and an expansion in the types of options or awards provided under the plan. ${ }^{12}$ Additional provisions of the proposed rules provide issuers with further guidance about situations that require (or do not require) shareholder approval. ${ }^{13}$

As a final change, the Exchange proposes to amend CHX Article XXXIII, Rule 3, to mirror requirements now set out in NYSE Rule 452 to prohibit a member from giving a proxy to vote on a matter that establishes or materially amends an equity compensation plan, unless the member has instructions from the beneficial owners of those shares.

Effective date. The Exchange proposes that the changes to CHX Rules 19 and 21 become effective upon Commission approval and that existing equity compensation plans be grandfathered. Any material modifications to existing (i.e., grandfathered) plans would be subject to applicable shareholder approval requirements of these rules. The Exchange proposes that its changes to Article XXXIII, Rule 3, take effect for any meeting of shareholders that occurs on or after the 90th day following Commission approval of the change.

[^61]
## 2. Statutory Basis

The Exchange believes that the proposed rule change, as amended, is consistent with Section 6 of the Act, ${ }^{14}$ in general, and furthers the objectives of Section 6(b)(5) of the Act, ${ }^{15}$ in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. The Exchange believes that its proposal, as amended, is intended to be essentially identical to those submitted by the NYSE and Nasdaq and approved by the Commission. ${ }^{16}$

## B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

## C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments on the proposed rule change were neither solicited nor received. The Exchange, however, did notify its issuers of the types of proposed rule changes that it was contemplating and has not received any objections to those proposals.

## III. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change, as amended, is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 205490609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552 , will be available for inspection and copying at the Commission's Public Reference

[^62]Room. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR-CHX-2003-31 and should be submitted by November 28, 2003.

## IV. Commission's Findings and Order Granting Accelerated Approval to the Proposed Rule Change, As Amended

After careful review, the Commission finds that the Exchange's proposal, as amended, is consistent with the Act and the rules and regulations promulgated thereunder applicable to a national securities exchange and, in particular, with the requirements of Section 6(b) of the Act. ${ }^{17}$ Specifically, the Commission finds that approval of the Exchange's proposal, as amended, is consistent with Section 6(b)(5) of the Act ${ }^{18}$ in that it is designed to, among other things, facilitate transactions in securities; to prevent fraudulent and manipulative acts and practices; to promote just and equitable principles of trade; to remove impediments to and perfect the mechanism of a free and open market and a national market system; and, in general, to protect investors and the public interest; and does not permit unfair discrimination among issuers.

The Commission has long encouraged exchanges to adopt and strengthen their corporate governance listing standards in order to, among other things, restore investor confidence in the national marketplace. The Commission believes that the Exchange's amended proposal. which requires shareholder approval of equity compensation plans and which follows the Commission's approval of similar proposals by the NYSE, Nasdaq, and Amex ${ }^{19}$ is the first step under this directive because it should have the effect of safeguarding the interests of shareholders, while placing certain restrictions on Exchange-listed companies. ${ }^{20}$

In addition, the Commission notes that the Exchange's proposal, as amended, is similar and almost identical to proposals by NYSE and

[^63]Nasdaq requiring shareholder approval of equity compensation plans that have previously been approved by the Commission. ${ }^{21}$ The Commission believes that it has already considered and addressed the issues that may be raised by the Exchange's amended proposal when it approved these proposals. The Commission notes that approval of the Exchange's proposal, as amended, will conform the Exchange's shareholder approval requirements for equity compensation plans with those of the NYSE and Nasdaq, and will immediately impose the same requirements on the Exchange's issuers as those imposed upon NYSE, Nasdaq, and Amex issuers. The adoption of these standards by the Exchange is an important step to ensure that issuers will not be able to avoid shareholder approval requirements for equity compensation plans based on their listed marketplace.

## A. Exception From Shareholder Approval for Inducement Grants

The Commission believes that the requirement that the issuance of all inducement grants be subject to review by either the issuer's independent compensation committee or a majority of the board's independent directors, under the Exchange's amended proposal, should prevent abuse of this exception from shareholder approval. In addition, the Exchange proposes to limit its exception for inducement grants to new employees or to previous employees being rehired after a bona fide period of interruption of employment, and to new employees in connection with an acquisition or merger. The Commission believes that these limitations should help to prevent the inducement exception from being used inappropriately.
The Commission notes that the Exchange is proposing to include a requirement, similar to the requirement under the NYSE and Nasdaq's recently approved shareholder approval rules, that, promptly following the grant of any inducement award, companies must disclose in a press release the material terms of the award, including the recipient(s) of the award and the number of shares involved. ${ }^{22}$ The

[^64]Continued

Commission notes that the Exchange is also proposing a requirement, similar to the requirements under the NYSE and Nasdaq's recently approved shareholder approval rules, ${ }^{23}$ that an issuer must notify it in writing when it uses this exception, and/or any other exception, from its shareholder approval requirement. The Commission believes that these disclosure and notification requirements will provide transparency to investors and should reduce the potential for abuse of this exception for inducement grants.

## B. Exception From Shareholder Approval for Mergers and Acquisitions

The Commission notes that the Exchange's exception from shareholder approval for mergers and acquisitions contains safeguards that should prevent abuse in this area. First, only preexisting plans that were previously approved by the acquired company's shareholders would be available to the listed company for post-transactional grants. In addition, shares under those previously approved plans could not be granted to individuals who were employed, immediately before the transaction, by the post-transaction listed company or its subsidiaries. The Commission also notes that, under the Exchange's amended proposal, any shares reserved for listing in connection with a merger or acquisition pursuant to this exception would be counted by the Exchange in determining whether the transaction involved the issuance of $20 \%$ or more of the company's outstanding common stock, thereby requiring shareholder approval under CHX Rule 19(j)(3)(B). Finally, the Commission notes that the Exchange proposes an additional requirement that an issuer must notify it in writing when it uses this exception, and/or any other exception, from its shareholder approval requirement. Based on the above, the Commission believes that the Exchange has provided measures to ensure that the exception for mergers and acquisitions is only used in limited circumstances, which should help reduce the potential for dilution of shareholder interests.

## C. Exception From Shareholder Approval for Tax Qualified and Parallel Nonqualified Plans

The Commission believes that, given the extensive government regulationthe Internal Revenue Code and Treasury regulations-for tax qualified plans and

[^65]the general limitations associated with parallel nonqualified plans, shareholders should not experience significant dilution as a result of this exception. In addition, the Commission notes that the Exchange proposes to add a limitation under this exception that a plan would not be considered a nonqualified parallel plan under its proposal if employees who are participants in such a plan receive employer contributions under the plan in excess of $25 \%$ of the participants' cash compensation. The Commission further notes that the Exchange proposes an additional requirement that an issuer must notify it in writing when it uses this exception, and/or any other exception, from its shareholder approval requirement. The Commission believes that, taken together, these limitations should reduce concerns regarding abuse of this exception from the shareholder approval requirements.

In addition, the Commission notes that, similar to the exceptions in the NYSE and Nasdaq's recently approved shareholder approval rules, the Exchange proposes to adopt an exception from the shareholder approval requirements for an equity compensation plan that provides nonU.S. employees with substantially the same benefits as a comparable tax qualified, non-discriminatory employee benefit plan or parallel nonqualified plan that the issuer provides to its U.S. employees, but for features necessary to comply with applicable foreign tax law. The Commission believes that this change will conform the Exchange's shareholder approval rule to that of the NYSE and Nasdaq and will provide greater clarity for issuers regarding tax qualified, non-discriminatory employee benefit plans and parallel nonqualified plans for their non-U.S. employees.

## D. Material Revisions to Plans

The Commission notes that the Exchange proposes to provide a nonexclusive list, similar to lists found in the NYSE and Nasdaq's shareholder approval rules, ${ }^{24}$ as to what constitutes a material revision to a plan. As noted above, material revisions to plans will require shareholder approval under Exchange rules. A material revision under the Exchange's amended proposal would include, but is not limited to: A material increase in the number of shares to be issued under the plan (other than to reflect a reorganization, stock split, merger, spinoff or similar transaction); a material increase in benefits to participants, including any material change to (1) permit a repricing

[^66](or decrease in exercise price) of outstanding options, (2) reduce the price at which shares or options to purchase shares may be offered, or (3) extend the duration of the plan; a material expansion of the class of participants eligible to participate in the plan; and an expansion of the type of options or awards available under the plan. The Exchange's proposal, as amended, also describes what would constitute a material revision for plans containing a formula for automatic increases (such as evergreen plans) and automatic grants requiring shareholder approval.

The Commission believes that the Exchange's non-exclusive list of what would constitute a material revision to a plan provides companies with clarity and guidance for when certain amendments and revisions to plans would require shareholder approval. The Commission also believes that the Exchange's proposal to conform its nonexclusive list with the NYSE and Nasdaq's rules on material amendments/revisions should help to ensure that the concept of material amendments/revisions is consistent among the markets so that differences between the markets cannot be abused.

## E. Repricing of Plans

The Commission notes that, under the Exchange's proposal, as amended, if a plan is amended to permit repricing, such an amendment would be considered a material amendment to a plan requiring shareholder approval. In addition, the Exchange recommended in its proposal that plans meant to permit repricing should explicitly and clearly state that repricing is permitted.

The Commission believes that the Exchange's proposal, as amended, should benefit shareholders by ensuring that companies cannot do a repricing of options, which can have a dilutive effect on shares, without explicit shareholder approval of such provisions and their terms. The Commission also believes that the Exchange's approach to repricings is similar to the NYSE and Nasdaq's respective approaches to repricings, and should offer companies clarity and guidance as to when a change in a plan regarding the repricing of options would trigger a shareholder approval requirement.

## F. Evergreen or Formula Plans and Plans Without a Formula or Limit on the Number of Shares Available

The Commission notes the Exchange's proposal, as amended, provides guidance for the treatment of evergreen/ formula plans. More specifically, under the Exchange's proposal, as amended, if a plan contains a formula for automatic
increases in the shares available or for automatic grants pursuant to a formula, such plans cannot have a term in excess of ten years unless shareholder approval is obtained every ten years. In addition, under the Exchange's proposal, as amended, if a plan contains no limit on the number of shares available and is not a formula plan, then each grant under the plan will require separate shareholder approval. Furthermore, the Exchange's proposal, as amended, provides that a requirement that grants be made out of treasury or repurchased shares will not alleviate the need for. shareholder approval for additional grants.

The Commission believes that these provisions should help to ensure that certain terms of a plan cannot be drafted so broad as to avoid shareholder scrutiny and approval. The Commission also believes that the Exchange's proposed rules relating to the treatment of evergreen/formula plans and plans that do not contain a formula or place a limit on the number of shares available should provide more clarity and transparency to issuers as to when shareholder approval would be required for such plans. Finally, the Commission believes that the provision ensuring that treasury and repurchased shares cannot be used to avoid these additional shareholder approval requirements strengthens the proposal and ensures that companies cannot avoid compliance with the rule.

## G. Miscellaneous Provisions

The Commission notes that the Exchange's amended proposal-similar to the NYSE and Nasdaq's recently approved shareholder approval rules ${ }^{25}$-incorporates the term "equity compensation" and proposes that plans that merely provide a convenient way to purchase shares in the open market or from the issuer at fair market price on equal terms to all security holders would not require shareholder approval. The Commission believes that the Exchange's proposal, as amended, is consistent with the NYSE and Nasdaq's rules in this area and should provide greater clarity with respect to which plans would and would not require shareholder approval.

The Commission notes that the Exchange's proposal, as amended, provides that pre-existing plans, which were adopted prior to the SEC's approval of the Exchange's amended proposal, would essentially be "grandfathered" and would not require shareholder approval unless the plans were materially amended. Under the

[^67]Exchange's amended proposal, however, shareholder approval is required for each grant made pursuant to any preexisting plans that were not approved by shareholders and that do not have an evergreen formula or a specific number of shares available under the plan. This is consistent with the NYSE, Nasdaq, and Amex shareholder approval rules on this matter. The Commission believes that this clarification should provide companies with guidance as to which plans would be subject to the Exchange's new shareholder approval requirements.

## H. Elimination of Broker-Dealer Voting on Equity Compensation Plans

The Commission believes that the Exchange's proposed amendment to CHX Article XXXIII, Rule 3, to preclude broker voting on equity compensation plans is consistent with the Act. The Commission notes that equity compensation plans have become an important issue for shareholders. Because of the potential for dilution from issuances under such plans, shareholders should be making the determination rather than brokers on their behalf. The Commission further notes that NASD rules do not provide for broker voting on any matters and NYSE rules prohibit broker voting on equity compensation plans. ${ }^{26}$ Therefore, the Exchange's proposed provision would be consistent with NASD and NYSE rules regarding broker voting on equity compensation plans. The Commission has considered the impact on smaller issuers, such as those listed on Nasdaq and the Amex, in response to the comments on this issue. ${ }^{27}$ The Commission believes that the benefit of ensuring that the votes reflect the views of beneficial shareholders on equity compensation plans outweighs the potential difficulties in obtaining the vote.

The Commission also notes that the Exchange proposes to implement a transition period that would make the new rule eliminating broker voting on equity compensation plans applicable only to shareholder meetings that occur on or after the 90th day from the effective date of the Exchange's proposal.

## I. Summary

Overall, the Commission believes that the Exchange's proposal, as amended, is similar to the NYSE and Nasdaq's recently approved shareholder approval

[^68]rules. ${ }^{28}$ The Commission therefore believes that the Exchange's proposal, as amended, should provide for more clear and uniform standards for shareholder approval of equity compensation plans. The Commission notes that, even with the availability of the proposed limited exceptions from shareholder approval under the Exchange's amended proposal, shareholder approval under the new standards would be required in more circumstances than under existing Exchange rules. The Commission further notes that the Exchange proposes to adopt a requirement that an issuer must notify it in writing when it uses one of the exceptions from the shareholder approval requirements. The Commission believes that such a requirement, coupled with the additional disclosure requirements for inducement grants, should reduce the potential for abuse of any of the exceptions. ${ }^{29}$ In addition, the Exchange's proposed amendment to CHX Article XXXIII, Rule 3, which would preclude broker-dealers from voting on equity compensation plans without explicit instructions from the beneficial owner, is consistent with the standard under current NYSE and NASD rules.

The Commission believes that the Exchange's proposal, as amended, which is similar to the NYSE and Nasdaq's şhareholder approval rules, ${ }^{30}$ sets a consistent, minimum standard for shareholder approval of equity compensation plans. The Commission believes that the Exchange's proposal, as amended, should help to ensure that companies will not make listing decisions simply to avoid shareholder approval requirements for equity compensation plans and should provide shareholders with greater protection from the potential dilutive effect of equity compensation plans. Based on the above, the Commission finds that the Exchange's proposal, as amended, should help to protect investors, is in the public interest, and does not unfairly discriminate among issuers, consistent with Section 6(b)(5) of the Act. ${ }^{31}$ The Commission therefore finds the Exchange's proposal, as amended, to be consistent with the Act and the rules and regulations thereunder.

## V. Accelerated Approval of the Exchange's Proposal and Amendment No. 1

The Commission finds good cause for approving the Exchange's proposal and

[^69]Amendment No. 1 thereto prior to the thirtieth day after the date of publication of notice thereof in the Federal Register. The Commission notes that the Exchange's proposal, as amended, is similar to the NYSE and Nasdaq's proposals requiring shareholder approval of equity compensation plans. Both the NYSE and Nasdaq's proposals were published for comment in the Federal Register and recently approved by the Commission. ${ }^{32}$ The Commission believes that it already considered and addressed the issues that may be raised by the Exchange's proposal in its approval of the NYSE and Nasdaq's proposals. ${ }^{33}$

The Commission believes that accelerated approval of the Exchange's proposal, as amended, is essential to allow for immediate harmonization of, and consistency in, the shareholder approval requirements for equity compensation plans among the markets. This will prevent issuers from making listing decisions based on differences in self-regulatory organization shareholder approval requirements and should provide equal investor protection to shareholders on the dilutive effects of plans irrespective of where the security trades. The Commission further believes that making the Exchange's new shareholder approval rules effective upon Commission approval will immediately impose the same requirements on the Exchange's issuers as those imposed upon NYSE, Nasdaq, and Amex issuers. Based on the above, the Commission finds good cause, consistent with Sections 6(b)(5) and 19(b)(2) of the Act, ${ }^{34}$ to approve the Exchange's proposal and Amendment No. 1 thereto on an accelerated basis.

## VI. Conclusion

It is therefore ordered, pursuant to Section $19(\mathrm{~b})(2)$ of the Act, ${ }^{35}$ that the proposed rule change (SR-CHX-200331) and Amendment No. 1 thereto are

[^70]hereby approved on an accelerated basis.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority. ${ }^{36}$

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-48738; File No. SR-CSE-2003-11]
Self-Regulatory Organizations; Notice of Filing and Order Granting Accelerated Approval to a Proposed Rule Change and Amendment No. 1 Thereto by the Cincinnati Stock Exchange Relating to Shareholder Approval of Equity Compensation Plans
October 31. 2003.
Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), ${ }^{1}$ and Rule 19b-4 thereunder, ${ }^{2}$ notice is hereby given that on October 1, 2003, the Cincinnati Stock Exchange ("CSE" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. On October 29, 2003, the Exchange filed Amendment No. 1 to the proposed rule change. ${ }^{3}$ The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons and is approving the proposal and Amendment No. 1 thereto on an accelerated basis.

## 1. Self-Regulatory Organization's

 Statement of the Terms of Substance of the Proposed Rule ChangeThe Exchange is proposing to implement changes to its listing standards to adopt requirements related to shareholder approval of equity compensation plans and to amend its rules related to the voting of proxies. The Exchange represents that this proposed rule change is part of an

[^71]ongoing review of the Exchange's listing standards aimed at helping to restore investor confidence by strengthening corporate governance practices.

Below is the text of the proposed rule change. Proposed new language is italicized; proposed deleted language is [bracketed].

## Rule 13.3 Proxies

(a)-(c) No change to text.
(d) Notwithstanding the provisions of this Rule 13.3, a member may not give a proxy to vote without instructions from beneficial owners when the matter to be voted upon authorizes the implementation of any equity compensation plan, or any material revision to the terms of any existing equity compensation plan (whether or not stockholder approval of such plan is required pursuant to Rule 13.6). This provision will be effective for any meeting of shareholders that occurs on or after the 90th day following the effective date of this provision.

## Rule 13.6 Shareholder Approval of Equity Compensation Plans

Equity compensation plans can help align shareholder and management interests, and equity-based awards are often very important components of emplayee compensation. To provide checks and balances on the potential dilution resulting from the process of earmarking shares to be used for equitybased awards, the Exchange requires that all equity compensation plans, and any material revisions to the terms of such plans, be subject to shareholder approval, with limited exemptions identified in this rule.
(a) Definition of Equity Compensation Plan. An "equity compensation plan" is a plan or other arrangement that provides for the delivery of equity securities (either newly issued or treasury shares) of the listed company to any employee, director or other service provider as compensation for services. A compensatory grant of options or other equity securities that is not made under a plan is considered an "equity compensation plan" for purposes of these rules.
(b) Exceptions to Equity

Compensation Plan Definition. The following are not equity compensation plans, even if the brokerage and other costs of the plan are paid for by the listed company:
(1) Plans that are made available to shareholders generally, such as a typical dividend reinvestment plan;
(2) Plans that merely allow employees, directors or other service
providers to elect to buy shares on the open market or from the listed company for their current fair market value, regardless of whether: (i) The shares are delivered immediately or on a deferred basis; or (ii) the payments for the shares are made directly or by giving up compensation that is otherwise due (for example, through payroll deductions).
(c) Material Revisions. A "material revision" of an equity compensation plan includes, but is not limited to, the following:
(1) A material increase in the number of shares available under the plan, other than an increase solely to reflect a reorganization, stock split, merger, spinoff or similar transaction.
(i) If a plan contains a formula for automatic increases in the number of shares available (sometimes referred to as an "evergreen formula") or for automatic grants pursuant to a formula, each such increase or grant will be considered a revision requiring shareholder approval unless the plan has a term of not more than ten years. Regardless of the term, this type of plan is referred to below as a "formula plan." Examples of automatic grants pursuant to a formula are: (A) annual grants to directors of restricted stock having a certain dollar value, and ( $B$ ) "Matching contributions," whereby stock is credited to a participant's account based upon the amount of compensation the participant elects to defer.
(ii) If a plan contains no limit on the number of shares available and it is not a formula plan, then each grant under the plan will require separate shareholder approval regardless of whether the plan has a term of not more than ten years. This type of plan is referred to below as a "discretionary plan." A requirement that grants be made out of treasury shares or repurchased shares will not, in itself, be considered a limit or pre-established formula so as to prevent a plan from being considered a discretionary plan.
(2) An expansion of the types of awards available under the plan.
(3) A material expansion of the class of employees, directors or other service providers eligible to participate in the plan.
(4) A material extension of the term of the plan.
(5) A material change to the method of determining the strike price of options under the plan.
(i) A change in the method of determining "fair market value" from the closing price on the date of the grant to the average of the high and low price on the date of grant is an example of a
change that the Exchange would not review as material.
(6) The deletion or limitation of any provision prohibiting repricing of options. An amendment will not be considered a "material revision" if it curtails rather than expands the scope of the plan in question.
(d) Repricings. A plan that does not contain a provision that specifically permits repricing of options will be considered for purposes of this listing standard as prohibiting repricing. Accordingly, any actual repricing of options will be considered a material revision of a plan even if the plan itself is not revised. This consideration will not apply to a repricing through an exchange offer that commenced before the date this listing standard became effective. "Repricing" means any of the following or any other action that has the same effect:
(1) Lowering the strike price of an option after it is granted.
(2) Any other action that is treated as a repricing under generally accepted accounting principles.
(3) Canceling an option at a time when its strike price exceeds the fair market value of the underlying stock, in exchange for another option, restricted stock, or other equity, unless the cancellation and exchange occurs in connection with a merger, acquisition, spin-off or other similar corporate transaction.
(e) Exemptions. The listing standard does not require shareholder approval of employment inducement awards; certain grants, plans and amendments in the context of mergers and acquisitions; and certain specific types of plans, all described below. However, these exempt grants, plans and amendments may be made only with the approval of the company's independent compensation committee or the approval of a majority of the company's independent directors. Companies must also notify the Exchange in writing when they use one of these exemptions.
(1) Employment Inducement Awards. An employment inducement award is a grant of options or other equity-based compensation as a material inducement to a person or persons being hired by the listed company or any of its subsidiaries, or being rehired following a bona fide period of interruption of employment. Inducement awards include grants to new employees in connection with a merger or acquisition. Promptly following a grant of any inducement award in reliance on this exemption, the listed company must disclose in a press release the material terms of the award, including the
recipient(s) of the award and the number of shares involved.
(2) Mergers and Acquisitions. Two exemptions apply in the context of corporate acquisitions and mergers. First, shareholder approval will not be required to convert, replace or adjust outstanding options or other equity compensation awards to reflect the transaction. Second, shares available under certain plans acquired in corporate acquisitions and mergers may be used for certain post-transaction grants without further shareholder approval. This exemption applies to situations where a party that is not a listed company following the transaction has shares available for grant under pre-existing plans that were previously approved by shareholders. A plan adopted in contemplation of the merger or acquisition transaction would not be considered "pre-existing" for purposes of this exemption. Shares available under such a pre-existing plan may be used for post-transaction grants of options and other awards with respect to equity of the entity that is the listed company after the transaction, either under the pre-existing plan or another plan, without further shareholder approval, so long as:
(i) The number of shares available for grants is appropriately adjusted to reflect the transaction;
(ii) The time during which those shares are available is not extended beyond the period when they would have been available under the preexisting plan, absent the transaction; and
(iii) The options and other awards are not granted to individuals who were employed, immediately before the transaction, by the post-transaction listed company or entities that were its subsidiaries immediately before the transaction.
Any shares reserved for listing in connection with a transaction pursuant to either of these exemptions would be counted by the Exchange in determining whether the transaction involved the issuance of $20 \%$ or more of the company's outstanding common stock, and thus require shareholder approval. These merger-related exemptions will not result in any increase in the aggregate potential dilution of the combined enterprise. Further, mergers or acquisitions are not routine occurrences and are not likely to be abused. Therefore, the Exchange considers both of these exemptions to be consistent with the fundamental policy involved in this standard.
(3) Qualified Plans, Section 423 Plans and Parallel Excess Plans.
(i) The following types of plans, and material revisions thereto, are exempt from the shareholder approval requirement: (A) Plans intended to meet the requirements of Section 401(a) of the Internal Revenue Code (e.g., ESOPs); (B) plans intended to meet the requirements of Section 423 of the Internal Revenue Code; and (C) "parallel excess plans" as defined below:
(ii) Section 401(a) plans and Section 423 plans are already regulated under the Internal Revenue Code and Treasury regulations. Section 423 plans, which are stock purchase plans under which an employee can purchase no more than \$25,000 worth of stock per year at a plan-specified discount capped at $15 \%$ are also required by the Internal Revenue Code to receive shareholder approval. While Section 401 (a) plans and parallel plans are not required to be approved by shareholders, U.S. GAAP requires that the shares issued under these plans be "expensed" (i.e., treated as a compensation expense on the income statement) by the company issuing the shares. An equity compensation plan that provides nonU.S. employees with substantially the same benefits as a comparable Section 401(a) plan, Section 423 plan or parallel excess plan that the listed company' provides to its U.S. employees, but for features necessary to comply with applicable foreign tax law, are also exempt froin shareholder approval under this section.
(iii) The term "parallel excess plan" means a plan that is a "pension plan" within the meaning of the Employee Retirement Income Security Act ("ERISA") that is designed to work in parallel with a plan intended to be qualified under Internal Revenue Code Section 401(a) to provide benefits that exceed the limits set forth in Internal Revenue Code Section 402(g)(the section that limits an employee's annual pre-tax contributions to a 401(k) plan), Internal Revenue Code Section 401(a)(17)) the section that limits the amount of an employee's compensation that can be taken into account for plan purposes) and/or Internal Revenue Code Section 415 (the section that limits the contributions and benefits under qualified plans) and/or any successor or similar limitations that may hereafter be enacted. A plan will not be considered a parallel excess plan unless: $(A)$ it covers all or substantially all employees of an employer who are participants in the related qualified plan whose annual compensation is in excess of the limit of Internal Revenue Code Section 401(a)(17)(or any successor or similar limits that may hereafter be enacted); (B) its terms are substantially the same
as the qualified plan that it parallels except for the elimination of the limits described in the proceeding sentence and the limitation described in clause (C); and (C) no participant receives employer equity contributions under the plan in excess of $25 \%$ of the participant's cash compensation.
(f) Transition Rules. Except as provided below, a plan that was adopted before the date the Commission order approving this listing standard will not be subject to shareholder approval under this Rule 13.6 unless and until it is materially revised.
(1) In the case of a discretionary plan, as defined in "Material Revisions" above, whether or not previously approved by shareholders, additional grants may be made after the effective date of this Rule 13.6 without further shareholder approval only for a limited transaction period, defined below, and then only in a manner consistent with past practice. In applying this rule, if a plan can be separated into a discretionary plan portion and a portion that is not discretionary, the nondiscretionary portion of the plan can continue to be used separately, under the appropriate transition rule. For example, if a shareholder-approved plan permits both grants pursuant to a provision that makes available a specific number of shares, and grants pursuant to provision authorizing the use of treasury shares without regard to the specific share linit, the former provision (but not the latter) may continue to be used after the transition period, under the general rule above.
(2) In the case of a formula plan, as defined in "Material Revisions" above, that either (i) has not previously been approved by shareholders or (ii) does not have a term of ten years or less, additional grants may be made after the effective date of this Rule 13.6 without further shareholder approval only for a limited transition period, defined below.
(3) The limited transition period described in subparagraphs $(f)(1)$ and (f)(2) above will end upon the first to occur of: (i) The listed company's next annual meeting at which directors are elected that occurs more than 180 days after the effective date of this listing standard; (ii) the first anniversary of the effective date this Rule 13.6; and (iii) the expiration of the plan.
(4) A shareholder-approved formula plan may continue to be used after the end of this transition period if it is amended to provide for a term of ten years or less from the date of its original adoption or, if later, the date of its most recent shareholder approval. Such an amendment may be made before or after the effective date of this Rule 13.6, and
would not itself be considered a "material revision" requiring shareholder approval. In addition, a formula plan may continue to be used, without shareholder approval, if the grants after the effective date of this Rule 13.6 are made only from the shares available immediately before the effective date (i.e., based on formulaic increases that occurred prior to such effective date).
(g) Broker Voting. For member proxy requirements with respect to the implementation of any equity compensation plan, or any material revisions to the terms of any existing equity compensation plan, refer to Rule 13.3.

## II. Self-Regulatory Organization's Statement of the Purpose of, and

 Statutory Basis for, the Proposed Rule ChangeIn its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item III below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.
A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

## 1. Purpose

In conjunction with a review of its corporate listing standards with the goal of enhancing accountability, integrity and transparency of listed companies, the Exchange is proposing to adopt listing standards related to shareholder approval of equity compensation plans and to amend its rules related to the voting of proxies. ${ }^{4}$

[^72]The Exchange is proposing to adopt new CSE Rule 13.6, which would require shareholder approval of all equity-compensation plans and material revisions to such plans, subject to limited exemptions. Under the Exchange's proposal, an equity compensation plan is defined as a plan or other arrangement that provides for the delivery of equity securities (either newly issued or treasury shares) of the listed company to any employee, director or other service provider as compensation for services, including a compensatory grant of options or other equity securities that is not made under a plan. The Exchange is also proposing to provide clarification on certain plans that would not be considered equity compensation plans under this definition, such as plans that do not provide for delivery of equity securities of the issuer (e.g., plans that pay in cash) and deferred compensation plans under which employees pay full current market value for deferred shares.

In addition, the proposal provides for certain types of grants that are exempted from shareholder approval. These limited exemptions include: (1) Inducement awards to person's first becoming an employee of an issuer or any of its subsidiaries, to rehires following a bona fide period of employment interruption, and for grants to new employees in connection with a merger or acquisition; ${ }^{5}$ (2) mergers and acquisitions, when conversions, replacements or adjustments of outstanding options or other equity compensation awards are necessary to reflect the transaction, and when shares available under certain plans acquired in corporate acquisitions and mergers may be used for certain post-transaction grants without further shareholder approval; and (3) plans intended to meet the requirements of Section 401(a) of the Internal Revenue Code ${ }^{6}$ (e.g., ESOPs), plans intended to meet the requirements of Section 423 of the Internal Revenue Code, ${ }^{7}$ and parallel excess plans that meet certain conditions. The Exchange also proposes that, in circumstances in which equity compensation plans and

[^73]amendments to plans are not subject to shareholder approval, the plans and amendments still must be subject to the approval of the company's independent compensation committee or a majority of the company's independent directors. In addition, the Exchange proposes that an issuer must notify the Exchange in writing when it uses any of the exemptions from the shareholder approval requirements.

The Exchange is also proposing to provide a non-exclusive list of "material revisions" to a plan that would require shareholder approval. Within this list of revisions, the Exchange proposes to define the concepts of "evergreen plans" (i.e., plans that contain a formula for automatic increases in the shares available), "formula plans" (i.e., plans that provide for automatic grants pursuant to a formula), and
"discretionary plans" (i.e., plans that contain no limit on the number of shares available and plans that are not formula plans). The Exchange proposes that each grant under a discretionary plan require shareholder approval regardless of whether the plan has a term of not more than 10 years.

Shareholder approval will be required for plans adopted before the effective date of these proposed amendments that have not been approved by shareholders and have neither an evergreen formula nor a specific number of shares available under the plan. The Exchange is proposing to provide transition rules to clarify when shareholder approval will be required for these pre-existing plans. In addition, during the period prior to the approval, pre-existing plans may be utilized, but only in a manner consistent with past practice. The transition rules provide that an evergreen plan that was approved by shareholders but does not have a tenyear term must be: (1) Approved by shareholders before any shares that become available as a result of a formulaic increase are utilized, or (2) amended to include a term of no more than ten years from the date the plan was adopted or last approved by shareholders. If the plan were amended to include such term, shareholder approval would not be required. No action would be required, however, if a plan were frozen at the level of shares available at the time the rule becomes effective. The transition rules also provide that repricings that have commenced prior to the effectiveness of the proposal (i.e., exchange offers to optionees) will not be subject to shareholder approval (assuming that such repricing would not require shareholder approval under other Exchange By-Laws or Rules).

Finally, the Exchange is also proposing to amend CSE Rule 13.3 to prohibit members from voting on equity compensation plans unless the beneficial owner of the shares has given voting instructions. The Exchange proposes a transition period that will make these provisions of CBOE Rule 13.3 applicable only to shareholder meetings that occur on or after the 90th day following the date of the Commission order approving the rule.

## 2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6 of the Act, ${ }^{8}$ in general, and furthers the objectives of Section 6(b)(5) of the Act, ${ }^{9}$ in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

## B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

## C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments on the proposed rule change were neither solicited nor received.

## III. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549-0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552 , will be

[^74]available for inspection and copying at the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR-CSE-2003-11 and should be submitted by November 28, 2003.

## IV. Commission's Findings and Order Granting Accelerated Approval to the Proposed Rule Change

After careful review, the Commission finds that the Exchange's proposal is consistent with the Act and the rules and regulations promulgated thereunder applicable to a national securities exchange and, in particular, with the requirements of Section 6 (b) of the Act. ${ }^{10}$ Specifically, the Commission finds that approval of the Exchange's proposal is consistent with Section $6(b)(5)$ of the Act ${ }^{11}$ in that it is designed to, among other things, facilitate transactions in securities; to prevent fraudulent and manipulative acts and practices; to promote just and equitable principles of trade; to remove impediments to and perfect the mechanism of a free and open market and a national market system; and, in general, to protect investors and the public interest; and does not permit unfair discrimination among issuers.

The Commission has long encouraged exchanges to adopt and strengthen their corporate governance listing standards in order to, among other things, restore investor confidence in the national marketplace. The Commission believes that the Exchange's proposal, which requires shareholder approval of equity compensation plans and which follows the Commission's approval of similar proposals by the NYSE, Nasdaq, and Amex ${ }^{12}$ is the first step under this directive because it should have the effect of safeguarding the interests of shareholders, while placing certain restrictions on Exchange-listed companies.

In addition, the Commission notes that the Exchange's proposal is similar and almost identical to proposals by NYSE and Nasdaq requiring shareholder approval of equity compensation plans that have previously been approved by

[^75]the Commission. ${ }^{13}$ The Commission believes that it has already considered and addressed the issues that may be raised by the Exchange's proposal when it approved these proposals. The Commission notes that approval of the Exchange's proposal will conform the Exchange's shareholder approval requirements for equity compensation plans with those of the NYSE and Nasdaq, and will immediately impose the same requirements on the Exchange's issuers as those imposed upon NYSE, Nasdaq, and Amex issuers. The adoption of these standards by the Exchange is an important step to ensure that issuers will not be able to avoid shareholder approval requirements for equity compensation plans based on their listed marketplace.

## A. Exemption From Shareholder Approval for Inducement Grants

The Commission believes that the requirement that the issuance of all inducement grants be subject to review by either the issuer's independent compensation committee or a majority of the board's independent directors, under the Exchange's proposal, should prevent abuse of this exemption from shareholder approval. In addition, the Exchange proposes to limit its exemption for inducement grants to new employees or to previous employees being rehired after a hona fide period of interruption of employment, and to new employees in connection with an acquisition or merger. The Commission believes that these limitations should help to prevent the inducement exemption from being used inappropriately.

The Commission notes that the Exchange is proposing to include a requirement, similar to the requirement under the NYSE and Nasdaq's recently approved shareholder approval rules, that, promptly following the grant of any inducement award, companies must disclose in a press release the material terms of the award, including the recipient(s) of the award and the number of shares involved. ${ }^{14}$ The Commission notes that the Exchange is also proposing a requirement, similar to the requirements under the NYSE and Nasdaq's recently approved shareholder

[^76]approval rules, 1.5 that an issuer must notify it in writing when it uses this exemption, and/or any other exemption, from its shareholder approval requirement. The Commission believes that these disclosure and notification requirements will provide transparency to investors and should reduce the potential for abuse of this exemption for inducement grants.

## B. Exemption From Shareholder Approval for Mergers and Acquisitions

The Commission notes that the Exchange's exemption from shareholder approval for mergers and acquisitions contains safeguards that should prevent abuse in this area. First, only preexisting plans that were previously approved by the acquired company's shareholders would be available to the listed company for post-transactional grants. In addition, shares under those previously approved plans could not be granted to individuals who were employed, immediately before the transaction, by the post-transaction listed company or its subsidiaries. The Commission also notes that, under the Exchange's proposal, any shares reserved for listing in connection with a merger or acquisition pursuant to this exemption would be counted by the Exchange in determining whether the transaction involved the issuance of $20 \%$ or more of the company's outstanding common stock, thereby requiring shareholder approval. Finally, the Commission notes that the Exchange proposes an additional requirement that an issuer must notify it in writing when it uses this exemption, and/or any other exemption, from its shareholder approval requirement. Based on the above, the Commission believes that the Exchange has provided measures to ensure that the exemption for mergers and acquisitions is only used in limited circumstances, which should help reduce the potential for dilution of shareholder interests.

## C. Exemption From Shareholder Approval for Tax Qualified and Paralle! Nonqualified Plans

The Commission believes that, given the extensive government regulationthe Internal Revenue Code and Treasury regulations-for tax qualified plans and the general limitations associated with parallel nonqualified plans, shareholders should not experience significant dilution as a result of this exemption. In addition, the Commission notes that the Exchange proposes to add
${ }^{15}$ See Section 303A(8) of the NYSE's Listed Company Manual and NASD Rules $4310(\mathrm{c})(17)(\mathrm{A})$ and $4320(\mathrm{e})(15)(\mathrm{A})$.
a limitation under this exemption that a plan would not be considered a nonqualified parallel plan under its proposal if employees who are participants in such a plan receive employer contributions under the plan in excess of $25 \%$ of the participants' cash compensation. The Commission further notes that the Exchange proposes an additional requirement that an issuer must notify it in writing when it uses this exemption, and/or any other exemption, from its shareholder approval requirement. The Commission believes that, taken together, these limitations should reduce concerns regarding abuse of this exemption from the shareholder approval requirements.

In addition, the Commission notes that, similar to the exemptions in the NYSE and Nasdaq's recently approved shareholder approval rules, the Exchange proposes to adopt an exemption from the shareholder approval requirements for an equity compensation plan that provides nonU.S. employees with substantially the same benefits as a comparable Section 401(a) plan, Section 423 plan or parallel excess plan that the listed company provides to its U.S. employees, but for features necessary to comply with applicable foreign tax law. The Commission believes that this change will conform the Exchange's shareholder approval rule to that of the NYSE and Nasdaq and will provide greater clarity for issuers regarding tax qualified, non-discriminatory employee benefit plans and parallel nonqualified plans for their non-U.S. employees.

## D. Material Revisions to Plans

The Commission notes that the Exchange proposes to provide a nonexclusive list, similar to lists found in the NYSE and Nasdaq's shareholder approval rules, ${ }^{16}$ as to what constitutes a material revision to a plan. As noted above, material revisions to plans will require shareholder approval under Exchange rules. A material revision under the Exchange's proposal would include, but is not limited to: a material increase in the number of shares to be issued under the plan (other than to reflect a reorganization, stock split, merger, spinoff or similar transaction); an expansion of the type of awards available under the plan; a material expansion of the class of participants eligible to participate in the plan; a material extension of the term of the plan; a material change to limit or delete any provisions prohibiting repricing of options in a plan or for determining the strike or exercise price of options under

[^77]a plan. The Exchange's proposal also describes what would constitute a material revision for plans containing a formula for automatic increases (such as evergreen plans) and automatic grants requiring shareholder approval.
The Commission believes that the Exchange's non-exclusive list of what would constitute a material revision to a plan provides companies with clarity and guidance for when certain amendments and revisions to plans would require shareholder approval. The Commission also believes that the Exchange's proposal to conform its nonexclusive list with the NYSE and Nasdaq's rules on material amendments/revisions should help to ensure that the concept of material amendments/revisions is consistent among the markets so that differences between the markets cannot be abused.

## E. Repricing of Plans

The Commission notes that the Exchange's proposal provides that, if a plan explicitly contains a repricing provision, shareholder approval would be required to delete or limit the repricing provisions. The Commission further notes that the Exchange's proposal provides that, if a plan is silent on repricing, it will be considered as prohibiting repricing and shareholder approval would be required to permit repricing under the plan. The Exchange's proposal also clarifies that repricings that have commenced prior to the date of effectiveness of its proposal would not be subject to shareholder approval, provided that such repricing does not require shareholder approval under the Exchange's existing shareholder approval rules.

The Commission believes that the Exchange's proposal should benefit shareholders by ensuring that companies cannot do a repricing of options, which can have a dilutive effect on shares, without explicit shareholder approval of such provisions and their terms. The Commission also believes that the Exchange's approach to repricings is similar to the NYSE and Nasdaq's respective approaches to repricings, and should offer companies clarity and guidance as to when a change in a plan regarding the repricing of options would trigger a shareholder approval requirement.

## F. Evergreen or Formula Plans and

Plans Without a Formula or Limit on the Number of Shares Available

The Commission notes the Exchange's proposal provides guidance for the treatment of evergreen/formula plans. More specifically, under the Exchange's proposal, if a plan contains a formula
for automatic increases in the shares available or for automatic grants pursuant to a formula, such plans cannot have a term in excess of ten years unless shareholder approval is obtained every ten years. In addition, under the Exchange's proposal, if a plan contains no limit on the number of shares available and is not a formula plan, then each grant under the plan will require separate shareholder approval. Furthermore, the Exchange's proposal provides that a requirement that grants be made out of treasury or repurchased shares will not alleviate the need for shareholder approval for additional grants.

The Commission believes that these provisions should help to ensure that certain terms of a plan cannot be drafted so broad as to avoid shareholder scrutiny and approval. The Commission also believes that the Exchange's proposed rules relating to the treatment of evergreen/formula plans and plans that do not contain a formula or place a limit on the number of shares available should provide more clarity and transparency to issuers as to when shareholder approval would be required for such plans. Finally, the Commission believes that the provision ensuring that treasury and repurchased shares cannot be used to avoid these additional shareholder approval requirements strengthens the proposal and ensures that companies cannot avoid compliance with the rule.
The Commission further notes that the Exchange has proposed a transition period for evergreen/formula plans and discretionary plans. The limited transition period would end on the first to occur of the following: (1) The listed company's next annual meeting at which directors are elected that occurs more than 180 days after the date of the effective date of the Exchange's proposal; (2) the first anniversary of the effective date of the Exchange's proposal; or (3) the expiration of the plan. The Commission believes that the Exchange's proposed transition period for evergreen/formula and discretionary plans should provide companies with additional clarity and guidance as to when shareholder approval would be required for such plans while in the transition period, and should provide companies with more time to comply with the Exchange's new shareholder approval requirements for evergreen/ formula type plans. The Commission believes that this period is not so long as to permit abuse of the shareholder approval requirement, and at most, will last one year from the date of this Commission approval order.

## G. Miscellaneous Provisions

The Commission notes that the Exchange's proposal-similar to the NYSE and Nasdaq’s recently approved shareholder approval rules ${ }^{17}$ incorporates the term "equity compensation" and proposes that plans that merely provide a convenient way to purchase shares in the open market or from the issuer at fair market price on equal terms to all security holders would not require shareholder approval. The Commission believes that the Exchange's proposal is consistent with the NYSE and Nasdaq's rules in this area and should provide greater clarity with respect to which plans would and would not require shareholder approval.

The Commission notes that the Exchange's proposal provides that preexisting plans, which were adopted prior to the SEC's approval of the Exchange's proposal, would essentially be "grandfathered" and would not require shareholder approval unless the plans were materially amended. Under the Exchange's proposal, however, shareholder approval is required for each grant made pursuant to any preexisting plans that were not approved by shareholders and that do not have an evergreen formula or a specific number of shares available under the plan. This is consistent with the NYSE, Nasdaq, and Amex shareholder approval rules on this matter. The Commission believes that this clarification should provide companies with guidance as to which plans would be subject to the Exchange's new shareholder approval requirements.

## H. Elimination of Broker-Dealer Voting on Equity Compensation Plans

The Commission believes that the Exchange's proposed provision, CSE Rule 3.3(d), to preclude broker voting on equity compensation plans is consistent with the Act. The Commission notes that equity compensation plans have become an important issue for shareholders. Because of the potential for dilution from issuances under such plans, shareholders should be making the determination rather than brokers on their behalf. The Commission further notes that NASD rules do not provide for broker voting on any matters, and NYSE rules prohibit broker voting on equity compensation plans. ${ }^{18}$ Therefore, the Exchange's proposed provision would be consistent with NASD and NYSE rules regarding broker voting on equity compensation plans. The

[^78]Commission has considered the impact on smaller issuers, such as those listed on Nasdaq and the Amex, in response to the comments on this issue. ${ }^{19}$ The Commission believes that the benefit of ensuring that the votes reflect the views of beneficial shareholders on equity compensation plans outweighs the potential difficulties in obtaining the vote.

The Commission also notes that the Exchange proposes to implement a transition period that would make the new rule eliminating broker voting on equity compensation plans applicable only to shareholder meetings that occur on or after the 90th day from the effective date of the Exchange's proposal.

## I. Summary

Overall, the Commission believes that the Exchange's proposal is similar to the NYSE and Nasdaq's recently approved shareholder approval rules. ${ }^{20}$ The Commission therefore believes that the Exchange's proposal should provide for more clear and uniform standards for shareholder approval of equity compensation plans. The Commission notes that, even with the availability of the proposed limited exemptions from shareholder approval under the Exchange's proposal, shareholder approval under the new standards would be required in more circumstances than under existing Exchange rules. The Commission further notes that the Exchange proposes to adopt a requirement that an issuer must notify it in writing when it uses one of the exemptions from the shareholder approval requirements. The Commission believes that such a requirement, coupled with the additional disclosure requirements for inducement grants, should reduce the potential for abuse of any of the exemptions. ${ }^{21}$ In addition, the Exchange's proposed amendment to CSE Rule 13.3, which would preclude broker-dealers from voting on equity compensation plans without explicit instructions from the beneficial owner, is consistent with the standard under current NYSE and NASD rules.

The Commission believes that the Exchange's proposal, which is similar to the NYSE and Nasdaq's shareholder approval rules, ${ }^{22}$ sets a consistent, minimum standard for shareholder approval of equity compensation plans. The Commission believes that the Exchange's proposal should help to

[^79]ensure that companies will not make listing decisions simply to avoid shareholder approval requirements for equity compensation plans and should provide shareholders with greater protection from the potential dilutive effect of equity compensation plans. Based on the above, the Commission finds that the Exchange's proposal should help to protect investors, is in the public interest, and does not unfairly discriminate among issuers, consistent with Section 6(b)(5) of the Act. ${ }^{23}$ The Commission therefore finds the Exchange's proposal to be consistent with the Act and the rules and regulations thereunder.

## V. Accelerated Approval of the Exchange's Proposal and Amendment No. 1

The Commission finds good cause for approving the Exchange's proposal and Amendment No. 1 thereto prior to the thirtieth day after the date of publication of notice thereof in the Federal Register. The Exchange has requested accelerated approval of the proposed rule change so as to avoid a delay in the implementation of these listing standards designed to protect investors and the public interest, which standards the Exchange represents are substantially similar to standards recently approved by the Commission for the NYSE and Nasdaq. The Exhange therefore believes that the Exchange's adoption of the proposed listing standards presents no novel issues. The Commission notes that the Exchange's proposal is similar to the NYSE and Nasdaq's proposals requiring shareholder approval of equity compensation plans. Both the NYSE and Nasdaq's proposals were published for comment in the Federal Register and recently approved by the Commission. ${ }^{24}$ The Commission believes that it already considered and addressed the issues that may be raised by the Exchange's proposal in its approval of the NYSE and Nasdaq's proposals. ${ }^{25}$

[^80]The Commission believes that accelerated approval of the Exchange's proposal is essential to allow for immediate harmonization of, and consistency in, the shareholder approval requirements for equity compensation plans among the markets. This will prevent issuers from making listing decisions based on differences in selfregulatory organization shareholder approval requirements and should provide equal investor protection to shareholders on the dilutive effects of plans irrespective of where the security trades. The Commission further believes that making the Exchange's new shareholder approval rules effective upon Commission approval will immediately impose the same requirements on the Exchange's issuers as those imposed upon NYSE, Nasdaq, and Amex issuers. Based on the above, the Commission finds good cause, consistent with Sections 6(b)(5) and 19(b)(2) of the Act, ${ }^{26}$ to approve the Exchange's proposal and Amendment No. 1 thereto on an accelerated basis.

## VI. Conclusion

It Is Therefore Ordered, pursuant to Section 19(b)(2) of the Act, ${ }^{27}$ that the proposed rule change (SR-CSE-200311) and Amendment No. 1 thereto are hereby approved on an accelerated basis.
For the Commission, by the Division of Market Regulation, pursuant to delegated authority. ${ }^{28}$
Jill M. Peterson,
Assistant Secretary.

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-48735; File No. SR-PCX-2003-50]

## Self-Regulatory Organizations; Notice of Filing and Order Granting Accelerated Approval to a Proposed Rule Change by the Pacific Exchange, Inc. Relating to its Shareholder Approval Policy for Its Listed Companies Regarding Stock Option Plans and Other Equity Compensation Arrangements

October 31, 2003.
Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), ${ }^{1}$ and Rule 19b-4 thereunder, ${ }^{2}$

[^81]notice is hereby given that on
September 22, 2003, the Pacific
Exchange, Inc. ("PCX" or "Exchange"), through its wholly owned subsidiary PCX Equities, Inc. ("PCXE"), filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons and is approving the proposal on an accelerated basis.

## I. Self-Regulatory Organization's

 Statement of the Terms of Substance of the Proposed Rule ChangeThe Exchange, through PCXE, is proposing to amend its Section 3, Corporate Governance and Disclosure Policies, and more specifically PCXE Rule 5.3(d), Shareholder Approval Policy, relating to stock option plans and other equity compensation arrangements. The Exchange, through PCXE. is also proposing to amend PCXE Rule 9.4, Proxies Voting, to prohibit the holder of an Equity Trading Permit ("ETP") from voting on equity compensation plans unless the beneficial owner of the shares has given voting instructions. The Exchange believes that the proposed changes are aimed at helping to restore investor confidence by strengthening listed companies' corporate governance practices.

Below is the text of the proposed rule change. ${ }^{3}$ Proposed new language is italicized; proposed deleted language is [bracketed].

## PCX Equities, Inc.

Rule 5

## Listings

Rules 5.1-5.2-No change.
Section 3. Corporate Governance and Disclosure Policies
Corporate Governance and Disclosure Policies

Rule 5.3-No Change.
Rule 5.3(a)-5.3(c)-No Change.

[^82]Shareholder Approval Policy
Rule 5.3(d) Shareholder Approval Policy

Each issuer shall require shareholder approval of a plan or arrangement pursuant to [under] subparagraphs (1) through (7) below or, prior to the issuance of designated securities under subparagraphs (8) [(2)] through (11) [(4)] below.[, when:]
(1) Shareholder Approval. Except as provided for in this Rule 5.3(d) all equity-compensation plans, and any material revisions to the terms of such plans, must be approved by the shareholders of the listed company. [A stock option or purchase plan is to be established or other arrangement made pursuant to which stock may be acquired by officers or directors, except for warrants or rights issued generally to security holders of the company or broadly based plans or arrangements including other employees (e.g., ESOPs).
The Corporation will generally not require shareholder's approval as a condition to listing shares reserved for the exercise of options when:
(i) such options are issued to an individual, not previously employed by the company, as an inducement essential to the individual's entering into an employment contract with the company provided that the potential issuance of shares pursuant to such options does not exceed $5 \%$ of the company's outstanding common stock; or
(ii) the establishment of a plan or arrangement under which the amount of securities which may be issued does not exceed the lesser of $1 \%$ of the number of shares outstanding common stock, $1 \%$ of the voting power outstanding, or 25,000 shares and provided that all arrangements adopted without shareholder approval in any five-year period do not authorize, in the aggregate, the issuance of more than $10 \%$ of outstanding common stock or voting power outstanding. (For the purpose of calculating the percentage of stock issued in aggregate, stock to be issued pursuant to options which have expired and/or been cancelled shall not be included.)]
(2) Equity Compensation Plan Defined. An equity compensation plan is a plan or other arrangement that provides for the delivery of equity securities (either newly issued or treasury shares) of the listed company to any employee, director or other service provider as compensation for services. For purposes of this rule, a compensatory grant of options or other equity securities that is not made under
a plan is, nonetheless, an equity compensation plan.
(A) Exceptions. The following are not equity compensation plans even if the brokerage and other costs of the plan are paid for by the listed company:
(i) Plans that are made available to shareholders generally, such as a typical dividend reinvestment plan.
(ii) Plans that merely allow employees, directors or other service providers to elect to buy shares on the open market or from the listed company for their current fair market value, regardless of whether:
(a) The shares are delivered immediately or on a deferred basis; or
(b) The payments for the shares are made directly or by giving up compensation that is othervise due (for example, through payroll deductions).
(3) Material Revisions. A material revision of an equity compensation plan includes, but is not limited to, the following:
(A) A material increase in the number of shares available under the plan (other than an increase solely to reflect a reorganization, stock split, merger, spinoff or similar transaction).
(i) If a plan contains a formula for automatic increases in the shares Qvailable (sometines called an evergreen formula) or for automatic grants pursuant to a formula, each such increase or grant will be considered a revision requiring shareholder approval unless the plan has a term of not more than ten years.

This type of plan (regardless of its term) is referred to as a formula plan. Examples of automatic grants pursuant to a formula plan are:
(a) Annual grants to directors of restricted stock having a certain dollar value; and
(b) Matching contributions, whereby stock is credited to a participant's account based upon the amount of compensation the participant elects to defer.
(ii) If a plan contains no limit on the number of shares available and is not a formula plan, then each grant under the plan will require separate shareholder approval regardless of whether the plan has a term of not more than ten years.

This type of plan is referred to as a discretionary plan. A requirement that grants be made out of treasury shares or repurchased shares will not, in itself, be considered a limit or preestablished forinula so as to prevent a plan from being considered a discretionary plan.
(B) An expansion of the types of awards available under the plan.
(C) A material expansion of the class of employees, directors or other service
providers eligible to participate in the plan.
(D) A material extension of the term of the plan.
(E) A material change to the method of determining the strike price of options under the plan.
(F) The deletion or limitation of any provision prohibiting repricing of options. An amendment will not be considered a Material Revision if it curtails rather than expands the scope of the plan in question.
(4) Repricings. Repricing means any of the following or any other action that has the same effect:
(A) Lowering the strike price of an option after it is granted.
(B) Any other action that is treated as a repricing under generally accepted accounting principles.
(C) Canceling an option at a time when its strike price exceeds the fair market value of the underlying stock, in exchange for another option, restricted stock, or other equity, unless the cancellation occurs in connection with a merger, acquisition, spin-off or other similar corporate transaction.

A plan that does not contain a provision that specifically permits repricing of options will be considered for purposes of this rule as prohibiting repricing. Therefore, any actual repricing of options will be considered a material revision of a plan even if the plan itself is not revised. This consideration will not apply to a repricing through an exchange offer that commenced before the date this rule became effective.
(5) Exemptions. This rule does not require shareholder approval of employment inducement awards, certain grants, plans and amendments in the context of mergers and acquisitions, and certain specific types of plans, as described below. These exempt grants, plans and amendments may be made only with the approval of the listed company's independent compensation committee or the approval of a majority of the company's independent directors. Listed. companies must notify the Exchange in writing when they use these exemptions.
(A) Employment Inducement Awards. An employment inducement award is a grant of options or other equity based compensation as a material inducement to a person or persons being hired by the listed company or any of its subsidiaries, or being rehired following a bona fide period of interruption of employment. Inducement awards include grants to new employees in connection with a merger or acquisition. Promptly following a grant of any inducement award in reliance of this
exemption, the listed company must disclose in a press release the material terms of the award, including the recipient(s) of the award and the number of shares involved.
(B) Mergers and Acquisitions. In the context of corporate acquisitions and mergers, the following exemptions apply:
(i) Shareholder approval is not required to convert, replace or adjust outstanding options or other equity compensations awards to reflect the transaction.
(ii) Shares available under certain plans acquired in corporate acquisitions and mergers may be used for certain post-transaction grants without further shareholder approval. This exemption applies where a party that is not a listed company following the transaction has shares available for grant under preexisting plans that were previously approved by shareholders. A plan adopted in contemplation of the merger or acquisition transaction would not be considered pre-existing for purposes of this exemption.

Shares available under a pre-existing plan may be used for post-transaction grants of options and other awards with respect to equity of the entity that is the listed company after the transaction, either under the pre-existing plan or another plan, without further shareholder approval, so long as:
(a) The number of shares available for grants is appropriately adjusted to reflect the transaction;
(b) The time during which those shares are available is not extended beyond the period when they would have been available under the preexisting plan, absent the transaction; and
(c) The options and other awards are not granted to individuals who were employed, immediately before the transaction, by the post-transaction listed company or entities that were its subsidiaries immediately before the transaction.

Any shares reserved for listing in connection with a transaction pursuant to either of these exemptions would be counted by the Exchange in determining whether the transaction involved the issuance of $20 \%$ or more of the company's outstanding common stock and thus requires shareholder approval pursuant to Rule 5.3(d)(9)(B).
(D) Qualified Plans, Parallel Excess Plans and Section 423 Plans. The following types of plans, and material revisions thereto, are exempt from the shareholder approval requirement:
(i) Plans intended to meet the requirement of Section 401(a) of the Internal Revenue Code (e.g. ESOP);
(ii) Plans intended to meet the requirements of Section 423 of the Internal Revenue Code;
(iii) Parallel excess plans. A parallel excess plan is a plan that is a pension plan within the meaning of the Employee Retirement Income Security Act that is designed to work in parallel with a plan intended to be qualified under Internal Revenue Code Section 401(a) to provide benefits that exceed the limits set forth in Internal Revenue Code Section 402(g) (the section that limits the contributions and benefits under qualified plans), Internal Revenue Code Section 401(a)(17) (the section that limits the amount of an employee's compensation that can be taken into account for plan purposes) and/or Internal Revenue Code Section 415 (the section that limits the contributions and benefits under qualified plans) and/or any successor or similar limitations that may hereafter be enacted.

A plan will not be considered a parallel excess plan unless:
(a) It covers all or substantially all employees of an employer who are participants in the related qualified plan whose annual compensation is in excess of the limit of Internal Revenue Code Section 401(a)(17) or any successor or similar limits that may hereafter be enacted;
(b) Its terms are substantially the same as the qualified plan that it parallels except for the elimination of the limits described in the preceding sentence and the limitation described in clause (c) below; and
(c) No participant receives employer equity contributions under the plan in excess of $25 \%$ of the participant's cash compensation.
(iv) An equity compensation plan that provides non-U.S. employees with substantially the same benefits as a comparable Section 401(a) plan, Section 423 plan or parallel excess plan that the listed company provides to its U.S. employees, but for features necessary to comply with applicable foreign tax law, are also exempt from shareholder approval under this section.
(6) Transition Rules. Except as provided below, a plan that was adopted before the date of the Securities and Exchange Commission order approving this rule will not be subject to shareholder approval under this section unless and until it is materially revised.
In the case of a discretionary plan, as defined in Rule 5.3(d)(3)(A)(ii), whether or not previously approved by shareholders, additional grants may be made after the effective date of this rule without further shareholder approval only for a limited transition period, defined below, and then only in a
manner consistent with past practice. In applying this rule, if a plan can be separated into a discretionary plan portion and a portion that is not discretionary, the non-discretionary portion of the plan can continue to be used separately, under the appropriate transition rule. For example, if a shareholder approved plan permits both grants pursuant to a provision that makes available a specific number of shares, and grants pursuant to a provision authorizing the use of treasury shares without regard to the specific share limit, the former provision (but not the latter) may continue to be used after the transition period, under the general rule.
In the case of a formula plan, as defined in Rule 5.3(d)(3)(A)(i), that either has not previously been approved by shareholders or does not have a term of ten years or less, additional grants may be made after the effective date of this rule without further shareholder approval only for a limited transition period defined below.

The limited transition period will end upon the first to occur of:
(A) The listed company's next annual meeting at which directors are elected that occurs more than 180 days after the effective date of this rule;
(B) The first anniversary of the effective date of this rule; and
(C) The expiration of the plan.

A shareholder approved formula plan may continue to be used after the end of this transition period if it is amended to provide for a term of ten years or less from the date of its original adoption or, if later, the date of its most recent shareholder approval. Such an a mendment may be made before or after the effective date of this rule, and would not itself be considered a material revision requiring shareholder approval.
A formula plan may continue to be used, without shareholder approval, if the grants after the effective date of this rule are made only from the shares available immediately before the effective date, in other words, based on formulaic increases that occurred prior to such effective date.
(7) Broker Voting. The Exchange will preclude its ETP Holders from giving a proxy to vote on equity compensation plans unless the beneficial owner of the shares has given voting instructions. This is codified in Rule 9.4 (Proxy Voting). Amended Rule 9.4 will be effective for any meeting of shareholders that occurs on or after the 90th day following the date of the Securities and Exchange Commission order approving the rule change.
(8)[(2)] The issuance will result in a change of control of the issuer.
(9)[(3)] In connection with the acquisition of the stock or assets of another company, shareholder approval is needed in the following

## circumstances:

( $A)$ [(i)] If any director, officer, or substantial shareholder of the listed company has a 5\% or greater interest (or such persons collectively have a $10 \%$ or greater interest), directly or indirectly, in the company or assets to be acquired or in the consideration to be paid in the transaction (or series of related transactions) and the present or potential issuance of common stock, or securities convertible into or exercisable for common stock, could result in an increase in outstanding common shares or voting power of $5 \%$ or more; or
(B)[(ii)] Where the present or potential issuance of common stock, or securities convertible into or exercisable for common stock (other than in a public offering for cash), could result in an increase in outstanding common shares of $20 \%$ or more or could represent $20 \%$ or more of the voting power outstanding before the issuance of such stock or securities.
(10) [(4)] In connection with a transaction other than a public offering involving:
$(A)[(i)]$ The sale or issuance by the company of common stock (or securities convertible into or exercisable for common stock) at a price less than the greater of book or market value, which together with sales by officers, directors or principal shareholders of the company equals $20 \%$ or more of presently outstanding common stock, or $20 \%$ or more of the presently outstanding voting power; or
(B) $[(\mathrm{ii})]$ The sale or issuance by the company of common stock (or securities convertible into or exercisable for common stock) equal to $20 \%$ or more of presently outstanding stock or voting power for less than the greater of book or market value of the stock.
(11)[(5)] Exceptions may be made upon application to the Corporation when:
(A)[(i)] The delay in securing shareholder approval would seriously jeopardize the financial viability of the enterprise; and
(B) (ii)] Reliance by the company on this exception is expressly approved by the audit committee of the board or a comparable body.
A company relying on this exception must mail to all shareholders, no later than ten days before issuance of the securities, a letter alerting them to its omission to seek the sharehclder approval that would otherwise be required and indicating that the audit committee of the board or a comparable

## body has expressly approved the exception. <br> Commentary: <br> $.01-.02$ - No Change. <br> Rule 5.3(e)-5.3(o)No Change.

## Rule 9

Conducting Business With the Public

## II 7963M

Proxies Voting
Rule 9.4. No ETP Holder shall give a proxy vote that authorizes the implementation of any equity compensation plan, or any material revision to the terms of any existing equity compensation plan (whether or not stockholder approval of such plan is required by Rule 5.3(d)(1)-(7)), unless the beneficial owner of the shares has given voting instructions. This provision for equity compensation plans shall be effective for any meeting of shareholders that occurs on or after the 90th day following the date of the Securities and Exchange Commission order approving the rule change. In all other matters besides equity compensation plans, no ETP Holder shall sign or give a proxy to vote any stock registered in the name or control of such ETP Holder unless (a) the ETP Holder is the actual owner thereof, (b) pursuant to the written instructions of such actual owner, or (c) pursuant to the rules of another national securities exchange to which he or she or his or her firm is responsible.

## II. Self-Regulatory Organization's <br> Statement of the Purpose of, and

 Statutory Basis for, the Proposed Rule ChangeIn its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item III below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

## A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

## 1. Purpose

In light of the recent failures of a number of significant companies due to the lack of diligence, ethics and controls, the Exchange, through PCXE, chose to review its corporate governance and disclosure policies. In September

2002, the PCXE Board of Directors formed a subcommittee to review the PCXE's current corporate governance and disclosure standards. The Exchange represents that the goal of the subcommittee was to enhance the accountability, integrity and transparency of the Exchange's listed companies. The Exchange further represents that it took its first step towards improving the corporate governance and disclosure standards for its listed companies by proposing revisions to PCXE Rule 5.3 to comply with the requirements of the SarbanesOxley Act of $2002 .{ }^{4}$

At the request of Commission staff, the Excharge reviewed its Shareholder

Approval Policy for its listed companies. The subcommittee reviewed the New York Stock Exchange, Inc. ("NYSE") and the National Association of Securities Dealers, Inc.("NASD")/The Nasdaq Stock Market, Inc. ("Nasdaq")'s new shareholder approval requirements for equity compensation plans. ${ }^{5}$ The Exchange proposes to adopt a shareholder approval requirement for equity compensation plans that is almost identical to the policy adopted by the NYSE.

The Exchange proposes to amend PCXE Rule 5.3(d) to require shareholder approval of all equity compensation plans and material revisions to such plans, subject to limited exemptions. The Exchange represents that the new standards in PCXE Rule 5.3(d) will apply to all companies listed under PCX's Tier I and Tier II designations.

Under the Exchange's proposal, an equity compensation plan is defined as a plan or other arrangement that provides for the delivery of equity securities (either newly issued or treasury shares) of the listed company to any employee, director or other service provider as compensation for services, including a compensatory grant of options or other equity securities that is not made under a plan. The Exchange

[^83]is also proposing to provide clarification on certain plans that would not be considered equity compensation plans under this definition, such as plans that do not provide for delivery of equity securities of the issuer (e.g., plans that pay in cash) and deferred compensation plans under which employees pay full current market value for deferred shares.
In addition, the proposal provides for certain types of grants that are exempted from shareholder approval. These limited exemptions include: (1) Inducement awards to person's first becoming an employee of an issuer or any of its subsidiaries, to rehires following a bona fide period of employment interruption, and for grants to new employees in connection with a merger or acquisition; ${ }^{6}$ (2) mergers and acquisitions, when conversions, replacements or adjustments of outstanding options or other equity compensation awards are necessary to reflect the transaction, and when shares available under certain plans acquired in corporate acquisitions and mergers may be used for certain post-transaction grants without further shareholder approval; and (3) plans intended to meet the requirements of Section 401(a) of the Internal Revenue Code ${ }^{7}$ (e.g., ESOPs), plans intended to meet the requirements of Section 423 of the Internal Revenue Code, ${ }^{8}$ and parallel excess plans that meet certain conditions. The Exchange also proposes that, in circumstances in which equity compensation plans and amendments to plans are not subject to shareholder approval, the plans and amendments still must be subject to the approval of the company's independent compensation committee or a majority of the company's independent directors. In addition, the Exchange proposes that an issuer must notify the Exchange in writing when it uses any of the exemptions from the shareholder approval requirements.

The Exchange is also proposing to provide a non-exclusive list of "material revisions" to a plan that would require shareholder approval. Within this list of revisions, the Exchange proposes to define the concepts of "evergreen plans" (i.e., plans that contain a formula for automatic increases in the shares available), "formula plans" (i.e., plans that provide for automatic grants pursuant to a formula), and "discretionary plans" (i.e., plans that contain no limit on the number of shares available and plans that are not

[^84]formula plans). The Exchange proposes that each grant under a discretionary plan require sharehòlder approval regardless of whether the plan has a term of not more than ten years.

Shareholder approval will be required for plans adopted before the effective date of these proposed amendments that have not been approved by shareholders and have neither an evergreen formula nor a specific number of shares available under the plan. The Exchange is proposing to provide transition rules to clarify when shareholder approval will be required for these pre-existing plans. In addition, during the period prior to the approval, pre-existing plans may be utilized, but only in a manner consistent with past practice. The transition rules provide that an evergreen plan that was approved by shareholders but does not have a tenyear term must be: (1) Approved by shareholders before any shares that become available as a result of a formulaic increase are utilized, or (2) amended to include a term of no more than ten years from the date the plan was adopted or last approved by shareholders. If the plan were amended to include such term, shareholder approval would not be required. No action would be required, however, if a plan were frozen at the level of shares available at the time the rule becomes effective. The transition rules also provide that repricings that have commenced prior to the effectiveness of the proposal (i.e., exchange offers to optionees) will not be subject to shareholder approval (assuming that such repricing did not require shareholder approval under existing Exchange rules).

Finally, the Exchange is also proposing to prohibit the holder of an ETP from voting on equity compensation plans unless the beneficial owner of the shares has given voting instructions. The Exchange proposes a transition period that will make these provisions of PCXE Rule 9.4 applicable only to shareholder meetings that occur on or after the 90th day following the date of the Commission order approving this rule.

## 2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6 of the Act, ${ }^{9}$ in general, and furthers the objectives of Section 6(b)(5) of the Act, ${ }^{10}$ in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of

[^85]trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

## B. Self-Regulatory Organization's

## Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

## C. Self-Regulatory Organization's

 Statement on Comments on the Proposed Rule Change Received From Members, Participants, or OthersWritten comments on the proposed rule change were neither solicited nor received.

## III. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549-0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552 , will be available for inspection and copying at the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR-PCX-2003-50 and should be submitted by Novenuber 28, 2003.

## IV. Commission's Findings and Order Granting Accelerated Approval to the Proposed Rule Change

After careful review, the Commission finds that the Exchange's proposal is consistent with the Act and the rules and regulations promulgated thereunder applicable to a national securities exchange and, in particular, with the requirements of Section 6(b) of the Act. ${ }^{11}$ Specifically, the Commission finds that approval of the Exchange's

[^86]proposal is consistent with Section $6(b)(5)$ of the Act ${ }^{12}$ in that it is designed to, among other things, facilitate transactions in securities; to prevent fraudulent and manipulative acts and practices; to promote just and equitable principles of trade; to remove impediments to and perfect the mechanism of a free and open market and a national market system; and, in general, to protect investors and the public interest; and does not permit unfair discrimination among issuers.

The Commission has long encouraged exchanges to adopt and strengthen their corporate governance listing standards in order to, among other things, restore investor confidence in the national marketplace. The Commission believes that the Exchange's proposal, which requires shareholder approval of equity compensation plans and which follows the Commission's approval of similar proposals by the NYSE, Nasdaq, and Amex ${ }^{13}$ is the first step under this directive because it should have the effect of safeguarding the interests of shareholders, while placing certain restrictions on Exchange-listed companies. ${ }^{14}$

In addition, the Commission notes that the Exchange's proposal is similar and almost identical to proposals by NYSE and Nasdaq requiring shareholder approval of equity compensation plans that have previously been approved by the Commission. ${ }^{15}$ The Commission believes that it has already considered and addressed the issues that may be raised by the Exchange's proposal when it approved these proposals. The Commission notes that approval of the Exchange's proposal will conform the Exchange's shareholder approval requirements for equity compensation plans with those of the NYSE and Nasdaq, and will immediately impose the same requirements on the Exchange's issuers as those imposed upon NYSE, Nasdaq, and Amex issuers. The adoption of these standards by the Exchange is an important step to ensure that issuers will not be able to avoid shareholder approval requirements for

[^87]equity compensation plans based on their listed marketplace.

## A. Exemption from Shareholder Approval for Inducement Grants

The Commission believes that the requirement that the issuance of all inducement grants be subject to review by either the issuer's independent compensation committee or a majority of the board's independent directors, under the Exchange's proposal, should prevent abuse of this exemption from shareholder approval. In addition, the Exchange proposes to limit its exemption for inducement grants to new employees or to previous employees being rehired after a bona fide period of interruption of employment, and to new employees in connection with an acquisition or merger. The Commission believes that these limitations should help to prevent the inducement exemption from being used inappropriately.

The Commission notes that the Exchange is proposing to include a requirement, similar to the requirement under the NYSE and Nasdaq's recently approved shareholder approval rules, that, promptly following the grant of any inducement award, companies must disclose in a press release the material terms of the award, including the recipient(s) of the award and the number of shares involved. ${ }^{16}$ The Commission notes that the Exchange is alse proposing a requirement, similar to the requirements under the NYSE and Nasdaq's recently approved shareholder approval rules, ${ }^{17}$ that an issuer must notify it in writing when it uses this exemption, and/or any other exemption, from its shareholder approval requirement. The Commission believes that these disclosure and notification requirements will provide transparency to investors and should reduce the potential for abuse of this exemption for inducement grants.

## B. Exemption From Shareholder Approval for Mergers and Acquisitions

The Commission notes that the Exchange's exemption from shareholder approval for mergers and acquisitions

[^88]contains safeguards that should prevent abuse in this area. First, only preexisting plans that were previously approved by the acquired company's shareholders would be available to the listed company for post-transactional grants. In addition, shares under those previously approved plans could not be granted to individuals who were employed, immediately before the transaction, by the post-transaction listed company or its subsidiaries. The Commission also notes that, under the Exchange's proposal, any shares reserved for listing in connection with a merger or acquisition pursuant to this exemption would be counted by the Exchange in determining whether the transaction involved the issuance of $20 \%$ or more of the company's outstanding common stock, thereby requiring shareholder approval under PCXE Rule 5.3(d)(9)(B). Finally, the Commission notes that the Exchange proposes an additional requirement that an issuer must notify it in writing when it uses this exemption, and/or any other exemption, from its shareholder approval requirement. Based on the above, the Commission believes that the Exchange has provided measures to ensure that the exemption for mergers and acquisitions is only used in limited circumstances, which should help reduce the potential for dilution of shareholder interests.

## C. Exemption From Shareholder Approval for Tax Qualified and Parallel Nonqualified Plans

The Commission believes that, given the extensive government regulationthe Internal Revenue Code and Treasury regulations-for tax qualified plans and the general limitations associated with parallel nonqualified plans, shareholders should not experience significant dilution as a result of this exemption. In addition, the Commission notes that the Exchange proposes to add a limitation under this exemption that a plan would not be considered a nonqualified parallel plan under its proposal if employees who are participants in such a plan receive employer contributions under the plan in excess of $25 \%$ of the participants' cash compensation. The Commission further notes that the Exchange proposes an additional requirement that an issuer must notify it in writing when it uses this exemption, and/or any other exempttion. from its shareholder approval requirement. The Commission believes that, taken together, these limitations should reduce concerns regarding abuse of this exemption from the shareholder approval requirements.

In addition, the Commission notes that, similar to the exemptions in the NYSE and Nasdaq's recently approved shareholder approval rules, the Exchange proposes to adopt an exemption from the shareholder approval requirements for an equity compensation plan that provides nonU.S. employees with substantially the same benefits as a comparable Section 401(a) plan, Section 423 plan or parallel excess plan that the listed company provides to its U.S. employees, but for features necessary to comply with applicable foreign tax law. The Commission believes that this change will conform the Exchange's shareholder approval rule to that of the NYSE and Nasdaq and will provide greater clarity for issuers regarding tax qualified, non-discriminatory employee benefit plans and parallel nonqualified plans for their non-U.S. employees.

## D. Material Revisions to Plans

The Commission notes that the Exchange proposes to provide a nonexclusive list, similar to lists found in the NYSE and Nasdaq's shareholder approval rules, ${ }^{18}$ as to what constitutes a material revision to a plan. As noted above, material revisions to plans will require shareholder approval under Exchange rules. A material revision under the Exchange's proposal would include, but is not limited to: A material increase in the number of shares to be issued under the plan (other than to reflect a reorganization, stock split, merger, spinoff or similar transaction); an expansion of the type of awards available under the plan; a material expansion of the class of participants eligible to participate in the plan; a material extension of the term of the plan; a material change to limit or delete any provisions prohibiting repricing of options in a plan or for determining the strike or exercise price of options under a plan. The Exchange's proposal also describes what would constitute a material revision for plans containing a formula for automatic increases (such as evergreen plans) and automatic grants requiring shareholder approval.

The Commission believes that the Exchange's non-exclusive list of what would constitute a material revision to a plan provides companies with clarity and guidance for when certain amendments and revisions to plans would require shareholder approval. The Commission also believes that the Exchange's proposal to conform its nonexclusive list with the NYSE and Nasdaq's rules on material amendments/revisions should help to

[^89]ensure that the concept of material amendments/revisions is consistent among the markets so that differences between the markets cannot be abused.

## E. Repricing of Plans

The Commission notes that the Exchange's proposal provides that, if a plan explicitly contains a repricing provision, shareholder approval would be required to delete or limit the repricing provisions. The Commission further notes that the Exchange's proposal provides that, if a plan is silent on repricing, it will be considered as prohibiting repricing and shareholder approval would be required to permit repricing under the plan. The Exchange's proposal also clarifies that repricings that have commenced prior to the date of effectiveness of its proposal would not be subject to shareholder approval, provided that such repricing does not require shareholder approval under the Exchange's existing shareholder approval rules.

The Commission believes that the Exchange's proposal should benefit shareholders by ensuring that companies cannot do a repricing of options, which can have a dilutive effect on shares, without explicit shareholder approval of such provisions and their terms. The Commission also believes that the Exchange's approach to repricings is similar to the NYSE and Nasdaq's respective approaches to repricings, and should offer companies clarity and guidance as to when a change in a plan regarding the repricing of options would trigger a shareholder approval requirement.
F. Evergreen or Formula Plans and Plans Without a Formula or Limit on the Number of Shares Available

The Commission notes the Exchange's proposal provides guidance for the treatment of evergreen/formula plans. More specifically, under the Exchange's proposal, if a plan contains a formula for automatic increases in the shares available or for automatic grants pursuant to a formula, such plans cannot have a term in excess of ten years unless shareholder approval is obtained every ten years. In addition, under the Exchange's proposal, if a plan contains no limit on the number of shares available and is not a formula plan, then each grant under the plan will require separate shareholder approval. Furthermore, the Exchange's proposal provides that a requirement that grants be made out of treasury or repurchased shares will not alleviate the need for shareholder approval for additional grants.

The Commission believes that these provisions should help to ensure that certain terms of a plan cannot be drafted so broad as to avoid shareholder scrutiny and approval. The Commission also believes that the Exchange's proposed rules relating to the treatment of evergreen/formula plans and plans that do not contain a formula or place a limit on the number of shares available should provide more clarity and transparency to issuers as to when shareholder approval would be required for such plans. Finally, the Commission believes that the provision ensuring that treasury and repurchased shares cannot be used to avoid these additional shareholder approval requirements strengthens the proposal and ensures that companies cannot avoid compliance with the rule.
The Commission further notes that the Exchange has proposed a transition period for evergreen/formula plans and discretionary plans. The limited transition period would end on the first to occur of the following: (1) The listed company's next annual meeting at which directors are elected that occurs more than 180 days after the date of the effective date of the Exchange's proposal; (2) the first anniversary of the effective date of the Exchange's proposal; or (3) the expiration of the plan. The Commission believes that the - Exchange's proposed transition period for evergreen/formula and discretionary plans should provide companies with additional clarity and guidance as to when shareholder approval would be required for such plans while in the transition period, and should provide companies with more time to comply with the Exchange's new shareholder approval requirements for evergreen/ formula type plans. The Commission believes that this period is not so long as to permit abuse of the shareholder approval requirement, and at most, will last one year from the date of this Commission approval order.

## G. Miscellaneous Provisions

The Commission notes that the Exchange's proposal'similar to the NYSE and Nasdaq's recently approved shareholder approval rules ${ }^{19}$ incorporates the term "equity compensation" and proposes that plans that merely provide a convenient way to purchase shares in the open market or from the issuer at fair market price on equal terms to all security holders would not require shareholder approval. The Commission believes that the Exchange's proposal is consistent with the NYSE and Nasdaq's rules in this

[^90]area and should provide greater clarity with respect to which plans would and would not require shareholder approval.

The Commission notes that the Exchange's proposal provides that preexisting plans, which were adopted prior to the SEC's approval of the Exchange's proposal, would essentially be "grandfathered" and would not require shareholder approval unless the plans were materially amended. Under the Exchange's proposal, however, shareholder approval is required for each grant made pursuant to any preexisting plans that were not approved by shareholders and that do not have an evergreen formula or a specific number of shares available under the plan. This is consistent with the NYSE, Nasdaq, and Amex shareholder approval rules on this matter. The Commission believes that this clarification should provide companies with guidance as to which plans would be subject to the Exchange's new shareholder approval requirements.

## H. Elimination of Broker-Dealer Voting on Equity Compensation Plans

The Commission believes that the Exchange's proposed amendment to PCX Rule 9.4 to preclude broker voting on equity compensation plans is consistent with the Act. The Commission notes that equity compensation plans have become an important issue for shareholders. Because of the potential for dilution from issuances under such plans, shareholders should be making the determination rather than brokers on their behalf. The Commission further notes that NASD rules do not provide for broker voting on any matters and NYSE rules prohibit broker voting on equity compensation plans. ${ }^{20}$ Therefore, the Exchange's proposed provision would be consistent with NASD and NYSE rules regarding broker voting on equity compensation plans. The Commission has considered the impact on smaller issuers, such as those listed on Nasdaq and the Amex, in response to the comments on this issue. ${ }^{21}$ The Commission believes that the benefit of ensuring that the votes reflect the views of beneficial shareholders on equity compensation plans outweighs the potential difficulties in obtaining the vote.

The Commission also notes that the Exchange proposes to implement a transition period that would make the new rule eliminating broker voting on

[^91]equity compensation plans applicable only to shareholder meetings that occur on or after the 90 th day from the effective date of the Exchange's proposal.

## I. Summary

Overall, the Commission believes that the Exchange's proposal is similar to the NYSE and Nasdaq's recently approved shareholder approval rules. ${ }^{22}$ The Commission therefore believes that the Exchange's proposal should provide for more clear and uniform standards for shareholder approval of equity compensation plans. The Commission notes that, even with the availability of the proposed limited exemptions from shareholder approval under the Exchange's proposal, shareholder approval under the new standards would be required in more circumstances than under existing Exchange rules. The Commission further notes that the Exchange proposes to adopt a requirement that an issuer must notify it in writing when it uses one of the exemptions from the shareholder approval requirements. The Commission believes that such a requirement, coupled with the additional disclosure requirements for inducement grants, should reduce the potential for abuse of any of the exemptions. ${ }^{23}$ In addition, the Exchange's proposed amendment to PCXE Rule 9.4, which would preclude broker-dealers from voting on equity compensation plans without explicit instructions from the beneficial owner, is consistent with the standard under current NYSE and NASD rules.

The Commission believes that the Exchange's proposal, which is similar to the NYSE and Nasdaq's shareholder approval rules, ${ }^{24}$ sets a consistent, minimum standard for shareholder approval of equity compensation plans. The Commission believes that the Exchange's proposal should help to ensure that companies will not make listing decisions simply to avoid shareholder approval requirements for equity compensation plans and should provide shareholders with greater protection from the potential dilutive effect of equity compensation plans. Based on the above, the Commission finds that the Exchange's proposal should help to protect investors, is in the public interest, and does not unfairly discriminate among issuers, consistent with Section $6(b)(5)$ of the Act. 25 The Commission therefore finds

[^92]the Exchange's proposal to be consistent with the Act and the rules and regulations thereunder.

## V. Accelerated Approval of the Exchange's Proposal

The Commission finds good cause for approving the Exchange's proposal prior to the thirtieth day after the date of publication of notice thereof in the Federal Register. The Commission notes that the Exchange's proposal is similar to the NYSE and Nasdaq's proposals requiring shareholder approval of equity compensation plans. Both the NYSE and Nasdaq's proposals were published for comment in the Federal Register and recently approved by the Commission. ${ }^{26}$ The Commission believes that it already considered and addressed the issues that may be raised by the Exchange's proposal in its approval of the NYSE and Nasdaq's proposals. ${ }^{27}$

The Commission believes that accelerated approval of the Exchange's proposal is essential to allow for immediate harmonization of, and consistency in, the shareholder approval requirements for equity compensation plans among the markets. This will prevent issuers from making listing decisions based on differences in selfregulatory organization shareholder approval requirements and should provide equal investor protection to shareholders on the dilutive effects of plans irrespective of where the security trades. The Commission further believes that making the Exchange's new shareholder approval rules effective upon Commission approval will immediately impose the same requirements on the Exchange's issuers as those imposed upon NYSE, Nasdaq, and Amex issuers. Based on the above, the Commission finds good cause, consistent with Sections 6(b)(5) and 19(b)(2) of the Act, ${ }^{28}$ to approve the Exchange's proposal on an accelerated basis.

[^93]
## VI. Conclusion

It Is Therefore Ordered, pursuant to Section 19(b)(2) of the Act, ${ }^{29}$ that the proposed rule change (SR-PCX-200350 ) is hereby approved on an accelerated basis.
For the Commission, by the Division of Market Regulation, pursuant to delegated authority. ${ }^{30}$

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-48736; File No. SR-Phlx-2003-67]

## Self-Regulatory Organizations; Notice of Filing and Order Granting Accelerated Approval to a Proposed Rule Change by the Philadelphia Stock Exchange, Inc. Relating to Shareholder Approval of Equity Compensation Plans and the Voting of Proxies

October 31, 2003.
Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), ${ }^{1}$ and Rule 19b-4 thereunder, ${ }^{2}$ notice is hereby given that on September 30, 2003, the Philadelphia Stock Exchange, Inc. ("Phlx" or
"Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons and is approving the proposal on an accelerated basis.

## I. Self-Regulatory Organization's

 Statement of the Terms of Substance of the Proposed Rule ChangeThe Exchange proposes to delete the introductory language and subsection (a) of Phlx Rule 850, Shareholder Approval Policy, and replace it with rule text and commentary regarding shareholder approval of equity compensation plans that tracks the National Association of Securities Dealers, Inc.'s ("NASD") Rule 4350(i) and NASD IM 4350-5. ${ }^{3}$ The Exchange

[^94]also proposes to amend Phlx Rule 862, Proxies at Direction of Owner, to preclude broker voting on equity compensation plans.

Below is the text of the proposed rule change. ${ }^{4}$ Proposed new language is italicized; proposed deleted language is [bracketed].

Rule 850, Shareholder Approval Policy
Rule 850. [A listed company shall require shareholder approval of the issuance of securities in connection with the following:
(a) Options plans or other special remunerations plans for directors, officers or key employees.] Each issuer shall require shareholder approval prior to the issuance of designated securities under subparagraph (a), (b), or (c) below:
(a) When a stock option or purchase plan is to be established or materially amended or other equity compensation arrangement made or materially amended pursuant to which options or stock may be acquired by officers, directors, employees, or consultants, except for:
(i) Warrants or rights issued generally to all security holders of the company or stock purchase plans available on equal terms to all security holders of the company (such as a dividend reinvestment plan); or
(ii) Tax qualified, non-discriminatory employee benefit plans (e.g., plans that meet the requirements of Section 401(a) or 423 of the Internal Revenue Code) or parallel nonqualified plans, provided such plans are approved by the issuer's independent compensation committee

[^95]or a majority of the issuer's independent directors; or plans that merely provide a convenient way to purchase shares on the open market or from the issuer at fair market value; or
(iii) Plans or arrangements relating to an acquisition or merger as permitted under the Commentary to this rule; or
(iv) Issuances to a person not previously an employee or director of the company, or following a bonafide period of non-employment, as an inducement material to the individual's entering into employment with the company, provided such issuances are approved by either the issuer's independent compensation committee or a majority of the issuer's independent directors. Promptly following an issuance of any employment inducement grant in reliance on this exception, a company must disclose in a press release the material terms of the grant, including the recipient(s) of the grant and the number of the shares involved.

Issuers shall notify the Exchange no later than 15 calendar days prior to establishing or materially amending $a$ stock option plan, purchase plan or other equity compensation arrangement pursuant to which stock may be acquired by officers, directors, employees, or consultants without shareholder approval.
(b) No change.
(c) No change.

## Commentary

Employee ownership of company stock can be an effective tool to align employee interests with those of other shareholders. Stock option plans or other equity compensation arrangements can also assist in the recruitment and retention of employees, which is especially critical to young, growing companies, or companies with insufficient cash resources to attract and retain highly qualified employees. However, these plans can potentially dilute shareholder interests. As such, Rule 850(a) ensures that shareholders have $a$ voice in these situations, given this potential for dilution.

Rule 850(a) requires shareholder approval when a plan or other equity compensation arrangement is established or materially amended. For these purposes, a material amendment would include, but not be limited to, the following:
(1) Any material increase in the number of shares to be issued under the plan (other than to reflect a reorganization, stock split, merger, spinoff or similar transaction);
(2) Any material increase in benefits to participants, including any material change to: (i) permit a repricing (or decrease in exercise price) of outstanding options, (ii). reduce the price at which shares or options to purchase shares may be offered, or (iii) extend the duration of a plan;
(3) Any material expansion of the class of participants eligible to participate in the plan; and
(4) Any expansion in the types of options or awards provided under the plan.

While general authority to amend a plan would not obviate the need for shareholder approval, if a plan permits a specific action without further shareholder approval, then no such approval would generally be required. However, if a plan contains a formula for automatic increases in the shares availuble (sometimes called an "evergreen formula"), or for automatic grants pursuant to a dollar-based formula (such as, annual grants based on a certain dollar value, or matching contributions based upon the amount of compensation the participant elects to defer), such plans cannot have a term in excess of ten years unless shareholder approval is obtained every ten years. However, plans that do not contain a formula and do not impose a limit on the number of shares available for grant would require shareholder approval of each grant under the plan. A requirement that grants be made out of treasury shares or repurchased shares will not alleviate these additional shareholder approval requirements.

As a general matter, when preparing plans and presenting them for shareholder approval, issuers should strive to make plan terms easy to understand. In that regard, it is recommended that plans meant to permit repricing use explicit terminology to make this clear.

Rule $850(a)$ provides an exception to the requirement for shareholder approval for warrants or rights offered generally to all shareholders. In addition, an exception is provided for tax qualified, non-discriminatory employee benefit plans as well as parallel nonqualified plans as these plans are regulated under the Internal Revenue Code and Treasury Department regulations. An equity compensation plan that provides non-U.S. employees with substantially the same benefits as a comparable tax qualified, nondiscriminatory employee benefit plan that the issuer provides to its U.S. employees, but for features necessary to comply with applicable foreign tax law, are also exempt from shareholder approval under this section.

Further, there is an exception for inducement grants to new employees because in these cases a company has an arm's length relationship with the new employees. Inducement grants for these purposes include grants of options or stock to new employees in connection with a merger or acquisition. The rule requires that such issuances must be approved by the issuer's independent compensation committee or a majority of the issuer's independent directors. The rule further requires that promptly following an issuance of any employment inducement grant in reliance on this exception, a company must disclose in a press release the material terms of the grant, including the recipient(s) of the grant and the number of shares involved.
In addition, plans or arrangements involving a merger or acquisition do not require shareholder approval in two situations. First, shareholder approval will not be required to convert, replace or adjust outstanding options or other equity compensation awards to reflect the transaction. Second, shares available under certain plans acquired in acquisitions and mergers may be used for certain post-transaction grants without further shareholder approval. This exception applies to situations where the party which is not a listed company following the transaction has shares available for grant under preexisting plans that were previously approved by shareholders and meet the requirements of this Rule 850(a). These shares may be used for post-transaction grants of options and other equity awards by the listed company (after appropriate adjustment of the number of shares to reflect the transaction), either under the pre-existing plan or arrangement or another plan or arrangement, without further shareholder approval, provided: (1) The time during which those shares are available for grants is not extended beyond the period when they would have been available under the preexisting plan, absent the transaction, and (2) such options and other awards are not granted to individuals who were employed by the granting company or its subsidiaries at the time the merger or acquisition was consummated. The Exchange would view a plan or arrangement adopted in contemplation of the merger or acquisition transaction as not pre-existing for purposes of this exception. This exception is appropriate decause it will not result in any increase in the aggregate potential dilution of the combined enterprise. In this regard, any additional shares available for issuance under a plan or arrangement acquired
in connection with a merger or acquisition would be counted by the Exchange in determining whether the transaction involved the issuance of $20 \%$ or more of the company's outstanding common stock, thus triggering the shareholder approval requirements under Rule 850(c).

Inducement grants, tax qualified nondiscriminatory benefit plans, and parallel nonqualified plans are subject to approval by either the issuer's independent compensation committee, or a majority of the issuer's independent directors. It should also be noted that a company would not be permitted to use repurchased shares to fund option plans or grants without prior shareholder approval.

For purposes of Rule 850(a), including this Commentary, the term "parallel nonqualified plan" means a plan that is a "pension plan" within the meaning of the Employee Retirement Income Security Act ("ERISA"), 29 U.S.C. § 1002 (1999), that is designed to work in parallel with a plan intended to be qualified under Internal Revenue Code Section 401(a), to provide benefits that exceed the limits set forth in Internal Revenue Code Section 402(g) (the section that limits an employee's annual pre-tax contributions to a 401(k) plan), Internal Revenue Code Section 401(a)(17) (the section that limits the amount of an employee's compensation that can be taken into account for plan purposes) and/or Internal Revenue Code Section 415 (the section that limits the contributions and benefits under qualified plans) and/or any successor or similar limitations that may thereafter be enacted. However, a plan will not be considered a parallel nonqualified plan unless: (i) It covers all or substantially all employees of an employer who are participants in the related qualified plan whose annual compensation is in excess of the limit of Code Section 401(a)(17) (or any successor or similar limitation that may hereafter be enacted); (ii) its terms are substantially the same as the qualified plan that it parallels except for the elimination of the limitations described in the preceding sentence; and, (iii) no participant receives employer equity contributions under the plan in excess of $25 \%$ of the participant's cash compensation.
Rule 850(a) and this Commentary will become effective upon Securities and Exchange Commission approval; however, existing plans will be grandfathered. Any material modification to plans in place or adopted after the effective date will require shareholder approval.

The Exchange will preclude its member organizations from giving a proxy to vote on equity-compensation plans unless the beneficial owner of the shares has given voting instructions. This is codified in Exchange Rule 862. Amended Rule 862 will be effective for any meeting of shareholders that occurs on or after the 90th day following the effective date of the Securities and Exchange Commission order approving the rule change.

## Rule 862, Proxies at Direction of Owner

Rule 862. A member organization shall give a proxy for stock registered in its name, at the direction of the beneficial owner. If the stock is not in the control or possession of the member organization, satisfactory proof of the beneficial ownership as of the record date may be required.

Member organization holdings as executor, etc.

A member organization may give a proxy to vote any stock registered in its name if the member organization holds such stock as executor, administrator, guardian, trustee, or in a similar representative or fiduciary capacity with authority to vote.
Procedure without instructionsInstructions on stock in names of other member organizations

A member organization which has transinitted proxy soliciting material to the beneficial owner of stock in accordance with the provisions of Rule 861, and which has not received instructions from the beneficial owner by the date specified in the statement accompanying such material, may give a proxy to vote such stock, provided the person signing the proxy has no knowledge of any contest as to the action to be taken at the meeting and provided such action does not include authorization for a merger, consolidation or any other matter which may affect substantially the legal rights or privileges of such stock.

A member organization which has in its possession or control stock registered in the name of another member organization shall:
(1) Forward to such other member organization any voting instructions received from the beneficial owner, or
(2) If the proxy-soliciting material has been transmitted to the beneficial owner of the stock in accordance with Rule 861 and no instructions have been received by the date specified in the statement accompanying such material, notify such other member organization of such fact in order that such organization may give the proxy as provided in the first paragraph of this Rule.

Notwithstanding the foregoing, $a$ member organization may not give a proxy to vote without instructions from beneficidl owners when the matter to be voted upon authorizes the implementation of any equity compensation plan, or any material revision to the terms of any existing equity compensation plan (whether or not stockholder approval of such plan is required by Rule 850.)

## II. Self-Regulatory Organization's Statement of the Purpose of, and

 Statutory Basis for, the Proposed Rule ChangeIn its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item III below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

## A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

## 1. Purpose

The Exchange proposes to revise Exchange Rule 850 to require shareholder approval for stock option plans or other equity compensation arrangements (subject to exceptions specified in the rule), to adopt a "Commentary" pertaining to shareholder approval for stock option plans or other equity compensation arrangements, and to revise Exchange Rule 862 to preclude broker voting in connection with shareholder approval of equity compensation plans.
Specifically, the Exchange proposes to adopt an exception for warrants or rights offered generally to all shareholders. The exception would exclude stock purchase plans available on equal terms to all security holders of the company (such as a dividend reinvestment plan) from the shareholder approval requirement. In addition, the proposal would not require shareholder approval for tax qualified, nondiscriminatory benefit plans as these plans are regulated under the Internal Revenue Code and Treasury Department regulations. Along with tax qualified, non-discriminatory employee benefit plans, the Exchange's proposal also provides an exception for parallel nonqualified plans, which are plans that work parallel with plans intended to
qualify under the Internal Revenue Code. Additionally, an equity compensation plan that provides nonU.S. employees with substantially the same benefits as a comparable tax qualified, non-discriminatory employee benefit plan or parallel nonqualified plan that the issuer provides to its U.S. employees, but for features necessary to comply with applicable foreign tax law, is also exempt from the shareholder approval requirements.
Furthermore, the Exchange proposes to adopt an exception for inducement grants to new employees because, in . these cases, a company has an arm's length relationship with the new employees, and its interests are directly aligned with the shareholders. This exception would apply to persons previously employed by the issuer following a bona fide period of nonemployment. In addition, for these purposes, inducement grants would include grants of options or stock to new employees in connection with a merger or acquisition. The proposal would require that, promptly following an issuance of any employment inducement grant in reliance on this exception, a company must disclose in a press release the material terms of the grant, including the recipient(s) of the grant and the number of shares involved.

In addition, the proposal would provide that plans involving a merger or acquisition would not require shareholder approval in two situations. First, the Exchange will not require shareholder approval to convert, replace or adjust outstanding options or other equity compensation awards to reflect the transaction. Second, the shares available under certain plans acquired in corporate acquisitions and mergers may be used for certain post-transaction grants without further shareholder approval. This exception would apply to situations where the target/acquired company, which is no longer a listed company following the transaction, has shares available for grant under its preexisting plans that were previously approved by its shareholders. These shares may be used for post-transaction grants of options and other equity awards by the acquiring/listed company (after appropriate adjustment of the number of shares to reflect the transaction), either under the preexisting plan or another plan, without further shareholder approval, so long as: (1) The time during which those shares are available for grants is not extended beyond the period when they would have been available under the preexisting plan, absent the transaction, and (2) such options and other awards
are only granted to individuals who were employed by the target/acquired company at the time the merger or acquisition was consummated. The Exchange would view a plan adopted in contemplation of the merger or acquisition transaction as not preexisting for purposes of this exception. The Exchange believes that this exception is appropriate because it believes that it will not result in any increase in the aggregate potential dilution of the combined enterprise.

Under the Exchange's proposal, inducement grants, tax qualified, nondiscriminatory benefit plans, and parallel nonqualified plans are subject to approval by either the issuer's independent compensation committee, or a majority of the issuer's independent directors. The Exchange also notes that a company would not be permitted to use repurchased shares to fund options without prior shareholder approval. Plans that merely provide a convenient way to purchase shares on the open market or from the issuer at fair market value would not require shareholder approval.

The Exchange proposal further clarifies that material amendments to plans would require shareholder approval. The accompanying proposed "Commentary" also provides a nonexclusive list of plan amendments that are considered material, and clarifies that, while general authority to amend a plan would not obviate the need for shareholder approval, if a plan permits a specific action without further shareholder approval, then no such approval would generally be required. ${ }^{5}$ Certain provisions in a plan, however, cannot be amended without shareholder approval. For example, stock option plans that contain a formula for automatic increases in the shares available or for automatic grants pursuant to a dollar-based formula cannot have a term in excess of ten years unless shareholder approval is obtained every ten years. Plans that do not contain a formula and do not impose a limit on the number of shares available for grant would require shareholder approval of each grant under the plan. A requirement that grants be made out of treasury shares or repurchased shares will not alleviate these additional shareholder approval requirements.
The proposed "Commentary" also provides that, as a general matter, when preparing plans and presenting them for

[^96]shareholder approval, issuers should strive to make plan terms easy to understand. In that regard, the Exchange recommends that plans meant to permit repricing use explicit terminology to make this clear.

With respect to implementation of revised Rule 850 and the accompanying Commentary, the Exchange proposes that they become effective upon SEC approval, and that existing plans be grandfathered. Any material modification to plans in place or adopted after the effective date of revised Rule 850 and the accompanying Commentary would require shareholder approval.

Under the Exchange's proposal, issuers would be required to notify the Exchange no later than 15 calendar days prior to establishing or materially amending a stock option plan, purchase plan or other equity compensation arrangement pursuant to which stock may be acquired by officers, directors, employees, or consultants without shareholder approval.

Finally, the Exchange proposes to amend Exchange Rule 862 to prohibit member organizations from voting on equity compensation plans unless the beneficial owner of the shares has given voting instructions. The Exchange proposes, however, a transition period that will make the amended rule applicable only to shareholder meetings that occur on or after the 90th day following the date of the Commission's order approving the amended rule.

## 2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6 of the Act, ${ }^{6}$ in general, and furthers the objectives of Section 6(b)(5) of the Act, ${ }^{7}$ in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest, and does not permit unfair discrimination among issuers.

## B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

[^97]
## C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments on the proposed rule change were neither solicited nor received.

## III. Solicitation of Comments

Interested persons are invited to submit written data. views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549-0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552 , will be available for inspection and copying at the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR-Phlx-2003-67 and should be submitted by November 28, 2003.

## IV. Commission's Findings and Order Granting Accelerated Approval to the Proposed Rule Change

After careful review, the Commission finds that the Exchange's proposal is consistent with the Act and the rules and regulations promulgated thereunder applicable to a national securities exchange and, in particular, with the requirements of Section 6(h) of the Act. ${ }^{8}$ Specifically, the Commission finds that approval of the Exchange's proposal is consistent with Section 6(b)(5) of the Act ${ }^{9}$ in that it is designed to, among other things, facilitate transactions in securities; to prevent fraudulent and manipulative acts and practices: to promote just and equitable principles of trade; to remove impediments to and perfect the mechanism of a free and open market and a national market system: and, in general, to protect investors and the public interest; and

[^98]does not permit unfair discrimination among issuers.

The Commission has long encouraged exchanges to adopt and strengthen their corporate governance listing standards in order to, among other things, restore investor confidence in the national marketplace. The Commission believes that the Exchange's proposal, which requires shareholder approval of equity compensation plans and which follows the Commission's approval of similar proposals by the NYSE, Nasdaq, and Amex ${ }^{10}$ is the first step under this directive because it should have the effect of safeguarding the interests of shareholders, while placing certain restrictions on Exchange-listed companies.

In addition, the Commission notes that the Exchange's proposal is similar and almost identical to proposals by NYSE and Nasdaq requiring shareholder approval of equity compensation plans that have previously been approved by the Commission. ${ }^{11}$ The Commission believes that it has already considered and addressed the issues that may be raised by the Exchange's proposal when it approved these proposals. The Commission notes that approval of the Exchange's proposal will conform the Exchange's shareholder approval requirements for equity compensation plans with those of the NYSE and Nasdaq, and will immediately impose the same requirements on the Exchange's issuers as those imposed upon NYSE, Nasdaq, and Amex issuers. The adoption of these standards by the Exchange is an important step to ensure that issuers will not be able to avoid shareholder approval requirements for equity compensation plans based on their listed marketplace.

## A. Exception From Shareholder Approval for Inducement Grants

The Commission believes that the requirement that the issuance of all inducement grants be subject to review by either the issuer's independent compensation committee or a majority of the board's independent directors, under the Exchange's proposal, should prevent abuse of this exception from shareholder approval. In addition, the Exchange proposes to limit its exception for inducement grants to new employees or to previous employees being rehired

[^99]after a bona fide period of interruption of employment, and to new employees in connection with an acquisition or merger. The Commission believes that these limitations should help to prevent the inducement exception from being used inappropriately.
The Commission notes that the Exchange is proposing to include a requirement, similar to the requirement under the NYSE and Nasdaq's recently approved shareholder approval rules, that, promptly following the grant of any inducement award, companies must disclose in a press release the material terms of the award, including the recipient(s) of the award and the number of shares involved. ${ }^{12}$ The Commission notes that the Exchange is also proposing a requirement, similar to the requirements under the NYSE and Nasdaq's recently approved shareholder approval rules, ${ }^{13}$ that an issuer must notify it in writing when it uses this exception, and/or any other exception, from its shareholder approval requirement. The Commission believes that these disclosure and notification requirements will provide transparency to investors and should reduce the potential for abuse of this exception for inducement grants.

## B. Exception From Shareholder Approval for Mergers and Acquisitions

The Commission notes that the Exchange's exception from shareholder approval for mergers and acquisitions contains safeguards that should prevent abuse in this area. First, only preexisting plans that were previously approved by the acquired company's shareholders would be available to the listed company for post-transactional grants. In addition, shares under those previously approved plans could not be granted to individuals who were employed, immediately before the transaction, by the post-transaction listed company or its subsidiaries. The Commission also notes that, under the Exchange's proposal, any shares reserved for listing in connection with

[^100]a merger or acquisition pursuant to this exception would be counted by the Exchange in determining whether the transaction involved the issuance of $20 \%$ or more of the company's outstanding common stock, thereby requiring shareholder approval under Phlx Rule 850(c). Finally, the Commission notes that the Exchange proposes an additional requirement that an issuer must notify it in writing when it uses this exception, and/or any other exception, from its shareholder approval requirement. Based on the above, the Commission believes that the Exchange has provided measures to ensure that the exception for mergers and acquisitions is only used in limited circumstances, which should help reduce the potential for dilution of shareholder interests.

## C. Exception From Shareholder Approval for Tax Qualified and Parallel Nonqualified Plans

The Commission believes that, given the extensive government regulationthe Internal Revenue Code and Treasury regulations-for tax qualified plans and the general limitations associated with parallel nonqualified plans, shareholders should not experience significant dilution as a result of this exception. In addition, the Commission notes that the Exchange proposes to add a limitation under this exception that a plan would not be considered a nonqualified parallel plan under its proposal if employees who are participants in such a plan receive employer contributions under the plan in excess of $25 \%$ of the participants' cash compensation. The Commission further notes that the Exchange proposes an additional requirement that an issuer must notify it in writing when it uses this exception, and/or any other exception, from its shareholder approval requirement. The Commission believes that, taken together, these limitations should reduce concerns regarding abuse of this exception from the shareholder approval requirements.
In addition, the Commission notes that, similar to the exceptions in the NYSE and Nasdaq's recently approved shareholder approval rules, the Exchange proposes to adopt an exception from the shareholder approval requirements for an equity compensation plan that provides nonU.S. employees with substantially the same benefits as a comparable tax qualified, non-discriminatory employee benefit plan or parallel nonqualified plan that the issuer provides to its U.S. employees, but for features necessary to comply with applicable foreign tax law. The Commission believes that this
change will conform the Exchange's shareholder approval rule to that of the NYSE and Nasdaq and will provide greater clarity for issuers regarding tax qualified, non-discriminatory employee benefit plans and parallel nonqualified plans for their non-U.S. employees.

## D. Material Amendments/Revisions to Plans

The Commission notes that the Exchange proposes to provide a nonexclusive list, similar to lists found in the NYSE and Nasdaq's shareholder approval rules, ${ }^{14}$ as to what constitutes a material amendment/revision to a plan. As noted above, material amendments/revisions to plans will require shareholder approval under Exchange rules. A material amendment/ revision under the Exchange's proposal would include, but is not limited to: A material increase in the number of shares to be issued under the plan (other than to reflect a reorganization. stock split, merger, spinoff or similar transaction); a material increase in benefits to participants, including any material change to (1) pernit a repricing (or decrease in exercise price) of outstanding options, (2) reduce the price at which shares or options to purchase shares may be offered, or (3) extend the duration of the plan; a material expansion of the class of participants eligible to participate in the plan; and an expansion of the type of options or awards available under the plan. The Exchange's proposal also describes what would constitute a material amendment/revision for plans containing a formula for automatic increases (such as evergreen plans) and automatic grants requiring shareholder approval.
The Commission believes that the Exchange's non-exclusive list of what would constitute a material amendment/revision to a plan provides companies with clarity and guidance for when certain amendments and revisions to plans would require shareholder approval. The Commission also believes that the Exchange's proposal to conform its non-exclusive list with the NYSE and Nasdaq's rules on material amendments/revisions should help to ensure that the concept of material amendments/revisions is consistent among the markets so that differences between the markets cannot be abused.

## E. Repricing of Plans

The Commission notes that, under the Exchange's proposal, if a plan is amended to permit repricing, such an amendment would be considered a

[^101]material amendment to a plan requiring shareholder approval. In addition, the Exchange recommended in its proposal that plans meant to permit repricing should explicitly and clearly state that repricing is permitted.

The Commission believes that the Exchange's proposal should benefit shareholders by ensuring that companies cannot do a repricing of options, which can have a dilutive effect on shares, without explicit shareholder approval of such provisions and their terms. The Commission also believes that the Exchange's approach to repricings is similar to the NYSE and Nasdaq's respective approaches to repricings, and should offer companies clarity and guidance as to when a change in a plan regarding the repricing of options would trigger a shareholder approval requirement.

## F. Evergreen or Formula Plans and Plans Without a Formula or Limit on the Number of Shares Available

The Commission notes the Exchange's proposal provides guidance for the treatment of evergreen/formula plans. More specifically, under the Exchange's proposal, if a plan contains a formula for automatic increases in the shares available or for automatic grants pursuant to a formula, such plans cannot have a term in excess of ten years unless shareholder approval is obtained every ten years. In addition, under the Exchange's proposal, if a plan contains no limit on the number of shares available and is not a formula plan, then each grant under the plan will require separate shareholder approval. Furthermore, the Exchange's proposal provides that a requirement that grants be made out of treasury or repurchased shares will not alleviate the need for shareholder approval for additional grants.

The Commission believes that these provisions should help to ensure that certain terms of a plan cannot be drafted so broad as to avoid shareholder scrutiny and approval. The Commission also believes that the Exchange's proposed rules relating to the treatment of evergreen/formula plans and plans that do not contain a formula or place a limit on the number of shares available should provide more clarity and transparency to issuers as to when shareholder approval would be required for such plans. Finally, the Commission believes that the provision ensuring that treasury and repurchased shares cannot be used to avoid these additional shareholder approval requirements strengthens the proposal and ensures that companies cannot avoid compliance with the rule.

## G. Miscellaneous Provisions

The Commission notes that the Exchange's proposal-similar to the NYSE and Nasdaq's recently approved shareholder approval rules ${ }^{15}$ incorporates the term "equity compensation" and proposes that plans that merely provide a convenient way to purchase shares in the open market or from the issuer at fair market price on equal terms to all security holders would not require shareholder approval. The Commission believes that the Exchange's proposal is consistent with the NYSE and Nasdaq's rules in this area and should provide greater clarity with respect to which plans would and would not require shareholder approval.

The Commission notes that the Exchange's proposal provides that preexisting plans, which were adopted prior to the SEC's approval of the Exchange's proposal, would essentially be "grandfathered" and would not require shareholder approval unless the plans were materially amended. Under the Exchange's proposal, however, shareholder approval is required for each grant made pursuant to any preexisting plans that were not approved by shareholders and that do not have an evergreen formula or a specific number of shares available under the plan. This is consistent with the NYSE, Nasdaq, and Amex shareholder approval rules on this matter. The Commission believes that this clarification should provide companies with guidance as to which plans would be subject to the Exchange's new shareholder approval requirements.
The Commission further notes that the Exchange proposes to adopt an exception from the sharehol der approval requirement for warrants or rights offered generally to all shareholders. This exception would exclude stock purchase plans available on equal terms to all security holders of the company (e.g., a dividend reinvestment plan). The Commission believes that the adoption of such an exception would make the Exchange's proposal consistent with the rules of other markets in this area.

## H. Elimination of Broker-Dealer Voting on Equity Compensation Plans

The Commission believes that the Exchange's proposed amendment to Phlx Rule 862 to preclude broker voting on equity compensation plans is consistent with the Act. The Commission notes that equity compensation plans have become an important issue for shareholders.

[^102]Because of the potential for dilution from issuances under such plans, shareholders should be making the determination rather than brokers on their behalf. The Commission further notes that NASD rules do not provide for broker voting on any matters and NYSE rules prohibit broker voting on equity compensation plans. ${ }^{16}$ Therefore, the Exchange's proposed provision would be consistent with NASD and NYSE rules regarding broker voting on equity compensation plans. The Commission has considered the impact on smaller issuers, such as those listed on Nasdaq and the Amex, in response to the comments on this issue. ${ }^{17}$ The Commission believes that the benefit of ensuring that the votes reflect the views of beneficial shareholders on equity compensation plans outweighs the potential difficulties in obtaining the vote.

The Commission also notes that the Exchange proposes to implement a transition period that would make the new rule eliminating broker voting on equity compensation plans applicable only to shareholder meetings that occur on or after the 90th day from the effective date of the Exchange's proposal.

## I. Summary

Overall, the Commission believes that the Exchange's proposal is similar to the NYSE and Nasdaq's recently approved shareholder approval rules. ${ }^{18}$ The Commission therefore believes that the Exchange's proposal should provide for more clear and uniform standards for shareholder approval of equity compensation plans. The Commission notes that, even with the availability of the proposed limited exceptions from shareholder approval under the Exchange's proposal, shareholder approval under the new standards would be required in more circumstances than under existing Exchange rules. The Commission further notes that the Exchange proposes to adopt a requirement that an issuer must notify it in writing when it uses one of the exceptions from the shareholder approval requirements. The Commission believes that such a requirement, coupled with the additional disclosure requirements for inducement grants, should reduce the potential for abuse of any of the exceptions. ${ }^{19}$ In addition, the Exchange's proposed amendment to

[^103]Phlx Rule 862, which would preclude broker-dealers from voting on equity compensation plans without explicit instructions from the beneficial owner, is consistent with the standard under current NYSE and NASD rules.

The Commission believes that the Exchange's proposal, which is similar to the NYSE and Nasdaq's shareholder approval rules, ${ }^{20}$ sets a consistent, ininimum standard for shareholder approval of equity compensation plans. The Commission believes that the Exchange's proposal should help to ensure that companies will not make listing decisions simply to avoid shareholder approval requirements for equity compensation plans and should provide shareholders with greater protection from the potential dilutive effect of equity compensation plans. Based on the above, the Commission finds that the Exchange's proposal should help to protect investors, is in the public interest, and does not unfairly discriminate among issuers, consistent with Section $6(\mathrm{~b})(5)$ of the Act. ${ }^{21}$ The Commission therefore finds the Exchange's proposal to be consistent with the Act and the rules and regulations thereunder.
V. Accelerated Approval of the Exchange's Proposal

The Commission finds good cause for approving the Exchange's proposal prior to the thirtieth day after the date of publication of notice thereof in the Federal Register. The Commission notes that the Exchange's proposal is similar to the NYSE and Nasdaq's proposals requiring shareholder approval of equity compensation plans. Both the NYSE and Nasdaq's proposals were published for comment in the Federal Register and recently approved by the Commission. ${ }^{22}$ The Commission believes that it already considered and addressed the issues that may be raised by the Exchange's proposal in its approval of the NYSE and Nasdaq's proposals. ${ }^{23}$

[^104]The Commission believes that accelerated approval of the Exchange's proposal is essential to allow for immediate harmonization of, and consistency in, the shareholder approval requirements for equity compensation plans among the markets. This will prevent issuers from making listing decisions based on differences in selfregulatory organization shareholder approval requirements and should provide equal investor protection to shareholders on the dilutive effects of plans irrespective of where the security trades. The Commission further believes that making the Exchange's new shareholder approval rules effective upon Commission approval will immediately impose the same requirements on the Exchange's issuers as those imposed upon NYSE, Nasdaq, and Amex issuers. Based on the above, the Commission finds good cause, consistent with Sections 6 (b)(5) and $19(\mathrm{~b})(2)$ of the Act, ${ }^{24}$ to approve the Exchange's proposal on an accelerated basis.

## VI. Conclusion

It.is therefore ordered, pursuant to Section 19(b)(2) of the Act, ${ }^{25}$ that the proposed rule change (SR-Phlx-200367) is hereby approved on an accelerated basis.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority. ${ }^{26}$
Jill M. Peterson,
Assistant Secretary.

## SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster \#3555]

## State of California (Amendment \#1)

In accordance with a notice received from the Department of Homeland Security-Federal Emergency Management Agency, effective October 30. 2003, the above numbered declaration is hereby amended to include Riverside County as a disaster area due to damages caused by wildfires occurring on October 21, 2003, and continuing.

All other counties contiguous to the above named primary county have been previously declared.

All other information remains the same, i.e., the deadline for filing applications for physical damage is

[^105]December 26, 2003, and for economic injury the deadline is July $27,2004$.
(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008)
Dated: October 31, 2003.
Cheri L. Cannon,
Acting Associate Administrator for Disaster Assistance.

## TENNESSEE VALLEY AUTHORITY

Paperwork Reduction Act of 1995, as Amended by Pub. L. 104-13; Submission for Office of Management and Budget (OMB) Review; Comment Request
agency: Tennessee Valley Authority. ACTION: Submission for Office of Management and Budget (OMB) Review; comment request.

SUMMARY: The proposed information collection described below will be submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35, as amended). The Tennessee Valley

Authority is soliciting public comments on this proposed collection as provided by 5 CFR Section 1320.8(d)(1). Requests for information, including copies of the information collection proposed and supporting documentation, should be directed to the Agency Clearance Officer: Alice D. Witt, Tennessee Valley Authority, 1101 Market Street (EB 5B), Chattanooga, Tennessee 37402-2801; (423) 751-6832. (SC:0019QYX)

Comments should be sent to the OMB Office of Information and Regulatory Affairs, Attention: Desk Officer for Tennessee Valley Authority no later than December 8, 2003.

## SUPPLEMENTARY INFORMATION:

Type of Request: Regular submission, proposal to reinstate, with changes, a previously approved collection for which approval has expired.

Title of Information Collection:
Employment Application.
Frequency of Use: On Occasion.
Type of Affected Public: Individuals.
Small Businesses or Organizations Affected: No.

Federal Budget Functional Category Code: 999.
Estimated Number of Annual Responses: 17,543.

Estimated Total Annual Burden Hours: 17,543.

Estimated Average Burden Hours Per Response: 1.

Need For and Use of Information: Applications for employment are needed to collect information on qualifications, suitability for employment, and eligibility for veterans preference. The information is used to make comparative appraisals and to assist in selections. The affected public consists of individuals who apply for TVA employment.
Jacklyn J. Stephenson,
Senior Manager, Enterprise Operations Information Services.

## TENNESSEE VALLEY AUTHORITY

Paperwork Reduction Act of 1995, as Amended by Pub. L. 104-13; Submission for OMB Review, Comment Request
agencr: Tennessee Valley Authority. ACTION: Submission for Office of Management \& Budget (OMB) review; comment request.
SUMMARY: The proposed information collection described below will be submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction

Act of 1995 (44 U.S.C. Chapter 35, as amended). The Tennessee Valley Authority is soliciting public comments on this proposed collection as provided by 5 CFR section 1320.8 (d)(1). Requests for information, including copies of the information collection proposed and supporting documentation, should be directed to the Agency Clearance Officer: Alice D. Witt, Tennessee Valley Authority, 1101 Market Street (EB 5B), Chattanooga, Tennessee 37402-2801; (423) 751-6832 (SC: 0001MYJ). Comments should be sent to the OMB, Office of Information and Regulatory Affairs, Attention: Desk Officer for Tennessee Valley Authority no later than December 8, 2003.

## SUPPLEMENTARY INFORMATION:

Type of Request: Regular submission, proposal to reinstate with no changes, a previously approved collection for which approval has expired..
Title of Information Collection:
Foreign Line Crossing Data.
Frequency of Use: On Occasion.
Type of Affected Public: State or local governments, small businesses or organizations, businesses or other forprofit.

Small Businesses or Organizations Affected: Yes.
Federal Budget Functional Category Code: 271.
Estimated Number of Annual Responses: 100.
Estimated Total Annual Burden
Hours: 1000.
Estimated Average Burden Hours Per Response: 10.
Need For and Use of Information:
When a company wishes to build a line over or under a power transmission line owned by TVA, TVA must review certain engineering data to ensure reliability of the power system and to protect the public by ensuring that the crossing meets the National Electrical Safety Code. The information collection provides such engineering data.

## DEPARTMENT OF TRANSPORTATION

## Office of the Secretary

## Notice of Meeting

AGENCY: Office of the Secretary (OST), DOT.
ACTION: Notice of meeting.
summary: The U.S. Department of Transportation (DOT) announces a
meeting of the Transportation LaborManagement Board (Board). Notice of the meeting is required under the Federal Advisory Committee Act.

Time and Place: The Board will meet on Tuesday, November 25, 2003, at 2 p.m., at the U.S. Department of Transportation, Nassif Building, Room 4400, 400 Seventh Street, SW., Washington, DC 20590. The room is located on the 4th floor.

Type of Meeting: The meeting is open to the public. Please note that visitors without a government identification badge should enter the Nassif Building at the Southwest lobby, for clearance at the Visitor's Desk. Seating will be available on a first-come, first-served basis. Handicapped individuals wishing to attend should contact DOT to obtain appropriate accommodations.

Point of Contact: Stephen Gomez, Executive Secretary, Transportation Labor-Management Board, U.S. Department of Transportation, Nassif Building, 400 Seventh Street, SW., Room 7411, Washington, DC 20590, (202) 366-9455 or 4088.

## SUPPLEMENTARY INFORMATION: The Board

 will be briefed on DOT's migration to the Federal Personnel and Payroll System, the Common Access Architecture project, and the activities of the subcommittees on Human Capital, Competitive Sourcing, and the DOT Labor Relations Climate Survey.Public Participation: We invite interested persons and organizations to. submit comments. Mail or deliver your comments or recommendations to Stephen Gomez at the address shown above. Comments should be received by November 17, 2003 in order to be considered at the November 25th meeting.
Issued in Washington, DC, on October 31, 2003.

For the Department of Transportation. Linda Moody,
Associate Director, Workforce Environment and Pay Division.

## DEPARTMENT OF TRANSPORTATION

## Federal Aviation Administration

Notice of Intent to Rule on Request to Release Airport Property at the Pueblo Memorial Airport, Pueblo, Colorado
Agencr: Federal Aviation
Administration (FAA), DOT.
ACTION: Notice of request to release airport property.
summary: The FAA proposes to rule and invite public comment on the release of land at the Pueblo Memorial Airport under the provisions of Section 125 of the Wendell H. Ford Aviation Investment Reform Act for the 21st Century (AIR 21).
DATES: Comments must be received on or before November 21, 2003.
ADDRESSES: Comments on this
application may be mailed or delivered to the FAA at the following address: Mr. Craig Sparks, Manager, Federal Aviation Administration, Northwest Mountain Region, Airports Division, Denver Airports District Office, 26805 E. 68th Ave., Suite 224, Denver, Colorado, 80249.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. John O'Neal, Director of Aviation, Pueblo Memorial Airport, 31201 Bryan Circle, Pueblo, Colorado, 81001.
FOR FURTHER INFORMATION CONTACT: Ms. Cynthia Nelson, Project Manager, Federal Aviation Administration, Northwest Mountain Region, Airports Division, Denver Airports District Office, 26805 E. 68th Ave., Suite 224 , Denver, Colorado 80249.

The request to release property may be reviewed in person at this same location.
SUPPLEMENTARY INFORMATION: The FAA invites public comment on the request to release property at the Pueblo Memorial Airport under the provisions of the AIR 21. On September 19, 2003, the FAA determined that the request to release property at the Pueblo Memorial Airport submitted by the City of Pueblo met the procedural requirements of the Federal Aviation Regulations, Part 155. The FAA may approve the request, in whole or in part, no later than December 31, 2003.

The following is a brief overview of the request:

The Pueblo Memorial Airport requests the release of 34.07 acres of nonaeronautical airport property to the City of Pueblo, Colorado. The purpose of this release is to allow the City of Pueblo to sell the subject land that was conveyed to the City by the United States acting through the War Assets Administration by Quit Claim Deed dated July 20, 1948. The sale of this parcel will provide funds for airport improvements.

Any person may inspect the request by appointment at the FAA office listed above under FOR FURTHER INFORMATION CONTACT.

In addition, any person may inspect the application, notice and other documents germane to the application
in person at Pueblo Memorial Airport 31201 Bryan Circle, Pueblo, CO 81001.
Issued in Denver, Colorado, on October 29, 2003.

Craig Sparks,
Manager, Denver Airports District Office. [FR Doc. 03-28015 Filed 11-6-03; 8:45 am] BILLING CODE 4910-13-M

## DEPARTMENT OF TRANSPORTATION

Federal Highway Administration
[Docket No. FHWA-2003-16310]
Notice of Request for Renewal of a Currently Approved Information Collection; Statement of Materials and Labor Used by Contractors on Highway Construction Involving Federal Funds, OMB Control Number: 2125-0033
AGENCY: U.S. Department of Transportation, Federal Highway Administration (FHWA).
ACTION: Notice and request for comments.

SUMMARY: In accordance with the requirements in Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, this notice announces the intention of the FHWA to request the Office of Management and Budget (OMB) to renew its clearance for the currently approved FHWA collection of information identified below under Supplementary Information.
DATES: Please submit comments by January 6, 2004.
ADDRESSES: You may submit comments identified by DOT DMS Docket Number FHWA-2003-16310 by any of the following methods:

- Web site: http://dms.dot.gov. Follow the instructions for submitting comments on the DOT electronic docket site.
- Fax: 1-202-493-2251.
- Mail: Docket Management Facility; U.S. Department of Transportation, 400 Seventh Street, SW., Nassif Building, Room PL-401. Washington, DC 20590.
- Hand Delivery: Room PL-401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between 9 am and 5 pm , Monday through Friday, except Federal holidays.

Docket: For access to the docket to read background documents or comments received, go to http:// dms.dot.gov at any time or to Room PL401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between 9 am and 5 pm, Monday through Friday, except Federal holidays.

Public Comments Invited: Interested parties are invited to send comments regarding any aspect of this information collection, including, but not limited to: (1) The necessity and utility of the information collection for the proper performance of the functions of the FHWA; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the collected information; and (4) ways to minimize the collection burden without reducing the quality of the collected information. Comments submitted in response to this notice will be summarized and/or included in the requests for OMB's clearance of the following collection of information.

## SUPPLEMENTARY INFORMATION:

Title: Statement of Materials and Labor Used by Contractors on Highway Construction Involving Federal Funds.

OMB Control Nuinber: 2125-0033.
Background: The State highway agencies and contractors who work on highway projects are required to submit data regarding the usage of materials and labor in highway construction (23 CFR 635.126). This data is submitted to the FHWA on Form FHWA-47,
"Statement of Materials and Labor Used by Contractors on Highway Construction Involving Federal Funds." Title 29 U.S.C. 2 authorizes the Department of Labor (DOL) to collect the labor-related information using its own forces or by getting the information from other Federal agencies. An informal agreement has been reached for the FHWA to collect the desired data for DOL. The data is used by the FHWA for estimating current materials usage and cost distribution on Federal-aid highway construction contracts to aid in planning for future requirements based on anticipated program levels. The information is also used by the Department of Labor in its studies on the highway construction industry's labor and materials requirements, and by the industry, including the materials suppliers. This information is made available to other Federal, State and local agencies, universities, businesses, and industry for their own uses.

Estimated Annual Burden: The FHWA estimates that the total annual burden imposed on the public by this collection is 7,475 hours and the estimated time to complete each report is 5 hours.

Number of Respondents: 650 State highway agencies and Federal-Aid highway contractors.
Frequency: Approximately 650 State highway agencies and Federal-Aid highway contractors complete and submit an average of 2.3 reports on Form FHWA-47 each year.

FOR FURTHER INFORMATION CONTACT: Ms. Claretta Duren, (202) 366-4636,
Department of Transportation, Federal Highway Administration, Office of Pavement Technology, 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., Monday through Friday, except Federal holidays.

Issued on: October 30, 2003
James R. Kabel,
Chief, Management Programs and Analysis Division.

## DEPARTMENT OF TRANSPORTATION

Federal Highway Administration
[Docket No. FHWA-2003-16313]
Notice of Request for Renewal of a Currently Approved Information Collection; Federal-Aid Highway Construction Equal Employment Opportunity, OMB Control Number: 2125-0019

AGENCY: U.S. Department of Transportation, Federal Highway Administration (FHWA). ACTION: Notice and request for public comments.

SUMMARY: In accordance with the requirements in section 3506 (c)(2)(A) of the Paperwork Reduction Act of 1995, this notice announces the intention of the FHWA to request the Office of Management and Budget (OMB) to renew its clearance for the currently approved FHWA collection of information identified below under Supplementary Information.
DATES: Please submit comments by January 6, 2004.
ADDRESSES: You may submit comments identified by DOT DMS Docket Number FHWA-2003-16313 by any of the following methods:

- Web site: http://dms.dot.gov. Follow the instructions for submitting comments on the DOT electronic docket site.
- Fax: 1-202-493-2251.
- Mail: Docket Management Facility;
U.S. Department of Transportation, 400 Seventh Street, SW., Nassif Building, Room PL-401, Washington, DC 20590.
- Hand Delivery: Room PL-401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between 9 am and 5 pm , Monday through Friday, except Federal Holidays.
Docket: For access to the docket to read background documents or
comments received, go to http:// dms.dot.gov at any time or to Room PL401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Public Comments Invited: Interested parties are invited to send comments regarding any aspect of this information collection, including, but not limited to: (1) The necessity and utility of the information collection for the proper performance of the functions of the FHWA; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the collected information; and (4) ways to minimize the collection burden without reducing the quality of the collected information. Comments submitted in response to this notice will be summarized and/or included in the requests for OMB's clearance of the following collection of information.

## SUPPLEMENTARY INFORMATION:

Title: Federal-Aid Highway Construction Equal Employment Opportunity.
OMB Control Number: 2125-0019 (Expiration Date: January 31, 2004). Background: Title 23, part 140(a), requires the FHWA to ensure equal opportunity regarding contractors' employment practices on Federal-aid highway projects. To carry out this requirement the contractors must submit to the State highway agencies an annual report providing employment work force data, which includes the number of minorities, women, and nonminorities in each construction craft. This information is reported on Form PR-1391, Federal-Aid Highway Construction Contractors Summary of Employment Data. The statute also requires the State highway agencies to submit a report to the FHWA summarizing the data entered on the PR-1391 forms. This summary data is provided on Form PR-1392, FederalAid Highway Construction Contractors Summary of Employment Data. The FHWA uses this data to identify patterns and trends of employment in the highway construction industry, and to determine the adequacy and impacts of the FHWA's contract compliance and on-the-job training programs.

Estimated Annual Burden: The FHWA estimates the total annual burden hours imposed on the public by this collection is 6,580 hours; i.e., 2,080 hours is required by the 52 State highway agencies to complete and submit the Form PR-1392, and an additional 4,500 hours is required for 4,500 Federal-aid highway construction
contractors to complete and submit the Form PR-1391.

Number of Respondents: 52 State highway agencies and 4,500 Federal-aid highway construction contractors.
FOR FURTHER INFORMATION CONTACT: Mr. Charles Klemstine, (202) 366-6753, Department of Transportation, Federal Highway Administration, Office of Civil Rights, 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., Monday through Friday, except Federal holidays.

Authority: 23 U.S.C. 140(a); 23 CFR
635.126; 29 U.S.C. 2; 23 U.S.C. 123; 23 U.S.C. 116; 23 U.S.C. 130; 49 CFR 1.48.

Issued on: November 3, 2003.

## DEPARTMENT OF TRANSPORTATION

## Surface Transportation Board

[STB Finance Docket No. 34305]
The Burlington Northern and Santa Fe Railway Company-Construction and Operation Exemption-in Merced County, CA

AGENCY: Surface Transportation Board, Transportation.
ACTION: Notice of Availability of Environmental Assessment and request for comments.

SUMMARY: The Surface Transportation Board's (Board) Section of Environmental Analysis (SEA) has prepared an Environmental Assessment (EA) in response to a petition filed by the Burlington Northern and Santa Fe Railway Company. The petition seeks an exemption under 49 U.S.C. 10502 from the prior approval requirements of 49 U.S.C. 10901 for authority to construct and operate an 850 -foot long rail line in Merced, California. The EA identifies the natural and man-made resources in the area of the proposed rail line and analyzes the potential impacts of the rail line construction and operation on these resources. Based on the information provided from all sources to date and its independent analysis, SEA preliminarily concludes that construction and operation of the proposed rail line would have no significant environmental impacts if the Board imposes and the Burlington Northern and Santa Fe Railway Company implements the recommended mitigation measures set forth in this EA. Copies of the EA have been served on
all interested parties and will be made available to additional parties upon request. The entire EA is also available on the Board's Web site (http:// www.stb.dot.gov) by clicking on the
"Decisions \& Notices" button and searching by Service Date (November 7, 2003), Docket Number (FD 34305) or Full Text (key word "Quebecor"). SEA will consider all comments received when making its final environmental recommendations to the Board. The Board will then consider SEA's final recommendations and the complete environmental record in making its final decision in this proceeding.
DATES: The EA is available for public review and comment. Comments must be postmarked December 10, 2003. adDresses: Comments (an original and 10 copies) should be sent in writing to: Surface Transportation Board, Case Control Unit, 1925 K Street, NW., Washington, DC 20423. The lower left corner of the envelope should be marked: Attention: Mr. David Navecky, Environmental Comments, Finance Docket No. 34305.
FOR FURTHER INFORMATION CONTACT:-
David Navecky by mail at the address above, by telephone at (202) 565-1593 (FIRS for the hearing impaired (1-800-877-8339)), or by e-mail at naveckyd@stb.dot.gov.

By the Board, Victoria Rutson, Chief,
Section of Environmental Analysis.

## DEPARTMENT OF THE TREASURY

## Internal Revenue Service

[REG-209682-94]

## Proposed Collection: Comment Request for Regulation Project

agency: Internal Revenue Service (IRS), Treasury.
ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Pub. L. 104-13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning final regulation, REG-209682-94 (TD 8847),

Adjustments Following Sales of Partnership Interests, ( $\$ \S 1.732-1$ and 1.743-1).

DATES: Written comments should be received on or before January 6,2004 , to be assured of consideration.
ADDRESSES: Direct all written comments to R. Joseph Durbala, Internal Revenue Service, room 6411, 1111 Constitution Avenue NW., Washington, DC 20224.

## FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of regulations should be directed to Carol Savage at Internal Revenue Service, room 6407, 1111 Constitution Avenue NW., Washington, DC 20224, or at (202) 622-3945, or through the internet at carol.a.savage@irs.gov. SUPPLEMENTARY INFORMATION:

Title: Adjustments Following Sales of Partnership Interests.

OMB Number: 1545-1588.
Regulation Project Number: REG-209682-94.

Abstract: Partnerships, with a section 754 election in effect, are required to adjust the basis of partnership property following certain transfers of partnership interests. This regulation relates to the optional adjustments to the basis of partnership property following certain transfers of partnership interests under section 743. the calculation of gain or loss under section 751(a) following the sale or exchange of a partnership interest, the allocation of basis adjustments among partnership assets under section 755 , the allocation of a partner's basis in its partnership interest to properties distributed to the partner by the partnership under section 732(c), and the computation of a partner's proportionate share of the adjusted basis of depreciable property (or depreciable real property) under section 1017.

Current Actions: There are no changes being made to the regulation at this time.

Type of Review: Extension of a currently approved collection.
Affected Public: Business or other forprofit organizations.
Estimated Number of Respondents/ Recordkeepers: 226,000.

Estimated Time Per Respondent/ Recordkeeper: 4 lirs.

Estimated Total Annual Burden Hours: 904,000.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection
of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.
Approved: October 31, 2003.
R. Joseph Durbala,

IRS Reports Clearance Officer.

## DEPARTMENT OF THE TREASURY

## Internal Revenue Service

Information Reporting Program
Advisory Committee; Renewal of Charter
AGENCY: Internal Revenue Service (IRS), Treasury.
ACTION: Notice.
summary: The Charter for the Information Reporting Program Advisory Committee will renew for a two-year period beginning November 5 , 2003.

FOR FURTHER INFORMATION CONTACT: Ms. Lorenza Wilds, National Public Liaison, 202-622-6440 (not a toll-free number). SUPPLEMENTARY INFORMATION: Notice is hereby given pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. (1988), and with the approval of the Secretary of the Treasury to announce the renewal of the Information Reporting Program Advisory Committee (IRPAC). The primary purpose of the Advisory Committee is to provide an organized public forum for senior Internal Revenue Service executives and
representatives of the public to consider relevant information reporting issues. The IRPAC: (i) Conveys the public's perception of IRS activities; (ii) advises with respect to specific information reporting administration issues; (iii) provides constructive observations regarding current or proposed IRS policies, programs, and procedures; and (iv) proposes significant improvements in information reporting operations. Because each Operating Division relies on the Information Reporting Program, the IRS must ensure application of a coordinated approach when addressing information reporting issues. Therefore, acknowledging the critical role of information reporting, emphasizing its commitment to the Information Reporting Program, and as a measure of the IRPAC's importance, a centralized coordinating mechanism, the Information Reporting Program Policy Council (IRP Policy Council) was established to formulate and coordinate strategic and crosscutting information reporting issues. A counterpart to the IRPAC consisting of IRS executives from each Operating Division, the IRP Policy Council facilitates cross-divisional consistency in information reporting and provides strategic leadership for the Service-wide direction of the Information Reporting Program. In addition, the IRP Policy Council considers and prioritizes the recommendations of the IRPAC as part of the strategic planning process, and meets regularly with Committee members to identify and recommend strategic issues for consideration. To accomplish its objective of close alignment with the needs and strategic goals of the IRS while remaining a strong external feedback mechanism, it is essential that IRPAC members comprise a diverse group of dedicated and talented professionals who bring substantial disparate experience and backgrounds to the Committee activities. Membership is balanced to include representation from the taxpaying public, the tax professional community, small and large businesses, state tax administrators, academics, preparers, and the payroll community.

Dated: November 3, 2003.
Cynthia Vanderpool,
Designated Federal Official, Branch Chief, Liaison Tax Forum.

## Advisory Group to the Commissioner of Internal Revenue; Renewal of Charter

AGENCY: Internal Revenue Service (IRS), Treasury.

## ACtIon: Notice.

summary: The Charter for the Internal Revenue Service Advisory Council (IRSAC) will renew for a two-year period beginning November 5, 2003.
FOR FURTHER INFORMATION CONTACT: Ms. Lorenza Wilds, National Public Liaison, 202-622-6440 (not a toll-free number).
SUPPLEMENTARY INFORMATION: Notice is hereby given pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. (1988), and with the approval of the Secretary of the Treasury to announce the renewal of the Internal Revenue Service Advisory Council (IRSAC). The primary purpose of the Advisory Council is to provide an organized public forum for senior Internal Revenue Service executives and representatives of the public to discuss relevant tax administration issues. As an advisory body designed to focus on broad policy matters, the IRSAC reviews existing tax policy and/or makes recommendations with respect to emerging tax administration issues. The IRSAC suggests operational improvements, offers constructive observations regarding current or proposed IRS policies, programs, and procedures, and suggest improvements with respect to issues having substantive effect on federal tax administration. Conveying the public's perception of IRS activities to Internal Revenue Service executives, the IRSAC is comprised of individuals who bring substantial, disparate experience and diverse backgrounds. Membership is balanced to include representation from the taxpaying public, the tax professional community, small and large businesses, state tax administration, and the payroll community.

## Internal Revenue Service

## Electronic Tax Administration Advisory Committee (ETAAC)

agencr: Internal Revenue Service (IRS), Treasury.
ACTION: Notice of open meeting.
SUMMARY: In 1998 the Internal Revenue Service established the Electronic Tax Administration Advisory Committee (ETAAC). The primary purpose of ETAAC is to provide an organized public forum for discussion of electronic tax administration issues in support of the overriding goal that paperless filing should be the preferred and most convenient method of filing tax and information returns. ETAAC offers constructive observations about current or proposed policies, programs, and procedures, and suggests improvements. Listed is a summary of the agenda along with the planned discussion topics.
Summarized Agenda
$9 \mathrm{a} . \mathrm{m}$. Meeting Opens
12:30 p.m. Meeting Adjourns
The planned discussion topics are:
(1) Modernized e-File Update
(2) e-Services Update
(3) Filing Season Readiness
(4) Overview of IRS Operations Support Organization
Note: Last-minute changes to these topics are possible and could prevent advance notice.
DATES: There will be a meeting of ETAAC on Thursday, December 4, 2003. This meeting will be open to the public, and will be in a room that accommodates approximately 40 people, including members of ETAAC and IRS officials. Seats are available to members of the public on a first-come, first-served basis.
ADDRESSES: The meeting will be held at the Ritz-Carlton Hotel "Pentagon City, Diplomat Meeting Room, 1250 South Hayes Street, Arlington, VA 22202.
FOR FURTHER INFORMATION CONTACT: To get on the access list to attend this meeting, to have a copy of the agenda faxed to you or to receive general information about ETAAC, contact Kim Logan at (202) 283-1947 by November 26,2003 . Notification of intent should include your name, organization and telephone number. If you leave information for Ms. Logan in a voicemail message, please spell out all names. A draft of the agenda will be available via e-mail or facsimile transmission the week prior to the meeting. Please call Ms. Logan on or
after November 24, 2003 to have a copy of the agenda faxed to you. Please note that a draft agenda will not be available until that date.
SUPPLEMENTARY INFORMATION: ETAAC reports to the Director, Electronic Tax Administration, who is the executive responsible for the electronic tax administration program. Increasing participation by external stakeholders in the development and implementation of the Internal Revenue Service's strategy for electronic tax administration. will help achieve the goal that paperless filing should be the preferred and most convenient method of filing tax and information returns.

ETAAC members are not paid for their time or services, but consistent with Federal regulations, they are reimbursed for their travel and lodging expenses to attend the public meetings, working sessions, and an orientation each year.
Dated: November 3, 2003.
Kathleen Upton,
Acting Director Strategic Services Division, Electronic Tax Administration.

## DEPARTMENT OF VETERANS AFFAIRS

## [OMB Control No. 2900-0376]

Proposed Information Collection Activity: Proposed Collection; Comment Request
agency: Veterans Health
Administration, Department of Veterans Affairs.
ACTION: Notice.
summary: The Veterans Health Administration (VHA) is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the Federal Register concerning each proposed collection of information, including each proposed extension of a currently approved collection, and allow 60 days for public comment in response to the notice. This notice solicits comments on the information needed to maintain an up-to-date Agent Orange Registry.
DATES: Written comments and recommendations on the proposed collection of information should be received on or before January 6, 2004. ADDRESSES: Submit written comments on the collection of information to Ann Bickoff, Veterans Health Administration (191A1), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420 or e-mail ann.bickoff@mail.va.gov. Please refer to "OMB Control No. 2900-0376" in any correspondence.
FOR FURTHER INFORMATION CONTACT: Ann Bickoff at (202) 273-8310.
SUPPLEMENTARY INFORMATION: Under the PRA of 1995 (Public Law 104-13; 44 U.S.C. 3501 " 3520 ), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.
With respect to the following collection of information, VHA invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of VHA's functions, including whether the information will have practical utility; (2) the accuracy of VHA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use
of automated collection techniques or the use of other forms of information technology.

Title: Agent Orange Registry Code Sheet, VA Form 10-9009.

OMB Control Number: 2900-0376. Type of Review: Extension of a currently approved collection.
Abstract: VA in an on-going effort to naintain an Agent Orange Registry (AOR) developed a reporting format to facilitate the collection of information obtained from veterans during the Agent Orange registry examination process. VA is required to organize and update the information contained in AOR to enable VA to notify Vietnam era veterans who served in the Republic of Vietnam of any increased health risks resulting from exposure to dioxin or other toxic agents. VA may also provide, upon request, a health examination, consultation, and counseling to a veteran who is eligible for listing or inclusion in any health-related registry administrated by VA that is similar to the Persian Gulf War Veterans Health Registry. Registry examinations is provided to veterans who served in Korea in 1968 or 1969, and/or any U.S. veteran who may have been exposed to dioxin, or other toxic substance in a herbicide or defoliant, during the conduct of, or as a result of, the testing, transporting, or spraying of herbicides, and who requests an Agent Orange Registry examination. The information obtained from the veteran during the interview is entered on VA Form 109009, Agent Orange Registry Code Sheet. The registry will provide a mechanism to catalogue prominent symptoms, reproductive health, and diagnoses and to communicate with Agent Orange veterans. VA informs the veterans on research finding or new compensation policies through periodic newsletters. The registry is not designed or intended to be a research tool and therefore the results cannot be generalized to represent all Agent Orange veterans.

Affected Public: Individuals or Households.

Estimated Total Annual Burden: 12,000 hours.

## Estimated Average Burden Per

 Respondent: 20 minutes.Frequency of Response: On occasion.
Estimated Number of Respondents: 36,000.

Dated: October 30, 2003.
By direction of the Secretary.
Jacqueline Parks,
IT Specialist, Records Management Service. [FR Doc. 03-28127 Filed 11-6-03; 8:45 am] BILLING CODE 8320-01-P

Part II

## Department of Health and Human Services

Centers for Medicare \& Medicaid Services
42 CFR Parts 410 and 414
Medicare Program; Revisions to Payment Policies Under the Physician Fee Schedule for Calendar Year 2004; Final Rule

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

## Centers for Medicare \& Medicaid Services

42 CFR Parts 410 and 414
[CMS-1476-FC]
RIN 0938-AL96
Medicare Program; Revisions to Payment Policies Under the Physician Fee Scheduie for Caiendar Year 2004
agency: Centers for Medicare \& Medicaid Services (CMS), HHS.
ACTION: Final rule with comment period.
summary: This final rule will refine the resource-based practice expense relative value units (RVUs) and make other changes to Medicare Part B payment policy. The policy changes concern: Medicare Economic Index, practice expense for professional component services, definition of diabetes for diabetes self-management training, supplemental survey data for practice expense, geographic practice cost indices, and several coding issues. In addition, this rule updates the codes subject to the physician self-referral prohibition. We also make revisions to the sustainable growth rate and the anesthesia conversion factor.

These changes will ensure that our payment systems are updated to reflect changes in medical practice and the relative value of services.

We are also finalizing the calendar year (CY) 2003 interim RVUs and are issuing interim RVUs for new and revised procedure codes for CY 2004.

As required by the statute, we are announcing that the physician fee schedule update for CY 2004 is -4.5 percent, the initial estimate of the sustainable growth rate for CY 2004 is 7.4 percent, and the conversion factor for CY 2004 is $\$ 35.1339$.

We published a proposed rule (68 FR 50428) in the Federal Register on Part B drug payment reform on August 20, 2003. This proposed rule would also make changes to Medicare payment for furnishing or administering certain drugs and biologicals. We have not finalized these proposals to take into account that the Congress is considering legislation that would address these issues. We will continue to monitor legislative activity that would reform the Medicare Part B drug payment system. If legislation is not enacted soon on this issue, we remain committed to completing the regulatory process.
DATES: Effective date: These regulations are effective on January 1, 2004.

Comment date: We will consider comments on the physician self-referral designated health services additions and deletions identified in Tables 8 and 9, and the interim work RVUs for selected procedure codes identified in
Addendum C if we receive them at the appropriate address, as provided in the addresses section, no later than 5 p.m. on January 6, 2004.
ADDRESSES: In commenting, please refer to file code CMS-1476-FC. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission. Mail written comments (one original and two copies) to the following address ONLY:

## Centers for Medicare \& Medicaid

Services, Department of Health and Human Services, Attention: CMS-1476-FC, P.O. Box 8013, Baltimore, MD 21244-8013.
Please allow sufficient time for us to receive mailed comments on time in the event of delivery delays.

If you prefer, you may deliver (by hand or courier) your written comments (one original and two copies) to one of the following addresses:
Room 445-G, Hubert H. Humphrey
Building, 200 Independence Avenue,
SW., Washington, DC 20201, or Room C5-14-03, 7500 Security Boulevard, Baltimore, MD 21244-8013.
(Because access to the interior of the HHH Building is not readily available to persons without Federal Government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available if you wish to retain proof of filing by stamping in and retaining an extra copy of the comments being filed.)

Comments mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and could be considered late.

For information on viewing public comments, see the beginning of the SUPPLEMENTARY INFORMATION section.

## SUPPLEMENTARY INFORMATION:

Copies: To order copies of the Federal Register containing this document, send your request to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954. Specify the date of the issue requested and enclose a check or money order payable to the Superintendent of Documents, or enclose your Visa or Master Card number and expiration date. Credit card orders can also be placed by calling the order desk at (202) $512-1800$ or by faxing to (202) 5122250 . The cost for each copy is $\$ 10$. As an alternative, you can view and photocopy the Federal Register document at most libraries designated as Federal Depository Libraries and at many other public and academic libraries throughout the country that receive the Federal Register.

This Federal Register document is also available from the Federal Register online database through GPO access, a service of the U.S. Government Printing Office. The Web site address is http:// www.access.gpo.gov/nara/index.html.

## Accessing Physician Fee Schedule Web

 Site and Pricing InformationInformation on the physician fee schedule and pricing files can be found on our homepage. You can access this data by typing the following: http:// cms.hhs.gov/physicians/pfs or you can access this data by using the following directions:

1. Go to the CMS homepage (http:// www.cms.hhs.gov).
2. Place your cursor over the word "Professionals" in the blue area near the top of the page. Select "Physicians" from the drop-down menu.
3. Scroll down and under "Payment/ Billing" select "Physician Fee Schedule'.

The Physician Fee Schedule pricing information is contained in two public use files.
(1) National Physician Fee Schedule Relative Value File--This file contains all CPT/HCPCS (excluding codes beginning with $\mathrm{B}, \mathrm{E}, \mathrm{L}, \mathrm{K}$, and O ), their short descriptions and a status indicator, which denotes whether or not the service is priced under the physician fee schedule. The file also contains the components used in the calculation of the annual pricing amount (that is., the RVUs, GPCIs, and
conversion factor), anesthesia conversion factors, and the payment policy indicators used to price the claims with surgical modifiers. This file does not contain the calculated pricing amounts.
(2) Physician Fee Schedule Payment Amount File National/Carrier-This file contains the CPT code and the Medicare price for all services priced under the Physician Fee Schedule. These data can be downloaded for (a) the entire country, or (b) for a selected carrier (in most cases carriers correlate with states). There is no option of requesting data for selected HCPCS codes. The zip file, which is downloaded, contains a file named PF04pc.doc, which explains the data contained in each column. This file also contains a description of pricing localities used in the Physician Fee Schedule. Due to the size of the national file (as well as many of the carrier-specific files), these data are provided in a comma-delimited format, which can be used to populate database applications. Generally speaking, these data are too large for Excel, however if a carrier specific file has 3 or fewer localities, Excel can be used.

Another file that providers may find useful is the Zipcode to Carrier Locality File. This file will map ZIP Codes to CMS carriers and localities and map Zip Codes to their State and determine whether the ZIP Code has a rural designation as determined by CMS You can access this file by typing the following: http://cms.hhs.gov/providers/ pufdownload/default.asp\#alphanu or you can access this data by using the following directions:

1. Go to the CMS homepage (http:// www.cms.hhs.gov).
2. Place your cursor over the word "Professionals" in the blue area near the top of the page. Select "Physicians' from the drop-down menu.
3. Scroll down and under "Payment/ Billing" select "Medicare Payment Systems."
4. Scroll down and under Coding

Files select "Zipcode to Carrier Locality File."

## I. Background

## A. Legislative History

Since January 1, 1992, Medicare has paid for physicians' services under section 1848 of the Social Security Act (the Act), "Payment for Physicians" Services." This section provides for three major elements: (1) A fee schedule for the payment of physicians' services; (2) limits on the amounts that nonparticipating physicians can charge beneficiaries; and (3) a sustainable growth rate (SGR) for the rates of increase in Medicare expenditures for physicians' services. The Act requires that payments under the fee schedule be based on national uniform relative value units (RVUs) that are based on the resources used in furnishing a service. Section 1848(c) of the Act requires that national RVUs be established for physician work, practice expense, and malpractice expense. Section 1848(c)(2)(B)(ii)(II) of the Act provides that adjustments in RVUs may not cause total physician fee schedule payments to differ by more than $\$ 20$ million from what they would have been had the adjustments not been made. If adjustments to RVUs cause expenditures to change by more than
\$20 million, we must make adjustments to ensure that they do not increase or decrease by more than $\$ 20$ million.

## B. Published Changes to the Fee Schedule

In the July 2000 proposed rule, (65 FR 44177), we listed all of the final rules published through November 1999. In the August 2001 proposed rule (66 FR 40372) we discussed the November 2000 final rule relating to the updates to the RVUs and revisions to payment policies under the physician fee schedule.

In the November 2001 final rule with comment period ( 66 FR 55246), we made revisions to resource-based practice expense RVUs; services and supplies incident to a physician's professional service; anesthesia base unit variations; recognition of Physicians' Current Procedural Terminology (CPT) tracking codes; and nurse practitioners, physician assistants, and clinical nurse specialists performing screening sigmoidoscopies. We also addressed comments received on the June 8, 2001 proposed notice ( 66 FR 31028) for the 5 -year review of work RVUs and finalized these work RVUs. In addition, we acknowledged comments received in response to a discussion of modifier-62, which is used to report the work of co-surgeons. The November 2001 final rule also updated the list of services that are subject to the physician self-referral prohibitions in order to reflect CPT and Healthcare Common Procedure Coding System (HCPCS) code changes that were effective January 1, 2002. All these revisions ensure that our payment systems are updated to reflect changes in medical practice and the relative value of services. This final rule also conformed our regulations to reflect statutory provisions of Medicare, Medicaid, and State Child Health Insurance Program (SCHIP) Benefits Improvement and Protection Act of 2000 (Pub. L. 106-554) (BIPA) concerning: the mammography screening benefit; biennial screening pelvic examinations for certain beneficiaries; expanded ceverage for screening colonoscopies to all beneficiaries; annual glaucoma screenings for high-risk beneficiaries; coverage for medical nutrition therapy services for certain beneficiaries; expanded payment for telehealth services; payment for certain Indian Health Service for some services under the physician fee schedule; and revision of the payment for certain physician pathology services.

In the December 31, 2002 final rule with comment period (67 FR 79966), we refined resource-based practice expense

RVUs and made other changes to Medicare Part B policy. These included: The pricing of the technical component for positron emission tomography (PET) scans, Medicare qualifications for clinical nurse specialists, a process to add or delete services to the definition of telehealth, the definition for ZZZ global periods, global period for surface radiation, and application of endoscopic reduction rules for certain codes. In addition, this rule: Updated the codes subject to physician self-referral prohibitions, expanded the definition of a screening fecal-occult blood test, and modified our regulations to expand coverage for additional colorectal cancer screening tests through our national coverage determination process. We also made revisions to the SGR, the anesthesia conversion factor (CF). and the work values for some gastroenterologic services. We finalized the calendar year (CY) 2002 interim RVUs and assigned interim RVUs for new and revised procedure codes for CY 2003, clarified the enrollment of therapists in private practice and the policy regarding services and supplies incident to a physician's professional services, and made technical changes to the definition of outpatient rehabilitation services.

This final rule also revised the regulations at $\S 485.618$ to allow registered nurses (RNs) to provide emergency care in certain critical access hospitals (CAHs) in frontier areas (an area with fewer than six residents per square mile) or remote locations (locations designated in a State's rural health plan that we have approved).

As required by statute this final rule also announced that the physician fee schedule update for CY 2003 was - 4.4 percent, the initial estimate of the SGR for CY 2003 was 7.6 percent, and the CF for CY 2003 was $\$ 34.5920$, effective March 1, 2003. However, on February 28, 2003 ( 68 FR 9567), after enactment of the Consolidated Appropriations Resolution of 2003 (Pub. L. 108-7), we published a final rule that revised the estimates used to establish the SGRs for fiscal years 1998 and 1999 and announced a 1.6 percent increase in the CY 2003 physician fee schedule CF for March 1 to December 31, 2003. The CF from March 1 to December 31, 2003 is $\$ 36.7856$ and the anesthesia CF for this period is $\$ 17.05$. All other provisions of the December 31, 2002 final rule were unchanged by the rule published February 28, 2003.

## C. Components of the Fee Schedule <br> Payment Amounts

Under the formula set forth in section 1848(b)(1) of the Act, the payment
amount for each service paid under the physician fee schedule is the product of three factors-(1) a nationally uniform relative value for the service; (2) a geographic adjustment factor (GAF) for each physician fee schedule area; and (3) a nationally uniform conversion factor (CF) for the service. The CF converts the relative values into payment amounts.

For each physician fee schedule service, there are three relative values(1) an RVU for physician work; (2) an RVU for practice expense; and (3) an RVU for malpractice expense. For each of these components of the fee schedule, there is a geographic practice cost index (GPCI) for each fee schedule area. The GPCIs reflect the relative costs of practice expenses, malpractice insurance, and physician work in an area compared to the national average for each component.
The general formula for calculating the Medicare fee schedule amount for a given service in a given fee schedule area can be expressed as:
Payment $=[($ RVU work $\times$ GPCI work $)+$ (RVU practice expense $\times \mathrm{GPCI}$ practice expense) + (RVU malpractice $\times$ GPCI malpractice) $] \times$ CF
The CF for CY 2004 appears in section IX. The RVUs for CY 2004 are in Addendum B. The GPCIs for CY 2004 can be found in Addendum D. Section 1848(e) of the Act requires us to develop GAFs for all physician fee schedule areas. The total GAF for a fee schedule area is equal to a weighted average of the individual GPCIs for each of the three components of the service. In accordance with the statute, however, the GAF for the physician's work reflects one-quarter of the relative cost of physician's work compared to the national average.

## D. Development of the Relative Value System

## 1. Work Relative Value Units (RVUs)

Approximately 7,500 codes represent services included in the physician fee schedule. The work RVUs established for the implementation of the fee schedule in January 1992 were developed with extensive input from the physician community. A research team at the Harvard School of Public Health developed the original work RVUs for most codes in a cooperative agreement with us. In constructing the vignettes for the original RVUs, Harvard worked with expert panels of physicians and obtained input from physicians from numerous specialties.

The RVUs for radiology services were based on the American College of Radiology (ACR) relative value scale,
which we integrated into the overall physician fee schedule. The RVUs for anesthesia services were based on RVUs from a uniform relative value guide. We established a separate CF for anesthesia services, and we continue to recognize time as a factor in determining payment for these services. As a result, there is a separate payment system for anesthesia services.
2. Practice Expense and Malpractice Expense Relative Value Units

Section 1848(c)(2)(C) of the Act required that the practice expense and malpractice expense RVUS equal the product of the base allowed charges and the practice expense and malpractice percentages for the service. Base allowed charges are defined as the national average allowed charges for the service furnished during 1991, as estimated using the most recent data available. For most services, we used 1989 charge data aged to reflect the 1991 payment rules, since those were the most recent data available for the 1992 fee schedule.

Section 121 of the Social Security Act Amendments of 1994 (Pub. L. 103-432), enacted on October 31, 1994, required us to develop a methodology for a resource-based system for determining practice expense RVUs for each physician service. As amended by the BBA, section $1848(\mathrm{c})$ required the new payment methodology to be phased in over 4 years, effective for services furnished in 1999, with resource-based practice expense RVUs becoming fully effective in 2002. The BBA also required us to implement resource-based malpractice RVUs for services furnished beginning in 2000.

## II. Specific Provisions for Calendar Year 2004

In response to the publication of the August 15, 2003 proposed rule, (68 FR 49030), and the December 2002 interim final rule, ( 67 FR 79966), we received approximately 2,433 comments. We received comments from individual physicians, health care workers, and professional associations and societies. The majority of comments addressed the physician fee schedule proposals related to the dialysis G codes, "incident to" therapy services, and the geographic practice cost indices locality payment discussion issue.

The proposed rule discussed policies that affected the RVUs on which payment for certain services would be based. Certain changes implemented through this final rule are subject to the \$20 million limitation on annual adjustments contained in section 1848(c)(2)(B)(ii)(II) of the Act.

After reviewing the comments and determining the policies we would implement, we have estimated the costs and savings of these policies and added those costs and savings to the estimated costs associated with any other changes in RVUs for 2004. We discuss in detail the effects of these changes in the Regulatory Impact Analysis in section XIII.

For the convenience of the reader, the headings for the policy issues correspond to the headings used in the August 15, 2003 proposed rule. More detailed background information for each issue can be found in the December 2002 interim final rule with comment period and the August 2003 proposed rule.

## A. Resource-Based Practice Expense Relative Value Units

## 1. Resource-Based Practice Expense Legislation

Section 121 of the Social Security Act Amendments of 1994 (Pub. L. 103-432), enacted on October 31, 1994, required us to develop a methodology for a resource-based system for determining practice expense RVUs for each physician's service beginning in 1998. In developing the methodology, we were to consider the staff, equipment, and supplies used in providing medical and surgical services in various settings. The legislation specifically required that, in implementing the new system of practice expense RVUs, we apply the same budget-neutrality provisions that we apply to other adjustments under the physician fee schedule.
Section 4505(a) of the Balanced Budget Act of 1997 (BBA) (Pub. L. 10533), enacted on August 5, 1997, amended section 1848 (c)(2)(B)(ii) of the Act and delayed the effective date of the resource-based practice expense RVU system until January 1, 1999. In addition, section 4505(b) of the BBA provided for a 4 -year transition period from charge-based practice expense RVUs to resource-based RVUs.

Further legislation affecting resourcebased practice expense RVUs was included in the Medicare, Medicaid and State Child Health Insurance Program (SCHIP) Balanced Budget Refinement Act of 1999 (BBRA) (Pub. L. 106-113) enacted on November 29, 1999. Section 212 of the BBRA amended section 1848(c)(2)(B)(ii) of the Act by directing us to establish a process under which we accept and use, to the maximum extent practicable and consistent with sound data practices, data collected or developed by entities and organizations. These data would supplement the data we normally collect in determining the
practice expense component of the physician fee schedule for payments in CY 2001 and CY 2002. (In the 1999 final rule ( 64 FR 59380), we extended, for an additional 2 years, the period during which we would accept supplementary data.)
2. Current Methodology for Computing the Practice Expense Relative Value Unit System

Effective with services furnished on or after January 1, 1999, we established a new methodology for computing resource-based practice expense RVUs that used the two significant sources of actual practice expense data we have available-the Clinical Practice Expert Panel (CPEP) data and the American Medical Association's (AMA) Socioeconomic Monitoring System (SMS) data. The methodology was based on an assumption that current aggregate specialty practice costs are a reasonable way to establish initial estimates of relative resource costs for physicians' services across specialties. The methodology allocated these aggregate specialty practice costs to specific procedures and, thus, can be seen as a "top-down" approach.

## a. Major Steps

A brief discussion of the major steps involved in the determination of the practice expense RVUs follows. (Please see the November 1, 2001 final rule ( 66 FR 55249) for a more detailed explanation of the top-down methodology.)

- Step 1-Determine the specialty specific practice expense per hour of physician direct patient care. We used the AMA's SMS survey of actual aggregate cost data by specialty to determine the practice expenses per hour for each specialty. We calculated the practice expenses per hour for the specialty by dividing the aggregate practice expenses for the specialty by the total number of hours spent in patient care activities.
- Step 2-Create a specialty specific practice expense pool of practice expense costs for treating Medicare patients. To calculate the total number of hours spent treating Medicare patients for each specialty, we used the physician time assigned to each procedure code and the Medicare utilization data. We then calculated the specialty specific practice expense pools by multiplying the specialty practice expenses per hour by the total physician hours.
- Step 3-Allocate the specialty specific practice expense pool to the specific services performed by each specialty. For each specialty, we
divided the practice expense pool into two groups based on whether direct or indirect costs were involved and used a different allocation basis for each group.
(i) Direct costs-For direct costs (which include clinical labor, medical supplies, and medical equipment), we used the procedure specific CPEP data on the staff time, supplies, and equipment as the allocation basis.
(ii) Indirect costs-To allocate the cost pools for indirect costs, including administrative labor, office expenses, and all other expenses, we used the total direct costs combined with the physician fee schedule work RVUs. We converted the work RVUs to dollars using the Medicare CF (expressed in 1995 dollars for consistency with the SMS survey years).
- Step 4-For procedures performed by more than one specialty, the final procedure code allocation was a weighted average of allocations for the specialties that perform the procedure, with the weights being the frequency with which each specialty performs the procedure on Medicare patients.

## b. Other Methodological Issues

(i) Nonphysician Work Pool

For services with physician work RVUs equal to zero (including the technical components of radiology services and other diagnostic tests), we created a separate practice expense pool using the average clinical staff time from the CPEP data and the "all physicians" practice expense per hour.

We then used the adjusted 1998 practice expense RVUs to allocate this pool to each service. We have removed services from the nonphysician work pool if the requesting specialty predominates utilization of the service. Also, for all radiology services that are assigned physician work RVUs, we used the adjusted 1998 practice expense RVUs for radiology services as an interim measure to allocate the direct practice expense cost pool for radiology specialties to the most appropriate SMS specialty.
(ii) Crosswalks for Specialties Without Practice Expense Survey Data

Since many specialties identified in our claims data did not correspond exactly to the specialties included in the SMS survey data, it was necessary to crosswalk these specialties to the most appropriate SMS specialty.

## (iii) Physical Therapy Services

Because we believe that most physical therapy services furnished in physicians' offices are performed by physical therapists, we crosswalked all
utilization for therapy services in the CPT 97000 series to the physical and occupational therapy practice expense pool.
3. Practice Expense Proposals for Calendar Year 2004

## a. Nonphysician Workpool

The nonphysician work pool is a special methodology that we used to determine practice expense RVUs for many services that do not have physician work RVUs. While the nonphysician work pool is of benefit to many of the services that were originally included, we have allowed specialties to request that their services be removed from the pool. Because the nonphysician work pool includes a variety of services performed by many different specialties, we use the "all physician" average practice expense per hour in place of a specialty-specific practice expense per hour.

As discussed in the August 15, 2003 proposed rule, we are continuing to study the alternatives that are available and any modifications to the nonphysician workpool would be published in proposed rulemaking.
Comment: Several specialty societies expressed support for the ongoing study of this complex issue and appreciate that any modifications to the nonphysician workpool would be published as proposed rulemaking for review and comment prior to implementation. A biopharmaceutical company commented that we should move forward to develop a new methodology that better recognizes actual resource consumption so that we can develop a preferable alternative.
Response: We are appreciative of the support and will continue to study this issue.

## b. Supplemental Practice Expense Survey Data

## i. Survey Criteria and Submission Dates

As required by the BBRA, we established criteria to evaluate data collected by organizations to supplement the data normally used in determining the practice expense component of the physician fee schedule. We have required supplementary survey data to be submitted by August 1 to be considered for computing practice expense RVUs for the following year. We proposed to change the required submission date to March 1, which would allow us to publish our decisions regarding survey data in the proposed rule and provide an opportunity for public comment on survey results. We also proposed to extend for an additional 2 years the
period for accepting survey data that meets the criteria set forth in the November 2000 final rule (as modified in the December 31, 2002 final rule). The deadline for submission of the supplemental data to be considered in CY 2005 and CY 2006 would be March 1, 2004 and March 1, 2005, respectively.

Comment: Specialty societies expressed appreciation for our proposal to extend the deadline for submission of surveys. Commenters also approved of our proposal to change the due date for submission of supplemental practice expense survey data to March 1, so that the implications of the use of the survey data could be discussed in the proposed rule.
Response: We will implement the change in the submission dates for supplementary surveys as proposed. The deadline for submission of the supplemental data to be considered in CY 2005 and CY 2006 would be March 1, 2004 and March 1, 2005, respectively. We will revise $\S 414.22$ (b)(6)(ii) to reflect this change.

## ii. Submission of Supplemental Surveys

The College of American Pathologists (CAP) submitted supplemental survey data for independent laboratories for consideration for CY 2004. Our contractor, The Lewin Group, evaluated the data and has recommended acceptance.
Comment: Based on our proposal to revise the date for submission of supplemental survey data, CAP requested that we delay incorporation of this survey data until next year's proposed rule. CAP also expressed an interest in being able to evaluate the combined effects of the use of the new survey data along with the technical change for pathology services before the changes are implemented. Therefore, CAP requested that we also extend the moratorium on calculating the technical component as the difference between the global and professional component practice expense RVUs by one additional year, as discussed in the August 15, 2003 proposed rule. This request for a delay in incorporating the new survey data, as well as extending the moratorium was supported by the AMA and several specialty societies.

Response: We agree with the comments that suggest extending by one year the moratorium on calculating the technical component practice expense RVU as the difference between the global and professional component RVUs for pathology services. We also agree with comments suggesting that we not incorporate the CAP survey into the practice expense methodology until next year. We will evaluate the CAP
survey in next year's proposed rule at the same time we show the effect of the above described change for pathology services.

## c. Practice Expense for a professional component service

While we typically assign all staff, equipment and supply costs for services with professional and technical components (PC and TC) to the technical portion of the service, in the proposed rule we discussed limited instances where it is appropriate to assign direct inputs to a PC service. We proposed to modify the practice expense methodology to allow direct inputs to be added to PC services when these inputs are clearly associated with the professional service, including when the PEAC makes such recommendations. Specifically we proposed to add the PEAC recommended staff times to the PC of the following cardiac services: CPT codes 93508, 93510, 93511, 93514, 93524, 93526, 93527, 93528, 93529, 93530, 93531, 93532, 93533 and 93624.

Comment: The RUC, the AMA, the American College of Physicians and societies representing cardiologists, cardiac rhythm specialists, interventional radiologists, nuclear medicine, chest physicians, radiation oncologists, radiologists,
endocrinologists and dermatologists expressed support for this change in methodology. Commenters were also in agreement with the specific CPT codes mentioned in the proposed rule, but requested that direct inputs alsn be added to the PC of CPT codes 93619 , 93620 and 93642 , which were reviewed at the January PEAC meeting. The RUC comment indicated that additional codes might be identified at future PEAC/RUC meetings.

Response: We will finalize the proposed assignment of direct practice expense to the proposed 14 cardiac services and will add the PEAC recommended inputs to the PC of CPT codes 93619, 93620 and 93642, as requested by the commenters.

## d. Utilization Data

We use Medicare utilization data in the development of specialty-specific practice expense RVUs that are then weight averaged to determine a single practice expense RVU per code. Prior to 2003, we used the most recent complete year of utilization data to determine the practice expense RVUs. In the December 31, 2002 final rule ( 67 FR 79982), we adopted a policy of using the 1997 through 2000 Medicare utilization in the practice expense methodology. For new codes created since 2000, there are no Medicare utilization data. In the August

15, 2003 rule we proposed to follow a similar practice to the one described above and use specialty-specific Medicare utilization data for codes created after 2000 at the first opportunity they become available to us. Since we will not have any utilization data at the time we first establish practice expense RVUs for a new code, we proposed that we continue, whenever possible, to make an assumption about the specialty that will likely provide the service or to use the "all physician" average when we do not have sufficient information to assign any given specialty.

Comment: The specialty societies representing internal inedicine, rheumatology and pulmonary medicine supported our proposal to use 1997 through 2000 Medicare utilization data for all codes that were in existence at that time and to use specialty-specific Medicare utilization data for codes created after 2000 when utilization data first become available, using the "all physician" average when we do not have sufficient information to assign a given specialty. These commenters, as well as several others, suggested that the RUC and the specialty societies could provide information on the specialties that will likely perform a new service to minimize the potential changes to the practice expense RVUs that will occur when we substitute actual for estimated utilization. However, a specialty society representing gastroenterology expressed concern that we are moving forward with plans to shift the basis of our methodology for compiling data to a five-year basis. The commenter urged us to not make changes until extensive impact comparisons are conducted that can be evaluated by physician community.
Response: We will implement our proposal to use specialty-specific Medicare utilization data for codes created after 2000 at the first opportunity they become available to us. We will also continue, whenever possible, to make an assumption about the specialty that will likely provide the service or to use the "all physician" average when we do not have sufficient information to assign any given specialty. Information about the specialty we assign to a code that has no utilization data can be found in the utilization data files we make available on the CMS web site following final rule publication. With respect to the comment about shifting to a 5 -year basis of utilization data for the practice expense methodology, we are making no change in policy for codes that existed in the 1997 to 2000 period. We are using only the later year utilization data for
codes that have been created since that time. Any information from the RUC that could assist us in this process would be welcomed.

Comment: A specialty society representing colon and rectal surgeons agreed with our general utilization methodology, but disagreed that averaged 1997-2000 utilization data should be used for all codes that were not in existence for the entire period. The commenter argued that the frequency for these codes might be artificially low because the coding was new and that this may impact the relativity between new and old codes in the same family with similar inputs.
The society suggested that any code that did not exist during the entire 19972000 period default to 2002 or most recent data.

Response: As we have explained, the Medicare utilization is important to the practice expense methodology because it determines which specialty scaling factors will be applied to the estimated practice expense input values in determining the practice expense RVUs for each service. The proportion of the volume billed by each specialty is more important to determining the practice expense RVU for a given service than the total volume. If the code is low in volume but the proportion of the code's volume billed by each specialty is generally consistent over time, there will be little or no difference in a code's practice expense RVUs, whether we use its initial year of utilization or a later year to determine its value.

Comment: Commenters representing dermatology as well as a pharmaceutical company expressed concern regarding the decrease in payment for photodynamic therapy, CPT code 95657. The commenters noted our discussion in the proposed rule indicating that this reduction in the practice expense RVUs is occurring because of updates to the Medicare utilization data used in the practice expense methodology. As a result of the updated utilization data, the practice expense methodology now uses the dermatology scaling factor (0.54) for supplies instead of the all physician average (1.29), and this change leads to the reduction in payment for the code. The commenters yrged us to reconsider the proposal and at least to reinstate physicians' ability to bill separately in 2004 for the light-activating agent under the appropriate J code and also to remove the drug from the practice expense portion of the procedure.
Response: One of the functions of the utilization data in our practice expense methodology is to assign all procedures to the specialty-specific cost pools of the
specialty or specialties performing them. Each cost pool has its own scaling factor. This scaling factor is used to scale the aggregate CPEP procedurelevel costs for a specialty to the aggregate costs for the same specialty as determined by the SMS practice expense data. As we indicated in the proposed rule, we do not have utilization data upon which to determine the practice expense RVUs for a new code at the time it is created. As a default, we have assigned many new codes the "all physician" scaling factor until we have the data to move these codes into the appropriate specialty cost pools. Because it allows us to apply the appropriate specialty scaling factor, the use of the updated utilization data in the practice expense methodology can lead to increases or decreases in the value of a code, even though its practice expenses remain unchanged. In this case, the supplies scaling factor for dermatology is lower than that for "all physicians," leading to a decrease in practice expense RVUs when the dermatology scaling factor was applied to the CPEP data of the photodynamic therapy service.

We believe the initial practice RVUs for photodynamic therapy were too high, because the later information on Medicare utilization indicates that we should have used the dermatology scaling factor which would have produced a lower practice expense value. As we indicate above, we are working to minimize changes that will occur in the practice expense RVUs for a service by making an initial assumption about which specialty will likely bill us for a service. However, we believe our policy for new codes should be consistent with how we determine the practice expense RVUs for existing codes, even if updates to the Medicare utilization data lead to increases or decreases in the practice expense RVUs.
Though we believe that it is appropriate to use the updated utilization that results in a reduction in payment for CPT code 96567, we will pay separately for the light activating agent beginning January 1, 2004. However, we are also further considering whether Medicare should pay separately for certain topical drugs in certain circumstances. Any change in policy would be discussed in future rulemaking.

Comment: Specialty societies representing radiation oncology, as well as individual commenters, expressed concern about the decrease in payment for the intensity modulated radiation therapy (IMRT) treatment service, CPT code 77418. The commenters stated that this was due to a "quirk" in the
utilization data relating to new codes and requested that this code be priced by the non-physician work pool methodology.

Response: We will calculate the practice expense RVUs for the IMRT treatment service, CPT code 77418, using the nonphysician workpool methodology. This will be consistent with the way we currently calculate the practice expense for all other radiation therapy services with no physician work RVUs.

Comment: The specialty society representing radiation oncology also noted that there was a reduction in the practice expense RVUs for the intensity modulated radiation therapy planning procedure, CPT code 77301. A remote cardiac monitoring service questioned why the use of new utilization data could decrease the value of a code such as HCPCS code G0249 for the provision of test material and equipment for home INR monitoring.

Response: Both CPT code 77301 and HCPCS code G0249 were new codes for which we did not have utilization data and which were initially assigned the "all physician" scaling factor. As described above, now that we have the utilization data, the services have been placed in the specialty-specific cost pools based on how the service is billed to Medicare, which have lower scaling factors than the "all physician." This shift has led to the reduced practice expense RVUs for CPT code 77301. If we had placed this code in the radiation oncology cost pool to begin with, it would have had the reduced practice expense payments for the past two years as well. HCPCS code G0249 will actually have increased practice expense RVUs in 2004 due to the effect of the repricing of supplies.

Comment: We received one comment that questioned how updated utilization data could have such a huge and direct effect on specific codes. The commenter requested clarification from us on the workings of the utilization data within the practice expense methodology so that the public will understand how utilization data will affect new technologies in the future.

Response: As explained above, one of the functions of the utilization data in our practice expense methodology is to assign all procedures to the specialtyspecific cost pools of the specialty or specialties performing them. If we do not know the specialty, we have used "all physician" scaling factors. The "all physician" scaling factors could be higher or lower than the specialtyspecific scaling factor and produce different RVUs for the code. For instance, CPT code 77301-26 is a PC
service that has no direct cost inputs. Thus, its practice expense RVUs are affected only by the indirect cost scaling factor. To develop the 2003 practice expense RVUs for this code, we adjusted indirect costs allocated to this code by the "all physician" indirect cost scaling factor of 0.57 . However, for 2004, we have Medicare utilization data from 2002 for this procedure code. Radiation oncologists and radiologists respectively billed Medicare for 67 percent and 30 percent of the total volume of services provided to Medicare patients in 2002. The weighted average scaling factor for all the specialties that bill Medicare for this procedure code is 0.48 . Since we are adjusting indirect costs by 0.48 instead of 0.57 , the final practice expense value is lower.

## e. Practice Expense Advisory Committee (PEAC)

The PEAC, a subcommittee of the RUC, has, since 1999, been providing us with recommendations for refining the direct practice expense inputs (clinical staff, supplies, and equipment) for existing CPT codes.

## 1. Recommendations on CPEP Inputs for 2003

In the December 31, 2002 proposed rule, we responded to the PEAC recommendations for the refinement to the CPEP direct practice expense inputs for over 1200 codes, including refinements to codes from almost every major specialty. In addition, the recommendations included standardized times for office-based clinical staff for services provided during a patient's hospitalization and for discharge day management services, as well as pre-service clinical staff times for 323 neurosurgery procedures. We reviewed and accepted all of the recommendations. We received the following comments on these revisions.
Coinment: We received comments from specialty societies representing dermatology, dermatolgic surgery and Mohs surgery expressing concern regarding the decrease in practice expense RVUs for skin biopsy procedures, CPT codes 11100 and 11101 and the destruction of benign or premalignant lesion services, CPT codes 17000 and 17003. The commenters questioned whether the reductions reflect errors in the validated practice expense inputs used in the practice expense calculations.
Response: We have checked the practice expense inputs and found that these match the clinical staff, supply and equipment inputs as recommended by the RUC. The reduction in practice expense RVUs was caused by the
refinement of these inputs, which, in turn, was based on the presentation made to the PEAC by the dermatology specialty society. We will, therefore, not make any further revisions to the practice expense inputs for these services in this final rule.

## 2. Recommendations on CPEP Inputs for 2004

In the August 15, 2003 proposed rule we included the PEAC recommendations from meetings held in September of 2002 and January 2003 as well as recommendations on the refinements to the clinical staff time for all 90-day global services. In addition, the PEAC convened a workgroup to make recommendations on the refinement of all the 116 remaining evaluation and management codes. We reviewed the submitted PEAC recommendations and proposed to accept them.

Comment: 'The American Osteopathic Association expressed appreciation that we supported the recommended changes for the osteopathic manipulative treatment codes and commended us for accepting the PEAC recommendations for the clinical staff times for 90-day global codes. The American College of Obstetricians and Gynecologists stated that our acceptance of the PEAC recommendations is an example of exceptional cooperation and collaboration in meeting the healthcare needs of Americans served by the Medicare program. The American Academy of Dermatology applauded our acceptance of the year's PEAC recommendations. The AMA and the American College of Radiology stated that they appreciate our recognition of the significant resources specialty societies have devoted to the practice expense refinement process and is thankful that our practice expense staff avail themselves of specialty society input. The American College of Surgeons also supported our acceptance of the PEAC recommendations, including the decision to permit exceptions to the standard pre-service times for some surgical procedures. The College other specialty societies also expressed appreciation for our commitment to the refinement process.

Response: We, in turn, are appreciative of these positive comments. We believe that it is only because of the cooperative working relationship between the specialty societies, the AMA and CMS that there has been such a high level of success in tackling practice expense refinement.

Comment: The American College of Physicians as well as other specialty societies representing surgeons,
otolaryngologists, podiatrists, geriatric psychiatrists, obstetricians and gynecologists, cataract and refractive surgeons, neurosurgeons, dermatologists, rheumatologists, radiologists and radiation oncologists supported our inclusion of the PEAC recommendations in the proposed rule because this would better enable specialty societies to address their impact and make comments prior to publication of the final rule.

However, specialty societies representing chest physicians and thoracic physicians disagreed with our decision to change our previous practice of including the PEAC
recommendations in the final, rather than the proposed rule, because this meant that the recommendations from the March PEAC meeting were not included for this year. The society argued that changing this long-standing policy without announcing it in the Federal Register is inappropriate. The comment also contended that the specialty societies agreed to the inputs at the PEAC meeting; therefore, negative comments would not be forthcoming.

Response: We discussed this issue at the January PEAC meeting and indicated that we were considering including the PEAC recommendations in the proposed rule and that the March recommendations would most likely not be included. We made this decision because, now that the PEAC is refining such a large number of codes, the revisions to the inputs were not only changing the practice expense RVUs of the refined codes, but also the values of services that were not refined. Therefore, we believed it was prudent that revisions be subject to comment before the revisions were implemented.

Comment: The specialty society representing podiatry identified some discrepancies between the PEAC recommendations and the inputs in the CPEP database for CPT codes 10060 , 11000, 11055, 11056, 11057 and 11752 and requested that these be corrected.

Response: We have made the
corrections as requested.
Comment: The American Society of Transplant Surgeons (ASTS) commented that it is not appropriate to apply either the PEAC-approved standard clinical staff times or RN/LPN/ MTA staff blend for 90 -day global procedures to the transplant recipient or living donor services. ASTS stated that it had been unaware that the PEAC was applying the standard to all 90-day services unless a case was made to the PEAC that the times should be increased. ASTS argued that there are substantial atypical staff times required for transplant recipients due, in large
part, to the intensive education required for the transplant patient. The commenter noted that the three new CPT codes for living donor hepatectomies, CPT codes 47140-47142, were given increased pre-service clinical staff time by the RUC and have an RN as the staff type. ASTS requested that the current clinical staff times be retained and that an RN be assigned rather than the blended staff type to the following transplant services: CPT codes 32851, 32852, 32853, 32854, 33935, $33945,47135,47136,48554,48556$, 50320, 50360, 50365, 50380, 50547.
Response: It does seem reasonable that at least some of these services would have increased pre-times as do the living donor hepatectomies recently reviewed by the RUC. Therefore, we will restore the original CPEP clinical staff pre-times and use the RN staff type for the above services on an interim basis for the coming year. We anticipate that the society will bring all of these codes to the PEAC for review for either the January or March meeting to ensure that the times for the codes receive the same scrutiny as did the new transplant codes. It should be noted that a few of the codes have lower original CPEP pretime than the PEAC standard of 60 minutes; for those codes we did not change the PEAC standard time. We also are not revising the post-procedure clinical staff times for these codes, because the current times are in line with the post-service times assigned to the new living donor hepatectomy codes recently reviewed by the RUC.

Comment: A commenter noted that high dose rate (HDR) brachytherapy CPT codes 77781, 77782, 77783 and 77784 were not listed in Addendum C of the proposed rule. Since these codes were approved by the PEAC and forwarded to CMS, ACR questioned why these codes were not listed.
Response: The CPEP data base files had been revised to reflect the PEAC recommendations for these codes. It was an oversight that they were not included in Addendum C.

Comment: The American College of Surgeons listed several possible errors in the CPEP database:
CPT code 11450-missing 1 minute of staff time

CPT codes 10080, 10081, 11770, 12032, 12035, 12046, 12047, 21550, 21920, 37609, 38300, 45300-45327, and 46600-46615-missing correct number of gloves.

CPT codes 45900, 45905, 45910, 47382, 49320, 49321, 49322, 49422, 49429-supplies listed incorrectlyhave nonfacility inputs when PEAC recommended none in office setting.

Response: We thank the College for checking the database so carefully. We have made the suggested corrections, with the following notes: For CPT codes 10080, 10081 and 11770, the PEAC recommendation listed 5 gloves, not 6 . For CPT codes $45300-45327$ and 4660046615, we adjusted the quantity of unsterile gloves to reflect that there are 2 pair in the minimum visit supply package; in addition, CPT codes 45321 and 45327 were not priced in the nonfacility setting.

Comment: The American Society of Colon and Rectal Surgeons noted a few errors in the CPEP supply database. The supply inputs had not been changed to match the accepted new
recommendations for CPT codes 45900 , 45905, 45910, 47382, 49320, 49321, 49322, 49422 and 49429.

Response: We have made the corrections to the supply database and thank the specialty for bringing this to our attention.

Comment: The American Speech-Language-Hearing Association (ASHA) questioned the proposed 28 percent reduction in the practice expense for CPT code 92507, Treatment of speech, language, voice, communication, auditory processing and/or aural rehabilitation status. The reduction is attributable to a decrease in clinical staff time. ASHA contended that the PEAC recommendation was based on a vignette for a child receiving such therapy, but that the time involved with a typical adult patient receiving this treatment is much longer. ASHA stated that a more reasonable time for clinical staff for this service is 69 minutes compared to the proposed 46 minutes.
Response: We understand that the scenario for performing this service for a child might be very different than for an adult because an adult can participate in a more protracted therapy session. Because it is not clear to us at this time what would be the typical scenario, we will, on an interim basis, average the clinical staff time needed during a speech therapy session for a child with that suggested by ASHA for an adult. We will, therefore, assign 58 minutes of clinical staff time to this service, with the expectation that ASHA will present CPT code 92507 for further discussion and review at the PEAC.

Comment: We received several
comments in response to our acceptance of PEAC recommendations for evaluation and management ( $\mathrm{E} / \mathrm{M}$ ) codes that reduced payment rates for six nursing home services (CPT codes 99301-99303 and 99311-99313) and two home visit codes (CPT codes 99348 and 99350). This payment reduction is primarily due to a decrease in the
clinical staff time assigned to these services.
The American Academy of Family Physicians (AAFP) supported our acceptance of the PEAC recommendations for the $\mathrm{E} / \mathrm{M}$ nursing facility services. The commenter noted that current practice expenses are higher for services provided in the non-SNF nursing facility than those provided in the SNF facility. The commenter contended that the direct practice expense inputs should not vary based on the type of nursing facility setting and supported the elimination of the current differential in the practice expense RVUs between the SNF and non-SNF facility setting.

However, the American Medical Directors Association (AMDA) representing long term care physicians, the American Geriatrics Society (AGS) and a health care management company, Health Essentials, all disagreed with our decision to accept the E/M nursing facility PEAC recommendations and asked us to reconsider our decision to implement them in 2004. The request to delay implementation was echoed by the American Academy of Home Care Physicians and AGS relating to the two $\mathrm{E} / \mathrm{M}$ home visit codes.
The home care physicians argued that the PEAC recommendations for the two home visit codes are flawed because these codes have not yet been surveyed by the specialty performing this service. The commenters also contended that their views were not represented when the PEAC considered the refinements of the E/M home visit codes. Similarly, the AMDA noted that the PEAC workgroup responsible for formulating the recommendations for the nursing facility codes did not include long term care physicians. The AMA also commented on this issue and expressed concern that the PEAC
recommendations did not include the views of all the relevant medical specialties and requested that we delay implementation of these E/M code recommendations to allow impacted medical specialties an opportunity to present new information to the PEAC.

In addition, the AMDA expressed concern regarding the current work RVUs for nursing home visit services.

Response: At the time the PEAC recommendations were forwarded to CMS, we agreed with the views expressed by the AFPP as to the reasonableness of the practice expense recommendations for the $\mathrm{E} / \mathrm{M}$ codes for the nursing facility and home visits. However, we are also of the opinion that the relevant medical specialties should be given the opportunity to have their
views considered by the PEAC.
Consequently, we will not go forward with these $\mathrm{E} / \mathrm{M}$ recommendations in 2004. This will allow time for the PEAC to reconsider the eight E/M codes with input from representatives from the nursing home and home visit specialties. We will use current CPEP practice expense inputs to price these codes for 2004.

With regard to the concern expressed about the work RVUs for the nursing home visits, in the 2004 final rule we will solicit recommendations on codes to be reviewed during the next 5-year review of work and we suggest that the society recommend review of these codes.

Comment: A specialty society representing gastroenterologists commented that the increased clinical staff pre-time added to certain colorectal procedures needs to be applied equally to gastroenterologists who provide those services.

Response: We have a single payment for each procedure regardless of the specialty performing the service. Therefore, gastroenterologists will be paid the same as colorectal surgeons when performing those services for which we allowed increased pre-service clinical staff time.

Comment: The American College of Radiology submitted several corrections to the CPEP database for those instances where the database differed from the PEAC recommendations that we accepted. The College stated its appreciation for the opportunity to review the practice expense data file for completeness and accuracy and applauded our efforts to ensure that the database captures correct and complete practice expense data.

Response: We thank the College for the time and effort expended in checking this detailed data. We have made revisions to 19 codes: We changed the quantity of sodium chloride injection for CPT codes 78306, 78315, 78460, 78461, 78464, and 78465; adjusted the quantity of films for CPT code 76812; added missing supplies to CPT codes 77408, 77409, 77411, 77412, 77414, 77416, 76830 and 77290; removed equipment that had been deleted from CPT codes 78478 and 78480; and corrected a typographical error in the pre-service clinical staff time for CPT codes 73218 and 75555.

## g. Repricing of Clinical Practice Expense Inputs-Supplies

We use the practice expense inputs (the clinical staff, supplies, and equipment assigned to each procedure) to allocate the specialty-specific practice expense cost pools to the procedures
performed by each specialty. The costs of the original inputs assigned by the Clinical Practice Expert Panels (CPEP) were determined by our contractor, Abt Associates, based primarily on 1994 and 1995 pricing data from supply catalogs. In addition, for many items on the equipment and supply list, the associated costs were based on the recommendations of a CPEP panel member, rather than on actual catalog prices. Subsequent to the CPEP panels, equipment and supply items have also been added to the CPEP data, with the costs of the inputs provided by the relevant specialty society.
We contracted with a consultant to assist in obtaining current pricing information and also to recommend revisions to improve the uniformity and consistency of the CPEP supply database. On the basis of these recommendations, in the August 15, 2003 proposed rule, we proposed updates to the cost information for supplies in the database. In addition, we proposed the following database revisions:
-Assignment of supply categories.
We proposed that supplies be assigned to one of 14 categories.

## -Consolidation/standardization of item

 descriptions.We proposed combining items which appeared to be duplicative and modifiying descriptions using a key first word when possible for easier identification of items. For example, "mayo stand cover" and "drape, sterile Mayo" have both been changed to "drape, sterile, for Mayo stand."

## -Standardization of unit descriptions.

The current CPEP database contains over 72 unit descriptions associated with supplies (for example, item, gram, and cup). To provide consistency and ensure that inputs in the database accurately reflect the quantity of an item used, we proposed to standardize the unit description of items. We also proposed to specifically identify items intended for single use through the use of "uou" (unit of use) following the unit. These changes were reflected in Addendum D of the proposed rule.

There were also items that had not been identified or for which pricing information was not found that were included in Table 1 in the August 15 proposed rule. Items that we proposed to delete from the database were also identified in this table. We requested that commenters, particularly the relevant specialty groups, provide us with the needed pricing information with appropriate documentation. We also stated if we did not obtain verified
pricing information for an item, it would be eliminated from the database.

Comment: The RUC expressed appreciation for the enormity of the repricing project and stated that the proposed approach was well organized and comprehensive. The American Association of Orthopedic Surgeons also agreed that the assignment of supply categories would be helpful in future refinement activities. The American College of Physicians, the American College of Surgeons, and the American Urological Association expressed support for our proposal to create a numbering system and to standardize the descriptions of supply items to increase accuracy of use. The American Academy of Dermatology also supported this standardization of proposed "unit of use" as long as its application does not assume that "one size fits all" as some supplies may go from milliliter to liter in usage. The American Society of Cataract and Refractive Surgery and the Outpatient Ophthalmic Surgery Society thanked us for the repricing proposal because this will ensure that we are using the more accurate and up-to-date supply costs, thus reimbursing physicians more fairly. The American College of Radiology recognized the need to update supply and pricing information in the practice expense database and commended us for committing to this extensive project. The American College of Surgeons also agreed that the update of prices for supplies will improve the accuracy of the direct practice expense data. The Society of Nuclear Medicine commended us for committing to this extensive project. The American Urological Association also appreciated this effort and acknowledged it as a huge undertaking.

Response: We appreciate the positive feedback and would like to thank all the staff of the specialty societies who worked with our contractor to obtain the most representative prices for all of the supplies in the CPEP input database.
Comment: A specialty society representing podiatrists agreed with removal of hallux implant and the broach kit from the list of supplies to be included under practice expense as both are separately billable and the broach kit is also reusable. The commenter did not agree with removal of the sterile ankle tourniquet since this is packaged as a single use item. The comment included pricing information at $\$ 42.87$ each (with documentation) for this supply.
Response: We will delete the hallux implant and the broach kit from the CPEP supply data. We will retain the ankle tourniquet using the pricing information supplied by the society.

Coinment: Several commenters expressed concern about the reduction in nonfacility practice expense for the interstitial laser coagulation of the prostate procedure, CPT code 52647. A manufacturer of endo-surgery equipment stated that the main reason for this decrease was the decrease in the price assigned to the laser fiber used in this procedure. We had proposed a price of $\$ 290$ for this item, but the commenter submitted documentation that indicated that the laser fiber should be priced at $\$ 850$ for CPT code 52647. In addition, the commenter noted that we had proposed in Table 1 to delete the laser fiber because it was reusable; however, this was incorrect as the laser fiber used in this procedure could not be reused and should not be deleted from our supply list.

Response: When the laser fiber was repriced, we believed the item included in the supply list for CPT code 52647 was the same as a "laser tip," which was priced at $\$ 290$. We thank the commenters for clarifying the issue. We agree that the laser fiber used in this procedure is a disposable supply that we will retain in our CPEP supply data at the $\$ 850$ price documented by the commenter.

Comment: Commenters representing cardiac arrhythmia specialists and a remote cardiac monitoring system recommend that we not delete the transtelephonic monitor as a supply even though we are correct that the patient and physician re-use this supply during the course of the pacemaker's life. The specialty society commenter requested that the expense of this supply, which costs $\$ 190$, should be spread out over approximately 5 years.
Response: The transtelephonic monitor as described would be considered a piece of equipment, rather than a reusable supply. However, unless the equipment costs over $\$ 500$, we consider it as an indirect cost and it is not included as a direct input. Therefore, we will delete the item from our list of direct practice expense inputs as proposed.

Comment: A specialty society representing chest physicians agreed that the oximetry sensory probe, CPAP nasal pillow and flow sensor are reusable and should be deleted from the list of CPEP supply inputs. The society also agreed that albuterol is separately billable and should also be deleted. Another commenter, representing sleep medicine, agreed that the nasal pillow should be deleted. However, the commenter representing chest physicians and a commenter representing thoracic physicians disagreed with the proposal to delete
methacholine chloride because there is no " J " code to use when billing, thus forcing physicians to used an unlisted service code. The commenters also contended that the aerochamber should not be deleted because, although reusable, it has a life of only about six months and should be costed out accordingly. In addition, the commenters disagreed that the inhaler is separately billable because a multi-use canister is utilized for this test; therefore, the amount used from the canister for each test should be included in the practice expense.

Response: We will delete the oximetry sensory probe, CPAP nasal pillow and flow sensor and albuterol from the list of CPEP supply inputs. We will also delete the aerochamber, because an item that is reusable over a six-month period cannot be classified as a disposable supply. The commenter is correct that there is not a HCPCS " J " code for methacholine chloride. Therefore, we will keep this in the supply database as requested so that physicians can avoid the burden of submitting paper claims. We also will keep the inhalant in the database using the quantity of 1 gram per procedure at $\$ 0.788$.
Comment: Specialty societies representing radiologists and interventional radiologists disagreed with the classification of the Arrow mechanical thrombectomy device as reusable. The commenter contended that this device is single-use because the difficulty in cleaning the intra-luminary surface areas could lead to a risk of contamination if the device is reused. Moreover, reprocessing the thrombectomy device may result in fatigue-related failure.

The societies also disagreed with our contention that a Seldinger needle is reusable; rather a Seldinger needle is single-use and should not be removed as a supply item. It is the commenter's understanding that hospitals are not in the practice of resterilizing Seldinger needles.

While generally favoring reorganization of CMS' supply listing for ease of use and not directly opposed to supply categories, one of the commenters was concerned over the potential loss of granularity of cost data associated with the use of supply categories and would oppose the averaging of costs for the supply categories unless it is appropriate to average from a cost and clinical standpoint. A similar comment was sent by the radiology specialty society.

Response: We will retain the thrombectomy device and the Seldinger needle as disposable supplies in our CPEP input database. With regard to the
classification of supplies, the commenter misunderstands the purpose of assigning a classification to each supply. This will not be used for pricing purposes in any way. Rather, the classifications can be useful as a way to sort the long list of supplies in the database to make it easier to find a particular item.

Comment: The contractor responsible for helping us with the repricing of supplies informed us that a supply assigned to the endometrial ablation procedure, CPT code 58353 , was listed as a catheter tray when it should be described as a thermal ablation balloon catheter at a price of $\$ 727$. In addition, our contractor supplied us with prices for several new supply and equipment items mainly for otolaryngology, that were not priced in the proposed rule but were included in the PEAC
recommendations.
Response: We will make the appropriate changes in the CPEP supply and equipment databases.

Comment: Commenters representing pediatricians, pulmonary physicians and family physicians pointed out that the new price we had assigned to the safety syringe and needle did not cover the actual cost of purchasing the entire needle stick device that is required by the Occupational Safety and Health Administration.

Response: Our repricing contractor researched this issue for us and agreed that the price we were proposing was too low for the appropriate item. Based on documentation for a 10 ml Syringe with SafetyGlide Needle, the safety syringe and needle will be priced at $\$ .435$ each, instead of the $\$ .28$ that was proposed.

Comment: A surgical society
commenter pointed out that we listed an achalasia balloon in Table 1 in the proposed rule and indicated that it was a supply used with CPT codes 45905 and 45910. The commenter stated that both of these codes were refined in January and that they were not priced in the office setting; therefore the balloon should no longer be listed as a supply used with these services.

Response: Our CPEP database currently has these codes priced only in the facility setting. However, these services had previously been priced in the office and Table 1 was apparently developed before the last of the PEAC recommendations were entered. The achalasia balloon no longer appears on the CPEP supply database.

Comment: We received comments from the American College of Physicians and another medical society representing allergy and immunology with concerns about reductions in
reimbursement for the five venom immunology CPT Codes (95145-95149). The commenters believe the reductions are due, in part, to the use of incorrect supply costs for venom extracts that we priced at $\$ 5.18$ per ml . The commenters provided documentation of current prices of five different venoms from two of the largest manufacturers of venom extracts. They proposed a priceaveraging methodology utilizing the small and large quantities of venoms that are available from the two suppliers. A price of $\$ 12.22$ per milliliter of venom antigen results from using this methodology, and the commenters suggest that this price be used in valuing four of the five CPT Codes for venom immunology, with the exception of CPT Code 95147. When a patient requires three stinging insect venoms, as for CPT 95147, the commenters believe the 3 -Vespid mix is typically used. Again, the commenters suggested the same price-averaging method noted above using cost information from the two vendors, which results in a price of $\$ 23.49$ per ml . This 3 -vespid mix price could also be used to value CPT Codes 95148 (four venoms) and 96149 (five venoms) with the single venom, priced at $\$ 12.22$, added once to CPT code 97148 and twice to CPT Code 97149.

Response: We were pleased to receive the comments, as well as the requested documentation, on the price for various venoin extracts, because the venom pricing information was not included in the PEAC recommendations forwarded after the September 2002 meeting for these CPT Codes. This lack of data necessitated the use of a generic stinging insect venom price of $\$ 5.18$ per ml . We accept the pricing information supplied by these specialty societies, although we do not agree with their proposed averaging of prices from both the small ( 5 ml and 6 ml ) and larger ( 10 ml and 12 ml ) quantities of venoms. We believe it is more appropriate to average the venom prices using the larger $(10 \mathrm{ml}$ and 12 ml ) quantities because of the volume that is used in an accepted venom immunotherapy program, which consists of a build up period of about four months followed by monthly maintenance therapy. The following prices result from this approach: $\$ 10.70$ per ml of venom and $\$ 21.26$ for the 3Vespid Mix. Venom pricing for the five CPT codes would be as follows: CPT Code 95145 (one venom) at $\$ 10.70$, CPT Code 95146 (two venoms) at $\$ 21.40$, 95147 (three venoms using 3 -vespid mix), would be $\$ 21.26$; CPT Code 97148 (four venoms), $\$ 21.26+\$ 10.70=$ $\$ 31.96$; and the venom antigen price for

CPT Code 97149 (five venoms) would be $\$ 42.66$ ( $\$ 21.26+\$ 10.70+\$ 10.70)$.

Comment: JCAAI also supplied pricing information for the multi-tine device that was requested in Table 1 of our proposed rule. As was suggested above, the commenters again proposed we average costs for high and low volume purchases, excluding bulk pricing, to obtain the price for each test.
Response: We appreciate the pricing information forwarded by JCAAI and selected a purchase quantity that is in the middle of the suggested range. For percutaneous allergy testing, CPT code 95004. This purchase quantity represents testing 200 typical patients, each receiving 40 tests. We have added this Multi-tine per test price, $\$ 0.233$,to the CPEP database for CPT codes 95004 and 95010.

Comment: The American Speech-Language-Hearing Association (ASHA) provided pricing information for the following items accompanied by the requested documentation: Aphasia assessment treatment forms- $\$ 2.84$ (for a diagnostic aphasia examination form and aphasia diagnostic profile), communication books/treatinent notebook-\$1.50 and eartip insert$\$ 0.65$ each or $\$ 0.39$ each (two sources). The American Academy of Otolaryngology-Head and Neck Surgery (AAO-HNS) submitted a price for the eartip insert of $\$ 0.23$ each and suggested that the communication books/treatment notebook be deleted. The (AAO-HNS) also submitted a price for cottonoids at $\$ 0.875$ each and for the phenol applicator kit at $\$ 15.95$ each.

Response: We will use the submitted price for the aphasia forms and will price the eartip insert at $\$ 0.423$, which is the average of the three prices submitted. The notebook, which is assigned to the speech-language therapy code, would be used over a course of treatment, and is not a disposable supply that is used or priced for a single service. Therefore, we will delete this item from our CPEP supply data. For the phenol applicator kit, we will use the price of $\$ 15.152$ per kit that represents an average price for a 6 -kit and a 24 -kit quantity purchase. Because these kits contain the phenol that is used in the procedures, phenol has been deleted as a separate supply from the 11 CPT codes that are assigned the kit. AAO-HNS used a 10 -pack quantity to assign a price to each cottonoid, but we are using a 200-pack quantity that reflects the high usage of this item. Therefore, we are using $\$ 0.773$ as the price for each cottonoid.

Comment: Specialty societies representing radiation oncology and radiology disagreed that the fiducial screws used with the intensity modulated radiation therapy procedure should be deleted from the CPEP input supply list. The society argued that the screws are typically used for this procedure and that they are not separately billable.

Response: We will retain the fiducial screws in the list of supplies assigned to the intensity modulated radiation therapy procedure.

Comment: The American Society of Colon and Rectal Surgeons offered description changes for two services, CPT codes 46917 and 46924. The society recommended that the descriptor for the laser tip for both codes be changed to "laser tip, bare (single use)" at $\$ 150$. The commenter also requested that an ablation laser generator at $\$ 59,890$ be added to both codes and the existing laser, diode laser, and laser generator be deleted.

Response: A note from our contractor who is working on our repricing effort verified the above changes and we have revised our supply and equipment databases to reflect them.

Comment: The American Association of Orthopaedic Surgeons agreed with the proposed supply deletions listed in Table 1 of the proposed rule that are used in orthopaedic surgery. In addition, the association agreed with the concept of standardization of unit descriptions. However, the comment contends that the term "unit of use (uou)" is unclear and that we should consider alternative terms and abbreviations that would be more intuitive.

Response: The supply items in Table 1 that were listed for orthopaedic surgery are broach kit, hallux implant, sterile hand table drape, sterile cuff tourniquet, cephalosporin and sterile ankle tourniquet. As stated above, we will be deleting the broach kit and hallux implant and will also delete the hand table drape, cuff tourniquet and cephalosporin. As also noted above, we will retain the sterile ankle tourniquet in the supply database because the comment from the podiatry society argued that this item was not typically reused.
With regard to the comment on the use of "unit of use," we selected the "unit of use" (uou) term to indicate any item that is packaged for single use, even if the item is not completely used up. This most often occurs with items that are packaged sterile. For example, "bacitracin ( 0.9 gm uou)" refers to one
0.9 gm foil package. The quantity entered would be 1 and not a smaller amount such as 0.3 . Once this foil package is broken, it is considered "used up" and therefore the unit of use is 0.9 gm . Specifically, any item with a "unit of use" designation is meant to be indicated in whole number "unit of use" quantities, not partials (e.g., entered as $1,2,3$, etc, and not $0.5,1.5$, etc.).

Comment: A commenter representing sleep medicine stated that our proposed price of $\$ 25$ is significantly below prices for standard CPAP masks used in the polysomnography service, CPT code 95811. The commenter submitted prices from two manufacturers that average to $\$ 88$.

Response: It appears that the commenter has submitted prices for a reusable CPAP mask that would not be included in our CPEP data as a disposable supply. Therefore, we will price the disposable mask at $\$ 25.135$, as proposed.

Comment: We received a comment from the American Physical Therapy Association (APTA) that contended there is a rank order anomaly caused by the increased price for the electrode used for CPT code 97033, iontophoresis. APTA noted that the price of a "pair" of electrodes was $\$ 16$ in 2001 but has increased to $\$ 23.98$ under our current supply repricing initiative. APTA has asked that we review the proposed cost of this item as a means to moderate the rank order anomaly.

Response: We appreciate the comments offered by APTA and have reviewed the cost of the supplies assigned to the iontophoresis service. We determined that the electrodes for this service are packaged and priced as "kits" that contain the complete set of electrodes needed to provide one iontophoresis treatment. Therefore, only one electrode "kit" is needed for this code, as opposed to the two electrode "pairs" currently in our supply database. Consequently, we have changed the supply list for iontophoresis in our database to reflect that there is one kit, not two electrodes, at the proposed price of $\$ 11.99$. We believe that this should correct the rank order anomaly.

The following table, "Table 1 Items Needing Specialty Input," lists those items on which we had requested specialty input, comments we received and the actions we are taking.

Table 1.-Items Needing Specialty Input

| 2003 PE supply description | 2003 PE unit | $\begin{aligned} & 2003 \text { PE } \\ & \text { price } \end{aligned}$ | Primary specialties | Prior status of supply item | Commenter response | CMS action taken |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Acetylcholine 10\% .... | 1 gram ......... | \$0.40 | Nurse practitioner, neurology. | See Note C. Need patient-use item, not R\&D item. | None ...................... | See Note D. |
| Aerochamber ............ | 1 item .......... | .................. | Cardiology, internal medicine. | Item may be deleted. May not be typical and may be separately billable. | Agree-reusable. Requests item be retained. | Disagree-Deleted. |

## h. Miscellaneous Practice Expense Issues

## Hyperbaric Oxygen Services

We proposed to assign, on an interim basis, the following practice expense inputs to CPT code 99183, Physician attendance and supervision of hyperbaric oxygen therapy, per session, when performed in the office setting:

Staff: Respiratory Therapist for $\mathbf{1 3 5}$ minutes (for a 2 hour treatment); Supplies: Minimum Visit Supply Package, 180 liters of oxygen, 187 cubic feet of air; Equipment: Hyperbaric chamber.

Comment: A freestanding hyperbaric oxygen center expressed appreciation that we priced this procedure in the non-facility setting. The commenter also
requested that we add certain staff time and some supplies to the practice expense inputs assigned to this service.

The additional supplies requested include disinfectant for cleaning the hyperbaric chamber after each patient, two otoscope covers to check patients' ears pre and post treatment, and a denture cup and urinal. An additional 24 minutes of clinical staff time (using the standard staff blend) was also requested for preparing the room, greeting and gowning the patient, patient education, taking vital signs before and after treatment, positioning the patient and cleaning the room.

Response: We believe that the request for the above additional practice expense inputs is reasonable. Currently,
we have assigned clinical staff time only for assisting during the procedure itself; additional time was calculated using the times used by the PEAC for the tasks listed. Therefore, we are adding these inputs to those already assigned to the hyperbaric oxygen service. We have also requesting that the PEAC review these inputs at a future meeting and the RUC has stated that the PEAC will be reviewing this CPT code at the January or March 2004 meeting.

Comment: A commenter from another freestanding hyperbaric center expressed concern that the proposed physician fee schedule payment for CPT 99183 is approximately 25 percent of the payment in the hospital setting. The commenter lists additional costs that
should be considered such as special cleaners and solvents for cleaning the chamber, the costs of adherence to quality standards and costs for laundering patients' clothing, sheets and blankets. The commenter also stated that the hyperbaric chamber costs more than the $\$ 125,000$ we have assigned the item.

Response: As mentioned above, we have added disinfectant solution for cleaning the chamber. We will be proposing the repricing of all equipment in our CPEP database next year, which should ensure that the price for the hyperbaric chamber reflects the typical cost. The cost of laundering and much of the quality assurance costs are considered indirect and are not reflected in our direct cost database. However, if the PEAC does refine this code as planned, we will review any recommendation submitted.

## Maxillofacial Prosthetics PE/hour

We proposed to eliminate the special practice expense pool for maxillofacial prosthetic services and to use otolaryngology as the crosswalk for oral surgeons and maxillofacial surgeons as a more appropriate approximation of the specialties' practice expense per hour.

Comment: The American Association of Oral and Maxillofacial Surgeons expressed appreciation for our work on this issue over the past three years and heartily concurred with the decision to crosswalk maxillofacial prosthetics to otolaryngology. The American Academy of Otolaryngology-Head and Neck Surgery also supported our proposed crosswalk.
Response: We will implement the crosswalk of maxillofacial prosthetics to otolaryngology as proposed.

## Holter Monitoring Codes

We proposed revising the practice expense inputs for holter monitoring codes to remove items that were not needed to perform the services. Specifically, we proposed deleting the ECG electrodes and laser paper, as well as the electric bed, computer and holter monitor from CPT codes 93225 and 93231 and deleting the razor, nonsterile gloves, alcohol swab and tape, as well as the electric bed and exam table from CPT codes 93226 and 93232.

Comment: A commenter representing an independent diagnostic testing facility and another representing cardiologists expressed support for the proposed revisions to the holter monitor codes.

We also received a comment from the RUC stating that the direct practice expense inputs for these above holter
monitoring services will be reviewed by the PEAC at the January 2004 meeting.
Response: We will make the proposed changes to the holter monitoring codes on an interim basis and will be glad to review the recommendations from the PEAC when we receive them next year.

## Other Practice Expense Issues

Comment: We have received requests from several commenters that we value certain procedures currently priced only in the facility setting in the non-facility setting as well. A manufacturer commented that there is a need to price the hysteroscopic endometrial ablation procedure, CPT code 58563, in the office to ensure Medicare patient access to this alternative to hysterectomy in the least intrusive and least costly setting. Several individual gynecologists have expressed concern about the absence of a nonfacility rate for this service because the facility payment does not cover the costs of performing this procedure in the office.

A manufacturer of endoscopic and surgical supplies and equipment expressed concern that several urology services which had previously been priced in the non-facility setting, are no longer priced in that setting. The commenter contended that the procedures can be performed safely in the office and that patients will be forced to go to a hospital or ambulatory surgical center for these procedures if the office payment does not reflect the direct costs incurred by the physician. The services in question are three cystourethroscopy procedures, СРT codes 52224, 52275, 52276, and two destruction of penile lesion procedures, CPT codes 54057 and 54065.

A consultant representing nonhospital based providers of LDL apheresis, CPT code 36516, requested that we price this procedure in the nonfacility setting and provided some cost data for this code. The commenter stated that this procedure is commonly provided outside of hospitals. A medical technology company requested that we price the percutaneous implantation of neurostimulator electrodes procedure, CPT code 64561, in the nonfacility setting. This service had previously been priced in the office.

Response: We are aware that technological advances make it now possible for more procedures to be safely performed in a physician's office. However, CPT code 58563 has recently been reviewed by the PEAC, and neither the gynecology specialty society nor the PEAC recommended pricing this code in the office setting. Likewise, the urology procedures and the neurostimulator service were reviewed
this year by the PEAC and the apheresis services last year by the RUC, and the PEAC and the RUC recommended that these services not be priced in the office setting based on the presentation made by the specialty societies. We would not rule out working further with the commenters on these requests, but we believe that it would not be appropriate to take such an action in this final rule. We will be willing to discuss this issue further to determine whether any action should be proposed in the future.

Comment: The RUC comment identified the following anomalies in the CPEP database for the clinical staff time for a few codes with 000 day global periods:
B. (1) Percutaneous Abscess Drainage Codes

In 1997, CPT created new codes to differentiate between open and percutaneous abscess drainage. Unlike their open procedure counterparts, all of the percutaneous codes were assigned a global period of 000 days with no follow-up visits assigned. However, CMS crosswalked the direct inputs from the open codes, which have a different global period, to the percutaneous codes, including the time assigned for post-procedure office visits. The percutaneous abscess drainage codes identified are CPT codes 32201,44901 , 47011, 48511, 49021, 49041, 49061, 50021, 58823. The comment stated that each of these codes is currently priced in the facility setting only. Because these procedures are predominately performed in the inpatient setting, the comment further recommended that we assign zero direct practice expense inputs for these codes.

## (2) Closure of Eyelid by Suture

The commenter also pointed out that CPT code 67875 , Closure of eyelid by suture, has an assigned global period of 000 and includes no post-procedure visits in the work relative value. However, the original CPEP process appears to have assigned the code clinical staff time, supplies, and equipment related to a follow up visit.

Response: We agree with the RUC that these 0-day global codes should not have any direct costs assigned for postprocedure follow up visits. Therefore, we are deleting from the database all the inputs related to such visits.

Comment: Several commenters have expressed concern with the unexplained reduction in nonfacility practice expense RVUs for HCPCS code G0166, External counterpulsation.
Response: We have examined the practice expense data files and have
discovered an error in the database. This has now been corrected.

Comment: A specialty society representing dermatology commented that the practice expense RVUS for laser treatment of psoriasis procedures, CPT codes 96920-96922, appear overvalued.

Response: The practice expense has increased for these codes because we did not have a price for the laser tip used in these procedures until this year. The laser tip is now priced at $\$ 240$. We have made adjustments to ensure the practice expense RVUs reflect the correct pricing of supplies as well as the specialty performing the service.

Comment: One specialty society that represents gastroenterologists commented that we cut the payment rate for the colonoscopy procedure, CPT 45385 , by 10 percent in the nonfacility setting without explanation or justification.

Response: The decrease in payment for this code is due to the decreased practice expense inputs now assigned to the service. The PEAC submitted recommendations for the direct practice expense inputs for this service that were based on a presentation made by two other gastroenterological specialty societies, and we have accepted these recommendations because we believe them to be reasonable. The code was included on Addendum C, "Codes for Which We Received PEAC
Recommendation on Practice Expense Direct Cost Inputs." in the proposed rule.

Comment: Several commenters representing pediatricians, family physicians and chest physicians stated their concern with the proposed decrease in the practice expense RVUs for immunization services, CPT codes 90471 and 90472 , which were removed from the non-physician work pool and priced under the top-down methodology starting in 2003.

Response: We will return the two immunization services to the nonphysician work pool. As discussed above, we are increasing the price assigned to the needle stick prevention device that is in the supply list for the immunization codes. However, the practice expense RVUs for these codes would still be less than the current values. As discussed above, the price for the needle stick prevention device is still fluctuating as new manufacturers enter the market. In addition, it is still not clear exactly which device is optimal for the protection of medical staff. Therefore, until these issues are settled, we will price these immunization services in the nonphysician work pool. This will prevent any sharp decrease in payment
for these codes, as well as for payments for the HCPCS G-codes for administration of influenza, hepatitis and pneumococcal vaccines, which are crosswalked to the payment for CPT code 90471.

Comment: We received a coinment from Venable, a diathermy manufacturer, who voiced concerns about previous decreases in both the work and the practice expense RVUs for the diathermy procedure, CPT code 97024. According to the commenter, the PEAC recommendations we accepted for 2002 included a substantial reduction in clinical labor time, the elimination of supplies, and the undervaluing of the diathermy equipment, including the assignment of inadequate time for equipment use. Citing our current CPEP price of $\$ 3,120$ as too low, the commenter noted the cost of the diathermy machines they manufacture range from $\$ 19,000$ to $\$ 30,000$ and noted the actual time of a typical treatment is 20 minutes, and not 15 , as currently listed. A previous comment from the electrophysiology specialty section of the American Physical Therapy Association (APTA) stated that the average cost of diathermy ranges between $\$ 10,000$ and $\$ 15,000$.

Response: We believe the practice expense recommendation we accepted from the PEAC in 2001 for the clinical labor and supplies is appropriate. We would note here that the resultant PEAC recommendation for clinical labor was just one minute less than that proposed by the American Physical Therapy Association at the 2001 PEAC meeting. We continue to support the PEAC's decision to eliminate the supplies for some of the modality procedures, including diathermy, since these services are typically performed with other therapy procedures where the supply costs are captured. However, we agree with the commenter that the current pricing of the diathermy equipment in our CPEP database appears too low, and we will price the diathermy, on an interim basis, at $\$ 10,000$ for the 2004 fee schedule. In addition, we will assign the requested 20 minutes as the typical time the diathermy equipment is in use for each service. We are planning to propose a repricing of all of the equipment included in our database next year and will revisit the pricing of the diathermy equipment at that time.

In response to the commenter's work RVU concern, next year's final rule will solicit recommendations of codes to be considered for review under the fiveyear review of work that is to occur in 2005.

Comment: A commenter representing prosthetic urology focused on reductions in payment for several 90day global prosthetic urology procedures. The commenter contended that these procedures were affected by the adoption of the standard clinical staff times for 90 -day global procedures that did not reflect the extra staff time required for patient training during post-procedure visits. In addition, almost half of the prosthetic urology services were established in 2002 and this appeared to have a negative effect on these codes. The commenter strongly recommended that the standard clinical staff times not be applied to the prosthetic urology codes and that we reinstate the "benchmark" clinical staff times.
Response: The commenter is correct that the major cause of the decrease in practice expense RVUs for these services is the use of the standard clinical staff time for 90-day global services. We do not have "benchmark" clinical staff times to reinstate for any of these services. Rather, the current staff times are from the original CPEP panel estimates that have not been reviewed by any multi-specialty panel, such as the PEAC. We accepted the PEAC recommendation to apply the standard clinical staff time to all 90-day global services that had not been reviewed by the PEAC as having exceptions to the standard times. All specialties, including urology, had ample opportunity to present any codes for which they believed the standards did not apply; these urology codes were not brought to the PEAC for review. We do not believe we have a sufficient factual basis for changing the clinical staff times for these services in this final rule. However, we would consider any recommendations for revising the preand post-service clinical staff times in the future. As to the effect of using the most recent utilization data in calculating the practice expense RVUs for the new prosthetic urology services, please see the discussion on
"Utilization Data" earlier in this section.
Comment: A specialty society representing emergency medicine, an emergency medicine practice management association and an emergency medicine physician practice management organization all commented that the adjustment made in the November 2, 1998 final rule (63 FR 58821) to use the "all physician" practice expense per hour to calculate two indirect cost pools does not make up for the uncompensated care costs of emergency medicine physicians. The practice management association questioned our previous claim that this
adjustment was made as a proxy for uncompensated care and asserted it was rather a generic measure to address the low practice expense per hour for emergency medicine. The specialty society commented that it would be difficult to design a supplementary survey to capture the needed data on the levels of uncompensated care.

Response: It is amply clear from reading our entire response in the November 2, 1998 final rule that we considered the adjustment to the indirect costs to serve as a proxy for the uncompensated care experienced by emergency medicine physicians. We believe that, if this adjustment is seen by the specialty as insufficient, the best recourse is for the specialty to undertake a supplementary practice expense survey. By working with our contractor, the Lewin Group, the specialty society should be able to modify the survey in such a way that more accurate data on uncompensated care could be obtained. The data from such a survey could then take the place of the current adjustment to the practice expense per hour for emergency medicine because a proxy for uncompensated care would no longer be needed.
Comment: We received comments from a provider of extracorporeal photopheresis therapy, CPT code 36522 , requesting a refinement of the practice expenses of this service in the office setting. Believing this service to be undervalued, the commenter supplied a comprehensive listing of the direct inputs, for the labor, equipment and supplies deemed necessary for the provision of this in-office service. Of particular note among the various suggested supply items was the inclusion of a photopheresis procedural kit.

Response: We want to thank the photopheresis provider for the practice expense suggestions. At this time, we do not have sufficient information regarding the typical resources needed to proceed with a comprehensive refinement of the practice expenses for the in-office provision of photopheresis. However, in reviewing the commenter's various practice expense proposals, we were struck by the obvious absence of the photopheresis procedural kit in our supply database. Consequently, this kit has been added to our CPEP database on an interim basis. We note that there are general similarities between the commenter's proposed inputs for clinical labor and equipment and our current data. We would anticipate a future discussion regarding this service in order to fully refine the practice expense direct cost inputs for photopheresis.

## B. Geographic Practice Cost Index .nt Changes

## 1. Background

The Act requires that payments vary among Medicare physician fee schedule (MPFS) areas according to the extent that resource costs vary, as measured by the Geographic Practice Cost Indices (GPCIs). Section 1848(e)(1)(C) of the Act requires us to review, and, if necessary, adjust the GPCIs at least every 3 years. This section of the Act also requires us to phase in the adjustment and implement only $1 / 2$ of any adjustment if more than 1 year has elapsed since the last GPCI revision. The GPCIs were first implemented in 1992. The first review and revision was implemented in 1995, the second review was implemented in 1998, and the third review was implemented in 2001. As explained in the August 15, 2003 proposed rule, the fourth GPCI review and revision was scheduled for implementation in 2004. However, because the work and practice expense GPCIs rely primarily on special tabulations of U.S. Census data not yet available, review and revision of only the malpractice GPCI component would occur for implementation in January 2004.

## 2. Malpractice GPCI Proposal

The malpractice GPCI is the most volatile of the three indices with relatively large variations existing between geographic payment localities. We proposed using actual 1999 through 2002 malpractice premium data and forecasting the malpractice premium rates for 2003. We were unable to include proposed malpractice GPCIs based upon this revised malpractice premium data in the August 15, 2003 proposed rule because we were still in the process of collecting the data. We stated that the revised malpractice GPCIs published in this year's final physician fee schedule regulation would be considered interim and subject to public comment.

## 3. Collection and Review of Malpractice Premium Data

For purposes of the 2004 update to the malpractice GPCIs we collected actual malpractice premium data for years 1999 through 2001. For 2002 we were able to obtain actual malpractice premium data for 32 states plus Puerto Rico. Where actual malpractice premium data were obtained, premiums were collected from the 20 physician specialties with the largest share of total Medicare RVUs for 2002. Premiums were collected from those insurers with the largest market share and those insurers that when summed with other
large insurers comprised at least 50 percent of the state market share for claims-made policies with a $\$ 1$ million individual case limit and $\$ 3$ million aggregate case limit.
For those 18 states plus the District of Columbia for which we were unable to obtain actual 2002 premium data, we estimated the 2002 premium based upon an examination of growth rates from 1999 to 2001.
Malpractice premium data were not available for 2003. Two statistical approaches were examined to forecast 2003 malpractice premiums, simple extrapolation and projections based upon the average of historical year-toyear changes (mean rate of change). In most instances, the forecast 2003 premiums were similar using either approach. There was a tendency for the linear extrapolation method to yield slightly more extreme values (positive and negative) so the more conservative, mean rate of change approach was chosen.

Comment: Several commenters expressed concern about the continued use of proxy data, especially HUD residential rent data and nonphysician professional wage data, in the GPCI methodology.

Response: This final rule does not update the work or practice expense GPCIs. Any questions related to the use of proxy data in the calculation of the work and practice expense GPCIs will be responded to as part of future rulemaking.

Comment: One commenter stated that there should be no geographic differences under the physician fee schedule. This commenter felt that the data sources utilized for the construction of the locality specific GPCI indices do not accurately reflect legitimate differences in physician practice costs and that the current methodology did not appropriately reflect the variation that might be caused by case mix, availability of healtll care resources, and individual practice styles.
Response: Section 1848(e)(1)(A) of the Act requires that payments vary among areas as resources costs vary as reflected by the GPCIs. We agree that there will be some variation in case mix and practice styles between different specialties and individual practitioners. The physician fee schedule was established in 1992 to eliminate the large unjustifiable payment differences that existed among services, specialties, and geographic areas by establishing a national uniform payment system that can vary only as area resource costs vary as measured by the GPCIs. The GPCI component weights represent the
average phẏsician expense weights across all physician specialties and are intended to reflect the average costs across all services and specialties in a geographic area and not to reflect exactly the costs of each individual practitioner.

Comment: One commenter stated that there should be no geographic payment differentials because these payment differentials operate as a disincentive for practitioners to practice medicine in rural areas.

Response: Section 1848(e)(1)(A) of the Act requires that payments vary among areas as resources costs vary as reflected by the GPCIs. It should be recognized that the current methodology associated with the calculation of GPCIs partially benefits practitioners in rural areas. This is because the law requires that only one-quarter of area cost differences in physician work, the largest of the three fee schedule components, be recognized. Thus, about 40 percent of fee schedule payments are by statute not adjusted for area cost differences. When combined with the index of 1.000 for medical equipment, supplies, and miscellaneous (which represents about 13 percent of total physician resource costs) this means that there is a national fee schedule for about 53 percent of the average physician payment. That is, only about 47 percent of overall physician payments are adjusted for area resource cost differences. In addition, 34 states have a single statewide GPCI wherein all physicians, whether urban or rural, are paid the same. All of these factors shift payments from higher cost, usually urban, areas to lower cost, usually rural, areas.

Comment: One commenter felt that we should not use projected 2003 premium data and instead should actually collect 2003 premium data.

Response: Currently, 2003 premium data is not available. This is why we will utilize projected 2003 premium data in this update. We plan to utilize more current premium data as it becomes available.

Comment: Although several commenters expressed their support for the use of more current malpractice premium data, a few commenters had concerns about the use of 2001 through projected 2003 premium data and felt that we should use only projected 2004 premium data in place of the three year average.

Response: Since the malpractice index has proven to be the most volatile of the indices in past updates, with significant changes from year-to-year, we will not base the malpractice GPCI upon just one year of projected data. In order to protect against aberrant
premiums for any given year, we will utilize a three-year average. We will use 2001 through projected 2003 premium data for the three-year average.

The current methodology projects 2003 malpractice premiums based upon actual malpractice premiums for 1999 through 2002. Since we will continue to collect updated malpractice premium data, we do not think it is appropriate to project through 2004 absent actual 2003 malpractice premium data.

Comment: One commenter suggested that due to the volatility associated with malpractice insurance premium data, we should collect premium data and rescale the Malpractice GPCI annually.

Response: We agree that, because malpractice insurance premiums are volatile, the Malpractice GPCI is also the most volatile of the three indices. We also agree with the commenter's suggestion regarding annual collection of malpractice premium data. We plan to undertake this collection for 2003 premium data in early 2004. If premium data suggest a re-scaling is warranted, we may revise the GPCIs more frequently than every three years.

Comment: Several commenters requested that we make available to the public the malpractice premium data that was utilized in the calculation of the revised malpractice GPCIs.

Response: Since some of the data upon which the GPCIs were constructed is based upon the reporting of individual malpractice insurance companies, there are some confidentiality issues associated with making the malpractice premium data public. We will attempt to make available any information that is appropriate on our Web site at http:// www.cms.hhs.gov.

Comment: The American Medical Association's Relative Value Update Committee (RUC) has requested that CMS work with the RUC's Professional Liability Insurance Workgroup to explore the utilization of premium data that might be collected by the RUC.

Response: We agree with the RUC request and look forward to working with the RUC to obtain more current professional liability premium data.

## 4. Interim 2004 Malpractice GPCIs

 Acquiring data on malpractice insurance rates and using that data to adjust Medicare payments for future malpractice insurance prices is a difficult task. Malpractice insurance rates are quite volatile due to a variety of factors. Some of these factors are changes in State insurance laws, business decisions of malpractice insurance carriers, and changes in how medicine is practiced.The volatility of malpractice premium data was quite evident in the data we collected in conducting our review of malpractice GPCIs. Based on these data and the comments received on the August 15, 2003 proposed rule, we have modified some of our GPCI calculations and assumptions.

We are very concerned about implementing sharp changes in malpractice GPCIs for 2004, which directly impact physician fee schedule payment amounts. At the same time, we recognize the importance of updating malpractice GPCIs to ensure local differences in physician costs are included in payment amounts. To be sensitive to both of these considerations, we decided to apply a modulating factor of .5 to the changes in the malpractice GPCIs. In other words, as part of our review and analysis of the malpractice GPCIs, we reduced the difference between the new and previous malpractice GPCIs by 50 percent.

As directed by the statute, we will implement $1 / 2$ of this change in the first year (CY 2004) and $1 / 2$ of this change in the second year (CY 2005). During this two-year phase-in, we will continue to monitor local malpractice markets, work with the State Departments of Insurance, and collaborate with the RUC to obtain the most current and best malpractice premium data available. As better data are obtained, we will review, propose changes, and revise the malpractice GPCIs as appropriate. The transitional 2004 and full 2005 GPCIs can be found at Addendum D and Addendum E, respectively. These malpractice GPCI revisions necessitate a budget neutrality adjustment, as required by law. Therefore, we adjusted the 2004 through 2006 malpractice GPCIs by 1.0021 .

## 5. Payment Localities

In the August 15, 2003 proposed rule we requested comments on the composition of the current 89 Medicare physician payment localities to which the GPCIs are applied.

Comment: We received numerous comments from professional medical associations, beneficiaries, and practitioners requesting that the specific counties in which they practice medicine or receive medical care be removed from their current locality assignment.

Response: We will continue to examine alternatives for reconfiguring the current locality structure. We expect to further consider this issue as part of future rulemaking.

## C. Coding Issues

## 1. Payment Policy for CPT Tracking Codes

The November 1, 2001 final rule (66 FR 55269) included a discussion of CPT Category III codes (also known as CPT tracking codes) and stated that carriers have discretion for coverage and payment of services described by these CPT tracking codes unless we have made a national coverage determination (NCD). We have received requests to create national payment amounts for some CPT tracking codes even if there has been no NCD. Based on these requests, we proposed to change our policy regarding payment for CPT tracking codes and create national payment policy and determine national payment amounts for CPT tracking codes when there is a significant programmatic need for us to do so. This policy change would not change the contractor's discretion over coverage for the CPT tracking codes, but could establish a payment level to be used if the contractor finds that coverage is warranted. In addition, carriers would not be required to establish a payment amount for a tracking code until they receive a claim for the code.

Comment: Several commenters expressed concerns about this proposal. They believe that establishing a national payment rate for these codes risks premature creation of payment levels of reimbursement and creates an expectation for the future value of the code. The commenters also stated that establishment of a national price could also subvert the RUC process because such pricing could influence subsequent RUC valuation or our acceptance of the RUC's recommendations. Other commenters were supportive of the proposal, with some suggesting that we work with the specialty societies and the RUC in determining appropriate payment rates. One commenter suggested that an alternative to the proposal would be to use the existing refinement panel process because these refinement panels are multispecialty and feature the relevant specialty expertise. One commenter also requested we establish RVUs for specific tracking codes in the final rule.

Response: We understand the reservations and concerns of the commenters. As we indicated in the proposed rule, we would determine national payment amounts for CPT tracking codes only when there is a significant programmatic need for us to do so. If there is a need to establish payment amounts for a tracking code, we would appreciate the assistance of the relevant specialty societies and the

RUC and such pricing would be subject to public comment. However, in some instances, interim values might need to be established if timing does not permit us to obtain prior input from the medical community.

## Final Decision

We will finalize our proposal to create national payment policies and determine national payment amounts for CPT tracking codes when there is a significant programmatic need for us to do so. We note that, as discussed in the August 15, 2003 proposed rule, this policy change would not change the contractor's discretion over coverage for CPT tracking codes, but would establish a payment level if the contractor finds that coverage is warranted.

## 2. Excision of Benign and Malignant Lesions

The definitions for excision of benign lesions (CPT codes 11400 through 11446 inclusive) and excision of malignant lesions (CPT codes 11600 through 11646 inclusive) were substantively changed for 2003. These codes are now reported based on the excised diameter (actual skin removed) rather than on the size of the lesion. Based on these changes to the code descriptors, we proposed to make the work RVUs the same for removal of all skin lesions with the same excised diameters that are from the same area of the body, whether the lesions are benign or malignant. For example, the work RVUs for the removal of benign skin lesions from the trunk, arms or legs with excised diameter 1.1$2.0 \mathrm{~cm}, \mathrm{CPT}$ code 11402 , would be the same as the work RVUs for CPT code 11602 , which is the removal of malignant skin lesions from trunk, arms or legs with excised diameter of 1.1-2.0 cm.

Comment: The specialty society representing dermatology objected to this proposal and contended that the excision of malignant lesions generally goes deeper and is more timeconsuming than the excision of benign lesions and that malignant lesion excision also requires greater skill and embodies greater risk. The society stated that this proposal ignores a multispecialty effort by a CPT Integumentary Workgroup, the CPT Editorial Panel and the RUC to revise the code descriptors and to assign work RVUs to these services. This view was supported by a joint comment from the heads of several surgical specialties. The RUC also urged us to delay finalizing this proposal until the RUC has the opportunity to provide further recommendations related to these services. In addition, the specialty societies representing podiatry, general
surgery, colon and rectal surgery, osteopathy, ophthalmology, plastic surgery, otolaryngology as well as the AMA, the Mayo Foundation and individual physicians also urged us to withdraw this proposal. Medical Group Management Association requested the policy rationale for equating the work RVUs for the benign and malignant code pairs. The specialty society representing family physicians agreed with and supported our position that there is no difference in physician work involved in excising a benign or malignant lesion. However, the commenter did not support our proposal to implement such RVU changes unilaterally and stated that we should utilize the CPT and RUC process.

Response and Final Decision: We still believe that the physician work for these services is sufficiently similar not to warrant differences in the work RVUs. However, we will maintain the 2003 work RVUs as interim values for 2004 to allow opportunity for the specialty to resurvey these services. Note: That due to the adjustments to work RVUs to match the MEI weights, the work RVUs in Addendum B may differ from the values in 2003.
3. Create G Codes for Monitoring Heart Rhythms

As explained in the August 15, 2003 proposed rule, technological advances have made cardiac telemetry equipment, typically used in hospitals, available in the home setting. Coverage of this technology is currently at the discretion of the local Medicare contractors because there is no national coverage determination for this service. We proposed to establish new HCPCS codes to specifically describe this service along with proposed RVUs and PE inputs for payment as follows:

GXXX1-Electrocardiographic monitoring for diagnosis of arrhythmias, utilizing a home computerized telemetry station and trans-telephonic transmission, with automatic activation and real time notification of monitoring station, 24-hour attended monitoring, per 30-day period of time; includes recording, monitoring, receipt of transmissions, analysis, and physician review and interpretation. (global)

We proposed 0.52 physician work RVUs and 0.24 malpractice RVUs for this service and proposed crosswalking the practice expense inputs from CPT Code 93268 Patient demand single or multiple event recording with presymptom memory loop, 24-hour attended monitoring, per 30 day period of time; includes transmission physician review and interpretation.

GXXX2-Electrocardiographic monitoring for diagnosis of arrhythmias, utilizing a home computerized telemetry station and trans-telephonic
transmission, with automatic activation and real time notification of monitoring station, 24-hour attended monitoring, per 30-day period of time; recording (includes hook-up, recording and disconnection).

We proposed 0.07 malpractice RVUs and crosswalked the practice expense inputs from CPT Code 93270, Patient demand single or multiple event recording with presymptom memory loop, 24-hour attended monitoring, per 30 day period of time; recording (includes hook-up, recording, and disconnection).

GXXX3-Electrocardiographic monitoring for diagnosis of arrhythmias, utilizing a home computerized telemetry station and trans-telephonic transmission, with automatic activation and real time notification of monitoring station, 24-hour attended monitoring, per 30-day period of time; monitoring, receipt of transmissions, and analysis

We proposed 0.15 malpractice RVUs and crosswalked the practice expense inputs from CPT Code 93271, Patient demand single or multiple event recording with presymptom memory loop, 24-hour attended monitoring, per 30 day period of time; monitoring, receipt of transmission, and analysis.

GXXX4-Electrocardiographic monitoring for diagnosis of arrhythmias, utilizing a home computerized telemetry station and trans-telephonic transmission, with automatic activation and real time notification of monitoring station, 24-hour attended monitoring, per 30-day period of time; physician review and interpretation.

We proposed 0.52 physician work RVUs and 0.02 malpractice RVUs and also crosswalked the practice expense inputs, from CPT code 93272 Patient demand single or multiple event recording with presymptom memory loop, 24-hour attended monitoring, per 30 day period of time; physician review and interpretation only.

Comment: Commenters representing cardiac arrhythmia specialists and cardiologists recommended that we withdraw the proposal to create new $G$ codes for monitoring heart rhythms. The commenters stated that this request was not made by the medical community nor from the manufacturers of these heart rhythm monitoring systems. The commenters contended that the proposal appears to address specifically one manufacturer and specifies a particular mode of transmission and patient location, even though there are
other new systems of this type that are not captured by this proposal.

The commenters recommended that we allow this technology to be utilized on a local level before implementing a national coding solution. The commenters further supported that when this new technology warrants a national coding solution, a CPT coding application should be initiated and then the code should be sent to the RUC for review. The commenting specialties stated their willingness to provide medical input into the evaluation, coding and reimbursement for this new technology. Two commenters also stated that the descriptors and the proposed reimbursement do not reflect the monitoring systems that have been developed. Other commenters also requested that we withdraw or reconsider our proposal, as it did not follow the established process for creating and valuing new codes. One specialty society representing clinical endocrinologists supported the establishment of these HCPCS codes, while another commenter, a cardiac monitoring company, provided a general outline of how the various cardiac monitoring technologies can best be used for maximum quality and value. Another commenter suggested that until efficiency of the new technology is demonstrated this proposal should be postponed.

Response: Our intention in proposing these G codes was to recognize and nationally price all currently available real time cardiac telemetry monitoring technology. It was not intended to address only one system currently in use. Based on the concerns raised by commenters, we will not proceed with these proposed HCPCS codes because we want to ensure that any HCPCS codes developed encompass the various technologies that are being utilized for such monitoring.

## 4. CPT Code 88180 (Flow Cytometry: Each Cell Surface, Cytoplasmic or Nuclear Marker)

Flow cytometry is a technique to analyze single cell suspensions from blood,bone marrow, body fluids, lymph nodes, and other tissues. The technique, currently coded as CPT code 88180 , Flow cytometry, each cell surface, cytoplasınic or nuclear marker, quantifies cell surface, cytoplasmic, and nuclear antigens. The August 15, 2003 proposed rule discussed our concerns that the current coding scheme (payment on a per marker basis) may encourage the performance of more markers than may be medically necessary because the pathologist determines what markers to perform
and when to perform them. We indicated that we understood the laboratory community would be reviewing this issue and considering whether to recommend changes to the current coding for the procedure. We also requested recommendations on appropriate values for the procedure should we wish to develop a future proposal.
Comments: Commenters, both individuals and organizations, asked that we not put forth a proposal for payment of flow cytometry. The College of American Pathologists (CAP) has proposed coding revisions to both the immunology and anatomic pathology section of CPT and is working with other groups to establish practice guidelines for flow cytometry. CAP asked that we not establish new "G" codes for 2004, but work with CAP and allow the CPT and RUC evaluation process to be used to determine appropriate coding and relative value units for flow cytometry.

Decision: We agree with the commenters. We will work with CAP, the CPT and the RUC to develop appropriate coding and payment policies for flow cytometry.
5. Change in Payments to Physicians Managing Patients on Dialysis

In the August 15, 2003 rule, we proposed to make CPT codes 90918 , 90919, 90920, and 90921 for the monthly capitation payments (MCP) invalid for Medicare. We also proposed to create 3 new $G$ codes in place of each CPT code with payments varying with the number of visits provided within each month to an end stage renal disease (ESRD) patient. Under our proposal, there would be separate codes when the physician provides 1 visit per month, $2-3$ visits per month and 4 or more visits per month. The code for 1 visit per month would have the lowest payment while a higher payment will be provided for 2 to 3 visits per month and the highest payment for 4 or more visits per month. These new codes would be reported once per month for services performed in an outpatient setting that are related to the patient's ESRD. These physician services would continue to include the establishment of a dialyzing cycle, outpatient evaluation and management of the dialysis visits, telephone calls, and patient management provided during a full month. These codes would not be used if a hospitalization occurred during the month.

The proposed codes are as follows:
GXXX5-End Stage Renal Disease (ESRD) related services per full month, for patients under 2 years of age to
include monitoring for the adequacy of nutrition, assessment of growth and development, and counseling of parents; with 4 or more face-to-face physician visits per month.
GXXX6-End Stage Renal Disease (ESRD) related services per full month, for patients under 2 years of age to include monitoring for the adequacy of nutrition, assessment of growth and development, and counseling of parents; with 2 or 3 face-to-face physician visits per month.
GXXX7-End Stage Renal Disease (ESRD) related services per full month, for patients under 2 years of age to include monitoring for the adequacy of nutrition, assessment of growth and development, and counseling of pareuts; with 1 face-to-face physician visit per month.

GXXX8-End Stage Renal Disease (ESRD) related services per full month, for patients between 2 and 11 years of age to include monitoring for the adequacy of nutrition, assessment of growth and development, and counseling of parents; with 4 or more face-to-face physician visits per month.

GXXX9-End Stage Renal Disease (ESRD) related services per full month, for patients between 2 and 11 years of age to include monitoring for the
adequacy of nutrition, assessment of growth and development, and counseling of parents; with 2 or 3 face-to-face physician visits per month. GXX10-End Stage Renal Disease (ESRD) related services per full month, for patients between 2 and 11 years of age to include monitoring for the adequacy of nutrition, assessment of growth and development, and counseling of parents; with 1 face-toface physician visit per month.
GXX11-End Stage Renal Disease (ESRD) related services per full month, for patients between 12 and 19 years of age to include monitoring for the adequacy of nutrition, assessment of growth and development, and counseling of parents; with 4 or more face-to-face physician visits per month. GXX12-End Stage Renal Disease (ESRD) related services per full month, for patients between 12 and 19 years of age to include monitoring for the adequacy of nutrition, assessment of growth and development, and counseling of parents; with 2 or 3 face-to-face physician visits per month.
GXX13-End Stage Renal Disease (ESRD) related services per full month, for patients between 12 and 19 years of age to include monitoring for the adequacy of nutrition, assessment of
growth and development, and counseling of parents; with 1 face-toface physician visit per month.

GXX14-End Stage Renal Disease (ESRD) related services per full month, for patients 20 years of age and over; with 4 or more face-to-face physician visits per month.

GXX15-End Stage Renal Disease (ESRD) related services per full month, for patients 20 years of age and over; with 2 or 3 face-to-face physician visits per month.

GXX16-End Stage Renal Disease (ESRD) related services per full month, for patients 20 years of age and over; with 1 face-to-face physician visit per month.

We based the proposed payments on the assumption that many physicians would provide 4 or more visits to their ESRD patients and a smaller proportion would provide $2-3$ visits or only 1 visit per month. Using Medicare utilization data from 2002, we proposed the following relative value units for the new G codes that would make Medicare's aggregate payments for ESRD related services under the physician fee schedule approximately equal to current payments for procedure codes 90918 to 90921:

TABLE 2

|  | Code | Physician work | Practice expense | Malpractice |
| :---: | :---: | :---: | :---: | :---: |
| GXXX5 | $\ldots$ | 12.92 | 8.70 | 0.60 |
| GXXX6 | ....... | 5.19 | 3.49 | 0.24 |
| GXXX7 | ................................... | 3.39 | 2.29 | 0.16 |
| GXXX8 | ....................................... | 9.91 | 4.86 | 0.43 |
| GXXX9 | ....... | 3.55 | 1.74 | 0.15 |
| GXX10 | ........ | 2.32 | 1.14 | 0.10 |
| GXX11 |  | 8.47 | 4.54 | 0.35 |
| GXX12 | . | 3.14 | 1.68 | 0.13 |
| GXX13 |  | 2.05 | 1.10 | 0.08 |
| GXX14 | ............................................................... | 5.16 | 2.94 | 0.22 |
| GX115 | ......... | 1.94 | 1.10 | 0.08 |
| GXX16 | .................................................................... | 1.27 | 0.73 | 0.06 |

As part of the proposed rule we also solicited comments on how to further revise our payment methodology to improve quality of care and outcomes. We requested information that could help us design future demonstrations that would study both dimensious of care (quality and utilization) and help ensure that payment is based on appropriate patient-specific care that has been shown to lead to improved outcomes for this complex patient population.
Comment: We received many comments from physicians, the RUC, specialty societies, dialysis centers and nephrologists, as well as other
individuals and organizations who expressed concerns with our proposal to alter the way physicians are reimbursed for services provided to End Stage Renal Disease (ESRD) patients and who urged us to withdraw the proposal. The RUC and the AMA, as well as other specialty organizations, expressed disappointment that we developed this proposal without consultation from the medical community and outside the usual CPT and RUC process. The Renal Physicians Association (RPA), the American Society for Nephrology (ASN), the American Association for Kidney Patients (AAKP), and the National Kidney Foundation (NKF) all
supported the principle of optimizing nephrologist-dialysis patieni interaction, which is included in the proposal. However, the RPA contended that the proposal as currently constituted is unworkable, may negatively impact some dialysis patients and is being put on an unreasonably precipitous implementation schedule. The AAKP outlined similar concerns but believed that increased nephrologist-dialysis patient interaction will lead to improved outcomes and also urged that an advisory committee be established to assist in the effort to further improve quality and coordination of care for dialysis
patients. The Medicare Payment Advisory Commission (MedPAC) agreed that the current payment method lacks accountability and quality incentives, and thus encouraged CMS to address these issues. However, MedPAC also expressed concern that without baseline data it was unclear how we could determine and measure the impact of the proposed changes on quality and access. MedPAC further stated that the adjustments to payment should be made subsequent to the collection of information on resource costs and clinical guidelines. Together with these adjustments, further incentives should be added to the monthly payment to reward and improve the quality and access of dialysis-related physician care, which is consistent with MedPAC's June 2003 recommendations. Below are the specific issues raised by commenters:
Disproportionate Payment Differences
Many comments concerned the large variation in proposed payments to
physicians who see a patient only once a month, compared to the proposed payment for seeing a patient either two or three times during the month or four or more times during the month. In addition, commenters stated there is more work involved in managing care of the ESRD patients between visits.

Response: Based on our review of the comments, we agree that a significant amount of physician work for patients with ESRD occurs outside of the face-toface visit with the patients. Since there may be significant physician work associated with providing physician services to ESRD patients between visits, we agree that there should be less difference in the payment levels than we proposed. By raising the minimum payment level, we are accounting for the extensive patient care coordination and other non-face-to-face management required by ESRD patients. However, we continue to believe that more physician work is associated with more frequent face-to-face visits with the patient, and
any variation in the payment amounts should reflect this difference.
First, we determined the appropriate relative relationship among different codes. For instance, we believe that approximately 25 percent more physician work is involved with providing two to three visits than with a single visit, and 50 percent more physician work is associated with providing four or more visits. By paying a single amount regardless of how often the patient is seen, we believe our current policy pays too much if the patient is seen fewer than four times per month. Thus, we revised our payment to be consistent with different levels of physician work associated with providing monthly management of dialysis patients. We are setting our aggregate revised payments equal to aggregate current payments. Consistent with these assumptions, we determined the following RVUs:

Table 3.-Relative Values for New Monthly Capitation Codes

| Age of patient | HCPCS | Number of visits | Work | Practice expense | Malpractice | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Patients Other Than Home Dialysis |  |  |  |  |  |  |
| <2 ........................................................ | G0308 | 4+ ................ | 12.69 | 8.58 | 0.42 | 21.69 |
|  | G0309 | 2 to 3 ........... | 10.57 | 7.13 | 0.36 | 18.06 |
|  | G0310 | One Visit ...... | 8.45 | 5.72 | 0.28 | 14.45 |
| 2 to 11 ................................................... | G0311 | 4+ ................ | 9.68 | 4.74 | 0.34 | 14.76 |
|  | G0312 | 2 to 3 ........... | 8.07 | 3.94 | 0.29 | 12.30 |
|  | G0313 | One visit ....... | 6.46 | 3.16 | 0.22 | 9.84 |
| 12 to 19 ................................................. | G0314 | 4+ ................ | 8.24 | 4.45 | 0.26 | 12.95 |
|  | G0315 | 2 to 3 ........... | 6.87 | 3.69 | 0.23 | 10.79 |
|  | G0316 | One visit ....... | 5.50 | 2.96 | 0.17 | 8.63 |
| 20 + ...................................................... | G0317 | 4+ ............... | 5.07 | 2.88 | 0.17 | 8.12 |
|  | G0318 | 2 to 3 ........... | 4.23 | 2.39 | 0.14 | 6.76 |
|  | G0319 | One Visit ...... | 3.38 | 1.92 | 0.11 | 5.41 |
| Home dialysis patients (entire month) |  |  |  |  |  |  |
| <2 ......................................................... | G0320 | ... | 10.57 | 7.13 | 0.36 | 18.06 |
| 12 to 19 ................................................ | G0321 | .................... | 6.87 | 3.69 | 0.23 | 10.79 |
| 2 to 11 .................................................. | G0322 | .................... | 8.07 | 3.94 | 0.29 | 12.30 |
|  | G0323 | ... | 4.23 | 2.39 | 0.14 | 6.76 |
| Home dialysis patients (partial month only-per day) |  |  |  |  |  |  |
| <2 ........................................................ | G0324 | ................... | 0.35 | 0.24 | 0.01 | 0.60 |
| 12 to 19 ................................................ | G0325 | .................... | 0.23 | 0.12 | 0.01 | 0.36 |
| 2 to 11 | G0326 | .................... | 0.27 | 0.13 | 0.01 | 0.41 |
| 20 + ..................................................... | G0327 | .................... | 0.14 | 0.08 | 0.01 | 0.23 |

We used the above principles to establish our monthly capitation payments (MCP) for patients 20 or older. For patients younger than 20, we are using the same relationship that exists among the current MCP codes for different age groups for the new codes that we are creating. For example, the current MCP code for a patient under 2
(CPT code 90918) has work RVUs that are approximately 2.5 times the work RVU for a patient 20 or older (CPT code 90921). Thus, Medicare's work RVU for each code for a patient 2 years or younger will be 2.5 times the amount of the corresponding service provided to a patient 20 or older. These values can be considered as interim and we plan to
seek the advice of the RUC in evaluating these codes once the policy has been implemented. There are efforts underway (for example, in their 2004 workplan, the OIG has indicated they will conduct a review of ESRD monthly capitation payments and physician services) which will provide data on the type frequency and content of physician
encounters as suggested by MedPAC. However, we believe a change should be made in the interim to improve care and accountability. The use of these new codes will also enable us to collect data about the frequency of physician visits.

## Regulatory Impact of Proposal on SGR

 and Conversion FactorWe received comments regarding the impact of these proposed changes on the sustainable growth rate (SGR) calculations. Commenters expressed concern that, if physician behavior changes and physicians increase the number of visits provided per month, actual expenditures would surpass the target projection, resulting in a future payment reduction for all of medicine.
Response: Section 1848(c)(2)(B)(ii)(II) of the Act requires that changes to RVUs cannot cause the amount of expenditures to increase or decrease by more than $\$ 20$ million from the amount of expenditures that would have been made if such adjustments had not been made. As indicated above, we have established RVUs for the new monthly capitation codes so that Medicare's aggregate payments for these services are equal to what we would have paid in the absence of these changes. We are not expecting any impact on payment for other physician fee schedule services. However, we will continue to review this issue as we work with the medical community to further refine Medicare policy for treating patients needing dialysis services.

## Home Dialysis

Many comments were received regarding home dialysis because patients who dialyze at home typically see their physicians less frequently than other ESRD patients. One commenter suggested that home dialysis patients be excluded from the proposed change and that we continue to pay the current MCP rate for services to these patients.

Response: We have created four G codes for the management of home dialysis patients in each of the age groups and will pay for the home dialysis patients at the same rate as codes G0309, G0312, G0315, and G0318 respectively. Although the codes for home dialysis patients will pay physicians slightly less than the former MCP, physicians will still have a relative incentive to increase the use of home dialysis. We believe this is consistent with Section 1881(b)(3)(B) of the Social Security Act which states "With respect to payments for physicians' services furnished to individuals determined to have end stage renal disease, the Secretary shall pay 80 percent of the amounts
calculated for such services on a comprehensive monthly fee or other basis (which effectively encourages the efficient delivery of dialysis services and provides incentives for the increased use of home dialysis) for an aggregate of services provided over a period of time (as defined in regulations)."

The new G codes for the monthly management of home dialysis patients will be as follows:

G0320-End stage renal disease (ESRD) related services for home dialysis patients per full month; for patients under two years of age to include monitoring for adequacy of nutrition, assessment of growth and development, and counseling of parents.
G0321-End stage renal disease (ESRD) related services for home dialysis patients per full month; for patients two to eleven years of age to include monitoring for adequacy of nutvition, assessment of growth and development, and counseling of parents.
G0322-End stage renal disease (ESRD) related services for home dialysis patients per full month; for patients twelve to nineteen years of age to include monitoring for adequacy of nutrition, assessment of growth and development, and counseling of parents.
G0323-End stage renal disease (ESRD) related services for home dialysis patients per full month; for patients twenty years of age and older.

The American Society of Nephrology also commented that "reimbursement should be constructed so that home dialysis patients should see their nephrologist at least monthly, with further visits on an as needed basis." We will not specify the frequency of required visits at this time but expect physicians to provide clinically appropriate care to manage the home dialysis patient.

If home dialysis patients are hospitalized during the month, four new G codes have been created: G0324, G0325, G0326, and G0327. These codes will be used to report daily management of home dialysis patients for the days the patient is not in the hospital. CPT codes 90922, 90923, 90924, and 90925 will be considered inactive for Medicare because they are now redundant as other codes are to be used by physicians billing for services to ESRD patients.

The new G codes are as follows:
G0324-End stage renal disease (ESRD) related services for home dialysis (less than full month), per day; for patients under two years of age.

G0325-End stage renal disease (ESRD) related services for home dialysis (less than full month), per day;
for patients between two and eleven years of age.

G0326-End stage renal disease (ESRD) related services for home dialysis (less than full month), per day; for patients between twelve and nineteen years of age.

G0327-End stage renal disease (ESRD) related services for home dialysis (less than full month), per day; for patients twenty years of age and over.

For example, if a home dialysis patient is in the hospital for 10 days (counting the calendar day of admission and the calendar day of discharge) and is cared for 20 days in his or her home, then 20 units of the code for the appropriate aged patient is billed.

If a home dialysis patient receives dialysis in a dialysis center or other facility during the month, the physician is still paid the management fee for the home dialysis patient and cannot bill the codes in the range of G0308 through G0319 or CPT codes 90935 or 90937 , even though the physician may see the patient during his/her center dialysis.
Role of Non-Physician Practitioners or Physicians Other Than the MCP

## Physician

We received comments about the role of nonphysician practitioners. It was not clear to the commenters whether visits by these practitioners could count as face-to-face encounters by the MCP physician. The commenters also asked about billing by physicians (for example, a "rounding" physician ór fellow) other than the physician who is billing the monthly capitation rate.

Response: Physicians may utilize nonphysician practitioners: nurse practitioners, physician assistants, and clinical nurse specialists, who are able under the Medicare statute to furnish services that would be physician services if furnished by a physician and who are eligible to enroll in the Medicare program, to deliver some of the visits during the month. The rules for the use of these physician extenders would be consistent with the rules for split/shared evaluation and management visits: The nonphysician practitioners and physician must be in the same group practice or employed by the same employer/entity; and the physician must perform some portion of the service in a face-to-face encounter, in this case one or more visits during the month with the patient. In this situation, to bill the service under the physician's UPIN/PIN, the physician and not the physician extender should be the practitioner to perform the visit with the complete assessment of the patient and to establish the patient's
plan of care. If the nonphysician practitioner is the practitioner who performs the complete assessment and establishes the plan of care, then the MCP service should be billed under the UPIN/PIN of the nurse practitioner, physician assistant, or clinical nurse specialist.

It is also possible for the physician to use another physician to provide some of the visits during the month, but the physician who provides the complete assessment, establishes the patient's plan of care and provides the ongoing management should be the physician who submits the bill for the monthly service. The non-MCP physician must have a relationship with the billing physician such as a partner, employees of the same practice, or supervising physician and fellow doing subspecialty training.

Each practitioner should document in a shared medical record services he/she personally performed. Only one practitioner can bill for the management of the ESRD patient in any month. In addition, when a nonphysician practitioner or a "rounding physician" sees a dialysis patient for management of ESRD, they cannot bill an evaluation and management service for the same patient unless there is a separate, substantial and documented service evaluating the patient for care unrelated to the patient's dialysis.

## Geographic İssues

Commenters indicated that the lack of geographic considerations would negatively impact physicians and patients in rural and some urban settings where physician visits require significant travel time. Extended travel time can make it difficult for physicians to see patients as often as patients can be seen when the physician's office is near the dialysis facility.
Response: We believe that the policy to allow nurse practitioners, physician's assistants, clinical nurse specialists, and other physicians to deliver some of the visits to patients as well as changes in the payment to more accurately reflect non-visit services and the relative value of additional visits will ameliorate these access issues.

## Lack of Clarity Regarding <br> Hospitalization

Commenters noted that the proposed rule did not provide enough detail regarding alternative billing procedures if hospitalization occurs during the month.

Response: For ESRD patients (other than home dialysis patients) who are hospitalized during the month, the physician may bill the code that reflects
the number of face-to-face visits during the month on days when the patient was not in the hospital (either admitted as an inpatient or in observation status).

## Documentation Requirements

Comment: Many commenters asked for clarification regarding the documentation requirements, if any, associated with the new codes.
Response: We have chosen not to include specific documentation guidelines in this rule. Instead, physicians should document what is clinically relevant, including but not limited to the patient's current status and complaints, a clinically appropriate physical examination, assessment of the patient's treatment for ESRD that includes assessment of the adequacy of the dialysis treatment, the status of the patient's vascular access, assessment and treatment of the other conditions associated with ESRD, such as anemia, electrolyte management, and bone density, as well as changes to the patient's management.

## HIPAA Compliance

Comment: A comment was received that HIPAA transaction and code set rules may not be met if these new codes were implemented.

Response: G codes are part of the HCPCS coding system and are in compliance with the HIPAA transaction and code set rules.

## Outpatient Settings

Comment: Commenters asked for additional clarification on whether visits counted toward the MCP can be provided in settings other than the dialysis facility.

Response: The visits for management of ESRD patients may occur in the physician's office, in an outpatient hospital or other outpatient setting or even in the patient's home as well as in the dialysis facility.

## Transient Patients

Comment: Commenters inquired how physicians would deal with visits and related billing for traveling patients who receive their treatment away from their usual site of treatment.
Response: If the physician manages the care of a patient who is receiving treatment away from the patient's usual site of treatment, the physician who bills for managing the care of the patient is still paid according to the number of times the physician has a face-to-face visit with the patient. If the patient is to be away for an extended period of time, the patient would be managed by the physician who has face-to-face visits with the patient, and that physician
would be the one billing for the patient's care management.

## Quality of Care and Outcomes

Comment: Commenters representing the American Osteopathic Association, the American Academy of Family Physicians, the National Coalition for Quality Diagnostic Imaging Services, the American Society for Echocardiography and Focus on Therapeutic Outcomes, Inc., provided information on quality initiatives their respective organizations have undertaken or suggestions for relating quality to payment. The National Kidney Foundation recommended the use of technology and other forms of communication to care for ESRD patients and to support constant attention to quality. In addition, the Society for Interventional Radiology commended our efforts to increase the use of arteriovenous fistulae for vascular access in dialysis patients as part of its National Vascular Access Improvement Initiative, but indicated there might be a need to clarify certain policies. The American Association of Kidney Patients (AAKP) also recommended the establishment of a commission or advisory group with representation of the kidney community that could be charged with recommending proposals to tie reimbursement to outcomes. AAKP stated that although the proposed changes are important, these changes remain a change in process of delivery of care that may improve actual outcomes, rather than a change in actual outcomes, that is, in rehabilitation, morbidity, mortality, and quality of life. MedPAC agreed with CMS that the proposed change to provide incentives for additional nephrologist-dialysis patient interactions may not be the ideal method to improve patient outcomes and to achieve this goal, CMS should partner with the ESRD community and work toward a long-term solution. MedPAC suggested that we investigate and incorporate physician clinical practice guidelines into our payment approach, and measure physician quality directly. MedPAC also suggested that we examine whether physician resources vary based on patient complexity, stating that to the extent that resources do vary, a case-mix adjustment-similar to the one MEDPAC recommended for payment to dialysis facilities in its June 2003 report--would be desirable.
Response: We appreciate the information and suggestions provided by the commenters and will take these into consideration. We plan to investigate the use of new technology to improve the management of ESRD
patients as part of ofur overall focus on quality.

Final Decision-We will create the following G Codes to be used for ESRD patients other than home dialysis, based on the age of the patient and number of visits:

G0308-End Stage Renal Disease (ESRD) related services during the course of treatment, for patients under 2 years of age to include monitoring for the adequacy of nutrition, assessment of growth and development, and counseling of parents; with 4 or more face-to-face physician visits per month.
G0309-End Stage Renal Disease (ESRD) related services during the course of treatment, for patients under 2 years of age to include monitoring for the adequacy of nutrition, assessment of growth and development, and counseling of parents; with 2 or 3 face-to-face physician visits per month.

G0310-End Stage Renal Disease (ESRD) related services during the course of treatment, for patients under 2 years of age to include monitoring for the adequacy of nutrition, assessment of growth and development, and counseling of parents; with 1 face-toface physician visit per month.

G0311-End Stage Renal Disease (ESRD) related services during the course of treatment, for patients between 2 and 11 years of age to include monitoring for the adequacy of nutrition, assessment of growth and development, and counseling of parents; with 4 or more face-to-face physician visits per month.

G0312-End Stage Renal Disease (ESRD) related services during the course of treatment, for patients between 2 and 11 years of age to include monitoring for the adequacy of nutrition, assessment of growth and development, and counseling of parents; with 2 or 3 face-to-face physician visits per month.

G0313-End Stage Renal Disease (ESRD) related services during the course of treatment, for patients between 2 and 11 years of age to include monitoring for the adequacy of nutrition, assessment of growth and development, and counseling of parents; with 1 face-to-face physician visit per month.

G0314-End Stage Renal Disease (ESRD) related services during the course of treatment, for patients between 12 and 19 years of age to include monitoring for the adequacy of nutrition, assessment of growth and development, and counseling of parents; with 4 or more face-to-face physician visits per month.
G0315-End Stage Renal Disease (ESRD) related services during the
course of treatment, for patients between 12 and 19 years of age to include monitoring for the adequacy of nutrition, assessment of growth and development, and counseling of parents; with 2 or 3 face-to-face physician visits per month.

G0316-End Stage Renal Disease (ESRD) related services during the course of treatment, for patients between 12 and 19 years of age to include monitoring for the adequacy of nutrition, assessment of growth and development, and counseling of parents; with 1 face-to-face physician visit per month.
G0317-End Stage Renal Disease (ESRD) related services during the course of treatment, for patients 20 years of age and over; with 4 or more face-toface physician visits per month.

G0318-End Stage Renal Disease (ESRD) related services during the course of treatment, for patients 20 years of age and over; with 2 or 3 face-to-face physician visits per month.

G0319-End Stage Renal Disease (ESRD) related services during the course of treatment, for patients 20 years of age and over; with 1 face-to-face physician visit per month.

In addition we have created the following G codes for home dialysis patients:

G0320-End stage renal disease (ESRD) related services for home dialysis patients per full month; for patients under two years of age to include monitoring for adequacy of nutrition, assessment of growth and development, and counseling of parents.

G0321-End stagie renal disease (ESRD) related services for home dialysis patients per full month; for patients two to eleven years of age to include monitoring for adequacy of nutrition, assessment of growth and development, and counseling of parents.

G0322-End stage renal disease (ESRD) related services for home dialysis patients per full month; for patients twelve to nineteen years of age to include monitoring for adequacy of nutrition, assessment of growth and development, and counseling of parents.

G0323-End stage renal disease (ESRD) related services for home dialysis patients per full month; for patients twenty years of age and older.

G0324-End stage renal disease (ESRD) related services for home dialysis (less than full month), per day; for patients under two years of age.

G0325-End stage renal disease (ESRD) related services for home dialysis (less than full month), per day; for patients between two and eleven years of age.

G0326-End stage renal disease (ESRD) related services for home dialysis (less than full month), per day; for patients between twelve and nineteen years of age.

G0327-End stage renal disease (ESRD) related services for home dialysis (less than full month), per day; for patients twenty years of age and over.

## 6. Miscellaneous Coding Issues

## Bioimpedance

Comment: We received several comments concerning the pricing of CPT code 93701, electrical bioimpedance. One commenter, a carrier medical director, requested that this service be considered a technical component service as there is no physician work (professional component) required to produce the results. The commenter referenced the RUC recommendation of 0.00 work that was not accepted by CMS in November 2001. Other commenters stated that pricing of this service should be revisited and the American College of Cardiology recommended work component of 0.25 RVUs be accepted. Commenters also questioned the valuation of the practice expense component, particularly in light of the escalating costs associated with this service.

Response: In next year's final rule we will be accepting recommendations for codes to be considered under the fiveyear review of work that will occur in 2005. The commenters will be able to respond to that solicitation, and submit this CPT code, as well as any other services they believe need to be reviewed to ensure they are appropriately valued. We are currently in the process of reviewing and obtaining updated pricing for equipment contained in the practice expense data files and proposed changes to pricing for equipment will be included in next year's proposed rule. We would suggest that the commenters review this information when published to ensure that the cost of the equipment is accurately reflected in the database.

## Ablation Procedures

Comment: One commenter, a manufacturer, suggested that the work RVUs of certain codes for the ablation of liver tumors (CPT codes 47380, 47370 and 47382) appeared to be undervalued.

Response: As discussed in the previous response, in next year's final rule we will be accepting recommendations for codes to be considered under the five-year review of work that will occur in 2005. The
cominenter will be able to respond to that solicitation and submit these codes, as well as any additional services they believe need to be reviewed to ensure they are appropriately valued.

## Stereotactic Radiosurgery and Stereotactic Radiotherapy

Comment: Two commenters requested that HCPCS codes G0173 and G0251, which are used for reporting stereotactic radiotherapy and stereotactic radiosurgery under the hospital outpatient prospective payment system, be activated for payment under the physician fee schedule.

Response: We are reluctant to establish payment for these services under the physician fee schedule at this time absent specific information on freestanding centers providing this service. We would welcome information and data from these commenters, and other individuals and providers, on the provision of these services in freestanding centers so that we can fully evaluate this issue.

## Creation of G Codes

Comment: The AMA and several specialty organizations expressed concern about the establishment of the numerous $G$ codes that were contained in the proposed rule. The commenters state that continual development of G codes, without consultation with the CPT Editorial Panel, the RUC or the physician community undermines the annual review process that CMS has established in the final rule. Further, the commenters argue that the establishment of G Codes undermines the requirements of the Health Insurance Portability and Accountability Act (HIPAA) for coding standardization and an open process for establishing codes.

Response: As we have stated in previous rulemaking, it is sometimes necessary to develop G codes to accommodate changes in legislation, regulation, coverage, and payment policy. We appreciate the input of the medical community and to the extent possible, will work with the CPT Editorial Panel, the RUC and the physician community prior to establishment of these codes.

## Pain Management

Comment: The American Society of Interventional Pain Management commented on the differences in payment allowances for various pain management services and other nonpain management services furnished in conjunction with pain management services in various settings, including
the physician's office, the OPD and the ASC.
Response: In accordance with the law, we have established payment rates for office-based procedures, using the nonfacility practice expense relative value units. However, the office does not represent a practice site where these services are usually performed.

Medicare payment under the physician fee schedule for the physician work is the same in all practice settings. However, the practice expenses are reimbursed differently depending on the practice site. Practice expenses associated with procedures performed in the outpatient departments (OPDs) or ambulatory surgical centers (ASCs) are paid under the OPD or ASC payment system respectively. Practice expenses associated with procedures performed in the physician's office are paid through the physician fee schedule payment system.

## III. Other Issues

## A. Definition of Diabetes for Diabetes Self-Management Training

In the August 15, 2003 rule we proposed to adopt the definition of diabetes used to determine beneficiary eligibility for Medical Nutrition Therapy (MNT) for purposes of coverage for outpatient diabetes self-management training when the beneficiary has a diagnosis of diabetes. Specifically, we stated that the criteria currently set forth at $\S 410.141$ (d), would be replaced with definition of diabetes used for medical nutrition therapy at $\$ 410.130$ which reads as follows:
Diabetes means diabetes mellitus consisting of two types. Type 1 is an autoimmune disease that destroys the beta cells of the pancreas, leading to insulin deficiency. Type 2 is familial hyperglycemia that occurs primarily in adults but can also occur in children and adolescents. It is caused by an insulin resistance whose etiology is multiple and not totally understood. Gestational diabetes is any degree of glucose intolerance with onset or first recognition during pregnancy. The diagnostic criterion for a diagnosis of diabetes for a fasting glucose intolerance test is greater than or equal to 126 mg / dL.

A technical error in the proposed rule on page 49070, placed the revised eligibility requirements in $\S 410.141(f)$. The eligibility requirements will replace those currently in §410.141(d).

Comment: We received comment noting that the language for the actual regulatory language had the wrong section letter.

Response: As noted above, this was a technical error.

Final Decision: The following language will replace what was in the proposed rule. "Section 410.141 is amended by replacing paragraph (d) to read as follows: $\S 410.141$ Outpatient. diabetes self-management training. (d) Beneficiaries who may be covered. Medicare Part B covers outpatient diabetes self-management training for a beneficiary who has been diagnosed with diabetes."

Cominent: The comments were very supportive of our efforts to streamline this requirement. Several commenters recommended that the definition of diabetes be revised to include patients who might not be classified as Type 1, Type 2, or gestational diabetes in the definition. Most commenters recommended the use of a fasting glucose test of greater than or equal to $126 \mathrm{mg} / \mathrm{dL}$. One commenter suggested the measurement be taken on two occasions. Most commenters also recommended the addition of a random glucose test of greater than $200 \mathrm{mg} / \mathrm{dL}$, with one commenter adding with symptoms of uncontrolled diabetes. Several commenters suggested use of an abnormal glucose tolerance test (GTT). One commenter also suggested the use of a 2 hour post-glucose challenge of greater than or equal to $200 \mathrm{mg} / \mathrm{dL}$ test on two different occasions. The American Association of Clinical Endocrinologists (AACE) also suggested that coverage of medical nutrition therapy be expanded to those with impaired fasting glucose.
Response: The definition of diabetes used in the MNT regulation was based on language found in the 2000 Institute of Medicine report entitled, "The Role of Nutrition in Maintaining Health in the Nation's Elderly. We did not have any other generally recognized definition of diabetes at that time and did not intend to limit our definition of diabetes. Regarding the laboratory tests, the characteristics of the commenters' suggestions are generally the same. The base measurement that is already in our MNT regulation, a fasting glucose of 126 $\mathrm{mg} / \mathrm{dL}$, is a common measure. Three commenters also noted the use of 200 $\mathrm{mg} / \mathrm{dL}$ for a random glucose test. The major variation between the commenters was that one suggested multiple measurements. Also, we note that patients with an impaired fasting glucose level do not necessarily meet any of the popular definitions of diabetes.

Final Decision: We agree that in some ways our proposed definition may not include some patients diagnosed with diabetes. We also agree that our clinical
laboratory measurements used to determine the presence of diabetes should be expanded. The definition provided by AACE appears to meet the clinical concerns of the medical community and our concerns that no individuals have their treatments delayed unduly if they have obvious symptoms of uncontrolled diabetes. Therefore, we are adopting their clinical definition. We will also broaden our general language to include diabetes of other types. Our final language will be,
"Diabetes is diabetes mellitus, a condition of abnormal glucose metabolism diagnosed using the following criteria: A fasting blood sugar greater than or equal to $126 \mathrm{mg} / \mathrm{dL}$ on two different occasions; a 2 hour postglucose challenge greater than or equal to $200 \mathrm{mg} / \mathrm{dL}$ on 2 different occasions; or a random glucose test over 200 mg / dL for a person with symptoms of uncontrolled diabetes." We will also make a conforming amendment to 410.130 for MNT. However, we are constrained from covering MNT for anyone who is not diagnosed with diabetes by the section $1861(\mathrm{~s})(2)(\mathrm{V})$ of the Act that limits coverage of MNT to beneficiaries with diabetes or renal disease.
Outpatient Therapy Services Performed "Incident To" Physicians" ServicesDiscussion Only

In almost all settings, our regulations specify that outpatient therapy services can be delivered only by qualified physical therapists, occupational therapists, physical therapy assistants, occupational therapy assistants, and speech-language pathologists as defined by $\S 484.4$. Section $1862(\mathrm{a})(20)$ of the Act requires that any therapy services furnished incident to a physician's professional services must meet the standards and conditions that would apply to such therapy services if they were furnished by a therapist, with the exception of the licensing requirement. While there are currently no national standards for qualifications of individuals providing outpatient therapy services incident to physicians' services, we believe that standards similar to those in §484.4 are appropriate. In the proposed rule, we stated that we are considering adopting the existing qualification and training standards (with the exception of licensure) in § 484.4 for individuals providing therapy services independently and incident to physicians' services. While we did not propose a change at this time, we requested comments from the public, particularly physicians and staff who would be affected, on adoption of the
existing standards in §484.4, for services of independent therapists and "incident to" services, as well as comments regarding alternatives that we might use to ensure that qualified staff are providing "incident to" therapy services.

We received comments from major therapy organizations and individual therapists representing therapy services, physician organizations and individual physicians and associations and individuals representing other health care professionals, such as athletic trainers, kinesiotherapists and exercise physiologists. A wide spectrum of views was expressed by these commenters. Commenters representing therapists were supportive of establishing consistent training standards in all settings, while physicians favored reliance on the individual physician for quality control. The non-therapist health care providers were concerned about their role in providing therapy services and cardiac rehabilitation and pulmonary service providers were concerned that their services might be affected.
We will review and consider these comments as we determine whether to make a future proposal. Meanwhile, contractors may continue to develop local medical review policies that are consistent with the statute, applying to physical therapy, occupational therapy and speech-language pathology services the same standards and conditions that would apply to such therapy services if they were furnished by an independent therapist, with the exception of the licensing requirement.
D. Status of Anesthesia Work and FiveYear Review

In the December 2002 final rule, we modestly increased the work of anesthesia services. These changes were based on the analysis submitted by the RUC of its review of the work of 19 high volume anesthesia codes. The RUC had provided us with its analysis but did not furnish us with a definitive recommendation. The increase in anesthesia work resulted in an increase in the national anesthesia conversion factor. (We increased the physician work component of the anesthesia conversion factor by 2.10 percent to reflect a 9.13 percent increase in anesthesia work applied to 23 percent of anesthesia allowed charges represented by the 19 codes. As a result of this increase, we applied a 1.6 percent increase to the anesthesia CF.) The American Society of Anesthesiologists expressed concern about the completeness of the review of anesthesia codes under the five-year
review. Therefore, in February 2003 we asked the RUC to continue its review of anesthesia work values so that we could develop a final recommendation for a change in the anesthesia CF involving all anesthesia codes. In the proposed rule we stated we were waiting on the RUC's response to our request.

The RUC has spent a considerable amount of effort of studying this issue. The RUC's anesthesia workgroups consisted of a range of physician specialists, including various surgical specialists, who have knowledge about the anesthesia services studied. As a result of their review, the RUC approved and presented the following recommendations to CMS:

1. The RUC position is that the 5 -year review has been completed.
2. The RUC anesthesia workgroup analysis only applies to the 19 anesthesia codes and associated 19 surgical codes.
3. The Workgroup recommendations to the RUC stated that there are structural differences between the anesthesia coding system and the remainder of the physician coding system, which contributes to the difficulties in making extrapolations to. the entire set of anesthesia services. Among other things, the workgroups and the RUC were concerned that the anesthesia codes cover too large a number of surgical codes making it necessary to examine surgical codes within the anesthesia code, and the 19 selected anesthesia codes may not be the most representative codes.

The ASA disagrees with the RUC's recommendations and asked that we extrapolate from the 19 surveyed procedures to all anesthesia codes.

## Decision

When we developed the 2002 final physician fee schedule rule on the second five-year review, one of our concerns was that the RUC's initial findings were not presented as specific recommendations. We wanted to pursue approaches consistent with RUC recommendations. Therefore, in early 2003, we asked the RUC to more clearly present their recommendations.

Based on our review of the history and analysis of this issue and the final recommendation of the RUC, we have decided not to extrapolate from the surveyed procedures to the entire universe of anesthesia procedures; we will make no further adjustments to anesthesia work under the second fiveyear review.

## Payment Policies for Anesthesia Services

There are differences in Medicare payment policies between a teaching anesthesiologist involved with two concurrent cases with residents and a teaching CRNA involved with two concurrent cases with student nurse anesthetists.

Currently, if a teaching anesthesiologist is involved with two concurrent cases with anesthesia residents, the medical direction rules apply. Payment for the physician's medical direction is based on 50 percent of the allowance otherwise allowed if the anesthesiologist performed the anesthesia case alone.

For anesthesia services furnished prior to July 1, 2002, we allowed full payment if a non-medically directed certified registered nurse anesthetist (CRNA) supervised a single case involving a student nurse anesthetist. No payment was made if the teaching CRNA supervised two cases involving student nurse anesthetists. In August 2002, we released the Medicare Carriers Manual Transmittal 1766 relating to the involvement of a non-medically directed teaching CRNA with two student nurse anesthetists. The American Association of Nurse Anesthetists (AANA) noted that their standards for approved nurse anesthesia training programs allow the teaching CRNA to supervise two concurrent cases involving student nurse anesthetists. The new policy allows the teaching CRNA to be paid, for his/her involvement with two concurrent cases with student nurse anesthetists, but not at the full fee level. If a teaching CRNA is involved with two concurrent cases with student nurse anesthetists, payment may be based on the base unit plus the time that the teaching CRNA is present with the student nurse anesthetist. To bill the base unit, the teaching CRNA must be present with the student nurse anesthetist throughout the pre- and post-anesthesia care. This payment per case is usually higher than the 50 percent paid to the teaching anesthesiologist for medically directing resident cases.

In the proposed rule, we asked for comments on the appropriateness of applying the CRNA teaching/resident policy to teaching anesthesiologists.

Comment: The American Association of Nurse Anesthetists commented that it was unclear how the new rule for teaching anesthesiologists would operate with the medical direction rules, particularly if there were more than two concurrent anesthesia cases.

Response: The new policy for teaching anesthesiologists would apply only when there are two concurrent cases, and the cases involve residents. The medical direction payment policy would continue to apply, as it has previously, for three or four concurrent anesthesia cases regardless of the qualified individual (for example, CRNA, resident, or anesthesiologist assistant) who is administering and monitoring anesthesia under the physician's medical direction.

Comment: The ASA requested that the teaching anesthesiology payment regulations be revised so that the teaching anesthesiologists be paid in a similar manner to teaching surgeons. Under the teaching physician rules, the teaching surgeon can be paid the full fee for each of two overlapping surgeries involving residents. The ASA understands that such a proposal would require a revision to Medicare regulations and would require rulemaking.
The ASA requested that, at least, in the interim, we allow teaching anesthesiologists to be paid similarly to teaching CRNAs for two concurrent cases. However, ASA specifically requested that this policy be used in addition to the current medical direction payment policy. In other words, the ASA wants the teaching anesthesiologist to be able to choose case-by-case, whether to seek payment similar to the teaching CRNA (that is, full base units and time units based only on actual presence with the resident) or based on the medical direction rules (that is, 50 percent of the full base and time units).

According to the ASA, a number of anesthesiology department heads believe the nurse anesthesia payment rule is not appropriate to the teaching of already-licensed physicians. They question the need for the teaching physician to participate in the pre- and post-op anesthesia care (to obtain full base units), they think that participation of the teaching anesthesiologist in the key portions of the procedure is far more important than the number of minutes present with the resident (which is the relevant consideration under the teaching physician policy for a single case with a resident).

## Response and Final Decision

We have decided to allow teaching anesthesiologists to bill, similarly to teaching CRNAs, for their involvement in two concurrent cases involving residents. This will apply to anesthesia services furnished on or after January 1, 2004.

The anesthesiologist can bill base units and actual time, based on the amount of time the physician is present with the resident during each of two concurrent cases. To bill base units, the physician must be present with the resident during the pre- and postanesthesia care included in the base units. If the physician is not present with the resident during the pre- and post-anesthesia care, the physician may bill the case as a medically directed case.

The anesthesiologist must document his/her involvement in cases with anesthesia residents. The documentation must be sufficient to support the payment of the fee and available for review upon request. We have revised $\S 414.46$ to incorporate this change.

## F. Technical Correction

CPT Code 96155 (Health and behavior intervention, each 15 minutes,face-toface; family (without the patient present))
This code describes a visit with a patient's family without the patient being present and was first included in the November 1, 2001 final rule. It was incorrectly listed as an active code for which payment could be made under the physician fee schedule. Our longstanding payment policy is that we do not pay for visits with family where the patient is not present. Payment for such visits is included in the pre- and post-service work of a visit where the patient is present. Consistent with this policy, this code is not payable under the physician fee schedule.

Comment: A few commenters urged us to continue to list this code as an active code under the fee schedule as they do not agree with our policy. The commenters do not agree with our assertion that payment for such visits is included in the pre- and post-service work of a visit when the patient is present and believe that not covering the service could result in diminished quality of care. One commenter disagreed that this was a technical correction since this code is currently being paid for under the fee schedule.

Response: As we indicated in the proposed rule, this was erroneously listed as an active code, contrary to longstanding Medicare policy. To be consistent with our policy, no payment may be made for this service under Medicare, and the code will be assigned a status indicator of " N ".

## G. Incomplete Screening Colonoscopy

Section 1834(d)(3) of the Act requires that the payment amount for a screening colonoscopy be set at the level for a
diagnostic colonoscopy. We have established RVUs for an incomplete diagnostic colonoscopy (CPT code 45378-53) However, an incomplete screening colonoscopy (HCPCS G0105 with modifier '53' or HCPCS G0121 with modifier ' 53 ') is currently carrier priced. To make payment for screening colonoscopy consistent with payment for a diagnostic colonoscopy, effective January 1, 2004, Medicare will make payment for an incomplete screening colonoscopy, HCPCS G0105 with modifier '53' and HCPCS G0121 with modifier ' 53 ', at the same rate as an incomplete diagnostic colonoscopy (CPT 45378-53). The Medicare carriers will no longer manually price the practitioner payment for an incomplete screening colonoscopy.

## H. Publication Issues

Comment: Several commenters noted that section 1871 of the Act requires a 60-day public comment period. Such period traditionally starts with the date the proposed rule is published in the Federal Register. However, for the Physician Fee Schedule Proposed rule, CMS began the start of the 60 -day comment period on August 8, the date the proposal was put on display at the Federal Register, rather than August 15, the date the proposal was published in the Federal Register. The commenters request that CMS revert to the traditional start of the comment period, that is, the date of publication in the Federal Register. One commenter suggested that CMS should accept electronically submitted comments when the comment period begins earlier than the publication date.
In addition, several commenters urged CMS to resolve the process issues associated with publishing the proposed and final rule. They indicated that the delayed publication of the proposed rule, combined with missing information from addendums and impact tables, makes review and analysis problematic. The commenters also expressed concern that CMS has insufficient time to evaluate public comments and this is contrary to the spirit of the Administrative Procedures Act.
Response: CMS is keenly aware of the tight time frame between publication of the proposed and final rules. We make every effort to respond to requests from physician specialty groups and providers to include items in the proposed rule that affect payment levels, such as assigning RVUs to new CPT codes and revising RVUs for existing codes. It is difficult to both address numerous concerns and publish the proposed rule in a timely fashion.

We will continue to make every effort to publish the proposed rule as early as possible. However, despite the short time frame for issuing the final rule, we take the review and analysis of comments very seriously. CMS devotes the necessary staff resources to ensure that every comment is properly considered.
Furthermore, the statute does not provide that the comment period commences with publication in the Federal Register. Section 1871(b)(1) of the Act states that before issuing a regulation in final form, "the Secretary shall provide for notice of the proposed regulation in the Federal Register and a period of not less than 60 days for public comment thereon." While the proposed rule did not actually appear in the Federal Register until August 15, 2003, it was filed and went on public display at the Federal Register several days earlier on August 8, 2003. Accordingly, the contents of the proposed rule were, in fact, publicly available for the full 60-day comment period.

## IV. Refinement of Relative Value Units

 for Calendar Year 2004 and Response to Public Comments on Interim Relative Value Units for 2003A. Summary of Issues Discussed Related to the Adjustment of Relative Value Units

Section IV.B of this final rule describes the methodology used to review the comments received on the RVUs for physician work and the process used to establish RVUs for new and revised CPT codes. Changes to codes on the physician fee schedule reflected in Addendum B are effective for services furnished beginning January 1,2004 . The tables and discussions in this section concerning the work RVUs do not reflect the effect of the adjustment to work RVUs to match the MEI weights as discussed in section VI. The referenced work RVUs may differ from the work RVUs in Addenda B and $C$ that reflect this adjustment.

## B. Process for Establishing Work

 Relative Value Units for the 2004 Physician Fee ScheduleOur December 31, 2002 final rule (67 FR 79966) announced the final work RVUs for Medicare payment for existing procedure codes under the physician fee schedule and interim RVUs for new and revised codes. The RVUs contained in the final rule applied to physician services furnished beginning March 1, 2003. We announced that we considered the RVUs for the interim codes to be subject to public comment under the
annual refinement process. In this section, we summarize the refinements to the interim work RVUs published in the December 2002 final rule and our establishment of the work RVUs for new and revised codes for the 2004 physician fee schedule.

## C. Work Relative Value Unit Refinements of Interim Relative Value Units

1. Methodology (Includes Table titled "Work Relative Value Unit Refinements of the 2003 Interim and Related Relative Value Units")
Although the RVUs in the December 2002 final rule were used to calculate 2003 payment amounts, we considered the RVUs for the new or revised codes to be interim. We accepted comments for a period of 60 days. We received substantive comments from many individual physicians and several specialty societies on approximately 10 CPT codes with interim work RVUs. Only comments on codes listed in Addendum C of the December 2002 final rule were considered.

To evaluate these comments we used a process similar to the process used in 1997. (See the October 31, 1997 final rule ( 62 FR 59084) for the discussion of refinement of CPT codes with interim work RVUs.) We convened a multispecialty panel of physicians to assist us in the review of the comments. The comments that we did not submit to panel review are discussed at the end of this section, as well as those that were reviewed by the panel. We invited representatives from the organization from which we received substantive comments to attend a panel for discussion of the code on which they had commented. The panel was moderated by our medical staff, and consisted of the following voting members:

- One or two clinicians representing the commenting organization.
- One primary care clinician nominated by the American College of Physicians/American Society of Internal Medicine.
- Four carrier medical directors.
- Four clinicians with practices in related specialties, who were expected to have knowledge of the service under review.

The panel discussed the work involved in the procedure under review in comparison to the work associated with other services under the physician fee schedule. We assembled a set of 300 reference services and asked the panel members to compare the clinical aspects of the work of the service a commenter believed was incorrectly valued to one
or more of the reference services. In compiling the set, we attempted to include-(1) services that are commonly performed whose work RVUs are not controversial; (2) services that span the entire spectrum from the easiest to the most difficult; and (3) at least three services performed by each of the major specialties so that each specialty would be represented. The intent of the panel process was to capture each participant's independent judgment based on the discussion and his or her clinical experience. Following the discussion, each participant rated the work for the procedure. Ratings were individual and confidential, and there was no attempt to achieve consensus among the panel members.

We then analyzed the ratings based on a presumption that the interim RVUs were correct. To overcome this presumption, the inaccuracy of the interim RVUs had to be apparent to the broad range of physicians participating in each panel.

Ratings of work were analyzed for consistency among the groups represented on each panel. In addition, we used statistical tests to determine
whether there was enough agreement among the groups of the panel and whether the agreed-upon RVUs were significantly different from the interim RVUs published in Addendum C of the December 2002 final rule. We did not modify the RVUs unless there was a clear indication for a change. If there was agreement across groups for change, but the groups did not agree on what the new RVUs should be, we eliminated the outlier group and looked for agreement among the remaining groups as the basis for new RVUs. We used the same methodology in analyzing the ratings that we first used in the refinement process for the 1993 physician fee schedule. The statistical tests were described in detail in the November 25, 1992 final rule (57 FR 55938).

Our decision to convene multispecialty panels of physicians and to apply the statistical tests described above was based on our need to balance the interests of those who commented on the work RVUs against the redistributive effects that would occur in other specialties.

We also received comments on RVUs that were interim for 2003, but for
which we did not submit the RVUs to the panel for review for a variety of reasons. These comments and our decisions on those RVUs commented upon are discussed in further detail below.

The table below lists those interim codes reviewed under the refinement panel process described in this section. This table includes the following information:

- CPT Code. This is the CPT code for a service.
- Description. This is an abbreviated version of the narrative description of the code.
- 2003 Work RVU. The work RVUs that appeared in the December 2002 rule are shown for each reviewed code.
- Requested Work RVU. This column identifies the work RVUs requested by commenters.
- 2004 Work RVU. This column contains the final RVUs for physician work. (These work RVUs may differ from the work RVUs in Addenda B that reflect the adjustment to work RVUs to match the MEI weights.)
table 4.-Codes Reviewed Under the Refinement Panel Process

| CPT code ${ }^{1}$ | Mod | Descriptor | $\begin{gathered} 2003 \text { work } \\ \text { RVU } \end{gathered}$ | Requested work RVU | $2004 \text { work }$ RVU |

${ }^{1}$ All CPT codes and descriptions copyright 2003 American Medical Association. All rights are reserved and applicable FARS/DFARS clauses apply.

The work RVUs for these codes were revised for 2003 by CMS to finalize outstanding issues related to the five-year review of the gastroenterology codes.

## 2. Interim 2003 Codes

CPT code 17310 Chemosurgery (Mohs micrographic technique) including removal of all gross tumor, surgical excision of tissue specimens, mapping, color coding of specimens, microscopic examination of specimens by the surgeon, and complete histopathological preparation including the first routine stain (e.g. hematoxylin and eosin, toluidine blue); each additional specimen after the first 5 specimens, fixed or fresh tissue, any stage (List separately in addition to code for primary procedure).
Prior to 2003, this code was reported once for all specimens over five generated during a particular stage of

Mohs surgery. Beginning in 2003, the code is used to report each specimen over five during a particular stage of Mohs surgery. The RUC recommended maintaining 0.95 work RVUs for this code as an interim value. We disagreed and assigned a work value of 0.62 work RVUs to this code pending further recommendations from the RUC. We believed this value was appropriate for the new descriptor since it allows reporting of CPT code 17310 for each specimen rather than reporting once for all specimens. It also places this code in the correct rank with the other Mohs surgery services, CPT codes 1730417307, and with the codes for pathology
consultation during surgery, CPT codes 88331 and 88332.
Commenters disagreed with the rationale we had used to arrive at the interim work value and indicated that we used inappropriate time/intensity data and failed to include surgery work, focusing only on pathology work. Commenters also stated that the intent of this code has not changed and that CMS had ignored past policy which recognizes CPT code 17310 as an addon service and thus allows the separate billing of services for each additional specimen beyond the first five. Based on these comments, we referred this code to the multispecialty validation panel for review.

Final decision: As a result of the statistical analysis of the 2003 multispecialty validation panel ratings, we have assigned 0.95 work RVUs to CPT code 17310.
CPT Code 38204 Management of recipient hematopoietic progenitor cell donor search and cell acquisition.

We disagreed with the RUC recommendation of 2.00 work RVUs for CPT code 38204. We believed we are already making payment for any physician work associated with this service as part of our payment for other bone marrow transplant codes (that is, CPT codes 38205, 38206, 38240, 38241, and 38242) and have significant concerns about how this code would be used in actual practice. Therefore, we assigned CPT code 38204 a status indicator of " B ," meaning that we will not make separate payment for this service.

Comments: Some commenters urged us to reconsider the RUC recommendation. In addition, the RUC submitted a comment disagreeing with our contention that the physician work associated with this code is included in other transplant codes. The RUC also asserted that discussions of this issue at the RUC meetings provided substantive information on how this code would be used.

Response: We continue to believe that the work of this service is contained in other transplant codes and are maintaining the status indicator of "B." Therefore, we will not make separate payment for this service.
CPT Codes 43219 Esophagoscopy, rigid or flexible; with insertion of plastic tube or stent, 43256 Upper gastrointestinal endoscopy including esophagus, stomach, and either the duodenum and/or jejunum as appropriate; with transendoscopic stent placement (includes predilation), and 44383 Ileoscopy, through stoma; with transendoscopic stent placement (includes predilation).

As explained in the December 31, 2002 final rule, the work RVUs for these codes were revised by CMS to finalize outstanding issues related to the fiveyear review of the gastroenterology codes. For CPT code 43219, we maintained the work RVU of 2.80 . Review of information supplied by specialty societies did not provide compelling evidence that the work RVUs should be changed. Based on a review of the physician time data and a comparison to other stent placement codes, we assigned 4.35 work RVUs to CPT code 43256 and 2.94 work RVUs to CPT code 44383 , in order to place these
services in proper rank order to the other stent placement codes.
Comment: Some commenters felt that we improperly intervened in assigning work RVUs to these services albeit to correct rank order anomalies. Based on these comments we referred these codes to the multispecialty validation panel for review.
Response: As a result of the statistical analysis of the 2003 multispecialty validation panel ratings, we are retaining work RVUs of 2.80 for CPT code 43219, 4.35 for CPT code 43256 and 2.94 for CPT code 44383.

CPT code 45335 Sigmoidoscopy, flexible; with directed submucosal injections any substance.

The RUC recommended work RVUs of 1.46 for CPT code 45335 based on a comparison to CPT code 45330, with incremental work RVUs added to reflect increased pre-, intra-, and post-service work. We disagreed with the RUC recommendation and compared this service to the analysis and recommendation provided by the RUC for CPT code 43201, which is also a new submucosal injection code. Based on the increased risk of complications (resulting in higher intra-service intensities) and the fact that several sites are being injected instead of one, we assigned a work RVU of 1.36 to CPT code 45335.

## Comment: Some commenters

 expressed concern about the rejection of the RUC recommendation for this service and believed that we had misinterpreted the RUC findings.Response: Upon further review and consideration of the RUC recommendation we will accept the RUC recommended work RVU of 1.46 for this service.

CPT Code 45340 Sigmoidoscopy, flexible; with dilation by balloon, each stricture.
The RUC recommended a work RVU of 1.96 for this code, which includes 1.00 RVU for the incremental work based on the need for conscious sedation to perform this procedure. (Other flexible sigmoidoscopies do not require conscious sedation.) In the December 31, 2002 rule we stated that we did not believe it is appropriate to assign a work RVU for CPT code 45340 that is based on the presumption that a portion of the work value is for the provision of conscious sedation. Rather, we compared the RUC recommendations for work and physician time for other endoscopic dilation codes to the incremental times for CPT code 45340 and assigned a work RVU of 1.66 to CPT code 45340.
Comment: Some commenters urged us to accept the RUC recommendation,
noting that our characterization of RUC recommendations on conscious sedation was inaccurate. The commenters stated that the RUC has concluded that there is an increase in the amount of physician work relating to conscious sedation, but has been unable to identify a specific numerical value for that additional increment. The RUC is in the process of determining the universe of codes that include conscious sedation as an inherent part of the service provided by the operating physician to ensure these services are appropriately valued. Based on these comments we referred this code to the multispecialty validation panel for review.

Response: As a result of the statistical analysis of the 2003 multispecialty validation panel ratings, we have assigned 1.89 work RVUs to CPT code 45340.

CPT Code 51798 Measurement of post-voiding residual urine and/or bladder capacity by ultrasound, nonimaging.

The RUC recommended 0.38 work RVUs based on a urology survey that reported that this procedure is performed 75 percent of the time by the physician and also based on a comparison of this procedure to CPT code 76857, Ultrasound, pelvic (nonobstetric, B-scan and/or real time with image documentation; complete. We disagreed. This code is replacing a HCPCS level two code that was assigned 0.00 work RVUs because it is typically performed by a nurse or other clinical staff. We believed that CPT code 51798 is, therefore, also a nonphysician service and assigned 0.00 work RVUs to this service.

Comment: Some commenters requested that we reconsider our decision to assign 0.00 work RVUS to this service. The commenters argued that our reason for disagreeing with the RUC recommendation is based on a stated belief that there is no physician work involved, not on actual survey data as presented by the American Urological Association (AUA) and accepted by the RUC. Commenters urged that CMS work with AUA to review this decision or include this code as part of the multi-specialty validation panel for refinement of work RVUs. Based on these comments, we referred this code to the multispecialty validation panel for review.

Response: As a result of the statistical analysis of the 2003 multispecialty validation panel ratings, we will retain 0.00 work RVUs for CPT code 51798.

CPT Codes 58545-58554
Laproscopic hysterectomy/myonectomy procedures.

We accepted the RUC recommendations fcr work RVUs for these services.

Comment: Some commenters stated that new values have been established for these services based on new survey data and that the RUC has new recommendations for these services. In their comments on the December 31, 2002 rule, the RUC included these new work RVU recommendations and urged us to review these during the refinement process.
Response: We are in agreement with the RUC recommended values for these services. However, to provide an opportunity for public comment we are including these in the RUC
Recommendations for New and Revised codes for 2004 (table xx ) and will consider the RVUs interim for 2004.

CPT code 75954 Endovascular graft placement for repair of iliac artery (e.g. aneurysm, pseudoaneurysm, ateriovenous malformation, trauma) radiological supervision and interpretation.

The RUC agreed with the specialty societies and recommended a value of 2.93 work RVUs based on comparing this code to CPT codes 75952, Endovascular repair of infrarenal abdominal aortic anuerysm or dissection, radiological supervision and interpretation, (work RVU of 4.5) and 75953, Placement of proximal or distal extension prosthesis for endovascular repair of infra renal abdominal aortic aneurysm, radiological supervision and interpretation, (work RVU of 1.36). The recommended RVU was midway between the RVUs of the reference procedures. We did not agree with the RUC recommendation. Based on the specialty societies' description of the work of CPT code 75954 (which is virtually identical to the description of the work for CPT code 75953) and in order to maintain correct rank order in this family of codes, we assigned a work RVU of 1.36 to CPT code 75954.

Comment: Some commenters expressed concern about the rejection of the RUC recommendation, particularly since the recommendation was based on data presented by several specialty societies. The commenters stated that the data reflected the proper rank order of this service and indicated that physicians in those specialties that perform ileac aneurysm endorepair may be in a better position to judge the relationship of this code to other imaging services. Based on these comments, we referred this code to the multispecialty validation panel for review.

Response: As a result of the statistical analysis of the 2003 multispecialty
validation panel ratings, we have assigned 2.25 work RVUs to CPT code 75954.

CPT code 92610 Clinical Evaluation of swallowing function.

In the December 2002 final rule, this CPT code replaced HCPCS code G0195, which had a work RVU of 1.50 in 2002. The Healthcare Professionals Advisory Committee (HCPAC) recommendation of a work RVU of 0.00 for CPT code 92610 was accepted by CMS.
Comment: Some commenters representing the long term care industry expressed concern with the reduction in work for this service. The rule provided no explanation of the HCPAC
recommendation of 0.00 work RVUs for this service and the commenters requested that this issue be addressed.
Response: As requested by the commenters, a discussion of the HCPAC recommendation of 0.00 work RVUS was provided as part of the multispecialty validation panel, which was attended by the commenters.
CPT codes 92613 Flexible fiberoptic endoscopic evaluation of swallowing by cine or video recording; physician interpretation and report only, 92615 Flexible fiberoptic endoscopic evaluation, laryngeal sensory testing by cine or video recording; physician interpretation and report only, and 92617 Flexible fiberoptic endoscopic evaluation of swallowing and laryngeal sensory testing by cine or video recording; physician interpretation and report only.

We did not accept the RUC recommendations for work RVUs for these services ( 0.99 for $92613,0.88$ for 92615 and 1.10 for 92617) and assigned each of these CPT codes a work RVU of 0.00. We stated that these three services refer only to a separately identified physician review and interpretation of the fiberoptic endoscopic evaluation and that we consider this physician interpretation and report bundled into an E/M service. We stated that the physician who does not perform the testing should only bill for the patient when performing an $\mathrm{E} / \mathrm{M}$ service, not as the supervisor of another professional performing and reviewing the initial fiberoptic endoscopic evaluation. The interpretation is an integral part of the testing itself and, if a nonphysician professional has the credentials and experience to perform this testing, then that professional should also provide the interpretation of the findings.

Comment: Some commenters urged us to reconsider the RVUs and payment policies related to these services and to accept the RUC recommendations for
these codes. The commenters asserted that the physician's detailed frame-byframe analysis of the video recorded procedure needed to develop the diagnosis and report following this testing is not related to an $\mathrm{E} / \mathrm{M}$ service. Rather, this is similar to other services where there is a report and interpretation by the physician that is separate from an E/M service. The commenters further stated that the RUC valued each procedure code and physician interpretation and report code separately, based on the coding structure created by CPT. As a result, the interpretation and reporting is separated from each test, and the RUC recommendations do not combine the interpretation with the testing. If the code were to combine the work of interpretation and the testing then the code descriptor would need to be modified and work RVUs revalued. As a final point, commenters disputed our assertion that a nonphysician professional with the credentials and experience to perform this testing should also provide the interpretation of the findings. Based on these comments we referred this code to the multispecialty validation panel for review.

Response: As a result of the statistical analysis of the 2003 multispecialty validation panel ratings, we have assigned 0.71 work RVUs to CPT code 92613; 0.63 work RVUs to CPT code 92615; 0.79 work RVUs to CPT code 92617.

In the December 31, 2002 final rule ( 67 FR 79966), we also responded to the RUC recommendations on the practice expense inputs for the new and revised CPT codes for CY 2003. There were no comments received on these and therefore we are finalizing our proposals.

## Late RUC Recommendations

As we indicated in the August 15, 2003 proposed rule, RUC recommendations for RVUs for 23 new CPT codes for 2003 were received too late for incorporation in the December 31, 2002 final rule. We proposed interim RVUs for these codes and, as with all interim values, these were subject to comment. In their comments on the December 2002 final rule, the AMARUC requested that we consider their late recommendations for these codes during refinement. Several specialties also requested that we consider the late RUC recommendations. We had considered addressing these as part of the refinement process, but determined that we should follow the process used for all RUC recommendations and solicit public comment on the valuation
of these services. Therefore, we are including the RVUs for codes listed in the table below, along with the codes
that are new and revised for 2004, as interim for 2004. Following is a
discussion of those codes for which did not accept the RUC recommendation.

Table 5.-2003 Late RUC Recommendations

| CPT code ${ }^{1}$ | Short descriptor | CMS assigned 2003 work RVU | RUC recommendation | CMS decision | 2004 work RVU |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 21030 ...................... | Excise max/zygoma b9 tumor. | 3.89 | 4.50 | Agree | 4.50 |
| 21040 ...................... | Removal of jaw bone lesion. | 3.89 | 4.50 | Agree | 4.50 |
| 21742 ....................... | Repair sternum/nuss w/ o scope. | (2) | ${ }^{(2)}$ | Agree | ${ }^{(2)}$ |
| 21743 ....................... | Repair sternum/nuss w/ o scope. | ${ }^{(2)}$ | $\left(^{2}\right)$ | Agree | ${ }^{(2)}$ |
| 36511 ....................... | Apheresis wbc ............. | 1.74 | 1.74 | Agree | 1.74 |
| 36512 ....................... | Apheresis rbc .............. | 1.74 | 1.74 | Agree | 1.74 |
| 36513 ....................... | Apheresis platelets ....... | 1.74 | 1.74 | Agree | 1.74 |
| 36514 ....................... | Apheresis plasma ........ | 1.74 | 1.74 | Agree | 1.74 |
| 36515 ....................... | Apheresis, adsorp/reinfuse. | 1.74 | 1.74 | Agree | 1.74 |
| 36516 ....................... | Apheresis, selective ..... | 1.74 | 1.22 | Agree | 1.22 |
| 38207 (Lab Codes) ... | Cryopreserve stem cells. | $\left.{ }^{3}\right)$ | 0.47 | Disagree | $\left.{ }^{4}\right)$ |
| 38210 (Lab Codes) ... | T-cell depletion of harvest. | (3) | 0.94 | Disagree | $\left({ }^{4}\right)$ |
| 38211 (Lab Codes) ... | Tumor cell deplete of harvest. | (3) | 0.71 | Disagree | $\left({ }^{4}\right)$ |
| 38212 (Lab Codes) ... | Rbc depletion of harvest. | $\left.{ }^{3}\right)$ | 0.47 | Disagree | $\left({ }^{4}\right)$ |
| $38213 \text { (Lab Codes) ... }$ | Platelet deplete of harvest. | (3) | 0.24 | Disagree | $\left({ }^{4}\right)$ |
| 38214 (Lab Codes) ... | Volume deplete of harvest. | (3) | 0.24 | Disagree | $\left(^{4}\right)$ |
| 38215 (Lab Codes) ... | Harvest Stem cell concentrate. | (3) | 0.55 | Disagree | $\left({ }^{4}\right)$ |
| 93784 ...................... | Ambulatory BP monitoring. | 0.17 | 0.38 | Agree | 0.38 |
| 93786 ...................... | Ambulatory BP recording. | 0.00 | 0.00 | Agree | 0.00 |
| 93788 ...................... | Ambulatory BP analysis | ${ }^{5}$ ) | 0.00 | Agree | 0.00 |
| 93790 ....................... | Review/report BP recording. | 0.17 | 0.38 | Agree | 0.38 |

[^106]Note : CPT codes 38208, 38209 and 95990 are addressed later in this section (new and revised codes for 2004) and are also included in table 4. Also these work RVUs may differ from the work RVUs in Addenda B and C that reflect the adjustment to match the MEI weights.

CPT codes 38207 Transplant preparation of hematopoietic progenitor cells; cryopreservation and storage, 38210 Transplant preparation of hematopoietic progenitor cells; specific cell depletion within harvest, T-cell depletion, 38211 Transplant
preparation of hematopoietic progenitor cells; tumor cell depletion, 38212 Transplant preparation of hematopoietic progenitor cells; red blood cell removal, 38213 Transplant preparation of hematopoietic progenitor cells; platelet depletion, 38214
Transplant preparation of
hematopoietic progenitor cells; plasma (volume) depletion, 38215 Transplant preparation of hematopoietic progenitor cells; cell concentration in plasma, mononuclear, or buffy coat layer.

We continue to have the same concerns as outlined in the December 31,2002 final rule ( 67 FR 80007) with respect to moving these codes off of the laboratory fee schedule. We are maintaining a status indicator " I " for these services making them not valid for Medicare purposes.

CPT Codes 93784 Ambulatory blood pressure monitoring, utilizing a system such as magnetic tape and/or computer disk, for 24 hours or longer; including recording, scanning analysis, interpretation and report, 93786 Ambulatory blood pressure monitoring, utilizing a system such as magnetic tape and/or computer disk, for 24 hours or longer; recording only, 93788 Ambulatory blood pressure monitoring, utilizing a system such as magnetic tape and/or computer disk, for 24 hours or longer; scanning analysis with report, and 93790 Ambulatory blood pressure monitoring, utilizing a system such as magnetic tape and/or computer disk, for 24 hours or longer; physician review with interpretation and report.

The RUC recommendations for these codes were received too late for inclusion in the 2003 final rule. We had established the following work RVUs for these services during 2002 in response to a national coverage determination: CPT code 93784-0.17 work RVUs; 93786-0.00 work RVUs; 93790-0.17 work RVUs and had indicated that CPT code 93788 was not covered. We stated we would maintain these work RVUs until we receive a RUC recommendation.

Comment: Some commenters urged us to consider the RUC recommendations during the refinement process and also questioned the noncovered status of CPT code 93788. CPT codes 93786 and 93788 are two separate codes for the technical component and the coding format is identical to the coding used for Holter monitoring, which also has two codes for the TC of the service. Commenters also requested that CPT code 93788 be listed as a covered service.
Response: We are accepting the RUC recommendation of 0.38 work RVUs for CPT codes 93784 and 93790 and 0.00 work RVUs for CPT code 93786. We have reviewed the issue of noncoverage of CPT code 93788 and based upon the information provided by the commenters will recognize CPT code 93788 for coverage and payment under the physician fee schedule. We are also accepting the RUC recommendation of 0.00 for CPT code 93788.

We received the following comments on HCPCS codes established in the December 31, 2002 final rule.

GO262 Small intestinal imaging; intraluminal, from ligament of Treitz to the ileocecal valve, includes physician interpretation and report.

We created this code to describe a new diagnostic test for which we will make separate payment under the physician fee schedule. We assigned a work RVU of 2.12 to the code based on a comparison to the work of other diagnostic tests and procedures that require review of significant amounts of data.

Comment: Some commenters stated that that the time we used to establish the work RVU was greatly underestimated and may have been based on a misunderstanding of some of the time data contained in published literature. Based on limited survey data of physicians performing this procedure and comparison to the intensity of other services, commenters recommended a work RVU of 7.80 .

Response: We are deleting HCPCS code G0262 since there is a new CPT code 91110, Gastrointestinal tract imaging, intraluminal (e.g., capsule endoscopy), esophagus through ileum, with physician interpretation and report, which will be used to report this service in 2004 . We note that we accepted the RUC recommendation of 3.65 work RVUs for CPT 91110 . If the commenters do not agree with the valuation of this service they may submit comments on this issue.

GO268 Removal of impacted cerumen (one or both ears) by physician on same date of service as audiologic function testing.

This code was created to allow payment to a physician who removes impacted cerumen on the same date as his or her employed audiologist performs audiologic function testing. We noted that routine removal of cerumen is not paid separately, because it is considered to be part of the procedure with which it is billed (for example, audiologic function testing). This code is to be used only in those unusual circumstances when an employed audiologist who bills under a physician uniform provider identifier number (UPIN) performs audiologic function testing on the same day as removal of impacted cerumen requiring physician expertise for removal. This code should not be used when the audiologist removes cerumen, because removal of cerumen is considered to be part of the diagnostic testing and is not paid separately.

Comment: Commenters stated that creation of this $G$ code was problematic because there could be many other "incident to" services in which a physician performs a separate medically necessary procedure, that, if less extensive, would be considered to be included in a nonphysician provider service. The commenters suggested that a modifier could be used to describe this situation, avoiding the creation of a G code.
Response: We disagree and believe that this is a unique situation that is most appropriately handled through the use of a G code.

GO269 Placement of occlusive device into either a venous or arterial access site, post surgical or interventional procedure (e.g., angioseal plug, vascular plug.)
We created this code due to the inappropriate reporting of this service with codes for such procedures as "blood vessel repair" and "repair of arterial pseudoaneurysm", and indicated that there would be no separate payment for this service as the work, practice expense, and malpractice risk is included in the main invasive procedure.

Comment: Commenters disagreed with the creation of this G code because it is intended to report a service that is a required component of another service and believed that the creation of this code may lead to the creation of many codes for reporting inclusive procedures separately. Some commenters suggested that the creation of parenthetical
instructions in CPT to instruct that "referenced procedures (i.e., blood vessel repair, repair of arterial pseudoaneurysm) would not be appropriately reported in addition to the interventional vascular procedure" would address our concerns. Other comnienters disagreed with our assertion that closure devices are included in the practice expense payment, as such devices are not typically used in every interventional or surgical case. Commenters suggested this code be a technical component service only and have RVUs commensurate with the cost of the device.

Response: As we indicated in the December 31, 2002, final rule, this code was created to address a specific concern about inappropriate reporting of this service using such procedures as "blood vessel repair" and "repair of arterial pseudoaneurysm." Since this service is considered part of the main invasive procedure, to the extent this is typically part of the invasive procedure, it is accounted for under the practice expense methodology. We will continue to consider this code bundled for Medicare purposes, that is, no separate payment will be made under the physician fee schedule.

## GO272 Naso/oro gastric tube

 placement, requiring physician's skill and fluoroscopic guidance (includes fluoroscopy, image documentation and report)We indicated we were creating this code for use until an identical CPT code can become effective. We assigned this code a work RVU of 0.32 .

Comment: Commenters disagreed with the 0.32 value assigned to this service and recommended that we replace the work RVUs with the RUC recommended work value for CPT code 43752.

Response: We are deleting HCPCS code G0272 and CPT code 43752, Nasoor oro-gastric tube placement, requiring physician's skill and fluoroscopic guidance (ificludes fluoroscopy, image documentation and report), will be used to report this service.

GO273 Radiopharmaceutical biodistribution, single or multiple scans on one or more days, pre-treatment planning for radiopharmaceutical therapy of non-Hodgkin's lymphoma, includes administration of radiopharmaceutical (e.g., radiolabeled antibodies) and GO274
Radiopharmaceutical therapy, nonHodgkin's lymphoma, includes administration of radiopharmaceutical (e.g., radiolabeled antibodies)

We created G0273 to describe radionuclide scanning to determine the biodistribution of Zevulin. We assigned 0.86 work RVUs to this code based on a comparison to CPT code 78802, Radiopharmaceutical localization of tumor; whole body. We established G0274 to allow appropriate reporting of this new service and assigned a work RVU of 2.07 to this code.

Comment: Commenters urged us to reevaluate the RVUs assigned to these codes and expressed concern that a lack of understanding about this service has led to its inappropriate valuation. Additionally, commenters requested that we present these codes to the AMA for consideration by the CPT Editorial Panel and RUC.
Response: We are deleting HCPCS codes G0273 and G0274. CPT codes 79403, Radiopharmaceutical therapy, radiolabeled monoclonal antibody by intravenous infusion, and 78802, Radiopharmaceutical localization of tumor or distribution of radiopharmaceutical agent(s); whole body single day imaging, will be used to report these services.

## GO275 Renal artery angiography

 (unilateral or bilateral) performed at the time of cardiac catheterization, includes catheter placement in the renal artery, injection of dye, flush aortogram and radiologic supervision and interpretation and production of images (List separately in addition to primary procedure) and GO278 Iliac artery angiography performed at the same time of cardiac catheterization, includes catheter placement, injection of dye, radiologic supervision and interpretation and production of images (List separately in addition to primary procedure)We created these add-on codes to assure proper reporting of and payment for renal and iliac angiography performed at the time of cardiac angiography. We determined the work value of 0.25 for these two add-on procedures by using the work values for CPT codes 75625, Aortography, abdominal, by serialography, radiological supervision and
interpretation and 93544 Injection procedure during cardiac catherization; for aortography and adjusting for the procedure time.

Comment: Commenters suggested that, if the true intention for the creation of G0275 was to assure correct coding of selective renal angiography performed in conjunction with cardiac catheterization, the RVUs are too low and not commensurate with the work associated with selective unilateral and/ or bilateral renal angiography. However, if CMS" intention for G0275 is nonselective renal angiography, then this should be stated clearly in the code descriptor. Commenters also considered the work RVUs assigned to G0278 to be too low. If G0278 is meant to be a selective procedure, then the work RVU should take into consideration the selective catheterization codes (CPT codes 36425 and 36425 ) and associated imaging codes (CPT codes 75710 and 75716).

Response: As announced in Program Memorandum, Transmittal AB-03-119, Change Request 2853) issued August 8, 2003, the descriptors for these two services specify that they apply to nonselective angiography and have been revised as follows:
GO275 Renal artery angiography, nonselective, one or both kidneys, performed at the time of cardiac catheterization and/or coronary angiography, includes positioning or placement of any catheter in the abdominal aorta at or near the origins (ostia) of the renal arteries, injection of dye, flush aortogram, production of permanent images, and radiologic supervision and interpretation (List separately in addition to primary procedure). and
GO278 Iliac and/or femoral artery angiography, non-selective, bilateral or ipsilateral to catheter insertion, performed at the same time as cardiac catheterization and/or coronary angiography, includes positioning or placement of the catheter in the distal aorta or ipsilateral femoral or iliac artery, inkjecton of dye, production of permanent images, and radioogic supervision and interpretation (List separately in addition to primary procedure). We will be retaining the work RVU of 0.25 for these two codes.
GO279 Extracorporeal shock wave therapy; involving elbow epicondylitis
GO280 Extracorporeal shock wave therapy; involving other than elbow epicondylitis or plantar fascitis

In the December 31, 2002 final rule we incorrectly established RVUs for CPT code 0020T, Extracorporeal shock
wave therapy; involving musculoskeletal system, which is an emerging technology code and also created two new HCPCS codes (G0279 and G0280) with payments based on our valuation of this CPT code. In the August 15, 2003 proposed rule we also requested additional information on these services.

Comment: Commenters on the December 2002 rule indicated that assignment of RVUs for CPT code 0020T is contrary to national policy
established in the November 1, 2001 ( 66 FR 55269) final rule. They also indicated that the assumptions used to assign RVUs to these services were incorrect and undervalued these services.

Response: In a correction notice published May 30, 2003 ( 68 FR 32400) we indicated that we had incorrectly assigned RVUs to these services and they would be carrier priced.

Comment: Commenters on the December 2002 rule expressed concern that the G codes were not reflective of the changes in technology and FDA approval of ESWT. Commenters also disagreed with our categorization and portrayal of CPT 0020T as a procedure similar to other physical therapy modalities. Commenters urged us to correct and clarify that CPT 0020T is not physical therapy service but a physician procedure and thus should be removed from the list of codes identifying certain designated health services.

Response: We understand that this is a changing technology and believe the current descriptors accommodate these changes. We are removing CPT 0020T from the list of designated health services in Addendum $F$ since we agree that, at this time, this service is predominantly performed by medical specialties such as orthopedists and podiatrists.

Comment: Commenters on the August 15,2003 proposed rule urged us to continue to have these services priced by the carrier and expressed concern that our request for additional information indicated we would be establishing national payment amounts for these services. In addition, several physicians provided information on how this service is used in their offices, including cost information as well as a description of the procedure. Some commenters recommended that separate G codes be established to differentiate between the high and low energy levels that are currently used, as this impacts the treatment protocols as well as the resources used in these procedures.

Response: The purpose for soliciting information in the proposed rule was to gain a better understanding of the use of
the various systems as well as the resources involved with this procedure. We appreciate the information the commenters provided and will continue to review this issue to determine if coding changes are warranted. We are retaining the current codes, G0279, G0280 and CPT code 0020T under the fee schedule and these will continue to be carrier priced. We believe this will enable the carriers to make appropriate payment for these services based on resources used. In addition, as previously discussed, we are removing CPT code 0020T from the list of designated health services in Addendum F.

GO288 Reconstruction, computed tomographic angiography of aorta for surgical planning for vascular surgery.

We created this code, which is a technical component code, to assure accurate reporting of this service by independent diagnostic testing facilities (IDTFs) that perform this service. This service includes receipt of a Computed Tomographic Angiogram (CTA), postCTA processing using specialized software, and burning the 3D model onto a CD and returning it to the operating surgeon. This 3D only model is used to assist vascular surgeons in planning for, or monitoring the results of, endovascular aneurysm repair. The service is a technical service provided under the general supervision of a physician according to the supervision requirements for IDTFs.

Comment: Commenters requested clarification on whether this code could be used for the treatment planning both prior to surgery as well as for postsurgical monitoring. They also indicated that it should be expanded to include the use of enhanced computed tomography scans or magnetic resonance images and not just those generated by CTA. In addition, one commenter suggested that CMS ensure that this HCPCS code is used only for those technologies that meet the following criteria: (1) The ability to perform precise modeling of multiple clinically-relevant objects; (2) the ability to generate specific measurements essential for surgical planning and follow-up; (3) built-in quality control and self-validation capabilities; (4) FDA marketing clearance for use in surgical planning and follow-up treatment; and (5) conformance to standards adopted by the International Standards of Organization (ISO).

Commenters also suggested that the payment for this code be revised so that it is more in line with the payment for these services when administered in the outpatient setting.

Response: We agree that this service can be used for treatment planning prior to surgery as well as for post-surgical monitoring and have revised the code descriptor to clarify this point. The descriptor for this code is revised as follows:
G0288 Reconstruction, computed tomographic angiography of aorta for preoperative planning and evaluation post vascular surgery.
However, we are not expanding this service to include the use of enhanced computed tomography scans or magnetic resonance, as we have not been presented with information to support its use with these other data sources. We assume that physicians providing this service will abide by the FDA labeling requirements for the specific equipment used. Payment for services under the outpatient prospective payment system is based on a different methodology than services paid under the physician fee schedule. As required by section 1848 of the Act, payment under the physician fee schedule is based on national relative value units based on resources used in furnishing the service. We believe the RVUs established for this service are reflective of the resources used, and therefore do not believe this should be carrier priced.
GO289 Arthroscopy, knee, surgical, for removal of loose body, foreign body, debridement/shaving of articular cartilage (chrondroplasty) at the time of other surgical knee arthroscopy in a different compartment of the same knee.

We created this add-on code to permit appropriate reporting of arthroscopic procedures performed in different compartments of the same knee during the same operative session. We stated that this code should be reported only when the physician spends at least 15 minutes in the additional compartment performing the procedure. It should not be reported if the reason for performing the procedure is due to a problem caused by the arthroscopic procedure itself. We noted that this code is to be used when a procedure is performed in the lateral, medial, or patellar compartments in addition to the main procedure. We assigned a work RVU of 1.48 to this code RVUs based"on a comparison to CPT codes 29874, 29877 and 29870, the base procedure for this family of codes.

Comment: Commenters appreciated our efforts to address the issue of reimbursement for this procedure. However, they expressed concern about the specific reference to a 15 minute time requirement. The commenters believed that this was inappropriate because using time in this manner
rewards and encourages inefficient work and penalizes efficient physicians, which ultimately has an impact on the quality of care delivered to Medicare beneficiaries.
Response: We understand the concerns expressed by the commenters and regret any confusion that the time reference may have created. This reference to time was intended as a guideline to ensure that this add-on code is used only when the procedure performed is a substantive procedure needed to produce a significant improvement in the patient's condition. Documentation supporting this should be reflected in the operative note.
Establishment of Interim Work Relative Value Units for New and Revised Physician's Current Procedural Terminology (CPT) Codes and New Healthcare Common Procedure Coding System Codes (HCPCS) for 2004 (Includes Table titled American Medical Association Specialty Relative Value Update Committee and Health Care Professionals Advisory Committee Recommendations and CMS's Decisions for New and Revised 2004 CPT Codes)

One aspect of establishing RVUs for 2004 was related to the assignment of interim work RVUs for all new and revised CPT codes. As described in our November 25, 1992 notice on the 1993 physician fee schedule (57 FR 55983) and in section III.B. of the November 22, 1996 final rule (61 FR 59505 through 59506), we established a process, based on recommendations received from the

AMA's RUC, for establishing interim work RVUs for new and revised codes.

This year we received work RVU recommendations for approximately 132 new and revised CPT codes from the RUC. Our staff and medical officers reviewed the RUC recommendations by comparing them to our reference set or to other comparable services for which work RVUs had previously been established, or to both of these criteria. We also considered the relationships among the new and revised codes for which we received RUC
recommendations. We agreed with the majority of the relative relationships reflected in the RUC values. In some instances, when we agreed with the relationships, we nonetheless revised the work RVUs to achieve work neutrality within families of codes. That is, the work RVUs have been adjusted so that the sum of the new or revised work RVUs (weighted by projected frequency of use) for a family will be the same as the sum of the current work RVUs (weighted by projected frequency of use). We reviewed all the RUC recommendations. We accepted approximately 95 percent and we disagreed with approximately 5 percent of the RUC recommended values. In the majority of these instances, we agreed with the relativity established by the RUC, but needed to adjust work RVUs to retain budget neutrality.

We received 2 recommendations from the HCPAC. We agreed with both of the HCPAC recommendations.

Table 5, titled "AMA RUC and HCPAC Recommendations and CMS Decisions for New and Revised 2004 CPT Codes", lists the new or revised CPT codes, and their associated work RVUs, that will be interim in 2004. This tabla includes the following information:

- A "\#" identifies a new code for 2004.
- CPT code. This is the CPT code for a service.
- Modifier. A " 26 " in this column indicates that the work RVUs are for the professional component of the code.
- Description. This is an abbreviated version of the narrative description of the code.
- RUC recommendations. This column identifies the work RVUs recommended by the RUC.
- HCPAC recommendations. This column identifies the work RVUs recommended by the HCPAC.
- CMS decision. This column indicates whether we agreed with the RUC recommendation ("agree") or we disagreed with the RUC
recommendation ("disagree"). Codes for which we did not accept the RUC recommendation are discussed in greater detail following this table. An
"(a)" indicates that no RUC recommendation was provided.
- 2004 Work RVUs. This column establishes the 2004 work RVUs for physician work. These work RVUs may differ from the work RVUs in Addenda B and C that reflect the adjustments to work RVUs to match the MEI weights.

Table 6.-AMA RUC and HCPAC Recommendations and CMS Decisions for New and Revised 2004 CPT Codes

[^107]Table 6, which is titled "AMA RUC ANESTHESIA RECOMMENDATIONS AND CMS DECISIONS FOR NEW AND REVISED 2004 CPT CODES", lists the new or revised CPT codes for anesthesia and their base units that will be interim in 2004. This table includes the following information:

- CPT code. This is the CPT code for a service.
- Description. This is an abbreviated version of the narrative description of the code.
- RUC recommendations. This column identifies the base units recommended by the RUC.
- CMS decision. This column indicates whether we agreed with the

RUC recommendation ("agree") or we disagreed with the RUC recommendation ("disagree"). Codes for which we did not accept the RUC recommendation are discussed in greater detail following this table.

- 2004 Base Units. This column establishes the 2004 base units for these services.

Discussion of Codes for Which There Were No RUC Recommendations or for Which the RUC Recommendations Were Not Accepted
The following is a summary of our rationale for not accepting particular RUC work RVU or base unit recommendations. It is arranged by type of service in CPT order. Additionally, we also discuss those CPT codes for which we received no RUC recommendations for physician work RVUs. This summary refers only to work RVUs or base units.

CPT code 43752 Naso- or oro-gastric tube placement, requiring physician's skill and fluoroscopic guidance (includes fluoroscopy, image documentation and report)

The RUC recommended a work RVU of 0.82 for this service based on a comparison of this procedure to CPT code 44500 . While we agree that CPT code 43752 is similar in work intensity to CPT code 44500, we feel the intraservice time is more appropriately valued at the 25th percentile ( 15 minutes of intra-service time vs. 20 minutes of intra-service time). This reduces the total time associated with CPT code 43752 from 30 minutes to 25 minutes. We applied the ratio of the RUC recommended value of 0.82 work RVU over 30 minutes to the revised intra-service time of 25 minutes to assign 0.68 interim work RVUs for CPT code 43752.

CPT code 63103 Vertebral corpectomy (vertebral body resection), partial or complete, lateral extracavitary approach with decompression of spinal cord and/or nerve root(s) (e.g., for tumor or retropulsed bone fragments); thoracic or Iumbar, each additional segment. (List separately in addition to code for primary procedure)

The RUC recommended a work RVU of 5.00 for this service based on a comparison of this procedure to CPT code 63088. It was unclear from the clinical vignettes supplied by the specialty society whether the additional corpectomy would more commonly involve the lumbar or the thoracic region of the spine. There is a significant difference in work intensity
associated with the resection of an additional corpus in the thoracic region as opposed to the lumbar region. For this reason we applied the ratio of the reference service (CPT code 63088) to its primary service (CPT code 63087) to CPT code 63101 (primary service associated with CPT 63103) to assign 3.90 interim work RVUs for CPT code 63103.

CPT code 61863 Twist drill, burr hole, craniotomy, or craniectomy with stereotactic implantation of neurostimulator electrode array in subcortical site (e.g., thalamus, globus pallidus, subthalamic nucleus, periventricular, periaqueductal gray), without use of intraoperative microelectrode recording; first array and CPT code 61867 Twist drill, burr hole, craniotomy, or craniectomy with stereotactic implantation of neurostimulator electrode array in subcortical site (e.g., thalamus, globus pallidus, subthalamic nucleus, periventricular, periaqueductal gray), with use of intraoperative microelectrode recording; first array

The RUC recommended a work RVU of 19.00 for CPT code 61863 and 31.34 work RVUs for CPT code 61867. These two new CPT codes replace existing CPT code 61862 (work RVU=19.34). Although we agree with the relative relationship established by the RUC for these services, in order to retain budget neutrality, we adjusted the RUC recommended values. Thus, the recommended values were adjusted in order that the total relative values remain constant before and after the inclusion of the new CPT codes.

We assigned 13.92 work RVUs to CPT code 61863 and 22.96 work RVUs to CPT code 61867.

CPT code 38208 Transplant preparation of hematopoietic progenitor cells; thawing of previously frozen harvest, without washing and CPT code 38209 Transplant preparation of hematopoietic progenitor cells; thawing of previously frozen harvest, with washing

We continue to have the same concerns as outlined in the December 31, 2002 final rule ( 67 FR 80007) with
respect to moving these codes from the laboratory fee schedule and thus establishing relative values under the physician fee schedule. We are maintaining a status indicator " 1 " for these services, making them not valid for payment under the Medicare Physician Fee Schedule.

CPT code 96111 Developmental testing extended (includes assessment of motor, language, social, adaptive, and/ or cognitive functioning by standardized developmental instruments, eg Bayley Scales of Infant Development) with interpretation and report, per hour

Although we agree with the RUC recommended work RVU of 2.60 for CPT code 96111, we note that the tests under this code will no longer be paid on a per hour basis. That is, total payment for the services under CPT code 96111 is based on one hour of provision of the tests. It is our understanding that these tests can be completed typically in one hour. That is, some of the tests can be administered in less than one hour and some may require a little more than one hour, so that the average time for all of the tests works out to be one hour. Therefore, regardless of the total number of hours it takes to complete the services under CPT code 96111 or whether the services are split up and spread over a number of days, payment will be made for 96111 based on only one unit/hour at 2.6 RVUs.

## Establishment of Interim Practice

 Expense RVUs for New and Revised Physician's Current Procedural Terminology (CPT) Codes and New Healthcare Common Procedure Coding System (HCPCS) Codes for 2004.We have developed a process for establishing interim practice expense RVUs for new and revised codes that is similar to that used for work RVUs. Under this process, the RUC recommends the practice expense direct inputs, that is, the staff time, supplies and equipment, associated with each new code. We then review the recommendations in a manner similar to our evaluation of the recommended work RVUs.

The RUC recommendations on the practice expense inputs for the new and revised 2004 codes were submitted to us as interim recommendations. We, therefore, consider that these recommendations are still subject to further refinement by the PEAC, or by us, if it is determined that such future review is needed. We may also revisit these inputs in light of future decisions of the PEAC regarding supply and equipment packages and standardized approaches to pre- and post-service clinical staff times.

We have accepted, in the interim, almost all of the practice expense recommendations submitted by the RUC for the codes listed in the following table titled "AMA RUC and HCPAC RVU Recommendations and CMS Decisions for New and Revised 2004 CPT Codes.'
We made the following minor changes to the inputs where relevant:

- We deleted the 3-minute phone calls in the post service period to conform to our established standard for all codes with 10 and 90-day global periods.
- We also deleted equipment when individual items did not meet the minimum $\$ 500$ requirement.
- We deleted certain equipment items that represent indirect, rather than direct costs, including lead shielding, lead lined radioactive waste box and lead-lined sharps box.
- We deleted the L-Block table shield because it is included in the price and description of the dose calibrator, another CPEP equipment item.
- We made minor changes to clinical labor and supplies, for several central venous access (CVA) codes in order to bring uniformity to this new family of codes.
- We assigned, on an interim basis, the clinical labor RN designation for CPT code 95991, physician administered refilling and maintenance of spinal or brain implantable pump, until the PEAC has an opportunity to review the necessity for this clinical assignment.

## V. Update to the Codes for Physician Self-Referral Prohibition

## A. Background

On January 4, 2001 we published in the Federal Register a final rule with comment period, "Medicare and Medicaid Programs; Physicians Referrals to Health Care Entities With Which They Have Financial Relationships" ( 66 FR 856). That final rule incorporated into regulations the provisions in paragraphs (a), (b) and (h) of section 1877 of the Act. Section 1877
of the Act prohibits a physician from referring a Medicare beneficiary for certain "designated health services" to a health care entity with which the physician (or a member of the physician's immediate family) has a financial relationship, unless an exception applies. In the final rule, we published an attachment listing all of the CPT and HCPCS codes that defined the entire scope of the following designated health services for purposes of section 1877 of the Act: clinical laboratory services; physical therapy services (including speech-language pathology services); occupational therapy services; radiology and certain other imaging services; and radiation therapy services and supplies.

In the January 2001 final rule, we stated that we would update the list of codes used to define these designated health services (the "Code List") in an addendum to the annual physician fee schedule final rule. The purpose of the update is to conform the Code List to the most recent publications of CPT and HCPCS codes. The last update of the Code List was included in the December 31, 2002 physician fee schedule final rule in Addendum E and was subsequently corrected in a notice that was published in the Federal Register ( 68 FR 32400) on May 30, 2003.

The updated all-inclusive Code List effective January 1,2004 is presented in Addendum F in this final rule. We intend to publish annually the allinclusive Code List in an addendum to the physician fee schedule final rule. The updated all-inclusive Code List will also be available on our Web site at http://www.cms.hhs.gov/medlearn/ refphys.asp.

## B. Response to Comments

We received public comments on three issues relating to the most recent Code List. The comments and our responses are stated below.

Comment: One commenter noted that we added three new "Q" codes (Q3021, Q3022, and Q3023) for hepatitis B vaccines. Program Memorandum AB-02-185 issued on December 31, 2002 deleted these HCPCS codes. However, the Program Memorandum also reactivated the following CPT codes for hepatitis B vaccine: 90740, 90743, 90744, 90746 and 90747.

Response: The commenter is correct. We erred in adding the " Q " codes to the list of services that may qualify for an exception under 42 CFR 411.355(h) concerning exceptions for preventive screening tests, immunizations, and vaccines. This was corrected in the correction notice published on May 30, 2003 ( 68 FR 32400).

Comment: Some commenters objected to the addition of CPT code 0020T (Extracorporeal shock wave therapy; involving plantar fascia) to the list of physical therapy services for purposes of the physician self-referral prohibition. The commenters stated that CPT 0020 T is currently a physician service involving anesthesia and therefore, should not be characterized as a physical therapy service.

Response: We agree with the commenters and have removed CPT code 0020T from the list of designated health services. Further discussion of this comment and response is included in section IV.C. 2 of this preamble concerning the HCPCS codes G0279 and G0280 relating to extracorporeal shock wave therapy.

Comment: One commenter noted that the annual Code List update does not include codes for the following designated health services: Durable medical equipment and supplies; parenteral and enteral nutrients, equipment and supplies; prosthetics, orthotics and prothestic devices and supplies; home health services; outpatient prescription drugs; and inpatient and outpatient hospital services. The commenter reconumended that we include the CPT and HCPCS codes for these designated health services in the annual update and in the quarterly updated Microsoft Excel spreadsheet of RVU values, global periods and supervision levels for Medicare covered-services posted on the CMS Web site. Alternatively, the commenter requested that we clarify that the Code List is not exhaustive and indicate where providers can obtain more information on the remaining categories.
Response: As explained in the January 4, 2001 final rule with comment ( 66 FR 923), we believe that the regulatory definitions of the designated health services at issue are sufficiently clear to permit entities and physicians to identify them readily. Moreover, some of these designated health services are not amenable to definition solely through codes. Regardless, to define these services through codes or to change the frequency of the Code List update would require a change in the text of the regulatory definitions for the various designated health services found in $\S 411.351$. The purpose of this Code List is simply to make those ministerial changes necessary to conform the Code List to the current CPT and HCPCS code publications. Making substantive changes to the regulatory definitions is beyond the scope of this update and cannot be accomplished without first proposing
the changes in a Notice of Proposed Rulemaking. Lastly, we cannot accept the commenter's suggestion that we explain that the Code List is not exhaustive because such a statement is false. The Code List is exhaustive with respect to the specific designated health services that it defines, and for the reasons noted above, we are not defining the remaining designated health services through codes.

## C. Revisions Effective for 2004

Tables 7 and 8, below, identify the additions and deletions, respectively, to the comprehensive Code List last published in Addendum E of the December 2002 physician fee schedule final rule and subsequently corrected in the May 30, 2003 correction notice (68 FR 32400). Tables 7 and 8 also identify the additions and deletions to the lists of codes used to identify the items and services that may qualify for the exceptions in §411.355(g) (regarding EPO and other dialysis-related outpatient prescription drugs furnished in or by an end-stage renal dialysis (ESRD) facility) and in $\S 411.355(\mathrm{~h})$ (regarding preventive screening tests, immunizations and vaccines).

We will consider comments with respect to the codes listed in Tables 8 and 9 below, if we receive them by the date specified in the DATES section of this final rule.

Table 9.-Deletions to the Physician Self-Referral hCPCS/ CPT ${ }^{1}$ CODES-Continued

## 90659 Flu vacine, whole, im.

${ }^{1}$ CPT codes and descriptions only are copyright 2003 American Medical Association. All rights are reserved and applicable FARS/ DFARS clauses apply.

The additions specified in Table 8 generally reflect new CPT and HCPCS codes that become effective January 1, 2004 or that became effective since our last update. It also reflects the addition of codes recently recognized by Medicare for payment purposes.

Additionally, we are adding two Gcodes (G0173, "Stereo radiosurgery, complete" and G0251, "Linear acc based stero radio") to the category of radiation therapy services and supplies. These codes became effective for Medicare payment purposes in August 2000 and July 2002, respectively and should have been reflected in previous Code Lists.

Table 8 also reflects the addition of 2 new HCPCS codes (Q4054 and Q4055) to the list of dialysis-related outpatient prescription drugs that may qualify for the exception described in $\S 411.355$ (g) regarding those items. The physician self-referral prohibition will not apply to these drugs if they meet the conditions set forth in $\$ 411.355(\mathrm{~g})$. Table X also reflects the addition of a screening mammography code (CPT 76083) and a flu vaccine code (CPT 90655) to the list that identifies preventive screening tests, immunizations and vaccines that may qualify for the exception described in §411.355(h) for such items and services. The physician self-referral prohibition will not apply to these services if they meet the conditions set forth in §411.355(h) concerning the exception for preventive screening tests, immunizations, and vaccines.

Table 8 reflects the deletions necessary to conform the Code List to the most recent publications of CPT and HCPCS codes, as well as additional deletions that we have determined are necessary as described below.

Under the category of physical therapy, occupational therapy and speech-language pathology services, we are removing CPT code 0020T, extracorporeal shock wave therapy for plantar fascia consistent with the response to the comment discussed in section IV.C. 2 and VI.B of this preamble.

Under the category of radiology and certain other imaging services, we are deleting CPT code 76831 for an echo exam of the uterus. This code should never have appeared on the Code List.

Our definition of "radiology and certain other imaging services" at § 411.351 specifically excludes any $x$-ray, fluoroscopy or ultrasonic procedure that requires "the insertion of a needle, catheter, tube, or probe". The type of procedure described by CPT code 76831 involves infusion tubing and should be removed from the Code List.

Under the category of radiation therapy services and supplies, we are removing HCPCS code G0274 for radiopharmaceutical therapy for nonHodgkin's lymphoma because it is a nuclear medicine service. Our definition of "radiation therapy services and supplies" at $\S 411.351$ specifically excludes nuclear medicine procedures. Thus, HCPCS code G0274 should never have appeared on the Code List.
VI. Physician Fee Schedule Update for Calendar Year 2004

## A. Physician Fee Schedule Update

The physician fee schedule update is determined using a formula specified by statute. Under section 1848(d)(4) of the Act, the update is equal to the product of 1 plus the percentage increase in the Medicare Economic Index (MEI) (divided by 100) and 1 plus the update adjustment factor (UAF). For CY 2004, the MEI is equal to 2.9 percent (1.029). The UAF is -7.0 percent ( 0.930 ). Section 1848(d)(4)(F) of the Act requires an additional -0.2 percent ( 0.998 ) reduction to the update for 2004. Thus, the product of the MEI (1.029), the UAF (0.930), and the statutory adjustment factor ( 0.998 ) equals the CY 2004 update of -4.5 percent ( 0.9551 ).

The negative physician fee schedule update occurs under a mandatory statutory formula. The law gives us no alternative to reducing the physician fee schedule rates. Only Congress can change the law and avert a reduction in 2004 physician fee schedule rates. Without a congressional act to change the law, the Department is compelled to announce a physician fee schedule update for CY 2004 of -4.5 percent. The Department's calculations are explained below.

## B. Rebasing and Revising of the Medicare Economic Index

## 1. Background

The Medicare Economic Index (MEI) is required by section 1842(b)(3) of the Act, which states that prevailing charge levels beginning after June 30, 1973 may not exceed the level from the previous year except to the extent that the Secretary finds, on the basis of appropriate economic index data, that a higher level is justified by year-to-year economic changes.

Beginning July 1, 1975, and continuing through today, the MEI has met this requirement by reflecting the weighted sum of the annual price changes of the inputs used to produce physicians' services. As such, the MEI attempts to be an equitable measure of price changes associated with physician time and operating expenses.

The current form of the MEI was detailed in the November 25, 1992 Federal Register (57 FR 55896) and was based in part on the recommendations of a Congressionally-mandated meeting of experts held in March 1987. Since that time, the structure of the MEI has remained essentially unchanged, with two exceptions. First, the MEI was rebased in 1998 (63 FR 58845), which moved the cost structure of the index from 1992 data to 1996 data. Second, the methodology for adjusting for productivity was revised in 2002 ( 67 FR 80019) to reflect the percentage change in the 10 -year moving average of economy-wide multifactor productivity.
We are rebasing and revising the MEI for the 2004 physician fee schedule update. The terms "rebasing" and "revising", while often used interchangeably, actually denote different activities. Rebasing means moving the base year for the structure of costs of an input price index, while *revising means changing data sources, cost categories, or price proxies used in the input price index. As is always the case with a rebasing and revising exercise, we have attempted to use the most recently available, relevant, and appropriate information to develop the MEI cosst category weights and price proxies. We detail below the updated cost weights for the MEI expense categories, our rationale for selecting the price proxies in the MEI, and the results of rebasing and revising the MEI.

## 2. Use of More Current Data

The MEI was last rebased and revised in 1998 for the 1999 physician fee schedule update (63 FR 58845). The base year for that version of the MEI was 1996, which means that the cost weights in the index reflect physicians' expenses in 1996. However, we believe it is desirable to periodically rebase and revise the index so that the expense shares and price proxies reflect more current conditions. For this reason, we are rebasing the MEI to reflect physicians' expenses in 2000. In addition, we are revising the cost categories in the MEI and changing three of the proxies we currently use to ensure that the index is appropriately reflecting price changes. We will continue to adjust the MEI using economy-wide multifactor productivity.

The expense categories in the rebased and revised MEI were primarily derived from the 2003 AMA Physician Socioeconomic Characteristics publication (2003 Patient Care Physician Survey data), which measures physicians' earnings and overall practice expenses for 2000. The AMA data were used to determine expenditure weights for total expenses, physicians' earnings, and malpractice expenses, the only information detailed in this survey. To further disaggregate the weights into subcategories reflecting more detailed expenses, we used data from previous AMA surveys, the 1997 Bureau of Economic Analysis Benchmark Input-Output table (I/O), the 2003 Bureau of Labor Statistics (BLS) Employment Cost Index (ECI), and the 2002 Bureau of the Census Current Population Survey (CPS).

## 3. Rebasing and Revising Expense Categories in the MEI

a. Developing the Weights for Use in the MEI

Developing a rebased and revised MEI requires selecting a base year and determining the number and composition of expense categories and their associated price proxies. We are rebasing the MEI to CY 2000. CY 2000 was chosen as the base year for two main reasons: (1) CY 2000 was the most recent year for which data were available from the AMA, and (2) we believed that the CY 2000 data were representative of the changing -distribution of physicians' earnings and practice expenses over time.

Comment: One commenter suggested that we update the weights in the MEI to a more recent base year, possibly CY 2004. While the commenter agreed with us that there is a lack of data to do so, the commenter suggested using the price change in each of the proxies to estimate weights for 2004 as an alternative to 2000 data.

Response: We selected CY 2000 as the base year for two reasons: (1) CY 2000 data were the most recent data available from the AMA, and (2) we felt the CY 2000 data were representative of the changing distribution of physician earnings and practice expenses over time. We do not expect that the experience of the past 3 or 4 years would have a significant impact on the MEI for the CY 2004 update, - particularly since changing the weights from 1996 to 2000 had such a minimal effect. In addition, the price proxies that we use capture the current price changes in each of the categories that make up the MEI.

While we agree that it would be optimal to develop MEI weights based on more recent data, we recognize the lack of data to do so. We also recognize that an alternative would be to use price changes in each of the proxies to update the weights to a more recent base year, similar to the methodology we used to develop the distribution of detailed practice expense categories in the current structure. In that case, we used price changes from 1998 to 2000 to develop weights for 2000.

However, as we indicated in the proposed rule, this method has a major drawback in that it assumes that the quantity of inputs would increase at the same rate as the price of those inputs.

This inay not be the case over longer time periods (for instance, 2000-2004) where there is likely to be substitution away from more costly inputs toward those which are less costly. Our experience with rebasing indexes has also shown that the weights for major categories do not change very much over time, even though the individual price changes for those categories can differ significantly. In addition, because the MEI is a Laspeyres-type index, the price changes between the base period and the current period are reflected in the relative importance of each category in determining the overall increase. Therefore, we feel that basing the index on CY 2000 data and reflecting current
price changes likely represents a reasonable estimate of physicians' current experience.
We determined the number and composition of expense categories based on the criteria used to develop the current MEI and other CMS input price index expenditure weights. These criteria are timeliness, reliability, relevance, and public availability. For more information on these criteria, see the May 9, 2002 Federal Register (67 FR 31444 ) and the detail later in this preamble. Table 10 lists the set of mutually exclusive and exhaustive cost categories that make up the rebased and revised MEI.

Table 10.-Rebased and Revised Medicare Economic Index Expenditure Categories, Weights, and Price Proxies

| Expense category | $\begin{gathered} 2000-E x- \\ \text { pense } \\ \text { weights }{ }^{12} \end{gathered}$ | $\begin{aligned} & \text { 1996-Ex-E } \\ & \text { pense } \\ & \text { weights } \end{aligned}$ | Price proxy |
| :---: | :---: | :---: | :---: |
| Total ................................................................... | 100.000 | 100.000 |  |
| Physician Earnings ${ }^{3}$.................................................. | 52.466 | 54.460 |  |
| Wages and Salaries | 42.730 | 44.197 | AHE-Private. |
| Benefits ${ }^{4}$ | 9.735 | 10.263 | ECl -Ben: Private. |
| Physician Practice Expenses | 47.534 | 45.540 |  |
| Nonphysician Employee Compensation | 18.653 | 16.812 |  |
| Employee Wages and Salaries .............................. | 13.808 | 12.424 |  |
| Prof/Tech Wages | 5.887 | 5.662 | ECl-W/S: Private P\&T. |
| Managerial Wages ......................................... | 3.333 | 2.410 | ECl-W/S: Private Admin. |
| Clerical Wages | 3.892 | 3.830 | ECI-W/S: Private Clerical. |
| Services Wages | 0.696 | 0.522 | ECI-W/S: Private Service. |
| Employee Benefits ${ }^{4}$.............................................. | 4.845 | 4.388 | ECl-Ben: Priv. White Collar. |
| Other Practice Expenses ...................................... | 18.129 |  |  |
| Office Expenses .................................................. | 12.209 | 11.581 | CPI(U)-Housing. |
| Professional Liability Insurance | 3.865 | 3.152 | CMS—Prof. Liab. Phys. Premiums. |
| Medical Equipment ............................................... | 2.055 | 1.878 | PPI-Medical Instruments \& Equip. |
| Pharmaceuticals and Medical Materials and Supplies. | 4.319 | 4.516 |  |
| Medical Materials and Supplies ............................. | 2.011 | ................. | PPI Surg. Appliances and Supplies/CPI (U) Med Supplies. |
| Pharmaceuticals ................................................. | 2.308 |  | PPI Pharmaceutical Preparations. |
| Other Expenses ................................................. | 6.433 | 7.601 | CPI-U All Items Less Food and Energy. |

[^108]To determine the expenditure weights for the rebased and revised MEI, we used currently available and statistically valid data sources on physician earnings and practice expenses. While we consulted numerous data sources, we used five data sources to determine the MEI expenditure weights: (1) The 2003 AMA Physician Socioeconomic Statistics (2000 survey data) for selfemployed physicians, (2) the 2000-2002 AMA Physician Socioeconomic Statistics (1998 data) for self-employed physicians, (3) the March 2003 BLS

Employment Cost Index, (4) the 2002
Bureau of the Census Current Population Survey, and (5) the Bureau of Economic Analysis (BEA) 1997 Benchmark Input-Output tables (I/O). No one data source provided all of the information needed to determine expenditure weights according to our criteria. The development of each of the cost categories using these sources is described in detail below

## b. Physician Earnings

The rebased and revised MEI uses AMA data on mean physician net income (plıysician earnings) for selfemployed physicians to develop a weight for physician earnings. The weight for this expense category is based on AMA data for 2000 and is calculated as a percentage of total mean expenses (physician earnings and practice expenses, including malpractice). The physician earnings expenditure category also includes employee physician compensation.

Currently, physician earnings and overhead expenses generated by employee physicians are included in the AMA practice expenses category. However, we believe it is appropriate, for our purposes, to place employee physician compensation in the MEI cost category of physician earnings. Including employee physician payroll in physician earnings in the MEI is consistent with the current payment methodologies in accordance with the physician fee schedule, where the work RVU is computed based on what service is provided and not on who provides the service. Since employee physicians perform the same services as selfemployed physicians, employee physician time is reflected in the work RVU. By including the compensation of employee physicians in the physician earnings expense category, these expenses will be adjusted by the appropriate price proxies for time spent by a physician.
To obtain further detail for both wages/salaries and benefits, the ratio between these categories for 1996 (based on the 1996-based MEI) was updated to 2000 using the growth in the overall Employment Cost Index for private employees for wages/salaries and benefits. Alternative data for determining this split were not readily available from any other source. The main shortcoming of this method is that any changes in quantity and intensity (mix of physicians) are not reflected. However, faced with the lack of alternative data, we deemed this
approach to be the most feasible, and the results appear to be consistent with anecdotal evidence on this ratio. Its application resulted in a wage-fringe benefit split of 81.4 and 18.6 percent, respectively, in the revised and rebased MEI compared with a wage-fringe benefit split of 81.2 and 18.8 percent, respectively, in the 1996-based MEI.

## c. Physician Practice Expenses

To determine the remaining individual practice expense weights other than malpractice expense, we updated AMA expense data from 1998 to 2000 using the relative price change in an appropriate price index. After the levels were updated to 2000 values, it was necessary to normalize these levels to equal the 2000 mean total expense data provided by the 2003 AMA survey. The detailed explanations for the derivation of the individual weights are listed below.

## (i) Nonphysician Employee Compensation

The cost share for nonphysician employee compensation was developed by updating the 1998 AMA Socioeconomic Survey data on nonphysician employee compensation costs for self-employed physicians to 2000 , using the current proxy for this category, and dividing the resulting amount into total expenses (physician earnings plus practice expenses) for 2000 from the AMA survey. We further divided this cost share into wages/ salaries and benefits using BLS

Employment Cost Index data. The ECI survey contains data on the proportion of total compensation accounted for by wages/salaries and benefits (including paid leave) by private industry health services occupational category. These proportions can be used to distribute the total nonphysician employee compensation weight to wages/salaries and benefits for non-physician employees. We used 2000 data from the March 2003 publication. Although this survey does not contain data specifically for offices of physicians, data are available on wage/fringe shares for private industry health services, which include hospitals, nursing homes, offices of physicians, and offices of dentists. We believe the data for health services from the survey do provide a reasonable estimate of the split between wages and fringe benefits for employees in physicians' offices. Data for 2000 in the ECI survey for total health services indicate that wages and fringe benefits are 74.02 percent and 25.98 percent of compensation, respectively. As in the 1996-based MEI, we will use CPS data on carnings by occupation to develop cost shares for wages for nonphysician occupational groups shown in Table 6. To arrive at a distribution for these separate categories, we multiplied the overall share for nonphysician employee wages/salaries by each of the occupational proportions from the 2000 CPS. This distribution for the 1996based and 2000-based MEI are presented in Table 10.

Table 11.-Percent Distribution of Nonphysician Payroll Expense by Occupational Group: 2000 and 1996

${ }^{1}$ Due to rounding, weights may not sum to 100.000 percent.

## (ii) Professional Liability Expense

The weight for professional liability expense was derived from the 2003 AMA survey (2000 data) and was calculated as the mean professional liability expense expressed as a percentage of total expenses (physician earnings plus practice expenses). This calculation resulted in a 3.865 percent share of total costs in 2000 compared to a 3.152 percent share in the 1996-based index. The increase in weight for professional liability insurance represents the increases in both
premiums and the amount of coverage purchased by physicians in 2000 compared to 1996. While the weight does not reflect the cost experience for 2001 and 2002, the proxy used in the rebased and revised index does reflect the price increases associated with the recent rise in malpractice costs.

Comment: Some commenters were concerned that the rebased and revised MEI does not appropriately reflect the recent increase in professional liability insurance (PLI) premiums that physicians are experiencing.

Response: As we indicated in the proposed rule, the weights in the rebased and revised MEI reflect the distribution of physicians' costs in CY 2000 and do not reflect the more recent experience of physicians, particularly as it pertains to PLI. While it would be optimal to base the weights on more recent data, there is not a more recent, comprehensive measure that would meet our criteria for determining weights in the MEI.
We also indicated that while the weights do not reflect the more recent
experience, the proxy we use to measure the price change in this category does reflect more recent price changes in premiums and is the most current data available through the second quarter of 2003. This MEI PLI data, like that used in the development of the GPCIs, does not reflect total expenditures on PLI, which would be needed to develop more current weights for the MEI. In order to develop cost weights, expenditure data for all costs facing physicians are needed.
(iii) Office, Medical Equipment, Pharmaceuticals and Medical Materials and Supplies Expenses, and Other Expenses

The 2003 AMA survey provides less detail for expenses with respect to prior years' publications. Therefore, we calculated the share of each of the above categories by updating the AMA data for 1998 to 2000 using an appropriate price proxy. The primary reason for using the price proxy was that we lacked other data to develop cost weights for each of these categories. As stated previously, the main deficiency of this method is that it does not directly account for changes in the quantity or intensity associated with these expenses. Our belief, however, was that it was important to continue using these detailed breakouts so that each would be proxied by an appropriate price index and that the quantity/intensity effects over a short period of time are not likely to be large. In fact, we have found that even over longer periods of time, the distribution of costs tends to be relatively similar.

Office expenses and medical equipment levels were moved to 2000 using the growth from 1998 to 2000 in their respective MEI price proxies. In the case of office expenses, we used the growth in the CPI-U Housing; for medical equipment expenses, we used the growth in the PPI for Medical Instruments and Equipment.

The share for pharmaceuticals (prescription drugs) and medical materials and supplies was calculated by separating out pharmaceuticals and other medical materials and supplies using 1997 BEA Benchmark InputOutput data. First. the sum of all the pharmaceuticals and medical supplies categories from the Benchmark InputOutput tables for 1997 was calculated. The share of pharmaceuticals and medical supplies was then calculated as a percentage of this total and applied to the 1997 AMA medical supplies data. These calculated levels were then aged to 2000 using the growth in an appropriate price proxy. We thought it was important and appropriate to
account for each of these categories separately so that differences in relative price growth between pharmaceuticals (prescription drugs) and other medical materials and supplies would be more accurately represented. The resulting 2000 data for the two separate categories were then aggregated (summed) together to form the overall total for the share for the pharmaceuticals and medical materials and supplies category in the rebased and revised MEI. The pharmaceuticals category was aged using the Producer Price Index (PPI) for Pharmaceutical preparations and the medical materials and supplies category was updated using the PPI for surgical appliances and supplies.
Finally, the Other Expenses category was calculated as a residual (total expenses less the percentage of all categories currently accounted for). The additional detail for transportation expenses found in the 1996-based MEI was removed because the data were not readily available for measurement of a cost share for 2000 . The effect on the MEI of removing the detail is negligible.

Comment: One commenter suggested for the purposes of future changes to the MEI, that CMS consider inputs that are vastly different than when the MEI was first developed, such as costs of complying with government regulatory requirements and interpreter services for patients.

Response: We thoroughly research many of the known data sources on a regular basis to determine the appropriate number of detailed categories that make up the MEI. If we determine that a different combination of inputs is needed we will revise the MEI to reflect a more current cost distribution. However, CMS does not have the detailed expenditure and price data for the types of expenditures the commenter indicated. CMS will continue to work with other outside entities in the future to ensure the MEI is as accurate and representative as possible. It should also be noted that these costs are already captured in the MEI, as all costs are captured in the index, just not separately broken out for the reasons previously stated.
4. Selection of Price Proxies for Use in the MEI
After the 2000 cost weights for the rebased and revised MEI were developed, we reviewed the current set of price proxies to determine whether they were still the most appropriate for each expenditure category. As was the case in the development of the 1996based MEI ( 57 FR 55901), most of the indicators we considered are based on

BLS data and are grouped into one of the following five categories:

## Producer Price Indices (PPIs)

Producer price indices (PPIs) measure price changes for goods sold in other than retail markets. They are the preferred proxies for physician purchases at the wholesale level. These fixed-weight indices are a measure of price change at the producer or at the intermediate stage of production, a more likely mode of purchase for physicians.

## Consumer Price Indices (CPIs)

Consumer price indices (CPIs) measure change in the prices of final goods and services purchased by consumers. Like the PPIs, they are fixedweight. Since they may not represent the price changes faced by producers, CPIs were used if there were no appropriate PPI or if the expenditure category was similar to expenditure of retail consumers in general.

## Average Hourly Earnings (AHEs)

Average hourly earnings (AHEs) are available for production and nonsupervisory workers for specific industries as well as for the nonfarm business economy. They are calculated by dividing gross payrolls for wages/ salaries by total hours. The series reflects shifts in employment mix and, thus, is representative of actual changes in hourly earnings for industries or for the nonfarm business economy.

## ECIs for Wages/Salaries

These ECIs measure the rate of change in employee wage rates per hour worked. These fixed-weight indices are not affected by shifts in industry or occupation employment levels and measure only the pure rate of change in wages.

## ECIs for Employee Benefits

These ECIs measure the rate of change in employer costs of employee benefits, such as the employer's share of Social Security taxes, pension and other retirement plans, insurance benefits (life, health, disability, and accident), and paid leave. Like ECIs for wages/ salaries, the ECIs for employee benefits are not affected by changes in industry output or occupational shifts.

When choosing wage and price proxies for each expense category, we evaluate the strengths and weaknesses of each proxy variable using four criteria. The first criterion is relevance. The price variable should appropriately represent price changes for specific goods or services within the expense category. Relevance may encompass judgments about relative efficiency of
the market generating the price and wage increases.

The second criterion is reliability or low sampling variability. If the proxy wage-price variable has a high sampling variability or inexplicable erratic patterns over time, its value is greatly diminished, since it is unlikely to accurately reflect price changes in its associated expenditure category. Low sampling variability can conflict with relevance, since the more specifically a price variable is defined in terms of service, commodity, or geographic area, the higher the possibility of sampling variability.

The third criterion is timeliness of actual published data. For this reason, we prefer monthly and quarterly data to annual data. The length of time the time series data have been published is also important. A well-established time series is needed to assess the reasonableness of the series and to provide a solid base from which to forecast future price changes in the series. We need to forecast the MEI to make Federal budget and Trustees Report estimates.

The fourth criterion is public availability. We prefer to use data sources that are publicly available for our indices so that the public may track each of the individual components in the MEI.

The BLS price proxy categories previously described meet the criteria of relevance, reliability, timeliness, and public availability. Below we discuss the price-wage proxies for the rebased and revised MEI (shown in Table 5).

## (a) Expense Categories in the MEI

## Physician Time

In the rebased and revised MEI, we are using the AHE for the private nonfarm economy as the proxy for the physician wages/salaries component; this is the same price measure used in the 1996-based MEI. In our judgment, this proxy still most closely comports with Congressional intent as expressed in the Senate Finance Committee's 1972 report (S. Rept. No. 92-1230 at 191 (1972)). It should be noted that AHEs change in accordance with changes in the type and mix of workers.
As we discussed extensively in the November 2, 1998 final rule (63 FR 58848) and again in the December 31, 2002 final rule ( 67 FR 80019), we believe that the current price proxy for physicians' earnings-AHE in the nonfarm business economy-is the most appropriate proxy to use in the MEI. The AHE for the nonfarm business economy reflects the impacts of supply, demand. and economy-wide
productivity for the average worker in the economy. Using this measure as the proxy for physicians' earnings ensures parity in the rate of change in wages for the average worker and those for physicians. In addition, use of this proxy is consistent with the original legislative intent that the change in the physicians' earnings portion of the MEI parallel the change in general earnings for the economy. Since earnings are expressed per hour, a constant quantity of labor input per unit of time is reflected. The use of the AHE data is also consistent with our using the BLS economy-wide multifactor productivity measures since economy-wide wage increases reflect economy-wide productivity increases.
Using the ECI for professional and technical workers or other occupationalspecific wage proxies has a major shortcoming; in many instances, occupations such as engineering, computer science, and nursing have unique characteristics that are not representative of the overall economy or the physician market. Specifically, wage changes for such occupations can be influenced by excess supply or demand for these types of workers. We believe it would not be appropriate to proxy the physician earnings portion of the MEI with a wage proxy that reflects these other occupation's unique characteristics. The 2000-based MEI will use the ECI for fringe benefits for total private industry as the price proxy for physician fringe benefits, the same proxy used for the 1996 -based MEI. This means that both the wage and fringe benefit proxies for physician earnings are derived from the nonfarm private sector and are computed on a per-hour basis.

## Nonphysician Employee Compensation

As in the 1996-based MEI, we used Current Population Survey data on earnings and employment by occupation to develop labor cost shares for the nonphysician occupational groups shown in Table 10. BLS maintains an ECI for each occupational group, and we use these ECIs as price proxies for nonphysician employee wages in the 2000 -based MEI.

The skill mix shift in employees of physician offices in the last few years has been towards managerial occupations. While these skill mix shifts are captured in the expenditure weights, they are appropriately held constant in a Laspeyres price index such as the MEI. Skill mix shifts, which may reflect the changing intensity of services provided in physicians' offices, are accounted for in the payment system outside of the MEI. The 2000-based MEI will use the

ECI for fringe benefits for white collar employees in the private sector as a proxy for nonphysician benefits since most nonphysician employees in physicians' offices are white-collar employees. This is the same proxy used for the 1996-based MEI.

## Office Expense

Office expenses include rent or mortgage for office space, furnishings, insurance, utilities, and telephone. We continue to use the CPI-U for housing because it is a comprehensive measure of the cost of housing, including rent, owner's equivalent rent, and the types of goods and services associated with running an office. This proxy covers about 80 percent of the population.

## Pharmaceuticals and Medical Materials and Supplies

This cost category includes drugs, outside laboratory work, $x$-ray films, and other related services. There is not one price proxy that includes this complete mix of materials and supplies. In the absence of one index, we separately accounted for pharmaceuticals and medical materials and supplies in the 2000-based MEI.

- Medical Materials and Supplies

We equally weighted two proxies together (the PPI Surgical Appliances and Supplies and the CPI-U for Medical Equipment and Supplies) since one proxy does not accurately measure the price change associated with these types of products used nor the mode of purchase used in physicians' offices. While both indexes include such items as bandages, dressings, catheters, I.V. equipment, syringes, and other general disposable medical supplies and nonprescription equipment, the indexes reflect significant differences in the mode of purchase. The PPI measures actual transaction prices at the wholesale level, the mode most likely used by physicians, while the CPI measures prices at the retail level or the final stage of production. The price movements in these two indexes can be different and we believe that it is appropriate to combine these indexes into one proxy since physicians likely use both purchasing methods when obtaining medical supplies.

- Pharmaceuticals

The PPI for pharmaceutical preparations is used to proxy pharmaceutical prices in other CMS market baskets and reflects the price change associated with the average mix of pharmaceuticals purchased economywide. We use the PPI for pharmaceutical preparations, rather than the CPI for prescription drugs, because physicians generally purchase drugs directly from a
wholesaler. The PPIs we use measure price changes at the final stage of production and not intermediate production, however.

## Professional Liability Insurance

It is vital that the MEI accurately reflect the price changes associated with professional liability costs. Accordingly, we continue to incorporate into the MEI a price proxy that accomplishes this goal by making the maximum use of available data on professional liability premiums.
Each year, we solicit professional liability premium data for physicians from a small sample of commercial carriers. This information is not collected through a survey form but instead is requested, on a voluntary basis, from a few national commercial carriers via letter. Generally between 5 and 8 carriers volunteer this information. For the CY 2004 update we were able to obtain data from 7 carriers, all of which were in the top 15 companies in 2001 in terms of market share. While the sample size certainly does not cover the entire professional liability insurance market, we have attempted to maximize the market share in terms of both national coverage and coverage within States.

As we require for our other price proxies, the professional liability price proxy should reflect the pure price change associated with this particular cost category. Thus, it should not capture changes in the mix or level of liability coverage. To accomplish this result, we obtain premium information from commercial carriers for a fixed level of coverage, currently \$1 million per occurrence and a $\$ 3$ million annual limit. This information is collected for every State by physician specialty and risk class. Finally, the State-level, physician-specialty data are aggregated by effective premium date to compute a national total, using counts of physicians by State and specialty as provided in the AMA publication, Physician Characteristics and Distribution in the U.S.

The resulting data provide a quarterly time series, indexed to a base year consistent with the MEI and reflect the national trend in the average professional liability premium for a given level of coverage. From this series, quarterly and annual percent changes in professional liability insurance are estimated for inclusion in the MEI.

Our research has indicated that the most comprehensive data on
professional liability costs are held by the State insurance commissioners but these data are available only with a substantial time lag and, therefore, the data currently incorporated into the MEI are much more timely. We believe that, given the limited data available on professional liability premiums, this methodology adequately reflects the price trends facing physicians.

Comment: Several commenters were concerned about the 6.6 percent increase in the PLI component of the MEI published in the proposed rule and felt that this did not represent the actual increase in premiums physicians are experiencing.

Response: We indicated in the proposed rule that the 6.6 percent increase in the PLI component of the index was based on a forecast. For this final rule we have incorporated actual data (through the second quarter of 2003) that indicates that the increase in the proxy for the PLI component of the MEI is 16.9 percent.

## Medical Equipment

Medical equipment includes depreciation, leases, and rent on medical equipment. We will use the PPI for medical instruments and equipment as the price proxy for this category, consistent with the price proxy used in the 1996-based MEI and other CMS input price indexes.

## Other Expenses

This category includes the residual subcategory of other expenses such as accounting services, legal services, office management services, continuing education, professional association memberships, journals, professional car expenses, and other professional expenses. In the absence of one price proxy or even a group of price proxies that might reflect this heterogeneous mix of goods and services, we use the CPI-U for all items less food and energy, consistent with the price proxy used in the 1996-based MEI. We also condensed the structure compared to that used in the 1996-based MEI because we lack the data to develop a representative weight for transportation, as discussed above. This change resulted in onty a negligible effect on the overall MEI over the past 8 years; the average annual increase differs by less than a tenth of a percentage point over that time.

## (b) Productivity Adjustment to the MEI

In the December 2002 final rule, we indicated that we were changing the
methodology for adjusting for productivity in the MEI. The MEI used for the 2003 physician payment update reflected changes in the 10 -year moving average of private nonfarm business (economy-wide) multifactor productivity applied to the entire index; we had previously used economy-wide private nonfarm business labor productivity applied to the labor portions of the index. We will continue to use the new method, adjusting for multifactor productivity applied to the entire index, in the rebased and revised MEI.

As described in the December 31, 2002 (68 FR 9568) final rule, we use multifactor productivity because: (1) It is theoretically more appropriate to explicitly reflect the productivity gains associated with all inputs (both labor and nonlabor); (2) the recent growth rate in economy-wide multifactor productivity appears to be more consistent with the current market conditions facing physicians; and (3) the MEI still uses economy-wide wage changes as a proxy for physician wage changes. We also believe that using a 10 -year moving average change in economy-wide multifactor productivity produces a stable and predictable adjustment and is consistent with the moving-average methodology used in the 1996-based MEI. The adjustment will be based on the latest available actual historical economy-wide multifactor productivity data, as measured by BLS. For the 2004 update, this means using the multifactor productivity data through 2001, the latest available information.

## 5. Results of Rebasing

Because the rebased and revised MEI is similar in structure to the 1996-based MEI, updating the MEI from a 1996 base year to a 2000 base year resulted in small changes in expense category weights. Physicians' earnings dropped slightly, from 54.5 percent of the index in 1996 to 52.5 percent in 2000 . The expense shares for non-physician employee compensation, office expenses, professional liability insurance, and medical equipment all rose slightly, while expense shares for medical materials and supplies and other expenses declined.

The update using the rebased and revised MEI for the 2004 Physician Fee Schedule is an increase of 2.9 percent. This incorporates historical data through the second quarter of 2003.

# Table 12.-Annual Percent Change in the Revised and Rebased Medicare Economic Index, 2004—All Categories 

Increase in the Medicare Economic Index Update for Calendar Year $2004{ }^{1}$

| Cost categonies and price measures | 2000 weights ${ }^{2}$ | 2004 percent changes |
| :---: | :---: | :---: |
| Medicare Economic Index Total, productivity adjusted | n/a | 2.9 |
| Productivity: 10-year moving average of Multifactor productivity, private nonfarm business sector | n/a | 0.9 |
| Medicare Economic Index Total, without productivity adjustment | 100.000 | 3.8 |
| 1. Physician's Own Time ${ }^{3}$ | 52.466 | 3.6 |
| a. Wages and Salaries: Average Hourly Earnings, private Nonfarm | 42.730 | 3.2 |
| b. Fringe Benefits: Employment Cost Index, benefits, private nonfarm | 9.735 | 5.4 |
| 2. Physician's Practice Expense ${ }^{3}$ | 47.534 | 4.0 |
| a. Nonphysician Employee Compensation | 18.653 | 3.4 |
| 1. Wages and Salaries: Employment Cost Index, wages and salaries, weighted by occupation .... | 13.808 | 2.8 |
| 2. Fringe Benefits: Employment Cost Index, fringe benefits, white collar ..................................... | 4.845 | 5.0 |
| b. Office Expense: Consumer Price Index (CPI-U), housing .......................................................... | 12.209 | 2.5 |
| c. Drugs and Medical Materials and Supplies ................................................................................ | 4319 | 3.1 |
| 1. Medical Materials and Supplies: Producer Price Index, surgical appliances and supplies/Consumer Price Index (CPI-U), medical equipment and supplies (equally weighted) | 2.011 | 1.0 |
| 2. Pharmaceuticals: Producer Price Index (PPI pharmaceutical preparations) ............................. | 2.308 | 4.3 |
| d. Professional Liability Insurance: premiums ${ }^{4}$.............................................................................. | 3.865 | 16.9 |
| e. Medical Equipment: PPI, medical instruments and equipment | 2.055 | 2.3 |
| f. Other Expenses | 6.433 | 1.9 |

${ }^{1}$ The rates of historical change are estimated for the 12 -month period ending June 30,2002 , which is the period used for computing the calendar year 2004 update. The price proxy values are based upon the latest available Bureau of Labor Statistics data as of September $22,2002$.
${ }^{2}$ The weights shown for the MEI components are the 2000 base-year weights, which may not sum to subtotals or totals because of rounding. The MEI is a fixed-weight, Laspeyres-type input price index whose category weights indicate the distribution of expenditures amiong the inputs to physicians' services for calendar year 2000. To determine the MEI level for a given year, the price proxy level for each component is muitiplied by its 2000 weight. The sum of these products (weights multiplied by the price index levels) over all cost categories yields the composite iviE! level for a given year. The annual percent change in the MEI levels is an estimate of price change over time for a fixed market basket of inputs to physicians' services. Due to rounding, weights may not sum to 100.000 percent.
${ }^{3}$ The measures of productivity, average hourly earnings, Employment Cost Indexes, as well as the various Producer and Consumer Price Indexes can be found on the Bureau of Labor Statistics Web site http://stats.bls.gov.
${ }^{4}$ Derived from data collected from several major insurers (the latest available historical percent change data are for the period ending second quarter of 2003).
n/a Productivity is factored into the MEI categories as an adjustment to the price variables; therefore, no explicit weight exists for productivity in the MEI.

As is the case with this index rebasing, our experience in previous rebasing and revising indexes has been that there is usually a very small effect on the overall percent change. The difference is typically between zero and 0.3 percentage points per year on average. The rebased and revised MEI overall percent increase for the CY 2004 update is only 0.1 percentage point higher compared to the 1996 -based MEI. This is also the case for this final rule. When the MEI was last rebased, there was no difference in the average annual percentage change from 1985 to 1998. When the PPS hospital indices were rebased, the average difference in the percentage change was less than onetenth of a percentage point from 1995 to 2002.

The first reason for this small difference between the 1996-based and 2000-based MEI percent changes is that the weight of professional liability insurance increased, giving it a higher relative importance in the index in 2000. This category also increased at a faster pace than other index categories during 2002 and projected for 2003, resulting in an even greater relative importance for this index by 2004 and
causing it to have a larger effect on the overall index compared to the 1996based MEI.

In addition, the pharmaceuticals from the medical materials and supplies category grew faster than the overall medical materials and supplies in the 1996-based MEI. In addition, the faster growth in the aggregate medical materials and supplies category combined with a higher weight in the 2000-based index gave the category a higher relative importance. However, these increases were mostly offset by declines in weight of some of the other categories, most notably physician earnings.
6. Adjustments to RVUs To Match the New MEI Weights
As discussed in the August 15, 2003 proposed rule, section
1848 (c)(2)(B)(ii)(II) of the Act requires that increases or decreases in RVUs may not cause the amount of expenditures for the year to differ by more than $\$ 20$ million from what expenditures would have been in the absence of these changes. If this threshold is exceeded, we make across-the-board adjustments to preserve budget neutrality. Therefore,
if we adjust the work, practice expense and malpractice RVUs to match the new MEI weights, we are required by statute to ensure that the adjustments do not increase or decrease Medicare expenditures by more than $\$ 20$ million. To meet the requirements of the statute and ensure that aggregate pools of RVUs match the proposed new MEI weights, we considered two options. We considered either making no adjustments to the physician work RVUs and adjusting only the practice expense and malpractice RVUs or adjusting all 3 categories of RVUs. We proposed adjusting all 3 categories of RVUs rather than adjusting only the practice expense and malpractice RVUs, which would have resulted in a reduction to the physician fee schedule conversion factor in addition to the -4.2 percent reduction that was forecasted. Specifically, we proposed to reduce the physician work RVUs by an estimated 0.35 percent ( 0.9965 ) and the practice expense RVUs by an estimated 1.15 percent $(0.9885)$ and to increase the malpractice RVUs by an estimated 21.7 percent (1.217) to match the rebased MEI weights.

Comment: We received comments from a number of physician organizations opposing any adjustment to the physician work RVUs. Several of the comments appreciated our reluctance to reduce the physician fee schedule conversion factor by an additional 0.3 percentage points when there will already be a large reduction in the physician fee schedule update. One commenter stated that any additional reduction to the physician fee schedule conversion factor would be inappropriate. However, these comments also stated that that the

- physician work RVUs should remain constant and stable. There were a number of comments that stated that across-the-board adjustments should never be applied to the work component of the Resource Based Relative Value System. One comment indicated that we should not make any adjustments to the work RVUs unless they are recommended by the RUC. Several of the comments stated that the proposed adjustments to the RVUs to match the MEI weights would not assist the physician community in addressing the professional liability crisis since any increase in physician fees for some services will be offset by reductions in other services. Additional payments by Medicare to cover increased professional liability costs, or congressional action, are necessary to alleviate this problem. Some of the comments indicated that CMS did not provide sufficient information to make a determination as to how the two proposals would affect individual codes because the adjustments were not applied to the RVUs shown in Addendum $B$ of the proposed rule. Several of the comments stated that the stability of work RVUs is essential since they are used by private payors,
physician compensation systems, and in productivity analysis. The RUC commented that they depend upon the stability in these values as they review new and revised codes, both in magnitude estimation and in any calculations regarding intra-work per unit of time (IWPUT). One comment suggested CMS create a separate adjustment factor to adjust payments without changing the conversion factor or the RVUs, as it did for the first fiveyear review of the Medicare physician fee schedule in 1995. We also received a comment urging us to review the Secretary's "ancillary policies" authority under section 1848(c)(4) of Act to determine whether CMS has statutory authority to increase PLI relative value units without reducing
the work and practice expense relative value units.

We also received several comments that expressed support for maintaining stability in the practice expense RVUs. The comment stated "much like what is done with work relative values, any code-level refinements due to annual coding changes that result in a nonbudget neutral impact should not result in a reduction of all practice expense relative values. 'The comment requested that CMS present an analysis of this issue in an upcoming proposed rule and recommended that adjustments related to the MEI rebasing not be applied to the practice expense relative values.
Response: We share the concern about establishing stability in the practice expense RVUs. As we indicated in the June 28, 2002 proposed rule ( 67 FR 43851), "once the refinement process is complete, we believe the physician community has a reasonable expectation that the practice expense RVUs will not change from year to year unless further refinement is undertaken." We plan to analyze in an upcoming proposed rule whether there are any alternatives to our current practice of rescaling the practice expense RVUs to apply budget neutrality. However, we disagree with the comments that suggest we only increase the malpractice expense RVUs and not apply any adjustments to the work and practice expense RVUs to match the MEI weights. It is not possible to match the aggregate RVUs to the new MEI weights if we make no adjustments to both work and practice expense and adjust only the malpractice RVUs and the conversion factor. While it would be possible to maintain budget neutrality for the increase in malpractice RVUs by reducing the conversion factor, the aggregate number of RVUs for work and practice expense would not match the MEI weights unless we could adjust at least two of the three RVUs in combination with applying a compensating adjustment to the CF.

We have considered the comment suggesting that we use the Secretary's section 1848(c) "ancillary" policies authority to adjust the RVUs to match the MEI weights but not maintain budget neutrality. Section 1848(c) states that the Secretary may establish ancillary policies (with respect to the use of modifiers, local codes, and other matters) as may be necessary to implement this section." We believe that this section of the statute must, nonetheless, be read consistently with the requirements of section 1848(c)(2)(B)(ii)(II) of the Act requiring that changes to RVUs cannot cause the amount of expenditures to increase or decrease by more than $\$ 20$ million from
the amount of expenditures that would have been made if such adjustments had not been made. We believe the statute is clear and any increase in the malpractice expense RVUs must be offset by decreases to the work and practice expense RVUs or the conversion factor.

We also do not believe that the work RVUs should be maintained and a separate "work adjustor" established. While such policy was adopted following the 5 -year review of physician work in 1997, we used this procedure only because the effect of the work adjustor could be femoved once resource-based practice expense RVUs were adopted in 1999. We did not find the work adjustor to be desirable. It added an extra element to the physician fee schedule payment calculation and created confusion and questions among the public who had difficulty using the RVUs determine a payment amount that matched the amount actually paid by Medicare.

We acknowledge the comments that indicate that the work RVUs are used for many purposes other than Medicare payment. While our proposal would slightly reduce the absolute value of the physician work RVUs, it would not change their relative values since there would be a uniform decrease to all of the RVUs. We believe the relative relationship among the values for the services makes them useful for analysis for purposes other than Medicare payment. Since the relative values will be left unchanged, we do not believe the work RVUs will lose their utility for these other uses.

We disagree that our proposed rule did not provide enough information upon which to determine the impact on payment for a given service. The proposed rule provided the specific level of the estimated adjustments. While we did not actually apply the adjustments to the RVUs shown in Addendum B, any interested party could determine the effect of our proposal on any given service with the information we provided. We further noted that the adjustments we provided were estimated and would change once we made final determinations of the work, practice expense and malpractice RVUs for 2004. For the final rule, we will reduce the work RVUs by 0.57 percent ( 0.9943 ), the practice expense by 0.77 ( 0.9923 ) percent and increase the malpractice RVUs by 19.86 percent (1.1986). We have also modeled the impact of our proposal by specialty in the impact section of this final rule.
With respect to the comments about our proposal and the large increases in professional liability premiums, we
have not asserted that our policy to adjust the RVUs will resolve this issue. While the comments that our policy will increase payments for some service and decrease payments for payments for others are correct, we note that payments for services with high malpractice RVUs will increase the most in payment while there will be negligible impact on payment for most other services. Such a policy will improve our payment policies by giving more weight to the malpractice RVU in determining Medicare total payment consistent with the proportion that professional liability expenses represent of total physician expenses. As indicated in the impact section, services provided by cardiac and thoracic surgeons, neurosurgeons, orthopedic surgeons, vascular surgeons and emergency physicians are increasing in payment as a result of this proposal. There will be little impact of these adjustments on all other specialties.

## C. The Update Adjustment Factor

Section 1848(d) of the Act provides that the physician fee schedule update is equal to the product of the MEI and an "update adjustment factor" or UAF. The UAF is applied to make actual and target expenditures (referred to in the law as "allowed expenditures") equal. Allowed expenditures are equal to actual expenditures in a base period updated each year by the SGR. The SGR sets the annual rate of growth in
allowed expenditures and is determined by a formula specified in section 1848(f) of the Act.

## 1. Calculation Under Current Law

Under section 1848 (d)(4)(A) of the Act, the physician fee schedule update for a year is equal to the product of(1) 1 plus the Secretary's estimate of the percentage increase in the MEI for the year, divided by 100 and (2) 1 plus the Secretary's estimate of the UAF for the year. Under section $1848(\mathrm{~d})(4)(B)$ of the Act, the UAF for a year beginning with 2001 is equal to the sum of the following-

- Prior Year Adjustment Component. An amount determined by-
- Computing the difference (which may be positive or negative) between the amount of the allowed expenditures for physicians' services for the prior year (the year prior to the year for which the update is being determined) and the amount of the actual expenditures for such services for that year;
- Dividing that difference by the amount of the actual expenditures for such services for that year; and
- Multiplying that quotient by 0.75 .
- Cumulative Adjustment Component. An amount determined by-
- Computing the difference (which may be positive or negative) between the amount of the allowed expenditures for physicians' services from April 1, 1996, through the end of the prior year
and the amount of the actual expenditures for such services during that period;
- Dividing that difference by actual expenditures for such services for the prior year as increased by the sustainable growth rate for the year for which the update adjustment factor is to be determined; and
- Multiplying that quotient by 0.33 .

Section 1848(d)(4)(E) of the Act requires the Secretary to recalculate allowed expenditures consistent with section 1348(f)(3) of the Act. Section $1848(f)(3)$ specifies that the SGR (and, in turn, allowed expenditures) for the upcoming calendar year (2004 in this case), the current calendar year (2003) and the preceding calendar year (2002) are to be determined on the basis of the best data available as of September 1 of the current year. Allowed expenditures are initially estimated and subsequently revised twice. The second revision occurs after the calendar year has ended (that is, we are making the final revision to 2002 allowed expenditures in this final rule). Once the SGR and allowed expenditures for a year have been revised twice, they are final.

Table 13 shows annual and cumulative allowed expenditures for physicians' services from April 1, 1996 through the end of the current calendar year, including the transition period to a calendar year system that occurred in 1999.

Table 13

|  | Period | Annual allowed expenditures (\$ in billions) | Cumulative allowed expenditures (\$ in billions) | $\begin{aligned} & \text { FY/CY } \\ & \text { SGR } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: |
| 4/1/96-3/31/97 |  | 48.9 | 48.9 | N/A |
| 4/1/97-3/31/98 | ..... | 50.5 | 99.4 | FY $1998=3.2 \%$ |
| 4/1/98-3/31/99 |  | 52.6 | 152.0 | FY $1999=4.2 \%$ |
| 1/1/99-3/31/99 |  | 13.3 | (1) | FY $1999=4.2 \%$ |
| 4/1/99-12/31/99 |  | 42.1 | (2) | FY $2000=6.9 \%$ |
| 1/1/99-12/31/99 |  | 55.3 | 194.1 | FY 1999/2000 ${ }^{3}$ |
| 1/1/00-12/31/00 |  | 59.4 | 253.4 | CY $2000=7.3 \%$ |
| 1/1/01-12/31/01 |  | 62.0 | 315.5 | CY $2001=4.5 \%$ |
| 1/1/02-12/31/02 |  | 67.2 | 382.6 | CY $2002=8.2 \%$ |
| 1/1/03-12/31/03 |  | 71.7 | 454.2 | CY 2003 = 6.7\% |
| 1/1/04-12/31/04 | ......... | 77.0 | 528.6 | CY $2004=7.4 \%$ |

[^109]Consistent with section 1848(d)(4)(E) of the Act, table 13 includes our final revision of allowed expenditures for 2002, a recalculation of allowed expenditures for 2003 , and our initial
estimate of allowed expenditures for 2004. To determine the update adjustment factor for 2004, the statute requires that we use allowed and actual expenditures from April 1, 1996 through

December 31, 2003 and the 2004 SGR. Consistent with section $1848(\mathrm{~d})(4)(\mathrm{E})$, we will be making further revisions to 2003 and 2004 SGRs and 2003 allowed expenditures. Because we have
incomplete actual expenditure data for 2003, we are using an estimate for this period. Any difference between current
estimates and final figures will be taken into account in determining the update adjustment factor for future years.

We are using figures from table 13 in the statutory formula illustrated below:

$$
\mathrm{UAF}=\frac{\operatorname{Target}_{03}-\text { Actual }_{03}}{\text { Actual }_{03}} \times .75+\frac{\text { Target }_{4 / 96-12 / 03}-\text { Actual }_{4 / 96-12 / 03}}{\text { Actual }_{03} \times \mathrm{SGR}_{04}} \times .33
$$

UAF = Update Adjustment Factor
Target $0_{03}=$ Allowed Expenditures for 2003 or $\$ 71.7$ billion
Actual ${ }_{03}=$ Estimated Actual
Expenditures for $2003=\$ 77.8$
billion

Target ${ }_{4 / 96-12 / 03}=$ Allowed Expenditures from $4 / 1 / 1996-12 / 31 / 2002=\$ 454.2$ billion
Actual ${ }_{4 / 96-12 / 02}=$ Estimated Actual Expenditures from 4/1/1996-12/31/ $2003=\$ 462.0$ billion

$$
\frac{\$ 71.7-\$ 77.8}{\$ 77.8} \times .75+\frac{\$ 454.2-\$ 462.0}{\$ 77.8 \times 1.074} \times .33=-.090
$$

Section 1848(d)(4)(D) of the Act indicates that the UAF determined under section 1848(d)(4)(B) of the Act for a year may not be less than -0.070 or greater than 0.03 . The calculated UAF of -0.090 is less than the statutory limit of -0.070 . Therefore, the UAF for 2004 will be -0.70 .

Section 1848(d)(4)(A)(ii) of the Act indicates that 1 should be added to the UAF determined under section 1848(d)(4)(B) of the Act. Thus, adding 1 to -0.070 makes the update adjustment factor equal to 0.930 .

## VII. Allowed Expenditures for Physicians' Services and the

 Sustainable Growth Rate
## A. Medicare Sustainable Growth Rate

The SGR is an annual growth rate that applies to physicians' services paid for by Medicare. The use of the SGR is intended to control growth in aggregate Medicare expenditures for physicians' services. Payments for services are not withheld if the percentage increase in actual expenditures exceeds the SGR. Rather, the physician fee schedule update, as specified in section 1848(d)(4) of the Act, is adjusted based on a comparison of allowed expenditures (determined using the SGR) and actual expenditures. If actual expenditures exceed allowed expenditures, the update is reduced. If actual expenditures are less than allowed expenditures, the update is increased.

Section 1848(f)(2) of the Act specifies that the SGR for a year (beginning with 2001) is equal to the product of the following four factors:
(1) The estimated change in fees for physicians' services.

- (2) The estimated change in the average number of Medicare fee-forservice beneficiaries.
(3) The estimated projected growth in real GDP per capita.
(4) The estimated change in expenditures due to changes in law or regulations.
In general, section 1848(f)(3) of the Act requires us to publish SGRs for 3 different time periods, no later than November 1 of each year, using the best data available as of September 1 of each year. Under section $1848(f)(3)(\mathrm{C})(\mathrm{i})$ of the Act, the SGR is estimated and subsequently revised twice (beginning with the FY and CY 2000 SGRs) based on later data. (The Consolidated Appropriations Reduction Resolution of 2003 (P.L. 108-7) contained a provision permitting revision of the FY 1998 and FY 1999 SGRs. See the February 28, 2003 Federal Register (68 FR 9567) for a discussion of these SGRs. Under section $1848(f)(3)(\mathrm{C})(\mathrm{ii})$ of the Act, there are no further revisions to the SGR once it has been estimated and subsequently revised in each of the 2 years following the preliminary estimate. In this final rule, we are making our preliminary estimate of the 2004 SGR, a revision to the 2003 SGR, and our final revision to the 2002 SGR.

## B. Physicians' Services

Section 1848(f)(4)(A) of the Act defines the scope of physicians' services covered by the SGR. The statute indicates that the term "physicians' services" includes other items and services (such as clinical diagnostic laboratory tests and radiology services), specified by the Secretary, that are commonly performed or furnished by. a physician or in a physician's office, but does not include services furnished to a Medicare+Choice plan enrollee. We published a definition of physicians' services for use in the SGR in the Federal Register (66 FR 55316) on

November 1, 2001. We defined "physicians' services" to include many of the medical and other health services listed in section 1861(s) of the Act. For purposes of determining allowed expenditures, actual expenditures, and SGRs through December 31, 2002, we have specified that "physicians' services" include the following medical and other health services if bills for the items and services are processed and paid by Medicare carriers (and those items and services paid through intermediaries where specified):

- Physicians' services.
- Services and supplies furnished incident to physicians' services.
- Outpatient physical therapy services and outpatient occupational therapy services.
- Antigens prepared by or under the direct supervision of a physician.
- Services of physician assistants, certified registered nurse anesthetists, certified nurse midwives, clinical psychologists, clinical social workers, nurse practitioners, and clinical nurse specialists.
- Screening tests for prostate cancer, colorectal cancer, and glaucoma.
- Screening mammography, screening pap smears, and screening pelvic exams.
- Diabetes outpatient selfmanagement training services.
- Medical nutrition therapy services.
- Diagnostic x-ray tests, diagnostic laboratory tests, and other diagnostic tests (including outpatient diagnostic laboratory tests paid through intermediaries).
- X-ray, radium, and radioactive isotope therapy.
- Surgical dressings, splints, casts, and other devices used for the reduction of fractures and dislocations.
- Bone mass measurements.
C. Provisions Related to the Sustainable Growth Rate
Section 211(b)(1) of the BBRA amended section $1848(f)(1)$ of the Act to require that three SGR estimates be published in the Federal Register not later than November 1 of every year. In this final rule, we are publishing our preliminary estimate of the SGR for 2004, a revised estimate of the SGR for

2003, and our final determination of the SGR for 2002. Consistent with section $1848(f)(3)(C)$ of the Act, we are using the best data available to us as of September 1, 2003 for all of the figures.
D. Preliminary Estimate of the SGR for 2004

Our preliminary estimate of the 2004 SGR is 7.4 percent. We first estimated
the 2004 SGR in March and made the estimate available to the Medicare Payment Advisory Commission and on our website. Table 13 shows our March estimates and our current estimates of the factors included in the SGR:

Table 14

| Statutory factors | March estimate | Current estimate |
| :---: | :---: | :---: |
| Fees | 2.3\% (1.023) | 2.7\% (1.027) |
| Enrollment | 1.3\% (1.013) | 1.7\% (1.017) |
| Real Per Capita GDP | 2.7\% (1.027) | 2.8\% (1.028) |
| Law and Regulation | 0.0\% (1.000) | 0.0\% (1.000) |
| Total | 6.4\% (1.064) | 7.4\% (1.074) |

Note: Consistent with section $1848(f)(2)$ of the Act, the statutory factors are multiplied, not added, to produce the total (that is, 1.027 $\times 1.017 \times 1.028 \times 1.000=1.074$.) A more detailed explanation of each figure is provided below in section G.1.

## E. Revised SGR for 2003

Our current estimate of the 2003 SGR is 6.7 percent. Table 14 shows our preliminary estimate of the 2003 SGR that was published in the Federal

Register on December 1, 2002 (67 FR 80027) and our current estimate:

TABLE 15

| Statutory factors | $\begin{aligned} & 12 / 31 / 02 \text { esti- } \\ & \text { mate } \end{aligned}$ | Current estimate |
| :---: | :---: | :---: |
| Fees | 2.9\% (1.029) | 2.8\% (1.028) |
| Enrollment | 1.2\% (1.012) | 2.4\% (1.024) |
| Real Per Capita GDP | 3.3\% (1.033) | 1.4\% (1.014) |
| Law and Regulation .. | 0.0\% (1.000) | 0.0\% (1.000) |
| Total | 7.6\% (1.076) | 6.7\% (1.067) |

A more detailed explanation of each figure is provided below in section G.2.

## F. Final Sustainable Growth Rate for 2002

The SGR for 2002 is 8.3 percent. Table 16 shows our preliminary estimate of the SGR published in the Federal

Register on November 1, 2001 (66 FR 55317), our revised estimate published in the Federal Register on December 31, 2001 ( 67 FR 80028) and the final figures determined using the latest available data:

Table 16

| Statutory factors | 11/1/01 estimate | $\begin{gathered} 12 / 31 / 02 \\ \text { estimate }\left({ }^{1}\right) \end{gathered}$ | Final |
| :---: | :---: | :---: | :---: |
| Fees | 2.3\% (1.023) | 2.5\% (1.025) | 2.5\% (1.025) |
| Enrollment | 0.7\% (1.007) | 2.8\% (1.028) | 3.2\% (1.032) |
| Real Per Capita GDP | 1.7\% (1.027) | 2.3\% (1.023) | 1.4\% (1.014) |
| Law and Reg .............................................................................................................. | 0.8\% (1.008) | 1.1\% (1.011) | 1.0\% (1.010) |
| Total ...................................................................................................................... | 5.6\% (1.056) | 9.0\% (1.090) | 8.3\% (1.083) |

[^110]A more detailed explanation of each figure is provided below in section G.2.
G. Calculation of 2004, 2003, and 2002 Sustainable Growth Rates

## 1. Detail on the 2004 SGR

All of the figures used to determine the 2004 SGR are estimates that will be revised based on subsequent data. Any differences between these estimates and the actual measurement of these figures will be included in future revisions of the SGR and allowed expenditures and incorporated into subsequent physician fee schedule updates.
Factor 1-Changes in Fees for Physicians' Services (Before Applying Legislative Adjustments) for CY 2004
This factor is calculated as a weighted average of the 2004 fee increases for the different types of services included in the definition of physicians' services for the SGR. Medical and other health services paid using the physician fee schedule are estimated to account for approximately 80.3 percent of total allowed charges included in the SGR in 2004 and are updated using the MEI. The MEI for 2004 is 2.9 percent. Diagnostic laboratory tests are estimated to represent approximately 7.4 percent of Medicare allowed charges included in the SGR in 2004 and the costs of these tests are updated by the CPI-U. The CPI-U for 2004 that will be used to update clinical diagnostic laboratory tests is 2.1 percent. Drugs represent 12.3 percent of Medicare allowed charges included in the SGR. We are projecting a weighted average change in fees for drugs that are included in the SGR of 2.0 percent. Table 16 shows the weighted average of the MEI, laboratory and drug price increases for 2004:

Table 17

|  | Weight | Update |
| :--- | ---: | ---: |
| Physician .......... | 0.803 | 2.9 |
| Laboratory ........ | 0.074 | 2.1 |
| Drugs ............. | 0.123 | 2.0 |
| Weighted Aver- <br> age ............... | 1.000 | 2.7 |

After taking into account the elements described in table 16, we estimate that the weighted-average increase in fees for physicians' services in 2004 under the SGR (before applying any legislative adjustments) will be 2.7 percent.
Factor 2-The Percentage Change in the Average Number of Part B Enrollees from 2003 to 2004

This factor is our estimate of the percent change in the average number of fee-for-service enrollees from 2003 to
2004. Services provided to

Medicare+Choice ( $\mathrm{M}+\mathrm{C}$ ) plan enrollees are outside the scope of the SGR and are excluded from this estimate. Our actuaries estimate that the average number of Medicare Part B fee-forservice enrollees will increase by 1.7 percent from 2003 to 2004. Table 18 illustrates how this figure was determined:

Table 18

|  | 2003 | 2004 |
| :--- | ---: | ---: |
| Overall .............. | ${ }^{1} 38.535$ | ${ }^{1} 39.013$ |
| Medicare |  |  |
| +Choice .......... | ${ }^{1} 4.689$ | ${ }^{1} 4.606$ |
| Net ................. | ${ }^{1} 33.847$ | ${ }^{1} 34.407$ |
| Percent Increase |  | 21.7 |

## ${ }^{1}$ Millions. <br> ${ }^{2}$ Percent.

An important factor affecting fee-forservice enrollment is beneficiary enrollment in Medicare+Choice plans. Because it is difficult to estimate the size of the Medicare+Choice enrollee population before the start of a calendar year, at this time, we do not know how actual enrollment in Medicare+Choice plans will compare to current estimates. For this reason, the estimate may change substantially as actual Medicare fee-forservice enrollment for 2004 becomes known.

## Factor 3-Estimated Real Gross

 Domestic Product Per Capita Growth in 2004We estimate that the growth in real per capita GDP from 2003 to 2004 will be 2.8 percent. Our past experience indicates that there have also been large changes in estimates of real per capita GDP growth made before the year begins and the actual change in GDP computed after the year is complete. Thus, it is likely that this figure will change as actual information on economic performance becomes available to us in 2004.

## Factor 4-Percentage Change in

 Expenditures for Physicians' Services Resulting From Changes in Law or Regulations in CY 2004 Compared With CY 2003We are not projecting any change in spending in 2004 due to changes in law or regulations.
2. Detail on the 2003 SGR

A more detailed discussion of our revised estimates of the four elements of the 2003 SGR follows.

Factor 1-Changes in Fees for Physicians' Services (Before Applying Legislative Adjustments) for 2003

This factor was calculated as a weighted average of the 2003 fee increases that apply for the different types of services included in the definition of physicians' services for the SGR.
We estimate that services paid using the physician fee schedule account for approximately 82.7 percent of total allowed charges included in the SGR in 2003. These services were updated using the 2003 MEI of 3.0 percent. We estimate that diagnostic laboratory tests represent approximately 7.1 percent of total allowed charges included in the SGR in 2003. These services were updated by the 2003 CPI-U of 1.1 percent. We estimate that drugs represent 10.2 percent of Medicare allowed charges included in the SGR in 2003. Pursuant to section 1842(o) of the Act, Medicare pays for drugs based on 95 percent of AWP. Using wholesale pricing information and Medicare utilization for drugs included in the SGR, we estimate weighted average fee increases for drugs of 1.9 percent in 2003. Table 19 shows the weighted average of the MEI, laboratory and drug price increases for 2003:

## Table 19

|  | Weight | Update |
| :--- | ---: | ---: |
| Physician .......... | 0.827 | 3.0 |
| Laboratory ........ | 0.071 | 1.1 |
| Drugs ............. | 0.102 | 1.9 |
| Weighted Aver- |  |  |
| age ............... | 1.000 | 2.8 |

After taking into account the elements described in table 19, we estimate that the weighted-average increase in fees for physicians' services in 2003 under the SGR (before applying any legislative adjustments) will be 2.8 percent.
Factor 2-The Percentage Change in the Average Number of Part B Enrollees from 2002 to 2003

Our actuaries estimate that the average number of Medicare Part B fee-for-service enrollees (excluding beneficiaries enrolled in M+C plans) increased by 2.4 percent in 2003. Table 20 illustrates how we determined this figure:

Table 20
[In millions]

|  | 2002 | 2003 |
| :--- | :---: | :---: |
| Overall .............. | 38.074 | 38.535 |

TABLE 20-Continued [In millions]

|  | 2002 | 2003 |
| :--- | ---: | ---: |
| Medicare |  |  |
| +Choice ........... | 5.005 | 4.689 |
| Net ................ | 33.069 | 33.847 |
| Percent Increase | $\ldots . . . . . . . . . . . .$. | $2.4 \%$ |

Our actuaries' estimate of the 2.8 percent change in the average number of fee-for-service enrollees, net of Medicare+Choice enrollment for 2003, compared to 2002 is different from our preliminary estimate ( 1.2 percent for 2003 from the December 31, 2002 final rule ( 67 FR 80029)) because the historical base from which our actuarial estimate is made has changed. We now have complete information on Medicare fee-for-service enrollment for 2002 that is different than the figure we used one year ago. Further, we now have information on actual fee-for-service enrollment for the first 8 months of 2003. We would caution that our estimate of fee-for-service enrollment for 2003 could change again once we have complete information for the entire year.

## Factor 3-Estimated Real Gross Domestic Product Per Capita Growth in 2003

We estimate that the growth in real per capita GDP will be 1.4 percent in 2003. Our past experience indicates that there have also been large differences between our estimates of real per capita GDP growth made prior to the year's end and the actual change in this factor. Thus, it is likely that this figure will change further as complete actual information on 2003 economic performance becomes available to us in 2004.

Factor 4-Percentage Change in Expenditures for Physicians' Services Resulting From Changes in Law or Regulations in 2003 Compared With 2002

There were no statutory or regulatory changes that affected Medicare expenditures for services included in the SGR in 2003.

## 3. Detail on the 2002 SGR

A more detailed discussion of our revised estimates of the four elements of the 2002 SGR follows.
Factor 1-Changes in Fees for Physicians' Services (Before Applying Legislative Adjustments) for 2002

This factor was calculated as a weighted average of the 2002 fee increases that apply for the different types of services included in the
definition of physicians' services for the SGR.
Services paid using the physician fee schedule accounted for approximately 84.1 percent of total Medicare allowed charges included in the SGR in 2002 , and are updated using the MEI. The MEI for 2002 was 2.6 percent. Diagnostic laboratory tests represent approximately 7.2 of total Medicare allowed charges included in the SGR, and are typically updated by the CPI-U. However, the BBA required a 0.0 percent update in 2002 for laboratory services. Drugs represented approximately 8.7 percent of total Medicare allowed charges included in the SGR in 2002. Pursuant to section 1842(o) of the Act, Medicare pays for drugs based on 95 percent of AWP. Using wholesale pricing information and Medicare utilization for drugs included in the SGR, we estimate a weighted average fee increase for drugs of 2.8 percent in 2002. Table 21 shows the weighted average of the MEI, laboratory and drug price increases for 2002:

Table 21

|  | Weight | Update |
| :--- | ---: | ---: |
| Physician .......... | 0.841 | 2.6 |
| Laboratory ........ | 0.072 | 0.0 |
| Drugs ............ | 0.087 | 2.8 |
| Weighted Aver- <br> age ............. | 1.000 | 2.5 |

After taking into account the elements described in table 21, we estimate that the weighted-average increase in fees for physicians' services in 2002 under the SGR (before applying any legislative adjustments) was 2.5 percent.

Factor 2-The Percentage Change in the Average Number of Part B Enrollees from 2001 to 2002

We estimate the increase in the average number of fee-for-service enrollees (excluding beneficiaries enrolled in M+C plans) from 2001 to 2002 was 3.2 percent. Our calculation of this factor is based on complete data from 2002. Table 22 illustrates the calculation of this factor:

Table 22
[In millions]

|  | 2001 | 2002 |
| :--- | ---: | ---: |
| Overall ............. | 37.650 | 38.074 |
| Medicare |  |  |
| +Choice ......... | 5.608 | 5.005 |
| Net ................. | 32.041 | 33.069 |
| Percent Increase | $\ldots . . . . . . . . . . . . . .$. | $3.2 \%$ |

## Factor 3-Estimated Real Gross Domestic Product Per Capita Growth in 2002

We estimate that the growth in real per capita GDP was 1.4 percent in 2002. This is a final figure based on complete data for 2002.

Factor 4-Percentage Change in Expenditures for Physicians' Services Resulting From Changes in Law or Regulations in 2002 Compared With 2001
Sections 101 through 104 of the BIPA added Medicare coverage for a variety of new services that will affect the 2002 SGR. In addition, section 112 of BIPA made changes that will result in additional Medicare coverage for certain drugs that will affect 2002 spending for services included in the SGR. Prior to the enactment of the BIPA, Medicare paid only for drugs that cannot be selfadministered by the patient. BIPA allows Medicare to pay for drugs that can be, but are not usually, selfadministered. Accordingly, we are accounting for the increased Medicare drug expenditures that will result from implementation of section 112 of the BIPA. We are also adjusting this factor to account for including screening mammography services in the SGR consistent with our discussion of this issue in the November 1, 2001 Federal Register ( 66 FR 55318). After taking these provisions into account, our final estimate of the percentage change in expenditures for physicians' services resulting from changes in law or regulations is 1.0 percent for 2002.
VIII. Anesthesia and Physician Fee Schedule Conversion Factors for Calendar Year 2004

The 2004 physician fee schedule CF will be $\$ 35.1339$. The 2004 national average anesthesia conversion factor is \$16.43.

The specific calculations to determine the physician fee schedule and anesthesia CFs for 2004 are explained below.
Detail on Calculation of the 2004 Physician Fee Schedule Conversion Factor

Physician Fee Schedule Conversion Factor

Under section 1848(d)(1)(A) of the Act, the physician fee schedule CF is equal to the CF for the previous year multiplied by the update determined under section 1848(d)(4) of the Act.

We are illustrating the calculation for the 2004 physician fee schedule CF in table 23:

TABLE 23

| 2003 Conversion Factor ................ | $\$ 36.785$ |
| :--- | :--- |
| 2004 Update ......................... | 0.955 |
| 2004 Conversion Factor ........... | $\$ 35.133$ |

Anesthesia services do not have RVUs like other physician fee schedule services. Therefore, we account for any necessary RVU adjustments through an adjustment to the anesthesia fee schedule CF. We are adjusting the anesthesia CF to reflect the RVUs adjustments being made to all other physician fee schedule services to match the revised MEI weights. The 2003 anesthesia CF is $\$ 17.05$. Physician work represents 79.02 percent of the anesthesia CF (0.7902). We are decreasing this portion of the anesthesia CF by 0.57 percent ( 0.9943 ). Practice expenses represent 13.75 percent ( 0.1375 ) of the anesthesia CF. We are reducing this portion of the anesthesia conversion factor by 0.77 percent (0.9923) for the adjustment to match the RVUs with the MEI weights. In addition, we are increasing the practice expense portion of the anesthesia CF by 0.18 percent (1.0018) for changes to anesthesia practice expenses resulting from the refinement of practice expense RVUs. Taken together, we are reducing the practice expense portion of the anesthesia fee schedule CF by 0.59 percent $(0.9923 \times 1.0018=0.9941)$. Professional liability insurance represents 7.23 percent $(0.0723)$ of the anesthesia CF. We are increasing this portion of the anesthesia CF by 19.86 percent (1.1986). Taken together, the adjustments to the work, practice expense and malpractice portions of the anesthesia CF result in a total adjustment of 1.090 percent ( 0.7903 *0.9943 $)+((0.1347 \times 0.9941)+(0.0723$ $\times 1.1986)=1.0090$. To determine the anesthesia fee schedule CF for 2004, we used the following figures:

TABLE 24

| 2003 Anesthesia Conversion Fac- |  |
| ---: | ---: |
| tor ........................................... | $\$ 17.0522$ |
| Adjustments to match MEI |  |
| weights and practice expense |  |
| factor .................................... | 1.0090 |
| 2004 Update ....................... | 0.9551 |
| 2004 Anesthesia Conversion Fac- |  |
| tor ................................................. | $\$ 16.4339$ |

IX. Telehealth Originating Site Facility Fee Payment Amount Update

Section $1834(\mathrm{~m})$ of the Act establishes the payment amount for the Medicare telehealth originating site facility fee for
telehealth services provided from October 1, 2001, through December 31 2002 , at $\$ 20$. For telehealth services provided on or after January 1 of each subsequent calendar year, the telehealth originating site facility fee is increased by the percentage increase in the MEI as defined in section $1842(\mathrm{i})(3)$ of the Act. The MEI increase for 2004 is 2.9 percent.

Therefore, for CY 2004, the payment amount for HCPCS code "Q3014, telehealth originating site facility fee" is 80 percent of the lesser of the actual charge or $\$ 21.20$.

The Medicare telehealth originating site facility fee and MEI increase by the applicable time period is shown below.

TABLE 25

| Facility fee | MEI in- <br> crease <br> (percent) | Period |
| :--- | ---: | ---: |
| $\$ 20.00 \ldots .$. | N/A | $10 / 01 / 2001-12 / 31 /$ <br> 2002 |
| $\$ 20.60 \ldots .$. | 3.0 | $01 / 01 / 2003-12 / 31 /$ <br> 2003 |
| $\$ 21.20 \ldots . .$. | 2.9 | $01 / 01 / 2004-12 / 31 /$ <br> 2004 |

## X. Provisions of the Final Regulations

This final rule with comment period adopts the provisions of the August 2003 proposed rule except as noted elsewhere in the preamble. The following is a highlight of the changes made from the proposed rule.
For geographic practice cost indices, based upon the volatility of the premium data collected, our review of the comments received on the August 15, 2003 proposed rule, and our review of malpractice GPCIs, we have modified some of our GPCI calculations and assumptions. We reduced the overall impact associated with revision to the malpractice GPCIs by a factor of 50 percent to mitigate for the volatility of the data. As directed by the statute, we will implement half of this change in the first year (CY 2004) and half of this change in the second year (CY 2005).
For the creation G codes for monitoring heart rhythms issue, based on concerns raised by commenters, we will not proceed with the proposed HCPCS codes because we want to ensure that any HCPCS codes developed, encompass the various technologies that are being utilized for such monitoring.

For changes in payments to physicians managing patients on dialysis, we are moving forward with our proposals and we are adjusting the payment rates for the established $G$ codes. In addition we are adding
additional codes to address the concerns raised about home dialysis.
For the definition of diabetes for diabetes self-management training we adopted the AACE clinical definition. We also expanded our general language to include other types of diabetes.

For excision of benign and malignant lesions, we are not moving forward with our proposal, however, we will maintain the 2003 work RVUs as interim values for 2004 to allow opportunity for the specialty to resurvey these services.

For payment policies for anesthesia services we have decided to allow teaching anesthesiologists to bill, similarly to teaching CRNAs, for their involvement in two concurrent cases involving residents.

## XI. Collection of Information Requirements

This document does not impose information collection and recordkeeping requirements. Consequently, it need not be reviewed by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 35).

## XII. Response to Comments

Because of the large number of public comments we normally receive on Federal Register documents, we are not able to acknowledge or respond to them individually. We will consider all comments we receive by the date and time specified in the DATES section of this preamble, and, if we proceed with a subsequent document, we will respond to the major comments in the preamble to that document.

## XIII. Regulatory Impact Analysis

We have examined the impact of this rule as required by Executive Order 12866 (September 1993, Regulatory Planning and Review), the Regulatory Flexibility Act (RFA) (September 16, 1980 Pub. L. 96-354), section 1102(b) of the Social Security Act, the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4), and Executive Order 13132. Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). A regulatory impact analysis must be prepared for final rules with economically significant effects (that is, a final rule that would have an annual effect on the economy of \$100
million or more in any 1 year, or would adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities).

We have simulated the effect of the physician fee schedule changes that we are adopting in this final rule. We are making several changes to the physician fee schedule RVUs in this final rule. In general, section 1848(c)(2)(B)(ii)(II) requires that changes to RVUs cannot increase or decrease expenditures more than $\$ 20$ million. Thus, changes to the RVUs made pursuant to section 1848(c)(2)(B)(ii)(II) must be budget neutral. That is, increases in payments resulting from RVU changes must be offset by decreases in payments for other services and there will be redistribution in payment among physicians, practitioners and suppliers that bill Medicare for physician fee schedule services. We expect that the changes we are making to the physician fee schedule RVUs under section 1848(c) will result in a redistribution of Medicare allowed charges of more than $\$ 100$ million in one year. For this reason, we are considering this firal rule to be economically significant. Therefore, this final rule is a major rule and we have prepared a regulatory impact analysis.
The RFA requires that we analyze regulatory options for small businesses and other entities. We prepare a Regulatory Flexibility Analysis unless we certify that a rule would not have a significant economic impact on a substantial number of small entities. The analysis must include a justification concerning the reason action is being taken, the kinds and number of small entities the rule affects, and an explanation of any meaningful options that achieve the objectives and less significant adverse economic impact on the small entities.

Section 1102(b) of the Act requires us to prepare a regulatory impact analysis for any final rule that may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 603 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside a Metropolitan Statistical Area and has fewer than 100 beds.

For purposes of the RFA, physicians, non-physician practitioners, and suppliers are considered small businesses if they generate revenues of $\$ 6$ million or less. Approximately 95 percent of physicians (except mental
health specialists) are considered to be small entities. There are about 900,000 physicians, other practitioners and medical suppliers that receive Medicare payment under the physician fee schedule.
The analysis and discussion provided in this section as well as elsewhere in this final rule complies with the RFA requirements. Section 202 of the Unfunded Mandates Reform Act of 1995 also requires that agencies assess anticipated costs and benefits before issuing any rule that may result in expenditure in any 1 year by State, local, or tribal governments, in the aggregate, or by the private sector, of \$110 million. This final rule would not impose unfunded mandates on State, local, or tribal governments, or on the private sector of more than $\$ 110$ million dollars.

We have examined this final rule in accordance with Executive Order 13132 and have determined that this regulation would not have any significant impact on the rights, roles, or responsibilities of State, local, or tribal governments.

We have prepared the following analysis, which together with the rest of this preamble, meets all assessment requirements. It explains the rationale for, and purposes of, the rule, details the costs and benefits of the rule, analyzes alternatives, and presents the measures we propose to use to minimize the burden on small entities. As indicated elsewhere in this final rule, we are making changes to the Medicare Economic Index, refining resourcebased practice based practice expense RVUs, creating new codes for dialysis patient visits to their physicians and making a variety of other changes to our regulations, payments or payment policy to ensure that our payment systems are updated to reflect changes in medical practice and the relative value of services. We provide information for each of the policy changes in the relevant sections in this final rule. While this rule revises the definition of diabetes for the purposes of outpatient diabetes self-management training, it does not impose reporting, record-keeping and other compliance requirements. We are unaware of any relevant Federal rules that duplicate, overlap or conflict with this proposed rule. The relevant sections of this final rule contain a description of significant alternatives.

## A. Physician Fee Schedule Relative Value Units

As indicated above, we are making changes to the work and practice expense RVUs under the provisions of
section 1848(c)(2) of the Act and section 429(b) of BIPA. Under section 1848(c)(2) of the Act, adjustments to RVUs may not cause the amount of expenditures to differ by more than $\$ 20$ million from the amount of expenditures that would have resulted without such adjustments. We are making several changes under section 1848(c)(2) that would result in a change of expenditures that would exceed $\$ 20$ million threshold if we made no offsetting adjustments to either the conversion factor or RVUs.
With respect to practice expense, our policy has been to meet the budget neutrality requirements in the statute by incorporating a rescaling adjustment in the practice expense methodology. That is, we estimate the aggregate number of practice expense relative values that will be paid under current and revised policy in CY 2004. We apply a uniform adjustment factor to make the aggregate number of revised practice expense relative values equal the estimated number that would be paid under current policy. We are applying this policy for all changes that we are making under section 1848(c).

Table 26 shows the specialty level impact on payment of changes being made for CY 2004. The payment impacts reflect averages for each specialty based on Medicare utilization. The payment impact for an individual physician would be different from the average, based on the mix of services the physician provides. The average change in total revenues would be less than the impact displayed here since physicians furnish services to both Medicare and non-Medicare patients and specialties may receive substantial Medicare revenues for services that are not paid under the physician fee schedule. For instance, independent laboratories receive 17 of their revenues from physician schedule services and the remainder for laboratory fee schedule services that are unaffected by this rule. We modeled the impact of all changes to the relative value units and illustrated their effect in table 26. The column labeled "NPRM" shows the combined effect of all of the changes contained in the August 15, 2003 proposed rule (see 68 FR 49033 to 49038 for a detailed discussion of each provision).

The column labeled "Practice Expense Refinements" shows the impact on payment from further changes to the practice expense inputs that we made using information that became available to us since the proposed rule. In some cases, we made changes to the practice expense inputs in response to public comments. In other situations, we may have received
a price for an item of medical equipment or supplies where we previously did not have one. In most cases, these changes may increase or decrease the practice expense RVU for a given code but will have very little impact across all of the services provided by a specialty. However, in one case, we include prices for several items of equipment and supplies that are generally used by otolaryngologists. The addition of this new information increased payment for many procedural services provided by otolaryngologists and reduced payment for their diagnostic services. The net effect of these changes is to increase payments to otolaryngologists by the 1 percent shown in table x. Audiologists provide many of the same diagnostic services
that are billed to Medicare by otolaryngologists resulting in the approximate 2 percent decrease in payment shown in table 26 for audiologists. Similarly, there may be some very small additional impact on allergy from the additional practice expense refinements. There were a number of coding changes made by CPT to central venous access codes. It is possible there may be small impact on payment from these coding changes for interventional radiology.
The "Practice Expense Refinements" column also shows an increase in payment of 2 percent for radiation oncology and 1 percent for portable $x$ ray suppliers. These impacts are a result of our decision to use the non-physician work pool methodology to develop the
practice expense RVUs for procedure code 77418 (Intensity Modulated Radiation Therapy).

We also modeled the effect of adjusting the RVUs to match the new MEI weights. Because we are increasing the malpractice RVUs by approximately 20 percent, adjusting the RVUs to match the new MEI weights will result in an increase in payment for those specialties that perform services with high malpractice RVUs. Payments to cardiac surgery, neurosurgery, orthopedic surgery, thoracic surgery and vascular surgery will increase by approximately 1 percent. The column labeled "Total" shows the impact of all changes that we are making to the work and practice expense RVUs for 2004.

Table 26.-Impact of Physician Fee Schedule Changes on Total Medicare Allowed Charges by Physician, Practitioner and Supplier Subcategory

The statutory methodology for updating physician fee schedule conversion factor is specified in section 1848(d)(4) of the Act. Consistent with
the requirements of section $1848(\mathrm{~d})(4)$ of the Act, as explained in section VI of this final rule, we are reducing the physician fee schedule conversion
factor by approximately 4.5 percent. In table 27, we are showing the estimated change in average payments by specialty based on provisions of this final rule
and the estimated physician fee schedule update.

Table 27.-Impact of Physician Fee Schedule Changes on Total Medicare Allowed Charges by Physician, Practitioner, and Supplier Subcategory Including the Effect of the Physician Fee Schedule Update

|  |  |  |  |  |  |

Table 28 shows the impact on payments for selected high volume procedures of all of the changes previously discussed. This table shows the combined impact of the change in
the work, practice expense and malpractice RVUs and the estimated physician fee schedule update on total payment for the procedure. There are separate columns that show the change
in the facility rates and the non-facility rates. For an explanation of facility and non-facility practice expense refer to §414.22(b)(5)(i).

## B. Geographic Practice Cost Index Changes

Section 1848(e)(1)(A) of the Act requires that payments under the Medicare physician fee schedule vary among payment areas only to the extent that area costs vary as reflected by the area GPCIs. The GPCIs measure areas cost differences in the three components of the physician fee schedule: Physician work, practice expenses, and malpractice insurance. Section 1848(e)(1)(C) of the Act requires that the GPCIs be reviewed and, if necessary, revised at least every 3 years. Due to problems with the availability of U.S. Census Bureau data, which is the major resource utilized in both the work and practice expense GPCIs, we have updated only the malpractice GPCI in this regulation.
The first GPCI revision was implemented in 1995. The second revision was implemented in 1998. The third revision was implemented in 2001. This constitutes the fourth
revision to the GPCIs. Section 1848(e)(1)(C) of the Act also requires that GPCI revisions be phased in equally over a 2 -year period if more than one year has elapsed since the last adjustment.
In order to mitigate the volatility associated with malpractice insurance premiums, we reduced the percent change in the malpractice GPCIs by a factor of 50 percent. As directed by the statute, we will implement $1 / 2$ of this change in the first year (CY 2004) and $1 / 2$ of this change in the second year (CY 2005). During this two-year phase-in, we will continue to work with the State Departments of Insurance to obtain the most current malpractice premium data available. As more current data are obtained, we will review and revise the malpractice GPCIs as appropriate.

An estimate of the 2004 proposed malpractice GPCI changes can be demonstrated by a comparison of area geographic adjustment factors (GAFs).
The GAFs are a weighted composite of each area's work, practice expense, and
malpractice expense GPCIs using the national GPCI cost share weights. While we do not actually use the GAFs in computing the fee schedule payment for a specific service, they are useful in comparing overall area costs and payments. The actual effect on payment for any specific service will deviate from the GAF to the extent that the service's proportions of work, practice expenses, and malpractice expense RVUs differ from those of the GAF. Table 27 shows the estimated effects of the revised 2004 malpractice GPCIs on area GAFs. As directed by statute, the 2004 GAFs reflect only $1 / 2$ of the impact of the revision to the malpractice GPCIs.
With the exception of Detroit, Michigan, no locality experienced an increase of more than 1 percent in total payments due to the revision of their malpractice GPCI for 2004. Alternatively, locality specific decreases in total payments due to the revision of the malpractice GPCIs do not exceed 1 percent for any given locality in 2004.

## C. Tracking Codes

We are adopting a policy that will allow CMS to create national payment policy and determine national payment amounts for CPT tracking codes regardless of whether a national coverage determination for a specific service has been made. Our policy will have no effect on Medicare expenditures but will allow for more flexibility in determining payment rates for new services.

## D. G Codes for Managing Dialysis Patients

As previously discussed in section II.D., we have reviewed our current payment policy for the monthly dialysis capitation payment in response to concerns that have been raised over whether our payment policy is consistent with current medical practice. We are establishing new G codes for these services and are aligning Medicare's payment to recognize the higher amount of physician work associated with more frequent face-toface visits. Aggregated Medicare payments to physicians for treating dialysis patients will not be increased or decreased by the establichment of these new procedure codes. Relative to payment based on the current CPT codes, Medicare payments to physicians for providing fewer than four visits per month will decrease. If the physician provides four or more visits per month, payment will increase. The net effect of these payment changes will not increase or decrease aggregate Medicare payment for physician services provided to dialysis patients.

## E. Rebasing and Revising the MEI

Section IV.B. of this final rule discusses rebasing and revising the MEI for the CY 2004 physician fee schedule. Substituting the 2000 MEI weights in place of the 1996 weights increases the MEI by 0.1 percent for 2004. After 2004,
the MEI in some years is likely to be unaffected by using more recent year weights while other years may have slightly higher increases (between 0.1 to 0.2 percentage points).

## F. Definition of Diabetes for Diabetes

 Self-Management TrainingIn section III.A., we revised the definition of diabetes for purposes of the Outpatient Diabetes Self-Management Training benefit and are using this definition to determine beneficiary eligibility for Medical Nutrition Therapy when the beneficiary has a diagnosis of diabetes. The streamlining of the beneficiary eligibility requirements for Outpatient Diabetes Self-Management Training will reduce administrative burden for the referring physician or qualified non-physician practitioner and for the accredited Outpatient Diabetes Self-Management Training programs by simplifying documentation requirements and eliminating the need for reconsiderations and appeals to clarify that the requirements have been met. As indicated in the February 28, 2003 Federal Register (68 FR 9572), we incorporated an adjustment to the SGR consistent with our original estimates of expenditures associated with this new benefit. Our experience is that expenditures have been less than originally estimated. We expect that simplifying administrative requirements associated with this new benefit will make it more likely that expenditures for diabetes self-management training will be consistent with original estimates and there will be no increase in Medicare expenditures from making these modifications.

## G. Payment Policies for Anesthesia Services

In section III.D. of this final rule, we discussed Medicare payment for anesthesia services involving anesthesiologists and residents.

Effective January 1, 2004, we are revising our teaching anesthesia rules to allow teaching anesthesiologists to bill, similar to teaching CRNAs, for their involvement in two concurrent cases with residents. The policy change will allow anesthesiologists to be paid either under the rules for medical direction or the same way that teaching CRNAs are paid for two concurrent cases. We areuncertain how the practice arrangements of teaching anesthesiologists will change as a result of this new policy. We believe that most teaching anesthesiologists will continue to function under the medical direction practice model for concurrent cases involving residents. Therefore, we believe there will be minimal change in Medicare program expenditures as a result of this change.

## H. Alternatives Considered

This proposed rule contains a range of policies. The preamble identifies those policies when discretion has been exercised and presents rationale for our decisions, including a presentation of nonselected options.

## I. Impact on Beneficiaries

Although changes in physicians' payments were large when the physician fee schedule was implemented in 1992, we detected no problems with beneficiary access to care. While it has been suggested that the negative update for 2004 may affect beneficiary access to care, we note that the formula to determine this update is set by statute and this regulation cannot, and does not, change it. Nevertheless, we remain concerned about the issue and will continue to study the issue to the best of our ability with available resources.
In accordance with the provisions of Executive Order 12866, this regulation was reviewed by the Office of Management and Budget.

## List of Subjects

## 42 CFR Part 410

Health facilities, Health professions, Kidney diseases,
42 CFR Part 414
Administrative practice and procedure, Health facilities, Health professions, Kidney diseases, Medicare, Reporting and recordkeeping requirements, Rural areas, X-rays.

- For the reasons set forth in the preamble, the Centers for Medicare \& Medicaid Services amends 42 CFR chapter IV as follows:

## PART 410-SUPPLEMENTARY MEDICAL INSURANCE (SMI) BENEFITS

- 1. The authority citation for part 410 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

- 2. Section 410.130 is amended by revising the definition of "Diabetes" to read as follows:

## §410.130 Definitions

Diabetes means diabetes mellitus, a condition of abnormal glucose nuetabolism diagnosed using the following criteria: A fasting blood sugar greater than or equal to $126 \mathrm{mg} / \mathrm{dL}$ on two different occasions; a 2 hour postglucose challenge greater than or equal to $200 \mathrm{mg} / \mathrm{dL}$ on 2 different occasions; or a random glucose test over 200 mg / dL for a person with symptoms of uncontrolled diabetes.

- 3. Section 410.140 is amended by adding the definition of "Diabetes" in alphabetical order to read as follows:

## §410.140 Definitions

Diabetes means diabetes mellitus, a condition of abnormal glucose metabolism diagnosed using the following criteria: A fasting blood sugar greater than or equal to $126 \mathrm{mg} / \mathrm{dL}$ on two different occasions; a 2 hour postglucose challenge greater than or equal to $200 \mathrm{mg} / \mathrm{dL}$ on 2 different occasions; or a random glucose test over $200 \mathrm{mg} /$ dL for a person with symptoms of uncontrolled diabetes.

- 4. Section 410.141 is amended by revising paragraph (d) to read as follows:
§410.141 Outpatient diabetes selfmanagement training.
(d) Beneficiaries who may be covered. Medicare Part B covers outpatient diabetes self-management training for a beneficiary who has been diagnosed with diabetes.

## PART 414-PAYMENT FOR PART B MEDICAL AND OTHER HEALTH SERVICES

- 1. The authority citation for part 414 continues to read as follows:

Authority: Secs. 1102, 1871, and 1881(b)(1) of the Social Security Act (42 U.S.C. 1302, 1395hh, and $1395 \mathrm{rr}(\mathrm{b})(1)$ ).

- 2. Section $414.22(\mathrm{~b})(6)(\mathrm{iii})$ is revised to read as follows:

## §414.22 Relative value units (RVUs).

(b) * * *
(6) * * *
(iii) CMS will consider for use in determining practice expense RVUs for the physician fee schedule survey data and related materials submitted to CMS by March 1, 2004 to determine CY 2005 practice expense RVUs and by March 1, 2005 to determine CY 2006 practice expense RVUs:

E 3. Section 414.46 is amended to-
a a. Redesignate paragraphs (e) through (g) as paragraphs (f) through (h), respectively.
Eb. Add new paragraph (e).

- The addition reads as follows:
§414.46 Additional rules for payment of anesthesia services.
(e) Physicians involved with two concurrent cases with residents. The physician can bill base units and time units based on the amount of time the physician is actually present with the resident during each of two concurrent cases furnished on or after January 1, 2004.
(1) To bill the base units, the physician must be present with the resident during the pre- and postanesthesia care included in the base units.
(2) If the physician is not present with the resident during pre- and postanesthesia care, then the physician may bill the case as a medically directed case in accordance with paragraph (d) of this section.

## (Catalog of Federal Domestic Assistance <br> Program No. 93.774, Medicare-

Supplementary Medical Insurance Program)

Dated: October 28, 2003.
Thomas A Scully,
Administrator, Centers for Medicare \& Medicaid Services.

Approved: October 28, 2003.
Tommy G. Thompson,
Secretary.
Note: These addenda will not appear in the Code of Federal Regulations.

## Addendum A-Explanation and Use of <br> Addenda B

The addenda on the following pages provide various data pertaining to the Medicare fee schedule for physicians' services furnished in 2003. Addendum B contains the RVUs for work, non-facility practice expense, facility practice expense, and malpractice expense, and other information for all services included in the physician fee schedule.
In previous years, we have listed many services in Addendum B that are not paid under the physician fee schedule. To avoid publishing as many pages of codes for these services, we are not including clinical laboratory codes and most alphanumeric codes (Healthcare Common Procedure Coding System (HCPCS) codes not included in CPT) in Addendum B.
Addendum B-2003 Relative Value Units and Related Information Used in Determining Medicare Payments for 2003

This addendum contains the following information for each CPT code and alphanumeric HCPCS code, except for alphanumeric codes beginning with $B$ (enteral and parenteral therapy), E (durable medical equipment), K (temporary codes for non-physicians' services or items), or L (orthotics), and codes for anesthesiology.

1. CPT/HCPCS code. This is the CPT or alphanumeric HCPCS number for the service. Alphanumeric HCPCS codes are included at the end of this addendum.
2. Modifier. A modifier is shown if there is a technical component (modifier TC) and a professional component (PC) (modifier -26) for the service. If there is a PC and a TC for the service, Addendum B contains three entries for the code: One for the global values (both professional and technical); one for modifier - 26 (PC); and one for modifier TC. The global service is not designated by a modifier, and physicians must bill using the code without a modifier if the physician furnishes both the PC and the TC of the service.
Modifier - 53 is shown for a discontinued procedure. There will be RVUs for the code (CPT code 45378) with this modifier.
3. Status indicator. This indicator shows whether the CPT/HCPCS code is in the physician fee schedule and whether it is separately payable if the service is covered.

A = Active code. These codes are
separately payable under the fee schedule if covered. There will be RVUs for codes with this status. The presence of an " $A$ " indicator does not mean that Medicare has made a national decision regarding the coverage of
the service. Carriers remain responsible for coverage decisions in the absence of a national Medicare policy.

B = Bundled code. Payment for covered services is always bundled into payment for other services not specified. If RVUs are shown, they are not used for Medicare payment. If these services are covered, payment for them is subsumed by the payment for the services to which they are incident. (An example is a telephone call from a hospital nurse regarding care of a patient.)

C = Carrier-priced code. Carriers will establish RVUs and payment amounts for these services, generally on a case-by-case basis following review of documentation, such as an operative report.
$\mathrm{D}=$ Deleted code. These codes are deleted effective with the beginning of the calendar year.
$\mathrm{E}=$ Excluded from physician fee schedule by regulation. These codes are for items or services that we chose to exclude from the physician fee schedule payment by regulation. No RVUs are shown, and no payment may be made under the physician fee schedule for these codes. Payment for them, if they are covered, continues under reasonable charge or other payment procedures.

F = Deleted/discontinued codes. Code not subject to a 90-day grace period.
$G=$ Code not valid for Medicare purposes. Medicare does not recognize codes assigned this status. Medicare uses another code for reporting of, and payment for, these services.
$\mathrm{H}=$ Deleted modifier. Either the TC or PC component shown for the code has been deleted, and the deleted component is shown in the data base with the H status indicator. (Code subject to a 90-day grace period.)
$I=$ Not valid for Medicare purposes. Medicare uses another code for the reporting of, and the payment for, these services. (Code NOT subject to a 90-day grace period.)
$\mathrm{N}=$ Non-covered service. These codes are non-covered services. Medicare payment may not be made for these codes. If RVUs are shown, they are not used for Medicare payment.
$\mathbf{P}=$ Bundled or excluded code. There are no RVUs for these services. No separate payment should be made for them under the physician fee schedule.
-If the item or service is covered as incident to a physician's service and is furnished on the same day as a physician's service, payment for it is bundled into the payment for the physician's service to which it is incident (an example is an elastic bandage furnished by a physician incident to a physician's service).
-If the item or service is covered as other than incident to a physician's service, it is excluded from the physician fee schedule (for example, colostomy supplies) and is paid under the other payment provisions of the Act.
$R=$ Restricted coverage. Special coverage instructions apply. If the service is covered and no RVUs are shown, it is carrier-priced. $\mathrm{T}=$ Injections. There are RVUs for these services, but they are only paid if there are no other services payable under the physician fee schedule billed on the same date by the same provider. If any other services payable under the physician fee schedule are billed on the same date by the same provider, these services are bundled into the service(s) for which payment is made.
X = Exclusion by law. These codes represent an item or service that is not within the definition of "physicians' services" for physician fee schedule payment purposes. No RVUs are shown for these codes, and no payment may be made under the physician fee schedule. (Examples are ambulance services and clinical diagnostic laboratory services.)
4. Description of code. This is an abbreviated version of the narrative description of the code.
5. Physician work RVUs. These are the RVUs for the physician work for this service in 2003. Codes that are not used for Medicare payment are identified with a " + ".
6. Facility practice expense RVUs. These are the fully implemented resource-based practice expense RVUs for facility settings.
7. Non-facility practice expense RVUs.

These are the fully implemented resourcebased practice expense RVUs for non-facility settings.
8. Malpractice expense RVUs. These are the RVUs for the malpractice expense for the service for 2003.
9. Facility total. This is the sum of the work, fully implemented facility practice expense, and malpractice expense RVUs.
10. Non-facility total. This is the sum of the work, fully implemented non-facility practice expense, and malpractice expense RVUs.
11. Global period. This indicator shows the number of days in the global period for the code ( 0,10 , or 90 days). An explanation of the alpha codes follows:

MMM = The code describes a service furnished in uncomplicated maternity cases including antepartum care, delivery, and postpartum care. The usual global surgical concept does not apply. See the 1999 Physicians' Current Procedural Terminology for specific definitions.

XXX = The global concept does not apply. YYY = The global period is to be set by the carrier (for example, unlisted surgery codes).
ZZZ = Code related to another service that is always included in the global period of the other service. (Note: Physician work and practice expense are associated with intraservice time and in some instances the postservice time.)
