## INTRODUCTION

Preeminent Leaders is a non-profit organization that was established in the year 2022. The organization was brought to life after Preeminent Leaders began to question the reason why Zambia and Africa as a whole. We therefore, began to take note of the various areas that need improvement. However, after our extensive research and experience we came to the conclusion that in order for Zambia to develop the way described we need to invest in our most prized resource and our people.

A question may arise on why Zambia and Africa as a whole despite of all its rich natural resources falls short in development standards is what has kept us moving driven. The major reason is because Zambia has not made any deliberate policies to maximize the human potential and inner ability of its citizens through skills, talents, science and technology.

We discovered the bedrock of all advanced societies in the world carry the four disciplines. Knowledge acquisition in these fields is directly related to advances in human and infrastructural development. This is why we have dedicated our effort in promoting Preeminent Leaders Zambia.

## Mission

To promote skills, talents rising young vibrant leaders in Zambia and informing the public on issues that may concern them, skills and talent in order to foster development and empower the youths.

## Vision

To be the leading Zambian Organization that will impact local and international development efforts, an organization that will be the backbone for many countries in Africa.

## **Aim**

We aim to foster the development of innovative thinking and capture African talent at a young and old age.
