The Edison standard list for July includes: The Druid's Prayer, waltz (Dawson), National Military Band; Within a Mile of Edinboro' Town (Hook), Amy Evans; Send for John Wille (Formby), George Formby; Stirling Castle (Traditional), Peter Wyper; I'll Take You Home Again, Kathleen (Westendorf), Ernest Pike and Stanley Kirkby; Rip Van Winkle (Darewski), Florrie Forde; Mister Blackman (Pryor), Alexander Prince; Betsy (Darewski), Stanley Kirkby; I'm One of the Old Brigade, Arthur Osmond; The Rifle Quickstep (Geo. W. Byng), National Military Band; The Moose March (P. Hans Flath), Vess L. Ossman; Holy Ghost, with Light Divine (L. M. Gottschalk), Edison Mixed Quartet; Think of the Girl Down Home (Phil Staats), Manuel Romain; Mondaine—Valse Berceuse (Auguste Bosc), Sousa's Band; Chiffonette—Entr'Acte (Frank P. Atherton), American Standard Orchestra; The

Star Spangled Banner, United States Marine Band.

Beka Record Titles.

Some specially attractive titles appear in the Beka record list for June, those first to come in order being four laughing songs by Billy Whitlock entitled "Billy Whitlock's Aeroplane," "Billy Whitlock's Wedding," "The Laughing Friar," and "Come Under My New Gamp." Other good records are "Overture from Zampa," Parts 1 and 2; "The Phantom Brigade" and "The Turkish Patrol," by the Beka London Orchestra; "When Shadows Gather" and "My Queen," by Philip Ritte; "Health, Wealth and the Girl You Love," "Come Over to Hanover" and "I'll Let the World Go By," by James Hudson; while Bert Alvey gives us three of the old popular comic songs, "Ship Ahoy," "For Months and Months and Months," and "Come Up in My Balloon" (Wilkie Bard). These records should enjoy a good demand from the public, since, apart from the excellence of the selections, there is a noticeable absence of surface scratch, which as a matter of fact has long been a characteristic with the Beka issues.

First Lange Dividend.

In the matter of H. Lange's Successors, Ltd. (in liquidation), a first dividend of one shilling was declared by the joint liquidators, May 25 last. I am able to state on the best authority that a further dividend of one shilling, possibly a little more, may be expected, but as some of the company's assets consist of book debts not yet collected in, it is anticipated that a few months will elapse before the second dividend can be paid.

Cecilia Loftus and the Graphophone.

With the welcome return of Miss Cecilia Loftus to the London Coliseum, a novelty in entertainments is introduced. As all the world knows, the beautiful Cecilia is now famous for her imitations of celebrated vocalists, these ranging from well-known comedians to great operatic

tenors. It is in connection with the latter that Miss Loftus strikes a new note. A handsome graphophone is wheeled forward, a record adjusted, and as the tenor voice breaks forth the artiste herself joins in, and thus sings a duet with the machine. This is probably the most heartily applauded item in a splendid turn. The Coliseum program bears this acknowledgment: "The graphophone used by Miss Cecilia Loftus is furnished by the Columbia Phonograph Co. of London." We are informed that the graphophone is the thirteen-guinea wood horn "Imperial."

Peary's Christmas Celebration.

Of considerable historic interest is the fact that in Commander Peary's Christmas celebrations at the North Pole—the first Christmas spent in the ninetieth parallel—the talking machine literally played an important part. Peary's own published narrative tells of it in the following words: "After dinner came the dice-throwing contests and the wrestling and pulling contests in the fore-castle. The celebration ended with a graphophone concert given by Peary." This quotation is from the serial narrative published in Hampton's Magazine for May.

Gramophone Co. Secure Injunction.

The effect of the Gramophone Co.'s action against the liquidators of H. Lange's Successors, Ltd., in respect to the raised rim around the edge of the Favorite records, has resulted in the Gramophone Co. securing an injunction and £180 damages, for which amount they will figure as

creditors and obtain whatever dividend may be declared from time to time in the usual way.

Negotiating with American Concerns.

John White, better known to record lovers as Sandy Macgregor, is desirous of opening up negotiations with American record manufacturers. Sandy has a good reputation here, having made records for several of the leading companies. He will sing you Scotch comics, and in particular all Harry Lauder's songs, of whom he is a faithful imitator. Any American record maker who has a proposition to make can get into touch with Mr. White at 12 Stockwell Park Road, London, S. W.

Six Zonophone Titles.

From the current Zonophone list the following six best titles are to hand: 10-inch—"Sweet and Low" (Zonophone Glee Party); "Le Diademi Overture" (Black Diamonds Band); "The Admiral's Broom" (C. Beverly Curtis); "Matrimonial Chimes" (Billy Williams); "Nelly Dean" (H. Payne); and 12-inch, "O Divine Redeemer" (Miss A. Yarrow).

The Twin List for July.

All musical tastes are catered for in the "Twins" list for July, in which, too, I notice some popular titles that may be relied upon as sure sellers in all localities.

Rena 12-Inch Records in Favor.

The success of the 12-inch Rena records of "Carmen" and "Tannhauser" selections (each opera being represented by a double record) has been so phenomenal that the makers have in prospect the issue of further operas in similar form. The Court Symphony Orchestra's triumph in the "Blue Bird" dance suite comprising two 10-inch Rena double records naturally calls attention to the same orchestra's work on the 12-inch "de luxe." Three titles were specially chosen for the debut of the Court Symphony Orchestra and they range from Gungl's "Amoretentanz" to the "Druid's Prayer Waltz," and an even more popular and tuneful dance, "Valse Septembre." Other good records in the current list are as follows: 12-inch—"The Lost Chord" (Sullivan), Mrs. A. Stewart Holt; and "Oh, Promise Me" (De Koven), Mrs. A. Stewart Holt; 10-inch, "Old King Cole" (George Formby), and "Oh, My! What a Surprise" (George Formby), Arthur Peel; "Glorious Devon," and "The Yeomen of England" (Edward German), Robert Howe; "At the Football Match Last Saturday" and "The Jossier Cricketer" (Mark Sheridan), by Terry Dean, and "The Rosary" (Ethelbert Nevin) and "The Lost Chord" (Sullivan), cornet solos, Sergeant Leggett.

Charged With Stealing Machines.

Charged with stealing a gramophone, value 50 shillings, from the "Yorkshire Gray" Borough Market, John Carpenter, of Peckham, was discharged, the magistrate remarking that it was a stupid freak. The foregoing is the pith of a newspaper report. All disc machines are not necessarily gramophones, as we in the trade know them but they usually are to newspapers. Presumably one effect of the Gramophone Co.'s extensive advertising.

Rena Special Records.

The Rena records of the "Dead March in Saul" and Chopin's "Funeral March" are selling freely at this time of national sorrow.

Gramophone Co. Contribute £25.

The Gramophone Co. have generously contrib-

About Needles

One of the most important matters in connection with the development of the talking machine business to-day is the sale of a talking machine needle that is correctly made—made by the greatest authority in the world—a needle, the POINT of which is warranted and which insures the best reproduction for each individual quality of tone—a needle that doesn't wear out the record; that preserves its life, and always gives forth the very best quality of tone that is contained in the record. Such a needle is the

CONDOR

It has the highest and most perfect finish, the smoothest grain, and gives unexcelled satisfaction.

Why not get the customer who purchases a high-grade and a high-priced talking machine to buy needles of the highest quality, such as the Condor?

One cannot be satisfactory without the other.

We shall be pleased to give the fullest information to all interested. Address

Wireless Chronology.

A report to hand states that the French government is experimenting with a scheme for supplying all chronometers at sea with the time thrice daily by means of wireless messages from the Eiffel Tower!

NEWS FROM THE PROVINCES.

Recent reports indicate an improvement of general trade conditions throughout the country, which, it is expected, will shortly spread to the advantage of talking machine traders, who, it must be admitted, have not enjoyed a very satisfactory trade the last month or so. Increased competition, price-cutting, labor, industrial and other disturbances have left their mark, and a return to better times is in consequence a matter for congratulation. With more settled conditions dealers are encouraged to develop along more active lines, give thought to summer business and arrange sales schemes according to their locality. Many are taking advantage of the ideal weather to bring home to prospective buyers the delight and enjoyment of outdoor entertainment through the instrumentality of a good machine and selection of records. Others, in addition to this form of publicity, will give concerts and thus enthrall their local residents with a desire to purchase the king of entertainers for home and garden use. Diverse are the ways and means of stimulating sales, of which evidence is forthcoming from all quarters. One dealer up North instead of inviting his customers to the shop, fell into the habit of personally calling upon them occasionally each month with all the new records to hand, booked his orders on the spot, and altogether found the idea sufficiently profitable to justify its continuance.

My reports from the Midlands indicate a satisfactory improvement of talking machine sales, as a direct consequence of the decline of unemployment, the returns for which are fortunately somewhat below the average. General trade is much steadier, and prospects in this district are much brighter. The good will of the old-established musical instrument house of W. S. Riley & Son, Ltd., has been sold to Henry Riley, of Constitution Hill, and the whole of the stock of musical instruments was sold by auction, May 31.

The Colmore Depot are experiencing a good demand for Twin and Zonophone records, and the

latest Zonophone machines are much in favor with Midland traders.

Short Time in Lancashire Factories.

In the Bradford and Leeds district prospects are particularly good. Throughout Yorkshire the staple industry—cloth and woolen goods—is in a most flourishing condition, and all the mills are working at high pressure to keep ahead of demand. Talking machine dealers are now feeling the effects of this improvement, and while there is no great rush to be expected during the summer, everything augurs well for next season's trade.

Up Newcastle way the miners have settled their differences, and there is little now to disturb the business horizon. The effects of the recent strikes, however, may be felt for some time yet, especially so in the case of machine and record sales. Shipping is fairly good, and it may be said that once over the summer, traders should experience a much better time to make good.

In Lancashire short time is still prevalent in the cotton factories, much to everybody's disgust. It is impossible to calculate the loss talking machine traders have, in consequence, sustained, but while not a few are despondent, it is hoped that during the three months' respite arranged between the masters and men on the wage reduction question, some satisfactory solution may be found to avoid the threatened industrial struggle. Trade in Manchester and Liverpool is below the normal, although Twins and Zonophones are selling well, while Edison, Bell and Rena are also in fair demand. At the Manchester exhibition, by the way, Messrs. J. E. Hough, Ltd., have a wide range of goods on show, including records, various Discophone models, and their new home recording apparatus, which has met with a well-merited reception from trade and public alike.

North of the Border.

North of the Border there is room for improvement, but traders take an optimistic view of the situation, now that general trade is in a more prosperous state. Especially is this so in the Clyde district, and Glasgow shipyards in particular, are getting busier and busier each week. Wages and employment are good in the centers of industry, but while future prospects are not altogether unsatisfactory, summer business is not regarded with enthusiasm.

In Wales.

In Wales everything points to a rosy outlook for next season. The many industrial troubles more particularly associated with the miners are, except for comparatively unimportant differences, quite settled. Tillery for Titles is keeping traders fairly busy in and around Cardiff, and Sanseaway Edison business is for the time of year considered satisfactory.

The new Edison Amberola instruments have received their due from the better-class traders throughout provincial centers, and their introduction at the present time will certainly lay the foundation of a good demand during next season.

New Channel Telephone.

The laying of the new channel telephone cable between Dover and the Continent is now proceeding apace. It is the invention and patent of Messrs. Siemens, and the claim that it will strengthen speech and transmit much faster over long distances will meet with practical appreciation by business houses on both sides of the channel.

TALKING MACHINES IN SPAIN.

Consul E. J. Norton Reports Trade in Those Instruments in Vicinity of Malaga Slowly on the Increase.

(Special to The Talking Machine World.)

Washington, D. C., June 6, 1910.

Consul Edward J. Norton, of Malaga, writes that the trade in talking machines in that district, comprising the provinces of Malaga, Grenada and Almeria, is increasing slowly but steadily. The instruments are very popular, and a number of American machines are now being carried about the city and played in front of cafes, taking the place of the old-time street piano. The favorite instrument of this class is a widely advertised American machine distributed through a selling agency in Barcelona. During the past three years 165 talking machines were imported into Malaga, according to the custom house returns. The total number of machines sold here, however, was much greater than the customs statement, as the bulk of the trade is in the hands of direct importers in Barcelona who ship to their agents in the territory around Malaga.

SHARP POINTED FACTS

A sharp, pointed piece of hard steel will cut into the surface of almost anything with which it comes in contact.

It will cut stone, iron and glass—it will also cut and ruin the hardest record that ever was made.

This is no idle statement—it is a fact and YOU KNOW IT—furthermore your customers know it—and this is the reason why you are not selling as many high priced records as you should, and this is also the reason why a great many of your customers have lost interest in their machines and discarded them entirely.

The first original outlay for a machine and records is one thing—the continued, everlasting drain on the purse strings for replacing worn-out records is quite another thing.

Your customers won't stand for it—CAN YOU BLAME THEM?

Show them "just once" how their records may be preserved forever and you will find that new interest will immediately prevail and their libraries of music will gradually contain all the musical gems and treasures of the world.

FIBRE NEEDLES will not and cannot hurt the record.

FIBRE NEEDLES will do all we claim and more too.

FIBRE NEEDLES will make you hundreds of friends and thousands of dollars. Try them, but try them in the right way—learn first how to use them and then teach your customers.

COLUMBIA PHONOGRAPH CO.'S OPERATIC LIST.

An Imposing Array of Operatic Selections Made by Artists Conspicuously Successful During the Recent Season of Opera Given at the Boston Opera House—The Chorus of That Organization Also Assists in Some of the Larger Numbers—Will Be Ready for the Trade Early Next Month—The List Below Will Be Found Most Interesting.

After months of careful laboratory work and special pains taken in recording, the Columbia Phonograph Co., General, of New York, are about ready to place on the market a series of operatic records by distinguished operatic artists which are destined to win a high place in the favor of the cognoscenti as well as the ordinary music lover. The new process of recording, the improved material as well as the extraordinary care taken in the laboratory, have made the results eminently successful. The orchestral effects and accompaniments are especially fine, and it is the opinion of those competent to judge that many of them have never been equaled in the art of recording.

The list of selections recorded is most comprehensive, practically every school and period of Italian opera having been covered. The records in question will be ready for Columbia dealers next month.

The artists whose services are enlisted, with the exception of Lina Cavalieri, are those who have been most conspicuously successful during the recent season of opera in the Boston Opera House, which has been one of the most brilliant and notable in the history of grand opera in America. The names of the new singers are: Celestina Boninsegna, soprano; Eugenie Bronskaja, soprano; Bettina Freeman, mezzo-soprano; Ramon Blanchart, baritone; Jose Mardones, bass. Constantino returned to make a number of new solo records, and also took part in some concerted numbers. The chorus of the Boston Opera House sing the Soldiers' Chorus from "Faust" and assist in one of the solo records by Blanchart.

The list of selections includes solos, duets and trios, in addition to which they have secured recordings of that most celebrated number, the sextet from "Lucia" selection (30443), sung by Constantino, Bronskaja, Freeman, Blanchart, Mardones and Cilla; and of the almost equally celebrated quartet from "Rigoletto" (selection 30422), sung by Constantino, Bronskaja, Freeman and Blanchart. In this connection the company state "the sextet and quartet are to be coupled together (A5177), forming one of the highest-priced records in the world, it being their intention to sell this double disc at \$7.50. Not only will this be the highest-priced record in the world—it will also be the greatest value ever given in a musical record, both sides being remarkable in perfection of results." For those who desire the selections separately they will be also listed as single-face discs.

The sextet from "Lucia di Lammermoor" is the most famous of all the larger concerted operatic numbers—an inspired and magnificent composition, in which melodic expression unconstrained is found at its zenith. Occurring toward the close of the second act, it forms the climax and most dramatic situation of the opera, in which all six of the principal characters of the opera are engaged. The "Rigoletto" quartet is considered by many to be the greatest musical number that Verdi ever gave to the world.

Almost all the principal singers mentioned above are now exclusive Columbia artists. The acquisition of Lina Cavalieri was announced some time ago. In Boninsegna they have secured a soprano star of the first magnitude, whose remarkable success with the Boston Opera Co. both at home and on its recent road tour, has given striking evidence of this fact. She came to America last year fresh from successes of the first order in La Scala Theater, Milan, Italy, and in Buenos Ayres and in other great opera houses in South America, before the most critical audiences. Boninsegna's repertoire comprises a vast number of opera selections from almost all of which are expected to be offered on Columbia double-disc grand opera records. The quality of

Boninsegna's voice lends itself admirably to recording, and the result is most satisfactory.

While brief reference is before made to Cavalieri in the summary of the list of Columbia artists, it may be added that her fame is worldwide. She is one of the best-known dramatic sopranos at present before the American public, with an artistic reputation justly earned by vocal and histrionic talents of extraordinary worth. But, interesting as are her career and her personality, we understand that the records Cavalieri has sung for the Columbia are still more so. Speaking of them, a member of the Columbia laboratory said: "In these the art of recording the soprano voice is shown at its best. Every note is clear, true and musical, and, as reproduced, has exactly the same tonal and dramatic inflection as when rendered originally by the singer in our laboratory." The first two of a series of selections by Cavalieri, comprising both double and single-face disc records, were issued in the Columbia list for June.

Constantino needs no introduction. With each succeeding season his fame and artistic stature assume greater prominence in the minds of all discriminating admirers of vocal and operatic art. The exquisite quality of his voice has given unmixed delight to thousands. His last season as leading tenor of the Boston Opera Co. was one of the most triumphant in his career. The Constantino records on the Columbia list are very popular.

Bronskaja is a Russian coloratura artist whose phenomenal rise in the operatic world in the short period of five years has been a matter of wide comment. She is already recognized as one of the leading coloratura singers, having sung in almost all of the principal opera houses of Europe and gave up an engagement in La Scala, Milan, in order to appear in Boston last season. Her voice is phenomenally high in range and is limpid, clear and crystalline throughout its entire compass. There is brilliance in the staccato work of the coloratura register united with rare qualities of warmth and color. In such solos as those in "La Traviata," "Rigoletto," "Barber of Seville," "Lucia," "Dinorah," "Faust," "Lakme" and "La Boheme" Bronskaja is at her best. Her rendering of the famous "Caro Nome" from "Rigoletto," which she has recorded for the Columbia, coupled with Gounod's beautiful "Ave Maria" is most artistic.

Bettina Freeman, mezzo-soprano, in both voice and personality is one of the most popular of the younger singers now in opera. Her voice is one of remarkable range, power and beauty of tone, added to which are rare natural endowments of personality, dramatic intelligence and artistic sincerity in such degree as to render her work irresistibly pleasing to all real appreciators of the best in vocal art. Every detail of her vocal portrayals is marked by the skill of a matured and finished artist, notwithstanding the fact that she is one of the youngest of the notable singers in opera at the present time. Not alone in Boston, her native city, but equally in all the cities visited by the Boston Opera Co. in the course of its Western tours, was Miss Freeman accorded the warmest welcome and unqualified praise for her work in such roles as "Siebel" in "Faust," "Malika" in "Lakme," and "Lola" in "Cavalleria Rusticana."

Jose Mardones, leading basso of the Boston Opera and one of the world's greatest artists, has a voice that in evenness and clarity of vocalism and general artistic effect makes his work uniformly of the highest order. Mardones' greatest interpretation is the title role of Boito's "Mefistofele." The beautiful music of this part gives him unusual scope for most striking vocal and dramatic effects. The greatest of

Mardones' other roles are in "La Boheme," "The Huguenots," "Aida" and "Rigoletto." His taste in opera is impartial in its character, and he is equally at home in Italian, French and Spanish music, besides having also sung with success in "Lohengrin." Mardones' first appearance in this country followed successful seasons in the principal opera houses in Spain, Germany, France, Portugal and South America. His season with the Boston Opera Co. was a triumph in every way, and his re-engagement for next season, recently announced, was inevitable.

Blanchart, first baritone of the Boston Opera Co., like his distinguished associates, Constantino and Mardones, is a native of Spain. His first appearance in opera was in Barcelona at the age of sixteen. He was quickly engaged for the Royal Opera in Madrid, and has since taken leading parts in the Imperial Opera in St. Petersburg and in Paris, London, Milan, Lisbon, Berlin, Warsaw and Buenos Ayres. Previous to his appearance with the Boston Opera Co. he had toured this country with Sembrich. His splendid baritone voice is of wonderful natural power, compass and richness. His best roles are found in "Rigoletto," "Don Giovanni," "Otello," "I Pagliacci," "The Masked Ball" and "La Gioconda," all of which are represented in his selections recorded for the Columbia Co.

The Columbia Co. have placed a scale of prices on these records, which, considering the quality of the records and the standing of the artists, is eminently attractive, as follows: 12-inch solos—double, \$3; single, \$2. 10-inch solos—double only, \$2. 12-inch duets—double, \$4; single, \$2.50. 12-inch trios—double, \$5; single, \$3. 12-inch quartet and sextet, \$7.50; quartet, single, \$4; sextet, single, \$5. 12-inch chorus—double, \$3.50; single, \$2.50.

The full list of the records made by these famous operatic artists is as follows:

VALIQUET'S LATEST INVENTION.

A Sounding Board Device Which Does Away with the Horn and Improves the Quality of Tone—Is to be Displayed at the Hotel Chalfonte During the Convention—Company Being Organized, with Robt. C. Hotson at Its Head, to Manufacture This Device.

Perfected samples of a sounding board device for talking machines will be exhibited at the convention of the National Association of Talking Machine Jobbers at Atlantic City, N. J., next month, by L. P. Valiquet, the well-known inventor, who will make his headquarters at the Chalfonte. It will be remembered that earlier forms

of this improvement were shown at the convention last year.

The device operates on the same principle as the sounding board of a piano, or body of a violin, in the proper modification and distribution of sound waves.

It is claimed for the attachment that "it reaches perfection as a sound reproducer," for with hardly a perceptible reduction in tone volume the quality is much improved and softened. The enunciation of the singers is perfected, giving the effect of the higher-priced cabinet machine. The attachment, which does away with the horn and prevents interference when placing the records in place, measures only 8 by 10 inches without special ornamentation, and fits any machine. Models are now being exhibited in various stores in New York.

We understand that a company is now being formed with ample financial backing to market the device, and which will be controlled by Robt. C. Hotson. Mr. Valiquet is now in the West negotiating for the manufacture of a stock of these devices and they expect to be able to supply the trade in large quantities by September 1.

OUR FOREIGN CUSTOMERS.

Amount and Value of Talking Machines Shipped Abroad from the Port of New York.

(Special to the Talking Machine World.)
Washington, D. C., June 10, 1910.

Manufacturers and dealers in talking machines will doubtless be interested in the figures showing the exports of talking machines for the past five weeks from the port of New York:

MAY 10.

Buenos Ayres, 72 pkgs., \$4,789; Hamburg, 19 pkgs., \$422; Havana, 13 pkgs., \$1,279; London, 3 pkgs., \$203; 383 pkgs., \$8,315; 3 pkgs., \$149; Melbourne, 64 pkgs., \$800; Santo Domingo, 9 pkgs., \$215; Savanilla, 65 pkgs., \$2,950; Vera Cruz, 140 pkgs., \$4,358; Yokohama, 63 pkgs., \$2,109.

LEAVES ON TRIP TO CUBA.

Saturday last Edward N. Burns, manager of the export department of the Columbia Phonograph Co., general, sailed for Cuba, where he will remain for several weeks looking after some special recording. As Mr. Burns is also chairman of the laboratory product committee, he is anxious to return as soon as possible. Other members of the committee are M. E. Lyle, assistant to the general manager; H. A. Yerkes, manager of the wholesale department; George P. Metzger, in charge of the advertising business, and G. C. Jell, one of the Columbia artists, who also acts as secretary.

FOR SALE

Our talking machine business in Washington, Pa. This is the best opportunity in Washington for this business; reason for selling, we wish to devote all our time and money to the piano business. Write for particulars, Beu Reynolds & Co., 116-118 N. Main St., Washington, Wash. Co., Pa.

SALESMAN WANTED

Wanted, an experienced talking machine traveling salesman, to represent Columbia Graphophones and records in the Middle West. Apply by letter, Box 600, care Talking Machine World, 1 Madison avenue, New York.

SALESMAN WANTED

Large Western jobber desires services of an up-to-date salesman, for the road; are jobbers for Victor and Edison. Address A. C., care Talking Machine World, 156 Wabash avenue, Chicago.

POSITION AS MANAGER

or Head Salesman wanted with a good live house handling Talking Machines. Have had experience with Victor and Edison Lines. At present employed, but desire change; can show results; large city preferred. Address "K. O. P." care Talking Machine World.

Come Into The Landay Circle!

BROS. INC.

To "Victor" Dealers Who are Keen for Greater Results and Greater Satisfaction

COME into the "Landay Circle"! We *specialize* "Victor" and *only* "Victor" Machines at every *price* and "Victor" and *only* "Victor" Records and Supplies of every *kind*. Our stocks are always *complete*—to-day, to-morrow, every day. We are *never* "out" of what you want. You'll get the *goods*, not honeyed excuses or sugar-coated apologies.

Because of our *tremendous* wholesale stocks, we ship the *same day your order comes in*. Every order is a "*rush order*" with us. There is no "hold on!" or "wait a while" about it. *Quick service*—sure *satisfaction*.

On account of our own *two retail stores* in the heart of New York, we know *by daily experience* the problems and perplexities of the dealer—can view things through *his eyes*—can serve him with *extra care*, understanding and insight into his needs—can offer advice that will *get the business*.

"Come into the Landay Circle!" Give us at least a *part* of your business, until we have proved our fitness to handle it *all*.

TALKING MACHINE OWNERS FORM

An Association in the Southwest for the Purpose of Increasing Interest in the Talking Machine—Robt. N. Watkin Is President.

One of the best plans yet devised of developing and concentrating the interest of the buying public on the talking machine is the formation of a talking machine association composed of owners of machines throughout the Southwest. A meeting for this purpose was held at Dallas, Tex., recently, with the result that an organization was founded with Robt. N. Watkin, Dallas, Tex., president; Mrs. Clyde Grazier, Temple, Tex., first vice-president; L. A. Stuart, Hope, Ark., second vice-president; Jas. S. Camp, Sentinel, Okla., secretary; A. A. Carr, Ivan, La., treasurer.

The purpose of the association is to keep talking machine owners interested in the machines and through cooperation to get the greatest enjoyment out of the records, which are at the

SONORA

the largest value in phonographs of any kind—anywhere. It is the first one in a row leading to \$200.00 list—and every one in the row a Gem. We solicit the Trade's applications for price lists and discounts.

Sonora Phonograph Co.
78 Reade Street, New York, N. Y.

disposal of anyone owning a talking machine. Committees will be appointed to arrange lists of most popular records for talking machines, and special programs will be arranged suitable for an evening's enjoyment. All owners of talking machines are eligible for membership, and in order to assist in the work are requested to write Robt. N. Watkin, at Dallas.

This association is something that can be safely simulated by talking machine dealers in all parts of the country. It will be productive not merely of satisfactory results in an ordinary way, but it will do much to stimulate business and augment interest in the talking machine and the new records which are appearing monthly. The more intelligent the interest manifested in the talking machine the greater will be the demand for expensive records and records of all kinds. Mr. Watkin's idea is certainly an excellent one and worthy of consideration.

AEOLIAN CO.'S VICTOR PLANS.

H. B. Schaad Who Just Returned from the West Discusses Developments.

H. B. Schaad, with the Aeolian Co., New York, on returning May 9 from the Middle West, where he had been looking after the installation of the Victor talking machine departments in their several branch houses, said to The World:

"In Aeolian Hall, Indianapolis, Ind., the department will be on the top floor, and it will be one of the handsomest displays of Victor goods anywhere in the country. The latest facilities for adequately demonstrating the line will be provided. We have recently placed the agency for the Aeolian instruments with Fox Bros., Fort Wayne, Ind., and a Victor department has also been added. It will be under the management of W. P. Krisler, from the Indianapolis branch, and both lines will be under the latter's general supervision.

"A change of management was made in Dayton, O., J. F. Chapman resigning, to go into another business, with C. B. Chamberlain, from the Cincinnati house succeeding him. The Cincinnati agency will also exercise supervision of the Dayton business. The Victor departments in the respective branches are now being fitted up as rapidly as possible, and all of them will be ready by July 1. Arthur Geissler, of the Talking Machine Co., Chicago, was with me in Cincinnati. He is certainly a fine fellow, and understands the talking machine business thoroughly.

"It will probably be September 1 before we will be ready in New York," said Mr. Schaad, in conclusion. "We want everything of the very best and the arrangements for exhibiting and selling the Victor goods as near perfect as possible. We believe our regular lines and that of the Victor Co. go together. As yet no manager has been selected for this New York department"

WINS FIRST PRIZE.

Edison Window Display at Vancouver Horse Show.

M. W. Waitt & Co., Ltd., Edison jobbers at Vancouver, British Columbia, took first prize in class D in window exhibits during the horse show held in that city in April. Their window was an Edison window, the credit for the novelty of which belongs to Mr. Bowes, the manager of the company. With a background of horse show colors the main object in the window shone to excellent advantage. It represented a little girl driving at the show. Pretty nearly everything used in its construction was an Edison product. The body of the horse was made of a phonograph cabinet, and its legs were constructed of Amberol record cartons. A large record box was used for the body of the rig, while phonograph horns composed the wheels and music rolls the shafts. A life-sized doll occupied the seat. Window cards, deftly scattered about the window, proclaimed that Edison goods are always in the lead. It proved to be one of the most attractive displays ever seen in Vancouver, and was viewed by

throngings of people. The Waitt Co. reaped considerable business from it, besides winning the first prize of \$20.

A NEW GRAPHOPHONE STYLE.

The Columbia Phonograph Co. have just put out a new graphophone of which an illustration appears herewith. A powerful double-spring motor, noiseless in operation and playing three records at one winding, provides for the running mechanism. The motor equipment is enclosed in a rich true-mahogany cabinet of most attractive design, highly polished. The horn is the regular

NEW STYLE COLUMBIA BNWM.

Columbia "Symphony" wood horn built up of steam-shaped staves of solid mahogany in two layers and sold separately for the equipment of other machines at \$15. The entire fixed arm and elbow are nicked and highly burnished. The start-and-stop lever and speed regulator are conveniently placed and the machine may be wound while running. The 10-inch turn-table is covered with green felt and protected by a brightly-nicked rim. The needle-clamp is designed for either steel or fiber needles.

BLACKMAN FORCE SHARE IN PROFITS.

At the outing of the forces of the Blackman Talking Machine Co. at Coney Island on Saturday last, J. Newcomb Blackman inaugurated a plan of distributing a certain sum in cash to each member of his force who has been in his employ over a year—in other words a system of profit-sharing annually. The announcement made by Mr. Blackman was received with enthusiasm, and added much to the pleasure of the day.

VICTOR CO.'S FOREIGN RECORD LIST.

(Special to The Talking Machine World.)

Philadelphia, Pa., June 6, 1910.

The Victor Co., Camden, N. J., issued a circular to their trade on recent date regarding their foreign records, in part as follows:

"There is hardly a Victor dealer who does not have a foreign population practically right at his own door. These special lists enable you to make a direct appeal right to the German with the German records, to the Frenchman with the French records, etc. Your real great big Victor opportunity, however, is in the list of Italian records. The love of opera is spreading like wild-fire all over the United States, and in this Italian list are many of the most beautiful arias of grand opera sung by artists of the Scala and other Italian opera companies. The special foreign lists follow: Italian, Swedish, Danish, Finnish, Norwegian, Bohemian, Hungarian, Russian, Polish, Hebrew, Spanish, German, Portuguese, French, French-Canadian, Hawaiian, Gregorian and Sistine Choir.

James Fletcher, of Fletcher Bros., music dealers at Victoria, B. C., have also opened a new store in Vancouver and have added the Columbia line as jobbers and dealers. They placed a strong initial order.

Wax Records are as out of date as wax candles. Columbia Indestructible Cylinder Records did it.

Columbia Phonograph Co., Tribune Building, New York.

REVIEW OF JULY RECORDS.

Issued by the Victor, National, Columbia and Universal Companies

The National Phonograph Co.'s list for July is an unusually good one. In the Edison grand opera Amberol roster Florencio Constantino, the famous operatic tenor, is represented by the ever popular serenade from "The Barber of Seville" (3027); Luigi Lucenti, basso, is heard in the Piff-Paff song from "The Huguenots" (3028); Marie Delna, the celebrated contralto, has a charming number in The Mon cœur s'ouvre from Saint Saens' "Samson et Delila" (4015), which is undoubtedly one of her best efforts. Carmen Melis, the soprano, who was heard at the Manhattan, and who last week achieved such a big success in Paris, is heard in an aria from "Zaza" (4016), which is full of dramatic fire and musical merit. Marguerita Sylva, soprano, has a charming record in the Squediglia number from "Carmen" (4017), which is full of temperament and the abandon of the Spanish gypsy. The other numbers of interest are the quartet from "Rigoletto," sung by Colombati, mezzo-soprano; Martinez, soprano; Addo, tenor, and Avedana, baritone (7502), and an Edison Standard record in Swedish, Klara Stjarna (20549). In the regular Amberol list there are several numbers that are bound to win special favor, notably Schubert's "Romance" and Lucantoni's "Tarantella" (460), two numbers played with great charm by Jose Rocabrana, the celebrated Mexican violinist. The Slavonic Rhapsody, played by Sousa's Band (463), is a number of unusual merit, full of those contrasts which distinguish the Slavonic school. The United States Marine Band are heard in a stirring march, "True to the Flag" (472), written by Franz Von Blon, the German composer. A record that will be greatly in favor are favorite airs from "Mikado," sung by the Edison Comic Opera Co. The solos are in good hands, and the chorus is most effective. Of special interest for July Fourth is the record, "Patriotic Songs of America" (457), played by the New York Military Band, with vocal numbers by the Premier Quartet. These national airs stir the blood and will ever be popular. There are a dozen other numbers in the Amberol list covering popular and standard songs and instrumentals which will win a tremendous vogue with lovers of the lighter forms of music. In the list of Standard records, Victor Herbert and his orchestra are heard in a very delightful rendering of "Fleur-ette" (10380), one of Herbert's characteristic numbers, which is full of grace and charm. Another pleasing number is the "Chiffonette Entr' Acte" (10391), played by the American Standard Orchestra. It is excellently played and recorded. Sousa's Band is heard in an infectious concert waltz entitled "Mondaine" (10387), which is certain to win many admirers. Vess Ossman, the

famous banjo king, has made a spirited and finished record in "The Moose March" (10383), which will be received with delight by many admirers. The Edison Mixed Quartet has an unusually fine sacred record in "Holy Ghost with Light Divine" (10385). It is unaccompanied and the harmony is most perfect. Another record most suitable for Independence Day is our national anthem, "The Star Spangled Banner" (10394), played by the United States Marine Band. The arrangement is highly embellished and is said to be the official one as played by the President's Own Band on state occasions. As will be noted in the list elsewhere there are a number of other popular songs and instrumentals to be found under the Standard heading, all of which will be received with pleasure by dealers and the general public.

The Columbia Phonograph Co., in their July list of twelve-inch Symphony double-disc records, introduce Ramon Blanchart, the celebrated Spanish baritone of the Boston Opera Co., who is to make records exclusively for this company. His first number is an aria from "La Gioconda," by Ponchielli, and the "Soldier's Chorus" from "Faust" (A5176), sung by Ramon Blanchart and the chorus of the Boston Opera Co. These two numbers are great favorites with the buying public and should win a large measure of favor. In the regular list of twelve-inch double-disc records an excellent instrumental number (A5174) is Tchaikovsky's Overture "1812" and Meyerbeer's Pacheltzanz, which is a worthy complement to the "1812" Overture. Both numbers are given a splendid reading by Prince's Military Band. A noted addition to the dance music list is Waldteufel's "Dreams of Childhood Waltzes" and "The Little Pierrots March," by Bosc (A5171), both of which are excellent numbers and admirably played by Prince's Orchestra. Two old favorites, "My Old Kentucky Home" and "Old Black Joe," by Foster (A5175), are sung with sympathy and tonal beauty by Mrs. A. Stewart Holt. Two lighter numbers are "My Uncle's Farm," sung by Golden and Hughes, and a minstrel record containing songs sung by well-known favorites (A5173), which will find many admirers. Some eight double-disc numbers are to be found in the ten-inch list sung by such well-known specialists as Miss Ada Jones, Collins and Harlin, Thomas Mills, Frank Coombs, and Stanley and Burr. As may be seen in the regular list, published elsewhere, the songs and instrumentals listed contain many of the latest favorites of the day, and are so varied as to make the entire offering one of especial attractiveness to the dealer and to his customers. An instrumental number of special excellence is (A832) "Gung'l's Tanze Waltz," played by Prince's Orchestra, and Jorda's "Margarita" two-step, played by the Jorda-Rocabrana Quintet of Music. It is full of Spanish color and is an excellent partner to Gung'l's brilliant and always delightful waltz.

The Victor Talking Machine Co. have a strong roster of Red Seal records in their July list, all

of which are an artistic treat. Caruso and Scotti are represented by a duet from Act 1 of "Mme. Butterfly" (89,043); Geraldine Farrar has two old favorites (in English), "Ye Banks and Braes o' Bonnie Doon" (87,062), and "My Old Kentucky Home" (88,238); Mme. Gerville Reache, contralto, makes a splendid record of Delilah's "Song of Spring" from "Samson and Delilah" (88,244); John McCormack, the Irish tenor, who is steadily increasing his admirers, is represented by two new songs, "When Shadows Gather" (64,127), and "Through Forest Depths" from "Lakme" (87,063). A record of unusual merit is the Death Scene from "Carmen," sung by Leo Slezak and Hermine Kittel in German (74,168). Mischa Elman, whose records are always a keen delight, adds further to his popularity by his recording of "Les Farfadets," by Pente (64,128), and Schubert's Serenade (74,167). The dramatic prologue from Boito's "Mefistofele" is given an authoritative and finished reading by Marcel Journet, the distinguished basso (64,126). An aria from "Andrea Chenier" (88,243) is sung with splendid effect by Nicola Zerola. Sammarco, the baritone, and McCormack, the tenor, are heard in the duet, "Ab, Mimi, False One" from "La Boheme" (89,044). These two voices blend most admirably and the record is a real gem. The celebrated Carmen quintet from Act 2 is heard through the medium of Meses. Lejeune, Duchene, Dumesnil and Messrs. Gilibert and Leroux (88,237). This list of Red Seal records, taken as a whole, is one of the best put out by this company. The records are absolutely perfect and the quality of tone produced is absolutely lifelike. Apart from the artistic the mechanical side of the work—that is, the actual production of the records—shows the utmost care. They are free from criticism of any kind. In the regular purple label records Lucy Isabelle March, soprano, who has won quite a following for her brilliant vocal work, is heard again to advantage in the Sunlight Waltz by Harriet Ware (70,017). There are also two new numbers by Nora Bayes and Jack Norworth, the former singing "Daffydills" (60,019), and the latter "Back to My Old Home Town" (60,020). In the regular Victor list Arthur Pryor's Band is heard in a new march, "The Arcade Girl" (5,778), and the overture from Wagner's "Flying Dutchman" (31,787). Both these numbers are superbly played by Mr. Pryor's fine organization. Alfred Grünfeld, the pianist, is in evidence this month with Etude de la Tarantella for the piano (5,779). The work of this famous Berlin pianist is familiar to us and each record which he produces emphasizes the wonderful advance made in the recording of piano selections. Grünfeld's work in this record is really remarkable. There is a delicacy, finish and surety in his work that delights. Another favorite is represented this month in Victor Sorlin, cellist, who plays Hauser's Cradle Song (5,773) with a great quantity and charm of tone. The Victor Light Opera Co. are represented this month in gems from "The Chimes of Normandy" (31,788). It is a delight to hear the selections from this

ever-popular opera and both soloist and chorus work is excellent. Harry Anthony and James F. Harrison, who have recently been engaged by the Victor Co., are represented by the first of a series of duets, Campana's "See the Pale Moon" (5,780). Their work as represented in this record is excellent. Twelve numbers are listed under the double-face record list this month, and the list is certainly a good one. There is a wide selection of both popular and classical music covering instrumental and vocal fields. The list in full, which appears in another part of The Review, is well worth studying.

The Universal Talking Machine Mfg. Co.'s list of Zonophone double disc records for May and June contains some excellent numbers by Thomas Chalmers, Byron G. Harlan, Wm. Wheeler, Frank Howard, duets by Mr. and Mrs. Wheeler, and a number of miscellaneous selections excellently recorded by artists well and favorably known and with a big following in the talking machine trade. There are four instrumental numbers by the Zonophone Concert Band, "The Spirit of Peace March" and "Valse Militaire" (5623) and "Scottish Idyl" and the introduction to the third act of "Lohengrin" (5624), which are given a very excellent reading. These Zonophone numbers, as may be seen from the list published in the regular department elsewhere, cover a wide field—popular, religious, standard songs, as well as vocal quartets and instrumental numbers being represented.

TO MAKE PIANO RECORDS.

Señor Emilio Murillo, the Famous Mexican Pianist, is Under Contract with the Columbia Phonograph Co.

Señor Emilio Murillo, the renowned composer and pianist of Bogota, Republic of Colombia, S. A., has an exclusive contract with the Columbia Phonograph Co., general, for a series of twenty piano records. It is concededly difficult to make a piano record, as it requires a sympathy with the purpose and a keenly artistic comprehension to achieve success. In the case of Señor Murillo his playing is so powerfully brilliant and clear-cut that there are no faulty overtones or blurring, hence the arrangement with the Columbia Co. Last week ten of what are considered to be notable examples of recorded piano music were made by Murillo, who plays his own compositions only. As soon as these records are finished and ready for listing they will go in the foreign catalog and be exploited especially in Colombia by the export department of the Columbia Co.

On July 9th Señor Murillo, by special invitation, rendered selections from his best known works before an audience of the diplomatic corps stationed in Washington, D. C., in compliment to his own countrymen. The function was attended by President Taft, members of his cabinet, Senators, Representatives, foreign Ambassadors and Ministers and other people prominent in the service and public life of the national capital.

TWO MORE NATIONAL RECORD "HITS."

"Put On Your Slippers, You're In for the Night," Louise Dresser's big "hit" in the successful musical comedy, "A Matinee Idol," running at the Lyric, New York City, and "I'm the Man They're Looking For," a comic sequel to "Has Anybody Here Seen Kelly?" which it bids fair to rival in popularity, are being shipped out this month as "specials" by the National Phonograph Co., to go on sale as soon as received. The first is sung by Ada Jones, in her usual unapproachable style, and Edward M. Favor, assisted by a very capable chorus, concludes the history of the much-sought-for "Kelly from the Emerald Isle." The usual order of shipments in the case of these "specials" will be reversed, the Eastern jobbers being served first and then, in the order of distance, the Central, Southern and Western jobbers. The advance orders for these records are very heavy.

THE TRADE IN INDIANAPOLIS.

Strong Demand for High Class Outfits—Campers Buying Machines and Records—Musical Echo Co. to Move—Aeolian Co. Store Takes on Victors—Grafonolas Selling Well.

(Special to The Talking Machine World.)

Indianapolis, Ind., June 8, 1910.

The talking machine business has shown some ginger during the last month. The greatest demand with all stores has been for the higher-priced instruments. This applies to the wholesale as well as the retail business. The Edison Amberolas, the Victrolas and the Grafonolas of the Columbia Co. have all met with a nice demand. The camping season will soon be on, and already the campers are getting ready for it. Indianapolis is a great city for summer camps, and usually a summer camp is not regarded as being complete unless it has a talking machine. Last summer White River above Broad Ripple was lined with summer camps, and in the evening about twilight, any number of talking machines might be heard up and down the river. This camping place, together with others, stimulates the sale of machines and records materially, although, of course, it does not bring the business up to the winter standard.

The Musical Echo Co., handling the Victor machines exclusively, are arranging to remove to the Indiana Pythian building. This removal is made because the Grand Opera House block, in which the store is now located, is to be remodeled extensively. After the removal of the Musical Echo Co., this company, the Wulschner-Stewart Music Co., and the Aeolian Co., all of which will handle Victor machines, will be in the same block.

The Aeolian store here is to take on the Victor line in compliance with the change by which this line of talking machines will be put in by all of the Aeolian agencies. The entire third floor of the New Aeolian Hall will be remodeled and devoted to the Victor line. The Aeolian Co. have also opened a branch store at Fort Wayne, which will be in charge of W. P. Chrisler, formerly of New York, and the Victor line will be handled at this store.

The Musical Echo Co. reports a good business in the better class of instruments.

Marion Dorian, auditor for the Columbia Phonograph Co., was a recent caller on business at the local store of the Columbia Co.

The Columbia Co. have had a good business during the month with a nice demand for Grafonolas. One of the purchasers of a Grafonola was C. L. Cummins, a well-known newspaper writer and manufacturer, of Indianapolis. It was a DeLuxe Style B, and sold for \$225. Mr. Devine, of the Columbia Co., says that the retail trade, in the higher-priced instruments in particular, has been good. The Cavalieri records have proved to be the best sellers with the Columbia Co. during the last month.

E. G. Hereth, the manager of the Indianapolis piano house of the Baldwin Co., was another purchaser of a Grafonola Regent, at the Columbia store.

The Musical Echo Co. recently showed an attractive window, consisting of an arch built of records and surrounding a Victor machine.

The Kipp-Link Co., who handle Edisons, report a good business in Amberolas, both at wholesale and retail. A number of dealers recently have ordered as many as five or six Amberolas each.

STRIKING MAGAZINE ADVERTISING.

The magazine advertising of the Victor Talking Machine Co., Camden, N. J., is of so striking a nature as to call for a special word of praise. Not having the space to go into details in this issue of The World, later this interesting topic will be referred to again in more detail.

The Columbia Phonograph Co., General, have sent their dealers a new enlarged catalog of complete newspaper advertisements, for their study and selection.

EDUCATIONAL POSSIBILITIES

Of the Victor Talking Machine Discussed by the Editor of the Voice of the Victor in Interesting Fashion.

(Special to The Talking Machine World.)

Philadelphia, Pa., June 10, 1910.

In the last issue of The Voice of the Victor, so ably conducted by H. C. Brown, manager of the advertising department of the Victor Talking Machine Co., Camden, N. J., occur the following sage remarks:

"The boards of education, superintendents of public schools, universities and colleges are recognizing in the Victor the only practical method of conveying to scholars and students a true understanding and appreciation of music. We knew this would come, and while we have long realized the immensity of its possibilities, we have never been able to devote the time and proper attention to its development. Even now it is forcing itself upon us and we are as rapidly as possible perfecting arrangements to properly care for this demand for Victor goods. While we are making every preparation as speedily as possible, every dealer in the land can be of great help to us and land many sales by promoting the idea in his home town.

"As a well-known music critic recently remarked apropos of this subject: 'The question has been asked, "What is the value of the Victor in the schoolroom?" Until one understands the work in school music of to-day the value of the Victor cannot be fully appreciated. (1) Good records give the children something worth while to think about, feel and live with. (2) It acquaints them with the world's greatest artists, the great composers and their compositions. (3) It trains the ear, makes good listeners, and therefore disciplines both mind and body. (4) It saves time. (5) It lifts children to a sound moral and mental atmosphere.' In the city of Milwaukee seven schools earned Victors by this simple method: they each arranged for a Victor delivered to them on time payments, and gave concerts, charging a small admission of ten or twenty-five cents, and took in enough to pay for machines and a fair assortment of records in quick time.

"In conclusion, this suggestively brisk remark is made to the dealer: Promote the idea of a Victor in your city, through the educational institutions of whatever classification, private, public or religious."

DISC AND MUSIC SYNCHRONY.

Valuable patents have just been granted to Walter M. Davis, retail manager of Hardman, Peck & Co., New York City, covering his invention for playing, together, any talking machine and any player-piano. (See page 48.)

Owners of these popular instruments have for years realized the great advantage to be obtained by such a combination and many minds have been concentrated on the problem. The difficulty has been to synchronize the music roll and the disc so that the player-piano might play artistically the accompaniment to the solo on the talking machine.

This has now been accomplished by Mr. Davis and it will not be necessary for the owner of both of these separate instruments to exchange them, as they can be played together by merely buying additional music rolls and discs that are made for this purpose.

The only connection will be a small wire to automatically start the player-piano at precisely the desired moment. In playing an accompaniment there is a prelude of several bars before the solo begins, and as these machine discs contain only the solo parts it would be impossible to determine the exact place to begin the player-piano without this automatic starting device.

It will at once be recognized that this invention will broaden the trade for both player-pianos and talking machines by adding to the pleasure and interest of the buyer—in fact, it is only logical that these two instruments should be used together.

A NEW COLUMBIA GRA

COLUMBIA PHONOGRAPH CO.,

GRAFONOLA AT \$150.00

The "Mignon"

THE Columbia Grafonola "MIGNON" is the first instrument of its class ever offered under two hundred dollars. It is the latest evolution of "the one incomparable musical instrument"—and it *is* a musical instrument, unmistakably and at the first glance. Its every line, simple, dignified and classic, suggests *music*; and every note it sings or plays is a corroboration of its first impression.

Wholly unmechanical in appearance, yet faultless in its mechanism, designed by a musical-instrument artist, and built by artists in wood-work—it is everything that a musical instrument ought to be and *incomparable* in its own class.

The Grafonola "Mignon" is built on straight, severe and classic lines, with just sufficient ornamentation to bring into proper relief its engaging symmetry and the fitness that characterizes its general design. The compactness of the instrument and the economy of space effected by it are of the highest importance in judging its merits, great as its musical qualities are, and regardless of the substantial economy to be found in its price.

Beneath the tone-chamber and occupying the lower half of the instrument is the compartment enclosing the record albums, of which there are four, holding in all 60 Double-Disc records of any size (120 selections). Space for two other albums is provided in the back of the cabinet.

The cabinet stands upon a slightly extended base, fitted with four shaped legs thoroughly in keeping with the rest of the equipment and adding the finishing touches of beauty to it.

The Columbia Grafonola "Mignon" is a little over 44 inches in height, 17½ inches wide and 22½ inches deep. As will readily be seen, this exceptional depth makes it possible to have such dimensions of the tone-chamber as will insure the highest possible amplification of the sound before it emanates from the instrument.

The "Mignon" is bound to be a sensational money-maker.

If we don't hear from you about the Grafonola at a hundred-and-a-half, we shall be disappointed, and so will you.

Gen'l, Tribune Building, New York

TIMELY TALKS ON TIMELY TOPICS

Possibly there is nothing especially new to report when the Federal courts issue an order restraining a dealer from violating the license agreement granted by anyone of the manufacturing companies. Another case of this kind occurred on May 31, when an Edison dealer of Newark, N. J., was decided "out of order" by the court, the particulars of which appear elsewhere. This incident is mentioned here in order to call attention to an article which recently appeared in Printers' Ink, "Current Progress in the Cause of Price Protection," wherein the experience of the National Phonograph Co. is quoted as an illustration, as follows: "The Edison Phonograph Co., like all makers of patented articles, enjoys a particularly secure position in price maintenance, for it has a perfect legal monopoly. Its agreement system is very strong, and has been backed up by the courts in fifty-two separate cases.

"These cases are listed permanently in the Edison Phonograph Monthly. The list is printed to serve as a warning to dealers and to show how futile is any dealer's effort to cut price. As one of the company's officers said:

"The company is thoroughly committed to the maintenance of its selling system, which has not only been endorsed by the courts, but which long experience has demonstrated works out to the best interests of all concerned—public, dealer, jobber and manufacturer."

Distributors of a progressive turn of mind and wide awake to every opportunity for exploiting

goods, appreciate and praise the effort of every dealer who gets out of the rut and does something a "little different" to increase sales. On another page is printed the picture of a church auditorium with the Victor Victrola as the center of attraction. A concert was given therein by a local dealer in connection with some church work, an inviting program of high class music was offered, the audience was delighted and sales of Victrolas followed as a matter of course. Store recitals are excellent, but an entertainment like the above is much better from every point of view.

One of the most encouraging reports regarding trade conditions is that of the Columbia Phonograph Co., general, in which George W. Lyle, general manager, says the business of the company for May, 1910, exceeds that of the same month in 1909 by over 40 per cent. It is true sales have been gradually increasing, but the aggressive policy of the Columbia Co., combined with a product which is approved by their jobbers and dealers contributes in large measure to this very satisfactory report.

A World subscriber in India in a letter just to hand states that there are great opportunities for the sales of talking machines in that country. While records in the native language would have a tremendous sale among a population of 283,000,000, yet records in the English language find a big market. The grand opera and high class records are universally popular, because

they are sung in the universal language, namely, that of music. At the present time the German manufacturers are steadily gaining ground, and undermining the trade of the English people. This is due to the fact that the English manufacturers are neglecting the market to some extent. They are sending records months behind the time they are due, and the dealers in the larger cities find the Germans more prompt. In view of the Yankee reputation for swiftness it would seem as if there was a good opportunity in India, not merely in records, but in machines and all kinds of supplies. These views are respectfully submitted for the benefit of our friends in the United States.

No record of King Edward's voice is among the many gramophone records of the voices of famous men preserved at the British Museum. The omission is singular, and the regret is made all the keener by the knowledge that less than a couple of years ago arrangements for taking a record were all but completed.

After some hesitation the King had at last been induced to consent to speak for posterity, the choice of a date was all that was left to be settled; and then a pressure of State business intervened, and the fixing of an appointment was postponed. It was never granted.

The Queen Mother's voice, too, is not yet preserved, nor indeed is that of any member of the royal family.

Robt. L. Loud, of Buffalo, N. Y., has attracted fashionable audiences recently with Victrola concerts, the program of which was made up from selections from "Faust."

643-645 Main St., BUFFALO, N. Y., 632-634-636 Washington St.

SPECTACULAR EDISON ADVERTISING.

Great Electric Sign Will Attract Broadway after June 15—Roman Chariot Race Capped by "Leaders of the World"—Details of This Remarkable Advertising Scheme.

At 8.15 o'clock on Wednesday evening, June 15, unless the plans announced last week by the promoters of the project are changed, the pleasure-seekers who throng Broadway, New York, in the very heart of her commercial and amusement world will be startled by the most marvelous spectacular electrical display ever conceived or planned. Under the dark canopy of

to New York, and 2,750 electric switches are used to operate it. The title of the display—"Leaders of the World"—is seventy feet long. The main chariot, driver and steeds, are 40 feet long and stand 20 feet high.

There is no actual movement of objects in this wonderfully realistic race, but the illusion of realistic action is produced by the flashing of

display to the exclusion of their competitors. A combined capital of more than \$1,000,000,000 has coincided in the promotion of this unprecedented scheme of advertising, which will excite the wonderment of every resident and everyone of the 300,000 non-residents who daily pass through New York City. About thirty of the largest and most representative concerns in the world, impressed by the magnitude and efficacy of the project, have entered the affiliation, and it will doubtless become an object of admiration and keenest interest to the entire business world.

The concerns that are represented are of an exclusive type, and the affiliation is of an unusually high standard. It is the first time in the history of the world that these various captains of industry have combined in one enterprise to herald to the world tangible evidence of the great growth of commercial development and the advancement of the spirit of eternal progress that has taken hold of the business community of America. The announcement of the display and its affiliation has been attracting wide-spread attention, the metropolitan press, not only of America, but also of England and France, has been devoting much valuable space to a promulgation of the principles embodied in the undertaking and to the enterprising proclivities shown by the leaders in American commercial circles.

It is safe to say the enterprise of the National Phonograph Co. in accepting the invitation of the promoters of the scheme to join the affiliation as one of the "Leaders of the World" will be appreciated by their jobbers and dealers, and can not fail to infuse enthusiasm into everyone connected with the sale of Edison products. The officials of the company will be present at the opening display to witness it from a vantage ground as the guests of Mr. Rice. The roof of the Marlborough Hotel at 36th street and Broadway, two blocks distant, has been engaged for that purpose. An orchestra will render a musical program and a buffet lunch will be served. Admission to the roof will be by card.

REFEREE AWARDS \$81,250

In Suit of American Graphophone Co. Against Leeds & Catlin Co.—Amount Represents Profits of Latter Concern—Court Approves.

In the accounting made by John A. Shields, special master, appointed by the United States Circuit Court, New York, resulting from the suit of the American Graphophone Co. against the Leeds & Catlin Co., bankrupts, for infringing the Jones' patented process for the reduplication of disc talking machine records, an award of \$81,250.85 was made. The court approved the findings of the referee last week. This sum represents the profits realized by the Leeds & Catlin Co., and as they were under bond pending the decision of the court, the amount was collected thereon.

JOIN THE EDISON FORCE.

Two new singers will be noticed in the September list of Edison domestic records, Marie Narel'e and Maude Raymond. The former can scarcely be termed a new singer, for she has already contributed a dozen or more records to the standard lists of the catalog. That was several years ago, however, since which time she has been touring Europe and Australia, her native land, and has consequently passed out of the limelight in this country for a time. Her first Amberol record will probably be "Killarney," a favorite number of her large repertoire.

Maude Raymond, well known the country over in vaudeville and musical comedy, as an artist of uncommon personality, has also been contracted with for a number of songs, the first of which will appear in the September list. The September list will be notable in respect to the number of "star" comediennes represented, two of the best and most popular in the country—Marie Dressler and Sophie Tucker—both exclusive Edison artists, controlling their latest and best.

GREAT EDISON ELECTRIC SIGN AT BROADWAY AND 38TH STREET.

night, high up in the heavens, they will behold a Roman chariot race of more gorgeous beauty than even mighty Rome herself beheld when the Caesars ruled and she was mistress of the world. While the multitude is gazing in astonishment at this spectacle, above the display and on a mammoth steel curtain, 90 feet long by 20 feet high, will appear in letters of fire, four feet high, the announcement that Edison phonographs and records are the "Leaders of the World" in the sound-reproduction line. This ad will be flashed long enough to be read and absorbed every eight or nine minutes, or approximately thirty-five times every night.

It is the most stupendous advertising scheme ever dreamt of, this electrical display, and it is difficult to form an adequate conception of its immensity from the most comprehensive description. It occupies the roof of the Hotel Normandie at Broadway and 38th street, facing Herald Square, where it will be the center of attraction to the many thousands of New Yorkers and visitors from dusk until midnight every night the whole year round for the next two years.

Some facts in connection with the display will prove interesting and will aid in a conception of its magnitude. It is lighted up by 20,000 electric bulbs, ten times as many as the largest electric sign now burning on Broadway. It requires 600 horse power to operate it. It is one-third of a New York City block wide, rises seventy-two feet in the air and is seven stories of an ordinary building high. Five hundred thousand feet of wire were used and 70,000 electrical connections were made to complete it. It required eight railroad cars to transport it

thousands of lights operating with lightning-like rapidity. By means of ingenious devices current is transmitted through some parts of the display at the rate of 2,500 flashes per minute, many times faster than the eye can follow, thereby producing great realistic life action. With one device the position of the horses' limbs will be changed, throwing them backward and forward smoothly and with such speed and grace in electricity as to cause the horses of fire to appear to be running at terrific speed. Another device causes the wheels of the main chariot to appear to revolve so swiftly that the spokes can not be seen. Every little detail is perfect, even to the illusion of dust rolling up behind the wheels. Still another device causes the crimson robe of the leading charioteer, as well as his Roman skirt, to flutter in the wind, making the race most realistic. The manes and tails of the horses also appear to be blowing fiercely in the wind. By other devices the roadbed is made to apparently recede from under the flying hoofs of the horses, and the lights which decorate the central arena walls appear to move in an opposite direction to the teams, completing illusion as though the great race were actually passing around the amphitheater. Every nine to ten minutes the entire program of advertisements of the "Leaders of the World" is repeated and the reading of the advertisements is changed every thirty days.

This remarkable enterprise was promoted by Elwood E. Rice, of Dayton, O., president of the Rice Electric Display Co., who conceived and put into execution the idea of uniting or affiliating a representative number of the leaders in their respective lines in one vast advertising

"OUR" TWO GREATEST VICTORS

SOME people argue that sentiment has no place in advertising columns. We differ with them. Those same people will never let sentiment creep into their business.

Wrong, Absolutely Wrong

Next month we celebrate the Independence of our Country and we are going to do it more than ever in a sane, glorious fashion.

This year The Talking Maching Company celebrates the fifth anniversary of its Independence from the old time-worn jobbing methods.

We took the initiative in:

- 1—Wholesaling Exclusively.
- 2—Putting Records in Envelopes.
- 3—Following up Retail prospects for our Dealers (instead of selling them ourselves.)
- 4—Having our Traveling men solicit local prospects for our Dealers.

Finally: In making an effort to treat our customers in an open-minded, generous fashion—in a man to man way—in fact, we have allowed a little sentiment to creep into our business.

If this line of talk strikes you, send us all those orders. You will be satisfied.

(Special to The Talking Machine World.)

Chicago, Ill., June 10, 1910.

Chicago jobbers generally report May business as having been something of a surprise in that it kept close up to the April record, and in one or two instances actually made an increase.

Like every month this year the gain as compared with the corresponding month of last year was important. It would be useless to claim that the volume of business is altogether satisfactory, but in view of the generally unseasonable weather during April and May trade has been better than could logically be expected. June so far has brought generally brighter and more favorable weather, although still unduly cool, and retail business at least locally has shown considerable improvement. The large downtown stores report a really excellent high grade trade. The sale of six Victrolas by one retail department on one day last week was certainly abnormal for this season of the year, to say the least, and can hardly be taken as representative of present business but it may indicate that the high grade trade is, in a measure, independent of season or general conditions when properly fostered and energetically advertised and pushed.

All Aboard for Atlantic City.

L. C. Wiswell, manager of the talking machine department of Lyon & Healy, who as mentioned in last Month's World is intrusted with the rounding up of the western jobbers for the convention at Atlantic City next month, with a view to having a special car of Westerners if possible from Chicago is just sending out the following letter, which explains itself:

"Arrangements are being made with the Pennsylvania lines for special sleeping cars to our next annual National Association of Talking Machine Jobbers' convention to be held at Atlantic City July 5, 6 and 7.

"The various officers and committees in charge of the arrangements are extremely desirous of making this convention a memorable one, and have arranged a set program which will keep you busy from the time you arrive until you leave.

"It has been suggested that as many of the jobbers west of Chicago as possible meet in Chicago and proceed from there in a body to the convention. Therefore, if you anticipate attending the convention, and would like to meet in Chicago, may I suggest to you to kindly write to C. L. Kimball, A. G. P. A., Pennsylvania Lines, No. 2 Sherman street, Chicago, Ill., by return mail, or as early as possible, advising him just what car space you desire and he will be glad to book you for it.

"The special summer rates via the Pennsylvania from Chicago to Atlantic City, including usual stop-overs at the large cities along the route, is only \$26 round trip.

"Those who wish to make a trip to New York on their return can do so by depositing the ticket with the ticket agent at the Broad Street Station at Philadelphia, and there purchase a round-trip ticket to New York for the sum of \$4. This will give you an opportunity of visiting Coney Island and the amusement places in and around New York.

"It has been thought best by many to leave

Chicago on the 5.30 p. m. train Saturday, July 2, arriving at Atlantic City at 5.35 p. m. the following day, in time to spend the 4th in Atlantic City, where a good time is always to be had. An extra fare of \$4 is exacted on this train from Chicago to Philadelphia. This gives all those who have never been over the Pennsylvania Lines a daylight ride from Pittsburgh through to Atlantic City, passing Horseshoe Bend, etc.

"Make it possible to attend this convention. It is to your interest to do so. You will find the time spent profitable in a business way, and you also will have a grand outing."

The Ball Game.

Mr. Wiswell has completed the line up of the team of the Western jobbers who are to meet a select team of the Easterners on the diamond at Atlantic City on Thursday morning, July 7. They are all valiant athletes and are busily engaged in their spare hours in practising up with the aid of their sons or friends' sons. Here they are: H. H. Blish, Des Moines, Ia., left field; Max Strassberg, Detroit, center field; A. D. Geissler, Chicago, right field; C. Cummings, St. Louis, short stop; J. C. Roush, Pittsburg, first base; Lawrence McGreal, Milwaukee, second base; Lawrence Luckner, Minneapolis, third base; Burton J. Pierce, Kansas City, catcher; L. C. Wiswell, Chicago, pitcher; J. Fisher, Pittsburg, and W. Davidson, Columbus, substitutes.

Plume's Western Trip.

E. C. Plume, western wholesale manager of the Columbia Phonograph Co., went to Livingston, Mont., last month on a short visit to F. A. Scheuber, president of the Scheuber Drug Co., who are exclusive Columbia jobbers for Montana, Wyoming and the western portions of the two Dakotas. On the way he made brief stops at Milwaukee and Minneapolis. Mr. Plume is enthusiastic regarding the excellent success Mr. Scheuber has had in building up a large business on Columbia goods in a territory much of which would not be considered especially promising as a talking machine field. Besides creating a number of good dealers, he is doing an excellent retail business at Livingston and also in four other Montana towns in which he has retail branches. He does a good business on Grafanolas, and placed a substantial order for the new Mignons from photographs. Mr. Plume and Mr. Scheuber spent Sunday at Yellowstone Park. General conditions through Montana and Wyoming, Mr. Plume says, are good, the price of land is steadily going up and business is flourishing.

Columbia Increase Wholesale Facilities.

The wholesale business of the Chicago branch of the Columbia Phonograph Co. has increased at such a rapid rate that Manager C. F. Baer has been compelled to secure additional storage facilities. Half of the sixth floor of 304 Wabash avenue has been leased and will be utilized for machine and supply stock.

District Manager W. C. Fuhri received very encouraging reports from the Columbia branches through the West and South for May, which made a very large gain above last year. Samples have been received at the Chicago office of a number of the new Symphony records made for the Columbia Co. by members of the Boston Opera Co., and which include many remarkable solos and excellent Rigoletto Quartette and Lucia sextette numbers. They are bound to create something of a sensation when they are placed on sale.

The Aeolian-Victor Deal.

Arthur D. Geissler, general manager of the Talking Machine Co., of this city, returned this week from St. Louis, where he spent some days with Herman B. Schaad, of the Aeolian Co., checking up the inventory and closing up the final details by which the stock, fixtures and business of the St. Louis Talking Machine Co.

were sold to the Aeolian Co., who become Victor distributors in St. Louis and who will establish Victor departments in all their retail stores, as briefly told in last month's World.

This department, on the part of the Aeolian Co., has been one of the principal topics in trade circles the past month, not simply because of the volume of business on Victor goods involved, but because of its broader significance and its influence on the music trade in general. It is hardly necessary to state that Mr. Geissler has been heartily congratulated on all sides for his excellent work in bringing about a deal of such magnitude.

When asked regarding some of the particulars of the deal and its inner meaning and effect on the trade, Mr. Geissler, in substance, said: "Here is one of the biggest concerns in the music trade industry in the world, and one which has heretofore fought clear of anything in the nature of a side line, recognizing and stamping with its endorsement Victor goods to the extent of going into the business as distributors and retailers in an extensive manner.

"The Aeolian Co. have always been recognized as exponents of the very highest ideals in the player and piano field and their recognition of the Victor as a musical instrument of the most artistic type and one finding its natural channel of distribution through stores of the character of those conducted by the Aeolian Co. is certainly important.

"From the purely commercial side, the deal is equally notable. The proportionate reduction of overhead expenses secured by installing Victor departments, the additional advantage of a side line entailing a quicker turnover than that possible in the regular line, and the large number of people attracted to the store who are prospective piano or player-piano buyers make it a peculiarly advantageous line for music dealers. This, of course, has been amply demonstrated in the past, but the entrance into the field of a concern so great and yet so conservative as the Aeolian Co. must have a strong influence into converting music houses who have been holding back; those who, if they have handled talking machines have not given them the attention or the position in their establishment that they deserved, and those, and they are not a few, who handled them in the early days of the industry, dropped them, and have allowed their prejudices to blind them to the remarkable development along artistic lines of the past decade.

"The stock of the St. Louis Talking Machine Co. was removed a week ago to the St. Louis branch of the Aeolian Co. and while I was there Mr. Schaad, Mr. Honea, the new manager, and myself were all very much impressed with the number of people who came into the store to buy records or look at machines, and the fact that a very large proportion of them are of the class who buy the highest priced product of the Aeolian Co. They all have to pass through the piano warerooms to reach the Victor department and the Aeolian sales force are all impressed with the benefit bound to result.

"The stock and fixtures of the St. Louis Talking Machine Co., taken over by the Aeolian Co., aggregates in value \$75,000, stock to the amount of \$10,000 has been shipped to the Cincinnati store, an equal quantity to the Indianapolis store, about \$5,000 to the Dayton, O., store and about \$2,000 to the Fort Wayne store. This simply gives some idea of the manner in which the Aeolian Co. are going after the business, and beautiful departments are being fitted up in all the stores.

"Best of all is the announcement that the entire eighth floor of Aeolian Hall in New York City is to be fitted up as a Victor department, which will be one of the largest and most complete in the country."

IT is only logical that the World's Largest Music House should be America's foremost distributor of the World's Greatest Musical Instruments, the

VICTOR TALKING MACHINE AND THE EDISON PHONOGRAPH

The same progressive and honest business methods have been followed in perfecting the distribution of Talking Machines and equipments that have characterized this internationally famous house in other lines of their endeavor.

Every order, no matter how small or how large, has painstaking attention. Where mistakes occur, as they sometimes will, Lyon & Healy are prompt and eager to make correction. The stock is under the supervision of experts, who anticipate the needs of the dealer, and orders are always filled complete on day of receipt, except where delay is unavoidable.

Lyon & Healy's liberal terms are the talk of the trade, and if you are not taking advantage of them and profiting thereby, you should do so at once. Hundreds of dealers, all over the country, will testify to the benefit they are receiving through the superior Lyon & Healy Service.

Hall has proven a success from the start. Manager T. H. Fletcher says that although in the company's initial advertising campaign in the Chicago papers all of the space, with the exception of a few lines in a single announcement has been devoted to the Aeolian product, the department has done well and has shown a nice profit, and that it is to be energetically pushed and advertised in the future. The Victor department here is in charge of O. C. Searles, a young Victor enthusiast, who promises to make good along large lines in his present position.

New "Talking Machine Shop."

The exclusive Victor store, "The Talking Machine Shop," at 169 Michigan avenue, has evidently proved a success under the present proprietors, George and Cecil Davidson, although it was long looked at in the light of an experiment by the trade.

At any rate, another store, under the same name, is to be established by the Davidsons at 43 Jackson boulevard, in the magnificent new Steger building, and the second store west of the entrance to the building. The Steger building is on the corner of Jackson boulevard and Wabash avenue, and a good deal of trade which surges along the avenue should be attracted, while morning and evening the crowds of Southern suburbanites who use the boulevard on their way to and from the Illinois Central depot should furnish a fine quota of high class trade.

Like the parent store on Michigan avenue, the new "shop" will be fitted up in an extremely artistic manner. There will be two large booths on the main floor, while in the basement, reached by a staircase in the center of the room, will be three more booths and the record stock. The booths and the woodwork, with the exception of the doors, which will be of mahogany, will be in white enamel trimmed in mahogany. The furniture will all be in antique mahogany. The floors will be handsomely rugged and everything throughout will be artistic and harmonious. The store has practically a crystal front and gives excellent opportunity for display. George Davidson, assisted by W. E. Clark, will take charge of the new store, while C. L. Davidson will remain at the Michigan boulevard store. The new store will open about July 1.

Good Edison Results.

The morning Edison concerts at Lyon & Healy's are said to be having an excellent effect on the retail Edison business of the big house.

A. V. Chandler, Illinois representative of the National Co., has been spending several weeks in Chicago. He says that the Amberola business is increasing at a remarkable rate.

R. J. Keith Visits Alma Mater.

Roy J. Keith, sales manager for The Talking Machine Co., Chicago, went to Urbana, Ill., the home of the State University, last Saturday to yell for the team from his Alma Mater, Leland Stanford University, at the conference track meet. He happened to meet a friend whom he had not met for years, but who resides in Urbana, and before the day was over he had steered him into the store of his dealer in Urbana, G. W. Lawrence, sold him a Victrola, loaded it on an express wagon and delivered it personally.

H. S. Conover Married.

H. S. Conover, Michigan traveler for The Talking Machine Co., Chicago, was married on May 24 to Miss Claire Byrnes, a charming young Chicago woman. Their wedding trip included St. Louis, Atlanta and other Southern points.

Good Summer Window

A. D. Herriman, retail manager at the Columbia's Chicago branch, has an exceedingly effective summer window display. It represents a camping scene and is exceedingly realistic. In front of a tent, which is equipped with every convenience, is seated a man, or rather a wax figure, who is listening raptly to a graphophone. A campfire in the back ground is cleverly produced by means of strips of bark, streamers of red cloth kept in motion by an electric fan, and illuminated by concealed incandescent bulbs. Herriman says that the window has sold graphophones, and it has also elicited many inquiries as to the prices of tents and sporting goods.

Fibre Needle Progress.

The B. & H. Fibre Mfg. Co. will shortly receive a shipment of what is undoubtedly the finest bamboo ever brought into the United States. It consists of over 10,000 poles eight feet in length and from 3½ inches and up in diameter, and of the type known as Ivory White. The bamboo comes from a section of Japau, known for the peculiarly high grade quality of its product, and which, by long experimentation with bamboo from various parts of China, Japan and India, has been found to be the best for B. & H. fibre needles. The principal features which make this particular growth of bamboo especially adaptable for the purpose are the thickness of the silicious outside shell, the closeness of the grain and its extreme hardness. The company are now getting nicely settled in their new and larger factory, and in a very short time will gain the full benefit of the much needed increased capacity.

Enlarges Graphophone Department.

Peter M. Streit, a Columbia dealer at Lincoln and Belmont avenues, Chicago, has recently leased the adjoining store which will be devoted entirely to his graphophone business.

F. A. Cass, manager of the credit department of the Chicago Columbia branch, leaves next week for his monthly muskalonge hunt in the wilds of Northern Wisconsin.

L. & H. Picnic.

The first outing of the season of the employes of Lyon & Healy was held last Saturday afternoon at Dellwood Park, near Joliet. There were numerous more or less athletic "events," mostly for the ladies, and department H was represented among the victors by Miss Rapps, who won the egg race, and Miss Woods, who captured the first prize in the peanut rolling contest.

Visitors.

Andrew McCarthy, of Sherman, Clay & Co., San Francisco, was in Chicago recently on his way East.

E. A. McMurtry, manager of the Pittsburg store of the Columbia Phonograph Co., accompanied by his wife, are in the city, the guests of W. C. Fuhri. Mr. McMurtry is one of the oldest men in point of service in the Columbia service and was at one time associated with Mr. Fuhri at the St. Louis store.

Edward Geissler Homeward Bound.

Edward Geissler, of the George J. Birkel Co., Los Angeles, accompanied by his wife and athletic son, "Ted," are again in the city, the guests of A. D. Geissler, on their return from the East.

Bacigalupi Bound East.

Peter Bacigalupi, the large talking machine dealer of San Francisco, and Leon F. Douglass, vice-president of the Victor Talking Machine Co., passed through Chicago on Decoration Day on their way East. Mr. Bacigalupi had intended making the trip earlier but postponed it in order to have the company of Mr. Douglass.

George Eicholz to Have New Store.

George Eicholz, a prosperous young talking machine dealer of Milwaukee, was in the city this week visiting the various stores and getting ideas for the equipment of a new store at 552-554 Twelfth street, Milwaukee, to which he is to move from his present location on Fond du Lac avenue. The new store is 40 x 50 feet in size, will have four booths and a concert room, and will be admirably equipped in every particular. Mr. Eicholz handles Victor and Edison goods and was recently made a Zonophone jobber.

Mayer an Edison Enthusiast.

John E. Mayer, of Dixon, Ill., was a Chicago visitor this week. He is an Edison enthusiast and has recently strengthened himself by purchasing the Edison stock of J. J. Miller, the veteran music dealer of Dixon. This makes Mr. Mayer the exclusive Edison dealer in the thriving Illinois city. Just before he left town he sold an Amberola to a leading citizen of Dixon.

Germain Adds Talking Machine.

The Germain Piano Co., manufacturers, of Saginaw, Mich. will install Victor talking machine departments at once in their retail stores at Saginaw, Bay City and Jackson, Mich., and later on at their Detroit store. Lyon & Healy secured the business which was eagerly contested

for by several jobbing houses and L. C. Wiswell went to the Michigan city in person to close the deal. R. R. Gorham, who has been the L. & H. talking machine traveler in Michigan, will have charge of the talking machine business of the Germain Co., with headquarters at the Saginaw store. He will be succeeded on the road by P. Van de Roovaart, who has been a valued employe of department H for some time.

Death of Sam Goldschmidt's Father.

Sam Goldschmidt, district manager of salesmen for the Victor Co., came to Chicago on a sad mission a fortnight ago, bringing with him all that was mortal of his father, who died at the family home at Marquette, Mich. The burial was at Waldheim cemetery, this city. Mr. Goldschmidt has the sympathy of the trade.

PROGRESS IN COLUMBIA SALES.

The Columbia Phonograph Co.'s General Business Rapidly Doubling Up on Last Year's.

In an interview with George W. Lyle, general manager of the Columbia Phonograph Co., just before going to press, our representative was favored with the statement that the general and progressive increase in the Columbia sales so far in 1910 had been much larger than could have been by any possibility hoped for.

Last year May was a good month, and May, 1910, showed a record +0 per cent. ahead of last year May.

June, not by any means usually an extraordinarily lively month, is not only 60 per cent. ahead of last June, but leading May, 1910, by a very broad margin.

The interesting and significant feature in all this increase, according to Mr. Lyle, is the fact that the increase is general, geographically and in product. The increase is practically uniform through every branch of the Columbia service and in every section of the country, and in every line of goods manufactured, both low-priced and high-priced.

A DISC RACK THAT WILL SELL.

The new disc rack recently put on the market by the Syracuse Wire Works, Syracuse, N. Y., entitled The Seneca, and advertised elsewhere, is well worthy the consideration of dealers. Its merits are obvious, and it can be sold at an amazingly low price. It should prove a trade stimulator for all who handle it.

Among the visitors to The World sanctum last week was H. J. Cullum, of Lockwood's, the prominent factors of London, Eng., who, accompanied by his wife, has been on a visit to the West Indies. Mr. Cullum has been greatly benefited by his outing and returns to London splendidly equipped to further develop the business which he controls with such distinction.

VICTOR FACTORY EXPANSION.

Six-Story Building Ready for Occupancy and Erection to Cabinet Factory Progressing Rapidly—Demand Keeps Pace with Increased Facilities—Other News of Interest from Camden.

(Special to The Talking Machine World.)

Philadelphia, Pa., June 9, 1910.

The big six-story machine factory of the Victor Talking Machine Co., Camden, N. J., is practically ready for occupancy, and an excellent view appears in the accompanying cut, showing the extension to their recently completed cabinet

EXTENSION TO NEW VICTOR CABINET FACTORY.

factory. This extension will add 65 feet to the depth of this building, and as soon as this extension is run up to the height of four stories two more stories will be added to the whole, making this immense cabinet factory six stories high, and practically doubling their but recently tripled capacity.

On January 1 when the company saw the completion of their new cabinet factory they thought that at last they had capacity equal to any demand; but the idea didn't last long—this immense up-to-date cabinet factory is too small—so they are adding 65 feet and running it right back to and against the dry kilns. If that isn't capacity enough they will build more cabinet factories. The company are also putting three more stories on top of the executive and laboratory building, which will give three whole floors to the recording laboratory and provides two more floors to house various executive departments.

Orders continue greatly in excess of the company's capacity, and they frankly say: "We cannot at this time see how it is going to be possible for us to fill more than a percentage of our orders before the holidays. Of course, we have looked for a lull in orders during the summer

months, but up to the present time there seems to be no indication of any let-up; in fact, we

Clarke, while here, expressed his wonder at the Victor Co.'s immense growth and completed arrangements for an increased supply of machines for the European market.

Leon F. Douglass, chairman of the board of directors of the Victor Co., is on a visit to the Victor factory, having arrived June 1. It is needless to say that he was royally welcomed and has been busily occupied in consultation with various committees, giving his views and observations as noted from a distance. Mr. Douglass will remain about two weeks.

A. G. McCarthy, treasurer of Sherman, Clay & Co., San Francisco, who is in the East on his wedding tour, is taking in a little busi-

ONE OF THE SIX FLOORS IN THE VICTOR MACHINE FACTORY.

ness on the side and is at present a visitor to the Victor factory. He is more than elated with their splendid Victor business and has placed with the company enormous orders. Here is a little memoranda that Mr. McCarthy received:

"Jack Johnson, the prizefighter, is now in the London, Eng., with store buying records, and more than 400 people are now in front of Sherman, Clay & Co.'s, waiting for him to come down to his auto. He is as proud as a peacock over the Victor, and says it is the biggest pleasure they have at their training camp."

are booking orders today that remind us very much of the holidays." Alfred Clarke, managing director of the Gramophone Co., of London, Eng., with Mrs. Clarke, after a month's visit to the Victor factory, sailed on the "Kaiser Wilhelm II." on June 7. Mr.

DEALERS' ASSOCIATION MEETS.

Regular Session Held June 8—Membership Growing—Talks on Trade Methods—Resolution Passed Asking for Larger Price on Outfits Sold on Instalments with Discount for Cash Buyers—Dealers to Confer with Jobbers at Atlantic City.

The Eastern States Talking Machine Dealers' Association held their regular quarterly meeting at the New Grand Hotel, New York, on Wednesday, June 8, with about two dozen dealers in attendance, several new members being added to the rolls. Much was accomplished at the meeting that should prove to the benefit of the trade at an early date.

In response to the invitation of President Storek, M. A. Carpell made an interesting address wherein he pointed the advantages derived by the talking machine dealer from the selling of cabinets and how their sale materially increased the record business of the dealer and their possession kept alive the interest of the owner in the machine.

Chas. A. Laureigh, of Orange, N. J., a member of the association, gave an interesting talk on business methods and had some excellent advice to offer the dealers as a result of his own experiences in the business. He laid particular stress upon the importance of a complete and well kept stock and the necessity of the dealer keeping wide awake.

R. Montalvo, a young and very successful dealer of New Brunswick, N. J., next told the secret of his success, which was persistent and forceful publicity, with a generous use of newspaper space.

A resolution was here introduced and passed, asking the manufacturers to devise some means for increasing the price of outfits sold on the instalment plan, over the set cash price and thereby offering an inducement to cash buyers. While no plan was definitely decided upon it was suggested that a straight advance on list prices to cover instalment sales with a prescribed discount for cash was the best solution of the problem. In the arguments bitter attacks were made by the dealers upon the department store methods of handling instalment sales, with from ten to twenty months to pay for the outfit at the list prices.

President Storek suggested that the factories be requested to have men thoroughly familiar with the line and with the latest selling methods visit the dealers and look into their business and methods and make suggestions tending toward increasing their sales. It was pointed out that the improvement in the dealers' business would result in an increased volume of orders for the jobber and the manufacturer of sufficient amount to well repay the latter for the sending out of the representative.

A letter was received from the secretary of the National Association of Talking Machine Jobbers inviting a committee from the dealers' association to visit Atlantic City during the convention next month and confer with the jobbers regarding matters of mutual interest. As several members of the latter association had planned to visit Atlantic City at that time of their own volition they were appointed on the committee and will serve the association without expense to that body. One of the subjects to be introduced at the conference by the dealers will be the advisability of having a better adjustment of the opening dates for Edison and Victor records, either to have them come together or further apart than at present. Reduced freight bills and greater conveniences in handling are given as the reasons for desiring the change.

All the business of the meeting was confined to one session thereby saving much time for those in attendance.

Saul Birns, who also has a store at 77 Second avenue, on June 1 opened another place at 27 East Fourteenth street, New York. His new establishment is elegantly fitted up, and his Victor sign outside is of striking design.

TRADE IN THE MONUMENTAL CITY.

Sales During May of Excellent Volume—Summer Dulness Not in Sight—McAllister's Victor Trade—Eisenbrandt Sons to Move—Sanders & Stayman Enlarge Talking Department—Other News of Interest.

(Special to the Talking Machine World.)

Baltimore, Md., June 6, 1910.

Statements by the various dealers covering the month of May would indicate that conditions have been very favorable for the trade. Contrary to expectations, the summer dulness has not yet struck the dealers, that is, the majority of them. This is probably due to the fact that the weather conditions have been unusual, in that cool weather has prevailed right along and has tempted the shoppers to be out in force just the same as during the busy times of the winter months.

William McCallister & Sons, Baltimore street, near Howard, are having fine results with the various styles of Victors. Their success, in fact, has been such that they have established several new agencies in east and southeast Baltimore. The demands in those sections for these popular instruments have come in so strong recently that the firm found it necessary to put on these new agencies in order to properly handle the increasing demands on the trade.

H. R. Eisenbrandt Sons, Charles and Lexington streets, who run a big line of Victors, have big signs in front of their business establishment announcing that they will move to their new and more spacious quarters on North Howard street, near Saratoga street, just as soon as the new building is completed. Work on the new establishment is progressing rapidly.

Ademor N. Petit, 318 North Howard street, who has conducted the talking machine business for a number of years in this city, is busy with the retiring sale which has been in progress for the past several weeks.

Sanders & Stayman have had such success with their vast lines of Columbias and Victors that they have found it necessary to extend their talking machine department on the fifth floor of their store at the southeast corner of Charles and Fayette streets. While the business was formerly confined to one room, where the records were stored and the sales transacted, the latest move of the firm changes all of this. Manager Albert Bowden has the records and machines in one huge storeroom, while the addition consists of a spacious sales department and music

room. Business for the month, according to Mr. Bowden, has been excellent.

Morris Silverstein is now connected with the talking machine department of Cohen & Hughes, who handle the Victor and Edison lines. Mr. Silverstein first came here from Louisville, where he was manager for the Columbia Phonograph Co., to take charge of the company's local store. He later changed and went into business on his own account with a line of Victors and Columbias on Howard street, near Lexington. He relinquished this to accept his present position with Cohen & Hughes.

Manager T. Allan Laurie, of the local store of the Columbia Phonograph Co., states that as a result of the splendid display made by the Columbia Co. at Richmond many of the piano dealers have been convinced that there is a larger field for talking machines and he believes that the result will be the establishment of many more Columbia agencies in the Southern States, controlled by the Baltimore office.

William Reiser, formerly of A. N. Petit Co., who are about to retire from the local field, has been placed in charge of the retail department of E. F. Droop & Sons Co. by Manager Roberts. Droops handle the Victor and Edison and report that the month has started in with good indications for a nice summer business.

Cohen & Hughes have rearranged the front part of the first floor of their store for the sales department for talking machines. This works to better advantage than the former arrangement of having this department on the second floor. The storeroom will remain on the second floor. Manager Grottendick reports that the month has shown up well.

LIPMAN KAISER'S VACATION.

Lipman Kaiser, director of the talking machine department of the S. B. Davega Co., New York, starts on a month's vacation to Belgrade, Me., on June 30. A cottage has been rented, and he will be accompanied by Mrs. Kaiser. As Belgrade is in the lake region of Maine, Mr. Kaiser will do a lot of fishing and boating, and on his return it will be strange if not a few fish stories will be in order. The business of the S. B. Davega Co. is running 25 per cent. better than last year.

The Columbia Phonograph Co. are already receiving orders for the Grafonola Mignon from dealers who saw it at Richmond, Va. A description of the machine was mailed to all Columbia dealers.

This is Our
Victrola Protector

For Victrola XII and Amberolas also

☐ Every high-class machine on your floor should have a protector. It insures them from injury, dust and dampness.

☐ Most of your customers use their machines on their verandas, yachts, etc., during the summer; where they are exposed to the weather. You can make good profits and pleased customers by selling them protectors.

☐ Write us NOW for samples of materials, prices, etc.

S. B. DAVEGA CO.

New York City

ENJOINS ANOTHER PRICE CUTTER.

The National Phonograph Co. Secure an Order Enjoining David Reinhorn from Selling Edison Phonographs and Records Below Price—Extracts from the Judge's Order.

Below appears in part an order recently issued in the United States Circuit Court for the District of New Jersey, providing for the issuance of an injunction enjoining and restraining David Reinhorn, of 91 Springfield avenue, Newark, N. J., from disposing of Edison phonographs, reproducers and records, covered by the three patents in suit, at prices less than those prescribed by the National Phonograph Co. The preliminary injunction, filed May 31, dwells particularly on the sale of second-hand goods that may have been acquired from private owners of phonographs. The substantial portion of Judge Rellstab's order follows:

ORDERED, ADJUDGED and DECREED, that a preliminary injunction issue enjoining and restraining the said defendant, David Reinhorn and his associates, agents and employees and all persons acting under his control or in privity with him, pending the cause and until the further order of the Court, from in any way interfering with the carrying out of the selling license system of the complainant, National Phonograph Co., and from soliciting or procuring or aiding in any way in the violation of any of the provisions of any and all license agreements between the complainant and its jobbers and dealers; and from soliciting, obtaining and procuring any of the authorized jobbers and dealers of the complainant, to sell to him any Edison phonographs or any Edison reproducers at less than the list prices prescribed by the complainant, and any Edison Standard Records at less than 35 cents each, or any Edison Amberol records at less than 50 cents each.

Also from soliciting, aiding, obtaining, or procuring any users or members of the public who have previously purchased the said Edison records in cartons bearing the printed notices of restrictions imposed on the use and sale thereof by the complainant, and subject to the restrictions of the said notices to sell the said Edison records to defendant at second-hand at prices less than those named in said restriction notices, namely, 35 cents each for Edison Standard records, and 50 cents each for Edison Amberol records, or to violate in any wise any of the said restrictions in said notices contained; and from selling or causing to be sold any Edison phonographs or Edison reproducers at less than the list prices prescribed by complainant. . . . in violation of the provisions of the jobbers and dealers' license agreements, which are in evidence, and from directly or indirectly using or causing to be used, selling or causing to be sold, any apparatus, articles or devices embodying, operating or constructed in accordance with the inventions and improvements in said Letters Patent Nos. 744,266, 782,375 and 798,478, without the license and consent of complainants thereto.

Many an employe nurses his job so faithfully that he finally puts it to sleep.

A JULY 4TH WINDOW DISPLAY.

Victor Talking Machine Co. Take Advantage of Crusade for Safe and Sane Celebration to Prepare Handsome and Timely Window Display for Dealers.

Taking advantage of the present crusade all over the country for a safe and sane Fourth of July celebration, the Victor Talking Machine Co.

of the accompanying interesting illustration.

On the large shield hung in the center between the two American flags appears the following:

"On the Glorious old Fourth bombard your friends and neighbors with patriotic music from the cannon horn of your Victor. They'll enjoy it immensely—and so will you. We'll be glad to furnish the ammunition by supplying all Victor records you may wish. Come in and let us fire off a few records for you now."

THE VICTOR JULY 4TH WINDOW.

have had prepared for the use of their dealers an elaborate window display of a nature to attract the attention of everyone who passes a window in which it is shown, and an excellent idea of the arrangement may be obtained from a perusal

The little girl has a canteen hung from her shoulder bearing the words: "I bought Victor records instead of fireworks." The knapsack bears the "ammunition" in the form of a selected list of patriotic records suitable for the occasion, while the six records piled up cannon fashion also represent patriotic airs.

The drum resting beneath the knapsack bears strong copy on its head showing that "You can face the music on the Victor in perfect safety and still celebrate the Fourth in the most inspiring and patriotic way." The display is brilliantly colored and should prove a business boomer for those dealers who use it in its entirety or in part. It is one of the most effective window displays prepared by Ellis Hansen and should be used by every "live" dealer.

THE BURCHARD NEEDLES.

The Quality Features of the Needles Made by F. R. Reingruber of Schwabach, Bavaria, Brought to Attention.

The needle question is always an interesting one to dealers and some very pertinent remarks on this subject are contained in the volume devoted to the Burchard needles issued by F. R. Reingruber, Schwabach, Bavaria, Germany, whose advertisement appears elsewhere. In this booklet he emphasizes the quality value of the Burchard needles, and the fact that a varied series are turned out to suit all styles of playing, moreover, that they move noiselessly over the disc, and can be used several times. The process of manufacture is explained and illustrated in detail, and information of value is conveyed which should interest dealers and the trade generally. Emphasis is placed upon the quality of material used in these needles.

Here is the Opportunity of a Lifetime

For every Edison dealer in a city or town of any size where considerable business correspondence is carried on—in handling

The Edison Business Phonograph

While the business man enjoys the Phonograph in his home he needs the Business Phonograph in his business—because it cuts the cost of letter writing in two, enables him to turn out twice as much work as formerly and yet double the amount of efficiency out of every employe on his correspondence staff.

The whole business field is your territory, the opportunity is limitless, the profits are generous and there is not enough competition to shake a stick at. The surface has not even been scratched. Get in while the game is young. Write us for full particulars to-day.

The Edison Business Phonograph Company, 207 Lakeside Ave., Orange, N. J.

No man is going to let a \$200 musical instrument stand idle. He is a record buyer from the first and continually. Every Columbia Grafonola you sell is Money in the Bank.

Columbia Phonograph Co., Tribune Building, New York.

BOSTON'S BUDGET OF NEWS.

June's Favorable Outlook—Eastern Co.'s Good Report—Constantino's Gift of Graphophone—E. T. M. Co.'s Field Day—Summer Closing Plans—Anent the Conclave Co.—Atkinson Installs Talker Department—Many New Dealers Recorded—Healthy Conditions Prevail.

(Special to The Talking Machine World.)

Boston, Mass., June 8, 1910.

June opened magnificently from a talking machine standpoint. While there was not much life to the May volume, still it was of sufficient importance to show that business was simply "quiet" and not due to any particular disturbing elements. That is a condition that is expected every year at that time. The first week in June consisted of only five days, but the total business, both wholesale and retail, was very large. A rush of summer business—machines and records for summer cottages, camps, hotels and clubs—was the real cause of the activity, and if the demand continues at the same pace, it will create a record month for June.

E. F. Taft, secretary and general manager of the Eastern Talking Machine Co., Victor and Edison jobbers, reports the closing of a very successful five months' business to June 1—a trade that is way ahead of last year's similar period. This total is made up of the higher priced machines and records, which conclusively proves that the public, as the final distributing element, is recognizing the advantage of purchasing talking machines of the highest quality. Anent collections, Mr. Taft said they were good as a whole, taking in wholesale and retail ends, but as customary with every business, there are always some who need more of the "Please remit" than others. Mr. Taft is planning to attend the national convention, where he is always a popular figure.

Arthur Erisman, Boston manager of the Columbia Phonograph Co., recently received the following letter from William O. Mann, superintendent of the Massachusetts Homeopathic Hospital: "I am pleased to inform you that the graphophone which was presented to this hospital some time ago by Mr. Constantino, has been a source of great pleasure to the patients. It has been the means of their passing many pleasant hours which otherwise would have been dull and tiresome." The presentation of the Columbia Grafonola by Constantino has already appeared in these columns, so it is interesting to note the joys that have been reaped by its presence. Mr. Erisman will spend a few days at Atlantic City, following the convention proceedings.

The usual air of activity was witnessed on The World correspondent's usual trip to the huge Victor emporium of M. Steinert & Sons Co. Nearly all the sound-proof booths were filled with prospective retail customers listening to the strains of the Victor, while the activity in the wholesale line was attested to by the bustle in the shipping rooms and the energetic work of the clerical force. Herbert L. Royer, manager, classifies trade as "excellent," indirect-

ly bearing out what could be seen at a glance. The following brief dialogue is expected to occur on the first day of the convention: Question: "Mr. Royer?" Answer: "Present!"

The E. T. M. Co. Associated held their final meeting for the fiscal year the last of May. Secretary S. J. Freeman said the association had accomplished a great deal which could not be secured individually. The summary of the work was read, and it brought forth many interesting figures. The next meeting will occur in September.

It was voted at the last meeting to hold an "E. T. M." Field Day, probably at Providence, R. I., on June 17. A. W. Chamberlain has the entertainment problem under consideration, and there will be lots of it—entertainment. "The main attraction" will be a ball game between the "Victors" and the "Edisons," composed of the following teams: Victors, S. H. Brown, captain; M. L. Read, Joseph Price, Robert McCourt, John McLaughlin, Harry Caddigan, Joseph Greene, Stephen Lamont, Edw. Wilkinson; Edisons, A. W. Chamberlain, captain, W. J. Fitzgerald, Edw. Welch, Fred Finn, B. F. Reardon, J. Spillane, C. J. Aurbach, Thomas Murphy, George Reece. General Manager E. F. Taft refuses to serve as umpire because of the excessive risk of personal violence, so here's a chance for someone like Eva Tanguay (who doesn't care.) The writer has received a "straight tip" to place his change on the Edisons.

J. V. Gately, of Maynard, Mass., recently added the Columbia line of machines, securing the exclusive representation at that point.

The Atkinson Furniture Co., Tremont and Eliot streets, Boston, have installed a talking machine department, managed by L. F. Lambert, assisted by F. A. Lambert. They handle Edison and Victor instruments. L. F. Lambert says a vigorous advertising campaign will be planned to capture the fall trade.

One of the big talking machine concerns on the north side of the city is the Tosi Music Co., who sell the three big lines, Columbia, Edison and Victor. They sell a great many of the high price operatic records in Italian.

Perhaps the youngest dealer in the city is Harry Rosen, of School street. Mr. Rosen has been in business for a number of years, has a good following of the best trade, compact, sound-proof display rooms adjoining his main warehouse, and taking it all and all, transacts a fine talking machine business.

"Chargogagoggmancauggagoggchaubungaungamaugg" is not the name of a new machine, needle or record. It's simply the short name of the lake, on the shores of which Henry L. Winkleman, manager of the Victor talking machine department of the Oliver Ditson Co., plans

to spend his vacation. This wonderful lake is in Webster, Mass. Mr. Winkleman reports a continuance of the gratifying Victor business which the Ditson Co. execute from month to month.

One of the Massachusetts dealers who has secured the Columbia agency is D. J. Barnicle, of South Framingham, taking it as an exclusive proposition.

In the accompanying illustration is seen what can be accomplished by inventive genius. The "genius" is W. J. Fitzgerald, and that he

EASTERN TALKING MACHINE CO.'S SPECIAL WINDOW. showed admirable judgment in the decorative scheme is best vouchsafed by the throngs of people who admired the display daily. The lady wears an operatic gown, and the scene shows her playing a Victrola after she has attended the opera. She also has that Victor-smile that always appears soon after the first few notes of music are heard, meaning "it's just like the opera." Good work, Fitz, keep it up!

C. B. Thompson has resigned his position of manager of the talking machine department of the Henry Siegel Co. He is at present considering several propositions.

In Foxboro, Mass., J. William Gove has undertaken the promotion of the Columbia goods exclusively. A good-sized initial order signalizes the movement.

The Edison "Special Summer Service" of the Boston Cycle & Sundry Co. is going along extensively with this company, according to Charles R. Cooper, general manager. He also paid the advertising merits of The World a flattering testimonial, saying he had a number of inquiries from his small advertisement in the last issue. "One of the features of last month's trade," Mr. Cooper added, "was the exceptional demand for Edison Amberol attachments, which stimulated business considerably."

F. S. Boyd, manager of the Iver-Johnson Co.'s

talking machine department, is another member of the trade to attest the rush in the Amberol attachments for Edison machines, as well as general retail business. Mr. Boyd expects to spend his vacation in Maine.

The big jobbing houses of the Eastern Talking Machine Co. (Victor and Edison machines) have agreed to close Saturday afternoons at 1 o'clock during July and August, so the boys will get an opportunity to commune with nature quite a lot this summer. The Oliver Ditson Co. will, as in years past, be closed during that period, and this policy will undoubtedly be followed by the other jobbing houses in the city.

Manager Childs of the recording department of the Victor Talking Machine Co. was in Boston recently for the purpose of arranging with several artists for the recording of a number of Neapolitan songs in Italian, the larger number of which will be double-faced.

Edison Triumph Machine No. 55324, which was secured from the ruins of the Chelsea fire several years ago, is still occupying a niche of fame at the talking machine department of the Houghton & Dutton Co. The only missing parts are the brass gears and the reproducer, which speaks decidedly well for the sound construction of Edison machines. Other instruments in this conflagration, including pianos, were totally destroyed. Wm. F. Howes, manager of this department, speaks encouragingly of business conditions with the three lines which they handle: Columbia, Edison and Victor.

R. J. Costa & Bro., Fall River, Mass., are now full-fledged Columbia representatives, having booked that agency recently under the "exclusive" stipulation.

Here's a sales stimulator of the first water that is being promoted by the C. E. Osgood Co., under the able direction of Manager Sylvester. It's a "Record Club" with an initiation fee of 65 cents to pay for a double-face Columbia record, and if you keep up the dues of buying a similar priced record each week for 12 weeks, you are presented with a golden oak cabinet of a late design with a capacity of 75 records. If you miss a week, you miss the cabinet, as you must buy each week for 12 weeks. 'Tis quite a novel scheme to "keep 'em coming," and there's no telling what additional sales can be made by seeing a customer 12 weeks in succession.

Racicot Bros., the big furniture installment house of Webster, Mass., celebrated the securing of the Columbia repertoire of machine by an

initial order embracing the complete line of goods.

Harry L. Tilton, president of the National Sportsman, Inc., 75 Federal street, this city, says they are planning to devote considerable energy toward furthering talking machine sales in the near future. This concern are exclusive Columbia dealers.

Victor manager S. J. Freeman and Edison "Overseer" A. W. Chamberlain of the Eastern Talking Machine Co., are about even in their claims for a good staple May-June volume of business. Both these gentlemen are adepts in their station, and there is considerable good-natured "rivalry" as to the "bigness" of sales.

The Conclave Phonograph Co., operated by Samuel Katz, recently opened talking machine warerooms at 199 Tremont street, this city, handling the Victor, Edison and Columbia products. This house also controls stores on Portland Street and Staniford street. It is learned to-day that the National Phonograph Co. have requested the foregoing concern to withdraw Edison machines from exhibition and sale. The Victor Talking Machine Co. have also done likewise, and what will be done if these requests are not complied with is a matter of conjecture. The home companies claim that the present area is now well represented, as they even turned down the proposition of a well-known jobber recently, who wished to invade the same spot.

JUST A "TIP" FROM LONDON.

Seventeen Public Parks to be Supplied with Talking Machine Concerts—What Are Our Dealers Doing Along These Lines—Isn't It Time to "Wake Up" and Get to Work.

The London City Council have made arrangements to give talking machine concerts in seventeen parks in London during the summer months. The season opened late in May and will close late in August.

Isn't this a tip for talking machine jobbers and dealers in this country to wake up? How much more effective a first class talking machine with a repertoire of first class records would be in supplying music for the parks than a poor band. There is no reason why every town and village should not have popular talking machine concerts during the summer if the dealer only becomes alive to his opportunities and goes after the town officials. If the talking machine is good enough for the parks in the capital of Eng-

land it should be good enough for the parks in this country.

CONDITIONS IN GERMANY.

Keen Competition and Low Prices Helped to Keep the Talking Machine Business in Bad Shape Last Year—Larger Concerns Benefitted—Export Trade Better Than Domestic—Decided Improvement in Business Reported This Year.

(Special to The Talking Machine World.)

Berlin, Germany, June 2, 1910.

While conditions in the talking machine trade in this country show a decided improvement as compared with last year, yet the market, viewed as a whole for the past year, was anything but satisfactory. Keen competition among a number of large firms forced the prices down considerably. The low prices which prevailed, in spite of extended credit allowed for larger orders, made it extremely difficult for the medium-sized and smaller firms to compete with any chance of success. Consequently the business done was confined to a few large firms, and considerable increases in their turn-overs are to be reported. The remaining factories, on the other hand, either made no progress or even, fell below their standard of the previous year.

Conditions in the export trade were somewhat better. Taken altogether there was a noticeable increase in exports. Russia and Austria were the principal buyers. The exports to France and Switzerland show a great falling off, but Central and South America, India and the Dutch East Indies show a gratifying increase in their imports of German talking machines. Export prices have also ruled much lower, in spite of the demand for better quality. The German manufacturers have endeavored to keep pace with the requirements in this latter respect. The machines have been greatly improved, as compared with those of earlier date, and there are everywhere signs of unflagging efforts to perfect them. Manufacturers endeavor to cover the extra expense incurred in this way by improved and cheapened means of production.

Conditions were favorable to the manufacture of discs and records. Shellac, the most important raw material used in the manufacture of discs, was obtainable at fair prices, in contradistinction to former years, when the trade had to reckon with very high prices for this commodity—often more than double the present figure. As regards other raw materials, there was a sufficient supply and prices were normal.

In Germany for the greater part of the year the demand for discs and records was slack. The export trade also shows a falling off. In spite of this a number of the larger manufacturers show an increase in business, whereas other firms, successful in the past, were forced to witness a large decrease in their turn-over. This state of affairs is partly attributed to Austrian competition. Numerous German firms, which were formerly exporters to Austria, have established themselves in that country and manufacture there, because the Austrian duty on these articles precludes the possibility of exporting German discs and records to the market.

BLANCHE RING SIGNS CONTRACT.

Blanche Ring, the great favorite in light opera and comedy fields, has signed a three years' contract to make talking machine records for the Victor Talking Machine Co.

CAVALIERI POSTERS ADMIRER.

The colored posters of Lena Cavalieri, sent the trade by the Columbia Phonograph Co., general, are spoken of in the most enthusiastic way for their beauty of coloring and artistic design.

You won't sell any goods to the people who don't come into the store. Study constantly how to get more people into the store and sales will surely come later.

THE SENECA

Here's the new disc rack equipped with board shelving.

Openings are 3 inches wide, over double the width of our other disc racks.

It is 46 inches wide and 51 inches high. Four shelves for 10-inch discs. One for 12-inch.

Finish in bright or dull copper.

Price is \$14.00, envelopes not included.

"The Heise System" of wire racks is the "last word" in stock carrying systems.

SYRACUSE, N. Y.

Ho for the Jobbers Convention!

The National Association of Talking Machine Jobbers Will Convene at Atlantic City July 5th to 9th—The Gathering Promises to be the Most Notable One in Talking Machine History as Indications Now Point to a Larger Attendance Than Any Previous Year—Secretary J. C. Roush is Doing Great Work to Stimulate Interest in the Organization—Every Jobber Should be Present Either in Person or Through Representatives—Prominent Members of the Industry Will Attend and the Success of the Meet is Assured.

Talking machine jobbers are now preparing for the big convention at Atlantic City next month. It will commence on July 5 and members who desire to spend a few days at the sea shore will probably take this occasion to pass the national holiday at the famous resort where they will be swept by ocean breezes.

period of the association's existence that it is now one of the great factors of the talking machine world.

"A membership is doubly important because the policy of the association does not, in any sense of the word, savor in the least of a 'club,' a weapon against others. It has, maintains and

caters to the good will of all talking machine merchants and talking machine companies alike. Its purpose is to secure business relations and procedures directly to the better interests of the jobber; settle all trade differences, eliminate lost motion and facilitate transactions by the friendly exchange of ideas and courteous arbitration.

"The greatest benefit derived from a membership in this association is from the particular feature of "delinquent reports." This, in itself, is worth more in dollars and cents than the annual dues amount to, which are only \$15. This report is compiled monthly from the individual reports which every jobber sends in. Semi-annually a complete report is issued in booklet form showing the exact condition of all questionable accounts as reported by all of the jobbers in the country. This information is far better than any credit agency, for it is right up to the minute and gives specific and detailed information of all irregularities; shows when an account first becomes 'slow,' when it is beginning to 'go wrong.' Furthermore, with the utmost fairness, it reinstates immediately the merchant who has previously been listed as irregular or worse and places him again in favor.

"Among other things the association has brought about the abolishment of express shipments on new monthly records.

JOBBERS PHOTOGRAPHED IN FRONT OF THE CHALFONTE, JULY, 1909.

During a chat with J. C. Roush, secretary of the National Talking Machine Jobbers' Association, he stated that the attendance promises to be unusually large. A great many jobbers East and West have signified their intention to be present and participate in convention work.

L. C. Wiswell, manager of the talking machine department of Lyon & Healy, has secured special railroad rates. The cost from Chicago to Atlantic City and return will be but \$26.

Aside from the business session, which will be of unusual interest, there will be fun as well, for a baseball game is planned between the eastern and western jobbers. There will be lots of fun as well as serious business talk.

The organization is in splendid working order and in a recent communication, in which he sets forth some advantages of the association, Secretary Roush says:

"The purpose of the organization is for direct and mutual benefit of the talking machine jobber. So much has been accomplished within the short

BANQUET OF THE JOBBERS' ASSOCIATION AT THE SHELBOURNE, JULY, 1909.

JOBBERS AS GUESTS OF THE NATIONAL CO. AT THE ESSEX COUNTY CLUB, JULY, 1909.

"Has done away with indiscriminate price cutting on various items.

"Has succeeded in adjusting irregularities in shipments from the different factories, saving time, money, delays and unnecessary correspondence.

"Has protected the jobbing trade against retail buyers qualifying as dealers to obtain machines at wholesale prices.

"Engaged the attention and co-operation of the factories in many different trade matters, direct and indirect, prominent among which is a co-operation with insurance companies, facilitating an equitable adjustment of partial losses by fires and water and replacement of stocks.

"The association has done and is doing a lot of things.

"Belonging to the association is just like paying out a dollar to get ten. And that sounds pretty good to a talking machine jobber."

The jobbers' association is now well established

and has on its membership roll leading jobbers East and West.

The association has labored to bring about certain trade reforms which benefit dealers as well as jobbers.

It must be conceded by those who are familiar with the association work that it has accomplished a good deal for the betterment of the industry.

Special reports of State commissioners will be made regarding the association.

A complete list of the State commissioners comprises the following names:

State Commissioners, National Association.

- Maine—W. H. Ross & Son, Portland, Me.
 Vermont, New Hampshire, Massachusetts—E. F. Taft, Eastern Talking Machine, Boston, Mass.
 New York—Max Landay, Landay Bros., New York City.
 Connecticut—Mr. Silverman, Pardee-Ellenberger Co., New Haven, Conn.
 New Jersey—Edisonia Co., Newark, N. J.
 Pennsylvania—Dan O'Neil, C. J. Heppe Co., Philadelphia, Pa.; J. Fisher, C. C. Mellor Co., Pittsburg, Pa.
 Maryland, Virginia—Carl Droop, E. F. Droop & Sons, Washington, D. C.
 Ohio—Thos. Towell, Eclipse Musical Co., Cleveland, O.
 North Carolina, Kentucky—Montenegro-Reihm Co., Louisville, Ky.
 Georgia, Florida—Ben Lee Crew, Phillips & Crew, Atlanta, Ga.
 Alabama, Tennessee—W. H. Reynolds, Mobile, Ala.
 Indiana—C. C. Koehring Bros., Indianapolis, Ind.
 Illinois—L. C. Wiswell, Lyon & Healy, Chicago.
 Michigan—Max Shaffenberg, Grinnell Bros., Detroit, Mich.
 Wisconsin—Lawrence McGreal, Milwaukee, Wis.
 Minnesota—Lawrence Lucker, Minneapolis, Minn.
 Iowa—H. H. Blish, Harger & Blish, Des Moines, Ia.
 Missouri, Arkansas—Burton Pierce, Jenkins Sons Music Co., Kansas City, Mo.
 Louisiana—National Automatic Fire Alarm Co., New Orleans.
 Texas, Oklahoma—Houston Phonograph Co., Houston, Tex.
 Nebraska, South Dakota—Ross P. Curtice Co., Lincoln, Neb.
 Montana—Montana Phonograph Co., Helena, Mont.

Colorado—Knight-Campbell Co., Denver, Colo.
 Utah—Consolidated Music Co., Salt Lake City, Utah.

California—Southern California Music Co., Los Angeles, Cal.

Oregon, Idaho—Mr. Graves, Graves Music Co., Portland, Ore.

Washington—Eiler Piano House, Spokane, Wash.

Committees on Convention.

Arrangement and reception committee—Lawrence Lucker, Minnesota Phonograph Co., Minneapolis, Minn.; Frank Davison, Perry B. Whitsit Co., Columbus, O.; L. C. Wiswell, Lyon & Healy, Chicago, Ill.; Thos. Towell, Eclipse Musical Co., Cleveland, O.; Dan. O'Neil, C. J. Heppe & Son, Philadelphia, Pa.; Mr. Silverman, Pardee-Ellenberger, New Haven, Conn.; J. Fisher, C. C. Mellor Co., Pittsburg, Pa.; Geo. E. Mickels, Nebraska Cycle Co., Lincoln, Neb.; W. H. Reynolds, Mobile, Ala.; Ben Lee Crew, Phillips & Crew Co., Atlanta, Ga.

Arrangement committee—Lawrence Lucker, Minnesota Phonograph Co., Minneapolis, Minn.; L. C. Wiswell, Lyon & Healy, Chicago, Ill.; Frank Davison, Perry B. Whitsit Co., Columbus, O.; Thos. Towell, Eclipse Musical Co., Cleveland, O.; Dan O'Neil, C. J. Heppe Co., Philadelphia, Pa.

Hotel Rates for the Convention.

One person in single room without private bath, \$3.50 and \$4 per day.

Two persons in double room, two single beds, without private bath, \$6, \$7 and \$8 per day.

One person in double room with private bath, \$6 per day.

Two persons in double room with private bath, \$10 per day.

Two persons in extra large front corner room, with private bath, \$12 per day.

ALL ABOARD FOR ATLANTIC CITY.

Every Detail Arranged for Jobbers Attending—Are You Ready?

As this is the last issue of The World before the coming jobbers' convention at Atlantic City, July 5, 6 and 7, J. Newcomb Blackman, chairman of the press committee, calls attention to the importance of attendance as follows:

To Fellow Jobbers—Mr. Roush, chairman of the committee of arrangements, has prepared a program which should certainly insure attendance from Portland, Me., to Oregon. Nobody can consistently excuse non-attendance through the lack of information. There is a business side

to the convention, which, aside from the enjoyable time, is worthy of your decision to come.

These yearly conventions are being hailed by both the factory representatives and the jobbers as the one best opportunity to get better acquainted and have a better understanding.

If you have some "good ideas" which you think will benefit the trade as a whole, by all means come and let them be known. On the other hand, if you have some "bad ideas" and do not recognize them as such, the Atlantic City convention is a good place to have the mind "broadened" and optimism "cultivated."

When you go home you may be so greatly enlightened as to the possibilities of the business that your enlightenment will produce for you prosperity directly traceable to what you have seen and heard by friendly contact with others who have chosen the talking machine business as their vocation.

Your fall campaign can best be arranged after you have visited, in July, the Victor and Edison factories and by observation and careful application to the situation as presented determine what seems to be the apparent situation this fall.

As to the pleasure of attendance, simply refer to the program as published by Chairman Roush of the arrangement committee.

Let's all go, and if you and your competitor have a "grouch" make this your opportunity to bury the hatchet, for friendly competition is the ideal kind and produces the best results. If you have decided to come won't you do your best to influence others?

Yours for the biggest convention yet,
 J. NEWCOMB BLACKMAN.

THE CONVENTION BASEBALL GAME.

Messrs. Dolbeer and Geissler Study the Rules—Both Nines in Training—What J. Newcomb Blackman, Chairman Press Committee and Captain Eastern Nine, Reports.

Captains Wiswell and Blackman, of the Western and Eastern nines, respectively, are in training and urging that the habits of their fellow team mates be limited to that entirely consistent with the proper physical condition befitting the important position of a member on either nine.

The recording laboratory representatives will preserve for future reference the decisions of the umpires, although there will be no appeals allowed and the moving picture department of the Edison Co. will reproduce true to life the energy of a talking machine jobber as introduced in a baseball game.

The members of the opposing nines will therefore arrange their movements to make as pleasing a production of the moving pictures as will uphold the dignity of such an important occasion.

In case some of the members do not "move fast" they will be "cut out," even though an "exchange" may result and a "scrap" follow.

The players will be required to bring their own gloves sufficiently padded to properly resist anything that may come their way and leave their hands clean.

Now play ball.

RECENTLY INCORPORATED.

The Medicophone Post-Graduate Co., New York, have incorporated with capital stock of \$200,000 to deal in and lease phonographs, moving picture machines, stereoscopes, etc.; lectures. Incorporators: J. C. Cameron, J. MacDonald and W. M. Brickner.

The Victor Film Service Co., Buffalo, N. Y., have incorporated with capital stock of \$25,000 for the purpose of manufacturing, publishing, importing and dealing in films, machines, mechanical musical instruments, etc. Incorporators—S. M. Klee, A. A. Schmidt and J. Ryan.

The Silas E. Pearsall Co., Newark, N. J., have incorporated with capital stock of \$30,000 for the purpose of manufacturing phonographs, talking machines, records, etc. Incorporators: Geo. L. Stillwell, Wm. H. Clemens and Chas. L. Levsen.

Purchase Quality Needles

BURCHARD needles naturally cost more than needles of an inferior quality, but they have advantages which will be plain to all.

They move noiselessly over the disc and each needle can be used at least six times. You can get more out of BURCHARD needles than any other on the market. Send for a sample order of these needles and you will use no others.

MANUFACTURED IN THREE STYLES

No. 1. For Soft Playing

No. 2. For Loud Playing

No. 3. For Strong Tone Music

WOOKEY & CO. OPENING.

Well-Known Music House of Peoria, Ill., Hold Three-Day Reception—Draw Large Crowds—Handle Columbia and Victor Lines.

(Special to The Talking Machine World.)
Peoria, Ill., June 4, 1910.

Wookey & Co., the prominent piano and talking machine dealers of this city, held the formal opening of their new quarters at 320 to 322 South Adams street, on Thursday, Friday and Saturday of last week, and as the event was well advertised a large crowd was in attendance each day. The talking machine department of the store known as the "Bungalow" is said by many traveling men to be one of the most complete in the west and has a number of separate parlors fitted up in elegant style.

Wookey & Co. handle the complete Victor and Columbia lines of machines and records, and Roy J. Keith, a representative of the former company, was in attendance in order to demonstrate the musical qualities of the latest styles of Victrolas and the Auxetophone. On the whole Wookey & Co. may well feel proud of the success of their opening.

TALKER CHARMS LIZARDS.

VICTROLA RECITAL IN PATERSON.

Cleverly Arranged Program Given by Henry F. Hummer for the Woman's Society for Church Work of the Second Presbyterian Church.

Henry F. Hummer, Paterson, N. J., a Victor dealer on the staff of the New York Talking Machine Co., New York, is considered a man of versatility, resourcefulness and energy. In addition to doing a fine Victor business in his thriving city, and being a valued dealer of the

a circle about the instrument and for hours lay in silence as they listened to the notes of the "orchestra." The gathering of the reptiles for the concert took place in Cable canyon, where the children of the Devore school were picnicking with their parents and teacher, Miss Louise Oliver.

The strange actions of the lizards as they heard the music were watched with interest by the members of the party, which also included G. B. Oliver and Miss Ellen Oliver, of San Bernardino, who vouch for the story.

GRAPHOPHONE MUSIC OVER 'PHONE.

Novel Stunt Inaugurated in Connection with the Dinner of the Dallas Advertising League.

(Special to The Talking Machine World.)
Dallas, Tex., June 5, 1910.

At the dinner given by the Dallas Advertising League at the Oriental Hotel in this city on May 31, a novel feature of the gathering was the ingenious way music was supplied through the courtesy of Director Knight, of the Telephone Co., and Robt. R. Souders, local manager of the Columbia Phonograph Co. The graphophone was played in the showrooms at 315 Main street, and the music transmitted over the 'phone to the dining room, where it burst forth from the various horns distributed throughout the room. It was a very novel and clever stunt, and everyone voted it a great success. It was certainly the best kind of advertising for the Columbia manager and for the Telephone Co.

this line was in connection with the Woman's Society for Church Work of the Second Presbyterian Church, Paterson, shown in the accompanying photograph. The event occurred May 16, and it was voted that the friends of the society were given a rare treat in the program arranged by Mr. Hummer, which included Victrola records of Farrar, Caruso, Schumann-Heink, Homer, Melba, Mme. Gilibert, Journet, Farrar, Scotti, Paslo and Passari—the famous "Rigoletto" quartet and the "Lucia" sextette. Mr. Hummer furnished daintily printed copies of the program to the select audience, and the result

VICTROLA RECITAL IN SECOND PRESBYTERIAN CHURCH, PATERSON, N. J.

N. Y. T. M. Co., Mr. Hummer is fully alive to the talking machine situation, and is always ready to furnish a Victrola entertainment to lodges, churches or any similar gathering when the beautiful effects of the Victrola may be demonstrated and a few prospects gained.

One of Mr. Hummer's latest achievements in

has been the sale of several Victrolas since. The local papers gave Mr. Hummer full credit for his enterprise, and that leads to further business. Other Victor dealers could adopt this idea to advantage.

Jobbers will soon be "trekking" for Atlantic City.

WITH THE TRADE IN MILWAUKEE.

Retail Trade Satisfactory but Wholesale Might be Better—New Idea Cabinet Co. Incorporated with Capital Stock of \$25,000 to Manufacture New Idea Cabinet—New Department for Boston Store—Talking Machines for Schools—Edison Line with Ewen—National Co.'s Attachment Plan Pleases—McGreal on Business Tour—Kunde Concentrates Business—Other Items of Interest.

(Special to the Talking Machine World.)

Milwaukee, Wis., June 9, 1910.

After ruling rather quiet during the month of May the retail talking machine trade is beginning to show signs of genuine improvement, and it is expected that the total June business will be entirely satisfactory. One of the brightest features of the situation is the fact that collections are a little stronger than they have been of late. It has been a peculiar fact that while business in most lines in Milwaukee has been very good in the past few months, collections have been rather "tight."

Just as soon as weather conditions improve so that the summer resort season can make its appearance, another spurt in retail trade is expected. The present weather, which necessitates overcoats and coal fires, is far from being conducive to summer cottages and lake outings, and people are not quite ready to place orders for machines and records to be taken to their summer homes. Wisconsin is filled with summer resorts, and this phase of the business is all-important with the talking machine dealers of the State.

The wholesale business is not as satisfactory as it might be, although jobbers say that it is as good as it usually is at this season of the year, when country dealers are meeting with a slow business. Just as soon as the retail trade in the smaller towns about the State begins to show signs of improvement it is expected that the wholesale trade will return to the normal.

The New Idea Cabinet Co. will be incorporated at once in Milwaukee for the purpose of manufacturing the "New Idea" disc cabinet, invented by William Schmidt, traveling salesman for Lawrence McGreal. The capital stock of the company will be placed at \$25,000 and the incorporators are Lawrence McGreal, William Schmidt and A. H. Ellis, the latter a member of the Homecraft Furniture Co. The New Idea Cabinet Co. will open a new factory at Wauwatosa, a suburb of Milwaukee, and will install a complete new equipment of machinery. Work on the plant will begin at once, and it is expected that it will be ready for operation by July 1.

The "New Idea" cabinet will be featured by the company, although Homecraft, or "knock-down" furniture, will also be manufactured. "The 'New Idea' cabinet is proving to be decidedly popular with both the retail and wholesale trade," said Lawrence McGreal. "At the present time we have orders on hand for more than 200 cabinets. We expect to so equip our

new factory that we shall be able to turn out at least 200 cabinets each month."

Lawrence McGreal, Mrs. McGreal and Miss Gertrude Gannon, present owner of the McGreal retail store, will be in attendance at the coming convention of the National Talking Machine Jobbers' Association to be held at Atlantic City early in July.

The Boston Store, of Milwaukee, has moved the talking machine department into new, larger and more attractive quarters in conjunction with the piano department on the third floor. Within the past year the store has remodeled its piano department extensively, until now it ranks among the best in the city, so the talking machine department will be placed in good surroundings. Although in the past the talking machine department has been under the supervision of Manager Johnson, of the toy department, it is expected that it will now be largely under the direction of Manager Hessin, of the piano department.

Wisconsin has one enterprising public school superintendent who believes that the talking machine is the best medium for teaching his pupils good music. Superintendent H. C. Buell, of the Janesville schools, one of the best known educators in the State, and a former president of the Wisconsin State Teachers' Association, is giving a series of grand opera phonographic concerts in both high schools and ward schools of his city. These concerts take the place of the regular morning exercises, for a time at least, and are greatly enjoyed by the young people. The best grand opera records on the market have been collected by Superintendent Buell, and he is giving his pupils the opportunity of listening to the very best artists, supplemented by explanatory talks by the teachers in music.

George Ewen has secured the Edison agency at Rice Lake, Wis., and is now offering a full line of machines and records to his trade.

The new plan of the National Phonograph Co., which enables the purchaser of Amberola attachments to secure ten Amberola records, has been meeting with much favor all over the State, and many reports concerning the success of the plan have been arriving from various cities. The Zabrosky music store at De Pere seems to be experiencing an especially fine business in the Amberola line.

George Eicholz, Milwaukee north side dealer, will move his talking machine business to new, larger and more central quarters at the corner of Twelfth and Walnut streets.

Lawrence McGreal, Milwaukee talking machine jobber, is absent from Milwaukee on the annual trip of the Merchants and Manufacturers' Association. About fifty merchants are on this year's junket, traveling through South Dakota and northwestern Iowa, advertising Milwaukee and extending the city's trade. Mr. McGreal took a Victrola and an Amberola with him and is busily engaged in entertaining the party en route. Records will be made of the voices of the different members of the party, and upon the return the records will be presented to the Merchants and

Manufacturers' Association. Mr. McGreal has accompanied these annual trips of the association for several years and attributes the sale of many machines as a direct result.

Announcement has been made of the approaching marriage of William P. Hope, the popular Wisconsin and upper Michigan representative of the National Phonograph Co., to Miss Nellie Scott, of Marinette, Wis. The ceremony will take place at Marinette some time during June.

William A. Schmidt, traveling representative of the Lawrence McGreal Co., is on a successful business trip in southwestern and central Wisconsin.

F. B. Schneider, talking machine dealer of Watertown, Wis., was a recent Milwaukee visitor.

The Lawrence McGreals, the enterprising baseball team of which Lawrence McGreal is president, is still holding first place in the Milwaukee city league, and unless something unforeseen happens the team is expected to carry away the banner at the close of the season. Last year the team scored second place and the season before it landed third position, so Mr. McGreal feels confident that his team is due for first place this year.

A. G. Kunde, proprietor of the downtown Columbia store at 516 Grand avenue, has discontinued his branch store at 316 Fond du Lac avenue in order to devote all his energies to his main store. Mrs. Kunde, who was in charge of the Fond du Lac avenue establishment, will now aid her husband in the downtown store. "We are having a good run of business in all general lines," said A. G. Kunde. "The Columbia 'B11' style is selling especially well. We are beginning to experience quite a demand from the summer resort trade, despite the fact that it is a little early in the season."

J. H. Becker, Jr., manager of the talking machine department of the Hoeffler Mfg. Co., reports some good sales of the Edison business phonograph.

CREATED NEW UNIVERSAL JOBBERS.

(Special to The Talking Machine World.)

Philadelphia, Pa., May 31, 1910.

J. A. Collins, who has been traveling the middle west for the Universal Talking Machine Manufacturing Co., manufacturers of the Zonophone line, of this city, recently returned to headquarters. He has been writing an excellent business and created a number of new jobbers and dealers. Mr. Collins was in New York, where he lives when off the road, last week. The company are busy in every department and, judging from the way orders are coming in, this will be their condition for some time to come.

SAMMARCO WITH VICTOR CO.

G. Mario Sammarco, the distinguished baritone of the Manhattan Opera House in New York, and Covent Garden, London, has been added to the list of artists exclusively controlled by the Victor Co.

QUAKER CITY GLEANINGS.

Cheery Reports from All Sections Regarding Business—Stock Being Ordered Early This Year to Provide for Fall Activity—Henderson Chats of Exhibition Results—Buehn & Bro. Represented in Tradesmen's Excursion—Philadelphia Trade at Jobbers' Convention—Penn Co.'s Good Report—Weymann & Son Double Business of Last Year—Victor Expansion—Other Items.

(Special to The Talking Machine World.)

Philadelphia, Pa., June 6, 1910.

The general expression of opinion is that the May trade in talking machines was most satisfactory. All of the dealers report it to have been the best month of the year, and that it showed a gradual working upward from the very start, and the trade has entered June, the last month of the first half of the year, with only the most sanguine feeling as to the result of the year, that it will be the biggest in the history of the talking machine business in this city.

I have found no complaints whatever from any source. At the end of April there was some little complaint as to slowness of getting goods from the factories, but even this seems to have regulated itself, and shipments are coming through as fast as needed.

The Philadelphia dealers have not been buying stock very heavily, however, as they are anxious during the next three months to clean out as much as possible. They are going to be a little more wise this year than last, and they will place their orders sufficiently early so that they will not be handicapped, like last year, in getting goods when the busy fall and holiday season arrives. It would be well if the manufacturers would show a little more inclination to help the dealers out in this particular, for it comes pretty hard on them to place large orders and have to meet big bills before the money begins coming in at such a rate that they are able to meet their office and ware room expenses, as well as large factory bills.

There have been no new competitors to enter the Philadelphia field during May, but most of the Philadelphia houses have branched out considerably throughout the adjoining territory, and have established representatives in a number of the cities and larger towns. All the salesmen report that business is most encouraging throughout Pennsylvania, and this in a great measure has added to the enthusiasm shown in the Philadelphia trade.

T. K. Henderson, manager of the Columbia Phonograph Co., reports that his firm is very well satisfied with the results of their exhibition at Richmond and that they have already had some very good returns. "A great many of the dealers have made calls here," he says, "who stopped over in Philadelphia on their way home, including a number of the piano traveling fraternity." The business of the Columbia Co. in May was very good. Benjamin Feinberg, the traveling representative of the wholesale department, was in Philadelphia at the end of last week on his way South. They expect a big trade in the way of a Mignon Grafonola which will retail for \$150, and on which they are expecting splendid results.

The Philadelphia house has a fine window display this week, with a life-sized portrait of Lina Cavalieri as a feature. Mlle. Cavalieri sings exclusively for the Columbia, and they have made fine records made by that artist, which are popular sellers. The records by the artists and chorus of the Boston Opera Company are all good sellers.

The local Columbia people are baseball enthusiasts and have a team of their own. They played a game on decoration Day with a West Philadelphia team and defeated them, the score standing 17 to 13. The Columbia battery was Messrs. Dorian and Woodhead, and Mr. Murphy played a brilliant game at shortstop. Dorian made the remarkable record of striking out eight men. Manager Henderson was umpire, and is accused of having called men out whenever he felt a little indisposed.

L. Buehn & Bro. will be again represented when the Tradesmen's excursion leaves this city for a trip of a week in the Cumberland Valley on Monday next. The trip will start from Mechanicsburg, and exhibitions will be given in various cities as far south as Charlestown, West Virginia. These excursions are run periodically into various sections outside of Philadelphia, and all lines of trade are represented, the Buehn firm being the only one representing the talking machine interests. Edmund Buehn will represent the firm on this trip. They were very well satisfied with the results they secured during the last trip, and expect to do even better this time. About seventy-five different firms will be represented this time.

The Philadelphia trade are very much interested in the talking machine convention to be held in Atlantic City on July 6, 7 and 8. The Philadelphia jobbers are now limbering up to play a game of baseball between the East and West. Two players from each of the cities will be selected. J. Newcomb Blackman, of New York, is captain of the eastern team and Mr. Wiswell of the western team. F. K. Dolbeer and L. J. Geissler are the umpires.

The Victor Co. are making extensive improvements in their Camden factory in the way of enlargements. They are at present adding to their cabinet factory and their machine shop. Only recently they finished their cabinet factory, but they have found it still too small, and are putting quite an extensive addition to it.

The firm of Comer & Schnell have bought out the Edison stock of Fox, and from this on they will handle the Edison goods as well as the Victor.

The Penn Phonograph Co. report that their May business was very good, both wholesale and retail. E. J. H. Smullen is representing the firm through the State at present, and Ralph Clarke will leave this week to cover his territory in the southern part of the State and Delaware. Among the visitors to the Penn warerooms this week were Harry Michlosky, buyer for Samuel Landon of Wilkes-Barre; William R. Mansfield, of Lebanon, Pa.; Charles Swartz, of York, Pa., as well as others. All these out-of-town dealers bring to the Penn Co. the assurance that business has never been as good in their section as at present, nor ever presented a better outlook.

H. W. Weymann & Son report that their business in talking machines is most encouraging. May has been considerably better than any of the other months of the year, and shows an increase of almost double that of last year. They are showing at present the new Amberola with the Model M combination reproducer, which is a new feature this month, and which has been very well received. It surpasses, in their opinion, any other reproducer they have yet had on

the Amberola. Norbet Whiteley is at present covering the State for the Weymann firm, and is doing very good business. Frank Madison, of the National Co., was a visitor at their warerooms this week. They have been having very good success with a display case of their own invention.

ACQUIRE EDISON LINE.

The American Talking Machine Co. Owing to Purchase of the Warner Business Will Handle the Edison Line—Heretofore Exclusive Victor Distributers.

The American Talking Machine Co., heretofore exclusive Victor distributors and dealers at 586 Fulton street, have recently acquired the business of Lester M. Warner, 368 Livingston street, Brooklyn, N. Y., which will be operated as a branch. By this change the American Co. will also handle the Edison line, obtained through the purchase of Mr. Warner's stock.

MORE ROOM FOR VICTOR CO.

To Add Three Additional Stories to Office and Laboratory Building.

The Victor Talking Machine Co. have just closed a contract with the J. S. Rogers Co., of Moorestown, N. J., for three additional stories to the office and laboratory building of the Victor Talking Machine Co., at Camden, N. J. The present building is four stories in height.

Needles Free To Prove Quality

"THE BEST THAT MONEY CAN BUY"

Playrite
TRADE MARK

NEEDLES

"THE NAME TELLS WHAT THEY DO"
Best for VOLUME, TONE and LASTING QUALITY. PLAY RIGHT from START to FINISH. PRESERVE RECORDS and can be used on ANY DISK MACHINE OR RECORD. Packed only in RUST PROOF packages of 100. RETAIL, 10c. per 100; 25c. 300; 75c. 1,000.

Melotone
TRADE MARK

NEEDLES

"GIVE A MELLOW TONE"

REDUCE VOLUME and DON'T SCRATCH. Make records last longer. Can be used on ANY DISK MACHINE or RECORD. No special attachments needed. PACKED only in RUST PROOF packages of 200. PRICE, 25c. per package.

FREE Samples of "Playrite" and "Melotone" Needles to Dealers or Jobbers who write on business letterhead. Special Prices to Jobbers and Dealers. Write Now. Dealers are requested to buy from their Jobber. If he won't supply you, write for name of one who will.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Special to The Talking Machine World.)

Washington, D. C., June 10, 1910.

MUSICAL INSTRUMENT. Wm. H. Dessureau, Hazelhurst, Wis. Patent No. 959,318.

The invention relates to gramophones and its object is to provide an improved means for connecting the stylus with the bridge of a violin, and for supporting a violin on the casing of the gramophone. For the purpose mentioned a stylus or needle is attached to a violin or a like instrument, and the latter is held suspended, with the stylus or needle in contact with a revolving record, so that the violin forms the sound reproducer and amplifier.

Figure 1 is a perspective view of the improved musical instrument; Fig. 2 is a side elevation of the same; Fig. 3 is an enlarged face view of the bridge of the violin and the stylus or pin in position thereon; and Fig. 4 is an edge view of the same.

TALKING MACHINE AND PIANO RECORDING DEVICE. Walter M. Davis, New York. Patent No. 958,730.

This invention relates to a new and improved recording device for talking machines and pianos.

The object of the invention is to produce two records at the same time, one of the sounds produced by the singer or solo instrument and one for the sounds produced by the accompanying piano, the record of the voice or solo instrument being produced in the well known manner on a disk or cylinder of a talking machine or phonograph, the record of the piano tones being produced on a paper strip directly or indirectly by slots or perforations, so that this piano record can be placed into a piano-playing device, such as for example the well known "Pianola." The disk or phonograph then reproduces the vocal or instrumental solo correctly as originally produced and the piano-

playing mechanism reproduces the piano accompaniment with the same force and effect as originally produced on the accompanying piano, so that the combined result in every respect is a correct copy of the original production.

For this purpose it is necessary, when these two records are made that the speeds of both coincide, and when one blank is moved faster the other must be moved correspondingly, and when one is moved slower the other must be moved correspondingly, so that, when by means of the piano-playing record and the talking-machine record the original production is reproduced, the notes of the accompaniment will accord with the corresponding notes of the solo and will not be sounded too late or too soon.

In the accompanying drawings in which like letters of reference indicate like parts in all the figures: Figure 1 illustrates diagrammatically in elevation one embodiment of my improved talking machine and piano record-

ing device. Fig. 2 is a plan view of the same. Fig. 3 is a view of part of the piano record.

COMBINED PIANO-PLAYER AND TALKING MACHINE. Walter M. Davis, New York. Patent No. 958,731.

This invention relates to improvements in combined piano players and talking machines and the object of the invention is to combine the playing device and the talking machine in such a manner that the note sheet sheet moving mechanism of the piano playing device is automatically started from the talking machine correctly and precisely at the proper time.

In the accompanying drawings in which like numerals of reference indicate like parts in all the figures, Figure 1 is an elevation of parts of the piano-playing device and the talking machine, parts being shown in section, parts in diagram and others broken away. Fig. 2 is an enlarged detail view of the starting mechanism in the piano-playing device. Fig. 3 is a plan view of the talking machine disc. Fig. 4 is a vertical sectional view through the same and its support.

PROCESS OF MAKING SOUND RECORD TABLETS. Joseph Sanders, Washington, D. C. Patents No. 956,904 and 956,905.

This invention relates to sound record tablets, such as are employed in the commercial gramophone, and the object is to produce a record tablet that contains only a minimum of resinous or similar record material, but which nevertheless yields under the pressure of the matrix to a considerable depth, and which is also very much stronger than the record tablets made altogether of the resinous compounds usually employed.

SOUND RECORD MOLD. Edward L. Aiken, East Orange, N. J., assignor to New Jersey Patent Co., West Orange, N. J. Patent No. 956,922.

This invention relates to the molding of phonograph records and more particularly to a molding process wherein a tubular mold is caused to descend into a bath of molten material which fills the mold, a coating of which congeals on the interior surface thereof and adheres to the same when the mold is removed from the bath, after which the bore of the congealed material is reamed out before it hardens.

PHONOGRAPH. Reinhold Berndt, Berlin, Germany. Patent No. 956,671.

This invention relates to phonographs with a device for strengthening the sound by means of a friction disc continuously driven from the motor and arranged between the needle and the membrane, all the parts concerned in the strengthening of the sound (the needle, the friction disc, the brake band and the membrane) being mounted in a common frame.

The purpose of the invention is to render the movements of the needle due to unevenness in the phonogram surface (e. g. an Edison cylinder) harmless, which movements when a frame is used which cannot follow them must cause alterations in the magnitude of the fric-

tion and therefore of the sound strengthening. The most obvious solution of this problem would be to make the whole frame oscillatory, as is usual with ordinary sound boxes, balancing the frame by means of a counter weight. If this is done, however, particularly if the trumpet is mounted upon the frame a very large mass is required to be moved. According to the invention therefore, only the friction disc and the membrane are arranged in this way, being pivoted for this purpose upon an oscillating part of the frame together with a counterweight, while the axis of the needle is left as before in an immovable part of the frame.

SOUND RECORDING MACHINE AND RECORD THEREFOR. Frederick H. Osborn, Garrison, N. Y. Patent No. 956,727.

The object of the invention is to automatically stop the movement of the record at a predetermined point by an electrical means, circuit for which is closed by the coaction of some portion of the record itself with the sound reproducer or traveling arm while at the same time avoiding the employment of any portion for this purpose which projects above the face of the record, and also without embodying the stylus itself as a part of the electrical circuit.

In the drawings, Figure 1 is a partial top view and partial horizontal section of a sound-producing machine having electrical stopping means embodying the invention. Fig. 2 is a detail vertical transverse section therethrough. Fig. 3 is an enlarged transverse section through the record at the circuit closing point therein. Fig. 4 is a retail perspective view, showing a portion of a cylindrical record having a circuit closing element therein. Fig. 5 is a view similar to Fig. 1 of a modified form of the machine.

SUPPORTING DEVICE FOR SOUND-BOX, ARMS AND HORNS OF TALKING MACHINES. Robert L. Gibson, Philadelphia, Pa., assignor to Victor Talking Machine Co., Camden, N. J. Patent No. 958,109.

More particularly the improvements relate to the devices for supporting the hollow sound-box carrying arm and horn in the bracket secured to the case of a talking machine. It is the object to provide a simple and efficient construction by which the support of the sound-box carrying arm in proper position is assured notwithstanding irregularities in the bracket due to springing of the bracket arms or other causes. This object is accomplished by supporting the sound-box carrying arm wholly in the upper free end of the bracket on both a vertical and horizontal axis by means of a rotary sleeve supported on ball-bearings in a socket on the bracket, and carrying a ring piece at its lower end, in which the sound-box carrying arm is mounted on horizontal pivots. The arm is thus supported by the bracket wholly from the top through the rotary sleeve, which, being mounted on ball-bearings, may turn with very little fric-

tion. The ball-bearings are formed by a series of balls supported on an annular shoulder in a sleeve carried by the socket piece of the bracket, and engaged by a flange on the upper end of the rotary sleeve. The upper end of the sleeve carried by the bracket socket forms a socket-piece for the horn.

In the accompanying drawings, Figure 1 is a side elevation of a talking machine constructed in accordance with this invention; Fig. 2 is an enlarged side elevation, partly in vertical section on line A-A of Fig. 3, of a portion of the same; Fig. 3 is a transverse vertical section on line B-B of Fig. 2; Fig. 4, an enlarged fragmentary side elevation of a portion of the same, and Fig. 5, an enlarged fragmentary sectional perspective of a portion of the same.

TALKING MACHINE. Robt. L. Gibson, Philadelphia, Pa., assignor to Victor Talking Machine Co., Camden, N. J. Patent No. 957,206.

The object of the invention is to provide a construction of universal arm for the sound-box, which shall embody simplicity and capacity for movement with the least possible resistance.

In carrying out the invention, the inventor has provided a bracket having a tubular neck adapted to support the horn, and combined therewith a tubular arm carrying the sound-box at its free end and having the other end journaled in the neck of the bracket through the medium of anti-friction balls, said balls fitting into a groove semi-circular in cross section formed in the neck of the bracket and supporting a flange secured to the pivoted end of the tubular arm whereby the arm is centralized and supported by the balls.

Figure 1 is a side elevation of a talking machine embodying the invention; Fig. 2 is a sectional elevation on line 2-2 of Fig. 3, showing the manner of supporting the tubular arm which carries the sound-box, and Fig. 3 is a similar view on line 3-3 of Fig. 2.

DUPLICATE SOUND RECORD. Jonas W. Aylsworth, East Orange, N. J., assignor to New Jersey Patent Co., West Orange, N. J. Patent No. 958,210.

This invention relates to an improved duplicate sound record, preferably cylindrical in form, and the object is to provide a record, whose major portion shall be composed of a hard composition incapable of being accurately reamed, such as a composition employing asphalt, but which shall have a perfectly true bore for its reception on the mandrel of a talking machine.

TALKING MACHINE MECHANISM. Carl Lindstrom, Berlin, Germany. Patent No. 959,238.

This present invention relates to mechanisms for talking machines and a primary object is to provide an improved device for starting and stopping the sound-box containing the diaphragm. The arrangement of the driving mechanism and the means for starting of the record-plate do not form part of the subject matter of the invention.

Figure 1 is a top plan view of the mechanism and talking machine, part of the record being shown broken away and the mechanism in the

box being shown in dotted lines, whereas Fig. 2 is like view in full lines of the releasing mechanism, and Fig. 3 is a side elevation of

the machine, part of the side of the case being broken away, and Fig. 4 is a rear-end elevation, part of the case being shown broken away.

STYLUS FOR SOUND-REPRODUCING MACHINES. Samuel Levin, Highland Park, Ill. Patent No. 958,412.

This invention has reference to improvements in styli for sound-reproducing machines and is designed more especially for use in connection with the disc type of sound-reproducing machine.

By the present invention the styli are made with jewels for the active end and these jewels are so constructed as to no longer be fragile while practical tests have shown that the life of these styli is almost unlimited.

Figure 1 is an elevation of a stylus constructed in accordance with the present invention. Fig. 2 is a longitudinal section thereof. Fig. 3 is a bottom plan view of a somewhat modified form.

TALKING MACHINE. Horace Sheble and Thomas Kraemer, Philadelphia, Pa., assignors to Hawthorne & Sheble Mfg. Co., same place. Patent No. 957,004.

This invention relates to talking machines, and its object is to provide a machine of an improved form, the improvements being directed particularly to the construction of the reproducing apparatus.

In accordance with the invention, the diaphragm of the reproducing apparatus, while being vibrated by the stylus, is located at a distance from the stylus, a rocking-bar being provided, to one end of which the stylus is connected and which adjacent to its other end is provided with an arm co-acting with the diaphragm of the sound-box so as to vibrate the latter.

Figure 1 is an elevation of a portion of a talking machine; Fig. 2 is a top view of the reproducing mechanism, and Fig. 3 is an end view of the same.

AUTOMATIC BRAKE FOR PHONOGRAPHS. Wilber C. Mills, Denver, Colo. Patent No. 957,570.

The object of this invention is to provide a brake mechanism which will be actuated when the record has been entirely played through and which will be automatically actuated no matter whether the record be long or short, and the invention includes in its general features, a brake mechanism attached to the sound-box carrying

arm and adapted as the arm moves inward to come nearer and nearer to the revolving periphery of the record-supporting table and a disc record having thereon a tangential groove located interiorly of the record grooves, which, when the record has been entirely played, will guide the

stylus inward toward the center of the record disc and will thereby carry in the same direction the sound-box arm and the brake mechanism, so as to bring it in contact with the periphery of the revolving table and there check the speed.

Figure 1 is a side elevation of a sound-repro-

ducing machine with the brake mechanism thereon; Fig. 2 is a fragmental plan view of the same; Fig. 3 is a fragmental perspective view of the outer end of arm 8 and the lever 13; Fig. 4 is an enlarged fragmental plan view of the record disc made in accordance with the invention; Fig. 5 is a fragmental section of the record disc.

REVERBERATORY SOUND-HORN. William A. Chapman, Smithville, Ark. Patent No. 957,654.

The invention enables the manufacture of sound-amplifiers as used in connection with talking machines, to be effected at a reduced cost; provides a new and novel means of increasing the artistic attraction of the room through the action of light, a reduction in the size of the horn heretofore required for the attainment of the given volume of sound, the control of the volume and tone of the sound commensurate with the size of the room in which it is placed, the elimination of all harsh and discordant notes, which are rendered true, full, resonant and in a natural manner; prevent the mingling of reproduced sounds with those the source of which is external, and affords a self-contained and perfectly balanced amplifying horn for sound-reproducing machines.

TO ENLARGE VICTOR CATALOG.

The new and enlarged Victor record catalog has been so potent a factor in the increased sale of Victor records, that beginning with July, the Victor Talking Machine Co., Camden, N. J., will make the pages of their monthly supplement of new records the same size as their present record catalog. With that issue they abandon the supplement folder and the entire edition will be in booklet form.

"When you allow quality to count you can be sure the figures are right."

Cabinet for the Victrola No. 12

No. 442, Cabinet Open. Goes with Victrola No. 12
Height 34 inches, Width 24 inches, Depth 20 inches. Mahogany
Will hold 190 12-inch Disc Records

Every dealer who has had them says they are great.

We are now putting a rim around the top, so that when the Victrola is set on it looks like one Cabinet. In producing this Cabinet we have realized what a finished piece the Victrola No. 12 is. Our Cabinet is beautifully piano polished on the outside and we have even finished it inside. Note the needle box, indexed compartments and card, shelf to handle records on, casters if desired.

Not a talking point overlooked. The price will enable you to add on your profit and make sales all around the \$200 outfit. If you are a dealer we will send you our beautiful Sales Helping 32-Page Catalog illustrating 96 Snappy Cabinets for Victor Records, Edison Cylinders, Rolls for every Piano Player and Sheet Music of every size.

BIG COLUMBIA TRADE IN ARKANSAS.

(Special to The Talking Machine World.)

Little Rock, Ark., May 31, 1910.

The Hollenberg Talking Machine Co., a consolidation of the Hollenberg Music Co., of this city, and the Southern Talking Machine Co., Memphis, Tenn., is one of the progressive music concerns pushing the Columbia line. For a number of years the Hollenberg Music Co. have been exclusive Columbia jobbers for the State of Arkansas, while the Southern Talking Machine Co. was incorporated about a year ago to take over the business of the Columbia Co.'s store in that city and the adjacent territory. Under the arrangement recently concluded the two companies have been brought together under one management, now being operated as a stock company. As a result of this move the business in the Columbia line has received a great impetus. A hurry order was placed with the Columbia Co. when Col. Hollenberg was in Richmond, Va., attending the convention of the National Piano Dealers' Association and the exhibition in connection therewith.

SECURE THE DICTAPHONE AGENCY.

W. M. Bird, the president of the Warren M. Bird Co., Indianapolis, has just closed a contract for the exclusive sales agency for Dictaphones in Indiana. Mr. Bird has been selling Dictaphones for several years.

ANNOUNCE MARRIAGE.

Mr. and Mrs. Mike Herro, of Floresville, Tex., announce the marriage of their son, Joseph, to Miss Nagibe Sahadie. The ceremony took place at St. Joseph's Church in that city on May 22.

The clerk who plays the hardest in his summer vacation is the one most likely to work the hardest when he comes back.

The TALKING MACHINE SECTION

AND
NOVELTY
NEWS

NEW YORK, JUNE 15, 1910

VALUE OF ACCURACY AND OPTIMISM.

Talents to be Proud of When Once Acquired,
and Every "Talker" Man Should Strive To-
ward Their Attainment.

Accuracy means a lot in business. Taken in a broad sense it sounds paradoxical, for it stands both for conservatism and liberality, either of which, by the way, when practiced successfully, leads on to brilliant triumphs and abundant wealth.

The man who cultivates the habit of being accurate, is unique, and soon comes to be regarded as such among his fellows. He is known as the chap whose word is as good as his bond, whose every move throughout a busy day, from the time he kisses the wife and kiddies good-bye early in the morning up at Lonesomehurst, until the office door bangs behind him in the evening, has been fraught with success. Why? Because, being accurate, he has met every appointment promptly. He has kept no one waiting. Everything he contemplated doing has been done in just the right way, and he can return to his family without a care for the morrow, which means a good night's rest, and more peaceful days to come.

In the talking machine business, with its many trials and its abundance of nerve-racking ordeals with fractious customers, accuracy should be cultivated to the highest possible degree. When this is done the dealer is confident, sure of himself, and able to cope with all emergencies, no matter how trying, with coolness and precision.

The other day I happened to be calling upon just such a gentleman when a customer entered to register an energetic kick.

"Say!" he exclaimed wrathfully, banging his fist down on the innocent desk with a resounding whack, "do you know that some of the literature you fellows send out is positively inaccurate?"

"If you refer to two slight and entirely excusable errors which have occurred recently, the first in the November issue of a pamphlet dealing with a certain brand of records, and which I have right here"—he opened a drawer of his desk and taking out the pamphlet referred to, turned over the pages rapidly for a moment—"I think I will have to acknowledge the fact; listen." Giving me a wink suggestive of ill-concealed satisfaction at being on the job, he read as follows: "Lasca, a pathetic poem by F. Desprey, of love and heroism on the plains of the Rio Grande. Mr. Davenport's dramatic recitation of it will be found of great benefit to students of elocution because of the excellence of his articulation and inflection. The selection here given, comprises the entire poem, etc."

"Now, my friend," he continued, turning to the irate customer, "I presume that your ire has been roused by the statement that the entire poem was given, whereas, in reality, twenty-two lines were omitted. Am I right?"

A sheepish grin took the place of anger on the face of the man with the kick. "Say, old fellow," he remarked meekly, "you're all right; shake." They shook.

"How about the other one? Want to have me

explain that to you, too?" asked the dealer pleasantly. "No," replied the customer, now thoroughly mollified, "I'm satisfied."

"Well, all right, but just to show you that I know what you mean, I'll go a little further. In the May edition of the same pamphlet, under Questions and Answers, occurred the following misstatement:

Question:—"Who sings bass in No. 191 'Cuddle Up a Little Closer, Lovey Mine?' Is it James F. Harrison?"

Answer:—"William F. Hooley."

"The gentleman who asked the question, as you and I are aware, was correct in his presumption, and the pamphlet was wrong, and"—"That's enough. What you don't know about details in your line of business, I guess doesn't amount to much. Anyhow, I'm done kicking and want to purchase some records."

They left for the hearing booth, arm in arm, and as I sought the street the harmonious strains of Billy Murray's tenor chanting, "Has Anybody Here Seen Kelly—Kelly with the green necktie?" came softly to my ears.

The last echo of the song had scarcely died away before I reached the business abode of my friend, the optimist. He was a worshipper of the little god who stands for things as they ought to be, and I knew that even if no news was forthcoming from my prospective interview, I would at least receive an abundance of cheerfulness which would be stimulating on that raw, rainy morning.

"Go right back, Mr. Middleton; you'll find him

in the private office," cooed the dainty little stenographer with a beaming smile that disclosed a wealth of dimples.

I thanked her, and entered the sacred sanctum. I found His Majesty in a pose, which to the casual observer would not have appeared in keeping with the sign, "My Busy Day," reposing conspicuously on his Grafonola "Regent" desk. He had his office chair tilted back to the limit of its endurance, his feet elevated to a comfortable, if not dignified angle, and his clasped hands behind his head. However, knowing his habits as I did, I realized that his present attitude meant deep thought.

Hearing the door open and close, he turned languidly in greeting, but before he could utter an exclamation of welcome, the telephone tinkled.

"Hello! Is that you, Rosalie? What is the trouble this time? Baby broke a record! Which one? Marathon! Well, I'll be darned; that kid is certainly beginning his athletic career at a tender age. All right, dear; I'll bring a duplicate home with me to-night—good-bye."

He hung up the receiver and turned to me with a grin.

"How about that, Middleton? My son, aged two, has just broken a Marathon record. Isn't that an infantile achievement to make the paternal breast heave tumultuously. I'll be with you in just a minute," he added, and pressed a button. To the clerk who entered he said, "Please bring me disc record No. — 'The Marathon Two-step,' by the Metropolitan band. The clerk departed and returned almost imme-

delately with the desired selection. This accomplished, the optimist expressed himself as being at my service.

"Well," I began, "The World wants to know if you have anything new of interest to impart that will fit into an article I am writing for the June edition, dealing with the subjects 'Accuracy and Optimism.'"

"Yes," he replied enthusiastically, "I have. We inaugurated a new system recently which is working splendidly, and, as I am sure it will prove of interest to World readers, I will be only too glad to explain it to you. A few weeks ago we organized a little society for the promotion of valuable ideas. The whole force of employes are members, and are encouraged to store up in their minds all ideas which may come to them from time to time, and seem to have some business enhancing value. Then when meeting day comes around—sessions are held weekly—they have a chance to expound their views which are carefully recorded by the secretary, and, if deemed expedient, are given a trial. In this way, I have found that in the short time we have been organized the business already shows a marked improvement.

"This, of course, makes a big hit with the employes, because, for every idea of theirs that is marketed they receive a bonus above their salaries. My idea in starting this association was to increase the interest of my workers in the business, and in that way to stimulate optimism, which in itself, according to my way of thinking, means success, and as I think I have shown you in the foregoing interview, we are 'making good,' and some money, which is equally satisfying to all concerned."

The accurate man and the optimist

Sat chatting side by side,
And as they sat there talking,

Their thoughts ran far and wide.

Said the accurate man to the optimist,
"Mistakes are rare with me."

Said the optimist to the accurate man,
"I'm cheerful as can be."

Then each smiled at the other,
And cried, "Why, hang it, man!
We'll have to get together,"
And so the firm began.

Now you will find on Main street
The firm of Smith and Bowne,
And as might be expected
They're the richest one in town.

—Howard Taylor Middleton.

ADVERTISING POINTERS.

Elbert Hubbard gives the following advice in writing advertisements: In writing advertisements don't be afraid to let yourself get into the copy. Let a smile get into the ink bottle, if it will. In advertising you are dealing with very human men and you cannot mistake by letting your copy be human. In writing advertisements I first try to have an idea; then I strive to put that idea into a form that may be easily read. Cut out every superfluous word. Make what you say interesting. Literature, and that means good advertising, need not be deadly dull.

Men who have made a success have put into use some of the ideas others simply thought about.

HANDLING CABINETS.

How Such a Stock Should Be Taken Care of to Achieve Best Results—Cleanliness and Freshness Essential—Show Them in Actual Use

Taking care of talking machine cabinet stock is something to which the average dealer pays but little attention, but which really means a great deal when it comes to making profits out of this particular department. Well displayed goods, properly cared for, help greatly in determining a prospective purchaser's order, and the matter of care of these goods is something that really warrants careful and conscientious attention.

Cabinet furniture should never be permitted to reach the shop-worn or semi-junk stage. With a little care it is possible to keep it looking as fresh as when it came from the factory, and no pains should be spared to bring about this result.

The department manager should always see that his goods are displayed to the best possible advantage. When he first arranges his stock he should place the pieces displayed in such a manner that they will actually suggest use. It is a good idea to first figure out a systematic arrangement based upon either a known or supposed requirement. Place the cabinets in such a manner that when a customer comes in the demonstration can be made from the goods just as they would appear in use and have the use sufficiently definite so that the person investigating will recognize it as a system that might actually be adopted. Take records, both cylinder and disc, sheet music and music rolls, if you carry them, and place them in the cabinets in the proper manner.

Proper display, proper care and above all freshness and cleanliness are sure to produce results. Always give especial attention to the subject of cleanliness. Have a display that you are proud of—one that you can ask a prospective customer to look over and feel proud to show him. Above all things, do not use the samples for your work and do not pile things upon them, and remember it is better to have the new goods yourself, while your customer takes the samples.

Keep your stock up; keep it clean; keep it fresh. Treat it as though it was worthy of your most careful attention. Spend time arranging and re-arranging it. Do not crowd it. Do not try to carry too many numbers. Get a few and you will find that in almost every case you decide what your customer shall buy.

AMENDING TRADE-MARK LAW.

An Important Proviso to be Incorporated Which Will Interest Piano Men.

(Special to The Talking Machine World.)

Washington, D. C., June 6, 1910.

The bill (H. R. 24,749) to amend Section 5 of the Trade-Mark Law, has been reported favorably by the House Committee on Patents. This bill adds to the original Section 5 a proviso worded thus: "Provided further, That nothing herein shall prevent the registration of a trade-mark, otherwise registrable, because of its being the name of the applicant or a portion thereof."

The bill will not affect in any wise the provisions of existing law as to what trade-marks

are subject to registration, except that a "trade-mark otherwise registrable" shall not be rejected merely because of its being the name of the applicant or a portion of the applicant's name.

It appears that the Court of Appeals of the District of Columbia recently held that Section 5, as it now stands, has the effect "to prevent the registration by a corporation of its own name, whether that name be the subject of a technical trade-mark or not." The decision applies to a trade-mark that forms the name, or a part of the name, of the applicant, but it is understood that no such effect as this was intended by the Committee on Patents when Section 5 was originally reported to the House.

At the hearings had on this bill, no reason was developed for denying to the applicant the right to register a trade-mark "otherwise registrable," merely because it is the name, or a portion of the name, of the applicant. In many cases, it was stated, this construction of the statute results in inconvenience and hardship.

The bill has the approval of the commissioner and assistant commissioner of patents, to whom trade-mark cases are usually submitted, and the Committee on Patents recommended that the bill be passed by unanimous consent when it is reached upon the calendar.

A PROSPEROUS STORE ATTRACTS.

Buying Public More Inclined to Patronize Successful Appearing Merchant—Dirty and Disordered Store Naturally Repels.

It may be considered a peculiar fact, but people are inclined to patronize a prosperous store. The chief means that they have of sizing up the prosperity of any store is the outward appearance of it; therefore, every retailer should give special attention to the outward appearance of his place of business.

There is a way for every store to appear prosperous, and it is strictly up to each dealer to find out what it is. But do not be like the retailer who had a display card posted on his window which read, "Business is Good." He had the right idea, but he was simply on the wrong track. His windows had the appearance of not having been cleaned for weeks, and the first glance at the outward appearance of his store showed a painful lack of enterprise in not keeping it up to date.

Every dealer should make a special effort to have his store appear as if money had been spent and care had been taken in making it attractive. Mere signs will not answer. To display a cheerful sign, as did the retailer mentioned above, the appearance of the store must correspond with the idea which the sign is intended to impress upon the reader.

It may be well to remind World readers that the young man who "never had a chance" is the same young man who has been canvassed over and over again by his superiors, and found destitute of necessary qualifications, or is deemed unworthy of closer relations with the firm, owing to some objectionable act, habit, or association, of which he thought his employers ignorant.

NOW IS THE TIME TO PLACE ELECTRIC-PLAYERS

to advantage and make easy money and big profits.
They earn money with very little attention.

To Business Men

Business men in every line admit the value of good trade papers.

A trade paper must be original—it must contain a variety of matter including news service—technical information—in fact it must crystallize the entire news of the special business world, and be a helpful adjunct to every department of trade.

Scan the columns of *The Talking Machine World* closely and after you have completed an analysis of the contents of this publication see if you can duplicate its value in any other trade!

The World is a help to the talking machine business.

It exerts an healthful optimism.

It wields an influence for the good and every man who sells talking machines, no matter in what part of the universe he may be located, should receive this publication as regularly as it is issued. He is missing a vital business point if he fails to do this.

Thousands of dealers not only in the United States but in every country on earth consult the pages of the *World* regularly.

They draw from the *World* pleasure and profit.

The talking machine business has a brilliant future, and this publication is doing much to enlarge the business horizon of every retail talking machine man in the world.

To receive this paper annually costs but \$1.00. All foreign countries \$1.25.

The best-known trade mark in the world

"The Victor talking machine's design, 'His Master's Voice,' has become a household word, and the quaint little fox terrier at attention before the horn is familiar to more Americans than any of the world's great masterpieces."—COLLIER'S, May 22, 1909.

THE PLEASURE
DOUBLED

THE COST
REDUCED

10 inch 65c. **DOUBLE RECORD DISCS** 12 inch \$1.00

Zon-o-phone Records are pre-eminently the BEST that money, brains, and a thorough knowledge of the art of sound recording can produce.

They are justly famous for their remarkably clear, natural tones, absence of scratch and wearing quality.

The greatest care is exercised in combining the selections, each side of the disc presenting the latest and best in popular music or standard compositions.

The price appeals to the masses, the quality to the classes, making them indeed a popular record at a popular price.

A new catalogue of Hebrew Single Side Selections has just been issued. Solos by Mme. Prager, Mr. Juvelier, Master Mirsky, the boy soprano, and other eminent singers. These are undoubtedly the most perfect Hebrew records ever recorded. 10 inch, 50 cents, 12 inch, 75 cents.

Resolve yourself, Mr. Dealer, into a committee of one and investigate these claims. Consider, criticize, compare. ZON-O-PHONE RECORDS will stand the test. A trial will verify all that we say.

TALKING MACHINE REPAIRING.

No Department of the Talking Machine Business More Important Than That Devoted to Repair—Following up Customers and Keeping Machines in Repair Tends to Make Friends for the House and Enlarge Trade—An Interesting Communication on This Subject from Andrew H. Dodin.

Andrew H. Dodin, of the repair department of the New York Talking Machine Co., in a letter to the Editor of The Talking Machine World, of recent date, makes an appeal to dealers regarding the importance of the repair department, and in this connection says:

"Writing from my experience during the past eight years spent in repairing talking machines, I request permission to speak, through your columns, to the dealers in general on the subject of 'talking machine repairing.'

"Too little attention has been paid in the past by the average dealer to the repair department. In order to maintain the high state of the business to keep your display machines in perfect order, and to retain the custom and further orders of your present customers, you must make a point of having your repair work carefully attended to.

"You may say that your present repair man is not capable of handling all cases which come to his department; that he has never had sufficient experience or training. This can only be a temporary excuse. All distributors employ trained men and are always willing to have them teach your man the approved methods of repairing. For some time past the Victor Talking Machine Co. has been giving the repair departments of their distributors special attention; their experts working, in some cases, a week at a time, with the repair man, giving them the benefit of the factory methods and training. This knowledge can in turn be given to your men, and the result will be better work and more satisfied customers.

"The repair bench is too often found lacking in tools. A hammer, a pair of plyers and a few screwdrivers are usually all that is given a repair man, and with these he is expected to do first class work. This is impossible. Help him along; it is your gain. Let him get in touch with the repair department of your distributor, have him ask for a list of tools for the class of work he would be likely to handle, and you will be surprised how much time he can save through their use, and how much better work he can turn out.

"In the last few years I have personally come in contact with any number of cases, where, by reason of a poorly repaired machine, sales to the friends of the party owning the machine have been lost. This is detrimental to the business and will become more serious in the future unless the dealer awakens to the fact that proper repairing is vital to his success.

"Give your repair department a show; help your man to do good work by giving him the proper training, and letting him have the necessary tools to work with, and thus enable him to bring out better results."

THE VALUE OF TACT IN BUSINESS.

Pulling for new trade ever and always is part of the live retailer's daily work. But he must never overlook the oft-proven truth that "a bird in hand is worth two in the bush." The customer he has must be so handled as to remain of the fold, since the business grows not by a change of faces, but by added ones. Wherefore, the wise are very careful to make old customers feel "cumfy" in their dealings and prompt to correct any unlooked for cause of complaint which in spite of every precaution may now and again crop up.

If the misunderstanding be due to the customer's error or ignorance, the store, by tactful courtesy and patience, can smooth it out and the daily widening policy of "money's worth or money back" usually holds the customer's confidence and good-will.

OUR EXPORT AND IMPORT TRADE

Of Talking Machines for May—Exports Show Strong Gain as Compared with Last Year—Some Interesting Figures.

(Special to The Talking Machine World.)

Washington, D. C., July 9, 1910.

In the summary of exports and imports of the commerce of the United States for the month of May (the last period for which it has been compiled), which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following interesting figures relating to talking machines and supplies are set forth:

The total exports of talking machines, records and supplies for May, 1910, amounted to \$358,265, as compared with \$200,524 for the same month of the previous year. The eleven months' exportations of talking machines, records and supplies amounted to \$3,496,091, as against \$2,613,084 for the same period in 1909.

The total export figures for the eleven months of the past three years are as follows: 1908, \$4,511,928; 1909, \$2,613,084; 1910, \$3,496,091.

The value in detail of exportations of talking machine records and supplies amounted to \$169,434 in May, 1910, as against \$200,524 for the same month of 1909, and for the eleven months ending in May, 1910, they amounted to \$1,326,698, as against 2,613,084 in 1909 and \$4,511,928 in 1908.

The value of all other parts relating to talking machines, phonographs, records and materials therefor sent abroad during May, 1910, amounted to 188,831; the total exports for the eleven months under this heading foot up \$2,169,393.

PROMPT DELIVERIES.

What They Mean to the Customer—An Excellent Way of Increasing Trade and Keeping Satisfied and Paying Patrons.

A prominent dealer recently said that the success of his business was largely due to the prompt delivery of goods. It had been the rigid rule of his establishment since its inception many years back to dispatch every order the same day as received, and that a customer, in sending for certain goods, must never be kept waiting, even if the time was six o'clock in the morning.

How many stores are conducted on the same rigid lines? It is true that conditions regarding traffic communications have altered, and that delay at the present time would not mean such an inconvenience to the customer as in earlier days, but all the same prompt shipping is just as essential if the good will of the buyer is to be retained. No man likes waiting for his goods. Even if he is not in absolute need of them, he is in a hurry to have them in his possession.

Besides, he does not like to be disappointed. It may be that the clerk said that he should have them at a certain time, and they did not arrive or possibly he sent a team to fetch them, and the man after waiting a couple of hours was told to come back later on in the day. He naturally loses confidence in the store when such things happen, and that is fatal. The dealer's word should be as good as his bond. And if he, or his clerk, says that the goods shall be ready or shipped at a certain time, then there should be no mistake about it, they should go.

In these days a dealer cannot afford to neglect any of those business principles that help to build up the reputation of the store. Competition becomes harder in almost every line. Only by

gaining the confidence of his community, and by acquiring a reputation for strict business methods can he hope to go ahead. By these means alone can he cement his friendship with his customers, and it is friendships that count in business.

MOVING PICTURES IN THE CHURCH.

Jane Addams Tells of Conditions in Chicago—How Churches May Be Made Popular.

Jane Addams says that on a Sunday night in Chicago one-sixth of the entire population is packed into 466 places of entertainment. Churches? No—moving-picture shows! The churches on Sunday night in Chicago, and, we fear, in many other places, are not conspicuously crowded. The problem is this: If the Chicago churches had presented an up-to-date moving-picture show, instead of a sermon, would the crowd have followed the films? Inasmuch as the church admission is free and the theatre admission is from 5 to 25 cents, it is a fair assumption that the churches would have filled. Now, if the object of the Sunday night service is primarily to reach the crowd on the street, and if, as has been shown, the moving picture is a much more vivid and attractive way of reaching that crowd than is a sermon, why, in all seriousness, don't churches give us the thrilling stories of the Old Testament, its beautiful tales of the New Testament, and its modern illustrations of Christian heroism in this and other lands, in the up-to-date form—in moving pictures? They may answer that they cannot get hold of the films and the machine, but this answer is not a good answer. Excellent sacred pictures are shown in the present professional entertainments, says a prominent writer, and many illustrations of modern heroism, self-sacrifice and virtue are in every program. Moreover, a demand for films for church use would enlarge the supply. Moving-picture machines are not expensive and can be easily operated. You can do it in your church. Why don't you?

H. O. SHUTTLEWORTH A VISITOR.

The Assistant Manager of the Western Talking Machine Co., Winnipeg, Speaks in Optimistic Vein of Trade Outlook in His Territory.

They are "raising" some bright, active, go-ahead young talking machine men up in Northwestern Canada, and an excellent sample in the person of H. O. Shuttleworth, assistant manager of the Western Talking Machine Co., Winnipeg, Manitoba, paid The World sanctum a visit recently. Mr. Shuttleworth had just come from the Victor factory, regarding the extent and equipment of which he was most enthusiastic. He also visited the leading retail talking machine stores in New York for the purpose of stocking away ideas, if there were any floating around, and he incidentally placed some orders with the wholesalers.

Mr. Shuttleworth spoke in glowing terms of trade conditions in Manitoba. His house represents the Victor—in fact is one of the two Victor jobbers in Canada, and they sell five hundred dealers. As may be inferred, this keeps the Western Talking Machine Co. busy, as they cover a wide territory—a territory, however, which is steadily growing in population and wealth. In fact the present year promises to be from the crop standpoint one of the best ever known in Canada, all of which means better business for the talking machine men.

On his homeward trip to Winnipeg Mr. Shuttleworth stayed over at Montreal.

Annual inventories should be taken if for no other purpose than to know the goods that would be destroyed in case of fire.

TRADE PROGRESS IN NORTHWEST.

Talking Machine Men in Seattle Report Great Activity with Large Shipments to Alaska—One Order Called for \$5,500 Worth of Victor Goods—Columbia Business Shows Increase of 55 Per Cent.—Many New Dealers Signed Recently for All the Companies—Berger to Sell from Special Wagon—Borgum Co. Add Recording Department—Other Items.

(Special to The Talking Machine World.)

Seattle, Wash., July 5, 1910.

With the opening of navigation in Northern Alaska waters the talking machine business in this section has certainly taken on a rosy hue. Thousands of dollars of "talkers" have been shipped on the first steamers out of Seattle already this month to the northern gold fields, and the jobbers are looking forward to a tremendous business from this section this summer. The largest order recorded so far was from the new Iditorod region, booked by Sherman, Clay & Co. This order called for \$5,500 in Victor goods alone, and George Guppy, who landed the deal, states that he expects to land several even bigger than this one before navigation closes in September.

Several large retail sales have been made lately for Alaska shipment, especially one by Mr. Kelly, of Eilers, for two Victrolas and 250 Red Seal records, amounting to \$850. Mr. Kelly states that this is the kind of business which is "made to order" for him.

Mr. Grimsley, manager of the Columbia Phonograph Co.'s store, reports that their business in June exceeded last June by 55 per cent. This fact is not at all surprising when one glances over the list of high quality of dealers who are now handling the Columbia line. There is no questioning the fact that the Columbia business has gained a strong impetus through the Regent Grafonola. The dealers simply cannot get enough of these beautiful instruments.

Tedeman and Woodburn, who had charge of the Eilers Music House at Everett, Wash., have severed their connections with this firm, and hereafter will go it alone. Eilers has bought out Clines Piano House in Everett, and will conduct a first-class talking machine department.

Hugh B. Dobbs, traveler for Sherman, Clay & Co., has returned to Seattle from an extended tour of the State. Quite a number of new Victor dealers were signed up by Mr. Dobbs on this trip, among whom are K. Knuteson, Stanwood; E. J. Elison, Poulsbo; B. F. Day Lumber Co., Big Lake; Mrs. Westphall, Ferndale.

William Long, who is connected with the wholesale department of Eilers Music House, Seattle, attended the big scrap at Reno, Nev. He will make a tour of California before returning to his duties.

Sam Berger, the dealer at Mount Vernon, Wash., is fitting up a special wagon which he is going to use in convincing the farmers in his section that they should purchase a talking machine this summer instead of waiting until fall. He reports a steady demand for Columbia disc records, especially "The Hired Girl's Dream."

E. Geissler, of the Geo. J. Birkel Co., Los Angeles, Cal., was a recent visitor in Seattle. Other recent visitors are G. W. Bates, auditor for Sherman, Clay & Co., San Francisco; Mr. Peterson, talking machine manager for Eilers Music House, Tacoma, Wash., and Ed. Lyons, representative for the National Phonograph Co.

The Borgum Music Co., 1207 Third avenue, have just added a special recording department. Any desired song or instrumental selection not listed by the National Co. will be made by the best talent in the city. Quite a number of phonograph owners have already taken advantage of this unique plan, and it has also served to stimulate the demand for blanks and encourage record-making at home.

Mr. Bendle, salesman for Sherman, Clay & Co., has just left for six weeks' vacation. Miss Coleman of the same firm has left for San Francisco for a stay of a few weeks.

Lauren Kidd has gone into the Edison business on a large scale in Pasco, Wash.

Edw. Borgum conducted a demonstration of the Edison Business Phonograph in the show windows of the Eilers Music House last week. He was assisted by Matt Corcoran and Miss H. Frenger.

A MODERN DON QUIXOTE

Is the Man Who Says Advertising Doesn't Pay—Gets Personal Judgment Against Experience of Business World.

The man who conducts his business on the theory that it doesn't pay to advertise and he can't afford to advertise sets up his judgment in opposition to that of all the best business men in the world. Says an experienced advertising authority: "With a few years' experience in conducting a small business on a few thousand dollars capital he assumes to know more than those whose hourly transactions aggregate more than his do in a year, and who have made their mil-

lions by pursuing a course that he says doesn't pay."

If advertising doesn't pay, why is it that the most successful merchants of every town, large or small, are the heaviest advertisers? If it does not pay, why do the largest business firms in the world spend millions in that way?

Is it because they want to donate those millions to the newspaper and magazine publishers, or because they don't know as much about business as the six-for-a-dollar merchant, who says money spent in advertising is thrown away or donated to the man to whom it is paid?

Such talk is simply ridiculous, and it requires more than the average patience to discuss the proposition of whether advertising pays or not with that kind of a man. His complacent self-conceit in assuming that he knows more than the whole world is laughable, and reminds us of the man who proved that the world doesn't revolve by placing a pumpkin on a stump and watching it all night.

RECORDS TO FURNISH DICTATION

To Learners and Advanced Students of Shorthand—J. N. Kimball, the Stenographic Expert, Has Prepared Twenty-Five Edison Gold Molded Records for This Purpose—Should Prove a Valuable Aid in Perfecting Students in the Stenographic Art.

J. N. Kimball, the well-known stenographic expert, with years of teaching experience, has prepared twenty-five Edison gold molded phonograph records, each one a perfect copy of the "master" prepared and spoken by Mr. Kimball, for the purpose of furnishing dictation to learners and advanced students of shorthand.

It is a well-known fact that the rudiments of stenography and typewriting are easily learned, but proficiency in these professions can only be attained by constant practice from dictation, hence the value of these records to commercial schools and individual students in the home. These records represent exact (and adjustable) dictation speeds, perfect enunciation, large vocabulary, with tireless repetition. They contain over twelve thousand words, occupying but one-third of a cubic foot of space, and requiring over an hour for their reproduction. The complete list covers speeds from 75 to 225 words per minute, and each separate record can be run at speeds with a variation of from 30 to 40 words per minute. The records cover every conceivable form of dictation—business letters, addresses, political speeches, addresses in Congress, extracts from novels, jury charges and testimony in criminal and civil cases.

For class instruction or in the home these records will be a decided stimulus to perfecting one in speed and surety as well as in an increased appreciation of the business phonograph, as they increase the students' vocabulary and equip them for practical work in almost all lines. The Edison Business Phonograph Co. or dealers in phonographs will supply these records.

FITZGERALD DID NOT SELL.

Will Push Two Lines of Talking Machines.

In the last issue of The World there appeared an item from our Los Angeles, Cal., correspondent to the effect that the talking machine department of the Fitzgerald Music Co., Los Angeles, Cal., was taken over by the Columbia Phonograph Co.

This statement Manager Barnes, of the Fitzgerald Music Co., advises us is incorrect. He says: "We have taken the agency for the Columbia machine, but we have in no way ceased to push most aggressively the sale of Victor goods."

Daniel G. Williams, representative of the Udell Works, was at the convention of the National Talking Machine Jobbers' Association, at Atlantic City, after which he called on the trade in New York and vicinity. Mr. Williams is an old-time talking machine man, and he was quite "at home" at the convention.

EASTERN CO. SERVICE

IS THE KIND THAT GETS THE GOODS INTO YOUR HANDS WHEN YOU WANT THEM

Popular Records in the height of their demand, not after your competitor has supplied the demand. Try Eastern Service. Once Tried, Always Used.

Write us for samples, descriptive circular and prices of

DISTRIBUTERS OF EDISON AND VICTOR MACHINES, RECORDS, SUPPLIES

VICTROLA XII
Mahogany, \$125

VICTROLA XVI
Circassian Walnut, \$250
Mahogany or Quartered Oak, \$200

Now is the time to push the Victrola

Summer homes, country clubs, hotels, roof gardens, large restaurants and pleasure resorts all need a Victrola and need it right now.

Quick and easy selling for you—the Victrola readily sells itself if you bring it to the attention of the proper people.

And the sale carries with it a large sale of high-class records and is followed by many subsequent record sales.

If you haven't a Victrola so you can go after this desirable trade, write to your distributor for one today.

A Victrola in your store will be the best kind of advertising for you—the strongest "drawing card" you could possibly have in your store.

It not only sells itself but helps to sell the other styles of the Victor, and is one of the most profitable investments you can make.

So get a Victrola and go after this business right now and you're sure to reap a rich harvest.

AROUND THE MILWAUKEE TRADE.

Summer Business Reported Averaging Well in Both Wholesale and Retail Fields—W. P. Hope a Benedict—Milwaukeeans at the Convention—Kunde Renovations—Eicholz Removes—Hoeffler Concerts—New Idea Cabinet Co. Delayed in Making Up Stock.

(Special to The Talking Machine World.)

Milwaukee, Wis., July 9, 1910.

Despite the fact that Milwaukee and surrounding territory is experiencing the hottest weather known in thirty-nine years for this season of the year, indications are that the talking machine business is showing some improvement. The hot weather has meant that the summer resort season is now in full sway, and this has opened an excellent field for the retailer. Dealers say that there has never been a season when so many Milwaukeeans have purchased new machines for their summer homes, while the demand for records in all lines has been especially good. In addition to this, people have been in the market for supplies of all kinds. It is expected that the retail trade during the greater portion of July and August will not be especially brisk, since the summer resort business will have passed its best stage by that time and the general summer dullness will have arrived in all lines.

While the wholesale business is not as heavy as it might be, jobbers say that it is as satisfactory as could be expected. In fact, business during the latter part of June was better than is usually the case, owing to the fact that demand was good from country dealers. Farmers have passed through the busiest portion of their early season's work and seem to have found more time to buy talking machines and records.

Milwaukee was represented at the convention of the National Association of Talking Machine Jobbers at Atlantic City by Lawrence McGreal, Mrs. McGreal and Mrs. McGreal's sister, Miss Gertrude Gannon, owner of the McGreal retail store. The party planned later a visit to Boston, where they will meet P. Conroy, the well-known piano dealer of St. Louis, and an old friend of Mr. McGreal's. Mr. Conroy will then take the Milwaukee party on a tour through New England. Mr. McGreal hopes to spend a week or ten days at Rochester, N. Y., his former home, before he returns to Milwaukee.

William P. Hope, representative of the National Phonograph Co. in Wisconsin and upper Michigan territory, was married on June 29 to Miss Nellie Scott, of Marinette. The affair was conducted quietly at the home of William S. Baker, an uncle of the bride. Mrs. Hope is the daughter of a late well-known business man of Marinette. After a trip to Mackinac Island, Sault Ste. Marie and other points, the couple will be at home at Marinette, Wis., where Mr. Hope will make his headquarters in the future. Mr. Hope was in Milwaukee on business during the latter part of June.

Mr. Krege, of Krege & Co., of Berlin, Wis., was in Milwaukee recently and purchased an

Auxetophone from Lawrence McGreal for use in an outdoor skating rink. This was the last Auxetophone carried by Mr. McGreal, and he is now expecting a shipment of new machines.

L. Lambeck, Edison and Victor dealer at Beaver Dam, Wis., was in Milwaukee recently visiting his father, who is confined to his home by illness.

Albert G. Kunde, Columbia dealer, has completed arrangements for installing a new front in his store at 516 Grand avenue. Other improvements will be also made during the summer months. "Business is very satisfactory despite the hot weather," said Mr. Kunde. "We have just closed the sale of two \$200 machines and have several fine prospects in view." Mr. Kunde is now devoting his entire time to his downtown store since the closing of his Fond du Lac avenue branch.

George A. Eicholz, the north side talking machine dealer, has moved into his new store at the corner of Twelfth and Walnut streets. Larger and better quarters are available and the location is one of the best on the north side. Mr. Eicholz has enlarged his stock of both machines and records.

Frank P. Price, manager of the repair department at the McGreal store, is the father of a nine-pound son. Mr. Price already has plans for his son's future in the talking machine business.

In connection with an effective Victor July 4 window, the Hoeffler Mfg. Co. conducted evening concerts. During the entire week before the Fourth a varied program of national airs was presented by Mr. Becker, and people attended in large numbers, despite the warm weather. Mr. Becker reports that the new styles of the Edison business phonograph are taking especially well with the trade. The new foot-trip device on the machines is proving a popular innovation.

Roy Keith and F. W. Slowly, of the Talking Machine Co., of Chicago, called upon the Milwaukee trade recently. Both gentlemen predicted a big fall trade in all lines.

The New Idea Cabinet Co. recently incorporated to manufacture the "New Idea" disc cabinet, are experiencing some little delay in equipping a plant at Wauwatosa, a Milwaukee suburb. It is expected, however, that the plant will be ready for operation some time during the present month. Lawrence McGreal, one of the incorporators of the new company, reports the receipt of heavy orders for the new cabinet, and its success seems assured from the very start. A. H. Ellis will be superintendent. Present plans are that at least 200 cabinets will be turned out each month.

FOUR RECORDS POPULAR IN TEXAS.

The committee appointed by Robt. N. Watkin, president of the Southwestern Talking Machine Owners' Association, Dallas, Tex., for the purpose of selecting the most popular records for talking machines has turned in a report to the effect that the four most popular records are "Red Wing," "Dixie," "Rainbow" and "Turkey

in the Straw." In this connection they say these four records some doubtless have already, but every talking machine owner should have all four of them.

HOW GOLDSMITH'S CELEBRATED.

Henry Goldsmith, of Goldsmith's Music Store, Columbus, O., in carrying out the spirit of the Victor Talking Machine Co.'s idea for a safe and sane Fourth, issued a little package which in appearance was exactly like a small fire cracker, and when directions were followed and the package opened up it revealed a copy of the July Victor record catalog. It was issued, of course, before the Fourth, so that in timeliness and effectiveness it at once attracted attention.

Mr. Goldsmith also made use of the Victor's ready-made display window which he used to good advantage about ten days or so before Independence Day. This spirit of co-operation with the manufacturers is excellent, and we wish that dealers throughout the country would keep closer in touch with the excellent literature and suggestions issued by the companies in regard to the development of their business. It would prove mutually profitable.

THE NATIONAL MUSICAL INSTRUMENT.

The question of a national musical instrument has been discussed in correspondence in the new York Times and a number of other daily papers, and in this connection A. A. Leve, of Syracuse, N. Y., writes to the Times as follows:

"T. C. L.'s" suggestion about a national musical instrument is right in "tone." While the zither and all the other instruments he mentions may have some claim, more or less, to distinction, as a national instrument first, last and always what has any of the above got on the phonograph?" So say we all.

THE JOYS OF THE PHONOGRAPH.

A letter this week from one of our "shut in" friends tells us of his great pleasure when, at Christmas time, he was presented with an Edison phonograph and a number of choice records.

How much happiness can be carried within the circumference of one little record! And how blessed it is for those of us who are strong and sturdy and bounding with health and strength to be able to gather into our arms, as it were, the trilling lilt of the birds in spring, the melody of the rippling brooks, the weird folk songs floating up from the blooming cotton fields, the grandiloquent discourse of the "Colored brother" as he "zorts" his crooning congregation concerning the "weighty matter of the law as proclaimed by Moses and the prophets," and boundless other bits of comedy, classics, triumphant crescendoes, anthems and oratorios, and thrust out garnered treasures into the outstretched arms of our heroic, patient loved ones whose eyes look longingly into the alluring paths, but whose feet are held back by the hand of affliction.—The Golden Age,

OPTIMISTIC IN THE QUAKER CITY.

Dealers and Jobbers Pleased with June Business—Buehn & Bro. Open Special Rooms to Exploit Edison Commercial Machines—Opinions About Exchange Proposition—Columbia Mignon a Great Favorite—Business with Company Ahead of Last Year—More Room for Weymann—Other Happenings.

(Special to the Talking Machine World.)

Philadelphia, Pa., July 5, 1910.

The Philadelphia talking machine trade is very jubilant over the business done in June. They all say it was the best June that they have ever had. The same was true of the previous month, and there is no wonder that the dealers in the "little marvel" are in high spirits. The competition, which seems to be growing all the time, is not lessening the trade for any one house, but it seems to be building up trade in every direction, until the talking machine is in as many homes as are pianos in Philadelphia. The sale of a piano almost completes a transaction for a lifetime, but the business on the "talkers" goes on forever.

The Philadelphia trade was well represented at all the sessions of the convention at Atlantic City. Aside from the work at the shore they were kept busy entertaining the delegates going and returning from the convention.

Louis Buehn & Bro. report that their business for June was highly satisfactory, and the last week of the month, in spite of the hot weather, eclipsed all others, both wholesale and retail. "It is simply remarkable," Mr. Buehn says, "how business is keeping up. Robert J. Dungan is up the State this week for the firm, and is sending in some very satisfactory orders.

Louis Buehn & Bro., who recently opened rooms at 1105 Walnut street for the exploiting of the Edison commercial machines, have also been doing a very satisfactory business. Naturally this work is slow, but business men are fast realizing that the Edison commercial machine is a great time saver. J. Frank Smith is the manager of the store, and he is highly enthusiastic over the work, and understands it thoroughly, and will no doubt overcome all prejudices.

There seems to be quite a difference of opinion among the talking machine men as to the advisability of shutting off of the continuous exchange proposition by the National Co., as per their communication to the dealers dated June 17. As this proposition does not go into effect until the first of next year, the matter in the meantime can no doubt be adjusted in such a way that there will be no trouble or loss of business to anyone. On this subject Mr. Buehn says:

"I personally think it is a step backward. It was a splendid talking point. It gave our men an opportunity to enthuse the dealers; to show them how they could reduce their stock greatly of standard records which did not sell any more, and exchange them for Amberol records. By this new order the National Co. will remove the very strongest argument we had. However, the other concession they make may develop into something worth while, but this remains to be seen."

The Penn Phonograph Co. have also been enjoying an exceptionally good June, 50 per cent. better than last year, and their trade, particularly through the middle and northern part of the State, has been very heavy. All of their men were called in over the Fourth of July and start out again this week for their usual July trips. They believe the good business will continue during the summer. None of their representatives through the State has been in Philadelphia lately, but there were many visitors following the convention at Atlantic City.

In speaking of the Edison proposition referred to above, the Penn Co. rather take a different view of the situation than Mr. Buehn, and believe it is going to work to good advantage to the Philadelphia jobbers, in that it removes many troubles which this changing of records brought to the jobbers. Besides, the National

Co. will replace it with another exchange proposition, but just what it will be is as yet not known by the dealers. A member of the Penn firm said: "We are glad to see the National Co.'s exchange proposition dropped. We think a semi-annual exchange should be used in its stead, or something of that sort."

James Shearer has joined the staff of the Columbia Phonograph Co. in this city. He used to be the manager of the St. Paul offices of the company, and before that he was manager of the Glasgow (Scotland) branch of the company.

The Columbia have received the new Mignon machines, and they have been very well received here, so well that it has been almost impossible for them to keep them on hand at the Philadelphia store. The company gave a Columbia concert at the Acacia Club at Williamsport last Monday night, and Manager T. K. Henderson went to the Pennsylvania lumber city to conduct it. It was a most satisfactory affair, as the Acacia is one of the finest clubs in Pennsylvania, and they were so pleased with the instrument that they would not hear of its removal after the concert. It will no doubt be the means of selling many Columbia machines to members of the club.

V. H. Emerson, the recording expert of the Columbia Co., was in Philadelphia last week. Their R. B. Robinson is on a trip up the State, but he was compelled to return home on account of illness. He will take a week's vacation and then go back again on the road.

The Columbia have received several of the new B. N. W. M. machines, the same machine as the B. N. W. except that it is cut in mahogany and sells at \$50. It is an extremely handsome machine and they believe it will have a very good sale here. The total amount of business during the month of June was ahead of May. In records they report that the more popular music seems to have the call at present. The new operatic selections by the Boston Opera Co. are coming through at present, and they are very satisfactory to the trade of the firm.

H. A. Weymann & Sons have the same report to make as the other firms on the increase of their business in June. Norbert Whitely leaves to-day for his regular July trip. Their two biggest sellers are "One Little Girl" and "Moonlight in Jungletown," two of the compositions from their own sheet-music department. The firm are contemplating a complete rearrangement of their talking machine department in the fall, and will give more space to these goods next year than ever before.

COVER UP RECORD DEFICIENCIES.

Some Dealers Affirm Artists Are Dead When Out of Records Called For.

Editor, Talking Machine World,
New York, N. Y.:

Dear Sir—A malicious report has been circulated by unknown parties to the effect that Miss Ada Jones was dead. Unscrupulous dealers with low stocks of her records, frequently manufacture damaging reports of this kind to cover up deficiencies in their stock. Patrons who call for their records are told the artist has died. Your readers will no doubt be glad to learn that Miss Jones is alive, well and daily employed in making records for good companies. Feeling sure that you will give this letter such publication as its importance would seem to merit, and thanking you in advance, I remain,

Yours very truly,

LEN SPENCER,
Len Spencer Lyceum.

Said a merchant: "Our remedies in avoiding losses are chiefly as follows: Do not carry too many of your business eggs in one basket. Consider character and ability before capital. If we take a large risk, it is based on character more than capital. We have had cases where we have given credit for nearly three times the amount of responsible capital, and not lost a penny. But in such cases the very inside of character must be known."

¿Quiere Vd.
que le dé
una lección
de inglés?

Es tan fácil aprender el inglés con el sistema I. C. S. y además el conocimiento del inglés es muy útil en los tiempos modernos.

El sistema I. C. S. para la enseñanza de idiomas por medio del fonógrafo facilita el aprendizaje de un idioma extranjero, y tiene que interesar notablemente á miles de personas. El vendedor de fonógrafos que no tiene los equipos I. C. S. para aprender idiomas, de seguro que está descuidando un medio rápido é infalible de aumentar sus negocios. El nuevo equipo I. C. S. para aprender idiomas, que cuesta \$35 oro, es una maravilla. Representa el arte más elevado en la enseñanza de idiomas y encierra un método que ha merecido la mayor recomendación de miles de personas competentes para hablar con autoridad sobre el asunto. Las Embajadas de España, Francia y Alemania en Washington, así como los principales Colegios han recomendado cordialmente el método I. C. S. para enseñar idiomas.

El equipo I. C. S. para aprender idiomas consta de un fonógrafo "Gem" Edison, hecho especialmente para estudio de idiomas; una bocina pequeña; un tubo auditivo con banda para la cabeza; una aceitera y 25 fonogramas de conversación para enseñar la pronunciación, que se garantiza ser absolutamente correcta con la entonación é inflexión propias. Además de esos fonogramas de conversación mandamos también cuadernos de estudio para aprender la teoría de los idiomas. El nuevo equipo es á la vez el mejor y más barato que se ha ofrecido, pues su precio es únicamente de \$35 oro americano.

Si Vd. desea aumentar sus negocios, escriba hoy mismo pidiéndonos detalles.

NEW YORK, JULY 15, 1910.

A COMMUNICATION from Len Spencer, appearing in another portion of this publication, touches upon an evil which has existed for some time in the talking machine trade.

Mr. Spencer refers to the fact that certain dealers when asked for records which they have not in stock allege that the artist whose records are desired is dead.

This complaint is not the first one which has reached The World office, and it is obvious that a certain class of dealers find it easy to make the statement to customers who desire certain records that the artist has passed away, or is not making records, simply because they do not have them in stock.

It should be understood, however, that this course is not adopted by large and reputable dealers, who are very glad to embrace in their stock all selections of records of a salable nature, but it cannot be denied that among the smaller dealers there is a class who willfully deceive intending purchasers by claiming that a certain artist is dead.

They work considerable injury because the party who is informed that a favorite artist is dead is likely to impart the same news to a friend who might go to some of the larger stores and not ask for records which they desire simply because they had been advised of the demise of their favorite artist.

If readers of The World have specific cases and can locate dealers who make such statements as in the case of the party referred to by Mr. Spencer, we shall be very glad to have them referred to this publication.

STATEMENTS made by various dealers to World representatives in the principal cities throughout the country would indicate that business conditions have been

particularly good for the summer season—in fact, surprisingly good when all things are considered.

The demand for the higher-priced machines continues unabated and in some localities the sales have reached far ahead of last year.

This is encouraging and shows that the talking machine still holds a strong position in the estimation of the public.

Comparing the sales of talking machines and pianos; during one afternoon we visited three piano establishments on Fifth avenue and three talking machine establishments.

In each of the piano stores there was an entire absence of callers.

The salesmen were all at their desks without even having the opportunity of interviewing a stray caller.

Fully a quarter of an hour was spent in each of the warerooms and an inspection of the three talking machine establishments followed.

In one there was a little entertainment being given and sixty-four people were present.

In one of the other establishments there were six callers, all busily interested in examining machines or listening to records.

In the other there were eleven.

The afternoon was exceedingly hot, and any entertainment product which could draw forth interest on the part of New Yorkers on such a day is certainly worth pushing in good form.

THE comparison between the entire lack of callers in the piano establishments and the goodly attendance in the talking machine rooms is well worthy of emphasizing.

It shows that the talking machines are interesting to a large portion of our people and that the fascination has not begun to wear off as some of us at times incline to believe.

It looks now as if we were going to have a good summer in the talking machine trade and a fall which will be more than interesting on account of enlarged business possibilities.

The illustration named above is only one out of many and talking machine men should be encouraged with the sales possibilities straight through the heated term.

Unquestionably the interest in the talking machine does not languish during the hot weather.

On the contrary, it seems to take the place of the piano.

It supplies entertainment without effort for homes, clubs and lawn parties, and, we may add, yachting parties as well.

To-day it is almost impossible to take a trip through Long Island Sound without hearing the music of talking machines from the decks or cabins of numerous yachts.

If you do not believe this ask Metzger, who is a famous Sound yachtsman and is oftentimes lulled to sleep by the sweet sound of a talking machine.

Instead of lying dormant during the summer months, talking machine dealers everywhere should feel encouraged to press forward and impress upon the public the wonderful entertaining powers of the modern talking machine.

There is no use of sitting down and waiting for the hot weather to go by before strenuous effort is made to secure trade.

GOOD business can be had during the summer months—plenty of it—and we are fully aware that a portion of our readers have a keen realization of the situation.

A number, however, are prone to look upon summer business with indifference, and they are the ones who will not reap the benefit.

The man who is not looking for business will not be apt to secure it, but talk with the live ones in the talking machine industry and you will find that on the whole there are very few complaints as to the trade situation.

It is true, collections have been slow, but then they usually are at this season.

Hence a greater need for activity—a greater necessity of compelling purchasers to live up to their obligations.

If a man once gets into the habit of meeting his monthly deferred payments promptly there is no trouble about keeping him up to the line in good form, but if he once gets behind he is apt to become indifferent.

It is up to the talking machine men to treat their customers the right way.

This can be accomplished through a good system and by impressing upon customers that it is contrary to business rules to permit payday to go by.

IT is really surprising to find how easy it is to keep customers up to good business practices when once they learn the lesson of system.

Nine times out of ten a man who has purchased a machine on the instalment basis will have a higher regard for the business institution which compels him to meet his payments with regularity, than for the one which permits him to pay as he chooses. In other words, any old time.

No man ever lost by introducing system into every department of his business, particularly in the collection department.

A COMPLETE report of the Fourth Annual Convention of the National Association of Talking Machine Jobbers will be found in another portion of this publication. The outing at Atlantic City proved beneficial in many ways.

There were present one hundred and seventy-five representatives from eighty-five houses, and all the principal States in the Union were well represented.

Men came from as far away as Winnipeg and Texas to be present at the Atlantic City meet.

A noticeable fact in this year's gathering was the exclusive attendance of Edison and Victor jobbers.

In scanning the list we could not distinguish a single representative who did not have a business alliance with either one of the above companies.

At the closed sessions many topics were taken up for serious discussion which have a direct bearing upon trade interests.

These matters will not be given out until later after the Executive Committee has finally passed upon them.

COLUMBIA PHONOGRAPH CO.'S SUMMER WINDOW

The Retail Store on West 23d Street, New York, Compels Attention and Admiration—Clever Work of Mr. Cleveland—It Is His Best Effort.

With a record as an expert designer of artistic windows, H. Cleveland, manager of the Columbia Phonograph Co.'s retail store, 33 and 35 West Twenty-third street, New York, has executed another masterpiece in this line. This splendid store has two great display windows and in one

rected with such scenes, are all in the picture and fill the entire window.

The best effect, so far as the lighting is concerned, is obtained at night and a crowd often numbering 30 to 40 stand for a long time admiring the unique and original display which is

A COLUMBIA WINDOW THAT SHOWS HOW SUCH SPACE MAY BE UTILIZED TO ADVANTAGE.

there has been reproduced a realistic camp scene. The tent, equipped, of course, with a graphophone, fishing rods, etc., and the surrounding detail of camp stools, crude thin-legged wash stand made from a soap box, a genuine camp fire, with the accompanying suspended kettle, wood pile and axe and other articles inseparably con-

true to nature. The other window shows a full line of the company's specialties, also effectively displayed, but more in accordance with conventional ideas. The camp scene, however, has made the hit, and Mr. Cleveland and his clever corps of assistants are to be complimented on this, their crowning effort.

MISTAKE SAVED THE DAY.

Nasty Letter Roused Merchant's Ire and Provoked Strong Answer Which Was Never Mailed—Cooler Judgment Next Day Saved Thousands of Dollars in Orders—An Experience Worth Reading and Profiting By.

"When I was much younger in business and experience than I am now," remarked an old merchant, from his favorite corner of the club, "I received a letter from a customer that was full of kicks, accompanied by the suggestion that we were not the gentlemen in business that we thought ourselves to be. It was the sort of a letter calculated to make one hot all through.

"Of course I answered it; sat right down then and there, and told the concern what I thought of it. Let off such an outburst of steam that I expected to see my stenographer open the office windows. I not only answered that letter, but told the writer what I thought of that, and of other letters I had received from him in the past, and of other transactions of his in his dealings with us.

"What if he was a good customer of ours? I was perfectly willing to cast him and his patronage overboard for the chance of telling him for once what I thought of him.

"The stenographer wrote it out immediately. I read it with glee, and said to myself, 'If that don't shrivel him up, the English language means nothing to him.' 'Don't forget, Miss Brown,' I added, 'to enclose a return envelope with a stamp on it. I don't want him to waste even a postage stamp more on us.' I banged down my desk top and went to my luncheon justified.

"The next morning I found a letter on my desk, in one of our return envelopes. I opened it, and discovered that Miss Brown, in the hurry of work, had mailed the letter in our own enclosure, and placed in it the one addressed to my epistolary critic.

"I read it through, and was ashamed of myself. In cold-type, with the anger and the lust for blood gone. I judged the epistle as another

would judge it. I looked at it from the standpoint of the man to whom it was addressed.

"I tore it up; thanked Miss Brown for her mistake, dictated another letter, received an apologetic answer, and have sold tens of thousands of goods to my correspondent in these years that have followed."

KRANZ-SMITH CO.'S VICTOR DISPLAY.

(Special to The Talking Machine World.)

Baltimore, Md., June 29, 1910.

The Kranz-Smith Piano Co. are making a very effective display of Victor talking machines and

records in their warerooms in this city. This house has a very select following, the purchasers having sold the Chickering piano for many years, and they expect to place the Victor instrument in the homes of many of their customers.

EDISON AS AN ART CENSOR.

His Men Say He Keeps a Critical Eye on the Moving Pictures.

One of the most regular patrons of moving picture shows in the Oranges is Thomas A. Edison. He goes as a critic and if the subjects do not suit him the men in charge of the department in his works hear from him the next day.

The inventor appeared in this city last night, says an Orange (N. J.) paper, with one of the men from his factory and quietly entered one of the cheapest halls here, paying his nickel at the door. He stayed the show out and went home with a fund of material for his talk to-day with the department over which presides Jim White, the best known moving picture man in the business.

"The 'old man' is a regular censor," said one of the men at the factory. "When he was down South he found time at least twice a week to go to the moving picture shows and he sometimes used to give them the devil if the pictures were not what he thought they ought to be.

"He takes as much interest in the moving picture end of his enterprises as he does in anything else, and he is very critical about the subjects and the way they are worked out. Of course he can't see all of them, but he sees enough to know pretty well what is going on, and the men who select the subjects never forget that if they put out one that isn't what it ought to be he is apt to see it."

When Edison goes out on his visits of inspection of the picture shows he does not announce it in advance. He slips in as quietly as possible, trying to avoid recognition, and sometimes he succeeds. He admits that he gets real pleasure out of the shows, even while watching with critical eye.

Time was when the best salesman was the one who could tell the slickest lies. To-day the best salesman is the one who can tell the most truth.

Unless you are running a "junk shop" kind of store don't stack the goods up so high in the windows that no one can see the inside of the store. Let in a little light. The store will be more cheerful.

Purchase Quality Needles

BURCHARD needles naturally cost more than needles of an inferior quality, but, they have advantages which will be plain to all.

They move noiselessly over the disc and each needle can be used at least six times. You can get more out of BURCHARD needles than any other on the market. Send for a sample order of these needles and you will use no others.

MANUFACTURED IN THREE STYLES

No. 1. For Soft Playing

No. 2. For Loud Playing

No. 3. For Strong Tone Music

F. R. REINGRUBER, SCHWABACH, BAVARIA, GERMANY

The Phonograph You

This is U-S Phonola, Model B.
Purity of tone absolute—horn entirely concealed.

This is U-S Phonola, Model A.
Mahogany Cabinet—the very top-notch of sound reproduction is here attained.

The U-S Line of machines is complete enough to meet all needs and all purses, ranging from the less expensive Banner model to the magnificent Phonola. Every machine is the handiwork of the most skilled mechanics and cabinet makers in the business.

Like a ball rolling down an incline, gathering momentum as it rushes forward—is the U-S Phonograph and Record Proposition gaining in favor faster and faster as the wonderful musical and selling probabilities become better known. It is unquestionable that the talking machine proposition the trade has been waiting for; and judging by the size and number of orders already pouring in there is left scarcely a doubt in even the most pessimistic minds, but that it is a question of time **only** when the U-S will be the most widely sold phonographs and records.

Reasoning from the plain, blunt, **money** point of view there is more real profit in dollars and cents for you in the U-S than in any other Phonograph or Record. There is a money value also in the co-operation that exists between the home office and its dealers.

But it is not so much the first profits, as the fact of your knowing that you are supplying the best machine in the world in selling the

U-S Combination Phonograph

The most prominent and distinguishing feature of the U-S is its ability to change instantly and automatically from two to four-minute records or vice versa by the simple turn of a shift key which engages both the proper speed and proper reproducing point. No other machine on the market has this desirable improvement.

Quality is really the mark of the U-S. You have only to hear it in comparison with any other phonograph to become aware how far in advance it is. There is an entire absence of any mechanical limitation in its burst of song or solo or speech. There is no scratching, no hissing or thumping or trembling, but a clear, even, mellow tone. All you need do is to close your eyes and **see** the operatic star thrill with her rolling cadenza; the violin sobbing its sorrowful plaint; the vaudevillian shouting his funnyisms.

Even is there something in the perfect human tones as they emanate from the machine which would make them seem to the slightly sentimental listener, to be almost bordering on the supernatural.

Its possibilities are enormous for all of U—
—you, your customers and ourselves.

There is no limit to the adaptability of the U-S to any situation—a bell solo, a stump speech, the ticking of a watch, all will be faithfully duplicated. **The enlarged diaphragm** and the **super sensitive material** of which it is made, bring out the music details such as has never been known before. Grace notes and harmonies are as pure and distinct as when they were first played. This is helped by the **rounded sapphire point** which fits exactly into the sound grooves. Together with this, the remarkably simple and powerful **new type motor** used in the U-S Machine does away with all noise of motion and operates the record mandrel with smooth, evenly balanced revolution insuring an unchanging tone pitch. As an added safeguard in this direction the U-S is fitted with a pulley balance wheel.

U-S Combination Phonograph—Opera Model—beautifully finished in either Mahogany or Oak.

U-S Phonograph Co.,

Have Been Looking For

While the U-S Phonograph stands unapproached for playing any cylindrical record, its power and richness as a musical instrument is wonderfully augmented by the new U-S Everlasting Record.

Mark the name—Everlasting—break-proof, scratch-proof, wear-proof. It is not a wax record,—cannot be injured by sudden change of heat or cold or by dropping. The fact that it may be sent through the mail in the original carton unprotected proves that. This is especially interesting to the dealer who carries on an out-of-town business or who would send records by mail to all his customers, if he dared. Also this means entirely doing away with one source of irrevocable loss.

Playing does not wear out a U-S Record or dim its brilliancy. One record, tested for the purpose, was played steadily 1000 times without any effect whatever upon its playing qualities.

Brilliancy of tone is the mark of the

U-S Everlasting Records

They include both two and four-minute records, and may be played on any phonograph that takes cylindrical records. There is a large, ever-increasing array of selections, ranging from the most classical musical pieces, played or sung by the most eminent artists to the most up-to-the-minute popular dash-aways.

Final word to the Dealer. From the very start we will prove to the world the difference between U-S Machines and Records and other machines and records. We are not going to **tell** people they are better: through actual comparative demonstrations at our dealers, we are going to **show them** they are better.

Keep before you the fact that the U-S proposition is **here to stay**. It is built on a big and broad foundation; it is the result of a thoroughly perfected business plan that has every resource, both in men and money, to achieve success. Any dealer, no matter how big or how small he is, will be warranted by both profit and increased sales to handle the U-S line. A steady, forceful advertising campaign of National character will soon be inaugurated; it will give new life to the phonograph business and make customers for you. Your first step toward getting ready is filling out and mailing of the accompanying coupon. Do so to-day.

The U-S Banner Model Combination Phonograph is one of the most popular of the varied styles.

This shows one of the 2-minute records.

This shows a 4-minute record encased in the regulation carton.

Fill out this coupon and receive full particulars; also learn about our unusual SPECIAL OFFER.

We are asking the "prospects" in your locality to make comparisons, believing that they prefer to be their own musical critics, and that there are good and sufficient, visible and audible reasons why they must choose a Columbia Grafonola if they have \$200 to invest in a musical instrument.

Columbia Phonograph Co., Tribune Building, New York.

REVIEW OF AUGUST RECORDS.

Issued by the Victor, National, Columbia and Universal Companies

Five grand opera Amberol records are listed in the National Phonograph Co.'s roster for August, and they are a valuable addition to their rapidly growing list of operatic specialties. Karl Jörn is represented by a selection from "Tannhauser" (40,018), which is a beautiful interpretation of this work of Wagner's. Giovanni Polese sings that famous selection from "Thais" in which Anathael apostrophizes Alexandria, the wicked city (40,019), and it is impressive, dramatic and polished singing, and makes an excellent record. That delightful Neapolitan song, "Torna a Surriento" (40,020), with its sad, dreamy music, is sung with delightful abandon and charm by Carmen Melis—it is a rare and delightful interpretation. Marguerita Sylva, who has been heard at the Manhattan Opera House, is represented by a selection from Massenet's "Le Cid," "Pleurez Mes Yeux" (40,021), which is a masterpiece both from the standpoint of good recording and musical value. Marie Delna, contralto, has made a beautiful record of "Ah, mon fils" from the "Prophet" (40,022). Her noble voice is revealed to great advantage in this aria. In the regular list of Amberol records for August, which are printed in full elsewhere in this issue of The World, a splendid array of vocal and instrumental artists is represented. The same may be said of the list of Edison Standard records. The variety is large, including selections from the popular and classical. Sousa's Band, the American Standard Orchestra, Victor Herbert and his orchestra, the U. S. Military Band, the U. S. Marine Band and Orchestra, and a line of stars in the vocal field are here represented. There are also records in Hebrew, Italian and Swedish.

* * *

The Columbia Phonograph Co. introduce some of their new operatic records in their twelve-inch Symphony list for August. A great record is the double disc by Jose Mardones, the basso of the Boston Opera Co., which includes the "Prologue" from "Mefistofele," and "Piff Paff" from the "Huguenots" (A5192), both of which are sung in Italian in full, rich, even, musical voice. Eugenie Bronskaja, the celebrated Russian coloratura soprano of the Boston Opera Co., is represented by "Caro Nome" from "Rigoletto" and Gounod's "Ave Maria," with harp, organ and violin accompaniment (A5193). This is certainly a delightful double number, containing two great gems whose popularity will never wane. In the list of ten-inch and twelve-inch double disc records, which are printed in full in another part of THE WORLD, there are some very delightful double discs, admirably selected, including many of the popular numbers of the day, as well as selections from the operas. The list is well

worthy of careful study. The record especially by Kitty Cheatham—"Dixie"—with banjo accompaniment by Vess Ossman, and the reading of "The Wonderful Tar Baby" by Joel Chandler Harris make a delightful combination that will please youngsters and grownups. The list for August, taken as a whole, is well selected and so diversified as to please the general trade.

* * *

The Victor Talking Machine Co. have a very attractive lot of Red Seal records in their July list. "The Butterfly" duet by Caruso and Scotti (89,047) adds further fame to the splendid records made by these two great artists. Mme. Gerville-Reache, contralto, is represented by the old-time favorite "Stride Le Vampa" from "Trovatore" (87,065), which she sings in a voice that is full, rich and beautiful. John McCormack, the Irish operatic tenor, is heard in that famous Irish ballad, "The Snowy Breasted Pearl" (74,166), and the Romanza from "The Daughter of the Regiment" (88,245). In these two numbers McCormack augments his reputation, for they are capably sung and as admirably recorded. Nicola Zerola, tenor, will satisfy his many admirers with a record of that stirring number, "Vesti la giubba" from "Pagliacci" (87,064). Evan Williams, whose tenor voice is a perfect delight in American songs, is represented in the August list with D'Hardelot's "Be-

MUSICAL EXPORTS TO CANADA.

Consul Deedmeyer, of Charlottetown, in a Recent Report Offers Some Interesting Information Regarding the Volume of Musical Instruments Imported into That Country from the United States, Equalling Nearly Eighty-five Per Cent. of the Total.

Consul Frank Deedmeyer, of Charlottetown, says that Canada's music is distinctively American. A new American popular air is at once in favor there. This leads him to discuss its effect on the purchase of instruments as follows:

Last year printed music and music for mechanical players was imported to the value of \$154,073, of which the United States supplied \$125,088. In 1909 the Dominion imported musical instruments at a cost of \$845,831, while in 1900 these imports were only \$390,407. Of the total imports in the last fiscal year those from the United States amounted to \$705,033, Germany coming next with \$76,544.

A table follows showing the kinds of instruments imported and their values:

Articles.	Value.
Brass band instruments and bagpipes.....	\$41,832
Cabinet organs	13,696
Parts of organs	17,192
Pipe organs	3,271
Phonographs, gramophones, graphophones and finished parts thereof, including cylinders and records	224,129
Mechanical pianos and organs	52,562
Planofortes	199,061
Parts of pianos	149,190
Keys, strings, wires and other parts	48,427
All other musical instruments	96,971
Total	\$845,831

In the Province of Prince Edward Island, as in all other portions of the Dominion, the introduc-

tion of pianos, organs, phonographs and graphophones is becoming quite general. Mechanical instruments are in great favor. In the homes of the farmers the organ is being displaced by the piano. The high class American piano finds a ready sale.

cause" (64,133). The expression and feeling which Williams puts into this, as well as all his songs, is a delight. Fritz Kreisler, who is to make records exclusively for the Victor, is represented by four numbers, which, as may be expected, are played with rare charm and beauty of tone—Brahms' Hungarian Dance in G Minor (64,131) and Bach's Gavotte in E Major (64,132), The Swanee River (64,130) and Smetana's Aus der Heimath (74,172). In the Purple Label list there are two new Lauder records, a Scotch song, "Jean MacNeill" (60,021) and one of his latest compositions, "The Blarney Stone" (70,018). Jack Norworth is heard in "Sadie Brady" (60,022), and both Norworth and Bayes sing "Rosa Rosetta" from "The Jolly Bachelors" (70,019). In the full Victor list, which appears elsewhere, there are also to be found some excellent numbers in the body of the list, notably two ballads (5,781-31,791) by John B. Wells, tenor, which are beautifully enunciated and sung and well recorded. Gems from "Mlle. Modiste" (31,970), sung by the Victor Light Opera Co., with orchestra, will also strike the fancy of the general purchasing public. In the list of double-faced records there are some splendid numbers listed for August. It is difficult to discriminate in looking them over, for the combinations are of unusual excellence, and certainly form a very attractive proposition.

tion of pianos, organs, phonographs and graphophones is becoming quite general. Mechanical instruments are in great favor. In the homes of the farmers the organ is being displaced by the piano. The high class American piano finds a ready sale.

GLAD TO GREET MR. BEECROFT.

The World had a pleasant chat recently with Clement Beecroft, manager of sales of the Tea Tray Co., Newark, N. J., who is building up a very successful business in fire apparatus. The standard of the goods may be considered from the fact that the Tea Tray Co. are supplying the fire departments of many leading cities of Great Britain and Ireland, as well as leading cities in the United States, with their apparatus. While in a large measure out of the talking machine field, Mr. Beecroft, however, keeps in close touch with developments, and occasionally drops in to see his old friends, who are glad to greet him.

The literature issued by the Victor Talking Machine Co., Camden, N. J., comes in for much deserved praise on the part of their dealers and distributors. One that is particularly commended, and recently issued, deals with machines and parts. Each part, down to the tiniest nut and screw, is illustrated, described and numbered, and, being interchangeable, there is no trouble in having anything missing supplied at once. The catalog is well written, clearly printed on good paper, and is regarded as a valuable contribution to the long line of valuable publications pertaining to the Victor product.

FROM OUR EUROPEAN HEADQUARTERS

69 BASINGHALL STREET, LONDON, E. C., W. LIONEL STURDY, MANAGER.

TRADE HAPPENINGS IN LONDON.

Trade Has Shown a Marked Improvement in the Past Few Weeks in London and the Provinces—Export Trade Is Also "Looking Up" and the Outlook Is Also Satisfactory—The Tresor Motor Is Popular—Important Copyright Decision—Klingsor Works Getting Into Shape—British Sonogram Co. Affairs—Gramophone Co. Progress—New Amberol Styles—Louis Sterling Off to the States—Fairy Tales on Records—Some Cheering News from All Provincial Centers Regarding the Outlook for Talking Machine Trade—Conditions Show Substantial Improvement—All the News of the Month in Detail.

(Special to The Talking Machine World.)

London, E. C., July 2, 1910.

This last few weeks London and provincial trade has shown a material improvement generally, and not more so than in this industry. A few of the smaller companies are experiencing a quiet time, but in other directions quite unusual activity for the time of year is apparent. Perhaps this is not a little due to the introduction of a real summer line of machines—the hornless type, which being so convenient of transit either by hand or on the back of a cycle, etc., have won instant popularity. They are selling in thousands, making new converts all along the line, and generally doing more for the dealer's summer record trade than any other invention or new departure seen this last two or three years. Yet some traders—cycle dealers, for instance—remain deaf to the possibilities of this new source of business. Think they are going to bother about talking machines in the summer? No, not while cycles are selling! That's their way of looking at it, but cycle purchasers are few these days of wet and gloom experienced this last week or so. Then, of course, they wish they hadn't so much neglected the record business. Just such an instance came my way the other day. I sympathized, pointed out his mistake, and in the finish he adopted the good policy of making a window display of machines and records there and then. All cycle dealers would be studying their best interests by following this example.

The home manufacturers and agents are finding the present a good time for export business, and it is worthy of note that more attention is being devoted to the local conditions of colonial markets. Only by studying the buyer's interest, however vexatious it may appear at times, can manufacturers here expect to hold their own with our continental friends, who, it must be admitted, but reap the reward of hard work and enterprise. Export trade generally is rapidly

increasing each week, and there is now a splendid opportunity to invest money in advertising, with every prospect of good returns.

New Companies.

Clarion Record Co., Ltd., phonograph record manufacturers, etc.; capital £100 in £1 shares. Registered office, The Point, Wandsworth, London, S. W.

Grandiphone Syndicate, Ltd., capital £12,000; 11,000 preferred shares of £1 each and 20,000 Is. preferred.

Cenar (Ltd.), musical instrument dealers. June 28; £500, in £1 shares. 2 Imperial buildings, Dale End, Birmingham.

Messrs. Lockwoods' Offer.

In our columns this month Messrs. Lockwoods offer to colonial and foreign talking machine traders a new all-British needle of the finest tone-reproducing quality. It is of the bull nose pattern and may therefore be relied upon for that full and loud reproduction so much desired by our friends over the seas. A time-saving convenience is the quoting of prices for quantities, and a line to the sole shippers, Cullum & Best, 91 Finsbury Pavement, London, E. C., will receive prompt attention.

What Is the Cinch?

A good deal of comment, not to say curiosity, is ripe in trade circles concerning the above. "Lock out for the coming of the cinch." Just those words only comprised the announcement and it is really extraordinary what a lot of interest they have aroused. Almost every acquaintance whom I have met this last day or so put the query, to which I promptly replied, "Wait and see." But that wasn't good enough, so, rather than outrage the memory of our old friend G. W., who himself might have found the situation embarrassing, I—well, there was always someone to call upon, you know.

Another Amberola Model.

In referring to the satisfactory trade reception of the new Amberola machines, the National Phonograph Co. have announced their intention of introducing another model, which is, they say, of even more handsome appearance than the oak or mahogany styles. The cabinet of the new model will be constructed of Circassian walnut, the retail price of which is to be 50 guineas. In connection with the marketing of Amberolas, the company lay special emphasis in urging factors not to send any of these high-grade instruments to dealers on approval. It is against the best interests of traders, as a machine which has been returned is usually in a more or less damaged condition, and its sale value depreciates with each time it is sent out. Special attention is drawn to a source of trade untapped by a good many dealers, who, if they only cultivated a trade in foreign records issued by the

National Co., would probably be surprised at the result. The usual monthly (August) list of records, as will be seen, contains some particularly fine selections of a popular nature: "Valse des Fleurs" (Tschaikowsky), National Military Band; "Those Lovely Bells," Geo. Formby; "Killarney" (Balfe), Miss Violet Oppenshaw; "Simon the Cellarer" (J. L. Hatton), Peter Dawson; "Druid's Prayer" (Dawson), Alexander Prince; "What's the Good of Sighing?" (Arthurs and Leigh), Ben Albert; "My Sweetheart When a Boy" (Wilford Morgan), Ernest Pike; "They Can't Find Kelly" (Merson), Miss Florrie Forde; "Ha! Ha! Ha!" Arthur Osmond; "Les Cloches de Corneville" (Planquette), Alhambra Orchestra; "Kukuska—Russian Peasant Dance" (Lelard), Sousa's Band; "Who Will Care for Mother Now?" (C. Carroll Sawyer), Will Oakland and chorus; "Favorite Airs" from "The Arcadians" (Lionel Monckton), Edison Comic Opera Co.; "The Post in the Forest" (V. Schaffer), Gustave F. Heim and Waldhorn Quartette; "Blue Danube Waltz" (Strauss), American Standard Orchestra; "I'm Afraid of You" (Albert Gumble), Manuel Romain and chorus; "Sunshine in My Soul" (John R. Sweeney), Edison Mixed Quartet, and "March Religioso—Gospel Hymns," Edison Concert Band. Amberol grand opera records: "Thais—Alexandria!" (Massenet), in Italian, Giovanni Polese; "Torna a Surriento" (Curtis), in Italian (dialect), Carmen Melis; "Le Cid—I leurez mes yeux" (Massenet), in French, Marguerita Sylva, and "Prophète—Ah! mon fils" (Meyerbeer), in French, Marie Delna. Standard records: "Sexton Blake" (H. Christine), National Military Band; "The Dawn" (Guy d'Hardelot), Miss Amy Evans; "Cheer Up, My Highland Lassie" (Bennett Scott), Peter Dawson; "Sequels" (Lipton and Hargreaves), George Formby; "Salut d'Amour" (Elgar), cello solo, Jean Schwiller; "That Broke Up the Party" (David and Lee), Arthur Osmond; "Two Eyes of Gray" (Daisy McGoon), Ernest Pike; "Have a Bit on the Girl," Miss Florrie Forde; "I Wonder If You Care" (Bennett Scott), Stanley Kirkby; "The Navy Two-Step" (H. E. Pether), National Military Band; "Knights of Columbus March" (Harry C. Buser), New York Military Band; "Austrian Army March" (Eilenberg), United States Marine Band Orchestra; "Daisies Won't Tell" (Anita Owen), Manuel Romain; "Mack's Lullaby" (Andrew Mack), Will Oakland; "There Is a Fountain" (Lowell Mason), Edison Mixed Quartet; "If You Love But Me," Victor Herbert's Orchestra; "Mr. Editor, How Do You Know?" (Edna Williams), Miss Ada Jones, and "Dear Old Moonlight" (Tom Lemonier), Peerless Quartet.

32-6 Worship St., London, Eng.

FROM OUR LONDON HEADQUARTERS—(Continued.)

Odeon records made by "The Follies," Barnett Samuel & Sons, Ltd., have issued some most attractive window posters in colors, in addition to other effectively printed publicity matter upon the subject. I have also received the latest lists of Fonotopia, Odeon and Jumbo records—for which this enterprising firm have the sole selling rights—and notice therein some very up-to-date selections of a popular character. If ordered in not less than quantities of 30,000 dealers will be accorded the privilege of having their name and address, or other matter, printed on the boxes of Dulcephone needles free of any additional charges. Instructions should be given now to insure delivery at the beginning of the season. Barnett Samuel also draw attention to the fact that all genuine Odeon needles are packed in colored metal boxes, each of which is enclosed in a patent transparent paper casing sealed with a red seal. Purchasers are thus assured of what they buy.

Call Meeting of Creditors.

With liabilities of £1,468, estimated assets £760, Payne Bros. (J. Lock), of Boreham Wood, have had to call a meeting of creditors, whereat it was decided to wind up the estate under a deed of assignment to Mr. Corfield, of 119 Finsbury Pavement, E. C. Others in trouble are Arthur H. Watts, of King street, Great Yarmouth and Church Road, Gorleston, and Robert William Newson, talking machine dealer, Old Market Plain and Tennyson Road, Lowestoft.

A New Disc Record.

A new disc record, emanating from a well-known London house, will shortly be submitted to my colonial and foreign readers.

Anent the Tresor Motor.

The "Tresor" motor, particulars of which I gave last month, has won instant popularity among talking machine factors and dealers in all parts of the kingdom. Heavy orders have been placed, and this is the quiet season; is index of good things to come. The "Tresor" is also in

much favor with colonial and foreign traders. Its construction is different from any other motor, and that difference is the foundation of its success!

H. J. Cullum Returns from America.

H. J. Cullum, of the well-known factoring house of Lockwoods, is back again in harness after a seven weeks' trip abroad. Visiting Barbadoes, Trinidad, Cartagena, Colon and Jamaica, he finally completed the journey home via New York. Seen by your correspondent, Mr. Cullum expressed great enthusiasm regarding the talking machine trade situation in the States. He said: "I find trade conditions there altogether different from what prevails on this side. The exclusive system of trading in conjunction with a general desire to maintain prices enables dealers and factors to work upon a profitable basis, with considerably more independence of feeling than is the case in England. After visiting several stores in different centers, my impression is that a general state of prosperity exists in the American talking machine trade, and I only wish that their conditions of trading, which to a great extent makes for that prosperity, were the same in this country. Whereas in the States it is common to find storekeepers making a profitable living solely out of machines and records, here I do not suppose there are half a dozen dealers in the whole country who can exist by this industry alone."

Ruling on Copyright.

According to a Telegraph correspondent from Paris, no author's copyright in the case of plays acted in dumb show by the cinematograph apparently existed until the other day, when the Court of Cassation, for the first time, laid down the legal precedent on the point. Henceforth to "produce a play on the bioscope without the dramatist's authorization" will be an infringement of copyright. It was not so, it seems, before. One peculiarity of the decision of the Supreme French Court is that the particular playwright who was the plaintiff loses his case,

while the rights of playwrights in general are protected. M. Georges Courteline thus suffers defeat himself, but wins a victory for his profession. The author had observed at a cinematograph show a series of pictures which, to his mind, were a reproduction of a famous farce of his called "Boubouroche." He brought an action against the proprietors of the show, and alternately won and lost it in successive courts. It has come up to the highest court, and he finally loses it there, but on the ground of fact only, not in the matter of principle. The Court of Cassation non-suits him because, in the eyes of the law, the bioscope scenes were not a reproduction of "Boubouroche." The likeness which appeared to the author failed to strike the judges. But, on the other hand, had the resemblance been sufficient in the court's view, M. Courteline would have won his case. While rejecting his claim, the judges decided that every author is entitled to protection against the reproduction of the scenes of his work on the cinematograph without words. The plot and its situations belong to him obviously, as well as the dialogue, and to tell in dumb show, by means of moving pictures, a story which is his property will henceforth be as flagrant piracy, legally, as stealing his words.

The New Home of the Klingsor.

The new home of the Klingsor Works, in Tabernacle street, this city, is rapidly getting into shape for the systematic handling of a large business, and indeed so far advanced was the work of fitting up the interior that I am now able to give a short description of the premises. Situated upon the ground floor are the show-rooms and offices. Here there is ample room for an effective display of the many Klingsor models, of which one or more of each were on view. Their imposing appearance is bound to create a good impression in the minds of trade visitors. The first floor is devoted entirely to the purpose of a workroom. Ascending, we find

FROM OUR LONDON HEADQUARTERS—(Continued.)

the second floor nicely arranged as recording rooms, while further up, on the top floor, is apportioned out the stock rooms, which, by the way, were crowded with machines, motors and accessories. I should have mentioned that for convenient handling of the records large racks have been fitted up on the ground floor. The premises are really two buildings in one, and though of spacious extent, there is little or no room to spare. Before leaving I had the pleasure of hearing a few of the new "Polyphon" records, the price of which has now been fixed at 2s. 6d. My impression is that the all-round quality of these discs is excellent. Great care had been taken in the recording, as was demonstrated by the clear enunciation of the vocal selections, and of the instrumental—good volume and brilliancy. Next month I shall hope to give a list of titles and artists. Traders in all parts of the world should in the meantime send a card to the Klingsor Works for particulars.

The Bankrupt British Sonogram Co.

In giving notice of his intention to apply for release, H. Brougham, senior official receiver and liquidator, has sent me a statement of affairs to date, from which it is shown that according to the company's statement the assets should have realized £8,555 11s. 1d. The actual receipts amount to only £334 5s. 4. Of this sum £149 17s. 3d. represents total costs of the liquidation; £11 12s., from claim for telephone charges, payable in full, £172 10s. 10d. among 10 preferential creditors—dividend of 16s. in the £ on £215 13s. 11d., with balance 5s. 3d., makes a total of £334 5s. 4d. As stated in the official receiver's observations, the company never completed the purchase of the letters patent or the license for the exclusive use of Hans Knudsen's recording machine, which stood at the valuation of £3,000 and £5,000, respectively, in the statement of affairs. These properties were not therefore available as assets in the liquidation. The result of the official receiver's investigation was reported to the court on December 4, 1908, when an order was made for the public examination of the directors. The evidence obtained disclosed grounds for claims against the directors, but as three of them were impecunious and the address of the fourth could not be ascertained, it has not been possible to recover anything. As the amount realized is only sufficient to satisfy the costs and expenses and to pay a dividend of 16s. in the £ on the preferential claims, there is nothing for the unsecured creditors, and the official receiver proposes to close the liquidation, and thus ends one of the most novel attempts to introduce the co-operating system of trading in this industry. The idea was not entirely without merit, but as in other instances warped enthusiasm won the day against lack of sufficient capital, with the inevitable result—bankruptcy. Out of the ruins there shines a moral. May it act as a deterrent to others, for in the talking machine industry an important part of the foundation of success

is an extremely long purse.

Gramophone Publicity.

In addition to their many publicity schemes for dealers, the Gramophone Co. show a persistent enterprise in advertising their goods through the medium of large spaces in the best newspapers. One does not expect to find manufacturers taking whole pages in June, the so-called off season, and it was therefore all the more a pleasure to see the whole front page of the Daily Mail—the paper with the largest circulation—occupied by the Gramophone announcement. The company evidently mean their agents to have a good time, and needless to say, Gramophone sales are excellent. The next balance sheet will surely gladden the hearts of the shareholders.

Special 10-Inch Rena Records.

The Columbia Co. announce a special issue of a ten-inch Rena record of "Flanagan" and "Bridget McCue," two big song hits of the music hall stage, and which will no doubt figure prominently in the 1910-11 pantomimes.

Desired Name Restored.

A recent application in the courts had for its object the restoration to the register of the name of the Indestructible Record Co., Ltd. The registrar had struck out the name only after compliance with the regulations as to notices and publicity of the same in the London Gazette. An order was made in the Palatine Court for the sale of the whole of the company's assets, consisting mainly of American patents. The purchaser had difficulty in making good the validity of the assignment, and the judge was asked to restore the name to the register so that the company could be wound up, and thus legalize the purchasers' title to the patents. An order was therefore made declaring valid the assignment of the patents.

Gramophone Co. Gleanings.

A new Gramophone needle outfit, comprising 200 each of the loud, medium and soft tones, has just been issued. In July the company promise to issue some wonderful new records by Mme. Melba, made by the new recording process.

Foremost among manufacturers to support their agents in every possible way, the Gramophone Co. have just recently formulated an interesting little sales scheme which should prove of incalculable value to dealers at this time of the year. In a letter emphasizing the fact that summertime is Gramophone time, the company not only suggest but offer the practical means whereby dealers may respectfully approach possible would-be customers in their district. Tactfully written specimen letters to send out, attractive window cards, booklets, and other forms of publicity literature are all at the service of Gramophone agents free of charge. As a direct result of this liberal policy it is not surprising to learn that Gramophone business is progressive "all the time." The new monthly impressions—for July—comprise the usual variety of quality selections, and are as follows: By the Band of H. M. Coldstream Guards—12-inch rec-

ords: "Falka," selection 2 (Chaussaigne); "Genevieve de Brabant," selection (Offenbach); and "Golden Legend," choral epilogue (Sullivan). Dance music—Hff's Orchestra, "Way Down Colon Town" (Hoffmann); "La Petite Bonne Femme"; "The Girl in the Train," waltz (Leo Fall). 10-inch—Radic's Tzigane Orchestra, "The Girl in the Train," waltz (Leo Fall); "The Girl in the Train," march (Leo Fall); "The Girl in the Train," "On the Trail" (Leo Fall). 12-inch records—Viennese Orchestra, "The Girl in the Train," selections 1 and 2 (Leo Fall). 10-inch records—"Because" (Guy d'Hardelot), John Harrison; "Auld Lang Syne," Evan Williams; "I Hear You Calling Me" (Marshall), John McCormack; "Ho! Jolly Jenkins!" (Sullivan), Harry Dearth; "Come Over the Ferry," The Minster Singers; and "The Waterfall Polka" (Stobbs), xylophone, W. H. Reitz. 12-inch records, "Rejoice Greatly" (Messiah) (Handel), Hubert F. G. Langley; "Swallows Waltz" (Del Acqua), Miss Lucy Marsh.

A Subject of General Interest.

A matter of great interest to traders generally cropped up in the courts the other day. Plaintiff, it appeared, posted a letter with a postal order enclosed for 7s. 6d., but somehow it miscarried in the mails, and was subsequently traced to defendant, who had accepted it bona fide from a person unknown in exchange for goods. In giving judgment for plaintiff, the magistrate said that it did not appear to him that any general practice had grown up to give postal orders the character of negotiability, and that persons dealing with these orders as if they were cash should take note of the risk they ran in case the person from whom they were accepted should prove not to be the true owner, as in this instance.

Louis Sterling Visiting America.

To the accompaniment of hearty good wishes from a host of friendly traders who were on the platform at Euston to bid him bon voyage, Louis Sterling, British manager of the Columbia Phonograph Co., left for Liverpool to catch the boat sailing June 21 to the States. The northern factors, too, assembled in force to add their quota of wishes for a real good time. It is over seven years since Mr. Sterling saw his people, and his trip is therefore mainly private. But for all that he intends to look up his old friends in the trade, and it is more than probable a visit to Columbia headquarters at Bridgeport is contemplated. Mr. Sterling will make New York his headquarters, and is expected to arrive home again in a month to six weeks' time. I join my friends in wishing him a speedy and safe return.

Latest List of Rena Records.

Some fine titles appear in the July list of Rena records, of which the following are characteristic: 12-inch—"Star of Love" (Tellier), and "Scenes That Are Brightest" (Wallace), violin, flute and harp trio; "Praeludium" (Jarnfelt), and "Chant Sans Paroles" (Tschaiikowsky), Court Symphony Orchestra; "A Sergeant

The Needle of To-day—The Needle of the Future

of the Line" (W. H. Squire), and "Four Jolly Sailormen" (Edward German), Robert Howe. 10-inch, "Don't Be Alarmed!" (Geo. Formby), and "Take a Wife" (Geo. Formby, Arthur Peel; "Cubanola Glide" (Harry Von Tilzer), Prince's Orchestra, and "I've Got Rings on My Fingers," two-step (Maurice Scott), Court Symphony Orchestra; "selection from "The Girl in the Train" and waltz from "The Girl in the Train" (Leo Fall), King's Military Band; "Rock Me to Sleep, Mother" (Ernest Leslie), and "When All Was Young," from "Faust" (Gounod), A. Stewart Holt; "God Be with You" (Tomer), Trinity Glee Singers, and "Is It Well with My Soul?" (Bliss), Stanley and Gillette; "Red Clover" (Theo. Morse), Stanley and Gillette, and "My Wife's Gone to the Country, Hurrah! Hurrah!" (Snyder), Collins and Harlan; "If I Had the World to Give You" (Clarendon), and "I Wonder If You Care" (Bennett Scott), Arthur Blackwell.

Steamers to Call to Southampton.

Interest has been aroused by the announcement that the steamers of the Thomson Line to Quebec and Montreal will in future call at Southampton outward bound. The service will be inaugurated in August by the new liner "Tortona." Hitherto there has been no direct communication between Southampton and Canada.

Fairy Tales for Children.

In addition to the usual monthly list, the Twin Record Co. have issued a splendid selection of fairy tales for the children by that versatile entertainer, Albert Whelan. These comprise just the stories children love to hear over and over again, "The Three Bears," "Puss in Boots," and "Little Red Riding Hood" being fair samples. Harassed mothers, and fathers, too, for the matter of that, will now find the "Twins" more than ever a blessing, despite the name, and we can imagine the eagerness with which these records will be purchased. Another entertaining series by the same artist includes two selections—"Death of Little Nell" and

"Little Emily," from the works of Dickens.

Some Recent Zonophone Numbers.

The following special titles from the current Zonophone list are particularly worthy of mention as being of that nature which are likely to prove real good sellers: 12-inch—"Even Bravest Heart" (Valentine's song from "Faust") (Gounod), sung by Harvey Dearth. 10-inch—"All's Well!" (Braham), Ernest Pike and Peter Dawson; "When the Lights Are Low" (comic), Mark Sheridan; "The Grenadiers' Waltz," the Peerless Orchestra; "Twickenham Ferry" (Marzials), Madame Deering; and a superb grand opera record, "La Habanera," from "Carmen" (Bizet).

Why Organ Thumpers?

How organists came to be called organ-thumpers was explained by T. Crawford during the course of his speech to the Incorporated Society of Musicians. It appears that in the early days organ keys were made to a width of five or six inches, and were played by a blow with the clenched fist. Hence the description organ thumper.

How Scott Heard His Own Song.

A somewhat novel experience has to be related in connection with the Rena record of "I've Got Rings on My Fingers." The composer of this merry jingling ditty, Maurice Scott, is an Englishman, but he wrote it for the American market. It was duly introduced into a very popular musical play on Broadway, where it became a leading number. The result was that the composer himself had never heard the song sung since it was written. Receiving American advice that the song was a big hit, the Columbia Co. promptly made it on a Rena record and invited the composer to hear it. In this way it occurred that Mr. Scott first heard his own composition sung in this country on the now exceedingly popular Rena record of it. This is probably the first instance of its kind.

Song from Fall's New Opera.

"The Girl in the Train," the new Vaudeville

Theater production by the composer of the music of "The Dollar Princess," is said to be as tuneful a play as Leo Fall has yet produced. On Rena records this month we observe the "Girl in the Train" waltz and a selection from the play listed on one double record, played by Kings Military Band.

Anent Radio-Telegrams.

The following official notification has been issued by the post office: "Radio-telegrams intended for transmission to ocean liners through post office coast stations in the United Kingdom are now accepted with simplified addresses, consisting of the name of the addressee and the name of the ship, with the addition of the word "wireless," thus: "Jones, steamship "New York,' wireless."

Under Exclusive Contract.

Albert Whelan, one of the popular favorites on the vaudeville stage, and who makes a specialty of singing Lauder's songs with great success, is under exclusive contract to sing only for Jumbo records.

PROVINCIAL NOTES.

From information to hand talking machine trade conditions in the chief provincial centers indicate a most promising outlook for the coming season. General business is improving very considerably, and as a direct consequence the various trade unions are able to report a satisfactory decline of unemployment. Labor disturbances, too, except in a few directions, are practically non-existent. This happy state of affairs naturally has particular interest for all those handling musical instruments, dealers are more optimistic, and while the present demand is not over active, there is a welcome return to that feeling of confidence which encourages a man to fight competition more determinedly than ever.

In the Midlands trade for the time of the year is regarded as being in a fairly satisfactory condition. Zonophones, Twin, Rena and Beka records are in good demand, while on the cylinder

"KLINGSOR" HORNLESS TALKING MACHINES

The Only MUSICAL Instrument in the Talking Machine Line

☞ The ideal Entertainer at home. The steadily increasing sale of our machines speaks for their quality. The only machine built on entirely scientific principles, doing away with the tinny sound and reducing the scratch of the needle to a minimum.

☞ A satisfactory machine without good records is not much use and therefore you should stock our

LONDON, E. C. ENGLAND

FROM OUR LONDON HEADQUARTERS—(Continued)

side Edison business is keeping up exceedingly well.

In Yorkshire there is room for improvement. Unfortunately some little labor trouble is being experienced in the woolen industry owing to the mill hands demanding an increase of wages and better conditions of working. This is, however, of not very serious importance, and no doubt matters will soon blow over, although it must be confessed that talking machine traders are not enjoying the amount of business that should exist.

Lancashire way trade is improving, despite the fact that a good many cotton mills are not working full time. The more enterprising Manchester and Liverpool factors manage to maintain a fair trade, and are now considering their plans for next season; indeed, some of the London manufacturers are already in receipt of advance orders. Christian Duwe, of High street, Manchester, has been devoting special attention to mainsprings for all kinds of machines. In his new catalog there is listed over 40 models of different sizes, in addition to which information is given respecting prices of governor springs.

Another enterprising Manchester firm of factors—Robinson's, of Deansgate—in order to cope with their increasing trade in towns and villages outside, have found it necessary to open a new branch in Stockport, at 53 Princess street. In addition to every kind of accessory they hold a good stock of Beka, Favorite, Zonophone, Twin, and other records, and make an effective display of the Reprophone and Klingsor disc instruments. Reza records would appear to be selling well in Lancashire, and I learn that a special issue of "Pretty Little Girl from Nowhere" is in great demand.

In the little principality of Wales, Edison records are being especially featured by the dealers, who show practical appreciation of the company's enterprise in issuing recently 12 new Welsh selections on the Amberol by distinguished

artists. Charles Kinshott, the popular Cardiff dealer, has been conceded by the city council the privilege of giving two-hour concerts on the

Majestic Pathèphone in the parks this summer. It is much appreciated, judging by the large audience always attracted.

DECLARE GRAMOPHONE IS A GENERIC TERM

As Applied to All Disc Talking Machines—Decision Handed Down by Justice Parker in Suit of the Gramophone Co. to Compel the Registrar to Issue a Trade-Mark—Hearing Lasted Six Days—Important Witnesses Heard on Both Sides.

(Special to The Review.)

London, Eng., July 6, 1910.

This was an action in the High Court before Justice Parker, who had to determine whether or not the word Gramophone is generic to all makes of disc records and machines. The Gramophone Co. claimed the exclusive right to use the name, and sought to have it registered as a trade-mark. This was refused by the registrar, on the ground that the word gamophone is in general use as applied to all talking machines. Hence the company's action to enforce their alleged right. The hearing lasted fully six days, during which time the court was crowded by manufacturers, factors, jobbers and dealers from all parts of the country, who displayed a keen interest throughout the whole proceedings. Today, July 6, Justice Parker rendered a decision sustaining the registrar and against the Gramophone Co.

Counsel—For the Gramophone Co., Walter, K.C.; Mark Romer, K.C., and Hunter Gray. For the registrar, the Solicitor-General, Sir Rufus Isaacs, K.C., M.P., and C. H. Sargant. Opening the case for plaintiffs, Mr. Walter entered into a lot of historical details and gave quite a biographical sketch of the talking machine trade since its commencement. It is unnecessary to go into his remarks, as all the interesting points were raised in the evidence, of which the following is a brief summary, as the full text would occupy a dozen pages of The World.

PRESIDENT WILLIAMS TESTIFIES.

Edmund Trevor Lloyd Williams stated he was chairman of the board of the Gramophone Co., and had been associated with the talking machine business since 1897, in which year he acquired, in conjunction with Barry Owen, the European rights in the Berliner patent of 1887. He identified an article in the Sound Wave on the phonograph, as the original form of sound recording machine. It was the first ever known, and was that of Leon Scott. The next thing in this line was the original Edison phonograph of Edison's in 1876. That was a tinfoil indentation. The next was in 1886, when Edison and Tainter invented a further modification, a "graving" on wax. That was a cylinder, but he believed the patent was for disc or cylinder. The phonograph then was practically that of today, and was put on the market by Edison and his assignees—American companies.

Mr. Williams said the invention acquired in 1897 was that of Emile Berliner and was for tracing in non-resisting semi-fluid a thin line representing a sound wave. The patent applied to both disc and cylinder. Prior to 1897 a few machines were imported, sent by the American Gramophone Co., which was the licensee of Emile Berliner. There was no substantial business in those goods. A considerable business of a certain nature was being done in phonographs, but not the cheap machines of later date. They were dealt with by the Edison Bell Phonograph

Co., who were the assignees of the Bell-Tainter patents, which were the Edison patents. They were sold in cylinder form only. Witness' company commenced to trade at once on securing the European rights of the Berliner. The business grew, and in 1899 was converted into a limited liability company—the Gramophone Co. In 1900 the company was reconstructed and made into the Gramophone & Typewriter Co., after they had acquired the Lambert typewriter. In 1900 they abandoned the Berliner principle and adopted the original Edison scheme of graving in wax. Since then they had never made discs by any other method, or machines for the graving method. Witness had never been able to discover that anyone had since used the Berliner method. The original phonograph patent expired in 1900, and then the Columbia Phonograph Co. came here and sold their graphophones in cylinder form only. Absolutely every machine put on the market was characterized by its own name. Obviously all are graved in wax, some with the phone-cut—hill and dale—and others, like the gramophone record, sideways or zigzag cut.

When Mr. Williams was shown an advertisement in a trade paper in 1903, announcing that the Gramophone Co. intended to institute legal proceedings against any person using the word "gramophone" for goods not manufactured by the company, with particulars of an injunction against a certain firm, he said their company always took proceedings or got apologies for this class of trading. Among their company's advertisements was one: "There are many talking machines, but only one 'gramophone,'" which had been a stock advertisement for many years. No dealer of any note had prior to May, 1910, advertised other makes of machines under the word or in connection with that of gramophone. In one or two cases complaint had been made and the practice at once stopped.

On further examination Mr. Williams said

the word phonograph was generic, and naturally that would apply to all makes. He would not accept the suggestion that gramophones was also. Gramophones refers only to their own make. All makes referred to phonographs, graphophones, gramophones, etc., not necessarily to gramophones only. In a small number of cases Mr. Williams admitted that the word gramophone was used in the same way as phonograph. Occasionally, at the early stage of their business, his attention was called to the fact that there were other machines or manufacturers' instruments being called gramophones. He had not been managing the business. He was chairman of the company and things were brought to his notice at board meetings. The information given in his evidence was in the main derived from information supplied to him. At present there were two joint managing directors. At the time of putting in the application the managers were Barry Owen and then Theodore Beerbohm. The latter had retired and left the company. He remembered an application for the registration of "gramophone" for matches.

His company opposed the application, but he could not carry his memory back to say whether it was on the ground that they were entitled to the use of the word. Mr. Williams did not remember that the registration of the word was allowed, or did he know that their opposition was unsuccessful. Their previous application to register was under the old act. He did not think there had been any other applications, but would not say positively. He believed they had tried to register the word abroad, but did not know in what country. He believed in several. He did not remember the advertisement in a trade paper in 1903 headed, "Warning, the gramophone is not a generic term," and had nothing to do with it.

ALBERT W. GAMAGE'S OPINIONS.

Albert Walter Gamage, managing director of A. W. Gamage, Ltd., said they dealt in talking

machines among numerous other articles. The first disc talking machine he heard of was the gramophone. He had heard of the phonograph, but this was the first disc. It would be about ten or eleven years ago. It was the only disc machine in the country. He thought the next was the Columbia, which was called the graphophone. After that other disc machines came on the market in large numbers. They had all distinctive names, except some that were left for the buyers to put their own names on. He had never heard of the word gramophone applied to any disc talking machine than those of the applicants. He had done a large business in them, as well as in talking machines also. In the case of a dealer, if he understood his business, he would be under no misapprehension as to what the word gramophone meant. Gramophone records meant those of the applicants, and he had never heard of that word being attached to any other make. Their machines were the best known in the market. The gramophone was the first disc machine.

The Solicitor-General said it was dishonest to use the word gramophone on machines not made by the Gramophone Co. He had seen a great number of other firm's lists, but they are grouped under different names.

To the Judge—They still had gramophone needles, but they are made by the Gramophone Co. He had no knowledge of any other firm other than the Gramophone Co., who had by publicity and advertisements brought the name prominently before the public.

GEO. MURDOCK'S EVIDENCE.

George Murdoch said he was a director of J. G. Murdoch & Co., manufacturers of musical instruments and talking machine distributors. They had traded with the Gramophone Co. since 1898. That name had not been used by any other firm to describe their goods to his knowledge. As a rule distributors like themselves liked to register their own names. All the trade knew ex-

actly what they want when they order a gramophone. A number of other witnesses were examined to the same purport, and at the conclusion Justice Parker said: "It looks at present as though the evidence is that as far as the trade is concerned the meaning of gramophone is a particular instrument made by a particular company, but as far as the popular way of using the word is concerned it is not confined to it."

EXAMINATION OF LOUIS STERLING.

Louis Sterling, chief manager of the Columbia Phonograph Co., said he first heard of the Gramophone Co. in the States, before he heard the word. He knew nothing about the patents, as he was not in the talking machine business. He knew it was a similar type to the Victor sold in the States with a disc instead of a cylinder. About the year 1900 the word used to denote talking machines, he should think, was phonograph. The term could be applied to a disc machine in the same way as graphophone, which is made up of "grapho" and "phone." The two words, as far as their derivation went, were very much the same, he supposed. He only heard in court that day that the word gramophone had got into ordinary use in the English language. He did not agree with the dictionary definition of the word. He took it as a brand of machine, not a type, in the same way as a Broadwood piano is a Broadwood, even though it looks like a Chappell. In his view a cylinder machine manufactured by the Gramophone Co. would be a gramophone if they desired to call it so.

VIEWS OF OTHER WITNESSES.

Another witness said he had never heard any other word than talking machine used by the public to denote disc machines. In reference to Mr. Gamage's statement that "he had heard that people speak of gramophones when they meant ordinary disc machines, but there had been people who did not know the difference between one machine and another," witness said that was practically his experience. The best class of people know exactly what gramophone they want, but with regard to the man in the street, he may call it a gramophone, not knowing what the instrument was. It may have been a phonograph cylinder, disc, or anything, and might be made by any manufacturer.

WHAT AN EDITOR HAD TO SAY.

A newspaper editor observed, under the examination of the Solicitor-General, that there seemed to be some confusion in his mind as to what a phonograph is, what a gramophone is, and what a disc. It is not a form of phonograph, and he could not understand how one could be called a gramophone. He could not really get as far as a professor of psychology. The description of a gramophone was quite right. He could not have done it better himself. They were all constructed on the general principle of the phonograph to a certain extent, so as to come first. The Berliner patent came later. They were all more or less on the same lines. He would not call it a phonograph. The public would be more likely to make a mistake in calling a thing a gramophone which was not

made by the company than the trade. The latter could not make a mistake. He knew the Columbia machine, and also that there was an eternal controversy raging between the rival dealers. To refer to the controversy by calling it phonograph and gramophone was a very useful and convenient form, but he could not understand why they should not have said phonograph and disc machine. It was about the year 1903-4 that he became acquainted with the neutral term talking machine. He did not know any other machine than that made by the Gramophone Co. He had never heard the Columbia disc machine referred to as a gramophone.

A number of affidavits were submitted to prove the specific use of the word graphophone, including quotations from trade paper advertisements, circulars, etc.

GRAMOPHONE AS DEFINED BY SAMPSON SAMUEL.

Further along, Sampson Samuel, assistant manager of the phonograph and gramophone department of Barnett Samuel & Sons, Ltd., said: "From a pedantic trade standpoint the phrase 'disc graphophone' was an absolute misnomer for gramophones that they sold. If they were asked to supply a disc graphophone they would treat it as a request for one of the Columbia machines on account of that misnomer. Witness was giving the trade use and not speaking as regards the public. If he was asked as a trader for graphophones he would sell cylinder machines of the type he described. At all events it would associate his mind with cylinders. In these matters of terminology one had to find out what the man wanted really. There was a difficulty in the trade to know what the trader meant. The trade in cylinder machines had been almost monopolized by the Edison Co. It is just conceivable that there was only the Columbia Co. using the word 'graphophone.' It was a word which the public had never taken to or liked, and anybody could have it for the asking. Shown a document addressed to his firm, 'Kindly send per bearer one or two copies of price lists of your graphophone records and machines,' witness said it did not convey anything to him. There were a number of different constructions that one might put upon it. On counsel asking for the 'authorized version from Mr. Samuel,' witness said it might have been from a dealer who had been told that the word gramophone was the registered trade-mark of the Gramophone Co. It was not from a person who in the ordinary way was asking for a catalogue of gramophones or graphophones. It might have been someone who had in mind the goods of the Columbia Co." Then Mr. Samuel went into details as to buying and selling of gramophones, which is superfluous to repeat.

MR. BALCOMB AND THE AMERICAN TRADE.

A. Balcomb, also of the same firm, said: "During the period, June, 1903, to January, 1904, Barnett Samuel & Sons purchased from C. & J. Ullman (London and Paris) a large quantity of records called Zonophone, manufactured by the Universal Talking Machine Co. The two records, 9-inch and 7-inch, produced were replicas with regard to the branding of many records of both sizes which his company so purchased, and which were impressed with the words 'Zonophone records, the National Gramophone Corporation,' some with and some without the words Universal Talking Machine Co. The National Gramophone Co. was an American company, and at the date of the said purchase had been apparently acquired by the Universal Talking Machine Co. of America, as was evident by the use of the sub-title of the said company. The Universal Talking Machine Co., who, as he stated, were the manufacturers of the said records, and who impressed the word gramophone on the records they manufactured, to the best of his knowledge were competing with the Gramophone Co.

About Needles

One of the most important matters in connection with the development of the talking machine business to-day is the sale of a talking machine needle that is correctly made—made by the greatest authority in the world—a needle, the POINT of which is warranted and which insures the best reproduction for each individual quality of tone—a needle that doesn't wear out the record; that preserves its life, and always gives forth the very best quality of tone that is contained in the record. Such a needle is the

CONDOR

It has the highest and most perfect finish, the smoothest grain, and gives unexcelled satisfaction.

Why not get the customer who purchases a high-grade and a high-priced talking machine to buy needles of the highest quality, such as the Condor?

One cannot be satisfactory without the other.

We shall be pleased to give the fullest information to all interested. Address

and its sister companies. Numerous records of the same brand were largely dealt with in this country.

Mr. Walter, of counsel, said the words "National Gramophone Corporation" had been covered over. They were American, and had warnings about American patents on the back of them.

Witness said he had one without any pattern numbers on. It was handed to Mr. Walter. It had on the back, "Conditions of lease. This record is leased upon the express condition that it shall not be copied or duplicated, and that the full rights of property and possession immediately revert to the Universal Talking Machine Co. upon breach of the above contract."

By the Judge—It was an American system, but he did not think it was on the Gramophone Co.'s records. It was on the Columbia and Edison.

Cross-examined by Mr. Walter—He believed the Universal Talking Machine Co. were dealing in this country. He knew they were certainly manufacturers of Zonophone records. They were manufactured in America. Nearly all the records made in America were of American manufacture. The Zonophone Co. or the Universal Talking Machine Co. was a company which was in all countries. They bought them in London from C. & J. Ullman, who were their agents. He did not know if the Gramophone Co. had exclusive rights in this country. He was speaking of the Universal Talking Machine Co.

Justice Parker—It was in 1903 that is mentioned here, and I think the patent was in 1887.

Witness—I bought these records in 1903.

Mr. Walter—An American patent lasts 18 (sic) years.

Justice Parker—I was thinking of the Berliner patent. Was not that in 1887?

Mr. Walter—Yes; that patent expired in 1901.

Justice Parker—Yes; then they would have no exclusive right in this country?

Mr. Walter—Not at all. It was a matter of private dealing. These questions were not put to Mr. Williams.

Justice Parker, at the close, said that in view of the importance of the case he would reserve his decision.

Mr. Sargent, for the Board of Trade, in opposing the application, said that this powerful Gramophone Co., with its large capital, had un-

doubtedly deliberately set itself to work to change the meaning of the word "gramophone" and appropriate it for its own purpose from the English language.

At the close of Mr. Walters' summing up speech for the Gramophone Co. his lordship expressed the view that, on the trade part of the evidence, the company had a good case. What rather bothered him (his lordship) was this: It seemed to him that while the company had been, on the one hand, impressing upon the trade that the company had got a monopoly in a trade mark to distinguish their goods; on the other hand, the company had been admitting to the public, and telling them in quite strict language, that the word "gramophone" was an instrument, and the two things combined might enable the company to get a monopoly.

As stated on page 19, Mr. Justice Parker decided against the Gramophone Co.

F. L. DYER DISCUSSES COPYRIGHT.

President of the National Phonograph Co.
Writes an Illuminative Letter to Board of
Trade Which Is Making a Report on Amend-
ing England's Existing Copyright Law.

(Special to The Talking Machine World.)

London, Eng., July 2, 1910.

The Board of Trade, which is making a report on the question of copyright, is in receipt of the following interesting and illuminative communication from Frank L. Dyer, of the National Phonograph Co., Orange, N. J., which is published through the courtesy of the secretary:

Sir: The attempts which are now being made to amend the existing copyright law so as to extend the protection of musical copyrights to talking machine records and perforated music rolls are of vital interest to the phonograph and other manufacturers whose output is to be affected by the proposed changes. The Berlin Conference recommended this extension of copyright protection, and if our interests are properly safeguarded we should welcome and support whatever recommendations the committee may make to His Majesty's Government. It is to be remembered, however, that the proposed new right which is to be granted by statute never before existed in this country, it is the creation of a new class of property, and it is

to be created at the expense of industries which have developed along certain narrow lines and in which millions of pounds have been invested. The phonograph industry is now about twenty years old, and since its very birth phonograph records have been made of the current popular music, so that users of the phonograph have been kept in touch with the various musical publications as they came out, just as readers of newspapers are kept in touch with items of current news interest.

The phonograph business, in fact, bears a much closer analogy to the newspaper business than to the music publishing business. Phonographs are of many types, some using cylinders of various diameters, and others discs, but no matter what kind of machine a user might have he has heretofore always been able to obtain for use with his machine the record of any current popular musical work. To materially change the situation—to say to the phonograph manufacturers that they shall not use current music as it may be published, or to so modify the law that one favored manufacturer might be able to monopolize the best part of musical compositions to the exclusion of his competitors—would work a very great hardship on these industries, which have been permitted to develop along this particular line and under the protection of law. Not only have the industries been permitted to develop along this line, but they have actually been importuned to so develop by the music publishers themselves, who, almost without exception in the past, have been only too glad to permit the phonograph manufacturers to use their sheet music and thereby make it popular. If the law had always been broad enough to include and be infringed by the publication of phonograph records, it is clear that the various talking machine manufacturers, in electing to develop their business along this particular channel, would have done so at their peril; but such has not been the law, and, as we have said, this particular development has taken place in a perfectly valid and lawful manner.

Evidence has been presented to the committee showing that attempts have been made on the part of one powerful manufacturer to monopolize a large part of the musical compositions by contracts with various important publishers; a similar attempt was made in the United States, and the recent law in that country was therefore

so drawn as to protect the talking machine manufacturers from the evil consequences of monopolization, by a system of compulsory license. Whether the committee may or may not be satisfied with the sufficiency of the evidence on this point, the fact cannot be denied that such a scheme would not be very difficult to carry into effect. A compulsory license is not repugnant to British institutions; but is included both in the British and Canadian patent laws. The musical composers ought not to object to it, because they will derive a substantial income by the award to them by the Government of a newly created property right. The manufacturers, on the other hand, are vitally interested in the question of compulsory licenses, because otherwise there is grave danger of their industries being irreparably injured.

The necessity for a provision for compulsory license being recognized, the question of the amount of the royalty arises. In the statement of May 20, 1909, presented to the committee by the Gramophone Co., Limited, with practically all of which we fully agree, it is suggested that the amount of the royalty should be 1d. for each record. Such a royalty can be readily paid by the Gramophone Company, whose records sell from 2s. or more up to 12s. or more, but in the case of Edison records, which sell for 1s., the royalty is prohibitive. These Edison records sell to the public for 1s., but they are sold to factors for 6d. The actual cost of the records, including the expense of the artist employed, material used, making molds, obtaining copies therefrom, with advertising, selling and other expenses, is not far from 5d., so that a tax of 1d. per record would be equivalent to a tax of 100 per cent. on the manufacturers' profit. A tax of 1/4d. per record would be equivalent in the case of Edison records to 25 per cent. of the manufacturer's net profit. We see no reason why this tax should not be increased in the case of records selling for higher prices either proportionately or on a maximum and minimum sliding scale.

The United States law provides that the

royalty of 2 cents or 1d. per record shall be paid on all records manufactured embodying copyrighted music, whether sold by the manufacturer or not. This was obviously an oversight on the part of the American lawmakers, due to the fact that the American Copyright Bill was passed through Congress in the evening of March 3, 1909, a few hours before adjournment on the following day at noon. Undoubtedly this error will be corrected at the next regular session commencing next December, because it is now recognized to be a most harsh and unusual provision, since all manufacturers carry very large stocks of records in anticipation of sales which frequently never materialize, and a considerable portion of which are consigned to the scrap-heap.

We would respectfully submit that there should also be a provision in the law to provide for records which, although sold to factors or dealers, are later returned to the manufacturers as being unsalable, and for which full allowance has to be made, because it is obviously unfair to require the manufacturers to pay royalties on records which they are forced to take back. It has been found in practice, so far as the National Phonograph Co., Limited, is concerned, that these returned records amount to 10 per cent. of the total sales, and a fair arrangement, therefore, would be to require manufacturers to account monthly to the copyright owners for 90 per cent. of the royalties payable to them, the balance, if any, being adjusted annually.

We are heartily in favor of the suggestion which has been made to the committee of including in the proposed law a provision for copyrighting the phonograph records themselves, so far as they may evidence originality in production or special artistic quality. Such a provision in the law would put a stop to the piracy of records by unscrupulous and dishonest persons who might thereby seek to evade the payment of royalty.

With these suggestions, so far as our interests

are concerned, we believe the new copyright act would represent a fair and reasonable compromise between necessarily conflicting interests, which on our side are in the nature of vested rights.

NATIONAL PHONOGRAPH Co.,

FRANK L. DYER, President.

INCREASE DUTY ON SAPPHIRES.

National Phonograph Co. Appeal Against Increase of Duty from 10 to 50 Per Cent.

A contention has arisen over the dutiable value of sapphires as used for the stylus or reproducing point on cylinder records, and also on discs with the vertical cut. The special case in point is the importation of a lot of sapphires from England by the National Phonograph Co. Heretofore they have been coming in on a 10 per cent. basis, according to paragraph 449 of Schedule N. The customs officials recently reappraised the sapphires and classified them under paragraph 112 of Schedule B, which provides a duty of 50 per cent. The case is now before the Board of Appraisers on Appeal. The importers claim the sapphires should be assessed at the rate of 45 per cent. ad valorem, according to paragraph 463 of the tariff law, which says that "phonographs, gramophones, graphophones and similar articles and parts thereof, 45 per cent." Among the expert witnesses heard early this week in behalf of the National Phonograph Co., was Fred Lee, of Fred Lee & Co., jewel and watch manufacturers, Coventry, England.

INCREASE CAPITAL STOCK.

The Knoxville Typewriter and Phonograph Co., Knoxville, Tenn., have had their charter amended increasing their capital stock from \$50,000 to \$113,000.

Anyone can write a long advertisement, but to write a short one and have it effective, that's another story.

TRADE NOTES FROM BOSTON.

Business Showing for the Past Six Months Most Satisfactory—Big Sale of Cheap Machines to Campers—Geo. W. Lyle's Splendid Report—Live Edison Dealers in Lynn—Ditson's Handsome Victrola Display—Boston Cycle and Sundry Co. Progress.

(Special to The Talking Machine World.)

Boston, Mass., July 8, 1910.

For the six months ending June 30 the writer has yet to find a discouraging expression. Talking machine business on the jobbing end has increased materially, with everybody ahead of last year, while with the retail distributors similar conditions exist. With the jobbers you hear an occasional complaint about collections, one in particular being quite popular, and that is: "I have just purchased an automobile and I can't pay my bill now." The puzzle confronting the jobbers is why they should buy motor cars for the dealers. Retail collections have been excellent, and have been maintained so by persistent efforts.

The feature of the past month in retail circles has been the tremendous sale of the cheaper styles of talking machines, which are extremely popular with summer home owners, campers and pleasure seekers. Records have been included in this rush, and, altogether, a gratifying amount of business was transacted both during the past month and for the six months period ending the 30th ultimo.

At this writing General Manager E. F. Taft, of the Eastern Talking Machine Co., Edison and Victor jobbers, is answering the convention bell at Atlantic City. He may push a few other bells there (for ice water), and for a combination business and pleasure trip it will be his best journey. On his return he will spend a week in the Maine woods with a party of friends.

H. R. Skelton, minister plenipotentiary of the National Phonograph Co., has been in and around Boston for the past several weeks calling on the trade. He is on a "fine tooth comb" trip, and before returning will cover nearly every point in this field. Mr. Skelton is a very popular figure with the talking machine fraternity, and is always welcome.

Manager Holmes, of the talking machine department of the Jordan, Marsh Co., attests a very substantial June-July business, which has grown considerably since he undertook the management.

A most distinguished visitor to Boston recently was George W. Lyle, general manager of the Columbia Phonograph Co., New York and elsewhere. Mr. Lyle was accompanied by Mr. Sheble, manager of the Bridgeport factory, and together they spent several days in consultation with Manager Arthur Erisman, of the Boston headquarters. Mr. Lyle expressed himself to The World correspondent as being very much pleased at the rapid growth and importance of the talking machine industry, and particularly of the part that the products of the Columbia Co. are taking. "Late Columbia developments—the Grafonola and the Mignon—are epoch makers in the field. Both these models alone have caused an

inrush of business and new agencies that have been phenomenal, and we look to a still larger growth with the ensuing few months. For business at large, indications point to vigorous activity, and 1910 will prove a very profitable year with Columbia distributors, I am positive," added Mr. Lyle.

Here are two live Lynn Edison dealers that are making money with the Edison line: H. M. Curtis, of 60 Andrew street, and G. W. Lord Co., of 34 Central square. Both are Edison enthusiasts and mighty fine fellows, the usual combination.

Thomas F. Nally, manager of the Edison department of D. B. H. Power, 51 Central square, Lynn, reports a good retail trade.

Mr. Haines, manager of Nelson's department stores in Lowell, was a visitor here last week. Nelson's stores are exclusive Columbia dealers, and in several cities the furniture and Columbia lines occupy the same floor space, but they make more money on the Columbia phonographs than they do on the furniture. That's rather a significant statement, and is worth thinking over!

Arthur Erisman, manager of the Boston Columbia offices and warerooms, reports a strong machine and record demand, a great deal in excess of any past June-July. They have also added a number of new exclusive agencies.

Senator Henry Cabot Lodge may expect an interview soon from Fisher Bros., 34 Munroe street, Lynn, who will bring with them one of the new Edison Residence Dictation machines, just introduced. There are a number of prominent people at Nahant who are interested in this Edison machine, and a good sized business ought to be booked.

A very handsome display is seen by pedestrians who pass the windows of the Oliver Ditson Co. It consists of four Victrolas in Circassian walnut, early English, Flemish and fumed oak, and Manager Winkleman asserts that the elaborateness of this showing has been prolific of many sales. The Ditson Co. always possess a stock of at least one of each of the different woods, including the eight finishes of quartered oak, Circassian walnut and Santo Domingo mahogany.

Charles R. Cooper, head of the Edison jobbing and retail talking machine department of the Boston Cycle & Sundry Co., states that trade is very good for this season of the year. As announced heretofore, one of the reasons for this exceptional rush is their "special summer service," to which he has devoted a lot of time, with an aim of giving the trade sort of a specialized service, one, as the first letter of each word in the phrase indicates, that will mean \$\$\$ to the dealer. Mr. Cooper regrets that the present conditions won't permit his attending the convention.

F. K. Dolbeer was one of the big trade visitors in Boston last month.

M. Steinert & Sons Co., Victor jobbers, advance nothing but prosperity when it relates to business conditions. This applies to wholesale and retail trade, the latter being purely local. Herbert L. Royer, the manager, is with the brethren at Atlantic City, so the City of Steinert is without a Mayor.

Samuel Katz, operating the Conclave Phonograph Co., has taken on the jobbing agency for Zonophone goods, it is understood. He will also feature them liberally in his two retail stores.

On this page will be seen the "summer garb" of the Eastern Talking Machine Co., jobbers of Victor and Edison machines. This is one of the most attractive buildings in the city, and with the new awnings, electric bulb signs and other modern features of store-policy makes the Eastern spot a credit to Boston. It is a "live" concern, managed by a "live" man.

The Conclave Phonograph Co., at 199 Tremont street, recently opened with the three lines—Columbia, Edison and Victor—has been discontinued, and no attempt will be made to further their business in that field. Two reports are offered as to "why." One that the Victor and Edison companies, believing that the territory had sufficient representation now, requested the move,

and the other is that the Hotel Touraine objected to the "noise," and offered a sum of money for its abolition. Take your choice; it's gratis!

F. T. White, of the Victor department of Henry F. Miller & Son Piano Co., was married recently. They passed their honeymoon at Atlantic City.

F. B. Emerson, of Chelsea, is an enthusiastic Edison dealer, having adequate quarters for the best promotion of Edison machines.

One of the New England dealers visiting Boston recently was Mr. Stone, of Berwick, Me., who is a hustling Edison dealer. Mr. Stone gladdened the hearts of the Boston jobbing trade by leaving some substantial orders for his extensive summer trade.

Henry Siegel Co.'s talking machine department is now managed by Mr. Bennett, buyer for the sporting goods end. This concern features Columbia products.

F. W. Peabody Co., of Haverhill, are becoming quite a factor in the talking machine world, and are selling a large amount of Edison goods. Cliff Poor, manager of the company, expresses himself as very pleased with past results, and is aiming for a still greater future. Joseph McFarlane is now manager of the talking machine department, being formerly associated with M. Steinert Sons.

The Eastern Talking Machine Associates had a pleasant field day on the 17th of June, with a trip to Providence, ball game, athletic stunts and other joys. As announced in the last issue, the winning ball team was the Edisons, who trimmed the Victors 9 to 3. Even the right field mascot of the Victors didn't save the day, who was none other than General Manager E. F. Taft. The Associates are very grateful to the management for their hospitality, through whose means it was possible to have so enjoyable a day.

SOME SUMMER HINTS.

Is your store going to be cool and comfortable this summer, so that people will hate to leave it on a hot day, or is it going to be close and stuffy?

S. F. HYMAN GETS BIG FEE.

Judge Keogh Signed Order on July 7 Directing Payment of \$32,204.66.

Justice Keogh, of the Supreme Court of Westchester County, N. Y., holding court at White Plains on July 7, signed an order directing the Empire Trust Co. of New York City to pay to Samuel F. Hyman, a lawyer, \$32,204.66 as legal fees. The money is on deposit with the company to the credit of John C. Tomlinson, Jr., as trustee. Mr. Tomlinson at one time was an officer and counsel for the New York Phonograph Co., of the same city, but now defunct. A suit to define and enforce certain contract rights was brought by the concern against the National Phonograph Co., Orange, N. J., which dragged along in the United States Court for nearly ten years.

Hyman, also an attorney for the New York Phonograph Co., commenced a suit for the same purpose, in the State courts, and every decision rendered was adverse to his contention. A part of his case included action against every Edison jobber and dealer in the State, with S. B. Davega, of the S. B. Davega Co., New York, as nominal defendant, the National Co. taking care of the legal end. When the Circuit Court of Appeals of the United States, second circuit, upheld the suit of the complainants the suits were settled by the latter without Hyman's knowledge. He then entered a claim for his law services for \$131,625 and sought to enforce it through the courts. After many hearings, it was found finally that the only money available was the above sum, which the court now directs to be paid to Hyman.

SCHAAD VISITS VICTOR CO.

H. B. Schaad, with the Aeolian Co., returned to New York late last week after a two days' visit at the plant of the Victor Talking Machine Co., Camden, N. J. Speaking of it, Mr. Schaad said:

"I went over from New York with Arthur D. Geissler, of the Talking Machine Co., Chicago, and, in company with his father, Louis F. Geissler, general manager of the Victor Co., I had the pleasure of going over the plant. I certainly appreciated the organization that has built up and conducts such a wonderful business, and Louis F. Geissler is the presiding genius. No, I did not attend the jobbers' convention in Atlantic City. I did not meet Mr. Johnson, the president, as he is in Europe.

McMENIMEN'S GREAT TRIP.

Will Visit Every City of Importance in the United States and Canada on Behalf of the Music Master Horn.

H. N. McMenimen, general manager of Sheip & Vandegriit, Inc., manufacturers of the Music Master horn, leaves on August 1 for a visit to every important city in the United States and Canada. He will journey southward and around to the Pacific Coast, thence up to Canada, visiting the trade of Canada and British Columbia, and returning through the Central West. This will be one of the greatest trips ever undertaken in behalf of the Music Master horn, and, in view of the merits of the goods he is exploiting and his own personal popularity, results of a most satisfactory nature are bound to accrue.

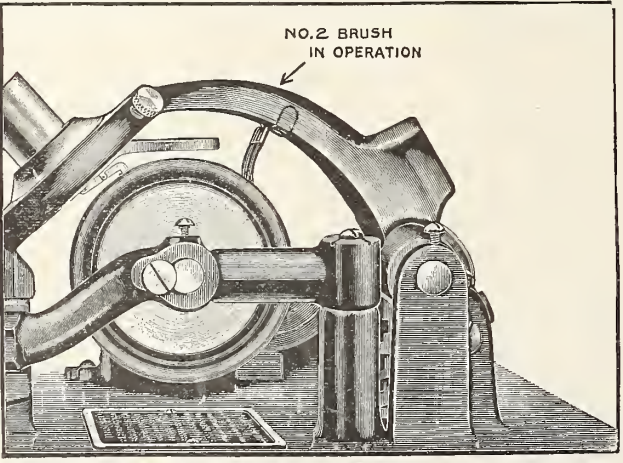

At the recent show of the Royal Ulster Agricultural Association, held at Belfast, Ireland, Thomas Edens Osborne, the enterprising talking machine dealer of that city, had the pleasure of dictating a speech concerning the merits of "Fedol" which was reproduced through the Edison Standard phonograph fitted with Cygnet horn. This particular novelty in advertising proved to be most effective and was much talked about among the thousands of visitors. Mr. Osborne has very aptly described the phonograph not merely as an "automatic salesman," but a "mechanical orator."

Fourth Annual Convention of the National Association of Talking Machine Jobbers

Atlantic City, N. J., July 5, 6, 7, 1910

The fourth annual convention of the National Association of Talking Machine Jobbers opened at the Chalfonte, Atlantic City, N. J., July 5, the first session being called at 2.30 p. m. Owing to the fact that the opening day had been preceded by practically a three-day holiday, a large number of the jobbers and their wives and families arrived on Saturday and made the occasion one of combined business and pleasure by spending almost a week at this popular resort.

There were in attendance 178 representatives from 85 houses throughout the trade, showing the widespread interest in the organization. We may say that representatives were present from Winnipeg, Canada, and from Houston, Tex., and all intermediate territories.

The association, however, is practically composed of Edison and Victor jobbers, and a close analysis of the personnel of the association will show that no member was present save that he was affiliated with either the Edison or Victor companies, so that the association as it stands to-day is composed of the men who represent the interests of the Edison and Victor houses.

As this was the third time the association had met in convention in Atlantic City, the members were perfectly at home both with the location itself and their associates, and as a result the social side of the convention was decidedly prominent.

Each morning saw the majority of the talking machine jobbers and members of their party disporting themselves in the surf or enjoying the pleasures of ocean sailing. The sessions took up the afternoons, while immediately after dinner there was a general exodus from the Chalfonte for the various piers, where dancing and diversions were indulged in. As the midnight hour approached the various parties assembled at Old Vienna and other similar Bohemian resorts, where they joined heartily in the general reign of joyousness. At Old Vienna the talking machine men owned the balcony each evening, and suspended over their heads was the word Victor in electric lights.

On Thursday morning, of course, there was nothing that could interfere with the attendance of all upon the much-heralded ball game at the Atlantic City Ball Park, where the West won over the East by one run. The fans were numerous and in excellent voice, and got excited over every hit and run.

The jobbers were fortunate in being at this resort during a part of the aviation meet, when Curtiss, Hamilton and other "bird-men" did hair-raising stunts with aeroplanes to the edification of the Boardwalk crowds. It took only the cry "Curtiss is flying" to empty the meeting room and cause a grand rush for the boardwalk. From a social viewpoint the convention reminded one of a party of close friends meeting again after a year's separation and doing their best to make the occasion a memorable one.

OPENING SESSION ON TUESDAY.

The opening session of the convention was called to order at 2.30 p. m. Tuesday, and it was found that a large proportion of the members of the association were in attendance. President Perry B. Whitsit stated that while he was decidedly pleased at the progress made by the association during the past year he had not prepared a formal report to present at the con-

vention in view of the fact that the points he would emphasize appeared in full in the reports of the secretary and treasurer. Secretary J. C. Roush then presented his report, which was as follows:

Secretary J. C. Roush's Report.

Gentlemen of the Jury—I am about to make a report.

The secretaryship of such an association as this calls for a little more versatility than is usually found in the ordinary and average secretary.

In the first place, this association is an unusual affair, and it would quite naturally follow that unusual conditions prevail, especially in the secretary's office.

During the past year numerous occasions have arisen wherein it seemed that the secretary was not only to act in his official capacity, but, in addition, render the services of official

full apportionment of secretaryship, but to see that, by suggestion to those who are less favorably situated with the exact work, they cooperate each with the other in every way.

As more sorrow is expressed in a good place from the loss of one soul than joy is exhibited over a hundred found, it is quite natural that we, as a body, should consider more closely our omissions than commissions; bring to bear more closely our applied efforts on what is to be done this coming year. While, with all possible jubilation, we review with satisfaction the various accomplishments of our past three years, we are specifically here to arrange plans and specifications for future accomplishments.

Incidental to this, it is necessary that I read my report, so let's get it off our hands as quickly as possible.

It is no small satisfaction to say that we now have, July 1, 117 members.

During the past year there have been three executive meetings, upon call of President Perry B. Whitsit. At the Pittsburg meeting, September 19, last year, at the offices of the Standard Talking Machine Co., the following committees were appointed:

Press Committee—J. N. Blackman, L. C. Wiswell, B. F. Pierce, Ben Lee Crew, A. G. McCarthy and E. F. Taft.

Grievance Committee—E. F. Taft, H. H. Blish, and J. F. Bowers.

Resolution Committee—Louis Buehn, Rudolph Wurlitzer and Lawrence McGreal.

Membership Committee—J. C. Roush; balance of committee to be selected by the president and Mr. Roush.

The second meeting of the Executive Committee was a special meeting, held in Philadelphia, February 5, upon a special call by the president. This meeting was deemed expedient by way of taking up, without delay, the matter of the immediate exchange proposition with the Victor Co.

There were present at this meeting Perry B. Whitsit, Louis Buehn, J. N. Blackman, L. C. Wiswell (for J. F. Bowers), and J. C. Roush.

The third and last executive meeting was held at the offices of the Perry B. Whitsit Co., Columbus, April 17, at which every member of the executive committee was present.

At this meeting a special committee, composed of J. N. Blackman, Louis Buehn, E. F. Taft and Lawrence Lucker, was appointed to call on the Victor Co., on their way East, and ask that they discontinue the practice of calling attention to the new system of making records, etc., and also take up the matter of obsolete cut-out records, of which there are about 50,000 outstanding among the various jobbers. Also, to point out to the two factories the advisability of allowing the jobber to return his cut-out records thirty days in advance of the dealer, in order that he may have his stock filled in by the time the dealer's returns begin to come in. Also the subject of sending out the special "hits" starting where they are popular in the East, and gradually working West.

The real object of our association is known to us all. We are organized for a specific purpose—that of bettering our trade conditions, more firmly and harmoniously co-operating in

L. BUEHN, TREAS.

J. C. ROUSH, SEC.

J. N. BLACKMAN, VICE-PRES.

P. B. WHITSIT, PRES.

hypnotist, clairvoyant, seer, prophet, spiritual advisor, sheriff and office boy. I do not want to be construed as complaining, but in reviewing the woeful needs and necessities of our organization, and the summing up of the available facilities, I have many times come to the conclusion that if it was done—and it must be done—that the only way was to "Let George do it."

Understand again that I am not suffering from the summer complaint, but speak as an observing man would from a standpoint unusually close to the association. Perhaps no member has equal advantages in seeing the wants and needs of our organization. And I know that no one of us feels a more personal conscientious regard for our future than I.

Apologizingly, I will say that the method in this mild form of madness is my extreme ambition and whole-soul desire to not only do my

our work, more thoroughly and expeditiously transacting our business.

In union there is always strength, and now that we have become united, some results should show for the effort.

That we are strong and increasing in strength is fully evidenced by the work accomplished during the past year.

Tersely summing this up, it is as follows:

The recalling of all 8-inch Victor records at full price.

The Victor renumbering system, which is working out to the entire satisfaction of every jobber.

The granting of sixty days' time to jobbers on last Victor exchange in which to purchase sufficient records to balance the cut-out returns. On future Victor exchanges the jobber will be allowed to return his cut-out records thirty days in advance of the dealer, and will not be compelled to order the same serial number of renumbered records as he returns.

The promise of recalling shortly all obsolete cut-out records that were not included in the various exchanges.

The promise by both factories to meet with the insurance companies toward the adjustment of partial losses by fire and water, and replacing the jobbers' stock, record for record and

greatly abused in the past two years, it being known that a great many dealers are in the habit of allowing full price for old obsolete types of machines, in exchange for better ones.

At our suggestion the National Phonograph Co. has agreed to devise some plan whereby a certain allowance can only be made for very old-type machines, a better allowance for the gate type, and full price for all machines of the newest type in good condition, bought within, say, six months of time of exchange.

This matter has also been brought to the attention of the Victor Co., but no reply received.

Another very important matter is the recent announcement of the National Phonograph Co. concerning the revision of their exchange plans. As this has been very recent, nothing has been done other than to merely call the attention of the factory to the injustice of this exchange, and asking them to take it up with us at the open meeting.

At a recent date it was unanimously decided by the executive committee to take a mail vote on the advisability of requesting both factories to limit the jobbers to only one or two sets of sample records, which were to be played over only in his place of business and not allowed to be either sent out by freight or express, or carried by the road men. Up to date the secre-

with your knowledge of his fondness for the filthy lucre, you can see that these superimposed and arduous duties must be something beyond the ordinary. Silence does not give consent—it is just as important to know that the member does not care to vote as it is that he votes either for or against the proposition. Here is a grand good chance for the secretary to soldier on his work, and if he was built of a mean character he might also stuff the ballot box and twist the returns, but while we are a politic concern, it is our religion and creed that nothing which savors of politics shall enter our royal domain.

I notice that several feet are wiggling like their corns hurt—if the shoe fits, don't let a penny postal card stand between you and a clean conscience—next time.

Does it pay to attend our annual meeting?

I would much prefer to ask this question now than four days later—now that you are all fresh and green from the country, full of exuberance, life and anticipation. The future is all a blank and we have great ideas about the pleasure and fun and amusement ahead of us, say nothing about the many important business matters of which we shall dispose.

Ella Wheeler Wilcox was once written by a young lady subscriber to a paper to which she contributed, asking whether or not she advised a young lady to wear corsets. Ella replied, "By all means, yes—it's such a pleasure to get them off."

By all means we should come to the convention—it's such a pleasure to get back home.

The convention last year proved conclusively that it pays every jobber to attend our annual meeting. It not only brings us closer together on a friendly business basis, but it promotes that underlying business asset, good feeling, fellowship and friendly co-operation.

The writer belongs to the Elks and the Christian Endeavor, and has thought of joining the Eagles (has been rejected from the Moose Club), and can honestly state that his connection with the Jobbers' Association has, in a friendly, social way, the preference. During the past year he has made friendships from practically coast to coast, the result of acquaintances formed at the convention. This applies to every member that attended our last year's meet, and has proven of immense benefit to every individual.

It is a well-known fact among us that the policy of this association is one rather of suggestion than compulsion—that we choose and adopt the position of hypnotists rather than have the slightest tainted suspicion that we have formed a jobbers' trust.

In the first place, we all know that for politic reasons this is the best attitude to assume, and from our early Sunday-school training we know it is the best.

We have not on record a single example of where we have the ill-will or have antagonized or made any attempt to subjugate anyone with whom we disagreed on business lines. Our every attained point has been on the basis of a plea or request, and our "Come, let us reason together" spirit has been amicably accepted in every quarter. Both factories have received us with kindest attention, and we know, to a certainty, that to-day we stand closer to the Victor and Edison companies than ever before.

Our association has also improved slightly in moral tone, as there is only outstanding at present \$127.50 in unpaid dues.

For fear that some members in the future may take advantage of this liberal statement, I will knock wood.* * * It is to be hoped that you will not take any advantage of a generous nature. In case there might be any misdirected, strong-minded individual so tempted, I will state that the secretary is on the best terms and in the closest touch with one of the strongest collection agencies in the country, with unlimited service and a "frank" at his disposal. The amount mentioned is the smallest the association has ever had the painful necessity of charging to delinquents. It consists of the dues of eleven members, one of whom owes the sum

A GROUP OF CONVENTIONERS AFTER A "DIP."

machine for machine, and then adjusting same with the insurance companies.

A new financial statement blank has been carefully compiled, being as concise as possible, and may be secured from the secretary at a nominal cost.

There has been a change made in the semi-annual delinquent report, classifying the various dealers by State, as well as alphabetically, and which is revised completely every six months.

Another very important—in fact, the most important—matter which the association has accomplished, is the securing of the promise from the National Phonograph Co. in regard to "dead beat" dealers.

The arrangement is that if a dealer has been reported by three or more members of the association, the secretary is to write each jobber reporting said dealer, getting the amount of the account, when sold, and what steps he has taken to collect same. This data from the three or more jobbers will be sent by the secretary to the factory, and the factory will then notify the dealer that he has thirty days in which to make good. If at the end of that time he has not made some satisfactory arrangements with the jobbers whom he owes, he is to be suspended.

This matter has also been taken up with the Victor Co., under date of June 9, but as yet we have secured no decided answer.

Another matter that has been taken up is the allowance in the exchange of old-type machines. The second-hand license proposition has been

tary has received 107 replies, 97 of which were in favor of abolishing the present system of carrying samples, and ten against said plan.

The request for a vote was mailed, not only to the members of the association, but to every jobber in the United States and Canada.

Right here is my opportunity to say it to your face. To bear out my contention that the tendency has been on some points and in some quarters on the "Let George do it" plan, I am going to say that the secretary of the association needs your better support in replying promptly to his communications. On even the munificent salary received by the secretary it is impossible to attempt the carrying out of the almost endless chain of letters in endeavoring to get members to merely write on a postcard "Yes" or "No," when certain questions are put up to them that require a vote. It seems to have been harder to secure from certain members a mere wave of their hand than it would be to collect a matter of \$100 or more, and yet the request could have been granted by about the same effort and labor as the signing of a check. Some members received no less than six communications asking them to reply, voting either "Yes" or "No." It is quite possible that some of these members have replied, but that their answer has been routed over the Erie and will arrive in due course of time. This involves, on the part of the secretary, an immense amount of extra and unnecessary work, to say nothing of the expense. The secretary would personally prefer to pay the expense part out of his own pocket rather than do the work, and

OFFICERS AND MEMBERS OF THE NATIONAL ASSOCIATION OF TALKING MACHINE JOBBERS

total of \$37.50. Two are on the wrong side to the extent of \$15 each, and eight have backslidden to the amount of only \$7.50. As I came to the convention with the express and vowed intention of collecting these delinquent amounts, I will state that the secretary's room number is —, and all communications containing remittances will be acknowledged under seal, marked "Personal" and with the least possible publicity.

This is giving the backsliders the benefit of arrangements, but the aforesaid mention of the collection agency must not be forgotten. The secretary intends going back to Pittsburg either with his shield or on it.

With less effort than has been expended upon the delinquents, the secretary has collected and turned over to the treasurer \$1,750 in dues.

In this connection it is well to state that the expenses for the next year will be quite proportionately less, as there are no old accounts to meet and it will not be necessary for the incoming secretary to have so much printing done. Very many of our printed forms are completed, with enough on hand to supply the next year or two. The item of the filing case will not be necessary for some years to come, for the one recently purchased will be available for quite a period.

For the benefit of the newer members, and to refresh the memories of the older, and for those who are otherwise not thoroughly in touch with the work of this organization, I will say that all matters of importance should be sent direct to the secretary, as through him they will be brought most expeditiously before the executive committee. This committee consists of the president, vice-president, secretary, treasurer and five members, making all told a body of nine. The five members are chosen to represent, as widely as possible, the different sections of the country. They are representative jobbers in every sense of the word, their qualified requirements being no more a matter relating to Dun's or Bradstreet's than the Blue Book. The avowed personnel of this executive committee must be up-to-date, progressive, active, enthusiastic and devoted unquestionably to the interests of our association, for it practically represents our success. The committee meets three times a year, on the call of the president, in a central location, and all jobbers are not only invited but requested to be present, as the meeting is an entirely open one.

In executive session, the committee discusses thoroughly the matters that have been presented to it; a resolution is adopted and a mail vote

taken, if possible. If the matter be an urgent one, and the time too short, the resolution is sent direct to the factory concerned, either by mail or in person, by members of a committee appointed by the committee.

The secretary is the only paid officer, receiving a salary of \$300 a year. Members of the committee are allowed their mileage and berth to and from the point of meeting only. Hotel bills and other expenses are borne personally by the committee members.

The secretary extends his most hearty thanks to the various members of the executive committee for their efforts and hearty co-operation during the past year. The attendance at all meetings has been good; at the last one the entire nine members were present.

Supplementing all that the secretary has previously written and said regarding the ten members and their delinquent dues, the secretary will announce, for a short time, a truce, which will enable these delinquents to see him without undue publicity, and to square their accounts. I do not anticipate a rush so great that cannot be accommodated between now and bedtime; however, I may be mistaken. You know that story about the country editor who inserted a little four-line notice which read something like this: "Will that prominent business gentleman who was seen through the window of his office hugging his typewriter immediately pay his subscription or stand exposure in our next issue." Arriving at his office the next morning at 8 o'clock there were awaiting him 37 delinquents with the money in their hands.

Treasurer Buehn's Report.

Next in order came the report of the Treasurer, Louis Buehn, which showed the financial condition of the association to be better than at any time in its history. The Membership Committee, of which J. C. Roush is chairman, had a very pleasing report to make, as follows:

Report of Membership Committee.

The chairman of the membership committee has less to do than the secretary. I feel sorry for the secretary.

The secretary took so much of your valuable time that we will make this report of the membership committee short and to the point. If a personal canvass was made of all the talking machine jobbers in the country, it is a safe prediction that every one would approve of our association, its course and its methods. But we want more than approval—we want actual, bona fide, warm-blooded, spirited members.

No small effort has been put forth since our last annual meet to secure recruits, and the

result might have been a great deal worse.

Twenty new converts announce their avowed acceptance of the faith. Every one of these additional members represent an added personality to the association, of which we should be justly proud. Their names are as follows: Jas. I. Lyons, Chicago, Ill.; Elyea-Austell Co., Atlanta, Ga.; Petmecky Supply Co., Austin, Tex.; Consolidated Music Co., Salt Lake City, Utah; Knight-Campbell Music Co., Denver, Col.; W. A. Myers, Williamsport, Pa.; Wulschner-Stewart Music Co., Indianapolis, Ind.; A. Hospe Co., Omaha, Neb.; Chase & West, Des Moines, Ia.; His Master's Voice Gramophone Co., Toronto, Canada; Robt. C. Rodgers Co., Washington, D. C.; Western Talking Machine Co., Winnipeg, Canada; Smith Phonograph Co., Oklahoma City, Okla.; Cohen & Hughes, Baltimore, Md.; Price Talking Machine Co., Newark, N. J.; Pacific Phonograph Co., Oakland, Cal.; Putnam-Page Co., Peoria, Ill.; Aeolian Co., St. Louis, Mo.; Lit Bros., Philadelphia, Pa.

Into each life some rain must fall. It is with keen regret that a report is necessary of the following resignations, but our feelings may be somewhat pacified when the reason of these withdrawals is known. Boston Cycle & Sundry Co., Boston, Mass., withdrew owing to their intention of going out of the jobbing business as soon as they can dispose of their stock. We have also lost as members the following firms, who have sold their talking machine jobbing business: Mackie Piano Co., Rochester, N. Y.; Flint & Brickett Co., Springfield, Mass.; Forsythe & Davis, Kingston, N. Y.; P. Bacigalupi & Sons, San Francisco, Cal.; Regina Music Co., New York City; Utica Cycle Co., Utica, N. Y.; John F. Ellis & Co., Washington, D. C.; C. C. Adams & Co., Peoria, Ill.; St. Louis Talking Machine Co., St. Louis, Mo.; Bruce & Brown, Seattle, Wash.; Jones Piano Co., Des Moines, Ia.; A. J. Pommer Co., Sacramento, Cal.

We have practically gained 19 new members, as none have withdrawn for other than purely business reasons. We have, at present, a membership of 117.

Outside of the fold there are, at the present time, 57 jobbers. Of this number, 14 are branches of jobbing houses who are now members of the association, which leaves practically 43 live prospects.

During the past year at least ten letters, carefully prepared, have been sent to the non-members, and the following State commissioners have called personally and have written many times to these 43 jobbers not included in the membership: W. H. Ross & Son, Portland, Me.;

E. F. Taft, Eastern Talking Machine Co., Boston, Mass.; Max Landay, Landay Bros., New York City; Mr. Silverman, Pardee-Ellenberger Co., New Haven, Conn.; Edisonia Co., Newark, N. J.; Dan O'Neil, C. J. Heppe Co., Philadelphia, Pa.; J. Fisher, C. C. Mellor Co., Pittsburg, Pa.; Carl Droop, E. F. Droop & Sons, Washington, D. C.; Thos. Towell, Eclipse Musical Co., Cleveland, O.; Montenegro-Rheim Co., Louisville, Ky.; Ben Lee Crew, Phillips & Crew Co., Atlanta, Ga.; W. H. Reynolds, Mobile, Ala.; C. C. Koehring Bros., Indianapolis, Ind.; L. C. Wiswell, Lyon & Healy, Chicago Ill; Max Strasburg, Grinnell Bros., Detroit, Mich.; Lawrence McGreal, Milwaukee, Wis.; Lawrence Lucker, Minneapolis, Minn.; H. H. Blish, Harger & Blish, Des Moines, Ia.; Burton J. Pierce, J. W. Jenkins Sons Co., Kansas City, Mo.; National Auto Fire Alarm Co., New Orleans, La.; Houston Phonograph Co., Houston, Tex.; Ross P. Curtice Co., Lincoln, Neb.; Montana Phonograph Co., Helena, Mont.; Knight-Campbell Co., Denver, Col.; Consolidated Music Co., Salt Lake City, Utah; Southern California Music Co., Los Angeles, Cal.; F. W. Graves, Graves Music Co., Portland, Ore.; Eilers Piano House, Spokane, Wash.

Every member present must certainly feel the duty involved upon him to use his influence on any of these jobbers that might be thus brought into our organization. If we act as a unit, and without faltering or ceasing, sooner or later our organization will number within its fold the entire list of jobbers in the country. This is surely coming. It is merely a matter of time, and faithful work on the part of every member is the way to bring it about at the earliest possible date. It is clearly the duty of every member here to ask me, chairman of the membership committee, after this session, for a list of the non-members. All I want is your request, and I will mail from Pittsburg a list complete.

No Grievances to Report.

The grievance committee, through Chairman E. H. Taft, reported that, pleasing to say, there had been no grievances reported during the year.

J. N. Blackman's Report.

J. N. Blackman, chairman of the press committee, then made his report. He stated that the committee had made special efforts to secure all the publicity possible for the association without conflicting with the factories. He particularly mentioned the amount of space given to association matters by The Talking Machine World and the Music Trade Review, and expressed the appreciation of the committee of Edward Lyman Bill's generosity in that matter.

The factory committee, of which Mr. Blackman is also chairman, which was appointed recently to take up various matters with the factories personally and directly, reported that their efforts had met with great success, and that they had received a most courteous reception from the factories on every occasion when they had some special matter to present.

Old Officers Re-elected.

Other committees then reported, after which the election of officers was in order, and it was a handsome tribute to the excellent and unselfish work of the officers for the past year that they were re-elected in each instance to carry on the good work for another twelve months. The officers are as follows:

Perry B. Whitsit, of the Perry B. Whitsit Co., Columbus, O., president.

J. Newcomb Blackman, of the Blackman Talking Machine Co., New York, vice-president.

J. C. Roush, of the Standard Talking Machine Co., Pittsburg, Pa., secretary.

Louis Buehn, of L. Buehn & Bro., Philadelphia, Pa., treasurer.

In the course of the meeting some members for the first time learned of the death of little Jack McGreal, who was elected mascot of the association last year, and a resolution of sympathy for his parents, Mr. and Mrs. Lawrence McGreal, was promptly passed and a short adjournment taken in his memory.

WEDNESDAY'S SESSION.

On Wednesday afternoon the second session was held and a number of matters of interest to the association members and the trade at large were discussed at length and acted upon where necessary. These subjects were all of vital interest, bearing on the improvement of the trade and the advancement of the interests of the jobbers, and the discussions were participated in by representative men from all parts of the country.

In the course of the session a committee representing the Eastern States Talking Machine

Dealers' Association, consisting of President Frank C. Storck, Red Bank, N. J.; Irving Mosier, Hamden, N. J., and B. S. Brown, Dover, N. J., were received. Mr. Storck made an interesting address in the course of which he offered a number of suggestions which were afterwards discussed and favored regarding matters on which jobbers and dealers might co-operate for trade betterment.

The meeting as a whole was given over to the serious discussion of trade problems, and as a result much was accomplished of a nature to benefit association members.

THURSDAY'S OPEN MEETING.

The closing session of the convention was held on Thursday afternoon, when occasion was taken to decide a number of questions that had not been reached during the previous sessions. Among the resolutions adopted was one thanking the manufacturing companies for the manner in which they had entertained the jobbers during their stay at Atlantic City. President Whitsit proposed that, in view of the fact that all of the officers of the association had been re-elected for another year, the present executive committee be also held over. The association thereupon ratified his action. The various other committees will receive the president's attention at a later date. No final decision was reached regarding the meeting of the next convention place, and that matter will be put to vote at a later date. Those in favor of Milwaukee did some mighty active campaigning, and went away feeling confident that their city would receive consideration.

At the close of the business session the doors were thrown open and all guests and non-members of the association in attendance were invited to participate in the open meeting, which was then called to order. J. Newcomb Blackman, vice-president of the association, acted as chairman, and first took occasion to call upon Frank L. Dyer, president of the National Phonograph Co., for a few remarks.

Mr. Dyer expressed his pleasure at again meeting collectively his friends in the jobbing business, and said that he would not speak at any length for the reason that he was to be one of the speakers at the banquet, but would leave to F. K. Dolbeer the pleasure of speaking on behalf of his company in reference to questions of sale and policy.

F. K. Dolbeer's Remarks.

Mr. Dolbeer was greeted with prolonged applause, and said he would speak on two subjects, namely, "Discontinuance of Sample Records" and "Record Exchange." He said that he realized from the result of the mail vote taken by the association on the question of discontinuing sample records, which was 105 in favor of discontinuance and 11 against, that the jobbers were in favor of doing away with the present system; that two years ago, when the matter was brought up, he was opposed to discontinuing, for the reason that he feared that if it were done some of the jobbers would be likely to recall some of their salesmen; but that since discussing the subject with some of the leading jobbers his opinion had changed somewhat. Mr. Dolbeer read a letter which he had written under date of May 25, 1910, to C. H. Wilson, outlining his views in regard to the matter and telling of a plan being tried out by some jobbers, of sending samples by express to a dealer, with the understanding that the dealer is to play them over, make up his order and forward the samples to another dealer, the shipping tag being furnished by the jobber and the samples finally returned to the jobber; the letter concluding with the statement that the writer is "convinced that the jobber will eventually decide that the playing over of these samples is unnecessary, and, consequently, they themselves will stop sending samples, whether we do or not." Mr. Dolbeer then

read an additional communication from himself to Mr. Wilson, under date of May 25, in which he said: "If jobbers consider it a good plan to discontinue displaying sample records to the dealer, claiming that the dealer can order intelligently from the regular list which is sent to him, it would appear that the jobber himself could also do without the samples, ordering only from lists, which would obviate the necessity for our sending samples. If this is the case, is it not possible for us to cut down one month on our present plan of producing advance lists, thus bringing our work up closer to a selling date than we are now doing?" The speaker then made the announcement that if the other manufacturers will

F. K. DOLBEER.

agree to cut out samples, the National Phonograph Co. will do the same.

On the question of record exchange, Mr. Dolbeer referred to the exchange of May, 1909, as being the most liberal exchange ever offered, which he considered practically a consignment of goods; he spoke of the fact that it seemed unjust to the manufacturer to produce goods valued at hundreds of thousands of dollars and eventually send them to the scrap heap. This exchange has proven unsatisfactory, and now the jobbers must have faith in the company to formulate some plan which will be satisfactory. The present exchange is intended only as a temporary expedient. Mr. Dolbeer read figures showing comparative sale of Standard and Amberol records from Aug. 1, 1909, to May 1, 1910, showing the average sales to be in favor of the Standard, 55 per cent., as against the Amberol, 45 per cent.

W. B. Fulghum, office manager of the sales department of the Victor Co., was next called on, and replied in a few words, saying that he was not authorized to speak as to the policies of his company, and spoke of the difficulty which his company was having in filling their orders.

Henry C. Brown, advertising manager of the

Victor Co., was announced by the chairman, and stated that his position with regard to an authoritative outline of the company's policies was the same as that of Mr. Fulghum; he spoke of the great additions being made to their factories, laboratory and executive offices, and expressed his pleasure at the thought of seeing the jobbers in Camden Friday.

The chairman asked L. C. McChesney, advertising manager of the National Co., for a few remarks, in response to which Mr. McChesney stated that there would be no appreciable change in the advertising policies of his company next year.

Edward Lyman Bill, publisher of The Talking Machine World and The Music Trade Review, was called on and spoke for a few minutes, expressing his appreciation for the support extended him by the trade in general and the friendship of the individual manufacturers, jobbers and dealers which he enjoyed. He took occasion to pledge his further support to any movement for trade uplift, and expressed his unflinching belief in the bright future that was in store for the talking machine trade.

D. G. Williams, representing the Udell Co., Indianapolis, next addressed the meeting, and after telling a humorous anecdote regarding President Whitsit in the role of a Newlywed, proceeded to extend some information regarding conditions in the cabinet trade, especially referring to what his company were doing in producing new styles to meet the demands of the trade. Mr. Williams is a veteran cabinet man and knows his business thoroughly.

Frank C. Storck, Red Bank, N. J., president of the Eastern States Talking Machine Dealers' Association, delivered a most interesting address on "What I Would Do If I Were a Manufacturer," wherein he offered some suggestions well worthy of more than passing thought. Mr. Storck in his address said:

WHAT I WOULD DO IF I WERE A MANUFACTURER

By FRANK C. STORCK

I would naturally do business on such lines as would bring me the greatest amount of business, always keeping in mind the Sheldon motto, "He profits most who serves best," and upon second thought I would also invert it to read, "He serves best who serves the most." So in order to serve the most we should serve the best goods through the best dealers in the best manner.

I would not make cheap goods, as it is very largely the cheap, squeaky, scratchy toy which the prospective buyer refers to when the hustling dealer endeavors to sell, and gets a reply something like, "I would not have one in the house." I would put all efforts on making the best article I could produce in order to interest the most critical prospective buyers, simply varying the style of cabinet work and the motive power to meet the customer's pocketbook.

On the selling end I would be extremely careful to market my goods only through capable and experienced merchants of good standing who would be in a position to sell the best goods to the best class of buyers. By best class of buyers I do not mean the rich class, but also the class who desire to buy good goods, and we find no end of people in limited circumstances buying \$300 and \$400 pianos on the installment plan. A merchant of good standing should have sufficient capital to sell goods, and the best of them, on the installment plan to this class of buyers. If talking machines were sold by capable and experienced merchants with sufficient capital to handle cash or time sales, then the plane of this industry would be rapidly elevated from the five and ten cent barber shop and curb-stone agents. That this is so has been demonstrated during the past two years or so, and that manufacturers are realizing this was evidenced by four large displays at the Richmond, Va., Piano Dealers' Exposition, showing

that the manufacturer to-day is catering to the more capable merchant, capable as well in ability as in capital. The increased amount of advertising by manufacturers at present in the piano trade papers also proves this.

Protection and Profits.

But if I were a manufacturer I would bear in mind that the capable, hustling merchant can sell almost any merchandise, and if the manufacturer does not give him the proper protection in his territory, and if he does not give him the necessary margin of profit to enable him to advertise, canvass and take installment risks, that then this desirable merchant will leave the talking machine industry severely alone, as he can make more money selling sewing machines, pianos and other kindred lines, where the dealer invariably doubles, and usually more than doubles, his money on installment sales.

I would also arrange my product in such a manner that the dealer could carry a complete stock without any hardship. I would eliminate all slow selling stock as quickly as it became dead, thereby encouraging merchants to carry complete lines, which would represent more satisfaction for the consumer and dealer, as well as more profit for the dealer and manufacturer. I do not refer to the jobber, as he is the middleman, whose profits or losses will depend entirely upon the profits and losses of the dealer and the manufacturer.

It stands to reason that if I turned out the right kind of goods, sold to the right kind of dealers and on right business methods, as referred to, that I would be able to do more business and also a more satisfactory quantity of business than if this policy were not adhered to.

What Different Manufacturers Have Done.

Now, gentlemen, if you will permit a little digression from the subject, I would like to make a few pertinent remarks bearing on the past, and which, perhaps, will give us cause and hopes for material improvement of present conditions. It took the Victor Talking Machine Co. to introduce the high-grade, high-priced artistic records which many people thought could never be sold at the prices; although popular records sell temporarily, most of the best dealers will sell more of the \$7 Sextette the year around than any other record in the Victor catalog. Quality will certainly count if it is properly placed before the public through the proper medium, but the curb-stone agent cannot expect to sell Sextettes or Victrolas unless he sells them at cut prices to trade which has been practically built up by the progressive merchant. It also took the gumption and confidence of the Victor Co. to market the first hornless machine, and, mark me, the time is not far hence when all popular priced machines will be hornless. From the high-grade point of view these two introductions of the Victor Co. have been the greatest features and help to the industry that have been put on the market.

However, it took the systematic National Phonograph Co. to introduce their simple and business-like method of cataloging records. By cutting out the dead wood and keeping their catalog down to a reasonable number so any dealer could carry a complete stock, they created many live dealers and facilitated keeping customers' interest constantly going.

To the Edison people also is due the credit of

introducing the four-minute cylinder record which tells its own tale and tells it completely.

The Columbia Phonograph Co. deserve credit for getting the cost of cylinder records down to a popular price, so machine customers can now afford to keep up their stock of records, thus bringing to the dealer steady record trade as well as new machine buyers who are interested by hearing their friends' "up-to-the-minute" outfits. Another welcome addition to the industry, although temporarily it was a bitter pill for a great fraction of the trade to swallow, was the Columbia's introduction of double-faced records. Apparently this venture has gone through the experimental stage, and to-day we see more and more double-faced records being marketed, and with most dealers the double-faced records increase the old as well as the new business, both in machines and high-class single-faced records.

Watching the Dealers' Interests.

If I were a manufacturer I would watch the dealer's interests very closely, as, after all, he is the one who must market the goods to the consumer, and the easier it is made for him to market goods the more business I would obtain. If I had a very large catalog I would cut down the duplicates and slow sellers in a most thorough manner. To-day in some catalogs the same record is done eight or ten times, in some cases by five or six different singers, and this is a hardship for jobbers or dealers, as customers hardly know what they want. If a customer wants one record and five are sung he will probably want to hear all five, and wind up by buying the best one he can obtain for the money. If there were only one or two records sung of this particular selection, the dealer and jobber would not have to waste the space, the investment, nor try as many records for the customer. That this has been tried out and evidenced is shown by the fact that most of our manufacturers to-day are keeping their catalogs in much better shape as to quantity than was done a number of years ago.

About Cut-Outs and Exchanges.

Considerable has been said and done in this industry regarding cut-outs and exchange propositions. If I were a manufacturer I would not be afraid, as said above, to cut out dead wood, but I would not cut out a great big bunch of goods and compel the dealer on a week's notice to get out his cut-out list and return to the factory on even exchange within another week's time. This, it would seem to me, means considerable work for the dealer, for the jobber and for the manufacturer, all piled into a short period of time, and all at a loss. It makes business to a large degree come to a standstill, and a lot of work is done without profit, while if this cut-out list were sent to the trade several months before they are actually cut from the catalog, it would give the dealer a chance to reduce his stock. If the dealer were permitted to exchange these cut-out records at his pleasure it would give him an opportunity to sell many of the cut-out records, particularly those that are good numbers but slow sellers. Under the old method the dealer would not take any risk of not selling the record, but would send it back. One manufacturer for many years extended a continuous exchange proposition on a basis of five to one, and this worked out very satisfactorily, as at no time could the dealer return

ANOTHER GROUP OF CONVENTIONERS ON THE SANDS.

an unlimited amount of records, as he was compelled to buy and pay for four every time he exchanged one. This method insured a constant income to the manufacturer and jobber, while the dealer had an opportunity to exchange his cut-outs at his pleasure, and the fact that he could do this without any particular annoyance while he was going along caused many dealers to invest more freely in the new records.

Anent Exchange Propositions.

In traveling about and at the meetings of the Eastern Talking Machine Dealers' Association I come in contact with a great many dealers, and when they open their hearts and talk about their drawback I find that the exchange propositions are of considerable annoyance to them, causing complaints about records that are cut out from the catalog and on which no exchange proposition is offered for a couple of years or more. The next strongest objection by the more progressive dealer is that no difference is made in the catalog prices on cash or time sales. All progressive dealers sell goods on time, but no difference is made between cash and time price, which is not fair to the consumer who buys for cash, and which is not fair to the dealer who has to carry installment accounts, and it is not fair to the jobber who has for that reason to carry a good many dealers' accounts. One manufacturer has gone so far as to furnish his trade with circulars covering certain types of machines with records as outfits to which 10 per cent. is added to the cash price, and if I were a manufacturer I would unquestionably print the regular cash prices in my catalogs, followed with the word "cash," and I would state that the installment prices are 5 per cent. to 10 per cent. higher, varying according to the terms on which they are bought. Then if a dealer sold for cash the consumer would get the cash price. If he desired more than the thirty days he would have to pay the 5 per cent. additional, and if he desired to buy on longer terms than extended by some the dealer could, according to his own judgment, vary the installment price from 5 per cent. to 10 per cent. I would then find that many dealers would increase their business because this additional 5 per cent. or 10 per cent. will pay them for carrying accounts and for collections. This would aid materially in obtaining good, substantial dealers for my output. Out of 335,000 pianos sold in the United States last year, 85 per cent. were sold on installments, and all, no doubt, at an advance over the cash price.

How Output Should Be Sold.

And now, gentlemen, I would like to have your close attention for just a minute while I state to you point blank that if I were a manufacturer I would sell my output through jobbers, but mark me, under no circumstance whatever would I sell any individual firm or department store unless they were actual jobbers, not jobbers on the letterhead, but jobbers in the full sense of the word. The country merchant does not feel the department store competition nearly as much as the city and suburban dealer. It is he who creates the desire on the part of customers to purchase, and then gets the response that the consumer can do this and that and the other thing with the department store which the dealer cannot afford to do because he gets a short line of discount, while to-day practically every department store gets a jobbing discount.

Now, gentlemen, I would like to have you take me to New York and show me a department store that will sell me a bicycle or sewing machine, or practically any other line of goods on the installment plan with the exception of talking machines and pianos. You do not buy a bicycle on time from Mr. Department Store at any price, but you can buy any talking machine they handle at almost any department store at the cash price and have no end of time to pay for it. One of the New York stores sells \$200 machines for \$10 down, the balance in twenty monthly payments, all at the cash price, and you must remember that the \$200 machine by some makers is sold at a shorter discount than any other line, and if I were a manufacturer I

would certainly stop such unfair competition and such unbusiness-like methods as to sell a department store as a jobber when they are not jobbers. There is nothing fair in it, and it is only a question of time when this method of selling will be gradually eliminated. In fact, some manufacturers are eliminating it now, and trade is appreciating this elimination very thoroughly.

Educating the Dealer.

Now that I have called your attention to the dealers' view of a number of things, I would like to give you one dealer's view as to what I would do if I were a manufacturer from an entirely different point of view. Every manufacturer has genial salesmen who look after the general welfare of the factory's business. They are salesmen, and as a whole do good work, or otherwise lose their jobs, but if I were a manufacturer I would employ a few thorough business engineers who could spend a day with every dealer, whether he is progressive or a dead one, so that he could show the different dealers what methods are pursued by other dealers to increase and hold the business. A practical business man could show the dealer who does not sell on installments how he can make installment sales pay. He can show the installment dealer how to improve his collections. He can show the advertising man how to improve his advertising. He could show the dealer who has heard about recitals and church work just how to get at this inexpensive and yet profitable manner of advertising his talking machines. He could give him no end of points as to the best method of carrying records. He could show him that if he sold a cabinet with each machine whenever possible that the consumer would get more service out of his machine and have his records kept in better shape and have a desire to fill up that cabinet with a selection of records. By the time this business engineer had shown the dealer a few good points and inspired him with a bunch of optimism, Mr. Business Engineer would be likely to walk away with a much fatter order than the genial salesman with his two for a quarter cigars.

It will take the legitimate dealer and merchant to plough up the surface of this industry which is to-day hardly scratched, when compared with its possibilities.

Storck Chats of Dealers' Association.

After the close of his address Mr. Storck took occasion to request that the jobbers and their travelers covering the Eastern States should bring to the attention of dealers in their territory the fact that an allied association existed among their fellows, and urge them to become affiliated with it. Mr. Storck stated that many excellent dealers hesitated to join, under the impression that there were already plenty of members to do the work, but, as a matter of fact, every additional man enrolled served to strengthen the association to an appreciable degree.

McMenimen's Remarks.

H. N. McMenimen, general manager of Sheip & Vandergrift, Inc., manufacturers of the Music Master horns, was next called on by the chairman, who dwelt upon his extensive experience, gained through many years of connection with different branches of the trade. Mr. McMenimen took occasion to emphasize his belief in the great future for the talking machine industry, which, he stated, was simply in its infancy, and in many instances suffering from the usual run of troubles peculiar to infant life. He also emphasized the great value of advertising, and stated that his firm had doubled their appropriation for the coming year in that department.

Gift for Mr. and Mrs. Whitsit.

After the various speakers had been heard from James F. Bowers arose, and in the most eloquent and touching manner presented to the president and Mrs. Perry B. Whitsit a magnificent dinner set of china, together with an immense cut glass punch bowl, a necessary adjunct. The gift was an expression of the deep esteem in which the members of the association, individually and collectively, hold Mr. Whitsit, and

that gentleman was so surprised and affected by the gift that he was totally unable to express his appreciation in words, but there are times when actions are more eloquent than language.

Other papers to be read were by James F. Bowers and J. N. Blackman, but owing to pressure of time it was necessary to pass them. Both papers are published herewith.

THE DUTIES OF AN ASSOCIATION MEMBER.

By JAMES F. BOWERS.

I have been asked to address this association on the topic which heads this paper. I take it that the committee which assigned me this topic had in mind the duties which members owe to the association, to the trade which they represent, to themselves and to the manufacturers whose goods they handle. This trade is especially and particularly fortunate in having for a mouthpiece the remarkably ably conducted trade journal known as the "Talking Machine World," edited and directed by one of the foremost men in the newspaper profession—Col. Edward Lyman Bill—and I could not possibly present anything more forceful and interesting on this topic than to quote from a recent editorial in this paper.

"There are some jobbers who are not doing

JAMES F. BOWERS.

their full duty to the manufacturers and to their constituency by adhering to too conservative a policy. They are not working their territory as they should. They are not spending the money for developing their trade. Now, many dealers are unacquainted with talking machine possibilities. They entered the business with little or no knowledge of the peculiar environment of the talking machine. They simply looked upon it as a good thing and their very ignorance of the trade situation is holding back their own development. Now, it is the jobber's business, because the jobber stands between the dealer and the manufacturer, to aid them. It is the jobber's business to enthruse—to educate and to train his trade, and he cannot do this if he hides his business light under the bushel of indifference. He must be up and doing. He must exploit his product and let the talking machine men in his vicinage understand that he is in business and that he knows the talking machine trade from A to Z, and that he has got special attractive features.

Big Future for the Talking Machine.

"There are thousands and thousands of people in this country who have no adequate conception of the evolution of the talking machine

and its present position as an entertainer and instructor. Now, they are the people to interest, and an association, whether composed of jobbers or dealers, can forward the interests of all members if it simply injects a little trade enthusiasm into the business. The dealers of the East have recently formed an association, and it seems to be in excellent working order and is taking in new members all the time. Now that's the kind of work which counts, and organizations which bring men of a particular trade into healthy contact will be beneficial. They will help the manufacturing department and they will help themselves. In fact, all will be benefited by the adoption of modern, progressive and up-to-date ideas, and there is no question but that there are some men in the talking machine trade who need some of the ginger spirit.

"There is a good opportunity for talking machines. Excellent. A widespread publicity in every line has created with the consumer new wants, because advertising has brought about a change of conditions. It has changed luxuries to necessities. Not only is this true of the city dwellers, but the farming communities are demanding the best of everything. The farmer must have his automobile, his player-piano, and why not his talking machine? To our minds, continuous advertising has brought about the actual demand for these things, and it has helped to raise the standard of living. It has impressed upon the people the necessity of having certain articles in their household which formerly they viewed as luxuries. Why should not the talking machine men have their share of the increased demand? Why has the great consuming public come to make these demands? By education; and who has been a greater educator than the national advertiser? Who has taught the world that progress is possible only by elevation to a higher standard of living? The public is taking to itself the best of music and good pictures. The public is reading more and better books than ever before in the world's history, and this means a greater consumption of paper, ink and other accessories. The average man and woman are better dressed than ever before. We ride in better carriages, in automobiles, and our railroad coaches are better appointed as regards the comfort of the traveling public."

It is hard for me to offer anything better than the extract from the Talking Machine World here given. Papers read at such gatherings as these are, as a rule, trite and often dull, and since brevity is the soul of wit and of common sense, too, there seems to be no need for a rambling list of platitudes and commonplaces.

There are other duties as well owed by the members to the association, and particularly to its hard-working officers. Prompt, cheerful and courteous attention should be given to communications and requests from the secretary. Prompt remittances should be made to the treasurer for all dues and liabilities. These are somewhat homely, but are immense factors in the smooth and satisfactory working of this or any other organization.

REASONABLE REGULATION OF COMPETITION

By J. NEWCOMB BLACKMAN

This subject as applied to the sale of Edison phonographs and Victor talking machines, treats particularly of the establishment of additional dealers and jobbers. The manufacturer has, generally speaking, for several years been attempting to supply a demand in excess of the supply. The situation, however, in the last two or three years, with the exception of certain special goods, could hardly be thus defined.

Most of those jobbers and dealers who have large investments and consider the business as profitable have greatly helped the manufacturer to stand a business depression. Should they not be rewarded for this by a reasonable pro-

tection from additional competition when the business they have been waiting for has returned?

Effect of Weeding Out Process

The weeding out process has removed, in most cases, representation which probably never was very desirable. If those remaining can feel that they are fairly protected against further competition it will greatly encourage them to in every way improve their facilities and extend their business.

I attribute the falling off in the sale of low priced goods, not only to the fact that the public who purchased same were most affected by hard times, but the fact that the dealers capable of selling low priced goods only never did represent the qualities necessary to permanently produce good results. In other words, they were carried along by a wave of prosperity and created but little business of their own effort.

High Grade Goods and High Grade Dealers.

The situation has changed—the manufacturers seem to realize that we must have high-grade goods, and it takes dealers and jobbers

J. NEWCOMB BLACKMAN.

of financial standing and ability to give successful representation of the product to-day.

There is no question but that the standard of the goods has advanced much faster than the representation. The system of requiring an application for the further establishment of dealers has been the strongest factor in retaining those who are a credit to the organization. I think the greatest care should be used in handling applications for dealers' and jobbers' privileges. Those in the field should have first consideration and unless there be no question about additional representation being necessary would it not be a better plan to first give those in the field a chance to meet the requirements called for?

There are, no doubt, cases where the trade have the capital and the ability, but for some time have simply lost the necessary confidence to enable them to produce the desired results. On the other hand, if they cannot possibly be enthused, the business cannot stand still and they must then make way for successors more in keeping with the progress of the industry.

Agent Kinds of Representation.

Suppose we consider what is satisfactory representation among jobbers and dealers and how this can be determined. We will consider first the jobber. There are several kinds—one represents the jobber who is doing a real jobbing business and fulfilling the purposes of his mission. He carries a representative stock, enabling him to give prompt and satisfactory service to dealers; has invested in the business a large amount of money, represented in stock on hand and credit given dealers. This type of jobber has been one of the strongest factors in helping the manufacturer withstand the business depression.

Then, we have the jobber who is simply a large dealer—his main or perhaps entire business is retail. Perhaps in a few cases the manufacturer may be justified in giving him the jobbing discounts, but what does he do during a business depression?

Then, take as another class the jobber who handles talking machines exclusively. Here we have different kinds of representation, but each entitled to protection in accordance with what he produces for the business as a permanent industry. The one handling talking machines exclusively gives his entire time and attention to the business, which should be an asset in his favor. The jobber whose main business is wholesale is supporting hundreds of dealers and even though he were to discontinue the business his good work would continue through the dealers he has established and supported.

In the case of the jobber operating for retail purposes only, he would leave behind very little, but some retail customers should be discontinued. Then, again, is he not more likely to desert the organization at a time when he is not needed? This is also true of the jobber who handles the goods as a side line, as compared with the one who handles same exclusively. Now when the acceptance or rejection of the application is being considered are these conditions not worthy of careful analysis? We should encourage the old staidy among jobbers and dealers, especially if he is still enthusiastic and willing to keep step to the march of progress. The cloak of protection against competition should be removed in the case of the dealer who can be classed as a "dead beat."

Why should a dealer be protected from further competition and continue to enjoy dealers' privileges when uncollected judgments are recorded against him by jobbers, because he has his resources unjustly safeguarded against his creditors? He will continue to find victims, but in any event he is receiving dealers' privileges and enjoying the benefits, even though he may thereafter pay cash for his goods.

I don't refer to the unfortunate but honest dealer, but the "professional dead beat."

Factories Can Regulate.

The factories can regulate this by a suitable clause in their agreements reserving the right, upon satisfactory proof, to suspend such dealers, as they would in the case of price-cutting. The manufacturer who first takes this action will be heartily commended by jobbers and thousands of dollars charged to profit and loss each year will be saved and make the line that much more profitable. Among the "dead beats" you can usually find the price-cutters. Stand by the honest, faithful, enthusiastic jobbers and dealers. Protect them to the limit against unreasonable competition and the "dead beat," with whom they cannot compete. Look over the present list of suspended dealers and analyze their standing among jobbers.

Facilities for Handling Business.

The time has come when I think a great deal depends on the facilities for getting and handling business. If the new applicant is willing to build record booths, carry a complete stock and in every way conduct his business in keeping with what might be termed an up-to-date talking machine establishment of to-day, it is certainly time for the present dealers in that locality to measure up to this important feature of the business, if they are to be protected.

The day of a single demonstrating machine with each one waiting his turn is about over. Prices are restricted and service is what will get the results.

The manufacturers are to be commended on the wonderful campaigns of advertising and it is only fair that the trade should be so equipped, both by facilities and salesmanship, to turn the prospect into a sale. As the jobbers are now furnishing detailed information to the factories regarding the purchases of their dealers it should be a simple matter, with this information and a report on the representation in other ways, to make a fair decision on every applica-

granted where we are not properly represented

(Continued from page 33.)

tion. Undue haste in a decision is probably as much responsible for a mistake as anything else. The trouble with a good many of us jobbers seems to be that we don't want competition where the territory represents our dealers, or where we don't have the order of the applicant.

Let's try and get right down to the cold facts of each case and leave out the selfish part. The size of the first order should not be given too much weight, especially when it may have been padded to influence the decision and the stock will probably be allowed to run down below

what should be expected. The dealers who are carrying in stock the high-priced goods and going after the better trade should certainly be encouraged, and this fact considered one of the main points of good representation.

In summing up this situation, let us consider it as follows: The manufacturer has a large factory, representing a big investment, and expects a reasonable return on the money. This is often the case with the jobber and the dealer, but let us avoid "robbing Peter to pay Paul." Ferret out towns and cities that are not represented and put the greatest effort there,

rather than encourage the attempt to take "two bites out of a cherry."

Let us all remember that regardless of our own personal ideas or selfish ambitions we must make allowances for the other fellow, and the fact that the talking machine business is constantly growing, broadening and reaching higher standards. If the jobber and dealer cannot keep up with this steady march of progress is it not time that he make room for those who can? Suppose we all try to be reasonable in that knotty problem of competition. I think the ultimate result will make it worth while.

The Jobbers' Banquet Was a Pronounced Success

The fourth annual banquet of the National Association of Talking Machine Jobbers was held at the Shelburne on Thursday evening, July 7, with about 125 members, friends and guests seated around the festive board. The following was the special menu prepared for the occasion:

Martini Cocktails		
Canape Shelburne	Relishes	
Sauterne		
Little Neck Clam Cocktail		
Cold Tomato Broth en Tasse		
Sea Bass Saute, Meuniere		
Cucumbers a la Shelburne		
Sirloin of Beef Pique a la Printaniere		
Louis Roederer, 1900		
Potatoes Fleurette		
Fried Tomatoes, Cream Sauce		
Oyster Bay Asparagus, Butter Sauce		
Oriental Punch		
Cigarettes		
Hearts of Lettuce.		
Roquefort and de Brie Cheese		
Genoise Ice Cream	Cakes	
Cigars	Coffee	

The diners were seated at individual tables, and this arrangement added much to the enjoyment of the dinner and took away from it the sense of stiffness and formality. At the speakers' table were seated Perry B. Whitsit, president of the association; J. Newcomb Blackman, vice-president; J. C. Roush, secretary, and Louis Buehn, treasurer, together with Frank L. Dyer, president of the National Phonograph Co.; Louis F. Geissler, general manager of the Victor Talking Machine Co.; Edward Lyman Bill, publisher of The Talking Machine World, and James F. Bowers, who acted as toastmaster, a position which he filled to perfection.

Toastmaster's Introductory.

After the varied courses had been finished and cigars lighted, Toastmaster Bowers rapped for order and said:

Ladies and Gentlemen—We have now reached that stage in the proceedings when a solemn-faced gent rises up on his hind legs and assures you that he is the toastmaster. He begins by telling funny stories. I am not going to do any of those things. As a matter of fact, I do not belong here; I am an interloper. I should be merely a looker-on in Vienna. The gentleman who should be here, if he could combine in his personality his brains and my nerve, would be in my place; but he is a diffident man and asked me to go to the front for him, and here we are, such as we are.

We have reached that stage of the proceedings known as the flow of soul and feast of reason, and as a preliminary to the flow of soul and to the feast of reason, I propose that you ladies and gentlemen rise in your places with your glasses in your hands, and that you drink a toast to the health and long life of the greatest of living Americans and one of the world's few great men, Thomas A. Edison.

Letters of Regret Read.

We have received during the preceding months several communications of importance to this gathering, which I will present in their chronological order.

A letter dated June 8 from Camden, N. J.: "J. C. Roush, secretary National Association of

Talking Machine Jobbers. My Dear Mr. Roush—Your favor of April 28 has just reached me. I thank you for your kind invitation to attend the convention of Talking Machine Jobbers. I greatly regret that I will not be able to attend, but I assure you that the honor you have done me in naming me as one of the guests of honor and making me feel that I have not been forgotten by my old friends during my long absence is appreciated more and made me happier than words can express. Yours very truly, L. F. Deuglass."

A letter to Mr. Roush: "Dear Sir—I regret to have to inform you that on account of important business developments which cannot be otherwise arranged, it will be necessary for me to be in Europe on the date upon which your association holds its annual meeting at Atlantic City. I can assure you that I would not allow any ordinary matter to interfere with my acceptance of your courtesy. If you understood the circumstances, I am quite sure that you would feel perfectly satisfied that my course in this matter is best for the general interest of the talking machine business all around, and as that is the purpose of your association, I have no doubt that everyone will be satisfied in the long run. Yours very truly, Eldridge R. Johnson."

Letter dated June 23 to Mr. Roush from Camden: "Dear Sir—Your letter of June 22 reached this office just after Mr. Johnson had left to start on his European trip. He has prepared a letter to the Jobbers' Association which, on account of its nature, should be read by one of the officers of the Victor Co. I shall, therefore, hand it to one of our officers, who will communicate with you at Atlantic City, so that you may know whom to call upon at the proper time for the reading of Mr. Johnson's letter. Yours respectfully, R. L. Freeman, Private Secretary."

That brings us quite up to the matter in hand. Mr. Johnson is most fittingly and ably represented on this occasion by a gentleman highly esteemed and highly venerated and honored by all of the trade who know him, the distinguished general manager of the Victor Talking Machine Co., L. F. Geissler, whom I have the pleasure of presenting. (Applause.)

LOUIS F. GEISSLER'S REMARKS.

Ladies and Gentlemen—I want to take advantage of this opportunity to express my personal thanks for your invitation to be present, and to congratulate you upon the success of your organization, as evidenced by the largely increased attendance this year. I think that you are under great obligations to your officers and their assistants for their interested and disinterested and altogether good work in increasing your membership and in increasing the enthusiasm which you evidence in your association. I think you are accomplishing a great deal of good, a very great deal of good, and getting together this way annually cannot help but instill in you a little more enthusiasm. I believe you will go home and try harder to sell the goods from which you derive your profits.

I want to reiterate Mr. Johnson's regrets at not being with you. Usually at this time of the year he is compelled to go away, sometimes on account of health, but always on account of business, and it calls him to Europe just about

the time of your association's gathering. Last year he intended positively to be here, and had figured on that until some six weeks ago, when he found it impossible to attend, and I will try to read to you the letter to which Mr. Bowers refers, and in so doing congratulate you on escaping further remarks from myself.

Eldridge R. Johnson's Letter.

Gentlemen—Your secretary, J. C. Roush, has suggested that I prepare a paper to be read before your convention. To prepare a paper really worthy of such an occasion is a task

ELDRIDGE R. JOHNSON.

requiring more time than is at my disposal; therefore, I will make but a short review of the situation in a general way.

In preparing my paper for your convention last year, I had ample time and a virgin subject, and I feel that I am justified in again referring to the generalities covered on that occasion.

If you will remember, the paper showed the talking machine business not to be a passing fad. I think I succeeded in substantiating my claim that although it was a new art, it is a permanent industry.

The paper also pointed out strongly the possibility of an original and progressive policy on the part of manufacturers, and the advantages of close co-operation and confidence between the manufacturers, jobbers and dealers. I am proud to say to-day that I feel fully vindicated in the forecasts that I made at the time and I feel that the policies outlined are being followed with ever increasing confidence by the trade in general to our mutual benefit.

The Victor Co. is enjoying a wholesome growth. We feel that we have impressed the trade with the honesty of our purpose and we know that there is a better feeling and a more general understanding of our motives than ever before—which has brought us a more generous support in general from the trade than it has ever been my pleasure to even read about.

This position, while very gratifying, does not

satisfy us; we are anxious to outdo ourselves in this respect. We are anxious to hasten the harvest of prosperity which we know the future is holding in store for the talking machine business in general.

Our method of doing business is almost as new as our business. The doctrine of reasonable prices and of maintained prices is one that will win and come triumphantly out of the world of confusion created by the efforts of the Federal Government to regulate the quarrels between great concentrated business interests and great aggregations of independent business interests. Big results are forming themselves into tangible shapes midst the fermentation of the great business questions of to-day. Never before in the history of the world have the commercial interests made such a successful attack upon political interests, and I believe that when an irresistible body attacks an immovable object, a compromise is the logical conclusion, but the best of all, we, if we live to a reasonable length of life, will see highly satisfactory results in many instances.

While the Victor Talking Machine Co. strives to improve its business methods, as well as its goods, we will make no radical change in the method of marketing our goods. We have the courage of our convictions and the honesty of purpose to keep us fair to the system and square to the merchants that are distributing the goods for us to the public. This system, to which a price maintenance is necessary, is not based entirely on patents; but if it was, we have the patents to keep things going for quite a while.

The Berliner patent expires in February, 1912. Some profess to think sooner. We do not think so, and will fight to the limit in the matter of backing up our opinions in this respect. At any rate, we do not depend on this particular patent for our patent protection, or for price maintenance.

You all know the condition of the disc talking machine business when we entered the field. You all know its condition now, and I feel safe from contradiction in saying that it has been incomparably improved. You all know what company is responsible for the improvement, and you must know that we have patented every step. If you don't know it, let me tell you that we have to the very best of our ability, and that we have secured within the past two or three years patents that are the most valuable that have ever been issued in the talking machine art. We are, we believe, now quite prepared to repulse any raid that may be made on our business at the expiration of the Berliner patents, and we believe that there is likely to be more litigation in the next five years concerning talking machines than in all of the balance of the previous time put together. We don't intend to confuse or irritate the trade with continuous warnings. We are not going to fight our battles with circulars. We will make dignified statements if the occasion requires them from time to time, and that will be all. We simply ask you to have confidence in us and to wish us success and to do everything that you can to support us in the stands that we may take or in litigations that are forced on us. It will be far better for the trade in general if we win; but, as I have said above, we do not depend on our legal department to keep us going.

The Victor Co. is now a strong commercial and manufacturing organization. We do not make large percentages of profit. Let me give you a few facts and figures: We could invest the capital invested in our business in Pennsylvania railroad stock and pay twice the dividends we have been paying for the last ten years, besides accumulating a surplus that would double our capital eventually. The Victor dividends now net but 2 per cent. on the actual assets of the company, after counting good-will, patents and all our unestimated valuable matrices at the sum of \$2. Our turnover is large and is growing very fast. We have the most

economical factory installations that can be devised, and we have systems installed and now working that are so efficient and novel that experts from all parts of the world come to examine them. With all these things, we are content with less actual profit and less dividends per capital invested than the Pennsylvania railroad or any other concern we know of. This is what we think will be admitted as conservative, and as building ourselves up on a solid foundation.

You know what our goods were a few years ago; you know what our goods are to-day in the matter of quality. We know what we aim to be in a few years hence. We will improve if we have to stop paying even the dividends we are now paying. Just watch us improve and watch us grow, and the whole trade is going to improve and grow with us—but we must have the confidence of the trade; we cannot thrive without that. We want to deserve the success we hope to attain and we hope the trade and our competitive manufacturers will catch the spirit of our policies. They are new, good and successful.

Let me sum up as a parting shot:

Let the trade have confidence in us.

Let the Victor Co. increase its confidence in the trade.

Let the trade strive to gain more confidence in the talking machine business.

These three recommendations attained means success itself.

A Letter from Thomas A. Edison.

The Toastmaster—Under date of May 4, 1910, we have this communication addressed to our secretary: "My Dear Mr. Roush—Mr. Edison has turned over to me your very kind invitation to him of April 28 to attend the meeting of the National Association of Talking Machine Jobbers at Atlantic City in July next. Mr. Edison's engagements are so uncertain that he cannot see his way clear to a definite acceptance of your kind invitation. He wishes me, however, to thank you very sincerely for remembering him. Believe me always, yours very truly, Frank L. Dyer, President."

We were honored this time a year ago, ladies and gentlemen, as you distinctly remember, by the presence of Mr. Edison with us. The note which I have just read from Mr. Dyer explains the fact of his not being with us to-night. Mr. Edison is a man who is somewhat averse to public appearances, and the fact that he consented to honor the gathering last year in this place is one of the most substantial compliments the organization has ever received.

Lacking Mr. Edison himself, he is represented at this time by a most worthy and most competent and most fitting representative, the president of his concern. I have the pleasure of presenting to you Frank L. Dyer, the president of the National Phonograph Co., who will address you on the subject of "The Undesirable Dealer." (Applause.)

FRANK L. DYER'S ADDRESS.

Mr. Toastmaster, Ladies and Gentlemen—I hoped to be able to prepare some sort of a formal paper to be presented here to-night, but have been unable to do so because most of my time for the past two months has been spent away from Orange in connection with matters relating to the development of the new storage battery on which Mr. Edison has been working so long. So that if I may be permitted to say a few words in an informal way, I would like to discuss very generally a question which I think enters fundamentally into the talking machine business.

An Interesting Comparison.

I most assuredly agree with Mr. Johnson, for whose opinions I entertain the highest respect, in his statement that the talking machine business is a permanent industry and has a tremendous future. If ten years or more ago I had occasion to go to any one of our jobbers as a business proposition and told him that I had two schemes that I would like to present to him, and that I would like to have him select the scheme that was the most likely to be profitable,

I have not the slightest doubt as to what his decision would be. One of the schemes which I would have presented would be the making of an amateur camera, by means of which people could take photographs in an amateur way and have them developed in regular photographic establishments, and the other would be the production of a machine by means of which records of music could be sold at a small price to the public. I do not think any of you, having the choice of those two schemes, would for a moment hesitate to say that the one that held out the largest possibilities of hope for the future would be the talking machine; and yet the business of the Eastman Kodak Co., with whom we have very close relations in connection with another branch of our business, netted them in actual profits last year more than was made by all of the talking machine companies of this country and probably more than was made by all of the talking machine companies of the world. That business has been developed and brought to an enormous success.

Many Undesirable Dealers.

The talking machine business developed very rapidly and they were sold at first largely as a novelty, and there can be no doubt, I think, but

FRANK L. DYER.

that there are many dealers in the business who are undesirable. I have been told that there are many men who pretend to be phonograph dealers who carry one machine and fifty records, or less, and they have been dealers for many years. In many cases such dealers are thorns in the sides of other men who may be enthusiastic, may be most anxious to make a success of the business, and I believe that the jobbers should co-operate with us in our efforts which we have been carrying on for a year or more to eliminate these dealers and to leave a corps of active, industrious men who will handle the business in the way it should be handled.

At the present time, merely to make a comparison with another company and speaking, of course, for the National Phonograph Co. alone, we have in the neighborhood of 13,000 dealers. The Singer Sewing Machine Co., which in some respects bears an analogy to a talking machine company, is capitalized at \$90,000,000 and its stock is selling at the present time for something over \$300, so its assets as represented by its stock value are upward of \$280,000,000. Roughly speaking, that might be considered as a hundred times the value of the National Phonograph Co., aside from the property of the Edison Phonograph Works, which makes the phonographs for us, and at that rate, in order that the Singer Sewing Machine Co. could be compared with ourselves in the number of its dealers, it would have to have 1,300,000 dealers in this country alone.

Only Active Men Wanted in Trade.

So it seems to me that it is most important that the undesirable dealer, the man who has

lost interest, the man who does not carry a stock, the man who simply stands in the way of his active competitor, should be eliminated, and the territory left to the active man who is willing to handle the business as it should be handled.

Protection Against Dishonest Dealers.

Of course, when I speak of the desirable dealer being left, I mean the dealer who is desirable in all ways, and one of the elements of desirability in a dealer is that he should pay his bills to the jobber. One of the objects of your association was that by means of co-operation you would in some way protect yourselves from the dishonest dealer, but for reasons with which I am not familiar it seems impossible to bring that result into effect. I understand that one reason is that there are some jobbers who are not members of the association and who do not co-operate with you. Mr. Dolbeer has told me that one of the requests that were made at the various meetings of the jobbers was to try, if possible, to interest the manufacturers in the subject of accounts, in order that the dealer who refuses to pay his account to the jobber might be removed from the dealers' list. Of course, we have no desire to enter upon the duties of a collection agency, because we have many other things to attend to; but from the point of view that when a dealer neglects to pay his jobber, he not only injures the jobber but injures us; we also are interested in that question. In a purely informal talk of this kind it is sometimes difficult to express oneself in the best possible way, and we often say things that we did not mean to say, so that in order that there may be no question as to where we would stand on such a question, I have written down briefly and have here a statement of just what we would be willing to do on this question, if it is a matter of interest to you; and I think this is as far as you could expect us to go.

What the National Co. Will Do.

In case of complaint by a jobber against a dealer in paying his account for Edison goods, when the complaint is concurred in by the other jobbers through whom the same dealer is signed, we will remove the dealer from the dealers' list if satisfied as to the correctness of the facts. The details, of course, to be worked out, and this practice to be resorted to only after all other reasonable efforts have failed.

I believe that if we can secure, and I think we have secured the co-operation of the jobbers in removing to as complete an extent as possible the dealers who have lost interest in the business and who do no good, either to the jobbers or to the manufacturers, the business will be put on a very much better foundation than it is and will develop certainly to the extent of the amateur camera and possibly to the extent of the sewing machine. (Applause.)

C. H. Wilson Wires Best Wishes.

The Toastmaster—We were hopeful, ladies and gentlemen, up to the last minute, of the presence here to-night of C. H. Wilson, of the National Co. This afternoon brings the following telegram to Mr. Roush: "Best wishes for a most pleasant banquet and successful ending of what I understand has been the most enthusiastic and best attended convention of your association. Extremely sorry I cannot be with you, and assure you that nothing but sickness in the family could keep me away. Will think of you all many times to-night and will be with you in spirit if not in person. Hope to see you all in Orange Saturday. C. H. Wilson."

Apropos of nothing in particular:

"Pleasant it is for the little tin gods

When great Jove nods;

But the little tin gods make their mistakes

In missing the hour when great Jove wakes."

That is merely one of those flashes of intelligence which I sometimes have which are almost human. This has no relation whatever, nor has it any bearing. Jack Bunshy says, "The bearing of this here observation lies in the application on it."

One of the most pleasant facts and factors of our annual gatherings for the past several seasons has been the presence of a man whom in

honoring we honor ourselves, a man who controls one of the mighty engines for the dissemination of that which never dies, the only thing which never dies, words, not mere words, not empty sounding phrases, not tinkling cymbals and sounding brass, but sound, sane, solid reason, argument, fact—a gentleman whose personality is as charming and as bright, as pleasing as his wit and his eloquence; the very Prince Rupert of debate, the Prince Charming of trade journalism.

Ladies and gentlemen, I have the pleasure of presenting to you Colonel Edward Lyman Bill, the editor of The Talking Machine World.

EDWARD LYMAN BILL'S REMARKS.

The famous Doctor Johnson was discovered one day by Mrs. Johnson kissing one of her serving-maids. "Why, Doctor Johnson," said the wife, "I am surprised." "No," said the recreant husband, "that is not exactly right, dear, I am surprised; you are astonished!"

Now, I was surprised when the chairman of your arrangement committee extended a cordial invitation to me to talk to you again this year, and no doubt you are astonished at the ready response on my part to his invitation, but, somehow, I have a fondness for the talking machine people and I cannot very well keep away from them.

I was at the birth of the association in Buffalo in 1907, and I do not want to live long enough to be at its death. I wish to congratulate you, Mr. President, on the splendid advance which your association has made in many ways. It perhaps is at times difficult to tell just what amount of good may be credited to the combined work of all, but it is admitted by thinking men everywhere that through associated efforts much good has been accomplished in this and other trades.

Why Jobbers Should Be Interested.

It would seem to me that every jobber of talking machines in this country should be included in your membership roll, and that your platform should be broad enough for all to stand upon. The talking machine industry is not large and the interests interlock so closely that there should be a broad receptive spirit manifested on the part of your organization so that the entire jobbing trade of this country should act in a harmonious, united way.

I believe that when a company of business men meet for a calm consideration of matters which have a direct bearing upon their business interests that they are apt to agree upon measures which will tend toward trade uplift.

I am proud to be allied with the talking machine industry, and I have taken pleasure in studying it in all its details, and I believe that to-day the business is rapidly coming into its own as a recognized creative industry. It is doing something.

Talking Machine an Educator.

The talking machine has ceased to be regarded as a toy. It is looked upon everywhere not merely as a superb entertainer, ranking with the best, but an educator and a factor in the business world as well.

I believe that the men to-day engaged in the industry realize its broadening future, for, during the past few years there has been a weeding out of the weaker ones, and the industry has become more and more compact.

Such meetings as this which bring together leading business men from remote parts of the Union mean much to the future of the trade, for a healthy comingling and exchange of ideas and a discussion of matters of vital importance can have but one result. It must mean trade betterment.

The Effects of Competition.

Competition of course at times is severe, but good competition is essential to our continued progress and advancement, and that is the very essence of business activity. But the combat should be conducted according to the rules of honorable business warfare and not by deceit or unfair practices.

Fair competition demands the maintenance of

fixed prices, and you will find in the commercial world, in every line, that establishments which maintain fixed prices command the confidence of the public.

Merchants in every line are beginning to realize the truth of this more and more, and those who have remained outside of the one price breastworks are gradually finding this out, because one price is commonly reckoned as meaning business honesty, and without one price the whole system of selling becomes chaotic.

Value of Social Intercourse.

I have been interested in the social part of your gathering.

There is too much worry in life and a little relaxation from business is good for all.

There is danger in sticking too close to business. It pays to get outside—to mingle with other men—to discuss ideas—to frame up new programs for the future, and in that way one may take a broader survey of things which interest mankind.

One is oftentimes enabled to view local conditions in a clearer way after obtaining the views of others and getting a little respite from business cares. They can concentrate better, and the secret of achievement—of success—of business in life is concentration, and a man can best bring concentrated effort upon the solution of problems which interest him directly after he has refreshed and broadened his mind by contact with other men. He grows stronger—has greater courage. He can go ahead and plan a business campaign with greater confidence, and, as I view it, the talking machine men of this country have a brilliant future before them.

Confidence in the Business Will Be Repaid.

All they need to make that future secure in every way is to exhibit confidence in the instruments which they sell—in the principles which they adopt—in the entire environment of the business.

Manufacturers have shown their confidence by spending fortunes annually to acquaint people of the marvelous powers of the modern talking machine, and it is up to us all to do our part and show the confidence which we have in the business by resolutely facing the business future with that full measure of confidence which insures pronounced success.

The Toastmaster and the Ladies.

The Toastmaster—And now perhaps a word in behalf of the ladies. The ladies have observed, of course, that the general trend of the conversation as set forth by the speakers has been that of shop, but the ladies will kindly remember that if it were not for this shop they would not be with us this evening and wearing their pretty gowns. Therefore I hope the speeches have not been tiresome or tedious.

Mr. Dyer is very fond of a little couplet which runs to this effect:

"When this heart doth cease of motion;

When ye spread the somber pall;

Let me rest by grand Old Ocean,

Where the blue waves rise and fall."

We have been resting for a few days, some of us, by grand Old Ocean; not resting very much so you could notice it, but just resting.

Mr. Dyer also suggests this as a fitting sentiment:

"Gladys killed her nurse Corinne;

Hid her in the dark coal bin.

All that winter, hod by hod,

Nurse was lugged to meet her God."

Communications from Emil Berliner.

I presume it would be fit and proper at this juncture to read a communication written from the laboratory of Emil Berliner under date of May 18 and an additional communication under date of June 24: "Your esteemed favor of April 28 has just come to my hands, having been sent to me from Montreal, where they say it was just received. It is quite uncertain whether I can be in Atlantic City the beginning of July, and I beg you will not announce me as one of the speakers. If I can come, I shall let you know in sufficient time and will be glad to be an impromptu guest. I fully appreciate, as I have always done, the courtesies extended to me

by the National Association of Talking Machine Jobbers, and I beg to express my thanks. I am, yours very truly, Emil Berliner."

His second communication reads: "Replying to your esteemed favor of the 23d, I regret to tell you that I am not at all in good condition and have to keep myself quiet. This precludes my attending the convention, which I know will be an enjoyable affair, particularly the banquet. With renewed assurances of my appreciation, I am, yours very truly, Emil Berliner."

The set program for the evening, as provided by the master of arrangements, Mr. Roush, has been concluded. We believe that brevity is the soul of wit. We also believe that in brevity lies common sense. We have no desire to tire you. Also we, as I have had occasion to say before, are approaching that which is known in Atlantic City as the "shank or the evening" when things begin. In the quiet country places where most of us come from we are going to bed at this time, but here we are not going to bed so you could notice it.

A Closing Toast to the Association.

I wish to offer as the sense of this gathering, officers, ladies and gentlemen, members and guests, a little tribute from Miles O'Reilly. Not to know Miles O'Reilly is to argue yourself unknown. We have Biblical authority for that: "There are bonds of all sorts in this world of ours—

Fetters of friendship and ties of flowers,

And true lovers' knots, I ween:

The boy and the girl are bound by a kiss,

But we have a stronger bond, old friend, than this:

We have drunk from the same canteen."

And I propose to you that from the same canteen which has circled the festive board in the form of the beautiful crystal we pledge to the association, and in the further language of the compatriot of Miles O'Reilly, "Sinn Fein, Sinn Fein" (meaning ourselves), wealth and the health and the future and continued prosperity of the Talking Machine Jobbers, God bless them.

Those Present at Banquet.

Louis Buehn Ed. Buehn, C. W. Miller, Charles Lindauer, Louis Buehn & Bro., Philadelphia; Lawrence McGreal, Milwaukee, Wis.; I. Davega, New York; O. L. Neal, of Neal, Clark & Neal Co., Buffalo; Marks Silverstone, Silverstone Talking Machine Co., St. Louis, Missouri; L. A. Cummings, St. Louis Talking Machine Co., St. Louis, Mo.; E. F. Taft, W. H. Beck, Eastern Talking Machine Co., Boston; J. Fischer, C. C. Mellor Co., Ltd., Pittsburg, Pa.; H. S. Miller, P. B. Barnell, Frank Osmun, Penn Phonograph Co., Philadelphia; N. D. Towell, Eclipse Musical Co., Cleveland, O.; H. S. Davega, New York; A. W. Toennies, Eclipse Phonograph Co.; W. H. Reynolds, E. J. Brady, Wm. H. Reynolds Co.; R. L. Chilvers, His Majesty's Gramophone Co.; Montreal, Can.; W. C. Finch, Finch & Hahn; Robert Shaw, Western Talking Machine Co.; Winnipeg, Man.; Floyd D. Ramsdell, Sioux Falls Talking Machine Co.; W. A. Lawrence, Standard Metal Mfg. Co., Newark, N. J.; Nelson C. Durand, Edison Business Phonograph Co., Orange, N. J.; J. Newcomb Blackman, Blackman Talking Machine Co., New York; George D. Ornstein, Victor Talking Machine Co., Camden, N. J.; F. K. Dolbeer, National Phonograph Co., Orange, N. J.; Edward Lyman Bill, B. B. Wilson, The

Talking Machine World, New York; L. C. McChesney, National Phonograph Co., Orange, N. J.; Oliver Jones, Victor Talking Machine Co., Camden, N. J.; Lawrence H. Lucker, Minnesota Phonograph Co., Minneapolis, Minn.; L. P. Valiquet, J. F. Collins, Talking Machine Soundboard Co., Newark, N. J.; Frank L. Dyer, National Phonograph Co.; George G. Blackman, R. B. Caldwell, Blackman Talking Machine Co., New York; A. H. Jacot, William Zupff, Jacot Music Box Co., New York; Victor H. Rapke, New York; L. F. Geissler, Victor Talking Machine Co., Camden, N. J.; Max Landay, Landay Bros., New York; D. G. Williams, The Udell Works, Indianapolis, Ind.; Edwin D. Schloss, Irving Isaacs, E. Schloss Co.; New York, H. C. Brown, Victor Talking Machine Co.; Walter L. Eckhardt; J. W. Scott, F. E. Madison, National Phonograph Co.; C. P. Chew, Victor Talking Machine Co.; James H. White, Edison Manufacturing Co.

Among the ladies present at the convention were: Mrs. J. N. Blackman, Mrs. R. B. Caldwell, Mrs. Lawrence McGreal, Miss Gertrude Gannon, Mrs. M. Silverstone, Mrs. Fred Siemon, Mrs. Wardell, Mrs. I. Davega and sister, Mrs. B. F. Pierce, Mrs. Louis Buehn, Mrs. Edwin D. Buehn, Mrs. Perry B. Whitsit, Mrs. E. F. Ball, Mrs. A. F. Ferris, Mrs. F. K. Dolbeer and the Misses Dolbeer, Mrs. Oliver Jones, Mrs. Frank C. Storck and Miss Storck, Mrs. H. C. Brown, Mrs. G. A. Mairs, Mrs. N. D. Griffith, Mrs. I. S. Cohen.

THE BASEBALL GAME ON THURSDAY

On Thursday morning occurred the feature of the week in the entertainment line, namely, the baseball game between the East and the West, in which the latter proved victorious by the narrow margin of one run won in playing off a five-inning tie. The members of the two teams had been doing some hot practice work the previous mornings, had gotten their men working together in good shape, and were generally in fine fettle. Incidentally the players showed a surprising amount of talent and from all appearances the game might have been played by semi-professionals, so fine was some of the work.

The East won the toss-up and were first at the bat, scoring two runs in the first inning,

which the West immediately tied, after which it was nip and tuck until the scheduled five innings had been played, with both teams still tied with seven runs. In the deciding inning the West scored twice to the East's once, and "took home the bacon." There were many interesting and exciting features of the game, and so close was the playing that the man who reached home well deserved the plaudits of the observers.

The batteries were, for the West, Wiswell, pitcher, and Pierce, catcher; for the East, Moffett, pitcher, and L. Buehn, catcher. The umpires were F. K. Dolbeer, of the National Co.,

Seated on ground, left to right—C. M. Roush, B. L. Pierce, C. Blish. Seated on bench—Lawrence McGreal, L. C. Wiswell, A. F. Ferris, J. N. Blackman, Louis Buehn, W. S. Moffett, H. L. Royer, A. W. Toennies, R. C. Roush, Standing—H. H. Blish, H. C. Brown, F. K. Dolbeer, I. Davega, Ed. Buehn, R. H. Morris, J. Fischer, Fred. Siemon. Top row, seated—Lawrence Lucker, C. H. Andrews, D. D. O'Neill.

DOLBEER LAYING DOWN THE LAW.

M'GREAL PLAYED OUT.

B. J. PIERCE AT THE BAT.

and H. C. Brown of the Victor Co. The line-up was as follows:

East—W. S. Moffett, p.; L. Buehn, c.; A. W. Toennies, s.s.; H. L. Royer, 1b.; Ed. Buehn, 2b.; D. D. O'Neill, 3b.; J. N. Blackman, 1.f.; A. F. Ferris, c.f.; C. N. Andrews, r.f. West—L. C. Wiswell, p.; B. J. Pierce, c.; C. Cummings, s.s.; J. C. Roush, 1b.; Lawrence McGreal, 2b.; Lawrence Tucker, 3b.; H. H. Blish, 1.f.; Max Strasburg, c.f.; J. Fischer, r.f.

Louis Buehn was the best all-round player in the Eastern team, and besides holding everything the pitcher slipped to him and engineering some excellent plays, generally connected with the pellet when at the bat. Those who know Mr. Buehn can well appreciate the effort he made when he slammed a hot one out between first and second and landed home before the ball was discovered. Ice water and shade were very much in order. Lawrence McGreal,

as usual, furnished much amusement for those present. He is a "south pawed" batsman and thereby fooled the pitcher into giving him a free ticket to first on balls. Then "Cupid at the Bat" paddled along to the base with a glide that caused howls of laughter, only to be taken suddenly ill on each occasion and making it necessary for him to be carried to the bench and another man—invariably a good runner—substituted.

Burtou J. Pierce was the only man in full baseball regalia and it might be said that his playing showed that it was not simply an ornament. His coaching was a feature of the game and was of a decidedly acrobatic nature.

Mr. Dolbeer gave a decision in the fourth inning that did not please either side, with the result that he was immediately "mobbed" as a lesson to be more careful in the future. The "mob" scene came out to perfection in the mov-

ing pictures and were the more natural, as in the onset Mr. Dolbeer was taken completely by surprise. Mr. Brown's diminutive stature saved him from a similar fate, and besides he always had a bat handy.

Ferris, of the Eastern team, was the lucky man of the day. He missed everything he hit at, but always got his base on balls and then cantered home in safety.

To review the work of each player would take pages, but in short it was a great game and well worth while. Everyone was greatly interested in the playing and the teams were on their mettle. It is likely that where opportunity permits the baseball game will become a permanent feature of the conventions.

At the close of the game three large sight-seeing cars were provided for carrying the merry crowd back to the Chalfonte, after which a dip in the surf was very much in order.

VICTOR CO.'S ROYAL ENTERTAINMENT

Friday, July 8, was Victor Day in the truest sense and the Victor Co. arranged for special parlor cars to convey the talking machine conventionists from Atlantic City to Camden.

Immediately upon the arrival of the train, Victor teams conveyed the baggage of the members and friends to the Bellevue-Stratford, which was to be the Philadelphia headquarters. The guests registered at the Victor factory offices, and after registration each was presented with a handsomely embossed card case containing tickets of admission to the dinner and to the special yacht awaiting the assemblage at the wharf, also a complete program of the day and evening.

After an interesting tour of the great Victor factories, which was instructive in the highest sense, the harbor steamer "Asbridge" conveyed the association members and hosts down the river to a special resort known as "The Orchard," at Essington, where this delightful luncheon was served.

- LUNCHEON.
- | | |
|-------------------------------------|---------------------------------|
| Martini Cocktails. | Little Neck Clams. |
| Jellied Tomato or Chicken Consomme. | Soft Shell Crabs, Tartar Sauce. |
| Rhine Wine Cup. | Philadelphia Squab. |
| Potatoes Julienne. | Corn on Cob. |
| Romaine Salad. | Victor Punch. |
| Crackers. | Coffee. |
| | Roquefort Cheese. |
| | Peach Ice. |

After luncheon the company gathered on the lawn and were photographed and then took to their home run.

The trip on the river was delightful, and nothing was lacking to add to the pleasure of the voyage.

The Victor hosts were on every hand, always acting with readiness to cater to every desire of their guests.

Upon the arrival of the steamer at the Philadelphia wharf, a special line of sight-seeing autos was awaiting and the talking machine people were treated to a trip through the streets of Philadelphia, where they inspected some of the historical buildings.

Reaching the Bellevue-Stratford, they then en-

joyed the climax of a great day's entertainment.

The dinner was served on the roof garden of the Bellevue-Stratford and was most enjoyable.

The menu was delightful, as will be seen by a reference to it.

- DINNER.
- | | |
|------------------------------------|-----------------|
| Crab Meat Flake Cocktails. | |
| Clover Club Cocktails. | |
| Cup Consomme Bellevue. | |
| Almonds. | Relishes. |
| Boned Brook Trout, Sante Meuniere. | Nuts. |
| Cucumbers, Pink Dressing. | |
| Barsac. | |
| Filet Mignon Oriental. | |
| Young Lima Beans. | |
| Moet et Chandon. | White Seal Cup. |
| Kirschwasser Punch. | |

| Heart of Lettuce Salad. | |
| Coupé aux Peches, St. Jacques. | |
| Macarons. | |
| White and Green Mint Frappé. | |
| Special Coffee. | |
| Cognacine Champagne. | Benedictine. |

Immediately after the conclusion of the dinner a vaudeville entertainment was in order. Oliver Jones, who was manager of ceremonies, arranged a delightful program, in which the following artists participated: Bramphin and Herr, vocalists; Larry Sharkey, monologist; James McCool, vocalist; Miller and Mack, clever steppers; Bixley and Fink, operatic comedians; Linden Beckwith, late prima donna of "The Midnight Sons"; The Four Song Writers, Monarchs of Melody, introducing Charles P. Shisler, Charles O'Donnell, Gus Benkhart and Bobby Heath.

This was considered the crown of the day's

FLASHLIGHT OF RECEPTION GIVEN ON ROOF GARDEN OF THE BELLEVUE-STRATFORD, FROM STAGE.

JOBBER'S ON LAWN IN FRONT OF COUNTRY HOME OF PHILADELPHIA ATHLETIC CLUB AT ESSINGTON.

entertainment, and was the first vaudeville entertainment ever given on the Bellevue-Stratford roof garden, but the Victor Co. arranged for this special concession and a stage was erected at one end, with all the equipment, footlights, etc.

At the conclusion of the program the appearance of Louis F. Geissler on the platform caused

they look after the pleasure of their guests that there was not an idle moment from the time the train left Atlantic City until the lights were out on the roof garden of the Bellevue-Stratford.

A pleasing souvenir was a handsome watch fob, on which the famous Victor dog appeared.

The visitors to the Victor factory July 8, 1910, were as follows: C. N. Andrews and wife, W. D. Andrews, Buffalo, N. Y.; G. C. Aschbach, Allentown, Pa.; D. M. Brown, Houston, Tex.; H. R. Bruder, R. Wurlitzer Co., Cincinnati, O.; W. S. Barringer, Wulschner-Stewart Music Co., Indianapolis, Ind.; L. B. Bergen, Paterson, N. J.; Mr. and Mrs. Louis Buehn, Philadelphia; J. F. Bowers, Lyon & Healy, Chicago, Ill.; H. B. Bertin, New York city; G. G. Blackman, J. Newcomb Blackman and wife, Blackman Talking Machine Co., New York city; C. R. Cressey, Cressey & Allen, Portland, Me.; R. B. Caldwell and wife, Blackman Talking Machine Co., New York; A. L. Chilvers and wife, Berliner Gramophone Co., Montreal, Canada; L. A. Cummins, Aeolian Co., St. Louis, Mo.; Miss E. Cohen, Baltimore, Md.; C. R. Cooper, Eastern Talking Machine Co., Boston, Mass.; W. O. Crew, Elmira, N. Y.; I. S. Cohen and wife, Cohen & Hughes, Baltimore, Md.; H. H. Blish and son, Harger & Blish, Des Moines, Ia.; I. Davega, Jr., and daughter, New York city; Harry S. Davega, S. B. Davega Co., New York; Mr. and Mrs. Edward Doshe, Dayton, O.; J. Fisher, C. C. Mellor Co., Pittsburg, Pa.; Edward Lyman Bill, New York; F. L. Fritchey, Cleveland, O.; Wm. C. Finch, Finch & Hahn, Albany, N. Y.; L. W. Loumies, Hoboken, N. J.; Florence Heppe, C. J. Heppe & Son, Philadelphia; Max Landay, Landay Bros., New York; Jas. I. Lyons, Chicago, Ill.; G. A. Mairs and wife, W. J. Dyer & Bro., St. Paul, Minn.; A. D. Melbourne, O. K. Houck Piano Co., Nashville, Tenn.; Mr. and Mrs. Lawrence McGreal, Milwaukee, Wis.; Miss Gertrude F. Gannon, Lawrence McGreal, Milwaukee, Wis.; Clarence E. Gore, E. F. Droop & Sons, Washington, D. C.; A. L. Owen, O. K. Houck Piano Co., Memphis, Tenn.; John Otto, Lyon & Healy, Chicago, Ill.; D. D. O'Neil, J. W. Irwin, C. J. Heppe & Son, Philadelphia; James K. O'Dea, Paterson, N. J.; Burton J. Pierce and wife, J. W. Jenkins' Sons & Co., Kansas City, Mo.; Robert C. Rogers, Washington, D. C.; H. L. Royer, M. Steinert & Sons, Boston; R. H. Morris, American Talking Machine Co., Brooklyn, N. Y.; Arthur H. Ferris and wife, Utica, N. Y.; Geo. E. Mickel, Nebraska Cycle Co., Omaha, Neb.; W. H. Reynolds, Mobile, Ala.; Laurence H. Lucker, Minneapolis, Minn.; H. Miller, Penn Phonograph Co., Philadelphia; Floyd C. Ramsdell, Talking Machine

Exchange, Sioux Falls, S. D.; C. M. Roush, J. C. Roush, Standard Talking Machine Co., Pittsburg, Pa.; W. C. Roberts, E. F. Droop & Sons, Baltimore, Md.; J. F. McArdle, Piano Player Co., Omaha, Neb.; Louis J. Gerson, John Wanamaker, Philadelphia; Morris J. Peters, Allentown, Pa.; Victor H. Rapke, New York city; E.

J. C. ROUSH FIGURING HIS PROFITS.

a hearty outbreak of applause from the assemblage. He stated, in a few well-chosen remarks, his pleasure and that of the Victor Co. in having the talking machine representatives with them.

At the conclusion of his remarks Mr. Geissler

L. F. GEISSLER, L. C. WISWELL, J. C. ROUSH.

stated that he had learned that Horace Petit, the general counsel of the company, was present, and he asked him to make a few remarks.

James F. Bowers arose and requested that Edward Lyman Bill, on behalf of the talking machine jobbers, express the appreciation of the visiting jobbers to the Victor Co. for the magnificent hospitality which had been accorded.

At the close of Mr. Bill's remarks all joined in singing "Auld Lang Syne."

The Victor Co. not merely planned a day of unusual entertainment, but so thoroughly did

JOBBER GUESTS OF NATIONAL PHONOGRAPH CO.

On Saturday morning the jobbers came over to Orange, N. J., from Philadelphia, as guests of the National Phonograph Co., and upon arrival were taken immediately to the company's plant in a score of automobiles. At the factory they were ushered into the laboratory, where they were entertained with the reproduction of the full series of moving pictures taken during the convention at Atlantic City by James H. White, of the Edison Mfg. Co. The visitors were much interested in observing themselves and friends in the Boardwalk parade, and when the

H. Blish and son, Harger & Blish, Dubuque, Ia.; E. F. Taft, Eastern Talking Machine Co., Boston, Mass.; J. F. Bowers, L. C. Wiswell, John Otto, L. V. B. Ridgeway, Lyon & Healy, Chicago, Ill.; Harry S. Davega, S. B. Davega Co., New York city; A. W. Toenies, Eclipse Phonograph Co., Hoboken, N. J.; James I. Lyons, Chicago, Ill.; Clarence Gore, E. F.

York city; George Blackman, Mr. and Mrs. R. B. Caldwell, Blackman Talking Machine Co., New York.

The following representatives of the National Phonograph Co. were in attendance to see that the jobbers were well looked after: Thomas A. Edison, F. L. Dyer, F. K. Dolbeer, C. H. Wilson, G. F. Scull, E. J. Berggren, Wm. Pelzer, L. C. McChesney, W. Stevens, N. C. Durand, E. H. Phillips, A. C. Ireton, C. E. Goodwin, W. L. Eckert, E. L. Aiken, L. W. McChesney, F. E. Madison, P. Weber, D. Holden, C. Schiff, J. W. Scott, J. Muenster, W. Nehr, J. Lang, W. Hicks, L. Ott, W. H. Miller, J. W. Aylsworth and John Rogers. This ended a most strenuous week and it was a very tired lot of talking machine men who left Orange late in the afternoon, homeward bound.

JOBBER AND FRIENDS PHOTOGRAPHED IN FRONT OF ESSEX COUNTY COUNTRY CLUB.

various interesting events of the ball game were flashed upon the screen they applauded to the echo. As was remarked, the pictures of the game were more amusing than the game itself. Next a number of the excellent films from the general catalog were shown, including an amusing "freak" picture, a war drama, and another comedy roll.

At the close of the entertainment Thomas A. Edison held a reception at the door as the guests were leaving to take the automobiles for the home of the exclusive Essex County Country Club. Owing to Saturday being a half-holiday it was not possible to have the jobbers inspect the plant under working conditions, but as a matter of fact there were few who had not had that privilege on previous occasions.

Arriving at the Country Club the jobbers and their wives were the guests of the National Co. at a most elaborate luncheon on the commodious porch, where the heat of the day was not felt in the least. A standing toast was drunk to Mr. Edison, who sat next to President Dyer at the head of the table.

The guests of the company on this occasion were Mr. and Mrs. Perry B. Whitsit, Columbus, O.; Mr. and Mrs. J. N. Blackman, New York city; J. C. Roush, C. N. Roush, Standard Talking Machine Co., Pittsburg, Pa.; Mr. and Mrs. Lawrence McGreal, Milwaukee, Wis.; Miss Gertrude Gannon, Milwaukee, Wis.; Mr. and Mrs. Burton J. Pierce, J. W. Jenkins' Sons Music Co., Kansas City, Mo.; Mr. and Mrs. Louis Buehn, Philadelphia, Pa.; Mr. and Mrs. N. D. Griffin, American Phonograph Co., Gloversville, N. Y.; Mr. and Mrs. G. A. Mairs, of W. J. Dyer & Bro., St. Paul, Minn.; Mr. and Mrs. H. L. Ellenberger, Pardee-Ellenberger Co., New Haven, Conn.; Mr. and Mrs. C. N. Andrews, Buffalo, N. Y.; Mr. and Mrs. Mark Silverstone, St. Louis, Mo.; Mr. and Mrs. Thomas Wardell and son, Lowell, Mass.; Mr. and Mrs. Arthur Ferriss, Utica, N. CONVENTION NOTES

Secretary J. C. Roush was heartily complimented on all sides for the excellent program he had arranged and the successful manner in which it had been carried out. There was not a hitch anywhere.

Toward the middle of the week many of those who had been down to Atlantic City over the holiday had developed cases of painful "boardwalk" feet and any suggestion for a stroll met a cool response.

The arrival of the jobbers at the Edison plant caught Mr. Edison slightly unawares, so he jumped into an automobile, raced to his home, three-quarters of a mile away, shaved, dressed and was back to the factory in fourteen minutes. He quietly stated that had he hurried he could have made it in eleven minutes.

Murder will out; there was nothing funnier in the moving pictures than the all too evident efforts of some to appear unconcerned and unconscious of the camera's presence. They'd never make a living as actors.

Among the ladies who enjoyed the convention festivities were Mrs. Frank C. Storeck and Miss Storeck of Red Bank, N. J., who lent their charming presence to the enlivenment of numerous occasions, while Mr. Storeck was dispensing some of his association enthusiasm.

Peter Weber, of the National Co. forces, has a great reputation as a daredevil automobile driver. When very cautious he takes sharp curves on two wheels, but as a rule prefers pivoting on one. He sometimes has hard work persuading his friends to take a spin.

A snapshot of Perry B. Whitsit, who was re-elected for the presidency of the Jobbers' Association for another year, and Jas. F. Bowers. Both men are good workers. Jas. F. Bowers was the first president of the association. Many term him "the father of the association," and no man has worked harder or more indefatigably than the first president to win out for the asso-

J. F. BOWERS, SITTING. P. B. WHITSIT, STANDING.

ciation in every way. He made many personal sacrifices of time and money to put the organization on a permanent footing, and like everything else, Mr. Bowers went at it with a vim and determination to win, and win he did. As toastmaster at the formal banquet on Thursday night he added to his many laurels, for he was effervescing with good nature and wit, which added greatly to the charm of the occasion. His poetical quotations were appreciated and warmly applauded.

That association interest is widespread is evident from the fact that there were two jobbers in attendance from far-off Texas, one from Winnipeg, Man., and another from Montreal, Can., while the intermediate sections were well represented.

E. M. Brown, of the Houston Phonograph Co., Houston, Tex., is full of figures regarding the

FUTURE TALKING MACHINE JOBBERS.

Louis E. Buehn, Philadelphia, aged 2. J. H. Wardell, Lowell, Mass., aged 5.

Lone Star State and has a most convincing way of explaining distances.

The announcement that Curtiss was making a flight invariably resulted in a grand rush for the Boardwalk, leaving the meeting room, lobby and other centers of attraction temporarily deserted. At the rate the aviator flew past haste was necessary if the flight was to be seen.

Walter L. Eckhardt made the run to Atlantic City to meet his old talking machine friends in his new Lozier car.

Mr. Eckhardt has added as a side line a spe-

"PEERLESS" WALTER L. ECKHARDT ENTERTAINING.

cialty which will interest talking machine men, and it will interest his old friends to know that he is having an enormous demand for his Peerless Suction Cleaner.

Associated with him is another talking machine man who has a wide acquaintance with the trade. Henry E. Marschalk, as announced in an earlier edition of The World, is associated with Mr. Eckhardt in his growing enterprise.

They have a special announcement in another part of this publication which makes good reading and contains some statements worthy of careful consideration.

It was delicious to see the staid members of the association meandering homeward from the Old Vienna and other resorts in the early hours with red paper fezes jauntily perched on one ear and singing favorite songs. And the way the singing palled on one when a policeman hove in sight.

The irrepressible Victor H. Rapke was early on the scene and despite the fact that he was compelled to move around on crutches owing to a sprained ankle was very much in evidence. He convulsed more than one jobber with the description of the weird adventures of his pet monkey, "Josie." He was certainly some animal.

J. Newcomb Blackman plays ball as he attends to convention business with a oneness of purpose that is laudable. The energetic manner in which he batted at the ball—and missed—was most encouraging. The enthusiasm was all there, however.

Frank E. Madison was seen on the Boardwalk on several occasions—we repeat, Mr. Madison was seen on the Boardwalk. Ahem!

With the character of this publication and his personal safety in mind, ye scribe refrains from telling some of the best things that happened during convention. But have a care, Desmond, have a care.

Max Landay, of Landay Bros., New York, was the parodist of the occasion and had made up a number of verses to various popular tunes, in which familiar association personages were rapped or praised as the case might be. One of the parodies, to the tune of "All Join in the Chorus," was sung at Old Vienna each night, and took in about everybody's name.

WANT JUDGMENT SET ASIDE.

(Special to The Talking Machine World.)
Trenton, N. J., June 28, 1910.

The National Phonograph Co. have made appli-

cation to Judge Cross in the United States Circuit Court to have him set aside the judgment of \$95,424 attained against them by the Goodwin Manufacturing Co. The judgment was based on a contract wherein the National Co. agreed to purchase stearic acid from the Goodwin Mfg. Co. to the amount of \$320,000. The defendants had abrogated the contract and claimed that they never legally ratified it.

THE DORAN PHONOGRAPH CO.

H. S. Doran and J. J. Bennett have purchased the Mazer Phonograph Parlors at 45 Michigan avenue, Detroit, Mich., and will incorporate the business under the name of the Doran Phonograph Co. with a capital of \$15,000.

Opportunity only knocks once, an' then we're generally in th' back part o' th' house.

GERMANY'S NEW COPYRIGHT BILL.

How the Law Affects Talking Machine Interests—Compulsory License and Royalty Features of the Law—Record Copying Prohibited.

(Special to The Talking Machine World.)

Berlin, Ger., June 29, 1910.

The Reichstag has passed the new copyright act, and the talking machine interests feel a little better, although they are not by any means thoroughly satisfied. The battle royal was waged around the matter of royalty on talking machine records, music rolls and similar musical reproductions. As a result of compromises between the interests involved in the operation of the act, a system of so-called compulsory license has been enacted into law, while the provision for payment of royalty has been extended, as mentioned, to every form of reproduction of music. The compulsory feature provides that a composer must extend the right of reproducing his works to every manufacturer who may wish it, on payment of a "reasonable" compensation. The object of this is to prevent monopoly of any composer's work through contracts between him and a single manufacturer. Moreover, copying of talking machine records is prohibited. Although the manufacturer is not specifically protected against the singer or composer, he receives automatic protection if he employ and pay the former specifically for his services. Purchase of copyright carries with it the right of public reproduction. Lastly, it may be said that the period of copyright protection to a composer has been retained at 30 years, as at present.

BURNS CHATS OF TRIP TO CUBA.

Business Satisfactory but There Is Much Political Unrest—Commercial Men Would Like American Control—Many Records of Typical Cuban Music Secured—Special Catalog.

At the executive offices of the Columbia Phonograph Co., general, New York, last week, Edward N. Burns, manager of the export department, spoke of his trip to Cuba as follows:

"I found business conditions very satisfactory, notwithstanding the political unrest which dominates everything. The island's sugar crop was sold for a big price, and their tobacco also, and money seems to be plentiful enough, but commercial affairs lack stability nevertheless. I still look for intervention on the part of the United States again as has been my opinion right along, and I am quite sure the business people of the island would welcome it, judging from what I heard.

"When we go to Cuba it is not to record Spanish music. It is the typical Cuban music we are after and get. Their music is peculiar, from the fact that it is written entirely in syncopated time, like our cakewalk or rag-time melodies. William Freiberg and Gus Furbush, of our laboratory staff, preceded me to Havana in order to make arrangements for recording, and we secured the finest records ever made for the Columbia Co.—a very complete list of

puntas, boleros, rumbas and danziones. It is our intention to issue a bulletin of these records every two or three months. This class of records will not sell in all the Spanish-American countries, but their sale is confined to Porto Rico, Cuba, Yucatan, on the eastern coast of Mexico and Central America, and in the northern coast cities of Colombia and Venezuela. We have also made a number of records by Mme. Everdri.

"Freiberg and Furbush will go to Mexico after finishing their work in Cuba, and where they will remain to record the best talent available, mostly folk or native songs and instrumentals. As I said, the syncopated music of the Cuban artists occupies a field by itself. As an instance they will take "Cavalleria Rusticana," and while the theme is followed, one would hardly recognize the original melody in the syncopated arrangement. The same is true of "Madame Butterfly." The effect is almost laughable. The most solemn and serious music is also given this twist and turn, a peculiar waltz movement or glide with a lilt rather fascinating, to say the least.

SHOW MUSIC MASTER HORNS.

Complete Line of These Popular Horns Exhibited at the Chalfonte by H. N. McMenimen—Jobbers Interested in Styles.

Atlantic City, N. J., July 7, 1910.

A complete line of Music Master horns, manufactured by Sheip & Vandergrift, Philadelphia,

were on exhibition at the Chalfonte during the convention, under the direction of H. N. McMenimen, general manager of the company. As usual the music horn exhibit was a center of interest for the jobbers, who looked over the new styles and in most instances left liberal orders. The Music Master horns have proved their quality with the trade and the public, and are being manufactured in increasing quantities all the time. According to Mr. McMenimen, who, by the way, is an old-time talking machine man and a favorite with the jobbers, the company have provided for a greatly increased advertising appropriation for the coming year, and intend to push their product even more actively than in the past.

Meanwhile new styles to harmonize with various models of machines will be brought out at intervals and thus keep the line up to date at all times. Needless to say, the Music Master horn is a real success.

J. Wenger, of Wenger & Cherrington, Salem, Ore., who handles Victor and Edison machines in his town with great success, was a recent visitor to New York, when he placed large orders for pianos, in which he transacts a large business in his territory. He reports talking machine prospects in his section of Oregon as most pleasing.

C. Meisel, 4 St. Marks place, New York, besides being a wholesaler and importer of musical merchandise, one of the oldest in the city, is also a Victor dealer.

GRESSING APPOINTED MANAGER

Of the Aeolian Co.'s Talking Machine Department—A Splendid Appointment.

The Aeolian Co. announced this week that O. A. Gressing, formerly manager of the St. Louis Talking Machine Co., St. Louis, Mo., had been appointed manager of the talking machine department which they are to open on a large scale in Aeolian Hall, New York. Mr. Gressing is a gentleman splendidly equipped for the position to which he has been appointed. He has had long experience in the talking machine field and will undoubtedly help to place the new department of the Aeolian Co. on a very successful basis.

RECORDS BY EMILIO MURILLO.

The Celebrated Colombian Composer Delighted with the Records Made of His Works by the Columbia Phonograph Co.

Señor Emilio Murillo, the celebrated Colombian composer and pianist, brief sketches of whose career have appeared in *The World* lately, has been spending a good part of his time during the past three weeks in the Columbia Phonograph Co.'s laboratory, New York, making a remarkable series of records. Practically every important work composed by Señor Murillo is being put on Columbia records, all solos—piano, flute and vocal—being executed by Murillo himself, and the band numbers played by the Banda Española, under Murillo's supervision. All Murillo's compositions are of notable beauty, with a virility and gracefulness all their own. The honor of having composed the national hymn of the Colombian Republic also belongs to Murillo. This hymn naturally occupies a prominent place among the compositions recorded by the Columbia Phonograph Co.

Murillo is highly enthusiastic over the Columbia process of recording and has listened to the records already through with the keenest delight. His feelings find expression in a letter to the

Columbia company, giving them the exclusive right to record his compositions and giving them also the sole right to all future recordings by himself.

THE COPYRIGHT QUESTION.

Treated in a Masterly Way by Frank L. Dyer—
E. Trevor Williams' Views.

Of the masterly treatment of the copyright question along broad lines, no one is better equipped to write than Frank L. Dyer, president of the National Phonograph Co., Orange, N. J. This is speaking strictly from a trade point of view. As is known, Mr. Dyer appeared last summer before the committee on the law of copyright of the British Board of Trade, and expressed his opinions cogently and forcefully. Since then Mr. Dyer has addressed a formal letter of protest to that body, which appears in *The World's* European department, on another page of this issue. As yet Parliament has not taken any action, though the committee reported, "We desire to express our approval of the revised conventions (signed at Berlin, November 13, 1908) as a whole." It was also provided in this conference that the "convention shall be ratified and the ratifications exchanged at Berlin not later than the 1st of July, 1910." This time has passed, though it was also agreed that the "convention shall be put in force three months after the exchange of ratifications."

It will also be recalled that E. Trevor Williams, president of the Gramophone Co., Ltd., London, England, one of the leading composers of the world, and a close ally of the Victor Talking Machine Co., Camden, N. J., signed the Board of Trade report, he being a member of the committee, subject to reservations. Among other statements made was this, and which is also referred to in Mr. Dyer's communication, namely: "I am entirely in accord with the committee that the authors of musical works should have protection against the adaptation of their works to instruments which can produce them

mechanically.' Having regard to the accepted state of the new law, to give such authors such protection by legislation will confer upon them an entirely new right. An immense industry has been built up under the immunity of the existing law, and consequently this new right should only be conferred subject to complete protection of the industry and to the preservation of vested interests." As to a royalty charge for the use of musical works, Mr. Williams favors the plan incorporated in the United States copyright statute; or as he expresses it, "for simplicity, fairness and convenience the method of a license prescribed by law is undoubtedly the best."

INCORPORATED.

The Sapphire Record and Talking Machine Co., of Manhattan, filed articles of incorporation with the Secretary of the State at Albany this week for the purpose of manufacturing and dealing in talking machines, records and supplies, with a capital stock of \$100,000. The incorporators are: P. B. Verblanck, M. Wagner and D. Tauber, New York City.

USE THE COLUMBIA GRAPHOPHONE.

At the noonday gospel meetings, which are held in Madison Square, right in front of *The World* offices, the Columbia graphophone has been frequently used recently with Gipsy Smith's records which edify and enthuse the assemblage. They have been no mean factor in attracting and holding the interest of the crowd, and thus fulfilling the important purpose in getting a large audience for the speakers who follow.

Advertising is a salesman that never watches the clock—that does not stop work when the whistle blows. The life of a single piece of advertising literature of a single announcement cannot be definitely measured—neither can its value as an investment. Talking machine men should bear this in mind.

JOBBER, ATTENTION!

Now is the time to place your orders with us for needles!

Don't wait until the last minute and let your competitor get ahead of you!

Now is the time to make a special design for you on envelopes and tins, for which we make no extra charge.

Now is the time to obtain our lowest prices.

We have built up a large business in selling High Grade Imported Needles at the same price that you are now paying for cheap needles, and packing them in the "highest grade" manner, in envelopes and tin boxes.

This year we are prepared to quote you the lowest prices on High Grade Imported Needles, and we urge you, "right now," to send us specifications on your requirements, and we will be pleased to quote you a price that will startle you, and submit to you designs for envelopes and tin boxes that will sell the goods on its appearance. **DO IT NOW!**

Activities—Auxetophone Aids at Lecture—Increasing Demand for Fibre Needles—Summary of News.

(Special to The Talking Machine World.)

Chicago, Ill., July 9, 1910.

Business with the local jobbers made a very fair showing during June, although the advent of settled hot weather the latter part of the month naturally caused something of a falling off as compared with the first half. The month, however, made a good increase as compared with the corresponding month of last year; indeed, there has not been a month this year which has not shown a substantial gain as compared with 1909. We are now in what is always the duller month of the year, and trade is quiet, although by no means stagnant. The large retail concerns are doing some aggressive advertising, Lyon & Healy using larger space in the dailies for their talking machine department than ever before. The enterprising dealers never let up in their efforts for trade, and consequently maintain a fairly steady run of business at a time when, if business were not forced, it would be practically dead. An encouraging feature, however, is that this year all the large stores and departments report that they have had more customers send their machines into the store to be packed for shipment to summer cottages than ever before, and that the number of machines and records sold to the vacationers is increasing from year to year.

This, perhaps, gives a hint to dealers in towns in the vicinity of summer resorts. It is possible, no doubt, to work up quite a business among the cottagers who have not provided themselves with machines before leaving home. A canvass of these resorts, especially at the week end, when the man of the family is most likely to be "in camp," might prove very resultful. Anyway, it's worth the effort, if any of the trade contiguous to the resorts have not already tried it out.

In the Chicago letter this week will be found quite a few suggestions furnished as a result of the experience or observation of the members of the trade, and which, perhaps, can be utilized by some of the World readers in stimulating trade during the dull season of planning the fall campaign.

"Talking Machines in Schools."

"There are many indications that the talking machine is rapidly entering the larger field of usefulness for which it was predestined from the first," remarked Roy J. Keith, sales manager of the Talking Machine Co. "Its value as a positive educational force, as well as an entertainer, has long been recognized in a general way. Quite a few musical conservatories have used the Victor in conjunction with Red Seal records as an aid in teaching interpretation, and parents have been surprised at the influence exerted in the home in the cultivation of the musical taste of the children. Now, however, it looks as though the talking machine would soon be exercising its full mission as an educator, and if the dealers of the country will take the hint furnished by the developments of the past few months in Milwaukee, it will not be long before you find a talking machine a regular part of the equipment of the average public school.

"The advertising and commercial value of such a departure is obvious, and the dealer who is instrumental in securing the installation of a Vic-

tor in each of the schools in his town and vicinity will naturally be the one to reap the greatest benefit."

Reverting to the case in point, L. C. Parker, manager of the talking machine department of Gimbel Bros., Milwaukee, has placed Victors in no less than fifteen of the public schools of that city. The plan followed by him in making it possible for the individual schools to pay for the machines is worthy of mention. In the majority of instances the machines were quickly paid for by the pupils themselves through the medium of the principal. Concerts were given which were attended by the parents of the pupils and other residents of the vicinity. An admission of 10 cents was charged, and each pupil was given five tickets, and was permitted to keep one for his own use in return for selling the others. In many instances the outfits have been paid for by the proceeds of a couple of concerts.

Mrs. Clark, the supervisor of the music of the Milwaukee schools, has entered enthusiastically into the idea. She perceives the value of the use of the Victor in the schools, not only in developing the taste for good music, but in illustrating the enunciation, tone production and interpretative methods of the best singers. She is spending a good deal of her time this vacation in preparing simply worded stories of the operas and talks on the composers and the meaning of their works for the benefit of the teachers in conducting recitals for the pupils.

Mr. Parker has received letters from the principals of the schools, in which they state their experience with the Victor, and all speak in the most glowing terms of the benefits derived. Stated times are set aside for the use of the Victor, and the children are permitted to sing with the solos and instrumental records with which they have become familiar. Individual pupils are sometimes given a place on the concert programs, and repeat the songs they have learned from the machine. The facility with which they imitate the phrasing and expression of the maker of the record is remarkable.

It is found possible to make use of the Victor in the school in ways which were not dreamed of at first. One principal, for instance, added zest and interest to the work of the English literature class who were studying Burns by having some of the records of the songs of the Scotch poet played. The same man found the German class reading something about Wagner, but inquiry revealed the fact that very few knew anything about the music of the master. The Victor was immediately brought into requisition.

As a result of the Milwaukee innovation, the schools in Janesville and Racine have taken the matter up, with gratifying results, and Wisconsin promises to be leader in the movement.

Some Very Clever Window Advertising.

SOPRANOS, ALTOS,
TENORS, BARTONES.

COME IN AND MAKE A PHONOGRAPH RECORD
OF YOUR VOICE.

A GREAT THING FOR VOCAL STUDENTS.

HEAR YOURSELF SING AND CORRECT YOUR
FAULTS.

RECORDS MADE COMPLETE WITH PIANO AC-
COMPANIMENTS, 40 CENTS EACH.

COME IN AND INVESTIGATE.

A neat window card bearing the above legend, in one of the windows of the Rudolph Wurlitzer Co., together with circular letters and some small advertisements in the dailies, is having the effect of drawing quite a few singers, both professional and amateur, into the store. It has proven quite a hit, and has already influenced the sale of a few machines. "It's good advertising, if the immediate results in the way of sales are not great," said L. Kean Cameron, in charge of the retail talking machine department.

"Incidentally, it's a whole lot of fun, gets people into the store who would not come otherwise, and gets just the class of people we most want

to reach interested in the talking machine proposition."

Mr. Cameron has fitted up one of the record rooms as a recording laboratory, with a piano and Edison machines. The other day a teacher brought in no less than ten pupils in a body, all of whom heard their own voices as others heard them, and carried away the result. Local singers of note, like Albert Boroff, E. C. Towne, Wm. Beard and Henry Vogel, who was here last season with the "Melting Pot," but formerly a grand opera singer, also took advantage of the scheme.

Grafonola on a Trip.

A special train, carrying 300 people, delegates to the National Retail Hardware Association's convention at Denver, and their families, left last night over the Chicago & Northwestern. On the way they have been entertained with a Columbia Graphophone De Luxe, which will occupy a place in the lobby at the hotel which constitutes the headquarters of the association during the convention. It's a good little stunt put over by A. H. Herriman, in charge of the retail department at the Columbia Chicago branch, and no doubt will yield results both from a retail and wholesale viewpoint.

Word About Salesmanship.

"Knowledge of goods, real interest in your work, and a decent personal appearance taken for granted, successful salesmanship in this line narrows down largely to carefully, but unobtrusively, watching and 'playing up' to your customer," remarked one of the most successful retail talking machine salesmen in the country. "A good many men whom I have known seem to think that the main thing is to talk. They shoot all their ammunition off in a bunch, but keep on talking. I've frequently seen a man talk a customer up to the point of buying, and then unknowingly talk him off again. The point is to lead your customer gently on to making his preferences and even his objections known. It's a hard thing to define. No two people are exactly alike. Sometimes you can ask directly about how much money a customer wants to spend. Others you would deeply offend. Some people care only for the popular thing, but don't care to declare themselves. By a little feeling around you can tell. In handling a machine customer it often depends as much on whether you demonstrate with records that the customer is impressed with, as the merits of the machine itself. Watch your customer, and the minute you catch the most fleeting expression of disapproval shut the record off. The average person will betray themselves more by their facial expression than by their words. It takes experience and perhaps not a little of the intuitive faculty to read it aright, but the man who lacks the ability misses one of the prime requisites of salesmanship, to my notion. Of course, it's just a phase of character reading, something that can be cultivated to a greater degree than is generally supposed, if one makes up his mind so to do."

The Conventioners.

The Westerners showed up at Atlantic City in pretty good force, from all reports, but they didn't go in a crowd. Up to the first of last week L. C. Wiswell, who was engineering the plan, had advised that Burton J. Pierce, manager of the talking machine department of the J. W. Jenkins Sons Co., Kansas City; Floyd C. Ramsdell, of the Sioux Falls Talking Machine Exchange; H. H. Blish, of Harger & Blish, Des Moines and Dubuque; A. A. Trostler, manager of the talking machine department of the J. F. Schmelzer Arms Co., Kansas City, and Lawrence Lucker, of the Minnesota Phonograph Co., would all be on hand Saturday to leave on the Pennsylvania 5.35 p. m. train. Then Wiswell himself was compelled to leave Tuesday to attend to some matters at the Victor factory before the convention. Trostler blew through on Wednesday;

Summer Time is Victor Time

"At home or in our summer retreat, the Victor is our indispensable summer entertainer."

MR. DEALER: This conviction is abroad in the land. During the summer season all thoughts turn toward the out of doors, the open air, the sunshine.

The VICTOR complies perfectly with these conditions.

Make your customers see what the VICTOR really means to their open air pastimes.

Their lawn fetes and porch parties will be doubly enjoyable with the aid of the VICTOR—the pleasure of their summer hoos and dances will be greatly increased.

Our Victor Machine and Record stock is most complete. The "Four Big Sellers" and the exceptionally fine summers list of Victor Records are a great incentive to a profitable summers business.

We feel safe in saying that we have the largest stock of Victor Victrolas outside of the Victor factory. Tell those Victrola prospects of yours what they are missing by not having their Victrola during the hot summer weather when it could be such a source of comfort and pleasure.

If you cannot get those live prospects into your store this kind of weather, send us their names and we will write them a personal letter for you, offering to place a Victrola in their home on approval—you close the sale and make the profit.

Remember, we wholesale exclusively.

The Talking Machine Company
72-74 Wabash Ave. :: Chicago, Illinois

Ramsdell stopped off for an hour on Friday; Luckner and Blish had their plans disarranged and went later, and Mr. and Mrs. Pierce were the only ones who showed up Saturday as per schedule. They lunched with H. B. Hopkins, of Lyon & Healy, took in "Madame Sherry" in the afternoon, and finally found when they boarded the train quite a little bunch of talker people after all. There was Fred Siemon, assistant manager of the Chicago house of Wurlitzer; John Otto, in charge of the retail Edison department of Lyon & Healy's, and L. V. B. Ridgway, Lyon & Healy's Illinois talker salesman.

They presumably had a fine trip, as no reports of casualties have reached Chicago as yet. Lawrence McGreal, of Milwaukee, was another Westerner who had planned to go with the Chicago crowd, but had to change his plans. Arthur D. Geissler was in the East during the convention, but was unable to attend, being detained by important business in New York, much to his regret. Just before he left for California yesterday he was eagerly inquiring as to the result of the ball game at Atlantic City.

J. F. Bowers, of Lyon & Healy, left for Asbury Park, N. J., with his family early last week, and after seeing them nicely located for the summer ran over to take in the convention.

The New Columbia Opera Records.

The new Columbia operatic records, made by the artists of the Boston Opera Co., are gradually coming on sale at the Chicago branch of the company. Those that have so far made their appearance have been greeted with delight by the company's patrons. It's an imposing list, and beginning with the Lucia sextet on one side and the Rigoletto quartet on the other, sung by distinguished artists, is certainly a forerunner of a strong line. The Grafonola Mignons have made their appearance the past month, and from the orders being taken at this end it is easy to forecast a demand calculated to tax the company's facilities to the limit.

Improvements at Lyon & Healy's.

Five years ago Lyon & Healy had one small room devoted to machine sales on the main floor, into which those interested were invited to step after listening to the concerts in Victor Hall. The growth has been steady. Additional rooms have been added from time to time, and when alterations now in progress are completed the machine department, including Victor Hall, will embrace practically all of the Adams street side of the store, and covering a space about 150 feet long by 25 feet wide. From the Adams street entrance up to the larger corner window facing on Wabash avenue there will be nothing but talking machines and phonographs. Victor Hall will be enlarged to a seating capacity of over 100. There will be three Victor rooms, one Edison room and one room devoted to the I. C. S. language course system. The rooms will be handsomely decorated, draped and connected by folding glass doors so that they may be thrown into one if desired. Joe Vasey, manager of machine sales, and his assistant, John Otto, will preside over as handsome and extensive quarters as can be found anywhere. The great retail record department, with its dozen demonstrating rooms, remains, of course, on the fifth floor.

How We Grow.

H. B. Hopkins, L. C. Wiswell's assistant in charge of wholesale, has been extremely busy of late, recovering from the effects of a week's vacation in the northern woods, attending to additional duties in Wiswell's absence at the Atlantic City convention and, with it all, getting home on schedule time to greet a small daughter who recently made her advent in the Hopkins household.

Speaking about babies, F. A. Cook, assistant retail manager at the Columbia Co., is the proud dad of a fine nine-pound boy, who arrived just too late for the fight at Reno.

Progress in the Ghetto.

Barney Olshansky, who has for years done an almost unbelievable talking machine business in a little hole in the wall at 130 Jefferson street, just south of Thirteenth, in the West Side ghetto district, has moved into a fine large store at 1252

Jefferson, which comports more with the size of his business. It is nicely fitted up and has three good-sized private demonstration rooms, besides a large machine floor. Barney also has a branch at 723 Twelfth street.

Geissler to the Coast.

Arthur D. Geissler, general manager of the Talking Machine Co., arrived home on Wednesday of this week, and left on Thursday for the Coast, where he will join his wife and babies, who preceded him. They will spend some time at Ross Valley, at the foot of Mount Tamalpais, in Marin County. Later on Mr. Geissler will meet Leon F. Douglass, of the Victor Co., at San Rafael, and they will spend a glorious fortnight deer hunting and fishing. Mr. Geissler will, of course, visit his friends in 'Frisco and other points before returning. They will be gone until the latter part of August. On his way east he visited St. Louis, to visit the Victor jobbing headquarters of the Aeolian Co., and also inspected the departments at the Aeolian branches at Cincinnati, Indianapolis, Fort Wayne and Dayton, which are now well under way, and he spoke especially of the beautiful department at Indianapolis, which is finished throughout in silver ash, in an individual style of architecture, and the appointments of which are perfect. The Cincinnati Victor departments will also be established at the Aeolian stores at Huntington, W. Va., and Middletown, O., which are under the control of the Cincinnati branch. He spent some time in New York with Messrs. Perkins and Schaad, of the Aeolian Co. The New York department, which he declares will be the finest in the country and will occupy the entire eighth floor of Aeolian Hall, will be open about Sept. 1. Mr. Geissler brought back with him the news that O. A. Gressing, who so capably managed the St. Louis Talking Machine Co. for the past two years and until its purchase by the Aeolian Co., has been appointed general manager of the talking machine interests of the Aeolian Co., making his headquarters at Aeolian Hall, New York.

Various Personals.

W. C. Fuhri, district manager of the Columbia Phonograph Co., left to-day for a short visit to headquarters in New York.

C. F. Baer, manager of the Chicago office, returned this week from a brief trip to St. Louis, Burlington, Davenport and Rock Island. At the latter point he made arrangements with Wm. Schaeffer & Son to handle Columbia goods on a large scale, and secured a substantial initial order.

F. A. Scheuber, president of the Scheuber Drug Co., of Livingston, Mont., exclusive Columbia jobbers for Montana, Wyoming and part of the Dakotas, is expected in Chicago Monday. He will probably go east on a visit to the Columbia factories in company with E. C. Plume, western wholesale manager.

A. P. Grigg, the well-known piano and talking machine dealer of Davenport, Ia., was in the city this week on his way east. He is reported as having sold 25 Victrolas so far this year.

W. W. and E. A. Parsons have been whooping things up in a vigorous fashion since they resumed charge of the Columbian commercial machine interests in this city. Dictaphones are being placed with some of the largest concerns in the city, and in many cases the old type machines are being replaced with the latest models.

Andrew McCarthy, treasurer of Sherman Clay & Co. and manager of the talking machine department, spent several days in Chicago on his return from his bridal trip to the East.

Gus Eilers, of Portland, Ore., and in general charge of the Eilers talking machine interests, also spent some time in Chicago on his return to the Coast.

Wieboldts to Handle the Columbia.

Wieboldts, the big department store on Milwaukee avenue, and, in fact, outside the loop, has just added a complete line of Columbia goods, including the entire record catalog. This is a bit of fine work on the part of City Salesman Ed. Blimke.

Roy Keith, sales manager of the Talking Machine Co., returned on Tuesday from a ten days'

vacation spent at Crystal Lake, in northern Michigan.

Dan Creed, credit man for the Talking Machine Co., had a fortnight's seance with jury duty, which appropriately terminated last Saturday.

Auxetophone Used in Lecture.

Myron Blackman, manager of the record department of Lyon & Healy, accompanied by an Auxetophone, ran down this week to Streator, Ill., and assisted Prof. M. J. Corey in his lecture on "Verdi, the Most Popular of the Italians," illustrated by stereopticon views. The Verdi operatic numbers heard through the medium of Auxetophone, ran down this week to Streator, great audience and greeted with frequent applause.

Aeolian Publicity.

The Aeolian Co. gave their talking machine department considerable publicity in the dailies the past month.

Open Branch on Jackson Boulevard.

The Talking Machine Co.'s new branch store at 43 Jackson boulevard opened the latter part of last month, and in spite of the hot weather experienced, is giving promise of proving a winner. George Davidson has personal charge of the new store.

Fibre Needle Progress.

The number of large dealers throughout the country who are taking hold of the fibre needles in a strong way is constantly increasing. The B & H. Fibre Manufacturing Co. are busily engaged in their enlarged factory in making preparations for the largest fall trade in their history. President F. D. Hall made a hurried trip to the East the past month.

Charles Wiswell, who went with the Victor Co. as their traveler in the State of Maine the first of the year, is back in Chicago on his vacation.

A. V. Chandler, the efficient Illinois representative of the National Phonograph Co., is taking a fortnight's vacation after a year of hard and resultful plugging.

A PERMANENT DISC NEEDLE.

(Special to The Talking Machine World.)

Chicago, Ill., July 9, 1910.

Morris Levine, the talking machine dealer of Highland Park, Ill. and the inventor of several specialties in the talking machine line, has been granted a patent on a permanent needle for disc talking machines. It consists of a small garnet set in a steel shank, which fits into the needle arm in the same manner as a regular steel needle. These needles will be ready for the trade in about 30 days. They will retail for \$2 each, and are guaranteed for one year, while it is stated they will last for an unlimited period. It is claimed that they will not wear the record as much as the steel needle. Mr. Levine will market his product under the name of the Permanent Needle Co.

KREILING & COMPANY

1504 North 40th Avenue

Cragin Station Chicago, Ill.

In Union There is Strength

Therein lies the secret of our ability to give the best distributing service in this country. The very fact that Lyon & Healy can supply dealers with absolutely the two best talkers on the market, the Victor and Edison, thereby making it possible for the dealers to buy both of one concern is in itself a strong reason for sending Lyon & Healy your orders.

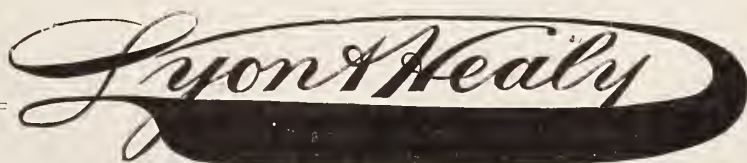

Every division of our Talking Machine department is in perfect accord with the other divisions. There's Unity again.

When an order is received it has the attention of each division in turn and every man who handles it does his part and pushes it on to the next man with all possible speed. Everything and everyone moves with accuracy and singleness of purpose, to get the order out right.

Such unity insures maximum efficiency. It means that orders are filled quicker, packed better and with less errors.

Service of this kind is valuable to the dealer. He can depend absolutely on receiving the goods he has ordered and as soon after ordering them as transportation facilities will warrant.

To those dealers who know only by hearsay that Lyon & Healy service is superior, we extend a cordial invitation to write for the most liberal terms extant, and also for further reasons why Lyon & Healy should receive their orders.

The logo for Lyon & Healy, featuring the company name in a stylized, cursive script font. The letters are white and set against a dark, horizontally-oriented oval background.

Wabash Avenue and Adams Street

The Columbia Grafonola will give your store a reputation. Columbia Records will help you hold it.

Columbia Phonograph Co., Tribune Building, New York.

SOUTHERN CALIFORNIA NOTES.

The Leading Houses Throughout the Southern Portion of the Pacific Coast Make Encouraging Reports About Business and General Prospects—A Number of New Dealers Take on Talking Machines and Those Who Are Now Handling Them Are Growing More Enthusiastic Regarding Future Developments—An Interesting Budget of News from That Section of the Country.

(Special to The Talking Machine World.)
Los Angeles, Cal., July 5, 1910.

Southern California is enjoying a very good trade in the talking machine line and the future prospects are looking good for a lively summer business. Some important changes have taken place and others are scheduled to follow throughout the next few weeks.

Sherman, Clay & Co. report the best business in the history of the local branch for May and June. Chas. Ruggles, manager, is especially pleased with the trade conditions, having sold a great number of Victrolas. A carload of these instruments was recently received, as well as a large shipment of records. W. F. Morton, traveling representative of Sherman, Clay & Co., has covered the territory between here and the northern cities of the State.

With the G. J. Birkel Co. business is good and many plans are being made for the occupancy of their new store some time in November. Mr. Giessler, who with his family, has taken a trip through parts of the East in the interest of the talking machine department of the new store, has arrived home. A. Graham Cook has originated several clever advertising features for the sale of Victor records, among which are two facsimile records, one of the Miserere by Caruso and Alda and the other of Gems from Robin Hood. These "Big Records" have proved very valuable in the way of increasing the demand for these titles. A Victor Faust folder published under the direction of Mr. Cook is also worthy of comment, it being cleverly arranged. The Birkel Co. are advertising to supply Victrolas in all styles and finishes and have on their floors several different models.

The Wiley B. Allen Co. are about to remodel their department and will give over half of the ground floor to talking machines.

The J. B. Brown Music Co. are doing a good business in high-priced talking machine outfits and Victrolas. Business has increased greatly on South Broadway, where the Brown Co. moved some time ago when there was little trade of any kind. Now there are several large department stores and other of the city's finest establishments in this zone.

The Columbia Phonograph Co. are having a splendid business in Grafonola Regents, having recently received an order from one of the local dealers for twenty of the instruments, to be delivered as soon as they are received. The announcement of the new style Grafonola has been received with much interest in the trade and is expected to be another popular seller.

Max Schiresohn, at 367 North Main street, has

enlarged his Edison department and arranged two large show windows in his store front. The Edison business is rapidly growing with him.

The Southern California Music Co. have received a full car of Edison Amberolas in various finishes and hope with this supply to fill the increased demand. O. A. Lovejoy and C. H. Rundel has made several calls on the Edison dealers in outlying districts and finds trade in very good shape. A. D. Wayne, manager of the retail department, has returned to duty after a short vacation trip with his family. The business phonograph department has been giving daily demonstrations in one of the Broadway show windows which have attracted general public interest and resulted in many sales. D. W. Wise has succeeded H. C. Helyer as manager of this branch of the business.

Andrews & Son, dealers, formerly of Phoenix, Ariz., have purchased the Victor department of the Holmes Music Co., which recently moved into new quarters on South Broadway. The Andrews Co.'s new store consists of several splendidly arranged sound-proof rooms and is one of the handsome stores of the city. The record stock is kept in a system of Jones harmony record files, which adds much to the store's appearance.

The Angelus Talking Machine Co. report a growing trade and many sales of high-priced Edison outfits.

The W. I. Hull Furniture Co., of Santa Monica, are new exclusive Columbia dealers. They are having splendid success with this line and have averaged one machine a day through their outside salesman. Santa Monica is a rapidly growing beach town and, in fact, the oldest beach resort on the coast.

Most of the smaller southern California towns are enjoying a very favorable summer trade. C. H. Short, the Edison dealer of Pomona, is having record-breaking success with the Amberola.

Mrs. D. C. Henderson, of Barstow, Cal., is one of the recently installed Edison dealers. The phonograph line will be kept in connection with her general merchandise store.

Frank D. Streshley has succeeded W. W. Watson with the Edison at Agua, Cal., and will, after some changes which will permit a more complete line of goods, canvass his section thoroughly.

Another new dealer is reported at El Cajon, Cal., in the person of Albert Broulwer, druggist, who has made a surprising success for the short time he has had the line.

Chas. Asher, the Edison man from Tehachapi, called on the jobbers at Los Angeles with pleasant reports from his section. The Lindsay Drug Co., of Lindsay, Cal., are succeeded as Edison dealers at that point by Sisson & Parker, who mean to do a big business with the line. Carl G. Strock, Santa Ana, has enlarged his establishment, recently purchased from W. J. Cozad. Mr. Strock is a live Edison man and is now making preparations to open a branch at Huntington Beach, which, though a very prosperous town, has never had a talking machine dealer.

E. P. Blanchard, of Laton, Cal., is another recent visitor to Los Angeles, having brought with

him orders to replenish his Edison stock. E. H. Barcaw also called on the Edison jobbers shortly after putting in a complete line at his store in San Juan Capistrano, Cal. W. O. Dresser, late of Rhyolite, Nevada, has removed to Tonopaw, Nevada, where he will add Edison goods to his large furniture emporium, just opened.

San Bernardino has had its first centennial celebration, which was an affair of much success. L. D. Houghton, the talking machine trade's representative, was elected treasurer of the carnival, which attracted thousands of that city during the five days of festivities. Geo. T. Fisher, of Tucson, Ariz., who made a short stay in Los Angeles during the early part of May, is having splendid success with the Columbia Regent, having recently disposed of four in his city. His store has just been rearranged and is now one of the most beautiful in the State.

The Thearle Music Co., of San Diego, Cal., have given a series of very successful recitals for the advertisement of their Victor department. The Wiley B. Allen Co. have received one of the Edison Amberolas, which they will feature strongly in future.

Chas. H. Stidham, manager of the Columbia Phonograph Co.'s Los Angeles store, recently visited San Diego, where he received several orders as a result of calls on the dealers.

Thos. Hall, proprietor of the Imperial Valley Music House, passed through Los Angeles on his return from a trip to Arizona, where trade is in splendid shape. The Imperial Valley is a fast growing farming section and is becoming famous for its excellent produce.

TOOK A VICTROLA.

Minnesota Educators Are Guarded Against Ennui on Train.

(Special to The Talking Machine World.)
St. Paul, Minn., June 30, 1910.

The Minnesota teachers, who left last night on a special train for the National Educational Association Convention in Boston, were determined that dull care and dreary schoolroom memories should be left behind, and some of them evolved the bright idea of taking a Victrola with them in the observation car.

Through the courtesy of W. J. Dyer & Bro., one was installed, with a good supply of records, consisting entirely of grand opera and ragtime, so that there should be no friction between the musical "high-brows" who must hear Caruso and Scotti once in so often to keep their temperaments screwed to the sticking point and the more frivolous element who doesn't mind listening to the vagaries of the colored quarter as set forth in syncopated song.

When the train reaches Boston it will break up and the party will disperse, but the Victrola, having fulfilled its mission of refreshing the weary pedagogical brain, will be boxed and immediately shipped back to St. Paul.

"An expert hits one business trouble when he writes: "Running things by brute-force instead of brains."

SOLID WOOD (NOT VENEERED)

Mr. Dealer!

A perfect SOUNDING BOARD for a Talking Machine or Phonograph is what you offer to your customers when you handle the

MUSIC MASTER WOOD HORN

It is the only SOLID WOOD HORN on the market, and is built on scientific principles of acoustics.

It is just as superior to the ordinary horn as a solid wood violin would be to a tin or veneered wood violin.

Should your Jobber be unable to supply you, write us and we will send you a sample line of Oak, Mahogany, or Spruce, Disc or Cylinder Horns, on approval.

If you are not entirely satisfied with the superior merits of the MUSIC MASTER, you can return them to us for credit.

SHEIP & VANDEGRIFT, Inc.

PHILADELPHIA, PA.

BALTIMORE TRADE GLEANINGS.

Eisenbrandt's New Home Will Be Ready August 1st—Will Have Fine Victor Department—Visitors to Convention—Grottendek Resigns—Columbia Co.'s Excellent Business for June.

(Special to The Talking Machine World.)

Baltimore, Md., July 9, 1910.

Within the next two weeks or so there will be another handsome music store in this city where the Victor will be one of the principal attractions. This will be the new home of H. R. Eisenbrandt Sons, on Howard street near Saratoga, which has been in the course of construction for the past few months. For the past few weeks the firm have been conducting a special removal sale at their present stand, Charles and Lexington streets, where bargains in the various lines of musical instruments, with the exception of Victor machines and records, have been offered to musicians and those who are musically

inclined in and near Baltimore. Of course, the firm has been disposing of all its Victor stock, in order to start in at the new store with a full line of new and up-to-date records and machines. According to William A. Eisenbrandt, one of the members of the firm, the Victors, especially the Victrolas, have been in great demand the past month, while he has every reason to believe that the fall will be a booster for this particular line of business. Mr. Eisenbrandt expects to be in his new store by Aug. 1.

Hammann & Levin, 419 North Howard street, announce that the demands for Victors and Edisons has been very satisfactory for the month of June. While they do not expect to break any records in the way of sales during July, they are looking forward to a prosperous fall trade. They are getting ready for a removal sale in order to dispose of the stock on hand before going to their new store at 416 North Howard street. This will be about Oct. 1.

Many of the local talking machine men attended the convention in Atlantic City. Among

those who went to the city by the sea were I. Cohen and Morris Silverstein, of Cohen & Hughes, and W. C. Roberts, manager of the local store of E. F. Droop & Sons Co. Mr. Roberts was accompanied by Clarence Gore, wholesale manager for the Droop concern in Washington, D. C. Mr. Roberts says that business has been keeping up nicely during the last month, while he also looks for plum pickings in the fall. He predicts one of the best seasons since 1906.

Joseph A. Grottendek, formerly manager for E. F. Droop & Sons Co., and more recently occupying a similar position with Cohen & Hughes, has resigned from the latter firm. Morris Silverstein is looking after the talking machine end at Cohen & Hughes, assisted by Miss Kirby, also formerly of the Droop Co.

Manager Laurie, of the local branch house of the Columbia Phonograph Co., states that business for June showed up more favorably than during the same month of last year and compared favorably with that of May. He is looking forward to a good fall and winter trade and a return of the old prosperous times before the panic. Mr. Laurie is displaying the latest of the Columbia models, the Grafonola Mignon, which has proved quite an attraction and favorite with the Baltimore public.

OUR FOREIGN CUSTOMERS.

Amount and Value of Talking Machines Shipped Abroad from the Port of New York.

(Special to The Talking Machine World.)

Washington, D. C., July 10, 1910.

Manufacturers and dealers in talking machines will doubtless be interested in the figures showing the exports of talking machines for the past five weeks from the port of New York:

JUNE 14.

Barbadoes, 2 pkgs., \$105; Berlin, 6 pkgs., \$175; Buenos Ayres, 140 pkgs., \$1,642; Havana, 10 pkgs., \$612; 1 pkg., \$277; Havre, 1 pkg., \$190; London, 55 pkgs., \$1,723; Manila, 17 pkgs., \$874; Maranhao, 2 pkgs., \$102; Melbourne, 117 pkgs., \$2,160; 100 pkgs., \$4,258; Rangoon, 6 pkgs., \$319; Rio de Janeiro, 21 pkgs., \$916; Santiago, 2 pkgs., \$102; Santo Domingo, 4 pkgs., \$140; Tampico, 30 pkgs., \$265; Trinidad, 15 pkgs., \$542.

JUNE 21.

Barcelona, 6 pkgs., \$180; Belize, 4 pkgs., \$121; Bolivar, 2 pkgs., \$170; Callao, 16 pkgs., \$446; 3 pkgs., \$370; Havana, 61 pkgs., \$1,122; Kingston, 10 pkgs., \$296; 8 pkgs., \$273; Kobe, 17 pkgs., \$1,231; London, 7 pkgs., \$253; 1 pkg., \$100; 9 pkgs., \$300; Para, 18 pkgs., \$911; Shanghai, 1 pkg., \$113; 27 pkgs., \$595; Smyrna, 2 pkgs., \$400; Tampico, 21 pkgs., \$901; Trinidad, 3 pkgs., \$211; Valparaiso, 8 pkgs., \$207; 20 pkgs., \$549.

JUNE 28.

Algoa Bay, 5 pkgs., \$221; Berlin, 6 pkgs., \$106; Buenos Ayres, 63 pkgs., \$1,451; Callao, 41 pkgs., \$498; 7 pkgs., \$180; Cienfuegos, 19 pkgs., \$1,691; Corinto, 27 pkgs., \$504; Demarara, 14 pkgs., \$453; Gothenberg, 8 pkgs., \$198; Iquique, 11 pkgs., \$310; Liverpool, 1 pkg., \$120; Melbourne, 20 pkgs., \$3,000; 56 pkgs., \$1,708; Para, 35 pkgs., \$2,165; Rio de Janeiro, 41 pkgs., \$1,325; Savanilla, 57 pkgs., \$2,560; St. Thomas, 3 pkgs., \$137; Trinidad, 6 pkgs., \$625; Vera Cruz, 117 pkgs., \$3,315.

JULY 4.

Antwerp, 5 pkgs., \$260; Buenos Ayres, 145 pkgs., \$9,507; Cartagena, 26 pkgs., \$882; Hamilton, 2 pkgs., \$108; Havana, 6 pkgs., \$503; Kingston, 7 pkgs., \$181; London, 80 pkgs., \$2,300; 7 pkgs., \$540; 193 pkgs., \$4,652; Manila, 69 pkgs., \$3,393; Montevideo, 70 pkgs., \$7,863; Pernambuco, 11 pkgs., \$1,154; Porto Plato, 6 pkgs., \$194; Rio de Janeiro, 58 pkgs., \$3,297; 11 pkgs., \$175; Singapore, 9 pkgs., \$252; Sydney, 5 pkgs., \$2,150; Vera Cruz, 12 pkgs., \$193.

JULY 11.

Cape Town, 107 pkgs., \$2,245; Colon, 6 pkgs., \$190; 5 pkgs., \$176; Guayaquil, 3 pkgs., \$224; Havana, 6 pkgs., \$414; Limon, 7 pkgs., \$155; Port of Spain, 3 pkgs., \$273; Rio de Janeiro, 25 pkgs., \$1,949; Tampico, 39 pkgs., \$1,749; Vera Cruz, 15 pkgs., \$308.

CABLE ADDRESS
"PEERCLEAN"
TELEPHONE CONNECTION

Suction Cleaners
89 Chambers Street, New York

July 15th, 1910.

Talking Machine Trade:

If you are looking for a "live wire line" to handle in connection with talking machines, why not

"PEERLESS SUCTION CLEANERS?"

The "public eye" is centered upon VACUUM CLEANERS. There is nothing before the buying public today which occupies so conspicuous a place as VACUUM CLEANERS.

Every housewife has her heart definitely set upon the possession of a VACUUM CLEANER. She knows that it is the present-day scientific method of house cleaning. She knows that it will minimize her daily labor. She knows that the presence of dust in the home and the use of the old fashioned broom are breeders of disease. She knows that in order to overcome this serious condition it is necessary to use a VACUUM CLEANER.

VACUUM CLEANERS have been advertised to the extent of hundreds of thousands of dollars. THE TIME IS RIPE to get into the VACUUM CLEANER business. Don't wait until "the other fellow" gets too big a lead. GET THE CREAM YOURSELF--it's all settled waiting to be skimmed.

The fall season will be in full swing by Sept. 1st. We anticipate an unprecedented demand. We are increasing our manufacturing facilities to care for this wonderful business.

We want EVERY TALKING MACHINE JOBBER to handle THESE CLEANERS on our jobber's basis. WE ARE CATERING STRICTLY TO THE JOBBER. We are not in the retail business. Where satisfactory jobbing connection is made all dealers' inquiries are referred to the jobber.

LET YOUR REPLY BE AN ORDER FOR SAMPLES.

You can make the cleaner business bigger than the talking machine end of your business--LARGER PROFITS, EASIER SALES AND NO DEAD STOCK.

Yours very truly,

W. L. Eckhardt

President.

Mr. Dealer:

YOU LOSE MONEY EVERY DAY
By Not Selling the Thorn Needle

There is not a customer that comes into your store who would not be glad to take a box home with him.

They Do Please the People and Are Easy to Sell

Patented

Many a Victrola sale has been made because the Thorn Needle was used in the demonstration. It eliminates all scratching, and no change is necessary in the Reproducer. Thorn Needles are easy to handle. They play several records, and positively do not wear out or injure a record.

VICTOR TALKING MACHINE DISTRIBUTORS

KANSAS CITY, MO.

SOME OF THE EXHIBITS.

"The Resonator" a New Device on a New Principle Attracts Attention—Udell Works Well Represented by D. G. Williams, the Veteran Cabinet Man.

Among the exhibits at the Chalfonte during the convention at Atlantic City was "the Resonator," a new reproducing device shown by the Talking Machine Sound Board Co., New York. The new device, the invention of L. P. Valiquet,

a well-known figure in the trade, does away entirely with the horn and sits directly upon the reproducer of the machine without other support. It is constructed entirely of wood with a seasoned spruce soundboard, and is of such small size as to permit its being packed in the same case with the machine. The Resonator does not amplify the sound but rather exhilarates it and brings out the various tones perfectly. The jobbers were much interested in the device, and after having heard it, in many instances ordered a sample line. L. P. Valiquet and

J. F. Collins were in charge of the exhibit. D. G. Williams, representing the Udell Works, Indianapolis, Ind., was also in attendance at the convention, and did considerable business in his excellent line of cabinets for all styles of records. Mr. Williams has been in the cabinet business all his life, and knowing the line from A to Z, can put up a convincing talk. He stated that the Udell Co. could be depended upon to keep abreast of the general trade in all advances.

DISPLAY OF U. S. PHONOGRAPHS

Made at Atlantic City During Convention under Direction of T. H. Towell—Combination Reproducer and Other Features Interest—Everlasting Records Command Attention.

The U. S. Phonograph Co., Cleveland, O., had an interesting exhibit at the Chalfonte during the convention, in charge of T. H. Towell, who, as head of the Eclipse Musical Co., of that city, is a member of the Jobbers' Association. Three of the most popular styles in the thoroughly attractive line were exhibited, and all who saw the machines and heard them play were most enthusiastic. Special interest was manifested in the combination reproducer, one of the chief features of the U. S. phonograph, which permits the instantaneous adjustment of the reproducer to play either two or four minute records.

The Everlasting cylinder records made by that company also came in for a full share of attention, and their clearness and general high quality was heartily praised. On the whole the U. S. Phonograph Co. exhibit appealed to all as offering to the active jobber and dealer something new and decidedly worth while.

EDISON and VICTOR JOBBERS

The regular purchase of Columbia Indestructible Records by owners of cylinder machines is merely a matter of once seeing and hearing.

Columbia Phonograph Co., Tribune Building, New York.

CONDITIONS IN CINCINNATI.

Review of Trade Conditions—Opening of Aeolian Co.'s Victor Department—Columbia Co.'s Big Trade—Wurlitzer's Victrola Sales—What Other Dealers Have to Say Regarding the Outlook.

(Special to The Talking Machine World.)

Cincinnati, O., July 9, 1910.

June left the local talking machine colony with anything but a pleasing record. Compared with the preceding months it was not a howling success, but when placed on parade against the corresponding month last year the showing is something different. This is the one conclusion the trade has, and this is being kept in sight. There appears to be but little local business, most of the orders coming from outside of the city's borders. The jobbers who have been combing the hills of Kentucky have found that to be a good territory.

Manager Arthur D. Geissler, of the Talking Machine Co., Chicago, spent some days in the city en route to the Atlantic City convention, in company with O. A. Gressing, formerly in charge of the St. Louis office of the same corporation, but now the head of the Aeolian Co.'s victrola talking machine department. Both spent most of the day with Manager W. O. Black, of the Aeolian store, this city, and L. H. Ahaus, who will have charge of the Aeolian's Victor branch, to be formally opened next Tuesday. They aided the latter in getting his goods shaped up, and through Manager Black learned that a most definite promise had been received from the carpenter promising that the three noiseless booths would be in place not later than next Tuesday. These will be finished in white enamel with mahogany doors.

The Columbia Phonograph Co. find that regardless of the extreme hot weather during the month of June, the demand for grafonolas, graphophones and records was good. The sales forged ahead of their previous June business. The Saturday evening concerts given from the windows of the second floor are greatly enjoyed by large crowds of people passing, who stop and listen, many of them coming into the store, where private concerts are given in booths and much enjoyed. The new grand opera records are proving to be universally popular, Cavalieri and Blanchart records being specially in demand, as is also the 12-inch double disc record combining the "Sextette from Lucia" and the "Quartet from Rigoletto." Hundreds of inquiries are being received through the mail for indestructible cylinder records, both two-minute and four-minute, and sample orders for one or two records are rapidly followed by larger orders, which proves the satisfaction they are giving to Manager Nichols' customers. Business in general is good, considering the summer months.

The past month for the Rudolph Wurlitzer Co. in the talking machine line has been a little quiet. A number of Victrola sales have been made, bringing the total a trifle above the usual June business. The number of prospective pur-

chasers of high-priced Victor and Edison machines is above the average. These sales have been deferred until the return of the parties from their vacation.

A large number of dealers have visited Cincinnati during the past month, combining business with pleasure. Reports are glowing regarding the future of the talking machine business.

The Milner Musical Co. state that their June business is not much behind May; only the sale of Victrolas has kept them apace with the month preceding.

The Milner Co. added Leon Baum, of Camp Washington, to their list of dealers. Baum is a jeweler, but happens to be in a neighborhood where the machine business may become the leader instead of a side line.

John Arnold, Fifth and Elm streets, during June found an unusual demand for medium-priced machines. He reports having had a good sale on Victor records.

J. E. Poorman, Jr., 639 Main street, claims business has been of an off-color for the past four and six weeks, and the same is reported by J. C. Groene, who has been unable to do very much in the talking machine line during the past month. George P. Gross, of Main and Woodward streets, who took on the National Co.'s line several months ago, is confining his efforts to the piano business during the summer months.

NEW COLUMBIA DEALERS FOR JUNE.

Important Concerns in the South, West and East Take on Columbia Products During the Month of June.

In all parts of the country prominent dealers continue steadily demonstrating their faith in the Columbia Phonograph Co. and their product. The June list of dealers who have taken on Columbia lines exclusively or have added extensively to their stock is typical of the previous results attending the Columbia policy.

In Bridgeport, Conn., where the Columbia factories are situated, F. R. Hoffman handles the Columbia line exclusively. The steady growth of his business and the substantial order placed by him recently are convincing proofs that Columbia is popular at home.

The Rhodes, Futch, Collins Furniture Co., Jacksonville, Fla., recently launched out with a complete line of Columbia goods. They had sufficient confidence to place a substantial order. Likewise the Sikes, Lanier & Fite Co., of Athens and Stratham, Ga., have made an extensive purchase of the complete Columbia line. W. A. Barfield, of the Columbia Phonograph Co.'s Atlanta office, was instrumental in negotiating this sale.

The Pacific Coast has proved to be very strongly in favor of Columbia goods, and Logan's Music Store, of Salina, Cal., has laid in a good stock with which to develop the business in its locality.

The Globe Record & Supply Co., 129 East Seventh street, New York City, handle the Columbia line almost exclusively and recently

strengthened their stock very considerably to cope with the increasing business.

E. A. Tompkins, of Pittsfield, Mass., has had such good results with Columbia goods that he placed a very substantial order and is devoting most of his attention to this line.

TWIN CITY NEWS.

Usual Summer Trade Now in Evidence—Mr. Lucker East—Manager Wheeler's Report—Other Items of General Interest.

(Special to The Talking Machine World.)

Minneapolis and St. Paul, July 9, 1910.

Having had an exceptionally fine trade up to the first of July, the talking machine dealers of St. Paul and Minneapolis are taking matters easy during the summer, while the principals and assistants are taking turns at vacations. The July business, though comparatively dull, is greater in volume than for the corresponding period of last year.

Early in the month Lawrence H. Lucker, of the Minnesota Phonograph Co., attended the meeting of the talking machine jobbers at Atlantic City.

Jay H. Wheeler, northwestern manager for the Columbia Phonograph Co., expresses himself as satisfied with the business conditions. "The sales are holding out well, considering that this is the dull season. We have been gratified by the large increase in the demand for the big and higher priced machines. We are selling more of the big modern ones than of the small instruments."

"The jobbing outlook is a little dubious. Many of our country customers have countermanded orders, on the plea that the crop outlook is too uncertain to warrant them in placing large orders. We do not think, however, that there will be a crop failure, and are satisfied that the order will be repeated by September."

The Minnesota Phonograph Co., general distributors for the Victor and the Edison goods, are sending some fine machines to Lake Minnetonka and other summer resorts. The demand for records is said to be brisk and the devotees of the talking machine readily pay the prices asked for the new high-grade records.

CHAPMAN HAS VICTOR LINE.

(Special to The Talking Machine World.)

Rochester, N. Y., June 30, 1910.

E. J. Chapman, the well-known piano dealer of this city, has just received a large shipment of Victrolas, Victor machines and records, and will hereafter represent the Victor Co. both wholesale and retail in this city. He will devote his entire first floor to the Victor department, and will make it an attractive and important part of his general business. As a Victor jobber Mr. Chapman will put out a couple of experienced traveling men to cover western New York, and he intends to develop this end of the business in a progressive way. Mr. Chapman is now making a very artistic display of talking machines in his window, featuring the Victrola in Circassian walnut.

TRADE NEWS FROM SAINTLY CITY.

The Columbia Co. Report Increase of 100 Per Cent in Both Wholesale and Retail—Talking Machine Department Now in Full Swing at Aeolian Hall—Developing Business Plans—Auxetophone for Grand Hotel at Mackinac Island—L. F. and A. D. Geissler Recent Visitors—Other Items of General Interest.

(Special to The Talking Machine World.)

St. Louis, Mo., July 9, 1910.

Business in the talking machine field for the month of June has been fairly active, and the vacation trip demand for machines is excellent. The record trade has been quite satisfactory.

E. B. Walthall, manager of the Columbia Phonograph Co., reports an increase of 100 per cent. of both wholesale and retail sales for the month of May over the same month in 1909. Mr. Walthall left on July 10 for a week's trip to the New York offices of the Columbia Phonograph Co., and will also visit the Bridgeport, Conn., factory. Chas. Kautmann, traveler for this branch here, returned recently from successful trips through southeast Missouri and central Illinois. He is now on his vacation and is touring the northern lakes. J. W. Helbling, retail salesman for this concern, is now on a two weeks' vacation, which is being spent in Bourbon, Mo. W. S. Byrd, traveler for this concern out of Des Moines, Ia., spent several days here recently. R. A. Connor, of the local sales force, spent his two weeks' vacation in Chicago.

Paul H. Cromelin, vice-president of the Columbia Phonograph Co., was a recent visitor here on his way to Mexico in the interest of the company.

C. F. Baer, Chicago manager of the Columbia Phonograph Co., spent two days here recently. He was entertained by Mr. and Mrs. E. B. Walthall on a boat trip up the Mississippi river, given by the Rotary Club, a local business men's organization. A. Bloom, a salesman with this concern at Dallas, Tex., was a recent caller here on his way home from a trip to New York and other points. Manager Walthall reports the sale of a Circassian Regent machine to a prominent banker of this city recently.

The Aeolian Co. have their talking machine department safely established in Aeolian Hall. The retail department affords one of the pleasant sights imaginable with its white enameled booths, handsome Oriental rugs, and particularly pleasing lighting arrangement. Miss Goetz, in charge of the retail department, reports a splendid business for the month of June. In spite of the fact that this department was removed from the St. Louis Talking Machine Co., their sales have not dropped off at all, and this is considered remarkable, since any change of location always means more or less of a drop in business until the new location becomes familiar to the patrons.

The wholesale talking machine department of the Aeolian Co. is situated on the entire fifth floor and is in charge of "Tommy" Cummins, who is considered one of the most expert record and stock Victor men in the West. "Tommy" is a nephew of L. A. Cummins, who travels for the Aeolian Co. in the talking machine department, and has been practically "raised" by the St. Louis Talking Machine Co., graduating into responsible work with ease.

The Aeolian Co. have sent an Auxetophone to the Grand Hotel at Mackinac Island to be used in connection with their orchestra. L. A. Cummins returned from an extended trip through Illinois on July 1, and left July 4 to attend the Jobbers' Convention in Atlantic City. Mr. Cummins is in the line-up of the Eastern and Western Jobbers' baseball match and will play short-stop for the Western jobbers and should give a very good account of himself, since he formerly played semi-professional ball.

L. F. Geissler, general manager of the Victor Talking Machine Co., spent a day here two weeks ago on his way to Philadelphia. He expressed himself as greatly pleased with the manner in which the Aeolian Co. had installed the retail and wholesale departments in their Aeolian Hall, and from the busy appearances of both de-

partments, could not help but predict a very glowing future for this new acquisition to the Aeolian Co. Visiting dealers here during the past month were J. D. Sims, Monarch, Ark.; Peter Paul, Jr., Seckman, Mo.; F. A. Hurd, Troy, Mo.; J. Eu. Black, Springfield, Mo.; Guy C. Hawkins, Decatur, Ill.; Geo. Porth, Jefferson Troy, Mo.; J. Ed. Black, Springfield, Mo.; Guy Dryden and wife, Purdin, Mo.; Geo. W. Long, Long & Sons, Belleville, Ill; F. M. Bourell, Olney, Ill.; and Robert Tetley, Farmington, Mo.

A. H. Smith, of the Smith Phonograph Co., Oklahoma City, Okla., spent Sunday, July 3, here on his way to the National Talking Machine Jobbers' Association convention at Atlantic City, N. J.

Marks Silverstone, president of the Silverstone Talking Machine Co., reports that the firm's business for the month of June was good. Mr. Silverstone, accompanied by his wife, left on July 3 for the National Talking Machine Jobbers' convention at Atlantic City, N. J. He will be away three weeks, visiting Virginia and other points.

A. D. Geissler, manager of the Talking Machine Co., of Chicago, and O. A. Gressing, of the talking machine department of the Aeolian Co. here, left here recently to visit the Aeolian branches at Indianapolis, Cincinnati, and Dayton, O. From the latter point they left for a visit to Aeolian Hall, New York.

D. K. Myers, the well-known Zonophone jobber, reports trade conditions for the month of June to have been fair.

The Koerber-Brenner Music Co. report that their business for June has been quite satisfactory. W. A. Brenner, secretary of the company, is now on a six weeks trip to the Coast, combining business with pleasure. H. G. Koerber, president of the company, is having a handsome \$10,000 suburban residence built in Hampton Park, one of our fine suburbs.

J. H. Allgaire, State representative for the National Phonograph Co., spent three days here recently.

Miss Sadie Rosenblatt, formerly in charge of the talking machine department of the J. H. Buettner Furniture Co., has resigned to accept a similar position with May, Stern & Co. Miss Rosenblatt is succeeded by Miss Lucille Preiss. Miss Preiss reports their business for June to have been fair.

Do not let your help regard the summer vacation as a right, but as an incentive—a preparation for greater accomplishments.

WILLIAM F. NYE
NEW BEDFORD, MASS.

EFFECTIVE INDEPENDENCE DAY AD.

Ludlum & Washburne, 150 South Fourth avenue, Mt. Vernon, N. Y., understand and appreciate the value of well-designed publicity. Their Fourth of July ads. were admirably conceived, one in particular was headed with cuts of the Victor trade-mark, on each side of which were cuts of Victor records, and below the following text neatly displayed:

"The 'Victor'-ious Fourth can be no better celebrated than to the music of the 'Victor' 'Load up' with a supply of patriotic records, and bombard your friends with good music instead of bad powder.

"Substitute the melodies of Robert Burns, (No. 31,470), for the danger of powder burns.

"Play 'The Stars and Stripes Forever' (No. 306), instead of wearing scars and marks forever.

"Play 'The Man Behind the Gun' (No. 307), instead of being the man behind the gun.

"Play 'Lights Out' (No. 4,678), in place of putting eyes out, and remember that 'Music Hath Charms,' but none of the harms of gunpowder."

O. R. Schreyer, Callaway, Neb., who handles watches and jewelry in Callaway, Neb., is considering putting in a stock of talking machines and supplies.

THE SENECA

Here's the new disc rack equipped with board shelving.

Openings are 3 inches wide, over double the width of our other disc racks.

It is 46 inches wide and 51 inches high. Four shelves for 10-inch discs. One for 12-inch.

Finish in bright or dull copper.

Price is \$14.00, envelopes not included.

"The Heise System" of wire racks is the "last word" in stock carrying systems.

SYRACUSE, N. Y.

The perfection of its motor, the sensitiveness of its reproducer, the simplicity of its entire construction, the unmistakable faithfulness of its instrumentalism, the mellow sweetness of its "voice," and the novelty of its form—the Columbia "Regent" Grafonola proves its two hundred dollars' worth to every "prospect."

Columbia Phonograph Co., Tribune Building, New York.

WITH THE TRADE IN CLEVELAND.

Business Somewhat Uneven, but Optimism Reigns Supreme—Sales of Popular Priced Machines to Campers—A Wide Awake Manager—Activity with the U. S. Phonograph Co.—G. J. Probeck Co. Make Excellent Report Regarding Grafonola Demand—Victrolas and High Priced Machines in Great Demand at Buescher's—Other Items of Interest.

(Special to The Talking Machine World.)

Cleveland, O., July 9, 1910.

Discussion of business in talking machine circles varies from mild pessimism to pronounced optimism. Whether either condition is one of heredity is a question. One may visit a store which presents a moribund appearance, and yet the proprietor will pleasantly speak of the good times and the prosperous business he is doing. At another, as you pass numerous customers and meet the proprietor wearing a dismal countenance, he will bewail conditions and tell how bad trade is, while, in fact, he is doing well—making money.

The business as a whole for the summer season is exceptionally good. A number of dealers are making good sales of the highest priced machines, and, coupled with a large volume of trade in the most expensive records, have every reason to feel satisfied.

There have been good sales of the lower priced machines and records to excursionists, who have taken them along to camp, the lake shore and on the boats up the lakes, to while away their vacation.

Richard S. Pribyl, traveling representative of the Universal Talking Machine Mfg. Co., Philadelphia, was in the city July 1, looking after Zonophone business.

F. J. Noardle, proprietor of the Piano Player Co., and distributor of the Victor and Zonophone goods at Omaha, Neb., was a visitor in the city recently, and paid his respects to the various talking machine dealers. He stated business was generally very satisfactory in the West.

A Cleveland attorney, with inherited habits of economy, dictated a letter to a client into his graphophone for his stenographer to transcribe. Finishing the dictation, he added this instruction: "Plain paper will be good enough for this fellow." His stenographer transcribed the letter faithfully, instructions and all. He signed the letter without noticing the postscript. The next day's mail brought the dictated episode back enclosed with another one that fairly scorched the plain paper. A stenographer with one week's experience is now looking for a job.

A free moving picture show entertainment is to be a regular feature of the social settlement work of the Council Educational Alliance of Cleveland this summer. A citizen has presented the Alliance with a complete motion picture outfit, and together with a talking machine the first entertainment was given in the auditorium of the building Sunday evening. During the summer, weather permitting, entertainments will be

given out of doors. A careful supervision will be given films and records so that nothing objectionable will be presented.

O. E. Kellogg, manager of the talking machine department of McMillin's music store, is a gentleman of wide experience who has been in close touch with the talking machine business for over fifteen years, in fact, since its inception. He is enterprising, active, pushing, and believes that nothing can stand still in this world without at once showing that it might as well be in the scrap pile. He is constantly making improvements in his department and aims to satisfy customers. Of business he said: "During June, while fairly good, it was not as brisk as anticipated. However, we made a number of good sales. The Edison records are in great demand, particularly the foreign ones. We sold quite a number of machines and records which were taken to the summer camps and pleasure resorts."

Activity is manifest at the offices and factories of the United States Phonograph Co., and the management report great interest on the part of the trade in the Banner and Opera models, and the U. S. Phonola. It was stated that those dealers who have inspected the line at the company's demonstration room have expressed themselves as highly pleased with the results obtained from the machines and the U. S. Everlasting records. The company is basing its claims upon the qualities of tone production, convenience of operation and durability of records. It is unquestionably a fact that the U. S. machines give great volume of tone and remarkable detail of reproduction. One among the many desirable features of the machine is the double reproducer carriage, which is simple to operate, affording convenience in that it changes the reproducer point and shifts the feed gears at one operation. The U. S. records are durable; in fact, the company state they have no knowledge of how long they will last, as a record has been played 1,000 times without perceptible sign of wear. The combination of these qualities is a strong one, and it is not to be wondered that the company reports the outlook exceedingly bright.

The G. J. Probeck Co. say their sales during the past month were unusually good considering the season. Mr. Robertson said: "The onrush of summer weather is bringing with it a demand for machines and records to help while away the warm evenings out of doors. People are more than ever realizing what a splendid open-air entertainer the Graphophone has come to be, and so the demand is becoming stronger every year, for use on the summer porch, in camp or at the beach. The Grafonola demand, especially for the library table type, is unusually good for the season. All of our stock on hand of this style was sold out the past month, and numerous inquiries are being made for the new "Mignon" Grafonola, just being placed on the market. On the whole our summer trade is putting in a better front than a year ago, and we feel well satisfied with the outlook."

Mr. Tinker, manager of the talking machine department of the May Co., reports large sales of records of popular numbers to excursionists going up the lakes by boat.

W. H. Buescher & Son state that summer sales are almost exclusively of Victrolas and the high grade machines and records. The same conditions may be said to prevail at the Collister & Sayle establishment, with a little more emphasis on the Red Seal department. The Bailey Co. also report a demand for high-priced machines and Red Seal and other high-priced records, but the cheaper machines and records are not overlooked. In fact, they have been greatly in demand since the vacation season set in. John Reiling, proprietor of the West Side Columbia store, is increasing his large clientele of users of foreign records. Charles I. Davis reports business of a most encouraging character; the sales of Victrolas and Edison phonographs are daily increasing. His attractive Fourth of July window was most favorably commented on. An excellent season's trade is also reported by D. L. Robbins & Co., a talking machine store; Brown Bros., Goodman Piano Co., Gottdiner & Wicht and Coblity Bros. The latter firm will soon move into new, larger and more central quarters in a building now being erected. Of course, with these firms business varies, some doing well in machines and others in records. All could do more business, however, and are working hard for it.

AN ENGLISH VISITOR.

Fred Lee, a Jewel Specialist, a Recent Caller at the World Sanctum.

Fred Lee, of Fred Lee & Co., who are large importers of jewels and manufacturers of watches, in Coventry, England, recently paid The World a very delightful visit. Mr. Lee is deeply interested in the development of the talking machine, and is an old-time subscriber to The World. His visit to this country primarily was for the purpose of testifying as a witness in the appeal made by the National Phonograph Co. from the ruling of the Board of Appraisers in regard to increased duty on sapphires. He is not a stranger, however, as he makes periodical visits to this country, and is a splendidly informed man not merely on matters of current interest in England, but indeed in our own country. It may seem flattery, but it is none the less the truth, that men of that caliber usually read The Talking Machine World.

TALKER FOR SING SING PRISONERS.

Although usually there is no observance of holidays in Sing Sing Prison other than suspension of work, Warden Frost, because of the long period of idleness entailed by Saturday, Sunday and the Fourth of July, had a big talking machine at the prison on the afternoon of Independence Day and caused it to be shifted from section to section, giving in each a varied program of music, songs and humor. The innovation was welcomed by the prisoners.

TRADE ON THE PACIFIC COAST.

Usual Summer Quiet Follows Busy June—Little Advertising Being Done—Pacific Phonographic Co. Progress—Now in Full Swing—Sonoma Valley Co. Moves—Talking Machine Installed in the Schools of Oakland—Columbia Business Normal—Talk of Another Talking Machine Store on Kearny Street.

(Special to the Talking Machine World.)

San Francisco, Cal., July 7, 1910.

Although business for June was on the whole rather better than the trade had anticipated, it is decidedly quiet just now. The vacation season is now at its height and a number of members of the trade, as well as a large proportion of the buyers, are out of town. Talking machine people notice a decided falling off in the sale of records to regular customers. Many buyers of high-priced records are out of town on vacations, and the new July records, which have just been put on sale, are not expected to have the usual active opening days, though it is still too early to say positively.

Wholesale shipments to the summer resorts and other out-of-town points have also died down somewhat and are not expected to show up very largely until after July 4. The June wholesale business was, however, remarkably good for a naturally quiet month, and the big houses are well satisfied with the showing made. Reports from Los Angeles indicate that the general absorption of the music trade there in the big piano sales of the last few weeks has had a reactionary effect on the talking machine business. At other points on the Coast the sales for the month are well up to the average.

Aside from the Columbia advertising of the Improved Champion through Kohler & Chase, the talking machine houses are keeping strictly out of the newspapers. Some little publicity work through mailed circulars is being done all the time, but, generally speaking, the trade will wait for the end of the vacation season before making any very large advertising expenditures.

J. J. Black, manager of the talking machine department of the Wiley B. Allen Co., reports that the city stores of the company are doing their usual dull season business. Some changes are being made in the stores in the smaller cities in preparation for the increased business which will come with the close of the vacation season. Mr. Jesson, formerly with the San Francisco store, is now in charge of the talking machine business at the San Jose store. He is enthusiastic and is going energetically to work, with results that are already coming in. Manager Stedman, of the talking machine department of the Oakland store, has some alterations under way. More soundproof rooms are being fitted up to take care of the increased trade.

After many weeks of steady and hard work, the big Edison distributing agency of the Pacific Phonographic Co. on Mission street, San Francisco, is now in complete and perfect order. This month additional shipments have arrived, and Manager A. R. Pommer now feels that he is in a position to supply the Pacific Coast trade with anything in the Edison line that may be called for. With everything in ship shape, he feels that he has earned a rest, and has accordingly betaken himself to the high timber. He is spending his vacation in the Bear River country.

A. W. Parent, a stationer and music dealer of Petaluma, Cal., who a few weeks ago closed out to his partners his interest in the Sonoma Valley Music Co., with stores in Santa Rosa and Petaluma, has now repurchased from that company the entire Petaluma stock and business in Edison and Victor talking machines. He will have the exclusive agency of both lines in Petaluma, the Sonoma Valley Music Co. retaining the business at Santa Rosa, where the management will be in charge of Mr. Pommeroy as heretofore.

The Board of Education of Oakland, Cal., has installed the talking machine as a part of the

regular high school curriculum. A talking machine and a number of records have been ordered for the Fremont High School on the recommendation of the teaching force. It is planned to order other machines for the other schools as they are needed and called for.

Coast Manager W. S. Gray, of the Columbia Phonograph Co., has been absent from the city some days on a vacation. Mr. Scott, head of the San Francisco business, is in charge here, but is himself absent this week on a short business trip. Business is reported about normal on most lines, with a little extra spurt just now on the Improved Champion.

Peter Bacigalupi, of Peter Bacigalupi & Sons, has returned from his eastern trip, and is now getting ready for the removal to new quarters.

C. E. Stubbs, piano and music dealer of San Bernardino, Cal., who recently removed into new and improved quarters, is putting in a well stocked talking machine department. He plans to carry machines and records of all makes.

The Hauschildt Music Co., of San Francisco and Oakland, who now have under way a special contest scheme in their piano department, have given their talking machine department a share in the benefits and are offering a talking machine as second prize in the contest.

Rumor has it that there is to be still another talking machine store on the west side of Kearny street between Post and Sutter. This is the block on which Sherman, Clay & Co., the Wiley B. Allen Co., and Benj. Curtaz are already located with flourishing talking machine departments. A new store there would make that block distinctly the "Talking Machine Row" of San Francisco. None of the local wholesale houses appear to know of a new talking machine store of importance to be started either on Kearny street or elsewhere.

Now that Kohler & Chase actually have their big Spokane, Wash., piano store opened for business, the Coast trade is showing some little curiosity to know what the new store is going to do in the talking machine line. It is generally assumed that talking machines will be put in sooner or later, and it is wondered if the Columbia goods will be specialized on in Spokane as in San Francisco.

A. G. McCarthy, of Sherman, Clay & Co., who, besides his official position with the company, acts as head of the talking machine department, has returned from his eastern trip, and will put in the next few weeks in getting things in shape for the fall and winter business. He comes back greatly encouraged over the prospects of San Francisco's capturing the Congressional endorsement of the Panama-Pacific Exposition. He found people in the East quite generally favorable. He believes that the fall season, especially in the wholesale departments, will begin early, and has planned to have in a big stock of Victors and to be ready for the best.

NOTHING TOO TRIFLING

To be Overlooked by the Talking Machine Man Who Desires to Attain Success in This Work-a-Day World.

Webster, in a great speech, once used an anecdote with telling effect. Someone asked him where he got it, and he replied that he had heard the anecdote fourteen years before, but had not thought of it in the meantime.

The art of seizing every bit of knowledge, every scrap of information, no matter how insignificant it may seem at the time, the laying hold of every opportunity and every occasion, and grinding them all up into experience, cannot be overestimated in the talking machine or any other industry.

* A boy who was working for a cathedral window artist in Europe made a beautiful window out of the bits of glass which his master threw away. He who would get on in the world, who is anxious to make the most of himself, regards nothing as trifling. Even the chips of time and opportunity which others throw away he seizes and manufactures into cathedral windows.

The dealer who makes the money

is the man who has the trade of the come-again-and-again customer. He is of your own making and is the only kind you ought to have.

You can easily have such customers if you look after their interests properly, and you can see at a glance that their interest is your interest.

Customers come to your store because they want Victors, Victrolas, Victor Records, record cabinets, horns, needles and other accessories, and they expect to get just what they want.

It's up to you to give it to them. If you satisfy them once they will come again and again. They put your store down as the place to do their buying, and they will steer clear of your competitors just so long as you can supply their talking machine needs.

It pays to have what the people want, and you shouldn't be caught napping. If you're short of anything in the Victor line, we're ready to help you out. You can send us your order with the full assurance that it will have prompt and careful attention. We have the name of shipping all goods the same day the orders are received—and we live right up to it.

Write to-day for our latest catalog, and our booklet, "The Cabinet That Matches," which tells about our record cabinets that match each style of Victor.

When you get them look through them and see if we can't do something for you.

New York Talking Machine Co.

Successors to
Victor Distributing and Export Co.
83 Chambers Street New York

THE PHOTOGRAPHONE.

A Swedish Inventor Devises a Combination Instrument.

Writing from Stockholm, Consul-General Edward D. Winslow describes a new invention in Sweden which reproduces both action and sound:

In the photographone the large metallic trumpets which caused the hollow metallic sound are entirely dispensed with. No receiver is needed for the speaker; only a very small celluloid tube, like the one used at the telephone, is placed in the front for the convenience of the speaker, but this tube is easily dispensed with. On the left side behind the wall is placed an electric lamp. From this the light passes through two cuvettes (through which water is running) which absorb the heat, and then through the wall and a system of lenses seen in front of the tube. Having passed through these the ray of light strikes and is reflected in a mirror fastened on the membrane behind the tube, is thrown onto a rotating sensitive plate, and finally draws the sound curve on this negative. This original negative is developed, and the sound curve transferred to plates of ebony. From these the sound is again reproduced as in the gramophone. In this way the human voice and all other sounds are perfectly reproduced without any disturbing secondary sounds.

So perfect is the reproduction of sounds with the photographone that the inventor can distinguish between and actually read on the curve the different letters of the alphabet, and the photographic plate is so sensitive that the smallest variations in the voice can be studied. The same words uttered in the same language, but by another individual, appear different in the photographone script.

The great importance of this method for obtaining linguistical and musical records is evident. This invention is of high value, not only for the student of linguistics and phonology, but for the general ethnologist who needs to obtain kinematographic reproductions of dances or other ceremonies. It has always been difficult to combine the gramophone with the kinematograph, because it has not been possible to obtain the actions and movements at the same time the speech or song is given. With the photographone it is possible at one time to photograph the action as well as the music and song and to reproduce both at one time.

The photographone records can be reproduced ad infinitum, and if the original music or song should not be strong enough to fill a large con-

cert hall at the reproduction the sound can be increased as desired. On account of the immense volume of sound that can be reproduced with the photographone it will, according to the inventor's idea, be of great value for replacing the fog sirens in light-houses. Instead of the inarticulate howl which the fog sirens send out in the night, and which easily can be confounded with the fog horns of other vessels, this new photographonic fog horn will call out the name of the light-house for miles over the ocean. For work in the field the inventor replaces the electric with solar light.

A practical use for the photographone on a most extensive scale will be reproducing lectures and addresses.

LANDAY BROS.' EXPANSION.

The Progress of This Enterprising House Is the Subject of Some Complimentary Remarks in the New York Review.

The New York Review, which treats of theatrical matters and other things, has this to say of Landay Bros.:

"In the year 1900, at 256 Willis avenue, the Bronx, Max Landay and his brother, James B., embarked in the business of selling talking machines. Their success was so great in that lo-

utors in Greater New York for the Victor talking machines and records.

"The high regard with which the Landay Bros. are held by the best buying class is evidenced by a visit to their beautiful show rooms, where a competent staff of musicians will gladly play for you any operatic or popular selection which you may desire. Here is a welcome chance these hot days to spend an hour or so in a cool, restful studio, where you can make a selection of the sterling Victor goods.

"For the members of the profession who may be in or near New York an opportunity is here offered that should not be neglected. If you own a Victor talking machine, as do many of the members of the theatrical profession, now is the time to get a new and up-to-date supply of the world-renowned Victor voice engravings. If, on the other hand, you do not own a talking machine, come in anyhow to either of the two stores and meet the Messrs. Landay Bros. 'Get acquainted.' It will prove a profitable piece of business all around."

TO COMBINE JULY AND AUGUST LISTS.

No list of Zonophone records will be mailed out by the Universal Talking Machine Mfg. Co., Philadelphia, Pa. General Manager Macnabb

NEW YORK REVIEW ENTITLES MAX LANDAY A LEADER IN THE TALKING MACHINE BUSINESS.

cality that they moved further downtown, to 288 Fifth avenue. From there they went to their present locations, 400 Fifth avenue and 27 West 34th street. They are now the leading distrib-

states, however, that the next bulletin will be a consolidation of the July and August lists. Further, after this month the company will be in a position to issue a list of records regularly each month, as was the practice before the disarrangement of their factory routine by the removal from Newark, N. J.

THE EDISON BUSINESS PHONOGRAPH.

After all, the efficiency of any office system for consolidation of the July and August lists, the number of accurately written letters despatched during a day. This is the test invited by the Edison commercial system, for its employment has demonstrated that double the number of letters are transcribed and a saving of 50 per cent. effected over the old method of shorthand notes. The Edison Business Phonograph is an important economy in any business, but it is in large establishments that the phonograph finds an ideal application. In such concerns operators are writing continuously, work is facilitated by the division of labor, one person is responsible for the safety of correspondence, and the executive offices are made more private and quiet.

Each cylinder may be "shaved" at least seventy-five times during its life and in this way accommodates eight hundred ordinary letters at slight expense. No claim is made that the Edison Business Phonograph will supplant stenography; on the contrary, it has proved an invaluable aid to experts in every branch of the profession. But the phonograph, like the typewriter, will surely make its way wherever transcribing is done, and the only persons not benefited will be those not wise to its advantages and skilful in its use.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Special to The Talking Machine World.)

Washington, D. C., July 9, 1910.

DISC SOUND-RECORDING MACHINE. Thomas H. Macdonald, Bridgeport, Conn., assignor to American Graphophone Co., same place. Patent No. 957,694.

This invention relates to talking machines, and more particularly to the class known as "disc" machines, in which the reproducer is carried on the end of a swinging arm, which is capable of moving transversely across the face of the record during the act of reproduction.

The object of the invention is to provide a construction of swinging arm which shall readily respond in a vertical direction to any irregularities in the surface of the tablet and at the same time be capable of freely moving transversely across the face of the record without the necessity of carrying or moving the usual horn, and at the same time be capable of transmitting the sound vibrations from the hollow swinging arm to the horn without loss or modification due to an imperfect or incomplete union between the swinging arm, which moves, and the horn which, during the act of reproduction, is stationary.

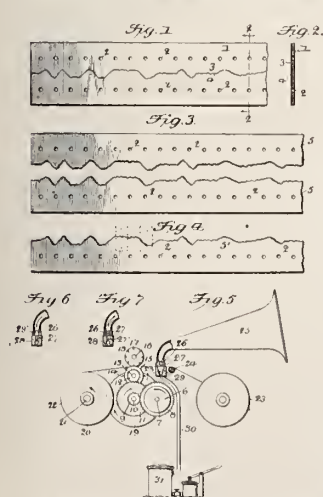

Figure 1 is a broken side elevation, partly in section, and Fig. 2 is a plan view of the hollow swinging arm, showing the ring and the trunnions connecting said ring to the hollow arm, in horizontal section, and Fig. 3 is a vertical section through the upper end of the swinging arm and the lower end of the stationary arm, illustrating the mounting of said arms.

METHOD OF RECORDING AND REPRODUCING SOUNDS. John C. English, Camden, N. J., assignor to Victor Talking Machine Co., same place. Patent No. 957,195.

This invention relates to a method of making a permanent undulatory record of sounds, articulate, musical or produced in any manner, and, further to the method whereby recorded sounds are reproduced without the use of a reproducing stylus.

Figure 1 represents on an exaggerated or magnified scale, a portion of a suitably prepared tape upon which the sound waves have been recorded

in the form of longitudinal series of transverse undulations; Fig. 2 is a section thereof on the line 2—2, Fig. 1; Fig. 3 illustrates the manner in which the tape shown in Fig. 1 is divided longitudinally along the line of the record to form two master records; Fig. 4 illustrates a paper duplicate made from said master record; Fig. 5 shows one form of a reproducing apparatus employed to produce the sounds recorded on the edge of the record; Fig. 6 illustrates a modified construction in which the air is drawn through the aperture from the horn, and Fig. 7 illustrates another modification in which the air may be forced through the aperture in either direction,

BRAKE FOR DISC TALKING MACHINES. Walter Zeysing, Stettin, Germany. Patent No. 959,682.

This invention relates to improvements in disc-talking machines of that class, in which the disc-record is automatically stopped at the completion of each reproduction. To accomplish such automatic stopping, the style running in the record-grooves of the disc is made to enter at the proper time into an empty or dead-groove specially provided, whereby the diaphragm-carrier is lowered as it approaches the center of the disc. By lowering the arm of the diaphragm carrier, the revolving motion of the disc-carrier will be stopped through the agency of brake-mechanism actuated from the diaphragm carrier in its lowered position. The disc-carrier may be rotated in any known manner.

Figure 1 is a plan of the record-disc with its empty or dead groove, the driving spindle and the arm carried at the top of the same. Fig. 2 is a side-elevation of the casing, the disc-carrier and record-disc, the diaphragm and diaphragm-holder, the horn with its supporting bracket, and an arm attached to the diaphragm holder, said arm being destined to engage the arm on top of the disc-spindle. Fig. 3 is a plan of another modification of the means for holding the arm carried by the diaphragm holder. Fig. 4 is a view showing the diaphragm carrying an arm for engaging the arm on the disc-spindle. Fig. 5 is a plan of another modification of the arm secured to the top of the disc-spindle. Fig. 6 is a side-elevation partly in section, of a portion of the casing, the disc carrier and record-disc with the driving spindle and brake mechanism actuated by the same. Fig. 7 is an underside view of a portion of the disc carrier, with the brake lever attached thereto, the brake arm shown in the raised or inoperative position. Fig. 8 is an underside view similar to Fig. 7, with the brake-arm shown in the operative position. Figs. 9 and 10, are, respectively, a side elevation of Figs. 7 and 8.

Fig. 1 is a plan of the record-disc with its empty or dead groove, the driving spindle and the arm carried at the top of the same. Fig. 2 is a side-elevation of the casing, the disc-carrier and record-disc, the diaphragm and diaphragm-holder, the horn with its supporting bracket, and an arm attached to the diaphragm holder, said arm being destined to engage the arm on top of the disc-spindle. Figure 1 is a longitudinal section of a record holder embodying the invention, showing a record thereon, and showing the holder attached to a machine. Fig. 2 is a cross-section on the line 2—2 of Fig. 1 through the record holder, the record being removed. Fig. 3 is an end view of the record holder with the record thereon. Fig. 4 is a broken longitudinal section of a slightly modified form of record holder, and Fig. 5 is a cross-section on the line 5—5 of Fig. 4.

RECORD-HOLDER. Julius Roever, New York. Patent No. 959,610.

The object of the invention is to produce a simple form of record holder which is cheap, and to which a record can be easily applied, and further to produce a record holder which will hold the record in a manner to permit it to be adjusted with the utmost nicety, which will not interfere with the contraction and expansion of the record, and which will have no parts gripping the ends of the record.

Another object of the invention, and the main object in fact, is to produce a satisfactory record holder which will permit a record to be instantly slipped on endwise over the holder without the necessity of adjusting or operating any mechanism. In the invention the only part that touches the end of the record is a light finger connected with a tension spring, and this touches merely one point on one end of the record.

Figure 1 is a longitudinal section of a record

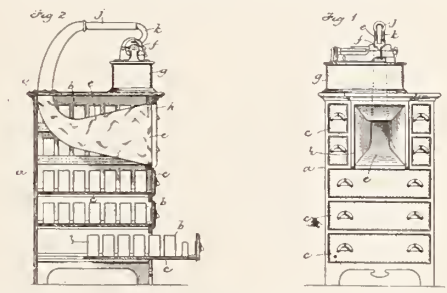

holder embodying the invention, showing a record thereon, and showing the holder attached to a machine. Fig. 2 is a cross-section on the line 2—2 of Fig. 1 through the record holder, the record being removed. Fig. 3 is an end view of the record holder with the record thereon. Fig. 4 is a broken longitudinal section of a slightly modified form of record holder, and Fig. 5 is a cross-section on the line 5—5 of Fig. 4.

PHONOGRAPH CABINET. Edwin A. Hall, Hyde Park, Mass. Patent No. 959,522.

The invention has for its object to enable the sound amplifying horn of a phonograph to be contained mainly within the cabinet, so that the entire outfit, including the phonograph, the cabinet and the horn, will be reduced to compact form, and the disadvantage and inconvenience of a horn projecting outwardly above the phonograph will be obviated.

Of the accompanying drawings, forming a part of this specification—Figure E represents a front

elevation of a phonograph cabinet embodying the invention, and a phonograph supported thereon. Fig. 2 represents an end elevation, the cabinet being shown in section.

DIAPHRAGM FOR TALKING MACHINES. Frank Kane, Tacony, Pa. Patent No. 960,021.

This invention relates to a new and useful improvement in diaphragms for talking machines, and has for its object to so construct a diaphragm as to enable it to reproduce with greater accuracy the various sounds, such as singing, talking and the tones of all kinds of musical instruments and to prevent the harsh metallic sound heretofore incident to the reproduction by such machines.

Figure 1 is a plan view of the improved diaphragm, and Fig. 2, a central section thereof.

SOUND BOX FOR TALKING MACHINES. Percival James Packman, Highbury, London, Eng. Patent No. 960,191.

This invention relates to a sound box for disc talking machines, and has for its object to provide a sound box which can be used either for reproducing from a so-called hill and dale or phonograph cut record or a zig-zag or Berliner cut record, and which can be easily and rapidly converted and brought into the correct position for playing from either of such records.

According to this invention, the stylus holder is mounted in connection with the stylus bar in or on suitable bearings so that the stylus can be brought either into a plane parallel to the plane of the diaphragm for playing from zig-zag records, or into a position inclined at a suitable angle to the said diaphragm for reproduction from hill and dale cut records, and means are provided for changing the position of the needle or stylus holder with great facility and for locking it in either of the required positions.

Figure 1 is a front elevation of a sound box fitted with a needle for reproducing from a zig-

Fig. 1 is a side elevation, partly in section, of a phonograph reproducer constructed in accordance with the invention; Fig. 2 is an end view, showing the stylus lever and stylus carried thereby in operative position with respect to the record surface, and Fig. 3 is a bottom plan view of the same and of the adjacent portion of the floating weight.

PHONOGRAPH REPRODUCER. Peter Weber, Orange, N. J., assignor to New Jersey Patent Co., West Orange, N. J. Patent No. 13,120.

This invention relates to phonograph reproducers, and has for its object the provision of an improved stylus and mounting therefor, adapted more particularly for use with records in which the pitch of the record groove is one two-hundredth (1/200) of an inch. In order to properly track records of this character as now on the market it is necessary that the reproducer stylus be of microscopic size, since the record groove is formed by a stylus having a curved cutting edge, the diameter of which is only .008 of an inch. The reproducer stylus should have a rounded surface and should be so shaped as not to cause undue wear upon the record. It should also be supported in such a manner as to be capable of lateral movement, so that it will track the record groove properly; and it is also desirable that the stylus should be so connected to the diaphragm that the vertical movement of the stylus will be magnified, so as to produce an amplified movement of that portion of the diaphragm to which it is connected.

Figure 1 is a side elevation, partly in section, of a phonograph reproducer constructed in accordance with the invention; Fig. 2 is an end view, showing the stylus lever and stylus carried thereby in operative position with respect to the record surface, and Fig. 3 is a bottom plan view of the same and of the adjacent portion of the floating weight.

PHONOGRAPH REPRODUCER. Peter Weber, Orange, N. J., assignor to New Jersey Patent Co., West Orange, N. J. Patent No. 13,120.

MANUFACTURE OF PHONOGRAPH RECORD BLANKS. Varian M. Harris, Chicago, Ill., assignor by mesne assignments to the United States Phonograph Co., Cleveland, O. Patent No. 960,320.

This invention relates to a process of forming phonograph record blanks from sheets of celluloid, and has for its object to provide a simple and efficient process of joining the abutting ends of the sheets of celluloid in a strong and permanent manner, the process being more especially adapted for joining a sheet of the material bent into a tubular form, and so held while abutting ends are joined together to form a tubular phonograph record blank, equal in all respects to the draw tubes or cylinders heretofore used in the manufacture of phonograph records.

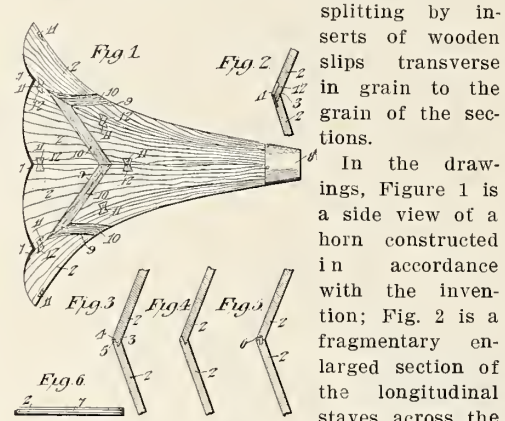

zag record. Fig. 2 is a side elevation of the same sound box with the needle replaced by a sapphire point and the stylus holder brought into a suitable position for reproducing from hill and dale cut records. Fig. 3 shows an enlarged view of a detail. Figs. 4 to 6 show partly diagrammatic views of details greatly enlarged.

Figure 1 is a longitudinal section on line x-x, Fig. 3. Fig. 2 is a similar section with parts occupying a different operative position, and Fig. 3 is an end elevation.

HORN FOR SOUND REPRODUCING MACHINES. Alfred R. Cunniss, Brooklyn, N. Y., assignor of one-half to Lipman Kaiser, East Orange, N. J. Patent No. 960,834.

This invention relates to megaphones or horns used for sound-reproducing machines, and particularly to the construction of a wooden horn, the object of the invention being to provide a horn of this character which shall attain a high degree of purity of tone, and eliminate any harsh or metallic ring.

The invention consists in a horn made up of thin strips or sections interengaged at their edges, bound to each other by doubled dovetailed dowels, and by transverse strips or bars let into the sections and crossing the same, the ends of the sections being further prevented from splitting by inserts of wooden slips transverse in grain to the grain of the sections.

In the drawings, Figure 1 is a side view of a horn constructed in accordance with the invention; Fig. 2 is a fragmentary enlarged section of the longitudinal staves across the dovetailed dowel; Figs. 3, 4 and 5 are transverse sections showing different means of making a joint between two longitudinal staves; Fig. 6 is a lower end view of one of the longitudinal staves or sections to show the inlet slip which prevents splitting of the sections; Fig. 7 is a face view of the lower end of one of the staves or sections, the wood being partly broken away; Fig. 8 is a view showing two adjacent longitudinal strips, the transverse binders and the dowels therefor, disassembled.

TALKING MACHINE. Julius Jetter, Camden, N. J., assignor to the Victor Talking Machine Co., same place. Patent No. 960,645.

The main objects of this invention are to provide, in a talking machine, an improved support for a tubular sound box arm, of simple and durable construction, which will be effective in action, and in which the interior of the arm is unobstructed by any projections, while at the same time the arm is supported so that it may be easily moved in the different directions required in the use of the machine; to provide improved means for retaining a sound box arm in its raised or inoperative position to permit of the insertion of a new needle or the removal of a record; to provide improved means for connect-

ing a sound box to a sound conveying tube or other support.

In the accompanying drawings, Figure 1 is a side elevation of a talking machine constructed in accordance with this invention; and Figs. 2, 3, 4, 5 and 6 are fragmentary sectional views of details of the same.

PHONOGRAM-REPRODUCING APPARATUS. William F. Messer, Chicago, Ill. Patent No. 961,980.

This invention relates broadly to an improvement in apparatus for the production of phonograms, being directed more particularly to such an apparatus designed to produce that form of record known as a cylinder record, in the process of manufacture of which the plastic record material is molded under the influence of the expansive force of a fluid molding agent, such as steam under pressure, or the like.

You can't be a top-notch in the business if you refuse to co-operate with your fellow merchants for the good of the whole town.

PHONOGRAM-REPRODUCING APPARATUS. William F. Messer, Chicago, Ill. Patent No. 961,980.

International Talking Machine Expert

Talking Machine Expert, understanding thoroughly the trade in every detail in England as well as America, desires to secure responsible engagement with leading American house. Familiar with wholesale and retail business. Can supply the highest references. Address H. R., c/o The Talking Machine World, No. 1 Madison Avenue, New York.

YOUR OPPORTUNITY!

Talking Machine Business in prosperous Southern city of 165,000.

Victor and Edison dealers—only one other here. Have been in business only five months and am doing at the rate of \$10,000 per year.

Stock will invoice about \$4,000, but can be reduced. Have other interests which take up most of my time.

GREAT CHANCE FOR A LIVE MAN. Don't answer unless you mean business. Address Box 300, care Talking Machine World, 1 Madison Avenue, New York.

SALESMEN WANTED

Wanted—Two good live salesmen (no dead ones) to sell pianos, Victor, Edison and Columbia machines and records. Fine territory. Good opening to right parties. Married men preferred. State references. Either salary or commission. Sturrock Music Co., Port Townsend, Wash.

STOCK TO EXCHANGE

Exchange—I have a stock of Victor Talking Machines, Records, etc., that I wish to exchange for Edison stock, sewing machines, bicycles or pianos; or will sell at a good discount. Ellsworth, 106 East 6th street, Topeka, Kan.

MANAGER WANTED

Wanted—First-class Victor and Edison department manager for large piano house. Apply, stating experience and references, to V. E. J., care of The Talking Machine World, 1 Madison Avenue, New York.

A Cabinet to Go With a Talking Machine

should be made of seasoned lumber; it should be built properly by skilled Cabinet Makers and when it is ready to be finished the interior work should be perfect, the joints all properly made and every little detail right; then the finishing should not be done in a day, but enough time taken for each process that is necessary to get the very best finish obtainable.

The Udell Line of cabinets for Disc Records and Cylinder Records is one that embodies all the points outlined above. In addition the Udell Line offers you an assortment of patterns and a range of prices which, from your standpoint, makes it irresistible.

In order to prove the worth of these assertions, the best thing you can do is write us for illustrations and prices.

A WISE DOG.

Boston Bull Terrier Who Recognizes His Master's Voice Over the Telephone—Called Home Over Long Distance 'Phone.

A dog who knows "his master's voice" is well known, but a dog who will recognize that voice over a telephone, something many adult humans cannot do, is unusual. Such a dog is Tige, a Boston bull terrier, owned by the captain of a

fire engine company. The dog stays at the residence of the captain. A few days ago the dog followed the captain down town, and as he was not going home and did not want to take the dog with him, he called up his wife on the telephone. "What shall I do with Tige?" he asked, "he won't go home." "Put the receiver to his ear and I'll call him; maybe he will come," said his wife. The receiver was placed to the dog's ear and his mistress called. He listened attentively, recognized the voice, and barking his approval, rushed from the station and soon reached home. Since then it has been an easy matter to take Tige down town, and when he hears the telephone bell ring he barks and gets ready for the message.

AN AID TO QUICK SERVICE.

Blackman Folding Record Tray Necessary for System in Record Stock.

Every customer in any kind of store demands and appreciates quick service, and the house that can offer that service is the one that is going to enjoy a growing business. The basis of quick service is system, for without a systematized and orderly stock it is impossible for a salesman, no matter how good, to fill orders without the delay occasioned by the necessity of hunting for each item demanded. One of the greatest aids to system in the talking machine store is the Blackman folding record tray, sold by the Blackman Talking Machine Co., New York, and which, in connection with the Rapke labels, has been adopted by the great majority of the talking machine dealers. The trays come in various sizes, to hold from two to six records, and being shipped flat cut down express charges and storage space after receipt. With the use of the trays the record stock is always in order, any selection is instantly accessible and where the labels are used really act as silent salesmen. Sample trays and labels with full information as to prices, etc., may be obtained by applying to the Blackman Talking Machine Co.

When competition lets up that is no time for you to go to sleep. Bear on just as hard and get all the trade possible clinched for your store against the time when competition wakes up.

"DON'T TAKE ME HOME."

Pleaded Phonograph with Thief and It Waked Owner of Machine.

J. Tominello, of 354 South Second street, Memphis, Tenn., was awakened by a voice the other morning which pleaded, "Please, don't take me home."

Tominello struck a match and looked around. He discovered a thief making a hasty exit with a phonograph under his arm.

The prowler in starting from the room with his loot had brushed his foot against the starting lever of the machine, and the musical instrument continued to play, but the thief disappeared.

In addition the thief took money and clothing ranging from shoes to hat.

EDISON AND THE PHONOGRAPH.

In a recent newspaper interview, Thomas A. Edison, replying to a question as to which of his inventions, he thought the most likely to receive the homage of posterity, he said at once:

"The phonograph, because of its sentimental side. In the development of the phonograph and the moving picture we have now reached a point at which we can make the picture sing and speak very naturally, and the public will get this invention in the near future."

THE COST
REDUCED

10 inch 65c. **DOUBLE RECORD DISCS** 12 inch \$1.00

Zon-o-phone Records are pre-eminently the BEST that money, brains, and a thorough knowledge of the art of sound recording can produce.

They are justly famous for their remarkably clear, natural tones, absence of scratch and wearing quality.

The greatest care is exercised in combining the selections, each side of the disc presenting the latest and best in popular music or standard compositions.

The price appeals to the masses, the quality to the classes, making them indeed a popular record at a popular price.

A new catalogue of Hebrew Single Side Selections has just been issued. Solos by Mme. Prager, Mr. Juvelier, Master Mirsky, the boy soprano, and other eminent singers. These are undoubtedly the most perfect Hebrew records ever recorded. 10 inch, 50 cents, 12 inch, 75 cents.

Resolve yourself, Mr. Dealer, into a committee of one and investigate these claims. Consider, criticize, compare. ZON-O-PHONE RECORDS will stand the test. A trial will verify all that we say.

FILLING THE ORDER.

How Much of the Jobber's and Dealer's Success Depends Upon Being Able to Meet Unexpected and Unusual Demands—Occasions Where the Employee Shows His Mettle.

The filling of orders on time is one of the essential requisites to success with talking machine jobbers. Dealers unfortunately are over-prone to low stocks. When they run short the order is a rush one, and they are naturally pleased when every order is filled promptly.

Next to having the goods in stock, the most important thing is to have the man to fill the order and to fill it promptly. And in this connection it is amazing how employees differ in their ability to grasp and master a situation when it is presented to them. The following conversation illustrates the point which we want to make:

"William," said the boss, "can you fill this order and get it off on the 11.20 train?"

"Guess it's too late."

The boss passed on. "George," said he, "can you fill this order, and get it off on the 11.20 train?"

"I guess so; but the time's short."

The boss again passed on. "Daniel," he said, "can you fill this order and get it off on the 11.20 train?"

"I can make a try at it."

The boss again passed on. "Benjamin," said he, "can you fill this order and get it off on the 11.20 train?"

"Yes, sir."

"Pitch in, then."

Now, it is hardly necessary to state that the boss made a mental note with reference to the future promotion and increase of salary of the young man who rose to the occasion.

Too many employes are inclined to like work only when it runs along an even keel, when no extra demands are made upon their physical or mental resources.

The test, however, comes when on an occasion like the foregoing a thing must be done—done right and done quickly.

Then the "quality" of the force can be measured and one get an idea in a short time what employe or number of employes are bound to win out in the battle of life.

It is the man who when asked "if he can do a thing" and answers "yes," who reveals the qualities that enable men to climb to higher accomplishments.

This is true not only in the talking machine trade but in all lines of employment where men are cast to labor. It is a "meaty" subject, one with a far deeper undercurrent of thought than is revealed in this cursory writing.

OUR EXPORT AND IMPORT TRADE

Of Talking Machines for June and the Entire Twelve Months' Period—Exports Show Strong Gain as Compared with Last Year.

(Special to The Talking Machine World.)

Washington, D. C., August 5, 1910.

In the summary of exports and imports of the commerce of the United States for the month of June and covering the entire twelve months (the last period for which it has been compiled), which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following interesting figures relating to talking machines and supplies are set forth:

The total exports of talking machines, records and supplies for June, 1910, amounted to \$345,420, as compared with \$239,345 for the same month of the previous year. The twelve months' exportations of talking machines, records and supplies amounted to \$3,841,511, as against \$2,852,429 for the same period in 1909.

The total export figures for the twelve months of the past three years are as follows: 1908, \$4,823,793; 1909, \$2,852,429; 1910, \$3,841,339.

The value in detail of exportations of talking machines, records and supplies amounted to \$211,779 in June, 1910. For the twelve months ending in June, 1910, they amounted to \$2,381,172, as against \$1,326,098 in 1909.

The value of all other parts relating to talking machines, phonographs, records and materials therefor sent abroad during June, 1910, amounted to \$133,641; the total exports for the twelve months under this heading foot up \$1,460,339.

MUSIC AS A CIVILIZER.

Walter Damrosch, in Recent Address, Holds That Much of the Domestic Discord in This Country is Directly Traceable to Lack of Cultivation of the Finer Things of Life—How the Talking Machine is Tending to Improve Such Conditions.

At a recent reunion in his honor, Walter Damrosch, leader of the New York Symphony Orchestra, said: "There is more domestic discord in the American home than in that of any other country on the globe, and I believe it is because there is not enough cultivation of the finer things of life. There is little family music or art of any kind, and there is small wonder that elements of discord enter when there is nothing more diverting than calculation on the cost of butter, eggs and bacon."

There is much that is truthful and timely in the foregoing remarks. There is no excuse why music should not be more general in the home, in view of the fact that the talking machine today makes it possible to secure at comparatively small expense the greatest music of the masters interpreted by great organizations of musicians and soloists of world-wide fame.

As an educational factor the talking machine is now considered to be most potent, and nowhere can its work be so effective, both as an entertainer and educator, as in the home. It will bring harmony and joy, and will give many homes an atmosphere now sadly lacking.

We wish talking machine dealers everywhere would take this as a text and constantly expound it. Their belief, confidence and enthusiasm most unquestionably affect those with whom they come in contact. There are millions of homes without a talking machine, and it should be the aim and object of every dealer to inaugurate a great campaign to the end that such people are supplied with machines. And each dealer must be up and doing if he desires to make a better showing than his competitor.

It is a worthy cause, truly, that of carrying musical education into the home, and it must be admitted that the talking machine has been the greatest known factor in making Americans acquainted with the great operatic and instrumental works of the leading composers. It has brought the best of music into the backwoods as well as the cities, and thus an educational campaign has been carried on which has been of incalculable value.

It has well been said that musical progress bespeaks civilization, and as President Harris, of the Northwestern University said in a recent speech in Chicago, "Education without music is insufficient and not in keeping with an advanced civilization. It is indeed regrettable that Americans let music play such a little part in their education and lives," he added. "The majority of them are worse than barbarians. The average graduate to-day of a college starts out to fight life's battle with his brain crammed full of commercialism. Only a small percentage of them know anything of the sublimer works of music. A young man who goes out into the world without being equipped with an appreciation of good

music is forever barred from the uplifting qualities to be derived only from the great musical compositions.

"Education is too cold, and it would be materially improved by the addition of musical studies in connection with other college courses. The musicians of to-day should throw their body and soul into the work of civilizing the people of America."

WRITING AN ADVERTISEMENT.

What It Really Means to Turn Out First Class Advertising Copy Explained by Arthur Brisbane During Recent Address in Chicago.

When Arthur Brisbane, editor of the New York Journal, was in Chicago recently, he delivered an address at the Chicago Athletic Association to newspaper and advertising men, in which he said "to write advertisements is the most difficult thing in all the business of writing." In connection therewith he related the following experience he had with Thomas A. Edison:

"It is not very difficult to write editorials that are successful. All you have to do is to tell the people about themselves, about how they feel. If I should say to you that you have very interesting noses, you would feel your noses and look in the glass and read my editorial, because it is your nose. See? If I try to interest you in some money-making scheme or some merchandise scheme it is difficult.

"I tell employers—(I know a good many of the biggest advertisers—in fact, I have written a few advertisements myself, occasionally write one for some personal friend)—and I will tell you now it is the hardest possible work, and it is so hard that it reminds me of an experience that I had with a friend of mine, Thomas A. Edison. He decided to give up advertising the phonograph and to let it sell along in just its regular way. I told him he should go along and push it. I told him what I thought ought to be done to push this particular thing, which I consider one of the greatest benefactors in his particular line. I told him how. He sent the president of his company to see me and this man said, 'If you will write those advertisements we will take five pages and put them in the Evening Journal.'

"Now, I like to do what I can for the business department. I am perfectly aware the business department pays my salary; Hearst doesn't pay it; the men in the business office, the advertisers, the successful merchants, they have to pay it. I said, 'All right, I will do that, but it is a lot of trouble, and if you print those five pages in the Evening Journal it will cost you \$1,000 a page, which is our rate to print them, and I will charge you \$1,000 a page to write them, which is reasonable enough as a sample.'

"Now, I have in my desk a contract from the Edison Phonograph Co., which was signed nearly two years ago, and I have not yet written the five pages. Every time I think of it it gives me the shivers—to think of turning out really five pages of advertising copy. I rather think now I shall never write them. I am perfectly certain how it ought to be done, but to do it is very difficult. I could write you an editorial on the subject, I could interest you in Edison's personality, but when it comes down to accomplish the task that you men have to accomplish, when you have got to prepare a statement in plain English, which is more easy to write than to read, when you have to do that and make a man interested after he has finished reading, that is a very hard proposition."

Advice is free, the expense often comes with following it.

AMBEROLA CONCERTS IN COUNTRY.

The Churches and Town Halls of Suburban Villages Offer a Great Field for the "Talker" Man—Opportunities Worth Considering.

Did you ever give an Amberola concert in a country church, Mr. Dealer? No? Well, take it from me, you should delay no longer—there's money in it for you.

The average ruralite has never heard a cabinet talking machine, and never seen one except in the half-tone cut accompanying the advertisement in *The Ladies' Companion*, the magazine his wife earned by buying \$10 worth of toilet soap, or in the Spruce Creek Centers Corner, his own town weekly. Therefore, when he reads the flaring poster down to the post-office and finds out that there is to be an Amberola concert at the Methodist Church Saturday night, you bet he'll be there "with bells on."

Of course, he's heard singin'. By Gosh! Yes, indeedee! They got a mixed tri-o choir at Spruce Creek Centers. The blacksmith, he sings basso, and you kin tell his profession by his voice. The village seamstress, she hollers soprano, and, say, honest now, you just oughter hear her. Why, when she's in form and ain't been talking gossip too hard the week before, she kin drown the whistle down to Johnson's foundry. An the other one; he's a counter-tenor; got his title because he tends counter over at Smith's dry-goods emporium, I reckon, but Mr. Ruralite don't like to dwell on that tri-o too long; he allows its kind of wearin'.

Well, when he and the wife and little Ruralites get to church Saturday evening everything is prettily decorated in honor of the auspicious occasion, and right in front of the pulpit, occupying the place of honor, stands a beautiful mahogany cabinet.

"Where's the horn?" wails Jackie, the youngest Ruralite sadly. "It ain't a really real talkin' 'chine, ma, fer it ain't got nary a horn."

Before his fond mother finishes soothing him into silence with a sharp crack of material knuckles upon the youthful cranium, the resonant tones of a great organ swell throughout the little building in solemn grandeur. Not the piping shriek of the cheap cabinet organ that has assaulted the ear drums of Mr. Ruralite for thirty years, but the full deep throated voice of a mighty monarch of melody, such as thrills the vaulted arches of the city cathedrals, and he and his family are entranced.

But still greater things are in store for them,

for as the last sweet lingering chord of the introduction dies away, four perfectly trained and wonderfully rich voices, those of a high-salaried metropolitan choir, begin the opening words of the grand old hymn, "I Will Sing of My Redeemer." When they have finished there is not a dry eye in the whole church, even the minister, bless his heart, is moved to tears, and by the time the concert is over the audience is beside itself and full to the brim with amazement. They cannot seem to realize how from that beautiful mahogany cabinet before them such celestial harmonies can come without other and more human means than a small black cylinder.

Now, Mr. Dealer, is the psychological moment.

Keep the people together until you've had your little say and distributed a goodly piece of literature.

Explain to them clearly and concisely how very easy it is to own that incomparable instrument, the Amberola, and that an initial payment of \$10 will send it into their homes to lighten their hearts and prolong their lives with its endless store of everything melodious. Explain to them also that a monthly payment of \$1 until paid for will keep it there.

This scheme for selling cabinet machines is working out very successfully right now in towns near the home of the writer, Harry Holt, a Mount Holly (N. J.) dealer being wonderfully active along the lines above mentioned, his machine being the Victrola, so, Mr. Dealer, it is for you to interest your town in church and

town hall concerts, and reap the rich harvest that lies ripe and golden awaiting the sweep of your keen-edged sickle.

HOWARD TAYLOR MIDDLETON.

TELLS STORY OF MASSACRE.

Abbie Gardner-Sharp, Who Survived the Last Indian Raid and Massacre at Spirit Lake, Now Tells Visitors the Story Through a Talking Machine.

(Special to The Talking Machine World.)

Des Moines, Ia., Aug. 1, 1910.

All the way from being kidnapped by the Indians and carried away to be ransomed by a State to having the story of her life canned and doled out through a phonograph for the delectation of visitors to her log cabin—this is the span covered by the life of Abbie Gardner-Sharp.

Mrs. Sharp owns the cabin which was the scene of the last Indian raid and massacre in Iowa, at Spirit Lake. She has found her failing strength unequal to the task of repeating for the benefit of the hundreds of visitors at the cabin the story of hardships and terrors of the pioneers. She has therefore put her story upon phonographic records and while she takes her ease the machines recite Iowa history.

"I would not be able to tell to all who come the story of the Spirit Lake massacre," she said while sitting in the office of Secretary John C. Simpson, of the State Board of Agriculture. "The phonograph record has become a necessity, and visitors to the cabin are entertained by the story whether I am there or not."

Mrs. Sharp is here to supervise the printing of the sixth edition of her book. She also came to consult in regard to the historic pageant that will be put on at the State fair with the Spirit Lake incident as the central idea. She is in excellent health. She bought the old log cabin and the ground surrounding from the proceeds of her book and is able to live comfortably now.

GOOD ADVERTISING.

Proper Stock the Basis—Various Successful Methods of Approaching the Prospect.

The ground work of advertising is a well-selected, clean, properly arranged stock of goods, such as will supply the wants of the purchaser.

One legitimate method of advertising is by addressing the customer direct by letter, catalog, or in the form of a circular; the other method is through newspaper advertising, with or without illustrations, and changed at frequent intervals.

Billboards, frames for cards in hotels, and public places, are only valuable to the man who has arrived at a point where he is a recognized leader. The average dealer gets little or nothing from such forms of advertising.

THE OPTIMIST.

A happy chap with a clear, bright eye, and a face that's a joy to see;

A slap on the back and the merry crack of a bit of repartee;

He's never a word that will hurt a soul, and he does the best he can,

As he's going along on his own bright way, at helping the other man.

He laughs and sings through the livelong day; at night he sleeps like a top;

And he sows his seed with the certainty of reaping a bumper crop.

O the Optimist is the salt of the earth, though he leap to mad extremes;

Let us clink and drink to the Optimist! Long life and pleasant dreams!—St. Paul Dispatch.

The ability to sell something just as good when you are out of a certain line of goods may be valuable, but it will never be as valuable as the ability to keep the stock up.

DISTRIBUTERS OF EDISON AND VICTOR MACHINES, RECORDS, SUPPLIES

Our advertising is money to you

Dealers who don't take advantage of our extensive magazine, newspaper and farm paper advertising to get more business, make us lose much of the effect of our advertising and at the same time they lose many dollars that ought to go into their pockets.

Our advertising appears regularly all the year around and reaches millions of people in every part of the country, and it is worth the effort on your part to get hold of this trade in your locality and develop the interest we have stirred up.

Local newspaper advertising, circulars, window displays and similar methods will do it. Tell the people you have the Victor they see advertised and invite them into your store to hear it.

That's a whole lot better than just supplying the natural demand and it pays right from the start.

AROUND MILWAUKEE TRADE.

Talking Machine Trade, Both Wholesale and Retail, Rather Quiet and Collections Reported Poor—Preparing for Heavy Fall Business—New Idea Cabinet Co., Change Plans for Factory—Improvements in Columbia Store—Want Next Jobbers' Convention—Firm of Eicholz & Schefft Dissolved—Some Recent Visitors—Summary of News.

(Special to The Talking Machine World.)
Milwaukee, Wis., Aug. 8, 1910.

There is no denying the fact that the talking machine business is quiet in both retail and wholesale lines. Dealers say that trade is no more quiet than it usually is during the hot summer season, however, and that business compares favorably with that in other lines. One of the unsatisfactory features of the situation is the fact that collections are more than usually poor. This is to be expected, taking into consideration the low ebb of trade.

Both wholesalers and retailers are preparing for an especially heavy fall trade and the general feeling is that there will be no disappointment. This will depend largely, however, upon the condition of the crops which are to be harvested this year. Last year Wisconsin harvested one of the bumper crops for which the State is noted, but this year the outlook is not so bright. The entire State has been experiencing a genuine drought for several weeks, broken only by scattering and light rains. Wholesalers are hoping for the best and say that if the harvest is at all satisfactory money will be plentiful and retailers will feel confident to come into the market for new stocks.

The brightest feature of the Milwaukee retail trade during the past month has been the demand from summer resorters, but this trade has now fallen off to almost nothing.

The New Idea Cabinet Co., incorporated at Milwaukee some time ago to carry on the manufacture of the "New Idea" disc cabinet, invented by William Schmidt, have made a radical change in their plans for a factory. Instead of locating at Wauwatosa, a Milwaukee suburb, the company have opened quarters on the fourth floor of the McGreal building and will carry on manufacturing operations here until the business demands larger space, when a new plant will be erected at Wauwatosa, where an excellent site has been secured. The company are now installing new machinery in their quarters in the McGreal building and expect to have the plant in full operation by August 10.

"Inquiries have been pouring in upon us from jobbers and retailers concerning the 'New Idea' cabinet," said Lawrence McGreal, one of the incorporators of the New Idea Co. "We are sure that the cabinet will be a winner. The capacity of our plant here will range from 20 to 30 cabinets daily. We expect to begin shipping to the trade within a short time after we begin operations."

F. A. Schuber, mayor of Livingston, Mont.,

and Columbia distributor for Montana, Wyoming and the western portion of North and South Dakota, was in Milwaukee on business a short time ago. Mr. Schuber and his daughter, Miss Mary, visited at the home of his sister, Mrs. A. G. Kunde, wife of A. G. Kunde, owner of the downtown Columbia store. Mr. Schuber reported that the Columbia is meeting with an excellent business in his territory.

In preparation for a big fall business, A. G. Kunde, Columbia dealer at 516 Grand avenue, has installed three new demonstrating rooms and made various other improvements. Plans have been completed for the erection of a handsome new front at the store.

The new Mignon machines have made their appearance at the downtown store of the Columbia and are creating genuine interest in the trade. Indications are that the demand will more than equal the supply.

The McGreal party returned to Milwaukee from the convention of the National Association of Talking Machine Jobbers at Atlantic City, confident that the gathering was one of the most profitable and enjoyable of any held in the history of the organization. Mr. and Mrs. McGreal and Mrs. McGreal's sister, Miss Gertrude Gannon, spent ten days at Mr. McGreal's former home at Rochester, N. Y., after the close of the convention. Miss Gannon also made an extended trip through the East and returned some time after the other members of the party.

George D. Ornstein, sales manager of the Victor Talking Machine Co., has been spending some time in Milwaukee as the guest of his sisters.

Lawrence McGreal is confident that Milwaukee will be decided upon as the location of the next convention of the National Association of Talking Machine Jobbers. While at Atlantic City Mr. McGreal spent all his spare time in convincing the delegates that Milwaukee has more than ordinary advantages as a convention city and that the association would make no mistake in coming here in 1911.

The firm of Eicholz & Schefft, formed about a year ago by George Eicholz and Charles H. Schefft, a member of the piano firm of Ross, Schefft & Weinman, has been dissolved. It is understood that Mr. Eicholz has sold his interest in the business to Mr. Schefft and that the store at 839 Third street will be managed in the future by Mr. Schefft's son, Oscar Schefft, who has been in charge ever since the business was started.

Some good sales in the Edison business phonograph are reported by J. H. Becker, Jr., manager of the talking machine department of the Hoefler Mfg. Co. Mr. Becker believes that all indications point to a brisk fall business in the general talking machine line.

Several out-of-town Wisconsin talking machine dealers were in Milwaukee the past month on both business and pleasure. While all admitted that present business is dull, the general opinion seemed to be that the coming fall business will be entirely satisfactory.

USING "TALKERS" IN PARKS.

Machines Used to a Large Extent in Great Britain to Replace or Supplement Bands in Public Parks—Success of the Auxetophone Concerts in the Parks of Belfast, Ireland—Press Comments Upon the Quality of the Reproduction.

In England and Ireland they are using the talking machine to a much larger extent in public parks and other resorts than they are in this country. In many of the leading cities band concerts in the parks are interspersed with talking machine concerts throughout the summer, which afford great pleasure to those in attendance, and in this way demonstrate to a large constituency the possibilities of the talking machine.

In Ireland Auxetophone (or Auxeto-gramophone as it is called in Europe) concerts are being given in the Botanic Gardens Park, Belfast, under the auspices of the Borough Council. The programs usually consist of forty-eight numbers, and those which The World was privileged to look over were admirably arranged. Speaking of the opening concert in Belfast one of the local papers said:

"The possibilities of the Auxeto-gramophone—one of the newest and best forms of music machines—are never adequately demonstrated inside a hall. When it is employed in the open air one can better appreciate the volume of tone and general effectiveness with which it reproduces band pieces especially, while the vocal records are brought out with a good deal more clearness and finish, the whirr of the machinery which is generally audible in an enclosed space, not asserting itself to the same extent. It was an excellent idea to arrange open-air concerts in the city parks, employing the Auxeto-gramophone solely, and the success of the Parks Committee's scheme was sufficiently indicated by the large gatherings at both performances in the Botanic Gardens yesterday afternoon. The weather was glorious both in the afternoon and evening, and the charm of the surroundings gave an added zest to the enjoyment of the varied programme, which was gone through under the direction of Thomas Edens Osborne. It was a real pleasure to saunter about the prettiest corner of the park, where the instrument was mounted, and hear the tones of Tetrassini, Caruso and McCormack, or the rich strains of the magnificent Coldstream Guards' band reproduced with fidelity and remarkable fulness of tone. A liberal program was submitted at each performance, and, in addition to records of operatic items, there were lighter selections, including songs by Harry Lauder, George Grossmith, Jr., and other well-known artists. Altogether it was a highly enjoyable performance, and was rewarded with a full measure of public appreciation."

Every good salesman knows that discretion of speech is more than eloquence. And an agreeable manner helps the sale ever so much.

THE REALM OF THE TRADE PAPER.

Wesley A. Stanger, a Chicago Editor, Gives Interesting Talk Before the Business Science Club of That City Upon "The Relation of the Trade Paper to the Trade"—Offers Some Valuable Information That Is Worth Reading by All Those Concerned in Trade Betterment—How the Trade Paper Aids Business Interests in All Industries.

Wesley A. Stanger, editor of the Office Outfitter, Chicago, gave a talk recently before the Business Science Club on the "Relation of the Trade Paper to the Trade." It is so excellent that we believe our readers will be interested in reading it. Mr. Stanger said in part:

"To-day in the realms of magazine publishing the modern trade paper holds first place. There was a time when the magazine of general circulation was a more potent factor in the upbuilding of business and influencing thought. True enough, the modern newspaper sways the opinions of the masses, but magazines have always had their field and have affected the thinking public more than almost all other influences.

"The trade paper has a field of its own. It is the medium between the manufacturer and jobber and the retailer. It is the powerful force that creates the demand with the retailers. It is kept out of the hands of consumers and has a restricted circulation all of its own, and it gets closer to the people who read it than any other class of publication. The trade paper is the paper that the retailer reads as the devotee reads his Bible. To the retailer it is the only means he has of getting an unbiased view of what is going on in his field. Thousands of circulars and elegantly printed advertising matter circulated by a house among its retailers have a certain effect, but the mere fact that they proceed from the jobber or manufacturer has a tendency to belittle their influence and importance. The retailer looks to his trade paper to learn the facts and secure the real reliable information with reference to lines of merchandise, market conditions and all other divisions of his business.

"The trade paper editor has a heavy burden on his shoulders and a responsibility that means much. He must be fair, just, reasonable, broad-minded and strictly honest with his readers. He is interested in the man who subscribes to his paper, and when he gains his confidence he has an asset that is worth many dollars to him."

Mr. Stanger stated that in number, class and quality of trade papers the United States lead all other countries. Germany is a close second and patterns after American ideas to a very large extent. In the United States alone there are upward of 612 trade papers, and among those cited by Mr. Stanger as a model among others was The Talking Machine World, going to show that every trade and profession is represented.

"The trade paper is the medium that introduces the new things to the retailer who serves the interests of the consumer, and in this way is the greatest commercial force known," said Mr. Stanger. "An order from one retailer is worth many orders from individual consumers. The dealer buys in quantities and sells single pieces. Thus while advertising through a trade paper does not produce numerically as many returns as general advertising, each individual order represents a quantity and steady buying, whereas the average consumer ordering goods through a magazine advertisement orders once and never again. Every retailer represents on an average 300 consumers, so it will be easily seen that business secured through a trade paper is the most profitable, most extensive and most to be desired of any.

"Many men in many businesses subscribe to many trade publications. It is a matter of thankful comment that most of them pay in real money for what they get, and better than this, they invariably read what their trade papers have to say. This is more than can be claimed and proven for any other class of publication. When you get your trade paper do not throw it aside. It is worthy of better treatment. Treat it with con-

sideration and as though it were worthy of your respect, whether it has it or not. Remember that no matter what line you are in you owe a great deal to your trade paper—more than you will ever repay—and treat it accordingly. Keep your subscription paid up and treat it with the same consideration you would give a customer, and do not forget that it has done a great deal more for you than you will ever do for it. It has stood by you when you needed it; when you said unkind things about it and had thrown it in the waste basket; it has even stood by you when you had permitted your subscription to lapse. If readers but knew the work, expense, time and effort that it costs to produce even the smallest trade paper in existence they would marvel. If they knew of the trials and sacrifices of the publishers in serving their interests they would look at the trade paper from a different angle. If they would realize what trade papers have done for them there would not be a single delinquent subscriber on the books of any trade paper in the country, and every man in every line of business would subscribe to and read every paper printed that catered to his interests. The trade paper of to-day is the greatest friend the modern business man has, be he manufacturer, jobber or retailer.

"There is one more thing to this trade paper business. The trade paper is the best 'booster' that the salesman of to-day possesses. No matter whether a man is on the street, on the road or behind the counter, the trade paper is working for him day and night. It is inspirational and is a medium of expression for his views and for the interchange of ideas. It helps the road man, because it introduces his goods to the prospective buyer before the salesman gets to him. In this way it lessens his task and prepares the way. It keeps the retailer posted and abreast of the times, so that the salesman has less trouble in finding the middle ground on which to meet him. It 'boosts' the men who do things and helps them both with their employers and their customers. It is the great force that puts the new ideas, the new things, the new thoughts before

the retailer, jobber and manufacturer in condensed and crystallized form, and which has built up this great fraternity of men engaged in manufacturing, jobbing, selling and retailing. It is the cement that holds the business structure together and every man in business should be a booster for the trade papers in his line. A salesman cannot go into a retailer's place of business anywhere without finding some trade paper; every jobber, manufacturer and salesman should take advantage of this great asset and use it for all it is worth. The trade paper of to-day is the greatest force in the entire commercial world."

DON'TS FOR WINDOWS.

Don't wait until Saturday to wash your windows.

Don't let your window displays get dusty and stale.

Don't forget that dirty windows shut out trade as well as light.

Don't put in freak displays that have no connection with your business.

Don't neglect to have neat, attractive show cards.

Don't fear people will think you haven't the stock just because it is not all in the window.

Don't have one of your clerks in front of your store washing windows or sweeping the walk after business has started.

Don't show many different kinds of goods at once.

Don't spoil your window display by hanging up show bills or other advertising not concerned with your business.

Don't fail to "hook up" your window displays with your advertising. They should pull together.

Some frivolous person has remarked that illness was like a struggle between two people, and that the doctor resembled the third man, who intervened to separate them with a club. Sometimes he hit the disease on the head, and sometimes the patient.

Won't You Have a Lesson in Spanish?

It's so easy to learn by the I. C. S. system—and a knowledge of Spanish is so useful nowadays.

The I. C. S. system of language instruction by means of the phonograph makes easy the mastering of a foreign language, and appeals with compelling power to thousands. The dealer in phonographs who does not carry I. C. S. Language Outfits is neglecting a quick and sure way to increase his business. The new \$35 Language Outfit of the I. C. S. is a marvel. It represents the highest art in the teaching of languages, and embodies a method that has won the warmest praise of thousands qualified to speak authoritatively. The Spanish, French, and German Embassies at Washington, as well as the leading colleges, have cordially indorsed the I. C. S. method of teaching languages.

The I. C. S. Language Outfit consists of an Edison Gem Phonograph made especially for language work; small horn; headband hearing tube; oil can; and 25 Conversational Records teaching pronunciation guaranteed to be absolutely correct, with native intonation and inflection. In addition to these Conversational Records there are pamphlet Instruction Papers teaching the theory of the languages. The new Outfit is at one and the same time the best and cheapest ever offered—the price being only \$35.

If you want to increase your business, write to-day for full particulars.

International Correspondence Schools

Box 918, Scranton, Pa

If you are not working the home-recording feature of the Edison Phonograph, you are only half playing the game.

THIS is one of the biggest selling features of the Edison—so big, in fact, that if there were nothing else to shout about, this one feature would make the Edison the greatest instrument of them all.

There is a good margin of profit in blank records and the crowd that once gets the habit of making records at home buys more records than all the rest together.

Besides, there's a good profit for you in shaving blank records.

Are you stocked up to take advantage of this home-recording end of the business?

Don't let these profits get by—play the game.

Write your jobber now.

National Phonograph Co., 59 Lakeside Ave., Orange, N. J.

If there isn't an Amberol Attachment on every Edison Phonograph that has ever been sold in your vicinity you're throwing good money to the birds.

THERE'S good money in it for you, equipping machines already sold, with the Amberol Attachment.

Everybody knows about Amberol Records—and everybody wants to be able to play them. There's a big additional profit for you in Amberol Records—and the demand for them is much greater than for other records, because they play more than twice as long and give more than double the enjoyment.

Everybody wants the instrument that plays both Edison Standard and Amberol Records—the Edison.

Every Edison made to-day is equipped to play both Standard and Amberol Records. Every Edison ever sold should be so equipped.

Get your stock in shape to take care of this important end of the business. Write your jobber to-day.

NEW YORK, AUGUST 15, 1910.

TRADE in the talking machine industry has been rather quiet during the past month, but reports from some localities indicate fair activity in the sales department.

It is certain that the dealers who have adopted progressive methods in their business affairs have profited correspondingly.

It is the day when business in all lines must be conducted according to up-to-date rules, else good opportunities will be lost.

We know of concerns whose record is not up to that of a year ago, and the fault lies wholly in the lack of individual effort rather than poor business conditions.

Effort is necessary to win success in all lines, and there is no use of anyone holding back.

There are plenty of business problems confronting us all the time, and the man who puts up the plea that he does business a certain way and sees no reason why he should modify or change his plans is usually the one who is slipping backward all the time.

He keeps on going for a while and usually insists that he is doing a fair business.

He knows in his heart, however, that something is wrong, but he still adheres to old-fashioned methods in the conduct of his business and will not take up new and progressive ideas.

IF we cannot make up our minds to do things as the interests of to-day demand, and shape our methods according to the particular requirements of the present, we will sooner or later find that we are being left in the race for business.

The man who goes to bed with a clear conscience considers that he has fixed his business properly for the problems which he has contended with during the day, but he

wakes up the next morning with some new series or sets of troubles confronting him that demand other treatment.

Ignoring or passing them over will not rid his business of the annoyances, and because he did not have them to contend with a few years ago, he fools himself in an expensive way if he attempts to let them go unnoticed and therefore unconquered.

It does not make any difference how we did business some other day.

Certain methods may have been all right twenty years ago, but they may not fit harmoniously into our present system.

The man who is up-to-date is constantly changing his methods to conform with the changing times, and to claim that the old methods are all right now is just as reasonable as to claim that the talking machine of years ago was good enough for to-day.

The inventive mind realized that it was not, and there has been no halting in the development of the talking machine.

It is moving on steadily, ever advancing, and the business methods of the men who display special products at retail should conform with the progressiveness evidenced in the development of the specialized product in which they are directly interested.

THE leading magazines in the summer contain the advertisements of the great talking machine companies, and it is this persistent advertising in season and out which has caused the product to be in demand.

We have taken occasion to carry on our investigations referred to in last month's World in a most exhaustive manner, and we have found that in the larger cities during the summer there has been a greater demand for the high-priced talking machines than for musical products of any other nature.

Now, this should be encouraging to the dealers generally to go ahead and push their product with zeal.

There is plenty of good, undeveloped territory closely adjacent to every talking machine establishment in this country.

All it needs is systematic working.

A DEALER has asked us to say something about advertising. We should say, every advertisement should be written so that the writer always has in mind holding the confidence of the public.

To create confidence is just as much the function of advertising as to sell goods.

Now, the greater the public confidence in the merchandise offered, the more business will come to the dealer.

Statements made in advertisements, while not lacking in force, should, nevertheless, be conservative to the extent of being readily backed up by the advertisers.

To create the impression that you are giving something for nothing makes the readers wonder whether you are a very poor business man or a plain, every-day liar and in either case they are not over-anxious to trust you.

It is steady hammering that makes an impression in advertising.

If the first advertisement does not bring expected results keep at it and force the public to read about what you have to offer.

THOUSANDS of successful money-making concerns owe their advance entirely to intelligent, persistent advertising, but there is yet to be heard of one who won success from a single advertisement.

A single drop of water falling on a stone spatters off and leaves no impression, but constant dripping on the same stone will eventually wear a hole in the solid granite.

Then, again, in advertising, talk something besides prices.

Explain the wonderful powers of talking machines. Show them up in an interesting way.

In the talking machine business the price question should be cut out.

People always looking for bargains that can only be secured by means of sales will not form a permanent foundation for any business.

When exploiting the excellent quality of your product emphasize some of its interesting features—some of its entertaining possibilities, and many people who do not know the marvelous powers of the talking machine may have their interest aroused to the extent of visiting your warerooms.

DEALERS are not concentrating attention as they should in an effort to have talking machines, particularly the larger instruments, used in the public parks and other resorts in their towns or cities.

This is the best kind of advertising for the talking machine business.

The use of high class records and high class machines does more to educate the "doubting Thomases" than any other possible means that we can conceive of.

If people are compelled to hear them in the public parks they cannot fail to admit that the talking machine of to-day is an instrument that compels consideration and the highest praise and admiration.

In Great Britain the talking machine is being used in public parks with splendid results.

It takes the place of the regular band concerts on certain nights of the week.

Why not make an effort to inaugurate some such plan of publicity in your locality?

THE export trade in talking machines and supplies continues to be of the most gratifying nature.

In another part of this issue will be found the figures for the month of June and the preceding eleven months

The total exports for 1910 amounted to \$3,841,511, as compared with \$2,852,429 for the same period in 1909.

This demonstrates in a very pleasing manner that American products in the domain of talking machines and accessories are liked abroad.

As a matter of fact the exports of talking machines for the past twelve months were three times as great as the exports of pianos, player-pianos, organs and musical merchandise of all kinds.

This is most significant.

It tells in a convincing way that this is no petty industry of which we are a part.

CLEVELAND'S BUDGET OF NEWS.

Little Change in Trade Conditions During Month—Record Buyers Plentiful—Prominent Attorney a Talking Machine Enthusiast—His Views—G. J. Probeck's "Acorn"—U. S. Phonographs Making Good—Numerous Orders Received—Columbia Goods in Demand—Recent Visitors—Other Interesting Trade News of the Month.

(Special to The Talking Machine World.)

Cleveland, O., Aug. 9, 1910.

Conditions prevailing in the talking machine business during the past month were on the whole similar to those that prevailed the previous month, and business is hardly what one would describe as satisfactory. However, many of the dealers are averaging a normal midsummer volume of trade, running more to the higher-priced machines and records, and all are actively pushing business.

The lower-priced machines and records usually purchased by workmen are being more frequently called for, and record buyers who have not been in the market for many months are beginning to come back—indications that prosperity has at last reached this class of our fellow-citizens.

H. E. McMillin is spending the summer at his summer home, Topinbec, Mich. He believes, with President Taft, that a man is entitled to two months' vacation.

Berkeley Pearce, a prominent Cleveland attorney, and who was a councilman-at-large during the administration of Mayor Tom L. Johnson, and one of his warmest supporters, is a talking machine enthusiast. He has a Victrola, a Victor V, and four hundred-odd grand opera records, selected from the American and Italian Black Label and Red Seal lists.

"Grand opera records," said Mr. Pearce, "have many advantages over attending the opera. The comfort, convenience and pleasure of calling upon your favorite performers at will to render their best efforts is the boon supplied by this most marvelous of inventions, and there is no danger of a surfeit to those who confine their attention to the best grade of selections.

"It is questionable if some of the mechanical defects will ever be entirely eliminated, but there will continue to be improvement. In tone alone such advancement has been made within the last year that quality practically true to life has been attained. But we may hope for smoother records and more quiet and even-running motors. One striking fact is that reproduced music requires the highest standard of performance. Any flaws in the work of the artist show so plainly that the result is only the best work of the artist is worthy of reproduction. The record, therefore, does better than the artist who made it can do at the average performance. And the auditor can enjoy a better balance of voice and orchestra than is afforded from the seats of the theater. The talking machine is proving of great advantage to the world of music in awakening popular interest and raising the standard of popular appreciation. I often am amused by those who assert they do not enjoy singing in Italian, because they do not understand the words, yet these objectors seem perfectly happy when they hear the same selection played by a band! A wider acquaintance with good music places mere words further in the background. Performances in grand opera supply action as well as words, and after the music, action is the more important. In it lies the greater interest and appeal. The fact is that few public singers enunciate so clearly that their English can be understood, so those who want words should be prepared not to expect them from the average singer. That words are of minor importance is further shown by the fact that large choruses rarely make known the words they are using, and in such numbers as the "Rigoletto" quartet, where all the singers are uttering entirely different words at one and the same time, of course it is impossible to distinguish them. It simply is

not expected. Conservatism among teachers has retarded the use of the talking machine as an aid, but it can be employed to great advantage in musical education and there will be a great increase in its use in that direction."

The World representative came upon a talking machine one day bearing this label: "The Graphophone. Cleveland Graphophone Co., 227-229 Sheriff street, Cleveland, O." As the fact that a talking machine manufacturing company had ever existed in this city was a revelation to him, he started a historical inquiry. After numerous inquiries he found a person who knew all about it. "The Cleveland Graphophone Co.," said G. J. Probeck, "was started some thirteen years ago by L. C. Goldbach and I. We originally started at 227 Sheriff street, opposite the old market house, in a butcher shop supply house. There were bolognas on one side of the store and talking machines on the other. On account of the lack of space we kept all our records in display coolers belonging to the supply house, which gave customers the idea that records had to be kept in cold storage. They thought every record was a hot one.

"We didn't manufacture machines. The inscription you mention as having seen on a machine was our label put on a graphophone. In the basement, however, we had a piano and other instruments, and made all kinds of master records while customers stood around waiting for them to be taken out of the fire. Things were crude in those days, but we did a very nice, profitable business there, and soon moved to more commodious quarters at 19 Euclid avenue. Shortly after the partnership was dissolved and I continued the business successfully until 1903, when the Columbia Co. bought me out and established a store at 1955 Erie street, where it remained under my management until 1907, and was then moved to the present quarters, 420 Prospect avenue. In November of the same year the business was again transferred to the G. J. Probeck Co. Thus, you see, from a little acorn a great oak has grown."

H. N. McMenimen, the general sales manager of Sheip & Vandegrift, manufacturers of the Music Master wood horns, was looking orders in the city August 8.

The U-S Phonograph Co. report that their new line of phonographs and Everlasting records are making good with the trade, fully in accordance with their expectations. During the past month the company have sent many U-S machines to dealers on trial, together with a list of sample records, and the expressions of

opinion on the part of those who have received them are extremely gratifying. The U-S people adopt this trial method of introducing their goods because, they say, their faith is strong that the goods will bear the test of comparison, and the dealer who actually sees and hears the U-S machine play will know what he is getting. He can test it out to his own satisfaction, both on Everlasting and on wax records. Thus he runs no risk, for if he does not care to handle the U-S line he may return the company's outfit at their expense. He is given the option of retaining the outfit sent him, however, at the regular discount. The management state that trial orders have been received from all parts of the country, ranging from New England to California, and from Canada to the Gulf States. It is understood that plans are made for an extensive advertising campaign to phonograph users and prospective users, and the directors of the company assert that everything possible will be done to give their product its due prominence in the field.

"There is a steadily increasing demand for double-disc and Columbia two and four-minute Indestructible records," said A. W. Robertson, of the G. J. Probeck Co. "The summer season is bringing its usual demand for the lighter selections, and dance music is being called for a great deal. The graphophone, with its increasing possibilities of out-of-doors usefulness, is responsible for this. The general public is fast realizing that the graphophone is no longer an exclusive indoor form of entertainment. Grafonola prospects are springing up constantly and many kind things are being said about the new type Columbia 'Mignon.' Naturally the higher-priced machines do not move as rapidly as the popular priced, but judging from the number of inquiries we have had within the last month or so there will be a brisk movement this fall."

Mr. Towell, of the Eclipse Musical Co., says that considering the season of the year and the warm weather conditions, trade is fairly good. "Machines are moving slowly," he said, "but the record trade is very good. On the whole business is satisfactory, and I anticipate a bumper fall trade."

In talking machines, W. H. Buescher & Sons say that their sales in July were mostly Victrolas, with the usual complement of high-class records. Call for the cheaper grade machines was said to be light and the record trade very good.

(Continued on page 14.)

Purchase Quality Needles

BURCHARD needles naturally cost more than needles of an inferior quality, but they have advantages which will be plain to all.

They move noiselessly over the disc and each needle can be used at least six times.

You can get more out of BURCHARD needles than any other on the market.

Send for a sample order of these needles and you will use no others.

MANUFACTURED IN THREE STYLES

No. 1. For Soft Playing

No. 2. For Loud Playing

No. 3. For Strong Tone Music

"Your Phonograph and Records have reached the Standard of Perfection"—that's what a large dealer in Michigan says. Read other extracts of what the trade in various sections of the country write us—they confirm all our claims and predictions made to you in previous announcements.

Notwithstanding the firm hold others have for years had upon the trade, we have already convinced an astonishingly large number **BY PROOF** that our Phonographs and Records are the best in every respect and are already receiving the recognition they deserve.

For fear you may not have read fully our previous announcements we briefly enumerate the exclusive features and principles which place the superiority of the U. S. line beyond all question. The Master Points of argument are *Convenience of Operation—Quality of Tone Production—Indestructibility of Records.*

Convenience of Operation—Our Phonographs are all equipped with an Automatic Change Reproducer Carriage, automatically and instantly adjusting the machine to either a two or four minute record by simply a twist of a shift key. No other phonograph has this improvement. The Motor is of an entirely new type—simple, long running, of unusual power, and offering the closest approach to absolute noiselessness yet reached in phonograph construction.

Quality of Tone Production—The mandrel is fitted with a pulley balance wheel—*positively the only means of insuring a reproduction true to pitch.* The diaphragm is much larger than in ordinary phonographs and is made of an unusually sensitive material, giving it marked superiority in bringing out fine music detail. The Reproducer has a non-wearing sapphire point which is so carefully fitted to the sound groove of the record as to do away with that harsh, scraping, rasping sound.

MICHIGAN

"The records are an impossible brilliancy and superior to anything heard, and as wax records their merits."

VIRGINIA

"There is a this territory"

NEW YORK

"Received you and am very can count on the records effort at all"

INDIANA

"I believe the sale and beat"

IOWA

"It appears to situation."

MICHIGAN

"You have got me; your phonograph reached the standard"

PENNSYLVANIA

"I have constant"

MASSACHUSETTS

"Your phonograph any on the market"

NEBRASKA

"We are in record and have tested up to all the credit behalf. We have the greatest machine and in"

WEST VIRGINIA

"Records received pleased would They are far superior cylinder records have had expected the market."

ILLINOIS

"The construction the volume and superior to any records."

U-S Phonograph Co., C

Two and Four-Minute Records

Says About the U-S Everlasting Records

Indestructibility of Records—They are not made of wax—they are composed of a “can’t-wear-out” surface mounted on a “can’t-be-broken” cylinder base, making a record that is absolutely everlasting—that’s why it is so named. U-S Records are positively proof against scratching, also against cracking by extreme heat or cold—against damage from careless handling or dropping and against injury by unlimited playing. And above all, U-S Records have that rich, brilliant, life-like tone never before attained in phonograph records.

The indestructibility emphasizes another advantage of U-S Records in that they may be sent by mail without fear of damage; this opens a large field for progressive dealers and also saves expense of breakage in transmission, which has always been quite heavy with other records.

A Rare Business Opportunity—In laying the U-S Phonograph and Record proposition before you we are not unmindful of the fact that it will take Money, Perseverance and Publicity to accomplish all we have set out to do. *We have an abundance of capital; we have unlimited perseverance; and we will soon inaugurate one of the most stupendous selling campaigns any firm has ever attempted.* We will win out. You better be with us. It isn’t our policy to surround you with any *unreasonable restrictions.* Our aim is to make the U-S line more profitable to you every year, for our profits depend upon your profits. Place competing goods *right beside ours,* then play the U-S in comparison—we will gladly abide by the result.

The U-S line of machines is complete enough to meet all needs and all purses. Every machine is the handiwork of the most skilled mechanics and cabinet makers in the business.

Write today for full particulars about our unusual special offer, prices, etc., which all spell **BIGGER PROFITS TO YOU.** Be the first in your territory—fill out attached coupon, detach and forward to us by next mail.

Columbia Indestructible Records not only meet but create a demand for both 2-minute and 4-minute cylinder records. It ought to take you about 2 minutes to realize that and 4 minutes to act on it.

Columbia Phonograph Co., Tribune Building, New York.

(Continued from page 11.)

The new twelve-story annex of the May Co. is nearing completion. When it is ready larger and more desirable quarters will be allotted the talking machine and piano departments. "Our July sales were good," said Mr. Tinker, "and were distinctly of Victrolas and high-grade machines. In records, Red Seals and Amberolas were the leaders, but sales of the cheaper grades were good. There is a fair demand for cabinets. August trade has opened up auspiciously and prospects are encouraging."

Business during July at the store of Charles I. Davis is said to have been exceptionally good, especially in the Amberola line. The Amberola attachment proposition is proving eminently successful, said Mr. Davis.

The Bailey Co. report that their talking machine and piano business for July was very satisfactory. "Trade is improving," said Mr. Friedlander, "especially in the higher-priced machines, which are selling well. The demand for Red Seal records is fine and the cheaper grades are selling well. Increasing inquiries indicate a good fall trade."

August business was reported to have started out briskly at McMillin's, with good sales of Victrolas and the higher-priced Edison machines. The record trade was also said to be excellent, especially the foreign lists. The house is doing a prosperous piano business.

R. L. Robbins, of Robbins & Co., says that the volume of their business for July was largely in excess of that for June, and that August promises still further improvement. He states that demand for both Victor and Edison machines and records, covering all grades and prices, is good.

A very simple, effective and cheap device is an Automatic Stop for disc talking machines, known as the Hays stop, which the Cleveland inventor is about to place on the market. He has spent over two years perfecting the device, and in the next issue of *The World* will offer it to the trade.

Collister & Sayle state that business in talking machines and records is quiet in both retail and wholesale departments. The Talking Machine Store reports a fair record trade, but slow sales of machines. John Reiling, of the West Side Columbia store, is doing well, daily increasing his list of patrons of foreign records.

WHERE PERSISTENCE WINS.

How One Dealer Made Big Sale Through Manufacturer's Persistent Follow-up System—An Interesting Story with a Moral.

Early last May we received an inquiry from a prospective customer living in an obscure corner of the great Mojave desert, eight miles from the nearest place of human habitation, in which he inquired the price of various types of Edison phonographs and records. Replying at once, we sent him a phonograph booklet and complete catalogs of Edison records, and referred him to the nearest Edison dealer for the consummation of the sale. At the same time we acquainted

the dealer with the facts of the case, requesting him to follow it up and advise us of result. A month passed and not hearing from the dealer, we again wrote and elicited the information that the sale had not been effected. The dealer had written once, and not receiving a reply, took it for granted that the prospective customer had given up the idea and therefore considered the incident closed, the Edison Phonograph Monthly relates.

Did we lose further interest in the matter? By no means; we never do that. We took up the subject again with the prospective customer, learned that he was still in a receptive mood, although obliged to temporarily postpone the contemplated purchase. At his request we referred him to another dealer, as he expressed an un-

is made, the public promptly loses interest in the dealer.

THE PHONOGRAPH IN AUSTRALIA.

P. W. Blake of Albany, N. S. W., Building Up a Good Business with the Edison Line Situated in a Growing and Prosperous Section.

(Special to *The Talking Machine World*.)

Albany, Australia, June 30, 1910.

One of the enterprising dealers in this thriving section of New South Wales is P. W. Blake, who is making a specialty of Edison phonographs and records and building up an excellent trade in these specialties. Albany, which is on the Murray River, has a population of about seven thou-

INTERIOR OF BLAKE'S STORE AT ALBANY, AUSTRALIA.

willingness to do business with dealer No. 1, whose stock of records, he said, would not offer the choice he desired, and he wished to make the purchase without further delay. We did so and shortly received the thanks of dealer No. 2 for an order of a Home phonograph and Edison records to the total value of \$80.20, with the assurance that "further inquiries of like nature would receive prompt and energetic attention."

That's the story; what's the moral? There are two. First is that persistence wins in the long run—all that is necessary is patience. Had we been as easily discouraged as the dealer—had we not put our "follow-up" system into operation, a nice sale and a good customer would have been lost. Had dealer No. 1 followed up his man as we did, instead of dismissing the subject after a single inquiry, he would have eventually won out—if he had kept up his stock, which he didn't. That's moral number two.

No dealer who allows his stock to dwindle can expect to do business successfully in these days of up-to-date methods. It doesn't take the public long to discover the fact that a dealer is losing interest in his business, and when the discovery

is made and is a large pastoral and agricultural district. Crops and prices have been good, with the result that people of this district are spending more money for luxuries of all kinds, and as a result Mr. Blake is selling many Edison machines, which are greatly in favor here. In fact, throughout this part of Australia the name of Edison is much esteemed and is as much spoken about as in New York. In addition to the talking machine line Mr. Blake controls a very large circulating library, so that this brings him in contact with the very best people.

Good salesmen realize that advice to the customer is a superfluity. Ninety-nine times out of a hundred people don't take it.

The dirty store makes no friends on account of its dirt. It even lowers itself in its owner's respect. None but the clean deserve the trade.

Statistics and experiments prove that weariness increases the liability to carelessness about 700 per cent. It is better to send tired employes home than to allow them to stand behind the counter.

(Special to The Talking Machine World.)

London, Eng., Aug. 6, 1910.

At this time of the year talking machine and record sales are seldom sufficiently strong to boast about, and although to-day things are not booming, it is particularly gratifying to follow the steady improvement in conditions of trade throughout the kingdom. The London factors and manufacturers tell me that despite the usual disturbance of business which generally follows in the train of extensive litigation, such as we have experienced of late, the substantial amount of business now being done and the amount of advance orders in hand for next season are beyond all expectations. Quite a note of prosperity seems to pervade many of the reports to hand. The stability of the labor markets and the healthy condition of our large industries are no doubt exercising a very beneficial effect on musical instrument sales. And in addition to this the forces of nature are lending a helpful hand, for contrary to the extreme heat prevailing on your side, we have experienced quite a chilly time this last month or so.

A subject of general agreement is the noticeable demand for instruments of good quality, and I do not think my statement will be questioned that the coming season's trade will be largely confined to this class of product. I believe the future progress of the industry must to a great extent be dependent upon the elimination of the cheap and unreliable instrument from the catalogs of certain continental manufacturers, who themselves are slowly but surely recognizing this fact.

Litigation Causes Confusion.

Although trade has been in nowise affected by the recent litigation, a certain amount of confusion seems to exist as to the exact position of affairs. It should be clearly understood that the Gramophone Co. do not accept Justice Parker's ruling that the word "gramophone" is a generic term, neither do they accept Justice Warrington's decision in regard to the invalidity of their tone-arm patent. Appeals have been lodged against both judgments, and pending the verdict of the Court of Appeal, it is my opinion that the matter should be treated as *sub judice*.

The Gramophone Trade-Mark Case.

It would be too lengthy to give the full judgment in the above action, but a short digest will be of interest to my readers. In the course of his remarks His Lordship observed that he was satisfied that while in the trade the word "Gramophone" denoted a machine manufactured by the Gramophone Co., to the general public it represented a disc record machine, as opposed to a phonograph, and did not connote the source of manufacture. What he had to decide was as to whether in these circumstances the word ought to be admitted to registration as a word adapted to distinguish the machines of the Gramophone Co. from those of rival manufacturers. He could not say that the word in itself was more adapted to distinguish the goods of one maker any more than the word "matches" would distinguish the matches of one manufacturer from those of another. In his opinion the name by which an article was popularly known ought not to be admitted to registration in respect of a particular make. The application would accordingly be dismissed with costs. As will be seen by the following letter addressed to the trade, the Gramophone Co. intend to appeal against Justice Parker's decision and in the meantime will protect their dealers.

A Gramophone Co. Letter.

In regard to the decision the Gramophone Co. have issued the following letter to the trade:

"The Gramophone Co. have for many years, and up to the present time, used the word 'Gramophone' to designate its product in the belief that this word (which its predecessors in business had invented, and which no other manufacturer has ever used) rightfully belonged to it.

"After the passing of the last Trade-Marks Act this company applied for the registration of the word as a trade-mark. The registrar referred the application to the courts.

"Justice Parker delivered judgment last week, refusing our application. There is, of course, an appeal from this judgment to the Court of Appeal, of which we are availing ourselves.

"In the meantime we wish to inform dealers that should any competitors apply the word 'Gramophone' to any instruments not manufactured by the Gramophone Co., Ltd., and thereby take advantage of a decision which is under review, and incur the risks involved, any confusion in the minds of the purchasing public can, by care on the part of our dealers, be minimized, as our machines and records all bear our well-known trade-mark 'His Master's Voice.' Further, it is clearly stated that our instruments and records are the manufacture of 'The Gramophone Co., Ltd.,' a title by which no one but this company can ever designate themselves.

"These two important facts cannot be too prominently advertised to our accredited dealers, who alone can style themselves 'accredited dealers to the Gramophone Co., Ltd.,' and who by so doing will to a large extent protect themselves pending a further decision."

To Eliminate Trade Evils.

The recent meeting of Gramophone agents to discuss certain trading conditions is an impor-

tant step toward the reform of many existing trade evils. The elasticity of discounts has been a great barrier to the maintenance of prices. The Gramophone agents and factors have now agreed to a uniform discount of not more than 2½ per cent. and to abolish the "sale or return" method of trading. The rigid acceptance of these two worthy principles can have only a beneficial effect in maintaining stability of trade and greater confidence all round.

New Japanese Tariff.

Japan's new tariff, which comes into force on July 1 next, will, it is estimated, mean the exclusion of thousands of pounds' worth of European goods, such as talking machines, pianos, etc., now exported to Japan. The average of the new duties on British goods is an advance of about two-thirds upon existing rates. The decreases of duty affect such manufactures as Japan does not yet make for herself, but all those industries which Japan has developed or expects to develop will be adversely affected. The new tariff will be based upon specific rates subject to six months' notice of any alteration.

Bill to Amend Copyright Laws.

The president of the Board of Trade has now introduced before Parliament an important bill to amend and consolidate the laws of copyright. Substantially the object of the measure is to carry out the recommendations of the committee, presided over by Lord Gorell, which lately examined the points in which the Revised International Copyright convention, signed at Berlin in November, 1908, is not in accordance with the law of the United Kingdom, and considered whether that law should be altered so as to enable his majesty's government to give effect to the revised convention. To some extent the recommendations of the committee have been modified by a conference which has recently been held between the government and representatives of the colonies for the purpose of considering copyright law, not only from the point of view of the dominions, but also from the imperial standpoint. The hope entertained was that there might be a general agreement on copyright throughout the empire. If there should be a substantial amount of agreement the measure might be passed at the autumn session.

Delegates from Great Britain, Germany, France, Italy, Spain, Belgium, Denmark, Japan,

The STROH VIOLIN

☞ A new instrument possessing a VIOLIN quality of tone of great beauty and remarkable power.

☞ The "Stroh" is constructed largely of aluminum but the absence of any metallic quality of tone is another notable feature.

☞ All interested should write for an illustrated booklet to the Sole Makers.

L. P. Valiquet

25 N. 16th Street, EAST ORANGE, N. J.

FROM OUR LONDON HEADQUARTERS—(Continued.)

Norway, Sweden, Switzerland, Luxemburg, Liberia, Monaco and Tunis were in entire agreement that authors of musical works shall have the exclusive right of authorizing:

1. The adaptation of those works to instruments which can produce them mechanically.

2. The public performance of such works by means of these instruments.

International uniformity of protection of musical works during the life of the author and 50 years after is another pertinent recommendation. Clause 10 provides that existing works in which copyright actually subsists at the commencement of the act (but no others) should enjoy, subject to existing rights, the same protection as future works, but for the benefit of any extension of terms should belong to the author of the work, subject to reservations where he has assigned his existing rights. Clause 11 provides for stopping the importation of pirated copies of a copyright work into any part of his majesty's dominions to which the imperial act extends.

New Companies.

The Phonofilm Co., Ltd.: capital, £10,000; manufacturers of and dealers in records and carriers for use in talking machines. Registered office, Gloucester Mansions, Cambridge Circus, London.

Victorphone, Ltd.; shop fittings and talking machine manufacturers; capital, £2,000. Office, Victoria Works, County street, Leeds.

An Excellent Edison Record List.

The advance list of Edison records for September contains some fine titles by such artists as Vesta Tilley, Maurice Farkoa, Alexander Prince, Peter Dawson, etc. Amberol—"Di Ballo Overture" (Sullivan), National Military Band; "I Like You in Velvet" (Rubens), Maurice Farkoa; "One, Two, Three, Four, Five" (Osborne), George Formby; "The Kerry Dance" (Molloy), Miss Amy Evans; "March aux Flambeaux" (Clarke), concertina solo, Alexander Prince;

"Thora" (Adams), Peter Dawson; "Flanagan" (Murphy and Letters), Miss Florrie Forde; "Shirts" (Murphy and Lipton), Arthur Osmond; "One of the Midnight Sons" (David and Lyle), Miss Vesta Tilley; "Lucia di Lammermoor," selection (Donizetti), National Military Band; "Killarney" (Balfe), Miss Marie Narelle; "You'll Never Find Another Love Like Mine" (Solman), Manuel Romain; "Irish and Scotch Melodies—Fantasia" (xylophone solo), Charles Daab; "Hiding in Thee" (Sankey), Anthony and Harrison; "Rescued from the Flames," Len Spencer and company; "Southern Dream Patrol," New York Military Band; "One Sweetly Solemn Thought" (Ambrose and Bartlett), Knickerbocker Quartet; "If Dreams Are True" (T. Taylor), Will Oakland; "Carry Me Back to Old Virginia" (James A. Bland), Premier Quartet; and "Over the Waves Waltz" (Roses), New York Military Band. Amberol grand opera records—"La Veritable Manola" (Emile Bourgeois) (Spanish song sung in French), Blanche Arval; "La Favorita—O Mia Fernando" (Donizetti) (sung in Italian), Marie Delna; "Faust—Air des Bijoux" (Gounod) (sung in French), Marguerita Sylva; and "Andrea Chenier"—monolog (Giordano) (sung in Italian), Giovanni Polese. Standard records—"The British Bugler's March" (Parkes), National Military Band; "Shadowland" (Noel Johnson), Peter Dawson; "De'il Among the Tailors" (traditional), accordion solo, Peter Wypor; "Bradshaw on the Brain" (Wells), Miss Florrie Ford; "Oft in the Stilly Night" (Stevenson), Ernest Pike; "Oh! Oh! the Picture Show" (Scott), Stanley Kirkby; "Prisoner at the Bar" (David and Leighton), Arthur Osmond; "Love and Life in Vienna Waltz" (Karl Komzak), Alexander Prince; "Scotch and Polly" (Maurice Shapiro), Jack Lorimer; "Tolledo" (Spanish Troop (Ord Hume), National Military Band; "Emperor's Manoeuvre March" (C. Friedman), United States Military Band; "L'Encore" (Victor Herbert), Victor Herbert's

Orchestra; "Pal of Mine" (J. S. Nathan), Manuel Romain; "German Waltz Medley" (accordion solo), John Kimmble; "You Can't Make Me Stop Loving You" (Kerry Mills, Will Oakland); "Only a Beam of Sunshine" (John R. Sweney), Anthony and Harrison; "The Lady Bug's Review" (Neil Moret), American Standard Orchestra; and "The Smiler Rag" (Percy Wenrich), New York Military Band.

Louis Sterling Returns from the States.

After being away a little over four weeks, Louis Sterling, British manager of the Columbia Co., arrived home July 23 from the States, where from all accounts he experienced a warm time. In the course of a short chat Mr. Sterling said: "Owing to the extreme heat I had to forego many visits I wanted to make, but for all that I managed to look up quite a number of trade friends. My visit to Columbia headquarters at Bridgeport was most interesting. Despite the fact of my close acquaintance with the trade on both sides, the Bridgeport factory was a revelation. It is the finest factory of its kind I have ever been into, and its size was really astonishing. Talking machine business in the States is simply terrific compared to what is done here, and more pertinent still is the fact that sales of the higher-priced machines are developing all the time. Yes, it was a pleasant change to revisit the birthplace of this industry, and altogether I had a really enjoyable holiday."

The Cinch.

That mysterious announcement, "Look out for the coming of the Cinch," which, as reported in last issue, created an amount of interest seldom met with among talking machine men, has now taken such definite shape that my readers may no longer be kept out of the secret. Zonophone dealers especially will welcome the "Cinch"—a new horn machine, described by the company in these words: "Though by far the most compact interior horn machine on the market, the volume of tone is equal to that of the largest horn ma-

FROM OUR LONDON HEADQUARTERS—(Continued.)

chines. By its combination of scientifically constructed interior and sound developing screen a remarkable volume of tone is gained, but not at the expense of true reproduction. It is fitted with the new Zonophone sound box and powerful direct drive motor. The 'Cinch' embodies two original features of high importance. A larger resonating chamber than is found in others of its class is obtained by the use of a hollow bracket, through which the sound is carried from the tone arm direct into a radiating aperture extending right to the front of the cabinet. Another ingenious device is the sound-developing screen fixed over the mouth of the resonating chamber. This screen is made of metal, taking a form of construction something after the style of a Venetian blind—the bars being concave. Selling at £2 12s. 6d. retail, the 'Cinch' is indeed a temptation of price and quality combined."

Success of the Stroh Violin.

The beautiful effects obtained from the Stroh violin for recording and other purposes place it unquestionably in the foremost rank of stringed instruments, and indeed experts agree that the Stroh in tonal quality is superior to any other type of fiddle. It is a recognition that is becoming universal. With an increasing demand from all parts of the world, a splendid opportunity presents itself to first-class musical instrument houses desirous of a profitable agency. Geo. Evans & Co. are open for application to this end, but not from the United States, since they are ably represented there by the Oliver Ditson Co., of 150 Tremont street, Boston, and of New York and Philadelphia.

The Ideal List Competition.

Those of our readers interested in the above will be glad to learn that the Gramophone Co. are now busy recording the winning lists of chosen titles, and competitors may expect an announcement as to their issue in the near future. Some delay has been quite unavoidable, owing to the absence of some of the chosen artists in foreign countries. Mr. Evan Williams, for instance, figures so high in the estimation of competitors, that in order to record their choice of titles, he recently made a special journey from the States, to which country he has now returned. Herr Wilhelm Backhaus, Miss Agnes Nichols and Marie Hall have been abroad, too, but their contributions to the Ideal List of Gramophone records will shortly be available, as also will those of the New Symphony Orchestra. We shall await the Ideal List with much interest, for it's to contain some gems.

Other Gramophone News

Covers the important announcement that four new titles by Madame Melba have been issued. They have been made under the new Gramophone recording process, and are therefore perfect specimens of the recording art. Owing to her extensive Colonial tour, it is upwards of two years since any Melba records were issued.

That span of time is now bridged by the present issue, which have met with an enormous reception. The usual monthly list to hand contains titles well up to the Gramophone standard of quality, one point in particular—that of surface—showing a marked improvement. The titles are as follows: "Marche Hongroise (Berlioz)," "Fifinette Intermezzo" (Fletcher) and "Merry Wives of Windsor" overture (Nicolai), by the Band of H. M. Coldstream Guards. "H. I. M. The Sultan of Turkey" (march), Black Diamonds Band; "Chanson Bohemienne," waltz (J. B. Boldi) and "Topeka," two-step, by Iff's Orchestra; (a) "The Night Has a Thousand Eyes" (Frank Lambert), (b) "Across the Blue Sea" (Lord Henry Somerset), Mr. John Harrison; "Spirit So Fair" ("Favorita") (Donizetti), Mr. Evan Williams; "The Dear Little Shamrock" (Jackson), Mr. John McCormack; "Down Among the Dead Men" (Phipps), Mr. Robert Radford; "Onaway, Awake!" (Cowen), Mr. Harry Dearth; "I Know a Bank Whereon the Wild Thyme Blows" (C. Horn), Miss Allen and Miss Thornton; "I've Got Rings on My Fingers" (Maurice Scott) and "Chanticleer" (Theo. Morse), Mr. Harry Carlton; "Le Dernier Sommeil de la Vierge" (Massenet) (cello), Mr. Jacques Renard; "Bohemian Dance" (A. Ranegger, Jr.) (violin), Mr. Francis Macmillan, and a unique bird record, made by a captive nightingale. Also three by Miss Phyllis Dare, "Sleeping Car Song" ("The Girl in the Train") (Leo Fall), "Bring Me a Rose" ("The Arcadians") (Monckton & Talbot) and "The Girl With the Brogue" ("The Arcadians").

Fine Columbia Rena Records.

For the first time in this country a manufacturer has ventured to issue a 12-inch double record of two seric-comic songs, namely, two of George Lashwood's current successes sung by George Lashwood himself on a fine Columbia Rena.

The redoubtable Wilkie Bard has caught the Russian craze badly, and has been telling his audience of his love romance with little Olga Popoff in his "scngovitch," "You Are My Girl-ski." Of course it is absurd—Bard's songs are—that's the beauty of them. Terry Dean emulates the Bard in Bardic vein in this big hit on Columbia Rena records.

With one accord the seaside vocalists, be they "Bones" Pierrets, or masked celebrities (ahem!), have seized upon the song, "Ship Ahoy," or "All the Nice Girls Love a Sailor," for a place in their repertoire. Generally the "nice boy" of the troupe regards it as his "plum." In the music-hall world the song is being prominently featured by such artists as Daisy James, Maud Esmond and May Mars and Miss Nina Wood on the Stoll tour and Josephine Crook. The Columbia Rena record of this song is going exceptionally strong in consequence, as with the record goes a printed copy of the words.

The August Zonophone List.

The August Zonophone list is about one of the best yet issued, and contains such gems as "O, Dry Those Tears," by Madame Edna Thornton; Pilgrims' chorus from "Tannhauser," by the Festival Chorus; "Crown of Gold," overture, by the Black Diamonds Band; "Narcissus," the Peerless Orchestra; "Come, Birdie, Come" (with flute and piano), by Madame Dering; "My Sweetheart When a Boy," Ernest Pike; "Flanagan," Miss Florrie Forde; "A Political Speech," by Mark Sheridan, and "An Egyptian Idyll" (ocarina solo), by Mons. Tapiero.

Recent Visitors.

Important Trade Meeting.

July 21, at Manchester, and on the 25th, in London, the principal factors and Gramophone dealers met at the instance of the Gramophone Co. to discuss, among other things, certain matters bearing on trade discounts and dealers' contracts. Many questions of interest came under review, and from information received the company found itself the object of a very pleasing demonstration of loyalty on the part of their distributors. The meeting disbanded after having agreed that 2½ per cent. discount is to be the maximum allowance in the future, and with the exception of new records on a three-day approval basis, no records are to be sent out on sale or returned. The company took the opportunity of introducing their new Zonophone portable machine—the "Cinch" (a full description of which is given elsewhere in this issue), and high expressions of approval were general. Heavy orders were subsequently placed.

A Magnificent Odeon Record.

Music lovers will accord a hearty welcome to a recent Odeon issue of the famous "Miserere" from "Il Trovatore," duet, sung in English by Miss Jessie Reeves and Mr. Gwilyn Wigley. It is in all respects a magnificent record.

New Polyphon Records Ready.

By the time these lines appear it is expected that the first list of titles on the new Polyphon records will have been issued. Last month I reported the price of these 10-inch double discs at 2s. 6d. This has now been definitely fixed at the extraordinary figure of 2s.! The Klingsor Works, by the way, now carry a full stock of Polyphon horn and hornless instruments of remarkable value, as well as a series of musical boxes, which it is the company's intention to shortly submit to the discrimination of Colonial and foreign traders.

Another Consolidation.

Following my report in these columns over two months ago of the amalgamation of the Beka and Fritz-Puppel concerns, announcement

The Needle of To-day—The Needle of the Future

An all-British Needle of the finest tone-reproducing quality, discovered after exhaustive laboratory tests in combining the correct extreme in hardness and flexibility. The whole product is British Sheffield Steel throughout.

is now made of the inclusion of yet another large corporation—Messrs. Carl Lindstrom, Ltd. Individually these firms carried on a successful trade, but as showing the increased value of combination, the company's shares now stand at over 200 per cent. above par.

Fine Selections in Rena Lists.

The current Rena lists contain many fine selections, notably, "The Palms" and that dramatic canto, "Ring Out, Wild Bells," from Tenynson's "In Memoriam." They are rendered by David Bispham on a 12-inch double disc. Mr. Strand Haxton is responsible for two delightful violin records, and the Columbia Co. draw special attention to a new waltz of a singularly charming character, called the "Queen Mary Waltz," played by the King's Military Band. Other good records to hand are: Twelve-inch—"There's Another Fellow Looks Like Me" (Fred Leigh) and "Send for a Policeman" (Fred Leigh), Mr. George Lashwood; "Casino Tange Waltz" (Gung'l) and "Pagliacci Selections" (Leoncavallo), Court Symphony Orchestra. Ten-inch—"In the Woods Waltz" (Kanlick) and "Queen Mary Waltz," King's Military Band; "London Pride March" (G. W. Smith) and "Midnight Parade March" (Trespaille), King's Military Band; "I've Got Harry Lauder on the Brain" (J. A. Glover-Kind) and "Bertie & Gertie" (J. A. Glover-Kind), Arthur Leslie; "Underneath the Monkey Moon" (Meyer) and "Cubanola Glide" (H. Von Tilzer), duets by Collins & Harlan; "Fraidy Cat" (Grey Elliott), Miss Ada Jones; "I'm Glad I'm a Boy" (Bayes & Norworth), duet by Ada Jones and Herbert Scott; "The Vicar of Bray" (old English) and "A Jovial Monk" (Audran), Robert Howe; "I Met Mary Ellen at the Isle o' Man" (Bennett Scott) and "Hi! Hi! Hi! Mr. McKil" (C. W. Murphy), Miss Molly Gray; "Flanagan" (C. W. Murphy) and "Top o' the Mornin', Bridget McCue" (H. Von Tilzer), Harry Fay, and "Father Tried It On" and "Every Day in the

Week" (George Tormby), Arthur Peel.

To Amend Merchandise Marks Act.

A Government Bill to amend the Merchandise Marks Act is about to be introduced in Parliament. It will enable the Commissioners of Customs to deal with the fraudulent use of British trade-marks by foreigners sending goods to the United Kingdom. The single operative clause is in the following terms: "1. Where any goods which, if sold, would be liable to forfeiture under the Merchandise Marks Act, 1887, are imported into the United Kingdom, and the goods bear any name or trade-mark being or purporting to be the name or trade-mark of any manufacturer, dealer or trader in the United Kingdom, and the Commissioners of Customs and Excise are, upon representations made to them, satisfied that the use of the name or trade-mark is fraudulent, the proper officer of customs and excise may require the importer of the goods, or his agent, to produce any documents in his possession relating to the goods, and to furnish information as to the name and address of the person by whom the goods were consigned to the United Kingdom, and the name and address of the person to whom the goods were sent in the United Kingdom; and if the importer or his agent fails within fourteen days to comply with any such requirement, he shall for each offense forfeit the sum of one hundred pounds.

"2. Any information obtained from the importer of the goods or his agent under this section, or from any other source, may be communicated by the commissioners to any person whose name or trade-mark is alleged to have been used or infringed.

"3. This section shall have effect as if it were part of section 16 of the Merchandise Marks Act, 1887."

Cuckoo Song for Motors.

The unification of motor horns, a subject recently under discussion by the Coventry Chamber of Commerce, has elicited some amusing

ideas. One correspondent says he has thought of an excellent combination of two notes, tuneful and cheap, and a melody, he believes, pleasing to most people. He would emulate the notes of a cuckoo! Another declares "the unification of motor warning sounds will be of little advantage. Stop them altogether is the only remedy, for it's a monstrous thing that they have been allowed to bully, browbeat and terrorize millions of us, not only by day, but by night."

New Beka Exchange Proposition.

The Beka Record Co. have just initiated a timely scheme for dealers to unload their old stock of records on an exchange basis. Any record other than Columbia, Rena or Imperial will be accepted in exchange for one new Beka record free, providing two more are ordered at the same time. Returned records should be sent carriage paid and through factors only. Lasting during the month of August the Beka exchange proposition is introduced at the psychological moment, and will afford dealers an opportunity of commencing the season with up-to-date stock. Its value, too, is undoubtedly enhanced by the issue of a particularly fine list of titles for August, of which the following are good examples: "O Kioto San," "Japango Intermezzo," "Amoureuse Waltz" and "The Druid's Prayer," waltz, all by the Beka London Orchestra; "The Anchor's Weighed" and "The Death of Nelson," by Philip Ritte; "Little Pat" and "Heva-Heva-Ho," by Harry Thornton; "Sweet Caroline" and "When the Harvest Moon Is Shining," by James Hudson; and two good comics by Pete Brown, "I Wish I Lived Next Door to You" and "Anywhere Is All Right When You're Doing Well."

PROVINCIAL ITEMS.

Perhaps the most interesting report to hand from the country this month is that having reference to the Northern Gramophone Agents' meeting at the Midland Hotel, Manchester, July 21. Matters under discussion included consid-

"KLINGSOR" HORNLESS TALKING MACHINES

The Only MUSICAL Instrument in the Talking Machine Line

☞ The ideal Entertainer at home. The steadily increasing sale of our machines speaks for their quality. The only machine built on entirely scientific principles, doing away with the tinny sound and reducing the scratch of the needle to a minimum.

☞ A satisfactory machine without good records is not much use and therefore you should stock our

"POLYPHON RECORDS"

FROM OUR LONDON HEADQUARTERS—(Continued.)

eration of carriage costs, contracts, etc., and agreement was come to that any discount allowed in future is not to exceed 2½ per cent. over and above the usual trade terms, and excepting the first issue of new records, the "sale or return" method of business is now banned as being opposed to the best interests of trades generally. A first demonstration of the "Cinch" was given, and its many original features and all around excellence of quality evoked nothing but the highest praise, and of course big orders.

Messrs. J. E. Hough L. are to be congratulated upon having secured a diploma and gold medal at the Manchester Trade Exhibition. The jury made this high award after taking into consideration the general quality of the Edison-Bell products. Special mention, too, was made of the "Eureka" Home Recorder, recently introduced by J. E. Hough L.

In Manchester and Liverpool, indeed right throughout the great County of Lancashire, a general feeling of satisfaction is the outcome of the recent settlement in the cotton industry. Masters and men have established an agreement which insures peace and freedom from strikes for the next five years, at any rate. Musical instrument traders are naturally delighted with the turn of affairs, and look forward with more hope to an exceedingly bright season next. As a matter of fact, business up North is improving rapidly, and from present indications, the next few months will be quite free from any trouble to disturb the season's bright prospects.

In Yorkshire business maintains average proportions for the time of year, and from reports to hand, the Yorkshire factors are looking forward to good times ahead. Preparations for the season's trade are well under way, and big orders for machines have been placed with the London manufacturers. Zonophone, Twin and Beka discs are in good demand from Yorkshire dealers, and Edison goods are selling freely. The Victorphone Co., Ltd., is a new firm, with

works located at Leeds, recently registered with a capital of £2,000 to carry on the business of talking machine manufacturers.

Trade in and around Birmingham and other Midland towns is considered satisfactory, especially so in the goods of Columbia, Edison, and the Zonophone and Twin Companies. Jumbo, Odeon and Beka products are also in fair demand.

Cardiff way, talking machine traders are getting on the move, so to speak, and preparations are well advanced for the handling of big business after August. Tilley, the chief Welsh fac-

tor, is specializing upon Edison, Twin and Zonophone products, as usual. Other makers are now establishing wholesale agencies in Wales, and competition is expected to be very keen this coming season.

Trade in Scotland is expected to receive a great fillip when the new Edison Lauder selections are ready, and while at the present time talking machine sales are somewhat depressed, prospects of an early improvement would seem to be indicated by the satisfactory condition of the labor market, and the stability of business generally.

TEST VALIDITY OF TONE-ARM PATENT.

English Court Hands Down Judgment Against Gramophone Co., Ltd., in Their Action Against Otto Ruhl, Ltd., for Infringement of Tone-Arm Patent No. 8401 of 1903—The Courts' Decision in Full—Gramophone Co. Announce That They Will Take an Appeal.

(Special to The Talking Machine World.)
London, Eng., August 1, 1910.

This was an action by the Gramophone Co., Ltd., against O. Ruhl, Ltd., of this city, and heard before Mr. Justice Warrington, July 13. Plaintiffs claimed that defendants had infringed their tone-arm patent No. 8401, of 1903. This was denied by defendants, who further pleaded that the patent in question had been anticipated by the Columbia Phonograph Co., and was therefore invalid. Plaintiffs were represented by Mr. Walter, K. C., and Mr. Hunter Gray; defendants, by Mr. Astbury, K. C.; Mr. Colefax, M. P., and Mr. Lange. The case naturally created intense interest amongst members of the trade, many of whom gave evidence for and against. After a lengthy hearing, His Lordship handed down judgment as follows:

This is an action for infringement of a patent, No. 8401, of the year 1903. It is entitled "Improvements in sound magnifying horns for phonographs and the like." The defendant denies infringement, and he also attacks the validity of the patent. I propose first to

deal with the question of infringement, and for that purpose the first question to be decided is what is the true meaning of the specification and the scope of the invention which the patentee says he has made.

The invention relates to magnifying horns for phonographs and the like, and for the purpose of convenience I will consider it as applied to that particular form of sound-reproducing instrument which has been referred to here as a gramophone. In a gramophone the sound is reproduced by the travelling of a box containing a vibrating membrane over a circular disc in which are the grooves representing the grooves originally cut by the producing sound. The sound thus reproduced in the sound-box is conducted through a tube of some nature, generally ending, at all events, in a bell-shaped trumpet opening, by which the sound produced in the sound-box is amplified. The makers of this particular form of instrument had been somewhat embarrassed by the fact that the trumpet was a large and unwieldy instrument, and that even if it were so balanced that the weight did not fall upon the sound-box, yet the sound-box traveling round the disc had to disturb the inertia of this large and unwieldy thing. Accordingly the inventor of the present patent had, shortly before the date of this patent, invented a contrivance by which he separated what I will call the lower part of the amplifying horn from the upper part of it, leaving that

upper part, the heavy and unwieldy thing to which I have alluded, supported separately on a bracket in such a way that the sound-box in traveling round the disc moved independently of that upper or trumpet portion. But in arriving at that result he had, until the date of the previous patent, broken off the horn proper at the bracket, and had connected the sound-box with the horn by means of a straight parallel-sided tube. That I think was the position so far as the present patentee was concerned at the time he took out this patent in question. It is important to state that, because that throws some light on what is the true construction of this specification itself.

Now I come to the construction of the specification, and my task in the present case is rendered considerably lighter than it usually is in these patent cases, because the construction of the specification has already been determined in the judgment of Mr. Justice Farwell and in the judgments in the Court of Appeal in the case of the Gramophone Co. v. Ullmann, which is reported in 23 Patent Cases, at pages 260 and 752. I propose, however, to state first, before I refer to any part of those judgments, how the construction of the specification strikes myself. In the first place, I read the first claim, what I may call the covering claim. This is an American specification, and, as we all know, the Americans in their specifications put in an enormous number of claims for all kinds of little details. But this begins with a claim which seems to me to cover that which the patentee says is his invention. It is in these terms: "What I claim is: (1) A tapering amplifying horn for talking machines, having joints in the tapering portion thereof, to allow a horizontal and vertical movement of the sound-box." He claims, therefore, a tapering amplifying horn with joints, allowing a horizontal and vertical movement. He says—"having joints in the upper portion." Strictly speaking, that expression is inaccurate, because the whole of the horn is a tapering contrivance; but it is pretty obvious, when you look at other parts of the specification, that what he is referring to there as the tapering portion is the portion nearer to the sound-box—that is, the lower portion. Having seen what he says he claims, let me look now at how in the body of the specification he refers to this thing that he claims. He says first of all: "The object of my invention is to provide an amplifying horn for talking machines of such a character"—now these next words are, it seems to me, of great importance—"that the same will have all the material advantages of a single horn connected directly to the sound-box without having the disadvantages thereof due to the large size and weight of the bell portion of the horn." That is what he is setting himself to get over, to get, first of all, a horn in the proper sense which will

not be interrupted but continue to the sound-box, and yet move so that the lower part which holds the sound-box will move independently of the upper and unwieldy part of it. Then he says what it consists in: "Broadly, my invention consists in constructing a curved tapered amplifying horn with joints such that the larger portion thereof may be adjustable on a fixed support"—that he had already done by his earlier patents—"while the small end thereof, or that upon which the sound-box is mounted is pivoted so as to swing horizontally, and also has a secondary joint which allows the sound-box to move vertically, to follow the irregularities of the record and also to allow of the needles being inserted and removed." Then again, after the detailed description, referring to the drawings attached to the specification, he says this: "By the construction above described, it will be seen that I have provided a very simple, efficient and attractive means for conducting the sound waves generated in the sound-box through the amplifying horn to any point desired. The fact that all portions of the conducting tube or horn are tapered allows the sound waves to advance with a regular and natural increase in their wave fronts in a manner similar to that of ordinary musical instruments, obviating the disadvantages due to long passages of small and practically constant diameter having abrupt turns." I think that the result of those passages which I have read, and of the form of the claim, is this: That the point of the invention consists in bringing the tapering horn down to the sound-box itself, at the same time preserving what he had already effected by his previous inventions, the advantage of relieving the tone-arm or lower end of the tapering horn from the weight of the trumpet and from the task of disturbing its inertia, and also giving to the sound-box end the power of moving vertically, so that it will follow the inequalities of the record and afford means of removing and inserting the needle. In my judgment, there is no real point in the specification in the double movement except this, that there shall be that double movement, and provided that that double movement is obtained without throwing the weight or the inertia of the trumpet upon the sound-box, it seems to me that the patentee himself has shown that it does not matter how that is obtained. It has been said that the patent is confined to a particular mode of obtaining that object, namely, by a pivot joint at the bracket end and by another joint in the course of that lowered tapered portion which has generally been referred to as the tone-arm. I can see nothing in the specification which imposes upon the patentee the necessity of limiting his claim to that particular form. If he leaves the tone-arm free to swing horizontally over the disc and at the same time free to be lifted vertically, he has done that which he says he has set himself to do, and that the

real point in the alleged invention, to which I have already referred, is the bringing the tapered tone-arm down to the sound-box without the disadvantage that had been previously felt of having to throw upon the sound-box the weight or the inertia of the horn. In my opinion, what I have thus said in my own words is really nothing more than has been said by Mr. Justice Farwell in this court and the Judges of the Court of Appeal in the previous case of the Gramophone Co. v. Ullmann. I need not read more of those judgments than that portion of Lord Justice Romer's judgment which begins at line 38, on page 758. He says: "The invention, as pointed out by my lord, consisted in taking the lower part of the horn"—now pausing there for one moment he means by that, I think, the lower part of a horn in the proper sense—that is, a horn which begins with a point and ends with a wide opening—"and doubly articulating it"—of course, double jointing was perfectly well known—so that in no sense should the main weight of the horn be cast upon the needle, nor should the horn have to be moved as a whole as the needle moved." I think there he is expressing what I have already expressed, namely, that the two objects to be effected are to keep the needle free to move horizontally and keep it free to move vertically. Then he goes on to say: "The only part that had to move with the needle was the lower part of the horn, which was double jointed; but this invention also had the advantage of still preserving the cone form of the sound enlarger down to the box, so that from the time of the sound produced coming from the box it came forth in the proper-shaped cone and was so properly enlarged and issued to those listening to it." That, then, is, I think, the true construction of the specification, and I think the invention is limited to an amplifying horn with a lower portion, having all its portions so tapered as to allow what the patentee calls the natural advance of the sound waves. What that may really be is a matter which is in question.

Now, does the defendant's horn come within that description? The defendant's horn or tone-arm (to refer only to the lower part of the horn) is pivoted so that it swings horizontally. It has a joint which allows it to move vertically. But the question is, is it so jointed—such an amplifying horn as that which is claimed by the patentee? It is not tapered in all portions of the horn. It is true it is smaller in area where it joins the sound-box than it is where it joins the upper part of the trumpet. But that difference in area is attained not only by a taper, but by constructing the horn substantially in two members, each of which is parallel-sided or substantially so, the lower of the two members opening, not by a taper but by a sudden enlargement, into the upper of those two members. That difficulty

FROM OUR LONDON HEADQUARTERS—Continued).

in their way was felt by the plaintiffs, and they have striven hard to make out that their specification really claims not what I may call a physically tapered horn, but that it covers a horn of such a shape that an imaginary taper or cone may be drawn within it, showing what they say is the natural and regular increase of the wave fronts. Now I am not going into the theory of the amplification of sound, about which nobody seems to know anything whatever. I have to look upon this as a mechanical invention, and is this machine which I have just described, and which I hold in my hand, the plaintiffs' tapering horn or a colorable imitation of it? In my opinion, it is neither. It is not a tapering horn, and it is so substantially different from a tapering horn that, in my opinion, it cannot properly be described as a colorable imitation of it. I am not much troubled with the Ullmann horn nor tone-arm which was said to be an infringement in the previous case, because, in my opinion, that was essentially different from this horn of the defendant's in that it was substantially a tapering horn. But I have to determine on the facts of this case whether the present article is an infringement of the patent, and the question whether the court before whom a previous case has come or has not held another thing to be an infringement is really not of very much assistance to me.

I may just add on this part of the case that, if the plaintiffs' patent is wide enough to cover such a horn as that of the defendant's, I fail to see at what point the line is to be drawn, and if it is to be construed so widely, then, without going into detail, I think there is no doubt it would fail for want of subject matter, having regard to some of the other specifications and some of the other articles which have been referred to in the present case. I need say no more on that subject. I have construed the patent to the best of my ability, and, so construed, I think there is no infringement.

Now that, of course, would be sufficient to decide the action in favor of the defendant, but the validity of the patent has been attacked, a great deal of time has been expended on that part of the case, and I think I ought to express my opinion upon it. The validity of the patent has been attacked, first on subject matter by the suggestion that, having regard to the public knowledge at the date of the patent, there was no invention in that which the patentee did, and a number of specifications were relied upon in order to establish what was the state of public knowledge at that time. If the validity of the patent turned only upon the state of public knowledge as shown by those documents, I should be prepared to say that, construed in the way in which I think it ought to be construed, there was sufficient invention to render the patent valid, notwithstanding what appeared by those documents. But the case made by the defendant does not rest merely on the documents.

He has pleaded two cases of alleged public use of the invention, or publication of the invention by public exhibition and used. Those two cases are, first, a machine publicly exhibited and used by one Rosenthal in the year 1899, and, secondly, a machine which is said to have been publicly exhibited and used by the Columbia Co. in the latter part of the year 1902 and the early part of the year 1903. I will deal with the Columbia case first, because that is, I think, unquestionably the more important of the two if it can be established. The facts with regard to that, as I find them, are these: Toward the end of 1902 there arrived at the establishment of the Columbia Co., No. 122 Oxford street, from America, a tone-arm of a continuously tapered or conical form, so arranged that it would swing horizontally when the sound-box was resting on the disc, and could move vertically so as to allow the sound-box to follow the irregularities of the records, and to be lifted so as to enable the needle to be adjusted or removed. The means by which the tapered sound-arm was thus allowed to move consisted of a ball-joint so restrained (the exact form of restraint is not shown) that while allowed to move horizontally and to move vertically it was prevented from rolling over. That arm was fixed upon the motor box of a machine and was played by and in the presence of certain officers of the Columbia Co. It was then placed in one of the rooms in the basement of their establishment, which was referred to in the evidence as the stockroom. The stockroom was a room into which everybody was not allowed to go, and it was marked "Private," but I had it proved and I find as a fact that a considerable number of persons under no obligation of secrecy did enter that room. Two of them, witnesses entirely unexceptionable and whose evidence I accept, saw this machine with its tapered sound-arm in that stockroom. Another witness, who did not see the machine, has proved that he has from time to time seen large numbers of people who were under no obligation of secrecy in that room, and who, therefore, had opportunities of seeing the machine. It was tried in the presence of certain servants of the company, as to whom I have no evidence that they were under any obligation of secrecy, and one of them actually took the machine to his own house, where it remained for a considerable time, and where, for anything I know, it may have been seen by all his friends and neighbors in the district. What happened subsequently was that in the year 1905 an action was brought for infringement against the Columbia Co., and they then pleaded as an objection to the plaintiffs' patent (the same patent as that with which I am dealing) this very machine. The result was that that action never came to trial, but an all-round agreement was some years subsequently made between the two companies, part of which was this thing which I hold in

my hand, Exhibit O.C. 10, which has been licensed by the Gramophone Co. to the Columbia Co. The particulars of objections were delivered originally with the defense on November 20, 1909, and those particulars contained the reference to this machine. Shortly afterward application was made by the defendants to the officials of the Columbia Co. to allow the plaintiffs to inspect this alleged prior user. After that letter had been received, as I infer from the evidence which I have before me, the assistant manager, one of the principal officers of the Columbia Co., destroyed the machine, destroyed or threw away a photograph of it which is also referred to in the particulars of objections, and also destroyed or threw away a circular letter, an invoice and some shipping instructions also therein referred to. But, notwithstanding that destruction, which has a strange coincidence with the reliance placed by the defendant upon this machine and the other documents, the defendant has been able to prove sufficiently what that machine was. Now, first of all, was that machine an anticipation of the plaintiffs' invention; if so, was there a sufficient publication of it? I think it is quite plainly an anticipation. The only difference that I can find is in the means by which the double action of the sound-arm is brought about. It is quite true that there is not a double articulation in the sense that there is not one joint at one place and one joint at another, but the plaintiffs have not restricted themselves to having joints in any particular part of the sound-arm, and it seems to me that supposing the double joint had been a part of the plaintiffs' invention, if anybody had taken a sound-arm and, instead of putting a joint in the middle of it, had put one joint which allowed both movements, that would have been plainly an infringement. It seems to me that that really being the only difference between the machine which was so exhibited in 1902 and the plaintiffs' machine, that machine was an anticipation of the plaintiffs'. But now, was that sufficiently published? I think it clearly was. It was exhibited in such a way that members of the public could see what the thing was. Certain members of the public have seen what it was, and one of them in particular was struck by it, because he said he was looking out for improvements of the kind in these machines. How many more people saw it it is impossible for me to say. That it was possible that other people may have seen it, I think, is established by the evidence. If people who want to keep a new invention secret are so careless as the Columbia Co. have been in this case, they cannot be surprised if a court should afterward come to the conclusion that they have not succeeded in so doing. I think, therefore, that the plaintiffs' invention was anticipated by this machine exhibited in the rooms of the Columbia Co., and that the patent is, therefore, bad upon that ground.

Don't Buy Needles That Damage Records

Bad Needles

Condor Needles

When a needle is running a record, the friction causes the polished surface of the needle to be taken off, while its interior (grain) is exposed and touches the sound waves.

Consequence:

The poorer the polishing and rougher the grain, the more the sound waves are injured!

Only *Condor Needles* are warranted to have always the highest and most perfect polish, smoothest grain. Using them means:

Finest Reproduction, No Ruin of Record.

With regard to Rosenthal, I do not propose to express any definite opinion. Coming to the conclusion that I do on the Columbia case, it seems to me unnecessary to do so. I may just say this, that I do not think that the Rosenthal sound-arm could properly be described as a tapering horn. It has not two joints, it has only one; and if the case turned upon the Rosenthal horn, my present inclination would be to hold that it was not an anticipation of the plaintiffs' patent. But I need say no more than that.

Now, there is only one other point on which I must say a few words. I ought perhaps to have dealt with this point when I was dealing with subject matter as distinct from anticipation. As I have already said, the plaintiffs' specification claims the continuously tapering tube or horn, and the point of that claim is that by the use of the continuously tapering tube or horn instead of a parallel-sided arm the patentee had introduced a change, not merely of form, but of substance, having regard to the purpose for which this thing is to be used. Now is that true, because I take it that if the change he has introduced is merely one of form and not one of substance, there would not be sufficient invention to support that patent in making that change. With reference to that, in the previous case it seems to have been assumed that there was a distinct acoustic advantage in the tapering horn as distinct from a straight-sided tube. Certain experiments were tried in that case, but they were experiments which the Court of Appeal, through Lord Justice Romer, who deals with the matter at page 760, thought were *nilhil ad rem* in the case which they had before them. In the present case I have had experiments, the object of which was to show that there was no substantial advantage in changing the old form of parallel tube into the conical or tapered horn. I have had the account of an extremely careful and accurate set of experiments made by Mr. Ballantyne with that object. The result of those experiments to my mind was this, that it was possible to distinguish sometimes between the sound reproduced or amplified by the straight-sided tube ending in the trumpet-shaped upper part. But substantially the result of those experiments was that there was no difference between them. Another set of experiments having the same object was tried by Mr. Dugald Clerk, with what appears on paper to be a somewhat different result. He did detect a difference greater than that detected by Mr. Ballantyne and those who were with him. But, in my judgment, without going into it in detail, the mode by which the experiments of Mr. Dugald Clerk were conducted was not nearly so satisfactory as that by which those of Mr. Ballantyne were conducted. In both cases they were perfectly fair in the desire to obtain the clearest and most satisfactory result, but, to put it very shortly, I think Mr. Dugald Clerk had educated himself to the difference by first witnessing the two performances at the same time, that is to say, by being present in the room where the two instruments were being played, noticing the differences there, where he knew which instrument was being played, and then afterwards, no doubt, with that inevitable inclination in the human mind to find what you expect to find, he found the same differences when he was not present in the room where the two instruments were being played. Mr. Ballantyne's experiments are not open to that suggestion. But even granted that there is such a difference as that which has been described by Mr. Dugald Clerk, is that for practical purposes a difference which would show such a substantial advance on previous attainments as to justify the patent? It seems to me that an advance to justify the patent must not be such that expert and trained persons would say that there is this difference, such a matter must look at it broadly, and ask itself has such an advantage been given to the public that it ought to treat the invention as substantially an advance on that which was done before. I do not think that was so in the present case. I cannot forget that subsequently to the date of this invention the sale of the plaintiffs' machine largely increased, but I think the true result of the evidence is that that increase was due not to any inherent benefit which was derived from the tapering sound-arm, but partly by their advertisements, partly by the extreme care with which their machines are constructed, and partly, and probably still more, by the improvements which they effected about the same time in the sound-box.

The general result is that in my opinion the plaintiffs' action fails on both grounds, namely, that of infringement and that of validity of the patent, and there must be judgment for the defendant with costs.

Interviewed by your correspondent, the Gramophone Co. have intimated to me that while the matter is still under review, it would be inadvisable to make any statement, outside the fact that it is their intention to lodge an appeal against this judgment. In any case, until the question of the 1903 patent is definitely settled by the highest court of law, the opinion pre-

vails that no one will consider it good policy to take advantage of Mr. Justice Warrington's findings, especially in view of the fact that the Gramophone tapered tone arm, as a whole, is protected in other directions—the swan-neck joint being an example.

RADIAPHONE SENSATION.

This New Instrument Contains Many Features of Interest to the Talking Machine Trade—Honored at Japan-British Exhibition.

(Special to The Talking Machine World.)

London, Eng., Aug. 7, 1910.

A matter of great interest to the talking machine trade in this country is the introduction of the Radiaphone to the public at the Japan-British Exhibition. Rumors have been heard for some time of the extraordinary quality of the reproduction from this instrument, and I must acknowledge the fact, which is patent to all who hear the Radiaphone, that it is an instrument which will have great influence in the future.

The improvement consists of a new sound box, a new tone arm and a sound distributor which produces a unique effect. The sound box is unique in that the stylus bar is mounted upon guides or bearings instead of knife edges or pivot points as is usual. Another novel feature is the construction of the back, which allows the tube which fits on to the tone arm to have a positive mechanical motion upon pivots instead of from rubber, as in other well-known sound boxes.

The feature of the tone arm is a new joint which allows the sound box to follow the track of the record more easily, it is said, than any other tone arm does. This is done by means of a form of universal joint; friction is reduced to a minimum, and the usual angular horizontal movements of the tone arm are dispensed with.

Regarding the distribution, it meets a long-felt want in distributing the sound evenly around a room so that all hear the same volume of tone.

The combination of these improvements constitute the Radiaphone machine and enable it to produce an absolutely clear and clean tone from the lowest to the highest notes with all the characteristic quality of the voice or instrument. The tone is quite free, it does not remain in the neck of the tone arm, but comes right into the room.

Prominent musicians are visiting the Radiaphone pavilion at the Japan-British Exhibition and applauding its musical qualities, and it is receiving a gigantic ad., for upwards of 10,000 people pass through the Radiaphone pavilion daily, and listen to its performance.

The instruments being placed on the market by the British Pallas Manufacturing Co., Ltd., are of the cabinet type and the prices range from £25 upwards. The designs are very chaste, and, from the number of testimonials the manufacturers are receiving, it is evident the Radiaphone will have a very large sale.

The fact that the exhibition jury have awarded the company a diploma for a good medal is a tribute indeed to the Radiaphone as a musical instrument.

EXECUTIVE COMMITTEE MEETS.

Governing Body of Jobbers' Association Holds Session at Hotel Knickerbocker and Takes Up Important Matters with Factories—Visit Camden and Orange—Confer with T. A. Edison—Handsomely Entertained.

On Thursday, August 4, a meeting of the executive committee of the National Association of Talking Machine Jobbers was held at the Hotel Knickerbocker, New York, those in attendance being Perry B. Whitsit, president; J. Newcomb Blackman, vice-president; J. C. Roush, secretary; Louis Buehn, treasurer, and E. F. Taft and Rudolph Wurlitzer, of the executive committee. The chief purpose of the meeting was to enable the committee to take up with the factories several matters that had been placed in the committee's hands at the time of the convention. After a short session at the Knickerbocker those present met President F. L. Dyer and a committee representing the National Phonograph Co., who had come to New York for the purpose of conferring with the jobbers. After discussing the various matters at luncheon and during the afternoon the company entertained the jobbers' representatives at dinner at Martin's and at the theater in the evening.

On Friday the committee went over to Camden, where they conferred with General Manager L. F. Geissler and other executives of the Victor Co., and settled several matters to the satisfaction of both interests. Here they were entertained at the Victor Club, and in the evening visited one of the roof gardens in Philadelphia as the guests of the company.

On Saturday morning the committee visited the National Phonograph Co. plant at Orange, N. J., where they were received in the laboratory by Thomas A. Edison for the purpose of taking up with him direct several matters of importance that the committee did not feel themselves in a position to render a final decision. The jobbers had occasion to be greatly impressed with the familiarity shown by Mr. Edison with the minute details of the phonograph business, the more wonderful in consideration of the many other interests with which the "Old Man" has an active connection. Mr. Edison was "from Missouri," but after a two hours' conference the various matters were settled in a manner entirely satisfactory to both parties. The committee was then entertained at luncheon at the Essex County Country Club, and then departed for their homes, feeling that more had been accomplished than at any previous executive meeting.

As a result of the conferences with the factory executives it is believed that several interesting announcements will be made to the trade by the big companies at an early date.

The meeting place for next year's convention was not settled at the meeting, owing to the fact that all the votes on the question had not yet been received.

Secretary Roush reported that the convention matters had all been settled and that the receipts exceeded the expenses by a small margin. He also announced that the Boston Cycle & Sundry Co., Boston, Mass., had withdrawn their resignation, which had been sent to the secretary

by mistake, and that instead of going out of business, as reported, that company were about to lease an entire building for their talking machine business. One new member had been secured since the convention, namely, the Sol Bloom Co., Inc., of Philadelphia, Pa.

TRADE IN BALTIMORE.

Local Traders Are in Optimistic Mood Over General Prospects—Hammann-Levin Removal—Eisenbrandt's New Quarters—Manager Lourie's Good Report—Victrolas and Edison Big Sellers at Cohen & Hughes—Same Conditions Prevail at Droop & Sons Co.

(Special to The Talking Machine World.)
Baltimore, Md., Aug. 5, 1910.

There is probably no more optimistic lot of people in the country just now than the local talking machine dealers. They are not jubilating over the condition of the sales and business in general at present, but they express themselves as being confident that they are going to have one of the busiest fall and winter seasons of their careers. They declare that everything points to this and they are making elaborate preparations for the onslaught of buyers. These preparations are being made in more ways than one. The dealers and their salesmen are resting on their oars, so to speak, just now—that is, they are taking well-deserved vacations in order to get in good physical shape to tackle the business. Others are laying in stock and arranging prospects, while in two cases big removal sales are being conducted by firms who have found it necessary to seek larger quarters because of their increased business. One of the new establishments will be occupied in the near future, while the other will be ready by the first of October.

Two removal sales are in progress at Hammann, Levin & Co., 419 North Howard street, and at H. R. Eisenbrandt Sons, Charles and Lexington streets. Hammann-Levin propose to move into more substantial quarters just opposite their present location, 416 North Howard street, which will be ready for occupancy about October. Eisenbrandt Sons are putting the finishing touches on their brand-new building on Howard street near Saratoga street, and will soon be located there.

Manager Albert Bowden, of the talking machine section of Sanders & Stayman, says that the month has been a very good one for July and that he expects a better August than that of last year. He reports the sale of many Victor and Columbia records to people who have taken their talking machines along for evening amusement at places in the mountains and at the seashore, where they will spend the present month. President G. Wright Nichols, of the Sanders & Stayman Co., is back from a vacation to Buena Vista and Ocean City, Md. Manager Bowden has also returned from a pleasant trip to Atlantic City.

At E. F. Droop & Sons Co. it was stated that the month has been a good one for the sale of records, while there has also been some demands for the Victrolas and Edison machines. Manager Roberts, of the local store, is spending two weeks with friends and relatives on the banks of the Hudson.

Manager Laurie, of the local store of the Co-

lumbia Phonograph Co., declares that business is going along smoothly these days, with every indication that there will be lots doing when the warm weather makes its exit. He is making preparations for the rush when it comes along. The month of July, according to Mr. Laurie, has considerable on the sales for the same month last year, while he believes that August will also show up better than a year ago.

Cohen & Hughes have had a good month with Victor Victrolas and Edisons, according to Morris Silverstein, who is now in charge of that department for the firm. He feels the same way about the fall and winter outlook as the other dealers do and is making his arrangements accordingly. He will leave in a few days for a short vacation to rest up for the fall.

ARTISTIC COLUMBIA PUBLICITY.

The Beautifully Designed and Executed Portrait of Lena Cavallieri in This Issue of The World a Splendid Example of High Class Trade Paper Advertising.

The special colored insert announcement in this issue of The World by the Columbia Phonograph Co., General, is only another example of the splendid manner in which the products of this company are presented to the trade. No expense is spared in the conception and execution of this artistic piece of work. It is in line with the handsome and costly window posters of Mme. Cavallieri and other artists used to exploit their grand opera records and given gratis to their dealers for this purpose. Of their magazine and general newspaper advertising the Columbia jobbers and dealers are also familiar, and this great campaign of publicity to create trade for their representatives will be maintained, and possibly be continued on a still more liberal basis during the approaching season.

NEW GENERAL RECORD CATALOG

Issued by the Victor Co.—Lists All Records Up to and Including July Supplement.

The Victor Talking Machine Co. have just issued their new general record catalog, the largest and doubtless the most important published by any American manufacturer. It bears date of July, 1910, and lists all records up to and including the July supplement.

A limited edition of this catalog is being apportioned among their distributors in order to carry the trade over to the next regular date of issue, in November, 1910, followed by another issue in May, 1911. That is, in future the General Record Catalog will be issued twice a year.

The company are shipping only a limited number of these catalogs to each distributor, just enough to fill in between this date and November date and the November issue. Therefore it will be necessary for all dealers to be reasonable in their requests for these catalogs and to distribute them personally to Victor owners. Distributors east of Denver will be prepared to supply their dealers with the catalogs about August 15, while western distributors will have their supply about September 1.

Mr. Dealer!

You could not sell a piano with a Tin or Veneered Wood Sounding Board!

A Talking Machine Horn is nothing more or less than a Sounding Board.

Why not show your machines at their best by equipping them with

MUSIC MASTER HORNS

which are built of solid wood on Sounding Board principles.

In September we start our Fall Campaign of National Advertising in order to help educate Talking Machine Buyers in this principle.

Are you prepared to take care of the inquiries that will come to your store?

Should your Jobber be unable to supply you, write us and we will send you a sample line of Oak, Mahogany, or Spruce, Disc or Cylinder Horns, on approval, and if you are not entirely satisfied with the merits of the MUSIC MASTER you can return them to us for credit.

SHEIP & VANDEGRIFT, Inc.

PHILADELPHIA, PA.

AN EDISON-ASTOR STORY.

One of the Many Incidents That Set Forth the Individuality of the Great Inventor So Widely Esteemed the World Over.

There are few men as much in the public eye as Thomas A. Edison, the distinguished inventor of the phonograph and a thousand other developments which have contributed so much to the progress of our Nation and of humanity. In fact it is almost impossible to take up a paper and not come across his name. The only parallel in prominence to the wizard of Menlo Park is Theodore Roosevelt, the former President of the United States—another American, who, like Edison has helped to make our country known the world over. Speaking of Edison in the newspapers, we came across the following excellent story, and it is worth reproducing for the benefit of World readers:

"Thomas A. Edison had invented and scientifically applied many mechanical devices

previous to the time he started his plant at Menlo Park, where, it was announced that, by electricity, this genius had a contrivance that would convert ore into steel without its going through the Bessemer process.

"One day Edison met Colonel John Jacob Astor. The Menlo Park establishment was losing more money than Edison was making. But the wizard still had faith. Astor asked how he was getting along. Edison made no bones about his distress.

"'You have made millions for other persons,' said the Colonel. 'Hereafter, instead of creating corporations, come to me with any scheme you may have. I'll promote it, back it; and you and I will go into partnership. I have money.'

"The two were at luncheon. They talked about business, they went into the romances of their early days, the Colonel dwelt upon the happiness of his married life, the domestic felicity that reigned in his household.

"'But,' he said, somewhat solemnly, after the coffee had been drunk and a 5-cent cigar had

been served the inventor—Edison smokes the cheapest that can be had—I am lonesome. I have nothing to do. There is nothing in Wall street. My financial affairs are in the hands of agents. I'm weary of the humdrum of life, of the lack of commercial and industrial interests that come along my way to make me forget that I am rich and independent.

"'And do you know,' he continued more earnestly than ever, 'I have an idea that I can do work with machines, with the wires, with steel, iron, the resources of the earth as well as almost anyone if I had the opportunity. Born wealthy, with nothing to do, my wife and family ashamed of me for the reason of my indolence, I have tired of everything. Let me make you a proposition:

"'I'll come over to your place and put on jeans, work with you, and I'll have you make a man of me. I believe that, with what training you may give me, I will become an inventor, famous, too, before the world knows anything about my having abandoned Fifth avenue.'

"'Glad to have you come along,' replied Edison.

"One morning Edison got a new idea. To put it on the market would cost a lot of money. He did not have it. By this time he had moved to the Oranges. Menlo Park was but a memory. Its furnace long had been cooled by the calls for money. At present—a spot of earth, famous because of its earlier recollections, is but a waste of mellow land, grown heavy in weeds, over which the October winds blow softly. The houses are few.

"Edison thought of Colonel Astor. How much would it take? Easy, easy. 'I will have it to you by noon to-morrow. And when I bring it I shall bring along also my working clothes. I am going to help along in your shop,' he continued. 'Never another loafing day for me—never.'

"It was after luncheon when an automobile drew up in front of Mr. Edison's laboratory, machine shop or whatever one may wish to call it. Mr. Edison himself hasn't any name for the wonderful place in which he spends his waking periods. But it is a great and interesting place, as any one will tell you who has seen it. Take it from this reporter that this is so.

"'Here is our money,' said Colonel Astor as he shook hands with Edison, at the same time producing a cashier's certificate for \$1,000,000. 'And there is more if needed.'

"Edison slipped the piece of paper into a pocket of his greasy coat. The wheels of the machinery where he toiled were whirring. The odor of chemicals was in the atmosphere.

"'And I have come to go to work,' continued the Colonel. 'Also let's see what I am putting this million into. Show me.'

"The working place of Edison is constructed on the order of a grain pit. There are many globular tiers. On each shelf are bottles, files, wire pieces.

"Once inside this home Edison is lost to all other surroundings, all other scenes, all other thoughts. First he gave the Colonel a seat. Then he began explaining. This piece of machinery was tested. Then another. For another hour he was enthusiastic—always talking, always touching something of metal—but, as complying with one of his axioms, never looking at things about him unless he had to do so—and never glancing at the clock.

"By and by he was finished. He turned to his visitor. Sound asleep was he, his chin buried upon his bosom, his hands listlessly hanging by his side.

"'Here, you!' exclaimed Edison, somewhat rudely. 'Take this check back and get away from here. Quick, seat!'

"'And do you know,' said Edison, telling of the incident, 'that that doggone chap had the impudence to make it known that he wished to be Governor of New York? Dear me, the nerve of some people!'

The Knights Templar have been holding high jinks in Chicago this week.

Only the Columbia dealer really knows what protection means—and he banks on it. “Exclusive Columbia selling rights” means the only man there.

Columbia Phonograph Co., Tribune Building, New York.

TRADE OUTLOOK GOOD.

Indications Point to an Excellent Volume of Trade the Coming Fall and Winter in the Talking Machine Field—This Is the Consensus of Opinion Derived from Letters Received by The World from Widely Separated Points of the United States.

Every indication points to an active and brisk business with the talking machine trade this fall. Of course, the summer, the quietest period of the year, has shown a marked improvement over the same time in 1909. In fact, a number of jobbers and dealers in every section of the ground have reported the July sales very far beyond their expectations. It is true that the firms in this category have not waited for trade to come their way without making any effort to get business. Their methods, as may be gleaned from the advice of correspondents and their own letters, represent untiring energy and resourcefulness, and their reward, in consequence, has been commensurate.

General reports regarding natural conditions grow more favorable weekly. Early in the spring statements respecting the staple crops were most encouraging. Later the weather uncertainties seemed to affect the situation unfavorably, and in some instances disastrously. A hot, dry summer has not helped matters, apparently; but recently a change for the better has occurred. Where rain was badly needed, within the last week or ten days a downfall has occurred that has been extremely beneficial. In some parts of the West and Southwest the floods have not inflicted as much damage as at first estimated; and where rain is still needed the harm to the growing crops is not so serious as yet, but an average precipitation will relieve all anxiety.

At least this brief resume of the outlook may be relied upon as reflecting the opinions of the average, conscientious business man who has been in the least observant. The manufacturers of machines, records, etc., state they have every reason to believe that the fall trade will be excellent. The leading factories have not been able to overcome the congestion in certain lines of their products, especially the high price cabinets. The demand for standard goods has been largely satisfied, and the plants have been running steadily. Just now it would be well for the dealer to remember what occurs along toward the approach of the holiday trade and see that his orders now will adequately cover deliveries when the need of goods is most urgent.

While all the prominent manufacturing concerns, as before mentioned, have been doing a strong business, the appended formal statement from the Victor Talking Machine Co., Camden, N. J., is particularly significant: “On June 30, 1910, we completed the greatest six months' business in the history of the Victor Co. The increase is most gratifying in that it is very apparent in every branch of our products. While all will concede that the great advance in the

quality of the Victor and Victor records is largely responsible for its remarkable growth, we at the same time feel and know that the magnificent co-operation of our distributors and dealers is the most important factor in the success of the Victor and we wish to thank the entire trade for their splendid enterprise and energy.”

WHAT ARISON WOULD NOT DO.

The New York Dealer Supplements Mr. Storck's Remarks Last Month but Tells What He Would Not Do if He Were a Manufacturer.

New York, Aug. 4, 1910.

Editor The Talking Machine World, New York:

Dear Sir—Permit me to supplement Mr. Storck's address to the National Convention of Jobbers, printed in your last issue under the heading, “What I Would Do If I Were a Manufacturer.” This is what I would *not* do if I were a manufacturer.

Before proceeding not to do things I would lay down as a basis the following three facts:

1. That the wonderful growth of the talking machine industry is due solely and entirely to that comparatively small number of magnificent records, the only ones capable of enthusing the listener—the “machine-selling records”; that all the other records are simply pulled along by them; that the manufacturers who have no such records to their credit are bound to dwindle down to insignificance.

2. That there are many artists who have greatness thrust upon them; some who have been great, while others owe their greatness to their good looks.

3. That the talking machine is no respecter of persons, and will not bow even before the fairest of Helens.

Keeping that in mind I would not make records by artists with great names, but only by those with great voices, and would take particular care that none but mechanically perfect records are issued.

In concerted numbers I would not pair a great tenor with a mediocre soprano or contralto. I would do my utmost to spare the music-loving public the disappointment and annoyance that such records invariably produce.

I would not permit an artist to make records of selections for which he or she is eminently unfit.

When remaking old standard records would not employ the same artists unless their voices are as good as before. When the “divine spark” is gone all the improvements in the world will not atone for it. Nor would I employ inferior singers for that purpose. There is nothing more disgusting to a musical ear than to hear a mere shouter imitate a Tamagno.

I should like to come down to facts and give you a long list of records that should have never seen the light of the day, but it would not be good policy to print it.

But I will crave the indulgence of the editor for the following:

If a Russian mayor has banished the talking machine from his city; if a certain editor called it a “public nuisance” and another “a cross between a buzz-saw and a spit-fire”; if we are so often confronted with the remark “I would not have one in the house”—it is due to such records as made by certain coon shouters.

If I were a manufacturer I would have a thoroughly musical person to supervise the output of classic records—and would thus increase their sale ten-fold.

THEO. ARISON.

MUSIC STORE FOR SALE.

FOR SALE—Music store in a California town of 60,000 population. Carry both Edison and Victor phonographs. Will sell all or part interest, as the proprietor has other interests requiring his attention. Address Box 100, care Talking Machine World, 1 Madison Ave., New York City.

BUSINESS FOR SALE.

FOR SALE—Talking machine business, carrying Edison and Victor lines, sporting goods, bicycles, hardware, musical instruments and sheet music. A good show for a hustler. Address J. R. PEVELEER, Crescent City, Cal.

RECORD RACKS WANTED

WANTED—Second Hand Record Racks to fit Victor Records. Address H. R. EISENBRANDT SONS, Charles and Lexington Streets, Baltimore, Md.

Outside Wholesale Salesmen Wanted.

We want several hustling wholesale talking machine salesmen. We job the Victor and Edison goods and several specialties and side lines. Must be men who now have a following of dealers within selling distance of New York City. Liberal and satisfactory remuneration to the right men. Box 400, care Talking Machine World, 1 Madison Ave., New York City.

BUSINESS FOR SALE.

Booths For Sale

FOR SALE—Two very fine booths, built of mahogany and plate glass, each about 7 feet 7 inches deep, 10 feet 10 inches wide and 10 feet 8 inches high. Practically sound proof, suitable for demonstrating rooms. Will sell very cheap. For particulars address “G. T. L.,” care Talking Machine World, 1 Madison avenue, New York City.

EDISON SHAVING MACHINE WANTED.

WANTED—An Edison shaving machine, latest model, with motor and blower attachment. R. D. Cortina Co., New York.

To Business Men

Business men in every line admit the value of good trade papers.

A trade paper must be original—it must contain a variety of matter including news service—technical information—in fact it must crystallize the entire news of the special business world, and be a helpful adjunct to every department of trade.

Scan the columns of The Talking Machine World closely and after you have completed an analysis of the contents of this publication see if you can duplicate its value in any other trade!

The World is a help to the talking machine business.

It exerts an healthful optimism.

It wields an influence for the good and every man who sells talking machines, no matter in what part of the universe he may be located, should receive this publication as regularly as it is issued. He is missing a vital business point if he fails to do this.

Thousands of dealers not only in the United States but in every country on earth consult the pages of the World regularly.

They draw from the World pleasure and profit.

The talking machine business has a brilliant future, and this publication is doing much to enlarge the business horizon of every retail talking machine man in the world.

To receive this paper annually costs but \$1.00. All foreign countries \$1.25.

EDWARD LYMAN BILL

1 MADISON AVENUE, NEW YORK

ST. LOUIS TRADE HAPPENINGS.

July Business Up to Expectations—Columbia Co. Personals—Vacations Now in Order—Aeolian Co. Place Victor Machines in High School's—Prove Very Popular with Both Teachers and Scholars—Some Recent Visitors—Summary of Conditions.

(Special to The Talking Machine World.)

St. Louis, Mo., Aug. 7, 1910.

The talking machine business for July has been fully as good as could be expected for the season of the year. Some houses report that their trade has been better than June and better than July in 1909.

E. B. Walthall, manager of the Columbia Phonograph Co., returned August 15 from a two weeks' vacation spent at his home in Horse Cave, Ky. Chas. Kauffman, traveler for this concern, returned recently from a two weeks' successful trip through Northern Missouri and is now on a three weeks' western trip. Chas. L. Byars, assistant manager of this concern, is spending the last two weeks in August enjoying the breezes of the Wisconsin lakes. Miss L. Best, secretary to Manager Walthall, is home from a two weeks' vacation, which was spent in Cincinnati. Miss M. Kondon, connected with this concern, is home from two weeks' vacation spent in Chicago.

The staff of the talking machine department of the Aeolian Co. are beginning to take their vacations. Miss Adelaide Goetz is spending two weeks at Moselle, Mo., and the Misses Carrie and Clara Goetz are planning to spend their two weeks at Paw Paw Lake, Mich. Miss Reid, of the accounting department, will visit some relatives in Texas, and Mr. Thompson intends to spend his vacation with relatives in Iowa.

O. A. Gressing, formerly manager of the St. Louis Talking Machine Co., has been appointed manager of the talking machine departments of the Aeolian Co., and will leave here on August 1 for a two weeks' rest at the home of his sister in Milwaukee before leaving for New York to begin active preparations for the opening of the talking machine department on the eighth floor of Aeolian Hall there.

The Aeolian Co. have placed three talking machines in three of the St. Louis high schools and have just been awarded a contract for the fourth to be delivered to the Sumner High School. The principals of these schools are more than enthusiastic over the work and the results they are deriving from the use of the Victor machine in connection with giving the scholars a better idea of music and how it is sung by the world's greatest artists. A very liberal selection of Red Seal records accompanied each machine.

Visiting dealers at the Aeolian Co. during the past month were Mr. Marks, of Marks & Weber, Edwardsville, Ill.; Peter Paul, Jr., Seckman, Mo.; J. D. Sims, Monarch, Ark.; Oscar Busch, Union, Mo.; Wm. Mosby, Newport, Ark.; L. C. Campbell, St. Louis, Mo.

Marks Silverstone, president of the Silverstone Talking Machine Co., returned July 17 from a two weeks' trip to the National Talking Machine Jobbers' convention at Atlantic City, N. J., and other points. He was accompanied by his wife. He reports that trade for July was fair.

D. K. Myers, the well-known Zonophone jobber, reports that trade for July was only fair, but he is satisfied it will gradually grow much better.

Wm. Brenner, secretary of the Koerber-Brenner Music Co., returned on July 25 from a seven weeks' prosperous trip to western points. H. G. Koerber, president of this company, left August 4 for a month's vacation, which will be spent in Wisconsin.

A. J. Robinson, manager of the Thiebes Piano Co., reports that their trade for July has been quite fair. He states that they have many good returns by following up their deals so as to make each purchaser feel thoroughly satisfied, and that this has resulted in good record sales.

A. L. Owen, manager of the talking machine department of the O. K. Houck Piano Co., Memphis, Tenn., spent ten days here this month visiting his parents and friends. He was accompanied by his wife. Mr. Owen reported business

in his territory good. The O. K. Houck Piano Co., of Memphis, are putting in five white enamel sound booths on their first floor. They are decidedly modern in every respect.

A. C. Thiebes, president of the Thiebes Piano Co., accompanied by his wife, is spending the month of August at Annisquam, Mass.

PHONOGRAPH A MUSIC TEACHER.

Novel Experiment with Pupils of Public School in Brooklyn.

A new method of teaching pupils to sing was used during the last year in Public School 147 in Brooklyn, N. Y. Miss Marie L. Bayer, the principal, hit on the idea of using a talking machine. A good machine with about a dozen standard records was bought with the income derived from the school paper and installed in the class that made the largest sale of papers.

Since the departmental system is used, this does not deprive the rest of the school from the use of the talking machine. The song under consideration is written on the black board, the music studied and then the record is played, giving the proper tone and expression. It is then repeated, the pupils softly singing, after which the phonograph is stopped and the song sung from the music on the board. Among the records are "My Old Kentucky Home," "Dixie," "Softly Now the Light of Day," "The Glow Worm," and a few operatic overtures.

The same school has another high-class instrument installed in the auditorium. At each morning assembly and at entertainments and other meetings this is played, only the best music being used. The children greatly enjoy these short hours with the great musicians, which Miss Bayer hopes cannot help but wean them from trashy ragtime music.

VISITORS AT COLUMBIA OFFICES.

Among the visitors at the Columbia Phonograph Co.'s executive offices last month were S. H. Nichols, manager of the Cincinnati (O.) branch, and E. A. Stevenson, manager of the Providence (R. I.) office. Mr. Nichols reached New York July 25, and started back again in the afternoon of the same day. Both managers said their business was ahead of last year, but it was quiet now. The Grafonola Mignon, they added, was a big hit, but the goods were coming along too slowly. The Regent was also in strong demand.

Bert Spross, the whistler, and Charles G. Spross, the pianist, both residents of Poughkeepsie, N. Y., have made a number of records for the Victor Talking Machine Co.

Thomas A. Edison is quoted as saying that he hopes to live to see the day when there will be a phonograph in every home.

IMPROVE YOUR SYSTEM AND INCREASE YOUR RECORD SALES

BY USING THE BLACKMAN CYLINDER RECORD TRAY

(Patented Dec. 28, 1909.)

A Record Tray With Record Label for Less Than One Cent

The BLACKMAN Folding Trays for Cylinder Records are shipped FLAT and can be FOLDED into STRONG TRAYS in a few seconds, as shown above. This tray, with Rapke Label, makes a handsome looking record stock and a system you can't beat. The labels act as Silent Record Saleman and the customer can point to the record he wants to hear. Adopt this system and your sales will not only increase but it will never take more than a few minutes to make up a Record order.

THE BLACKMAN FOLDING TRAY USED IN THE SYRACUSE WIRE RACKS enables you to carry a large stock in a small space, and also use the Rapke Label. We furnish wire racks at regular prices, either wall or revolving style, with opening to accommodate Blackman Trays. Write for prices.

NET PRICES TRAYS ONLY
(Subject to Change.)

THE TRADE IN "THE HUB."

Boston Dealers Talk of Forming New England Association—Previous Attempts Fail—Trade Generally Good for Midsummer—Boston Cycle & Sundry Co. Correct Report—R. C. Smith & Co. to do Exclusive Retail Business—Interesting Personalities—"Some" Ball Players—"Grand Opera Milking."

(Special to The Talking Machine World.)

Boston, Mass., August 8, 1910.

Considerable talk has been heard in local circles anent the formation of a dealers' association, to embrace the talking machine dealers of New England only. There is always considerable interest in this project following the annual convention of the jobbers, but this year there seems to be more enthusiasm than ever. Talk alone won't create anything, so it is up to some one or two hustling dealers to put it through.

Some two years ago an attempt was made to

form an association of this character and a number of dealers signified their intention of joining, but it is learned that as soon as the bill for dues was presented many dropped out, and through lack of co-operation the organization fell down. Joseph W. Foley was the attorney employed by the promoters and in discussing his attempt and failure to create the body, said: "On behalf of my clients two years ago we sent out circular letters covering the formation of talking machine dealers to be known as the New England Talking Machine Dealers' Association, and out of 200 letters 75 answers were received. A meeting was held at the Revere House, where the articles of the Association were drafted and everything seemed to be moving favorably, until we tried to collect the money for dues, when so few contributed their share that it was impossible to proceed as planned. As I remember now, the dues were nominal, about \$4 a year, although but 15 or 20 dealers out of the original 75 who said they would join sent their money in. The financial end must be a success as well as 'enthusiasm,' so the organization fell through."

Mr. Foley also remarked that he believed it is a propitious time to make another attempt, as he had witnessed from observation that the dealers are much more favorable now than ever to matters associational. Several local dealers have also added their good opinions on the foregoing subject and, no doubt, if the initiative steps were taken, followed by a liberal dose of determination, an association of New England dealers could be formed.

One would think in midsummer that the talking machine business would drop off considerably, but reports heard at nearly every quarter indicate that that "thought" is incorrect. S. J. Freeman, manager of the Victor department of the Eastern Talking Machine Co., tells the writer that the past few days have resembled days before Christmas, with the salesmen attending to the wants of two or three customers at a time. This is in the retail sphere, and while they don't expect this rush all summer, it clearly shows what one might expect for fall. In fact, everyone is very optimistic here and preparations are being made for all degrees of a rushed fall business.

A new record department is being planned by the Eastern Talking Machine Co., to be located on the second floor of their building, and it will have a capacity of over 100,000 records. This record system is being designed entirely for economy of space, plus ease and quickness of filling wholesale and retail orders, and no doubt will be the biggest and best repertoire in New England. E. F. Taft, general manager, is passing a few days in Maine shooting black "b'ars" and mosquitoes. A. W. Chamberlain, the Edison manager, is also in Maine, feeding fishes from the end of a hook. S. J. Freeman, the Victor guard, hies away next week, while S. H. Brown embarks Saturday.

Another concern to attest the midsummer rush is the Boston Cycle & Sundry Co., Charles R. Cooper, manager. This house is an exclusive Edison jobber, and the way they have put out Amberolas and other Edison products the past month buries all possible thoughts of summer quietness. Mr. Cooper says he has all he can do to fill orders and "dope" out the fall campaign, without adding the pleasant thoughts of a vacation.

Through no fault of The World, a grievous error crept into the columns of last issue, wherein the report of the membership committee says in relation to withdrawals of members: "Boston Cycle & Sundry Co., Boston, Mass., withdrew owing to their intention of going out of the jobbing business as soon as they can dispose of their stock." Charles R. Cooper, manager of this company, was present when this report was read and declares he advised the secretary that this was an error, as they had no intention of either going out of business or resigning from the association, and it was noted. Furthermore, he paid the dues at the required time, and the publishing of this report, if allowed to go by unnoticed, might do this well-known house a great deal of

harm, whereas the Boston Cycle & Sundry Co. is bigger and better than at any previous time, and expects to continue to grow.

H. A. Yerkes, manager of the wholesale department of the Columbia Phonograph Co., was a visitor here and at Portland, Me., recently.

J. W. Scott, representing the National Phonograph Co., was here several days ago.

R. C. Smith & Co., of Burlington, Vt., formerly exclusive Columbia jobbers for Vermont, are now going to devote their entire time to the promotion of retail business in the State, where they have a fine department, good stock and organization. The Vermont wholesale business will now be handled from the Boston headquarters.

Arthur Erisman, manager of the Columbia Phonograph Co.'s Boston offices and warerooms, says that since they have received the list of 100 grand opera records several weeks ago, about one-third of their record trade has been for these. This is very surprising for summer, but he says that the high quality of the records has been responsible for this tremendous demand. They have also been transacting an excellent wholesale and retail business for this season. Mr. Erisman has just received a letter from Senor Constantino, the famous opera singer, who is now at Buenos Ayres, Argentine Republic, where he is meeting with great success, as evidenced by the demonstrations given him by the public. Senor Constantino goes to Chile, thence to Paris, arriving in Boston the first of November. Mr. Erisman leaves on the 15th for Atlantic City, where he will recreate till September.

A building is being leased here by a well-known party, which will be devoted to the talking machine business, and attempts will be made to establish a historical year when they get settled at the new quarters.

Henry F. Miller & Sons Piano Co. expect to begin the expansion of their Victor department this fall by devoting considerable of their present piano space on the first floor. This, reinforced by extensive advertising, will, no doubt, make a big Victor year with them.

Another piano dealer who will push talking machines is Geo. Lincoln Parker, who removes September 1 to the Colonial building, third floor. He will fit up a talking machine department, decorated in the most artistic manner, and will boom the trade right from the start.

There are "some" ball players in the Boston trade. The first game between the Eastern Talking Machine Co. and the Columbia Phonograph Co., with a 11 to 11 score, was disputed. The second game was won by the Easterns by a 7 to 6 discussion. One or two more games, as required, will be played for the championship, and there will be plenty of red light burned by the victors.

Next time you milk a cow, play the "funygraft" and you will get a bigger pailful, and the quality will also be better. A local paper says this is true, and the writer learns that the Department of Agriculture at Washington has been experimenting likewise for several months. Why couldn't the talking men and pail manufacturers combine, having a certain sized pail for an "orchestra" milking, one for a "band" milking, another for a "grand-opera" milking, and so on. Then again, how could you tell whether the cow preferred a humorous selection or a record in Russian? Also, why wouldn't hens lay better if solaced by the talker's musical strains? Verily there is a big field ahead for the talking machine!

Vacation is king at the Oliver Ditson Co.'s warerooms. Henry Winkleman, manager, goes to Maine on the 20th. Otto Piesendel, assistant manager, is sojourning through New York and Philadelphia, while Cecil Peck, of the sales force, has just returned from his journey.

Manager Sylvester, of the C. E. Osgood Co., retail distributors of the Columbia, Edison and Victor lines, retires to the forests for two weeks at Hyannis, where he will study bugology.

Herbert L. Boyer, chief sales dispatcher of the big house of M. Steinert & Sons Co., leaves on the 15th for a jaunt through Canada, including a brief stay at Montreal.

Two aggressive dealers at Putnam, Conn., are F. G. Letters, with the complete Edison line, and Geo. E. Shaw, handling both Edison and Victor machines.

F. S. Boyd, the Iver-Johnson Co. manager, (Edison jobbers), leaves Saturday, vacation bent, for Bar Harbor, Me.

REVIEW OF SEPTEMBER RECORDS

Issued by the Victor, National, Columbia and Universal Companies

The list of records for September issued by the various companies and published elsewhere in the usual department of The World, are well worthy the consideration of dealers. The Victor Red Seal list contains a veritable "embarrassment of riches," with records by a line of notable artists, including Caruso, Alda, McCormack, Constantino, Journet, Williams, Gogorza, Mischa Elman and Maud Powell. These artists are represented by numbers which are of more than ordinary interest and merit, representing the latest and most improved recording methods in vogue in the Victor laboratory, and we predict a big demand for them. The regular list of Victor single and double records shown in the September list also contains many numbers that must compel the consideration of the public.

The National Phonograph Co.'s bulletin of Amberol and Standard records will also invite the closest consideration of discriminating purchasers. In the grand opera Amberol list such well-known names as Blanche Arral, Marie Delna, Marguerita Sylvia, Karl Jorn and Giovanni Polese give an indication of the quality and value of the numbers by which they are represented. In the regular list Victor Herbert and his orchestra have a charming number in "L'Encore," a brilliant instrumental duet by Victor Herbert for the flute and clarinet, and a Slavic march by Tschaikevsky. Marie Narelle, whose singing of Irish songs has made her famous the

world over, sings "Killarney" with her usual charm. It is a splendid record.

The latest list issued by the Universal Talking Machine Co. contains a dozen double discs of the popular vocal and instrumental hits of the day. They are up to the usual Zonophone standard and cannot fail to win general approval and consideration.

The Columbia Phonograph Co. make a splendid showing in their September list. The 10 and 12-inch Symphony departments present numbers by Bettina Freeman, mezzo-soprano, of the Boston Opera House; Giuseppe Pimazzoni, baritone, and Celestina Boninsegna. As will be seen elsewhere each artist is represented by vocal double discs of compositions of world-fame. The list throughout contains many of the leading vocal and instrumental numbers of the day—two novelties are dramatic readings of "Lasca" and "Sheridan's Ride," by Edgar L. Davenport, the well-known actor. They are listed on one double disc. Readers should not overlook the roster of Columbia two and four-minute Indestructible cylinder records.

NEW COLUMBIA DEALER.

(Special to The Talking Machine World.)

Harrisburg, Pa., August 2, 1910.

Joseph Goldsmith, a new Columbia dealer, has opened a fully equipped store here, and judging from the size of his initial order he is expecting to do a large business. His stock was supplied by the Columbia Co.'s wholesale branch in Philadelphia.

ACTIVITY WITH NATIONAL CO.

The factory of the National Phonograph Co., Orange, N. J., is busy in all its departments. There was a meeting of the executive board August 3, at which matters of importance to the trade were disposed of, questions that have been held in abeyance for several months.

General Sales Manager Dolbeer started August 6 for a vacation of three weeks. C. H.

Wilson, general manager, who has purchased a farm in New Jersey, has been spending his week-ends at the property, and therefore will probably not go to Saratoga, N. Y., in the neighborhood of which he also has a highly cultivated farm.

NEW USE FOR THE TALKER.

How Cows Are Benefited by the Use of Music from the Phonograph.

According to a dispatch from Marquette, Mich., J. M. Longyear, who has a farm at Ivy Lake, near there, has inaugurated a new "stunt" in utilizing music as a means of stimulating the quantity of milk received from his cows. During the confinement of the cows in tightly screened barns these summer days he has relieved the monotony of cud chewing and milk producing by the interspersing of a variety of selections played on the phonograph. Mr. Longyear says that the soothing effects of music judiciously administered during the milking time have been found to be especially successful with cows under official tests and several butter records claimed by his farm are credited to the influence of the phonograph.

In view of the foregoing it is now up to the local dealers to look after the farmers in their locality as good prospects.

FOR THE BENEFIT OF VICTOR DEALERS.

Late last month the Victor Co. sent out advices to their dealers, making a reduction in price on Victor record cabinets. They have taken this step in order to clean up their stock, as they say, "It is impossible for us to undertake, for the time being at least, any further manufacture or promotion of the record cabinets themselves." They also call attention of the dealers to their record exchange proposition and "second-hand license system," which provides a most convenient means of quick moving of second-hand or shop-worn machines on the dealers' hands for more than a year.

The New John M. Dean NEEDLE FACTORY AT PUTNAM, CONN.

With a capacity of two million needles a day.

We can now offer the trade an unusual Needle proposition packed under the "Puritone" trade-mark or in special "individual" envelopes. No better Needles at any price. Deliveries prompt, prices fair.

Let us send you samples and quotation on your requirements

Acknowledged the best and fastest selling needle on the market.

TIMELY TALKS ON TIMELY TOPICS

According to a report from London printed recently no record of King Edward's voice is among the many gramophone records of the voices of famous men preserved at the British Museum. Just how very important this may be it is not pretended to say. Among the other developments of the talking machine trade is that an effort has been made to record the voices of the so-called leading people of the world. Doubtless the majority of these people have poor voices for recording, and therefore those responsible for "gathering" these voices for the delectation, if not the enlightenment, of posterity, were not altogether enamored as to the practical success of such recording work.

This reminds the writer of what the manager of a recording laboratory recently observed regarding "talent" who are confident they will set the world afire on the record proposition. The gentleman in question is placed in the front rank by his compeers, and when *The World* asked about the work of certain artists, he briefly used the short and expressive word commencing with the letter R. The recorder in question is rather frank in his opinion regarding "talent," because he has probably had as many people scheduled in this class apply for a "test" as any man in the business, and therefore he is competent to pass judgment on the worst and the best. And he does, sometimes with brutal candor, but no one takes exception to his criticism. He is considered an authority, and his endorsement and approval mean a whole lot to the aspirant for record honors.

"You would be surprised to know the number of people who believe they have voices particularly adapted for making records. As a rule they are a disappointing lot, and even the so-called great artists do not come up to the mark. A woman's voice is one of the hardest to record, but nevertheless a bunch of them apply for 'tests' who are no more fitted for the ordeal—and an ordeal it is—than—well, anything you may imagine. These applicants have not got the timbre, often sing off key, and then what can you say? We give everybody a chance, thinking we will make a 'find,' but the 'finds' are rare. That is the reason why the names of popular singers appear so often. After they have learned how to pitch their voices and know what volume is required to make a really possible 'master,' why, they are hard to displace. To be perfectly frank, we need them as bad as they want the engagements."

Fortunately, litigation, which has at times disturbed the "primrose path" of the trade, is now quiescent. It is true suits are not lacking, but it may be said that the issues at stake are not of a disturbing nature, to express it mildly. For years the suits in court "raised the roof," so to speak, but as the basic cases have been about adjudicated the minor troubles relate more to the enforcement of the decrees than anything else. It would be expected, of course, that these proceedings would cause more or less friction, but in view of the vast interests involved the settlements have been arranged on a basis honorable and satisfactory to both sides. Other suits of a minor nature may be pending or even "on the calendar," but they are not of a nature to cause much uneasiness excepting when direct violations of signed contracts or agreements are involved. "Damage" suits are in the air, but the issues involved are so personal as not to bother the trade in the most remote degree.

"It is my misfortune to happen in very frequently at places where they own a talking machine," said the city salesman. "I hate talking machines, but my enforced acquaintance with them has caused me to observe one thing. It is harder for the average person to get the singing pitch from a talking machine than from any

other musical invention. Born singers may find a talking machine useful in their study of music, but the person who has hard work to carry a tune except in the most favorable circumstances will seasaw up and down the scale before he finds the home note. Just step into any roomful of people where a talking machine is spouting some popular song that sets everybody humming. The discord is painful. With a piano or orchestra or the human voice to lead them no doubt most of those merry souls could chime in without disgracing themselves, but the talking machine breeds a medley in every key and register," says a veracious writer in the *New York Sun*.

Regarding the above flippant paragraph, written in the usual self-sufficient and intolerant vein of the daily newspaper, when a little knowledge is really a dangerous thing, an expert in this line said: "That shows just about how much that fellow knows. It is true when we sell an Auxetophone or Victrola, we show the purchaser how to make the pitch for any vocalization. This is purely mechanical and has nothing whatever to do with the music. Why, the very best instructors not only employ the talking machine record for the benefit of their pupils, but they frankly acknowledge it is indispensable. A music teacher can tell a student just how to control the vocal chords, how to enunciate and all that, but when it comes to the actual singing, unless they possess a marvelous voice, they are at a loss to give the proper rendition of the music. Possessing the records, they select certain interpretations of famous compositions by celebrated artists, and instruct the embryo artist to follow and practice unremittingly along the vocal lines reproduced from the record if they wish to attain the highest and best form of expression. You would be surprised to know the number of the girl schools of this country which consider the record the most reliable and uniform standard they can follow without unconsciously adopting or unconsciously falling into a meretricious style of singing.

Now that the "big fight" is history, a chronicler of the event on the spot says: "Right here it ought to be stated, with all respect to an honorable profession, that Jack Johnson, the prize-fighter, plays a seven-foot bass viol. He has all the Southern darkey's love for music, and when he isn't sawing away on that big rough box of a musical instrument he is listening to operatic records on a reproducing machine." Fortunately, the advertising departments of the record manufacturers are not "sporty," or they would soon have the brand on the goods blazoned everywhere. However, as "music hath charms to soothe the savage breast," this precious information about the champion heavyweight is to be received with thanks.

Perhaps it is hardly believable that people live—intelligent, progressive and wide awake at that—who are so indifferent to a musical performance in a theater that they will never attend, unless as a matter of compliment to a friend or to be agreeable. An evening so passed is regarded in the light of an unmitigated bore. Well, such folk are known, and in this category may be placed Geo. H. Ely, treasurer, and one of the two chief owners of the Charles H. Fuller Co., the veteran advertising agency of Chicago. It is said of Mr. Ely—a typical Chicago man in every sense of the word for business action and activity—that if he consents to attend a theater as a social courtesy he invariably falls asleep. It does not appeal to him, though it may be the liveliest kind of music. He possesses a Victor machine, however, at his home, and has quite a library of Red Seal and other Victor records, operatic predominating. For hours of an evening Mr. Ely will play record after record, perfectly entranced, and what is more, in a spirit of quiet enthusiasm. The

music is of such an appealing nature that the business cares and complications of the day are entirely forgotten, and at the expiration of this regular session he feels completely rested and refreshed. This is only one concrete example of what benefit high-grade records have over sensitive organizations, and doubtless there are thousands of whom, if known, the same experience could be related.

The customs and habits of our Spanish-American brethren, as recited in the correspondence and actual experience of American record manufacturers seem amusing in view of the formal manner in which certain things are treated and regarded in English-speaking countries. As an example, E. N. Burns, manager of the Columbia Phonograph Co.'s export department, last month talked most interestingly about the character of Cuban music. The story should be read to be fully appreciated, especially that portion in which he tells how the Cuban arranger or composer—whether he may be called or styles himself in the realms of music—will take an operatic score as his theme, turn it into syncopated tune with results that would astonish the writer of the original work. Mr. Burns cites selections from "Cavalleria Rusticana" and "Madame Butterfly," treated a la Cubana, remarking in connection therewith: "When we have these records finished I intend sending Mascagni and Puccini a set, giving a brief description of their origination, and see what they will have to say."

O. K. Houck, of the O. K. Houck Piano Co., Memphis and Nashville, Tenn., is described by one of the attaches of the National Phonograph Co., Orange, N. J., as one of the best all around dealers in the country, not only in phonographs, etc., but pianos, musical instruments, etc. Years ago, long before his piano and music house was established, and for lack of a better opening he worked as a section hand on a Southern railroad. His aptitude for work, unflinching industry and attention to what had to be done, won him friends and promotion. Mr. Houck at the time had acquired a sound education and his rise was rapid. In his stores he has established a rule that politeness to customers—not wearying attention—shall always be followed, even if no goods are sold. If present, he finds time to say a pleasant word or two to such people when about taking their departure. The result is that nine times out of ten the prospect returns and the sale is closed. In his talking machine department every facility for demonstrating goods is provided, and from what can be learned this branch of his business turns in a neat profit steadily. As the narrator phrased it, Mr. Houck is a model for any dealer who aims to maintain a successful business.

That the Columbia Phonograph Co., General, are happy over the great vogue obtained for their double-disc records is strongly evidenced by the pleased manner and optimistic tone in which every department make their reports to General Manager Lyle. Recently George P. Metzger, the capable and versatile chief of the company's advertising and publicity department, submitted several unusually striking and effective show cards that struck the exacting fancy of Mr. Lyle as "just about right." As his chief passed his complimentary judgment, Mr. Metzger added: "The only thing now desired in the product of the company to make everybody happy is to devise some means of molding a record on the inside of the Indestructible Columbia and find a way to play it." At this point the genial general manager laughed merrily, and observed for the benefit of *The World*: "Don't forget to give Metzger credit for that great idea."

You won't meet any autos in th' straight an' narrow path.

A store full of customers does not necessarily make a successful merchant. The bank account at the end of the year is what tells the story.

If an employe is dissatisfied, either meet his complaint or let him go.

HERBERT SIMPSON MAKES GOOD.

Graduate of the Victor Publicity Department Scoring a Great Success with Distinguished Manufacturing Houses in New York City.

Perhaps no greater tribute can be paid to the growth of the Victor Talking Machine Co. than to call attention to some of the young men who have received their business training with that wonderful organization, and have since "made good" in responsible positions—some with the Victor Co. itself, some with Victor distributors and others with companies outside of the talking machine business.

A striking example is Herbert Simpson, who resigned his position as assistant advertis-

HERBERT SIMPSON.

ing manager of the Victor Talking Machine Co. last February, to take charge of the advertising of several piano manufacturers in New York City, among whom is Kohler & Campbell, one of the largest and most progressive piano manufacturers in the trade.

Mr. Simpson was with the Victor Co. for four years, going to Camden, after working for a number of years in the office of a New York advertising agency, where he became acquainted with H. C. Brown, the advertising manager of the Victor Co., who later secured him for his assistant.

ANENT REPAIR PARTS AND SUPPLIES.

The Talking Machine Supply Co., 400 Fifth avenue, New York, have just issued a very complete and comprehensive jobbers' "Price List for Repair Parts and Supplies for Use in Talking Machines," for the season 1910-1911. The parts and general line of supplies, essentials and requisites are adaptable for all makes of machines, etc., to which especial attention is directed. This price list is useful for reference, the information furnished being practical and useful.

The needle sample book that the Talking Machine Supply Co. distributed last month at Atlantic City, N. J., as a "Souvenir of the Convention," displays fourteen different models in a neat and compact form. The book is substantially bound in cloth and is in such form that a jobber will retain it, not only for its handsome appearance, but from a utilitarian point of view. Max Landay, in distributing the souvenir with his compliments, was also complimented in return on his clever idea. Jobbers not present on the occasion and desiring the souvenir will be promptly supplied on application to the company.

PIANO MEN HANDLING TALKERS.

Those Piano Dealers Who Have Put Aside Prejudice and Conservatism Have Found That Talking Machines Fit Well Into the Piano Store—New Hornless Machines Compare Most Favorably with Pianos—Dealers Who Have Taken on the Columbia Line and Are Glad of It—Grand Opera Records the Favorites with the Purchasing Public.

The talking machine manufacturers have been presenting vigorous arguments to the piano trade to induce them to set aside prejudice and conservatism and catch on to the growing feature of the music business. The advent of the hornless machines—models of appropriate design, beautiful workmanship and high sound-reproducing attainments—undoubtedly ranks the line with any musical instruments extant, and what is more they are absolutely unique in that they embrace the whole field of music, trespassing on no division or class. Owing to the apparent reluctance of many piano men to recognize the talking machine line, it is interesting to have the experience of those piano men who have handled the goods.

Gotfried & McMillan, of Joplin, one of the important towns in Missouri, never handled talking machines until they were attracted to the Columbia line. They took the stand that a piano house could not afford to "monkey" with talking machines, but they have quite revised their opinions as evidenced by the following letter to the Columbia Phonograph Co.: "We take pleasure in expressing to you the satisfaction which the Columbia line has given our trade, especially the Grafonolas and the grand opera records. Architecturally, the Grafonola is beautiful and the tone quality is all that could be desired. It jumped into popularity at once and has grown into the good graces of the people right along, until to-day it is an indispensable factor in our business."

The Martin-Adams Music Co., of Wichita, Kan., writes as follows to the Columbia Phonograph Co., General, whose product they make a very strong feature of: "We have received the new grand opera records and wish to say that we are very much impressed with the sextet from 'Lucia' and the 'Rigoletto' quartet; we do not think they could be improved upon. We might further state that we are well pleased with the new Grafonolas; they are very attractive in appearance and the quality of tone is fine. We are doing a very fine business in your entire line of goods at this time and expect to increase it very much this fall, at which time we will do some advertising and pushing."

The sextet and quartet grand opera records referred to have been recorded by celebrated artists performing during the recent season at the Boston Opera House. The sextet from "Lucia," the most celebrated number in all opera, is sung by Constantino, Bronskaja, Freeman, Blanchart, Mardones and Cilla. The almost equally celebrated quartet from "Rigoletto" is sung by Constantino, Bronskaja, Freeman and Blanchart. The Columbia Phonograph Co. have been most fortunate in making such a fine recording which should be appreciated by all lovers of opera.

A renewal of trade activity is looked for early in September.

TWO MILLION NEEDLES A DAY!

That Is the Capacity of the New Talking Machine Needle Plant of John M. Dean, Who Has Recently Opened Up in Putnam, Conn.—A Description of This Admirably Equipped Establishment—Was Formerly Located in Lowell, Mass.—Is Worth Careful Reading.

(Special to The Talking Machine World.)

Putnam, Conn., Aug. 4, 1910.

With a capacity of 2,000,000 talking machine needles a day, John M. Dean recently started his new factory in this city. Mr. Dean is a well-known factor in the talking machine world, being for many years at Lowell, Mass., where he started with the industry in the manufacture of needles. Beginning in a small way, he has grown with the rapid increase of the trade, and with the new factory just opened, undoubtedly stands pre-eminent in his sphere. His constant aim is not to see "how many" needles can be produced, but to see "how good" they can be made, as experience has taught him that the trade would rather pay a little increase and secure a better article, if they had to pay more, but there is one particular accomplishment that Mr. Dean prides himself on, namely, to furnish the highest grade needle at exactly the same cost.

It has taken great study and experimenting to perfect an organization to manufacture this class of needle, but that the object has been worthy of attainment is best cited by glancing through his order book, when the names of the biggest and best jobbers in the world are seen frequently.

Now that Mr. Dean has outgrown the Lowell plant and doubled the output, with modernized methods, he is in an exceptional position to furnish needles, either under the famous "Puritone" trade-mark or in envelopes printed to order, packed in any way desired. All the extra envelope printing is done gratis and he invites the trade to send for samples, and a quotation on requirements will prove undoubtedly profitable to the purchaser.

The factory is built of brick, with concrete floors, the main building being 100 x 50 feet and of two stories height. The annex is 50 x 60 feet. It's a "daylight" factory, as every corner is as light as by a window. On the first floor of the main building are the wire storehouse, the various machines for "working" the wire, automatic hardening machines and other machinery. The automatic hardening machines are of special construction, designed to harden the various types of needles to the proper degree. This insures the perfection of the most difficult portion of needle production, guaranteeing that each needle will be absolutely O. K.

On the power end is a 125-horsepower gas-making plant, a 100-horsepower four-cylinder (vertical) engine (tested to 200 horsepower), heating plant, and other minor machinery. Gas is the best fuel for hardening, as every needle can receive an even amount of heat.

On the top floor is the polishing apparatus, the standard method which has been tried and found true for 75 years; envelope department, counting force, stock room and shipping department. The smallest needle they make is 10-1000-inch in diameter, $\frac{3}{8}$ inch long, and they run from this in quarter and half sizes to $\frac{1}{4}$ inch diameter and 10 inches long.

Sixteen different styles of talking machine needles are made, all tones, and in the "Puritone" list are the following seven styles: Loud Tone, Opera, Exhibition, Symphony, Ideal, Soft Tone and Spearpoint.

Putnam is a railroad center, transferring freight for 126 New England stations, and is on the main line to New York and Boston. Consequently shipping facilities are on par with the "quality" needle output of the new Dean factory.

L. C. Zigler, for about eight years connected with the retail department of the Columbia Co., resigned recently and has gone into the talking machine business for himself in New York.

TO CONTINUE AS JOBBERS.

Reference to Boston Cycle & Sundry Co. in Membership Committee Report Not True.

(Special to The Talking Machine World.)

Boston, Mass., August 10, 1910.

The Boston Cycle & Sundry Co. have no intention of going out of business, nor did they resign from the Jobbers' Association, as given out in a report appearing in the July number. Furthermore, the dues of this house are fully paid, and Charles R. Cooper, manager of this department, who was present at the convention and tried to have this false report corrected, says extra efforts will be made in the promotion of Edison business to make a banner year. While it is through no fault of The World, the item appeared in the official convention report, we trust this correction allays all possible harm that might accrue from that report.

Nothing grows faster than the habit of depending on others.

THE GRAFONOLA "REGENT" IN CLUBLAND.

On entering their new home early in July, the Acacia Club, Williamsport, Pa., installed a Columbia Grafonola "Regent." The accompanying illustration shows the "Regent" in its new surroundings. Every little while brings fresh acknowledgments of the Columbia Grafonola as a perfect musical entertainer. In a letter to F. G. Sweet, the Columbia dealer for Williamsport, from John G. Hess, secretary of the Acacia Club, expressing the club's appreciation, he said: "We are well pleased with the 'Regent' Grafonola pur-

chased for this club. This instrument was selected for the volume and purity of tone and its artistic design. It has proved a very popular and valuable acquisition to our furnishings, and appears to be peculiarly adapted for club use."

Thos. K. Henderson, manager of the Columbia Phonograph Co.'s Philadelphia store, initiated this sale and while in Williamsport disposed of a Columbia Grafonola "Mignon" to a prominent local church. He is certainly making some big sales these days.

CINCINNATI'S BUDGET OF NEWS.

Preparing for Fall—Aeolian Co. Formally Open Victor Department—Milner Musical Co. Praise Edison Offer—Other Items of General Interest Worthy of Recording.

(Special to The Talking Machine World.)

Cincinnati, O., Aug. 3, 1910.

Talking machine men in this city are now devoting their energies to preparing for the fall campaign. There has been but very little business transacted locally during the past month, the weather and the vacationists being responsible for the slump.

The Aeolian Co. formally opened their Victor Talking Machine department this morning. It occupies one of the large rooms formerly used as a piano salesroom. Three soundproof record booths are in place and these have been equipped with small electric fans. These booths are of white enamel, with mahogany doors. The firm also have a demonstrating room for the Victor Victrola. Harry Meeks, who is associated with the sales force, is to sell Victrolas exclusively. L. H. Abaus, who has had some experience in the talking machine line, having formerly been connected with the Rudolph Wurlitzer Co., will have full charge of this department. They have sold three Victrolas this week, and from the present outlook expect to do a nice summer business.

F. Laake, in charge of the wholesale stock, joined the ranks of the married employes of the Rudolph Wurlitzer Co. in the latter part of June, and was presented with a substantial token of the esteem in which the other employes hold him. He has been busy receiving the congratulations sent him by his numerous talking machine friends.

The Milner Musical Co. regards the Edison offer as being quite a boon to owners of machines of this type to acquire six amberol records for the sale of a machine to a customer. Manager Timmerman believes it should help the dealer considerably in selling machines, particularly if worked properly, and efforts made to seriously interest the newly acquired agencies. "The virtue of the entire plan," he continued, "is to place the opportunity in front of your record buyers, show them they won't have to buy records for the time being. Next fall should be the proper time to work the Edison plan for all that there is in it."

John Arnold, of Elm street, has sent in his order for Edison records and is anxiously awaiting his first shipment. He is somewhat delighted over the idea and believes it is a step in the right direction. The summer season has put a damper upon his machine business, but Arnold is looking forward to the fall campaign, sanguine in the belief that there will be a general revival.

J. E. Poorman, Jr., the Main street dealer, is waiting for the sun to become somewhat obscured so that the people will be willing to listen to free concerts without continually mopping their brows.

Before the end of another month the Lyric Piano Co. will have their new department for Victor machines and records in operation. Manager W. H. Stever has already dedicated it "The Talking Machine shop."

G. T. Williams, manager of the New York Talking Machine Co., 83 Chambers street, reports business as good, despite the torrid weather. They had visits from a number of jobbers en route home from the Atlantic City convention.

CAMPBELL WITH DORAN CO.

The New Doran Phonograph Co. Preparing for a Big Campaign—Will Have Handsome Quarters, When Completed, in Detroit.

(Special to The Talking Machine World.)

Detroit, Mich., Aug. 3, 1910.

The new Doran Phonograph Co., who bought out the Mazer Phonograph Co. a few weeks ago, are certainly making things hustle. This week Bruce Campbell, who has been manager of the local branch of the American Phonograph Co. for the past four years, and for six years previous to that manager of the phonograph department in Grinnell Bros.' branch store at Saginaw, Mich., has resigned his position and accepted a position with the Doran Phonograph Co.

The store occupied by the Doran Phonograph Co. is being remodeled, and when it is finished will be one of the handsomest in this section.

T. H. Towell, manager of the United States Phonograph Co., of Cleveland, and F. L. Fritchley, of the same company, were in Detroit last week.

WHERE THEY ARE SUMMERING.

The vacation schedule is in good working order with the office force of the New York Talking Machine Co., 83 Chambers street, New York. V. W. Moody, sales manager, has now returned, and G. T. Williams, general manager, goes to the mountains of North Carolina for hunting and along the reaches of the French Broad for fishing about the middle of August. He will remain in that delightful region of the country for several weeks. Mr. Williams' wife and son are now in the Tar Heel State.

S. B. Davega, president of the S. B. Davega Co., New York, is summering with his family at Patchogue, L. I., N. Y., and will not return until after Labor Day. Lippman Kaiser, director of the talking machine department, who has been bungalow among the lakes of Maine with Mrs. Kaiser since June 15, was "on deck" again August 1.

August 13 George G. Blackman, secretary and treasurer of the Blackman Talking Machine Co., 97 Chambers street, New York, and chief of the traveling staff, leaves for a fortnight's rest and recreation with Mrs. Blackman. R. B. Caldwell, vice-president and sales manager, will go away on a similar errand the last two weeks in August. The June business of the company was away ahead of last year, and July shows an equally good record.

George P. Metzger, manager of the Columbia advertising department, went on a vacation of several weeks August 1. Edward Cotton, his assistant, reported for duty on the same day, having enjoyed his period of rustication.

The Sapphire Record and Talking Machine Co., 30 Church street, New York, have been incorporated at Albany for the purpose of manufacturing and dealing in talking machines, records and supplies. Capital, \$100,000.

97 CHAMBERS STREET

NEW YORK CITY

VICTOR CO. DISCUSS DOUBLE DISC.

Still Hold to Their Original Conclusions on This Subject—Present a Resume of the Double-Faced Disc Situation to Date.

(Special to The Talking Machine World.)

Philadelphia, Pa., August 6, 1910.

Monday of last week the Victor Talking Machine Co., Camden, N. J., through General Manager Geissler, issued a special circular letter to the trade, entitled "Resume of Double-Faced Record Situation Since Its Foundation," in which they reiterate their former position as follows:

"After twenty-four months of experience with the question of double-sided records, the Victor Co. are proud to say that, despite all of the confusion and misleading advertising which has been indulged in during this period, their original conclusions on this very complicated question were substantially correct. (See circular of September 17, 1908.) The double-sided record has failed to revolutionize our business. This form of record is very good. It is very useful, in so far as it enables the purchaser to secure the desired number of selections for less money. Unfortunately, it greatly handicaps the matter of securing a certain list of selections.

"If a specific number of special selections are required, it is sure to be necessary for the purchaser to buy more records than are required in order to secure those which he desires if they are selected entirely from a double-faced list. This condition of affairs cannot be allowed to exist, and is incompatible with first-class business method that does not fully cover the requirements of the discriminating and appreciative portion of their trade. Our trade is very largely composed of such customers. This is why we lean to quality, even though it does cost a little more money. We fully appreciate that there are always certain customers who demand bargains. We fully appreciate that there are certain selections that will always sell double-sided, but we have demonstrated beyond a possible doubt that there are other selections that sell better, and very much better as single-sided. Therefore, the much-discussed question of whether it should be all singles or all doubles is not a question at all.

"The partisans on either side are both wrong. It is not a question of whether it shall be all singles or whether it shall be all doubles, but a question of how many singles and how many doubles and how many shall be both ways. It is a matter of circumstances and the opinion of the customer. No good salesman cares to argue with his customers. He prefers to sell the customer what he wants; therefore, let the question of double-sided vs. single-sided records disappear. The fact is, the customer wants both. Accept this proper solution and save time and worry. Devote your energy to the proper proportion of stock.

"Some time ago the Victor Co. issued fifty records double-sided and allowed the same selections to remain in the catalog as single-sided records. The sales increased materially under the double-sided list and they also increased under the single-sided list. This is proof without further discussion, and we have decided from time to time to double side certain portions of our catalog which are now in singles, and we will also probably issue as singles certain portions of our catalog which are now in doubles. At first thought, it may strike the trade that this will have the effect of increasing the stock outstanding. It will not have that effect, however, if the trade studies carefully the requirements of the customer. At any rate, this is the only method by which the question can be finally adjusted. It is entirely a matter of proportion, and will take experience to arrive at that proportion. Our cut-out lists, which will now occur twice a year, will fully cover the matter of dead stock, because all the non-sellers will be taken back and exchanged for ready sellers."

No one has placed a limit on your possibilities.

COPYRIGHT CASES IN MEXICO.

Paul H. Cromelin, Vice-President of the Columbia Phonograph Co. Has Some Interesting Information on the Subject to Vouchsafe Upon Returning from Lengthy Trip—Some of the Questions at Issue—Mr. Cromelin Leaves No Stone Unturned to Ensure Victory for His Side.

After a month's absence, Paul H. Cromelin, vice-president of the Columbia Phonograph Co., General, returned to New York, and on Monday last he had this to say to The World regarding his trip:

"Copyright cases have been before the Mexican courts for several years, and it was understood that in one case, in which the Victor Talking Machine Co. was concerned, the matter had been definitely settled; that is to say, the case in question had gone to the Court of Cassation, which is equivalent to the supreme or court of last resort in any of our States. Their decision was favorable to the contention of the Mexican composers and against the American manufacturers of records. The Supreme Court of the Nation, as the highest tribunal is called, to which the case has been appealed, has now the matter under advisement. In the meantime, I took up the matter with the American Ambassador, requesting him to make a representation in protest, so far as our case is concerned.

"The question at issue in the Mexican courts has been decided diametrically opposite to what the French courts held; that is, the decision in France was in effect that the use of copyright music by record manufacturers was not in violation of the law; but when the words of a song, for example, were taken with the music, then, unless permission was given, a case of infringement was made out. The existing Mexican copyright law was passed in 1807, and, of course, the reproduction of music automatically, especially through talking machine records, was not dreamed of at that time.

"The case at issue closely follows the lines of the White-Smith Music Publishing Co. against the Apollo Co., in which, as you remember, the old copyright law was sustained as against the contention of the manufacturers of perforated music rolls. This decision led to the enactment of our present law. And, by the way, the Columbia Co. have paid out thousands of dollars to owners of copyright under this act."

FRANK L. DYER'S VACATION.

Spending August with His Family on the Beautiful St. Lawrence.

President Frank L. Dyer, of the National Phonograph Co. returned on Thursday from a week's visit with his family at Gananoque, Ontario, on the St. Lawrence, where he has taken a cottage for the month of August. He will leave again about the 19th to spend the balance of the month there. The surpassing scenery of the Thousand Islands has made of Mr. Dyer an enthusiastic devotee of motor-boating, which pastime will form his principal diversion during his well deserved vacation.

GEO. W. LYLE OPTIMISTIC

About the Outlook for the Fall as It Affects Their Business—Will Take a Trip to the Coast About the Middle of August.

Though in the dead of summer, when business in all lines languishes, the drift of talk in the trade is very optimistic for the fall. No one speaks more emphatically on this point than Geo. W. Lyle, general manager of the Columbia Phonograph Co., General, who said: "Business never looked better for our company than now, and the fall promises to be a record breaker. I will not go to Europe this summer, but about the middle of August will take a trip to the coast for five or six weeks."

THE SUCCESSFUL WINDOW TRIMMER.

Should of Necessity Be Endowed with Several Most Desirable Faculties if He Is to Obtain Results in His Chosen Calling—How the Different Faculties Are Practically Applied—Advancement in the Art Is Steady—An Interesting Article by an Expert.

"Speaking from a psychological point of view the successful window trimmer of to-day should be endowed with the following faculties, well developed, viz.: Imagination, Inspiration, originality, color, balance, constructiveness, individuality and patience, says John E. Hardy in *The Hardware Dealers' Magazine*.

"Imagination enables him to picture in his mind the work he wishes to do, without putting his thoughts on paper. Some trimmers recommend that a plan of the display be developed before placing the exhibit in the window. With imagination well organized it is unnecessary for him to do this, but instead he will picture in his mind's eye the general plan of his exhibit, and this is sufficient for the start.

"Inspiration enables him, after that start has been made, to place the various articles to be used in the exhibit where they will show to the best possible advantage. All this comes to the trimmer, as he builds up his display just as new ideas come to the mind of the artist as he paints his picture.

"Through originality the trimmer makes a display that is distinctive in design and style and that does not show the earmarks of imitation.

"Patience, and lots of it, enables the trimmer to carry to a successful conclusion many a tedious piece of work, that he would otherwise leave out of the display. Patience without doubt is one of the greatest assets a trimmer can possess.

"Balance concerns the placing of articles used in a display so that the exhibit will not appear to be one-sided, or top-heavy at any particular point. A well-balanced display is absolutely necessary at all times. A proper interpretation might be, 'A place for everything and everything in its place.'

"The day is not far distant when the window trimmer, as he is now termed, must be something more than a mere trimmer. He must add the qualifications of a decorator. A color scheme of draping the bare walls of a window with either cloth or paper will tend to bring out the beauty of an exhibit and make it more attractive to the general public, than the old style of trimming. Harmony in color is another valuable asset to possess.

"Show windows that have a solid background have a decided advantage over any other style of window, for it is the foundation on which is built the successful and up-to-date window display. Fully two-thirds of the time occupied in putting in an up-to-date display should be spent on background work, so it may be attractive and magnetic enough to stop the passerby and make him feel that he wishes to gain by closer inspection what he cannot obtain by a casual

glance. Pains-taking care must be exercised in placing articles in the background exhibit, for any discrepancies are more noticeable here than in any other part of the display. 'What's worth doing at all, is worth doing well' applies particularly so in this instance.

"Do not try to see how many articles you can crowd in a display, but instead place everything so that it may be thoroughly inspected by the beholder.

"Lighting is another matter of importance. An over-lighted window is as bad as a window without sufficient light. Use frosted globes where a quantity of electric lights are to be used; and where they meet the eye directly, see that they are of low candle-power. There are other artifices used to tone down a window display, and to give it that soft or mellow appearance which adds greatly to its general attractiveness.

"It should be the earnest endeavor of every window trimmer or decorator to increase the advertising value of his displays by making them of a superior quality. The possibilities along these lines are limitless. It is possible that he may be handicapped on account of expense, but the earliest moment that he can show his employer that he is getting value received, so much sooner will the handicap be removed. It is exceedingly hard at times to judge whether any particular display is paying its way or not. This may be gauged somewhat by the increased sales throughout the year, but even this is hardly a fair judgment, for though windows may draw the business into the store, it rests largely with the salesman on the floor whether it is taken care of, and whether a sale is made.

"Picture displays possess an advertising value not found in any other style of trimming and the impression on the observer is more lasting.

"Not every one can trim and decorate a window without some practice; nevertheless it should be the ambition of every window trimmer or decorator to master his art. It is never too late to make a start. If you have any inclination for such work start at once."

THE KNIGHTS TEMPLAR CONVENTION.

Chicago Music Houses Join with Others in Decorating Their Stores for the Gala Event—A Number of Piano Dealers Expected.

(Special to *The Talking Machine World*.)

Chicago, Ill., Aug. 8, 1910.

It is estimated that over one hundred thousand people from all parts of the country will be in Chicago the coming week, attracted by the festivities attendant upon the triennial conclave of the Knights Templar. The city is gorgeously decorated for the occasion, triumphal arches have been erected, and the Templar Way on State street, consisting of massive pillars at short intervals on either side of the street supporting strings of green electric globes, is bewitchingly beautiful. All the leading music and talking ma-

chine stores have decorated lavishly and made special displays for the event. While it cannot be said that a great amount of business is expected from the visitors, yet everyone has specially arranged to get any business that may offer. A number of dealers are expected with the Knights.

VICTROLAS IN VERNIS MARTIN.

An Illustration of an Instrument Made in This Finish to Meet the Demand for Art Rooms—Victrolas of Great Attractiveness.

In the Vernis Martin Victrolas, made on special order only by the Victor Talking Machine Co., Camden, N. J., and selling for \$400, the entire groundwork of the cabinet is finished in pure gold, highly decorated with hand-painted allegorical or classical figures and finished with

AN ARTISTIC VICTROLA STYLE.

transparent oriental lacquer. Vernis Martin represents the highest art form of French cabinet decoration, and had its inception during the reign of Louis XV. The Victrola XVI in this style of finish is a worthy example of this high-art class of cabinet manufacture and decorations.

V. W. Moody, head of the sales department of the New York Talking Machine Co., left town July 16 to enjoy two weeks' vacation at Great South Bay, L. I., boating and fishing. He has boasted of his prowess with the rod and reel, and naturally his co-workers have not been surprised at his splendid showing in the Waltonian domain.

A DISTINGUISHED CUSTOMER

Of Landay Bros. is Mrs. Frances Folsom Cleveland, Wife of the Late President of the United States—Naturally Feel Proud of Having People of Such Eminence on Their Books.

As an indication of the class of people who call at the well-appointed establishment of Landay Bros., 400 Fifth avenue, New York, and place orders, the accompanying check and envelope, reproduced in miniature fac-simile, from Mrs. Frances Folsom Cleveland, widow of the late Grover Cleveland, former President of the United States is indisputable evidence. The envelope postmark, through the error of the engraver, was lost in the process of reproduction;

feet distant, and we could hear and understand every word the mechanical voice uttered. The night was perfectly still and no breeze stirred. I have asked Professor Gaille for his permission to have this published in one of your magazines and he said that he would be more than pleased to do so, and asked us to have a copy of the magazine or pamphlet sent to his residence, 753 Madison avenue, New York City. I would have sent you this little item before but have been so busy that I must admit I have overlooked it."—The New Phonogram.

THOS. GRAF ARRIVES FROM LONDON.

Thomas Graf, manager of the European offices of the National Phonograph Co., was a passenger

OUR FOREIGN CUSTOMERS.

Amount and Value of Talking Machines Shipped Abroad from the Port of New York.

(Special to The Talking Machine World.)
Washington, D. C., Aug. 10, 1910.

Manufacturers and dealers in talking machines will doubtless be interested in the figures showing the exports of talking machines for the past four weeks from the port of New York:

JULY 18.
Berlin, 33 pkgs., \$1,252; Bremen, 2 pkgs., \$200; Carenta, 5 pkgs., \$408; Colon, 19 pkgs., \$172; Hamburg, 13 pkgs., \$303; Havana, 3 pkgs., \$289; Iquique, 8 pkgs., \$329; Liverpool, 2 pkgs., \$100; London, 78 pkgs., \$1,693; Moscow, 1 pkg., \$250; Para, 26 pkgs., \$1,641; Porto Plata, 12 pkgs., \$541; Vera Cruz, 127 pkgs., \$2,166; Wellington, 455 pkgs., \$2,734; Yokohama, 40 pkgs., \$2,285.

JULY 25.
Bremen, 1 pkg., \$100; Buenos Ayres, 44 pkgs., \$1,376; Colon, 12 pkgs., \$213; Havre, 19 pkgs., \$2,168; Liverpool, 1 pkg., \$100; London, 6 pkgs., \$125; Manilla, 7 pkgs., \$465; Manzanillo, 3 pkgs., \$264; Milan, 8 pkgs., \$224; Para, 30 pkgs., \$2,583; Rosario, 32 pkgs., \$968; Stockholm, 12 pkgs., \$725; Trinidad, 12 pkgs., \$278; Vienna, 4 pkgs., \$198.

AUGUST 1.
Berlin, 3 pkgs., \$152; Colon, 5 pkgs., \$142; Dublin, 2 pkgs., \$400; Havana, 8 pkgs., \$4,457; Kingston, 3 pkgs., \$112; London, 4 pkgs., \$7,226; Milan, 6 pkgs., \$184; Nassau, 2 pkgs., \$158; Port Barrios, 2 pkgs., \$134; Santos, 13 pkgs., \$1,338; Savanilla, 7 pkgs., \$270; Sydney, 6 pkgs., \$720; Vera Cruz, 177 pkgs., \$7,226.

AUGUST 8.
Algoa Bay, 4 pkgs., \$172; Cartagena, 5 pkgs., \$625; Curacao, 135 pkgs., \$318; Georgetown, 3 pkgs., \$370; Havana, 15 pkgs., \$1,885; Havre, 1 pkg., \$200; Kobe, 3 pkgs., \$249; Lima, 5 pkgs., \$850; London, 113 pkgs., \$3,494; Manilla, 52 pkgs., \$3,271; Moscow, 8 pkgs., \$225; Nipe, 2 pkgs., \$132; Para, 6 pkgs., \$249; Rio de Janeiro, 9 pkgs., \$556; Shanghai, 7 pkgs., \$236; Singapore, 4 pkgs., \$165; Trinidad, 12 pkgs., \$682; Valparaiso, 11 pkgs., \$436; Vera Cruz, 187 pkgs., \$749.

THOS. TAGGART BUYS A COLUMBIA.

(Special to The Talking Machine World.)
Indianapolis, Ind., Aug. 8, 1910.

Thomas Taggart, former chairman of the National Democratic committee and a power in Indiana politics, was one of those who bought a talking machine for his summer home at the Indianapolis store of the Columbia Co. and had it shipped to Cape Cod, Mass. Mr. Taggart is partial to talking machine music, and his family, which consists of one son and several daughters, is with him on the question. Mr. Taggart is said to prefer catchy songs and light opera pieces.

"BLUE LABEL" COLUMBIA RECORDS.

A new series, which will be known as "Blue Label" records, has been created by the Columbia Phonograph Co., General, New York. The first lot of three 10-inch and one 12-inch records goes out with the October list.

The Redewell Music Co., of Phoenix, Arizona, suffered a severe loss from fire last week, losing the contents of their piano and player departments, amounting to a loss of over \$25,000.

The moving picture business in Indianapolis during the last month has moved along without molestation by the city authorities and others, except that the Rev. E. T. Greenleaf, an Indianapolis minister, has declared that he will investigate the moving picture business. He believes children should not be permitted to see pictures of murders, robberies and pocketpicking, and men luring other men's wives away from their homes, and declares that he will attempt to get the aid of Mayor Shank in putting an end to such business.

MRS. CLEVELAND'S CHECK.

otherwise the writing is complete as showing the well-known hand of the highly esteemed lady, who, during the administration of her distinguished husband, presided so graciously in the White House as the "first lady in the land."

on the Graf Waldersee, which docked on the 12th inst. Mr. Graf is here for a brief visit to the factory on business matters.

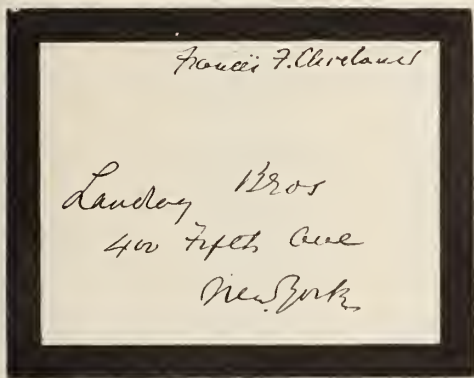

McCHESNEY'S SUMMER STORY.

L. C. McChesney, manager of advertising for the National Phonograph Co., returned on Saturday with his family from a two weeks vacation spent at Eagle Lake in the Adirondacks. As an illustration of the extent to which the high cost of living has affected temporary residents of the North Woods, Mr. McChesney informs us that one lonely little pound-and-a-half bass, caught under his observation, cost the lucky (?) fisherman \$4.00—\$2.66 per pound. The suspicion that Mr. McChesney might be the fisherman in question is groundless, for those who are aware of the gentleman's prowess in the field of Isaak Walton know that he would scorn to even land such small fry.

IMPORTANT NATIONAL CO. NEWS.

Before going on his vacation recently, F. K. Dolbeer, sales manager of the National Phonograph Co., Orange, N. J., advised The World as follows: "Under date of July 15 we issued a sales department bulletin, notifying the trade that on or about August 1 we would be prepared to supply the trade with a Music Master Wooden Cygnet Horn, one size only, either as an extra or as a part of the regular machine equipment in oak, mahogany, spruce or inlaid pearl; and in this connection would state that the replies from the trade are very satisfactory, and the orders are coming in so strong that it is quite likely that we will have to very materially increase the manufacturing order at a very early date. This style of equipment for our regular type machines ought to prove very satisfactory to the trade, and we believe will give excellent results.

"On August 6 we sent to the trade an announcement calling their attention to Amberol record No. 35,007, that will appear in our October list, which is the first of a series of four made by Mme. Sarah Bernhardt, the famous French artist. They have been obtained under a considerable expense, which gives us exclusive rights to her services for making records. The three additional numbers will appear in November and December, 1910, and January, 1911, monthly lists. For several years the various companies have been endeavoring to obtain the services of Mme. Bernhardt without success, and we are quite sure that these records will take very well."

ENVELOPE IN WHICH CHECK CAME.

Landay Bros. are very proud of the check, even if it stands for only a small amount, and therefore The World is pleased to thus show it to the trade at large.

A VACATION EXPERIENCE.

The following incident, which was related by R. P. Bird, of the New York office of the Atchison, Topeka & Santa Fe Railway System, as having occurred during his vacation spent in Jeffersonville, Sullivan County, N. Y., last year, furnishes incontrovertible proof of the extraordinary strength and clarity of tone projection of the Edison phonograph, and is, moreover, a distinct tribute to the perfect enunciation of its records. It is understood, of course, that the natural acoustics of the place were responsible for the machine being heard at so very great a distance, but if the phonograph itself were not mechanically perfect and the records of superior quality in every essential of recording and reproduction it stands to reason that at the distance it would have been impossible to distinguish a single word that might have been uttered. We quote Mr. Bird's own statement:

"A party of us were sitting on the piazza of the Jeffersonia one evening and were very pleasantly entertained by the music of an Edison phonograph which was being played at the summer residence of Prof. August Gaille. Professor Gaille's residence lies diagonally across a deep valley from the Jeffersonia, approximately 3,000

FROM OUR CHICAGO HEADQUARTERS

ROOM 806, NO. 156 WABASH AVENUE, E. P. VAN HARLINGEN, MANAGER.

Passing of the Trade's Dullest Month—August Has Opened Up Most Satisfactorily—Crop Conditions Make Splendid Showing as Compared with a Month Ago and Jobbers Are Well Satisfied with the Outlook in the West—B. & H. Fibre Mfg. Co. Enlarge Plant—McMurtry Takes Charge of Columbia Store in Kansas City—Samuel Levin Inventor of Permanent Disc Needle—Distinguished Members of the Trade on Vacation—Interesting Budget of News Gleaned from All Points That Will Interest.

(Special to The Talking Machine World.)

Chicago, Ill., Aug. 6, 1910.

July was, on the whole, a rather quiet month with the local jobbers. It is usually expected to be the dullest month in the year, and if the rate of increase compared with a year ago was rather less than in the case of the preceding months of 1910, it was due largely to the fact that the inevitable was submitted to in considerable degree and vacations of travelers were concentrated during the month.

Practically all the roadmen are now out in their territories, and August has opened up in a very satisfactory manner. Reports from dealers all over the territory covered by the Chicago houses are optimistic regarding the fall trade. Recent rains have improved the conditions of growing crops immensely. A big round corn crop is now assured in practically all sections of the corn belt. Even in the Northwest a spring wheat crop of much larger dimensions than was thought possible for a time is being harvested. Crops generally are going to be good, if not up to bumper figures, and the prices secured will go far to counteract any shortage felt in isolated localities. Jobbers are well satisfied regarding the outlook and are preparing for a fall and winter business fully equal to, if not considerably in excess of, last year.

Not a Branch of the Talking Machine Co.

In the last issue of *The World* there appeared an item referring to the opening of a new branch on Jackson boulevard by the Talking Machine Co. This was an error. The Talking Machine Co. does an exclusively wholesale business and operates no retail stores. The Talking Machine Shops at 169 Michigan avenue and 43 Jackson boulevard are owned by George and Cecil Davidson and have no connection in any way with the Talking Machine Co. The mistake was due to a typographical error arising from the similarity in names.

Plume Enters Advertising Business

E. C. Plume, one of the best known men in the western talking machine trade, resigned his position with the Columbia Phonograph Co. last month to become general manager of the C. E. Zimmerman Co., of this city. Mr. Plume started with the Columbia Co. eleven years ago in San Francisco, first having charge of their installment business in that city and later visiting the dealers on the coast. Later on he was made manager of the Portland store and eight years ago came to Chicago and had charge of the retail department of the Chicago office and branches. Five years ago he was given charge of the company's western wholesale business.

The C. E. Zimmerman Co., of which Mr. Plume has been made general manager, is a large advertising concern, backed by some of the strongest business men in Chicago, and which makes a business of furnishing merchants and bankers in small towns with advertising service equal in all respects to that of large concerns able to employ their own advertising men at immense salaries or avail themselves of the services of the great agencies. In his new position Mr. Plume has charge of a large corps of traveling men and finds full play for his executive creative ability.

David S. Ramsdell, who was connected with the Chicago office of the Columbia Phonograph Co. for five or six years, until he went to St. Louis in 1907 as manager of the Talking Machine Co. of that city, but who has been engaged in another line of business for the past year and a half, is going to return to his first love. He has been appointed assistant manager of the Chicago office of the Columbia Co., and will cooperate with and relieve Manager C. F. Baer of much of the inside detail, enabling him to devote more time to the promotion of the wholesale business of the Chicago office.

Enlarging Fibre Needs Output.

When The World man called at the factory of the B. & H. Fibre Mfg. Co. a few days ago he found things in a state of temporary demoralization; the place was full of carpenters erecting new store bins, building overhead racks for the imported bamboo stock which furnishes the raw material for B. & H. fibre needles and constructing additional cutting tables. A large amount of new special machinery designed by President F. D. Hall is being installed and as soon as the improvements are completed about thirty additional hands will be employed. The grade of needle which the company have been putting out the past six months is evidently appreciated by the jobbers and dealers, as evidenced by the heavily increased business both in size and number of orders which have been received. The company are preparing for the biggest fall trade in their history.

Traveling Man in Accident.

L. H. Sperry, who covers Michigan and Indiana for the Talking Machine Co., was run over by a trolley car at Jackson, Mich., last month. Three ribs were fractured and other injuries sustained. He was taken to his home at Marinette, Wis. Latest reports are to the effect that he is getting along nicely and will probably be able to resume the road in a few weeks.

Death of Rinaldo Alden.

Rinaldo Alden, father of Earl G. Alden, of Alden, Biddinger Co., well-known talking machine dealers of Waukegan, Ill., died at Ladysmith, Wis., last month. He was the proprietor of the Alden Novelty Works at Ladysmith and was a pioneer manufacturer of organ stops.

Some Recent Visitors.

John H. Missey, foreman of the record shipping department of the Victor Talking Machine Co., at Camden, N. J., and an old Chicago boy, is spending his vacation with relatives in this city.

George D. Ornstein, manager of travelers for the Victor Talking Machine Co., an ever welcome visitor in Chicago, called on the jobbers here last month.

H. S. Conover, representing the Talking Machine Co., returned last week from a trip through the north upper peninsula of Michigan and northern Wisconsin. The journey was somewhat trying, as the smoke from the forest fires made it necessary to keep the car windows closed. However, he found general conditions quite satisfactory and dealers looking forward to a good fall trade.

Frank Madison, of the contract department of the National Phonograph Co., was in this city this week on his return from a visit to several Western points, and called on the local Edison jobbers.

"Bat" Has a Victor.

Battling Nelson, of pugilistic fame, recently bought a Victor machine and exactly 239 records from F. A. Siemon, assistant manager of the Chicago branch of the Rudolph Wurlitzer Co., and had the outfit shipped to his ranch at Obar, New Mexico.

Wiswell's Summer Retreat.

L. C. Wiswell, manager of the talking machine department of Lyon & Healy, has his family lo-

cated for the summer at Higman, near St. Joe, Mich. He week-ends there and will put in the latter half of the month fishin', swimmin' and storin' up energy for the fall campaign.

Arthur D. Geissler in California.

Arthur D. Geissler, general manager of the Talking Machine Co., is enjoying himself to the full in the mountain fastness of California. He took in the far-famed Bohemian Jinks, the medium through which America is creating a new form of nature drama, last week.

Joe Vesey, manager of the retail machine sales department, spent his two weeks' vacation tinkering around his handsome home at the sylvan suburb of Brookfield.

"Tiz-It" Success.

Kreiling & Co., manufacturers of the "Tiz-It" all-metal horn connection for phonographs, are experiencing an excellent demand for their product. A jobber, in speaking of the "Tiz-It" this week, said: "When one reviews the past four or five years and thinks of the large number of talking machines and specialties that have been put on the market, it is astonishing the few which have made a permanent place in the trade, and which have enjoyed anything but the most ephemeral existence. The Tiz-It is one of the stayers and we find a steadily growing demand."

New Demonstration Booths.

The Talking Machine Co. have just constructed a series of new demonstration booths for the accommodation of their dealers at their headquarters at 72 Wabash avenue. They are especially cool and comfortable, equipped with fans and ventilators, and yet realize the ideal of soundproofness to an extent rarely found. Green and white are the prevailing color scheme, but with mahogany beamed ceilings. A unique feature is that the glass windows between the booths, enabling the attendants in one booth to keep his eye on the others as well, are of double thickness, stationary on one side, while the other side is hinged to permit the cleaning of the glass. Both inside and outside the architecture and decorative scheme is something on the colonial order and presents a peculiarly artistic effect.

Will Help Their Dealers.

The Talking Machine Co. are prepared to furnish sectional shelving to their dealers at cost, having contracted for a large amount of substantially built shelving for this purpose.

The sectional cases are furnished in accordance with either of three systems, simply with horizontal shelving, with hinged covered boxes on the sheet music stock-keeping system or with drawers. This is simply one of the many ways in which the company are seeking to co-operate with their customers to help their business.

The sales force of the company are especially instructed to devote their attention to helping the dealers develop trade, and the majority of their time is taken up in working up prospects and aiding the dealers in closing important sales.

New Kansas City Manager.

E. A. McMurtry, manager of the Pittsburg branch of the Columbia Phonograph Co., will on August 15 assume the management of the Kansas City branch, one of the most important offices, owing to the excellent wholesale territory under its control, and which includes western Missouri, Oklahoma and Kansas. He succeeds C. W. Smith, who leaves the service with the best wishes of the company and a host of friends in the trade, and goes to Sherman, Texas, where he will engage in another line of business. The Kansas City branch have moved into their new location, at 1112 Grand avenue, District Manager W. C. Fuhri returned a week ago from a trip to Kansas City, and says that the new store is one of the handsomest in the service. It is in

THE TALKING MACHINE COMPANY'S CREED

TO realize that upon our dealer's success depends ours.

TO remember that success lies in establishing mutual interest between distributors and dealers. Then, to tell you not what you would like to hear, but what you ought to hear. Aid you to aid ourselves.

TO respect our business, our customers, ourselves. To play the game like men. To fight against nothing so hard as our own weakness. To build for our future a solid asset in good will.

TO fill our orders the same day received and fill them as completely as the factory will permit. To personally inspect each item of merchandise shipped. To guarantee that it is in the same condition it left the factory. To refer all retail inquiries to you.

TO be considered as your warehouse. To agree to keep for your use, the largest and most complete stock of Victor talking machines, records and supplies in the United States.

FINALLY, To have and to hold talking machine business; to achieve success by service rendered. *This is our creed.*

W. Sessell

SEVENTY-TWO TO SEVENTY-FOUR WABASH AVENUE
CHICAGO ILLINOIS

a new building in the very heart of the music district, has several handsome record rooms and a large special grand opera room. A greatly increased retail business is expected in the new location. S. H. Nichols, formerly manager of the Cincinnati office of the Columbia, succeeds Mr. McMurtry, at Pittsburg, while Mr. Whalen, formerly assistant manager at Cincinnati, is promoted to the managership at that point.

The Permanent Disc Needle.

Samuel Levin, 120 Central Avenue, Highland Park, Ill., is the inventor of the permanent disc needle, and for which he has been issued a patent. Inadvertently Mr. Levin's first name was given as Morris in the last issue of The World. The new needle will be manufactured under the name of the Permanent Needle Co., and will be ready for shipment within the next week or so. It consists of a small garnet set in a steel shank and retails at \$2 each. The needle is guaranteed for one year, but, it is stated, will last for an indefinite period. Great interest is being shown by the trade in his new needle, Mr. Levin states, and some excellent orders have already been booked.

Some "Live" Summer Publicity.

The Aeolian Co. are using large space in the dailies, inviting the visitors to call at Aeolian Hall on Michigan avenue and rest a while and hear the Victor, in cool, comfortable, peaceful, soundproof rooms, away from the elevated and surface electric roads, where they can escape every bit of the city's roar and turmoil and hear a wonderful concert at the same time.

Lyon & Healy use a quarter page in the Tribune, with illustrations of the "Two Victors"—a Knight Templar on horseback, armed cap-a-pie, and a Victrola. A special invitation is extended to visitors to attend the concerts.

Lyon & Healy, the Aeolian Co. and Wurlitzer all offer to send a Victor to any address in Chicago on thirty days' free trial, the purchase of a reasonable amount of records being the only condition.

Lyon & Healy's Enlarged Sales Rooms.

The enlarged machines sales department and Victor Hall on the first floor of Lyon & Healy, reference to which was made last month, have been completed and are inconceivably beautiful. The decorative scheme is in the art nouveau style, and the soft, exquisite colorings and artistic decorations are wonderfully restful and pleasing. Victor Hall has been greatly enlarged, and there are now five salesrooms, all of which can be thrown into one by means of folding glass doors. The woodwork is all of oak, with furniture, desks, etc., to match. Rich draperies adorn the walls and costly rugs cover the floors. Everything is ready for the coming of the Templar hosts, and the Victor and Edison concerts, discontinued during the alterations, will be resumed Monday.

Pleased with Convention Results.

The Chicago members of the trade who attended the National Jobbers' convention at Atlantic City all returned full of enthusiasm about the convention itself and the royal entertainment furnished by both the Edison and Victor companies. Jas. F. Bowers returned more impressed than ever with the high type and character of the men composing the jobbers' association and of those connected with the great companies.

L. C. Wiswell has received from the National Co. the moving picture films of that ball game. As soon as an opportunity can be secured of showing the pictures to the local trade the films will be sent the rounds of the western jobbers.

John Otto, of the retail Edison department of Lyon & Healy, who went East with the conventioners, visited the Edison and Victor factories for the first time and was greatly interested in what he saw. He is particularly proud of the fact that he had the opportunity of a long talk with Mr. Edison and proudly displays a business card embellished with the Wizard's signature.

Secured Many Zonophone Jobbers.

R. F. Prybil, representing the Zonophone Co., recently returned to Chicago after a long trip

through the country, during which he established a number of new Zonophone jobbers. He is doing some good work in Chicago in the company's interests.

Brieflets.

C. F. Baer, manager of the Chicago office of the Columbia Phonograph Co., is spending his vacation in Colorado.

F. A. Cook, assistant retail manager at the Columbia Co., has the sympathy of his many friends in the death of his infant son, which occurred last week.

F. H. Harnden, private secretary to Manager A. D. Geissler, at the Talking Machine Co., is vacationizing at Lake Zurich and other northern Illinois resorts.

AN EXCELLENT STOCK CHECK.

Description of a Simple and Easily Installed System for Preventing the Depletion of Stock—Its Use Will Avoid Much Annoyance and Even Monetary Loss.

(Special to The Talking Machine World.)

Chicago, Ill., Aug. 8, 1910.

Both wholesalers and retailers who have at times found themselves embarrassed by the dis-

ery, etc., which usually require a certain amount of time to duplicate.

VICTOR MUST BE SOLD AS EQUIPPED.

The appended notice, of interest to distributors and jobbers, has been given their trade by the Victor Talking Machine Co., Camden, N. J.:

"Our attention has been called to a case of the Victor 'O' being altered by equipping it with a larger horn than the No. 15, using an adapter manufactured by some outside concern. This we consider is an infringement of the license under which these instruments are sold, besides being contrary to our well-founded reasons for equipping the 'O' with an odd-sized horn elbow. Note the license label, which reads in part as follows:

"No license is granted to sell or use this machine in any altered or changed condition, or with any parts not manufactured by this company."

"We do not wish the Victor 'O' to come in competition with the Victor 1st, as it must do when equipped with No. 17 or a larger horn and sold at \$19 or \$20. Again, a larger black horn is out of proportion, and makes the instrument top-heavy, at the same time destroying the color scheme. In view of the above considerations, all

RESERVE STOCK--Order Notice

When necessary to break this package of reserve stock, after all others have been used, this notice, with sample of contents attached, if possible, or full description made on back hereof, **must be returned promptly to the purchasing agent** to order new supply.

Failure to do this on the part of person breaking this package will be answerable to the manager.

THE TALKING MACHINE CO.

ARTICLE Victor Needles (Phys.)

AMOUNT 100 PA

DATE 8/15/10 BY C.H.H.

covery that they are "just out" of a certain article or commodity will be interested in a very simple and positive check on all kinds of stock in use by the Talking Machine Co., of this city, and through whose courtesy we are able to give the following description:

The accompanying cut shows a "Reserve Stock-Order Notice" which is printed on yellow Dennison tags in red ink, so as to cause them to readily attract attention.

Amounts representing the "reserve stock" of the different articles are determined by the quantity required for filling orders from a given time until the new supply will be received. This amount is then entered opposite the caption "Amount" and the name of the commodity is written after the word "Article."

A package or pile containing the designated amount of each article is made up, to which is either tied or tacked this "Reserve Stock-Order Notice," and this package or pile is known as the "reserve stock" and is placed in the rear of the bin or pile of stock and is not broken or opened until "all others have been used," at which time the date is filled in on the end of the tag and is initialed by the stock or shipping clerk opening the package, becoming now an "order notice," which is then returned to the purchasing agent to order a new supply.

The Talking Machine Co. state that since inaugurating this system they have never found themselves out of a single article of stock due to its not being ordered in time. The only way in which this system can fail, after "reserve stocks" of all articles have once been set aside, is through delay in transit or misjudgment as to the proper amount set aside as reserve stock.

This system can be used to advantage on office supplies, such as letter heads, billheads, station-

ery, etc., which usually require a certain amount of time to duplicate.

GERMANY'S NEW COPYRIGHT LAW.

The new copyright bill passed by the German Reichstag, and details of which appeared in a letter from our Berlin correspondent in last month's World, will become a law on September 9.

Yet it must be confessed that wit gives an edge to sense, and recommends it exceedingly.

The Keystone

to success in business is the satisfaction of one's customers

In all of their 46 years of merchandising, during which time the house of Lyon & Healy has been built up to the unrivaled position which it holds today, "The World's Largest Music House," the aim has been to give perfect satisfaction in all things big and little.

As distributors of

The
Victor
Talking Machine

and

The
Edison
Phonograph

Lyon & Healy know they are supplying the trade with the best Talking Machines in the world, the kind that must satisfy. The same holds true of Records, Supplies and Equipments. Further, the handling of dealers' orders has been so perfectly systematized that errors are few and delivery so prompt that complaints are rarely received. When a dealer does have cause for fault finding he can rest assured of immediate correction.

Dealers are not asked to take things for granted. Proof of superior service will be given on any order sent in, be it large or small. Lyon & Healy's plan for dealers is the most liberal extant.

SOUTHERN CALIFORNIA NEWS.

Summer Trade Surprisingly Good—S. A. Brown Co. to Open New Store—Sherman, Clay & Co.'s Satisfactory Trade—What the Southern California Co. People Are Doing—Some "Live" Items from a "Live" Section.

(Special to The Talking Machine World.)

Los Angeles, Cal., Aug. 2, 1910.

Southern California, particularly Los Angeles, is having a surprisingly brisk summer trade in all talking machine lines. Not only is the talker trade in good shape, but most all lines of trade are having the busiest summer yet witnessed in this section. Besides the opening of a new store several of the older dealers have enlarged and added to their talking machine departments. The S. A. Brown Music Co. opened a talking machine and piano store at 335 South Spring street about the middle of last month. S. C. Pursur has the talking machine department in charge. The stock consists of a complete line of Victor and Columbia disc machines and records. The department is tastefully arranged and decorated, the soundproof rooms being hung with heavy tapestry. One large room is devoted to the various styles of machines which are demonstrated in comparison. Mr. Pursur is a very capable business man and reports business conditions much better than expected.

Sherman, Clay & Co. are among the busiest jobbers, having recently supplied several new dealers with complete Victor record stocks. Chas. S. Ruggles, manager of the local branch, is keeping up his name as one of the best anglers on the Coast, and may be seen most any Sunday at his favorite pastime of fishing through the breakers at Ocean Park.

The Southern California Music Co. are having some good success with the foreign Edison records recently received. Amberolas still seem to hold the center of the stage, their demand increasing very rapidly. Several of the talker department employes are away on vacations. A rule has lately been adopted where the salesmen are called together every sixty days to discuss the general business of the department. At each meeting one member is chosen by the votes of the others to give an essay on salesmanship. The meetings have proved very interesting and beneficial to all.

Mr. Giessler, of the Geo. J. Birkel Music Co., is settling into business again after his extended trip through the East. After visiting the dealers in the larger cities he compliments the western dealer on the up-to-date methods which are employed by him in handling the talking machine trade. Mr. Giessler is very much interested in the arrangement and equipment of the new department which is to be occupied in the new building on Broadway.

The Columbia Phonograph Co., wholesale exclusively, are enjoying a very good summer trade and have had a most satisfactory business up to the present time this year.

Robt. R. Schafer, of Santa Ana, Cal., visited this city last week and gave very good reports from his section.

A. J. De Lozier, of the De Lozier Furniture Co., at El Centro, Cal., called on the local Columbia jobbers in the interest of his business. He is an exclusive Columbia dealer.

J. R. Brakey and Mrs. Brakey, of Ventura, are in Los Angeles for a few days. Mr. Brakey has great hopes for a very big trade during the coming season.

Geo. P. Austin, manager of the Oxnard store of the Southern California Music Co., has had great success with Edison goods in his section. An article which appeared in the September Phonograph Monthly gave the following mention: "Out of a population of 2,000, 109 machines were sold; 52 of these were Triumphs and two were Idealias, the remainder being smaller machines." Now Mr. Austin is replacing many of these with Amberolas and finds them in surprising demand.

F. W. Cornell, together with Mrs. Cornell, are spending a few days at the beach. Mr. Cornell

is the Edison dealer at Banning, Cal., where, he says, business is very good.

Another caller on the trade in Los Angeles was Mr. Oshanna, of Brawley, Cal., who handles a complete line of Edison goods and claims the distinction of being lower than any other dealer on earth. Brawley is 116 feet below the sea level and has a temperature of 130 degrees in the shade. This is truly the land of perpetual sunshine, for there is never a cloud in the sky.

The American Telegraphphone Co., H. P. O'Reilly & Co., representatives, are demonstrating their latest models to the business men of San Diego. They have taken offices in the Granger building and are having much success. Some attractive advertising is being done in the local papers.

Arthur J. Morse, manager of the Southern California Music Co., of this city, is spending a few weeks' vacation in the northern part of the State.

Herbert L. Clark, the world's most celebrated cornet soloist, who is familiar to the trade for his Victor and Edison records, is filling an engagement with the Coronado Tent City Band. F. C. Carnes, of the talking machine department of the Southern California Music Co., Los Angeles, is spending his vacation at Tent City, Coronado.

A. D. Giessler, manager of the Talking Machine Co., Chicago, is expected to visit Los Angeles for a few days next week.

Mr. and Mrs. A. S. Thomas, of Topeka, Kans., are spending a few weeks in Los Angeles and have called on the local Edison jobbers. Mr. Thomas is connected with the Santa Fe Watch Co., of Topeka, and is very much interested in the talking machine business.

H. H. Fish, one of the oldest talking machine men on the Coast, who for some time past has been otherwise engaged, has joined the retail selling force of the Southern California Music Co., Los Angeles.

Money saved by hiring cheap help isn't generally well saved. A good clerk makes satisfied customers and a poor clerk sends people away disgusted and disgruntled.

The important thing in life is to have a great aim, and to possess aptitude and the perseverance to attain it.—Goethe.

Unload—you can't carry the big things well, if you are weighted down with a lot of little, no account detail.

GRESSING BECOMES MANAGER

Of the Talking Machine Department Inaugurated by Aeolian Co.

After considerable speculation among a formidable list of applicants, O. A. Gressing, formerly manager of the St. Louis Talking Machine Co. in St. Louis, has been appointed man-

O. A. GRESSING.

ager of the talking machine department which the Aeolian Co. are to open on a large scale in Aeolian Hall, New York. Mr. Gressing has had long experience in the talking machine field, and is well equipped to make a success of this new and important department of the Aeolian Co.

Mr. Gressing before entering upon his duties in New York went to Wisconsin for a couple of weeks' vacation, getting back August 15. Besides being personally in charge at headquarters he will have supervision of the departments in Chicago, Cincinnati, Indianapolis, St. Louis, Dayton and Fort Wayne.

This is Our Victrola Protector

For Victrola XII and Amberolas also

¶ Every high-class machine on your floor should have a protector. It insures them from injury, dust and dampness.

¶ Most of your customers use their machines on their verandas, yachts, etc., during the summer, where they are exposed to the weather. You can make good profits and pleased customers by selling them protectors.

THE TRADE AT THE GOLDEN GATE.

General Talking Machine Business Reported as Seasonable—Excellent Feeling in Trade—Jobbers Preparing for Active Fall—Considering the Transportation Question—Water Route Considered—What the Pacific Phonograph Co. Is Doing—Activities of the Other Houses and General News Duly Set Forth.

(Special to The Talking Machine World.)

San Francisco, Cal., July 30, 1910.

The talking machine business has been seasonably quiet in San Francisco for the last month, and in fact the business all over the Coast is rather slow. There is a much better feeling in the trade than is usual at this time of year. The principal vacation season for city people is about over, and some improvement has been noted in the last few weeks, the really dull period lasting only a short time. In the outside towns very little is expected during the harvest season, as people are generally too busy to give much attention to talking machines, but this year, in spite of the rush of marketing a bumper crop, the outside trade is holding up in a very satisfactory manner.

The wholesale distributors in San Francisco are beginning to make preparations for the fall season, and arrivals of all lines of talking machine goods will be very heavy for the next couple of months. In view of the advances made in the business during the past year, and the enormous demand which has come with the appearance of each new improvement, dealers figure that their sales this fall should be far ahead of former years. This view is encouraged by the generally prosperous condition throughout this territory, which will mean a continued increase in the demand for the high-priced machines and records. Outside retailers are at present buying in small lots to round out the summer season, but a few are already making arrangements for larger deliveries during the fall, and quite a number of new stores are being opened at various points in the interior.

With preparations for the fall season there has been considerable discussion of the routing of freight to local distributing houses. Some consideration has been given to the Tehuantepec water route, but it now appears that the majority of the stock will come by rail. The Tehuantepec route would effect some saving in charges if there were plenty of time to spare in getting the goods to the Coast, but in order that the fall demands may be met promptly the overland route has been considered more advantageous this year. Victor goods, according to A. G. McCarthy, of Sherman, Clay & Co., are always wanted in a hurry, and nothing of this line is to be entrusted to the water route. The Pacific Phonograph Co. have 100 Amberolas on the way via Tehuantepec, due to arrive about August 10, but the National Phonograph Co. have decided to send the remaining fall shipments overland, as it is desired to have them on hand as soon as possible. The Pacific Phonograph Co. are well satisfied with this arrange-

ment, and Mr. Pommer believes it will enable them to give quicker deliveries and better service to the retail trade. The Coast distributing branches of the Columbia Phonograph Co. will get their goods by sea whenever possible, but as they have in the past frequently been short of stock in the rush season, a considerable portion of their shipments also are likely to come by rail.

A. R. Pommer, head of the Pacific Phonograph Co., says: "We are just beginning to stock up heavily for the fall trade. Judging from present indications, we are going to have about the largest fall trade in the history of the talking machine business on the Coast. July on the whole has been a very fair month. I expected a lull of 30 to 50 days, but there were only a couple of weeks of dullness, and while things are rather quiet here the business in the interior and the north is simply great. We are very glad to hear of the new wooden 'Music Master' horn which the National Phonograph Co. are getting out this season, and believe it will result in the sale of many more Edison machines." Everything is running smoothly at the new store of the Pacific Phonograph Co. on Mission street, where the arrangements for handling the stock are now complete. Owing to the immense amount of goods carried, however, the company are already somewhat crowded, and contemplate the annexation of another floor of the building. The outside business has been progressing in fine style, over a dozen new stores being opened with Edison goods in the last thirty days. The outside men are covering northern California and southern Oregon very thoroughly, developing quite a lot of places which are practically virgin soil, and the outlook in that section is most encouraging.

Andrew G. McCarthy, of Sherman, Clay & Co., is well satisfied with the way the demand for Victor goods has held up during the summer, and has every expectation of an extremely heavy business in the fall. He states that, while the demand for these goods in other quarters has been taxing the facilities of the factory, he has made ample provision for the Coast business and expects to have sufficient stock for the fall requirements.

W. S. Gray, Pacific Coast manager for the Columbia Phonograph Co., spent the early part of the month on a vacation in Sonoma county, but is now back at his desk completing preparations for the busy season. E. W. Scott, of this company, was also out of town for a couple of weeks this month, visiting the agencies along the southern coast, and W. S. Storms, who was at the San Francisco office during his absence, is again on the road. Mr. Scott found extremely prosperous conditions in the places he visited, and says the Columbia agents are all preparing for a fine season.

James Black, manager of the talking machine department of the Wiley B. Allen Co., reports steady progress in his department, and has found the business this season considerably above expectations, especially on Victor goods.

Byron Mauzy finds business in the talking ma-

chine department very quiet, and attributes this condition largely to his policy of requiring larger cash payments than some of the other firms. He prefers to follow this policy, however, as he says his department is not large enough to warrant the expense of a regular collection department, which would be necessitated by a large credit business.

J. Raymond Smith, who has for the last year conducted a large piano, small goods and talking machine business at Fillmore and O'Farrel streets, has opened a branch at 256 Market street. The principal business at the new store is in talking machine goods, small instruments and music, and the location is highly advantageous for this line, as it is in the direct line of travel for thousands of suburbanites who come to the city every day. The store was started a few weeks ago, but has already shown itself a great success. It is particularly favored by having no competition in that part of the city.

The Heine Piano Co. are endeavoring to dispose of the talking machine department, as Mr. Heine considers that it takes too much attention from his piano business.

Peter Bacigalupi & Sons are still trying to dispose of their lease on the present location, and will make no further preparations for moving until they can do so.

OHIO STATE ASSOCIATION.

Ohio Trade Appreciate Value of Organization—Have Pioneer Talking Machine Dealers' Association—How the Members Are Benefited—Membership Rapidly Growing—To Meet in Columbus—Something of a Live Organization That Should Encourage Others.

(Special to The Talking Machine World.)

Columbus, O., Aug. 7, 1910.

The recent meeting of the jobbers' convention at Atlantic City and the recognition of the Eastern Talking Machine Dealers' Association has brought forcibly to the trade the value of such organizations. The pioneer organization of this sort is the Ohio association, which now includes most of the live dealers in this State.

Showing the influence of the last meeting held at Columbus in February several dealers have taken on the \$500 Victor order and the sales of Victrolas and Amberclas in Ohio are much greater than before this meeting.

The helpful plans, the good-fellowship, and above all the faith in the permanence of the business combine to make these meetings of great value to the dealer.

Ohio dealers are responding to the call and the association is growing by leaps and bounds. W. H. Snyder, one of the live Columbus dealers, is secretary, and A. C. CaJacob, of Wapakoneta, is president. Mr. Snyder has had several applications for membership since the February meeting, and the next meeting promises to be one of the greatest meetings in the history of the association.

A meeting of the association had been planned for the first Wednesday in August at Toledo, but

owing to the fact that several speakers who had been expected to be present will be on their vacation at the time the executive committee has called the meeting off, and the next meeting will be held at Columbus the first Wednesday in November.

Columbus is the favorite place of meeting of the association, as it is centrally located and is easily accessible from all parts of the State.

The forming of associations in various States is commended by the experience of the Eastern dealers and the Ohio association. Several of the recommendations offered by these associations have received favorable action by the manufacturers, and the jobbers to a unit are lending every assistance in their power to help their meeting to be a success.

The officers of the Ohio association will be pleased to offer any assistance in helping other States to organize, and it is hoped that it may be possible to effect a National organization at some future time.

As Martin G. Chandler, chairman of the press committee of the Ohio association, said to the writer, "The permanence of the talking machine business rests largely with the live dealers. Unless talking machine dealers are alert they will see the piano dealer taking on their line and the regular talking machine dealer may become a thing of the past. The great difficulty we have found in Ohio and the one thing that our association has done much to combat is the notion that the halcyon days of the talking machine have passed."

This unsound reasoning on the part of some dealers prevails East as well as West, but it is usually put forth by men who are not acquainted with the possibilities of the talking machine business, or who are not equipped to fight the trade battle. For the progressive man the talking machine industry to-day offers as many opportunities to win success as it ever did, but it is no place for sluggards—business must be sought for; people must not wait for it to come to them.

TRADE FABLE

No. 7

The Jobber trotted blithely into Williams' Talking Machine Store, in Janesville, unlimbered his order books, grabbed his Dixon and prepared to take a half-nelson on an order that would partly make up for Williams' failure to buy anything big for the past three moons. But his plans missed fire—there was no Williams.

The almost-blond chicken in charge shifted her spear-mint, slapped her bun, pulled down her peekaboo and answered the jobber's inquiry as to Williams' whereabouts with, "Out at the grounds watching the home team pasting the pill for the pennant. Nothing doing here to keep him around. Shine after the game and you might find him here. Excuse me while I chase this gink, 'cause I'm too tired to bother selling him records to-day."

Mr. Jobber "shined" at dusk to find the proprietor seated at his desk with his douglases elevated on the slide, his truly-warner tilted over his face, a Cremo stuck in his mouth and his mind in Dreamland, quite unconscious of the fact that there were four customers awaiting the indifferent service of the blond.

When Williams had been aroused and had lowered his feet out of his range of vision he looked the jobber over and said: "What's the matter with you? Want to use my store as a storage house for your extra stock during the summer and make me pay for the privilege? Nix on the order stuff; I've just lost my mother-in-law and my wife might be suspicious if she saw me laughing, so cut out the comedy. I can't sell enough goods between now and the fall to pay for the fly paper on the windows and keep the girl in gum, and what's more to the point, I'm not going to waste time trying. Me for the simple life for the summer, so please don't slam the door going out."

The Jobber didn't even grunt until the dealer

was through, and then controlling a desire to pull off an imitation of the recent discussion of fistic tactics by Messrs. Jeffries and Johnson, he thought of his distant missionary relative who had furnished a feast for the cannibals and proceeded to enlighten Williams as to the true way to conduct a talking machine business during the summer months, in language more terse than elegant.

"What you need, Williams," said the Jobber, "is to take about three double doses of strong liver medicine just to get some steam behind you, and then wise yourself upon this dope—there isn't any closed season on talking machines except that which the dealer creates. What you want to do is to slip your present female ornament, the fadeaway and cotton, to a couple of live ones who have too much respect for the real coin to let it get out of the store without a struggle. Then stick around yourself for a while so the customers can lamp the guy that's running the shebang now and then and get a chance to size you up as being classy enough to be worth their attention. Even though most of your trade are baseball fans you can't do business with them during the game, even while they stand up and stretch at the seventh inning, and you can't close sales at the store by the absent treatment method.

"I'm going to book you for a bunch of machines and a lot of records that will almost lower the temperature, and you just shake yourself and get on the job to sell them. Would the beer gardens flourish in the good old summer time if they didn't give their customers music? Would the parks be crowded on concert nights if it was too hot to enjoy melody? Would bungalow owners and cottagers rent pianos for the summer if they hated to hear them during that time? Roll over, old sport, you're on your back. Can the chatter about the slow season being here and hustle. If you do you'll forget about the hot weather without the aid of gin rickeys or a palm leaf fan."

Williams started to bristle and get indignant

!!! WARNING !!!

"IMITATION" is the sincerest form of flattery."

Our famous OPERA NEEDLE, the $\frac{3}{4}$ -inch needle with the tapered point has been imitated and is being sold as our OPERA NEEDLE. WE THEREFORE GIVE WARNING TO THE TRADE to refuse such imitations and insist upon the GENUINE OPERA NEEDLE, WHICH FOR QUALITY AND FINISH CANNOT BE EQUALED.

GENUINE OPERA NEEDLES can be easily distinguished by the high class envelopes or tins in which they are packed, and on which the words "MADE IN GERMANY" appear.

Send for samples and name of nearest Jobber handling them.

Talking Machine Supply Company
400 FIFTH AVENUE, NEW YORK

in the beginning of the Jobber's few remarks; than he gasped once or twice and finally really listened, not coming out of the trance till after he had signed a big order that the jobber prepared.

"Well, I got something that I didn't expect and I got it good, 'cause it was coming to me. I'm going to take your advice in big doses, but the next time you're going to call, Brother Jobber, wire me at my expense and give me a chance to get into a suit of armor. I'll need it."

A RECORD OF WHICH TO BE PROUD.

"Uncle Dan" Williams the Dean of Traveling Men in the Cabinet Field—Has 48 Years of Road Service to His Credit—Sponsor at the Birth of the Udell Works and Has Contributed to Its Growth—Popular in the Talking Machine Field.

One of the interesting attendants at the convention of the National Talking Machine Jobbers' Association, held in Atlantic City, last month, was Daniel G. Williams, of the sales de-

DANIEL G. WILLIAMS.

partment of the Udell Works, Indianapolis, Ind. "Uncle Dan" Williams, as he is familiarly called, is undoubtedly one of the oldest cabinet men actively engaged in business in this country. While East he celebrated his seventy-first birthday, with forty-eight years of road service to his credit. Those who had the pleasure of greeting him at Atlantic City little realized that this young-old man had reached such a span of years; in fact, he would be taken for fifty-nine or sixty. We have had it hinted to us, however, that his young looks and activity are due to his late marriage.

Mr. Williams has a splendid record behind him. It was in 1862 that he brought out the first patent step-ladder and interested C. G. Udell in its manufacture in Chicago. The latter specialty in time became known the world over. The business became such a success that Mr. Williams, who had been engaged in the book business in Indianapolis, sold out and founded the Udell Ladder Co. in North Indianapolis. The first factory was built on the same ground as the Udell Works now stand. With its seven acres of large buildings the Udell business since 1873 has been steadily enlarging, four branches being established, one in New York, Philadelphia, Chicago and Cincinnati, with Mr. Williams handling the sales from the start in 1862 until the present day—forty-eight years of constant service, most of which has been spent on the road. Few men can equal this record in this or any other trade.

In 1882 A. A. Barnes bought the Udell business, retaining Mr. Williams, and they entered on the manufacture of fine furniture, making

specialties such as ladies' desks, music cabinets, piano player cabinets, talking machine cabinets, library book cases and tables. The Udell products, as in the talking machine trade, are known the world over as of the highest class. Through the production of original designs and the giving of values a large trade has been built up with leading houses.

Judging from Mr. Williams' active physical condition, and his statement recently to The World that "he felt as though he would be able to demonstrate the Udell line for twenty years more," the talking machine trade will be able and glad to extend the "glad hand" to this estimable gentleman on his regular visitations.

The photograph herewith of Mr. Williams was taken while visiting the convention at Atlantic City last month, and it demonstrates that hard work on the road and in the office does not impair a man's vitality or years—if he is built right, like the Udell cabinets.

CELEBRATE ANNIVERSARY.

The Edison Business Phonograph Co. Tell of Some Accomplishments.

The Edison Business Phonograph Co., of Orange, N. J., in the fifth anniversary number of Tips, "issued occasionally in the interest of dealers," tell in a very interesting way what they have accomplished in the five years' existence of the Edison business phonograph. They point out the inventions that have established standards in the business and have led to the advancement of the voice-writing art, and in this connection state: "When we reflect that through the efforts of our organization we are actually securing at the present time over half a million dollars a year from the public in exchange for our product, a laudable pride in creating such an industry is excusable."

They compliment the dealer and salesman and appreciate their good work in these words: "But what has stimulated invention and suggested better prices and new selling plans if not the activity of the Edison dealer? He brought the orders—the money—without which even an Edison project must eventually fail.

"The average dealer has done his part in the double team—manufacture and selling. Either member working alone or half assisted would not have moved the business. Together our effort has been irresistible. We are progressing just in proportion to our ability to co-operate. Let the manufacturer weaken in producing better goods—better ideas—and sales are retarded. Let the salesman fail to move the goods—put them in practice—and manufacture must stop until he does. Loyalty to the Edison product by our dealers has been an asset in our sales campaign that we highly value.

"We have educated and trained many salesmen in the voice-writing field and to have the confidence and combined support of these men is our constant thought. Success cannot come to a manufacturer through good goods alone. They require salesmen who are trained to know a good product and appreciate the effort that is made to reduce any shortcomings to the least degree.

"Everything you see in the voice-writing game that is important was created by ourselves years in advance of others—we say this not in conceit of accomplishment as in pride of being the first to give our trade the latest and best ideas to help them in making money.

"Our whole faith and future lies in the success of our dealers. We have no other offices—no agents—no salesmen—to take profits or credit from them. Good dealers—loyal dealers make the successful manufacturer.

"Knowledge, confidence, enthusiasm are positive qualities that will lighten the load. Ignorance, half-heartedness, pessimism, are negative qualities that will clog and stop the commercial machinery.

"We start on our sixth year with a determination to act our part even better than in the past, with five years of experience to guide us."

The jobber on the job

That's us. We give you the kind of service a jobber ought to give his customers—the kind you should get from your jobber.

Hurry orders have no terrors for us. Every order we get is a rush order on our part—we ship all goods the same day the order reaches us.

It takes a large and complete stock to do that, but we are always equal to the task. Whatever's newest and best in accessories such as record cabinets, horns, needles, fiber cases and other specialties, you're sure to find here in addition to a full line of the Victor, Victrola, Victor Records, and repair parts.

This quick service doesn't cost you any more than you pay ordinarily, but it is worth a good deal to you. It gives you a decided advantage over neighboring dealers who are slower in filling orders and must necessarily keep customers waiting. It puts you in a better light with your customers and helps to mark you as the leading dealer in your locality.

Give us your next rush order and let us prove our case. See how quickly you get your goods, and remember that this quick service is given not once or twice, but always.

Why not write to-day for a copy of our latest catalog? We'll also send you our booklet, "The Cabinet That Matches."

New York Talking Machine Co.

THE TRADE IN PHILADELPHIA.

Business for Past Month Reported as Being Exceptionally Good for the Season—Heavy Record Demand—New Wanamaker Store Is Nearing Completion—L. J. Gerson to Bermuda—Heppe's Good Report—Popular Columbia Styles—What the Other Local Jobbers and Dealers Are Doing—Summary of the Month's News in the Trade.

(Special to The Talking Machine World.)

Philadelphia, Pa., July 31, 1910.

The talking machine business in Philadelphia during the month of July has been exceptionally good. The dealers had anticipated good things, but they came to them even in larger quantities than they had expected. From the start of the month selling was active, and the very warm weather seemed to aggravate rather than diminish the enthusiasm. The selling was not alone for machines, but it was active in cabinets, and particularly so in records. There has never been a time when the demands for records have been so great as in the past July, with the exception of last December. The future promises very well, and all the firms are making preparations, both in their places of business and by the orders they are giving to the factories, for a heavy fall and winter trade, which they expect will start early.

John Wanamaker's new store is rapidly nearing completion, and within the next month the talking machine department expects to move to its permanent home. Just where this department will be located in the new building has not been decided upon, but it is expected to be on the third floor, where a very large space will be turned over for its purposes. Ten Victor soundproof rooms will be built, with the addition of a very large auditorium for the exhibition of the machines.

At the present time the Wanamaker department is making a special effort to call attention to the machine in the way of recitals, in which the Victrola is played with the grand organ, the player-piano and a strong orchestra. Two concerts are given daily. L. J. Gerson, the manager of the talking machine departments of both the Philadelphia and New York stores, will go this week to Bermuda on a holiday trip.

C. J. Heppe & Son report that their talking machine department for July showed a very fine business in comparison with July a year ago. And this business was enjoyed on all lines, and on all features. They have been having a fine wholesale business among their Pennsylvania representatives. They just made a very large shipment to C. M. Sigler, of Harrisburg. He has entered into the business with a very fine spirit. He has placed in his piano store two soundproof rooms with glass partitions, and has placed a special man in charge of the department. The first week he was in the business he sold three machines. Mr. Sigler handles the Steinway piano and the Aeolian lines.

B. F. Landis, of Waynesboro, Pa., is another of their very active dealers. Mr. Landis is very proud of the fact that he was able to sell 19 Victor machines in three weeks. That shows what a dealer can do if he gets on the job. The Heppes do everything to encourage their men to create business, including the writing of advertisements and circulars for them, and are repeatedly encouraging them in various ways.

Fred Ferris, of the Heppe department, is spending two holiday weeks at Ocean City.

T. K. Henderson, manager of the Columbia Phonograph Co., reports that the Regent and the Mignon Columbias have been selling fine. He has been working very hard to make a record and has more than fulfilled his anticipations. He has been traveling through the State himself looking over conditions and working up big business. Last Saturday he was down at Ocean City, taking a Mignon with him, and he gave a concert at the Hotel Traymore. It was a great success, and it is needless to say he came home alone, leaving Mignon at the shore. The hotel people had the place illuminated and there was not only a large crowd present, but all the neigh-

boring cottagers had porch parties to enjoy the entertainment.

This week the Columbia people had the satisfaction of receiving an order for a Mignon to be placed in the Auditorium at Ocean Grove.

The Columbia Co. report that their summer business in records has been running chiefly on those of the higher price. Mr. Henderson says he is looking for a very big fall, the biggest the trade has ever enjoyed, and he says he is going right after it. The firm have also placed one of their fine Mignons in the fashionable Bryn Mawr (Pa.) Hotel. O. C. Dorian, of the house, and his family are spending a vacation at Point Pleasant, N. J. J. S. Shearer, the new man, formerly of Glasgow, Scotland, but later of St. Paul,

has been doing very well in Philadelphia, being in charge of the instalment business.

Louis Buehn & Bro. say that the July month with their firm, while it has not shown the volume of business of the other six months of the year, yet has been quite satisfactory. They are at a loss to know how to account for a short falling off in July, but it is not local to Philadelphia. But they anticipate a very heavy business in the fall, and believe on the year they will have a very profitable as well as a very satisfactory 1910. Edward Buehn is about to start on a vacation, which he will spend at Mifflin, Pa.

Louis Buehn expects to go to Asbury Park with his family shortly on a holiday trip.

POPULAR ELECTRIC PLAYERS.

Electrova Line Has Given Satisfaction to Many Talking Machine Dealers—The Agency Means Profits—Simplicity a Strong Feature.

Of all the side lines that are offered to the talking machine dealer, that most often taken on is the agency for a line of pianos or player-pianos, for lines of musical instruments naturally fit in

trova Co., New York, have proven their value to a large number of talking machine dealers, while others are learning of their profit-earning qualities continually. The special feature of the Electrova players that appeals to the practical man is the simplicity of their construction, enabling them to do a maximum amount of work with a minimum amount of repairs, and it is a feature that the dealer cannot afford to overlook when he is in the market for instruments of that character.

THE ELECTROVA SELF-PLAYING PIANOS.

together. What has generally proven most popular and successful for the talking machine dealer, however, has been the coin-operated piano, both where it is sold outright to places of amusement, cafes, etc., and where it is placed out on commission basis. In this connection the Electrova electric players, manufactured by the Elec-

trova players are made in a number of handsome case designs harmonizing with different environments. One of the popular styles is illustrated herewith. Catalogs of the players themselves and perforated music rolls, together with prices will be promptly furnished by the manufacturers upon request.

Mr. Dealer:

YOU LOSE MONEY EVERY DAY By Not Selling the Thorn Needle

There is not a customer that comes into your store who would not be glad to take a box home with him.

They Do Please the People and Are Easy to Sell

Patented

Many a Victrola sale has been made because the Thorn Needle was used in the demonstration. It eliminates all scratching, and no change is necessary in the Reproducer. Thorn Needles are easy to handle. They play several records, and positively do not wear out or injure a record.

The independent dealer sells the one independent line—Columbia Disc and Cylinder Machines, Columbia Double-Disc and Indestructible Cylinder Records. Columbia and independence for him. And you?

Columbia Phonograph Co., Tribune Building, New York.

IMPORTANCE OF THE RECORD ARTIST

Prominent Niche Filled by the "Talent"—Their Arduous Work—Where the Music Publisher Is Shortsighted—An Interesting Chat.

BY JOHN KAISER.

No doubt there have been various opinions expressed by the leaders of the talking machine trade, including men of position in the several companies and a number of the jobbers and others about different phases of the business. But little has been heard from the "talent," who, after all, are the foundation or producers of the main product, namely—the talking machine record. The sale of the machine is only the start or beginning of the business, and in order to maintain the real substance of the trade every purchaser of a machine must be made a constant buyer. In order to bring this about the records must be made attractive and the machine owner kept interested by the issue of supplements containing songs and selections.

To-day, if one should glance over the various catalogs one will find a number of artists whose names are constantly seen and who are really the chief entertainers. At the recording laboratories they are known as the "regulars," which means these artists specialize the making of records, spending their entire time and devoting all their energies to this line exclusively. Although the companies have from time to time engaged celebrities of the grand opera and vaudeville stage as well, it must be admitted that the general catalogs are made up of the "regulars." It is also admitted, and no doubt proven, that the introduction of the grand opera artist has elevated the business and made the "talker" more desirable and inviting to the purchaser. Regarding this the "regulars" have expressed their approval, for they, having a keen interest in the trade, know that it means a larger output from which they must sooner or later derive a benefit.

This important part of the business, meaning record-making, has progressed wonderfully, and doubtless will keep on progressing; for, as before stated, it is really the main foundation, and the manufacturers as well as the "regulars" realize the importance of perfecting and spend large sums to maintain and perfect this end of it. A few of the oldest, or, rather a few of the talented members who have been engaged in the art of record-making for the last eight years, were discussing the situation recently, the substance of the discussion defining conditions as they were and are to-day. Some years ago, when one of these artists was engaged to sing a "date" he was required to bring five or more songs to be rendered, very often more. The question of quality of rendition was not so important, but the number of selections seems to be the object. In other words, it meant quantity and not quality. To-day the situation is entirely different; not more than a single song or selection is rendered at one time and quality is sought for and every means employed to have the rendition as perfect as possible.

The "regulars" are much interested in their work and are anxious to know whether their efforts are appreciated by the purchaser. When one performs before an audience applause is given instantly, and therefore one can judge whether it is meeting with the approval of the hearers. It is not so with the maker of the record, for it is a silent listener, and results can only be looked for after it has been placed on sale. Consequently the artist himself gets no line on his work, as he has no means of ascertaining the results. If he is a failure he finds it out later by the fact of his not being engaged for future work. The writer knows that artists pay visits to different dealers, sometimes to those with whom they may be acquainted, but very often they call incognito, so to speak, to get an unbiased opinion. Dealers who do know them are very apt to hand out flattery as they are pleased to receive a visit from the distinguished member of the "talent."

It is a fact that these artists, in most cases, devote their entire time to their work, and the record owner knows nothing of their hard work in preparing the selection for the recording-room. Every possible means is employed in getting their songs in shape, so that the interpretation in perfect, as there are so many points to bring out to achieve the desired result. For instance, when a man has his audience before him his personality is a help; his gestures and facial expressions are also of a great assistance in winning an audience; but in the "talker" he cannot employ these material helps. He must get his expression, tones and phrasing all embodied in the voice, which becomes an art in itself and requires carefully study and training.

Of course, in the early days, when the artist was compelled to render so many selections in one day, this was impossible, owing to the lack of time allotted to the singer to prepare himself. The result therefore was that the rendition was mechanical, and anyone who will compare a record of two or more years ago with the record of to-day will bear me out in this statement. At the present time, however, the artist receives notice in advance concerning the selection he is required to sing, an orchestration is made in the key best suited to him and he immediately begins rehearsing. On the day of recording tests are made carefully, the laboratory expert selects the best recorder he has, and after the orchestra and singer are carefully rehearsed the record is made.

During the time not employed at the laboratory and at practice the singer can be found visiting the various music publishing houses looking for material that can be used for his style. Many selections are run over before he accepts those he can present to the laboratory committee for their approval. Before the new copyright law went into effect the talking machine artist was very much sought after by the publisher. They were swamped with selections, and in some instances even paid the singer to use his efforts to get their music in the catalogs of the companies so as to help popularize the songs. Now, although the publishers are anxious to have the "talent" use their songs, so they can get the royalty, their

attitude has changed considerably. This, in the writer's opinion, is a grave mistake, and I venture to state it will eventually be to their loss.

Every publisher of popular music to-day has paid, and is paying, noted artists to sing his publications, and is spending considerable money in his professional department coaching the singers. Publishers have men constantly employed teaching their songs to the various performers, giving them orchestrations in the right key and sending all new numbers broadcast to all professionals all over the country at their expense. Their object is to popularize the selections, so as to create a sale for the sheet music. This must bring results.

Granting that in this manner the song is spread all over the country and brought before the public in various theaters, still I believe the talking machine is more valuable to the publisher in creating the demand for the song for the following reasons: First, the selection is rendered to the "talker" by a good artist—better by far than the average public performer—and care is taken to interpret it properly. Second, if it is a comic selection, many little side remarks and extra features are added to make it more effective, and very often the orchestration is altered to brighten it and improve the results. Third, the talking machine reaches the home, which, after all, has the best listeners, and any record proving attractive and interesting will do much to increase the sale of the sheet music in question. Talking machines are everywhere; in towns where a show may never reach and in the homes of many where the members rarely frequent the theater, or other places where the popular selections are more likely to be heard.

Trade conditions make little difference to this army of "regulars," because the manufacturing companies are always producing new records. Nevertheless, that fact does not make the "regular" feel entirely satisfied, for he is just as anxious to hear good news from both the dealers and manufacturers, as their interests are his also. To meet the "talent" individually is a pleasure. Their faith is pinned to the future of the talking machine business, and if one could see these artists plan and work for their future success a feeling of appreciation of their efforts would be aroused, and in that spirit the attitude of the "regular" in the trade would be better understood.

ADVERTISING POINTERS.

In advertising, of course the first object is to catch the eye; the second, to hold the attention, and the third, to convince the reader that this is the correct article and that now is the right time to buy it.

IN FINANCIAL TROUBLE.

A petition in bankruptcy has been filed by Geo. J. Doerzbach, a dealer in phonographs and musical instruments in Sandusky, O. Liabilities, \$8,757, with contingent liabilities of \$1,625; assets, \$6,641.

TRADE NEWS FROM INDIANAPOLIS.

Quiet Spell of Business Does Not Worry Talker Men—Planning for Mighty Lively Fall—Thomas Devine's Opinion—Carlin & Lenox Closing Out—What the Various Houses Are Doing to Capture Sales—Columbia Afternoon Concerts Popular—The News of the Month.

(Special to The Talking Machine World.)

Indianapolis, Ind., Aug. 8, 1910.

The talking machine business in Indianapolis and Indiana is now more quiet than it has been at any other time for the last year, but the dealers are not surprised at this, as it is now the time for the beginning of the dull part of the season in this line. The opening of summer camps and the departure of residents for their fashionable summer homes was a great stimulus to the business, as reports show that the talking machine is growing more and more in favor with those who must have entertainment in out-of-the-way places during the summer months. But this business has passed, as nearly all of those who go away for the summer have left. The next increase in trade will be when they return and buy machines and records for the winter months.

Thomas Devine, who has been the manager of the Columbia Co.'s store here for several years, and who is well informed on trade conditions in Indiana, predicts that next year will be a good one for the talking machine business. He bases his prediction on the fact that there are conditions which will make plenty of money in the State, among them the good grain yield. Then again there is no national campaign this year to disturb trade. There will be a State election in Indiana this fall, but no governor is to be elected, and the policy of Governor Marshall, which has been very satisfactory for the last two years, will be continued for a further period of the same length.

Carlin & Lennox are closing out their line of talking machines as rapidly as possible. The proprietors of the store came to the conclusion some time ago that they had better devote all of their time to the piano business.

W. L. Barringer, of the talking machine department of the Wulschner-Stewart Music Co., has returned from Atlantic City, where he attended the meeting of the National Talking Machine Jobbers' Association. Mr. Barringer was greatly pleased with the meeting of the association, but he has been head over heels in work since he returned. The Wulschner-Stewart Co.

are extensively engaged in the jobbing of Edisons and Victors, and although the company only took up the talking machine business a short time ago they have been very successful.

"Of course at this time of year," said Mr. Barringer, "we are not doing as big business as we could at other times of the year, but we are taking advantage of the opportunity and are buying heavily. When dealers wish to buy talking machines at any time next year we expect them to be able to come to the Wulschner-Stewart Co. and get them."

The Musical Echo Co., in their new location in North Pennsylvania street, in Talking Machine Row, are presenting an attractive appearance. This company have been showing in the display window a handsome Victor machine in Mission style, together with pictures of Victor singers.

Warren Bird, who handles Dictaphones in Indiana, with headquarters in the State Life building in Indianapolis, says that his business is very satisfactory, considering that it is now the dull season of the year for office supply dealers. "I am not getting the effects of the dull season any worse than any of the rest of them," he said. Mr. Bird said that last May was his best month since he has been handling the Dictaphone in Indiana.

Thomas Devine, manager of the Columbia Co., is feeling rather chesty over the new grand opera records his company have just issued. These include the highest-priced double record extant, the sextet from "Lucia" and the quartet from "Rigoletto."

With the advent of the dull season the Columbia Co. began to give afternoon concerts, which are well attended and which it is said are stimulating business in spite of the off season. In these concerts the new Columbia grand opera stars are featured almost exclusively.

The Indiana Phonograph Co.'s store in Virginia avenue is closed. This company handled Edisons exclusively as jobbers until two or three months ago, when the jobbing privileges were disposed of to the Wulschner-Stewart Music Co. The business was then continued in the retail line until recently.

Take up and complete each piece of work as it comes along and you will never find yourself complaining that opportunity does not come your way.

Do not expect your friend to do as you do and think as you think.

SUMMER LAUGHS.

"Yes, I've given up shaving!" he was telling his friends. "I never could shave myself, and the last time I was operated on I was in such a blue funk that I shudder to think of it. The barber had a musical ear, and he lathered me to the tune of 'The Blind Boy,' which was being ground out on a talking machine close by. Slow, certainly, but nothing to complain about. By the time the scraping process had commenced, however, the tune had changed to the liveliest of jigs, and the musical shaver seemed to be enjoying himself hugely as he did his best to keep time. I was afraid to take a breath for fear it should be my last. Then the machine stopped, but only for a second; and when I heard the strains of 'Stop Your Tickling, Jock,' I vowed that, rather than run the risk of being finished off in a barber's chair by a musical maniac, I would let 'em grow for the future—and chance the crop!"

A young man, not regarded as a very desirable suitor, had called upon a young lady a number of times, each time to be told by the maid that "Miss Florence was not well to-day." One day, in response to his card, the young lady's mother, who was a recent accession to the newly-rich ranks, and whose education was not as sure as it might be, appeared and explained once more to the young man that the daughter was not well. "I am very sorry, indeed," said the young man as he rose to go, "that your daughter is so delicate." "Delicate?" sniffed the mother; "Florence delicate? Not at all. Why, she is the most indelicate girl you ever met."

A CONFESSION.—"Say, old man, I have a confession to make. Last night, in the dark, I kissed your wife, not knowing it was she."

"Don't mention it, old fellow. I once made the same mistake myself."

HAS HAD SIMILAR EXPERIENCE.—"All around me was the glaring sand," said the prospector from Death Valley to the sympathetic drummer whom he had met at the hotel. "The mountains on the horizon rocked in the heat. There was not a tree, not a bush, not a living thing in sight, and my water bottle had been empty since noon of the day before. My lips were dry as a parchment, my tongue was swollen in my mouth. If I should try a week I could not tell you how I suffered."

"I know how it must have been," replied the drummer. "Out West last summer I had to spend four consecutive Sundays in prohibition towns."

AN IMPROVEMENT.—"Yes," says the man with the shaggy eyebrows, "we have a phonograph. We've got several Italian grand opera records, and last week I discovered a way to make their reproduction absolutely perfect."

"Indeed!" asks the man with the purple nose. "What is it?"

"I rub a little garlic on the record before it is played."

MONEY IN MOVING PICTURES.—"I am going to embark in some sort of business, and want to know whether you think there is much money in moving pictures?"

"There was for a fellow who moved a half dozen of ours," said the flat dweller. "He charged us \$10."

There was a young girl in the choir
Whose voice rose hoir and hoir,
Till it reached such a height
It was clear out of sight
And they found it next day in the spoir.

Gunner—Many of our singers go over to Europe to reach the high Cs.

Guyer—Well, what do the European singers come over here for?

Gunner—Oh, they come over here to reach the Xs and Vs.

Our No. 446 Disc Record Cabinet made in Mahogany and Golden Quartered Oak.

Will hold 150 12-inch Disc Records.

Another New UDELL Cabinet

Keeping up with the procession (in fact leading it) is what UDELL Cabinets are doing by continually adding something new and different.

This new No. 446 Cabinet is an example of a very handsome but simple design that will go well with almost any machine.

From your standpoint, it is a splendid Cabinet because of its possibilities.

The construction of the Cabinet admits of changing the top for three different size boxes, 13 $\frac{3}{4}$ x 13 $\frac{3}{4}$, 14 $\frac{1}{4}$ x 14 $\frac{1}{4}$ and 16 $\frac{1}{2}$ x 16 $\frac{1}{2}$.

CATALOGUE

A very comprehensive Catalogue of UDELL Cabinets for Discs and Cylinders is now ready.

INDIANAPOLIS, INDIANA

MUSIC BY TELEPHONE.

What Is Liable to Happen in the Happy Home if Music Is Supplied Over the Telephone as Planned by a Delaware Corporation—New York Sun Publishes an Interesting Article on the Dreaded Possibilities—Scents Another Plot to Wreck Domestic Happiness All Over the Land.

In the Talking Machine World for June reference was made to the move of the Telephone Co., of Wilmington, Del., which announced its intention to supply phonograph music to the homes of customers on a stipulated yearly charge. Commenting on this, the New York Sun, in its usual brilliant fashion, says:

"In these golden days of the world's progress, it is difficult for the wayfarer to select a street where he will not collide with the magic music of a phonograph. It has long since come to pass that the air of the streets is filled with the fumes of gasolene; a city dweller in his appointed cell or his chosen hive or the suburbanite squatting meekly upon his well-taxed veranda are equally drenched with the recurrent and pervasive odor. The 'fresh air' myth is pretty well passed into history; the automobile and its dragon's breath have become indigenous, and there's no more to be said about it, probably.

"But the phonograph, while widely favored in all sorts of communities, has not yet become so wholly inevitable as the rosy dawn when men must rise to their toil, or the devil wagon which they must dodge and breathe its lingering perfume trailing behind. In rural communities, in summer, when windows and doors stand wide,

it is true that he has great luck who shall not find himself within earshot of the penetrating strains which are expelled from the unattractive horn in some once happy and quiet home. But with ordinary prudence a man may yet escape the direct blast of this popular instrument, and when he has entered into his castle and shut the door he has a right to feel himself in comparative safety.

"But the progress of science is tireless and her fingers are already picking at the latch of the hitherto well-guarded home. A company has been formed in Delaware—where (it seems) men can get a franchise to do almost anything—to hitch on the phonograph to the harmless and sometimes necessary telephone, and thus the enemy is seen to be in the citadel before you have half a chance to defend yourself. Experiments have been in progress in that central office for some weeks, and already it is no uncommon thing for some reckless young thing in muslin, while her father's attention is given to the evening newspaper, to call up this central office and say, 'Hullohullo! Gimme the sextet from Lucheer,' and then, before the wretched parent can collect his powers of protest, slam bang! come the dulcet strains, through a horn attached to the home telephone, and the devastation has begun; it bids fair soon to be complete.

"There is nothing to do about it probably, any more than there is anything to do about the smoking automobiles or the fifteen-year-old chauffeurs, now one of the brightest stars in our civilization. The ingenious telephone companies have shown the youth of the land another way to make a noise of some kind, another means of activity, another avenue of attack upon what

used to be called the peaceful quiet of the home. It is true that peace and quiet are no longer desired in the vast majority of homes, except by a few wretched old fools who really deserve no consideration, and it is probably part of Heaven's even justice that they should not get any. Yet the laying on of the uttermost notes of the phonograph, like gas and water and the illuminating current, does seem a little hard, at first. But the householder will get used to it. He has got used to almost everything. And of one detail he may be doubly sure; the phonograph meter will never slip a cog; its tally will come in even more regularly than the gas bill."

WHERE THE MONEY COMES FROM.

Cents, being of small value, are carelessly handled, and are lost in such great numbers that the United States Treasury has to work hard to maintain the supply. The profit to the government on their manufacture is large, however, inasmuch as the blanks for them are purchased for \$1 a thousand from a firm in Connecticut that produces them by contract. Blanks for nickels are obtained in the same way, costing Uncle Sam only a cent and a half apiece.

HOW CHARACTER IS DESCRIBED.

Character is bounded on the north by industry, on the east by integrity, on the south by morality, and on the west by sobriety.

Keep your head cool and your heart warm. The one who lets his head get hot and his heart cold is in a bad way.

THE VICTOR DEPARTMENT OF WANAMAKER'S NEW YORK STORE

The display of Victor goods on the piano floor of John Wanamaker's New York store, as shown in the accompanying picture, is one of the finest exhibits in the country. This beautiful show room is located on the second floor of the great store, immediately adjoining the immense auditorium, where throughout the year free recitals

and lectures are the daily program. Here no expense is spared in arranging some of the best and most interesting musical programs heard in the great city of New York. In the demonstrations of the Victrola and Auetophone the records are accompanied by an orchestra, and the harmonious effect and perfect blending of the

vocal and instrumental music are greatly enjoyed by the large audiences that assemble daily. This splendidly educational work is under the supervision of Louis J. Gerson, manager of the Wanamaker talking departments in both the New York and Philadelphia establishments. He is making a splendid record.

PRACTICAL NOTES AND COMMENTS

MAKING RECORDS AT HOME.

An old-time subscriber of *The World in Guadalupe*, Mexico, writes as follows: "Within a recent date I have experienced quite a demand for cylinder machines which are being used for home recording purposes, and in this connection have been asked for some pointers whereby my customers could secure the best results. Could you help me in this matter?"

We are certainly most willing to oblige our Mexican friend, but as a matter of fact the National Phonograph Co. publish, or did publish, a very clever little booklet giving instructions on this subject. We give, however, a few "pointers" which may be of immediate value and of interest to all our readers.

The most important thing is to get a special horn suitable for the voice or the special instrument of which the parties desire to make a record. These horns should differ in size, and doubtless are handled by every live dealer. Having selected the horn, the next important thing is to place the recorder in position, but do not commence the record-making until the machine has assumed full headway. When the record is finished, allow the cylinder to take a few revolutions before stopping the machine. Having once started to make a record, do not on any account stop the machine until the record is finished. If this is done the record will be worthless. Sometimes in vocal records, when the sound waves are too strong, the recorder shows a tendency to blast, i. e., the recorder diaphragm cover will shiver, and in bad cases quite dance on the wax blank. In such cases, small lead weights may be used, but only in just sufficient weight to correct the worst part of the blasting. These weights are made of thin lead from one-sixth to three-sixteenths of an inch thick. They should be made horseshoe shape and with the inner part so shaped that it will slide easily on to the upper part of the diaphragm cover.

BE SURE YOU ARE RIGHT THEN GO AHEAD

The singer should sing three or four times over on blanks, testing the recorder to see if it blasts, and adding a little more weight each time till the defect is perfected. If nearly perfect, except as to one or two places, these can be marked on the music, and the singer will take note and draw away for these particular notes. In this case, add no weight at all, which would perhaps be best in most cases.

A word or two now concerning the piano. The records are to be made in an ordinary room, and of course the results will not be as perfect as if the experiment were tried in one specially constructed. The piano had better be placed cornerwise across the room, and away from the wall. When an upright piano is used the soloist, whether vocal or instrumental, together with the machine, should be behind it. It is important that the piano be as near concert pitch as possible, and of good full tone. It is a good plan to place some glass insulators under the piano castors. It is also well to chill the blanks before using, by placing them in a cold place. A greater crispness and purity of tone usually results in the reproduction.

SPEED FOR RECORDING.

The speed for recording is best regulated in direct ratio to the time of the particular piece played, and the length of it, except talking records, when the machine should run as slowly as possible, allowance being made for the resistance the stylus offers to the blank. The accompanist should play as loudly as possible, yet without undue force, and should keep his feet off the pedals. If the accompaniment is low, or there is not much of it, he should play an octave higher than written.

VOCAL AND INSTRUMENTAL RECORDS.

Now suppose a banjo solo is desired. The piano, talking machine, and soloist should assume the position of the three vertices of a triangle. The head of the banjo should be held quite near the mouth of the horn. Having started the machine the manipulator announces the title, etc., and then without stopping the machine, gives the signal for the commencement of the selection. Next on the program, perhaps, is a baritone solo. Place a 24 or 26-inch horn in position. The soloist should sing within three or four inches of the mouth of the horn, and directly into it, except in the high notes. In fact, the singer should assume a pendulum motion throughout, drawing away on the high notes, and approaching on the low ones. Next a cornet solo may be desired. The same horn will do for this. The performer stands about a foot from the mouth. For the high notes, a small wire frame covered with calico may be interposed quickly in front of the horn, taking it away as the high note or notes is about to be finished. In the case of the mandolin or violin, the player should

assume the same position as the banjoist but a larger horn would be better. The player on either of these instruments should get nearly the whole of the upper notes on the A string, using the E as little as possible. They will sound fuller in tone if this is done.

WIRELESS TELEGRAPHY.

L. J. C., Houston, Tex., writes: "It may seem strange for a talking machine dealer to acknowledge that he doesn't know everything, but when it comes to wireless telegraphy, I must admit that it is beyond me, and verges on the miraculous. Would you explain briefly the principles of wireless telegraphy in such terms as may be comprehended by the average man?"

Wireless telegraphy was really made possible by the discovery of the radiation of electro-magnetic waves through space. The existence of these waves was not known until about 1888. The first complete system of wireless telegraphy was invented and patented by William Marconi. He followed the principle that just as sound waves may be sent through the air, so may electric waves be propagated through the ether. The apparatus for the transmission of messages consists of an electric generator, a battery or dynamo, and an induction coil or transformer, and an oscillator. The appliances forming a receiver of the simplest type include a wave detector, a cell, and a resonator.

THE MOST WONDERFUL INVENTION.

J. C. Collins, Philadelphia, Pa., writes: "Would it be trespassing too much on your kindness to settle an argument? A says that the Edison phonograph is the most wonderful invention ever made; while B says the Marconi wireless telegraph is more wonderful."

It is difficult to say which is the most wonderful, for both are great in their respective domains. Edison opened up a new field of investigation and afforded the world a new happiness when he invented the phonograph; while Marconi, through his wireless invention, has made humanity his eternal debtor, for its commercial possibilities are beyond computation at this date. He has made it possible for one to cross the great Atlantic and yet to be virtually in touch with land at all times. Why not admit that the two men are great without indulging in a comparison as to which is the greater? In this connection it may be said that the Royal Academy of Sciences of Sweden has just conferred a medal on Edison for his great labors as the inventor of the phonograph.

KEEP TRACK OF DAILY SALES.

Laxity in Business Methods Sure to Result in Business Troubles—How One System Operates.

The average dealer is sometimes lax in his bookkeeping methods and has no good method of keeping track of his daily sales and expenditures. Nothing is more lamentable, for the reason that a merchant is a better or worse one according to the method he employs in his store.

Laxity in business methods is sure to bring business troubles, says the Michigan Tradesman, and when a simple system can be had which will reduce the daily routine work to a very simple form, dealers should take it up and introduce it into their business.

Such a system has been prepared, consisting of a pad of daily sales sheets which provide for the record of all sales and expenditures for the day. These sheets also provide for total results of the day, and by filing in consecutive order the totals of any day in the year may be easily found. They require only the entry of the clerk making the sale and may be combined with a cash register system if desired.

No bookkeeper is necessary, as all the work is done by the party making the sale at the time of the sale. It takes less time than to make out the average sales slip and the record is permanent.

At the end of the day the proprietor adds up the sales, subtracts the expenditures and the result gives the net sales and profits for the day.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Specially prepared for The Review.)

Washington, D. C., August 10, 1910.

TALKING MACHINE. Thomas Kraemer, Philadelphia, Pa., assignor to Hawthorne & Sheble Manufacturing Co., same place. Patent No. 960,560.

This invention relates to talking machines and particularly to machines of the type having a reproducer which is movable in a straight line over the sound-record and a sound-conveying member pivotally mounted at one end and connected to the reproducer at the other end thereof.

The object of the invention is to effect certain improvements in the construction of machines of this type, the improvements being directed particularly to simplifying the construction, to the provision of a passage for the sound-waves which is comparatively free from bends and to reducing the cost of manufacture without making any sacrifice in the strength of the parts of the machine or in the freedom of operation thereof.

The invention is of particular utility in a machine employing a sound-record of cylindrical form and a reproducer movable in a straight line parallel to the axis of this cylindrical record during the reproduction of the sound record, as in phonographs of the type now commonly used. With such a movable reproducer is employed a tone-arm pivotally mounted at one end upon a supporting arm projecting upwardly from the motor box of the machine, this tone-arm communicating with an amplifying horn also mounted on this supporting arm. At its free end this tone-arm is connected to the reproducer, and this connection is effected in such a manner as to maintain the connection between the end of the tone-arm and the reproducer while the former is turning about a pivot and the latter moving in a straight line. For this purpose the end of the tone-arm is pivotally connected to a tubular extension on the reproducer and the tone-arm is made up of two or more sections, which may move relatively so as to telescope more or less during the operation of reproducing a record, and thus have its length increased or diminished as may be necessary. In order to maintain the desired connection by allowing for the difference in the movements.

The preferred embodiment of the invention is illustrated in the accompanying drawings in which—
Figure 1 is a sectional elevation of a talking machine constructed in accordance with the invention, and Fig. 2 is a plan view of a portion of the machine.

APPARATUS FOR RECORDING SOUNDS. Thomas A. Edison, Orange, N. J., assignor to New Jersey Patent Co., same place. Patent No. 962,081.

This invention relates to improvements in apparatus for recording sounds, particularly of that type in which phonographic records are formed, and which records are of varying depth, but the

invention may be employed in connection with records of the gramophone type, which are of uniform depth but of irregular conformation.

The object of this invention is to produce a recording mechanism whereby sound waves throughout the range of music may be recorded and reproduced truly, false amplitudes of vibra-

tion of the recording mechanism being eliminated without any consequent loss in volume of sound produced and the recording and reproduction of both grave fundamental notes and overtones rendered possible.

Figure 1 is a bottom view of the recorder; Fig. 2 is a sectional view thereof taken on the line 2-2 of Fig. 1; Fig. 3 is a sectional view taken on the line 3-3 of Fig. 2; Fig. 4 is a front view of the body; and Fig. 5 is an enlarged sectional view of the body, diaphragm and recording knife.

REPEATING ATTACHMENT FOR GRAPHOPHONES. Clarence W. Claud, Nashville, Tenn. Patent No. 962,315.

This invention relates to attachments for graphophones and the objects are the provision of a means for shifting the carriage from one end of a record to the opposite end and thence bringing the needle into engagement with the cylinder to repeat the matter on the record. The provision of a means for lifting the needle clear of the record during the shifting movement and for bringing the same into engagement with the record at the end of the shifting movement. The provision of a device which may be applied to most forms of graphophones now in use without changing the construction of the same.

In the accompanying drawings forming part of the specifications:—Figure 1 is a front elevation of a graphophone showing the invention applied thereto and the needle held in engage-

ment with the cylinder. Fig. 2 is a similar view but showing the position of the parts when the needle is out of engagement with the cylinder or during the shifting movement. Fig. 3 is a detailed perspective of the plate and its attachments. Fig. 4 is a plan view of the device.

COMPOSITION FOR PHONOGRAPH RECORDS. Jonas W. Aylsworth, East Orange, N. J., assignor to New Jersey Patent Co., West Orange, N. J. Patent No. 962,878.

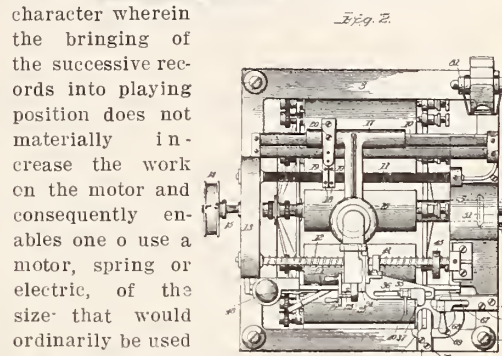

This invention relates to an improved composition for molded phonograph records, and the principal object is to produce a composition or material for the purpose in which the capacity to resist wear or the rubbing action of the reproducer stylus will be enormously increased, whereby it becomes commercially and practically feasible to make phonograph records with very fine pitch record grooves. A phonograph record having a record groove of a pitch of 200

threads per inch made of the improved composition of material will compare favorably in wearing qualities with a record of a pitch of 100 threads per inch made of present compositions.

MULTIPLEX GRAPHOPHONE. Hyman E. Markle, Nashville, Tenn. Patent No. 962,446.

This invention is an improvement on the machine shown in the application filed August 27, 1906, Serial Number 332,224.

The object of the present invention is to simplify and improve the mechanism shown in a former application; a further object of the invention is to provide a machine of this character wherein the bringing of the successive records into playing position does not materially increase the work on the motor and consequently enables one to use a motor, spring or electric, of the size that would ordinarily be used in a single rec-

ord machine; and with these and minor objects in view this invention consists in the parts and combination of parts described.

In the drawings—Figure 1 is a front elevation of a multiplex graphophone embodying the invention; Fig. 2 is a top plan view of

APPARATUS FOR RECORDING OR REPRODUCING SOUNDS. Thomas A. Edison, Orange, N. J. Patent No. 963,362.

This invention relates to various new and useful improvements in apparatus for recording or reproducing sounds, and the object is to provide an apparatus for the purpose which shall permit a more accurate recording of the sound waves free from waves or disturbances due to the recording mechanism itself, and a more accurate reproduction of the same than is possible by methods and apparatus heretofore known.

In an application for Letters Patent filed on even date herewith, and relating to methods of recording and reproducing sounds, the inventor points out the cause or origin of the false, dis-

cordant and inharmonic sounds which are created within the recording mechanism, and which become recorded to affect the character of the reproduction.

Figure 1 is a sectional view of a suitable recording apparatus embodying the present improvements, showing a flat corrugated diaphragm; Fig. 2 a similar view of a reproducing apparatus embodying the improvements, showing a dished or concave diaphragm; Fig. 3 a similar view of a recording apparatus embodying the invention and showing a diaphragm that is both corrugated and dished; Fig. 4 a plan view of the diaphragm shown in Figs. 1 and 3, and Fig. 5 a plan view of the diaphragm shown in Fig. 2.

FEED APPARATUS FOR PHONOGRAPHS. Joseph H. Williams, Harper, Kan., assignor by mesne assignments to Geo. H. Underhill, Boston, Mass. Patent No. 963,195.

This invention relates to new and useful im-

provements in feed apparatus for phonographs and similar devices employing cylindrical records, and its object is to provide means whereby a desired one of a series of records may be

promptly placed in or removed from position upon the cylinder of the phonograph.

Figure 1 is a vertical section through the device and showing the slide and its operating

mechanism in operation; Fig. 2 is a central vertical section through the apparatus as it appears from the opposite side; Fig. 3 is a section on line 3-3 of Fig. 2; and Fig. 4 is an elevation of the operating knobs and showing a dial.

GRAMOPHONE. Frederick Haye and Charles Wessels, Woodhaven, N. Y. Patent No. 962,833.

This invention relates to an improved gramophone of that type in which no separate and detachable horn is used, but in which the horn

is permanently located in a casing below the record-carrying disc and its actuating motor.

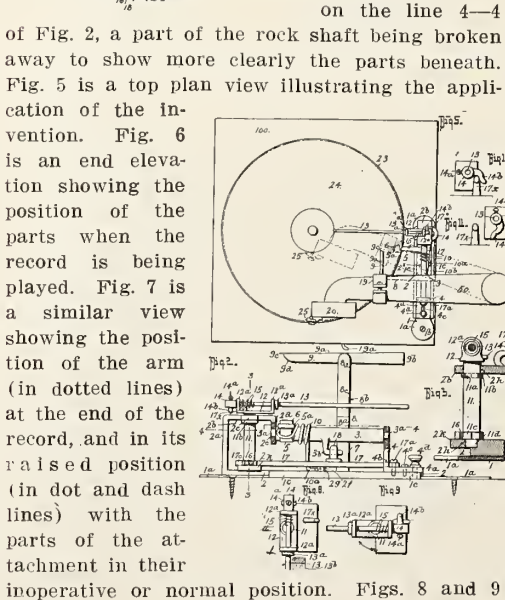

This invention is designed to furnish a phonographic apparatus in which the horn is arranged in a supporting casing below the record-carrying disc and connected with a tubular tone-arm carrying the diaphragm box by a universal joint provided with means for holding the tubular arm and diaphragm box in raised position.

In the accompanying drawings—Figure 1 represents a perspective view of improved phonograph; Fig. 2 is a detail side elevation of the tubular tone arm carrying the diaphragm box and showing the universal joint connection with the inner end of the horn, drawn on a larger scale; Fig. 3 is a plan view of Fig. 2, and Figs. 4 and 5 are respectively a sectional side elevation of the tone arm and a vertical transverse section of the same on line 5, 5, Fig. 4.

TALKING MACHINE ATTACHMENT. William Albert Chapman, Smithville, Ark. Patent No. 963,115.

This invention is an automatic controlling, feeding and cleaning device for attachment to talking machines of the disc type.

Figure 1 is a perspective view of the invention in its normal or inoperative position. Fig. 2 is a front elevation thereof. Fig. 3 is a section on the line 3-3 of Fig. 2. Fig. 4 is a horizontal section on the line 4-4 of Fig. 2, a part of the rock shaft being broken away to show more clearly the parts beneath. Fig. 5 is a top plan view illustrating the application of the invention. Fig. 6 is an end elevation showing the position of the parts when the record is being played. Fig. 7 is a similar view showing the position of the arm (in dotted lines) at the end of the record, and in its raised position (in dot and dash lines) with the parts of the attachment in their inoperative or normal position. Figs. 8 and 9

are detail views illustrating the manner of turning the brush in its bearings. Figs. 10 and 11 are diagrammatic views.

SOUND-REPRODUCING MACHINE. Louis Jay Gerson, Philadelphia, Pa. Patent No. 962,565.

The object of this invention is to provide a sound-reproducing machine with a counterbalancing device for the sound box and the tubular arm supporting it, whereby the weight of said parts and each of them may be counterbalanced to the extent desired to reduce the pressure and consequent wear upon the record disc, with the result that the life of the record is increased and much of the scratching sounds at present reproduced are largely eliminated.

Figure 1 is a plan view of a tubular arm and sound box of a talking machine having improvements applied thereto; Fig. 2 is a side elevation of the counterbalancing devices embodying improvements and with the tubular arm, sound box and record disc indicated in dotted lines; and Fig. 3 is a similar view to that shown in Fig. 2, illustrating a modification of the invention.

BACK TO EARTH.

Old Jabez Jones he used to say
He'd not be satisfied
Until he got a hoss some day
Whose speed would be his pride.
And when he got the hoss he said
He could not rest serene
Until he got a car that sped
By force of gasoline.

And when he got his motor car,
Its pleasures all proved vain;
He cried, "How small such trifles are!
I want an aeroplane!"
Alas! How swift ambition flies
And buoyantly uplifts
Till we forget to duly prize
Life's simple natural gifts!

The "rheumatiz" caught Jabez Jones
And caused his joints to balk
And now he'd be right glad, he owns,
To get a chance to walk!

—Washington Star.

PATIENCE A VIRTUE.

One of the greatest failings of the average man is lack of patience. He is in a hurry and if he does not get results instantly he is ready to give up. This is not so much because he is faint hearted as it is because he is impatient. Patience is one of the finest qualities a man may possess. It is not to be confounded with laziness. We believe that almost every great success has been attained by men who possessed a patience which was sufficient to stand for discouragement and apparent lack of interest and dullness.

The business prospects for the current year with the Victor Talking Machine Co., Camden, N. J., were never so bright. During the past six months sales have been in each instance a "record breaker." As some one has remarked regarding General Manager Geissler's memorable letter of August 4, 1909 (in which he predicted a large fall trade and warned distributors at that time to stock up in anticipation of that trade) he might have reiterated this letter on January 1, 1910, relative to this entire year's trade. The Victor Company's various new factory buildings are about ready for occupancy. They are splendid structures, perfectly lighted, with very handsome exteriors.

RECORD BULLETINS FOR SEPTEMBER, 1910

Combine business with pleasure

BUSINESS men need the Phonograph for business in their offices just as badly as they need it for pleasure in their homes. If you are only selling the Edison Phonograph for amusement, you are only plowing half the field—there is a big profit for you in

The Edison Business Phonograph

A business man can dictate his letters to the Edison Business Phonograph twice as fast as a stenographer can take them in shorthand—and the typewriter operator can write them from the Phonograph almost twice as fast as from shorthand notes. There's half of the dictator's time saved, half the stenographer's time and all of the time in which she would ordinarily be occupied in taking dictation. Do you know what that means? It means that the cost of letter-writing is reduced more than 50 per cent. in

offices where the Edison Business Phonograph is used.

The whole business world is your field—the profits are generous and there is practically no competition. If you are in a city or a manufacturing town where considerable business correspondence is carried on, the Edison Business Phonograph is your opportunity—it is the greatest business appliance of the age. Write us today for full particulars.

The Edison Business Phonograph Company, 207 Lakeside Avenue, Orange, N. J.

MULTUM IN PARVO.

A sure way to spoil an employe: Hold him responsible, but give him no authority. The manager of a store or the foreman of a shop should choose, as between the two, the constant use of his eyes rather than of his hands. When a man is "satisfied" with his business, there are nine chances out of ten that the business is in peril.

The executive head who loads up on details is the man who is in danger of being swamped by them until his usefulness is gone.

Never overlook the small buyer. Once get him started and he usually is a steady buyer.

Why keep on covering unprofitable territory? If it don't pay, why work it?

As too many cooks spoil the broth, so too many handlings spoil the profits.

HIGH GRADE GOODS IN DEMAND.

Price seems to be a secondary consideration when the sale of the concealed horn machines is concerned. As with musical instruments of any description, people of means are in sufficient number to request and pay for artistic and elegant goods; and this is particularly true of this type of talking machine. Something finer and more sightly to the discriminating was provided and the rewards, not to mention increased appreciation, are commensurate with the task undertaken and the resultant products.

THE VALUE OF COURAGE.

Courage is a virtue the young cannot spare; to lose it is to grow old before the time; it is better to make a thousand mistakes and suffer a thousand reverses than run away from the battle of life.

THE DANGEROUS FIVE PER CENT.

Apparent Shrewdness Often Means Danger of Overstocking—Caution a Necessary Factor.

A merchant purchased a much larger order of goods than he needed because he was offered an extra 5 per cent.

Another merchant did not have nearly as many as he needed, because he was refused an extra 5 per cent.

The first lost money because he was overstocked. The second failed to make money because he was understocked.

That "extra five" has a lot of commercial sins to answer for. In the hands of an unwise salesman it may become a two-edged sword.

The advice of a great jobber is: "Forget it! What is 5 per cent. compared with having the goods when you want them, and not having them when you don't want them?"

Grafonolas de Luxe have been sold the various steamship lines that ply between Detroit, Mich., and Buffalo, N. Y., to Cleveland, O. These fine instruments will supersede the orchestras on these boats.

A man must make up his mind, if he is going to succeed, that when he takes the other man's dollar he must give back to him an honest return.

\$1.00

Zon-o-phone Records are pre-eminently the BEST that money, brains, and a thorough knowledge of the art of sound recording can produce.

They are justly famous for their remarkably clear, natural tones, absence of scratch and wearing quality.

The greatest care is exercised in combining the selections, each side of the disc presenting the latest and best in popular music or standard compositions.

The price appeals to the masses, the quality to the classes, making them indeed a popular record at a popular price.

A new catalogue of Hebrew Single Side Selections has just been issued. Solos by Mme. Prager, Mr. Juvelier, Master Mirsky, the boy soprano, and other eminent singers. These are undoubtedly the most perfect Hebrew records ever recorded. 10 inch, 50 cents, 12 inch, 75 cents.

Resolve yourself, Mr. Dealer, into a committee of one and investigate these claims. Consider, criticize, compare. ZON-O-PHONE RECORDS will stand the test. A trial will verify all that we say.

A SAFE CREDIT SYSTEM.

Some Very Novel and Interesting Ideas on This Subject Put Forth by C. E. Whitehill—Will Interest Business Men Who Understand and Appreciate What an Important Part of Their Business Is the Credit Department.

Ninety-nine per cent. of the business of this country being done by credit, the importance of this subject becomes at once apparent. When asked by a banker recently whether we were getting much out-of-town business, I replied that the rapid growth of our new local business had kept the credit department too busy up to this time to tap the interurban fields. He asked what our credit department had to do with it, and was told that fully 90 per cent. of the homes are furnished on credit, and that it is a waste of money to cater to the small minority, says C. E. Whitehill, of the Whitehill-Gallihier Co., Muncie, Ind.

Yes, our credit department has been kept busy, for if there is any department of the house furnishing store that ought to be kept busy it is this one. We believe thoroughly in the definite contract system. Only a few days since, an ordinary note fell due, on which a responsible party wished to make a partial payment. The credit manager asked whether he should give credit on the back of the note. He was told by all means to take a new note. Do you know why? So there would be a definite term when the balance would fall due—a certain known time to present a note for collection. Has your banker ever asked, "How long do you want it for?" He was looking for a due period, when you are expected to make payment, a time when you would either have to "settle" or give a reason why.

Are you doing business on a banking basis? If not you had better get busy. "But I am not running a bank," some wisecracker will say. Maybe not. And the man who makes that reply never will. Another man would ask, "What do you mean by a banking basis?" I mean just that. I mean a house furnishing banking business, in which you loan the legal 70 per cent. of your depositors' money and take therefor commercial paper, with good security, having a definite due period and a sound recourse for recovery on failure to pay.

What do I mean by your depositors' money? I mean the money you have borrowed from your faithful bank or your trusting friends. I mean the merchandise entrusted to you by jobbers and manufacturers, all holding you to account for the faithful discharge of duty.

What do I mean by taking commercial paper with good security? I mean you are not faithful to your trust unless every one with whom you open an account is taken into that little private room, where, after careful inquiry into his ability to liquidate his debt as it falls due, his name is properly affixed to a binding contract calculated to make every stockholder and creditor of your business absolutely secure.

As to the form of this contract, if you are selling to the classes it may be an ordinary note endorsed by a responsible property holder. But if you are dealing with the masses by all means make a lease note, whereby the goods sold become the best security and the terms of payment can be so arranged as to suit every income. Then there will be no loss.

More than 99 per cent. of the people will pay if you will only give them a proper chance, and I can prove it. Our losses for the first three of the past six years aggregate less than two-fifths of one per cent. That means more than 99 per cent. were honest.

But your broker is wise. You ask him for \$10,000, and he shows you how to get along with \$5,000. When this falls due what happens? Do you go to the bank and pay it? Hands up. No, and neither did he expect it. You reduce the loan

\$1,000 and renew. You borrowed the money for 90 days, and pay it all in three years, liquidating a little at definite intervals.

Now, when the next man earning \$10 per week comes in, open an account with him at \$1 per week and he'll pay you if—if you do just what your own banker does with you, and I know you are honest. Every time that note comes due you will have to go to the bank or the bank will come to you. Did you ever know any one to escape it? Nor did you ever know any bank to lose money on a loan except through worthless security. Neither will you. Sell only good goods. Make them stand for the faithful performance of the proper terms of agreement. Then you cannot lose. For the merchandise plus the after payments will be worth more than the actual loan.

THE TALKER AS A TUTOR.

Besides Being a Money Saving Proposition It Does Not Lose Patience with Backward Students.

The talking machine long ago found a decidedly secure place in the field of educational work, proving a drill master that was always perfect and never impatient. From use in the classroom the talker has advanced in a number of cases to the position of private tutor for the student who is backward or the man who desires to "cram."

While tutors command as high as \$3 per hour and are kept busy from morning till night, the work is an exhausting strain upon the tutor.

In the old days the tutor would quiz and explain alternately hour by hour, and at the day's end voice and temper would be frayed about the edges. Now, however, phonograph records of a complete series of all the drill questions on a subject are prepared. About ninety questions can be put upon one record, and the tutor will have as many as necessary to cover his subject.

"Give the first person, plural, active, past definite of 'voir,'" demands the phonograph in a cold, impersonal tone, and the youth proceeds to scribble the answer. "Third, singular, future, indicative, active of 'aller,'" comes out from the horn, and so on through the list on which the youth is supposed to be prepared.

As each sheet of answers is completed the tutor corrects it, until at the end of the session both master and pupil know the weak places. The questions are reeled off at a speed which leaves no time for reflection.

"The thing won't let you stop to think," complained one young fellow about to take college entrance examinations for the third time. "There's nothing to do but to have the answers at the tip of your tongue. I call it pretty strenuous."

As the pupil becomes more proficient the machine is set at a faster rate, and when he can go through the questions at top speed, without slips, it is a fair sign he knows the work. Meanwhile papers have been corrected, the next day's work outlined, and the tutor's voice and energy conserved.

Under the old method, at the end of a day's work a tutor frequently could talk hardly above a whisper.

AD. PULLS IN ESPERANTO

Brings Results to Commercial Club from All Over the World—A Chance for Talking Machine Men.

Portland, Ore., in the process of booming itself inserted an advertisement in the "Amerika Esperantisto," and as a result of that one advertisement, says the Portland Telegram, "communications from practically every country of the globe are reaching the Commercial Club. When Assistant Manager Crissey opened the morning mail to-day he found a batch of communications with the

strangest aggregation of postage stamps he had ever looked upon in one day.

"Upon opening these and getting the substance of the inquiries tabulated, it was found that men in Russia, Germany, Denmark, Belgium, the Philippines, France, Italy, Holland, Sweden, Austria, Canada, Mexico and other American countries are on the list. They all wanted to know of Oregon, of the opportunities here for homes and of the conditions attending immigration.

"This advertisement was an experiment. The management did not know to what extent the new tongue was being spoken in the world; but the remarkable series of inquiries received indicates that the circle of readers and students of Esperanto is large, and covers the globe."

Which one of the great talking machine companies will be first to use Esperanto in advertising matter?

A SYSTEM OF WIRELESS TELEPHONY

Described by Italian Scientist—Based Upon Use of Spark-Gap and High-Tension Current—Details of Experimental Equipment.

A system of wireless telephony was recently described by Professor Majorana before the Associazione Elettrotecnica Italiana. The system is based on the use of a spark-gap. For generating the spark a special rotating arrangement is used by which it is claimed 10,000 single sparks per second can be obtained. In wireless telephony a microphone is required that can be used with high-tension currents. It must be capable of withstanding a pressure of several thousand volts and of carrying a considerable current.

These conditions gave rise to the Majorana hydraulic microphone, which depends on the capillary properties of fluid jets. A stream of liquid flowing from a suitably constructed opening divides itself into drops which follow each other at practically constant intervals. The frequency may be noticed acoustically by allowing the drops to fall on an elastic membrane, which then gives out a sound of corresponding frequency.

When mechanical oscillations are superimposed on the fluid jet periodical constrictions may be noticed which are of very nearly the same frequency as the superimposed oscillations. The drops thus force the membrane on which they impinge to give out sounds of a corresponding frequency. If the drops fall on a level surface at right angles to their direction a covering of thickness varying with the frequency of the drops is formed.

Professor Majorana has constructed his microphone on this principle and has obtained telephonic currents of extraordinary clearness and strength. This microphone consists of the usual mouthpiece and of a membrane fixed to a glass tube which moves freely under the oscillations of the membrane and through which slightly acidulated water flows.

The liquid passes out of a special opening in the glass tube and strikes the upper surface of a collector, consisting of two cylindrical pieces of platinum insulated from each other. On striking the middle of the collector the fluid spreads itself over the surface and puts the two halves in permanent connection. Thus a battery whose poles are connected in circuit with a telephone and this collector, will send a constant current through it so long as the membrane is not affected by sound waves.

When the membrane vibrates the aperture begins to oscillate, and varies the flow of drops so that the fluid on the collector is continually altering in thickness. If this circuit is connected in a suitable way with the spark-gap mentioned above, the intensity of the spark will correspond with the sound waves and will transmit to the receiving station the appropriate words and sounds with force enough to be heard.

TALKING MACHINE RECITALS.

Some Excellent Suggestions as to How to Secure Best Results Through That Form of Publicity—Avoid Commercialism.

As has frequently been emphasized by those who have made a study of methods for bringing talking machines strongly before the public, one of the best means of accomplishing that result is through the medium of the recital. Of course, the majority of talking machine dealers have already adopted the recital form of publicity, but nevertheless the following article by O. E. Kellogg, of Cleveland, O., containing a number of valuable suggestions regarding recital work, is of timely interest, especially at the opening of the busy fall and winter season:

Beyond a doubt, public recitals wherever tried have given the business an impetus and resulted in sales. However, the number of sales depends largely, if not entirely, on just how the recitals are conducted. This feature of the talking machine business, although showing some improvement, is still sadly neglected. This is an epoch of demonstration, therefore it behooves the dealer to inform the public of the great artists through the "talkers" and records. Whenever possible, give these recitals in your warerooms. Train the public to understand that your establishment is the abode of great artists' voices. If you rent a hall, aside from the extra expense, the surroundings are only usual, and you lose a valuable asset.

My idea of the recital feature is to eliminate commercialism. Don't advertise that "Smith & Brown Co." invite you to a recital; rather say the management of "Grand Opera Hall," "Victor Hall," "Edison Hall," or any other suggestive name, will present Caruso, Melba, Farrar, Sousa's Band, etc. Do not add that the "Victrola" will do the work. You arouse curiosity by not doing so.

The program must be arranged tactfully and tastefully. If you are not educated in music and have never studied the arrangement of programs, secure some musician to assist you, and you can also draw on local talent to aid you. In following this plan you secure gratuitous publicity through the society columns and music pages of the papers before and after the recitals. The Victrola advertisement should appear on the same page, and next to, if possible, the write-up of the recital.

The attendant at the machine should describe each record before it is played. Tell your audience where the number appears in the opera, or, if it is a ballad, give an outline of the composer; say when and where born, the prominent composi-

tions of the author, and then recite the poem that you are about to demonstrate. Also, mention the artist who renders the selection. This plan is much more effective than merely methodically playing one record after another in a sort of a mechanical manner. As to the attendance—request the presence of the leading musicians and society people, and provide them with reserved seats. You will find a fair percentage of those in attendance, although they may have attended from curiosity, will have developed into good customers.

One evening an old gentleman sat near the Victrola, very much interested. He shook hands with me on retiring, and remarked he hadn't expected to hear anything so grand. A few days later his daughters presented him with a Victrola, remarking to me that all he could think of since hearing the recital was grand opera.

Ascertain the studies in the public schools and search your catalogs for compositions by the authors they are studying, then invite the teachers to demonstrations. By so doing you will receive free announcements in the schools, with the request that the pupils attend. I invited the professor of music of the public schools of Dayton to spend an evening with me hearing grand opera. He grasped the possibilities of the talking machine as an educator and induced the superintendent to secure the purchase of a machine by the school board. Three other schools have since been supplied, and soon all of the schools of that city will possess a Victor.

A lady came in the other day and asked to see and hear a machine like the one used in the school, remarking that her children were becoming so familiar with classical music that she had herself become interested, and wanted a machine at home, so as further to develop her children's minds in good music.

Excellent results will be obtained in giving well devised recitals. David Bispham is on record as saying that a talking machine and player-piano should be used in every school. Other prominent educators are getting in line, and the question is, Will you be the dealer to profit in your locality?

WANAMAKER'S ADVERTISING ADVICE.

If there is one enterprise on earth that a "quitter" should leave severely alone it is advertising. To make a success of advertising one must be prepared to stick like a barnacle on a boat's bottom. He should know before he begins it that he must spend money—lots of it. Somebody must tell him that he cannot hope to reap results commensurate with his expenditure early in the game.

Advertising does not jerk; it pulls, said John Wanamaker on one occasion. It begins very gently at first, but the pull is steady. It increases day by day and year by year, until it exerts an irresistible power.

TO RECORD INDIAN SONGS.

Miss Densmore Visits Leech Lake Reservation—Will Transcribe Music for Piano and Scientifically Analyze It.

As agent of the Bureau of Ethnology at Washington, Miss Frances Densmore has gone to the Leech Lake Indian reservation, in Minnesota, where she will make a special study of the music of the Chippewas, submitting her report on the Chippewas, after having visited the Red Lake, Mille Lacs and other reservations.

Several hundred of the tribal songs have been recorded on the phonograph and sent to the Smithsonian Institute for preservation and reference.

Miss Densmore has taken these records, transcribed them in piano score and analyzed them scientifically. She has also made a study of Filipino music, and thinks the Chippewa music is of a high grade and most excellent, occupying a higher plane than the few tones embraced in the music originating in our island possessions.

The voice of one of the leading chiefs of the northern Chippewas, Gemi-Urinac, is preserved in a phonograph record at Washington.

Of special interest to Miss Densmore will be the Indian celebration at the Leech Lake Agency. One of the features, furnishing her with rich material for study, will be the war and squaw dances of the Chippewas. One volume of Miss Densmore's researches is now in press, and will soon be ready for distribution. The second volume will appear in the near future.

FOR "THE MAN IN CHARGE."

I say to the man in charge, whether you're over two or a hundred and two, get together once a week and talk things over. It will simply amaze you the points that you and the rest will get by coming together. Away from the counter, men; loosen up! And this mutual loosening up is the very thing the business needs. Clerks keep things under their hats; there is no doubt about that. Can you blame them when they don't get a chance to shoot off? It isn't that they're sore; it isn't kicks they have—but it's "ideas," and you cannot afford to run your business without these ideas.

You, yourself, have your plans, your ideas, your selling system, your scheme of organization, and you ought to know that the most effective way to put these into operation is to have a heart-to-heart talk.

NO STANDING STILL.

There is no such thing as standing still. We are either going up the ladder or going down. In which class are you? The man who has not the courage to ask himself this question and to seek a correct answer is on dangerous ground. It is better to know the truth, even though it is against you, than to remain in a rut until it is too late to get out. It is not necessary to be a genius to be going the right way of the road. Patience, diligence, perseverance, regularity and economy of time will always win. These are qualities which all can possess, and the acquiring of them is a small price to pay for success.—Gage E. Tarbell.

JOINING THE COMMERCIAL FAMILY.

A trade paper, at a recent convention of the industry it exploited, stated: "We can harness competition and friendship, hitch them side by side to the chariot of Commercial Progress and drive them in a spirited manner on the Road to Success." The manufacturer, the jobber and the dealer are all one large commercial family, and among them should always exist the best of feeling and a genuine interest in the welfare of all. The possibilities of a united effort either for good or evil of an organization are wonderful and far reaching.

The popularity of the Victrola means a greater business for you

Victor dealers everywhere are realizing as never before the splendid opportunities the Victrola offers them.

The Victrola is the greatest and most popular of all musical instruments. Music-lovers the country over have greeted it with unbounded enthusiasm and approval—and its popularity is increasing every day.

It is one of the greatest successes we have ever had. There is absolutely no other instrument like it—nothing else to compare with it in any way.

And Victrola buyers are good customers for Victor Red Seal Records, too.

If you haven't added the Victrola to your Victor line, by all means write to your distributor for one to-day.

MILWAUKEE'S NEWS BUDGET.

Trade Shows Improvement and Dealers Are Optimistic Regarding Fall Prospects—Victor Machines for Public Schools—Mrs. L. E. Clark, Supervisor of Music, Enthused Over the Use of Talking Machines as an Aid to Teaching—Chas. H. Schefft & Sons Co. with Capital of \$5,000 Succeed Eichholz & Schefft—What the Leading Dealers Report.

(Special to The Talking Machine World.)

Milwaukee, Wis., Sept. 8, 1910.

Milwaukee talking machine dealers are decidedly optimistic regarding the coming fall and winter trade and predictions are being made that business will reach a new mark. Wisconsin crops are turning out to be much better than was anticipated earlier in the season and this is expected to help business in all lines. The widespread drought was broken by many rains during the past two or three weeks and hopes are entertained that the corn crop, which is all important in Wisconsin, will be almost normal.

The local retail trade is showing more life now that the hot weather is past and people are returning to the city. Dealers say that it is remarkable how the demand for the higher priced machines is maintained in Milwaukee. The September records in all lines are selling well. Wholesalers say that dealers about the state are showing their confidence in the coming fall and winter trade by placing some very satisfactory orders in machines and records.

Collections are reported as somewhat quiet in both retail and jobbing lines, but this is a condition which is expected to be remedied with the general revival which is taking place in all lines of trade.

Lawrence McGreal, well-known talking machine jobber, accompanied by his wife and family and Miss Gannon, owner of the McGreal store, has returned from an automobile tour about Wisconsin. Mr. McGreal is well pleased with the prospects of a lively fall business.

William Hope, Wisconsin and Upper Michigan traveling representative of the National Phonograph Co., accompanied by his wife, was a recent Milwaukee visitor. Mr. Hope is now making his headquarters at Marinette instead of at Milwaukee.

A big increase in business is reported by Alfred Hille, manager of the talking machine and musical merchandise departments of the Joseph Flanner music house. The Flanner store is located on the east side of the river, generally regarded as a poor sales district in the talking machine line, but Mr. Hille is overcoming the disadvantages of location and is setting a new mark for his house.

During a recent competitive test, with twenty-two teachers as judges, the Victor talking machine was selected for use in the Twenty-second district school of Milwaukee. The contest was an exhaustive one.

L. C. Parker, manager of the talking machine department of Gimbel Bros., one of the Milwaukee representatives of the Victor, is meeting with excellent success in placing the Victor in the public schools of the city, the Twenty-second district

school being only one of the many which have been so equipped. The machines will be used in teaching music, for aid in chorus work and for concerts and other entertainments, which have become a part of the present day school life. Mr. Parker has been successful in placing the Victor in a majority of the seventy-five public schools of the city.

No appropriation has been made for talking machines by the board of school commissioners, but the money is raised by the teachers and pupils, who have come to see the advantage of having a talking machine in the buildings. Various ways were taken in some of the schools for raising the necessary funds for the machine and records. In some cases popular subscriptions were taken up, while in the majority of cases the money was obtained by giving entertainments for which an admission fee ranging from five to twenty-five cents was charged.

Mrs. Frances E. Clark, supervisor of music in the Milwaukee public schools and a prominent member of the music teachers' national organization, is enthusiastic over the results being obtained with the talking machine as an aid in music teaching. She says:

"The results obtained by using the Victor have convinced me that it is the most successful method to follow in teaching and developing musical appreciation, tone and voice culture, and in chorus singing. It gives an exact interpretation of all selections as rendered by grand opera stars."

"Business is picking up in excellent shape," said L. C. Parker, manager of the talking machine department of Gimbel Bros. "Although the summer months were rather slack, we are now getting all the business we can handle. It has been necessary for us to increase our working force and we will double the size of our stock during the next month."

Plans are being made to have the Milwaukee county board to commence legal proceedings against Joseph M. Carney, court reporter in Judge W. J. Turner's branch of the circuit court, to compel him to return to the county a phonograph and cylinder scraper, which he is using. This action will be taken as a result of a movement recently started to compel the court reporters to furnish their own material, the phonograph and scraper being among the apparatus necessary to carry on the work in that office.

The Charles H. Schefft & Sons Co., recently organized and incorporated, will carry on the talking machine business formerly conducted by Eichholz & Schefft at 839 Third street. The building is being remodeled and redecorated throughout and will be enlarged so that a larger stock may be carried. The company is capitalized at \$5,000, with Charles H. Schefft, of the Ross, Schefft & Weinman Piano Co., and his two sons, O. C. and Ernest, as incorporators. The business will be in charge of the two younger members of the concern, both of whom have had considerable experience in this line.

Milwaukee and the larger cities of Wisconsin will prove a good field for the business phonograph during the next few months, according to the statements of W. W. Quantrell, of the Edison

Business Phonograph Co., of New Jersey, and J. H. Becker, Jr., of the Hoeffler Manufacturing Co., of Milwaukee. These men recently started a campaign in behalf of this machine and report excellent results.

A practical demonstration was given before each person that was called upon and as a result, a number of trials and prospects have been secured. "Prospects for the business phonograph are 200 per cent. better at the present time than ever before," said Mr. Becker. "Taking the machine in his office for a direct demonstration is the most satisfactory manner of interesting the busy business man."

Large crowds are being attracted to the store of the Hoeffler Manufacturing Co. every Saturday evening to hear the concerts given on the Victor Auxetophone. The comic mirrors, which have been placed in the display windows of the store, are also attracting attention, with good results.

The September list of Victor records is an exceptionally popular one, according to the statements of the local dealers. Number 31794 is the greatest favorite, but the entire list is selling well.

Roy J. Kieth, of the Talking Machine Co., of Chicago, called upon the Milwaukee trade recently.

The force at A. G. Kunde's Columbia store, 516 Grand avenue, will soon be increased as the result of the recent arrival of Miss Dorothy Kunde at the Kunde home, who will, no doubt, be taking full charge of the business before many years have passed.

The new B Z disc model Columbia will soon appear on the local market and Mr. Kunde is preparing for a good trade on the new design. Many inquiries have been received, but he expects the first shipment to be sufficient for immediate needs.

"The store with the revolving records in the window," is the name that is being applied to the downtown Columbia store as a result of A. G. Kunde's novel window display. Two indestructible records are attached with wires to an upright bar, shaped like a T. This is kept revolving continually and as the records are whirled about they strike against two bricks. The bricks are rapidly worn away, while the records show few signs of their hard usage.

Mr. Gibbs, of the Rudolf Wurlitzer Co., Chicago, visited in Milwaukee recently.

The plant of the New Idea Cabinet Co., recently opened in the McGreal building, is now in full operation. The New Idea disc record cabinet, invented by William Schmidt, traveling representative for Lawrence McGreal, the well-known talking machine jobber of Milwaukee, is finding a ready market, and a steadily increasing flow of orders is being received.

An Irish woman was in the store buying some sheet music for her daughter, and after she had bought what she wanted she started to leave the store, a subscription agent of The Philadelphia Record met her coming out of the store as he was about to enter it, and he said: "I beg your pardon, madam, but do you take the Philadelphia Record. The woman replied: "What the devil would I do with that record when I don't have a phonograph to play it on,"

IMPORTANT COPYRIGHT DECISION

Of Interest to the Talking Machine Trade Throughout the World, Particularly Those Having Relations with Mexico, Recently Handed Down by the Court of Cassation—Suit Brought Against J. Espinosa Who Represented the Columbia Phonograph Co.—Latter Defended Action and Are Entitled to Credit for Sweeping Victory Secured and Which Reverses Ruling of Appellate Court Which Fined Espinosa \$750 and Sentenced Him to 60 Days Imprisonment.

As the leading American manufacturers of records have established business relations of importance in Mexico, and this trade is growing with rapidity every year, the appended decision of the Court of Cassation will be of direct interest. European manufacturers will also be concerned in the opinion. The suit was brought against Joaquin Espinosa, manager of the Espinosa Phonograph Co., of the City of Mexico, who marketed the product and represented the Columbia Phonograph Co., General, New York, the latter really defending the action, and to whom credit is due for the victory gained.

The opinion of the court is very sweeping, reversing the Trial and Appellate Courts, which had fined Espinosa \$750 and sentenced him to sixty days' imprisonment, unless the fine was promptly paid or an appeal taken. There is no appeal from the decision of the Court of Cassation, and thus the criminal proceedings are brought to an end. The matter of whether or not there is any civil responsibility for the sale of copyrighted talking machine records in Mexico, without permission of the owners of the copyright, is now under consideration by the Supreme Court of the Nation, and a decision is looked for any day. The opinion in full follows:

Statement of Facts.

Considering Firstly: That as the appeal is limited to the first chapter of the complaint because the others have not been legally presented, it is only necessary to examine the judgment of the lower court as far as it condemns Espinosa to a real penalty, on the ground that he is responsible for the piracy of an artistic work under the terms of article 304 of the civil code; and decide whether that sentence made a correct application of the law or not, as affirmed by the appellant in presenting the grievance he complains of in the first chapter of his appeal.

Secondly: That the fourth division undoubtedly based its sentence on Espinosa on the accusation presented by the district attorney, who is charged by the law with criminal prosecutions and, as can be seen, it is conceived in the following terms: "Joaquin Espinosa is guilty of having traded in Mexico in the pirated works 'Machaquito' and 'Blanco y Negro,' property of Rafael Gascon." The division accepted this accusation, and held it proved (as stated in the second consideration) that the impression of the phonograph discs with the music of 'Machaquito' and 'Blanco y Negro' constitutes a real reproduction of those pieces, executed in this case without the consent of the author, and by a different process to that employed by him in the original; also, holding, as proved by the declaration of Espinosa, that he traded in discs and sold them in this city.

It concluded with the statement that the case comes fully within the provisions of article 1,204 of the civil code, and that under article 1,233, it is necessary to apply the penalty specified in article 432 of the penal code. These records of the prosecution, which decided the sentence, taken in connection with the pleas presented against them by the appellant in chapter 1 of his complaint, under revision, necessarily lead to a study of these two questions: First—Does the impression on phonograph discs constitute a reproduction of the musical pieces engraved thereon in such manner as to constitute piracy? Second—In such case, does the sale of those discs in itself render the vendor liable to punishment under the Penal Code?

Reproduction of Music Detined.

Thirdly: That the question raised with respect to the extent of the privileges enjoyed by the authors of literary or artistic works, has been much debated by authorities who treat of the subject, and has been the subject of much litigation when the copyright has been taken out; but this diversity of opinions must not call our attention, because it arises from the diversity of legal provisions, and in many cases from the silence or deficiencies in the laws which do not foresee the advance of the arts which might invade those rights; but in order to decide the concrete questions under debate, as studied by the Appeal Court and specified in the first consideration, it is necessary first to state exactly what is understood by reproduction. To begin with, it is to be noted that to reproduce, in the grammatical sense of the word, is to produce again, and this means that the reproduction must be equal to what is produced for the first time; otherwise, if a new or different thing is produced, there will be a new production but not reproduction.

Our law accepts this interpretation, as article 1,182 expressly provides that the proprietor of a literary work has the exclusive right to publish and reproduce, as often as he considers it desirable, the whole or part of the original work; and we at once see that, in such case, the reproduction is understood to be the new publication of the same original work, either wholly or in part. Article 1,145 provides that when an author has assigned his work, and afterwards makes substantial variation in the same, he can publish this corrected work without the proprietor of the original having any right to prevent him; and this proves that in the opinion of the law, there is no reproduction in such case, because the corrected work is not the original. Article 1,199 prohibits the author from producing, by a similar art, the work which he has executed and the ownership of which he has assigned to the person who ordered it made; which leads us to understand that the prohibition does not subsist if he executes it by a different art, and doubtless that is because in such case there is not a reproduction of the original work, in the true sense of the word.

A Record Not Strictly a Copy

Some foreign legislatures have adopted this view, as can be seen in volume 38 of the "Digest of Legislation," by Dalloz, in treating of literary and artistic copyrights; and where this author treats of the different opinions expressed and decisions given as to whether the translation of a work can be considered as piracy, he concludes, in paragraphs 352 and following, with an expression of his own opinion that, in spite of the fact that the translation is substantially the whole of the original work, from its title, its object, its plan, its doctrine and even its expression, that is to say, everything that really constitutes the work, as the language in which it is written is only an accident, it must not be considered a reproduction, and therefore, a piracy, because in the translation there is a new factor, which is the intelligence of the translator.

All this demonstrates that the word reproduction in this matter expresses the idea of a new publication of the original work; and, therefore, it may be fairly concluded that the impression of phonograph discs is not a reproduction of the pieces which are engraved; but, furthermore, it must be borne in mind that the impression is not made by copying the piece, but by fixing the sounds which are produced in the execution of the same. For this reason what the disc reproduces is the execution of the piece as it sounded when the impression was taken, and so true is this that if any note is substituted in the execution, any transposition is made or any irregularity, it is recorded on the disc, which for this reason can no longer be said to be an exact copy of the piece, but an exact reproduction of its execution.

Incorrect Application of the Law.

Fourthly: That according to this theory, articles 1,191 sub-clause IV, 1,196 and 1,201 sub-clause IV, of the civil code, as referred to in the second consideration of the sentence appealed from must be held incorrectly applied, because as the impression on the discs is not a reproduction of the pieces, they do not come within the provisions of those articles; but, as under our code and under the interpretation given by commentators to similar laws, every piracy implies a civil liability on the part of the person executing it, which resolves itself in the payment of loss and damages to the author whose rights have been infringed, as well as a criminal liability which is satisfied by the imposition of a real penalty, the lower court could apply those articles in support of the civil liability, which is not the subject of this decision, as well as of the penal liabilities, with which this decision exclusively deals. From this it results that the incorrect application here dealt with is that which has been given in the close connection which is claimed between them and articles 1,204 and 1,233 of the civil code, which are the real basis of the sentence.

Fifthly: That in its third consideration the Appeal Court says: "That by the confession of Joaquin Espinosa, manager of the Espinosa Phonograph Co., which fulfilled all the requisites of article 207 of the code of penal procedure, to the effect that he had traded in Mexico and sold phonograph discs which contain the pirated pieces 'Machaquito' and 'Blanco y Negro,' it has been fully proved that he committed the piracy which is referred to under article 1,204 of the civil code"; but as we have seen the engraving of the discs does not constitute piracy, the condition required under that article is wanting in this case, and, therefore, article 1,233 of the civil code and articles 432 and 218 of the penal code cannot be correctly applied to the case.

No Proof of Piracy Furnished.

Sixthly: That if the provisions invoked by the court below in imposing the penalty of a fine could not be correctly applied to the case, the result is that such penalty has been imposed contrary to the provisions of article 182 of the penal code, which, therefore, is violated, and gives a reason for the motion for cassation, in accordance with the

provisions of sub-clause IV of Article 514 of the code of penal procedure which has been invoked by the appellant.

Seventhly: That according to Article 535 of the last cited code when it is considered that cassation will lie, this division must constitute itself into a Court of Second Instance and pronounce the decision which is due; but, in order to comply with this duty in the present case, it is only necessary to take into account the different preceding considerations, by which it has been established. Firstly, that no proof has been furnished that the engraving of phonograph discs does constitute a piracy of the musical pieces so recorded, as there is no real reproduction; and secondly, that consequently the isolated fact of trading in those discs does not imply the liability specified in article 1,204 of the civil code, and still less one of a penal character, thus deciding the second question, but to this we must add that no proof has been given in the prosecution of an indispensable factor which would establish the penal liability of the vendor of the discs, and which is, that in making the sale he proceeded with malice, because besides proving the fact of the sale, it is also necessary to prove that it resulted in injury to the proprietor of the work, and that it was made with a full knowledge that it violated a right.

This requisite is indispensable, if we are to consider the act as punishable in the same way as a fraud is considered an offense, and it requires proof of all its factors. We cannot assume the existence of malice as specified in Article 9, because in the event of any infraction having been committed it would not come under a penal but under a civil law. As to the necessity of demonstrating malice in these cases we can refer to what is said by Dalloz in his work, page 493, paragraph 334, and by Carpentier in his work on French law, volume 31, page 891, paragraph 507, and following:

Sentence of Lower Court Reversed.

Eighthly: That if it has not been proved that the discs which were sold constituted, according to legal technicism, a pirated work, or that the sale was made with malice, the confession made by the manager of the Espinosa Phonograph Co. that he traded in such discs, is not enough to impose a penalty; because this, at the utmost, is the proof of an unimportant fact, and places the accused under the protection of Article 8 of the penal code as long as it is not proven that there were circumstances to bring him within the provisions of Article 1,233 of the civil code, and others relating thereto in the penal code, and, therefore, as long as such proofs are not rendered the accused must be acquitted in accordance with Article 203 of the code of penal procedure.

For these considerations, and on the grounds stated, it is declared:

1. That the sentence pronounced by the fourth division of this tribunal on the 14th of April, 1910, is hereby reversed only as to the penal part of that sentence, and to which the first chapter of the motion for cassation refers, or otherwise the first and third portions of that sentence.

2. The sentence of May of last year, pronounced by the second investigating judge, is hereby reversed, only in the penal part, in which Joaquin Espinosa, as manager of the Espinosa Phonograph Co. was condemned for the offense of fraud to the payment of a fine of \$750 and to a reprimand.

3. Joaquin Espinosa is acquitted from the charge made against him of having traded in pirated works, for which reason it was requested that the penalty for the offense of fraud should be applied to him.

Let it be notified and the records passed to the fourth division with a certified copy of this decision, for legal purposes and the present docket be in due time filed. It was so ruled by unanimous vote of the justices who formed the first division of the Superior Tribunal of Justice of the Federal District, and who subscribe:

Ang. Zavala—Julio Garcia—Arcadio Norma—Angel Zimbron—F. Lopez Roma—M. E. Mercado.

Won't You Have a Lesson in Spanish?

It's so easy to learn by the I. C. S. system—and a knowledge of Spanish is so useful nowadays.

The I. C. S. system of language instruction by means of the phonograph makes easy the mastering of a foreign language, and appeals with compelling power to thousands. The dealer in phonographs who does not carry I. C. S. Language Outfits is neglecting a quick and sure way to increase his business. The new \$35 Language Outfit of the I. C. S. is a marvel. It represents the highest art in the teaching of languages, and embodies a method that has won the warmest praise of thousands qualified to speak authoritatively. The Spanish, French, and German Embassies at Washington, as well as the leading colleges, have cordially indorsed the I. C. S. method of teaching languages.

The I. C. S. Language Outfit consists of an Edison Gem Phonograph made especially for language work; small horn; headband hearing tube; oil can; and 25 Conversational Records teaching pronunciation guaranteed to be absolutely correct, with native intonation and inflection. In addition to these Conversational Records there are pamphlet Instruction Papers teaching the theory of the languages. The new Outfit is at one and the same time the best and cheapest ever offered—the price being only \$35.

If you want to increase your business, write to-day for full particulars.

International Correspondence Schools

Box 918, Scranton, Pa

Your customers want

the instrument that renders the best of every character of entertainment from Grand Opera to Vaudeville, as it is rendered on the stage—the instrument that plays both Edison Standard and Amberol Records—

the instrument that has the permanent reproducing point that does not scratch or wear out the record and never needs changing—

the instrument on which they can make their own records at home—

the instrument that Thomas A. Edison invented and improved and brought to its present perfection as the greatest entertainer of any age—the Edison Phonograph.

National Phonograph Company

59 Lakeside Avenue, Orange, N. J.

The Edison Phonograph

is the *complete* sound-reproducing instrument. An instrument that only reproduces sound and on which records can *not* be made at home is only *half* an Edison.

The Edison offers your customers all that any other sound-reproducing instrument can offer, besides its own great features—Amberol Records, sapphire reproducing point and home recording.

It offers you all these big selling features that you have to fight against when you handle other lines—with the Edison all the arguments are *on your side*. Write your Edison jobber today.

Long Distance Telephones—Numbers 4677 and 4678 Gramercy. Cable Address: "Elbill," New York.

NEW YORK, SEPTEMBER 15, 1910.

THERE are a good many buyers in New York—buyers who to-day practically fill every hotel in New York, and, by their presence, a new impetus is given to business, and, broadly, there is hardly an unfavorable element in the situation.

There was a time awhile ago when the people were frightened by the bear clamor and were buying only from hand to mouth, but recently there has been a decidedly more optimistic feeling in financial, commercial and agricultural circles.

In spite of reports, it seems that some states will surpass all previous records in wheat raising.

The country is on a sound financial footing and the crops this season will be fully up to those of an average year.

So, it would seem that the business men should feel encouraged to go ahead and make their plans in a large way for early delivery of stock.

Talking machine men should show their confidence in the business future by placing their orders early.

Some of them know what trade they lost last year simply by holding back until a very late period in ordering stock.

Business will be conducted in a good substantial manner during the fall and winter months and the man who is in a state of preparedness is the one who will reap the fullest benefits from such a condition.

The man who waits until the last moment before ordering runs a great risk—a risk that it doesn't pay to take.

MANY piano dealers from time to time are taking on talking machines and some are meeting with splendid results.

A good many, however, do not understand the possibilities of this business and

they seem to feel that the mere securing of an agency for a leading talking machine should send the people to their establishments in throngs.

It is perfectly ridiculous to believe that a special business would be successful without special treatment.

The talking machine business is no different from any other.

It requires intelligent treatment through the application of sound business moves.

Simply to take on talking machines and store them away in the establishment and expect that the business will pay is absurd, to say the least.

Dealers should plan systematic campaigns and they should interest the people.

There are in this broad land millions of homes which it is possible to equip with talking machines, and, therefore, tremendous educational work should be carried on to interest people and acquaint them with the marvelous powers of the modern talking machine.

These wonderful creations have been admittedly powerful educators, in that they have carried a knowledge of classical music into the homes of people where such music would have been unprocurable save through the mediumship of the talking machine.

But the talking machine requires intelligent treatment just the same as any other special product.

In other words, there must be constant activity on the part of those interested to interest the people.

THE small talking machine man must wake up and inject a little ginger into his business methods, or he will lose in the game.

The talking machine man in the small town should not permit his local clients to get away from him and gravitate to the big cities, where they are won over by the glamour of some of the great talking machine emporiums, but the small merchant will surely lose a lot of trade which should naturally come to him if he does not become keenly alive to the demands of the local situation.

The home merchant is entitled to special consideration, and there is no reason why residents in the small towns should not patronize the home dealers for everything, and they will, but the small dealer must be just as active as the larger merchant.

The big houses have made fortunes by their up-to-date policy, and the small dealers can largely increase their income by studying the methods adopted by some of the big men of the country.

MEN all the time are appreciating more and more the value of publicity.

In truth, the growth of publicity in all forms indicates a high standard of social being and brings about ethical and moral progress as well as material advancement.

To desire better clothes, better houses, better food, is to improve our ethical condition and our moral standing as a nation.

To want the luxuries of yesterday—the necessities of to-day—is simply raising the standard of our moral and ethical being, so that intelligent publicity is a good investment

not materially alone, but morally and ethically.

But the average business man, however, does not always view it in this way.

He makes an investment, and publicity is an investment, with the object in view of securing direct returns.

In most cases he gets returns.

If it were not so the enormous avenues of publicity would have been clogged up with the flotsam and jetsam of the business world long ago.

THERE are many ways in which the small merchant can secure a much-needed local publicity.

If he does no more than get out a few invitations to people asking them to come and see the up-to-date talking machine on such a date he will be doing something, and the probability is, if he will try out this entertainment form two or three times, he will be surprised at the results won.

There are so many people who do not understand the modern talking machine—people who have not the remotest idea of its wonderful powers, who might be interested sufficiently to drop into the local warerooms just to satisfy their curiosity.

If the men and women in the great cities are interested sufficiently to oftentimes crowd the exhibition rooms when special entertainments are given, then certainly there should be enough people in the small towns who would respond to the invitation sent them by the local dealers in a sufficient number to make the proposition interesting at least.

ONE of the very excellent reasons why the financial showing made by certain stores compares poorly with that of their competitors is the lack of intelligence and training exhibited by sales people in those stores.

Inasmuch as the salesmen or saleswomen are a direct link between the firm and the public it is understood that the concerns in question devote little attention to the instruction and development of this important branch of the store's personnel.

We have seen salesmen in some stores exhibiting talking machines and records in the most unattractive and indifferent manner.

They were not doing justice to themselves or to their employers.

In fact, they were repelling trade rather than encouraging it.

Some of the great concerns have awakened fully to their needs in this particular line and they give special instructions to their salesmen.

They hold more or less frequent meetings with the staff at which talks are given by members of the firm, heads of departments, etc.

They combine in the maintenance of a school of salesmanship.

Now, systematic training is a good thing and will help everyone in the business.

There is unquestionably a great future for merchants who recognize the important part which tactful salesmen play in their business.

Tactful salesmen mean an increase in sales—a growth of business—an augmentation in profits—all of which is most desirable in the talking machine business.

TRADE ON THE PACIFIC COAST.

Business Has Shown a Marked Improvement During the Past Few Weeks, Particularly in San Francisco—Convention of Native Sons Will Bring Quite a Crowd to the City—Dealers Buying Conservatively—Pacific Phonograph Co. Developing Plans—Big Shipments of Victrolas Arrive at Sherman, Clay & Co.—W. S. Gray Visiting with Geo. W. Lyle—The News of the Month in Detail.

(Special to The Talking Machine World.)

San Francisco, Sept. 3, 1910.

Quite an improvement has been noted in the talking machine trade of the Pacific coast territory during the last few weeks, and while business is not exactly booming at the majority of places, there is a very satisfactory movement for so early in the season. The improvement has been especially noticeable in San Francisco, where retail business, which was very quiet for a time, is now fairly active. The prosperity of the outside communities now seems to be having its effect on the city, and local dealers look forward to an extremely busy fall. The convention of the Native Sons, to be held here September 8-10, will probably have an adverse effect in some lines, but it is believed that high-class records will have a large sale at that time. Country people will be here from all parts of the state, and as several local dealers are known to have very complete stocks on hand many will doubtless take the opportunity of getting records not usually carried in the smaller stores. A good many dealers will also be here at that time, and intend to visit the wholesale houses and place large orders for their fall supply. The Native Sons' celebration will probably open the fall season in the local retail trade, and if so the busy season will start considerably earlier than last year.

Outside dealers have been buying on a rather small scale for the last two months or more, but in view of the increasing demand they have felt lately they are now beginning to order on a larger scale. At the same time a few new stores are being started, and altogether the wholesale business is decidedly active. Arrangements for wholesale stocks were completed some time ago, and for the last month arrivals have been extremely large. It is safe to say that supplies of all lines of talking machine goods in the hands of distributors in this territory are now larger and more complete than ever before. While many orders have been received from the trade, deliveries from the jobbers have not yet commenced on a large scale, but shipments will increase rapidly for the next month. Stocks will be kept as complete as possible, and jobbers are prepared to handle an enormous volume of business, but from the way the season is opening stocks are likely to be badly depleted before the end of the year.

The Pacific Phonograph Co. have been extremely busy receiving and arranging their new stock, the shipments including a very large number of Amberolas. The company are having great success with this machine, which Mr. Pommier says is now being placed in many parts of the coast where high-priced machines have never before been salable. It seems likely that it will be very difficult to keep these machines in stock, as most of those recently received were required to fill orders. The company have about decided to take on another floor, as it is becoming evident that the space now occupied will be inadequate during the rush season. The company are keeping up their activity in the northern part of the territory, and have added several new accounts in that district within the last month.

Andrew G. McCarthy, who manages the wholesale Victor business of the coast for Sherman, Clay & Co., has been busy looking after the large arrivals of goods for the last few weeks, and states that the stock of machines is now complete. In view of the amount of goods ordered, and the arrangements made for prompt shipment, Mr. McCarthy believes he will be able to meet all requirements promptly from now until the end of the year, avoiding the delays which occurred at times last fall. Arrivals of Victrolas have been espe-

cially heavy, and for the first time this year there are more of these machines on hand than are needed for immediate delivery. Mr. McCarthy is highly gratified with the manner in which the season is opening, as there has been quite a rush in both wholesale and retail departments most of the month. Sherman, Clay & Co.'s retail department is keeping up its efforts with the Victrola, and is expected to sell more of these machines this fall than ever before.

Walter S. Gray, Pacific Coast manager for the Columbia Phonograph Co., left a couple of weeks ago for the North to meet George W. Lyle, general manager of the company. In company with Mr. Lyle he is now making a tour of inspection through Oregon and Washington, but is expected at the San Francisco office in a few days. They will probably continue the trip through southern California. The company's local distributing office is well supplied with goods at the moment, but is not likely to remain so very long, as heavy orders are coming in from the retail agents all over the state.

Wm. Stiedham, who has had charge of the company's business at Los Angeles for some time, made a visit to the San Francisco office last month. He is enthusiastic over the progress which Columbia goods are making in the southern part of the state, and looks for an enormous business in that district for the next few months. He is especially pleased with the growing demand for the new model Grafonola machines, which, notwithstanding the large demand for them here and in the North, are probably in greater demand in southern California than elsewhere.

R. M. Bird, who has been connected with the talking machine business in the East for several years, has taken a position under Mr. McCarthy in the wholesale department of Sherman, Clay & Co.

P. T. Bacigalupi, Jr., of Peter Bacigalupi & Sons, and Mr. Douglas, of the Victor Talking Machine Co., have been on a hunting trip in the mountains of Marin County.

Peter Bacigalupi & Son find their local retail business picking up considerably at present, though they say there is still plenty of room for improvement. They have been holding a special sale of 10-inch records, at which they cleaned out a large amount of old stock. They have so far been unable to dispose of their lease, but hope to do so in the near future, as with the opening of fall there is considerable inquiry for store space.

The Columbia talking machine department of Kohler & Chase is still covering the local retail business in good style, and has had a good run

for the past month. This company's branch at Sacramento has been discontinued. A new member of the selling force at the local store is T. W. Hindley, who was formerly with the Columbia Phonograph Co. in New York.

INFLUENCE OF THE WORLD.

Remarkable What Value Lies in Advertising in a Good Trade Paper

That The World wields a tremendous influence in all countries is well known to advertisers and we have on file many letters which we have received from clients in different parts of the country telling us of the splendid returns which they have received through the exploitation of their specialties in the columns of this publication.

The subjoined shows the way a temporary advertiser has been benefited by this publication:

New York, Sept. 1, 1910.

Edward Lyman Bill, Esq.,
New York City.

Dear Sir:—

Regarding our Ad. in the March issue of the Talking Machine World, we take pleasure to state that the one Ad. has brought us orders from all parts of the world.

Even from New Zealand, from Dunedin we had an order this morning. It is remarkable what value lies in advertising in a good trade paper.

We are going to have again an Ad. on a still bigger scale in the October issue, and trust to receive the same fair treatment as previous.

Wishing you success for your paper, we beg to remain,

Yours respectfully,
(Signed) The Int. Record Program Co.,
Maurice Lange.

ADVERTISING APHORISMS.

Any one can write an advertisement—but will the other fellow read it? That's the test.

Your business story is of interest to no one but yourself until you make it so—by interesting copy.

Not by salesmanship, but by service, will the advertising agent finally win.

Don't chuck your advertising into a hopper. There's a better way.

Good taste does not make advertising cost more—it makes it *worth* more.

Advertising—of the right sort—should reduce—not increase—your selling costs.—Printer's Ink.

When in need of Talking Machine Needles

go to

FR. REINGRUBER
Schwabach, Bavaria

who manufactures every kind,
without exception, at prices
that will surprise you, and of
the Best Quality only.

A Chance For Every Phonograph Dealer to Grow **BIG**

*If you are looking for the **RIGHT** phonograph proposition,
with the **RIGHT** co-operation, investigate at once the*

U-S Combination Phonograph

During the past four months we have proved that a particularly opportune time has arrived for the introduction of a **practical** and **genuinely musical** phonograph. Our proof comes in the shape of letters from representative dealers in all parts of the country, who, after their experience with the ordinary phonographs now on the market, are not only interested, but really enthusiastic over the U-S Combination Phonograph and U-S Everlasting Records.

This enthusiasm results not only from the mechanical excellence of the line, but from the **big sales** and increased profits in plain sight of every dealer who handles the U-S.

These dealers—and they are, many of them, big dealers already—are interested in the **mechanical points of superiority** which the U-S maintains over any other line.

They speak with enthusiasm about the **AUTOMATIC CHANGE REPRODUCER CARRIAGE** by which a change is instantly and automatically made from a two-minute to a four-minute record, or vice versa, by a twist of a shift key.

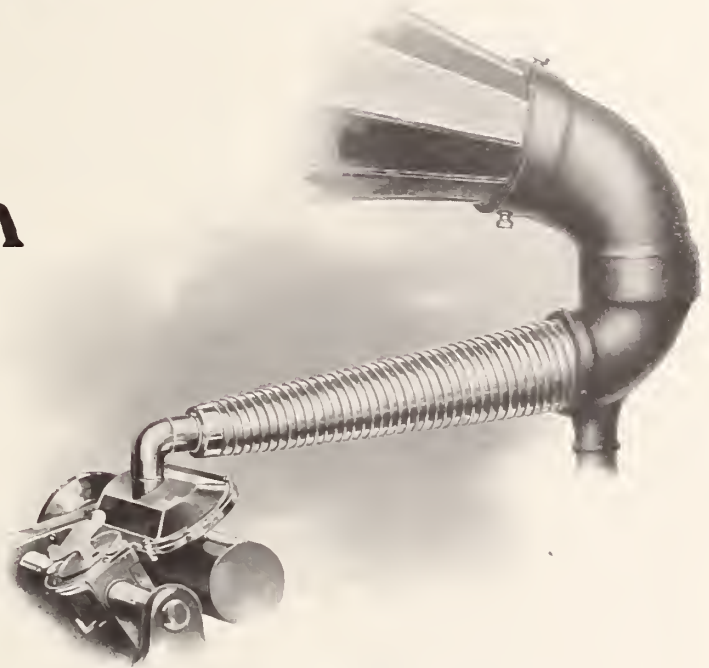

They endorse without qualification our claims for the **enlarged and sensitive diaphragm**, which gives the greatest possible musical detail, and the **Mandrel Pulley Balance-Wheel**, which keeps the reproduction always true to pitch.

They are enthusiastic, and rightly so. They are recognizing the possibilities for profit in this new line, and from this fact alone it would be obvious that the innovations we have introduced into the phonographic field are **BIG IMPROVEMENTS**—the very ones you and your customers have been waiting for.

IMPORTANT ANNOUNCEMENT ON THE NEXT PAGE

The New Flexible Tone-Arm Which Makes the U-S Still Better

The U-S Flexible Tone-Arm

Again the U-S scores—with an improvement which surpasses anything yet accomplished since the invention of the U-S Automatic Reproducer Carriage.

All U-S machines, from the lowest priced to the magnificent Peerless, are regularly equipped with the U-S Flexible Tone-Arm. By means of this device the reproducer carriage is given a free range of travel, and the bell of the horn may be turned to any desired angle while the machine is in operation. Not only this, but the Flexible Tone-Arm secures a **Greater Amplifying Radius** for the sound waves, and brings out the detail in a way that is truly remarkable. The U-S is the only phonograph which can be equipped with this device.

Taking this in connection with other U-S improvements, is there any doubt left in your mind that this is the proposition for you? Make the most of it by getting in touch with us at once. Understand that we are back of you at all times with the fairest and heartiest kind of co-operation—and with goods the like of which were never offered you before. Our plans are fully matured, and based on long experience. We are growing fast—this is a magnificent opportunity for the best dealers everywhere to grow with us. The U-S offers bigger profits than any other phonograph line.

Fill out the coupon and mail to-day.

CLEVELAND'S BUDGET OF NEWS.

Following Close of Vacation Season Dealers Are Now Perfecting Plans for a Large Fall Trade—Activity with the U. S. Phonograph Co.—Their New Machines, of Which a Catalog Is Now in Printer's Hands, Continue to Grow in Favor—A. W. Robertson's Canadian Trip—De Luxe Grafonola Used by the D. & C. Navigation Co.—Good Victrola Sales at Buescher & Sons—Anderson Succeeds Kellogg at McMillins—Other Comments.

(Special to The Talking Machine World.)

Cleveland, O., September 8, 1910

The vacation season and the weather were responsible for a somewhat inactive talking machine trade during August, but in the aggregate a large volume of business was done. Dealers are now turning their attention to the fall trade, and a decided improvement is already manifest, as indicated in their optimistic talk. Distributors report orders are becoming more numerous from the outlying villages and cities, and September has opened up in the most satisfying manner. Reports locally and from outside territory are all of a general tenor regarding a favorable fall trade, and preparations are being made generally to meet it.

Mention was made of the Hays Stop in last month's World. It is an ingenious invention, intended to automatically stop any disc machine. It is being sold by the Cleveland dealers and is highly commended. The manufacturers announce in this issue they are ready to supply the trade.

Mr. Friedlander, of the Bailey Co., is nursing a talking machine invention which he says will be a winner when placed on the market.

O. E. Kellogg, for the past year manager of the piano and talking machine department of McMillin's music store, has resigned and accepted a position in the player-piano and talking machine department of the Meiklejohn Co., of Pawtucket, R. I. He has left many friends in musical circles in Cleveland.

Rev. A. F. Houser, known as the "fighting parson," of Erie, Pa., has accepted a call to Cleveland. Among other things Erie at first considered startling, Mr. Houser started a motion picture show of his own for the children of his church. He expects to start one here.

H. E. McMillin has returned from his vacation at his summer home up in Michigan, much improved in health.

E. E. Houshey, for the past three years in the piano department at McMillin's, has accepted a position with the Wilkins-Redmond Co., at Columbus, O.

Activity prevails at the headquarters of the U. S. Phonograph Co., and everybody connected with the concern is optimistic and grows more enthusiastic as time goes on. "We believed that our machines as they stood four months ago were the best on the market," said an officer of the company. "Equipped with the automatic shifting reproducer carriage and the mandrel pulley balance wheel, we got results from them which were astonishing. It seemed that we had reached the goal of perfection in phonograph construction. But now

we have added yet another improvement in the U. S. flexible tone arm, which insures a sound-proof flexible connection from the reproducer to the horn, yet allows the horn bell to be moved at will without interfering in any way with the music. Moreover, we get a greater amplifying radius than is possible with any other connection, and the quality of tone is still further improved. We are going to furnish this flexible tone arm with all styles of U. S. machines, and are confident that it will prove an important feature in our campaign."

A new catalog of U. S. machines is under way, and the company promises that it will be one of the finest phonograph catalogs ever issued. In its forty pages it will show the complete line of U. S. machines reproduced in their natural colors, and will present in forceful detailed form the various points of superiority the company claims for its products.

A. W. Robertson, of the G. J. Probeck Co., enjoyed his vacation amid scenes of his earlier days. He has returned browned and invigorated, and says he enjoyed every hour and breath of air while away. "On my little trip into Canada," he said, "there was no getting away from Columbia graphophones and records. In all the little country towns, and in the large ones, the graphophone was in evidence. In the smaller towns they are very much appreciated and help to fill in many an hour that otherwise would be dull and unprofitable owing to the lack of means and methods for entertainment. I was pleased, and with the other passengers delightfully entertained, on the steamer coming down the lakes, with the music furnished. The D. & C. Navigation Co. are using the De Luxe Grafonola on board their fine passenger vessels for the entertainment of their patrons. Our August business shows a substantial increase over that of the same month of last year. Record sales are very satisfactory, both of the disc and cylinder product. Grafonolas are moving well, especially the new 'Mignon' type selling at \$150."

Business was reported to have been rather quiet at McMillin's during August, but from the favorable increase in trade in the past few days a very optimistic feeling regarding the future was expressed.

The Eclipse Musical Co. report conditions very satisfactory. "Business is picking up," said Mr. Towell, "and we are laying in a large stock for the fall trade. Sales of machines and records are good and daily increasing, and I judge from all indications that we are going to have an extraordinarily large fall trade. At any rate, I am making arrangements to meet any demand in the wholesale line, and shall be disappointed if the talking machine business is not exceptionally good from now on."

The past month has been a fairly busy one with W. H. Buescher & Sons. They report sales of a number of Victrolas, including the Victrola XVI and Victrola XX, whose perfection of finish and mellow richness of tone at once captivate the would-be purchaser. They state the call is for the higher priced machines, and that they are having a good, large, steady trade in Red Seal and the

other higher grade records. Mr. Buescher expressed himself well satisfied with present conditions in the trade, and that the steady improvement since the first of September foretells a prosperous fall business.

Business was said to be fair all around at the Bailey Co.'s. Mr. Friedlander, manager of the talking machine department, talks very optimistically regarding prospects. He stated that Victrolas were selling well and that the demand for Red Seal records was exceptionally good. He thinks the future has great things in store for talking machine dealers.

Brown Bros. have an attractive and well-arranged talking machine department in their large furniture establishment, and give more than usual attention to it. They stated business was fair for Columbia graphophones and double disc records, both native and foreign.

H. L. Tinker, manager of the talking machine department of the May Co., is a very busy man these days in preparation for the removal to new and enlarged quarters now being fitted up. Mr. Tinker said: "Our trade for the month of August averaged about normal. Business is now perceptibly improving. The demand for Victrolas and Victor Vs is very good, as it is also for the Edison machines. There is an excellent and increasing demand for Zonophones and records, which we have just added to our stock, and are well pleased with results so far. We are having a fine record trade, and the Music Master horns are selling readily to all discriminating purchasers."

Anthony Samson, a jeweler at 6209 St. Clair avenue, states he is doing a most satisfactory business in Columbia machines and records.

Charles I. Davis, centrally located on Euclid avenue, is securing a large and increasing business in sheet music and novelties, and is well pleased with the success of his talking machine department. He handles the Victor and Edison goods, and states that sales of both machines and records are good.

J. J. Anderson has accepted the position at McMillin's music store vacated by Mr. Kellogg. Mr. Anderson has been with a local piano company for the past three years, and prior to that was for several years with A. C. Stiner at Johnstown, Pa. He has made many friends in Cleveland who will be glad to greet him in his new position.

The talking machine business at Collister & Sayles' during August was said to have been very slow, but that it was now improving, and that sales of both machines and records in both the retail and wholesale departments are more satisfactory. Manager Dorn anticipates a large fall trade.

"We are doing very well in our talking machine department," said Mr. Goodman, of the Goodman Piano Co., "and are garnering a great piano trade." It was stated trade hadn't been so lively, but that it had considerably improved since the 1st, and the prospects very encouraging.

John Reiling states that trade is fair and that the Columbia machines and records are growing in favor with West Siders. Robbins & Co., Fleischim & Smith, Gottdiner & Wicht, Aldrich-Harvey Co. and Coblitz Bros. all report trade fair with good prospects.

TRADE HAPPENINGS IN LONDON.

Trade in All Sections Shows Up in a Decidedly Satisfactory Form—Cylinder Records Selling Well but Discs Far Surpass Them—Growth in Export Trade—Give Tickets to Exhibition—Much Litigation—Money Paid to Singers—A Sherlock Holmes Advertisement—Gramophone Co.'s Plans—Something of the Latest Record Lists—Pope Pleased with Phonograph—New Hough 10" Double Disc—Hot Air Motor for Talkers—The "Register Office"—Awards at Japan-British Exposition—Columbia Co.'s Unique Offerings—Serious Work for the Talking Machine—Gramophone Causes Suit for Slander—Music by Wireless—Anent Foreign Trade—News from the Provinces—Gramophone Co.'s Plans—All the Live News of the Month.

(Special to The Talking Machine World.)

London, Eng., Sept. 7, 1910.

Optimism and satisfaction are the keynote of my reports from the chief centers of industry this month. Wherever I go, traders report steadily increasing sales of machines and records, principally discs. Cylinder products are, of course, going strong, but there is nevertheless much food for thought in the fact that while disc sales are progressive, cylinders are practically stagnant. I refer, naturally, to both sections of trade as a whole. Considered from the point of view of their relation to each other, and without entering upon the eternal controversy as to which is the most musical, one must admit that the majority of buyers favor the disc, on which a greater variety of titles is offered, not perhaps for that reason so much as the fact that the disc reproduction is more to their liking. Against about twenty disc records, there are only four cylinders on the market to-day, and the only one that really counts is the Edison. Amberol records have bolstered-up the cylinder trade, and will keep it going at a fair pace all the time. It has stemmed the tide, and I venture to predict the result this season will be reflected in the turnover of those enterprising factors and dealers who have not relaxed their efforts to maintain trade by reason of the steady development of the disc business.

Export orders also show great improvement. General trade is increasing to the extent of about £8,000,000 per month, and of this a proportionate share falls to this industry. Several large orders have been executed this month, one instance being the dispatch of 120,000 records to Australia.

Litigation has furnished material for much excitement amongst traders this last month or so, and after storm, a calm. It is a relief. Even the litigants are glad to rest on their oars for a time, and pending the appeals, business should continue

along smoothly and uninterruptedly for the season. It is well. The word "Gramophone" is now freely applied to machines and records, but so far no attempt has been made to use the direct-tapered tone arm, although, of course, the sectional arm remains unaffected pending the decision of the appeal court.

A Generous Little Scheme.

The British Pallas Manufacturing Co. have adopted a generous little scheme in the shape of invitation tickets, which carry entry to the Japan-British Exhibition, and incidentally the pleasure of hearing the Radiophone at the company's pavilion in the grounds, which, by the way, is now quite a rendezvous for talking machine men. Such is the popularity of the Radiophone concerts that they are now separately mentioned in the official guide and daily programmes as one of the attractions. Other exhibitions are merely listed.

How Singers Make Money.

It is well known, says a musical contributor in the Telegraph, that large sums are paid to popular artists, who sing into the gramophone. Indeed, it has been said, with what truth we know not, that there are a few stars in the operatic firmament who derive a bigger income from this source than from their actual appearances in public. It has lately been stated that Selma Kurz, the coloratura singer of the Vienna Court Opera, who was received so warmly by the London public when she appeared at Covent Garden a few seasons since, receives £83 for every song she supplies to the gramophone, with a royalty of 10d for each record sold, and that on an average she contributes ten numbers a year. But, in all probability, the royalties paid to the singer would amount to a very much larger sum than she receives for the records she furnishes. One or two more figures have been quoted; but they are not official, and the Gramophone company's representatives are very naturally unwilling to disclose any particulars relating to their contracts with artists. More than once it has been stated that Caruso derives something like £10,000 a year from this source. Very probably the estimate is not an exaggerated one, while the fees paid for their Gramophone records to artists like Melba and Tetrazzini would, if divulged, similarly make one's mouth water, and be calculated to turn in their graves those operatic celebrities of a past generation who lived before the Gramophone was added to the world's wonders.

New Double Sided Disc.

A new double-sided disc of 14 inches diameter will be placed on the market shortly by Messrs. Pathé Freses.

Another Mystery.

4-5. That is all. The riddle will not be solved until next month, when the Columbia Company promise to relieve our suspense. If this sort of thing goes on much longer we shall feel compelled

to consult Sherlock Holmes. It's really getting too tantalizing, isn't it?

Musical Warfare.

The first legal stage of what is known as the Ealing musical warfare took place at Brentford court the other day, when application was made on behalf of Mr. Knight for a summons for assault against Mr. Jenkins, both of Ealing, and also a summons against the domestic servant of Mr. Jenkins for using language calculated to provoke the ire of Miss M. Knight. The dispute has arisen out of complaints against the crowing of the cockerels of one of the parties and the piano-playing of the other. As a counterblast to the fowls, one side ultimately played an electric gramophone all night. Developments are anticipated!

Murdoch & Co.'s Latest Offer.

Encouraged by the success of their Columbia Indestructible standard-thread record, Messrs. Murdoch & Co. are now offering the trade up-to-date and popular selections on a new four minute or 200 thread cylinder at the price of one shilling and six pence. The standard record will in future be sold at the reduced price of one shilling. A real diamond point reproducer, which will play either record, is another new line from Murdoch's. The new products have created great interest in the trade, whose hearty support is sufficient recognition of the company's enterprise.

Gramophone Co's Plans.

Not the least of the Gramophone Co.'s plans for the season will be the establishment of stock rooms in different centers, and this, I am advised, is a particularly important event for the trade, as an entirely new range of machines of the hornless type are to be shown. These will be sold at a lower price than any other machines the company makes, and a big advertising scheme of a liberal nature is contemplated. The Gramophone Co. also announce a special concession to their dealers. Commencing with the September list, each month's records will be sent on approval, carriage paid, providing a minimum of 50 per cent. is retained, an offer which will surely appeal very strongly to business traders. Coming to the September impression, I find therein listed a really fine selection of titles comprising the following: "Lovely Paraphrase" (Josef Nesvadba); "Golden Legend," Evening Hymn (Sullivan); and "Folie Bergere" (Fletcher); The band of H. M. Coldstream Guards. "Phryne Waltz" (Yuleta); and "Dreamlight Waltz" (Benyon); Iff's Orchestra. "Midsummer Night's Dream," Scherzo (Mendelssohn), La Scala Symphony Orchestra. "Ailsa Mine" (Newton), John Harrison; "Son o' Mine" (Wallace), M. Stewart Gardner; "Tommy, Lad" (Margetson), Harry Dearth; "Spring, Her Lovely Charms Unfolding" (Haydn), Miss Perceval Allen and John Harrison; "The Long Day Closes" (Sullivan), Misses Perceval Allen and Edna Thornton, and

The Needle of To-day—The Needle of the Future

An all-British Needle of the finest tone-reproducing quality, discovered after exhaustive laboratory tests in combining the correct extreme in hardness and flexibility. The whole product is British Sheffield Steel throughout.

FROM OUR LONDON HEADQUARTERS—(Continued)

Messrs. John Harrison and Robert Radford; "Gems from The Belle of Brittany" (Howard Talbot), The Light Opera Company; "And His Day's Work Was Done" (T. W. Connor), Harry Carlton; "No News; or, What Killed the Dog?" (Talking), N. M. Wells; "Merry Widow" Waltz (Lehar), (Ocarina), Sig. Mosé Tapiero; and "Air From Concerto" (Goldmark), (Violin), Francis Macmillan and The New Symphony Orchestra.

New Radiophone Catalog.

An effectively printed catalog, containing nice illustrations of the various Radiophone models, reaches me from the British Pallas Manufacturing Co., Ltd., of 33 Goldhawk road, Shepherd's Bush, W. Against each instrument illustrated every particular as to dimensions, style of cabinet, motor and price is tabulated, thus ensuring a convenient and quick means of reference. It will be sent to any reputable dealer for the asking. Another little interesting booklet entitled "Appreciations" contains, as the name implies, a selection of testimonials from all parts of the world. The Radiophone sound box appears to have given universal satisfaction, not only to the regular user, but to many also who have hitherto regarded any kind of talking machine with great prejudice.

The Pope and the Phonograph.

His Holiness the Pope is evidently well pleased with the Idelia Phonograph presented to him on Mr. Edison's behalf, for he has commanded a further supply of records to be sent on. His Holiness also recognizes the advantages of the machine for correspondence uses.

Hough Co.'s New 10" Double-Disc.

Messrs. J. E. Hough, Ltd., will shortly have a new 10-inch double-disc ready. By reason of its beautiful surface it will be known as the Edison-Bell Velvet-Face record. The cut is said to be slightly finer than the standard thread, which enables 15 per cent. more music to be put on. From samples heard I would say that both the vocal and instrumental reproductions are excellent, and I certainly advise dealers to investigate the big business

possibilities the V-F undoubtedly offers.

Grenadier Guards Band in Canada.

For the second time (previously in 1904) the famous band of the Grenadier Guards is visiting Canada. Their tour will last five weeks—up to Sept. 15, upon which day they expect to embark for London. In Montreal, Canadian National Exhibition, and other chief centers throughout the Dominion, a series of concerts have been given and their advent has naturally created quite a furore. Canadian dealers will be glad to learn that Messrs. Barnett Samuel & Sons, Ltd., have no less than ninety-nine double Odeon records listed of selections by the Grenadier Band, and it is a certainty that wherever they perform those records will reach unprecedented sales. Here is an opportunity, then, that you will be wise not to miss.

A Most Ingenious Mechanism.

Perhaps the most ingenious mechanism ever put into a talking machine is the hot air motor, a patent controlled by Messrs. Craies & Stavridi, of this city. It is quite as silent as if not more so than the ordinary clockwork pattern, and there appears to be not the slightest risk of damage by fire or heat, since the whole of the case is lined with asbestos, thus ensuring perfect safety. Indeed, so excellently arranged are the works and the position of the spirit reservoir that the introduction of asbestos would almost seem to be but a concession to nervous people. One filling of spirit will keep this motor going continuously for 12 hours. Think of the possibilities and advantages of this time-saving invention for traders who are demonstrating records all the day. No longer will you need to keep customers waiting while you wind up the machine; all that is required to connect the turntable with a clutch on the revolving spindle being simply a touch on the connecting rod, and instantaneously you have the required speed for playing the record. Perhaps next month I shall be in a position to give further particulars of this wonderful instrument, which, undoubtedly, signalizes an upward trend in the development of talking machines.

Favorite Co.'s Latest List.

After a somewhat protracted period, due no doubt to the reorganization which has recently taken place, a list of new and up-to-date titles of the Favorite record will appear in September. In point of quality the old Favorites were always good, but under the new régime, an improvement, we are told, is to be expected. More anon.

An Incident of a Visit.

Upon the occasion of a recent call at the Peckham works of Messrs. G. E. Hough, Ltd., I was regaled with the story of an amusing event which befel a member of the staff while working late one evening recently. Apart from the scurrying of an occasional rat across the floor and the scratching of the pen as he diligently pursued his weary task, not a sound was to be heard in the eerie atmosphere of his den. Suddenly, upon the stillness of the night there arose the sound of a gentle rapping on the outer door; timid at first, it became insistently louder as he at last dragged himself to the window and peered forth. Two little boys! With a mind considerably relieved he opened the door and was greeted with the news that they had come, please sir, to register the baby! Register the baby! whatever do you mean, boys? Well, please sir, mother's just had a baby and she's sent us to register it. But this is not the registering office. Please sir, we've been all up and down the road and we thought that this must be the place when we saw on the door—Register office!

I Don't Know Why

But it reminds me to heartily congratulate W. T. Robbins, so long and honorably connected with the old Edison-Bell Company, and J. E. Hough, Ltd., upon his recent marriage. In the hope that his future may be blessed with great happiness, I raise my glass.

Beka Co.'s Latest Impressions.

Following upon the issue of a splendid list of titles in August, the Beka Co.'s September impressions would appear to be even better, but let it be said right here that there is a noticeable advance

in the all round quality of Beka records all the time. Here are some of the selections: "La Cinquantaine" and "Mosquito Parade," by the Beka London Orchestra; "Meeting of the Waters," Irish song, and "Believe Me If All Those Endearing Young Charms," by Philip Ritte, tenor; "Will o' the Wisp" and "The Yarn of the Fiddler's Ghost," Harry Thornton, baritone; "Beauty's Eyes" and "The Bellringer," Alan Turner; "My Moon" and "Bobby, Dear," Miss Violet Essex; "Archibald! Certainly Not" (Geo. Robey), and "Oh, Joe! I Want to Go to the Picture Show," by Harry Bluff; and last but not least, two lovely violin solos, "Benedictus" and Mendelssohn's "Spring Song," by J. Jacobs.

Awards at Japan-British Exhibition.

At the Japan-British Exhibition, the examining committee have now completed their rounds and have made the following awards to talking machine exhibitors in the Palace of Music: Diploma for gold medal, the British Pallas Manufacturing Co., Ltd., 33 Goldhawk road, Shepherd's Bush. This company, by the way, had a separate pavilion in the grounds, where they displayed a series of their popular Radiaphones. Daily demonstrations were given, the audience at times extending far beyond the confines of the pavilion itself. Phonogrand, Ltd., of Oxford street, also secured a similar award. Holt, Lees & Co., Cheapside, were awarded diploma for silver medal.

Will Embody in One Supplement.

From the commencement of October the National Phonograph Co. announce that they will embody their monthly lists of records all in one supplement, instead of separate lists for Standard, Amberol and Grand Opera, as heretofore.

The first of the Amberol records by Mme. Sarah Bernhardt—"L'Aiglon-La Plaine de Wagram"—appears with the October supplement and the balance will be listed one each month so as to extend over the period covered by her coming American tour, which begins in Chicago Oct. 3. This is said to be the divine Sarah's farewell tour.

The advance list of Edison Records for October, just to hand, is as follows: "The Girl in the Train" (Fall), and "Invitation to the Waltz" (Weber), National Military Band; "Out on the Deep" (Lohr), Peter Dawson; "Don't Do Away with All the Peers" (Piers), (Weston, Barnes and Scott), Geo. D'Albert; "My Dear Soul" (Sanderson), Miss Violet Oppenshaw; "Lochaber No More" (arranged by Scott Skinner), J. Scott Skinner; "Private Atkins," Arthur Osmond; "On the Same Place Every Time" (Collins and Murphy), Miss Florrie Forde; "The Green Isle of Erin" (Roedel), Ernest Pike; "I Shall Sulk" (Murphy and Lipton), Jack Pleasants; "Boy o' Mine" (E. R. Ball), Frank C. Stanley; "When the Daisies Bloom" (Anita Owen), Miss Barbour and Mr. Anthony; "Jere Sanford's Yodling and Whistling Specialty," Jere Sanford; "Cupid's Appeal"—a Bells solo—(H. Engelmann), Charles Daab; "Auld Lang Syne," Miss Marie Narelle; "Hope Beyond" (C. A. White), Anthony and Harrison; "Mandy, How Do You Do?" (P. Wenrich), Miss Ada Jones and Billy Murray and chorus; "The Premier Polka"—cornet solo—(Edward Llewellyn), Arthur S. Whitcomb; "When the Robins Nest Again" (Frank Howard), Will Oakland and chorus, and "Temptation Rag" (Henry Lodge), New York Military Band.

Edison Amberol Grand Opera Records.

"Andrea Chenier—La Mamma Morta" (Giordano)—sung in Italian—Carmen Melis; "Gioconda—Voce do donna" (Ponchielli)—sung in Italian—Marie Delna; "Pescatori di Perle—Aria (Romanza). (Bizet)—sung in Italian—Giovanni Polese; and "Favorita—Una vergine" (Donizetti)—sung in Italian—Florencio Constantino.

Special Sacred List:—Catholic Hymns.—Amberol.

"Adeste Fideles" (Novello), Edison Mixed Quartette; "Mother, Dear, O! Pray for Me," Anthony and Harrison; "Gloria From 12th Mass" (Mozart), Edison Mixed Quartette. **Christian Science Hymns.**—"Shepherd Show Me How to Go" (W. L. Johnson), Anthony and Harrison; "O'er Waiting Harp-strings of the Mind" (W. L. Johnson), Frederick

Gunster; "Saw Ye My Saviour?" (Brockett), Edison Mixed Quartette; and—**Standard**—"Eternal Mind the Potter Is" (Sphor), Edison Mixed Quartette. Edison **Standard** Records.—"A Sergeant of the Line," March (Squire and Trotire), and "Kisnilt"—Hindoo Intermezzo (Markey), National Military Band; "Do What You Like with Me" (Rule and McGee), George D'Albert; "Long Live the King" (Bowker Andrews), Peter Dawson; "Chanson Trisle" (Tschaiakowsky), (Cello Solo). Jean Schwiller; "She's a Braw Lass" (Mills and Scott), Jack Lorimer; "I Wish I Were a Tiny Bird" (Lohr), Miss Amy Evans; "A Little Bit Here and There" (Conner), Ben Albert; "A Girl Who Was Never Used to It" (Harrington and Powell), Miss Florrie Forde; "May I Be Allowed to Suggest?" (St. John and Warwick), Arthur Osmond; "Sirenuous Life March" (J. G. Boehme), United States Marine Band; "The Bright Forever" (H. P. Main), Edison Mixed Quartette; "Cameo Polka" (D. Miller), (Xylophone Solo), Charles Daab; "I'll Await My Love" (F. Howard), Will Oakland; "The Mocking Bird" (Harp Solo), Roxy P. La Rocca; and "Oft in the Stilly Nite," Knickerbocker Quartette.

Some Unique Songs.

There is evidently going to be a boom in animal-effect songs, for we observe that the Columbia Co., who always appear to take time by the forelock, are issuing sundry records of this certainly unique type of song. Last month there was a jungle duet, "Underneath the Monkey Moon." This month there is a Columbia-Rena ten-inch double record of two such songs—"Moonlight in Jungleland" and "Zoo-Lou," sung by those inimitable comedians, Collins and Harlan.

Higher Mission of the Phonograph.

When we hear of the adoption of "record" language study in the curriculum of our universities and public schools, it almost seems that the highest mission of the phonograph has been achieved. Yet it is not so. In many other directions the phono-

graph has proved a useful friend to humanity, as no doubt the experiences of some of my readers can testify. I have before me an instance of a somewhat pathetic nature, but which nevertheless is evidence of the power of the phonograph to even span the dark abyss between life and death. The recent destructive fire at the Kelvin Hotel, Belfast, claimed many victims, and among those who succumbed to their injuries were the Rev. W. J. McCaughan and his wife. For many years pastor of the Third Presbyterian Church at Chicago, they returned in the autumn of 1907 to take charge of one of the largest congregations in Belfast. At the time Mr. McCaughan conceived the happy idea of sending a lasting message to his Chicago adherents, and with this object visited Thomas Edens Osborne's salon, at Donegal square, Belfast, where he dictated a suitable message into an Edison phonograph. The pleasure and interest with which the records were received by his old congregation in Chicago needs little imagination to picture. Commenting upon the matter the Chicago "Welcome" says: "It was interesting to note with what eager anticipation the crowds went in to hear the voices of our dear former pastor and his wife, and to see the intense expressions of longing that came over these faces as they left the room. Both records were good, etc." After painstaking experiments, Mr. Osborne has succeeded in successfully duplicating these records, and the editorial announcement in some of the Belfast newspapers has induced many of the late pastor's friends to call and hear again the voice of their beloved minister, so faithfully and humanly reproduced by the Edison phonograph as to bring a tear to many an eye. In response to urgent representations Mr. Osborne has consented to duplicate a limited number of the records at a nominal fee.

The foregoing marks another stage in the development of the phonograph in its usefulness to mankind.

Zonophone Specials.

A record of wonderful purity is the "Marche Hongroise," pianoforte solo by Chas. Goodall. It figures in the September list and is certainly one of the finest and most lifelike piano records yet issued. Madame Edna Thornton gives a superb rendering of "The Promise of Life," while other remarkably fine selections in the current impression are: Selections from "The Country Girl," by the Black Diamond Band; "The Girl in the Train" waltz, Peerless Orchestra; "Mrs. Sandy McIntyre," Jack Lorimer; and "I've Got Rings on My Fingers," by Miss Florrie Ford.

An Amusing Case in Hungary.

From Hungary comes the report of an amusing case in which a Mr. Schwarz was sued for slander uttered by one of his gramophones. It appears that Schwarz's afternoon sleep had been disturbed by the singing of girls in a dressmaker's workshop situated just opposite. He protested to the manageress, but in vain. One morning the girls were horrified to hear the most violent abuse and the strangest oaths of which the Hungarian language is capable trumpeted at them from the mouth of a gramophone. Neighbors of course heard it, too, so the girls brought an action for damages. Mr. Schwarz declared in court that he had been testing some new records he had just bought, as there was a demand for "swearing" selections to amuse parties! The judge, however, ordered the record in question to be played in court, and as Schwarz' own voice was recognizable, he was mulcted in damages of twenty shillings.

Right in Line with "Hits."

The Columbia Co. are actively pursuing a policy which must commend itself to all who like to be up-to-date. We refer to their obvious determination to be one of the first in the field with as large a number of the "latest hits" as possible. Their record in this direction during the past ten or twelve months has been a particularly striking one.

The new supplement of Columbia Rena records is no exception to the rule, the company pointing to no less than six popular "hits" which figure on records for the first time this month. These selections include Ella Shields' songs "Come By the Drum" and "I Don't Admire the Girl in White," sung by Molly Gray; "Chantecler," the big song from the Empire "Revue," and Lashwood's latest, "Mister Pat O'Hare," sung by Harry Fay; Hal Forde's latest, "It's My Night Out Tonight," and Winifred Ward's "I Can't Keep Away From the Girls," sung by Fred Mayne. It will be noticed that in this half-dozen songs the names of the original singers are quoted, a precaution taken to bear out the claim of the company that these are known "hits."

Tunes by Wireless.

A new system of telegraphy has been invented by Baron Von Lepel, which, according to the "Daily Mail," is capable of transmitting musical notes and wireless bugle calls, etc. Some very interesting experiments of a successful nature have just been conducted between Slough (near Windsor Castle) and Brussels and Paris. Two remarkable features of this new wireless system are that much less power is required to send messages over a long distance, and that the intense electric spark, so important but so noisy a feature of many other systems, is entirely absent. Many readers will be familiar with the dull buzz, buzz of the ordinary wireless telephonic signals, but Baron Lepel uses a clear musical note, which note can be changed at an instant's notice by merely depressing a key on what looks like a small piano keyboard. The simple transmitter sends an almost continuous train of small waves to the receiver, thus keeping up electrical disturbance with a minimum of power. This musical code is quite a novelty in wireless, and just by pressing the correct notes on the keyboard the tune "God Save the King" was sent to Brussels. A moment later came the reply: "Bien entendu;

FROM OUR LONDON HEADQUARTERS—(Continued.)

vive l'entente cordiale!" The manner in which these musical notes is caused is very ingenious. The continuous train of waves is harnessed by means of a controlling effect produced when a key is depressed on the keyboard, the waves being alternately brought to great strength and diminished until quite feeble. Messages can be sent on eight notes, set to a true octave. The rate of transmission through the ether is said to be equal to 186,000 miles a second!

Trade with Argentina.

The report of Consul Mallet on the trade and commerce of Rosario in 1909 states that up to the present the United Kingdom has held first place in furnishing supplies to this district of Argentina, but a careful perusal of the tables shows that foreign competitors are gradually increasing the trade in some branches. For the information of British exporting firms who may desire to trade in this district (and the country certainly offers a splendid market) the consul states that the more important firms (there are several whose sales amount to several millions of dollars annually) have no time to attend to the large number of trade letters and circulars they receive from abroad by every post. Competition for trade is very keen and agents and travelers from abroad are constantly on the watch to meet requirements, and merchants, on account of the less trouble it gives them, frequently avail themselves of these opportunities to replenish their stock. To obtain practicable and profitable results it is necessary to get into direct touch with the local buyers. (One of the most direct routes being through the advertising columns of *The Talking Machine World*). Moreover, too much emphasis cannot be laid on the necessity of seeing, when orders have been obtained, that the article supplied is strictly of the class and quality required.

The Trade of Odessa.

Consul Smith's report is much on the same lines. Referring to the trade of Odessa in 1909, he points out that the success of the Germans and Ameri-

cans is not to be put down to the superior quality of their goods, but simply to their enterprise; the old way of doing business is played out, and they know it. They hunt up the buyer, try to meet him in all matters and strive to keep in touch with him, and they study his requirements, his prejudices and his idiosyncrasies. German commercial travelers are to be found everywhere and in all branches of trade, whereas anyone traveling here in the interests of British firms is quite a rara avis. It is this failure to keep in touch with the buyer that has been the cause of British firms losing the market.

An Important Klingsor Letter.

The Klingsor Works write me as follows under recent date: "Owing to the world wide value now attached to the name of Klingsor, we shall be glad if you will have noted in your next issue the fact that this name will now be associated with all our products. Therefore the description "Polyphon," applied to our new record, is now altered to "Klingsor," this being the protected trade mark in all the principal countries in the world. The high value and good quality of our Klingsor products will be extended to the records and we have no doubt that our colonial and foreign customers will appreciate the change of name.

With reference to the price of 2s., which you advertised in your last issue, we shall be glad if you will kindly advise readers that this was a printer's mistake; the correct price being the standard figure of 2s. 6d.

PROVINCIAL NOTES.

There is a strong current of optimism in the reports to hand this month from the centers of activity. Dealers and factors would seem to be finding things exceedingly satisfactory, time of year considered, and judging by the amount of machine and record sales during the month of August, their optimism is more than justified. General business is in an improving condition, employment is good and there appears little to disturb our expectations

of a really booming season. Around Manchester and Liverpool trade shows distinct signs of revival, and factors are now placing big orders for the season. In this connection the new portable Zonophone machine, the "Cinch," has evoked an enormous demand in Lancashire from both dealers and wholesalers. Other Zono instruments and records, Twins, Beka, Columbia and Edison, are selling well, while the advent of the "Favorite" new issues is eagerly looked for. In Lancashire, as also in Yorkshire, the new Klingsor models are gaining in popularity. Richardson's, the big Manchester factors, announce their determination to devote practically their whole resources to the development of the talking machine trade this season, specializing on the same lines as last year. Yorkshire traders advise a general improvement in sales and look forward to a big season. Newton, of Newcastle, has made extensive preparations for the handling of extra trade, and is making quite a specialty this season of the renowned "Cinch" and other Zonophone lines. In Newcastle, too, both Edison, Bell and Columbia-Renas are going well, and Edison phonograph goods sell freely.

By the way, Yorkshire dealers have a good selling line in the new Edison Bell records made by Tom Foy, the "Yorkshire Lad," as he is pleased to call himself. New to the talking machine, Mr. Foy will no doubt appear as an old friend to many, for he has won his spurs as a humorist on the London music hall stage. His first records are certainly very good.

The university officials of Aberdeen have installed a complete outfit of the Edison language records with excellent results.

In Ireland the talking machine trade, according to advices received, is not so satisfactory as it should be. Possibly the result of certain exciting moonlight rambles more interesting to the Irish provincials than wasting time playing over records. Such would my informant have me believe! In Belfast, though, things are really much improved Mr. Osborne making an excellent report.

NATIONAL CO. SALESMEN MEET.

Confer with Department Heads at Factory and Outline Coming Business Campaign—Those in Attendance—Jobbers Entertained—Few Changes in Territorial Assignments.

For the past week, September 6 to 9, a part of the selling force has been at the factory of the National Phonograph Co., Orange, N. J., when the fall campaign was outlined, territories assigned, etc. The meetings were attended by the various officials and department heads, going over matters generally. The men started for their respective territories on the 10th.

On the 8th at noon a luncheon was tendered the salesmen at the Essex County Country Club, at which were present: F. L. Dyer, president; C. H. Wilson, general manager; E. J. Berggren, secretary and treasurer; F. K. Dolbeer, manager of sales; A. C. Ireton, assistant manager of sales; E. H. Philips, manager credit department; L. C. McClesney, manager advertising department; C. E. Goodwin, manager salesmen, and E. L. Aiken.

Salesmen—J. H. Allgaier, B. R. Barklow, C. A. Briggs, A. V. Chandler, H. D. Clark, A. H. Curry, F. E. Gage, F. E. Gressett, L. D. Hatfield, W. P. Hope, W. H. Hug, W. A. Idle, M. G. Kreusch, C. W. Phillips, G. A. Renner, H. R. Skelton, J. W. Scott, and J. F. Stanton.

The company had the pleasure also of entertaining at the same time Eugene Zimmerman, of the Peoria Phonograph Co., Peoria, Ill., and J. C. Stire, of the H. S. Sidles Phonograph Co., Lincoln, Neb., both concerns being jobbers of Edison goods, and H. P. Keely, one of the prominent dealers of Pittsburg, Pa. The same evening most of those mentioned attended a theatre party at the "Hippodrome," New York.

Very few changes have been reported in the territorial assignments of the traveling staff. While at the factory the salesmen busied themselves in inspecting and discussing details of the business with the various officials and heads of departments, and in exchanging views and experiences among themselves. At their daily sessions they were addressed

by the officials on matters of moment and given instruction in regard to present and future policies and intentions of the company. Not all the time was spent in business discussions, however, for the travelers—and a jolly lot of hustlers they are—took advantage of the attractions of the nearby metropolis. Coney Island was a favorite point of interest, especially for the Western contingent, most of whom could be found there most any evening. On September 7 the entire staff visited the Polo Grounds en masse, and rooted successfully for the New York Giants. One and all they are enthusiastic at the prospect of good business in the Edison line this fall and winter.

THE NATIONAL CO. IN AUSTRALIA.

Rapidly Growing Business in That Part of the World Necessitates Enlarged Quarters—Their New Building in Sydney, N. S. W.

An idea of the great trade of the National Phonograph Co., of Australia, Ltd., may be gained from the accompanying photograph. This building, now nearly completed, will shortly be occupied by the company. It is situated at 364 to 368 Kent street, Sydney, N. S. W., in one of the busiest centers of Australia.

The steadily increasing business of the National Phonograph Co. in that part of the world has necessitated their acquiring additional buildings from time to time, and they now occupy four. But in order to handle their present enormous business to best advantage, the new building was erected. It measures sixty-eight by eighty feet, is six stories high, and will be devoted entirely to the handling of Edison phonographs, records and other Edison products.

The enormous record stock will be stored in bins supported by a series of galleries, every record being within easy reach of the average sized individual. The offices, needless to say, leave nothing to be desired so far as light, ventilation and convenience are concerned, nor has the comfort of the office staff been overlooked. To cap it all, the flat roof will be used for recreation purposes during

NATIONAL CO.'S AUSTRALIAN HEADQUARTERS.

the noon hour, and is provided with lunch tables. W. W. Wyper, manager, who took charge some five years ago, is a man of very remarkable ability, and no little of the wonderful success of the National Phonograph Co of Australia, Ltd., is due to his tireless efforts, tact and good judgment.

HOMEJI STREET, CIRCLE, FORT, BOMBAY

TRADE NEWS FROM BOSTON.

Decided Improvement in Business with Beginning of Fall Season—Jobbers Laying in Stock and Preparing for Heavy Demands—Collections Rather Poor—Growth of the Needle Trade—The "Puritone" Product—What the Jobbers Report—Recent Trade Visitors—The Boston Cycle & Sundry Co.'s Line—The News of the Month Summarized.

(Special to The Talking Machine World.)

Boston, Mass., Sept. 8, 1910.

The improvement noted by talking machine men since the advent of September offsets any possible thoughts other than a "bull market" for the fall season. Wholesale trade with the jobbers has made a marked jump, and there has been some gain in retail activity. Retail trade through the summer has held up very well, which is responsible for the small percentage of gain during the past week or two, in proportion to the wholesale increase.

Jobbers are laying in a stock of the higher priced machines, taking about all they can get of the popular styles, as they are confident that a widespread demand will deplete manufacturers' stocks and they will not be in the best position for the proper filling of orders.

Instalment collections have not been any too bright; nor has there been a generous response to jobbers from the dealers during the past eight weeks, but collections in all branches are gaining substantially and there will be little cause for anxiety from this source.

'Tis becoming quite a fad in Boston to push talking machine needles under one's own trade-mark. More needles are now sold here than ever before and with the announcement of a new disc machine, it is logical to assume that the consumption of needles will increase tremendously. "Grand Opera Needles" are being featured prominently by the Eastern Talking Machine Co., while "Meteor Needles," which are exclusively sold by the Oliver Ditson Co. likewise enjoy much publicity. M. Steinert & Sons Co. have recently added their own needles, naming them "Cleopatra Needles" and it is their intention to advertise this trade-mark heavily. Other houses are now considering the adoption of their own needles, and announcements of these may be expected any time.

Apropos to the foregoing paragraph on the needle question, there is one basic source of supply that for "quality, service and cost" is a money saver to the trade. That's the well known house of John M. Dean, formerly of Lowell, Mass., but now occupying their new factory at Putnam, Conn., which has a capacity of 2,000,000 needles a day. "Puritone" is their trademark and it represents a needle that has been designed for the

best of work, and that it has "accomplished its mission" is cited by the big business built by Mr. Dean.

It doesn't cost jobbers any more to have needles from the Dean factory put up in attractive envelopes and boxes bearing any printing matter desired, thus establishing a miniature needle business in their own locality. There are many advantages to this policy, also, and from observation appears to be a wise move for the distributor. Mr. Dean has a liberal package of samples and an interesting proposition to jobbers writing him. His address is simply: John M. Dean, Putnam, Ct.

H. R. Skelton, the traveling envoy of the Edison interests, reports that business is GOOD with capital letters, with everything pointing to prosperity for the Edison dealer that has confidence and loyalty. He also adds that Edison model "O" reproducer and wooden Music Master horn in their new model has been graciously welcomed by the receiving committees of the different houses. Mr. Skelton had a vacation allotted to him but used the time for Edison promotion, which shows his enthusiasm on his work.

B. Feinberg, special wholesale representative of the Columbia Phonograph Co., New York, was a visitor here recently, spending a couple of weeks between here and the Portland agency. Mr. Feinberg makes a trip through the West and South very soon, where he is planning to "do things."

E. F. Taft, general manager of the Eastern Talking Machine Co., anticipates and is planning for an unusual fall briskness. He has made a general observation of conditions at large, and in the New England field particularly, and the result of this is witnessed in his good fall predictions. Their new record library to hold 100,000 records is near completion and is expected to be installed shortly.

S. J. Freeman, manager Victor department, has returned from his vacation tour, while "Archie" Chamberlain has recovered from his fever of toying with air ships, without the expense of flowers. (The boys in the store will laugh again at this!). Trimmer (window) Fitzgerald has two corking windows this month; one with the elaborate Victor display and the other with the Edison Girl.

C. P. Trundy is now manager of the Victor department of George Lincoln Parker, the piano dealer who recently removed to the Colonial Building.

I. W. Norcross, the well known talking machine inventor, has given up his connection in Boston with the recently formed talking machine company and has returned to New York. Illness of his wife and her inability to stand this climate is the reason.

The only and genuine Max Landay, of Landay Bros., Inc., New York, was in our midst recently, leaving with a 99 per cent. conduct mark. He stole in, surreptitiously, so to speak; otherwise there would have been a delegation at the station to welcome him. Don't come in so quietly next time, Max!

The Boston Cycle & Sundry Co., exclusive Edison jobbers, are making some big efforts to capture the better class of dealers' trade, claiming to ship out every order on the following express, and this means a lot of hustle and extra expense to them while to the dealer it means "quickest service." Charles R. Cooper, manager of the talking machine department, says they aim to have the largest Edison stock in New England, and if it were possible to render faster service to dealers they would do so.

This company has an excellent proposition for any talking machine dealer as a side line, selling Regina Vacuum Cleaner. The Boston Cycle & Sundry Co. have these in a hand-operated model, and an electric type which can be attached to an electric light socket. The dealer makes over 100 per cent. on this line, and as the vacuum cleaner business is one of the "modern lines" it would undoubtedly be profitable for dealers to secure full particulars, which they can have by return mail by dropping a card to Mr. Cooper, care his house.

C. F. Spomer, the piano dealer of New Bedford has an excellent Edison display.

A. B. Connelly is the manager of the New Bedford Victor headquarters of M. Steinert & Sons Co.

M. B. Romain of the National Phonograph Co., Orange, N. J., was in Boston recently, as was F. E. Madison, of the "agreement department." It is understood that Mr. Madison had to suspend one dealer for violation of his contract.

Thomas A. Edison has taken an extensive space at the Mechanics' Exposition to be held here Oct. 3d to 29th, and will have a magnificent exhibit, together with the jobbers of the city.

Smith Bros., of 1211 Washington street, report a good talking machine business. This is one of the big furniture houses.

G. F. Kasmire holds the reins of the Victor department of the C. F. Wing Co., New Bedford, the largest department store there.

Henry Winkleman, the Victor manager of the Oliver Ditson Co., has returned from a brief recreative jaunt to Swan's Island, Maine.

COMMITTEES APPOINTED.

By President Whitsit to Act for the Ensuing Year—Many Western Men Represented.

President Perry B. Whitsit, of the National Association of Talking Jobbers announces the appointment of the following committees to act for the ensuing year:

Canadian Membership Committee—R. Shaw, Western Talking Machine Co., Winnipeg, Manitoba.

Membership Committee—Chairman, Mr. Michels, Nebraska Cycle Co., Omaha, Nebr.

Press Committee—Chairman, L. C. Wiswell, Lyon & Healy, Chicago; A. A. Trostler, Schmelzer Arms Co., Kansas City; R. Shaw, Western Talking Machine Co., Winnipeg; Herbert Royer, M. Steinert & Son, Boston; I. Davega, I. Davega, Jr., New York City.

Resolution Committee—Chairman, J. F. Bowers, Lyon & Healy, Chicago; L. McGreal, Milwaukee, Wis.; B. Pierce, J. W. Jenkins Sons Co., Kansas City.

Grievance Committee—Chairman, H. H. Blish, Harger & Blish, Dubuque, Iowa; I. S. Cohen, Cohen & Hughes, Baltimore, Md.; W. Bonhill, Penn Phono Co., Philadelphia, Pa.; G. A. Mairs, W. J. Dyer & Bro., St. Paul, Minn.; Max Strsburg, Grinnell Bros., Detroit, Mich.

Arrangement Committee—Chairman, Lawrence McGreal, Milwaukee, Wis.; Lawrence Lucker, Minneapolis, Minn.; L. C. Wiswell, Chicago, Ill.; Burton Pierce, J. W. Jenkins Sons Co., Kansas City, Mo.; H. A. Weymann, H. A. Weymann & Son, Philadelphia; J. N. Blackman, Blackman T. M. Co., New York; J. C. Roush, Standard Talking Machine Co., Pittsburg.

THOS. A. EDISON COMPLIMENTED

By Fellow Townsmen of Milan, O., During the Recent Home Coming Celebration.

The feature of the Milan (Ohio) Home Coming celebration on Aug. 17 and 18 was by popular consent the exhibit of the Norwalk Piano Co., Edison dealers of that city. In their exhibit was displayed every type of Edison phonograph, as well as a full line of accessories and Edison records. It was probably as fine and comprehensive a display of Edison goods as has ever been shown anywhere. The large tent in which the exhibit was shown was at all times the center of interest for the crowds which poured into Milan during the celebration.

Milan, as is well known, is the birthplace of Thomas A. Edison, and the exhibit of the Norwalk Piano Co. was conceived and arranged by the manager, Mr. Price, as a compliment to the foremost citizen of the city, who it was expected would be present during the celebration. Though prevented by urgent matters at the laboratory from attending, Mr. Edison fully appreciated the neatness of the compliment paid him by his Milan representatives

NEW COLUMBIA DISC MACHINE.

New Type "BZ" a Perfect Columbia Machine in Every Detail—Has Columbia Tone-Arm and Plays Any Size Record—Some of the Chief Features.

A new disc Columbia graphophone, type "BZ," recently placed on the market by the Columbia Phonograph Co., General, to sell at \$17.50 list, is described as follows in their literature:

"The 'BZ' is an absolutely perfect Columbia graphophone, complete in every detail. Its reproducer is as scientifically correct, and as carefully assembled, as those used on the highest priced instruments. It insures a loud, clear and remark-

NEW COLUMBIA "BZ" DISC MACHINE.

ably brilliant and lifelike tone. The instrument is equipped with the famous Columbia tone-arm; its spring motor is silent and powerful and can be rewound while running. It plays the largest size disc records.

"The 'BZ' has a beautiful mahogany-finished cabinet, brilliantly varnished, measuring 5 $\frac{7}{8}$ inches high and 12 inches wide. The turntable has a nicked edge.

"The instrument is equipped with a red-shaded floral horn, of seven petals, gold trimmed, 20 inches long and 16 inches in diameter. This horn is swiveled at its connection with the tone-arm like all the highest grade Columbia graphophones, so that it can be swung around in any direction."

BERLINER PATENT AGAIN IN COURT.

Judge Lacombe Denies Application for Temporary Restraining Order on "Mechanical Feed" Machine.

In denying Aug. 15 the application of the Victor Talking Machine Co., Camden, N. J., to punish William H. Hoschke, vice-president and general manager of the Sonora Phonograph Co., New York, and others, and the petition for a preliminary injunction against the same concern Judge Lacombe, United States Circuit Court, Southern District of New York, said in part:

"The suits have been brought upon the Berliner patent, which has so often been before the courts (No. 534,543), and presents the old question whether or not the stylus is moved through the groove by the action of the groove itself; or whether it operates by means of a mechanical feed."

After quoting Judge Hough's opinion of the first machine, who held that "defendant's machine in every material feature is complainant's," Judge Lacombe said that "subsequently Hoschke, with others, incorporated the Sonora Phonograph Co.,

which makes a modification of the first machine." This the court describes and its operation, observing, among other things, in conclusion:

"As shown in a sample machine obtained by complainant, and under an exhibit there is considerable play given to the stylus point relatively to the free arm; more play than seems necessary to effect proper operation, if the machine acts as defendant contends. But if, for example, there are 96 threads to an inch on the rod and the same number of grooves to an inch on the disc, it would seem that the machine might fairly be found to act by 'mechanical feed.'

"The question is a close one and can better be determined at final hearing after further experiments have been made, notably, as suggested by the court upon the argument, one with the stylus fixed rigidly on the free arm. The motions are denied."

VISITS BRIDGEPORT PLANT.

L. Taylor, Representing Australian Agents for Columbia Phonograph Co., Spends Interesting Day Inspecting the Various Departments—The Situation in Australia.

August 30 L. Taylor, of Craven, Taylor & Co., Sydney, Australia, agents for the Columbia Phonograph Co. in that part of the world, and who arrived in New York Aug. 26, went to Bridgeport, Conn., with President Easton and H. A. Yerkes, manager of the wholesale department, in Mr. Easton's automobile. He spent a very interesting day at the Columbia Co.'s plant, visiting every department of the plant under the guidance of T. H. Macdonald, general manager.

Mr. Taylor, a typically progressive Australian, arrived via Vancouver, B. C., and it is his first visit to the United States in two years. It was his intention to sail for Liverpool, Eng., September 7 aboard the "Lusitania," of the Cunard line. Mr. Taylor will visit London and Paris and then go direct home.

When asked how trade was in Australia he said: "It was never better in three years, and this condition will prevail indefinitely. We have had magnificent crops of wheat and wool. You can also say for me that for population Australia is the greatest purchaser of talking machines in the world."

Harry F. Miller, private secretary to Thomas A. Edison, returned Aug. 29 with his wife and son from a vacation spent at Alberta, on Amherst Island, Bay of Tuscei, Lake Ontario. They made the return trip through the St. Lawrence, Lake Champlain and Lake George, stopping off at Catskill-on-the-Hudson for a day or two.

C. E. Goodwin, manager of salesmen for the National Co., enjoyed his vacation in afternoon visits to the golf links of the Essex County Country Club in West Orange. Mr. Goodwin expects through the medium of this form of exercise to restrain a pronounced tendency to avoidupois. No improvement, however, is as yet noticeable, but there is still hope.

A Real Captain of Industry

From a little shop 17 feet square to an establishment covering 15 acres of floor space; from an income of \$10 a week—when there happened to be \$10 in the firm—to the control of a company that does a business of \$30,000,000 a year: that is something of a record for twelve years' work. The man who made it is Eldridge Reeves Johnson, inventor and largely owner of the Victor talking machine.

Twelve or fifteen years ago the talking machine was a joke—interesting but ludicrous. To-day the greatest singers of the world draw a large part of their income from these same machines. This year Caruso will get royalties amounting to about \$70,000 from the Victor Co. All languages and dialects are recorded, every country's music is represented, and at the great works in Camden they can send out a machine a minute.

The Victor's growth is the story of an idea believed in persistently in the face of ridicule, of unceasing work that for years spelled failure; then success, financial, artistic, beyond even the dreamer's wildest dreams.

Eldridge Johnson is a Delaware man. Like most Delaware men born forty-three years ago, he found the times hard. His father could do nothing for him in the way of a college education, and the young man, having a gift for mechanics, went to Camden, N. J., put on overalls and went to work at a bench.

Fate took him to a phonograph shop. The invention was new then, and it was the joy of tourists at Coney Island and similar resorts to listen to the thing speaking out the "Star-Spangled Banner" or "A Hot Time in the Old Town To-night." It was wonderful to find the music even imperfectly reproduced, and it was funny to hear the wheezing and scratching that accompanied it. Everybody said it was an amusing and astonishing toy.

To young Johnson, however, it was not a toy. He made motors for his employer in the phonograph shop, and he improved on them. The firm said casually that his invention was good, and they would have taken it up had they not come to an untimely end just then. There was no more experimenting with talking machines for Johnson, but the idea stayed in his head. Perhaps it was more than an idea—one might call it a dream—for the young mechanic saw a good deal more than financial success in it.

Johnson went West—to Seattle or some such place—and had many adventures. Luck was against him and he decided that he would rather starve among his own folks than off in a new country, so he sent his tools back by freight and bought his own ticket. He reached Philadelphia with 50 cents in his pocket and the bill for freight unpaid.

Penniless and tool-less he called on a friend, the kind of friend to whom a man can safely turn on such occasions. Said the friend, struck with a bright idea as he gazed upon the financial wreck before him:

"What do you say to going into partnership, Johnson? Neither of us has any money, so it seems just the thing."

It was just the thing, too. They got the tools out of the freight depot and took seventeen square feet of shop in Camden, being too poor to aspire to the proud city across the Delaware. Then they began to do business—any sort of business connected with machines. Johnson was the acknowledged expert, his friend the financier. The expert got \$10 a week—if possible—and the financier took what was left—if anything. From a material point of view the firm was not a strong one, as captious critics may point out, but in one respect it couldn't be beaten. The partners believed in each other with a mighty belief, and it was sink or swim together in the seventeen-foot shop.

Sometimes they swam very well, and again frequently it would look as if they were sinking for

the last time. Johnson invented a wheat-cleaning machine, and his partner sold them. That did fairly well, and if they had had any idea how very good the machine was (they found out later,

ELDRIDGE R. JOHNSON.

when they did not need money) they might have stuck exclusively to that.

But they wandered from wheat-cleaning machines to oil burners, and came very near making a fortune. The burners sold like wildfire. Everybody said it was the greatest invention ever made for convenience and economy. Troubles seemed over for three happy months, and then buyers began to complain that the burners got out of repair. So they did, as the promoters sadly discovered. It worked well for a short time, but it was no good as a permanency. Finally, one customer singed off his eyebrows with the thing, and the language he used to the firm discouraged them from continuing the sales.

All this while the talking-machine idea was simmering back in Johnson's head. He told his partner about it and his partner, as usual, believed. That is, he believed Johnson's machine would be a better machine than any on the market, but when the inventor began to point out its great artistic possibilities, to enlarge on his conviction, that every great voice might in future be made immortal, that singers of to-day might thrill audiences a hundred years hence—then even the faithful partner shook his head.

"No, Johnson," he said. "You'll make a good machine and people will buy it because it's so curious. You'll never in this world get out the squeak—never. But if we can make and sell 500 or so, just as curious toys, why let's go ahead and do it."

The inventor worked day and night. He had a pretty good thing, but not what was singing in

Birth-place of the Victor

his brain. Then one day he seized his partner as he came in from selling the firm's wares.

"I've got it this time," he said.

When Johnson says he has a thing, he usually has, so the senior member shared the inventor's excitement. Together they turned to the machine, so often changed, so persistently and bafflingly inaccurate. Johnson put on a record and lo, from the thing came clear and almost speakless.

"I guess I'll go and telegraph my baby—"

Can you imagine the solemnity, the awe, with which the two men listened to those foolish words? It meant the realization of a dream, it meant wealth, everything. Johnson had "arrived."

It happened that the firm was prosperous at that time. They had a thousand dollars from a job of doing something to ballot boxes—a thousand dollars less what Johnson had spent to buy a gun for his partner. Partner loved to shoot and his gun had a fashion of sending the bullet more or less at right angles, so when this their first great success, came to them, Johnson had insisted on a new gun.

Perhaps he felt that \$10 a week had been too large a percentage of the net receipts for him to draw, and suspected his partner of too great self-abnegation. That was the kind of partnership it was, you see. But there was still money in the treasury and away to London went partner, while Johnson stayed and worked day and night to get further perfection.

The gramophone people in London listened to the ditty that he played, and then they said, briefly:

"We'll pay Mr. Johnson what he likes for the European rights of his invention."

And partner "guessed he'd go and cable" Johnson without delay. Since then the Victor people and the Gramophone Co. have controlled Mr. Johnson's inventions—two separate companies, allied for business purposes, so that even the great Victor success does not show all that Mr. Johnson has done in the talking-machine world.

That, briefly, is the story of how a man created an industry that sends its products all over the globe, that has recorded all the great voices of the day, and the songs and folk tales of fifty-nine different languages and dialects.

There are many incidental details that should be given to make a better picture of those early struggles. For instance, to-day the leading grand opera singers draw royalties from the Victor people of from \$5,000 to \$25,000 a year. Caruso draws more. For the last six years he has averaged \$50,000 annually from the talking-machine company, and this year it looks as if he would get in the neighborhood of \$70,000.

But twelve years ago things were otherwise. Not a singer of any reputation would touch the talking machine business. You were scratched off the list of the elect if you looked at one. Besides, the firm had little to offer in the way of remuneration.

"I remember," said one who worked with the inventor in the early days, "that we had no place for the singers to record in except a loft that you got to with a ladder. I would scurry around and get some poor devil to come and sing for a dollar in real money and then I'd push him up the ladder and try to get a record. Sometimes the voice would record and sometimes we would have nothing but failure.

"I sometimes think, as I watch Melba and Tetrazzini and Farrar singing in our laboratory, of a woman I got to sing for us once in the beginning. I can see her now, a stout, good-natured creature who had come in the rain without an umbrella to sing for a dollar or so. She had a long feather in her hat and it hung over one ear and dripped water on the floor of the loft.

"What a time I had getting her up the ladder, too. She was a kindly soul, for she enjoyed singing into the machine so much that she wanted to

Mr. Dealer!

You could not sell a piano with a Tin or Veneered Wood Sounding Board!

A Talking Machine Horn is nothing more or less than a Sounding Board.

Why not show your machines at their best by equipping them with

MUSIC MASTER HORNS

which are built of solid wood on Sounding Board principles.

In September we start our Fall Campaign of National Advertising in order to help educate Talking Machine Buyers in this principle.

Are you prepared to take care of the inquiries that will come to your store?

Should your Jobber be unable to supply you, write us and we will send you a sample line of Oak, Mahogany, or Spruce, Disc or Cylinder Horns, on approval, and if you are not entirely satisfied with the merits of the MUSIC MASTER you can return them to us for credit.

SHEIP & VANDEGRIFT, Inc.

PHILADELPHIA, PA.

come back every day and work with us. And then there was a vaudeville chap, down and out, who wore a frock coat and a slouch hat on one side—he used to sing for us. Those were great days.

"There were times when everything went wrong. We could not rely on our machinery to give the proper effects unfailingly. We had to try and try again. Many a time it seemed as if I could not stand another thing. I would report failure to Mr. Johnson, and often if he had said not even a sharp word but something like, 'Well, it's your business to get the thing right.' I should have put on my hat and answered: 'It can be yours in future.' But he never did. There was never anything but sympathy and encouragement from him through all that time of struggle and disappointment."

One thing has of course boomed the Victor machine tremendously. That is the trade mark, the little dog with his head on one side listening to "his master's voice" and wondering why the beloved presence delays to come out of the horn.

Everybody knows the dog, and we all, when he first came out, stopped long enough before shop windows to give him a sympathetic smile and incidentally to read what was said about the Victor.

The story of the way in which the dog came into the Victor family is odd. The drawing was offered by a young artist to a great firm in London. The manager looked at it and observed somewhat wearily, that he didn't think much of it, but he would show it at the directors' meeting. The directors also eyed it in a bored fashion and said, no, they didn't want it. The manager, so reporting to the young artist, noticed that young man's disappointment and said kindly:

"There's a little firm round the corner you might like to see. They may feel it would do something for them."

The little firm was the London ally of the Victor people, and they did think the dog would "do something for them," and they were right, it did. It caught the popular fancy as few trade marks have done.

Nothing better illustrates the prompt triumph of

the machine the inventor so joyously christened "Victor" than the way the plant at Camden has grown. It is the most intricate, out-at-elbows, overgrown place imaginable. The company has bought all the land and buildings for several blocks, but the old concerns have not yet had time to move and the Victor factory shoots up amid smaller buildings bearing strange names. In a year or so all these will be down, but the demand for talking machines must be met meanwhile, and the firm enlarges as best it can.

Six months ago the old cabinet building became too small. The firm built a new shop, covering considerable ground and three stories high. This, they thought, would be enough. But before the three stories were up it was decided to build four. The four were no sooner completed than it seemed wise to put on a one-story addition on the rear. The one-story was not finished before it was seen that the addition would have to run up the entire four stories. But even as this was going up orders kept pouring in to such an extent that the management found it wisest to make both original building and addition not four but six stories. It is not yet finished, and that the six stories are needed is made manifest to anyone who has tried to worm a way through the piles of lumber.

The business has jumped this way: In 1901 the sales were \$3,000,000. In 1903 they had doubled. In 1905 they were again double, that is, \$12,000,000. In 1907 they were \$27,000,000. During the panic times they dropped 25 per cent., but in 1909 were back at \$27,000,000. This year they will far surpass that mark. The factory, they say, has a capacity of a machine a minute, and it is working full blast every day.

The Victor company does everything in its own shops, except make the horns for their machines. At present some cabinet work is done outside, pending the completion of the large shop. Apart from this every screw is made under the eyes of the management at Camden. Such a forest of workshops takes three hours to see in even the most casual fashion.

When the writer was taken through the shop chance brought about a quaint little incident. First there was the room where the shellac mixture, which is to be the disk, is made. The Victor company is the largest buyer of shellac in the world, which is easily believed when one sees the yards and yards of doughy stuff being kneaded in the cauldrons. It is pliant and thick, and is passed over the rollers just exactly as if it were a particularly black sort of dough.

When it has been kneaded enough it is put through a machine which flattens it out and cuts it into squares just large enough to make a record disk. It lies smoking and cooling, on a big rolling board for all the world like a singularly uninviting kind of cake. In a couple of minutes it has cooled enough to be touched and taken up to the room above.

There stand men before a heated copper table. The black cake is put on the table for a few seconds to get warm and pliant again (it is as hard as a rock when cold); then it is folded into a mold and put in a hydraulic press, with a pressure of 3,000 pounds to the square inch. In half a minute it is taken out, all ready except for a little trimming of the edges.

We took the little square we had followed, slipped it into a talking machine and the ugly black thing that five minutes before had been smoking in a cauldron had become "The Spring Song." It takes about five minutes, not more, to work this modern miracle.

To prepare for it, however, takes the skill of some two thousand men. In the machine shops queer little engines that one cannot call "almost human," because they are considerably more than human in their accuracy and swiftness, turn out bushels and bushels of screws—screws enough for the whole world, it would seem.

There is an electrotyping plant that has to turn out work 100 per cent. finer than the finest the government in Washington can do. There is a cabinet factory where a combination of machinery and skilled hand work puts together and smooths and carves rows of cabinets a mile long, more or less. There are engines and machines to run the

**Read the "questions and answers"
on pages 32 and 33. And if you don't yet
handle the complete Columbia line read
it twice.**

Columbia Phonograph Co., Genl., Tribune Building, New York.

other engines and machines. There are the testing rooms, where every record and every part of the machinery has to be tested before it is sent out. There are acres of offices where the accounting is done. And then there is the heart of it all, the center of interest and mystery—the recording laboratory.

Here followed a most interesting description of the various processes attendant upon the making of Victor records. Continuing, the article says:

All over the globe the traveling recorders carry their apparatus and induce the Chinese, the Japanese, the Africans to sing into it. There is a great demand just now for Arabian records in Argentina. There are Arabs working there, and they want the songs of home. In the Orient wealthy Chinese and Japanese buy their native music as sung by their greatest singers. They do not yet, say the Victor people, buy the Western music, for our finest productions mean nothing to them, but they want their own, and are willing to pay for them.

Many have been the adventures of these traveling recorders. In Japan, for instance, music is taught especially to the blind, and they were the persons most wanted by the agents. They consented to sing, but it was found that they would not allow an "unclean white man" to touch them, and being blind they wandered all over the room, singing everywhere except into the horn, while the agents fumed furious and impotent. When half a dozen records had been spoiled a Japanese friend came to their assistance, and leading the proud singers gently by the arm drew them within range of the horn.

It is not uncommon now to find in camps of Italian laborers a talking machine with records of all the good old-fashioned operas that Italians love and others of the songs that make the Bay of Naples gay.

The laborers together buy the machine and some records. Then concerts are given, and after four or five numbers the hat is passed around with the word that if more songs are to be heard there must be money forthcoming for new records. This is getting to be quite a business for the Victor company. Not only the Italians, but the Hungarians, Bohemians, and other immigrants who come over and live huddled together in mining and lumber camps, call for the machine and records that will bring home near to them.

The "best seller" is Caruso, with Tetrassini, Farrar, Melba, and Scotti close seconds. Apropos of Tetrassini, the company tells a joke on itself. Some years ago, before she made her spectacular hit, she sang a number of records for a small company at \$30 a record. The Victor traveling agents were in Mexico and she passed through there. They wrote that she would sing twelve records for \$1,000, should they go ahead? The manager said no, it was too much. The year after she was the idol of New York and London and the company is paying her now \$25,000 or more annually for what it could have bought outright for one thousand dollars.

The company has done several operas entire—

"Faust," "Trovatore," "Ernani," and "Pagliacci." It has not yet found a way of making the whole record, so that it will be sung continuously, as on the stage. The disks have to be changed. And the company has not yet found a way of giving the full perfection of a great orchestra of ninety or one hundred pieces, but it is working for it. Mr. Johnson has a passion for perfection. They say in the office that if he saw a way of improving the machine, though it would not add a cent to his income, he would spend all he made in a year to bring it about. As it is, there is a small house given over to men at salaries of \$10,000 and \$12,000 a year, who experiment day in and day out, following the dream the young inventor saw fifteen years ago.

The whole business is in a peculiar way Johnson's. Not a mechanic works in the factory who does not know that his chief understands the work on which he is engaged better than he does himself. There is not a part of the machine he has not made with his own hands and the most delicate parts he has himself created.

The talking machine business is not a great concern built by rich men's capital on poor men's brains. Johnson made it, with the help of his loyal friends, out of nothing. And throughout the buildings they warn you, "Don't mention my name. This is Johnson's business. He made it and his is the only name that should be connected with it."

DYER & BRO. ANNIVERSARY.

St. Paul House Celebrate Fortieth Year in
Business During Lively Week in That City.

(Special to The Talking Machine World.)

St. Paul, Minn., Sept. 5, 1910.

W. J. Dyer & Bro., prominent in the talking machine trade as distributors of Edison and Victor talking machines and records, took occasion this week during the period of the National Conservation Congress, and the State Fair, to celebrate the fortieth anniversary of the establishment of their business, which was founded by W. J. Dyer in 1870. In commemoration of the event W. J. Dyer & Bro. have sent out to their patrons and friends a handsome engraving showing portraits of W. J. Dyer, the founder, and D. M. Dyer, the builder of the wholesale section, who joined the house in 1871. There is also shown the first location on the corner of Jackson street and Seventh street, their next stand on East Third street, and the present immense building, 25-27 West Fifth street. The growth of the Dyer business is well illustrated by the figures appearing at the head of the engraving—"Sales 1870, \$20,000; sales, 1910, \$1,000,000."

Many a lazy, careless clerk retains his position from the mere fact that the employer will not take the trouble to put him out. But were he once out, would he be put back again? Never! Then why keep him?

EMERGENCIES TEST OF ABILITY.

Who Advances—Save Reserve Energy for
Emergencies.**

A man with great mental reserve, with a finely balanced judgment, with poised character, does not waver or falter in great panic or emergencies where superficial men lose their heads, says a writer in Success.

Great merchants know very well that many men in their employ could probably run the business when times are flush and money easy, but that it takes a financial general, a long, shrewd, hard, level head to guide a great business through hard times or a panic, when men without great reserves go down.

It is not so much the knowledge, experience or power actually used in the transaction of business that distinguishes a great business man as the subtle reserve power which those who know him and deal with him feel he might exert in some great business stress or panic. This reserve power is to the man what money surplus, not usually drawn upon or used, is to a great banking institution.

One reason why so many men do such little things all their lives, when they might do greater things, is because they often lack this surplus force, this reserve power. They do not take time to prepare for anything very great or anything outside the usual routine.

The result is that they use all their resources as they go along in the ordinary transaction of business, and they have no great reserve of mental training, discipline or experience for emergencies, so that when anything uncommon occurs, when a crisis, hard times or a panic comes, they go to the wall.

NO TRUTH IN REPORT

The report that the Columbia Phonograph Co., General, New York, had practically discarded its cylinder records is without the slightest foundation in fact. When H. A. Yerkes, manager of the wholesale department, was asked as to its truth or falsity, he said: "We are pushing the sale of our cylinder records as hard as ever, and will continue to do so. The statement that we have discarded the cylinder product is made out of whole cloth. Of course, the sales of the cylinders do not compare with the disc records. Discs are the popular goods, both in the domestic and foreign trade." Another fib fastened.

HANDLE VICTORS EXCLUSIVELY.

(Special to The Talking Machine World.)

St. Louis, Mo., Sept. 5, 1910.

The A. F. Mengel Music Co. opened their new store at 4300 Olive street on September 1. A feature of their store is the handsome talking machine department, which handles the Victor line exclusively.

ANNOUNCEMENT

We take this means of announcing, to all concerned, that the Victor Talking Machine Company, of Camden, N. J., have acquired and will hereafter control exclusively the Fibre Needle, formerly manufactured by us and known as the "B. & H." Fibre Needle.

All orders should be placed with the said Victor Talking Machine Co., Camden, N. J., who will notify you as to methods and policy to be adopted in the premises.

Respectfully

"B. & H." FIBRE MANUFACTURING CO.

CHICAGO, ILLINOIS

VICTOR RECORD CABINET CATALOG.

New Volume Well Arranged and Handsomely Illustrated Recently Sent Out to the Trade—Cabinets Designed to Harmonize with Every Type of Victor Machine—A Special Letter Regarding the Victor Wood Horns—Supplement to "Repair Part Catalog" Also Sent Out to the Victor Dealers.

During the past month the Victor Talking Machine Co., Camden, N. J., have placed before their dealers a new catalog of "Victor Record Cabinets." In arrangement, illustrations, printing, paper, etc., this dainty issue is of the high standard maintained by the company in all their publications. These cabinets, shown and described, include the new record album No. 51, a composite pattern designed to conform to all types of Victor machines; Victrola record cabinet, a mahogany cabinet to match the Victrola XII., and Nos. 150 and 151. All Victor cabinets are made in their own factory and under their personal supervision.

This company also transmitted a special letter on their wood horns, urging them on the attention of the dealer. In referring to their horn factory capacity and their tremendous business in connection with horns of this description they say: "Up to the present time, our capacity for the manufacture of wood horns has been unequal to the demand, and now, for the first time since December, 1906, are we in a position to recommend that our distributors and dealers make special efforts to sell Victor wood horns. During the year 1907 we sold 125 per cent. more wood horns than our capacity at that date. The year 1908 doubled the sales of 1907, and the year 1909 increased by 35 per cent. over the sales of 1908, and during the first six months of 1910 we have sold more than during the entire year of 1909."

A supplement to the Victor Co.'s "Repair Part Catalog" of April 1, 1910, was likewise mailed their distributors and dealers, a publication of some size in itself when the goods in detail are considered.

THE VICTROLA WITH AN ÆOLIAN ORGAN

The accompanying photograph is that of the Victrola shown in connection with an Aeolian organ in the auditorium of Miami University, Oxford, O. The occasion was a Victrola concert, attended by nearly a thousand students and professors of the university, July 28. Harry C. Meek, manager of the Aeolian Co.'s talking machine department in their branch house in Cincinnati, O., who had charge of this pleasing musical event, declared that he never saw an audience so delighted and enthusiastic over the Victor grand opera records. The program was carefully arranged, and through Mr. Meek's judicious selection of records

he subsequently received an order for a Victrola to be used in the music study of the college. This is a suggestion that other dealers should follow.

J. H. DODIN WITH GIMBEL BROS.

J. H. Dodin, an experienced and practical talking machine man, will be the assistant of C. P. Calderhead in Gimbel Bros.' department in their New York store.

An hour employed in brightening up your store is worth nine months cursing your hard luck and light sales.

SAVE THE LIFE OF YOUR RECORDS
BY USING THE PLACE AUTOMATIC RECORD BRUSH
FOR EDISON PHONOGRAPHS AND VICTOR TALKING MACHINES.

PATENTED { September 25 and October 2, 1906
 and September 10, 1907.

NO. 2 BRUSH IN OPERATION

PRICE, 15 CENTS

CAN BE USED ON ALL PHONOGRAPHS

Removes lint and dust from record automatically. Saves Sapphire from wearing flat and prevents rasping sound. Insures a perfect playing record. It is equally as efficient when recording. It is too cheap to be without.

No. 1 fits Triumph No. 2 Standard and Home No. 3 Gem and Fireside

MANUFACTURED BY

BLACKMAN TALKING MACHINE CO.
 97 CHAMBERS STREET, NEW YORK

J. NEWCOMB BLACKMAN
 President
 "The White Blackman"

Announcement

Victor Fibre Needles

The Victor Company announces having taken over the B. & H. Fibre Needle, formerly manufactured by the B. & H. Fibre Mfg. Co., of Chicago, Ill., the needle to be known in the future as the "Victor" Fibre Needle.

PRICE, \$5.00 per 1,000, subject to regular Victor discounts.

Manufactured in two styles

- No. 1 Standard length and thickness
- No. 2 Special—slightly shorter and heavier (more powerful)

Packing—for each style:

- 100 in envelope, with instructions and
- 250 in a carton, with instructions.

Ready for shipment on October 1st.

Old Sound Boxes will be altered, at a minimum charge, to accommodate the Victor Fibre Needle (thereby playing both fibre and steel).

Shipments from the factory of new Victor Machines and Sound Boxes equipped for Fibre Needles, will commence about Nov. 1st.

The qualities and advantages of the Victor Fibre Needle are already apparent to all who have used them.

Improved Victor Fibre Needle Cutter, for re-pointing fibre needles, price \$2.00. Ready for the market with the needles.

Victor Talking Machine Company, Camden, N.J., U.S.A.

Berliner Gramophone Company, Montreal, Canadian Distributors.

To get best results, use only Victor Needles on Victor Records.

TIMELY TALKS ON TIMELY TOPICS

After a search extending over two years Thomas A. Edison has almost given up hope of finding a collection of talking machine records of the voices of some of the most illustrious men of the nineteenth century. One of the missing records was a short message by the late King Edward. Another voice was a message to posterity given by Gladstone. Tolstoi and other famous men were represented in the collection. The records had been made by one of the National Phonograph Co.'s recorders during a European trip. He was killed in a railroad accident in New Jersey. After his death a search was made for the records, but they have disappeared so mysteriously that not a trace of them can be found. Of course, coming from a daily newspaper, the foregoing may be questioned as to its truthfulness. Perhaps Walter H. Miller, manager of the National Co.'s recording laboratory, could throw some light on the story.

Reports regarding business conditions in the European talking machine trade vary greatly, though the preponderance of testimony was of an optimistic tenor. The appended from the Music Trade Review would lead one to believe the situation is not so rosy as some travelers have said, at least in Germany, to wit: "A number of amalgamations have recently taken place in the talking machine business. First of all the Puppel machine factory and the Beka Record Co. joined hands, and now the Lindstrom Co., the largest German machine factory, has joined them. An amalgamation has also taken place in Leipzig, where the Kalliope Co., which manufactures automatic instruments and discs, has bought up the Sachsische Holzwarenfabrik Max Boehme & Co., a firm which builds only machines and was at the point of breaking down. The capital of the Boehme company was 1,200,000 marks, but the Kalliope Musikwerke A. G. were able to purchase the entire business for only 60,000 marks."

The improvements in record cabinets multiply, and each new design and method of storage seemingly adds to the convenience of handling, and ease of finding what is wanted. This means greater enjoyment of the marvelous entertaining qualities of all talking machines. The Victor record album is a sample of what is referred to in this remark. Of this mode of keeping disc records they say: "The owner of a Victor who takes care of Victor records by stacking them in a 'bunch' on a table, or on the window sill, is depriving himself of one of the real joys of a Victor, which is the satisfaction of hearing any one particular record just when you are in the mood for it. This is possible only when you have a place for every record and every record in its place." The progressive dealer knows this, or ought to; but the talking machine owner should also be familiar with this fact, and it is the seller of such goods whose duty it is to bring it to his attention that such an appliance will add to his comfort and pleasure. The rest will follow.

Elsewhere is printed the complete text of the Mexican Court of Cassation, the highest tribunal in the republic, reversing the sentence imposed by the lower court for an alleged infringement of the copyright law. The court of last resort in Mexico recognizes to the fullest extent the vast and marvelous progress made in the beautiful art of reproducing sound by means of the talking machine. In this opinion, which is unanimous, is displayed a spirit of legal interpretation worthy the highest standard of modern civilization. And by the way, Paul H. Cromelin, vice-president of the Columbia Phonograph Co., General, who was in the City of Mexico for a month or more giving his personal attention to the suit, is entitled to no small meed of praise for this important victory.

* * *

"In selling records," observed a particularly active dealer, "if more enthusiasm were displayed by a salesman larger sales would be made. I have gone into stores and looked on and listened while such a transaction was under way. To me, in a great many instances it has been disappointing. In the first place the salesman is not familiar with his stock, nor is he sufficiently informed as to the real character of the records he is running off trying to interest his customer. I do not pretend to know about every number in the catalog, especially of the latest popular songs; but I do know the standard favorites, and when I play them the performance has some snap and ginger in it. I have found, in my experience, that it takes very little to get a person interested or 'wound up,' if you please, and sales are doubled and often trebled by such tactics. My place is not so large, nor is it gorgeously furnished or equipped, but for my facilities I am willing to wager I sell twice the number of records of any of my competitors."

* * *

Strange as it may seem, a German trade paper (Der Sprechmaschine) says the concealed horn cabinet is disappointing, to express it mildly. But it is just as well to reproduce the exact language of an esteemed contemporary so the trade may judge for itself, which is apropos of the yearly fair at Leipzig: "The hornless apparatus have not fulfilled what they promised. At the last fair an extremely large variety of hornless apparatus were exhibited and it was generally expected that they would completely out rival the horn-apparatus. It is true, the hornless-apparatus have many great advantages. These advantages, however, do not seem great enough to be able to entirely beat those of the horn-apparatus. At the present fair the new types with horn greatly outnumber the hornless-apparatus and, contrary to the last fair, the manufacturers consider the trade in horn-apparatus better than that in hornless-apparatus."

When exaggerated or false statements are made about goods it is a human tongue that talks or a human hand that writes; it is not the merchandise that speaks—therefore it is not advertising.

SUCCESS OF BLUE LABEL RECORDS.

Latest Product of Columbia Phonograph Co. Becomes Popular with Both Dealers and Public—Some of the Hits in the New List.

The recently announced blue label records of the Columbia Phonograph Co., General, have made a hit with Columbia dealers, and with other goods in equal active demand a number of the factory departments at Bridgeport, Conn., are working overtime. The call for the Mignon Grafonola on order, according to headquarters reports, is running away from the company.

The first of the blue label series appeared in the October list that goes on sale September 25. November selections have also been sent the trade, and include the following titles: (Ten inch, double disc) "I Need Thee Every Hour," and "I Love to Tell the Story;" "Constantly" and "I'll Lend You Everything But My Wife" (Bert Williams); "The Soldier's Farewell" and "The Hunter's Farewell." (Twelve-inch double disc): "Paris and Helios" and "Humoresque;" "Anita's Dance" and "In the Hall of the Mountain King" (Grieg); "The Gypsy" and "O, Susanna," "The Mikado"—vocal gems and orchestra selections. The twelve-inch numbers are chiefly instrumental.

Owing to their popularity the following October records have been placed on sale immediately: (Ten-inch) No. A897, "Any Little Girl That's a Nice Little Girl is the Right Little Girl for Me," and "I've Got the Time, I've Got the Place, but It's Hard to Find the Girl." Also the two-minute indestructible of the first-named title. In the November list the following likewise have been put on sale at once as "big hits": (Ten-inch), A905, "Meet Me To-night in Dreamland" and "Tickle Toes;" A906, "Kiss Me" and "Come Along, My Mandy;" A894, "Every Little Movement" and "Heigh-Ho;" (Ten-inch blue label) A904, "Clap Hands" and "Does Anybody Here Know Nancy?"

AEOLIAN CO. DEPARTMENT READY.

Eighth Floor of Aeolian Hall Handsomely Fitted Up and Decorated—Large Stock Now on the Floor—O. A. Gressing's Good Work.

Work has been going steadily forward for weeks transforming the eighth floor of the Aeolian Co., New York, into their talking machine department. Since the arrival of O. A. Gressing, the manager, on the scene of action still more energy and activity has been displayed in order to have everything in readiness for the opening after Labor Day.

Painters, decorators and carpenters have been trying their utmost to get through, and while the demonstrating booths, record cabinets and other essentials have been finished by that time, considerable delay caused the postponement of the opening until Sept. 8. The new stock is on this floor, the handsome rugs adorn the place, and Mr. Gressing may be congratulated upon presiding over one of the most elegant departments of its kind in the country. Everything is right up to the minute and the most approved selling methods will prevail.

No. 782 CLOSED

No. 786 CLOSED

It is not only the outside of a cabinet that should be made and finished right, but the interior as well. Our new style of

SALTER CABINETS

which for the past two years have been the favorite among dealers on account of their superior quality to all makes, has kept our factory working overtime.

Our patent interior arrangement stands out in a class by itself.

The interiors of **Salter Disc Cabinets** have an individual compartment for each record.

The wood shelves are lined with soft green felt to prevent records from scratching.

Each shelf or record has a number which corresponds with index cards on door, so any record in cabinet may be located instantly.

The Disc Records lie flat on the shelves, preventing them from warping.

The interiors of our Cylinder Record Cabinets are so arranged as to hold the records in their original carton boxes, thus protecting them from dust or from breakage in handling, or the records can be placed on the pegs in the old way, if desired.

All our makes of cabinets are artistic in design and highly finished in any color, and securely packed.

Our latest catalogue will be mailed you free on application.

PERFECTS TALKING PICTURES.

Thos. A. Edison Announces Success of His Efforts in That Direction and Demonstrates Machine Before Newspaper Men—How the Talking Pictures Work.

After several years of earnest work Thomas A. Edison recently announced that he had solved the problem of talking pictures, and the first demonstration, given before a body of newspaper men, indicated that he had met with complete success in his efforts.

The demonstration was given in the laboratory at the Edison plant in Orange.

The picture that was thrown on the screen explained itself, literally. The figure of a man stepped forward, bowed and then began to talk—the lips moving in perfect, unmistakable unison with the words that couldn't have come from them, and yet couldn't have come from any place else, it seemed.

The man dropped a croquet ball, its impact sounding instantly from the floor. He pounded the table with a little hammer, and there wasn't the fraction of a second between the sight and sound of the blow. He dropped a plate, and as the pieces flew the crack resounded. Finally an automobile horn was sounded, and the demonstration was at an end.

The phonograph from which the sound of the voice and that of the "business" came was behind the screen. The machine from which the pictures were projected was at the other end of the room, yet the synchronism was flawless. Wires attached to the projecting mechanism controlled the two, and their unity was as perfect as that with which the record of the one and the film of the other had been made.

"I'm going to put Metropolitan grand opera into the hamlets of Illinois in a couple of years," Mr. Edison said afterward. "I'm going to take John Drew into parts of Iowa he never heard of. Finally, I'm going to take Col. Roosevelt to the cabins of the prairies with his campaign speeches. We've got it now."

Two years have been spent in perfecting these talking pictures. The old devices of having actors talk behind the screens or of taking phonograph records after the pictures have been made have been done away with entirely. The records for eye and ear are made at the same time.

The great obstacle that Mr. Edison had to overcome was in getting a phonograph that could "hear" far enough. At the beginning of the experiments the actor had to talk directly into the horn, which made the right kind of pictures impossible to get. Bit by bit, however, a machine was perfected which could "hear" so well that the actor could move at his pleasure within a radius of twenty feet. That is the machine that is being used now.

A complete drama has already been "made" in these pictures, but only for experimental purposes. It will not be shown; nothing will be shown until the talking pictures can carry a Broadway production out with them.

"This isn't for nickelodeons," Mr. Edison explained. "This is a big, a serious thing, and I'm not going to put it out until I can put it out the way I want to. It's important enough, I think, to deserve to be put out in just that way."

There are really two machines, but they are so interrelated through electrical connection that they act as one in producing before the spectator both the acts and the voices of the people who are depicted on the screen, although as a matter of fact the picture producing part of the machine is, as usual, behind the spectators, while the sound producing section of the apparatus is placed behind the screen upon which the pictures are thrown.

WILL DISPOSE OF FOREIGN RIGHTS.

L. P. Valiquet, the inventor of the Resonator, the new reproducing device for talking machines which was introduced to the trade at the Atlantic City convention, and which aroused a great amount of interest at that time, announces on another page of this issue his desire to dispose of the foreign

patent rights for this device. The patent rights will either be sold outright, or will be released upon a working agreement suitable to parties concerned. It might be added that Mr. Valiquet already has several propositions under consideration.

DEATH OF WILLIAM F. NYE.

Veteran Manufacturer of Fine Oils Dies in Fair Haven, Mass., in His 82d Year.

WM. F. NYE.

William F. Nye, a prominent citizen of Fair Haven, Mass., near New Bedford, died in that city on August 12th in his 87th year. In the business world Mr. Nye was chiefly known as the manufacturer of the well known product, Nyoil. The output of his factory on Fish Island went to practically every country in the civilized world, and the business continued to increase steadily.

Up to within a few weeks of his death Mr. Nye was remarkably active for one of his years and took a personal interest in his business affairs. While no definite arrangements have been made for continuing the manufacture of Nyoil and allied products, it is considered practically certain that Mr. Nye's son, Joseph K., who survives him, will look after the business.

SOME GOOD NEEDLES.

What a Good Needle Means to the Trade—The Success of the Blackman Talking Machine Co. "Playrite" and "Melotone" Needles.

There is hardly an accessory of the disc talking machine which is offered in such a variety as the needle. Since disc machines first made their appearance we have had announcements almost every month of some new needle for which great things were promised. A number of these needles proved very successful, others dropped out of sight and were heard of no more.

When the Blackman Talking Machine Co., however, put on the market their "Playrite" and "Melotone" needles they referred to them as "The best that money can buy." That they possess real merit was evidenced in the manner in which the jobbing trade and the dealers took them up and pushed them.

The majority of talking machine stores now carry "Playrite" and "Melotone" needles in their regular stock, and in practically every case are sending in increased orders each month. This growing demand in itself proves that the claims made for these needles are not in any sense fictitious. The names "Playrite" and "Melotone" were chosen by the manufacturer in the belief that the names in themselves express just what the needles were intended to do. Those who are unacquainted with the merits of these needles may obtain information and samples from the Blackman Talking Machine Co., 97 Chambers street, New York.

BUYS OUT COLUMBIA STORE.

(Special to The Talking Machine World.)

Trenton, N. J., September 10, 1910.

M. Woodward, a bright, active and experienced talking machine man, has bought out the Columbia Phonograph Co.'s store in this city, and will take over the property on the 15th. Mr. Woodward has been an attache of the company here for several years and has been in the business nine years, starting with the Conroy Piano Co., St. Louis, Mo., and going through all the grades.

In chatting of business with The World Mr. Woodward said: "Of course, Trenton is between two of the great cities, but for all that we catch the people who seldom, if ever, visit New York or Philadelphia, and we get a very fair share of the trade. I am surprised how briskly business has opened up. Within a week or so I sold two Grafonolas. The Mignon is a dandy."

**DOUBLE FACE and SINGLE FACE
TALKING MACHINE DISCS**
of any size and all makes.

“The New Way”

Echo Record Albums are being used by hundreds of Talking Machine owners, many of whom have classified their collections into groups—one or more albums to each group. The "Caruso" and "Tetrazzini" Albums, "Sousa's Marches," "Religious Music," "Harry Lauder," etc., all indicate how the volumes can be made up into a "Library of Music."

“The Old Way”

The records are played over and left under a table, on a window sill, or possibly pushed in the vertical racks of a Talking Machine Cabinet. Generally, no bags cover the records, and they are scratched while rubbing against one another, or else chipped or cracked by the contact. The pile gets heavy and some are dropped and broken—generally an expensive and especially fine record. Echo Record Albums prevent all this. The proper solution is to use Albums for all records, and when through playing, replace them in the albums which are kept away from dust in a Book Case or Cabinet.

THIS SHOWS THE POPULAR VICTOR ON A RECORD GLASS DOOR CABINET FILLED WITH SIXTEEN ECHO ALBUMS.

The Selections can be written on an Indexed Card which refers to particular volume and page of record wanted. Records may be kept this way like new and for a lifetime.

FALL RETAIL PRICES

Ten-inch Disc Albums . . . each \$1.25
Twelve-inch Disc Albums . . . " 1.50

"Echo" Record Albums preserve Disc Records against dust, careless handling, scratching or breakage.

Index in every album facilitates instant location of every Record. Enables classification in groups by an index.

Questions

Do you ever stop to really consider whether or not you are drawing from the Columbia product every item of the immense profit and advantage it holds for every wideawake and progressive dealer, no matter what his location or circumstances? Does it ever occur to you how immeasurably superior is the Columbia proposition to all others in the talking machine field, not only in essentials, but also in the finer points of the game? A half-hour's real undivided consideration of the matter will pay you, and pay you well.

Are you aware and do you exploit the fact that we have the greatest orchestra and the greatest band ever gotten together and trained for talking machine work? We rely on no names or traditions or superstitions. Our orchestra and band records rest on quality of playing and recording alone, and no others of the same class made anywhere in the world can compare with them. Similarly, the orchestral parts of our vocal records are unmatched by those of any other company in existence. Columbia orchestra accompaniments round out a vocal performance in a way that renders Columbia vocal records the most thoroughly musical of any so far issued.

There are well-defined reasons why the Colum-

bia process of recording produces the greatest results in the finished product of any system now in use. For one thing, it is the first and original process, which fact would mean little, however, if it were not that the best and cleverest minds the industry has produced are everlastingly intent upon ways and means of improving this process to the last detail of perfection—even greater perfection than at present attained. The remarkable improvement during the past few months, due to the installation of new methods, commented upon by dealers and public everywhere, is sufficient proof of this.

The Columbia reproducer is the greatest piece of musical mechanism on earth, reproducing the human voice and instrumental tones with a faithfulness to the original such as it is impossible to find elsewhere. The Columbia reproducer is made upon the same principle as Columbia records; that is, the idea that people want to hear the voice or instrument as it is in nature, with every musical quality preserved as it originally went into the horn, without any tinkering or doctoring of the original tone. The music of Columbia Records and Columbia reproducers is the music itself, not our idea of what we can make the people think music ought to be.

COLUMBIA PHONOGRAPH

Dealers Wanted—Exclusive Selling Rights Grant

and answers!

But, after all, one of the main sources, if not the principal source of our strength is found in the Columbia catalogue. Have you ever made a real investigation of its resources? Do you appreciate the care that was given in selecting it in such a manner that you have practically everything in music your customers can desire or ask for, contemplated in the smallest possible number of records for you to carry in stock?

To take one instance, do you realize what an asset you have in the violin, flute and harp trios issued from time to time during the past two years? Compare the "Herd Girl's Dream" (A587) and "Scenes That Are Brightest" (A5159) with any instrumental combination ever put out by any other company.

Where can you find an orchestra record to compare with "Idilio" (A5140) or the "Barcarolle" from the "Tales of Hoffman" (A5116)? The only other orchestra records that can class with these are made by the Columbia.

Can you find greater band recordings than "Colt's Armory March" (A821), "Selections from Tannhauser" (A5139), or, in lines of popular music,

than "Temptation Rag," included in our September list?

Compare our flute record of the Russian Carnival by Marchall Lufsky (A841) in our August list. No flute solo ever before recorded by any company can approach it.

To be still more specific, why not compare "Fraidy Cat" (A797) by Ada Jones with the same selection by the same singer on a competitive list, and "Zoo Lou" (A797) by Collins and Harlan, with competitive product also by the same singers? No one not hopelessly prejudiced could admit that competitive recordings of these selections can stand up for a minute beside the Columbia.

Then take a look over our new operatic recordings lately announced; compare our record of "Caro Nome" from "Rigoletto," by Bronskaja, with any other record of the same selection; our "Soldiers' Chorus" from "Faust" with any other chorus on the market. Try our "Suoni la tromba" from "I Puritana," by Blanchart and Mardones, against any other of the same selection, or our "Sous le dome epais" from "Lakme," by Bronskaja and Freeman, with competitive recordings of the same. The difference in favor of the Columbia is too obvious for comment.

and Where We Are Not Actively Represented

TRADE NEWS FROM CINCINNATI.

Changes Among the Managers—August Business Rather Light—Busy Fall in Prospect—Wurlitzer Co. Very Active—Pushing the Victor Line—Aeolian Co. Exhibit at Ohio Valley Exposition—New Columbia Machines Attract Much Attention—Other Items.

(Special to The Talking Machine World.)

Cincinnati, O., Sept. 9, 1910.

Several changes in the factors of the Cincinnati trade have taken place recently, Manager S. H. Nichols, of the Cincinnati office of the Columbia Phonograph Co. having been transferred to a similar position at Pittsburg. He was succeeded by R. J. Whelen, the former local assistant manager, whose promotion was the cause of Ben. L. Brown being elevated to Mr. Whelen's former position. Manager W. A. Timmerman, of the Milner Musical Co., which makes a specialty of phonographic goods in connection with a line of

pianos, has resigned. This becomes effective September 15, on which date he accepts an offer made by the St. Louis office of the Aeolian Co. Timmerman's successor is Raymond Stotler, formerly with the piano department of A. Steinkamp & Co.

The Cincinnati trade experienced little demand for goods during August, mainly on account of the absence from the city of the big buyers and due to the fact that the stay-at-homes were compelled to remain out of doors on account of the terrific heat. These conditions will disappear shortly, and the buyers will find the trade ready to meet all demands, the dealers having had plenty of time to prepare for this movement.

The Wurlitzer Co. are preparing for the big crowds of retail and wholesale visitors that the Ohio Valley Exposition will bring to Cincinnati. The beautiful six-story, white-tiled building, easily the most conspicuous on Fourth street, is very elaborately decorated for the occasion. Wheatley pottery window boxes filled with flowers, showing the official colors of the exposition, and, in addition, an elaborate electrical display, will prove one of the sights of Cincinnati after dark.

The Wurlitzer Co. have just received an order from the exposition officials to install an Aux-e-to-phone in their restaurant. This instrument will undoubtedly be one of the features of the exposition. That the exposition will bring many dealers to town is an assured fact. The Wurlitzer Co. extend them a warm welcome and are preparing to entertain them. The exposition furnishes a splendid opportunity for the central State talking machine dealers to do some missionary work on Victrolas.

The Wurlitzer Co. have notified their dealers that any retail prospects calling at their store, with a retail dealer's card or a letter of introduction, will be given every attention and will be shown a Victrola under the best possible conditions, and results reported on to the dealer sending in the prospect. Additional clerks have been secured especially for the entertainment of the visitors.

The vacation season is over, and with every employe on duty and a generous stock of goods at hand, the Wurlitzer company are preparing to handle any situation that the exposition may bring about.

Results in August were far above the average, and the sales are running up in a manner which, to say the least, is encouraging. A greatly increased retail business is in sight, as the cooler weather has arrived and has already brought a noticeable increase in record buying.

Mr. Browning, of the Victor company, stopped over in Cincinnati on his return from his vacation, and his many Cincinnati friends wish him even a greater success than he scored on his last trip through the State of Kentucky.

The Aeolian Co. occupy a large booth, centrally located in the Liberal Arts Building, at the Ohio Valley Exposition, where they are exhibiting their full line of Pianola pianos, which includes the Steinway Grand Pianola piano and Steinway Upright Pianola piano.

They also have a display of Victor machines, including one each of the following specials: A Moorish inlaid Victrola, a white and gold, a weathered oak and a Circassian walnut and several mahogany Victrolas. These machines have been placed so as to form a square, in the center of which is a beautiful palm. The lower end of the booth is occupied by one each of the smaller machines.

Daily concerts are given in the main hall, consisting of the Auxetophone accompanied by a full band.

Louis H. Ahans, who is in charge of the talking machine department and who is in command of the booth at the exposition, has arranged the Pianola pianos and Victor talking machines very artistically. The Aeolian Co. have the entire list of Red Seal Records in their booth at the exposition, and are in a position to play any record asked for.

The Columbia Phonograph Co. are showing two new styles of graphophones and one new style of Grafonola, the "Mignon"; these three new instruments are attracting great attention, and will undoubtedly be very popular with the trade.

Their business as a whole for the month of August will be 50 per cent. over the business of the corresponding month last year, and also shows a substantial increase over the past month. Retail and instalment business is good, and the same strong demand continues for the high grade Grafonolas and records.

The new grand opera records put on the market recently, consisting of over 100 different selections, have met with an enthusiastic reception from lovers of high-class music, and the daily grand opera concerts are enjoyed by many of their friends and customers.

The outlook for the wholesale business this fall is better than for years, and they predict that one of the largest businesses in the history of the Cincinnati office will be done this fall. The dealers are optimistic and are putting in a liberal stock, anticipating this large demand, of both machines and records.

The force of wholesale traveling salesmen will be increased to-morrow in order properly to take care of the territory of the Cincinnati office, which has been enlarged.

Manager Stever, of the Lyric Piano Co., who is about to install his "Talking Machine Shop" with Victor goods, is in receipt of a number of applications from persons anxious to take charge of this new department, which will be ready for operation before October 1.

Walter G. King, manager of the talking machine department of J. E. Poorman, Jr., on Main, near Seventh street, is back on deck after a two months' siege in a hospital. He was hurt while engaged in a game of baseball, and for a time it was thought the injury would result seriously. King is again as well as ever, after having gone through three operations.

THE GREAT LIRA ANTIOQUENA.

Famous Colombian Musical Organization Engaged to Make Records of Colombian Music Exclusively for Columbia Phonograph Co.

The enterprise of the Columbia Phonograph Co. has been again notably displayed in their recent engagement of the Lira Antioquena, a native orchestral organization of the Republic of Colombia, to make a series of records for the Columbia Phonograph Co.'s trade in South America—more particularly, of course, in the Colombian Republic.

The engagement involved such difficulties as are seldom met with even in the talking machine busi-

THE LIRA ANTIOQUENA.

ness. At the outset, it took a representative of the company thirty days, traveling on mule back and by canoes from the nearest port, to locate the orchestra; following that came negotiations for the work to be done, after which arrangements had to be made for the transportation of the men and their instruments to New York, where in the general laboratory of the Columbia Phonograph Co. all the recording was done.

The name "Antioquena" is derived from the Antioquena Indians, aborigines of Colombia, found in possession of the country by the Spaniards at the time of their first conquests in South America centuries ago. While the infusion of Spanish blood has changed the characteristics of the race to some extent, the people of the country in general still retain the type of the original Antioquenas.

THREE NEW VICTROLAS.

Victrolas X, XI, and XIV, Selling at \$75, \$100 and \$150 Respectively Will Be Ready for Trade Next Month—Victrola XII Is Discontinued—Good Pre-Holiday News for Victor Dealers—Should Order Early.

Under date of September 10 the Victor Talking Machine Co. announce the placing on the market of their new styles of Victrolas, namely, X, XI and XIV, to sell at \$75, \$100 and \$150 respectively.

Since the Victrola was first introduced to the trade it has been the ambition of the Victor Co. to

NEW VICTROLA X.

present to the dealers modified forms of the original style, which could be offered at a lower price than the original machine, and would appeal to those who could not afford to purchase the more expensive styles. The three new Victrolas enable the Victor dealer to cater to practically every class of trade with the Victrola and to profit by the reputation enjoyed by that truly wonderful instrument. The announcement is especially welcome at this time, as the trade will thus be able to have suitable stocks on hand for the holiday trade.

Shipments in limited quantities of the Victrola X and XI will commence about October 1, and of the Victrola XIV about October 15, and as usual,

NEW VICTROLA XI.

orders will be filled as received, so the dealers will do well to look after securing their stocks at an early date.

For the present the new instruments will be supplied in mahogany only. The Victrola X with parts nickel plated and XI and XIV with parts gold plated. After the holidays the instruments will also be supplied in various oak finishes.

On September 10 the Victrola XII, selling for \$125, was discontinued and dropped from the catalog. Orders on hand for Victrola XII have been canceled and dealers are requested to send revised

orders for the new styles as substitutes for the Victrola XII.

There can be no doubt that the introduction of the three new types of Victrolas marks a new step in the progress of the Victor Co. and makes for the

NEW VICTROLA XIV.

still further elevation of the talking machine trade in general. That there is a field for the new instruments goes without saying, and there is much cause for congratulation.

CONDITIONS IN SOUTH AMERICA.

Chas. F. Lightner, Who Represents the Victor Co. in Buenos Ayres, Reports Rapidly Growing Business in That Section.

Charles Ferree Lightner, who represents the Victor Talking Machine Co., Camden, N. J., with headquarters in Guenos Ayres, Argentine, S. A., last month arrived in this country. Of his trip he said:

"Yes, I got back home early in the month, going directly to Camden, and while here will probably divide my time between Philadelphia and New York. I am feeling much better now than at first, the climate here having a pronounced beneficial effect. The Victor business is growing rapidly in South America, and it is fairly good now. To be sure, trade there depends almost entirely upon the crops, the same as here, only more so. With our main offices in Buenos Ayres we can cover the South American countries with a corps of men traveling from that point. I shall remain in the States a couple of months, probably longer, and then again something may require my departure at an earlier date.

"Our Mr. Terry left for Mexico only about a week ago, and will hereafter devote his time to that country and the West Indies. At one time he traveled the west coast of South America, but I will continue to cover that territory as I have been doing for some time."

CHANGE OF COLUMBIA CO. MANAGERS.

(Special to The Talking Machine World.)

Cincinnati, O., Aug. 26, 1910.

A change has taken place in the management of the Middle West headquarters of the Columbia Phonograph Co., S. H. Nichols having been transferred to Pittsburg. His successor is R. J. Whelen, formerly the assistant manager, who is thoroughly familiar with local conditions. The latter's place has been taken by Ben L. Brown, who has been connected with the local agency some time.

RECORDS BY TABERNACLE CHOIR.

The Columbia Phonograph Co. Make a Number of Successful Records of the Choir and Organ of the Great Mormon Tabernacle.

(Special to The Talking Machine World.)

Salt Lake City, Utah, Sept. 8, 1910.

After many trials to make acceptable records of large bodies of singers, the Columbia Phonograph Co., General, New York, have been successful. In the celebrated Mormon Tabernacle of this city, on the evening of Sept. 1, the reproduction of twelve numbers, sung by the Tabernacle choir of 300, were secured within two hours by Expert Hausmann, of the Columbia recording laboratory, who came here from New York specially for that purpose.

No little difficulty was experienced in placing the amplifying horns, and for two hours Mr. Hausmann and his assistant experimented in the location of the horns. Finally they were suspended from a rope stretched across from gallery to gallery, the flaring bells of the two horns covering, one the sopranos and altos, and the other the tenors and basses. All the accompaniments on the grand organ were played double forte. Of course fine shading was out of the question, as massive efforts were desired.

The list of the numbers sung, with time occupied, follow: "We Thank Thee, O God, For a Prophet," Mrs. Norton's hymn, 2 minutes; anthem, "Let the Mountains Shout For Joy!" by Prof. Evan Stephens, 3 minutes 5 seconds; "Soldiers' Chorus," "Faust," 2 minutes 25 seconds; "Hallelujah Chorus," Handel, two plates, 2 minutes and 1 minute 50 seconds respectively; "Inflammatus," Rossini, 3 minutes 15 seconds, Mrs. Edward, soloist; "Gypsy Sweetheart," Horace Ensign, soloist, 2 minutes 43 seconds; "Hosannah!" temple dedication anthem, by Prof. Evan Stephens, 3 minutes; "Pilgrim's Chorus," "Il Lombardi," 2 minutes 52 seconds; "Light and Truth," famous Welsh march, 2 minutes 7 seconds; "America," "Star Spangled Banner," 2 minutes 3 seconds; hymn, "O My Father," 3 minutes 40 seconds; "Unfold Ye Portals," from Gounod's "Redemption," 3 minutes 35 seconds.

A DELICATE MISSION FOR NATIONAL CO.

In addition to furnishing its dealers with literature, electros, practical suggestions and advice for the most effective display and sale of goods, etc., the National Phonograph Co., Orange, N. J., are occasionally called upon for assistance in more serious matters, as the following letter from a far western dealer will prove. This particular epistle, from a California dealer, made the officials sit up and take notice and wonder for the moment whether they were conducting the biggest phonograph factory in the world or a plain matrimonial agency. It is quite evident that the dealer's confidence in the "wizard's" powers is so complete that he even believes him capable of furnishing a helpmate who will measure up to the rather sweeping specifications named in his letter:

"Dear Friends.—I received your kind letter Sunday inquiring about my stock of machines and records, and I delayed answering you for a day or so in order that I might take stock and give you the exact figures as per reply sheet enclosed herewith. Now, I desire to ask a favor of you and that is for you to send me a wife. I want one about 5 feet 3 inches in height; blonde; about 24 years old; a good Christian; a good cook; a neat housekeeper; must have a sweet and loving disposition; one who has a desire to make her home the pleasantest place on earth for her husband and family; one who will go to church and Sunday school regularly and be just as good as she can be.

"Now about myself: I am 46 years old; have blue eyes and gray hair; weigh 240 pounds; was married but am single now; am trying to be good, and if I had the right kind of a wife I know that I could be still better. I enclose stamp for a reply. N. B.—Would prefer an orphan as I am an orphan myself."

VICTOR CO.'S GREAT SUCCESS.

First Six Months of Present Year Best in Company's History—A Record Breaking July—Rush of Orders Necessitate Increased Facilities—Some Personal Items.

(Special to The Talking Machine World.)

Camden, N. J., Sept. 10, 1910.

The trade in general will no doubt be interested to hear of the wonderful business success the Victor Co. is enjoying. The first six months of the year were, when viewed from every standpoint, the most successful semester in their history. July surpassed July of 1907, which was the banner year. August sales surpassed August of 1907—the largest August—27 per cent in the domestic department alone.

Orders for both machines and records are coming in at an unparalleled rate, and it is very apparent that the Victor Co.'s capacity will not be nearly sufficient to take care of the business during the fall, if it keeps up at the present rate.

They are rushing forward extensions to the cabinet factory as rapidly as possible—125 per cent. is being added to its capacity. They are about moving into the new motor factory, and the addition of three stories to their office and laboratory building is progressing fairly well. One more floor is to be devoted to offices and the remaining two floors to the recording laboratories.

Eldridge R. Johnson, president of the company, and his family are still in Europe. Chas. K. Hadson, vice-president and treasurer, and his

family are spending the month of September abroad. L. F. Douglass and his family are in California, but the remaining directors—A. C. Middleton, A. W. Atkinson, B. G. Royal, W. J. Staats and Louis F. Geissler, general manager—are "on the job."

CHANCE FOR EXPERIENCED MAN.

Thoroughly experienced talking machine repair man wanted at once. Steady position. Standard Talking Machine Co., Pittsburg, Pa.

CABINET WANTED

Wanted—A cabinet of the type made by the International Correspondence School a few years ago, for the accommodation of an Edison machine and language records. Must be in first-class condition. Address "Cabinet," care The Talking Machine World, 1 Madison avenue, New York City.

LEARN WIRELESS AND R.R. TELEGRAPHY

Shortage of fully 10,000 operators on account of eight-hour law and extensive "wireless" developments. We operate under direct supervision of Telegraph Officials, and positively place all students, when qualified. Write for catalog. Peerless Suction Cleaner Company

89 CHAMBERS STREET

NEW YORK

THE PEERLESS VACUUM CLEANER.

The New Peerless "Gem" Finds Instant Favor with Trade—A "One Person" Machine—Looks Like Busy Fall.

The absolutely new vacuum cleaner—the Peerless Gem—illustrated in the advertisement of the Peerless Vacuum Cleaner Co., 89 Chambers street,

New York, appearing on another page, is creating a sensation. The jobbers who have seen a sample pronounce it the very cleverest device yet conceived in the vacuum cleaner field. Without exception they have declared it will have the biggest sale of any cleaner ever placed on the market. The market is ripe for a successful "One-Person" machine and the Peerless Gem is the first and only practical and successful one-person machine ever devised.

In presenting this proposition to talking machine jobbers an unusual opportunity is offered. The

company want jobbers only. Their policy in this respect is well defined. They do not want the dealer nor will they accept retail business. In setting the list price on the new model Gem they have endeavored to arrange a scale which will give the jobber and the dealer a liberal margin of profit.

The Peerless Gem is going to be a perfect whirlwind in point of sales during the fall season.

AMBEROLA IN WILD MINING COUNTRY.

The Sunday Oregonian, of Portland, Ore., in its issue of July 31, introduced a half-page illustrated article describing the plant of the Washougal Gold and Copper Mining Co., in the following entertaining fashion:

"A lone prospector, wandering through the rugged hills near the headwaters of turbulent Shirt Creek in lower Skamania county, Wash., a few evenings ago, was startled to hear the soft, sweet strains of Verdi's classic 'Rigoletto' floating on the still twilight air. He paused and listened, for such sounds as these he had never heard in that untraveled region before. Spell-bound by the music, he waited a while, then started in the direction from which the sounds seemed to emanate. His trained feet and sturdy limbs quickly

carried him through the tangled underbrush and jagged rocks that lay between him and the source of the charming notes. Soon he stood at the entrance of a long, airy dining hall, brilliantly illuminated with electric incandescent lamps, and a square, upright box, whose highly polished sides shone brightly under the glare of the lights, standing in the center of the room. Around it was gathered a group of twenty or more bright-faced, horny-handed miners, clad in the picturesque garb of their profession. As soon as they spied him they bade him a hearty welcome.

"He was in the camp of the Washougal Gold and Copper Mining Co. The piece of furniture which had arrested his first attention was a mahogany Amberola, containing the finest instruments that can be placed in the manufacture of such a machine. This accounted for the music that he had heard far up on the hillside. 'What is the cause of all this?' he inquired. 'For an answer one of the men, with a jerk of his head, indicated a little, smooth-faced, ruddy-cheeked, gray-haired gentleman who stood with his arms folded complacently behind his back, his arms coatless, and with his brown telescope hat hanging jauntily on the side of his head in school-boy fashion. His face beamed his delight as he listened to the music. The stranger had not noticed him before.

"This is Mr. Mabec,' said one of the men who had acted as spokesman. Mr. Mabec, as he soon learned, is president of the Washougal Gold and Copper Mining Co., and general manager of its properties. F. A. Mabec is the way his name appears on his checks. That's the way it appeared on the check tendered to the Graves Music Co., Edison jobbers of Portland, Ore., in payment of the Amberola in question.

"The sale of this particular instrument was a 'rush' transaction. Mr. Mabec wanted an Edison phonograph and some records for his men—he wanted the best to be had—he wanted the outfit at once—and he wanted it shipped by express. He got it, just as it was ordered. After landing at the express office it was necessary to haul the goods about twenty-five miles up into the mountains, but they finally reached their destination O. K., and are now providing entertainment for the rugged miners in the Washington wilds.

ANENT BURCHARD NEEDLES.

Merits of the Different Styles of Talking Machine Needles Made by F. R. Reingruber—Their Original Features.

F. R. Reingruber, Schwabach, Bavaria, Germany, one of the most prominent manufacturers of needles in that country, markets his product

No. 1.

under the name Burchard, and in both the German and export fields Burchard needles are in a class by themselves. The needles are highly fin-

No. 2.

ished and tend to give long life to the records, it being claimed that each needle can be used six times without harm to any record.

No. 3.

The Burchard needles are made in three styles, which are illustrated herewith, and are designed as follows: No. 1, for soft playing; No. 2, for loud playing, and No. 3, for string tone music. Mr. Reingruber is prepared to establish sales agencies in the United States and other countries, and will forward a sample order of needles to those interested upon application.

A PRONOUNCING GAZETTEER.

One of the features of the newest Victor record lists is the condensed pronouncing gazetteer of musical terms for the benefit of both dealers and retail buyers. In addition to the pronunciation of the usual musical terms, such as Andante, Fortissimo, etc., there are included the names of the various well-known musical classics and grand operas of foreign origin, with the proper pronunciation attached. This feature should prove especially valuable to the dealer and his salesmen who are unfamiliar with musical terms, for their embarrassment is great when they are called upon to pronounce a name and make a flat failure of the attempt.

THORN NEEDLES POPULAR.

Both Trade and Public Realizing the Value of These New Needles—What Is Claimed for Them—Do Not Harm Records.

Among the talking machine needles that have won the favor of owners of disc machines are the Thorn needles, put on the market by the J. W. Jenkins' Sons Music Co., Kansas City, Mo. These needles are made from live thorns and possessing all the known toughness of that vegetable growth, produce excellent results in the talking machines. It is claimed for the thorn needles that, not being metallic, they eliminate all the scratch in playing records and are especially suitable in preserving the natural quality in vocal and stringed instrument records. Dealers are rapidly learning the value of the thorn needles in demonstrating, and as a result the demand for these needles is rapidly on the increase. They are priced at a reasonable figure and, it is said, will play several records satisfactorily without a chance of damaging the record grooves. The trade would do well to investigate the thorn needle proposition and secure samples with holder.

J. A. COLLINS' NEW CONNECTION.

J. A. Collins, formerly with the Universal Talking Machine Mfg. Co., Philadelphia, Pa., traveling the Middle West, is now sales manager of the Talking Machine Sounding Board Co., New York. Mr. Collins starts on a selling trip October 1 and will be on the road until December 20.

WHAT B. SWITKY REPORTS.

Benj. Switky, Victor and Edison jobber, New York, in a chat with The World, said: "Since moving to the Fifth Avenue building our business has bettered materially. For the first time we have not run behind during July and August. That is to say, always in those two months we did business at a loss, but this year we have come out even. We consider this a pretty good indication of what the fall will be."

HELPS RECORD SALES.

On account of recent publicity there is a big increase in the demand for Cavalieri records. "Sheriff Bob," however, is not a heavy purchaser, rumor sayeth.

EXPORT ASSOCIATION FORMED.

An organization, known as the American Manufacturers' Export Association, was perfected at the Hotel Imperial, New York, Sept. 12, to aid in the expansion of the foreign trade of the United States. About fifty of the leading manufacturers were present, including the Victor Talking Machine Co., Camden, N. J. Daniel P. Mitchell, manager of the Victor Co.'s export department, was elected second vice-president.

PURITONE

NEEDLES

are now made by an "IMPROVED PROCESS" which cannot be excelled, representing 100 per cent. quality in tonal power and record saving—a new standard for talking machine needles. ¶ "PURITONE" means just what it says—an absolutely PURE TONE whether you play voice or instrument music, or comedy specialties.

QUAKER CITY TRADE NEWS.

Fall Business Starts Off with a Rush on September 1—A Review of Conditions—Working Off Old Stock—Penn Phonograph Co. Improvements—Heppe House Makes Good Report—Columbia Co. Business Excellent—L. Buehn & Bro. Make Big Shipment—Delay at Wanamaker's—Other News.

(Special to The Talking Machine World.)

Philadelphia, Pa., Sept. 5, 1910.

The talking machine business in Philadelphia is in a most flourishing condition with the beginning of September, the first fall month. Business in August was very good—it was considerably better than the dealers had expected, and it was the best August the trade has ever had. With the beginning of fall the prospects are very promising. All the dealers are in the best kind of spirits, and if hopes and enthusiasm could count for anything, the talking machine trade will round out a most satisfactory year.

The Philadelphia dealers, as much as possible, have been working off all their old stock, not only in machines, but in cabinets, etc. They start the fall campaign with everything new and they have made unusually heavy orders on the manufacturers. Improvements in the jobbing houses are to be noticed everywhere, and all available space will be utilized to make as much room as possible to conveniently handle the business.

The Penn Phonograph Co. are making extensive changes. They have doubled the size of their offices, and have entirely rearranged their booths, giving them at least one-third more working space. They are also going to have the entire first floor repapered and repainted and have rearranged their racks.

The Penn Co. report that August has been very much better than last year, and from present prospects they believe that their fall business is going to be big. They have already received a large number of fall orders. Their Mr. Stewart is now on the road covering the New Jersey territory. He is a new man, and has been doing remarkably satisfactory work. T. W. Barnhill has been spending a couple of weeks at Ocean City, and H. F. Miller has just returned from a holiday trip spent in Canada. John B. Miller went to Atlantic City the latter part of last week to be gone a few weeks.

The Penn Co. have a car load of cabinets on the way, a general assortment of the new styles. They have cleaned up pretty well on all the old stock.

The Heppes report that their talking machine business in August was very fine. They are changing about their record racks and are making room for the carrying of a much larger stock. They have now the largest stock of talking machines in their store that they have ever had since they have been in the talking machine business. Mr. O'Neill, the manager of the Heppe department says he believes they have a larger stock of Victrolas than have ever before been held in the store of a Philadelphia dealer. They expect to take on some new men very shortly in their

talking machine department. They will increase their selling force by at least three or four.

The Heppes report that they have been doing a very satisfactory business at both their Lancaster and Thompson street branches, both of which have been showing a big increase. They have very much improved their talking machine show window by raising it, so that it is now level with the window and the display is very much more easily seen. They are awaiting their new stock of cabinets. At present they are very short of cabinets, having in stock only between thirty and forty, where their usual supply on hand is about 200. They received from three dealers the other day advance orders for 108 machines, which shows the way the wind seems to be blowing in every direction. They have some very fine dealers on their list, one firm last year selling, from the 1st of September to the 1st of January 42 Victor talking machines, and he has this year placed a much larger order than last year.

The Heppe firm the past week sold a Victrola to a colored undertaker in Camden, who will use it at his funerals hereafter. He selected a number of religious records as well as several dead marches so that he will have a variety to suit all purposes.

T. K. Henderson, manager of the Columbia Phonograph Co., reports that his business in August was very good, and exceptionally so for August. Marion Dorian, treasurer of the company, was in Philadelphia last week, and Hayward Cleveland, manager of their Twenty-third street store, was in Philadelphia for a short visit on Saturday. G. L. Funnell, manager of the London factory of the company, was in Philadelphia for several days last week.

The Columbia Co. are having quite a number of demonstrations of the Grafonola Mignon of the new grand opera records. This Grafonola Mignon is a very good seller, and among the best of the records are the new grand opera selections made by Boninsegna, Mardones, Bronskaja, Freeman, Blanchard and Constantino. They are going to have their lighting system of the store improved this fall. Mr. Henderson just came back from trip up the state, and will take a little vacation this week and then start out again. They will give a fine series of concerts at their Philadelphia store this winter. They have a very able concert master in E. H. Bishop.

Louis Buehn & Bro. report that their business in August has surpassed all their expectations. "I have the August of last year skinned to death," is the way Louis Buehn is pleased to put it. The firm have been laying in a very heavy stock, and have placed large advance orders with both companies for machines. "I anticipate now," says Mr. Buehn, "closing up the biggest year's business we ever had." The firm have just closed up some very nice orders, and they were getting ready on Monday for shipment an order for \$1,000 worth of goods to one firm, one of the biggest orders the firm have ever taken. Edward Buehn returned on Monday from a very successful trip through the Cumberland Valley.

There is much annoying delay in the Wanamaker

building operation and it looks as if it would be several months before the talking machine department of that house would be moved into its permanent quarters. They have been finding the August business most satisfactory, and feel very badly the need of room, but they will do nothing to relieve this congestion until they get in their new quarters, which they expect will be in good time for the holiday trade. When they do move, they expect to have the finest department for talking machines that has ever been operated in this city.

It is reported that John J. O'Neill, manager of the talking machine department of the Heppe house, has resigned his position with that firm, to take effect almost immediately.

STANDS SALT WATER TEST.

High Quality of Material Used in Edison Machines and Records Proven by Experience of Dredge Engineer of Vancouver, B. C.

It has always been the proud boast of the National Phonograph Co., Orange, N. J., that none but the very best materials obtainable enter into the construction of Edison phonographs. If evidence were needed to substantiate that claim it is to be found in the experience of Jack McLaughlin, engineer of the dredge "Skookum," Vancouver, B. C., as related by him in a recent letter, as follows:

"I have in my possession one of your phonographs, No. 683354 D, which had the misfortune to be among the cargo of baggage of the S. S. "Ohio," passenger and cargo boat running from Seattle to Alaska, and which was wrecked in Carter Bay, off the British Columbia coast a little over a year ago. This machine was in the salt water for about eight months before being brought to the surface by one of the divers working on the wreck. We cleaned and dried it in our spare moments, and to our surprise succeeded in getting it to run first-class and without any repairs.

"We fished up a bunch of records and had some very good music. Some of the records were as good as new, and with one or two exceptions the balance were in very good condition. Now, I thought that perhaps you would like to have this phonograph to use as an advertisement, and if so, would ship it to you, to be replaced by you with a new one."

SOL. BLOOM'S LATEST VENTURE.

Sol. Bloom, who is well known in the talking machine field in this city, and who handles Victor machines and records at his two establishments, 336 Fifth avenue and 40 West 34th street, has leased the property at 236-242 West 42d street, adjoining the Liberty Theater, for twenty-one years, with renewal privilege. The rental agreed upon for the term of the lease is said to be \$500,000, and if Mr. Bloom erects the twelve-story building as planned the entire deal involves an expenditure of about a million dollars. The plot fronts 80 feet on 42d street, 98 feet 9 inches deep. Mr. Bloom expects to have the new building ready for occupancy by May 1, 1911.

RECORDS OF COLOMBIAN MUSIC

Made for Columbia Phonograph Co. by Emilio Murillo, the Prominent Composer and Musician of That South American Republic His Success in the Concert field in This Country—His Enthusiastic Letter Regarding the Records Made by Him.

Emilio Murillo, who recently has been making records of his entire repertory for the Columbia Phonograph Co., is one of the world's most gifted pianist-composers and a unique figure in the musical world of South America.

Señor Murillo is a native of the United States of Colombia and has undoubtedly done more for the cause of music in the Colombian republic than any other man in the history of the country, able as have undoubtedly been many other native exponents of Colombian music.

Murillo's career would seem to have been ideally planned for the development of his best gifts as a player and composer. Of independent fortune and inspired with a high patriotic zeal to extend the scope and knowledge of the music of his native

EMILIO MURILLO.

country, he has given practically all of his tireless energy and the immense enthusiasm of his nature to the furtherance of this object. Murillo is first of all a composer, and one of marvelous fertility and originality. Among his honors is that of having composed the Republican Hymn of Colombia, generally conceded to be one of the most inspiring and appropriate national airs ever written. His music throughout shows a wonderful fund of melodic resourcefulness, with richness of color and strong virility, and with fresh, unhackneyed and fascinating harmonies that attract the real appreciator of musical art wherever heard. In his capacity as professor in the Academy of Music at Bogota, Murillo has done magnificent work in furthering the cause of Colombian national music, and his present visit to the United States is a direct outcome of his determination and efforts to give the music of his native country a place of prominence in the music of the world. The importance of his mission is attested by the fact that on his departure from Colombia he was tended an official banquet by the government of his country, in the course of which he was warmly commended by the President of the Republic.

Murillo's success in America has been phenomenal so far and the successful result of his mission has never been in doubt. Apart from his exclusive engagement with the Columbia Phonograph Co., he has already appeared in several important concerts with most notable success, prominent among these being the great function recently arranged in Washington for the benefit of the Costa Rican earthquake sufferers. At this concert Murillo's playing was the event of the evening. While his fame as a composer is such as in gen-

eral to overbalance his interpretative reputation, Murillo is equally good in execution and in composition, his playing of the piano being remarkable for its fire and brilliancy and the absolutely perfect technic displayed.

Murillo has spent in all several weeks in the Columbia laboratory, in that time recording practically every important work composed by him, all solos, piano, flute and vocal, being executed by himself, and the band numbers being played by the Banda Española under Murillo's supervision. The piano solos in particular are said to be remarkable reproductions, a number of which will probably be listed by the Columbia Co. for its American trade.

Murillo is most highly enthusiastic over the Columbia process of recording and has listened to the records already through with the keenest delight. His feelings find expression in the following letter to the Columbia Co. giving them the exclusive right to record his compositions, and granting them also the sole right to all future recordings by himself:

May 28, 1910.

Columbia Phonograph Co., General, Tribune Building, New York City:

Gentlemen—After listening to the Columbia records of my own compositions recently made by me in your New York laboratory, I am convinced that your process of record making is unequalled by that of any other company. My flute solos are magnificently recorded, as are also my piano solos and vocal numbers. The original natural tone of the instrument is reproduced with absolutely perfect fidelity and with remarkable accuracy. Your records of my band compositions played by the Banda Española under my supervision are also splendid in every way. I have no hesitation in giving your company the exclusive right to record my compositions and shall confine my own record making exclusively to Columbia records.

With congratulations and best wishes, I remain,

Sincerely yours,

(Signed) EMILIO MURILLO.

EDISON-BELL PROPERTY SOLD

At Auction on Sept. 1 to Satisfy Judgment of Foreclosure and Sale—Does Not Affect Edison Interests in United States.

The sale in New York, September 1, at public auction, of the mortgaged property and all rights and franchises covered by a judgment of foreclosure and sale obtained by the Guaranty Trust Co., of that city, against the Edison-Bell Consolidated Phonograph Co., London, Eng., in no wise affects the National Phonograph Co., Orange, N. J., or any of the Edison interests in this country.

The property consisted of 5 per cent. debentures, having a par value of £27,260; 20 per cent. cumulative preference shares, having a par value of £4,322; ordinary shares with a par value of £1,261, and five deferred dividend warrants, each having a par value of £681 10s.

The Guaranty Trust Co. were the plaintiffs in the action, which was brought to satisfy a lien against the company for \$443,606, with interest at 6 per cent. from June 27, 1910, together with costs and allowances of \$350.

Included in the sale was the right, title and interest of the Edison United Phonograph Co. in the German company in Cologne, Germany, and to the proceeds of the sale of phonographs stored in the buds for the next gathering.

city of New York; also 2,500 shares of the capital stock of the Edison United Phonograph Co., of the par value of \$250,000, and 45,000 shares of the International Graphophone Co., of the par value of \$4,500,000.

When C. M. Wilson, general manager of the National Phonograph Co., was asked in reference to the foregoing, he said: "We are not interested or concerned in the slightest. All I know about it is what I saw in the newspapers."

JAPANESE BUSINESS PRECEPTS.

Luck hovers around the house of smiles. There is no mercantile success without fine diplomacy.

The hard business machine works quicker when greased with the oil of humane and kindly consideration.

The best way to conduct a business is to follow the example of the traveler who, with a heavy burden upon his shoulders on a long journey, neither hurries nor stops, but slowly moves forward.

Sacrifice little losses to enjoy great gains.

A good speech is a short one—so is a letter.

When asked for the chisel, give the hammer also. Of all enemies, your own negligence is the very worst.

Wealth and happiness are the productions of effort.

To get a large return from men, overlook small faults in them.

One's business ability can be measured by one's borrowing capacity.

No risk, no prize; he who dare not go to the tiger's den cannot get a cub.

The sample, the advertisement and the sign over the store should tell the truth perfectly.

Make your rules and regulations simple and let your system stay unchanged, for it will inspire confidence.

When men borrow money they smile like Buddha; when men return money their attitude is plainly evil.

First, choose the right time, next the right place, and then unite your forces in harmonious operation.

Gather profit in business as if you were cropping the leaves from the tea plant, leaving the young buds for the next gathering.

THE TRADE IN ST. LOUIS.

Business During August Very Good for Season of Year—Some Interesting Personal Items—Jobbers and Dealers Optimistic—Cabinet Machines Have the Call—News Summary.

(Special to The Talking Machine World.)

St. Louis, Mo., August 30, 1910.

Trade for the last month has been very fair for this season of the year, and the dealers seem to be well pleased with the results for that period.

C. L. Byars, assistant manager of the Columbia Phonograph Co., accompanied by his wife, returned recently from a two weeks' trip to Chicago and a trip on the Great Lakes.

W. C. Fuhri, district manager of the Columbia Phonograph Co., was a visitor here recently on his way to Chicago from Kansas City.

H. O. Hutton has accepted a position as salesman in the retail department of the Columbia Phonograph Co.

The following Columbia dealers were recent visitors here: W. W. Fisher, Murphysboro, Ill.; C. N. Lenhart, Mattoon, Ill.; M. F. Havlin, East St. Louis, Ill.; J. H. Lynch, Edwardsville, Ill.; George R. Long, Belleville, Ill.

The talking machine department of the Aeolian Co. reports that both the wholesale and retail business for the month of August was exceptionally fine. The demand for Victrolas and grand opera records has been exceptionally great for this season of the year.

All the talking machine staff of the Aeolian Co. have returned from their vacations and say that they are prepared to make the fall months "record-breakers."

L. A. Cummins, traveler for the talking machine department of the Aeolian Co., reports that the dealers throughout Missouri and Illinois are enthusiastic over the outlook for the coming fall.

Visiting dealers at Aeolian Co. during the past month were Mr. Peacock, of the Tiptonville Hardware and Furniture Co., Tiptonville, Tenn.; J. T. Welling, Germantown, Ill.; A. F. Davis

Farmington, Mo.; L. E. Wittenfield, Collinsville, Ill.; J. A. Kieselhorst, Alton, Ill.

F. Coleman, proprietor of the Wellston Talking Machine Co., one of St. Louis' most progressive talking machine dealers, reports that he has experienced the best August business in the history of the firm.

The Silverstone Talking Machine Co. report a good business on Amberola machines. Miss Elizabeth Vandeventer returned on August 20 from a three weeks' vacation, which was spent at the Eastern resorts.

D. K. Myers, the Zonophone jobber, reports his trade fair for the last month with good indications of an improvement from now on.

The Thiebes Piano Co. report their talking machine business to be fair with an excellent trade on records.

The talking machine department of the J. H. Buettner Furniture and Carpet Co. report a fair business with a good trade in records.

The Koerber-Brenner Music Co. report having had an active August, and look for a good fall business. H. G. Koerber, president of this concern, returned September 3 from a month's sojourn at the Wisconsin lake resorts.

STICK TO FAMILIAR BUSINESS.

Rarely Good Judgment to Change on Chance of Quick Advancement—Lack of Success Due to the Man, Not the Job.

Rarely is it good judgment for a man to change his business. It has been done successfully, but occasionally a lottery ticket wins, and then we forget the millions of dollars spent by the poor people that there might be that occasional winner.

We have yet to know the man who has been unsuccessful in one line of business to change into another line and succeed, although we have known many who failed utterly at first to win success later in the same business, profiting by that experience which constitutes life's lessons.

When a man doesn't succeed it is rarely due to

conditions; many men would have won out under the same and worse conditions. It is always up to the man. He can't be blamed. He has done his best, and "angels can do no more"; but it is time and labor lost to keep shifting one's business, as the fault that caused failure in the first business is with him in the second, and also a lack of knowledge that adds to the chances against him.

When a man has served several years in a business he must have attained some little knowledge of it, else his case is hopeless. That knowledge is capital, and for a man to change into another line is to throw away the capital he has accumulated.

We often hear men say: "I'm going to get out of the furniture business; there isn't any money in it." Admitting there are less returns than many other lines produce for the same expenditure of work, judgment and gray matter, yet it is unwise to destroy the accumulated capital and commence anew.

It is a good rule to hold that the man who is a successful furniture man can change his business with fairly good prospects of succeeding, but the man who hasn't accumulated capital in his business will be pursued by the same "hard luck" in any line.

One man said: "In spite of your assertions to the contrary, there is such a thing as 'hard luck.' I sold a factory to a standstill, and when the factory owed me two thousand dollars it failed. Don't you call that hard luck?" It wasn't hard luck; it was foolish. Rarely does a bolt of lightning come from a clear sky, and there should be some admonitions of danger before the blow, and had the man heeded the danger signals he would have "stepped from under," at least partially, before the crash. Neither would a wise man allow a concern to owe him such a considerable sum of money except it were strong as the Bank of England. In like manner, whatever the hard luck, we are mostly to blame for it ourselves, through lack of judgment or ability, or both.

If you don't put in a good word for some people they feel put out.

Columbia Phonograph Co., Genl., Tribune Building, New York.

GEO. W. LYLE'S COAST TRIP.

General Manager of Columbia Phonograph Co. on Four Weeks' Road Trip—Predicts Excellent Fall Business—Based Opinion on Reliable Reports—H. A. Yerkes Speaks of Great Increase in Columbia Co. Business.

George W. Lyle, general manager of the Columbia Phonograph Co., General, started Thursday, August 18, for his trip to the Coast. He will be away from New York four weeks. Before going, in a chat about business, he said:

"I have no reason to change my views about the excellent business we shall have this fall. The advices we have been receiving from our jobbers, dealers and managers bear this out, and I feel confident my trip to the Coast will also confirm these reports."

Following and in support of General Manager Lyle's optimistic opinion, H. A. Yerkes, in charge of the company's wholesale department, said: "I have been in consultation with our managers in New Orleans, Chicago, St. Louis, Cincinnati, Atlanta, Philadelphia, Providence, Detroit and Boston, and, judging from what they say, the sales of the Columbia Co. will make a new high record. As a matter of fact our business during the past year has gained, not 50, but 300 per cent. with all our products. Our Grafonola lines are the great hits with the trade, and this is especially true with the Mignon Grafonola. This covers not orders booked and the goods still awaiting delivery, but instruments actually sold. The factory has caught up pretty well with the demand, and our shipments are now going out on time, or with little delay."

MASTER'S REPORT CONFIRMED.

American Graphophone Co. Awarded Heavy Damages Against the Leeds & Catlin Co.

Judge Lacombe, Circuit Court of the United States, New York City, has confirmed the report of John A. Shields, special master, appointed to make usual accounting of profits and damages following the final decree against the Leeds & Catlin Co., bankrupts, New York, in the suit of the American Graphophone Co. The case involved the infringement of the Jones patent, controlling the present method of making disc records. The amount awarded by the master was \$81,250.85. On July 27 a motion was argued to confirm the report, the defense taking exceptions and leave was given them to file briefs until August 3. This supplemental effort proved unavailing, and Judge Lacombe took final action.

RECORDING STAFF ENJOY OUTING.

During the week of Aug. 8 the entire recording department staff of the National Phonograph Co., with the exception of one or two left in the studio to attend to urgent matters, took a well-earned rest. Because of the volume of work this summer it had been impracticable to follow the usual custom of allotting two weeks' vacations during the summer months, and as the staff was beginning to show the effects of the hard grind Manager

Miller decided to suspend all work for a week and get his force in good physical trim for the strenuous work of the fall and winter months.

GEO. METZGER AS A YACHTSMAN.

Aug. 15 George P. Metzger, manager of the Columbia Phonograph Co.'s advertising department, returned to business after two weeks of delightful cruising in his boat in Long Island Sound, with Block Island as his home harbor. Mr. Metzger's trim craft is not called *Columbia*, nor does it bear

the inseparable double music notes on the stern. Considering the effective use the clever publicity manager has made of the insignia it would not have been amiss if they had appeared on the mast-head flag.

TO HANDLE TALKERS EXCLUSIVELY.

Fall Trade as Far as Jobbers Are Concerned Now Under Way—Orders Plentiful—General Situation Looks Good After Summer Quiet—Pleased at Choice of Milwaukee as Convention City by Jobbers—Victor Co. Take Over B. & H. Fibre Needle—Mr. Hall's Statement—Wiswell Chairman of Press Committee—Talking Machine Co News—Interesting Personalities—Columbia Co. Brieflets—Recent Visitors—Summary of the Trade News of the Month from the Western Metropolis.

(Special to The Talking Machine World.)

Chicago, Ill., Sept. 10, 1910.

The fall trade, so far as the jobbers are concerned, may really be considered under way. September has opened up in a manner that is highly encouraging to the local jobbers and similar reports come from those in other western cities.

Last month, while quiet, yet made a rather stronger showing than July. Possibly the reason for this was that most of the salesmen of the Chicago jobbing houses took their vacations during July but were actively in the field during August. It was hard, uphill work, however, most of the month, as is usually the case in August, but the finish was strong, and the first ten days of September have shown a very material improvement all along the line. Orders are coming in from practically all sections covered by Chicago jobbers in good number and are beginning to show a stocking up tendency. August is generally reported as showing an improvement over the corresponding month of last year.

Generally, too, expectations of any dropping off of business because of crop shortage this fall have disappeared. Take it "by and large" the situation is all right in the territory worked by the Chicago jobbers. Dealers are generally looking forward to a good trade and jobbers believe that the balance of the year will more than maintain the increase over 1909 registered during the first eight months of the year.

Locally retail trade is also beginning to pick up to a considerable degree. Vacationers are rapidly returning and are getting settled to their usual avocations. The past fortnight has witnessed a steady improvement in trade and the fall business should be in pretty fair swing by the end of the month.

The air is full of rumors of new products to come on the market, the formation of new companies and new departures on the part of existing concerns. If half the talk is true there will be stirring times in the trade ere many months.

Pleased at Choice of Milwaukee.

The announcement that the vote taken by mail of the members of the National Talking Machine Jobbers' Association has resulted in the selection by a large majority of Milwaukee as the place for the next convention of the association to be held in July of next year, has caused no especial surprise out here. The convention was due the West, and barring Chicago, which was not in the running this time, it is conceded that a better place could hardly have been selected. Lawrence McGreal has been selected as chairman of the committee on arrangements for the convention and while he has able colleagues, the bulk of the work will naturally fall to the genial and energetic Milwaukeean. As he is the only Edison or Victor jobber in the city his work is certainly cut out for him but that he will shoulder the responsibility gladly and discharge it ably everybody knows.

Victor Co. Absorbs Fibre Needle.

The big news of the month, so far as Chicago is concerned, is found in the announcement that the Victor Talking Machine Co., of Camden, N. J., have acquired the fibre needle business of the B. & H. Fibre Mfg. Co., of this city. While no details are given out for publication at this end,

the transaction, which was completed early this week, is, it is understood, a very large one and may be taken as a manifestation of the recognition by the Victor Co. of the fibre needle as an important factor in the trade by the Victor Co., which will, it is understood, push the sale of the Victor Fibre needles as they will now be known, very vigorously.

The progress of the "B. & H." fibre needle in the three years since it was placed on the market has been remarkable. It has met and conquered all sorts of prejudice and has overcome obstacles which would long since have discouraged any man of a less determined nature than Fred. D. Hall, the inventor of the fibre needle and the President of the B. & H. Fibre Mfg. Co.

Mr. Hall was simply a talking machine owner when he invented the fibre needle. True, he was a successful—a very successful—real estate man, and a few other things, but from the viewpoint of the trade he was simply a talking machine owner and an unusually large buyer of high class records. He found out by experience that records would wear out in time and he conceived the idea that if he could discover a material of which needles could be made that would not wear the records and would yet produce a tone sufficient in volume for the home and of the right quality, it would be a mighty fine thing for him. That's as far as the idea went. He had no thought of creating a business. He experimented with all sorts of woods and substances, and finally hit upon bamboo as the ideal material, conquering the tendency of the fibre to bend by making the needle triangular in shape, so as to give the necessary support to the point.

The importunities of friends who visited his home and heard the needle in action finally induced him to put the needle on the market. Then came a period of further experimentation to make it commercial. Various methods of chemical treatment were experimented with to counteract the oil in the fibre, impart the quality of stiffness and finally to dry the fibre thoroughly. These problems were all solved in time and about three years ago, comprehensive patents were secured and the devising of special machinery for the production of the needles commenced.

The B. & H. Fibre Mfg. Co. was formed with ample capital and in a short time fibre needles were placed on the market. Progress was slow at first. With the exception of one or two foresighted concerns few dealers were at first disposed to take the time to educate their customers in the use of the fibre needles. There was quite a long period when the outlook was rather discouraging. But Mr. Hall and his associates never faltered but steadily plugged away, firm in the belief that they would ultimately win out. Then the trade began to gradually wake up. The immense sales of the fibre needle in Chicago and the faith shown in it by one of the largest wholesale and retail houses in the country, together with the vigorous publicity in The Talking Machine World, aroused the trade to the opportunities before them.

Constant improvement in product arising from the discovery of the species of bamboo particularly adapted for the purpose, more effective process of treatment, and constant advances made in the matter of machinery has enabled the company to bring the needle to a degree of perfection hardly dreamed of when the product was first placed on the market.

The past year the growth of the demand has been something remarkable. Many dealers and jobbers who have hitherto not handled the needle or only in a half hearted way have taken hold of it vigorously and found it of especial value as a means of developing the best class of trade in their locality.

In speaking of the deal this week, Mr. Hall said:

"I am naturally gratified that one of the biggest corporations in the world has recognized the merits of the fibre needle and the possibilities before it. The deal, of course, places behind the fibre needle the tremendous and worldwide distributive and publicity forces of the Victor Co. It is indeed a matter of satisfaction to me that my faith in the fibre needle has been realized."

Incidentally Mr. Hall called attention to the fact that outside of announcements in one or two issues of several popular periodicals when they first started, the company have done no advertising except in their monthly announcements in The Talking Machine World, and he considers this paper responsible in large measure for the building up of their business.

Wiswell Made Chairman Press Committee.

L. C. Wiswell, manager of the Talking Machine department of Lyon & Healy, has just received notice of his appointment as chairman of the press committee of the National Association of Talking Machine Jobbers by President Whitset. The other members of the committee are A. A. Trostler, J. F. Schmelzer & Sons Arms Co., Kansas City, Mo.; R. Shaw, Western Talking Machine Co., Winnipeg, Man.; Herbert Royer, M. Steinert & Sons Co., Boston, Mass.; I. Davega, Jr., New York.

Talking Machine Co. Items.

Arthur D. Geissler, general manager of the Talking Machine Co., is expected home from California early next week. According to all reports he has had an excellent time. The first part of his sojourn was spent at Ross, Marin County, with his wife and family. Later there was a hunting expedition with Leon F. Douglass, a glorious night at the Bohemian Jinks, a splendid automobile trip down state with Fred Sherman of Sherman, Clay & Co., and Mr. Geissler has also visited many of the coast dealers and will no doubt return loaded to the guards with good suggestions for the prosecution of the fall campaign.

The business of the Talking Machine Co., showed a marked increase as compared with last year. Orders are coming in in excellent shape and the outlook is for a big fall business. Furthermore they are prepared for it with a big stock on hand and ordered.

The advertisement of the Talking Machine Co. elsewhere in this issue illustrates some of the methods they use in co-operating with the dealer in helping the latter create business.

An Improving Tendency.

One large dealer was commenting the other day on tendencies looking towards the bettering of the business. "You may think I am making a mountain out of a mole hill," said he, "but as a matter of fact the discontinuance of the use of talking machines with song slides in the moving picture shows around town has been a boon to the trade. The live singers who have been substituted are by no means an improvement over the talking machine artists, but they seldom found a machine in one of these theatres in good order; the records were kept going the rounds until they were almost indistinguishable and the result was anything but good publicity for the talking machine. Even in the smaller towns the use of the machines inside the theatres is becoming a thing of the past and it's a good thing for the trade."

A. V. Chandler in the East.

A. V. Chandler, Illinois traveler for the National Phonograph Co., is at the factory at Orange, attending the annual ante-fall campaign powwow of the Edison travelers.

The Fall Outlook.

L. C. Wiswell, of Lyon & Healy, is enthusiastic about the fall trade. "The States here in the central west, which are those covered principally by the Chicago jobbers, are on a whole in fine condition," said he. "Illinois has pretty near a bumper crop. The big coal strike which has

A Story of Reciprocation

Mr. Traveling Man: Good Morning, Mr. Retail Dealer, allow me to introduce our mutual friend, Mrs. Prospect.

Mr. Retail Dealer: Good Morning, I am pleased to meet you, Madam.

Mrs. Prospect: Thank you. Yes, I think I want an Early English Victrola and Mr. Traveling Man says that you have one on your sales floor, so we ran out to see it.

Mr. Retail Dealer: That's good, here it is, right here.

Mrs. Prospect: I can't understand for the life of me why Mr. Traveling Man would not sell me one of these Machines when they have so many of them right in their Chicago stock. I answered a letter direct from his house in which they offered to put one of them in my home on a few days trial, through you as his local dealer, so we just ran out to select one.

Mr. Retail Dealer: Well, you see, he figures that the interests of his Retail Dealers are his own interests. The more business his Retail Dealers do, the more wholesale business he does with them. Isn't that right, Mr. Traveling Man?

Mr. Traveling Man: Just right. That is our strongest argument to our retail dealers in soliciting their trade—that we **Wholesale Exclusively**. Our best efforts are in creating retail prospects for our dealers. Besides being positive that they will get all their Victor goods in factory condition, it is a great consolation to them to know that when we are out, it is working for them.

Mrs. Prospect: Yes, I see very readily now how that is true.

Mr. Retail Dealer: Besides being "true", it is very practical. Since I have been giving Mr. Traveling Man my entire Victor business, my retail sales have increased as a result of the schemes his house has invented to get the people of my community interested in my Victor stock and getting them in my store.

Mrs. Prospect: Well, you can send that Victrola up to my house, and I suppose you will both be pleased with your respective profits on the sale.

Mr. Retail Dealer: Yes, I am pleased, of course, to make my retail profit.

Mr. Traveling Man: And we are satisfied with our wholesale profit.

Mrs. Prospect: Then, it seems that we are all well pleased and satisfied. When do I get my Victrola?

Mr. Retail Dealer: This afternoon, and I thank you very much. Come in and select your records from time to time; you will always find a complete stock.

Mrs. Prospect: All right, I shall. Well, good day. (Exit Mrs. Prospect.)

Mr. Retail Dealer (to Mr. Traveling Man): When you first explained to me the advantages of doing business with an **Exclusive Wholesaler** I was more or less incredulous, but from now on my entire Victor business goes to

The Talking Machine Company
72-74 Wabash Avenue, : : Chicago, Ill.

been something of a detriment, is rapidly coming to a close, a number of the miners having returned to work. With the exception of one or two localities crops of all kinds are big right now and I'm looking for a fine big trade."

The Edison and Victor concerts were resumed in the beautified and enlarged Victor Hall last month. The beautiful new machine sales rooms were occupied at the same time and have been the subject of admiring comment by every one who has visited them.

Columbia Co. Items.

The Dictaphone Department of the Chicago office of the Columbia Phonograph Co., in charge of W. W. and E. A. Parsons, now occupies larger quarters on the main floor of the company building. In the new quarters space is devoted to a training school for Dictaphone operators and is equipped with practically all the different makes of typewriter. The Parsons have been doing yeoman work since they returned to the service and the number of Dictaphone users in Chicago has been largely increased.

George W. Lyle, general manager of the Columbia company, spent several days at the Chicago offices the middle of last month on his way to the coast. He is now on his return and District Manager Fuhri expects to meet him at Kansas City, next Thursday. From Kansas City Mr. Lyle goes to St. Louis and thence home.

District Manager Fuhri, by the way, believes in hobbies. His particular fad is chickens and he has been taking a portion of his vacation at his country home at Bryn Mawr, building chicken coops and perusing the poultry magazines. He says that the simple life agrees with him immensely and that he is prouder of a brood of forty-two blooded chickens, which he proudly exhibits to visitors, than he would be of a flock of race horses or a covey of the finest bird dogs in existence.

Manager C. F. Baer, of the Columbia Co.'s Chicago branch, is proud of the showing made by them in July, when they stood first in the service in point of wholesale and retail sales and in cash receipts. Strenuous efforts were made to keep up the record in August and the reports from headquarters are eagerly awaited.

Wisconsin and Upper Michigan for the Chicago office won the prize offered by Mr. Baer to the traveler selling the largest number of Grafonolas from June 9 to September 1. The contest was a close one, W. A. Everly, who covers Illinois and Iowa, falling below Zerkle's record by but two machines. In the retail department F. A.

Cook won the prize for the largest individual sales in August.

The Chicago office showed a good increase last month in both wholesale and retail as compared with the corresponding month of last year. H. A. Schaeffer, exclusive Columbia dealer at Burlington, Iowa, was a recent visitor.

A. D. Herriman, retail manager, went up in Wisconsin early and cleaned up the Muskalonge crop. He started Friday on the second half of his vacation, which will be spent in Michigan cornering the pike market. Herriman is very enthusiastic over the new Symphony records made by the Boston Opera Co. forces and says that they are having excellent sales on them.

Among the Visitors.

A merry automobile party struck town Monday. It consisted of Lawrence McGreal, of Milwaukee, Miss Gertrude Gannon, in charge of the McGreal retail, her father and George Ornstein, manager of the Victor travelers, who had been spending his vacation with his brother at Green Bay but joined the McGreal party at Milwaukee. Ornstein left immediately for the East, but the rest of the party took in the ball game at the Sox park before returning home.

Among the recent visiting dealers were Mr. Clayton of the Talking Machine Co., Salt Lake City, Utah; H. T. Kitson, Bloomington, Ind.; Mr. Pickens, of the John Hoyt Piano Co., Davenport, Iowa; T. Williams, Burlington, Iowa, and A. V. Lyle, Janesville, Wis.

James I. Lyons, the talking machine jobber of this city, has the sympathy of the trade in the death of his father. The deceased was eighty-four years of age. He was a veteran of the civil war.

Richard S. Prybil, general representative for the Zonophone Co., was called suddenly from the road early in the month on account of the death of his father. The senior Mr. Prybil was a large real estate owner and leaves a considerable estate. He is survived by three children, two sons and a daughter.

VACATION NOTES.

Asbury Park and Ocean Grove, N. J., have been favorite vacation resorts for National Phonograph Co. officials and departmental heads this season. Among those who have enjoyed the pleasures of the two beaches during the month of August are: Sales Manager F. K. Dolbeer and Assistant Advertising Manager L. W. McChesney, Credit Manager, E. H. Philips, and Traffic manager, J. T.

Rogers. Walter H. Miller, manager of the recording laboratory, and family occupied their cottage at Bradley Beach, N. J., as usual this summer. Mr. Miller was a daily commuter to New York during June, July and August.

THE SALTER RECORD CABINETS.

How the Product of the Well-Known Chicago House Has Leaped to Success in a Short Time—Increased Facilities to Handle Fall Trade—The New Line of Disc Cabinets—An Extensive Showing.

(Special to The Talking Machine World.)

Chicago, Sept. 10, 1910.

The Salter Mfg. Co., of this city, are one of the pioneer manufacturers of talking machine cabinets of the country. They have always kept pace with the development of the industry and the product, from year to year, has shown constant improvement both in design and interior arrangement. The new line of Salter cabinets brought out a couple of years ago showed such a radical departure from former types as to mark a distinct epoch in this department of the extensive cabinet business of the company. Last season, in fact, the Improved Salter cabinets had gained such a strong hold on the trade that the demand was far beyond the company's expectations, and although the factory worked overtime all during the winter and spring months it was impossible to fill orders promptly.

During the summer months, however, arrangements have been made to remedy this condition. Space formerly occupied by other departments has been devoted to the record cabinet business, additional machinery has been added and extra storage space provided, and capacity for the production of Salter record cabinets has been increased fully forty per cent. Although the demand for cabinets during the summer months has been excellent, the company have been able to accumulate a fair stock and with the increased capacity are ready at the beginning of the active fall season to assure their trade prompt service.

The new Salter disc cabinet which appeared almost simultaneously with the advent of the double face record, was a distinct innovation in that it provided a separate horizontal compartment for each record, allowing the record to lie flat on the shelf, thus, it is claimed, preventing the record from warping. Each shelf is lined with soft green felt, which prevents the scratching of the face or faces of the record, and also presents an exceptionally attractive appearance when the cabinet is open. Another advantage claimed for the single record, felt lined compartment is that it makes it totally unnecessary to carry even the most expensive records in envelopes. Since the new line has been placed on the market, it has been augmented by additional designs and all of the cabinets this season show many improvements in matters of detail which will no doubt be appreciated by the company's customers. Several of the leading styles of the line are shown in the company's advertisement elsewhere in this issue. Style 777 is made for either the Victrola XII or the Columbia Elite machine and dealers ordering should specify for which machine it is desired.

The line of cylinder cabinets made by the company is also an excellent one. The latest style cabinet is so arranged that the records may be placed on the shelves either in the original cartons or on the pegs in the old way if desired.

The Salter line is an extensive one, embracing a wide range of styles and prices, thus enabling the dealer to meet the tastes and pocketbooks of all classes of his trade.

DEATH OF MRS. S. B. DAVEGA.

The World regrets to hear of the death of Mrs. S. B. Davega, wife of S. B. Davega, president of the S. B. Davega Co., New York, which sad event occurred last month, in the thirty-ninth year of her age. The many friends of Mr. Davega have heard this news with sincere regret and extend their deep sympathy.

Lyon & Healy Offer Dealers A Perfect Cabinet for Disc Records

Every Dealer
Should
Have One

Made to Match
Your
Store Fixtures

The Result of Long Experience

The many years that we have been wholesaling and retailing talking machine records have made us particularly well informed as to the best methods of handling them. After an extensive period of study we have evolved The Lyon & Healy Dealers' Cabinet for disc records, which we believe will do more to eliminate dealers' record troubles than anything ever before offered. Designed to help the dealer, all complications have been left out. It works on a principle as simple as the alphabet, and automatically keeps your stock complete and in perfect order.

Description

The Lyon & Healy Dealers' Disc Record Cabinet is 38" high, 43" wide and 13" deep, holding 45 drawers, each drawer having a capacity of twelve 10 and 12" records. The drawers are numbered consecutively from 1 to 45, these numbers corresponding with records listed in the alphabetically arranged index book which is furnished with each cabinet. A sufficient number of special record envelopes are also provided, which keep accurate account of stock on hand and orders for stock to take the place of that sold. Two large drawers in base of cabinet make excellent receptacles for needle supplies, sound boxes and other small equipment.

Convenient

The Lyon & Healy Dealers' Disc Record Cabinet may be placed in any convenient location, back of or on top of a counter—in fact, wherever it can be reached to best advantage. It takes up so little room that it will not be in the way anywhere. When a customer calls for a certain record, and it is in stock, it is located quickly by referring to index showing drawer number. If record wanted is one not kept in stock, the index will show the fact immediately without looking in the case. If record had formerly been in stock and sold, the empty special envelope in drawer shows when new one was ordered, and your customer may be informed exactly when he may call for it.

Economical

Every dealer in disc records loses money every year through warping, scratching and otherwise spoiling of records. With a Lyon & Healy Dealers' Disc Record Cabinet in your store, all such waste is eliminated. To find a record which you always have means of knowing if in stock or not, there are only a dozen records to go through, and those are kept in orderly fashion. You can readily see how much more carefully you or your help will handle them than you would were it necessary to go through a disorderly mass of undesired records, searching for one which may not be in stock at all. Rough handling ruins records and means a loss to you.

Labor Saving

The Lyon & Healy Dealers' Disc Record Cabinet does away with every unnecessary movement in locating any record desired. You can tell your customer in two seconds whether or not you have a certain record, and if you have, secure it for him in less than half a minute. The Cabinet is easily cleaned, and your records are kept in perfect condition. No warping, scratching, cracking or breaking.

An Inexpensive Necessity—Price \$20.00 Net.

The Lyon & Healy Dealers' Cabinet was planned to aid dealers, and we want every dealer who handles disc records to have one. We have brought them within reach of all when we price them at \$20, complete, with special index and record envelopes. We have made these cabinets of the best material obtainable. We finish them as ordered by dealer, and every cabinet carries our quality guaranty.

TWO MORE SPECIAL RECORD "HITS"

Issued by National Phonograph Co. on September 1.

About the first of September the National Co. began to ship to their jobbers Amberol records Nos. 548, "Any Little Girl That's a Nice Little Girl," etc., and 550, "Lucy Anna Lou," as special records "hits." These records appear in the November supplement, but following the recently adopted plan of the company the sale date has been advanced in order that the trade may take early advantage of the popularity of the songs. Instead of shipping to western jobbers first, as has previously been the practice of the company, in this instance shipment will be made to all jobbers in any one territory at the same time, the eastern, however, being served first, and after them, in the order named, central, southern and western jobbers. The reversal of the order is occasioned by the fact that the songs are popular now in the East, and shipments to western and southern points can very well be delayed in plenty of time to catch the drift of popularity in those directions. These records are to go on sale as soon as received. These two songs are the real "hits" of the summer season, and are now at the very height of their popularity. Special literature consisting of an attractive window hanger and a neat four-page folder will be shipped with the records.

This scheme of handling popular vocal and instrumental numbers by the National Phonograph Co. has met with universal approbation from the trade.

WIN BOWLING CHAMPIONSHIP.

(Special to The Talking Machine World.)

San Francisco, Cal, Sept. 3, 1910.

Sherman, Clay & Co., bowling team won the championship of the Musical League by defeating the Wiley B. Allen Club twice in succession. As these two series were to decide the championship the S. C. & Co. boys were determined to bring

home another championship, as they won the baseball honors also this year.

The score was in the first series of five games, of Duck Pins—S. C. & Co., 1954; W. B. A. Co., 1920.

The second series of five games of Duck Pins—S. C. & Co., 2061; W. B. A. Co., 2043.

The following players took part in the contest:

S. C. & Co.—Rothlin, R. Skinner, Mack, Beck.

W. B. A. Co.—Black, Houseman, Miller, Lindsay.

NEW EDISON REPRODUCER.

Model "O" a Combination Reproducer for Both Two and Four Minute Records—Replaces Models "C" and "H"—Some of the Special Features.

The Model "O" Edison Reproducer, recently put on the market by the National Phonograph Co., has met with instant success, and is considered by experts to be one of the most perfect reproducers on the market. The new reproducer is designed for use with the Triumph and Idelia machines, and takes the place of the Model "C" and "H" reproducers formerly supplied with those machines, being furnished with those types at no increased cost.

The new Model "O" is a combination reproducer and was evolved from the Model "M" designed for the Amberola, and produces a full, rich and natural tone, entirely eliminating the metallic tone often found in other reproducers. The new model will be supplied separately for Triumph and Idelia equipment on machines now playing both two and four minute records for \$10.00 in the United States and \$13.00 in Canada, while an allowance of \$4.00 is made on the exchange of the Model "C" and "H" reproducers.

The Model "O" will be supplied when so ordered with Triumph and Idelia attachments in place of the Model "C" reproducer now being supplied, the prices for the attachment, complete with the Model "O" reproducer being \$15.50 in the United States and \$20.00 in Canada. These same prices prevail on the exchange with an allowance of \$2.00 for the return of the Model "C" reproducer.

The diaphragm of the new reproducer is of larger diameter than that of the standard reproducers and consequently the sound-box is larger, making it necessary for the purchasers of this new reproducer to also have the new reproducer arm with an elbow connection in place of the former straight connection. The new reproducer arm is included in the price of the reproducer. Slight changes are also necessary when using the new reproducer with the Cygnet horn.

With the Model "O" reproducer it is only necessary to turn an index screw to throw either the two or four minute reproducer into position, the feeding being changed as heretofore.

VISITORS FROM THE SOUTH.

Among the recent visitors at the executive offices of the Columbia Phonograph Co., General, New York, was C. A. Ragan, manager of the New Orleans store, who was here for a week, when he started for the Crescent City. Westervelt Terhune, manager of the Atlanta, Ga., establishment, was also in New York at the same time. Mr. Terhune is considered one of the "live wires" of the company's staff.

VELVA-TONA

A New Word with Two Meanings
To you, Mr. Dealer, it means PROFITS
To the public, SATISFACTION
THE VELVA-TONA

is a device which is attached to the Victor Sound Box, eliminating the *scratch* and modifying the tone to a beautiful soft *velvet* quality. And, Mr. Dealer, remember it is not a *muffler*, but a *modifier*, a scientific principle properly applied, reducing the tone vibrations at the *point* of contact, thereby saving the softer tones for reproduction.

Order to-day. Now! It is a *Wonder*. Sells at sight.

The big selling *feature* of this modifier is that it can be modified from the most *delicate* to the very *loudest* tone and is *adjustable* while the machine is in motion.

Arranged on artistic display cards of one dozen. Price, 75 cents each; \$4.50 per dozen wholesale; 5% less in lots of 1/2 gross; 10% less in lots of 1 gross.

SUCCESS OF THE ECHO ALBUM.

Has Solved the Problem of Keeping Collections of Disc Records in the Best Possible Manner—Heavy Demand for the Albums.

One of the bothersome problems confronting the owners of disc machines and records has been that of keeping the records in order at all times and out of the way. Various means have been adopted in an effort to solve the problem, but it was not until the "Echo" album was put on the market that a really satisfactory solution was at hand.

Up-to-date, progressive dealers who have adopted the "Echo" album declare that it is a "lifesaver" to the record business. This does not mean that it keeps the records hidden away in bags where the owner does not see them. On the contrary, by this method, he is enabled to put his hand on any particular record that he wants at any particular time. His record collection looms up to him as an asset of real worth and consequence. It partakes of the library idea, and can be likened unto a classified collection of musical numbers toward which he is adding records in the endeavor to standardize his collection.

The "Echo" album fulfills this very purpose, and the idea is illustrated in the advertisement appearing on page 31. The Echo album is strongly and neatly made of brown linen cloth and heavy paper-board. There is practically no wear to them, and they will give complete satisfaction for a lifetime.

The 12-inch size Echo album will accommodate both 10 and 12-inch disc records, and for uniformity's sake it is better to use the 12-inch exclusively if both sizes of records are in the collection. These new style Echo albums fit both double-face as well as single-face records, and the label can be read from both sides of the perforated pocket. The new Echo albums also are collapsible, when not filled, and therefore occupy much less space in shipping and packing.

A sample 12-inch, new style record album will be sent to any dealer on receipt of \$1.00 to cover trade price and mailing charges.

Enough orders have been received from John Wanamaker and other large talking machine distributors to keep the factory busy for the next sixty days. Jobbers will be wise to place their orders early, to insure delivery before the holidays.

OUR FOREIGN CUSTOMERS.

Amount and Value of Talking Machines Shipped Abroad from the Port of New York.

(Special to The Talking Machine World.)

Washington, D. C., Sept. 10, 1910.

Manufacturers and dealers in talking machines will doubtless be interested in the figures showing the exports of talking machines for the past five weeks from the port of New York:

AUGUST 22.

Berlin—20 pkgs., \$446; Buenos Ayres, 134 pkgs., \$7,380; 30 pkgs., \$2,544; Carignano, 3 pkgs., \$136; Colon, 13 pkgs., \$305; 25 pkgs., \$305; Demerara, 6 pkgs., \$202; Havana, 16 pkgs., \$641; Havre, 2 pkgs., \$987; London, 1 pkg., \$100; Porto Barrios, 4 pkgs., \$580; Rio de Janeiro, 3 pkgs., \$100; 123 pkgs., \$12,372; Shanghai, 1 pkg., \$100; St. Johns, 7 pkgs., \$144; Sydney, 1,193 pkgs., \$13,799; Tampico, 4 pkgs., \$174; 24 pkgs., \$1,042; Valparaiso, 5 pkgs., \$313; 7 pkgs., \$202; Vera Cruz, 194 pkgs., \$4,152; Yokohama, 8 pkgs., \$527.

AUGUST 29.

Algoa Bay, 22 pkgs., \$808; Bombay, 5 pkgs., \$128; Cartagena, 5 pkgs., \$312; 10 pkgs., \$862; Colon, 1 pkg., \$173; Guayaquil, 2 pkgs., \$237; Havana, 18 pkgs., \$1,060; Havre, 10 pkgs., \$215; Kingston, 10 pkgs., \$352; La Guayra, 12 pkgs., \$141; Liverpool, 3 pkgs., \$260; London, 3 pkgs., \$192; 4 pkgs., \$337; 112 pkgs., \$2,796; Manila, 55 pkgs., \$4,667; Mazatlan, 7 pkgs., \$240; Para, 5 pkgs., \$548; Rio de Janeiro, 24 pkgs., \$2,009; Sydney, 10 pkgs., \$923; Valparaiso, 15 pkgs., \$900; Vera Cruz, 29 pkgs., \$2,703; Yokohama, 5 pkgs., \$281.

SEPTEMBER 7.

Antofogasta—12 pkgs., \$1,160; Caibarien, 3 pkgs., \$153; Callao, 17 pkgs., \$1,194; Cartagena, 55 pkgs., \$4,167; Cienfuegos, 22 pkgs., \$220; Colon, 11 pkgs., \$559; Havana, 39 pkgs., \$1,559; London, 9 pkgs., \$722; 4 pkgs., \$305; 201 pkgs., \$4,698; Montevideo, 29 pkgs., \$2,722; Para, 41 pkgs., \$2,730; 15 pkgs., \$1,040; Santiago, 2 pkgs., \$102; Vera Cruz, 41 pkgs., \$869; Vienna, 56 pkgs., \$1,656.

SEPTEMBER 9.

Berlin—65 pkgs., \$1,126; Buenos Ayres, 1 pkg., \$3,900; Colon, 17 pkgs., \$913; Demerara, 3 pkgs., \$160; London, 123 pkgs., \$4,384; 11 pkgs., \$990; Manila, 1 pkg., \$124; Melbourne, 1,690 pkgs., \$28,870; Milan, 12 pkgs., \$1,002; Rio de Janeiro 7 pkgs., \$1,057; 20 pkgs., \$1,145; St. Kitts, 9 pkgs., \$207; Valparaiso, 11 pkgs., \$619; Vienna, 22 pkgs., \$595.

COLUMBIA AT HOUSEHOLD SHOW.

Full Line of Machines Shown to Advantage in Double Space and Excellent Results Obtained.

One of the features of the Household Show in Madison Square Garden, August 20-27, was the handsome exhibit made by the Columbia Phonograph Co., occupying two full spaces in one of the best locations in the Garden. The full line of machines was shown, including all styles of Grafonolas, and the Columbia Co. space was crowded continually during the progress of the show. The Grafonola Mignon at \$150, and the library style were especially featured and attracted a wonderful amount of attention. Advantage was taken of the occasion to distribute some convincing Columbia literature, prepared for the purpose by Advertising Manager Metzger, and on the whole the Columbia exhibit proved one of the most successful in the show.

A NEW S. B. DAVEGA CO. SPECIALTY.

The Simplex Needle Box Possesses Many Valuable Features That Should Interest Owners of Disc Machines—Does Away with Needle Handling Troubles.

One of the successful specialties of the S. B. Davega Co., the well-known and progressive New York distributors, is their new "Simplex Needle Box," which may be readily attached to any disc machine and which the box is held by an enamelled bracket in a convenient place on the back of the machine and presents a very neat appearance. The oak and mahogany finish boxes to match the machines, together with the ease with which the old needles are disposed of, tend to make the boxes an excellent side line for the dealer.

Altogether the "Simplex Needle Box" bids fair to equal in popularity the famous "Magnetic Needles," "Victrola Protectors" and other rapid-selling and profitable specialties created by the S. B. Davega Co., and all dealers would do well to take advantage without delay of the sample proposition as offered in their announcement in this issue.

CATALOG OF COLOMBIAN RECORDS.

A special Colombian catalog will be issued by the export department of the Columbia Phonograph Co., General, in about two weeks. It will contain the records of Murillo, which have scored a great success; Uribe Bros., Cabrei, Ochroa and other well known artists from Colombia, S. A.

When Edward N. Burns, manager of the Columbia Co.'s export department, returned to New York from his vacation after Labor Day, Edmond F. Sause, his very capable assistant, left on September 10 for a period of rest, recuperation and pleasure.

INSTALL SOUND-PROOF BOOTHS.

The Phillips & Crew Co., Savannah, Ga., have installed a number of sound-proof booths in their store for the demonstration of Victor machines. The booths are very attractive and are provided with double plate glass windows.

The jobber on the job

That's us.

We give you the kind of service a jobber ought to give his customers—the kind you should get from your jobber.

Hurry orders have no terrors for us. Every order we get is a rush order on our part—we ship all goods the same day the order reaches us.

It takes a large and complete stock to do that, but we are always equal to the task. Whatever's newest and best in accessories such as record cabinets, horns, needles, fiber cases and other specialties, you're sure to find here in addition to a full line of the Victor, Victrola, Victor Records, and repair parts.

This quick service doesn't cost you any more than you pay ordinarily, but it is worth a good deal to you. It gives you a decided advantage over neighboring dealers who are slower in filling orders and must necessarily keep customers waiting. It puts you in a better light with your customers and helps to mark you as the leading dealer in your locality.

Give us your next rush order and let us prove our case. See how quickly you get your goods, and remember that this quick service is given not once or twice, but always.

Why not write to-day for a copy of our latest catalog? We'll also send you our booklet, "The Cabinet That Matches."

EDISON PRODUCTS EXHIBITED.

National Phonograph Co.'s Exclusive Display of Phonographs and Accessories at the Boston Mechanics' Exposition—A Splendid and Interesting Showing.

(Special to The Talking Machine World.)

Boston, Mass., Sept. 12, 1910.

What is intended to be the most elaborate and comprehensive display of talking machine products ever attempted is being prepared by the National Phonograph Co., Orange, N. J., for the Boston Mechanics' Exposition, to be held in Mechanics' building, Boston, Mass., October 3 to 29, inclusive. It will not only eclipse any previous display of talking machines at an industrial exhibit, but it will surpass in completeness, size and attractiveness all other exhibits at the exposition. The exclusive privilege to exhibit Edison phonographs, as well as other laboratory products, was secured by the National Co. early in the present year, and as most of the details have been perfected it is possible at this time to present a fairly accurate idea of the plan of the display.

The Edison exhibit will be shown in Grand Hall, the largest of the eight halls comprised in the Mechanics' building, which, by the way, is the

largest permanent exposition building in America. An idea of its size will be gained from the statement that the seating capacity of Grand Hall alone is 10,000. Facing the main entrance of this hall is a huge stage 80 feet long by 40 deep. This stage, the most desirable and eagerly sought space in the exposition, the National Co. was fortunate in securing. It dominates the entire hall and can be seen from any one of the 2,500 seats in the gallery.

The entire stage will be inclosed by means of an ornamental front with plate glass windows and ends, in the manner illustrated by the accompanying cut, which was made from a pen and ink sketch and gives but a faint idea of the attractiveness of the scheme. The windows, which will be raised about two feet from the floor, will be used to display Edison phonographs exclusively. The inclosed floor space on the right will be utilized for the display of Edison business phonographs, while in the corresponding space on the left will be shown the new Edison storage and primary batteries, Edison projecting kinetoscopes and accessories and Bates automatic numbering machines. Thus from any angle of the mammoth hall an unobstructed view of a complete line of Edison laboratory products can be had.

Over the main stairway to the stage an oil painting of Thomas A. Edison, 25 inches by 39 inches,

the work of a noted Boston artist, will meet the gaze of visitors to the exposition. This entrance will be used for admission only, the two side entrances being reserved for purposes of exit. Above this main entrance and cleverly concealed in the decorative scheme will be placed a fireproof operator's booth, from which Edison motion pictures will be projected upon a screen at the rear of the stage. The stage, which will accommodate 600 persons, will be transformed into a cosy theater for this purpose, and seats will be provided for the accommodation of the National Co.'s guests. Light will be obtained from an enormous incandescent cluster suspended from the ceiling, and a special ventilation apparatus will be placed in the dome of the stage. Motion picture shows will be given at regular intervals daily and will no doubt help to make the Edison exhibit the most popular and frequented point of interest in the exposition.

A platform 28 inches wide and 3 feet high will run around the wall spaces of the stage and back of the plate glass windows and front, upon which every type of Edison phonographs from the Amberola to the Gem, phonograph accessories and records will be displayed and demonstrated. At the rear of the stage are three large rooms which have been turned over to the three Edison jobbers in Boston, namely—the Iver-Johnson Sporting Goods Co., the Boston Cycle & Sundry Co. and the Eastern Talking Machine Co.—who will each have an active sales force on hand to convince visitors of the superiority of the Edison line.

It will be seen from this description that the National Co. propose to conduct their exhibit on a scale of magnitude and lavishness unprecedented in the history of the talking machine industry. A large sum of money is being expended upon both the exterior and interior equipment and decoration of the stage which, when completed, promises to be the envy of the other exhibitors at the exposition.

The far-reaching effect of this splendid appeal to publicity on the part of the National Co. will be appreciated when it is asserted that for the past five years the daily attendance at this annual Mechanics' Exposition has averaged twenty-five thousand, or an approximate attendance during the entire period of more than half a million. Within a radius of fifty miles from Boston is a population of over four million of people, and as all railroad lines running into Boston have offered special low excursion rates for the exposition the attendance this year is expected to break all previous records.

The National Co. have sent to all their New England dealers a supply of handsomely engraved invitations for the exposition, and the Boston jobbers have been supplied with liberal quantities for distribution among present and prospective customers. These invitations entitle the holder to free admission to the exposition. The exhibit will be under the immediate supervision of their energetic sales manager, F. K. Dolbeer, who will have a competent corps of assistants working with him. The other laboratory products will, of course, be demonstrated by representatives of their respective departments. The United States Marine Band, which has contributed many charming numbers to the Edison catalog, will furnish music from the balcony of Grand Hall for the first two weeks, and Canada's famous Seventy-fifth Regiment Band of Lunenburg, Nova Scotia, will be on hand for the last two weeks of the exposition.

TRADE AND "MUSIC MASTER" HORNS.

Orders for the "Music Master" horns, announced recently by the National Phonograph Co., Orange, N. J., as being ready for distribution, have been reaching the factory in such quantities as to leave no room for doubt that they will be a popular Edison accessory. They are being supplied both as extras and as parts of complete outfits, in four styles, oak, mahogany, spruce and inlaid pearl. There is no question but that present and future owners of Edison phonographs will take kindly to the horns, for in addition to being highly ornamental in appearance they are a distinct improvement from the standpoint of reproduction. Built of wood on sounding-board principles, they impart an agreeable mellowness of tone to the reproduction.

"In Edison Goods we have what you want when you want it"

Doesn't this attractive record arrangement appeal to you?

Think of what it will save in time (money) during a year; probably twice as much as its cost.

Write us for our liberal introductory offer; a postal will do.

BOSTON CYCLE & SUNDRY CO.

J. M. LINSKOTT, Manager

"Exclusive Edison Jobbers"

48 Hanover St. Boston, Mass.

We claim to have the largest and most complete Edison stock in New England. Orders are shipped on the first express after receipt, thus avoiding every possible delay.

As we *wholesale entirely*, we are in the best position to handle your orders.

Send us your next one; you'll be surprised at our quickness!

Pushed by the dealer, like any other merchandise—and with exclusive Columbia selling rights in the contract, there's more retail money in the business than there ever was before.

Columbia Phonograph Co., Genl., Tribune Building, New York.

TO MEET IN MILWAUKEE NEXT YEAR.

Votes Taken Show a Desire on the Part of the Members of the National Association of Talking Machine Jobbers to Gather Next Year in the West—Some Important Matters Discussed by Executive Committee.

The National Association of Talking Machine Jobbers, through its Executive Committee, has been taking up for serious consideration some important matters affecting the welfare of the talking machine trade recently, and within the near future no doubt some important announcements will be made.

The secretary of the association, J. C. Roush, of The Standard Talking Machine Co., Pittsburg, Pa., recently remarked to The World:

"The members of the various committees are all hard workers, and the coming year should show a marked increase not only in the membership, but in the interest taken by the present members of the association.

"I would also ask you to announce the result of the vote taken for next year's convention, which resulted as follows: Members voting in favor of Milwaukee, seventy; in favor of Niagara Falls, eight, and in favor of Atlantic City, eleven, and two voting no choice, showing the total vote to be eighty-nine.

"In going over the entire vote we find that the vote was divided as follows: In favor of Milwaukee twenty-seven eastern jobbers and forty-three western jobbers; Niagara Falls, two western jobbers and six eastern jobbers; Atlantic City, seven eastern jobbers and four western jobbers. This vote has been carefully compiled and clearly shows that the next convention should be held in the West.

"Owing to the desire of many of our members to spend the Fourth of July with their families at home, it has practically been decided to hold our next convention the second week of July, either the 11th, 12th, 13th and 14th, or the 12th, 13th, 14th and 15th. This, however, has not been fully decided.

"Some very important matters have been discussed by the Executive Committee with the National and Victor factories recently, and some very important announcements will be made by both factories very shortly, which will be of great interest and benefit to all jobbers."

Mr. Roush is one of the hardest workers of the association, and his enthusiasm has been manifest in many ways.

The appointments made by President Whitsit are as follows:

Appointments for standing committees from September 15, 1910, to September 15, 1911:

Press Committee—L. C. Wiswell, Lyon & Healy, chairman; A. A. Trostler, Schmeltzer Arms Co.; R. Shaw, Western Talking Machine Co., Winnipeg, Canada; Herbert Royer, M. Steinert & Sons; I. Davega, I. Davega Co.

Resolution Committee—J. F. Bowers, Lyon & Healy, chairman; Lawrence McGreal; Burton Pierce, J. W. Jenkins' Sons Co.

Grievance Committee—H. H. Blish, Harger & Blish, chairman; I. S. Cohen, Cohen & Hughes; W. Bonhill, Penn Phonograph Co.; G. A. Mairs, W. J. Dyer & Bro.; Max Strasburg, Grinnell Bros.

Arrangement Committee—Lawrence McGreal, chairman; Lawrence Lucker, Minnesota Phonograph Co.; L. C. Wiswell, Lyon & Healy; Burton Pierce, J. W. Jenkins' Sons Co.; H. A. Weyman, H. A. Weyman & Sons; J. N. Blackman, Blackman Talking Machine Co.; J. C. Roush, Standard Talking Machine Co.

State Commissioners and Membership Committee—George E. Mickel, Nebraska Cycle Co., chairman; R. Shaw, Western Talking Machine Co., Winnipeg, Canada; W. H. Ross & Son, Portland, Me.; E. F. Taft, Eastern Talking Machine Co., Boston, Mass.; Max Landay, Landay Bros., New York City; Mr. Silverman, Pardee-Ellenberger Co., New Haven, Conn.; Edisionia Co., Newark, N. J.; Dan. O'Neil, C. J. Hepe Co., Philadelphia, Pa.; J. Fisher, C. C. Mellor Co., Pittsburg, Pa.; Carl Droop, E. F. Droop & Sons, Washington, D. C.; Thomas Towell, Eclipse Musical Co., Cleveland O.; Montenegro-Rheim Co., Louisville, Ky.; Ben Lee Crew, Phillips & Crew, Atlanta, Ga.; W. H. Reynolds, Mobile, Ala.; C. C. Koehring Bros., Indianapolis, Ind.; L. C. Wiswell, Lyon & Healy, Chicago, Ill.; Max Strasburg, Grinnell Bros, Detroit, Mich.; Lawrence McGreal, Lawrence McGreal, Milwaukee, Wis.; Lawrence Lucker, Minnesota Phonograph Co., Minneapolis, Minn.; H. H. Blish, Harger & Blish, Des Moines, Ia.; Burton Pierce, J. W. Jenkins' Sons Co., Kansas City, Mo.; National Auto Fire Alarm Co., New Orleans, La.; Houston Phonograph Co., Houston, Tex.; Ross P. Curtice Co., Lincoln, Nebr.; Montana Phonograph Co., Helena, Mont.; Knight-Campbell Co., Denver, Colo.; Consolidated Music Co., Salt Lake City, Utah; Southern California Music Co., Los Angeles, Cal.; Mr. Graves, Graves Music Co., Portland, Ore.; Eilers Piano House, Spokane, Wash.

"HOW IS YOUR STOCK?"

Benefits from Being in a State of Preparedness—Suggestions Worth While.

A good many talking machine jobbers and dealers know what they lost last year by holding off their orders so long that they lost many sales. Along these lines The Talking Machine Co., of Chicago, has been sending out some excellent literature.

The letter addressed to their dealers for September is particularly good and we reproduce it herewith.

Such letters should be perused carefully because they not only have the tendency to awaken the dealer's interest, but they show how trade may be developed:

"The successes of to-day are built by avoiding the failures of yesterday.

"Last month may not have been what you would call a great 'success' from your personal standpoint, but speaking from the Victor standpoint, it was. The Victor Co.'s business for the first six months of 1910 was the largest in their history.

July was the biggest July they ever had and more than doubled the previous July. August was way ahead of last year, and at the present time they tell us they have orders in hand for over 103,000 Victor machines.

"These facts signal your 'success' in the next four months. The Victor Co.'s business is a safe barometer, foretelling the immediate future condition of Victor sales. Their orders on hand represent a strong public demand which means Victor business for you. How is your stock? The next four months will break all Victor sales records. Send us your orders early so as not to be disappointed in the prompt receipt of your goods. Our machine and record stocks are complete and we shall aim to keep them so, but your advance orders will greatly facilitate our being able to do this.

"If we impress nothing else upon you in this whole letter, we want you to fully appreciate the real, intrinsic value of the Victor ready-made lecture, 'The Songs of Other Days,' which they have recently issued for your benefit in bringing before the public of your community the educational, instructive and entertaining possibilities of the Victor. This is a 'ready-made' lecture to the minutest detail. Make arrangements with your school authorities to give this lecture in the school hall. The small admission charged to go for the purchase of a Victor for the school.

"Another thing we want to call your special attention to at this time is the new 'Sousa and Pryor' Victor Ready-Made Display Window No. 18. Send us your order for one of these at once. Remember 'your display window is the eye of your store' and the best pulling local advertisement you have."

RECORDS OF GREAT ORGAN.

Experts Now in Salt Lake City Securing Records of Great Pipe Organ and Choir in the Tabernacle.

(Special to The Talking Machine World.)

Salt Lake City, Utah, Sept. 5, 1910.

There is considerable interest manifested in the local trade and in fact among talking machine men all over the country regarding the proposition to make records of the great Tabernacle choir and organ in this city. A number of expert recorders have arrived here and are busily preparing to get as perfect records as it is possible to obtain.

While the idea of organ records is comparatively new, nevertheless several records have been made from small reed organs and at least one from a pipe organ with considerable success. If the records of the Tabernacle organ prove a success it will open a new field for talking machine experts.

MISSING WORLD COPIES.

A subscriber desires No. 12, Vol. 2, December, 1906; No. 1, Vol. 1, January, 1905, of The Talking Machine World. Anyone who has these papers on file for sale kindly advise The Talking Machine World.

TRADE NEWS FROM INDIANAPOLIS.

Judging from Demand for High Grade Machines Dealers Believe a New Era in The Talking Machine Trade Has Been Ushered in—Leading Jobbers and Dealers Make Most Encouraging Reports Regarding Present and Prospective Conditions in All Branches.

(Special to The Talking Machine World.)

Indianapolis, Ind., Sept. 8, 1910.

The talking machine business is opening up in pretty good shape for the fall trade, and dealers are unanimous in predicting lively sales for the next few months. The business seems to be running now more to the higher grade of instruments. This is explained by some dealers on the theory that the people who have money are just beginning to find out what is in the high grade machines in the way of entertainment. As an illustration some of the dealers have been successful in selling \$200 machines in homes where there is no piano. The fact that a talking machine of high grade takes precedence over a piano in some instances proves, the dealers believe, that the talking machine era has just begun.

The Musical Echo Co., which handle the Victor line, have been having a good sale on Victrolas and other high grade machines. The proprietors of this store have the fullest confidence in the outlook for the fall and winter months. The managers, according to their statements, like their new location in North Pennsylvania street better every day.

W. M. English has accepted a position on the road with the talking machine department of the Wulschner-Stewart Music Co., jobbers in Edisons and Victors. This company are also reinforcing their staff of city salesmen and are getting ready to make a clean up in the fall business.

"We are running as near our full capacity in the talking machine line as we ever have since we took up this line," said W. S. Barringer, manager of the talking machine department of the Wulschner-Stewart Co. "We have spent a lot of money to equip this department and will carry a complete stock in all branches and we believe the public will appreciate our efforts."

Mr. Barringer says that popular music is selling best now. "Has Anybody Here Seen Kelly?" had a good run in Indianapolis, and Mr. Barringer predicts an excellent sale for "Any Little Girl That's a Nice Little Girl is the Right Little Girl For Me." This piece proved popular at the national meeting of talking machine men recently.

Mr. Kreuzsch, of the National Phonograph Co.,

who has been looking after business in this territory for some time, makes good reports, and says he believes the prospects are excellent for a good fall trade.

Beginning September 1 the local Columbia Phonograph Co. store took over the Dictaphone, which until then had been handled by Warren M. Bird. There has been a good demand in Indiana for this line of instruments.

H. H. Myers, traveling representative of the Columbia Phonograph Co., was in the city last week. Mr. Myers reported that business at hand was rather quiet, but he said there were prospects for an excellent fall trade.

L. A. Mohler, manager of the Columbia Phonograph Co. store in Terre Haute, was in Indianapolis last week. Mr. Mohler is doing a nice business at Terre Haute, and is having a good demand for high grade machines.

Haugher's clothing house in Indianapolis has bought a Twentieth Century Columbia phonograph and will use it for advertising purposes.

Now that the Wulschner-Stewart Music Co., the Aeolian Co., and the Musical Echo Co. are side by side in North Pennsylvania street and all handling the Victor line, competition in this line is hotter than ever. All three companies are doing excellently with good prospects. The Aeolian Co. have refitted their talking machine department and now have one of the best equipped departments in the city.

The Columbia Phonograph Co. have just received their first shipment of the Mignon gramofones to sell at \$150 each. Manager Devine of the local store predicts a good demand for this machine. "I am more than pleased with it," he said, "and I believe it will be a winner."

The Kipp-Link Phonograph Co., who handle Edisons, have been having a nice business with good prospects.

Talking machine men are getting ready to do some extensive advertising during the State Fair.

SUCCESS OF NEW DEVICE.

Talking Machine Soundboard Co. Report Great Number of Sample Orders—Deliveries Soon.

The Talking Machine Soundboard Co., of New York, announce a heavy demand for samples of their new resonating device for talking machines, which is the invention of L. P. Valiquet, and which was illustrated and described in these columns recently. The sample orders already on file have served to convince the manufacturers more than ever of the great field for the improved re-

producer, and it is expected that when the deliveries are made some time this month, or the first of October, that the reorders will necessitate a greatly enlarged equipment. Illustrative descriptive matter, prices, etc., regarding the soundboard may be obtained by addressing the Talking Machine Soundboard Co., Room 1000, 110 West Thirty-fourth street, New York.

VICTOR CO. TRAVELERS PLAY BALL.

Teams Representing Eastern and Western Territories Cross Bats—Make Some Interesting Plays—Individual Feats Worth Noting.

Batting for the championship between the representative teams of the Victor Talking Machine Co., divided into two squads to represent the East and West, which took place on the morning of August 17 last, was decisively won by those traveling in the latter territory by the score of 17 to 10. Rapping Ripley for a number of two and three-base hits and a couple of home runs, Bennett's men piled up a lead of eight runs. Joe Gannon took up the burden for the East at the beginning of the sixth inning, but the "tenderfeet" were beaten before the eccentric northpaw entered the arena. Too much cannot be said regarding the good pitching done by "Slats" Dewar, and he, too, was elegantly supported by Backstop Woodward, who caught everything but a cold. Shortstop Goldsmith did himself proud by occasionally stopping a slow grounder, while Eddie Hipple insisted upon wearing a catcher's glove at third base and successfully accepting two chances out of eight.

The following was the lineup: West—H. L. Woodward, c.; W. M. Dawson, 1b.; D. B. Dewar, p.; Sam Goldsmith, ss.; W. H. Fiss, 2b.; H. C. Baish, cf.; E. E. Hipple, 3b.; C. K. Bennett, lf.; L. Burchfield, rf. East—J. Campbell, c.; J. Gately, 1b.; J. Gannon, 3b.; C. L. Price, ss.; L. H. Ripley, p.; I. M. Bame, lf.; T. F. Green, cf.; C. H. Womeldorff, 2b.; R. R. Gorham, rf.

The game was ably umpired by George D. Ornstein.

Gately's playing at first was excellent but for the fact that he insisted upon moving first base over about four yards nearer the pitcher, except when the East were at bat. It was discovered that he could put out a batter much easier by this method. The playing of Tom Green was worthy of the attention of Hughie Jennings. Green stopped everything that came his way—if he found it too swift for his hands he would turn around and stop it with his back. He had eleven errors and six wild throws chalked up for him.

TALKING MACHINE EXPORTS.

The Figures for July Presented—Reports Show Strong Gain in All Departments of the Industry—Some Interesting Figures.

(Special to The Talking Machine World.)

Washington, D. C., Sept. 6, 1910.

In the summary of exports and imports of the commerce of the United States for the month of July (the latest period for which it has been compiled) which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following interesting figures relating to talking machines and supplies are set forth:

The total exports of talking machines, records and supplies for July, 1910, amounted to \$150,248, as compared with \$189,407 for the same month of the previous year. The seven months' exportations of talking machines, records and supplies amounted to \$1,335,592.

AMBEROL RECORDS AS COMMISSION.

The Talking Machine Co., of Louisville, Ky., of which A. Montenegro is general manager, are making a strong bid for business in the Edison line. They offer to any owner of an Edison machine who secures another customer for their house six new Amberol records free. In other words, they are willing to pay \$3 commission to every owner of a talking machine who can produce a new customer, no matter what price machine is purchased.

POINTERS ON SALESMANSHIP.

A Man Must Change His Tactics to Win—Experience Is the Best Teacher—Ideas That Count—Adhere to the Rule of Fair Dealing.

A salesman of experience realizes that ideas—practical methods of selling goods—are of the greatest value, and he also knows that it pays him to search for them.

He cannot successfully employ the same old way of doing things month after month, and year after year. He must be modern, up-to-date, as much or more so than men of other professions.

A physician or lawyer finds that to compete successfully, he is compelled to read, read all the time, in order that he may learn of advancement in treatment or in procedures.

Experience is the best teacher, but the road of the individual's experience is narrow and rugged, and it does not fall to each to have the same experience, or to have the same views of similar experiences.

If we learn from another that fire will burn us, it is not needed that we place our fingers in the fire to prove the truth of it. It is better to accept the statement and avoid the suffering.

How many times does the salesman fail to sell certain buyers, without knowing why? All his experience seems to count for nothing in some cases, and it may be some trifling matter, some apparently unimportant oversight which causes the trouble.

To discover the missing link in his method may and does mean much to the salesman.

How may he do this? By learning the experience of others, writes W. N. Ambuchon in *The Traveling Man*.

Every idea supplies a "missing link" in his chain of reasoning. Correct conclusions depend upon correct premises from which to reason. The more good ideas, the better the basis for good work.

A salesman who gets one idea which helps make a sale, from reading a copy of any publication dealing with salesmanship or business, can make enough from this one sale to pay him for the time devoted to reading.

A looker-on often sees more than gamblers. A man who has been shaved by a thousand barbers, knows more about different ways of doing it than any barber.

A man is duller in his own business than he is in the business of others, at least, he believes so and with good reason. In his own business he learns how much he does not know. The vastness of his ignorance appals him. Basing his action on the rule that the average man realizes that he does not know too much about even his own business, a salesman may proceed with more confidence.

The fear which paralyzes some salesmen is the fear which arises from undue reverence for the supposed greater knowledge of the buyer. Give a buyer credit for only such incomplete knowledge as it may be assumed every human being possesses, and you rise, in self-estimation to an equality.

In war it is more difficult to make a successful charge against forces whose position is on an elevation. Attempting to influence a buyer, who in your belief, is higher than you are, is like a charge up hill. A reverence for man is, with some human beings, greater than their reverence for divinity. It is false reverence in business, and detracts from business force.

Salesmanship consists of brain work, not brawn work. It is mind, not muscle, which does the business.

It is not that a man may not know certain things, but rather, that he does not realize their true value in practice, or utilize them. I learned why I did not interest a certain buyer by accidentally overhearing the remark of a six-year-old boy who happened to be in the store at the time. I then sold the merchant without serious difficulty.

The wish to establish confidence on the part of the buyer, with a consequent permanence as a customer, should not be allowed to overbalance the wisdom of taking the order to-day.

If one adheres to rules of fair dealing, confidence must come, but many salesmen neglect today in the hope of to-morrow. They should re-

member that their trade is with grown-up people, who do not relish nursing at the bottle and are better satisfied with solid food. Trade will grow faster if the salesman takes solid orders and gives solid values.

The consciences, so called, of many salesmen are too tender. I would call an extreme tenderness a symptom of ignorance rather than a virtue.

A salesman does not make permanent friends by yielding to demands for inside prices. It is a sign of weakness, and weakness excites pity rather than admiration.

It is a false idea of his profession which prompts a salesman to give cut prices at the expense of the house. Greater than all, he is false to himself.

Inferiority is a makeshift with no future; superiority is self-sustaining and its advantages are cumulative.

Once buyers learn that a salesman will yield to pressure and a lower price, that salesman will be caused to lead a miserable existence thereafter, and will get no orders without a struggle.

Misrepresentation on the part of buyers is not always intentional; sometimes adverse conditions are implied rather than stated, but generally it will be found that the whole trouble is in the imagination of the salesman.

SIDE LIGHTS ON PRICE CUTTING.

Little of It in the Talking Machine Field, but It Is Bad Business if Indulged in Any Branch.

I hear more or less complaint from managers of stores that it seems impossible to keep certain salesmen on their force from cutting prices. Surely the salesman who practises such methods as these does not take time to think of the demoralizing effect this has on the whole business or the hardship it works on the balance of the sales force, or he would make an engagement with himself, have a heart to heart talk, and cut such methods out.

But, sad to relate, few if any of them ever do. They go on blindly from day to day and year to year, not realizing the great disaster they are approaching. A salesman in such a fix is bound to lose out sooner or later, and when the end comes they are down and out forever.

To me, says J. E. Dye, it seems they have two things uppermost in their mind, and these are that they have no confidence in their employer's ability to mark goods at a legitimate profit and that he is trying to rob the many consumers for his own selfish benefit, or else they think it is the only way they can become popular with a large per cent. of the trade.

If I were in the employ of a man where such methods were resorted to by certain salesmen, I would register a kick, and make it good and strong, and if something wasn't done to remedy such things, I would seek employment elsewhere and leave it to the "boss" to battle with the price cutter.

It seems to me that the merchant in some cases is to blame for this, because he is slow in eradicating the evil for fear he will lose a good customer, as he sometimes argues with himself. But let me tell you that no one is your customer who can only be sold by such methods. They will not hesitate to leave your store and go somewhere where they can get goods a little cheaper.

You had better have no customers at all than to sell goods at no profit.

Do you think a consumer would write to a mail order house and ask them to cut a price on any article they want to buy? Not much; for they know they would not only waste time but material and a two-cent stamp.

But when they come to your store it doesn't cost them anything to try it, and if you or your salesman are weak enough to fall into the trap set for you, the customer has made a gain of so much and the business in which you should all be vitally interested has suffered the loss of so many dollars.

All the world's a stage, on which every prominent character has a thousand understudies.

It's easy enough to make up your mind what you would do if you were some other fellow.

No. 400. Closed

Remarkable Harmonica Cabinet The C-D-C Device

The Hohner Collapsible Display Cabinet and Assortment is by far the greatest Harmonica-selling proposition that has ever been presented to the Trade. It comprises three trays of the best seasoned wood so ingeniously arranged and constructed as to permit the opening and closing of the entire cabinet in a moment's time. The cabinet is elaborately finished in a rich dark mahogany piano polish with attractive lettering on the cover. It is not a cheaply constructed affair, but is thoroughly and rigidly put together to stand hard usage and—IT COSTS YOU NOTHING. The cabinet, when open, presents a display of remarkable attractiveness, exhibiting its entire contents of 38 Harmonicas at one time. When the cabinet is closed it resembles a handsome jewel case, occupies less than a square foot of space, will enhance the appearance of your display counter, and increase your Harmonica sales 100 per cent.

Contained in the C-D-C Device is a specially selected assortment of 38 pieces of the very best selling

Hohner Harmonicas

assorted in 16 different styles, all keys, and can be retailed to return over 50 per cent. cash profit on your investment. This is the assortment:

TRADE IN THE MONUMENTAL CITY.

Business Gradually Picking Up—Morris Silverstein Optimistic—W. C. White to Open Store—Eisenbrandt Sons in New Quarters.

(Special to The Talking Machine World.)

Baltimore, Md., Sept. 9, 1910.

The talking machine people have no complaints to make. Although the summer is still with us the trade finds that the demand for talking machines is gradually picking up. Mr. Laurie, of the Columbia Phonograph Co., says the outlook is fine, and that he is anticipating a splendid season.

Morris Silverstein, of Cohen & Hughes, is the really optimistic man among the trade. He is full of joy, for during August the firm doubled the business it did in the same month last year. In fact, great gains over last year have been noticeable every month so far of 1910. This firm recently succeeded in securing a contract from the Old Bay Line, running from this city to Norfolk and Old Point Comfort, for three Victrolas, which have been placed on the steamers for the entertainment of the passengers. Mr. Silverstein is highly elated with his success and hopes to maintain the good record.

William C. White, formerly of the talking machine department of H. R. Eisenbrandt Sons, will open a store for himself within a few days at 203 North Charles street, next door to the old location of this firm. He announces that he will carry a full line of Victor talking machines and records, and there is no doubt but he will build up a fine business.

H. R. Eisenbrandt Sons have moved from 201 North Charles street to 228-230 North Howard street, where they have a much larger and finer store than before. A new stock has been laid in, including a fine and complete line of talking machines.

An announcement that created a great deal of surprise among the trade was made Saturday when it became known that the old firm of George Willig & Co. had passed into the hands of Oliver C. Ziegfeld and John D. Farson. Hereafter the firm will be known as George Willig & Co., Ziegfeld & Farson, Successors. The house was established in 1794, and this is the first time in its history that the original name has been changed. Its operations have extended through the United States, Canada, Europe, South America, Mexico and Australia.

Mr. Ziegfeld has been connected with the firm for twenty-seven years, fourteen of which have been spent as manager. He comes of a musical

family, his uncle being Florenz Ziegfeld, Sr., president of the Chicago College of Music, the largest in the United States. He is also a cousin of Florenz Ziegfeld, Jr., the well-known theatrical manager and husband of Anna Held. Mr. Ziegfeld himself has also been connected with theatricals for a number of years. Mr. Farson is bandmaster of the Fourth Regiment and has conducted orchestras for a long number of years.

THE FALLACY OF PRICE-CUTTING.

The Price-Cutter's Piracy of Trade-Mark Reputation—Inconsistency of Spasmodic Cuts—Fairness to the Advertising Manufacturer—Prediction of the Illegality of Exploiting a Trade-Mark.

There are two kinds of price cutting. One is done by the dealer who consistently sells his goods on a certain basis of profit, and neither sells his goods at a loss nor at an extravagant profit, says W. R. Hotchkin, merchandise manager, John Wanamaker, New York, in Printer's Ink. The other case is where the dealer, with little regard to consistency in his percentage of profit, is willing to damage a manufacturer, as well as his competitors, by announcing at irregular intervals prices on trade-marked articles, or other well-known commodities, which are below a profitable retail selling price.

It is well known in the trade that John Wanamaker was the first bookseller to lower the prices of books and place them on a fixed selling basis at a reasonable profit. He was the originator of the \$1.08 price for new fiction when \$1.50 was the published price, and the selling price an indefinite quantity.

The position then taken met with such tremendous popular approval that the Wanamaker Store built up the largest retail book business in America and the entire book publishing business of the country had the greatest stimulus it has ever known, and the greatest epoch of prosperity.

But it is necessary to state that when this price was once fixed it was continuously maintained. It is also to be understood that this price gave a fair, legitimate profit.

The dealer who selects certain trade-marked articles of large demand and places them on sale for a day or two each month at a price on which there is no profit, and at times actual loss, has three reasons for his action:

First—To deceive the public as to his prices on other goods not so well known.

Second—To attempt to cast reflection upon the

prices of a competitor by taking a false position himself.

Third—To damage the market value of the trade-marked article.

If there is a better reason for such action, with an article that cannot be bought from the manufacturer at less than its regular price at any time, I would like to know it. If reason number one is analyzed to its bottom it is as damaging to the public as it would be to sell to the Government ten cases of goods in one case of which fair weights and measures were given, and a deal made with the inspector to examine only that one case, the other nine cases of goods being measured and weighed at thirty inches to the yard or twelve ounces to the pound.

In the first case the customer is able to measure the value of the trade-marked article, while being led to purchase an unknown number of other articles which are not so measured, with the belief that they are purchased on the same low basis of profit. Thus the purchaser is just as falsely misled as though an inspector was bribed to measure ten cases of merchandise upon the exaggerated basis of the case specially prepared for his examination.

The time will undoubtedly come, if honesty in business policy is to prevail, when it will be as much against the law to falsely exploit a standard article at a loss as it is to sell goods at a short pound or a short yard. It would seem that the time will come when it will be against the law for any storekeeper to maliciously use the manufacturer's product in a way that not only deceives the public, but does damage to the honest storekeeper, as well as the manufacturer of the article.

Certainly that public must be very ignorant which does not realize that when one line of goods is sold below cost another must be sold proportionately above it to make up the deficit.

THE VALUE OF CABINETS.

Add to Appearance of Stock and Profits of the Talking Machine Business—Something of the Udell Line.

Wherever occurs a gathering of up-to-date talking machine dealers there is raised the question of carrying cabinets, and invariably those who make talking machine cabinets a feature of their stock are loud in their support of this line. With machines mounted on suitable cabinets the attractiveness of the general stock is increased fully 50 per cent., and there is in addition the strong possibility of including the sale of the cabinet with that of the machine and at a goodly profit.

One of the most extensive and comprehensive lines of cabinets manufactured in the United States is that of the Udell Works, Indianapolis, Ind. There is not a machine in any of the leading lines that cannot be supplied with a cabinet that is perfectly in harmony with it, while the man who has a library of either disc or cylinder records can always find the cabinet that will just meet his needs, whether his records are few or many. Of the Udell quality nothing need be said; it has stood the test of time.

SUCCESS THROUGH PUBLICITY.

"If you have had any degree of success in Spokane it is because of the liberal use of printers' ink," declared the Rev. Dr. James W. Kramer, pastor of the First Baptist Church of that city.

"There is something worse than sensationalism. It is the inability of the church to produce life. The church that does not advertise is behind the times and is nursing empty pews, and he who rails against the minister for advertising is suffering for a congregation. I am not an advocate of rag-time methods or vulgar preaching, but I do plead for the church which is a humming plant of machinery, with live coals in the fire box, smoke curling from the stack and every belt, wheel and pulley going. I believe, too, that the people need instruction, and that a minister of the gospel is first, last and all the time a teacher. There must be life."

Some men never succeed because they only expect opportunity to knock at the door during business hours.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Specially prepared for The Talking Machine World.)
Washington, D. C., Sept. 10, 1910.

SOUND-BOX FOR TALKING MACHINES. Luther T. Haile, Philadelphia, Pa. Patent No. 963,546.

This invention relates to sound-boxes for talking machines and has for its object the provision of means supplemental to and operatively detachable and replaceable from and to the usual needle-holder of the sound-box, without interference with the usual function and capacity of the latter to retain a needle removably in its longitudinal aperture by any known means; the invention means imparting to the sound-box and its needle-holder an additional function, namely, increasing its capacity to produce loud or soft tones from the same stylus or needle. Such result has never been heretofore effected, by any needle-holding means.

In the drawings illustrating the invention, Fig. 1 is a top view of a usual type of sound-box and needle-holder, on which an improvement is adapted to be employed; Fig. 2 is a like view, of the former

and of the improvement detachably attached thereto; Fig. 3 is a section on the line x-x of Fig. 2. Figs 4 and 5 are elevation and section of the supplemental needle-holder of Fig 2 detached from the primary needle-holder of Fig. 1, and Figs. 6 and 7 are like views as Figs. 4 and 5, but with the addition of a tone-modifying screw.

SPEED REGULATING DEVICE FOR SOUND RECORDING AND REPRODUCING MACHINES. George Oulton, Charles Ab'lett and William E. Lightfoot, Liverpool, Eng. Patent No. 964,684.

This invention relates to sound recording and reproducing machines employing disc records and particularly to such machines in which the speed of the motor can be continuously varied so that the relative linear speed between the record line and the stylus remains constant, or otherwise stated, the angular speed of the motor increases or decreases according to whether the record commences at the periphery or near to the center of rotation.

The object of this invention is to obtain the differential speed of the motor in a simple and efficient manner and dispense with any connection between the sound box or carrier thereof and the speed controlling device, providing means at the same time for indicating the proper position of the speed controlling device for records of different diameters.

The invention also provides that the motor can be run at a constant speed so that the ordinary or standard disc records can be used at will.

According to this invention, the sound box arm or carrier is quite independent of the speed controlling device, and a graduated scale and pointer is employed to indicate the proper starting speed for different sized records.

In Fig. 1 is represented an end elevation of the mechanism. Fig. 2 represents a plan of the same looking from underneath. Fig. 3 represents a side elevation omitting some of the parts for clearness' sake.

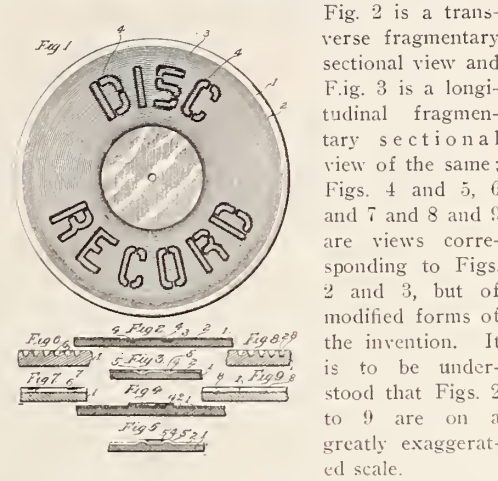

SOUND RECORD FOR TALKING MACHINES. James W. Owen, Philadelphia, Pa., assignor to Victor Talking Machine Co., Camden, N. J. Patent No. 964,685.

The object of this invention is to produce a commercial record which is difficult to duplicate

without impairing or interfering in any manner with the sound recorded thereon.

A further object is to incorporate into the record portion of a commercial sound record identification marks, words, descriptive matter or other distinguishing characters to designate either the source of origin of the record, or any other information which may be desired, in such a manner that it would be extremely difficult to remove or efface the same without injuring or destroying the record, and at the same time so to place such characters on the recording surface as not to interfere in any manner with the quality of the reproduction.

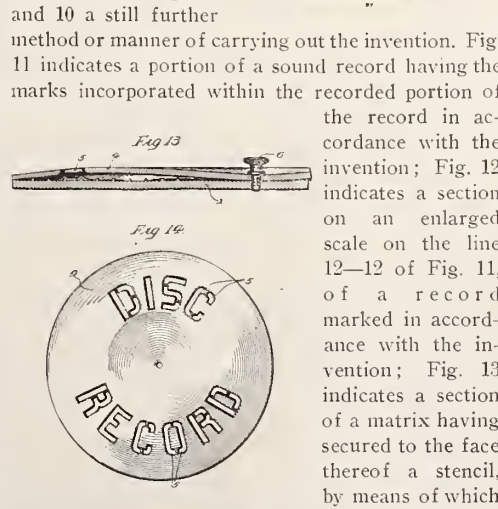

Fig. 1 represents a plan view of a disc record, having the sound waves recorded in laterally undulatory grooves of substantially even depth on the face thereof and embodying the invention;

METHOD OF MAKING SOUND RECORDS AND THE MATRICES FOR MAKING SOUND RECORDS. James W. Owen, Philadelphia, Pa., assignor to Victor Talking Machine Co., Camden, N. J. Patent No. 964,686.

The object of this invention is to produce a commercial sound record which cannot easily be duplicated or dubbed without impairing or injuring the sound record formed thereon, or incorporating into such duplicates the marks formed on the original records.

Figs. 1 to 3 indicate the various steps of one method of carrying out the invention; Figs. 4 to 6 indicate a modification of the invention; Figs. 7 and 8 indicate another modified manner or order of steps which may be employed in carrying out the invention; and Figs. 9 and 10 a still further method or manner of carrying out the invention. Fig. 11 indicates a portion of a sound record having the marks incorporated within the recorded portion of the record in accordance with the invention; Fig. 12 indicates a section on an enlarged scale on the line 12-12 of Fig. 11, of a record marked in accordance with the invention; Fig. 13 indicates a section of a matrix having secured to the face thereof a stencil, by means of which

marks may be placed upon the matrix, and Fig. 14 is a plan view of such stencil.

SOUND HORN. Adolph G. Kaufman, New York,

assignor to American Callaphone Co., same place. Patent No. 962,574.

This invention relates to horns for amplifying, purifying and distributing sounds and is applicable to apparatus of various kinds for producing or reproducing sounds, such as musical instruments,

telephone receivers, talking machines, the telharmonium, and the horn is also capable of use directly as a megaphone. The device is also capable of use for the reverse function, that is to collect and receive sounds.

Fig. 1 is a side elevation, showing a double horn; Fig. 2 is a front elevation thereof; Fig. 3 is a front elevation of a triple horn; Fig. 4 is an elevation of a quadruple horn; Fig. 5 is a separate view of one of the horns, the same being given a peculiar S-shape, so as to occupy less space; Fig. 6 is a front view of a triple horn, differing from that shown in Fig. 3; Fig. 7 is a bottom view of another type of quadruple horn, and Fig. 8 is a side view of the horn shown in Fig. 7; Fig. 9 shows a nested triple horn, and Fig. 10 shows a nested double horn.

SOUND-REPRODUCING MACHINE. Stephen M. Wirts, Detroit, Mich. Patent No. 965,678.

This invention relates to phonographs and like sound reproducing machines, it is desirable to eliminate as far as possible all noises arising from the movements of the motor and to amplify sound waves from the diaphragm without destroying their quality.

A further object of the invention is to provide an attractive exterior for the machine which makes it available as an ordinary article of furniture as well as a storage place for records and for the implements necessary in manipulating the phonograph proper.

In the drawings Fig. 1 is a view in perspective of a machine embodying features of the invention showing open doors at the mouth of the horn; Fig. 2 is a similar view taken from the opposite end with doors open; Fig. 3 is a plan view of the machine with the top entirely removed; Fig. 4 is a view in central, longitudinal section showing the arrangement of a phonograph horn

and sound board; Fig. 5 is a view in cross section through the table; Fig. 6 is a view in detail of a

needle tray; Fig. 7 is a view in detail of a horn; and Fig. 9 is an enlarged sectional detail of a horn.

SOUND REPRODUCING MACHINE. Sydney I. Prescott, Camden, N. J. Patent No. 965,329.

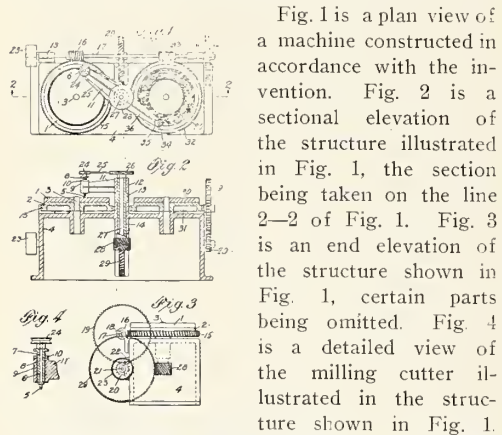

This invention relates to improvements in sound reproducing machines.

In the accompanying drawings which form a part of this specification, and in which like characters of reference indicate the same parts, Fig. 1 is a side elevation of a device constructed in accordance with the invention; Fig. 2 is a plan view of the structure illustrated in Fig. 1; Fig. 3 is a section on the line 3-3 of Fig. 2; Fig. 4 is a section on the line 4-4 of Fig. 1; and Fig. 5 is a detailed view.

SOUND-RECORD-DUPLICATING APPARATUS. Sydney I. Prescott, Camden, N. J. Patent No. 965,330.

This invention relates to an improvement in sound record duplicating apparatus, particularly to that type of sound records known as "disc" records.

TRANSMITTER FOR SOUND RECORDING AND REPRODUCING MACHINES. Sydney I. Prescott, Camden, N. J. Patent No. 965,326.

AMPLIFIER FOR SOUND REPRODUCING MACHINES. Sydney I. Prescott, Camden, N. J. Patent No. 965,328.

METAL HORN. Joseph Adelor Danis, Burlington, Vt. Patent No. 967,618.

This invention relates to horns or amplifiers for phonographic apparatus, and its object is to provide means for dampening the vibrations of said horn when made of metal, so that the tone of the instrument will be sweeter and smoother. The means used to accomplish this result comprise a cover for the horn made of textile fabric and detachably secured to said horn. To insure a good fit, the cover is made in sections, provided with means for lacing them together, and at its larger end said cover is also provided with hooks which catch over the edge of the metal horn and hold the cover tightly stretched, and in close contact with said horn.

In the accompanying drawing, Fig. 1 is a perspective view of a metal horn or amplifier provided with improved cover. Fig. 2 shows the sections from which the cover is made, and Fig. 3 is a view on a larger scale of one corner of a section showing the eyelets and hooks with which it is provided.

TALKING MACHINE. Thomas Kraemer, Philadelphia, Pa., assignor to Hawthorne & Sheble Manufacturing Co., same place. Patent No. 968,483.

This invention relates to talking machines and is directed to the provision of a machine of an improved construction in which the relative movement of the sound-record and the reproducing mechanism necessary to permit the stylus of the reproducing mechanism to track in the record-groove throughout the several convolutions thereof is affected by moving the sound-record and the turntable on which it is supported bodily in the plane in which they lie.

In accordance with this invention, a turntable is provided for supporting a disc record and this is so mounted as to permit of rectilinear movement thereof in the plane in which it lies. A motor mechanism is employed for rotating the turntable on its axis and this motor mechanism may also be arranged to effect the lateral movement of the turntable. The reproducing mechanism is stationarily mounted with respect to the turntable so far as concerns movement of that mechanism radially of the turntable; if desired the reproducing mechanism may be so mounted as to permit of movement transverse to the plane of the turntable so that the stylus hereof may track faithfully in the record-groove and may be moved to an inoperative position while changing records.

The devices whereby the motor mechanism, in addition to rotating the turntable, effects the

rectilinear movement thereof, are so constructed as to move the turntable bodily as it is rotated at the speed necessary to enable the stylus of the reproducing mechanism to follow the record-groove properly. For this purpose the motor mechanism may be arranged to move with the turntable if desired, but it is preferred to mount the motor mechanism stationarily and connect it to the turntable by devices which will permit of the necessary relative

movement of these two parts while maintaining the operative connection between them, as for instance, a telescoping shaft or a spline.

The preferred embodiment of this invention is illustrated in the accompanying drawings in which—

Fig. 1 is a top view of a talking machine, broken away and sectioned in part, Fig. 2 is a sectional elevation of the same, the section being on line 2-2 of Fig. 1, and Figs. 3 and 4 are detail views in section on lines 3-3 and 4-4 of Fig. 1.

PERMANENT LOCATION AN ASSET.

There is a wonderful asset in keeping your store location permanently. Those firms who move around from one place to another are sure to lose out in the long run. Sometimes when the retail section of the city or town moves, as is the case quite frequently, one really feels justified in moving with it, but to our mind it is far better to keep your present position so live and so firmly implanted in the public memory that there will be no reason for this expansion.

Keep down the cobwebs. Dust off the shelves. See that the windows are washed at least every week. It pays.

THORN NEEDLES

Continue to grow in popularity. Slowly but surely they are winning favor with the trade, because dealers are learning that it is the **ONLY WOOD NEEDLE THAT THEY CAN DEMONSTRATE**

They Do Please the People and Are Easy to Sell

Many a Victrola sale has been made because the Thorn Needle was used in the demonstration. It eliminates all scratching, and no change is necessary in the Reproducer. Thorn Needles are easy to handle. They play several records, and positively do not wear out or injure a record.

Edison dealers in cities and manufacturing towns where extensive business correspondence is carried on, who are not handling

The Edison Business Phonograph

are overlooking the "business end" of the Phonograph business.

See our exhibit at the 12th Annual Business Show, Madison Square Garden, New York, October 22 to 29, 1910. Space 125 in the center of main floor. Edison Night October 26, 1910, including Annual Transcribing Contest and special entertainment in the Concert Room.

When you can show a business man how he can dictate to the Edison Business Phonograph twice as fast as a stenographer can take it—and when you can show him how the stenographer can transcribe from the Phonograph twice as fast as she can transcribe from her shorthand notes, you can show him how to save 50 per cent. of the time that has actually been thrown away in turning out his business correspondence. Any business man knows that time means money, and with the Edison Business Phonograph he

simply cuts the cost of his correspondence in two—or turns out double the amount of work.

Every business man needs the Edison Business Phonograph in his business just as badly as he and his wife and children need the Edison Phonograph in their home—and it's up to you to sell it to him and bring home the extra profits. The whole business world is your field, the game is young and the profits are big. Get in now.

THE TWO BOSSES.

And Two Ways of Doing It—A Story of Comparisons.

I went into a store last week, says Oliver P. Perkins in Buck's Shot, which I have always considered one of the best in Indiana, but it looked so much brighter and every clerk and every one was so cheerful that when I walked into the office I said:

"Well, old man, what card have you been pulling from your sleeve this time?"

He said, "Why do you ask?"

"Because the store arrangement is so new and every one I come in contact with looks good and acts prosperous."

"Am right glad you noticed it," he said; "the story isn't very long, and I don't mind giving it to you.

"One afternoon last week I invited every one connected with the store to meet me in this office at 7 p. m. sharp. When we were all seated I said: 'Well, what would you say if I told you that I had disposed of this old store and would take

charge of a new one?' No one answered for a long time, then one man said, 'I hope that you will take me to the new store.' 'You are to go,' I answered, 'and so are all the rest, and the making of this new store is up to every one here. The new store will be conducted in the present building, and while I'm to be manager you must come to be more and more as if you were my partners. I want your advice and suggestions. When you leave this store to-night I want you to begin thinking on how to make it bigger and better and give me your ideas.' It is working much better than I ever dreamed, and the ginger that is being put into this really new store—well, you noticed it, and that's enough for me.

ABOUT BOSS NUMBER TWO.

The next day I met a man "on the road" whom I have known for a long time. He was in the hardware business as a clerk and proprietor for more than thirty years. He is now over fifty years and is doing his first work as a traveling salesman. "The very hardest thing for me to do," he said, "is to get the price my house demands for the goods. You see, when I was in business I argued that a sale lost was a dollar lost and I always cut the price a little, or as much as was necessary to make the sale, and now it's mighty hard to get the price I ask, for I was never accustomed to doing business that way.

"When my clerks would come and say that Mr. Blank liked a certain range or cornplanter, but would not pay the price and had made an offer, I would say, 'Split the difference if you can; if not, do the best you can.'"

His former reasoning is the real reason that he's traveling to-day.

BIG SHIPMENTS TO COAST.

Pacific Phonograph Co. Get 60,000 Records at a Clip—Also Get 50 Amberolas in One Lot—May Need More Space.

The Pacific Phonograph Co., 818 Mission street, San Francisco, Cal., came very near to breaking records recently when they received 60,000 records in a single shipment, and at a little later date 50 Amberolas. In fact, this company are receiving stock at such a rapid rate, it is a question in the minds of the management whether or not to take over a new floor, thus expanding the storage space.

SUCCESSFUL TALKER CONCERTS.

The Vaughn Music Co., of Norfolk, Va., have been giving daily talking machine concerts which have resulted in appreciable increase in their trade. The concerts last from 8 to 10 p. m., and as they are somewhat of a novelty in that city large audiences are always on hand. Handsome programs, booklets, etc., are given out to all those who attend for perusal at their leisure.

TO EXTEND OFFER TO CANADA.

National Phonograph Co. May Shortly Announce Extension of Proposition to Become Effective Across the Border.

It now looks as though the National Phonograph Co., Orange, N. J., will shortly be able to announce the extension of their combination attachment proposition into Canada. The matter is at present in the hands of the Canadian customs authorities. While it may not be possible for them to ship the packages of ten special records, for use with attachments at present in the hands of dealers or machine owners, at the same prices at which they are billed to the United States trade, they do not expect that the same condition will obtain with complete outfits consisting of attachments and ten special records. The same conditions and restrictions obtain with the Canadian as with the domestic trade, and the same special literature will be shipped with the records. Jobbers will be in a position to fill dealers' orders shortly after Sept. 15.

CHINESE EDISON RECORDS.

The National Phonograph Co., Orange, N. J., have prepared a four-page folder containing a list of 110 Chinese Amberol records of 15 songs—a complete list of all their four-minute records in the Chinese language to date. These records are extracts from well-known Chinese plays and were made by the most popular Chinese actors in the country. While it is not expected that the demand for these records will be large, still it is thought that there must be a considerable field for them wherever a Chinese colony of any respectable size is to be found, for the Chinese are good patrons of native theaters and fond of their national music.

The jobber's salesman is quick to report to his house whether your store is well kept, or filled from floor to ceiling with an indescribable mass.

EDISON

Even without the name Edison, the Edison Phonograph would have enough points of superiority over other sound-reproducing instruments to make it the biggest seller and the one most profitable for you to handle **and push**—the fact that it plays both Standard and Amberol Records, that it is the instrument upon which records can be made at home, that it has the permanent sapphire reproducing point that does not scratch or wear out the records and never needs changing. And **with** the name Edison, the name of the greatest inventor America has ever produced, you have the biggest selling asset you could ask for—every Edison Phonograph you handle is half sold before it enters your store.

Do your part, push it, advertise it, give concerts—let the crowd know you carry the instrument they want—the Edison Phonograph. Write your jobber today.

10 inch 65c. **DOUBLE RECORD DISCS** 12 inch \$1.00

Zon-o-phone Records are pre-eminently the BEST that money, brains, and a thorough knowledge of the art of sound recording can produce.

They are justly famous for their remarkably clear, natural tones, absence of scratch and wearing quality.

The greatest care is exercised in combining the selections, each side of the disc presenting the latest and best in popular music or standard compositions.

The price appeals to the masses, the quality to the classes, making them indeed a popular record at a popular price.

A new catalogue of Hebrew Single Side Selections has just been issued. Solos by Mme. Prager, Mr. Juvelier, Master Mirsky, the boy soprano, and other eminent singers. These are undoubtedly the most perfect Hebrew records ever recorded. 10 inch, 50 cents, 12 inch, 75 cents.

Resolve yourself, Mr. Dealer, into a committee of one and investigate these claims. Consider, criticize, compare. ZON-O-PHONE RECORDS will stand the test. A trial will verify all that we say.

TALKING MACHINES IN NAVY.

With the Enlisted Men of All Grades Sound-Reproducing Instruments Have Become a Virtual Necessity—Great Purchasers of Records—A Special Fund Created for This Purpose—No Old Records Kept in Stock Here—Some Interesting Facts.

By Waldon Fawcett.

There is probably no sphere of our national life where the phonograph or talking machine is a greater factor in the securing of entertainment than in the United States Navy. With officers and enlisted men of all grades sound-reproducing instruments have become a virtual necessity. Such instruments may be found in all navy yards, camps, etc., but as may readily be surmised it is on shipboard that the talking machine has attained its acme of value and usefulness. Indeed, it has become more influential than any other factor—not even excepting the player-piano and the moving picture machine—in amusing and diverting Uncle Sam's sea fighters on their long cruises, and in port and

GETTING OUT RECORDS ON BOARD U. S. WARSHIP.

at sea has proven the prime antidote for monotony and homesickness.

There is probably not one vessel of any size in the United States Navy that has not on board at least one phonograph or talking machine. In some cases the instruments have been donated to the crew, as in the case of the handsome Symphony Graphophone presented to the cruiser Salem by the city of Salem, Mass., but in most instances the instruments have been purchased by officers and seamen by subscription. And because there are many to contribute and because Jack is a liberal spender the ships usually boast the best in this line. On most of the battleships, such as the New Jersey, Vermont, etc., there are Victrolas, and where, as in the case of our newest and finest battleship, the Delaware, we find instead the highest priced horn machine it is not because of a lower purchase price, but because the boys prefer a more readily portable instrument that can be moved up on deck for a concert in fair weather.

As every dealer knows who has succeeded in getting a line on their trade, the bluejackets are splendid customers for records. Collectively the tars show the most catholic taste as to selections, but they do not hesitate at the price of any record that particularly pleases them. Most of the ships have a regular system for purchasing new records from a common fund raised by regular assessment for the purpose, and these records in due course find their way into an exchange system that secures the rotation of the records among all the ships of the fleet. However, any bluejacket on shore liberty

may purchase any record that pleases his fancy, and contributions of this kind come to the record library almost daily. Indeed on some ships so many records are brought aboard by the jackies that it becomes necessary every now and then to toss an accumulation of records overboard simply because there is no room to store them. It appears like wanton waste to a visitor to see perfect records—sometimes hardly worn at all—heaved overboard as food for the fishes, but there is no room to spare on a modern warship, and when the hard and fast limitations of space are reached there is nothing for it but to discard some of the older or less liked selections, even though they are in perfect condition.

THE VALUE OF COURTESY.

Big and Successful Men Realize Importance of Being Courteous at All Times.

Have you ever noticed that the fellows who run most of the big concerns of the country are the ones who always return courteous answers?

If you address the president of a railroad he will listen attentively and make a decent reply. But ask a civil question of a cub at the depot in a country town and you will get a smart and flip-pant reply.

Go into a big city store and ask for the manager; he will talk pleasantly and give you the desired information. But happen to get in the way of the bright young fellow who is washing a window and he will hand you a package that will make your blood boil. Drop around twenty years later and the cub in the depot may have advanced until he is a brakeman on the local freight and the window washer will likely

be driving one of the delivery wagons for the store.

The presidents of railroads and the managers of big concerns are the fellows who in the flowery days of their youth acquired the habit of returning soft and courteous answers. That is one of the reasons they become railroad presidents and managers of big concerns. The cub who knows more than the president and the window washer will still be polishing glass in the Autumn time of his life.

LANGUAGE BY PHONOGRAPH.

Doctor Rosenthal Urges Use of System in the Schools—His Present Method a Success.

Dr. Richard S. Rosenthal, the originator and author of the "Rosenthal Common Sense Method of Practical Linguistry," who has long used the phonograph in his method of teaching languages, says that by his language-phone method he presents the most scientific and practical method of language learning thus far invented.

Doctor Rosenthal protests against the methods used in the teaching of languages in the schools and colleges of this country. He declares that the object of such teaching should be to teach students to converse in foreign languages, and makes the charge that no such training is given. He urges that the phonograph enter the high schools and colleges, and give a speaking knowledge of modern languages to students in return for the

years of effort they expend upon their mastery.

"I hold," declares Doctor Rosenthal, "that a complete mastery of a foreign tongue can be obtained only by training the eye, ear, tongue and memory at one and the same time; the ear, by giving the sound and intonation of every word; the eye, by seeing the spelling; the tongue, by imitating and uttering the words heard, and the memory, by such continuous repetition of the foreign sounds that they will become second nature to the student, so that he no longer thinks about them but in them."

RECORD FACTORY FOR BIRMINGHAM.

New Industry for Alabama City If Plans of Nashville Man Are Developed—Holds Rights for Commercial Output.

(Special to The Talking Machine World.)

Birmingham, Ala., Oct. 1, 1910.

It is probable that a phonograph record factory will be located in this city at an early date. D. T. Blakey, of Nashville, who has several rights in connection with commercial phonographs, arrived in Birmingham recently and was in consultation with real estate men.

Mr. Blakey stated that none of the many details of his work had been completed yet and pending their culmination he would not care to make any definite statement.

"I was en route to Atlanta when I stopped over here," said Mr. Blakey. "I am planning to erect a factory for the manufacture of phonograph records and I am very nearly decided to start in this city. We have several valuable rights and have sufficient money with which to build our plant. We would construct a fine and highly valuable plant and have a very good output. I will confer with some local real estate men and may make a statement of interest within a short time."

VAUGHAN MUSIC CO GIVES RECITAL

Well-Known Norfolk, (Va.) Music House Holding Series of Evening Concerts Which Are Largely Patronized—Getting Results.

The Vaughan Music Co., who handle the Victor and Edison lines of machines and records in Norfolk, Va., have been giving a series of evening concerts which have been largely patronized by Norfolk's leading people. Special programmes, booklets, etc., are given to those who attend and all who have heard these concerts have expressed themselves in a most enthusiastic fashion. This is a splendid means of educating the public to the value of the talking machine, and as a result of their publicity the Vaughan Co. have been steadily increasing their business.

PHONOGRAPH REPLACES FOGHORN.

H. L. Tibbals, Jr., manager of the Union wharf at Port Townsend, near Baltimore, Md., has hit upon an aid to navigation serviceable when the waters are obscured with smoke from burning forests. Mr. Tibbals is using a phonograph to help pilots bring their vessels to the landing. The usual thing is a foghorn, but to-day foghorns were tooted on a dozen vessels lying at anchor near by. The phonograph was highly successful. It is planned to have special records made to belch warning cries over the waters. To-day's warnings consisted of the strains of "Has Any One Here Seen Kelly?"

TO HANDLE ONLY COLUMBIA CO. LINE.

The Will A. Watkin Co., Dallas, Tex., have issued a circular announcing that hereafter they will handle exclusively only the talking machines and records manufactured by the Columbia Phonograph Co., General.

MILWAUKEE TRADE NEWS.

Decided Improvement Reported by Both Jobbers and Dealers—Everyone Seems Satisfied—Stocks Becoming Very Much Depleted—Wisconsin Talking Machine Men Jubilant Over the News That the Jobbers' Convention in 1911 Has Been Secured for Milwaukee—Lawrence McGreal Nominated for Sheriff by Democrat—Talking Machines Installed in Music Department of the University of Wisconsin—Roosevelt Visits McGreal Store—Personal Items Worth Recording—Latest Victor Co. Announcements Please Trade—Grafonolas Much in Demand—Other Lines That Are Drawing Business.

(Special to The Talking Machine World.)

Milwaukee, Wis., Oct. 9, 1910.

Genuine improvement in both wholesale and retail talking machine lines is the report everywhere in Milwaukee. The usual fall revival is taking place in earnest and dealers are more than satisfied. It was feared that because of the depression existing in some lines, that perhaps talking machine sales would not reach the high mark hoped for this fall, but present business is setting all fears at rest.

Practically every retail dealer in the city, as well as the few heard from about the State, say that trade in both machines and records is at least 50 per cent. better than a month ago and decidedly better than at the same time a year ago. The feature of the local trade is the strong demand for high-grade machines, a situation that has long been noticed in Milwaukee. The new October records are proving good sellers.

Jobbers report a most satisfactory trade. Retail stocks all over the State seem to be unusually low and dealers are finding themselves forced to place good orders for the fall trade and later holiday business. An especially good business is looked for in all of the smaller cities and towns of the State from now on because of the fact that Wisconsin crops are turning out to be away ahead of all expectations made earlier in the season.

Talking machine dealers all over Wisconsin are jubilant over the news that the 1911 convention of the National Association of Talking Machine Jobbers will be held in Milwaukee. Leading dealers and jobbers say that every effort will be made to make the gathering a complete success and that Milwaukee's reputation as a convention city will be upheld. When Frank A. Cannon, secretary of the Citizens' Business League of Milwaukee, was notified of the decision of the association to hold its next meeting in Milwaukee, local talking machine men immediately decided to leave no stone unturned in the effort to offer something unusual in the way of entertainment features for the gathering.

At the last convention at Atlantic City, the selection of next year's convention city was left to a postal card referendum vote of the members. Among the cities in the field for the gathering were Atlantic City, Kansas City and Rochester. Milwaukee men have been notified that this city was chosen by a decisive vote. Dealers are giving much credit to Lawrence McGreal, Milwaukee's leading jobber, for landing the event for Milwaukee.

Lorenzo Lambeck, a talking machine dealer of Beaver Dam, Wis., was in Milwaukee recently to attend the funeral of his father, Herman Lambeck, Sr., who passed away at his home in this city.

Lawrence McGreal, Milwaukee's well-known talking machine jobber, was nominated for sheriff of Milwaukee county on the Democratic ticket with flying colors at the recent primaries. The nomination came to Mr. McGreal entirely unsolicited and this fact, together with his great popularity, augurs well for his election this fall. Mr. McGreal figures that his strongest opponent is the Social Democrat candidate, who, of course, will receive the support of the undivided Socialist vote, which means a great deal, considering the fact that Milwaukee now has a Social Democratic administration. It is believed that all this will be offset by the fact that Mr. McGreal is widely and popularly known as one of the most successful business men in Milwaukee, while his integrity is unquestioned.

On several of Mr. McGreal's campaign cards, his face is pictured in the horn of an Edison machine, while he is referred to as "the talking machine man." On the rear of one of the cards a full length picture of Mr. McGreal is given, while underneath is this vote-attracting sentence: "A progressive business man. Not a professional office seeker."

William P. Hope, Wisconsin and upper Michigan representative of the National Phonograph Co., was in Milwaukee recently. Mr. Hope is now working the wagon proposition, offered to dealers by the company, and reports that dealers all over Wisconsin are enthusiastic over this plan, whereby with each order of forty machines they are supplied with a wagon at a nominal rental.

The extension division of the University of Wisconsin, which is accomplishing much by its courses offered about the State, recognizes the value of the talking machine as an aid in teaching music. Two courses in music are now being offered to correspondence students by the extension division, each course consisting of sixteen lessons. The development of an intelligent understanding and appreciation of the best music is the purpose of the first course. How to listen to a concert, how to judge of the merits of the music, and how to pass an opinion on the general performance are the three things receiving special attention in this course and in this connection, the department of music at the university suggests the use of the talking machine wherever possible. The teaching of public school music and the preparation of teachers for this work is the subject of the second course and here, too, the use of the talking machine is advanced where it may be found desirable.

A rapidly increasing demand for Grafonolas is reported by A. G. Kunde, Milwaukee's hustling Columbia dealer. An especially good business is being experienced by Mr. Kunde at this time.

"Our Columbia business is very good, prospects are fine and we are looking for the best fall business in the Columbia's history in Milwaukee," said Mr. Kunde.

Indications are that two new Columbia dealers will be located in Milwaukee during the present month for the purpose of caring for much of the outlying business.

Mrs. A. G. Kunde is again assisting her husband at their retail Columbia store, at 516 Grand avenue. Mr. Kunde was in Chicago this week calling upon the Chicago offices of the Columbia.

The factory plant of the New Idea Cabinet Co. has been moved to larger and more adequate quar-

ters in a building owned by the Milwaukee Journal, on Fourth street, between Grand avenue and Wells street. Two floors are occupied here and a full line of new equipment has been installed. Manufacturing operations are now under way and Lawrence McGreal, one of the members of the company, announces that the company will be ready to ship the new cabinets by Oct. 10. Supt. Jollis is in charge of the new plant and now has a good-sized force of men working under him. Expectations are that the cabinets will be turned out at the rate of 200 each month.

"We have made several improvements upon the New Idea cabinet," said William Schmidt, inventor of the cabinet. "While we are following our original plans, we have made several valuable changes. We are turning out cabinets for all styles of Victor machines, including the new styles, 10 and 11. Demand is strong for the new cabinet and there is every indication that it is going to be a big seller."

George D. Ornstein, manager-salesman of the Victor Talking Machine Co., is in Milwaukee visiting his sister, whose health is very poor at the present time.

Albert G. Kunde, well-known Columbia dealer, 516 Grand avenue, was made the subject of an interesting sketch recently in a series of portraits published by the Evening Wisconsin of prominent Milwaukee business and professional men.

Although Col. Theodore Roosevelt was a busy man when he was in Milwaukee last month as the guest of the Milwaukee Press Club, he found time to visit for a few minutes the talking machine establishment of Lawrence McGreal. The Roosevelt party in automobiles, was passing through the city when the colonel's attention was attracted by the McGreal store and he expressed a wish to inspect the place. The entire party was taken into the retail establishment, now conducted by Miss Gertrude Gannon, sister-in-law to Mr. McGreal, and the colonel expressed himself as delighted many times as he listened to several grand opera records on both the Victor and Edison machines.

L. C. Parker, manager of the Victor talking machine department of Gimbel Bros.' Milwaukee store, is placing all of his orders through the new New York store, considered the largest in the world. This same practice is also being followed by the manager of the talking machine department of the Philadelphia store.

Business conditions are very good, according to Mr. Parker's views, and future prospects are exceptionally bright. He is planning an extensive advertising campaign as a means of bringing his

We Are In Readiness for the FALL and WINTER RUSH ? ARE YOU?

Prepare now to be in a position to deliver the goods and take the profits. Don't delay.

You know what it means to say to your customer "I haven't it in stock, but will get it for you"—the other fellow gets the order. Our stocks of VICTOR and EDISON GOODS mean quick deliveries to you, and profits to both of us.

If you don't know what EASTERN CO. SERVICE is, you don't know what makes the Talking Machine Business a good Business. *Try Us.*

Columbia Phonograph Co., Genl., Tribune Building, New York.

wares before the public eye. The work of installing talking machines in the public schools of the city is being continued with much success. The latest school to be so equipped is the West Division high school, the third high school of the city to purchase a Victor.

According to Milwaukee dealers, the move made by the Victor company in taking up the fibre needle business is one of the best which has been made for some time. Excellent sales are being made of these needles, which are proving exceedingly popular.

"I am looking forward to making some splendid sales in the new hornless Victors, which are being gotten out, and which will sell at \$75 and \$150," said J. H. Becker, manager of the talking machine department of the Hoeffler Manufacturing Co. "These machines will find a ready market, as there are a large number of persons willing to pay at least \$200 for a talking machine outfit, including records."

Mr. Becker recently entertained a number of friends at his home and during the evening seven numbers by Caruso, Melba and Schumann-Heink were given on his Victrola. As a result of this little entertainment Mr. Becker has received numerous inquiries from his friends as to the prices and particulars of the machine. Several sales will undoubtedly be made.

With prospects showing up so brightly, the local dealers are preparing for an unusually heavy run on the high-priced machines. Milwaukeeans seem to realize the great difference between the high grade and cheaper machines and are confining their purchases largely to the expensive instruments.

Several of the local houses are receiving a large amount of mail order business from different points throughout the State and in some cases from far parts of the country. The mail order business is highly profitable and steps are being taken by several of the dealers to extend their operations in this line.

I. J. Kitch, representing the Talking Machine Co. of Chicago, visited the Milwaukee trade recently.

PROMPTNESS IN BUSINESS.

The merchant who develops the faculty of cleaning up each matter which comes before him for attention and getting it off his mind at once enjoys a big advantage over the one who has permitted himself to become accustomed to putting off matters from time to time in the belief that to-morrow he will have more time to attend to things than he has to-day. It is not always possible to take final action promptly on the various problems which arise in the life of every business man, but in the majority of cases a decision can be arrived at on most points now as well as to-morrow or next week. If you have never made any determined effort to acquire the excellent habit of taking definite and prompt action on each matter which comes up in the regular routine of business, it will be well worth your while to give some thought to the question now.

WITH THE TRADE IN CINCINNATI.

General Revival of Business Noted During September—Talking Machine Dealers Well Satisfied with the Outlook—Aeolian Co.'s Exhibit at the Ohio Valley Exposition—Some Handsome Victrolas—"Paoletta" Artists Entertained—Interesting Personalities—Liberal Orders for Columbia Machines and Records—Activities of the Various Dealers—Summary of the Month's News.

(Special to The Talking Machine World.)

Cincinnati, O., Oct. 3, 1910.

There appears to have been a revival of business during September which left the talking machine people in this section of the country in a very good humor with the close of the month. In some instances the dealers found themselves with an inadequate supply of help, this being particularly true with the coming of the Edison list for October, which was placed on sale September 24.

Packed four or five deep in the north aisle of the Liberal Arts building, of the Ohio Valley Exposition, which recently closed in this city, might have been found, from early morning till night on any day, a dense throng of music-lovers who stopped to hear the concerts which were given at the Aeolian Co.'s booth, which contained what is, perhaps, the most complete and finished display of automatically played musical instruments ever shown in Cincinnati.

The Steinway grand Pianola piano was without doubt the most interesting of all the instruments shown, for it was the first Steinway Grand with a player mechanism installed in its case ever exhibited in Cincinnati, having been sent here from the Aeolian factory in New York for the express purpose of being displayed at the exposition. In addition to the Steinway grand Pianola piano and Steinway upright Pianola piano, there were to be seen the Weber grand and upright Pianola piano, the popular-priced Technola player and quite a number of the latest Victrolas.

The Victrola, in a case made from Moorish design, inlaid with thousands of pieces of silver, pearl and ivory was an object of a great deal of interest. Other Victrolas were in mahogany, Circassian walnut, oak, and, to cap the climax, there was one in pure white, trimmed in gold striping, which was very much admired.

W. O. Black, manager of the Cincinnati branch of the Aeolian Co., with his corps of able assistants expended their entire days explaining the instruments to the exposition visitors.

The Rudolph Wurlitzer Co. so far have secured some nice orders for the new style Victrolas from their various dealers, and indications are that they will be popular.

Prof. Gautvoort, of the College of Music, entertained the artists who took part in the opera "Paoletta," the remarkable production given during the entire time of the Ohio Valley Exposition, with an evening with the Victrola. Such singers as Bispham, Nielson, Carl Gautvoort and others were present, who unanimously voted the Victrola not only a most exquisite entertainer, but of great usefulness to the student.

The many friends of Joseph H. Dittrich, manager of the Wurlitzer talking machine department, will be sorry to hear that he has been ill and unable to report for work for the past several weeks. Thurse Sigman is in charge during Mr. Dittrich's illness.

Manager R. J. Whelen, of the Columbia Phonograph Co., is highly pleased with the way Fall business has started in, and reports a general increase of business in all departments. He made the following statement:

"The dealers are ordering liberally for their Fall trade of both machines and records and, as predicted, the Grafonola 'Mignon,' also the BNWM and BZ graphophones, have sold beyond our supply and we are awaiting shipments from our factory to fill our orders. Dealers are sending in their orders ahead of time, anticipating their demand, so they will be sure to get what they want and have it when they want it.

"The new records by the 'Archibald Brothers Quartette' are attracting much attention and many purchasers pronounce them the best quartette records they have ever heard.

"Retail and installment business are holding their own satisfactorily, and we show a substantial increase over September of last year.

"Taking business as a whole, it is good, and we predict as the Fall comes on it will be better and a record breaking business will be done in all departments."

The new firm of Krolage & Groene intend to reduce their supply of talking machine goods to that of a retail dealer. It found that the Groene Co. carried a wholesaler's lot, which is unnecessary in view of the plans of the company.

Geo. P. Gross, Main and Woodward streets, who has a supply of talking machine goods, found but little demand during September, which he claims is due to his having devoted most of his time to the sale of pianos.

John Arnold, of Fifth and Elm streets, is enthused over the September results. He had a rush business during the entire month, particularly during the latter part, when the new Edison list made its entrance. He has many prospects in sight and looks forward to an ideal business this Fall.

J. E. Poorman, Jr., of Main street, experienced a quiet September, but has not lost hopes.

The Miner Musical Co., West Sixth street, which is now in charge of Raymond Stotler, have made some minor changes in their selling forces and are preparing for a busy Fall season.

The Lyric Piano Co.'s "talking machine shop" ought to have been in operation before this, but Manager Stever has had some difficulty in making the necessary changes. He now has a sound-proof booth, 12 by 35 feet, and expects to be ready for business before October 15.

Keeping the stock in good condition is a very important asset. Plenty of "elbow grease" behind the broom, the duster and the cleaning cloth will do wonders towards bettering the appearance of things, consequently more sales, as the clean stock will help sell itself.

TRADE NEWS FROM THE QUAKER CITY

Talking Machine Business in Healthy Condition—Proves Best Month of the Year—What the Various Houses Report—L. Buehn & Bro. Lease Adjoining Store—National Co.'s Plan for a Phonograph Store on Wheels—Busy Times at Columbia Headquarters—Increase in Sale of Cavalieri Records—Penn Phonograph Co. Enlarge Office and Rearrange Store—Some Recent Trade Visitors—News of the Travelers—Other Items.

(Special to The Talking Machine World.)

Philadelphia, Pa., Oct. 10, 1910.

The talking machine trade of Philadelphia is in the most healthy condition at the end of September. All the dealers, without any exception, affirm that it has been the best month they have had this year, and one of the best they have ever had, with the prospects for the remaining three years as most encouraging. There has not alone been a most satisfactory volume of business, but the class of business has also been of the encouraging character, the style of the instrument being of the higher grades, higher on the whole than during any previous year.

Louis Buehn & Bro. report that their business has been fine. Mr. Buehn says: "I have about doubled the business of last September, and I look for a big business from now on until the end of the year, thereby making a record-breaker. The sales seem to be on the higher priced machines. We have sold quite a few Victrolas this month, as well as several Edison Amberolas, and quite a few of the new Model E, Edison Triumphs, a Triumph machine with the new equipment.

"Our business has been so good that I have rented the store next door and will entirely rearrange our business." A large archway is being cut between the stores, and this will give the firm double their present space. They will rearrange their present first floor and turn it into a retail salesroom entirely. They will bring their business phonograph headquarters from Walnut street to the present building, where they can give it their close attention. The offices of the firm will be in the new building and the basement of the two stores will be used for storage purposes. The numbers after the first of October of the Buehn store will be 41 to 45 North Ninth street. By the 15th of the month they expected to be entirely finished with all their improvements.

Edmund Buehn is going away in a day or so for a trip through the southern part of the State, and R. J. Dungan left on Monday to go over the territory of the house in the Lehigh Valley.

Frank Stanton, of the National Co., has been in Philadelphia on a special wagon proposition for his company. Mr. Buehn is of the opinion that he presents a very clever scheme for the selling of Edison machines. Briefly, the scheme is that the Edison Co. supply a dealer with a wagon thoroughly equipped for the selling of phonographs and records. It is leased to the dealer at \$4 a month, and the dealer, accepting the proposition, has to go and hustle for business from the wagon every clear day except Sunday for a period of six months, and in order to obligate the "taker" to work he must purchase an initial quantity of forty machines. It simply creates a phonograph store on wheels. "To my mind," says Mr. Buehn, "it is going to be a big business producer."

Since writing the above I have just heard that Mr. Stanton succeeded in interesting in his scheme for the National Co., three Philadelphia firms Messrs. Louis Buehn & Bro., the Penn Phonograph Co. and H. A. Weymann & Sons

Harry C. Lansell, the new outside manager of the Heppie talking machine department, arrived in Philadelphia on the 26th of September, and after briefly looking things over started out on a trip through the southern territory of the firm, going as far south as Washington. Mr. Elwell, who is in charge, says that the Heppie talking machine business in September was fine. They have no kick coming whatever. They considerably exceeded their September business of 1909. The Heppies

have made many improvements in their record business of late and have it now so arranged that there is never any possibility of complaint from customers as to imperfections or marks on the records sent out.

The Victor Co. announce that between the 1st and 15th of the month they will put three styles of Victrolas on the market. They have had two heretofore. The new styles will be Nos. 10, 11 and 14. They will retain the old style, No. 16.

Manager Henderson, of the Columbia Phonograph Co., had a busy week last week visiting in the various counties of the State where county fairs were being held. He reports that business was very good in September and that it showed a very handsome increase over last year, and a very handsome increase over every month since March. George C. Jell, secretary of the product department of the Columbia, was in Philadelphia last Monday for the purpose of listening to a new singer with whom they are negotiating. John A. Wuchter, of Egypt, had a very fine exhibition of the Columbia records at the Allentown fair last week, and Mr. Henderson was up assisting him. Their Reading agents, Messrs. W. S. Hollenbach & Co., had a fine exhibit at Reading Fair. Robert B. Robinson, of the Columbia road force, is on the road at present through the State and has been doing a very fine business, and Mr. Henderson expects to spend several days this week in Harrisburg, where their representative, Joseph Goldsmith, will have a very fine opening of a Columbia phonograph department on the 6th of this month.

Since the recent Cavalieri-Chanler affair, the Columbia Co. note a large increase on the Cavalieri records. The firm gave a fine concert the other day for the Philadelphia Chapter of the American Institute of Banking at the American Baptist Publication Co.'s building, and they are negotiating for a number of other concerts. O. C. Dorian, the assistant manager in Philadelphia, paid a visit to the factory at Bridgeport, Conn., last week in company of L. L. Goodwin, of this city, with whom the Columbia Co. have just closed a large order.

He has a very fine establishment at 327 Girard avenue.

H. A. Weymann & Sons have the same report as given by the other dealers—that they had no kick coming whatever regarding their business in September, and that October has opened up in a most encouraging way. They have rearranged their record stock and have all of it enveloped now. They are patiently waiting a consignment of a carload of brand new cabinets now on the way from Michigan, and expect very good results in the new styles of Victrolas, which are due almost any day. Norbet Whitely left last Monday to cover his southern Pennsylvania trade for the house, and W. H. Doerr will leave at the end of this week for his first October trip through New Jersey.

The Penn Phonograph Co. have considerably enlarged their offices and otherwise improved their place, including the rearrangement of their booth. Now they are waiting patiently for the paper hangers and painters to finish their work and make their warerooms as fine as anything in this city. They report that their business was very fair in September—much better than it was last year. T. W. Barnhill is taking his southern trip for the firm; L. T. Stewart is calling on the trade up the State, and Ralph Clarke leaves this week for a trip up the State.

E. E. FORBES CO.'S GOOD TRADE.

Enjoy Heavy Business in Victor Line in Montgomery, Ala.—Some Recent Sales.

The E. E. Forbes Piano Co., of Montgomery, Ala., are doing a splendid trade in Victor machines, and recently disposed of a handsome Victrola to James Hickey, of the Exchange Hotel, for use in that hostelry, and a Victor Auxetophone to the Lyric Theater, which will be used as a means of entertaining the audience and thus replacing the orchestra to a large extent. C. T. Turner, manager of the talking machine department, is making a great success of this branch of the business.

Won't You
Have a
Lesson in
Spanish?

It's so easy to learn by the I. C. S. system—and a knowledge of Spanish is so useful nowadays.

The I. C. S. system of language instruction by means of the phonograph makes easy the mastering of a foreign language, and appeals with compelling power to thousands. The dealer in phonographs who does not carry I. C. S. Language Outfits is neglecting a quick and sure way to increase his business. The new \$35 Language Outfit of the I. C. S. is a marvel. It represents the highest art in the teaching of languages, and embodies a method that has won the warmest praise of thousands qualified to speak authoritatively. The Spanish, French, and German Embassies at Washington, as well as the leading colleges, have cordially indorsed the I. C. S. method of teaching languages.

The I. C. S. Language Outfit consists of an Edison Gem Phonograph made especially for language work; small horn; headband hearing tube; oil can; and 25 Conversational Records teaching pronunciation guaranteed to be absolutely correct, with native intonation and inflection. In addition to these Conversational Records there are pamphlet Instruction Papers teaching the theory of the languages. The new Outfit is at one and the same time the best and cheapest ever offered—the price being only \$35.

If you want to increase your business, write to-day for full particulars.

International Correspondence Schools

Box 918, Scranton, Pa.

Thomas A. Edison invented and perfected the Edison Phonograph and 90,000,000 people know it—
Think what that means to you!

IF THERE were not another thing to talk about, the fact that Edison invented it would stand as absolute assurance to 90,000,000 people that a better sound reproducing instrument could not be produced.

That fact alone is as big a selling point as you could have. Bigger than any other sound reproducing instrument can offer.

If you are not pushing the Edison to its utmost you are overlooking generous profits on your share of the 90,000,000.

National Phonograph Co., 59 Lakeside Ave., Orange, N. J.

As the 90,000,000 people would naturally expect, Thomas A. Edison's instrument gives twice the entertainment of any other

for it is the instrument that not only reproduces the best of every character of entertainment, from vaudeville to Grand Opera, from the shortest selections to the longest, as originally meant to be rendered, on both Edison Standard and the long playing Amberol Records—but it is the one instrument on which records can be made at home—the greatest entertainment that a talking machine has to offer.

If you are not working this home recording feature of the Edison Phonograph, you are playing the game with one eye shut. Write your Edison jobber to-day.

NEW YORK, OCTOBER 15, 1910.

BUSINESS conditions in all sections of the country have shown a gratifying improvement during the past month, and the outlook for the fall and holiday trade is excellent.

Good crops and the general employment of labor have resulted in plenty of money being in circulation, and it is now up to the talking machine dealer to get his share of it.

The most essential requisite in this connection is having sufficient stock in hand to meet trade demands.

Dealers should not allow themselves to be caught short as they were last year and the year before.

It is impossible to expect manufacturers to carry sufficient stock to meet holiday demands unless they are apprised at an early date, in the way of orders, as to expected demands.

KEEP in mind that the holidays are not far away and that no other instrument on the market will win the favor of the purchasing public around that period as will the talking machine.

The prospects at the present time incline one to the belief that the high priced talking machine will continue to be a great favorite and there evidently will be some large sales in the special designs.

The dealer is wise who has stocked up early. In this respect he is fair to himself and fair to the manufacturers.

On the other hand, the dealer who has not made preparations for a big season's business is indifferent to, or negligent of, his interests. Such a man is evidently not in touch with the trade or its requirements.

Little wonder that trade passes his doors and goes to the live, energetic dealer a block

away, who has taken pains to increase public interest in talking machines by concerts, advertising and other methods of concentrating attention on his enterprise.

BUSINESS is not like backing horses. The man who wins in business wins because he has deserved to win; the man who loses, does so because he deserves to lose.

This truth may not always be obvious, but it is none the less the truth. Of course, the unsuccessful man won't admit it. It would be better for him if he did, for then he would seek for the deficiency in himself which brought about his failure and strive to eliminate it.

It is the old principle of the survival of the fittest. The fittest is the man of pluck, with strong belief in his own powers and a keen energy to seize every chance.

The man who believes in luck would probably be more profitably employed in backing horses, where his peculiar talents would have more play.

MANUFACTURERS to-day are doing their utmost through a liberal use of all the public mediums to interest the public in talking machines and the dealers themselves should supplement this work by aggressive local advertising and other means of publicity.

It will pay to place emphasis on the talking machine as a holiday factor.

But, as before remarked, all the advertising in the world amounts to nothing unless you have the stock. And you cannot have the stock unless you order early. Therefore, do not be caught napping.

The holiday trade for 1910 will be a record breaker in many respects because an increasing interest is manifested in the talking machine, which to-day is one of the most wonderful creations of the century.

A GREAT many talking machine stores are continually changing help, the reason being, presumably, that it is difficult to obtain satisfactory sales people.

In a great many instances the reason for this condition lies with the management.

In the first place the business policies which employes are supposed to carry out are not thoroughly explained to them.

No special pains are taken to impress the details upon the minds of the sales people. Their co-operation is not asked, and it is hardly possible to expect them to know these things instinctively.

The sales force cannot interest the public in the goods which they are selling unless they themselves are interested. Therefore, they should know everything possible about them.

THE literature which manufacturers send out at great expense should be passed around with a request to read and digest instead of, as in many instances, being consigned to the waste basket.

Articles of interest in The Talking Machine World might be marked and passed around for the benefit of the sales force. In

other words too much cannot be done to add to the knowledge of the sales staff so as to make them interested in the products which they are selling. The strong points of every instrument handled should be explained. And the same applies to records.

The necessity of a salesman asking questions of somebody higher up regarding machines or records is undoubtedly a sign of weakness, and doesn't add to the reputation of the store.

People are always anxious to do business with houses where it is "easy to shop," where the sales force are intelligent, well informed and courteous.

HAS it occurred to you how much easier a great many proprietors of stores can effect a sale than some of the salesmen? The reason is obvious—they know what they are talking about.

There is no question but that a methodical, careful instruction of the sales force cannot fail to augment sales and prove helpful in many ways.

It is an important adjunct to the policy of publicity.

And while advertising may bring people to your store, an incompetent sales force may drive them away; therefore, the progressive dealer should make it a point to get his entire working staff together at stated periods, when an interchange of views may take place, all bearing upon the business and with the common end in view of welding the sales force into an harmonious whole.

In this way the young men are able to absorb a great many valuable ideas from the veterans of the business. Their mental scope is broadened and they become worth more to their employer as well as incidentally increasing their earning capacity.

IT will pay to make every customer that comes into your store feel that his presence, as well as the business that he does with you, is necessary to your success. Enthuse him with cheerfulness and bright prospects for the future, and at all times see that he receives attention and courteous treatment. Gain his confidence and never betray it. Remember that it is the man behind the gun, and not the gun, that wins the battle.

GOODS and prices are not all that go to make up a successful business.

People nowadays like to trade at a store that is up to date in business methods; one that has a system of arranging and displaying goods artistically; a store that has a reputation for being strictly honest and honorable in all its dealings, and a store whose reputation and character stands for something more than dollars and cents.

PLUCK wins! It always wins! Though days be slow, and nights be dark 'twixt days that come and go. Still pluck will win; it's average is sure; he gains the prize who will the most endure; who faces issues; he who never shirks; who waits and watches, and who always works.

DEVELOPMENT OF THE EXPORT TRADE

How the Various Talking Machine Manufacturers of the United States Are Reaching Out Into New Fields and Gaining Recognition for American Machines and Records in all Parts of the World—Special Attention Being Paid to South America—Some Interesting Phases of the Foreign Business Illustrated—Enterprise and Ability of Those Sent Upon Recording Expeditions to Distant Lands—Talking Machine Enthusiasts Found in the Wilderness.

The various manufacturing companies are giving a great deal of time and attention through special departments to the development of the export trade. The European business is covered by local companies or by mutually beneficial trade arrangements so far as American goods are concerned, and the foreign department of The World reports the current news of the trade as events occur. What is of direct interest here is the expansion of business in other parts of the world, particularly in the Spanish-American countries.

HAWAIIANS DANCING ONE OF THEIR ANCIENT TRIBAL DANCES TO THE MUSIC OF A VICTOR.

A great deal has appeared in these columns respecting the introduction and permanent endorsement of the talking machine in Mexico, where the National Phonograph Co., Columbia Phonograph Co., Victor Talking Machine Co. and the Universal Talking Machine Mfg. Co. are established on a substantial basis, with yearly increasing quantities of machines, records, etc., being shipped. The same is also true of the Central and South American countries. A great deal of enterprise and ability of a high order is shown in looking after the growing trade. The masterly recording of native talent, a close study of local conditions, desires and de-

mands, with travelers of experience to visit the leading cities, call on jobbers and dealers and introduce their goods with finesse and exploit them with energy by the creation and maintenance of adequate representation, are a few of the means by which the American manufacturers are gaining a foothold in this section of the globe. The same methods are also pursued in the Orient.

To be sure, the competition of German, French and English manufacturers is met, but the quality of the goods differs so materially that the American products have no great difficulty in holding their own against all comers, excepting sole consideration, where price is the factor. Indeed, it is very gratifying to record that the merchandise originating in the States stands deservedly high in the estimation of the Spanish-American dealers and the public at large. This is due to the great pains taken and the use of the best material in the manufacture of the goods.

An article on the "Marriage of Modern Music and Mechanics," appearing in the August issue of America, a handsome monthly published in the Spanish language and issued in New York to further the export interests of the United States in Latin America, and which is written for the consumer and in no technical vein, but more as an appreciation, says in part:

"The slowest of all the arts to admit of change, to accept the new, to adapt itself to the modern conditions which surround it, is music. Thus, no matter how scornfully the musician of yesterday laughed at the mechanical contrivances devised to broaden and make permanent his art, no matter how vigorously the devotees of older schools ridiculed the talking machine in its early days of imperfection, we are already watching the dawn of the day when the talking machine shall become as inseparable a part of art as the violin, the piano, the orchestras or the vocal efforts of the great operatic artists. The talking machine is here to stay against a storm of opposition from musicians, against an apathy on the part of the general public even harder to overcome. It has struggled past its own difficulties, has crossed the obstacles placed needlessly in its path by those who might gain the greatest benefit from it, and has won a place in

THE VICTOR REPLACING THE PRAYER WHEEL IN THIBET, ASIA, WHERE PRAYERS ARE CONVENIENTLY SAID BY MACHINERY.

the world which no amount of conservatism, militant or otherwise, can ever take from it.

"The talking machine, since its first invention, has passed through many vicissitudes. Mechanical imperfections in the crude original devices produced a harsh, unpleasant sound, a nasal or metallic twang, which very naturally shocked the trained, discriminating ear; but these defects were only mechanical, and were easily overcome by purely mechanical means. Indeed, in its essentials the device of to-day is identical with that with which Edison first astonished the world so many years ago. Of course, improvement after improvement has been added to the original machine, and all the power of money and science has been brought to aid in the elimination of the defects which characterized it, so that to-day it may be stated as axiomatic that between the original rendition of a song and its reproduction on the finest grades of records there is practically no choice.

"The talking machine has done for vocal and instrumental music even more than the player-piano has accomplished for that instrument; for it presents in combination the song of the singer and each individual note of the huge orchestra precisely as they were originally rendered, permitting of combinations which are, of course, impossible to the mechanical player of the piano itself. Moreover, the talking machine is so exceedingly low in price that it is within the reach of even the poorest household, satisfying the artistic hunger of the souls of the poor as nothing else could accomplish that end.

"One of the men most intimately familiar with the talking machine in its various stages of development, and who has done as much, perhaps, as any other person toward its introduction all over the world, told the writer not long ago of an incident of his personal experience. He was traveling through the foothills of the Chilean Andes, and in the course of his wanderings stopped over night with a poor farmer of the vicinity, whose privations were evident at a glance, and who lacked most of the ordinary comforts of the modern home. By some means or other, however, the scanty resources of the household had been stretched to admit of the purchase of a crude talking machine, with one or two records of good music, to which

ORCHESTRA USED BY THE COLUMBIA PHONOGRAPH CO IN THEIR RECENT RECORDING WORK IN HONG KONG, CHINA—THIS COMPANY HAVE ALSO MADE AN EXTENSIVE LIST OF CHINESE RECORDS IN SWATOW AND AMOY DIALECTS—PHOTOGRAPH SHOWS HARRY L. MARKER, THE RECORDING EXPERT, AND JOHN H. DORIAN, WHO IS REPRESENTING THE COLUMBIA PHONOGRAPH CO. IN THE ORIENT—FURNISHED EXCLUSIVELY TO THE WORLD.

Remember
The U-S
is Complete

THE U-S Line is an all 'round Phonograph proposition. It will pay you an unusual profit on your sales of machines, and the record sales will prove a continual source of further profit.

You cannot estimate the great advantage to be reaped from the various mechanical improvements which stamp the

U-S Combination Phonograph

with the order of highest merit.

Consider the **Automatic-Change Reproducer Carriage**, which, by its instant adaptability to a two or four-minute record, makes this machine by far the most convenient to operate, and by its **enlarged diaphragms** and **accurately fitted sapphires**, gives music detail and definition unapproached by any other phonograph.

Consider the **Mandrel Pulley Balance-Wheel**, which automatically corrects every variation in speed of the motor, and which is the only means yet developed of obtaining a reproduction true to pitch.

And last, but by no means least, consider the **Flexible Tone-Arm**, the most important improvement in phonograph construction since the introduction of the U-S Automatic Reproducer Carriage. Remember that you can get these improvements **only on U-S machines**.

Remember, too, that there is a U-S Phonograph to fit every pocketbook. There are low-priced U-S Phonographs, as well as more expensive models.

The U-S line is complete, and the profits are waiting for you.

U-S PHONOGRAPH CO.

Remember!
U-S Line
Complete

U-S Everlasting Records

sound so much better than other records, even when played on an ordinary phonograph, that they are invariably preferred to any others. Moreover, they will not break, nor crack, nor wear out with continued playing. This gives you a market with every phonograph owner in your locality.

But—the improvement is so much the more marked when U-S Records are played on the U-S Machine, that your customers—who want the best—will want to own U-S machines.

Thus our proposition works both ways—to the dealer's advantage every time.

Can you conceive of a better balanced proposition than this? Or one which will give you a like opportunity to build a big business for yourself?

Sign the coupon and get in touch with us at once. Do it to-day.

Columbia Grafonolas, Columbia Graphophones, Columbia Double-Disc Records, and Columbia Indestructible Cylinder Records, with Columbia exclusive selling rights, take you out of the "also-ran" list and give you the distinction of being the only starter.

Columbia Phonograph Co., Genl., Tribune Building, New York.

the family listened with never ending delight. The man of whom I speak was touched at this evidence of artistic sensibilities and desires amid such unfavorable surroundings, and upon his departure insisted on paying extremely liberally for his accommodation. The farmer at first was exceedingly unwilling to accept any remuneration whatever for the hospitality which he had so willingly given, but was finally prevailed upon to take what the traveler offered. Some weeks later it happened that the traveler returned to the same vicinity, and although he did not intend to repeat his visit, he happened

of the soul, to echo round and round the world, instead of being confined to some small hall or a few favored individuals.

"The telegraph, the telephone, the railroad, the steamship, and soon the airship, have welded the nations of the world together in a political fraternity impossible under the old conditions of isolation and misunderstanding. When people know one another they do not quarrel, and when nations speak continually with one another, when they meet and mingle on a common footing, war must disappear.

"What these inventions have done for political progress the talking machine and the player-piano are doing to-day for art, enabling the peoples of the world to understand and appreciate the genius of the great men of each."

The accompanying photographs, unique in their character, were furnished America originally by the Victor Talking Machine Co., to whose courtesy *The World* is indebted

for the cuts. They illustrate most graphically the fact that the talking machine is known in the uttermost parts of the world, and among the savages and half-civilized races it is regarded with a degree of veneration, of wonder and even awe approaching the religious.

BETTER IN BUSINESS.

Merchant of To-day Has Fewer Bad Habits During Business Hours Than Predecessors.

A merchant who has been in business in New York for many years declares that he must commend the present generation of business men as being in a number of ways an improvement on their predecessors.

"They do not drink in business hours," said he. "They do not keep a bottle in the cupboard with which to treat their out-of-town customers, as was done when I was a boy. Nor do they go across the street to see a man three or four times a day, as was the almost general custom once. They do not chew tobacco, and smoking in business hours is not nearly so universal. Nor do they wear long whiskers, and this I consider one of the greatest improvements of all."

The Barrows Phonograph Co. have opened an up-to-date establishment at 144 Orange street, New Haven, Conn., and will feature the Edison line of phonographs and records. A number of sound-proof booths have been arranged for the convenience of their customers.

P. H. CROMELIN SAILS FOR ENGLAND.

Vice-President of Columbia Phonograph Co., Leaves on Short Notice to Watch the Progress of the New Copyright Bill That Has Been Framed Up by the British Government—How Mr. Cromelin Regards the Matter—His Good Work in Mexico.

In view of the fact that a new copyright bill has been framed by the British Government to be introduced into Parliament on its reassembling, Paul H. Cromelin, vice-president of the Columbia Phonograph Co., General, sailed October 4 for Europe, on short notice, aboard the "Kaiser Wilhelm II," of the North German Lloyd line, to watch the progress of the measure. He may be away only for a short time, and again may stay abroad indefinitely.

In speaking of this trip previously to *The World* Mr. Cromelin said: "I had not the slightest idea of going abroad, but the company suddenly decided that I should go at once so as to be in London at an early day, and be on the ground pending the introduction of the new British copyright bill, which has been prepared and will be introduced into Parliament in November as a government measure. The bill is broadly inequitable to the talking machine and automatic instrument manufacturers. No compulsory license is provided, although the acts passed by the Congress of the United States and the German Reichstag included this provision, and it was believed Great Britain would follow their lead.

"I shall watch the progress of the bill, and do what I can to secure such privileges as we deem we have a right to in view of the great development of the talking machine business as a valuable addition to the spread of intelligence and its great educational value, especially from a musical point of view. Therefore, if I can accomplish what I am after in a short time I may be in London possibly a couple of weeks only. If not I shall probably remain there until the passage of the bill.

"Though Great Britain was a signatory of the Berlin convention, no country was bound by the agreement entered into there by the governmental participants until it was formally and officially recognized by the various powers. This required the passage of a law for this purpose, and as yet Great Britain has not done this, although the convention was supposed to go into effect July 1, 1910, or as soon thereafter as each government affirmed its approval."

Mr. Cromelin, it will be remembered, was in Berlin, Germany, during the sessions of the copyright convention, though in an unofficial capacity, but as representing the Columbia Co., and incidentally the American talking machine trade. He accomplished a great deal. Recently Mr. Cromelin was in the City of Mexico, where he also gained a signal victory in a copyright case of interest to the talking machine trade of the entire world.

The Forbes Talking Machine Co. have opened a store at No. 409 Fifth street, Sioux City, Ia., in charge of Lawton Wyckoff as manager. They will handle the Edison and Victor machines.

THE VICTOR IN THE SANDWICH ISLANDS.

upon the farmer, his former host, at the nearest railway station. With the money which had been given him this unlettered farmer had gone to Santiago and there purchased as many records for his machine as the sum would allow, and he insisted upon the traveler returning with him to his home to share in the pleasure of the family at hearing the first repetitions of these additions to their repertoire.

"The scornful critics of the talking machine may say what they will against it, when through its means in the great art centers of the world and in small mountain cottages ten thousand leagues away from them, the great heart of the race throbs under the echoed strains of some divine melody. In the great hotels of London, Paris and New York huge phonographs have been installed to render splendid music for the diners. Often shrewd critics are deceived at the first experiment, and start up in wonder as the well-known voices of famous artists seem to come from behind the screen of potted plants, and there are many cases in which these skilled judges have refused to admit that the talking machine was what they had heard, and insisted that by some shrewd deception the artist himself was present, and that it was his voice they had heard.

"The world moves on, and to-morrow what we admit to-day reluctantly and against our innate conservatism will be accepted as a matter of course; and perhaps our children will smile over the absurd idea that it ever appeared necessary to call attention to the value and wonder of the devices which have made it possible for music, that solace

TRADE HAPPENINGS IN LONDON.

Trade Conditions Improving Steadily in Every Line—All Grades of Machines Find Favor—Labor Troubles Have Little Effect on Business—Thos. Graf's Visit to Orange, N. J.—What the Various Record Lists Have to Offer for the Month—Hope for Visit from Edison—The New "Colonial" Record—W. B. Manson's Son Honored—J. E. Hough's New Disc Record—Another New Disc in Preparation—Geo. Robey Co., Ltd., the Latest—J. G. Murdock & Co.'s Large Line—A Visitor from Africa—The 120,000 Record Order—Record Nightingale's Song—Details of the Speaking Arc—Columbia Co. to War on Price Cutting—Pathephone Concert in Theatres—Entire Opera of Faust in Gramophone Records—Edison's Talking Pictures Arouse Interest—News of the Month From the Provinces.

(Special to The Talking Machine World.)

London, Eng., Oct. 6, 1910.

Trade conditions in this city continue to show a steadily increasing improvement along every line, and unless the unforeseen happens we are in for a real good season. Dealers are now stocking-up on the lines they will handle, and the factors are very busy executing these orders. As a direct consequence most of the manufacturers are wearing the famous "smile that won't come off," for nothing pleases one so much as to be kept busy acknowledging the receipt of orders. While the higher price goods are holding their own well, there certainly seems to be an extra rush on cheap stuff. I do not mean to imply by this that it is rubbish. Quite the contrary, in fact, for there are a large number of really very satisfactory instruments sold in this country from 25s. to 30s. wholesale. The medium priced article, of course, leads the way, and it is to the advantage of dealers to bend their energies in this direction.

We do not expect to feel any adverse effects from the labor troubles now rampant in a few provincial centers, since they are but local affairs and will not be likely to cause any disturbance of talking machine trade in this city.

Another welcome feature is the expansion of our export business. Manufacturers would seem to be paying greater attention to the cultivation of such markets as Australia, New Zealand, India, South Africa, etc., to which countries especially the dispatch of repeat orders is of daily occurrence. These fields offer enormous scope for the development of trade in goods from this country, and there are yet ample opportunities for enterprising houses to build up a large connection with these oversea markets.

Big Things Coming from the National Co.

If the departure of the mails coincided with our convenience I should have had time to interview the European director of the National Phonograph Co., Thos. Graf, and post the result for publication in our last issue. As it was, the force of circumstances under which, etc., compelled me to reserve the good news until now. Perhaps I had better explain that the whole point centers around Mr. Graf's recent visit to Orange, N. J., and the outcome thereof. Lengthy were the consultations with the Edison officials on your side, not to mention the great wizard himself, for there are startling developments afoot, of which, however, I am precluded from discussing pending the completion of certain minor touches to several new things Mr. Edison has brought forward. But they won't be long, depend upon it, for he gets there every time. Let it suffice then for the present to say that the company have in hand not only important improvements, but entirely new and original products also, one of which, I am permitted to say, is a new tone amplifying device constructed along lines enabling it to be easily attached to every existing model of the Edison phonograph. The device is said to increase the volume of a record almost to any extent desired, without sacrificing the quality, and in Mr. Graf's own words, "no one could desire anything louder or more natural than this device accomplishes."

Although not definitely settled, Mr. Graf was able to impart the welcome news that Mr. Edison will probably pay a visit to these shores next year, in which event, let me add, one can imagine the stir the presence of the great inventor himself in our midst will cause. And with that let us "wait a little bit," as Prime Minister Asquith would say.

Gramophone List for October.

The October supplementary list of Gramophone Records is a specially fine one, and includes two new records by Caruso—"Studenti Udite" and "Non Chiuder," two gems from Baron Franchetti's "Germania," magnificently rendered, as usual. Other splendid selections in this list are as follows: "Cornelius March" (Mendelssohn); "Fanfare and March of the Silver Trumpets" (Viviani); "Crown Diamonds Overture" (Auber), and (a) "Serenata" (Moskowski), and (b) "Pastorale" ("Philemon et Baucis"), (Gounod), by the band of H. M. Coldstream Guards; "Irish King March" (Pryor), Black Diamonds Band; "My Lagan Love," John McCormack; "Your Eyes Have Told Me So" (Carr Hardy), Evan Williams; "It Is of the Lord's Great Mercies" ("Abraham"), (Moliqne), duet by Messrs. Evan Williams and Robert Radford; "I Seek for Thee in Every Flower" (Ganz), and "Take a Pair of Sparkling Eyes" (Sullivan), John Harrison; "Love Could I Only Tell Thee" (Capel), Robert Radford; "The

Lowland Sea" (Eric Coates), Harry Dearth; "How Lovely Are Thy Dwellings" (Liddle), Miss Perceval Allen; "Should He Upbraid" (Bishop), Mme. Jones-Hudson; "The Sailor Sighs" (Balfe), Miss Edna Thornton and John Harrison; "O, Who Will O'er the Downs So Free" (Pearsall), Miss Perceval Allen, Miss Edna Thornton, Messrs. John Harrison and Robert Radford; "Up She Goes" (Mills and Bennett Scott), Whit Cunliffe; "Salalatto Caprice" (A. Randegger, Jr.), (violin), Francis Macmillan; "Novelette, op. 21, No. 7 in E major" (Schumann), Herr Backhaus, and "Fun in a Barber's Shop" (banjo), (Winne), Vess Ossman.

In addition to the foregoing, other current impressions listed this month include four new records by the great American tenor, Evan Williams. These are: "Cujus Animam" ("Stabat Mater"), (Rossini); "I'll Sing Thee Songs of Araby" (Clay); "Murmuring Zephyr" (Jensen), and "The Arab's Farewell to His Steed" (J. Blockley), and it must be admitted that they have been sung and recorded in a manner superior, if it is possible, to Mr. Williams' previous high standard.

The "Colonial Record."

As the name suggests, the above has been specially introduced to meet the requirements of our oversea markets for a record bearing only known "hits," by which is meant titles that have been proved by actual experience to be in the greatest demand. The Colonial Record is a 10-inch double-sided disc, and represents just the proverbial want long felt by traders abroad, who wish to stock selling titles only. As the makers point out, double records usually bear one good title, while the other is comparatively unknown, or alternately, its demand is but local to Great Britain. Every title on the "Colonial Record" will, we are told, be a known gem, and therefore Colonial dealers can place their orders with the confidence that it is not a speculation. Having tested songs and instrumental selections, I am able to recommend the "Colonial Record" as being of good reproduction from the point of view of tone, the quality thereof and volume, and bearing the impressions, as they do, of only the best selling titles, it is manifest to me that they have a big future before them in every sense of the word. Generous terms are offered to traders abroad, who should apply for all particulars to the sole shippers, Messrs. Cullum & Best, 91 Finsbury Pavement, London.

Royal Favors for Manager Manson's Son.

Her Majesty Queen Alexandra has recently presented each boy in the choir at Chapel Royal with a beautiful gold watch, embossed on the back with the crown and E. R. monogram. W. B. Manson, son of W. Manson (manager of the British Zonophone Co.), as senior boy, was called upon to undertake the somewhat delicate task of returning

COLONIAL RECORD

Wherever English is spoken the Colonial Record *must* be the leading seller. It contains on *each* side, *only* the most popular leading titles selling all the time in England. All rubbish is eliminated—you have no waste stock. Your Customers will buy *every one*. 69 numbers (138 titles) for complete set up to Xmas, 1910. Sample Order by Express Service.

thanks, from which he emerged with flying colors. In reply to a letter of thanks from Mr. Manson, Her Majesty was pleased to express her great interest in the boys' welfare, etc., and, needless to say, this letter will remain a cherished heirloom in the Manson family.

Messrs. Hough & Co.'s New Disc.

One is always glad to give due publicity to anything new, and perhaps more so when it is of the nature of an improvement upon existing methods, for in such lies the development and future progress of this industry. In this connection I have to confine myself to disc records and their surface. I venture to say that no one member of the talking machine trade will dispute the statement that the scratchy emery paper surface of many discs is not only a bar to their sale, but to the sale of machines also, inasmuch as these foreign noises in the reproduction of a song or instrumental piece are the peg upon which hang all the sneers and gibes of the prejudiced. It is so, and recognizing this fact, Messrs. J. E. Hough, Ltd., have spent much time and labor, not to mention expense, in making tests, and conducting experiments with a view to producing a record which shall be entirely free from the objectionable scratch, hitherto inseparable from the disc record of to-day. That their ambition has been attained is sufficiently manifest in the production of a new Edison Bell 10-inch double-sided disc known under the appropriate name of the "velvet face" record. Last month I was only able to make a brief reference to the matter, and I will therefore take advantage of this opportunity to give my readers further details, which are assuredly of great interest, having in view the stimulating sales-influence that the V. F. will exert this season. Firstly then, it is of the needle cut type, and is said to contain about 15 per cent. more music than the average cut, by reason of the adoption of a slight finer thread. As the name implies, the surface is smooth and velvety, without the least suspicion of grating, or other objectionable noise, and I say this after having tested a number of sample records under varying conditions. The V. F. will bear the impres-

sion of only the best selections, and in a word, they will stand as records of quality. Dealers are invited to trade direct with the company, who offer a really good profit on this record—to be retailed at 3s. A repertoire of selected gems from the world of music is in course of preparation, and by the time these lines appear the first list of titles will be ready. Mellow and beautifully clear in every detail were the concertina selections—"Austria March" and "The Lost Chord," played as only Alex. Prince can play them. Excellent, too, were the renderings of the "Miserere" ("Il Trovatore") duet, and the "Miner's Dream of Home," while the redoubtable Will Evans has risen to the occasion by presenting two of his latest hits.

Altogether the Edison-Bell Velvet Face disc marks a big step on the road to perfection, and I can recommend it to dealers the world over with the utmost confidence.

Yet Another New Disc!

In addition to the manufacture of needle-cut discs and cylinder records, Messrs. J. E. Hough, Ltd., will shortly introduce upon the market "The Little Champion," a new 9-inch double-sided phonocut record to retail at the remarkable price of 1s. 3d. It is made of hard unbreakable material, called "vitaloid." In disc and cylinder machines and records this firm are now in a position to meet the requirements of the trade in every direction.

Gramophone Co. New Shareholders.

An indication of the healthy condition of trade is shown in the Gramophone Co.'s recent announcement to their shareholders. It reads as follows: "Such of the yearly accounts as have come to hand indicate that the trading profit of the past financial year is sufficient to justify the payment of a bonus of 10 per cent. For the current year the directors are prepared to recommend that interior quarterly dividends be paid at the rate of 10 per cent. per annum, less income tax, commencing October 15."

New Company Organized.

George Robey, Ltd., of Coventry, manufacturers of and dealers in all kinds of musical instruments,

including talking machines. Capital £100 in £1 shares. Private company.

Sell Dr. Crippen's Gramophone.

The sale of "Dr." Crippen's furniture and effects attracted many would-be buyers, but prices ruled low. Among the lot was a Gramophone, and a number of records, which, together, fetched £2 12s. 6d.

Extensive Line of John G. Murdoch & Co.

It may be said, I think without question, that the house of John G. Murdoch & Co., Ltd., is the largest purely wholesale emporium in the United Kingdom, for they handle almost every make of record, machine, etc., and exclusively control the sale of the celebrated series of "Tournaphone" disc machines, "Excelsior" disc and cylinder instruments, Indestructible 100 and 200-thread cylinder records and the popular Petmecky multi-toned needles; four of the best selling lines it is possible to obtain. And in addition they hold huge stocks of every known accessory to the talking machine—of "Tournaphones" something like 30 models are listed; 22 being the ordinary horn type; the remainder of the hornless style. With the exception of the "Baby" model, they are all fitted with good tone arms, strong and accurately assembled motors of various strengths, cabinets of tasteful design, English finish, and many of the models are constructed to take either a combination sound box, or the new Tournaphone sapphire box, to play both the needle and phonocut discs. Prices retail range from 11s. 9d. to 12 guineas. Tournaphones are eminently suitable for Colonial markets. Excelsior machines are too well known to call for much comment here, but it may be as well to say that the Excelsior motors favorably compare with the finest on this market. They are silent in action, durable, and embody the very latest scientific principles of construction; materials and workmanship being of the best obtainable. Murdoch's Indestructible cylinders should, too, find a place in your stock. It is a real selling line, and affords you ample profit to develop a big trade in your particular locality. Their surface is as smooth as glass, and any sapphire reproducer

may be used without fear of damage. General quality—tone and volume—are all that could be desired, and titles are kept up-to-date all the time. Dealers should certainly obtain from Messrs. Murdoch, 91 and 93 Farringdon road, London, E. C., their several catalogs and particulars of trading terms, etc.

An African Klingsor Enthusiast.

One of the latest Klingsor enthusiasts is a dusky monarch, who hails from the West Coast of Africa. He recently paid a very interesting visit to the Klingsor works in Tabernacle street, and was evidently so much impressed with the beautiful effects produced by the company's instruments that before departing he left with H. E. Heyder a substantial order for several different models and a large quantity of records.

Alexander Prince as a Humorist.

Usually one of the most retiring and bashful of men, Alexander Prince, the famous concertina player, has suddenly blossomed into a cynical humorist, judging by a significant announcement in a recent issue of the "Era." Briefly, the fact of the matter is this: Mr. Prince being now on his way to Australia to fill important engagements in Brisbane, Sydney, Melbourne, etc., at the time of publication of the "Era," expected to be crossing the Bay of Biscay, so he caused the advertising card to read: Alexander Prince, Premier concertina player, Bay of Biscay.

Anent the 120,000 Record Order.

Apropos my remarks in last issue that an order from Australia for 120,000 cylinder records had been executed, I am requested by Messrs. J. E. Hough, Ltd., to explain that these were ordered in four lots of 30,000 each, the last dispatch being this month. Such orders in these days are not common, but they certainly indicate very clearly that the cylinder trade is by no means a thing of the past.

Fire in Pianoforte Factory.

The recent fire at the Kentish Iron Works of Messrs. Keith, Prowse & Co., pianoforte manufacturers and talking machine dealers, we are glad to learn, was happily confined to the ground floor, the contents of which suffered considerably from the effects of heat, fire and water.

Nightingale's Song Recorded.

Following upon the production of a real gramophone record of the song of the nightingale, a captive bird owned by a German gentleman, some of the London newspapers have circulated a report that Oliver G. Pike, F. Z. S., F. R. S., has succeeded, after many attempts, in actually taking a record of the nightingale song early one morning in that delightful retreat—Winchmore Hill woods. It will be heard on the gramophone, says the Evening News, but our contemporary is evidently at fault here, for upon inquiry at the offices of the Gramophone Co., Ltd., I was informed that they know nothing of the matter. It would be more reasonable to assume that the record was taken by means of the Edison phonograph, in which case a comparison of the two will certainly be highly interesting.

Beka Records for October.

The October supplement of Beka Records is full-up with just the right sort of titles, that are good both from the quality and selling point of view. Here are some examples: "The Girl in the Train" (selection from), part I and II; "Ginger Two Step" and "Moonstruck, Two Step," excellently played by the Beka London Orchestra, under the direction of Julian Jones; "Oft in the Stilly Night" and "The Harp That Once," two old favorites, by Philip Ritti; "Blow, Blow, Thou Winter Wind" and "Revenge," by G. M. Reid; "The Arrow and the Song" and "She Is Far From the Land," by Harry Thornton; "Flanagan" and "Top o' the Morning," by Harry Bluff, and "Excelsior," a fine cornet and trombone duet, by

Messrs. Donovan and Chattaway, on the reverse side being a fine banjo selection—"Dinah's Wedding," coon dance, by J. Pidoux.

Details of the Speaking Arc.

Discussing wireless telephony in the Telegraph, a correspondent gives some particulars of a remarkable invention known as the Photographophone. A "speaking arc" of light is made to fall on an apparatus containing a cinematograph film. The latter is driven at a constant speed by means of a small motor. On speaking into the transmitter the resulting fluctuations in the arc are recorded on the film as bands varying in darkness. The film is developed and fixed in the ordinary way, and can, of course, be kept for an indefinite time. When it is required to reproduce the sounds the film is moved by a motor in front of an arc light arranged this time to give a perfectly steady light. The light passing through the film faces on a sensitive selenium cell arranged as for wireless telephony. The dark bands on the film produce variation in light, which causes the speech to be reproduced. This method is said to give results equal to that produced by the very best telephones, and superior in every way to the clearness of an ordinary phonograph. The slightly harsh metallic sound which distinguishes the very best phonographic reproduction is quite absent.

The really extraordinary number of phenomena involved in this invention should be noted. Vibrations of the atmosphere produced by the voice cause mechanical vibrations of the transmitter disc; these are transformed to electrical vibrations, which in turn produce variations in light, or, more strictly speaking, actinic rays. These set up chemical action which is still further continued by the developer, etc., used in fixing the image on the film. During reproduction the whole series is reversed. The bands on the film produce variations in light; these set up electrical vibrations in the selenium receiver circuit, and these

in turn reproduce the original sounds by causing vibrations of the receiver disc. That it should be possible to so exactly reproduce the original sounds after such a complicated series of changes must be looked upon as a truly remarkable achievement.

Klingsor Catalog.

Decidedly the most complete catalog issued in the talking machine trade for some months past is that devoted to the large range of Polyphon disc machines, controlled by the Klingsor Works of Tabernacle street, this city. It is composed of no less than 82 pages, wherein are set forth particulars and illustrations of almost 60 different models of cabinet machines, hornless and the ordinary style. A complete description of each instrument is given in four languages. There are a number of automatic machines with extra large trumpets, which make them suitable for use in clubs, amusement saloons, hotels and such like places, and dealers will find in this line plenty of scope for doing splendid business. Original in design and construction and thoroughly reliable in every way, the Klingsor hornless models may also be recommended. The company offer a wide choice of beautifully designed cabinet instruments, and a large variety of the ordinary horn pattern. Prices rule very moderate and the trade discount is liberal, in view of which dealers are well advised to write the company for this catalog and all necessary information.

Important Columbia Co. Announcement.

The Columbia Phonograph Co. have taken advantage of the opening of the season to make an important statement in respect to price-cutting. They maintain that a sale below the authorized list price by any one factor or dealer, not only tends to destroy the profits of other dealers and factors, but prevents them from freely handling Columbia goods, and causes demoralization in the trade. Therefore the company intend to protect

their dealers by pursuing all the price-cutting delinquents who come under their notice. A worthy example which merits the attention of other manufacturers to this trade-disturbing evil of price-cutting.

Pathephone Concert at "Dollar Princess" Anniversary.

Upon the occasion of the first anniversary of the "Dollar Princess" at Daly's Theater, London, Messrs. Pathe Freres gave a grand Pathephone concert during the long wait between 5 o'clock, when the doors were opened, and 7.30, when the play commenced. Being souvenir night, many enthusiasts had been waiting since very early in the morning, and it can therefore be easily imagined with what delight they took their seats and listened to some of Pathe's most entertaining records. Quite a number of records were encored, and when the 20-inch "Dollar Princess" selection was played the applause was simply terrific. Thos. Courtly, the acting manager of Daly's, has sent, under date Sept. 26, a most appreciative letter to S. P. Turner, to thank his firm for the very efficient manner in which the concert was carried out. Dealers the world over can beneficially follow this example by approaching their local theater managers with an offer to keep the audience in good temper until such time as the curtain rises. The practice is not uncommon in England, but could be cultivated with advantage much more extensively. Be sure, though, to use a good machine, and exercise discrimination in the selection of records. You should, of course, do it gratuitously, relying upon a free announcement at the head of the theater program, which would prove sufficiently profitable to more than compensate you for the time spent.

The Current Zonophone Record List.

The current Zonophone list contains many fine selections of a pleasing character, those to hand being the following: Twelve-inch, "Coronation

March" ("The Prophet"), exquisitely rendered by the Black Diamond Band; 10-inch, "Since First I Saw Your Face," by the Zonophone Concert Quartette; "Macgregor, I'm Him," by Jack Lorimer; "You Don't Know You're Alive," by Mark Sheridan; "Floating Along," well played and recorded by the Black Diamond Band, and "Edelweiss," a fine selection by the Peerless Orchestra. Volume and tone purity, these records compare very favorably with the high standard of recording always maintained by the British Zonophon Co.

Edison's Latest Feat Arouses Interest.

The announcement of Mr. Edison's latest invention, the "Kinetophone," by means of which the combined action of the cinematograph and phonograph, are as one, would seem to have created enormous interest here judging by the numerous and lengthy reports in the newspapers and technical journals. It has long been the ambition of inventors to produce a perfect synchronization between the two instruments, and while many partially successful attempts have been made here, the news that Mr. Edison has at last solved the problem but furnishes yet another proof of the seemingly inexhaustible reserve of ingenuity possessed by the Wizard of the West. All honor to the man to whom we owe so much.

Gramophone Records of Entire Opera Faust.

The Gramophone Co. are taking large spaces in the daily press to make known the most sensational announcement of recent years, which is the publication by a star cast of all the great concerted numbers and solos from Gounod's "Faust." The set has been divided into three parts of six records each, which are sold in a special album. The part of Faust is in the hands of Signor Caruso; the Marguerite is Miss Geraldine Farrar; Signor Scotti takes the part of Valentine, while in the "Salve Dimora" (scene VIII) John McCormack is ideal. Never before in the history of this

trade has so complete a set of operatic records been made by so imposing an array of artists as is here presented. In order to do justice to this important "Faust" issue, a book has been specially written by the well known musical critic, Frank Merry, and every record has been illustrated by W. E. Webster, whose pictures are so popular at the Royal Academy. The original sketches were actually made in Covent Garden Opera House during performances of "Faust," so that their interest is indeed unique. The book is given free to every purchaser of one or more records. In issuing this remarkable "Faust" series at the commencement of the season, the Gramophone Co. are assuring increased sales facilities to their dealers, and by their advertisements in the newspapers are stimulating public interest, not only in these particular records, but in the business generally. Certainly the company have achieved a veritable triumph, demanding the congratulations and whole-hearted support of every Gramophone trader, and we would emphasize that expression of our opinion by recognizing the uplifting power such productions exert for the general benefit of this industry. Dealers will be glad to know that the Twin Record Co. have just issued a complete catalog containing over 600 titles. It will be sent free upon request to 11 Christopher street, E. C.

Fine List of Edison Records.

We are reminded that Christmas is not far ahead by the announcement that a special Christmas list of titles will be sent to Edison dealers this month. It contains both Amberol and Standard selections. The National Phonograph Co. are also issuing a most artistic window bill, printed in no less than eleven colors. The size is 20 by 25, and it is perhaps the most striking and effective poster the company have ever issued to their dealers. Coming to records, I learn that the French, German, Hebrew and Italian selections are in great demand, not only in those particular countries, but in this also.

The usual monthly lists of English titles are indeed excellent, as may be seen by the following: Amberol Records—"Overture to Zampa" (Herold), National Military Band; "A Sergeant of the Line" (Squire), Stanley Kirkby; "Mother's Had a Row With Father" (Harrington, Collins and Godfrey), Miss Florrie Forde; "Simple Aven" (Thorne), Jean Schwiller; "We'll Treat You Like One of Our Own" (Murphy and Lipton), Jack Pleasants; "Anchored" (Watson), Peter Dawson; "In the Land Where the Heather Grows" (Godfrey and D'Albert), Jack Lorimer; "The Bay of Biscay" (Davy), Ernest Pike; "My Reputation" (Barnes and Weston), Tom Woottwell; "Carmen," selection (Bizet), National Military Band; "The Ghosts Dance" (Dunkels), National Military Band; "The Singer Was Irish" (Murphy and Castling), Peter Dawson; "The Choristers Waltz" (Phelps), Alhambra Orchestra; "O, Holy Night" (Christmas song), (Adams), David Brazell; "The Church's One Foundation" (arranged by E. W. Seymour), National Military Band; "Marche Tartare" (Louis Ganne), Sousa's Band; "Red Wing" (Kerry

Mills), Frederic H. Potter, chorus and New York Military Band; "For You, Bright Eyes" (Karl Hoschna), Miss Barbour and Mr. Anthony; "Serenade" (Schubert), Venetian Instrumental Trio; "Any Little Girl, That's a Nice Little Girl, Is the Right Little Girl for Me" (F. Fischer), Miss Ada Jones and chorus; "When the Autumn Turns the Forest Leaves to Gold" (N. W. Cocroft), Manuel Romain; "The Fairest Rose" Waltz (xylophone solo), (H. Englemann), Charles Daab; "My Old Lady" (Gus Edwards), Will Oakland; "Shipwreck and Rescue," descriptive (A. Campbell), Peerless Quartette, and "The Enterprise March" (J. B. Lampe), New York Military Band. Standard Records—"The Yule Log" (processional Christmas march), (Sullivan), National Military Band; "Flanagan" (Murphy and Letters), Stanley Kirkby; "I Want to Come Home to Killarney" (Lawrence and Gifford), Ernest Pike; "If I Tell Yer" (Wincott and Weston), Tom Woottwell; "Belphégor March" (Brepant), Alexander Prince; "Don, Don" (Haines and Meher), Miss Florrie Forde; "Non-Stops" (Osborne), Ben Albert; "When the Sun Goes Down in Splendor" (Smith), Peter Dawson; "I Don't Care What Becomes of Me" (Fred Mayo), Arthur Osmond; "The Blarney Stone," two step (Englemann), National Military Band; "Merry Maiden March" (C. D'Albert), New York Military Band; "I Wonder How the Old Folks Are at Home" (F. W. Vandenoort), Will Oakland; "Softly Now the Light of Day" (G. M. von Weber), Anthony and Harrison; "Nobody Seems to Love Me Now," Joe Maxwell, and "Wood and Shaw Galop" (xylophone solo), (J. Ringleben), Charles Daab. Amberol Record, by Sarah Bernhardt—"Phèdre La-Declaration" (Jean Racine). Grand Opera Records—"Stradella-Serenade" (Flotow), (sung in German), Leo Slezak; "Favorita-Spirit Gentil" (Donizetti), (sung in Italian), Aristodemo Giorgini; "Manon Lescaut-In quelle trine morbide" (Puccini), (sung in Italian), Lucrezio Bori; "Madama Butterfly-Un bel di verdrenio" (Puccini), (sung in Italian), Carolina Longone-White, and "Lucia di Lammermoor—Aria del follia" (Donizetti), (in Italian), Selma Kurz.

PROVINCIAL NOTES.

Despite the sudden uprising of strikes and other labor disturbances in several provincial districts this last week or so, business conditions, as far as can be judged at the present time, have fortunately remained practically unaffected in the talking machine field. But of the future, prospects of a real bumper season's trade are not quite so bright as would seem to have been the case when I last wrote. Briefly, the position of affairs is this. As soon as one trouble has been settled in the cotton industry another crops up and disturbs the security of the markets. With the threat of a great strike ahead, talking machine dealers, especially in Lancashire, the center of the cotton industry, are naturally thrown into a state of great nervousness. They are in consequence withholding certain or-

ders pending a settlement of the disputes. That the situation is serious cannot be denied, having in view the possibility of some hundreds of thousands of employes being thrown idle, but there is, fortunately, a ray of sunshine in the latest report to hand, that every endeavor is being made to avoid the possibility of a lock-out.

Lock-Out Hurts Business.

On the northeast coast and particularly in Newcastle, talking machine sales have received a slight set-back by reason of the shipyard lock-out, involving the unemployment of a large number of skilled artisans and others. At the time of writing an early settlement is not expected. In the midlands good business is being done and the season's prospects are excellent. The chief provincial factors are doing a little desultory advertising, but not to any great extent.

Gramophone Co. Branches Active.

The Gramophone Co. advise me that their stock rooms are now in full swing throughout the country, and the new models on show have won much favor in provincial trade circles. These goods will, however, not be ready for delivery for some time. Amberola and other Edison goods, Zonophones, Columbia, Pathe, Twin and Becca products would seem to be selling well in Manchester, Liverpool, Leeds, Birmingham and other centers.

A Change in Management.

The old established talking machine business carried on by K. Wagenhaus in Stretford Road, Manchester, has been taken over by Christian Duwe, one of the enterprising factors of that city.

Heavy Demand for "Cinch" Machines.

In all my reports particular mention is made of the extraordinary demand for the "Cinch," the

The STROH VIOLIN

☞ A new instrument possessing a VIOLIN quality of tone of great beauty and remarkable power.

FROM OUR LONDON HEADQUARTERS—(Continued.)

new Zonophone hornless machine. It is selling in such large quantities that the company are simply unable to keep deliveries ahead, despite day and night work at their huge factory.

Prospects Bright in Wales and Ireland.

Trade prospects for the season are particularly bright in Wales, and now that the miners have settled their difficulties, business is progressive all the time. Columbia, Zonophone and Edison goods are selling well.

Over the water trade in the Emerald Isle shows signs of a satisfactory awakening. Business is steadily improving, especially in the products of Messrs. Pathe Frere's, which is obviously the result of their talking machine concerts, given in the principal towns under the direction of Butler & Sons, of Dublin.

T. Edens Osborne in Evidence.

In the Belfast papers Thos. Edens Osborne I notice is continuing his chatty little advertising talks. Gramophone and Edison sales are in consequence developing rapidly and Mr. Osborne anticipates a real good season.

THE COLUMBIA IN AUSTRALIA.

L. Taylor, of Craven, Taylor & Co., Prominent importers of Sidney, N. S. W., During Visit to This Country, States That His House Does Large Business in American Products—Confers with Columbia Phonograph Co.—Places Orders for Prompt Shipment—Entertained at Dinner.

Among the distinguished trade visitors from abroad the past month was L. Taylor, of Messrs. Craven, Taylor & Co., the prominent importers, with headquarters in the Hopkins Buildings, Spring Street, Sydney. Mr. Taylor's house handles American products with great success throughout Australasia, and apart from placing

some big orders with American manufacturers he journeyed to this country largely for the purpose of conferring with the Columbia Phonograph Co. relative to representing their products throughout Australia. He was successful in his negotiations, and hereafter Craven, Taylor & Co. will act as sole agents in Australia and New Zealand for the Columbia Phonograph Co., General.

In this connection E. D. Easton, president of the company, has issued the following circular addressed to Australian dealers:

"In order to secure you the very best of service, we have made arrangements whereby Messrs. Craven, Taylor & Co., brokers of Sydney, become our sole representatives for Australasia and New Zealand. They will trade as the Columbia Phonograph Co.

"We know that local representation such as this, with complete stocks of Columbia disc and cylinder machines and records, will enable you to do a larger and more profitable Columbia business.

"Mr. Taylor is now in New York arranging for the prompt shipment of all goods necessary to enable them to fill orders without delay. They are planning for a particularly large stock of disc machines and double-disc records. The immense popularity of this type of machine and records in the United States will undoubtedly be duplicated in Australia. There is more money and a better class of business to be had with disc than cylinders.

"Our line of Grafonolas—hornless disc machines—has opened a vast new field. There isn't a home in Australia which has a piano but should have a Grafonola also. Push your sales of Grafonolas. People who are interested in them have good money to spend, not only for the machine but lots more for the high-priced records, such as our new series Grand Opera records.

"If you have observed the trade publications of the United States during the past few months you

already know that the four types of Grafonolas and the new Grand Opera records have completely revolutionized the talking machine business.

"This splendid series was only recently made. The records include the most famous solo, duet, trio, quartette and sextette passages in all opera, sung by artists of the highest rank. In surface tone and artistic rendition, by both the artist and the accompanying orchestra, they have never been approached by any records made up to the present time.

"These records and Grafonolas represent a distinct advance in the talking machine art. You should make yourself acquainted with them at once. Special descriptive booklets can be had for the asking.

"We thank you for the patronage you have given us in the past and ask that you continue it in greater measure with new representatives."

On Monday evening, September 26, Mr. Taylor was entertained at dinner by Geo. W. Lyle and Edward N. Burns, of the Columbia Phonograph Co., at one of our leading hostelrys prior to his departure for Europe on the "Lusitania" on the following Wednesday. After visiting London, Paris and Berlin Mr. Taylor will leave for his home in the Antipodes.

BEST METHODS OF PUBLICITY.

Man Succeeds Only When He Is Entirely Wrapped Up in Business—Half-Hearted Interest Combined with Advertising Will Not Accomplish the Result.

A man succeeds not because he advertises his business, but because he lives it; because he eats it, sleeps it, dreams it, builds air castles about it.

The man who never builds air castles never builds castles of any kind.

The great motive power of any business is the strenuous personal faith of the man back of it.

Put your name to the front; your own personality. This is a tremendous force in advertising. People like to know individuals. They like to feel that they are being served by men; not simply getting their goods out of the hopper of a treadmill. And if people have any kicking to do—and the American people enjoy kicking—they prefer to kick individuals. It is mighty unsatisfactory, for instance, to kick an express company or a railroad, or Brown, Smith & Co. One can't hit the bull's eye.

Breathe the breath of life into your advertisements. It is safe to say that nine out of every ten advertisements which we see are as dead as Egyptian mummies. They are beautifully decorated; twined around with fine linen; draped and boxed for burial. They have eyes and nose and mouth, but they neither see nor speak. Their faces are either made of putty or are chiseled out of beautiful marble. There is no throbbing pulse, as Seymour Eaton in Printer's Ink.

Advertising isn't grammar; it isn't pictures; it isn't type; it isn't top of page position. It is something far more real than these things. These are merely accessories. Advertising is making the proper telepathic connection between you and the customer. It is the art of making the type speak.

SMILING.

When the weather suits you not,
Try smiling.

When your coffee isn't hot,
Try smiling.

When your neighbor don't do right
Or your relatives all fight,
Sure it's hard, but then you might
Try smiling.

But it cannot make them worse—
Just smiling.

And it seems to help your case,
Brightens up a gloomy place;

Then it sort of rests your face—
Just smiling. —Exchange.

NEW RECORD EXCHANGE PLAN

Formulated by the National Phonograph Co.
Sure to Prove Popular.

What will undoubtedly prove a most acceptable substitute for the present two-for-one record exchange plan, adopted as a temporary substitute for the original arrangement on June 17, 1910, and which was the subject for considerable discussion at the convention of the National Association of Talking Machine Jobbers last July, was introduced to the Edison trade on September 15, 1910. Accompanying the sales department bulletin outlining the new proposition was a letter from Frank L. Dyer, president of the National Phonograph Co., which gives a concise history of the reasons leading up to the abolition of the old and the adoption of the new plan, and appears below.

A careful analysis of the new exchange proposition will prove that it is admirably conceived to work to the common interest of all concerned—manufacturer, jobber, dealer and public. It gives the public a chance to return worn or undesirable records; permits the trade to work off its surplus of slow sellers; revives the interest of machine owners and makes them steady customers for the new product and saves the manufacturers the heavy losses which they were compelled to bear under a plan which proved unsatisfactory generally. The salient points in part are as follows:

The two-for-one plan now in effect terminates December 31, 1910. The list of 500 standard records used to inaugurate the plan comprises the slowest selling but by no means the least desirable numbers in the Edison catalog.

Dealers are authorized to sell any records from this list at the regular price of 35 cents each and accept in payment 20 cents in cash and any two used records. Any used records, irrespective of type, may be accepted—except such numbers as appear in this list.

In case of question as to count or eligibility of any of the records returned for credit the decision of the jobber is final. Moreover, if all the

terms, conditions and stipulations contained in the proposition are not fully agreed to and carried out by the dealer, the jobber has the right to reject any and all records returned.

The records contained in this list of 500 are not returnable under the present two-for-one exchange. As a further plan for disposing of records shown on the special list of 500, dealers are permitted to present to the owner of an Edison phonograph who induces a sale of an Edison phonograph, any nine records from this special list in lieu of six special Amberol under the conditions outlined in the National Phonograph Co.'s promotion plan.

Special literature, a catalog containing the 500 records, etc., will be in the hands of jobbers shortly after October 1. The proposition has not yet been extended to the Canadian trade.

PRESIDENT DYER'S LETTER.

"To the United States Trade:

"The exchange proposition on two minute records, heretofore in force and which was modified by our circular letter of June 17, 1910, was found to be impracticable because of the enormous losses forced upon us in carrying it out. To a much smaller degree, losses were also incurred by jobbers and dealers owing to the tying up of capital and the cost of packing and transportation. Furthermore, the plan of the old exchange proposition permitted the trade to order records indiscriminately and in unlimited quantities, for the reason that those remaining unsold could be eventually returned for full credit when cut out, which was practically equivalent to a consignment business. It is not necessary for us to say that such a result was never contemplated when this exchange proposition was originally put into effect. The old method also involved the destruction of an enormous number of absolutely new records which it would be most desirable to get into the hands of the public, if possible.

"The modified exchange proposition, as outlined in our circular letter of June 17, 1910, was intended as a temporary or compromise arrange-

ment, which was to remain in effect only until some definite and comprehensive plan could be devised. We, therefore, take this occasion to notify the trade that this exchange proposition on the two-for-one basis will be terminated Dec. 31, 1910, and to urge upon dealers the necessity of returning before that date any cut-out records on list heretofore issued. At this time, we also wish to express to the trade our thanks for the fair and loyal manner in which our circular of June 17, 1910, was received.

"We have now evolved a new plan, effective Sept. 15, 1910, which, if successful, will take the place of an exchange proposition. The plan as described is the result of many discussions with jobbers and dealers throughout the country, and we believe that if thoroughly understood by the trade it will meet a hearty reception from them all. The following are the principal advantages of the plan:

"First—The losses heretofore forced upon the factory will be eliminated. This is not entirely one-sided, because jobbers and dealers who are familiar with the methods of the National Phonograph Co. know that as the factory prospers, corresponding advantages are extended to the trade.

"Second—Instead of cutting out a certain number of records from our catalogue, as heretofore, we have selected 500 records (see list enclosed), which will be included in a special catalogue to be issued as soon as possible, with the understanding that all records in this special list will be removed from the regular catalogue and the manufacture thereof discontinued one year from the date the special list is issued, or September, 1911. These records, instead of being returned to us on an exchange proposition and absolutely destroyed, are, under this new plan, disposed of to the public under an arrangement whereby, if two old records are returned, an allowance of 15 cents for both will be permitted against the purchase of one new record from the special list at 35 cents, making the cash expenditure to the customer 20 cents.

The Newest Development
All have striven for but never attained it—until the issue of the new
EDISON BELL

THEY ARE ALL GEMS

J. E. HOUGH, Ltd., Edison Bell Works

Glenjall Road, London, S. E.

"Third—We are informed that there are thousands of phonographs at present in the hands of owners that are not being operated, because their owners have such large stocks of records at their homes that they do not feel that more money should be invested in new records, or the old records are not played because they are worn or their owners are tired of them. Under this new plan, every time a phonograph user buys a record from the special list, he may return two of his old records, for which he receives 15 cents credit, and in this way his stock of old records will be reduced, a stock of new records will be gradually built up, and his interest in the phonograph revived.

"Fourth—By bringing old customers into the stores of jobbers and dealers under the present plan, they can be interested in the new Edison products, such as the combination phonograph and attachments, the Amberol record, the Cygnet horn and the Amberola, and in this way the dealers' lists of active customers will be increased.

"Fifth—Under this plan, dealers will be able to reduce their stocks of slow selling records (heretofore handled through cut-out lists) not only without loss to them, but at an actual profit.

"As a further plan for reducing stocks of slow selling records contained in the special list, we have also decided to permit jobbers and dealers to present nine two-minute records from this special list in lieu of six special Amberol records as a bonus to any owner of an Edison phonograph effecting the sale of a new Edison phonograph.

"We might say, in conclusion, that it is an admitted fact that the reason why many stock records are slow sellers is not because of any inferiority of the records themselves, but solely because adequate efforts are not made by the trade to sell them, most of their efforts being apparently directed to the sale of current or new records, and we believe that this plan, properly circularized with special printed matter, which we will furnish, will cause a revival of the sale of these particular records and that they will give equally good satisfaction to the user of the latest ones.

L. A. CUMMINS ADVANCE AGENT.

Well-Known Traveler for the Aeolian Co., St. Louis, Keeps His Trade Posted As to When He Will Call on Them—Bears Reputation as a Hustler and Deserves It.

L. A. Cummins, wholesale traveler for the talking machine department of the Aeolian Co. in St.

the St. Louis Talking Machine Co., in which position he continues with the Aeolian Co., successors to the St. Louis Talking Machine Co.

Mr. Cummins enjoys an enviable reputation as a hustler and a hard man to compete with in his territory. He claims the record in the Middle West for creating more new dealers than any of his competitors. His faith in the Victor and in the future of the business generally is unbounded.

WITH THE TRADE IN THE "HUB."

Jobber Sending Dealer's Literature to Retail Customer Causes Misunderstanding—Wholesale Business Excellent—Retail Only Fair—H. F. Miller & Sons Co., Move Victor Department—The Linscott Sporting Goods Co.—Succeeds Boston Cycle & Sundry Co.—Good Columbia Co. Report—A Big Shipment—The News of the Month.

(Special to The Talking Machine World.)

Boston, Mass., Oct. 6, 1910.

When making a social call recently the subject of talking machines came up, and after a brief discussion my host made the startling statement that he was "in right" and that he was going to get the dealer's discount on the machine he expected to purchase. It seems that he had in his possession a dealer's discount sheet, dealer's agreement blanks and all other data for the inauguration of a new dealer and was congratulating himself on his good luck. The writer asked how he happened to get that literature and he said: "Sometime ago I sent a postal card to the home office of a talking machine company, merely saying, 'Please send me a catalog and oblige.' They answered, saying they had referred it to a house in Boston for attention. Shortly thereafter I received a letter from the Boston company, saying they had forwarded catalog, dealer's discount and contract and would be pleased to have my order. In this letter they forgot to enclose the discount sheet, and this I received the next day with an apology for omitting it. I thought that was a new way of getting business and assumed that every one got the same offer."

This party lived within ten miles of Boston, and no doubt it was through error that the wholesale price was sent him, but it shows what a lot of trouble might be caused if these were sent out even occasionally. A personal call on nearby inquiries would obviate this, with extreme care when sending out advertising literature.

Trade in Boston at this writing is peculiar. Wholesale business is very good, while retail trade is but fair. The latter is due to the extremely hot weather and the backward season for the return of city people from their country homes. Wholesale trade, of course, goes all over the States, and in many of the smaller cities the dealers' retail business is brisk. In retail circles the higher-priced machines lead the sales sheets, as the demand for that class of talkers is steadily growing.

Henry F. Miller & Sons Piano Co. have moved their Victor department to the second floor of their warerooms, where enlarged facilities will enable them to feature this business prominently. Green is the color scheme for the decorations, even the record envelopes being green, which gives the rooms a most artistic appearance. C. Alfred Wagner, manager, is outlining a campaign that ought to make a rapid sales growth for this department.

There's a cordial invitation to the dealers of New England, appearing elsewhere in this paper, given by the Linscott Sporting Goods Co. to visit the Edison exhibit at Mechanics Building. But fifteen days more are available to witness one of the greatest Edison displays ever made, and it would be worth while for every dealer to see it. Manager Charles R. Cooper will meet guests at the trains, at the company's headquarters, 48 Hanover Street, or at Mechanics Building.

Linscott Sporting Goods Co. is the new name of the Boston Cycle & Sundry Co. The latter name is familiar to the entire trade of the country, and it will only be a little while before the new name—Linscott Sporting Goods Co.—will be as well known. The company reports a very satisfactory opening of the fall season.

Under the able directing of Harry Bennett, their new manager, the talking machine business of the Henry Siegel Co. is making rapid strides. They feature Columbia goods. Mr. Bennett is quite an artist, judging from the paintings that adorn the walls of his department.

Arthur C. Erisman, manager of the Boston headquarters of the Columbia Phonograph Co., gave out a most encouraging report of Columbia sales for September, saying: "The past month's business exceeded the September of 1909 by 60 per cent." Nearly a doubling of Columbia trade, and it's certainly an excellent testimonial of Mr. Erisman's business building ability. He adds: "My honest opinion of the Columbia outlook for this year is it will be the largest it has ever known in the city of Boston, and by letters from our general manager I have every reason to believe it will be the same all over the country."

The Columbia company have just completed the mailing of their new grand opera record brochure to their local mailing list, the number sent out being in the five figures class. It is a beautiful example of the printer's art, with front cover embossed in gold and black.

Frank E. Flightner is the new Columbia wholesale representative covering the territory of Vermont.

Sixty-seven boxes and eleven crates of Columbia talking machine goods were shipped recently to the Chas. F. Wing Co., New Bedford, on one order, which shows the way this company intends to push the exclusive Columbia agency. G. F. Kasmire is the manager of this department.

Theo. Barr, press agent of the Boston Opera House, was so pleased with his Columbia library table that he bought another one and sent it to his brother at Budapest. Mr. Barr says that talk-

The Finest Record Cabinets on the Market —And You'll Find They Sell the Easiest!

The Salter line of Talking Machine Record Cabinets excel all others. During the past two years, so great has been the demand for these cabinets, our factory has worked overtime almost continuously.

Salter Cabinets have a patent interior arrangement which stands in a class by itself. No other cabinets are so neat or so nicely arranged.

The interior of Salter Disc Cabinets have an individual compartment for each record. The wood shelves are lined with soft green felt, and it is impossible for the record to become scratched or otherwise damaged.

Each shelf or record has a number. By referring to the corresponding number on the card index attached to the door, any record in the cabinet can be named or located instantly.

The Disc Records lie flat on the shelves, they cannot become bent or warped. These cabinets are artistic in design and are handsomely finished in any desired color. They are made right, look right, and in comparison with any others, sell almost on sight!

The Salter Cylinder Record Cabinets are so arranged as to hold the records in their original carton boxes, if desired. This has the advantage of protecting them from dust, or from breakage in handling.

When preferred, the cabinets can be arranged so as to place the records on pegs, in the old way.

Every Salter Cabinet, of whatever style, is finished handsomely. The natural beauty of the wood is enhanced by perfect finishing, and the designs of the cabinets are pleasing, artistic and original.

We pack the cabinets for shipment in such a way that breakage is almost absolutely prevented. Your cabinets reach you safely, in good condition to display and sell.

Every one of your customers has need for a Record Cabinet. Our line comprises all styles, and has cabinets at all prices!

Our latest catalogue will be mailed promptly on receipt of your request.

Write for it to-day.

ing machines have done more to promote grand opera than grand opera itself.

Wm. D. Blossfield is the energetic manager of the Victor department of M. Steinert & Sons Co., Providence, R. I., and they are doing an excellent business there. Two new demonstration booths are being built and plans are in process for a brisk fall.

The M. Steinert & Sons Co.'s talking machine headquarters in Lowell are ably pushing Victor goods in that territory. J. H. Caldwell is the local manager.

E. F. Taft, general manager of the Eastern Talking Machine Co., is very optimistic at this season's possibilities and is making every preparation for a heavy business. No one follows the subject of business conditions more closely than Mr. Taft, and when he predicts a good season he has basic reasons for his faith.

The new Victor record cabinet of the Eastern company has been built and it has a capacity of 120,000 records. It resembles a miniature Congressional Library, and the company claims it is one of the largest, if not the largest, library in the country.

Here is an illustration of their quick service: An order was received from a New England dealer at 5 o'clock. It was loaded on the team at 5:20, and at 5:25 the dealer received a 'phone call saying the order was on the way. The phrase "going some" is an apt one for this case.

The management will tender a dinner to the members of E. T. M. Associates at their next meeting.

Herewith appears a photograph of the company's Victrola and Amberola room. Although not evident in the picture, every style of those machines is on exhibition.

At the Outlet Co., Providence, R. I., is a big talking machine department that is managed by two versatile talking machine men, Messrs. Viel and Wonderlitz. The Outlet Co. operate one of the largest stores in Providence, and the talking machine end is surely conducted in an up-to-date manner.

F. S. Boyd, manager of the Iver Johnson Co.'s talking machine department, reports a large business on Edison machines with the new reproducers and Music Master horns.

The destinies of the Shepard Co.'s talking machine department at Providence, R. I., are ruled by Manager Baldwin, who has a neat display room.

Blue is a suitable color to display the products of the long-established talking machine needle house of W. H. Bagshaw, Lowell, Mass., as it is a needle concern to deserve the blue ribbon. The nearest to it in this issue is their Blue Supplement, which in every way represents the strength and dignity of the house, the officers and of their needle output, the factors of quality and number duly considered.

Two Providence, R. I., piano houses to handle talking machines are the Meiklejohn Co., with the Victor and Columbia lines, and the Kelley Piano Co., who recently put in the Victor representation.

CHANGES IN EXECUTIVE STAFF.

Several changes were made last week in the executive staff and offices of the Columbia Phonograph Co., General, New York. C. W. Woodrop, formerly the business manager of the recording laboratory, was elected assistant treasurer and secretary, and is now filling that office. He entered the service of the company about a year

ago, taking charge of the collection department, and subsequently going to the laboratory. Mr. Woodrop will also fill the same position for the American Graphophone Co., and is occupying the office formerly used by the wholesale department, Mr. Yerkes going into the room recently used by E. A. Rockwood, and overlooking the East River and Brooklyn Bridge. Marion Dorian, auditor of the company, will be in the same office with Mr. Yerkes. Merwin E. Lyle takes Mr. Woodrop's place at the laboratory.

BONCI IN CONCERT.

Columbia Clientele Notified So That He May Be Featured Wherever He Appears.

The Columbia Phonograph Co., General, have notified their clientele that commencing with November 17, in Brooklyn, N. Y., Bonci, the famous grand opera tenor, will make a concert tour through the United States and Canada, and which will close February 22 in Columbus, Miss. Their advice to jobbers in this connection follows:

"When he arrives in your city be sure you have a window display which is appropriate, and that you do not lose the value of the publicity he is getting. Sell all the Bonci records you can—display your stock of all Columbia Fonotopia records, and when they are gone order an additional supply, but don't order more than you can sell promptly. In cities in your territory where Bonci appears, where we have a dealer, be sure to have your dealer do some advertising on his own account and put in a good window."

E. H. HICKMAN RETURNS.

(Special to The Talking Machine World.)

Nashville, Tenn., Oct. 10, 1910.

After an absence of two months, E. H. Hickman, manager of the talking machine department of the Phillips & Butteroff Manufacturing Co., of this city, returned to business this morning. He had been ill with a severe attack of typhoid fever and had been traveling around, going as far as Oklahoma City, endeavoring to regain his health and strength, which he says has been finally accomplished.

WANAMAKER TO THE DEALERS.

An important announcement appears elsewhere in this issue from the Wanamaker house which should interest the talking machine trade. There are few dealers who do not know of the extent of the talking machine departments conducted by John Wanamaker in New York and Philadelphia, the prominent feature of which is a most complete stock of both Victor and Edison machines and records. Dealers desiring a quick delivery of goods in their line can be accommodated promptly at this establishment.

The Consolidated Phonograph Record Co., Newark, N. J., having their registered office at 763 Broad street, filed articles of incorporation in the office of the county clerk last week. The authorized capital is \$125,000, of which \$1,000 is paid up.

THE EASTERN TALKING MACHINE CO.'S VICTROLA AND AMBEROLA ROOM.

TRADE IN SOUTHERN CALIFORNIA.

September Trade Very Satisfactory on the Average—Wiley B. Allen Co., Improve Arrangement of Warerooms in Los Angeles—Sherman, Clay & Co., Preparing for Heavy Holiday Business in Victor Goods—Southern California Music Co. Have Record Edison Business During the Summer—Various Other Houses Also Very Active—Expansion Seems to Be the Order of the Day.

(Special to The Talking Machine World.)

Los Angeles, Cal., Sept. 30, 1910.

The later days of September find retail trade not quite as brisk as the first, although the jobbers have seen no lull, which is a splendid indication of confidence on the part of the dealers in a heavy fall and holiday trade. Many of the dealers have improved their trade-handling facilities as well as beautified their departments.

The Wiley B. Allen Co. have added a number of glass-partitioned demonstrating rooms which make their department one of the largest in the city. A very clever system of ventilation is employed, which keeps the various rooms supplied with fresh air and is regulated to suit climatic conditions, either cool or warm. Their Victor business has greatly increased since the new additions have been made. H. H. Clubb, the manager of the department, is justly proud of his effort. Miss Irene Johnston, who was formerly with the Fitzgerald Co., has taken a position with the Wiley B. Allen Co.

Sherman, Clay & Co. are preparing for a great holiday Victor business. The new style Victrolas are receiving much attention from the trade, and it is believed by all that they will soon displace the horn type machines. W. R. J. Campbell, who has been with Sherman, Clay & Co. for many years, has gone on a trip to Dundas, Prince Edward Island, to visit some of his relatives, whom he has not seen for several years.

The Southern California Music Co. have seen the busiest summer yet in Edison goods. The new style Triumph, with model "O" reproducer and Music Master Cygnet horn, is considered by all the largest improvement made in the Edison line for years. The third floor retail department of the Southern California Music Co. has been completely remodeled and now presents a handsome appearance and allows the customers every convenience. Albert D. Wayne, manager, has put into effect some splendid ideas, for which he deserves credit. E. S. Dible has been appointed manager of the talking machine department at

San Diego. The business phonograph department is now employing S. H. Womble, who is meeting with success.

The Columbia Phonograph Co. has shared the busy summer in a very satisfactory manner. The Grafonola Mignon and the new \$17.50 graphophone have been delivered to the trade throughout this section.

S. C. Purser, owner of the talking machine department of S. A. Brown & Co.'s new store, is one of the new dealers who met with great success. Mr. Purser has increased his storeroom already since opening about five months ago, and says he intends to make further additions before the holidays, which speaks well for so young an enterprise.

The Kennedy Phonograph Co., on West Fourth street, formerly the Fiske Phonograph Co., report a very good summer trade. Mr. Kennedy is one of the live Edison dealers of the city.

Irving Andrews, of Andrews & Son, with the Holmes Music Co., Broadway, has extended his recently established department to a considerable extent. Mr. Andrews is a man of splendid standing in the trade, being one of the old-timers and having been connected with several prominent concerns in this city, as well as being a junior partner in the firm of Andrews & Son, of Phoenix, Ariz., prior to his coming to Los Angeles eight years ago.

The Phonograph Record Exchange are doing considerable advertising of various kinds. They are located at 224 South Spring street, room 311.

George P. Austin, of Oxnard, has purchased the Southern California Music Co.'s retail business in that city, where he has managed their store for several years past. This is looked upon by the trade as a very important transaction, as Oxnard is one of the new and rapidly-growing beet sugar towns.

At Fresno, K. H. Nishkian has had a considerable increase in his Edison business. Mr. Nishkian, together with his family, visited Los Angeles for a few weeks during the summer.

F. L. Rochefort, of Holtville, Cal. made a short stay in Los Angeles last month.

The Wiley B. Allen Co., of San Diego, have given their regular recitals as usual through the summer months and have been very successful with them.

The Southern California Music Co. have just completed alterations which gave them a fine new demonstrating room for all sizes of machines. The stocks of small goods and sheet music were closed out entirely and the entire store remodeled. Manager Morse is especially proud of the talking ma-

chine department, which is now as complete as is required for up-to-date business methods. An early advertising campaign for holiday trade has been launched.

The Thearle Music Co. have received a large shipment of Victor goods, which is the first instalment of their holiday stock.

Q. G. Farquharson, traveling representative of the Columbia Phonograph Co., visited San Diego last month, as well as all the other busy sections of this county. Many other prominent people of the trade have visited San Diego, some on business, others for pleasure. Fred Morton, of Sherman, Clay & Co.; F. C. Carnes, Southern California Music Co., Los Angeles; John M. Miller, of Miller-Sterling Co., Phoenix, Ariz., and Irving Andrews, of Andrews & Son, were a few who made their presence known to the trade.

Some of the other prominent persons of the trade who have returned from late vacations are: Chas. S. Ruggles, manager Sherman, Clay & Co., Los Angeles; C. H. Rundel, of Southern California Music Co., who, after a trip to several northern towns, has a better opinion of Southern California than ever. O. A. Lovejoy, Southern California Music Co., in company of Geo. Austin, got the limit in doves on a hunting trip; A. Graham Cook, of George J. Birkel Co., had a fine trip through Yosemite Valley, and W. F. Stidham, with Mrs. Stidham, had a splendid time at the beach.

Many out-of-town callers are reported to have been in Los Angeles lately, among whom are W. C. Hauser, of Dinuba, Cal.; Wm. Berryhill, of the Berryhill Co., Phoenix, Ariz.; Jas. M. Gulley, Sherman, Cal.; W. R. Harper, Ontario, Cal.; O. J. Tullis, Santa Monica, Cal.; George Clark, of Clark Bros., Upland, Cal.

The Pasadena Business College, 346 North Fair-oaks avenue, are using the business phonograph in their business courses.

BLACKMAN CO. BUSY.

Well Satisfied with Manner in Which Fall Trade Has Developed—New Features Help Business—The Blackman Specialties in Demand—Trays, Needles and Brushes Find Great Favor with Trade.

A visit to the store of the Blackman Talking Machine Co., 97 Chambers street, reveals the entire staff from President J. Newcomb Blackman down, putting forth their best efforts to meet the demands for stock from their dealers. According to Mr. Blackman, the present season has opened up in a most satisfactory manner. The various new styles of machines and special propositions of the company designed to stimulate sales have done their work well; and, unless something unexpected happens, the indications are that the present Fall season will be a record one. The dealer, too, must not forget the specialties marketed by the Blackman Co., viz.: the Blackman folding record tray with Rapke label, the Playrite and Mello-tone needles and the Place record brushes for disc and cylinder machines. Regarding these specialties, there is little that can be added to what has already been said in their favor. The Blackman trays may be found on jobbers' and dealers' shelves in all sections of the country. The Place record brushes are in a class by themselves. It is claimed for the needles that they do what their name implies. Further information is always obtainable from the Blackman Talking Machine Co.

TRADE IN THE SAINTLY CITY.

Business Shows Steady Improvement—Good Demand for Columbia Co., Goods—Interesting Personal Notes—Some Recent Visitors—Excellent Report Made by Talking Machine Department of the Aeolian Co.—Activities of the Various Other Jobbers and Dealers—Other News of Timely Interest.

(Special to The Talking Machine World.)

St. Louis, Mo., Oct. 4, 1910.

Trade in the talking machine business for the past month has been improving steadily, and the fall demand is now very good, with every indication of increasing activity.

Manager Walthall, of the Columbia Phonograph Co., reports a nice volume of business for the past month and that the fall trade is good.

He recently furnished one of their Grafonola Regents with a selection of their best records to the Skinner & Kennedy Stationery Co. for the four days of their business show. Thousands of people visited the show and heard this fine machine. Mr. Butterfield, one of their best salesmen, operated the machine and secured a quantity of prospects.

E. S. True, formerly credit manager here for the St. Louis Talking Machine Co., has been appointed manager of the Columbia Phonograph Co. at Louisville, Ky., and left for that point on September 26.

H. T. Boxley, in charge of the collection department of the Columbia Phonograph Co., returned recently from a two weeks' vacation spent at Sedalia, Mo.

Chas. Kauffmann, traveler for this concern, was in town a few days recently and reports a big revival in trade in Illinois on account of the settlement of the coal miners' strike.

Wm. Standke, manager of the Columbia Phonograph Co., Denver, Col., spent a day here recently on his way home.

Mr. Grasby, a member of the firm of the Winnipeg Music Co., Winnipeg, Man. spent a day here recently as the guest of General Manager Lyle and District Manager Fuhri, of the Columbia Phonograph Co. The Winnipeg Music Co. are jobbers of the Columbia in Canada.

Mr. Lyle was accompanied by his son Harold, and he was returning from a five weeks' trip visiting the branch stores of the company in the West. He considers conditions very favorable for a good fall and winter trade.

Reports from the talking machine department of the Aeolian Co. show that more than the usual fall increase in business has been experienced by them during the past month. The retail trade has been exceptionally fine, and now that the majority of their customers have returned from their summer trips, a great demand is being made for the selections that were issued during their absence from the city.

The wholesale Victor department of the Aeolian Co. report that their order files are fast becoming filled with orders from dealers, to be delivered during the months of October, November and December. The dealers are realizing more than ever the fact that the earlier they get their orders in to their jobber the greater the assurance of getting the goods when they want them, and judging from the size of the orders already on file, it is a certainty that "the greatest fall in the history of the Victor business" will be experienced this year.

The Aeolian Co. will, in the very near future, announce to the trade a new line of record cabinets for which they have secured jobber's selling rights.

The repairs and redecorating of the show window of the Aeolian Co. have been completed. The pillars and woodwork have been finished in ivory white, and with handsome portieres to match and the concealed lighting arrangement the effects are most beautiful. The first display in this new window consisted of the Victor "Pryor and Sousa" display and was classed by local window dressing authorities as very beautiful.

H. C. Brown, advertising manager of the Victor Co., spent a few hours in St. Louis recently. L. F. Geissler, general manager, and W. J. Staats, chief accountant, of the Victor Co., were visitors at Aeolian Co. during September.

W. C. Weager, formerly manager of the W. F. Roehr Music Co. in Manhattan, Kan., is now connected with the retail Victor department of the Aeolian Co.

Visiting dealers at Aeolian Hall during the past month were F. Cochran, manager Piggott Music & Novelty Co., Piggott, Ark.; L. Birger, Glen Carbon, Ill.; E. Hagler, East St. Louis, Ill., and W. W. Fisher, Murphysboro, Ill.

The Koerber-Brenner Music Co. report that their business has been good for September and it is improving right along.

W. A. Brenner, secretary of the company, returned October 10 from a two weeks' Northern business trip.

A. M. Page has accepted a position as traveler for this firm and is now on a long trip through the West and Southwest.

The Silverstone Talking Machine Co. reports having a good trade for September, with improving conditions.

D. K. Myers, the Zonophone jobber, reports fair trade for September, with improving signs.

A. J. Robinson, of the talking machine department of the Thiebes Piano Co., states that their September trade has been good. He reports the sale of a number of Victrolas and that he has had quite a few customers who have traded in their pianos in exchange for Victrolas.

C. N. Lenhart, Mattoon, Ill.; M. F. Havlen, East St. Louis, Ill., and J. H. Martin, Red Bud, Ill., were recent Columbia dealers in town.

Practically every man you call lucky because he has succeeded in building up a good business, is lucky because he is observant and energetic. You can be observant and energetic. You can cultivate those qualities even if they are not natural.

C. H. Hawk, Grand Fork, Ill.; W. A. Phipps, Moore & Phipps, Cowden, Ill., and Louis P. De Rousse, Waterloo, Ill., were recent Edison dealers in the city.

J. K. Savage, traveler for the Silverstone Talking Machine Co., returned October 7 from a two weeks' business trip in an auto to northern Missouri.

The Bollman Bros. Piano Co. opened their new Victor talking machine department on September 10. It is located on their first floor and very handsomely equipped. It consists of three very fine sound rooms, arranged in a perfect manner. The manager of this department has not yet been selected.

Miss M. E. Lazarus, formerly with Pope's Piano Co., Little Rock, Ark., has charge of the record department.

The O. K. Houck Piano Co., W. C. Crouse, manager, will soon open a Victor talking machine department.

EDISON AT THE BUSINESS SHOW.

The Edison Business Phonograph Co., Orange, N. J., will have an exhibit at the Business Show which opens at Madison Square Garden Oct. 22-29. Nelson C. Durand, vice-president and general manager, and C. S. Osborne, his assistant, will be on hand to welcome callers.

WHAT JC'SH BILLINGS SAID.

Josh Billings says he "admires a rooster for two things. one is the crow that is in him, and the other the spurs that he has on him to back up his crow." This can be applied to the man. We admire him for the noise that he can make, if he is capable and has the business ability and personality to back up this noise.

HOW DO YOU ORDER DINNER?

You don't order part of your meal in one Restaurant, because they serve that portion to suit you, and the balance in another.

YOU EAT YOUR ENTIRE MEAL IN ONE PLACE

You select a Restaurant that will serve your entire meal to your taste and satisfaction. It is there you give your entire order.

BLACKMAN DOES NOT RUN A RESTAURANT

No; but BLACKMAN fills orders for the particular Dealers and serves them with EDISON and VICTOR goods as they want the order assorted, and the service is the best.

HOW DO YOU ORDER EDISON AND VICTOR GOODS?

Are you ordering EDISON from one jobber and VICTOR from another, waiting for TWO shipments and paying TWO expressages? Stop it.

BE ECONOMICAL—ORDER FROM BLACKMAN

BLACKMAN keeps a FULL LINE of all EDISON and VICTOR goods, therefore SAVES YOU MONEY, for you need only make out ONE order, pay ONE expressage. Send in a trial order NOW and let BLACKMAN take care of your holiday requirements.

There is no worry on BLACKMAN'S part about "MAKING GOOD," and there will be none on your part after a trial, for "Satisfaction at Blackman's costs no more than dissatisfaction elsewhere."

EVERYTHING FOR EDISON OR VICTOR

ROYAL PATRONS OF LANDAY BROS.

Duke de Montpensier Buys a Victrola and a Supply of Red Seal Records to Accompany Him on His Hunting Trip to India.

Distinguished people are not uncommon visitors at the store of Landay Bros., 400 Fifth avenue, New York. The latest caller was the Duke de Montpensier, a brother of the Queen Mother of Portugal, whose recent sad experiences in connection with the establishment of a republic in that country every newspaper reader is familiar

DEALERS' ASSOCIATION MEETING.

Regular Quarterly Session Held at New Grand Hotel on Wednesday—President Storck Reports on Visit to Factories—Many Matters of Trade Interest Discussed—Next Meeting, November 9, 1910.

The regular quarterly meeting of the Eastern States Talking Machine Dealers' Association was held on Wednesday morning at the New Grand Hotel and, although the attendance was rather slim, owing to the holiday, some matters of great

that the full membership of the association will be in attendance.

It might be stated here that the privilege of joining in the discussions regarding the best methods of conducting a retail talking machine business and the benefits gained therefrom are well worth the cost of membership in the association and the time devoted to attending the meetings.

ANOTHER VICTORY FOR THE VICTOR DOG

Though the fame of the Victor dog has gone around the world, it seems there are other honors coming his way besides the celebrity accruing from being the best known trade-mark. The very much alive specimens of the canine species are now recognizing him as a friend and brother in the most approved dog fashion.

At the entrance of Sol Bloom's place on Fifth avenue, New York, is placed a plaster cast—familiar to the trade—of the Victor dog, so that it appears to be peering around the corner and looking down the street. The other day a lady was strolling up the avenue with a cocky little Pommeranian in leash. As they approached Mr. Bloom's store the Pommeranian spied the Victor dog, and with a bound was up in front of the plaster animal, going through the usual performances, barking furiously and extending the "right hand of fellowship."

The mistress of the Pommeranian, beside herself with laughter, drew away her "own precious darling," but with the utmost difficulty and for a block her pet kept up a series of barks, dancing around energetically in his efforts to get back to the Victor trade-mark, who stood silent and stolid, indifferent to the fussy antics of his brother in the flesh, and on the old job of listening to "His Master's Voice."

VICTOR CO.'S ALPHABETICAL CATALOG.

(Special to The Talking Machine World.)

Philadelphia, Pa., Oct. 3, 1910.

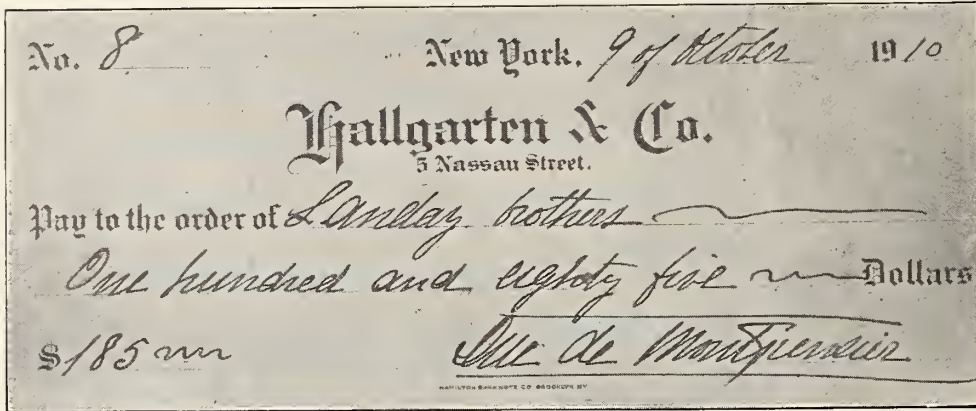

After an unavoidable delay, caused by the manufacturer holding them up for six weeks, the Victor Talking Machine Co., Camden, N. J., has forwarded the trade alphabetical and numerical catalogs, with thumb indices (something new). In connection therewith they say: "While these catalogs are not what we expected they would be, they are the best the manufacturer could turn out, and we assure you that the next ones, coming out November 1, will not only be cut properly, but will reach you within a reasonable date; that is, within a few days of November 1."

Subsequently the company sent out a special supplement for twelve double-faced Bohemian records by the Ceské Trio, z Prahy, the famous Bohemian organization now touring America. These records were specially recorded to meet the growing demand for records of this class, and those who know tell us they are the best Bohemian instrumental records ever issued.

LIGHTNER OFF TO SOUTH AMERICA.

Charles Ferree Lightner, who represents the export department of the Victor Talking Machine Co., Camden, N. J., with headquarters in Buenos Ayres, Argentina, sailed for that part of the world again September 21, on the "Mauretania," of the Cunard line. Mr. Lightner has been home since August 3, and his departure for his foreign field of activity is in the nature of a surprise to many friends in the trade. His journey via Europe expedites reaching his destination by a week or more, going direct or traveling down the coast by the so-called American line that flies the British flag and is owned by European capitalists.

In the export department of the Columbia Phonograph Co., General, Edward N. Burns, general manager, said that Harry L. Marks, of the recording laboratory corps, who has been in Asia co-operating with J. H. Dorian, the Columbia's representative in that part of the world, obtaining Chinese, Japanese and other native records, had sailed from Hong Kong, China. He arrived in New York on October 5.

DUKE DE MONTPENSIER'S CHECK TO LANDAY BROS.

with. The Duke, who was stopping at the Hotel Knickerbocker, is en route to India, via San Francisco, on a hunting expedition, and, desiring to take along something in the form of musical entertainment to while away the tedium of the camp, purchased a Victrola XII, for ease of transportation, and a quantity of Red Seal records.

After sending to Landay Bros. for a Victor catalog from the hotel, the Duke called in person, selected the Victrola and the records, thanked Max Landay for the courtesy with which he had been treated and drew his check, a fac-simile of which is herewith reproduced, for the amount of the purchase. Max is now looking for the uncle of the Chinese Emperor to drop in any day, as the firm are now up on royalty stunts.

L. C. McChesney, advertising manager of the National Phonograph Co., returned September 21 from a trip to Detroit, Toronto and Montreal. Mr. McChesney speaks enthusiastically of the prospect of trade in Edison goods throughout the Dominion this fall and winter.

interest to the association were discussed at length and settled to the satisfaction of those present. The members were particularly interested in ways and means of providing for a system of relieving the dealer of a large surplus stock of records, which would be favorable to both the dealer and the manufacturer and yet would not inflict heavy loss on either party. Plans now in force or under consideration, while satisfactory in a general way, it was said, were rather confusing to the public and numerous suggestions were made by those present as to means for improvement.

President Storck, of the association, made a report as to what he accomplished upon his recent visits to the plants of the National and Victor Cos., wherein he stated that progress had been made and that the suggestions put forth in accordance with the resolutions passed by the association had received the consideration of the officials of both companies.

Following the final disposal of a number of routine matters, the meeting was adjourned until the second Wednesday in November in the hope

UDELL Cabinets for Victrolas No. 10 and No. 11

CABINET No. 451½

Mahogany or Oak.
Holds 160 12-inch Disc Records. This Cabinet fits New No. X Victrola Box.

No sooner did we hear that The Victor Talking Machine Company had brought out Victrolas Nos. 10 and 11 than we made drawings and photos.

The point we want you to realize is that we have designed our Cabinets to harmonize perfectly with the Victrolas and have put rims around the top of the cabinets in which the Victrola can be set and it looks like one piece. Now Udell Cabinets for Disc Records can be had with 3 kinds of interiors, upright wooden partitions, 6 Discs to the partition; flat wooden shelves, 6 Discs to the division; upright cardboard divisions, 1 Disc to the division. We want you to write us for Blueprints and prices. Of course our line of Cabinets for Disc and Cylinder Records is very complete and you should have illustrations of every Udell Cabinet. This is the harvest time for Cabinet Sales and time spent in pushing Cabinets will result in fine profits.

Write while you read to

THE UDELL WORKS, Indianapolis, Indiana

LANDAY BROS.' NEW WINDOW FRONT.

Arrangements Consummated for Complete Remodeling of Premises, 400 Fifth Avenue.

An entirely new front is to replace the one on the building occupied by Landay Bros., 400 Fifth avenue, New York. The architecture will be of an ornate character, yet along good lines. The interior will also be remodeled, rearranged to suit the business and handsomely refitted and decorated. Plate glass mirrors will line the hallway, and a beautiful stairway, after the style followed in the Cafe de l'Opera restaurant, this city, will be the piece de resistance of the rebuilt establishment. There will be no suspension of business while the changes are being made. At present each demonstrating booth in the place has an individual telephone, so that visitors are at liberty to make calls at their convenience while listening to the records. Other improvements will be added that will further contribute to the comfort and pleasure of customers. The space devoted to the executive offices will also be materially enlarged.

DEATH OF M. M. JOSLYN.

Superintendent of Stamping and Roll Department of Nipponophone Co., Tokyo, Japan, Passes Away in That City—J. C. Prescott, Manager of Company.

After a brief illness, Marshall M. Joslyn, superintendent of the stamping and roll department of the Nipponophone Co., manufacturers of machines and records, Tokyo, Japan, died in the general hospital at Yokohama, September 8, of cerebro-spinal meningitis. He had been stricken only four days and he received the best medical attention, but without avail.

The deceased had been in the employ of the Nipponophone Co. for nearly a year, having come from America for that purpose. He was about thirty-eight years old and is survived by a wife and son at Springfield, Mass. Mr. Joslyn was considered by the directors of his company as one of their most valued employes and his death is felt as a very big loss by them.

The body was cremated and shipped to his home in the United States, previous to which funeral services, according to the Masonic rites, of which order Mr. Joslyn was a member, were held on the day following his death. Mr. Joslyn was formerly in charge of the pressing plant of the American Record Co., defunct, at Springfield, Mass.

J. O. Prescott, also with the same company, as manager of the American Record Co.'s recording laboratory in New York, and one of the clever men of the business, is general manager of the Nipponophone Co., going to Japan a couple of years ago to assume that position.

THE "SIMPLEX" A HIT.

Judging from the manner in which the trade has taken to the "Simplex Needle Box" its success is a foregone conclusion. The S. B. Davega Co., who introduced the "Simplex," say: "Although our new Simplex needle box is now on the market but one month, it has met with a very cordial reception that has entirely exceeded our expectations. Over 90 per cent. of all the dealers to whom it has been shown have placed orders for it, and the orders received on the strength of samples requested in reply to our "ad" in The Talking Machine World are indeed very encouraging. We firmly believe that if the dealers use a little effort they can sell many dozens." Look up the "Simplex" ad in this issue.

The advance sale of the new Victrolas—X, XI and XIV—fully described and adequately illustrated in the September issue of The World, is reported to have more than trebled the original estimates. Since this announcement the distributors have been adding to their orders accordingly. Deliveries are said to be about due.

The Talking Machine Supply Co., 400 Fifth avenue, New York, received this week a shipment of 25,000,000 needles from their German factory. Others will follow to meet the growing demand for this specialty of the company.

O'NEILL WITH DROOP & SONS CO.

Daniel O'Neill, late on the traveling staff of the Victor Talking Machine Co., Camden, N. J., has resigned to take charge of the talking machine department of the E. F. Droop & Sons Co., the leading music house of Washington, D. C.

GREETINGS FOR WESTERNERS.

Sunday night last the Hotel Knickerbocker, New York, witnessed a notable gathering of talking machine men, who called to pay their respects to L. C. Wiswell, manager of the talking machine department of Lyon & Healy, Chicago, and Lawrence H. Lucker, of the Minnesota Phonograph Co., Minneapolis, Minn., who were putting up there. The party included C. H. Wilson, general manager, and F. K. Dolbeer, sales manager, of the National Phonograph Co., Orange, N. J.; C. G. Child, manager of the recording laboratory, and George D. Ornstein, manager of the traveling staff of the Victor Talking Machine Co., Camden,

N. J.; O. A. Gressing, manager of the talking machine department of the Aeolian Co., New York; and Harry Macdonough, of the "talent." It was a pleasant evening all around and everybody present was a good "mixer."

BARKLOW RESIGNS.

B. R. Barklow, who has been with the National Phonograph Co., Orange, N. J., for a number of years, looking after the trade in the metropolitan district, has resigned. It is his intention, however, to stay in the trade, and he will probably "hook up" with the—well, that would be telling trade secrets.

The Aeolian Co., New York, are displaying a fine sample of the Victrola XVI, mahogany, in their beautifully remodeled show windows. It is a striking exhibit, alongside an elegant Weber grand in the same wood.

No one is safe who concludes his work for the unnecessary waste of energy. We should have force enough for what we need.

The Special Wanamaker Jobbing Service for the TALKING MACHINE TRADE

The Wanamaker Stores, by reason of their very large retail delivery, are able to offer unusually prompt service, without cost, to talking machine dealers in their neighborhoods. This includes a very large territory surrounding both the New York and Philadelphia Stores.

Edison Phonographs, Victor Talking Machines, also Records and Supplies, will be sold at wholesale and delivered direct to your place of business by the regular Wanamaker Wagon Service, if within the regular free delivery district of either store.

As contracts are necessary from dealers in Edison or Victor goods, they should be executed with us now, before the Fall business becomes too strenuous. A trial order will illustrate the benefit.

GEO. W. LYLE DISCUSSES SITUATION

**Upon Return from Extended Western Trip—
Reports Business Conditions to Be Most Re-
assuring—The Growth of the Columbia Co.
Business—Policy of Exclusive Selling Rights.**

George W. Lyle, general manager of the Columbia Phonograph Co., returned recently from a trip to the Pacific Coast, during which he visited all the principal cities of the country, including Pittsburg, Chicago, Minneapolis, Livingston, Mont.; Spokane, Seattle, Portland, San Francisco, Los Angeles, Salt Lake City, Denver, Kansas City and St. Louis.

In an interview with The World Mr. Lyle said: "Business was most assuring. Pretty good business is general everywhere. The graphophone business is a lot better than pretty good. The confidence of the trade in the future of a high grade instrument is most encouraging, and the prospects were never more promising."

Mr. Lyle stated that the Columbia business so far this season has been remarkable; in fact, even now, so early in the fall, the Columbia output is no less than 90 per cent. ahead of the corresponding period of last year—and with an average of 112 new Columbia dealers stocking up every month, and established dealers confidently re-ordering, a shortage of product may be inevitable a little later on, and the dealer who looks ahead over six weeks should get out his order book. Mr. Lyle said that in spite of increased facilities at the Columbia factories and a large addition to their mechanical force, this possibility of shortage is unavoidable, which means that dealers who delay ordering their middle-winter stock will be right up against it. "Dealers have come to realize," said Mr. Lyle,

GEO. W. LYLE.

"that to work the business thoroughly they must have a complete stock—not necessarily a heavy one—in order to be prepared at least for the business that comes to their doors. I might mention that a good deal of business will walk into Columbia doors this coming season. Our widespread advertising is having a decided influence, and as the

lines will be spread out yet further, it is difficult to estimate the outside limit of the coming increase.

"The working out of the Columbia policy of exclusive selling rights, which forms such a prominent feature of the Columbia trade paper advertising, has been very much before my notice on this trip. Our dealers are most enthusiastic in expressing themselves on this phase of the Columbia policy—especially so in the case of those dealers who have been signed up with us some time.

"They appreciate the fact that the capital and energy they have devoted to working up and developing their territory is secure from the ever-ready claim-jumper. They can go to sleep at night without any thought of waking up in the morning and finding a new competitor opening up with the same line of goods and planning to build on the foundation they have established. Columbia exclusive selling rights are proving more and more a real tangible inducement to responsible business-like dealers. Its endorsement as a Columbia policy has been exactly what we predicted to ourselves and to the trade.

"Outside of the Columbia exclusive selling rights offer, the question before the dealer is just this: Big business is going to be done this season. Is he going to be certain of doing his share by getting his stock in early, or will he take put luck? You can depend on our doing our utmost to take care of our dealers' orders, but there never was a time when promptness in ordering could be made to earn more certain profit."

No man is as stupid as he who is unsuccessful and stubbornly persists in holding to the methods that make him so, refusing to try up-to-date methods because he "does not believe in them."

SAVE 33¹/₃% ON CABINETS

Entire Stock of the Herzog Art Furniture Co. Closed out to Neal, Clark & Neal Co., Buffalo

Dealers can greatly increase their record sales and thus increase their profits by selling each of their customers a cabinet on the \$1 per week plan. Sell cabinet at cost if necessary. Your customers will call weekly to pay and will begin to buy records again because they have a place to put them. Hundreds of dealers are making money this way. Why not you? All cabinets are mahogany finish except No. 724.

Cabinets hold following records: No. 700, 100; No. 701, 96; No. 704, 120; No. 714, 216; No. 718, 252; No. 724, 215; No. 703, 100; No. 702, 120; No. 706, 150; No. 715, 150; No. 719, 150; No. 712, 216; No. 713, 216; No. 717, 252; No. 720, 294; No. 722, 294; No. 708, 150; No. 707, 150.

EDISON and VICTOR JOBBERS

TIMELY TALKS ON TIMELY TOPICS

Another leading—in fact, one of the most prominent—piano firms in New York City may shortly follow the excellent example of the Aeolian Co. and put in a line of talking machines. The matter has doubtless been seriously considered for some time and has about reached that stage where the salesman of the manufacturer of the records and machines in question has his fountain pen in hand ready to write the order. When it is entered it will represent a good round sum, and the gentleman who landed the prize may be warmly congratulated on his finesse and success as a gilt-edge crackjack in his line.

This house is especially favorable in their location, and when a sample of the talking machine company's high-price line is displayed in the window it will compare very handsomely with the choice products of the piano maker's art standing alongside. It may also be added that just what

A Great Business Opportunity

Edison dealer in large Western town, having a fine retail trade desires to retire from business on account of outside matters. A splendid opportunity for one or two young men to secure an established business on a very satisfactory basis. A special discount of 20% will be allowed on inventory list. Do not miss this opportunity. Write and obtain particulars.

Address W. A. M., care The Talking Machine World, 1 Madison Avenue, New York.

space will be assigned to the new department is now under consideration. They have not only plenty of room, but the kind that will lend itself kindly to the display of talking machines and the installation of several liberal size demonstrating booths. As the assistant manager of Wanamaker's talking machine department truly said the other day: "I believe the time will come when every first-class piano house will have a full-fledged annex of this kind. The talking machine line is not only a very pleasing and satisfactory one to handle, but also profitable besides."

The departure of Paul H. Cromelin, vice-president of the Columbia Phonograph Co., General, for England, last week, as reported elsewhere in the news columns of *The World*, arouses interest again in the copyright question from the British point of view. The American record manufacturers are directly concerned in legislation bearing on copyright matters in every country of the world, and especially when the laws of the English-speaking people have a bearing. As stated, the copyright bill prepared to be introduced into Parliament when it convenes is inimical to the makers of records, hence the anxiety relative to its ultimate enactment in its present form.

As will be recalled, Frank L. Dyer, president of the National Phonograph Co., Orange, N. J., appeared before the British Board of Trade in July of last year to give his views of the copyright situation from the standpoint of the American talking machine trade. As reported in *The World* on his return, Mr. Dyer was satisfied the Copyright Committee of the Board of Trade were antagonistic to the interests of the business of which he is so distinguished a representative. E. Trevor Williams, president of the Gramophone Co., London, was a member of the committee itself, and while signing the report with his colleagues, some of the most eminent men in Great Britain, ventured to "dissent from some of their conclusions," and made a supplementary statement in connection therewith. Among other questions considered by Mr. Williams, he conceded "that the authors of musical works should have protection against the adaptation of their works to instruments which can reproduce them mechanically," but submitted that the "vested interests involved can only be properly or even adequately preserved under any new legislation . . . by providing for some form of compulsory license for the future." In the new bill favored by the British Government no provision is made for compulsory license of royalty charge, and therefore Mr. Cromelin is now in London to look after this serious omission or fault, if you please, which is a grave injustice to the trade.

SUCCESS OF THE EDISON DISPLAY

At the Boston Mechanics' Exhibition—Seating Capacity of the Booth Taxed at All Times—Those in Charge—Numerous Trade Visitors—Local Jobbers Interested.

(Special to *The Talking Machine World*.)

Boston, Mass., Oct. 11, 1910.

The display of the National Phonograph Co., in connection with the exhibit of Edison Laboratory Products at the Boston Mechanics' Exhibition, which opened on October 1, is proving one of the most successful features of the exhibition. The arrangement of the booth, which was illustrated and described at length in last month's *World*, could hardly be improved upon, and the displays of moving pictures and demonstrations of the phonograph alternating serve to tax the seating capacity of the booth, given at 300, to its capacity throughout the hours during which the show is open.

In response to invitations sent out to the New England trade by the National Co., and several of the local jobbers, a large number of dealers have attended the exhibit and have been enthusiastic in their praise of the method of attracting the attention of the public to the Edison products.

H. R. Skelton, their indefatigable worker in the East, is managing the exposition, and the best evidence of its success is the actual sales transacted in the hall.

Two local Edison jobbers affiliated with the display are the Linscott Sporting Goods Co. (formerly the Boston Cycle & Sundry Co.) and the Iver Johnson Co. The Linscott Sporting Goods Co., under the direction of Charles R. Cooper, manager, have fitted up an elegant apartment and are running hourly concerts. F. S. Boyd, the I. J. talking machine manager, has charge of their exhibit. Both concerns report retail sales as well as wholesale bookings.

Manager Skelton is certainly the busiest of the busy, being on the floor at 8.30 and remaining there till 11 at night. He is handling the public with great skill, and the exposition itself, plus the many sales made, stamps this the most successful exhibit ever held for the promotion of Edison products.

SONORA

The Instrument of Quality

Highest Talking and Class Machines Records

Style B.

In Sonora Talking Machines there is embodied every desirable feature that is known in the construction, the appearance, and the tone that any market's best product presents—then, there are many which are distinctively Sonora's own, and which help to remove the phonograph from being the toy that it once was. At other times, we have enumerated Sonora's various special features in these columns—and we shall again—but today let us point mainly to the **Tone Moderator**—a simple, unobtrusive contrivance which has endeared itself to everyone who owns a machine thus equipped. All our instruments from \$50. up have that attachment.

Sonora Machines list at \$25, \$40, \$50, \$60, \$75, \$100, \$200, and every style represents surprising value.

Record Stands and Cabinets at \$10, \$30, \$50.

And as to deliveries, Mr. Dealer,—Just make a noise like an order, and watch the echo—from

PROMINENT WESTERN VISITORS.

L. C. Wiswell and L. H. Lucker Call on Local Jobbers and Visit National and Victor Factories—Report Excellent Business.

L. C. Wiswell, manager of the talking machine department of Lyon & Healy, Chicago, and Lawrence H. Lucker, head of the Minnesota Phonograph Co., Minneapolis, Minn., were among the trade visitors to the metropolis this week. They visited the factory of the National Phonograph Co. in Orange, N. J., on Monday and, after calling upon J. N. Blackman and other New York jobbers, left for Camden on Tuesday to call at the Victor Co. factory.

Both Mr. Lucker and Mr. Wiswell expressed themselves as being well satisfied with the present condition of their trade and were decidedly enthusiastic regarding the outlook for the coming months. The new Victrola models and the propositions offered to the public by the National Co. are stimulating talking machine business in great shape in the West.

Previous to starting from New York for home, on the 11th inst., Mr. Lucker said to *The World*: “Both Mr. Wiswell and myself came East purposely to see about getting more goods from both the National and Victor Cos., and you know we visited each of the factories. Neither Lyon & Healy nor the Minnesota Phonograph Co. are obtaining what we want, particularly for the holiday trade. The Victrolas are selling so fast that our company are unable to keep up with orders. Notwithstanding I had already placed a good order with the Victor Co. my stock is fading away, and when in Camden I ordered 200 Victrolas more and I expect a carload next week. The Victor plant is simply overwhelmed with business, and while Mr. Geissler was offered some very handsome Victrola orders if he would give them the preference or guarantee their delivery, he declined to accept them, stating as his reason that the company would treat everybody alike as regards shipments and would play no favorites.

“Our business,” continued Mr. Lucker, “is now starting up and I feel assured it will be excellent from now on. In fact, in my conversation with other jobbers they all say trade is opening up in fine shape and no fear need be felt as to the outcome of the holiday sales. We have had poor crops in Minnesota, but, notwithstanding, this will not affect our business. The awful fires in the northern part of the State will not influence either. While the immense tracts of timber have been burned off, very few people lived in the tract destroyed.

“Incidentally I may mention that our company is getting to be quite a matrimonial bureau. Three of our men are about to be married—that is to say, on the 18th of this month. The three lucky fellows are Ralph Crolius, business manager of the phonograph department; Emil Steinnitz and Milton Lowy. February next my brother and partner, William A. Lucker, also becomes a benedict. Why don't I follow suit? Well, I cannot find any body. My mother and sister were in New

York a couple of weeks ago and they had a very enjoyable time, and in great measure I am indebted to Max Landay for extending them not a few courtesies.

“I leave to-night for the West, picking up Mr. Wiswell in Philadelphia, and we will travel together. I will also stop in Pittsburg and Chicago, visit Lawrence McGreal in Milwaukee and then home.”

BAGSHAW, THE NEEDLE INVENTOR.

Established Present Business in 1870 and Has Steadily Forged to the Front—How He Started to Make Talking Machine Needles.

(Special to *The Talking Machine World*.)

Lowell, Mass., Oct. 9, 1910.

Herewith appears an excellent likeness of the late W. H. Bagshaw, who in 1870 established the

W. H. BAGSHAW.

needle business bearing his name. Not only is he reputed to be the first maker of disc talking machine needles in the world, but the present executives claim that the house of Bagshaw is now and always has been the largest manufacturer.

To have the honor of making the first needles in the trade is indeed worthy of comment. At the very beginning of the talking machine industry the late W. H. Bagshaw received an order for a peculiar kind of needle from a man who refused to divulge what he wanted to use it for. Although handicapped by the lack of this information, he created a needle that answered the buyer's purpose, and while ordered in immense quantities for that time, same would be considered but small orders now. After a lapse of about a year, when talking machines began to be known, the late Mr. Bagshaw discovered for what purpose his needles

were being used, and by making a study of conditions so perfected a needle that with minor changes is being sold all over the world to-day.

Mr. Bagshaw's business developed with the trade, not only in magnitude but with the many needle varieties that are required for the successful interpretation of the many kinds of talking machine subjects. In fact, all styles, shapes and sizes are made, with no order being too small to have careful attention and no order too large for the facilities of their plant.

THE PLEASURE OF WORK.

Some Views of H. G. Selfridge on This Subject—Most Interesting of Games to Play—Well Worth While.

“Business is by far the most interesting game that we can play, unless, indeed, the game of life is considered, in which case business forms only a part, but a most important part of that greater game of life. “Sir Thomas Lipton has in his office a caption: ‘The greatest fun is work’; and I myself thoroughly agree with this sentiment if the work is accompanied by thought and interest.

“Life should certainly be given up to some accomplishment, and without it, it really becomes a serious question as to whether Mr. Mallock's ‘Is life worth living?’ should be answered in the positive or not. But with an object with a well thought out, intelligent, carefully planned object sufficiently far ahead so that one cannot overtake it too quickly, with the daily progress toward the accomplishment of this object imminent, with the ability to replace the target farther away, and again strive to reach it—with all these things as the daily occupation of the mind and body, life certainly is worth living.

“It would have been a much simpler thing for me to have remained a retired business man than to have come to London to play this game, but in one case life would have been extremely prosaic, while on the other hand it is filled with interest, excitement and pleasure, and I may say with a carefully thought out plan daily reaching nearer its object.”

A successful business man thinks out his business and then works out his thoughts. He does not sit down and wait for business to come to him, but thinks and devises means by which to draw trade. He is constantly planning and scheming to attract people to his store, and is also on the lookout for up-to-date methods in advertising, in selling goods, in store system, and in everything that will assist him to satisfy his customers and get results.

The ideal long entertained by the talking machine trade has been realized.

THE PERMANENT JEWEL NEEDLE

A permanent disc needle has been invented, patented, and is ready for the market.

For All Disc Talking Machines

NOT AN EXPERIMENT—THOROUGHLY TESTED

Protected by U. S. Patents

No more changing of Needles. No sharpening. No bother. Simply insert the Shank in the Needle Arm. That's all! But the permanency is only one feature of this remarkable Needle.

It does not wear the record.

It secures perfect reproductions.

It gets a full, round, beautiful tone.

Made in loud, soft and medium tone. The soft tone Needle, in particular, is a revelation. It gets the full efficiency of the voices of the great singers, with the volume modified for the home. It's the artist's Needle. The medium and loud tone Needles are equally meritorious.

There are big sales opportunities in this Needle.

Every owner of a talking machine in your section will want a Permanent Jewel the minute he hears it. Some will buy three—loud, medium and soft.

Be a progressive and stock these Needles Now.

RETAIL PRICE, \$2 EACH

Subject to Regular Trade Discount

Every owner of a disc machine in your section will want one on sight (and hearing).

THE PERMANENT NEEDLE SALES CO.

14 State St.

Chicago, Ill.

The Permanent Jewel needle consists of a small, highly polished garnet firmly set in a metal shank.

LYON & HEALY'S TALKING MACHINE SALESROOMS

(Special to The Talking Machine World.)

Chicago, Ill., Oct. 8, 1910.

Frequent references have been made in this paper to the enlarged, remodeled and redecorated talking machine salesrooms of Lyon & Healy, which, with Victor Hall, now occupy the entire Adams street side of the big store, and in the two

It should be emphasized that these extensive quarters are devoted entirely to machine sales. The record department, with its twelve spacious testing rooms, is being located on the fifth floor. The machine salesrooms, therefore, in addition to their artistic beauty, claim distinction on account of the space occupied. Figuring in Victor Hall,

VIEW OF LYON & HEALY'S NEW RETAIL MACHINE SALESROOMS.

months since they were completed many visiting dealers have admired their artistic beauty and the perfection of their appointments.

This month it is possible to reproduce several photographs which, while they give some idea of the arrangement and the design of the decorations, fail, of course, to convey any conception of the artistic effect arising from the exquisite color scheme.

which is a vital factor in the sale of machines and can be instantly converted into a salesroom, something that is usually done in the busy holiday season, this department covers about three thousand feet of floor space.

Five years ago there was but one very small salesroom in addition to Victor Hall. Now, although the recital hall has been enlarged by a third, there are five commodious rooms, permit-

LYON & HEALY'S RETAIL MACHINE SALES DEPARTMENT—VICTOR HALL.

ting the caring for of a number of customers simultaneously and to excellent advantage. These rooms are connected by folding glass doors and can therefore be thrown practically into one, as shown in the illustration, or can be closed off, enabling the salesman to wait on his customers undisturbed by groups in adjoining rooms. When thus closed off the rooms are sound proof.

The whole decorative scheme, distinctly art nouveau, is simply superb in plan and treatment. The walls and ceiling are treated throughout in varying shades of browns and tans. Any tendency to monotony is relieved by the warm and yet subdued colors of the friezes and dados which, while original in design, are somewhat suggestive of the Egyptian in effect. The beautiful draperies harmonize exquisitely with the general scheme, and were especially designed and made by one of the most celebrated houses in the country. The woodwork is of antique oak, with chairs and settees to match. The hardwood floors are covered with rugs in quiet brown tones.

The whole effect is indescribably rich and artistic, without being in the least ostentatious. The homelikeness of the "parlors," a term one feels constrained to use in speaking of the salesrooms, is very marked. There is no glaring display of color anywhere, yet there is not the slightest suggestion of sombreness. The effect is at once cheerful, soothing and restful. Clusters of tungsten lamps spread a softened radiance over all. The air is kept pure by ventilators in the ceiling, through which the impure air is drawn by means of concealed fans.

The scene in Victor Hall is a typical one, observable almost any hour in the day. In the morning Edison concerts are given, while the Victor recitals commence at 12 m. and continue until 5 p. m., with ten minute intermissions. The concerts last fifty minutes, a different program being rendered each hour during the day. The programs for the entire day are printed in a handsome booklet. While operatic and classical music predominate in these concerts, there is a liberal sprinkling of the popular. There is no question but that Victor Hall has been largely instrumental in building up Lyon & Healy's immense local retail business, and has been the means of interesting many people in the better class of music. An unique feature of the recitals, which never fails to elicit applause from the audiences, is the occasional playing of an accompaniment on a grand piano to Caruso, or one of the other Red Seal artists, by Mr. Russell, who has charge of the concert room.

Passing through Victor Hall one enters a room devoted to the I. C. S. language course and Edison machines. Adjoining is another Edison room, where Amberolas are shown, and it is in this room which appears in the foreground of the photograph giving a general view of the salesroom. Then follow three Victor rooms, the last one being devoted entirely to Victrolas, the beautiful instruments being displayed in all the different styles and finishes.

Mr. Wiswell, who is the manager of the Lyon & Healy talking machine department; Mr. Vacey, who has charge of the retail machine sales, and his assistant, Mr. Otto, are all very enthusiastic regarding the new salesrooms and the effect of the artistic surroundings and the remarkable display of goods, on the minds of prospective patrons.

NEW SONORA CATALOG.

The catalog of the Sonora Phonograph Co., 78 Reade street, New York, illustrates and describes their full line of records and machines, together with motors, needles, stands, cabinets and other accessories. The styles presented are O and P, A, B, C and D, F and G, each a separate cabinet design in various woods and finishes. A detailed description of the mechanical parts, an interesting statement in itself, is also supplied. The records, of which a complete list is now being prepared for the trade, are the vertical cut, with the sapphire as the reproducing point, the musical results being considered not only pleasing by experts, but, as the company's trade-mark says, "clear as a bell."

Columbia Grafonolas and Columbia Grand Opera Records make the surest possible combination to fill up the blank pages in your bank book.

Columbia Phonograph Co., Genl., Tribune Building, New York.

NEW CONCERN IN DETROIT.

Henry S. Doran Phonograph Co., Recently Incorporated to Act as Distributers in Michigan for U. S. Phonograph Co.

(Special to The Talking Machine World.)

Detroit, Mich., Oct. 11, 1910.

The Henry S. Doran Phonograph Co. has been incorporated with a capital of \$20,000, of which \$10,000 is paid in. The officers are: President, Henry S. Doran; vice-president, Bruce Carpenter; secretary and treasurer, Charles A. Bush; general manager, James J. Bennett. The foregoing, with John C. Garvey, James Carmichael and James J. Bennett, are the directors. The Doran Phonograph Co. recently purchased the entire stock of the Mazer Phonograph Co. on Michigan avenue, and will conduct an exclusive talking machine business at the same location.

The Doran Phonograph Co. will in the future be the distributing agents in Michigan for the United States Phonograph Co., of Cleveland, and it will also handle all standard machines and records.

Mr. Bennett and Mr. Carpenter have long been identified with the talking machine trade as salesmen with the American Phonograph Co. Mr. Bennett will personally look after the trade in the State, and expects to make a trip in a short time to appoint agents to handle their line of talking machines.

NEW RECORD COMPANY IN NEW YORK.

Imperial Record Co., New York, to Market an Indestructible Cylinder Record to Retail for Fifteen Cents—Plant Now in Operation.

Another arrival in the field is the Imperial Record Co., New York, who propose putting on the market an indestructible cylinder record, which it is proposed to retail for fifteen cents. They will not make a machine. George Emerson, formerly connected with the recording laboratory of the Columbia Phonograph Co., and a brother of Victor H. Emerson, the manager of the latter department, with I. H. Whitman, at one time interested in the Cameraphone Co., a synchronous moving picture proposition, now defunct, are officers of the Imperial Co. Mr. Emerson was also associated with Mr. Whitman in the same enterprise. A recording and manufacturing plant is now in operation. It is also proposed to issue a list of six records weekly, confined to popular selections, and the records will be ready for delivery within four days of completing the master.

Industry and commerce are simply supplying one another's wants or needs, and it does not consist in getting all you can and in giving as little as possible in return, which is dishonest because it is unscientific, and unscientific because it is dishonest.

TWO NEW UDELL CABINETS.

Designed to Hold the New Styles X and XI Victrolas—Finished in Either Mahogany or Oak, and with Special Rim on Top.

With their customary progressiveness, the Udell Works, Indianapolis, Ind., have announced two new record cabinet numbers, 451 $\frac{1}{4}$ and 442, designed to hold the new Victrolas X and XI and to harmonize perfectly with the casework of those machines. The cabinet illustrated herewith

NEW UDELL STYLE 442.

is No. 442. It comes in either mahogany or oak and has a capacity of 190 12-inch disc records. There is a rim around the top of the cabinet within which the machine case fits perfectly, making both machine and record cabinet look like one piece. This new announcement of the Udell Works, coming as it does at practically the same time that the new Victrola is placed on the market, will be greatly appreciated by progressive dealers, who are already familiar with the undisputed merit of the Udell line of cabinets.

The Frisbee Piano House, Wilkes-Barre, Pa., is a new Columbia dealer and has placed a substantial order for the entire line.

Another new Columbia dealer is Samuel Nittinger, Philadelphia, Pa.

Volume of September Business Satisfactory to Chicago Jobbers and Dealers—Some Large Deals Put Through—Active Preparations for Heavy Holiday Trade—New Styles of Victrolas Make a Hit with Western Trade—Recent Visitors of Note—What the Representatives of the Manufacturers Report—Geo. H. White Invents New Stringed Horn—News of the Travelers—Lyon & Healy Record Cabinets Prove Popular—Recital Hall for Wurlitzer Co.—Changes Among Managers and Salesmen—A Jobbers' Association Announcement—Uses 'Phone to Demonstrate Records—Aeolian Co. Department a Scene of Activity—Summary of the Month's Trade News.

(Special to The Talking Machine World.)

Chicago, Ill., Oct. 8, 1910.

September gave a decidedly satisfactory account of itself from the viewpoint of Chicago jobbers. In a couple of instances it is reported to have been a record breaker for the first Fall month. This was possibly owing in great measure to individual deals of particularly noticeable size, to the placing of orders by some of the more important accounts carried by Chicago jobbers and established within the past year, and to incursions into territory not hitherto cultivated with especial earnestness by the local houses. Nevertheless it also reflects a good, brisk demand from practically all the middle western States, which constitute the principal boundary of the Chicago jobbers.

The dealers in the smaller towns and cities while not, as a rule, placing heavy stock orders, are at the same time buying with a frequency that shows they are having a good business, and a growing tendency to anticipate their wants is noted.

September a Good Month.

Business has been growing steadily in strength and volume since the first of September. The second half of last month was immeasurably better than the first, and October is showing a still further quickening of trade. Local retail business is characterized in most quarters as good. It has developed particularly in the past fortnight and the showing made by several of the leading houses so early in the season is taken to be indicative of particularly good things later on. Everyone is looking for a great holiday trade and preparations are making for it.

New Victrolas Please Trade.

The announcement of the three new Victrola styles by the Victor Co. has been the subject of extended comment in the trade, and that heard by your representative has been invariably of the most favorable nature. According to the jobbers, dealers have already shown their interest by the placing of orders for the new types, reaching large numbers in the aggregate. The commencement of shipments is eagerly awaited. Advices received within the past day or two are to the effect that limited shipments of the X and XI will be made by October 15, and of the XIV by November 1.

Naturally the effect of the new machines on the other Victor types is a matter of interested discussion. That it will be very easy to work up a large proportion of retail customers from the Victor IV \$60 outfit and the Victor V outfits to the Victrola X (\$75) and the Victrola XI (\$100) is generally believed. The Victrola XI is expected to very largely replace the Victor VI.

The Victrola XIV at \$150 will, it is believed, find awaiting for it a good patronage from people who have not heretofore been Victrola buyers, but at the same time the general opinion seems to be that it will not materially affect the Victrola XI styles.

Philip T. Clay a Visitor.

Philip T. Clay, of Sherman, Clay & Co., the great Pacific Coast Victor distributors, spent a day in Chicago last week on his return from the East, where he went in the interest of the great World's Fair to be held in 1915, in celebration of the com-

pletion of the Panama Canal. New Orleans and Frisco are rival claimants for the great exposition, but Mr. Clay, who is the chairman of the Frisco organization, is very confident that the Coast city will secure the plum.

Wiley B. Allen Co. Manager on Tour.

James G. Black, treasurer of the Wiley B. Allen Co., of San Francisco, and manager of the company's talking machine department, spent several days in Chicago recently. He was on his return from an eastern trip. He says that business is steadily improving in Frisco and that the outlook is for an excellent business in both pianos and talking machines. The company do an immense talking machine business from their San Francisco store and various branches in Coast cities.

Edison Jobbers Enthusiastic.

Edison jobbers are very enthusiastic over the new O reproducer. The demand for the Triumph machine, equipped with the O reproducer and the wooden Cygnet horn, is considered one of the most attractive outfits ever placed on the market by the National Co., and the approval of the dealers is being manifested in a very practical way.

Judging from reports that reach Chicago, quite a number of Edison jobbers all over the West are taking advantage of the National Co.'s liberal offer to provide at a nominal charge a specially made wagon equipped for carrying a stock of Edison machines and records and are using the same to excellent advantage, especially in working the country trade. The Amberola, from all reports, is steadily advancing in popularity. Dealers who have taken pains to exploit the Amberola to the best class of their trade are evidently reaping the full results of their enterprise.

Distinguished Columbia Visitors.

President E. D. Easton and General Manager George W. Lyle, of the Columbia Phonograph Co., were visitors at the Chicago office of the company on Thursday and Friday of last week, returning to New York on Friday evening. They were both very enthusiastic regarding the trade outlook from the Columbia viewpoint. They stated that the business showed an improvement for the first nine months of the year of 60 per cent, as compared with the corresponding period of 1909, while September made a gain of 70 per cent.

The new list of Symphony grand opera records are meeting with remarkable success. The Chicago office is having difficulty in supplying the demand from this territory for the Columbia concealed horn machines. The library table type is proving a phenomenal seller in Chicago, as elsewhere, and the dainty Mignon is also scoring a decided success.

Chicagoan Invents Horn.

George H. White, of 715 North Pine avenue, Chicago, has been granted a patent on a new talking machine horn, for which peculiar advantages are claimed. The horn is equipped with thirteen strings, constituting the chromatic scale, the purpose of which is to amplify the corresponding tones of the record. The effect of these strings, together with the special construction of the horn itself, is said to be the amplifying of the tones of the record and at the same time the elimination of echoes. Mr. White claims that one of the great merits of his horn is found in the naturalness with which the high tones of soprano singers are reproduced.

Geo. W. Salter's Successful Trip.

George W. Salter, president of the Salter Manufacturing Co., manufacturers of talking machine cabinets, returned a few days ago from a three weeks' outing spent with a company of prominent Chicago business men near New Auburn, in the Ferndale Waters district of northern Wisconsin. He is an expert Waltonian and holds the world's diamond medal for distance and accuracy in casting, won at the international contest under the auspices of the Chicago Fly Casting Club. He gave renewed evidence of his skill this year and bagged a number of muskalonge, besides a host of "scrappy" bass.

On his return Mr. Salter found Sales Manager Mortenson had been establishing new high marks on sales of disc and cylinder cabinets. The advance orders secured on the Salter horizontal felt lined shelf cabinet—a shelf for every record—have been unusually large. The company will shortly have ready for the trade a new disc cabinet for dealers' use.

Victor Traveler Calls on Jobber.

George Ornstein, manager of traveling salesmen for the Victor Co., called on the local jobbers here the other day. Sam Goldsmith, the district manager, and Mr. Fitzpatrick, who covers Michigan, were also here, turning their visit in order to confer with Mr. Ornstein.

L. & H. Record Stocking Cabinets.

Lyon & Healy are having remarkable success with their new cabinets for dealers' use, which are fully described and illustrated elsewhere in this issue. The system of keeping track of stock with these cabinets is one worked out as a result of years of experience. With each cabinet is furnished record envelopes, special index book, etc. The cabinets are beautifully finished and constitute handsome store furniture, being furnished in finishes to match the store fixtures.

L. C. Wiswell's Successful Trip.

L. C. Wiswell, the manager of Lyon & Healy's talking machine department, recently made a trip which included St. Louis, Kansas City and Des Moines, during which he visited the local jobbers and posted himself regarding conditions. Incidentally he took a number of orders from the jobbers for the new cabinets. Earlier in the month H. B. Hopkins, Mr. Wiswell's assistant in the wholesale department, went East on his first visit to the Victor and Edison factories. He took occasion to visit a number of the Eastern jobbers and took a great many orders for the new cabinets. Consequently the Lyon & Healy dealers' cabinets seem destined to a country-wide distribution.

Arranging for Recital Hall.

The Rudolph Wurlitzer Co. are remodeling the store adjoining their main warerooms on the south and which has heretofore been used as a piano salesroom exclusively, so that it may be used for a recital hall, seating 500 people, when desired. The entrance from the street will be closed and the front converted into a show window. The room will be redecorated to harmonize with the handsome interior of the main store.

Doing Some Good Advertising.

The Talking Machine Shops at 169 Michigan avenue and 43 Jackson boulevard are doing some mighty effective advertising in the dailies. Usually a stock heading is used, consisting of the words "Talking Machine Talk" on a musical staff, and the talk straight to the point and most convincing.

Frank L. Hough, who represents the Edison Manufacturing Co. in this territory, has gone to Boston to attend the Mechanics' Exposition, where the Edison interests have a magnificent exhibit.

Columbia Managerial Changes.

E. W. Guttenberger, manager of the Louisville office of the Columbia Phonograph Co., has been transferred to the Denver office on his own request because of impaired health. He will travel for the company in Colorado and adjoining States. Mr. Guttenberger takes with him to the Golden West as his bride one of Louisville's fair daughters. Mr. Guttenberger was for a time in charge of the retail department of the Chicago office.

D. S. Ramsdell, who was recently made assistant to Manager C. F. Baer, of the Chicago office of the Columbia Co., has fitted into his new duties admirably. He is glad to get back to the old town and to the service after an absence of some years.

Mr. Standke, the manager of the Columbia office of the Columbia Phonograph Co., spent several days in Chicago, the guest of District Manager W. C. Fuhri.

Jobbers' Association Announcement.

L. C. Wiswell, chairman of the Press Committee of the National Association of Talking Machine Jobbers, has sent out the following announcement:

Young fellows, that's right, but running an old business!

The Talking Machine Company is probably the oldest talking machine jobbing house in America. It started years ago at 107 Madison Street. Some of the most illustrious names in the talking machine world received their start there.

The last five years has seen it change from the old methods of handling several makes of machines in both a jobbing and retail way, to the newer method of devoting all its energies to one line—the VICTOR—and in an exclusively wholesale fashion.

THE BIGGEST, MOST ESSENTIAL AND NECESSARY FACT FOR YOU TO GRASP NOW IS THAT THE FALL SEASON IS COMING ON—THE HARVEST TIME FOR VICTOR GOODS.

In our entire history there has never been a winter during which there did not exist an acute shortage of Victor goods—notwithstanding the ever increasing capacity and output of the factory. In times of shortage, our service counts.

Our stock is not depleted by any retail demand made upon it—every dollar's worth of it is at your command. Wholesale, WHOLESALÉ, Jobbers in every sense of the word.

We are the best people in America to handle your Victor business and we can prove it.

THE TALKING MACHINE COMPANY

72-74 Wabash Avenue
Chicago, Ill.

The attention of the trade is called to the fact that the 1911 convention of the National Association of Talking Machine Jobbers will be held in Milwaukee, Wis., July 10, 11, 12 and 13.

It will be noticed that the dates for the convention have been changed so as to permit the members to spend the "Glorious Fourth" at their homes, something that was impossible last year, when the convention opened on July 5.

Secretary J. C. Roush, of Pittsburg, has just issued a strong letter to non-members in which he outlines a few of the things which have been accomplished by our organization.

It is strongly urged that all members, not merely the State commissioners and members of the membership committee, supplement this good work by bringing their personal influence to bear on non-members, both through letter and word of mouth.

Let us all co-operate in making next year's convention the biggest and most resultful in the history of our association and let us begin now.

Pushing the Victor Line.

Henry A. Stone, who recently opened a fine piano store at Vandalia, Ill., is making a specialty of his talking machine department and is pushing the Victor line very vigorously through aggressive advertising and excellent window display.

News of Changes Among Dealers.

A. F. Liess, a well known dealer of Kokomo, Ind., has bought the talking machine stock of George L. Evans, of that city, and will hereafter conduct two stores, one devoted to talking machines and sewing machines and the other to pianos and talking machines.

George Fegans, of Joliet, Ill., one of the largest jewelers in the Middle West, will add talking machines, having purchased the Victor stock of the Wilkins Music Store, of that city. The new department will occupy well arranged quarters in the basement, which are now being prepared. There will be two large demonstration booths.

Cal Stewart, the famous maker of Uncle Josh records, recently presented Kerry C. Meagher, of this city, one of the managers of the Western Vaudeville Association, with a talking machine and a complete set of his own records.

Demonstrates Records Over 'Phone.

George A. Stemm, the piano and talking machine dealer of Freeport, Ill., has met with considerable success in demonstrating records over the phone. Whenever he gets in the new monthly records or specials, he calls up his customers, tells them of the records he thinks will especially please them, and in case they are too busy to come down to the store, plays the records right then and there. He almost invariably takes orders at the end of a telephone demonstration, as he makes a particular study of the tastes of his customers and plays only such records as he is convinced will win them at once. Mr. Stemm says that he makes many sales in this way that he would not make if he depended on the customers visiting the store. Some of his trade are actually getting into the habit of calling him up and asking to hear such and such a record on the phone.

Aeolian Co. Department Busy.

The Aeolian Co. are pushing the Victor department of the local Aeolian Hall very vigorously. Manager Thomas Fletcher is very highly pleased with the manner in which the business is developing, and E. H. Searles, who has charge of the Victor department is very happy as a result of the vigorous support he is getting. Every one of the large general Aeolian advertisements appearing in the dailies contains a swift little talk on the Victor department, and whenever the Victor Co. use space in the dailies the Aeolian Co. are pretty sure to be found using space adjoining, telling why Aeolian Hall is "the best place in Chicago" to buy Victor goods. Of their Victor department they say "It is quiet and restful. The roar and crash of the elevated and surface cars cannot annoy you here. You may listen to all the latest records, grand opera as well as all the latest successes in popular music, amidst airy and comfortable surroundings and with the advantage of courteous and personal service—Aeolian service."

The Victor department, which occupies the entire mezzanine floor of Aeolian Hall, is to be entirely remodeled and redecorated. The present

booths, two in number, are to be taken out and four new booths built, extending along the south side of the room. The woodwork will be in white enamel, but the booths will be practically all glass, similar to those in the Indianapolis branch and the New York Aeolian Hall. The record shelving, which will be greatly extended, will be back of the booths along the south wall.

The company inaugurate this week a regular series of Tuesday afternoon concerts in Music Hall in the Fine Arts building in which the services of the best known vocal artists in Chicago are utilized, the accompaniments, of course, being played on the Pianola piano. Later on, it is understood, the Victor will also be a feature of these concerts, and the red seal artists being accompanied by the Pianola.

Udell Traveler Plans Trip.

Daniel G. Williams, the well known representative of the Udell Works of Indianapolis, Ind., will shortly leave on an extended Eastern trip in the interest of their handsome line of disc and cylinder record cabinets.

A New Columbia Co. Manager.

R. P. Bartlett, who for the past four years has occupied the position of order clerk in the Chicago office of the Columbia Phonograph Co., has been promoted by District Manager W. C. Fuhri to the management of the Columbia branch at Des Moines, Iowa, and has already assumed charge. Mr. Bartlett is an exceedingly competent, well posted man, and his associates of the Chicago office expect that he will make good in a very large way in his new field of labor.

A Lyon & Healy Publicity Stunt.

An excellent plan has been adopted by Lyon & Healy to assure that visitors to their retail department are well supplied with Victor literature. Every one is presented with an envelope bearing a cut of their record department, and containing a complete Victor record catalog, the machine catalog and the monthly bulletin.

Erecting New Building.

Kornell Kominicke, piano dealer in the thriving industrial city of Gary, Ind., is erecting a new building for his business, and will open a complete Victor department. He was a recent visitor of the Talking Machine Co. and placed a liberal opening stock order.

LEVIN'S PERMANENT NEEDLE

For Talking Machines Perfected and Now Ready for the Market—What is Claimed for the New Needle—To Be Exploited by Permanent Needle Sales Co.

(Special to The Talking Machine World.)

Chicago, Ill., Oct. 8, 1910.

The permanent needle for disc talking machines invented by Samuel Levin, of Highland Park, Ill., is now ready for the market.

This announcement will be read with interest by the trade, who have expressed much interest in the new needle, since the brief news items printed in The World a few months ago made their appearance.

Briefly, the permanent jewel needle, as it is called, consists of a small garnet specially ground and highly polished, set firmly in a metal shank which fits into the needle arm of any disc machine in the same manner as an ordinary needle.

The life of this needle is, it is claimed, practically unlimited. It is sold under a liberal guarantee for one year, but with ordinary care, the company state, it will "last forever."

Mr. Levin has needles in his possession which have been used in playing from three to four thousand records and are exactly as good, even better, he declares, than at the start. Furthermore, the needles have been tested in the homes of a number of talking machine owners for months and are giving excellent satisfaction. In addition to its permanency, the claim is made that this needle does not injure the record.

"The Permanent Jewel" needle, which is made in loud, medium and soft tone, is manufactured by the Permanent Jewel Needle Co., of Highland Park, Ill., of which Mr. Levin is the head. It will be marketed exclusively by the Permanent Needle Sales Co., of 14 State street, Chicago, to whom all

inquiries should be addressed. This company has been organized by Charles S. Rosenthal, a well known Chicago business man, who has had long experience in the planning of successful sales campaigns. Under his management the sale of the needle will be energetically pushed. He states that it will be vigorously advertised in the leading popular periodicals. The Permanent needle was patented on May 14 of this year.

OUR FOREIGN CUSTOMERS.

Amount and Value of Talking Machines Shipped Abroad from the Port of New York.

(Special to The Talking Machine World.)

Washington, D. C., Oct. 8, 1910.

Manufacturers and dealers in talking machines will doubtless be interested in the figures showing the exports of talking machines for the past five weeks from the port of New York.

DOING ONLY WHAT ONE IS PAID FOR.

May Prevent Being Imposed Upon, But at the Same Time Has Some Mighty Serious Drawbacks—Where Non-Observance of the Rule Landed a Good Job.

Doing only what one is paid for may be a good way to keep one from being "imposed upon," but we believe most successful men regard it as having serious drawbacks. In a certain establishment the dictionary is covered with heavy manila paper. From time to time this paper wears out and is renewed. This wearing out and renewal have been going on for a dozen years or so. Although many besides the head of the department consult the dictionary, no one else ever put a paper cover on the book—with one exception. The exception was a former office boy, who had risen to a clerical position, and while still hardly more than a lad he stepped into a position to which a \$1,500 salary was attached. He was not paid to put a paper cover on the dictionary, but he saw that a new one was needed and rose to the occasion. That's all.

Lyon & Healy Offer Dealers A Perfect Cabinet for Disc Records

Every Dealer
Should
Have One

Made to Match
Your
Store Fixtures

The Result of Long Experience

The many years that we have been wholesaling and retailing talking machine records have made us particularly well informed as to the best methods of handling them. After an extensive period of study we have evolved The Lyon & Healy Dealers' Cabinet for disc records, which we believe will do more to eliminate dealers' record troubles than anything ever before offered. Designed to help the dealer, all complications have been left out. It works on a principle as simple as the alphabet, and automatically keeps your stock complete and in perfect order.

Description

The Lyon & Healy Dealers' Disc Record Cabinet is 38" high, 43" wide and 13" deep, holding 45 drawers, each drawer having a capacity of twelve 10 and 12" records. The drawers are numbered consecutively from 1 to 45, these numbers corresponding with records listed in the alphabetically arranged index book which is furnished with each cabinet. A sufficient number of special record envelopes are also provided, which keep accurate account of stock on hand and orders for stock to take the place of that sold. Two large drawers in base of cabinet make excellent receptacles for needle supplies, sound boxes and other small equipment.

Convenient

The Lyon & Healy Dealers' Disc Record Cabinet may be placed in any convenient location, back of or on top of a counter—in fact, wherever it can be reached to best advantage. It takes up so little room that it will not be in the way anywhere. When a customer calls for a certain record, and it is in stock, it is located quickly by referring to index showing drawer number. If record wanted is one not kept in stock, the index will show the fact immediately without looking in the case. If record had formerly been in stock and sold, the empty special envelope in drawer shows when new one was ordered, and your customer may be informed exactly when he may call for it.

Economical

Every dealer in disc records loses money every year through warping, scratching and otherwise spoiling of records. With a Lyon & Healy Dealers' Disc Record Cabinet in your store, all such waste is eliminated. To find a record which you always have means of knowing if in stock or not, there are only a dozen records to go through, and those are kept in orderly fashion. You can readily see how much more carefully you or your help will handle them than you would were it necessary to go through a disorderly mass of undesired records, searching for one which may not be in stock at all. Rough handling ruins records and means a loss to you.

Labor Saving

The Lyon & Healy Dealers' Disc Record Cabinet does away with every unnecessary movement in locating any record desired. You can tell your customer in two seconds whether or not you have a certain record, and if you have, secure it for him in less than half a minute. The Cabinet is easily cleaned, and your records are kept in perfect condition. No warping, scratching, cracking or breaking.

An Inexpensive Necessity—Price \$20.00 Net.

The Lyon & Healy Dealers' Cabinet was planned to aid dealers, and we want every dealer who handles disc records to have one. We have brought them within reach of all when we price them at \$20, complete, with special index and record envelopes. We have made these cabinets of the best material obtainable. We finish them as ordered by dealer, and every cabinet carries our quality guaranty.

GEISSLER DISCUSSES CALIFORNIA.

The General Manager of The Talking Machine Co. Speaks Enthusiastically of Victor Business on the Pacific Coast—Guest of William Horton Blake at the Bohemian Club Jinks—Some Startling Athletic Stunts.

(Special to The Talking Machine World.)

Chicago, Ill., Oct. 8, 1910.

Arthur D. Geissler, general manager of the Talking Machine Co., of this city, recently returned from a two months' sojourn in his native State, California. In a chat with *The World*, he indulged in some interesting observations regarding the talking machine business on the Coast, and also told of the wonderful Bohemian Jinks festivities, of which he was a witness.

"I think that without doubt more Victor talking machines are sold in California, in proportion to the population, than in any other section of the country," said Mr. Geissler. "The distributors out there have certainly developed a most extraordinary business. I am reliably informed that one concern alone, which has a series of branch stores, pays the local distributors over one hundred thousand dollars per year.

"The principal music houses all carry Victors

ARTHUR GEISSLER IN HIS CAMP.

and feature them as strongly as they do their leading pianos. The departments are models in point of arrangement and equipment. The trade runs very strongly to Victrolas and high priced machines. Red Seal records sell in greater proportion, I believe, than in the Eastern States. One concern in Los Angeles has at least ten customers who have regular talking machine studios in their homes, with record selections comprising two thousand five hundred to three thousand titles.

"My trip in a business way was a distinct success, with particular reference to the Cabinets That Match, for which orders were taken in large quantities, including liberal advance orders for cabinets matching the new Victrolas X and XI. However, business was not the principal object of my trip, this being the first time I felt that the organization of our business was such as to permit of my taking an extended vacation. In fact," Mr. Geissler continued jocularly, "the results achieved in a business way during my absence were such as to make me seriously consider spending the greater part of my time away from the office. It was better than during the preceding months and showed a very marked increase over the corresponding months of last year."

Mr. Geissler was a guest of Frederick Sherman, Phillip Clay and Andrew McCarthy, of Sherman, Clay & Co., during the Family Club Jinks. This is an unique organization, which each year gives its play in the beautiful Redwood Grove, situated in the foothills just outside of Redwood City. The

POSING AS "ANNETTE KELLERMAN."

trip was made with Mr. Clay in his big Lozier car and, incidentally, Mr. Geissler says that the distinguished San Franciscan is "some chauffeur," for when they were hitting a clip of about forty-five miles an hour Mr. Clay calmly volunteered the information that he had not yet "slipped it into high."

The big event of the Summer is the Bohemian Club Jinks, held in the great Bohemian Club Grove, ninety miles from Frisco, on the Russian River. There Mr. Geissler was the guest of William Horton Blake, late national bridge whist champion. They went a week ahead of time and enjoyed the grove before the crowd started to come. One of the illustrations shown in this connection portrays the approach to their camp of "Never Again." The name, of course, was suggested by the resolve made under the spell of the glorious scenery never again to return to the busy haunts of trade.

"According to all reports, the Passion Play at Oberammergau is the only production that rivals the grove play of the Bohemian Club," said Mr. Geissler. "This year the play was the Cave Man, book by Charles K. Fields, music by McCoy. It is simply impossible to give any description of this wonderful production, as it is staged right out in the open among the giant redwood trees, with innumerable natural entrances and exits. One of the characters made a particularly striking exit, wending his way up the side of the mountain, carrying a torch, invisible at times, and finally disappearing at a point about four or five hundred feet above the spectators.

"The audience, consisting of about eight hundred members and guests, were seated upon immense redwood logs. It was quite a rare privilege to be a guest, as none but non-residents of the State are allowed to be invited.

"All the members have their own private camps, but eat in a huge, open air dining room. To wait upon this assembly it is necessary to have between two hundred and three hundred servants. The swimming pool, located in a cove of the Russian River, with all the necessary attendants, bath houses, etc., is, perhaps, one of the greatest features of the grove."

Although he did not expect it, a picture of the swimming pool referred to by Mr. Geissler, is shown for the benefit of World readers. The pool is absolutely incidental, however, to the graceful figure that is posed preparatory to a dive into the liquid depths. Mr. Geissler may have brought one of these photographs to Chicago, but if so, he did not include it in the fine collection he showed his friends. Its existence was learned of and by securing the cooperation of the San Francisco correspondent, the copy was obtained, likewise the story that goes with it.

On the day of the athletic stunts at the swimming pool an audience of five hundred men witnessed various and thrilling natatorial feats. The man in charge of the events announced that the finale would be something quite unusual. For this occasion only, he declared, the rules of the

club, which prohibited absolutely the admission of women to the grove, would be waived, and the members and their guests given an opportunity to witness an exhibition of diving and fancy swimming by Annette Kellerman, the famous professional, then appearing in San Francisco.

There was a hush when "Annette" appeared and gave her bath robe into the hands of an attendant. The Chicago talking machine man is the possessor of generous curves, his make-up was excellent and it was some little time before many of those in the audience, who had not seen Miss Kellerman, perceived that a hoax had been perpetrated. It was not so much of a joke after all, however, as Mr. Geissler is really an aquatic expert, and gave a very creditable imitation of six of Miss Kellerman's most difficult dives.

Out on the Coast they are still talking about the *piece de resistance* of the Bohemian Club's aquatic carnival.

NEW RECORD FILING SYSTEMS.

Prepared by Talking Machine Co.—Convenient and Inexpensive—How the Systems are Arranged—Of Interest to Dealers.

(Special to The Talking Machine World.)

Chicago, Ill., Oct. 9, 1910.

The Talking Machine Co. have prepared three very inexpensive systems of record filing for their customers, which they declare constitute not only the most convenient and inexpensive methods of handling disc records, but also a complete inventory, sales and order system.

System A consists of sectional cases, permitting the records to either lie flat or stand upright, according to the position in which the sections are placed. Each shelf accommodates eight records in stock envelopes. System B utilizes the same sectional record cases as in System A, but every other shelf is pulled out and cardboard boxes similar to those used in stocking sheet music are utilized, thus absolutely protecting the records contained therein. Each section is complete in itself, so that as many or as few may be used as necessary. Each case comes unfinished, so as many or as few may be used as necessary. System C consists of sectional drawers on the order of letter files, with adjustable backs to keep the records firmly upright.

In each system the records are carried in stock envelopes, each envelope being numbered in one corner, according to the number of the record enclosed. When a record is sold the empty envelope is placed aside and the record delivered to the customer in the regular Victor envelope, the empty envelopes showing the records sold each day, and reorders being made by copying down the numbers of the empty envelopes. A complete index of records carried in stock is obtained by checking a numerical catalog and running the records numerically in the cabinets.

Cragin Station

Chicago, Ill.

Don't wait until the other man does. Stake out your claim while there is land available: With the Columbia line and exclusive selling rights you can develop all there is in it, and no one can ever "jump" it.

Columbia Phonograph Co., Genl., Tribune Building, New York.

TO OCCUPY NEW PREMISES.

The New York Talking Machine Co. Will Take Possession of 81 Chambers Street on October 15—Will Be Handsomely Fitted Up.

The new premises of the New York Talking Machine Co., 81 Chambers street, New York, now being remodeled, rearranged and decorated, will be occupied within a week or so. The quarters at 83, next door, will be given up when the new place is completed. The store floor runs through the block to Reade street, and the front half, which will be handsomely fitted up with booths and other essential equipment, will be used for demonstrating purposes, with a fine display of Victor goods in a roomy show window. The rear half will be occupied by the company's office and the clerical force of the wholesale department. A basement and sub-basement will accommodate the repair and shipping departments and be used for the storage of stock, both being especially suitable for this purpose.

This is the first time the company have been in a store floor or been on the street, heretofore their premises being in upper lofts. With the entrance of the New York Talking Machine Co. as a retail proposition as well as wholesale, it will make the third concern on the block between Broadway and Church street, the others being the Columbia Phonograph Co. at 89, and the Blackman Talking Machine Co. at 97.

EQUIPPED WITH NEW REPRODUCERS

The National Co., Orange, N. J., Are Now Equipping the Balmoral and Alva Phonographs with the New Model "O" Reproducer.

The model "O," which it was recently announced would hereafter be part of the Triumph and Idelia equipments, has been well received by the trade everywhere, and orders for Triumph and Idelia machines and attachments equipped with the new speaker, as also separate orders for the reproducer, are coming in such numbers as to almost swamp the speaker department of the company's plant.

The prices for the reproducer when sold separately are the same as was announced in the bulletin issued on the subject of Triumph and Idelia equipment. These prices include a special arm and special parts. The same allowance for the return of the models "C" and "H" reproducers in exchange also apply.

GIMBELS HAVE THE VICTOR

In Their Talking Machine Department—Handling Buegeleisen & Jacobson's Small Goods Line.

The talking machine department of Gimbel Bros., whose New York store was opened to the public for the first time Thursday of last week, is on the fourth floor and occupies a space about 70 x 25 feet, entirely inclosed, near the center, in connection with the small goods and sheet music

section. The Victor line is handled exclusively. Three demonstrating booths, with birdseye maple, white and gold and Circassian walnut trimmings, respectively, are provided, with Victrolas to match. The resonator of the Talking Machine Soundboard Co. is also conspicuously featured. I. H. Dodin, assistant to E. P. Calderhead, the buyer, is in immediate charge of the three departments and said they were doing a fine business, especially in

Victrolas. They carry the full Victor catalog in stock, two of each record.

The small goods, in which Buegeleisen & Jacobson's Durro line is the feature, are displayed in dust proof show cases and the electric lighting effects in connection therewith are perfect. Miss Florence Silverman, formerly with M. Weinstein, in the Flatiron building, has charge of the sheet music end.

BALTIMORE'S NEWS BUDGET.

Indications That Fall and Winter Will Produce Immense Business in Both Wholesale and Retail Fields—What the Various Houses Are Doing—Interesting Personalities—Martin & Co. Open Retail Store.

(Special to The Talking Machine World.)

Baltimore, Md., October 6, 1910.

Should all the expectations of the Baltimore dealers be realized this fall and winter, the season will be one of the most prosperous ever experienced by those engaged in the business. There never was a more optimistic crowd than those who are selling the machines and records in Baltimore. While during the summer there have been those who always had an encouraging word to say about business, there were others who complained that business was not what they would like to see it be and they would not say what they expected when the cool weather set in, but now that October has rolled around and most all Baltimoreans are back from the summer resorts things have changed decidedly for the better.

The improved conditions do not apply alone to the retail trade, but have been quite apparent among the jobbers and with the wholesale dealers as well. In addition to having larger orders from the retailers, the wholesalers report that several new dealers have entered the local field, while in the counties of Maryland and throughout those sections of the South which are handled from Baltimore similar reports are made.

D. D. O'Neill, formerly of C. J. Heppe & Sons, of Philadelphia, has taken charge of the talking machine department of Cohen & Hughes, who handle Victors and Edisons. The firm have been

busy rearranging and extending their talking machine department. In addition to the sales department and demonstrating rooms on the first floor, arrangements have been made for a Victrola room exclusively in the front of the second floor, while next to the Victrola room is the place for Victors and Edisons. Back of this room there is an exclusive department for the small Victors. In the rear are the record rooms and repair shops, while on the fifth floor is the wholesale department. Mr. O'Neill believes that the new Victrolas will mean an increase of 25 per cent. of the business in the Victor line over that what would ordinarily be done with only the \$125 machine in existence. Other dealers are of the same opinion.

Martin & Co. have opened up a retail store at 325 North Howard Street, with a full line of Edison machines and records.

D. J. Crowley, now located at 214 West Saratoga Street, has a good word to say about the local retail business, while William McCallister & Sons, Baltimore Street near Howard, report the Victor and Edison business to be in a flourishing condition.

William C. White, who was manager of the talking machine department of H. R. Eisenbrandt Sons for a number of years, has opened up on his own hook at 205 North Charles Street, with a full line of Victor machines and records. He has a cozy little store, and from all appearances has made a good start. All of his friends wish him success in his new venture.

Eisenbrandt Sons are thoroughly established in their new home on North Howard street near Saratoga, with a full line of Victors. They have their talking machine department nicely arranged, while buyers and prospective buyers are attracted by the neat window displays.

Manager Roberts, of E. F. Droop & Sons Co., who handle Victors and Edisons, states that September was an excellent month and that there is every indication that the present fall and winter will prove something of record breakers. He believes that the holiday sales will even surpass the excellent showing of last December.

Similar cheering reports come from Manager Albert Bowden, of the talking machine department of Sanders & Stayman. Mr. Bowden declares that the demand for the Victor and Columbia machines and records has been far above expectations, while he thinks that the new Victrolas will meet the demand of many buyers who have heretofore held off from purchasing a talking machine.

The Columbia machines and records are also whooping things up, according to Manager Laurie, of the local branch store of the Columbia Phonograph Co. The retail department has made a good showing and holds excellent prospects, while the reports from the wholesale districts are extremely gratifying.

TALKING MACHINE EXPORTS.

The Figures for August Presented—Reports Show Strong Gain in All Departments of Industry—Some Interesting Figures.

(Special to The Talking Machine World.)

Washington, D. C., Oct. 6, 1910.

In the summary of exports and imports of the commerce of the United States for the month of August (the latest period for which it has been compiled), which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following interesting figures relating to talking machines and supplies are set forth:

The total exports of talking machines, records and supplies for August, 1910, amounted to \$316,816, as compared with \$158,739 for the same month of the previous year. The eight months' exportations of talking machines, records and supplies amounted to \$1,652,408.

A PROGRESSIVE SEATTLE DEALER.

The Ballard Music Co., 5411 Twentieth Avenue, N. W., Seattle, Wash., have recently rearranged their establishment, converting the rear of their store into a handsome Edison phonograph parlor, with special soundproof rooms, neatly arranged, as a feature, so that customers can receive the best of attention. In addition to the Edison, the Ballard Music House handle the Victor and Columbia disc machines.

A. F. Brosche, proprietor of the Ballard Music House, was a recently called at The World sanctum and spoke very enthusiastically about business conditions in his territory. He is a firm believer in advertising and the value of the show window, and in this respect he is a close reader of The Talking Machine World.

During his stay in the East he visited the factories of the National Phonograph Co. and the Victor Talking Machine Co., and after a very enjoyable and profitable sojourn he left for home on October 1.

BLACKMAN TALKING MACHINE CO.

J. NEWCOMB BLACKMAN, President

97 CHAMBERS STREET

NEW YORK CITY

NEW OFFICERS ELECTED

By Eastern Talking Machine Co. Associates—
A. W. Chamberlain, President for Coming Year—An Able Man Selected.

(Special to The Talking Machine World.)
Boston, Mass., Oct. 5, 1910.

At the tenth regular monthly meeting of the Eastern Talking Machine Co.'s Associates the following officers were elected for the year 1910-1911: A. W. Chamberlain, president; George T. Waldron, vice-president; S. H. Brown, secretary, and W. J. Fitzgerald, treasurer.

In his address President Chamberlain spoke in a very optimistic way anent the future of the associates and predicted an even greater success for the coming year. He also spoke in enthusiastic terms about the capacity to "do things" and the

A. W. CHAMBERLAIN.

ability of the officers who were elected with him to carry on the good work.

The associates in turn are to be congratulated on having so able an executive at their head. Mr. Chamberlain has been able to make a very favorable impression upon the trade throughout New England. He has had a very successful career in the talking machine business and is one of the most experienced men on the subject of talkers in these States. His early experience dates back to 1903, when he first became associated with the Iver Johnson Sporting Goods Co. as department manager. Later on he became identified with the Zonophone interests, when in 1905 he became assistant general manager, including the managership of the wholesale department of the Eastern Talking Machine Co. These positions he has fulfilled to the utmost satisfaction of the management and with great credit to himself.

THE LIMIT.

Thomas A. Edison recently returned from a trip in the South. A few nights ago he was talking with a New York Times reporter about the food of the future.

"A kitchen," said the great inventor, "is really only a chemical laboratory. And I want to tell you they've got some mighty poor chemists down South. I had beefsteak served to me that was so tough I couldn't stick a fork into the gravy."

THE POSITION AND THE MAN.

Plenty of Excellent Openings for the Men Who Can Really Qualify—Few of General Run of Subordinates Found Fit When Manager Is Wanted.

"The man at the front is the man who bears the brunt of the fight. Don't be in a hurry to get there until you are fit for the position."

Ambition is a splendid attribute. It lifts a man out of the stratum in which he was born and helps him to achieve the greatest heights of which he is capable. Unfortunately, the incapables aspire to positions they haven't the ability to fill, and the firms who "try out" this raw material get weary in their search for able men.

Too many men in all trades are "drifters." Look over the field and note the men who have built reputations that are grounded on meritorious work.

There should be associations for men in all these lines where they can systematically acquire a knowledge that will make them of increasing value to their firms, but the instances are rare where the employees work over hours to increase their knowledge and their value to the firm they serve. This work can't be done in clubs, nor in bowling, nor at picnics, all good in their way, but boys have some problems to solve, and the sooner they begin the work the earlier will dawn the day when they will be recognized as successful men, and it takes more than mere money to be scored a successful man.

TALKING MACHINES IN SCIENCE.

Vienna Academy of Sciences Possesses One of the Largest Collections of Records in the World—To Secure Records of all Dialects—Talking Machine as Acoustic Microscope.

The Vienna Academy of Sciences has one of the largest, if not the largest collection of phonographic records in the world, and is enlarging it rapidly. One of its main objects is to secure a complete collection of dialects, for which purpose expeditions are being constantly sent out, the latest being to Nubia. Original work has been done in making use of the phonograph as a sort of acoustic microscope, sections of the records being enlarged a thousandfold, with results most helpful in recognizing differences in sound. The croaking of the frog, on being thus magnified, was found to differ from the utterance of a human vowel in not being a continuous sound, but one with minute interruptions.

If you are satisfied that you have a better selected stock than your competitor, if you know the goods you sell are more satisfactory and of better quality, if you are capable of serving your trade in a better and more satisfactory manner than the other fellow, don't hesitate to tell about it.

If there is such a thing as a philosopher's stone, that stone is nothing more or less than the knowledge of how to spend less than you get.

MORE WINDOW LOGIC.

Just How the Value of the Show Window May Be Figured Out in Dollars and Cents—A Point Lost Sight of by Many Dealers.

From time to time The Talking Machine World has emphasized the value of the window as a trade stimulator and business getter. Too many dealers overlook this important factor. To appreciate its value you should do a little figuring. How many people pass your store in a day? If the average is 10 a minute, in the eight busiest hours of the day, 4,800 people would pass your window. This number, 4,800, represents what in newspaper parlance is called "daily circulation." Now, your show window occupies say 100 square

feet surface space, and in it you can display attractively quite a line of goods, changing the display as often as you wish. In a daily newspaper with an actual circulation of 4,800, 100 square inches (not square feet) would cost approximately \$10 per day, and in this space you can put only cuts of the articles themselves, and as a rule the cuts but imperfectly represent those articles. Now, your window space presents a surface 144 times as great as your \$10 newspaper space, has depth in addition to surface, and in it can be displayed the articles themselves, true to life as to color, size, shape and everything, and, furthermore, they are seen at the entrance to your store, inside of which a salesman stands ready to give additional information and exercise his ability in making a sale. This window space is yours every day and all day; it presents wonderful possibilities as an advertising medium, and it's up to you to get those possibilities out of it. If newspaper space properly used is worth its cost (and we are firmly convinced it is) how important it is that so valuable an advertising medium as the show window should not be neglected.

ORDERS AT THE EDISON FACTORY.

The National Phonograph Co., Orange, N. J., report that orders for machines of all types, as well as accessories, are increasing in such volume as clearly to indicate that their jobbers and dealers are making early preparations for the holiday trade. This is particularly true of the Amberola orders, which have taken a heavy spurt within the last two weeks and are daily growing in volume.

It is very probable that the Edison trade has not forgotten the experience of last year when the factory found it impossible to supply the holiday demand for Amberolas because of an unavoidable hold-up in the delivery of cabinets by the manufacturer. The National Company state they have made ample provision for holiday orders this year, and there is little danger of a repetition of the shortage.

NOW IS THE TIME TO STOCK UP.

Important Letter from the Victor Talking Machine Co. Warning Dealers That Now Is the Time to Act.

(Special to The Talking Machine World.)

Philadelphia, Pa., Oct. 1, 1910.

Monday of last week the Victor Talking Machine Co., Camden, N. J., addressed their dealers on the very suggestive topic of the Fall season and the ordering of records for the holidays, so as to insure their delivery. The circular in part follows:

"It can easily be said, without fear of contradiction, that Sept. 28, the opening day for the sale of the October records, is the opening day of the Fall season. There are thousands and thousands of people who are going to buy Victors between now and Christmas, and it is up to every dealer to take advantage of the opening day and get these customers coming to his store and placing their order for Christmas delivery.

"Taking the volume of business that reaches us every day as the best possible proof, there can be no doubt about 1910 holiday Victor business breaking all previous records. You know what this means. Every year there has been a demand greater than could be supplied and it is the dealer who actually has Victors and Victor records right in stock that gathers the real Victor profits. You should not wait another minute. Place your holiday order with your distributor at once and get the goods into your store as quickly as you can.

"Remember, Christmas comes only once a year and it is the one real big season for unlimited Victor sales. Go after this big holiday business now. It's never too early to start."

Every clerk ought to be on the watch to distribute all leaflets, catalogues and envelope stuffers, also he should keep up with the newspaper ads., so as to concentrate all the power on one article at one time.

TRADE GOOD IN CLEVELAND.

Business for First Nine Months of Year Very Satisfactory—Increasing Activity Now Manifest—Boom in Record Sales—Talking Machines at Lectures in Schools—Personal Items—Talking Machine Co. Succeeds B. L. Robbins & Co.—Interesting Stories in Which Talking Machines Figure—May Co. in New Quarters—How Jobbers and Dealers View the Present Trade Conditions.

(Special to The Talking Machine World.)

Cleveland, O., Oct. 8, 1910.

Business in Cleveland during the past nine months of the year, while it did not in all instances meet expectations, has been most satisfactory. Various helpful propositions from the manufacturers, together with their extensive campaign of publicity, have largely aided the dealers in creating more trade, and have been an incentive to strenuous exertions in giving added life to the business.

Increasing activity has been manifest during the past two weeks, and a number of sales of the highest grade machines have been made, and large numbers of inquiries are reported. All indications point to a large fall trade, and for which the dealers are making more extended preparation than ever heretofore.

The record trade, in both discs and cylinders, increasing from month to month, is cause for congratulation with all the dealers, and affords unquestioned evidence of the strong hold this line of entertainment has taken with the masses.

Phonograph musical selections will enliven the lectures given before the Cleveland schools the coming winter. The Board of Education committee on social center work have planned to make lectures on tuberculosis and dental troubles popular by adding Caruso, Celestina Boninsegna, Marie Dressler, Blanche Ring and others to the program. A series of talks on industrial service will be given. Mrs. Florence Kelly, of New York, will talk on "Opportunities of Childhood," and interspersed with the proceedings concerts will be given.

An unaccountable condition in the talking machine trade in Cleveland is that the National Phonograph Co. have no distributor of the Edison products here. Dealers have to send to Chicago and other points for their supplies, which is injurious alike to the manufacturers and dealers in the city and contiguous territory.

Judging from the large receipts of Victor Victrolas of the various kinds, and Columbia Graphophones and Grafonolas by the various dealers, they are evidently preparing to meet a larger than usual season's demand.

B. L. Robbins, of B. L. Robbins & Co., who have just sold their store, has accepted a position with the Eclipse Musical Co. He is the oldest talking machine dealer in the city, having started in business here in its earliest inception, and with his large experience will prove a valuable assistant to the staff of the Eclipse Co.

Audley Riesinger, formerly with the W. J. Roberts, Jr., Co., is now engaged with W. H. Buescher & Sons. There are very few more thoroughly posted talking machine men in the country.

Thomas F. Green, representative of the Victor Talking Machine Co., in his Ohio itinerary, was a recent visitor in Cleveland. He stated the talking machine dealers in all the towns he had visited were prospering, and all were optimistic regarding the future.

Fred Silverbach, who for a number of years was the Middle West representative of the Columbia Phonograph Co., is now engaged with the Olds-Oakland Automobile Co. He keeps in touch with his old friends in the talking machine business and is generating among them the auto habit.

Columbia dealers were disappointed that George W. Lyle did not include Cleveland in his recent Western trip.

The most prominent member and director of the family of W. MacGlashen, of the Winton Motor Co., is the four-year-old daughter, Kathryn. The family revel in the luxury of a phonograph, operated at the pleasure of Miss Kathryn. More particularly popular with her is the comic song, "When

Mr. Dealer!

You could not sell a piano with a Tin or Veneered Wood Sounding Board!

A Talking Machine Horn is nothing more or less than a Sounding Board.

Why not show your machines at their best by equipping them with

MUSIC MASTER HORNS

which are built of solid wood on Sounding Board principles.

In September we start our Fall Campaign of National Advertising in order to help educate Talking Machine Buyers in this principle.

Are you prepared to take care of the inquiries that will come to your store?

Should your Jobber be unable to supply you, write us and we will send you a sample line of Oak, Mahogany, or Spruce, Disc or Cylinder Horns, on approval, and if you are not entirely satisfied with the merits of the MUSIC MASTER you can return them to us for credit.

SHEIP & VANDEGRIFT, Inc.

PHILADELPHIA, PA.

Willie Gets His Pay." She has worn it to a frazzle, but in exchange has perfectly memorized the words and music. Recently she entered the kindergarten class of her church Sunday-school and was asked if she could sing a song. Without hesitation she arose and sang her favorite lyric from beginning to end. Her teacher is still laughing over the episode, and Kathryn is the most popular child in the class.

The Talking Machine Co., a new corporation, has purchased the store of B. L. Robbins & Co., and under the management of S. A. Mintz will continue the business at the old stand. Mr. Mintz has had several years' experience and is thoroughly posted in the talking machine business. The location of the store, on the ground floor, midway between the Euclid avenue and Superior avenue entrances of the Arcade, makes it one of the most desirable in the city. Business is reported good and prospects of the most promising character.

Residents in one of the closely-inhabited sections of the city have recently felt very spooky on ac-

count of a series of inexplicable sounds emanating from the block wherein, among a dozen other stores, is housed a Chinese laundry. All fears, however, were dispelled when it was discovered that the Chinamen had installed a graphophone and were playing records in their native tongue. The uninitiated denizens assert that the records give forth sounds much as if a number of cats and human beings were being strangled. Thus does ignorance of the Confucian tongue play upon the imagination.

One of the most unique and attractive things in the talking machine line is a birch bark horn attached to a Columbia graphophone on display in the window of the G. J. Probeck Co. The horn was constructed by Dr. Henry Burns, of this city, at his summer home at Stoney Lake, Canada. He has used it for two seasons. It gives out a clear, mellow sound, and "up in the woods," the doctor says, "it is a thing of beauty."

Flesheim & Smith are making daily sales of Zonophone machines and records. Business with

Quick service

A great thing for a dealer, and every dealer ought to get it from his jobber or know the reason why. Repeated delays are dangerous to the carrying on of any business.

Quick service is one of the inducements we hold out for your trade and it's no mere will-o'-the-wisp. We mean it—quick service.

How quick? Shipments made the same day order is received. Could anything be quicker, or more satisfactory to you and your customers?

Quick service means not only that we are quick in sending out orders, but we have the right kind of goods in the first place—just the things you want and plenty of them.

There isn't a thing you can mention in Victors, Victrolas, Victor Records, record cabinets, fiber cases, horns, needles, repair parts and other accessories that we haven't in stock ready to send you right now.

Try us and see. That's our challenge and, if what we say is true, it's worth your time to get in touch with us.

Write to-day for our latest catalog and our booklet, "The Cabinet That Matches."

New York Talking Machine Co.

Successors to
Victor Distributing and Export Co.
83 Chambers Street New York

them is good and improving, and they look for an unusually fine fall trade.

The new annex of the May Co. is completed and the talking machine department is now installed in quarters adjoining the piano department; in fact, the two have been merged. The new quarters are much larger than the old, and with twelve good-sized demonstration rooms, tastily fitted up and furnished, afford ample room and adequate facilities for the transaction of business. The records are shelved in the rear of the demonstration rooms, into which are openings sufficiently large to contain a machine for demonstrating purposes. Separate rooms have been set apart for the different machines, Victors, Edisons, and Zonophones, and for cabinets and horns. The management report business excellent and improving.

W. H. Buescher & Sons are having a fine trade in Victor goods exclusively. "Results in September were very satisfactory, being much above the average, while sales so far this month have been surprisingly good," said Mr. Buescher, "and they are increasing in a manner highly encouraging. Our sales now are almost exclusively of Victrolas and the higher-grade Victor machines and records. The close of the vacation season and the cooler weather are visibly favorably affecting record sales. Prospects for fall trade are certainly very bright, and with the three new Victrolas just on the market, we anticipate a phenomenal business."

Quiet optimism dominates the office of the U-S Phonograph Co. Not the optimism, apparently, which expects miracles to happen, and a national business to instantaneously spring into existence, but the resourceful belief in the merits of the U-S line and the realization that it takes time to accomplish great things. "Steady progress from day to day," seems to be the watchword of the company. "We are going ahead," said an officer, "steadily and very rapidly, when one considers the magnitude of the problems to be solved and the organization which must be perfected. The rate of production, both of U-S machines and everlasting records, is steadily rising, the sales department is keeping pace with the factory, and in our advertising department plans are maturing for the campaign which is to cover the country. In all four divisions of the business our progress is certain, steady and rapid." The growth of the business of the company has already necessitated more space, and none being available in the building occupied by the factory and offices, a part of an adjoining building has been secured, where the record department has been installed. The company contemplate soon erecting a factory wherein to house their entire plant.

J. J. Anderson, who succeeded O. E. Kellogg as manager of the talking machine department at H. E. McMillin's, reports business is very satisfactory. "It is especially good," said Mr. Anderson, "for Edison machines and records, for which there is a large demand. We are also having a fine trade in Victor goods, and the new Victrolas, ranging in price from \$75 to \$150, will prove without a doubt to be the best sellers the Victor Co. have ever put out."

Activity and an optimistic feeling prevail at the store of the G. J. Probeck Co., as are manifest in the daily receipt of new goods and local and out-of-town shipments. Mr. Robertson says: "There is every indication that conditions are shaping toward a very active fall and winter season in our line. Our summer business shows a marked improvement over that of a year ago. The Grafonola and grand opera division shows up well in the general results of our summer season, and judging from the large number of inquiries received, this is going to be a Grafonola year. The new series of Columbia grand opera records and the Blue Label records are selling well and users in general are enthusiastic in their praise of the new products. Columbia Indestructible cylinder records are actively increasing in demand among all classes of cylinder machine owners."

Business in both the retail and wholesale talking machine departments of Collister & Sayle shows increasing activity as the sporting season draws to a close. During the summer automobile, motorcycle, baseball and demands for other sporting

goods has been given attention at the expense of the talking machine. But now the latter are coming to the front and one of the large show windows is given to a fine display of Victrolas, Victor records and the latest in cabinets. Mr. Dorn said business was fairly good and daily showing improvement. He spoke in the highest terms of the excellence of the October records, and said they were meeting with the hearty approval of their many customers.

Continued increase in the volume of business is reported by the Eclipse Musical Co. "Good orders are coming in," said the manager, "from dealers throughout this section for machines, cabinets and records, and trade is good and improving. The demand for Victor goods is especially fine and the prospects are very flattering."

A very favorable month's trade in the talking machine department of the Goodman Piano Co. was said to have continued throughout the past month. "Machines are selling well and we have a good record trade, which is increasing continually," said the manager. Mr. Goodman said their piano trade was fully up to expectations and that they were doing a fine business.

John Reiling has built up a substantial, growing business in Columbia goods in the business center of the West Side. He states that trade is good and steadily improving. Owing to age and ill-health he wishes to dispose of the business, and says that it is a fine opening for a young man with some means.

TRADE NEWS FROM THE TWIN CITIES.

Having a Talking Machine Business in the Northwest Compared to Owning a Gold Mine—Business During September Double That for the Previous Month—Minnesota Phonograph Co.'s New Catalog.

(Special to The Talking Machine World.)

St. Paul and Minneapolis, Oct. 8, 1910.

Selling talking machines in St. Paul and Minneapolis is much like owning a gold mine if the dealers are to be relied upon, and they are. Trade is good—better than it was last season, better than it was a year ago—and the dealers are justified in being enthusiastic over conditions.

"Our retail trade for September was just about double in volume over the corresponding month of last year," said Lawrence H. Lucker, president of the Minnesota Phonograph Co. "Our jobbing trade is very much larger, having grown constantly since we branched out into wholesaling, and is on a satisfactory basis."

The company have recently put out an artistic catalog devoted largely to Victrolas. The venture cost \$2,500, but will prove profitable. The new orders alone call for three carloads of Victrolas. The house is doing a fine business with the Edison machines and records, and on Monday ordered a carload of goods to keep up the stock. Mr. Lucker left Wednesday (October 5) for New York and the East to look over the talking machine field.

The Columbia Phonograph Co. have placed H. R. Peterson in charge of the Dictaphone department in the St. Paul branch. He has had good success. The machines are fitly established in both cities as office necessities.

C. A. Carlson, manager of the talking machine department of the New England Furniture Co., finds the retail business entirely satisfactory. The demand for records has been particularly strong, and this is well. The prospects for a good fall business in the best classes of Victor and Edison instruments are excellent.

There never has been a time when there was not an opportunity for every man who was willing to take advantage of it, and the opportunity of doing a good business never was better than at the present time. The thing to do is to take advantage of this opportunity and make every effort count in getting every dollar's worth of business that you can at a profit.

All things work for your good when you are running in harmony with your house and in line with your house.

There is no gamble-guessing about the possible profit in handling Columbia Grafonolas. You can rattle it around in gold coin even if you only lay out a few dollars in getting started with a "Mignon."

Columbia Phonograph Co., Genl., Tribune Building, New York.

TRADE ON THE PACIFIC COAST.

Business Shows Steady Improvement with Both the Dealers and Jobbers—Many New Stores and Departments Started—Novel Electrical Reproducer—Pacific Phonograph Co., Add Another Floor—Some Personalities—New Styles of Victrolas Please the Coast Trade—Columbia Co., Activities—General Summary of the Month's News.

(Special to The Talking Machine World.)

San Francisco, Cal., Oct. 3, 1910.

Trade has been steadily picking up in the Coast district, and with the beginning of fall, conditions in general are much better than at any time since last Christmas. The retail stores in this city are getting at least a satisfactory volume of business, the talking machine department being considerably busier than most lines of musical goods. The wholesale trade, however, is in an especially flourishing condition. Supplies have been largely increased during the last month at the local distributing houses, and deliveries to the outside trade are growing to large proportions. The rush will come within the next month or two. Retailers all over the country have placed their fall orders earlier than usual, buying for delivery in the latter part of October and November, but new business is still coming in. Many new stores or departments are being started all over the Coast, and there has been a particularly strong tendency among small stores in country towns to put in this class of goods. The new dealers are starting in in an energetic manner, placing liberal initial orders, and there seems to be plenty of money everywhere. New developments in the way of accessories and high-class machines are receiving a great deal of attention, and the better class of records are gaining steadily.

A novel electrical reproducer, invented by local people, was displayed at the Pacific Coast Electrical Exposition in this city last month by the Decker Electric Co. The device was used in connection with a No. 5 Victor machine furnished by the Wiley B. Allen Co., and will transmit the sound any reasonable distance, reproducing it almost as loudly and distinctly as the largest and most expensive machines. It is designed especially for use in connection with moving picture shows, a large number of which have opened here recently.

The Pacific Phonograph Co. have acted upon the proposition recently made to take on another floor and are now fitting up the fourth floor of the Bass Hueter Building on Mission street, where it will keep an additional supply of records, horns and cabinets. The goods are to be arranged in the same convenient manner as in the present quarters on the fifth floor, and the space will be more than double that occupied during the summer. This will give the company about the largest establishment in the West devoted to this class of business. The company have just received one of the largest shipments of machines that ever came to the Coast, a straight carload of Edison machines, and supplies have been arriving rapidly all

month. Among the new arrivals is the new reproducer for the Triumph machine, which is very well received by the trade. This company's outside men have been giving a good account of themselves the last month, particularly in northern California and Oregon, where they have put in a number of new stocks, and orders are on the books for later shipments to all parts of the State. J. McCracken has been spending most of his time in Oregon and is now in Portland. G. M. Jones is getting ready to start on the road within a few days and will go as far south as San Diego. This company have taken the agency for the Music Master wooden horn for the State of California.

James Black, manager of the talking machine department of the Wiley B. Allen Co., who has been East for some time in company with Mrs. Allen, is expected here about October 5. He has been on a visit to the Victor factory, to take a look at the new types of machines.

Andrew G. McCarty, of Sherman, Clay & Co., is well pleased by the announcement of the new style Victrolas, which this company expect to have in stock within the next three weeks. He believes that the prices on the new goods will be a great attraction, and will bring in a large amount of business that was not touched by this class of goods in the past. He has already received a large number of advance orders for these machines. He says the Victor business in general is keeping up in fine style, the retail sales of Victrolas having increased about 25 per cent. over the same time last year.

Mr. Grob, of Benj. Curtaz & Son, reports a material improvement in the talking machine department, with a number of Victrola sales in the last few weeks. He is also well satisfied with the present volume of sheet music business.

E. W. Scott, local manager for the Columbia Phonograph Co., has returned from Sacramento, where he went to look after the company's interests at the State Fair.

Walter S. Gray, Coast manager for the Columbia Phonograph Co., completed his tour of the Coast in company with General Manager Geo. W. Lyle early in September, returning to the San Francisco office about the middle of the month, and Mr. Lyle went east from Los Angeles. They spent a few days in San Francisco during the Native Sons' celebration, but most of their attention was given to the outside territory, which is developing more rapidly than ever before in the talking machine line. Mr. Gray says the strong advertising campaign conducted for the last few years by the Columbia Phonograph Co. are now beginning to bring good results, even in the most out-of-the-way places, and that these machines are coming into strong demand in all parts of the country. He is very enthusiastic over the outlook all over the Coast, and especially in the South, where Columbia goods now have a very strong foothold. In Los Angeles, he says Broadway is now becoming quite a talking machine row, and he found the Grafonola Regent displayed in the window of every store on that street which handles talking machine goods. He reports

Schwabach, Bavaria

who manufactures every kind, without exception, at prices that will surprise you, and of the Best Quality only.

a great increase in the general volume of business over a year ago.

W. S. Storms, traveling for the Columbia in central California, has just returned from the San Joaquin valley. He says it was the best trip he has had for eight months, and that the country is in excellent condition, crop returns are coming in, and everybody has plenty of money. On this trip he sold Columbia goods to five new stores, which will handle this line exclusively.

A. G. Farquharson, who covers southern California and Arizona for the Columbia Phonograph Co., is getting a reputation as one of the most popular road men on the Coast, and is making a fine record in the matter of sales as well. He is just starting from his Los Angeles office on his regular fall trip.

The Wiley B. Allen Co., who recently moved their Sacramento branch into the quarters vacated by Kohler & Chase, has fallen heir to the Columbia business at that place, which has been conducted without interruption at the same location.

TALKERS IN THE EVERGLADES.

Alanson Skinner Discusses Visit to Survivors of Seminoles in Florida Wilderness—Finds They Appreciate Possession of Up-to-Date Talking Machine Outfits.

Alanson Skinner, who with three companions in two canoes passed completely through the Florida Everglades as an expedition for the American Museum of Natural History, has just returned to New York from what he describes as the land of the free and the home of the brave. The Seminole Indians, who inhabit the little hummocks in the watery waste of the interior of southern Florida, are truly the free men of this continent. They are neither citizens nor wards of this or any other government. Indeed, they have no government of their own beyond a sort of tacit understanding that the elemental virtues shall be enforced among the remnant of the once powerful nation, which numbers at the present time 300. Nevertheless, in their swamp islands, the Seminoles have phonographs and thus have made provision for their amusement and instruction. Although nominally outcasts, they recognize the value and influence of the talking machine.

SOME IMPORTANT SUGGESTIONS.

A successful retailer in the Southwest has thrown out the following suggestions, which are well worthy of passing along:

"You should always know what you owe, and when it becomes due.

"You should always know what is due you, and when it is to be paid.

"You should know your ability for paying before buying.

"You should also know the way of collecting before selling.

"You should watch your percentage of profit, and by means know what portion of your profit goes for expenses to keep your business up to the standard."

MONTH'S DOINGS IN INDIANAPOLIS.

Dealers Much Encouraged at Way Fall Business Has Opened Up—Reports from Individual Stores—Grafonola Used to Advantage in Theater—Placing a Large Number of Edison Business Phonographs—Rapid Growth of the Victor Department of the Aeolian Co.—Other News of Interest,

(Special to The Talking Machine World.)

Indianapolis, Ind., Oct. 8, 1910.

The talking machine business in Indianapolis was fairly good during the month of September and the trade was such as to encourage the dealers in preparing for the fall season.

Stuart G. Barrett has joined the local force of the Columbia Phonograph Co. and will care for the Dictaphone business of the company. Mr. Barrett's first week in the business was successful. He secured orders for several machines.

Mr. Haugher, of Haugher's clothing store, is well pleased with the way his new talking machine advertising plan is working. He uses a Columbia Twentieth Century graphophone in his store with specially prepared records calling attention to his stock. The innovation was started during the State Fair and was so successful that it was made a regular feature.

The Majestic Theater, which is now used by a stock company, is using a talking machine to good advantage. In its new line of plays, the theater had no use for the calcium light and its place has been taken by a Grafonola Regent, which is played during intermission and for cues. Such as stringed effect records are used and the results have been very good, as the audiences have been kept guessing as to where the music was coming from.

The Hampton Printing Co., in West Maryland street, are handling the Edison business phonograph, and have succeeded in placing a number of

machines. This branch of the business is in the hands of the young Mr. Hampton of the firm.

W. W. English, who until recently had been doing road work for the Kipp-Link Co., Edison jobbers, is now with the Wulshner-Stewart Co. talking machine department, and is meeting with excellent success. He is going after the business vigorously.

W. W. Kipp, of the Kipp-Link Co., has been keeping in touch with his agencies and finds much encouragement in the outlook.

W. S. Barringer, manager of the talking machine department of the Wulshner-Stewart Music Co., has been selling a few talking machines himself just to keep his hand in the game. The Victrola business of this company is good. He has also been ordering his stock in preparation for a good fall and winter business.

"We have been doing better than we had expected we would be doing at this time," said Mr. Barringer. "The store is getting established and people are beginning to understand that we are in the business for keeps. I increased my order for new Victrolas Nos. 10, 11 and 14. I have sold about all that were ordered. I believe these machines are going to be winners."

The Wulshner-Stewart Co. handle Edisons and Victors, doing a big jobbing business.

The Musical Echo Co., who handle Victor machines, report a nice business for September, with a good record sale.

P. J. Stockton, formerly with the Wulshner-Stewart Co., has entered the stocks and bonds business in Indianapolis.

Warren E. Bird, who formerly had the Dictaphone business in Indiana, is thinking of going to Chicago to enter the advertising field.

The Victor department of the Aeolian Co. grew so rapidly in September that the company felt justified in engaging Miss Irene Traub to take care of the customers for records. Miss Traub had had several years' talking machine experience in Anderson, Ind. With her employment Mr. Jones, who has charge of the department, will have more time for the Victrola prospects. All of the talking machine booths in Aeolian Hall have been well arranged and everything is ready for an active season.

The Wulshner-Stewart talking machine department, according to letters that are being sent out, tried an experiment in August that proved successful. Twenty-four Victor talking machines, each with several records, were sent to the homes of people who had refused even to consider buying talking machines. At the end of thirty days seventeen of the machines had been sold.

OFFER COPY OF INTERESTING DECISION.

A verbatim report of the evidence and the judgment in the case of the Gramophone Co. vs. the Registrar of Trade-marks, in which the applicants sought to register as a trade-mark the word "Gramophone"—the application being dismissed with costs by the judge—has been published by the Phono Trader Printing & Publishing Co., Ltd., 1 and 2 Whitfield street, Finsbury, London, E. C., from whom it may be obtained post free for seven stamps.

A. RAYMOND & CO. SUCCEEDED.

A. Raymond & Co., 129 Fulton street, New York, who some twelve months ago took over the Snyder Sporting Goods Co., are building up an excellent business and constantly broadening out their lines, and in this connection state they find The Talking Machine World most helpful.

POINTERS ON AVOIDING LOSSES.

Said a merchant: "Our remedies in avoiding losses are chiefly as follows: Do not carry too many of your business eggs in one basket. Consider character and ability before capital. If we take a large risk, it is based on character more than capital. We have had cases where we have given credit for nearly three times the amount of responsible capital, and not lost a penny. But in such cases the very inside of character must be known."

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

Specially Prepared for The Talking Machine World.

Washington, D. C., Oct. 8, 1910.

METHOD AND APPARATUS FOR MAKING SOUND RECORDS. Thomas A. Edison, Llewellyn Park, Orange, N. J. Patent No. 970,615.

This invention relates to an improved apparatus for making phonograph or other talking machine records, and the object is to secure a sound record which shall be of practically exact quality, and at the same time very loud. Such a record when secured may be used directly on the phonograph or other sound reproducing machine, but it is preferably employed as a master from which copies are obtained by any approved process of duplication, as, for example, by a molding operation.

The invention is practicable for use not only for the production of phonograph records, but also for the production of so-called gramophone records, wherein the record exists as a sinuous groove of substantially uniform depth.

In making a sound record of either of the types referred to there are certain factors which enter into the operations and by reason of which the quality of the recorded sounds is affected so that the record is not truly representative of the original sounds. The most objectionable of these disturbing influences encountered in experiments in phonographic recording is due to the inertia and momentum of the diaphragm and the recording devices, carried by or connected with the same. As a result, when the diaphragm is subjected to vibrations of considerable amplitude the momentum of the parts causes the recording knife to cut to a

disproportionately great depth, and this aberration is manifested in the succeeding vibrations. Consequently it is found that the quality of the recorded sounds is in inverse ratio to the loudness thereof, so that when the attempt is made to make a very deep record, or a record of great amplitude, the louder notes are generally of poor quality and are out of proportion to the notes of less amplitude. Another disturbing influence which is encountered in experiments with the phonograph, and by which the quality of the records is affected, is due to the fact that the horns heretofore used have been responsive to certain tones, either fundamental or secondary, within the range of ordinary music, and in consequence such tones are greatly emphasized and become objectionably distorted in the reproduction. Obviously, the tones which may thus become unduly amplified depend upon the length of the horn used, but since it has been heretofore necessary to employ horns of considerable length, say from 18 to 36 inches, in order that the sounds may be properly collected to make the record loud enough for practical pur-

poses, the tones to which they may be responsive, either fundamental or secondary, will always exist in the range of ordinary music. It is not certain that these objections have ever been successfully overcome, and heretofore the volume of a phonograph, or other sound record has been largely restricted because of the same. The object of the invention is to overcome these objections.

Figure 1 is a diagrammatic view showing a portion of the original master, or metallic copy thereof. Fig. 2 is a cross-sectional view through the original recording style, showing a recorder .020 of an inch in diameter, the scale being one-half that of Fig. 1; Fig. 3, a diagrammatic view

of the amplified duplicate record: Fig. 4, a cross-sectional view through the recorder used in cutting the amplified duplicate, illustrating the same cutting to its full depth, the scale being one-half that of Fig. 3; Fig. 5, a plan view of a preferred embodiment of the mechanical duplicating apparatus; Fig. 6, a cross-sectional view showing the shaving knife for trimming the blank to the exact shape and size of the original record; Fig. 7, a corresponding view showing the mechanism for securing the amplified copy of the original record, and Fig. 8, a sectional view on the line 8-8 of Fig. 6. In all of the above views corresponding parts are represented by the same numerals of reference.

PHONOGRAPH-REPRODUCER. Anthony Urbahns, Minden, Ia. Patent No. 970,142.

This invention relates to phonograph reproducers and has for its object to enable the loudness of the sound to be varied as may be desirable, in view of the size of the room in which the phonograph is operated, or in accordance with the character of the music or other matter played. For this purpose there is provided a certain novel construction of a variable connection between the vibrating diaphragm and the record-engaging point or jewel.

Figure 1 is a perspective view showing the improvement applied to the reproducer of a Columbia cylinder phonograph; Fig. 2 is a separate view of the reproducer lever, with parts in section, to disclose the improved construction of this part, and Fig. 3 is a cross-section on the line 3-3 of Fig. 2, showing also, in dotted lines, the fulcrum of the reproducer lever.

RECORD-EJECTOR FOR PHONOGRAPHS. Elam Gilbert, Portland, Ore.; Mattie R. Gilbert. Patent No. 969,946.

The present invention relates to a new and useful device whereby the record of a phonograph or graphophone may be automatically ejected from the record cylinder without injury to the wax surface of the said record, thereby obviating mutila-

tion of the record by being required to loosen and draw the record from the record cylinder by hand.

Figure 1 is a detail front view in elevation, partly broken away, illustrating the position of the ejector when thrown to eject the record from the record cylinder; Fig. 2 is a front view illustrating the position of the ejector when the record is inward its full distance; Fig. 3 is a top plan view of the mechanism disclosed by Fig. 2 of the drawings, the record and the record cylinder being partly broken, and Fig. 4 is an end view in elevation, the record being broken away.

PHONOGRAPH, GRAPHOPHONE AND LIKE INSTRUMENT. Emil G. H. Stein, New York. Patent No. 969,917.

The object of this invention is to do away with the harsh and metallic sounds usually produced by talking machines, and this object is accomplished by means of an improved resonance box attachment which is substituted for the usual delivery horn, and may be attached to or used in connection with machines of the class specified without in any way changing or interfering with the construction of the machine or the box thereof.

Figure 1 is a side view of an ordinary graphophone and showing improved resonance box applied thereto, said box and its attachments or connections being shown in sections; Fig. 2, a plan view of the device as shown in Fig. 1; Fig. 3, a front view of the device looking in the direction of the arrow x in Fig. 1; Fig. 4, a partial section on the line 4-4 of Fig. 3, and Fig. 5 a partial section on the line 5-5 of Fig. 3.

PHONOGRAPH. John D. Bowers and Leon Mayhew, Salt Lake City, Utah. Patent No. 968,530.

The present invention relates to phonographs, and particularly to attachments for automatically stopping the machine when the record has been played.

Figure 1 is a plan view of a phonograph machine showing the invention applied; Fig. 2 is a view of the invention detached from the machine; Fig. 3 is a vertical sectional view of Fig. 4, on the line 3-3; Fig. 4 is an elevation of the braking device; Fig. 5 is a sectional view on the line 5-5 of Fig. 4, and Fig. 6 is a detail view of the trip detached.

TALKING-MACHINE. Max Oscar Arnold, Neustadt, near Coburg, Germany. Patent No. 969,239.

The present invention has reference to improvements in talking machines and relates more especially to that class of talking machines known as phonographs, in which the recorder and reproducer travel longitudinally of the revolving cylindrical

record, and the invention more particularly has for its object certain improvements in this type of machine, which render it readily adaptable to be arranged within a relatively small space, as, for instance, within the body of a doll or the like. The construction is simple, of small dimensions, light of weight, yet strong and not liable to become disordered or broken. The reproducer is limited in its lateral displacements, so that one-sided overbalancing of the containing body is obviated, which in the constructions now in use is apt to cause toppling over of the doll upon the recorder reaching one of its end positions. And, lastly, are provided means whereby the main spring cannot wholly run down or be over-wound, so that the reproducer travels with a constant velocity, thereby assuring correct and even reproduction of the phonogram.

Figure 1 represents a rear view of a machine embodying the essential parts of the invention; Fig. 2 shows a side elevation, and Fig. 3 a horizontal section, just above the driving spindle.

SOUND-REPRODUCING DEVICE FOR TALKING MACHINES. Lumen Griffith, Hudson, Mich. Patent No. 971,442.

This invention relates to a sound reproducing device for talking machines and has for its principal object to provide a novel supporting means for the record needle or stylus and to so operatively connect such needle with the diaphragm of the sound-box that a superior reproduction of sounds is possible.

Another object of the invention is to provide an extremely simple, practical and durable device of this character of such design that the parts are interchangeable and are so delicately adjusted and positioned that the records can be made finer in vibrating lines and perfect natural tones reproduced, and at the same time the weight borne by the record from the stylus or needle will be lessened, with the result that the scratching sounds will be practically eliminated.

In the accompanying drawing, which illustrates one embodiment of the invention, Figure 1 is a plan view of the sound reproducing device; Fig. 2 is a side view thereof, and Fig. 3 is a section on line 3-3, Fig. 1.

SOUND RECORDING AND REPRODUCING MACHINE. George Oulton, Charles Ablett and William Lightfoot, Liverpool, Eng. Patent No. 971,068.

This invention relates to improvements in or connected with machines for recording and reproducing sounds on flat discs.

The improvements refer to such machines in which the relative surface speed between the stylus and the spiral record line is intended to remain constant so that a symmetrically progressive angular speed of the table in machines in which the record commences at the periphery of the disc and a symmetrically retrogressive angular speed when the record commences near to the center of the disc is necessary. Hitherto in machines characterized as above stated the differential speed of the table has been obtained by continuously varying the speed of the centrifugal governor through a friction device or brake in some cases and in others by using a variable speed friction driving gear with a constant speed motor. Neither of these methods have given satisfactory results in

practice for a reasonable length of time, owing chiefly perhaps to the tendency of surfaces in frictional contact only to slip, especially as they become worn.

The object of this invention is to overcome the defects of machines in which friction is relied upon to obtain differential driving. As machines both for recording and reproducing only require to work without stopping for a period of time equal to that which is necessary for the longest record, we take advantage of this fact and employ a method of driving which would be unsuitable if the machine had to be continuously driven for an indefinite time without stopping. According to this invention the number of turns of the table and the speed thereof are governed by the length and surface speed of a flexible driving band fixed at one end of a shaft controlled to turn at a constant angular speed and wound thereon with convolutions of symmetrically increasing sizes, the surface speed and motion of the band when being

wound on or off the constant speed shaft being transmitted to another shaft, which turns the table directly or through gearing.

The accompanying drawings show the improvements embodied in three differently constructed machines for reproducing purposes, the machines being provided with spring motors of the usual kind. Alternately an electric motor may be used. The attachment for recording purposes is not shown in the drawings, as it does not form part of the invention.

Figures 1 and 2 of the drawings represent in elevation and plan looking from underneath, respectively, the mechanism of a sound reproducing machine embodying the improvements. Figs. 3 and 4 represent similar views of a modified construction of the improved machine. Figs. 5 and 6 also represent similar views

of another modified construction of the improved machine.

MANDREL-SLEEVE FOR PHONOGRAPH RECORDS. Walter C. Runge, Camden, N. J., assignor to Royal Phone and Phonogram Co., Boston, Mass. Patent No. 966,771.

Some phonographs are provided with tubular mandrel sleeves which may be slipped on and off the arbor of a phonograph and have phonograph records tubularly engaged with them.

This invention relates to such a mandrel sleeve made capable of expanding and contracting for the purpose of respectively securing and releasing a phonograph record.

In the accompanying drawings: Fig. 1 is a side view of a mandrel sleeve embodying the improvement. Fig. 2 is a section through a portion of the circumference to illustrate the means of connecting segments which are comprised in the mandrel sleeve. Fig. 3 is a central longitudinal section of the mandrel sleeve. Fig. 4 is a transverse section of the mandrel sleeve.

FORGET IT! . . .

If you've made a grave mistake—
One you didn't mean to make,
Just—forget it!

Don't let it cause you pain,
Just don't make the same again;
And—forget it!

There are many more like you,
Who have done the same thing, too,
So—forget it!

There's a future in this world,
And to those it is unfurled
Who—forget it!

So just buckle up your mind,
And encouragement you'll find
To—forget it!

Make your mind "to dare and do,"
And good things will come to you;
So—forget it!

Real advertising does just what the personal salesman does: It is a presentation of the merit of the thing or service for sale.

THORN NEEDLES

Continue to grow in popularity. Slowly but surely they are winning favor with the trade, because dealers are learning that it is the **ONLY WOOD NEEDLE THAT THEY CAN DEMONSTRATE**

They Do Please the People and Are Easy to Sell

Many a Victrola sale has been made because the Thorn Needle was used in the demonstration. It eliminates all scratching, and no change is necessary in the Reproducer. Thorn Needles are easy to handle. They play several records, and positively do not wear out or injure a record.

All Edison jobbers and most Edison dealers can use

The Edison Business Phonograph

to big advantage in their business.

You can dictate your letters to the Edison Business Phonograph twice as fast as a stenographer can take them in short hand. And a stenographer can transcribe them nearly twice as fast as from shorthand notes. And she wastes none of the time ordinarily spent in taking your dictation. All her time is spent at the typewriter, *actually writing letters*. You get double the efficiency out of every dictator, double the efficiency out of every typewriter operator, you double your own efficiency—yet nobody in your office works any harder than at present and twice as much correspondence is turned out, at the same as your present total cost—or one half the cost per letter.

AND BESIDES

what the Edison Business Phonograph will do for you on your own correspondence in your own business, it is one of the biggest helps in selling the amusement Phonograph—particularly in bringing out the home recording feature. It gives the customer a thorough insight into the making of Phonograph records, and if you allow him to

dictate a record and then listen to the result you get his enthusiasm up to the purchasing point far quicker than by any other means.

You need the Edison Business Phonograph in your business. Write us to-day for full particulars.

Edison Business Phonograph Company, 207 Lakeside Avenue, Orange, N. J.

MUSICAL SPEED INDICATOR.

Instrument Shows How Velocity Is Measured by Various Musical Tones—Series of Tuning Forks Employed for This Purpose.

A new speed indicator that shows, by different musical tones, the velocity to be measured, is described by a writer in La Nature, Paris. Its principle is not a new one, but it has only recently been adapted to practical use.

The Frahm speed indicator has been known to specialists for some time, but the great public is generally ignorant of the device, which is, nevertheless, remarkably ingenious and simple. It is based on the principle of mechanical resonance, having a series of tuning forks, each adapted to a number of vibrations of definite period. As soon as the fork tuned to these vibrations is set in motion all the others remain immovable. It is known how many vibrations it makes per second, and this is sensibly equal to that of the object whose speed is to be measured.

The application of this principle to the measurement of the speed of a rotating machine is simple enough. A rotating machine, no matter how perfectly balanced, always presents defects of centering that cause slight shocks at each revolution—slight, but always enough to influence the indicator. Again, if these vibrations, due to the non-coincidence of the axes of rotation and of inertia of the rotating piece, are found to be too feeble, nothing is easier than to amplify them for transmission to the indicator. In general, the speed indicator is mounted directly on the axis whose speed of rotation is to be measured, without any mechanical intermediary. The use of these indicators is beginning to spread rapidly.

TRAVELING MEN AS BOOSTERS.

The Denver Chamber of Commerce has formulated a list of talking points relative to the advantages of that city and the resources of the State, which will be distributed to the commercial travelers of Denver and Colorado.

GOOD ADVERTISING.

Proper Stock the Basis—Various Successful Methods of Approaching the Prospect.

The groundwork of advertising is a well-selected, clean, properly arranged stock of goods, such as will supply the wants of the purchaser.

One legitimate method of advertising is by addressing the customer direct by letter, catalog, or in the form of a circular; the other method is through newspaper advertising, with or without illustrations, and changed at frequent intervals.

Billboards, frames for cards in hotels, and public places, are only valuable to the man who has arrived at a point where he is a recognized leader. The average dealer gets little or nothing from such forms of advertising.

THE SATISFIED MAN.

The man who is satisfied with what comes to him unsolicited answers few knocks at the door. The stay-at-home misses daily opportunities that pass at the next corner. Get away from the desk—get out of the chair tilting class. Opportunities are in perpetual motion. Get after them. Don't let custom dictate the boundaries of your business—don't let convention hold you down. Lay out a plan, a campaign for new business—then go after it. Exhaust every source, swing every prospect into line. Don't be satisfied with the business that you have—get more.

MAKE FIRST RECORD.

The Columbia Light Opera Co., recently organized by the Columbia Phonograph Co., General, has made its first record, which is made a special and goes on sale immediately. The record is A5229, double disc, with the vocal gems of "Mikado" on one side and the orchestral selections on the other. This record is in the "Blue Label" series.

The TALKING MACHINE WORLD

AND
NOVELTY
NEWS

Published Each Month by Edward Lyman Bill at 1 Madison Avenue, New York, November 15, 1910

The best-known trade mark in the world

“The Victor talking machine’s design, ‘His Master’s Voice,’ has become a household word, and the quaint little fox terrier at attention before the horn is familiar to more Americans than any of the world’s great masterpieces.”—COLLIER’S, May 22, 1909.

THE PLEASURE
DOUBLED

THE COST
REDUCED

10 inch 65c. **DOUBLE RECORD DISCS** 12 inch \$1.00

Zon-o-phone Records are pre-eminently the BEST that money, brains, and a thorough knowledge of the art of sound recording can produce.

They are justly famous for their remarkably clear, natural tones, absence of scratch and wearing quality.

The greatest care is exercised in combining the selections, each side of the disc presenting the latest and best in popular music or standard compositions.

The price appeals to the masses, the quality to the classes, making them indeed a popular record at a popular price.

A new catalogue of Hebrew Single Side Selections has just been issued. Solos by Mme. Prager, Mr. Juvelier, Master Mirsky, the boy soprano, and other eminent singers. These are undoubtedly the most perfect Hebrew records ever recorded. 10 inch, 50 cents, 12 inch, 75 cents.

Resolve yourself, Mr. Dealer, into a committee of one and investigate these claims. Consider, criticize, compare. ZON-O-PHONE RECORDS will stand the test. A trial will verify all that we say.

The Talking Machine World

Vol. 6. No. 11.

New York, November 15, 1910.

Price Ten Cents

IMPORTANCE OF EDUCATING THE CUSTOMER

Some Remarks on How It Will Pay Dealers to Push Records of the Better Grade Music Side by Side with the Popular Productions—The Popular Stuff Comes and Goes but the Standard Compositions Remain Forever.

Over 90 per cent. at least of the industries of the world have been built up through educational campaigns and stimulated demand. This can best be illustrated by comparing the savage, say the present day inhabitant of the African wilderness, with one of the frequenters of the boulevards in our great cities. A breech-clout, a spear, a small thatched hut and perhaps half a dozen crude platters serve to satisfy all his needs. Then the white trader comes along; a demonstration of a gun causes the spear to be consigned to the waste heap. Trousers and a shirt and oftentimes a silk hat immediately become grave necessities. Further education brings the savage up to a point where in his daily life he needs practically everything that the highly civilized man needs.

This system of education applies to every line of business and especially to the talking machine trade. So long as the dealer rests content to let the customer decide just what he wants, just so long will his business be confined to narrow channels. When he introduces the customer to new machines, new records and new accessories, then he begins to broaden out and show an understanding of the principles of merchandizing. At the present time every means that will serve to widen the scope of the talking machine must be adopted, if success is ever to be the portion of the dealer. Take for instance the talking machine owner who comes in month after month and buys, say, half a dozen of the popular hits of the day, records selling at from thirty-five to seventy-five cents each. That man will continue in the same path for years, or until he gets tired of his machine, unless he is introduced to something new in the record line. The proper thing is to secure his attention for a short time before or after he has made his purchase and demonstrate some of the higher class records, those bearing standard or classical selections and selling at a goodly price. Perhaps for the first or second time he will simply listen without purchasing; but it will not be long before he must realize what such records will mean in his library, and so will purchase a few. Once

on the right path and the dealer may be assured that he has made a new convert to the doctrine of good music.

There is another purely business side to this question. A popular song is purchased in record form generally after it has taken its place among the "hits." By the time it has been played over a dozen times or so and the owner has heard the tune murdered by street whistlers, hand organs, etc., that record becomes a decided annoyance, and is put aside. The better grade of music, on the contrary, never becomes tiresome. A standard piece well rendered is as fresh and holds the interest as securely upon the thousandth rendition as upon the first, and the interest in that record lasts as long and longer than the record itself. One sale of such a record means the sale of many more and a continued and permanent interest in the talking machine outfit.

The manufacturers and more progressive dealers throughout the country have long realized the truth of this and have made special efforts to interest the retail customers in the better grade of music, chiefly by means of recitals of a more or less elaborate character. In another part of *The World* this month appears a description of a miniature theatre which the Victor Co. have tried out in Columbus, Ohio, with great success. This theatre is used to depict various well-known singers in grand opera who are enfolded to the gaze of the audience at the same time as a Victrola reproduces certain well known selections from that particular opera. The combination is in charge of an expert talking machine man with a thorough knowledge of musical history, who gives a short talk before each number, thereby arousing more personal interest in the different selections. This is the only one of the many plans for the uplift of the talking machine owner as a musical enthusiast. As a result the trade in general benefits both in an artistic and commercial sense. Educational work in the field of better music means long life and permanence to the talking machine trade, and lifts it far out of the field of short-lived fads. Its importance cannot be questioned.

and to hear the various machines demonstrated.

"Too many dealers overlook this important factor in modern business. The attractively arranged showrooms and neatly displayed windows are factors of great moment in modern business success—at least in the talking machine field. The houses that are losing ground are those who are overlooking the value of attractive stores and well-arranged advertising. These two last factors combined with frequent recitals are to-day, in my opinion, the most important means of attracting business, and, as I have just stated, the stores that are employing these methods are moving ahead by leaps and bounds.

"Regarding our own business, I may say that I never had a better trip. At all points visited jobbers were profuse in their compliments for the merits of the Music Master Horn. At the present time we are swamped with orders, and we are working night and day in an effort to fill them. Our facilities, which a year ago were thought ample for many years to come, have long since proved inadequate, and, although we have increased our space considerably in the last year, yet we are compelled to work nights, as we shall be for many months to come, in order to make any headway in filling the orders on our books."

NEW DISC REPRODUCER

Just Placed on the Market by the Columbia Phonograph Co. and Entitled the Columbia Concert Grand.

As a result of a series of experiments extending over a long period of time, the Columbia Phonograph Co., General, have put on the market an entirely new disc reproducer, which will be designated the Columbia Concert Grand. It is, with one exception, as stated below, usable on any instrument which takes the Columbia grand reproducer. The latter will continue to be furnished. The principal characteristics of the new reproducer are great volume and detail in reproduction. It is, however, a larger reproducer than the Columbia Grand, and the tone is different. The list price of the Columbia Concert Grand reproducer is \$5.

In this connection the Columbia Co. state: "The following instruments will, at purchaser's option, be equipped with the Columbia Concert Grand reproducer, instead of the Columbia Grand, without extra charge. The Columbia Grand reproducer will, however, be furnished with these instruments, unless the Columbia concert grand is specified: BNW Grafonola Elite (new style, retail price \$100); BNWM Grafonola Mignon, BII; Grafonola Regent, BY; Grafonola De Luxe A, BD; Grafonola de Luxe B, BT, BU. The Columbia Concert Grand reproducer is not usable on the old-style Grafonola Elite, the remainder of which are being closed out at \$7.50 retail.

"An allowance of \$2 retail may be made for a Columbia Grand reproducer on account of a Columbia Concert Grand; and the same allowance may be made for a Columbia Concert Grand reproducer on account of a Columbia Grand. On wholesale business the same discount must be deducted on the \$2 as is given on the new reproducer. The number of reproducers returned, in any one transaction, must not exceed the number of new reproducers purchased."

The company expects to have an adequate supply of the Columbia Concert Grand reproducers by this week.

INCORPORATED.

The Indestructible Phonographic Record Co., Incorporated, of New York, was incorporated last week by the Secretary of State at Albany, with a capital of \$50,000, for the purpose of manufacturing talking machine records, etc. The incorporators are: B. F. Philpot, F. W. Matthews and R. W. Wheeler, of Brooklyn.

TALKING MACHINE EVOLUTION.

H. N. McMenimen Chats Interestingly of Impressions Gleaned During Recent Trip—The Talking Machine no Longer a Toy, but a Distinctive Musical Instrument—Some Reasons Why—The Progressive Dealer Is Alive to the Value of Attractive Showrooms, Recitals and Publicity—Music Master Horns Popular.

H. N. McMenimen, of Sheip & Vandegrift, Inc., Philadelphia, Pa., who returned recently from one of the most extended and successful trips in his career—having visited practically every jobber in the United States and Canada—expressed himself most enthusiastically regarding business conditions in the talking machine trade, in a chat with *The World* the other day:

"What pleased me most on my trip," said Mr. McMenimen, "was to find that the trade at large are beginning to have a better idea of the established mission and position of the talking machine to-day. In other words, they are getting over the idea that the talking machine is merely a toy, and are now coming to consider it as a distinctive musical instrument.

"There are a great many dealers, as well as an army of purchasers, who are yet to be educated along these lines, but it is on this platform that the talking machine men of the future will win new victories.

"It is a mistake to think that we have reached the acme of perfection in talking machine invention at the present time. The great inventive minds who have developed this instrument to its present standing are not going to stand still. They are going to make the talking machine a still greater instrument, whereby the great pianists, the great singers and the great artists in all lines of musical effort can be heard in the home just as satisfactorily as if the individuals were there themselves. When we stop to consider that the science of recording is not known, it brings to us the realization of what the future will bring forth.

"We are getting away every day from the old-fashioned idea of the established purpose and function of the talking machine, and the new era will recognize it as a musical instrument pure and simple. The developments to-day are along these lines, and if the jobbers and dealers co-operate in their publicity and in their general line of selling arguments they can elevate the business and the general idea of the instrument to such an extent that it will win a new prestige—thus helping themselves and the manufacturers.

"Another feature of my trip that impressed me greatly was the fact that the jobbers and dealers who are expanding commercially and financially are those who are fully alive to the importance of having their store attractively arranged so that the general public find it a pleasing place to visit

CAUSES OF LOST HOLIDAY PROFIT.

The Situation Defined and Remedies Suggested
—The "Regular Dealer" vs. "Floater."

Almost without exception there has been a scarcity of certain goods, either Edison or Victor, during the holidays for the past several years, resulting in some dealers losing considerable profit on account of their inability to get the goods. In discussing this situation, J. Newcomb Blackman, president of the Blackman Talking Machine Co., of New York City, said:

"Opinions vary as to the cause of this condition but there is no doubt, in my mind, but that it is largely the fault of the factory, jobber and dealer combined. Many dealers make it difficult for jobbers to accurately determine their requirements, because they buy from a large number of jobbers.

"For example, one of these dealers has a sale for a certain machine; he buys from four jobbers and because that particular machine is temporarily scarce only one of the four jobbers could fill the order. There was an apparent demand for four machines, whereas only one was needed. This case multiplied many times makes a temporary shortage produce an inflated demand. Jobbers may place orders accordingly and the factory not knowing the real situation uses unnecessary effort at the expense of other machines.

"The dealer who has a regular jobber and gives him all his business, if he can handle it, is entitled to first consideration, at least from my standpoint. A second source of supply should only be necessary as a substitute and two jobbers should be able to supply the wants of any ordinary dealer.

"We have been criticized by, and made ourselves unpopular with, certain dealers during the holiday season, because they wanted goods that they could not get from the jobber whom they ordinarily patronized.

"Our policy has been that when there is a scarcity of goods we apply the 'Golden Rule,' defined as follows: Those dealers who patronize us during the dull season are entitled to recognition and first consideration when they need us to give them the goods that are scarce. Whatever prestige we lose among the type of dealer which might be classed as a 'floater' will be more than offset by the esteem of the regular dealer, whose loyalty has resulted in him being served first.

"Then another reason why the dealer should not be a 'floater' is because he may find it necessary to ask leniency in the payment of his account. If he is a loyal dealer and buys but from one or two jobbers his chances of help, under such circumstances, are certainly more favorable.

"The talking machine business is no different than any other, as far as business principles are concerned, and if the dealers will take the necessary time to determine what jobber they should give their business to and then stick to him, as long as he makes good, their patronage would insure their getting the goods at times when the demand exceeds the supply.

"It is difficult for the factories to determine the holiday demand, but they hold the key to the situation, because they have the power to determine what their line will be during the holidays, what changes, if any, are to be made, and when they will occur.

"The restricted price causes most dealers to refuse any machine that is not strictly up-to-date, thus the jobber sometimes cannot dispose of all the stock, because of a slight change is placed at a disadvantage and the situation is remedied at the inconvenience of somebody.

"Under ordinary conditions it would seem to me advisable to decide on a fixed policy and line of goods in the summer, with no change until at least February 1. This would enable the jobber to feel confident that the stock of machines he puts in before the holidays would be up to date then.

"The situation would also be improved if a large number of dealers, who make a practice of waiting until the last minute to carry a representative line of machines, would realize the importance of having at least a complete sample line during

October, November and December. They could advertise the fact and get prospects which would produce real sales for them. Sales are often lost by dealers who expect the customer to obligate himself to the extent of authorizing that the dealer get for 'his approval' a machine he thinks he wants.

"Why should a customer agree to any such plan and patronize a dealer who has not at least a sample of the different machines, when there are a number of his competitors who offer that service and it entails no obligation?

"Summing up, it appears to me important for the factory jobber and dealer to get together three or four months before the holiday season, for we always seem to be long on demand and short on supply during the month of December. Some dealers want the money in their hands before they put in the stock, but jobbers' terms with the factory prohibit their consigning goods and their profit would not make such plan profitable, so that the preparation which should be evident is halted and the tidal wave of demand cannot be met at the last moment.

"It is not too late now for some dealers to get out of the 'floating' class and narrow their patronage down to one, or not more than two jobbers. I think they will find it pays and produces better results."

35 CENT RECORD EARNS \$404.44.

This Splendid Showing Was Made by a U-S Everlasting Record Which Was Used from March Until December in a Penny Arcade in Cleveland.

(Special to The Talking Machine World.)

Cleveland, O., Nov. 9, 1910.

What would you think of an investment that would yield over 115,000 per cent.? Wouldn't it look good to you. The following isn't a bait for "get-rich-quickers," nor an advertisement of gold bricks, but the sober recital of facts about a U-S Everlasting Record, No. 223, Peter Piper March (xylophone), by Albert Benzler.

This record was placed in a penny arcade last March, where it remained on a machine equipped with an ordinary reproducing sapphire until the middle of October. During that time it was played 40,444 times by automatic count, and earned for the proprietor of the arcade the sum of \$404.44. The record cost 35 cents.

The U. S. Phonograph Co. have the record now on exhibition at their general offices in Cleveland,

where it is played in comparison with new records of the same selection and from the same matrix. They are confident in asserting that absolutely no difference can be detected in the reproductions, and that a microscope fails to reveal any traces of wear on the surface of the record, which had such a long "run." It is in perfect condition, the company claims, to be played 50,000 times more and, judging from the number of interested phonograph men who drop in for a test, this bids fair to be accomplished. Persons of a statistical turn of mind will be interested in a few figures regarding this record. A run of 40,444 playings is equivalent to continuous running day and night for 56 days. The sapphire on the reproducer travels 194.8 feet to play this record once. In playing it 40,444 times the sapphire traveled 7,878,491 feet, or 14,921.3 miles. Anyone can calculate for himself the number of foot pounds generated by the motor during the period or the energy which would have been necessary to wind a spring motor for that number of playings.

The U. S. Phonograph Co. names its records "Everlasting," and the foregoing would seem to indicate that the name fits.

NATIONAL CO.'S ROSTER OF SALESMEN.

The following is an official list of the salesmen of the National Phonograph Co., Orange, N. J., and the territory assigned to each, as published in the Edison Phonograph Monthly:

J. H. Allgaier, Missouri and Southern half of Illinois; L. W. Ballou, New Hampshire, Vermont and North Eastern New York; C. A. Briggs, Kansas and Kansas City, Mo.; A. V. Chandler, city of Chicago and Northern half of State of Illinois; A. H. Curry, Oklahoma and Arkansas; John de Angeli, Ontario, Alberta, Saskatchewan and Manitoba, Canada; F. E. Gage, Connecticut; F. E. Gressett, Louisiana, Mississippi and Texas; L. D. Hatfield, Nova Scotia, Quebec, New Brunswick, Canada; H. G. Hinkley, Iowa; W. P. Hope, Wisconsin; W. H. Hug, Ohio; M. G. Kreuzsch, Indiana; C. E. Lyons, Washington and Oregon; E. A. Neff, Michigan; C. W. Phillips, North Carolina, South Carolina, Georgia and Florida; G. A. Renner, Nebraska, Colorado, Northern New Mexico and Southern Wyoming; H. R. Sackett, Western New York; H. R. Skelton, Massachusetts and Rhode Island; J. W. Scott, Maine; J. B. Sims, Central and Western New York; J. F. Stanton, Pennsylvania; W. A. Voltz, California, Arizona, Nevada and Southern New Mexico.

We Are In Readiness for the FALL and WINTER RUSH ? ARE YOU?

Prepare now to be in a position to deliver the goods and take the profits. Don't delay.

You know what it means to say to your customer "I haven't it in stock, but will get it for you"—the other fellow gets the order. Our stocks of VICTOR and EDISON GOODS mean quick deliveries to you, and profits to both of us.

If you don't know what EASTERN CO. SERVICE is, you don't know what makes the Talking Machine Business a good Business. *Try Us.*

THE EASTERN TALKING MACHINE CO.

177 Tremont Street

BOSTON, MASS.

DISTRIBUTERS OF EDISON AND VICTOR MACHINES, RECORDS, SUPPLIES

The dealers who get the biggest returns

from the Victor business are those who stick to the Victor "quality" idea.

These dealers emphasize the Victor's fine musical qualities at every turn. They provide elaborate and appropriate surroundings for the Victor; they give frequent high-class concerts, and they speak of the Victor and advertise the Victor as a musical instrument.

Victor "quality" means money to them.

If you have not fully grasped the Victor quality idea you are not getting your full share of Victor business.

A Columbia Christmas is a good climax to a year's Columbia business and also gives a new dealer a good start on his first year with the Columbia line. Don't hesitate—start right and right now.

Columbia Phonograph Co., Genl., Tribune Building, New York

NEWS FROM THE SAINTLY CITY.

Business Shows an Upward Trend, with Excellent Holiday Prospects — Grafonola Popularity—F. G. Smith Piano Co. to Handle the Columbia Line—Aeolian Co.'s Big Victor Business—Thiebes Piano Co.'s Satisfactory Trade—Some Recent Visitors.

(Special to The Talking Machine World.)

St. Louis, Mo., November 1, 1910.

The talking machine business is having a good upward trend, and all reports are good, with prospects for a splendid fall and winter season's trade.

E. B. Walthall, manager of the Columbia Phonograph Co., reports both wholesale and retail trade very good and the line of Grafonolas is proving very popular with the demand for the Regent having the lead.

Manager Walthall has just closed a big deal with the F. G. Smith Piano Co., who will carry the Columbia disc line complete. This concern is one of our piano houses here, and their prominence in the trade will add very materially to the prestige of the Columbia in this market.

B. Feinberg, southern traveler for the Columbia Phonograph Co., was a recent visitor here

Among the recent Columbia visitors here were W. W. Fisher, Murphysboro, Ill.; C. N. Lanher, Mattoon, Ill.; W. L. McAllister, Moberly, Mo., and Mr. Schell, of the Schell Music and Novelty Co., Jefferson City, Mo.

The talking machine department of the Aeolian Co., report that October finished up with a rush. The "headliners" of the month were Victrolas, particularly the styles X and XI, which have made a decided hit with the Aeolian trade.

L. A. Cummins, traveler for the Aeolian Co., returned recently from an extended trip through Illinois and Indiana. His order book was full of healthy orders, and he himself was full of enthusiastic reports regarding the fall and holiday business.

O. A. Gressing, manager of the Victor departments of the Aeolian Co., spent a few days at Aeolian Hall last week. Needless to say, he was a very welcome visitor, and the only regret was that his sojourn in St. Louis was of such short duration.

The Hawkins Music House, Decatur, Ill., held their formal opening Oct. 22. This store is one of the finest equipped establishments in Illinois. Sound-proof demonstrating rooms have been installed, and the interior finishes are ivory white of the finest construction.

D. K. Myers, the well known Zonophone jobber, reports October as having been quite an active month with him, and good prospects ahead.

J. K. Savage, who is traveling for Mr. Myers, has been sending in some nice business.

Miss Elizabeth Vandeventer, formerly in charge of the retail department of the Silverstone Talking Machine Co., has accepted the position as manager of the talking machine department of the Bollman Bros. Piano Co.

She is succeeded at the Silverstone Talking Machine Co. by Miss Bertha Hirsch.

Manager Robinson, of the talking machine department of the Thiebes Piano Co., reports business good. They sold eight Victrolas and two Reginaphones in one week recently.

Miss Sadie Rosenblatt, manager of the talking machine department of May, Stern & Co., reports trade growing better.

NEW VICTOR PUBLICITY PLAN.

Use Miniature Theater in Connection with Victrola in Endeavor to Create Greater Public Interest in Operatic Music and to Stimulate Sales—How the Idea Has Been Worked Out Successfully in Columbus, O.

(Special to The Talking Machine World.)

Columbus, O., Nov. 7, 1910.

Talking machine dealers and jobbers in Columbus and vicinity are much interested in the latest idea of the Victor Talking Machine Co. for creating greater public interest in operatic music and in that way stimulating the sale of their machines and records of the better grade.

The new scheme, which has been tried out very successfully in this city, is distinctly novel and is carried out in a thoroughly comprehensive manner in keeping with the previous publicity stunts of the Camden concern.

The new scheme embraces a miniature theater, complete in all its details and exquisite in its furnishings, which is used in conjunction with the Victor Victrola, for the demonstration of operatic records. This theater complete occupies a space of 9 x 11 feet, the proscenium arch being approximately four feet across. The scenery for it has been painted by an artist of repute, which is self-evident upon even a hasty examination. It is as completely equipped in the matter of lighting effects as a real playhouse.

On entering the recital room the audience sees nothing of the theater—merely a well proportioned drapery of dark green plush. This is surmounted by a cornice of dull gold from which hangs a valence of the same material as the curtain. On this is embroidered in gold "Victor-Victrola" and at each end is a Napoleon wreath with a letter "V" in the center of each. Before the plush curtains are two Victrolas. Souvenir programs, with specially designed cover appropriate type, half-tones and so forth, are distributed, together with leaflets bearing translations and the original verse of operatic arias.

The recitals begin with one of the famous overtures. This may be followed by a standard song, the record being accompanied by a piano. The next number is usually chosen from opera. The room is darkened as the accompaniment begins. With the first notes of the singer's voice the heavy curtains draw apart and before one's eyes, with all the beauty of color, light and perspective, is the scene in which the selection is sung in grand opera. Not one but several such scenes are shown during each recital.

The Victor Co. have wisely selected for this work its special representative, Ernest John, who talks music and opera in the manner of the man

who knows his subject, and, moreover, he is able to talk convincingly to any class of audience.

A running comment on the numbers in the program, the story of each operatic aria and its relation to the whole, is given in advance of each selection. With such an introduction operatic numbers, even for those whose acquaintance with the subject is limited, are no longer fanciful uncertainties but something to understand and enjoy. Mr. John's idea is that "one is much more apt to understand and sympathize with poor Pagliacci when one knows the reason and the circumstances of his poignant grief," and the correctness of this view has been demonstrated.

In connection with the new educational campaign Perry B. Whitsit, president of the Perry B. Whitsit Co., said: "The recitals in Columbus compelled the attention of the best class of trade, called forth enthusiastic praise from the musical critics of the papers and made operatic music an open book to many for whom it had hitherto had no significance and no vital interest. Of this last we had ample evidence in our sales. In my experience no such co-operation as this has been attempted by any manufacturer of musical instruments, nor do I know of any so well calculated to produce results.

"It is a matter of common knowledge that people grow more appreciative of classical music as their acquaintance with it grows and their understanding of it increases. Convert 'classical music' into the commercially equivalent phrase 'high priced records' and the magnitude of the Victor Co.'s project becomes apparent."

BURTON PIERCE A BASEBALL EXPERT.

Burton Pierce, manager of the talking machine department of the J. W. Jenkins Sons Music Co., Kansas City, Mo., who participated in the famous game of baseball given by jobbers at Atlantic City last July, is keenly interested in athletics as well as baseball. He is a member of the Kansas City Athletic Club and also an active member of the local amateur baseball team which won the championship this year. His specialty is first base. It is now easy to understand why he displayed so much skill at Atlantic City.

AN OMINOUS MOVE.

C. C. Roush, brother of R. C. Roush, president of the Standard Talking Machine Co., and secretary of the National Talking Machine Jobbers' Association, has built a very cosy bungalow about twelve miles from Pittsburg. In view of the fact that he is a bachelor this move is significant.

COLUMBIAS FOR U. S. WARSHIPS.

The Columbia Phonograph Co., of Boston, Mass., on the 7th inst. sold a cash outfit to the "U. S. S. Celtic," stationed at the Charlestown Navy Yard. Some time ago the Columbia dealer at Quincy, Mass., sold a BKT cylinder machine to the engineer on the United States submarine boat "Holland."

NEWS FROM THE PACIFIC COAST.

Dealers Looking Forward to Large Holiday Trade—High-Priced Machines and Records in Demand—W. S. Storms Takes Charge of the Spokane Columbia Branch—Other Columbia Changes—Business with This Concern Excellent—A. G. McCarthy Reports Lively Victor Business at Southern Points, Where He Recently Visited—Dealers Awaiting Larger Supply of New Style Victor Victrolas—Kohler & Chase's Active Columbia Business—Other News of General Interest.

(Special to the Talking Machine World.)

San Francisco, Cal., Oct. 29, 1910.

A few of the local retailers say that the October business has hardly been up to that of September, which was unusually active, but nobody is inclined to make any complaint, and judging by the majority of reports, the month seems to have been fully as good as September, and possibly better. At any rate, no anxiety is felt regarding the holiday trade. With the approach of Thanksgiving and Christmas a more liberal spirit is already becoming apparent, more people are shopping, and money is coming out much more freely than during the early fall. High-grade records are in excellent demand, and the new lines of improved machines are gaining ground all the time. Many people have been waiting to see the new Victrolas, which will undoubtedly fill a long-felt want, and a large number of sales will be closed as soon as these machines can be placed in stock by the retail stores.

With the jobbers the past month has been a record breaker. They are well satisfied with their local sales, but are giving most of their attention to the outside trade, in which they find ground for the highest hopes. Many more new stores have been started this month, and while a large amount of promising new territory is being opened up, a remarkable growth is taking place at the same time in districts which have been covered fairly well in the past. Shipments have been going forward at a rate which would already have depleted the stocks carried in former years, but, owing to the precautions taken early in the season, and the constant arrival of large quantities of new goods, stocks in the local warehouses are kept in unusually good condition. The advantage of this becomes more apparent as the season advances, and the outside retailers send in hurry orders for all sorts of goods of which they are running short.

The growth of the Columbia Phonograph Co.'s business on the Coast has caused a number of changes in the organization in the last year or two, and a new shifting of positions has just taken place. Willis S. Storms, who has distinguished himself by his efficient work in covering the outside district in this State, has been promoted to the position of manager of the Spokane, Wash., branch. That city is the commercial center of a large and prosperous district known as the Inland Empire, and its business has grown to large proportions of late necessitating a strengthening of the store there. Arrangements have been made whereby Mr. Storms' former territory will be looked after, for the present at least, by E. W. Cyrus. Mr. Cyrus traveled for the Columbia Phonograph Co. for several years in the past, and has for the last year handled their line in the northern part of California for Kirk, Geary & Co., their distributing agents at Sacramento. He will continue his work for that house, in addition to handling the country, both coast and interior, from San Francisco south, for the Columbia Phonograph Co. Mr. Storms leaves his territory in first class condition, having placed Columbia agents in every town of any importance. He left for the North about the middle of the month, and is now familiarizing himself with his new position. Mr. Cyrus will make his first trip about the middle of November. Mr. Scott reports a busier season for the holidays than ever before, the sales being increased by the opening of a number of new agencies during the month. He notes an extremely large demand for the new \$17.50 machine put out by this company. Wm. Hurst has been calling at the local office this month.

The Pacific Phonograph Co. have about completed their stock, the large arrivals of the last few weeks filling up the space recently added to its establishment, in addition to supplying material for current orders. This company are living up to their promise to keep a full stock of Edison goods on hand at all times, though it is by no means easy to do so. This company are making a strong feature of the Music Master horn, the agency for which was taken on a few weeks ago, and are already getting a substantial volume of business in this line. C. M. Jones returned from his Southern trip a couple of weeks ago, and reports a very successful business, with favorable conditions everywhere he went.

Andrew G. McCarthy, of Sherman, Clay & Co., made a visit to Southern California recently, spending several days at the company's distributing branch for Victor goods in that city. He found the southern business in a highly satisfactory condition, with a keen interest in Victor goods, and especially in the new Victrolas, which are expected to be a tremendous success there. Samples of these machines have been on hand at the San Francisco store for some time, but the arrival of goods for distribution has been somewhat delayed. The goods are expected within a very few days, however, and every effort will be made to fill the orders on hand, though it may be several weeks before the demand can be fully supplied. It is believed that by the end of the month sufficient stock will be coming in to take care of the holiday requirements. It might be supposed that the anticipation of the new models would interfere with the sale of those on hand, but they are still in good demand and moving off rapidly.

Peter Bacigalupi & Sons, the pioneer talking machine dealers of San Francisco, have moved their store to the second story, directly above the place formerly occupied. They have installed practically the same fixtures as before, and have additional display room for the machines, with plenty of light. Mr. Bacigalupi says that since the confusion of moving has quieted down business

has been fully as good as before, and believes that the gain in display room, etc., more than offsets the disadvantage of being on the second floor, while he is especially pleased at the great saving in expense.

James Black, of the Wiley B. Allen Co., reports only a moderate business for the past month, but is making preparations for a big holiday season. He is anxiously awaiting the new Victrola, which he recently inspected at the factory, and which he believes will be one of the most attractive features ever offered, appealing to a large class of trade which was formerly difficult to reach. It is just about a year since this department was launched, and during that time it has built up a very successful business in Victor machines. Mr. Black is very optimistic concerning the future and is confident that the second year will bring a great advance over the first.

The local retail business in Columbia goods conducted by Kohler & Chase has been very satisfactory this month, though no record-breaker. This house is increasing its efforts on this line, making frequent displays of the Grafonola machines on the ground floor, which was formerly entirely devoted to pianos.

WOULD YOU BE A SALESMAN?

Would you be a salesman? Then make up your mind that you *will* be a salesman, and set about becoming one, and no man shall stop you. Will power is greater than the greatest obstacle. Study people. Study your customers. Study yourself. The greatest study for the man who is to handle people is people. The only way to succeed with this study is to keep at it until success does come, until what in others seemed at first to be hypnotism becomes merely the knowledge of how to lead the mind opposed to you.

The harder you make it for the buyer to be cold and distant, the easier you make it to sell him goods. Get him warmed up to a point where he must take an interest in spite of himself, and the sale is pretty well sprouted.

Won't You Have a Lesson in Spanish?

It's so easy to learn by the I. C. S. system—and a knowledge of Spanish is so useful nowadays.

The I. C. S. system of language instruction by means of the phonograph makes easy the mastering of a foreign language, and appeals with compelling power to thousands. The dealer in phonographs who does not carry I. C. S. Language Outfits is neglecting a quick and sure way to increase his business. The new \$35 Language Outfit of the I. C. S. is a marvel. It represents the highest art in the teaching of languages, and embodies a method that has won the warmest praise of thousands qualified to speak authoritatively. The Spanish, French, and German Embassies at Washington, as well as the leading colleges, have cordially indorsed the I. C. S. method of teaching languages.

The I. C. S. Language Outfit consists of an Edison Gem Phonograph made especially for language work; small horn; headband hearing tube; oil can; and 25 Conversational Records teaching pronunciation guaranteed to be absolutely correct, with native intonation and inflection. In addition to these Conversational Records there are pamphlet Instruction Papers teaching the theory of the languages. The new Outfit is at one and the same time the best and cheapest ever offered—the price being only \$35.

If you want to increase your business, write to-day for full particulars.

NEW YORK, NOVEMBER 15, 1910.

THE demand for high-priced talking machines is growing all the time.

In fact, the demand exceeds the physical ability of the manufacturers to supply the stock.

While it is not pleasing to the manufacturers to keep the trade waiting for stock, yet it is well known that warning was given early in the year that there was bound to be a shortage of goods for the holiday trade unless orders were placed sufficiently far ahead so that preparations could be made to take care of the trade.

Jobbers recollect well the condition which existed last year, and naturally the experience was a costly one, for no one enjoys witnessing a loss of trade and profit, which might come to them provided they had stock on hand.

Some of them are bound to be confronted by unpleasant conditions regarding the supply of stock again this year.

It is certain that some jobbers must give evidence of greater confidence in the business than they have in the past.

Even if a man has to borrow money and pay good round interest he will be still ahead if he is piling up a stock of machines for which there will be a demand later on in the season.

He cannot make money any faster or any easier, and confidence is the one thing which is necessary in trade to win out.

EVERYWHERE the value of system becomes more and more apparent.

The owner of one of the largest and most complex of enterprises arranges his day's work on a schedule as exact as a railway time-table.

In no other way could he keep in touch

with the manifold details of his great enterprise—take care of the day's raw material for a dozen plants in half as many markets—direct an organization of thousands—sell and deliver his products for the world's market as well as supervise the whole tremendous fabric.

It will be readily seen that such a business must be systematized and each department thereby have its hour and quarter hour of the daily program when big problems are to be considered.

Of course, the schedule may be flexible, yet system, exactness and thoroughness are factors which are inseparable for the success of a great enterprise.

Men understand that thoroughly.

NEW ideas, provided they are good ones, are desirable in all lines of trade and originality counts for something, and one of the cleverest plans for the exploitation of a special product which we have known in recent years is that originated by the National Phonograph Co., which is colloquially termed the "The Edison Wagon Plan."

It is interesting to note how this new campaign for the selling of phonographs has captured the country.

So great a hold has this plan taken on the trade that the producing corporation has been unable to supply the wagons as rapidly as desired and several large dealers remarked to us that it has given their trade an impetus such as it has not had for years.

This plan has pumped life into the business such as it enjoyed in the halcyon days of old.

It is surprising to find the number of people in rural communities who do not know of the entertaining powers of the phonograph, and when it is presented to them in such a forceful and interesting way as it is by the wagon campaign, it is easy to make sales.

Men are fascinated over the plan and the surface is only scratched.

It is going to help out the business very materially and everything looks good all around.

And, so it goes. The value of an idea!

The phonograph business has been quiet.

There is no disputing that and this new wagon campaign has given it an impetus which is appreciated by every Edison man in the country.

WE are doing to-day a splendid export business in talking machines.

In fact, it is surprising to see when we study the different trades how the talking machine export trade has grown.

Compared with an old industry like piano making it seems almost ridiculous to say that the export trade in talking machine compares in dollars and cents with that of pianos, which, of course, is old established and America to-day is the greatest producing country in the piano line, and yet we are sending more talking machines to foreign countries in dollar values than we are pianos.

Speaking of export trade a representative of one of the large export houses remarked recently:

"American manufacturers are reaching

more and more after the export trade. They are better equipped and have a better understanding of the essential conditions for competing in the foreign field, having gained more experience in the export line than they had a few years ago, when many even of the larger houses did not know how to set about meeting foreign rivals. Many manufacturers, satisfied with the great home markets, were reluctant to compete and did not do so because they were not pressed in certain lines. But now there is a greater desire to enter the foreign trade as an alternative to the fluctuations of the home trade. This is not merely to get rid of surplus production—but it arises from the necessity of a legitimate foreign trade based on the merits of American skill and ingenuity in manufactures."

THE catalog houses are far and away the best advertisers on deck to-day.

Why? Take their book and read. You will find a description that describes; a picture that shows "how the thing looks"; a price that tells how much it costs. That is the sum and substance of their advertising—and it gets the business. The local newspaper is the best advertising medium on earth for the local merchant—if he will only use it. He is on the ground. He has the goods. If he is out of an article he can get it quicker than the customer—if he can't, he had better try another house. He stands behind his goods. He is there to-morrow to rectify the error of to-day. But he must get the attention of the buyer—and he must get that attention before the catalog man does. The most effective way is through the columns of the local newspaper.

GOODS and prices are not all that go to make up a successful business. People nowadays like to trade at a store that is up-to-date in business methods; one that has a system of arranging and displaying goods artistically; a store that has a reputation for being strictly honest and honorable in all its dealings, and a store whose reputation and character stand for something more than dollars and cents.

MAKE every customer that comes into your store feel that his presence, as well as the business that he does with you, is necessary to your success. Enthuse him with cheerfulness and bright prospects for the future, and at all times see that he receives attention and courteous treatment. Gain his confidence and never betray it. Remember that it is the man behind the gun and not the gun that wins the battle.

PERSONALITY is the greatest asset that any retail business man can have. He may have the goods, the price, the location, but he must have the personal magnetism in order to have business success. Every man stands for something in his own business, and represents ideas of his own. You will find upon investigation that the heads of our largest financial institutions are men of wonderful personality, who have injected this personality into their business until it is felt in every department.

THE PERMANENT NEEDLE SALES CO.

14 STATE STREET, CHICAGO, ILL.

TOLEDO DEALERS ORGANIZE.

Talking Machine Dealers of That City Form an Association, One of the Chief Objects of Which is to Enforce an Agreement Among the Members Calling for an Additional Charge of 10 Per Cent. on Instalment Sales.

(Special to The Talking Machine World.)

Toledo, O., Nov. 7, 1910.

The talking machine dealers of this city have organized the Toledo Talking Machine Dealers' Association for the purpose of improving conditions in the trade in this city and announce as one of their chief objects the regulation of prices on time sales in order to provide for a better profit for the dealer.

The members of the association, believing that there should be a difference between the prices on cash and time sales, have agreed to make an additional charge of 10 per cent. on all instalment sales. The agreement binds practically every dealer in the city.

Apart from putting the instalment business upon a better paying basis, the new plan enables the dealer to impress the customer with the advantage of purchasing for cash and is therefore expected to increase that class of sales.

NATIONAL TRAVELING ASSIGNMENTS.

B. P. Rhineberger has been appointed to travel New Jersey, Delaware, Maryland and the District of Columbia as salesman for the National Phonograph Co., Orange, N. J., in place of H. D. Clark, who will hereafter be connected in a special capacity with the company's legal department.

John H. Gill has returned to his old love after an absence of about a year, during which time he acted as traveling representative of the Edison Storage Battery Co., and has been entrusted with the mission of stirring things up in Oklahoma for a starter. Those who are acquainted with John's forceful tactics have no doubt that the "stir" will follow very shortly after his arrival at his post.

FANNIE J. CROSBY TO EDISON.

The Famous Blind Poetess Sent an Appreciative Letter and Poem on Receipt of an Edison Home Phonograph.

The following letter and poem, dedicated to Thomas A. Edison, were sent to B. P. Rhineberger, formerly a representative of the Century store, Edison dealers at Bridgeport, Conn., by Fanny J. Crosby, the famous blind poetess and hymn writer, many of whose beautiful compositions are to be found in the Edison catalogs, and were inspired by gratitude for the pleasure which the installation of an Edison Home phonograph brought to her home:

"Esteemed Friend—Through your kindness and that of the Century Co., whom you so faithfully represent, I have the honor of stating publicly my views in relation to the Edison phonograph and of proving its inestimable worth. It was you who so generously placed it within the circle of my home, thus affording to each one of its members a rare treat which I assure you will never be forgotten. Its clear, silver tones, its sweet classical melodies, beautifully and artistically rendered, have held us captive, not only to the productions of the old masters, but also to the music of distinguished modern authors. In a word, we hail the Edison phonograph and we venerate the genius of him by whom it was invented—a genius whose deep research and unwearied perseverance have made him the wonder and admiration of a progressive and literary world.

"O Edison! through thy electric power
New stars appear and shed their glories forth;
The hill of science thou has nobly climbed,
And on its very summit thou dost stand,
Crowned with the laurels of immortal fame.
God give thee health for each revolving day,
And spare thee still to work for years to come."

HANDLING THE CLERKS.

An experienced retail dealer who has handled a great many young men in his time, and has made

good business men out of a lot of them, says that he can bunch them all into several classes:

"Those whom I am glad to encourage, promote and pay better. Those whom I am glad to say good by to, and wish them good luck in some other line of trade. Those whom I would like to see coaxed away from me by a competitor whom I dislike. And a few whom I would like to take out and drown."

OPENS NEW STORE IN TOLEDO.

F. C. Gunning, Formerly a Traveler for the Perry B. Whitsit Co. Opens "The Talking Machine Shop"—Handles Edison and Victor.

(Special to The Talking Machine World.)

Toledo, O., Nov. 10, 1910.

F. C. Gunning, formerly a traveler for the Perry B. Whitsit Co., Columbus, O., has given up that position to enter the retail talking machine field, having opened "The Talking Machine Shop" in this city. He is occupying the store formerly occupied by the Klien & Heffelman Co. at 340 Superior street, which he has fitted up with appropriate furniture and with soundproof demonstration booths. He handles both the Victor and Edison lines and has adopted the slogan "At the Sign of the Dog."

Manager Terry, of the Grand Opera House, Atlanta, Ga., has arranged with the Columbia Phonograph Co., of the same city, to place in the lobby a \$200 Grafonola Regent on Monday, Tuesday and Wednesday of each week. An operator will be provided by the company, with a select repertoire of the finest records, and the machine will be played two hours in the morning and two in the afternoon of each of the three days.

The Ross P. Curtice Co., of Lincoln, Neb., are now handling small goods in addition to talking machines.

(Special to The Talking Machine World.)

London, Eng., Nov. 9, 1910.

"Quite beyond our expectations" is the verdict pronounced by all engaged in the manufacture or the selling of talking machine goods. Even the dealers have nothing but satisfaction to express, for the public now seem only in their glory when buying records, or maybe a new machine. And from now onward trade will steadily increase until it reaches the zenith of its greatness—during the few weeks prior to Christmas. Seasonable lists of titles are already in the hands of traders and preparations generally are well advanced to cope with the expected volume of business, which many assert will this season outrival the boom year of 1906. The delay in issuing to dealers the new machine models, however, has been the cause of some little annoyance, through the actions of a few of the manufacturers advertising to the public before dealers have had a chance to stock up on the new models. The reason is transparent enough. But how can the dealers be expected to shift the old models in stock, when they are handicapped by inquiries for the very latest—advertised prematurely by the makers? There's bound to be a fly in the ointment somewhere. And in this regard a disturbing factor of the otherwise bright situation is the prevalence of price-cutters. They are to be found in almost every trading center, and particularly in London; 9d., 10d., one can even buy a disc record for 6½d., and where, is told in the large advertisement space taken by some of the great London stores in newspapers, magazines, etc. But they are not by any means the worst delinquents. The most glaring example of price cutting within recent years emanates from a certain firm

located near Cheapside, London. They advertise records at half price, and even conduct a special house organ which may be bought from the guttermen for twopence. I have no knowledge of how many are sold, but my attention was recently directed to an issue wherein a dealer's stock of records of several well-known makes is offered to the public at—in some instances—less than dealer's prices. And being a dealer's stock, the records cannot be considered as second-hand! Machines, too, may be had at about half the selling price, and many are said to be perfectly new. Cannot the manufacturers do something to stop this growing evil?

At the present time industrial conditions throughout the country seem to be fairly peaceful, there is a better feeling of security, and talking machine business generally is in a state of greater stability than has been the case for some months past.

Anent Promotion of Foreign Trade.

The amount of export trade we must consider to be tolerably good, all things considered. Nevertheless, proportionate to the progress of Continental concerns, our manufacturers are very much behindhand. Official assistance in the promotion of British trade with our colonies and foreign countries is by no means lacking in thoroughness, as is manifest by the many consular reports of information regarding local conditions and requirements of trading; and this apart from our own humble endeavors in that respect. Yet there are not wanting signs of apathy on the part of our manufacturers, who, either deliberately or otherwise, fail to grasp and study sensible and reasonable advice from the man on the spot. With few exceptions no particular, let alone special, attempt is made to meet the very natural demands of colonial and foreign traders in the way of submitting the designs and construction of machines likely to meet the taste, climatic and other conditions of the various countries. In these days of keen competition, surely it is reasonable to expect manufacturers to study the demands of oversea buyers, and go out of their way, if necessary, so to do. Expectation and practice in this case, though, are indeed very wide apart. It should not be so. Another, and perhaps the most important feature, of our but slowly progressive export trade is the total disregard of all advantageous opportunities to get into touch with foreign markets. How many of our manufacturers make use of such mediums as governmental trade commissioners, consulates, and the inquiry bureaus established in various parts of the world? Very few. Customs duties, regulations, trading conditions, competition and a mine of other information of great interest to all talking machine merchants can be obtained for the asking from the Board of Trade, Commercial Inquiry Branch, located in Basinghall street, London, E. C. Export business can be done safely and on advantageous

terms if due care is exercised and a careful regard paid to the correct compilation of publicity literature printed in foreign languages. These points are reiterated in almost every consular report which reaches this country. The British manufacturers seem quite incapable of appreciating this valuable advice. One of the first essentials in cultivating foreign trade is to offer a man something that he can read or understand. On that ground alone much trade is lost, and until we wake up and act upon these facts, so surely will the cream of the business remain in the hands of our enterprising friends over the water, who, it must be admitted, regard the studying of foreign local conditions as an elementary step to success. The Board of Trade will direct and advise traders of commercial opportunities in our colonies, and can provide information respecting the trading regulations and conditions in foreign countries. In addition to other representatives located in various parts of the world, the following trade commissioners were appointed some time ago: Canada, Richard Grigg, 120 Board of Trade building, Montreal; Australia, C. Hamilton Wickes, Equitable building, Melbourne; New Zealand, G. H. F. Rolleston, P. O. Box 369, Wellington; South Africa, R. Sothern Holland, P. O. Box 1346, Cape Town.

The consul at Buenos Ayres points out that the retail trade there is almost entirely in the hands of foreigners, and among the nationalities represented the British are conspicuous by their small number. It is said that twenty-five years ago both the import and retail trades were in the hands of the British. Apparently, however, the number of British retailers has not grown with the increase of business.

"Tournaphone" Disc Machine Prices.

On the last day, when all the printer-compositors of this world come up for judgment, what a lot they will have to answer for! Their misinterpretation of advertisement copy is often more amusing than serious, but of the correction which I have to make this much may be said without fear, I hope, of wounding their very natural feelings, that under pressure of work they do strange things. And having made that very transparent excuse, I will endeavor, with their assistance, to point out the error of their ways. In the advertisement on page 21 of our last issue the prices of Messrs. Murdoch's series of "Tournaphone" disc machines were given as from 11/9d. to 12/12d. retail. The omission of this sign (/) after the last 12 was no doubt very obvious to our intelligent readers, but as this journal circulates to the uttermost parts of the world, to lands of strange tongue, where perhaps European signs and figures are not read without some little difficulty, let me give the correct reading of the "Tournaphone" price, i. e., 11/9d. to £12 12/. And having absorbed that, the next best thing dealers can do is to write Messrs. Murdoch for

COLONIAL RECORD

catalogs and terms of trading, for there are wonderful sale possibilities in these instruments, of which, by the way, no less than 27 distinct models are listed!

Alex. Hesse Optimistic Over Business.

A short, interesting chat recently with Alex Hesse, one of J. E. Hough's several travelers, revealed this fact—that despite trade disputes, labor troubles, etc., talking machine business is remarkably healthy throughout the country. Modestly discounting any credit due to himself, Mr. Hesse reports that Edison-Bell goods are very popular with dealers, because they sell on merit alone. He is particularly optimistic of the results of his recent visit to Newcastle, Liverpool, Manchester, Leeds, Bradford, Halifax, Birmingham, Staffs, etc., in which towns some nice orders were secured.

The Qualities of the "Flex" Diaphragm.

Considered from every point of view the "Flex" diaphragm is certainly one of the most satisfactory lines a dealer can handle this season. Its tone quality is powerful and sweet, and it sells at a reasonable price, providing, too, good profit to the dealer. The "Flex" is well and favorably known in England, while in foreign countries it is regarded very favorably. Daws Clarke is prepared to receive applications for agencies where not represented, and being assured that the "Flex" is one of those selling lines of least resistance, my readers should certainly take advantage of this opportunity. The latest Indian recruit is Sen & Sen, who, I am told, are doing a very good trade with "Flex" diaphragms throughout the chief centers of that Empire.

Wireless Lighting.

From Copenhagen comes a report of Valdemar Poulsen's successful experiment of his latest startling discovery—wireless lighting. While his assistant stood in one room holding two incandescent lamps the inventor went to another room and placed his transmitting apparatus in position. On pressing the two contacts the lamps were lighted

and extinguished as by magic, for there was no connection of any kind between the apparatus and the lamps.

How the Dealer Is Helped.

The dealer is a much pampered man these days. Not only do the manufacturers (some of them) spend large amounts of money in advertising to the public, all for the benefit of the dealer—creating his trade, in fact—supply liberal quantities of publicity literature, show cards, etc., and arrange and pay for concerts, but must even now relieve him of all worry and responsibility in regard to devising ideas and selling schemes! Really, Mr. Dealer, you are of a privileged class. Nothing to do but take the money, and in that, perhaps, you'll soon want some assistance. No? Well, I believe you. But seriously, despite such valuable assistance, there is much you can do locally in the direction of advertising and other means of getting into touch with the prospective buyers of your immediate neighborhood. If only the healthful and enterprising example of such firms as the Gramophone Co. can rouse and stimulate your activity and enthusiasm in the direction of making a special effort this season to create a record turnover, then such liberality of press advertising, and such helpful assistance as they offer you, will not have been made in vain.

New Edison Amplifying Reproducer.

One of the coming Edison innovations is a new amplifying reproducer having a somewhat larger diaphragm than the present model. It will play both the 100 and 200-thread records, and is said to increase the volume without loss of detail and sweetness of tone. More anon.

An Enterprising Sales Scheme.

One of the most enterprising sales schemes I have heard of came under my notice recently. Keys, the well-known North London dealers, are out to push Edison goods all the time, and their latest publicity idea is certainly worthy of mention here, because, apart from its example to other dealers, it represents a degree of merit and origi-

nality seldom met with this side of the water, anyway. Their plan was to stock up a cartload of Edison "Fireside" instruments and plenty of nice records, and deliver an outfit to good-class residents in various districts. No charge or obligation to purchase was made, and the goods were collected after three days' trial. Backed with good literature, etc., the scheme proved very satisfactory. And you may be certain those who did not purchase will receive an appropriately worded letter in due course. A very commendable idea!

Van Allen Shields on Copyright Question.

Over the name of Mr. Van Allen Shields, of the Columbia Co., a very interesting letter upon the copyright question recently appeared in the Times newspaper. After dealing very exhaustively with the pros and cons of the situation, Mr. Shields' letter winds up with the following: "Compulsory license' is only one of the thorny problems that crop up when this question of musical copyright as applicable to mechanical players, is considered. The amount of royalty to be paid, the manner of its collection, the prevention of double royalties on records exported, the right to use the text when words and music are reproduced, and the right of adapting compositions for reproduction are some others. It is to be hoped that when Parliament comes to deal with the subject it will give full and careful consideration to all these matters. The evidence taken by the copyright committee should be of material assistance. Nevertheless the bill introduced just before the adjournment is silent on the point of 'compulsory license,' and apparently leaves much to be desired so far as direct and illuminating references to the other knotty questions of a difficult subject are concerned."

In view of the near reassembling of Parliament and the influential character of the Times newspaper, Mr. Shields' timely letter is almost certain to have come under the notice of the Parliamentary promoters of the bill, and it is perhaps not too much to expect that his reasonable remarks may exert some influence upon the situation.

Some Notable Favorite Records.

Not so very far back the recording of selections by such a combination of star musicians as the bands of H. M. Life Guards, Scots Guards, Irish Guards, and such leading artists as the soloists and grand chorus from the Berlin, Vienna and Paris opera houses, on a double disc selling at 2s. 6d. would have been regarded as amazing. We are now getting quite used to it here, but out abroad such value is still looked upon more or less with great enthusiasm, and my readers will therefore appreciate the recent issue of Favorite records—14 titles from "Faust," excellently rendered by leading continental artists from the above-named opera houses. The quality of the recording reaches a very high standard, and the enterprise of the Favorite Record Co. will assuredly receive just recognition in the shape of substantial orders. Application to 45 City Road, London, E. C., should be made for particulars of trading terms, etc.

Doesn't Pay to Fool with the Auctioneer.

An amusing story of a riot in an auction room was told in the courts recently. Just after plaintiff's sale had commenced, defendant, somewhat inebriated, appeared on the scene and created an uproar, which terminated in a miniature riot. Under examination as to alleged inflated reserve prices, plaintiff was asked: "A grand piano, in splendid mahogany case, is £5 too high for that?" "Yes, 10s. would be enough; only the case was worth anything." "£2 for a harmonium in case?" Plaintiff—"Too dear; there was no sound in it." "Cabinet piano by Collard, 30s.?" "Oh, decidedly too high; there was no music in it; only the shell." (Laughter.) For the defense—Defendant said that on the day of the sale he had about a dozen drops of "Scotch" with the plaintiff, and he doubted if either of them knew much about what they said. (Laughter.) The fact remained that plaintiff started the sale before defendant had put his reserve prices on, and when he heard of it he went and stopped the sale. Verdict—£72 odd damages for plaintiff.

National Phonograph Co.'s Recent Issues.

In addition to the usual monthly high-grade list of titles the National Phonograph Co. have now issued a special catalog of titles suitable for Christmas. There are fourteen splendid Amberol selections and about 36 Standard, of great variety. The December issues are as follows: Grand opera records—"Lenz" (Hildach), sung in German, Leo Slezak; "Boheme—Mi Chiamano Mimi" (Puccini), sung in Italian, Lucrezia Bora; "Manon—Ah! dispar vision" (Massenet), sung in Italian, Aristodemo Giorgini; "Rigoletto—Caro Nome" (Verdi), sung in Italian, Selma Kurz. Record by Sarah Bernhardt—"Les Bouffons"—"La Brise" Conte (Yamacois), in French. Amberol records—"The Boys of the Old Brigade," march (Barri and Myddleton), National Military Band; "Yip-I-Addy-I-Ay" (Flynn), Stanley Kirkby; "I Beg Your Pardon" (Tours), Maurice Farkoa; "Hop Scotch—Barn Dance" (Rose), concertina solo, Alexander Prince; "Good-bye, Sweetheart, Good-bye" (Hatton), Ernest Pike; "A Most Delightful Evening" (David and Lee), Arthur Osmond; "'Tis a Faded Picture" (Darewski), Miss Florrie Forde; "They All Love Jack" (Stephen Adams), Peter Dawson; "Put on Your Kilt, My Sandy" (Godfrey and D'Albert), Jack Lorimer; "Our Miss Gibbs," selection (Caryll and Monckton), National Military Band; "Bells of Christmas" (I. H. Meredith), Edison Concert Band and Chorus; "Sweet Spirit, Hear My Prayer" (William V. Wallace), Miss Marie Narelle; "The Mocking Bird," fantasia (Winner-Strobbe), Charles Daab, xylophone solo; "My Old Girl" (J. R. Shannon), Manuel Romain; "My Wild Irish Rose" (Chauncey Olcott), Oakland and Thompson; "By the Light of the Silvery Moon Medley" (J. B. Lampe), New York Military Band; "The Birthday of a King" (W. H. Neidlinger), James F. Harrison and chorus; "Silver Bell" (P. Wenrich), Miss Ada Jones and Billy Murray; "Every Little Movement," intermezzo from "Madame Sherry" (Karl Hoschna), American Standard Orchestra; and "Manila Waltz" (S.

Chafre), United States Marine Band. Edison Standard records—"The Lion of St. Mark's," march (Fabiani), National Military Band; "I've Got Rings on My Fingers" (Scott), Stanley Kirkby; "U-li-i-a-tee" (Glover Kind), Miss Florrie Forde; "Not To-day," Arthur Osmond; "A Sprig o' Shillelagh" (Helf), concertina solo, Alexander Prince; "The Angel's Song" (R. Parker), Edison Concert Band and Chorus; "There's a Clock Upon the Mantel Striking One, Two, Three" (J. M. Reilly), Will Oakland; "Curly Head" (A. Gumble), Byron G. Harlan; "Sweetness" (T. Lemonier), Peerless Quartet; and "Blaze of Glory," march (A. Holzmann), New York Military Band.

Pathe's Micro-Cinematography.

A notable illustration of how the cinematograph seems destined to be pressed increasingly into the service of science was afforded at King's College Hospital recently when the first exhibition of its kind to take place in this country was given of micro-cinematography. What is ordinarily viewed by the eye of successive single observers looking through a particular microscope was thrown upon the screen and rendered visible simultaneously to all the members of a large audience. Several hundred people were thus enabled to observe at the same time the progress of the disease of sleeping sickness as illustrated by the changes taking place in the blood of the inoculated rat, from the moment of inoculation until death, the appearance presented by the stomach of a human patient being examined under X-rays, and many other phenomena of pathological and bacteriological interest. The beauty of the slides roused frequent applause, and at the conclusion of the exhibition a vote of thanks to Messrs. Pathé Frères, by whose courtesy the films were shown, was cordially adopted.

Columbia Co.'s Christmas Records.

Tastefully printed in two colors, the Columbia Co.'s Christmas list of records—one of the first issued, by the way—is replete with all the old and

FROM OUR LONDON HEADQUARTERS—(Continued)

some new titles of a truly seasonable character, calculated to warm the hearts of even the Scrooges this Christmastide.

Possibilities in Pushing Amberolas.

The National Phonograph Co. draw the special attention of their dealers to the fine trade possibilities offered in the Amberola this season. It is an expensive machine, and for that reason alone should be featured by all enterprising dealers located in good-class neighborhoods, because the time when the public will not hesitate to spend money, and plenty of it, too, is near at hand. Always remember, too, that an Amberola sale usually carries with it substantial orders for records all the time. One dealer of my acquaintance this last few weeks has sold four of these splendid instruments, and he receives from one customer alone about £3 worth of orders for records each month, apart from the initial order of £5 worth with the machine sale. It certainly demonstrates very forcibly that the market for high-priced goods is not confined to the disc!

Ever Mindful of a Good Cause.

In response to the appeal for the Prince Francis of Teck Memorial Endowment Fund I notice in the list of donations a sum of £100 by the Gramophone Co., Ltd.

New Cable Between England and France.

The new cable recently laid between this country and France is now in operation, and telephone users now have the advantage of three distinct lines, enabling six conversations to be carried on at one and the same time. With this and wireless telegraphy, who shall say that we are not indeed very near neighbors!

Columbia Records by Scots Guards Band.

The first new records made after the signing of the contract under which the Scots Guards Band plays exclusively for Columbia-Rena records, were of a series of marches and new dances. These marches have just been issued in a special Scots Guards supplement, embellished, by the way, with a capital portrait of their popular bandmaster, F.

W. Wood. We learn that the records themselves have made a big hit, the dash and spirit with which they are played being unusually brilliant.

Billy Merson has just made records of his big songs, "The Lighthouse Keeper," which has a burlesque pathetic poem, "A Dark and Stormy Night," as patter, and "I Know There's Someone Waiting," for the Columbia Rena, the first being out this month.

Recent Zonophone Records.

A well-selected list of titles appear in the November impression of Zonophone records, some choice examples being the following: "The Lands o' Dee" (F. Clay), Mme. Edna Thornton; "Beautiful Garden of Roses" (Schmid), Ernest Pike and chorus; "Veronique," selection (A. Messenger), the Black Diamonds Band; "Long Live the King" (Bowker Andrews), Peter Dawson; "Follow Me, Girls" (Weston, Barnes and Scott), Whit Cunliffe, and "A Dusky Belle" (banjo solo), Olly Oakley.

In Lighter Vein.

The following anecdote from the States is amusing: At the house of a very nouveau riche the band was playing rather loudly while dinner was being served. The host, becoming somewhat irritated, at length approached the performer on the cornet and asked him to moderate his energy. The musician protested. "It is marked forte," he exclaimed. "Then make it thirty-five," was the peremptory rejoinder of the founder of the feast.

Strange Offerings.

At a recent vestry meeting the church warden announced that since he devised a scheme for having garments sewn on to the large quantity of buttons found in the collection bag, the supply had diminished to a solitary one, and that badly damaged by being run over—evidently by a tramcar. Pieces of flint had now taken the place of buttons!

Is There Room for Another Disc?

It almost seems impossible—incredible even—and yet if we are to believe dame rumor, another

needle-disc record will shortly swell the ranks of this already overcrowded market. Like all new records it is to be something very special! May I even express a hope that we shall not be disappointed?

Some Pleasing Selections.

The current supplementary catalog of Gramophone records is a very strong list, containing many pleasing selections, the majority of which should prove big sellers, especially having regard to the general high quality of recording and noticeably improved surface of the discs themselves. The titles are as follows: "Oberon," overture (Weber), and "Sweet Briar," entr'acte (Squire), by the band of H. M. Coldstream Guards; "Gaiety Two-Step," "Yip, I-Addy, I-Ay," and "Bertie the Bounder," the Black Diamonds Band; "Pecheur Napolitain et Napolitaine" (Rubinstein), and "Esquisses de Crimee," air de danse (Spendiarow), Russian Orchestra; "Stars of Normandie" (S. Adams), John Harrison; "Echo Song" (Lord H. Somerset), and "Four-Leaf Clover" (Browniel), Evan Williams; "The Old Superb" (Stanford), Stewart Gardner; "All Through the Night" (traditional), Kennerley Rumford; "Light" (Barnby), Miss Perceval Allen; "Barcarolle, Lovely Night" ("Tales of Hoffmann") (Offenbach), Miss Perceval Allen and Mme. Edna Thornton; "Ring o' Roses" ("Dollar Princess"), Miss Lucy Marsh and H. Macdonough; "Gems" from "The Balkan Princess" (Rubens), and "Gems" from "The Girl in the Train" (Fall), the Light Opera Co.; "Breakfast in Bed" (Lauder), Harry Lauder; "Knocking at Every Door," Whit Cunliffe; "My Bungalow in Bond Street" (T. C. Sterndale Bennett), Harry Carlton; "Unter ihren Fenster" (Hubay), violin, Joska Szigeti; "Etude in G Flat" (Mozzkowski), Mark Hambourg; "Danse Arliquia" (Oakley), banjo, Olly Oakley; and "Sarabande" (Bach), Renard Trio.

Klingsor Record Popularity.

The rapidity with which the Klingsor record is finding its way to popularity is not a little due to

JOHN G. MURDOCH & CO., Ltd., 91 & 93 Farringdon Rd., LONDON, ENG.

the exercise of a wise discretion in regard to titles on the part of those who pay the piper. Recording has been in full swing this week, and a new list of titles will be ready by the time these lines appear. Such well-known artists as Harry Bluff, Paul Kelvin, Guy Linton, Harry Trevor, Harold Wilson, The Big Four Quartet, Miss Bessie Abelson, Balalaika Band, and the famous band of H. M. Irish Guards, contribute with up-to-date comic and coming pantomime hits, selections from the latest musical comedy, "The Chocolate Soldier," and several Yiddish records from the program of the Yiddish Comedy Pavilion, London. The company are determined to maintain a high standard of quality all the time, and who can say otherwise than that so far they have succeeded, and right well, too!

The Awakening of Russia!

Is near at hand. The first purely disc record factory is to be established there. Preparations are well advanced for the erection of substantial buildings at Apriloffka, near Moscow, by a firm trading as Moll, Vogt & Kybarth, Ltd. The factory will be in working order soon, and it is the company's intention to utilize native talent, and primarily to devote their energies to the cultivation of local trade. I suppose they will occasionally be forced to entertain some of the intelligent representatives of the law?

Publicity Expenditures.

During the month of October the Gramophone Co.'s expenditures upon press advertising must have run well into four figures, judging by the liberal spaces occupied in some of the chief daily and weekly newspapers, magazines and illustrated weeklies. No wonder Gramophones are booming, both from a sales point of view, and shares—now quoted on the exchange at 40s.

New Machine Brochures.

The new machine brochures to hand demonstrate once again that our manufacturers recognize the power and influence of high grade productions for distribution through their agents to

the prospective purchaser. Apart from the subject matter, good printing on good paper, effective type setting and general attractiveness of appearance, induce one to study a catalog, where otherwise it would perhaps be consigned to the waste paper basket.

Such pleasing attributes in these publicity matters have a direct bearing upon sales, and therefore a little extra expenditure in that connection is more than justified by results. One of the nicest machine catalogs I have seen reaches me from the Gramophone Co., Ltd. It is beautifully arranged, most attractively designed throughout and contains illustrations and particulars of all the models for this season, quite a number being of the portable hornless type. Another very neatly gotten-up catalog of Edison goods has just been produced by the National Phonograph Co., Ltd., and in which the wonderful Amberola takes a prominent place. Messrs. Barnett, Samuels & Sons' new machine brochure is beautifully illustrated in colors natural to each instrument. It is certainly a most handsome production. A noticeable feature of the new "Dulciphones" is their equipment with a direct-tapered tone-arm in one piece from the elbow to the sound box. The Columbia Co.'s catalog of new models is also characterized throughout by effective arrangement of good types and strong argumentative text of the kill-hesitancy order. It is full of good selling points, and should prove a valuable postal ambassador for every Columbia dealer. For the same reason retailers will also welcome Messrs. Pathé Freres new issue, containing illustration and details of this season's Pathéphone models. Lockwoods, too, show enterprise and careful attention to arrangement in their 1910-11 machine catalog, a perusal of which dealers will find is time profitably spent. Other catalogs include Andre Bros. list of "Harmony" instruments, the Gramophone Co.'s complete and alphabetically arranged record lists, and the "Jumbo" complete list of titles from Barnett, Samuel & Sons, Ltd.

Shown at Business Exhibition.

At the recent Business Exhibition at Olympia, both the "Dictaphone" and Edison business phonograph were much in evidence. Large stands, located in prominent positions, furnished ample space for effective demonstration of the utility of these correspondence systems as a time and trouble saver for commercial men, and almost needless to say, the operators were kept pretty busy all the time. I understand that the selling results were highly satisfactory.

Pictures and Music.

The "News of the World" touring car carries a fine advertisement for Messrs. Pathé Freres around the chief cities of this country. Nightly performances on the Bioscope are enlivened with excellent musical selections on the Pathéphone, and the innovation has proved a great success. It should result in additional trade for Pathé dealers, who take advantage of the presence of the newspaper car in their town to distribute hand bills among the audience.

A Strong Beka Record List.

Up-to-date in every respect, the November list of Beka records is a particularly strong one. Of twenty-two titles the following are especially of interest to all lovers of good things and dealers should act accordingly: Selections from "The Bohemian Girl," Parts I and II; Barcarolle, from "Tales of Hoffman," and "Menuet," by the Beka London Orchestra; "Mary," from "Our Miss Gibbs," and "In Yorkshire," by Miss Violet Essea; "Hi, Hi, Hi, Mister Mc, Kie," and "Come and Be My Little Teddy Bear," by Miss Rosie Carlyle; "Billy Whitlock at the Zoo" and "Merriest Man Alive," by Billy Whitlock, and "The Islander March" and "Erin's Pride, Irish Jigs," xylophone solos, by Max Witte.

More Rapid American Mail Service.

An acceleration of the American mail service has been arranged with the Cunard Co. and the London & North Western Railway Co., which will enable the time of transit between London and Queenstown to be shortened by about two hours, and will thus, through the earlier departure of the Cunarders, admit of the mails for New York being frequently delivered on the Thursday evening, instead of on the Friday morning. The arrangement will also accelerate the mails for places beyond New York. The time of posting throughout London will be the same as heretofore. It may not be generally known that failing to catch the G. P. O. clearance at 3.15 p. m., a letter may be posted in the box in the train at Euston at 4.05 p. m. for a late fee of 2d.

the tone-arm action, the plaintiff company's appeal will most probably have been heard by the time these lines appear.

A New Pathé 14-Inch Record.

Messrs. Pathé Freres are placing on the market this month a new sized record which measures 14 inches in diameter, called the "Classik," whereon will appear only the very highest class selections by the best artists. This record is double-sided and retails at 6s. Such eminent artists as Madame Gleeson-White, prima donna of the Royal English Opera, Covent Garden, 1909; Miss Phyllis Lett, contralto of the principal London and Provincial choral societies and concerts, and John Coates, the famous tenor of the Royal Opera House, Covent Garden, and the Beecham Opera, London, contribute towards the first list. These records are good examples of the art of recording; the reproduction being lifelike, while the volume is greater than with the smaller sized records.

The Pathe November Record List.

The Pathé November list contains some very excellent records in the 11 inch size and also some artists new to the talking machine world, such as Signorina Gorona, soprano of the Royal Italian Opera House, who has a magnificent voice, also Joseph Cheetham, Andre Kaya and George Baker. There is a splendid record by the London Imperial Vocal Quartette. The 10 inch Pathé list for November is, as usual, right up to date, containing splendid records by Miss Madge Temple, the popular comedy queen; Will Evans, London's eccentric comedian, Sammy Shields, the football comedian, etc., etc.

Gramophone Co. Not to Appeal.

Apropos the gramophone trade mark action I have received the following interesting letter:

Dear Sir—We have decided not to proceed with the appeal against the decision given in regard to our trade mark application to register the word "gramophone" as a registered mark under the

act. We have carefully watched to see the effect which that decision would have upon the interests of our dealers as well as our customers.

Our prompt action in giving greater prominence to our famous trade mark, "His Master's Voice," and the enthusiastic support of our friends in the trade, backed by the high reputation for quality our product holds, has only served to strengthen our position, and we have abundant evidence from the trade throughout the country that, much as it sympathizes with us over losing our case, no ill effects have been experienced through the adverse judgment.

We think it not inappropriate to take this opportunity of expressing to all our accredited dealers our appreciation of the quiet, determined way in which they met the situation when first created, and to congratulate them on the total absence of scare on first hearing of the judgment.

We are advised that the grounds on which our application failed are partly of a technical and, in any case, of a limited character, and leave our remedies for any infraction of our common law rights untouched. We shall be as zealous in the future as we have been in the past to protect these whenever necessary.

Yours faithfully,

The Gramophone Co., Ltd.,
James C. Goff, Manager.

PROVINCIAL NOTES.

Information and advices from the chief centers of activity throughout the country indicate a satisfactory improvement of talking machine sales all along the line. While, however, the factors are very busy with the dealers' stock orders, retailers are only just experiencing what might be termed a real start of the season's business. In many districts the recent trade disturbances may partly account for this, but for all that talking machine trade is now well on the move. All the leading

makes of machines and records are in good demand, and in a week or so the provincial dealers expect to be in the thick of the season's rush. Manchester and Liverpool factors would appear to be just about as busy as they can be. Edison goods, Gramophone, Twin, Pathé, Columbia, Edison-Bell and Zonophone records and machines are going strong, while Klingsor, Favorite, Beka and other lines seem to be gaining in popularity with the dealers round about. Messrs. Richardson report that the season's trade is opening up very well. They are featuring the Amberola, which has been the object of much praise from the dealers, to whom it has been demonstrated. Crane & Sons, Ltd., have just issued an effective trade catalog, containing particulars of Edison goods and the many other lines which they handle.

Christian Duwe has also issued his season's catalog, from the contents of which I should say that he is determined to secure the custom of every class of trade. The firm's Sheffield branch, by the way, has been removed to Castle street, where premises of a more commodious character have been taken.

Newton's, of Newcastle, are making a special feature of Zonophone goods, especially the wonderful "Cinch," which has enjoyed a demand quite beyond their expectations. Edison goods and other lines are selling freely.

Over the border, Andrew White, of Glasgow, has recently called a meeting of creditors. From a statement of claims submitted the deficiency is estimated at £59 odd. A resolution was passed accepting a composition of 15s. on the pound, payable by four equal instalments quarterly.

In Edinburgh business is not quite up to the expectations of the local traders, but future prospects are said to be bright.

Larg & Son, of Dundee, are now in the thick of the season's trade, which they report to be of a steadily progressive nature.

Throughout Yorkshire business appears to be very satisfactory. Beka, Columbia, Zonophone,

About Needles

One of the most important matters in connection with the development of the talking machine business to-day is the sale of a talking machine needle that is correctly made—made by the greatest authority in the world—a needle, the POINT of which is warranted and which insures the best reproduction for each individual quality of tone—a needle that doesn't wear out the record; that preserves its life, and always gives forth the very best quality of tone that is contained in the record. Such a needle is the

CONDOR

It has the highest and most perfect finish, the smoothest grain, and gives unexcelled satisfaction.

Why not get the customer who purchases a high-grade and a high-priced talking machine to buy needles of the highest quality, such as the Condor?

One cannot be satisfactory without the other.

We shall be pleased to give the fullest information to all interested. Address

Sole Manufacturer

Jos. Zimmermann

Needle and Pin Works

AACHEN

GERMANY

Edison are in good demand, and some of the factors are running the Amberola. The Parker Phone Co., of Bradford, have sold one or two, and they expect to handle quite a number during the season. T. Dyson, Ltd., have issued from their Bradford depot a price list of accessories in talking machine goods that they will stock this season, and they report a pleasing trade activity in the leading lines.

Gertie Gitana's two great songs, "Sweet Caroline" and "Queen of the Cannibal Isle," with which she has been delighting the natives of Liverpool, Birmingham and other northern and midland towns, are listed this month on Columbia records. They are excellently rendered by Jack Charman.

A feature of this season's trade with the Colmore Depot, of Birmingham will be a special line of disc machines fitted to play both types of records, and they anticipate a roaring trade.

A report reaches me of a motor car collision at Longton, Staffs., in which Eli Hudson (whose many piccolo records are admired by all music lovers) met with a serious accident. In addition to other minor injuries Mr. Hudson unfortunately sustained a broken collar-bone. However, we are glad to know he is making satisfactory progress toward recovery.

In Belfast, Edens Osborne has been busy with his local newspaper advertisements, which in point of originality and style are very praiseworthy. At the co-operative exhibition he entertained a large audience with a selection of popular songs and orchestral pieces on the Auxetophone, described by the local reporters as a wonderful reproducer of sound. The concert was much appreciated and many of the items were encored.

Carl Wagenhaus, of Manchester, desiring to make clear some recent business moves on his part, writes as follows: "I have transferred to Christian Duwe the Edison factorship only. Mr. Duwe at the same time taking over the bulk of my Edison stock. I am still a factor for several disc lines and still carry on business as a dealer in Edison goods and others, besides my extensive piano and musical instrument business at both my establishments, viz., 279-281 Stretford road and 60 Gile street, Manchester."

WHAT LOYALTY IN BUSINESS MEANS.

Just How Much the Buyer Should Be Bound by Obligations to the Houses He Buys From—Should the Employee Be Loyal to the Employer with Dishonest Methods?—An Interesting Question.

Frequently we hear traveling men talk of the loyalty of dealers and buyers. This generally means that the dealers and buyers in the section covered by that salesman buy the goods he represents continuously and in satisfactory quantities. To him that demonstrates loyalty, but what about the intelligence of the buyer when a competing salesman enters the field with better values? Must the buyer, under such conditions, lose his reputation for loyalty in following the dictates of his intelligence and buying the new line?

In the retail end of business what is the meaning of loyalty? Does it mean that the employes are to stand pat for their employers' methods when they know they are not honest methods? We trow not. We believe all humanity, employes and employers alike, should have only one standard of loyalty, and Shakespeare laid down the grandest as well as the only law when he wrote, "To thine own self be true, and it must follow as the night the day thou canst not then be false to any man." That magnificent paragraph really covers the whole question of loyalty. It makes one standard for all, and employes who change their employers do not have to change their standard of

loyalty. They continue true to their own ideals and that makes disloyalty in any form impossible.

When our public servants, from the president up to the people whom he serves, attain genuine loyalty within themselves, there will be fewer trials of grafters, fewer "respectable" men of social prominence in our prisons and suffering humanity will come into its own because real loyalty will be the axis on which all service will turn without friction.

The employe who is true to himself will not betray the confidence of his employer after he leaves him to enter the service of another. He can't do it and be true to himself. If an employe disproves of methods used by his employer, he should seek another position, even at less compensation. His work will be better, his advance faster, if he works under conditions that do not create mental friction. The primary loss will be balanced by an intellectual freedom that should work out its own recompense from a purely constructive standpoint.

We close with the same advice we used in opening the article, "To thine own self be true."

AN ANNOYING PUBLICITY SCHEME.

An Instance Where Too Great Originality Was Not Appreciated.

An enterprising advertising scheme was recently brought to light in Washington, D. C., when a man entered the office of the Comptroller of the Currency thoroughly angry because he had received a check for five cents to his order, drawn on a real bank for real money. He wanted to know if there wasn't "some way to stop this thing," but the officers told him there was not; that anybody who had money in a bank had a right to draw checks against it payable to anybody at his pleasure.

The bank on which the check was drawn was fairly buried under literally bushels of other checks of the same sort which people brought in to be cashed. The man who drew the checks has a large account with the bank, and the checks, which were for five cents each, were mailed to hundreds of Washington people with a request to "spend this nickel for carfare" and visit the giver's place of business.

WALTER STEVENS OFF TO MEXICO.

Walter Stevens, manager of the National Phonograph Co.'s export department, left October 17 on an overland trip to Mexico City. He will be absent about six weeks, during which time he will devote himself to matters of company interest in that and other cities of the Mexican States. In his absence the duties of managing the department devolve upon his able assistant, Louis Reichert.

The Talking Machine Company, of Birmingham, Ala., are now devoting more space to talking machines—in other words they have been compelled to owing to the growth of their business.

"EDISON, HIS LIFE AND INVENTIONS."

Two Handsome Volumes Bearing on the Achievements of the Great American, Written by Frank L. Dyer and Thomas Commerford Martin, and Published by Harper & Brothers—Will Interest People the World Over, and Particularly Those Who Are Following the Progress of Sound Producing Devices and Notable Inventions of All Kinds.

The authorized and definitive biography of Thomas A. Edison, something for which the world has waited this long time, is at last completed. At the hands of his old-time friends and associates, Frank L. Dyer and Thomas Commerford Martin, and practically under his constant supervision, there have been produced two handsome volumes containing about 1,000 pages, packed everywhere with interesting and valuable detail. Written by men who have had the best possible opportunities to know whereof they speak, and formally approved by Edison himself, this biography will, of course, be accepted for the future as entirely authentic, and as indicating the particular presentation of the inventor's life which he himself considers accurate. It is thus a work of the highest interest, not alone because the subject matter is in itself so extraordinarily fascinating, but equally for the reason that, to a large extent, it is the voice of Edison himself.

Thomas Alva Edison was born at Milan, Ohio, on February 11, 1847. His family was descended from Hollander ancestors who settled in New Jersey, where the great inventor's interests were ultimately to be established, about the year 1730. His early struggles as train-boy, telegraph operator and general worker in mechanical improvement are copiously described by his biographers, while his earlier inventions, such as the stock ticker, duplex and quadruplex telegraphy, the telephone and the incandescent electric light, are described with much interesting detail. But, to the readers of *The Talking Machine World*, the most interesting part of the biography is undoubtedly that which refers to the invention of the phonograph. Speaking of the many stories which have gained currency as to the genesis of the invention, the biographers have this to say:

Discovery of the Phonograph.

"Its invention has been frequently attributed to the discovery that a point attached to a telephone diaphragm would, under the effect of sound waves, vibrate with sufficient force to prick the finger. The story, though interesting, is not founded on fact; but if true it is difficult to see how the discovery in question could have contributed materially to the ultimate accomplishment. To a man of Edison's perception it is absurd to suppose that the effect of the so-called discovery would not have been made as a matter of deduction long before the physical sensation was experienced. As a matter of fact the invention was the result of pure reason."

To justify this statement the biography contains what is called "Mr. Edison's own account" of the invention of the phonograph. His words, as quoted, are as follows:

"I was experimenting on an automatic method of recording telegraphic messages on a disc of paper laid on a revolving platen, exactly the same as the disc talking machine of to-day. The platen had a spiral groove on its surface like the disc. Over this was placed a circular disc of paper; an electromagnet with the embossing point connected to an arm traveled over the disc; and any signals given through the magnets were embossed on the paper. If this disc was removed from the machine and put on a similar machine provided with a contact point, the embossed record would cause the signals to be repeated into another wire.

* * * From my experiments on the telephone I knew of the power of a diaphragm to take up sound vibrations, as I had made a little toy which, when you recited loudly in the funnel, would work a pawl connected to the diaphragm, and this, engaging a ratchet wheel, served to give continuous rotation to a pulley. This pulley was connected by a cord to a little paper toy representing a man sawing wood. Hence, if one shouted 'Mary had a little lamb,' etc., the paper man would start sawing wood. I reached the conclusion that if I could record the movements of the diaphragm properly I could cause such a record to reproduce

the original movements imparted to the diaphragm by the voice, and thus succeed in recording and reproducing the human voice.

Details of the Great Invention.

"Instead of using a disc I designed a little machine using a cylinder provided with grooves around the surface. Over this was to be placed tin-foil, which easily received and recorded the movements of the diaphragm.

"I did not have much faith that it would work, expecting that I might possibly hear a word or so that would give hope of a future for the idea. Kruesi (an assistant, who was making the model) when he had nearly finished it, asked what it was for. I told him I was going to record talking and then have the machine talk back. He thought it absurd. However, it was finished, the foil was put on; I then shouted 'Mary had a little lamb,' etc. I adjusted the reproducer and the machine reproduced it perfectly."

Such was the genesis of the phonograph. The original machine is now in the South Kensington Museum, London. Patent No. 200,521, issued on December 15, 1877, was the first protection granted to Edison on this revolutionary device.

Edison's biographers have taken care to keep out of any controversial argument regarding the later progress of talking machines, although the immediately subsequent history of the invention is touched on. Nothing more of precise interest to readers of this paper can be said on that subject here.

The work done by Edison in telephony, in the development of incandescent electric lamps, in the magnetic separation of low-grade ore, in the refinement of electric generators and in other fields of mechanical endeavor is very broadly treated, and this part of the biography teems with interesting and fascinating detail.

Advent of the Motion Pictures.

When we approach the year 1889, however, we come again upon a feature which is of almost equal importance with the phonograph, and which, by co-operation with the latter, is destined, without a doubt, entirely to revolutionize the practice of dramatic representation. An interesting description is given in plain and non-technical language of the optical principles involved in the

motion picture, and many details, both scientifically valuable and generally amusing, are included.

Such later matters as the developments of the Edison storage battery, the molded concrete house, and so on, are naturally treated with some elaboration, but their interest is general and not specific.

The second volume of the biography contains a number of appendices, giving more exact descriptions, with illustrative drawings, of such in-

EDISON IN CHARACTERISTIC POSE.

ventions as the stock ticker, the telegraphic improvements, the incandescent lamp, the phonograph, etc. A complete list of the Edison patents is also appended, both the domestic and foreign issues being included. More than twenty-five hundred inventions have been thus patented and the number of foreign patents is 1,239. There is also an excellent and compendious index.

The chapters on "The Social Side of Edison," "Edison in Commerce and Manufacture" and "The Value of Edison's Inventions to the World," are in the nature of relief to the more serious parts of the biography and should be read carefully by all who are interested in the human side of an unusual and striking character.

The price of the two volumes is \$4. They are well gotten up as regards press work, paper and binding. The publishers are Harper & Brothers.

James Cowan, the exclusive Columbia dealer in Richmond, Va., has just placed a large order for holiday goods.

When you have found out what a big help

The Edison Business Phonograph

is in your own office you will realize why it is being adopted by foremost firms in every branch of industry today—and why it is a great selling proposition for you.

The Edison Business Phonograph actually doubles the efficiency of every employe on the correspondence staff—doubles the productive capacity of the dictator as well as that of the transcriber

and cuts the cost of business correspondence in two.

It will prove these things to you on your own work in your own office—and you will prove them to the liveliest market in the world, the field of business.

Write us to-day for full particulars.

THE SALE OF RECORDS.

The Victor Talking Machine Co. Urge on Dealers the Advisability of Caring for and Pushing the Sale of Records.

Regarding the sale of records, the Victor Talking Machine Co., Camden, N. J., say: "You must impress on purchasers the importance of properly caring for their records. Bear in mind that the customer who takes good care of his records, and files and indexes them so that he can play any selection almost on the instant, whenever in the mood, is going to buy more than the Victor owner who keeps them in bunches on the table, chairs and window sills, where he must look through the whole lot to find the record he wants to hear. They will do this a few times, and a very few times only. Remember that if a customer files and indexes his records he places his hand right on the selection to be played at once without handling the others, but if he has a collection of, say, fifty or more records and handles them all every time he wants to hear one, he not only damages them through constant handling and rubbing, but is often impressed with the amount of money he has invested in a lot of records he has tired of and don't want to hear. If he has them filed, he only thinks of the record he wants to hear—not of the dead ones.

"The real Victor dealers, those who are making the real big successes, go after the record business just as though their very existence depended on increasing their record sales each succeeding month. And why shouldn't they increase each month? Every Victor sold means new record buyers, and these live dealers don't allow any owner to lose his interest in the Victor through any neglect on their part. They realize the im-

portance of selling them new records and never let up their educational work on a single customer.

"Remember that when you sell a Victor, in a majority of cases, it goes into a home where little is known and less understood of music. This should impress on you the fact that you are a most important part of a great work—the education of a great people to the real and true love of music, and you cater to their taste with the greatest musical instrument on earth, with the most extensive repertoire in existence and a galaxy of talent unequaled in any musical center under the sun."

THE TRUTH ALWAYS TRIUMPHS.

Truth is something that no one can get around, over, under, back or on top of. It has neither height, breadth nor thickness, it is universal. That man is ahead in business who has but one price, and that a fair one, one story, and that a truthful one. He does not have to keep awake nights worrying about the outcome, nor try to remember the lie he told one fellow so as to be able to tell some other fellow the same lie, or tax his wits to keep the first man from comparing stories with the second. He saves his time and his customer's time, and he isn't afraid when called upon to prove up.

"MONEY TALKS."

Money talks, so stop yer playin';
Better find out what he's sayin'!

It may be yer time and chance,
If he gingles, rise and dance!

Dance yer best the long night through;
Money pays the fiddler, too.

\$50 FOR A HORNLESS COLUMBIA!

Rock-Bottom List Price Established on a New Columbia Grafonola—The "Favorite."

The evolution of the talking machine toward the enclosed type is one of the most interesting features of the industry. The Columbia Phonograph Co. has just announced a new Grafonola, the "Favorite," at \$50 list. The Columbia Phonograph Co. state that the demand for Grafonolas not only at \$200, but at the lower prices, has been so increasingly large that it is very clear that a great many people who have never owned or cared to own a horn machine are only too ready to pay \$50 for an enclosed horn machine of such quality as this new Grafonola "Favorite."

The substance of the Columbia Co.'s statement to the representative of The World is as follows: "In order to establish beyond question our pres-

THE GRAFONOLA FAVORITE.

ent admitted lead in the introduction of hornless machines to the music loving public of the United States, we decided to design and construct an instrument that could be sold for \$50 at retail with profit, and yet embody every possible attractiveness of design and perfection of reproduction.

"This is only following out the merchandising policy of the Columbia Phonograph Co. which has already proven so effective in the marketing of such an absolute novelty as the combination library table and Grafonola in the form of the 'Regent' and in the recognition of the certainty of a demand for a Grafonola of 'grade' and quality at \$150 in the form of the 'Mignon' and in the production of the first hornless machine at \$100 in the form of the 'Elite,' which has recently been so greatly improved.

"We have a much broader purpose than being merely first in the field with a \$50 hornless machine—although this in itself is reason enough. In this Grafonola 'Favorite' at \$50 we have set an entirely new valuation on musical instruments. The tendency is unmistakably more and more toward the hornless machine, in spite of the fact that for years there will undoubtedly be an enormous market for the regular horn graphophones. Our purpose is not only to establish beforehand the first hornless machine of any sort to be offered at \$50, but to place on the market the best possible hornless machine that can ever, as far as it is possible to see now, be constructed and sold for \$50.

"At a considerably higher price this Grafonola 'Favorite' would have been an unquestionable winner. At \$50 it is bound to make a clean sweep. It is a beautifully designed instrument, and a wonder in its tone capacity. It has a polished quartered oak cabinet, 13 inches high, 18 3/4 inches wide and 18 3/4 inches from front to back. It has the Columbia universal 3-spring motor and a 12-inch turntable."

A GREAT LINE OF STORES.

The Aeolian Co., New York, have not only Victor talking machine departments in their branch houses in Chicago, Cincinnati, Indianapolis, Dayton and Fort Wayne, but also in Middletown, O., and Huntington, W. Va.

Max Landay, of Landay Bros., 400 Fifth avenue, New York, said this week that while the patronage of dukes was always welcome, he was now about to secure an order for Victor goods from a prince, now sojourning in the city.

INSURE YOUR HOLIDAY PROFIT

YOU CARRY FIRE INSURANCE—DON'T YOU?

☐ Most people do, and yet they don't expect or want a fire.

HOLIDAY BUSINESS IS A CERTAINTY.

☐ Are you INSURED against losing GOOD PROFIT through not being able to GET THE GOODS your customers want during the holidays.

ARE YOUR EGGS ALL IN ONE BASKET?

☐ The "basket" represents your jobber, the "eggs" your orders. Will the "basket" stand the strain of Holiday requirements? - If not, who suffers?

YOU MAY NEED TWO POLICIES.

☐ That will depend on "past performances" and the reputation of the "basket" to meet such requirements.

NOW TO THE POINT. THESE ARE FACTS.

☐ You cannot place "additional insurance after the fire has started and collect your insurance." Can you expect to call on an extra jobber AT THE LAST MINUTE and be sure of getting the goods.

INSURE WITH BLACKMAN NOW AND BE PROTECTED

☐ We cannot recall a single case where a "Blackman dealer" lost a "real sale" last year, because we could not deliver the goods. When we say a "regular dealer" that doesn't mean the fellow who came to us at the last moment after FAILING to get the goods from his "regular jobber."

BE A "REGULAR BLACKMAN DEALER" NOW.

☐ That means we will PREPARE FOR YOU, as we do for "OUR DEALERS." Call on us at the last minute, if necessary, and we will do the best we can, but the "Blackman policy" is to recognize the obligation to fill the requirements of regular dealers first. We call this "fair dealing" and it is appreciated by our dealers.

NOW IS THE TIME TO TAKE OUT THAT POLICY.

☐ Start giving, at least a share of your business, to Blackman and you will feel easy about your Holiday profits.

THE PLACE TO GET THE GOODS—EDISON AND VICTOR

THE COLUMBIA COMPANY'S OPERA PROGRAM.

Henry Russell, Director of the Boston Opera Co., Associated with the Columbia Phonograph Co. as Operatic Advisor—An important Move.

Just before going to press with the current issue of The World the Columbia Phonograph Co. made the appended important announcement:

"In the wonderful progress of the American nation no aspect of it is more interesting than the long-delayed but now thoroughly established appreciation of opera. It is very clear that the principal factors in bringing about this appreciation have been the masterly enterprise and artistic far-sightedness of such impresarios as Henry Russell, director of the Boston Opera Co., and the recent development in the art of recording the human voice as exemplified in the notable recordings recently catalogued by the Columbia Phonograph Co.

"This last factor is already so well recognized that for the first time an official and publicly-announced relationship between a director of grand opera and a manufacturer of records has come to pass. Henry Russell, who was wise enough to see that the music loving people of Boston and the East were entirely ready to support a grand opera house and a grand opera company hardly equaled in Europe or America, and who also possessed executive ability in such a marked degree as to bring about, in one triumphant season, a complete realization of his dearest ambition, has just now accepted an appointment as consulting director of opera for the Columbia Phonograph Co.

"Mr. Russell, as director of the Boston Opera Co. and an associate of the Metropolitan Opera in New York, has taken a large part in the extension of opera into the other great cities of the country—Chicago, Philadelphia, Baltimore, New Orleans, Atlanta, St. Louis—and nothing in the world is more characteristic of the man than his ambition to see its further extension, not only in those great cities where the personal presentation of opera is possible, but into every community. And he has come to realize, it is said, that the only way in which he can see this wish realized is through the medium of such an organization as the Columbia Phonograph Co., with its agents in

many towns and its owners of graphophones in every neighborhood.

"The aims of the Columbia Phonograph Co. in this connection, while purely commercial, are, we believe, no less worthy and no less far-seeing.

HENRY RUSSELL.

This is not a new field for the Columbia Phonograph Co. So far from this, in fact, that not only was the Columbia Phonograph Co. the first company to manufacture talking machines of any kind and the first company to manufacture records, either disc or cylinder, but the first to attempt the recording of the voices of the great

singers of opera. Years ago the first records ever made by opera singers were made in the Columbia laboratory by Madame Sembrich, Edouard De Reszke, Madame Schumann-Heink, Antonio Scotti and several others. The process of recording, as everybody in the trade knows, has undergone a dozen revolutions since that time and at this present minute we believe we can state without any fear of successful contradiction, and certainly without any refutation which depends upon comparisons and tests, that the Columbia grand opera records issued during the season of 1910 have for the most part absolutely no equal in the field—either in the perfection and naturalness of the recording of the voice, or in the incidental but hardly less important balance and musicianly correctness and beautiful smoothness of the orchestral accompaniments.

"These records, more particularly those sung by Constantino, Blanchart, Mardones, Boninsegna and Bronskaja, extraordinary as they are in every way, are merely the forerunners of a list of recordings which, by its intrinsic quality as well as by virtue of the names of the artists, will be no less extraordinary. Through Mr. Russell's advice we have reason to count on being able to offer the trade, in the near future, the first of a most remarkable additional series. After a consultation with Mr. Russell, we have only this week completed an exclusive contract with Alice Nielsen—and other interesting announcements are fairly sure to follow within a month or two.

"We are not ready at this moment to announce the names, but exclusive contracts have already been signed with certain grand opera stars whose names and voices are alike familiar and famous. Through this sort of co-operation we shall not only be equipped to further Mr. Russell's desire to extend the music of the great operas throughout the country, but to present to the music loving public everywhere records of the highest possible quality, sung by artists who might never otherwise be heard outside of the three or four great opera houses of the world.

"Altogether we believe that this announcement of the official association of Henry Russell, in a permanent advisory capacity with the Columbia Phonograph Co., is about the one most important announcement that has reached the trade in years."

BRIDGING THE GAP FOR CUSTOMERS.

How One Firm Adds to Business by Making Telephone and Telegraph a Part of Order Getting Equipment—Special Men Detailed to Handle Such Orders.

In getting orders in from the field the long distance telephone and telegraph have been made part of the firm's equipment. To handle these telephone orders, both city and out of town, men whose knowledge of stock on hand and selling prices is more minute, perhaps, than any other members of the organization, are always "on the job." They are specialists in memorizing and quick thinking. As their pencils record the order, they say whether it can be filled, and whether a satisfactory substitute can be offered.

The mechanical side of their work, too, has been perfected. Half a dozen order pads, with carbons in place, are always on their desks. Finishing one order, a man can push the pad to the messenger on guard and seize another pad for the next order. Calls for specialties are taken by the man in charge of that particular branch of the business. To banish the noise which would interfere with swift and accurate order-taking, all typewriters except the billing machines for requisitions in store and work-order are banished to a special room where stenographers transcribe their notes.

SOMETHING OF OFFICE LEAKAGE.

What the Little Items of Waste Really Amount to in the Long Run.

Just because the loss in an individual instance is small, most managers let little items of office waste get by them. They forget that a one-tenth

of a cent leak contributed to three times a day by 100 employes, means a loss at the end of the year of \$100. Any business man would drop his work and institute a rapid search if you told him that a \$100 bill had been dropped out of his cash drawer this morning into the sweepings. But just because this hundred dollars is dropping out in dribbles of one-tenth of a cent he lets it pass, even though the stopping of the leak is easy.

Saving and scheming on big and little things is just as possible and profitable in the office as in the factory. In fact, the progress in office appliances and methods is so reducing office costs that the record-keeping end of a business is fast changing from an expensive department, considered non-productive, to an earning department.

Nearly every office executive has devised some little scheme for cutting expense; the aggregate, if you could know them and apply them in your business, would make a noticeable difference in your monthly statement.

DON'TS FOR SALESMEN.

Some Live and Valuable Suggestions by John Trainer in The American Salesman That Apply to the Talking Machine Man as Well as All Others.

Don't expect your customer to know more about your goods than you do.

Don't load on a man more goods than he needs—oversupply often means a loss of future sales.

Don't hope to win confidence in a day. A business that is built up in a hurry is often pulled down as quickly.

"Don't tell your troubles in business. Hardships are not considered a business asset.

Don't be afraid to try new ventures; a risk is often a gain.

Don't talk about yourself, but your goods, unless your talents are the merchandise wanted.

Don't be afraid to try. Struggle may not boost you, but it won't pull you down.

Don't bank on your friends. They have social value, but should not make your business.

Don't be afraid to place confidence in your employer. His interests are often yours.

Don't brood over harsh remarks. Pleasant words often sound harsh in business.

Don't rely on chance, but on effort; the latter has more lasting value.

Don't get discouraged by one failure; many failures often make a grand success.

Don't forget that the failures of last year may bring this year's best successes.

Don't borrow trouble until it knocks at your door. Many troubles are more imaginary than real.

Don't be afraid to give your employer the best you have. That is what he is looking for and should receive.

Don't expect others to carry your burdens. By shifting responsibilities the trial is often made heavier.

A SALESMAN WANTED

AN EXPERIENCED MAN who understands the retail trade and is thoroughly familiar with the Victor line of goods; must have experience in Greater New York; none but a first-class man need apply; no out-of-town men desired; applicant must be ready to take the position immediately.

make ideal Christmas gifts, and will be greatly in demand during the fast approaching holiday season. They are now being advertised for the benefit of the trade in magazines whose combined circulation is in excess of four million copies per month.

We have just issued a new catalogue which may be had for the asking, and we are now prepared to make an unusually attractive proposition to live dealers in places where we are not already represented. You can get your share of the holiday trade in Reginas by going after it.

Broadway and Seventeenth Street, NEW YORK

215 Wabash Avenue, CHICAGO

TIMELY TALKS ON TIMELY TOPICS

Elsewhere is printed an account of how the talking machine departments of the John Wanamaker's stores in New York and Philadelphia discover prospects by means of their magnificent recitals. It is true, the advantages of such establishments as the Wanamaker's institutions in both cities are not possessed by every dealer, but they could make the most of their opportunities. How many stores are wasting much good room that could be easily made available for record demonstrations in the form of recitals. A program is easily arranged from the numerous selections in the catalogs of the different manufacturers. At Wanamaker's Louis J. Gerson, the versatile manager, has made the regular record day, namely, the 28th of the month, a time for playing over the entire bulletin, and owners of machines are invited to be present. The details of this bit of enterprise appear in the story above mentioned,

Do You Want

To start to manufacture cylinder or disc records for \$100? I will teach you all about the old and new process. A. Schramnik, 416 East 77th street, New York City.

Booths for Sale.

FOR SALE—Two very fine booths, built of mahogany and plate glass, each about 7 feet 7 inches deep, 10 feet 10 inches wide and 10 feet 8 inches high. Practically soundproof, suitable for demonstrating rooms. Will sell very cheap. For particulars address "G. T. L., care Talking Machine World, 1 Madison avenue, New York City.

Manager Wanted.

Wanted—Manager for our Talking Machine Department; young man about twenty-eight or thirty years of age preferred; experience necessary; large trade already established in town of 50,000; reference required. Address "F. P. C.," care Talking Machine World, 1 Madison ave., N. Y. City.

Edison Gold Molded Records for Sale.

For Sale—10,000 Edison Gold Molded Records covering the entire catalog. Will sell whole or part to any bona fide Edison dealer. Address A. J. Deninger, 345 North street, Rochester, N. Y.

Situation Wanted.

Shipping and stock clerk, fully experienced in both Edison and Victor lines; five years with New York's largest distributor; a hustler with best of references. Address "Sobriety," care Talking Machine World, 1 Madison avenue, New York City.

Store for Sale

For Sale—"Small goods" Music Store (Mandolins, Guitars, Violins, Banjos, Sheet Music, etc.) with good sized Talking Machine Department of Victor and Edison. Established 17 years. Fixtures new. Stock clean and up to date. Reason for selling, illness. Located in an Ohio city of 175,000 and doing a business of \$25,000 per year. Full information and references upon request. Address "Music Store," care Talking Machine World, No. 1 Madison Avenue, New York.

and it should not only be read for the general information conveyed, but the suggestions offered are worthy of close study. The manner of handling records and the means of taking orders at these concerts should not be lost on the wide-awake dealer.

Of course, the talking machine trade is, or ought to be, thoroughly familiar with the question of the protected selling price. The manufacturing companies have enforced the rule, through the courts to be sure, against both signed and unsigned dealers who have attempted to cut prices. Some of these cases have been strongly contested on the part of the defendants, but the Federal courts have always upheld the rule originally established by a talking machine manufacturer. Other lines of trade are following the policy also, and in reply to many the Jewelers' Circular-Weekly enlightens its readers in the subjoined clear and comprehensive summing up of the situation: "For the sake of many who are in doubt on this subject, it should be stated in brief that the courts have decided that a manufacturer making an article under a patent has an absolute right to determine the price at which the article should be sold, and he can make a contract to this effect a part and parcel of the license he grants to use the patented device over which he has an absolute and legal monopoly. He can treat those who cut the price in the same manner that he can treat infringers of his patent or those who sell his article without a license.

"As far as unpatented articles are concerned the manufacturer thereof has no such absolute right, the selling price in these cases being protected by a special contract with the jobber or retailer. Such protected sale contracts have been upheld by the courts of many States as legal, and the courts of one State have gone so far as to issue an injunction against a price cutter, who was directly or indirectly a party to one of these contracts. In these instances it is the special contract between the parties that binds and not the absolute monopoly of the maker, as in the case of patented articles. As a rule, with unpatented articles, the manufacturer's remedy is simply to refuse to sell to those who will not abide by the agreement, and he can do so whether he be an individual or corporation, provided he does this of his own volition and not as the result of an agreement or conspiracy with others. The point should be clearly borne in mind that though a manufacturer or dealer is a free agent and may lawfully do certain things alone and of his own volition (such as choosing the customers to whom he sells), there are conditions wherein he may not exercise these lawful rights where he acts in conjunction with others."

The Talking Machine & Indian Record Co., Bombay, India, have issued the full proceedings in the matter of the application by the Gramophone Co., Ltd., London, Eng., to register the word "Gramophone," in connection with the British trade-marks act of 1905, for talking machines and accessories. As is well known, the application was disallowed. The word gramophone is seldom heard in the American trade, excepting in law suits or as used by writers in magazines and newspapers who are not informed properly as to the technical terms used here. It is a book of 175 pages and as a work of reference in connection with this celebrated case should be preserved. In connection with this commendable enterprise on the part of the Bombay firm, it is interesting to learn what a variety of records they handle, as follows: Gujarati, Maharati, Hindustan, Urdu, Bengali, Tamil, Kanause, Telangu, Burmese, Egyptian and Chinese. That is going some, to say the least.

Perhaps not every dealer realizes in its fullest import what the twenty-eighth of every month—"record day"—should mean to him. The Victor Talking Machine Co. truly and forcibly expresses

it in one of their valuable circulars to the trade thusly: "We are doing everything we possibly can to make the twenty-eighth an important event to every Victor dealer. For years we have advertised the fact that new records are on sale the twenty-eighth of every month, and on this date the list of new records is advertised 'on sale to-day' throughout the United States, and it is only your own fault if you have not an established and ever increasing business on the new records as often as they are issued." In conclusion they add: "Whether you take full advantage of this exceptional opportunity is a question that you alone can answer." The progressive dealer, who is invariably successful, has always been impressed with this fact, and acts accordingly; and it would be well if every dealer everywhere would have a like conception of his duty in the premises, as it means a constantly growing business for him and proper representation of the company. The truth of these observations is equally applicable to all dealers, no matter what line or lines of records he may handle.

 Edison & Victor Jobbers

Columbia Double-Disc and Columbia Indestructible Cylinder Records provide the steady sales that fill in the gaps, bring up the averages, and make the talking machine business continually profitable.

Columbia Phonograph Co., Genl., Tribune Building, New York.

OUTLOOK IN WESTERN CANADA.

Robert Shaw, Managing Director of Western Talking Machine Co., Winnipeg, Man., Makes Some Interesting Points Regarding the Development of the Talking Machine Business in Canada—Some Facts Concerning the Inclination of Canadian Settlers to Purchase Talking Machine Outfits.

(Special to The Talking Machine World.)

Winnipeg, Man., Nov. 1, 1910.

I know that your readers will be interested in business conditions in this part of the country and I have followed out your special instructions to interview one of the best-posted men in talking machines in this section, Robert Shaw, managing director of the Western Talking Machine Co., of this city.

Mr. Shaw has been appointed Canadian Commissioner of the National Association of Talking Machine Jobbers. This office, I believe, was created specially for him.

Mr. Shaw's early training gave him an insight into the piano business, and when I asked him regarding the prospects of trade development in Western Canada, he replied:

"I secured this line on its first entrance into Canada many years ago. My previous training had been under that veteran piano man—my father—Henry J. Shaw, who introduced the Weber (in the days of Albert Weber), the Vose, the Hale and other old-time pianos into Canada in the '60s and '70s. To be thrown out the front door and run around and in the back to sell a piano is not at all a bad training for the task of 'the making' of a 'Victor trade' in Canada, but I can assure you that the discouragements met in my early days were as nothing to the proposition of overcoming the prejudice of the musical people against all classes of tone reproducers, Victor Gramophones not excepted.

"And really there was some warrant for it in those early days when 'There's a Hot Time in the Old Town' and 'Turkey in the Straw' were classics, and the vaudeville went from there down.

"Those early days I spent in the work of organizing as treasurer of the Canadian company, but soon a change came in the character of the records obtainable, and I took the road as Canadian sales manager, and my work began.

"I visited every town and village (almost) in Canada, from the Klondyke to Newfoundland, preaching the gospel of 'Education versus Entertainment,' and praying for the time when the Victor Gramophone should come into its own and take its place as one of the world's greatest musical educators.

"It is not strange, then, with this training and holding this attitude to the Victor Gramophone, that I should have done what I have done in so short a space of time.

"I believe that a company which can, in the 12 years of its existence, reach a volume of business equal to one-tenth of the entire piano industry on this continent, must have something that the people need—that the people want—and it has.

"Nowhere is this more keenly felt than in these Western Canadian wheat prairies, where it is my privilege to work.

"Most of the people—I think I am safe in saying 80 per cent. of the people in my section of Canada—were not born here; they came from the four corners of the earth, many from the old country, where music and musical culture abound.

"Many of these people who at home might not have been seriously interested in music, away from home—and more especially on these sparsely settled Western prairies—feel their utter need of it.

"These people turn to the Victor, for it supplies that musical environment they so much miss—it brings into their lonely homes the old-time familiar

ROBERT SHAW.

classics and many, indeed, of the great artists themselves, whom they have heard at home.

"This operation of the law of demand and supply has greatly added to my success.

"Then another important thing is that these people have been able to buy what they want, for they are eminently prosperous—perhaps a few figures along this line will interest you.

"I don't think in the three Canadian provinces (or States) that I am serving there are in all a quarter million farmers, certainly not 300,000, and these people divided among them \$182,368,595 for grain crop alone during the year 1909, with a wheat crop failure. In all this North American Continent they will have about 115,000,000 bushels of wheat alone for sale, and they will get close on a dollar a bushel for it.

"I say they have the money for what they want, and as they make money easier than the average farmer, they spend it much more freely than the average farmer.

"They all need Victrolas—many of them want Victrolas—and they will all get Victrolas if I have my health and a few more years up here.

"The wheat crop failure in this section of the country has not been serious, and it comes on the top of a run of many years of good crops, and I foresee plenty of money as a consequence."

Mr. Shaw for two and a half years has been a distributor of Victor goods in Western Canada. Before he took hold of the business only a small market existed.

He has built up a volume of trade equal to one-third of the entire Canadian output, and therefore when The World asked me to interview a man regarding trade conditions, I believe that it will be seen that Mr. Shaw is at once an authority upon the subject of special business.

Anyhow, it would seem that Western Canada will be an important point of distribution of musical merchandise for many years to come.

IN THEIR NEW QUARTERS.

The New York Talking Machine Co. Are Now Well "at Home" in Splendidly Arranged and Equipped Quarters.

The New York Talking Machine Co. are now in their new quarters at 81 Chambers street, New York. The removal of the stock, fixtures, etc., has taken the greater part of the week, but there was no interruption of business. The premises, including the street floor, running through to Reade street, with a high basement and sub-basement, are admirably suited for the business, and G. T. Williams, the general manager, is greatly pleased with the place and its many advantages over his former location.

THIS LOOKS LIKE BUSINESS.

Of the extent of stock the wholesale department of the Columbia Phonograph Co., 89 Chambers street, New York, is ordering in from the factory, last Friday 77 cases were received; Monday, 68 cases, with another load due Wednesday. R. F. Bolton, the manager, said that he was preparing for a brisk and active trade in his territory.

It strengthens the probability of a sale to display price cards conspicuously on all goods. That convinces the customer that no partiality is shown to any patron of the store and helps out the clerk, who should have the advantage in any argument that arises over the quality of the goods.

WHY DON'T YOU USE LABELS

on every article going out of your store? Then you'll get repeat orders. It's worth doing when we sell

The Talking Machine Trade in New England

A GREAT NEEDLE FACTORY.

Plant of W. H. Bagshaw Working at Capacity and Shipping Millions of Needles Weekly—What C. H. Bagshaw Has to Say.

(Special to The Talking Machine World.)

Lowell, Mass., Nov. 6, 1910.

The huge factory of W. H. Bagshaw, needle manufacturer, is working on a full-time schedule, as they have been right through the year, and are shipping millions of needles every week. C. H. Bagshaw, of this house, commenting on the needle business, said to The World: "American-made needles to-day are growing rapidly in demand. When the trade was younger than it is now, an idea used to exist that other needles might be better, but, considering all phases, I believe that America holds the needle manufacturing supremacy, like it does many other things. And to go further, Lowell is the home of the needle business, because the origin of needles goes to the credit of Lowell, with the House of Bagshaw making the first talking machine needles for the trade. In American goods you get the quality, you get the delivery, and the prices allow a good margin of profit, and the satisfactory results that users enjoy with Bagshaw-American-made needles is known all over the country."

CLOSING OUT STOCK.

(Special to The Talking Machine World.)

Webster, Mass., Nov. 7, 1910.

Racicot Brothers, house furnishers, report that they are closing out their stock of talking machine goods because they cannot make it profitable. The firm is composed of Arthur H. Racicot and Alexander N. Racicot and is the biggest furniture

house here. They handle the Edison and Columbia lines.

A LIVE NEW ENGLAND DEALER.

(Special to The Talking Machine World.)

Webster, Mass., Nov. 9, 1910.

One of the biggest live talking machine men in this territory is Emil Roemer, who has been in the business eleven years. He is selling Edison phonographs and Victor talking machines, and the report here is that business is excellent. F. H. Cooper is one of his outside salesmen.

M. R. CALDWELL MAKES A CHANGE.

(Special to The Talking Machine World.)

Lowell, Mass., Nov. 5, 1910.

M. R. Caldwell has resigned his position as manager of the talking machine department of M. Steinert & Sons, to accept a similar position with the Henry Siegel Co., Boston, Mass.

OPENS NEW STORE IN EAST BOSTON.

(Special to The Talking Machine World.)

East Boston, Mass., Nov. 7, 1910.

Harry Bennett has opened a new store, handling the entire Columbia graphophone line. He is already meeting with success, as he is a capable and energetic trade member. Mr. Bennett is also selling a full stock of musical merchandise and sheet music.

TO FEATURE COLUMBIA GOODS.

(Special to The Talking Machine World.)

Clinton, Mass., Nov. 8, 1910.

Fred G. DuBois announces the exclusive representation of the Columbia line, which he will feature prominently.

TRADE GOOD IN WORCESTER.

Higher Grade Machines in Demand—Records Selling Well—What the Various Houses Are Doing with the Different Lines.

(Special to The Talking Machine World.)

Worcester, Mass., Nov. 7, 1910.

Talking machine business is classed by the trade as "very good." A number of the higher-priced machines are being sold weekly, with the demand for records excellent. This briskness in the face of a sub-normal local manufacturing condition is phenomenal.

C. B. Gorham is the manager of the talking machine department of Denholm-McKay Co., the large department store. They handle Columbia goods.

M. Steinert & Sons Co. report a large Victor business, particularly so with the latest models of Victrolas.

Edison goods are selling exceedingly well with the Iver Johnson Co.

The various stores look for a good holiday business and all are in optimistic mood.

GETS AGENCY FOR COLUMBIA LINE.

(Special to The Talking Machine World.)

Florence, Mass., Nov. 6, 1910.

The exclusive Columbia representation for this city has been placed with E. C. Addis, who has purchased a large initial shipment.

"Trade moves fast nowadays," says a merchant, "and improvements come along so rapidly that if there is any delay in seizing on them, they may pass and become obsolete in a very short time."

No. 2264

ISSUED TO

Mr. New England Dealer

Dated November, 15, 1910

Premium \$0,000

48 HANOVER STREET - BOSTON

Have You the Linscott Policy?

HERE'S THE WAY IT READS:

In Consideration of your Edison business, we guarantee to insure you for life against the possibility of losing profits by the use of modern shipping facilities plus a complete Edison Stock, covered by the two following conditions:

SHIPPING QUICKNESS: A two minute slip-up may cause hours of delay and untold financial loss. *LINSCOTT* shipments are "double checked". There are no slip-ups. Our slogan aptly fits here: "You get what Edison goods you want when you want them."

STOCK COMPLETENESS: To comply with this is easy, as we have now and always will have the largest stock of Edison goods in New England. Whether you want a record or an Amberola, *LINSCOTT* has it.

LET US SEND YOU A "SPECIMEN POLICY". The premium is nothing and it will mean a great deal of convenience to you, and a whole lot of profits.

LINSCOTT SPORTING GOODS COMPANY

(FORMERLY BOSTON CYCLE & SUNDRY CO.)

48 HANOVER STREET

BOSTON, MASSACHUSETTS

FROM OUR BOSTON HEADQUARTERS

ROOM 12, 178 TREMONT STREET, G. W. HENDERSON, MANAGER.

(Special to The Talking Machine World.)

Boston, Mass., Nov. 7, 1910.

"Let us hear it" is the slogan that meets the selling end of the talking machine industry now as against the former way of 'I have so much money and want to buy a machine.' Many of the trade can remember when a \$40 machine could be easily sold to a man with that amount, and if he had \$20 more he would buy a \$60 machine. He wouldn't at that time buy the \$60 machine because the tone was better; in fact, he couldn't tell the difference in tone; he bought it just because the additional money was in his pocket.

"In this era of talking machine business the public are educated to the difference in tone; they know what a human voice is when it comes forth from the machine, and as natural with any product, the voice is better on the higher-priced machines.

"What is the reason for this change? Simply that the talking machine industry is an absolute business of itself; it is just as much of a business as any other commodity, and is growing rapidly. The factors figuring in this growth are the big houses who have made a specialty of the business or have given it special attention and the general promotion work of the main companies. A 'talker' salesman to-day must be versed in his own line thoroughly, and on a comparative basis with the other products in the country."

The foregoing pertinent paragraphs were combined in a reply by E. F. Taft, general manager of the Eastern Talking Machine Co., when the writer happened to mention about a concern who are attempting to sell numerous articles and find their talking machine department unprofitable. Continuing, Mr. Taft said:

"The time has gone by when you could array a line of machines and someone would walk in and say, 'I'll take that one; wrap it up.' The machines must be played, the different features explained; the person is shown the entertainment afforded, and just as intelligent a 'talk' must be rendered by a talking machine salesman as by an automobile salesman.

"This house you mention undoubtedly put in machines on the same basis as their other lines; anyone who 'happened' to be around talked to people who 'happened' in, and their actual results were nil. And until they revise their selling policy there will be no improvement. Talking machines must be sold along scientific lines; the idiosyncratic features must be understood, and when some of the people kill the idea that talking machines are a 'side line' they will then perceive what a wonderful business it is with contingent large profits."

Opera Helps Business.

There was some class to that company which Arthur Erisman, manager of the Columbia Phonograph Co., found himself in at the rehearsal of "Mefistofele" at the Boston Opera House last Saturday. There were operatic stars and artists galore, as the event was for the directors of the Opera House. Arthur got in as a "special guest."

Among the prominent officials of the Columbia Phonograph Co., New York, to visit the Boston headquarters recently were: George W. Lyle, general manager, and H. A. Yerkes, sales manager.

The local headquarters of the Columbia Phonograph Co. report a very gratifying past month's business, and Arthur Erisman, manager, says the outlook for the coming month is great. The opening of the Opera House means a great increase in operatic records.

Constantino, the world-noted singer, and the star of the Boston Opera House, now singing under exclusive contract with the Columbia Co., has leased apartments at 114 Hemenway street, this city.

An Enthusiastic Edison Man.

The World is pleased to present a likeness of Charles R. Cooper, manager of the Edison talking machine department of the Linscott Sporting Goods Co. (formerly Boston Cycle & Sundry Co.),

Boston. Mr. Cooper has been associated with this company for twelve years, being in the trade ever since the inception of the phonograph industry. He has enjoyed a remarkable training in the business and is familiar with the practical department, and without question is one of the best versed men in the business on matters phonographical. His enthusiasm for Edison products is

CHAS. R. COOPER.

boundless, and through his efforts the company is rapidly building an Edison jobbing business in New England that totals an enormous monthly volume. Mr. Cooper says that the dealers thoroughly appreciate "getting Edison goods when they want them," and adds that they will always have the largest and most complete Edison stock in New England, with the quickest delivery system.

Here's a joke It also shows what an absent-

minded man will do under certain conditions. A local "talker" man vouches for the veracity. At a local railroad station stood one of the machines which automatically weighs a person and mechanically "talks" out the weight. A man stepped on the machine, dropped in his coin, and the machine "hollered"—one hundred and seventy pounds. "What's that you say?" asked the man inadvertently, and then seeing the smile on a bystander's face, the humor of his trying to talk back to a machine dawned on him, and the incident closed with the man "buying."

Booming the Victor.

Henry F. Miller & Sons Piano Co. are using a great amount of space advertising Victor talking machines, and "the Miller plan for securing one." This is their offer: "Select an outfit. We will deliver it to your home. Any instrument you wish and your own choice of records. Use the outfit for three days. Then decide whether you want to buy it or not. If, after trial, you decide not to purchase the outfit, write or telephone us to remove it. This is your only obligation. If you want to own it, you may purchase for cash, or open charge account, or by our unique gradual payment plan." C. Alfred Wagner, manager, says they are transacting a remarkable Victor business.

Guy R. Coner, formerly with the Iver Johnson Co., is now associated with the Linscott Sporting Goods Co., exclusive Edison jobbers. Mr. Coner is meeting with deserved success at his new post.

Geo. T. Waldron Honored.

George T. Waldron, known as "Pop," was recently elected to the vice-presidency of the Eastern Talking Machine Associates, which honor he is filling creditably. "Pop" is one of the longest-time men in the business, claiming twenty-one years of experience in the slot and talking machine business. He was formerly with the old New England Phonograph Co. He has had experience as an Edison dealer, as a dealer of commercial instruments, inventor of one of the first nickel slot machines, and for the past seven years has been with the Eastern Talking Machine Co. He bears a remarkable likeness to Thomas A. Edison.

The Oliver Ditson Co. are using some good advertising that is filling their parlors with customers. One ad. runs like this: "Tone Pictures.

Some Facts Anent the Needle Factories of W. H. BAGSHAW, Lowell, Mass., U. S. A.

1. World's first makers of talking machine needles.
2. Largest producers of needles on the continent.
3. Factory equipment modernized to the minute.
4. Every size, shape and style of needle manufactured.

RESULT:—Experience means that our raw materials are of the highest merit, and the enormous quantity used insures a low cost. These times a minimum production expense equals the best quality of Needles at the right price. Now you have the secret of our immense permanent patronage.

(Jobbers and distributors only supplied.)

W. H. BAGSHAW, Lowell, Mass., U. S. A.

(Established 1870)

Interpretations by the most prominent operatic stars known in the world of music to-day. Each singer's peculiarities. Each singer's phrasing. Each singer's beauties of intonation. And their methods of vocalization and color work is at the command of students, teachers and professionals, who will listen to renditions on the Victor talking machine at the reception rooms of the Oliver Ditson Co." Henry A. Winkleman says business is "Good" with capital letters and a double underscore.

Would you think \$600 worth of talking machine business, transacted on one day by a fair-sized department of a local retail store a good indication of business brightness? It certainly sounds good, but the writer happened to see the carbon copies in their regular order book, and for a retail store it's certainly great work. The hustling house is the C. E. Osgood Co., and this achievement was the result of Manager Sylvester's energetic work. Good work, Mr. Sylvester! Keep it up!

Mr. Francis, manager of the Iver Johnson Co., has moved into his new home.

Members of the Eastern Talking Machine Co. Associates were the guests of Manager E. F. Taft at a complimentary dinner October 28.

F. E. Mayo, New England traveler for the Eastern Talking Machine Co., has joined the army of Benedicts. At the recent Associates meeting he was presented with a cut glass serving set by the body, which shows how well regarded he is by his fellow-workers. Mr. Mayo has been with the Eastern Co. for about six years, prior to which he was associated with the Columbia Phonograph Co., and in the early days as manager of the talking machine department of Dame, Stoddard & Kendall. Here's wishing you luck, Mr. Mayo!

S. J. Freeman, manager of the publicity department of the Eastern Talking Machine Co., gave out the following business expression to-day: "Business with us is entirely satisfactory to the management. Our wholesale business is increasing with leaps and bounds and we feel it must be due to the absolutely satisfactory service and also to the loyalty of the dealers. Retail business is on a par with previous good years and the outlook is decidedly encouraging for a voluminous holiday trade."

Harger & Blish, Des Moines, Ia., are now giving over their entire store to talking machines exclusively, and it is one of the most attractively arranged establishments in that section of the country.

EDISON MEN AT MECHANICS FAIR.

A Group of Those Whose Efforts Were Largely Responsible for the Success of the Company's Exhibit at the Boston Show Last Month—Edison Jobbers Benefited.

(Special to The Talking Machine World.)

Boston, Mass., Nov. 9, 1910.

This photograph shows the Edison staff, which was responsible for the successful exhibit at the

as the main attraction was the Edison Exposition, practically the entire number learned more about the merits of Edison phonographs than they ever dreamed about.

H. R. Skelton, traveling ambassador for the National Phonograph Co. in Massachusetts and Rhode Island, cared for the success of this display, and he did it "manu forti." A number of displays of Edison moving pictures were given daily, and at every performance the seating ca-

REPRESENTATIVES OF THE NATIONAL PHONOGRAPH CO. AT THE MECHANICS' FAIR, BOSTON.

recent Mechanics' Fair, held during the month of October in this city. In the front row is F. J. Hough and H. R. Skelton, manager of the exhibit. In the back row from left to right are Messrs. Holden, Lauckman, Devine and L. D. Dexheimer, the business phonograph man.

Over half a million people visited the Fair, and,

capacity of the hall was filled. In addition were concerts by Edison machines.

Mr. Skelton says that the Edison jobbers co-exhibiting with the company secured a good amount of business and that they secured hundreds of retail prospects, a number of which have subsequently been developed into retail customers by their retail departments.

CELEBRATED ON ELECTION NIGHT.

The Washington, D. C., Chamber of Commerce held its regular monthly meeting election night. At intervals during the evening the energetic secretary, Thomas H. Grant, projected the election returns on a large screen and at the same time entertained the three or four hundred members present with selections on the Grafonola Regent. Mr. Grant made up an unique program consisting of a number of grand opera selections, but as the returns came in and there appeared to be a Democratic landslide, the Grafonola played "It Looks Like a Big Night To-Night," "The Vacant Chair," "Did He Run," "When You Haven't Any Money You Needn't Come Around." The Regent made a most decided hit.

A GOOD TIME TO QUIT.

The "indispensable man" in the store is so only so long as he does not know it. The moment he discovers that he is indispensable, it is a good time to dispense with him. Some concerns make this a rule; they do not wait until his head has grown so large as to make him unfit for his job. No matter how good a man is, there is always some one to take his place. George Washington was a great president, but the country has managed to get along without him for a number of years.

Keep prices on everything in the store, for it is annoying to have clerks asking every few minutes, "what is this worth?"

Within the week we shipped one dealer (186) one hundred and eighty-six Cabinets for Disc Records, ranging from \$6.00 to \$18.00. On to-day's mail we got an order for (40) forty Cabinets to go with the New Victrola No. 10.

No. 442, with Victrola No. 11 on Top.
Mahogany or Oak.
Holds 190 12-inch Disc Records.

Just stop and analyze these statements. Your conclusion must necessarily be that Cabinets are playing a very important part in the Talking Machine game, and that The Udell Works must have the Prices and Patterns. The whole point is to realize that a Talking Machine Outfit is not complete without the Cabinet and then cast about for the manufacturer of Cabinets who offers you the most.

We don't want an initial order and then not get the repeaters.

Our success in the Cabinet field can be summed up in this fact. We get repeat orders because the initial order was satisfactory.

The dealer sold the cabinet at a profit and made a satisfied customer.

We have New Cabinets for Victrolas No. 10 and 11. Get in the Cabinet swim and write us for Booklet and Prices.

THE UDELL WORKS, Indianapolis, Indiana

This is the season of Grand Opera and every opera now being staged is blazing the way for Columbia Grand Opera Records. Grand Opera at the opera house awakens interest in opera at home. And that is where the Columbia dealer comes in: Both together they enable you to inaugurate a brilliant and profitable season of opera in your store.

Columbia Phonograph Co., Genl., Tribune Building, New York.

WITH THE TRADE IN MILWAUKEE.

Both Jobbers and Dealers Well Satisfied with Present Business Conditions—Collections Good—Retailers Stocking Up for Holidays—McGreal's Eastern Trip—Recent Visitors—Personal Items of Interest—Speaks of Talking Machine Development Before Wisconsin Teachers' Association—Popularity of the Grafonolas—General Summary of the Doings of the Month Herein Recorded.

(Special to the Talking Machine World.)

Milwaukee, Wis., November 9, 1910.

Milwaukee talking machine dealers, wholesale and retail, are highly satisfied with the business that was received during October, and predictions are made everywhere that the month of November will produce far more trade than the same month a year ago. In fact, dealers are looking for a steadily increasing business from now until after the holiday period.

Conditions in general are highly favorable. Despite the unsatisfactory outlook during the summer, a bumper crop was harvested in all lines in Wisconsin. This has meant plenty of money in circulation, and talking machine dealers say that they are determined to get their share. Reports from the smaller cities and towns of the State would indicate that the dealers' ambitions are being realized.

Collections seem to be showing much improvement in all parts of the state, a condition of affairs that might be expected, considering the brighter state of financial affairs. It had been a noticeable fact in many lines of business throughout the summer that collections were far from satisfactory. Local bankers report that bank clearings are large in volume and showing steady improvement, and this is taken as a most hopeful sign.

Judging from the free manner in which retail dealers are ordering machines, records and supplies, it would seem that they fully realize the importance of buying their stock as early as possible before the winter rush sets in. One leading local dealer says that the retailer who stocks up early is fair to himself as well as fair to the manufacturer and to the trade in general.

The New Idea Cabinet Co., manufacturing the New Idea Cabinet, are busy, and Mr. McGreal, one of the officials of the company, reports many orders on hand. Several new cabinets are being turned out to match the latest styles of Victor machines. A new Cylinder cabinet is now being turned out and is meeting with much approval.

Lawrence McGreal has returned from the East, where he visited both the Edison and Victor plants. He is highly pleased with the manner in which the fall trade in the wholesale field is opening up. Miss Gertrude Cannon, owner of the McGreal retail store, reports an excellent business and says that demand for high priced machines was never better than at the present time.

George Ornstein, manager of salesmen for the Victor Talking Machine Co., was in Milwaukee recently visiting relatives.

Carl C. Kemmerer has been made manager of

the Edison business phonograph department of the Hoefler Manufacturing Co.

J. H. Becker, Jr., manager of the talking machine department of the Hoefler Manufacturing Co., reports having received the new styles of Victrolas, XXI and XIV, which are appealing to a really large class of trade. We had the machines on display in our windows prior to and after the visit of Melba to Milwaukee," said Mr. Becker, "so we included in the display a life-sized poster of the great songstress illuminated by electric flashlights. You would be surprised to see how people were attracted to this exhibit."

Roy J. Keith of the The Talking Machine Co., of Chicago, called upon the Milwaukee trade recently.

W. C. Fuhri, western district manager of the Columbia Phonograph Co., at Chicago, called at the Milwaukee store recently. Mr. Fuhri is optimistic in his views of trade conditions throughout the country and says that indications point to a record breaking season for the talking machine trade.

A. G. Kunde, well known Columbia dealer, 516 Grand avenue, expects the arrival of the Grafonola Favorite, the hornless Columbia, in Milwaukee within a short time. He reports several orders having already been booked for these instruments. "Business has been increasing steadily during the past two months," said Mr. Kunde, "and I look for a continued growth up to the holiday season. Milwaukee as a market for talking machines is constantly improving, the call for high class machines being more noticeable than that for the cheaper ones."

William P. Hope, Wisconsin and Upper Michigan representative of the National Phonograph Co., accompanied by his wife, was in Milwaukee recently. Mr. Hope is now spending considerable time in looking after the Edison wagon dealers and is meeting with the best of results.

The use of the talking machine in the schools of Milwaukee is becoming widespread, and L. C. Parker, manager of the talking machine department of Gimbel Brothers' store, says, "I expect to have a machine installed in every school in the city before the end of the year."

Mrs. F. E. Clark, supervisor of music in the Milwaukee schools and a prominent member of the Teachers' National Association, in an address given before the Wisconsin State Teachers' Association, held recently in Milwaukee, spoke on the development of the talking machine as an educational factor in the schools, and she spoke on the same subject at the meeting of the St. Cecilia Musical Society at Grand Rapids, Mich., during October. Before she had left the city, a subscription list had been started for buying machines and records to be installed in the schools of Grand Rapids. Musical clubs have for a long time been trying to develop a sense of musical appreciation among the people of to-day, says Mr. Clark, and they have recognized that the only successful manner in which this may be accomplished is through the children and through the schools. Their work has been halted, however, by the fact that it was impossible to secure talent to go into the schools, or to instruct the teachers successfully. This con-

dition has all been overcome by means of the talking machine, she continued.

"Our business was three times as large during the month of October as it was for the preceding three months," said Mr. Parker of Gimbel Brothers. "Indications are very bright and I am looking forward to a splendid business between now and the holidays. Competition, of course, is brisk, but that only tends to make one put forth greater efforts, and if our efforts are put in the right directions, results are sure to come."

Senor Constantino, leading tenor of the Boston Opera Co., has presented a Grafonola de luxe, with a complete set of his Columbia disc records, to the Massachusetts Homoeopathic Hospital. The order was placed with the Boston Columbia store.

W. G. Walz, of El Paso, Tex., a veteran in the music business, will retire around the first of the year from active business, which will be turned over to his two sons, bright and accomplished men. The Walz house has recently given up their piano line and are devoting themselves entirely to talking machines, sporting goods and photograph supplies.

E. A. Tompkins, Pittsfield, Mass., states his October sales were five times as great as for the same month last year.

(Special to The Talking Machine World.)

Chicago, Ill., Nov. 7, 1910.

October made a fairly satisfactory showing with the Chicago talking machine trade. The month showed a good increase as compared with October of last year, and a measurable gain as over the previous month of this year. It did not show as marked a gain over September as was expected, however, or as is usually experienced. This was undoubtedly due in large degree to the unseasonably warm weather. A temperature of 84 during the middle of the second fall month is not exactly a trade stimulant. Trade currents quickened the latter part of the month, however, and November has made a remarkably fine opening. Even the smaller dealers are coming to the front now with orders of a nature which shows that they are doing business, and the larger merchants are coming up with substantial stock orders and are evidently preparing for a big holiday trade. Of course, any reference to business extending over any considerable territory must necessarily be in the way of generalization. Some sections are responding much better than others, but as a whole the territory principally worked by Chicago jobbers is in excellent condition from a talking machine standpoint, judging from the business being received by the jobbers.

Local retail business last month was of fair proportions. It made a fine start and a somewhat brilliant finish, but there was something over two weeks of decidedly dull business, owing, no doubt, to the warm weather. The past fortnight has been good. Everyone looks for a good holiday trade, and from the vigorous advertising now being indulged in and planned shows a lively realization of the fact that there is going to be a bigger fight for business than ever. Never in the history of the trade have there been so many concerns in the Loop district going aggressively after the festive talking machine prospect as this fall.

It is amusing to notice the arguments indulged in by the new-comers and the comparatively new-comers, to get business away from the older houses. One house lays stress on the fact that their warehouses are away from the bustle and noise of the elevated and surface roads. Another recently laid stress on the fact that their entire talking machine department, by gum! was located on the ground floor, and still another capped the climax last week by using considerable space in the dailies to advertise the fact that they do not give concerts, but that all their efforts are reserved for the use of those who appreciate personal interest in their questions and wishes. That was certainly a "peach" of an "ad." It is apparent that we are creating a school of negation in advertising in Chicago, as a considerable proportion of the trade seems more intent on telling the people what they have not rather than what they have.

Victor Co. Gets Injunction.

The Victor Talking Machine Co., of Camden, N. J., have secured a preliminary injunction, be-

fore Judge Carpenter, in the United States Circuit Court, restraining Frank Holub, a talking machine dealer at Kedzie avenue and Twenty-second street, this city, from selling certain imported disc records which the Victor Co. claim are infringements of the patents owned and controlled by them. Mr. Holub, it is claimed, imported about 400 "Vini, Vidi, Vici" and "Favorite" records through the firm of Joseph Vrba & Spol, of Prague, and has been selling them at low prices. Mr. Holub denies that he has any knowledge that his action was in violation of the Victor Co.'s rights. The Victor Co., it is understood, have also recently obtained injunctions against dealers in several large Eastern cities who were handling the same makes of records. In the course of the prosecutions in the East the agents of the company were enabled to trace a number of the records to Chicago, and George C. Case, of the Victor Co.'s legal department, came to Chicago and worked up the evidence which resulted in the institution of proceedings by Belt & Linticum, who have represented the Victor Co. in previous cases here.

Columbia Co.'s New Quarters.

The Columbia Phonograph Co. have just closed an eight-year lease for the large store and basement at the northeast corner of Wabash avenue and Washington street. It is being extensively remodeled and fitted up for the company's purposes and will be ready for occupancy about November 22. The company will, however, retain the present store as a branch retail establishment until January 1, and, in all probability, until May 1 of next year, when their lease expires. At any rate, the Columbia will have two stores during the holiday trade this year, and that will certainly help some.

The new store is only two doors north of No. 88 Wabash avenue, which was the company's Chicago headquarters for ten years prior to the removal to the present location a year ago last May. It will therefore seem like a return to the old "home" to the local staff and the Columbia dealers in this territory. The company will have far more room in the new location than in the present one, and will be able to conduct their business with greater convenience, as the growth of the business compelled them to secure extra storage room at 302 Wabash avenue a few months ago.

The new store has a frontage of 27 feet on Wabash avenue and about 170 feet on Washington street. The basement is 40 feet in width, as it extends under the Washington street sidewalk. The retail department and the general offices will occupy the main floor, while the entire wholesale machine and record stock will be kept in the commodious basement, thus divorcing the wholesale and retail stocks as thoroughly as if they were in separate buildings. An electric elevator will be installed for carrying stock from the basement to the shipping room in the rear of the main floor.

There are large display windows on either side of the entrance on Wabash avenue and also extending for 50 feet on Washington street, giving such an opportunity for Graphophone display as has never been hitherto enjoyed in Chicago. The present front and corner windows are very attractive, with art glass backgrounds and canopies, but this arrangement will probably be changed very shortly, the windows deepened, and artistic hardwood backgrounds constructed.

The front of the store will be fitted up as an attractive reception room with rugs, comfortable divans and many conveniences for customers. Along the north side of the store will be the machine and record demonstration booths, five of which will be 8 x 13 feet in size, and two 16 x 13 feet, the latter being used for Grafonola rooms. The booths will be of handsome architectural design and constructed of mahogany and plate glass, with the exception of the dividing walls between the booths, which will be of "Beaver" pulp board,

said to be particularly soundproof. The booths will have cork flooring and will be well lighted and ventilated.

In the center of the booth structure will be an open space devoted to the retail record department. On the aisle will be a counter with stools for customers and where those who do not care to have records demonstrated can make their purchases. Here the salespeople can get the records for demonstrating over the counter, avoiding confusion caused by a number of people crowding around the record stock shelving, the disarrangement of stock, etc.

C. F. Baer, local manager, will have his private office in the center of the Washington street side, where he will have the advantage of three large windows. In the rear of the floor, back of the booth structure, will be located the order department and the offices of Mr. Ramdell, assistant manager; Frank Cass, credit manager, and others of the staff.

District Manager W. C. Fuhri will have a commodious private office on the large mezzanine floor extending over the rear portion of the store, and from which, in comparative seclusion, he can direct the affairs of the extensive Western and Southern territory under his control. On this floor also will be located the counting rooms and the offices and school of the Dictaphone department, in charge of W. W. and E. A. Parsons.

In the new location not only will the facilities for handling the wholesale business be far better than at present, but from a retail viewpoint the neighborhood has vastly improved since the company was at No. 88. More high-grade retail stores are in the block, there is a much greater transient traffic, and the Wabash avenue cars now "loop" at Washington street instead of at Madison street, as formerly, making the corner one of the busiest on the street. The great Marshal Field retail establishment, directly across the way, attracts an immense amount of automobile trade to the vicinity. It will be by far the finest store the company has ever had in Chicago and one of the finest in the service.

Congratulations.

It is pleasant indeed to see employes of the same house working together in peace and unity, and still more gratifying when a warmer feeling exists between them. A nice little romance culminated on Monday of last week in the marriage of Louis Glover, head of the repair department at Lyon & Healy's, and Miss Mabel Breckenridge, one of the firm's galaxy of fair record sellers. The wedding occurred at the home of the bride's parents at Saugatuck, Mich. Mr. and Mrs. L. C. Wiswell were among the guests. Among the gifts was a handsome clock from friends at the store.

Returns to Mexico.

Mrs. George M. Nisbett, wife of the popular erstwhile Chicagoan, now in charge of the interest of the National Phonograph Co. in Mexico, returned to the City of Mexico a few days ago after a visit of some weeks' duration with friends in this city.

Walter Roach Promoted.

Walter Roach, for several years in the talking machine stock at Lyon & Healy's, has been promoted to the sales force and is visiting city and outlying trade for them.

Renew Lease.

George and Cecil Davidson, proprietors of the Talking Machine Shop, have just renewed the lease on the store at 169 Michigan avenue for a period of five years. There was considerable skepticism as to the success of the venture at the start, but it has evidently proved a profitable investment. The new branch opened at 43 Jackson Boulevard a few months ago also gives promise of success equal to that of the parent store.

A Busy Jobbing House.

The Talking Machine Co. report that both September and October showed big increases over

“A Bumper Crop of Victor Sales”

awaits the Dealer with any amount of
“GET UP AND GIT”

If our sales are any criterion of how dealers are preparing for the Winter business, then listen to this:

September, the biggest September we ever had by **23%**
October, the biggest October we ever had by **39%**

We are working night and day to fill orders. Every nickel's worth of our enormous stock is being carried for you, Mr. Dealer—
Not a penny at retail.

Do you realize what “EXCLUSIVELY WHOLESALE” really means, particularly in times of shortage?

We don't claim to be infallible—we all must fall down at times, BUT—you'll get the **BEST** Victor Service in America

AT

THE TALKING
MACHINE
COMPANY

72-74 Wabash Avenue
Chicago, Ill.

similar months in previous years, and judging from the evidences of extreme activity around the house, business this winter should be distinctly O. K. The orders on hand for the new Victrola styles make up a big aggregate. The entire first shipment was sent out to the company's dealers the day received, and further consignments are eagerly awaited. The trade is hungry for them. The reputation for complete and prompt service enjoyed by the company is attracting business from an astonishingly wide expanse of territory.

Aeolian Co. Alterations.

The talking machine business of the Chicago branch of the Aeolian Co. is being transacted from temporary quarters on the fifth floor of the building while the extensive improvements are being made to the department. They will be completed by the 15th of the month. The Aeolian Co. have opened a sub-branch at 1441 Milwaukee avenue, where Victor goods are being conspicuously featured. The store is in the heart of a vast foreign population, distinctly musical, and a good business is anticipated.

Mr. Scwenker, the live representative of the Victor Co.'s repair department, has been spending some days in Chicago with the local jobbers.

At Lyon & Healy's.

"October made a good showing in spite of a lull in the middle of the month, due, no doubt, to the unseasonably warm weather, and scored an important gain over September and over October a year ago," said L. C. Wiswell, of Lyon & Healy. "There is evidently going to be a shortage not only in the new Victor styles but also the sixteens, although the Victor Co. is evidently straining its capacity to the utmost to supply the demand. The demand for Edison goods is of a most satisfactory nature and the trade now seems to be responding very actively to the new exchange proposition.

"November with us has opened up remarkably well, and if it maintains the present rate will prove something of a record breaker."

Good Salter Business.

The Salter Mfg. Co. report a fine demand for the big line of talking machine cabinets manufactured by them. Although they prepared for an unusually good season's business, the demand has been so large that they suggest that dealers wishing to avoid delay in delivery of goods for the holiday trade would do well to get their orders in as quickly as possible.

Barnes' Clever Start.

"This is to inform you that your name has been suggested for membership in the I. O. E. V. W. Respectfully, Membership Committee. An application blank will be mailed you. If not received within ten days, please notify general secretary, suite 639, First National Bank Building."

Hundreds of Chicago business men recently received cards bearing the above legend. A number called at the address given to find out the aims and objects of the order. Those who didn't as well as those who did received a day or two after the mailing of the card a letter notifying them that they had been elected to membership in the Independent Order of Edison Voice Writers, and that to qualify it was only necessary to purchase an equipment of Edison business phonographs. Of course, there was more to it, all written in the breezy style of C. E. Barnes, of the Business Phonograph Co., Chicago. Barnes says it stirred up a lot of good prospects. He is making extensive improvements in his offices in the First National Bank building, and when they are finished the training school for business phonograph operators will occupy much larger quarters than at present. A large room on the seventh floor of the same building has been secured for the repair department.

Permanent Needle Success.

The Permanent Needle Sales Co., 14 State street, Chicago, have every reason to be gratified with the reception being awarded the new Permanent Jewel needle, the marketing of which they exclusively control. The initial advertisement in The World last month brought orders from all over the country, and the manner in which these are being followed up by substantial duplicate orders convince both Mr. Rosenthal, the head of the com-

pany, and Mr. Levin, the inventor, that the Permanent needle has a very big future before it.

Greeting Visits Aeolian Departments.

O. A. Greeting, manager of the Victor departments of the Aeolian Co., paid a flying visit to Chicago the latter part of last week. He had visited all the other principal branches of the Aeolian Co. before reaching this city, and was therefore able to speak with authority regarding conditions. "Of course the Victor department at Aeolian Co. Hall in New York City has only been in operation a short time," said he, "but it certainly looks as though our most optimistic expectations were to be realized. The concerts at which the Auxetophone appears, accompanied simultaneously by both the Aeolian pipe organ and the Pianola have been exciting unusual interest and enthusiasm. The effect is something remarkable. The Aeolian departments at Cincinnati, Indianapolis, St. Louis and Chicago are all doing an excellent business, and I found the Victrola instruments exceeding in sales those of the other types.

"We find the combination a most happy one. No end of people who have player-pianos have a desire for good vocal music in their homes as well, and, on the other hand, many who purchase a high-grade talking machine soon find the creative and interpretative impulse strong within them and become good Pianola-piano and piano prospects. Our department managers tell me that many of their customers are getting great enjoyment in having the Victor accompany their player-piano. As you know, I was a dyed-in-the-wool piano man before I got into the talking machine game, and for years shared the prejudices entertained by many of my brethren. I have become, however, a sincere enthusiast, and especially so regarding the ideal manner in which the two lines work together in a trade sense."

Dorian on Dictation Machine Development.

Frank Dorian, manager of the Dictaphone department of the Columbia Phonograph Co., was in the city on Friday of last week in the course of a trip among some of the Western branch offices of the company, which took him as far West as Omaha.

"The commercial dictation machine is becoming recognized as just as indispensable a part of the equipment of the modern office as the typewriter or up-to-date filing devices," said Mr. Dorian. "It represents the same advance over stenography as that scored by the typewriter over penmanship and has had to encounter just as apparently insuperable prejudices and obstacles. More rapid progress is being made now than at any time since the introduction of the commercial machine, and in a very short time no professional or business office, no matter how small, will be considered complete without this remarkable labor-saving device.

"The attention of the manufacturers up to the present time has been devoted to the perfection of the machines and blanks, but the next step I believe will be the production of a record which will be easily and conveniently mailable without likelihood of breakage, and the use of the machine by large concerns in transmitting messages of a confidential nature and which they do not wish to reach the ears even of their office subordinates will be greatly facilitated." Mr. Dorian expressed himself as greatly pleased with the demand for Dictaphones, and spoke especially of the good work being done in Chicago. As evidence of the popularity of the company's commercial machines abroad, he stated that they shipped about six hundred Dictaphones to European agents last month and have orders for a similar number now on hand.

Starck's New Victor Department.

The P. A. Starck Piano Co. are fitting up a fine Victor department in the basement of their fine new store at 203-5 Wabash avenue. It is reached by a broad staircase leading down from near the front of the store. There will be a large general salesroom, 20 x 35 feet, corked carpeted and with mahogany framed mirror panels on the walls. The four demonstration booths will be of mahogany, with white enameled and plate-glass panels. Back of the booths will be the record shelving, capable of holding 9,000 records. Tem-

porary quarters are now being occupied on the main floor, and Victor machines and records are lavishly displayed in the immense show window. P. T. Starck, who supervises the retail business of the company, says they will push and advertise the talking machine business vigorously.

Kiess with Wookey & Co.

O. M. Kiess, a former Chicago boy, has been made manager of the talking machine department of Wookey & Co., of Peoria, Ill. He is an experienced and competent man, with an all-round equipment gained in important positions in Chicago and Kansas City and a couple of years in charge of the talking machine department of the Lindenburg Piano Co., of Columbus. Wookey & Co. are an aggressive house, with one of the finest music stores and talking machine departments in the State, and the combination of man and position seems particularly fortunate.

Chapman's Apt Simile.

Rev. J. Wilbur Chapman, the eloquent evangelist, who is at the head of the remarkable "simultaneous revival," now in progress in Chicago, is holding noon meetings at the Chicago Opera House. In his discourse one day this week he used the phonograph aptly by way of illustration. "A member of my family was sent to China as a missionary shortly before the Boxer rebellion," said Dr. Chapman. "We decided to forward some gift which would be waiting for her at her far-away destination when she arrived. We all made our suggestions, but finally that of one of the youngest in the family was adopted and a phonograph purchased. Each one made a record. The old grandfather, tottering on the brink of the grave, dictated his benediction, the mother added words of admonition and cheer, and, finally, the baby sent a gurgling laugh into the horn. You can imagine what those vital, living, soul-filled messages meant to the lonely traveler when she reached the end of her voyage to face the trials and perils of her new field of labor. Now," continued the speaker, holding up a bible, "this book, and I say it in all reverence, is God's phonograph through which he transmits his messages of love, of comfort and of benediction to his children on earth."

L. F. Geissler a Visitor.

L. F. Geissler, general manager of the Victor Co. was in the city last week on his way to the Coast. He spent Sunday with his son, Arthur D. Geissler, general manager of the Talking Machine Co., and on Monday visited the several Victor distributors here, leaving the same evening for St. Paul and Minneapolis. On his way out Mr. Geissler will visit Butte, Spokane, Tacoma, Portland, Frisco, Los Angeles and other Coast cities, and will visit Leon F. Douglass at his home at San Rafael and enjoy a brief season of duck hunting with him. On his return he will visit the Victor distributors at Denver, Salt Lake, Omaha, Kansas City and other Victor jobbing centers.

Chicago, Ill.

Here's Service for You!

When a customer comes into your store and wants three or four records that you don't have in stock and wants them in a hurry, of course, you, too, want them in a hurry. It is only natural that you should desire to keep the regular trade of your patron.

Show him that you are willing to accommodate. Say to him, "I'll get them for you just as soon as a letter can reach Chicago and the Express Company can bring the records." Nine times out of ten he will tell you to go ahead and order. If he's in a bigger hurry than the mail will allow, send a night lettergram. While it cuts into your profits a little, the good will of your customer more than repays you in increased business.

And at our end of the line the response will be immediate; your records will go out on the first train headed for your town. Not one blade of grass will be allowed to even start under our feet. Whether your order is for a hundred needles or a carload of Victors and Edisons, it will be filled and sent out the same day it is received. That is the kind of service we always give. It is the only kind you can afford to expect.

Our terms are the most liberal known to the trade, hence it will pay you to place your orders with us.

Write us to-day for catalogs and our special dealers' proposition. You lose money every day you delay.

Salter Manufacturing Co.

337-343 N. Oakley Ave.

CHICAGO, ILL.

Machine Co., took a week's vacation last month and put it in at the Victor factory at Camden and among the Victor distributors and dealers in New York. He was greatly impressed with the progress of the Victor Co. as witnessed by the immense additions to the plant erected since his last visit two years ago. "Every Victor dealer should arrange to pay a visit to this remarkable factory," said Mr. Creed. "It would give them an idea of the immensity and the dignity of the business which they could not possibly obtain otherwise. As an office man I was particularly impressed with the remarkable system pervading the Victor offices. Furthermore I was interested in learning how thoroughgoing are their efforts to place the trade on the highest possible level. The work of the company in eliminating that class of trade unworthy of an energy like that represented by the Victor, because of their inability or indisposition to represent it properly, is worthy of all praise and should certainly meet with the approval of live and enterprising dealers everywhere."

Frank Madison, of the contract department of the National Phonograph Co., recently called on the trade here in the course of a Western trip.

Complexities of the Double Record.

A large and husky gentleman of Celtic extraction recently entered a Chicago talking machine store and asked for a certain selection, got it and took it home. The next day he returned in high dudgeon. "Phwat d'ye mane by giving me the wrong record," said he. The clerk simply took the record, whirled it around and presented it to the customer with the side containing the latter's choice uppermost. It was the first time he had met a double-faced record and he went away chastened and enlightened.

A Mongolian Appreciation.

The Chicago office of the Columbia Co. received a few days ago a set of the 171 new blue label double faced Chinese records just produced by the company. When Sim Law, Chicago's only Chinese talking machine dealer, heard of them he came over to 210 Wabash from his store on

South Clark street on the jump. "Gee they're fine—finest records I ever heard. They'll set Chinamen crazy," was Sim's instant verdict. He had the records delivered at once and ordered two more complete sets. Those records will go all over the country. Sim advertises in Chinese papers in Chicago, San Francisco and New York and does a big mail order business.

BALTIMORE'S NEWS BUDGET.

October Business Excellent—Prospects of Record-Breaking Holiday Trade—Cohen & Hughes' Convincing Window Display—Their Fine Department—Sanders & Stayman Also Have Pretty Window Display.

(Special to The Talking Machine World.)

Baltimore, Md., Nov. 5, 1910.

"A big October, the prospects for a larger November and a record breaking holiday trade," is the way one of the leading dealers put it the other day when asked about the status of the talking machine industry, both wholesale and retail, in Baltimore. And his statement is identically the same, only not in those exact words, as those made by the other dealers of the Monumental City.

That attractive window displays are the means of drawing buyers is the belief of the progressive dealers of this city and the result of this is that in most all the stores something original in the windows can be seen. At Cohen & Hughes, for instance, they have a beautiful arrangement of Victor machines, records and other paraphernalia under the caption "A Week With Verdi." The records used of course, are those of the operatic works by the well-known composer of that name and among them are to be found those of selections by Caruso. This firm has been very progressive the past month or so in elaborating on its talking machine section with the result that now it has one of the finest in this, as well as many other cities. The entire second floor is divided off into various departments, while a good part of the first floor is devoted to the manager's office.

Morris Silverstein has again taken charge as manager of the two floors, having entire supervision. He supplants D. D. O'Neill, who came over from Philadelphia several months ago. Mr. O'Neill has returned to the Quaker City. Robert Price is associated with Mr. Silverstein in the retail department of the trade.

Another pretty window display is that at Sanders & Stayman, who handle Victors and Columbias. The display in this instance represents Pryor and Sousa's Band and to make up the show, records are used containing the most popular selections for which this musical organization is noted. The firm, according to Manager Albert Bowden, has just received the first of the new \$75 Victor machines and a consignment of new Columbia machines and records. Both are proving good sellers.

Manager Laurie, of the local branch of the Columbia Phonograph Co., reports business in his particular line to be excellent, with even better prospects. He says that there has been a healthy demand, especially for the hornless Columbia machines, that is for the various styles of Grafonolas. He is featuring this month in the way of a window show the Columbia double disc records which have become quite the fad among talking machine owners.

At the store of E. F. Droop & Sons Co. the report is given out by Manager Roberts that the same good results that have been obtained for the past two months show no signs of abatement. Both the Victor and Edison machines and records are going well.

After much delay and worry, Messrs. Hamman & Levin who run a line of Victor and Edison machines and records, are about to move into their new and spacious quarters at 416 North Howard street. This new store is a handsome new three-story structure, which will be used entirely by the firm. The finishing touches are now being put on and the firm announces that it will be doing business at the new stand by November 16. The firm is now located at 419 North Howard street.

FOR EFFECTIVE WINDOW DISPLAY.

National Phonograph Co.'s New Department to Look After This Important Matter—In Charge of Ora E. Rinehart, an Expert.

An effective window display of machines, records, etc., one that is artistically arranged, is frankly not within the capabilities of every dealer. In the large cities men make a profession of this work, and therefore its value cannot be gainsaid. It is also recognized dealers are apt to clutter up their windows with a heterogeneous mass of material, hence the good it is intended to obtain is negated. The National Phonograph Co., Orange, N. J., have apparently recognized the form of this and similar arguments, and knowing what may be accomplished by a striking window display of the

ORA E. RINEHART.

Edison phonograph and its appliances, have created a special service that will look after this very important part of the business.

The company's new department of window display and general interior arrangement will be in charge of Ora E. Rinehart, who assumed the managerial position October 24. Mr. Rinehart is an expert in this special line, having been actively engaged in producing not only beautiful and costly displays, as the Edison Phonograph Monthly says, but who has successfully proven that at little cost it is possible to produce displays that are both attractive and selling—displays that bring direct results.

Mr. Rinehart is a man of original ideas, and when his plans are perfected and the department fully equipped, a service will be produced that, with the necessary co-operation of the Edison dealers, will increase their sales and be mutually beneficial to the company and themselves.

SAVING MONEY ON WAX.

How One Office Manager of a Large Concern Cuts Down Loss on Records for Business Phonographs.

One of the largest wholesale dry goods and general merchandise concerns in the country uses phonographs for correspondence dictation exclusively. But even with the great saving they have brought about it finds other and additional savings that may be practiced in connection with the machines.

After a test of the machines the manager of correspondence found that the average letter contained 100 words or thereabout, and that often only two or three letters were dictated on one wax record which was made to accommodate 1,500 words of ordinary dictation. This meant a considerable loss, for the entire cylinder had to be shaved to remove 100 words, trimming it down as much as in removing 1,500 words.

Here was an opportunity. Buying records in

quantities of 5,000 at a time, he figured that a loss of 75 per cent. of wax ran into dollars in the course of a year. He sent out orders to have all records cut into smaller sizes, and instructed correspondents to use the size of cylinder that would accommodate the dictation they desired to give. Thus a 100-word letter went on a record cut into thirds, says System. If a man was going to dictate a string of letters he used full-sized records. Before long the system was in general use throughout the various departments, and over \$500 was saved the next year in the cost of wax records.

OUR FOREIGN CUSTOMERS.

Amount and Value of Talking Machines Shipped Abroad from the Port of New York.

(Special to the Talking Machine World.)

Washington, D. C., Nov. 10, 1910.

Manufacturers and dealers in talking machines will doubtless be interested in the figures showing the exports of talking machines for the past four weeks from the port of New York:

OCTOBER 15.

Algoa Bay, 193 pkgs., \$4,700; Azuay, 12 pkgs., \$516; Callao, 7 pkgs., \$799; Guayaquil, 7 pkgs., \$310; Havana, 31 pkgs., \$1,285; Havre, 20 pkgs., \$440; London, 467 pkgs., \$5,893; Santiago, 6 pkgs., \$197; Santos, 24 pkgs., \$2,006; Savanilla, 67 pkgs., \$6,163; Sydney, 14 pkgs., \$1,828; Valparaiso, 11 pkgs., \$385.

OCTOBER 22.

Barcelona, 2 pkgs., \$100; Bahia, 55 pkgs., \$3,130; Buenos Ayres, 13 pkgs., \$343; Callao, 15 pkgs., \$1,063; Canguay, 6 pkgs., \$156; Colon, 6 pkgs., \$124; Glasgow, 3 pkgs., \$170; Guaymas, 5 pkgs., \$242; Hamburg, 73 pkgs., \$3,208; Havana, 12 pkgs., \$910; 9 pkgs., \$888; 10 pkgs., \$439; Hong Kong, 31 pkgs., \$1,433; Limon, 7 pkgs., \$387; London, 596 pkgs., \$8,599; 2 pkgs., \$125; Manchester, 8 pkgs., \$452; Melbourne, 659 pkgs., \$14,098; Para-20 pkgs., \$1,584; Port of Spain, 7 pkgs., \$557; Puerto Barrios, 28 pkgs., \$724; Rio de Janeiro, 88 pkgs., \$5,496; Savanilla, 73 pkgs., \$6,041; Sydney, 2 pkgs., \$254; Tampico, 20 pkgs., \$576; Vera Cruz, 30 pkgs., \$713.

OCTOBER 29.

Algoa Bay, 29 pkgs., \$1,375; Antwerp, 2 pkgs., \$150; Berlin, 24 pkgs., \$292; 26 pkgs., \$700; Buena-ventura, 5 pkgs., \$194; Buenos Ayres, 200 pkgs., \$8,220; 37 pkgs., \$1,771; Colon, 11 pkgs., \$305; 5 pkgs., \$124; Havana, 18 pkgs., \$496; Havre, 1 pkg., \$129; 9 pkgs., \$308; Hong Kong, 22 pkgs., \$984; Iquique, 1 pkg., \$170; London, 65 pkgs., \$4,761; 660 pkgs., \$10,499; Matanzas, 3 pkgs., \$191; Rio de Janeiro, 49 pkgs., \$4,286; 3 pkgs., \$258; 27 pkgs., \$1,541; Santiago, 4 pkgs., \$273; Savanilla, 7 pkgs., \$728; Shanghai, 4 pkgs., \$120; Southampton, 32 pkgs., \$3,050; 15 pkgs., \$500; Trinidad, 7 pkgs., \$321; Valparaiso, 11 pkgs., \$385; Vera Cruz, 73 pkgs., \$2,260; 63 pkgs., \$4,395; Yokohama, 13 pkgs., \$960.

NOVEMBER 6.

Acajutla—15 pkgs., \$483; Berlin, 66 pkgs., \$2,267; Cartagena, 30 pkgs., \$2,331; Colon, 10 pkgs., \$387; Corinto, 22 pkgs., \$403; Guayaquil, 12 pkgs., \$445; 2 pkgs., \$172; Halifax, 4 pkgs., \$100; Havana, 2 pkgs., \$263; 21 pkgs., \$1,080; Lima, 2 pkgs., \$354; Liverpool, 50 pkgs., \$216; London, 561 pkgs., \$9,587; 58 pkgs., \$3,430; Mazatlan, 14 pkgs., \$306; Para, 4 pkgs., \$486; Santos, 21 pkgs., \$1,501; Savanilla, 19 pkgs., \$632; Tampico, 56 pkgs., \$2,269; Trinidad, 5 pkgs., \$163; Valparaiso, 25 pkgs., \$1,192; 5 pkgs., \$308; 4 pkgs., \$214; 3 pkgs., \$286; Vera Cruz, 124 pkgs., \$5,933.

HOW HE INTERESTS CUSTOMERS.

A Columbia dealer in Richmond, Ind., is a Grafonola enthusiast, having purchased several of the machines and many of the high grade records. To interest his customers in the records he secured from the Cincinnati branch librettos of the different operas, with the records shown in both English and the original language in which the selections are sung. In this way his customers can follow the records closely. The dealer reports the scheme very satisfactory and his customers appreciate the records much more when they understand the numbers.

HANDLING EMPLOYES.

How a Smoothly Running Business Machine Is Maintained Through Knowledge of This Important Matter—An Instance Cited by A. L. Bain Which Is Worthy of Simulation.

In one of the smaller towns within a radius of a hundred miles of Chicago, is a merchant whose sales force works like clockwork. In fact, he has one of the most perfect mechanisms for making retail sales that it has been my pleasure to observe.

Last week I visited the town and found things running as smoothly as ever. So I questioned him on the matter of hiring and handling his help. I submit, without change or comment, what he said:

"There are two things to study in getting a good working force around you. The first is hiring, the second, training.

"I look a long way ahead for my raw material. I visit high schools and the business colleges once or twice a year. If I see a boy who is bright, has just the right measure of self-confidence and is 'snappy' and alert, I get in touch with him. I make some plausible excuse to get an interview with him. Once I talk with him I can tell to a reasonable certainty whether he will ever make a satisfactory helper. I try to pick a young man who is working his way through school, though these boys are liable to be transient. That's the way I got my best department head, though, by picking up a young man working his way through a business college.

"In my trips through the country I notice the farmers' sons who incline toward trade rather than to staying on the farm or going to school. One of the best hardware salesmen I ever knew, I picked up when he was about twenty-one years old, working on a farm.

"I balance up my force with middle aged and elderly men who want to be assured of a steady and sure income. These men are certain to stay by me; because I can depend on them and I keep them as long as they care to stay.

"It's a constant train, train, drill, drill, for my men. If I learn of a new method or wrinkle through a business magazine or a traveling salesman, I suggest it to the men who ought to use it. They try it, and if it works—as it usually does—we incorporate it into our general plan.

"I urge each man to make a specialty of something; to study it until he's an authority—then I have an 'information interchange,' as we call it. Each man posts the other on his hobby, so I have salesmen who can buy and buyers who can sell, and every man a specialist at that.

"Lastly, I try to pass my men on to better jobs if I believe it to be for their good. Several traveling men who call on me got their start right here; they were too good for me to keep.

"By these methods I have gotten together an efficient force, one in which there are no jealousies, and every one loyal to a man."

Luck is good, but pluck is better and more to be relied upon.

'PHOTO PLAYS FOR SCHOOLS.

The Plan to Follow the Phonograph as an Aid for Teachers.

(Special to The Talking Machine World.)

Minneapolis, Minn., Oct. 28, 1910.

Having found the use of talking machines in the city schools a decided success, President Elwell, of the school board, is arranging for the installation of moving picture machines in all school buildings having auditoriums or assembly halls.

Descriptive schemes of different countries, geographical subjects and industrial pictures will be shown to the students at stated intervals, and it is believed by Mr. Elwell and the board that the innovation will prove successful.

In a large number of the schools in which talking machines have been installed to teach the children to sing, regular concerts are held, which are greatly enjoyed and are at the same time instructive. The children got their first insight of the beauty and depth of grand opera and were made to understand the selections of the great

singers by the teachers. Lectures are to be given on the motion pictures by the teachers.

TALKING MACHINE LITIGATION.

Two cases of the American Graphophone Co. (Columbia Phonograph Co.), New York, against the Victor Talking Machine Co., Camden, N. J., are on the calendar for a hearing November 15 in the United States Circuit Court, Southern District of New York, before Judge Ray.

The taking of testimony in open court before Judge Hough, Circuit Court of the United States, in the suit of the Victor Talking Machine Co. against the Sonora Phonograph Co., New York, was closed during the week ending October 15. The final hearing will probably be reached this month.

Some merchant in every town has the reputation of being the first to have the new things in his line. If you aren't that merchant, why not be? what's to hinder?

THE TEN EDISON DAYS OF "STORCK OF COURSE"

Originality with a dealer's methods of exploiting his goods never fails to hit the mark. The enterprise in this respect of Frank G. Storck, Red Bank, N. J., president of the Eastern Talking Machine Dealers' Association, is well known, and his latest "stunt" is in keeping with the ways and means he has for keeping the Edison phonograph in the public eye. From August 20 to September 1

the glass, as the cut shows. The record title outward, was high enough to be beyond the reach of the small boy. Imitation cracks were made with common laundry soap. The illusion was a complete success and attracted a lot of attention, twenty different people calling up on the telephone within the first three hours to inquire how it was broken, etc. Another feature of his window that

Mr. Storck inaugurated ten "Edison Days" at his store, and he dressed the windows in a novel way, as may be seen in the accompanying illustration, that attracted no end of attention.

Taking a record he sawed it diagonally across, sand-papered it down smoothly and glued it with ordinary hot glue, one piece on the inside and the other on the outside of the window, in such a manner that passersby would think it was stuck in

came in for its share of attention was one of the first models of Edison machines, made about 1877, on which tin-foil records were used. This can be seen in the lower left hand corner of the window. Photographs of favorite Edison artists were also shown, neatly framed, in this highly artistic effort on the part of Mr. Storck, whose reward, in the way of increased sales and compliments passed, was very gratifying.

TRADE NEWS FROM QUAKER CITY.

October the Banner Month with Philadelphia Talking Machine Men—Some Lines of Stock Difficult to Procure—National Co.'s Wagon Proposition a Success—C. B. Bennett Joins Heppes Forces—National Co.'s Newspaper Campaign—Columbia Co. Report Increase of 112 Per cent. for October as Compared with Last Year—Furby Piano Co. in Wilkes-Barre to Handle the Columbia.

(Special to the Talking Machine World.)

Philadelphia, Pa., Nov. 8, 1910.

October was the banner month of the year in Philadelphia with talking machine houses—in fact, it was one of the biggest months the trade has ever had. It was so large that conditions just at the present moment are very much the same as just before an exceptionally fine holiday business, when the dealers find that they have not ordered sufficient stock and are clamoring for more without results. A shortness of stock in certain lines is a very great handicap just at present, and especially in some lines the factories seem to be unable to get out the machines fast enough. The dealers appreciate that they are putting forth every effort, but feel that something ought to be done to anticipate a situation such as this. I understand that several big propositions, which were started in order to create, or rather boost, trade, have had to be called off because the results were so large that the dealers were unable to deliver the goods.

Naturally the man who is craving for business will be very much dissatisfied with such a condition, but it is far better to be fighting for stock than to see it sitting around to be dusted every day. The kind of dust the dealers are looking for is that which goes into their pockets, not on the machines. I venture to say that the talking machine men of Philadelphia never had such dusty pockets as on the first of November of this year.

Since the first of November there has been a slight falling off, but an early recovery is expected. Some of the dealers attribute it to the agitation over the election, and others to the fact that they usually find a little lull early in November, while people are making up their minds as to just how much money they are going to spend at Christmas, and whether they shall buy now or include their talking machine in their Christmas outlay. Everything points to the biggest holiday business in the history of the trade, and from this on all the dealers will exert themselves to that end.

Louis Buehn & Bro. report an active business. With their new store and basement they are able to handle their greatly increased business with much better ease. They have put on sale the new Tone Resonator, and it has met with the approval of the public. They do not expect the Resonator to take the place of the horn, but they believe it will appeal to a large number of their customers.

The wagon proposition of the National Phonograph Co. has not fully been gotten under way, but the results thus far show that it is a scheme that is going to be productive of much business. While work will be done along this line very shortly, it is not expected that it will be pushed very hard until after Christmas, chiefly on account of the factories having all they can do at present to keep the stores supplied.

Edward Martin, formerly with the Heppes house, has accepted a position with the Buehn Co. D. D. O'Neill, formerly at the Heppes house, is back in Philadelphia and expects to accept a position here in a very short time.

The Heppes have secured the services of Chas. B. Bennett, who was formerly with the sales department of the Victor factory, to be their wholesale and retail sales manager. He is thoroughly competent and has already done some good work for the Heppes. W. J. Elwell will remain as general manager and buyer for the Heppes talking machine department. Mr. Elwell reports a satisfactory business. "The only trouble," he says, "we seem to be up against now is in getting goods fast enough from the factory. Orders that have gone into the factories fully four months ago are only now being delivered, and not as fast as we

SOLID WOOD (NOT VENEERED)

Mr. Dealer!

THE SPRUCE MUSIC MASTER WOOD HORN will do more to interest your patrons in a wood horn than anything you can say.

Their attention is attracted by it. You can explain to your customer that spruce is the same wood that is used in sounding boards of pianos, also in violins.

The horn is the sounding board of a Talking Machine. You wouldn't have a tin sounding board in your piano, nor would you get music from a tin violin.

Should your jobber be unable to supply you, write us and we will send you a sample line of oak, mahogany or spruce disc or cylinder horns on approval.

If you are not satisfied with the merit of the MUSIC MASTER you can return them to us for credit.

SHEIP & VANDEGRIFT, Inc.

PHILADELPHIA, PA.

should like to see them coming in." The Heppes have only thus far been able to get samples of the Nos. 10 and 11 Victrolas, but they are sure they are going to be big sellers.

The National Phonograph Co. have decided to try a newspaper campaign in this city in a little different way than before. They are using The Evening Bulletin and are bringing influence to bear on the dealer to push the goods, and the two insertions already used have been productive of much good. They are furnishing the dealers with some attractive advertising signs, and their Mr. Rinehart, who is an expert decorator, has been in Philadelphia for more than a week, and has been making a number of attractive window displays for the various dealers.

The Penn Phonograph Co. report the largest October business the firm ever had. They are handicapped for lack of machines, but hope to be able to keep up and furnish all orders promptly. Among the recent visitors to the Penn Co. were Mr. Michaeloski, representing Samuel Landow, of Wilkesbarre, Pa., and A. W. Baird, of Osceola

Mills, Pa. Both men report a greatly increased business in their section.

H. A. Weymann & Sons have recently rearranged their talking machine department by removing entirely the partitions to their first hearing room, leaving it open. The main object is to give the customer to the store, where all sorts of instruments are handled, a chance to see at once that they are extensive dealers in talking machines. Their offices are also open. They still have four fine hearing rooms, and they report that their business in October, like that of the other dealers, has been the largest they have ever had.

The Columbia Phonograph Co. state that their business for October showed an increase of 112 per cent. over the corresponding month of last year. There is every evidence of this to the visitor to their store, which always has the appearance of a beehive of industry. They also note that trade all through the State is showing a marked improvement. R. B. Cope, one of their road men, has just returned from a trip through the Cumberland valley, during which he secured some

Are you ready for Christmas?

The Christmas season is the time of all times when a dealer mustn't let his stock get behind. Customers can't wait indefinitely for goods you haven't in stock, and excuses and apologies don't go.

You should aim to have everything in ship-shape for your holiday trade. But no matter how carefully you plan, you're likely to fall short in some places and have to send a rush order to your jobber.

What if your jobber isn't equal to the emergency? Then you're in a pretty fix! You can't put the blame on the jobber—it's your fault for having such a jobber. The people look to you, not to the jobber.

You'll not find us wanting in any particular. Victors, Victor-Victrolas, Victor Records, record cabinets, fiber cases, horns, needles, repair parts and other accessories are here in large quantities and you can get whatever you want whenever you want it.

All orders are shipped the same day they reach us.

Better send now for a copy of our latest catalog and our booklet, "The Cabinet That Matches", and keep them where you can easily refer to them.

New York Talking Machine Co.

Successors to
Victor Distributing and Export Co.
83 Chambers Street New York

very nice orders and opened up some excellent prospects for new dealers. R. B. Robinson, another traveler, is up the State at present and is sending in some very nice Christmas orders.

Manager Henderson, of the Columbia Co., was in Allentown, Wilkesbarre and Reading three days last week, having a little look over the situation. He reports everything very satisfactory. The employes of the store are planning a theater party and dinner on January 4, to finish up the year with a little festivity. Marion Dorian, the treasurer of the company, was here last week on a tour of inspection.

The W. H. Furby Piano Co., of Wilkesbarre, have just opened up a Columbia talking machine department, handling Columbia goods only. The local house sent up to Wilkesbarre one of their expert decorators, who fixed them up some of the finest talking machine departments in Pennsylvania. Mr. Furby reports that he is delighted with it and expects to do a large Columbia business. They report that they are able to get goods from the factory as fast as they want them, and are able to fill dealers' orders within a very reasonable time. They are expecting to get a new Grafonola style this week, and predict it will be a great favorite. About the end of November they expect to get the Grafonola "Mignon" in oak and finishes other than mahogany. The oak will be a regular product. On November 15 they will have a Grafonola concert at Odd Fellows' Temple, and on November 16 will have another concert at the Church of the Transfiguration in West Philadelphia.

THE COLUMBIA IN WASHINGTON.

Making a Great Record in the Way of Sales—The Best Showing of Any Year on Record—Graphophone for Senator Bailey—Dictaphones for Hospitals and Government Institutions—Marion Dorian a Visitor.

(Special to The Talking Machine World.)

Washington, D. C., Nov. 7, 1910.

Marion Dorian, auditor of the Columbia Phonograph Co., General, visited Washington this week and seemed to be greatly pleased over the showing made for the month of October, which is about the normal business of the Columbia's store when compared with that of 1905 and 1906. The sales were more than double that of October, 1909. Mr. Dorian was compelled to remain over a day in order to take up certain matters with H. C. Grove, manager, as he is so busy that they could not get together.

The local Columbia establishment claims to have the services of the best retail salesman in the United States in the talking machine business. This is W. T. Graves, the assistant manager of the store, and he and his team are one of the familiar sights of the national capital. He can be seen any day, winter or summer, with a load of graphophones, and many a sale has he made simply by having the goods exposed, as he drives from prospect to prospect. Practically every fire engine house in Washington has a graphophone which Mr. Graves sold them.

One of the most interesting places where Mr. Graves has sold a machine is in the district morgue. The assistant morgue master and his wife have apartments over the morgue, but they enjoy their graphophones just the same as though they lived elsewhere.

Senator Bailey, of Texas, and Mrs. Bailey, who have just purchased a \$30,000 home in this city, are owners of a BD graphophone and outfit, which they greatly enjoy.

The quickest sale of a Grafonola Regent was made by Mr. Grove a few weeks ago. The Regent was in the window, when a gentleman passing saw it, stopped in front for fully five minutes, came in, asked the price and paid for one, and was out and on his way home in less than fifteen minutes. If there are any quicker sales of Grafonola Regents than this the clever Columbia manager would like to hear about them.

The Columbia store has just been refinished, and a special room has been set apart for the

demonstration of Grafonolas and grand opera records.

The Chesapeake Coal & Coke Co. recently installed ten of the latest style Dictaphones. Herman Pechin, expert court reporter, has just opened an office for himself in the Columbian building and has installed Dictaphones. The Walter Reed Hospital, one of the largest in the South and maintained by the War Department, has recently installed Dictaphones. Two Dictaphones were sold to the Bureau of Ethnology, Smithsonian Institute, which are being used in the field in getting the voices of some of the fast disappearing tribes of Indians.

VICTOR CO.'S VERDI WINDOW

Now Being Sent Out to the Trade Has Won the Highest Approval and Appreciation.

(Special to The Talking Machine World.)

Philadelphia, Pa., Nov. 1, 1910.

In sending out their literature in connection with the "Victor Ready-Made Window Display No. 19"—a Verdi window, by the way—the Victor Talking Machine Co., Camden, N. J., briefly describe it as follows: "A handsome Verdi bust nineteen inches in height is standing on the Victrola. Winged cupids (hand-painted in colors) are crowning the famous Italian with a wreath of roses. Over the bust is the large transparent sign 'Gems from Verdi on the Victor,' flanked on either side by ornamental canopies with cupids holding baskets with flowers on which appears the name of the two complete operas, recorded on the Victor. The rest of the details need little description as the picture tells its own story." Of this portion of their factory, presided over by the artistic Ellis Hansen, the Victor Co. also say they have received "so many standing orders in the last few weeks that we were temporarily swamped in the window display department."

FORGET THE UNPLEASANT THINGS.

"Very often a business man will find fault with the weather, the bad state of trade, the lateness of the season, and work himself into a doleful state of mind. Then he will happen to look over the records and find that the sales are just about equal to the same period of the preceding year or perhaps even a little ahead. The reason is that the unpleasant things that happened last year are forgotten, while the unseasonable weather of today and the slow sales of yesterday loom up very large and overshadow everything else. Then next year the little unpleasanties that worry us now will be forgotten in the work of harvesting the new crop of cussedness."

Of all the cankers of human happiness, none corrodes with such a silent, yet so baneful, an influence as indolence.

The one complete line — Columbia Grafonolas, Columbia Disc and Cylinder Graphophones, Columbia Double-Disc and Indestructible Cylinder Records— with Columbia exclusive selling rights— is a sure profit-giving investment, absolutely safeguarded.

Columbia Phonograph Co., Genl., Tribune Building, New York.

THE TRADE IN CINCINNATI.

Business Shows Steady Improvement and Dealers Are Pleased with the Outlook—Columbia Co.'s Gratifying Report—New Style Victrolas Popular—Talking Machine Dealers of Ohio Meet in Columbus—Aeolian Co. Enlarge Talking Machine Department—Jobbers Urging Dealers to Get in Orders Early.

(Special to the Talking Machine World.)

Cincinnati, November 8, 1910.

Good business seems to have been the portion of the Queen City end of the talking machine world. All the dealers appear to be well satisfied with the results of October and look forward to November and December with a most optimistic frame of mind. There is a general tendency to enlarge the working forces of the large houses. Salesmen were dropped pretty freely last summer, and now the vacancies are being filled.

Manager R. J. Whelen, of the Columbia Phonograph Co., reports business to be fine in every department. In a chat with the writer he said:

"We have about doubled the business of last October, and look for a record breaking business between now and Christmas. The volume of the business has not only been satisfactory, but the class of business has been most encouraging, as the demand has been strongly in favor of the higher grade instruments, Grafonolas and new grand opera records, this demand being higher on the whole than during any previous year.

"The dealers report that it has been the best month they have had this year, and one of the best they have ever had. They are enthusiastic over the complete line of Grafonolas offered them, and the wide field it opens to them. They are making the most of this, too, judging from the numerous orders and re-orders received from them for the Grafonola type.

"We are urging all of our dealers to get their orders in now for their Christmas stock of goods, and many of them have already placed their orders, anticipating their demand. The run on the new \$17.50 BZ Disc Graphophone has been the largest known on any type of Columbia machine put on the market for years, and while we are shipping them out daily and receiving large orders from our factory, we are a month behind on these orders.

The orders received for the new style Victor Victrolas at the Rudolph Wurlitzer Co. are far in excess of the company's expectations, and November and December orders are piling up fast. In the retail department a number of inquiries for the new Victrolas have been received, indicating a large holiday trade in this line. The sales of Circassian Walnut Victrolas and red seal records has also been extraordinarily good. In fact, the whole retail trade indicates that the musical public are interested in the high grade machines and records.

The Retail Talking Machine Dealers of Ohio will hold a meeting in Columbus, Nov. 9, and Frank Mahret, of the Rudolph Wurlitzer Co., has been requested to give a talk on "The Selling of High Grade Talking Machines and Records."

Manager L. H. Ahaus, of the talking machine department of the Aeolian Co., reports that business has been very good for the month of October and, from the present outlook, expects to do a tremendous business for the two succeeding months. They have already sold the samples received of the new style Victrolas and feel confident that the new \$75 machine is going to prove a big seller.

The Aeolian Co. have enlarged their talking machine department, having added two additional rooms on the second floor of their building for the display of the smaller machines.

The talking machine shop of the Lyric Piano Co., on Race street, is under way. Manager Stever yesterday reported a satisfactory start and believes his department will become one of the factors in the local machine world.

At Krolage & Groene's establishment, the successor of Groene & Co., repairs are still under way, but another month will find everything in shipshape condition. The large stock of talking machine goods has been considerably reduced and arrangements made for handling that department on a strictly dealer's basis.

The Milner Music Co. have rung up quite a number of sales during the month, and new blood has been added to the force. W. A. Timmerman, who was formerly in charge of this store, resigning several months ago to accept an offer from the Aeolian Co. at St. Louis, has returned to Cincinnati. He is with the local branch of the Aeolian

Co., helping out in the talking machine department as well as in the sale of pianos.

At John Arnold's store, 507 Elm street, much repair work is coming in which has helped to keep all hands busy. He believes the outlook to be most encouraging.

THE VALUE OF TIME.

One of the most successful men of America, when asked to what he attributed his success, replied, "I built my fortune on the dial of my watch; seconds became pennies, minutes became dimes, hours became dollars. I gave a money value to every tick, and took advantage of everything that economized time. I never procrastinate; I keep my eyes and ears open for opportunities. I don't know that there is any particular rule or law of success, but I'm pretty sure that one of the foundation principles is, 'Don't Lose Time.'"

VALUE OF A WORD OR A NOD.

How easy it is for the merchant or his clerk to give a nod of welcome or a word of excuse to those who cannot be immediately served. The man who has been thus pleasantly greeted and told that he would be attended to in a minute will wait cheerfully, where he might leave the store in ill-humor if his presence were entirely ignored. Just ordinary courtesy costs nothing, but it pays.

VICTOR DAY AT WANAMAKER'S

Inaugurated by Manager Gerson, of the Talking Machine Department, for the Exploiting of the Coming Month's Records—How the Plan is Worked Out—Special Invitations to Talking Machine Owners and Prospects—A Step in Advance.

In the matter of talking machine recitals and concerts, Louis Jay Gerson, manager of the departments in John Wanamaker's stores, New York and Philadelphia, has inaugurated a "Victor Day," in which the coming month's records are exploited for the benefit of the business and is programmed as the "Regular Monthly Demonstration Day." All customers are notified to attend on the 28th day of each month, when the records go on sale. On this day the new records are played for the first time, accompanied by the great pipe organ. The musical program is divided so as to present three separate concerts: A popular concert is given in the morning, the Broadway hits and rag-time music being played between 9 and 11 a. m.; from 11.30 to 1.30 a semi-classical concert is given in which is played a better class of music, and the classical recital is held at 3 o'clock in the afternoon, and for two or more hours nothing but Red Seal records are played.

All talking machine owners and customers of the store interested in Victor records are invited to these recitals. October 28, when the first event of this kind occurred, the average attendance at the concerts was a thousand people and they were very enthusiastic and showed much pleasure at the renditions which were produced on the stage from a Victrola accompanied by the big organ played by Alexander Russel.

Mr. Gerson, in speaking of this innovation, says he feels that this is a step in advance, and a very economical one for the house inasmuch as a great deal of time that is ordinarily spent by the salesman in playing the monthly records is overcome by having as many people as is possible to hear them played at one time. Order blanks are provided and distributed to the audience; in fact, made part of the program and customers are enabled to indicate thereon the records they desire to purchase and at the end of the concert left with the Victor salesman as their order to be filled and delivered. The same thing is being done in Egyptian Hall, of Wanamaker's store in Philadelphia, and it will be continued as a regular feature of the talking machine section.

Another detail that should recommend itself to careful, progressive dealers, originated and intro-

duced by Manager Gerson, is the use of sealed envelopes, whereby every purchaser of a record will receive only absolutely new, perfect and unplayed discs. The sealed envelope keeps the records just as they are received from the factory of the Victor Talking Machine Co., where each one is tested for efficiency, material and workmanship. Mr. Gerson is to be congratulated upon his perspicacity.

BUSY TIMES IN ATLANTA.

Phillips & Crew Co. Now Located in New and Larger Quarters—Atlanta Phonograph Co. to Move to Larger Quarters on Wall Street.

(Special to the Talking Machine World.)

Atlanta, Ga., Nov. 5, 1910.

The Phillips & Crew Co., who for the past twenty-five years have been located at 37 Peachtree street, are now settled in a handsome new five-story building at 82-86 North Pryor street, to which they moved on October 1. The talking machine department under the management of L. V. Webb occupies the entire third floor of the building, and the sales and display room for Victor and Edison machines and records is said to be one of the largest in the South.

The Atlanta Phonograph Co., who handle the Edison line at 10 Walton street, will move into larger quarters at 4 Wall street on November 15, where they will be settled in time to handle the large holiday trade which they expect to develop.

SUCCESS OF THE RESONATOR.

Newest Device to Improve Talking Machine Reproduction Brings Reorders from Many Dealers Who Have Put in Sample Lines.

The Talking Machine Soundboard Co., 110 West Thirty-fourth street, New York, who have been exploiting the Resonator, the sound reproducer built with a spruce soundboard and which takes the place of the horn on the talking machine, report a large and steady demand for that product and the receipt of a number of reorders from jobbers and dealers who have disposed of their sample stocks and realize the possibilities of the Resonator.

The goods are now coming from the factory in large quantities, and the demands of the trade all over the country are being met with dispatch, it being the desire of the Talking Machine Soundboard Co. to have the dealers well supplied with Resonators before the holiday business begins in

earnest. There is no question but that the guaranteeing of prompt deliveries will do much to further the cause of the Resonator.

The details of this new and original reproducer and the work it accomplishes have been described at length in previous numbers of The World, and the trade at large is familiar with the various principles observed by L. P. Valiquet in the designing and constructing of the newest medium for improving the reproduction of the average talking machine. The Resonator must be seen and tested if its virtues are to be fully appreciated.

DECOYED GAME WITH "PHONYGRAPH"

Greenhorn from "Bosting" Surprised Ace Goodhill, the Maine Trapper, by Attracting Geese to Within Range of His Rifle with Talking Machine and Record of the "Honks."

"Talk about your city folks bein' green in the woods! I want to tell ye that it don't allus do for us folks to be too sure we know it all," said Ace Goodhill when he came in this week from Moluncus Lake to get a new pair of moccasins.

Last time Ace was down from the lake he told of the greenest kind of a greenhorn who had joined his party of campers, and the yarns he spun gave the villagers many laughs.

"It was this way," he explained. "That young feller Burt from Bosting who thought a doe was a shee moose when he came into the woods, sot his mind on shootin' some geese, and you couldn't get him shet of the idee. 'I've eat 'em to home,' says he, 'and they're mighty tasty. I would ruther have 'em than anything I knows on,' says he. So there was no other way but to go shoot some.

"But I never seen geese so tarnation wild. Why, after the sports had bang-whanged all around the lake for deer since the opening of the season you couldn't get nigh a goose, and, though we tried it three days we didn't get a feather. I tried all the tricks I knowed, and finally on the fourth day I did manage to wing one and fetch him to the canoe honkin' and squawkin' at a great rate. I was just goin' to put the critter out of mis'ry with the paddle when young Burt spoke up, and, says he:

"Don't kill him till I can git a record o' his voice with the phonygraph," says he. "With what?" says I. "The phonygraph," says he, and begun to paddle to camp like all possessed, whilst I hung to the goose.

"I didn't know what in tarnation he was up to, but he was boss, so I kep holt o' the goose, and it wa'n't long before we got to camp and set the phonygraph to goin' while I prodded the goose to make him honk. Then we finished him for the pot. Wall, I never heard the likes on't. When we sot the machine to goin' it let out the goldarndest honks ye ever heard, and as natural as anythin', and all over the lake the geese began to get up off the water and fly around to see what had happened to one o' their brethren.

"That there'll fetch 'em," says young Burt, and loadin' the machine into the canoe we sot out for the lower end of the lake, where we had a blind amongst the eel grass. We loaded the guns, sot the phonygraph to goin' and laid low. It wa'n't long before all the geese on the lake begun to git up and fly around, answerin' the machine and gettin' nearer and near till they come within range. This was our signal for lettin' flicker, and the way they fell was a caution."

DELIVERY WAGON STIMULATES TRADE.

A new departure in the selling of phonographs in Willimantic, Conn., has been inaugurated by The A. C. Andrew Music Co., dealers in the Edison phonograph. A handsome delivery wagon bearing the name "Edison Phonograph" and The A. C. Andrew Music Co.'s name has been secured, and will be used in canvassing the country districts. The wagon, which is made by the Studebaker Co., of South Bend, Ind., is especially equipped for this business and has a cabinet capable of carrying 540 records and 18 machines.

Make your customers your friends, and especially keep a hold on the old ones.

THE SENECA

☞ Here's the new disc rack equipped with board shelving.

☞ Openings are 3 inches wide, over double the width of our other disc racks.

☞ It is 46 inches wide and 51 inches high. Four shelves for 10-inch discs. One for 12-inch.

☞ Finish in bright or dull copper.

☞ Price is \$14.00, envelopes not included.

☞ "The Heise System" of wire racks is the "last word" in stock carrying systems.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Special to the Talking Machine World.)

Washington, D. C., Nov. 8, 1910.

TALKING MACHINE DIAPHRAGM. William W. Young, Springfield, Mass. Patent No. 973,735.

This invention relates to improvements in reproducing diaphragms for talking machines, and consists of thin, imporous, sheet material having perforations therein, which material may have burs or bosses thereon and a filling and coating in the perforations and on one or both sides, said filling and coating having been hardened by compression and heat. Or, differently stated, it may be said that the new diaphragm consists of thin, perforated material either with or without burs thereon, and if with burs then either with or without them in a flattened condition, and either with or without the filling and coating hardened by compression and heat, the diaphragm in the first case being of one material or homogeneous and in the second case of different materials or heterogeneous.

With the mica and the ordinary sheet metal, reproducing diaphragms commonly used in talking machines, it has not been possible to obtain the best results from such machines, because neither of these diaphragms is capable of producing such results; moreover, the mica diaphragms or discs, which greatly exceed in number the ordinary sheet-metal diaphragms or discs, are very fragile and also expensive, since there is a great waste incident to procuring discs of the proper size and character; the mica discs, too, deteriorate with use.

The primary object of the invention, therefore, is to provide a substitute for mica, ordinary sheet-metal, and other kinds of diaphragms heretofore employed, which substitute is durable and does not deteriorate, is resilient and resonant, is impervious to moisture and unaffected by climatic changes especially when coated, and is capable of giving out clear, loud, and distinct tones of great depth and volume, of evenly distributing the sound waves and making a quick, complete and perfect recovery, and of lessening to a great extent all alien and discordant noises, such as blasts and scratching sounds, which are so prevalent with the ordinary diaphragm.

In the accompanying drawings, which form a part of this application and in which like characters of reference indicate like parts through the several views—Fig. 1 is a side view of a sheet-metal disc perforated and represents the unfilled diaphragm; Fig. 2, a view of a diaphragm as it appears when the burs left by the perforating punch have been upset or pressed into small bosses and when seen from the side upon which such bosses are located, the appearance being practically the same whether said diaphragm be filled and coated or not, provided that, in the former instance, the coating be transparent; Fig. 3, an enlarged fragment in section of the disc or diaphragm shown in the first view, and Fig. 4, an enlarged fragment in section of a diaphragm which has been filled and coated and pressed.

Fig. 1.

Fig. 2.

Fig. 3.

Fig. 4.

AUTOMATIC CUT-OFF AND STOP FOR SOUND-REPRODUCING MACHINES. Wilford G. Altenburgh, National City, Cal. Patent No. 972,794.

This invention relates to an improved automatic cut-off and stop for sound-reproducing machines, and is more particularly adapted to machines using the disc record.

The objects are—to provide a simple, cheap, safe and positive means for automatically raising the needle and stopping the machine at the end of the record, or at any predetermined point when desired; further, it is adjustable to different records and is adaptable to different makes of machines now in use and may be used therewith.

Fig. 1 is a partial perspective view of the sound-reproducing mechanism and showing the automatic cut-off and stop complete as used therewith. Fig. 2 is an elevational view of part of the device assembled. Fig. 3 is a top view thereof.

Figs. 4 and 5 are side views of spindle 20, the one transverse to the other. Fig. 6 is a transverse elevational view of Fig. 2. Fig. 7 is a detail of the arm with the stop attachment thereon, and Fig. 8 a side view of the portion on the sound tube, in connection with the arm and its attachment, showing the sound box and needle in dotted lines after the machine is stopped.

MANDREL FOR PHONOGRAPHS. Henry N. Kistner, Zion City, Ill., assignor to Robt. F. Mueller, Chicago, Ill. Patent No. 973,203.

The present invention relates to a mandrel used in connection with a phonograph, for the purpose of holding a phonographic record. In use, the mandrel is actuated to rotate the record for the purpose of bringing every portion of the record into engagement with the needle of the phonograph.

One object of the present invention is to design a mandrel which will accommodate the record and permit it to be readily slipped thereon and retained in position under various conditions of heat and cold, which varying conditions act upon the substance composing the record to change its size.

Another object of the invention is to form an abutment upon the mandrel to prevent the record from being slipped too great a distance thereon.

A further object of the invention is to form a cushion upon the mandrel, against which the end of the record strikes when it has been forced to the desired distance upon the mandrel.

In the drawings, Fig. 1 is an elevation showing the mandrel in operative position, and showing a portion of the mechanism for operating the needle and mandrel; Fig. 2, a sectional elevation of the mandrel; Fig. 3, a view similar to Fig. 2, showing a record in place upon the mandrel, and showing the abutment formed integral with the body of the mandrel; and Fig. 4, a section on line 4-4 of Fig. 2, looking in the direction of the arrow.

HORN. Edward A. Leet, New York, N. Y. Patent No. 972,003.

These improvements relate to the configuration of sound-transmitting horns and are applicable to various uses, particularly for use in connection with phonographs, gramophones and similar instruments, and are designed to obviate "interference" and harshness, and to modulate and blend the various notes and tones in transit.

The invention consists in the specific construction and arrangement of parts shown, described and claimed, distinguishing features being a concave deflecting surface which is essentially a quadrantal segment in central longitudinal section, situated obliquely opposite the inlet passage with the axial line of the latter in coincidence with the center of said deflecting surface; and in a modulating chamber situated back of and coinciding with said concave deflecting surface, said modulating chamber being formed with one or more openings through the anterior deflecting surface which perform the same function that the nasal passages do for the human throat by increasing resonance and relieving and obviating all tendency to muffle the sound.

In fact, the modulating chamber and its openings through the anterior deflecting surface may be likened to the nasal cavities in that they increase resonance while rendering the timbre more clear and distinct, at the same time neutralizing and counteracting stiffness and harshness emanating from the metallic diaphragm of a phonograph or other source of sound vibration.

In the accompanying drawings, Fig. 1 is a side elevation of a horn embodying this invention; Fig. 2, a central vertical section thereof. Fig. 3 is a section on plane of line 3-3 Fig. 2; Fig. 4, a diagram illustrating a modification.

PHONOGRAPH-REPRODUCER. Harry B. McNulty, East Cleveland, O., assignor by mesne assignments to the United States Phonograph Co., Cleveland, O. Patent No. 972,013.

The object of the invention is the provision of a reproducer for use in a phonograph intended to optionally play upon records having 100 and 200 threads to the inch, respectively, or as they are currently known, "two-minute" and "four-minute" records. The subject matter of this application, it should further be explained, has in the main been divided out of the co-pending application filed November 9, 1908, Serial No. 463,942, wherein such reproducer is shown in conjunction with suitable mechanism for automatically adjusting the same for the two uses in question.

In said annexed drawings: Figs. 1 and 2 are partly sectional and partly side elevational views of a reproducer embodying the improvements in question, with the stylus lever shown in operative and inoperative position, respectively; Fig. 3 is a perspective view of the stylus lever of such reproducer; Fig. 4 is a similar perspective view of a slightly modified form of such stylus lever; and Figs. 5 and 6 are respectively a perspective view and a transverse section of a stud or pin for supporting the stylus lever on the floating weight of the reproducer.

AUTOMATIC CHECK FOR PHONOGRAPHS. John J. Morrissey, White Bear Lake, Minn. Patent No. 973,205.

This invention relates to improvements in automatic mechanism for stopping the motor of a phonograph when the reproducer has reached the end of the record cylinder.

An object of the invention is to provide an extremely simple and inexpensive device of this character

for automatically adjusting the same for the two uses in question.

In said annexed drawings: Figs. 1 and 2 are partly sectional and partly side elevational views of a reproducer embodying the improvements in question, with the stylus lever shown in operative and inoperative position, respectively; Fig. 3 is a perspective view of the stylus lever of such reproducer; Fig. 4 is a similar perspective view of a slightly modified form of such stylus lever; and Figs. 5 and 6 are respectively a perspective view and a transverse section of a stud or pin for supporting the stylus lever on the floating weight of the reproducer.

AUTOMATIC CHECK FOR PHONOGRAPHS. John J. Morrissey, White Bear Lake, Minn. Patent No. 973,205.

This invention relates to improvements in automatic mechanism for stopping the motor of a phonograph when the reproducer has reached the end of the record cylinder.

An object of the invention is to provide an extremely simple and inexpensive device of this character

In the accompanying drawings, Fig. 1 is a side elevation of a horn embodying this invention; Fig. 2, a central vertical section thereof. Fig. 3 is a section on plane of line 3-3 Fig. 2; Fig. 4, a diagram illustrating a modification.

PHONOGRAPH-REPRODUCER. Harry B. McNulty, East Cleveland, O., assignor by mesne assignments to the United States Phonograph Co., Cleveland, O. Patent No. 972,013.

AUTOMATIC CHECK FOR PHONOGRAPHS. John J. Morrissey, White Bear Lake, Minn. Patent No. 973,205.

This invention relates to improvements in automatic mechanism for stopping the motor of a phonograph when the reproducer has reached the end of the record cylinder.

An object of the invention is to provide an extremely simple and inexpensive device of this character

As surely as Constantino, Cavalieri, Bronskaja, Boninsegna, Mardones, Blanchart, Campanari and Bispham draw great audiences to hear them, so surely do the Columbia Grand Opera Records by these self-same artists, draw business to the Columbia dealer. Get Columbia exclusive selling rights and connect this business with your cash drawer.

Columbia Phonograph Co., Genl., Tribune Building, New York.

which may be readily attached to phonographs at present constructed and which may be adjusted to conform to the various lengths of the records which are upon the cylinder.

Another object is to provide a device which will be automatically set in the proper position for stopping the motor of the machine, when the starting lever has been moved to its proper operative position.

A further and more particular object is to provide a controlling lever and support therefor of novel and simple construction.

In the drawings: Fig. 1 is a perspective view of the large size type of phonograph, showing the stop mechanism applied thereto, Fig. 2 is a similar view of a smaller size type of machine, with a slight modification of the device, Fig. 3 is a detail view of the controlling lever, comprising the invention.

TRIMMER FOR PHONOGRAPH RECORDS. John David Rockhill, Conrad, Ia. Patent No. 974,435.

This invention is designed to be used in the nature of an attachment that may be readily, quickly and easily attached to or detached from an ordinary phonograph in place of the cylindrical frame that contains the reproducing instrument.

The object is to provide a trimming device of this kind, of simple, durable and inexpensive construction that may be readily and quickly adjusted to trim off the records to any depth of cut desired; and, more specifically, it was the inventor's object to provide a cutting tool of such shape and size as to trim a phonograph record without chipping or breaking the record, to thereby properly prepare a record for use in such a manner that its surface is well adapted for receiving impressions.

This invention consists in the construction, arrangement and combination of the various parts of the device, whereby the objects contemplated are attained.

Figure 1 shows a central, sectional view of a device embodying this invention, the cutting tool being shown in engagement with a portion of a

phonograph record. Fig. 2 shows a sectional view on the line 2— of Fig. 1, and Fig. 3 shows a perspective view of the frame for holding the trimming tool.

RECORDS FROM NEW MATRICES.

Geo. W. Lyle, general manager of the Columbia Phonograph Co., General, recently sent the trade the following:

"In order to keep our records up to the highest standard of present-day recording, we frequently remake matrices of selections that were recorded some time ago. We have remade the following selections. Records from the new matrices will be in product very soon—10-inch: 354. 'Die Wacht am Rhein,' played by Columbia Band. 417. 'Handicap March,' played by Columbia Band. 4095. 'National Guard March,' played by Prince's Band. The foregoing selections are included in the following double-disc records: 354, A60, 417, A33, C83, 4095, A704."

END OF DUPLEX PHONOGRAPH CO.

Affairs of the Company Now Officially Closed Up—Creditors Secured but 20 Per Cent. of Their Entire Claims.

(Special to The Talking Machine World.)

Detroit, Mich., Oct. 30, 1910.

The sequel of the order of Judge F. E. Knapen, of the U. S. Circuit Court in Kalamazoo, Mich., compelling the Duplex Phonograph Co., of this city, to discontinue business was revealed this week. The Duplex Phonograph Co. were doing a large business and were backed by wealthy men and had a strong financial rating until the Victor Talking Machine Co. secured an injunction in the circuit court restraining the Duplex Co. from infringing upon their patents, which later was made permanent. This order threw the company into the hands of a receiver and Charles Q. DeFrance was appointed receiver and E. J. Phelps trustee by the court. Mr. DeFrance and Mr. Phelps asked the court last week to grant an order closing up the affairs of the company and the order was issued. Despite the fact that previous to the injunction being issued the company was on a good solid financial basis, the receiver and trustee reported to the court that there was no money to pay the unsecured claims, and creditors under the bonds and

mortgages of the company secured but 20 per cent. of their entire claims. The company's indebtedness was placed at \$45,000 and but \$9,000 was secured by the sale of the property belonging to the company, and this was devoted to the partial payment of the secured claims.

RECORD FOR RAPID DELIVERY.

How V. W. Moody of the New York Talking Machine Co. Scored in Setting Up an Auxetophone in the Talking Machine Department of Gimbel Bros. in New York.

A new record for the rapid delivery and setting up of Victor Auxetophones was scored last week in connection with the talking machine department of Gimbel Bros. J. H. Dodin, manager of this department in the big new store, telephoned at 3 p. m. the other day to V. W. Moody, of the New York Talking Machine Co., asking to have an Auxetophone delivered, set up and playing that same afternoon. Mr. Moody got busy with C. P. Chew, of the Victor Co., who happened to be on the spot, and with A. H. Dodin, the New York Co.'s Auxetophone expert. Although Mr. Chew had to travel to the other end of town to expedite the delivery of the machine's motor, the Auxetophone was delivered, set up and started playing at 4.45 p. m. that same day. If this is not a record, we should like to be shown.

HANDLING COLUMBIA LINE.

A. G. Rhodes & Son, who opened new stores in Macon, Ga., and Pensacola, Fla., have places also in Augusta, Ga., Tampa and Jacksonville, Fla., and Chattanooga, Tenn., in all of which they carry extensive stocks of the Columbia Phonograph Co.'s product. George P. Metzger, manager of the Columbia Co.'s advertising bureau, prepared the opening announcements in the local papers for the Messrs. Rhodes, in which they used full pages in two of the dailies, and in acknowledging their indebtedness for them they say: "I wish to thank you very much for those two nice ads that you so very carefully and efficiently prepared for me to use as our opening ad and I used both of them just as you sent them and made no change whatever in their construction. The responses from these ads have indeed been gratifying."

CAN'T SELL BELOW STATED PRICE.

John Rawling, Scranton, Pa., has been restrained from selling Edison goods at less than established or contract prices by Judge R. W. Archibald, of the United States Circuit Court, Middle District of Pennsylvania. The motion for a preliminary injunction was argued Oct. 31 by counsel for the National Phonograph Co.

The talking machine department of Chas. H. Ditson & Co., in charge of John J. Wood, is making a fine record of sales for so early in the season. Mr. Wood says he expects a tremendous holiday trade.

WIN PRIZE WITH FLOAT.

Junction Phonograph Co. Have Elaborate Float in Industrial Parade in Jersey City—Feature the Victor.

In the industrial parade in Jersey City, N. J., which was one of the events during the recent

JUNCTION PHONOGRAPH CO.'S HANDSOME FLOAT.

elaborate celebration of the 250th anniversary of the settlement of Bergen County, the Junction Phonograph Co., who handle the Edison and Victor lines at 492 Communipaw avenue, won special mention from the judges and a prize for their handsome float, pictured herewith. One of the features on the float that appealed to those who watched the parade was a Victor machine, which was kept busy playing appropriate airs throughout the line of march.

SONORA PHONOGRAPH CO.'S DOUBLE SIDE RECORD LIST.

- NOTE.—A, b, refer to same record.
 10-Inch.

BE A MASTER OF TIME.

Never allow yourself to say "I ain't got time," not because it's ungrammatical, but because it shows you're not a master of time. The thing to do is to make time.

Get right onto the job assigned you with both feet. Don't putter. Don't weigh the "ifs" and "ands" till they're a ton. Tackle them when they're in the ounce scale.

Saying you "have no time" puts you in third class, and third-class fellows aren't called upon in emergency cases. You have time. That's the way to talk, and carrying that principle out will make a man of you.

THOS. H. MACDONALD IN WASHINGTON.

Thomas H. MacDonald, general manager of the Columbia Phonograph Co.'s factory in Bridgeport, Conn., and an inventor of note, was in Washington, D. C., last week to attend the funeral of a relative. Mr. MacDonald was a visitor to the Washington store.

Orton Brothers, of Butte, Mont., have given over a large portion of their store to talking machines exclusively. The new department has been very tastefully arranged, and the instruments shown to decided advantage.

The TALKING MACHINE WORLD

AND
NOVELTY
NEWS

Published Each Month by Edward Lyman Bill at 1 Madison Avenue, New York, December 15, 1910

The best-known trade mark in the world

“The Victor talking machine’s design, ‘His Master’s Voice,’ has become a household word, and the quaint little fox terrier at attention before the horn is familiar to more Americans than any of the world’s great masterpieces.”—COLLIER’S, May 22, 1909.

THE PLEASURE
DOUBLED

THE COST
REDUCED

"ON SPEAKING TERMS"

ZON-O-PHONE

10 inch
65c.

DOUBLE RECORD DISCS

12 inch
\$1.00

Zon-o-phone Records are pre-eminently the BEST that money, brains, and a thorough knowledge of the art of sound recording can produce.

They are justly famous for their remarkably clear, natural tones, absence of scratch and wearing quality.

The greatest care is exercised in combining the selections, each side of the disc presenting the latest and best in popular music or standard compositions. No extra charge for copyright selections.

ZON-O-PHONE INSTRUMENTS
from \$20.00 to \$75.00

\$50.00, \$60.00 and \$75.00 Machines all equipped with Wood Horns.

Zon-o-phone Records will stand comparison with any make. A trial will convince you.

WINDOW DRESSING HINTS

Should Be Absorbed Whenever Possible—No One Brain Can Hold All Such Knowledge.

There are some window dressers following the profession who will not take suggestions from any one. On the other hand, there are trimmers who are constantly soliciting them, and will take them from any one. Sometimes suggestions are offered, then again through a conversation with a friend, some remark will be passed that is suggestive and the wide-awake trimmer, developing the idea, will make a record-breaking, fine window, according to W. M. Sickle, who ranks as an authority.

The old saying that "we are never too old to learn" applies right here. Sometimes a suggestion from a child, properly developed and worked out by a professional trimmer, will produce a most original display. The trimmer who is afraid to follow some one else's suggestion, for fear of losing the credit of the work, is usually the man who puts up a symmetrical, rigid window and never strikes a pictorial design. The largest stores of to-day are composed of departments, with one man in charge of each department. These men work together for the benefit of the firm.

There is no large firm that would depend wholly upon one brain, to decide its most important matters. This is one good reason why a live trimmer in charge of a set of show windows, should be on the lookout for all the suggestions he can get and use all the brain power he can command to make his windows attractive and effective. The show window is the best salesman that any firm can procure when properly dressed.

TALKERS IN ATLANTA SCHOOLS.

Large Machines Placed in the Hallways, Which Play the Music for the Children to March by—Prove a Great Improvement Over the Drums Formerly Used in School.

The times are getting mightily fast and progressive these days. What was speedy a few years ago is now as slow as a funeral. It doesn't require a far stretch of the imagination to conceive an army of soldiers charging into battle to the stirring rhythm of a popular march as played on a talking machine.

And especially is it not hard to imagine such a thing when you figure that right here in Atlanta to-day, says the Journal, they are using talking machines for the school children to march by, instead of the old-fashioned, though admittedly excellent, drum.

The idea was conceived by Mrs. Thomas, principal of the Luckie street school. She gave it a try-out about a month ago, and it worked so fine she's been using it ever since. And now it's been taken up by Miss Stamps, principal of the Edgewood school, with results thus far so encouraging that it will certainly continue in use. Miss Stamps was particular about giving Mrs. Thomas credit for originating the idea, but admits that on taking it up she varied it a little, using the cylinder instead of the disc machine.

The children in Luckie street school have been hiking upstairs and downstairs and in general about the building so long to talking machine music that now the novelty of the thing is worn off, and they go about it in a perfectly matter-of-fact way.

But out at Edgewood it's a little different. They've not had it so long. Friday Miss Stamps tried four different marches, to discover which has the best "beat." A piece called "College Days" is the favorite at the Luckie street school.

Good-sized machines are used. They are placed in the hallway, so that when class room doors are opened they can be heard by all the pupils. When "take in" bell rings in the morning, marching out and in from recess, and at dismissal time in the afternoon, the machines are started up. It takes

about three minutes for all to get out, or in, which is well inside the limit of one record.

The children "catch on" to the time of the music right away, say the principals, and march a great deal better by it than by the drums. When marching to quick, snappy march music they have a natural disposition to stand erect and walk with vigor and precision.

The talking machine above referred to is a BNW Graphophone and records sold by Manager Terhune, of the Columbia store in Atlanta.

FREDERICK CO. HAS THE VICTOR.

The Prominent Piano House of Pittsburg Places Initial Order with the Standard Talking Machine Co. for Records and Machines.

(Special to The Talking Machine World.)

Pittsburg, Pa., Dec. 4, 1910.

An important addition to the talking machine dealers of this city is the W. F. Frederick Co., who have opened an exclusive Victor department, occupying the entire first floor of their magnificent building in this city.

J. C. Roush, of the Standard Talking Machine Co., was fortunate to secure the initial order, which amounted to over \$3,000, and it goes without saying that as W. F. Frederick has a tremendous following in this territory, built up by his straight-forward methods of doing business in the piano field, this order will be followed by many.

A feature of the Frederick building is a magnificent recital hall where Victor concerts will be given every afternoon and evening. Special booths of solid glass are being erected and the entire equipment will be undoubtedly one of the handsomest in this city. With their great line of piano customers they start out with a roster of prospects perhaps unequalled, and are going to do a large volume of business.

THE TEST OF RELIABILITY.

One Merchant Finds Advertising Value in Portraits of Old Customers.

One Western merchant is proving the reliable character of his store and the goods he carries by publishing in his advertisement each week a photograph of one of his patrons who has long traded at his store. For example, Mr. Jones' photo picture appeared in the notice and the accompanying reading was to the effect that "Mr. Jones became one of our regular customers in 1890. If the treatment accorded Mr. Jones was not satisfactory he would long ago have ceased to be one of our patrons. It is quality, reasonableness in price and our uniform courtesy to customers that has gained for us a large and continued patronage. Our customers are our best advertisement. If we have treated Mr. Jones right for twenty years, don't you think our store is a pretty good place for you to patronize?"

TALKING MACHINE AS TEACHER.

Geo. Nelson Holt, a Prominent Teacher, Finds It a Valuable Aid in His Work.

A much disputed point of view among musicians is the use of the mechanical reproducer of the human voice in relation to the student, but a phase of the subject which does not seem yet to have made itself felt was recently suggested to the editor of this paper by a well qualified and quite disinterested vocal teacher, George Nelson Holt, who placed the matter in an altogether different light than previously had been noted. Mr. Holt is an American teacher, who is evidently guided by no other motive than the securing of the best possible results from his teaching. Asked as to the reason he should need to acquire for his studio a talking, or rather singing, machine, he replied that it prevented considerable argument, for every teacher knew how

prone pupils were to argue the matter of interpretation, suggesting that Mme. Schumann-Heink phrased in such and such a way, that Mme. Gadski took breath differently, and that Mme. Melba made certain alterations in a song, or it might be that Miss Farrar hurried the tempo more effectively, and so on ad infinitum, as some of the professional students are wont to do. As a silencer of argument then, says the Leader and Concert Goer, Mr. Holt employs the mechanical device which reports accurately the songs of certain singers and he says that he finds it most helpful as a practical illustration and for proving the accepted interpretation.

AFTER THE HOLIDAYS, WHAT THEN?

December Not the Only Month in the Year—Why Not Put Forth Special Efforts and Make Every Month a Holiday Month?

Generally, at about the end of August, there begins the annual speculation as to what the holiday business will amount to. If business is good in the early fall the dealers begin to worry about getting stock to meet the great demand that must surely materialize at Christmas time; if, on the contrary, business is bad at that time they seem to take the stand, "Oh, well, we'll make up for this later," and stand pat.

Why should such a condition be allowed to exist in the talking machine trade? The dealers are not selling Christmas trees or ornaments for same, but are handling a product that should be and is salable every month in the year. With the emphasis put on the Christmas trade one is led to ask, After the holidays, what then? Does the dealer plan to lie dormant until the next fall, or just keep right on expanding his business throughout the balance of the year.

It is safe to say that at least 75 per cent. of those who observe the custom of giving Christmas presents have to so divide their money, in order to buy presents for many different people, that they are not in the position to buy a high-priced talking machine for any one present. As a matter of fact, they are much more likely to buy such an outfit between the holiday seasons, for their purses will better stand the strain and they are more easily approached by the salesman.

It is quite the proper thing, of course, to bend special energies toward getting all there is out of the holiday trade, for there is naturally a great deal of extra business lying around for the talking machine men, but that display of energy should not sap all the enthusiasm that should spread over all the year. Try making every month from January to December, even the "dead" mid-summer months, a holiday season—the results will make the effort worth while.

It will make a fine New Year's resolution.

PHOTOGRAPHS THE VOICE.

French Physicist's Invention Tells When a Note is Pure.

Voice photography is the invention of a French physicist, Dr. Marage. He says it will be of enormous value to orators, actors, singers and, indirectly, to musical critics. The sounds strike a small disc of india rubber, the vibrations of which are minutely and exactly reproduced on a small mirror. A ray of light is thrown on the mirror, which reflects the vibrations at various angles. A sensitive film unwound by clockwork receives the impression of these reflections. The picture, according to the inventor, will indicate whether the singer's voice be true, whether his tempo be correct, and whether his method of breathing be right.

A true note is shown by a series of parallel and equal bands, while a wrong note produces a rough, irregular impression. It is suggested that pocket voice cameras will be of great use to persons of a critical turn of mind who are fond of going to the opera.

A GREAT EDUCATIONAL FACTOR.

How the Modern Talking Machine Has Developed in That Field—What It Means to the Student in This Age of Time Saving Methods—Permits of the More Thorough Study of Music in the Schools—The Interesting Address of Mrs. Frances E. Clark, Supervisor of Music in the Milwaukee Schools, Given Before More Than 1,000 Teachers Recently Arouses Enthusiasm.

During the annual convention of the Wisconsin State Teachers' Association, held in Milwaukee, Wis., a short time ago, Mrs. Frances E. Clark, supervisor of music in the Milwaukee schools and prominent throughout the Teachers' National Association, gave an address before more than 1,000 teachers on the development of the talking machine as an educational factor. She said:

"This is an age of great things. The last century was the most wonderful in all history in the invention of mechanical things—ways and means of doing the world's work in a better, quicker and more sanitary way. What the present century is to be is a very large interrogation point. Certainly not so great as the last in invention, but greater in the results that must come from those inventions. Many religious believers think that this will be the dawning of the millennium—a reign of 1,000 years of the domination of right over wrong, of Christian love and brotherhood.

"Music enthusiasts believe that music is but now entering upon a second renaissance, and that our own America shall be the mother who will bring forth the geniuses of the new age; and our own land and our own true hearts the cradle that shall shelter and nourish the infancy, youth and manhood of the coming kings of songs.

"If this is to be true in even a partial sense, we of the public schools must of necessity assume, whether we will or no, the responsibility of fostering the musical geniuses of the nation. Somewhere in our schoolrooms of to-day are sitting the prodigies, artists and composers of the next decade. What are we doing to make it possible for them to find themselves? What are we doing to prepare an intelligent, music loving and discriminating public to receive and recognize the fruits of the genius when they appear?

"If music is to become the great force of the uplifting of this American people that I firmly believe that it will become, it must be brought about by the next generation knowing more about music and knowing more music itself. School music has taken on a national aspect—not merely the teaching of a few children to sing small repertoire of commonplace songs, but a thorough grounding in the fundamentals of reading music, and a taste and love for the best music in the world—and education of all the people is musical art, which spells a very real 'Musical America.'

"This is an age of rapid change in educational ideas. The standard of twenty years or ten years ago are obsolete—music is not an exception to the general rule. We are all growing, and growth means change—an assimilation of material things around us. We are all changing our methods and our standard year by year. Things that we honestly believed ten years ago, even five years ago, are some of them fading into insignificance because of the coming of newer and better ideas. A few years ago we were all striving to emulate the ideas of Lowell Mason, Luther Whiting Mason, Holt and Jepson. Their work was epoch-making for their time, but were they alive to-day those pioneers with their active minds would be miles away from their own standpoints, and we, too, must move on.

"For many years the battle has raged in school music circles as to how much time should be given to the development of the cultural songs and how much time to the teaching of fundamentals of theory and sight reading. Arguments pro and con have been offered on many a platform, and defenders of either side have waxed warm in conflict for their own particular hobby. Our courses of study are so crowded that only a small portion of time can be given to music. How to get the most out of this small portion of the day is the problem

of the supervisor. A wide experience in song is essential and a thorough knowledge of sight reading is absolutely indispensable. School music must stand or fall by the amount of power given the children going out from us to help themselves to get the things in music that they need for their life enjoyment. We must have the largest possible number of the beautiful songs of the world and yet must in some way find time to thoroughly teach the principles and practice of sight reading.

"Modern science has come to our relief in the perfecting of the talking machine. It is necessary to reconstruct our old ideas of the wheezy, blaring, blatant, brassy thing we have known in the days agone. The new talking machine with its wood horn, its bamboo needle and the wonderful records obtainable is a joy and delight—an artistic success. It has come to be an added power in teaching music in the school, conservatory and the home.

"The old was almost wholly given over to the lower class of music—the coon song, the ragtime, the cheap popular song heard in saloon and dance hall. The new talking machine is eminently respectable and worthy of a place as an educational factor in every school in the land. By its aid we can bring to the hearing of children thousands of the best songs of the world. It brings within our reach literally hundreds of the great things which are impossible otherwise for children ever to hear, save perhaps a few in the large cities. It furnishes the key to half our difficulties, in that it is possible to illustrate for teaching purposes every kind of tone, voice, instrument, style form, phrase and expression. By the use of the machine we may enjoy opera, oratorio, orchestra, band, violin, 'cello, folk songs and ballets over and over again as many times as we like. We may teach the beautiful old folk songs and ballads from the records of the prima donnas, whose voices thus become as familiar as their names.

"In many schools where the supervisor is unable to sing well, or where the work must be done by the grade teacher, who often possesses a most unmusical voice, it is a priceless boon to thus be able to teach the songs correctly. We may speak of head tone, but the children do not understand by telling; but let them hear a pure head tone as given by Melba or Sembrich, and it becomes clear. We speak of the opera—children have never heard opera—their parents perhaps have never heard opera—they do not understand what we mean. But give to an eighth grade or a high school chorus the story of 'Il Trovatore' or 'Ernani,' then turn on the record as sung by our great artists,

arias, choruses, duets, orchestra and all, and the whole subject is illuminated.

"In our rural schools, villages and smaller cities it is impossible for children of even high school age to hear more than an occasional artist. The great singers do not visit smaller places. What then must it mean in the education of the youth of our land to be able to bring into every eighth grade and high school, no matter how remote from the great art centers, the reproductions of the voices of the greatest singers the world has ever known.

"We are only just beginning to realize the possibilities that lie in a talking machine as a power of education. The talking machine was not invented for the public school, but so boundless seems the horizon in this particular field that soon it must become the great purpose for which it continues to exist.

"Music has no superior in the entire curriculum in its power to reach the innermost springs of life in the growing boy or girl. This power can be measured by the amount and kind of music that he is able to hear and enjoy, and his skill and joy in giving again the music that he knows. The coming of the talking machine marks an epoch in the teaching of music in all schools. If the supervisor is wise, she will not hesitate to call to her aid such valuable assistance. Lest we fall under the condemnation of again talking about music, rather than hearing the music itself, we will listen to the records illustrating certain points, most of which have been used in our schools.

"We have the talking machine in nearly thirty of our schools. They are giving entire satisfaction to the teachers and principals. The children have heard since their introduction last January more fine music than they ever dreamed was in the world before. We are using it as an important factor in social entertainment work. The parents in many districts come into school for an hour's concert in the evening, followed by dancing, under proper chaperonage—the music being given by the machine.

"As yet there are few records made of songs suitable for classes lower than grammar grades. The need of having records made for songs suitable for kindergarten and primary classes is immediate. Could we have records of the little classics of child words it would fill the same place in the lower grades that it is now doing in the grammar grades and high schools.

"The children are deliriously happy when permitted to come to the assembly hall and sit down

(Continued on page 6.)

We Are In Readiness for the FALL and WINTER RUSH

? ARE YOU?

Prepare now to be in a position to deliver the goods and take the profits. Don't delay.

You know what it means to say to your customer "I haven't it in stock, but will get it for you"—the other fellow gets the order. Our stocks of VICTOR and EDISON GOODS mean quick deliveries to you, and profits to both of us.

THE EASTERN TALKING MACHINE CO.

177 Tremont Street

BOSTON, MASS.

DISTRIBUTERS OF EDISON AND VICTOR MACHINES, RECORDS, SUPPLIES

Victor "quality" is the thing that counts

Quality is the backbone of Victor success and Victor supremacy. Don't overlook that point.

Remember these two important facts:

The Victor is an instrument of quality—a perfect musical instrument. Victor Records are works of art—musical masterpieces.

The dealer who constantly emphasizes these things puts his business on a higher level and makes the most money.

So take advantage of these vital facts to increase your prestige and add to your profits.

A Merry Christmas and good business throughout a Happy New Year to every man who handles the Columbia line and to every man who ought to—and that doesn't leave anybody out.

Columbia Phonograph Co., Genl., Tribune Building, New York.

A GREAT EDUCATIONAL FACTOR.

(Continued from page 4.)

for a concert from the machine. They become so discriminating in their tastes and learn to love the finest things as they hear them again and again. We select the records with infinite care and only the very purest and sweetest music is permitted to be heard.

"This is a new movement, but already the results are so wonderful that we find ourselves amazed at the influence. What the near future may develop in this field is as yet unguessed; but one thing is sure, the talking machine has come into the schools to stay, and has already proved itself to be a wonderful ally to the musical, cultural and social phase of school life."

HARMONY IN THE STORE.

Each Salesman Should Aid in Making the Store Atmosphere as Cheerful as Possible.

It's up to the salesman to make a cheerful atmosphere about the store as much as for the boss. Probably the proprietor has more to ruffle him up than we boys do, and I know that nothing is appreciated more by the boss than to help him over the blues in the morning. It's also a good plan to agree with him at times when you cannot agree with yourself in doing so. For instance, if he sees merit in an article which you (the clerk) cannot, it pays at times to agree with him and advise purchasing; then when the article arrives good sell it. That's making good.

Courtesy to all customers is imperative, but courtesy between proprietor and clerk is also absolutely necessary to the comfort and prosperity of the business, says F. E. Cross, in the Hardware Dealers' Magazine.

It's wise to take the affirmative view of things. Arguing against the policies of the boss is very uphill work. If you do not agree inwardly do so outwardly and then find a good way out of the difficulty you know you are stepping into.

It costs high to live nowadays, and if one is obliged to ask for more pay it should be done in the most courteous way. No demands, no threats, simply: "Do you feel I deserve a raise this season?" is sufficient. "I will accomplish much more than: 'You must raise my pay this season; I have another place in view.'" Chances are you'll view the other place and see your error perhaps too late.

The clerk that buys his customers with discounts and cigars is less substantial than he who spends a moment's time with instructive and pleasant conversation with his customers, though oftentimes the customer thinks he knows more about the article than the clerk; in this case simply show him the goods (naming prices as you go) and tell how smart you think he is.

'PHONE AND PHONOGRAPH COMBINED.

A telephone line provided with phonographic transmitting and receiving apparatus has been installed in London. The object of this innovation is to make it possible to send a telephone message

to a person who is not at the moment within reach of his telephone. The person called finds, on returning to his home or office, a phonographic record of the telephone message which was sent during his absence, and his phonograph reproduces the message from the record. This result was sought and obtained, in principal, by Poulsen, the Danish physicist, who has perfected the method of producing sustained electric waves by means of the singing arc. Poulsen's telegraphone, which was exhibited in Paris in 1900, is an electromagnetic phonograph which can readily be applied to the registration of telephone messages. The record is made on a ribbon of steel, which moves between the poles of an electromagnet and receives and preserves a magnetic impression of the words spoken into a microphone connected with the electromagnet.

BOGGS & BUHL'S NEW MOVE.

The Prominent Department Store at North Side Becomes Victor Dealers—Buys Stock from the Standard Talking Machine Co.

(Special to The Talking Machine World.)

Pittsburg, Pa., Dec. 3, 1910.

Boggs & Buhl, the large department store at North Side, this city, have opened an exclusive Victor department, which is under the management of Mr. Phelps. The initial order for stock, amounting to \$3,000, was secured by the Standard Talking Machine Co., of which J. C. Roush is treasurer. This establishment is one of the leading concerns of its kind in this territory, and has over seventeen thousand charge accounts. The new Victor department is located on the second floor, and is handsomely fitted up with soundproof rooms and attractive furnishings.

SINGS AT HIS OWN FUNERAL.

Records Made by a Cobbler Used at His Burial Services.

Pietro Ficco, a shoemaker and amateur musician, and very fond of a phonograph, which was his first purchase with his savings, sang at his own funeral. Ficco died at the home of compatriots with whom he boarded in Washington. Unable to afford a funeral with song, as he could have obtained in his native village in the Abruzzi, he requested that his phonograph be utilized in the service.

Ficco owned several records, with "The Angels' Serenade" and Gounod's "Ave Maria," sung by himself, and these, the only two in the repertoire considered desirable for so solemn an occasion as a funeral service, were used. The phonograph and seventy-two records will be sent to his aged mother in Italy.

THE FACE OF THE STORE.

One of the most important advertising mediums for a retail dealer is the show window. It is the face of the store. The chief means you have of judging a person is by his face. It is the index of character. Strength or weakness, firmness or vacil-

lation, good or evil, purity or lewdness, intelligence or ignorance, kindness or harshness, gentleness or roughness, confidence or doubtfulness, success or failure are all stamped thereon, and you are instinctively attracted or repelled. You like or dislike a person by the impression made upon you by his face. It is just the same with the "face" of the store. It advertises you and your business, whether you display any goods in your window or not, whether your display is good or poor. It is in your window that you can demonstrate what kind of a merchant you are, and you will be largely judged by what is done or what is not done therein.

TALKING MACHINE DEALERS MEET.

Hold Extra Session in New York and Discuss Various Matters of Interest to the Retail Talking Machine Trade.

The Eastern States Talking Machine Dealers' Association, whose regular meeting on November 12 was poorly attended, owing to the day being a legal holiday, held another meeting on November 16 at the Cafe D'Or, New York, at which President Frank C. Storck presided, and at which the attendance was large. As usual, the meeting was full of interest for the members, who entered into a lengthy discussion of trade problems and various matters directly affecting the retail talking machine business. Opinions, unfavorable as a rule, were expressed regarding the present systems in vogue of cutting down excess stocks of dead records, and a resolution was passed suggesting that the manufacturing companies refrain from advertising new styles of machines to the general public before they are in a position to meet any sudden demand of the dealers for those particular styles of machines. Following the regular meeting the executive committee went into private session to decide upon several association matters pending and to pass upon the applications of a number of dealers.

The membership of the association is growing rapidly and some of the most representative dealers in the Eastern States are being drawn into the organization. The next meeting of the association will be held at the Cafe D'Or, on West 24th street, near Sixth avenue, on the second Wednesday in January.

WHAT TO BUY, AND WHEN.

The knowing when to buy, what to buy, and how much to buy, cannot be taught in books, but the beginner in business can teach himself a lot by keeping his eyes open, his memory alert, and his judgment at work.

The ideal way is to buy just enough to keep ahead of the demand, but not too far ahead. The proper thing, of course, is to push the demand so that it shall become greater and greater. And the surest way to increase the demand is to increase the variety of goods carried. "This is more necessary," declares a dealer, "than to increase a stock of goods already introduced. As one increases his capital, he should also increase his knowledge."

TRADE ON THE PACIFIC COAST.

November Business Most Satisfying to Talking Machine Dealers—Holiday Buying Commences Early—New Models of Machines Prove Popular—New Stores Covering Outside Trade Thoroughly—Wholesale Houses Rushed with Business—Wisdom of Placing Factory Orders Early—Advertising Increases Sales—Sherman, Clay & Co.'s Excellent Report—L. F. Geissler a Visitor—Babson Bros., of Chicago, Enter Local Field—Open Retail Store and Will do Mail Order Business—What the Various Houses Are Doing.

(Special to The Talking Machine World.)

San Francisco, Cal., Dec. 1, 1910.

Whatever was lacking in the local retail trade for the month of October has been fully compensated for by the November business. Holiday shopping has commenced unusually early this season, and a steady improvement has been noted throughout the month, the volume of sales since Thanksgiving being exceptionally large. Money seemed to be scarce during the summer and early fall, but at present people are spending freely, and if December keeps on as November has ended the season will be one of the best ever experienced in this city. All the dealers have for some time past been placing their strongest efforts behind the higher priced machines and records, and this work has been rewarded by an enormous demand, so that in some lines it is not always easy to get sufficient stock. The business in lower priced lines, however, keeps fully up to former records, and there is no doubt that this class of goods will continue to find a ready market. In the way of machines, the greatest promise seems to lie in the new models of high class articles, designed to sell at a little less than the earlier models of really expensive machines, which are reaching a class of trade which formerly purchased medium-priced goods.

The outside trade is now settling down for the last stretch of the season. During the early fall many new stores and agencies have been opened all over the State, and the territory is probably covered more thoroughly and efficiently for all the leading makes of talking machine goods than ever before. Some of the most promising stores are in places not well developed in the past, and in such localities new goods are a great attraction. The dealers are well supplied with stock at present, and arrangements for handling the remainder of the year's business are about complete. All reports from outside indicate a highly satisfactory condition, with excellent prospects for the holidays.

The local wholesale houses report an enormous demand, more stock having been delivered than ever before for November, but stocks are in good condition and there will be no difficulty in filling all late orders that come in. Owing to the extent to which both retailers and jobbers placed their orders early, this has been an unusually satisfactory jobbing season from every point of view, and the demonstrated wisdom of anticipating requirements as far as possible will doubtless have a marked effect on methods followed in future. There is, of course, a possibility that the wholesale movement this month may drop off, but this is not now considered likely. The only ground of complaint with the jobbers is their inability to get adequate, and in some cases any, supplies of new lines which had been anxiously awaited. This is a serious disappointment, and will probably delay some business, which would otherwise have come out before Christmas.

A feature of this year's work in the Victor line has been the effect produced by the literature of the Victor Co. urging its dealers throughout the country to order in advance. This suggestion has been generally adopted in California, and is largely responsible, according to Andrew G. McCarthy, of Sherman, Clay & Co., for the fact that their wholesale business last month showed a gain of 75 per cent. over the same period of 1909. Mr. McCarthy also reports an increase of over 30 per cent. in the retail trade of the home store, and altogether the best month this house has ever had, exceeding even the Christmas trade of former years. He says it

has been necessary to place a number of extra wagons in constant service to take care of the deliveries. Mr. McCarthy anticipates a big increase in the retail end this month, and believes the wholesale movement will be fully maintained. Only one shipment of the new Victrolas has been received, and no more will be obtainable before the first of the year, the single shipment being entirely insufficient to fill the orders taken. All other Victor goods, however, are coming through in good shape and will be in ample supply at all times.

L. F. Geissler, general manager of the Victor Talking Machine Co., spent a couple of weeks in and around San Francisco early in November, calling on all the dealers, both large and small. He took pains to emphasize the company's advice to buy early. Mr. Geissler found time to spend a few days at his favorite diversion of duck hunting on the Suisun marshes, and also to attend the inter-collegiate football game, in which his nephew from Los Angeles took a prominent part. Until Thanksgiving Mr. Geissler remained with the trade in southern California.

The most important development in the trade for a long time is the entrance of Babson Bros., of Chicago, into this field. This firm have made arrangements to occupy a ground floor store in the Mechanics' Institute building, 65 Post street, within a week or two, and will conduct a retail store there, making the location its center of distribution for the mail order business all over the State. The company have been unable to gain much headway in this field in the past, owing to the fact that the express charges took up most of the profits, but it has now determined to follow an aggressive policy here. Just what effect this will have on the outside dealers handling Edison goods remains to be seen, but it is believed that the new house will for the most part reach a new class of trade.

Mr. Scott, of the local branch of the Columbia Phonograph Co., has been laid up all month by a badly sprained ankle, but is now putting in full time at the office again. Mr. Cyrus, who recently

took over the territory formerly covered by Mr. Storms, is now in the San Joaquin valley, and reports that conditions throughout central California are very promising for the winter season. Mr. Scott reports an extremely heavy demand for the new \$50 Grafonola Favorite.

The Pacific Phonograph Co. have had a great rush in the delivery of goods for the last few weeks, but has been able to keep the stock in good shape, and Mr. Pommer is greatly pleased over his success in anticipating the wants of the trade. J. E. McCracken, the outside man, has just completed a trip as far South as San Diego, establishing several new dealers along the line. Mr. Pommer says he has been unable to get the Music Master horns and some of the new Edison machines in time for the holiday trade.

C. M. Jones, who was formerly prominently connected with the Pacific Phonograph Co., severed his connection with that firm without warning about a month ago, and is in the Southwest.

Peter Bacigalupi & Sons have had a number of alterations made in their new second floor store, which is now fully as attractive as the old ground floor quarters. A large sign has been added, and Mr. Bacigalupi finds that the talking machine end of his business is keeping up about as well as ever. The shopping and theater district is turning more and more toward that part of town, and the outlook for steady development is considered excellent.

NO PLACE FOR A QUITTER.

John Wanamaker, the great retail merchant, on one occasion said: "If there is one thing on earth that a quitter should leave alone, it is advertising. To make a success of it one must be prepared to stick to it, like a barnacle on a ship's bottom. Advertising doesn't jerk; it pulls. It begins very gently at first, but the pull is steady.

"It is likened to a team pulling a heavy load. A thousand spasmodic, jerky pulls, will not budge that load, while one-half the power in steady effort will start it and keep it moving."

Won't You Have a Lesson in Spanish?

It's so easy to learn by the I. C. S. system—and a knowledge of Spanish is so useful nowadays.

The I. C. S. system of language instruction by means of the phonograph makes easy the mastering of a foreign language, and appeals with compelling power to thousands. The dealer in phonographs who does not carry I. C. S. Language Outfits is neglecting a quick and sure way to increase his business. The new \$35 Language Outfit of the I. C. S. is a marvel. It represents the highest art in the teaching of languages, and embodies a method that has won the warmest praise of thousands qualified to speak authoritatively. The Spanish, French, and German Embassies at Washington, as well as the leading colleges, have cordially indorsed the I. C. S. method of teaching languages.

The I. C. S. Language Outfit consists of an Edison Gem Phonograph made especially for language work; small horn; headband hearing tube; oil can; and 25 Conversational Records teaching pronunciation guaranteed to be absolutely correct, with native intonation and inflection. In addition to these Conversational Records there are pamphlet Instruction Papers teaching the theory of the languages. The new Outfit is at one and the same time the best and cheapest ever offered—the price being only \$35.

If you want to increase your business, write to-day for full particulars.

NEW YORK, DECEMBER 15, 1910.

CHRISTMAS trade so far this month gives indications that the volume of holiday business for 1911 will not only equal but exceed that of last year. In some of the higher-priced instruments many dealers complain of shortage, but the factories have been working hard to supply stock, and they expect to meet demands.

Trade as a whole for the year now closing has been very uneven, but nevertheless in volume it will exceed its immediate predecessor. Business improvement has not been as active as many hoped, and its progress was temporarily interfered with by the political campaign.

Another factor which has retarded trade development has been the fact that the working classes have not been spending as much of their surplus earnings for luxuries as might be expected in view of the general employment of labor and the fact that the old indebtedness, due to lack of occupation during the panic year of 1907, has been paid off.

The demand for the cheaper styles of talking machines has not been as active as it should be, while the trade in the higher-priced creations has been simply enormous. The best authorities in the trade look forward to a larger and more satisfying business in the lower-priced machines during the holidays, and in the new year which will soon be with us.

VIEWED broadly, the talking machine business in all parts of the country today is on a healthy basis, and the dealers who are giving it the intelligent consideration which it deserves are making money. Many, of course, have gone backward, and

will continue to do so, because of their indifference to modern requirements in the way of attractive windows and warerooms, and the employment of aggressive methods in creating trade by means of publicity in their local papers, by recitals, and other plans suggested from time to time in these columns, and in which plans they are generously helped by the manufacturers.

It is just the time of year for serious reflection on matters of this kind.

The dealer desirous of getting his share of holiday trade, and of being a powerful factor in business during 1911, must realize that in order to win out he must be a "live wire" in the community. He must not follow in the beaten track of failures, but move along progressive lines.

IT is universally conceded that no one plan of trade promotion has been so successful with talking machine dealers as that of recitals. They are among the most effective and progressive schemes for concentrating attention on the merits of talking machines which have yet been conceived.

Where these recitals are properly advertised and invitations sent out, they appeal to a class of purchasers who unfortunately have not given as close consideration to the talking machine as they should—people who are not in touch with the wonderful perfection of the talking machine record, as produced by the leading artists and musical organizations of the world.

Dealers should make it a point to give concerts in their warerooms, no matter on how small a scale. They make friends for the dealer, and are most educational, inasmuch as they stimulate a knowledge of the wonderful possibilities of the talking machine—and by this we mean all makes—among those musically inclined.

ONE of the growing evils in the retail branch of the talking machine trade at the present time is the matter of long time credits. This matter is now receiving the consideration of jobbers throughout the United States, and we understand that a credit curtailment program is under way whereby dealers will be asked to buy goods under a shorter term policy.

While dealers at first consideration may not view this plan with favor, yet as a matter of fact it is an excellent move, because it will compel them to collect closely.

There is no question but that many dealers are lax in their collections and allow accounts to run with their customers which would not be the case if they were compelled to meet their obligations on shorter time.

In all industries to-day business men see the necessity of putting their business on as sound a basis as possible, and this means a credit business that will be helpful all round. We understand, too, that jobbers are co-operating for the purpose of preventing dealers who owe large sums of money to open accounts with their competitors—in other words, jobbers are not going to allow competition to blind them to the necessity of doing business along correct financial lines. Surely the proposed move is both wise and necessary.

THERE is no one department of a dealer's business to which he should give more attention than that of collections. There is a great satisfaction in marking up sales, but, after all, a sale is only successful when the dealer gets his money—the sooner the better.

If dealers allow the regular instalment periods to pass by without customers calling on them or sending their money, they should make it a point to keep a collector busy.

And this collector, by-the-way, can be utilized in the matter of exploiting new records, and stimulating an interest in the talking machine among those who may have temporarily become indifferent.

Dealers who insist upon prompt payments are not going to offend customers. When they realize that this is the fixed policy of the house they will, if anything, co-operate.

Close collections help the credit of the dealer. They raise his standing with the jobbers and convey to them the fact that such dealers are safe and sound business men.

Moreover, close collections mean the use of available cash and it is always better to have a thousand dollars in the bank than on the books. Hence it will pay dealers at all times to exercise a close scrutiny over collections. It means business health and stability.

NO one feature of the development of the talking machine has been so marked in recent years as its association with great artists and their recognition of the tremendous strides which have been made in the perfection of record-making.

Vocal teachers and others who formerly derided the talking machine, looking upon it as a toy, are now utilizing it in their studios as a means of demonstrating style, phrasing, breathing and other essentials in voice production.

Well known writers on musical matters have also "seen the light" and are recognizing the educational value of the talking machine, and the splendid mission it is performing in bringing the best of music into the homes of people who otherwise would be unable to hear the great artists of the world—artists who are earning thousands of dollars a night singing in all the leading opera houses.

VERY recent and important recognition of the advanced position occupied to-day by sound-producing machines is the fact that Henry Russell, director of the Boston Opera House and associate of the Metropolitan Opera House, New York, has accepted an appointment of consulting director of opera for the Columbia Phonograph Co.

This important announcement which appeared in last month's World is significant and emphasizes the points set forth above that the very leaders in musical and operatic progress are no longer indifferent to factors that are proving the greatest possible aid in inculcating a larger knowledge of music and of the great operas and singers of the day.

WITH THE TRADE IN MILWAUKEE.

Prospects Are That the Holiday Trade This Year Will Surpass That of 1909 by at Least 50 Per Cent.—General Conditions Good—McGreal Arranging for Jobbers' Convention—Giving Talking Machine Concerts in Public Schools—Some Personal Items—Dealers Interested in New Credit Bureau—What Varied Houses Have to Report Anent Business—Gimbel Bros. Department Rearranged—Some Popular Records.

(Special to The Talking Machine World.)

Milwaukee, Wis., Dec. 5, 1910.

Retailers report that the holiday trade has opened in earnest and that there is every indication of a total business far in excess of that received a year ago. Leading Milwaukee dealers say that present business is at least 50 per cent. better than for the same period last year.

Industrial conditions in Milwaukee are satisfactory in most lines; prosperity is everywhere evident in the smaller cities and towns of the State, and dealers say that they have every reason this year to feel decidedly optimistic.

The jobbing trade is all that could be asked for. Dealers all over the State are ordering freely and seem to realize that now is the time to get their stocks in shape for the Christmas rush. As in the retail field, demand seems to be strongest for the higher-priced machines, Victrolas and Amberolas selling especially well.

Lawrence McGreal, the prominent talking machine jobber of this city, has begun making the preliminary arrangements for the convention of the National Association of Talking Machine Jobbers, which will be held in Milwaukee, July 11, 12 and 13. Mr. McGreal is negotiating with the hotels of the city, and judging from present indications there will be no difficulty in finding room for the talking machine men who are expected to attend the convention.

Lawrence McGreal has been conducting a series of Edison and Victor concerts in connection with the moving picture shows which the Milwaukee Journal has been giving at the various public schools about Milwaukee. It is the aim of the Journal to educate the people of the various communities to make a more extensive use of the school houses and other public buildings, and the plan is working out most successfully. At the last concert and show held at the Nineteenth District, No. 1, at Thirty-first and Brown streets, a vast crowd was in attendance. The plan, besides giving people the benefit of good pictures and good music free of cost, is proving to be a great advertising scheme for Mr. McGreal.

V. B. Taylor, of Chicago, has been appointed Wisconsin representative of the Victor Talking Machine Co. and is now meeting with an excellent business about the State.

William P. Hope, Wisconsin and upper Michigan representative of the National Phonograph Co., was a recent Milwaukee visitor, reporting business as entirely satisfactory. Mr. Hope is now covering territory in the vicinity of Green Bay, Wis.

Percy Williams, a member of the mechanical engineering department of the National Phonograph Co., was in Milwaukee on business recently.

Lawrence McGreal and family spent the Thanksgiving holiday at Dixon, Ill., with Mrs. McGreal's father, Alderman Martin J. Gannon. Miss Gertrude Gannon, proprietress of the McGreal retail store, is expected to return from Dixon this week.

Milwaukee retail talking machine dealers are highly interested in the new credit bureau that is being organized by the retail merchants' division of the Merchants & Manufacturers' Association. The new bureau, which will be modeled largely after a similar bureau at Indianapolis, Ind., will have headquarters in the rooms of the Merchants & Manufacturers' Association in the Germania Building and will be in charge of James Fetterly, an official of the association. Telephone connection will be made with the credit departments of all the leading stores, and the bureau is expected to be a success from the start. Leading talking machine men say they are confident that the

bureau will save them many dollars each year.

"Business is rushing in all lines," said A. G. Kunde, downtown Columbia dealer, 516 Grand avenue. "General demand is good, and there is every indication that we are entering upon the best holiday season ever experienced by this store. We are keeping our store open every evening from now until Christmas, a sure sign of a lively business."

A new Columbia talking machine store has been opened at 515 Wells street by A. Damascek, formerly of South Bethlehem, Pa. The new store is located in the heart of the Greek and Hungarian district, and Mr. Damascek is securing a good trade from the very start. A small-sized jewelry stock is also being carried.

L. C. Parker, manager of the talking machine department of Gimbel Brothers, has returned from a business trip to Chicago. While there Mr. Parker was the guest of L. F. Geissler, general manager of the Victor Co.

"Business is increasing steadily," said Mr. Parker, "and I look for the heaviest holiday trade in the history of the store. November was a good month and far ahead of the same period of last year. Prospects were never better, the record sales are large, and as they make excellent Christmas gifts I expect to sell great numbers of them."

During the past month the talking machine department has been rearranged, with the result that facilities for handling the trade have been largely increased. Partitions have been erected, so that the department is now shut off from the remainder of the second floor, thus keeping out the noise and scurry which is always evident in a large department store. The different parlors have been touched up and improved in an artistic manner, and additional record cabinets have been installed. All of the fixtures are finished in mahogany, and the walls and furnishings are done in colors to correspond.

In preparation for the holiday trade, J. H. Becker, Jr., manager of the talking machine department of the Hoeffler Manufacturing Co., secured a large stock of high-priced machines, which included Victrolas. Judging from the orders which are being booked, Mr. Becker's anticipated rush in high-priced machines is more than being fulfilled.

"Business is very good," said Mr. Becker, "and it seems as though the holiday rush will be a record breaker. The demand for medium-priced machines is not heavy, but this is more than made up by the call for the best grades. Low-priced machines are also selling well. During the past few weeks the demand for records of the gems of "The Dollar Princess" and "The Chocolate Soldier," and "My Hero" from "The Chocolate Soldier," both of which played in the city recently, has been so great that we have run behind. At one time there were thirty orders on file. Had it not been for the fact that I had put in a large stock of these records, we would have been swamped. Our Zonophone line is selling well also."

Roy J. Keith, of the Talking Machine Co., Chicago, visited the Milwaukee trade recently.

Fritzie Gibbs, of the Rudolph Wurlitzer Co., was a recent visitor in Milwaukee.

IMPORTER'S PROTEST UPHELD.

Board of General Appraisers Decide That Cinematograph Films Are Dutiable as Photographs Instead of as Manufactures in Chief Value of Celluloid.

In sustaining a protest filed by Sussfeld, Lorsch & Co. and others, the Board of United States General Appraisers holds that cinematograph films imported under the tariff act of 1897 are entitled to enter this country as "photographs," with a customs tax of only 25 per cent.

The Collector returned the films as "manufactures in chief value of celluloid," which called for duty at the rate of 65 cents per pound and 25 per cent. ad valorem. General Appraiser Sharretts, who writes the decision for the board, finds authority, so he states, for reversing the Collector's classification and sustaining the protests. The Custom House authorities are directed to reliquidate the entries on the basis of the lower duty.

TALKING MACHINE EXPORTS.

The Figures for August Presented—Reports Show Strong Gain in All Departments of Industry—Some Interesting Figures.

(Special to The Talking Machine World.)

Washington, D. C., Dec. 6, 1910.

In the summary of exports and imports of the commerce of the United States for the month of October (the latest period for which it has been compiled), which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following interesting figures relating to talking machines and supplies are set forth:

The total exports of talking machines, records and supplies for October, 1910, amounted to \$276,261, as compared with \$243,241 for the same month of the previous year. The ten months' exportations of talking machines, records and supplies amounted to \$2,138,914.

DIRECT ADVERTISING.

Excellent Results Gained Through Placing Circular Matter in Every Package Sent Out.

"The retail merchant," said a man of experience, "should place in every package that leaves his store some form of advertising matter that is likely to bring back again the purchaser of that bundle.

"Unless it be in a small town, nearly one-half of the trade in a retail store is made up of transient shoppers; of people who have not, as yet, established a permanent place of trade. Everything possible that is fair should be done to make regular patrons out of these transients.

"Let them know all about your business and your stock that it will be to your profit to have them know. The circular or leaflet slipped into the bundle is one way of giving them that knowledge. A dainty little booklet full of facts about your business is a good thing to use. The cost should deter no one, for if it is properly done, it is the cheapest form of advertising you can get. Cheap, because experience has shown that it goes a long way towards getting and holding trade."

TEST OPENS IN AUSTIN

Will Handle the Victor in Handsome Quarters on Congress Avenue That City.

(Special to The Talking Machine World.)

Austin, Tex., Dec. 5, 1910.

Clarence Test has opened one of the swellest and most modern talking machine stores in the South at 800 Congress avenue, this city. He has purchased his initial order of Victor goods from the Petmecky Supply Co. He has considerable floor space in the premises leased from the Bush & Gerts Piano Co., and has fitted them up most admirably. He intends to go after trade in a very lively fashion and promises to be an important adjunct to the talking machine business in this section.

SAMMARCO CHATS OF RECORDING.

Sig. Sammarco, the famous baritone of the old Manhattan Opera House, and now connected with the Chicago Opera House, in a recent interview stated that after he had finished his career as an opera singer he intends to become an aviator. He says that to him it is a fascinating occupation. He said further: "There are two things in life that are particularly hard for me to do. One is this sitting for my picture and the other is singing into a talking machine. Did you ever see an artist singing for a talking machine? No? Well, imagine a horn, the artist in the process of being pulled back and pushed toward this horn at the desire of the operator, and, back of him, an orchestra playing in his ears. With all this distraction the poor singer is attempting to do his best. It is certainly very difficult, for one always fears to spoil something by a wrong movement."

When you think you are at the top of the ladder in your trade do not stop self-satisfied, just "holler for more ladder."

The Lion's Share

Comes to the Dealer Who

The sales of the U-S, the latest, simplest and most rapidly that we predict an immense demand. Our best interests will not fail to protect you.

U-S Combination Phonograph

We have made such unusual claims for the U-S Phonograph and Record, that we hardly expect every dealer to appreciate, by merely reading, the wonderful merit of this new line. But we do want you to **demonstrate** it to your own satisfaction in your own store, by the most rigid comparison, alongside of any other machine you ever sold, saw or heard.

Play the U-S Record on another machine, or play a record of another make on the U-S; no matter what kind of a test you make, you cannot fail to notice the vast difference, the vast superiority, of the U-S product. It produces music of sweetness, of clear definition and musical volume, with a fidelity to the original voice or instrument that will surprise you—rare qualities found in no other machine, because none other has the wonderful “voicing” powers of the new U-S Diaphragm.

A trial will also convince you of the great ease with which you can instantly adjust the machine for either a two or a four-minute record, by simply a twist of the shift key on the automatic reproducer carriage. You will notice the easy and almost noiseless running of the motor. You will appreciate the value of the new U-S Flexible Tone Arm.

In other words, you will see at a glance why the U-S machine **really** has no **competition** where its supreme qualities are known.

The public is fast coming to an appreciation of the U-S as a **musical instrument**; it will soon be the standard phonograph of the whole Western Hemisphere.

Be ready.

U-S PHONOGRAPH COMPANY

of "1911" Profits

Handles the U-S Line

most perfect phonograph, are increasing so
d in 1911. The dealer who is alive to his
re at once to meet this demand.

U-S Everlasting Records

A stock of U-S records is the biggest booster you can get to popularize your store as a center for **real music**.

With them, as with U-S machines, a demonstration will show you why. They not only reveal unusual quality as to the music itself, but will convince you that you have at last the truly everlasting record. The U-S is scratch-proof, break-proof, wear-proof—no amount of playing can affect it.

After all, the vital reason why the U-S Record is such a big profit maker is the fact that **people prefer it to all others** as soon as they hear it played. One record sells another, and since they are at their best on U-S machines the records in turn sell phonographs.

The U-S is distinctively a proposition for the trade. We virtually make our dealers our partners, co-operating with them and giving them a profit-making opportunity granted by no other manufacturer.

There are no arbitrary restrictions in our offer; we don't dread competition and comparison. In fact, we are better pleased when there are other makes side by side with the U-S; the comparison emphasizes the latter's superiority.

Notwithstanding reports circulating to the contrary, we are manufacturing entirely under **our own patents**, which are backed by unlimited capital.

Your opportunity is NOW. Fill out the coupon TO-DAY.

Trade—What the Various Houses Have to Report Regarding the Situation in Cincinnati.

(Special to The Talking Machine World.)

Cincinnati, O., Dec. 9, 1910.

The trade is in the middle of the pre-holiday business, and the outcome is most encouraging. The general reports of the past month indicate that November's results were in excess of the corresponding period last year.

Raymond Stotler, manager of the Milner Musical Co., reports a splendid business for November, having succeeded in more than doubling their business of the same month last year. Mr. Stotler says that he does not believe that this was altogether accounted for by the particularly effective and aggressive advertising campaign, but mostly due to the demand for the better and higher-priced styles of talking machines. The Milner Musical Co. have enlarged their record department and now carry one of the most complete stocks of Victor and Edison records in the State.

Manager R. J. Whelen, of the Columbia Phonograph Co., was in a jovial mood when the writer called upon him, caused, he said, by “fine business and better prospects,” and added: “As predicted in October, the volume of business in November was a record breaker, and there is just no telling what December will bring forth, when we take in consideration the new Grafonolas and records just put on the market. We thought our line complete before, but with the new Grafonola “Favorite” at \$50, the first hornless machine ever sold at the price, and the new style Grafonola “Elite” at \$100, we are bound to get more business than we can take care of. The demand for the higher-grade machines and records continues to increase, with the Grafonola Regent (Library Table) in the lead. We have put into the hands of the dealers a big trade-getter in the way of the special 10-inch double disc demonstration records, one of which they can give to every owner of a disc talking machine (or charge 10 cents each for the cost of handling only) to demonstrate the Columbia double disc records, and the dealers have responded with enthusiasm, ordering by the hundreds. One dealer immediately upon receipt of the announcement jumped on the car and came to our store, ordering a large quantity, and said, ‘This is one of the greatest things ever done for the dealer to enable him to secure publicity and customers and demonstrate Columbia records.’ The Dictaphone department had the largest business in its history in November, selling Dictaphones to the Ohio Carriage Manufacturing Co. and Ohio Fur Co., of Columbus, Ohio; the Foos Gas Engine Co., of Springfield, Ohio; American Rolling Mill Co., of Middletown, Ohio, and several Cincinnati firms.”

Mr. Ahaus, in charge of the talking machine department of the Aeolian Co., reports business very good for the month of November and states that the outlook for the Christmas trade is extremely bright.

Henry H. Schwenker, the traveling repair representative of the Victor Co., recently called upon John Arnold and gave hints about healing sick machines which were much appreciated by his host. Mr. Arnold said it was one of the best stunts pulled off by the Victor people in years. He claimed to have secured ideas from his visitor which were of inestimable value to his business. The special record offer of the Edisons boosted Arnold's business during November, and he looks for a greater volume this month.

J. E. Poorman, the Main street representative of the Zonophone, Edison and Victor machines, could not be reached with a 10-foot pole during the past three weeks. It was all because he was gobbled up for jury service by the county and could not give an adequate reason for evading the work. Poorman said the experience was worth the annoyance. Walter G. King, manager of Poorman's talking machine section, is once more back in harness after having gone through three operations. Business there has been very good during the past month, and the outlook is most encouraging.

The R. Wurlitzer Co. reports a decided increase in the talking machine trade, which showed a very gratifying increase over November of last year. Mr. Dittrich, who is again in charge of the talking machine department after an absence of several months, said:

“Our retail department has certainly given us a surprise in the number of cash sales we have received for Victrolas; also in the fact that, while the preference seems to run to the mahogany instruments, we have been placing quite a number of the special finishes. There has been an exceedingly heavy demand for Red Seal records, especially the new ‘Melba’ records, which are very popular sellers.”

SUGGESTIVE SELLING.

Working with the Object of Making the Store, Both Inside and Out, Attractive to the Customer—A Hint for Clerks.

A clerk can increase his value to his employer by doing his work and meeting the customers in the same manner that he would do these things if the store were his own. It is certainly safe to say that no clerk, in dreaming of the days when he shall be the proprietor of the leading store of his town, dreams of a store with dirty shelves covered with cobwebs and dusty goods, with dirty windows and poor window display, with a force of slouchy, insolent tobacco-spitting clerks who misrepresent the goods and short-change the customer or the cash drawer. He does not dream of having a customer stand and wait, while he, the proprietor, hunts all over the store for the article wanted.

These are a few things he would avoid if he were proprietor; certainly then he should work

against these things while he is a salesman.

A little work with the duster early in the morning before the day's rush is on will work wonders in the appearance of the store, and no hardship on the clerk.

Window trimming in itself is, of course, a field for no end of study, but a window can be made attractive and be made to sell goods without being a masterpiece of color and design, and it is certainly true that a good display of machines and records in a window will sell more goods than will a bunch of guinea pigs or white rats. By keeping his window alive, that is trimmed with seasonable goods, a clerk can add appreciably to the weekly sales.

As to personal appearance, neatness is the essential point. Fine clothes are not necessary. A man can put up some show of neatness in a blue shirt and overalls, and strangers unconsciously judge a clerk to a great extent by his appearance.

LIBRARY OF SPEECH IN PARIS.

Phonographic Records of Orators' Actors' and Writers' Readings from Their Own Works—Great Aid to the Stage—The Moliere and Shakespeare Traditions Could Thus Have Been Preserved, Remarks Jean Coquelin.

A vocal library is the latest idea in Paris, France. It is to be installed in the Bibliotheque Nationale, and will consist of a collection of phonographic records of the words spoken or sung by great orators, singers and actors. The library will be equipped with abundant instruments for the transmission of the recorded sounds to the ears of visitors.

Thus in the future the student of the life of some great man intending, perhaps, to become his biographer, may be aided by the accents of his voice long after he has passed away. It is not improbable that a discourse of the Prime Minister in the Chamber of Deputies may, in after years, be both read and heard at the same time.

The new department in the Bibliotheque Nationale will be called the Museum of Speech. The organizers propose especially to enrich it with important literary works of the present period, recited or read by the authors themselves into a phonograph.

This strikes one as beyond question the most charming feature of the project. What would not certain enthusiasts give to-day if they could hear passages from Racine, Moliere, Shakespeare and De Musset delivered in the identical tones of those immortal writers?

“A satisfaction equally great,” said a leading French literateur, in speaking of the move, “is perhaps reserved for our children's children.” In this connection Jean Coquelin remarked: “Yes, and how much more clearly might have been preserved what are known as the Moliere tradition and the Shakespeare tradition of acting if phonograph records of their stage performances could now be found in our libraries. In an educational sense I do not think that the value to future generations of phonographic libraries of this character can be exaggerated.”

When will America fall in line?

TRADE IN SOUTHERN CALIFORNIA.

Present Conditions and Outlook Most Satisfactory—Sherman, Clay & Co.'s Big Victrola Business—Amberolas in Demand at the Southern California Music Co.—Angelus Talking Machine Co. in New Quarters—Brown's Music Co.—Angelus Talking Machine Co.'s Victrola Recitals—Grafonolas Have the Call at Fitzgeralds—The Photographic Specialty Co. a New Concern—Dealers Throughout the State Are Doing Well and All Look Forward to a Large Christmas Business—Louis F. Geissler Among Recent Visitors to the Land of Fruit and Flowers.

(Special to The Talking Machine World.)

Los Angeles, Cal., Nov. 30, 1910.

The Christmas trade is now taking shape and promises to be more satisfying than ever. November, which has been found by most of the retailers to be the quietest in the year, has not been much better for 1910 than in previous years. This quietness is not a bad feature, however, as it enables the dealer to prepare for the busiest season of all. The wholesalers have found trade just the reverse to the retailers and have sold more goods than in any previous November.

Sherman, Clay & Co. have been exceptionally busy with the new styles of Victrolas, which have been sold as fast as received. The recent exchange proposition has also commanded some attention. Another large shipment of Victrolas and Victrolas, as well as records, is due to arrive at an early date. These goods are nearly all on order and will not remain in stock for a very great length of time.

The wholesale force of the Southern California Music Co. are all very busy with the many orders for Edison goods. The Amberola is in great demand, as well as the new style Triumph and the Music Master horns. W. J. Reynard has just returned from a most gratifying trip among the dealers and has a splendid record for Amberola sales. The retail department has been a very busy scene during holiday preparations. A complete line of Victrolas in all sizes and finishes is now on display in a special room for this type instrument exclusively.

Perhaps the most notable news item of the month is the removal of the Angelus Talking Machine Co. from their old quarters at Fifth and Main streets to a new and handsome store at 341 South Spring street. This company are an exclusive Edison concern and have demonstrated the growth of the Edison trade more plainly than in any other way by their removals. They are now directly adjoining the Brown Music Co., who handle Victor and Columbia disc goods. The Brown Co. are also new in this location as well as new in the trade and are gaining a strong hold on the business situation.

The Geo. J. Birkel Music Co. are to remain in their old store during the holidays, although it was originally intended that they should occupy their new Broadway building by this time.

The Wiley B. Allen Co. are ready for the biggest trade yet and which they expect to have. W. P. Carson was secretly married a few days ago. Mr. Carson has recently joined the Wiley B. Allen Co., having left the Southern California Music Co., where he had been cashier in the talking machine department for some time.

The J. B. Brown Music Co., of South Broadway, have given a series of Victrola recitals, which have proven very successful. A feature which is original is the reading of the story of the opera. This is done by Miss Mabel Brousseau, who also explains each record as it is played. Two recent concerts were devoted to "Madama Butterfly" and "Lucia." The recent opera season helped to make the success and created a demand for operatic selections.

The Andrews Talking Machine Co. are the first Victor dealers to make a Christmas display in their show windows, the same having appeared early this week.

The Fitzgerald Music Co. are doing a splendid business in Grafonolas. They have recently received several beautifully finished Regent styles.

The Phonograph Specialty Co. is the name of a new concern, which now have exclusive selling rights for several talker appliances, such as the Harmony disc record files, Harmony sound controllers and cardboard envelopes for protection to stock. Geo. D. Wernli, manager of the new concern, has recently received a number of large orders for Harmony files. The Knight-Campbell Music Co., of Denver, Colo., placed an order for several hundred files, which were delivered this month. Mr. Wernli is contemplating a vigorous advertising campaign, which he expects to launch after the first of the year.

Very good reports are reaching the trade from all outlying dealers. Riverside has been having a number of highly successful Victrola recitals, which were complimentary, given by the J. B. Brown Music Co.'s branch. These concerts are conducted on the same plan as those given by the Brown Co. in Los Angeles. The Southern California Music Co.'s store is in splendid shape and Manager Griffith is expecting a great Christmas trade.

The Short Music Co., of Pomona, Cal., have done a remarkable business in Amberolas during the past sixty days.

Ralph N. Paulin, manager of the Brown Music House of Santa Barbara, Cal., made a trip to Los Angeles a few days ago. He reports trade in splendid shape, with the best prospects in view.

Bowman Merritt at Fillmore, Cal., is another Amberola specialist, having recently sold three such instruments in one week.

W. H. Saladin, Orcutt, Cal., has taken the Lompoc territory for Edison goods and has installed a complete line of machines and records, including the Amberola.

Ryan & Dame, at Tulare, Cal., have been appointed exclusive Edison dealers in their section, and have made it a point to have a full stock of machines and records.

F. E. Huffaker, Visalia, Cal., recently ordered a dozen Edison phonographs and an Amberola and has lately added to his selling staff an eleven pound boy, upon whom he is to be congratulated.

The marriage fever has spread to the California talking machine trade and has claimed the following victims: O. A. Brehler, of Sanger; H. L. Mathews, Nordhoff; W. H. Saladin, Orcutt; Sibley Pease, of the Andrews Talking Machine Co., and, as mentioned in another part of this article, Willard P. Carson, of the Allen Co., Los Angeles. All were doing nicely when last seen.

The Crown City Phonograph Co., of Pasadena, Cal., have removed to No. 9 West Colorado street, where they will have space for a larger and more complete line of Columbia disc and cylinder goods. A great number of Victrolas have recently been sold in San Diego, all of the Victor dealers participating.

Mr. Gray, of the Thearle Music Co., visited Los Angeles early in the month. He is one of San Diego's enthusiastic business men who is helping to make the city famous.

Messrs. Rundel and Lovejoy, of the wholesale department of the Southern California Music Co., had the pleasure of a call from Sophie Tucker, who is filling an engagement at a local playhouse. Miss Tucker listened very attentively to a number of her Edison records, with which she was greatly pleased.

A most notable visitor during the middle of this month was Louis F. Geissler, general manager of the Victor Talking Machine Co., Camden, N. J. For several days Mr. Geissler called on the dealers and visited different points of interest. His impression of southern California was very good. He expressed admiration for the general trade conditions found here and was glad to find the enthusiasm so well displayed. A feature of his visit was a fishing trip to Santa Catalina Isle, which was his first experience on the magic island, although the Coast was at one time his home. No wonderfully large fish were caught, although a large number of nice ones were landed. Mr. Geissler is a brother of E. D. Geissler, of the Geo. J. Birkel Music Co., of this city, with whom he had a very pleasant visit.

C. F. Crank has lately joined the business phonograph department of the Southern California Music Co.

TELLS the
WHOLE STORY
about the
**PERMANENT
JEWEL
NEEDLE**
for ALL
Disc Machines

W. O. Kellogg, manager Chicago office of Watson & Newell Co., silver-smiths, writes as follows, under date of Oct. 2, 1910:

"Perhaps you will be interested to know that I have and am enjoying two of your 'Permanent Needles' a medium and loud tone. I have now used both for over a month and wish to say they are perfect in every way.

"I use the medium tone needle on loud records, and the loud tone needle on soft records, with great effect.

"There is less scratching and more soft tone derived from your 'Jewel Needle' than I have ever had from the old style steel needle. The time saved in changing needles, the assurance that at all times you have a perfect needle already set to play is a great satisfaction to me. Many of the steel needles have blunt ends and unless one is very careful to examine each needle when changing same, you are liable to injure a good record.

"I am positive you will meet with great success with your new invention, and I hope the owners of all disc talking machines will buy and try your 'Permanent Needle,' which I am positive will more than come up to their expectations.

"Yours for success,

"W. O. KELLOGG.

"P. S.—I have played certain records many times with the same needle and note there is no wearing of the record or the needle. The tone remains the same. (W. O. K.)"

The Permanent Needle is furnished in loud, medium or soft tone.

Retail Price \$2 each.

Usual Trade Discounts.

Guaranteed for one year; will last indefinitely.

Order From Your Jobber.

If he can't supply you, drop us a post card and we will give you the name of the nearest jobber who can.

The Talking Machine Trade in New England

THE TRADE IN NEW ENGLAND.

W. O. Pardee, of the Pardee-Ellenberger Co., Reports Excellent Demand for the Triumph Phonograph, Which Is Proving a Big Favorite—Frank A. Barrows Opens a New Store with the Edison Line—Other Items of News.

(Special to The Talking Machine World.)

New Haven, Conn., Dec. 8, 1910.

W. O. Pardee, president and treasurer of the Pardee-Ellenberger Co., Inc., Edison jobbers of this city, says that trade is very satisfactory, with every evidence and anticipation of a brisk holiday season. "The equipment by the National Phonograph Co." added Mr. Pardee, "of their Triumph machine, with a new model 'O' reproducer and Music Master horn, has stimulated the sale of this machine amazingly. As a result, the sale of Triumphs has increased to such an extent that it is giving the Home a close rub. Those of our customers who have taken up the wagon proposition which the National Co. have put in effect have done very nicely and are showing satisfactory results."

Frank A. Barrows has recently opened an exclusive, up-to-date Edison store at 144 Orange street. His store is well located on one of the principal streets and is extremely attractive in appearance. Sound-proof booths, unusually spacious, are a feature, and easy chairs scattered here and there give it the air of homelike comfort rather than a commercial institution.

Frank E. Gage, Connecticut representative of the National Phonograph Co., will shortly make his home in this city, and New Haven will be considered his headquarters from now on.

EXPANSION IN PROVIDENCE.

Business in Excellent Shape—Columbia Co. Finish Remodeling Warerooms—J. A. Foster Co. Speak Highly of the Results of the Advertising Policy of the National Phonograph Co.—Steinert's Big Victor Trade—Kelly Piano Co. Take on the Victor.

(Special to The Talking Machine World.)

Providence, R. I., Dec. 7, 1910.

As the second largest city in New England,

Providence is enjoying a exceedingly stable talking machine trade. Concerts are being held frequently; there is plenty of retail advertising, and the indicator points to a successful season.

John H. Massey is the manager of the phonograph department of the J. A. Foster Co., the Edison jobbers. Mr. Massey has built up a splendid business and is an indefatigable worker in the interests of his house. Anent local business he says: "There is a very marked 'renewed interest' in phonographs. We attribute this to the advertising and the various schemes advanced by the National Phonograph Co. We find that by advertising persistently and heartily co-operating with the home company in advancing such business builders as recording demonstrations, old records exchanged and pushing the four-minute attachment we are realizing considerable new business."

The Columbia Phonograph Co. recently finished remodeling and painting their local headquarters, and they now have one of the best appointed ware-rooms in the city.

M. Steinert & Sons Co. are strongly featuring the Victor talking machines and records and are transacting a satisfactory business. Wm. D. Blossfield is the manager of this department and is out for a big "record" for December.

The Kelly Piano Co. who recently put in the Victor line, report a good business.

C. H. SEAVEY TO HANDLE EDISON GOODS.

(Special to The Talking Machine World.)

Amesbury, Mass., Dec. 4, 1910.

C. H. Seavey, of Haverhill, has opened a retail store here and will feature Edison goods. Mr. White has been engaged as manager.

MARCELLUS ROPER CO.'S STRONG STAFF.

(Special to The Talking Machine World.)

Worcester, Mass., Dec. 5, 1910.

Marcellus Roper Co. are big talking machine dealers of this city. Fred Lane is the manager of the department, while M. R. Caldwell has been appointed his assistant. Mr. Caldwell was formerly with M. Steinert & Sons Co., Lowell, who resigned to take a position with the Seigel Co., of Boston, but instead went with the Roper Co.

CONDITIONS IN PORTLAND.

Unseasonable Weather Has Not Helped Business in Maine—What L. W. Frickett, of Cressey & Allen, Has to Say on This Subject—What the Representatives of the Columbia and National Co. Report.

(Special to The Talking Machine World.)

Portland, Me., Dec. 7, 1910.

Cressey & Allen, the big piano house, are the Victor jobbers here. They have a spacious talking machine department, ably managed by Louis W. Frickett. Speaking to The World anent business conditions, Mr. Frickett remarked: "Business in Portland and vicinity has not been any too brisk. I attribute this partly to the beautiful, warm autumn weather, which has greatly extended the automobile and sport season, thus keeping people out of doors. This month, however, shows a remarkable improvement, and business has been fairly good. We have every reason to expect a record-breaking December business."

The Columbia Phonograph Co. maintain a good-sized branch on Congress street, which is showing what activity is when it comes to selling Columbia products.

The Edison jobber here is the Portland Sporting Goods Co.

NEW ENGLAND DEALERS PLEASED

With the Special Attention Given Their Interests in the World—It Will be Mutually Advantageous to Get in Touch with the World's Boston Headquarters.

(Special to The Talking Machine World.)

Boston, Mass., Dec. 8, 1910.

Many complimentary remarks have been heard from the trade at the way The World is promoting the New England field. Jobbers and dealers alike are greatly pleased, and in consequence the subscription list is growing tremendously. The aim is always to "make it better," and The World man would appreciate items of interest showing what the dealers and jobbers are doing. Have these items about yourself or others and send them to The Talking Machine World (Boston office), room 12, 178 Tremont street, Boston, Mass.

BIG DEMAND FOR PURITONE NEEDLES.

(Special to The Talking Machine World.)

Putnam, Conn., Dec. 6, 1910.

Reports from the talking machine needle factory of John M. Dean show this house to be extremely busy making and shipping their famous "Puritone" needles, as well as their other brands for the various jobbers.

Charles Dean, of this company, says that they make sixteen different styles of talking machine needles, and that their capacity is two million needles a day.

I. L. HISER APPOINTED MANAGER.

(Special to The Talking Machine World.)

Lowell, Mass., Dec. 6, 1910.

I. L. Hiser has been appointed manager of the talking machine department of M. Steinert & Sons Co., Victor dealers.

"The man who whispers down a well
About the goods he has to sell
Will never reap the shining dollars
Like one who climbs a tree and hollers!"
—J. H. Smith.

It is not good salesmanship to sell a customer what he does not want, but it is good salesmanship to get him to want what you have to sell.

How is Your Christmas Stocking?

If you find a hole when you look into your Christmas stocking of **EDISON PROFITS**, write to **LINSCOTT of BOSTON**, the Edison dealers' Santa Claus.

That hole this year was caused by the "all out" wear, which eventually means profit destruction. Customers want to be served promptly, and to do that you must be reinforced by a **GOOD** jobber with the biggest stock.

The entire Linscott organization and service is at your command; our interests are **YOURS** and we will see that you have every equipment to create and maintain a tremendous business in 1911—with a full stocking of profits.

No matter what service you now have, let us show you how to "darn that hole" for next year. Write, wire or 'phone us.

Linscott Sporting Goods Company

(formerly Boston Cycle & Sundry Co.)

EXCLUSIVE EDISON JOBBERS

48 Hanover Street

BOSTON, MASS.

FROM OUR BOSTON HEADQUARTERS

ROOM 12, 178 TREMONT STREET, G. W. HENDERSON, MANAGER.

(Special to the Talking Machine World.)

Boston, Mass., Dec. 8, 1910.

"Lack of stock" is this month's battle cry with both jobbers and dealers. No matter how much The World talks about the advisability of making early requisitions, the talking machine dealers will not heed it and consequently when the boom occurs, as it always does at this season of the year, profits are sacrificed because the goods cannot be secured. Dealers do not have to expend a great sum to equip themselves for the holiday trade, but they will wait till the last minute for everything. It seems a costly habit, but if all the energies of jobbers does not accomplish much, what's the use?

Will Surpass Record of Last Year.

"Sales for 1910, both wholesale and retail, will exceed the figures of last year," is the consensus of opinion all along the line, with one exception. It takes the exception to prove the rule, and the exception in this case is one big house who holds a good position commercially in Boston, but on talking machines they lack effort. Their department is all right and the manager is O. K., but the "one higher up" seems to hold a thumb on expansion. What the "higher up" one needs is a bunch of optimism handed to him straight; he ought to be pulled away from Boston's crooked streets and have a glimpse of the business in evidence at the various "talker" factories. Then he could come back, outline a good 1911 campaign, bang away with good advertising, and a year hence there would be enough growth to exceed the highest amount he might now estimate.

Co-operating with the Dealer.

Linscott Sporting Goods Co. are one of the live Boston houses that are co-operating with the dealer. As the trade know, they are exclusive Edison jobbers, and the department is in charge of Charles R. Cooper. As a dealer once remarked: "A jobber is only good for a place to get goods when I want them," which, while being a rather crude way of defining the term "jobber," yet its bluntness serves admirably, because he added a very important feature—to get goods when I want them. The Linscott slogan is "In Edison goods you get what you want when you want them," and Manager Cooper lives up to this, if nothing else. Mr. Cooper says they have the largest Edison stock in New England and they can fill any dealer's order at a minute's notice.

William Caldwell & Son, of Cambridge, furniture dealers, have opened a new store at West Somerville, where they have an attractive Victor room.

A New Record Cabinet Catalog.

The Eastern Talking Machine Co. are preparing a new catalog of record cabinets which will be mailed to the trade shortly. General Manager Wm. H. Taft (excuse me, I mean E. F. Taft) reports a very seasonable business with both Edison and Victor products, and this applies in all their various departments. S. J. Freeman, head of the publicity department, issues a very optimistic statement on business.

Boston Houses Form Bowling League.

Some of the Boston houses have formed sort of a bowling league, the firms so far including the Eastern Talking Machine Co., the Columbia Phonograph Co., M. Steinert & Sons Co., and Geo. Lincoln Parker. It is hard to pick a champion, as the E. T. M. Co. have lost to the Columbias, but redeemed themselves by whitewashing the Steinert team. The Parker corps have not yet entered the arena.

Good Report from Oliver Ditson Co.

Manager Henry Winkleman, of the talking machine department of the Oliver Ditson Co., has been chronicling "good" business conditions so long that this is now an accepted feature of the immense Victor-Ditson business. The Ditson Co. claim to be the largest Victor jobbing house east of Chicago, and this is certainly a monument of talking machine business that Boston ought to be proud of.

Geo. Lincoln Parker Enlarges Department.

Geo. Lincoln Parker has increased the space devoted to the Victor department, so ably managed by C. P. Trundy. They are doing a tremendous business, according to Manager Trundy's brisk reports.

Making Good with Club Offer.

Manager Howes, of Houghton & Dutton's talking machine department, reports a continuance of a steady response to their club offers, which in the way that Mr. Howes operates the idea, is a very profitable one for his house. Mr. Howes is one of the young "old time" talking machine men and thoroughly understands the intricacies of the business.

Recent Trade Visitors.

Two members of the Lynn fraternity recently in Boston were D. B. H. Power, the Edison and Victor man, and C. M. Lewis, the Victor and Columbia dealer.

Big Needle Plant Rushing.

Advices from the city of Lowell indicate that the big needle plant of W. H. Bagshaw is rushed with a good volume of orders. The Bagshaw products embody the essentials of point, temper and polish, which are the most vital features desired by users of needles. This is a special feature of Bagshaw needles and it is uppermost in all their workmen's minds from the initial step in manufacturing right through to the shipping door. Success may not mean merit, but merit always means success; the Bagshaw house is a combination of both and "needle merit" is the platform upon which their big business was built.

"Hear Music Over the Telephone."

Harry Rosen, the School street dealer, has an advertisement in the telephone book to "call us up and hear music over the telephone." Quite apropos, Harry!

Live Columbia Dealers.

One of the best talking machine retail houses around us is the emporium of Fairbanks & Son, Natick, Mass., who handle the Columbia line. Mr. Fairbanks, Jr., is a live one and has created a big following at Natick through his own untiring efforts.

Slot Machine "Talkers" Need Attention.

The unsuspecting public will never suspect what fine qualities talking machines possess when it

comes to reproducing the human voice and instrumental music if some of those slot machine talkers around Boston are not given a tonic for their cough. It is an anti-popular pill to have these squeaking slot talkers around in small cities, and if the same attention is given to their maintenance as to the coin box, it would be a help to the hearing. A salesman would have to begin all over again with a retail prospect if "it" unfortunately drifted into a store and one of these consumptive talkers was set off for "amusement."

A Great Time Saver.

Here is a great time saver originated by S. J. Freeman, of the Eastern Talking Machine Co., and used extensively by them all through their record bookkeeping. Instead of writing out the complete order as given, all they now do is to put the total number of records against the proper class, writing the record numbers on the reverse side:

-10 in. Victor	\$0.60	-12 in. Red S.....	\$1.50
-10 in. D. Face.....	.75	-12 in. Red S.....	3.00
-10 in. P. L.....	.75	-12 in. Red S.....	3.00 S
-10 in. Red S.....	1.00	-12 in. Red S.....	4.00 S
-10 in. Red S.....	2.00	-12 in. Red S.....	4.00
-10 in. Red S.....	3.00	-12 in. Patti.....	5.00
-10 in. Red Tam.....	5.00	-12 in. Red S.....	5.00
-12 in. Victor	1.00	-12 in. Red S.....	6.00
-12 in. D. Face.....	1.25	-12 in. Red S.....	7.00
-12 in. P. L.....	1.25		
-Edison Std. 2M. Records.			
-Edison Amberol Records.			
-Edison Grand Opera Records.			
-Edison Amberol Grand Opera Records.			

Big Columbia Business Increase.

Manager Arthur Erisman, of the local headquarters of the Columbia Phonograph Co., gives out the interesting information that their November business increased 42 per cent. over last year, which is a tremendous showing. He is also in receipt of information from the general offices showing that the entire Columbia business increased 40 per cent. average over the November of last year. This is of widespread importance to the Columbia chain of dealers, as, of course, it must mean that the dealers have enjoyed a corresponding volume of prosperity.

The Columbia 10-cent demonstration record is making a big hit with dealers and they are ordering them by the hundreds. This is only one of the many Columbia aids to the dealer which has occasioned favorable comment.

Two pretty window displays designed by Mr. Mason this month included an arrangement of ten BZ machines with records, and an exhibition of

FIRST

"Preceding all others in place, time or degree."

The word "exclusive" has been so misused in this business that just possibly you don't know *precisely* what **Exclusive Columbia Selling Rights** may mean in *your* locality—in *your* town—on *your* side of the street—in *your* business. Don't say you are sure—*be* sure. Write in about it.

Columbia Phonograph Co., Genl., Tribune Building, New York

Grafonolas embracing the "Regent," the "De Luxe," the "Mignon" and the "Elite."

Kidder & Davis, of Fitchburg; M. A. McClure, of Rutland, Vt.; Fred Wood, of Wallingford, Vt., and the Robinson Piano Co., of Brookline, Mass., are a few of the recently appointed Columbia dealers on an exclusive basis.

THE IDEAL CHRISTMAS PRESENT

For the Child—Talking Machine Dealers Should Turn Their Attention to This Important Subject.

For eleven long weeks the writer lay tossing upon a narrow cot in the Orthopaedic Hospital in Philadelphia, and during that period he had an ample opportunity to discern with what keen delight the average child, even though racked by pain, welcomes music.

Just across the white corridor, up and down which ever and anon sweet-faced nurses flitted on errands of mercy, was situated the boys' ward. On Sunday evenings when the lofty chimes from the neighboring cathedral began their golden pealing, the children clapped their thin little hands in delight, and the cry of "Music!" rang from cot to cot. Then as the last echo of the bells died away, the solemn chant of the pipe organ took up the sacred refrain. Like the seductive drugs one reads of in Rudyard Kipling's weird stories of India, the grand music enwrapped their warped and aching bodies with a delicious languor, and many a small boy, fresh from the horrors of the operating table, would smile and turn upon his side to sleep.

Sometimes of a week-day a virtuoso of the street piano would stroll within the neighborhood of the hospital, and that event was universally heralded by shouts of sheer ecstasy. Airs such as "Put On Your Old Gray Bonnet" and "Has Anybody Here Seen Kelley" would cause such a pandemonium of merriment that the restraining influence of a kindly superintendent or head nurse would be needed to restore order out of chaos.

If music has such an influence upon children who are ill, it will certainly impress them even more favorably when ruddy and strong with the glow of God's greatest gift, health, upon their cheeks.

Therefore, Mr. Dealer, the talking machine is the ideal Christmas gift for the child, and when introducing your goods to the mother or father you should emphasize that fact as strongly as lies within your power as a commercial orator. In doing this, however, you should be most careful as to the kind of record you suggest for the youngster. Unfortunately, some manufacturers are not quite as particular in this regard as they should be. Some records listed within the past year and even brought out ahead of schedule and marked "Special" are scarcely fit for the ears of the average juvenile. The young America of to-day is a pretty up-to-date proposition, and when he creeps downstairs on Christmas morning in his pajamas and finds a talking machine reeling off "Put On Your Slippers; You're In for the Night," or "Mister Pat O'Hare," he is wise enough to associate

these songs with the place in which they belong, the cheap music hall. He sees the scantily-clad scoubrette, the flashy, wine-flushed audience, and is enraptured—that is life, indeed.

"Play 'em again, daddy," he cried with the sparkle of excitement in his eye. However, if the father is the right sort, he will, with a show of diplomacy, refuse the request and send his off-

spring scampering skyward, at the same time secreting the records in a certain drawer labeled "Adults only."

All catalogs abound with selections most appropriate for children, and it is these that should be played by the dealer when he learns that his customer revels in the pride and joy of fatherhood.

Mr. Dealer, let this Christmas season be gay with the shouts of boys and girls who have received talking machines and the right sort of records for gifts. You have the goods, and it is simply up to you whether or not they are delivered.

HOWARD TAYLOR MIDDLETON.

We often applaud in others what we cannot do ourselves, or perhaps do not do, because we have not the courage to try.

DEMONSTRATION PROPOSITION.

Special Double Disc Columbia Record for Dealers to Demonstrate and Sell at Cost of Handling—Clever Plan to Advertise Columbia Record Quality Which Should Win Out.

Another new proposition to develop trade, in the form of a "special demonstration double-disc record," has recently been placed before the trade by the Columbia Phonograph Co., General. A circular letter to Columbia dealers explaining the plan in detail has been distributed, of which the appended is a portion:

"We are about to put in your hands the strongest trade weapon you could possibly use. We have made, and shall be ready to send you as soon as your request reaches us, a special demonstration double-disc Columbia record. We shall make the charge to you 10 cents for each of these 10-inch Columbia double-disc records—this charge being meant to cover only the cost of handling. You will be authorized to use this record for demonstration in your store, and to give it away free to every owner of a talking machine whose name you can secure by advertising or by canvassing. This record must not be offered for sale, except that you may make a charge of 10 cents if you wish, with the understanding that this charge covers only the cost of handling and delivery.

"On one side of this record will be a plain-spoken argument covering the claims we make for the Columbia double-disc record. After the spoken argument, the perfection of the Columbia process of recording instrumental music is demonstrated by the introduction of short melodies by the various separate orchestral instruments and a finale by the full orchestra. On the other side of this demonstration record is a musical selection which will alone be worth 65 cents to any owner of a talking machine. It carries no spoken or other advertising matter at all, but is designed to present fair evidence of the quality of Columbia vocal music. Every attempt has been made to produce a record which should be in itself a genuine proof of the superiority of Columbia recording. Everyone who tries out the record will be, supposedly, the owner of a talking machine and disposed to criticize and analyze and compare—which is precisely what we want to invite.

"This proposition comes to you at the one best time of the whole year, too—don't lose sight of that. This is the time of the year when every owner of a talking machine is interested in records unless he has completely lost his interest—and in that case there isn't one other nameable thing that you could possibly do to arouse that man's interest again so effectively as to get after him with this special demonstration double-disc. This is a big thing—and big in possibilities; yet not a thing that requires you to plunge. You can feel your way very easily."

ITS PERMANENT MOTTO.

One of the most successful department stores of America has this for its permanent motto: "First of all, reliability."

TRADE HAPPENINGS IN LONDON.

Manufacturers and Dealers Well Satisfied with the Opening of the Christmas Trade—Plenty of Business for All—Political Disturbances Have a Far Reaching and Disturbing Influence Upon Business in General—How the Various Leading Manufacturers and Factors View the Present Situation—Suggestions for Those Going After Export Trade—Voice Photography a Success in France—Some Recent Trade Literature—Contents of the Latest Record Lists—A To'stoi Record in English—A Reduction in Te'graph Rates Promised—Daws C'arke as an Inventor—The Gramophone Co.'s Pleasing Balance Sheet—Many Special Christmas Records in Evidence—Grand Prix at Brussels for Gramophone Co.—Timely and Interesting News of the Talking Machine Trade in the Provinces—T. Edens Osborne Still Much in Evidence—The Happenings of the Month.

(Special to The Talking Machine World.)

London, E. C., Dec. 8, 1910.

It's a fairly certain conclusion that a prosperous trading season is a large contributing factor to Christmastide happiness, and being so, it would almost seem superfluous to extend the old wish in view of the pleasing state of business now spreading its genial influence around talking machine traders. But for all that, to omit to do so would appeal to me as showing an attitude of cynical indifference to the spirit of the time, an interpretation I hasten to avoid by expressing this wish to all of my readers the world over: "Feeling assured that you have done your duty by supplying as many homes as possible this Christmastide with a good machine and records, and that your happiness will be sufficiently enhanced thereby to carry you well over the holidays, I would very heartily wish you a full measure of prosperity throughout the coming new year." And now let us turn to the business side of the question. Despite the keen competition, if trade conditions were never worse than they have been this last month or so, there would be ample room for all. And that about sums up the delightful state of prosperity we are at present experiencing. It is the same with the maker, wholesaler and the dealer in practically every locality throughout London and the provinces, except in just two or three centers, where, unfortunately, industrial disturbance of trade is causing a deal of anxiety to the local musical instrument dealers. I refer to the matter more fully in my provincial notes, elsewhere in this department, since dealers in this city are quite unaffected by these troubles.

Political Disturbance Hurts Business.

In many quarters, among the retailers especially, the opinion is freely expressed that sales must be very considerably disturbed owing to the dissolution of Parliament, which entails a general election during the busy Christmas shopping month—December. One must agree that trade may possibly suffer during the extreme height of the election for, with the masses, all other considerations are thrown to the winds in the excitement of the moment. But as the polling will be all finished quite a week, and in many constituencies, a fortnight before Christmas, buyers have ample time to make good. I am, therefore, of opinion that while sales may suffer to a slight extent, on the whole it cannot very materially affect the turnover of those dealers who confine their attention to business.

General Effect Far Reaching.

And this election, by the way, is to finally determine the future governmental policy of this country. Importers of goods from the Continent, America and other countries are keeping a watchful eye upon events. The return to power of the free traders will naturally ease their minds, while the success of the tariff reform party must deepen their

anxiety of the future. But is there any need for anxiety? Not this time at any rate. Even supposing the tariff party were returned to hold the reins of government, they have arrayed against them on this question the Liberal, Labor and Irish parties, so that to successfully carry their tariff scheme at least 100 seats must be gained at this election. Certainly it's within the realms of possibility, but not probability. Wherefore the importers of talking machine goods have little cause to disturb the peacefulness of their slumbers. I write, of course, under a disadvantage, because the elections will be all over by the time this reaches my readers. In its bearing upon the course of this industry I have ventured to predict the result, that is all. *Nous verrons.*

Xmas Trade Prospects.

With the Manufacturers.—Things are indeed great. Machine and record sales are booming. That is the sum and substance of the information placed at my disposal by the chief manufacturers. And it is not a spasmodic trade, but steadily progressive all the time. Quite 50 per cent. of the demand is for machines priced up to three guineas retail. The balance is made up of the medium and higher priced lines, for which the demand is exceedingly satisfactory. Altogether the manufacturers' resources are taxed to the utmost capacity of their factories. In fact, the demand far surpasses the supply. And in one or two instances night shifts have been introduced.

The Gramophone Co. seem to be determined to secure the lion's share of the disc trade. They are spending thousands of pounds on advertisements—whole pages in the Christmas numbers of over a dozen of the best illustrated weeklies in December alone—three whole pages in the Daily Mail and other papers. This is apart from their splendid issues of literature for the dealers' use. No wonder their business is increasing by leaps and bounds; to such an extent that the Hayes factory management find the 24-hour day too short. Every minute of the day the sound of the machinery may be heard. Never was such a time. It surpasses the boom year of 1906-7. Far ahead, in fact, and the orders still come in, faster than they go out, despite the aforesaid manufacturing facilities. Yes, Gramophone business is good.

The Columbia Co. gives as a fact that so great has been the rush that in the middle of November they were obliged to refuse all orders for machines required to be delivered before Christmas. The orders for Columbia-Rena records, too, are almost overwhelming. More have been sold in November and December than the whole of last year; partly due to the fact that the majority of the up-to-date selling titles are usually first out on Columbia records, and partly due to increased advertising this year in the largest circulation journals. I may instance the Mail, Mirror, News, Strand and other magazines and Sunday papers, in addition to certain telling advertisements in the leading provincial organs; of which the dealer gets the benefit.

National Phonograph Co. are one of the largest sufferers. They get no relaxation from the incessant call upon their manufacturing facilities. For this season's trade in combination phonographs, Standard and Amberol records has been surprisingly great. Traders find them, however, equal to the occasion, for each order has been handled with promptness and efficiency. There was one of the first and largest lists of Christmas titles to be issued. And with this result. Immediate receipt of big orders. And immediate dispatch. The dealer is selling the goods as fast as he can get them. For Edison quality and Edison advertising in all the best mediums is at the back of it.

Pathé Frères, too, are well in the running. Their manager, S. P. Turner, always an optimistic man, wears a smile. The famous pattern that won't come off. For he has increased the company's business

enormously. Backed by Pathé quality-products, an irresistible combination, judged by the satisfactory trading accounts of this year, which are on the upward trend all the time. Sales, in fact, are beyond all expectation, and December prospects would seem to indicate the crowning of a record year.

J. E. Hough, Ltd., are "not doing so badly," says Mr. Hough (musingly). There's a lot behind that; coming from the father of the trade, too. From my own observations activity reigns at the Edison Bell works. Looks decidedly flourishing there, in fact. New presses and other machinery, wages bill increasing, what more evidence could one want? None at all. The factory, big though it is, isn't big enough. Trade orders boss the show. And it is not surprising. For they manufacture down there no less than over a dozen different models of phonographs, half a dozen of disc machines, three disc records, and three (or four, is it?) cylinder records, apart from the Home Recorder, albums, sound boxes and other accessories. The firm are hard pressed, but they are gradually satisfying all demands for the Christmas trade. Yes, they are not doing so badly at the Edison Bell works.

The Zonophone Co. report unprecedented trade. They were quite 1,000 machines short of the demand at the time of my call, but expect soon to get ahead again. Record business is also booming. Especially in Christmas titles.

O. Ruhl, Ltd., have been trading the last six or seven years. But business was never so satisfactory as this season. Lindstrom's machines selling in their thousands every week. Beka record sales are also highly satisfactory. Christmas list of titles is especially strong. Contains all the gems appropriate to the season. And despite good service the company have all their work cut out to keep level with the demand.

Twin Record Co.'s report breathes of the same old quarrel. Supply and demand at loggerheads. Understand each other. But owing to circumstances over which they have no control they can't be friends. The company, however, are optimistic. Think time and the softening influence of the approaching festive season will result in unity, of which the prospect is bright.

At the Klingsor works trade is reported as excellent. Klingsor and Polyphon machines in great demand; also the Klingsor record, of which a specially pleasing list of titles has been issued for December. Dealers have been quick to recognize it

The STROH VIOLIN

☞ A new instrument possessing a VIOLIN quality of tone of great beauty and remarkable power.

☞ The "Stroh" is constructed largely of aluminum but the absence of any metallic quality of tone is another notable feature.

☞ All interested should write for an illustrated booklet to the Sole Makers.

GEO. EVANS & CO. 94 Albany St. London, Eng.

OLIVER DITSON CO.
150 Tremont Street BOSTON
NEW YORK and PHILADELPHIA

FROM OUR LONDON HEADQUARTERS—(Continued.)

by placing good orders. Export business is exceedingly large for the time of year. And altogether trade conditions could scarcely be better.

Other Manufacturers.—Barnett, Samuel & Sons, Favorite, Homophone, Flex, Microphonograph and Phonogrand companies all issue satisfactory reports and view December prospects optimistically.

With the Factors.

Murdochs, Lockwood, Craies & Staoridi, Brown Bros., Wallis & Co. and others of this city find business shaping out in good form. Dealers are placing fairly large orders for this season's models, and the Christmas record titles are selling freely. While not stupendous, business with the factors generally is considerably in advance of last year. The only trouble is getting the goods, but the manufacturers are doing their best to supply them quickly; a fact which calls for a certain amount of indulgence. Altogether trade with the wholesale houses is decidedly satisfactory, and Christmas prospects could not be brighter.

Export Trade Hints.

During the past month or so our general export trade has shown a wonderful increase both in volume and value. On the average the increase is something like £8,000,000 a month, and although the talking machine exports represent but a small portion of these figures it is nevertheless a pleasing fact that over-sea buyers place an ever-increasing amount of business with the British machine and record manufacturers. And as I pointed out in my last report, the latter are offered every opportunity to cultivate trade abroad. Local conditions, requirements, tariff duty, customs charges and information of trade openings, extent of foreign competition and other matters of commercial interest; all are to be had for the asking from the Board of Trade. The latest report I have received from that quarter gives advice of the temporary return to this country, early next year, of His Majesty's trade commissioners in Australia and New Zealand, for the purpose of giving British manufacturers an opportunity of consulting with them as to trade possibilities and prospects in the

dominions referred to. A fine chance is thus offered to all our talking machine traders to get into touch with and profit by the useful information which these special ambassadors can furnish. Early communication should be made to the Director of the Commercial Intelligence Branch of the Board of Trade at 73 Basinghall street, E. C., London.

Board of Trade Hand Book.

A new edition of the Board of Trade hand book was recently issued. It gives particulars of trade directories (which may be consulted at their offices), the British chambers of commerce established in foreign countries, a list of the local trade correspondents in British colonies and the Colonial trade inquiry offices in the United Kingdom.

Gramophone Co. vs. Ruhl.

In the Appeal Court, November 8, the Master of the Rolls, with Justices Fletcher, Moulton and Farwell, heard the appeal of the Gramophone Co. against the verdict of the lower court, who found that the tone-arm used by O. Ruhl was not an infringement of the Gramophone Co.'s patent. Without calling upon counsel for the defense their lordships gave judgment, of which the following is a brief summary: "The question they had to decide was, did the tone-arm complained of infringe the Gramophone patent. They considered that a continuous taper was an essential part of the patent, that the tone-arm in question was not a continuous taper and therefore did not infringe. The appeal would be dismissed with costs."

Incidentally Mr. Justice Fletcher Moulton remarked that in his opinion "the model of the Columbia machine, which was put in at the trial as prior user, did not come within the scope of the patent." This is, however, merely an ex parte statement, and as the point was not argued it has to be taken for what it is worth.

A Strong Zonophone Test.

Having in view the nearness of the festive season the December Zonophone list is a particularly strong one. All the titles, in fact, are of a good selling character, and the warmth of their reception by traders is very satisfactory, indeed. Records to

hand include the following: "French Comedy Overture," by the Black Diamond Band; "The Ladybird's Review" and "Chocolate Soldier" waltz (Strauss), both excellently rendered by the Peerless Orchestra; "My Dreams" (Tosti), by Ernest Pike; "A Hundred Fathoms Deep" (Shattuck), splendidly sung by our old friend, Peter Dawson; "A Rainy Afternoon," by George Lashwood, and "You Can't do Without Each Other," by Whit Cuncliffe.

Delay on Copyright Bill.

Another delay in the passing of the Copyright Bill must follow as a result of the dissolution of Parliament. Certainly it should be finally sanctioned sometime during the next few months.

Big Company Fails.

Stockall, Marples & Co., Ltd., of Clerkenwell Road, London, importers of pianos and factors of talking machines, etc., have called a meeting of creditors. The statement of affairs presented by the voluntary liquidator, W. Lewis White, disclosed liabilities to unsecured creditors of £13,302 odd; net assets, £17,463 13s., showing a surplus, subject to realization, of £4,161 4s. 4d. The receiver was appointed on behalf of the debenture holders, and Mr. White further stated that during the twelve months ended March 31 of the present year the sales amounted to £38,023, while during the five and a half months since and up to the appointment of the receiver the sales were £14,684, which was a considerable increase compared with even time last year. The bulk of the trade was done in the three months preceding Christmas. Since the formation of the company, two and a half years ago, gross profits totaled £16,513, while the total expenses amounted to £23,654. In reply to a question, Mr. White said the company were quite solvent, as against the loss they had the shareholders' capital of £11,000, and consequently (last March) there was a surplus of £7,000. Mr. Stockall announced that it would be in the interests of all concerned that a plain statement should be put before the creditors before any proceedings were taken against the company. Five of the principal creditors were elected to confer with the liquidator.

A Visitor from the States.

B. F. Philpot, of the recently incorporated Indestructible Phonographic Record Co., of New York, paid a visit to this city at the latter part of last month. Owing to his many duties in connection with the company he was obliged to return after a stay of about a week.

"Voice Photography" in France.

The Paris correspondent of the Telegraph reports that "Dr. Marage has invented 'voice photography,' which he claims will be of immense service to singers, actors, public speakers and also, indirectly, to musical critics. The sounds of the voice strike a small disc of india rubber, with which a minute mirror is connected in such a way that it reproduces exactly every motion of the rubber drum. A ray of light is thrown through a lens on to the mirror, which reflects it at varying angles as it itself moves. A sensitive film is unwound by clockwork at a fixed speed before the mirror and receives the impression. A picture of varying lines is thus obtained. The inventor claims that this photograph of the voice will reveal whether a singer's voice is true, whether he has sung out of tune and, if so, exactly where and how far out of the true pitch; whether he sings in time, whether his voice is sonorous and carries, whether he enunciates clearly and whether he breathes properly and has sufficient lung power to sing effectively. All these particulars can be ascertained easily by anyone who learns how to read a voice photographed. For instance, the vibrations of a note are recorded and can be measured by those of the proper pitch. According to two pictures which are published, but which may have been slightly exaggerated for the purpose, a true note is represented by a series of parallel, equidistant and equal bands, while the portrait of a wrong note is of a strange and irregular pattern. All this information will naturally be of much service to the singer. The inventor mentions another particular use to which the machine may be put. Suppose a musical critic writes that a singer habitually sings out of tune and is sued for libel. All the court will have to do will be to order the singer to sing into the apparatus and convict either the critic or the singer on the evidence of the photograph. What Dr. Marage ought to invent is a pocket voice camera, specially for musical critics, who, when sued for libel because they said a prima donna sang flat, could thus produce incontrovertible justificatory evidence in court."

Edison Bell Literature.

A batch of seasonable literature reaches me from the Edison Bell Works (J. E. Hough, Ltd.), embodying lists of Sterling and N. P. cylinder records, the new "Little Champion" 9-inch double phonacut discs, Edison Bell ordinary 10-inch and the first list of titles on the new V. F. double discs. A glance through them reveals the fact that this all-British firm are as up to date and enterprising as the compilation of quick-sales lists of titles as any, and dealers abroad may order from Messrs. Hough, Ltd., in the full knowledge that their best interests will be satisfactorily considered and attended to in all respects. Those of my readers who have not yet ordered samples of the company's new V. F. (velvet face) record are certainly missing one of

the finest selling lines of the day. Application to Glenfall Road, London, S. E., will bring along all the information you can possibly want in regard to cylinder and disc machines and records, sound boxes and the disc home recording device, and my readers should not delay in sending the company their trade card for particulars of these goods.

Ideal List Compilation.

The Gramophone Co. announce that the result of their Ideal list competition will be published January 1 and form part of that month's supplementary list of records. Mr. Landon Ronald, Madame Clara Butt and Henry J. Wood are the competition judges.

Gramophone in the Political Fray.

The Conservative vans, each equipped with a gramophone, generally meet with a very friendly reception when on tour. But sometimes the contrary, as was demonstrated the other day at Yeovil, where the speaker was pelted with stones. In the course of the melee the gramophone operator got in the way and was struck in the mouth by missiles, several of which dislodged some of his teeth. What happened to the gramophone is another story, best left untold.

Tolstoi Record in English.

In addition to several gramophone records made in German, French and Russian by the late Count Leo Tolstoi, particular interest is attached to his latest record spoken in English, entitled "Thoughts from the Book for Every Day." No matter what religious belief a man holds, this record will undoubtedly appeal to all owners of gramophones, and that being so, dealers everywhere should feature it. It is a 10-inch record, sold at the usual price, 3s. 6d.

An Excellent Gramophone List.

The Gramophone Co. have also issued this month a series of records of the "Tales of Hoffmann," by the Thomas Beecham Opera Co. "Legend of Kleinsack" and "When Love Is but Tender and Sweet" are beautifully sung by Walter Hyde, with chorus. "Drig, Drig, Drig" is rendered by the Beecham Opera chorus, while Miss Caroline Hatchard is responsible for "The Doll Song." "Tiefland," selection I and II (D'Albert), and Johann Strauss' overture from "Die Fledermaus" are two other fine records this month, excellently rendered by the Beecham Symphony Orchestra. The foregoing records, by the way, represent three of the great successes of the Covent Garden Autumn Opera season.

Of the ordinary monthly issues the December list is replete with good selling titles, as follows: "Morning, Noon and Night Overture" (Suppé), "Capricho Espanol," "Moriama" (Espinosa) and "The Messiah" (Handel), selection I and II, by the band of H. M. Coldstream Guards. "Kiss of Spring Waltz" (Rofle) and "The Lockstep" (from "The Man from Mexico"), Bohemian Orchestra; "The Message" (Blumenthal); "O, Mistress Mine" (Sullivan), Evan Williams; "Beyond" (Frank Lambert), John Harrison; "Drink to Me Only With Thine Eyes," John McCormack; "No, John, No" (Sharp), Charles Tree; "Old Farmer John" (Russell), Harry Dearth; "Rip Van Winkle" (Carroll), Peter Dawson; "He Shall Feed His Flock," "Mes-

siah" (Handel), Madame Kirkby Lunn; "Catch Me" (M. Cooper), Miss Margaret Cooper; "The Little Silver Ring" (Chaminade), Miss Gertrude Lonsdall; "I Heard a Voice in the Tranquil Night" (Glover), Miss Perceval Allen and Miss Edna Thornton; the letter song duet from "The Chocolate Soldier" (Oscar Straus), Miss Edith Kirkwood and Richard Pembroke; "Every Lassie Loves a Laddie," Harry Lauder; "Ou La La!" (Crawford), George Grossmith, Jr.; "Fancy Meeting You at the Isle of Man" (Hargrave), Mark Sheridan; "Italian Christmas Pastoral" (Massenet—Macmillen), Francis Macmillen, and "Lied" (Schumann), Renard Trio.

To Reduce Telephone Rates.

According to the Postmaster General's recent statement, the telephone rates between England and France are to be largely reduced in the near future. Arrangements are under consideration for facilitating the general use of telephone numbers in place of street and house numbers, as telegraphic addresses to which telegrams can be delivered by telephone instead of by messenger. Proposals are also under consideration for a large reduction in the cable rates charged on the chief extra European routes for cablegrams of a non-urgent character. And next year, probably at the time of the coronation, we shall be able to buy stamped post cards for ½d. instead of ¾d. and stamped letter cards at 1d. instead of 1¼d. Stamped wrappers and envelopes will be sold at prices slightly lower than at present.

Violins Not to Be Judged by Labels—How to Judge a Violin.

The genuineness of a violin was a point at issue in the County Court recently. One witness said he never went by the labels on a violin, for they were not a guide to its maker. Labels were often taken out of genuine violins and put in inferior ones. He judged a violin by its shape, the varnish, the scroll, etc. Musicians only considered the tone.

Edison Records for January.

The advance list of new Edison records for January is to hand. That the National Phonograph Co. mean to do all in their power to keep trade up to concert pitch is sufficiently manifest by the splendid list of titles they have issued for that month. It is a good start for the New Year and will largely assist to keep up the dealers' enthusiasm, which, unfortunately, is apt to slacken a little after the December rush. Let the list speak for itself: Grand Opera Amberol Records—"Pescatori di Perle—Mi par d'udir ancora" (Bizet), (sung in Italian), Aristodemo Giorgini; "Trovatore—Vanne Lasciami" (Verdi), (sung in Italian), Marie Rappold; "Traviata—Di Provenza il mar" (Verdi), (sung in Italian), Ernesto Carro; "Il Flauto Magico—Aria della Regina" (Mozart), (sung in Italian), Marie Galvani. Amberol record by Sarah Bernhardt, "La Samaritaine (Act 1), La Samaritaine reconñre Jesus au puits de Jacob," recitation in French. Edison Amberol Records—"Excelsior March" (Vollstedt), National Military Band; "Queen Among the Heather" (Lauder), Harry Lauder; "The Storm Fiend" (Roedel), David Brazell; "I Can't Keep My Eyes

The Needle of To-day—The Needle of the Future

Off the Girls" (Laurence and Gifford), Miss Florrie Ford; "Angel's Serenade" (Braga), (cello solo), Jean Schwiller; "Walk, Walk, Walk" (Belmont and Green), Stanley Kirkby and Joe Belmont; "How to Be Happy Though Married," Arthur Omond; "Stephanie Gavotte" (Czibulka), (concertina solo), Alexander Prince; "The Bandolero" (Stuart), Peter Dawson; "Gems of Wales" (arranged by G. W. Byng), National Military Band; "Softly, Unawares" (Paul Lincke), Sousa's Band; "Love Dreams" (H. Blanke-Belcher), W. H. Thompson; "Every Little Movement" (K. Hoschna), Miss Narelle, Mr. Potter and chorus; "Mother Machree" (Olcott and Ball), Will Oakland; "Bonnie Sweet Bessie" (J. L. Gilbert), Miss Marie Narelle; "Amo—Intermezzo" (H. Ingraham), Edison Concert Band; "The Girl of My Dreams" (K. Hoschna), Harry Anthony and chorus; "Sweet Dreams of Home" (H. Engelmann), (bells solo), Charles Daab; "Home, Sweet Home" (J. H. Payne), Knickerbocker Quartette; "Moonlight in Jungeland Medley" (Dempsey and Schmid), New York Military Band. Edison Standard Records—"The Cockney Band Two-Step" (Valentin), National Military Band; "The Pretty Little Girl from Nowhere" (Rogers and Neat), Stanley Kirkby; "Another Little One a Coming Out" (Carter), Arthur Omond; "Girls Beware of the Barefaced Men" (Haines, Maher and Carter), Miss Florrie Forde; "Austrian Cadets March" (Parcs), (concertina solo), Alexander Prince; "Farandole from L'Arlesienne" (Bizet), Victor Herbert's Orchestra; "The Bell Gavotte" (M. Watson), (bells solo), Charles Daab; "Dear Old Ma" (E. R. Ball), Will Oakland; "Wonderful Words of Life" (P. P. Bliss), Anthony and Harrison, and "Southern Ideal March" (J. C. Heed), United States Military Band.

An Active Inventor.

Daws Clarke, maker of the popular Flex dia-

phragm, is one of those inventors who never seem satisfied with their work. He expends a great amount of time in experimenting, and splendid though it is for good reproduction, has recently been successful in distinctly improving the tone volume of his diaphragm.

Any American talking machine firms desirous of a good mail order line are well advised in negotiating with Mr. Clarke for sole territory agency.

Secure Grand-Prix at Brussels.

At the Brussels International Exhibition the Gramophone Co., Ltd., secured the Grand Prix. Congratulations.

Churches Install Gramophones.

So many of the well-known hymns, anthems, carols, etc., have been recorded by the Gramophone Co. that quite a number of churches throughout the country have installed an outfit for use during the services.

Interesting Beka Record List.

An attractive list of titles has been issued by the Beka Co. for December, among which the following seasonable selections will strongly appeal to all classes of record dealers: "Pantomime Souvenirs," Part I. and II., introducing excerpts from no less than ten of the expected panto. hits, selection and waltz from "The Chocolate Soldier" (Strauss); "Star of Bethlehem" and "The Holy City," by Phillip Ritte; "The Miner's Dream of Home" and "Don't Go Down in the Mine, Daddy," both by James Hudson; "Fall in and Follow Me" and "The Pretty Little Girl from Nowhere," by Jack Charman; "The Whist Drive" and "Our Wedding," by Harry Bluff, and two of Billy Whitlock's humorsities, sung and composed by himself.

Gramophone Co's Profits Increase.

The Gramophone Co.'s balance sheet for the past financial year shows a profit of £155,600, as against £58,000 the previous year. A final bonus of 10 per cent. brought the total dividend for the year up to 15 per cent. on the ordinary shares. The

amount due from debtors has fallen by £12,700, and altogether the position of the company would appear to be decidedly satisfactory. Notwithstanding the recent adverse law decision, Gramophone shares are now quoted at (time of writing) 36s.

Lockwoods' Fine Catalog.

"Talking machines we sell" is the apt title given to a fine catalog production issued by Lockwoods, the Zonophone and Twin factors, of this city. Each instrument is illustrated in true-to-life colors, thus presenting a most attractive and effective showing. In addition to the featuring of the Perophone series of machines, ranging in price from 25s. up to £7 10s., and several models of the new Zonophones, particular attention is directed to the "Tresor" motor and the Perfecta Radiophone sound box. Such a descriptive catalog as this will prove of the greatest assistance to dealers, and indeed I learn that already considerably over 50,000 have been ordered and paid for by the company's enterprising agents throughout the country. The dealers have their name and address printed on the catalog, and as retail prices only are mentioned therein, it should open up valuable possibilities for the development of local trade.

Anent New Columbia Records.

Grand opera for 2s. 6d. Listed on a Columbia-Rena ten-inch record this month are these celebrated arias: "La Donna e mobile" and "Vesti la Giubba," by the Columbia new tenor, Walter Wheatley. As he is a grand opera artiste, it is but right and fitting that his work as such should be judged by the multitude. Both songs are sung in English, of course, and we frankly admit that they are even more acceptable as such than in a "furrin lingo," heterodox as it may be to say so. And we think the verdict of the public will be the same when they have heard what Wheatley can do.

Peary's Christmas at the Pole.

JOHN G. MURDOCH & CO., Ltd., 91 & 93 Farringdon Rd., LONDON, ENG.

a little folder telling the story of Peary's Christmas at the North Pole with his Columbia graphophone. They have practically left Peary to tell the story of his graphophone in his own words, and it is interesting and quite conclusive evidence to learn that on page 173 of Peary's book the gallant explorer says:

"Christmas day. After dinner came the dice-throwing contests and the wrestling and pulling contests in the fore-castle. The celebration ended with a graphophone concert."

Peary also wrote that company a letter in which he says that the machine referred to is the same that he took with him on his previous expedition of 1905-1906—remarkable testimony to the hard-wearing qualities of the Columbia workmanship.

Special Christmas Records.

The manufacturers have considerably strengthened their Christmas record lists this year by the addition of titles covering well-known hymns, carols and dance music, not previous recorded. In this respect one of the most popular lists in the trade is that of the Columbia Co.'s, which literally teems with up-to-date titles appropriate to the festive season. The Edison impression is far ahead of all the phonograph companies' lists, and, as I gather, contains more titles than is to be found in any other list, be it disc or cylinder. No less than eighty special Christmas selections appear in the Zonophone list, while Twin, Beka, Jumbo, Favorite, Pathe, Edison Bell, Klingsor and others all have made satisfactory provision in this direction, and it is a pleasing sign of the times that not only the quality of the selections, but of the performers also, indicate that more and better value is offered each succeeding year. Concrete evidence of this is found in the recording of titles on half a crown double discs by such famous and select bands as the Life, Scots and Irish Guards, in addition to excerpts from most of the well-known operas, by leading operatic vocalists of the day.

I should not be doing justice to my readers without giving a few particulars of the excellent Christmas fare provided by the Gramophone Co., whose list, from the view of quality, is generally conceded to have no rival. Apart from the galaxy of hymns, carols and such like, their offerings embody the finest selection of dance music ever issued in the form of records. Perhaps the two most popular dance orchestras of the day—Herr Iff's and Gottlieb's—certainly the best combination of their kind, are responsible for the recording of a goodly selection of that class of music which irresistibly keeps the ball rolling at Christmas parties and affairs of a like nature. These are the class of records which constitute a dealer's best trading asset during the month of December, and evidence in the shape of big orders is convincing.

PROVINCIAL NOTES.

From reports to hand it is apparent that except in a few districts a general state of optimism prevails with dealers throughout the kingdom. The

public has now made a move in the right direction, as a consequence of which talking machine retailers find sales prospects exceedingly good. Of course, the provincial factoring houses are just about as busy as they well can be, for the distributors' orders come in faster than they can be despatched. Not due to defective service, but it is only natural that some little delay must inevitably occur during such a rush time. And, as a rule, dealers hang up their instructions until the last minute, expecting to get their goods the next. As in London, the provincial factors have experienced the same difficulty in getting supplies from the makers, while in some instances serious complaints of delay have been made. It's a very annoying situation not to be able to execute orders when one gets them, but as certain of the manufacturers have advised, they are doing all in their power to mitigate delays and are delivering as quickly as possible.

Trade in Newcastle Very Brisk.

Newcastle way trade is very brisk in Zonophone, Edison Bell, Columbia and Beka products, not to mention the Edison goods, which are strongly featured by Newton & Co., the largest factor of that city. In Yorkshire things are well on the move for the chief industries are in an exceedingly healthy condition, good wages and employment having a direct bearing upon the situation, with the result that talking machine and record sales are much better than even at this time last year. Bradford factors and dealers handling Edison, Columbia and Gramophone lines would appear to be doing excellent business, judging from all reports.

"Cinch" Machines in Demand.

Twin records and the wonderful Zonophone "Cinch" machines are in great demand in the county of Lancashire, and Edison products sell freely. Traders in and around Liverpool and Manchester express themselves very optimistically now that the cotton industry is in a more settled state, and think December sales will not be so much below the average after all. Edison Bell trading is well on the increase in these towns, while Klingsor, Beka, Favorite, Columbia, Pathe and other leading lines are going strong. Dealers' preparations for a good Christmas trade are well advanced, and it is generally conceded that prospects were never brighter—local circumstances considered. Owing to the existing boilermakers' strike Barrow-in-Furness dealers can see little hopes of a good season; indeed, many will find a difficulty in making both ends meet this year, for an early settlement of the trouble is not expected. Things are busy at the Colmore Depot in Birmingham, Edison, Zonophone and Twin lines being very popular with midland dealers, who expect a better season this year than last.

Coal Strike Hurts Business in Wales.

In Wales the coal strike has upset trade considerably. Thousands of miners are without the necessaries of life, and very little money is being disbursed by the unions. The outlook for talking machine traders is therefore anything but satisfac-

tory. Optimistic as ever, Mr. Tilley, of Cardiff, is keeping things moving at a fair pace by sheer energy, although it is very doubtful whether the dealers in and around the strike neighborhood can shift the stuff. But for all that Welsh trade, on the whole, cannot be said to be bad.

T. Edens Osborne in Evidence.

The Belfast papers always have something interesting to report of the enterprising Edens Osborne, whose latest act, or, rather, demonstration of loyalty, as one paper put it, was the Auxetophone rendition of the national anthems, when Lady Aberdeen drove past his premises on her way to the City Hall recently.

Ammunition for Orangemen.

The Ulster Guardian gives currency to the statement that if home rule is passed the Orangemen will resist, even to the use of force. The report, which is an amusing political skit, continues:

Colonel Wallace, the generalissimo of the Ulster rebel army, was discovered by our representative in T. Edens Osborne's well-known gramophone emporium. He was engaged in singing into one of the recording machines. In response to an inquiry, Colonel Wallace broke off in the middle of a verse of the "South Down Militia" to state that it was his intention to have one thousand records of his well-known ballad manufactured for use against the enemy. Musical experts had informed him that it would prove more deadly in action than lyddite shell. Asked for particulars as to his probable plan of campaign, the hero of a hundred fights said that on the outbreak of hostilities he purposed to seize the person of Dan McCartan as hostage and to despatch the South Down Militia by a Y. M. C. A. excursion to Dublin and let them loose there. Beyond these drastic steps he refused to unfold his strategy. Our correspondent left him warbling the last verse of "The Terror of the Land" into the phonograph.

With all this complimentary advertising no wonder Mr. Osborne is experiencing a fine season as regards talking machine sales. It simply demon-

strates the result of enterprise, and sets a good example to dealers in other towns.

New Clarion Record Titles.

The Clarion Record Co. draw attention to a very special list of titles which they have recently issued. Every one is a good selling title, and certainly it would be difficult to find a stronger combination on any list. These red label cylinders have a fine surface and their tonal quality marks a high standard of recording. Dealers applying to the company at Wandsworth, London, can obtain lists and terms of trading, etc.

Amberola Sales Increasing.

Reports reach me from the leading factors and dealers that the Amberola sales are steadily progressing, the machine being an object of much praise generally.

WHAT MAKES THE GOOD EMPLOYEE.**Some Timely Comments Which Apply to Talking Machine Men at Home and Abroad.**

What makes a good employe? Opie gave the answer when he was asked with what he mixed his paints. "With brains, sir," said the painter. Nothing under heaven but brains can make a good employe. Honesty, initiative, loyalty—what are all these but phases of an eager, active and alert intelligence? I ask you. Amid the bewildering complexities of modern life, only the man who has brains is able to understand not only where he is, but whither he is going. He only is a good employe who understands his relation to the institution of which he is a part, his duties and obligations to that institution and to his fellow workmen.

All accomplishment is the result of co-operation. But no man or no woman can co-operate to the utmost if he does not understand that he is a co-operator. The good employe, because he has brains, realizes what it means to accept a job. He knows that in taking the place which is offered to

him he agrees to sell more than his mere presence in a certain place for a certain number of hours a day. The good employe, because he has brains, knows that whatever agreements may have been made by others when they accepted their jobs have absolutely no bearing upon his agreement. The good employe knows that he has agreed to do the work set before him as well as he is able to do it, and that even if he be the only one in the place with brains enough to see clearly the true nature of his obligations, it is none the less incumbent upon him to carry out his obligations as if he were the only person that had been hired.

In the slackness, indifference and laziness of others the good employe sees not an example to be emulated, but rather a danger to be avoided if he would preserve his own ability, self-respect and future prosperity.

And he knows that responsibility is to be welcomed; and that only fools and weaklings dodge it. The employe who has brains, knows that the job he has to-day is but a period of probation, that by what he makes of his present work and opportunity he will be judged when a vacancy occurs in the rank above. The good employe realizes that honesty is not only the best policy, but the only policy. He knows that there is nothing so foolish as dishonesty, nothing so idiotic as envy, nothing so sensible as working for right all the time.

The intelligent worker knows that labor ceases to be labor when he is interested in it, and that the whistle blows before you expect it if you keep your eyes off the clock. The employe worth having knows that mistakes will happen to the best of us, and that the only decent, manly and intelligent thing to do when a mistake is discovered is to notify those whose business it is to know, so that the damage that has been done may be undone as soon as possible. Because he has brains, a good employe knows that he has no right to so dispose of his time after working hours that his efficiency shall be impaired while he is at work. And he

knows that anything that injures the boss indirectly does far more injury to himself. And he is a man who expects only a square deal and is always ready to give it. He wants no man to be blamed for his mistakes, and does not expect to be blamed for those of others.

The intelligent employe is loyal, because he knows that it pays. The good employe realizes that the inappreciation of his boss does not absolve him from his obligation to serve faithfully, earnestly and efficiently while he remains a part of the institution. He knows that if the employer lacks appreciation, the only proper thing from every standpoint is to find one who can appreciate. The intelligent man knows that there are times in the history of almost every concern when the employers would gladly cease to operate if it were not for the fact that hope of future profits and consideration of their employes keeps the wheels moving even at a loss. The employe who deserves to be called "good" knows that a lot of people will judge his employer by what they see of and hear from the employe. Therefore the intelligent employe keeps the secrets of his employer, talks with pride of his institution if he can, and if he cannot, keeps still.

The good employe knows that appearances count and that while a shabby, or careless man may be a good man, people must judge quickly. Above all, the good employe is considerate of others' rights, says the Silent Partner. If he is clothed with a little authority he exercises it solely for the interests of the institution, and is careful that his personal feelings, his own likes and dislikes, do not color his attitude toward those around him. He realizes that the example he sets may be followed by many others, and therefore he sets the best example he may. He will not criticize those over him, much as they may deserve criticism, except in such a way as to advance the efficiency of the institution, nor will you find the good employe among the listeners in the group of knockers.

TRADE FABLE

No. 6

If Jack Roberts had been numbered among the huskies who encumbered the face of the map in the old bewhiskered days when forks were a luxury and when every man was labeled for what he was rather than in accordance with the cognomen of his immediate male ancestor, he might have been known in the business world as the "Holiday Kid." The average Wagnerian disciple's enthusiasm for the noisy stuff was a mere incident compared to the high regard that Roberts lavished upon the selling possibilities for the month of December.

As soon as the New Year celebration had been ended and the bromo seltzer laid carefully away, this gent would begin to dope out just how he was going to sidetrack the business that was bound to happen during the following December. By the end of January he had filled several reams of foolscap with details of clever plans for putting the bee on his competitors. March first saw the heels of his Regals worn to a frazzle and the top of the desk badly scarred as a result of his reposing comfortably in his office while drawing mental pictures of Santa Claus slipping him the mitt and greeting him as a brother, as a reward for the manner in which he had placed talking machine outfits in the best homes for Christmas morning surprises.

By the middle of the month his nerves gave away completely whenever a customer came in and disturbed his thoughts and when the summer arrived a shovel was needed to dig six months' old records from out of the dirt that lined the shelves—and the Christmas wreaths still decorated the walls.

With December only four months away Bobbie Boy began to perk up and take a real interest in his business, but:

Little Sammy Jones, located several blocks down the street, did a mighty neat holiday business all by his lonesome and with not more than ordinary preparations in regard to having a sufficient stock on hand. On January second he began the next year's business by slapping a few ads in the local sheet, giving semi-weekly recitals and making a mighty loud noise to let the crowd know that he was still doing business at the same old stand. Any dust on his stock arrived there over night and got the bum's rush early in the morning. The only place where the dust was safe was on the seat of his desk chair, because he was so busy that he made out the orders for more goods and the checks to pay for them while standing up to save time. A prospective customer found "Welcome" written on Sammy's face as well as the door mat and the people who had purchased machines during the holiday season were surprised and generally lured to the store by the big mail received from said Sam party and running from catalogs to circular letters.

By the end of July, when Roberts was just waking up to the fact that he was supposed to be a business man and that Christmas was coming, Sammy was so busy handling the rush that he dreaded to think of the way he would have to

hustle to supply talking machines for Christmas presents.

When the next New Year arrived Sammy began to figure on whether to open a branch store or to enlarge his present quarters, because the police began to complain about the way the crowd blocked the sidewalk in front of the store.

On January 2 Roberts sadly looked over the cash in hand, bills receivable and bills payable, wept softly over the latter and then sent for his lawyer, an expert in bankruptcy. The new window display consists of a large sign—"Store to Let."

Moral: Because a man thinks he's a bear in business does not signify that he can hibernate for eleven months in the year and still get away with the kale.

MOVING DEAD STOCK.

Secretary Roush, Secretary of National Talking Machine Jobbers' Association, Suggests an Excellent Plan Which Is Worthy of Consideration.

J. C. Roush, secretary of the National Talking Machine Jobbers' Association and treasurer of the Standard Talking Machine Co., Pittsburg, Pa., was in New York recently, and in the course of a chat stated that he expected about January 1 to start an active campaign in the way of concentrating interest in the convention of the association to be held in Milwaukee next summer.

He also mentioned a very important matter which should have a wide circulation among the jobbers and which emphasizes the value of the association. It is this: He will be glad to hear from jobbers who are anxious to clear out dead stock from their shelves, such as horns, cabinets, records, old style machines—in fact, anything that they desire to get rid of. If they will write him a description of what they have, sending several copies, he will be glad to distribute them among members of the association who may have demands for such specialties. In this way that which is dead stock can be made a live asset in the way of real money.

He instanced a jobber who had a lot of certain style machines and records which he was unable to dispose of. He sent the list to Mr. Roush and was placed in touch with another jobber who had a market for just these goods. It will be an excellent plan for jobbers to write Secretary Roush on this subject. The association is working for the interests of all, and the more frequently members get in touch with the secretary the better.

COLUMBIA FOR AFRICAN CONSUL.

(Special to the Talking Machine World.)

Washington, D. C., Dec. 6, 1910.

The local establishment of the Columbia Phonograph Co. has just finished selecting a library table, or Grafonola-Regent machine, and 150 grand opera records, along with a large supply of needles and other necessary supplies, for shipment to one of the consul-generals of the United States in Africa. This outfit has been selected with the greatest of care.

The Columbia Co.'s Washington store has probably shipped more outfits of talking machines to unique places and persons than any other dealer in the business. It had the distinction a year or two ago of having had made to order the smallest talking machine in the world, as well as the largest one ever manufactured. Among old talking machine men this will be remembered as having been manufactured especially for the Shah of Persia.

Adolph Capeclatro, for several years employed with Marrone & Lofaro, of Utica, N. Y., has opened a store for the sale of talking machines, pianos, musical instruments of all kinds, music, etc., in the Rossi Building, at 672 Bleecker street, under the name of "The Progressive Store."

MR. RECORDER, do you know my WAX "P,"

A CHAT WITH CONSTANTINO.

The Clever Tenor of the Boston Opera Company Discusses the Educational Value of the Records He Has Made for Columbia Phonograph Co. with World Representative.

(Special to the Talking Machine World.)

Boston, Mass., Dec. 8, 1910.

That the talking machine has wielded considerable influence in the development of grand opera, with grand opera holding a similar relation to the talking machine, is a statement that is unquestioned by the biggest and best men in the industry. It is apparent that this growth during the past few years has been of tremendous volume. One of the greatest factors in it is Florencio Constantino, the famous tenor, who sings exclusively for the Columbia Phonograph Co. It was with the thought of giving The World readers a little story of how Mr. Constantino himself viewed the foregoing that prompted the writer to have this chat with him. And with the personality of Arthur Erisman, manager of the Boston branch of the Columbia Co., as a credential, it was easily accomplished.

Arriving at Constantino's apartments we were entertained by his son, Ricardo Constantino, who recently became associated with the Columbia Phonograph Co. at New York and who was spending a few days in Boston, and Mr. Constantino's secretary, Angell Canga-Arguelles. Young Mr. Constantino was particularly enthusiastic over the sale of Columbia grand opera records, which he considered were growing in popularity by leaps and bounds.

Following this chat Constantino came in and, while the accompanying photograph looks like him, still it lacks the welcome and gracious smile that is characteristic of him. He bears an air of democracy, inherent democracy I should say, that makes the visitor feel perfectly at home, this quality of his nature being so unlike many artists just the same as his singing is so entirely different. Although Constantino knows considerable English, it is not enough to converse freely, and his son, Ricardo, acted as interpreter.

FLORENCIO CONSTANTINO.

Constantino has been singing in the United States for about five years and this is the most successful season he has ever had. His voice and singing are better each year, or even better with each performance. Five years ago people did not take the keen interest in grand opera that they do now, and five years hence will probably show a growth beyond our most vivid imagination.

"Where did you first sing in the United States?" was asked by The World man.

Through his son, Ricardo, Constantino answered: "At New Orleans, followed by a tour of the western section of the country, which occurred after singing in all the principal theaters of Europe."

"Don't you think you have done considerable, both by performance and by graphophone records, to educate and stimulate the desire of the public for good opera renditions?" he was next asked.

"Yes! Yes!" replied Constantino in English, followed by several sentences in Spanish to his son, who added: "He says that people can hear the opera and go home and hear it over again, those who do not go to the opera have an opportunity to enjoy the music if they possess a graphophone."

The World man then inquired: "What records do you consider your best—favorite ones—both for people familiar with operatic works and for students who desire a standard of tenor voice?"

"For musical people," he replied, "from 'Mefistofele,' 'Nearing Life's End'; 'Les Huguenots,' 'Fairer Than the Fairest Lily,' and 'La Favorita,' 'Spirit So Fair.' Good records for students are: From 'Faust,' 'Hail! Thou Dwelling Pure and Lowly'; 'Rigoletto,' 'Woman Is Fickle' and 'Among the Fair Throng.'"

Constantino also added that many students purchased Columbia machines just for studying the science of tenor singing and to hear the pure tone of his voice. He considers his records of great educational value.

As Constantino requires two hours' rest from talking before singing, the balance of the conversation was mostly of minor subjects anent opera and his records, implying throughout that his grand opera records were of the greatest in the world. He is certainly having a wonderful success as the star tenor of the Boston Opera House.

"Constantino has, in addition to his magnificent voice, a graceful stage presence, great dramatic ability and polish of personality and address that make him one of the most admired artists at present before the public," is a sentence taken from the new Columbia grand opera record list, which cannot be improved as a word-description of his distinguished self.

NATIONAL CO. PLANT WORKING NIGHTS.

The factory of the National Phonograph Co., Orange, N. J., is rushed with orders in every department, and they are running behind on Amberolas. Speaking of this, F. K. Dolbeer, general sales manager, said:

"Yes, the plant is not only very busy, with a full complement of men working, but the factory is being operated overtime every night. We are keeping up fairly well on general orders, but are falling behind on Amberolas. The remainder of the season will be extremely active."

WE ARE HEADQUARTERS

It is "going some" in making this statement, but we have the facts to prove that the

Talking Machine Supply Co.
400 Fifth Avenue, New York

are in a position as manufacturers to furnish the Jobbing Trade Only:—

Repair parts for all kinds of Talking Machines.

Also high-grade English Steel Needles, put up in lithographed envelopes and tin boxes in cartons.

Further, our specialties—and we stand at the head of the list so far as these goods are concerned—include Feed Nuts, Sapphires, Belts, etc. In fact, all the essential supplies needful in any branch of the business. Our new catalog for the asking.

TALKING MACHINE SUPPLY CO., 400 Fifth Ave., NEW YORK

DECLARED INFRINGEMENT OF BERLINER PATENT

Decision Handed Down in "Mechanical Feed" Disc Machine Suit of the Victor Talking Machine Co. Against the Sonora Phonograph Co. in Favor of Complainants.

The so-called "mechanical feed" disc machine has been declared an infringement of the Berliner patent by Judge Hough, Circuit Court of the United States, southern district of New York. The decision was handed down December 12, in the case of the Victor Talking Machine Co., Camden, N. J., against the Sonora Phonograph Co., New York. An appeal will be taken to the Circuit Court of Appeals. The full text of the opinion follows:

JUDGE HOUGH'S DECISION.

It is unnecessary to recite the language of the claims in suit, or to recount the numerous decisions on this patent, for defendant admits, that (Fed. Rep., 860, to 177 Fed. Rep., 248, where all the intermediate cases are enumerated) the patent in suit has been sustained, wherefore the only defence here advanced is non-infringement. Defendant's position is that when Berliner filed his application the talking machine art was not new; that in that art flat discs containing sound records were known; that the reproduction of sound therefrom by the engagement of a stylus with a spiral sound-recording groove upon such discs was also known, and that in such reproduction of sound a loose mounting of the reproducing style, so that it would be readily guided by the record itself, had been shown to the world. This knowledge is said, and I think truly, to have been given the public especially by the Bell and Tainter patent (341,214); the other well-known inventions of Mr. Tainter, and the still earlier patents of Edison. The further argument is that although the validity of Berliner's invention must stand admitted, that the scope of that invention has not been so plainly shown as to cover defendant's device, while the final position taken is that said device does nothing that was not known before Berliner.

THE COURT DESCRIBES THE MACHINE.

The machine asserted to infringe scarcely needs explanation, but the court's understanding of it may be thus stated: the exhibit shows the usual revolving tablet capable of receiving a disc record of any commercial form; back of that tablet is a telescopic tube connected with and forming a part of the amplifying horn. That tube is actuated by a half nut seen in engagement with a revolving shaft bearing a screw thread corresponding in gauge to the cutting of the nut. When the shaft is revolved the telescopic tube is advanced into the amplifying horn, with which it is in frictional engagement only. Attached to the tube is seen the tone-arm, anteriorly connected with the tube by a universal joint, and terminating in the stylus resting in the groove of the disc record. The gauge of revolving shaft and half nut is 96 cuts to the inch, which is probably near the average gauge of commercial disc records, although the evidence shows them running from 72 cuts to 112. The tone-arm of the machine has enough play through the universal joint to enable it to swing over about one-half of the ordinary commercial record; wherefore to cover the whole of such record the telescopic tube must advance toward the center of the disc, and thus compensate for the shortness of the arm. If the arm were longer the telescopic feature would be useless, if it were shorter the movement might require acceleration, but as shown it is of a length permitting the stylus to nearly reach the disc centre, when the tube has passed into the horn as far as it can go.

SCOPE OF THE BERLINER PATENT.

The inquiry as to just what is the scope of the Berliner patent might be greatly prolonged by quotations from numerous decisions, but it is certainly fair to defendant, and seems sufficient for the purposes of this case to adopt the definition of defendant's own expert, who gave it as his opinion that

"the main feature of the patent in suit (Berliner's patent) as to the reproduction of sound appears to consist in the provision of apparatus by which the reproducer is fed across the record by the record groove and independent of other mechanical means. That is to say, prior to the patent in suit it was customary to feed the reproducer across the record or feed the record past the reproducer by mechanical means, a common form being the so-called screw feed. As an improvement upon both of these methods Berliner dispensed with the mechanical feed and depended wholly and entirely upon the record groove as a means of feeding the reproducer across the record."

While not so elaborate, it seems to me that this view is entirely in accord with the exposition of Hazel, J., in the original case and with the subsequent efforts in the same direction. For the purposes of this litigation the important part of the above description of the scope of Berliner's invention is that he "dispensed with the mechanical feed and depended wholly and entirely upon the record groove as a means of feeding the reproducer across the record." Starting from this text the defendant by its expert asserts that in defendant's machine

"for the purpose of feeding the reproducer across the record a mechanical means is provided separate and independent of the record groove in the form of a screw shaft and half nut, the common type of the so-called screw feed. Under the action of this mechanical feed the reproducer once started in the usual manner to play a record is

*positively driven by the feed across the face of the record, to the limit of the thread on the screw shaft, and thereupon the feed ceases to act and a positive stop comes into action holding the reproducer at this point regardless of the length of the record groove or its position on the record disc. To express it in another way, the screw feed in this machine will appear to be controlling and to afford a positive and certain means of propelling the reproducer across the face of the record separate and independent of the record groove. To provide for inequalities, differences in pitch of the feed screw and record spiral and other uncertainties the defendant * * * mounts the reproducer in a manner to have slight play or yielding action in order that it may adapt itself as may be required to the record groove while driven by the mechanical feed."*

"MECHANICAL FEED" SUMS UP THE QUESTION.

It is thus asserted as a description of defendant's method, and the reasons for non-infringement, that the stylus of the machine pictured "is positively driven by the feed across the face of the record"; that the machine in question "affords a positive means" of so driving the reproducing stylus "separate and independent of the record groove"; and that the movement of the tone-arm is no more than a "slight play or yielding action" necessary to provide for inequalities, etc., while the reproducer itself is being "driven by the mechanical feed."

These last two words really sum up the present litigation—is the defendant's reproducer when in useful and intended operation actuated "by and in accordance with" the record, or is it actuated by the screw shaft and half nut and in (not in accordance with) the record groove? The words just used "useful and intended operation" are most important, for a positive actuation of the stylus when the machine is not producing sound in the manner intended by its makers and sellers, cannot be regarded as a "mechanical feed."

"USEFUL AND INTENDED OPERATION" CONSIDERED.

The Hoschke machine, with its spring constantly pulling at the tone arm, would propel (or rather draw) the stylus across the record face when the disc tablet was not in revolution; but that did not make the spring a mechanical feed, when the tablet was revolving and the machine doing what it was intended to do. So here, the screw shaft and nut shown will propel (that is push) the stylus across the disc when the movement of the tone arm is exhausted, and the tablet is not in revolution; the stylus is then "mechanically fed," but such feeding has nothing to do with the "useful and intended operation" of the device.

Defendant's machine is made to give forth recorded sound with the disc record turning around, and the tone arm free to swing (even without movement of the telescopic tube) as above stated; wherefore it is also beside the mark to point out (as has been done) that this machine will reproduce sound with a rigid tone arm, screwed or soldered to the tube, provided the stylus be loosely mounted to compensate for "drunkenness" in the record, and the gauge of the record be the same as that of the screw shaft (96 to the inch).

INFRINGEMENT NOT AVOIDED.

Such a device would be a true mechanical feed, for it would be by the actuation of the screw shaft alone, that means or power is provided for enabling the stylus to travel from periphery to centre of the disc record. But the argument seems idle, inasmuch as the question is not what a machine with a rigid arm would do, but what is done by this machine with a short swinging arm.

Similarly it is not useful to demonstrate that defendant's machine cannot reproduce from a record which begins at the centre rather than the circumference of the disc. This is because the are of the tone arm's movement is all (or nearly all) to the left (looking at the exhibit) of the universal joint. Admittedly the complainant's well-known apparatus will reproduce from a disc with spiral record reading either way, because of the greater area of the swing of its longer arm; but if defendant's machine does the same thing in the same way reading one way as does complainant's, then infringement is not avoided as to that way—or method of operation—because the infringing machine is not as good or complete as the patentee's. Half an infringement is just as thoroughly an infringement (as far as it goes), as a slavish and complete copy.

VALIDITY OF BERLINER INVENTION ESTABLISHED.

It is necessary then to consider the normal and intended operation of the apparatus presented. What is it, that in machines covered (under repeated decision) by Berliner's patent is actuated "by and in accordance with" the record? And what is it that in undoubted mechanical feed machines (such as the Edison phonograph) is positively driven by a force wholly outside of, and unconnected with, the record? It is always the stylus; if that be mechanically driven past the irregularities of the sound groove it is mechanically fed; but if that stylus is not driven at all, but permitted by its wide radius of swing to follow a groove in a disc which is itself mechanically fed under the stylus, then the stylus is said to be "propelled * * * by and in accordance with" the record—a result and distinction reached in a line of cases now much too long to cavil at.

Applying this to any model of defendant's apparatus, it is apparent that the mechanical device, or feed contained

in screw shaft and nut, does not operate upon the stylus at all, but on the tone arm, and serves merely to reposition that part of the machine, and extend the area of its operation, but at any given movement of operation, the swinging arm and stylus is doing just what is described in Claims 5 and 35 of the patent in suit, and doing it in exactly the same way.

The truth of this seems easily tested. If the nut be disengaged, the machine will play until the tone arm's limit of movement is reached; if the revolution of the record be stopped, but the so-called mechanical feed continue in operation, the stylus does not stir until again its arc of movement is exhausted, and then it only scratches.

REPRODUCER NOT CONTROLLED BY MACHINE.

My conclusion is that the assertions made by defendant's expert are not borne out by the evidence; the reproducer is not positively driven by the feed across the face of the record, nor does the machine afford means of so propelling that reproducer separate and independent of the record groove. On the contrary the stylus when doing what the machine is sold to do, is always following the groove in its spiral path from circumference to centre, what makes it do so is the groove itself; the mechanical device (misnamed a "feed") attached to the apparatus is merely a moving pivot for the tone arm; the ninety-six gauge of nut and shaft is wholly unnecessary and unessential, it might be twenty, or it might be dispensed with altogether, and the telescopic tube pushed in with the finger—one push given when about half way through an ordinary record would be enough—the act would not disturb the stylus, would reposition the anterior end of the tone arm, and during the whole operation the reproducing point would continue to follow the groove just as does Berliner's.

Complainants may take a decree as prayed for.

E. E. Prarie, formerly with the National Phonograph Co., Orange, N. J., is now looking after the New York city trade for the United States Phonograph Co., Cleveland, O. He makes his headquarters at the recording laboratory, 662 Sixth avenue.

The Columbia agent at Terre Haute, Ind., sold a Grafonola Mignon to D. McLaughlin, president of the Vigo Ice Co., of that city, which will doubtless lead to other sales to prominent men in Terre Haute.

Salesman Wanted.

Retail Talking Machine Salesman Wanted.—Good outside man; location 25 minutes from New York City Hall; give references and experience. Address "VICTOR," Box 90, care Talking Machine World, 1 Madison Ave., New York.

Business Opportunity.

For Sale.—Edison Phonograph Jobber's Stock and good will, in smart New England city; excellent chance to add other lines. Address "JOBBER," care Talking Machine World, 1 Madison Ave., New York.

Store for Sale

In good Oil town, 5,000 population. Small clean stock of Edison and Victor lines. Small musical instruments and sheet music. Best location in town. Low rent. Good instalment proposition. Have pulled only 3 outfits in three years. Discount if purchased soon. Owner has two stores (one a jewelry) and cannot give proper time and attention to both. Will require a small capital.

A. C. THOMAS,
Sistersville, W. Va.

Booths For Sale.

FOR SALE—Two very fine booths, built of mahogany and plate glass, each about 7 feet 7 inches deep, 10 feet 10 inches wide and 10 feet 8 inches high. Practically soundproof, suitable for demonstrating rooms. Will sell very cheap. For particulars address "G. T. L.," care Talking Machine World, 1 Madison avenue, New York City.

Mr. Henry Russell, Director of the Boston Opera House, and Associate of the Metropolitan Opera House, is now Consulting Director of Opera for the Columbia Phonograph Company. This first official recognition is significant of the present status and future possibilities of the Graphophone as "the one incomparable musical instrument."

Columbia Phonograph Co., Genl., Tribune Building, New York.

TIMELY TALKS ON TIMELY TOPICS

While the talking machine manufacturers are very much pleased with what President Taft had to say in his annual message to Congress—presented last week—about the cultivation of closer mercantile arrangements with foreign countries, especially the Latin-American people, they have lost no time in going after this business in the most practical way. Permanent agencies have been established by these companies in some leading city of prominence, and travelers have covered the entire territory of the South American country, not only establishing branch houses or distributors of their respective products, but also studying the musical tastes and preferences of the various peoples up and down the East and West coasts and in the interior. Then has followed the recording of the best known and most popular native artists, and even the Indians have been cultivated and laid under contribution to secure records that would appeal to every inclination of the natives and sell accordingly. Even dialect records have not been overlooked, and notwithstanding the keen competition of European manufacturers, whose goods run more to cheapness than quality, the American companies have held their own and continually made new ground and opened up new avenues of distribution. Grand opera selections are always in demand by the Latin-Americans, and in this regard the catalogs of our manufacturers present a fine list of the very highest and best works, which have also been a strong leverage in gaining and holding trade.

Besides what the President said relative to trade relations, he also strongly urged Congress to adopt suitable measures to encourage the establishment of local banks in South America and to provide for the creation of an American merchant marine and of more direct communication with the United States and those countries. This policy of the President thus foreshadowed has likewise the warm approval and endorsement of the talking machine trade. Though our manufacturers are firmly entrenched and fear no comers in that part of the world, at the same time were these recommendations of the nation's Chief Executive adopted they would reduce the expense and lessen the trouble of doing business there to a material extent and make their position still stronger if not unassailable. Were either the Gallinger bill in the Senate or the Humphrey measure enacted during the closing session of the present Congress it would redound to the glory of the United States and be of incalculable benefit to our merchants and manufacturers, who regard the South American market as one of the world's present-day commercial prizes.

Of the long connection of Edward D. Easton, president of the Columbia Phonograph Co., General, with the talking machine trade and its development, doubtless many are familiar. A great many interesting facts in connection therewith appear elsewhere in this issue of The World. Mr.

Easton's historical reminiscences, in the light of present-day progress, read almost like a romance. The career of the Columbia Co.'s distinguished president—first as an editor in his teens, then as stenographer in the United States Senate and before government boards, finally being admitted to the bar—shows what industry and a fixed purpose will accomplish. But all these paths were forsaken to take hold of the talking machine invention in its rudimentary stages, investing his modest fortune on the cast of the die to make it commercially successful, and the ultimate brilliant attainment of his ambition in this respect cannot help but awaken an admiration for this typical American wherever the talking machine is known the world over.

The fifteen-cent indestructible cylinder record promised for the holiday trade failed to materialize. Its projectors, speculating on certain impending trade conditions, were of the opinion a record at so low a price would command an immediate market. That remains to be seen. It is possible the promoters of the scheme may have run against snags which could not be overcome in time to meet the Christmas sales; and mayhap it will appear later. The year 1911 promises to be fruitful in the offering of new articles from several sources.

What has become of the combined disc and cylinder machine? At one time the trade were regaled with what great things this device would accomplish; but somehow it did not "catch on," as the street phrase goes. Possibly its cost—that is, of the interchangeable disc playing appliance, about the price of a reliable, standard machine—was a detrimental factor. Whatever the reason it may safely be classified as among the things of "great expectations but little performance." When this duplex—as it was called—machine was receiving some attention, William Pelzer, vice-president of the National Phonograph Co., was asked for his opinion, deeming he would be interested for several reasons, the reply was: "Let me tell you that when a man wants a disc machine he will buy that type; and the same also applies to the cylinder proposition. Appliances of this kind never have taken nor are they ever successful even from a so-called economical point of view."

On December 8 Hon. Charles H. Sherrill, United States Minister to the Argentine Republic, delivered an address before the National Association of Manufacturers at their quarters in the Hudson Terminal building, New York, on how to get South American trade. He spoke of the opportunities before the American manufacturers if they adopted the right methods, and outlined the chief obstacles to be overcome. Mr. Sherrill is considered one of the ablest men in the diplomatic service, and on this particular subject is not only an authority but enthusiastic as well. Daniel O. Mitchell, manager of the export department of the Victor Talking Ma-

chine Co., Camden, N. J., and Charles Ferree Lightner, their South American representative, were present. Mr. Lightner is making preparations to return to Buenos Ayres, his headquarters, next month. During his absence F. A. Pereira, his assistant, who spent some time at the factory to become thoroughly familiar with the Victor product, has been in charge.

General business with talking machine jobbers and dealers is universally conceded to have improved in a marked degree within the last ten days. The orders from dealers are being placed in their usual erratic way, often to the confusion and misleading of the jobbers, as has been so clearly and conclusively pointed out by J. Newcomb Blackman, of the Blackman Talking Machine Co., of New York. Distributors and jobbers, finding themselves likely to be in a position to handle more goods than anticipated earlier in the season, are visiting or advising the factories with a view of increasing their commitments. This week the orders have been pouring into the factories at a rate which has astonished the general and sales managers. The demand for high price goods is away beyond the mark reached last year.

ADVERTISE—DO IT FIRST.

Local Merchant, Right on the Ground, Should Combat Mail Order Publicity by Advertising in His Local Paper.

The catalogue houses are far and away the best advertisers on deck to-day. Why? Take their book and read. You will find a description that describes; a picture that shows "how the thing looks"; a price that tells how much it costs. That is the sum and substance of their advertising—and it gets the business. The local newspaper is the best advertising medium on earth for the local merchant—if he will only use it. He is on the ground. He has the goods. If he is out of an article he can get it quicker than the customer—if he can't, he had better try another house. He stands behind his goods. He is there tomorrow to rectify the error of to-day. But he must get the attention of the buyer—and he must get that attention before the catalogue man does. The most effective way is through the columns of the local newspaper.

The Sonora Phonograph Co., 78 Reade street, New York, announce a "manufacturers' sale" of their goods in the Sunday daily papers for the "holidays only." They quote one-third off their retail price list for their entire line.

G. H. Schubert, Chicago, Ill., manufacturer of the interchangeable shelves for making the Schubert Extensible Record Rack, reports an increasing demand for his specialty throughout the country.

The talking machine sales force of Grinnell Bros., Detroit, Mich., were the guests of the heads of the house at a banquet at the Hotel Charlevoix on Dec. 6.

NEW EDISON ARTISTS.

A Number of Valuable Additions to Their Staff of Well-Known Artists and Something of Their Professional Histories—Singers of International Fame Secured—Victor Herbert to Continue to Supervise Recording of Instrumental Numbers.

Some acquisitions to their list of entertainers were recently announced by the National Phonograph Co., Orange, N. J., which indicate what their recording department is doing to keep the Edison catalogs up to date and sparkling with all that is attractive and desirable in vocal and instrumental numbers. In the grand opera lists the names of Lucrezia Bori, soprano; Aristodemo Giorgini, tenor; Selma Kurz, soprano; Marie Rappold, soprano; Maria Galvany, soprano; Carolina Longone-White, soprano; Carlo Galeffi, baritone, already appear or will soon be announced. Of these excellent artists Marie Rappold is best known in this country by reason of her successes at the Metropolitan Opera House, where she is now singing, as is also Galeffi, whose first appearance this season vindicated all the nice things that had been said about him. Lucrezia Bori is the singer with the meteoric career who recently scored such a tremendous success in Paris as the heroine of Puccini's "Manon Lescaut." She is conceded to be a truly great artiste—a sweet, charming little girl, but a consummate actress with a voice of the finest timbre and cultivation. Carolina Longone-White, a regally beautiful woman, American by birth, is another brilliant actress with a splendid voice, a great favorite in Italy, who is expected to visit this country during the present season.

Selma Kurz has been for years the favorite soprano of the Imperial Opera House at Vienna, but her reputation is by no means confined to the Austrian capital; she is known and esteemed all over Europe, where she is considered the logical successor of Sembrich. Giorgini's fame has been won in Italy, Russia, France and Spain, where his beautiful lyric tenor voice has been heard in a varied repertoire. His voice is said to lend itself readily to phonograph reproduction. Maria Galvany has sung in most of the large musical centers of Europe and South America, and in addition to a soprano voice of phenomenal range and sweetness, is accredited with a most charming personality. In addition to the artists mentioned, it is said that the National Co. have a number of other stellar operatic lights under contract whose names will be announced in the near future.

Among the artists recently secured for the domestic catalog, the one of whom the most is expected by the company, is Elizabeth Spencer, who well-known mezzo-soprano. Miss Spencer, who has hosts of admirers among the patrons of vander-ville, also enjoys a splendid reputation in concert circles, and will be a regular contributor to the Edison catalogs beginning with the February lists. Her voice is a rich, full mezzo-soprano of an unusually sympathetic quality, her vocal style is pleasing in the extreme, and her enunciation is delightfully distinct; all of which equips her in an unusual manner for record making. The National experts are delighted with her work and regard her as a rare "find"—so much so that they have secured her for a number of years under an exclusive contract to sing only for Edison records.

Frank Ormsby, tenor, who is associated with Miss Spencer in duet work on the concert platform, is another artist who has recently identified himself with the Edison catalog. Mr. Ormsby is an intelligent singer, with a voice of tremendous range, great sweetness and robust quality. He will be heard in some of the best numbers from his extensive repertoire.

Leon Rice, a tenor with an international reputation in concert and church work, and who is well known by reputation at least to the majority of music lovers, is also singing for the Edison records. So, too, is Reinald Werrenrath, the favorite baritone, the first of whose records for the Amberol catalog will be announced with the February list. Mr. Werrenrath is perhaps the most popular baritone in the country to-day outside of the operatic stars. Still another recruit is Berriek

von Norden, tenor soloist of the Temple Emmanuel, the leading Jewish Synagogue of New York city. Mr. von Norden, one of the leading oratorio and concert singers of the present day, is best known to music lovers of this country through his tour with Calve in 1905-1906. The Weber Male Quartet, each of whom is an artist doing church and concert work, were also recently engaged for the Edison catalog.

Eight Amberol records by Alexander Heine-mann, the famous German baritone "lieder" singer, have been secured by the National Phonograph Co., Orange, N. J., which will be shipped with the February advance list to all jobbers in any one territory at the same time and may go on sale as soon as received.

The selections are carefully culled from his extensive repertoire, and include not only favorite German folk songs, but many of standard quality. Mr. Heine-mann has sung in every important European city and made his debut in New York at Mendelssohn Hall, November 5, before a large and enthusiastic audience. These records are fine examples of skilful recording and artistic singing.

Victor Herbert will continue to supervise the recording of instrumental numbers for the Edison catalog and will also contribute the exclusive services of his incomparable galaxy of artists in the rendition of his tuneful compositions and other works of standard quality. Charles Daab, the premier bells and xylophone artist, whose services are also exclusive for Edison records, will add to the brilliant and popular list of numbers he has already given to Edison records. Some notable additions to the present list of instrumental artists will be announced shortly, among them Carmen Stanzione and Adolph Finkelstein, whose ability as flute and clarinet artists are well known in the musical world. Future Edison records will no doubt offer many pleasant surprises.

WORTH READING AND DIGESTING

Is the Important Announcement Made by the U. S. Phonograph Co. in This Issue.

The trade are again cordially invited, via this issue of The World, to read carefully and as carefully digest the frank and candid statement made by the U. S. Phonograph Co., Cleveland, O., on pages 12 and 13. Prefacing their "double spread" with the arresting announcement, "The Lion's Share of 1911 Profits Comes to the Dealer Who Handles the U. S. Line," the company plunge into a strong and telling argument regarding their line, the U. S. Combination Phonograph and the U. S. Everlasting records. It is unnecessary to repeat the story, because every line is interesting, especially in connection with the illustrations of their machines, including the concealed horn cabinets shown therein.

RETURNS FROM EUROPE TO-DAY.

Paul H. Cromelin, vice-president of the Columbia Phonograph Co., General, who has been in Europe since early in October, arrives from abroad to-day (December 15) on the "Mauretania," of the Cunard line. His trip was undertaken to look after the new British copyright bill, which is inimical to talking machine trade interests in its proposed form. The proroguing of Parliament and the general elections, now under way, interfered to some extent with this purpose of his visit. Another object was to obtain official copies of certain Austrian decisions in the Petit duplex patent, the validity of which is now in the course of adjudication in the United States courts.

Because a competitor is wideawake, and by judicious, honest advertising is showing the public that he not only keeps talking machines, but sells them, do not sulk in your tent and allow him to get all the "persimmon," but get out of your Rip Van Winkle habiliments and get after some yourself.

Sixty-one dictaphones were sold last week to be installed in the freight claim department of the Union Pacific Railway Co. at Omaha, Neb.

SONORA

Highest Class Talking Machines and Records

The **Latest** and the **Best**

Style F. List \$100.

The most magnificent Talking Machine Case made.

The most Powerful Motor ever used in a Talking Machine.

Special Features contained in Sonora Machines:

- Magnificent Tone Quality and Design.
- Mechanical Feed.
- Automatic Stop.
- Invisible Horn.
- Absence of Needle-Scratch.
- Sapphire Attachment.
- Tone Moderator.

Machines: \$25, \$40, \$50, \$60, \$75, \$100, \$200 list.

Record Tables: \$10 list.

Record Cabinets: equipped with most convenient filing system: \$30 and \$50 list.

Sonora Phonograph Co.
78 Reade Street, New York

Here's the best 10 cent

It tells its own
story on this side

(and here's the story:)

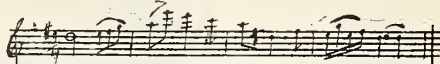

The purpose of this record is to demonstrate the Columbia Double-Disc Record. It is not offered for sale.

Columbia Double-Disc Records! Music on both sides! A different selection on each side! Two records at a few cents above the price of one. They may be played on any disc machine, the Columbia Graphophone or the Victor talking machine, and they give you double value for your money plain as daylight. The music of Columbia Double-Disc Records is the music itself, not merely our idea of what we can make the people think music ought to be.

You are assured of as perfect a record on each side of the disc as you ever bought before under any name at any price; perfect in surface; perfect in tone, and extraordinary in durability. The Columbia Double-Disc Record will unfailingly outwear any other disc record. This statement has been proved over and over again, and it is easy enough for you to prove it for yourself. The Columbia process of recording, as developed especially during the last two years, produces a naturalness and roundness and perfection of tone that is positively unequalled in any other.

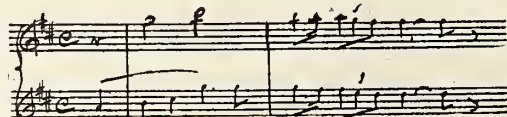

The SINGING voice, as recorded in the Columbia laboratory, is the living voice of the artist—clear, flawless and natural; and from the simple, brassy notes of the bugle:

violin:  Columbia recording of INSTRUMENTAL music is marvelously true.

Note the ringing clarity of the orchestra bells: 

The pure golden tone of the cornet: 

The dulcet blending of the flute and the violin: 

The bird-like warble of the piccolo: 

The stately sonority of the trombone: 

The reedy sweetness of the clarinet: 

And now the splendid ensemble of the full orchestra.

Columbia Double-Disc Records—double discs—double value—double wear—double everything except price. Don't put your record money into any other.

DEMONSTRATION Columbia

You

C

To

Co

Han

cents you ever invested

65 cents' worth of music
on this side

(you need it in your business)

We are ready to put in your hands the strongest trade weapon you could possibly use. We have made a *Special Demonstration Double-disc Columbia Record*. We shall make the charge to you *10 cents* for each of these 10-inch Columbia Double-disc Records—this charge being meant to cover only the cost of handling. You will be authorized to use this record for demonstration in your store, and to give it away *free* to every owner of a talking machine whose name you can secure by advertising or by canvassing. ¶ This record must not be offered for sale, except that you may make a charge of 10 cents if you wish, with the understanding that this charge covers only the cost of handling and delivery. ¶ On one side of this record is the story, printed in the opposite column. On the other side is a musical selection which will *alone* be worth 65 cents to any owner of a talking machine. It carries no spoken or other advertising matter at all, but is designed to present fair evidence of the quality of Columbia vocal music. Every attempt has been made to produce a record which should be in itself a genuine proof of the superiority of Columbia recording. Everyone who tries out the record will be, supposedly, the owner of a talking machine and disposed to criticize and analyze and *compare*—which is precisely what we want to invite. ¶ *This is a big thing*—and big in possibilities; yet *not a thing that requires you to plunge*. You can feel your way very easily.

Columbia Double-Disc Record

A MOVE OF GREAT IMPORTANCE.

The Alliance of Henry Russell, the Celebrated Operatic Manager and the Columbia Phonograph Means Much to All Interested as Well as to the Cause of Musical Art—Mr. Russell's Distinguished Career in Europe and America—What the Columbia Co. Are Aiming at.

The recent announcement by the Columbia Phonograph Co., General, that they have associated with themselves Henry Russell, director of the Boston opera, in a consulting capacity, has not only furnished much food for interesting comment throughout the trade, but is worthy of more extended notice in these columns. For the end aimed at in this new arrangement between the Columbia Co. and Mr. Russell is in the highest degree admirable from the standpoint of art in voice reproduction, and is likewise an exceedingly important business move.

As is well-known, Henry Russell is at present the director of the Boston opera and an associate director of the Metropolitan Opera in New York. The purpose of his association with the Columbia Co. is to act in an advisory capacity as to the future selection, recording and reproduction of operatic music. The Columbia Co. realize that sound-reproducing mechanisms can have no greater usefulness than in carrying to every part of the world accurate autographs of the great voices which can only be heard, in person, by those who are able to attend opera in the relatively few cities where it is given. And they have realized with equal vividness that the task of producing a complete, well-rounded and representative list of perfectly recorded operatic selections, sung by great artists and reproduced with all the necessary incidentals, constituted a task requiring the expert supervision of one to whom the whole matter of grand opera was thoroughly familiar. For this reason the association of Mr. Russell with so eminently worthy an undertaking is an event of the greatest importance, primarily to the Columbia Co. and their agents, but also to the whole art of sound recording.

It is Henry Russell's dearest wish to have the music of great operas familiar to every home where a sound-reproducing machine can penetrate. And not only this, but he recognizes clearly the absolute necessity for the most careful supervision of such work, alike in the selection of voices, and accompanying musicians and in the actual recording.

The distinguished director of the Boston Opera will, in the future, take an active interest in the preparation of the Columbia Grand Opera records and will give to the company the inestimable value of his experience and sincere criticism. He is well equipped, both technically and temperamentally, for the work he has so enthusiastically taken up, as the following slight sketch of his career will sufficiently indicate: Henry Russell was born in London. His father was an eminent song writer, among whose works are the ever popular "Cheer Boys, Cheer," "Woodman Spare That Tree," "A Life on the Ocean Wave," besides nine hundred other popular songs. His mother was Spanish by birth, so that although born in England, Mr. Russell is essentially cosmopolitan, both by inheritance and education. His grandfather was a distinguished painter, and when only ten years old Mr. Russell showed sufficient talent to justify his parents in having him study painting. As he grew older, however, his tendencies leaned towards the study of science and at the age of sixteen Mr. Russell decided to make the medical profession his life work. But destiny ruled otherwise. A severe

illness resulted in a permanent injury to his eyes, and it was this that proved a turning point in his career—he decided to study singing.

Mr. Russell became a student at the Royal College of Music in England, where his knowledge of physiology and anatomy of the throat proved of great assistance to him. In an incredibly short space of time he evolved a completely new method of teaching, and at the age of nineteen he already had a small following of pupils. A year or two later he came to be recognized as one of the greatest authorities on the subject of the voice.

Mme. Melba was one of the many great artists who sent pupils to Mr. Russell in the beginning of his career. Mme. Nordica was accustomed to pass hours in his studio long before she ever thought that she would sing under his direction. Such well

HENRY RUSSELL.

known singers as Ben Davis, Kemmerly Rumford, Marie Tempest and Florence St. John were among the many early pupils of Mr. Russell. Well known actors and actresses came to his studio for assistance and finally he was invited to become a professor in Rome, where he met Eleanora Duse, whose voice at the time had failed her. Through reuniting the voice of the great actress Mr. Russell attained international fame. Alice Nielsen, Mary Garden and innumerable other singers benefited by his assistance as a teacher.

It was in 1903 that overtures were made to Mr. Russell to direct a season of opera at Covent Garden Opera House, London. After considerable hesitation he accepted this offer and secured Caruso for a season, which he opened with Puccini's "Manon Lescaut." His profound knowledge of the voice stood him in good stead in the formation of his company. He selected Campanini, who was then unknown in America, as his conductor, and he discovered to the world such singers as Sammarco, Anselmi, Bonci, Delucia, Boninsegna, Amato, etc.

After two successful seasons in London, Mr. Russell decided to visit the United States with his company, and the Boston Opera House is a living testimony of the results of his work in this country. After a brilliant and successful season in the new home for opera Mr. Russell was unanimously elected advisory associate to the Metropolitan Opera House. Mr. Russell is the brother of Landon Ronald, the well-known conductor of the London Symphony Orchestra, and president-elect of the London Royal College of Music.

In consideration of all these circumstances of the kind of man that Mr. Russell is and of the well-known enterprise that has always distinguished the Columbia Phonograph Co., General, it is safe to assume that the future will hold a large number of surprises, and pleasant ones at that, for Columbia dealers, and that the future of art recording in America will benefit immensely from the active co-

operation of a distinguished and technically expert impresario, with the great scientific, manufacturing and distributing organization which has secured such valuable services.

DEATH OF FRANK STANLEY.

The Well-Known Baritone, Whose Records Are Familiar the World Over, Died on Monday at His Home in Orange, N. J.

After a brief illness, Frank C. Stanley, who in private life was Mr. Grinstead, died at his home in Orange, N. J., December 12, aged about forty years. In addition to his musical attainments the deceased was an Alderman of his home town and a member of the local lodge B. P. O. Elks.

Mr. Stanley, with his rich baritone voice and attractive personality, was one of the best known and most esteemed of the record artists, and to this line of specialty singing he had given fourteen years, being engaged by all the manufacturing companies. His services as a soloist were always in demand, his other laboratory combinations, besides that of the Imperial Quartette, being Stanley & Burr, Stanley & Stevenson, Stanley & Harlan and Stanley & Morgan, the records of which are familiar to the trade, no matter whose lines are handled. In addition, as a singer in church choirs he enjoyed a high reputation, and only surrendered this interesting work when his numerous engagements in the record laboratories compelled its relinquishment. Mr. Stanley's list of records cover a large number of selections, with a strong leaning to the better class of music.

The deceased leaves a wife and four children. The funeral services, held to-day (December 15) at Mr. Stanley's late home, will be in charge of the Elks, with an elaborate musical program, as the ceremony will be attended by all the record artists and many friends in the trade and the dramatic profession.

VICTOR-COLUMBIA INFRINGEMENT SUIT.

(Special to the Talking Machine World.)

Norwich, N. Y., Nov. 28, 1910.

The case of the Victor Talking Machine Co., Camden, N. J., against the American Graphophone Co. (Columbia Phonograph Co., General), New York, was argued here to-day before Judge Ray, Circuit Court of the United States, southern district of New York, the issue being an alleged infringement of the so-called Johnson-eut record patent. The invention, of recent date, in suit is that of Eldridge R. Johnson, president of the Victor Co., and is its first appearance in court. The motion for a preliminary injunction was noticed for a hearing in New York to-day, but when the case was called Judge Ray happened to be sitting in this city, and therefore counsel came here. Horace Pettit appeared for the complainants, and C. A. L. Massie for the American Graphophone Co. Decision was reserved.

EDISON WINDOW DISPLAYS.

"The work of organizing our department of window display and interior arrangement is progressing very nicely, and it looks now as though we will be in a position to make a definite announcement of the inaugural window in January," says the National Phonograph Co., Orange, N. J. "Mr. Rinehart, manager of the department, has had a staff of assistants steadily at work for the past six weeks whipping his ideas into shape, and results obtained thus far justify the prediction that Edison windows will meet with the enthusiastic approval of the trade. It is a matter of regret that the first window cannot be placed in the hands of the trade for use during the holidays, but the time has been altogether too short to prepare one such as we would like to have considered a standard by which to judge succeeding efforts."

One man says you have succeeded because you have located at a certain place at the right time. Another says you have succeeded because you have had the opportunity. Abraham Lincoln said: "Don't whine about the lack of opportunity. There are opportunities for every one who is able to convince the world by his industry that he is worthy of success."

The Columbia Grafonola "Regent" (library table type) at \$200—nothing like it on the market. The Columbia Grafonola "Mignon" at \$150—the first hornless instrument at a hundred-and-a-half. The Columbia Grafonola "Favorite" at \$50—\$25 under the price of its cheapest rival.

Columbia Phonograph Co., Genl., Tribune Building, New York.

AMERICAN GRAPHOPHONE CO. WIN SUIT

Circuit Court of Appeals Reverse Lower Court in Suit Brought by Victor Co. in Which Fine of \$1,000 was Imposed for Contempt of Court—The Judges' Decision in Full.

What is known as the "stenciled record" case—Victor Talking Machine Co. against American Graphophone Co. (Columbia Phonograph Co.)—in which the defendants were adjudged guilty of contempt of court and fined \$1,000 for an alleged violation of the Berliner patent in the Circuit Court of the United States, southern district of New York, was reversed by the Circuit Court of Appeals, second circuit—Judges Coxe, Ward and Noyes—December 13. This is a final adjudication of the suit. The opinion, written by Judge Ward, follows:

The Judges' Decision.

The complainant, the Victor Talking Machine Co., is licensee under the Berliner patent for a talking machine called a gramophone. It obtained an injunction in a suit against the defendant, the American Graphophone Co., which the court below has held to have been violated. Claims 5 and 35 of the patent were sustained for the process of reproducing sounds and the apparatus for doing so, being a combination of the Berliner reproducing stylus with sound records which were old.

"5. The method of reproducing sounds from a record of the same which consists in vibrating a stylus and propelling the same along the record by and in accordance with the said record substantially as described."

"35. In a sound reproducing apparatus consisting of a traveling tablet having a sound record formed thereon and a reproducing stylus shaped for engagement with said record and free to be vibrated and propelled by the same, substantially as described."

The American Graphophone Co. is the owner of U. S. Letters Patent to Jones (No. 688,739), for the production of the sound records now in universal use. It obtained an injunction in a suit against the Universal Talking Machine Co., one of the Victor Co.'s subsidiary companies, June 3, 1907, the Victor Co. and the American Graphophone Co., with a view to composing differences and of conferring mutual licenses, entered into an agreement which recites that the Victor Co. has a license "to manufacture, sell and deal in gramophones and gramophone goods" under the Berliner patent and the American Graphophone Co. is desirous of operating under the said patent; also that the American Graphophone Co. is owner of the Jones patent and the Victor Co. is desirous of operating thereunder, and then confers by implication upon each the right to "operate" under the patent of the other with three reservations, viz.: *First*, that neither party shall counterfeit nor copy any record owned or controlled or first produced by the other, nor deal in nor handle such copies if made by others; *Second*, no right is conferred upon the American Graphophone Co. to use the word "gramophone" nor upon the Victor Co. to use the word "graphophone"; *Third*, the rights conferred are non-assignable. The agreement further provided:

"13. It is further agreed as to all patents adjudicated or to be adjudicated as valid, that the party owning or controlling such patent or patents will with due diligence actively proceed against all infringers of said patent or patents, to enjoin such infringing parties from said infringements, and for an accounting, when requested in writing to proceed against any such alleged infringers by the other party hereto.

"14. Each of the parties hereto shall, through their counsel, when requested by the other party, assist such other party in prosecuting infringements of said patents, sustained or to be sustained, after the same has been sustained, when so requested in writing, each party bearing the expense of its own counsel, it being understood that the direction and control of said suits shall be entirely in the hands of the party bringing the suit and controlling the patent."

The American Graphophone Co. obtained an injunction on final hearing against the Leeds & Catlin Co., for direct infringement of its Jones patent for sound records. The Victor Co. obtained and maintained a preliminary injunction against the Leeds & Catlin Co. as contributory in-

fringers of the Berliner patent because they sold sound records knowing and intending that they were to be used in and for the reconstruction of the American Gramophone talking machine.

Before this injunction was finally affirmed Leeds & Catlin sold a large quantity of these records to various jobbers which the American Graphophone Co. took off the hands of the jobbers in exchange for their own records made under the Jones patent. Some of these records it subsequently sold and it was for this the circuit court held it to be a contributory infringer.

The order is sought to be sustained on the ground that selling these records was a violation of articles No. 13 and 14 of the agreement of June 3, 1907. Conceding, without admitting this to be so, the act would be not a contempt, but a breach of contract, to be remedied in an action at law.

Indeed, the act of buying the Leeds & Catlin records would seem to be in direct suppression of contributory infringement of the Berliner patent. It remains to inquire, whether the American Graphophone Co., having bought the records, was within its rights in selling them. The Victor Co. contends that the "right to operate" under the Berliner patent gives the American Graphophone Co. only the right to manufacture and sell products manufactured by it. But Clause 35 of the patent covers the apparatus, and presumably the American Graphophone Co. has the right to make and assist others to make the combination of stylus and record which constitutes the apparatus.

Why is it confined in so doing to records manufactured by itself? There is no express limitation of the license other than the three reservations above mentioned. And it is fair to infer from the reservation that neither party shall deal in nor handle counterfeit records made by others that they may deal in records made by others which are not counterfeit nor direct infringements. The Leeds & Catlin records are not counterfeits of the Victor record nor direct infringements of the Berliner patent.

Furthermore, we cannot see that the Victor Co.'s business is any more or any differently injured by the American Graphophone Co.'s selling Leeds & Catlin records than it is by that company's selling its own records. On this point it is suggested that the Leeds & Catlin record is an inferior one. If so, not being sold as the Victor Co.'s the business of that company is less likely to be injured by that sale than is the American Graphophone Co.'s business.

The order is reversed with costs.

Richard N. Dyer and C. A. L. Massie appeared as counsel and Ralph L. Scott as attorney of record for the American Graphophone Co.; Horace Pettit, counsel and attorney of record for the Victor Talking Machine Co.

LANDAY BROS. STORE REMODELED.

Fifth Avenue Premises Fitted Up in Elaborate Manner—Some of the Details—Son and Joy.

The very elaborate remodeling of the store of Landay Bros., 400 Fifth avenue, New York, was finished this week. The street entrance has a series of mirrors reaching from the floor to the ceiling, and the elegant wall decorations give a striking effect. Additional room for demonstrating booths are also secured on the main floor, and here a great deal of excellent taste has been exhibited. The display window is along Louis XV lines, and with the gilt candelabra and the fine arrangement of the Victor's finest products, is likewise admired by the many visitors. The firm are doing a splendid business.

James B. Landay was made happy by the arrival

of a boy on November 30. The Brith-Milah was held December 7 at his home in Far Rockaway, L. I., where a merry party gathered to celebrate the event. Max Landay was about as much delighted as his brother. A sleighing party wound up the festivities.

C. H. WILSON ON BUSINESS.

C. H. Wilson, general manager of the National Phonograph Co., Orange, N. J., in chatting of prospective business conditions, said: "To be frank I do not look for any great improvement. Not until the cases—Standard Oil Co. and American Tobacco Co.—now before the Supreme Court of the United States, are decided do I think business affairs will change for the better. We are busy; in fact, are being pushed to supply goods, the demand for Amberolas being especially strong."

NATIONAL PHONOGRAPH CO. SCORE.

Win Suit Against Harry Weinberg, a Second-Hand Dealer—To Proceed Against Others.

The National Phonograph Co., Orange, N. J., have won their suit against the Philadelphia second-dealer, Harry Weinberg, which has been pending for a long time in the United States Circuit Court of Philadelphia, Pa. This case has been bitterly contested on behalf of the defendant, and the decision now made by Judge Holland is rendered on final hearing on further pleadings and proofs, including the testimony of a large number of witnesses.

H. H. Dyke, of the legal department of the National Phonograph Co., who represented them in the case against Weinberg, in speaking of the suit said: "We are greatly pleased to note that the Weinberg case has been decided in our favor. I have not seen the decision yet, but have received a telegram from the clerk of the court saying that we had won the case. As soon as a copy of the decision comes in, we will get right after all the second-hand dealers we can find and make a thorough clean-up."

The December issue of Wanamaker's Opera News, devoted to current and future musical events, is the brightest number yet issued. Louis J. Gerson, manager of the "talker" departments in both the New York and Philadelphia stores, who edits the crisp little monthly, with the special purpose of exploiting the goods, states the Opera News has proven very beneficial.

Benj. Switky, 9 West 23d street, New York, who has one of the handsomest stores in the city, is doing a fine holiday trade. His location in the Fifth Avenue building is second to none, being in the center of the retail shopping district.

While Mr. Slowpay is better than Mr. Nopay, the less one has to do with either of them the better. Old Spotcash is a good fellow to cultivate. One does not lose all the profits in chasing him up for his money.

THE VICTOR CHRISTMAS WINDOW DISPLAY

The stock window displays originated by the Victor Talking Machine Co., Camden, N. J., have proven a boon to their dealers. Their practical worth and value are admitted by everybody who have placed them in their store. In sending out the "Victor Christmas Window Display, No. 22," the company fittingly say:

"December is without doubt the most important month of all so far as show windows are concerned. At no other time of the year are so many

funny looking Jack-in-the-box is our old Victor friend, Nat Wills, and the bright looking Scotchman with his bagpipe reveals the kind, merry face of Harry Lauder. To the chain of highly colored paper rings are attached photos of our most famous singers and entertainers, each artist's name appearing on a link. A large Christmas ornament attached to the chain tells 'that there are no weak links in the chain of Victor artists.'

"At the bottom are arranged cut-out pictures

people looking for suitable presents, or is the mission of the window so apparent. Thousands and thousands of people walk around town with no other purpose than to gaze at show windows, and to decide that all important question, 'What to buy for Christmas.' And the dealers with the most enticing windows are the ones, of course, who will reap the greatest harvest of profit."

Then of the display itself, of which the accompanying illustration is a faithful reproduction, the following detailed description is given: "With the object of giving to Victor dealers a display that will at once bring forth the best selling possibilities of their windows, our Mr. Hansen has designed this unique and startling holiday display. A large Christmas tree loaded down with wonderful toys, candles and ornaments immediately attracts the attention of the passers-by, and by going into the details they will notice that every one tells an interesting Victor story. The smart looking French dolls are Blanche Ring and Nora Bayes. The

showing Pagliacci, Chantecler and dance records. The tree is lithographed in beautiful colors, true to nature, and affords you a most gorgeous and timely center attraction for the holiday window. But the tree is not all—the display includes ten artistically air-brushed record stands with holly leaves and berries, to which are attached record and record rings. Fastened to the rings are figures of girls dressed in heraldic garb, and suspended from their herald's horns are flags of different nations. On the record stands and in the language of each nation we have written the greeting 'Have a Merry Christmas with a Victor.' This interesting manner of calling attention to our foreign records is sure to make a great impression; not only on the foreign population, but on Americans as well. It shows the tremendous scope of the Victor in a concise, easily understood form. Undoubtedly this window will be in great demand by dealers throughout the country." Live dealers have already taken advantage of this opportunity.

BLACKMAN CO.'S GOOD REPORT.

Satisfactory Demand for Both Edison and Victor Goods from the Dealers with Prospects of a Lively Holiday Business—Specialties Increasing in Demand—Some of the Blackman Methods for Improving Business.

J. Newcomb Blackman, president of the Blackman Talking Machine Co., 97 Chambers street, when seen by The World stated that business with his concern in both the Edison and Victor lines was in very satisfactory shape and that the indications were that there would be close to a record demand for talking machine goods during the holidays. Judging from the orders sent in by the dealers there is a strong demand for machines and records of the higher grades and this tendency is steadily becoming more pronounced. The various Blackman Co. specialties, including the Playrite and Melotone needles, Place record brushes for both cylinder and disc machines (which are referred to on page 35 of this issue) and the Blackman folding trays, with Rapke labels, for cylinder

records continue to gain ground and find increasing favor with both the trade and the talking machine owners.

A feature of the Blackman method of doing business that appeals to the dealer is the various suggestions offered for the improvement of the retail business, which suggestions are carefully thought out and their value proven before they are submitted to the dealer. Then, too, the Blackman Co. are continually making improvements in their own methods of doing business to the end that the dealer may secure better and more rapid service wherever possible.

KEEPING IN TOUCH WITH DEALERS.

J. C. Roush, manager of sales for the Standard Talking Machine Co., the well-known jobbers and distributors of Pittsburg, Pa., doesn't let the dealers in the territory covered by that company forget for a minute that the Standard Talking Machine Co. is ready to fill all orders. Letters are sent out to the dealers weekly, dwelling on some particular point, such as suggestions on the selling of cab-

inets, how to handle the holiday trade, etc., each letter being prefaced with a live story or anecdote as an introduction to the main point of the argument. In a word, every paragraph of the letters talks right out loud for itself.

THE O. K. HOUCK HOLIDAY CAMPAIGN.

(Special to The Talking Machine World.)

Memphis, Tenn., Dec. 9, 1910.

The talking machine department of the O. K. Houck Piano Co., of this city, in charge of A. L. Owen, is getting after the holiday business in lively fashion and has sent out through the mails to prospects much literature that should result in sales of outfits before the rush is over. They have been paying special attention to the Edison Fireside outfit, which they offer on free trial for two days before the initial payment is made. The various Victor and Edison outfits are also listed in a separate folder with the several features and the cash and instalment prices printed in detail. Though the holiday campaign is young, excellent results have already been noted.

SONORA PHONOGRAPH CO. REPORT.

Matters at the Sonora Phonograph Co. plant, 78 Reade street, New York, seem to be going on serenely. The firm appear to be comfortably weathering the various storms that are from time to time reported as threatening their course. In a recent interview The World was told that the Sonora machines continue to speak favorably for themselves, if increase of business among the trade and flattering comments from private owners are dependable indications.

General Manager Hoschke said: "At the Sonora laboratory important changes are taking place. There have been additions made to its governing personnel and also certain improvements in the methods of producing sapphire records, which are to make our discs one of the most important factors in the musical development of the phonograph industry, while the mechanical portion of our machines, for the most part produced by Pailard, of a century's music box fame, and favorably known throughout the world, already stands undeniably—or at least abreast—of the highest types produced anywhere. Our \$25 Sonora hornless phonograph certainly represents remarkable value, and the recently added type F, \$100, solid mahogany machine, is of unique and most handsome design."

DOLBEER ATTENDS WESTERN MEETING.

F. K. Dolbeer, sales manager of the National Phonograph Co., Orange, N. J., who went West to call on the Edison jobbers, will not be back East until nearly Christmas. There will be an annual meeting of the company's Western salesmen in Chicago on December 20, when matters for the coming year will be taken up.

A LIVE BROOKLYN DEALER.

J. D. Freedman, proprietor of the Disc Talking Machine Co., 371 Stone avenue, Brooklyn, N. Y., although having been in business on his own account for only nine months, reports a most satisfactory volume of sales with prospects that the present month will set a pace hard to beat. Mr. Freedman handles the Victor line exclusively and carries a full assortment of machines and records. He has been in the talking machine business in Washington and New York for the past eight years and before opening his present store was for three years manager of the talking machine department of R. H. Macy & Co., the big department store.

The Harrity Furniture Co., Savannah, Ga., referring to the Grafonola Favorite, in writing to the Columbia Phonograph Co., say: "We received the Grafonola 'Favorite' yesterday and must say that we are more than pleased with this machine. We believe this will be the biggest seller of any machine that has ever been put out by the company. We think so much of it that you can send us — more, with the concert reproducer."

UNDERTAKERS, ATTENTION!

Representative of a Paper in the Undertaking Trade Discovers the Fact That Graphophones May Be Used to Advantage at Funerals—Interviews R. R. Souders, Manager for the Columbia Phonograph Co., in Dallas, Tex.

Some time ago one of the leading trade papers in the undertaking line published an account of a funeral service in which the graphophone was used to advantage. The representative of the Southwestern Casket News, of Dallas, Tex., discussed this feature with R. R. Souders, manager in that territory for the Columbia Phonograph Co. Mr. Souders says:

"The undertaker of all men in the world must be prepared for emergencies. His clients don't usually give him notice when they are likely to require his services. This unavoidable feature often occasions some difficulty in carrying out the obsequies in a befitting manner. When he is required to arrange for suitable sacred music, he finds the available local talent cannot be obtained and there is no time to communicate with a neighboring town.

"This has proved another opportunity of showing the unlimited uses of the talking machine. With the aid of a Columbia Graphophone the undertaker can render musical selections by a choir quartette, trio, duet or soloist, produced by the finest talent of the musical world. What more beautiful could be imagined or desired than a Columbia rendering of 'Abide With Me' as a baritone solo sung by George Alexander? The instrument can be completely hidden with flowers or by other suitable means and the effect is in no way mechanical or inappropriate to the solemn nature of the occasion. That the value of the instrument for this purpose has been recognized is evidenced by its use on several occasions."

Posted on the wall in the factory of a manager who believes in mottoes is this: "A mistake avoided is better than a mistake patched up."

TALKING MACHINES AND OPERA.

How the Page Announcements of the Victor and Columbia Companies in the Program of the Boston Opera House Tend to Further the Cause of Good Music in the Home.

In keeping with the movement to place talking machine music on a higher plane worthy the attention of people of cultivated musical taste, it is interesting to note that both the Victor Talking Machine Co. and the Columbia Phonograph Co. are well represented in the elaborate program of the Boston Opera House, where the annual season of grand opera is now under way. The former company have their products exploited in page announcements by both the Henry F. Miller & Sons Piano Co. and the Eastern Talking Machine Co., while the Columbia Co. use a page for calling attention to the Grafonola. There is no question but that such publicity, aside from the direct results obtained through the medium of sales, is of great benefit to the cause of the talking machine at large, placing talking machine reproduction on a par with the work of the grand opera artists in the flesh. The reader is bound to be impressed when he realizes that the voice of the singer he hears at the opera is recorded on talking machine records, and that he can hear the same voice as often as desired and in his own home at slight cost. It is simply a case of striking while the iron is hot.

SHIPPERS SEEK REPARATION.

Claims Growing Out of Missouri River Rate Cases Aggregate \$100 000.

(Special to The Talking Machine World.)

Washington, D. C., December 5, 1910.

Reparation claims aggregating more than \$100,000 growing out of the Missouri River rate case have been filed with the Interstate Commerce Commission, and more are coming in.

On June 24, 1908, the commission directed the carriers operating between the Mississippi River

and the Missouri River to make a reduction in freight rates between these points on traffic originating east of the Mississippi River. The railroads got out an injunction and carried the case to the Supreme Court, which several weeks ago sustained the commission and the lower rates were then put into effect. However, for a period of nearly 18 months, the rate decided by the commission as too high prevailed and the shippers now seek to collect the difference between the rate directed by the commission and the higher rates of the carriers. The commission will hold a special hearing in Chicago on December 21 to hear all these cases together.

ANENT THE PETIT DUPLEX PATENT.

November 26 Judge Ward, United States Circuit Court, New York, in the case of the Victor Talking Machine Co. against the American Graphophone Co. (Columbia Phonograph Co., General) for alleged violation of the Petit duplex record patent, signed the order denying the motion to admit certified copies of two decisions of the Austrian courts annulling that patent. The memorandum was filed the previous Wednesday. In denying the motion the court said: "The Austrian decisions are of value only as far as the reasons on which they are founded recommend themselves to the courts. The complainant being fully possessed of this reasoning can present it to the court at the argument." In other words, the order permitted the defendants to renew the motion at the final hearing, the date for which is not involved and which will come on in due course. Ralph L. Scott appeared for the defense.

TOLSTOI AND EDISON.

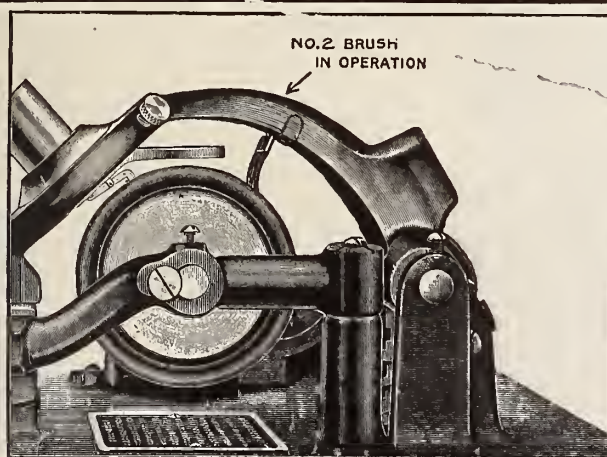

A cable to the New York World says that among the papers left by Tolstoi were found many letters from Thomas A. Edison, the American inventor, doubtless of great interest. The letters have been deposited with Tolstoi's closest friend, Prince Tschertky.

SAVE THE LIFE OF YOUR RECORDS

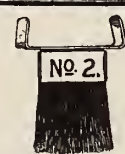

BY USING **THE PLACE AUTOMATIC RECORD BRUSH**

FOR EDISON PHONOGRAPHS AND VICTOR TALKING MACHINES.

PATENTED {September 25 and October 2, 1906 and September 10, 1907.

NO. 2 BRUSH
IN OPERATION

PRICE, 15 CENTS

CAN BE USED ON ALL PHONOGRAPHS

Removes lint and dust from record automatically. Saves Sapphire from wearing flat and prevents rasping sound. Insures a perfect playing record. It is equally as efficient when recording. It is too cheap to be without.

MANUFACTURED BY BLACKMAN TALKING MACHINE CO.

97 CHAMBERS STREET, NEW YORK

J. NEWCOMB BLACKMAN
President
"The White Blackman"

LIVELY TRADE IN PITTSBURG.

Holiday Business Showing Up in Most Satisfactory Manner—Dealers Much Worried Over Danger of Stock Shortage—Reports of the Various Houses—The New Frederick Department—What the Dealers Are Doing.

(Special to The Talking Machine World.)

Pittsburg, Pa., Dec. 9, 1910.

The general business in the talking machine trade of this city, both wholesale and retail, is reported as being excellent and the only complaint seems to be that it is impossible to get machines, especially of the hornless models selling at the higher prices. The shortage in the new styles of Victrolas is keenly felt in this section and the dealers are fervently praying that they may receive shipments before the end of the holiday season.

The W. F. Frederick Piano Co., this city, are the latest concern to enter the talking machine field in Pittsburg and have opened a large and attractive department in their store on Smithfield street, where they handle the Victor line exclusively.

George Balsdon, the dealer in the Fifth avenue arcade, is working hard to handle the present volume of business coming to his store.

The Henry Co., at 619 Penn avenue, report the best holiday business they have had since starting in business, and their only worry is that their stock of Victrolas is getting very low, with slight prospects of replenishing it before Christmas.

The Kaufman Department Store are again devoting considerable attention to their talking machine department and are getting excellent results.

Keely Phonograph Co., 5936 Penn avenue, are enjoying increased sales, and expect to dispose of thirty-five Victrolas between now and Christmas.

The Keystone Talking Machine Co., 44 Sixth avenue, report a growing demand for talking machines, particularly among the German element of Pittsburg, they making a feature of this part of the trade.

C. C. Mellor Co. are handling a very satisfactory holiday business.

Spear & Co., Penn avenue, state that their talking machine mail order business is the best in the history of the company.

Boggs & Buhls, Northside, Pittsburg, have just opened up an attractive Victor department, and are agreeably surprised at the progress they have made in the two weeks the department has been doing business.

Henry Braun, 520 Federal street, N. S., report a very satisfactory holiday business.

Enterprise Phonograph Co. claim that their business is double that of last year.

John Reibling, 1212 Carson street, S. S.; Philip Rothleder, 1303 Carson street, S. S., and Wm. Sahner, Mt. Oliver street, all report that their business is entirely satisfactory this fall.

TRADE IN THE QUAKER CITY.

November Business Exceeds Expectations of the Dealers—Columbia Goods Popular—Recent Visitors of Note—Bellak's Sons Featuring Talking Machines—What the Other Houses Are Doing—Shortage of Stock a Worry to Jobbers and Dealers These Days.

(Special to The Talking Machine World.)

Philadelphia, Pa., Dec. 9, 1910.

The talking machine business in Philadelphia during the month of November was very large. It was better than any of the dealers had expected it would be, and about the only fault to be heard anywhere is the shortness of stock. On some few of the more popular styles the dealers have been having great difficulty to get any instruments, and from all appearances at present during the next three weeks there is going to be a pretty general clean-up on this market.

Thomas K. Henderson, manager of the Philadelphia branch of the Columbia Co., reports an exceptionally good business. The trade in Grafonolas of every type and grand opera records is growing day by day.

William H. Furbee, of the Furbee Piano Store,

Victor

¶ Why say more?

¶ Come to the real headquarters for VICTOR and EDISON goods.

¶ We give you everything any other jobber will—and then some.

¶ Service too good to mention.

Standard
Talking Machine
Company
PITTSBURG, PA.

Edison

Wilkes-Barre, spent Monday at the Columbia headquarters selecting additional stock. The recent opening of his Grafonola department was a pronounced success and Mr. Furbee is to be congratulated on having the finest talking machine department in his city.

Among the professional people who visited the Columbia store last week were Bert Williams, Billy Reeves and a number of Ziegfeld's "Follies of 1910" company, who enjoyed themselves listening to the records which Mr. Williams made for the Columbia Co. E. F. Hawley who, with his talented wife, were headliners at Keith's, spent a couple of hours in the store and purchased a handsome instrument for shipment to their Michigan home. Frank Coombs, who makes records exclusively for the Columbia Co. and who is appearing in Philadelphia at present with "Hans, the Flute Player," made frequent visits to the Columbia headquarters.

George W. Lyle, general manager of the Columbia, was in Philadelphia last Saturday. He said that the Columbia firm are in receipt of a number of letters from dealers complimenting them upon the new operatic records and new machines.

Another recent visitor to the Columbia store was Lee Goldsmith, of Joseph Goldsmith & Co., Harrisburg, Pa., extensive handlers of the Grafonola line and records, who reports 100 per cent. increase in their business over last year. The new demonstration record which the Columbia are putting out has made a great success and they are getting lots of orders for them.

James Bellak's Sons will feature talking machines after the holiday season. They have handled these instruments, along with pianos, for some years, but never gave them much attention. They expect to build on the first floor of their store several very nice "hearing rooms," and will carry a full line of machines and records.

It is said that the Estey Co. are about to make arrangements to handle talking machines extensively in their new home at 17th and Walnut streets, where they expect to move about the first of June.

H. A. Weymann & Sons have been doing a very excellent Victor and Edison business all through November. In the new arrangement of their department they have found things much more convenient. They are meeting with some trouble in getting goods fast enough, and on several lines they could have made a number of more sales than they did had they been able to supply the stock. The high priced records seem to have the call, says Manager Doerr. From observation they believe that it looks as if the Christmas business was going to be phenomenally large.

The new manager at Heppes reports that they are having an excellent Victor business at the present time. They are short on their records and machines. Their business is 50 per cent. larger than it was last November.

Representatives of the National Phonograph Co. have been in Philadelphia calling on the trade and looking over the stock of the two-minute records which the men have on hand. It is thought that it is with a possible recall of all the two-minute records on the market and the substitution of the four-minute records for them.

Louis Buehn & Bro. report the largest November business they have ever enjoyed. They are short of stock in certain Victor styles, but they feel that they will be able to get all the instruments they require. They have been doing very well with their Edison business phonograph department, since they have brought it under the same roof and can give it their personal attention.

The Edison wagon proposition in Philadelphia has turned out fairly satisfactory. They expect shortly to get this new proposition in excellent hands and that the returns will be most satisfactory.

The Penn Phonograph Co. report an unusually large sale of Amberola records, and they have been selling generally of their entire line. The many improvements they made in their warerooms during the summer and early fall has stood them in good stead in handling the large business of the fall and early winter, and they are very optimistic regarding the future.

**The Columbia "Demonstration"
Double-Disc Record is a demonstration
and no mistake. At the cost of just 10
cents to cover the expense of handling
—it is better than a business-getter;
it's a business-maker.**

Columbia Phonograph Co., Genl., Tribune Building, New York.

AN INTERESTING LIFE STORY.

Connection of Edward D. Easton with the Development of the Talking Machine Made the Basis of an Article by James B. Morrow in the Boston Globe—How He First Became Interested in the Talking Machine—Began Business in Back Room in Washington, D. C.—A Story Worth Reading.

In a recent issue of the Boston (Mass.) Globe, James B. Morrow contributes an interesting article about the birth, growth and development of the talking machine, and especially the connection of Edward D. Easton, president of the Columbia Phonograph Co., General, one of the first to witness the first inventions of this kind, and has taken a prominent part in the permanent establishment of the business on a successful commercial basis.

The life of Mr. Easton, says Mr. Morrow, is full of incident. At the age of 18 he was assistant editor of the Hackensack (N. J.) Republican, and his beautiful estate of "Agricola," his home, is on the outskirts of that place. Subsequently Mr. Easton became a stenographer in Washington, D. C.; and afterward graduated in law from the Georgetown (D. C.) University. On being asked where he first heard of the talking machine, Mr. Easton said:

"While working around the Capitol in Washington, several stenographers, Andrew Devine [afterward vice-president and senior director of the American Graphophone Co., since deceased—Ed. T. M. W.], especially, told me of a talking machine that they had seen in Graham Bell's laboratory. . . . Returning from Paris with \$10,000 in cash, given him as a prize, Graham Bell equipped a laboratory for the purpose of inventing a machine that would record and reproduce sounds. I suppose music was in his mind at the time. The work was carried on by Dr. Chichester Bell—a relative of Graham Bell—and Charles Sumner Tainter, a mechanical expert of Watertown, Mass. It was the Bell and Tainter machine that I heard Devine and other stenographers talking about.

"Later, I was invited to the laboratory and saw the machine in operation. I found that, while I had spent years in learning quickly to put human speech on paper by means of signs, the machine could beat me easily and do the work better and more accurately. In my diary, that night, I wrote that I meant to get as large an interest in the invention as was possible. My connection with the subsequent development of the talking machine, therefore, was not accidental. The supposition was that the machine would make the dictation of letters in business offices to stenographers unnecessary. The musical possibilities of the invention were not then apparent. I employed it right off, being the first stenographer to do so in government work. I dictated my shorthand notes into the machine, and had my typist write them out on paper.

"About that time, it was in the year 1887, I accompanied the newly created interstate commerce commission on its first trip of investigation. We were gone seven working days, during which period I made \$3,500. My salary was only \$100 a month,

but I received 10 cents a page extra for transcribing my stenographic notes and was permitted to supply all the persons in interest with full copies of the testimony taken at the different hearings. Well, I put my \$3,500 into the talking machine business.

"I did more than invest my money," Mr. Easton continued. "I gave two years of my time to the company without any salary. I had been earning a large salary as a government stenographer. I abandoned a good business in the belief that the talking machine ultimately would pay me far better, a judgment that was justified in every respect.

"My friend, Andrew Devine, also became an important share owner. James G. Blaine, William Walter Phelps, of New Jersey; R. R. Hitt, of Illinois, long a member of the House of Representatives and chairman of the committee on foreign relations; Senator Allison, of Iowa, and Senator Morrill, of Vermont, bought stock. Years afterward Wu Ting Fang, the Chinese minister, came into the company as an investor.

"Scientists in different parts of the world had been trying for more than 100 years to catch and hold the sounds of human voice," Mr. Easton went on to say. "The Imperial Academy of St. Petersburg offered a prize in 1779 for an instrument that would talk. Experiments were later made in Paris and Vienna. Faber, an Austrian, produced an apparatus in the year 1850 that gave some impetus to modern inventors, and he was followed by Leon Scott and finally by Edison, along in 1877. After Edison abandoned his investigations nothing was done for several years by anyone, so far as I can learn.

"Then came the announcement that Bell and Tainter had invented a practical machine that could actually talk. Moreover, their records could be removed, repeatedly used, kept indefinitely and transported by mail or express. They had worked for five years in Graham Bell's laboratory. When I first saw the machine they were unwilling to make their invention known until it had been further developed. My idea was to strike while the iron was hot, a view they accepted with some reluctance.

"We retired to a back room on a side street in Washington and began business. Our first factory employed six men and its capacity was three machines a day. Now we are manufacturing two machines a minute. In a little while we moved to a better building, where the rent was \$300 a month. It was a risky undertaking, we thought. However, by that time we could reproduce simple songs, banjo playing, and band music, and had slot machines that would sing or talk for a nickel. We assumed the financial obligation of \$300 a month with fear and trembling. The slot machines, much to our surprise, paid the first month's rent in three days and there was money enough left for our electric lighting. Stores were quickly established in all the principal cities, and in each instance, though we rented rooms in the thick of business, the slot machines paid all the expenses. In the meantime we were selling talking machines and keeping our factory busy.

"We (the Columbia Phonograph Co.) have a laboratory in China and the records of 400 Chinese

songs, which were given up by the best Mongolian artists. The music may sound something like a chicken eating corn off a pine board, but that is because we cannot understand or appreciate it. Laundrymen in this country are large purchasers of Chinese records, thus getting songs from home in their own language to cheer them as they iron our shirts and collars.

"The manufacturers of American talking machines are doing business everywhere—in Japan, Turkey, Africa, Egypt and the islands scattered up and down the earth, from Australia to Greenland, and then to Madagascar. More than \$20,000,000 is invested in the industry, and thousands of persons are given steady and pleasant employment."

EXPERIENCING BUSY TIMES.

New York Talking Machine Co. Report Sales Ahead of This Season Last Year.

Throughout the fall, trade with the New York Talking Machine Co., 81 Chambers street, New York, has never slackened; and notwithstanding the removal to the present premises, which was carried on without a perceptible halt in business, their sales are going far ahead of last year. A great demand developed for the newer lower-price Victrolas, and while the Victor distributors have sample lines, it now looks as if the factory would be unable to supply goods in sufficient quantity to cover the holiday sales. All Victor dealers will probably be in the same predicament.

The satisfaction of undertaking a difficult task and accomplishing it successfully is the greatest incentive to good work.

Makes a Phonograph Sound Life-Like

THE MORSE Clarifier is a device which placed in a tube between reproducer and horn of any standard make machine renders the sound clear, loud and distinct. Many of the intense vibrations that before caused the phonograph to sound metallic and mechanical are overcome. Also defects in records due to recording such as blasting and splitting of high notes are largely eliminated.

Some Comments Upon the Campaign of Pre-Holiday Advertising Carried on by the Talking Machine Houses of Chicago—Recitals Prove Most Satisfactory and Trade Compelling Form of Publicity—A Model Program Which Recently Came Under Observation Printed on This Page—Sympathy for Mr. Goodwin—Expansion of the Schmelzer Arms Co.—Columbia Progress Emphasized in Various Directions—Wurlitzer Victrola Advertising—Talking Machine Co.'s Striking Announcement in This Issue—Fibre Needle and Its Future—Louis F. Geissler a Recent Visitor—November Trade a Record Breaker—December Trade Proving Equally Satisfactory—Aeolian Co. Have Thrown Open to the Public Their Beautiful Talking Machine Department—Other Items of General Interest to the Trade.

(Special to The Talking Machine World.)

Chicago, Ill., Dec. 10, 1910.

The pre-holiday talking machine advertisements in the Chicago dailies are numerous and for the most part "sehr gut." Reviews and excerpts of some of them are here given. Although *The World* will reach its readers during the final windup of the ante-Christmas trade, dealers may still reap some benefit from the perusal of the subjoined matter, as it will come to them at a time when they will be rushed, with little time to prepare new copy, and they may, therefore, gain some good suggestions for the preparation of their own announcements.

On November 18 there appeared in the Chicago Tribune what was probably the most remarkable talking machine advertisement ever appearing in a Chicago daily. It was by Lyon & Healy and occupied an entire page. About two-thirds of the page was devoted to the Victor, under the caption "A Victor talking machine to suit every taste and purse." Every type of Victor machine was illustrated and described, including the new style Victrolas. The text was for the most part original, including even the description of the Victrolas. We quote in part:

"The Victor talking machine is the ideal home entertainer. With its capabilities limited only by the number of records obtainable, and there are thousands of them, embracing practically every subject susceptible to sound reproduction, including the cleverest vaudeville offerings, monologues, comic and popular songs, instrumental music and arias from the grand operas, it is without doubt one of the world's greatest pleasure giving instruments. For the business or professional man, exhausted by the day's exacting duties, the Victor talking machine offers a real opportunity for full relaxation combined with genuine entertainment. The Victor is alike popular in the home, concert hall, at the dance, in the sick room, and wherever clean, wholesome entertainment is appreciated."

Extended space was also given to the Edison phonograph, with an excellent introduction and descriptions of all the types. "The Edison language outfit" was also exploited. Cuts of an Edison machine, equipped with a Cygnet horn, and an Amberola, were also presented.

The Talking Machine Shops had a Thanksgiving ad that suggests something similar for the Christmas holiday season. The gist of the argument was as follows:

"Decide to have a Victrola Thanksgiving. If you have been putting off the purchase of a Victrola, Thanksgiving will be a good excuse for deciding now. Some music or song you play on that day will so intimately fit the sentiment of your home gathering, all will remember it. You can see all Victrola styles at either Shop," etc., etc.

A distinctively Christmas advertisement by the Talking Machine Shops urged the desirability of ordering Victrolas early. This significant sentence appeared in a "box" extending clear across the advertisement:

Please Mark Your Christmas List "Shops" for Victrolas.

Good Mixed Program.

Dealers giving talking machine recitals before a "mixed" audience or asked to give suggestions for a program are often at a loss to compile a list of records which will result in pleasing different tastes and yet maintain a fair degree at least of the interest of the entire audience. John Otto, of the retail talking machine department of Lyon & Healy, gave a recital last evening for the benefit of the Sunday school of the Reformed Church of Irving Park. He succeeded in preparing a program which contained offerings gratifying to the musical elect and the musical would-be elect, interspersed with numbers for the kids, which tickled the musical elect as well. It will be noticed by the program which follows that he avoided "popular" songs entirely. The light numbers were so exceedingly light that they did not presume to be music and therefore did not offend the critics. It was a big success in every way and, as *The World* man considers it quite a model program, it is here reproduced:

PART I.

1. Coronation March (Le Prophet).....Pryor's Band
2. Gems from the Red Mill.....Victor Light Opera Co.
3. No News, or What Killed the Dog.....Nat Willis
4. Sweet Bird that Shant's the Noise of Folly....Melba
(Flute Obligato.)
5. Contes d'Hoffman (Oh, Night of Love).....
Farrar and Scotti
6. Largo (from Xerxes).....Gilbert
7. Down in Turkey Hollow.....Golden and Hughes
8. Dinorah (Shadow Song).....Tetrazzini
Reading by Miss Elizabeth Matthews

PART II.

1. Symphony in B minor (unfinished) "Shubert".....
Pryor's Band
2. Lucia—Sextette—Act II.....Sembrich,
Caruso, Scotti, Journet, Severina and Daddi
3. Uncle Josh Keeps House.....Cal. Stewart
4. Lucrezia Borgia (It is better to laugh than to
sigh).....Schumann-Heink
5. Mignon (I know a Poor Maiden).....Geraldine Farrar
6. Darkey School Days.....Golden and Hughes
7. Valse Lente.....Caruso
8. Trovatore (Prison Scene).....Alda and Caruso
9. Home, Sweet Home.....Sembrich

A good point to be noted is that the titles are invariably given in English. The accompaniment to the Caruso "Valse Lente" was played most acceptably on the piano by Grace, Mr. Otto's fourteen-year-old daughter.

Death of C. E. Goodwin's Father.

The trade will regret to learn of the death of the father of C. E. Goodwin, which occurred this morning at his son's home at Orange, N. J. Mr. Goodwin, Sr., was a distinguished artist, a man of keen intellectuality, and an unaffected, genuinely courteous gentleman of the elder school. He is survived by his widow, also an artist of distinction, two sons, C. E. Goodwin, manager of salesmen of the National Phonograph Co., Clarence N. Goodwin, the well-known Chicago attorney, and a daughter. The cause of the death was bronchitis.

Schmelzer Expands.

The Chicago office of *The World* has received the following self-explanatory communication from A. A. Trostler, manager of the talking machine department of the Schmelzer Arms Co., Kansas City, Mo.: "For your information we wish to say that the Schmelzer Arms Co. have consummated a deal whereby they have taken over the entire stock of talking machine goods of the Smith Phonograph Co., Oklahoma City, Okla. In addition to this they have secured the Victor jobbing agency and will now be known as the Schmelzer Arms Co., Oklahoma City, Okla., jobbing both Victor and Edison goods. We have leased a three-story, 50 x 140 building, where we will build up the finest talking machine parlors in the West.

"We feel that Oklahoma is the coming country and a good live jobber is needed there to exploit both Victor and Edison goods. We are having an excellent business in Kansas City; it has been bigger than for some years past, and we feel that by the first of the year we shall find that we have sold more goods than ever before in the history of our talking machine business."

Columbia Items.

George W. Lyle, general manager of the Columbia Phonograph Co., is expected in Chicago Tues-

day and will have an opportunity of inspecting the Chicago headquarters of the company at Wabash avenue and Washington street, as they will then be in a practically completed condition. The retail department will be in full operation there at that time and the wholesale department will be moved from the present location, 210 Wabash avenue, a week later. As previously stated in *The World*, the present location will be maintained until after the holidays, at any rate, as a branch retail, thus giving the company a strong double header for the Christmas trade.

District Manager W. C. Fuhri moved his office to the new quarters several weeks ago and has been supervising the remodeling of the big store and the construction of the excellent series of booths along the lines roughly indicated in last month's *World*.

C. F. Baer, manager of the Chicago office, speaks in enthusiastic terms of current business, both from wholesale and retail viewpoints. Some days ago they received here a sample of the new favorite \$50 hornless graphophone, and that it will prove a winner is evidenced by the orders already booked.

A. D. Herriman, retail manager, has returned from a two months' sojourn in the South, richer in both health and wealth as a consequence.

F. C. Cass, credit manager, is projecting his winsome and convincing personality into the Southwest. He will return shortly.

Well Illustrated Publicity.

The Rudolph Wurlitzer Co. are doing some advertising in the Chicago dailies that depends largely for its unquestioned force upon the character of the illustration. They are devoted almost exclusively to the Victrola. One of the illustrations represents a beautiful woman rocking a cradle, with her husband standing behind her chair, smoking-jacketed and pipe in mouth. In front of this imposing family group is a Victrola, while above the instrument, materialized from the tones issuing therefrom, is a vision of Marguerite at her spinning wheel. Another advertisement introduces Salome. The vision is that of the dancer in the act of taking from the hand of the executioner, appearing through the dungeon trap-door, the platter containing the head of John the Baptist. The manner in which the scene is worked out is admirable. The head of the Baptist is only dimly lined out. The semi-nudity of Salome is only suggested. There is nothing unnecessarily repulsive in the artist's conception. The Victrola, of course, is again in evidence and the expression on the faces of the auditors is appropriately tragic.

Stop!

The advertisement of the Talking Machine Co. in this issue will be found to be one of the most forceful of the now famous series. The stalwart policeman, mounted on a veritable Bucephalus, looms out of the picture very dramatically. He (the policeman, not the horse) has a very pertinent message for the talking machine dealer. Read it.

Fibre Needles by the Million.

The *World* knows positively that the Victor Co. are literally turning out fibre needles by the millions. They are just coming on the market in a large way in the new packing bearing the imprint of the Victor Co. There is no question that under the new auspices the fibre needles are to be pushed and given a country-wide and even a world-wide distribution, the contemplation of which must fill the heart of the inventor, Mr. Hall, with unlimited joy.

The *World* representative had the privilege recently of listening to a "recital" in a home where the Victor had been ensconced for a year and nothing but fibre needles had been used on the records. Not a single steel needle had ever entered this home. The records were in perfect condition and the musical effects beyond all criticism.

THE "WHOLESALE" DISTRIBUTOR

The
Talking Machine
Company

72-77 Wabash Avenue, Chicago, Ill.

FROM OUR CHICAGO HEADQUARTERS.
(Continued from page 38.)

Geissler a Visitor.

L. F. Geissler, general manager of the Victor Talking Machine Co., spent last Sunday with his son, Arthur D. Geissler. The senior Mr. Geissler was returning from the Coast, where he reported present trade and the outlook good, indeed.

There Are Now Three "Shops."

The Talking Machine Shops, George and Cecil Davisson, proprietors, are now triplets instead of twins, as heretofore. The new shop occupies a good-sized store at 220 Michigan avenue, on the ground floor of the Congress Hotel building, and, it is expected, will sell a whole lot of Victrolas during the present joyous holiday season.

Fine Aeolian Department.

The beautiful remodeled and reboothed talking machine department of the Aeolian Co., occupying the entire mezzanine floor of their building, is now

completed. A full description, embellished with illustrations, will appear in the January issue of The World.

Trade.

November is reported by local jobbers as being a record breaker. The emphasis is largely on high grade goods. December is going to prove a wonder, providing the factories are able to meet the demand, but that is a grave question. Local retail trade with the high-grade downtown stores is excellent. Business with the stores and departments catering mainly to the cheaper trade, together with many of the outlying stores, suffers somewhat on account of the great garment workers' strike.

Lyon & Healy Service.

A convincing straight-from-the-shoulder talk on the wholesale Victor and Edison service, which has built the talking machine business of the Big House to such immense proportions, will be found elsewhere in this issue and should prove very interesting to dealers everywhere.

THE PERMANENT JEWEL NEEDLE.

Some "Pointers" on How It Is Adjusted to the Disc Record—The Jewel Needle Is Constantly Growing in Favor.

(Special to the Talking Machine World.)

Chicago, Ill., Dec. 10, 1910.

There is always a right and a wrong way of using a good thing. The accompanying illustration shows clearly the manner of adjusting the permanent jewel needle to the disc record. As explained repeatedly in this paper the permanent needle consists of a finely-ground garnet set in a

HOW TO ADJUST PERMANENT JEWEL NEEDLE.

metal shank, which fits into the needle arm of a disc machine in the same manner as the ordinary steel needle.

The Permanent Needle Sales Co., 14 State street, Chicago, control the sales for this needle and are the possessors of abundant tangible proofs that the public appreciate the elimination of the necessity of changing the needle. Furthermore, they have hundreds of letters from dealers and others expressing their appreciation of the tone and musical effects of the permanent jewel. The World representative was shown substantial orders from dealers and jobbers all over the United States and from foreign countries as well. Dealers would certainly do well to investigate this proposition at once. A wonderfully comprehensive letter regarding this needle is reproduced elsewhere in this issue.

tisement—yourself. And if that self cannot give an impress of life, vigor, confidence, conviction, accuracy, thoroughness and sincerity—you are in the wrong business. Anybody can tabulate the selling claims of a food product, for instance. Only a live man can get those claims under the skin of indifference of that other live man who is to be made to desire your merchandise more than the hard-earned and double hard-saved money in his pockets.

"If there were such a thing possible as an arbitrary rule of copy construction I believe it would be based on this plan: A forceful, hammer-headed foreword, and a climax at the end. And your illustrations ought to be considered a part of your display. The forceful introduction can be secured by the illustrations as well as by the words.

"Analyze the Product—The Market—The Probable Purchaser—The Policy of the House—The Finished Copy.

"Don't write a line of copy until you have satisfied yourself that you know the product it represents—what it's for, whom it's for, who makes it, who sells it, how it is sold, what it's made of—these being only a suggestion of the hundred vital points that you must bring up and check off.

"Don't write a line of copy until you can first write a lucid outline of the market the product has and should have. Is it a new idea or an established article? What are competitive conditions? Are retail prices maintained? Is it to be pushed in a new territory? What is the attitude of the retailer and jobber? Are you to concentrate mostly on immediate sales? or build for future good will? or both?—and a hundred other questions will suggest themselves to you.

"Don't write a line of copy until you can get a clear mental picture of the individual who represents the average of the class of purchasers you are appealing to. Then write your copy to him—have him in front of you every minute. Is he man, woman or child, or a composite of all three? If he is a man, is he a man of family or an irresponsible spendthrift?

"Is he interested in anything that relates to the product—in his social, business or sporting life?—and a hundred other questions can be piled up on top of these as fast as you can write them.

"Don't write a line of copy until you know the merchandising policy of the house whose product you are trying to sell. Not that that policy is always right, but it is usually nearer right than the first wild guess of an outsider, and we are taking it for granted in this case that, as far as we are concerned, the policy is settled. You are pretty safe in assuming that, too, because it usually is settled. And if you want to see a graphic caricature of a dehorned, blind billygoat trying to butt an alleyway through the Palisades of the Hudson, just watch any one of half a thousand ambitious advertising writers trying to force an O. K. on to copy that conflicts with the Policy of the House.

"And don't hand over a line of the copy you have written until you have got right into the clothes of the man you are trying to get hold of and asked yourself if you have said anything that will stop him and hold him a minute and put a distinct conviction into his head. Find fault. Put yourself in a mean, cold-blooded frame of mind and go over that copy with a harrow."

MUST CUT EXPRESS RATES.

Commerce Commission Orders Reduction in New England.

Several New England towns, their commercial associations and manufacturing interests received notification Dec. 8, that the Interstate Commerce Commission had decided favorably on their protest against the recently raised rates of the Adams Express Co. The proceedings were started by the W. L. Douglas Shoe Co., whose lead was followed by many other companies in Brockton, Whitman, Taunton, Rockland, North Attleboro, and Pawtucket. The decision, according to Richard J. Donovan, attorney for the complainants, means that the express company will be obliged to restore its previous rate of 75 cents for a hundred pounds between these points and New York.

WHY THE SALESMAN FAILED.

He wasn't neat in his appearance.
He lacked dignity in his bearing.
He used no tact in introducing himself.
He was late in keeping his appointment.
He had a conceited and arrogant manner.
He did not believe in his own proposition.
He disgusted his prospect with gross flattery.
He didn't know the fine points of his own goods.
He offended the prospect by undue familiarity.
He made a bitter attack upon his competitor's goods.

He openly ridiculed his prospect's ideas and methods.

He made no preliminary study of his prospect's case.

He relied on bluff instead of solid argument based on facts. He got lost in the forest of details and couldn't stick to essentials.

He had been out with the boys the night before and showed the effects.

He talked too much. He gave his prospect no chance to explain his needs and position.

He couldn't answer questions and objections intelligently, concisely and convincingly. He tried to close his prospect before he had worked him up to a point of conviction.

He lost his nerve because the prospect presented such an unyielding front, forgetting that battles are won by hard rallies at the finish.

He didn't know his business when he made the approach; didn't talk clean-cut business after he got in; didn't make it his business to fight all the way through and didn't do business before he left, says the Bankers' and Brokers' Gazette.

TAKE ON THE COLUMBIA LINE.

The Rhodes-Mahoney Furniture Co., Chattanooga, Tenn., have taken on the Columbia line, the stock, of a substantial size, being supplied from the branch of the Columbia Phonograph Co.'s store at Atlanta, Ga.

Here's Service for You!

When a customer comes into your store and wants three or four records that you don't have in stock and wants them in a hurry, of course, you, too, want them in a hurry. It is only natural that you should desire to keep the regular trade of your patron.

Show him that you are willing to accommodate. Say to him, "I'll get them for you just as soon as a letter can reach Chicago and the Express Company can bring the records." Nine times out of ten he will tell you to go ahead and order. If he's in a bigger hurry than the mail will allow, send a night lettergram. While it cuts into your profits a little, the good will of your customer more than repays you in increased business.

And at our end of the line the response will be immediate; your records will go out on the first train headed for your town. Not one blade of grass will be allowed to even start under our feet. Whether your order is for a hundred needles or a carload of Victors and Edisons, it will be filled and sent out the same day it is received. That is the kind of service we always give. It is the only kind you can afford to expect.

Our terms are the most liberal known to the trade, hence it will pay you to place your orders with us.

Write us to-day for catalogs and our special dealers' proposition. You lose money every day you delay.

OHIO DEALERS' ANNUAL MEETING

Held in the Southern Hotel, Columbus on November 9 with a Record Attendance—Many New Members the Result of Reduction in Fees—New Officers Elected—Interesting Papers Read at the Meeting—Several Jobbers Among the Guests—Some of the Features of the Meeting.

The regular annual meeting of the Ohio Association of Talking Machine Dealers was held in the assembly room of the Southern Hotel at Columbus, November 9. The meeting was one of the most successful in the association's history. A large membership was present and a number of the live dealers of the State were enrolled as new members. The recent change in the by-laws, by which the admission fee was lowered from \$10 to \$1 and the annual dues from \$5 to \$1, was of material assistance in securing new members.

President CaJacob opened the meeting by a

UNQUESTIONABLY A BIG WINNER

masterful review of the work the association had accomplished and closed with a tribute to the Victor and National companies for the hearty cooperation and assistance they had given the association. After the dispensing of the regular order of business the following officers were chosen for the ensuing year: President, Martin G. Chandler, Chillicothe, O.; vice-president, W. H. Snyder, Columbus, O.; secretary, A. C. CaJacob, Wapakoneta, O.; treasurer, C. A. Williams, Zanesville, O. At this time visiting jobbers were invited to the assembly room and a good discussion was held on the papers given by the members. "Selling Plans," by Martin G. Chandler, brought forth much discussion on the methods of exploiting the goods. The record exchange proposition by Henry Goldsmith brought out quite a number of good talks, some of rather an acrimonious character.

The feature talk of the day was "Selling of High Class Machines and Records," by J. Frank

MARTIN G. CHANDLER, THE NEW PRESIDENT.

Mahret. This gentleman's all-round experience, both as retail salesman and as traveling representative of the Victor Co. for a time, has given him a wide knowledge of the business and his talk, which was listened to with rapt attention, appears in full on page 47 of this issue of The World. At the conclusion a number of questions were asked of Mr. Mahret and a good discussion opened by several of the members. All felt that Mr. Mahret's discussion of the selling points of the high grade goods had been worthy of attention and the association thanked him cordially for his efforts. At the conclusion of Mr. Mahret's talk the association adjourned until the evening session, which was opened by a banquet.

F. K. Dolbeer, of the National Phonograph Co., was unable to be present but sent a very able paper, which was read by Mr. Hug, the Ohio representative of the National Co. interests. "Just think of it," said Mr. Dolbeer, "approximately

RETIRING PRESIDENT CAJACOB.

eighteen million families in the United States and only two million phonographs. Imagine the suspense of the other sixteen million families, who are willing and anxious to buy Edison phonographs, but who cannot obtain them owing to the limited stocks now in the hands of the trade." Mr. Dolbeer's paper then took up the Edison record exchange proposition and gave a very clear account of the circumstances which led up to its adoption. While many dealers were dissatisfied with it he felt that it was to the best interests of all concerned that it be given a fair trial. He characterized the list of 500 records as not being

a cut out list, but a business bringer and that properly exploited it would prove a boon to the dealer. Eight reasons were given for the adoption of the present exchange, and a careful perusal will convince most dealers that the National Co. have the best interests of the dealer at heart. As tabulated by Mr. Dolbeer they were as follows:

"First. That the exchange of records with consumer had long been demanded by the trade. Second. That the list if properly drawn to the attention of the public will quicken their interest in the line. Third. That the opportunity to interest your customers in the newer product is thus made possible. Fourth. That the losses imposed on all the dealers, the jobbers and the manufacturers are eliminated. Fifth. That the jobber and the dealer both make a small margin of profit under the present plan. Sixth. That the plan makes it possible to create new business without disrupting our present selling system. Seventh. That each transaction with the public reduces the stock of specials in the hands of the trade. Eighth. That it will result eventually in a reduction of the numbers in the 2-minute catalog and finally that the success of the plan rests with the dealer himself, and dealers were strongly advised to give it the utmost general publicity." Mr. Dolbeer's paper was roundly applauded.

At the conclusion of this paper George D. Ornstein, sales manager of the Victor Co., took the floor and gave the dealers one of the best impromptu talks that they had listened to for some time. This was Mr. Ornstein's first meeting with the Ohio association and the warmth of his reception brought forth from him a helpful discussion of many of the new products of the Victor Co. and of the efforts that were being made to help the dealer in exploiting their product. Mr. Ornstein at the conclusion of his talk was deluged with questions, all of which he answered to the satisfaction of all present.

Several of the visiting jobbers were then called upon and interesting talks were given by Percy B. Whitsit and J. C. Roush, secretary of the National Jobbers' Association. One of the most interested visitors was Lewis H. Clement, of the Whitney-Currier Co., of Toledo, and president of the National Association of Piano Dealers. Several other jobbers spoke and the meeting closed to meet next year at Toledo.

CORPORATION TAX BLANKS.

Confusion Noticed Last Year Avoided by Additions to the Form.

The Internal Revenue Department sent out last week to corporations doing business in this city the blanks on which they are to make returns of their net receipts for the current year, the returns to figure as a basis for assessing the corporation tax provided for under the act approved August 5, 1909.

The government's experience with the blanks furnished last year demonstrated that they were deficient in several minor details, chiefly with reference to data concerning interest payments. Additions to the form make this clear, and are expected to prevent confusion such as resulted last season.

Item 4, which previously called for a statement of all maintenance expenses, now specifies that all expenses "exclusive of interest payments" are wanted, a separate item for "interest" having been provided.

In order to have the seals of officers who swear to the accuracy of the statements in a uniform position a blank space for that purpose has been provided and marked by brackets. Returns must be made to the Internal Revenue Collector before March 1, 1911.

Long visits, long stories, long essays, long exhortations, and long prayers seldom profit those who have to do with them. Life is short. Time is short. Moments are precious. Learn to condense, abridge and intensify. Learn to be short. Lop off the branches; stick to the main facts in your case. If you speak, tell your message, and hold your peace; if you write, boil down two sentences into one, and three words into two.

ACTIVE TIMES IN CLEVELAND.

Holiday Trade Opens Up Early in Both Wholesale and Retail Lines—Only Cloud Is the Possibility of Stock Shortage—Daily Papers Give Serious Consideration to Talking Machines—What Prominent Men in the Local Trade Have to Report.

(Special to The Talking Machine World.)

Cleveland, Ohio, Dec. 8, 1910.

In both wholesale and retail lines the holiday business has opened up most propitiously, and it is confidently predicted by dealers that trade will largely exceed that of last season. The demand at present is for the more expensive machines and the higher-class records.

Retail trade improvement is favorably reflected in the wholesale business, which for the past three weeks has been steadily increasing. With nearly every dealer in the city, the last month of this year opened most satisfactorily. The only discernible cloud is the fear that not enough goods can be obtained to meet their needs. Evidently a more satisfactory understanding between the manufacturers and jobbers ought to exist. The adjustment as to supply and demand, in the opinion of the jobbers, reverts to the manufacturers. Orders placed and accepted early in the fall and bills dated the 1st of December would unquestionably solve the problem.

The daily press have quit ridiculing and slurring the talking machine when they have occasion to mention it. Of late the papers favorably mention the phonograph and the new records as they appear monthly, commending them these shut-in evenings, when home amusement must be provided for those who do not care to go out much. One of the dailies, noticing the latest records, had this to say: "What better amusement can be found than first-class music? One does not have to go away from home to hear selections from some of the finest operas. Some of the best records are of selections from 'Olivette,' the old but tuneful light opera, and 'Our Miss Gibbs.' Then there is a movement from the great, pathetic, unfinished symphony of Schubert, to say nothing of scores of records of new popular songs, including two by Harry Lauder. The range of selection is almost infinite, and the records grow better from month to month."

W. H. Buescher was on a visit to the Victor factory, December 2, ordering more goods and endeavoring to hasten orders already placed.

"The business situation, from the viewpoint of a Victor distributor, is all right," said Mr. Towell, of the Eclipse Musical Co. "The demand locally and from contiguous territory shows that dealers are increasing their trade and doing well. The demand for both machines and records is fine, and manifestly the holiday business will surpass that of a year ago and generally prove eminently satisfactory."

Phil Dorn, the always busy manager of the talking machine department of Collister & Sayle, stated: "The new-style Victrolas are making a hit. The prices at which they are being sold are attracting customers whom the other styles have not heretofore pleased, and are bound to bring in a large amount of business. The holiday trade has opened most encouragingly and is daily growing as the season advances."

Prosperous business is evident in the daily receipt and shipment of goods from the Columbia store of the G. J. Probeck Co. "The past month," said Mr. Robertson, "closed a very satisfactory fiscal year's business with us. The demand for all our goods, Grafonolas as well as the medium and lower priced machines, is constantly on the increase and growing in popularity. The new series of special Blue Label records are making a very favorable impression with the record-buying public. We look for a heavy holiday trade, already in evidence, and a good winter's business."

Conditions as to trade are reported very satisfactory by W. H. Buescher & Sons, the only trouble experienced being the inability to procure a sufficient supply of Victor machines. "Business," said I. H. Buescher, "has been fine right along and still is good. We have taken a number of orders

for Christmas delivery, and from the present outlook expect a large volume of holiday trade. We are making large sales of the December records. On a recent visit at Akron, Ohio, I had the pleasure of meeting Evan Williams and spent an interesting afternoon with him, chatting about his own and others' records. There are countless admirers of his operatic productions, and most purchasers make selections from his repertoire."

The talking machine department of the May Co. is a busy place these days, and their big stock is being cleaned out rapidly. The manager reports making daily sales of Victor and Edison machines and a big demand for records. Harry L. Tinker, who has been in charge of this department, has resigned and gone to Ft. Wayne, Ind.

A. E. Friedlander, manager of the talking machine department of the Bailey Co., takes an enthusiastic, active interest in the business, and is always on the alert for new trade or a prospect. He makes liberal use of the daily papers, setting forth the unusual facilities and his desire to demonstrate machines and records of all grades and prices. "Business," he said, "is increasing as the holidays are approaching. While the demand is good for the different styles of machines, it is especially so for the Victrola XIV, the \$150 machine. It is proving very popular; we have sold quite a number and can't get enough to supply the demand. I have got a large number of fine prospects on file."

A novel music emporium, doing an enormous business, is that of Charles I. Davis, music publisher and jobber, who controls fifteen different stores. When opening his store in Cleveland he installed a complete line of Victor and Edison machines and records, and the business of this department, he says, has far exceeded his expectations. A large space on the ground floor is devoted to the department, but Mr. Davis is now equipping, in most attractive style, an Edison sales-room in the basement, entrance to which is by a wide marble stairway from the store.

In connection with the piano trade, the talking machine business is reported very good with the Goodman Piano Co. Sales of both Victor and Edison goods were said to be very satisfactory.

John Reiling, the exclusive West Side Columbia dealer, is building up a good, prosperous business. He said the demand for records was excellent, with good sales of machines. He is especially pleased with the prospects of a large holiday trade, having many good prospects in view. He carries a very complete line of Columbia goods.

S. A. Mintz, manager of the Talking Machine Co., successor to the B. L. Robbins Co., Brown Bros., Flesheim & Smith and the Aldrich-Howey Co., who handle Columbia goods, report good sales of machines and records.

The Hippodrome and Prospect Theater have been equipped with an apparatus for showing motion pictures in daylight. The device is the invention of S. L. Rothafel, of Forest City, Pa. Peculiarly ground lenses and the treating of the screens with a secret preparation is the basis of the invention.

AN ELABORATE WINDOW DISPLAY.

M. W. Waitt & Co. Equip Entire Office in Show Window in Exploiting Edison Business Phonograph—Secure Good Results.

(Special to The Talking Machine World.)

Vancouver, B. C., Can., Dec. 7, 1910.

One of the most interesting and attractive windows seen in this city for a long time was that recently prepared in the store of M. W. Waitt & Co., Ltd., who handle Edison, Victor and Zonophone talking machines and records. The display was made for the purpose of exploiting Edison business phonographs and as the window space is very large it offered the opportunity of fitting up an entire business office, desks, files, benches, etc., with a wax figure representing a stenographer seated at the typewriter desk and transcribing notes from the Edison business phonograph. The figure was very lifelike in appearance and was borrowed from a ladies' outfitting establishment.

Holiday greetings to readers near and far.

At this season of the year it's very important to remember that we ship all orders the same day they are received.

What can we do for you?

SPREADING KNOWLEDGE OF GAELIC.

Talking Machine Used by Gaelic Society in St. Louis to Aid in Studying Ireland's Ancient Tongue—Only Possible to Learn Language Through Having Words Actually Pronounced—Gives Access to 1,000 Years of Irish History—How Instruction Will be Carried Out.

Armed with the phonograph and the modern method of using it in learning language, the Keegan Gaelic Society of St. Louis, Mo., is rallying the forces of Ireland from the fourth century A. D. to date in carrying on the Gaelic revival begun in Ireland by Douglas Hyde and his helpers.

As a result of their work, the mails now carry letters in Gaelic from St. Louis and bring them back from all parts of the country. The language of Brian Boru may come by mail from Louisiana and Texas or from the shores of the lakes, written in the ancient alphabet of the Gael. What is still more to the purpose, it comes direct in its sounds from the horn of a modern phonograph, speaking the same tongue in which Ossian and St. Patrick held their famous conversations.

The phonograph is saving St. Louis as a Gaelic center. Under the methods of Brother Bernardine, of the Christian Brothers College, and the Gaelic League, the city has more than recovered the ground lost since Gaelic ceased to be the native language of about twenty square blocks in which Yiddish and Sicilian are now contesting for supremacy.

Thirty years ago, it is likely that more people could speak Gaelic north of Franklin avenue in St. Louis than in all Dublin. It was the language of statesmanship and diplomacy as well as of common life.

Beginning the work of a new season this year with about 200 members, the Keegan Gaelic Society of St. Louis can now do easily what was impossible thirty years ago. Then, though many spoke Gaelic in St. Louis by inheritance from their parents, the language seemed doomed in St. Louis and did come almost as near being one of the dead languages as in the Dublin of that day.

The method of the phonograph postpones grammar and dictionary until the sounds of the language are learned by ear and connected with the written or printed words which represent them. The first lessons are always in the living Gaelic of the present day.

As in the case of English, the language in which these old masterpieces is written, can be approached only through the sounds of the living Gaelic speech.

Between the English or the Gaelic or of the present and that of 500 and 1,000 years ago, there are differences which seem too great at first to be mastered. Difficulties disappear as any one who has learned the living sounds of either language works back, century after century.

In this way the use of the phonograph in teaching the sounds of Gaelic opens up the Gaelic literature of over 1,000 years. From Ossian, the earliest, to Carolan, the last of the Irish bards, the Gaelic geniuses who made Gaelic literature immortal are literally waiting back of the phonograph for those who use it to reach them.

It is believed by some that as Irish was written between the time of Ossian and Carolan, those who wrote it knew more of the reality of Latin as a living tongue and learned more from Latin than is generally known now. Some think that the Gaelic revival which leads back of Carolan to Ossian in St. Louis will lead back of Ossian to Virgil and Horace and back of them to Homer as masters who taught the early Gael the music of the most melodious songs of Europe.

For those who do not expect to go far back of the present, the methods of the Gaelic Society make it easy to master the language as a living speech. The most modern method and the very oldest are combined.

The very oldest is illustrated in Fry's "Pantographia," a book published in the eighteenth century and long out of print. A copy owned in St. Louis shows a machine used in "British schools" 1,500 years ago. The lesson was cut or written on a smooth stick. It was generally a short sentence such as "The weapon of the wise is reason." The teacher repeated the sentence aloud. The pupils repeated it after him and studied it as written on the stick until they could spell and pronounce it. To save time half a dozen of these smooth sticks were set in a frame, with sentences on both sides, so that they could be turned over. With a blackboard used instead of a frame, the spelling of sentences whose sounds are given by the phonograph is shown to the eye. The student learns to spell, to read and to speak the language, turning back the phonograph as often as he needs to make sure, in the same way the slots were turned back in the old Celtic reading frames.

Circles of students are formed to use the phonographic method together. At the meeting of the Keegan Society, with Brother Bernardine and others present, speaking Gaelic as its masters, there is no need of the phonograph.

The league meets every Thursday at 3830 Olive street, with Patrick Taylor McGovern as its presi-

dent and a distinguished executive committee of 24 Gaelic revivalists, divided evenly between the sexes under the motto "A Dhia Saor Eire." They transact business by ballot, but the Gaelic "masters" transact all the questions of Gaelic pronunciation and grammar.

The phonograph pronunciation, supplied with a "course" of some 30 cylinders from a Gaelic college in Pennsylvania, is warranted good Gaelic. It is also warranted to teach anyone Gaelic with ease, without grammar, dictionary or any sort of tribulation whatever. It does all this according to schedule until the Gaelic revivalist is ready for Brother Bernardine and the other masters. His method is not grammarless, as the revivalist soon finds.

All must reach the stage finally where Brother Bernardine takes hold of them. Otherwise they will never get into the Tir Nan Og or land of enchanted Gaelic literature back of the horn of the phonograph.

But, meanwhile, Gaelic-speaking phonographs are scattering in St. Louis and in wider circles out from it. Except by those who sell the phonographs in Pennsylvania, it is all done, not for money, but for love of Gaelic and of Ireland.

"Our text books," Brother Bernardine says, "are the recognized standard publications of the Gaelic League, such as Dr. Henry's Handbook of Modern Irish, O'Growney's Lessons and the Bothwick readers. The method is known as the direct method. It is similar to the well-known Berlitz system of teaching the modern languages. Our teachers are skilled in this method and employ it exclusively in the earlier lessons of the course."

In explaining samples of correspondence, some of the letters beautifully written and all in Gaelic, Brother Bernardine added that they were received from members of the now widely spread "Friendly Society of the Gael," who correspond with each other in Gaelic. College men, clergymen and learned professors are members of the Friendly Society, as well as those who are just beginning to study the language. These, if they please, may have all the advantage of corrections which would be given them for pay in a modern correspondence school.

But though the work takes the same lines as that of the best correspondence school, it is done for love, not for pay. It means that the Gaelic revival is to go on until it may reach millions of Americans with Gaelic names, who will learn what their names mean and stand for in one of the great literatures of the world.

FARRAR LISTENS TO OWN RECORD

On Recent Visit to Aeolian Hall—Holds Impromptu Reception.

Geraldine Farrar, one of the leading prima donnas of the Metropolitan Opera Co., took occasion to visit Aeolian Hall, accompanied by her mother, recently, and after inspecting the instruments on the various floors stopped off at the Victor talking machine department on the eighth floor. Here she listened to a reproduction of one of her own records in which she sang the role of "Miami" in "Madama Butterfly." Several people in the Victor department at the time recognized the singer and she was the center of an admiring group for some time, appearing well pleased with the impromptu reception.

MULTUM IN PARVO.

It will pay to delay the sealing of envelopes until the very last thing before mailing. Possibly there may be just another word to add, or an additional item to inclose.

Show your most courteous face to the customer who buys though it may be only ten cents worth of goods. He may run that into many dollars before the end of a year.

Cultivate a close acquaintance with your goods. Happy is the salesman who knows; who does not have to guess.

You need the Edison Business Phonograph in your business

Edison jobbers and dealers using the Edison Business Phonograph on their own correspondence have found out, from their own experience, what a great help it is in any business office—cutting the cost of letter writing in two and doubling the amount turned out. And realizing that what the Edison Business Phonograph is doing for

them, it will do for other business men in every kind of business, they are already bringing home life-sized profits in this new and unexplored field.

The Edison Business Phonograph is the liveliest selling proposition of the age. You need it *in* your business and *for* your business. Write us today for full particulars.

Edison Business Phonograph Company, 207 Lakeside Avenue, Orange, N. J.

The Columbia Grafonola gets the money of the man who would "never have a talking machine in the house"; and then sells him a rackful of high-priced records.

Columbia Phonograph Co., Genl., Tribune Building, New York.

LIVELY TIMES IN BALTIMORE.

Talking Machine Dealers Busy Handling a Large Holiday Business—Christmas Buying Being Done Early—An Artistic Window Display—Hammann & Levin in New Store—Department Stores Pushing Talking Machines—General News of the Month.

(Special to The Talking Machine World.)

Baltimore, Md., Dec. 9, 1910.

Previous predictions by those engaged in the talking machine business in this city are beginning to be realized, with the result that the dealers are a busy class of people just at present. Several societies throughout the city have made urgent requests of Christmas buyers—and in fact have kept the agitation constantly before the public—to do their holiday shopping early instead of waiting until the last minute and rushing the store girls and clerks off their feet the week preceding Christmas, as has usually been the case in former years. The requests have been complied with quite promptly thus far, so that many of the dealers, especially those in the shopping district, have started to keep open at night to meet the demands of those buyers who cannot get away from their business or home duties until after supper.

There have been many good sales already in the shape of Christmas presents, while most of the dealers announce that they have a big batch of promising prospects which they expect to convert into real sales within the next two weeks.

Manager Albert Bowden, of the Sanders & Stayman Co., has arranged an artistic window display of Columbia and Victor machines and records of all styles and prices, which has attracted the attention of a vast number of Christmas shoppers. The display has evidently had a good effect on those inclined to give away talking machines and records as holiday remembrances, for many of those who have been seen to stop and look at the display have wandered into the store and ordered machines and records for friends and relatives.

Hammann & Levin, who handle the Victor and Edison machines, are in their new store at 416 North Howard street and are ready to look after the Christmas buyers. They have much more floor and storage space and can handle customers with greater ease. The firm have a handsome new sign over the top of the main entrance which has proven quite an attraction. It is of gold letters on a black background.

H. R. Eisenbrandt Sons are among the liberal advertisers in the daily papers these days. They have large display ads. announcing a full line of Victors and also play up the various Victor departments that they have in their new store for the proper handling of the public. The company's Victrola department especially is recognized as one of the best in the South. The firm report excellent prospects for the present month.

A particularly noticeable development in local talking machine circles is the great prominence that many of the department stores are giving to this branch of business. While it has been announced from time to time by the distributors of the various lines of talking machines that they have

succeeded in getting the department store managements interested in the popular musical instruments in a small way, it has developed recently that the business has proved a winner in the large stores. Many of these stores have set aside quite a large amount of floor space for talking machine departments, while they have been advertising to a large extent in the daily papers. The heads of the talking machine departments of these large stores make similar encouraging reports concerning the condition of trade, as do the local dealers and agents.

Manager Roberts, of E. F. Droop & Sons Co.; Manager Laurie, of the Columbia Phonograph Co., and Manager M. Silverstein, of Cohen & Hughes, were all a busy lot of individuals when The Talking Machine World representative made his usual calls, but they were a unit in declaring that the Christmas prospects looked awfully encouraging to them.

CATCHING HORSE FLIES IN OHIO.

Wonderful Story of a Bright Farmer Who Used Talking Machine as Chief Feature of Trap.

Anyone who desires to learn just how much of a piker Baron Munchhausen really was should read the following story, which comes from the great State of Ohio: "Calvery Pook, a farmer living near Cleveland, during the past summer devised a novel method for ridding his farm of horse flies. For over a year horse flies had been so numerous at his farm that the young stock was stunted and work animals became so emaciated that they couldn't work. Automobiles passing had their tires punctured by the vicious insects. After trying all known methods he finally evolved a new plan. Borrowing a phonograph and blank cylinder he secured a record of a colt whinnying for its mother. That night he drove all the stock over to a neighbor's farm. On the following day, when the flies became so hungry that they attacked the poultry, Mr. Pook attached the phonograph horn to his vacuum cleaner and started the instrument. The first call of the colt brought the hungry flies by thousands and as they approached the phonograph they were sucked up by the cleaner. After drowning them he fed them to the chickens, but as they imparted a horsey odor to the eggs he has since used them as fertilizer."

THE VALUE OF PICTURES.

"It is always well to show pictures of the goods in one's ads, whenever practical," says an experienced advertiser. "It is equally advantageous to create an interest in those goods by showing how they may be used or how they may bring pleasure to the users; but, to my mind, no illustration whatever is better than one that fails to connect directly with the article advertised.

"I believe in illustrations—not, however, in mere pictures. Not only does the irrelevant picture fail to add to the pulling power of the advertisement, but it actually detracts from it by distracting the attention of the reader from the subject in hand. Better cold type than meaningless pretty pictures."

"The Good Book doesn't say 'Open thy store and sit thee down and the Lord will send thee customers,'" says the experienced merchant. "You have got to go out and find them. Be fair with those with whom your lot is thrown and your profits will be biggest."

"THE TEXAS TALKERS" GROWING.

Latest Organization of Talking Machine Dealers and Enthusiasts Proves Popular—The Unique Application Blank.

(Special to The Talking Machine World.)

Dallas, Tex., Dec. 7, 1910.

One of the latest organizations of talking machine dealers and owners is that formed in this city in September, under the name of "The Texas Talkers." The new association was the idea of Lester Burchfield, of Victor fame, and at the first meeting a number of local dealers were in attendance for the purpose of finding out just what the scheme was. At the opening session J. O. Elliott, of the Dallas Talking Machine Co., was elected supreme recorder in order that there might be some one to receive applications and to attend to communications, and the other offices were held over until a later date, when the entire membership will have an opportunity of signifying their choice. The association is growing steadily and is drawing its membership from all over the State. The application blank in itself is quite original, and is worded as follows:

The Texas Talkers. "We never quit." For the promotion of the talking machine. To promote good feeling and fellowship among talking machine dealers everywhere. Application for membership. I hereby make application for membership in The Texas Talkers (who never quit), and hereby pledge myself to a cheerful compliance with all rules, regulations and by-laws of said association. Be it known to all men by these presents, that I am sound in members and finances and I further certify that I am either connected with the talking machine industry or own a machine or know someone who is connected with the talking machine business or owns one or knows someone who knows someone who owns or sells talking machines. If elected to membership in this august association, I hereby and hereon truly and duly pledge myself never to quit.

Either sex is eligible for membership and a special space is provided in the application for signifying "brands preferred."

SHORT BUT MEATY.

Think you a window trim, in which all the goods are dusty and dirty, in which is displayed no tasty arrangement, will breed confidence? Never!

The big thing about an advertisement is that it should ring with honesty; that it should, on the face of it, mean what it says.

The man who has the clean, well-kept, well-arranged store seldom has his orders held up by the credit department of the jobbing house.

WITH THE TRADE IN ST. LOUIS.

Talking Machine Business Very Active—Strong Demand for Higher Priced Outfits—New Styles of Machines Prove Popular—Thiebes Piano Co. Take on Columbia Line—Items More or Less Personal—What the Various Dealers Have to Report Anent General Conditions—In Sainly City and Territory.

(Special to the Talking Machine World.)

St. Louis, Mo., Nov. 29, 1910.

The talking machine business is very active here and in this territory, and all trade reports are of the best. Two of the leading piano houses here have just taken on talking machines and established very attractive departments for this line. The high priced goods are selling the best.

Manager E. B. Walthall, of the Columbia Phonograph Co., closed a big deal with the Thiebes Piano Co. whereby they will carry every disc machine the Columbia people make, ranging from \$17.50 to \$250, and every disc record in the catalog. This

is probably one of the largest transactions ever made in the West.

W. C. Fuhri, Western district manager of the Columbia Phonograph Co., and F. A. Cass, of the credit department of the Columbia Phonograph Co., Chicago, were visitors here recently on their way to visit the Hollenberg Music Co., of Little Rock, Ark.

Manager Walthall, of the Columbia Phonograph Co., reports business very active with him, and that heavy orders are coming in from from Columbia dealers on the special double disc demonstration record, just announced by the Columbia Phonograph Co. This is expected to be a great business producer.

Mr. Walthall has just closed a nice deal with the Lehman Music Co., of East St. Louis, Ill., for Grafonola machines and records.

Miss Lillian Biest and Chas. Kauffmann, traveling salesman, both of the Columbia Phonograph Co., visited friends in Chicago on Thanksgiving Day.

The local store of the Columbia Phonograph Co. received six of the new oak hornless "Favorite" \$50 machines recently and sold all of them the day they were received. They are very popular.

From the enthusiastic reports and figures received from the Victor department of the Aeolian Co. this firm's business during October has been immense.

The series of Victor recitals at Aeolian Hall, given under the direction of Ernest John, of the Victor Co., have created quite an interest in musical circles in St. Louis. The new and novel Victor publicity scheme, which embraces a miniature theater with appropriate scenery and equipped with "real play-house" lighting effects, made quite a hit with the audiences and exceptional interest was manifested.

L. A. Cummins, traveler for the Victor department of the Aeolian Co., secured several large new accounts in southwestern Missouri recently, and found the old dealers hustling with a view of breaking all records this year.

Harry B. Levy, formerly connected with the R. Wurlitzer Co. at Cincinnati, is now connected with the Victor department of the Aeolian Co. Visiting dealers at Aeolian Hall during the past month were: William Hinspeter, Evansville, Ind.; C. H. Hawk, Pocahontas, Ill.; G. C. Hawkins, Decatur, Ill.; John Winkler, Mascoutah, Ill.; F. Meyer, Carlinville, Ill.; J. T. Welling, Germantown, Ill.

Ernest John, of the Victor Talking Machine Co., spent several days here recently.

M. I. Mayer, formerly with the Thiebes Piano Co., has been appointed manager of the piano and talking machine departments of the J. H. Buettner Furniture Co.

The A. F. Mengel Music Co. report trade in their talking machine department as being quite active.

Miss Mabel Carty has been appointed manager of the talking machine department recently installed by the F. G. Smith Piano Co. They are doing a nice business.

Miss E. A. Vandeventer, manager of the talking department of the Bollman Bros. Piano Co., reports business very good and especially so on high grade instruments.

The Thiebes Piano Co. are having an excellent business in their talking machine department, especially on the best goods.

The O. K. Houck Piano Co. are putting in new talking machine booths at their Little Rock store costing \$1,500. They are duplicates of the elaborate ones they just recently put in their store at Memphis.

The Koerber-Brenner Music Co. report trade of the best with them, with the best of future prospects. W. A. Brenner, secretary of this concern, returned November 2 from a two weeks' Western trip.

D. K. Myers, the well-known Zonophone jobber, reports business very good. J. K. Savage, traveler for Mr. Myers, who has been on a several weeks' trip through Oklahoma, had a very good trip.

Lee Gilbert, of the Victor Talking Machine Co., New York, was a recent visitor here.

Marks Silverstone, of the Silverstone Talking

Machine Co., reports wholesale and retail trade good. J. H. Allgaier, traveler for this firm, returned recently from a month's trip through Illinois and reports having had a fine business.

OUR FOREIGN CUSTOMERS.

Amount and Value of Talking Machines Shipped Abroad from the Port of New York.

(Special to The Talking Machine World.)

Washington, D. C., Dec. 8, 1910.

Manufacturers and dealers in talking machines will doubtless be interested in the figures showing the exports of talking machines for the past four weeks from the port of New York:

NOVEMBER 14.

Arica, 4 packages, \$409; Callao, 10 packages, \$411; 2 packages, \$193; Cape Town, 8 packages, \$192; Colon, 3 pkgs., 239; Demarara, 17 pkgs., \$528; Guayaquil, 3 pkgs., \$109; Limon, 5 pkgs., \$229; London, 64 pkgs., 5,650; 13 pkgs., \$175; 152 pkgs., \$6,224; Puerto Barrios, 7 pkgs., \$915; Rio de Janeiro, 54 pkgs., \$5,521; 17 pkgs., \$220.

NOVEMBER 21.

Berlin, 49 pkgs., \$1,465; Buenos Ayres, 20 pkgs., \$276; 166 pkgs., \$11,609; 20 pkgs., \$507; 29 pkgs., \$585; Christiania, 6 pkgs., \$101; Gothenberg, 6 pkgs., \$210; Hamburg, 13 pkgs., \$357; Havana, 7 pkgs., \$212; Iquique, 4 pkgs., \$160; Liverpool, 1 pkg., \$142; London, 13 pkgs., \$1,131; 133 pkgs., \$5,020; 7 pkgs., \$712; Para, 34 pkgs., \$1,660; Rio de Janeiro, 21 pkgs., \$2,246; 8 pkgs., \$798; Sydney, 145 pkgs., \$1,046; Tampico, 25 pkgs., \$494; Valparaiso, 5 pkgs., \$132; Vera Cruz, 42 pkgs., \$1,302; Yokohama, 13 pkgs., \$964.

NOVEMBER 28.

Acajutla, 9 pkgs., \$265; Berlin, 20 pkgs., \$680; Bremen, 2 pkgs., \$125; Hamburg, 21 pkgs., \$225; Havana, 10 pkgs., \$1,256; 24 pkgs., \$1,314; Havre, 1 pkg., \$150; London, 44 pkgs., \$2,095; 13 pkgs., \$5,417; Melbourne, 489 pkgs., \$3,211; Milan, 8 pkgs., \$135; Monte Cristo, 1 pkg., \$128; Montevideo, 77 pkgs., \$8,632; Para, 10 pkgs., \$717; Port au Prince, 5 pkgs., \$146; Rome, 3 pkgs., \$180; Valparaiso, 5 pkgs., \$1,062; 16 pkgs., \$1,088; Vera Cruz, 47 pkgs., \$5,998.

DECEMBER 5.

Antwerp, 6 pkgs., \$269; Arica, 4 pkgs., \$369; Berlin, 80 pkgs., \$1,628; Bolivar, 6 pkgs., \$349; Bremen, 2 pkgs., \$120; 2 pkgs., \$200; Brisbane, 13 pkgs., \$292; Buenos Ayres, 41 pkgs., \$322; Callao, 12 pkgs., \$520; Colon, 6 pkgs., \$131; Guayaquil, 18 pkgs., \$941; 9 pkgs., \$436; 3 pkgs., \$150; Gothenberg, 15 pkgs., \$297; Havana, 4 pkgs., \$106; Havre, 7 pkgs., \$250; London, 26 pkgs., \$2,936; 307 pkgs., \$5,837; 19 pkgs., \$3,148; Mollendo, 3 pkgs., \$214; Para, 38 pkgs., \$1,026; Rio de Janeiro, 9 pkgs., \$443; Rotterdam, 2 pkgs., \$100; Santos, 22 pkgs., \$2,802; Santiago, 4 pkgs., \$171; Savanilla, 2 pkgs., \$104; Tampico, 19 pkgs., \$600; Vera Cruz, 75 pkgs., \$2,230; Vienna, 19 pkgs., \$568.

JOIN NATIONAL JOBBERS' ASSOCIATION.

The R. S. Williams Co., Toronto, Can., and R. L. Penick, of Montgomery, Ala., are recent accessions to membership of the National Talking Machine Jobbers' Association.

The reason that more clerks do not become salesmen is just the same reason that more men do not become successses. They do not try. Success is in most men, probably in all men in some degree, if they would but try to get it out.

SELLING HIGH GRADE OUTFITS.

Interesting Address on the "Selling of High-Grade Machines and Records," Delivered Before the Ohio Retail Talking Machine Dealers at Their Recent Annual Meeting in Columbus, by J. Frank Mahret—Views of an Experienced Man.

The following interesting address on the "Selling of High-Grade Machines and Records" was delivered by J. Frank Mahret, of the R. Wurlitzer Co., Cincinnati, O., at the annual meeting of the Ohio Retail Talking Machine Dealers, held last month in Columbus:

"About 35 years ago, as a schoolboy, I had the pleasure of hearing a talking machine—the first that I had ever seen, and my interest was aroused. It was the old type Edison machine, with large mandrel and crank and used tin foil, on which the tones were recorded. You are all doubtless familiar with it, so I will not burden you with further description of same.

"At the time my surprise was indeed great; that surprise has since grown into amazement as step by step the progress in the art of recording and reproducing sound has at last culminated in the practically perfect instruments of to-day. My next experience in talking machines was in a commercial way over 15 years ago, when we purchased 500 of the B X Graphophones selling at \$12, followed almost immediately by the A T or \$25 machine, to which I transferred my allegiance. These first machines were naturally bought as a novelty and almost everyone viewed them in that light and predicted that in a year or two the novelty would wear off.

"That prediction became a fact—the novelty did wear off, but the gradual improvement in these entertainers has kept the interest alive. We know the business is very much alive to-day, and no doubt there are skeptics even among you dealers who wonder as to how long this business will keep up. Personally, I believe the talking machine has come to stay, that it will live as long as the human race can hear.

"No musical instrument can take the place of our perfected sound reproducing machine of to-day; an instrument to supersede it must of necessity have variety of tones, and such an instrument would naturally be a sound-producing or talking machine. Convince yourselves that the talking machine has come to stay and you can more readily convince others. It is the classes who place their stamp of approval on styles and vogues and it is the masses who follow suit.

"To-day we are driving the entering wedge in firmly placing the talking machine on a higher plane by interesting the classes, and that they are vitally interested is evidenced by the large number of high-grade sound-reproducing instruments sold and being sold. A number of ideas to interest the more exclusive (by that I mean the more musically inclined and the wealthy) in these high-grade instruments is by advertising, by special invitation to attend your daily concerts in your stores, the giving of concerts in churches, schools, lodge rooms and in the homes.

"Sending a high-grade instrument to the home on approval, with a choice selection of music, will go far toward convincing them of the ability of these instruments to entertain satisfactorily, and will also impress them with the advisability of securing one of these marvelous entertainers and educators. These instruments are doing more to instill a love of the classics than any other instrument ever made.

"Sound reproducing instruments of to-day in their practically perfect condition are without a doubt the greatest musical instrument, the greatest musical educator, the most versatile entertainer ever made—and the refining influence its hearers are subjected to is apparent to all who believe that 'music hath power to sooth the savage breast.' There is very little difference between selling a low-priced talking machine and one of the higher grade. Two of the most important points to be considered are, gaining the confidence of your customer and your own intense enthusiasm and absolute sincerity throughout.

"Before a sale can be made you must secure the

SOLID WOOD (NOT VENEERED)

Mr. Dealer!

WHO has ever heard melodious music from a tin violin or a piano with a veneered wood sounding board?

A horn is the sounding board of a Talking Machine, and amplifies the tones of a record, the same as a violin body and the piano sounding board amplify the tones from the strings.

You have not heard a Talking Machine reproduction at its best until you have heard the Music Master (Solid Wood) Horn.

WHY not have one sent on approval?

Should your jobber be unable to supply you, write us, and we will send you a sample line of oak, mahogany or spruce, disc or cylinder horns on approval. If you are not entirely satisfied with the merits of the Music Master, you can return them to us for credit.

SHEIP & VANDEGRIFT, Inc.

PHILADELPHIA, PA.

confidence of your customer. This is best obtained by dealing frankly with him; confine yourself to facts, adhere strictly to the truth; know what you are talking about, and so enthuse yourself over the instrument in question and its reproductive powers that your customer will likewise become enthused. Moods govern our likes and dislikes, and it is just as essential to cater to your customer's mood as it is to endeavor to make the sale. Your knowledge of a customer's mood is obtained by his greeting, his actions, facial contours so apparent to a close observer, and his preference for certain selections. If an instrument is worth listening to, it is worth owning.

"As all articles are purchased by comparison, either consciously or otherwise, so it is well to use comparisons in the sale of these high-grade instruments. In comparison with any high-grade musical instrument of an equal or greater price, you have an instrument with but one tone. Take a hundred homes in which such an instrument is owned and I'll show you 99 per cent. of these homes where not over a dozen selections are played

properly. With the high-grade sound-reproducing instruments we have all tones, by the world's greatest artists, rendered with all the warmth and color characteristic of the original, and indorsed by the leading colleges of music in the country—in fact, they are being used by many of these institutions for comparative instruction. Think of it, written testimonials from the faculties of the leading colleges of music, the only automatic instrument ever so honored.

"The selling of high-grade records is best accomplished by proving in a comparative way that the high-grade or classical records are those of which they do not tire, as is the case with the cheap class; further still, the more one hears the classics the more they admire them, whereas, on the other hand, the more one hears the popular class the less they are liked. The sending of records out on approval induces a great many sales which would otherwise not be made. Of course, the persons to whom these records are sent should be responsible parties and the records not desired must be returned within 24 or 48 hours. This

clause should be insisted upon. See that every owner of an instrument receives the monthly supplements; keep after them by 'phone, inviting them to your evening recitals of the playing of the latest records. Center such care upon each individual customer as to make him feel as if he is the most favored one.

"When you allow your customer to feel as if he knew more about these instruments and records, just so soon will you lose that dominating influence necessary between salesman and customer. Don't confuse dominating and domineering—the former is the word. The day is not far distant when almost every place of penal servitude will include one of these marvelous entertainers and educators as part of their working paraphernalia, and I am quite sure that the refining influence will leave its impress on those unfortunate inmates."

EDISON INVENTS AIRSHIP.

Too Busy to Take Active Interest in Aviation, but Has Patent Pending on New Heavier Than Air Machine.

According to a recent interview published in a daily paper, Thos. A. Edison, "the wizard," does not intend to take an active interest in aviation for a long time to come at least, holding that he has too many other affairs to attend to as it is. Mr. Edison, however, let drop the fact that he had invented an air flying machine on which a patent is now pending. The machine is recently described as consisting of a basket hung on a vertical shaft, on the upper end of which revolve box kites, or other form of aeroplanes, at sufficient speed to lift the whole affair. Its chief merit is that the center of gravity is low which keeps the machine in automatic balance.

A WATCH THAT TALKS.

Phonographic Timepiece Recently Invented by Swiss Watchmaker.

A Swiss watchmaker has invented a watch which speaks the time through the medium of a tiny talking machine. A very small hard rubber record, upon which certain words have been recorded, is actuated by clockwork so that at a given time the machine makes any announcement previously recorded with strength enough to be heard twenty feet away. It is expected that the new watch will have a high sentimental value, as with such a watch

a man can listen to the voice of his wife or child at any time during the day when he is away from home.

NATIONAL CO.'S WINDOW DISPLAY.

Plans as Inaugurated by O. E. Rinehart Will Be Introduced in the Trade After Holidays.

The inauguration and satisfactory equipment of the National Phonograph Co.'s new department of window display and general interior decoration, under the experienced management of Ora E. Rinehart, has been unavoidably delayed, and therefore the first example of his work, which it was anticipated, would be ready for the holiday trade, will be postponed until a later date. The company are averse to placing anything on the market until it is complete in every particular, and as this stage of the new product, due to the installation of the new department, is not up to their high standards, the initial sample will be announced in due time.

TALKING MACHINES IN NOVA SCOTIA.

(Special to the Talking Machine World.)

Washington, D. C., Dec. 4, 1910.

Alfred J. Flemming, the U. S. Consul at Yarmouth, N. S., writing to the Department of Commerce and Labor, says:

"From statements of four dealers in talking machines in Yarmouth, based upon actual receipts and sales, it is estimated that there are now in use here over 500 machines.

"Some of these machines are quite old, but fully 75 per cent. have been purchased within two or three years. These figures cover the three chief machines, all American. Probably half averaged in cost less than \$20; 30 per cent. are of a better grade, averaging \$30 to \$50 each, and the remaining 20 per cent. include the best machines, with the best cabinet music arrangements. These 500 machines, at an average of \$50 each, total a snug sum for the American manufacturer for talking machines for one consular district. Dealers say that machine owners average 40 to 50 records each, some having 200. These cost 35 cents for 2-minute (Edison's) and 65 cents for 4-minute, while operatic and other specials cost \$1.85 up to \$4. There is at least as much money invested in records, if not more, than in machines. Few imports of these goods are made directly into Yarmouth, local dealers being almost entirely supplied from Halifax and St. John."

NEW VICTOR RECORD CATALOG.

Listing All Records Up to and Including November Supplement—What the Company Have to Say of the Catalog and Suggestions for Its Distribution.

Recently the Victor Talking Machine Co., Camden, N. J., mailed to their distributors and dealers their comprehensive November catalog, listing all Victor records up to and including the current month's supplement. In connection therewith was dispatched a circular letter in which they say:

"Again we want to impress upon you the fact that this is without doubt the best printed, the best arranged, best classified and the most convincing record catalog ever issued. The legibility, the illustrations, the matter descriptive of each record, the intelligent and comprehensive method of indexing, all tend to make this catalog of inestimable value to you in increasing your Victor record sales. Because of this fact, we believe it is to your interest to exercise the greatest care in its proper distribution to the consuming public.

"Very satisfactory results were obtained by dealers who distributed the January edition according to the methods at that time suggested by us, namely, that a letter be written to your customers telling them that you are reserving a copy of this catalog for them which they can obtain by calling at your store. We would recommend that this method be again employed in distributing the November edition and that you make this catalog serve as an inducement to bring Victor owners to your store."

CAPITAL STOCK OF \$2,500,000.

The American Multinola Co., Cleveland, O., have been incorporated with capital stock of \$2,500,000, to manufacture, sell, deal and trade in talking machines of all kinds.

PHONOGRAPHS FOR SOLDIERS.

The governor of the Chubut Territory, Argentina, has just distributed a large number of American phonographs among the remote army garrisons and post offices in his district, many of which are among the Andes. They are fully equipped with new records.

DON'T PUT IN TOO MANY GOODS.

The window dresser who tries to put too many articles in a window at a time is like the fellow who endeavors to eat enough in one day to sustain him for two weeks. It's wrong, decidedly wrong. You never catch an up-to-date hardware or department store dumping a van load of goods in one window!

To have done one's best is the best one can do. That one who can say, "If I have done my best I do not know it," is to be congratulated.

No. 434. Disc Record Cabinet.
Holds 170 12-inch Records. Made in Oak only.
Can also be had with horizontal shelves.

Just so sure as you put one-half dozen Udell Cabinets on your floor they will move promptly at a good profit and make satisfied customers.

The above statement we make advisedly.

The accounts we sell repeat orders to prove that Udell Cabinets are Money-Makers for the dealer handling them.

Get into the Cabinet end of the Talking Machine business! Talk them when you sell a Machine! The outfit is not complete without the Cabinet in which to keep the Records filed so that you can lay your hands instantly on any Record. Furthermore, a Cabinet keeps the Records from becoming lost or broken and getting dirty.

Write for prices and illustrations.

THE UDELL WORKS, Indianapolis, Indiana

AROUND THE WORLD WITH A "TALKER"

H. L. Marker, of the Columbia Phonograph Co., General, Returns from Tour of the Orient—He Secured Records in Many Dialects and of Particular Value—Accompanied by John H. Dorian—Found the Columbia Graphophone Strong in That Section of the World—Some Interesting Experiences—Chinese Opera and Music in General in the Celestial Kingdom—As It Appeals to the Occidental—Chiefly Gong Playing and Shrieking.

H. L. Marker, of the Columbia Phonograph Co., General, New York, who has recently returned from a trip through the Orient, has secured recordings from the most important countries that he visited. John H. Dorian, far eastern executive for the company, accompanied him on his trip. Through his efforts and intimate knowledge of the people, many recordings were arranged for which would otherwise have been impossible to secure.

Talking machine exporters know only too well that the most insignificant nations will buy talking machines if they can hear records made by their own people. A cannibal would flee from a record of Cavalieri, but would go almost insane with delight at hearing his own tongue emerge from the horn of a machine. And, so, the companies send their own men, experts in record making, to every part of the globe. Native talent is secured and the people are given the music and songs which they love best. Mr. Marker secured in the Japanese, Chinese, Philippine, Siamese, Arabic and many other dialects five thousand different records. And this gives merely an inkling of the work involved.

On reaching Tokio, Japan, Mr. Marker and Mr. Dorian found the Columbia graphophone remarkably strong with the people and set about making records which would even increase this demand. The instructor of the children of the Empress, a man of considerable prestige in Tokio, made several records. Every mother of ambition in Japan wants her daughter to hear the words of this great wise man, who has the ear of the Empress, and naturally enough these records sell rapidly. On a previous visit recordings of the voices of eminent statesmen were secured. Among these several records by the late Marquis Ito were made.

The best of the Japanese songs were sung for the graphophone by the leading actors and singers of the Empire. And did the geisha girls sing? Well, they certainly did. There is a prevailing impression among untraveled people that geisha girls are nothing but dancers and tea servers. That is entirely erroneous, says Mr. Marker. They are

skilled in the art of entertainment, fascinating in conversation, not too wise and not too demure, and they can discuss with equal facility politics of State with a minister of foreign affairs or the latest topical news. Many of these girls are wonderful actresses and others have delightful voices. They

CHINESE ORCHESTRA RECORDING IN HONG KONG.

blushed demurely when led into the recording room and did their best in record making. In Japan the machines are sold in many shops and there are even instalment houses.

Going from Japan to China Messrs. Marker and Dorian spent a year divided between Peking, Shanghai, Hong Kong and Tein-Tsin. One of the first things that strikes the foreigner when he travels about the Chinese Empire is the lack of homogeneity. This is particularly noticeable in the languages. There is the Peking dialect and the Canton dialect, and so many others that only a skilled linguist can distinguish them. It would not be so bad but the residents of one province cannot understand those of another, so in making talking machine records it is necessary to have actors in all the dialects of the provinces where the goods are to be sold. The language of the Peking court—the mandarin dialect—is used by the aristocrats

all over the empire, but it cannot be understood by the lower classes. Records were made in the Pekinese, but the greater part of the recordings were made in the Cantonese dialect. Trips were made also to Amoy and Swatow, where many fine records were secured.

When Mr. Marker got to Hong Kong he had to send over to Canton for a troupe of actors and musicians to make further records. There were gong players and banjoints, sing-song girls and baritones, and they all camped out in Hong Kong at the expense of the Columbia Phonograph Co., which not only had to pay their transportation, but their cost of living while in Peking. The expense bills they sent in were amazing, including everything from tiffin and chop sticks to san suey, Chinese rice wine, shark fins and opium. "Of course, the talking machine companies do not favor the use of opium, but if the actors insist on smoking it and will not sing until they get it, what are we to do?" observed Mr. Marker.

Some of the actors who sang for the graphophone are men who appear before the Emperor only. By ancient custom no one can secure the services of these artists except through the good offices of a member of the Emperor's personal household; and it speaks well for the standing of the Columbia Phonograph Co. that they were able to secure exceptional recordings. China has the oldest opera in the world, the weirdest scenically

COLUMBIA LABORATORY IN HONG KONG.

and the longest. It is not unusual for a performance to last anywhere from three to five months. The natives, inured to all sorts of torture, including the bastinado, which consists in beating the soles of the feet of the victim with leather thongs, can endure even worse attacks on their ear-drums and go night after night and seem to thrive on it. They listen to operas which were written centuries ago. The singers learn their roles from infancy and do not use notes. When Mr. Marker learned that the operas ran easily along for more months than the graphophone record does minutes he was rather perplexed to know how he was going to get that music on the disc. It is there all right. Native experts decide just what are the chefs d'oeuvre of these "operas" and the singers render these selections.

The Chinese music is noisy, with the gong playing an important part. The gong player is a man with an iron wrist, who, after years of service, does not need cotton in his ears. He is playing most of the time, but must never hit the wrong note. Many of the singers have unusually fine baritone voices. The soprano of the song-girls is somewhat shrill. It is a sort of long drawn out shriek that strikes terror to the foreign ear, but gives unending delight to the natives. The Chinese insist that each instrument in the "band" be heard when it is reproduced by the graphophone, which is certainly easier said than done. Some of the singers, who came to the Chinese laboratories established by the Columbia Phonograph Co., traveled miles to get there.

(Continued on page 50.)

lutely untouched field for you to
harvest.**

Columbia Phonograph Co., Genl., Tribune Building, New York

Around the World with a Talker.

(Continued from page 49.)

Despite the affections for the folk songs, the people welcome new compositions, and the Pekin, Tein-Tsin and other cities have small armies of native composers, all trying to outdo the efforts of the ancients.

From China Messrs. Marker and Dorian went to Manila, P. I., where records by the local musicians and singers were secured, among these many records by the Constabulary Band of Manila. This exceptional organization, under the leadership of Captain Loving, visited the United States to play at the inauguration of President Taft. A proposed visit of a few months was lengthened into more than a year by virtue of their remarkable popularity. Manila was the last place visited. Mr. Marker has now finished a catalog of recordings that covers China, Japan and the Philippines.

TRADE NEWS FROM INDIANAPOLIS.

Prospects Are That There Will be a Lively Christmas Business—Recent Trade Visitors—New Columbia Machines Prove Popular—What the Various Houses Are Doing to Get Business—Aeolian Co.'s Good Victor Display.

(Special to The Talking Machine World.)

Indianapolis, Ind., Dec. 8, 1910.

The holiday business in the talking machine line has not opened up as yet, but all of the dealers have been having a very satisfactory business, with good indications for a Christmas rush. The trend has been toward the higher priced machines. The pleasant weather in some ways has been an aid to the business and in other ways a hindrance. Usually the people of Indianapolis do not take to indoor entertainment until the cold days come, but at the same time, with the pleasant weather, expenses of the people in a general way have been less and they have therefore had more money for talking machines.

Marion Dorian, of the Columbia Phonograph Co., was a recent caller at the Indianapolis store. He reported that business was looking up generally and predicted a big winter season.

Manager Thomas Devine, of the Indianapolis store of the Columbia Co., is greatly taken with the Columbia "Favorite," which, in his opinion, is far and away the biggest thing ever offered to the public in the line of a hornless machine. He says it will be a world beater as a seller. Dr. T. Victor Keene, a well-known Indianapolis bacteriologist, who has been studying abroad for several months, has just returned. Dr. Keene is one of the most enthusiastic talking machine record buyers in the State. He says that Boninsegna, the soprano of the Boston Opera Co., was the big hit in Europe when he left. He was also in South America and said that the people in that country were talking machine crazy and that so far as he could see the Columbia Co. had a good foothold there.

The Kipp-Link Co. have been giving much attention to the Edison wagon proposition and are having great success with it.

The Wulschner-Stewart Music Co. have been putting out a number of the "40 and 10" contracts in the Victor line and the traveling salesmen of

this house report satisfying success. The house handles in a jobbing way both the Victor and the Edison line.

The Wulschner-Stewart Co.'s one drawback for the last month has been their inability to get the new style Victrolas in sufficient number to fill the demands of the salesmen. The special Edison Amberol records are being pushed and the business of the company has been highly satisfactory.

The Musical Echo Co. have been featuring a Verdi week and invited the public to their store to hear the numbers from this opera. This company have been showing a handsome Victrola instrument in their show window.

The Aeolian Co. will make a good display of Victors when the music section of the Indiana State Teachers' Association meets in Aeolian Hall during the holiday season. Henry Levy, formerly with the Wulschner-Stewart Co., is now with the talking machine department of the Aeolian Co.

It is said at the Aeolian Co. that the talking machine department of the store has been exceeding all expectations for the last month and that there has been a good demand for the high-priced Victors. There has been an unusually good demand for the \$100 and \$200 machines. There was an overflow crowd to listen to the concert last month by Mr. and Mrs. Wheeler, of New York, who make records for the Victor machine. Admission was by card only, but the crowd was so large that Aeolian Hall could not hold it.

The Aeolian Co. is getting ready for a big holiday business in the talking machine line. A handsome placard in the display window announces

some of the choice records now ready, among them being the Sixth Symphony by Pryor's band.

A rumor has been going the rounds for some time that another of the big piano stores is thinking of putting in a talking machine line. The report, however, is indefinite and could not be confirmed. Carlin & Lennox, dealers in pianos, some time ago dropped their talking machine business.

FEATURE TALKERS IN HOUSE ORGAN.

"Harmony Herald" Published by Eilers Music House Gives Employes Valuable News.

In The Harmony Herald, a house organ newspaper issued by the Eilers Music House in Portland, Ore., for distribution among and through their various stores and "promulgated each month for the music-hungry public in general, but particularly in the interest of Eilers Music House employes," special attention is given to news regarding talking machines and their development. In a recent issue views were printed of a corner of the talking machine department of the headquarters store of the company, as well as a large portion of the disc record room. They handle Victor, Edison and Columbia machines and records.

If there is a secret of successful salesmanship, that secret is courtesy. Courtesy has not a very scientific sound. It seems to incline more toward the opposite pole. The reason that it sounds wrong in that connection is that we confuse in our minds courtesy and politeness, two terms which are not interchangeable—not by a good, long shot.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Special to The Talking Machine World.)

Washington, D. C., Dec. 8, 1910.

PHONOGRAPH. Walter H. Miller, Orange, N. J., assignor to New Jersey Patent Co., West Orange, N. J. Patent No. 976,821.

This invention relates to phonographs and particularly to phonograph horns and means for supporting the same, and to an improved arrangement whereby a permanently positioned section of the horn may be connected with the movable reproducer. It has been common heretofore to project the horn forwardly from the machine and to support it movably upon a horn crane or equivalent device. In order to avoid the objections incident to this form of arrangement of horn and to permit the use of a horn sufficiently large to obtain the best reproduction, it has been proposed to mount a section of the horn rigidly or rotatively upon some portion of the machine or a bracket connected therewith and thus permit the horn to extend from the rear of the machine over the machine and in front thereof; but in all such devices of which it has been found necessary, in making connections between the horn so rigidly or rotatively mounted and the neck of the phonograph reproducer which in the phonograph and allied talking machines travels in a straight line longitudinally of the machine, to provide a telescopic connection or its equivalent so that the communication between the reproducer neck and the permanently positioned horn section may be maintained notwithstanding the movement of the reproducer. These telescopic or equivalent connections have been so arranged that bending and twisting stresses have been imposed upon the telescoping parts. In a device constructed in accordance with improvements all such bending and twisting and similar stresses are eliminated and the telescopic connection is enabled to perform its function without stresses or strain of any kind. This result is accomplished by rigidly and permanently connecting

a tube, preferably cylindrical in form and having the elements of its walls parallel to one another, in such a position that its longitudinal axis is parallel to the path traversed by the phonograph reproducer in its movement transversely to the record surface. One end of this tube communicates with the permanently positioned portion of the horn or megaphone while a tapered telescoping section is connected with the neck of the phonograph reproducer and travels within the cylindrical tube as the reproducer moves to and fro. Since the travel of the reproducer is in a line parallel to the principal axis of the fixed tube, the member connecting the tube to the reproducer neck simply slides back and forth in the said fixed tube in straight lines without creating any stress or strain of any nature. It is desirable that the hollow member which slides in the fixed tube be so arranged that it can be disconnected from the neck of the reproducer, and for this reason the said sliding hollow member is constructed in such a fashion that it is capable of universal motion with respect to the tube wherein it slides. Any form of construction which will secure this result may be used within the scope of this invention, but it is preferred to make the sliding member tapering in form, the smaller end being that communicating with the reproducer neck and having the edges around the opening in its larger end turned inward somewhat so as to form in this neighborhood what is substantially a ball joint.

In the drawings, Figure 1 is a front elevational view, showing improved horn and connections applied to a phonograph, which latter is shown in dotted lines; and Fig. 2 is a detail sectional view, showing the slidable member for connecting the fixed tube and the reproducer neck in its raised

position in which it can be disconnected from the neck of the reproducer.

PHONOGRAPH SOUND BOX. Anton F. Schonwetter, Cleveland, O. Pattern No. 976,502.

This invention relates to phonographs of the type having a plurality of diaphragms and horns. The object of this invention is to effect a duplication of the sound vibrations created by a single stylus or needle operated through a record, by causing the vibrations so created to act on a plurality—in the case shown, four—diaphragms, and vibrating them simultaneously in their respective sound chambers, and providing each individual sound chamber with a separate sound conducting tube.

This invention consists in a plurality of diaphragms mounted and operated in separate sound chambers connected together so as to vibrate in unison, and a single stylus mechanism so connected

that it will operate to vibrate all of the diaphragms, and in providing a separate chamber for each diaphragm, which constitutes its sound box, and providing also means such as tubes leading from said sound boxes respectively, to which may be attached horns if found desirable.

In the drawings, Figure 1 is a view in side elevation illustrating the construction of the sound carrying tubes and their relation to their frame and mountings, also showing the multiple sound box and the manner of mounting the same, and the ends of the tubes. Fig. 2 is a view partly in section, showing the internal construction of this sound box with the several diaphragms mounted therein, the manner of connecting said diaphragms to each other and the connection of the stylus with said diaphragms. Fig. 3 is a cross sectional view taken through lines 2-2 Fig. 2. Fig. 4 is a plan view looking at the apparatus from the upper side, and illustrating the assemblage of the different tubes and the manner of operation of the device

as a whole for the purpose of causing the stylus to follow the record without impairing in any way the vibrations.

PROCESS OF DUPLICATING TALKING MACHINE RECORDS. Thomas A. Edison, Llewellyn Park, Orange, N. J. Patent No. 975,339.

This invention relates to an improved process for duplicating talking machine records of the disc type and preferably in which the record itself exists as a sinuous groove cut or otherwise formed in a wax-like material by the action of a suitable stylus actuated by sound waves and vibrating in a plane parallel with the recording surface. At present such records are duplicated by first coating the original master with extremely finely-divided graphite and electro-plating the same to form a matrix, which is then separated from the master and employed to impress a suitable hot plastic material which, during the pressing operation, takes the proper disc-like form. Such a process is objectionable on account of the expense of making the matrices by electro-plating and the uncertainty of that operation. Furthermore, in separating the ma-

trix from the master the latter is generally broken or its record surface injured, and since the life of the matrix is not long, the surface being in a short time affected by the hot plastic material, it becomes necessary, before a fresh matrix can be secured, to make a new master, which is expensive and tedious.

The objects of the invention are to provide a very cheap and effective process for the purpose, in which electro-plating is dispensed with, and a very superior and durable matrix is secured so that the resulting duplicates are of a high order. Furthermore, in the separation of the matrix, the surface of the master will not be injured in the slightest degree, so that the master may be preserved indefinitely and any desired number of matrices made therefrom.

Broadly stated the improved process consists in first coating a suitable master (obtained by recording upon a wax-like blank in any suitable and ordinary way) with an excessively thin layer of extremely finely divided material that is not greatly water repellent, if at all, then in flowing over the record surface an emulsion of an extremely finely-divided cement, preferably Portland cement, then in allowing the cement to set so as to form a perfect matrix of the record surface, then in separating the matrix from the master, and in finally obtaining duplicate copies from the matrix, preferably by impressing the same upon and into a suitable hot plastic material, as with the art as now practised with electro-plated matrices.

Figure 1 represents a section of a part of the master on a greatly enlarged scale; Fig. 2, a similar view on the same scale, of the same, showing the preliminary coating; Fig. 3, a similar view on the same scale, illustrating the cement material in position before separating the matrix from the master; Fig. 4, a similar view, on a much smaller scale, illustrating more clearly the casting of the matrix; Fig. 5, a similar view showing the matrix in position to impress the hot plastic material, and Fig. 6, a similar view after the impression has been effected.

Figure 1 is a bottom plan view of a phonograph reproducer constructed in accordance with the invention, and Fig. 2 is a section on line 2-2 of Fig. 1.

DIAPHRAGM FOR PHONOGRAPHS. Peter Weber, Orange, N. J., assignor to New Jersey Patent Co., West Orange, N. J. Patent No. 975,377.

In order to secure the correct reproduction of sounds by means of a vibrating diaphragm, it is desirable that means be provided for putting the diaphragm to be vibrated under an initial tension. Various means, extraneous to the diaphragm itself, such as springs, weights and the like, have been resorted to for this purpose.

It has been discovered that very desirable results may be attained by so mounting the diaphragm in a sound box that it is kept in a state of tension due to the mode in which it is fastened therein, and without resorting to any extraneous tensioning devices.

An object of the present invention is to provide means for thus putting and maintaining the diaphragm under tension. One means which is found to be effectual is to so form the diaphragm that the clamping pressure will be applied to its opposite faces, at different distances from its center. A preferable mode of obtaining this result is to provide the margin of the diaphragm with a flange extending at an angle away from its general surface, so that when the edge of the diaphragm is clamped in place, clamping pressure will be applied on one face of the diaphragm at the outer margin of this flange and on its other face pressure will be applied at the base of the flange. Since the base of the flange is a short distance nearer the center of the diaphragm than its outer edge, this

results in a bending stress upon the diaphragm which assumes a position where the bending stress is balanced by the elastic reaction of the diaphragm, which is thus maintained in a state of tension in which it is extremely responsive to any vibration which may be imparted to it. To do away with vibrations not common to the entire diaphragm, said diaphragm is formed with concentric corrugations extending throughout all of its surface except a small space at its center, and the margin thereof. This corrugated portion is quite stiff and vibrates substantially as a whole. The bending of the diaphragm due to its being clamped on different concentric lines on its different faces, is thus confined to the outer portion and does not extend to the corrugated inner portion. Although a corrugated diaphragm is preferred, this invention may be applied to diaphragms of any form.

The material which has been found to be most desirable for use in a phonographic reproducer diaphragm is hard, rolled sheet copper about .0025 inch in thickness. To properly secure the diaphragm in place rubber gaskets are commonly used. As, however, the sulphur in the rubber is apt to attack and corrode the copper, gaskets of material are interposed which will not affect the copper, between the rubber gaskets and the copper diaphragm. It has been found that paper is well suited to this use. It has also been found that it is desirable to prevent the contact of the metal diaphragm with the metallic body of the sound box, as better results are obtained from diaphragms in which means are provided to prevent such contact. The paper gaskets are arranged in such a way that they not only prevent contact between the copper diaphragm and the rubber gaskets, but also insulate the copper diaphragm from the metal of the sound box body. A preferable way in which to attain this end is to make one of the paper gaskets of the ordinary ring form while the other is made with a marginal flange or cupped portion, this flange serving to keep the edge of the diaphragm from contact with the metal of the sound box body, while the flat portion is interposed between the diaphragm and the rubber gasket.

Figure 1 is a view in central vertical section of a phonograph reproducer embodying my invention, and Fig. 2 is a similar view of a modified construction.

PHONOGRAPH REPRODUCER. Thomas A. Edison, Llewellyn Park, Orange, N. J. Patent No. 975,340. This invention relates to phonograph reproducers, more particularly of the type in which the stylus is carried by a lever pivotally secured to a floating weight, said lever being connected to a diaphragm carried by the sound box, and this invention has for its object the application of resilient means to said lever for the purpose of counterbalancing or opposing the vibrations of the said diaphragm, so as to eliminate false vibrations or overtones which pervert the quality of the reproduction, causing a harsh or metallic sound. Said resilient means is preferably in the form of a dia-

phragm similar to the sound box diaphragm, so as to be capable of vibrating in the same manner, that is, of responding in the same way to all of the waves constituting the sound record surface, and such diaphragm is preferably applied to and carried by the floating weight.

PHONAUTOGRAPHIC RECORD AND PROCESS OF DUPLICATING THE SAME. Edward F. Leeds, New York, N. Y. Patent No. 974,895.

This invention relates to phonautographic records and to a new method of duplicating phonautographic records or copying the same in solid resisting material, and has for its object the treatment of phonautographic records and the production of duplicates or copies thereof superior to those heretofore produced.

In the accompanying drawing forming part of this specification is a plan view of a phonautographic record of lateral undulations and practically uniform depth made in accordance with this invention.

ACOUSTIC DIAPHRAGM. William W. Young, Springfield, Mass. Patent No. 975,596.

This invention relates to improvements in acoustic diaphragms, and more particularly to acoustic diaphragms for use in the sound boxes of talking machines, although by no means restricted to such use, and consists essentially of a perforated disc of suitable material which has irregular or broken surfaces and also has burs formed thereon, a thin covering or coverings of suitable material on such disc for the perforations therein, and a suitable coating of material or materials capable of being applied in solution, and then hardening upon said disc and in such perforations and said covering or coverings, the latter being permeable by such solution.

The above-mentioned coating should be of a nature which insures the required permanent unity between it and the parts to which it is applied while in solution, and which adds materially to the excellency, efficiency, and value of the diaphragm. By the term "solution," as herein employed, is meant any compound, emulsion, or any character of mixture of suitable composition to produce the

hard, permanent and exceedingly advantageous or beneficial coating to which special attention has been called.

The object of the invention is to produce an acoustic diaphragm, of the above-indicated class, which possesses practically all of the desirable

characteristics and qualities of a device of this kind, among which characteristics or qualities may be mentioned durability and stability, resiliency and resonance, capability of giving out clear, loud and distinct tones of great volume and depth, and of evenly distributing the sound

waves, and immunity from blasts and scratching sounds and other alien and discordant noises.

Figure 1 is a side view of one form of disc that may be used in the invention; Fig. 2, a similar view of a similar disc for a similar purpose, but slightly modified; Fig. 3, a side view of a finished diaphragm; Fig. 4, a side view of a slightly modified form of diaphragm, and Fig. 5, a greatly enlarged and exaggerated cross-section through the center of a diaphragm which embodies the aforesaid invention in a practical form, as do in part or in whole the other views.

METHOD OF MAKING DIAPHRAGMS FOR TALKING MACHINES. William W. Young, Springfield, Mass. Patent No. 975,668.

This invention relates to improvements in methods of manufacturing reproducing diaphragms for talking machines, and the method consists in a general way in thoroughly impregnating and permeating a suitable, more or less porous material with a compound, emulsion, or solution which possesses the necessary characteristics and qualifications, in imparting a proper surface treatment to such material, in hardening by subjecting the treated material to heat and pressure, and in raising a portion of or producing an integral protuberance on the material, the resulting diaphragm being exceedingly compact, hard and tough, although thin, and having smooth and even surfaces and possessing a uniform thickness throughout, excepting in the center, where the protuberance is located.

The reproducing diaphragms commonly used in talking machines are made of mica or sheet-metal, the mica diaphragms predominating, and owing to this fact it is not possible to obtain the best results from such machines, since neither mica nor simple sheet-metal discs used as diaphragms are capable of producing such results; moreover the

mica discs or diaphragms are extremely fragile and also expensive because of the waste incident to procuring discs of the proper size, and the primary object of this invention is to produce a substitute

for mica, sheet-metal and other kinds of diaphragms, which substitute possesses the necessary or desirable features outlined in the preceding paragraph, and in addition is resilient and resonant, is impervious to moisture and unaffected by climatic changes, and is capable of giving out clear, loud and distinct tones of great depth and volume, of evenly distributing the sound waves and quickly, completely and perfectly recovering its stable equilibrium, and of lessening to a great extent, if not eradicating altogether, all alien and discordant noises such as blasts and scratching sounds which are so prevalent with the ordinary diaphragm.

In the accompanying drawings, which form a part of this application, and in which like characters of reference indicate like parts throughout the several views—Figure 1 is a side view of a cardboard disc perforated and ready for immersion; Fig. 2, a side view of a metallic plate which may be employed in compressing such disc; Fig. 3, a side view of a diaphragm complete, and Fig. 4, a cross-section, on a large scale, of said diaphragm.

THOS. A. EDISON HONORED.

(Special to the Talking Machine World.)

Washington, D. C., Dec. 3, 1910.

On the great, massive bronze doors for the western entrance to the Capitol ordered by Congress, the beautiful reliefs being typical of the country's progress, appears a statuette of Thomas A. Edison, among other men distinguished in the American development of scientific discovery and industrial and commercial advancement. These splendid works of art, for which the artist was awarded a prize of \$15,000 for his design, have been cast and are ready to be placed in position, but will be first exhibited at the Corcoran Art Gallery.

VICTOR CO. AND CHRISTMAS TRADE.
 Special Letter Emphasizing Business Opportunities Sent to Trade.

(Special to The Talking Machine World.)

Philadelphia, Pa., Dec. 3, 1910.

Bearing on the Christmas trade specifically, the Victor Talking Machine Co., Camden, N. J., in their special letter of the 25th to dealers, say in part:

"In handing you the December supplement, we are again going to make an attempt to impress upon you the importance of getting after the record business with the same enthusiasm you display in selling a Victor or Victrola. We grant you that the handsome profit on the sale of the instrument is a great magnet to attract the attention of every

salesman to sell machines, but you must bear in mind that the possibilities of record sales to each owner of a Victor are anywhere from three to five times as great as the profit on the sale of an instrument. But this handsome profit will not be realized by simply sitting down and waiting for the customer to buy records.

"Previously we told you that there was no asset more valuable to Victor dealers than the machines now in the homes of your city. But to make these machines dividend paying assets requires systematic and intelligent work. It is never too late to begin a good system, and if you will buy a little memorandum book, or better still, a set of index cards, and enter thereon every purchase of ever customer, not in dollars and cents, but such information as will tell you just exactly what records each customer owns, and will utilize this memorandum to further your own interest, you will surprise yourself with the result. Now is the particular opportune time. The golden days of the Victor selling season are right on top of us and your opportunity is before you."

COLUMBIA RECORDS BY DADDI

The Grand Opera Artist and Famous Neapolitan Singer, Are Growing in Popularity.

The Columbia records, sung by Daddi, one of the foremost Neapolitan singers in the country, are reported as going big in the domestic trade,

SIGNOR DADDI.

and the export department of the company is also anticipating heavy sales for this artist's work in the Latin-American countries. They are listed in the "blue label" series, and may be placed on

sale as soon as received by the dealer. The Columbia Co. have an exclusive contract with Daddi. The export department commenced sending out this week their first complete catalog of grand opera records for the foreign trade. It is a very handsome publication and contains fine portraits of the world-celebrated artists whose records stand so deservedly high in the critical estimation of professional musicians and music lovers generally. The list of Cuban records for January will probably be ready for distribution next week.

A DOUBLE RESPONSIBILITY.

"Every merchant," remarked one of them, "takes it for granted that his employes are honest. The fact that he has them in his store is an evidence of that fact; if he had reason to suspect one of them, he would get rid of him at the earliest opportunity.

"This trust too often leads to loose methods on part of the employe, is a bad thing for the men, because of that fact. It is too apt to lead them into temptation. No man can object to proper safeguards, and it is no reflection on the help when they are introduced. A merchant owes it to his help as well as to himself that a proper check is placed on every dollar as it passes through the store."

Don't sit on the back porch and expect Providence to spade your garden. Providence doesn't spade gardens, but Providence will make your garden grow and give you 400 per cent. on your investment if you do the preliminary work properly.

Throw the lime light on your own shortcomings as often and as vigorously as upon those of your fellows. You will get to be a pretty good fellow after awhile—almost as good as you would like to see all others be.
