Reparations Check Sheet

Aircraft Munitions

(Cross out one)

1. Name Kagamigahara Seki Seisakujo K.K. Code # 09-3

2. Prefecture: Gifu Year Built 1939

3. Reparation Status.

(a) Listed by Scapin No. 987

(b) Deleted by Scapin No. Negative

(c) Rec. for Deletion Negative None.

(d) Rec. for Addition Negative
(Not yet Listed)

4. Products.

	Items	Percent.
(a) Prewar.	Machine tools	70 %
	Airplane parts	30 %
(b) During war.	Airplane body parts	80 %
	Machine tools	20 %
(c) Post war.	None	

5. Year War Production Began? 1942

6. Is Plant Now in Operation? No

7. Size of Company:

	No. Machines	No. of Employees.
(a) Prewar.	250	500
(b) During war.	400	1,500
(c) Post war.	73	6

8. Condition of Plant 0 % PerCent Damaged

9. Remarks:

Removal of machinery will have little effect on the economy of the area . . . the idle condition, maintenance and custody costs do effect the economy of this region.

Reparations Check Sheet

Aircraft Munitions

(Cross out one)

1. Name Kawasaki Aircraft Industry Code # 09-6

2. Prefecture: Gifu Year Built 1937

3. Reparation Status.

(a) Listed by Scapin No. 987

(b) Deleted by Scapin No. Negative

(c) Rec for Deletion Negative To be retained for reparations

(d) Rec. for Addition Negative
(Not yet Listed)

4. Products.

Items		Percent.
(a) Prewar	Airplane parts	100%
(b) During War	Airplane parts	100%
(c) Post War	Wood work, fire extinguishers, auto repair, daily articles	100%

5. Year War Production Began? 1941

6. Is Plant Now in Operation? Yes

7. Size of Company:

	No. Machines	No. of Employees
(a) Prewar	470	10,000
(b) During War	1,129	37,000
(c) Post War	1,885	1,119

8. Condition of Plant 90 % Percent Damaged

9. Remarks: The number of machines during wartime (1,129) did not include portable machine tools, electric drills, pneumatic rivetters, etc., but the number of post war (1,885) include these as well as 77 wood working machines. . . . . It is recommended that small quantities of peacetime equipment used in war production but vital to reconversion remain . . . . The removal of remaining large quantities of surplus heavy industry machinery and equipment will have diminutive effect on the industry and the general economy of this area.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

9 Remarks:

1. The Nakajima Aircraft Corp bought controlling interest in this company in 1942 and converted it to the manufacture of aircraft parts. The company is composed of the number 1 Plant as listed for reparations and four branch factories. The conversion of these plants was of such a nature and volumn in the way of installed machinery as to consider it as being primarily constructed for war time aircraft production.

2. This plant reconverted to peacetime production in November 1945.

3. The removal of this plant will have no major effect on the economy of the region.

4. This plant has no stored peacetime equipment not used in war production.

5. No major labor displacement problem will be created by the removal of this plant.

6. The products of this plant can be manufactured by other non-reparations plants.

S-1840

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

9. Remarks:

1. Pertinent critical information concerning conversion to war production.

a. In October 1943 the Nakajima Aircraft Corp purchased the land and building of this plant from the Ryomo Sanski K.K. and built an aircraft accessory plant out of it.

2. Reconversion to peace time production.

a. All reparations machinery belonging to this plant has been centralized into the Isesaki #1 plant, and the land and buildings released from custody and control of the US Armed Forces. On 5 Dec 47 the Fuji Ind Co converted this plant into a bus body plant. No reparations machinery is being used in this production.

3. Effect of removal on the economy of the region.

a. The reaparations machinery belonging to this plant is not being used therefore there will be no effect on the local economy of the removal of this machinery.

4. Comments relative to stored peacetime equipment not used in war production. -- Not applicable.

5. Peacetime equipment used in war production but vital to reconversion.

a. None.

6. Displacement of labor.

a. See note 3 above.

7. Lack of equivalent non-reparations facilities.

a. Not applicable.

9. Remarks:

1. The land and buildings of this plant were leased by the Nakajima Aircraft Corp from the Fuji Baseki K. K., a textile plant, in 1943 and converted to the wartime manufacture of aircraft parts by the installation of necessary machinery.

2. This plant is non-reconverted and has no machinery being used in peacetime production.

3. This plant is non-productive therefore its removal will have no effect on the local economy.

4. This plant has no stored peacetime equipment which was not used in war production.

5. Located in this plant is a hydro-electric generating plant and a steam power plant which are the property of the Fuji Baseki K. K. This equipment was used by the Nakajima Aircraft Corp in war production; however, it has been classified as exempted machinery on the inventory sheets. The Fuji Baseki K. K. has received permission from SCAP to reconvert the plant to textile manufacture and this headquarters considers the above mentioned equipment to be vital to such reconversion.

6. There will be no labor displacement problem created by the removal of this plant.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

9. Remarks:

1. This plant was constructed and equipped for war time air craft production.

2. This plant is non-reconverted. All machinery belonging to this plant was centralized into the Tatebayashi Industrial Company main plant (10-20) and inventoried under that plant number. After the above centralization was completed the plant was deleted from the reparations list and all land and buildings released from custody.

S-1840

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

9. Remarks:

1. Pertinent critical information concerning conversion to war production.

a. This plant was constructed in 1944 and began operation in February 1945. According to information received from the company the first products were screws and nuts for building purposes. In April 1945 the plant began retooling and manufacturing machines for the production of 20mm cannon shells for the Japanese Navy. The war ended before the company fimished this retooling and actual production started.

2. Reconversion to peacetime production. This plant was granted a reconversion permit on 16 January 1946 for the production of farm tools and bycicle parts. At present the plant is 100% engaged in the production of axels for bicicles.

3. Effect of removal on the economy of the region.

a. This plant is one of only a few in a non-industrial area however due to the size and amount of production the removal could have no measurable effect on the economy of the region.

4. Comments relative to stored peacetime equipment not used in war production.

a. Not applicable.

5. Peacetime equipment used in war production but vital to reconversion.

a. All machinery installed by the company prior to their begining to retool for the manufacture of 20mm cannon shells is being used and is vital to their production.

6. Displacement of Labor.

a. See note 3 above.

7. Lack of equivalent non reparations facilities.

a. The products being manufactured by this plant has no bearing on the local economy and there are many non reparation plants which could easily manufacture the same product.

Signed Fred L Saunders
Capt C Ord

S-B40

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

9 Remarks:

1. Pertinent critical information concerning conversion to wartime production:
   a. In 1942 this plant converted from the manufacture of throwing and arranging machines to the finishing and assembly of bomb cases. The only major change in machinery was the addition of 50 lathes for turning down bomb cases.
2. Reconversion to peacetime production:
   a. This plant reconverted to the production of throwing and arranging machines in Oct. 1945 with a monthly production of approximately 40 machines per month.
3. Effect of removal on the economy of the region:
   a. According to figures received from the Japanese government this plant is producing approximately 65% of the total production of throwing and arranging machines in Japan and it is believed that the removal of this plant will have an effect on the taxtile industry of Japan.
4. This plant has no stored peacetime equipment which was not used in war production.
5. All peacetime equipment used by this plant is considered vital to reconversion. However, it is believed that the machinery added during the war is in excess of their peacetime needs for production.
6. There will be no major labor displacement problem created by the removal of this plant.
7. Lack of equivalent non-reparations facilities:
   a. See note 3 above.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

9. Remarks:

1. Pertinent critical information concerning conversion to war production:

a. This plant was constructed for wartime aircraft production.

2. Reconversion to peacetime production:

a. Plant was converted to peacetime production in November 1945 and has been engaged solely in the manufacture of pots and pans.

3. The removal of this plant will have no effect on the economy of the region.

4. This plant has no peacetime equipment.

5. The removal of this plant will create no major problem of labor displacement.

6. The products of this plant can be manufactured in any of several non-reparations casting plants.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

9. Remarks:

1. Pertinent critical information concerning conversion to war production.

a. This plant was primarily established for wartime aircraft production.

2. Reconversion to peacetime production.

a. This plant donverted to peacetime production on 28 Janusry 1946 and has been engaged in the production of automobile parts and repairs.

3. Effect of removal on the economy of the Region.

a. None

4. Stored peacetime equipment not used in war production.

a. None

5. Peacetime equipment used in war production but vital to reconversion.

a. None.

6. Displacement of labor.

a. This plant is located in the largest industrial city of this prefecture and the small number of people employed by this plant will create no problem.

7. Lack of equivalent non-reparations facilities.

a. Sufficient facilities for the production of the items being manufactured by this plant are located in this area.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

9. Remarks:

1. In 1941 this plant converted to munitions production by the establishment of an arms shop. The conversion was of such a nature in the way of installed machinery as to consider it a major expansion.
2. In October 1945 this plant reconverted a small portion of the machines to the production of peacetime goods. The major portion of the machines are of a special purpose nature for munition manufacture and are unsuitable for reconversion.
3. The removal of this plant will have no major effect on the economy of the region.
4. This plant has no stored peacetime equipment not used in war production.
5. The piston ring section of this plant is considered to be vital to reconversion.
6. No major labor displacement problem will be created by the removal of this plant.
7. The products of this plant, with the exception of piston rings, can be manufactured by non-reparations plants.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

9: Remarks:

Because of the extreme damage suffered by the plant, and consequent shortage of funds, production has never been resumed. The outlook is very dim. In speaking recently to the manager of this company, he stated that it was doubtful whether the head office would attempt to rehabilitate this factory.

The machine tools owned by this company are of high quality and in good condition. However, all facilities were demolished by bombing and would have to be rebuilt. All former labor used by the factory has been displaced to other jobs,

9. Remarks:

The factory is now setting up a test model of Circular Knitting Machine. If this is satisfactory, they hope to produce for export at the rate of 30 per month. The financial situation is sound, factory is well managed and could employ more than 300 workers if production peak were reached. This factory is a branch of the company also located in the prefecture and who has an excellent reputation in making precision testing tools.
