"SAFETY FIRST"

Not Just a Place to Live In
BUT A HOME

Something you have always wanted; a home with a porch you can sit on and enjoy; a yard where the children can play; a garden where you can raise the things you want and flowers to brighten the home. These you can have and they will not cost much more than you would pay to rent such a place. Build this year; start today; consult with us.

Our office is the builders' information bureau.

Our yard is full of dry lumber, interior finish and everything in the building material line.

Our years of experience in building prompts us to offer you special service in planning your home and selecting your material.

W. J. DURHAM LUMBER CO.

Select Your Player Piano Like You Would A Watch

See that it has a good player-action.

While there are over 500 different named player-pianos, there are only a few makers of player-actions — these are covered by patents and therefore must be bought from the action maker.

The Lauterbach player piano has no equal in the world. PATENTED ACTION, and HIGHEST QUALITY.

player piano has the BEST OF OPERATIONS.

THE A

ORGAN

The Aeolian is the most famous manufacturer of player-pianos, costing in the neighborhood of \$100,000. Also makes the best reproducing players in the world.

most manufacturers of residences, as \$100,000. reproducing pianos.

RESPONSIBLE BANKING

Broadly speaking, the responsibility of a Bank is determined by the following considerations:

- (1) The REAL Value of its Security.
- (2) The CONSERVATIVE policy of the Institution.
- (3) The CHARACTER of its management.
- (4) The History of its Transactions.

These characteristics have won for the

NATIONAL MANUFACTURERS BANK

its ever increasing popularity and has allowed this institution to PERMANENTLY establish its claim as one of the leading banks in Winnebago County.

Our personal attention and efficient service is always at your command.

INTRODUCTORY

This issue of Sterling's Neenah City Directory, including rural routes patrons, records another step forward in the history of this prosperous and growing community. It presents an endless array of important and necessary information, compiled in convenient and logical order, and instantly at the service of the reader.

The publishers take pleasure in presenting this volume, with the assurance that the high standard established by them, on all their publications, has been fully maintained, and that neither labor or expense has been spared to produce a work as thoroughly correct as possible for a publication of this kind.

In taking over the publication of the Neenah Directory, we can assure the people of this community that it will always be our aim to merit their confidence and support, by giving them at all times a work that will compare favorably with any similar publications.

In conclusion we desire to express our thanks for the many courtesies that have been extended to our representatives, and for the patronage bestowed upon the work.

Neenah

Situated at the north shore of Lake Winnebago, and divided north and south by the Fox river Neenah is one of the most beautiful, healthful and desirable cities in the United States. Outlying is a most prosperous farm, stock and dairy region. Men of unusual character and business capability have carried to splendid success great industries within the city and given to the commercial life an impulse that is snappy and prompt in all commercial relationships.

There is room for more industries and opportunity for men of courage and faith in the gospel of sweat to crown their life efforts with equal success. The city is attractive for the homeseeker, as for him who is looking for business opportunity. Lake Winnebago, the eastern boundary, is the storage basin for a magnificent water power and provides pleasure and health privileges of inestimable value. Many guests come from the southland to sojourn here for the summer. Neenah schools are unsurpassed. The grades are continually on the advance in equipment and curricula. The high school building is declared by educators to be a model in adaptability. Its curriculum presents literary, scientific, commercial, manual training and domestic science courses, under a most capable faculty. Society is clean and high minded. Churches are well organized and alive to the moral and spiritual needs of the community. Hotel facilities are not surpassed in the valley. Transportation facilities are abundant. Main and branch lines of three great railways open the markets of the world to industrial and agricultural produce. The Soo line connects with the water transportation of the Great Lakes forty miles east; the C. & N. W. line and the C., M. & St. P. line with the same water transportation forty miles north; while the Wisconsin & Northern Railroad, just building into Neenah, which will be the southern terminal of the line, taps the greatest area of virgin timber in Wisconsin, 100 miles to the north. The United States government canal and waters of the Fox river connect Lake Winnebago and Green Bay, and afford water transportation during the open navigation months of the year. Electric railway cars leave the city every half hour, and traverse a most delightful region of farms, villages and cities thirty miles north and twenty miles south. Fine drives for carriage or auto stretch away in every direction through a glorious country, skirting lakes and rivers, over hills and down valleys that charm the senses, lift the mind to expressions of adoration, and give freely the joy of rest and health to all who partake of it.

SELECT YOUR PLAYER PIANO LIKE YOU WOULD A WATCH

See that it has a good player-action.

While there are over 500 different named player-pianos, there are only a few makers of player-actions — these are covered by patents and therefore must be bought from the action makers

The Lauter-Humana, the World's BEST player piano has no equal in the way of DURABILITY, EASE OF OPERATION, and HUMAN LIKE PLAYING.

THE AEOLIAN HOME PIPE ORGAN

The Aeolian Company is the foremost manufacturer of Pipe Organs for private residences, costing in some instances as much as \$100,000. Also makers of the Duo-Art reproducing players in the Steinway, Weber and Steck pianos.

118 Michigan St.

Milwaukee, Wis.

INTRODUCTORY

This issue of Sterling's Menasha City Directory, including rural routes patrons, records another step forward in the history of this prosperous and growing community. It presents an endless array of important and necessary information, compiled in convenient and logical order, and instantly at the service of the reader.

The publishers take pleasure in presenting this volume, with the assurance that the high standard established by them, on all their publications, has been fully maintained, and that neither labor or expense has been spared to produce a work as thoroughly correct as possible for a publication of this kind.

In taking over the publication of the Menasha Directory, we can assure the people of this community that it will always be our aim to merit their confidence and support, by giving them at all times a work that will compare favorably with any similar publications.

In conclusion we desire to express our thanks for the many courtesies that have been extended to our representatives, and for the patronage bestowed upon the work.

Menasha

Menasha—(an Indian word meaning “thorn” or “island”), a city of Winnebago county, Wisconsin, U. S. A., 88 miles north of Milwaukee and 14 miles north of Oshkosh, situated on the extreme northern extremity of Lake Winnebago, at its outlet into the Fox river. Menasha is served by the Minneapolis, St. Paul and Sault Ste. Marie, the Chicago and Northwestern, the Chicago, Milwaukee and St. Paul and the Wisconsin and Northern Railways, and by an inter-urban electric railway system. Doty Island, at the mouth of the Fox river, is a popular and picturesque summer resort. Menasha has excellent water power which is utilized in the manufacture of paper and sulphite pulp, lumber, woodenware and cooperage products, woolen and knit goods, leather, boats, bricks, pulleys, trucks, tractors, paper cartons, paper specialties and machinery. The first white man to visit the site of Menasha was probably Jean Nicolet, who seems to have come in the winter of 1634-1635 and to have found here villages of Fox and Winnebago Indians. Subsequently there were French and English trading posts here. The city was settled permanently in 1848, and was chartered in 1847.

A rapidly growing industry of Menasha represents an important step in the evolution of the wood-using industries of the Fox River Valley. Wood is the raw material for the paper mills, and paper is the raw material for such plants as the Menasha Printing and Carton Company; its specialty is the printing of great quantities of soap wrappers, gum wrappers, and bread wrappers and the manufacture of practically 90% of the ice cream and butter cartons used in the United States. A half million and a million soap wrappers a day and single orders for billions of wrappers are indicative of the output of this one plant. The operation of a paper mill by this company illustrates a principle of expansion of an industry, namely, the advantage gained by controlling its own supply of raw material.

The largest manufacturing concern in the Fox River Valley is the Menasha Wooden Ware Company, whose buildings, yards, side-tracks, etc., cover 65 acres bordering the Fox river. It uses over fifty buildings besides the drying houses. The industry began practically with the founding of Menasha and has grown to be the largest wooden ware plant in the world. The founder of the company (Mr. E. D. Smith) commenced with a single lathe, made his own tubs and pails and peddled them with a one-horse wagon. Now the plant uses yearly six thousand cars of material, including 300 to 400 cars of wire and hoop iron; 75 per cent of the wood used is basswood cut from the company's own tract of 125,000 acres in Northern Wisconsin. All of the logs are now received by rail. The following partial list of items indicates the magnitude of the operations. Its shipments aggregate a train load a week. The plant uses 25,000,000 feet of timber annually. Each year it makes:

Enough candy pails to hold 120,000,000 lbs. of candy.

Enough fish pails to hold 12,000,000 lbs. of fish.

Enough pickle kits to hold 1,800,000 gallons of pickles.

Enough tierces to hold 50,000,000 lbs. of lard.

Enough lard half barrels to hold 30,000,000 lbs. of lard.

Enough lard pails to hold 60,000,000 lbs. of lard.

Historic Sites In the City of Menasha and Near by Region

By Publius V. Lawson, LL. B.

In the city of Menasha, a statue bronze tablet 18x22, bolted to a Winnebago Manitou boulder, set on the top of a concrete monument, twelve feet high, to commemorate the coming of Jean Nicolet, the first white man in Wisconsin. Located at the park on Doty Island, near the site of the Winnebago village that Nicolet came to visit. The inscription reads: "Near this spot landed 1634, first white man in Wisconsin, Jean Nicolet, met the Winnebago tribe, held earliest white council with 5,000 savages. Erected by City of Menasha and Women's Clubs of Menasha, 1906." Unveiled September 3, 1906, at the Assembly of the Wisconsin Archaeological Society.

Old Ben, the revolutionary cannon, was one of those captured from the British, either from Burgoyne or Cornwallis, and carried to Detroit, where the British recaptured them in 1812. Retaken the same war by Gen. Harrison. Carried to Mackinac Island and thence in 1816 to Fort Howard. When the fort was abandoned in 1854, the cannon was given to the village of Menasha. It is the only revolutionary cannon remaining in the West.

The historic bell on the St. Mary's Church premises, was purchased in England in 1859, by the Congregational people, carried all the distance to the village of Menasha by water. After the church was sold to St. Mary's Society and burned, the bell was raised out of the cinders in the basement and set up on a frame in the yard. Constant contact of the hammer at one point on the bell, cracked it. The bell is 61 years old.

The old homes of Col. Geo. B. Goodwin, Capt. Joseph Keyes, Rev. O. P. Clinton, Judge John Bryan, Maj. Charles Doty, Col. Samuel Ryan, Hon. John Potter, Hon. Curtis Reed, are all standing.

The battle of the Raven, 1730, was fought near Washington street. The Fox Fort stood on Hewitt's Hill. The Winnebago Fort was on Dendo Island. The separating stream is now Garfield street. The battle between these two nations lasted six weeks, until the French Capt. Sier Marin arrived and took sides with the Winnebagos. One morning a raven was seen to enter the Fox Fort, by which sign Marin knew the Foxes had fled in the night.

The stone lighthouse built by the federal government, 1856, at the mouth of the river, was torn down by the ice floes on Lake Winnebago in 1880.

United States government land office located here from 1856 to 1884, disposed of half the state.

Three panther mounds in the public park.

Ancient Winnebago village site on Doty Island in rear of Lyall Pinkerton home. The oldest Indian village in the United States. This was the village of Glory of the Morning, where she married Capt. Sabrevoir de Carrie, 1729-1760. Sires of the Decorah Chiefs. This was also the home of Four Legs Winnebago Village, 1754 to 1832. It was the name of this village "Menasha," that named the city.

The Loggery, the log home of Gov. James D. Doty, 1845 to 1865, still stands on Doty Island, on the premises of Ex-Lieut. Gov. John Strange.

SERVICE IN PRINTING

THE ideal of service in printing is found in the perfect combination of quality and price. Our up-to-date equipment and wide experience in meeting printing problems enable us to give this perfect combination at all times. While there are classes of printing in which quality may be made secondary to price, the general rule is that good printing is an investment—poor printing an expense.

In preparing your circulars, folders, stationery and printed forms we can help you to make the most judicious choice and effective use of paper, type and design.

The Collegiate Press

GEORGE BANTA PUBLISHING COMPANY

WISCONSIN

A Modern Printing Plant

EQUIPMENT

Our equipment includes everything that is used by a modern printing establishment. Our type-setting is done by a battery of five linotypes and three monotypes, operating day and night. Our pressroom equipment includes cylinder presses which handle any size sheet, a Kelly automatic, and job presses with and without automatic feed, the latter feature giving us speed and consequently economical production. Our bindery is up-to-date and complete in every detail and has a capacity of five thousand cloth bound books per day, in addition to magazines and pamphlets.

PERSONNEL

Behind this machinery we have an organization of trained specialists who see that our customers receive *quality work* and *prompt service*.

ESSENTIALS OF PRINTING

Service and *quality* are the two primary essentials of printing, and, without sacrificing either, our up-to-date equipment and organization enable us to handle your work at a *minimum cost*, thus including the third essential of printing—*economy*.

JOB WORK

We are especially well equipped to give you prompt service on catalogs, advertising pamphlets, house organs, forms, and other job work.

Drop us a line or telephone, and our representative will call on you.
