The TALKING MACHINE WORLD

AND
NOVELTY
NEWS

Published Each Month by Edward Lyman Bill at 1 Madison Avenue, New York, Jan. 15, 1910

The best-known trade mark in the world

“The Victor talking machine’s design, ‘His Master’s Voice,’ has become a household word, and the quaint little fox terrier at attention before the horn is familiar to more Americans than any of the world’s great masterpieces.”—COLLIER’S, May 22, 1909.

THE PLEASURE
DOUBLED

THE COST
REDUCED

10 inch 65c. **DOUBLE RECORD DISCS** 12 inch \$1.00

Zon-o-phone Records are pre-eminently the BEST that money, brains, and a thorough knowledge of the art of sound recording can produce.

They are justly famous for their remarkably clear, natural tones, absence of scratch and wearing quality.

The greatest care is exercised in combining the selections, each side of the disc presenting the latest and best in popular music or standard compositions.

The price appeals to the masses, the quality to the classes, making them indeed a popular record at a popular price.

A new catalogue of Hebrew Single Side Selections has just been issued. Solos by Mme. Prager, Mr. Juvelier, Master Mirsky, the boy soprano, and other eminent singers. These are undoubtedly the most perfect Hebrew records ever recorded. 10 inch, 50 cents, 12 inch, 75 cents.

Resolve yourself, Mr. Dealer, into a committee of one and investigate these claims. Consider, criticize, compare. ZON-O-PHONE RECORDS will stand the test. A trial will verify all that we say.

BUSINESS-GETTING LETTERS.

They Must Be Up-to-Date if They Are to Fetch Results.

The day has arrived when the letter sent out to get business must be up to the minute in every particular if it is to fulfil the mission on which it is sent.

In line with this plan, if it is an individual letter, it will be found to have been written with the highest and most efficient quality of carbon paper and ribbons.

As to the production of these letters, in the first place, they are dictated to a talking machine and then are written on a perfected typewriter which does everything but think, or else the letter is reproduced on a multicopying machine, if it is a circular letter. Lastly, it is addressed, sealed and stamped by a mechanical office appliance.

Greater demands on the time of business men have forced them to reduce the time that they can devote to their correspondence. At the same time the selling quality of the letters must be higher.

For this reason the up-to-date business man dictates his correspondence into a talking machine, and as fast as a letter is complete, the typist can start on it so that instead of the time killing device known as "personal dictation" the production keeps within a reasonable distance of the dictator. Not the least of the advantages in this is that no mass of unintelligible literature is accumulated for the "boss" to decipher and correct.

No man can be sure enough that his mental and physical natures will keep in harmony so that at all time he can turn out work of the same quality and degree of efficiency.

It has been found that the best substitute for the "most efficient man at his greatest efficiency" is the selling paragraphs that are offered by the various business efficiency companies and bureaus. These are the boiled down selling talk that has been developed by various selling organizations. By numbering the paragraphs and dictating into the talking machine the number of the desired paragraphs for the body and the close of the letter, a letter is produced that represents the concentrated efforts and best thoughts of masters in the business of selling by letter.

Reproduction of letters intended for circularizing by typewriting machines is a costly and slow job. To get the best letter, the best quality of labor must be used, and for such work its cost is prohibitive.

Several machines are on the market that reproduce typewritten letters, and do it as well as the best typist at the labor cost of the lowest, and the labor cost is only one of the factors entering into the matter, as cheap labor is notoriously extravagant of material. By the machine one cheap operator does the work of a dozen, and the greater the number of copies required, the greater the saving.

Finally the letters are addressed, sealed and stamped by a machine which does the work without waste of material and in a minimum of time.

But cheaper than any other method of reaching a large number of prospective purchasers, says the New York Commercial, is advertising, and it reaches the man at the time when he is most receptive, for he reads it at his own time.

J. O. PRESCOTT IN JAPAN.

J. O. Prescott, brother of F. M. Prescott, for some time connected with the trade as a laboratory recording expert, is now permanently located in Tokio, Japan, in the same capacity. At one time of recent date Mr. Prescott was re-

ported as having permanently retired from the talking machine business; his re-entry is a surprise. Mr. Prescott, in addition to his other accomplishments, is an ordained minister of the Baptist denomination, and an eloquent preacher in that faith. His knowledge of the legal affairs in talking machine matters is not only large, but exact and authoritative.

AN UNIQUE CABINET.

Designed by Andrew Miller of Wausau, Wis., to Hold an Edison Phonograph—View of First Cygnet Horn Sold in That City.

(Special to The Talking Machine World.)
Wausau, Wis., Jan. 6, 1910.

The accompanying picture is of more than ordinary interest to Wisconsin talking machine dealers. It not only shows the first cygnet horn

CABINET DESIGNED AND OWNED BY ANDREW MILLER OF WAUSAU, WIS.—FRONT VIEW.

sold in this city, but it shows what is probably the most unique cabinet in the entire State.

The machine was sold by the Farrell Music Co. of this city to Andrew Miller, but the cabinet, its front showing a remarkable piece of burnt woodwork, is the result of Mr. Miller's own genius. Mr. Miller is something of an artist in the burnt woodwork field, and his residence at Wausau is filled with burnt wood etchings, several of which are seen back of the talking machine and the cabinet. The cabinet displays a beautiful pastoral scene, entirely designed and burned by Mr. Miller. Talking machine men all over the State have endeavored to purchase the handsome cabinet, but Mr. Miller would not sell it for several hundred dollars.

A. W. TOENNIES, JR., JOINS FIRM.

A. Wm. Toennies, Jr., has become an active partner in the business of the Eclipse Phonograph Co., Hoboken, N. J., of which A. Wm. Toennies & Son are proprietors. This young man has grown up in the business and will be a valuable aid to his father.

NEW CORPORATION TAX.

Method of Ascertaining and Reporting Net Income Under New Law Analyzed.

(Special to The Talking Machine World.)

Washington, D. C., Jan. 3, 1910.

The Federal excise tax against corporations, which became a law August 5, is retroactive to January 1, 1909. The act prescribes a method for ascertaining and reporting net income radically at variance with accounting methods generally followed by industrial and trading corporations, with those prescribed for public service corporations under Federal and State laws, with accounting methods followed by many insurance, financial and banking institutions, and with principles recognized by students of accounting.

In other words, the language of the law cannot be reconciled with any proper recording in the form of accounts of those factors which necessarily enter into the ascertainment of net income, as it is generally understood, earned in any year. Especially is this so in the case of corporations whose operations require materials and supplies that are not used or consumed concurrently with their purchase, as with piano, organ and other manufacturers of musical instruments. Also in the case of corporations engaged in the purchase of raw materials, their manufacture and the sale of the product, as with the talking machine industry. The law undertakes to sever the natural relation which exists between proceeds from sales and cost of goods sold.

PHONOGRAPH REPLACES CHOIR.

Unique Plan Adopted in the Joliet, Ill., Presbyterian Church.

A report from Joliet, Ill., states that an innovation in church music was offered at a special service at the Central Presbyterian Church recently, which added a pleasing feature to the service. A large phonograph played eight sacred selections and it took the place of the choir. The innovation, however, will not permanently replace the choir, and was adopted merely as a novel feature.

The Reverend Robert Yost, the pastor of the church, said that there was nothing very unusual in using such an instrument in the church services and that there was no possibility of its becoming a permanent feature.

He added that all the selections were of a sacred nature.

ACROBATS ON "TALKER."

Figures Dance as Machine Plays or Sings Ragtime Airs.

Not satisfied with the perfection of the talking machine to the point where it can reproduce any sound to the most minute inflection, a Texas man has devised an attachment which gives another entertainment on the side. This is a figure toy which is operated by the revolutions of the "talker" record. A metal framework has a platform across its lower portion and a revolving shaft across the top. To this shaft are attached a number of jointed figures. The shaft is turned by a gearing, the lower wheel of which is in contact with the record disc and revolves as the disc turns. As the shaft turns the figures leap up and down on the platform, giving a lively jig to the tune of the dance or ragtime air which they are supposed to accompany. The shaft is bent into V's in different directions so that each figure moves up and down at a different time from the others, adding to the liveliness of their acrobatics. It is a most interesting novelty.

AFTER THE HOLIDAYS.

Dealers Must Keep the Holiday Speed Up Throughout the Winter Season if They Would Hold the New Trade They Have Gained—No Mistaking This Fact.

Newer till now, Mr. Talker Man, have you had such an array of tempting morsels to pluck from the branches of your Christmas tree, and, that being the case, you must bestir yourself to find a way to turn them into a permanent money-bringing proposition. The holidays are over, it is true, and, if you are the business man I think you, you have made much of them, selling many outfits which have bulged the pages of your customer list to generous proportions.

But we are talking of the baubles just taken from your tree, and it is in reference to them that I would hold converse with you. You made a special feature of some that needed boosting during the holidays, of course, but are you going to keep up the good work or allow them to drift further and further to the rear, away from your window and your advertisements until, eventually, they repose amid the dust and gloom of a neglected shelf?

If you take the advice of one who wishes you well you will don your heaviest armor and enter the lists of 1910 with your sword drawn, lance in rest, chanting as a battle-cry, "Excelsior!"

The new products that have come to you from the manufacturers this year are as meritorious as they are numerous and they will help you fight if you but give them half a chance.

Keep them all to the front all the time; enroll them into an army of attractive display—and the public will do the rest. You ask how this can be done? I will tell you; listen! First of all, watch your competitor's methods—he's trying to do the same thing you are—read his advertisements, and then if you are assured that he is setting the pace and you are following a bad second, do not be cast down, but go auto-mobiling. Open up your four cylinders, advance the spark to the limit, throw in the 90-miles-an-hour high-speed clutch, and pass him. Don't crawl up inch by inch as they do on the river drive and on the beach front, but eat him up. You can do it, and it will be a cinch, too; but you must use good gasoline. You can't run an engine on dirty petrol. The juice you'll need in this race for prosperity, my friend, was given you and every normal man by God at birth—brain. Whatever energy you derive from this

power plant is entirely up to you. You can use it or abuse it as you deem advisable. Whether it develops one jackass power or ten thousand horse is simply a question of your tenacity and ability to retain the principles of good common sense, and there is no doubt in my mind on that point I hasten to assure you.

Another thing—don't get sore at the other fellow when his sales loom bigger than your own. Reason it out this way—he's using his brain and you're not, that's all. You come back with the remark that you have known him long enough to swear that he has no brain to use. All right, you can bet your last copper he's paying for someone else's then, and that amounts to about the same thing in the end as far as results go, doesn't it? However, in the average case, say, in about two times out of three, we're both off the track, for there are a host of pikers on this rocky old sphere who do not, to all appearances, know enough to come in out of the wet, but who, for some as yet unexplained reason, are corking good business men. You see, their brain is buried deeper, that's all.

Therefore, the moral of this first spasm is—Open up your own think tank if you have one; if not, give some other chap a few beans for the use of his. Perhaps you have received one for a Christmas present and don't know it; you never can tell. There's one thing sure though, and the sooner you get next the better—the talking machine business has assumed such vast proportions that it takes a good, strong healthy, high power brain to run it successfully, and if you are to be in among the sure winners this year you will have to do one of two things, viz.: beg, borrow or steal a *good* one, or put your own in training. I'd suggest the latter; it will be cheaper and more apt to bring results, too, I'm sure.

SECOND SPASM.

There is a little scheme for drawing custom, invented by a talking machine man in Philadelphia, which has been working very well for a year or more, and I have his permission to tell you about it.

Every so often he gets out a poster showing a caricature of one of the talent, and below the picture an announcement reading thusly: "Mrs. John Smith begs the pleasure of your company at her home on Saturday evening to hear Harry Lauder" (or whoever the artist caricatured on the poster may be). Of course the date mentioned is fanciful.

He places this conspicuously in his show window, and when his customers ask him about it

Mrs. John Smith begs
the pleasure of
your company
at her home on
Saturday evening
December 26th, 1908
to hear
HARRY LAUDER

A SAMPLE POSTER FOR PUBLICITY PURPOSES.

he explains that it will be a peck of fun for them to hold a concert some evening in the near future, sending out as invitations miniature copies of the poster, which he is in a position to furnish at trifling cost. The result is that concerts are constantly being given in the homes of his patrons which are attended by people who are (not yet but soon) talking machine owners. See the point? Looks good, doesn't it?

As a finale, allow me to give you some *good* advice regarding advertising literature:

"The most interesting feature of advertising literature, be it catalog, booklet, magazine or newspaper advertisements, are the illustrations. They carry conviction; they are full of selling force, charged to the muzzle with persuasiveness."

HOWARD TAYLOR MIDDLETON.

HOSPE CO. ENLARGE DEPARTMENT.

The A. Hospe Co., Omaha, Neb., who recently secured the store adjoining their present quarters, are now settled in the commodious addition and have allotted a generous space to the talking machine department, a number of new record racks having been installed and the stock increased. The Hospe Co. handle the Victor.

YOU GET IT ALL FROM US

Quality, Service, Satisfaction and Success

Send your Victor and Edison orders to the "House of Quality." All orders for records, both Victor and Edison, are being filled with records of the most improved recording now leaving the factory. This is important to you.

Our dealers say that we pack goods with more care, ship more promptly and fill orders more completely than jobbers who sell talking machines as a side line. Send your orders to the "House of Perfect Service." It costs no more.

The man who hasn't made an error is dead, and those who say they never make one will die soon. We admit making an error occasionally but we are just as quick to rectify it as we are to acknowledge your remittances. That is Satisfaction.

If you will send your orders for Victor and Edison to us you will not only be on a par with your successful competitor, but you will stick out from the bunch like a large wart on a small pickle.

Eastern Talking Machine Co.
177 TREMONT ST. BOSTON, MASS.

Victrola

The perfect musical instrument

Every Victor dealer ought to display the great Victrola side by side with the other Victor models.

The Victrola is a standard musical instrument. It presents all the Victor repertoire of high-class music in an attractive setting. It is elegant and artistic in appearance. Its materials and construction are the finest.

Mahogany	-	\$200
Quartered Oak	-	\$200
Circassian Walnut	-	\$250

It appeals to the best class of people. Many people who have not bought a regular Victor become ready customers for the Victrola.

The profit is liberal; and Victrola buyers are the biggest customers for Victor Red Seal Records—a profitable business in itself.

Most Victor dealers have added the Victrola to their stock, and are making money with it. Why not you?

Long Distance Telephones—Numbers 4677 and 4678 Gramercy. Cable Address: "Elbill," New York.

NEW YORK, JANUARY 15, 1910.

WHEN the curtain was rung down on 1909 there were many eager and expectant men throughout America who were awaiting the next act with joy and confidence believing that the industrial stage of 1910 would depict many scenes which would delight and enthuse the onlookers.

Well, the Old Year is gone with its joys and with its sorrows, and it was not such a bad year after all.

The first half was uncertain and spasmodic.

Business men were holding back on account of the pending tariff legislation, for while we may say that the tariff does not affect business, yet as a truth we are supersensitive upon that one subject and the least agitation sends the cold shivers down the business spine.

It was not until the year was half gone that business conditions were settled and we knew just what course lay before us.

With a half year of spasmodic trade, it naturally required much activity for the remaining six months to bring the average of the year up to a fair standard, and while we have had some excellent months, yet, as a whole, the talking machine trade for 1909 was not satisfactory.

In some sections of the country business was up to its old-time standard, but in the East and in the larger cities there was a falling off.

There is no denying the fact that the workmen who have been large purchasers of medium priced machines and records have been out of employment so long that when they were again employed they were compelled to pay off obligations which they had incurred for the necessities of life.

They were not thinking about the purchase of talking machines and other home accessories with which to delight and entertain.

They were rather interested in the procurement of the essentials.

In the agricultural regions conditions were entirely different, and trade in those specially favored localities has been excellent.

The farmers have been large purchasers of automobiles, piano players, talking machines and other articles which indicate a leaning towards the good things of life which were not in evidence in the purchases of the agriculturists some years ago.

But the farming wealth of the country has been growing at an enormous rate, and as a result the farmer has become a more important factor than ever in our modern life.

CONDITIONS for the New Year point unerringly to better times.

If we may judge anything from the reports which come to us, by the opinions of eminent men in the financial world, we have now started upon an era of prosperity which will surpass anything hitherto experienced in the industrial annals of this country.

Men whose business it is to know state that 1910 will be a record-breaker in all that the word implies.

Well, that is cheering news to most of us, and certainly the influence of every man can be helpful in making times good, for it is the optimistic spirit developed and encouraged by millions of minds which will be a powerful factor in swinging business and trade along the right pathway with a tremendous force.

Public opinion on any great subject is heeded by political leaders.

Public opinion changes men, and the concentrated force of millions of minds in the accomplishment of a single purpose will accomplish it.

If we all preach the doctrine of optimism—talk encouragingly and stimulatingly along lines of business advance it will help—it will put the right kind of backbone in spineless men—it will lend encouragement to those who are wavering and it will further inspire those who are fairly charged with the optimistic spirit to-day.

Let us all make it a year full of energy, then things will move forward in a way that business men in every line will appreciate.

We need that kind of spirit in the talking machine trade.

THERE are plenty of men who, through the poor business of the past two years, have lost a certain belief in the future of the talking machine.

Now, a man who has no faith in the future of the industry with which he is associated had better get out of it, for he is only holding back the machinery.

He is sand in the bearings and the quicker he is removed the better.

This industry will thrive and expand, but it will not go ahead with the aid of the pessimist, and the men who see nothing but blackness ahead for the talking machine.

The weak-kneed fellows had better get out.

There is no place for them, but there is a bright future for the men who have courage—for the men who appreciate the talking machine for what it is and who believe in its future as a business force—an educational force and an entertaining force.

The trouble is we have had a lot of men who have only a superficial knowledge of the talking machine and its powers.

They know nothing about the fundamentals of business.

They simply took up the marketing of talking machines because in it they thought they saw advancement.

They thought they could pick up gold nuggets on the floor every morning.

Well, the man who believes that a thing comes easy nowadays in any line is fooling himself.

The man who believes that a profitable talking machine business can be built easily has an entirely false view of the situation.

There is nothing worth while that comes easy.

Success in business life is not gained without sacrifices—without energy—without concentration—devotion to a single purpose.

1910 CAN be made a year full of good, sound business profit by the men who look at the situation as it is—who do not fool themselves as to conditions, but who will go ahead resolutely—courageously—and plan a business campaign on advanced lines.

We know plenty of them who are made of the right stuff and who will make a lot of money the next twelve months, but the weak-kneed men who have lost faith in the business, if they continue along the same lines they will not go ahead nor would they in any other business.

Of course, the talking machine trade has been dull.

What trade has not!

Facts are, this country has been hit mighty hard—a good deal harder than a lot of people wish to admit.

But it has been hit and so heavily that it was stunned for a while, but it is recovering and this year is a year for effort.

A GOOD many talking machine men did not show sufficient faith in the fall trade to order high-priced machines early.

They could have made a great deal more money if they had placed orders earlier in the season, so that the manufacturers could have made ample provisions and so that they would have known just what was expected of them in the way of production.

When dealers have to pay express charges on machines it means their profits are cut down materially.

It would have been a mighty sight better to have ordered machines early—even if it was necessary to go to the bank and borrow money on warehouse stock—than to have lost sales and to have paid heavy express charges.

The lessons of 1909 should be impressed upon the minds of talking machine men throughout the country and wise moves should be made during the present year so that no sales be lost.

We need all of them.

No doubt of that!

The merchant must take chances as well as the manufacturer and he cannot expect that the manufacturer will assume the entire burden.

Orders should be placed well in advance, for in that manner only will the merchant be sure of obtaining the stock which he desires at the right time. Now, in other lines of merchandise orders are placed many months ahead.

It must be so, else the mills and factories could not produce the stock. For the talking machine trade is controlled by business men. It is run on business lines and because it has been controlled by business men is one of the reasons why the industry has held together during the terrific strain to which it has been exposed during the past two years.

If dealers could have placed their stocks on the market and slaughtered them at ridiculous

prices, in order to raise funds, values would have crumbled and the industry would have gone temporarily to pieces under the shock.

We may as well look at things exactly as they are, but because there were enforced rules governing the talking machine situation it was saved and it is on a splendid foundation to-day and there is no good reason why the men whose interests lie in this industry should not materially advance during the New Year.

They will, if good common sense is applied to the conduct of business, supported by energy and progressiveness which is necessary in all lines to achieve success.

Certainly, manufacturers have been exploiting, and are to-day showing up the qualities of the talking machine to millions of readers in great advertising space in leading periodicals.

Now, all this is helpful to the trade, but it must be supplemented by the right kind of work on the part of the retail selling forces.

Trade to-day in all lines is not easily gained.

Competition is too keen, and unless men are fully awakened to the necessity of improving to the utmost possibilities which lie 'round about them, they will be lost.

Now, every man in the talking machine trade should bend his energies to the end that the New Year may be made profitable and thereby happy.

HENRY F. MILLER AND THE VICTOR.

The Famous Boston Piano House Devoting a Special Department to the Victor Talking Machine—An Important Acquisition to the Victor Line of Representatives.

The announcement in our Boston letter last month that the Henry F. Miller & Sons Piano Co. are handling the Victor talking machine marks the addition of a very important house to the line of progressive piano dealers who have taken on this instrument.

The Miller & Sons Co. have always maintained the most dignified methods in the conduct of their business. Their aims are always artistic, and in taking on the Victor they pay a decided compliment to the artistic standing of this creation, which has won a tremendous vogue, owing to the merits of the instrument itself, and to the great line of artists in both vocal and instrumental fields who can be heard through this medium. The Victor Victrola is being strongly featured by the Miller house, and the department is in capable hands. Both parties interested are to be congratulated on this important move.

MUSICAL MOTOR HORN.

Some Reflections on Its Possibilities as a Musical Creation.

The possibilities of the musical motor horn are many, and one may readily expect further developments. Like the professor of music whose ear rebelled against an unresolved discord, a fact of which his pupils took advantage at every possible opportunity for the pleasure of seeing him return to the pianoforte and play the resolution, one puts in a plea for the motor horn which shall give us the sequel to the tale begun, a tale, however, which only Wagnerians can appreciate. Every such person knows the force of the triad of E minor, which introduces Brünnhilde's awakening in "Siegfried," and which is used again in a flat key at the opening of "Die Götterdämmerung." This chord is sounded forcibly enough by certain motor horns, too forcibly for the "Ring" enthusiast, who longs for the succeeding harmony, which his imagination but lamely supplies.

As a matter of fact there are two kinds of musical horns now in use, the melodic as well as the harmonic. For the latter, one might suggest the sounding of the chord of the augmented

fifth, two major thirds that is, the curious chord which enharmonically remains the same in all inversions, and by its frequent use by modern French composers has become seemingly the peculiar property of that school. To the majority of people it is still strange enough to make a sufficiently arresting and warning signal. For the melodic horn the counterpart would be the notes of the tonal scale; five at least of the six would be necessary to get the most old effects and, with such, many peculiar changes would result of an out-of-tune kind, again sufficient to clear the road effectually, one would think.

PAYNE & CO. OPEN IN LITTLE ROCK.

Head of the Firm an Experienced Talking Machine Man—Will Handle the Victor and Columbia Products in That City.

(Special to The Talking Machine World.)
Little Rock, Ark., Jan. 3, 1910.

Payne & Co. is the title of a new talking machine concern, which opened for business in this city recently with a full line of Victor and Columbia machines and records. The members of the firm are E. S. Payne, formerly manager of the graphophone department of the Hollenberg Music Co. for the past five years, who is president and general manager, and George Danaher, who is vice-president and secretary. The store, which is located at 709 Main street, is handsomely fitted up, and the new company should succeed in building up an excellent following, as Mr. Payne is one of the oldest talking machine men in the way of experience in this section of the country. He has devoted his entire time and attention to this end of the business for the past ten years.

TO HANDLE TALKERS IN DENVER.

The new T. P. Pattison Music Co., Denver, Col., will, besides handling an extensive line of pianos, also conduct a large talking machine department, carrying Victor and Edison machines

and records. The department will be in charge of Theodore Terlinden, who held the same position with the Denver Music Co. for some years.

9,000 THINGS EDISON WON'T DO.

Mr. Edison is still busy with his new storage battery which he claims will solve the traction question. In his experiments with these batteries, says the Bookkeeper, Mr. Edison has had men at work for years with a patience unparalleled.

More than half a ton of reports on experiments with batteries have been made. Two of his best men had to give up the work because of its unending monotony to save themselves from a nervous breakdown.

The work was continued night and day for more than three years, and more than 9,000 experiments were made without obtaining the results which Mr. Edison wanted.

A visitor to whom this was told exclaimed: "Then all those experiments were practically wasted?" "Not at all," said Mr. Edison, "I now know 9,000 things not to do."

MEYERS WITH MINNESOTA PHONO. CO.

W. L. Meyers, who, for the twenty years past, has been the buyer and advertising manager of the T. M. Roberts Co., Minneapolis, Minn., has resigned and located himself with the Minnesota Phonograph Co., and in the future will act as the sales manager for this concern.

This undoubtedly will be a great surprise to the small goods musical merchandise brokers, owing to the fact that Mr. Meyers has purchased many thousands of dollars in small goods and accessories.

He has cast his lot with Laurence H. Lucker, and no doubt with his assistance Mr. Lucker will have a valuable man, as Mr. Meyers understands the mercantile business thoroughly and is quite well versed in the advertising line.

Won't You
Have a
Lesson in
Spanish?

It's so easy to learn by the I. C. S. system—and a knowledge of Spanish is so useful nowadays.

The I. C. S. system of language instruction by means of the phonograph makes easy the mastering of a foreign language, and appeals with compelling power to thousands. The dealer in phonographs that does not carry I. C. S. Language Outfits is neglecting a quick and sure way to increase his business. The new \$35 Language Outfit of the I. C. S. is a marvel. It represents the highest art in the teaching of languages, and embodies a method that has won the warmest praise of thousands qualified to speak authoritatively. The Spanish, French, and German Embassies at Washington, as well as the leading colleges, have cordially indorsed the I. C. S. method of teaching languages.

The I. C. S. Language Outfit consists of an Edison Gem Phonograph made especially for language work; small horn; headband hearing tube; oil can; and 25 Conversational Records teaching pronunciation guaranteed to be absolutely correct, with native intonation and inflection. In addition to these Conversational Records there are pamphlet Instruction Papers teaching the theory of the languages. The new Outfit is at one and the same time the best and cheapest ever offered—the price being only \$35.

If you want to increase your business, write today for full particulars.

International Correspondence Schools

Box 918, Scranton, Pa.

A POSTAL WITH YOUR NAME AND ADDRESS WILL BRING A FREE SAMPLE

OF THE NEW QUICK-SELLING RECORD CLEANER

Here at last is a perfect Record Cleaner that makes good all down the line. It is constructed on an entirely new principle. It is a necessity to all owners of records, because it keeps the tone of the reproduction clear—free from all harsh sounds. It fits into and removes the dust from every minute sound groove as nothing else can, thus adding life to the records.

“DUSTOFF” RECORD CLEANER

If you are not now selling these goods, Mr. Retailer, ACT NOW.

These Record Cleaners have passed the experimental stage—they are making money for the wide-awake retailers who have put them in.

THEY WILL MAKE MONEY FOR YOU.

FREE CIRCULARS We will send you plenty of attractive little circulars with your goods. You can give these out in the store or mail them with your monthly statements—THEY WILL MAKE SALES FOR YOU.

BIG PROFIT “Dustoff” Record Cleaners retail for 15 cents each. There is a good margin of profit in them for you. GET BUSY—NOW. Write us to-day, giving your jobber's name and we will send you free sample with prices and complete information.

— TONE CONTROLLER COMPANY, PROVIDENCE, R. I. —

THE VICTOR TALKING MACHINE CO. SAYS: “A piece of velvet carpet makes an excellent and cheap record cleaner, and should be used on all records before playing.”

“Dustoff” Record Cleaners are made of especially selected high grade velvet carpeting, having a soft, fine texture and a high nap which accommodates itself perfectly to the surface of all records. It is the only record cleaner that fits into and removes the dust from every minute groove and crevice without wearing or scratching the record in the least.

THE TRADE IN CINCINNATI.

Holiday Business Indicates That There Is No Loss in Popularity of Talking Machines—December a Record Month—How the Wurlitzer Co. Succeeded in Getting Sufficient Victrolas—Good Victrola Demand—Columbia Machines and Records Sell Well—Milner Music Co. Sell Amberolas Before Receiving Them—Add to the Regina Line—John Arnold's Good Year—Salm Talking Machine Co. in New Quarters—To Push the Concertophone—Other News of General Interest.

(Special to The Talking Machine World.)

Cincinnati, Jan. 5, 1910.

The holiday business settled one thing in the minds of the local dealers in talking machines and supplies. The sales during December, particularly for Christmas delivery, showed that these amusement devices are more popular than ever, and consequently the Cincinnati trade has reason to enlarge its stock and field of operations in 1910. The year, as a whole, was regarded with disfavor up to December 1, but the business during the succeeding thirty-one days caused the aggregate to be greater than the volume of 1908.

Business, both retail and wholesale, was very brisk with The Rudolph Wurlitzer Co. The wholesale trade was pretty well scattered during the month, with the exception of rush orders for Victrolas, which were handled mainly during the last week. The Victrola sales constituted practically the entire business, and this, together with an immense demand for the better class records, kept the talking machine men busy during practically the entire month.

The Rudolph Wurlitzer Co. placed their Christmas order for Victrolas during the preceding summer, and the goods kept coming in during the fall in large shipments and were warehoused, awaiting the holiday rush. As a result neither wholesale or retail customers were disappointed, and, in spite of the immense business done in Victrolas, every order was filled promptly and completely during the holiday season.

A feature of the wholesale trade was the telegraphic orders for Victrolas received from small dealers, who ordinarily do not carry this price machine in stock. It showed that the advertising campaign given this instrument was not without results, because these sales can be traced to a demand which certainly was not created by the dealers themselves. There is

absolutely no question but that thousands of Victrola sales were not made mainly because the dealers do not carry Victrolas in stock and were afraid to order one when they had a prospect for the sale of an instrument.

There were many homes made happy with a Victrola in Cincinnati this Christmas. Contrary to expectations, however, everybody delayed buying until the last two weeks, and, as a result, the retail departments of The Rudolph Wurlitzer Co. were busy practically every night until 11 o'clock filling the orders which were taken during the day, and four wagons were kept busy distributing the instruments in the city. In order to facilitate matters and help the purchaser besides, The Rudolph Wurlitzer Co. made a unique proposition, which was undoubtedly responsible for quite a few sales being made that otherwise would have been lost. Every purchaser who seemed at all slow in making up his mind was told that The Rudolph Wurlitzer Co. would guarantee that the instrument would please every member of the family. In the event that this was not the case, the purchaser could notify The Rudolph Wurlitzer Co. to call for the instrument and would be under no obligations whatsoever on this account. Four wagons were reserved for delivering Victrolas during the last week before Christmas.

Regina sales were also very good, showing that this splendid music-maker is still in big demand. A number of Reginas were sold to old talking-machine customers, showing that the sales of these instruments do not at all conflict with the sales of Victor goods.

As a result of the splendid business enjoyed during the last two months, the talking machine men in Cincinnati are looking forward to 1910 with a good deal of enthusiasm. In questioning some of the regular customers, who have not been buying for a long time, we have invariably found that they have not as yet recovered from the hard times, and that they have not lost interest in their machines, but could not as yet begin buying regularly until they have taken care of the obligations incurred during the panic.

Another feature of the Christmas business was the big sales on Cygnet Horns and Edison Fireside Phonographs. The Fireside is undoubtedly extremely popular in Kentucky and Tennessee, the States which ordinarily draw their supplies from Cincinnati. These are mainly agricultural states, and people are more conservative in buying than those located in a manufacturing district.

In a previous issue the writer announced the fact that The Rudolph Wurlitzer Co. had doubled their record-selling facility, and that they now had two complete departments, one in the basement and one on the first floor. At that time Mr. Dittrich stated that he would have need for every one of them when the record-selling season began, and now, that the record season has opened up, he finds that even this increase in record booths is not sufficient to take care of all the customers during the rush hours.

The Columbia Phonograph Co. report a more than satisfactory Christmas business; in fact, December business ranks with the best December in the history of the Cincinnati store in wholesale, retail and instalment. An unusually large business was done in the Grafonolas, and a much greater business could have been done in this line of instruments if the factory could have delivered the goods.

The 4-minute Indestructible records and cylinder machines to play these records proved great sellers, and the demand could not be supplied. There is every evidence that the coming year will prove the greatest year in the history of their business.

The Milner Musical Co.'s first Amberola remained on the floor just one hour, and at the time of its being sold the concern had two more customers in the store waiting for the same instrument. It is not often that first refusals are requested in buying musical instruments, but such was the case in the above two instances, and the next two Amberolas are sold before they reach the company. This is very encouraging to their Edison department, and only goes to show the demand created by a perfected high-grade instrument.

“We have had the largest month in the talking machine department,” remarks Mauager Walter W. Timmerman, “and, in view of the many new machines sold to our new customers, the month of January should be an exceedingly good one for us in records.”

The Milner Musical Co. have just added a Regina and Reginaphone department, which will be under the personal direction of William Kenney.

John Arnold celebrated the first anniversary of his moving into his present quarters, 507 and 509 Elm street, on December 28, by announcing that his house had done a better business in his new stand than where he was formerly located on West Fifth street. The busy appearance of his music and talking machine departments corroborates his statement if such is necessary. Mr. Arnold received his supply of Amberolas too late for holiday demonstration, but finds they are in good demand to-day, and expects to do a great business through this new field. He had a remarkable sale of the Red Seal records. Mr. Arnold claims to find the demand for cheap goods to be disappearing, the higher priced articles being more popular.

The Salm Talking Machine Co. are now domiciled in their new quarters, 538 Main street, to which place the concern moved on December 29. The move was made in order to get into touch with a higher class of trade. The new quarters are divided into three parts, the front being reserved for disc machines, the center for the Victrolas, and in the rear the Edison machines and supplies will hold forth.

It is likely that J. C. Groene, of Race street, will devote more of his energies to the concertophone, of which he has the Ohio rights. George Howard, who was taken on in December, in order to develop the talking machine department of this house, may give the greater part of his time to the electrical music boxes, the demand for which is in excess of the supply. Already twelve have been installed.

A salesman should always make it a point to keep well posted on the general trend of his special line through trade journals as to prices, demand, supply, etc.

A voice well cultivated is an important factor in a salesman's equipment.

TRADE NEWS FROM MILWAUKEE.

Holiday Business of Exceptional Volume—Prospects Very Bright—Meeting of New State Association Next Month—What Various Houses Have to Report.

(Special to The Talking Machine World.)

Milwaukee, Wis., Jan. 8, 1910.

Milwaukee talking machine dealers are now in the midst of inventory taking, and the figures that are being disclosed are highly satisfactory. The holiday business, just passed, was one of the largest in the history of the local trade, and dealers feel that December sales formed a fitting climax to an exceptionally good year. No one particular machine or class of records seemed to be particularly in demand during the holiday season, but, on the other hand, demand was general. There has never been a period when machines sold as readily in Milwaukee as they did during the last week before Christmas. One feature of the trade was the fact that more high-class goods were sold than even the most optimistic of dealers had anticipated. Indications are that money is again plentiful and that general confidence has returned in the trade. General business and manufacturing conditions have returned to the normal, and people seem more inclined to part with their money.

The wholesale trade is not as brisk as it was during the month of December, but, nevertheless, it is highly satisfactory, a sure indication that dealers met with such a good business during the holidays that their stocks have been depleted, and they are forced to order even at this early date. Reports from the up-State dealers concerning the holiday trade are especially bright, and jobbers say that everything augurs for a big trade throughout the year.

"We are especially well pleased with the heavy holiday business," said Lawrence McGreal. "A few more days of the holiday rush and our salesrooms would have looked like an empty warehouse. We are having considerable trouble in securing the stocks that we want just at the present time as a result of the heavy demands that have been made upon the factories. The coming year looks more than bright to me, and I am confident that Wisconsin dealers will meet with a banner business."

Plans are under way for the holding of a general meeting of the new Wisconsin Talking Machine Dealers' Association some time during the month of February. The gathering will probably be held at Milwaukee. Several matters of interest to the trade will be brought up for discussion, although a general plan of procedure has not as yet been outlined. The organization was not launched until a few weeks before the holidays, and it has not been possible for dealers to take much active interest in the matter because of the rush of the holiday trade. Every effort will now be made to create an interest in the organization, and to make the body one of real worth to every dealer who is a member.

Walter J. Augustin, the talking machine dealer of Fond du Lac and Oshkosh; W. J. Graff, of Boscohel, and Fred Liethold, of La Crosse, were among Wisconsin dealers who were recently in Milwaukee. All report an excellent holiday business, and the feeling seems to be strong among the up-State dealers that trade throughout 1910 will be of the very best.

The Hoeffler Mfg. Co. met with such a lively demand for records and machines that, as J. H. Becker, Jr., manager of the talking machine department, expressed it, he was forced to order "music by the carload" from the talking machine manufacturers. The highest holiday business in the memory of Mr. Becker was secured by the Hoeffler Co., and this is saying a good deal, because Mr. Becker is able to recall to mind some remarkably heavy business periods since his connection with the talking machine business.

As the result of business and professional men of Janesville, Wis., circulating a petition which was to have been presented before the common council of that city, asking that the owners of moving picture shows discontinue the practice

of allowing their talking machines to run riot at the theater entrances, the show people have put a stop to the so-called nuisance. Talking machine dealers of Janesville have been considerably concerned over the matter, but they say that if the theater owners would regulate the practice there would be no objection from nearby business men. Dealers say that if the show people would not allow their talking machines to run all day and well into the night and that if they would not confine the repertoire of their machines to only a few songs, like "My Wife's Gone to the Country, Hooray, Hooray," and would offer more of a variation, the public would not be so inclined to make the serious objections that they have been prone to do in the past. Dealers are working for a harmonious solution of the whole trouble.

One of the heaviest holiday trades in the history of the downtown store of the Columbia, at 413 Grand avenue, Milwaukee, is reported by A. G. Kunde, the new owner and manager. General business seemed to be of the best and demand was brisk for both records and machines. The only trouble experienced by Mr. Kunde was that he had considerable difficulty in securing the necessary stock from the Columbia factory. "We are more than satisfied with the big holiday trade, and prospects just at the present time all point to a successful year," said Mr. Kunde. "We have several plans under way for pushing the Columbia business during the year 1910, and we hope to make the Milwaukee business even more successful than it has been in the past."

As the result of a successful demonstration made by the "B Y" model of the Columbia at the recent open-house celebration, held on New Year's Day at the Young Men's Christian Association's Building in Milwaukee, A. G. Kunde, owner of the downtown store of the Columbia, made the sale of two Columbia machines within the short space of one-half hour.

The Columbia four-minute indestructible records have been selling in Milwaukee at an unusual rate for the past two months, and just at the present time there is no indication of an abatement in demand. The popular double-faced records are more than holding their own also.

The Amherola, the new Edison cabinet machine, arrived in Milwaukee just before the holiday season closed, and its appearance has created a lively demand from the dealers for shipments of the new machine. Jobbers are unable to get enough machines from the factories to satisfy but a small fraction of the dealers, and it is expected that as soon as larger shipments can be secured a brisk business will be done.

News has reached Milwaukee jobbers of the recent death of I. L. Rice, a prominent and enterprising talking machine dealer at Wittenburg, Wis. Mr. Rice was only 34 years of age, and was regarded as one of the most up-to-date Edison and Victor dealers in the State. His early death has caused genuine regret among talking machine men. He is survived by a young widow, who, it is expected, will carry on the business of her husband.

William P. Hope, traveling representative of the National Phonograph Co., who has been in Milwaukee for a few days, is now in northern Wisconsin, where he is meeting with an excellent business. Mr. Hope reports that dealers are exceptionally low on stocks and that they are ordering freely.

Miss Gertrude Gannon, a sister of Mrs. Lawrence McGreal, and well-known attache of Mr. McGreal's store, spent New Year's with her sister, Mrs. S. W. Uhl, of St. Louis.

William Schmidt, formerly traveling representative in Wisconsin for the Victor Talking Machine Co., and now wholesale manager for Lawrence McGreal, is on a business trip up the State. Mr. McGreal expects to keep a traveling representative about the State a great deal of the time from now on. This is something of an innovation.

Harry W. Krienitz, well-known young talking machine dealer of Milwaukee, was married recently to Miss Mayme Hoffmann, a popular young lady of Milwaukee.

SLEZAK

is not only the greatest star of the Metropolitan Grand Opera Company, but—he is also one of your star salesmen

THE big hit which Slezak made in New York has spread his fame, as a tenor, from one end of the country to the other—and he sings for THE EDISON PHONOGRAPH, the same great songs from the Italian Operas, which have made him famous in New York—and for the Edison only.

We are featuring Slezak in all of our big, double-spread magazine advertising, besides in the 416 newspapers which we are using throughout the country.

The ten new Slezak Records with these two big advertising campaigns behind them are going to make Grand Opera the most profitable end of your business, if you do your part. Write your jobber today

National Phonograph Company, 59 Lakeside Avenue, Orange, N. J.

The AMBEROLA

The Newest Edison Phonograph

is the highest type of sound-reproducing instruments ever produced—but it is none too high in type or price for a certain class of your customers. It embodies all the beautiful tonal qualities of the

EDISON PHONOGRAPH

in a cabinet that is a masterpiece of the craftsman's art — beautifully simple in design, and coming in several finishes of either Mahogany or Oak, to harmonize with surroundings in any home. It has space in the lower part for holding 100 Records.

The Amberola plays both Edison Standard and Amberol Records.

With the Amberola you can now reach a class of prospective purchasers which you have not heretofore been able to touch with the ordinary types of Phonographs. And in reaching this crowd of buyers, the Amberola not only brings home the profits on its own account, but it creates a desire for the higher class music and brings home the profits on the higher priced Grand Opera Records.

The Amberola will help a lot toward building up this end of your business, and its presence in your store is a big asset.

Write your jobber today for full particulars.

National Phonograph Co., 59 Lakeside Avenue, Orange, N. J.

SOLID WOOD (NOT VENEERED)

The

MUSIC MASTER WOOD HORN

is easily sold by the dealer. He finds it only necessary to have a patron hear a musical selection with the MUSIC MASTER WOOD HORN. There is wonderful improvement of tone compared to the same selection heard with a metal or veneered wood horn. The reproduction is rendered rich and full, due to the resonance of the MUSIC MASTER WOOD HORN, which is constructed of solid wood on the same scientific principles as the sounding-board of the piano or the body of the violin.

HAVE ONE SENT ON APPROVAL

Your choice of *solid* Oak, Mahogany, or Spruce, for any make or style of cylinder or disc machines.

If your jobber cannot supply you, we would be very glad to send you a sample line of our horns on approval, and if you are not entirely satisfied with the superior merits of the MUSIC MASTER, you would be at liberty to return them to us for credit.

SHEIP & VANDEGRIFT, Inc.

PHILADELPHIA, PA.

TRADE NEWS FROM INDIANAPOLIS.

Closing Months of Year Boost Twelve Months' Average—Carlin & Lennox Close Out Talking Machine Department—Trustee for Indiana Phonograph Co.—Columbia Co. Have Good Holiday Business—Lively Victor Trade Reported—D. Sommers & Co. in New Quarters—McCormack's Love of Erin—With the Moving Picture Houses—Cut Down Circulation of Free Libraries.

(Special to The Talking Machine World.)

Indianapolis, Ind., Jan. 6, 1910.

The Christmas trade in talking machines in Indiana and Indianapolis, and in fact the trade for the entire year, was not up to former standards, although the three closing months showed a steady improvement, which it is hoped will continue during the new year.

Carlin & Lennox, one of the biggest piano firms in Indianapolis, desiring to give all their

time to their piano business, have decided to discontinue the handling of talking machines.

Charles Craig has been appointed trustee for the Indiana Phonograph Co. (Edison jobber), at the request of the National Phonograph Co. and two or three banking institutions of Indianapolis. Mr. Craig says that the business of the Indiana Phonograph Co. has not been bad, and all the trouble, he says, was due to slow collections. He says everything will be running all right in a short time. The company had a good Christmas business, he said. Mr. Craig was the proprietor of the Indiana Phonograph Co. before it passed to the present management.

Mr. Phillips, the credit man of the National Phonograph Co., was in Indianapolis several days last week. Mrs. Kresch, travelling representative of the National Phonograph Co., also was in the city over Christmas.

The Columbia Phonograph Co. had a satisfactory Christmas business, and had sold out all types of machines by Christmas Day. The

demand for hornless machines was unusually big. Several orders were held over because of a scarcity of the supply. The four-minute indestructible records of the Columbia Co. are meeting with a hearty reception. The special merits of these records seem to appeal to the buyers.

Manager Devine, of the Columbia Co., says the Grafonola Regent, that is, the library table style, is meeting with great favor among the clubs and societies. The first one of these machines received by the Indianapolis store has been placed in the Columbia Club, the high-class Republican club of Indiana, and is spoken of highly by the members.

The Musical Echo Co. and the Wulschner-Stewart Music Co., Victor distributors, report a satisfactory Christmas business. This department in the Wulschner-Stewart store is in charge of Joseph Levi, late of Lyon & Healy, of Chicago.

Mr. Kipp, of the Kipp-Ling Co., wholesalers and jobbers in Edisons, says the Christmas business of this firm was satisfactory. The new grand opera records, he says, are meeting popular approval, and many orders have been booked for the Amberola, the new \$200 machine.

D. Sommers & Co., big home furnishers, who recently established a talking machine department, have moved into their new building in West Washington street. This company handle the Columbia line. Their new home is one of the finest in Indianapolis. On the opening day handsome souvenirs were given away, and hundreds of people visited the store. The talking machine department is on the third floor, and is handsomely equipped.

The love of the Irishman for his native land is shown by the January Fonotopia Grand Opera double disc records received by the Columbia Co. It should be said that all records are made from molds and on all of the records made by John McCormack, the great Irish tenor, the following inscription is found, "John McCormack, Ireland Forever." It is customary for those who produce records to place their names on the molds so they will appear on all records as an attest of genuineness, but it is not customary to place any additional inscription. "The Irishman is certainly zealous for his country," said Manager Devine, of the Columbia store, when he found the inscription.

The weather for some time has been against the moving picture show business and five-cent vaudeville houses of Indianapolis. For a part of the last month the weather has been extremely cold, below zero a part of the time. Ordinarily cold weather does not hurt the moving picture business, but in zero weather the people do not usually stop for the shows.

The moving picture houses are continuing to keep open on Sunday and donating a part of their proceeds to their self-constituted charity society in order to come within the law. The ministers also are still deploring this practice. The Christian Pastors' Association, at its last meeting, adopted resolutions against the practice. The resolutions were presented by the Rev. Harry G. Hill, who created a sensation recently by flourishing a glass of beer from his pulpit as an evidence of the violation of the liquor laws.

Eliza G. Browning, city librarian, in her monthly report, said that a five-cent theater was responsible for a decrease of 50 per cent. in the circulation of books from the Riverside Branch Library. The theater was opened in the last month, she said, and there was a decrease of 111 books in the circulation for the month. Miss Browning said that a talking machine was the chief instrument in drawing crowds to the five-cent show, and she recommended that the school board place a talking machine in the library. This matter was taken under advisement.

RECORD VICTOR BUSINESS.

J. R. Richards, manager of the piano and talking machine departments of Fred'k Loeser & Co., Brooklyn, N. Y., reports that the sale of Victor outfits during December and thus far in January have broken all previous records of the department.

TRADE HAPPENINGS IN LONDON.

Retrospective and Prospective Talk on Conditions in the Talking Machine Industry in Great Britain—Year of Progress Just Closed—What Has Been Accomplished in the Perfection of the Talking Machine and Record—Hornless Variety Has Made Great Strides—The Year Notable for the Weeding Out Process Which Still Goes on Merrily—Various Companies Are Turning Out a Line of Records Which Continue to Interest the Trade—Recent Failures in the Industry Are Not Showing Up Well in the Way of Assets for Creditors—Pertinent Comments Upon the News Happenings of the Month.

(Special to The Talking Machine World.)

69 Basinghall St., London, E. C.

Simultaneously with the advent of a new year one's thoughts take a retrospective turn, and we reflect upon conditions of the past more from the point of view of results than anything else. In which respect and in what channel our thoughts run depends largely upon environment. Each of us individually take up different attitudes, widely divergent according to temperament, yet there is one point of consideration common to all of us. I need hardly say that that mainly centers around trading results, and whether or not there is a balance at the bank on the right side. That, however, is not so much my interest as yours. What I feel more concerned about at the moment is what progress, if any, has the talking machine trade made, from a scientific point of view, during the year 1909? Perhaps I should not have put that as a question, because my readers will scarcely dispute the fact that the past year has been one of unquestionable glory for this trade. We have made good progress, and the improvements, new devices, and practical advancement of the talking machine are both real and lasting. Following upon the wonderful Amberol record, which gave new life to the cylinder trade, there were several attempts to make a similar article, but the only one which has weathered the test of time is the Ebonoid 200-thread. A good record and remarkable value, too, yet the backbone of the cylinder trade in this country is without a doubt the Edison Amberol goods, which exercise and wield an influence of inestimable value to all engaged in such class of trade. The new Edison phonographs, not forgetting the combination type Gem and attachments, have brought the longer playing record within reach of thousands of users many of whom, it is safe to say, would not otherwise now be phonograph enthusiasts. My remarks on the phonograph side of the business would not be complete without a reference to the very latest introduction—that of the "Amberola," an interior horn cabinet instrument. It is the last word in phonographs, and should go a long way in bringing this class of instrument more in favor with the upper ten. But I feel there is room for a cheaper model of this type, and of a certainty Edison dealers would welcome such a machine at a price within the reach of the great middle classes.

In the disc field progress is even more noticeable. Dealing first with records, I am naturally drawn to comment upon the increased importance of the phono cut type. It has come to the front with remarkable rapidity during 1909, and there are now several manufacturers engaged in the manufacture of both the standard and 200-thread type. The latter especially calls for more than ordinary notice, because it not only provides double the music, but, in my opinion, apart from a slight loss of volume as against that of the standard thread, it is in

many respects of better tonal quality, particularly so in the instrumental selections. These records are mostly double-sided, being in diameter 10 and 12 inches respectively. On the average a 10-inch 200-thread double record will provide a continuous nine minutes of music, while the 12-inch gives proportionately more. And the retail cost per selection is only 1s. 6d. and 2s. It is indeed a revolution, and now that disc-instrument owners are provided with ample facilities at a moderate cost, which bring these fine records within reach of all, it must sooner or later affect the sales of needle records to no inconsiderable extent. The latter certainly must eventually be ousted from its proud position, unless some genius comes along with a 200-thread needle-cut record to save the situation. And this cannot be regarded as in any way exaggerating the position of things as they stand to-day; on the contrary, it is but anticipating the future.

The needle-cut record, however, has made good leeway in the direction of improved recording, and it would almost seem that in this respect the highest possible desideratum has been reached. There is, nevertheless, much to be accomplished in regard to the elimination of surface noise. Although the friction necessarily set up by a revolving disc against a stationary needle could not be entirely overcome under the present system, it is certainly possible to effect a radical improvement toward moderating the scratch and grind characteristics noticeable in the majority of needle-disc records. If evidence is wanted to prove my statement it is very easily found. Take, for instance, any one make of record you like, test a dozen, and you will find that in the matter of scratch they all vary, although made of exactly the same material. In some, even with heavy-band records, the scratch distinctly grates on one's ear, and many a record of lighter music is entirely spoiled from this cause. And yet in others there is no appreciable surface noise at all. The fault lays, in my opinion, just as much with the material as in the pressing. To a great extent good pressing is dependent upon a careful mixing of the right materials, to the lack of which the scratch in the finished article is largely due. Manufacturers are fully alive to this fact; experiments are making good all the time, and the tendency toward improvement should be a matter of fulfilment in the year now with us.

Turning our attention to disc instruments we find much has been achieved in the introduction of an entirely new phase of construction, to wit, hornless instruments. At this time last year the suggestion of a machine without the usual trumpet would have been laughed to scorn. And yet the idea is not by any means a new one. As a matter of fact, it is years old, and if a certain continental manufacturer had had the courage to market his hornless machine along enterprising lines his would have been the harvest which others are now reaping. But that by the way. Of the new style machines the "Eufon" was the first introduced, and a sufficient tribute to its quality is the fact that to-day it still stands unapproachable among a host of imitations. This type of machine is so handy of conveyance that there can now be no excuse for lack of private entertainment and enjoyment at such functions as garden, picnic, house-boat, or up-river parties, for which it is eminently suitable. Being essentially a summer line, in very truth, one can now advocate an all-the-year trade, since of a surety dealers must stock up on a line which creates its own demand and at the same time furthers the sale of records.

The interior-horn cabinet machines have made headway, but not to the extent antici-

pated. As a piece of furniture they do credit to any room, but as a practical machine they fall short of the ordinary type. And for the reason which I have always put forward—too much wood. What is wanted to insure a bright reproduction is undoubtedly a stout metal horn. As it is, the majority, if not all, such instruments are fitted with wooden interior horns, the natural consequence of which is a muffled and dull tone. In this class of instrument there is ample scope for improvement along the lines suggested.

There has been nothing particularly new in regard to the ordinary disc instrument, but the tendency to provide better motors is a welcome sign of the times. And, speaking of motors, reminds me of an amusing attempt to introduce a heat-driven motor by means of a spirit lamp, or such arrangement. I like to support all attempts to avoid stereotyped methods, but in this case—well, one thinks of the poor record!!

To devote a few words regarding other phases of 1909 conditions may not be out of place, because it is by studying the chessboard of time, with its ever-changing attributes, that we are brought to avoid in the future our commercial errors of the past. Just overhaul your line of action; if things have gone well with you, let it be an incentive to still greater efforts; don't stop, but remember stagnation is not progress, and go ahead. On the other hand, some of my readers are no doubt well satisfied to close the book of the year gone by, for it may not be pleasant reading, in which case, in the words of our old friend, Josh Billings, "Success does not consist in never making mistakes, but in never making the same one twice," you may find hope of the new year.

Competition has not been quite so keen as in 1908, for, surely and slowly, the weeding-out process goes merrily on. The half-hearted dealer—the man with no energy or enterprise—soon comes up against the wall, which few of his caliber ever surmount. The future of the phonograph and disc instrument business depends a great deal upon intelligent handling, and it must, therefore, speak well for increased prosperity that this industry is gradually winning over a better and more enterprising class of trader.

Unfortunately, the new year is not entirely free from disturbing elements, since 1909 has left us a legacy in the shape of impending litigation which bears a very serious aspect. As every one knows, the tone arm question is again to be revived, but it would be inexpedient to inquire too closely into the matter at the moment; suffice it to say that a full report of any proceedings will be duly submitted to our readers through these columns.

With that I extend hearty wishes for a really prosperous New Year to all talking machine traders throughout the world.

Columbia Pantomime Songs.

Ever to the fore with all the latest records, the Columbia Co. have issued a special list exclusively devoted to those songs which have made their mark in the pantomimes this year, and all dealers can have the list for the asking. Particularly appropriate, too, are the following special numbers to hand: Rena double records, 10-inch—"Im Looking for Mr. Wright" and "Do You Want to Buy Any Lavender?" are two excellent records by Mme. Helene Garland; "Home, Sweet Home," by George Alexander, and "Auld Lang Syne," by F. C. Stanley; "Levinsky and the Riddle" and "The Mandoline Girl Medley," by the Comedy Quartet. Rena 12-inch double—"Sweet Spirit, Hear My Prayer," by W. G. Webber, and "Lend Me Your Aid," by Godfrey James. Columbia 10-inch single—"As Once in May," a beautiful violin solo by Stroud Haxton; "Come Up in My

FROM OUR LONDON HEADQUARTERS—(Continued).

Balloon," comic, by Frank Lombard; "I Used to be Afraid to Come Home in the Dark," by Mark Crosby. Columbia 12-inch single—"Where'er You Walk," from "Semele," splendidly rendered by David Bispham; "Charme D'Amour," by Prince's Orchestra.

Grand Opera Amberol Records.

Said to be the best ever put out by the National Phonograph Co., no less than 28 grand opera Amberol records were issued to the trade in January, and needless to say they have evoked much praise. They are put up in a handsome and effectively colored box, and will retail at four shillings each. A big demand has already set in.

Beka List for January.

The Beka list for January will appeal to all record dealers, because it is one of the best ever issued by the Beka Co. To mention a few of the good things therein I can particularly recommend the following for stock: No. 252, overture from "Poet and Peasant," parts 1 and 2, is exceptionally well played, and recorded equally as good; 254, "Unrequited Love Waltz," and "On Parade," a fine military two-step; 255, "Sing Me to Sleep" and "Sleep and Forget," both sympathetically rendered by Philip Ritte; 256, "Your Eyes Have Told Me" and "Somewhere," by James Hudson; 258, "I've Loved Her Ever Since She Was a Baby" and "Bonnie Leezie Lindsay," two of Harry Lauder's songs, spiritedly sung by Kenneth McKenzie, the Scotch comedian; 259, "Tax the Bachelors" (embodies a suggestion for the Chancellor of the Exchequer) and "I'll Saw His See-saw Down" are two humorous issues by the famous Harry Bluff; and last, but not least, is the 12-inch double Meister record, No. 12724, of "Col enne in quest'ora" and duet from "La Boheme," by Mr. Wigley and Harry Thornton.

New Clarion Disc Issues.

A fine batch of new Clarion double-side disc issues reaches me from the Premier Mfg. Co., as follows: "Punchinello" and "The Uhlan's Call,"

"L'Etoile" and "Cinderella," "Songs of Autumn" and "Topeka," all by the Premier Bijou Orchestra; "Cock o' the North" and "Highland Laddie" (bagpipes), splendidly played by Pipe Major Forsyth; "The Coon's Honeymoon" and "The Galonet Polka," "Largo" (Handel) and "Egyptian Ballet," by the Premier Concert Orchestra; "Stars and Stripes" and "El Capitan," by the Premier Military Band; "The Girl in the Clogs and Shawl" and "Won't You Come Over the Garden Wall," by Harry Fay; "You Don't Want to Keep on Shewing It" and "In the Little Pub 'Round the Corner," by Charles Denton. A likely lot of records which will undoubtedly reach a large sale.

Universal Co. Creditors Meet.

A recent meeting of creditors and shareholders met under a winding-up order made against the Universal Talking Machine Co., Ltd. The liabilities were returned at £2,486, against available assets of £785, which was required to meet the claim of a debenture holder. The deficiency as regards shareholders is £5,886.

The company was formed in May last year, with the object particularly of obtaining a repertoire of Indian songs, and its present position was chiefly attributed to the failure of that repertoire. A liquidator will be appointed by the court.

Improvement in Christmas Sales.

A run around to the factors and dealers in this city furnishes the information, if any be needed, that Christmas sales were far in advance of the previous year, and general satisfaction is expressed on all hands.

Some Zonophone Favorites.

From the current Zonophone issues the following are worthy of special mention: 12-inch, "Kathleen Mavourneen," beautifully rendered by Mme. Edna Thornton; "'Tis Known to All," by Miss A. Yarrow, Ernest Pike and H. Scotland; 10-inch, "Young Tom o' Devon," by Peter Dawson; "With My Little Wigger Wagger in My

Hand," by Fred Vernon; "Stephanie Gavotte," by the Black Diamond Band; and "In the Combat" (Il Trovatore), by Mme. Violetta and E. Pike.

Cheap Seats at the Theaters.

In advocating the booking of cheap seats at the theaters, a correspondent in a leading daily paper makes the alternative suggestion that managers should open the door early so that the public could sit instead of having to wait outside, often in the rain. He says: "A similar idea is carried out in Liverpool with success, and phonograph selections wile away the waiting period pleasantly." And I might add that the idea also obtains in many other places of entertainment outside that town. Certain it is that a phonograph or disc musical instrument is now more generally recognized and appreciated as a useful adjunct to many diverse forms of amusement, as witness the innovation of musical selections on the Pathéphone at the recent toy fair held at Westminster, and the voting by the Lambeth Board of Guardians of no less a sum than £8 2s. 6d. for disc records alone. A wise expenditure from an outsider's point of view, although as a Lambeth ratepayer I might possibly differ!

A Fine Edison List for February.

A very fine list of Edison Standard and Amberol records for February will be ready for issue to the trade about the middle of that month. For the benefit of my readers the National Phonograph Co. have supplied me with a full list in advance of the usual date of issue, in which the following titles appear: Standard records—13927, "Bonjour Chichenettes," march (Boret Clerc), and 13935, "Omena," a Creole intermezzo (Hartz), by National Military Band; 13928, "Come Over the Garden Wall" (Tate), Stanley Kirkby; 13929, "A Black Coquette" (Grimshaw), Olly Oakley; 13930, "Since Father Joined the Territorials" (Hyde and Heath), Billy Williams; 13931, "Still Your Friend" (Ford and Barrett), Ernest Pike;

13932, "Father Tried It On," George Formby; 13933, "Mary Took the Calves to the Dairy Show" (Castling), Miss Florine Ford; 13934, "Boiled Beef and Carrots" (Collins and Murray), Arthur Osmond; 13936, "Blaydon Races" (Wilson), J. C. Scatter; 10297, "Venetian Love Song" (Nevin), Victor Herbert's Orchestra; 10299, "The Star, the Rose and the Dream" (Snyder), Stanley and Gillette; 10300, "The Dancing Girl" (Sousa), Sousa's Band; 10302, "Sweet Bunch of Daisies" (Owen), Miss Elizabeth Wheeler and Harry Anthony; 10304, "The Tin Soldier" (Löte), Vienna Instrumental Quartet; 10305, "My Dad's Dinner Pail" (Braham), Miss Ada Jones; 10306, "When I Dream in the Gloaming of You" (Ingraham), Manuel Romain; 10308, "A Bushel o' Kisses" (Muir and Connes), Edison Concert Band; 10310, "Jerusalem the Golden" (Ewing), Edison Mixed Quartet; 10311, "A Creole Lullaby," Arthur C. Clough; 10312, "Ciribiribin Waltz" (Pestalozza), American Symphony Orchestra; 10314, "Telling Lies" (Snyder), Miss Ada Jones and Billy Murray; 10315, "Long, Long Ago" (Bayley), Manhattan Mixed Trio, and 10316, "Two Thomas Cats" (Smith), New York Military Band.

Amberol Records—12131, "Poet and Peasant Overture" (Suppé), and 12140, "Gems of Scotland," National Military Band; 12132, "When I Get Back Again to Bonnie Scotland" (Lauder), Harry Lauder; 12133, "Tax the Bachelors" (Tate), Stanley Kirkby; 12134, "Every Day in the Week" (Kendal and Formby), George Formby; 12135, waltz from "Die Geschiedene Frau" (Leo Fall), Alhambra Orchestra; 12136, "I've Been Out with Charlie Brown" (Mills and Scott), Miss Florine Forde; 12137, "I Really Can't Reach That Top Note" (Baker), Arthur Osmond; 12138, "Bid Me to Love" (Barnard), Ernest Pike; 12139, "We Don't Want More Daylight" (Murphy and Lipton), Billy Williams; 345, "Rose of the World" (Herbert), Victor Herbert's Orchestra; 346, "My Pretty Little Piece of Dresden China," Miss Bessie Wynn; 347, "Amoureuse Waltz" (Berger), Frosini; 348, "Hello, Mr. Moonman, Hello!" (Fitz), Harvey Hindermeyer; 349, "The Homeland" (Stebbins), Anthony & Harrison; 350, "Benediction of the Poignards," from "The Huguenots" (Meyerbeer), Sousa's Band; 351, "If I Had the World to Give You" (Hayden Clarendon), Reed Miller; 352, "Juanita," Metropolitan Quartet; 353, "When the Bloom is on the Cotton, Dixie Lee" (Helf), Manuel Romain; 355, "I Will Sing the Wondrous Story" (Bilhorn), Edison Mixed Quartet; 356, "Forosetta-Tarantella" (Arditi), and 361, "The Darkies' Jubilee" (Turner), American Symphony Orchestra; 359, "In Cairo," Oriental Patrol (Von Blon), New York Military Band, and 364, "The Rifle Regiment March" (Sousa), United States Marine Band.

King Leopold and the Phonograph.

Relating anecdotes of the late King Leopold, a writer in a contemporary says that he would romp with his children for hours, and when they had gone off to bed out would come the phonograph to enliven away the evening. What tunes were given? The "Brabanconne"? No; the "Binion," one of the favorite airs of the Bretons in exile. The reason, maybe, was because it happened only at the king's Paris home.

Cheaper Parcel Post Rates to Canada.

Coming into force January 1, a new and welcome reduction in the Canadian parcel post rate is announced as follows: Not exceeding 3 pounds in weight, 1 shilling; up to 7 pounds, 2 shillings, and over 7 and under 11 pounds, 3 shillings. On the same date parcels from Canada to the United Kingdom will be charged a uniform rate of 12 cents (6d.) a pound. These rates are substantially less than the old price, and it should help to tighten the bonds of commercial relations between the mother country and her dependency.

Telegraph Money Orders.

Telegraphic money orders up to £40 may now be sent through the post office to any part of Canada and the United States. Hitherto, if one wanted to send such a sum it was necessary to take out two separate orders.

Stamp Your Contracts!

During the hearing of a commercial case re-

cently plaintiff wished to hand in a letter as forming part of an agreement. His Lordship noticing that the letter was not stamped, asked plaintiff if he would pay £11 for stamping, or whether he would not have the letter put in. "I must protect the revenue, particularly at the present time," said his Lordship. Plaintiff decided to pay the money and to put in the letter as evidence. It but emphasizes the advisability of always spending the few shillings for stamping at the time your agreement is made. It's a form of insurance against such eventualities as the case in point. Unbounded good faith may prevail on either side, but unforeseen circumstances often crop up, you know. To have all your agreements stamped is not to express distrust in each other by any means, but simply to legalize your contract in law.

Interesting Gramophone List.

The Gramophone list for January just to hand contains not a few selections likely to prove very popular. The titles are as follows: "The Barber of Seville," overture (Rossini), "Marianelle Overture," both excellently rendered by the band of H. M. Coldstream Guards; "Hearts and Flowers," and "Rouge et Noir," by the Metropolitan Orchestra; "Maid of Malabar," by Mr. John Harrison; "The Arrow and the Song," by Mr. Thorpe Bates; "The Diver," by Robert Radford; "The Angel Song," Mdm. Jones Hudson; "O, Hush Thee, My Babe" (Sullivan), Quartet, Miss Perceval Allen, Miss Alice Lakin, Messrs. John Harrison and Robert Radford. There are two good humorous items, "Tickle Geordi," by Harry Lauder, and "The Alpine Guide," by Will Evans. Other fine items are "Rhapsody," pianoforte solo by Miss Irene Scharrer; "Waltz No. 3, Andante," by the Renard Instrumental Quartet; and lastly, two popular pantomime numbers, "I Used to Sigh for the Silvery Moon," by Walter Miller, and "The Corsican Maid," by Herbert Payne. Lovers of the classical will be glad to hear that the Gramophone Company have made two further records by Signor Caruso, and these are now on sale.

Clarion Cylinder Records.

Recent issues of the Clarion Standard Cylinder records are as follows: "Health, Wealth and the Girl You Love," Frank Miller; "La Rinks," and "Songs of Autumn," by the Premier Bijou Orchestra; "Settle Up and Settle Down," "With My Little Wigger Waggar," "All Waiting for a Girl," and "In the Little Pub 'Round the Corner," all by Charles Denton; two descriptive records, "Xmas Day in the Navy" and "Xmas Day in the Army"; bagpipe solo, "Highland Laddie," by Pipe Major Forsyth; "Light of Day," Stanley Kirkby; "Won't You Come Over the Garden Wall," Harry Fay and a duet "Old Jim's Xmas Hymn," by Messrs. Thornton and Virgo, completes the list.

Columbia Grafonolas Admired.

The Columbia Company's two new Grafonola models, constructed on the interior horn principle, have awakened considerable interest among traders here, which is not surprising, having in view the fact that these instruments are in shape and construction entirely different from any other similar class machine. They have already been illustrated and fully explained in these columns, and it only remains to add my recognition of such a successful attempt to elevate this industry to a higher and better plane in commerce.

Ruling on Patents.

On the ground that a patent relating to typewriters (the property of the Yost Writing Machine Co., of New York) was manufactured mainly or exclusively outside the United Kingdom, the Comptroller General of the Patent Office has revoked it. A warning to American and foreign inventors of talking machine improvements, not to waste time and money upon patenting their invention here unless they intend to manufacture in England within four years of the date of registration.

Twin Record Titles.

In accordance with the promise given in my last report I propose to print a fairly representative monthly list of the "Twin" record titles, which are as follows: "Sally in Our Alley," and "The

Maid of the Mill," by Mr. Harold Wilde. "Can't We Take It Home With Us," by Florine Forde, and "Come Over the Garden Wall," Kitty Collins and S. Ireland. "If I Could Lock You in My Heart," and "Shine on Harvest Moon," Mr. Arthur Gray. "I Used to Sigh for the Silvery Moon," and "By the Blue Lagoon," F. Williams. "For Months, and Months, and Months," Herbert Forman, and "Boiled Beef and Carrots," Harry Fay. "One of the Girls," George Lashwood, and "Ship Ahoy," Frank Williams. "Rock of Ages," and "The King of Love My Shepherd Is," a church choir with organ. "The Irish Boy March" and "Tipperary March" (melodican), Mr. Pat. O'Neill. "Love's Kisses, Waltz," and "Moonlight on the Lake," "Twins" grand orchestra. Der Freischütz, selection, and "Lend Me Your Aid" (La Reine de Saba) Home Guards Band. These titles are issued in the February impression.

Provincial News.

Reports from different centers confirm the fact that traders generally seem to have experienced a real good time during the Xmas week, and indeed, December throughout has been a month of exceptionally quick sales in talking machines and records. In spite of short time in the Lancashire cotton mills it is remarkable what a satisfactory Xmas tide business dealers have done, especially those located in Liverpool, Manchester, and other large towns 'round about. Returns show that unemployment in the provinces is much on the decline with the advancement of better conditions in the coal and shipbuilding trades, and in fact, all the principal industries show an improvement in that respect excepting cotton weaving and spinning. It augurs well for the future since there is nothing so good an index of prosperous times as a settled labor market.

In the Provinces indoor talking machine concerts of late have been more in evidence than ever, and no greater tribute to the popularity of the disc instrument especially could be found than the evident appreciation of hundreds of persons sitting for an hour or more at a stretch listening in wrapt admiration of the voice of Caruso, Melba, Clara Butt, Harry Lauder, or maybe a musical comedy excerpt, band piece, or other selection. The value of these concerts is inestimable and provincial dealers attribute much of their business to this source. It's a form of advertising perhaps more surer and quicker in results than local newspaper space, but if the dealer has sufficient capital a combination of these two trade-winning elements must be proportionally more advantageous.

Situated in London Road Messrs. J. E. Hough, Ltd., have opened up a new depot in Liverpool, with the object of insuring to their traders around about full and prompt deliveries of all Edison-Bell goods, and Sterling records, which latter by the way are gradually but surely re-

**The
STROH
VIOLIN**

A new instrument possessing a VIOLIN TONE of great beauty and remarkable power, which will appeal to all music lovers.

The Stroh Violin being scientifically constructed will withstand the varied temperatures of the tropics, where the ordinary violin is useless.

Musical Instrument Dealers and others interested should write for free descriptive booklet to the Sole Maker.

GEO. EVANS
(Successor to CHAS. STROH)
94 Albany St., Regents Park, London, Eng.

gaining their old position in the cylinder record field. Branches in other provincial centers have been opened for the same purpose by Messrs. Hough, Ltd., and perhaps, needless to say, their dealers are in consequence showing keen appreciation of this attention by pushing the company's goods with additional energy.

My reports from the great Manchester center confirm in detail the prosperous trade being done there, which tends to imbue dealers with a satisfactory state of optimism calculated to carry them well into the new year with sufficient enthusiasm for energetic and enterprising work.

One of the most practical and useful lists ever issued by Manchester traders is that emanating from the house of Robinson's in Deansgate. This Multum-in-Parvo list, as it is called, is well named, since it is of pocket size and contains particulars of nearly 400 articles—from a screw to a complete machine. In addition to which the practical hints on different machines, repairs, etc., contained therein make this book at once a guide and a friend to all fortunate enough to possess it.

Talking machine trade in the midlands appears to be booming, and from what I gather, factors in Birmingham were hard pushed to keep ahead of their December orders. In a letter to this office Frank S. Whitworth says that his firm (the Colmore Depot) have only one trouble, which is nevertheless of a most satisfactory nature. He says in effect "Our present trouble lies in the fact that our Zonophone machine sales are such that the makers seem absolutely incapable of supplying the quantities we require to fill our customers' orders completely. And although we are experiencing a big demand for Twin and Zonophone records, it is gratifying to find the cylinder trade still holds its own. In our part of the country the Edison and Amberol goods swamp the market in the cylinder branch and trade altogether is booming," which to say the least, is evidence of great activity on the part of the Colmore people.

Edison-Bell Co. Affairs.

F. Fox has been appointed liquidator of the Edison-Bell Consolidated Phonographic Co., Ltd., in voluntary liquidation. His official report is not a very cheering one, and shows that the realization of the whole of the assets has resulted in a deficiency of over £90,000 due on the prior claims of the first mortgage debenture holders; consequently there is no possibility of any funds available for division among ordinary creditors.

Gramophone Co.'s Letter of Greeting.

The following letter has been sent the trade, dated January 3, 1910, by the manager of the Gramophone Co., Ltd.:

"Dear Sirs—We wish to take the opportunity at the close of another year to say how we have appreciated our pleasant business relations of the past and to wish for a continuance of them in the future. Nineteen hundred and nine has seen many vicissitudes in the talking machine world; more so, in fact, than other years, but through all the changes that have taken place our business has grown and our ties with our accredited dealers become stronger, based on our well-established policy of mutual confidence.

"It will be our endeavor in the coming year, as in the past, to cater unceasingly for your wants. We shall have a continuous flow in the course of 1910 of new records by the world's very greatest artists. We shall endeavor to always get out records by any person of note as quickly as possible, so as to create interest other than musical.

"We shall follow up the success of the new lines of machines issued in 1909 by further improvements all round, and shall continue our policy of supporting the trade by liberal advertising.

"Any and all of our friends who come to City Road will be made personally welcome, and every criticism or suggestion will receive the fullest consideration. We want you to feel that the highest traditions of the past, on which the foundation of our business is laid, will remain unshaken, and that our policy will be the same,

only altered to meet the necessities of the times. We thank you for your loyalty and for your enthusiasm for our goods, and wish that 1910 may be the happiest and most prosperous of New Years for you. Yours faithfully,

"THE GRAMOPHONE CO., LTD."

Paderewski Story from Belfast.

One of the Belfast papers of recent date contained the following: "If I had had a pistol I would have shot you," thundered Paderewski, in his retiring room, to a crestfallen phonograph fiend, who was caught redhanded at the Belfast Philharmonic society's concert, in the act of attempting to take records of his playing in Ulster hall. The famous pianist stopped dead in the middle of his best selection and directed the attendants to investigate the cause of certain annoying sounds. The men proceeded to the back of the hall, and after a few minutes watching, secured the offender, who had ensconced himself in the niche beside one of the doors."

Edison Goods in Ireland.

T. Edens Osborne, the enterprising talking machine jobber of Belfast, Ireland, has been featuring new Fireside and Gem machines of the National Phonograph Co. in the local papers to splendid advantage. One of his announcements was a cablegram as follows: "Despatched three Firesides, three Gems, 156 records, 1st; 702 records to-night." Mr. Osborne is doing splendid work with the Amberol in Belfast. He is also having quite a run on the records made by Clara Butt, the distinguished contralto, for the Gramophone Co.

The Talking Machine Shop is the latest addition to the retail trade in Evansville Ind., having opened temporary quarters at 513½ Main street, where they handle a complete line of Victor and Edison goods. W. N. Hollingsworth is manager of the business.

They that show more than they are, raise an expectation that they cannot answer; and so lose their credit, as soon as they are found out.

COPYRIGHT REPORT AND RECOMMENDATIONS

Presented by the Board of Trade Copyright Committee Appointed to Consider the Revised International Copyright Convention Signed in Berlin and Its Relation to the Laws of Great Britain—The Detailed Report of the Findings and Recommendations Will Prove of Exceeding Interest.

(Special to The Talking Machine World.)

London, Eng., Jan. 6, 1910.

In accordance with the instructions of the president of the board of trade, the committee appointed to consider the revised international copyright convention signed at Berlin on November 13, 1908 (hereafter called the revised convention) and its relation to the law of the United Kingdom, have now issued their report as follows, and from which it will be gathered that:

1. The principle of copyright recognition of authors' works in relation to mechanical reproduction conceded.

2. Composers to retain freedom of action in licensing the use of their works for mechanical reproduction.

3. Such recognition (paragraph 1) not to be retroactive.

4. It is also recommended that the term of protection shall include the life of the author and fifty years after his death, as adopted by the revised convention.

The findings of the Berlin or Revised convention provides that authors of musical works shall have the exclusive right of authorizing (1) the adaptation of those works to instruments which can produce them mechanically; (2) the public performance of the said works by means of these instruments. Reservations and conditions relating to the application of this article may be determined by the domestic legislation of each country in so far as it is concerned; but the effect of any such reservations and conditions will be strictly limited to the country which has put them in force. The provisions of paragraph 1 shall not be retroactive, and consequently shall not be applicable in any country of the Union to works which have been lawfully adapted in that country to mechanical instruments before the coming into force of the present convention. Adaptations made in virtue of paragraphs 2 and 3 of the present article, and imported without the authority of the interested parties into a country where they would not be lawful, shall be liable to seizure in that country.

"This article alters the provisions of the closing protocol, Number 3, of the Berne convention, which is as follows:

"Closing Protocol.—Section 3. It is understood that the manufacture and sale of instruments serving to reproduce mechanically musical airs in which copyright subsists shall not be considered as constituting infringement of musical copyright."

"The first observation to be made on the article is that its terms are confined to authors of musical works, and when this article is read with the other articles of the convention it is not quite clear whether under the provisions of the convention authors of dramatic, dramatico-musical and literary works would receive any protection against reproduction by means of mechanical instruments. It may be, in view of the terms of article 2, that such protection is conferred, but having regard to the uncertainty which exists it seems desirable to make it plain that such is to be the case, and in any confirmation of the Revised convention the committee suggest that the necessary protection should be expressly conferred independently of article 13, and should also be conferred by domestic law.

"With regard to the adoption of the article, and subject to the observations which will be hereafter made on the third paragraph, the committee are of opinion that it may be accepted, and they recommend, therefore, that the authors of musical works should have protection against the adaptation of their works to instruments which can produce them mechanically, and against the public performance of the said works by means of such instruments, both under the Revised convention and under British law, which should be amended accordingly.

"But with regard to the exercise of that exclusive right certain very difficult questions arise. On the one hand it has been urged by a number of the witnesses that composers having, as such witnesses contend, a new right conferred upon them, should, if they license any manufacturer to adapt instruments to the production of works mechanically, be obliged to grant a similar license on similar terms to any manufacturer who chooses to demand it; in substance, they propose that the principles which have been adopted in the United States of America with regard to instruments serving to reproduce mechanically musical works should be adopted in this country.

"What steps, if any, have been taken in other countries with regard to compulsory license we have not been able to ascertain. The American act provides that an owner of a musical copyright who permits the use of his copyrighted work upon the parts of instruments serving to reproduce mechanically the musical work is bound to permit any other person to make a similar use of the work upon payment of a royalty of 2 cents on each part manufactured. The proviso containing this provision does not extend to anything further than musical compositions. If the exact scheme indicated in the section should not meet with approval in this country, the contention is that some other provision should be made for a compulsory license being granted upon equitable terms, so that all manufacturers of instruments producing a work mechanically and of the records required for the production should be placed upon an equal footing.

"The main contentions on the part of those who advocate the adoption in this country of a

Use Each Needle Once Only

The vibrations of a tenor's voice being different from those of a soprano, or baritone, the reproductions of such vibrations—record waves—must also be different.

Each used needle shows wear, and whether it be little or great, it really exists, therefore it should be clearly understood that the used needle never can reproduce the sound waves of a record as can a new one.

The moral therefore is, "Use each needle once only!" and only use needles such as the

CONDOR

the points of which are made to conform to the sound-wave grooves, because—

Thin points are too sharp and ruin the sound-waves;

Thick points cannot follow the middle and underlying lines.

As the users of records do not desire to ruin them, it will be best to sell them the needles on which points are guaranteed—needles that are made exactly to conform to the sound groove, such as the Condor Needles.

Note in the above illustration how the Condor Needle fits into the sound groove or wave, and the purpose of this talk will be discernible.

Be sure that the needle bears the word Condor.

system of compulsory license are based upon the grounds that a very large business has been built up under the present state of the law, in which authors have been considered to have no right to restrain the reproduction of their works by means of mechanical instruments, and that if authors have the rights which article 13 proposes, there may be great danger of a monopoly being introduced, under which possibly one large manufacturing company would secure rights from authors to such an extent that other manufacturers might be practically excluded from the trade; and that it is desirable in the interests of the trade that all manufacturers should be left in the same position as they now are, with this exception, that they should be liable to pay to the author a proper compensation or remuneration for the right to reproduce his works. They claim that at present a manufacturer has a right to use compositions for adaptation to musical instruments, and maintain that if that right should be interfered with the result would be disastrous unless the principle of compulsory license were introduced.

"The witnesses who supported these contentions urged in substance that the whole of the existing businesses have been built up on the principle that there is no license or royalty to pay, and that if now licenses from authors have to be obtained and payments made to them, small concerns will be absolutely unable to compete. On the other hand, there can be no doubt but that it is right in principle that authors of works capable of adaptation to mechanical instruments should have the exclusive right of authorizing the adaptation of their works to such instruments—that it is in reality part of the literary property which they have in the product of their own brains. If they have this right it is maintained that it ought to be confirmed to them in such a way that they are perfectly free to exercise it in such manner as they think best by licensing one or more manufacturers entirely at their own option or by declining to license at all; in other words, that they should have perfect freedom of action with regard to the exercise of their right.

"Those who maintain this view are not prepared to admit that it is proposed by the Revised convention to confer upon authors any new right in the United Kingdom. The case of Boosey against Whight was decided by the Court of Appeal in the year 1899, and it was there held that the plaintiff's copyright in certain sheets of music was not infringed by perforated rolls of paper, representing the musical score, sold for use in a mechanical organ. This case was not taken to the ultimate Court of Appeal, and there appear to be no further reported cases which touch the question, except, perhaps, Mabe against Connor, where one of the learned judges does not appear to have been satisfied with the decision, and Newmark against The National Phonograph Co., where Justice Sutton followed Boosey against Whight. Authors were no doubt dissatisfied with the decision, and we gather that some doubt has been felt as to its correctness, but it has remained undisturbed for ten years, during which period there has been an enormous development of the manufacture of such mechanical instruments as are referred to and of the records used with them, the manufacture having commenced before that period.

"It may be added that composers put forward

as a strong ground of objection to a compulsory license that they ought to be able to control the mode in which their pieces are produced and the character of the instrument which produces them, so that they may be properly and correctly reproduced without doing discredit to the composer. We have thought it right to state the two views somewhat fully, as there is no doubt about the importance of the questions which are raised by the article and the difficulty of dealing, not so much with regard to the right of the author, but with the exercise of that right, upon which we think we ought to make a recommendation, having regard to the fact that the adoption of the article will necessitate the consideration of the reservations and conditions relating to its application (see paragraph 2).

"If the questions now raised had been raised at a time when authors could clearly have asserted a right to prevent reproduction of their works by mechanical instruments, it appears to the committee that it would have been very difficult to maintain that any such systems of compulsory license as those suggested should be brought into force, but the difficulty at the present time is in consequence of the fact that manufacturers of instruments for the purpose of mechanically reproducing works, have developed their business under the impression that they were within their rights in using the works of authors without making any compensation whatever to those authors, and that those rights would not be interfered with by legislation. Most of the witnesses who advocated a compulsory license did not deny the justice of the author's claim to derive some benefit from the use of his works for mechanical reproduction, but they were afraid that the free exercise by authors of exclusive control over such reproductions would produce a monopoly which would ruin the business of a large number of manufacturers.

"We can hardly think that these witnesses are right in expressing such fear, and when the large number of composers that exist at the present day and the enormous production of and demand for these mechanical instruments are borne in mind it seems probable that the views of the witnesses are exaggerated as to the results of free rights being exercised by the author. It may be pointed out that manufacturers may at present secure the exclusive services of popular artists, and indeed several of the trade witnesses maintained that the former is of more importance to the manufacturers than the composer of the piece which the performer sings in order to produce the records, and thus manufacturers are at the present moment exposed to the danger of one class of monopoly.

"In this country it has generally been considered that freedom of contract is most beneficial to the development of all kinds of industries, and the committee are not aware of any analogous case in which compulsory licenses have been imposed. The nearest approach to anything of the kind may be found in section 24 of the Patents and Designs Act, 1907, according to which, where the reasonable requirements of the public with respect to a patented invention have not been satisfied, any person interested may present a petition to the Board of Trade seeking to obtain the grant of a compulsory license, but the case of a patentee can hardly be considered strictly analogous, for he is concerned with matters of commercial utility, and

even the section referred to does not contemplate that he shall be under any obligation to grant a compulsory license, provided he gives reasonable satisfaction to the requirements of the public.

"Further, we have found, on considering the subject very carefully, assisted by the evidence, that any system of compulsory license leads to very considerable difficulties. Witnesses have pointed out that a fixed sum per record may produce hardship in cases of low-priced articles, and when an attempt is made to fix a royalty by percentage it is found practically impossible to separate the values respectively of the manufacturer's work, the performer's work and the composer's work, all of which contribute in varying degrees to the value of the article, and further, when an attempt is made to settle matters on the basis of an agreement, so that each manufacturer may come in on the terms agreed, difficulties are presented by such cases as where the composers themselves might manufacture the machines and records, or sell the whole of their rights to manufacturers, and there are other ways in which evasions might be attempted.

"The committee, with one dissentient, have come to the conclusion that the author should have freedom with regard to the exercise of his right.

"It was suggested that some system of compulsory license should be authorized for a limited term of years from the passing of any act which should establish the provisions of the Revised convention in this country, in order that the position of manufacturers might not be affected during that period except so far as making payment of remuneration to composers for the use of their works, but the committee, with one dissentient, have come to the conclusion that the suggestion should not be adopted.

"Whether an author should have complete freedom of contract, or whether his freedom should be in any way limited by a provision as to compulsory license, the committee think that protection should be afforded by legislation to the manufacturers of discs, cylinders, rolls and other mechanical devices, necessary to be used in the course of producing sounds, against piracy of these objects or their reproduction, either by means of direct copies or by means of copies produced by sound or otherwise. The grounds for this recommendation are that, as was pointed out in the evidence which has been placed before the committee, these discs and other records are only produced at considerable expenditure by payments to artists to perform, so as to record the song, etc., and by the expenditure of a considerable amount of ingenuity and art in the making up of these records; and that, therefore, the manufacturers are, in effect, producing works which are, to a certain extent, new and original, and into which the reproduction of the author's part has only entered to the extent of giving the original basis of production. Therefore, the committee regard this as one of the things which can be the subject of copyright and further recommend that public performances by means of pirated copies of these records should also be treated as an infringement of the rights of the manufacturer.

"We will now proceed to consider the effect of the third paragraph of the article. It is somewhat ambiguously worded, and is possibly capable of different interpretations. One member of the committee took the view that paragraph 3

should be read as providing that paragraph 1 should have no retroactive effect whatever, and that in order to bring the latter part of paragraph 3 into harmony with the first few words of that paragraph the words 'have been lawfully adapted' should read 'have been lawfully adaptable,' so that in those countries where the adaptation of works has been unlawful the adaptation of works published before the operation of the Revised convention should still be unlawful, but that such should not be the case in countries where it has hitherto been lawful to adapt.

"This view did not recommend itself to the rest of the committee who were of opinion that the object of the paragraph is that manufacturers who have, at the time of the coming into force of the Revised convention, lawfully adapted works (that is to say, adapted them without infringement of authors' rights) to mechanical instruments, may still proceed to manufacture records in respect of the works which they have so adapted. But a difference of opinion arose as to whether, where there had been any adaptation to mechanical instruments of a work at the time of the coming into force of the convention, that particular work would be free to be adapted by any manufacturer for any kind of instrument, or whether the manufacturer who had adapted it would be the only manufacturer who could produce the records of the work without the author's consent. A narrow majority of the committee were in favor of the former view, which, in their opinion, is in accordance with the exact words of the latter part of the paragraph and leaves all manufacturers upon an equal footing as regards works which by virtue of the paragraph might be reproduced without the author's consent, so that the effect of treating a manufacturer as having a vested interest in the work which he has adapted will be to give every other manufacturer practically the same freedom.

"It may be remarked that if protection be given to the manufacturers of records, in the sense that they should have what may be termed the copyright in those records, they ought to have the power to prevent the importation into this country of records copied from their own records. It will probably be necessary for this purpose to introduce some legislative provisions analogous to those found in the statutes, prohibiting the importation of records which would infringe the rights of the owner of copyright, and to impose, not merely confiscation of the records attempted to be imported, but also a penalty upon the importer, so that the clause may be practically enforced; and better provision might be made for the seizure in this country and forfeiture of any records found to be infringements and for the punishment by penalties of any persons dealing in such records. Evidence was given before the committee on the question of the effect of the production and sale of records, perforated rolls, etc., on the sale of sheet music, but the committee do not find it necessary to refer thereto."

In a note appended to his signature, E Trevor L. L. Williams, president of the Gramophone & Typewriters, Ltd., London, says:

"I am entirely in accord with the committee 'that the authors of musical works should have protection against the adaptation of their works to instruments which can produce them mechanically.' Having regard to the accepted state of the law, to give authors such protection by legislation will confer upon them an entirely new right. An immense industry has been built up under the immunity of the existing law, and consequently this new right should only be conferred subject to complete protection of the industry and to the preservation of vested interests. The vested interests involved can only be properly or even adequately preserved under any new legislation by making the right granted to authors applicable only to works published after the date of the act, and by providing for some form of compulsory license for the future.

"A composer cannot, as it is, prohibit anyone from singing a published song of his except as a public performance. Equally, the composer cannot prevent anyone from singing that song in

private, even for the purpose of reproduction by mechanical instruments. It accordingly follows that a composer is not logically entitled to protection against the private performance of his music by means of the phonogram. It may, however, be readily conceded that he is morally entitled to compensation for the use of the creation of his brain. This moral claim may well be met by giving him copyright protection to which he is not actually entitled, but subject to compulsory license. The form of compulsory license, so long as the principle is conceded, is not very material. Our report sets forth at length the way in which the United States of America in their recent copyright act have adopted a compulsory license of an amount fixed by law. The objection advanced in some quarters to a fixed sum for all records, which the American law provides, would be easily obviated by differentiating between cylinder and disc records and music rolls and by fixing the price in proportion to the length of playing.

"Other countries are considering proposals for legislation on the lines that if a composer once grant a license for the publication of his work in the form of a phonogram, he must grant a license to every other applicant in return for an equitable compensation. Such compensation need not necessarily be the same as that granted to the first licensee, and may be determined, in default of agreement, by a court of arbitration. But for simplicity, fairness and convenience the method of a license prescribed by law is undoubtedly the best.

"I have already indicated my opinion that the new right should not be in any way retroactive. To construe this paragraph in any narrower sense would lead to considerable complication and inflict great hardship on the established manufacturers of phonograms and music rolls. Speaking generally, with regard to article 13, there are certain other points closely affecting the interests of the talking machine industry which have not been dealt with in the report and which I will briefly enumerate:

"(a) Exemption of phonograms for export from payment of domestic royalties.

"(b) License from a composer to reproduce his work phonographically to cover the use of the words, if any.

"(c) The rights of phonographic publication and public performance (article 13, paragraph 1) to be included in the same license.

"(d) License from a composer to use his work phonographically to confer the right to adapt it for phonographic reproduction.

"(e) The question of authorship and country or origin where first publication is in the form of a phonogram.

"These points have all been treated at some length by J. Drummond Robertson in his proof submitted to the committee and his evidence thereon. I have therefore not felt it necessary to deal with them here in detail, but I submit that when this article is under discussion they should receive due consideration.

"This article is not dealt with in our report. Nevertheless, the question of seizure on import is one of considerable interest to the mechanical musical instrument industries, inasmuch as they are largely engaged in reproducing international music. The article does not deal with the case of importation into a country which affords greater protection than the country of manufacture, as, for instance, if the United Kingdom fixed a uniform license of one penny per record while France imposed a royalty of two pence. The question is so closely connected with the regulations which may be adopted in regard to the export of interchangeable parts generally, that without knowing what these are to be it is impossible to make any recommendations; but the matter is one of which the legislature should not lose sight. Finally, I desire to express my strong conviction that the Revised convention should not be brought into force, by order in council or otherwise, until Parliament shall have had full opportunity of considering its far-reaching effect upon domestic legislation."

A steady stream of steady customers

is the natural result of having what people want and thereby earning their good will.

It's a comparatively easy matter to do this—to get a tighter hold on your trade—and it means more money for you.

Every customer who comes to you should be made to feel that there is no other store like yours.

Whenever he or she wants a Victor, a Victrola, Victor Records, record cabinets, horns, needles, fibre cases or other Victor accessories, yours should be the store that instantly comes to mind.

And on your part, you should have the goods. As nearly as you can, try to anticipate the wants of your customers so that you have what they ask for. Show them that you have an up-to-date store and want to do everything in your power to please them.

There are times, of course, when you may not have what they want. But you ought to be able to get it for them without delay.

Your jobber should keep you posted on the newest articles and should be prompt in filling your orders. If your jobber is that kind of a man, stick by him.

If, on the other hand, he keeps you waiting for goods and needs jacking up before you get them, we would like to do business with you.

We ship all goods the same day the orders are received. You can easily figure out just about when you will get them.

Why not write to-day for a copy of our latest catalogue? We will also send you our booklet, "The Cabinet That Matches," which tells about our record cabinets that match perfectly each style of Victor.

REVIEW OF FEBRUARY RECORDS.

Issued by the Victor, National, Columbia and Universal Companies

In the Columbia Phonograph Co.'s February list some excellent numbers appear, notably two double disc Fonotopia records by John McCormack, the distinguished Irish tenor with the Manhattan Opera Co. These are four English ballads (F130-F131) which have won wide popularity. They are sung in that charming and finished style for which McCormack is famous. Two sacred songs (A779) of special excellence are "It is Well With My Soul," a baritone and tenor duet, and Schnecker's "Give Alms of Thy Goods," which is sung by the Metropolitan Trio with incidental solos. Two charming old Irish ballads are listed (A784), sung by Gerald A. Ewing, the new Irish baritone. Prince's Military Band is heard in two delightful numbers (A785), "Thrills of Love" and "Spirituelle Waltz." The same band has made excellent reproductions from Carmen, part 1 and part 2 (A5144). Bizet's famous opera is given an excellent reading, and all the popular excerpts are included. Two Waldteufel waltzes (A5145) are played by Prince's Orchestra with excellent effect. De Koven's "Oh, Promise Me," sung by Mrs. A. S. Holt, contralto, and Clay's "I'll Sing Thee Songs of Araby," by Henry Burr, tenor (A5142), are two old favorites which will ever command appreciation. In the double disc operatic list, selections from "The Dollar Princess" (A780), and "The Chocolate Soldier" (A781) are among those which stand out in a roster of unusual excellence this month. Some thirteen numbers are listed in the four-minute Indestructible record list for February, and they include several newcomers as well as a goodly list of standard compositions which are always in favor. In the two-minute Indestructible cylinder list there are twenty excellent compositions this month, including Lacalle's "America's Aerial Triumph March" (1262), Offenbach's "Intermezzo Elegante" (1269), and Meyerbeer's "Coronation March" from "The Prophet" (1272). In the vocal list Andrew Mack's "Irish Blood" (1276), sung by Ada Jones, is the leader of an interesting array of songs, both standard and popular. It can be seen from the full list which appears elsewhere in this issue that the Columbia Co. have covered a wide sphere in both their double discs and cylinder records this month.

The National Phonograph Co. have prepared another excellent list of records for their February delivery. It is admirably balanced in the matter of popular and high class vocal and instrumental numbers, with a sprinkling of those old timers that will be ever in demand. In the Amberol list those which will come in for special consideration are "Rose of the World" (345), one of the popular feature numbers of Herbert's brilliant operatic success "Algeria," and played by the Herbert Orchestra under the composer's direction; "Benediction of the Poignards" (350), an admirable number played by Sousa's Band—the impressive and dramatic number in the fourth act of Meyerbeer's opera, "The Huguenots." The American Symphony Orchestra is heard in Arditi's "Tarantella" (336) that lively dance of Southern Italy, which is played with rare abandon and charm. Another instrumental number is a dashing march by Sousa and played by the United States Marine Band, entitled, "The Rifle Regiment March" (364). Two vocal numbers in the Amberol list which are destined to have a wide popularity are the "Prologue" from "Pagliacci" (357), sung by Thomas Chalmers in English. This noted baritone is heard to splendid advantage in this number. "If I Had the World to Give You," J. Hayden-Clarendon's high class ballad (351) is sung with fine effect by Reed Miller, whose clear and expressive style is admirably adapted to a song of this sentimental character. In the

Edison Standard record list an instrumental number that stands out especially strong is the "Venetian Love Song," a selection from Nevin's "Suite Romantique" (10297). Its beautiful melody and rich harmonies are brought out most admirably by Victor Herbert and his Orchestra. Another number of especial merit is an instrumental arrangement of the popular Viennese song "Der Zinn Husar" ("The Tin Soldier") (10304) and played in a most finished style by the Viennese Instrumental Quartet. Among the many vocal numbers that entitled "Jerusalem the Golden" (10310), sung by the Edison Mixed Quartet, is a record of especial excellence. It is sung without accompaniment, and is a very excellent example of pure and effective quartet singing. In fact, it is superfluous to analyze the entire list which appears in detail elsewhere in this issue, for each number covering diverse fields, are meritorious and will find many admirers.

The nine Red Seal records by distinguished artists in the February lists of records issued by the Victor Talking Machine Co., Camden, N. J., will interest dealers and purchasers alike. Among the famous artists represented are Geraldine Farrar by a selection from "Mignon" (88211); Mme. Schumann-Heink by the Lyre Song from "Sapho" (88212); Nicola Zerola by "Di quella pira" from "Trovatore" (87045), and the Farewell Song from "Otello" (87046). Blanche Irral is heard in the Jewel Song from "Faust" (70147); Gogorza in "The Feast at the Hermitage" (64110), and "Mi Nina" (71419). Evan Williams, whose voice it is always a delight to hear, is represented by Paradiso from "L'Africana" (7416), and a "Furtive Tear" from *Elisir d'Amore* (74150). In the regular single-faced list the two operatic medleys, sung by the Victor Light Opera Co.—Gems from Robin Hood (31768) and Gems from Algeria (31766)—are certain to win a tremendous vogue by reason of their unusual excellence. Arthur Pryor, whose band records are always brilliant and satisfactory, is represented by two excellent numbers in the February list (5757-31764). Titl's Serenade for 'cello and flute, accompanied by orchestra (31763), makes a number which will not only continue to hold its old position, but win new adherents by reason of its very fine qualities of tone. The Vienna Quartet is represented this month by Herbert's *Badinage* (31762) and Strauss' *Artist's Life Waltz* (31767). They are of that high quality that has ever distinguished the work of the artists comprising this organization. Some fifteen double-faced records are listed for February and make a goodly showing of numbers which should ever have a big following. Among the double discs which especially appeal to the writer are Elizabeth's Prayer from "Tannhauser" and "A Night in Venice," sung by Mr. and Mrs. Wheeler (35096). The Medley of Foster songs by the Peerless Quartet and the Virginia Minstrels by the Victor Co. (35095); La Source Ballet, Nos. 1 and 3, played by the Victor Orchestra (35094). The other numbers are equally noteworthy, but are of a more popular character. It is hardly necessary to say that the Victor list for February is one that merits commendation for its admirable diversity and merits, musically.

The Universal Talking Machine Co. have four very excellent instrumental double discs in their list for February which appears elsewhere. Those by the Zonophone Orchestra (5590-5591) are especially meritorious, containing as they do, compositions of such well known composers as Becucci, Trinkaus, Chaminate and Bennett. Messrs. Lincke and Pryor are represented in the compositions (5588) played by the Zonophone Concert Band, who also was heard in two rattling good marches, listed as (5589). Apart from the popular numbers listed under the heading of vocal solos Frank Stanley is heard in two songs which will ever be popular, namely, "Let Me Like a Soldier Fall," from Maritana, and the "Bedouin Love Song" (Pinsuti) (5594). The same singer and Henry Burr are heard in two

old American songs, "Olk Folks at Home" and "Ise Gwine Back to Dixie" (5597). The other records include a number of the popular order which will undoubtedly appeal to the buying public.

A SPIRITUALISTIC EXPERIMENT.

How, with the Aid of a Talking Machine and a Confederate, a Violin Can be Made to Play by Itself—Not Hard to be a Medium.

The Paladino discussion has brought the subject of spiritualism—whether the brands be real or fake—much before the public these days. A World correspondent exposes a rather smart fake of alleged "mediums," with the result that a pretty parlor trick can be worked by almost anyone, with results startling to the auditors.

All you do is this: Put a violin, guitar or mandolin on a table, stamp your foot, and it will begain to play. The music is not the kind

regularly made. It will sound weird and far away, but none the less distinctly.

Here is the way it is done: Place one end of a long, slender pole on a talking machine with a violin record played by a soft needle in the basement of the house where the trick is to be worked. Let the other end pass up alongside, or behind, or through the leg of a table, the end coming up through a hole in the top, and sticking up about one-sixteenth of an inch above. Balance the violin sideways on the end of the pole, and stamp your foot, which is also the signal for your confederate downstairs to start the machine.

The result will be so realistic that many people really will think that the spirits of the departed are playing the music with unseen hands. Be careful not to have any obstruction in the way of the wooden pole.

The peculiar music is due to the vibration transmitted through the pole from the talking machine to the instrument itself.

MR. BERLINER A VISITOR.

E. M. Berliner, vice-president of the Berliner Gramophone Co., sole Canadian distributors of the Victor Talking Machine Co., Montreal, Canada, was in New York recently, endeavoring to buy Victrolas and other Victor goods, on which they have been surprised with a shortage. Mr. Berliner, a son of Emil Berliner, Washington, D. C., the inventor of the famous Berliner patent, has also contributed some inventions of his own to the talking machine line. He said business in Canada was on the boom and everybody busy.

A salesman who studies the art of "butting in" at the proper time usually carries his point.

1909--1910

The year just passed has demonstrated **beyond all question of doubt** that the

“B. & H.” FIBRE NEEDLE

has proved itself to be the **biggest winning card** ever offered to the talking machine dealers.

Thousands of high-priced machines and records have been sold—“**just on account of the Fibre Needle.**”

Thousands of converts have been made to the “talking machine”—“**just on account of the Fibre Needle.**”

Thousands of old customers (“dead ones”) have been brought back to life and these in turn have become **rank enthusiasts**, and **this is just the commencement.**

These are not idle statements. We have indisputable documentary evidence to back our claim, and furthermore we can show a sales record that exceeds, in rapidity of growth, that of any accessory ever brought out in the talking machine trade.

Be wise and start the New Year right.

Samples and details on application.

“B. & H.” FIBRE MFG. CO.

33 W. KINZIE ST., CHICAGO, ILL.

TRADE FABLE

No. 3

Not so very long ago there was a talking machine dealer in a small middle western town who modestly believed that he was about the niftiest little specimen of a real business man between the two poles. According to his own little line of dope, he had the trade of that particular town securely muzzled and chained and wearing a pretty brass collar with his initials on it to denote ownership. In other words, he simply whistled each month when the new records came and the townsfolk lined up with their money handy and were relieved of it. He called them all by their front names, and, in short, had a cinch which he thought no other system could beat.

This pippin's store had been neat and clean when he started in business and the stock had been fresh and up to date, but there it ended. At the end of two years the dust on the shelves would have choked a vacuum-cleaner, and the old stock had the appearance of real antiques. The rear of the store reminded one of a city ash heap on a busy day, and the whole establishment possessed an air of lassitude that would get the progressive man's nanny. But what cared our nifty friend? His trade either had to buy from him or travel thirty miles to do better, and he thought he was wise. His favorite stunt when asked for a record which he hadn't in stock was to bring out a real live song hit of two seasons ago and converse thusly: "Now, Bill, I'm handing it to you right. The song on this record knocked them off their seats in St. Louis, and you want to get next right away. That record you want is a dead one—take it from me—and I wouldn't want to see you make a mistake and get it. What, don't want it? Well, you know what you can do. I can't please everybody, so you can either take it or leave it." Exit Bill, only to return later for another record which might chance to be in stock.

It might be stated that this ambitious cuss made a fairly good living out of the business until a vacant store on the next block took on a busy appearance and a brand new label appeared over the door, with the words "Talking Machines and Records" stenciled on the window. When our little star merchant saw the new competitor he was strong for the smile stuff, and was even inclined to advise the new arrival to blow before he has lost his roll. Wasn't the trade of the town cinched by him? Wasn't his store and stock good enough for the inhabitants of a one-horse town that was full of dead ones who wouldn't know a real live bunch of records, even if it bit them? After thinking the matter over our hero decided that as the newcomer would run for Sweeney anyway, it was just as well to stick around, keep mum and see the fun.

The opening of the new store was announced by advertisements in the local papers that cost more than the total receipts of the old store, and when the crowd arrived they found fixtures and stock simply dazzling in their freshness. The corps of clerks were live ones and business started right away. Every customer got a run for his money, for the clerks all had "Demonstrate" for a middle name, and were there forty ways when it came to bringing out the latest things from the factories in either machines and records.

It took Brer Wisenheimer just about a week to fall to the fact that as the big smoke in the talking machine trade of that particular town he was passé, and was fast becoming a very bad second simply because there was no other store to occupy that distinguished position. Instead of asking him for a record which he did not have his former customer simply went to the new store in the first place. At the end of the second week the solitary clerk was pushed down the toboggan, only to be immediately snapped up by the competitor, and put to work bringing his old customers over.

Did the first dealer get wise and start to brighten up his stock and store? Not so you can notice it. He just began to raise a howl that reached to the skies about how the new dealer cut prices to get his trade, and that same howl was quickly recognized as pure and unadulterated hot air. At the end of the first month the new dealer had the field to himself, and the man who had bragged about having his trade bound hand and foot had closed his store and was dodging his creditors.

Moral.—Nothing is a sure thing and a dead one never stands a chance. It is the wise guy who hustles all the time.

TRADE IN THE MONUMENTAL CITY.

Hornless and High Priced Machines Lead in the Holiday Trade—Expected to be Much in Demand During 1910—Operatic Records Also Advance in Public Favor Though Popular Selections Sell Well—Cohen & Hughes Good Trade—What Other Houses Have to Report Anent the Situation.

(Special to The Talking Machine World.)

Baltimore, Md., Jan. 6, 1910.

The Victor Victrola, and in fact all the high grade talking machines handled by local dealers, including the Columbia Grafonola took the lead in the way of sales in this city during the holidays and, also, during the month of December. It is estimated by those engaged in the trade that there were more of these high grade instruments given as Christmas presents the past year than at any former time and they are, accordingly, thoroughly convinced that the better class of talking machines have come to stay. While there are still a great number of calls for the low priced machines, these have become less in proportion to the requests for the high priced instruments. Some dealers have been so radical as to express the opinion that the better grades of Victor, Edison and Columbia will cause the cheaper instruments to dwindle materially in demand within the next few years. The prospects are, according to the various statements made, that even a heavier demand will be made for the large machines during 1910.

Just as the big machines have captured the hearts of Baltimoreans, the high priced operatic records have advanced in popularity, and there are more demands than ever for these. There is no doubt in the minds of the dealers that the big season of grand opera to which Baltimoreans have been treated during the fall of 1909 and which will continue until late in the spring of 1910 has had a great deal to do with causing this drift to the high grade records. The Red Seal selections by Caruso have probably had the heaviest run, but the records of other well known songbirds

in the operatic field have come in for an encouraging demand.

Still it is impossible to down the latest hits in the line of popular songs. These are in demand right along, just as fast as they are put on sale. "Slide, Slide, Keep on a Sliding," etc., the selections from the musical comedies of "Bright Eyes," "Three Twins" and the like are extremely popular and can be heard in most any of the homes in which a talking machine forms a part of the amusements for the families and their friends.

Cohen & Hughes have had a particularly heavy run on their Victrolas at their temporary quarters 304 North Howard street, where they were compelled to look after the Christmas rush in consequence of the untimely fire at their handsome new store, 315 North Howard street, a week or so before the holidays. Their stock is almost at the bottom because of the good holiday trade, and they announce that things have been very encouraging since the first of the year.

Manager Grottendick, of the E. F. Droop & Sons Co., reports an excellent month with the Victor and Edison machines, while similar encouraging reports are given out by Manager Albert Bowden, of the talking machine department of Sanders & Stayman, in regard to the Columbias and Victors, and by Acting Manager Cooper at the local branch of the Columbia Phonograph Co. in regard to the Columbias. H. R. Eisenbrandt Sons also report a good trade in Victors.

Morris Silverstein, who became manager of the local branch of the Columbia Phonograph Co. about two months ago, has severed his connection with that company. He has not announced his plans for the future. Mr. Silverstein came to the local store from a similar position in Louisville, Ky.

GOOD AND BAD PUBLICITY.

The times change, and with them the press agent. When bicycles were new, he heralded Knocker's Hat a wheel. When the automobile appeared, every breakfast food and lobster-supper actress straightway took an airing behind a chauffeur. But what shall the press agent do now? The automobile is as common as a dray. The phonograph has cried "wolf!" too often, and, furthermore, it now sings so humanly that the passerby will not halt to see who is being strangled. Searchlights will draw only the little moths; and radium, though still a novelty, is as modest as it is costly. A billboard painted with it would not increase sales. Aeroplanes would do all right; but the Wrights won't be done. Yet genius has arisen in Milwaukee. For some weeks the newspapers of that city have been printing a picture of the Milwaukee public library, showing one end of this edifice defaced with a monstrous roof sign whereon are proclaimed the merits of A—Bread. "Is There Any Limit?" is the question above this disgraceful scene; and below is asked: "Will the people of Milwaukee countenance the use of public buildings for mercenary ends?"

VOICES OF OLD FRIENDS HEARD.

At the annual reunion of the natives of Bradford county, Pa., held at the Hotel Plaza Saturday night, and which was attended by men eminent in all walks of life, many novelties were introduced. One in particular was the reproduction of the voices of scores of old Bradford county friends who could not attend the meeting to honor Harry Horton, the well known broker, by means of the talking machine. It made quite a hit. As each record was played the voice of the speaker seemed to be recognized by the friends present arousing great enthusiasm.

The business of Moore Bros., Rushville and Augusta, Ill., will hereafter be conducted under the title of J. E. Moore, this gentleman having bought out his brother's interests in the business. In addition to pianos and sheet music Mr. Moore handles talking machines and supplies.

Notice of Dissolution

Notice is Hereby Given

that the partnership of Stanley & Pearsall, heretofore engaged in business as merchants at No. 541 Fifth Avenue, New York, has been dissolved by mutual consent.

The business will be continued by Mr. Silas E. Pearsall, under the name of Stanley & Pearsall, but Mr. Stanley being no longer interested, is not liable for obligations contracted hereafter.

EDISON RECORDS BY BERNHARDT.

Famous French Tragedienne at Last Consents to Record Her Voice—National Phonograph Co. Make Exclusive Contract—The Argument That Won Her Consent—Records to be in French and Represent Extracts from the Roles in Which She Has Been Most Successful—Should Prove Most Interesting.

The announcement, which appears for the first time in these columns, that the eminent French tragedienne Sarah Bernhardt, has consented to make a number of records for the National Phonograph Co., Orange, N. J., is of absorbing interest to the trade and general public: The details of the transaction are not at present available, the company's Parisian representative, who concluded the negotiation, merely cabling the news that an exclusive contract with the great actress had been secured. The company officials, however, supplemented this information by saying that the matter has been pending for some little time, the company finding it difficult to overcome Bernhardt's professional aversion to exploiting her art in this manner. Undoubtedly it was only by bringing to bear upon her the argument of what records of her voice would mean to posterity that her consent was finally secured.

The National Phonograph Co. are entitled to the thanks of not only their jobbers and dealers but of all who are interested in the talking machine business for their enterprise in attempting what would appear to be a monumental task—to induce so towering a figure in the world of art to entrust even a small sample of her talent to the phonograph—and for their perseverance when, confronted by professional reluctance, they pursued the matter to a successful conclusion. This announcement means much to the Edison trade and much more to the American public, for the proportion of the people who have been privileged to see and hear Sarah Bernhardt, the greatest actress that the world has ever produced,

is comparatively small. For that reason records of her voice, the voice whose witchcraft has cast a spell over countless thousands during the course of her long career, will be awaited with avidity.

The Bernhardt records, which, of course, will be in French, will represent extracts from the rôles in which she has scored her most emphatic successes. Although in French, which, by the way, is the language of all her plays, the records will lose nothing of interest, for those who have heard Bernhardt upon the stage will agree that her genius of expression rises supreme to mere language, the passions with which she endows her characters finding ample outlet in the extraordinary tones and inflections of her voice; so that all who hear may understand even though the tongue in which she speaks be foreign to them.

In this connection it may be added that the question of the future of the phonograph is, to a very great extent, involved. If the world's greatest actress can be induced to commit her voice to a phonograph record after so many lesser lights of the theatrical world have refused to be heard in a similar manner, is it not possible that her example may be followed by others with the result that the vast percentage of the public, who, because of location, are prevented from hearing the great theatrical stars, may be interested and a new avenue opened for the trade? The company is to be congratulated when, in taking the initiative, they aimed not at a star, but at the star of all theaterdom, the immortal Sarah Bernhardt.

COLUMBIA TRADE IN NEW ENGLAND.

(Special to The Talking Machine World.)

Providence, R. I., Jan. 10, 1910.

The stores of the Columbia Phonograph Co. throughout New England have done a splendid December business. R. H. Stevenson, the manager here, stated sales in that month were the best on record. This is true, in great measure,

of the Boston establishment, and January, February and March are counted upon as the best record months of the year. H. A. Yerkes, in charge of the wholesale department at New York headquarters, still remains manager of the entire Columbia chain in New England.

NEW VICTOR DEALERS.

Bremmer-Chalmers Co. Open Up at 194 Broadway—A Good Center.

The Bremmer-Chalmers Co. are new Victor dealers at 194 Broadway, New York, having been signed up by the New York Talking Machine Co., through V. W. Moody, who sold them the initial stock. The place was opened at the close of the week, and of their success there is not the slightest doubt, as no Victor dealer is located on Broadway between the Battery and Tenth street. Then again, going North on the same thoroughfare, not a Victor store is in evidence below 96th street. Of course, there is a "bunch" in historic talking machine row on Chambers street and on some of the side streets uptown. John I. Bremmer, of the above firm, was in the business for himself before. Mr. Moody has also fitted up recently several more new Victor dealers in New York.

THOMAS A. EDISON'S SOUTHERN VISIT.

As is his yearly custom, Thomas A. Edison, accompanied by his family and a number of chemists, experimenters and mechanics, will leave about February 1 on his annual trip to his winter home at Fort Myers, Fla., where he will spend the next two months, alternating his time between work in his laboratory and carbon fishing. It is a question as to which of the two will engross the greater part of his time as he is likely to become absorbed in either for hours at a time and without any previous notion. The yearly celebration of Mr. Edison's birthday by his immediate associates and assistants in the companies bearing his name was omitted this as last year by his personal request.

SAVE THE LIFE OF YOUR RECORDS BY USING THE PLACE AUTOMATIC RECORD BRUSH FOR EDISON PHONOGRAPHS AND VICTOR TALKING MACHINES.

PATENTED { September 25 and October 2, 1906 and September 10, 1907.

NO. 2 BRUSH IN OPERATION

No. 1

No. 2

No. 3

PRICE, 15 CENTS

CAN BE USED ON ALL PHONOGRAPHS

Removes lint and dust from record automatically. Saves Sapphire from wearing flat and prevents rasping sound. Insures a perfect playing record. It is equally as efficient when recording. It is too cheap to be without.

No. 1 fits Triumph No. 2 Standard and Home No. 3 Gem and Fireside

THE PLACE No. 10

DISK RECORD BRUSH

MANUFACTURED BY

BLACKMAN TALKING MACHINE CO.
97 CHAMBERS STREET, NEW YORK

J. NEWCOMB BLACKMAN
President

"The White Blackman"

There's a Guaranty

Guaranty

We guarantee to every purchaser of Columbia Double-Disc Records that the material used in their composition is of better quality, finer surface and more durable texture than that entering into the manufacture of disc records of any other make regardless of their cost. We further guarantee that their reproducing qualities are superior to those of any other disc records on the market and that their life is longer than that of any other disc record, under any name, at any price.

This is a *Guaranty*, you understand. It is official. We mean it, and we sign it. We print it on every Columbia Double-Disc envelope. Use it. It is valuable. Feature it. It will sell Columbia

Columbia Double-Disc Records, 65c.

COLUMBIA PHONOGRAPH CO., GE

Back of the Notes

ds to new customers, and it will hold your regular customers. longer guaranty never covered any article of merchandise that we of. The *long wear* clause alone is extraordinarily convincing to man who puts his amusement money into records. Take ad- e of it!

long wear is a quality that can be *tested* as well as guaranteed. Our guaranty is based on *tests*. We have just completed a most stive test—Columbia Double-Disc Records (regular product) t *corresponding selections* in “. . .” disc records.

The first Columbia record wore 450 times—the other 210.
The second Columbia record wore 290 times—the other 158.
The third Columbia record wore 355 times—the other 95.
The fourth Columbia record wore 640 times—the other 52.
The four Columbia records total 1,715 reproductions.
The four ——— records total 615 reproductions.
Columbia records therefore wore more than three times as long.

The tested records are played only till the first signs of wear ne apparent in the *tone*. The superior durability of Columbia le-Disc Records has always proved to be not only distinct but *shing*—and it is *increasing* every month.

Exclusive Selling Rights to Responsible Dealers

NE BUILDING, NEW YORK

BLACKMAN IN OPTIMISTIC MOOD.

Discusses Volume of Business Transacted for the Past Year—Expects That 1910 Will Be One of, if Not the Best Year in History of the Trade for the Man Who Goes After Business in the Proper Manner.

No one who has kept in touch with the business of the Blackman Talking Machine Co. is surprised at the excellent and substantial following built up by that concern, for advancement has been the slogan of the Blackman Co. since its inception. True, during the period of depression there have been times when the advance was checked somewhat, but never halted for an instant. The progress during the past year has been especially rapid and both stock and staff have been materially augmented.

The company's list of dealers has been constantly increased, for the Blackman Co.'s system of making the dealer's interests their own and aiding him in every possible way has not gone unappreciated.

In speaking of conditions of the past year and the outlook for 1910, J. Newcomb Blackman, president of the Blackman Talking Machine Co., said to *The World*: "We are well satisfied with our business of the calendar year of 1909, as it has marked a considerable expansion of our business, which has exceeded our expectations, if anything. The past year has seen many changes in the talking machine trade for the better, and the dealers are getting down to a systematic business basis of doing things and many of the half-hearted have been eliminated."

"Personally, I expect 1910 to be one of the best years, if not the best year, in the history of the trade for the man who goes after business in the proper spirit. I think the next year will see the field entirely cleared of the dealer who handles his stock in an indifferent manner and does not offer his customers the latest products of the factories in machines and records. Numbers of towns where four or five half stocked dealers now hold forth, will, without doubt, in future be supplied by a couple of dealers who will make the talking machine business their real work and give as much attention to it as they would do to any other business venture."

"I have gone into stores where several lines were handled and where the talking machine stock was neglected to a point where a thousand dollar investment was lying dead through the fact that the dealer wouldn't invest a hundred dollars or so in the new records and attachments. With new goods as an attraction the old stock could have been moved out automatically.

"If present conditions continue it will not be long before it will be found unnecessary for talking machine owners to go to the larger cities for the latest goods, for the towns will be supplied by a dealer or two in each, who will carry everything in his line and keep his stock up-to-date. How infinitely superior this will be to the present situation where there are half a dozen small dealers in a town neither of whom gets a large enough share of the trade to warrant him investing in new stock.

"The Blackman Co. have endeavored to bring the above facts home to the dealer wherever possible and excellent results have been obtained. The weak dealer has been advised to either give up or sell out and save a portion of his investment at least, while the businesslike man has been encouraged and aided wherever possible. As a result there are few Blackman dealers who are not enthusiasts and look upon talking machine selling as a substantial business proposition.

"With such conditions obtaining I certainly look upon 1910 as a year of opportunity in our chosen field."

MANAGER G. T. WILLIAMS REMEMBERED.

As a mark of their personal esteem the office force and staff of the New York Talking Machine Co., 83 Chambers street, New York, on the day preceding Christmas presented G. T. Williams, the general manager, with a very handsome stick-pin. Mr. Williams expressed his ap-

preciation in a few appropriate words. The company gave each of their employees the customary gold piece, with the compliments of the season.

FROM THE DIVORCE CENTER.

Dealers in Reno Profit by the Residence of Those Who Would Sunder the Marital Ties.

(Special to *The Talking Machine World*.)

Reno, Nev., Jan. 4, 1910.

Arthur L. Holgate, manager of the Emporium of Music, which is now located in the Masonic Temple of this town, is doing a splendid business. This concern recently took over the entire sheet music, Victor and Edison phonograph departments of the Menardi Music Co. In discussing conditions with *The World*, Mr. Holgate said:

"Although we are located a great many miles from the Metropolis, New York, we are enjoying the very best of trade and have the largest exclusive talking machine parlors, record rooms, etc., in the state of Nevada, and our business extends for a radius of one hundred miles in all directions. We are located in the large, new Masonic Temple, and naturally feel very proud of our store and of our city 'Reno,' which probably you have seen advertised a great many times as being the center of the great divorce colony. Whether that is a credit or not remains to be seen, but I assure you it has brought us hundreds of dollars, for we have supplied for instance: Mrs. Francis Kip, Mrs. Stoddard, Miss Margaret Illington, Mrs. Frost, Mrs. McKim, Mrs. Tyler. These are all rich, well known New York ladies, and have all made our store their headquarters, purchasing machines, records, music, etc., which we appreciate, I assure you.

"Wish you all success in your distribution of your *Talking Machine World*, which is certainly worth ten times the amount of its subscription to a dealer."

STEADY ADVANCE REPORTED

By the National Phonograph Co. in the Development of All Branches of Their Business—Demand for Amberolas Has Exceeded Expectations—Great Campaign of Publicity Being Instituted.

The National Phonograph Co., with the commendable optimism that is characteristic of everything they do, are looking forward to a big year in 1910, and are making preparations to increase their facilities at the factory in order to provide for the business that they feel sure is on its way.

In a recent chat with the officers of the company, they said: "Business was exceptionally good with us in December, the sales climbing to a figure that exceeded all expectations. No one particular product showed a phenomenal demand, the increase seeming to be general in all types of machines and records; which in itself is evidence of a healthy condition of business. January orders are unusually promising. The demand for the Amberola shows no sign of an abatement; on the contrary, with only enough shipped to serve as samples for its jobbers, orders for the machine are being received with every mail. It was feared that disappointment over the company's inability to supply dealers with machines in time to meet the holiday trade would discourage interest in Amberolas, for a time at least. Such fear, however, proved groundless. Instead of being discouraged jobbers and dealers are evincing the liveliest enthusiasm and urging the company to renew its efforts to provide them with Amberolas at the earliest possible moment."

Sales Manager Dolbeer keeps a stack of letters on his desk in which he takes the keenest pride. They are a collection of expressions on the Amberola from jobbers and dealers who have seen the machine and become impressed with its superior points. They are unsolicited testimonials, too; and their general tone is enough to make any manufacturer happy. The Edison trade is waiting—eagerly, anxiously—for Amberolas, and the National Phonograph Co. are straining every nerve so that they may not be kept waiting too long.

In discussing the situation a member of the company said: "It was a serious situation that the company has had to confront, but plans have been put in operation now that ought to relieve it in a very short time. When enough Amberolas have been shipped to meet the immediate demands of the trade the company promises to do some good missionary work among the public with its advertising. Preliminary steps in that direction have been already taken in both magazines and newspapers throughout the country. The market for the Amberola is practically unlimited. Of that fact the company is convinced from the attitude of its jobbers toward the machine. With the Amberola and the superior catalog of Amberol grand opera records that the company is building up, and with the well known confidence of the public in Edison products to encourage them, Edison dealers are in a most enviable position to attract a great share of the market for high class goods during the year of 1910."

Edison jobbers and dealers may rest assured on one point—the National Phonograph Co. believe with a faith that nothing can shake in the future of the talking machine business, and fortified by this faith, the company will go on to discover new products for the mutual benefit of all branches of the business, and new methods to encourage a corresponding faith and enthusiasm in its sale branches.

THE DEATH OF NANCY.

I sort o' feel—now Nancy's dead—
As if the sunny days were o'er;
The sky seems one dark thunder-head.
Her stall is dark—she's there no more
To welcome me—for Nancy's dead.
HOWARD TAYLOR MIDDLETON.

NEW ATTACHMENT PROPOSITION

Soon to be Submitted by the National Phonograph Co. to the Trade.

The National Phonograph Co., Orange, N. J., is on the verge of submitting to the trade a plan to promote the sale of combination attachments, with the view, of course, of increasing the sale of Amberol records. The company is not as yet prepared to divulge the nature of the proposition, but it is said to be exceedingly liberal from the standpoint of both trade and public. To pave the way for the successful launching of the proposition the company, on December 6, requested its dealers to immediately advise their jobbers of the number of attachments they had in stock (on forms provided for the purpose), and its jobbers to communicate the information to the general office at the earliest practical moment. It transpires that, possibly due to the holiday rush, the information has not been communicated as quickly as desired, and the company has been necessarily prevented from making a definite announcement of the proposition up to this time. Reminders have been given to its jobbers and dealers by the company, and the project will soon be under way.

The Royal Phone & Phonogram Co. are negotiating for premises in New York for a recording laboratory. Some place on Sixth avenue is in view.

TIMELY TALKS ON TIMELY TOPICS

As predicted in last month's World the shortage in the high-price, concealed horn cabinet machines during the holidays was a factor of considerable moment. While the Amberola and Grafanola lines are comparatively recent arrivals on the market, and the demand went far beyond the most sanguine anticipations of their manufacturers, the Victor Victrola cut the greatest figure and occupied the commanding position in the estimation of the trade. To be sure, no authentic data is at hand on which to base what may be termed really intelligent and informing comment, but enough has become known to establish the fact that the sale of Victrolas during the past month—possibly less—has been simply tremendous.

It is true, a large number of Victor distributors, anticipating a heavy sale, had placed orders for double and even treble the number of Victrolas purchased in the previous year for December delivery. But the supply fell far short of the demand. One widely-known New York distributor, whose business is along strictly retail lines, ordered 500 Victrolas in August in monthly shipments, with the stipulation that the entire lot should be in stock before the middle of December. About 70 per cent. of the goods were received, owing to the inability of the Victor Talking Machine Co. to do any better, as the wants of the entire country, much to the company's surprise, were finally satisfied—the entire capacity of the mammoth plant being oversold—on the allotment plan. Reports say that on the first of December the Victor Co. had on hand orders for 4,000 Victrolas.

Of his particular experience, which doubtless applies to other concerns in degree if not altogether in kind, the distributor aforementioned may be quoted as follows: "In three weeks' time we sold Victrolas to the amount of \$30,000. This proves beyond a doubt what The World said in its December issue, that the bulk of the holiday trade would be on high price goods. Of course, other types of Victor models as well as Edison machines were sold, but they did not figure alongside the Victrolas. It seemed as if our customers knew no other machine. With this rush of business you better believe we had to hustle for stock. We scoured New York, and in not a few instances actually appropriated goods just received from Camden and on the sidewalk in front of jobbers' places. It was rather a high-handed way of doing things, but, as you know, necessity knows no law, and as we paid cash on delivery the sales were advantageous both ways. There was no use blaming the Victor Co. for failure to live up to our agreement, as we understood conditions and therefore made the most of the situation. We knew, also, that, as a matter of good business policy, the Victor Co. would prefer to ship a Victrola to a little dealer out in Nebraska, for instance, than let us have it come to New York. The company knew we were a sure thing at all times, and a Victrola in a country town out West would spread its reputation and gain customers for the future, while it might be buried, so to speak, in New York, as far as new business was concerned. We recognized the silent force of this argument, though it was not expressed in so many words by the Victor Co. management. Say what you please, the managers of the Victor Talking Machine Co. are on to the job, know their business and are wise gentlemen!"

Export trade is being rapidly expanded by the manufacturing companies, especially in the Latin-American countries and Australia. The European business is covered, in the main, by licensed companies or branch houses, while the trade in Mexico, the West Indies, Central and South America are looked after direct. The trip of Walter Stevens, manager of the export department of the National Phonograph Co., Orange, N.

J., to South America, is significant. Mr. Stevens, who sails January 22, is recognized as one of the best equipped men in the foreign service, and though this is his first visit to that part of the world, it is safe to say that something will be doing on his return.

Another company has been approached by responsible capitalists in one of the South American countries to organize and equip a local manufacturing plant. The machinery, pressing outfit, etc., is to be a duplicate of the American or home factory, as well as the processes used in the recording laboratory. The proposition under careful consideration is regarded with favor by the people here, and from what can now be learned, the enterprise will go through before long. The advantages of such an undertaking are obvious from many points of view, and it will lead to an expansion of trade on so firm a basis for this particular product that competition, especially of European origin, will be reduced to a minimum, if not obliterated entirely.

Following the appearance in last month's World of a preliminary statement relative to the Piano Trade Exhibition, to be held in Richmond, Va., May 16 to 21, in connection with the annual conventions of the piano manufacturers' and the dealers' national associations, application for space was immediately made by the Columbia Phonograph Co., General, National Phonograph Co. and the Victor Talking Machine Co. As was made clear in The World's recital of the facts furnished by Chas. H. Green, the manager, the exhibition is not confined exclusively to the products of the piano factories, but is intended for the benefit of every branch of the music business, and in this category the talking machine interests are properly placed. The above companies regard the music trade as one of their most important avenues of distribution and value it accordingly. It is no more than natural and appropriate that the splendid goods of these world-known concerns should be displayed at this gathering of music people, and it goes without saying that their exhibits will be among the handsomest and most attractive of any entered. The official prospectus, floor diagrams, prices, etc., were sent out by Manager Green January 10, and the allotment of space will follow in the order in which the applications are received after that date. The exhibition is regarded as an assured success even at this early date, this judgment being based on the interest already taken in the event by leading piano manufacturers.

It is not a new subject by any means, but dealers have for several years criticised the policy of issuing multiples of records of the same selection. One of the many commentators of this idea remarked: "I cannot understand why the companies insist on making records of the same selection by several artists. Naturally dealers are supposed to stock up on everything that is within reason, but nevertheless it seems unnecessary for a half dozen artists to make records of the same selection. It seems to me that this policy is an unwise one."

Now, this criticism may sound well from the dealers' standpoint who has not given the matter close consideration, but as a matter of fact the general public attending opera or concert is always desirous of hearing different artists sing the same operas or the same songs, and as long as each singer possesses distinct qualities of voice and interpretation so long will the public desire different readings of the same number. It is only necessary to watch the programs of various concerts to note that the leading singers always list the same classical songs. It must not be overlooked that the companies making records have given this matter full consideration, and are best equipped to pass final judgment. For

instance, during the past two weeks the Metropolitan Opera House in this city has been crowded with people who have desired to hear Slezak sing Caruso's role in several operas. Now, it is all nonsense to assert that records by Slezak of the same excerpts from the operas that Caruso sings will not be in demand. They surely will, for each has a different following—a different set of admirers. This general custom of duplicating records of the same song by different artists will continue to obtain, particularly now when the talking machine has won a place as a real interpreter of musical art.

Copyright owners—music publishers in chief—are not altogether elated over the manner in which the new law is working out so far as they are concerned. The Federal act is one of those double-action things that is true of compromise measures in which a whole lot is concealed except to the analytical minds of the more or less bright men—the attorneys-at-law. These gentlemen have always a lot of so-called trouble on tap for their clients who are of an objectionable turn of mind; but so far there is nothing doing of any great moment. The talking machine people are alive to the situation and so far no remarkable emoluments are coming the way of either the music writers or their abettors, the publishers.

Joseph Hoffay, manager of the Columbia Phonograph Co.'s Mexican business until its transfer to the Compania Fonographia Mexicana, S. A., and who recently arrived in New York from the City of Mexico, sails to-day (Saturday) for a tour of the West Indies in the interest of the company. Mr. Hoffay will be away for a couple of months, when he will be transferred to the Columbia Co.'s traveling staff in South America, as a permanent attache in that part of the world. This will make three representatives of the company down there.

PLAYING THE 'CELLO BY COMPRESSED AIR.

Some Interesting Details of the Application of the Auxetophone Principle to the Violoncello—Is the Invention of Hon. C. A. Parsons, of Turbine Fame and Has Excited Much Favorable Comment Wherever Heard in Musical Circles in Europe.

In The World recently reference was made to the application of the auxetophone principle, invented by the Hon. C. A. Parsons, of turbine fame, to the violoncello, and which was formally introduced on the program of one of the concerts in London some time ago. Through the courtesy of the Scientific American we are enabled to describe and illustrate this novel attachment to musical instruments, whereby the tone of the latter, to which it is attached, is appreciably increased by means of a current of compressed air.

The auxetophone may be best described as a comb or multiple-reed valve of aluminum, which comb is hinged in such a manner that each tooth

time richer in character and greater in volume.

In the accompanying illustrations the disposition and details of the apparatus are clearly shown. A special bar is carried across the sounding box of the instrument to support the multiple-reed valve and its box. The current of compressed air enters the box at its lower end. The aluminum connecting rod between the valve and the bridge of the instrument is clearly shown.

The air is compressed in a small portable cylinder. The current first passes through a pressure gage at the player's foot, the dial of which can be instantly and easily read and followed. From the pressure gage it passes to a small air filter, which removes all suspended impurities.

Fig. 1.—'Cello with the auxetophone attached which delivers the sound waves to the trumpet. On the floor is a pedal for modulating the air pressure, a pressure gage, and air filter.

Fig. 2.—View of the instrument, showing mounting of the valve mechanism and aluminum connection between the bridge of the instrument and the valve.

Fig. 3.—View of the instrument looking on the delivery side of the valve.

Fig. 4.—The several component parts of the auxetophone.

of the comb can vibrate at a variable distance from a corresponding slot in a little box to which compressed air is supplied at about five pounds pressure. The farther away the teeth are from the slots the greater is the flow of air, and vice versa. The flow of air is controlled by a valve, and when caused to vibrate the air transmits corresponding sound waves into the trumpet.

When the auxetophone is applied to the 'cello or any other stringed instrument the valve is connected by a rod of aluminum with the bridge of the instrument. Thus the valve is caused to vibrate in accord with the characteristic tone of the instrument. The sound issuing from the trumpet, though in many respects identical with that of the instrument itself, is at the same

Then it passes to the lower end of the valve box mounted on the instrument. Between the pressure gage and the filter is a small pedal, by means of which the player can modulate the flow of the compressed air by means of his foot.

The horn is mounted on a stand beside the instrument, and a flexible pipe coupling connects the valve box of the instrument with the horn. The valve mechanism support is so made that it can be attached or detached from the instrument in a few moments.

At the concert previously mentioned the possibilities of the invention were very strikingly evidenced. The tone of the instrument was appreciably fuller, richer and stronger when the auxetophone was attached, the harmonics were

clearer and the high-pitched notes were more clearly defined than is possible without the attachment. In the fortissimo passages the tones had a solid, well-rounded ring of great volume, while in pianissimo the expression of the artist was well produced with a softness accompanied by distinct clearness of the tones.

ECHO ALBUM A BIG SELLER.

The Echo Album, which is advertised in another page of this issue, possesses so many features of interest to dealers and purchasers that it at once appeals to their consideration. No better means of protecting expensive records exists, and its construction and finish are such as to insure quick sales and a good profit for the dealers handling it. By means of these albums particular people using talking machines are able to satisfy their wants.

THE UDELL SALESMEN.

The Udell Works, Indianapolis, Ind., announce that Daniel G. Williams and Frank J. Billings, who have sold their goods jointly in the past, will in future divide the field. Mr. Williams will look after the music and talking machine trade and handle woodenware and ladders, while Mr. Billings will look after the furniture line, including desks, music cabinets, book-cases, etc.

MAY HANDLE TALKING MACHINES.

Reports from Boston, Mass., state that the Victor selling force are looking after the possibility of having the Hallet & Davis Piano Co. take on the Victor line for their retail stores. If the deal goes through it will be one of some magnitude, as the H. & D. Co. maintain a chain of establishments second to no piano manufacturers in the country in point of numbers and desirable and favorable locations from talking machine considerations.

DR. O'NEIL RETURNS FROM ORIENT.

(Special to The Talking Machine World.)

Philadelphia, Pa., Jan. 3, 1910.

"Doc" E. F. O'Neill, who has been in the Orient for several years in the interest of the Victor Talking Machine Co., returned recently, and will stay for a month or so. The "doctor" has had a great experience in the Far East, and while visiting his friends in Boston, Mass., his home, many tales of his travelings have been told. "Doc" O'Neill, as is well known, is a graduated surgeon in dentistry, but has a predilection for the talking machine business, in which he has been a great success, and his experiences in foreign lands have been a source of interest to his many friends in the trade. He will go back to the Far East later.

VICTROLA XII WITH NEW CABINET.

The Victor Co. are now shipping to Victor distributors their Victrola XII, with newly designed and more elaborate cabinet, which will greatly increase the sale of this instrument.

FIFTEEN NEW LAUDER RECORDS.

The Victor Co. are issuing fifteen new Harry Lauder records, made in their own laboratory by their new and improved process. They are far superior to the ones now listed, and will have a big market. This company announce that Lauder has entered into a new and exclusive contract with them.

Since removing the C. G. Conn Co. musical instrument agency from 46 West 28th street ("Tin Pan Alley") to the more aristocratic location at 48 West 34th street, in the new music district of New York, Manager Boyer has added the Edison line as a dealer.

As officially announced, Max Mandel, proprietor of the Guarantee Phonograph Co., Brooklyn, N. Y., has been reinstated as an Edison dealer by the National Phonograph Co.

TRADE IN THE QUAKER CITY.

Best Holiday Business Since 1906 Say Talking Machine Men—Stock Received on Time When Rush Orders Were Placed—Likely That More Piano Firms Will Add a Talking Machine Department Soon—Good Columbia Co. Report—L. Buehn & Bros.'s Fine January Trade—Filled All Holiday Orders—Other News of the Month.

(Special to The Talking Machine World.)

Philadelphia, Pa., Jan. 10, 1910.

The old year's business of the dealers in talking machines in Philadelphia was excellent is the report that is received from all sides. There is a unanimity of opinion that the holiday trade was the largest that the talking machine men ever had, with the possible exception of 1906, which is still credited as being the banner year. And not only the holiday business, but the year, as a whole, summed up very well with every past year, with the exception of 1906.

The fear expressed previous to the rush, that the factories would be unable to supply the demand seems to have been groundless, for even the most sceptical assure me that they missed but very few sales. The machines seemed to come in just in time in every instance, which speaks well for the conditions at the various factories. They seem to be such that they are able to meet all emergencies.

Last summer the manufacturers requested the dealers to get in their orders early for as much stock as they desired, but they were skeptical as to just what they would need, and did not order bounteously. So, naturally, when the rush came both factories and dealers were short of goods, and it was feared trouble would follow. The manufacturers came nobly to the rescue, however, and this week I have heard nothing but praise as to the way they filled orders, and this is true of the Victor and Edison and Columbia companies alike.

The success of the talking machine business in Philadelphia during the holiday season has set a number of the piano firms along Chestnut street thinking, and there is a likelihood that at least several of them will be in the talking machine business before another year has rolled around. As one of the jobbers said this week: "I think the piano men are chumps that they do not add talking machines to their stock. They require so little space to carry, and every one of the big Chestnut street firms have ample space to accommodate such a stock. The returns on talking machines come in faster and more sure than on pianos, and in much larger volume in comparison with the outlay."

Rumor has it that the Cunningham Co. will add talking machines in a very short time, and they will be the third of the piano dealers in Piano Row to handle the little instruments, now such great and steady sellers.

C. J. Heppé & Sou and the Bellak Brothers both report a very good holiday business on talking machines. The former firm is willing to admit that the volume of business in that line was very much larger than in pianos; that is in the growth and profit of the business. The Heppés practically cleaned themselves out of the largest stock they have ever had during the holidays, and while they have been able to replenish in the past week, to a great extent, they are still short on the small machines.

The Columbia Phonograph Co. report that their Christmas trade showed up great. T. K. Henderson, the manager of the department, has been home ill for about a week, but not seriously so, and expects to be back again at his desk in a few days. They believe that the current year is going to be a very good one. They are hearing nothing but the most encouraging reports from all sides, particularly from their traveling men up the State. They have been adding new dealers to their list right along, but particularly so within the past few weeks. They are well pleased with the rapidly increased demand for the four-minute records and the four-minute attachment. They believe that this new

four-minute scheme will more than double their business during the current year. They have been adding a great many artistic records to their January list. The records of John McCormick, the new Irish tenor, are particularly good sellers, as are also the records of Francisco Vignas, the new Spanish tenor. The Pimazzoni records are some of the finest baritone records the Columbia Phonograph Co. have ever had. They have their men all on the road at present, and during the spring they will make a vigorous campaign to locate dealers in every town of any importance.

Louis Buehn & Brother report that their January business was almost the equal of the largest month the firm ever had. And as to the prospects for the coming year, Louis Buehn says: "The present indications, as they look to me, are that we are going to have a business that will equal in volume our 1906 year, which was our largest year, and I am hoping for an increase that will possibly exceed that year. My reason for thinking that is this: We have sold an immense number of machines the past two months and that always presages a big talking machine business."

The firm managed to fill all holiday orders, and with very little delay. "It was a case, in many instances, of filling orders from hand to mouth, but we managed to get through all right," says Mr. Buehn, "even although it was close figuring at times." The salesmen of the firm have already taken to the road. R. J. Dungan is at present up through Pennsylvania, and is doing exceptionally well. He has already sent in several very good sized orders. Frank Reinick is covering the city and finds that the dealers, one and all, are very much encouraged, and are much more willing to place orders than they were at this time last season. The Edison Cygnet horn has taken with the public exceedingly well. In fact, Mr. Buehn believes it will eventually replace the straight horn entirely. As to the Edison Amberola, of which the Buehn firm had quite a number, they sold them as fast as they were received. The firm expect to re-decorate their sound proof rooms and have already begun work on two of them.

The Penn Talking Machine Co., like the other firms, report that their holiday business was the best they have ever had, with the one exception of 1906. It was considerably better than they had calculated. "For the present year," says a member of the firm, "our prospects are excellent. Everything points to a very big

year. Already we have sold a number of machines in the new year, and our record trade has been little less than marvelous, much of it coming from holiday purchasers of the talking machines."

Both Mr. Clark and Mr. Smullen, of the Penn firm, have already taken to the road, and have already been heard from with orders. They report that all the dealers they have already called on report most encouraging prospects ahead for the new year. The firm are pretty well sold up, but they were furnished with sufficient stock from the factories so that they lost no sales.

H. A. Weymann & Sons report that they came near having a record with their holiday trade. Two days before Christmas they sold 31 Victrolas and the last day they sent out eleven. They had been practically cleaned up on Victrolas, but the day before Christmas they were able to get in a dozen, which helped them out, yet they feel that they would have been able to sell yearly that many more of them if they could have had them. Business the first week in January was considerably more than normal. The Edison Amberola records are selling exceptionally well and they could have disposed of several more Amberola machines if they could have gotten them. Norbet Whitley will start through Pennsylvania this week, and on Tuesday or Wednesday W. H. Doerr will start through the southern trade of the firm. They will make a number of changes in the department early in the new year. They will revise the racks and will place every record in a heavy cardboard envelope separately, to insure the dealers that they will receive the records they order in first class condition in every way.

If every business in Philadelphia looked as bright for those engaged in it as does the talking machine business at the dawn of 1910, what a bright and cheerful prospect ahead there would be for the business man.

GEO. W. LYLE SAYS "NEVER BETTER"

When Asked Regarding Business—Working Hard to Catch Up on Goods.

When asked what he thought of the outlook, Geo. W. Lyle, general manager of the Columbia Phonograph Co., General, said: "Never better. We suffered from a shortage of goods, but we will catch up before long, and 1910 will make a new high record for Columbia products. Personally, I am feeling fine, and business conditions prospectively warrant this pleasant frame of mind."

THE THREE COLU

The Peerless Grafonola "Regent," \$200

It is clear that Columbia dealers are going to coin money this winter on the Grafonola line. One thing you can count on: As soon as we have persuaded any man who has the purchase of a hornless machine in mind to step inside of your store long enough to see the Grafonola "De Luxe" and make comparisons, *it's all over but the name and address.*

Between the Grafonola "De Luxe" and the Grafonola "Regent," the Columbia line is this minute more interesting to the active dealer than all other musical lines put together. *We mean that!* The Grafonola "Regent" will sell not only to those who have considered the possibility of owning a hornless talking machine, but to many people who never gave the matter any serious thought before. This is prediction, mostly, we'll admit—but we are in a position to see what is happening, and the Grafonola "Regent" *alone* is sure to be sufficient reason to a good many dealers for securing the exclusive selling rights of the Columbia line—and the proof will follow pretty closely on the prediction. Mark that down, and we will remind you of it again a little later.

You may remember—that's what we told you along in October. It's "a little later" now. The proof has arrived. The prediction has come true.

The Magnific

Columbia P
Tribune

Exclusive Selling Ri

COLUMBIA GRAFONOLAS

Grafonola "De Luxe," \$200

The Beautiful Grafonola "Elite," \$100

And since then, the advent of the Grafonola "Elite" has strengthened the whole program unmistakably. It's "the greatest hundred dollars' worth of music in the world." It never kills the sale of one of the \$200 instruments according to our observations, but reaches out and takes strong hold on an entirely new class of trade—a trade that you have never reached before. A good part of the profit in every Grafonola "Elite" sale you make must be counted as found money, on that account.

Unless you believe it is necessary for a talking machine dealer to run his business as a hand-tied employee of the manufacturers instead of an independent factor in the business, now is the best time in the world to give some mighty serious consideration to the business that is waiting all around you—waiting to be reached by means of these three splendid instruments.

Columbia Graph Co., Gen'l

ing, New York

anted to Responsible Dealers

UNIVERSAL CO. IN PHILADELPHIA.

Move Entire Plant from Newark, N. J.—Removal a Matter of Business Convenience—Located in Heart of Quaker City Business District—Recording Laboratory Moved from New York to Camden, N. J.—H. J. Hagen Also Goes—An Important Move.

During the month the plant of the Universal Talking Machine Mfg. Co. have been in the process of removal from Camp and Mulberry streets, Newark, N. J., to Fourth and Race streets, Philadelphia, Pa. The office will be the last to be transferred, but it is expected that about February 1, possibly a week before, the change will have been effected. General Manager Macnabb and his entire office staff and factory force will go along. The removal is a matter of business convenience, as it was found that even if Newark was only about fifteen minutes from New York, Zonophone jobbers and dealers were averse to making the journey. This unfortunate fact was ascertained but a short time after the general offices of the company were taken from the metropolis to Newark, hence this shift restores the equilibrium of affairs, trade visitors to Philadelphia finding it no trouble to call at a plant located in the heart of the business district of the city. The new factory will be one of the most complete in the country, and no change whatever follows the removal to the City of Brotherly Love.

The recording laboratory of the company, at 256 West 23d street, New York, under the management of Henry J. Hagen, will be discontinued and goes to Camden, N. J., the manager accompanying the removal of his headquarters, the scene of not a few brilliant triumphs in the making of records. Messrs. Macnabb and Hagen have many friends in New York, and their departure is regarded in the light of a personal loss.

CHANGES IN NATIONAL STAFF.

J. W. Scott, familiarly known by the affectionate sobriquet of "Scotty" among his associates of the trade, has been promoted to the position of special traveling representative of the National Phonograph Co. The duties of the position, which has only recently been created, will call Mr. Scott from his former territory, which comprised Massachusetts, Rhode Island, Connecticut and Maine, to special assignment

throughout the country. The first assignment was Birmingham, Mobile and other large cities of the South, where Mr. Scott is at the present time. The appointment comes as a deserved promotion in recognition of the splendid work that Mr. Scott has done for the National Co. since his connection. His successor has not yet been announced.

Other changes in territorial assignment of the National Co.'s traveling staff are noted as follows: J. H. Allgaier will hereafter travel the southern half of Illinois in addition to Missouri. J. H. Gill will call on the trade in central and western New York instead of California, Arizona and New Mexico. F. L. Hough travels North and South Dakota in addition to Minnesota. A. H. Kloehr will report on Kansas City, Mo., in addition to the State of Kansas. F. H. Stewart, formerly traveling Louisiana and Mississippi, has been transferred to the Edison Mfg. Co.'s kinetograph department.

DAVEGA CO.'S FINE REPORT.

Business for December Made a New High Mark with This House—All Departments Made Good Showing.

With the S. B. Davega Co., 126 University place, New York, business in the month of December made a new high mark, and during the holidays, notwithstanding their large and varied stock, they were occasionally crowded to fill orders. However, an unexpected shipment from the factory came in the nick of time to satisfy the most clamorous, and so the company pulled through with flying colors, and none of their dealers failed to get what they wanted. The S. B. Davega Co. make a point to fill every dealer's orders, not partially, but completely, and it is this reputation, combined with the rapid sellers which they specialize, that has contributed largely to the esteem in which the firm are held by the trade. Their interesting announcement elsewhere is well worth reading carefully.

MACDONALD ENTERTAINED.

Thomas H. Macdonald was the guest of honor at a dinner given by President Easton, of the American Graphophone Co., at his home at Arcola, N. J., Monday, December 13. The chief officers of the organization were invited to celebrate Mr. Macdonald's twenty years with the company and the progress of the art in that time. It was a most enjoyable time.

EDISON GRAND OPERA CATALOG.

The First Supplement Comprises Twenty-Eight Records, Ten by the Distinguished Tenor, Slezak, the New Artist, Are of International Repute—Exclusive Contracts Being Made with Noted Stars—New Catalog One to be Proud of.

At the time that the National Phonograph Co. first announced the Amberola to the jobbers and dealers the promise was made that it would be re-enforced by a catalog of grand opera Amberol records of special merit. That was on December 1 last, and subsequent additions to the catalog prove that the promise is being religiously kept. The first supplement comprised twenty-eight records, ten of them by the incomparable Slezak, whose debut on the stage of the Metropolitan Opera House constitutes a page in the history of that famous temple of art. Slezak is a young man, in physical stature a giant, hardly as yet at the zenith of his vocal powers, and with many years of professional usefulness before him. He has been retained to sing exclusively for Edison records for a number of years. His contract with the National Co. secures them the exclusive right to his entire French and Italian repertory, as well as to any selections he may use on his American tours.

Three more records on this list are by Riccardo Martin, the first American operatic tenor to receive international acclaim, and three more by the marvelous Spanish tenor, Constantino. Mme. Blanche Arral, the gifted coloratura soprano, who, after winning the enthusiastic commendations of Metropolitan press and critics, proceeded on a triumphal tour of the country, contributes four more, as do Adelina Agostinelli, the Milanese soprano, at present singing in Italy, but, who from April 1 to September 1 will be leading soprano of the Colon Theater, Buenos Ayres. The remaining numbers on the list are the offerings of singers who are as yet little known on this side of the water, but who, in the musical circles of the world (and particularly the French capital), are recognized as artists of the highest caliber, M. Duclos, tenor, Louis Nucelly, baritone, and Gaston Dubois, tenor. As regards variety of choice and musical excellence, this list of records represents many of the best and most popular offerings of the world's greatest composers—arias so well known that every lover of the higher grade of music has them on the tip of his tongue.

The catalog will be supplemented by five more records in the March list, and the same quota will be added to it monthly thereafter. At this rate, and with artists of such superior talent and reputation, contributing to it the choicest numbers of their repertories, it will be seen that the Edison four-minute catalog will very soon be of a character to commend it to the music lover.

With characteristic thoughtfulness for the interests of their dealers the company are depleting their two-minute grand opera catalogs to make room for these new Amberol records, twenty-eight of the former having been cut out on November 1. These records may be returned to the factory for credit under the company's liberal continuous-exchange proposition. Recognizing the fact that the musical public demands a choice of artists as well as of selections, the National Co. has for some time been quietly preparing their plans to equip their dealers in this respect, and have now under exclusive contract some of the best talent that the operatic circles of the old and new world offer. Included in the list of singers whose records will shortly grace the Edison catalog, are the names of such famous artists as Mesdames Marguerite Sylvia, Maria Labia and Maria Galvany, and M. M. Ernesto Caronna and Walter Soomer, a brief retrospect of whose careers would not be inappropriate as giving a faint idea of what the National Co. have accomplished.

Mme. Marguerita Sylva, the great American prima donna, is known all over the United States by her former light opera successes. Not

Many of the most prominent Edison Jobbers and Dealers are not only taking advantage of the handsome profits which the handling of

The Edison Business Phonograph

affords, but they are *using* the Edison Business Phonograph with great success for dictation and transcription of their own correspondence.

The Edison Business Phonograph not only saves 50 per cent of actual dictating time and nearly 50 per cent of the typist's actual transcribing time, but it saves all the time in which she is ordinarily occupied in taking dictation. This economy of time results in a reduction in the cost of correspondence, from about eight cents a letter to from two-and-one-half to four cents a letter.

The Edison Business Phonograph is already being used to-day in offices large and small, in all branches of industry throughout the country.

It is only a matter of time before all business correspondence will be carried on through this rapid, direct method.

Get in while the field is young, take your share of the profits and build up your end of this growing industry.

Write us today for full information.

Edison Business Phonograph Company, 207 Lakeside Avenue, Orange, N. J.

content to shine in comic opera, however, Mme. Sylva went to Paris, where, after a few years of careful training by some of the best masters, she successfully appeared in grand opera. She speedily became a favorite at the Opera Comique, whence came to us so many of our great singers in the past. Her appearance at the Manhattan Opera House (Hammerstein's) at once firmly established her in the hearts of her countrymen, who will soon be able to hear her magnificent voice on the Edison phonograph in records which are all excellent examples of good recording, and which will carry her voice into thousands of homes throughout this and other lands.

Maria Labia, of noble Venetian family, was eulogized so frequently by the press on the occasion of her American engagement at the Manhattan Opera House last season that further remarks are unnecessary, for by her charming personality and artistic work, she won the admiration and friendship of all true music lovers. Her voice is a fresh, well-trained lyric soprano, and she always brings a high degree of intelligence into her work. At present Mme. Labia is appearing with great success at Berlin.

Maria Galvany is one of the best known coloratura sopranos of the present day. She is widely known in all the Latin countries and especially in Spain, where she has been a great favorite. She is one of the very few who have thoroughly mastered the art of singing, so much beloved by our present and older theater-goers, and which has brought lasting fame to Patti, Melba and Sembrich.

Ernesto Caronna, baritone, although still a young man, has had a very successful career in Italy, France, Belgium, and in large South American opera houses. Wherever he has appeared the critics were loud in their praises of his fresh, pleasing voice, and have proclaimed him one of the best baritones of the present day. He has recently been very successful in France in the opera "Iris."

Walter Soomer made his greatest success in Leipzig until he came to join the Metropolitan forces last year, where he at once established himself as a conscientious and fine artist. His reappearance within the next few weeks is eagerly awaited.

These are the names and careers of only a few of the noted artists who will hereafter sing exclusively for the National Phonograph Co., and whose records will shortly be in the hands of Edison dealers. The National Co. states: "There are other artists of equal prominence under contract whose names will be announced in the not distant future. The company are sparing no expense in building up their catalog, and in the work of securing singers and deciding upon selections they have the assistance and advice of a well-known grand opera

critic. Moreover, the greatest care is being exercised by the company's experts in the recording of these selections, so that there is no fear of any defect in that respect. With these new records being placed upon the market at the extremely low price of \$1.00 each it will be seen that the National Co., besides giving their jobbers and dealers a grand opera catalog that will be a worthy companion of the Amemberola, are also placing them in a most enviable position to approach the grand opera lover.

BOSTON DEALERS PLEASED

With the Manner in Which 1909 Closed and the Present Year Opened—Holiday Trade Never Better—Oliver Ditson Co. Report Phenomenal Victor Business—Commend E. T. M. Co. Employees for Hard Work—The Columbia Co.'s Window Display.

(Special to The Talking Machine World.)

Boston, Mass., Jan. 11, 1910.

The end of the year 1909 and the first weeks of 1910 have proven a great surprise to the dealers in talking machines here in Boston, for the reason that the business has kept up much better and longer than ever before. All the dealers, both wholesale and retail, expected that right after the holidays there would be the usual slump, but up to the 10th of January no slump has made its appearance, and everything seems to be bright for at least a few weeks more of really brisk business.

The holiday trade was never better. More high-grade, costly machines were sold than was expected, and the advance in the business of the hornless machines was phenomenal. In fact, they were in much greater demand than the machines with horns, even though most expensive. The big improvement in the trade on the costly, hornless machines has convinced the dealers that it really pays them to put in a good-sized stock of high-priced machines, as the artistic taste of the general public is much more developed than it was a few years ago, and they have come to realize that the talking machine is no longer a toy but a really artistic musical creation.

The Oliver Ditson Co., who handle the Victor exclusively, report a phenomenal business in this line during the month of December. Mr. Bobzin, the general manager of the store, is not averse to having the figures of this department known. From his books this week he figured out that the entire talking machine business on Victors for the month of December was \$31,811.50, and the retail portion of that amounted to \$14,000. This for one month is not at all bad. "A little better than \$2,500, as it was four years ago," says Mr. Bobzin. The entire year's business was heavier than that of any previous year, and greater things are predicted for 1910.

December also figures out larger than any other month in the history of the Eastern Talking Machine Co. A little slacking up has been noticed here the past few days, but it is a welcome relief after the strenuous days around Christmas. It is only a temporary relief, it is believed, as business is expected to pick right up again after the cold snap is ended.

The E. T. M. Co. Associates, at their last regular meeting, were highly complimented by the management for their hard and efficient work during the holidays. Chairman Fitzgerald of the concert committee was given a hearty vote of thanks for his unusually good work at the last concert, and the same courtesy was extended to the others of his committee. Mr. S. H. Brown of the sales force was made chairman of the committee for the next concert.

The Columbia Phonograph Co. are making a remarkably effective window display this month, running largely to the hornless instruments, and featuring their Library Table style which is having a great vogue here. Their Christmas display was very attractive. The retail business is big and the wholesale business is bigger, so Manager Erisman declares that he is perfectly satisfied. He looks for a big business for the balance of this month.

Manager Sylvester, of the C. E. Osgood Co.'s department, says that, while the holiday business was much greater than he had anticipated, he can hardly account for the constant and persistent business that has continued since then. He says that he had hoped to have a let-up after Christmas, but that he is working even harder than ever now to keep up with the demand for prompt service. The latter point is one that it is well to dwell upon for a little in connection with this company, for it has attained the reputation in town of being about the quickest respond to an order of any firm in the city.

Manager White, of the new Victor department at the Henry F. Miller & Son store, said this week: "We have taken more money out of our Victor department than we have put into it, and we are more than pleased at the results attained. We feel that the department is in a section of the city where the very best class of people will patronize it as soon as it becomes known to them. We look for a most satisfactory year." Mr. White was formerly associated with M. Steinert & Sons as manager of their Boylston street talking machine department.

The Iver Johnson Co. reports that their talking machine business last year, especially during the Christmas holidays, was far greater in volume than at any other similar period in its history.

The talking machine business in the large department stores is booming especially at Houghton & Dutton's, where Mr. Howes has charge of the department. Manager Holmes, at the Jordan, Marsh Co. department, is greatly pleased with the new quarters assigned him and the additional space afforded. He reports a large increase in the volume of business.

BUSINESS FOR SALE

Edison Jobbing proposition in a city of 400,000. Good field for live man. Am in poor health and wish to retire from business. Capital required about \$3,000. For particulars, address E. U., care Talking Machine World, 1 Madison avenue, New York, N. Y.

OPPORTUNITY KNOCKS!

Here's a chance to get a good, snappy, thoroughly-posted retail manager or both. Has both selling and executive ability. Has made good and can produce the proofs. Address G. M., Room 806, No. 156 Wabash avenue, Chicago.

SALESMEN WANTED.

Salesmen wanted to carry our cylinder and disc cabinets on commission for the Middle West and West. Address E. Schloss & Co., Foot of East Grand street, New York City.

MR. JOBBER!

Have you a business with a future? Could a competent wholesale and retail man make himself worth a percentage of the profits? No objection to traveling a portion of the time. Make me a proposition and look up my references. Address "EXPERIENCE," care Talking Machine World, 1 Madison Ave., New York.

\$ WANTED FOR SPOT CASH \$

Will pay spot cash for large lots of Talking Machines, records and supplies of any description. Must be very cheap.

Send full particulars to

BUYER

VICTOR CO.'S GREAT BUSINESS.

December the Largest of Any Month in the Point of Sales—Enormous Record Business—Louis F. Geissler's Remarks on the Situation.

One of the best proofs that prosperity is becoming broadly diffused throughout the country, and that we are approaching stable conditions, is to be found in the tremendous business done by the Victor Talking Machine Co., of Camden, N. J., during the year which so recently closed. The Victor is an instrument that goes into the homes of the wealthy and the working classes alike, and the demand for these creations tells its own story.

Louis F. Geissler, general manager of the Victor Talking Machine Co., in discussing conditions said:

"I do not remember a year which enters so auspiciously as does 1910. At our factory we are exceedingly gratified at the high percentage of trade that we were blessed with during the panic, and at the enormous recovery that the summer months of 1909 brought to us, and at the record breaking fall and winter months that we have had.

"The month of December was the largest of any month in the Victor Talking Machine Co.'s business in the point of sales. Our factory will be unable to complete the orders upon which it is now working, if it does not receive an order for a single machine, in three months' time.

"We worked up on January 1 our record capacity 50 per cent. in order to take care of the large record orders which always follow after the holidays.

"Our record business has been exceedingly satisfactory for the past three or four months, showing a steady growth each month, and I regret to report the prospect of a record famine within six weeks. We are doing our utmost to prepare for the trade, but it takes a long time to train people to whom we can entrust even the smallest detail of the manufacture of Victor quality of records."

"TALKER" A CAMPAIGN FACTOR.

Being Used in the General Election in Great Britain with Good Results.

In the general election, which is now under way in Great Britain and Ireland, and in which the future of the House of Lords so largely figures, the talking machine is being used to a very large extent in promulgating the speeches of Prime Minister Asquith, Lloyd George—the strenuous fighter for the tax on idle land instead of foods—Winston Churchill, on the liberal side, and by a number of other prominent representatives of the Conservative party. In the towns where the voters have little chance to hear these gentlemen in person, the records of their speeches are being splendidly utilized in the campaign of political education.

In Belfast T. Edens Osborne has been bringing these records into quite some prominence, ergo his establishment and his progressive methods. The leading papers of that city have had representatives call upon him and listen not only to the speeches of the great celebrities of the Liberal Party, but also comment on Mr. Osborne's versatility both as a merchant and speaker. In all the prominent lectures and important affairs held in Belfast and locality Mr. Osborne makes it a point to introduce the gramophone with good results for those who attend, and naturally for himself in a business way.

CHINESE ACTOR KILLED.

Chinese Actor Who Recently Made a Number of Records for the National Phonograph Co. Murdered in New York's Chinatown.

Ah Hoong, a Chinese comedian who recently assisted the National Phonograph Co. in making forty-eight Chinese records, fell a victim on December 29 to the war of the Tongs that is at

present raging in New York's Chinatown. Hoong, who had deserted the Say Sing, or "Four Brothers," in San Francisco and joined the On Leong Tong, had been commanded under threat of death to desert the latter organization. This he refused to do and the threat was quickly put into execution despite the extraordinary police precautions. Hoong, who was thirty-five years old, was one of the best known Chinese actors in the country, and a special favorite in San Francisco. He made his appearance in New York about five months ago in the Chinese theater in Doyer street in "Daughters of the Thousands Dragons of the Sun." The play, which has since been stopped by the closing of the theater, would have been finished in only six more months.

MUSIC MASTER WOODEN HORN.

McMenimen's Successful Trip to the West on Behalf of This Product—Enthusiastic Over Conditions.

H. N. McMenimen, manager of Sheip & Vandegrift, manufacturers of the "Music Master" wooden horn, Philadelphia, Pa., after returning from a trip to the Middle West, said: "Business west of Chicago done my heart good—nothing like it East. Lyon & Healy, Harger & Blish and other concerns have been doing a great trade, and I predict that before the close of 1910 business in the talking machine line will be a tremendous surprise in point of volume—best in the history of the country. I feel like a different man since meeting the western trade. The farmers out there are buying liberally and you will see the people in the East loosen up also. They have the money, but they have been holding fast

to it. We are turning out 175 horns daily and disposing of the entire output."

WANAMAKER ENTERPRISE.

"The Opera News," appearing intermittently during the season, and published by John Wanamaker, New York and Philadelphia, with L. J. Gerson, manager of the talking machine departments in the mammoth establishments, editor, has for its mission the exploitation of Victor records in connection with the performance of the different operas during the season. The cast and story of the opera is given, followed by a list of the record selections, accompanied by the catalog number. It is a clever idea, and Editor Gerson is not only fostering the growth of Victor record sales, but with his special Victrola numbers on the daily concert programs of each of the Wanamaker stores, in connection with the regular orchestra, affords concrete means for the cultivation and appreciation of the best in music.

The Victor department of the Wanamaker store, New York, secured a great amount of publicity through the lectures of H. E. Krehbiel, for thirty years musical critic of the New York Tribune. Mr. Krehbiel has exemplified his musical talks on grand opera in the auditorium by the use of the Victrola, grand organ and piano, as well as by Marie Stoddart, soprano, and Grace Hornby, contralto. The Universal Glee, Banjo and Mandolin Combined Clubs have been engaged by L. Jay Gerson, manager of the departments, for the concert in the auditorium February 5, at 2.30 p. m. This club constitutes fifty men, and, of course, records will figure in the excellent program.

COLUMBIA HONORS AT THE ALASKA-YUKON-PACIFIC EXPOSITION.

In connection with the highest grand award secured by the Columbia Phonograph Co. at the Alaska-Yukon-Pacific Exposition, the chairman of the Jury of Awards has sent the following letter

HENRY E. DOSCH,
DIRECTOR

SEATTLE 1909

August 27, 1909.

Col. Henry E. Dosch,

Director of Exhibits, A.-Y.-P. Exposition,

Seattle, Wash.

Sir:—

The Columbia Phonograph Co. are justly entitled to the Grand Highest Award for Disc Talking Machines and Records and also the highest praise for the superlative merit of their product.

Special mention should be made of the marvelous reproducer used on this make, its Automatic Needle Clamp, and the remarkable superiority and smoothness of its motor.

It is the unanimous opinion of your Jury that this firm has attained the highest standard in the manufacture of Disc Machines and Records.

Respectfully submitted,

Chairman,
International Jury of Awards.

TWIN CITY GLEANINGS.

Recent Victor Emissaries—Minnesota Phonograph Co.'s New Catalog—Holiday Demands Cleaned Out Dyer & Bro.—Columbia Co.'s Great Christmas Trade.

(Special to The Talking Machine World.)
Minneapolis and St. Paul, Jan. 8, 1910.

Three big men from the sales department of the Victor Talking Machine Co. were in the Twin Cities this week to get acquainted with the dealers who are giving them such excellent business, and incidentally to arrange for still bigger trade in the Northwest. The Victor emissaries are Messrs. Goldsmith, Lowy and Baish, almost direct from Camden, N. J. They declared themselves to be highly satisfied with the run on their goods in the Twin Cities.

The Minnesota Phonograph Co., general distributors for talking machines in the Northwest, have issued a general catalog, in which the Victor goods have a prominent place. It has been widely distributed and is bringing in the business. Laurence H. Lucker, manager of the house, says that trade has been up to all anticipations, and every feature—machines, records, collections—leave no room for criticism.

"The holiday trade has ruined our stock," is the complaint of David M. Dyer, manager of the small goods department of W. J. Dyer & Bro., "but we will try to bear up. Our sales of talking machines have been extremely satisfactory. The Victor and Edison machines, of course, are the favorites, at least with our customers. There has been a fair trade in Zonophones, particularly with their line of records, which is most popular.

According to J. H. Wheeler, manager for the Twin City headquarters of the Columbia Phonograph Co., the holiday trade was the greatest in the nine years the branch has been established. "The only trouble is that we can't get the goods fast enough to meet the demand. We are all out of the four-minute records, which are extremely popular. We are more than a month behind in the delivery of orders for Grafonolas, simply because we have been unable to get them from the factory."

OUR FOREIGN CUSTOMERS.

Amount and Value of Talking Machines Shipped Abroad from the Port of New York.

(Special to The Talking Machine World.)
Washington, D. C., Jan. 10, 1910.

Manufacturers and dealers in talking machines will doubtless be interested in the figures showing the exports of talking machines for the past four weeks from the port of New York:

DECEMBER 15.

Belfast, 25 pkgs., \$168; Berlin, 62 pkgs., \$1,425; Buenos Ayres, 9 pkgs., \$162; 38 pkgs., \$4,785; Callao, 7 pkgs., \$230; Cardiff, 75 pkgs., \$487; 25 pkgs., \$162; Colon, 3 pkgs., \$222; Hamburg, 2 pkgs., \$272; Havre, 11 pkgs., \$251; Iquique, 5 pkgs., \$340; Leicester, 20 pkgs., \$130; Limon, 3 pkgs., \$500; London, 551 pkgs., \$8,949; 18 pkgs., \$1,500; Melbourne, 23 pkgs., \$810; Montevideo, 3 pkgs., \$260; Newcastle, 24 pkgs., \$156; Rio de Janeiro, 71 pkgs., \$1,468; Sydney, 1,166 pkgs., \$10,128; Vera Cruz, 142 pkgs., \$2,623.

DECEMBER 22.

Buenos Ayres, 221 pkgs., \$9,127; Cape Town, 5 pkgs., \$200; Colon, 2 pkgs., \$100; 29 pkgs., \$217; Guaymas, 6 pkgs., \$251; Halifax, 6 pkgs., \$170; Hamilton, 6 pkgs., \$248; Havana, 4 pkgs., \$375; 2 pkgs., \$229; Jamaica, 10 pkgs., \$173; Liverpool, 3 pkgs., \$105; London, 482 pkgs., \$7,453; 18 pkgs., \$1,016; Manchester, 9 pkgs., \$900; Meritas, 3 pkgs., \$140; Para, 11 pkgs., \$478; Porta Plata, 5 pkgs., \$133; Progreso, 138 pkgs., \$4,913; Puerto Barrios, 35 pkgs., \$737; Rio de Janeiro, 11 pkgs., \$1,385; Tampico, 22 pkgs., \$529; 10 pkgs., \$396; Trinidad, 16 pkgs., \$439.

DECEMBER 29.

Amsterdam, 2 pkgs., \$175; Berlin, 36 pkgs., \$796; Bilbao, 11 pkgs., \$125; Bremen, 5 pkgs., \$145; Guayaquil, 9 pkgs., \$255; Havana, 4 pkgs.,

\$292; Liverpool, 2 pkgs., \$111; London, 1,112 pkgs., \$16,117; 20 pkgs., \$1,644; 9 pkgs., \$765; Manila, 79 pkgs., \$4,305; Vera Cruz, 114 pkgs., \$5,635; Yokohama, 14 pkgs., \$980.

JANUARY 4.

Berlin, 219 pkgs., \$1,344; Buenos Ayres, 92 pkgs., \$9,834; 9 pkgs., \$206; Colon, 7 pkgs., \$209; 4 pkgs., \$298; 11 pkgs., \$209; Guayaquil, 3 pkgs., \$130; Hong Kong, 40 pkgs., \$912; Kingston, 11 pkgs., \$665; Kobe, 2 pkgs., \$126; Limon, 2 pkgs., \$135; 2 pkgs., \$101; London, 17 pkgs., \$1,623; Manzanilla, 7 pkgs., \$212; Montevideo, 1 pkg., \$393; St. Johns, 6 pkgs., \$137; Sidney, 81 pkgs., \$844; Vera Cruz, 12 pkgs., \$693.

TALKING MACHINE MAN DEAD.

Frank D. Coyle First Used Phonograph as Amusement Device.

Frank Dawson Coyle, long connected with the theatrical business and probably the best known of dime museum lecturers, died at St. Francis' Home, 609 Fifth avenue, two weeks ago. Mr.

Coyle was born in Washington fifty-seven years ago. His father, John F. Coyle, was proprietor of The National Intelligencer of that city.

Mr. Coyle saw the value of the phonograph when it first became a nine days' wonder. He started out exhibiting the machine in the east, and became a pioneer in the field of mechanical amusement devices.

JOURNET HERE TO MAKE RECORDS.

Marcel Journet, the Belgian basso, arrived Sunday last on La Savoie and will sail again on the Lusitania on January 19, for the purpose of making records for the Victor Talking Machine Co. The singer, who in the spring of 1908 threw up his contract with the Metropolitan Opera House, shows no symptoms of the melancholia and heart trouble that caused his departure then. Journet, who tells of many triumphs in Europe, says his brief stay caused him to refuse an invitation to sing with Caruso and Geraldine Farrar at the Metropolitan.

TRADE NEWS FROM CLEVELAND.

Good Business During Closing Months of Year Makes Up for Early Months of Depression—Wholesale Merchants Entertain Salesmen—Music by Columbia Graphophone—Dressmaker Gets Talker to Entertain Customers—How the Experiment Worked—The Bailey Co.'s Fine Department—What Various Houses Have to Say Regarding Business Conditions in That Progressive City.

(Special to The Talking Machine World.)
Cleveland, O., Jan. 8, 1910.

A review of the talking machine business in Cleveland during the past year brings to mind many weeks of inactivity, not to say depression in trade, especially in the first months of the year. At the beginning everyone was happy at the increasing evidences of prosperity, anticipating an immediate return to profitable, normal conditions. In this they were disappointed. The year was one of steady but slow recovery from the effects of the industrial difficulties of two years before. The restoration had well begun the year previous, and there were some who could foresee a time in the near future when former usual business conditions would be resumed. But it took time, more than was expected, to set industry in full swing again. Progress of recovery was delayed by the long consideration of the tariff law, which, taking effect in August, brought an end to doubts and gave to business the opportunity to again start ahead. The situation changed in the last three months of the old year and wound up most auspiciously. The jobbers were busy with about all the orders they could handle, while the retail dealers were busy from early morning till late into the night during the holiday season, and what is quite as satisfactory, a large volume of trade has continued since the beginning of the new year.

The wholesale merchants of the Chamber of Commerce gave their annual beefsteak dinner to the traveling salesmen represented by its members December 27. The entertainment was varied—plenty to eat, a little vaudeville, music, chorus singing, speeches, etc. The most popular feature was the chorus singing. At each plate were sheets on which were printed the words of thirty-four songs, some up-to-date and others very ancient. It is somewhat difficult to sing when one has a plethora of beefsteak and other good things, but aided by music from a New Imperial Columbia Graphophone, the diners readily overcame the difficulty. "America" and the "Star Spangled Banner" were patriotically rendered. The most enthusiastic singing, however, was heard when "Take Me Out to the Ball Game" was sprung. Such fervor and pathos! It had to be repeated several times before everybody was appeased. Other songs that echoed the approval of the 500 present were "School Days," "Old Black Joe," "Down Where the Wurzburger Flows" and "Yip-I-Addy-I-Ay."

G. J. Probeck, local manager of the Dictaphone Co., reports that their business for December ran into four figures and gives promise of big things for 1910.

Some of the jobbers who had ordered goods shipped by freight were compelled to telegraph shipments by express, and at that, receipts were delayed beyond Christmas Day.

A beautiful mahogany Victrola XII sits on a stand at one side of the room of a fashionable Euclid avenue dressmaking establishment. "I see you're fond of music," observed a customer, as she noted the beautiful instrument. "On the contrary," replied the dressmaker, "I am not. Oh, I like to hear a record once in a while, but I haven't much of an ear for music. I have that machine here for customers."

"And are your customers admirers of talking machine music?" inquired the lady.

"Most of them, if not all, I think are. At any rate it keeps them from growing irritable. You know when there are four or five gowns to be fitted and people are sometimes obliged to stand still for an hour or so they are likely to become uneasy and peevish. I used to try to get along

by keeping up a running line of small talk. A lot of nonsense is an excellent preventative of bad humor. But my business grew to such dimensions that I couldn't do all the fitting myself, and my assistants aren't all good at interesting customers with their talk, so I purchased the machine. With a few select records, the effect is really wonderful. I am able to place my mind exclusively on my work and make the necessary alterations before they notice what's wrong themselves, which is often an important matter, for if the customer sees too many alterations are being made she thinks her gown was wrong in the first place. I've noted the effect of different records, and those by Caruso, Farrar and Melba seem to please the women, or at least they keep them in a passive state of mind until I have finished the fitting."

No one takes more pride in the arrangement and equipment of a talking machine department than does E. A. Friedlander, of the Bailey Co. Separate and tastefully furnished demonstration rooms are provided for the Victor, Edison and Zonophone machines and records, and visitors are delighted with the attention they receive. "We made sales of a large number of Victrolas and Amberolas," said Mr. Friedlander, "and with five assistants we were kept busy as bees during the holiday season. Our record trade was fine, and was continued right up to date. The new year has started in most encouragingly, and I expect 1910 will prove the best we have ever had."

"Business in both our wholesale and retail departments during the past month was good," said Mr. Probeck, of the G. J. Probeck Co., "and was especially good during the holiday season. We made sales of several Grafonolas, a number of the higher priced Graphophones, and our sales of both the double disc and indestructible two and four-minute records were the largest of any time in our history. The most pleasing feature of our business is the satisfactory way in which the new year has started out. Trade has continued to improve right along since the 1st, and we expect it to continue doing so."

Collister & Sayles were kept busy during the holiday season in both the wholesale and retail departments. "We made sales of a large number of Victrolas," said Phil Dorn, manager, "and records in bunches of two and three, and one and two dozen. The demand was largely for red seal and the double-faced records, most of the selections being made from the December and January lists."

The Eclipse Musical Co. had an excellent trade throughout the month of December, and which has continued in substantial volume into the new year.

"We were never busier than we were during the holidays," said Mr. Biesinger, of the W. J. Roberts, Jr., Co. "Our store was open evenings three weeks before Christmas, and we had a nice evening trade, catching the early buyers, who followed the advice of the Merchants' Board, to do their shopping early. We had a large space filled with outfits wrapped for delivery the day before Christmas, and disposed of our entire stock of Victrolas, the accumulation of several months. Our sales in both Victor and Edison goods were large, and the year's business closed most satisfactorily. Since the beginning of the year business, especially in records, has been very good, much better than in the last two years. The outlook is promising."

W. H. Buescher & Sons, with a large stock of both Victor and Edison goods, were prepared for a large holiday trade and were not disappointed in the big volume of business which came their way. Trade has continued good with them right up to date, and they expect 1910 to prove the most prosperous in their history.

B. L. Robbins & Co. report the past month's business the best they have ever had, largely exceeding that of a year ago.

C. F. Foote, manager of the phonograph department of the Goodman Piano Co., said business was good, and that they were rushed during the holiday season, having made sales of a number of Victor and Edison machines, together with

Reginaphones, for which the company have the exclusive agency.

John Reiling, the West Side Columbia dealer, reports business has been fine during the past month, which has continued into the new year.

At the music and novelty shop of Charles I. Davis, Miss Elsie Wicks said business in the talking machine department was good, and their holiday trade had been fine.

Business was reported satisfactory, and especially good during the holiday season, at Brown Bros. and Aldrich, Howey & Co.'s, who handle the Columbia goods; at Flesheim & Smith's, Victor and Zonophone machines and records, and at the stores of the Gottdinor & Wicht Co. and the Cabolitz Bros., who carry full lines of Victor and Edison goods.

MOVING PICTURE MEN DINE EDISON.

Amplly Repaid When He Breaks His Long Established Rule and Speaks—Tells His Own Version of the Sale of His First Telegraphic Invention—Gives Good Advice.

Thoms Alva Edison, the "wizard" of latter-day science and invention, holder of a thousand patents, whose everyday experiments in his laboratories at West Orange, N. J., surpass the alleged magic of any old "wiz" known to fact or fiction, accepted an invitation recently to dine with the moving picture men. They had come from various cities of the United States and Europe to honor the creator of the business which is making fortunes for its operators all over the world. When the dinner date came around the absent-minded inventor had forgotten it, but the committee found him in his working clothes and dragged him to the banquet, where he bore his honors modestly, and amply repaid them with a little autobiographical record from memory's phonograph. He told how he had first made the acquaintance of money.

It was back in the seventies, when Edison had but recently come from the west as an itinerant telegraph operator who had in his head some wild scheme of sending duplex messages over the wires. He tried to find a backer in Wall street, but the financiers impatiently "broke" his timid line of talk. He was standing disconsolately watching the ticker in the office of Gen. Eckert, the then head of the service, when the mechanism broke down, and there was an incipient panic as the brokers failed to receive their quotations. Young Edison reckoned that possibly he might be able to fix the thing up—and he reckoned right. The next day Gen. Eckert offered him a job at \$400 a month—a staggering sum to the poor telegrapher whose top-notch wages up to that time had scarcely reached \$100 a month. After awhile the General asked Edison what he would take for his patents in telegraphy. Edison lay awake all one night over the proposition, and had rash thoughts of \$5,000—but no! such a figure was preposterous, and he dared not mention it at the next interview. Finally Eckert broke the ice by asking how \$40,000 would do. Edison, dazed, signed a contract without reading it, and received a check which he did not know enough to go to a bank with until some one told him. He even thought for a moment that he had been buncoed, and had signed away all his work for a worthless piece of paper. But the cashier handed him out a huge wad of money, which caused him the loss of another night's sleep. "And then," concludes Mr. Edison, telling the reminiscence, "I started in buying a lot of machinery that I thought I wanted—and in six weeks I was down and out again, without a cent."

Compare this with the life story of any millionaire or billionaire of your acquaintance, and draw your own moral, if you desire one.

It is not necessary, of course, to begin as a kindergartner in finance to succeed before you die. Get on speaking terms with money at the first decent opportunity, but don't let it become too familiar, or it will press the advantage and finally get you.—The Evening World.

ST. LOUIS TRADE HAPPENINGS.

Business Decidedly Brisk During December, and Outlook for 1910 Excellent—St. Louis Talking Machine Co.'s Good Report—Their Attractive Window Display—Some Recent Visitors—News of the Travelers—Columbia Co. Enjoy Record Holiday Trade—Interesting Personalities—Other News of the Month.

(Special to The Talking Machine World.)

St. Louis, Mo., Jan. 8, 1910.

The talking machine trade for December among the retail trade was decidedly brisk, and all report having had a large business. The best kind of machines were strongly in demand, and the record trade was particularly good. The year closed with a feeling among all that the indications are excellent for a good trade during 1910.

The St. Louis Talking Machine Co. experienced the greatest December business in the history of this firm. More Victrola instruments were sold than any other type, the demand for the Red Seal records was so great that tremendous inroads were made on the large stock carried. Returns from their dealers were slow in coming in during the first part of the month, but the last two weeks found them in such a hurry for stock that they were making use of the long distance telephone and telegraph.

The very attractive ready made window display which was in the window of the St. Louis Talking Machine Co. not only attracted the attention of the holiday shoppers, but quite a number of the merchants took particular note of it, and frequent inquiries were made as to who the window dresser was. S. H. Johnson, of this firm, late Christmas Eve sold a Victrola style XVI to a prominent merchant who had been so busy during the week as to entirely overlook the purchase of a Christmas present for his family. His mind was set on a Victrola and the purchase depended on its being delivered that evening. As no drayman could be secured at that late hour, Mr. Gressing phoned for a touring car and in the back seat of which the Victrola and records were placed and delivered to the purchaser's home in perfect safety shortly before midnight.

L. A. Cummins, traveler for the St. Louis Talking Machine Co., will start out on his first trip shortly after the first of the year and will confine himself to the immediate territory surrounding St. Louis. Visiting dealers at this establishment were Henry Hoch, Bellefontaine, Mo.; J. T. Welling, Germantown, Ill.; Otto Funk, Hillsboro, Ill.; T. J. Price, Belleville, Ill.; Wm. Mosby, Newport, Ark.; Lyle P. Conner, White Hall, Ill.; H. F. Harrison, Louisville, Ill.; F. Meyer, Carlinville, Ill.

O. A. Gressing, manager of the St. Louis Talking Machine Co., spent New Years with his sisters in Milwaukee.

E. B. Walthall, manager of the Columbia Phonograph Co., reports one of the best retail months in December in the history of the company. The De Luxe \$200 and \$225 machines and the Regent \$200 proving the best sellers ever put out by the company. More sales would have

been made had it not been for the inability of the factory to furnish the goods. The local store of this company is mailing 6 to 8,000 folders announcing the engagement of the Boston and Metropolitan Opera Co. at the Olympia Theater here for the week beginning January 24 to their customers. A number of the artists with this company furnish selections exclusively for the Columbia Phonograph Co.

W. C. Fuhri, district manager for the Columbia Phonograph Co. with headquarters in Chicago, accompanied by his wife, spent several days here during the holidays visiting relatives and friends.

F. G. Cook, traveling salesman for the Columbia Phonograph Co., spent the holidays at his home in Chicago.

W. S. Byrd, formerly with the St. Louis store of the Columbia Phonograph Co., but now traveling out of Des Moines, Ia., for the company, spent the holidays here.

Marks Silverstone, of the Silverstone Talking Machine Co., reports having had a big business during December.

D. K. Myers, the well known Zonophone jobber, reports having had a fair month's business during December.

The Thiebes-Stierlin Music Co. report having had an excellent trade during December, and especially so on records.

Edw. Reeves, well known here in talking machine circles, has been appointed manager of the talking machine department of May, Stern & Co.

The Koerber-Brenner Music Co. report that they had a big month's trade on talking machines and records during December. W. A. Brenner, secretary of this company, spent holiday week in Chicago on business.

J. H. Buettner & Co. report having had a good business during December.

DEALER MUST HAVE FAITH IN GOODS.

If He Doesn't He Is Wasting Time in Business—The Enthusiast as a Trade Builder.

Once in a while in the talking machine industry one will come in contact with a man who has but an indifferent interest in the goods which he is handling. He somehow lacks the "faith that moves mountains"—he is merely handling his line of goods as a convenience.

Now, to our way of thinking, it is best for the man who cannot believe in his line of goods to find another job, or make a change so that he can believe in them. Lack of faith in the goods which one sells will undermine any person, whether he be jobber, dealer, or salesman. Success is impossible without faith in one's products, but of course the goods must be of the quality to inspire faith and confidence. Thus, having the goods in which you believe, stand by them. Learn all you can about them—about their manufacture, their quality, lasting nature and pleasing possession. Having this pride in those things which you sell, you can't help showing it both to the customer in your handling of them, replacing them neatly and keeping things

ship-shape. Your manner in speaking of them will carry conviction to the extent that you know about them.

Out of this condition you will hear your customer asking: "Now, what do you think as between this and this?" When you hear that question, it is a tribute to your salesmanship. Store these things in your recollections—they are invaluable as a stimulus to confidence.

Cultivate the ability to remember faces and to call the customer by his right name. Remember his address if you can. These may seem small things, but they are vital—human nature never will be above the implied compliment.

Your tactfulness will come of your own education of yourself in dealing with all kinds of people. You will have learned more when you can send the cranky person home satisfied than you could have learned of scores of easily pleased customers.

MORE POLAR TROUBLE.

Cook's Faking Gets I. B. Wilson in Deep—An Ohio Man Is Madder Than the Danes.

Prof. I. B. Wilson's enterprise in keeping right up to the big cities in furnishing the latest in music has put him into mighty hot water this cold snap, and it's all over the warm fight about the discovery of the inverted icicle at the top of the globe. Read this, which we clip from a Moundsville, W. Va., paper:

Wilson's Music Store,

Moundsville, W. Va.

I take my pen in han, and I wont you to tell me rite of whot your goin to do about the dam lien Cook record you sole mi sun Hen fur a dolar. I node it wa a li as sun as herd it. Hen sed you had a big, white ship in your winder or he woodent had bot an as the papers al say it aint true, I want my dolar back, an you kin keep the record, a nuther man has a columbi fonograf here an he tole Hen they node it was a lie and wodent put it in that machin, so I wont my mony back or il swop for on like hisen and never darkin your dor, write soon as you git this.

Jim Blank, Monro Co., Ohio.

Of course, Prof. Wilson didn't guarantee Cook's claims when he sold the canned speech of the Prince of Humbugs, but as he didn't submit a written waiver of responsibility to the Monroe county man he is in a geographic and scientific tangle, and maybe a legal tangle, for the record crossed the State line and therefore comes under the jurisdiction of the Interstate Commerce Commission unless that body crawls out of the mess by saying that the Danish Wise Ones have the case entirely in their own hands.

If Prof. Wilson should be seen hiking over the hills and making a pretense of hunting bear it will be a good guess that the door has been darkened.

L. S. Payne, formerly with the Hollenberg Music Co., Little Rock, Ark., is manager of Payne & Co.'s new talking machine store in that city.

Your Chance

with your talking machine business and entails no increase in your sales force.

It will line you up for the sale of more "talkers," especially the largest and most expensive machines—those particularly adapted for public use.

Full details next issue, but in the meantime we would advise you to get in on the ground floor by writing us to-day.

J. P. SEEBURG PIANO COMPANY

209 STATE STREET, CHICAGO, ILL.

We can show you how to increase your business wonderfully this year on a plan which possesses unlimited opportunities for profit.

Our specialty and system work right in

WIRELESS OPERA THE LATEST.

Combination of Dictograph and Wireless Telephone Makes Possible the Hearing of the Voice of Caruso or Any Other Noted Artist at Long Distances—Some Interesting Information Upon How This Great Feat Is Accomplished.

Two new wireless marvels must be chronicled. One was a demonstration in the editorial rooms of *The World* by E. N. Pickerill, manager of the Waldorf-Astoria station, in which he successfully picked up a message from the ether by the aid of a diminutive "tuner" and a typewriter. The other is the announcement of a season of "wireless opera" by means of a combination of the wireless telephone and the dictograph, an instrument which picks up the smallest sounds.

In the case of the demonstration in *The World* office, experiments which have been carried on by Pickerill over several years have proved that the high "aerials"—the towers which catch the Hertzian waves and carry them to the recording instruments in the wireless stations—are not necessary adjuncts of the receiving apparatus. It was to prove this that Pickerill conducted his demonstration.

The "tuner," or receiving apparatus, which Pickerill displayed, was so small that it was contained in a leather receptacle about the size of an ordinary lunch box, yet it included all the mechanism necessary to pick messages from the air. The aerial was a typewriter and the "ground" was a steam radiator.

Used Telephone Receiver.

After "hitching up" his tuner to the typewriter and to the radiator, Pickerill placed an ordinary telephone receiver to his ear and after a moment of two's wait announced that he was ready for the test. One of the editors of *The World* went to another room and thence telephoned a message to the headquarters of the United Wireless Company at No. 42 Broadway, with instructions to send it out at once. The message was "Tomorrow's weather—storms and blizzards."

In a few minutes Mr. Pickerill smiled, touched a key or two on his "tuner," to get the note distinctly, and began working on the typewriter. The line he typed out was the test message. It had come through half a mile of steel-framed skyscrapers. Yet it had been caught out of the air by the steel frame of the typewriter.

"Almost anything will do," Mr. Pickerill declared. "At home I use the frame of my bed. Out of doors I use an umbrella hanging over my arm. I purpose putting a coil in my hat, and affixing the phone receivers so that they will hardly be noticeable, and I will get messages just as effectively as if I had the highest-priced apparatus in the world.

Useful in Warfare.

"In warfare all a detachment needs to do is to send up a kite with a fine aluminum wire in place of a string and with the portable apparatus the men would always be under the general's command."

Asked over how great a distance he had tested his new receiver, Mr. Pickerill said he had spoken through it with Vera Cruz, Mexico, and Colon, Panama, both more than two thousand miles away; and, as to obstructions he had messages from Colorado Springs to Cripple Creek, which had the great Pike's Peak, 14,147 feet high, between them.

The "wireless opera" season is announced to begin next week at the Metropolitan Opera House. The magic key to this ethereal melody will be a wireless receiver. Any wireless receiver, properly attuned and connected to a single upright wire and to a telephone earpiece, will catch the ether pulsations and translate them into the familiar airs of grand opera.

How It Is Done.

The performance is made possible by improvements in the wireless telephone by Dr. Lee De Forrest and by the invention of the dictograph by Kelly Turner. The dictograph instruments

were recently installed on the stage of the opera house and wires run from them up to the large rehearsal room in the top of the building. There the long distance radio telephone transmitter, combined with a special device whereby the music, as brought up from the stage dictograph, can be retransmitted and sent out broadcast from the antennae wires set up. Two special masts are erected on the roof of the Metropolitan Opera House, near the Broadway side, and from the top of these the antennae wires lead down to the radiophone.

There are hundreds of wireless receiving stations in Greater New York, and as each receiving station can accommodate as many listeners as there are telephone receivers at hand it is estimated that many more people will hear the opera by the new method than the large auditorium of the Metropolitan could possibly accommodate.

The masts on the Metropolitan Opera House are not tall, and the range of transmission is therefore limited to perhaps fifty or twenty-five miles, but the passengers on the Atlantic liners near New York will be able to recognize the voice of their operatic favorite in some familiar passages.

SOME FINE SPANISH RECORDS

Recently Put Out by the National Phonograph Co.—Instrumental Pieces by Famous Organizations—Music Peculiar to Various Sections of the Country—Some of the Well Known Spanish Singers Whose Voices Have Been Recorded.

Probably no class of music has a stronger appeal to the general American public than that of Spain, yet little of it is known here, notwithstanding its effect whenever heard. All of us have heard snatches of it, know the type, and have longed to hear more, yet so far we have been favored with but little of this music. A great number of selections of this class are included in the Spanish catalog of the National Phonograph Co., and if forcibly brought to the attention of the buying public, they would no doubt be well received. We have already called attention to the many band and orchestra selections recently made by the National Co. in Mexico, and we repeat that these records are interesting and the selections delightful. These musical organizations are world-famous, and one of them captured the first prize at the St. Louis Exposition. Among their selections are many well known classical pieces, but the Spanish selections are of more than usual charm, and while none but the Spanish can do them justice, their appeal is universal.

Although the instrumental selections would undoubtedly find a broader sale, yet the vocal numbers, while sung in Spanish, should appeal to a large discriminating public here. In our last issue we spoke of the records by a number of well known Spanish sopranos and contraltos, and we now wish to do the same by the men.

Supreme among Spanish tenors of all countries, and ranking among many on the operatic stage in New York City, is Rafael Bezares. He has a pure tenor voice, which is very rich and expressive, and although he has never appeared in this country, he is well known throughout Europe and Spanish America. He is an artist of great ability and versatility, and his large repertory includes many famous operatic and classical selections. He is particularly known as a "Flamenco" singer, as the music of Andalusia, the region of the south of Spain, is known.

The various regions of Spain each possess their own peculiar music, and the "Flamenco" music is typical of Andalusia. It was from Andalusia that Bizet drew the inspiration for his famous opera "Carmen," and Carmen herself is a type of Seville, the largest city of this region. The early history of this portion of Spain is very interesting, and something of its nature may be gleaned from its name. It was originally called Vandalusia, from Vandal, and the wild and passionate strains so dear to the heart of the gypsy

still predominate in this music. Their songs are full of love and fire and their dance music is irresistible.

Another "Flamenco" singer of note is Francisco Cascales, called "El Sevillano," who has a fine tenor voice and is very widely known.

Manuel Romero Maipica is a first class baritone, with a voice of extraordinary range and splendid quality. He is well known throughout Europe and South America and has appeared with great success on the concert stage of this country.

Other tenors of the very first rank are Pablo Garcia Bofil and Ismael Magana, who are well known opera singers. Their voices are of excellent quality and well suited for high class music.

Jesús Abrego, Adolfo Jiménez, Maximiano Rosales and Felix de la Sierra, tenors, and Leo-

RAFAEL BEZARES.

poldo Picazo and Rafael H. Robinson, baritones, are popular singers of a very high order. Many of their songs are original and all possess a delightful swing and quaint harmony. The several duets by Jesús Abrego and Leopoldo Picazo, as well as those by Maximiano Rosales and Rafael H. Robinson are very interesting. Their voices blend very well together, and many of their songs, accompanied by guitar, are very beautiful.

NEW YEAR OPENS AUSPICIOUSLY

For the Victor Co.—Orders Amounting to \$116,000 Received First Mail Monday—January Will Make Great Record.

January has opened up auspiciously for the Victor Talking Machine Co., and their orders for the opening of the new year show no diminution. It now looks as if January will be as great a month as December, which was the best and biggest in the company's history. Louis F. Geissler, general manager of the company, informed *The World* this week that in the first mail on Monday, Jan. 3, orders were received amounting to \$116,000; better than this, not a single countermand was received. This certainly is a magnificent showing, and gives an idea of the present prosperous condition of the talking machine business in the United States.

GOOD REPORTS FROM OHIO.

Business in all parts of the country is looking up. Here is a letter from the mining section, dated from Corning, Ohio.

D. M. Rodgers says: "The talking machine business has been very dull with me these hard times, but I find your paper interesting and beneficial to any one in this business, and, as long as I handle talking machines, I hope to be a reader of your journal.

"Things are slowly on the mend in this mining section, and I hope during the New Year to sell lots of phonographs and Victors again."

Steve Porter, the monologist and author, exclusive with the "talent" of the Victor Talking Machine Co., is in New York for the winter. In the spring he removes to his farm at Martinsville, N. J.

Items—"B. & H." Fibre Needles Gaining Ground—Among the Visitors—Some Kansas City Notes—Compartment Filing Cabinet Co.'s Plant Destroyed by Fire.

(Special to The Talking Machine World.)

Chicago, Ill., Jan. 8, 1910.

Hooray! 1909 made a g-glorious f-finish. With all the big talking machine houses in Chicago November and December were reported as record breakers. It is hard to analyze the returns and to determine whether the two months made as big increase in wholesale as in retail business. The former certainly made a strong gain as compared with the corresponding month of last year. As could have been prophesied from the tendency apparent in the early fall a very large percentage of the business has been in the concealed-horn machines—a greater proportion than at any time since their introduction. It is interesting to note that the greater volume of business in the aggregate came from the larger towns and cities. There is reason to hope that the country districts will make a better showing in 1910 than in 1909, but that is another story and will be told to some extent in next month's Chicago correspondence.

Lyon & Healy's Fine Retail Business.

The retail holiday business at Lyon & Healy's is the talk of the trade. The Victrola sales were something simply phenomenal. On one day there were sold twenty-four Victrolas, twenty-two 16s and two 12s off the retail floor. There were other days that nearly equalled this. The delivery wagons were kept busy for a week or so before Christmas, and the day before the holiday forty Victrolas were delivered to city purchasers. Marquette Healy, treasurer of Lyon & Healy, gave your correspondent these statistics regarding the talking machine business of the house, wholesale and retail combined. November, 1909, showed an increase of 57 per cent. over the same month in 1908, and 22 per cent. over the corresponding month of 1906, which is the largest November they had ever had up to that time. December, 1909, showed a gain of 44 per cent. over 1908 and 23 per cent. over 1906, which was their largest previous December. Manager L. C. Wiswell inaugurated some decidedly ingenious plans of procedure and they panned out big.

The Talking Machine Co.'s Big Trade.

The Talking Machine Co., have closed the books on a remarkable year. It showed a big, round increase over 1908 and November and December were heavier than any previous similar months in the history of the house. December was a hammer and strained the resources of the house force to the utmost. The Victrola sales were immense, but all types except the lowest priced Victors were in excellent demand. Manager Geissler and Sales Manager Roy Keith opened up some mighty fine accounts last year, and they came to the fore in the holiday trade with a rush. The Talking Machine Co.'s creed, which was printed in the July issue of The World, has evidently been adhered to faithfully and the logical results are in evidence.

The Ad. Man's Chance.

There is going to be an opportunity for some mighty strong exploitation of grand opera records between now and May 1. The Boston Opera Company comes to the Auditorium Theater January 10 for two weeks' engagement. The list of principals numbers quite a few artists whose

names appear on record labels. On April comes the Metropolitan Opera Company with Caruso and a lot of stars, new and old. The advertising man and the window trimmer ought to fairly revel in this chance for effective exploitation. Next season we are going to have a solid twenty-week season of grand opera. The player-piano people are preparing to get into the game with a rush and the professional talker advocates will, no doubt, be right up to the minute.

The Amberola's Debut.

Quietly and unobtrusively the Edison Amberola, the latest of concealed-horn machines, has shied its castor into the trade ring, and the result is prophetic of big things to come. The National Phonograph Co. were evidently not in position to make deliveries to any great extent, but the few which arrived here went a-scooting out on previous wholesale and retail orders. Aside from the new and colorful tone, the automatic stop and other valuable features attract a great deal of admiring attention.

About Iowa Trade.

F. H. Hird has been in Chicago for a day or two on his return from his home town, Boston, where he spent the holidays, to the State of Iowa, where he ably represents the National Phonograph Co. He said that business in "Golden Iowa" had been of very fair dimensions the past year. Such distributors as Harger & Blish at Dubuque and Des Moines, Early music house, of Fort Dodge, and Hopkins Bros. Co., Des Moines, all report an increase somewhere in the neighborhood of 40 per cent. for 1909 as compared with 1908. Everywhere jobbers and dealers are confident of the mighty good trade for 1910 and basic conditions appear to amply support such optimistic expectations.

The "Tiz-It" Is It.

Mr. Kreiling, of Kreiling & Co., manufacturers of the "Tiz-it" all metal, ball joint, horn connection for cylinder machines, reports that the year was a very good one for his specialty. The jobbers everywhere are sending in repeat orders, and the future is O. K. Mr. Kreiling is working his inventive genius overtime and a couple of fine new children of his fertile brain will shortly make their appearance.

Some Columbia Items.

W. C. Fuhri, district manager of the Columbia Phonograph Co., is well pleased with what the past year brought in a business way, and all of the important southern and western cities comprised in the extensive territory over which he has jurisdiction. The Columbia branches or dealers had a fine trade in December, surpassing by an important figure that of the corresponding month of 1908. The various types of Columbia Grafonolas (concealed-horn machines) were greatly in vogue. The only difficulty was in getting enough of the handsome instruments from the factory to supply the demand.

Local Manager C. F. Baer has taken out the partition between two of the record rooms and has converted it into a handsome redecorated and rugged Grafonola room. The library type is proving an especially fine seller.

F. G. Cook, formerly with the Chicago office, and who for some months past has covered southwestern territory for the St. Louis branch, has returned to this city and has become assistant to Retail Floor Manager Herriman.

H. H. Myers who travels Iowa, Michigan and Indiana, and Earl Zerkle, whose usual stamping ground is Wisconsin and Upper Michigan, have swapped territories for a single trip in order, of course, that they may have a mutual back-patting seance when they return.

E. C. Plume, western wholesale manager, is advertising in the daily papers for a dozen able-bodied, strong-tongued tom cats and a carload of A number 1, specially inspected, pure cow cream. He shaved his luxuriant mustache recently, but

his wife and sturdy young son have failed to recognize him. Plume is trying his best to raise another hirsute adornment, but he finds it necessary to secure the cats and cream in order that the law of capillary attraction may do its perfect work.

The "B. & H." Fibre Needle.

Dealers who have taken the pains to explain the use of the "B. & H." fibre needle and have shown customers how to make the bamboo pin go through the record, if it shows any hesitancy at the first trial, are not only having excellent "B. & H." sales but find their machine and high-grade record business benefited greatly. One firm of distributors who has taken the pains to study the "B. & H." and give the results of this study to their retail and wholesale customers placed an order for 200,000 needles with the "B. & H." Fibre Mfg. Co. in September and followed it up with a purchase of 300,000 the latter part of November. One concern on the Pacific Coast is buying 100,000 every three or four months. Telegraph orders for 25,000 at a clip are a frequent occurrence. Considering the fact that the retail price of the "B. & H." fibre needle is \$1 for 250, this is certainly "going some."

Some Recent Visitors.

Two Victor travelers, Mr. Hippel, South Dakota, and Mr. Fitzpatrick, Michigan, were in the city a few days ago on their way from the East to their respective territories.

Rudolph Wurlitzer, of the Rudolph Wurlitzer Co., visited the Chicago branch house Christmas week. He said that November and December of the local branch broke all previous records. The remodeled store is very beautiful, one of the very finest to be found anywhere.

T. C. Berg, of the Berg Piano Co., La Crosse, Wis., and Guy Conklin, Fort Wayne, Ind., two distinctly Twentieth Century and enterprising dealers recently called on the local trade.

B. Blumberg, general manager of the Regina Co., Rahway, N. J., has been in the city several days this week looking over the past year's records with Chicago Manager M. J. Faber and planning his campaign for the new year. Mr. Blumberg was manager of the Chicago office until he went up higher, but the eastern ozone must be agreeing with him as he is a sight for sore eyes. He wears the same beautiful smile as of yore, but it covers a larger territory.

Kansas City Humming.

Your representative had the pleasure of spending a couple of hours among the Kansas City trade recently. There is a fine bunch of jobbers and dealers in the city on the Kaw and the former are certainly making things whoop in the several States they do business notwithstanding a certain apathy which exists in the very small towns.

J. W. Jenkins' Sons Co. were found doing a nice business which showed up in marked contrast with those of the previous years. Burton Pierce, manager of the talking machine department, was very optimistic regarding the coming year. Furthermore, he said that the thorn needle for which the house are the exclusive distributors, is steadily gaining in strength.

The Schmelzer Arms Co. have one of the finest retail talking machine warerooms in their recently occupied building at 1216-18 Grand avenue that the writer remembers having seen. Manager A. A. Trostle said that they had had a big year in a wholesale as well as a retail way. They deserve it because they have worked hard for it and have a larger force of salesmen on the territory than ever before.

At the Columbia Phonograph Co.'s branch manager Smith was getting a full share of the holiday business with the aid of a coterie of able and loyal assistants. He was well pleased with the way wholesale business was showing up.

Grafonolas, especially the library-table type, were in big demand.

Cabinet Plant Burns.

The plant of the Compartment Filing Cabinet Co., manufacturers of disc and cylinder record cabinets, 316-20 W. 29th street, was destroyed by fire Christmas Eve. Plans for resumption of business in another location are under way, and the company will probably be in a position to make shipments very shortly.

Pointer for Dealers.

The J. P. Seeburg Piano Co., 209 State street, manufacture a profit-making specialty which is especially adapted for talking machine dealers who wish to enlarge their field of operations. Cuts and full particulars will appear in their advertisement in the February issue of *The World*. In the meantime dealers who would like to investigate with a view of getting in on the ground floor are invited to communicate with the company at once.

Personals.

Arthur D. Geissler, general manager of the Talking Machine Co., has been very ill with a severe attack of inflammatory rheumatism, but expects to again appear at his office next week.

L. C. Wiswell, manager of the talking machine department of Lyon & Healy, left this week for a week's visit to the factories at Camden and Orange and to New York City.

A. Grunwald, representing the Salter Mfg. Co., Chicago, makers of talking machine record cabinets and furniture specialties, left yesterday for the West, going as far as Salt Lake City. On his return he will take in the Northwest, and from thence will visit the leading eastern centers. It has been an exceedingly prosperous year with the Salter Co., particularly in the cabinet department and some fine new styles will shortly make their appearance on the market.

J. W. JONES INVENTS ROAD RECORD.

Joseph W. Jones, who gained prominence in the talking machine trade through his connection with the invention of the disc record, and who is also responsible for the Jones speedometer for vehicles, has again come to the fore as the inventor of a new live map meter. The Jones live map meter is a sort of phonograph of the road. You insert the record of the trip you want to make, and the live map plays it. When you come to a cross road the map tells you, and the hand on the instrument points the way.

According to the Bureau of Manufactures the Chamber of Commerce in a large European city is very anxious to get in touch with manufacturers of phonographs for taking office dictation. In the type of machine desired a letter is dictated to a record, which is later placed on a phonograph operated by electricity and controlled by a pedal, thus enabling the typewriter to regulate the speed. Those desiring to make further inquiry should refer to file number 4,349.

SLEZAK'S TRIUMPHANT SUCCESS.

The Great Viennese Tenor Adding to His Reputation with Every Appearance—Records of His Famous Arias Being Put on the Market by the National Phonograph Co.

Not in many years has an operatic artist scored such a triumphant success as Leo Slezak, the great Viennese tenor, who has been heard in his magnificent interpretation of "Otello" in Verdi's opera of that title, and in a number of other well-known roles at the Metropolitan Opera House this season. Every appearance has been followed by the highest tributes from the critics of the New York papers who entol him as a

LEO SLEZAK.

great artist and remarkable man. In fact, he is proclaimed to be one of the greatest tenors of the day.

It must be a matter of general interest and gratification to members of the talking machine trade that records of this famous artist have been put on the market by the National Phonograph Co., and which include all the songs in his American repertoire.

At large expense the National Phonograph Co. made a special contract with Mr. Slezak by which these numbers will be made exclusively for the Edison phonograph. The possession of a record of a voice such as Slezak's is indeed a source of extreme pleasure and lasting benefit, and it is safe to say that there will be a tremendous de-

mand for these records wherever they are properly introduced, and the importance of the man emphasized.

Readers of *The World* will be interested in the opinions of the critics of the local papers following the debut of Slezak in Verdi's great opera, "Otello." Here are a few criticisms from the leading papers which reflect the tenor of the entire press of New York on this occasion:

From the New York Herald—"Otello, revived at the Metropolitan Opera House after years of neglect and the advent of a new tenor, were the features that attracted a large audience last evening and aroused it to enthusiasm. The tenor is Leo Slezak, a Czech, who has won fame in Germany and London. He is a giant, being six feet four inches in height. And he is a giant artistically, too. His fame had preceded him, but his nervousness accompanied him. The latter was evident in the first act. Later, when he threw aside the cloak of fear of singing in a strange auditorium before a strange audience, he made his listeners sit up and applaud and even cheer. His voice is tremendous in its dramatic moments, and when he employs it lyrically it is fresh and beautiful in quality. He has been compared to Tamagno, and his voice has some of the brutal dramatic strength of that famous tenor, but it is far more beautiful in moments of tenderness, and he is a capital actor. After the third act he was singled out for an ovation. Wreaths were thrust upon him by the pages and the house rose at him in applause. Mr. Slezak was welcomed in a night, and there were no 'buts' and 'ifs.'"

From the New York Tribune—"Verdi's all-too-much neglected Otello was the opera last night at the Metropolitan Opera House, and, judging from its reception, the New Theatre will not have a monopoly of Shakespeare this season. It is said that the opera was revived to introduce the Metropolitan's new heroic tenor, Leo Slezak, who sang last season at Covent Garden, and whose achievements have been pictured to New York in brilliant colors. Whatever the reason, however, New York can only be grateful. It was a splendid production of a splendid opera.

"Much has been written of the gigantic physical proportions of the Czech tenor, but it is doubtful if any one expected the colossus that appeared. The audience fairly gasped when Herr Slezak made his entrance. It seemed as if a section of the proscenium arch had suddenly stepped upon the stage. Yet, despite his great size, his was no mountain of flesh, but such a figure as would have delighted the audience that once applauded the heroics of Tommaso Salvini.

"With it all, Herr Slezak showed himself a splendid actor, tender in the opening scenes with Desdemona, depicting admirably his growing suspicions of his wife's fidelity, and superb in his wrath and final broken-hearted despair. It was an impersonation not soon to be forgotten. There was a certain huskiness at times in his voice, due, perhaps, to nervousness, but it is a voice of fine power and one used with more than ordinary discretion."

From the New York Sun—"After an absence of nearly seven years from the stage of the Metropolitan Opera House Verdi's Otello was revived there last evening with a cast including Leo Slezak, the new Czechish tenor. Mr. Slezak, who hails from the Vienna opera, proved to be a tenor of prodigious physical height and of lofty artistic stature. His voice is robust and of much beauty throughout its range. While its middle register was somewhat veiled last evening, there was always correctness of intonation and a hint of reserve power. "When, for example, he uttered the pealing cry of 'Sangue! Sangue! Sangue!' there was no sense of strain or exaggeration. Tense as was the pitch to which he carried the auditors here and at other climatic moments, Mr. Slezak did not lose his sense of artistic proportion or his command over his vocal resources. In short the new tenor showed himself to be a singer of high rank. His acting, from his delightful enunciation of the Italian text to the commanding sweep of his gestures, the distinguished poise of his head and the variety and range of his means of expression, helped to make this Otello revival noteworthy."

Kindly disposed, as the American audiences are, toward artists, appreciative of any honest effort, they are yet the most unfathomable when it comes to guessing whether or not a new voice, a new artist will please them. No small credit is due, therefore, to an artist who at once achieves success; but to arouse enthusiasm, to hold an audience spellbound at the first appearance, belongs to very few. It is safe to say that not for many years has such a personal vocal and histrionic success as that of Leo Slezak, in "Otello," been made by any other debutant and aspirant for honors at the Metropolitan Opera House. Splendidly equipped physically, weighing nearly three hundred pounds with a height of 6 feet 4 inches, Mr. Slezak heightened the impression by a very judicious choice of costume. In a long flowing robe richly embroidered, he looked the embodiment of manly splendor, as will be noticed in the accompanying illustration.

LOOKING INTO THE FUTURE!

What does the year 1910 hold in store for you Mr. Dealer?
Do you want to increase your profits during
the next twelve months?

YOU *should* make your 1910 business eclipse that of any previous year. January transactions should exceed those of a year ago, and the same condition should exist every month throughout the succeeding eleven.

Such a satisfactory increase is only possible through improvement in your facilities for getting and properly handling the business; your ability to get the goods when you want them will prove an important factor in establishing these conditions.

As an example of our ability to give service—to send the goods when you want them—we had on hand during the month of December, a good stock of both Victor and Edison machines and equipments, while other jobbers were almost entirely out—further, we were filling orders complete (with the exception of Victor O's which we were unable to get from the factory) and promptly the same day received all during the month. Doesn't this kind of service merit your patronage? We think it does.

NOW A PERSONAL WORD OF THANKS.

We enjoyed a splendid business during 1909. December was the banner month in our history as handlers of the two best known products in the talking machine field, the Victor and the Edison; we thank, most cordially, those who so loyally assisted in making our success.

Abundant prosperity in 1910 is our wish to you and yours.

Lyon & Healy

CHICAGO

WITH THE MEMPHIS TRADE.

1909 Best Year in History of the City—Only Drawback Shortage of Cotton Crop, but High Prices Even Matters—What Various Talking Machine Men Report Anent Conditions—News of the Travelers—A Progressive Mississippi House—Some Recent Trade Visitors—Other News Worth Recording.

(Special to The Talking Machine World.)

Memphis, Tenn., Dec. 21, 1909.

Bells tolling the death of the departing year of 1909 mark the end of the best and most successful twelve-month period in the history of Memphis, from a business and commercial standpoint, and usher in a new one which promises to yield bigger and better things.

This statement is advisedly made after observation and careful investigation, and carries with it no mental reservation whatever. Facts and figures are available with which to verify it, and they are known to all who have kept up with occurrences as they have transpired.

The most serious drawback to the unimpeded progress of prosperity in Memphis for the year has been the shortage in the yield of cotton and other crops, but compensation has been had in the prices higher than since the period just after the civil war. Quotations have ranged from about 12½ cents to 15½ cents, being at the latter figure as the year passes. These prices of \$65.00 to \$80.00 per bale have compared with about \$40.00 to \$50.00 during the last few months of the previous year. That the producer has been able to get the benefit of such high prices more than ever before has gone far toward bringing good times swooping down on everybody.

With extremely cold and dry weather prevailing, the month just past has been one of the most successful in the talking machine business in this territory. All of the dealers report having done a nice business with the call for the best types of machines.

When interviewed by The World representa-

tive, A. L. Owen, manager of the talking machine department of the O. K. Houck Piano Co., expressed himself as being entirely satisfied with his department's showing for the month. This firm reports an unusually heavy demand for the best Victor and Edison machines and records, with a tendency running toward grand opera selections.

With the visit of the Lambard Grand Opera Co. this month a special series of grand opera concerts will be given, at which the records from the different operas presented will be played, and the history and the argument of the opera will be explained by C. D. Johnston, librarian of the Cossitt Library, who is a genuine "dyed in the wool" Victor enthusiast.

O. K. Houck, president of the O. K. Houck Piano Co., was a Christmas visitor at Little Rock. S. M. Fields, who has been in the retail business on his own account for the past two years, has accepted the position of manager of the O. K. Houck Piano Co.'s talking machine department at Little Rock, and will assume his new duties next week.

On a recent trip in the interest of the O. K. Houck Piano Co., O. C. Stegmair, their genial ambassador, booked a number of opening orders in Arkansas. In all of the towns he visited the dealers were especially optimistic, and there is no question but what the high price cotton is bringing and the big advertising campaigns being carried out by the Edison and Victor companies has had a tendency to enthruse them.

A. L. Owen recently visited Jackson, Hattiesburg, Meridian, West Point and Greenwood, Miss., and, from the size of the orders sent in, the dealers must be doing a nice business in those cities.

One of the most progressive dealers in the south is the A. Gressett Music House, of Meridian, Miss. Their success in the talking machine business, especially in the mail order business, is easily accounted for after a few minutes talk with W. A. Gressett, assistant manager in charge of their talking machine business, who is a most

agreeable and energetic gentleman, and we predict a bright future for them in this field.

J. R. Phillips, dealer at Tupelo, Miss.; Dr. Berger, of the Artesia Drug Co., dealers at Artesia, Miss.; Frank E. Gage, representing the National Phonograph Co., were Memphis visitors this month. O. C. Stegmair, of the O. K. Houck Piano Co., spent Christmas with relatives in Brinkley, Ark.

"NYOIL" DOES THE TRICK.

The oil made by William F. Nye, of New Bedford, Mass., has long enjoyed the highest reputation for all kinds of delicate machinery such as watches, clocks, talking machines, sewing machines, in fact, wherever an oil is needed that will not clog. The following unsolicited letter received by Mr. Nye from Ben Budd, 531 Ray street, Camden, N. J., tells its own story of the prestige which this oil enjoys:

"My Dear Sir:—You will see by reading the enclosed circular, that I have quite a number of old-fashioned 'Grandfather' clocks in my care—now over 500 of them to keep in order, and these are scattered over three counties, and a great number of these are in large farm houses and are kept in the hall, where there is no heat in the winter time; therefore, it requires the best of oil in order to keep them running several years after being cleaned and put in good order.

"For over twenty years I have been using your oil. Before that, I used Kelley's, but yours was recommended to me, so I tried it and found it satisfactory for the twenty years.

"Yours used to stay on clocks from three to five years, and gave the best of satisfaction. For eighteen months past I have been using Cuyper's and Ranlett & Lowell oils, but while these oils do not gum up, they dry up within a year and cause the clocks to run bad.

"Now, I want some of your oil at once, if it is as good as it was years ago, for I have orders now on my hands from 54 families. Please send me some of your new oil at once."

400 FIFTH AVENUE, NEW YORK, N. Y.

CLEAN UP IN SAN FRANCISCO.

Dealers and Jobbers Cleaned Out of Goods Owning to Holiday Demand—Greatest Call Was for High Priced Machines—Pacific Phonograph Co. in New Quarters—Hauschildt's Department—Bacigalupi Preparing for Lauder—Sherman, Clay & Co.'s Greatest Sales Day—Kohler & Chase and the Columbia—Grafonolas in Favor—Other Items of News.

(Special to The Talking Machine World.)

San Francisco, Jan. 4, 1910.

Probably never before in the history of San Francisco has there been such a close clean-up of all sorts of talking machines, records and others goods, as at the close of the present holiday season. Not one dealer, but all, report a demand that has never been equaled. Notwithstanding the larger number of dealers, and the fact that all of them made what they considered ample provision for all requirements, there is scarcely any surplus left over, and the sales in some lines might have been much larger if the goods had been available. Some stock has arrived since Christmas, and most of it has been delivered immediately on back orders. Wholesale business lasted almost up to Christmas, both local and outside dealers being very large purchasers. Many outside retailers ran short of stock, and were unable to secure more, while there has been considerable complaint from those in San Francisco and Oakland over the inability of wholesale houses to furnish adequate supplies of the machines most in demand. Expensive machines and records have been the leading feature, but this class of goods seems to be developing a new trade, without interfering with the sale of the cheaper lines in any way. Sales of the most expensive Victor and Columbia machines have been beyond all expectations, while there has been a great deal of inquiry for the Edison Amberola.

Mr. Jones, manager of the Pacific Phonograph Co., is now very busy getting into his new offices in the new Kohler & Chase Building. Owing to a change in the plans, it seems likely that the wholesale stock will be kept in the Oakland warehouse. Mr. Jones says the holiday business was ahead of all former records, and that considerable ordering has been done in the past week. While he looks for a lull during January, he is confident that with the following month orders will begin to come in on almost as large a scale as during the fall.

The H. Hauschildt Music Co. are now established in their new store on Grant avenue, and are devoting one floor to a well-equipped talking machine department. Notwithstanding their recent arrival in the city, this house has enjoyed a remarkable run in this department.

Harry Lauder is to make an appearance in this city for a week in January, and Peter Bacigalupi & Sons, the live dealers, are taking the opportunity to start an advertising campaign on the Lauder records. The work has hardly started yet, but a large demand is expected. A large stock of these records has been taken on, quite a lot being purchased from other dealers. Mr. Bacigalupi reports a big demand for the Edison Cygnet goods, and states that in the last week of the season above \$5,000 worth of orders had to be turned down for lack of stock. He cleaned out his stock of Victrolas entirely, and says he could have placed a large number of Amberolas if he had had them on hand.

The Wiley B. Allen Co.'s talking machine department has gone far ahead of its November record, and while this is the first holiday season at the local store, it has been satisfactory in every way. With a large stock secured in advance, this was about the only house in the city able to sell all Victor machines without interruption. Mr. Anrys states that the department in Los Angeles just doubled its record for last Christmas.

Benj. Curtaz & Son have also had a fine run in talking machines, especially on the higher priced goods, and have very little stock on hand this week.

Clark Wise & Co. report the largest talking machine season they ever had, cleaning up the last of their Victrolas early in Christmas week. They say, in fact, that they lost several sales through lack of stock in this line, getting in a number of machines about the first of this week.

J. H. Wales of the talking machine department of the Heine Piano Co., was away at Christmas on account of the death of his father, his place being taken by Mr. Kempton, formerly with Kohler & Chase. Mr. Kempton will probably remain permanently with the house. The department is now in good order, and considering the fact that it is a new departure business is all that could be expected.

Andrew G. McCarthy, of Sherman, Clay & Co., says that in all his experience in the talking machine business he has never seen anything like the season just past. Wednesday, December 22, he says, was the biggest day for cash sales he ever saw, and on Christmas Eve there was hardly a Victor machine of any description left in the house. The wholesale department was entirely cleaned out in most lines several days before Christmas, and there was great difficulty in keeping the retail department supplied. Records as well as machines have had an enormous sale, the new Caruso records being especially in demand.

Kohler & Chase have moved all their talking machine stock from the Moore building, and have the department in the new structure completely fitted up. The stock will be placed on sale within a few days. It has not yet been announced just what arrangement has been made by this company with the Columbia Phonograph Co. It was supposed at first that other lines would be handled as in the past, but from present indications it looks as if the Columbia branch would take complete charge of the department and handle their goods only. If so, the company will be provided with a downtown store, giving excellent facilities for handling the local retail trade.

A number of the new Grafonola de luxe machines have been received by the Columbia office in San Francisco, but the holiday demand has cleaned up all the machines available, and it will be some time before the demand can be fully supplied. The company report an excellent outside business all through December. W. S. Storms, the traveling man, returned about two weeks ago from a visit to the dealers north

of the Bay, and says it was one of the best trips he ever had. Mr. Storms has been urging customers in the smaller towns to keep in closer touch with the latest developments in the trade by the regular perusal of the leading trade magazines.

McNeill & Co. have placed a very large order for Columbia machines to supply their stores at Fresno and Stockton, Cal. They report a larger business in the San Joaquin valley than ever before.

The Madsen Furniture Co., of San Jose, Cal., have been making a specialty of the Grafonola De Luxe, in which they have done a great business, selling more, in fact, than can be furnished promptly.

STEVENS TO SOUTH AMERICA.

Manager of the Export Department of the National Phonograph Co. Leaves for a Three-Months' Tour of South America January 20.

On January 20 Walter Stevens, manager of the export department of the National Phonograph Co., Orange, N. J., with headquarters in the Edison building at 10 Fifth avenue, New York, sails for a journey of three months in South American countries. He will visit all the chief cities on the east coast, including Para, Rio de Janeiro, and other ports in Brazil, Montevideo, Paraguay, but will devote the most of his time to the company's interests in Buenos Ayres, Argentine. Then he will go through the Straits of Magellan and stop at Punta Arenas, Chile, the southernmost city in the world. This will be the turning point. Mr. Stevens has never been to South America before, and therefore his first trip, in which he expects to make many valuable connections for the company, will be clothed with the additional charm of novelty.

TO MAKE FLEXIBLE RECORDS.

The Goodale Phonograph Co., Tacoma, Wash., have incorporated with capital stock of \$5,000,000, divided into 100,000 shares of \$50 each, to manufacture and market a flexible talking machine record or ribbon record, the invention of Dr. E. C. Goodale, of Tacoma.

The incorporators are E. C. Goodale, Pearl Goodale, A. H. Garretson, A. M. Garretson, C. R. Coombs and George Trust.

TALKING MACHINE AT FUNERAL.

The phonograph was used for the first time in a funeral service in Vineland, N. J., at the funeral of the wife of Councilman A. F. Gutterson on December 7. Mrs. Gutterson in life always said the phonograph could render "Beulah Land" and "The Home Over There" in sweeter tones than any singers of her acquaintance and requested that one be used at her funeral.

customer through the sales and publicity departments to the dealer and then through the medium of his organization to the final purchaser. The diagram which is reproduced herewith is calculated to show exactly just where each special link or department fits into the whole chain of Edison business phonograph distribution.

Another feature of Christmas "Tips" of particular interest is the fac-simile of the original patent drawing of the Edison business phonograph secured by Thomas A. Edison in 1878. Needless to say the original model would not be recognized in the practically perfect machine of

to-day, which is found to be almost indispensable in the business of every progressive business institution. The use of the business phonograph to-day is an evidence of the progressiveness of the concern using it. It is a synonym of success wherever used.

DO YOU TALK PINK OR GREEN?

California Professor Allows That Each Inflection of the Voice Has Its Distinctive Color—Tells of Yellows and Reds—"S" Is Yellow, While "I" Is Orange—"O's" and Double "O's" Are Brown, Blue, and Deep Red.

Prof. George M. Stratton, occupying the chair of psychology at the University of California, sees colors in the tones of the voice; or, rather, he knows how the colors are seen, and to the individual letters of the alphabet he describes individual hues.

The psychologist, applying motive power to a lawn-mower, was clicking out all the colors of the rainbow on his aerial lawn on the higher Berkeley Hills when interviewed on the subject yesterday.

"I do not claim any originality for what I have said in this regard," he remarked in what might be described as a thoughtful lavender voice.

"Francis Galton, the English scientist, went over the subject very thoroughly in his 'Human Faculty' many years ago.

"There are persons," he continued, speaking in more of a violet tone, "to whom single words, and even separate parts of a word, have individual hues.

"The S sound to anyone is a yellowish tone.

"The I is orange.

"The Z is reddish.

"Higher pitched letters, such as the short sound of I—the 'i' in 'it'—is apt to be brighter and warmer—say yellow or pink.

"The long O sound and the OO are darker. We might call them blue, brown or deep red."

FAC-SIMILE OF THE ORIGINAL PATENT DRAWING EDISON BUSINESS PHONOGRAPH.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Special to The Talking Machine World.) Washington, D. C., Jan. 10, 1910.

PROCESS OF MAKING PHONOGRAMS. Frank C. Applegate, Philadelphia, Pa., assignor by mesne assignments to Royal Phone & Phonogram Co., Boston, Mass. Patent No. 939,119.

This invention relates to the manufacture of cylindrical phono-grams of celluloid, xylonite or like material, and the object is to cheaply produce such phono-grams from sheet material and in which the united edges of the sheet run approximately circumferentially to eliminate the unpleasant knocking sound caused by a stylus striking a longitudinal joint during reproduction. Hitherto such phono-grams have been made of seamless tubular material and the cost has been excessive. Neither can tubes be manufactured thin enough to give the desired flexibility. Unsuccessful attempts have been made to use sheet material with a lap joint but such joint struck the stylus squarely at right angles to the line of motion and caused a clicking or knocking sound on each revolution of the record. In addition to this the lapping of the material made a double thickness at the joint which caused the record to run eccentrically with respect to the stylus.

Figure 1 is a view of the improved phono-gram on a mandrel. Fig. 2 is a cross sectional view of the structure of Fig. 1; Fig. 3 is a view of a backing for improved phono-gram; Fig. 4 is an end view of the structure of Fig. 3; Fig. 5 is a view of the structure of Fig. 3 with the facing ribbon secured thereto; Fig. 6 is an end view of the structure of Fig. 5; Fig. 7 is a view, partly in section, of a modified form of the improved phono-gram.

PHONOGRAM. Frank C. Applegate, Philadelphia, Pa., assignor by mesne assignments to Royal Phone & Phonogram Co., Boston, Mass. Patent No. 939,120.

This invention relates to cylindrical phono-grams of impressible material, such as celluloid, xylonite or the like material, and the object is to cheaply produce such phono-grams from sheet material and in which the united edges of the sheet run approximately circumferentially to eliminate the unpleasant knocking sound caused by a stylus striking a longitudinal joint during reproduction.

Hitherto such phono-grams have been made of seamless tubular material and the cost has been excessive. It has been found impracticable to commercially produce tubes thin enough to give the desired flexibility. Unsuccessful attempts have been made to use sheet material with a lap joint, but such joint struck the stylus squarely at right angles to the line of motion and caused a clicking or knocking sound at each revolution of the record.

Figure 1 is a view of the improved phono-gram on a mandrel; Fig. 2 a cross sectional view

of the structure of Fig. 1; Fig. 3 a view of the backing of improved phono-gram; Fig. 4 an end view of the structure of Fig. 3; Fig. 5 a view of the structure of Fig. 3 with the facing ribbon secured thereto; Fig. 6 an end view of the structure of Fig. 5; Fig. 7 a view, partly in section, of a modified form of the improved phono-gram; and Fig. 8 a view of a lapped joint facing.

PHONOGRAPH. Frank E. Holman, Silverton, Oreg., assignor of one-half to John E. Innis, same place. Patent No. 939,692.

This invention relates to improvements in means for increasing the available recording surface in phonographs, and an object of the invention is to provide a phonograph in which the record surface of a flexible nature and having a relatively great length may be inserted or re-

moved, and in which the bearing members for the cylinder are pivoted to admit the removal or replacement of the record. A further object is to provide a record applicable to a cylinder type, in which the virtual diameter of the record is greatly increased, while the actual diameter is not.

COMBINED GRAPHOPHONE-HORN AND RECORD-CASE. Walter Smith, Viropa, W. Va. Patent No. 939,753.

This invention relates to a combined graphophone horn and record case, the object of the invention being to provide a collapsible horn composed of telescopic sections, the outer section carrying means for supporting a series of records, together with a case or receptacle in which the collapsed horn and records are adapted to be stored for ready and convenient transportation.

Figure 1 is a vertical longitudinal section through the graphophone horn and case embodying this invention, showing the horn arranged in position for removal or collapse. Fig. 2 is a top plan view of the horn and records stored within the casing, the cover of the latter being partially broken away. Fig. 3 is a sectional view through the closed casing, showing the parts stored therein.

TALKING MACHINE. Warren W. Wooster, Berlin, N. J. Patent No. 939,781.

This invention relates to a new and useful talk-

ing machine and consists in providing two sound boxes and stylus holders with means whereby one or the other of said sound boxes and style are caused to contact with a record. It further consists in providing means whereby one of the

sound boxes and styli may be placed into contact with the record upon one side thereof and at the proper time will be thrown out of contact therewith and the other stylus and sound box will be thrown into operative position.

Figure 1 represents a partial elevation and partial sectional view of a talking machine embodying the invention. Fig. 2 represents a front elevation of a portion of the connecting mechanism for the yoke and the sound box holder. Fig. 3 represents a vertical section view thereof. Fig.

4 represents a sectional view on line x-x, Fig. 3. Fig. 5 represents a partial plan view with the horn attachment removed, of the device shown in Fig. 1. Fig. 6 represents in elevation, a view of the lower connecting mechanism for

the yoke and sound box holder. Fig. 7 represents a sectional view showing the catches employed. Fig. 8 represents a side elevation of a portion of the device showing both of the sound boxes and stylus holders out of engagement with the

record. Fig. 9 represents a side elevation showing the lower stylus in operative position with the upper stylus holder out of contact with the record. Fig. 10 represents a side elevation showing the lower sound box and stylus out of contact with the record and the upper sound box and stylus in operative position. Fig. 11 represents a side elevation showing both needles and styli in engagement with the record on opposite sides thereof. Fig. 12 represents in elevation, a portion of a talking machine showing two records in position. Fig. 13 represents an elevation of a portion of the device.

TALKING MACHINE. L. P. Vaiquet, Newark, N. J., assignor to Complex Aural Co., same place. Patent No. 938,185.

This invention relates to talking machines, and particularly comprises an improved form of sound board or sound modifying and amplifying device for application thereto.

While this invention may be applied to all forms of talking machines, it is particularly adapted in the form shown for use on the ordinary disc record talking machine.

Figure 1 is a side elevation of a portion of a talking machine with one form of invention applied thereto, the sounding board and attached parts being shown partly in section, and partly broken away. Fig. 2 is a front elevation of the particular form of sound receptacle, which takes the place of the usual horn, forming a part of the invention. Fig. 3 is a front elevation of a modified form of sounding board attached to such sound receptacle, and Fig. 4 is a detail cross-section on line 4-4 of Fig. 3.

PHONOGRAPH. Peter Weber, Orange, N. J., assignor to New Jersey Patent Co., West Orange, N. J. Patent No. 937,905.

This invention relates to phonographs and has for its object the provision of (1) means applied to the traveling sound box carriage which permits a slight elevation thereof, such as is necessary in order that the sound record may be applied to or removed from the mandrel, but which

prevents the said carriage from being raised more than the slight distance referred to; and (2) an improved form of interchangeable gearing for operatively connecting the mandrel and feed screw shaft, and which can be shifted so as to change the relative speeds of said rotary members, whereby the instrument will be capable of operating upon sound records of different pitch, as for example, sound records having respectively one hundred and two hundred threads per inch.

Figure 1 is a front elevation, partly in sec-

tion, showing a phonograph constructed in accordance with the invention; Fig. 2 is a plan view of a portion of the phonograph showing the interchangeable gears for operatively connecting the mandrel and feed screw shaft; Fig. 3 is a side elevation of the base of the phonograph and its driving motor as viewed from the right in Fig. 1; Fig. 4 is a side elevation of the phonograph as viewed from the left, Fig. 1; Fig. 5 is a detail side view of the movable frame or support which carries a part of the interchangeable gear mechanism; Fig. 6 is a rear view of the same; and Fig. 7 is a detail plan view of the means for holding the starting and stopping lever.

SOUND-REPRODUCER. Alexander N. Pierman, Newark, N. J., assignor to New Jersey Patent Co., West Orange, N. J. Patent No. 940,051.

This invention relates to sound reproducers of the type wherein the rate of flow of elastic fluid through the ports of a valve situated between chambers in a sound box is varied in accordance with the movements of the reproducing stylus tracking a sound record, whereby the current of the fluid is thrown into vibrations corresponding in form to those which were originally caused by the production of sound in the formation of the original record, but which are of greater amplitude than the original vibrations causing an amplified reproduction of the said sounds.

The object of the invention is to provide a device of this character in which an even greater amplification of the sounds in the reproduction thereof is attained by the combination with the above described means for varying the rate of flow of the elastic fluid through the valve, of co-acting friction means and lever means.

HORN FOR TALKING MACHINE. Thomas A. Edison, Orange, N. J. Patent No. 943,663.

This invention relates to improvements in horns adapted for use with phonographs or other talking machines, and the object is to produce a horn adapted particularly for recording purposes and by which superior results will be secured.

In carrying the invention into effect, the inventor makes use of a funnel that is incapable of vibrating under the effect of ordinary sounds used in this art, by forming it with thick walls presenting, at all points of its longitudinal section, the shape of a truss and composed of some dead, non-metallic material, like plaster of paris, coated with a hard, smooth varnish. He has, in fact, constructed a funnel for the purpose, weighing as much as a ton, and whose mouth is several feet in diameter, and which gives no sympathetic tones, due to its walls vibrating, and which absorbs any energy from the sound waves by having its mass set in vibration.

Reference is hereby made to the accompanying drawing, which shows in axial section a funnel constructed in accordance with the invention. It will be observed that the wall or walls 1 of the funnel are of maximum thickness at a point between its ends and that the thickness decreases gradually toward each end, so that a section thereof is in outline the form of an ordinary truss.

SOUND-RECORDING APPARATUS. Thomas A. Edison, Orange, N. J., assignor to New Jersey Patent Co., same place. Patent No. 943,664.

This invention relates to an improved apparatus for recording sounds, preferably of the phonograph type, wherein the record is of varying depth and width, but it may be utilized in connection with gramophonic apparatus wherein the record is of the same depth and width, but of sinuous formation.

The object of the invention is to eliminate, as far as possible, sympathetic vibrations in sound-recording apparatus, whereby the vibrations will be always forced and the recording of extraneous or distorted sound waves will be prevented.

Figure 1 is a longitudinal view on an enlarged scale of a phonographic recording apparatus embodying the invention in its preferred form; Fig. 2 a plan view of the same, and Fig. 3 an enlarged sectional view of a part of the diaphragm.

PHONOGRAPH. Herbert S. Mills, Chicago, Ill. Patent No. 943,313.

This invention relates to improvements in phonographs, and particularly to that class which is intended for use in coin-controlled machines in which it is desired to repeat the record each time a coin is inserted in the machine.

The object is to provide a phonograph, of this class, of novel and improved construction, and the invention constitutes an improvement on that described in application No. 352,672, filed Jan. 17, 1907.

SOUND-BOX. William A. Chapman, Smithville, Ark. Patent No. 943,339.

This invention relates to sound-boxes for phonographs, talking machines and the like, and more particularly to devices of this class which include a casing, a diaphragm suitably mounted within the casing, a stylus bar controlling the diaphragm and having a yoke, means for resiliently holding the yoke with respect to the casing and means for mounting the stylus bar, whereby the same can swing transversely of the plane of the diaphragm, and whereby the direction of

pressure upon the bar, due to the weight of the box and the drag of the needle upon the record, is substantially vertical when the box is in the inclined, operative position, preferably at an angle of 45 degrees with the horizontal.

The invention also includes means for removably attaching the needle point to the stylus bar and for mounting the diaphragm in the casing.

An object of the invention is to provide a simple, inexpensive and efficient sound-box for reproducing or recording the sounds by means of records employed in phonographs, talking machines and similar apparatus, by means of which the sounds can be reproduced with clearness and distinctness, and with all their original tonal qualities, and in which the relatively movable parts are not subjected to excessive wear.

Figure 1 is a front elevation, partly in section, showing a phonograph constructed in accordance with the invention; Fig. 2 is a plan view of a portion of the phonograph showing the interchangeable gears for operatively connecting the mandrel and feed screw shaft; Fig. 3 is a side elevation of the base of the phonograph and its driving motor as viewed from the right in Fig. 1; Fig. 4 is a side elevation of the phonograph as viewed from the left, Fig. 1; Fig. 5 is a detail side view of the movable frame or support which carries a part of the interchangeable gear mechanism; Fig. 6 is a rear view of the same; and Fig. 7 is a detail plan view of the means for holding the starting and stopping lever.

Figure 1 is a longitudinal view on an enlarged scale of a phonographic recording apparatus embodying the invention in its preferred form; Fig. 2 a plan view of the same, and Fig. 3 an enlarged sectional view of a part of the diaphragm.

Figure 1 is a front elevation, partly in section, showing a phonograph constructed in accordance with the invention; Fig. 2 is a plan view of a portion of the phonograph showing the interchangeable gears for operatively connecting the mandrel and feed screw shaft; Fig. 3 is a side elevation of the base of the phonograph and its driving motor as viewed from the right in Fig. 1; Fig. 4 is a side elevation of the phonograph as viewed from the left, Fig. 1; Fig. 5 is a detail side view of the movable frame or support which carries a part of the interchangeable gear mechanism; Fig. 6 is a rear view of the same; and Fig. 7 is a detail plan view of the means for holding the starting and stopping lever.

Figure 1 is a longitudinal view on an enlarged scale of a phonographic recording apparatus embodying the invention in its preferred form; Fig. 2 a plan view of the same, and Fig. 3 an enlarged sectional view of a part of the diaphragm.

Figure 1 is a longitudinal view on an enlarged scale of a phonographic recording apparatus embodying the invention in its preferred form; Fig. 2 a plan view of the same, and Fig. 3 an enlarged sectional view of a part of the diaphragm.

Figure 1 is a longitudinal view on an enlarged scale of a phonographic recording apparatus embodying the invention in its preferred form; Fig. 2 a plan view of the same, and Fig. 3 an enlarged sectional view of a part of the diaphragm.

Figure 1 is a longitudinal view on an enlarged scale of a phonographic recording apparatus embodying the invention in its preferred form; Fig. 2 a plan view of the same, and Fig. 3 an enlarged sectional view of a part of the diaphragm.

Reference is hereby made to the accompanying drawing, which shows in axial section a funnel constructed in accordance with the invention. It will be observed that the wall or walls 1 of the funnel are of maximum thickness at a point between its ends and that the thickness decreases gradually toward each end, so that a section thereof is in outline the form of an ordinary truss.

SOUND-RECORDING APPARATUS. Thomas A. Edison, Orange, N. J., assignor to New Jersey Patent Co., same place. Patent No. 943,664.

This invention relates to an improved apparatus for recording sounds, preferably of the phonograph type, wherein the record is of varying depth and width, but it may be utilized in connection with gramophonic apparatus wherein the record is of the same depth and width, but of sinuous formation.

The object of the invention is to eliminate, as far as possible, sympathetic vibrations in sound-recording apparatus, whereby the vibrations will be always forced and the recording of extraneous or distorted sound waves will be prevented.

Figure 1 is a longitudinal view on an enlarged scale of a phonographic recording apparatus embodying the invention in its preferred form; Fig. 2 a plan view of the same, and Fig. 3 an enlarged sectional view of a part of the diaphragm.

PHONOGRAPH. Herbert S. Mills, Chicago, Ill. Patent No. 943,313.

This invention relates to improvements in phonographs, and particularly to that class which is intended for use in coin-controlled machines in which it is desired to repeat the record each time a coin is inserted in the machine.

The object is to provide a phonograph, of this class, of novel and improved construction, and the invention constitutes an improvement on that described in application No. 352,672, filed Jan. 17, 1907.

SOUND-BOX. William A. Chapman, Smithville, Ark. Patent No. 943,339.

This invention relates to sound-boxes for phonographs, talking machines and the like, and more particularly to devices of this class which include a casing, a diaphragm suitably mounted within the casing, a stylus bar controlling the diaphragm and having a yoke, means for resiliently holding the yoke with respect to the casing and means for mounting the stylus bar, whereby the same can swing transversely of the plane of the diaphragm, and whereby the direction of

pressure upon the bar, due to the weight of the box and the drag of the needle upon the record, is substantially vertical when the box is in the inclined, operative position, preferably at an angle of 45 degrees with the horizontal.

The invention also includes means for removably attaching the needle point to the stylus bar and for mounting the diaphragm in the casing.

An object of the invention is to provide a simple, inexpensive and efficient sound-box for reproducing or recording the sounds by means of records employed in phonographs, talking machines and similar apparatus, by means of which the sounds can be reproduced with clearness and distinctness, and with all their original tonal qualities, and in which the relatively movable parts are not subjected to excessive wear.

Figure 1 is a front elevation, partly in section, showing a phonograph constructed in accordance with the invention; Fig. 2 is a plan view of a portion of the phonograph showing the interchangeable gears for operatively connecting the mandrel and feed screw shaft; Fig. 3 is a side elevation of the base of the phonograph and its driving motor as viewed from the right in Fig. 1; Fig. 4 is a side elevation of the phonograph as viewed from the left, Fig. 1; Fig. 5 is a detail side view of the movable frame or support which carries a part of the interchangeable gear mechanism; Fig. 6 is a rear view of the same; and Fig. 7 is a detail plan view of the means for holding the starting and stopping lever.

Figure 1 is a longitudinal view on an enlarged scale of a phonographic recording apparatus embodying the invention in its preferred form; Fig. 2 a plan view of the same, and Fig. 3 an enlarged sectional view of a part of the diaphragm.

Figure 1 is a front elevation, partly in section, showing a phonograph constructed in accordance with the invention; Fig. 2 is a plan view of a portion of the phonograph showing the interchangeable gears for operatively connecting the mandrel and feed screw shaft; Fig. 3 is a side elevation of the base of the phonograph and its driving motor as viewed from the right in Fig. 1; Fig. 4 is a side elevation of the phonograph as viewed from the left, Fig. 1; Fig. 5 is a detail side view of the movable frame or support which carries a part of the interchangeable gear mechanism; Fig. 6 is a rear view of the same; and Fig. 7 is a detail plan view of the means for holding the starting and stopping lever.

Figure 1 is a longitudinal view on an enlarged scale of a phonographic recording apparatus embodying the invention in its preferred form; Fig. 2 a plan view of the same, and Fig. 3 an enlarged sectional view of a part of the diaphragm.

Figure 1 is a longitudinal view on an enlarged scale of a phonographic recording apparatus embodying the invention in its preferred form; Fig. 2 a plan view of the same, and Fig. 3 an enlarged sectional view of a part of the diaphragm.

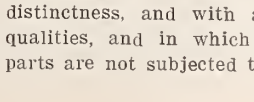

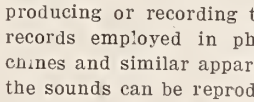

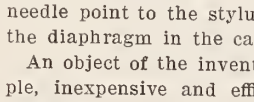

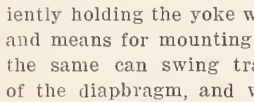

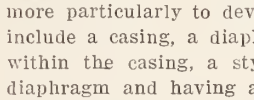

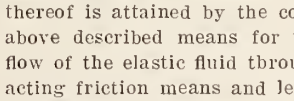

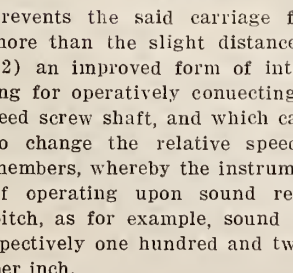

Figure 1 is a longitudinal view on an enlarged scale of a phonographic recording apparatus embodying the invention in its preferred form; Fig. 2 a plan view of the same, and Fig. 3 an enlarged sectional view of a part of the diaphragm.

PHONOGRAPH. Herbert S. Mills, Chicago, Ill. Patent No. 943,313.

This invention relates to improvements in phonographs, and particularly to that class which is intended for use in coin-controlled machines in which it is desired to repeat the record each time a coin is inserted in the machine.

The object is to provide a phonograph, of this class, of novel and improved construction, and the invention constitutes an improvement on that described in application No. 352,672, filed Jan. 17, 1907.

SOUND-BOX. William A. Chapman, Smithville, Ark. Patent No. 943,339.

This invention relates to sound-boxes for phonographs, talking machines and the like, and more particularly to devices of this class which include a casing, a diaphragm suitably mounted within the casing, a stylus bar controlling the diaphragm and having a yoke, means for resiliently holding the yoke with respect to the casing and means for mounting the stylus bar, whereby the same can swing transversely of the plane of the diaphragm, and whereby the direction of

pressure upon the bar, due to the weight of the box and the drag of the needle upon the record, is substantially vertical when the box is in the inclined, operative position, preferably at an angle of 45 degrees with the horizontal.

The invention also includes means for removably attaching the needle point to the stylus bar and for mounting the diaphragm in the casing.

An object of the invention is to provide a simple, inexpensive and efficient sound-box for reproducing or recording the sounds by means of records employed in phonographs, talking machines and similar apparatus, by means of which the sounds can be reproduced with clearness and distinctness, and with all their original tonal qualities, and in which the relatively movable parts are not subjected to excessive wear.

Figure 1 is a front elevation, partly in section, showing a phonograph constructed in accordance with the invention; Fig. 2 is a plan view of a portion of the phonograph showing the interchangeable gears for operatively connecting the mandrel and feed screw shaft; Fig. 3 is a side elevation of the base of the phonograph and its driving motor as viewed from the right in Fig. 1; Fig. 4 is a side elevation of the phonograph as viewed from the left, Fig. 1; Fig. 5 is a detail side view of the movable frame or support which carries a part of the interchangeable gear mechanism; Fig. 6 is a rear view of the same; and Fig. 7 is a detail plan view of the means for holding the starting and stopping lever.

Figure 1 is a longitudinal view on an enlarged scale of a phonographic recording apparatus embodying the invention in its preferred form; Fig. 2 a plan view of the same, and Fig. 3 an enlarged sectional view of a part of the diaphragm.

Figure 1 is a front elevation, partly in section, showing a phonograph constructed in accordance with the invention; Fig. 2 is a plan view of a portion of the phonograph showing the interchangeable gears for operatively connecting the mandrel and feed screw shaft; Fig. 3 is a side elevation of the base of the phonograph and its driving motor as viewed from the right in Fig. 1; Fig. 4 is a side elevation of the phonograph as viewed from the left, Fig. 1; Fig. 5 is a detail side view of the movable frame or support which carries a part of the interchangeable gear mechanism; Fig. 6 is a rear view of the same; and Fig. 7 is a detail plan view of the means for holding the starting and stopping lever.

Figure 1 is a longitudinal view on an enlarged scale of a phonographic recording apparatus embodying the invention in its preferred form; Fig. 2 a plan view of the same, and Fig. 3 an enlarged sectional view of a part of the diaphragm.

Figure 1 is a longitudinal view on an enlarged scale of a phonographic recording apparatus embodying the invention in its preferred form; Fig. 2 a plan view of the same, and Fig. 3 an enlarged sectional view of a part of the diaphragm.

Fig. 1 is a front elevation of an embodiment of the invention having parts broken away and in cross-section and showing the same in the normal, inclined and operative position; Fig. 2 is a longitudinal section on the line 2—2 of Fig. 1, and Fig. 3 is a cross-section on the line 3—3 of Fig. 1.

MANDREL FOR PHONOGRAPH RECORDS. Walter C. Runge, Camden, N. J., assignor to Royal Phone & Phonogram Co., Boston, Mass. Patent No. 943,568.

Some phonographs are provided with tubular mandrels which may be slipped on and off the arbor of a phonograph and have phonograph records tubularly engaged with them. This invention relates to such a mandrel made capable of expanding and contracting for the purpose of respectively securing and releasing a phonograph record.

In the accompanying drawings Fig. 1 is a side view of a mandrel embodying the improvement.

Fig. 2 is a section through a portion of the circumference to illustrate the means of connecting segments which are comprised in the mandrel. Fig. 3 is a central longitudinal section of the mandrel. Fig. 4 is a transverse section of a mandrel taken at the plane of the line 4—4 in Fig. 3. Fig. 5 is a transverse section of a mandrel taken at the plane of the line 5—5 in Fig. 3.

MANUFACTURE OF RECORDS FOR SOUND-REPRODUCING MACHINES. Robert L. Gibson, Philadelphia, Pa. Patent No. 943,631.

This invention has reference to the manufacture of records for sound-reproducing machines, and consists of certain improvements which are fully set forth in the following specification and shown in the accompanying drawings, which form a part thereof:

Fig. 1 is an elevation illustrating diagrammatically the manner of allowing the spirals of the deposited material in the operation of a recording instrument; Fig. 2 is a cross-section of a portion of the prepared master pattern; Fig. 3 is a similar cross-section after the deposition of the copper preliminary to stripping; Fig. 4 is a cross-section of the stripped matrix suitably backed; Fig. 5 is a cross-section corresponding to Fig. 2, but in which the deposited material is in rope-like form; Fig. 6 is a similar cross-section showing the manner of depositing the copper thereon in the production of the metal record; Fig. 7 is a plan view of a portion of the master record before electroplating, and Fig. 8 is a cross-section of a portion of a die produced from the metal record.

PHONIC APPARATUS. Thomas H. Macdonald, Bridgeport, Conn., assignor to the American Graphophone Co., same place. Patent No. 942,089.

This invention relates to machines for recording and reproducing sounds, and particularly to machines of the type wherein frictional force is employed to actuate a diaphragm or other secondary vibrating means, the sonorous vibrations being employed to modify such frictional force and to mold it, so to speak, into the form of sound waves. Apparatus of this type is de-

scribed in U. S. Patent No. 678,566, granted July 16, 1901, to Daniel Higham.

The object of the present invention is to furnish mechanism for carrying out, in a practical way, the invention of said patent and other improvements invented by said Higham which have not yet been made public.

Fig. 1 is a front elevation and Fig. 2 is a cross-section of a graphophone, which is or may be of any known or suitable type; Fig. 3 is a plan view of a detail; Fig. 4 is a view, with parts in section, of the combined weight-lifting and carriage feed-disconnecting means embodied in a graphophone not employing the intermediate sound-amplifying means illustrated in the preceding figures. Fig. 5 is a front view of Fig. 4, and Fig. 6 is a detail of a reproducer embodying part of the invention.

PHONOGRAPH. Peter Weber, Orange, N. J., assignor to the New Jersey Patent Co., same place. Patent No. 942,475.

This invention relates to phonographs and has for its object the provision of interchangeable means for feeding the traveling carriage upon which the sound-box is mounted at either of two rates of speed, one of which may be suitable for operating upon a record of 100 threads per inch and the other for operating upon a record having 200 threads per inch. The particular means employed by it comprise a hollow rotary feed screw mounted concentrically with respect to an inner shaft and capable of being locked to said shaft so as to rotate therewith, or of being unlocked therefrom and driven through interposed gearing so as to rotate at a different rate of speed.

Fig. 1 is a plan view, partly in section of a phonograph constructed in accordance with the invention, the parts being arranged for feeding the sound-box carriage at a suitable speed for operating upon records having 200 threads per inch; Fig. 2 is a similar view showing the parts arranged for feeding the carriage at a suitable speed for operating upon records having threads per inch; Fig. 3 is a section on line 3—3 of Fig. 1; Fig. 4 is an end view of the feed screw shaft, and Fig. 5 is a face view of the sleeve which engages the end of the said shaft.

SOUND-BOX FOR TALKING MACHINES. Alex. Fischer, Kensington, London, Eng. Patent No. 942,816.

This invention relates to improvements in the construction of sound-boxes for talking machines of the disc type and refers to certain details forming part of former application for sound-boxes filed February 3, 1908, Serial No. 414,070, of which the present application is a division.

The present application refers particularly to the construction of the backs of sound-boxes and to means for connecting the sound-box to the tone arm or trumpet.

Figure 1 shows a side elevation of a sound-box partly in section; Fig. 2 shows plan of same; Fig. 3 shows a modified form of the invention.

PRODUCTION OF DOUBLE-FACED SOUND RECORDS. Frank L. Capps, Bridgeport, Conn., assignor to the American Graphophone Co., same place. Patent No. 941,975.

This invention relates to the production of the so-called "double-faced" disc sound records, which are commonly of the zigzag variety, although they may also be of the vertically undulating type.

In the drawings Figure 1 represents a steam table on which matrices are being heated; Fig. 2 represents a work table, containing (shown in cross-section) two dies, and certain other articles indicated as not quite in final position; Fig. 3 is a similar view of the same at a later stage; Fig. 4 represents the dies with their contents in position in a press, and Fig. 5 is a cross-section of the final article. The thickness of the parts constituting the record is exaggerated in drawings for the sake of clearness.

SOUND-BOX FOR TALKING MACHINES. John C. English, Camden, N. J., assignor to Victor Talking Machine Co., same place. Patent No. 940,795.

This invention relates to improvements in sound-boxes, and the objects of the invention are to provide an improved mounting for a stylus bar, in which an adjustable tension is exerted upon the bar to restrain the oscillation thereof, and to provide other improvements.

In the drawing Figure 1 is an elevation of the sound-box, showing a part of the casing and stylus bar mounting mechanism in section; Fig. 2 is a sectional elevation thereof taken on lines 2—2 of Fig. 1; Fig. 3 is a bottom plan view of the sound-box, showing a transverse section of the stylus bar mounting taken on line 3—3 of Fig. 2; Fig. 4 shows perspective views of several parts of the stylus bar mounting detached, and Fig. 5 is a sectional elevation of the sound-box, showing a modified form of the stylus bar mounting.

WU TING FANG CALLS ON EDISON.

Visits National Phonograph Co. Factory for the Purpose and While There Makes Record—How He Was Impressed with the Great Plant—Wu a Man of Quick Wit.

On the day before Christmas Dr. Wu Ting-fang, the retiring minister plenipotentiary from China to the United States, visited the factory of the National Phonograph Co., Orange, N. J., for the purpose specifically of meeting Thomas A. Edison, and looking over the wonderful laboratory and plant. While there Mr. Edison invited the distinguished Chinese diplomat to record his voice, which was accepted with amiability and alacrity. The record follows:

"December 24, 1909. Mr. Edison has just shown me a great many wonderful things that he has invented. He is a great man. I have heard about him for many years and have always wanted to meet him. He also heard of me, and I think we are both glad that we met. He is a remarkable inventor, but this is the twentieth century, the age of great things. Mr. Edison is still a young man, and he will do still more wonderful things.
WU TING-FANG."

Dr. Wu laughed heartily when the fraction of a second later his own words were repeated through the recording horn. It will not go on sale, but will be distributed probably. He arose,

shook hands with Mr. Edison and asked, "Have you ever visited China?"

"No," replied Mr. Edison.

"Well, I want you to come over to see me. I'll treat you to some fine bird's nest soup."

"All right, I'll call on you some day," said Mr. Edison.

"Do so," said Dr. Wu. "I'll come back and see you again twenty or thirty years from now, and you'll show me some more wonderful things. We can live that long because we know the right way to live."

Charles R. Flint, of Flint, Eddy & Co., New York, American financier, who is largely interested in Chinese enterprises, and who was host to Dr. Wu on the trip to the National Phonograph Co.'s plant, observed: "Mr. Edison, Dr. Wu is the quickest man at repartee that I have ever met. The other day when we were in Philadelphia he delivered an address on Chinese customs. He expatiated on the habit of Chinese women binding their feet, and told what suffering it caused and what a foolish thing it was altogether, and just added incidentally: 'I wonder if it is as bad as wearing tightly laced corsets.'"

"Ha, ha," laughed Mr. Edison, "he's on to the white man, all right."

Dr. Wu, who expressed his great satisfaction in meeting Mr. Edison and the wonders of the Edison works, has been in this country for about thirteen years. He is now on the eve of

returning to his own country, to give to his countrymen the advantage of his observations. He will leave here on Wednesday for England, and will go to Paris, Hamburg, Berlin, Vienna, Naples, leaving for a Mediterranean port for his own country via the Suez Canal.

VICTOR CO. DISTRIBUTE TURKEYS.

The Victor Talking Machine Co., Camden, N. J., following out their usual custom, distributed more than 2,000 turkeys, each accompanied by a quart of cranberries, to their employes on Christmas eve. It is said that the contract price for the poultry was more than \$7,000.

TEXAS DEALERS ADD TALKERS.

The John J. Winter store, Fort Worth, Tex., which opened some months ago, handling several lines of pianos, recently took in the Victor line of talking machines, and did a very satisfactory business with them during the holidays.

Edmond F. Sause, assistant to Edward N. Burns, manager of the Columbia Phonograph Co.'s export department, who made a trip to Cuba, returning last week, said: "I found business very good, but the political affairs of the island are not ideal. The sugar crop, however, will be the largest ever gathered, and this will go far toward making conditions more satisfactory."

The TALKING MACHINE AND NOVELTY NEWS SIDE LINE SECTION

NEW YORK, JANUARY 15, 1910

DEALERS DEMAND GOOD SIDE LINES.

Developments in Growth of Talking Machine Business Create Actual Necessity for the Carrying of Other Goods—A New and Fertile Field for Agencies in Certain Lines.

Many talking machine dealers have written to The Talking Machine World for advice as to what are promising goods to carry as side lines. We have received hundreds of such letters, written by dealers in every State in the country. These dealers, having received carefully considered replies from us, know what we have to say on this subject. To the dealers who have not written, but who, of course, are confronted with the same problems as those who have, we would say that we shall at any time gladly give our earnest attention to each letter written us regarding side lines. As a matter of fact, the mail each morning never fails to contain requests for information as to this or that possibility as a side line, as to its selling qualities, the standing of its sponsors, and so on.

You among the talking machine dealers who have thus consulted with us are, naturally, but a small proportion of those who are guided more or less by our advice as to side lines which we publish from time to time in these columns. For each man who takes the trouble to sit down and write a personal letter to a magazine there are undoubtedly twenty or thirty who have had the same thoughts, but who have not reached the point of putting them on paper. Now, that so many have written of their own volition, we want all dealers to feel as free to consult us on the subject of side lines as they do in regard to talking machine matters.

Here in New York City there are so many large dealers who handle talking machines and allied lines exclusively that knowledge among some of them is, after all, rather limited as to the tremendously wide scope of the side line dealings in talking machine stores throughout the country as a whole. The proprietors of those latter stores are fully aware of the fact, however, and are alive to their opportunities. It is a fresh and fertile field for the manufacturers or distributors, who have already obtained splendid results from this source. There are a number of talking machine dealers in Manhattan, nevertheless, who have fine stocks of side lines. Their stores are large, well-arranged and prosperous. The number of lines they carry is simply amazing, and these are in stock for the very good reason that there is demand for them from customers. Out in the other States, however, the number of talking machine dealers who carry side lines runs well above 8,000.

The reason is obvious. For one thing, whoever buys a talking machine outright is usually a man or woman so situated financially that he or she can buy anything desired. Then, too, the dealer wants to keep his customers interested in what he has to offer, and to obtain as much as possible of their business. Consequently, he keeps in stock various lines of goods. These he presents to his customer's notice at times when the latter is looking at things other than talking

machines. And when the talking machine business is dull the dealer has a good variety of goods with which to attract trade. Especially, however, the dealer finds side lines valuable after he has sold a talking machine to a customer. In these days when talking machines are sold on the instalment plan, in cases numbered by the thousand, the dealer and his customers maintain their relations for months at a time—until the machines are paid for, and then while new records, needles, etc., are purchased. In the course of these weeks and months it is an actual absurdity to suppose that the customers would not buy of the dealers on whom they are calling regularly their sporting goods, souvenir post cards, safety razors, popular-priced watches, toys, fountain pens, electrical novelties, cameras, vacuum bottles, fine stationery, toilet articles, and so on in infinite variety. The dealers, knowing this, are for the most part careful to keep such goods attractively displayed.

Recent letters to this office prove that talking machine dealers are on the alert for agencies for goods which, although too expensive for them to carry in stock, are established sellers. A dealer, for instance, can sell a man a standard typewriter or a famous make of gun or revolver of which he has only a sample on hand. In fact, this is being done on all sides, and this opportunity is being taken advantage of by the dealers to a greater and greater extent. On investigation we have come across some interesting facts in this connection—more of which later.

It all means that the thousands of dealers who have entered the retail talking machine business have done so because they are men who recognize the signs of the times; who are alert to hear the knocking of opportunity at their doors, and who, for these very reasons, are proved to be live, progressive men who put energy and ability into making a success of whatever they undertake in the way of goods or agencies.

AN IMPORTANT FEATURE.

Good Field and Fine Line Both Lose Much Value Unless an Attractive Display Is Made.

The chief object of the business man in every line of merchandise is to find the buyer, and, having corralled him, to sell. This object is always before him, and upon its solution hangs the alternative of success and non-success. Between the buyer and seller there is always an interval, more or less lengthy and arduous, to be traveled, before the final interview takes place and the bargain is struck.

The merchant who would sell to the buyer must have the right goods to dispose of, to begin with. Having these, the next step is to interest the public. If this is done in the proper way, an irresistible desire to possess is created. When that stage is reached, the rest is comparatively easy sailing, for the man who cherishes an eager longing for anything is sure to gratify his desire, sooner or later, by purchasing, if he can afford the price. It is the special province of the show window to attract the public attention,

with a special regard to securing this end. The display that makes the passerby pause on his way, and look in, has achieved its first purpose—though not its last.

To interest is one thing; to stir up an active desire to purchase is something quite different. A thing out of place—a litter of pups in a bookseller's window, for instance—may draw a crowd and excite much comment, but it does not bring custom on that account. Displays of this kind are known as grotesque, and, though a few of them are still to be seen, experience proves that they are not money-getters. The dealer who sets out to do things should see that he does them with due regard to their logical sequence. Everything in a process should be related. One thing should lead up to the next in order. The absence of connection has ruined the effectiveness, from the viewpoint of sales, of many displays otherwise commendable.

SAFETY RAZORS BIG SELLERS.

Talking Machine Men Enthusiastic Over This Line as Custom Makers.

During some extensive trips the past month The World has had an opportunity of getting into close physical touch with a large number of talking machine men, and we have taken the trouble to investigate how safety razors and accessories are "panning out" as a side line with those who have handled them for some time. In view of what we learned we can unhesitatingly recommend this line to anyone desiring a live seller which has at the same time that added feature—a good profit. Of course, like in other lines, there are good and bad razors, and while we cannot, of course, be specific we would certainly recommend those that have stood the test of constant use and are well known to the public, for there is no question about the selling value of a name or trade-mark that is well and favorably known.

AMERICAN PICTURE CARDS POPULAR.

The picture post cards of American manufacture are increasing in popularity with discriminating buyers, and in many instances are being preferred to imported European cards. This is due, of course, to a high standard of workmanship, and one firm in particular, the National Colortype Co., of Cincinnati, O., have made rapid strides in improving this great American industry. They have devoted many years experimenting and improving hand colored cards, and are now in a position to deliver orders in two to three weeks, whereas four to six months are required to procure foreign cards. They will gladly send you a set of sample post cards if you mention The Talking Machine World.

The assets of the Vitak Co., bankrupts, were sold at public auction on Thursday, January 6, by order of the courts. The articles consisted of dies, tools used to manufacture parts for Home moving picture machines and also the patents.

THE SIDE LINE SECTION

NEW YORK, JANUARY 15, 1910

A GOOD YEAR'S BUSINESS

Enjoyed by Those Dealers Handling Sporting Goods—Little Damage Done by New Laws—A Summary of Conditions.

Talking machine dealers who have handled sporting goods as a side line during the past year and those who are thinking of embarking in such a venture this year, should be interested in the rosy report on the happenings of the sporting goods trade of 1909 as published in the Sporting Goods Dealer.

The past year rendered three material services—times services let us call them, by way of emphasizing the point as we would here make it—to the sporting goods trade. In the first place, 1909 took care of itself in a very admirable way. This is really all that can be fairly asked of any period of time. The man, the business or the season that holds an even course, showing normal development, gives a good account of himself—of itself—by that fact alone. But 1909 did more than that. It enabled the trade to get rid of many accumulations carried over from the depressed period that preceded it. Finally, 1909 witnessed the shaping of things in such a way as to serve as an excellent introduction to 1910. In this way it rendered the three-fold service above spoken of. Nothing better can be said of any year than that it maintains itself, settles the troubles of the past, and paves the way for a smooth future. This is what 1909 did for the sporting goods business of the United States, and for which it deserves a word of special mention.

The gloomy vaticinations indulged in by many as to what would result from the passing by some of the States of sundry State laws, in respect to firearms, have not been fulfilled. These restraining laws have no doubt hurt, in spots, the local dealers, but they have not injured to any appreciable extent the firearm industry of the country. The nervous, fussing States have injured their own citizens for the benefit of the non-resident trades; and that is about all that these draconian laws have accomplished. If a farmer can not buy a pistol for the defense of his household within his own State without paying two prices for it, he can get it easily enough elsewhere. He can cross the boundary line and buy in person; or he can order by mail, and Uncle Sam will see that under the interstate commerce law he gets what he wants. So much for these foolish restraining laws, which hurt the local merchants but no one else, fortunately for general prosperity.

The changes enacted by the new tariff laws were not great, and did not interfere with the sporting goods trade of the United States. The American manufacturer continues to enjoy the benefits of protection, and, up to the present, no foreign country is threatening the sporting goods trade of this country in the direction of its exports.

Manufacturers along all lines of sporting goods were kept busy during the past twelve-month. Many succeeded in getting rid of such surplus stock as had accumulated during the preceding slack spell. Prices were well maintained, and the average was quite satisfactory. Dealers were careful in placing orders, but as the aggregates were well up to the healthy normal no complaint is to be made upon that score. Upon

the whole, 1909 was a year of nice adjustments; manufacturers and dealers felt their way as they proceeded. There was little or no speculation, either in the direction of over-building and over-production or in placing orders of an excessive size. This was nothing more than a prudent line to pursue under the circumstances, and the trade is to be congratulated upon it. As a result, conditions were never more sound and healthy than at present.

During the past year the National Sporting Goods Dealers' Association was placed upon a permanent basis. This good work, for which the trade has long been looking, was accomplished at the second annual meeting of the association, which took place at the Hotel Astor, February 24, 25, 26. The trade was canvassed at this meeting in a very thorough way. A broad policy was outlined, and met with general approval. The membership includes practically all the largest and most important exclusive sporting goods distributors throughout the United States. Much benefit has already resulted from the formation of the National Association.

SATISFYING THE CUSTOMER.

Willingness to Exchange or Take Back Goods Does Much to Create Confidence in Customers—Perfect Frankness the Best Policy to Pursue in Selling Goods.

Nothing is more powerful in the doing of business than being above suspicion. While with a portion of the public that is somewhat impossible because they are given to the inclination to suspect others of attempting to trick them, the great majority of the public is not disposed to judge harshly without some cause. If the retailer will treat his public squarely at all times, refuse to employ subterfuges and methods that even scent of taking advantage and will at all times tell his customers exactly what is what, he need have little fear of wrong or unfair judgment on the part of the people with whom he is doing business.

The prevalent willingness to take back goods under practically all circumstances has worked immensely toward gaining public confidence in the honesty of the retailer. When a customer desires to return an article and is met with a refusal or an argument, the inevitable impression on the mind of that customer is that something is wrong somewhere and he is being made the victim of an error. If a customer considers he has fair cause for complaint concerning goods and the retailer fails to make a straightforward explanation or offer to make him fully satisfied, he is again suspicious, and suspicion is always the viper that stings trade hardest and most seriously.

Infinite care should be taken that a customer should have what he asks for or be made acquainted with a difference in the brand or quality, if anything else is offered and sold him. To reach home and discover the thing received to be different than the thing supposed to be purchased always puts the store and the clerk on the list of suspected dishonesty. The customer who asks for anything specific usually has reason for so doing. It may be possible to argue him from the position and sell him something else, but it is the height of foolishness to substitute without his knowledge and full understanding. If he brings the article back and has his money refunded, he remains of the opinion that he has been unfairly dealt with and that he can not safely trust the store and the clerk again.

Such impressions are almost impossible to eradicate and their effect upon trade, especially in small communities, is more than the retailer is able to estimate or successfully counteract. He is constantly placed on the defensive and it is impossible for him to ever clear himself of the scent of suspicion.

Is there anything of compensation in such conduct? It matters not whether the offense be against the rich family up on the hill or the poor

family down by the river bed—the effect on general trade is the same. No man will contend that it pays him to allow such things to be done in his store, but there are stores that still permit the small and petty tricks of retailing under the impression that the public never finds it out. What a fool idea! What rot to think that one's neighbor possesses less intelligence and discernment than one's self.

There is nothing whatever in the selling of goods and the making of profits that can not be done on the square, and if we admit this as a fact there is no reason why he should fail to practice it as a common-sense matter of business conduct. To be frank, open and above suspicion in trade is as easy as to attempt questionable methods in any degree and is always ultimately more profitable.

WEEKLY MEETINGS WITH CLERKS.

There is no retail store in the country that can not afford one half-hour each week to a discussion of store subjects and to instruction to the entire sales force. Such a period of discussion and instruction will bring out the latent qualities in many clerks and will impress upon all of them the fact that to sell goods is more than to be able to know what is on hand and offer it to the customer who asks for it. Not only can the force of clerks understand by such common meetings that instruction is not individual, but for the common use of all, and thereby avoid a misunderstanding, but also the power of team work that can be infused into the understanding of the whole force. To raise the power of the selling force of the store is one of the necessities of store-keeping now.

BICYCLE MEN GET AVIATION FEVER.

The traveler for a well-known sporting goods house declares that the craze for aviation will ruin some bicycle dealers and repair men if they don't look out. He states that the small dealer with plenty of time to spare, sees the plans of a new aeroplane in one of the popular magazines and is impressed with its apparent simplicity. Before he knows it the dealer is building a flyer of his own, and, more than that, likely wasting time and money on it that can ill be spared from his business.

NOTHING NEW UNDER THE SUN.

"We have an idea that we are pretty original and up to date," remarked a business man who is interested in vending machines. He was speaking to his lawyer. "I have taken out patent rights in America and England for my various inventions in the penny in the slot machines, but when I went to Germany to get the rights there for my water machine—the one in which you drop a penny for a glass of water—I found myself up against it. Those Germans are so thorough in their search for anything of the kind that has previously been in existence and on which a new patent might be an infringement that they go back for centuries in the records of history. And would you believe it?—a machine in which holy water was once dispensed to the public in Palestine was found to be the only thing that would interfere with my clear right to patent my machine in Germany. I call that going too far."

WRIGHT & DITSON EXPAND.

Wright & Ditson, the well-known sporting goods house of Boston, have opened a retail store in Chicago in connection with their wholesale branch at 84 Wabash avenue. Upon his recent trip to the Pacific Coast John F. Morrill, of that concern, established a permanent branch at 326 Market street, San Francisco, Cal. They have recently removed their sporting department for tennis rackets from the Wakefield, Mass., plant to the factory in Chicopee, Mass.

Remember, a genial smile is a weapon which a buyer often falls under.

OPEN AIR THEATRICALS.

Some Scenes in the Making of Moving Pictures That Never Come Before the Public—How the Citizens of Historic Fort Lee Often Enjoy Impromptu Performances.

The fields and woods about historic Fort Lee, just across the Hudson, are the scene nowadays of a continuous performance of extremely animated open-air theatricals. On almost any fine day one may enjoy historic pageants, sham battles, tragedies, comedies, and the bill is changed daily. A few motorists are attracted to this region and they, with the native population, form the only audience.

The manager of all these one-night, or, rather, one-day, stands is the moving picture man. Here one may see the premier performance of scores of dramas which later will be repeated in thousands of darkened halls all over the country. The delights of a first night at the theater are nothing, however, to those of a real, living, moving picture show.

To watch the staging and rehearsals of one of these open-air dramas is to go behind the scenes with a vengeance. A wide assortment of properties is kept on hand in a nearby barn. The stage is shifted from place to place to take advantage of the natural setting. The actors and actresses dress and make up in tents which are pitched near the stage selected for the day's performance.

The native population has become accustomed to bands of Indians yelling and dashing about the roads and by-paths, to troops landing on the river bank, to dancing villagers, and every variety of battle, murder, and sudden death at their very doors. It sometimes happens, however, that a stranger chances upon the shows, to his unbounded astonishment, and complications follow.

The moving picture impresario has not alone all the troubles of his craft to encounter, but he must guard against interference as well. The performances rarely go off smoothly, despite every precaution.

Within a few days an animated scene from the French Revolution was enacted, for instance, beside the River Road. A guillotine had been erected and a howling mob assembled about it. The "execution" was going forward in the most lifelike manner. The long film was speeding smoothly through the camera. The dramatic moment arrived. The condemned man, with the

priest beside him, ascended the scaffold. The chorus waved their arms, swaying to and fro.

Just at this most inopportune moment an automobile swept around the curve of the road, and several ladies it carried suddenly found themselves face to face with this exceedingly realistic picture. They broke into wild, piercing screams. The automobile stopped. The excitement was too much for the chorus. It stopped its performance then and there, and turned, even to the condemned man and the priest, to look at the automobile. The motorists saw their mistake in a moment and sped away. But the film was ruined.

Another day the entire company met at the picturesque stone church, which crowns the Palisades, for an old-fashioned wedding ceremony. Some one connected with the church had agreed to allow the procession to form in the church and leave it in full costume to the rattle of the moving-picture machine.

After many rehearsals the final performance was commenced. Everything was moving finely. The bride, in all the loveliness of her property bridal veil and paper orange blossoms, was walking with becoming timidity down the steps.

Suddenly, without an instant's warning, several excited figures rushed into the picture. A wild scene of confusion followed. The groomsmen tried to eject the strangers. An unseemly struggle ensued. All this was recorded with pitiless exactness by the moving-picture machine. Another film was ruined past hope.

When the confused crowd of bride and groom, bridesmaids and groomsmen, in eighteenth century costume were separated from the strangers, it was found that they were trustees of the church, who had their own ideas of moving picture shows. Arguments were useless. They pointed out that the stage clergyman, for all his white wig and sanctimonious expression, was of no set permitted in their church.

Many remarkable films are made from time to time by these chance interruptions, which, needless to say, the public is not allowed to enjoy.

PICTURES TO BE WAFED ACROSS OCEAN.

Lecturing before the Royal Society of Arts in London, Eng., recently, Thorne Baker, a noted photo-telegraphy expert, said he had obtained results with experimental apparatus which show that it is possible to send photographs across the Atlantic by means of wireless telegraphy. He is

now making arrangements for a long-distance test, which will occur at an early date.

A BRIGHT OUTLOOK.

Excellent Business Looked for in the Bicycle and Motorcycle Industry—A Summary of Conditions by One in a Position to Know.

"The outlook for the bicycle and motorcycle industry for the year 1910 could not be much brighter," a few days since remarked a man in the trade to a representative of The Bicycling World. "Since the year previous to the financial panic of 1907 manufacturers have not been so busy, or have orders for name-plate machines been so plentiful; in fact, I believe it is a conservative estimate to place the prospective 1910 increase at approximately 100 per cent. over the business of 1908.

"This may sound tall, but there is no reason why it should not be the case, as a glance at conditions throughout the country generally indicates a prosperous season in all lines of industry. In New England, for instance, which is a great manufacturing center, and where there are large producers of all kinds of machinery, of copper and brass goods and of shoes, woolens, silks and kindred lines, we find everywhere sufficient business to warrant all plants running on full time, and with every prospect of doing so until well into spring. The same is true of the entire Eastern and Middle West sections of the country, and buyers from the South and from the Pacific Coast are placing orders sufficiently large to keep the factories from whom they obtain their shipments busy making deliveries, all of which means that all classes of workers are earning money and are circulating it.

"Dealers who have not correctly sized up the situation and placed their orders with specific dates for delivery early in 1910 are sure to come to grief later on. This is especially true in the motorcycle industry, where the manufacturers depend largely on automobile parts factories to supply them with such parts as castings, forgings, machine parts, magnetos, coils, spark plugs, etc. Most of these factories are full up with work—so full that the automobile makers are making life miserable by their demands for quick deliveries.

"As an illustration of the conditions that prevail and of their effect, I can name a prominent parts manufacturer who recently told me that he had that very day received a long distance telephone call from a well-known motorcycle concern, some 500 miles distant, urging the delivery of certain parts which were on order, the motorcycle manufacturer stating that he was being pressed by his customers for immediate shipments.

"The present demand for goods from the Pacific Coast precludes any possibility of an accumulation of stock for spring delivery.

"There has been a gradual stiffening of prices of bicycles for some time past, and the manufacturer who does not make a reasonable profit and do a satisfactory business during the coming season will have only himself to blame for his discontent."

KEEP YOUR GRIT.

Hang on! Cling on! No matter what they say; Push on! Sing on! Things will come your way. Sitting down and whining never helps a bit; Best way to get there is by keeping up your grit.

Don't give up hoping when the ship goes down, Grasp a spar or something—just refuse to drown. Don't think you're dying just because you're hit; Smile in face of danger and hang to your grit.

Folks die too easy—they sort of fade away; Make a little error, and give up in dismay. Kind of man that's needed is the man with ready wit, To laugh at pain and trouble and keep up his grit.

MOVING-PICTURE SHOWS IN AFRICA.

The Popular Amusement Successfully Started at Cape Town.

(Special to The Talking Machine World.)

Washington, D. C., Jan. 8, 1910.

The introduction of the popular kinetoscope entertainment business into South Africa is described by Consul-General Julius G. Lay, of Cape Town, in a report to the Department of Commerce and Labor. He says:

"Until last autumn the moving-picture show, as a cheap amusement, such as is found in the cities of the United States, was unknown in this country. It has been used for several years for closing vaudeville theaters and for whole evening entertainments at high prices of admission. Recently two moving-picture shows have been started in Cape Town at which the price of admission has been placed at 12 cents. These shows give four entertainments daily, except Sunday, and are patronized far beyond expectations. The halls occupied are arranged to seat about 300 persons, and the management is reaping handsome returns.

"The success attained by these shows is convincing evidence that there is a good field here for moving-picture machines to be worked on similar lines. An amusement company owning and operating vaudeville theaters in Cape Town and some other large centers in which moving pictures are used to close entertainments, and who own one of the cheap shows in Cape Town, has arranged to open seven of the 12-cent moving-picture shows in other parts of Africa. It is thought that these cheap shows, if introduced in the suburban municipalities of Cape Town and the small country villages throughout South Africa, would be very profitable, providing the class of pictures was carefully selected and kept up to a reasonable standard.

Difficulties of Procuring Films.

"The chief drawback at present to selling picture machines in this country is the inability of the purchasers to rent films, necessitating their purchase outright. No depot exists in any part of South Africa for the distribution of films on hire. The manufacturer who wishes to sell picture machines in this country should make it possible for purchasers to obtain the loan of films at a moderate price.

"All the moving-picture machines now being used in South Africa are of English or German manufacture, and the individuals or companies owning or operating them have arrangements with suppliers in London, England, for films to be sent regularly on all the most recent subjects. These are purchased outright and not returned to the London depot. It is stated that the depots for films in Europe will only send films to South Africa on the loan system if the person hiring them pays rent from the time the films leave the depot until their return thereto. This, of course, makes the cost of hire prohibitive.

"The demand is principally for a high-grade machine using electricity for power. American-made picture machines are very little known in this country, and there seems to be a good opening at present for some manufacturers to sell their machines here. Intending purchasers of machines will not buy from catalogs, but must be shown the machines and have them demonstrated to them. When once convinced that the American-made machine is equal to the British

and costs no more, manufacturers of the United States can get a share of the business."

NEW PEERLESS AUTOMATIC PIANO.

Style DX Placed on the Market by F. Engelhardt & Sons—Especially Suitable for Moving Picture Theaters, Arcades, Etc.—Equipped with Cymbals and Drums—Very Powerful—May be Played Manually.

The new Style DX Peerless automatic piano which has been placed on the market by F. Engelhardt & Sons, the enterprising manufacturers, Windsor Arcade, New York City, is especially adapted for moving picture theaters, pavilions, amusement arcades, skating rinks dancing schools; in fact, any place where good loud music is desired. The instrument is equipped with xylophone, genuine Turkish cymbals, bass and snare drums of the best make. The latter can be adjusted to play loud or soft, in fact, all possible effects in music from the most delicate pianissimo to fortissimo can be produced, i. e., powerful enough to fill a large hall, or adjusted as not to seem loud in a small room. Another important feature—the instrument can be played manually. Another very strong feature—the music rolls for this instrument are cut and especially arranged to give full orchestration. In other words, the xylophone playing the solo part of the composition and the piano, cymbals and drums the proper accompaniment. The piano is also fitted with a new magazine slot and is sure to prove a big money-maker wherever introduced.

The driving of the instrument is by electric motor arranged inside the case and can be connected to any ordinary domestic electric light lead. The instrument is truly an artistic conception in every particular, and is sure to meet with popular demand. Although but added to the "Peerless" line within a comparatively recent time, the advance orders would indicate that style DX will be one of the "top-liners" and star sellers.

Talking machine dealers will find the instrument an excellent side line, viz.: to secure orders for the installation of the instruments in places of music. The field is a large one, and one well worth cultivating. Many dealers report to The World that they have had quite some success in placing the Peerless piano in ice cream parlors, skating rinks and dancing schools this fall. This is a pointer for others to follow and do likewise.

CANNING ANIMALS' VOICES.

Assistant Curator Ditmars, of Bronx Zoo, Has Plan for Utilizing Talking Machine Records in the Teaching of Zoology in the Primary Schools—Possibilities of Proposed Scheme.

Lions will soon be roaring and wolves howling, and possibly the laughing hyena also may chuckle a little in the classrooms of the primary schools of New York City if Assistant Curator Ditmars, of the Zoological Gardens at Bronx Park, is successful in working out the plan he now has under way.

"Nothing interests the youngsters so much as the Zoo and its inhabitants," says Mr. Ditmars, "and I believe a little instructive talk now and then about the animals, with reproductions of their roars and calls, would prove as valuable as interesting."

This novel method of teaching zoology is made

practicable by means of phonographic records of the roars, grunts, bellowings and other vocal demonstrations of the creatures of the wild, which it is a great inaccuracy to call "dumb beasts." Among the records already canned and ready for use, the wolf howls are declared to have met the highest expectations, while at the present moment the lions' roars are giving the phonographic recording needle the most strenuous opportunity it has had since the Roosevelt campaign speeches. There will soon be little left for modern science to do at the Bronx, unless it be to get some moving pictures of the sloth, or show the musk ox in the act of celebrating a blizzard.

So the primary school children, who cannot all get up to the Zoo, especially at this season of the year, may have the Zoo brought down to them, in such a way that they will cheerfully listen to the moral descriptive talk that goes with each animal, for the sake of the fun there is in it. Whenever the schoolroom grows dull and monotonous the teacher can turn on the trusty phonograph and say with Botton in the "Midsummer Night's Dream":

"Let me play the lion, too. I will roar that I will do any man's heart good to hear me. * * * I will aggravate my voice so that I will roar you as gently as any sucking dove—I will roar you as 'twere any nightingale."

What a fine thing it would be if only the vocal energy of human lions could thus be bottled up, to be used at will and discretion!

Labor leaders, suffragettes and Chicago University professors would find their own effectiveness and the patience of the public quadrupled, says the Evening World. Emma Goldman would have comparatively plain sailing. Jeffries and Johnson could fight whenever and wherever they pleased—or just as soon as the purse and the picture privileges should make it worth their while. Polar discoverers could produce, or reproduce, the verbal testimony of their Eskimo witnesses as to latitude, longitude, turpitude and temperature.

And what a boom the lion-roaring phonograph would be to Bwana Tumbo's admiring auditors, when he comes home from the African hunting trip!

According to the International Library of Technology, there are several good solutions for frosting electric globes quickly for the temporary use of decorations. Perhaps the simplest is white shellac thinned with wood alcohol. Dipping the globes in this and allowing them to thoroughly drain produces an excellent imitation of ground or frosted glass. The same solution, by adding aniline dyes, may be used for coloring electric globes. Another simple method for frosting is to dip them in a saturated solution of alum and water. To make a heavier coating, repeat the dipping and drying process. Dipping the globes in a hot solution of sal-ammoniac will give about as good results as the alum solution. All grease and dust should be removed from the globes by polishing them with whiting and tissue paper before applying frosting or coloring. A good frosting effect was recently obtained by brushing mucilage evenly over the globes, dusting them with talcum powder until evenly covered, and then allowing them to dry.

To Business Men

Business men in every line admit the value of good trade papers.

A trade paper must be original—it must contain a variety of matter including news service—technical information—in fact it must crystallize the entire news of the special business world, and be a helpful adjunct to every department of trade.

Scan the columns of *The Talking Machine World* closely and after you have completed an analysis of the contents of this publication see if you can duplicate its value in any other trade!

The World is a help to the talking machine business.

It exerts an healthful optimism.

It wields an influence for the good and every man who sells talking machines, no matter in what part of the universe he may be located, should receive this publication as regularly as it is issued. He is missing a vital business point if he fails to do this.

Thousands of dealers not only in the United States but in every country on earth consult the pages of the *World* regularly.

They draw from the *World* pleasure and profit.

The talking machine business has a brilliant future, and this publication is doing much to enlarge the business horizon of every retail talking machine man in the world.

To receive this paper annually costs but \$1.00. All foreign countries \$1.25.

EDWARD LYMAN BILL

1 MADISON AVENUE, NEW YORK

\$5.00 a seat

versus

\$1.00 for the whole family

THE crowds that pack the Metropolitan Opera House in New York to hear Slezak in *Otello* and *Aida*, at the rate of \$5.00 a seat, are not one-two-three with the limitless audience, throughout the country, that is waiting to hear him in these same Operas at the rate of \$1.00 per Edison Amberol Grand Opera Record.

Grand Opera all the year round

NEW YORK gets Grand Opera for a few months in the winter. Other large cities get from one to two weeks of Grand Opera. Smaller cities and towns get no Grand Opera at all.

The real Grand Opera lovers are not confined to the large cities alone—they live everywhere. And they like their Grand Opera just as well in the summer as in the winter.

The Edison Phonograph

with Slezak, Constantino, Scotti, Blanche Arral and the other great Grand Opera stars, brings Grand Opera easily within the reach of every one of your prospective customers.

Write your jobber today—and ask also for particulars concerning the Amberola.

Zon-o-phone Records are pre-eminently the BEST that money, brains, and a thorough knowledge of the art of sound recording can produce.

They are justly famous for their remarkably clear, natural tones, absence of scratch and wearing quality.

The greatest care is exercised in combining the selections, each side of the disc presenting the latest and best in popular music or standard compositions.

The price appeals to the masses, the quality to the classes, making them indeed a popular record at a popular price.

A new catalogue of Hebrew Single Side Selections has just been issued. Solos by Mme. Prager, Mr. Juvelier, Master Mirsky, the boy soprano, and other eminent singers. These are undoubtedly the most perfect Hebrew records ever recorded. 10 inch, 50 cents, 12 inch, 75 cents.

Resolve yourself, Mr. Dealer, into a committee of one and investigate these claims. Consider, criticize, compare. ZON-O-PHONE RECORDS will stand the test. A trial will verify all that we say.

IS THE SALESMAN BORN OR MADE?

Environment as Important a Factor in the Making of a Successful Salesman as is Heredity—Certain Principles Must be Incorporated in His Make-up in Order That He May be Successful.

All things considered, the most essential issue in the science of the distribution of merchandise to-day is the salesman.

Many people think that salesmen are like poets—"born, and not made"—forgetting, perhaps, that there are good and bad poets, as well as salesmen. However, we are willing to concede that a salesman may be born, but, like everything else on this mundane sphere, he can be made, and the manner in which he may be made, granting that the fundamental principles of salesmanship have been born in the man, is by associating his talents with those surroundings which will best answer for their further development. In other words, environment is just as important a factor in the making of a successful salesman as is heredity, as it is literally "up to" the man to place himself in touch with the live wires of trade in order to carry out the promises of his birthright.

Environment Most Important to a Salesman

Environment to the salesman who does things is everything. It means that he must know thoroughly all about his goods—not merely that they are the best values possible to sell at a certain price, but why they are. It means that he must know each step in their manufacture, why it was taken, and why another was disregarded, in order that the firm might offer a higher grade product or perhaps a cheaper and less attractive, but a more staple product for some special trade. It means that the salesman who is making full use of his environment must be able to converse fluently upon all these points, telling the buyer in every case the actual merits and weaknesses too, of what he is asking him to spend his good money for.

In order to get the most from environment, the salesman should move among a clientele who appreciate actual statements of facts in regard to merchandise bought and who accept the counsel of a keen business man who is looking out for the best interests of his customers, to this end making the frank and commendable statement that he desires continued reorders in the future.

The Salesman's Duties to His Customers.

To secure the greatest amount of benefit from environment, the salesman should associate himself with a firm that will back him up in these policies; a firm that will call a spade a spade, and one which will not countenance any desire of a salesman to load up the customer with such goods as would, in his judgment, prove to be "sticklers."

The salesman who secures the largest amount of benefit from such an association is the one who always has in mind the purchasing proclivities of the ultimate customer in every case. It does not matter what the maker, the jobber or the dealer believes, if the salesman has honest convictions that another style of goods would prove more satisfactory to his customer than the one most favored by him, it is his plain duty to state his doubts and advise light orders on the line in question.

This is the sort of salesmanship which wins out in the long run, and it wins out because each season the salesman who employs these methods adds more names to his list of firms who swear by his judgment, and who cannot be swung over by a rival house, no matter what rosy trade propositions are made to them.

The buyer who is fortunate enough to be able to purchase through this kind of a salesman has practically added, without division of profit, another partner to his firm. He knows that he gets

a square deal. He knows that he does not have to waste his time or exercise his wits in any endeavor to pick a flaw in the goods presented to him, or watch for any concealed double meaning in a statement made. He knows that the salesman is O.K., and that his house will back up every statement or promise that he makes; and so he continues to give his orders to the firm and to the salesman who makes good—not most of the time, but all of the time.

No salesman can be successful unless these principles are included in his make-up, and if they are, he will find his orders grow hand-in-hand and keep pace with the success of those who buy from him; but environment rightly rounds off these basic principles of successful salesmanship, puts them in practical shape and on a working basis.

If, then, you salesmen, who are born with a high talent for your chosen profession, will place your talents in the proper environment, with the right goods owned by right people, you will receive a full realization of the golden promises of your birthday.

CONCERT FOR CLOISTERED NUNS.

A Great Treat Prepared for Them Through the Courtesy of O. K. Houck Piano Co.—Enjoy the Victor Machine and Records Immensely.

(Special to The Talking Machine World.)

Memphis, Tenn., Feb. 1, 1910.

The Sisters of the Good Shepherd and 150 of the young women in their care enjoyed a very interesting concert recently through the courtesy of the O. K. Houck Piano Co., of this city. An exceptionally fine line of Victor records furnished the program, with Mr. Newburn acting as director.

The Sisters of the Good Shepherd are a cloistered order, only two members of the community ever leaving the convent, and these only on urgent business connected with the needs of the institution. So the outer world is an unexplored region. They know only such of its interests as may be brought to them. The superioress, Mother Good Shepherd by name, is a violinist of ability. Knowing this, a friend of the institution brought the matter to Mr. Houck's attention, and since they could not come to the concert, the concert was carried to the sisters.

Mr. Newburn placed the Victrola at the upper end of the big reception hall, which seats several hundred, and there the sisters and the penitents gathered to hear selections from grand opera sung by Melba, Farrar, Calve, Caruso, Scotti, Tetrizzini and others. There were a few catchy popular airs, especially for the girls, and good violin selections from Saint Saens' compositions, brought along for the especial pleasure of the superioress. For over two hours the musical treat was heard.

While the institution is conducted by a Catholic sisterhood and supported almost entirely by Catholic donations, its doors are open to every known denomination, and less than one-fifth of the inmates are Catholics.

The music-loving friend of the convent who had suggested the sending of the Victrola to the convent and the reporter stayed a little while after the concert. They sat at a dainty table in a room opening off the reception hall, and coffee and home-made cakes were served them. The three sisters did not eat. The rules of their order forbid their eating outside their refectory. They sat and talked of things out in the big world beyond their walls. More especially they talked of the work of the Catholic missionaries and the labors of their predecessors who have gone far into the depths of African forests; of the early American martyrs, Father Jongue and his fellow workers; of the Jesuit explorer who

advanced the lakes-to-the-gulf idea before Jamestown was a perceptible dot on the map; of Pere Marquette and his work on the upper Mississippi; of Father Junipero Serra and his long line of missions in California.

FOLLOWING UP CUSTOMERS.

What a Jobber Has to Say Regarding the Dealer Who Does Not See That Machines Sold by Him Remain in Good Order—How It Affects Sales—A Suggestion Worth Considering.

A progressive and successful talking machine jobber, located in the Middle West, while discussing subjects of interest in that trade recently, laid particular stress upon the fact that to be really successful the dealer should not get out of touch with the customer as soon as he had purchased an outfit and simply be content with sending him the list of new records each month when they came out.

"Even though the purchaser of a machine never buys another thing from the dealer, the dealer should make it a point to be sure that the machine is in good running order at all times," said the jobber, "for every machine sold acts as an advertisement, whether good or bad, depending upon the dealer himself. Did you ever live or visit in a neighborhood where there was a talking machine that wheezed and scratched and proved a source of torment generally for the neighbors? How many possible sales are killed by such a machine, those who would like to own a talker becoming disgusted with what they hear of the neighborhood pest and not being easily persuaded to put aside their prejudices and investigate the merits of a first-class machine, in good condition.

"The dealer who sells a machine that pans out as the one referred to and who makes no efforts to persuade the owners to have it put in good condition, or to fix it free if the trouble is slight, is simply throwing away money and trade. Though the care of machines after sale may cost him a little money, the effect on his trade will more than compensate him for the outlay.

"One dealer of my acquaintance has worked on the plan of having his salesmen call upon all those who have purchased machines from them at least once in every month or two and inquire if the machine is giving satisfaction; trying it out, if possible, with a new record. Besides adjusting many small troubles before they become serious, it has been found that the record sales have been considerably augmented through the judicious selection of records with which the salesmen test the machines. Needless to say that dealer has built up a strong trade in his particular territory."

TALKING MACHINES IN SCHOOLS.

Demonstration of Successful Methods Made at California Teachers' Convention—Outfits Now Used in Berkeley Schools.

At the recent convention of the California teachers, held in San Francisco, the teachers of the music section held a special session for the purpose of discussing the best pedagogic methods. One of the interesting features of the session was the demonstration of the method of teaching music through the medium of the talking machine, at present being used in the schools in Berkeley and which is said to be an unqualified success. Miss Victorine Hartley, of Berkeley, explained the system, playing a number of operatic selections for the benefit of the teachers. Miss Hartley, however, criticized the reproduction through the metallic horn, claiming that it distorted the music. The "talker" idea, however, was enthusiastically approved.

THE VALUE OF DIPLOMACY.

A Few Facts Gleaned by the Writer Regarding This Trade Winning Talent—Every Dealer Should Acquire It, for It Means Prosperity.

In order that I might not write theoretically, but stick close to facts in the preparation of this article, I made it my business to visit the different retail dealers in my native city, and, whenever possible to do so, analyzed their methods of doing business, their manner toward customers, etc., my one aim being to prove beyond the remotest semblance of a doubt that *diplomacy* is a valuable asset to the "talker" man. Whether or not I have been successful I will leave to the good judgment of my readers.

There are a number of stores situated on the same thoroughfare which brag of their courtesy to patrons, and verily it is no idle boast. I happened in at one of them on a day not so very long ago and was thrilled by the winning manner of the salesman who came smilingly to greet me. I did not purchase a record, yet he played everything I asked for, not only with willingness, but augmented the concert with little anecdotes of the talent, which, while familiar to me, were none the less impressive. After I had taken up as much of his time as I felt to be in keeping with good taste, I asked permission to remain while he waited upon other patrons who were awaiting their turns. The same was cordially granted, and during the hour I sat and watched his selling methods I became a staunch convert to *diplomacy*.

One old lady was particularly hard to suit. She had a cheap machine at home and very little cash to spend for records, and therefore determined to get her money's worth. Record after record was placed upon the turntable only to be greeted with contemptuous disdain. At last, however, by polite questioning, he determined just the character of selection she most admired. After that it was plain sailing. "Silver Threads Among the Gold," "Bell Brandon," "Juanita" and "The Golden Wedding" were rendered one after the other, and she purchased them all without a criticism. As she was paying her bill she remarked, with a break in her voice, "I'm afraid I've caused you a lot of trouble, but before now I have always had such a time in getting records to really please me. These that I have just bought from you are beautiful, and I thank you for your kind attention to a poor old woman."

The young fellow took her cold, withered hand in his warm, brown one, and I thought, though I may have been mistaken, that I discerned a mist in his eyes as he answered, "It was a pleasure to wait on you, and I sincerely trust you will call again very soon. Come in and see us whether you care to buy or not. We will always be pleased to have you."

"Thank you, sir; thank you," she replied, and taking up her package she wended her way feebly out of the store into the busy street beyond.

Since my initial visit, at which time I witnessed the above, I have called quite frequently and always found the entire establishment bubbling over with *diplomacy*. Upon the occasion of my last visit I was honored by being ushered with much ceremony into the private sanctum of the proprietor.

"I want to congratulate you upon your splendid organization, Mr. Smith," I began.

"Yes," he interrupted, smiling, "my boys are all right. They either have to be or else find another job. I will not tolerate a salesman who is not willing to take a strenuous course in the study of *diplomacy*. No business, Mr. Middleton," he continued earnestly, "can be run successfully without tact, and in the 'talker' line, where we are coming into constant personal contact with our customers, to neglect it is to court ruin. I train my salesmen very carefully, and when their education is completed and they have absorbed my ideas they cannot fail to be competent and tactful. Here is a set of rules my men are requested to follow which I will be

EXEMPLIFYING DIPLOMACY.

glad to have you use if you care to do so. I think they should prove interesting to talking-machine dealers in general, for they preach a simple sermon of common sense in every line."

Taking the printed sheet from his outstretched hand, I read the following:

TEN BUSINESS COMMANDMENTS.

1. No matter what priced raiment your patron wears, give him the courteous attention he is entitled to.
2. You are not employed to snub or criticize, but to sell goods.
3. Be especially kind to the old and infirm.
4. Become familiar with the lives of the record talent in order that you may answer intelligently any question asked you upon this subject.
5. Dress neatly. You are expected to be in harmony with your surroundings. The satin beauty of the Victrola does not blend well with a soiled collar.
6. Keep posted on the subject of record numbers. A good salesman should be able to find what he wants without resorting to a catalogue, thus saving time, and time is money.
7. If you do not happen to have the record your customer asks for in stock send the boy for it on the run. You cannot afford to lose a single sale if it can be avoided by reasonable effort.
8. Cultivate the art of sizing up your customers. Learn to cater to their wants at once without playing a long program of selections they are not interested in or do not show an inclination to purchase. Find out their tastes, then sell them the goods.
9. Do not keep customers waiting. They will appreciate prompt service as much as anything you can give them. It will prove an attraction that will draw others into the fold.
10. Use your head. Some of the snappiest ads. ever printed in a trade journal were born in the fertile brains of ambitious and observant salesmen.

Of course, there is the other side, but why speak of it. I could tell you of impudent youngsters masquerading as salesmen, of grouchy managers, and a general air of pessimistic gloom, but it is unnecessary, because by investigation, most rigidly made, brought to light the cheerful information that when *diplomacy* is used to the best advantage *prosperity* results.

Diplomacy.
If you would be successful,
Put on your sweetest smile;
Lay in a stock of courtesy
Overspread with grace and style.
Make friends with Grouch and Know-It-All,
And when they've had their say,
Confront them with *diplomacy*—
You'll land 'em sure that way.

—HOWARD TAYLOR MIDDLETON.

ROBERTS PLEASING PUBLICITY.

The W. J. Roberts, Jr., Co., 715 Prespect avenue, Cleveland, O., have issued an extremely interesting little volume entitled "What This Victor Store Means to You." It contains exterior and interior views of Mr. Roberts' establishment,

in which a very fine line of Victors and Edisons are admirably displayed. The literary matter is right to the point—instructive and interesting. Literature of this kind is both helpful to the dealer in a local way and supplements the publicity efforts of the manufacturers most effectively.

VALUE OF A SCRAP BOOK

Of Interesting Clippings to the Merchant—Many Valuable Suggestions Thus Kept at Hand—Much Time Thus Saved.

Few dealers have realized the importance of an index containing all information which would be of help to them, contained in the various trade papers to which they subscribe.

In every issue there is apt to be one or more articles in which you are particularly interested—in fact, trade papers are a mine of information; but in reading them it is impossible for one to remember every good thing unless he has some method of reference.

Papers are filed or laid away and when the time comes to use that particular information the paper has either been mislaid or the reader has forgotten in which issue the article appeared.

This means a loss of time going through a pile of papers, and you may not find it at all, thereby losing a valuable idea or an imperfect carrying out of a plan from memory. Trade papers, as a general rule, are read through hurriedly by busy men until something strikes them which they would like to dwell on a little later.

Wouldn't it be a hundred times better if each particular article were indexed so that you could lay your hands on it at any future time at a minute's notice?

The idea of which you retain but a faint recollection is brought before you in a clear manner once more, says the Sporting Goods Dealer. One index will serve to cover all papers, so that it will not be necessary to have more than one index for reference to everything he has been interested in in a trade paper.

Identification marks should appear opposite each item, showing in which paper it appeared.

If you don't care to go to the expense of a card index, a scrap book will answer the purpose just as well, although a card index is very easily made, as you can buy index card systems for about \$2.50 or you can make them yourself, cutting them from heavy cardboard about five inches wide and inserted in an ordinary candy box of suitable size. The division letters should be drawn on large enough so that they can be readily seen.

SPEAK GENTLY TO CENTRAL.

Copenhagen Telephone Exchange Catches All Angry Words on a Gramophone.

Exasperated telephone users who have been indulging in harsh language to the telephone girls have been brought to book by the telephone administration of Copenhagen.

At first the identification of the offenders was difficult. Then a gramophone apparatus was installed in the central exchange, on which all unseemly language was recorded.

Some of the worst offenders were then summoned to the directors' office. When they denied the charge they were convicted by an exact repetition in their own voices of their hasty remarks.

Telephone manners and language in Copenhagen are now greatly improved.

What if this plan should be adopted in New York?

SLEZAK A GREAT ARTIST.

It is apparent that Slezak is one of the great artists whose records will command a sale equal to the best efforts of any artist who ever visited this country. Slezak performances are an artistic triumph in every definition of the term, and the National Phonograph Co. are to be congratulated on securing the services of so great an artist.

Quality

That's the big idea behind the *Victor*, the thing that has made the *Victor* business what it is to-day.

Quality has placed the *Victor* in a class by itself—has put it above competition.

That's the kind of instrument you are handling, Mr. Victor Dealer.

Make use of this "quality" idea. It will help you to build up your business, to make the most sales and the greatest profits, to add to your prestige, to establish yourself firmly with music lovers and people of wealth and refinement.

WITH THE TRADE ON THE PACIFIC COAST.

Despite Natural Post-Holiday Dulness January Trade Proves Satisfactory to Dealers—Stock Taking Over and New Goods Now Being Received—A. J. Pommer Buys Out the Pacific Phonograph Co.—Kohler & Chase Now Handling Only the Columbia Line—Lauder Records in Demand—Personal Items of Interest—New Concern in Tacoma, Wash.

(Special to The Talking Machine World.)

San Francisco, Cal., Jan. 29, 1910.

After the phenomenal business of December even an ordinarily busy season would seem rather tame, and the talking machine business this month has been rather quiet all over the Coast, and as much so here as anywhere else. Such a reaction, however, always comes in January, and as the past month has been much better than the same month of last year, and as good as almost any January on record, there is no feeling of disappointment. A little season of quietness has, in fact, been very welcome to most dealers, who had sold out most of their goods and needed a little time to take stock, replenish their lines, and prepare for the new season's business. Stock-taking is now about over, and while many shipments of new goods were considerably delayed on the way, they are now coming in rapidly. At the same time, several changes have taken place in the local trade, and the line-up for the new year is a little different from that of last season.

The outlook is very satisfactory in all parts of this territory. Sales in the country districts have been very large for the last year, and every machine placed in the country generally brings out additional inquiry, besides the increased demand for records which every machine sold involves. The general prosperity of both city and country leads dealers to look for even a larger distribution of talking machines this year than last.

The most important change made of late is the purchase of the business of the Pacific Phonograph Co. by A. J. Pommer, a former piano dealer of Sacramento and various other places on the Coast. When Mr. Pommer sold out his piano business in Sacramento to Sherman, Clay & Co. a short time ago it was thought that he would retire from active business life, and the new move has been a distinct surprise to the local trade. The Pacific Phonograph Co., started last year as an outgrowth of the wholesale talking machine department of Kohler & Chase, with an agency for the Edison line, has made good progress under the management of C. M. Jones, and is now one of the leading jobbers on the

Coast. There had been no previous intimation that Kohler & Chase were disposed to give up their interest in the enterprise, but they were doubtless persuaded that they could devote their attention more profitably to the piano and retail lines. The lack of space in the new building for a wholesale stock was also a factor in this decision, the stock of the Pacific Phonograph Co. having always been kept in Oakland. Mr. Pommer has transferred his headquarters from Sacramento to that city, taking charge about January 15. He will continue the business under the same name as before. Mr. Jones is now at work on the books, but as soon as the details of the transfer have been completed will probably move his headquarters to Oakland.

Kohler & Chase have disposed of all the old lines in the talking machine department and are now handling Columbia goods only, this department being virtually a branch of the Columbia Phonograph Co. F. R. Anglemier, formerly with the Columbia branch on Van Ness avenue, is manager of the department, and is well satisfied with the manner in which the year has opened. The Columbia goods were prominently featured in the opening recitals in the new Kohler and Chase building at the first of the year, giving the department a fine send-off, and Mr. Anglemier believes that the location is about the best for the purpose in the city. He has a fine display of Grafonola machines, and says the Regent machine has made a great impression. Mr. Beck, who took charge of the retail department of Kohler & Chase some months ago, after being with the Columbia for many years, is now handling Columbia goods for Kirk, Geary & Co., the distributors in northern California.

W. S. Gray, Coast manager for the Columbia Phonograph Co., has just returned from Los Angeles, where he combined business with pleasure and went to see the aviation meet. The company's main office and distributing headquarters are still on Van Ness avenue, and will remain there indefinitely. The placing of this line with Kohler & Chase has opened a retail outlet which could hardly be surpassed, and the present location serves all purposes of the wholesale business quite well for the present. The new year has

started in well for the wholesale department, and the new Grafonola machines give the company a stronger hold than ever on the high-class trade. They are in constantly increasing demand, and it has been hardly possible to keep a supply of all the different models of this machine.

Several dealers here made a feature of Harry Lauder records during the visit of that vocalist

BACIGALUPI'S LAUDER WINDOW.

a couple of weeks ago, but the great hit was made by Peter Bacigalupi & Son, who gave up their window entirely to a display of these popular records. The Lauder concerts were a great success all over the Coast, and the sale of the records has been enormous. Mr. Bacigalupi reports considerable improvement in the wholesale business, and is now shipping out goods on new orders, as several delayed shipments are arriving.

Harry Lauder appeared in Oakland this week and dealers there are calling attention to his records. Sherman, Clay & Co. are giving some strong advertisements to his records in the Victor line, and having a good run on them.

Andrew G. McCarthy, manager of the talking machine department of Sherman, Clay & Co., has just returned from Los Angeles, where he witnessed the aviation meet. He states that the company's southern talking machine distributing point, which closed the year with practically everything sold out, is now getting in plenty of goods, and has had a very satisfactory January run. He is well pleased with the outlook, and believes this year will be far ahead of last in the talking machine line.

D. Blaine, an Edison dealer of San Luis Obispo, Cal., is now in San Francisco.

Mr. Hansen, formerly with Lyon & Healy in Chicago, and later with Sherman, Clay & Co., is now manager of the talking machine department of the H. Hauschildt Music Co.'s new store in San Francisco. He says that for a new store the business this month has been extremely gratifying.

The Caldwell-Thornburgh Piano Co., which recently opened a new store at Whittier, Cal., have put in a talking machine department, and are giving weekly recitals with high-class machines and records.

The Goodale Phonograph Co. are a new firm of Tacoma, Wash. They are capitalized at \$500,000, the parties interested being F. C. Goodale, A. H. Garretson, F. E. Coombs and Geo. Trust.

COLUMBIA ACTIVITY SOUTH.

H. A. Yerkes, manager of the Columbia Co.'s wholesale department, states that W. H. Hightower, Galax, Va., will take on the Columbia line for his chain of stores throughout the State. Also that the E. E. Forbes Piano Co., Birmingham, Ala., had just placed an order for 10,000 Indestructible cylinder records, to go forward in one shipment immediately. The Forbes Co. are doing an excellent business in Columbia goods,

What a Successful Jobber Means

Our success of 1909 has spurred us to greater activity to increase our facilities to better care for dealers' orders. Every practical device known to the Modern Talking Machine House is in use here to assist in despatching orders quickly, completely and in factory condition.

LEST YOU FORGET.—The promptness with which your jobber fills your orders and the quality of the goods sent is a great factor in deciding whether your customer will come back to you or go somewhere else for his next purchase.

We point with pleasure to our hundreds of successful dealers who buy from us year in and year out, because they can depend on our service and quality. Send us your orders and share in our success.

EASTERN TALKING MACHINE COMPANY

Edison Jobbers

THE HIGH LIVING CRUSADE.

Effect Upon General Trade as Noted by a New York Jobber—Possible Talking Machine Customers Made Over-Cautious.

A well-known talking machine jobber located not a thousand miles from New York, in discussing the way the business had panned out thus far in 1910, stated that while the trade had been fairly good as a rule, it was his opinion that the present crusade in the daily papers upon the high cost of living had a decided effect upon the talking machine business as well as on other lines that might be classed as luxuries rather than necessities.

"While we all realize that the cost of living has advanced and continues to advance, we do not as a rule believe that it is an indication of a coming depression, but rather to the contrary. In many instances, however, that have come to my notice the newspaper crusade has had the effect of giving unthinking people the idea that a panic at least is approaching. This belief is strengthened by the recent failure of several stock concerns in Wall street, whose downfall was felt chiefly by the speculators rather than the general public.

"The daily papers naturally seize upon anything that will make sensational reading for their readers and enlarge upon any available matter, such as the boycott of the meat trust and the government investigations. The family who have planned to buy a talking machine or a piano, especially if they are depending upon salaries, are naturally uncertain and alarmed as to what the outcome will be, and as a matter of precaution put any surplus cash away until the atmosphere clears up.

"Of course we realize that the above idea is a wrong one, but nevertheless the effect is real, and it is to be hoped that the situation will change before any real damage is done. With all the various industries of the country active and the money situation loosened up, there should be no reason why the present year should not be a record breaker, despite the alarmists, whose work every talking machine dealer should make every effort to combat."

NEW FORM OF MUSICAL BED

Shown by a Paris Dealer—Soothing Music Provided at Night and Discordant Janglings in the Morning—Offers Great Possibilities.

A furniture dealer in Paris is showing a novelty in the form of a bed, which is an improvement on a similar one which attracted attention at the last Paris world's fair. It is to all appearances an ordinary bed, but the weight of the body upon it sets a clockwork in motion, and this operates a music box, which gives forth soothing melodies. The lullabys which it plays are supposed to induce sleep. By means of a dial at the head of the bed, the person who occupies it fixes an alarm for next morning. This produces, when the hour arrives, discordant sounds, to which the person in the bed must pay heed, because failure to rise within five minutes after the noise has begun will cause the bottom of the bed to fall out.

It would seem that the proper thing to do would be to substitute a talking machine for the music box and have suitable vocal selections at night and loud yells in the morning.

CONVENTION OF INVENTORS.

First Gathering of Its Kind Scheduled to be Held in Rochester, N. Y., in June—Exhibition of Patents and Models.

The first convention of inventors in the United States will be held in Rochester, N. Y., June 12 to 18, inclusive, according to the present plans. Some of the most prominent inventors in the country in various fields are expected to be present, including Thomas A. Edison, Nicola Tesla and others. A special feature of the convention will be an exhibition of patents and models of all

kinds, and all arranged in groups according to the various trades to which they apply. It is to be expected that there will be a number of patents relating to talking machines on exhibition. The spaces for the exhibits will be free.

BLACKMAN CO. SECURE PATENT

Upon Their Well-Known and Popular Record Tray—Find January Business Very Good Considering the Time of Year.

The Blackman record tray, which is so well known in the trade, and which many talking machine dealers find well-nigh indispensable in the systematic arrangement of their record stock, is now securely protected by United States letters patent issued on December 28, 1910. The trays themselves and the convenience they afford are too well known to require comment.

J. Newcomb Blackman, president of the Blackman Talking Machine Co., in discussing the business thus far in the new year, stated that his company had no complaint to make, especially for the month following the holidays. Mr. Blackman remarked that the only cloud on the business horizon was the possible effect of the present crusade against the trusts and the high price of living, which, while not really indicating danger, nevertheless will very likely frighten some possible talking machine customers and cause them to hold on to their money for a while longer. However, Mr. Blackman is not worrying in the slightest degree and does not pose as an alarmist in any sense.

JOS. JUNGBECKER A VISITOR

To the United States as the Representative of Jos. Zimmermann, Needle Manufacturer.

Josef Jungbecker, representative of Jos. Zimmermann, the talking machine needle manufacturer of Aachen, Germany, has been visiting the trade in the United States during the past couple of weeks. Mr. Zimmermann is one of the largest

manufacturers of needles in the world. His policy is to produce products of quality, and the Condor needle is known and appreciated wherever high-class talking machines are used. Mr. Jungbecker is not a stranger to the United States, as he was over here some seven years ago. He is a gentleman of pleasing address and a well-equipped business man, who understands the needle situation thoroughly. It is probable that before his return to Europe he will select some establishment to take charge of the output of the Zimmermann needles in this country.

ELLIS HANSEN TO EUROPE.

The Well-Known Designer of Victor Window Displays Leaves on a Two Months' Vacation to Denmark.

Ellis Hansen, well known as the designer of the Victor window displays, and who has been connected with prominent houses in the talking machine trade, left last week for his old home in Copenhagen, Denmark, on a two months' vacation. On his homeward trip Mr. Hansen will visit Berlin, Paris and London, and look over the window advertising field in these progressive trade centers. Mr. Hansen was accompanied by his young son.

SELL PRIZE ORCHESTRION.

Marin & Co., Stockton, Cal., recently sold for cash the large Wurlitzer concert orchestrion which took the first prize at the Alaska-Yukon-Pacific Exposition last year. The instrument will be installed in a local picture theater.

M. W. Waitt & Co., the enterprising piano dealers of Vancouver, B. C., are among the progressive talking machine dealers of the Dominion. They are consistent advertisers and trade developers, and as a result are paying close attention to the talking machine department of their business, and have built up a splendid following in British Columbia.

¿Quiere Vd. que le dé una lección de inglés?

Es tan fácil aprender el inglés con el sistema I. C. S. y además el conocimiento del inglés es muy útil en los tiempos modernos.

El sistema I. C. S. para la enseñanza de idiomas por medio del fonógrafo facilita el aprendizaje de un idioma extranjero, y tiene que interesar notablemente á miles de personas. El vendedor de fonógrafos que no tiene los equipos I. C. S. para aprender idiomas, de seguro que está descuidando un medio rápido é infalible de aumentar sus negocios. El nuevo equipo I. C. S. para aprender idiomas, que cuesta \$35 oro, es una maravilla. Representa el arte más elevado en la enseñanza de idiomas y encierra un método que ha merecido la mayor recomendación de miles de personas competentes para hablar con autoridad sobre el asunto. Las Embajadas de España, Francia y Alemania en Washington, así como los principales Colegios han recomendado cordialmente el método I. C. S. para enseñar idiomas.

El equipo I. C. S. para aprender idiomas consta de un fonógrafo "Gem" Edison, hecho especialmente para estudio de idiomas; una bocina pequeña; un tubo auditivo con banda para la cabeza; una aceitera y 25 fonogramas de conversación para enseñar la pronunciación, que se garantiza ser absolutamente correcta con la entonación é inflexión propias. Además de esos fonogramas de conversación mandamos también cuadernos de estudio para aprender la teoría de los idiomas. El nuevo equipo es á la vez el mejor y más barato que se ha ofrecido, pues su precio es únicamente de \$35 oro americano.

Si Vd. desca aumentar sus negocios, escriba hoy mismo pidiéndonos detalles.

Long Distance Telephones—Numbers 4677 and 4678 Gramercy. Cable Address: "Elbill," New York.

NEW YORK, FEBRUARY 15, 1910.

THERE is no denying the fact that January trade was not up to the expectations of many who were anticipating that the year would start off at lively pace.

But pray tell us what January has been pulsing with business life and vitality!

As a matter of fact during the holidays all reasonable efforts are made to dispose of merchandise, particularly such special creations as talking machines, and the people having gone into their reserve funds about as far as they cared to go. Naturally when the first of the year swings around the prospects are not over brilliant for immediate business until they have recovered and got started again along new lines.

The sales of high priced machines has kept up wonderfully well, and there is no probability that there will be the slightest shrinkage in the demand for these particular creations.

On the contrary, it looks as if the growth would be continuous and expanding.

At least that is the way it looks to the man at The World masthead.

February has commenced in much better form and there are plenty of indications at hand showing that the month will be fair in a business sense.

Trade in the East has shown considerable improvement, and the Eastern jobbers and dealers are talking more optimistically than they were a couple of weeks ago.

A survey of the trade situation in the Middle West proves that business in that section of the country is going on increasing steadily in volume.

In fact, there are towns in that specially favored section where no depression has ever been noticeable in a business way.

In the South conditions are steadily improving, and on the Pacific Coast a strong sales creating element is in evidence, and there is every reason to believe that the year will be a satisfactory one in a business sense.

THEN, too, as an encouraging force, it might be well to say that a number of talking machine men have regained confidence in the trade and are going ahead with business plans in a larger way than they did last year.

That is the only thing for men to do, for it is in truth the day of scientific salesmanship, and the limit in this direction is a long way off.

It cannot be successfully denied that the talking machine business is to-day but little understood, and is therefore not regarded in the light which it should be.

A good many men who are selling talking machines to-day do not fully appreciate the product which they are offering.

They do not understand that the development of the talking machine has not been in any sense accidental, that inventive minds have delved for scientific principles to be embodied in its construction.

They do not appreciate the fact that the greatest commercial talents known to the world have been drawn to contribute to the success of the modern talker.

They do not appreciate the fact that millions of dollars have been expended to produce a perfect machine and that back of these splendidly organized manufacturing departments are systems perfectly arranged which take high rank with the best industrial organizations of the day.

They do not understand the concentration that has been focused upon the talking machine situation to have brought it up to its present position.

NOW, these facts must be understood before a dealer or salesman can feel the true interest and inspiration in his work.

The present development of the talking machine industry is convincing evidence of the splendid genius of its founders.

The skill which they have shown in perfecting and building up the present system is remarkable, and the business to-day extends to the progressive representatives opportunities which should make the business attractive.

It is the up-to-date business for the up-to-date man, and it will furnish adequate reward for the conscientious efforts of able and trained minds.

THE men who have watched the growth of this industry believe in it, and the steadily increasing demand for the machines of the better grade indicate that the product is steadily creating an army of friends among those who are best able to judge of artistic merits.

Always striving for perfection, the talking machine has reached a point where it supplies the demand of discriminating people for a perfect entertainer and instructor.

Now, in order to be in harmony with the creation itself, men must understand it.

Understand its functions—understand what it represents in thought and skill—in mental and inventive power.

When a man does this he will have a respect for the business in which he is engaged.

He will have a respect for the men who have made the industry possible—for, as an exponent of the spirit of the age, the talking machine stands in a class by itself.

It has passed through all the stages, from a

toy to an entertainer and instructor second to none in the mechanical field.

From humble beginnings it has evolved through scientific development until it is to-day the most versatile of all musical entertainers.

Think of this, talking machine salesmen, when you are exhibiting the wares and possibilities of your product.

Think of what the machine represents and it will help you to interest and impress your customer, and you, yourself, will be gaining an added respect for your profession.

THE pessimist is always with us.

Go where we will, seek any trade or profession, and we will find a class of men who can always see a future dark with fearful happenings—most of which never reached beyond an imaginative stage.

To-day we will find a lot of men who predict chaotic conditions as the final outcome of the rising tide of living cost and the growing greed of the men who through combinations control the necessities of life.

Well, there may be some dark days ahead—we cannot tell.

But the most of us can rest safely in the belief that when we have troublous conditions we always find men who are amply fitted to successfully guide the Ship of State through perilous waters.

We never have everything to our liking in this busy work-a-day world of ours.

There always have been problems since time began.

Even the old cave dwellers were not entirely satisfied with their lot, and probably there is an element in human nature which prohibits perfect satisfaction ever dwelling long in the human mind.

If we were satisfied progress would cease; but one thing is certain, the man who always plans business wisely, acting with due conservatism, is going to be far better off than the man who hangs back and waits to be pulled along with the crowd.

It is the active, aggressive man—the man who fully realizes that there are business possibilities around him—who will reap the business harvest of 1910. Just remember that.

IT is a mistake to think that the man with a natural aptitude for learning will easily outstrip his fellow. In one or two lines of effort, such as music and drawing or painting, only those with a native talent born with them will succeed.

But often in every-day callings a man considered dull will do far better than his brilliant neighbor, who loafs because it is easy to learn, gets a taste for loafing, and loafs a little too long.

In a world crowded with purposeless people, drifting aimlessly about, and taking whatever opportunity offers for a little advantage, getting ahead is not a difficult matter.

The man of purpose is marked. His fellows see that he means to get ahead, and they let him.

The way that is closed to the idler is open to the determined and industrious. Other men see that he is bound to have what he is after, and, wanting more than anything else a leader, they get out of his way, and wheeling in behind him, follow him, to pick up what crumbs of his prosperity they can without too much effort.

TRADE IN THE SAINTLY CITY.

Both Wholesale and Retail Business Good During January—Excellent Columbia Co. Report—E. D. Easton a Visitor—St. Louis Talking Machine Co. Report Heavy Sale Red Seal Records—Give Machine to Bazaar—What Other Houses Are Doing.

(Special to The Talking Machine World.)

St. Louis, Mo., Feb. 1, 1910.

The retail trade for the month of January has been quite active, and the wholesale business is picking up daily. The year starts off with all indications that it will be a lively one throughout.

E. B. Walthall, manager of the Columbia Phonograph Co., reports that January business was very flattering, the sale on Grafonolas being big in both the retail and wholesale departments. F. G. Cook, for the past several months traveling for the Columbia Phonograph Co. out of St. Louis, has returned to Chicago, and he has been appointed floor manager of the Chicago store. Chas. Kauffman, formerly of Chicago, but who for the past three years has been on the traveling force of the Los Angeles office of the Columbia Phonograph Co., has accepted a similar position with the St. Louis branch.

The local offices of the Dictaphone Co., now located in the Wainwright Building, will be moved to the local store of the Columbia Phonograph Co. shortly.

President E. D. Easton, of the Columbia Phonograph Co., accompanied by his daughter, and W. C. Fuhri, western district manager, accompanied by his wife, all were visitors here recently. Mr. Easton and daughter left for Cincinnati. Mr. Fuhri left on an extensive western trip, going to Denver, Salt Lake City, El Paso and other points.

During the stay of the Boston Opera Co. here Manager Walthall furnished one of their highest grade Columbia graphophones with a quantity of records to F. Constantino, the great tenor, who sings exclusively for the Columbia Phonograph Co., and Mr. Madrones, one of the leading bassos of the company, who also is a Columbia artist, for use in their apartments at the Jefferson Hotel while here.

The samples of the disc records made by "Gipsy" Smith for the Columbia Phonograph Co. have been received, and all who have heard them pronounce them the best sacred records ever made. The sale of them should be large locally, as thousands here have heard and admired the famous evangelist's voice during his several weeks of sermons at the Coliseum here some time ago.

The St. Louis Talking Machine Co. report that the sale of records, following the heavy machine purchases in December, has been phenomenal. The Red Seal records have the call. The advertising campaigns undertaken by this concern during the past two months have been the largest ever conducted by them. They "plunged" heavily on the Boston Opera Co.'s engagement at the Olympic Theater, reproducing a large cut of the photograph of Alice Nielsen listening to the Victrola; and during Mme. Tetrizzini's engagement at the Coliseum a very large cut of her photograph was reproduced in all the daily papers.

The St. Louis Talking Machine Co. presented the Saint Philomena's Bazaar with one of their Victor machines. Mme. Tetrizzini sang for the benefit of this bazaar. The Victor Victrola is uninterruptedly enjoying its great popularity, and several orders in special finishes, which were delayed because of the factory not being able to catch up with its orders, are awaiting delivery by the St. Louis Talking Machine Co.

O. A. Gressing, manager of this firm, recently returned from a trip South, and reports dealers as just about recovering from their tremendous holiday and January demands. Many were caught unprepared and now are stocking up heavier than ever for this time of the year. L. A. Cummins, traveler for this firm, feels very happy over having closed in one week four 40-10 accounts, and in a short talk with your correspondent informed him that 1910 is starting out

stronger for him than any previous year, and Mr. Cummins has been in the talking machine business for more than seven years.

E. S. True, credit man for the St. Louis Talking Machine Co., is mourning the death of his father-in-law, which occurred at Hannibal recently. S. H. Johnson, of the same concern, has been busily engaged conducting Victrola recitals at the Liederkrantz Club, the Wednesday Club, and the Kenwood Springs Country Club.

Mrs. Clara Harrington, well known in the trade as Miss Goetz, and for many years head saleslady for the St. Louis Talking Machine Co., is the happy mother of a bouncing girl baby. The remainder of the St. Louis Talking Machine Co.'s staff are very insistent that this young lady be named "Victrola Harrington."

The Silverstone Talking Machine Co. make favorable reports on their business for January.

D. K. Myers, the Zonophone jobber, states that he had a nice trade during January and that his record business was large.

The Koerber-Brenner Music Co. report that their January business was very satisfactory.

The Thiebes-Stierlin Music Co. report having had a good trade during January, and that the demand for high-priced machines was good.

Miss Sadie Rosenblatt, in charge of the talking machine department of the J. H. Buettner Furniture & Carpet Co., states that business for January was good, and that the call for high-priced machines was excellent. Their record trade was heavy.

VALUE OF PERSONAL LETTER.

Excellent Means of Centering Attention on a Special Subject—How One Concern Uses the Personal Letter in Calling the Attention of Their Customers to the New Records.

A personal letter as a means of centering attention on a special article is an excellent means of publicity. Many people are apt to receive booklets, or lists of records, without analyzing them carefully, whereas if some special feature of the list—such as one or two particularly striking records—were referred to in a personal letter, the recipient would be apt to become not only interested in the records referred to, but in the entire list, and this means business.

The Standard Talking Machine Co., of Pittsburg, Pa., are old-time believers in this idea, and have been sending out to dealers a specially prepared letter, which they have asked them to send out to their customers with the monthly list of new records, as a personal letter, mailing it with a two-cent stamp. The letters are written in a colloquial vein, always to the point, and no one who receives them will fail to look them over.

This is a very excellent and effective kind of publicity, and we wish the jobbers and dealers would utilize the personal letter idea to a larger extent. Of course the personal letter is of no avail when sent out as a circular with a one-cent stamp attached. People throw this kind of literature in the waste basket. If a letter, however, is couched in an interesting vein and properly stamped it will certainly bring results.

CORPORATION TAX REPORTS.

Statements Must Be Filed by March 1—Effect to be Watched Closely.

By March 1 of this year the statement of earnings and condition of the corporations of the United States must be in the hands of the Federal authorities appointed for the collection of the corporation income tax. These statements, which the provisions of the tax law require to be in great detail, undoubtedly will prove a revelation in the case of more than one corporation. In some cases they will be much better than anyone except the inmost insiders ever dreamed, and in others they are bound to provide considerable disappointment for the holders of their securities. What effect they will have in causing a readjustment in the stock market remains to be seen.

Just like a slot machine

Drop in your order and you get the goods right off.

That's the kind of service we give our dealers—no delays, no excuses.

Something the matter with your jobber if you don't get your goods promptly. You can't afford to wait for them, and make your customers wait too.

If that's your case, it would be a wise move for you to get in touch with a new jobber. Better for you to give your business to another jobber than for your customers to take their trade to another store.

We want your business and will take care of it. When you place your order with us you can rest assured that it will get prompt attention—goods are always shipped the same day the order reaches us.

Try us. Look over your stock and see if there isn't something you need in Victors, Victor Records, Victrolas, record cabinets, horns, fibre cases, needles, extra parts or accessories of any kind.

Or send us your next rush order and see how quickly you get the goods.

Write us to-day for our catalogue and our booklet, "The Cabinet That Matches" and we'll send them by return mail.

New York Talking Machine Co.

Successors to Victor Distributing and Export Co.

83 Chambers Street New York

It takes a REAL tenor to sing both Italian and German Opera. Read what Reginald De Koven, in the New York World, says of

Leo SLEZAK

The Greatest of all Grand Opera Tenors

Mr. DeKoven, after a recent performance of Tannhauser at the Metropolitan Opera House, New York, said:

“Not since Jean de Reszke has a tenor compassed both Italian and German Opera with the absolute distinction that Slezak displayed last night.”

It took us a long time to find the greatest living tenor to sing for the Edison Phonograph—but

we found him at last in Slezak.

You couldn't ask for a bigger boost for your Phonograph sales. And from now on, Grand Opera should be the biggest and most profitable end of your Record business.

Write your jobber about the Slezak and other Grand Opera Records today.

National Phonograph Company, 59 Lakeside Avenue, Orange, N. J.

It takes a REAL sound reproducing instrument to render Grand Opera as it is meant to be played. And such an instrument is

The AMBEROLA

The newest Edison Phonograph

It is the only instrument of the cabinet type that renders Grand Opera as it is rendered at the Manhattan and Metropolitan Opera Houses, New York—because it is the only instrument of this type that plays both Edison Standard and Amberol Records.

It combines all the beauty of tone reproduction of the Edison Phonograph, with a cabinet as beautifully finished as that

of the most expensive grand piano.

There is a certain class of your customers that will not be satisfied with anything but the very best! And as long as this is true you can't sell them anything that offers less than the Amberola. The Amberola offers all that any other sound reproducing instrument *can*—and more. Take your full profit on the Amberola. Write your jobber today.

National Phonograph Company, 59 Lakeside Avenue, Orange, N. J.

SOLID WOOD (NOT VENEERED)

The

MUSIC MASTER WOOD HORN

is the only horn built of SOLID WOOD and retains all the original elasticity of the wood that is used in its construction, thereby giving a greater resonance of tone than is possible with any other horn on the market.

All other wood horns are made of veneered wood and the great amount of glue used to hold them together retards the sympathetic vibration, which is so necessary to the faithful reproduction of music, rendered from talking machine or phonograph records.

HAVE ONE SENT ON APPROVAL

Your choice of *solid* Oak, Mahogany, or Spruce, for any make or style of cylinder or disc machines.

If your jobber cannot supply you, we would be very glad to send you a sample line of our horns on approval, and if you are not entirely satisfied with the superior merits of the MUSIC MASTER, you would be at liberty to return them to us for credit.

SHEIP & VANDEGRIFT, Inc.

PHILADELPHIA, PA.

WITH THE INDIANAPOLIS TRADE.

Business Good During January, Especially in Records—Travelers Exchange Territory—Wulschner-Stewart Co. Buy Stock of Indiana Phonograph Co. from Trustees—Picture Show Business Improves—Some New Regulations—Other News of Interest in the Talking Machine Trade for the Month.

(Special to The Talking Machine World.)

Indianapolis, Ind., Feb. 6, 1910.

The talking machine business, and particularly the record business, has been pretty good during the last month. Many of those who bought machines at the holiday time are now laying in their supply of records. Most of the dealers report that their business during January has been satisfactory, as compared with January of last year.

The Columbia Co. have been having a good business with records. The leaders during the

month were the McCormack records and the Gypsy Smith records.

H. A. Zerkle, Chicago representative of the Columbia Co., was a recent caller at the Indianapolis store. It was Mr. Zerkle's first trip into this territory, his regular territory being Wisconsin. A short time ago, however, Mr. Zerkle and H. H. Myers, whose regular territory is Indiana, were joking and one proposed to the other that they exchange territory for one trip. The exchange was made. Mr. Zerkle was well pleased with his trip in Indiana and found business satisfactory.

The stock of the Indiana Phonograph Co., which has been in the hands of Charles Craig, trustee, has been sold through Mr. Craig to the Wulschner-Stewart Music Co., and the latter succeeds the Indiana Phonograph Co. as jobbers of Edison machines, which the Indiana Phonograph Co. handled exclusively. The stock was owned by Squire Bros., who came from Jasonville, Ind., about two years ago. It was placed

in the hands of a trustee at the request of the creditors, and Mr. Craig says the creditors will come out in good financial condition. The Wulschner-Stewart Co. will begin at once to move the stock to their large new piano and musical instrument store in North Pennsylvania street. It is said that the invoice of the stock bought from the Indiana Phonograph Co. ran about \$10,000. It is understood that Mr. Craig will continue to handle Edisons in a retail way. He was the proprietor of the Indiana Phonograph Co. before Squire Bros. took charge of the business. The Wulschner-Stewart Co. have engaged Mr. Barringer, who until recently was with Benell Bros., at Detroit, to take charge of their talking machine department. In addition to Edisons, the Wulschner-Stewart Co. handle Victors.

A large electric sign on top of the new home of D. Sommers & Co., in West Washington street, was toppled over by the wind last week. The sign had not fully been completed. It was merely by chance that results were not more serious when it fell. Laborers had been working on it just a few minutes before the accident occurred. This company handle Columbia machines.

The Kipp-Link Co., wholesalers in Edisons, are enjoying a satisfactory business for the start of the year.

The picture show business in Indianapolis has been improving rapidly. Several conditions have led to the growth in business. In the first place, the convention of the United Mine Workers of America has been on in Indianapolis for some time, and in addition to that the prices of food-stuffs and other commodities have been going so high that many people cannot afford to attend the high-price theaters.

Taking advantage of the situation, Mr. Criswell, who owns the Vaudette, a ten-cent picture house in East Washington street, has opened up a large five-cent show in West Market street, near the Indiana traction and terminal station. The new place is known as the Royal, and a Columbia machine is used to draw the crowd. The seating capacity is 200 and there is a seven-piece orchestra. One of the new features is that there is a change of program every day. In most of the houses the program is changed only twice a week. Mr. Criswell is the man who started the movement to have the theaters opened on Sunday. His plan was to come within the Sunday law of Indiana by having one-third of the proceeds devoted to charity, and when the regular charity organizations refused to take the money a charity organization was formed among the showmen.

Mayor Shank, the new executive of Indianapolis, recently issued an order shutting off electric pianos in public houses. Since that time there has been a heavy demand from these places for talking machines, which the Indianapolis dealers have been filling.

Superintendent Hyland, the new police chief of Indianapolis, has indicated that he will not take steps to close the picture shows on Sunday. The administration is going after the Sunday saloons, but they fail to see anything very bad about the Sunday picture shows. Mr. Hyland said he had investigated and had found that the Indianapolis shows had turned over about \$500 to charity in the last two months. He did not think that this was a bad showing. "They are innocent amusements," he said, "and, while I do not take the stand that they will continue to run permanently on Sunday, I will say there will be no interference with them at the present time."

Building Inspector Winterrowd has notified all moving picture show managers that they must remove all vaudeville features except illustrated songs. He says the vaudeville features belong to legitimate theaters, and the moving picture theaters, he explains, are not constructed according to the city ordinance. Mr. Winterrowd says the places will have to comply with his order or close. It will not hit any of them very hard, as the most of them do not have vaudeville features, aside from the illustrated songs.

FROM OUR EUROPEAN HEADQUARTERS

69 BASINGHALL STREET, LONDON, E. C., W. LIONEL STURDY, MANAGER.

TRADE HAPPENINGS IN LONDON.

Post-Holiday Trade Steady but No Unusual Activity Apparent—Roller Skating Craze Hurts Talking Machine Trade in Some Districts—The General Feeling on the Copyright Question—Friendly Discussion Invited—Croydon Marks Returned to Parliament—The Latest Gramophone Records—A Strong Month of Edison Advertising Campaign Planned—The Excellent Clarion Record List—New Beka Records—New Canadian Tariff Regulations—Other New Records of the Month—Live Columbia Co. Advertising—The News of the Provinces—Satisfactory Reports the Rule—Other Talking Machine News of the Month.

(Special to The Talking Machine World.)

London, Eng., Feb. 5, 1910.

Trade has not been such during the last week or two as to call for any special enthusiasm; but there is no sign of depression by any means. In the chief cities things are taking a middle course, inasmuch as while trade is not so bright as it perhaps might be, a steady average of sales is being maintained. It may be that a slight reaction after the Christmas rush was only to be expected, and this possibly is the case, since, at the time of writing, an improvement is noticeable. Remarkably good business, however, prevails in the country districts, where the demand for records of the latest titles is usually pretty heavy. Not a little due to the fact, I suppose, that the new skating rink and cinematograph entertainments are only conspicuous by their absence. Certain it is that such places have opened up of recent months quite a new and novel form of enjoyment for the masses in our large cities, so much so as to affect talking machine sales to no inconsiderable extent. There has been, too, a lessening of devotion and energy on the part of cycle dealers handling the goods of this industry in conjunction with roller skates. Their attention has been diverted by merely a craze of the moment, so to speak, and because such puts more profit in their pocket than that from the sale of records, etc. Some are neglecting this business—a business, I venture to say, which will survive the skate craze for all time. But many are up against their own interests in thinking that a bird in the hand is worth two in the bush. It is sometimes, but not in this case, as must be obvious to every dealer who will give the matter a second thought.

Copyright Report Arouses Interest.

The full report of the copyright committee's findings as affecting this industry, which appeared in *The Talking Machine World* of last month, contained not a few exclusive items which have aroused the liveliest interest among members of the trade. My report covered the ground pretty fully, and from certain opinions conveyed to me it is looked upon as the best summary yet presented. While the interest in this matter of copyright covering mechanical reproduction is quite unabated, there is a noticeable absence of hostility against the reforms suggested, except in that manufacturers of records regard the freedom of action proposed to be vested in the authors of musical compositions as tending to produce a baneful effect by the certain establishment of monopoly. A general feeling exists in favor of a fixed percentage on sales, or a stipulated royalty as obtains in the United States. In view of the general election, some considerable time must necessarily elapse before any copyright bill can be presented in the Commons; there is the question of the lords and the budget to be dealt with first, and as, from the state of the parties, it is generally recognized that the government's position is somewhat precarious, a dissolution in the near future being

quite possible, further delay in presenting the copyright bill may result. In the meantime, with a view to obtaining the desired modification as outlined above, manufacturers of records and perforated music rolls would do well to see that their respective M. P.s are sufficiently posted in details, and induced to give their support to an amendment having for its object the prevention of any monopoly clause in the bill to be passed by Parliament.

Opinions Invited on Tariff Reform Question.

The pertinent question of tariff reform, one of the chief planks of the Unionist platform during the present general parliamentary elections, received the support of a good majority at a recent meeting of piano men, called together at the instance of the Pianoforte Manufacturers' Association, Ltd., to discuss, as a matter of vital trade consequence, the question of tariff reform as affecting their business. The following resolution: "That this meeting of the piano, organ and allied trades is firmly of opinion that a duty upon foreign imported pianos, organs and component parts would greatly benefit the industries concerned, in that it would secure to the manufacturer his rightful position in the home market and enable him to compete upon fair terms in the colonial and other trade centers, and by so doing provide regular and remunerative employment for those engaged in the trade," was duly put and declared carried. Put to a meeting of talking machine traders, would such a resolution pass? That is a question I do not propose to answer, because whatever my personal opinion may be, this journal's policy is in such matters entirely independent. But it is not out of place to open a friendly discussion upon the matter, and with that end in view I invite the opinion of my readers. It is true a tariff bill is not likely to be introduced in the next Parliament, but just how long that Parliament will last is in question. The present state of the parties leads one to believe that another general election is not only possible but very probable within twelve months, in which case the fight must center around tariff reform versus free trade. In some trades there certainly exists a very strong plea for protection, in others just the reverse. In this industry a general feeling exists that a 10 per cent. duty (which the conservative party suggest) would have little or no effect on retail prices. Take, for instance, our imports from Germany. During 1908 we imported records to the value of £103,100, and £63,600 worth of machines. Supposing a 10 per cent. duty was levied upon these, who will pay? If the makers, then up must go the retail price, since their margin of profit, especially on records, is not sufficient to provide for any inroads in the shape of tariffs. And then, if the retail prices were increased, in view of the fact that there are equally as good records made in England at competitive prices, who would buy the imported article at an extra cost? Not many, for sure. It therefore follows that the burden would fall upon the shoulders of the exporters' agents, who, in order to maintain their business, would necessarily have to pay the 10 per cent. duty out of their own pockets. And assuming the eventual adoption of a 10 per cent. duty, whether or not it would affect prices, importers and foreign exporters have to bear in mind that such a tariff is not likely to remain at 10 per cent.; it is almost bound to be increased sooner or later. Result—exit record or "made in England." Such is the argument put forth by the protectionists. Maybe there is something in that, but what have my readers to say upon the matter? Opinions from either school should be addressed to our London office.

Largest Order for Prince Graphophones.

The opening of the new year was pleasantly

signalized to the Columbia Co. by the receipt of the largest individual order for the improved Prince graphophone yet received.

Congratulations.

Croydon Marks, director of the National Phonograph Co., Ltd., and Mr. Edison's personal representative in England, has been again returned to Parliament by a big majority. He belongs to the old Liberal school, and is a staunch free trader.

Melba; Ancient History; and Press Errors.

Madame Melba returns to Europe by the steamship "Orvicto," leaving Perth, West Australia, on January 31. She had a rousing reception throughout the seventy towns visited, and took leave of her admirers in Perth January 20. This year Madame Melba is booked for a big Canadian tour, which will furnish a splendid opportunity for dealers to make big money in the sale of Victor records. And, by the way, that reminds me that our esteemed contemporary, the London and Provincial Music Trades Review, is again a little behind the times in its reports and knowledge of talking machine matters. In its last issue it says: "In March, 1907, while Madame Melba was in New York, she made some Gramophone records, for which she received a cash bonus of 10,000 guineas; in addition she receives royalties on the records sold. No wonder the public has to pay a guinea for each record!" Comment is needless.

Strong Gramophone Record List for February.

Described as one of the strongest and most popular lists of recent times is the February issue of Gramophone records just to hand. It includes, as will be seen, the first supplementary issue of celebrity records, of which there are three well recorded and popular titles sung by great artists. The following is the complete list, and my readers will agree that they are all good, especially from a sales point of view: "Falka" selection 1 (Chaussaigne), and "Yeoman of the Guard," selection 2 (Sullivan), by the band of H. M. Coldstream Guards; ballet music, "Faust," No. 5, "Les Troyennes," No. 6, "Variation du Miroir" (Gounod), and ballet music, "Faust," No. 7, final, "Dance de Phryné" (Gounod), by French Symphony Orchestra; "Forward, March" (Doppler), by the Black Diamonds Band; "A Song of Sleep" (Lord H. Somerset), and "I Hid My Love" (Guy d'Hardelot), John Harrison; "Last Night" (Kjerulff), Evan Williams; "Four Indian Love Lyrics" (Amy Woodforde Finden) (a) "The Temple Bells," (b) "Less Than the Dust," "Kashmiri Song" ("Pale Hands I Loved") and "Till I Wake," Stewart Gardner; "The Lute Player" (Ailitsen), Robert Radford; "When the Stars Were Young" (Rubens), Mme. Kirkby Lunn; "In Springtime" (Newton), Miss Perceval Allen and Robert Radford; "The Mariners" (Randegger), Miss Perceval Allen, John Harrison and Robert Radford; "We Parted on the Shore," Harry Lauder; "Chant sans Parles" (Tschaikowsky), the Renard Instrumental Quartet. New Celebrity records—"Giorni poveri" ("Il Trovatore") (Verdi), and "Chanson Boema" ("Carmen") (Bizet), Mme. Maria Gay, and "Barcarolle" ("Contes d'Hoffman") (Offenbach), Miss Geraldine Farrar and Sig. Scotti—a beautiful record, truly.

Month of Special Edison Advertising Planned.

A big advertising scheme of a very original nature has just been initiated by the National Phonograph Co. in the interests of their dealers throughout the United Kingdom. "Edison Month," as it is called, means a month of free advertising for those traders willing to co-operate with the company by complying with a simple condition having reference to stock. During Edison month large advertisements will be placed in all the great Lancashire daily newspapers, covering Manchester, Liverpool, Blackburn, Bol-

FROM OUR LONDON HEADQUARTERS—(Continued).

ton, Preston, and other chief cities, and these advertisements will feature principally Amberol goods. Those dealers carrying a representative stock have their name and address inserted free of charge, and this stipulation is very reasonably insisted upon, because it would be useless to advertise a dealer who had, for instance, only a Gem machine to show a prospective purchaser of a "Home." Lancashire month covers January 20 to February 19, inclusive, and I am informed that the scheme has started in right well there, the principal traders having taken up the matter with enthusiasm. Following this month, the next district to be touched will include Bristol, Swansea, Cardiff, and other important Welsh towns located thereabouts, while other districts will be taken in turn. The company are supplying plenty of free literature to back up the free advertising, and all they ask in return is that dealers will properly entertain and demonstrate the Amberol goods to those who go to them in response to the advertisement invitation. The company naturally expect that the large expenditure involved will be fully justified by the greatly increased sales of Amberol goods which their dealers will experience, and it only remains to add that never before has such a unique and entirely unselfish advertising scheme been inaugurated to the advantage of talking machine retailers, who cannot fail to appreciate it.

Old Favorites in March List of Twin Records.

Some old favorite titles and topical selections figure in the Twin record list for March, just issued, and my advice to dealers is, get it!

Some Excellent Records in New Clarion List.

From the current issues of Clarion records it would be difficult to particularize any specially good records, as they are all well up to the average good quality maintained by the Premier Mfg. Co., but the following call for mention: Double-disc phono records—"Visions of Salome" and "Ciribiribin Waltz," by the Premier Bijou

Orchestra; "Christmas Day in the Army," descriptive; "Is Anybody Looking for a Widow?" and "Now I Have to Call Him Father," sung by Miss Kitty Curtis; "Do Leave a Little Bit Behind" and "Incidents" by Charles Denton; "All Waiting for a Girl" and "Settle Up and Settle Down," by Willie Bourke; "A Little Bit of Crackling, John," by Miss Kitty Curtis, and "With My Little Wigger Wagger," by Charles Denton. Miss Kitty Curtis also gives us the same songs on the cylinder records, as also does Charles Denton, excepting "With My Little Wigger," and Stanley Kirkby gives a fine rendering of "Call Me Back Again."

W. Manson Appointed Manager.

W. Manson, who has guided the destiny of the Twins since birth with such excellent results, is to be congratulated upon his appointment as manager of the British Zonophone Co. He is an able business man.

Meeting of Metzler & Co. Creditors.

A private meeting of the creditors of Metzler & Co., Ltd., manufacturers and importers of musical instruments, publishers, etc., Great Marlborough street, London, W., was called by the liquidator, F. Davis, and after some discussion adjourned.

The February Beka Records.

February Beka records to hand are as follows: "Harry Lauder Memories," Part 1 and 2, by the Beka London Orchestra, comprise excerpts from eight or nine of Mr. Lauder's most catchy songs, well played and well recorded, which may also be said of "Tom o' Devon" and "Three for Jack," sung by Harry Thornton; "The Promise of Life" and "The Children's Home," Miss Eugenie Ritte; "To Old Bombay" and "To the End of the World With You"—Hebrew minstrels—The Big Four Quartet; and a splendid Meister record, "Faust and Mephistopheles Duet," Part 1 and 2, sung with exceptional merit by G. Wigley and H. Thornton.

R. Smith Still an Active Factor.

Sales Manager R. Smith, recently connected with H. Lange's Successors, Ltd. (in liquidation), advises me that he retains association with the Favorite record and Klingsor machines, under the new regime, at 45 City Road—a fact which can only point to the company's advantage, in that Mr. Smith's extensive knowledge of this trade must tend to enhance and further the ever-increasing sales of the Favorite and Klingsor goods.

Fire in Orchestrelle Co.'s Warehouse.

An outbreak of fire occurred recently at the Orchestrelle Co.'s warehouse in London, which, before being subdued, did considerable damage to a number of Pianolas and perforated rolls of music.

America Out-Hustled.

A remarkable instance of a youthful undertaking came to light in the bankruptcy court the other day. Two boys, age 15 and 16, exactly 18 months ago started in business as piano and organ dealers under the name of Nelson Bros., at Paisley, and according to a statement of affairs just filed it appears the venture resulted in a deficiency of £92, although an accountant had supervised recently.

Canadian Customs New Preference Rules.

The following new customs regulations were issued at Ottawa on December 17, dealing with amended certificates of origin on invoices for Canada: (1) To be entered under the British preferential tariff, and (2) under treaty or convention rates.

1. British Preferential Tariff—"From and after February 1, 1910, the country of origin in respect of each imported article shall be specified on the margin opposite to such article, or elsewhere, on the invoice thereof, when the articles are for entry in Canada under the British preferential tariff. A certificate of origin, as herein-after set forth, is prescribed to be written, print-

ed or stamped on the face or back of all invoices of articles for entry as aforesaid. Such certificate shall be made and signed by the exporter personally, or on his behalf by his manager, chief clerk or other principal official having knowledge of the facts to be certified to, and shall contain the following statement of facts, viz.: "That each article on this invoice is bona fide the product or manufacture of a country entitled in Canada to the benefits of the British preferential tariff, and specified on the invoice as its country of origin, and that each manufactured article on the invoice in its present form ready for export to Canada has been finished by a substantial amount of labor in such country, and not less than one-fourth the cost of production of each such article has been produced through the industry of one or more British countries." Goods for entry under the British preferential tariff are to be invoiced separately from other goods. The invoice forms for entry under the British preferential tariff in Canada remain as heretofore prescribed, except as to the above certificate of origin, the surtax certificate being, however, dispensed with on preferential invoices.

2. Treaty or Convention Rates.—"When articles the product or manufacture of any country are to be entered at the customs house in Canada under treaty or convention, the country of origin in respect of each such article shall be specified on the margin opposite such article, or elsewhere on the invoice thereof. A certificate of origin, as hereafter set forth, is prescribed, to be written, printed or stamped on the face or back of all invoices of articles for entry, as aforesaid. The certificates shall be made and signed by the exporter personally, or on his behalf by his manager, chief clerk or other principal official having knowledge of the facts to be certified to, and shall contain the following statement of facts, viz.: "That each article on this invoice is bona fide the product or manufacture of the country specified on the invoice as its country of origin. That each manufactured article on the invoice in its present form, ready for export to Canada, has been finished by a substantial amount of labor in such specified country of origin, and not less than one-fourth the cost of production of each such article has been produced through the industry of said country."

The certificate of value and of origin on invoices for entry under treaty or convention rates may be combined, as set forth in the forms. Copies of these new regulations, with the new forms attached, may be obtained on application to the High Commissioner for Canada, 17 Victoria street, London, S. W.

Strong Zonophone Record List.

Zonophone factors and dealers are in the fortunate position of being able to rely upon a good strong list of selling titles each month, and the latest issues are well up to the mark in that respect. I would bring the following under the notice of my readers: 12-inch, "The Secret to be Happy," splendidly rendered by Mme. Edna Thornton; "Ship Ahoy" and "I Want to go to Idaho," by Fred Vernon; "I Used to Sigh for the Silvery Moon" and "The Light of Day," by H. Payne, and "What Hear I?" from "Il Trovatore," sung by Miss Yarrow and H. Thornton.

Active Columbia Publicity.

I am in receipt of some very effective advertising literature from the Columbia Co., and from which it is evident that dealers in Columbia and Rena discs are given every assistance in making the most of the big demand promoted by such a fine list of pantomime titles as the company have issued. Particularly useful, I should say, are the series of window cards which have been put up in various striking colors, giving thereon in bold lettering the name of a pantomime success—a separate card for each. Any dealer can have a parcel of this advertising matter free upon request.

A remarkably strong list of Columbia and Rena 10-inch and 12-inch records is that for the

month of February. Here are a few choice selections from each impression: Rena 10-inch double—"The Swan," 'cello solo by Jean Schwiller, and "Andante," from Quartet No. 1, by the Lufsky Instrumental Quartet; "Funeral March" (Chopin), organ solo, by A. W. Ketelbey, and "Dead March in Saul" (Handel), organ solo by A. W. Ketelbey; "Pantomime Pickings," on two records, Nos. 1 and 2 and 3 and 4, by British Guards Band; "Heva-Hiva-Ho!" and "Jonathan Jones," sung by Edgar Coyle; "Molly O'Morgan" and "Ship Ahoy!" sung by Harry Fay; "Night of Stars and Night of Love" and "Estudiantina," duets sung by Ethel and Mary Williams. Rena 12-inch double—"Softly and tenderly Jesus is Calling," duet sung by I. Gillette and F. C. Stanley, and "O Holy Night," sung by Thomas Chalmers; "Mary of Argyle" and "Drink to Me Only With Thine Eyes," sung by David Bispham; "Scarf Dance" and "Chanson Triste," by Prince's Orchestra. Columbia 10-inch single—"Harvest Moon Waltz," by Casino Orchestra; "Alpine Violets," violin, flute and harp trio; "Why Does England Want a Bigger Army?" by Arthur Leslie. Columbia 12-inch single—"Woo Thou The Snowflake," by David Bispham; "Village Belles," by Prince's Orchestra, and "Serenade Coquette," by Haydn Orchestra.

Edison Records for March.

Some particularly good things are offered dealers in the current Edison impressions for March, of which the following are complete lists:

Standard Records—13937, "Le Cid Overture" (Thomas), National Military Band; 13938, "It's a Wonder What Little Things Lead To" (Scott and Burley), Billy Williams; 13939, "Brown Wings" (Rogers), Stanley Kirkby; 13940, "On the Go March" (Pares), Alexander Prince; 13941, "One Day She Helped Herself to Father" (Godfrey & Murphy), Miss Florrie Forde; 13942, "The Hot Cross Bun" (Collins and Terry), Arthur Osmond; 13943, "The Canary's Love Song" (Seymour, with whistling), Joe Belmont; 13944, "Take a Wife" (Moy), George Formby; 13945, "With Sword and Song March" (Mohr), National Military Band; 13946, "Bonnie Keel Laddie" (Nunn) (Tyneside selection), J. C. Scatter; 10317, "La lettre de Manon" (Gillet), Sousa's Band; 10318, "I'm A-goin' to Change My Man," Miss Marie Dressler; 10319, "Hunting Song" (Bullard), Stanley and Gillette; 10320, "Laverne—Waltz Caprice" (Henton), H. Benne Henton; 10321, "When I Am Away from You" (O'Connor), Manuel Romain; 10322, "Sun of My Soul" (Ritter), Anthony and Harrison; 10323, "Irish Blood" (Mack), Miss Ada Jones; 10328, "Four Little Sugar Plums" (O'Connor), American Symphony Orchestra; 10330, "What Makes the World Go 'Round?" (Williams and Van Alstyne), Miss Ada Jones and Billy Murray; 10331, "Falcon March" (Chambers), New York Military Band.

Amberol Records—12141, "Mignon," selection (Thomas), National Military Band; 12142, "The Farmer's Boy" (King), Stanley Kirkby; 12143, "Poor Aunt Jane" (H. E. Darewski, Jr.), Miss Florrie Forde; 12144, "Bonnie Scotland," Alexander Prince; 12145, "The Inharmonious Blacksmith," Arthur Osmond; 12146, "The Dear Little Shamrock" (Jackson), Miss Carrie Lanceley; 12147, "The First Time I've Been in Love" (Murphy and Lipton), Jack Pleasants; 12148, "The Blind Boy" (Moore), Jean Schwiller; 12149, "We're All Waiting for a Girl" (Murray and Godfrey), Billy Williams; 12150, "Florentina March" (Fucik), National Military Band; 365, "Roses," waltz from suite; "Rose of Shiraz" (Ellenbery), Sousa's Band; 366, "Put on Your Old Gray Bonnet" (Wenrich), Frederick H. Potter and chorus; 367, "Do They Think of Me at Home?" (Glover), Manhattan Mixed Trio; 371, "There Were Shepherds" (Buck), Edison Mixed Quartet; 372, "White Wings" (Winter), Manuel Romain; 373, "Fanasie on Themes of Léonard and Paganini," Michael Banner; 376, "Dreams" (Strelezki), Miss Elizabeth Wheeler; 377, "American Students' Waltzes" (Missud), New York Military Band; 378, "Davey Jones' Locker"

(Petrie), Gus Reed; 379, "Nearer, My God, to Thee" (Johnson), Knickerbocker Quartet; 381, "Balmy Night" (Ziehrer), Vienna Instrumental Quartet; 384, "King Karl March" (Unrath), New York Military Band. Following upon the well-merited success and enthusiasm engendered by the first issue of grand opera selections on the Amberol record, the announcement of a supplementary list for March will be welcomed by trader and user alike. This list contains five titles comprising excerpts from some of the well-known operas, as follows: B178, "L'Africaine-O Paradiso" (Meyerbeer), Florencio Constantino, tenor; B179, "Ernani-Infelice" (Verdi), Luigi Lucenti, bass; B180, "Cavalleria Rusticana-Vio lo Sapete" (Mascagni), Ester Ferrabini, soprano; B181, "La Tosca-E lucevan le stelle" (Puccini), Riccardo Martin, tenor; B182, "I Puritani-Suoni la tromba" (Bellini), Ernesto Caronna, baritone, and Luigi Lucenti, bass.

Gramophone Co. Lose Appeal.

Gramophone Co. versus Magazine Holder Co. This was a case in which the plaintiffs alleged that defendants had infringed a certain cabinet design, which defendants denied. Justice Warrington gave judgment against the Gramophone Co., who appealed. Their lordships' reserved judgment just handed down is in effect dismissing the appeal (Lord Justice Moulton dissenting), with costs.

Provincial News of the Month.

I gather from reports received that talking machine trade conditions throughout the provinces are satisfactory, all things considered. Of course, the reaction which temporarily follows a busy Christmas has in some quarters damped the enthusiasm of a few dealers, but a pleasant indication is the remarkable energy which the majority have shown in pushing the pantomime song hits for all they are worth. There is usually something to specialize upon when trade seems somewhat depressed, and judging by the large orders for panto. issues sent to London, provincial factors and dealers are not slow to recognize and make the most of an opportunity thus presented to further their record sales. In Lancashire, too, the leading dealers in Edison goods have the benefit of a month's free advertising by the National Phonograph Co. (as reported elsewhere in this issue), and have expressed their appreciation of such a sales-making scheme in a very practical manner by putting in additional stock in preparation for the demand which this advertising idea must produce. In most of the provincial centers of industry the Cecil Zonophone machine has won great popularity, and at headquarters I learn that it is as much as they can do to keep ahead of demand. In records, dealers, both up North and further South to the Midlands, have found a ready sale

The STROH VIOLIN

A new instrument possessing a VIOLIN TONE of great beauty and remarkable power, which will appeal to all music lovers.

The Stroh Violin being scientifically constructed will withstand the varied temperatures of the tropics, where the ordinary violin is useless.

Musical Instrument Dealers and others interested should write for free descriptive booklet to the Sole Maker.

GEO. EVANS
(Successor to CHAS. STROH)
94 Albany St., Regents Park, London, Eng.

for the Rena, Twin and Zonophone titles, which, I may say, appear to be gaining ground everywhere. Encouraging reports of increased provincial business reach me from T. Graff (National Phonograph Co.) and Mr. Manson, of the Twin and Zonophone companies, both of whom have recently returned from extensive trips covering the chief centers. Robinson's, of Manchester, report that while there is no great rush, they are, in common with others, experiencing a steady stream of trade, which gives time to attend to customers' requirements without haste. November and December business was about equal in volume to that of 1908, and future prospects appear to be fairly bright.

Edison-Bell Depot in Liverpool Burglarized.

Some Liverpool members of the burglar fraternity have been busy at the Edison-Bell depot in London Road, and among the goods stolen were a number of Edison-Bell records. Well, those chaps evidently knew they were on a good thing, and one can now imagine them having a good time as a result of their wise choice.

In the Midlands the fact that general business conditions have been undisturbed by labor or other troubles has had a most beneficial effect upon talking machine and record sales, with the result that dealers are having a very busy time even now. The Edison lines are selling extremely well in this district, as also are the Twin and Zonophone products.

T. Edens Osborne's Encouraging Report.

Thos. Edens Osborne, the enterprising Belfast trader, writes a very encouraging report of business conditions in Ireland, where he is the chief distributor of Edison, Gramophone and the Zonophone products. During the past year Mr. Osborne's trade in these lines has been so much on the upward trend that he has found it absolutely necessary to devote more time to the development of this branch of his extensive business, and in consequence has had to relinquish the cycle department, which occupied no small part of his attention.

PHONOGRAPHS IN CHINA.

American Machines Regain Popularity at Swatow—Interesting Report.

(Special to The Talking Machine World.)

Washington, D. C., Feb. 2, 1910.

Consul Albert W. Pontius, of Swatow, tells as follows how the trade in American phonographs was re-established in that part of China:

"The American product was, of course, the first talking machine imported into Swatow and vicinity. For a few years there was no opposition, and then the cheaper machines of German and French manufacture began to appear. The difference in price appealed to the Chinese, and for several years the local market was flooded with the cheaper and inferior machines. Lately there has been a change, the Chinese buyer realizing that the saving of a few dollars gave him a machine which for durability and general satisfaction could not compare with the American make. Consequently the latter machine is now again in favor and demand. The machines of different manufacture range in price from \$4 to \$80, and all of this stock is imported from Hong Kong. It might be well to add that practically all of the foreign imports to this place come from that port.

INITIATIVE NECESSARY

For the Salesman or Merchant Who Would Succeed in the Talking Machine or Any Other Business.

In a very interesting little paper called "Tips" issued occasionally in the interests of dealers by the Edison Business Phonograph Co. Jerome B. Fleischman preaches this very excellent sermon:

"Don't govern your thoughts and actions according to the other fellow's standards.

"Think for yourself. Make your own brain get busy. Make it record its own impressions. Make it create its own impulses and ideas.

"The moment you say, 'I wonder what people will think,' you admit the superiority of the judgment of others.

"You've got a brain of your own or you couldn't comprehend what all this is about. You've got judgment of your own or you wouldn't agree or disagree with what you are reading right now. You possess the ability to think for yourself, otherwise you wouldn't know whether you agree or disagree with what is printed here.

"Why not exercise that brain? Why not put some confidence in that judgment? Why not rely on those thinking powers to steer the ship of Self?

"Being natural isn't hard. Trying to be unnatural is. Thinking your own thoughts is much easier than thinking what you think the other fellow thinks. And there's so much more satisfaction in being one's own self than there is in trying to be somebody else.

"Be true to yourself. Believe in yourself. What others have done you can do. You were made a part of the great Scheme of Things because there is work for you to do. Do it! Don't worry about what somebody else will say when you take off your coat and dig in. Just dig! Dig like forty! And, above all—

"Make sure that you are you. Be yourself!"

GRANT PRELIMINARY INJUNCTION.

The Victor Talking Machine Co. Secure an Injunction Against a Disc Talking Machine Having a So-called Feeding Screw.

On January 12 Judge Lacombe of the United States Circuit Court for the southern district of New York granted a preliminary injunction in the case of the Victor Talking Machine Co., Camden, N. J., et al., against the H. Schroder Hornless Phonograph Mfg. Co., New York, restraining the defendant from infringing claims 5 and 35 of the Berliner patent, No. 534,543. The defendant's machines, which the court enjoined.

had two different styles of so-called "mechanical feed" devices attached to the machines connected with the tone arm carrying the reproducer.

Horace Pettit, counsel for complainants, contended that as the machine was constructed and operated in accordance with the claims of the patent in suit the addition of the so-called screw-feed mechanism did not relieve the machine of infringement, which so-called feeding mechanism was placed there, not for useful purposes, but to evade the patent. Complainants' counsel also contended that the machine would work better without the so-called screw-feed device than with it. The defendant company was represented by James C. Chapin, who filed opposing affidavits and vigorously opposed the motion. The case was argued before Judge Lacombe on January 7, and on January 12 the court granted the motion for preliminary injunction, the injunction writ being served upon the defendant January 20.

A GOOD ONE FROM GEORGIA.

Bradford County Farmer Saves Hay by Giving His Cows a Musical Diet by Means of a Talking Machine—The Wonderful Results.

A waggish correspondent at Athens, Pa., writes to the Philadelphia North American giving an amusing story of an alleged dairy experiment there, as follows: Some real poet has said, "Music hath charms to soothe the savage, bust a rock or split a cabbage." But it is without profit to follow the ramifications of this worn subject. The single narration of what is being done in Bradford County by musical dairymen to increase the flow of milk by keeping a talking machine going while the cows are being pailed gives quite enough food for quiet thought.

The author of this bright idea is at present unknown to fame. Posterity will probably lay a laurel chaplet on his brow and a huge milk pail at his feet, but the present knows him not. Facts are, however, stubborn things, and the plain tale from this Bradford County hills is sufficient.

It takes money by the pail to keep cows going at this season of the year. Hay is \$15 a ton, and none to be had, for every farmer that has any to sell, and he is that old friend legion, is holding out for a higher price. Feed is at an unusual altitude, and farmers have been feeding their cattle ever since the middle of July, and many haven't enough fodder to last through. They will have to buy hay soon themselves, and then the shoe will pinch the other foot—but the cow won't feel it.

But to return to the farmer near Towanda who bought a talking machine and three dozen

records for about what a couple of tons of hay would cost and set the machine up in the stable. The cows were driven in and given a bit of hay, and then the music was turned on. Not ragtime, such as might have precipitated a cow dance, but something dignified and soothing. Such tunes as "I'm Called Little Buttercup," "Shall We Gather at the River," "If the Milk Supply Runs Short?" "You'll Never Miss the Water Till the Well Runs Dry," "In the Shade of the Old Apple Tree," "Comin' Through the Rye," "Oh, That We Two Were Maying" and "When the Corn is Waving, Annie Dear" being selected with an eye to business that showed evidences of real genius. There was one old cow that had a far-away look in her eyes as she gazed down the road toward town when "Love Me and the World is Mine" was played that made me imagine she was dreaming of her calf-love days. Strange to say, the herd ate very little hay while listening to the music, but gave a full allowance of milk.

Having talking machine recitals for the cows is to be continued to make sure of results, and if the test holds this dairyman sees much money in giving concerts to his neighbor's herds, or else establishing record exchanges at which each farmer owning his own machine can exchange records every two weeks at a nominal cost, only using the tried and proven best milk-producing discs. Canned music, even at 35 cents per can, is a sight cheaper than any cow food in these parts.

VICTOR NUMERICAL CATALOG

Of Both Domestic and Foreign Records Sent Out to Dealers—Conveniently Arranged in Two Sections—Lists of Foreign Records.

Following the issuing of the new Victor record catalog for the use of the public last week, the Victor Talking Machine Co. have just issued the numerical list of records for dealers' use exclusively, which, for convenience, is divided into two sections, domestic and foreign.

The first section of the list is a numerical arrangement of the records which appear in the Victor record catalog of February, 1910. The second section is a numerical arrangement of records in other than the English language, available for the domestic trade, excepting Chinese, Japanese and Korean records. The contents are as follows:

Spanish catalog, which contains Spanish, Mexican and Cuban records; Italian catalog, which contains records in the Italian language, as well as any instrumental selections that are intended for the Italian trade; Scandinavian catalog, which contains all Norwegian, Swedish, Danish and Finnish records, both vocal and instrumental; Slavonic catalog, which contains Bohemian, Hungarian, Russian, Polish and Hebrew records, both vocal and instrumental; Gregorian catalog, which contains Gregorian and Sistine choir records; French catalog, which contains all records in French and French-Canadian; German catalog, which contains all German records; Hawaiian catalog, which contains all Hawaiian records, both vocal and instrumental, and the Portuguese catalog, which contains all Portuguese records.

The separate foreign catalogs, nine in all, are also enclosed with the numerical list. They are neatly printed and admirably edited.

Don't Buy Needles Wasting Records

Bad Needles

Condor Needles

When a needle is running a record, the friction causes the polished surface of the needle to be taken off, while its interior (grain) is exposed and touches the sound waves.

Consequence:

The poorer the polishing and rougher the grain, the more the sound waves are injured!

Only *Condor Needles* are warranted to have always the highest and most perfect polish, smoothest grain. Using them means:

**Finest Reproduction,
No Ruin of Record.**

MILWAUKEE'S TRADE GLEANINGS.

Excellent Report Regarding Trade—Presence of Opera Company Big Help in Sales of Records—Kunde's New Quarters—Larger Quarters for Gimbel Bros.—Miss Gannon Becomes Owner of McGreal's Retail Business—McGreal's Wholesale Trade Active.

(Special to The Talking Machine World.)

Milwaukee, Wis., Feb. 6, 1910.

Indications are that the best February talking machine business in the history of the Milwaukee trade is now opening up. Both wholesale and retail lines are showing unusual activity and dealers are more than optimistic over the prospects for the entire year of 1910. Despite the fact that a record-breaking business was received in Milwaukee and about the State during the holiday period, the month of January exceeded all expectations.

"We are more than pleased with the manner in which the wholesale trade is keeping up," said William Schmidt, manager of Lawrence McGreal's wholesale department. "Dealers met with such a brisk holiday business that their stocks were well cleared out and they are forced to order heavier at this time of the year than is usually the case. The new Edison Amberola is taking exceptionally well with the trade and the only trouble is that we are unable to get them fast enough to supply the demand."

"The retail business, while not as heavy as it was during the holiday period, is more than satisfactory at the present time," said Miss Gertrude Gannon, present owner of Lawrence McGreal's retail business. "The demand for Victrolas is still unabated and we are more than pleased with the excellent demand that is existing for high class goods." Miss Gannon has been the owner of her brother-in-law's retail business for several months, while Mr. McGreal is now devoting his entire time to his wholesale business.

The appearance in Milwaukee of the National Grand Opera Company and the later arrival of several individual grand opera stars has increased the local sale of grand opera records to a wonderful extent. Prior to and following the recent appearance of Mme. Tetrassini, the records of the Italian singer's bird-like voice were ready sellers.

During the time that interest was aroused in Mme. Tetrassini, J. H. Becker, Jr., manager of the talking machine department of the Hoeffler Mfg. Co., had several cards in his display windows announcing the fact that "Mme. Tetrassini sings here to-day, 2 to 5 p. m." This brought big crowds to the store to listen to the special afternoon concerts. These afternoon concerts at the Hoeffler Co.'s parlors are proving decidedly successful and are resulting in an increased sale of both records and machines. Mr. Becker has a good word of advice for the talking machine salesman when he says:

"Whenever possible, a talking machine salesman should make it a point to attend grand opera and hear the artist the records of whose voice he is daily selling. In the first place it is highly educational to the salesman himself, and in the second place it is sure to help him in his business. People like to have a salesman who is posted in opera and I find that it pays me to attend all grand and light opera productions that appear in the city.

"The Victor light opera records are great sell-

ers and they have awakened a new interest in the record buying public," continued Mr. Becker. "Any number of our customers have purchased complete sets of the Victor grand and light opera records. One afternoon we sold four complete sets. The new records of Harry Lauder are in big demand and people tell us that these records are wonderfully true to life."

The north half of the McGreal retail talking machine store, now owned by Miss Gertrude Gannon, has been leased to Prof. Jack La Mont, a well-known dancing master of Milwaukee. A partition has been erected and Prof. La Mont has spent nearly \$16,000 in making the place into one of the most pretentious cafeterias in Milwaukee. Lawrence McGreal has moved his wholesale offices from the first to the third floor, where his wholesale parlors are now located. The wholesale warerooms now occupy the entire fourth floor.

The downtown Milwaukee store of the Columbia Talking Machine Co., now owned by A. G. Kunde, has been moved from 413 to 516 Grand avenue. The location is still of the very best and excellent quarters have been secured at a greatly reduced rental. "Although our moving cut into the trade somewhat of late, business is very good," said Mr. Kunde. "Demand for both machines and records is keeping up well and the prospects are bright. Our store is located in the heart of the downtown retail district and I can see no reason why prospects should not be of the very best."

Roy J. Keith, of The Talking Machine Co., of Chicago, and A. H. Gibbs, of the Wurlitzer Co., of Chicago, called upon the Milwaukee trade recently.

Walter J. Augustin, the enterprising young talking machine dealer of Fond du Lac, Wis., who recently opened a new store at Oshkosh, Wis., was in Milwaukee this week. Mr. Augustin's Oshkosh store is one of the finest in the Northwest and he has been meeting with an exceptionally good trade in the few months that the establishment has been open. Other out-of-town dealers who were recent Milwaukee visitors includes: Messrs. Lenroot and Schultz, of the Lenroot & Schultz Co., of Antigo, Wis.; H. J. Ebenreiter, of Plymouth, Wis., and Frank Schultz, manager of the Wisconsin Music Co., of Madison, Wis.

News has reached Milwaukee that William P. Hope, traveling representative of the National Phonograph Co. in Wisconsin and Upper Michigan territory, is on his way to Milwaukee. Mr. Hope is returning from a highly successful trip to the Michigan copper country.

One of the leading features of the recent annual reunion banquet of the Rose Marching Club, of Milwaukee, of which Mayor David S. Rose is the head, was a phonographic reproduction of the private conversation of some of the members of the club who took the trip south with the organization last year. The interesting records were made and reproduced under the direction of Lawrence McGreal, a member of the Rose Club.

The announcement that the entire sixth floor of Gimbel Bros. department store at Milwaukee will soon be given up to the piano department of the store and that the present piano quarters on the second floor will be remodeled and given over to the new talking machine department of the store, has created considerable talk in Milwaukee talking machine circles. The acoustics

of the new department are of the best and it is said that no expense will be spared in making the department into one of the finest of its kind in the city.

Milwaukee talking machine dealers are interested in the agitation that is taking place in this city for the licensing of moving picture show operators. The plan has been adopted in Chicago and it is expected that it will be tried in this city.

The agitation at Janesville, Wis., concerning the movement started by most of the leading business men of that city for the abolition of the use of talking machines in front of the moving picture shows is still going on. A petition signed by several business men aiming to protect the moving picture show people in the use of the talking machine was promptly laid on the table in a recent session of the common council.

TALKING MACHINE JOBBERS MEET.

Hold Executive Session in Philadelphia—Planning for Convention in May—Many Important Matters Discussed—Entertained by Victor Officials—Enjoy Theater Party.

(Special to The Talking Machine World.)
Philadelphia, Pa., Feb. 8, 1910.

A meeting of the executive committee of the National Association of Talking Machine Jobbers was held at the Bellevue-Stratford Hotel, this city, on Saturday last, when a number of matters of interest to the members of the association were taken up by the committee and discussed at length. Those present at the meeting were: President, Perry B. Whitsit, Columbus, O.; Secretary J. C. Roush, Pittsburg, Pa., and the following members of the committee: Louis Buehn, L. Buehn & Bro., Philadelphia; J. Newcomb Blackman, Blackman Talking Machine Co., New York, and L. C. Wiswell, Lyon & Healy, Chicago, vice J. F. Bowers. Lawrence McGreal, Milwaukee, was unable to attend, owing to the death of his little son, the mascot of the association, Master Jack McGreal. Messrs. Blish, Wurlitzer and Taft were kept away by business.

One of the chief subjects discussed at the meeting was the coming convention to be held at the Chalfonte, Atlantic City, July 5, 6 and 7. A number of interesting features are being planned for that occasion, and the details will soon be ready for publication. The factories are preparing to support the jobbers in a hearty manner, and it is expected that the next convention will be the most successful yet held.

The report on association matters for the past year was most pleasing to the members. Much good has been accomplished, one of the chief results being the better understanding that has developed between the jobbers and the factory people, enabling them to work together in complete harmony. The factories have shown their willingness at all times to receive a committee from the jobbers' organization and to consider and discuss any matter that may be brought to their attention. On every occasion an agreement has been reached that has proven satisfactory to both parties.

Several applications for membership were received and acted upon by the committee. The growth in this direction has been steady and sure.

At the close of the session at the Bellevue-Stratford, the members of the committee visited the plant of the Victor Talking Machine Co., in Camden, where they were received by the officers of the company and extended every courtesy. Here a conference was held with the factory heads, and several matters adjusted in a satisfactory manner, after which the jobbers were entertained at dinner by General Manager Louis F. Geissler, followed by a theater party given by Henry C. Brown, advertising manager of the company.

NEW EDISON STORAGE BATTERY.

Given Practical Tests in West Orange and Proves Entirely Successful—Result of Many Years' Work—Its Many Uses.

Last month the first practical test of the new storage battery upon which Thomas A. Edison has been experimenting for years was made in West Orange, N. J., before a number of prominent electrical engineers and traffic men. The battery was placed in a specially designed street car, lighter than those now generally used on trolley roads, and proved an unqualified success, the car attaining a speed of 15 miles per hour without difficulty. The battery will run a car for 150 miles under ordinary conditions. Mr. Edison has been experimenting with his storage battery in a small street car on 500 feet of track at his factory, but the above test was the first of sufficient importance to attract traction men. As the battery was found practicable it will mean that trolley wires will be done away with. It will also go far, it is claimed, toward solving the

problem of industrial aerial navigation. At last accounts Mr. Edison, who is now in Florida, was equipping a large launch with a battery and contemplated making an early test to determine its usefulness in that direction.

DOUBLE-FACED SOUND RECORD SUIT.

Taking of Testimony in Litigation Over the Petit Patent Now Owned by Victor Co. and in Which the American Graphophone Co. Are Defendants.

(Special to The Talking Machine World.)
Philadelphia, Pa., Feb. 7, 1910.

About two years or more ago the American Graphophone Co. were proceeded against by A. N. Petit, brother of A. D. Petit, proprietor of the Edisonia Co., Newark, N. J., now in the experimental laboratory of the Edison Phonograph Works, Orange, N. J., for alleged infringement of the so-called "double-faced sound record" patent. Mr. Petit had assigned a half of the patent to F. M. Prescott, now retired from the business with a comfortable fortune. This arrangement led to complications in the courts when litigation was in hand to enforce the patent rights, especially in Europe, as the assignment conferred manufacturing privileges upon Mr. Prescott, who is said to have disposed of this property abroad.

Further interest is added to this interesting story when the Victor Talking Machine Co., Camden, N. J., acquired the patent from Messrs. Petit and Prescott, and at once a motion to intervene was made by the company and granted by the Circuit Court of the United States, New York City, about two months ago. This brought the Victor Co. and the American Graphophone Co. face to face again in a patent suit, which is now starting on its interesting career.

Saturday last C. A. L. Massie, of Mauro, Massie, Hill & Scott, counsel for the American Graphophone Co., New York, was here taking

testimony, his special work being the cross-examination of the Victor Co.'s expert. This hearing of witnesses will take some time before the record can be made up, and issue will not be joined and the suit placed on the calendar for trial before the fall. The double-faced record patent is No. 749,092, and is dated January 5, 1904. Considering the importance of the duplex record in the markets of the world at the present time, this litigation will be followed with as much interest as that of the Berliner and Jones suits.

COLUMBIA CO. IN PORTLAND, ME.

Re-enter the "Talker" Field in That City—Take Over Stock and Business of the Maine Phonograph Co.—J. W. Dunn, Manager—Occupy New Quarters at 545 Congress Street.

(Special to The Talking Machine World.)
Portland, Me., Feb. 7, 1910.

When H. A. Yerkes, manager of the Columbia Phonograph Co.'s wholesale department, was here last week he completed the transfer of the Maine Phonograph Co.'s stock, business, etc., to a local Columbia Co. In other words, the Maine Co. ceases to operate and the Columbia Phonograph Co. re-enters the field, and will make a specialty of carrying stock and acting as a distributing center for jobbers in this State and upper New Hampshire. The new store of the Columbia Co. is at 545 Congress street, in premises formerly occupied by the Bailey Music Co., and the place is spoken of as the best equipped talking machine establishment in the city. The change dates from February 3, and John W. Dunn, formerly of the Maine Phonograph Co., will be the manager.

The National Phonograph Co. were among the concerns elected to membership in the Association of American Advertisers at the recent annual meeting of that organization held at the Hotel Astor, New York.

THE THORN NEEDLE
A Profit Maker for the Dealer

YOU SHOULD SELL THEM BECAUSE—Everyone buys them because the idea appeals to them. They are a wonderful improvement over any other Wood Needle. The Tone is rich in quality, soft and distinct.

EASY TO HANDLE. NO CHANGE IN REPRODUCER REQUIRED.
ONE NEEDLE PLAYS FROM TWO TO EIGHT RECORDS. FREE FROM ALL SCRATCHING, WITH NO WEAR UPON RECORD.

The Locust Spine and the Hedge Thorn
are perfect wooden needles, the point of which is composed of the most compact cellular structure known as wood fiber. This furnishes the wearing material, and the Thorn Needle Holder gives the rigidity that carries the vibration to the sound-box.

To Play Thorn Needles

Press the thorn into the Holder until the point projects about one-eighth of an inch; break off the large end and place holder in sound-box, just as you would a steel needle. The sound-box pressing against the Holder will keep the point in place. Some records reproduce better when the point is longer, but remember that the shorter the point beyond the holder the greater the volume. Place the point lightly on the record. After playing, remove the holder and press the point out.

Thorn Needles, per package of 100.....	Retail. 35c.
Thorn Needle Holders, each.....	25c.

LIBERAL DISCOUNTS TO TALKING MACHINE JOBBERS

The Talking Machine dealer who does not sell Thorn Needles overlooks a great opportunity. They will make him more profit than any other accessory that he has to sell. Send us a trial order to-day, and we will include with same a quantity of circulars, which, if you will distribute among your trade, will prove to you more forcibly than anything that we can say that you should push the sale of Thorn Needles. We have been successful in the sale of them among our retail trade, and we know what we are talking about. Don't put it off. Order to-day.

J. W. JENKINS' SONS MUSIC CO.

Distributors of Victor Talking Machines and Edison Phonographs,
KANSAS CITY, MO.

The Double-Disc is a

A year ago we were cheerfully taking the responsibility for the introduction of the Double-Disc record to the American public. As you probably very well remember this was done in the face of the most violent protests—not from the dealer, (nor from the public, by a long sight)—but from our manufacturing competitors.

We mention this now again only to emphasize the fact that there simply is neither place nor excuse for a single-face record in the United States in 1910.

Please bear in mind that it was not merely the *novelty* of the Columbia Double-Disc that did the business. *A better record on each side than on any single disc—that's*

Columbia Phonograph Co., Gen'l,

COLUMBIA Innovation

What did it, the quality of the record itself. The *tone*, that the buyer could prove by *hearing*; the *durability*, that the buyer could not possibly mistake if he had ever had any experience in playing disc records.

The COLUMBIA DOUBLE-DISC is everything that a talking machine record ought to be—in quality, in tone, in durability, in price, in popularity and in profit for the dealer.

Let us remind you once more that exclusive Columbia selling rights are still open in some localities. Have you written about it?

Tribune Building, New York City

REVIEW OF MARCH RECORDS.

Issued by the Victor, National, Columbia and Universal Companies

Some twenty-two Amberol records and five grand opera records are to be found in the list put forth by the National Phonograph Co. for March. They are admirably diversified, covering instrumental and vocal domains, and are well worthy the consideration of dealers. Those of especial interest are O Paradise, from "L'Africaine" (B178), sung by Constantino, the famous tenor, who is now singing with the Boston Opera Co.; Infelice, from "Ernani" (B179), sung by Lucenti, the well-known basso; Voi le Sapete, from "Cavaleria Rusticana" (B180), sung by Ferribani, soprano; Elucevan le Stelle, from "La Tosca" (B181), sung by Riccardo Martin, the admirable tenor of the Metropolitan Opera House, and Luoni le Tromba, from "I Puritani" (B182), sung by Caronna, baritone, and Lucenti, basso. These form a very valuable addition to the Edison Amberol grand opera list. Other numbers which merit special mention in the January Amberol list are "Badinage" (369), which is played with great charm and brilliancy by Victor Herbert and his orchestra; "Fantasie of Themes of Léonard and Paganini" (373), played by Michael Banner, the celebrated violin virtuoso, with a completeness of technique and coloring that commands approval. Two numbers by Harry Lauder, which, of course, will be greatly in demand, is "The Bounding Sea" (12119), and "When I Get Back to Bonnie Scotland" (12132). These are sung in Lauder's inimitable style. In the list of Edison Standard records Victor Herbert and his orchestra have given us a splendid number in the "Hungarian Dance in G Minor" (10324). Sousa's Band is heard in Gillett's charming "La Lettre De Manon" (10317). A saxophone solo, played by Mr. Henton, entitled "Laverne Waltz Caprice" (10320) is a number that will be greatly admired for the beauty of its tone and the perfection of its recording. Other numbers which will be greatly in vogue are Ada Jones' song "Irish Blood" (10323), and Marie Dressler's singing of "I'm a Goin' to Change My Man" (10318). Marie Dressler's humor is spontaneous and infectious, and there are few better singers of coon songs than she. In the Standard list Harry Lauder is represented by that charming and pathetic song of his, "I've Loved Her Ever Since She Was a Baby" (13918). Throughout this list for March there are a number of quartets, duets, humorous talking records, band and orchestra numbers, which should win a large share of popularity.

* * * *

Thomas Chalmers, whose records are always artistically sung, is represented by the Toreador song from "Carmen" and the Porter song from "Martha" (5604) in the March Zonophone list, issued by the Universal Talking Machine Manufacturing Co. Two other high class standard numbers are those sung by Elizabeth Wheeler, "Tosti's Serenade" and Hatton's "Good Bye, Sweetheart, Good Bye" (5608). Ada Jones, Len Spencer, Arthur Collins and B. G. Harlan have some excellent numbers of a popular character, while Billy Murray, Henry Burr and Arthur Collins maintain their old-time reputation in this special line. The Zonophone Concert Band and the Zonophone Orchestra are represented by four numbers (5600-5601-5602-5603)—5602 being of especial merit.

* * * *

A feature of the March list of records of the Columbia Phonograph Co. is a series of religious records by Gipsy Smith, the famous evangelist, who is known the world over. These are twelve-inch double discs (A5146-A5147 and A5148). They represent this great preacher and baritone singer at his best, and will doubtless be greatly in favor in religious communities and in the homes where Gipsy Smith is so much admired for his great labors. Another capital twelve-

inch record is the violin, flute and harp trio, "Star of Love," played by Stehl, Henneberg and Schutze, and "Woman's Vows" (A5149), played by Prince's Orchestra. A ten-inch record of exceeding merit is Nevin's "Rosary" and Wallace's "Sweet Spirit Hear My Prayer," the first-named sung by Merle Tillotson, and the latter by Mrs. A. Stewart Holt. The ten-inch list throughout contains many of the popular songs of the day as well as instrumentals, which undoubtedly will have a large market. In the two-minute and four-minute Indestructible cylinder records a number of Standard compositions, both instrumental and vocal, are listed. They are admirably diversified, and as they appeal to all kinds and conditions of purchasers, they make an admirable list for dealers to stock from.

* * * *

The Red Seal records listed in the Victor Co.'s March list are especially notable for three records covering the entire Act V. of "Faust." This includes the prison scene, Part I. and Part II. (89033, 89034), sung by Geraldine Farrar and Enrico Caruso, and the prison scene, Part III. (95203), sung by Geraldine Farrar, Journet and Caruso. Marcel Journet, the famous basso, who recently made a flying trip to this country for the express purpose of making Victor records, is represented by three splendid numbers—Air de Phanuel, from "Hérodiade" (74152), Chanson Militaire from "Le Chalet" (74153), and Air de Sommeil, from "Philemon et Baucis" (74154). Journet and Caruso are represented by Solo Profugo from "Martha" (89036). Slezak, the distinguished tenor, is represented by Celeste Aida from the well-known opera of that name (64113), the Pastorale, from "The Prophet" (64112), and Hildach's "Spring" (64111). This is an excellent showing of records made by celebrities, and in recording and general excellence they present the very best there is in the Victor laboratory. Other vocal numbers of especial excellence in the general list are three numbers by Harry Lauder (6008-6009-6011), which represents the famous Scotch comedian at his best; a tenor solo, "In the Garden of My Heart," by Reed Miller (5765); "Gems from the Belle of Brittauy," by the Victor Light Opera Co., which adds another success to the credit of this very clever organization, and the Hallelujah Chorus from "The Messiah," sung by the Victor Chorus, assisted by Sousa's Band. This is an inspiring record which will undoubtedly find innumerable admirers. In the instrumental line the Symphony Orchestra of Paris is represented by the Faust Ballet music (58021) played with great charm and splendid color effects; a medley from "The Dollar Princess" (5756), and Grieg's Albumblatt (5763), played by the Vienna Quartet. The ever-popular Sousa Band has made three numbers for this month, "Florentine's March" (5764); "Amina," an Egyptian serenade (31771), and a "Siamese

Patrol" (5766). In these numbers this organization is heard at its best, and in view of the fact that it is now on a transcontinental tour, dealers can get an idea of the value of the Sousa records when stocking up. Thirteen double-faced records are to be found in the March Victor list, all of them of merit.

BALTIMORE HAPPENINGS.

Laurie Succeeds Silverstein as Manager of the Columbia Store—Silverstein Opens for Himself—Business Reports Continue to be of a Most Satisfactory Nature—What the Leading Dealers Report.

(Special to The Talking Machine World.)

Baltimore, Md., Feb. 6, 1910.

There have been several important trade changes the past month in local talking machine circles, which have resulted in the bringing of a new manager to the Baltimore branch of the Columbia Phonograph Co., and the launching of a new retail store for handling the Columbia and Victor machines. Through this shift, T. Allan Laurie has become manager of the Baltimore store of the Columbia Co. as successor to Morris Silverstein. Mr. Silverstein, as stated last month, has left the employ of the Columbia Phonograph Co., and is now conducting a retail business of his own at 116 North Howard street, under the firm name of M. Silverstein & Co. He is handling both the Victor and Columbia machines and records, and reports that his first two weeks of business indicate that his venture will be a most successful one.

Mr. Silverstein was connected with the Columbia Phonograph Co. for ten years, and came to Baltimore about two months ago as local manager. Previous to that time he held a similar position with the firm in Louisville, Ky. Mr. Laurie has been with the Columbia people for about 12 years and, before coming to Baltimore, represented the firm in various capacities in Europe. His last position before coming to the United States was in charge of the London office, and before that he was a traveling representative, during which time he looked after the interests of the company in Paris, St. Petersburg and other important cities of the other European countries. While Mr. Silverstein has his new store fixed up in a very neat manner, he contemplates a number of other improvements which, he says, when completed, will make his talking machine headquarters second to none in the city.

Reports from all the talking machine houses show that business has kept up to a very desirable standard during January, beating most of the months of 1909, except December. Again the high-grade machines and records have held the center of the floor. They have been in greater demand than ever, and this demonstrates

AN EDISON ENTHUSIAST IN PORTO RICO.

The accompanying illustration pictures the interior of C. Fredericksen's demonstrating room, an Edison dealer recently established in San Juan, Porto Rico, W. I., for which The World is indebted to the Edison Phonograph Monthly.

In placing his initial order, which ran into four figures, Mr. Fredericksen said the products of the National Phonograph Co. would score big in San Juan, and they have. There is a big future in that country for phonographs.

that the buyers are being trained more and more to the superiority of the higher class instruments and records. The new Harry Lauder records just from the Victor headquarters have made an instant hit, while the same may be said of the Columbia records containing reproductions and selections by McCormack, the famous Irish tenor. Sanders & Stayman report a large sale of these.

E. F. Droop & Sons Co. have had a good month with the Edison and Victor lines, while the same statements are made by the Hammann-Levin Co., 419 North Howard street; Petits, 318 North Howard street. In the straight Victor line, Cohen & Hughes, H. R. Eisenbrandt's Sons and William McAllister & Sons make satisfactory reports. D. J. Crowley, 214 West Saratoga street, announces that the retail distribution of Edisons has been very encouraging for the month.

THE TRADE NEWS FROM BOSTON.

Victor Dealers Welcome Exchange Proposition—Will Freshen Stocks—Department Stores Hard After Business—Success of H. F. Miller & Sons' New Victor Department—Eastern Talking Machine Co.'s Good Report—Original Columbia Window Displays—J. N. Blackman a Visitor—Other Items of Interest.

(Special to The Talking Machine World.)

Boston, Mass., Feb. 10, 1910.

Victor dealers throughout the city are looking anxiously forward to the coming Victor exchange, feeling that it will relieve them of a great strain, freshen up their stocks and make things very much better all around.

The various department stores are making especial efforts to create new business. The Jordan Marsh Co., in their recently enlarged and remodeled rooms, has been experiencing a very gratifying increase in business.

At the Siegel store opportunity has recently been made in the unusually good window space for a big display of the Indestructible records and Edison goods. Business in this department is reported as particularly good, especially on the February records. The sound-proof rooms help a great deal here.

Henry F. Miller & Sons are more than ever gratified at the results in their newly added Victor department. Additional outside salesmen were put on this month and business in the department has improved with each week of the new year. The opportunity for the display of Victrolas, etc., on the retail piano floor is made the most of, and they add quite a good deal to the appearance of the floor. This company has noticed an unusual call for grand opera records and will make a "play" for this trade to a great extent.

At the Eastern Talking Machine Co. this month business in the Amberola is reported as excellent, and the Victor trade is holding up remarkably. General Manager Taft has just returned from a two weeks' visit to the different factories in an effort to get his shipments more promptly. He reports the outlook everywhere as most promising. At the last meeting of the Eastern Talking Machine associates, papers of general interest were read by Wholesale Manager Chamberlain and Retail Manager Freeman. It was decided to have a minstrel show next month, and S. H. Brown was made chairman of the committee on arrangements.

Unusual praise ought to be given to the window dressers at the Columbia Phonograph Co.'s store for the excellent taste and genuine artistic ability shown recently in the window displays. They have made good use of the Library table style, the Grafonola and other styles, with large portraits of the various grand opera stars who have been appearing in Boston. A large pastel painting of Constantino in one of his characters attracted much attention. The business on grand opera records has been trebled within the past year at this store, and since the Library Table style came in, the total volume of business has taken a big jump.

In the Oliver Ditson Co. talking machine department there is shown a steady upward climb in the volume of sales. Here nothing but the Victor goods are handled by Manager Winkelman. In fitting up this department General Manager Bobzin made it a point to have everything artistic and in keeping with the quality of the goods and the class of customers, with the result that his trade is among what is called "the elite." The Victor exchange is being awaited here with interest.

Only the fact that their department is not larger prevents the talking machine department at Houghton & Dutton's from showing a still larger volume of business, as the new year has opened up surprisingly well and there is a call for a better grade of goods. This department will probably be moved soon to another part of the store where it will have more room to grow. Once again the return of Harry Lauder has proven a good thing for this store, as his records have been in great demand since his first appearance in Boston.

J. Newcomb Blackman, of the Blackman Talking Machine Co., New York, paid a flying visit to Boston last week and called upon several jobbers.

The Roxbury Graphophone Store, 1227 Tremont street, which is under the management of R. A. Dinsmore, ranks among the third largest graphophone stores in this city, and the business is steadily expanding. Mr. Dinsmore was the

manager of the instalment department of the Columbia Co. in Baltimore, Md., for over three years, and during that time he built the income of the department from \$210 a month to \$6,600 a month by means of outside canvassers. In the Boston office of the Columbia Phonograph Co. he also developed their business to very large proportions, and with this vast experience it is hardly necessary to say that he is making an excellent record for himself.

It is said by those who know Mr. Dinsmore that he has one of the best records of any instalment man in the business, for he built an instalment business where the goods were sold on time at an advance of 10 per cent. and made 10 per cent. cover all losses and the cost of collections. That is certainly something to be proud of. During the fourteen months that Mr. Dinsmore has been in business for himself he has not lost an outfit sold on time, and has not had a customer move that he was not able to locate. The instalment business is a profitable one when done by a man who knows the game. It requires concentration, however, and attention, and this is something that is not given this department by many talking machine men.

The Victor Talking Machine Co. have now two suits pending against the Sonora Phonograph Co., New York, for alleged infringement of the Berliner and other patents in connection with the latter's concealed horn cabinets.

IMPROVE YOUR SYSTEM

AND

INCREASE YOUR RECORD SALES

BY USING

THE BLACKMAN CYLINDER RECORD TRAY

(Patented Dec. 28, 1909.)

A Record Tray With Record Label for Less Than One Cent

The BLACKMAN Folding Trays for Cylinder Records are shipped FLAT and can be FOLDED into STRONG TRAYS in a few seconds, as shown above. This tray, with Rapke Label, makes a handsome looking record stock and a system you can't beat. The labels act as Silent Record Salesman and the customer can point to the record he wants to hear. Adopt this system and your sales will not only increase but it will never take more than a few minutes to make up a Record order.

THE BLACKMAN FOLDING TRAY USED IN THE SYRACUSE WIRE RACKS enables you to carry a large stock in a small space, and also use the Rapke Label. We furnish wire racks at regular prices, either wall or revolving style, with opening to accommodate Blackman Trays. Write for prices.

Manufactured by

BLACKMAN TALKING MACHINE CO.

J. NEWCOMB BLACKMAN, Pres. "THE WHITE BLACKMAN" 97 CHAMBERS STREET, NEW YORK

TIMELY TALKS ON TIMELY TOPICS

It has been a source of complaint for a long time on the part of dealers that when popular songs are "hits" the manufacturers are so far behind in supplying the records it not infrequently happens the demand either lessens or fails entirely before the stock can be placed on sale. In the compilation of the monthly lists, as a rule, the records are not ready for delivery under three months. A song "hit" is rather evanescent, consequently if the call is maintained for three months even at a fair rate it is an exception. That is, music in lighter vein, not to say "frothy stuff," is of about this caliber. As soon as a song sells its records are also in the same category, and therefore dealers have wondered and inquired why they should not be placed in a position to "make hay while the sun is shining," as it were. To remedy this long-standing trouble the National Phonograph Co. have informed Edison dealers that when a "hit" materialized they would advance the date of sale thirty days. This is a decided advantage and one that the trade will appreciate. The particulars of this announcement appear elsewhere in this issue of *The World*, and the National Co. are to be felicitated upon what is considered a wise move and good policy.

Another subject that will rivet the attention and arouse the interest of the trade will be the action taken by the Victor Talking Machine Co. against the so-called "mechanical feed" machines. In a motion to show cause why a temporary injunction should not be issued against a company manufacturing and selling such an appliance, argued in the Circuit Court of the United States, New York City, January 9, Counselor Pettit, for the Victor Co., contended that such a device was constructed to evade the Berliner patent, and therefore it was an infringement of that basic invention. Judge Lacombe, before whom the argument was made, and who is more intimately informed on talking machine litigation than any other justice on the Federal bench, granted the enjoining order on the 21st succeeding, pending final hearing. Other judges have arrived at the same conclusion, incidentally to be sure, concerning devices that have been made to circumvent the Berliner patent; and it seems the "mechanical feed," which was undoubtedly originated for a like purpose, may share the same fate.

Concerning copyright records—rather, records on which copyright music has been reproduced—scarcely a ripple is noticeable on the surface of trade affairs. The Columbia Phonograph Co., General, and the National Phonograph Co. have given formal notice that a small increase, to conform with the royalty paid, will be made on such records. The Victor Talking Machine Co. have not made any statement whatsoever in connection therewith, while the Universal Talking Machine Mfg. Co. will make no extra charge, so far as known, for their Zonophone line. Dealers do not seem to be disturbed in the slightest, and perhaps this is occasioned by the fact that so few records of this kind have appeared on the market since the copyright act went into effect on July 1.

As was predicted in *The World*, the record manufacturers are not inclined to accumulate a lot of this stock and take chances on its sale. As the royalty is collected on the goods "manufactured," naturally extra caution and the best of judgment as to the popular possibilities of selections are being exercised before a number is listed. Paul H. Cromelin, vice-president of the Columbia Phonograph Co., who has given the subject close study and taken a prominent part in discussions bearing on copyright legislation, here and abroad, displays no hesitancy in declaring that his company "will not record anything unless it proves itself a good seller in advance." In other words, it is up to the publisher to first make a market for the song, when the record may follow.

Of course, it is well known also that not every song lends itself readily or successfully to reproduction on the records, while it may command a wide sale in sheet music form. This is also taken into consideration. In brief, the way of the copyright owner, so far as the use of his property is in demand for the records, is not altogether strewn with roses or lined with prospective wealth. To be sure, a change in their favor may occur in the future; but as the matter now stands they were much better off under the old law, when the advertising benefits and general publicity exploitation was estimated as no small factor in increasing the popularity and sale of music publications, either grave or gay.

The recent daily newspaper advertising of the Amberola by the National Phonograph Co. is not only high class—cleverly and forcibly written—but should be convincing, as it is impressive in tone and quality. To quote a recent advertisement will suffice to prove the truth of this assertion in part as follows: "Compare the external beauty of the Amberola with that of the highest grade piano, and you will find it even more charmingly designed and just as beautifully finished. Consider the lifetime of study required to become a proficient piano player. You need no musical training whatever to enjoy the Amberola. Now compare the Amberola with a player-piano. Anyone can operate a player-piano, but when all is said and done, it gives you nothing but piano music. The Amberola gives you all the best music of all kinds. It is the limitless entertainer." A clean line cut, treated with emphasis, so that it stands out clear and conspicuous, is an added attraction. Such advertising is hard to beat, as it will certainly attract the attention of readers intelligent enough to appreciate the descriptive merit of desirable articles. These remarks are by no means detractory of what the other companies are doing along similar lines for their own products. It is only recognition of excellent work, which the trade should not overlook. Few lines of business create a market for the jobber and dealer and then hand it over for their benefit.

In the last issue of "The Voice of the Victor," published by the Victor Talking Machine Co. exclusively for the information of Victor distrib-

uters and dealers, a four-page supplement, devoted wholly to extracts from the January issue of *The World*, is included. The unique collection embraces news reports, comment, correspondence, etc., which *The Voice* precedes with this significant remark: "From one single issue of *The Talking Machine World* we have clipped the following evidence of the enormous success of Victor dealers in every section of the United States." Further remarks would be superfluous. That *The World* is acknowledged the trade medium par excellence—it has no equal anywhere, at home or abroad, in its chosen field—goes without saying.

Ferretting out idle or disused machines in a community is a "stunt" every live dealer should not lose sight of. It is not every owner who keeps his interest sustained by making additions to his collection or library of records. The reasons are easily understood. Nevertheless, it is good business on the part of the dealer to keep close track of his customers, and when their interest appears to flag have a salesman call and find out if anything is wrong. If the machine needs overhauling, perhaps a proposition satisfactory to both sides may be arranged that will bring the party to the store again. Or possibly a short talk on new records may serve the purpose. Some of the leading dealers in the country have formulated plans of their own—often original—that "turns the trick." A careful canvass may also reveal machines that have been laid aside and which may be brought back again into usefulness to the owners and profit to the dealer.

The sale of Hebrew records grows apace, and all the manufacturing companies are giving special attention to this branch of the business. The recording laboratories are especially solicitous about the artists who render the magnificent Jewish sacred music, anthems and folk songs. Their services are eagerly sought, and special attention is given them personally. One of the great artists in this class, known probably only to his own people and the recorders, is Jubeliner, spoken of as the "Caruso of the East Side." New Yorkers who know their home city can only fully appreciate what this eloquent title means. It is on the mysterious East Side where the Hebrews from the old-world countries first find their homes and abiding places. Here singers, actors and professional men, who ac-

The whole business world is your field in selling the Edison Business Phonograph

Every business office, no matter how small or large, no matter what the nature of the business, needs an Edison Business Phonograph.

The Edison Business Phonograph is the greatest business appliance of the age. It cuts the cost of letter writing in two. It saves half the dictator's time, half the transcriber's time, and all of the time in which the stenographer is ordinarily occupied in taking dictation.

Phonographic dictation is coming into wider use every day. And many of the most prominent firms, in all branches of business, are using the Edison Business Phonograph right now.

It is practically without competition in the field and every Edison dealer can reap a harvest in profit from this new industry.

Many of the most prominent Edison jobbers are not only handling the Edison Business Phonograph, but are using it with great success in their own offices.

Get in now and take your share of the profits while the game is young. Write for particulars to the

Edison Business Phonograph Company, 207 Lakeside Avenue, Orange, N. J.

ONE OF MANY

Mr. Dealer:—

You will receive many just such letters as the following if you handle B. & H. FIBRE NEEDLES and instruct your customers as to their use.

Evanston, Ill., Jan. 16, 1910.

B. & H. Fibre Mfg. Co.,
35 West Kinzie Street, Chicago, Ill.

Gentlemen :—Some three years ago we derived much enjoyment from a talking machine, which we purchased at that time.

We soon discovered however, that the records were **deteriorating** so rapidly that some were becoming **absolutely intolerable**. We were obliged to abandon old records faster than we could afford to buy new ones.

We became discouraged and the talking machine was consigned to the attic.

Upon hearing of the invention of the fibre needle we decided some nine months ago to investigate. We were so delighted with the results that we indulged in quite a number of records and a **\$200 machine** as our Christmas present for the family.

We now have the satisfaction of having **eliminated** the **metallic quality** of the tone, and we are happy in the knowledge that each new record is a **permanent** addition to our collection for the records actually **improve with use**.

We feel under great obligations to you and wish to express our gratitude for the pleasure we would not have had but for the invention of the fibre needle.

Very truly yours,
Dr. C. S. BIGELOW.

This is one of many letters we have recently received and some of the biggest dealers in the country are getting like communications every day. We know this because they are shown to us. Handle FIBRE NEEDLES, follow our instructions, and you will speedily get into the letter-receiving class also. Futhermore, every letter will have meant the sale of a high grade machine and many high priced records to someone you have not hitherto been able to interest.

“B. & H.” FIBRE MFG. CO.

33 W. KINZIE ST., CHICAGO, ILL.

quire the highest standing in their separate walks of life are born and live under often the most discouraging conditions. Nevertheless, talent flourishes and not infrequently finds its fullest fruition. Well, to make a long story short, Jubelier finds his habitation and home there, and in addition to being a fine musician and a composer of ability, he is also a man of means and property, being the owner of a theater among other tangible things in this world's goods. As a vocalist of high degree, the laboratory experts are happy to make any engagements he finds time to make with them for records; and as he is a polished gentleman withal, naturally his visits are welcomed in a social way.

I. DAVEGA, JR., GENERAL DISTRIBUTOR

For Zonophone Line of Goods in Greater New York—Davega Buys Adjoining Property to be Devoted to Talking Machine Business.

I. Davega, Jr., New York, has become the general distributor of the Zonophone goods in Greater New York. The business of Mr. Davega has grown so rapidly that he has purchased the property next door to his place, on 125th street, New York, on which he will erect a building to accommodate his talking machine business. This department, under the management of Joseph Schwartz, is developing a fine trade.

COMPLAINANT FILES APPEAL.

(Special to The Talking Machine World.)
Cincinnati, O., February 8, 1910.

A transcript of the record from the Federal Circuit Court, at Grand Rapids, Mich., was filed Saturday in the Circuit Court of Appeals in the case of the Victor Talking Machine Co. against The Duplex Phonograph Co. This involves a patented improvement in talking machines. The bill was dismissed in the court below and the complainant takes the appeal.

When this despatch was shown Horace Pettit, general counsel of the Victor Co., he said: "The appeal is to the United States Circuit Court of Appeals of the Sixth circuit, taken by the complainant, from the decision of Judge Knappen, filed in the United States Circuit Court for the Western district of Michigan, Southern division, on December 27, 1909, holding that the Conn patent, No. 624,301, dated May 2, 1899, for an improvement in double sound boxes for use in connection with a double horned machine, was not infringed by the defendant's double horned machine."

TRADE FABLE

No. 4

Dan Smith was strong for the ragtime stuff, and, whether on piano or banjo, could tear off yards of that sort of swift music without turning a hair; in fact, it had become more or less of an ingrowing habit. Of course, when he secured a position as salesman in Jones' talking machine store he carried his taste for the ragtime tunes with him, and when he was demonstrating a machine it was simply his pie to ring in "A Hot Time in the Old Town," "A Georgia Camp Meeting" or some similar high-brow selection.

Now, while Dan could handle chatter like unto the original Mr. Bull, of Conn., and could deliver a selling spiel that would make a Coney Island barker seem like an old inmate of the deaf and dumb asylum, nevertheless there were far too many instances where he failed to connect with the order, though he ground out the ragtime records until his arm was tired from winding the machine.

Finally the boss called Dan on to the carpet and breaks it to him gently but firmly that his job is not located on the rock of ages, and that he'll either have to make a whole heap of noises like taking orders or the grand razoo for his. The boss incidently converses with him a la Dutch uncle, and wises him up to the fact that while there are some people who dote on the real classy rag, there are also a few who are so depraved in their tastes that they actually prefer music of more serious nature, even unto the classic stuff of the great composers, dead ones like Verdi, Wagner, Bethoven, etc.

Dan, he gets sore and starts home in a frame of mind wherein he wouldn't take sass from a cop. He's gone about a block when he butts into a friend of his with two tickets for the evening's opera in his kicks, and who invites Dan to hear the famous tenor and soprano earn their summer spending money. Nix on the opera for little Daniel; he wouldn't go to hear Caruso if that star killed a live super every show. Cut the comedy and shove over a pass for Williams & Walker. The friend's persuasive powers are strong, however, and to end the argument Dan finally consents to be tortured for the evening.

Dan sees the curtain of the first act of Aida rise with the expression of a man drinking soda water in a rathskeller and immediately gets his

little hammer out. Same expression continues until, with the rapt attention of the audience to encourage him, the tenor's voice rings out in the famous aria. Who is that clapping so enthusiastically in the center of the parquet? By the whiskers of Dowie, it's our friend Dan, and that aria is the only thing he knows how to whistle on the way home.

Next day every customer was first regaled with the aria from Aida, with ragtime running second, and in the evening Dan's salesbook showed more grand opera records sold during that one day than for the previous six months put together. Getting hep to himself, a grand opera recital by Daniel Smith, Esq., took place every morning, and he soon learned just what was what in the high-brow melodies. Sales increased, and he soon tumbled to the fact that, while class will not descend to buying ragtime, the other crowd was afraid, acting the bonehead by declining to be impressed with the operatic selections. Then, too, Dan doped out the discrimination stunt and pulled it off successfully nine times out of ten.

When the month was up the boss presented Dan with a cigar. (You can't get around the significance of that move; it shows approval, yet coppers any chance of the recipient asking for a raise at once.)

"Daniel Smith, Talking Machines and Records" is the sign over the door of the newest store in _____ * * *

Moral—You can't suit everybody with pie; some people like corned beef and cabbage.

ZONOPHONE LINE WITH BEACH CO.

Bridgeport Dealers Have Secured the Agency and Will Feature Them in a Big Way.

(Special to The Talking Machine World.)

Bridgeport, Conn., Feb. 11, 1910.

The F. E. Beach Co., of this city, have acquired the agency of the Universal Talking Machine Mfg. Co. for this and surrounding territory. They propose to inaugurate an active campaign for the Zonophone goods and will advertise them extensively.

BRIEF AND TO THE POINT.

Some opportunity will come at some time to every man. Then it depends upon himself and upon what he shall have made of himself what he makes of it and what it will make of him.

A man must make up his mind, if he is going to succeed, that when he takes the other man's dollar he must give back to him an honest return.

The man who is his own best friend has few others.

The man with the big opportunity to-day is the man in the ranks.

The men who would borrow and spend lavishly may mean well, but the signboard where their road diverges is marked plainly "Disaster."

If you want to know what a dollar is worth try to borrow one.

Anyone who has no faith in this country, and who disputes its right to grow greater and stronger, isn't going to make much progress himself.

Anyone can write an advertisement for a mark-down sale, but it takes experience, study and time to write an advertisement for each day which will sell goods at regular prices.

PLAYED HIS FUNERAL MUSIC.

Albert Gayer, a blacksmith at the neighboring town of Berea, made the half-joking remark one day that should he die he wanted no singing at his funeral, but only the music from his phonograph. At the time he was in full health. Two days later he was caught in the flywheel of a gas engine and instantly killed. At his funeral his own phonograph played the funeral dirge, as he had requested.

Geo. W. Lyle, general manager of the Columbia Phonograph Co., was in Chicago last week on business.

Extra Profit from Record Sales is Possible

By Selling Record Buyers the HEISE SYSTEM WIRE RACKS

Just the thing for the home. Small Racks for 100 and 150 records made upon the same plan as our store Racks which have proven so popular with dealers.

Compact, convenient and durable. Get in a line in time for fall trade. They mean more record sales, for owners want to see them filled.

WORLD'S FAIR IN NEW YORK.

Scheme for Big Exposition in 1913 Is Launched—Chas. H. Koster Off to Interest Foreign Countries—Some Interesting Details.

The promoters of the New York World's Fair for 1913 launched their scheme recently when information was sent out as to the plans and scope of the exposition. The fair is to be held in commemoration of the 300th anniversary of the settlement of Manhattan by the Dutch. The World's Fair Co. is incorporated as the New York Advancement Co. Last week Charles H. Koster, one of the vice-presidents, started on a trip around the world by way of San Francisco as a Foreign Commissioner.

Mr. Koster took with him a strong letter of introduction and endorsement from Assistant Secretary of State Alvey A. Adee at Washington, a letter of authorization from the New York World's Fair Co. and a trunkful of literature. He will visit San Francisco, Hawaii, Japan, China, Philippine Islands, Borneo, Malay Peninsula, Burmah, India, Ceylon, Egypt, Italy, Bavaria, Germany, Netherlands, Belgium, France, England, Scotland and Ireland.

It is expected that the municipal, State and Federal governments as well as foreign nations will participate. It should be the greatest of all world's fairs as befits the size, wealth and dignity of Greater New York. The site is to be within the city limits.

The first and only world's fair held in New York was a notable success in 1853 in the once famous Crystal Palace on the site of what is now Bryant Park, and at it every nation was well represented. In the early '90s large sums of money were spent and more than \$2,000,000 was subscribed to locate the world's fair of 1893 in this city, but Chicago was selected by the Federal Government after a contest that became political history.

For figures on attendance a sound basis is furnished by statistics of other world's fairs.

At Philadelphia in 1876, with a population of 700,000, there was an attendance of 10,000,000, or fourteen times its actual population.

At Chicago in 1893, with a population of 1,250,000, there was an attendance of 27,000,000, or twenty-one times its actual population.

At Paris in 1900, with a population of 2,500,000, there was an attendance of 55,000,000, or twenty-two times its actual population.

At St. Louis in 1904, with a population of 600, thirty times its actual population.

The company states that a careful and conservative estimate of cost of construction, improvements, etc., from this date and up to the opening of the New York World's Fair may be figured as follows:

For seventeen palaces of exhibits	\$5,105,000
For a number of smaller buildings.....	500,000
For grounds and improvement of same....	2,500,000
For pre-exhibition expenses.....	1,500,000

Total

The officers of the fair are: President, James F. Graham; vice-presidents, Samuel Verplank Hoffman, Dr. Gustav Scholar, W. O. Homan, Charles H. Koster, Col. Arthur MacArthur, Tunis G. Bergen and Hugh McElroy; secretary, George N. Moran; treasurer, James McCaldin; auditor, M. A. Smith; foreign commissioner, Charles H. Koster.

UNIVERSAL CO. ACTIVITY.

Richard Pribyl on Road for This Concern—Silverman Making Good in Metropolitan District.

On February 5 Richard Pribyl, formerly with the Victor Talking Machine Co., Camden, N. J., left for a selling trip through the Middle West for the Universal Talking Machine Co., now of Philadelphia, Pa. Manager Macnabb, general manager of the company, will be in New York a couple of days in the week, and Louis Silverman, who has established something of a reputation as a salesman in this section, will continue to look after the metropolitan district, where he is so well known. Mr. Silverman has recently

established a number of new Zonophone jobbers, and within the next month he will add a few prominent firms in this territory to his list.

colored cards in America, old enough to know good cards and young enough to skilfully prepare them.

FOR PATENT COURT.

Move for One Where Appeals May Be Heard.

(Special to The Talking Machine World.)
Washington, Feb. 8, 1910.

At a meeting of the committee on patents, representatives of the American Bar Association, the Chicago Bar Association and the Washington Bar Association the passage of the bill providing for the establishment of a patent court of appeals in Washington was urged.

Robert S. Taylor, of Fort Wayne, Ind.; Arthur Steuart, of Baltimore, and Joseph Edson, of Washington, were the representatives of the American Bar Association. C. C. Poole came from Chicago. Walter F. Rogers, S. T. Fisher and W. W. Dodge were present from the Washington Bar Association. Commissioner of Patents E. J. Moore was also present and advocated the passage of some measure that would establish a final court of appeals in patent cases. Such a court would be heartily welcomed in the music trade industry and by every industry throughout the country. The time and expense now involved before a patent is finally declared valid is beyond all reason.

NEW EDISON GRAND OPERA RECORDS.

When the National Phonograph Co. complete the construction of their new Grand Opera catalog it is going to be an imposing structure. In the April list they have supplemented their present four-minute catalog of 33 splendid numbers by the following five selections, all of which will be recognized as being among the most popular and tuneful of operatic selections; Freischütz—Grand Air d' Agathe (French), by Marguerita Sylva; Carmen—Romance de la Fleur (French), by Florencio Constantino; Romeo et Juliette—Valse (French), by Blanche Arral; Hamlet—Brindisi (Italian), by Ernesto Caronna, and Tannhäuser—Blick Ich Umher (German), by Walter Soomer. Another supplement of five records will be added in the May list and the same number will be added each month indefinitely.

WHERE TO BUY POST CARDS.

Talking machine dealers handling side lines should remember that the coming summer promises to be the best season post cards ever had, so get in early with your new cards. No racks are complete without local views. If in doubt where to place your order for view cards write the National Colortype Co., Cincinnati, O., whose announcement appears on page 54, for their samples. They are the first makers of the hand-

NATIONAL CO.'S BUSY PLANT.

The National Phonograph Co.'s factory at Orange, N. J., is working from 7 a.m. on Monday until midnight on Saturday these days. Sales Manager F. K. Dolbeer spent the week of February 7-12 in Baltimore, Washington and the nearby cities visiting the trade. Mr. Dolbeer spoke most encouragingly of business conditions from a manufacturing standpoint, stating that since the first of the year the company has experienced the utmost difficulty in keeping up to a satisfactory schedule of machine and record shipments. This he described in great measure to the advent of the Amberola and to the great number of combination attachments which were sold during the holidays. The Amberola situation, he said, was only slightly improved, for while the schedule was daily growing better the influx of new orders is so large that the improvement as yet is scarcely perceptible.

HARGER & BLISH GET HOPKINS' STOCK.

Harger & Blish, Des Moines, Ia., have purchased the entire wholesale stock of Edison phonographs and records carried by Hopkins Bros. Co., of that city. This stock, combined with their own, makes them among the largest Edison and Victor jobbers in the United States doing an exclusive wholesale business.

NEW CONCERN IN LOUISVILLE.

The Talking Machine Co. is the title of a new concern which has just opened at 210 W. Market street, Louisville, with A. Montenegro, Jr., as manager. They are handling the Victor and Edison lines.

The property of the bankrupt Leeds & Catlin Co. at Middletown, Conn., was sold by auction on Feb. 10.

The Utica Cycle Co., Edison jobbers, of 117-119 Columbia street, Utica, N. Y., have been succeeded by A. F. Ferriss and William Harrison, of the same city.

The Milner Musical Co., 25-27 West Sixth street, Cincinnati, O., have been reinstated as active Edison jobbers.

"Can you tell me why it is," asked Mr. Henpeck in a lapse in the conversation of his spouse, "that when they speak of their native country it always is the fatherland, but when they speak of the language they invariably call it 'the mother tongue'?"—New York Press.

"MUSIC HATH CHARMS TO SOOTHE THE SAVAGE BREAST"

Coach Rice, of Columbia, Will Put Piano and Phonograph in Training Quarters of Rowing Crew.

(R. L. Goldberg in The Evening Mail.)

COMPARISON me

means COLUMBIA

THERE are two classes of people in your own legitimate territory to whom you can talk the GRAFONOLA "REGENT"—or rather let it speak for itself: (1) The people who have in mind the possibility of owning a high-grade hornless talking machine and (2) the people who can appreciate good music and can afford to have it in their homes but have never even *considered* the purchase of any kind of talking machine.

The first class is of course smaller than the other, *yet it is ready at this minute to talk business*. The basis of all our advertising of the three Grafonolas has been *comparison*. We have argued as strongly as we knew how that the prospective purchaser owes it to himself to make *comparisons* before he purchases, and that once the comparison is made he is sure to own a Grafonola. We are having it proved to us every day, too—people are *making* those comparisons, and the dealers who offer the Columbia Grafonola are receiving the benefit.

Now those other people—those who have never even considered the desirability of owning a talking machine, and yet appreciate good music and can afford to gratify their desires: Figuring on the basis of a town of 25,000 inhabitants; it is safe to say that there are 200 families among those 25,000 inhabitants where a demonstration of the Grafonola "Regent" in particular, because of its absolute novelty, would be a real event. What are *you* going to do about those 200 prospects?

The Grafonola "Regent" *alone* is a sufficient reason for securing the exclusive Columbia selling rights in your territory, if they have not already been signed up. Think what it means to control your territory, for the sale of this one instrument alone, not to mention the complete Columbia line. Write us about it.

Columbia Phonograph Co., Gen'l

New York

CONVENTION OF OHIO DEALERS.

Discuss Matters of Trade Interest and Comment Upon Growing Demand for High Class Records—Officers Elected.

(Special to The Talking Machine World.)

Columbus, O., Feb. 7, 1910.

About sixty enthusiastic dealers attended the convention of the Ohio State Association of Talking Machine Dealers at the Great Southern Hotel, this city, last Wednesday. Various matters of trade interest were discussed at the convention.

The dealers expressed themselves as being particularly pleased at the great and increasing demand for grand opera records and high-class machines, which they believe is due to the great campaign of education being carried on by the big companies through the medium of newspapers and magazines all over the country.

Among those present at the meeting was W. H. Hug, traveling representative of the National Phonograph Co., and who, with Perry B. Whitsit, the well-known jobber of this city, entertained the visiting dealers at a dinner and "smoker" in the evening. At the close of the dinner Mr. Hug read a paper by C. E. Goodwin, manager of salesmen of the National Co., treating of the work and policy of the company and the growing popularity of the phonograph. It was listened to with interest.

The following officers were re-elected: A. C. Jacobs, Wapakoneta, president; G. A. Doerzbach, Sandusky, vice-president; W. H. Snyder, Columbus, secretary; A. C. Williams, Zanesville, treasurer. The next convention will be held in Toledo the second Wednesday in August.

"POLK MILLER" RECORDS IN DEMAND.

The seven "Polk Miller" records which the National Phonograph Co. placed in the hands of their trade on January 3 for immediate disposal have proven tremendous sellers. It was expected, because of the character of the selections, that the demand for them would be purely local,

SALESMAN WANTED.

We want a man who is familiar with the Edison and Victor lines. We don't expect a man to know it all, and we don't want him to think he does. The salary is not large to begin, but promotion is sure if you make good. If you are willing to dig and get at the bottom of things, write a letter telling who you have worked for; how long; what salary you want, and your age.

Address "Opportunity," care Talking Machine World, 1 Madison avenue, New York.

FOR SALE.

In Southern California. A well-established piano and talking machine business (Columbia, Victor and Edison Agencies). Beautiful store, located on main business street of prosperous city. Favorable lease. The most attractive opening for music dealer to take advantage of ideal conditions of climate and livelihood. Address "California," care The Talking Machine World, 1 Madison avenue, New York.

\$ WANTED FOR SPOT CASH \$
Will pay spot cash for large lots of Talking Machines, records and supplies of any description. Must be very cheap.

Send full particulars to
BUYER

care Talking Machine World, 1 Madison Avenue, New York City

TRAVELER WANTED.

Wanted, traveling representative for large Victor and Edison jobber. Must have experience. State salary wanted and reference in first letter. Representative, care The Talking Machine World, 1 Madison avenue, New York.

but such has not proven to be the case. While quite naturally, since they are plantation melodies, they have been in greater demand in the South, still the North has taken to them very kindly, while some sections of the West cannot get enough of them. One Kansas dealer, in a burst of enthusiasm over the manner in which he was disposing of them, wrote to the factory recommending that one thousand more selections of the same order be catalogued.

The four Amberol Masonic records that were included in the same special list have also proven to be good sellers. They are quartet records with organ accompaniment covering hymns used in three different degrees of Masonry—Entered Apprentice, Fellowcraft and Master Mason Degree. The National Co. expect that the sale of these records will increase as the fact of their being on the market becomes better advertised.

INTRODUCE ROYALTY STAMPS.

The German Grammophon Co. Take Important Step Which Has Caused Considerable Discussion.

(Special to The Talking Machine World.)

Berlin, Ger., Jan. 31, 1910.

The German Grammophon Co. introduced somewhat of an innovation on January 1 when they began to place royalty stamps upon all discs covered by ordinary copyright, though they have never had any dealings with the writers of the words of the songs. The royalty they arbitrarily fix at 2-17 cents, or 3 per cent. of the selling price of the record.

Dealers, however, are rather shy about taking to the new proposition of the Grammophon Co. owing to the fact that there is at present a suit before the courts, on appeal, wherein a firm of music publishers seek to recover from a disc manufacturer for having manifolded the words of a song the music of which was not copyrighted. The dealers naturally feel that when the courts decide on the question it is plenty time to tax the records and do not see how the Grammophon Co. can refund the royalty charges if the courts decide that the discs are not subject to royalty. Meanwhile other manufacturers continue to issue records without royalty stamps and dealers continue to buy them. The final outcome will be awaited with interest.

BERNHARDT RECORDS SOON READY.

Announcement was made by the National Phonograph Co. in the February 1 issue of the Edison Phonograph Monthly that the five records which Sara Bernhardt is making for them cover extracts from the roles in which she has scored the most emphatic successes of her remarkable career—"L'Aiglon," "Phédre," "Cyrano de Bergerac," "La Samaritaine" and "Les Bouffons." These selections are splendidly chosen to give the wonderful actress the widest possible range for the display of her talent and versatility. The records are due to reach this country very soon and ought to be in the hands of the Edison trade in the near future.

AMBEROL RECORDS IN CHINESE.

On January 25 the National Co. sent out to their trade a four-page folder in Chinese, with introductory in English, describing nine different selections in Chinese, of which twenty-two records cover one selection, eleven another, six each cover two more, and so on down. These records were made by four of the most prominent Chinese actors in the country, one of whom it will be recalled was killed in a recent war of the Tongs in New York's Chinatown. The records were made in response to a demand of the trade in various sections of the country where the Chinese are found in numbers, especially in Chicago, New York, San Francisco and the Coast cities.

BECOMES MANAGER OF ROSS & SONS.

E. A. Neff, traveling representative of the National Phonograph Co. for Texas, resigned his

position on February 5 to accept the management of the firm of W. H. Ross & Son, Edison jobbers, of Portland, Me. Mr. Neff, who has long been connected with the talking machine business, has been a member of the National Co.'s traveling staff for the past four years and was regarded as one of the most efficient of their road men.

MUSICAL INSTRUMENT DISPLAY.

Special Sections to Be Set Aside for a Display of American Musical Instruments at the Exhibition to be Given in Berlin Next Summer.

R. H. Sexton, who is in charge of the section devoted to music and musical instruments at the American Exposition to be held in Berlin, Germany, during the months of June, July and August, 1910, informs The World that it has been determined to set aside one or more sections of the limited space at disposal for a representative exhibit of music and musical instruments, for both a collective and individual display. He added: "The Emperor's Hall, located in the balcony, is now being assigned, several leading music concerns having made application. The balcony (where the fine arts will be shown) is especially suited for the musical display sections. It is also proposed to arrange for a collective exhibit in one of the sections to enable those desiring special displays to group with others in one space in charge of a special representative and by prorating the expense arrange for an exhibit with very small cost."

PROPOSITION STILL IN ABEYANCE.

Because of manufacturing congestion the National Phonograph Co. have been compelled to postpone the nature and plan of their Amberol attachment proposition, which they had originally figured on giving to the trade not later than March 1. Their record molding plant is being taxed to its capacity day and night to take care of the regular output, so that it has been absolutely impossible to prepare for an abnormal demand. To increase the output and expedite the plan they are installing additional molding apparatus, which ought to be in operation within a week at the latest.

THORN NEEDLE FOR TALKING MACHINES.

Dealers will doubtless be interested in the advertisement of the J. W. Jenkins Sons Music Co., Kansas City, Mo., which appears elsewhere in this issue, in which they bring the Thorn needle to the attention of the trade. This specialty is highly spoken of, and the Jenkins Sons Co. have many letters from users testifying to its excellent reproductive qualities. They will be glad to take this Thorn needle subject up with jobbers and dealers, and state they feel assured that a big and profitable trade will result. As dealers and jobbers are in business for this purpose, it will pay them to consider this proposition of the J. W. Jenkins Sons Co.

A wizened little man charged his wife with cruel and abusive treatment. His better half, or in this case better two-thirds, was a big, square-jawed woman with a determined eye. The judge listened to the plaintiff's recital of wrongs with interest. "Where did you meet this woman who, according to your story, has treated you so dreadfully?" his honor asked. "Well, Judge," replied the little man, making a brave attempt to glare defiantly at his wife, "I never did meet her. She just kind of overtook me."

Cummings, Shepherd & Co., Edison jobbers, of 700 Houston street, Fort Worth, Tex., have been succeeded by D. Shepherd & Co., with headquarters at 310 Main street, that city.

The Utica Cycle Co., Utica, N. Y., are now occupying new quarters in that city at 117-119 Columbia street.

If a salesman will consider all points which come up in his vocation from the other fellow's point of view, he will find it helpful.

DEALERS TO FORM ASSOCIATION.

Representatives of Dealers of the Eastern States Hold Meetings in New York for the Above Purpose—Something of the Objects—Next Meeting to be Held at the New Grand Hotel in New York, Wednesday, March 9th—All Dealers Are Cordially Invited to Attend.

The talking machine dealers of the Eastern States have now an opportunity to line up in a live organization if they only arouse themselves from lethargy and join their fellow dealers in a movement which will mean excellent results for all concerned.

Realizing the benefits derived through organization, as indicated by the success of the National Association of Talking Machine Jobbers and the Ohio State Association of Talking Machine Dealers and other similar organizations, a number of talking machine dealers of New York and neighboring States, answering a call sent out by Franck C. Storck, the enterprising dealer of Red Bank, N. J., met at the Hotel Breslin, New York, on January 26, and took the initial step toward organizing the Eastern States Talking Machine Dealers' Association.

Among those present at the first meeting, in addition to Mr. Storck, were James Riddell, Brooklyn, N. Y.; Chas. A. Laureigh, Orange, N. J.; A. Lasus, New Rochelle, N. Y.; R. Montalvo, Jr., New Brunswick, N. J.; John Diehm, Brooklyn, N. Y.; H. V. Lough, Plainfield, N. J. and E. F. Glover Westhampton, N. Y. Mr. Storck was moved to the chair, and an interesting interchange of views upon the subject of forming a dealers' association followed. The need of such an organization, which would work in sympathy with the jobbers' association and the manufacturers, was descanted on, and in order to perfect the organization Mr. Storck was appointed temporary chairman and Mr. Montalvo temporary secretary. A deputation was appointed to wait on J. Newcomb Blackman, vice-president of the National Jobbers As-

sociation, and ask him to give them the benefit of his experience in organization work. Mr. Blackman addressed the dealers and offered them some excellent advice regarding the organization and conduct of the association.

A subsequent meeting was held at the Hotel Breslin on February 4, when a rough draft of the proposed constitution and by-laws were discussed, final action being delayed until the next meeting, when more dealers are expected to be present. In the meantime the Ohio Dealers' Association had been communicated with in order to obtain information regarding that organization and the methods employed by it.

The name Eastern States Talking Machine Dealers' Association was suggested, as it is the object of those back of the movement to include the dealers of as many eastern States as possible.

The next meeting of the dealers will be held at the New Grand Hotel, New York, on Wednesday, March 9, the sessions being at 11 o'clock a. m. and 2 p. m. The hotel management has quoted special rates for those dealers attending the meeting, which will be furnished on application. Those dealers who are unable to attend the meetings are requested to communicate with Mr. Storck, temporary chairman of the committee on organization, at Red Bank, N. J., that they may be kept informed by mail of the progress of the work.

The objects of the association are, roughly, to enable dealers through the organization to keep in closer touch with the factories, to promote the exchange of ideas upon advertising, collecting and the handling of stock, and to provide, among other things, for the registry of stolen machines. Judging from the success that has attended the efforts of similar dealers' associations, the new Eastern States Talking Machine Dealers' Association should have a bright future before it, if all the members put their shoulders to the wheel and help to push things along. The dealers, however, must wake up and help Mr.

Storck and the others interested, so that results may be achieved.

UNIVERSAL CO. IN PHILADELPHIA.

The Universal Talking Machine Mfg. Co. on February 7 sent the following notice to the trade: "On and after Friday, February 11, 1910, will you kindly address all communications to the Universal Talking Machine Mfg. Co., Fourth and Race streets, Philadelphia, Pa. Our office and factory will be removed to that city during next week, and after February 14 all goods will be shipped from Philadelphia instead of Newark, N. J."

AMBEROL GRAND OPERA RECORD PRICES.

Regarding the advance in prices of grand opera Amberol records made by Leo Slezak and Blanche Arral, the National Phonograph Co., Orange, N. J., through sales department bulletin No. 43, issued January 29, furnish the appended trade information for dealers:

"We beg to advise that on and after April 1, 1910, the prices on grand opera Amberol records made by Slezak and Blanche Arral will be advanced as follows: Slezak, \$2; Blanche Arral, \$1.50. Also that Marguerite Sylva's records, which begin with the April list, will be \$2. All other grand opera Amberol records listed up to and including the April list will remain as at present, \$1. The foregoing are list prices.

"Your jobber will be pleased to accept and fill such orders as you may see fit to place for records already listed in the grand opera catalog, for shipment prior to April 1, at the present price, subject to special allowance of 3-1-3 per cent. for breakage."

The Montenegro-Riehm Music Co., Edison jobbers, Louisville, Ky., have removed their wholesale business headquarters to 539 Fifth avenue, but are continuing their retail stand at 528 Fourth avenue.

No. 400—CLOSED

EVERY DEALER CAN SELL HARMONICAS WITH THE C-D-C DEVICE

THE HANDSOMEST AND MOST PRACTICAL HARMONICA DISPLAY CABINET EVER DEvised. IT SELLS HARMONICAS

THE C-D-C DEVICE consists of a three-tray cabinet of the best seasoned wood, beautifully finished in a dark mahogany piano polish, and when closed resembles an elaborate jewel case. Owing to its novel arrangement and peculiar construction, it can be thrown open and closed in a moment's time. When the cabinet is open the Harmonica display is exceptionally attractive, exhibiting its entire contents of 38 Harmonicas at one time, and showing the instruments to a great advantage. When closed, the complete Cabinet occupies a minimum of space (10 3/4 inches wide, 9 1/4 inches long, 5 3/4 inches high), being much less than a foot square. Thus, it will be seen what an ideal self-selling proposition this new Collapsible Display Cabinet is. The Cabinet costs you nothing, and besides, you are the gainer by over 50 PER CENT. cash profit on your investment.

The C-D-C Device contains 38 pieces of the very best selling

HOHNER HARMONICAS

Assorted in 16 different styles, all keys, and can be retailed at the following prices:

16 Pieces Assorted Harmonicas, to retail at	25c.	- \$4.00
12 " " " " " "	35c.	- 4.20
10 " " " " " "	50c.	- 5.00

Total retail value, - \$13.20

YOUR INVESTMENT

PRACTICAL SUGGESTIONS AND COMMENTS

PROBLEM OF DISPOSING OF OLD RECORDS.

One of the greatest bugbears of the talking machine jobber and dealer is the danger of overstocking records and the subsequent accumulation of old records which frequently represents a large amount of tied up capital. A western Victor dealer has solved the problem of disposing of old records in the following unique manner, which scheme might be adopted by other dealers: The record numbers on the front of his record bins (in which pieces of cardboard are held in little tin slips, making them very readily removed) are marked on white, blue and red papers. The white paper designates his regular salable stock, but when a number becomes dropped, he takes out the white paper, putting in a blue one. When he considers he is overstocked on a certain record he places a red card in the holder, and offers his employes a small commission on the sale of red records and double as much on the blue label records. It is surprising to see what energy the salesmen will use to work off what is considered undesirable stock. The buyer will come in, pick up a catalog, and ask to hear some of the records, with which he is familiar, when many of these red and blue label records are better and far more musical, and they would be glad to buy them, if the clerks would take the trouble to play them. This dealer states that the red and blue labels have done wonders for him. He has a report put on his desk each morning showing the previous day's record sales, with the reds and blues marked, and his salesmen take great interest in having this list as large as possible.

PROPER SPEED FOR PLAYING.

The Victor Talking Machine Co., in a recent announcement, stated: "The perfect reproduction of Victor records (provided you are using a new needle) is absolutely dependent upon the turntable revolving at the proper speed. Every dealer knows if the speed is slow the pitch is low, while the pitch is high if the turntable revolves too fast. Recent changes in the method of recording necessitate a corresponding change in playing Victor records, and you will therefore obtain the best reproduction by adjusting the Victor to seventy-eight revolutions of the turntable per minute."

PROCESS OF RECORDING SOUND.

James E. Jones, of Sandusky, writes to The World making inquiries anent the modus operandi in transmitting sound to a disc. In this connection we may say that when sound is recorded by a talking machine the vibrations are caught in a bell-mouthed horn and poured through its little end, like water through a funnel, into a round box, the size of a five-cent

box of blacking, filled with air. The outer lid of the box is a diaphragm of mica but 4-1000 of an inch thick, or about the thickness of a sheet of writing paper. Attached to the center of this diaphragm by a dainty dab of cement is a delicately adjusted needle or stylus. When a sound wave is poured through the receiving horn against the cushion of air the diaphragm and the stylus attached to it are caused to vibrate in exact accord with the wave. The vibrations of the stylus are traced upon a plastic disc which revolves at a fixed speed in contact with its point, making an irregular spiral line. When the disc is filled with this spiral record it is called a "master record." It is hardened by a secret process, after which endless copies may be taken from it by another secret process. When one of these copies is placed in a talking machine and the stylus is caused to retrace the spirals, it vibrates exactly the same number of times per second as it did in making the lines. These vibrations are communicated through the diaphragm to the air cushion, thus repeating the sounds which were poured into the horn. Why? Well, some day after they have learned a great deal more about acoustics than any one now knows, perhaps the talking machine experts may find out. Meanwhile the greatly enlarged photograph of a small section of a talking machine record printed herewith by courtesy of

the Victor Talking Machine Co. shows all that the inexperienced eye can hope to see of the mysterious tracings, may be found interesting. Those simple lines happen to be a photograph of a song by Melba. If the record were placed in a talking machine it would become the song itself in the living voice of the prima-donna.

MAKING AN AEOLIAN HARP.

In answer to a correspondent who asks how to make an Aeolian harp that will play in the wind we may say that the accepted plan is as follows: "An Aeolian harp should be made to fit into a window so that the sash may be adjusted to cause a strong breeze across the strings of the instrument. Make the box of thin dry

pine, the top piece or sounding board of extra clear stuff, about three-sixteenths of an inch thick. Sides and bottom can be one-quarter of an inch; length two inches shorter than the width of your window; width ten inches; depth two and one-half inches. The ends should be of hard wood, and thick enough at one end to hold the eyes or studs for fastening the wires or catgut strings. At the other end the wood should be thick enough to hold a set of violin keys, if you use catgut; or iron piano pins, if you use wire, which should be steel. Two bridges of hard wood are glued diagonally across each end, for the strings to rest on. If steel wire is used, a round wire should be inserted on each bridge, so that the sounding wires will not cut the wood. The tuning should be harmonic, or, say, thirds, fifths, and octaves. Make about four holes in the sound board, one inch in diameter under the strings."

WHAT GOLD MOULDED MEANS.

Discussing this subject the editor of the New Phonogram made this statement in answer to an inquiry: "The phrase 'Gold Moulded' grew out of the use of gold in making the original moulds from which our records are now made. By a special vacuum process, pure gold is deposited on the wax masters, the process being similar to electroplating, the difference being that the gold passes through the air and is deposited electrically on the wax master, while in electroplating the copper is deposited electrically through a solution. A brass mould is afterward cast around the wax master with its coating of gold, the gold becoming a part of the mould and the wax master being removed. In this way, the gold forms the lining for the moulds. Therefore, the name."

TRUE PRODUCTION OF TONE.

X. Y. Z., Hoboken, Asks—"Am I getting the true reproduction from my cylinder machine? How can I tell at what speed the mandrel should run to get the same effect as when the record was made?"

Place a small piece of wax at end of the mandrel. If you cannot see this wax distinctly stick a small piece of white paper on to it. Then set your machine going and when you have speeded it so as to count the piece of wax make 40 revolutions in 15 seconds you have found the speed to get the best results.

GENERAL BUSINESS STEADY.

Record Demand Strong—Cabinet Machines Still Have the Call—Victor Co. Plant Trying to Catch Up with Orders—Other Reports.

Business is moving along steadily, and a slight improvement is noticeable. The demand for records continues in full force, the majority of the orders being for the high price lines. The same is also true of the Victrola, Grafonola and Amberola cabinets. Dealers advise the manufacturers of the latter goods that a splendid trade may be expected for them for months to come. So far as the Victrola is concerned the factory has not been able to catch up on back orders, and it now looks as if the Victor Talking Machine Co. will be obliged to make another substantial addition to their cabinet-making plant if they expect to keep within gun-shot of the demand for the best seller which has ever appeared in the talking machine field.

The Columbia Phonograph Co., general, in speaking of the situation, said: "Business with us is in a very satisfactory condition. Our plant is running capacity, and the demand for our best grade records and highest price machines is active. We expect a splendid trade in all parts of the country, judging from advices from our exclusive jobbers and dealers."

National Phonograph Co. said: "There is no abatement in the demand for goods. We are swamped with orders for the Amberola and Amberol records. The Slezak records are making a high mark on sales, and the trade write us they are great sellers."

The New York Talking Machine Co.: "We have no complaint to make of trade."

Needles Free To Prove Quality

"THE BEST THAT MONEY CAN BUY"

Playrite
TRADE MARK

NEEDLES

"THE NAME TELLS WHAT THEY DO"
Best for VOLUME, TONE and LASTING QUALITY. PLAY RIGHT from START to FINISH. PRESERVE RECORDS and can be used on ANY DISK MACHINE OR RECORD. Packed only in RUST PROOF packages of 100. RETAIL, 10c. per 100; 25c. 300; 75c. 1,000.

BLACKMAN TALKING MACHINE CO.

J. NEWCOMB BLACKMAN, President

97 CHAMBERS STREET

NEW YORK CITY

BIRD'S-EYE VIEW OF THE VICTOR PLANT.

Readers of The World Can Get an Excellent Idea from the Picture Herewith Presented of the Magnificent Manufacturing Headquarters of the Victor Talking Machine Co., Camden, N. J.—Among the Best Equipped Plants in Any Industry in the World.

To one who has never had the opportunity of visiting the manufacturing headquarters of the Victor Talking Machine Co., in Camden, N. J., no simple description in cold type can give an adequate idea of the immensity of the plant—of the number of buildings, large and small, extending over several city blocks, required to house the various departments, making up this great industry.

We are able to print, however, in this issue of The World, the latest bird's-eye view of the Vic-

tor plant, together with all the buildings being grouped together in the picture—although in reality the structures number 10 and 12 in the picture, are actually two blocks from the rest of the buildings.

tor plant, together with all the buildings being grouped together in the picture—although in reality the structures number 10 and 12 in the picture, are actually two blocks from the rest of the buildings.

These illustrations demonstrate impressively the tremendous growth of the Victor business in recent years when we consider that the little picture on the upper left hand corner gives a view of the first factory shown in connection with the present plant.

There are perhaps few businesses in the world that parallel the growth of the Victor institution.

It has developed by the production of values that appeal to the great music-loving public of the United States and by an energetic organization of able men who are alert in the production of new ideas and such improvements as keep their product ever to the front.

The various departments of the factories are indicated by numbers and are as follows: 1. Machine factory; 2. Machine factory; 3. Power plant (4,000 horse-power); 4. Record factory; 5. First and second floors—executive offices; third and

fourth floors—recording laboratory; 6. Storage building; 7. Window display and printing departments; 8. Cabinet factory No. 1; 9. Lumber dry kilns; 10. Warehouse and shipping department; 11. Assembling department; 12. Cabinet factory No. 2; 13-13. Lumber yards; 14-15. Record Material storage department; 16-16. Coal yards and docks; 17. Cabinet factory heating plant; 18. Supply tank for automatic sprinkler system; height, 16 ft. (tank capacity 100,000 gallons); 19. Experimental laboratory; 20. Victor Lunch Club; 21. Veneer warehouse; 22. Lumber dry kilns.

TRADE NEWS FROM CINCINNATI.

Business Opens Well—Meeting of the Ohio Talking Machine Dealers' Association—Nichols' Good Columbia Trade—Joseph Krolage's Close Call—New Victor Record Catalog Pleases—Grand Opera Helps Sales of High Class Records—Milner Publicity.

(Special to The Talking Machine World.)

Cincinnati, Feb. 3, 1910.

The reports of the dealers and jobbers for January indicate that business was unusually good, particularly in the high-class goods, which seems to have the call. The greater part of the month's business developed after January 15, which is due to the buyers of Christmas goods wanting new records. Collections are reported to be uniformly good.

The Ohio Talking Machine Men's Association had a called meeting at Columbus yesterday and one of Cincinnati's representatives was Jacob Salm, of 538 Main street. This city was shy on delegates, which fact was noticed at the convention. There were the usual number of good talks on how to increase the sales of talking machines and what to do to bring it into more prominence.

Manager S. H. Nichols, of the local store of the Columbia Phonograph Co., reports a very satisfactory trade for January; in fact, it has kept pace with the increased business shown in previous months, and considering the large quantity of goods which could not be shipped on account of shortage of stock, it showed a very material increase over January of 1909. Grafonolas,

high grade disc and four-minute cylinder graphophones, Fonotopia and four-minute indestructible records have had a large sale. February promises to show the same increase and prospects for the future of Columbia products are brighter than ever. E. D. Easton, president of the Columbia Phonograph Co., paid a visit to the Cincinnati store on his return trip to New York from a tour of inspection of the offices and reported increased business all along the line.

Manager Joseph Krolage, of the J. C. Groene Co.'s talking machine department, had a close call from death last week. On Sunday he was operated upon for appendicitis which gave him instant relief and he is now reported to be on the road to recovery. For many months Mr. Krolage has been ailing in health and it was only a week ago that he realized the nature of his condition. He is in a private hospital on Walnut Hills. It will be four or six weeks before he will be able to return to his desk. The Groene Co. had a fairly good month in its talking machine department, the patronage being evenly distributed.

J. E. Poorman, Jr., 639 Main street, yesterday stated the trade conditions were most encouraging, particularly in Zonophones.

John Arnold, 507 Elm street, expresses himself as being well pleased with the new Victor record catalog, which he believes will materially aid in the sales of his house. He had a big demand for Edison Amberola machines and said the Edison grand opera Amberola records were much in demand last month.

The Wurlitzer Co. report a very satisfactory business during January. The various musical

affairs given and the grand opera company which has visited Cincinnati stimulated the interest of the public in the better class records, and as a result Victrolas have been sold, which can be traced directly to this cause. A feeling of optimism prevails among the dealers in this section. They have had a very satisfactory winter business and prospects look very bright. The Rudolph Wurlitzer Co. have taken advantage of the Victor window displays, and in connection with these shows have used newspaper advertising very liberally, which has resulted in big sales on Maud Powell grand opera and Harry Lauder records. The wholesale trade is improving wonderfully. Dealers are buying Victrolas who have not been purchasing machines or records for many months. This is satisfactory business to the dealer, as the Victrola proposition is a very simple one, requiring only one sample, and a good selection of Red Seal records. As the result of the increased business, the Rudolph Wurlitzer Co. were forced to put on two additional order clerks in their wholesale department. Mr. Sigman has been bringing in some big orders and established some very satisfactory accounts during the last 30 days.

The Milner Musical Co. have adopted a plan of publishing a sheet, known as the "Milner Victor Comment," which Manager Timmerman claims has been of great aid to his business. He believes it has been responsible for a material increase in last month's sales. Besides causing the resurrection of some old customers it keeps the new ones interested. All are requested to bring their notices along and it has been found that the instructions are followed. The Milner people are anxiously awaiting the arrival of six Amberolas and expect to sell these within three days after their reaching the store. The company anticipate a splendid business for February.

THINGS ARE BRIGHTER NOW

Says General Manager Williams in Discussing Business Conditions—Some Early Red Seal History—How Up-State Dealers Are Sometimes Out-Generaled.

In commenting on current trade, G. T. Williams, general manager of the New York Talking Machine Co., 83 Chambers street, New York, said: "Of course, during January, in common with other houses, there was a slump in business. But things are much brighter now, and we are looking forward to a brisk spring business. We are not getting all the goods we want from the factory. They are still behind on Victrolas.

"Speaking of Victrolas reminds me that our company were the first to introduce Red Seal records to the dealers in New York State. Of course, this was in their early history, but I can well remember, after we had induced the dealers to take hold of them and they were scoring a big success, that the distributors, who had steadily side-stepped—were timid about carrying them in stock—complained to the factory we were invading their territory, etc. It seems like a joke now, but is an actual fact. At present they all carry strong lines of Red Seals.

"Another proposition the up-State dealers seem unequal to, and that is the Victor Auxetophone. These machines occupy a peculiar field, but they are all right if properly handled. For instance, they were outgeneraled by a clever dealer of New York city in selling Auxetophones to the leading hotels, to be used in connection with an orchestra. They overlooked the chance—lost the opportunity; for the New York dealer, who is well known, slipped in and sold machines to hotels in Albany, Utica and other cities. It is a good line if handled right."

Geo. W. Lyle, general manager of the Columbia Phonograph Co., went to Chicago Monday for the greater part of the week on special business. Before starting he expressed his satisfaction with Columbia conditions; in fact, was decidedly pleased with the outlook and was confident spring trade would be strong and active.

NATIVE COLUMBIAN RECORDS.

Some Splendid Numbers to be Issued by the Columbia Co. for Dealers in the United States of Columbia—Made by Leading Musicians in That Country.

The first and only set of native Columbia records have been made by the Columbia Phonograph Co., general, and are for sale only by dealers in the United States of Columbia, S. A. They are reproductions by the best known artists

DANIEL URIBI.

LOUIS URIBI.

reproductions of native talent in either Chili, Peru or Bolivia, where Indians have heretofore been employed for this purpose, and consequently the work is considered more or less crude or harsh as compared with what has been accomplished in this instance. As an officer of the company remarked, "These records show the high development music has reached among the Columbian people. They are double disc, as all records going to that part of the world must be to meet trade conditions."

SAMUEL URIBI.

from that country and were recorded at the laboratory of the Columbia Co. in New York. The principal, if not the majority, of these records are the work of Uribe Brothers.

What lends particular interest to these records is that one of the Uribe Brothers was selected by the Columbia Government to be sent to Europe and educated in the famous conservatories at public expense. It is this fact that makes the records in question superior in a musical sense; in fact, the Columbia Co. say, far better than

A GLIMPSE OF THE RENO TRADE.

Nevada's Metropolis a Lively Town—Many Talkers Used in Public Houses—General Business Excellent—What the Emporium of Music Is Doing.

(Special to The Talking Machine World.)

Reno, Nevada, Feb. 6, 1910.

New Yorkers who visit this town are often surprised to find an activity in the way of gambling and gorgeous saloons that would throw their Great White Way in the shade. The streets of Reno are like day with their thousands of electric lights, and saloons are fitted up gorgeously. Talking machines are greatly in favor in these establishments, and in two places two shifts of men are paid \$30 a week each to keep expensive Victor talking machines going day and night.

To give an idea of the amount of playing done I learned from a local dealer that upward of 10,000 needles have been used in one establishment inside of five weeks. These machines are run continuously day and night, and the records are not merely popular music, but the very finest and expensive Red Seal records are used. For instance, one hears the Caruso records, the Quartet from Rigoletto, the Sextet from Lucia, and every new record of any importance is added to the list.

Business generally in Reno is excellent, and the Emporium of Music in the Masonic Temple is doing a big business in Victor talking machines and Edison phonographs.

Arthur L. Holgate, who has charge of the talking machine department, has just sold the first new Victrola No. XII. and a fine selection of records to a large mining operator whose mines are located at National, Nevada. Mr. Holgate is pleased at this sale, as he feels confident that being placed in such a far-away mining camp as the National—150 miles off the railroad—it will mean not merely more sales in that locality, but shows that the best grade of instruments and music is just as well appreciated in mining camps as in a great city like New York.

This concern has also sold the first Amberola received in this city to the owner of a large meat concern in Reno. The Emporium of Music is very enthusiastic about the future of the talking machine business in this section.

I.C.S. SYSTEM PRAISED IN COLLIER'S.

Prominent Weekly Assigns Editor to Cover Work of Well-Known Institution and Pays Great Tribute to Their Methods and Results.

A great tribute was recently paid the work of the International Correspondence Schools at Scranton, Pa., in a very unusual way. It seems that a writer in Collier's, in the course of an article, had reflected on the integrity as well as upon the actual value of the International Correspondence Schools.

When the matter was brought to the attention of Collier's they at once assigned Mark Sullivan, one of the editors of that magazine, to make a thorough investigation of the methods and accomplishments of the International Correspondence Schools. As a result there appeared recently in Collier's an extended article in which Mr. Sullivan stated that, "Based upon personal investigation the International Correspondence Schools do teach successfully the subjects they undertake. No one can conclude such an examination without the conviction that this institution is a real force in American civilization."

In this article he goes into details in presenting the splendid work accomplished by the International Correspondence Schools and states unequivocally that "The probability of success is greater in the course of International Correspondence Schools of Scranton, Pa., because their courses are largely connected with the occupations of students."

This action of Collier's in setting this matter right was a highly honorable course. Meanwhile, the conclusions arrived at by Mr. Sullivan are those of other men eminent in all walks of life in this country. They have realized that for the busy man desirous of advancing himself there is no better avenue of progress than a course in any desired subject through the International Correspondence Schools.

There is no kind of work that can fail to make you a better and more successful man if you work at it honestly and loyally.

Never give out while there is hope, but hope not beyond reason; for that shows more desire than judgment.

THE BLACKMAN SPECIALTIES.

Folding Record Trays and Place Record Brushes Increasing in Demand—Improvements in the Brushes Announced.

The Blackman Talking Machine Co. report a strong and constantly increasing demand for their folding record trays for cylinder records, which are covered by broad patents, and for the Place automatic record brushes for Edison phonographs and Victor talking machines. The trays, which come in sizes to hold from two to six records each, prove an almost invaluable aid to the dealer in keeping his stock in first-class order, with every record readily accessible. They are generally used together with the Rapke label, and may be placed on ordinary shelving or in the wire racks made to fit them by the Syracuse Wire Works.

Talking machine owners who use the Place automatic record brush are not long in realizing the value of the brushes in removing dust and other foreign substances from the grooves and thereby permitting of a perfect reproduction, besides lengthening the life of the record.

Several improvements are announced in the different forms of brushes. Brush No. 3 for Edison machines will be so constructed in the future that it may be used on either the Fireside or Gem models, while No. 10, for Victor machines, will also be greatly improved. Those not already acquainted with the two Blackman specialties mentioned will find it to their interests to investigate.

James H. Barney, Jr., & Co., the well-known piano dealers of Newport, R. I., who recently moved into a larger building in that city, are giving their talking machine department especial prominence. They have five large demonstration rooms at the rear of the main floor, and use more than half their floor space for displaying phonographs. In their recital hall on the second floor talking machine concerts are given this week.

The talking machine will play a prominent part in the ten day tuberculosis "rally" to be held in the North Side of Milwaukee, Wis., under the auspices of the Wisconsin Tuberculosis Association.

OPERA HELPS SALES IN MEMPHIS.

High Priced Machines and Records in Great Demand—O. K. Houck Co.'s Educational Campaign—Many Noted Visitors—Enlarging O. K. Houck Talker Department—A. L. Owen in Cheery Mood Regarding Trade Prospects—Other Happenings of Interest.

(Special to The Talking Machine World.)

Memphis, Tenn., Feb. 9, 1910.

The talking machine trade in Memphis and vicinity has been decidedly brisk for the past month. A number of recent musical events of more than usual importance have greatly stimulated a taste for the best music and the dealers find themselves disposing of a greater number of grand opera selections now than ever before.

A fine concert recently given by the Memphis Symphony Orchestra was well attended, and this concert was immediately followed by the Lambardi Grand Opera Co., who played an engagement at the Lyceum Theater.

On Saturday, February 5, the great pianist, Lhevinne, gave a recital at the Goodwyn Institute under the direction of the O. K. Houck Piano Co., enjoying one of the largest audiences of the season.

There are also elaborate plans being made for a great musical festival to be held in this city some time in May, and the dealers are congratulating themselves on the numerous opportunities to exploit the best machines and records.

A number of Victrolas, Amberolas and other high priced machines, together with a large number of the best records, were disposed of during these concerts, and their good influence is still being felt in the trade.

One of the most elaborate and successful educational campaigns ever conducted by a talking machine house in the South has recently been concluded by the O. K. Houck Piano Co., of this city, after running for two weeks, or during the engagement of the Lambardi Opera Company in Memphis.

The Houck Co. announced through the medium of the daily papers and circulars the fact that in order to better acquaint the prospective opera-goers with the musical and dramatic features of the operas to be produced by the Lambardi Company they would give talking machine concerts twice daily in the parlors of their store, at which the music of the operas would be played on the Victor Auxetophone and Victor Victrolas and the entire work explained by a competent speaker. At the concerts a series of seven booklets were distributed, one devoted to each of the operas produced by the Lambardi Company and including "Aida," "Madam Butterfly," "Lucia," "La Gioconda," "Cavalleria Rusticana," "Pagliacci" and "Il Trovatore."

The Lyceum Theater management and the heads of the Lambardi Company were so impressed with the progressive spirit shown by the Houck Co. that they jointly contributed a goodly sum of money toward the printing and mailing of over 3,000 circulars, and consented to the distribution at the theater of 1,000 copies of the various booklets of the operas. A feature of the booklets was the numbers of the Victor records bearing the various portions of the operas for the convenience of talking machine owners.

On the whole the originality and progressiveness of the Houck Co. caused quite a stir in local musical circles and the company, who kept a record of the numbers attending the concerts, the names of the prospects received and the volume of sales made as a direct result of their efforts during the fortnight of the opera, state that in every way the plan succeeded far beyond their expectations.

The Houck Co. believe that other jobbers located in cities to be visited by the Lambardi Grand Opera Company will find it profitable to emulate their example and declare themselves willing to acquaint interested jobbers with the details of the plan and also to supply the booklets mentioned in any quantity at short notice, as the forms have been kept standing.

On account of the immense increase in their wholesale business, the O. K. Houck Piano Co. have found it necessary to remodel and enlarge their entire wholesale talking machine section. This company are urging their dealers to make use of their excellent facilities for keeping after prospects, and they are meeting with well-deserved success, new names constantly being sent in by different dealers, to be added to their prospective lists, and the "Ginger letters," which are mailed to prospects at regular intervals, bring good results.

A. L. Owen, manager of the talking machine section of the O. K. Houck Piano Co., anticipates one of the best Februarys they have ever had, as the month has started off exceedingly well, they having "lined up" a number of new and progressive dealers. Mr. Owen leaves shortly for a trip through Mississippi in order to call on some of the larger dealers in that State. O. C. Stegmair, the O. K. Houck Piano Co.'s former road man, has been appointed manager of the retail department of the same firm, and, with his wide experience, will no doubt be able to show quite an increase in this end of their business in the next few months. His successor on the road has not yet been chosen. D. C. Da-Shiell, formerly connected with the Rudolph-Wurlitzer Co., has accepted a position in the retail department of the O. K. Houck Piano Co.

F. R. Stratton, Edison and Victor dealer of Brownsville, Tenn.; J. R. Phillips, Edison dealer of Tupelo, Miss.; R. E. Fletcher, Victor dealer at Osceola, Ark.; C. D. Mitchell, of C. D. Mitchell & Co., Victor dealers at Pontotoc, Miss., and Mrs. C. Hammer, of Portia, Ark., called on the O. K. Houck Piano Co. in the last few weeks and expressed themselves as looking forward to a big business in the talker line in the month to come.

Frank E. Gage, the Tennessee and Kentucky representative of the National Phonograph Co., has been heard from in the shape of some very fine orders, and all indications point to a Mem-

phis visit from the above gentleman in the near future. Mr. Gage is very popular with the Southern trade, and everyone is glad to hear of him again being in the field.

Dan Wilber, of the Regina Co., was a recent trade visitor, and left with a nice order signed by their Memphis representative, the O. K. Houck Piano Co.

It is unofficially announced that the talking machine department of the E. E. Forbes Piano Co. has been discontinued in Memphis, their stock being moved to the head office in Birmingham, Ala.

Union J. Chambers has opened a talking machine store at 255 South Main street.

BARKLOW AGAIN IN HARNESS.

B. K. Barklow, of the selling staff of the National Phonograph Co., Orange, N. J., who has been in the Adirondack Mountains for several weeks for his health, returned to his post of duty Monday. As no one ever suspected Mr. Barklow was other than the embodiment of vigorous health, this will be news to his large circle of friends. At any rate, he is now sound as a new minted dollar and is "on the trail" again taking in orders for Edison goods with his usual facility.

TO ENCOURAGE LANGUAGE STUDY.

The Gaelophone Co., New Haven, Conn., have incorporated with capital of \$25,000, to encourage the study of languages by means of phonographic and correspondence instruction. Incorporators: Louis T. Ready, Charles J. Shaughnessy and David J. McCoy, all of New Haven.

Louis F. Geissler, general manager of the Victor Talking Machine Co., Camden, N. J., was in New York one day last week, and dropped in on several of the Victor distributors. He received a hearty welcome.

TRADE NEWS FROM CLEVELAND.

Talking Machine as a Curative— Gaumont Chronophone Co. in Trouble—Edison Business Phonograph Co.'s New Quarters—Roberts Progress—Probeck's Co.'s Big Columbia Business—Buescher Remodeling Store—Leading Dealers All Report Encouraging Conditions—News of the Month.

(Special to The Talking Machine World.)

Cleveland, O., Feb. 8, 1910.

While the dealers are not as optimistic as they might be, perhaps by force of habit, trade generally in the talking machine line is good and will compare favorably with that in other lines of trade. Sales of machines, aggregating large numbers, are a matter of everyday experience with most of the dealers, and generally they are of the higher priced ones, while the sales of records is constant and continually increasing. The efforts of the manufacturers, through their campaign of extensive advertising, is attracting attention and creating a demand, and the retail dealers are reaping a substantial benefit, which will continuously increase.

Since the invention of the talking machine its value has been utilized in many directions. The superintendent of the Cleveland State Hospital is confirmed in the belief that music subdues insanity and has a beneficial effect upon a deranged intellect. He has installed several phonographs and pianos in the hospital and the music treatment is being given daily, especially in the wards where patients display symptoms of violence.

"I do not assert," said the superintendent, "that a permanent cure can be wrought by a musical treatment, but there are few cases of insanity that are not favorably affected by music."

Physicians at the Massillon Asylum recently put a phonograph into a room where sixty demented women were all talking incoherently and screaming. Silence followed the beginning of the music, and there was not a sound from any of the insane so long as the machine was played. It is not improbable that the soothing vibrations of a record may in time restore a disturbed brain to its normal conditions.

C. S. Bourgeois, formerly with the Columbia Co., now of the Auto Sales Co., has become a full-fledged automobilist and is an enthusiast in the business.

Oliver Jones, of the Victor Co., on his way East from Chicago, stopped over a couple of days the first of the month, calling on the dealers here.

The Gaumont Chronophone Co., which was launched in this city two years ago by Max Faetkenhaner, for the purpose of exploiting the invention of L. Gaumont, of Paris, the mechanism of which is made to synchronize the talking machine with the films of moving pictures, has failed. Suit has been commenced in the Court of Common Pleas, in this county, by the Leonard-Bundy Electric Co., asking for judgment on the unpaid subscriptions to the local company, made by L. Gaumont, L. Gaumont & Co. and the Societe des Etablissements Gaumont, for the sum of \$100,000, and by Nathan F. and A. F. Leopold, of Chicago, for \$1,250, or so much of the amounts as may be found necessary to pay the debts of the Gaumont Chronophone Co.

The company opened offices and a factory for manufacturing, but before getting fairly started closed down. Several exhibitions were given, but both the pictures and records were of foreign production and did not appeal to the public. The company then attempted to make their own films, but did not succeed and finally retired from business altogether.

J. Herbert Roach, general manager of the local Edison Business Phonograph Co., has moved from Ninth street to 309 the Park Building, a central location, facing the public square. He says the outlook for business in 1910 is of the most encouraging character.

"We have been having a steady cold spell of weather," said Audley V. Biesinger, of the W. J.

AN IOWA DEALER'S HOLIDAY DISPLAY OF EDISON PHONOGRAPHS.

A view taken of C. F. Brobeil's store, in Lytton, Iowa, during the Christmas holidays, shows a pretty and effective arrangement of stock. While Mr. Brobeil, who is spoken of as a hustler, handles the Edison line exclusively, he also car-

ries general merchandise, but the phonographs were given prominence in the general display, that is both novel and pretty. The World is indebted to the Edison Phonograph Monthly for the illustration.

Roberts, Jr., Co., "which has kept music lovers in the house, and, playing over their selections, found they needed new ones, and consequently our business is, and has been, good right along. Sales of machines has been just fair. People express themselves highly pleased with our demonstrating rooms, as they are free from disturbance while making selections. Our booklet, 'What this Victor Store Means to You,' is in active demand and doing good missionary work. Red Seal records are growing in popularity, and the new Lauder records are selling well. Our repair department is kept quite busy, which we make a feature of our business." The company have arranged a beautiful special home-made Lauder window, using for the floor same color of cloth as the record label, with records placed here and there, a framed picture of Lauder forming the background.

Mr. Probeck, of the G. J. Probeck Co., says the Columbia records are so popular that people are bound to have them. Their store was burglariously entered a few nights ago, and but for the interference of the watchman the thieves would have got away with a choice assortment of records.

A. W. Robertson, of the Probeck Co., said business was fairly good. "The Grafonola and the four-minute Columbia indestructible records," he said, "are the two articles that have attracted most attention during the past month. We made quite a few sales and inquiries have been numerous. The Columbia double disc and the regular two-minute indestructible records are still gaining in popularity, and we are adding many new names to an already long list of customers. Inquiries for grand opera records are numerous and we are making sales of large numbers, both of the Fonotipia and Symphony series. The general outlook is good and the new line of graphophones recently catalogued will be the means of attracting considerable business during the year."

W. H. Buescher & Sons have been busy night and day for the past ten days waiting on customers and at the same time remodeling their store. They have divided the floor space into three apartments. The first is the reception and display room, which has been fitted up with new mahogany encased shelving and practically doubling the record capacity. A new show window, new frescoing and gilding, makes it unusually attractive. The two rear demonstration rooms have been elaborately decorated, one of them in oriental style, with Turkish rugs, divans and easy chairs, the other plainer, in mahogany and whitewood finish, with furnishings to correspond, in either of which customers will be comfortably entertained. The company now handle Victor goods exclusively, and Mr. Buescher said business during January and up to date had been fine and was increasing from day to day.

Mr. Friedlander, of the Bailey Co., said the volume of their business in January was a large

increase over that of a year ago, and was keeping up in a very satisfactory manner. "Victrolas and the combination Edison machines with Cygnet horns," he said, "are popular and selling well. We are having a fine trade in Red Seal records, and the demand for the new Lauder records has been such that I have sent in two renewal orders already. We are also making sales of large numbers of the foreign Zonophone records, which are highly praised by purchasers." "We are having a fine trade," said Mr. Robbins, of B. L. Robbins & Co., "in both Victor and Edison machines and records, and business is good. If it keeps up the way it has started since the first of this month we will do a bigger business than we did in December."

Considering conditions, trade was reported exceedingly good in January by the Eclipse Musical Co. "Our business being an index to the retail trade," said Mr. Towell, "the talking machine dealers are doing very well. Quite a large number of machines have been sold during the month, and demand for records is above the average."

Miss Elsie M. Wicks, in charge of the talking machine department of Charles I. Davis, said she was pleased with the increasing trade since their opening, and that the past month's business, in both machines and records, had been fine. She said the demand for records was exceptionally good and daily increasing. Both the Victor and Edison goods are handled by Mr. Davis.

Melville J. Gideon, the successful composer of popular songs, recently engaged to write for Charles I. Davis, publisher, 416-418 Euclid avenue, occupies a suite of rooms on the fourth floor of the building.

Collister & Sayle report business seasonably active for Victor goods, in both the retail and wholesale departments. "There is not so much demand for machines," said Manager Dorn, "but our record trade is fine. The new Lauder records are in big demand. They are a decided improvement over the old ones, and at once appeal to customers, many of whom have the old and are buying the new ones. Prospects of a good year's business are very encouraging."

C. F. Foote, manager of the talking machine department of the Goodman Piano Co., is highly pleased with the substantial gain in trade. "We are meeting with good success in this department," he said. "During the past two months we sold a number of Victrolas and Amberolas, as well as many of the cheaper machines, and we are enjoying a splendid, growing record trade. I am pleased with present conditions and prospects."

Arthur L. Parsons, now in charge of the Victor and Edison Talking Machine Store in the Taylor Arcade, reports business fairly good and prospects flattering.

John Risling is doing a fine business in Columbia goods and his patronage, especially in foreign records, is increasing from month to month. The other talking machine stores are all doing an active business.

TRADE IN SOUTHERN CALIFORNIA.

Best Holiday Trade on Record and Business Keeps Up During January—Aviation Meet Helps Trade—Sherman, Clay & Co.'s Excellent Victor Business—Demand for Lauder Records Heavy—Southern California Music Co.'s Edison Trade Booming—Fine Talking Machine Department Arranged for in New Birkel Building—Columbia Grafonolas Very Popular—What the Other Jobbers and Dealers Are Selling.

(Special to The Talking Machine World.)
Los Angeles, Cal., Feb. 3, 1910.

The holiday trade throughout this section has been the best ever. Dealers everywhere were gratified. Pleasant weather, which Southern California is famous for, prevailed as usual, thereby helping conditions. The meet of world's aviators during the earlier part of this month served to attract many out-of-town customers to Los Angeles. Trade has seen an exceptionally busy January, although the latter part of the month is quiet. The local jobbers have been very successful in supplying their dealers during the heavy demand for goods.

Sherman, Clay & Co., Victor jobbers, are enjoying a splendid trade in Victrolas and Victors, the demand for lower-priced machines having been less compared with that of previous years. The appearance of Harry Lauder, "the great Scot," at a local theater has caused an exceptional demand for his records, until the entire list has been exhausted with the jobber as well as the retailer. The remade Lauder records are not as yet in stock, but promise to have a great sale when received. Chas. S. Ruggles, manager of the local house, is anxiously waiting the arrival of a carload of Victor machines, which will replenish their stock, which suffered much during the holiday buzz. Mr. Ruggles is the proud father of Chas. Ruggles, Jr., the young actor who has achieved much success at a local playhouse.

Andrew G. McCarthy, general manager of Sherman, Clay & Co.'s small goods and talking machine business, paid a short visit to Southern California, when he witnessed the flight of the man-birds and attended to affairs of business. His reports of trade conditions with which he has met are most pleasant.

The Southern California Music Co.'s holiday trade surpasses that of any previous year. The demand for Edison goods has greatly increased over the same period of a year ago. A shipment of the new Amberolas has been received and delivered to the dealers, although the number did not cover but a very small part of the advance orders. A larger shipment is due to arrive at an early date, when it is expected all orders can be filled. Harry Lauder records have been selling very rapidly as a result of his local appearance. Edison grand opera Amberol records, of which the first list appeared recently, have been having much success, as have the Amberol Mexican records. The Hawaiian records just received promise to hold a prominent place in the foreign catalog. C. H. Rundel has returned from a trip during which he visited several of the dealers in the country south of Los Angeles county. Very successful reports, together with many orders for Edison goods, are received from W. J. Reynard, who is now traveling through California.

The Geo. J. Birkel Music Co. have just announced their intention to erect a handsome new six-story home on Broadway, between Fourth and Fifth streets. Mr. Geissler, in speaking of the new building, says his company intend to make their talking machine department as complete as money and brains can. The fourth floor, a space 40 x 50 feet, will be devoted to the Victor and Edison sales department, and will comprise ten record salesrooms, one Victrola room, one moderate-priced machine salesroom, and a smaller room for lower-priced goods. An entirely new principle has been adopted in the way of soundproof glass partitions, which can be removed to allow space for the concert room, which is designed to seat 200 people and which will be used

for weekly Victor recitals, which have been a great success with the Birkel Co. for several years past. The size of the recital hall is to be 40 x 50. Many other new conveniences for handling trade are planned, such as a system of ventilation for demonstrating rooms. One of the most important features of the new store will be the Broadway show windows, which are to be the largest of any music house in the West, and will occupy a space 30 feet deep and 40 feet wide, making the front entrance 30 feet from the sidewalk.

The Angelus Talking Machine Co., exclusive Edison dealers, have just completed a series of improvements in the way of additions to their stock capacity and two soundproof demonstrating rooms, which are ventilated from the basement of the building. They are doing a splendid business with Amberolas and Cygnet horn Edisons.

The Columbia Phonograph Co. have been pressed with orders for the Grafonola Regent, of which they have received a first shipment. Many orders have been taken by local retail dealers, who are unable to supply the trade, and prospects of the success of the new table machine are very prominent. W. S. Gray, Pacific Coast manager for the Columbia Co., visited Southern California on business and pleasure, and had an opportunity to witness the aerial flights during his stay. He has met with success for the Grafonola in every direction.

The Fitzgerald Music Co. have seen a splendid holiday trade. Irving Andrews, manager of the talking machine department, says he has worked hard during the holiday trade in the talking machine line, but never as hard as during the season just closed. Miss Irene G. Johnstone, of Hamilton, Ontario, recently joined their department and is making some good sales in Victors.

The Wiley B. Allen Co. had a big demand for XVI. Victrolas, and are now adding more space for the record stock, which is to be enlarged.

The Smith Music Co., 407 West Seventh street, have added a talking machine department of several rooms.

San Diego is much in evidence with orders for talking machines and records. The Wiley B. Allen Co.'s branch, under the management of W. R. Carlton, has recently placed a large order for Edison Amberolas and Cygnet horn machines. Their stock embraces a full line of Edison, Victor and Columbia disc machines and records, and is under the care of Miss Roby and Miss Treadway.

The San Diego branch of the Southern California Music Co. have been completing alterations in their talking machine department, which is now in charge of Geo. H. Stapp. Business has increased considerably, especially with the Mexican trade, which employs the services of Sig. Luis M. Amador, who recently took charge of this branch of trade.

Geo. P. McKay, of Oceanside, Cal., is now in his new store, where he has much greater space. He has sent an attractive calendar, with an Edison ad., to his customers.

O. P. Swem, at Escondido, enjoys the distinction of selling one of the first Amberolas on the Coast, and has a number of prospective customers to whom he intends to sell similar instruments.

COLUMBIA CO. BRANCH TO MOVE.

(Special to The Talking Machine World.)
Wilmington, Del., Feb. 5, 1910.

The Columbia Phonograph Co., which have occupied the large quarters in the McVey Building at Eighth and Market streets since they began business here, will move to 610 Market street on or before March 25 next, having secured a lease on the latter property. The Columbia Co. have built up a large trade in Wilmington.

PHONOGRAPH AS FOSTER MOTHER.

How the phonograph acts as foster mother to a New York baby is told by the Sun. The baby is two years old and has acquired the habit of

going to sleep to the music of its real mother's voice. The real mother is somewhat past forty and her voice is not what it used to be. It broke recently and its lack of melody so grated on the sensitive musical temperament of the baby that the mother found it difficult to put her to sleep. About this time the father bought a phonograph with a disc containing a lullaby by one of the best singers in vaudeville. One evening while the mother was rocking the little one the father turned on the lullaby. The child went to sleep almost immediately. The next night the voice of the mother was silent and the baby went swiftly to sleep again to the music of the horn.

Alex. F. Brosche recently purchased Victor Welman's interest in the Ballard Music House, Seattle (Ballard Station), Wash., and expects to build up a nice business in talking machines, pianos and other musical instruments.

January Business of Very Satisfactory Volume Both in Records and Machines—A General Summary of Conditions in and About Chicago—Boosting Barnes in "Tips"—President Hall a Busy Man—Two New Travelers—Good Report from Talking Machine Co.—Some Recent Visitors—Live Lyon & Healy Publicity—A Number of Interesting and Attractive Window Displays—More or Less Personal—News of the Travelers—A. P. Griggs of Davenport a Victor Specialist—The Wurlitzer Recitals—Bissell-Cowan Co. Featuring First Edison Machine—Other News.

(Special to The Talking Machine World.)

Chicago, Ill., Feb. 9, 1910.

Relatively speaking, January brought with it a continuation of the satisfaction generated in the minds of the trade by a perusal of the figures for December. While, of course, the volume of business was not so large, trade did not show even as great a reaction from the holiday rush as has been known in some of the most piping periods in the history of the business. So far as the whole trade is concerned this is probably due to the fact that the trade, especially in the larger towns and cities, was better than many dealers expected. Consequently they were not overstocked and came into the market quite vigorously during January.

With the local retail stores and departments business is keeping up remarkably well. The peculiar thing about it is, that while there is an excellent record trade always to be expected in the periods subsequent to the holidays and created mainly by the enthusiastic recipients of Christmas gifts in the form of "talkers," the sale of machines is unusually good for this time of year.

While it cannot be said to have reached important proportions as yet there are, here and there, undoubted signs, if not of an awakening, at least of a stretching of the sinews of the "country" trade, which presages, it is hoped, an early cessation of the trance in which it has long been plunged.

It is true that the premium houses and the mail-order concerns handling no-name machines have done a pretty deadly work out in the tall-grass districts, nevertheless anyone who has taken any pains to personally investigate conditions in the sections of the country where the alfalfa roots go down sixteen feet to find water, where the winds sweep over the prairies, or turn summersaults in the mountain fastnesses, must be convinced that there are a host of fine opportunities for talking machine sales going to seed.

Go into almost any small town you can name and it is a question whether you will find more than one out of every ten homes in possession of a talking machine. But they need them, need them from an educational, aesthetic, religious and an entertainment point of view, and it's up to the talking machine dealer, either the now or the to-be, to bring the "peepul" to a realization of this need. One could talk to the extent of several pages of *The World* on this subject, but enough has been said to cause the man may not have given it due consideration to make some mighty valuable, if somewhat delayed, resolutions on this subject. To prove that the things here stated are facts it is only necessary to state that the talking machine manufacturers and jobbers freely admit their truth.

The Boostiferous Barnes.

And his boosting evidently boosts. He is not a generator of superheated atmosphere, but he is certainly energetic and is assuredly making good. Judging from the reports of some of his friends and business acquaintances you would think that there was not a large office in Chicago that Barnes had not equipped with Edison business phonographs. Careful investigation, however, reveals the fact that there are a few left.

Barnes knows this and the thought presses on his manly soul like a dozen or so millstones. The thing about Barnes is, that he will never rest until the lack is supplied. It is true, however, that he has stirred things up in the old town to the extent that *Tips*, a bright little publication, issued whenever the Edison Business Phonograph Co., of Orange, N. J., blame pleases, devotes the front page of a recent issue to Barnes and his resultful boosting. They cartoon him and they describe him. They tell of the service he gives every customer and they quote one of his circular letters. They pat him on the back seven ways for Sunday. Any man who didn't deserve it would speedily cultivate a head seventeen times too large for him, but Barnes is so busy making good he hasn't time to swell and that's no drom, droom, draumr, traum.

Documentary Evidence.

President F. D. Hall, of the B. & H. Fibre Mfg. Co., suffered quite a severe accident the other day while conducting some personal investigations of a buzz-saw in his factory. It really looked serious for awhile, but he came out all right and is again at his desk. The accumulation of correspondence acquiring his attention was so great that he did not have time to write an advertisement for *The World* this month, consequently he just shut his eyes, reached into a stack of letters, selected one at random and handed it over for use of his regular page. Read it. It's only one of many, but it sizes up the situation very thoroughly.

New Traveling Blood.

Wm. Beutelspacher, a bright youth, who has been for several years in the wholesale talking machine branch of the Chicago house of the Rudolph Wurlitzer Co., has been promoted to the road and is covering Missouri, Kansas, Oklahoma and Nebraska. They say he is doing well and is opening up some new accounts.

J. E. Meagher, a capable young man, who has been one of Manager Wiswell's assistants in the wholesale talking machine department of Lyon & Healy, has taken to the road, covering the State of Wisconsin, vice Mr. Voltz, who resigned to travel territory on the Pacific Coast with the National Phonograph Co.

Geissler on Trade.

The chronic state of happiness experienced by Arthur D. Geissler, general manager of the Talking Machine Co., for some time past is still chronic. The Talking Machine Co.'s auditors have just finished their reports which show that the half-year ending December 31, constituted the most profitable six-months in the history of the house. The actual comparative figures also amply substantiate the previous statement that December was the biggest similar month in the history of the house. January business was far ahead of the first month of last year. Among the visitors at the Talking Machine Co. the past few days were Joseph Pitts, Kenosha, Wis.; Mr. Smith, of Flint Music Co., Flint, Mich., and Arthur P. Griggs, Davenport, Ia. Mr. Christensen, Rhinelander, Wis.; W. J. Doherty, Up-to-Date Music Co., Sterling, Ill.; Roy Page, Brown, Page & Hillman Co., Peoria, Ill.

General Manager Lyle in Town.

George W. Lyle, general manager of the Columbia Phonograph Co., General, spent the first half of last week at the Chicago office, returning Wednesday evening to New York. C. F. Baer, manager of the Chicago office, says that the total business, wholesale and retail for January is 33 1-3 per cent. ahead of the corresponding month of last year.

It Got Results

One of the best stunts ever pulled off in the talking machine trade in Chicago goes to the credit of Lyon & Healy. The thing was so effective and so full of suggestion for dealers everywhere that we reproduce the initial announcement in full:

"A Word About Your Victor.—Do you realize that to get perfect reproduction from your records your machine should always be in perfect playing condition? The motor should run smoothly and steadily; the tapering arm tube shaft should swing freely at all times; most important of all, the sound box should be free from any imperfection, such as cracked mica (or diaphragm), looseness of needle arm, dead gaskets, and what not.

"We have known many owners of Victors who lost interest in their machine and put it aside temporarily just because it was not working properly (thereby rendering perfect reproduction of the records impossible), when a little adjustment would have remedied the evil and maintained interest and enthusiasm. Your Victor is a finely adjusted instrument, and therefore needs looking after frequently.

"Our Free Offer—for the next thirty days: We agree to adjust your machine (provided it was purchased of us) free of charge; i. e., we will overhaul and adjust it thoroughly. If it should be necessary to supply new parts, such as main spring, brake, leather, etc., a charge for them, of course, will be made. Otherwise, we will put your Victor in perfect playing condition free of cost to you.

"We enclose herewith a card, which fill out and drop in the nearest mail box, and we will send our repair expert to your home at the earliest possible moment. Yours very truly,

"LYON & HEALY."

On the return post card was a list of the best records of the current month Victor bulletin. The folder also contained some of Lyon & Healy's Red Seal and Victrola exploitation. This literature was sent to 5,800 people in Chicago, and nearly 2,000 took advantage of the offer to have their machine overhauled and adjusted free of charge. The aftermath can be easily imagined. At a comparatively small cost Lyon & Healy opened up a lot of record accounts which had become somnolent. Just for instance, one of the biggest merchants on State street was induced to pull out a machine which had been in the attic for a year. It was fixed up, restored to its former position in the music room of the merchant's beautiful residence and over \$100 worth of Red Seal records were purchased within a fortnight of the reinstallation.

Featuring the Victrola.

The Talking Machine Shop on Michigan avenue, whose destinies are presided over by George and Cecil Davidson, are featuring in their windows a Victrola of the Moorish Marquetry type, which is said to be the only one in Chicago. It was made in Morocco and is in marquetry work, composed of a number of rare woods inlaid with pearl and in Moorish design. The price is \$750. It is attracting a great deal of attention among the elite trade which daily surges to and fro along the boulevard.

Malecki's Display.

In the new warerooms of Louis B. Malecki & Co., to which they have added a talking machine department, a display of Victor and Edison machines and records are already attracting the attention of the trade in the vicinity. On the balcony in the rear of the store are two soundproof demonstrating rooms devoted to the Victor and Edison machines. They are attractively fitted up and contain all of the latest innovations of an up-to-date talking machine store.

Lauder Windows in Evidence.

Lauder window displays were very much in evidence at most of the 100 talking machine stores this week, and were extremely pertinent on account of the engagement of the Scotch comedian at the American Music Hall. Of course everybody was able to make a larger display, as all three of the companies have records

Our Prompt and Efficient Service can Save you a lot of Money

TIME IS GOLD IN BUSINESS

IF you get your goods quickly and as ordered you will make more profit. You can't afford uncertain, aggravating, irresponsible service—neither can you afford to *pass up profit* and *disappoint customers*.

The thing to do is to order your Victor Talking Machines and Edison Phonographs, with supplies and records for both from

Lyon & Healy

We stand alone as the distributors who will get every order out complete and in perfect condition on day of receipt.

Small orders are as welcome, and as carefully handled as the large ones.

Our liberal terms and prompt delivery methods are appreciated and enjoyed by thousands of retailers in all parts of the country. If you are not among them, it will pay you to get in touch with us. A postal card will bring you valuable information. Better still, let us have your next order, and convince yourself of our better facilities and abilities.

Lyon & Healy

CHICAGO

made by the famous Scotch dialectician. Among the notable window shows were those made by Wurlitzer, P. A. Starck Piano Co., Columbia Phonograph Co. and Lyon & Healy. Wurlitzer used the Victor ready-made material, but heightened the effect by using real Scotch thistles.

H. D. Bentley, manager of the talking machine department, is back on duty after a week's business.

Myram Blackman, in charge of the retail record department of Lyon & Healy, has been seriously ill at his home in this city for a month past, but is soon expected back at his accustomed duties, bringing with him his usual sang-froid and limpid polyglotous flow of language.

Fuhri in the South.

W. C. Fuhri, district manager of the Columbia Phonograph Co., and who, despite his name, is a man who exerts a positively soothing effect on all with whom he comes in contact, providing they are half-way decent, is on a trip among the southern branch houses and large city representatives of the company.

The Columbia Co.'s local branch sold lots of Constantino records last month as the result of the appearance of the famous tenor with the Boston Opera Company at the Auditorium. They had some effective window displays on the Constantino records. The Gypsy Smith records are having a big run, and those by McCormack, the famous tenor of the Metropolitan Grand Opera forces, are also selling excellently.

Wiswell Returns.

L. C. Wiswell, manager of the talking machine department of Lyon & Healy, attended the meeting of the executive committee of the National Talking Machine Jobbers' Association at Philadelphia, vice J. F. Bowers, who was unable to be present, and, of course, ran over to the Victor factory at Camden. He returned to Chicago this (Monday) morning.

Griggs in Optimistic Mood.

A. P. Griggs, the well-known piano and talking machine dealer of Davenport, Ia., was in the city last month. He sports a card on which appear the names of the pianos he handles, the list ending with Victor Victrolas. In graphic language he described his evolution as a Victrola specialist. He has long handled Victor goods, but it was some time before he awoke to the realization of the fact that it was possible for him to sell \$200 talking machines. Then one day the idea of the larger possibilities before him struck in a bunch. To think was to act, and he immediately got after a couple of wealthy citizens to whom he had recently sold regular model Victor machines. As a result he replaced them with Victrolas, and has ever since been an enthusiast regarding the concealed-horn proposition. He is selling any number of Victrolas in the prosperous Iowa city, and daily offers up

thanks for the hour in which he saw the larger vision.

The Salter Mfg. Co. are having a fine trade on their disc and cylinder record cabinets.

Wurlitzer Recitals.

The Rudolph Wurlitzer Co. gave a concert at the Birchwood Country Club one Saturday evening last month, at which appeared the following artists: William Beard, one of the best known baritones in the West; Miss Ida May Cameron, a soprano, the talented sister of L. Kean Cameron, manager of the retail talking machine department of the Chicago branch; Hans Schlessling, a cellist of far more than local reputation and city salesman for the company, and Leland L. Roberts, in charge of the retail player-piano department, who presided at the Solo-Apollo, for which the company are the local representatives.

Bissell-Cowan Publicity.

In the window of the Bissell-Cowan Piano Co. stands one of the first machines ever put out by Edison. The mandrel, big as a barrel, with its tinfoil record, is familiar to all of the old-timers in the trade. A card states the machine is interesting from a scientific viewpoint as marking the inception of the talking machine, and also directs the optics of the passer-by to the Victor Victrola as an illustration of the remarkable development made in a comparatively short time. The primeval Edison machine, by the way, was loaned by Peter Bacigalupi, the veteran dealer and jobber of San Francisco.

SEEBURG ELECTRIC PIANOS.

An Excellent Line for Talking Machine Dealers Desiring to Feature Instruments Akin to Their Own—Big Field of Activity.

(Special to The Talking Machine World.)

Chicago, Ill., Feb. 7, 1910.

Elsewhere in this issue will be found illustrations of two handsome new styles of electric pianos manufactured by the J. P. Seeburg Piano Co., of this city. The Seeburg instruments are notable among coin-controlled pianos for various reasons. They play from ten to twenty tunes without readjustment and can be played continuously for hours without burning out the motors. They are characterized by durability and accuracy of construction. The tracker-box is of cast iron and the tracker-board is of German silver. The motor is run by one small belt and the slack can be taken up by a sliding base operated by a thumb-screw. The music rolls and the mechanism are entirely concealed within the instrument, doing away with obstructive boxes in front or back. The piano proper, as well as the playing mechanism, is built with a special view to the great strain to which it is subjected in use. The makers state that repairs are seldom necessary and are made very easily when really needed.

The tone of the J. P. Seeburg electric pianos is unusually good and in exterior appearance they mark a new departure in the coin-controlled field.

Mr. Seeburg has grasped the fact that there are restaurants and restaurants, buffets and buffets, moving-picture shows and moving-picture shows, and that there is a demand among a certain class of trade for a more artistic instrument than has yet been provided. The new art style with its mission finish, electric lamps at either end of the keyboard and Tiffany art glass panels in which are depicted a "Lohengrin" scene, is bound to satisfy a desire which has long existed for an instrument calculated to get away from the associations too often suggested by a coin-controlled piano.

Mr. Seeburg is a man of long experience both in the selling and manufacture of electric pianos. He has a fund of information regarding the creation of sale and of the conducting of operating or selling campaigns which is freely at the service of talking machine dealers who wish to add a department to their business, not only full of profit possibilities, but which, run along lines which he can direct, will practically eliminate the assump-

tion of credit hazards on the part of the dealer while enabling him to give a requisite amount of time to his customers in which to pay their accounts.

DEATH OF JACK MCGREAL.

The Mascot of the Talking Machine Jobbers' Association Died on Feb. 1—Sympathy for Mr. and Mrs. McGreal.

(Special to The Talking Machine World.)

Milwaukee, Wis., Feb. 6, 1910.

Talking machine dealers all over Wisconsin are sympathizing with Lawrence McGreal, the well-known talking machine jobber of this city, in the death of his oldest son, Jack M. McGreal, who died February 1. Death was due to a severe attack of measles and a complication of diseases, although he had been ill but a few days. He was six years of age.

Probably no child in the United States was better known to the talking machine jobbers and

JACK MCGREAL, ENDEARED TO TALKING MACHINE TRADE.

dealers of the country than was little Jack McGreal. He was the mascot of the last two annual conventions of the National Talking Machine Jobbers' Association, held at Atlantic City, N. J., where his bright and winning manner made him the friend of everyone. Little Jack is survived by his parents and one sister, Gene Mercedes McGreal, aged two years, and one brother, Hugh Barry McGreal, aged four years.

The funeral was held on February 4 from the residence, 680 Hackett avenue, and interment was at Calvary Cemetery. Floral tributes were sent by dealers from all over the State and by talking machine officials in the East and at Chicago.

COLUMBIA WATCH CHARM.

Something new and novel from the Columbia Co. is a watch charm which will find large favor with Columbia dealers and purchasers. It consists of the famous twin musical notes in brass and black enamel with the words Columbia Records above. The selling price is 35 cents net to retail customers, dealers and jobbers alike.

BOTH MOTIONS DENIED.

Following the decision handed down by Judge Hough in the Circuit Court of the United States, New York City, on January 21, in favor of the Victor Talking Machine Co., Camden, N. J., as against the Regina Co., New York, and published on page 47 of this issue of The Talking Machine World, a motion to intervene was made by the American Graphophone Co., and another for a reargument by Knauth & Von Briesen, attorneys for the defendants. Both motions were subsequently denied by Judge Hough. The decision enforces the decree of the United States Supreme Court upholding the Berliner patent.

EVOLUTION OF A GREAT BUSINESS

Some Historical Facts Bearing Upon the Origin and Development of the Business of the Talking Machine Co., of Chicago—From a Modest Beginning a Splendid Business Has Been Created—Something of the Personalities Now Associated with This Institution.

(Special to The Talking Machine World.)
Chicago, Ill., Feb. 6, 1910.

Eighteen years ago two talking machine geniuses, Leon F. Douglass and Henry F. Babson, conceived the idea of commercializing talking machines. With the aid of Charles Dickinson, a wealthy seed merchant, the first concern was started under the name of The Chicago Talking Machine Co., and the original place of business was 98 Madison street.

Development from that first dingy place of

ROY J. KEITH, SALES MANAGER.

business to the enormous factories of to-day, a huge mail order business and the millionaires that have been made, reads more like a romance than the legitimate growth of a sound business.

Their first commercial effort consisted of handling electric phonographs which they termed the "fourteen-way hearing tube machines." These machines were placed around in arcades, the first arcade being installed at the World's Columbian Exposition. In fact, it was this arcade that first attracted the attention of Mr. Dickinson and paved the way for additional capital which was responsible for their development. Their next venture was the bringing out of a spring motor for a cylinder machine. This was the first spring motor in the country and was manufactured by The Chicago Talking Machine Co.

In 1895 the concern was moved to 107 Madison street, at which location it remained until 1907. There the name was changed to The Talking Machine Co. and another company started, which was fostered by Leon F. Douglass and called the Polyphone Co. This was an ingenious device, which, by means of two sound boxes tracking one another, each amplifying its own tone by means of a separate horn, gave double the volume. Here the business developed and prospered into a legitimate jobbing business. Experience gained by the owners of The Chicago Talking Machine Co. proved so valuable that they were shortly called to assist in the development of the Victor Talking Machine Co.'s factory.

From 1903 to 1906 Henry F. Babson's younger brothers, Frederick and Gus, managed The

ARTHUR D. GEISSLER, GENERAL MANAGER.

Talking Machine Co., and it was during this period that the seed of the mail order talking machine business was sown, which has developed into the enormous retail mail order business of Babson Brothers.

In 1906 Arthur D. Geissler took charge of The Talking Machine Co. Mr. Geissler's experience was gained with Sherman, Clay & Co., Victor distributors of the Pacific Coast. In the interim between his employment with Sherman, Clay & Co. and his taking up The Talking Machine Co. he was in the employ of the Victor Talking Machine Co. Mr. Geissler states that his first innovation with The Talking Machine Co. was the discontinuing absolutely of the retail business. This move was criticized heavily

E. R. SUES, TRAVELER.

at the time, as the mail order business itself ran into thousands of dollars monthly. However, the wisdom of this move has proven itself out, and The Talking Machine Co.'s gradually

increased prestige as exclusive wholesalers has been their reward.

In talking with the old stockholders of this concern they recite the difficulties in securing initial orders in early days. In fact, one concern, now among the largest in the country, purchased their original order from The Talking Machine Co. They say that this initial sale of two machines and fifty records was as hard to make then as starting a dealer nowadays.

An interesting photograph is the reproduction of a check given for the original purchase of Montgomery Ward & Co. This purchase was advertised all over the country at the time as a phenomenal order; in fact, the largest order ever given to any factory. Compare this with some of the orders now given by dealers to jobbers for two and three times that amount.

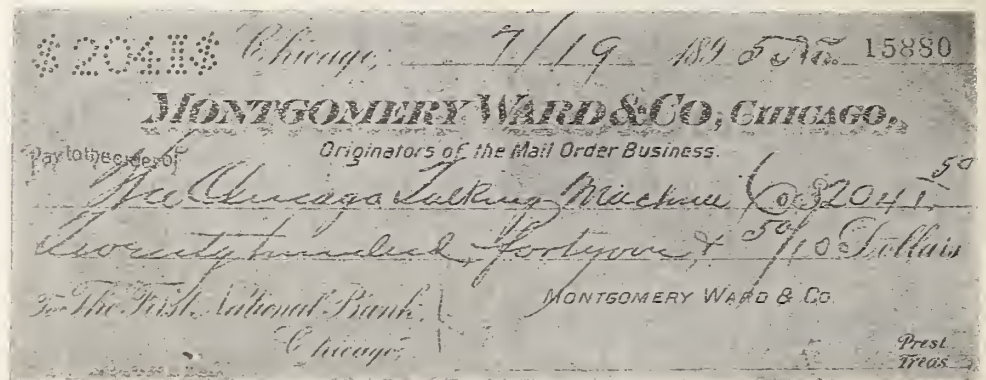

In 1907 The Talking Machine Co. moved to their present location at 72-74 Wabash avenue.

D. A. CREED, CREDIT DEPARTMENT.

Their organization to-day is the gradual development of eighteen years spent in a talking machine atmosphere. Their final evolution into exclusive Victor wholesalers has been the result of a careful study of trade conditions. It seems to be the opinion of the talking machine trade that this concern has reached the highest development of talking machine distributing. Their sales department, under the management of Roy J. Keith, is operated as much for the benefit of their customers as for the purpose of selling goods. Mr. Keith has two able salesmen in the persons of Edwin R. Sues and Harry S. Conover. The policy of these salesmen is first to develop business for their customers, then take the order. Through this policy The Talking Machine Co. sold the enormous number of 212 Victrolas during December. When you consider that every one of these Victrolas went to their dealers it is a remarkable record.

The credit department is under the direction

CHECK FOR ORIGINAL PURCHASE OF MONTGOMERY, WARD & CO.

of Daniel A. Creed. Mr. Creed's connection with the house has been an interesting one, he having started in the capacity of errand boy ten years ago. His rise has been a gradual one until now he probably passes on the credit of more talking machine dealers than any other credit man in the country. The repair department is a unique feature, employing three men continually, and under the direction of S. O. Wade. The trade

by showing an increase of 25 per cent. over January of 1909. He also says that the policy of The Talking Machine Co. will continue along

Delia Elizabeth Griswold, accompanied by the Cecilian player-piano. Then a trio of records from the light and grand operas were played on the Victor Victrola and greeted with much applause, while a couple of more vocal numbers and a selection on the Welte player-piano completed the entertainment. The recitals attract audiences sufficiently large to crowd the commodious hall on the eighth floor of the building on each occasion. Handsome programs are distributed at the recitals with a directory of the building on the back cover and the visitors are invited to inspect the various departments at their leisure.

COLUMBIA ARGENTINE RECORDS.

Wm. Freiburg, who is in South America as a representative of the Columbia Phonograph Co.'s recording laboratory, has informed the export department that he has completed a list of native Argentine records, which will be forwarded from Buenos Ayres to Bridgeport, Conn., for pressing up. They will be ready for the trade down there in about three months.

SUES ON THE PHILIPPS PATENT.

Monday the American Graphophone Co. filed a bill of complaint in the Circuit Court of the United States, Southern District of New York, against the Victor Talking Machine Co., Camden, N. J., on the Phillips patent, which concerns the construction of the concealed horn cabinet.

GIVE UP TALKER BUSINESS.

Miller Bros., who have handled talking machines, bicycles and sporting goods in Glens Falls, N. Y., for some time past, will sell out their store on Bay street and devote their entire attention in future to the automobile business, they being agents for several makes.

C. A. Burlingame is doing good work selling talking machines on the road for the Ft. Wayne Machine Co., 929 Calhoun street, Ft. Wayne, Ind.

HARRY S. CONOVER, TRAVELER.

will probably remember Mr. Wade as being connected with Wade Brothers' Repair Co. He is also the inventor of a fiber needle cutter. Mr. Wade is considered one of the most expert talking machine repair men of the country.

In talking with Mr. Geissler, he believes that 1910 will prove the biggest year of the talking machine industry. January has made a start

S. O. WADE, SUPERINTENDENT REPAIR DEPARTMENT.

the same lines, or that of helping the retail dealers, confining their attention entirely to the wholesale trade, and if doing circularizing, advertising and putting their shoulder to the wheel and helping out when necessary will do the work 1910 will at least be their biggest year.

SUCCESS OF 'FRISCO RECITALS.

Sherman, Clay & Co. Give One Each Week and Attract Large Audiences—Well-Balanced Programs the Rule.

(Special to The Talking Machine World.)

San Francisco, Cal., Feb. 5, 1910.

Sherman, Clay & Co. have met with flattering success with their series of recitals held every Saturday afternoon and at which the programs are so arranged as to bring in the various special instruments in their line. At the last recital, given on January 29, for instance, the program began with a march played upon the Estey pipe organ followed by two vocal selections by Miss

TRADE IN THE OUKER CITY.

Talking Machine Business in Excellent Shape and Prospects of the Rosiest—January Business Best on Record—Meeting of the Executive Committee of the National Association of Talking Machine Jobbers—Louis Buehn Member of Booming Party—What Local Houses Have to Report.

(Special to The Talking Machine World.)

Philadelphia, Pa., Feb. 7, 1910.

If every line of trade was as good in Philadelphia as is the talking machine business, and if every set of dealers in every line of business were in as good spirits as the talking machine dealers and were looking only to the most roseate prospects ahead, what a happy and contented business world this would be. There is no doubt but that the talking machine business in January was better than it has been in any January in any past year. The first week in February has been the biggest of any February in the past. And all this when many of the other lines of trade are crying dullness.

On Saturday of last week there was a special meeting held in Philadelphia of the executive committee of the National Association of Talking Machine Jobbers. This was an important meeting and good results are expected to come from it.

Louis Buehn & Bro. report that business conditions are very good, both wholesale and retail. Louis Buehn was the representative of the talking machine industry of this city who accompanied representatives from many other industries of this city on a tour of the State last week, gotten up for the purpose of booming Philadelphia. The party left this city in a special train, and visited almost every large city east of Pittsburgh. Frequent stops were made, and speeches were delivered extolling Philadelphia, its manufacturers, its industries of all kinds, and its advantages as a purchasing point. Mr. Buehn says that the party were everywhere received with much interest, and he believes that a great amount of good will come out of the trip. He had with him several specimens of the talking machines he handles, and he says that aside from the publicity point of view, they furnished much amusement to the crowd, and several concerts a day were called for.

Robert Dungan is at present representing the Buehn firm in the State, and is finding business very good. Edmund Buehn will go out to-day to cover points in Maryland. The firm are very much pleased with the new style Victor Firsts they have received, and they report that the trade is taking to them very well. The Victor Exchange goes into effect this week, in which the cut-out records are to be returned for up-to-date records. "The tendency of the buyer is to-day for the high-grade records, and this system of exchange," says Mr. Buehn, "will enable the dealers to give their customers only the very latest and best at no loss to themselves."

Among the prominent out-of-town talking machine dealers here this week were M. Z. Schubert, of Allentown; George R. Weikel, of North Wales, Pa., and Mr. Hoffman, of Birdsboro, Pa.

C. J. Heppe & Son report that in their talking machine department they are doing a very large business, larger than they ever did before. "In the month of December," says a representative of the department, "we did almost as much in one day as we did during the entire month of the year before. January of this year has been very fine, and it has been the largest month we have ever had in the wholesale business. Although we recently very much enlarged our department, already we find ourselves hampered, and we are looking around to see where we can make still more room. When Mr. Heppe was recently in Boston, D. D. O'Neill, of the talking machine department, accompanied him, for the purpose of examining into the question of soundproof rooms. They are getting ideas from all quarters, and expect eventually to be able to build something substantial along that line. C. E. Collins, who was formerly with the Victor Co., has just returned from a road trip for the Heppe House,

having been up the State, where he reports conditions generally to be most flourishing. Mr. O'Neill was in Baltimore the other day and opened up a talking machine department in the store of Silverstein & Co.

The new Harry Lauder records are going like hot cakes in Philadelphia. They are clear and almost perfect in enunciation. One of the dealers told me they were selling exceptionally well in the coal regions. He related this little story: He was showing a customer in one of the mining towns his instruments, when in came a miner on the way home from work. He put on one of the Lauder records, and the miner listened attentively, and remarked when it was finished, "By gad, that sounds like a fellow I used to work with in the mines in the old country. He used to be always a-singing and mimicking and talking that way." The talking machine man asked him what was the name of his friend, and he replied, "Harry Lauder." It is needless to say that he purchased a machine at once and a goodly number of the Lauder records.

The Penn Talking Machine Co. report that their January business was considerably ahead of any previous January, and they are looking for a tremendous business all through the spring. They look with very great favor on the Victor exchange proposition, and they believe it is one of the best things that could possibly come to the jobber to give him a chance to always keep up to date and keep in stock only the very latest improved records. They report that the new style Victor Firsts have caught on very well with their trade, and they believe they will do a splendid business with these instruments. E. J. H. Smullen and Ralph Clark, the firm's two road men, are both out at present and have been sending in some very good orders. Fred Kramer, of Allentown, and W. P. Swartz, of York, were both visitors at the Penn store last week.

The Columbia Phonograph Co. report that their business in January was very good indeed, and that it has been improving right along, both wholesale and retail. They have been having a big run on the Grafonolas, and an excellent demand for the Indestructible cylinder records. The Columbia Co. have been having a series of very attractive windows of late. There are no windows along Chestnut street that attract more attention, and it is rare that there are not a number of people on the outside. At present they have one of the most attractive windows of the year, a feature being a big signboard, one of the character you meet with at a railroad crossing, which is nicely lettered with the words, "Stop, Look and Listen."

Paul H. Cromelin, vice-president of the Columbia Co., stopped in Philadelphia on his way to Washington. B. Feinberg, the traveling representative of the wholesale department of the company, was in Philadelphia on Friday last. T. K. Henderson, the local manager, was away on a trip himself last week, visiting Reading, Allentown and other nearby points. He says he found everybody pretty cheerful and business very good. Mr. Henderson reports that they have had a big run on the 10 and 12-inch records. The McCormack records are selling unusually well at present, also the Bispham and Constantino records, as well as the records of the new singers who have come here for the first time this winter—Zenatello, Amato, etc., and the Bonci records are an especial favorite.

GETTING THE MAIL ORDER TRADE.

By Publishing His Own Bulletin Ohio Dealer Keeps Orders from Going to Other Cities.

D. M. Rodgers, who handles furniture, house-furnishings and Edison phonographs in Corning, Ohio, recently decided to combat the mail order houses by publishing a bulletin of his own and calling the attention of the public to the goods handled by him. The sheet is called Rodger's Bulletin and features various bargains each week. The first issue was the means of cornering several talking machine orders that otherwise would have gone to Chicago.

HARP RECORDS BY SRA. RITA VILLA.

Several Beautiful Numbers on the Mexican Record Lists of the National Phonograph Co.

There are several extremely beautiful harp selections in the Mexican record lists of the National Phonograph Co., by Sra. Rita Villa, one of the leading harpists of the world. Notable among them are "Czardas," appearing in the Mexican list for January, and "Bagatelle," in the February list. The former possesses a delightful swing and should prove a treat to all lovers

SRA. RITA VILLA.

of harp music, and the latter, of exquisite brilliancy, is a marvel of technic.

While still very young, hardly eighteen years of age, Sra. Villa received her professional degree in the Conservatory of Music of Milan, when her marvelous control over the instrument and intelligent and artistic interpretations immediately secured her unprecedented triumphs. She aroused real enthusiasm in the great capitals of Europe, and was awarded a gold medal at the Berlin Exposition in a musical concourse in which she took part. Later she was called to Mexico to fill the chair of harpist in the Mexican National Conservatory of Music, and in addition she now occupies the position of first harpist in the Concert Society of the Conservatory Orchestra in Mexico City.

JACOT MUSIC BOX CO. MOVE

To Commodious Quarters in the Irene Building, 25 West 35th Street—A Good Location.

The Jacot Music Box Co., Edison and Victor jobbers, removed last month from their Union Square location to their commodious new quarters in the Irene building, 25 West Thirty-fifth street, between Fifth and Sixth avenues. This location is an admirable one for their business, being in the heart of the new retail section of New York, and they possess one of the most attractively arranged establishments in the city.

QUOTES TALKING MACHINE WORLD.

In the Bulletin, issued semi-monthly by the American Association of Commerce and Trade, Berlin, Germany, in the January 1 number, is published the paper on the "New American Copyright Law: Application to Musical Copyright," written specially for the Talking Machine World by Paul H. Cromelin, vice-president of the Columbia Phonograph Co., general.

The foremen in the various departments of the American Graphophone Co. plant, Bridgeport, Conn., have formed an outing club with William E. Parker, president, and Norman Flather, secretary and treasurer, for the purpose of promoting sociability.

"COLUMBIA" DAY CELEBRATED.

The Occupancy of Kohler & Chase's Handsome New Building in San Francisco One of the Great Events in That City—Concerts Galore and One Entire Day Devoted to Exploiting the Columbia Grafonolas and Graphophones—A Great Establishment.

(Special to The Talking Machine World.)

San Francisco, Cal., Jan. 24, 1910.

When Kohler & Chase's new ten-story building, 26 28 O'Farrell street, near Market, was formally opened to the public on the first of the year it was anything but a stereotyped event. The celebration was continued for a week, ending on the 8th. During the entire time, which was liberally exploited by this famous Coast concern as a sort of "musical carnival," their building was decorated with bunting, flags and an electric display, with fireworks every night.

A committee was in charge of each one of the ten floors, and open house was the rule observed. Concerts were given every afternoon and evening in the recital hall on the second floor, which holds 450 people, and the most prominent artists in San Francisco volunteered their services and appeared, no little competition arising for the most desirable dates.

Throughout the week Kohler & Chase's advertising was extremely heavy, and liberal "write-ups" were contributed by all the daily newspapers. In fact, the opening of the new K. & C. establishment was regarded as the final step in the rehabilitation of the city's retail district. With this feeling in mind the mayor was present and took advantage of the occasion to congratulate the firm upon having the finest musical institution in western America.

In order to systematize their advertising campaign for the week the firm concentrated their entire efforts each day upon some individual theme. The first was a general reception, admission by invitation. The second was Founders' Day, when the display, etc., was so arranged as

to focus attention on the fact that the house of Kohler & Chase was established in 1850. Musicians' Day followed. Each of the succeeding days was devoted to one of their most prominent lines of goods, the leading ones being featured for lack of time to cover them all impartially.

KOHLER & CHASE'S NEW HOME.

As the goods of the Columbia Phonograph Co. formed so important a part of their lines, it was considered particularly fitting to have a Columbia Day, which they did. On Columbia Day, which occurred January 6, the entire building had the appearance of being an exclusive Columbia store. The line is stocked and displayed on

one complete floor, the fifth; and the display windows were filled with Columbia machines, records, etc., including every model of the Grafonola—"De Luxe," "Regent" and "Elite." A page ad. was also printed in the dailies exploiting Columbia goods exclusively. Besides, a special high-class musical program, from Columbia records, was rendered on the Grafonola Regent, which Kohler & Chase described as "the last word in talking machine construction," and it was a great success from every point of view.

Writing of the event at a subsequent date to the executive office in New York, W. S. Gray, Pacific Coast manager of the Columbia Co., said: "About the Kohler & Chase opening, there was always something going on in their music hall on the second floor, which, by the way, is one of the prettiest things of the kind I have ever seen. The building itself is really a magnificent structure, and they are most conveniently and nicely housed. There is not any music store in town with a better, nicer or more conveniently arranged building. Our department is on the fifth floor, and I have no doubt, as the town gets more and more settled downtown, we will have a good business there.

"On 'Columbia Day' we certainly had a splendid reception, having hundreds of people pass through the department; and at our concert the Recital Hall, which will hold about 450 people, was filled, and everyone seemed to enjoy it very much. Opening day, which was not set aside to any particular department, was certainly a grand success from every point of view, and particularly pleasurable to us. Thousands of people passed through the building for inspection during that day, and the elevator men tell us that more people got off at our floor than at any other (the building being a nine-story building). We had the place full all day and kept the Grafonola Regent going entertaining them with the best of music. This machine has certainly made a hit, and I think we can pretty near keep the factory busy supplying the demand."

VICTOR RECORD SENSATIONS.

"The Miserere" by Caruso and Alda and the Metropolitan Opera Chorus and "The Discovery of the North Pole" by Peary.

The Victor Talking Machine Co. recently announced two big record sensations, which went on sale February 10th—"The Miserere" from Il Trovatore, by Caruso and Mme. Alda, with the chorus of the Metropolitan Opera House (directed by Giulio Setti) and the Victor Orchestra, conducted by Walter B. Rogers. This is listed as record No. 89030 12 inch, to retail at \$4.00. The second record is "The Discovery of the North Pole," by Commander Robt. E. Peary, listed as record No. 70012 12 inch, price \$1.25. Special posters and supplements were shipped with these records. They will undoubtedly prove among the biggest sellers ever issued by the Victor Co. if dealers do their share in bringing them to the attention of their customers.

The commander's talk is delivered in his usual vigorous style, is remarkably clear and distinct, and extremely impressive. His modest nature asserts itself in this record, for not once in the course of his four-minute talk has he used the word "I". The famous explorer was astonished at the great strides made in the talking machine industry during the last two years he had been in the Arctic regions, and he was so greatly impressed with the absolute perfection of the Victor and with the fact that it afforded him an unequalled opportunity to tell to the world the story of the discovery of the North Pole that he not only made a record telling of his thrilling journey, but gave the Victor the exclusive right to issue them.

The Columbia Phonograph Co., General, have notified the trade by special circular letter that the new attachment for two and four minute indestructible cylinder records was ready, and that shipments would commence immediately.

SUSTAIN BERLINER PATENT AGAIN.

In Suit of Victor Co. Against Regina Co. In Connection with the Alleged Infringement of the Concealed Horn Cabinet—Case Pending for a Year—Decision to be Appealed—Judge Hough's Opinion in Full.

A very important decision was handed down Friday, January 21, by Judge Hough, Circuit Court of the United States, New York City, in which the Berliner patent is again sustained in connection with the alleged infringement of the device on the so-called concealed horn cabinet. The case is that of the Victor Talking Machine Co., Camden, N. J., against the Regina Co., New York, and has been before the courts for a year. The opinion follows:

"On complainants' motion for a preliminary injunction and defendant's cross motion to dismiss the bill. *Memorandum.*—Some points are assumed by me as requiring no more than mention, viz.: The Berliner patent has now for about a year been so thoroughly established by decisions so numerous and of such authority that whenever the owners of that patent ask for a preliminary injunction against an admitted or proven infringer the compulsion upon the courts to grant such injunction is of the strongest; this case has been pending for more than a year, and although no evidence has been taken therein that fact has worked no injury to the defendant because it is entirely plain that complainants' *prima facie* proof would be of the most formal nature and the delay in taking such formal proof has been largely if not entirely due to the defendant itself; the article produced and sold by defendant has been so produced and sold from a period long anterior to the beginning of this suit, and it is admittedly a palpable infringement of the Berliner patent insofar as infringement consists in identity of construction, function and method of operation between the defendant's goods and complainants' goods.

"There are several reasons, however, advanced by defendant why a preliminary injunction should not issue: First, Laches; Second, The form of the bill is not appropriate to the relief sought, and Third, The defendant is entitled to the rights of a licensee under the Berliner patent. Upon a review of the papers submitted I do not think that defendant is in a position to urge laches. If by laches is meant delay, such delay must be injurious to defendant, or make complainants' claim stale. Neither proposition is true in this case.

"Undoubtedly this bill was originally brought with the prime object of preventing defendant from selling at what were alleged to be unlawful prices, sound records manufactured by complainants' and sold to defendant. Undoubtedly also by agreement that difficulty between the parties has been removed so that the major portion of the bill (so far as the claim now advanced is concerned) is simply surplusage. But that is not enough to render it impossible to proceed with the action if the bill responds to the test contained in this inquiry, viz.: Does the stating part of the bill

show such facts as would be admitted by the answer of defendant or established by proof entitle complainants to a decree granting them the relief now sought (temporarily) by way of injunction?

"I think it does. The existence of the Berliner patent, the title of complainants, the decrees of courts establishing it, and the acts of the defendant in infringing Claim 5 and 35, are all set forth; and it is specifically declared that defendant is 'employing methods covered by the said Letters-patent, or in all substantial respects the same, the exclusive right to make, use and vend which to others to use is legally vested in' complainants.

"The second prayer of the bill is entirely applicable to the matter now before the court. From the papers submitted, as explained in argument, the real relation of these parties seems to me quite clear. It is admitted by complainant that the American Graphophone Co. is a licensee under the Berliner patent for some purposes. It is admitted also that defendant has purchased from that company 'tone-arms,' which arms, when used in conjunction with disc records, constitute the very essence of Berliner's patent as covered by claims 5 and 35 thereof.

"For reasons not dwelt upon in the affidavits, but stated in argument, complainants do not desire to state the details of their license agreement with the American Graphophone Co., and for reasons, neither explained in the affidavits nor referred to at the hearing, the American Graphophone Co., although standing behind this litigation and giving to defendant an indemnity against the consequences thereof has either not imparted the terms of the said license agreement to the defendant; or, if such knowledge has been given, defendant does not choose to divulge the same.

"It may at some time become a vital question in this case whether, if the American Graphophone Co. has lawful right to sell these tone-arms, such right confers any authority on defendant to manufacture and sell a complete machine absolutely embodying Berliner's invention. But that question is not presented on this motion, for unless the defendant can claim the rights of a licensee in respect of the tone-arms, it is an infringer without any reference to the wider question last above stated.

"Therefore this motion, in my judgment, depends upon the bare question of law: Upon whom is the burden of proof to produce and prove the terms of a license when a complainant avers and shows a defendant to be an infringer, unless such defendant be excused or justified by the operation of the license which is withheld from the court. Viewed as matter of strict law, I am not given authority, and know of none, which makes this an exception to the usual rule that when one who is *prima facie* in the wrong pleads justification, the burden is upon him to prove his plea. The plea of license is really the old plea of confession and avoidance, and there it is undoubtedly the duty of him who pleads the avoidance to prove it.

"It may be said (I think justly) that this legal rule should not be rigidly adhered to in aid of application for a preliminary injunction the granting of which always rests in judicial discretion. But in this case it is to me quite clear that the real defendant is the American Graphophone Co., and they know just as much about this license as do the complainants, and therefore I see no hardship in compelling the defendant to make good his plea of confession and avoidance if he would profit therefrom.

"Upon the giving of a proper bond the injunction may issue as prayed for in the moving papers; though if defendant elects to disuse the tone-arms purchased from the American Graphophone Co., and abandon the construction of the machine which (except as justified by the license in suit) is an infringement of complainants' patent; and a reasonable period will be allowed (upon the settlement of the order) within which it may dispose of its stock on hand."

The case will be appealed.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Special to The Talking Machine World.)
Washington, D. C., Jan. 10, 1910.

ATTACHMENT FOR PHONOGRAPHS. Harry A. Smith, Columbus, O. Patent No. 941,546.

This invention relates to phonographs, the object of the invention being to provide mechanism whereby a plurality of records may be advanced to and moved away from the playing or reproducing position and successfully operated in connection with the reproducer, the mechanism being entirely automatic and motion being imparted to the various elements of the mechanism

from a single source of power which, in the preferred embodiment of the invention, consists of a spring motor contained within the housing or casing of the apparatus and forming a part of the mechanism as a whole, the power generated by such motor being utilized to intermit-

tently advance the records to and from the reproducing position, and also to clutch and release the records successively and also to actuate the reproducer back and forth during its operative or outgoing movement and its return or inactive movement.

In the accompanying drawings Fig. 1 is a vertical longitudinal section taken through the casing of the machine, showing the record-moving mechanism in elevation, the view being taken looking toward the ends of the cylindrical records. Fig. 2 is a vertical section taken at right angles to Fig. 1. Fig. 3 is a plan view of the record reproducing portion of the apparatus.

SOUND-BOX FOR SOUND RECORDING AND REPRODUCING MACHINES. John C. English, Camden, N. J., assignor to Victor Talking Machine Co., same place. Patent No. 940,794.

This invention relates to improvements in sound-boxes for sound recording and reproducing machines, and some of the objects of the invention are to provide a simple, durable and inexpensive mounting for a stylus bar; to provide an improved mounting for a stylus bar, which may be easily assembled or taken apart; to provide an improved mounting for a stylus bar, in which a tension will be applied to the bar to restrain the oscillation of the bar, and to provide other improvements.

In the drawings Fig. 1 is an elevational view, partly in section, showing the stylus bar mounted upon the sound-box casing in accordance with the invention; Fig. 2 is a bottom plan view of the same, part of the stylus bar being removed to show the mounting for the stylus bar; Fig. 3 is a vertical longitudinal section on the line 3-3 of Fig. 2; Fig. 4 is a vertical longitudinal section on the line 4-4 of Fig. 2; Fig. 5 is a corresponding section on the line 5-5 of Fig. 2, and Fig. 6 is a perspective view of the support upon which the stylus bar is mounted.

SOUND-BOX FOR SOUND RECORDING AND REPRODUCING MACHINE. John C. English, Camden, N. J., assignor to Victor Talking Machine Co., same place. Patent No. 940,796.

This invention relates to improvements in sound-boxes, and the objects are to provide a simple and durable mounting for a stylus bar by which the bar will be held yielding in place to oscillate without restraint upon a fixed axis and to provide other improvements.

In the drawings Fig. 1 is an elevational view, partly in section, showing the stylus bar mounted upon the sound-box casing in accordance with the invention; Fig. 2 is a bottom plan view of the same, part of the stylus bar being removed to show the mounting for the stylus bar; Fig. 3 is a vertical longitudinal section on the line 3-3 of Fig. 2; Fig. 4 is a vertical longitudinal section on the line 4-4 of Fig. 2; Fig. 5 is a corresponding section on the line 5-5 of Fig. 2, and Fig. 6 is a perspective view of the support upon which the stylus bar is mounted.

PROCESS FOR RECORDING SOUND. George K. Cheney, New York, assignor by mesne assignments to Victor Talking Machine Co., Camden, N. J. Patent No. 941,010.

The main object of this invention is to provide an improved process for producing a true sound record from which may be obtained a faithful reproduction of sound.

Heretofore it has been common in the art to make a sinuous line, representing sound waves on photographic material or in a film upon the surface of a metal plate and then by chemical action to form a corresponding line in a tablet, and the method has also been practiced of cutting or engraving such a line in a tablet of suitable nature. All of these methods are considered by me to be objectionable, however, to a more or less extent, in that it has been suggested that the final record grooves are liable to have rough places and irregularities which may result from the methods of their formation.

In the chemical process of forming records the action of the reagent is uneven on account of local differences in the structure of the record blank, upon which it acts, and therefore the surfaces of the grooves formed thereby are not true and are cellular or pitted, which results in an unpleasant scratching sound during the reproduction of the record.

In the engraving method the record blank is usually formed of a more or less waxy and tenacious material, which, when not made homogeneous, is liable to cause the engraving tool, which removes, in the form of chips or shavings, a portion of the record blank to form the record groove, to leave the record groove with surfaces more or less uneven, because the harder particles of the tablet material may be torn or dragged from their positions instead of being cut cleanly through by the edges of the tool.

The aim of this invention is to dispense with any chemical action and any cutting, scraping or gouging action of the recording tool itself, substituting therefor a pressing or ironing action of the tool.

One form of apparatus for carrying out the improved method is illustrated in the accompanying sheet of drawings in which Fig. 1 is a side elevation partially in section of the recording apparatus shown in its relation to the recording tablet; Fig. 2, an enlarged front view of the recording tool point; Fig. 3, a similar enlarged view showing the recording tool in operative position and the shape of the groove formed thereby in the record tablet; Fig. 4, an enlarged front view of the paring knife in action removing the raised edges of the groove, and Fig. 5 is an enlarged cross-section showing the completed groove.

APPARATUS FOR RECORDING SOUND. George K. Cheney, New York, assignor by mesne assignments to Victor Talking Machine Co., Camden, N. J. Patent No. 941,011.

This invention relates in general to the recording of vocal and other sounds and more specifically consists of an improved apparatus for producing an exact record of sharp, clean outline, in a suitable tablet from which the sound may be reproduced, said record being in the shape of a sinuous line of even depth.

Fig. 1 is a perspective view of a record-making apparatus. Fig. 2 is a side elevation and partial section of the recording apparatus shown in its relation to the recording tablet. Fig. 3 is a detail sectional view on line 3-3 of Fig. 2; Fig. 4 is an enlarged detail front view of the recording tool point; Fig. 5 is a similar enlarged detail showing said tool in operation and the shape of the furrow formed thereby in the record tablet; Fig. 6 is an enlarged detail view of the paring knife in action removing the raised edges of the furrow, and Fig. 7 is an enlarged detail cross-section showing the completed groove.

APPARATUS FOR MAKING SOUND RECORDS FOR TALKING MACHINES. Charles S. Wickes, Camden, N. J., assignor to Victor Talking Machine Co., same place. Patent No. 941,291.

This invention relates to sound records for

talking machines, and especially to the manufacture of double-faced records and to the apparatus for pressing the same from a mass of plastic material.

The objects of the invention are to provide means for pressing double-faced records of such construction that a true and faithful record of the character above referred to may be easily and rapidly made; to make a mold which will simultaneously press sound records into both sides of the finished record and at the same time impress labels into both sides of the records; to provide a device in which the record formed therein will have its greatest diameter in a plane between its faces in order to reduce the liability of the record becoming chipped or otherwise mutilated in the later finishing or handling of the same; to unite the labels to the record in such a manner as to form no seam or mark on the record other than those which are desired; to make the various parts of the device replaceable, adjustable and of simple construction; to make a pressing mold which can be readily adapted to different kinds of presses now in use; to facilitate the removal of the finished record from the pressing device and to secure or fasten to the mold or pressing plate the matrices from which the sound records are pressed in the mold, and to provide other improvements.

In the drawings forming a part of this application, in which the same part is designated by the same reference character throughout the several views, Fig. 1 is a plan view of the lower half of the pressing mold; Fig. 2 is a sectional view showing the disposition and relation of the parts; Fig. 3 is a view similar to Fig. 2, with the record in position as pressed between the parts of the mold and showing a modified manner of securing the matrix to the mold; Fig. 4 is a sectional view of the finished record; Fig. 5 is a detailed perspective view of one form of upper plate for depressing the label into the record; Fig. 6 is a similar view of the lower plate for depressing the label on the other side of the record; Fig. 7 is a detailed view showing the upper plate shown in Fig. 5 in position in the mold with the matrix clamped to the pressing plate; Fig. 8 is an enlarged view of a portion of

part of the structure illustrated in Fig. 9.

SOUND-REPRODUCING MACHINE. Franklin C. Goodale, Tacoma, Wash. Patent No. 944,608.

This invention relates to sound-reproducing machines, and especially to those adapted to use a flexible ribbon on which the record has been made, and has for its object to provide a device whereby the intensity of the sound may be varied at will without changing the speed of operation or the form or size of the horn.

Fig. 1 is a vertical section of the reproducing mechanism; Fig. 2 is a front view thereof showing the device for shifting the reproducer from

one set of records to another parallel set; Figs. 3 and 4 are front views of the sound amplifier in its closed and opened positions, respectively; Fig. 5 is a vertical section thereof on the line a-b in Fig. 3; Fig. 6 is a side view of the ma-

chine with one of its standards removed in order to show the mechanism; Fig. 7 is a rear view of the machine, and Fig. 8 is a view of the dial of the device for controlling the sound amplifier.

SOUND-RECORD COMPOSITION. Jonas W. Alys-worth, East Orange, N. J., assignor to New Jersey Patent Co., West Orange, N. J. Patent No. 944,474.

The present invention is designed as an improvement on a new record composition, patented May 4, 1909, in which asphalt is admixed with a metallic sterrate, such as sterrate of lead, and preferably also with a resin gum, such as copal gum, resulting in an excessively hard, tough and durable material.

HORN. Adolph G. Soistmann, Philadelphia, Pa. Patent No. 944,516.

This invention especially relates to horns used for talking machines, and comprises inner and outer reinforcing tapered sleeves and means for securing or locking said sleeves as hereinafter claimed.

Referring to the drawings, Fig. 1 is an elevation of the horn containing the improved reinforcing sleeve;

Fig. 2 is a longitudinal section of the small end of the horn on an enlarged scale; Fig. 3 is a section of the inner sleeve member; and Fig. 4 is a section of the outer sleeve member.

This invention is especially adapted for horns constructed of wood, fiber or similar material, but need not necessarily be confined to horns of that construction.

COMBINED STAND AND HORN FOR TALKING MACHINES. Henry C. Miller, Waterford, N. Y., assignor by mesne assignments to Victor Talking Machine Co., Camden, N. J. Patent No. 13,044.

This invention relates to improvements in a combined stand and horn for a talking machine. Talking machines now in use employ a horn extending out from the sound-box, which is large, unsightly and frequently takes up so much room that is in the way. It has been found that it is not essential to extend the horn from the machine, and the inventor has therefore constructed a cabinet in which the talking machine is placed and utilizes the interior of the cabinet to accommodate a horn and a deflector to distribute the sound. The object of combining these two elements is to economize space and at the same time provide means for utilizing a large horn without projecting it out from the talking machine, as practiced with machines of this type now in use.

A further object of this invention is to provide a stationary horn in a cabinet with an ad-

justable exit that the sound may be directed to an audience at any angle.

In the drawings Fig. 1 is a sectional view of the preferred form of the invention. Fig. 2 is a top view with the cover removed. Fig. 3 is a

detail transverse vertical section of the means employed for supporting the pipe leading from the talking machine to the horn and the connection between the pipe and the horn. Fig. 4 is a vertical sectional view of a modified form of the

invention. Fig. 5 is a plan view of the same. Fig. 6 is a vertical section of a different modification. Fig. 7 is a similar view of a further modification. Fig. 8 is a plan view of the modification shown in Fig. 7.

SOUND-AMPLIFIER. Nathaniel Baldwin, Midway, Utah. Patent No. 946,096.

This invention relates to sound amplifiers of that general type illustrated in Letters-Patent of the United States granted on October 29, 1907, No. 869,288.

The principal object of the present invention is to improve and simplify the operation of the device and to provide for the more delicate balancing of the controlling valves, so that they may be made more quickly responsive to the vibrations of the diaphragm, armature, or other device to which they are connected.

A further object of the invention is to provide improved means for connecting the diaphragm or other vibrating body to the valve rod for the purpose of securing increased force in the operation of the valve and further to permit of greater delicacy of adjustment.

A still further object of the invention is to arrange the opposing valves which are subjected to the pressure of air, steam, or other actuating fluid, so that one shall present a greater surface area than the other and the pressure operating on the excess area will tend to move both valves to open position, and, further, to provide for counter-balancing of this extra pressure by connecting with the operating device, so that the elasticity of the diaphragm, magnetic force operating through an armature, or the energy of a spring or weight, may be utilized in part as a valve closing means.

In the accompanying drawings, Figure 1 is a sectional elevation of a sound amplifier constructed in accordance with the invention, the instrument here shown being one which is used in

speaking or singing when the instrument can be placed close to the mouth. Fig. 1 is a detail view. Fig. 2 is a plan view of one of the valve seats drawn to an enlarged scale. Fig. 3 is a similar view of one of the valves. Fig. 4 is a cross sectional view of a valve and its seat on an enlarged scale.

Fig. 5 illustrates a modified construction of seat, and Fig. 6 a modified construction of valve that may be employed. Fig. 7 is a sectional elevation illustrating a slightly modified construction that is adapted more especially for use as a secondary instrument and may be used to control the flow of a stream of steam to the amplifying horn. Fig. 8 illustrates a construction in which only a single valve is employed, the valve being so arranged that the fluid under pressure tends to open it while its force is counter-balanced by a mechanical means.

Fig. 9 is a sectional elevation illustrating a structure that may be employed in connection with a sound reproducing machine of the cylinder record type. Fig. 10 is an elevation showing the arrangement followed when adapting the device for use in connection with a machine of the disc record type. Fig. 11 illustrates a valve operating mechanism in the form of an armature located between the pole pieces of a telephone receiver. Fig. 12 illustrates a further construction in which the valve rod carries a series of armatures connected in tandem. Fig. 13 illustrates a further modification of the electro-magnetically operated valve rod.

Fig. 14 is a sectional elevation illustrating the use of the device in connection with a musical instrument having a sounding board, the sound waves being mechanically transmitted through the valves for the purpose of controlling the flow of the stream of fluid to the amplifying horn. Fig. 15 is a sectional elevation showing the manner in which the device may be connected to a wind instrument, where the sounding column of air operates on a diaphragm that transmits movement to the valve rod.

CABINET FOR SOUND-REPRODUCING MACHINES. Arthur E. Madison, Santa Barbara, Cal. Patent No. 946,243.

This invention has reference to a cabinet for sound reproducing machines, and particularly contemplates the provision of a collapsible or foldable horn or sound amplifier, which forms a part of the cabinet.

One of the objects of this invention is to provide a cabinet for sound reproducing machines with a self-contained sound horn, which, forming a unit with the cabinet, is capable of being concealed from view, thus rendering the cabinet conveniently portable, eliminating the necessity

of a separate horn, and removing all liability of injury to the horn.

Another object of this invention is to provide a cabinet for sound reproducing machines having a self-contained horn, which may be opened to its fullest extent or only to a limited extent, whereby to obtain a modulation of the sounds emitted during the reproduction of a record.

In the drawings, Fig. 1 is a perspective view, showing the invention as applied. Fig. 2 is a perspective view showing the lids and the lateral door in open position. Fig. 3 is a perspective view showing the invention as applied to a cabinet, the horn being shown in open position. Fig. 4 is a perspective view showing a cabinet with lids closed. Fig. 5 is a side elevation showing the sound reproducing box, the two lids in open position, and the interposed collapsible horn. Fig. 6 is a front elevation, showing the open position of the lids, and the open position of the lateral door, by means of which the records and needles may be changed. Fig. 7 is a sectional elevation, showing the lid and the horn attached thereto only partly open, the cabinet or motor-containing box being shown in fragmentary view.

Fig. 8 is a sectional view, showing the interposed foldable horn in closed position.

VALVE FOR THE SOUND-BOXES OF TALKING MACHINES. Chas. K. Simpson, Honolulu, Hawaii, assignor of one-eighth to A. P. McDonald, Patent No. 946,524.

This invention contemplates changes in the construction and action of the valve whereby much louder and more perfect tones are produced with the expenditure of less air. The principal changes of construction are: In the spring clamp, which flexibly secures the valve to the seat; in the shape of the guiding pin in the seat, against which the end of the valve rests, the pin being tapered and the edge of the valve correspondingly beveled; and in the bars of the gridiron valve, one edge of each bar being beveled. The action of the valve is thereby changed.

In the drawings, Figure 1 is a plan view of an improved gridiron valve. Fig. 2 represents a plan view of its valve seat. Fig. 3 represents a section on the line A-B of Fig. 2. Fig. 4 is a detail of the cushion and its adjusting screw. Fig. 5 is a sectional view of modification. Fig. 6 is an elevation of the spring clamp. Fig. 7 is a diagram illustrating the passing of the air jets through an ordinary gridiron valve. Fig. 8 is a diagram illustrating the same through an improved valve.

MANUFACTURE OF CYLINDRICAL PHONOGRAPH RECORD-BLANKS. Varian M. Harris, Chicago, Ill., assignor by Mesne assignments to the Cleveland

Phonograph Record Co., Cleveland, O. Patent No. 13,067.

This invention relates to means for forming cylindrical phonograph record-blanks from sheets of celluloid and has for its object to provide a simple and efficient structural arrangement and combination of parts whereby the sheet of material bent into cylindrical form is securely held and united by a longitudinally extending cemented seam to form a cylindrical blank equal in all respects to the drawn tubes or cylinders heretofore used in the manufacture of phonograph records.

In the accompanying drawings:—Figure 1 is a longitudinal sectional elevation, on line x-x, Fig. 3, of an apparatus embodying the present invention, and showing the parts in the position in which the carriage has completed an active stroke. Fig. 2 is a similar view, showing the parts in the position for the commencement of an active stroke. Fig. 3 is an enlarged end elevation.

MOUNTING FOR SOUND-BOXES. George L. Coleman, Camden, N. J., assignor to the Victor Talking Machine Co., same place. Patent No. 946,014.

This invention relates to certain improvements in sound recording and reproducing devices, and more particularly to that part of the same known as sound-boxes. The object is to provide a means for mounting a diaphragm in the sound-boxes in such a manner that the volume is greater and quality of the tone is much clearer and more distinct and natural than heretofore rendered.

With this object in view, the invention consists in providing a simple and efficient means for securing the diaphragm in the sound box, whereby the vibratory action of the diaphragm is rendered more efficient and the diaphragm more sensitive to the action of the sound waves and movement of the stylus bar.

In the drawing, Fig. 1 is a transverse section of the sound-box, showing the needle and part of the stylus bar in elevation; Fig. 2 is an enlarged fragmentary portion of Fig. 1; Fig. 3 is an elevation of one of the gasket rings.

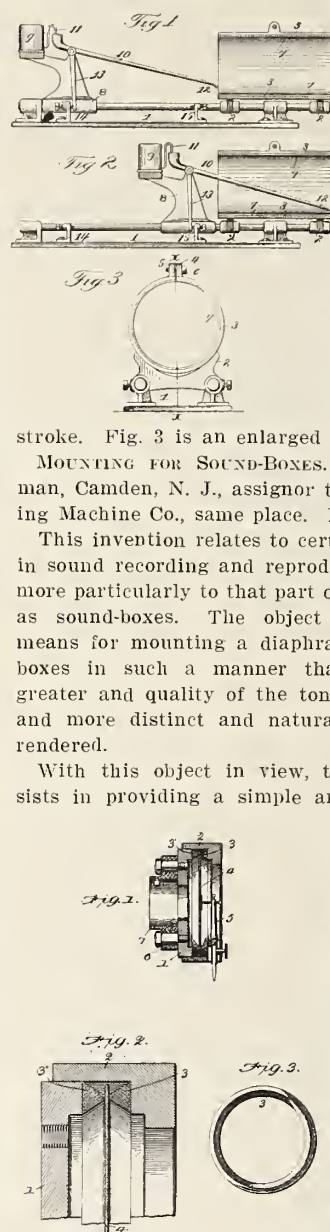

COLUMBIA CO. OF NORFOLK, VA.

The Columbia Co., Norfolk, Va., have incorporated with capital stock of \$5,000 to \$15,000, for the purpose of dealing in talking machines. The officers are: C. P. Frick, president; B. Peating, vice-president, and H. O. Gosornect, secretary.

EDISON DEALERS TO MOVE.

Cummings, Shepherd & Co., who handle Edison phonographs and records in Fort Worth, Tex., will shortly move from their present location at Sixth and Houston streets to larger quarters at 310 Main street, that city.

C. P. Chew is a recent appointee to represent the Victor Talking Machine Co., Camden, N. J., in New York City. He makes his headquarters at the Hotel Albert. Mr. Chew is new to the trade.

SELLING DATE OF "HITS."

Sales Manager Dolbeer, of the National Phonograph Co., Sends Out Some Important Data That Will Interest the Trade Regarding Getting Special Records of Hits Before the Public at an Early Date.

Relative to advancing the selling date on certain special records, particularly "hits," F. K. Dolbeer, sales manager of the National Phonograph Co., Orange, N. J., sent out the appended letter on February 3:

"For some time past we have been formulating plans whereby we could more promptly place in the hands of our trade records covering selections which may have proven 'hits,' or which we have reason to believe will become especially popular—the demands for which will be the greatest, of course, while the selections are being kept prominently before the public by being head-lined in theatrical publications, as well as being in the repertoire of the vaudeville and musical comedy artists. It is not our purpose to offer such records each month, but at such times only as conditions appear to make it advisable.

"The innovation as outlined will permit of the selling date being advanced 30 days, that is, from time to time as such selections appear (the masters for which have already been made with a view of listing the records two or three months hence), we will advance the selling date one month, making shipment of these records with the previous month's issue. To insure of your receiving such records as soon as placed upon the market, it will be necessary for you to enter a standing order with your jobber, and in placing same you should give your jobber specific instructions, as to whether or not a second shipment is to be made when these records appear as a part of the next monthly list.

"Owing to the popularity of the three following selections (the master for which have already been made with a view to listing them in the May supplement), we shall advance the selling date in Canada to 8 a. m. on March 24, and

in the United States to 8 a. m. on March 25, and if you will immediately place an order with your jobber, you will receive these records with your shipment of April records, which go on sale on the dates mentioned.

"These three records will not increase the number of the May list, which will total forty selections, consisting of fifteen two-minute, twenty four-minute and five four-minute grand opera. The three selections referred to are: Standard (two-minute), No. 10,362, "By the Light of the Silvery Moon" (Ada Jones), orchestra accompaniment; Amberol (four-minute), No. 421, "By the Light of the Silvery Moon" (Ada Jones and male quartet, orchestra accompaniment); No. 432, "Cubanola Glide" (New York military band with Collins and Harlan). These are unquestionably the most pronounced song 'hits' of the season, and while of the 'rag' type, their mellow catchy rhythm has been so artistically rendered, that we confidently predict an enormous sale for them."

NEW VICTOR RECORD CATALOG.

Imposing Volume of 152 Pages Now Ready for Dealers—Arranged for Ready Reference—The Special Lauder Window Display.

The new catalog of Victor records for 1910, which made its appearance recently, is an im-

posing volume of 152 pages, and is well calculated to impress one with the magnitude of the Victor business, which enables the company to offer to the talking machine owner such an exhaustive list of selections from which to make a suitable choice. The catalog is divided into sections, band, orchestra, instrumental solos, sacred, operatic, Red Seal, popular etc. and indexed in such a way as to make it a very simple matter for the customer or dealer to find any particular record desired without loss of time. The Red Seal records for instance are contained in a special colored section of 40 pages, and are listed both under the names of the artists and according to the titles. The handsome cover in colors also tends to attract attention to the catalog.

The new catalogs are being placed in the hands of the distributors, who were prepared to supply them to the dealers about February 1.

The advertising department of the Victor Talking Machine Co. is offering to dealers, at cost, the ready-made window display, No. 13, designed to attract the attention of the public to the new Harry Lauder records. The central feature of the display is a life-sized figure of the famous Scotch comedian in kilts, and suitable signs and labels go to complete the window.

A buyer, being a human being, has troubles of his own; don't air any of yours in his presence.

NEW YORK, FEBRUARY 15, 1910

THE POST CARD OUTLOOK.

Manufacturers Hold Great Expectations for 1910—Trade Settled After Tariff Upheaval—Advance of the American Made Cards.

The various post card manufacturers are confident that the present year will prove a much better one for the post card trade in general than the year 1909, owing to the more settled conditions. For some years a large proportion of the cards sold in this country came from Germany and the domestic manufacturers found it a hard matter to compete in the production of cards of equal quality. Then the tariff question came up and upset the market for a considerable period or until the new schedules were finally decided upon. Conditions were gradually changed, however, until the domestic manufacturers have secured a good hold on the market and as a result they are turning out cards that rival in every way the finest products of the foreign makers. Now the dealer can get his comics that are made in this country and are typically American in their humor and consequently more desirable for the average purchaser.

His local view cards, from being plain photographic prints on sensitive paper or half-tone reproductions, have been brought to the point where they include the finest products of the post card manufacturers' art.

And the dealer will find this year that to produce successful results he must handle the best cards possible, for the demand has progressed from that of a mere fad to a steady business basis. The public have been educated to the point where they demand the best there is and are willing to pay for it, realizing the value of the post card to the tourist, the busy correspondent, and in fact to those engaged in any walk of life. Various communities have officially approved the post card as a means of advertising their town throughout the country and showing the interesting points as they really appear and not as liable to be distorted by enthusiastic type descriptions.

On the whole the dealer who has an up-to-date stock of post cards on hand, or who invests in a representative stock, has a promising future before him.

SYSTEM IN BUSINESS.

Successful Merchant or Manufacturer of To-day Has His Business Systematized Down to the Smallest Detail—Through Well-Chosen Department Heads He Can Keep in Close Touch.

The successful manufacturer of to-day has his business systematized to the smallest detail. Sitting at his desk, miles away from his factory, he can ascertain at a glance how quick an order in work will be delivered, and any irregularity, however minor, is down in black and white with the justification or absence of it.

The modern successful business man knows that the more attention he pays to system the smaller will be the chance of errors. He recognizes the fact that it is a valuable business

asset to keep his promises, and he must employ system in order to do this.

He is constantly watching the horizon for chances to increase and expand his business and takes immediate advantage of every opportunity that comes to his attention to reach the trade he is in.

In a matter of advertising he spends what seems to the outsider to be an extravagant amount of money. His selection of advertising mediums is reached after a judicial comparison of the many methods of publicity offered him.

The men under him are selected only after they have successfully competed with other applicants for the same positions. He gets the best procurable and is willing to pay for it.

His salesmen are detailed to cover the country, and perhaps the world. They receive a liberal education on the merits and talking points of the firm's product, and start out to conquer with the best ammunition possible and a thorough knowledge of what they are selling.

The sales manager covers the country with his men and handles the hundreds of details incidental to marketing merchandise through salesmen in a manner, which, were it not for system, would be impossible.

The very backbone of some businesses is their wonderful systems for handling detail. Those firms who are now doing business in the old-fashioned way should not wonder why their sales are yearly shrinking. Unsystematic business methods is the reason.

REFORMING FILM SHOWS.

Classic Poems and Bible Stories Now Shown on the Screens.

Moving pictures illustrating the poems of Browning and Tennyson, the Odyssey, Biblical history, and the novels of Tolstoy, George Eliot, De Maupassant, Hugo, etc., are now to be seen in most of the ten-cent biograph houses. This has all come about through the moving picture men themselves. They were tired of being arrested for exhibiting questionable films which they had merely rented from the manufacturers.

They appealed to the People's Institute with the request that it establish a board of censorship, agreeing that any manufacturer who refused to submit his films to this board would be black-listed by the moving picture houses. This created a practically national board of censorship, since the association of showmen at whose request it came into being includes in its membership the majority of moving picture men throughout the country.

During the first month of its work, says the Van Norden Magazine, the board destroyed \$12,000 worth of objectionable films. As they censor all the films used in New York and 55 per cent. of those used throughout the country, manufacturers were early convinced that they would have to raise the standard of their subjects.

One of the earliest subjects taken up was Browning's "Pippa Passes," and every resource of artistic photography, stage settings, good acting was drawn upon to make the record a refined entertainment. Now the devotee of the biograph

can see Longfellow's "Hiawatha," Tennyson's "Launcelot and Elaine," and other famous poems beautifully visualized upon the screen.

A number of historical subjects have also been taken up, such as Custer's famous last stand. Even the clergy have recognized the value of the cinematograph in familiarizing audiences with Biblical history. Nativity and Easter plays have already been exhibited in France, and the story of "Jephtha's Daughter" and the "Judgment of Solomon" are already being given in excellent form and have proved popular here.

An American firm has in preparation the story of "Joseph and His Brethren" and that of the "Life of Moses," the latter being prepared under the direction of the Rev. Madison C. Peters. The French manufacturers have taken up many of the classic fairy tales.

THE CLIMBING MAN.

The Man Who Is Not Affected by Prosperity but Who Continues to Put Forth Best Efforts to Advance Still Further.

A great many people cannot stand much prosperity. If they make what to them is a hit in anything, there is a general letup in their effort. They stop and contemplate what they have accomplished, and congratulate themselves upon it, and feel satisfied with what they have done.

A satisfied or half-satisfied feeling over what one does is a most dangerous thing. Those who have done great things have looked upon every achievement as a stepping-stone to help them climb higher. They have been tonics rather than sedatives. They have been spurs to ambition.

Most of us, like the frog in the well, slide back after we take a step up. We do not hold the advance we have made and keep pushing forward. It is a great thing to hold every bit of advantage one gets; but the majority are like the spurting general, the spasmodic commander who, when the enthusiasm is upon him, makes a dash for the fighting lines as though he would annihilate the opposing army; but, after the spurt, retires, loses confidence, energy and enthusiasm, and suffers the enemy to retake the lost ground.

It is not enough to capture a fort in life—we must hold it, not let the enemy take it away from us. We must keep advancing all along the line, taking everything we come to, giving up nothing.

One of the greatest helps to achievement is to make it an inexorable rule that every time you make a success, your next effort shall be a little higher up. Resolve that each success, instead of satisfying you, shall only spur you to renewed effort.

If you meet with a misfortune, a loss, a seeming failure, determine that that shall be a turning point in your career.

Make up your mind that you will burn your bridges behind you; that you will not look back; that you will keep your eyes onward, ever upward, watching for the hand that beckons you on, listening to the voice of aspiration which bids you ascend.

A cheerful, optimistic salesman is always more welcome than a pessimistic grouch.

SHOULD READ TRADE PAPERS.

One of the Best Methods of Acquiring Special Business Knowledge—Time Spent in the Reading Well Invested.

"I have no time to read." This is an expression familiar to trade paper canvassers, and if it were as well understood by those who make use of it as it is by canvassers it would not so frequently be expressed. Instead of being an excuse for not subscribing for a paper that will benefit the merchant, it is an admission of neglect to do what every business man is expected to do.

Trade papers are busily engaged in searching for new and progressive ideas, and are bringing the best that can be found to the attention of their readers, who are continually making use of them.

A young man recently bought a business of which he has little knowledge. He has not the least inclination to read and therefore has little chance to learn, says Hardware Trade. He is consequently not making headway and cannot understand what is the matter.

Another young man started under similar conditions, but he caught on to the idea that knowledge is the source of success. He devotes certain hours every week to the reading of trade literature, and he claims that his success, to a large extent, is due to the valuable information he obtains in that way. If a man has no taste for reading he should cultivate it; in fact, should make himself read, and he will soon acquire a habit that will be beneficial to him. The man who does not read must not forget that others read him, and they soon find out that he is narrow in his views and selfish in his dealings.

It is time well spent for a merchant to look at other stores in order to get improved ideas,

but what is that compared with the knowledge he can gather from his trade paper, which is on the lookout for the best systems and methods all over the world, and which are gathered up and brought right to his desk regularly for his own benefit and at his leisure.

Luck and laziness do not go together. The man who climbs up must prove himself and grasp his opportunities. Opportunity will not look him up.

A show window has two objects in a store, though the advertising man will probably say they are both one. These objects are to introduce the passer-by to the store and to sell goods.

The value of a good window display is no longer questioned. It is equal to the newspaper and better than any other publicity method. The greatest value of a good display is secured by adapting it to the newspaper work done at the time.

Said one clerk: "I just sold a man something that he did not want." That's salesmanship. Said the other clerk: "I sold a man something that he wanted, but didn't know he wanted." That's sense.

ANCESTOR OF PICTORIAL POST CARDS.

It was in Switzerland that the mania for pictorial post cards first arose, and we well remember the astonishment evoked some dozen years ago at seeing at the Theodule Hut the excitement of a party of Germans upon ascertaining that they could despatch thence, via Italy, a sheaf of views of the Matterhorn.

If one may judge from the very interesting collection of Alpine prints now on view at the Alpine Club, Saville Row, our ancestors were also eager to carry away souvenirs of scenes unlike any to which they were accustomed, and of

which the ferrors and dangers were doubtless not unexaggerated.

And so the Swiss, who were among the earliest to exploit colored engravings, provided them with material with a sufficient spice of exaggeration to satisfy those who stayed at home. These they dedicated to the "amateurs of the marvels of nature," and for them they crowded into single landscape a dozen Staubbachs and any number of agulies and glaciers, with artists portraying them and peasants holding festivals beneath them.

SOME LIVE RULES FOR CLERKS.

Compiled by a Hardware Dealer and Which Might, with Profit, be Adopted by Merchants in Other Fields.

A Western merchant has formulated a number of store rules, a copy of which he hands once each month to each of his clerks. He also has copies posted up in different parts of the store. Several of them read as follows:

"If you feel indisposed to work, from sickness, mental tiredness, or a tendency to mental gout, come and tell me so. A bed will be rigged for you in the loft, or you will be sent home in a delivery wagon.

"I was a clerk for eleven years myself, and learned all the dodges that can be worked to beat 'the old man' out of some of the time that belongs to him; some of the best of them I originated myself. Remember, therefore, that you are not dealing with a tender-foot. When it comes to a matter of loafing on me, I have eyes in the back of my head.

"I would advise you to make all the friends you can among my customers. You may want to go into business for yourself right in this town and need them to help you along. I won't be jealous. All I ask is that you work fairly for me until you are ready to go out and work for yourself.

"Any clerk who has trouble in keeping his home clock from going too slow, especially in the morning, will receive a nickel-plated chronometer by applying to me. Also an order on the jeweler to keep it in order at my expense.

"This store is not run for the good of the neighbors or of the public at large. The first one to be considered is myself; I have put up the money, and am running all the risks. The second one on the list is yourself; you are getting a living out of it, the same as I am. The third is the man who buys the goods. Don't forget that his interests must be looked after, the same as yours and mine; the better we do by him, the more money will there be in it for you and me.

"I do not encourage any young man in guessing this or that about the goods. It is his business to know, and if he don't know, let him ask and find out."

NEW REACH CATALOG FOR 1910.

The A. J. Reach Co. have issued their catalog of the famous Reach baseball goods for 1910. A number of interesting new features are shown, including a patented globe seam, which prevents ripping between the fingers.

To Business Men

Business men in every line admit the value of good trade papers.

A trade paper must be original—it must contain a variety of matter including news service—technical information—in fact it must crystallize the entire news of the special business world, and be a helpful adjunct to every department of trade.

Scan the columns of *The Talking Machine World* closely and after you have completed an analysis of the contents of this publication see if you can duplicate its value in any other trade!

The World is a help to the talking machine business.

It exerts an healthful optimism.

It wields an influence for the good and every man who sells talking machines, no matter in what part of the universe he may be located, should receive this publication as regularly as it is issued. He is missing a vital business point if he fails to do this.

Thousands of dealers not only in the United States but in every country on earth consult the pages of *The World* regularly.

They draw from *The World* pleasure and profit.

The talking machine business has a brilliant future, and this publication is doing much to enlarge the business horizon of every retail talking machine man in the world.

To receive this paper annually costs but \$1.00. All foreign countries \$1.25.

EDWARD LYMAN BILL

1 MADISON AVENUE, NEW YORK

EDISON

in inventing the Edison Phonograph provided the means by which the wonderful voice of

SLEZAK

the greatest tenor of the age may be preserved for all time. The great arias which Slezak sings during his American engagement, at the Metropolitan Opera House, New York, are the same arias which he sings for the Edison Phonograph—and for the Edison only. And they are rendered only on Edison Grand Opera Amberol Records.

This proves a big impetus to the Phonograph sales of every Edison dealer and will certainly boom business on your Grand Opera Record sales.

The best-known trade mark in the world

"The Victor talking machine's design, 'His Master's Voice,' has become a household word, and the quaint little fox terrier at attention before the horn is familiar to more Americans than any of the world's great masterpieces."—COLLIER'S, May 22, 1909.

THE PLEASURE
DOUBLED

THE COST
REDUCED

"ON SPEAKING TERMS"

ZON-O-PHONE

10 inch **DOUBLE RECORD DISCS** 12 inch
65c. **\$1.00**

Zon-o-phone Records are pre-eminently the BEST that money, brains, and a thorough knowledge of the art of sound recording can produce.

They are justly famous for their remarkably clear, natural tones, absence of scratch and wearing quality.

The greatest care is exercised in combining the selections, each side of the disc presenting the latest and best in popular music or standard compositions.

The price appeals to the masses, the quality to the classes, making them indeed a popular record at a popular price.

A new catalogue of Hebrew Single Side Selections has just been issued. Solos by Mme. Prager, Mr. Juvelier, Master Mirsky, the boy soprano, and other eminent singers. These are undoubtedly the most perfect Hebrew records ever recorded. 10 inch, 50 cents, 12 inch, 75 cents.

Resolve yourself, Mr. Dealer, into a committee of one and investigate these claims. Consider, criticize, compare. ZON-O-PHONE RECORDS will stand the test. A trial will verify all that we say.

TEACH CHILDREN BY PHONOGRAPH.

No More Effective Means Conceivable for Presenting the Great Classics in English, When Prepared by Intelligent and Able Speakers, Than the Talking Machine Record—They Learn Quickly and Retain All They Hear.

"To my mind the phonograph is to be considered as something more than a source of amusement," said a well-known merchant while he showed an interested friend his new machine. "That's why I thought it worth my while to buy the best I could find without regard to cost. Of course, one of its best uses, as anyone will admit, is that it does give one access at all times to the best musical renditions, and particularly the wonderful voices of the opera stars. But my idea goes deeper than that.

"It has always been a source of regret to me that when I was a boy I didn't have somebody to show me, almost from the time I learned to read, the art of what is generally called by that threadbare term, elocution. That, however, is not quite my meaning. The point is that if you give a child from the first only the finest things the pen has produced for his reading, he soon acquires certain standards—correct and discriminating standards—that will stick to him through life. The powerful emotion of the writer communicates itself to him; and because his heart is thrilled by what he reads, the fine art by which it is expressed sinks into his soul. Such a one will some day learn to write truly with his own hand.

"Now, there is one thing that stands in the way of giving a child the best literature to read, and that is that the language and thought are too often beyond him. There is as much difference between good writing and bad as there is in music, between ragtime and classic from Beethoven, and it takes an educated ear to pick out the melody in either. But there is one way of overcoming the difficulty in the matter of the reading, and that is that the child should hear the thing read, not as you or I might read it, but as some trained specialist might read it, with such cadences and fine inflections of the voice as will convey the meaning almost independently of the words themselves, even as a song the words of which are in a foreign language will sometimes affect you.

"A literary classic presented to a child in this manner will sink into his understanding, first through his emotions and secondly through his intellect. And, of course, that is the secret of a true understanding of most anything. Such a child will love the thing forever after when he reads it, and with a liking that will not be forced, or unnatural, or half-hearted. Whenever he reads it afterward the tones he has heard will echo in his mind, and it will mean an infinity of things that would not otherwise come to him till his mind matured.

"And it is not enough that he should hear the thing once only. He must hear it many times, whenever he chooses, till it becomes a habitual thing in his life. He must hear it time and again in the quiet of the home, where it can take hold of him, not in the hurly-burly of an opera house, where a distracting crowd claims his attention, and where he understands little and forgets what little he has absorbed.

"So I got a phonograph, and whenever possible I go to competent speakers and have them give into the phonograph readings of the best poems, best prose passages, best everything in literature I can find. I am so fortunate as to have a couple of friends who are fine readers—trained readers, I mean—and they know others. On many occasions they have been able to make records for me for the purpose, merely as a favor, so that I have a unique collection.

"It is one of the delights of my children's lives to hear through that wonderful machine some

story or other first written by a master and then told by a good reader. With the retentive memory of childhood they can give you passage after passage from Shakespeare with a rendition that will make you laugh or cry, and which will make them laugh or cry themselves. Some of the famous orations, given with masterly delivery, they can produce in childish treble, and I have branched out into every literature for material.

"With all this, children in time get somewhat of the tremendous sweep of thought and the great things that are taught by the masters of the pen. They learn in a way that I truly believe should have a vast effect on them in later life.

"In my opinion the phonograph can be turned into a wonderful educational medium for the home if only people will avail themselves of the chance."

HOW "MISERERE" WAS COMPOSED.

Some Interesting Information on How Verdi Got the Inspiration for This Sublime Composition Now Immortalized by the Victor Co.

One of the most successful and most popular high-class records ever put out by the Victor Talking Machine Co. is the "Miserere," from "Il Trovatore," No. 89030, sung by Mme. Alda and Caruso with chorus of the Metropolitan Opera Company (directed by Giulio Setti) and the Victor orchestra conducted by Walter Rogers. It may be interesting to the talking machine men who handle this record to know something of the event leading up to its composition by the great Italian master. It appears that when Verdi was working on "Il Trovatore" he stopped short at the passage of the "Miserere," being at a loss to combine notes of sufficient sadness and pathos to express the grief of the prisoner, Manrico.

Sitting at his piano in the deep stillness of the winter night, his imagination wandered back to the stormy days of his youth, endeavoring to extract from the past a plaint, a groan, like those which escaped from his breast when he saw himself forsaken by the world. All in vain! One day at Milan he was unexpectedly called to the bedside of a dying friend, one of the few who had remained true to him in adversity and prosperity. Verdi, at the sight of his dying friend, felt a lump rise in his throat; he wanted to weep, but so intense was his grief that not a tear flowed to the relief of his anguish.

In an adjoining room stood a piano. Verdi, under one of those sudden impulses to which men of genius are sometimes subject, sat down at the instrument and there and then improvised the sublime "Miserere" of the "Trovatore." The musician had given utterance to his grief.

CARELESS DRESS OR STORE.

A Fair Indication of the Character of a Man
—Pays to Impress Others Favorably.

First impressions are really impressions. When a man enters your office you form a subconscious opinion of that man the instant you glance at him. Frequently, if his personality aside from his appearance is favorable, if his methods of approach or of arousing interest do not antagonize you, he may be able to overcome the acknowledged prejudice his appearance caused; but how much easier to break the ice, how much time saved, how much stronger the slight tie created, if every impression had been positive, had been favorable, instead of one neutralizing the other to ever so slight a degree.

Walk through this office, into the factory, into the stockrooms, into the plant, see the clerks with hats off, neatly and fittingly clothed, alert,

they look the part, they are a part of the scheme of the house.

Go into another factory. The foreman lounges against the wall, his street hat on his head in the middle of the afternoon, giving his orders in a do-it-or-get-out sort of a way. He may be capable, he may be a high-class man, he may be a comer, but he doesn't "look the part."

A man may have merit and still not "look the part." Why not avail yourself of both these adjuncts to success?

It simply requires the thought and care of your personal self that you owe to yourself and to those whose lot is cast with you in the business place or in the home.

Don't overdo it. In this case sins of commission are greater than sins of omission. Don't be a fop, a featherhead; walk and look like a man.

Can you afford to sacrifice anything, any detail, no matter how seemingly trivial or insignificant that has bearing on your personal success in your chosen line? asks Geo. W. Wilkie. I don't believe you can.

CANINE REPARTEE.

A talkative young doggie,
Who spied this poster gay,
Thought he'd stop and have a chat,
And so he yelped out: "Say!
How do you like your job up there?
Do you think you'll make a hit?"
Sir Victor cocked an ear and barked:
"I'm simply stuck on it."

—HOWARD TAYLOR MIDDLETON.

SINGING TEST BY WIRELESS.

Mme. Mazarin's Voice Is Fairly Audible in
Metropolitan Tower.

Another test of the wireless telephone as a means of transmitting the singing voice was tried last week with some success by Dr. De Forest. Mme. Mazarin, of the Manhattan Opera House, sang the "Habanera" from "Carmen" into a transmitter at the laboratory, at 103 Park avenue, while a group of newspaper men and others interested gathered in the Metropolitan tower to await results.

Each person present was equipped with receivers which covered both his ears, and at times the singing was fairly audible. Sometimes one could even catch the full tone of the voice. Usually, however, there was but a dull blur of sound. The experiment was interesting as an experiment, and seemed to indicate that the invention was making progress.

Your smile, your hand, your encouragement, may be all some fellow needs to land at the top. Many a man expects you to recognize his worth.

WITH THE TRADE ON THE PACIFIC COAST.

Talking Machine Business Picking Up Steadily and Dealers Well Pleased—High-Grade Goods Have the Call—Wiley B. Allen Co. Department Forging Ahead—Sherman, Clay & Co. Activities—Heine Piano Co. Want to Sell Out—Columbia Co. News.

(Special to The Talking Machine World.)

San Francisco, Cal., March 4, 1910.

Business in talking machine goods remained rather quiet all over the Coast up to the middle of last month, and has only begun to pick up noticeably during the last week or two. After the record of sales set last year, dealers feel greatly encouraged for the future of the business in this territory, and confidence is everywhere expressed that there will be a greater expansion during the next few years than ever before. The most remarkable change last year was the way in which the demand turned to high-class goods, sales of the cheaper class of goods being on the wane, while high-class articles, both machines and records, gained steadily in favor, bringing an enormous increase in the amount of money involved in the business. This feature promises to be even more marked this year, the best of the new records meeting with a large sale. The wholesale business has increased greatly, as retailers are now getting their stocks in shape for the spring business, and their orders include a larger proportion of high-priced goods than ever before.

James Black, manager of the talking machine department of the Wiley B. Allen Co., reports a marked improvement in the local business this month. This department, though it was only started a few months ago, is now becoming familiar to the company's customers, and with the exception of a dull period after Christmas has had a steady growth. A large increase has been made in the stock in preparation for the spring rush, and Mr. Black is enthusiastic over the prospects for the next few months. Mr. Black states that the talking machine departments in all the branch stores are giving an excellent account of themselves, especially those in Oakland and San Jose.

F. P. Corcoran, a well-known talking machine man of the North, who has for some time been with the D. S. Johnston Co., at Seattle, is now in the department of the Wiley B. Allen Co. His work has been mostly with the high-class trade, specializing on Victrola machines and red seal records, and his work with the Wiley B. Allen Co. is expected to show good results along these lines.

Andrew G. McCarthy, treasurer and manager of the talking machine department of Sherman, Clay & Co., has been for the past week calling on the company's Northern connections, in company with Philip T. Clay. Mr. McCarthy is making a thorough inspection of the Northern trade, and outlining plans for the conduct of the year's business in that district. He will be back in the city early this month.

Sherman, Clay & Co. recently placed their branch in Tacoma, Wash., in a new store. Special attention has been given to the talking machine department, which has quarters on the ground floor, and carries a very complete stock of Victor goods. Their store in Oakland, Cal., is enjoying its usual success in this department, the demonstration rooms being kept occupied practically all the time.

Mr. Wales, who opened the talking machine department of the Heine Piano Co. when the new store was occupied last fall, is now with the Hauschildt Music Co., under Mr. Hansen. The company have greatly increased their stock at the local store, in preparation for the spring trade, and now have one of the largest stocks of records in the city. The general offices of the company were moved from Oakland, which was formerly the main store, to San Francisco this week.

Some of the piano dealers who have been more or less in the talking machine business are coming to believe that it is rather a difficult matter to give personal attention to both lines at once, and also that it is not always easy to find a competent man to take charge of a talking machine department for a firm engaged in the piano business. The Heine Piano Co., which started a department on moving downtown, have not been entirely satisfied with the results, and Mr. Heine announces that he would like to sell this part of the business in order to give more attention to his other interests. Mr. Heine, however, is still giving some attention to the automobile business, in addition to the piano store, and is kept very busy with these two lines. He has not yet found anyone to take up the proposition, but expects to do so within a short time.

Peter Bacigalupi & Sons have added considerably to their stock of Edison goods by taking over what was left of the Kohler & Chase retail

stock, as well as that of the Falkenstein Music Co., at Fresno, Cal., which sold their piano department to Kohler & Chase. Mr. Bacigalupi reports trade rather quiet since the rush on Harry Lauder records in January, but the wholesale department now presents a fairly busy appearance, as orders from the outside trade are beginning to arrive in good shape. The local store had a fine window display in honor of Washington's Birthday this week, which attracted many visitors to the store. A visitor this month has been W. A. Voltz, representing the National Phonograph Co., of Orange, N. J.

Willis S. Storms, outside man for the Columbia Phonograph Co. in California, has been calling on the trade in the southern coast district for the last month. W. S. Gray, the Coast manager for the company, has been spending the week in Los Angeles, but is due here in a few days. Mr. Gray has found a downtown location for the wholesale department, and if present negotiations reach a satisfactory conclusion, will be located there before the end of March. While the present retail arrangements are quite satisfactory, it has been realized for the last few months that the Van Ness avenue quarters were too far from the business center for convenience, even in the wholesale line.

The Columbia business in this State is steadily expanding. Two more piano dealers in Los Angeles have taken up this line since last month, and the arrangements in northern California are extremely satisfactory. Kohler & Chase, in addition to carrying Columbia goods exclusively in the local store, have placed the line in their Sacramento branch, and will make a similar change in Oakland next month. This gives the Columbia practically a new chain of stores, and the high standing which Kohler & Chase have always enjoyed in this district will be of material assistance in handling the line.

The Bruce-Brown Co., who bought out the talking machine department of Kohler & Chase's store in that city several months ago, have sold out to the Eilers Piano Co. As the Eilers house has for some time handled the jobbing business in Columbia goods in that territory, the addition of this business, in which Edison goods formed most of the stock, will place it in a leading position in the talking machine trade.

EVIDENCE ON A PHONOGRAPH.

What Witness in Will Case Said Preserved for Use in Other Courts.

(Special to The Talking Machine World.)

Boston, Mass., March 5, 1910.

Attorneys for the Glover brothers, who are seeking to break the will of their brother, Clarence L. Glover, who was shot and killed in his laundry at Waltham several months ago, have preserved the testimony of one of the witnesses on a phonograph record for future use in case the latter dies and it becomes necessary to repeat what he said.

The witness is Thomas Coffey, a salesman in a local sporting goods store. On February 17, the day following his appearance as a witness in the will case, he went to a hospital and underwent a severe surgical operation. He is still at the institution. Should he die and it become necessary to introduce his evidence again in any court proceedings then the phonograph record will be produced and an effort made to secure its introduction.

Coffey testified that a woman answering the description of the murdered man's widow purchased the revolver with which Glover was shot. Considerable latitude was allowed by the Probate Court in the trial of the will case in the character of the evidence introduced, much of it implicating Mrs. Glover.

The person accused by the State of the murder is Hattie Leblanco, a sixteen-year-old girl employed in the Glover household as a maid. She is awaiting trial on a murder indictment. Glover made an antemortem statement accusing the child of shooting him.

What a Successful Jobber Means

Our success of 1909 has spurred us to greater activity to increase our facilities to better care for dealers' orders. Every practical device known to the Modern Talking Machine House is in use here to assist in despatching orders quickly, completely and in factory condition.

LEST YOU FORGET.—The promptness with which your jobber fills your orders and the quality of the goods sent is a great factor in deciding whether your customer will come back to you or go somewhere else for his next purchase.

We point with pleasure to our hundreds of successful dealers who buy from us year in and year out, because they can depend on our service and quality. Send us your orders and share in our success.

EASTERN TALKING MACHINE COMPANY

Victor Distributors 177 TREMONT ST., BOSTON, MASS. Edison Jobbers

Do you realize

what the widespread Victrola advertising means to you?

You can make it work overtime and produce big profits if you will.

Here are some suggestions which will help you to sell the Victrola. Make a list of all the people in your town who can afford a Victrola. Arrange for a Victrola concert at their homes. Select a pleasing program from the instrumental, comic and operatic Victor Records, remembering that rich people enjoy fun as well as grand opera. Explain the various records as you play them, and tell entertainingly about the singers and musicians.

That is possible and reasonable, Mr. Dealer, *and it will bring results.* Why not get a Victrola from your distributor at once, and try this plan? You'll sell that one and probably many more.

And just think of the Victor Records these wealthy people will buy.

VICTROLA XII. Mahogany, \$125.

Speaking of the Grafonola—we have been inviting the reading public to make comparisons. They are doing it. And that settles it.

A TALK WITH EMILE RINK.

General Manager of Fonotopia Co. Speaks of Courteous Reception Here by Columbia Co. Officers—American Records Sold Too Cheaply—Better Prices Obtained Abroad—Political Situation in England Upsets Trade—No Important Litigation Now in Foreign Courts—His Future Plans.

Just before the sailing to Europe on March 2, aboard the "Mauretania," of the Cunard line, The World had a talk with Emil Rink, general manager of the Fonotopia, Ltd., London, Eng., the parent company, and director in the subsidiary concerns, Societa Italiana di Fonotopia, Milan, and the International Talking Machine Co., Berlin, Germany, where the factory is located, and his temporary home. He said:

"Though I am residing temporarily in Berlin, my permanent home for the past thirty years has been in London. I make frequent trips to Milan, where we have a small company, but our manufacturing is done in the German capital. I expected to get through here within two weeks, but the officers of the Columbia Phonograph Co. were so kind, courteous and attentive that my stay has been prolonged one more week than I calculated. It was special business that brought me over, of which you may hear later.

"In Europe the year 1909 was very satisfactory, indeed," continued Mr. Rink, "and if 1910 is as good we shall be pleased. Of course, it is a little too early to say much about how trade will develop, but the indications are it will be excellent. You know, like here, conditions have been steadily improving, and we are on the upgrade again. Confidence is practically restored and I do not look for any setback.

"If you recollect, when I was in this country before I stated that, in my judgment, the American manufacturers were selling their records at too low a price. Considering the high quality goods made by all the companies here they are certainly making a mistake in selling 10-inch records at 60 and 65 cents. In Europe we get \$1.25 and \$1.50 for our records, and have no trouble whatever. Recently we placed on the market a 75-cent record, thinking possibly there might be a demand for it. It sold so slowly that we came to the conclusion that there was no particular field for it, as the sale of our higher-priced goods was not curtailed in the slightest.

"We aim at quality, and we maintain it, and I firmly believe now as I did then, that the buying public appreciates the effort. Of course, our 75-cent record is confined to popular musical selections of the lighter kind, but we would have been just as well off if these goods had never been brought out. In other words, we consider it a mistake, and, as I said before, I have no reason to change my mind regarding the policy of the American manufacturers and cheap prices. I understand, further, that the best and largest volume of trade for the past six months in the United States is due to the offering of higher-grade and higher-priced lines. This should be conclusive proof of my contention.

"So far as copyright laws are concerned in relation to the talking machine business in Germany, a bill of this character is now being prepared by the government—the Minister of Justice being entrusted with its framing—and probably it may have been introduced in the upper house by now. At any rate, the bill will go through both branches—Bundsrath and the Reichstag—by June 1. To be sure, it will go through as a government measure, or, as it is termed in Great Britain, a private bill.

"Now, do not confuse this legislation with the case now in court to determine the status of the existing law. This is now before the courts, I believe, in the final stage or on appeal, as you might say; and is between two music publishers and a party who used the copyright work on the records.

"Owing to the present political confusion in Great Britain, the outlook for a new copyright law is not very bright. Possibly you know the Ministry are hanging on by their teeth, with the Irish members of the House of Commons dominating the situation. Until a financial bill goes through little, if anything, will be accomplished, and the copyright bill may be lost sight of. Not anything more has been done than the filing of the very elaborate report on the part of the copyright committee of the Board of Trade. As you know Great Britain is one of the signatories to the Berlin convention of 1908, in which they are pledged to carry out its recommendations in legislation by July, 1910. Perhaps this may be done, but it is doubtful, and probably under the circumstances the English Government may have their pledge fall without further comment.

"In litigation there is nothing before the European courts affecting basic or fundamental conditions in the talking machine business. Yes, the only suit in this classification is that of the conical, or tone arm, in Austria. The lower court, or the court of original jurisdiction, has sustained the validity of this patent. There is one appeal to a higher court, to have this decision reviewed, and I think that is now being looked after. You see, in Austria those courts only handle patent cases, the same as the bill introduced the other day in your Congress to create a patent court. General law cases never come before them.

"I go to London first for about a week, and from there to Berlin, and I am glad to get away, although I always enjoy my visit to America. I have been busy every minute, and I want to thank The World for the courtesy of this pleasant chat."

USING SLUG IN SLOT UNLAWFUL.

New Ordinance Passed by the Civic Authorities of Denver Protects All Kinds of Machines Operated by Nickel in the Slot.

(Special to The Talking Machine World.)

Denver, Col., March 4, 1910.

Slipping a slug, coin or button into a telephone, music, phonograph, fortune telling, punching, weighing, lifting or any other kind

of machine to beat the owner out of the service will be punishable, on conviction, with a fine of from \$5 to \$100, under an ordinance which the Board of Supervisors passed last week.

The ordinance was introduced by Supervisor Webb at the instance of those who have suffered from the practice of beating such machines since they came into vogue. Whether or not the slot game machine will come under the ordinance appears to be a question, since it might be held to be a gambling device.

VICTROLA CONCERTS FOR STUDENTS.

Dean Cowper Permits the Students at Drake University to Listen to Stars for Benefit of Drake Conservatory—Delighted with Their Experience.

The greatest assemblage of stars that ever appeared together in concert delighted a large audience of Drake University students in the Auditorium in Des Moines, Ia., recently. All the great singers of the present day who have thrilled multitudes in every corner of the globe with their phenomenal voices were gathered together under one roof. Madame Patti thrilled her audience with her beautiful rendition of "Home, Sweet Home," and a few minutes later Caruso, the world's greatest tenor, was winning storms of applause from an enraptured audience. And all for the benefit of the Drake Conservatory of Music.

Holmes Cowper, dean, has started an innovation in the way of a musical education which promises to win great favor with his students. Operatic stars are hard to get in Des Moines, in person, but modern ingenuity has made it possible to bring their beautiful voices here, and the result was a Victrola concert in the university auditorium Wednesday. Through the courtesy of Chase & West, who loaned one of the instruments for the occasion, Mr. Cowper was able to give his students a regular metropolitan concert. A very fitting and instructive program was arranged, beginning with the old Italian opera as sung by Madame Sembrich and the modern by Caruso and Farrar. The beautiful voice of Madame Schuman-Heink was heard in the old French opera and the modern was sung by Melba and Calve. Selections in German were given by Van Rooy, Gadske and George Hamlin, and the program ended with an oratorio by Louise Homer, Evan Williams and others. The students are very enthusiastic over the new idea of Dean Cowper's and are looking forward to a similar entertainment with a great deal of pleasure.

If you wish success in life make Perseverance your bosom friend, Experience your wise counselor, Caution your elder brother and Hope your guardian genius.

The best salesman is the repeater. The one-time wonder-worker may show a burst of speed and make a hit with the boss at the start, but the repeater is the one who stays longest on the payroll and draws the fattest salary.

TRADE NOTES FROM ST. LOUIS.

Trade in Excellent Shape with Increasing Demand for High Priced Machines and Records—Grand Opera Helps the Record Trade—Grafonola Regents for Chapter Houses—Auxetophone for Noted Restaurant—Ryan Buys Phipps Stock—Many Dealers Call This Month—Other News Worth Noting.

(Special to The Talking Machine World.)

St. Louis, Mo., March 7, 1910.

The talking machine business is good, and these reports are very uniform. The trade reports that the demand for high-class goods is improving right along. They all state that they had a good demand for the high-class opera records during the month, due undoubtedly to the season of grand opera we had during that period.

The St. Louis Talking Machine Co. are experiencing a remarkable run on the Victor special new "Miserere" record, sung by Caruso and Mme. Alda. They sent out a letter devoted entirely to this splendid record, and by evening of the day this record was placed on sale they were entirely sold out and were obliged to telegraph for a fresh supply. The very striking three-column ad. of the Victor Co. announcing the "Miserere" had a wonderful pulling power, and the St. Louis Talking Machine Co. ran about the same size ad. directly beneath the Victor Co.'s.

Remarkably good business in February, better than in the same month last year, is reported by Manager O. A. Gressing. The demand for records of the late titles was very heavy. A phenomenal business is reported on Victrolas, three being sold in one day, and only the fact that the factory has been behind on filling orders for this instrument has prevented this firm from making a still better showing. This company took excellent advantage of the recent engagement at the Garrick Theater of the Layolles French Grand Opera Co., of New Orleans. The ad. in the local papers, also the "Grand Opera" Victor ready-made window display, featured "Grand opera at home on the Victor."

L. A. Cummins, traveler for the St. Louis Talking Machine Co., just returned from a three weeks' trip and found conditions more active than ever before at this time of the year. The dealers throughout the territory he covered are doing a splendid business and the outlooks for continued prosperity were never better. Several excellent new accounts were opened by Mr. Cummins on this trip. S. H. Johnson, also of this firm, had a record-breaking month, and several Victrola sales were placed to his credit in addition to the smaller machines.

Visiting dealers at the St. Louis Talking Machine Co. were J. Ed. Black, Springfield, Mo.; John Winkler, Mascoutah, Ill.; F. Meyer, Carlinville, Ill.; Otto Funk, Hillsboro, Ill.; R. W. Young, manager, Parks Music House, Hannibal, Mo.; G. F. Trescott, Winfield, Mo.; Joe Hilliard, Hot Springs, Ark.; Mr. Ellison, of Ellison Bros., Hickman, Ky.; Wm. Mosby, Newport, Ark.

Marks Silverstone, of the Silverstone Talking Machine Co., reports having had a good trade all through the month of February, and that the outlook is good.

D. K. Myers, the Zonophone jobber reports that trade is fair, but that the bad weather during the month hurt it to quite an extent. He is looking for a nice spring demand.

Manager Robinson, of the talking machine department of the Thiebes Piano Co., reports a good business for February, and that the demand for high class instruments and records is particularly good.

Manager Walthall, of the Columbia Phonograph Co., reports another sale of a Grafonola Regent (Library table), to the Lewis Publishing Co. This company are buying the Columbia product exclusively. The Regent is used in all the hundreds of Chapter houses being erected over the United States, which are being erected and equipped by the Lewis Publishing Co. for the local Chapters of the American Women's League. Mr. Walthall also reports the sale of a mahogany Grafonola Regent to ex-Gov. Lon. Stephens, with a fine selection of records.

District manager W. C. Fuhri, of this company, spent some days in St. Louis on his return from a trip West extending to El Paso, Texas.

S. Jacobson, former salesman with the Columbia Phonograph Co. at Louisville, is now connected with the local store in the same capacity.

Chas. Kauffmann, traveler for the Columbia Phonograph Co., spent a day here recently, having returned from a profitable trip of four weeks through northern Missouri. He left on a two months' trip through Illinois.

F. L. Scott, manager of the Dictaphone department of the Columbia Phonograph Co., reports business as being good. He returned recently from a business trip to Paducah, Ky.

Oliver Jones, credit man for the Victor Co., between trains spent a short visit with Manager Gressing, of the St. Louis Talking Machine Co. Mr. Gressing is preparing to leave on about a week's trip through western Missouri and parts of Kansas.

Lyle P. Connor, of White Hall, Ill., is one of the most enthusiastic Victor dealers in southern Illinois. He has conducted several Victrola recitals with marked success. The recitals given were before the Woman's Club and different church societies.

G. C. Hawkins, Victor dealer at Decatur, Ill., with the assistance of Mr. Cummins, of the St. Louis Talking Machine Co., placed an Auxetophone in the Grieder Cafe, the most prominent restaurant in Decatur. A very large program was rendered and the Auxetophone has proven itself an exceptional means of attracting trade and interesting the patrons.

The Koerber-Brenner Music Co. report having had a good business during February, and state that they are having a strong demand for the high-priced machines. W. A. Brenner, secretary of this concern, left on Monday night, February 28, for a three weeks' southern trip.

The H. A. Phipps Piano Co. sold their stock of pianos and talking machines to M. I. Ryan, of this city, on Friday, February 25, for \$8,000.

Miss Sadie Rosenblatt, manager of the talking machine department of the J. H. Buettner Furniture & Carpet Co., reports trade as quite active during February, with a good demand for the best goods.

WHY NOT OPERA IN THE HOME?

Thus Criticism of Opera Methods Will Cease and Every One Can Hear Their Favorite Artists.

Season after season the admirers and supporters of opera in New York seem to like to find fault with the management of the opera houses. The complaint may be due to lack of new operas, poor stage management, change of singers—whatever it may be, "kicks" are never ending, and this is illustrated in the many letters on this topic in the local papers. Commenting upon this situation a reader of the Evening Sun has this to say on the subject:

"An Opera Lover's Complaint" forwarded you by 'A Victim' makes me laugh, not because it is not a serious matter—oh, no; but because of 'A Victim's' wail: 'What patient idiots we grand opera lovers be!'

"Now every time I open a paper I find a 'kick' coming from a 'grand opera lover.' I'm not one myself; that is, one that gets into 'the push,' so that may account for it; but if eternal kicking means patience, I have to be shown!

"My remedy is to have such grand opera as I desire served—like the milk and the groceries—at home on the talking machine.

"Why don't some of these 'knockers' try that and save wear and tear on their 'idiotic patience' and on their evening clothes?"

Men who originate are coming into their own. A good deal is said about inventors, original advertisement writers, creators of trade literature, etc., not receiving adequate reward for their work. But they are beginning to be recognized as worthy of a share of the profits.

**Learn Spanish, French, German, or Italian**

The I. C. S. System of Language Instruction by the phonograph method makes easy the mastering of a foreign language and appeals with compelling power to thousands. The dealer in phonographs that does not carry I. C. S. Language Outfits is neglecting a quick and sure way to increase his business. The new \$35 Language Outfit of the I. C. S. is a marvel. It represents the highest art in the teaching of languages, and embodies a method that has won the warmest praise of thousands qualified to speak authoritatively. The Spanish, French, German, and Italian Embassies at Washington, as well as the leading colleges, have cordially indorsed the I. C. S. Method of teaching languages.

The I. C. S. Language Outfit consists of an Edison Gem Phonograph made especially for language work; 14-inch brass horn; special hearing tube; recorder; reproducer; speaking tube; winding crank; camel's-hair brush; blank cylinders on which to make phonographic recitations; and 25 Conversational Records, teaching pronunciation guaranteed to be absolutely correct, with native intonation and inflection. In addition to these Conversational Records there are pamphlet Instruction Papers teaching the theory of languages. The new Outfit is the best and cheapest ever offered—the price being only \$35.

If you want to increase your business, write today for full particulars.

International Correspondence Schools

Box 918, Scranton, Pa.

EDDI

This big double-page magazine advertisement is just a sample of what we are doing every month in all of the principal magazines, and every week in all of the principal newspapers throughout the country, to teach the more-than-eighty-million American citizens that there is no full, life-size money's-worth in any sound reproducing instrument but the Edison Phonograph.

You've got every argument on your side; the permanent sapphire reproducing point that never needs changing, and the *double ability* to play both Edison Standard and Amberol Records, Slezak and the Amberola *and the name Edison*.

This is the biggest advertising campaign that has ever been launched in the interest of a sound reproducing instrument, and it is creating a big general national demand. It's your job to take advantage of this demand, and supply it in your territory.

*Slezak
as
Rhadames
in
Aida*

Leo Slezak

JEAN DE RESZKE says:

"I consider Slezak the greatest living tenor."

Ten years ago Jean de Reszke stood where Slezak stands today—the greatest living tenor. Today Jean de Reszke is the greatest voice teacher in the world, and his opinion is final—he knows.

Hear Slezak sing the greatest of the Tannhauser arias, "Loblied der Venus," in the Edison Phonograph. Also hear the other great Slezak Records from Otello and Aida which he sings exclusively for the Edison.

Edison Grand Opera Records, 75c and \$1.00; Edison Standard Records, 35c; Edison Amberol Records (play twice as long), 50c
National Phonograph Co., Lakeside Ave., Orange, N. J.

National Phonograph Company,

EDISON

The Edison Amberola

Plays both Edison Standard
and Edison Amberol Records

Price \$200

Other types of Edison Phonographs
\$12.50 to \$125

The Amberola is the newest and most beautiful Edison Phonograph. It offers two things that no other sound-reproducing instrument of the cabinet or any other type can offer—the wonderful voice of Slezak in the great arias from *Otello* and *Aida*, in which he proved himself the world's greatest tenor; and Amberol Records, the longest playing Records made.

Made in several finishes of mahogany or oak.

There are Edison dealers everywhere. Go to the nearest and hear the Edison Phonograph (particularly the Amberola) play both Edison Standard and Amberol Records. Get complete catalogs from your dealer or from us.

National Phonograph Co., Lakeside Ave., Orange, N. J.

The Edison Business Phonograph means shorter hours for the business man

This advertising will be many times as effective if your local advertising is on the job to help it out. Show your share of the eighty-million the way to your store. Don't let them just *want* an Edison Phonograph—get them to supply that want through you.

Use your local newspapers, use your printed matter—make your mailing list work. Make your windows tell the story of the complete Edison line—a Phonograph for everybody from \$12.50 to \$200.00.

Besides, Edison Standard and Amberol Records of every kind of music for every musical taste from “rag” to Grand Opera.

Be able to back up the story with the goods—keep your stock complete.

Your Edison jobber will take care of you.

What we want from you is co-operation, team work.

Concentrate on the Edison.

NEW YORK, MARCH 15, 1910.

THE collection end of any business is most important—it is vital and it may be taken as a trade axiom that the man who is not a good collector is not good in meeting his own obligations.

Now, when talking machines are sold on the instalment basis it is necessary that a system be inaugurated whereby collections should be made with regularity and precision.

There is a vast difference in the management of collection departments.

We know of some houses that have such a perfect system inaugurated that but a small percentage of their accounts are permitted to fall in arrears.

They impress upon their customers the necessity of meeting their instalments precisely as agreed and there is no question but that the more religiously these rules are adhered to the better it is for everyone interested.

A good collection department is a business essential which should not be overlooked.

HOW many merchants who have failed during the past ten years have had good collection systems in vogue?

If you look over the list you will find but few of them and we have frequently heard criticisms expressed by those who have managed the estates of bankrupts and they have voiced great astonishment at the laxity existing in the collection departments.

We might go a step further and say that the man who is not a good collector is not good in meeting his own obligations.

It usually works out that way, for the man who is careless and indifferent in his own affairs usually manifests exactly the same feeling in his dealings with those from whom he makes purchases.

Now, talking machines or any other product of human skill and brains, are not well sold unless they are sold to people who will meet their deferred payments promptly.

There is nothing like teaching men the necessity of meeting obligations, and when once they have learned the lesson they are agreeable and nice people with whom to do business.

THERE is no question but that any industry will be bettered by rules in the collection departments whereby purchasers are compelled to live up to their obligations with exactness.

If a purchaser finds that a concern is not looking after him on the very day when he is to meet his payment he grows careless and indifferent and after a little while two or three instalments are scored up against him, and with the debts growing heavier all the time they become more and more difficult to meet.

We should say that there is nothing more valuable to a business than an up-to-date credit system which is maintained in perfect working order.

A concern which has maintained this condition is always a safe business risk and the man who is careless in his own affairs will be careless with others.

There is nothing which discredits a man more, save rank dishonesty, with the people from whom he is asking financial favors, than careless and lax methods, and the man who is careless in his dealings never knows how he stands.

A man who puts in force a collection system which compels his customers to live up to their obligations is the man whom people are anxious to sell.

That's the kind of men jobbers like to see on their books, and pray why should they not?

They represent a safe and sound business class.

TRADE reports from dealers show that business for February was considerably ahead of the same period a year ago.

The outlook is excellent for better business conditions as the season advances.

Evidences of national prosperity are the almost doubling of individual bank deposits in the last decade—the constant increase in transportation, facilities and equipment—the possessions in this country, according to Government statistics of almost half of the world's money wealth—the prosperity of farming communities and the full day and full force activity by manufacturers after a period of marking time.

Of course, men will say that the cost of high living cuts into trade.

Naturally it does, but still it does not pay to slow up in selling energy simply because we have to face unpleasant conditions.

It should rather stimulate one to harder work.

There is trade to be secured and those who are most active will be the ones who will capture the lion's share.

There is no doubt of that.

It therefore behooves the talking machine to act and to act at once.

WE hear very little about copyright nowadays.

In fact, the mention of the word is infrequent in trade circles.

Formal notices have been given that a slight increase in cost to conform with the royalty will be made on copyright records by some manufacturers while others have made no announcements.

The subject does not seem to interest the dealers, and this condition is brought about by the fact that few copyright records have been placed on the market since the new act went into effect in July, 1909.

Certainly, the copyright situation has not disturbed business conditions.

RECENTLY we were discussing trade conditions with a jobber who complained rather bitterly over the dullness of trade.

He said that business had fallen off very materially with him during the past year and he saw nothing in the future to encourage him as to the coming of better conditions.

Chatting further, we found that during the past six months he had expended but precious few dollars for advertising and had drawn in, cutting off here and there until he had actually separated himself from the live purchasing world all about him.

Now, what could be expected?

The logical result, of course—business stagnation.

It will come to anyone who pursues such a policy.

A jobber to-day cannot expect that the trade will come clamoring at his doors for stock unless he does something himself to stimulate and interest them.

IF the jobbers of this country to-day withhold from all lines of publicity and the manufacturers do the same they will find that business will be absolutely stagnant and it would take the expenditure of vast sums of money to resuscitate it.

People would cease to be interested in talking machines.

Every level-headed, progressive business man will admit the truth of this statement, and if the jobber to whom we have referred will inject a little ginger into his business acts—spend a little money for publicity and get out of his shell, maybe he can win back the trade which he has lost.

We have some energetic hustling jobbers in this country and they never miss a chance to secure trade.

They win it from the fellow who is slack in his methods and non-progressive in his views every time. Of course, they do, and if things keep on the same way the business will be in the hands of fewer men, but men more wide-awake and keenly alert.

Sound truth is it not?

You have got to spend money to make money, and if a man shows no faith in his own product by refusing to advertise it and to let his constituency know that he is in business, results for him will be barren, and they should be.

There is no use in holding back in trade policies and there is no good reason why the men should win who conduct business on indifferent and antiquated lines.

TRADE IN SOUTHERN CALIFORNIA.

February Business Rather Quiet, But Dealers Satisfied—Southern California Music Co. Add Foreign Records—Makes Goods With Mexican Records—Druggists Handle Talkers—New Fields Opened—Activities of the Dealers—Expansion the Rule—General News of Interest During the Month.

(Special to The Talking Machine World.)

Los Angeles, Cal., Feb. 28, 1910.

The close of February is quieter than that of January, although not unpleasantly so. There are many reports of favorable sales, especially in high-priced goods, such as Victrolas, Amberolas and Grafonolas. The jobbers have had an unusual demand for the new issue of records. Sherman, Clay & Co. are receiving many orders for the new Victor Red Seal records, among which the new Miserere Duet by Alda and Caruso seems to be the favorite. The Victor exchange on records has kept the local dealers somewhat busy.

The Southern California Music Co. have added a stock of foreign Edison records to their wholesale department. The new Chinese Amberol records are expected to create some new business for the Edison dealers on the Coast owing to the great number of Mongolian settlers.

The Columbia Phonograph Co. are expecting a shipment of Regent Grafonolas. They have orders to cover the entire number which is due. A new catalog of Mexican discs has been received.

Max A. Schiresohn, whose store is located at 367 North Main street, is the most popular man among the Mexican populace of the city, his place being located close to the Latin quarters. His stock consists of a complete catalog of Mexican and Portugese Edison records, to which he now expects to add the Amberol Chinese records.

The druggists of California have not been slow to realize the value of the talking machine as a side line. For several years past many of the most successful dealers in the smaller towns have been the druggists with the phonograph stock. Several new Edison agencies have been placed with druggists. At Tulare, Cal., Ryan & Dame are new dealers who are starting in to the Edison business with a splendid stock of machines and records.

Fred G. Booth, at Pasa Robles, has taken over the agency of O. C. Gray & Sons, and will give this branch of his business a separate section in his drug store.

Mr. A. B. Russell, with the Cody Pharmacy, of Merced, visited Los Angeles together with Mrs. Russell.

The oil industry of Central California has brought many new towns into prominence and afforded new fields for dealers. Hefton & May, of Coalinga, the oil center, have doubled their stock to enable them to supply their fast-growing trade. The complete Edison line from Gem to Amberola is carried by them.

The Willow Furniture Co., of Bakersfield, have moved their Edison department to the front of the store, where they have much better space for displaying the line, and have added a repair department, which is doing very nicely.

George Snyder, of East Bakersfield (formerly Kern), has one of the largest stocks in the valley, and has increased his selling staff by engaging Miss Grace Johnson, who will devote her time to the talking machine trade.

Dusy & Lawrie, Inc., Selma, Cal., have doubled the size of their talking machine department, which is given to Edison grades exclusively.

An item of interest is that E. Muschewske, of Colton, Cal., has admitted to partnership George White, who is well-known in that section and will add strength to the firm which will be known as Muschewske & White, who will handle an odd but very successful combination of harness and phonographs.

The Mexican trade of Riverside has grown to a great volume with the South California Music Co.'s branch in that city. Señor Rafael Zavala is now in charge of that trade.

Mme. Schumann-Heink, the great contralto of Victor Red Seal fame, recently purchased a large ranch in San Diego County, where she expects to spend much of her time when not on concert tours.

The Hemet school directors recently purchased a large Victor and a number of records, which they are to use for educational purposes in the schools of that section.

The new Victor record catalog is looked upon by the dealers as one of the greatest lists of records published anywhere.

GETTING AFTER PRICE CUTTERS.

National Phonograph Co. Pressing Suits Against Breakers of Agreements in All Parts of the Country—Those Concerns Who Have Been Restrained or Enjoined—Violations of Conditions of Sale Always Prosecuted.

A formidable list of cases against dealers for either price cutting of Edison goods or of other violations of the National Phonograph Co.'s conditions of sale appear below. The suits cover practically the United States, the courts again and again indorsing the selling agreement between themselves and their dealers and jobbers, and the law on the subject seems so firmly settled that opinions are seldom written, but the decrees are issued forthwith by the Federal courts. The proof of this is contained in the number of restraining orders or injunctions, or both, that have been granted against the following defendants:

Jacob Kaufman et al., Pennsylvania; William A. Pike, Massachusetts; W. Schlegel and Thomas N. McNevin, doing business as Schlegel-McNevin Piano Co., Iowa—this case was appealed, but the lower court's order was upheld; the Wittman Co., Nebraska (two cases); The Fair, Chicago; Frank H. Woodbury, Missouri; Benj. Switky, New York City; Richmond Pease, New York City; Frederick Sudbrink, trading as Winthrop Cycle Co., William Sudbrink, Marcus Seliger and Magnus L. Peiser, New York City; Philip Marcus and Frederick B. Van Vleck, individually and as trustee in bankruptcy of the estate of Philip Marcus, Brooklyn, N. Y.; Fred G. Schaefer, Philadelphia, Pa.

John F. Molloy, Connecticut; Wright-Metzler Co., Pennsylvania; Joseph G. Williams, Massachusetts; Donnelly & Fahey, Rhode Island; Gent & Eagen, Pennsylvania; Mosley Auction & Storage Co., Fred M. Lord and Robert Simmons, New Jersey; George Raymond, doing business as Ray-

mond Syndicate, Massachusetts; Henry Spahr, New Jersey; Woodard-Clarke & Co., Oregon; S. Polimer, Massachusetts; Harry C. Hopkins, doing business as H. C. Hopkins & Co., New Jersey; Paxton & Baker, Indiana; Thomas C. Hough and James A. Latta, trustee in bankruptcy of the estate of Thomas C. Hough, Minneapolis, Minn. Jacob Keen, Philadelphia, Pa.; American Motor & Cycle Co., Michigan; Lemuel L. Bair and Carolina E. Bair, Indiana; S. S. Baldwin, New York; Scott Bonham, receiver of Ilsen & Co., Cincinnati, O.; Charles F. Brooks, New York; Herbert E. Crandall and John W. Jamison, doing business as the Crandall Sales Co., Pennsylvania; William R. Gates, Michigan; Andrews Hallet, Massachusetts; W. B. Larrimer, Indiana; Amos B. Palm, Pennsylvania; Frantz Prikovitz, New York; Porch Bros., Johnstown, Pa.; C. A. Richmond and Sterro-Photo Co., New York; J. H. Webb, doing business as Webb's House Furnishing Co., Wisconsin; Helen M. Woodman, doing business as Home Entertainment Club, Massachusetts; Boston Jewish American et al., Boston, Mass.; J. J. Dixon, New York; Jacob Workman, Brooklyn, N. Y.; Morris Workman, New York; George Hausenbauer, Brooklyn, N. Y.; Edward H. Martin, Iowa; John G. Adams, doing business under the name of Philadelphia Record Exchange, Philadelphia, Pa.; Adolph Gloss and Monte Gloss, partners, doing business as A. Gloss & Son, Chicago; Homer C. Ingalls, New Hampshire.

CLUETT'S "TALKER" PARLORS ATTRACT.

(Special to The Talking Machine World.)

Albany, N. Y., March 1, 1910.

The new talking machine parlors of the Cluett & Sons handsome establishment at 49 State street, this city, are proving a popular place for musically inclined Albanians these days. The rooms are superbly furnished and decorated. Geo. M. Richter, Jr., the director of the talking machine department, is enthusiastic about the growth of business in this city, and has been conducting some excellent advertising in the local papers, in which the new talking machine parlors are featured as well as the Victrola. Visitors from neighboring cities are invited to call. The result of this campaign is that the Victor business with the Cluett house has been exceedingly satisfactory the past month.

Pessimists are always in the rear and never in the van in the march of progress. Successful men and women are never chronic grumblers.

Purchase Quality Needles

BURCHARD needles naturally cost more than needles of an inferior quality, but, they have advantages which will be plain to all.

They move noiselessly over the disc and each needle can be used at least six times. You can get more out of BURCHARD needles than any other on the market. Send for a sample order of these needles and you will use no others.

MANUFACTURED IN THREE STYLES

No. 1. For Soft Playing

No. 2. For Loud Playing

No. 3. For Strong Tone Music

Write for samples. We are prepared to arrange for sole sales agency in the United States. Write

This is March, 1910. Look back a year and consider how the Columbia has gained. Look ahead a year and ask yourself some leading questions.

TRADE NEWS FROM CINCINNATI.

Gift of Phonograph to Children's Home Causes Joy—Youngsters Interested—Sailors' Club Booms Talking Machine—Victor Goods in Strong Demand—New Store in Covington, Ky.—Columbia Co. Store Busy—Other News of Trade Interest.

(Special to The Talking Machine World.)

Cincinnati, O., March 3, 1910.

A phonograph brought much happiness in the lives of 125 boys and girls at the Children's Home one day last week. The instrument was the gift of Miss Laura McDonald Stallo, of a well-known Cincinnati family. With it was a large selection of excellent records. The machine arrived just as the youngsters returned from school. An attendant tried the machine, and when its notes floated through the institution it was just the same as an assembly call for soldiers. All gathered in the chapel and clamored to hear every piece. The machine paid for itself many times over at that concert, and some day these same youngsters will probably be buyers, if not here, then elsewhere. It is safe to say it was the first time a majority of the audience heard a phonograph.

Mr. Salm, of the Salm Talking Machine Co., 538 main street, is having a bunch of jolly present and former tars of Uncle Sam's navy to help him in selling his machines. They, however, are not on his payroll and have not any understanding whatever about compensation. It all happened this way. Just two weeks ago the sailors of the naval recruiting party formed a sailor's club and its membership is largely made up of former tars. Quarters were secured just opposite Salm's place and the first thing in operation was a talking machine, the horn of which projects from the window on balmy days. The music naturally attracts attention and persons seeing Salm's talking machine parlor readily believe he is furnishing the amusement. Mr. Salm hopes they'll keep it up. He is much pleased with his new location, claiming the sales for records have doubled since moving from Vine street. Mr. Hug, of the National Phonograph Co., and Sam Goldsmith, of the Victor Talking Machine Co., called on him during February.

A feature of the trade in Cincinnati has been the big demand for Lauder records, undoubtedly caused by Mr. Lauder's recent visit to this city. The new Victor Victrolas, No. 12, have been received, and the dealers are very well pleased with them. One of the largest selling Red Seal records ever placed on the market was the new "Il Trovatore" record, the "Miserere," of which hundreds have been sold in Cincinnati alone. There is no question but that Victor owners are beginning to appreciate the possibilities that the talking machine offers them, and while the buyers are more discriminating than they have been in the past, larger individual sales have been made lately than has been the rule in the past when there were more buyers and smaller sales.

A feature of Wurlitzer's retail business during February was the sale of a Victor Victrola to a

local business man, who stated that it was his intention to buy \$1,000 worth of records and the Victrola. An Auxetophone was also sold to the new Orpheum Theater, and this undoubtedly will be a feature of the roof garden that this theater company proposes to operate during the summer season. It is now being used in their cafe with great success.

Arthur Adams has just concluded a deal whereby he will come into one of the best located stores in Covington, Ky., just across the river from Cincinnati. This store, which will be devoted entirely to musical merchandise and talking machine goods will have on exhibition both the \$125 and \$200 style Victrolas, and the new Amberola. His opening order was secured by Mr. Laake, of the Wurlitzer Co.

Manager S. H. Nichols, of the Columbia Phonograph Co., is one of the most enthusiastic talking machine men in Cincinnati over the wholesale and retail trade of Columbia Grafonolas, graphophones and records. With an increased traveling force on the road to take care of the wholesale trade, exclusive dealers are being signed up daily and orders for Grafonolas and graphophones are coming in heavier than any other February for years, with business for March coming in with a rush. The dealers are enthusiastic over the Grafonolas and orders for them come in by telephone and telegraph.

The two-minute and four-minute Indestructible records, with the aluminum tone arm cylinder graphophones to play both of these records, appeal to every owner of cylinder graphophones and every dealer, and their increasing popularity is proven daily by large sales.

Retail business is proving to be satisfactory from many points of view with the high-class Grafonolas and grand opera records leading the sales, and the medium-priced instruments and records coming to the front stronger than any time since the panic, which says in plain words "good times." The improved aluminum tone arm disc graphophones, with the double-disc records, still continue with large and satisfactory sales, which are climbing up every month.

Manager Timmerman, of the Milner Musical Co., believes if the dealers would be constantly active and show the same amount of enthusiasm such as was displayed in February that the Edison factory's output would be a harvest reaper this year. The Milner people have carefully stocked a little heavier than usual and set a higher limit for March. Some ginger has been put into the salesmen and good results are expected all along the line.

John Arnold, 507 Elm street, reports that last month exceeded January in the sale of records. He has been featuring the Amberolas, and as a result of his publicity efforts sold several. Quite a number of Victor machines were sold during February.

J. E. Poorman, Jr., jobber of the Zonophone lines of talking machines and records, and dealer in Victor and Edison machines and records, reports trade conditions improving.

Manager Joseph Krolage, of the talking machine department of the J. C. Groene Co., is re-

covering rapidly from the result of an operation upon his appendix, and expects to be out of the hospital and on the job in a few weeks.

LEASE NEW QUARTERS.

Elyea-Anstell Co. Victor Talking Machine Distributors Open Exclusive Victor Retail Store in Atlanta, Ga.

(Special to The Talking Machine World.)

Atlanta, Ga., March 4, 1910.

The Elyea-Anstell Co. have leased the handsome store at 119 Peachtree street and announce that they will open an exclusive talking machine store.

The firm are distributors for the Victor talking machines, records and supplies, and in their new location are retailing the Victor line exclusively.

The store is under the management of A. E. Severe, who has had charge of this branch of the company's business for some time.

HAWTHORNE MFG. CO. ORGANIZED.

(Special to The Talking Machine World.)

Bridgeport, Conn., March 3, 1910.

The Hawthorne Manufacturing Co. have recently been organized, with ample capital, and are now operating a plant for manufacturing talking machine supplies. E. A. Hawthorne, formerly of the Hawthorne & Sheble Manufacturing Co., of Philadelphia, Pa., is president and general manager. The others interested are new to the trade.

PETMECKY CO. BUY OUT DALLAS T. M. CO.

The Petmecky Supply Co., Victor talking machine distributors of Austin, Tex., have bought out the Dallas, Tex., Talking Machine Co., Victor distributors and dealers, and if arrangements can be perfected will continue the Dallas store under the management of some dealer, confining themselves to the wholesale end as formerly.

WOOD PIANO CO. ADD "TALKERS."

The E. B. Wood Piano Co., Boston, Mass., are among the latest well-known piano houses to install a line of talking machines, they having signed as dealers with the Eastern Talking Machine Co., of that city, and installed a complete line of Victor and Edison machines and records in their Washington street warerooms.

Chas. W. Hill, foreman of the finishing department of the Victor Co.'s plant at Camden, N. J., who recently suffered some injuries through the sudden explosion of the gas used in a burnisher for polishing the nickel fittings, is reported to be recovering.

One of the biggest mistakes in salesmanship is that salesmen annoy their patrons with argument instead of pacifying them with persuasion.

THE EASTER HARVEST.

This Season of the Year Should Bring with it Golden Opportunities for the "Talker" Man—A Story That Emphasizes the Value to the "Talker" Man of Judicious Advertising.

Spread out on the desk before me lies a copy of The Philadelphia Sunday Press bearing date of February 13, 1910, and staring out at me from its pages as if to call my attention to its clever wording is an advertisement which cannot but appeal to all who are interested in the "talker" game. Let me read it to you:

"It isn't fashionable to attend theater or opera during Lenten season. There is no reason, however, why you should not entertain yourself and friends at home. The talking machine enables you to present the operatic or vaudeville celebrities in any musical selections desired."

There is more to this advertisement but it is not necessary to quote further because the inspiration for this article came to me from the heading, which I consider one of the most logical and effective I have seen for a long time. Its appeal to fashionable trade, Mr. Dealer, is paramount and should bring them to your store if you, like the Penn Phonograph Co., who are

ADVERTISING BRINGS THE BEST PEOPLE.

responsible for the above advertisement, have made preparations for their reception by snappy advertising.

This fashionable trade means a great deal to you and when the opportunity comes to draw it into the fold and to expose before its aristocratic eyes the dainty appointments of your establishment (I take it for granted that your appointments are dainty) and the skilful workmanship displayed in the elaborately carved cabinets and the rich elegance of the machines themselves, you should leave no stone unturned to do so, and this can best be accomplished, first by advertising carrying with it the information that there are other places in the city besides the Grand Opera House where the favorite song birds may be heard and enjoyed. They will, of course, prick up their musical ears at this, and, though not yet impressed, will show a certain curiosity to learn just where their adorable Enrico, their charming Antonio, and their gigantic Leo may be warbling now that the Lenten season, trolley strikes and other unavoidable events have kept them out of the limelight.

They are not held long in suspense, however, for reading further they are informed that all their worshipped celebrities and a hoard of lesser luminaries whom they have long yearned to hear, but never hoped for a realization of their desires, are at their service in a marvelous repertoire of arias from the leading operas sung at home and abroad. When this delightful information has been properly absorbed and appreciated to the full extent it deserves, Mrs. De Swell will rustle to the telephone, and, calling up her very dear friend, Mrs. Richley will explain to her the delightful discovery she has just made. "What do you think, dear," she calls vivaciously over the wire in her carefully modulated contralto, "we do not have to bow to convention and wait until the end of Lenten season for our beloved grand opera. I have just read that your adored Caruso, Melba, Tetrizzini, and goodness knows who else, can all be heard at

any time that best suits our convenience at Jones's talking machine emporium on Broad street." "Isn't that too perfectly lovely for anything? Have you an engagement for this afternoon? What's that? A drive in the park with Mr. Blank? Well, you will have to cut it, that's all, for you're going with me to attend that concert at Jones's. I am just dying to hear grand opera once more, and I know you are, too. I will call for you at three in the brougham. Be sure to be ready, dear. All right, good bye."

An hour later two stylishly dressed ladies alight from a carriage at the curb and sweep majestically into John Jones's store.

"We have come," explains Mrs. De Swell, "to hear grand opera as advertised by you in this morning's papers."

The salesman bows most gracefully, motioning them to easy chairs. The first record played for their entertainment is the famous sextet from Lucia. Following that comes the quartet from Rigoletto. Then the Miserere Duet from Il Trovatore. These are received with the greatest possible enthusiasm, which through the energy and good taste of the clerk, is maintained through a long and expensive program. As they are taking their departure with packages valued at approximately one hundred dollars in the custody of their footman, Mrs. Richley confides to Mr. Jones, who has just made his appearance, but her husband being a vaudeville fiend, and, in consequence, showing a preference for records of lighter vein than grand opera, has managed until now to keep her in the dark regarding such exquisite selections as they have just listened to. "However," she continues with a gleam in her eyes, "I shall see that such a state of affairs ceases to exist from this moment."

The above anecdote is vouched for by the writer, as he was by accident present at the concert, and it was a small advertisement inserted in the daily papers a few days before Easter that did the trick.

Another line of records which can be successfully exploited during the Easter season are the many beautiful selections, both vocal and instrumental, written to celebrate this sacred period.

Therefore, the moral of the article is, "Keep abreast of the times by advertising judiciously in advance of any occasion which would seem to be valuable to you from a business standpoint." HOWARD TAYLOR MIDDLETON.

THE CENTRAL TRAFFIC BUREAU

To be Organized Shortly for the Protection of Eastern Shippers in the Matter of Freight Rates, Etc.—To Embrace Trade Bodies of Larger Cities from Boston to Richmond.

Arrangements have been consummated for the formation of the Central Traffic Bureau, with headquarters in New York, and which will embrace the various leading trade organizations of New York, Boston, Philadelphia, Baltimore and Richmond, Va., and which will endeavor to secure eastern freight rates that will compare favorably with those of the West, and to counteract the present advantages enjoyed by western shippers.

The new bureau will look after the business interests of the entire East and will be composed of ten members, five representing the presidents of the leading organizations in the respective cities and five traffic managers from the same bodies. The success attained by such a bureau identified with western cities in securing from the railroads concessions that eastern shippers were denied is responsible for bringing about its establishment.

PUSHING THE ZONOPHONE LINE.

While the offices and factory of the Universal Talking Machine Mfg. Co. are now in Philadelphia, Pa., John A. Macnabb, vice-president and general manager, will make bi-weekly trips to New York—possibly Tuesday and Thursday. Louis Silverman will look after the selling end in Greater New York.

The big stumbling block

that loses customers for many dealers is DELAY. It starts with the jobber, and pulls down a dealer's business instead of building it up.

It's bad for the customer, bad for the dealer, bad for the jobber. The customer loses his patience, the dealer his customer, the jobber his order.

If your jobber isn't prompt, he is not only standing in his own light, but, worse yet, is retarding your progress. There's no reason why you should put up with this sort of thing, and the jobber has no one but himself to blame if you take your trade where more attention is given to it.

We take a load of worries from your shoulders by always shipping your orders the same day they reach us. Always—no delay, no excuses at any time. Victors, Victrolas, Victor Records, record cabinets, fibre cases, horns, needles, repair parts, and specialties of every sort are always on hand in sufficient quantities to meet all demands.

Let us send you our latest catalog, and our booklet, "The Cabinet That Matches." Then you'll be in a position to get your goods without the least delay.

New York

INDIANAPOLIS GLEANINGS.

Columbia Regent Used With Orchestra at Noted Restaurant—Kipp-Link Co.'s New Quarters—Graphophone Recital in Church—Dealers Generally Are Optimistic Over March Outlook—Bishop O'Donaghue a Talking Machine Enthusiast—Other News of Interest.

(Special to The Talking Machine World.)

Indianapolis, Ind., March 7, 1910.

The talking machine business, both jobbing and retail, has been only fair during the last month. The record business has been encouraging.

White's Restaurant, in South Meridian street, one of the fashionable eating places of Indianapolis, has installed a "Regent" of the Columbia Co., to be used in connection with the orchestra. The "Regent" does the singing, accompanying the orchestra. The restaurant room is a very large one, and the proprietor says the talking machine has wonderful carrying power and is giving great satisfaction.

At the conclusion of the services last Sunday at the First Congregational Church, Mrs. S. K. Ruick, wife of former State Representative Ruick, and organist at the church, gave a graphophone recital, accompanying a Columbia "Regent," or table machine, with the church pipe organ. Sacred numbers were used, and so successful was the concert that the guests remained for more than an hour.

"Put On Your Old Gray Bonnet" has been one of the best selling records with the Columbia Co. This probably was due partly to the fact that Percy Wenrich, the composer of the piece, was at the Grand Opera House in vaudeville for one week.

H. A. Yerkes, head of the wholesale department of the Columbia Co., spent two days in Indianapolis calling on the trade. Mr. Yerkes is popular here and met many of his friends during his short stay.

D. Sommers & Co., who have a Columbia talking machine department, are featuring talking machines in one of their display windows.

Charles B. Sommers, resident manager of the company, is a composer of plays and is attracting considerable attention just now, as he is the author of "The Winding Way," which will be presented at the Murat next week by William Faversham.

The Indiana Phonograph Co., retailers of Edison machines, have removed their phonograph department to the rear of their store in Virginia avenue, and have installed a shoe store in the front part of the building. Business has been fair with this company, and the best selling records for the last month have been "Long, Long Ago," a short record, and "Juanita," a four-minute record.

The Kipp-Link Phonograph Co., who conduct a jobbing business in Edisons, are getting ready to move their business from the present location in East Washington street to the building formerly occupied in Massachusetts avenue by Joseph Joiner, dealer in pianos. The new location is in the heart of the new business district in Massachusetts avenue, and business is going in that direction every day.

Howard Crowe, who some time ago left the employ of the Indiana Phonograph Co. to go into partnership with H. E. Hollingsworth at Evansville, is now covering the wholesale territory for the Wulschner-Stewart Music Co., Edison jobbers. Mr. Crowe has had wide experience in the talking machine business.

It is said that plans are under way for a new building where the Grand Opera House now stands. The Musical Echo Co., dealers in Victors, are located in this building, and if the building plans go through the Musical Echo Co. will have to hunt another home, at least temporarily.

Talking machine dealers generally believe that this year will be a good one for their line of business. They say that there is not such a great lack of money as is generally the impression, and in addition to this they declare that talking machines are coming into more general use among the classes of people who are able to buy. The sale of cheap machines continues, but there is a constantly increasing demand also for

the higher-priced instruments.

The Right Rev. Denis O'Donaghue, whose transfer from auxiliary bishop of Indianapolis to bishop of Louisville, Ky., was recently ratified by the Pope, is a talking machine enthusiast. Nothing delights the bishop more than to entertain his friends with high-class talking machine music.

The New Jersey Patent Co. and the National Phonograph Co., of West Orange, N. J., have filed suit in the United States District Court to enjoin Charles A. Rigdon, of Warsaw, from an alleged infringement of the patent rights by selling Edison phonograph records at prices lower than those set by the plaintiff companies.

NEW COMPANY BEING ORGANIZED.

(Special to The Talking Machine World.)

Boston, Mass., March 3, 1910.

A corporation now being organized will soon appear in the market with a new line, in which the vertical cut record will figure. The name of U. S. Senator Crane is mentioned in connection with the enterprise.

INCORPORATED.

The American Phonograph Co., New York, have incorporated with capital stock of \$50,000 for the purpose of dealing in phonographs and other musical instruments. The incorporators are: V. H. Pritchard, W. Ferguson and Julius Roeber.

I. Davega, Jr., Inc., New York, will break ground for his new building, adjoining his present premises, May 1, and expects to be ready for occupancy in September. Mr. Davega states that his brother, of the S. B. Davega Co., now in Spokane, Wash., will not return east before October, and he may become a permanent resident of that city if certain events occur.

The National Phonograph Co., Orange, N. J., have reinstated the following as Edison dealers: Hammis Shoe Co., Portsmouth, Ia., and J. J. Hoffman, Wabasso, Minn.

TRADE HAPPENINGS IN LONDON.

Present and Future Prospects in the Trade Do Not Fully Satisfy Manufacturers—Increased Competition the Cause—Bad Selling Systems—Regarding Tariff Reform—Cygnet Horn Well Received—New Phonogram Catalog—At the Leipzig Fair—New Columbia Co. Artists for Rena Records—Bribery Punished Severely—What Is Offered in the New Record Lists—A New Portable Disc Machine—Annual Report of Carl Lindstrom, Ltd.—A Gramophone in the Desert—What Messrs. Aspir Have to Offer—A Special Accompaniment Record—Other News of the Month from London—Activities in the Provinces.

(Special to The Talking Machine World.)

London, E. C., March 5, 1910.

A somewhat peculiar condition of things seems to prevail at the present time in talking machine trade circles. It may be but one of those temporary digressions of the wheels of fortune common to most trades—especially this one—and yet a true summary of the situation forces one to the conclusion that excepting a few of the leading firms, manufacturers generally are not at heart really satisfied with the present and future prospects. Not that trade as a whole is declining to any material extent, or that it is short of the average, time considered, but simply an absence of stability combined with the increased competition which almost each month develops in one form or another, has engendered a feeling of insecurity, probably the result of that competition, the effect of which is made known by a slight but gradual falling off in orders as applied to firms individually. Dealers have to suffer under the same or similar disadvantages in that their sales are very considerably affected by the direct advertising of the large stores, along with special offers of job lots or bankrupt stocks bought at a huge discount, by which disc records are sold retail for 7d. each and cylinder records at 1½d. each. And then again, the tactics of a firm trading under the style of the English Record Co. is causing a deal of agitation and nervousness to legitimate traders. If I am correctly informed the system of trading is somewhat similar to that which obtained on the continent, a machine given free upon a guarantee to purchase a certain number of records by easy payments. There may be some phase of the situation unpalatable to the average run of dealers, but for the life of me I cannot regard it as competition in any way unfair, since it is open to any retailer of talking machines and records to conduct a similar if not better campaign in his own particular locality. The idea is old enough. There's the grocer who offers a pound of good sugar free if you buy one pound of margarine, upon which he gets a profit more than enough to counterbalance the cost of the sugar, and is then to the good. A sprat to catch a herring, as the saying goes, and applied to this industry. Well, I'll not say any more excepting this—that no dealer is worth his salt if he can't combat this way of selling the goods. So put up your wits and you'll be surprised what enterprise will do.

Just a Dip Into Politics.

And now to another subject—Tariff Reform vs. Free Trade—as discussed in my last report. The real question is, would the imposition of a 10 per cent. duty upon all talking machine goods entering this country have the effect of strengthening the hands of our home manufacturers sufficient to preserve the field against the foreign article? I want it clearly understood that personally I hold no brief for either side. Here, in these columns, it is strictly a non-party, open and friendly discussion upon a matter which has evoked many opinions, orally, from members of

this trade. Whether Free Trader or Protectionist, your views are equally welcome and will be treated quite impartially. One prominent trader, who desires to remain anonymous, has privately stated his views to me, and from which it appears that, although having the facilities to manufacture here, he strongly advocates Free Trade simply because (a) the imposition of any sort of tariff would tend to stifle healthy competition, (b) create monopolies as in America, and (c) restrict our power of buying in markets which now offer terms not to be obtained otherwise than by maintaining the open door policy. Points which certainly call for close consideration. Another aspect of the case is revealed in the following letter from H. G. Weider, manager of the Phonogram Co., whose remarks carry some weight in view of the fact that he has been engaged in commerce in all the chief continental countries, as well as America. Mr. Weider writes: "In your last issue you have opened a discussion and invited the opinion of the trade on the thorny question of Tariff Reform versus Free Trade. You have dealt with the subject in a very fair manner, and I must side with those who believe that a duty of 10 per cent. as at present proposed by the protectionists would not in the least benefit the home production. In my opinion a very heavy duty would be required to shut out cheap foreign-made unpatented machines in order to give a chance to the home producer. As regards those goods which are patented a different situation is created by the liberal Patent act, which already benefits the home trade and manufacturer, probably what protection would never do. The unpatented machines have a market of their own; they could not bear a heavy duty because the price would correspondingly increase and therefore the demand would fail. It could not pay to manufacture cheap machines here. On the other hand, this trade is a luxury, and as such the people are always prepared to purchase the best, no matter from where it comes."

The New Cygnet Horn.

The new "Cygnet" horn for Edison phonographs is now on sale here. It has met with a good reception in the trade and all agree that for beauty of form, convenience, method of diffusing sound, volume, etc., it is far and away ahead of the old-type trumpet. A real improvement, in fact, which will act as a further argument in favor of the Edison phonograph.

Fire Causes Damage.

A disastrous outbreak of fire occurred this week at the premises of E. Oppenheim, 57 Scruton street, London, the cause of which at the time of writing remains undiscovered.

The April Edison Record.

Particular interest attaches to the announcement that "The Divine Sarah" has at last consented to pass on to posterity that wonderful voice of hers, which has won the homage of kings and queens and the admiration of countless thousands in the course of her remarkable career. The great Sarah Bernhardt under exclusive contract to make Edison records! A tribute, indeed, to the Edison phonograph! The five records which comprise some of the best excerpts from her repertoire will shortly be issued to the trade, who, needless to say, have placed heavy orders. The usual monthly (April) impression reveals a very strong list as follows: Amberol Records—"Bronze Horse Overture" (Auber), National Military Band; "Staccato Polka" (Mulder), Miss Isobel Carol; "My Girl From London Town" (Williams and Godfrey), Billy Williams; "Medley of Welsh Airs" (Various), Alexander Prince; "Molly O'Morgan" (Letters and Godfrey), Miss Florrie Forde; "My Pretty Jane" (Bishop), Ernest Pike; "When the Bugle Calls," Arthur Osmond; "Vanity Fair" (Carolan), Peter Daw-

son; "Don't Be Alarmed" (Scott and Weston), George Formby; "Gems of Ireland," National Military Band; "I'm Longing for the Old Days, Marguerite" (Helf), Manuel Romain; "Old Jim's Xmas Hymn" (Gray), Anthony and Harrison; "Cavatina From La Favorita," H. Benne Henton; "Down in the Little Mossy Dell" (Cocroft), Stanley and Gillette; "The Thunderer and the Gladiator Marches" (Sousa), Sousa's Band; "Saved by Grace" (Crosby), Edison Mixed Quartette; "Lady Love" (Gumble), Billy Murray and Quartette; "Mia Cara Waltz" (Hammerstein), American Symphony Orchestra; "My Love Is Greater Than the World" (Helf), W. H. Thompson; "Ludwig's Air Castle," Miss Ada Jones and Len Spencer; "Wait for the Wagon Medley," Premier Quartette; "A day at West Point" (Bendix), New York Military Band. Amberol Grand Opera Records—"Freischutz Grand Air d'Agathe (Weber), (Sung in French), Marguerita Sylva; "Carmen-Romance de la fleur" (Bezet), (Sung in French), Florence Constantino; "Romeo et Juliette-Valse" (Gounod), (Sung in French), Blanche Arral; "Hamlet-Brindisi" (Thomas), (Sung in Italian), Ernesto Caronna; "Tannhauser-Blick ich umher" (Wagner), (Sung in German), Walter Soomer. Standard Records—"Rinking Two Step" (Hume), and "Coldstream Guards Regimental March" (Traditional), National Military Band; "Dear Old Bow Bells" (Pether), Ernest Pike; "Settle Up, Settle Down" (Scott), Billy Williams; "The Jolly Japanese" (Morse), Alexander Prince; "Tune the Old Planner" (Godfrey and D'Albert), Miss Florrie Forde; "Archibald! Certainly Not," Arthur Osmond; "It's the Alpine Dress You're Wearing" (Mellor, Lawrence and Gifford), Stanley Kirkby; "Old King Cole" (Clare and Formby), Geo. Formby; "Neighbors Below" (Wilson), J. C. Scatter; "Dixieland" (Haines), Sousa's Band; "I'd Rather Say 'Hello' Than Say 'Good-Bye'" (Helf), Manuel Romain; "To a Wild Rose," Victor Herbert's Orchestra; "Before I Go and Marry I Will Have a Word With You" (Berlin), Miss Ada Jones; "Blest Be the Tie That Binds" (Nageli), Anthony and Harrison; "Cloud Chief" (Phillie), American Symphony Orchestra; "Can't You See?" (Gumble), Byron G. Harlan; "A Coon Wedding in Southern Georgia," Peerless Quartette; and "Miss Liberty March" (Daly), New York Military Band.

Twin Co.'s Strong List.

The first list of records for the month of

The STROH VIOLIN

A new instrument possessing a VIOLIN TONE of great beauty and remarkable power.

The "Stroh" is constructed largely of aluminium, but the absence of any metallic quality of tone is another notable feature.

Musical Instrument Dealers and others interested should write for free descriptive booklet to the Sole Mfrs.

GEO. EVANS
(Successor to CHAS. STROH)
94 Albany St., Regents Park, London, Eng.

FROM OUR LONDON HEADQUARTERS—(Continued.)

April has been issued by the Twin Co. It is a strong list, too, and some good old favorites—such as "Ever of Thee" and "When You and I Were Young, Maggie," excellently rendered by Mr. Philip Ritte—are included therein.

Phonogrand Co.'s Catalog.

A handsome catalog comes to hand from the Phonogrand Co., whose machines have caused quite a sensation in the trade. The principle of construction is entirely original, especially the method of sound distribution. In appearance the Phonogrand is more than equal to the best, and it forms a beautiful piece of furniture, as will be seen by a glance at the illustration elsewhere. Oak and mahogany are the chief woods used in its construction, which is of best English workmanship throughout. The reproducing powers of all types of the Phonogrand is full, distinctly pleasing, and is evenly distributed in all directions through skilfully secreted little wooden horns inside the cabinet, the walls of which are double sounding boards, ornamentally perforated. The prices are fixed to be within the reach of all pockets, and I may say the trade terms are certainly generous enough to warrant every support from dealers in all parts of the world. Those interested are well advised to obtain a copy of the Phonogrand catalog, which the company will send free upon request to headquarters, 64 and 66 Oxford street, London, W.

Visitors to Leipsic's Famous Messe.

A fairly representative section of English traders have announced their intention of spending a few days at the famous messe, which opens at Leipsic March 7, and continues until the 12th, inclusive, and as usual novelties will be much sought after. I shall hope to divulge some interesting particulars in my next report. Of those who will make the journey from here, I have received the following names: A. F. Vischer (Favorite Co.), Henry E. Heyder (Klingsor Works), G. Andres (Andres Bros & Co.), A. Balcome and F. Samuel (Barnett, Samuel & Sons,

Ltd.), O. Ruhl (Beka Record), Mr. Herzog (New Polyphone Supply Co.), Mr. Cullum (Lockwoods), E. C. Paskell (Colmore Depot), F. Nottingham, G. Murdoch and R. Fulton (Murdoch & Co.), E. Oppenheim and L. Arnaud (Pathe Freres).

Edison-Bell Record List.

In these times of scientific recording it would be difficult indeed for anyone to individualize any particular make of record—especially in discs—as being superior in quality to others, when, as a matter of fact, none are beyond comparison in that respect, but only in so far as concerns price, and the value of the artist from the standpoint of his or her popularity. There are one or two obscure makes of record which are characterized by most indifferent recording, it is true, but a distinctly pleasing feature of the progress made in this industry during the last year or so is undoubtedly the general high standard of recording maintained by our leading manufacturers. Evidence reaches me each month, and I would instance some of the current impressions from the list of Edison-Bell double discs, as follows: "Yip-I-Addy," and "The Girl in the Clogs and Shawl," well rendered by C. Harrington; "Settle Up, Settle Down," and "We're All Waiting for a Girl," by Fred Murray; "Put on Your Old Green Bonnet," by Fred Vernon, and "Cupid's Garden," a pleasing intermezzo, played by the Bohemian Band; "I've Been Out With Charlie Brown," by A. Elwood, and "The Old Arm Chair," by S. Barnes; "To the End of the World," by R. Carr, and the popular "Ship Ahoy," by G. Wilson, who also gives us on another record "Molly O'Morgan," and "Don't Take Me Home"; "Come Into the Garden, John," by J. Howard, and "Billy Whitlock's Aeroplane," descriptive; "I Used to Sigh for the Silvery Moon," and "Let's All Go Down the Strand," by A. Elwood; an excellent piece by the Royal Military Band is "The Ghost of the Mayor," Part I and II; "The Dashing Duke," and "The Gladiator's Farewell," by the London Regiment Band; while last but not least are the splendid

series of records by the Band of H. M. King's Colonials, "Echo Des Bastions," "The Grasshopper Dance," "Raymond Overture," Part I and II, "The Dollar Princess," waltz, and "Yip-I-Addy," waltz. Cylinders, 2½ inches, "Let's All Go Down the Strand," Arthur Elwood; "I Used to Sigh for the Silvery Moon"; "Yip-I-Addy," and "The Girl in the Clogs and Shawl," by C. Harrington; "Waiting for a Girl," "Settle Up, Settle Down," by F. Murray; "The Old Green Bonnet," by Fred Vernon; Crystal, 4 inches, descriptive, "Sailor's Life," "March of Brigade"; songs, "Lighterman Tom," "All Waiting for a Girl," and "Dear Louise." These last, by the way, are particularly good records, and dealers will hope to see further issues in the near future.

New Exclusive Artists for Rena Records.

We are informed that the Columbia Phonograph Co. have just concluded two important contracts, retaining Scott Skinner, the Strathspey King, and Tom Owen Wales' own comedian, exclusively for Rena Records.

Mr. Scott Skinner, the veteran Scotch violinist, has made Rena records of a large selection from his repertoire of over 3,000 Strathspeys, reels, etc. This is his first appearance on half-crown needle-cut records, and his first list includes a number of titles never before recorded.

Something New in Portable Type

Tom Owen makes a novel offer which Welsh dealers would do well to carefully consider. He proposes to advertise his Rena records at every performance of his touring company, and will prepare special slides announcing the names of local dealers selling the Tom Owen records. These slides will be thrown on the screen during the cinematograph show. This linking up of the artist, his records, and the dealer, is probably one of the most effective advertisements ever devised.

Latest Gramophone Records.

The issue of yet another gramophone record, "Carceleras" (Chapi), by Madame Tetrassini, and two, "Mamma Mia ehe vo Sape?" (Wutile), Nea-

politan song; "Pour un Baiser" (Tosti), by Signor Caruso, have fulfilled all expectations; their success being instantaneous. Some special titles, too, appear in the usual monthly supplementary list (March), and from the point of view of recording alone, they will command big sales. Among the titles, most prominent of all is the famous waltz of the season, "The Druids' Prayer," played by the band of H. M. Coldstream Guards, who are also responsible for four other fine numbers: "Musica Proibita," "Students' Says," "Mussinan March," and "Ginger Two Step." A splendid rendition of "The Sailor's Grave" (Sullivan) is given by John Harrison; "Absent" (Metcalf), sympathetically sung by Evan Williams; as, too, is "Queen of Connemara," by Herbert Brown; "The Midshipmite" (S. Adams), a popular sea song, by Thorpe Bates; "The Curfew," Robert Radford; Mr. Harry Dearth, new to the Gramophone list, introduces us to "Stone Cracker John" (Eric Coates); "Won Pia di Fiori" (Mozart), an excellent record, by Mme. Kirkby Lunn; "Time's Garden" (Goring Thomas), a song of resignation, sung by Miss Ethel Hook; we have two fine issues under humorous: "My Mother" (from 'The Arcadians'), by Harry Carlton, and "Safest 'o the Family," by an old entertainer, Harry Lauder; Quartet, Miss Perceval Allen, Miss Alice Lakin, Messrs. J. Harrison and R. Radford, "Believe Me, if All Those Endearing Young Charms;" a fine violin solo, "Air" (Bach), by Miss Kathleen Parlow, and "Seeling Study in E-flat minor;" Herr Wilhelm Backhaus, at the piano.

The Corrupt Trade Practice Act.

For offering the sum of 10s., said for the purpose of influencing an order, to a department manager of Messrs. Catesby & Sons, Tottenham Court Rd., who, by the way, handle among other things a good trade in talking machines, etc., a commercial traveler was recently mulcted in a fine of £10, and five guineas costs. Certain in-

dications that the law will put down this underhanded method of competition. A fair field and no favor is what we want!

New Portable Disc Machine Soon.

Something entirely new in the portable disc type of instrument will be announced shortly by Barnett Samuel & Sons, Ltd., and I hope to give details in our next issue. Dealers have every reason to congratulate themselves upon connections with this house, for there is always some new line, either in machines or especially good records, issued to help along sales and create trade when things might otherwise be rather quiet. Of the forthcoming Odeon and Jumbo impressions I am told a revelation of quality may be expected. The few advance samples I was privileged to hear on the occasion of a recent call were particularly choice specimens of recording, "Yip-I-Addy-I-Ay" (two-step), Odeon record, by the Grenadier Guards Band, and "Druids Prayer Waltz" on a Jumbo record by the Salon Orchestra—described as a hit of the season—being all that could be desired in that respect.

Carl Lindstrom's Splendid Report.

If any evidence is wanted to combat the pessimist or to encourage the hard-working retailer of talking machines one has only to turn to the excellent annual report of Messrs. Carl Lindstrom, Ltd., of Berlin, to find all one wants. It makes pleasant reading, indeed, these days and will go a long way to reclaim the good opinion of investors, who, truth to tell, have been in need of such stimulating influence as this balance sheet will surely effect for the general good of the industry. For the year ending 1909 Messrs. Lindstrom's total turn-over amounted to 4,035,000 marks, against 2,600,000 during 1908. Of this amount 1,099,588m. 94p. figures as gross profit, while the net profit is 365,034m., sufficient to provide a dividend of 15 per cent. and to carry over a substantial amount to the

reserve capital, which now totals 175,000m. Remarkable evidence of the firm's stability is shown by the fact that the total estimated value amounting to over 68,450m. of the tools, furniture, and fixtures, patents, material, motor lorry, accounts, etc., has been written off against depreciation. The phenomenal increase of trade during last year is not a little due to the energy and enterprise displayed by the administrators of this company, whose fine instruments have in consequence achieved popularity in all parts of the world. By the way, I notice that the Lindstrom Co. now number a staff of 520, which bids fair soon to increase. Congratulations!

New Beka Titles.

Special attention is drawn to the following titles appearing in the Beka record list for March. Harry Champion in his original songs, "Boiled Beef and Carrots" and "You Don't Want to Keep on Showing It," heads the bill this month, as well he may, for this is a record which dealers will find a veritable gold mine from a sales point of view. The breathless energy which Mr. Champion throws into the singing of these two popular song-hits is really wonderful, for, excepting an occasional few seconds' rest afforded by the orchestral interlude, he never seems to stop to take a breath. Marathon singing with a vengeance! Other good records are selection I. and II. from "The Dollar Princess," "Morris Dance" and "Shepherd Dance," played by the Beka London Orchestra under the able baton of Julian Jones; "Thy Beaming Eyes" and "In Sympathy," by G. Wigley; "Life's Lullaby" and "Sunshine and Butterflies," Eugenie Ritte; "True Till Death" and "Eileen Alannah," Harry Thornton; "The Corporal's Ditty," Robert Carr, on the reverse, "A Thousand Leagues Under the Sea," by Norman Williams; "Silver Bells" and "Radetzky March," by Fairy Bells, with orchestra.

FROM OUR LONDON HEADQUARTERS—(Continued.)

believes this has never known life in our overseas dominions. Some little time ago I met in a desert in eastern Asia a party of tough pioneers—men to whom exploring, fighting and hard travel were the very breath of their nostrils. There was a little hotel where we stayed kept by a Frenchman. Frenchmen are the usual hotel-keepers east of Suez. Dinner over, one of the party raked out an old gramophone, one of the first of its kind—a creaky, metallic-scrapping horror. There were some discs with old English tunes and dances on them. The boys shouted the choruses and danced to the music. Then came "Home, Sweet Home" and a sudden silence fell on the group. The second verse drew to an end. I looked around. Every man of them had crept out of the hotel parlor. They had not forgotten home.—Says F. A. McKenzie, in the Mail.

Columbia Co.'s Fine List of Titles.

The current Columbia list teems with good titles and special numbers well calculated to advance the company's products yet another step in the estimation of dealers and users alike. Exceptional quality, too, is offered this month in the shape of artistes, as will be seen from the following, which I particularly draw attention to, because in not one instance is there a record that even the most critical could take exception to. And for that reason, quite apart from the fixed competitive selling prices, they furnish possibilities of a quick turn-over for even the least enterprising of record dealers. Here are the issues: 10-in. Columbia single—"Dream of Cleopatra, valse," by the Empire Symphony Orchestra; "Humoreske," Band of H. M. Scots' Guards; "For Months and Months and Months," Fred Vernon. 12-in. single—"Sands o' Dee," Edgar Coyle; "Prize Song," from "The Meistersinger," by Prince's Orchestra. Rena 10-in. double—"A Corsican Maid" and "Hello, You Fellows," Harry Fay; "Rolling Down to Rio" and "Youth," Edgar Coyle; "My Dream of Love"

("Dollar Princess"), Alfred Reeves, and "The Ring of Roses" ("Dollar Princess"), duet, by Ethel Williams and Alfred Reeves; "Il Bacio" and "Softly Awakes My Heart," cornet solos, by Sergt. Leggett, of the Band of H. M. Scots' Guards; "Hobomoko" and "Carrillon in E flat," Band of H. M. Scots' Guards; "A Fallen Star" and "My Old Dutch," imitation of the famous Albert Chevalier, by Arthur Leslie. Rena 12-in. double—"The Pretty Creature" and "Woo, Thou, Thy Snowflake," David Bispham; "Peer Gynt Suite," on two records—No. 1, "Morning"; No. 2, "The Death of Asa"; No. 3, "Anitra's Dance"; No. 4, "Dance of the Imps in the Hall of the Mountain Kings," played by the Band of H. M. Scots Guards. The list, broadly considered, is an excellent one.

Messrs. Aspir's Announcement.

Elsewhere in these columns Messrs. Aspir, London, make a strong appeal to open up business relations with traders located in all English dependencies and foreign countries. The goods they have to offer represent just those lines which may be described as real trade winners, having in view their general good quality and exceptionally reasonable prices. I had the pleasure of inspecting the series of different model "Epiphone" disc machines, which are put up in various woods, strong and accurately assembled motors, sapphire sound box, giving a very pleasing reproduction, while a special feature of the tone arm is the embodiment of a section made of a sort of composition which it is claimed has a mellowing effect upon sound passing therethrough. Surmounted by a nice trumpet, the whole machine presents a splendid appearance of good workmanship and finish which should commend itself to the most critical. Made in two sizes, 11-inch and 12-inch, selling at 3s. 6d. and 3s. 9d., respectively, the "Aspir" double disc sapphire-cut is gaining ground in the favor of those enthusiasts who, like myself, believe in the future of this type of record, and

dealers are not slow to recognize this fact. The company have a very strong repertory of French titles; indeed, I may say it is one of the best lists seen in the trade, and while one would like to see a stronger representation of English selections, there is nevertheless a fair sprinkling of well-known pieces suitable for sale in English-speaking countries. I am told this is having attention, and in the course of time a big list of topical English subjects will be dealt with. In the meantime there are good prospects for dealers who stock up on these very fine records, some popular titles of which are as follows: Mendelssohn's "Spring Song" and "Salut d'Amour," two magnificent violin solos by M. Schumacher, first prize, Leipzig Conservatoire; "Reverie" (Schumann) and "Gavotte" (Lulli), two equally well-recorded violin solos by M. Gras, first violin, Paris Opera; "La Voix des Cloches" (Luigini) and "Romance" (Weussen), played by Symphonique Orchestra of the Grand Concerts Rouge; "The Dollar Princess" and "The Merry Widow," by the Falk Tzigane Orchestra; while the famous band of the Garde Republicaine, Paris, renders the following in an exceptionally pleasing manner: "Waltz from Faust" and "Sourire d'Avril"; "Gamera," "Polka for Four Cornets"; and "Invitation to the Waltz" and "Song of the West," clarionet duet.

A Distinguished Visitor.

An interesting incident occurred at the Worship street offices of the Columbia Phonograph Co. a few days ago. A gentleman of striking personality, grizzled and tanned, apparently, from a life of outdoor experience, entered, attended by a striking figure of ebony hue. He brought a Columbia graphophone with him for repairs, the cabinet having been smashed. He spoke of Morocco and the people and explained that the instrument had been in use in that country. The motor was tested and found in perfect working order; only the cabinet was damaged. The visitor was referred to a dealer,

and the nearest (Keys, Finsbury Pavement) indicated. It was only when the military white man and his black bodyguard had left the offices that his identity was recognized. He was no less a person than Kaid Sir Harry Maclean, K.C.M.G., resident military adviser attached to the court of the Sultan of Morocco. He had bought the machine on a visit to London some years before to replace an earlier Columbia.

Special Accompaniment Records.

On the new supplement of Rena records for the present month there is listed a record that calls for special attention. We refer to No. 1280, which offers on the one side an organ accompaniment for "Jesus, Lover of My Soul," and on the reverse a piano accompaniment for "Rock of Ages." Much has been written and printed of the possibilities of the talking machine, and there is an ever-present feeling that accompaniment records be provided, so that a vocalist might be independent of pianoforte or other instrument. There is no doubt that in many homes where either the piano or the skill to play it is absent such records would be appreciated, but the doubt always remained whether those homes were numerically strong enough to make the issue of such records worth while as a commercial proposition.

Commendable enterprise is shown in this experiment by the Columbia Co., and it is a development which deserves the close attention of every dealer who has at heart the welfare and longevity of the business as a whole. Looking forward, it is surely no very risky piece of vaticination to prophesy a time when the talking machine and an outfit of a dozen or so accompaniment records will find a place in thousands of family circles where vocal music is at present impossible or difficult for lack of accompaniment. We should like to see the trade center its energies upon creating a demand which will lead to the development of this new, and, we believe, useful sphere of influence.

Current Zonophone List.

From the current Zonophone list the following titles are to hand: 10-inch—Grand opera, "The Duel Scene" from Faust, by E. Pike, H. Thornton and J. H. Scotland; "Our Miss Gibbs," selection 1, and "In Treue Feste" march, by the Black Diamonds Band. 12-inch—"Why Do the Nation," from the "Messiah," by Harry Dearth; gems from "Bohemian Girl," on two records, by the Zonophone operatic party.

Ideal List of Gramophone Records.

A pleasing feature of this month's happenings is the very fine competition inaugurated by the Gramophone Co. and the generous amount of advertising space taken in the leading London and provincial newspapers to give public intimation thereof. The scheme is called "My Ideal List of Gramophone Records," and for the best list, in the opinion of the adjudicators, a first prize of £100 cash will be given; second best, £50; third, £25, in addition to which there are 50 other prizes, each of records to the value of £5. Dealers have been supplied with a liberal stock of publicity matter and voting forms to hand to the inquirers who will go to them in response to the company's advertisements, and by the way a handsome recognition is awaiting the dealer whose name appears on the successful list. The object of the competition is, of course, to create extra sales, and help to win over some of those good folk who hitherto have failed to fully appreciate the musical capabilities of a good instrument as a source of enjoyment and profit. And the enthusiasm displayed by the trade is more than sufficient to secure that success which such a generous expenditure deserves. Perhaps next month I shall be able to publish the result, and it will be interesting to hear for the first time in which new direction the public taste lies.

Don't be afraid to thank a customer who recommends your goods to someone else.

NEWS OF PROVINCIAL DOINGS.

Business throughout the country is not by any means brilliant, indeed, in many quarters quite a depression has set in, despite the fact that now election times are over, it was confidently expected an improvement would quickly follow the disturbance of trade in talking machines, which that emotional period produced. I would even go so far as to say that in the large towns dealers seem to be flagging in that energy which must at all times be consistently employed, and more especially against the trade-destroying influences of elections, short time in the factories, labor troubles and other local setbacks. The dealer has other sources of discouragement in the shape of skating rinks and cinematograph shows. I know, which deflect the home enjoyment of the masses. But what of it? There always have been difficulties since creation, and always will be. No matter what you have to contend with, hard work will see you through safely. Remember that. Some dealers in the provinces made the general election a means whereby to gain publicity. They announced the results in their windows and gave a talking-machine concert; and you may be sure that many of those who came simply to learn how the parties stood, went away with a more favorable opinion of talking machines than they held before, and perhaps decided on a purchase.

In the rural districts and small towns, trade is very satisfactory, all things considered, and is likely to remain so for some time.

The Johnson Talking Machine Co., of Liverpool and Birmingham, have recently introduced a novelty in the shape of their "Martinphone" needles. These are made by a new process, and are described as of silver steel, which it is claimed, ensures a fine reproduction. The fortunes of war have been in evidence somewhat of late, a noticeable instance being in the matter of Hulme & Co., of John Bright street, Birmingham.

who have had to call a meeting of creditors after nearly seven years' trading. A statement of affairs shows liabilities of £1,179 odd, against estimated assets of £381 9s. 6d. A resolution was passed agreeing to accept debtors' offer of 6s. 8d. in the pound, payable in quarterly instalments. In certain provincial centers some concern is expressed regarding the increased popularity of a 1s. weekly payment system for machines and records. Well, of course, cash business is best, but you have to meet competition these days on its own ground. Sensible dealers recognize this, and wisely go ahead to supply on the instalment basis, if necessary.

In Bristol, Cardiff, Swansea and other Welsh centers, the Edison advertising month is now proceeding, much to the satisfaction of traders located there, who, by the way, are enjoying greatly increased sales of Edison phonographs and records in consequence. Apart from that, the Edison scheme is doing good work in educating the skeptics to the value of good advertising as a real profitable investment. For the matter of that, such enlightenment is forced upon them, they can't help it, they must believe the evidence of results, and their conversion is thus assured. In the matter of advertising enterprise on the part of a dealer, commend me to Thos. Edens Osborne, of Belfast. He only takes small spaces, but they are equal to half double-column ads., because the positions are located among reading matter, and, furthermore, the advertisements are effectively worded, and in many instances, illustrated. It is not surprising, therefore, to learn that his Gramophone and Edison phonograph business now comprise his chief source of profit. In Manchester trade is rather spasmodic, but for all that, it might be worse, considered in bulk. The Colmore people are doing well in Renā records, and Pathé products, and have secured some nice business from the rinks and cinematograph halls. Messrs. Robinsons, of Deansgate, have been fortunate in the export field, and report an ever increasing clientele abroad, which more than compensates for the indifferent home trade. In reckoning up the results of the recent Lancashire advertising of the Edison goods, Liverpool traders find that trade has materially increased, while its beneficial effect is still present, a state of things which the National Phonograph Co. say is very gratifying.

THE ATTACHMENT PROPOSITION

Of National Phonograph Co. Delayed by Factory Congestion—To Ship the Goods About April 1—Particulars of the Proposition Given by General Sales Manager Dolbeer—New Records to Attract Public Interest.

While the National Phonograph Co., Orange, N. J., have been laboring to shape up the Amberol attachment proposition, which they originally figured on giving the trade no later than March 1, they have been compelled to postpone the date on account of factory congestion on their regular output. The installation of additional molding apparatus in the record plant has relieved the situation and the company now announce (March 15) they will be in a position to ship these goods to jobbers on or about April 1, when they will immediately go into the hands of the dealer. The particulars of the proposition are given by F. K. Dolbeer, general sales manager, in the subjoined bulletin, No. 46, to Edison dealers:

"As briefly outlined in our letter of Dec. 6, 1909, on the subject of combination attachments, we have for some time past been considering as to how we could place these before the public in a way which would be productive of immediate results and at the same time slightly increase the dealers' profit. We have decided to inaugurate the plan as clearly set forth below, and by means of which, with your aggressive efforts, we hope to again bring into active use many Edison phonographs which may have been laid aside, due to their original equipment being for the standard (two minute) records only.

"This plan, which to the consumer means hardly more than the price of the special Amberol records furnished in connection with the attachments, should prove an incentive for every dealer to make a thorough canvass of his territory, thereby ascertaining the names of all Edison phonograph owners, and to such as may be without the attachments this matter can be convincingly brought to their attention; and as we have pointed out to you in the past, the sale of an attachment means a new and continued customer for Amberol records, the dealers' profit on which is unusually attractive.

"We will, until further advised, place in the hands of the trade a combination attachment

outfit consisting of the attachment and ten special Amberol records, in a special container, at the following list prices, less the dealers' discount: Gem, \$5; Standard, \$6; Home, Triumph, Idelia, Balmoral, Conqueror, Alva, \$8.50 each.

"These ten special Amberol records have been made for the express purpose of creating a new interest on the part of phonograph users in Amberol records, and to that end our recording department have used their best efforts, succeeding in producing a variety in both artists and material which will please the most critical. Such records are only to be sold in conjunction with an Edison combination attachment, at the stipulated prices, and the seal of the package must not be broken before delivery to the customer. No objection will be made should you desire to open a single package of these special records to be used as samples for demonstrating purposes.

"In consideration of the special price at which these records are sold no allowance will be made for breakage. These special records will not be returnable to the factory under any exchange proposition. Orders should be placed with your jobber immediately (who will be in position to make shipment early in April) and the goods to go on sale as soon as received.

"Important.—The utmost care should be used in ordering these special sets of records, so as to 'even up' with the attachments you have on hand, as these records cannot be sold in any other manner than as above outlined. Violations of any of these provisions will be summarily dealt with."

The jobbers were also given instructions pertaining to this offer at the same time.

BLOCK WITH SCHMELZER ARMS CO.

Elwood I. Block, who for the past three years has been connected with the Victor plant at Camden, N. J., will, within the near future, join the forces of the Schmelzer Arms Co., Kansas City, Mo., as expert repair man. He will spend the next ten days inspecting the Edison plant before locating permanently with this concern.

A. R. Pommer who recently purchased the capital stock of the Pacific Phonograph Co., Oakland, Cal., will continue running the business under the old name.

COLUMBIA CO. ADVANCE.

Cheery Report by General Manager Lyle—Excellent February Business—Remarkable Increase in Demand for High Priced Machines and Records—Latest Achievements of the Company in Various Directions—Important Additions of Famous Artists.

Replying to inquiries from The World as to the status of affairs in the trade, Geo. W. Lyle, general manager of the Columbia Phonograph Co., general, replied:

"We have just closed a most remarkable February, exceeding by a large amount the business of January, although there were three less business days, and exceeding February of last year by over 20 per cent. One of the gratifying points in connection with the increased business is the fact that it is general, every section of the country sharing in the better showing. An interesting feature of the business is the remarkable increase in the sale of our high-priced product, all types of Grafonolas and high-grade records, and the indications are that we will be able this month to give better service than ever before, as by increased operations we are rapidly overtaking the huge and increasing demand.

The company further say: "Things have been moving in Columbia circles lately, and moving fast. It is now generally known that Celestina Boninsegna, the bright particular star of the Boston Opera Co., has signed an exclusive contract with the Columbia Co. The Columbia Co. have further effected something of a scoop in securing in advance, through the Fonotipia Co., the exclusive service of Elvira de Hidalgo, the young Spanish soprano, who has lately made such a furore in opera at Monte Carlo, and who arrived in New York the last week in February, to take leading coloratura roles in the Metropolitan Opera House during the remainder of the season. This youngest of all the great sopranos is said to have a voice of extraordinary brilliancy and power, with strongly sympathetic qualities, and a personality as engaging as her voice is attractive.

"In Boninsegna the Columbia have secured a star of the first magnitude, whose remarkable success with the Boston Opera Co., both at home and on its recent road tour, has made abundantly evident the fact that opera in America will not lack the finest possible delineation of soprano roles while such a supreme artist is available. Some of her first recordings have already been heard by the officers of the company, and it must be said that they are superlatively good. Exclusive arrangements have also been completed with Mardones, the distinguished basso of the Boston Opera Co., whose splendid work has been productive of unusual pleasure during the season now closing. He is said to have the rare combination of great dramatic ability, with a basso voice of

real expressiveness and magnificent sonority and power. His recent appearance as the star in Boito's Mefistofele is reported to have been a genuine triumph.

"In addition to all this the Columbia Co. have enlisted that famous and inimitable comedian, Raymond Hitchcock, for an exclusive series of his song-monologues, sung as only that versatile fun-maker knows how to do these things. It is claimed that recordings quite like those of Hitchcock, or as good in their particular line, have never been heard before. The first one will be issued shortly, and an enormous sale is confidently expected."

TALKING MACHINES AS BARMETER.

J. C. Roush Asserts That the Talker Is a Perfect Measure of Business Conditions.

(Special to The Talking Machine World.)
Pittsburg, Pa., March 9, 1910.

In a personal interview with The World today, J. C. Roush, manager and secretary of the Standard Talking Machine Co., said:

"I believe that there is no surer barometer of existing business conditions than talking machines. During the late 'depression' it was alleged that Pittsburg was hit pretty hard. While along with the steel and other industries, the talking machine business bore its share of the suspended trade, it still held up remarkably well with us as compared with some other localities in the country. With the resumption of business we had less distance to return to our former position. I can safely say that we are now, during this spring season, doing better than we ever did in any previous year in our history, and while some of this may be modestly accredited to our increasing business, it, in my opinion, fully justifies the statement that the coming year is to be one of the largest yet.

"When I say trade conditions are good, it not merely voices our own sentiments but reflects the attitude and condition of the smaller merchant in the towns and the villages with whom we are in direct touch. We have assurances from every section in the shape of substantial orders, which, for this time of year, are no less than remarkable."

RULING ON CINEMATOGRAPHS.

General Appraiser Hay Denies Protest That They Are "Household Effects."

(Special to The Talking Machine World.)
Washington, D. C., March 12, 1910.

A decision has been rendered regarding the admission of a moving picture machine or cinematograph by the board of general appraisers when they are attempted to be brought in as "household effects." The importer claimed on this account they should be duty free.

General Appraiser Hay said in this connection: "The protest was submitted without testimony. From an examination of the papers we find that the cinematograph in question was imported from Montreal with certain household effects which were admitted free of duty. We assume that the instrument in question is used in connection with the display or exhibition of moving pictures. Without some evidence before us to show the use to which it is put, or that it is in some way similar to the articles enumerated in paragraph 520 (household effects), we cannot hold that it is entitled to free admission."

A "Pointed" Talk

One of the most important matters in connection with the development of the talking machine business to-day is the sale of a talking machine needle that is correctly made—made by the greatest authority in the world—a needle, the POINT of which is warranted and which insures the best reproduction for each individual quality of tone—a needle that doesn't wear out the record; that preserves its life, and always gives forth the very best quality of tone that is contained in the record. Such a needle is the

CONDOR

It has the highest and most perfect finish, the smoothest grain, and gives unexcelled satisfaction.

Why not get the customer who purchases a high-grade and a high-priced talking machine to buy needles of the highest quality, such as the Condor?

One cannot be satisfactory without the other.

We shall be pleased to give the fullest information to all interested. Address

with the veneered kind of wood horns now on the market.

You do not have to invest any money to test our claims of superiority.

HAVE ONE SENT ON APPROVAL

Your choice of *solid* Oak, Mahogany, or Spruce, for any make or style of cylinder or disc machines.

If your jobber cannot supply you, we would be very glad to send you a sample line of our horns on approval, and if you are not entirely satisfied with the superior merits of the MUSIC MASTER, you would be at liberty to return them to us for credit.

SHEIP & VANDEGRIFT, Inc.

PHILADELPHIA, PA.

AROUND BOSTON TOWN.

A Clever Advertising Stunt—Peary Victor Records Liked—Miller Optimistic Over the Victor—Eastern Talking Machine Co. News—Other Items of Interest.

(Special to The Talking Machine World.)

Boston, March 9, 1910.

A very dainty little advertising stunt, originated by Mr. Fitzgerald at the Eastern Talking Machine Co. store recently, has set the Boston talking machine men to wandering down Tremont street quite frequently in order to look at the display window in which it is being shown. Mr. Fitzgerald has taken 1,000 of the front covers of the song "Put On Your Old Gray Bonnet," cut out the beautiful head and shoulders of the woman and arranged them upon the glass of the window in the form of the figures 366, the number of the record that bears that catchy song. The dainty lavender color scheme and the manner in which he has arranged the bonnetted heads add to the attractiveness of the display and

compel attention from the passersby. It is Mr. Fitzgerald's original idea. Now that the doors can be kept open during the day, this record is frequently played and attracts a great crowd. It makes one of the most effective advertising stunts pulled off in Boston for some time.

Another very attractive window display has been made this week by Manager Sylvester, of the talking machine department of the C. E. Osgood Co. In fact the window displays made by this department in the past six months have been exceptionally good and business has developed materially as a result.

M. A. Carpell, of the Herzog Cabinet Co., spent a few days here this week in the interests of his company. He reports business as generally excellent.

The Eastern Talking Machine Co. are taking care of the exchange proposition satisfactorily, but find themselves handicapped through the inability of the factory to supply records fast enough. It is harder to get in a supply of Amberol records than it is to get a raise of salary

from a penurious boss. The retail department has made some great strides recently under Mr. Freeman's direction and the new Victrola room is a business getter. Mr. Freeman reports that he has recently sold a number of grand opera records to grand opera singers in the Boston company, as they enable the singers to "get a line" on how their rivals sing particular songs.

Manager Boyd, of the Iver-Johnson talking machine department is especially pleased this spring with the results in the jobbing Edison department. Business here has shown a remarkable improvement. In the retail Victor line the higher priced machines have the call. This firm are making a special feature just now of the popular or topical songs and the amusing monologues as the store's customers are largely men who like just that sort of record.

The Peary records on the Victor have been responsible for a big jump in business for the Oliver Ditson Co. this month and it is interesting to note that the chief reason why people wanted the record was to hear his voice rather than the story he relates. The story is not new to them, but his voice is. All had read his story, but very few had ever seen or heard the man, and as many had previously heard the Cook record they wanted to judge the two men by means of their voice. Manager Winkelman, at the Oliver Ditson Co., is making some good advertising out of the new Victor records, such as the Miserere scene. "Il Trovatore" was sung here recently and these records were used with excellent effect in the window displays and newspaper space.

Manager Howes, of the Houghton & Dutton talking machine department, said this week that the business of his department had been far beyond his expectations since the first of the year. He is arranging for some new ideas in display, both inside the room and in the windows. He is handicapped now by lack of room in which to expand.

Even the most optimistic member of the firm of Henry F. Miller & Sons Co., when they put in the Victor talking machine department, did not anticipate that within three months after the installation it would be doing a retail business of such large proportions as to make it one of the most important and successful branches of the store's industry. But such is the case. Instead of the department being only half a success, it is a fine, ripe melon. The Victor line is exclusively handled here, and the Victrolas make a fine showing alongside the Miller pianos.

PRAISES GIPSY SMITH RECORDS.

Brooklyn Pastor Plays Them for His Congregation Each Sunday—Reproductions Very Distinct—All the Sweetness of Voice Brought Out.

This is a copy of a letter received by the Columbia Co. last week from Erwin Deunell, pastor of the Tabernacle Baptist church, Brooklyn, N. Y.:

"I am very grateful that through you I have been enabled to give Gypsy Smith's beautiful solos, which he sings as no other singers render them, to my Sunday evening congregations. For several Sunday evenings I have used them on my platform in a song service preceding my sermon. Those records of his voice are marvelous reproductions of the pathos and sweetness of his singing. Every word can be distinctly understood in every nook and corner of my church. My people were very much pleased with his singing. In no other way could we have hoped to have heard this great preacher and singer in our own church."

Callers at the offices of the New York Talking Machine Co., 83 Chambers street, New York, last week, included Herbert Royer, manager of the talking machine department of M. Steinert & Sons Co., Boston, Mass., and Daniel O'Neill, general manager of the "talker" section of C. J. Heppe & Sons, Philadelphia. It was a personally pleasant visit with G. T. Williams, who had an exchange of trade opinions at Kall's, his usual mid-day halt.

SALES METHODS THE SUBJECT

Of an Interesting Letter from a Subscriber in Halifax—Some Essentials Forcefully Set Forth—Knowledge of Records Necessary to Enable the Salesman to Win Out—Some Good Pointers Clearly Set Forth.

Halifax, N. S., March 10, 1910.
 Editor of The Talking Machine World.
 Dear Sir: I was pleased with and interested in the article appearing in the December issue of the World signed by "Phonophil." I have been waiting for some one to write an article just along these lines, for it seems to me that the suggestions contained therein are sound.
 At the same time the writer left out a good deal that might have been helpful to the salesmen who are really endeavoring to master the business not only for the benefit of their employers, but for their own enlightenment.

Now, I agree practically with all that "Phonophil" says, with the exception, perhaps of his reference to playing the records with a variety of needles and also changing the pitch. Unless a salesman is exceedingly well up in music, I think harm will come if these methods are resorted to, in practically every instance. One cannot go far wrong in playing the record as indicated by the catalog, or at all events keeping within prescribed limits as to revolutions, say, 74 to 80.

The safest course to pursue in regard to the needle is to use a medium tone, which will be neither too soft nor too loud. There are, of course, some selections which require a loud needle to bring out the true tone, but unless the salesman is absolutely sure of his knowledge, the medium tone will produce the most satisfactory results.

A volume might be written on the second of his three prime factors, namely, "Ready knowledge of records." The constant progression of science and the great number and variety of records appearing from month to month is apt to tax the memory of the most expert.

If the salesman cannot find time to make an individual study of each important record in the course of the day, he should manage to get the time some way, and for three reasons: First—It will pay the salesman a thousandfold to do so. Second—It will make one more valuable to his employer and the customer. Third—It will be the means of making the salesman well informed, not only in his duties as salesman, but also in his daily life outside of the store.

But just here I do not wish to be misunderstood. It is exceedingly helpful to know the numbers of records, by whom they are sung or played, but what is most important is to know just what number of singers or players sing or play a certain selection and which is the best record and why.

This saves time and helps the customer who may not be familiar with the records. For instance: Suppose a customer asks for the best record of the "Last Rose of Summer." You will probably play for him a record by Sembrich or other Red Seal artist, and the customer will likely purchase it. Later on perhaps he hears a record at a friend's house of the same song by Helenenoldi, a 75c. record. An unprejudiced opinion will give the palm to this latter singer, and the customer is not likely to be very pleased at paying \$3 for a record which he might have obtained for 75c. and then have a better rendering. There is a great tendency to do this, but it is not the best method of winning permanent patrons. Lastly, learn all you can by observation of customers' likes and dislikes, read all of the best books on the operas, so as to acquaint yourself thoroughly with the Red Seal records and operatic records of the various companies, and don't imagine because a customer says that he has heard all the records that such is the case. If you know your business properly, you should be able to string off at least a half dozen records of which he has never even heard.

A SALESMAN.

MOTION PICTURE LITIGATION.

Important Decision Handed Down Which Leaves the Motion Pictures Patents Co. in Supreme Control of the Situation—Contentions of the Defence.

A decision handed down March 7 by the United States Circuit Court, Southern district of New York, in an injunction suit against three makers of moving picture films, leaves the Motion Pictures Patents Co. in supreme control. The defendants in the suit were Carl Laemmle, the Independent Moving Picture Company of America and the Pantograph Co.

Their defense was that not Thomas A. Edison, but a man named Greene, was the real inventor of the apparatus in moving picture machines by which they are enabled to take a continuous photograph of actors and other subjects in action at top speed. Justice Noyes, who filed the memorandum of the decision, held that the arguments as to Greene had been exhausted in a previous suit, and that the Circuit Court of Appeals had decided that the Edison patents were valid. For that reason he said he was disposed to grant a preliminary injunction against the two defendants.

The defense, among other contentions, alleged that the eleven manufacturers who are constituent concerns of the Motion Picture Patents Co. were violating the Sherman anti-trust law. The idea that the exercise of an inventor's patent rights led to violation of the Sherman act was the only novel feature in the litigation. On this point Judge Noyes held as follows: "I am of the opinion that the charge, if established, that the complainant is itself, or is a member of, a combination in violation of the Federal

anti-trust statute is not a defence available in an action for the infringement of a patent and fails to show a defect in the complainant's title."

In conclusion he said: "An injunction against the defendant corporations may therefore issue. The proof of personal infringement by the defendant Laemmle is, however, deemed insufficient to warrant the issuance of an injunction against him and it is denied. But this action is without prejudice to the right of the complainant to renew his application in case future acts of personal infringement are disclosed."

Judge Noyes also stated that injunctions against the defendant companies would be suspended provided an appeal was brought on for a hearing at the May session of the Circuit Court of Appeals and provided that the defendants furnish an adequate bond to pay damages and account for profits during the pending of the appeal if it is unsuccessful.

NOW EQUIPPED WITH DIAMOND POINTS.

In a circular letter sent the trade on March 5 the Columbia Phonograph Co., General, say: "All two and four-minute Indestructible reproducers shipped from the factory on and after March 1 will be equipped with diamond points." The company further add: "Diamond is therefore the most desirable substance for cylinder reproducer points. The difficulty has heretofore been in the grinding, which has been a slow and expensive process. This, however, is entirely a factory problem, which has been overcome by improved machinery." As Mr. Yerkes remarked, in commenting on this new attachment, which plays both the two and four-minute cylinder record, it does not require a change of reproducer or of reproducer points.

A delightful innovation which will be appreciated by talking machine men everywhere.

The new record program sheets will at once appeal to every owner of a talking machine.

The illustration shown depicts one of the programs reduced.

The size of the program is 13x18 inches.

Handsomely lithographed and embossed—printed in half-tone on the best bristol cardboard with attachment by which it may be hung upon the wall, it can be seen that all records can be listed thereon in classified order.

It simplifies the old method of searching for the desired record.

It is a handsome wall ornament, and it shows the photos and the history of the world's most famous composers from the 16th century to the present time.

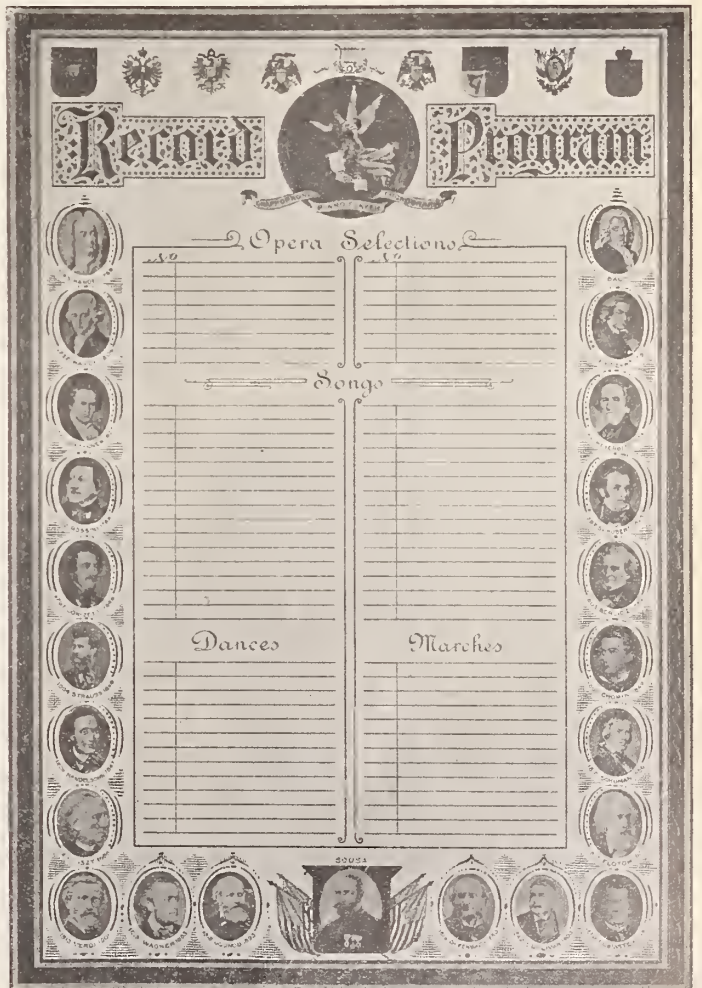

The effect is heightened with the national coat-of-arms of the principal countries.

The price for 100 sheets is \$5—1,000 sheets, \$40.

Special rates will be given on orders for more than 1,000 sheets.

Send for sample order and you will at once see the advantage of this program in your business.

Dealer's name will be printed upon the program when desired.

The International Record Program Company

102 West 29th Street

NEW YORK

TRADE FABLE

No. 5

From the time Jim Reynolds had been big enough to toddle and to begin to learn the rudiments of the United States language, his father had impressed upon his mind verbally, and upon other places with a trunk strap, that throughout his life he was to paddle his own canoe and confide in no one. The old man's chief bit of advice was, "When a fellow wants to slip you any of the 'loving friend' stuff and wants to do you a favor just because he likes you, put your turnip in the inside pocket of your vest and keep your right hand on that while you hold your roll tight in the left. It's ten to one that he's trying to frisk you for one or the other." Of course the pessimistic attitude of Jim's male parent may have

MUSIC

814 Watertown St.

WEST NEWTON, MASS.

been due to the fact that he was a professional horse dealer, but nevertheless he was nix on the confiding stunt.

Following in the footsteps of the old man, Jim's school and college days were not such as gave him anything on Robinson Crusoe for companionship, and as a result he prepared to enter business with very little profitable knowledge, but with a helluva grouch.

Now, Mother Reynolds was a good old soul, who felt some sorry for the condition of the boy, and when it came time to invest the five thousand iron men that had been dealt him for the purpose of buying a hand in the game of business, she suggested the selling of talking machines, in the hope that the attendant music might have a good effect on Jim. What was more, Mrs. R. put her foot down on the matter, which, the same being backed up by the will of an army mule, settled the question for all time.

As it happened, the Reynolds talking machine store was located in a city where there were a number of similar stores and competition was stronger than in a cannibal camp during a missionary dinner, with ears on toast as the piece de resistance. Having heard of the good results obtained by dealers in other lines who organized local associations, for the general good and for the purpose of handing a few jolts to the boll weevil of business who carelessly changes its residence without thinking to pay various bills, the talking machine dealers of Blankville, or at least several of them, met together for the purpose of forming a little local association of their own. After the rough plans had been discussed at length the question rose as to who was to approach Reynolds and make him acquainted with the movement. Joe Smith was finally chosen for the mission as being the man best suited for the work. He had been with Dewey at Manila, talked back to a New York policeman, sperted one of the new plush bonnets, and performed other deeds of desperate valor that assured his reputation for bravery.

The next afternoon Smith ambled into the Reynolds store with his hat tilted carelessly over his left lamp to a point where the edge was singled by the cigar that projected upward from his mouth. He met Reynolds, who returned his bland smile and outstretched hand with a stare cold enough to make a polar bear jump for a steam radiator.

Smith wasn't scared for a cent, however, but proceeded to get down to brass tacks and explain his mission, i. e., to interest Mr. Reynolds in the new association. Co-operation and mutual helpfulness was the keynote of the talk, but Reynolds wasn't a little bit impressed with the idea and frankly stated that it sounded fishy to him, also asking casually just what the dealers interested expected to get out of the scheme in the way of graft and how the suckers were biting. Smith thereupon rose upon his hind legs and started to hand Reynolds an unabridged and eloquent account of his apparent pedigree, every sentence of which sparkled brilliantly with phrases of unique conception, that is, it sparkled as far as he went, for after about a minute of spouting he carelessly made an aerial trip as far as the car tracks with a strong foot as the motive power, and alighting with more force than dignity.

It was not long, however, before the association was an accomplished fact, with every dealer in town as a member except our independent friend, J. R. Soon the latter began to notice the number of worthless customers who were stinging him for outfits, and when one was brought to court for trying to sell a talker without finishing the payments, he got Reynolds' nanny by declaring that he and his relatives had used him for a goat because the association had them black-listed. Shock No. 1.

Then the police, wanting an excuse for keeping out of the cold, started a crusade against talkers and made Reynolds can his noise. When they proceeded against the other dealers, however, there was doin's and an injunction put a copper on the cops. Shock No. 2.

Finally a slick guy hits R.'s end of town with

a stock of machines and records that he slips to the public with a large chunk of the price chopped off. Then there was trouble, but try as he would, Reynolds could not find out where the busy little new arrival got his goods. Did that little problem feaze the association? Never! No! It hired men who found out in three hours, and a crimp was put in the foxy dealer's game in three more. Shock No. 3.

Who is this meek gent, with his hat in his hand, who knocks at the door of the association's meeting room? Why, bless its little heart, if it isn't Reynolds. Can he come in and apologize and promise to be good and love his fellow-dealer and join the fold? Why, cert, kid, cert.

Now just try to pull off something fussy in that little burg.

Moral.—It isn't always the good who are lone-some, and incidentally the Milk Trust hasn't cornered the milk of human kindness.

BE DIFFERENT.

Use Initiative and Don't Do Business on Your Neighbor's Plan.

Is your business run on exactly the same plan as your neighbor's? Are your ads. gotten up along the same stereotyped lines that have been followed for years?

If so, you are not making the effort you should; you are simply using some one else's mind, instead of your own.

Branch out for yourself and your mind will develop according as it is used, whereas, if it is allowed to lie dormant you will eventually lose even your power to grasp the bright ideas of others. The personal element in business is a great factor toward success. It's the little original touch that gives character to any work.

SPRING TRADE WILL BE LIVELY

In the Talking Machine Trade According to the Predictions of Well-Informed Jobbers and Dealers—Victrolas in Great Demand.

"It is too soon after our taking of inventory to say that business with jobbers or dealers is showing remarkable strength," was the observation of one of the best-posted men in the trade this week. "Records are selling well, but no larger quantity than usual; in orders, dealers are buying only for immediate needs. We are still behind on Victrolas, and other numbers, also, but the Victrolas go so fast that when a shipment arrives from Camden they are not even shown, but go direct from the sidewalk to the trade. It has been so since the middle of December. Too early to talk of spring business, but we have every assurance that trade will be lively, and we are accumulating all the stock the factory will ship, so as to keep up our reputation."

Trying to get something for nothing is an expensive pastime.

You Can Buy a Good Chance to Make a Living and Some More for \$5,000

Fine retail store of Edison phonographs and Victor talking machines in Baltimore, the great shipping center of the South. Out-of-town buyers, in addition to local trade, is an advantage. You step into the expenditure of five years of advertising and energy that has been spent to create the good-will of this store; that alone is worth the price asked for the whole business. It's not the same as starting afresh; you avoid the necessary expenses that are usually required to establish. This opportunity is extraordinary. You would do well to look into it. Write to

JOHN F. PICKERING

318 N. Howard Street, :: BALTIMORE, MD.

TAKE OUR WORD FOR IT.

Once a customer commences to use **Fibre Needles** he never knows when to quit **buying records**—

Not only does he become an enthusiast on the subject but a crank as well.

We can prove this in more than a thousand instances.

Just a **few records** in the home is the strongest evidence that there is but little interest taken in the talking machine.

Interest and **enthusiasm** increases only in proportion to the number of records possessed.

The mere fact that the **Fibre Needle preserves the record forever**, that it **eliminates "needle hiss"** and that the expenditure of money is a **permanent investment** is the strongest kind of inducement for a customer to gather a **large library** of selected records.

"B. & H." FIBRE MANUFACTURING CO., 33 W. Kinzie St., CHICAGO.

The new 4-minute Columbia Indestructible Records are "the only 4-minute records that are right."

PHONOGRAPH TO TEST EMPLOYES.

Proposed Scientific Tests to Determine the Moral Tendencies of Bank Clerks Proposed by the Rev. Edgar W. Treble.

The talking machine is occupying a prominent place these days in current news happenings. For instance, we understand that the bank employes in the State of Massachusetts are in fear and trembling over the proposed scientific tests to determine their moral tendency and turpitude. The Rev. Edgar W. Preble of Worcester says it is a sure shot that if bank examiners apply to bank employes the psychological tests of Prof. Hugo Munsterberg it will eliminate from a much-

plundered State all danger of bank defalcations.

These are the tests as proposed by the Rev. Mr. Preble, and which the bank examiners are being urged to adopt:

"Test for gambling propensity: Let the examiner have a ticker and a phonograph concealed in the room. During conversation set the ticker

going and have a voice from the phonograph cry out:

"'Atchisou up three points,' or 'Reading off and going down,' and carefully observe the result.

"If the examined man appears to take no notice, he may be recommended for continuance in office, but if his lips quiver nervously and he thrusts his hands in his pockets, and his eyes flit back and forth while his face flushes with anxiety, then the examiner should recommend that all the funds and securities be spiked down without delay.

"Test for the drink peril: Place before the men different colored pieces of paper, with the names of the various liquids conspicuously printed upon them—water, coffee, beer, wine, whisky, highball, etc. Ask him to glance rapidly at each in succession, and repeat often. Notice particularly on which his glance rests longest, and to which it returns oftenest.

"If his eye rests longest on water or coffee, the danger from a perverted appetite is minimized. But if his eyes are attracted by 'highballs' then put out the red signal in the report. A half second's lingering on the word 'whisky' is also a bad sign." The illustrations herewith are from the New York World.

MEMPHIS TRADE GLEANINGS.

(Special to The Talking Machine World.)

Memphis, Tenn., March 5, 1910.

February was a banner month for all the talking machine dealers in this section, and March has started off in an entirely pleasing manner. Retail business is fine, and the first Amberolas received helped the trade in the Edison line a great deal.

Victrolas were also received in large quantities by the jobbers, and on the whole all of them were in an optimistic mood when visited.

The O. K. Houck Piano Co. were especially pleased with the results of their grand opera concerts and are planning to continue them. They have just issued new "Stories of the Opera" covering "Faust" and "Carmen." This company present a different opera on Wednesday and Saturday of each week, giving two concerts on each of these days. Many expressions of gratification have been heard regarding the new Amberol grand opera records put out by the National Co., which have been used extensively at these concerts in connection with the Amberola.

Dealers of the O. K. Houck Piano Co., especially in Tennessee, Arkansas and Mississippi, all seem to be doing very satisfactory business from the size of their orders.

COLUMBIA CO. IN PORTLAND, ME.

The Columbia Phonograph Co. in Portland, Me., have taken over the talking machine business of the Maine Phonograph Co. and re-enter the field as jobbers. They will act as a distributing center in the State of Maine and upper New Hampshire. Their new quarters are located at 545 Congress street and are in charge

of John W. Dunn, formerly of the Maine Phonograph Co.

HARGER & BLSH EXPANSION.

Lease Larger Quarters in Des Moines in Order to Meet the Demands for Their Business.

(Special to The Talking Machine World.)

Des Moines, Ia., Feb. 28, 1910.

Harger & Blish, wholesale dealers in talking machines, have leased for a period of five years the Weitz building at 811 West Walnut street, and within two weeks will move their stock from its present location on the sixth floor of the Garver building on West Locust street.

George C. Silzer, manager of the company, yesterday closed negotiations for the Edison phonograph stock of Hopkins Bros. Harger & Blish came to Des Moines two years ago from Dubuque.

The Weitz building is three stories high and will be entirely occupied by the company, the first floor being devoted to sample rooms. This will give Harger & Blish one of the largest wholesale talking machine stores west of New York.

TO HAVE MINIMUM RATES.

President Taft Extends Them to British and German Colonies.

(Special to The Talking Machine World.)

Washington, March 3, 1910.

President Taft signed proclamations to-day extending the minimum tariff rates after March 31 next to the following countries: Ceylon, Isle of Man, Channel Isles, Gibraltar, Sokota, Seychelle Islands, St. Helena, Ascension Islands, Falkland Islands, British New Guinea, British North Borneo, Corea, British Honduras, Kongia, Santo Domingo, Mauritius, British East Africa, Zanzibar and Pemba, Costa Rica, Honduras, Cyprus, Tripoli, Dutch East Indies, British Somaliland, Togoland, Kameroun, Kaiser Wilhelm Land, Samoan Islands, German Southwest Africa, German East Africa and Kiau Chow.

This list represents the completion of the investigations of the tariff board into the relations between the United States and the German and British colonies which did not get the minimum rates at the same time as the home countries.

TAKE ON "SMALL GOODS" LINE.

(Special to The Talking Machine World.)

Minneapolis, Minn., March 11, 1910.

Lawrence H. Lucker, of the Minnesota Phonograph Co., jobber of Edison phonographs and Victor talking machines, has added musical merchandise to his line.

Few succeed until they try.

A nervous man worries over a lot of trouble that never happens.

Good intentions are often spoiled for want of good methods.

NEW MEMBERS OF ASSOCIATION.

Ten Jobbers Join Ranks Since Sept. 15, 1909
—All Sections of the Country Represented.

J. C. Roush, secretary of the National Association of Talking Machine Jobbers, has forwarded the following list of new members who have joined the association since the beginning of the fiscal year of that body, September 15, 1909. As will be noted, practically every section of the country is represented, including Canada. The new members are: Jas. I. Lyons, Chicago, Ill.; Elyea-Austell Co., Atlanta, Ga.; Petmecky Co., Austin, Tex.; Consolidated Music Co., Salt Lake City, Utah; Knight-Campbell Music Co., Denver, Colo.; W. A. Myers, Williamsport, Pa.; Wulschner-Stewart Music Co., Indianapolis, Ind.; A. Hospe Co., Omaha, Neb.; Chase & West, Des Moines, Ia.; His Master's Voice Gramophone Co., Toronto, Canada. Other live jobbers will be welcomed.

ROCABRUNA'S SELECTIONS

For the Violin and Made for the Mexican Catalog of the National Phonograph Co. Have Won a High Degree of Favor.

Among the records in the Mexican catalog of the National Phonograph Co. are several extremely good violin selections by Señor José Rocabruna, an eminent violinist well known in Europe and Latin America. "Romántica," an Amberol record, and "Ole!" and "Ultima Lágrima," two-minute records, are very beautiful and should prove a treat to all lovers of violin music.

Señor Rocabruna enjoys an immense popularity in all the capitals of Europe and South America, where he has toured many times with great success. He is a member of one of the leaders of the Jordá-Rocabruna Quintet, a very famous orchestra of Mexico, in which he plays the first violin parts.

SEÑOR ROCABRUNA.

Hardly less famous than its possessor is his violin, which is an Amati and valued at \$3,000. It was built by Andrea Amati in Cremona, Italy, in the Sixteenth Century, nearly four hundred years ago. It is a masterpiece of violin construction, combining beauty of design with the wonderful tone quality which made the Cremona makers so famous and of which they alone knew the secret. The above selections are played on this rare instrument, and the records reproduce the beautiful tones of the original with remarkable fidelity.

Remember that Opportunity is a constant reader of advertisements.

VICTROLA AT WANAMAKER LECTURE.

Figures Prominently in Lenten Lecture on Wagner's "Parsifal"—Voices of Famous Singers Used in Illustrating Music of Opera.

The Victor Victrola figured prominently in the Lenten musical lecture in the Egyptian Hall at Wanamaker's, New York, on March 5, when the Rev. Henry R. Rose, D. D., of Newark, N. J., lectured on Wagner's consecrational musical play, "Parsifal." The opera was illustrated with lantern slides and the voices of world famous singers reproduced through the medium of the Victrola and accompanied by the organ, piano and violin. A large and representative audience was present and became most enthusiastic over the lecture.

NATIONAL CO. FACTORY ALTERATIONS.

Plans are being considered by the National Phonograph Co. looking toward a rearrangement of the interior of their office building by which additional space may be secured at once for their sales, agreement and advertising departments, all of which have been augmented by recent additions to their respective staffs. An extension to the building itself of about 50 feet on Lakeside avenue is also under consideration, and ground for it will probably be broken in the spring.

ISADOR LION'S NEW QUARTERS.

Isador Lion, dealer in Victor talking machines, records, etc., formerly at 2210 Broadway, has leased a fine new store, northeast corner of Broadway and Eighty-third street, and expects to hold a formal opening about the middle of this month. The establishment is finely equipped with new fixtures and is without doubt one of the finest stores in this thriving neighborhood.

Looking for a soft snap is digging a pit for one's self to fall into.

SAVE THE LIFE OF YOUR RECORDS
BY USING **THE PLACE AUTOMATIC RECORD BRUSH**
FOR EDISON PHONOGRAPHS AND VICTOR TALKING MACHINES.

PATENTED {September 25 and October 2, 1906
{and September 10, 1907.

PRICE, 15 CENTS

CAN BE USED ON ALL PHONOGRAPHS

Removes lint and dust from record automatically. Saves Sapphire from wearing flat and prevents rasping sound. Insures a perfect playing record. It is equally as efficient when recording. It is too cheap to be without.

No. 1 fits Triumph No. 2 Standard and Home No. 3 Gem and Fireside

THE PLACE No. 10
DISK RECORD BRUSH
FOR
VICTOR EXHIBITION SOUND BOX
PRICE, 25 CENTS

PRESERVES THE LIFE OF DISK RECORDS

Automatically cleans the Record Grooves and gives the needle a clean track to run in. Insures a clear Reproduction and prevents Record getting scratchy. Makes the Needle wear better. Dust and dirt in the Record grooves wear the record out quickly and grind the Needle so it cuts the Record. SAVE THE LIFE OF YOUR RECORDS.

FREE SAMPLES will be sent upon request to any Jobber or Dealer who don't handle them. **Write Now**

DEALERS are requested to get their supply from their regular Jobber. If he will not supply you write us for the name of one who will.

"The White Blackman"

TIMELY TALKS ON TIMELY TOPICS

The double-disc patent case, now before the Federal Courts, was being discussed when it was recalled that the American inventor had been worsted in the courts of Germany, according to the latest reports. This occasioned one of the group to remark: "In our experience, no matter what may be the merits of the suit in the domain of the Kaiser, the German always wins if he wants to. That is to say, it always seemed to us that in writing their opinions the German judges did not regard the testimony so much as they did that of finding out whether a German citizen was directly interested and had a desire for the property in dispute. If this query was answered in the affirmative, why, then there was no longer any reason to doubt what the decision would be. This is also true of the Italian courts and of other European countries excepting Great Britain.

"Would you believe it that a man in Brazil has taken out a patent on a double-disc record, and while American patents antedate the Brazilian's application, it makes no difference, and no disc record of this description can be shipped into that country without this chap granting you the privilege. The worst of it is this nifty Brazilian does not and never did manufacture records or talking machines of any kind, but nevertheless under the laws he controls the monopoly in Brazil. He is being gunned for by an American company, however, and I believe they will spank him good and hard before they get through with him. The only way to get around this difficulty is to get some native Brazilian to take out a patent or trade-mark; but take the precaution to have him assign it to you first else he will slip up on you.

"The same holds good in Cuba. If a concern doing business in the island does not register their name with the bureau of registration in Havana the first thing you know some Cuban will step in and appropriate your firm title, and you cannot do business there unless the pirate is either bought off or you make him the exclusive agent for your goods. This has been done repeatedly and several large American companies who had invested a great deal of money exploiting their lines in Cuba were held up by just such a procedure. Of course, it is an outrage, but the laws of the land permit it, and whoever is doing an exporting business should know these tricks else they are in to lose a lot of money."

It would be a decided innovation if the "talent" were to travel around the country exploiting and demonstrating their own records and thereby working up business. This is precisely what will be done by the Uribi Brothers, whose portraits were published in last month's World. The three brothers made a set of native records in the laboratory of the Columbia Phonograph Co., to be marketed in their own country, the United States of Colombia, S. A. Owing to the mountainous and undeveloped nature of Colombia, so far as railroads and other means of conveyance and transportation are concerned, they are obliged to resort to the primitive method of mule-back riding. In this fashion the Urbis will traverse their native heath—if such an expression is permissible in connection with the topography of the land—with a stock of records along, which they will exhibit and demonstrate and proceed to take orders for in the most approved commercial traveler manner.

About the name of Leeds & Catlin hovers much of the early history of record making. In their former quaint quarters in New York was the original office and home of the North American Phonograph Co., the first organized concern to market the talking machine as a commercial product. As years went on one company after another engaged in the same line succeeded each other, and many tales are told of what occurred

on the premises from time to time. Finally they were "up against" the patent situation, and while L. & C. fought pluckily and with amazing determination, they finally had to succumb to the inevitable when pronounced by judicial decrees of prohibition. Their property, etc., was sold to satisfy judgments, the clamor of creditors and court orders, until what remained of a considerable estate was finally disposed of at public auction by the receiver in bankruptcy last month. This consisted of a factory building and machinery equipment at Middletown, Conn. Considering the litigation the defunct firm had been engaged in, a curious part of the proceedings occurred just preceding the sale, when an attorney of the Victor Talking Machine Co. stood beside the auctioneer, and with great deliberation and much emphasis read the decision rendered by the Supreme Court of the United States in the Berliner patent case, an opinion which adjudicated the validity of that famous invention for all time. This was in the nature of a warning to prospective buyers; but somehow this peculiar incident seemed in keeping with the close of the turbulent and militant career of the bankrupt manufacturers.

A private exhibition of the American cinephone, a new apparatus for combining motion pictures and talking machine records, was held a couple of weeks ago at the Cinephone Co.'s offices, New York. The novelty of the machine was the simple method of synchronizing the speed of the picture film and the disc record. By means of two slowly moving illuminated pointers, one appearing in the picture and the other attached to the side of the talking machine mechanism, the picture operator is able to control the movement of the film so that the gestures of a singer and actor appear at practically the same instant as the sound of the voice. Several reels of film with their accompanying records were shown. The exhibitor explained that the machine was designed for educational purposes as well as for ordinary exhibition uses. Something of the same kind was accomplished by the cameraphone, a combination of the moving picture and Columbia Twentieth Century talking machine, but it did not prove a commercial success.

Dealers who doubt the manufacturers can enforce their conditions of sale by order of the court would profit by glancing over the list of people who have been proceeded against by the National Phonograph Co. for this very purpose. This is the first time the company have furnished the names of concerns who have fallen under the ban of the law, either for price-cutting or other violations of their agreement after "signing up," and including also the prohibition of handling other than the Edison line of cylinder goods. Much has been heard about the "restraint of trade," especially on the last count, but this doctrine does not apply in patent laws. A patented invention confers the inalienable right on the owner to prescribe on what terms or conditions he may sell his product; he enjoys the absolute monopoly of his property in every shape and form, if he chooses to exercise the privilege conferred upon him by the Constitution of the United States as interpreted by the highest Federal tribunal in the land.

Perhaps this may not be pleasant to contemplate when one is possessed with the idea that he can help himself to another person's property just because he figures he can, whether or no. Many cases of this kind have been brought in court by not only the National Co., but by the Victor and Columbia companies also, and in every single instance they have won out. It is a broad rule of law which the Federal courts have accepted as basic, and therefore the outcome of such litigation has only one ending. It should also be remembered that the courts

take cognizance of price-selling violations of this nature, whether the person or dealer has "signed up" or not. Under these circumstances every cutter or violator engaged in such practices will be inevitably brought up with a round turn when apprehended. Much bluster has been indulged in, and the "sea-lawyers" of the trade have advanced specious reasoning to the contrary, but neither amounts to a breath in a gale of wind when the offenders are haled to court.

The distinction of being connected—even in a remote way—with the talking machine trade is not lost sight of by the inventor of the Jones process for duplicating disc records, over which the courts have wrangled for years with the American Graphophone Co., owner of the patent, finally victorious. The said Jones, who at one time was employed in the experimental laboratory, investigating and foraging in new fields of discovery, of Emil Berliner, responsible for the celebrated Berliner patent, where he stumbled on his now famous invention, which revolutionized the pressing of discs, is now turning his talents to automobile mechanics and improvements. He has perfected several articles of merit in this industry which are liberally advertised. In a recent "ad," among other honors the publicity man of his firm showers on him is this: "J. W. Jones, inventor of the disc phonograph record." Hardly all that; but ad-writers are wont to take liberties with persons and things to make a point.

A jobber of high standing in the East, in talking with the World about the so-called cheap machines, remarked he was sorry that the trade situation prohibited their sale, as he felt confident they were helpful and educational. That is to say, a purchaser of such a machine may believe at the time it was good enough, but soon he learns that his taste was being educated to appreciate the more perfect even if higher priced article, and also the high grade records. In this way it served an excellent purpose, and therefore the sale of the cheap machine should not only be allowed but encouraged. These views were formally presented to the Victor Talking Machine Co. to gain them as an ally, being owners of the controlling patent, but the proposition was promptly and emphatically "turned down." The jobber in question thought he had made a valuable discovery, and his reward was "what the little boy shot at."

A FEW NEEDLE POINTS.

"Dignity is not refrigerated manners."

Some men are so afraid of doing the wrong thing that they never do anything.

The clerk who accomplishes most is the one who makes the least fuss about it.

Some people are too independent to take a hint.

Many men are like wheelbarrows and must be pushed to make them go.

The man who writes a Spencerian hand fills in the check and the man who writes a poor hand signs it.

High finance is running into debt to buy a pocketbook.

Opportunity knocks at the door; importunity rings the bell and walks in.

Tact is making people believe you mean what you don't mean; diplomacy is convincing them that you don't mean what you say.

Boost and we'll all boost with you,
Knock and you'll knock alone.

Some men make good—other men make good excuses. Be sure you're right, then go ahead—of your competitor, and go ahead with a spirit.

STONE CONTROLLER COMPANY, - PROVIDENCE, R. I.

TRADE IN THE QUAKER CITY.

Despite Labor Troubles Talking Machine Trade Is in Excellent Shape—February a Record Month—Fine Window Display at Columbia Co. Store—Columbia Specialties Selling Well—Geo. W. Lyle a Visitor—Mr. Otis Sydenham Dorian—L. Buehn & Bro.'s Good Report—Rearranging Heppes Departments.

(Special to The Talking Machine World.)

Philadelphia, Pa., March 7, 1910.

With all the troubles Philadelphia is experiencing just now, which is handicapping trade in most lines, there is one bright spot, and that is among the talking machine people, who are less affected than any of the other lines. This may seem rather odd, but there has been a general advance in the business in all its various departments, with the possible exception of a little falling off in the number of records that are being sold. This may be accounted for in the fact that the public, owing to bad transportation facilities on account of the strike, instead of going to the theaters are remaining home and finding entertainment in their talking machines.

February in Philadelphia was the best month in the talking machine business that the Philadelphia dealers have ever had. The sales almost doubled what they were a year ago and run considerably ahead of January of this year. In the selling of machines this same percentage apparently will be maintained during March, the possible exception being the selling of not quite as many records to the individual buyer.

The wholesale business is especially good. All the firms have their men on the road, and they are sending in large orders and the business in this end of the line has never been as active. Affairs in the outlying territory covered by the Philadelphians are especially good at present, and they look up well for the future, and the talking machine people are no doubt going to have the greatest year in their history.

I wish particularly this week to commend Manager Henderson on the fine window display that he is making. The one at present is exceptionally good, but the Columbia Phonograph window, through his novel schemes of decoration, is one of the show places along Chestnut street, and there is not a time at any hour of the day that you will not find half a dozen people outside looking at it. At present his window is devoted to Peary, the explorer. Peary addressed a letter to the phonograph company as follows:

"It gives me pleasure to say that the Columbia Graphophone and the outfit of Columbia records used during the expedition of 1905-1906 were taken again with us on the last expedition, and proved a never failing source of interest, amusement and entertainment to every one on board the Roosevelt during the long winter nights. Whether it was the 'Old Folks at Home,' 'Yankee Doodle' or 'The Wearing of the Green,' the result was always a distinct and agreeable break in the atmosphere of cold and gloom which surrounded us."

A facsimile of this letter on a fine poster is in the window as well as a facsimile of the flag that Peary placed at the North Pole, and other things connected with the discovery.

Mr. Henderson reports that the business of the Columbia Phonograph Co. has been very good and that February shows a very handsome increase over the previous month. While all the March records of the company have had a good sale, there has been a tremendous demand for "Put on Your Old Gray Bonnet" and "Cubanola Glide."

George W. Lyle, general manager of the Columbia Phonograph Co., was here this week. R. B. Robinson, a salesman of the house, better known as "Robbie," has been out on a trip through the State and has met with very good success. He is doing very good work for his firm. The firm are still waiting for the new Columbia machines, on which they expect to do a big business.

O. C. Dorian, assistant manager of the Columbia Co., was presented with a very fine boy last week. They have decided to call him Otis Sydenham Dorian, believing the child is healthy enough to stand for the name. Mr. Henderson has not as yet placed him on the pay roll, but expects to do so soon. It is noted, however, that he has already made a few records for the company, which will likely be issued this Spring.

Louis Buehn & Brother, 45 North Ninth street, report that their February business was the largest in the history of the house. They have received a number of the new McCormack records and are very much pleased with them and believe that the Victor Co. have made a great business stroke in getting him to sing for them. McCormack is very popular with a large class of owners of the Victor. They have also been having very good success with the Fifth Act of "Faust" as issued by that company in their March list.

Robert Dungan is away just at present cover-

ing the anthracite coal regions for that firm and he is finding business in that section very good. They have been having an especially good business on the Victrolas and the Amberolas and are having difficulty in keeping them in stock. Edmund Buehn is at present traveling through the Maryland territory of the firm. They have been having a big sale on the Red Seal records.

Charles E. Robertson, of 3859 Lancaster avenue, has taken on a full line of the Victors. Before this they sold nothing but the Edison.

Mr. Phillips, of the National Phonograph Co., of Orange, N. J., stopped in Philadelphia on his way home from the West. He reports that he had a very good trip and that he found business, at least so far as his firm is concerned, in very good shape in all the sections he visited.

Louis Buehn was over to the Edison factory one day last week and found everything booming there.

The Penn Phonograph Co. enjoyed the biggest February they have ever had. It was a rush month from start to finish. This was not in any one line, but in all their various lines, and their sale of records was double what it was last year. They have had quite a number of out-of-town visitors. They are in very excellent shape for the spring business, and believe that it is going to be the largest in the history of the trade. They have been having a particularly heavy sale on the Victor "Miserere" record, made by Caruso and Alda, and have also had a big sale on the "Fifth Act of Faust" records. They report that the Edison Amberola is selling very well and is finding favor with the public. Their business in the coal regions has been exceptionally fine. They have opened several very satisfactory accounts in that section.

The Heppes are at work at present on the fourth floor of their 1117 Chestnut street store, which they are arranging into two rooms, one for a smoking and lounging room for purchasers of the talking machines, and another also to be used for that purpose. Smoking is not allowed in the large talking machine rooms of the firm on the first floor, and therefore, for the accommodation of male visitors who desire to hear records and enjoy a smoke at the same time, they have decided to arrange this room for their comfort and convenience.

D. D. O'Neill, the traveling manager of the Heppes talking machine department, has just come off of the road, having had a very satisfactory trip in which he opened several new accounts. He was up through northern Pennsylvania. Clarence Collins is on a trip through eastern Pennsylvania and New Jersey. The firm report that they are sold out of the Edison Amberola. Mr. Morgan is superintending the improvements in the Heppes talking machine department. They have also been having a great sale on the "Miserere" record, and one of their biggest sellers is "The Hallelujah Chorus."

As noted above, the strike has affected the talking machine business of Philadelphia very little, yet if it were not on just now there is no telling to just what extent the business would have reached this month. If it should be called off soon all the dealers believe that March would be the biggest talking machine month this section has ever enjoyed.

NEW COLUMBIA DEALERS.

Howarth & Taylor are new Columbia dealers at Perth Amboy, N. J., their initial stock being sold through R. F. Bolton's wholesale department, 89 Chambers street, New York. In reality it is a branch of Andrew Brunton's business in Jersey City.

Another new and valued addition to the Columbia list of dealers is the F. P. Nelson department store, the leading emporium of Lowell, Mass. They will handle the Columbia line exclusively. The initial stock, of good size, is placed, and the department is in running order. The credit of this sale belongs to the Columbia corps of Boston, Mass.

There are many perfections of a man which are not capable of appearing in actions.

BIGGER BUSINESS

Columbia Phonograph Company, Ge

EVERY MINUTE!

The Beautiful Columbia Grafonola
“Regent” Never Misses a Sale
That Depends on Comparisons

And people are *making* comparisons, too.

We knew before we approved the blue-prints of this instrument that it was sure to be an extraordinarily important factor in the development of the talking machine business during 1910, but even so, we certainly did under-estimate its “taking” qualities.

As this advertisement goes to press we have a letter from a dealer in Illinois who has sold “Regents” faster than he has been able to get them, although deliveries have been very satisfactory—and who states that he has four more cash sales waiting for delivery of the machines to him.

The Grafonola Regent certainly is everything that a musical instrument ought to be, and several things that no other musical instrument can claim to be.

Those Columbia dealers who have negotiated exclusive selling rights are rather well agreed that the Grafonola “Regent” *alone* turned out to be reason enough for securing the exclusive selling rights.

What are *you* doing with the Regent?

en'l, Tribune Building, New York

A CHEERY VICTOR MESSAGE TO THE TRADE

Sent Out in Letter by General Manager Geissler—An Excellent Sales Report That Means Prosperity—What Has Been Done During the Past Few Months—Dealers Must Go After Business to be Successful—Good Advice for the Man Who Sells.

Louis F. Geissler, general manager of the Victor Talking Machine Co., in discussing the business situation in a letter to the trade, issued March 4, says:

"We are so much pleased at the continuation of our excellent business that we cannot refrain from letting you know how our sales are going. We think we told you in some past communication how well our business was rehabilitated during the year 1909, our sales for that year having again reached the magnificent total reached in the year 1906, but leaving us still a contest with the record-breaking year of 1907.

"Our sales for the past three months justify the hope and belief that the year 1910 will surpass all records for prosperity with our dealers, our distributors and ourselves.

"Our sales for December were the greatest of any month, of any year, in our history.

"January, of 1910, was 40 per cent. better than January of 1909, and would have surpassed the sales of our banner January of 1907 but for our inability to ship the goods on order.

"February, just closed, will show sales and shipments of about 10 per cent. in excess of the best February in our history. The fact is our sales are limited only to our factory capacity.

"We trust that these indisputable indications of the enormous and increasing popularity of Victor machines and records will convince dealers who are not getting their proper percentage of this prosperity that they should put on more steam and go out among the public after the trade that awaits their energetic effort.

"It is wonderful what energy and enterprise will do, and as we are dependent almost directly on the efforts of our dealers, we cannot be too importunate in our requests that they 'go after the business.'

"Some men will go into a location where other dealers have practically made a failure, open up a Victor store and show them how to do busi-

ness, to the astonishment of the dealer who has sat there for a year or two believing that he was doing all that could be done in his section. One house will sell carloads of Victrolas in a month; another in the same territory will sell ten and think he is doing well.

"Each of our dealers can make comparisons of their monthly purchases from their distributors while they have held their contracts; if their business has been increasing by leaps and bounds, then they are keeping pace with us, and, consequently, with the others of our enterprising dealers; if your business with the distributor has been running down hill—then don't forget it—it is your fault.

"Victor goods are better than they ever were; more attractive than they ever were, and the people are in your territory who will buy them, and if they are not buying them, then it is the fault of your stock, your methods of display, your advertising, your sales people, your canvassers, your travelers, or the head of the house himself, on account of the lack of interest and supervision that he exercises over his Victor department.

"We are doing a good business, an excellent business, but we want more—a lot more—and are willing to build even more factories to care for it.

"The desirability of our wares justifies the opinion that we should sell ten Victors for every one that we are selling to-day, and we would do it, too, if we could rivet the attention of our thousands of dealers to the possibilities of Victor sales—the 'Wonder' of the Victor, its growth in popularity, and its never-ending novelty.

"We ask you to help us in every possible way to enlarge this business; every time we make a dollar our distributors and dealers make five, so you see our suggestions are not entirely selfish. We are delighted to look forward to such good prospects for the year for us all."

TRADE NEWS FROM CLEVELAND.

Business of Steady Volume but Quiet—Higher Priced Outfits Selling Well—Small Stores Entertain Customers—Moving Picture Machine for Orphans—What Dealers Have to Report—G. J. Probeck Co. Improving Store—Personal Items of Interest.

(Special to The Talking Machine World.)

Cleveland, O., March 8, 1910.

The talking machine business during the past month has been fairly steady, although the dealers state it has been rather quiet, more especially in the cheaper class of goods. There have been, however, sales of a large number of the higher-priced machines of the different makes, as well also of the more expensive records, and while trade in the cheaper grades is slower, it is improving. People are unquestionably more interested in the talking machine than ever heretofore—they are making inquiries, seeking demonstrations, and are self-educating themselves to the buying point, and the question of closing a sale lies with the dealer.

Some of the notion and 10-cent stores are installing phonographs, and thus entertain their customers while making purchases.

The Jewish Orphan Asylum of Cleveland has been presented with a moving picture machine by Milton Hart, of Chicago. It is used not only in showing entertaining pictures but also for instruction in connection with the different studies at the orphanage. A talking machine adds largely to the culture and entertainment of the little inmates.

Mr. Towell, of the Eclipse Musical Co., said business was moving along very satisfactorily. Dealers, he said, were ordering very liberally, evidently anticipating a good spring trade.

Conditions were reported about the same during the past month as for the month previous, by the W. J. Roberts, Jr., Co. "Trade," said Mr. Biesinger, "is good, especially in the record line. The March catalogs cover a wide range of desirable selections in both the Red Seal and Amberol lists. Victrola sales are fair, but demand for machines is not very active. We featured the beautiful "Miserere" scene of "Il Trovatore," the special record put out by the Victor Co., and sales of this record are fine. Prospects are good and I look for a fine spring trade."

"While the weather has been somewhat detrimental, we are doing a very satisfactory business," said Mr. Foote, manager of the talking machine department of the Goodman Piano Co. "There is an excellent demand for Victrolas and we are making daily sales of the various makes. Our record trade is daily increasing, particularly for the higher-class productions."

Continued activity prevails at the store of B. L. Robbins & Co. The company are doing a good business in both machines and records. Mr. Robbins said the store was rarely without from one to twenty customers, and that he and his assistants were kept busy from morning till night. It keeps them figuring to keep up their supply of records.

The G. J. Probeck Co. have made some alterations and improvements in the store, giving enlarged space for exhibition of goods and better demonstration facilities. Concerning business, A. W. Robertson said: "We are having a very excellent demand, growing daily, for the new four-minute Columbia Indestructible cylinder records, and along with it comes a demand for the four-minute attachments, as well also for cylinder machines so equipped. All this, aside from the constantly growing demand for the two-minute Indestructible records. In the field of

disc machines the Grafonola, especially the Regent library table type, is receiving most flattering attention from the public, and while many sales have already been made, many more will be if the host of inquiries mean anything. The usual large demand for double-disc records is not abating, and the prospects are good for a steady demand in the coming spring months."

Conditions in the talking machine department of the Bailey Co. are reported very satisfactory, the volume of business in February having been very much larger than that of January. "The demand for Victrolas," said Mr. Friedlander, "is decidedly good and daily increasing, as it is, also, for the combination Edison machines and Cygnet horns, of which we are making daily sales in goodly numbers. Our Edison, Victor and Zonophone record trade is splendid and constantly increasing. The Harry Lauder records are in big demand."

"Our business is very good," said Mr. Dorn, of Collister & Sayes. "There is a fair demand for machines, almost universally for the higher-grade Victrolas and Victor records."

Coblitz Bros. are doing a good business in the talking machine department of their music store. Mr. Coblitz stated there was a big demand for foreign records.

"Business is good," said H. L. Tinker, of the May Co.'s talking machine department. "We are doing double the amount of business we did a year ago. Trade has surprisingly improved in the last two weeks. We are making many sales of Victrolas of all grades, from the lowest to the highest priced instruments, and are having many inquiries for Amberolas. Owing to a growing demand we are laying in a full line of popular-priced Italian grand opera records."

Miss Elsie Wicks, in charge of the talking machine department of the store of Chas. I. Davis, said business was daily improving, with an increasing demand for both machines and records.

A. L. Parsons, recently in charge of the Talking Machine Store, 27 Taylor Arcade, has retired, and Harry Rood, formerly of the Rood Co., Warren, O., is now manager.

A very satisfactory business in the talking machine department of Brown Bros. was reported by the manager, Miss L. Byrnes. "Trade," she said, "was quite good throughout February, and March has started in most propitiously. Demand for machines is good, especially for the better grade of Graphophones, and we are having many inquiries for the Grafonola De Luxe. Our sales of double-disc records are increasing, the Fonotopia series, including Kubelik, Tonyobardi, Lehmann and Thibaud being popular."

"Business is good—booming," said Mr. Smith, of Flesheim & Smith. "The only trouble we are experiencing at present is to get a sufficient supply of machines and records."

At the West Side Columbia store of John Reiling business was reported very good. "I have considerable trouble," he said, "in getting what foreign records I need. My patronage comes largely from the foreign portion of our citizens. They are good patrons, but prefer records in their own native tongue, with fatherland music. My sales of machines are fair and I have a fine record trade."

Joe E. Bazemore, well known in business circles in Atlanta, Ga., has been appointed manager of the retail department of the Columbia Phonograph Co. at 82-84 North Broad street, that city.

The National Multinola Co., Cleveland, O., have incorporated under the laws of Delaware, with a capital stock of \$1,000,000, to manufacture, sell and lease all kinds of talking machines.

A block of securities of the defunct Leeds & Catlin Co. were disposed of at the Exchange Salesrooms, New York, March 2. The lot consisted of \$42,000 first mortgage 6 per cent. sinking fund gold bonds, due July, 1932; July, 1908, coupons on, 6 per cent., and 150 shares \$100 each, at \$10 for the lot. Probably bought as souvenirs.

Notice how much you see those Columbia notes nowadays? They stand for product that stands for profit.

REGARDING THE SALESMAN.

Some Live Points Presented in the Speech of C. St. Elmo Lewis Before the Detroit Music Trade Association That Are Well Worth Reading—The Question from the Viewpoint of a Practical Man—Something of the Victor Talking Machine Co.'s System.

(Special to The Talking Machine World.)

Detroit, Mich., March 9, 1910.

At the annual meeting and banquet of the Detroit Music Trade Association, held at the Griswold House on March 1, among the many interesting addresses delivered was one by C. St. Elmo Lewis, advertising manager of the Burroughs Adding Machine Co., in which he discussed salesmanship from practically all viewpoints. The address was an interesting one, interspersed with many little stories based upon the experience of the writer in which he told of having visited various stores and tested the qualities of the sales force and in mostly every instance found them lamentably lacking in all those essentials which tend to make a successful salesman. He said:

"There are two fundamental elements that go to make up a salesman—enthusiasm and knowledge of the goods. Enthusiasm is the steam, the force behind the knowledge; knowledge has to do in turn with two other items—knowledge of men and knowledge of the goods to be sold. Of these two things enthusiasm is the thing born in a man."

Mr. Lewis showed very clearly and forcefully the great injury which the ignorant and incompetent man inflicts on a business. Among the illustrations adduced was the following, which bears upon our own industry:

"I want to buy a Victrola—some day—not for a year possibly. I have had five demonstrations, but no salesman has sold me. They're waiting for me to come in and say, 'Please send me one.'"

"One said: 'Why not let me send one up to your house on trial?'"

"I gave him ten good reasons—he didn't have one reason why I should. He asked me for objections. He got them—then didn't know what to do with them."

"He should have read the Victor's little book. 'Probably he was a born salesman and didn't need it."

"The proprietor didn't train that young man."

"That this criticism of retail salesmanship is generally shared by the large national advertisers who are endeavoring to make a market for trademark goods, is borne out in the increasing practice of preparing sales manuals, in organizing crews of men and women who go about the country not only demonstrating to possible customers, but demonstrating to the sales people how to sell the goods."

"Such concerns as the Victor Talking Machine Co. issue sales manuals, and their manual, by the way, is one of the most effective that has come to my notice."

Mr. Lewis's idea of "Creative Salesmanship,"

which was the title of his address, is explained in his definition of the salesman as of two broods—the man who waits for you to hand him an order, and the man who takes one away from you. The one is created by a ready market—the other creates a market.

OUR FOREIGN CUSTOMERS.

Amount and Value of Talking Machines Shipped Abroad from the Port of New York.

(Special to The Talking Machine World.)

Washington, D. C., March 10, 1910.

Manufacturers and dealers in talking machines will doubtless be interested in the figures showing the exports of talking machines for the past five weeks from the port of New York:

FEBRUARY 5.

Amapala, 4 pkgs., \$138; Brussels, 42 pkgs., \$284; Buenos Ayres, 75 pkgs., \$2,770; 112 pkgs., \$975; 45 pkgs., \$1,208; 163 pkgs., \$18,845; Callao, 3 pkgs., \$230; Colon, 4 pkgs., \$134; 4 pkgs., \$119; Havre, 3 pkgs., \$278; London, 351 pkgs., \$11,081; 12 pkgs., \$1,400; Manila, 219 pkgs., \$9,519; Maracaibo, 7 pkgs., \$277; Melbourne, 97 pkgs., \$1,349; 899 pkgs., \$6,420; Montevideo, 8 pkgs., \$806; 8 pkgs., \$585; Vera Cruz, 134 pkgs., \$5,153; Yokohama, 71 pkgs., \$3,393.

FEBRUARY 12.

Amapala, 15 pkgs., \$323; Berlin, 48 pkgs., \$1,142; 10 pkgs., \$379; Bombay, 10 pkgs., \$441; Guayaquil, 2 pkgs., \$114; Havana, 24 pkgs., \$1,201; Liverpool, 1 pkg., \$100; London, 216 pkgs., \$5,226; 28 pkgs., \$2,683; Melbourne, 3 pkgs., \$202; Milan, 1 pkg., \$256; Para, 1 pkg., \$106; St. John, 2 pkgs., \$113; Turin, 33 pkgs., \$1,480; Vera Cruz, 298 pkgs., \$4,911.

FEBRUARY 19.

Algoa Bay, 503 pkgs., \$3,985; Cartagena, 10 pkgs., \$375; Havana, 17 pkgs., \$420; Havre, 103 pkgs., \$684; London, 215 pkgs., \$4,022; 20 pkgs., \$2,400; 13 pkgs., \$1,018; Manila, 51 pkgs., \$3,969; Para, 16 pkgs., \$1,026; 5 pkgs., \$340; Progreso, 126 pkgs., \$3,556; Rio de Janeiro, 55 pkgs., \$2,335.

FEBRUARY 26.

Berlin, 203 pkgs., \$2,587; Buenos Ayres, 194 pkgs., \$4,393; Callao, 9 pkgs., \$440; Havana, 6 pkgs., \$196; Hong Kong, 11 pkgs., \$272; Limon, 4 pkgs., \$176; London, 12 pkgs., \$777; 240 pkgs., \$6,297; 46 pkgs., \$4,074; Melbourne, 106 pkgs., \$3,290; Milan, 6 pkgs., \$500; Rio de Janeiro, 18 pkgs., \$1,390; Shanghai, 8 pkgs., \$237; Tampico, 26 pkgs., \$281; Valparaiso, 7 pkgs., \$320; Vera Cruz, 98 pkgs., \$1,953; Yokohama, 2 pkgs., \$126.

MARCH 2.

Berlin, 11 pkgs., \$220; Buenos Ayres, 275 pkgs., \$14,234; Corinto, 10 pkgs., \$376; Demerara, 7 pkgs., \$236; Havana, 3 pkgs., \$185; 14 pkgs., \$1,123; Manila, 11 pkgs., \$744; Montevideo, 6 pkgs., \$1,665; Para, 9 pkgs., \$587; Rio de Janeiro, 5 pkgs., \$1,679; 8 pkgs., \$698; 9 pkgs., \$1,814; Sydney, 198 pkgs., \$3,763; Vera Cruz, 93 pkgs., \$2,609.

The man who thinks of the unpleasant things is unhappy. The man who thinks of the pleasant things is happy.

COL. DEZEVALLOS A VISITOR.

The Manager of Phillips & Buttorff Co. Places Orders with Columbia Co.—Came North in Interest of Military Tournament to be Held in Nashville in June.

Last week Charles Dezevallos, manager of the Phillips & Buttorff Mfg. Co., exclusive Columbia jobbers, Nashville, Tenn., was in New York, and during his stay was the guest of the Columbia Phonograph Co. Monday he visited the factory of the company, chaperoned by B. Feinberg, the special representative of the wholesale department. Before leaving for his home Mr. Dezevallos placed a substantial order for goods.

Col. Dezevallos came North on February 13 in the interest of the grand military tournament that will be held in Nashville June 19 to 27, stopping at Washington, D. C., to extend an extra invitation to President Taft and Secretary of War Dickinson to be present as special guests of honor. The President had a pleasant chat of a quarter of an hour with Mr. Dezevallos, chairman of the committee of arrangements, and promised to attend the tournament if Congress adjourned by that time. The head of the War Department, as a native Tennessean, assured his visitor he would be on hand. Several other prominent public men gave the same assurance, so that the mission of the Columbia Co.'s representative was successful in every sense. Mr. Dezevallos is the son-in-law of Mr. Buttorff, of the company, and attends to the buying of the talking machine department.

PHONOGRAPHS IN LEPER SETTLEMENT.

In the leper settlement at Kalawao, Molokai, Hawaii, several Home phonographs and over 1,200 records, distributed throughout the entire reservation, afford unlimited entertainment to the inmates, especially to the young people, according to a letter recently received by the National Co. from the superintendent of the colony. The records of native songs and dances made in America by Toots Paka's Hawaiians are, of course, in greatest demand, but the leper boys extract no end of amusement from making records of their own voices—songs, recitations, etc. In this they are quite successful, some of the records, Superintendent Dutton says, being very good, low, and quiet but tuneful.

EDWARD D. EASTON RETURNS.

Edward D. Easton, president of the Columbia Phonograph Co., General, reached the executive offices on March 7 after a fortnight's visit to Mexico with Mrs. Easton. They had returned to their beautiful home in Agricola, N. J., the preceding Saturday, greatly pleased and benefited by the trip.

None of us does his level best, though most of us boast that we do. There is more latent than active power in the average man; the man of whom this is not true is apt to be a genius.

AN IDEAL RECORD CLEANER.

Sol Bloom Finds That Carbona Removes Dust and Foreign Substances from the Surface of Records—A Non-Explosive Preparation Which Has No Offensive Odor.

It is generally admitted that Sol Bloom, the well-known talking machine jobber of New York and Philadelphia, is not only a clever business man but original and novel in his methods.

Recently Mr. Bloom made a discovery—a discovery which will interest talking machine men everywhere.

He had been trying for some time to find a substitute for benzine in cleaning disc records.

The objection to that liquid is its inflammability, also the odor is offensive.

While investigating, Mr. Bloom tried Carbona and with excellent results.

This preparation was ideal in every respect, removing all dust and accumulation of any nature whatsoever and without any disagreeable after effects.

Mr. Bloom was somewhat enthusiastic over his discovery and while discussing the matter with *The World* in his Fifth avenue office last week requested that several of the oldest disc records in stock be submitted to him.

Two or three gentlemen were present at the time and after moistening a cloth with Carbona the surface of the records was rubbed gently and every particle of dust and accumulation was removed, leaving the record as bright and clean as when it left the factory.

After the demonstration was made, which was more than satisfactory to the gentlemen present, Mr. Bloom said:

"I believe that every talking machine man in the country will be interested in this.

"It does away with all danger from explosion in having benzine around the premises and there is no objectionable odor.

"Carbona, to my mind, has qualities which make it an ideal record cleaner and I feel that my discovery, if the world terms it such, will be hailed with delight by talking machine men everywhere when they learn of the excellent properties of this creation."

Talking machine dealers and users will at once recognize the value of a perfect odorless cleaner which is non-explosive and Carbona seems to fill all of the requirements.

It will be particularly convenient for dealers whose customers constantly ask them for a good record cleaner.

Carbona can be easily procured and it can be easily carried in stock by dealers.

It has become an article of necessity almost in the household, only people do not know of this new use to which it can be successfully put.

After records have been handled a certain time the grooves become filled with dust and when handled by sticky and perspiring fingers the floating dust finds a firm lodgment, and all this, of course, interferes with the sound, and Carbona, when placed upon a cloth and rubbed over the record, removes instantly all foreign substance of any nature whatsoever.

BUSINESS AT THE EDISON FACTORY.

Business prospects at the Edison factory are brighter at the present moment than they have been at any time in the past two years. Orders are increasing daily and many of them, in the magnitude of their proportions, recall pleasant memories of the kind that prevailed before the now historical depression. For instance, one jobber's order for Amberol records covering a period of ten days ran well into six figures—meaning, of course, number of records. There is plenty of evidence, moreover, that the present condition is stable. The orders are well balanced among the various types of machines and records, for one thing, and then the general tone of letters from the trade indicates the restoration of confidence among the selling branches.

There is an unabated demand for Amberols, which the company are extending themselves in

every way possible to meet. Judging from the enthusiasm that is manifested among the trade and the testimonials from pleased purchasers, which are sent without solicitation, the Amberola has stimulated the talking machine business to a tremendous degree. The National people expect to soon be in a position to exchange their new combination Amberola reproducer, model N, for the model L, thereby enabling their dealers to placate those owners of Amberolas who are as yet prevented from playing their Standard records on the machine.

The orders for Amberol records have been so heavy as to keep their production pushed to the limit in order to take care of the regular schedule. It was impossible, therefore, to prepare for the attachment proposition without the installation of additional machinery, which has been done, and which, they expect, will enable them to take care of the enormous volume of orders that are certain to follow its introduction.

DEATH OF S. E. PEARSALL.

After an illness of a month, Silas E. Pearsall, proprietor of the firm of Stanley & Pearsall, Victor distributors, 541 Fifth avenue, New York, died suddenly on March 6 at his home in Passaic, N. J., aged forty-three years. The funeral took place March 8, but the place of business was not closed. The business, in the heart of New York's fashionable retail district, originally established by G. A. Stanley, formerly connected with the Jacot Music Box Co., was later acquired by the deceased partner, and now reverts to the latter's father, who will continue it without change. Miss Spaulding is the capable manager in charge, assisted by a sister, and this status will be preserved. Mr. Stanley, who retired on account of delicate health, sails for Europe next week.

A FINE "TALKER" DEPARTMENT.

When the talking machine department of the Gimbel Bros. store in Milwaukee, Wis., is finally settled in the new quarters on the second floor of the building and the five handsome sound-proof rooms are completed, Manager L. C. Parker will have one of the finest talking machine stores in the city. One of the features of the new quarters is the large auditorium for the purpose of giving Victrola recitals.

The good employe never betrays the power which employs him. He is never even remiss in its service.

EXPORTS AND IMPORTS

Of Talking Machines for January—Exports Show Strong Gain as Compared with Last Year—Some Interesting Figures.

(Special to *The Talking Machine World*.)

Washington, D. C., March 9, 1910.

In the summary of exports and imports of the commerce of the United States for the month of January (the latest period for which it has been compiled) which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following interesting figures relating to talking machines and supplies are set forth:

The total exports of talking machines, records and supplies for January, 1910, amounted to \$301,865, as compared with \$238,691 for the same month of the previous year. The seven months' exportations of talking machines, records and supplies amounted to \$2,191,548, as against \$1,711,887 for the same period in 1909.

The total export figures for the seven months of the past three years are as follows: 1908, \$3,064,633; 1909, \$1,711,887; 1910, \$2,191,548.

The value in detail of exportations of talking machine records and supplies amounted to \$202,764 in January, 1910, as against \$238,691 for the same month of 1909, and for the seven months ending in January, 1910, they amounted to \$1,398,592, as against \$1,711,887 in 1909 and \$3,064,633 in 1908.

The value of all other parts relating to talking machines, phonographs, records and materials therefor sent abroad during January, 1910, amounted to \$99,101; the total exports for the seven months under this heading foot up \$792,956.

ASSETS TO BE DISTRIBUTED.

Receivership of Leeds & Catlin Co. Terminated.

(Special to *The Talking Machine World*.)

Middletown, Conn., Feb. 28, 1910.

In the Middlesex County Superior Court, Judge Case has accepted the final report of Thomas S. Brown, as receiver of the Leeds & Catlin Co., manufacturers of talking machine records, and has terminated the receivership. The property has been sold under foreclosure proceedings brought by the Hamilton Trust Co. of Brooklyn, as trustee for the bondholders, and the assets have been ordered distributed among the bondholders, most of whom live in New York. The assets yielded enough to pay only a small percentage of the face value of the bonds.

The man who keeps on knocking will sooner or later begin to hear things about himself that will be news to him.

ABSENT-MINDED PUP—AH! THIS MUST BE MASTER!

(*Evening World*.)

TALKING MACHINE DEALERS ORGANIZE

The Eastern States Talking Machine Dealers' Association Elect Officers and Adopt Constitution and By-Laws at Meeting Held in New York City on March 9—Addresses by a Number of Notable Members of the Trade—Frank C. Storck Becomes President—Will Meet in Atlantic City with the Jobbers in July—An Important Conference.

Responding to a call sent out by Frank C. Storck, of Red Bank, N. J., a goodly number of talking machine dealers of New York and neighboring States met at the New Grand Hotel, New York, on March 9, for the purpose of forming the Eastern States Talking Machine Dealers' Association. Besides the dealers there were present, by invitation, representatives of the three manufacturing companies, the National Association of Talking Machine Jobbers and The Talking Machine World.

The meeting was divided into two sessions, the morning session being given over to the discussion of the needs of an association and what could be accomplished by such an organization. Mr. Storck, as temporary chairman, opened the meeting with a few remarks regarding the object of the gathering, and then called upon Louis F. Geissler, general manager of the Victor Talking Machine Co., for suggestions.

Louis F. Geissler's Address.

Mr. Geissler in his talk dwelt strongly upon the possible effects of co-operation among the dealers in any particular town or section of territory, and pointed out that three dealers in a town working in harmony could accomplish more for the talking business than double the number working at cross purposes, and that everything done to further the cause of the talking machine meant an increased business for all those handling the line. He also proposed a division of territory among the dealers of a town, and declared that better results could be accomplished by a dealer working a certain section thoroughly than by covering a large territory in the face of strong competition. Mr. Geissler then emphasized what the factories were doing to advance the business through their advertising and sales departments, and stated that the work of the factories was largely wasted unless dealers put forth their best selling efforts. He expressed himself as being greatly in favor of house to house canvassing as the best way to uncover prospects. In closing, Mr. Geissler gave assurances of his company's interest in any movement for the benefit of the dealers and promised all the support possible.

Edward Lyman Bill Called Upon.

Edward Lyman Bill, editor and proprietor of The Talking Machine World, was next called upon to offer what advice he could regarding the proposed organization, and in the course of his remarks pointed out the benefits derived from organization and where the dealers would find an association of value to them in their business. Mr. Bill emphasized the fact that no half hearted interest could be expected to bring results in association work, and that only by pulling strongly together could the venture prove a success and accomplish its objects.

Then, too, the dealers were warned not to attempt too much in the beginning, but rather to take up each matter separately and bring it to a successful conclusion before attempting anything else.

Mr. Bill stated that he was a decided optimist regarding the talking machine business and considered that at present it was only in its infancy, with its greatest growth yet to come. In closing he promised his hearty support to the movement through the medium of The Talking Machine World.

Letters from F. K. Dolbeer.

F. K. Dolbeer, sales manager of the National Phonograph Co., who was unable to be present, sent a letter voicing the approval of that company for the movement, and promising support where possible. Mr. Dolbeer was represented at the meeting by A. C. Ireton, assistant sales manager, who made a brief address.

H. A. Yerkes' Interesting Remarks.

H. A. Yerkes, representing the Columbia Phonograph Co., was also called upon, and made an interesting address, in which he expressed the complete sympathy of his company with the movement and wished it every success. He dwelt upon the value of associated work, emphasizing the fact that if the talking machine dealers stood together with a common purpose in view that much betterment could be accomplished. His talk was received with close attention.

The chairman then said that they would be pleased to hear something from the advertising end of the talking machine business and called upon Geo. P. Metzger, advertising manager of the Columbia Phonograph Co.

Geo. P. Metzger in Optimistic Mood.

Mr. Metzger is an optimist on the talking machine situation, and in the course of his remarks it was plain that he believed the trade surface only had been scratched. He emphasized the necessity of hustling for business, and instanced the fact that where he lived, Stamford, himself, or none of his friends, save one, had been approached by local dealers to sell them a talking machine.

Mr. Metzger felt that what was true in his town was true of others, and that the field was a rich one which lay before the talking machine dealers, and it only required systematic effort on their part to produce rich harvests.

There were a number of other short talks when the chairman announced that as the hour was past twelve it was necessary to adjourn for lunch, and that the meeting would re-convene at two o'clock, at which time definite plans for the formulation of a permanent organization would be presented for the consideration of the talking machine men present.

J. N. Blackman on Association Work.

At the opening of the afternoon session J. Newcomb Blackman, vice-president of the National Association of Talking Machine Jobbers, and one of the most active members of that successful organization, spoke on the subject of association benefits and methods, from his own experience, and offered the dealers some excellent advice for their guidance in the new undertaking.

After Mr. Blackman's talk the work of organizing made rapid progress, the following officers being nominated and elected: President, Frank C. Storck, Red Bank, N. J.; vice-president, H. V. Lough, Plainfield, N. J.; secretary, John Diehm, Brooklyn, N. Y., and treasurer, A. Lasus, New Rochelle, N. Y. On the executive committee were appointed E. F. Glover, West Hampton Beach, N. Y.; Chas. A. Laureigh, Orange, N. J.; Thomas Riddell, Brooklyn, N. Y.; R. Montalvo, New Brunswick, N. J., and M. Goransky, Yonkers, N. Y.

The constitution and by-laws, drawn up by a committee appointed at a preliminary meeting early last month, were approved with slight changes.

The dealers registered at the meeting were: H. V. Lough, Plainfield, N. J.; Chas. A. Laureigh, Orange, N. J.; M. Goransky, Yonkers, N. Y.; H. Henry Springmann, Hempstead, L. I.; Irwin Moser, Hamden, N. J.; M. Buchner, Newark, N. J.; W. O. Brown, Dover, N. J.; Barnett & Buck, Newburgh, N. Y.; H. H. Lister, Plainfield, N. J.; N. Alexander, Long Branch, N. J.; International Phonograph Co., New York; Greater New York Phonograph Co., New York; Adolph Mayer, New York; Jacob Wester, Newark, N. J.; Otto Goldschmidt, New York; John Lanzaro, Brooklyn, N. Y.; Thomas Riddell, Brooklyn, N. Y.; A. Lustberg, Huntington, L. I.; E. F. Glover, West Hampton Branch, N. Y.; R. Montalvo, New Brunswick, N. J.; Seaver Bros., Brooklyn, N. Y.; John Diehm, Brooklyn, N. Y.; Frank C. Storck, Red Bank, N. J. The following dealers were registered at their written request, though not present at the meeting: Irving P. Hallock, Greenport, N. Y.; D. S. Marsh, New London, Conn.; G. Pagani & Bro., New York; F. E. Soule, New Milford, Conn.; E. A. Koonz, Wurtsboro, N. Y., and B. Howard, Tannersville, N. Y.

Before the adjournment resolutions were passed thanking the hotel management for their courtesy and Edward Lyman Bill for the support afforded the association through the columns of his publications.

The next meeting will be held on April 13 at the New Grand Hotel, New York, and thereafter meetings will be held every quarter on the second Wednesday of the month. It is hoped to hold the July meeting at Atlantic City at the same time as the jobbers' convention, July 5, 6 and 7.

A meeting of the executive committee has been called for March 18.

The yearly dues are \$5 for active members and \$2 for associate members, the latter not being entitled to any vote though they may attend the meetings and profit by the discussions.

SYRACUSE WIRE RECORD RACK No. 2A WITH BOARD SHELVES

This illustration shows our 2A rack with board shelving so that the envelope system for carrying the records can be used. This rack is an exact duplicate of our 2A with the addition of the wood shelving. If you have our catalog compare it with our 2A; if you have no catalog get one to-day.

Price of the Rack as Shown, \$5.25 (envelopes NOT included)

SYRACUSE WIRE WORKS, Syracuse, N. Y.

The R. S. Williams & Sons Co., Toronto and Winnipeg, Canadian Representatives

The Columbia Grafonola is "the one incomparable musical instrument."

Applications for membership should be forwarded to the secretary, John Diehm, Brooklyn, N. Y., accompanied by the annual dues.

The dealers present at the meeting were enthusiastic at the prospect of the association and the possible good that may be accomplished through the organization, and are confident that the membership will rapidly increase now that a start has been made. An active campaign will be begun at once to secure new members.

Party Visits National Co. Factory.

On Thursday morning a party of about a dozen dealers visited the factory of the National Phonograph Co., at Orange, N. J., in response to a hearty invitation extended by Mr. Ireton, and were conducted through all the departments of the plant. At noon the dealers were entertained at lunch by the company. They were much impressed with what they saw regarding the manufacture of Edison machines and records and very appreciative of the courtesy shown by the company.

A SALES PROMOTION PLAN.

Weser Bros., Piano Manufacturers, Have a Novel Plan for Sales Making Which Will be of Interest to Dealers.

Talking machine dealers are quite naturally interested in business plans whereby manufacturers co-operate with them for the extension of trade.

Some of the talking machine men who have taken on pianos have found the line to blend splendidly with talking machines, but a good many have not cared to enter into an outside line because they are not acquainted with the conditions and do not understand how to handle trade problems.

Weser Bros., the well-known piano manufacturers, 520 West 43d street, New York, have incorporated a new feature in their business which they term "The Dealer's Sales Promotion Department."

It is a co-operative advertising plan and it has worked out successfully.

Weser Bros., in a recent bulletin issued, state: "Our plan of following up your prospective piano purchasers direct from this office is a sales 'clincher.' We have prepared, after much time, study and revision, a series of letters containing sound, sensible reasons why every prospective piano purchaser should buy the Weser piano. We have learned from experience that prospective purchasers of any commodity like to receive letters direct from the manufacturer. It creates confidence in the first place—and it puts the prospect in a very receptive frame of mind. Our letters do the hard, preliminary introduction work for the dealer and make sales twice as easy for him. We want every Weser dealer to send us his list of live, prospective purchasers, and we will send them this series of letters, our latest elaborate catalog (either regular piano or player-piano), whichever they may be interested in, and write any special letter or letters you may deem

necessary to get the business—all at our own expense.

"We have in preparation, as this bulletin goes to press, an elaborate electrotype book containing a large number of original, attractive illustrative cuts for use in connection with Weser newspaper advertising. This book has been prepared to assist the dealer in his advertising campaign and to relieve him of the bother and expense of preparing newspaper announcements.

"We have also had a large number of newspaper electrotypes of our complete line of pianos made, which we will be glad to send you on request, and we will write up any of your advertisements that you desire, if you will send in the facts. You thus have an up-to-date mail order and advertising department at your disposal at all times.

"Our handsome photograph album, containing 5 x 7 actual photographs of our complete line of pianos and player-pianos, is now ready for distribution. These photographs show off our pianos to unusual advantage, and bring out all the details in the carving and the case work, and have a much better effect than could possibly be obtained by half-tone work in a catalog. This album fits conveniently in the coat pocket and has proven of great assistance to Weser dealers and their outside salesmen.

"We are always glad to send a liberal supply of catalogs and small folders illustrating our complete line of pianos and player-pianos with the dealer's name imprinted thereon. This advertises you as well as our piano.

"We will advance from time to time a number of new advertising features for the benefit of the Weser dealer, and we invite suggestions along this line at all times. We have also made a great

many improvements in our factory and sales organization, as well as in the construction of our pianos."

BLACKMAN CO.'S GOOD REPORT.

Good Orders from Regular Dealers and a Number of New Dealers Secured—Demand for the Blackman Specialties—The Playrite and Melotone Needles.

The Blackman Talking Machine Co., as usual, have an excellent report to make regarding the business during the past month, and state that besides adding several new dealers to their already large list, they have been in receipt of substantial orders from practically all of their regular dealers, which may be taken as an indication that the retail talking machine business in their territory is of an active nature.

Besides the various styles of machines and records, the Blackman specialties—the Blackman folding record trays, Place record brushes, and Playrite and Melotone needles—are in growing demand.

Both the needles named have proven very popular with the users of disc talking machines, owing to the fact that they produce the results as represented. The Playrite needles have been found to produce an excellent volume of tone and do not give out in the middle of the record, but keep up their good work right to the end. The Melotone needles have been found specially desirable for the home, giving a mellow but perfect reproduction. Jobbers and dealers who are not familiar with the Blackman needles should write for samples, which are free to the trade.

MAX LANDAY, PRESIDENT OF LANDAY BROS., INC., EXAMINING A PROOF RECEIVED FROM PRINTER ON A CUSTOMER'S FILING CARD, A COPY OF WHICH WILL APPEAR IN HIS FORTHCOMING BOOK, "HOW TO MAKE YOUR 'VICTOR' BUSINESS A SUCCESS."

Papers that are Read throughout the World

A traveler returning from a world-wide trip remarked while recently in the office of this trade newspaper institution: "I was very much surprised to find your papers scattered completely round the world. No matter in what country I visited, I found your trade newspapers there ahead of me."

In this connection we may state that there is hardly a country on earth which is not reached by this trade newspaper organization.

The illustration which is shown above is a photographic reproduction of foreign remittances which came in a single day's mail.

Upon examination it will be seen that remit-

tances were received from Japan, New Zealand, Mexico, Australia, Queensland, New South Wales, Canada, France, England, French Colonial possessions as well as other British colonies.

Probably few trade newspaper institutions could show such indisputable evidence of world-wide circulation. Readers seldom stop to consider what an influence is wielded by a trade paper which attracts the attention of business men of all lands.

They consult it regularly—they await its arrival with interest because it conveys to them an intelligent summary of conditions in the par-

ticular lines of trade in which they have a deep interest.

Aside from news features, well conducted trade papers contain many valuable suggestions which are of aid to the merchant and manufacturer, and while not controlling them or exerting an autocratic influence over them, it wields a tremendous force simply by reason of the manner in which it appeals to the intellectual side of business men.

This trade newspaper organization has been built simply through the delivery of values alike to subscribers and to advertisers.

NONPAREIL RECORD CASE (CLOSED).

Record and a movement will disclose the entire contents of the Album.

It Holds Thirty Records

A handsome addition to any Library shelf.

An elastic method of filing to take care of your growing collection.

Volume of Business During February Proves Highly Satisfactory to the Talking Machine Trade—January Record Surpassed—Higher Grade Goods Have the Call—Hard to Get Victor Goods—Popularity of the Edison Amberola—Columbia Co. Line Selling Well—E. E. Wiswell Suffers Bad Accident—Talking Machine Co. News—Personal Items of Trade Interest—Advance of the Fibre Needle—M. M. Blackman's Condition Much Improved—Other News from the Windy City

(Special to The Talking Machine World.)

Chicago, Ill., March 10, 1910.

If January was a surprise as regards volume of business February was a double surprise. Although suffering the loss of several business days, as compared with the first month of the year, it made a much better showing and all the important jobbing houses, and, in fact, the leading high grade retail stores and departments, report a big gain over February of last year. Some say it was the best February for years. It is necessary, however, to qualify these statements by saying that the gain is in dollars and cents, not in the number of machines and records sold. As repeatedly pointed out in this correspondence the tendency is overwhelmingly in favor of the medium and higher-priced machines, and the big musical thing in the record proposition. This fact is very significant. It means that the artistic idea has come to stay in the talking machine field. It means that not only the wealthy people but the musical people are buying high priced talking machines and records of the great artists. If this were not so the trade would be in a bad fix. A large proportion of the population is practically out of the running as far as talking machine and record buying is concerned. That is, they are out of the game for the present. They are disgusted with the very cheap machine and they are either not in a financial condition or are not educated up to the point of buying the better grade. That the time is coming when this condition will change is a moral certainty to anyone who tries to get "under" the situation. In the meantime there is absolutely no excuse for any dealer to rest on his oars because of existing conditions regarding low-priced machines. No matter how small the community there are a number of people in it who can be reached by a persistent, dignified sales campaign, and whose purchases will amount to a figure equal to that which would be represented by a much larger number of sales of cheap machines.

Victor Goods Hard to Get.

Reports from the East indicate that the Victor factory is a pretty busy institution. Notwithstanding this dealers say that they simply cannot get Victor machines fast enough to supply their demands. This in itself furnishes good evidence that business, at least in the good sized centers throughout the country, is O. K.

Edison Amberola Now a Permanent Feature.

The Edison Amberola has passed the sensational stage, and from the Chicago viewpoint, at least, it is a permanent winner. The demand is excellent and it is only fair to say that people who have been in the past prejudiced regarding the cylinder proposition, are coming in line as a result of the influence of this latest and very notable development by the National Co.

Record Month for Columbia Co.

February was one of the very largest months in the history of the Columbia Phonograph Co., according to headquarters correspondence. The Chicago branch came up with an increase of 58 per cent. as compared with February of last year, and the majority of branches and large dealers in the immense territory, covered by District Manager W. C. Fuhri, also made re-

markable increases. The Columbia concealed-horn machine, especially the Regent or library table type, are having a remarkable sale, and this type is also out of the sensational stage. Nearly fifty of them were shipped to one California city within two weeks. Although the "library tables that talk" are coming through the factory much more rapidly than formerly, it's all that the Chicago branch can do to get enough to supply their trade. The same conditions prevail in other cities.

Accident to L. C. Wiswell's Father.

L. C. Wiswell, manager of the talking machine department of Lyon & Healy, deserves and is receiving the sincere sympathy of the trade because of the terrible accident that befell his father, Edward E. Wiswell, recently. Mr. Wiswell, senior, is an expert structural iron work man. He superintended the erection of the great Ferris wheel, which was the crowning engineering glory of the Chicago Columbian Exposition in 1893, and has been employed in some of the biggest structural jobs in Chicago. Three weeks ago he was directing the operation of a large company of iron workers employed in the erection of a building at the Inland Steel Company's plant at Indiana Harbor. A rope, running on the drum of a hoisting engine, became fouled. Mr. Wiswell attempted to adjust it and his hand was caught between the rapidly moving rope and the drum. He called to the engineer to throw off the power, but the man became dazed and unable to move, and Mr. Wiswell's hand was literally twisted off his arm. In the attempt to save himself he stretched forth the other hand and it, too, was so badly mangled that it had to be amputated. He was taken to St. Margaret's Hospital at Hammond, Ind., and is still there. He is a man of magnificent physique, but his condition is regarded as precarious. His faithful son visits him every day.

Geissler Home and Happy.

Arthur D. Geissler, general manager of the Talking Machine Co., has returned from a trip to various Florida resorts and Havana in company with his father, L. F. Geissler, general manager of the Victor Talking Machine Co. Together they inhaled the southern balmy air, caught many voracious sea monsters and enjoyed themselves thoroughly. The Chicago Geissler returned home bereft of the last vestige of the rheumatic attack which laid him low for some weeks. Upon going over the records of the Talking Machine Co. he was delighted to find that last month was the largest February in the history of the house with the exception of that of 1907.

Various Personals.

John Otto, of the talking machine department of Lyon & Healy, is a confirmed and inveterate Victor recitalist. "Friend" Otto gave a talk on "voice engraving" before Everett Council, National Union, last month, and was ably assisted, of course by a Victor machine. By the way, while the automobile show was in progress at the Coliseum last month, Otto showed a Victrola at Lyon & Healy's and sold it.

H. L. Wilson, one time manager of the Chicago office of the Columbia Phonograph Co., and later assistant to General Manager Lyle at headquarters, was a visitor to Chicago during the month in the interests of the firm of A. J. Wilson, investments, Philadelphia, of which he is now a member.

W. C. Fuhri, district manager of the Columbia Co., has just returned from a trip which included the widely separated point of Kansas City and Detroit.

Well Known Iowa House Discontinues.

John A. Dean, of the W. A. Dean Music Co., Sioux City, Iowa, was in the city last week and announced to his friends that the W. A.

Dean Music Co. would retire from business and that the members would go to Los Angeles, Cal., to join W. A. Dean, who was compelled to go to the California city some time since on account of his health. While Mr. Dean made no positive statement to that effect, it is assumed that he and his father may become factors in the piano trade of that city. The company is one of the old and well-known music concerns, and were established in 1883. They have been exclusive distributors in their territory for the Columbia Phonograph Co., besides handling a fine line of pianos. They are now closing out their stock.

Fibre Facts.

Some decidedly convincing talk is indulged in by the B. & H. Fibre Manufacturing Co. in their page advertisement in this issue.

Over at the factory on Kinzie street there is a record of Stanley's rendition of "Rocked in the Cradle of the Deep," which is being played by the fibre needle over five thousand times but which hits the sub-basement notes, and, in fact, all the notes, with the same trueness and absence of scratchiness which characterized its premiere appearance.

More fiber needles were sold in February than in any month since their appearance.

Blackman Convalescent.

M. M. Blackman, manager of the retail record department of Lyon & Healy, is at Mobile, Ala., for a fortnight's finish on his convalescence from an illness which confined him to his home for nearly three months. Before the next issue of The World is out he will be back on the job with his melting smile and polyglotal command of Victor titles unimpaired.

AN IMPORTANT DECISION

Handed Down in Ohio Whereby Edison Dealers Are Enjoined from Selling Below the Agreement Price—Also Prohibited from Selling Cylinder Records of Any Other Make—Wm. Pelzer's Views.

(Special to The Talking Machine World.)

Springfield, Ill., Feb. 28, 1910.

A decision of importance to the entire talking machine industry is that handed down on February 11 by Judge Humphreys, Circuit Court of the United States, Eastern District of Illinois, sitting in this city. Rather no opinion was written, but a decree of great fulness was signed, in which John F. Brenner, an Edison dealer of Quincy, Ill., and a Mrs. Clara B. Oakford, were perpetually enjoined from selling the product of the National Phonograph Co., Orange, N. J., below the agreement prices. Incidentally the court ruled that both of these parties were prohibited from selling in their store cylinder records of any other manufacturer than those of the National Co., namely, Edison goods. The defendants settled out of court all claims for damages for past violations charged. The suit was brought in the name of the New Jersey Patents Co., controlling the patents under which the National Phonograph Co. is licensed, and the inventions at issue were again declared valid.

* * * *

When the foregoing matter was brought to the attention of the National Phonograph Co. by The World, William Pelzer, vice-president, said: "The case is of no special importance. Brenner refused to sign our amended agreement, relative to handling the Edison line exclusively, and, of course, he was dropped from the list. Then he obtained goods through this Mrs. Oakford, and then he commenced slashing prices. We brought an ordinary 'price-cutting' suit such as The Review is familiar with, and, as in every other case of this kind, the restraining order was made perpetual. The enjoining of the parties from handling any other than Edison cylinder records, set up as a defense, was merely inci-

There is a Big Difference in Service

Your jobber may either be a co-worker or a detriment to your best financial interests. It all depends on the service you get. If you want the best kind of service—service that really serves—service which means that every order will be filled complete and shipped the same day order is received—service which includes the best intelligent assistance in helping you to push your goods, you can obtain it by placing your orders for Victor and Edison Talking Machines and equipment with the long established house of

LYON & HEALY

If you could step into our order filling and shipping department, you would understand how this service is possible, for every movement shows clock-like precision. There are no wasted steps, stock is never allowed to run low, every man knows just what is expected of him and does it. These and other good reasons insure every dealer of genuine satisfaction when placing his orders with us. If you are not already one of our customers, we invite your thorough investigation and we know that a fair trial will convince you of our ability to serve you as no one else can. Our terms are very attractive. Write for a full explanation of them.

Lyon & Healy

CHICAGO

dental. This is not the first case of this kind by any manner of means; there are a lot of them, that is, where dealers have been permanently enjoined from selling only Edison records when carrying the line according to our agreement. Frank L. Dyer, president of the company, is now preparing a statement covering this ground thoroughly for the information and enlightenment of the trade, and which will be ready shortly. A judge seldom writes an opinion in these cases, simply signs the decree."

NATIONAL PHONOGRAPH CO. STRICTLY ENFORCE THEIR SELLING SYSTEM.

The determination of the National Phonograph Co., Orange, N. J., to strictly enforce their selling

system and to punish all violations thereof is apparent from the number of decisions obtained by them against parties guilty of violating the conditions under which the patented Edison phonographs and records are sold. Every Edison record bears a notice printed upon the carton that such record is not licensed to be sold by the original or any subsequent purchaser for less than full list price. This provision clearly prohibits both sales by dealers of new records below list price and it also prohibits the sale of used or second-hand records by any person at less than list price, since such a sale must be made by either the original or some subsequent purchaser.

Most of the injunctions heretofore obtained have been against the sale of new records by dealers at less than list price, but in the recent case of the New Jersey Patent Co. and National Phonograph Co. against Charles Fredricks, decided Feb. 26 by Judge Chatfield, Circuit Court of the United States, eastern district of New York, the complainants have succeeded, against opposition of counsel, and upon full consideration of the authorities by the judge, in obtaining a preliminary injunction prohibiting the buying up of used Edison records at less than list price and their subsequent resale at second-hand at less than list price. As this decision will be of considerable interest to the trade, it is published below in full.

"This case coming on to be heard on motion of complainants for a preliminary injunction, and affidavits having been filed by complainants in support of said motion and by defendant in opposition thereto, and it appearing from the said affidavits that the complainant, New Jersey Patent Co., is the owner of the patent in suit, and the complainant, National Phonograph Co., is the exclusive licensee thereunder for the manufacture, use and sale of cylindrical sound records embodying the invention thereof throughout the United States and its territories, with power to fix and impose terms and conditions of sale thereof, and that the Edison records embody the invention of the patent in suit, and are manufactured and sold by the complainant, National Phonograph Co., in pursuance of said license and only to jobbers and dealers who are licensed to deal therein and subject to restrictions which are embodied in jobbers' and dealers' license agreements and in the labels affixed to the cartons in which the said Edison records are contained, and that the said restrictions provide, among other things, that the said records are not licensed to be sold to an unauthorized dealer and are not licensed to be sold by the original or any subsequent purchaser for less than 35 cents each for Edison standard records, and 50 cents each for Edison Amberol records, and it further appearing that the defendant, Charles Fredricks, is engaged in dealing in the said patented Edison records without the license of complainants, and that, having knowledge of said restrictions, he has been and is engaged in purchasing the said Edison records at prices less than those fixed by the complainant, National Phonograph Co., both direct from jobbers and dealers of the National Phonograph Co. and at second-hand from members of the public, who have purchased the said patented Edison records from licensed jobbers and dealers of the National Phonograph Co. subject to the restrictions in said carton label notices contained, and is engaged in reselling the said Edison records so obtained from these sources, both new and second-hand, at prices less than those so fixed by the complainant, National Phonograph Co.; and complainants having appeared at the hearing of the said motion by Louis Hlicks, solicitor and counsel, and Herbert H. Dyke, of counsel, and defendant having appeared by his attorneys, Hunter & Hatch, and the said motion for preliminary injunction having been submitted for decision on briefs, and briefs of authorities having been filed on behalf of both parties, and the Court being fully advised in the premises, and being of the opinion that a preliminary injunction should be granted as prayed, upon due consideration, it is

"ORDERED, That an injunction issue out of and under the seal of this Court enjoining and restraining the said defendant, Charles Fredricks, and his associates, attorneys, servants, clerks, agents and workmen, and each and every one of them, pending this cause and until the further order of the Court, from in any way interfering with the carrying out of the selling license system of the complainant, National Phonograph Co.; and from soliciting, obtaining or procuring any of the authorized jobbers and dealers of the complainant, National Phonograph Co., to sell to him any Edison standard records at less than thirty-five (35) cents each, or any Edison Amberol records at less than fifty (50) cents each, or in any way in violation of the restriction in the printed labels upon the cartons in which the said records are contained when put out by the complainant, National Phonograph Co.; and from soliciting or procuring or aiding in any way in the violation of any of the provisions of any and all license contracts between the complainant, National Phonograph Co., and its jobbers and dealers; and from soliciting, aiding, obtaining or procuring any users or members of the public who have previously purchased the said Edison records in cartons bearing printed notices of the restrictions imposed upon the use and sale thereof by the complainant, National Phonograph Co., and subject to the restrictions of the said notices to sell the said Edison records to defendant at second-hand at prices less than those named in said restriction notices, namely, thirty-five (35) cents each for Edison standard records, and fifty (50) cents each for Edison Amberol records, or to violate in any wise any of the said restrictions in said notices contained; and from selling or causing to be sold any Edison standard records at less than thirty-five (35) cents each and any Edison Amberol records at less than fifty (50) cents each, or any of said records in violation of the license contracts under which the said Edison records were originally sold by complainant, National Phonograph Co., or in violation of the conditions and restrictions contained in the notices upon the labels affixed to the cartons containing the said records; and from directly or indirectly using or causing to be used, selling or causing to be sold, any apparatus, articles or devices embodying, operating or constructed in accordance with the inventions and improvements of said letters patent,

No. 782,375, without the license and consent of complainants thereto; and from infringing upon or violating the said letters patent in any way whatsoever."

NEW VICTOR DISTRIBUTERS.

Elmira Arms Co. Secure Large Territory and Place Orders for Victor Goods to the Value of \$15,000.

(Special to The Talking Machine World.)

Elmira, N. Y., March 11, 1910.

The Elmira Arms Co., of this city, have recently completed arrangements with the Victor Talking Machine Co. whereby they become distributors of Victor goods for a large territory. It is reported that under the new arrangement the local concern has placed an order for Victor goods to the amount of \$15,000. The store of the Elmira Arms Co. has been considerably enlarged and the talking machine department has been allotted a liberal space.

BRIEFLETS.

Last week F. K. Dolbeer, sales manager of the National Phonograph Co., received a cable from Walter Stevens, manager of the export department, stating he had arrived at Buenos Ayres, Argentine, S. A., on the "Bluecher" with Mrs. Stevens, and in the best of health. At this point Mr. Stevens leaves the steamer and goes by rail over the Andes Mountains to the west coast, where he will visit Valparaiso, Santiago, Lima and other points, rejoining the ship again at Buenos Ayres on its return from the trip to Punta Arenas, in the Straits of Magellan.

H. A. Macmenimen, general sales manager of Sheip & Vandegrift, Inc., manufacturers of the Music Master wood horn, was in New York March 1, going back in the evening. He said business was good and he was booking orders for the best grades of their specialty with the leading jobbers in the country.

Among the callers at the factory of the National Phonograph Co., Orange, N. J., last week was H. Shields, buyer for the talking machine department of the Denver (Col.) Dry Goods Co., who said his concern had closed a very successful year and that his portion of the business was up to the standard. C. B. Haynes, of C. B. Haynes & Co., Richmond, Va., was another visitor.

John H. Dorian, who represents the interests of the Columbia Co. in the Orient, with headquarters at Hong Kong, has notified the home office that he has just completed recording one hundred Chinese records in Cantonese dialect. He says they are the best ever made.

Every two months the export department of the Columbia Co. will issue a new list of records for the Spanish speaking trade.

THREE NEW COLUMBIA HEADLINERS.

Records by Raymond Hitchcock, George Lashwood and Manuel Klein and his famous New York Hippodrome Orchestra Soon Ready for the Market.

The Columbia people have secured three live ones lately—Raymond Hitchcock, George Lashwood and Manuel Klein and his famous New York Hippodrome Orchestra. Records by all three will soon be on the market, and it is claimed that "they are about the best yet in their particular lines." Hitchcock has proved to be a "find" of the first water. In the first place he ranks as one of the best singing comedians now on the American comic opera stage, and secondly, he makes a record that is absolutely unique. Since his first great success in "The Yankee Tourist"

RAYMOND HITCHCOCK, AMERICA'S FOREMOST SINGING COMEDIAN.

he has had no real rivals in his own particular field. Hitchcock's recording specialty is song-monologues of a kind that certainly could not be recorded in the same manner by any other living comedian. His style is unique. Each record is a perfect reproduction of character work of the cleverest description. The perfect naturalness and total absence of affectation which have been such great helping factors in Hitchcock's success are here observed at their best. His first record to be issued in May, is a rube song that he has made particularly his own—

MANUEL KLEIN, LEADER OF THE FAMOUS HIPPODROME ORCHESTRA.

GEORGE LASHWOOD, THE NEW STAR OF VAUDEVILLE.

"Wal, I Swan" (A-5162)—a hayseed sketch that will furnish amusement the year around, as recorded by Hitchcock. It is a perfect reproduction of the easy, rambling complacency and characteristic dialect of an old down-East farmer telling the history of his past life. Other records by Hitchcock will be coming along from month to month.

George Lashwood, who has just been featured throughout the United States by William Morris in his circuit of independent vaudeville houses, has made the real vaudeville hit of the past season in America. His success is already surpassing that of Albert Chevalier and Vesta Victoria at their best. His character work is that of a great artist, and his voice is resonant, agreeable and expressive. His range of portrayal is practically unlimited, as his records all show, and he is already well started in his career as one of the most distinctive figures on the American vaudeville stage. Previous to his arrival here he was heralded as "The Vaudeville Beau Brummel" of England, with a wardrobe supplied by King Edward's own tailor. Since he reached America he has amply demonstrated that he has more than a wardrobe to command him. His first double record, comprising "Sea, Sea, Sea," and "In the Twi-Twi-Twilight" (A-5157) is being issued in the Columbia April list, and a new one "My Latch Key" and "There's Another Fellow Looks Like Me" (A-5164) will be out in May.

Of the millions that have visited New York City during the past five years from every part of North America it is certain that a very large number have carried away pleasant recollections of the superbly artistic playing of the New York Hippodrome Orchestra under the direction of Manuel Klein. Realizing this, the Columbia Phonograph Co. recently made arrangements to have records made by this celebrated organization under the personal leadership of its distinguished director to be offered to the American public. The first recording has just come through and it justifies the highest expectations. The selection chosen by Mr. Klein for this initial record is the dainty "Flower Waltz" from Tschalkowsky's "Casse-Noisette Suite" into the recording of which Mr. Klein and his men have put some of the most effective work ever heard. Dealers should feel pleased at these new Columbia arrangements.

OFFICERS ELECTED.

At a recent meeting of the directors of the Sonora Phonograph Co., 78 Reade street, New York, the following officers were elected: President, George E. Brightson; vice-president and

general manager, William H. Hoschke; secretary and treasurer, William E. Hoschke. Mr. Brightson, the new president, was for nearly twenty-five years with the H. B. Claffin Co., having charge of the music box and novelties department. In recent years he has retired from business. This company are about to market a complete line of vertical cut disc records and machines.

A POPULAR UDELL CABINET.

New Udell Style for Victrola XII. Machine in Great Demand—A Catalog That Aids Dealers—New Styles of Music Roll Cabinets.

Among the many styles of cabinets put on the market by the Udell Works, one of the most popular is the No. 442 record cabinet, designed especially to go with the Victrola XII. Though the new cabinet was only put on the market last fall the orders quickly grew to a point where it proved difficult and finally impossible for the Udell factory to keep up with them. Special efforts and rapid work, however, have relieved the situation in that particular.

The general appearance of the cabinet is most pleasing in every particular, and when the Victrola XII. is placed in position on it the whole has the appearance of one machine, the finish of both being in perfect harmony. The dealers are very enthusiastic over the salable features of the cabinet, the index compartments, index card, needle box and shelf upon which to handle the records. The cabinet is also highly finished inside, which makes an excellent talking point for particular people. As a matter of fact, there have been instances where the Victrola XII. placed on a Udell cabinet has been selected by customers who were on the fence about buying one of these styles.

In dwelling on the Udell products it is difficult to pass by the beautiful catalog issued by the Udell Works, illustrating and describing in detail the large line of cabinets for records, sheet music and music rolls made by that concern. The catalog is designed as an aid to the dealer in making sales, and has been found to fulfil that mission in an entirely satisfactory way. The manner in which the catalog is compiled and the extent of the line it represents both serve to impress the purchaser and lend force to the dealer's arguments.

The Udell Works announce that following out their policy of always keeping up to date in regard to their cabinets, they have brought out a number of new cabinets for piano-player rolls, which match the piano-players in design and finish, and which have strongly appealed to the trade.

LISTED AS EDISON JOBBERS.

On March 9 Cohen & Hughes, the well-known music house at 315 N. Howard street, Baltimore, Md., were placed on the list of Edison jobbers by the National Phonograph Co., Orange, N. J. The initial order covering the jobbers' quantity was received at the time, and Sales Manager Dolbeer advises that shipment will be made just as promptly as factory conditions will permit.

COLUMBIA CO. IN TORONTO.

The Toronto (Canada) Phonograph Co. retired from business, and the Columbia Phonograph Co., General, have taken over the premises heretofore occupied by that concern.

Judge McPherson, United States Circuit Court Judge, Philadelphia, Pa., on March 7 handed down an order fixing the time for closing defendant's proof in the case of the Victor Talking Machine Co., Camden, N. J., against the Hawthorne & Sheble Co., now out of business.

The National Phonograph Co. have commenced suit against Charles A. Rigdon, music dealer, Warsaw, Ind., to restrain him from cutting prices on Edison goods. The complaint was filed in the Circuit Court of the United States, Indianapolis, February 25. The usual orders followed.

Double disc records are a Columbia innovation.

We cheerfully took all the blame and now we are getting all the credit.

RECORD PROGRAM SHEETS.

A Novel Invention Which Will be of Interest to Talking Machine Men—Simplifies the Keeping of Records.

An interesting announcement is made by the International Record Program Co., 102 West 29th street, New York, in another portion of this paper.

This concern has put forth a record program which is unique and novel. A reduced fac-simile is shown in this paper so that a correct idea of this may be formed by a glance at the illustration.

The cards are handsomely gotten up and beautifully lithographed, with gold border, ornamented in a way which makes them most attractive and they are surrounded by photographs of the world's greatest composers.

It will be seen at a glance that this new program will simplify the old method of searching for the desired record. It enables the owner to classify his records in such a way that they will be always within easy reach and can be immediately located.

These cards are very attractive and greatly simplify the keeping of records. Dealers' names will be printed upon the program when desired.

PROFITING BY SHOW WINDOWS.

Nothing Attracts Public Attention Like a Handsome Window Display—Windows Never Get Tired of Showing Goods.

Nothing attracts the public as quickly as a well arranged show window, where the goods should always be marked in plain figures.

Many merchants contend that it makes a window look common-place to use price cards, and as Tiffany does not use price cards we won't deny the contention, but we know the cards lure customers into the store; we know people go home and tell about seeing a handsome table in Blank's window for so many dollars. Then they all talk about Blank's store.

The show window never gets tired of showing goods; it is willing to work day and night, and right here let us say that it is a mistake to draw down the curtains to the show window and turn off the lights at 6 o'clock. The show windows never look better than at night and the goods speak as eloquently as through the day and they tell their story of style and prices just as effectively as they did when the store door swings open for the exits and entrance of customers through the day.

Show windows should work continuously, just as the interest does on a mortgage; neither interest nor rent takes a holiday nor rests on Sunday, and show windows belong in the same class. We have seen humanity gather around a show window at night when it was too cold to expect anyone to be out, much less linger to look into shop windows.

We read of a business man out West who built

a theater on the block beyond his store so the populace who were drawn to the theater would have to pass his show windows. That man had a keen sense of the value of show windows, but not an exaggerated sense.

CHANGE IN BANKRUPTCY LAW.

Bill Providing for Amendments in Existing Statutes Passed by House.

(Special to The Talking Machine World.)

Washington, D. C., Feb. 28, 1910.

After an ineffectual attempt by the Democrats, led by Representatives Clayton, of Alabama, and Brantley and Bartlett, of Georgia, to repeal all bankruptcy laws, the House this afternoon passed the Shirley bill providing certain amendments to existing bankruptcy legislation.

The more important provisions of the Shirley bill are that receivers and trustees shall be paid upon the commission basis; that corporations shall be allowed to enter voluntary bankruptcy; that all federal courts shall have ancillary jurisdiction in bankruptcy cases, and that trustees may oppose bankruptcy discharges when authorized by the creditors. The measure also remedies the loopholes in the present law making it possible for an insolvent debtor to have preferred creditors.

MOTION PICTURES FOR INSANE.

Asylum Superintendent Says They Soothe and Divert the Inmates.

The State Board of Public Lands and Buildings of Nebraska will buy a moving picture machine for the amusement of the insane patients at the Norfolk asylum. Superintendent J. P. Percival says that the pictures soothe patients and that they watch them without the exciting effects incident to other diversions.

NATIONAL COMPANY WIN SUIT.

A final decree and a perpetual injunction was recently issued against the Vallorjes Jewel Co., Lancaster, Pa., by the Circuit Court of the United States, Middle District of Pennsylvania, enjoining them from manufacturing and selling button-ball styluses or sapphire points which infringed an Edison patent. These styluses were mounted in lever arms suitable for use in Edison model C reproducers. The suit was brought by the New Jersey Patent Co. (National Phonograph Co.) upon the Edison reissue patent No. 11,357. When the court granted a restraining order the infringement was discontinued and a settlement quickly made with the complainants. This was a test case and the patent was sustained.

Philip Werlein, Ltd., 305 Canal street, New Orleans, La., have taken on the Edison line as jobbers, and will in the immediate future have a full and complete stock of the Edison laboratory products.

A Word to the Talking Machine Men of America!

Presumably you are interested in a product which can be used to advantage by every owner of a disc talking machine record in the world.

Of course you have had customers come in and ask you for something with which to clean records.

All records get gummy. The grooves which the needle follows get filled with dirt through handling with moist or sticky fingers. Dirt settles therein and the volume of tone is much reduced.

Benzine and naphtha have been commonly used, but they are a **MENACE** in the home—they will **IGNITE** and **EXPLODE** without direct contact with fire.

CARBONA

Now, Carbona will not only clean your records better, but it has **NONE** of the objectionable features of **DANGEROUS CLEANSERS**.

It is odorless and it is **NON-EXPLOSIVE**. You can hold a lighted match to Carbona and it will not ignite.

It is the **BEST DISC RECORD CLEANER** in the world; there is nothing that approaches it.

Try it and see!

THE CARBONA CO., 3 and 5 Burnett Street, Newark, N. J.

CARBONA

The Ideal Record Cleaner

Everyone Who Owns a Talking Machine Enjoys the Advantage of Clean Records

Now, Carbona will not only clean the record but it will **LENGTHEN** its life and **PURIFY** its tone. Carbona can be kept in the home, office and factory. **TRY IT!**

Moisten a cloth with Carbona, then rub it over the gummiest record that you can find.

Note how quickly every particle of obstruction is removed, then try the record and you will be surprised at its **PURITY** of tone.

Carbona can be handled by talking machine establishments without danger because it **CANNOT BURN AND CANNOT EXPLODE.**

Carbona can be sold by talking machine men with a good profit, and the manufacturers will be pleased to provide literature in the shape of folders and leaflets with the dealer's name thereon which can be easily inserted when sending mail matter to customers.

There is no reason why your customers should go to drug stores to procure this product.

You can just as well add the Carbona profit to your income.

First try it—test it—then write to the manufacturers regarding prices and quantity discounts.

The advantage of this product should not be overlooked by any man engaged in the talking machine business.

THE CARBONA CO., 3 and 5 Burnett Street, Newark, N. J.

REVIEW OF APRIL RECORDS.

Issued by the Victor, National, Columbia and Universal Companies

The Victor Co.'s Red Seal list for April contains six records by John McCormack, the famous Irish tenor, whose services the Victor Co. now control. These numbers reveal the beautiful voice resources of this young Irishman, who is rapidly increasing his fame in the operatic world. The three Irish songs, "The Minstrel Boy" (64117), "Killarney" (74157), and "Come Back to Erin" (74158), are beautiful examples of ballad singing. These numbers are listed at a special price at the request of Mr. McCormack. The other McCormack numbers from "Lucia" (88215), "Boheme" (88218) and "Elisir d'Amore" (88217), are sung most charmingly. Geraldine

SEEBURG ART STYLE ELECTRIC
First in the Field

We've started quite a few talking machine dealers on the trolley line to greater prosperity via the Seeburg route.

How about *you*, is it "all aboard"?

J. P. SEEBURG PIANO CO.

209 State St., CHICAGO.

Write for illustrated booklet. You'll say Solomon was wrong—it's full of NEW THINGS—NEW GOOD THINGS.

ANOTHER SEEBURG WINNER

Farrar and Marcel Journet are heard in another complete act of "Faust" (the Church Scene) with the Metropolitan opera chorus. This act is listed in two records (89035 and 89037). Caruso and Journet are also heard in the finale of the first act of "Faust" (89039). These two numbers are of exceeding merit and afford further proof that opera in the home is no longer a dream. Other Red Seal records are the duet, "Song of the Swallows" from "Mignon," by Geraldine Farrar and Marcel Journet (89038); two "Otello" numbers by Mme. Alda, the "Ave Maria" (88213) and "Salce, Salce" (88214). Handel's famous Largo, sung by Charles Glibert, of the Manhattan opera forces (74155), is a sublime and finished piece of recording. Another Journet number listed for April is Marcello's air, "Piff, Paff," from "The Huguenots" (74156), and the waltz song from "Romeo and Juliet," sung by Blanche Arral, soprano (74151). As can be seen, this list is an imposing one and affords plenty of novelties to attract the consideration of those who consider the talking machine the greatest educator of the day. A feature of the regular Victor list is the potpourri from "The Arcadians," sung by the Victor Light Opera Co. (31775); two new Lauder songs (60005-70010); the vocal waltz, "My Hero," from "The Chocolate Soldier" (60012); two new Vienna Quartet records, "Bridal Song" (31772) and Strauss' "Southern Roses" waltz (31773). Other features of this list are the duet from "Martha" (31769), sung by Werrenrath and Macdonough, and Titl's "Serenade" for 'cello and flute (5768). This forms a very varied and interesting list of really standard compositions. The double-faced record Victor list, as noted elsewhere, contains a number of popular and standard numbers which will undoubtedly find a large market.

Five grand opera Amberol records are to be found in the imposing list issued by the National Phonograph Co. for April. These are all numbers of wide reputation and standing among lovers of opera music. The grand Air d'Agathe from "Freischutz" (B183), sung in charming manner by Marguerite Sylvia with orchestra accompaniment is a wonderful aria and makes a very interesting number. Florencio Constantino is represented by the Flower Song from "Carmen" (B184), which this famous tenor sings with rare charm. The famous waltz from Gounod's "Romeo et Juliette" (B185) is sung in French by Blanche Arral with exquisite taste and style. The Brindisi from Thomas' "Hamlet" (B186) is sung with great gusto in Italian by Ernesto Caronna. Walter Soomer is heard in Wagner's "Blick Ich Umber" from "Tannhauser" (B187). This poetic number is given a noble reading. The regular list of Edison Amberol records contains, as usual, a number of compositions both vocal and instrumental, sung and played by well known artists and organizations which, as printed elsewhere in this number, will interest dealers. The same may be said of the list of Edison Standard records, which include many numbers of great merit. They are all admirably diversified, the instrumental and vocal numbers being supplemented by some talking records; one in particular, "Sheridan's Ride," by Davenport (397 Amberol), should win great favor. Recitations by leading men of famous reputations are destined to win great favor as talking machine records. There are also two interesting numbers in Hebrew from "The Jewish Soul," a successful musical play, which are sung by Sadie Rosenthal—Die Toire (21015 Standard) and Ich Benk a Heim (10002 Amberol).

The Columbia list of double discs for April contains a great number of popular hits which are destined to find a large market. For instance "By the Light of the Silvery Moon," vocal quartet and selections from "The Belle of Brittany" (2799) make a strong combination. "The Cubanola Glide," tenor solo, and "Oh, What I Know About You," soprano solo (A800), and "That Mesmerizing Mendelssohn Tune," duet, and "The Mississippi Stoker," baritone solo (A801), make two more double discs, which are

sung by such well known singers as Ada Jones, Bert Williams, Collins and Harlan and Paul Southe. In fact, as will be seen from a perusal of the list printed elsewhere, the ten-inch list for April forms a goodly array of instrumental and vocal numbers. George Lashwood, the famous English vaudevillist, contributes the first of a number of records which he is to sing for the Columbia Co.—"Sea, Sea, Sea," and "In the Twi-Twi-Twilight" (A5157). This is the headliner of four excellent records in the twelve-inch list, which includes two sacred numbers (A5158), a violin, a flute and harp trio from "Maritana" and Mascagni's Intermezzo from "Cavalleria Rusticana," by orchestra, in which the harp is a prominent feature (A5159), and two selections from operas by Bizet and Gounod (A5160) played by Prince's Band. In the twelve-inch Symphony list David Bispham is represented by Gounod's "Ring Out Wild Bells" and Faure's "Psalms" (A5161). This famous baritone is heard to great advantage in these numbers and they demonstrate the virility and beauty of his voice. In the two-minute and four-minute Indestructible cylinder list the selections listed this month are widely and wisely chosen, and all are interesting. The Columbia list for April, taken as a whole, is one of the best they have put out in some time.

The Universal Talking Machine Co.'s Zonophone list for April contains an interesting list of double discs which both instrumentally and vocally should find an excellent market. As can be seen from the printed list elsewhere, orchestral, band, solo and vocal selections and dialect stories include many of the popular and standard compositions.

VICTOR CO. LOSE APPEAL

In Suit Against Hawthorne & Sheble Mfg. Co. for Alleged Infringement of Dennison Hollow Arm Patent—Judge McPherson's Opinion.

(Special to The Talking Machine World.)

Philadelphia, Pa., March 1, 1910.

Yesterday the Circuit Court of Appeals of the United States, Third district, sitting in this city, handed down an opinion in the case of the Victor Talking Machine Co., Camden, N. J., against the Hawthorne & Sheble Mfg. Co., formerly here, but now bankrupt, affirming the decision of Judge McPherson in the lower court. Judge Gray wrote the opinion.

The defendants were charged with infringing patent No. 832,896, known as the Dennison or hollow arm patent, to which they demurred and were sustained, and the bill dismissed for lack of invention by Judge McPherson in the Circuit Court of the United States, Eastern district of Pennsylvania, March 12, 1909. In his decision, published in The World of April, 1909, Judge McPherson said:

"It is true that the improvement covered by the patent in suit is prima facie novel; the grant of letters carries with it such a presumption, but the presumption must give way if the court is clearly convinced, from examining the improvement, that the element of invention does not appear. In my opinion, such a situation is presented, as it seems to me no invention is disclosed by the device in question. What the patentee did was simply to take the old amplifying horn of a talking machine, cut it in two for reasons of convenience, and provide well-known means for refastening the parts when the occasion to operate the machine should arise. This did not call for the exercise of the inventive faculty, but merely for such skill as a capable artisan is not likely to lack."

From this opinion an appeal was taken by the Victor Talking Machine Co., with the foregoing result, which is final.

The attorneys of the Victor Talking Machine Co., Camden, N. J., were recently in New York looking up evidence in price-cutting cases. Something may be expected to drop pretty soon.

Exclusive selling rights are an exclusive Columbia policy, and it enables a good dealer to build a business and keep it.

MILWAUKEE'S BUDGET OF NEWS.

Spirit of Optimism Pervades Talking Machine Trade—Dealers Confident of Big Year—Jobbers Getting Liberal Orders—Gimbel Bros.' Fine New Department—Interesting Personalities—March Victor Records in Demand—Hoeffler Mfg. Co. Give Concerts—Many Visiting Dealers—A Poem by P. E. Conroy—Boost Edison Business Phonographs—Other News.

(Special to The Talking Machine World.)
Milwaukee, Wis., March 10, 1910.

A spirit of genuine optimism pervades the local talking machine trade just at the present time. Business is exceptionally good for this season of the year in both the wholesale and retail lines and predictions are being made that one of the most prosperous springs in the history of the trade will be experienced. In fact, dealers are confident that 1910 will be a "big year" in every sense of the word.

Judging from the manner in which retailers about the state are restocking at this time, stocks in machines, records or supplies are far from being large. Prosperity has been decidedly in evidence with the farmers of the state during the past year and dealers outside of Milwaukee say that this is reacting with favor upon the talking machine business.

"The wholesale business is keeping up remarkably well," said Lawrence McGreal, the well known jobber. "Dealers about the state have been buying much better than we had anticipated and the indications all point to a big spring trade. The Edison Amberola is selling remarkably well and the only trouble we are experiencing is to keep enough machines on hand to satisfy the trade. The Victrola trade is daily on the increase also."

One of the finest retail talking machine establishments in this city will soon be opened when Gimbel Bros., leading department store proprietors of the city, have completed their new quarters to house the complete line of Victor machines, records and supplies now handled by the big store. The piano department has been moved to new and larger quarters on the sixth floor of the store and the former piano quarters on the second floor are now being remodeled for the talking machine department. Everything will be strictly modern and the best that money can provide. Five sound-proof parlors are being prepared, to say nothing of an elaborate Victrola auditorium, something entirely new in this city. The new department is under the supervision of E. S. Bridge, manager of the piano department, but is in direct charge of L. C. Parker, an enthusiastic talking machine man.

Miss Gertrude Gannon, sister-in-law of Lawrence McGreal and the new owner of the McGreal retail store, has just returned to Milwaukee from two weeks' recreation at West Baden. Miss Gannon reports that the retail trade is exceptionally good for this season.

E. P. Plumie, western wholesale manager of the Columbia Phonograph Co., Chicago, was the

guest of A. G. Kunde, the local Columbia dealer, recently.

There are several big features in the new Victor records for March that are proving to be good sellers with the Milwaukee trade. One of them is a record by Commander Robert E. Peary, on "The Discovery of the North Pole," in which the discoverer gives an absorbing description of his journey to the apex of the earth. The three new records by Harry Lauder are also making a decided hit.

Several successful concerts have been conducted by the Hoeffler Manufacturing Co., of this city, during the past month under the direction of Manager J. H. Becker, Jr. A concert on the auxetophone at the recent Milwaukee automobile show at the Auditorium was one of the features of the week and proved a strong counter attraction to the large array of automobiles on display. Another auxetophone concert, held at the Grand Avenue Congregational Church, one of the fashionable churches of the city, was greatly appreciated by a very responsive audience. After a fine offering of sacred and classical music, Mr. Becker let loose with a little popular music that made a great hit. These concerts have been doing much to interest a class of trade that hitherto has not been over-enthusiastic over the talking machine proposition.

Roy J. Keith, of the Talking Machine Co., of Chicago, called upon the Milwaukee trade recently.

E. H. Phillips, manager of the credit department of the National Phonograph Co., and William P. Hope were also visitors.

William A. Schmidt, traveling wholesale representative of Lawrence McGreal, is meeting with a ready business in northern Wisconsin.

A large number of out-of-town Wisconsin talking machine dealers were in Milwaukee recently purchasing their spring stocks, including: William J. Voss, Appleton; Mr. Laun, of Laun & Erbe, New Holstein; E. O. Chase, Oshkosh; H. C. Smith, Whitewater; Otto Goldner and A. J. Buroff, Watertown; C. Hecker, Cambria; Mr. Iverson, of Reton Bros., Stevens Point, and C. H. Krause, of Port Washington.

A. G. Kunde, new owner of the downtown Columbia store, is now completely settled in his new quarters at 516 Grand avenue. A good business in both machines and records is reported by Mr. Kunde.

P. E. Conroy, the well known piano dealer of St. Louis, in a recent letter of condolence to Lawrence McGreal, Milwaukee's well known talking machine jobber, enclosed the following poem touching upon Mr. McGreal's recent bereavement in the loss of his little son, Jack McGreal. Mr. Conroy is a life long friend of the Milwaukee talking machine jobber.

—P. E. Conroy.

While sitting all alone to-night,
My thoughts revert to thee;
My dear old friend in days gone by,
When we could happy be.
Life, then to us had many charms,
Youth conquered all our woes;
Real grief was then unknown to us,
Nor numbered with our foes.

Time brings to all both joy and grief,
She wounds and heals by turns;
Each one must take his place in line,
And bear her scalds and burns.

Each thinks he bears the greatest load,
Its weight appears so great;
But all alike must bear his share,
'Twas so ordained by Fate.

Life is not composed of sunshine,
To form an endless chain;
Its many links too oft consist
Of darkness and of rain.

When memory's book unfolds the past,
Each page recalls anew
The trials, which we fought through life,
Now brought again to view.

The brave, true heart will surely say,
It must be selfish love,
To want his child to bear earth's woes,
When God chose heaven above.

The sacrifice you've had to make
Will one day be repaid,
When all our earthly toils are o'er
And cares aside are laid.

God, in His justice, thou wilt say,
"Your cross you nobly bore,
Come join our heavenly kingdom
Where partings are no more."

The Edison business phonograph received a big boost in Milwaukee recently when it was installed in the offices of R. G. Dunn & Co. Several fine sales in this line are reported by J. H. Becker, Jr., manager of the talking machine department of the Hoeffler Manufacturing Co. "The Edison business phonograph should be in every up-to-date office and the time is coming when I hope to see this brought about in Milwaukee," said Mr. Becker.

WHAT HAPPENED THE BORROWER.

Bunch of Woe That Struck a Too Economical Dealer Who Wanted a Trade Paper Free.

Once upon a time a dealer who was too economical to take a trade paper sent his little boy to borrow the copy taken by his neighbor. In his haste, the boy ran over a four-dollar stand of bees, and in ten minutes looked like a watery summer squash.

His cries reached his father, who ran to his assistance, and failing to see a barbed wire fence, ran into it, breaking it down, cutting a handful of flesh from his anatomy and ruining a five-dollar pair of trousers.

The old cow took advantage of the gap in the fence, got into the cornfield and killed herself eating green corn. Hearing the racket, his wife ran, upsetting a four-gallon churn full of rich cream into a basket of kittens, drowning the whole "flock." In her hurry she dropped a seven-dollar set of teeth. The baby, left alone, crawled through the spilled milk into the parlor and ruined a twenty-dollar carpet. During the excitement the oldest daughter ran away with the hired man, the calves got out and the dog broke up eleven sitting hens.

The L. W. Thompson Co. have opened a talking machine store on Fourth avenue, Louisville, Ky., with S. W. Blankenbaker as manager, and handle a complete line of Edison and Victor machines and records.

THE SAUNDERS' GHOST.

How Uncle Hiram and Aunt Ellen Were Scared Almost to Death by a Disabled Talking Machine and How the Mystery Was Explained.

Old Hiram Saunders and his wife, Ellen, were busy scurrying around getting the old farmhouse all spruced up for the rapidly approaching visit from the nephew who lived in the city, and who with a boy chum was coming to spend the holidays in the country, for the nephew had promised to surprise the old folks with some new-fangled machine which could talk and sing better than the majority of humans, and they naturally were anxiously awaiting his appearance.

Bert Richards and his chum, Harry Davis, arrived in due time and brought with them a disc talking machine and a goodly supply of records which did much to while away the evenings during their week's stay. When the visit was ended they left the outfit with the old folks and practically forgot about it, though Saunders and his wife still continued to derive much pleasure and amusement from it, albeit they regarded the machine as being almost super-human. After about a week or so, however, the starting lever of the machine got a little out of order, and Hiram, not caring to run the risk of breaking the mechanism in an effort to repair it, put the outfit in the garret, and there it remained for several months or until the time for the spring housecleaning.

One day while Mrs. Saunders was busy moving trunks and boxes around the garret she suddenly heard a mysterious voice, apparently coming from under a pile of old quilts. Her piercing scream brought Hiram on the run from the yard, only stopping long enough to grab a loaded shotgun on his way upstairs. A hurried investigation, however, failed to disclose anything but an old cabinet reposing under the quilts, and when the floor was vigorously pounded in the

heat of the search the mysterious voice ceased as suddenly as it had begun.

On several subsequent occasions, when the trunks and boxes in the garret were moved, the same wailing voice was heard, which came and went without apparent reason. It was not long before the mystery got on the nerves of both Saunders and his wife to such an extent that they were almost afraid to stay in the house alone, much less visit the garret.

Finally, the old couple could stand the presence of the supposed ghost no longer and confided their trouble to several of their friends who arranged to investigate the matter thoroughly and in a body. When the party entered the garret and proceeded to prod about vigorously the voice suddenly made its presence known to the consternation of the female members of the party who immediately fled out of the house. The more courageous of the men, however, traced the voice to the pile of quilts, and, raising them, discovered the talking machine with the disc revolving. When the machine was raised the jar caused the record to cease its motion and the mystery was practically solved.

One of the men, who knew something about "talkers," discovered that the tension of the brake had loosened and the slight jar would throw it away from the turntable or against with sufficient force to stop the revolutions. The real cause of the ghostly voice was thus explained, and the simplicity so impressed Hiram that now he wouldn't show the white feather if the ghost of Captain Kidd, armed to the teeth, should make its appearance.

S. B. DAVEGA VISITING SPOKANE.

S. B. Davega, president of the S. B. Davega Co., the oldest jobbing house in the Greater New York territory, is now in Spokane, Wash., looking after real estate matters in which he has a heavy financial interest. Mr. Davega is also owner of considerable property in this city; in

other words, he is a man of wealth, independent of his business.

FEWER FAILURES IN FEBRUARY

But Liabilities Have Been Exceeded Only Thrice in Seventeen Years.

Commercial casualties during February, according to statistics compiled by Bradstreet's, are smaller in number than in January, but considerably larger than in February of the previous year. The amounts involved also made a favorable showing by comparison with the figures for January, and show an increase over those of February, 1909.

The number of failures reported by Bradstreet's for the month just closed is 1,004, against 1,241 in January and 990 in February, 1909. These figures show a decrease of 19 per cent. from those of the previous month, but an increase of 1.3 per cent. over those of February, 1909.

The liabilities involved last month were \$16,170,103, a decrease of 6.7 per cent. from January, but an increase of 19.8 per cent. over those of February in the previous year.

For February the showing is far from favorable, the liabilities in fact having been exceeded only three times in the last seventeen years.

TO OPEN IN LOUISVILLE, KY.

The Tuell Phonograph & Novelty Co. have opened for business in Louisville, Ky., handling a very complete line of Edison and Victor talking machines and records. They have secured quarters at Baxter avenue and Christine street, with C. S. Ryan as manager.

NEW DEALER IN COLUMBUS.

W. C. Willard is a new Victor talking machine dealer in Columbus, Neb.

FRANK L. DYER'S STATEMENT

Regarding Misleading Articles in the Daily Papers Based Upon a Transaction in Which Thos. A. Edison Figured—Unfounded Conclusion Exploded.

Last month The World briefly explained the transaction whereby Thomas A. Edison acquired certain shares of stock in the Edison Phonograph Works, so the trade would not be misled by the ridiculously sensational and distorted reports that were appearing in the daily newspapers. To further clear up this misunderstanding, F. L. Dyer, president of the National Phonograph Co., has issued the following statement:

"My attention has been called to a recent article in a New York daily newspaper which has been widely copied, and wherein it stated that the future of the phonograph was not very bright. This article is entirely misleading and does not accord in any way with the views of myself or anyone connected with the Edison companies. The future of the phonograph was never so bright as at the present time; in fact, I feel that the surface has hardly been scratched. Orders are coming in so rapidly at the present time that we are not able to fill them promptly and the sales are entirely satisfactory. The fact that we are just starting in with the Amberola and a full line of grand opera records is certainly an indication that so far as we are concerned the future does not have to be questioned. If any one of us had the slightest doubt as to the future of the business, why should we be spending hundreds of thousands of dollars each year in advertising and a corresponding amount in the development of new lines and in experimental work?

"In connection with the very article under consideration it is interesting to inquire why, if Mr. Edison has any doubt as to the future of the business, he should be willing to spend \$155,000 in cash to acquire a minority stock interest? The whole transaction was simply this: that in

the early days of the phonograph business this particular minority block of stock of the Edison Phonograph Works was acquired by outside interests, and was later put up as collateral to secure the issue of bonds of another independent company (not controlled by Mr. Edison) having rights in certain foreign countries, and on which the interest payments were defaulted. These bondholders were anxious to realize something from their investment and Mr. Edison was willing to buy the stock, so that the transaction was consummated.

"The Edison Phonograph Works, as persons familiar with the business know, is a separate company located at Orange, N. J., and engaged only in the manufacture of machines, which are turned over to and are distributed by the National Phonograph Co. The National Co. manufactures all Edison records and sells directly to the trade. The National Co. in assets, property and amount of business done is immeasurably larger than Edison Phonograph Works. The purchase of this block of stock by Mr. Edison was a personal matter and has no direct bearing on the future of the phonograph business other than showing his confidence and a desire to withdraw the stock from litigation."

NEWS OF THE BALTIMORE TRADE.

February Business Very Satisfactory to Dealers—Lauder Records in Great Demand—Morris Silverstein Now Sole Proprietor—Some of the Most Popular Records—Other News of the Month Worthy of General Mention.

(Special to The Talking Machine World.)

Baltimore, Md., March 6, 1910.

February proved to be a good month in every line of the talking machine business. From the small machines and cheap records up to the Victor Victrolas and Columbia Grafonolas and Red Seal records the demand has been brisk. Each new monthly list has one or more selections that are particularly popular, while some

of those on the old lists are still in heavy demand.

Concerning the latter, the Harry Lauder records are a striking example. Manager Bowden, of the talking machine department of Sanders & Stayman, declares that the Lauder records have had an exceptional run and he has had a hard time to keep the supply equal to the requests for them. Mr. Bowden also reports good sales of the Victrolas and Grafonolas.

Morris Silverstein has made another change. He is now sole proprietor of the M. Silverstein Talking Machine Co., which was organized a little more than a month ago. Mr. Silverstein has dissolved partnership with Milton J. Kohner, who was one of the original organizers. Mr. Silverstein says that the Victrolas have been in demand both locally and outside of the city, with the result that he has consummated several good sales the past week and for February as a whole. One of the best hits of the present month, according to Mr. Silverstein, has been Gems from "The Belle of Brittany" and selections from "The Dollar Princess," on the Victor records. "Humming Birds," one of the latest out of the Columbia records, is another of the more popular renditions that has appealed to Baltimoreans.

In a general way "Miserere," from Il Trovatore, as sung by Caruso and Mme. Alda, has had by far the greatest run of the month at all the stores handling the Red Seal records. Another popular operatic record is that playing selections from "Faust."

The Edison and Victor machines and records have also had a good run at Droop & Sons Co., according to Manager Grottendick. Similar statements are made concerning the Victors and Edisons at H. R. Eisenbrandt Sons, Cohen & Hughes and Crowleys.

Cohen & Hughes have gotten back to their new store which was destroyed by fire several months ago. This location is at 315 North Howard street, and the firm extend a cordial invitation to their patrons and the public to call and inspect their reconstructed quarters.

Cabinet for the Victrola No. 12

Every dealer who has had them says they are great.

We are now putting a rim around the top, so that when the Victrola is set on it looks like one Cabinet.

In producing this Cabinet we have realized what a finished piece the Victrola No. 12 is.

Our Cabinet is beautifully piano polished on the outside and we have even finished it inside.

Note the needle box, indexed compartments and card, shelf to handle records on, casters if desired.

Not a talking point overlooked.

The price will enable you to add on your profit and make sales all around the \$200 outfit.

If you are a dealer we will send you our beautiful Sales Helping 32-Page Catalog illustrating 96 Snappy Cabinets for Victor Records, Edison Cylinders, Rolls for every Piano Player and Sheet Music of every size.

The blindest employer is he who treats a truly reliable man like a dub of an office boy.

MODEL MOVING PICTURES

Exhibited by the Censors Before the Board of Education.

Prominent educators of this city, including Superintendent Maxwell, Superintendent Leipziger of the Board of Education's Bureau of Public Lectures, Dr. Charles Sprague Smith of the People's Institute, and most of the Board of Education members assembled recently in the board room of the Board of Education building to witness the "Board of Censorship" model moving picture show.

The "Board of Censorship" was organized about a year ago by the People's Institute, the Women's Municipal League, the Parks and Playgrounds Association, and the Public Education Association to pass on moving picture shows.

Superintendent Maxwell then read a telegram from Thomas A. Edison, the inventor, who is now in Florida, saying that in Mr. Edison's opinion the time will soon come when the majority of our citizens will be educated, in part at least, by moving pictures.

Then the lights were turned down, and moving pictures of an educational nature were thrown on the screen. The subjects represented included "Wild Beasts in Their Haunts," "East Indian Temples," "Tobacco Culture in Java," "A Lesson in Chemistry," "The Fly as a Disease Agent," "The Life of Washington," "The American Fishing Industry," and "The Metamorphosis of the Caterpillar." Dr. Maxwell said that moving pictures would not be used in the public schools of the city in the near future. The exhibition will be repeated in other parts of this city in the next few weeks.

JACOT CO.'S NEW QUARTERS.

Handsomely Arranged and Equipped for Trade—Expect Larger Business in New Quarters.

With the removal of the Jacot Music Box Co. from 39 Union Square to 25 West 35th street, New York, not only is more room obtained for the display and storage of stock, not to mention better facilities for demonstrating purposes, but it seems certain their business will be greatly improved. They occupy the entire four-story building, which is within a short distance of Fifth avenue and in the neighborhood of all the large retail establishments in the music district of the city. The first, or street, floor is the

store or retail department, where ample room is had for a proper arrangement of the stock, storage of records, seven demonstrating booths, etc. The wholesale department and the private office of A. H. Jacot in front and the general offices in the rear are on the second floor. The third and top floors are for stock. A large swinging sign will be installed in front of the building so it can be easily seen from Fifth avenue.

In speaking of his new place and the prospects Mr. Jacot, president and general manager, said: "We have been at Union Square for upwards of thirty years and we were well known there. However, that part of the city is no longer suitable for the business; that neighborhood has been ruined for us, and we were glad to get away. We believe that here a much better business will come our way as soon as our location becomes known. Our name is familiar to the people of New York and vicinity as veterans in the line, and I imagine this will be something of a factor. Of course we shall advertise extensively. We propose pushing our wholesale trade more energetically than ever."

Hurry is the mark of a weak mind; despatch is the mark of the strong one. Even a fussy hen takes it coolly when she is laying an egg.

To Edison dealers in cities, manufacturing towns, and wherever much business correspondence is carried on

You will find the

Edison Business Phonograph

a profit builder for you, in a field that is practically without competition. Besides you will be able to use it to advantage in your own correspondence. In your regular Phonograph business it is an excellent adjunct in demonstrating how Phonograph Records are made.

It is only a matter of a very short time before all business correspondence will be carried on by letters dictated to the Edison Business Phonograph. Get in now while the field is young, while competition is small and the profits are big.

Write us for full particulars to-day.

Edison Business Phonograph Company, 207 Lakeside Avenue, Orange, N. J.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Special to The Talking Machine World.)

Washington, D. C., March 7, 1910.

TALKING MACHINE. Eldridge R. Johnson, Merion, Pa., assignor to Victor Talking Machine Co., Camden, N. J. Patent No. 13,069.

This invention relates to the art of recording and reproducing sounds, and has for its object, among others, to provide improvements in apparatus for reproducing sounds from a record of the same, by means of which the quality and naturalness of the recorded sounds are reproduced with greater faithfulness, and also with a reduction of the commingled extraneous sounds, which are usually present, and which appear to be made by the operation of the reproducing apparatus, for instance, among others, the scratching usually produced by the contact of the apparatus when in operation, among which producing, and other sounds given out by parts of the apparatus when in operation, among which may be mentioned the sounds that might be made by the motor when operating.

Among the other objects of the invention is to provide apparatus for imparting resonance to the reproduced sounds; to modify such sounds after amplification; to deflect the sounds after amplification; to protect and conceal the operative parts of the apparatus, to improve the appearance of the talking machine as a whole, so as to provide an ornamental piece of furniture, and to provide, in connection with the cabinet of such a talking machine, convenient means for the storage of records, needles and other accessories.

Figure 1 represents one form of the improved talking machine and cabinet therefor, shown in section at its upper portion; Fig. 2 is a front elevation thereof, showing the lower portion of the front of the casing broken away, and Fig. 3 is a detail perspective view of the sound amplifying portion of the sound-conducting tube.

TALKING MACHINE. Eldridge R. Johnson, Merion, Pa., assignor to the Victor Talking Machine Co., Camden, N. J. Patent No. 946,442.

The main objects of this invention are: To provide in a talking machine means whereby the quality of the reproduction will be improved; to provide a talking machine having a sound

amplifier and improved means whereby the reproduced sounds may be modified and whereby the reproduced sounds may be controlled in direction after amplification; to provide a talking machine having an amplifier enclosed in a cabinet provided with an outlet opposite to and of substantially the same area as the delivery end of the amplifier and with a plurality of

doors for opening and closing the outlet; to provide a talking machine having an amplifier enclosed in a cabinet and having a restricted opening surrounding the mouth of the amplifier and leading through a wall of the cabinet; to provide an enclosed talking machine having an improved arrangement of compartments for holding records, needles and other talking machine accessories; to provide an improved sound amplifier.

In the accompanying drawings Figure 1 is a front elevation of a talking machine constructed in accordance with this invention; Fig. 2 a vertical section of the same on line 2—2 of Fig. 3, and Fig. 3 a vertical sectional view of the same on line 3—3 of Fig. 2.

SOUND-BOX. George L. Coleman, Camden, N. J., assignor to the Victor Talking Machine Co., same place. Patent No. 946,015.

The main objects of this invention are to simplify the construction of the sound-box, with a view to rendering the parts readily removable and replaceable; to so design and combine the parts as to form a compact, neat and durable construction; to provide and improve mounting for the diaphragm; to provide means for preventing injury to the diaphragm; to provide an improved stylus bar mounting; to provide an improved yielding mounting for the box; and to provide other improvements which will appear as the invention is further disclosed.

In the accompanying drawings, Figure 1 is a front elevation of a sound box constructed in accordance with this invention; Fig. 2 a side elevation of the same; Fig. 3 a bottom plan view of the same; Fig. 4 a longitudinal section of the same upon line 4—4 of Fig. 1 looking in the direction of the arrows; Fig. 5 a fragmentary perspective upon an enlarged scale of one side of the sound box casing; Fig. 6 a perspective in detail of the stylus bar; and Fig. 7 a perspective in detail of the plate for securing the stylus bar to the box.

SOUND REPRODUCING DEVICE. John C. English, Camden, N. J., assignor to the Victor Talking Machine Co., same place. Patent No. 947,227.

This invention relates to sound reproducing devices, and especially to those devices which are used to augment or amplify the sounds which are being reproduced from a record.

The object of the invention is to dispense with the ordinary megaphone, sound amplifying-trumpet, or horn which is usually used to amplify the sounds reproduced by talking machines, and to increase the volume of the tones by means of an amplifier having sound-boards which are caused to vibrate in sympathy with the vibration of the air conducted between the same from the sound conveying tube.

A further object of the invention is to convey the vibrations from the reproducer to the sound amplifying device without loss, and then to allow the said vibrations to emerge between the sound-boards of the amplifier.

A further object of this invention is to support the amplifier at one end only so that the sound-boards may be free to respond to the vibrations imparted to them from the sound reproducer.

A further object of this invention is to make the sound-boards used in connection with the sound amplifying device resonant in order to cause the same to readily vibrate in sympathy with the air enclosed between the same.

Figure 1 illustrates a sound reproducing device provided with an improved sound amplifier, the main portions of the same being shown in cross-section; Fig. 2 is a perspective view of an improved sound augmenting device; Fig. 3 is a diagrammatic view showing the method employed

so as to make the sound boards of the sound amplifying device resonant, and Fig. 4 is a view similar to Fig. 3 showing the method of constructing the inner sides of an improved device.

Referring to the drawings, one embodiment of this invention comprises a casing or talking machine cabinet 1 upon the top of which is the

housing 2, which contains the turntable 3, the reproducer 4 and the swinging arm 5. The larger end of the tapering swinging reproducer arm 5 is pivoted as at 6 to a hollow bushing 7 which communicates with the smaller end 8 of a hollow bracket, or elbow 9, the opposite end of which is adapted to support a sound amplifying device 10.

SOUND-BOX FOR TALKING MACHINES. Louis P. Valiquet, New York, assignor by mesne assignments to the Victor Talking Machine Co., Camden, N. J. Patent No. 946,589.

The main objects of this invention are to provide an improved sound-box casing, an improved mounting for a stylus bar, an improved mounting for a diaphragm and other improvements.

In the drawings, Figure 1 is a central vertical section of a sound-box constructed in accordance with this invention. Fig. 2, a face view of the same with the cover thereof removed, showing the annular cushion of insulating material upon which the diaphragm is seated; Fig. 3 a similar view, showing the diaphragm in position; Fig. 4, a side elevation, partly in section, of the stylus bar and its mounting, the sound-box casing being indicated in dotted lines; and Fig. 5 is an end elevation of the stylus bar.

SOUND-BOX FOR TALKING MACHINES. Louis P. Valiquet, New York, assignor by mesne assignments to the Victor Talking Machine Co., Camden, N. J. Patent No. 947,534.

The main objects of this invention are: To provide in a sound-box for talking machines an

improved mounting for a stylus bar; to provide an improved mounting for a diaphragm.

In the accompanying drawings, which illustrate a preferred embodiment of the invention, Figure 1 is a central longitudinal section of a sound-box constructed in accordance with the invention. Fig. 2 is a cross-section of the diaphragm; Fig. 3 is a face view thereof; Fig. 4 is a front elevation of the sound-box with the cover and stylus-holding arm removed and with the diaphragm partially broken away; Fig. 5 is a front elevation of the sound-box with the cover stylus holding bar and diaphragm removed; Fig. 6 is a face view of a ring for supporting the diaphragm; Fig. 7 is a cross-section thereof; Fig. 8 is a cross-section of a portion of the diaphragm and a flexible ring for supporting the same; Fig. 9 is a cross-section of a portion of the sound-box with the diaphragm support shown in Fig. 8 applied thereto; Fig. 10 is a cross-section of a portion of the diaphragm and a flexible spring ring for supporting the same and showing another construction embodying this invention; and Fig. 11, is a view, partially in elevation and in section, illustrating an adjustable rocking support for the stylus-holder, being an enlarged view of certain parts shown in Fig. 1.

PROCESS OF MAKING RECORDS FOR PHONOGRAPHS. William Sanderson, New York, N. Y. Patent No. 947,777.

This invention relates to an improved process of making cylinder and disc records.

COMPOSITION FOR SOUND RECORDS AND OTHER OBJECTS. John C. English, Camden, N. J., assignor to the Victor Talking Machine Co., same place. Patent No. 943,314.

The object, therefore, of this invention is to produce such a composition or mixture for use in sound records and other objects which will not only have all the advantages of the mixtures of shellac and the different body materials which have heretofore been used, but will also have distinct advantages over the same, according to the inventor.

Gum shellac, when in its purest form and highest grade, resembles well seasoned glue in consistency and color, and it is the aim of manufacturers of records to obtain shellac as near to this standard as possible. Of course, shellac when received by the users in the regular course of trade varies considerably in the texture and quality, and it has been the aim of the inventor to provide an ingredient or substance which will not only improve the texture and quality, but will reduce the shellac to a uniform grade. It has been found that by adding certain hydrocarbons to gum shellac that this result is produced in an extremely economical and satisfactory manner. Furthermore, different earthy materials, such as fossil flour, clay, powdered silica, metallic oxides, and other cheap earthy material and pigments, require greatly varying amounts

of shellac to produce the requisite adhesive purpose and toughness to the composition. In the use of the improved composition and embodiment of these materials provides a much more uniform quantity of the binder heretofore attained by gum shellac.

forming a part of this specification is illustrated a sound record tablet of the disc type with the names of the ingredients inscribed thereon, although it is obvious that the intention is not limited to any particular shape or type of tablet.

RECORD PLATE FOR GRAPHOPHONES AND LIKE MACHINES. William C. Rhodes, Cleveland, O. Patent No. 946,563.

This invention relates to record plates for graphophones and like machines. In the accompanying drawing, Figure 1 is a plan view of the plate or disc, and Fig. 2 is a central cross-section thereof.

PHONOGRAPHIC RECORDING APPARATUS. Thomas A. Edison, Llewellyn Park, Orange, N. J., assignor to the New Jersey Patent Co., West Orange, N. J. Patent No. 950,226.

This invention relates to various improvements in phonographic recording apparatus, and the object is to provide an apparatus for the purpose, wherein superior results can be obtained. It is found that vibrations of abnormal amplitude, caused by very high, shrill tones, like those of a soprano voice, or resulting from abnormal reinforcements of certain tones by the tone due to the resonance of the air column in the funnel, result in the cutting stylus leaving the record surface, producing the disagreeable effect of blasting. This result is due to the fact that the diaphragm in vibrating toward the record surface encounters the very considerable resistance imposed upon the stylus in effecting the cutting of the material, while in vibrating in the opposite direction, the diaphragm encounters little or no resistance. Consequently, under the effect of condensations of sound waves, the movement of the diaphragm is limited, while under the effect of the refraction of sound waves the movement of the diaphragm becomes abnormal and permits the stylus to jump free of the record surface. The accompanying drawing illustrates a sectional view of a recording mechanism equipped with the improved compound spring.

TALKING MACHINE. John B. Browning, Kansas City, Mo., assignor to Victor Talking Machine Co., Camden, N. J. Patent No. 948,040.

The objects of this invention are to provide in a talking machine a plurality of sound boxes arranged to reproduce either simultaneously or separately the same tones from a single record, and to arrange the said boxes so that the operator is enabled to change the volume and quality of the sound at will, by raising one box, while the other continues playing; to provide means whereby a pair of independent sound boxes may be supported by a single sound tube; to provide an improved mounting for a diaphragm; to provide an improved mounting for a stylus bar; to provide means for the lateral adjustment of a

stylus needle with respect to its stylus bar.

Referring to the drawings: Figure 1 is a plan view of a talking machine having the improvements embodied therein. Fig. 2 is a side

elevation of the same. Fig. 3 shows an enlarged plan and end view of one of the U-shaped tubes as used in this device. Fig. 4 is a half section and half elevation of the tee connection. Fig. 5 is an end view of one portion of said tee. Figs. 6 and 7 are front and sectional views, respectively, of one of the couplings. Figs. 8, 9 and 10 are side, central sectional, and bottom views, respectively, of one of the reproducers, and Fig. 11 is a diagrammatic view of the spring used in this device.

GRAPHOPHONE. Baxter Morton, New York, assignor by Mesne assignments to Hawthorne & Sheble Manufacturing Co., Philadelphia, Pa. Patent No. 848,959.

This invention has for its object the provision of a graphophone in which the reproducer is not impelled across the record by means of a mechanical feed mechanism such as a screw or rack.

In the accompanying drawings forming part of this application is illustrated the invention as embodied in a graphophone of the disc type, the stylus of the reproducer being yieldingly propelled across the record in a plane parallel to the surface of the disc with the stylus tracking in the record groove and restrained against too rapid movement thereby.

In the drawing, Figure 1 is a view in side elevation of a complete graphophone embodying the present invention. Fig. 2 is a view partly in elevation and partly in section of the reproducer, the reproducer carriage and a portion of the record tablet and support therefor.

DUPLEX REPRODUCER FOR PHONOGRAPHS. Frank P. Beck, Richmond, Va. Patent No. 950,428.

This invention relates to duplex reproducers for phonographs, and one of the principal objects of the same is to provide means for con-

veying compressed air through the sound box and up into the outlet horn.

Another object of the invention is to provide

a plurality of sound boxes and means of conveying compressed air through the sound boxes and out through the horn, the purpose being to amplify the reproduction of sound records and to do away with the ordinary diaphragm.

Figure 1 is a central vertical section of a reproducer made in accordance with the invention. Fig. 2 is a side elevation of the same. Fig. 3 is a vertical section on the line 3-3, of Fig. 1, looking in the direction indicated by the arrow. Fig 4 is a plan view of the stationary disc or diaphragm in the sound box. Fig. 5

is a plan view of the conical air deflector. Fig. 6 is a central vertical section of a modified form of the reproducer, and Fig. 7 is a side elevation of the same. Fig. 8 is a detail sectional view illustrating the manner of mounting the wires 11 in the sound box.

PHONOGRAPH. William H. Hoschke, New York, assignor to Sonora Phonograph Co. Patent No. 948,327.

This invention relates to an improved phonograph of that type in which no separate horn is used, but in which the same is arranged in the case in which the actuating motor for the record-carrying turn-table is arranged.

The invention consists of a phonographic apparatus in which the horn is arranged in the casing of the apparatus and operated in connection with a record placed on the rotating disc or turn-table by means of a stationary tube and a slidable sound-conveying tube which telescopes with said stationary tube. The telescoping tube is provided with a tube carrying the diaphragm case, said tube being connected by a universal joint with the front end of the telescoping tube. The motor which rotates the turn-table moves simultaneously the telescoping tube, diaphragm chamber and stylus or needle so as to remove any strain on the latter.

The invention consists further of the combination of the tube carrying the diaphragm case by a flexible joint with the telescoping sound-transmitting tube, and a sound-retaining web or sleeve, so that the needle moves in the grooves of the record with great facility and reduced friction.

The invention consists further in a stopping device by which the turntable is automatically stopped when the needle arrives at the end of a record.

In the accompanying drawings, Figure 1 represents a perspective view of the improved phonograph,

Fig. 2 is a plan-view of Fig. 1, drawn on a larger scale, Figs. 3 and 3a are respectively a vertical section and a horizontal section showing the flexible connection of the tube carrying the diaphragm box with the telescoping sound-transmitting tube, drawn on a larger scale; Fig. 4 represents a front elevation of the improved phonographic apparatus; Fig. 5 is a vertical transverse section on line 5, 5, Fig. 2; Figs. 6 and 7 are respectively a vertical transverse section on line 6, 6, and a vertical longitudinal section on line 7, 7, Fig. 2, and Figs. 8 and 9 are respectively a detail side-elevation and a plan-view of the automatic stopping device for the rotary disc or turn-table.

PHONOGRAPH. Chas. M. Hughes, Newark, N. J., assignor to Willard I. Hamilton, same place. Patent No. 948,328.

The object of the invention is to increase the simplicity in construction and operation of the phonograph, by decreasing the number of parts of which the machine is composed, by lessening or avoiding the necessity for adjustment of the various parts in practice, and by increasing the convenience of manipulation of the machine.

Heretofore, it has been customary to rotate the mandrel shaft by directly connecting the same with the motor shaft by suitable pulleys, belts or gear wheels. One feature of the invention is an improvement upon this arrangement, and consists in rotating the mandrel shaft without directly connecting it to the motor shaft by means of pulleys, belts, gear wheels or the like, by causing said mandrel to rest upon and be rotated by frictional engagement with a belt which passes over a pulley on the motor shaft, and over a pair of pulleys and under an idler, which are conveniently secured in a case upon the top of the machine, and in which the mandrel shaft is supported and rotated.

In the accompanying drawings forming a part of this specification, Figure 1 is a side elevation of the improved machine partly in section. Fig. 2 is a plan view. Figs. 3 and 4 are end elevations of the same, and Fig. 5 is a vertical sectional view taken on lines x-x of Fig. 1, looking in the direction indicated by the arrow.

SOUND-REPRODUCING MACHINE. Chas. H. Norton, New York. Patent No. 950,024.

This invention relates to improvements in sound-reproducing machines, and it consists in the novel needle or stylus.

The object of this invention is to produce a needle or stylus for sound-reproducing machines which may be supplied at slight expense and which in use will eliminate the scratching noise

caused by metal needles, reduce to a minimum the wear on the records and materially improve the tone and distinctness of the instrument, the sounds being soft or modulated and those representing various voices or instruments being clearly differentiated one from the other. The inventor has discovered that by making the needle or stylus of hard vulcanized rubber a very great improvement is secured in the general tone of the instrument and more distinct, accurate and natural reproductions of the sounds being soft or modulated and those reping out of the records or excessive expense for needles. The needle or stylus of the invention is therefore intended for use in machines employing disc-records and is formed of hard rubber. The needle may be either solid or hollow above its point, and preferably the hollow hard rubber needle in respect of its efficiency and tone qualities.

Figure 1 is an elevation of a portion of a sound-reproducing machine equipped with a hard or vulcanized rubber needle of the invention applied to the ordinary disc-record employed in such machines; Fig. 2 is a perspective view, on an enlarged scale, of the needle, and Fig. 3 is a like view of the same needle as hollow above its pointed lower end portion.

PICKINGS FROM OUR JOKE BOX.

In the barber shop the scissors clicked merrily away, and the barber's dog lay on the floor close beside the chair, looking up intently all the time at the occupant, who was having his hair cut.

"Nice dog, that," said the customer.

"He is, sir," said the barber.

"He seems very fond of watching you cut hair."

"It ain't that, sir," exclaimed the barber, smiling. "Sometimes I make a mistake and take a little piece off a customer's ear!"

A recent visitor at Matteawan was strolling about the grounds when he encountered a stately and well-dressed gentleman, who inquired with perfect courtesy: "I beg your pardon, but have you any dry toast about you?" The caller intimated that at present he was without that particular form of light luncheon. Then in his turn, he queried: "But would you mind telling me why you desire it?" "Not at all," responded the other. "You see I'm a soft-boiled egg, and I want to sit down!"

Little Jim and Pat, the gardener, had been great pals, and when Pat went back to the "Ould Sod" to end his days, and slow-witted Dutch Jan took his place, Jim was a very unhappy kiddie. After sundry unsuccessful attempts to interest Jan in his small affairs he waxed wroth, and one morning his father heard a tempest in the garden, culminating in "Oh, Jan, you're such a fool!" Father took matters in hand at this point, and an instant apology was next in order. Jim rebelled, but finally calmed his ruffled feelings and went to the aggrieved gardener, more in sorrow than in anger, with: "Jan, I—I'm awfully sorry you're a fool."

"Well, by Jove, this is lucky!" cried a young man as he heartily slapped the back of a gentleman whom he overtook in the street. The other turned round sharply and angrily, showing the face of a complete stranger. "I thought it was my friend Jackson," said the young man, confused. "All right," said the stranger, and he doubled the young man up with a tremendous poke in the waistcoat. "What did you do that for?" "I thought that was what Jackson ought to do," remarked the stranger as he resumed his interrupted walk.

STIMULATING TRADE.

The Standard Talking Machine Co. of Pittsburgh Are Doing Some Excellent Work in Arousing Interest in the Talking Machine Business Generally Among Dealers.

The Standard Talking Machine Co., of Pittsburgh, Pa., have been most successful in the preparation and issuance of well-written and interesting letters as means of stimulating trade. One issued some weeks ago by J. C. Roush, manager of sales, gives an idea of the kind of work this enterprising company are doing these days. It reads:

Dear Dealer—"Talking machines have gone up!

"For many months past we have anticipated this move.

"Trade conditions justified it.

"For a long time we have labored under difficulties which had finally to be met, and now every talking machine, record, accessory and all our supplies have gone up—to the eighth floor of the Irish building, 800-802 Penn avenue, corner of Eighth street. (Prices are still on the ground floor.)

"For some time we have been thinking of giving up the retail business in Pittsburgh and of enlarging our facilities to enable us to better handle our growing jobbing and wholesale trade

"Our new quarters are not only larger but are all on one floor, arranged and classified in just the way we have wanted them for a long time.

"Our show rooms and general offices are now very presentable. For the exhibition of machines we have newly constructed and improved

rooms, where our friends can see the working of the latest models and try the new records without being interrupted. Our shipping facilities have been greatly enlarged and are arranged to take care of more than double our past capacity.

"To you, who have contributed to making it necessary for us to move into larger and better quarters, we extend a most hearty invitation to make it possible some time during this coming spring to visit us. Come and see what a really up-to-date talking machine company (wholesale) looks like!

"We are able to furnish on the quickest and shortest notice any item known to the talking machine world.

"White, 'phone or telegraph your wants. Every order filled on the day received—unless at the 'eleventh hour.'"

HERBERT SIMPSON IN CHARGE

Of the Advertising Department of Kohler & Campbell, the New York Manufacturers.

Herbert Simpson, for four years assistant advertising manager of the Victor Talking Machine Co., Camden, N. J., assumed the management on February 7 of the advertising department of Kohler & Campbell, the distinguished piano manufacturers of New York City. Mr. Simpson has entire charge of the publicity department of this business—one of the largest conducted by any piano concern in Greater New York. He is splendidly equipped for this position and is well acquainted with conditions in the music trade industry. Those who know him

intimately expect that he will give a splendid account of himself in his new sphere of activity.

E. E. FORBES CO. BRANCH IN MEMPHIS.

(Special to The Talking Machine World.)

Memphis, Tenn., March 1, 1910.

The E. E. Forbes Piano Co. have not discontinued, nor do they intend to discontinue, the branch of their talking machine business which they have established in this city, contrary to general reports. They recently placed a new man in charge of the business and he seems to have taken hold of it in a very satisfactory way. A representative from headquarters at Birmingham states that they are going to spend considerable money fixing up their talking machine branch in this city and intend to increase their business materially.

KEEP YOUR PROMISES.

"If you really ask me," said a retail man to whom the question was propounded, "what I consider one of the most important minor points in the conduct of a store, I would reply without hesitation, 'Keep your promises.' People like cheap prices, and they will stand for a good deal in order to obtain them, but it is my belief that the one thing they like better than saving money is to be absolutely sure of what they buy."

The Gross Talking Machine Co. have purchased the interest of W. A. Magruder in the Talking Machine Shop, Nashville, Tenn. Edison and Victor machines are handled.

The TASIDEING MACHINE SECTION

NEW YORK, MARCH 15, 1910

EDUCATING THE SALESMAN.

The Time to Train Him Is When He Is Young, But, After All, the Successful Record of Business Men Is the Result of Years of Hard Work and Study of the Goods They Are Handling—Initiative Counts Here as Everywhere.

Often in newspapers and magazines is observed methods that tell of how to become a successful salesman, how to sell goods, don'ts for salesmen, etc.; but there seldom appears an account of how to educate a man to become a salesman. Salesmen are not born with that talent, but are educated after years of hard work and study; not the study from books on salesmanship, but from the study of the goods which they are selling and from studying men's natures and hobbies.

Not many years ago this country had very few manufacturers, few large commercial houses, and the margin of profit was much larger than in modern times. Business is a battle royal to-day, and the engagements are sharp. Thousands are engaged in the struggle of strong and unyielding competition for the commercial honors of the country. Each year large business houses go into bankruptcy—business houses which the trade looked upon as without parallel in their particular line. In tracing back the cause of their failure, it is invariably proven that the selling end was insufficient.

A successful salesman is the most independent man in the commercial world, says a writer. He is not affected by changes in prices nor harassed by growing obligations. He is indispensable to the business; he knows the goods, the field and the customers, and this asset is invaluable. He can carry these qualifications into the general market and easily find someone who, in return for the use of his possessions, will very handsomely recompense him.

The making of a salesman begins with the boy entering a mercantile business. He must start at the bottom, for those who begin at the bottom and gradually work themselves up are the kind that count. A boy starting out in this life should begin at the bottom. When you first attend school you enter in the primary, and as your learning develops you are gradually advanced. If you are desirous of pursuing a professional life, you are obliged to spend years at college before you are competent. You receive no favoritism, and are graduated only when you are qualified to go out in the world to practice.

Should a boy choose the mercantile life he should begin his career, not with his relatives, where he is apt to receive individual advancement, but with strangers, where he will be paid and advanced according to his ability. A boy working for his relatives often becomes careless, knowing that there is little danger of losing his position.

Undoubtedly the start is the most important part in the business life of almost every man. A poor start will handicap one for life, as it is the foundation for the future. If the foundation of a building is well laid, the building, when completed, will stand the severest storms; the

house with the weak foundation topples over. The same principle applies to a boy starting in life. He will not always have his relatives to provide for him, and unless he has built up a foundation by diligent work—the conscientious and faithful kind—and unless he has developed a strong character, which can only be acquired by honest, laborious work, he will bow his head when the first storm overtakes him.

The young man who goes out and applies for a position and does not wait until somebody gets it for him, is the boy who starts right. Get a position where there is a chance for advancement should your efforts warrant it. Don't be ashamed to start at the bottom. If there is a chance for advancement, get busy and do your work with a will, at the same time familiarizing yourself with the nature of work that those ahead of you are doing, so when the opportunity presents itself you will be qualified to fill higher positions. Always try to learn something new each day. Be polite to your superiors and courteous to customers you may have occasion to meet.

Nowadays a man is paid for his knowledge and executive ability. When you are a young man you should consider the fact that you are learning, as well as earning, and that the learning end is the most important part. You must know your business in every detail, and the only way to know it is to learn it.

The days of the flippant, talkative salesman have passed. It is the man who knows his goods and who presents them to the trade in the true light that convinces and gets the busi-

ness. If you are selling a \$2 article, do not insist that it is as good as your competitor's \$10 one, when you know perfectly well that it is not. A man who is paid to buy goods for a concern generally knows his business, and when you talk to him in this manner you make a great mistake.

If you have started from the bottom you have educated yourself to know your goods and believe in them. You will believe in the cheap goods, as well as the expensive ones; but in selling the cheap goods sell them as such, by doing which you will make a conscientious sale. The salesman who goes around with a rake-off for the buyer is a salesman of the past. An office boy can go around disposing of goods if he pays the buyer to buy them. Even the story-teller, who used to call upon a buyer and delight in sitting at his desk for hours telling funny stories, is a back number.

Wise merchants value the good salesmen, and the good salesmen are the men who are some day taken in the firm. Get busy, young man, and hustle. Don't think that because your relatives do not own the business you are unfortunate, but thank your lucky stars that they do not. Build up yourself, by hard, honest work and honesty of purpose, a character that will carry you to the top; and always remember that it is within the reach of us all.

Too many people look for trouble and when they find it, as a general rule, they don't know what to do with it.

MOVING PICTURE EVOLUTION.

Some Interesting Facts Showing the Origin and Development of the Moving Picture Machine Which Is Contributing so Much Today to Knowledge in All Walks of Life—The Views of C. Hemardinquer, of the Faculty of the Sciences of the Sorbonne.

The moving picture machine, under its various names, is still increasing in popularity and is being perfected day by day, although much still remains to be done before its results can be called quite satisfactory. It is difficult to realize that so complex a device, producing so life-like an illusion of animated motion, has been developed within a few years. In an article contributed to the Revue Scientifique of Paris, C. Hemardinquer, of the Faculty of Sciences of the Sorbonne, gives some of the steps in detail. He says in substance:

"The whole theory of the cinematograph is contained in these few words: persistence of the impression made by light on the retina. What does this mean? Take a match whose end still glows, and move it quickly about. We see a luminous line. Whence comes this impression? Simply from the fact that each luminous impression lasts a certain time, fixed by the experiments of the Belgian physicist Plateau at 0.14 second. During this time the object in motion has been displaced, so that we still see it in one place after it has moved to the next.

"This fact of luminous persistence has long been known. It was even mentioned by Lucretius in 65 B. C. In all times and in all countries scientists have noted it, tried to explain it and based toys or amusements upon it, such as the magic top, the thaumatrope, etc. By application of the same principle we show, in lectures on physics, the synthesis of colored lights to form white—the so-called Newton's disc. In this way, also, we may study vibratory movements on the principle of what are called in physics stroboscopic methods."

To return to the cinematograph, he takes as its starting point the phenakisticope of Plateau, which may be really regarded as its ancestor. He goes on to say: "Plateau's device received successive modifications of detail, among which may be cited Ross's 'wheel of life' and the zoetrope or zoetrope of Desvignes (1860), which may still be found in the toy shops. This is formed of a vertical cylinder having vertical slits through which the observer looks. In the interior is placed a band of paper bearing designs representing the successive positions or attitudes of a moving object or person. The zoetrope modified by a system of mirrors becomes the praxinoscope of Reynaud (1877). Then came the folioscope, which reappeared in 1897 with photographs instead of drawings. All these devices used drawings, reproductions more or less exact, of the different attitudes of the subjects. It is evident that the reproduction gained much from the substitution of photographs, and it is interesting that this substitution was first made with a scientific purpose.

"In 1873 Cornu presented to the Academy of Sciences four photographs, taken on the same plate, of the transit of Venus across the sun's disc. At the same time Janssen invented his photographic revolver. Marey, in his laboratory in the Parc des Princes, made on a single plate

successive images on a dark background, to study the movements of men and animals.

"In 1878, at the instigation of a rich American, a San Francisco photographer, Maybridge, constructed twenty-four similar objectives whose shutters were controlled by electromagnets with electric circuits so arranged as to be broken successively by a moving horse, giving twenty-four successive exposures. This was somewhat complicated.

"We cite merely for the sake of completeness the analogous attempts on fixed plates made by Auschütz of Lissa, by Londe, by Colonel Sebert, and others, and come at once to the chronograph of Marey, who was really the first to think of forming the image on a movable sensitive film, the object being exposed periodically. This was the actual beginning of chronophotography, which then entered upon a new phase. One of Marey's collaborators, Demeny, changed the chronograph to adapt it for projection. Marey had made the analysis of motion, and Demeny its synthesis.

"In 1889, at the World's Fair, Marey showed his apparatus to Edison, who, seeing its possibilities, devised his kinetoscope, in which the celluloid strip was used for the first time, and which was so successful that Marey's name was almost forgotten beside that of the famous American. But the kinetoscope was not yet a device for projecting moving pictures on a screen. On Feb. 10, 1893, the Messrs. Lumière, of Lyons, finally solved the problem and took out their first patent for the cinematograph. Everybody recalls the brilliant success of this invention. At once it was followed by a considerable number of devices made in all countries and christened in all sorts of ways from the Greek, Latin, and in more fanciful fashion still. Here are a few:

"Anarithmoscope, chronophotographoscope, cinographoscope, cinograph, cinoscope, hypnoscope, katoscope, ummographie, mutoscope, mouvementoscope (!), phantographe, etc. There are scores of them, or even hundreds. To review these devices would be to deliver a lecture on mechanics; but they all resemble the apparatus of Lumière, which in its modern forms has been changed only by perfecting details."

A very ingenious combination of the phonograph and the cinematograph has been made by Gaumont, who has succeeded in obtaining perfect synchronism between the two. The lecturer showed a number of his pictures with special phonograph accompaniment, the sound being amplified by compressed air in combination with the megaphone. These are said to have been very striking and will doubtless soon become familiar to the public.

SALESMANSHIP.

Every salesman must always bear in mind that increased earnings for himself can only come with increased business, and increased business can only come by increasing the number of customers for his store, and the only way ever discovered for increasing the number of customers for a store is to please every customer so well that he will come again and bring his friends. This is the sum and substance of salesmanship.

Don't neglect an opportunity to make a friend of a customer. Confidence begets patronage.

HOW RETURNS ARE HANDLED.

Commissioner Cabell Discusses Publicity Features of New Corporation Tax Law—How Returns May be Inspected by Those Interested in Their Neighbors' Affairs.

(Special to The Talking Machine World.)

Washington, D. C., March 6, 1910.

Royal E. Cabell, Commissioner of Internal Revenue, has just sent out the following communication, which will interest all concerns having to make returns under the new corporation tax law. He says:

"Many communications have been received at this office making inquiry as to how the returns of corporations, joint-stock companies, associations and insurance companies, made as required under the provisions of the corporation excise tax law (sec. 38 of the tariff act of Aug. 5, 1909), were to be handled in the office of the Commissioner of Internal Revenue, and whether or not they were to be open to general inspection.

"The law, paragraph 6, on this subject is as follows: '6. When the assessment shall be made, as provided in this section, the returns, together with any corrections thereof which may have been made by the commissioner, shall be filed in the office of the Commissioner of Internal Revenue and shall constitute public records and be open to inspection as such.'

"Congress appropriated \$100,000 to carry into effect the provisions of the law. Under general statutes no portion of this appropriation is available for use in the District of Columbia. The returns cannot be open to general inspection in the District of Columbia without the expenditure of a substantial sum of money. If, therefore, it was the intent of Congress to make these returns open to general inspection, it will be necessary for it to appropriate a sum sufficient to cover the necessary expenses. Until this is done this bureau rules that the returns made under this law are to be handled just as returns made under other internal-revenue statutes.

"Any person, therefore, other than the taxpayer making the return, or his duly appointed agent or attorney, who desires to see such return, shall make written application to the Secretary of the Treasury, who in his discretion will, upon a proper showing of cause, approve such request. A request thus approved should then be presented to the Commissioner of Internal Revenue, who will thereupon permit the return in question to be seen by the applicant upon such conditions as the Secretary of the Treasury shall have imposed."

ENTHUSIASM.

The difference between success and mediocrity in business is enthusiasm. Unless the retail merchant displays genuine enthusiasm over the goods he has to sell—has faith in the business he is engaged in, and shows it to the people with whom he wants to do business, he will not be compelled to make many additions to his building to care for his increased business. Enthusiasm—that's it—enthusiasm.

Sometimes a man knows so much that it takes all his time rearranging it in his head so he can make some use of it.

To Business Men

Business men
in every line admit
the value of good
trade papers.

A trade paper must be
original—it must contain a
variety of matter including news
service—technical information—in
fact it must crystallize the entire news
of the special business world, and be a
helpful adjunct to every department of trade.

Scan the columns of *The Talking Machine
World* closely and after you have completed an
analysis of the contents of this publication see if you
can duplicate its value in any other trade!

The *World* is a help to the talking machine
business.

It exerts an healthful optimism.

It wields an influence for the good and every man
who sells talking machines, no matter in what part
of the universe he may be located, should receive
this publication as regularly as it is issued. He is
missing a vital business point if he fails to do this.

Thousands of dealers not only in the United
States but in every country on earth consult the
pages of the *World* regularly.

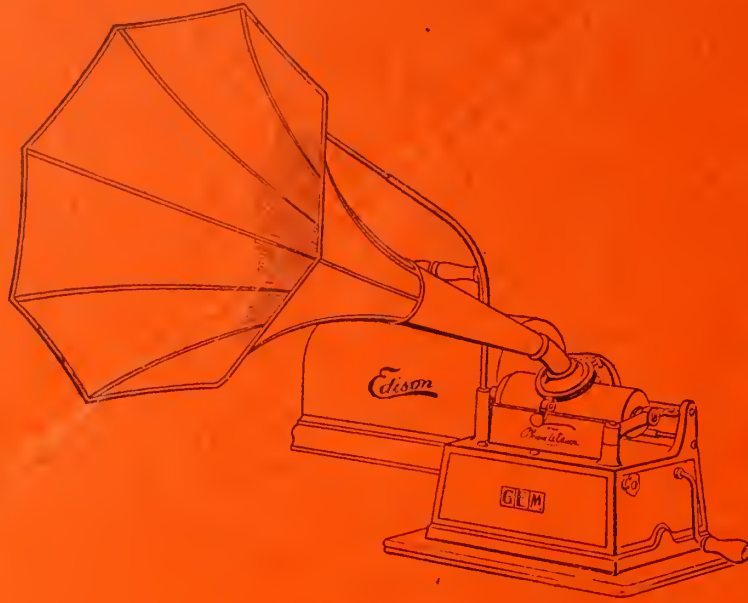

They draw from the *World* pleasure and profit.

The talking machine business has a brilliant
future, and this publication is doing much to enlarge
the business horizon of every retail talking machine
man in the world.

To receive this paper annually costs but \$1.00.
All foreign countries \$1.25.

ZON-O-PHONE

10 inch 65c. **DOUBLE RECORD DISCS** 12 inch \$1.00

Zon-o-phone Records are pre-eminently the BEST that money, brains, and a thorough knowledge of the art of sound recording can produce.

They are justly famous for their remarkably clear, natural tones, absence of scratch and wearing quality.

The greatest care is exercised in combining the selections, each side of the disc presenting the latest and best in popular music or standard compositions.

The price appeals to the masses, the quality to the classes, making them indeed a popular record at a popular price.

A new catalogue of Hebrew Single Side Selections has just been issued. Solos by Mme. Prager, Mr. Juvelier, Master Mirsky, the boy soprano, and other eminent singers. These are undoubtedly the most perfect Hebrew records ever recorded. 10 inch, 50 cents, 12 inch, 75 cents.

Resolve yourself, Mr. Dealer, into a committee of one and investigate these claims. Consider, criticize, compare. ZON-O-PHONE RECORDS will stand the test. A trial will verify all that we say.

Price Ten Cents

IT PAYS TO CARRY A FULL STOCK.

A Systematic Effort Should Be Made to Supply All Demands to Carry the Exact Goods the People Want—There Should Be a "Want" Book in Every Department so That You Can Keep a Check on Yourself as to the Needs of Your Store and Your Customers.

Does your store contain the records the people want—and do you have these called-for goods when the people want them? It's a mighty bad thing to let your stock of machines, records or supplies run out.

Sure as you're living, the very day you run out of some particular article—especially an everyday seller—someone calls at your store and asks for it. Haven't you often had it happen that way? If you haven't you're an exception to the rule. When a person makes up his mind that he's going to buy something he usually buys at that time. If he comes into your store, asks for some particular article and finds you are out of it, he goes away disgusted, visits your competitor's store around the corner, finds the desired article, makes his purchase, and you are shy what otherwise would have been a satisfied customer. It pays and pays big to keep your stock all the time and have them on time to meet early demands. People soon learn to know the store that has the goods and that store is the one they visit.

Do you have a "Want" book in each department of your store? If you don't, you will find one a mighty convenient aid to good stock keeping. Have this book hung up in a convenient place where all the salespeople can have ready access to it. Whenever the salespeople have call for any article that your stock does not contain, or when they find stock on anything running low, have it written in this book. Make it a point to inspect this book every day. Appearing on its pages will be found many articles that you do not handle, as well as those you are out of, but it will keep you well posted on the condition of your stock and the public's demand. The continued demand for some article thus recorded may be so frequent you may be induced to place it among your wares with good demand following its installation. Try this "Want" book scheme. You will find it a great aid and through its aid you will derive much real benefit. Keep in close touch with it. It insures your having the goods the people want and when they want them.

ELYEA-AUSTELL CO. ENTERPRISE.

Concerts in the Kimball House Cafe Attract Much Notice and Win High Praise.

(Special to The Talking Machine World.)
Atlanta, Ga., April 4, 1910.

The Elyea-Austell Co., the enterprising talking machine dealers of this city, have been furnishing music at the Kimball Hotel Café during the past few weeks in which the Victor-Victrola has been used. They have given selections from all the grand opera artists which will be heard in this city at the Auditorium Armory in May. A special feature of the music that attracted favorable comment was the selection of records of the voice of Richard Jose, America's great contratenor, who will be at the Lyric Theater all the coming week.

The Philadelphia Athletics baseball team is stopping at the Kimball while in Atlanta and several members of the Philadelphia club are personally acquainted with Mr. Jose, Philadelphia being his home. The records of the famous tenor's voice therefore made a decided hit with the Kimball distinguished guests.

Business with the Elyea-Austell Co. is excellent. They are building up a splendid Victor clientele among the very best people—people who hitherto did not look seriously upon the talking

machine as an artistic product. The wonderful records put out by the Victor Co. have done much to convince the skeptics that perfection has at last been reached.

EXPORTS OF TALKING MACHINES

For February—Exports Show Strong Gain as Compared with Last Year—Interesting Figures Show Steady Improvement in Trade.

(Special to The Talking Machine World.)

Washington, D. C., April 9, 1910.

In the summary of exports and imports of the commerce of the United States for the month of February (the latest period for which it has been compiled) which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following interesting figures relating to talking machines and supplies are set forth:

The total exports of talking machines, records and supplies for February, 1910, amounted to \$290,353, as compared with \$214,341 for the same month of the previous year. The eight months' exportations of talking machines, records and supplies amounted to \$2,481,906, as against \$1,926,228 for the same period in 1909.

The total export figures for the eight months of the past three years are as follows: 1908, \$3,396,579; 1909, \$1,926,228; 1910, \$2,481,906.

The value in detail of exportations of talking machine records and supplies amounted to \$177,070 in February, 1910, as against \$214,341 for the same month of 1909, and for the eight months ending in February, 1910, they amounted to \$1,575,662, as against \$1,926,228 in 1909 and \$3,396,579 in 1908.

The value of all other parts relating to talking machines, phonographs, records and materials therefor sent abroad during February, 1910, amounted to \$113,288; the total exports for the eight months under this heading foot up \$906,244.

SALESMANSHIP DEFINED.

It is the Art of Influencing the Human Mind by Means of Language to Agree to an Exchange of Values.

The day has long passed when commerce was regarded as sordid and salesmanship a disgrace. The application of intelligent and scientific methods to the organization of this branch of industry has resulted in elevating all of its standards, improving its personnel and bringing about a radical change of public opinion in regard to the solicitor and to the business of canvassing.

Adam Smith bases the wealth and prosperity of nations upon the idea of exchange. The salesman is a chief factor in modern industrial life.

Salesmanship may be defined as the art of influencing the human mind by means of language to agree to an exchange of values. As to the method, it is essentially the same as the art of oratory with its applications to law and to preaching. As to its effect upon character, it is unquestionably broadening, elevating and instructive. As to its material results, if the man who sneers at salesmanship had sufficient experience to know how large a proportion of families of wealth and refinement in every community are supported upon the commissions of salesmanship he would speedily incline to a different opinion.

"HIS MASTER'S VOICE" FEATURED

By the Sand Artists at Atlantic City During Easter Week.

Visitors to Atlantic City during Easter week were interested in the work of the familiar sand artists, who always have something attractive to win the interest of board walk promenaders.

Being horse show week the equine hero and the handsome young ladies with the Easter hats formed a subject for the artists, but one of the most attractive near the Million Dollar Pier was an excellent reproduction of the Victor Talking Machine Co.'s famous trade-mark, "His Master's Voice." It was gotten up in colors and attracted quite some attention.

LEASE HANDSOME BUILDING.

The Minneapolis Phonograph Co. Secure Three Story and Basement Building—Concentrate Victor and Edison Business at This Point—Will Handle Small Musical Instruments.

(Special to The Talking Machine World.)

Minneapolis, Minn., April 8, 1910.

The Minneapolis Phonograph Co., of which Lawrence H. Lucker is the head, have leased a large three-story and basement building at 515 First avenue, South. It is 40 feet front by 160 feet deep and it is fitted up in an attractive manner throughout for the company's business. Mr. Lucker will concentrate at this point his wholesale Edison and Victor wholesale talking machine business, which he has conducted at 511 Washington avenue, South, and his retail store now on Nicolet avenue. He is inaugurating a new departure, the addition of a wholesale small goods department. A large stock of goods has been ordered and is now on the way, including practically everything in the musical instrument line, with the exception of band instruments, which may be added later. He has a large talking machine business all through the northwestern country, with a force of good salesmen on the road, and therefore possesses distributive facilities for making the new venture a success.

The first floor of the new building will be devoted to retail and no less than fifteen Victor and Edison demonstration booths are being constructed.

BILL TO PREVENT FRAUD.

Bill Before Maryland Legislature Making It a Misdemeanor to Secrete Unpaid-for Goods Secured on the Instalment Plan.

(Special to The Talking Machine World.)

Baltimore, Md., April 9, 1910.

Talking machine dealers, as well as other merchants in this city and State doing an instalment business, are interested in a bill recently introduced in the Legislature, making it a misdemeanor to sell, pawn or secrete goods bought on the instalment plan and not fully paid for. The piano men and other merchants are hoping that the Legislature now in session will pass the bill without delay and thus afford the welcome protection.

GOT A JOB AT EDISON FACTORY.

The Daily Mail, of London, recently printed an interesting article written by H. Collins, a working joiner, which has important bearing on the tariff reform question. Aiming to show that wages are higher and the demand for skilled labor is greater in America than in Canada, England or Germany, Mr. Collins writes:

"I have worked at some of the best shops in London, but after walking the streets for eight months in a vain search for employment I went to Canada with two chums in the same trade and another who was a laborer. What happened in Canada does not matter here, but the American papers circulate freely in Canada, and we happened to get hold of a copy of a New York paper and saw more work advertised. Being struck with the high wages offered, we made tracks to Edison's phonograph factory, Orange, N. J., and all three got a job right away."

TRADE NEWS FROM THE PACIFIC NORTHWEST.

Talking Machine Business Excellent Despite Poor Freight Service—Strong Demand for High-Grade Machines—The Talker in Alaska—Some Interesting Personalities—How the Various Dealers Are Progressing—Eilers' Series of Concerts—Other News of the Month.

(Special to The Talking Machine World.)

Seattle, Wash., April 8, 1910.

Talking machine business is excellent in this section considering the poor freight service which has been maintained by the transcontinental lines this spring. Most of the jobbers have been handicapped in not receiving goods even for retail purposes. This is true especially of Sherman, Clay & Co. in Seattle and Portland; also the Columbia Phonograph Co., at Portland.

The demand for high-priced talking machines is unprecedented for this section. A canvass of the large dealers brought out the fact that they all have from 12 to 35 orders for Victrolas, Amberolas and Grafonolas (Regents), which they are waiting to deliver as soon as the freight arrives from the factories.

Eilers are doing a tremendous Edison business, especially since taking over the Bruce & Brown stock.

It is encouraging to note the great strides the talker business has taken in Alaska. Some of the biggest accounts handled by Northwestern jobbers now, can be found in Alaska. Some of the bigger towns, such as Skagway, Sitka, Ketchikan, Wrangil, Juneau, Nome and Fairbanks, all have representatives for the Victor, Edison and Columbia goods, who are as wide-awake and progressive, if not more so, than dealers in larger cities in the States.

C. E. Brown is now engaged in selling vibrators. This will no doubt interest his many friends in the trade.

Edward P. Kelly, Eilers local talking machine manager, has just returned from a trip to Portland where he went to instruct the Webforts on the fine points of the "talker" game. Kelly says that all orders for the song hit, "Has Anybody Here Seen Kelly?" will receive his personal stamp of approval.

Horace C. Borgum, for the past seven years with Sherman, Clay & Co., Seattle, has opened up for himself at 1207 Third avenue, with a full line of Victor, Edison and musical instruments. So far the business done has gone far beyond his fondest expectations.

Sherman, Clay & Co. have closed a contract calling for a three-story concrete building to be erected at Third and Pine streets, Seattle. This

is out of the retail district, and to offset this they will conduct their old store until they get a foothold in the new location.

A new Victor man has appeared on the scene in the person of Hugh W. Dobbs, of New York City. He will travel for Sherman, Clay & Co. in this section for the purpose of telling the dealers "how" and incidentally booking orders for Victor goods. Mr. Bendel, the former traveler, has been transferred to the inside at his own request on account of his plans of embarking on the stormy sea of matrimony in June.

Quite a number of Coast travelers have been in Seattle lately, including such notables as Harry Redling, Victor representative from New York; Edward Lyons, Edison representative; L. D. Heater, Columbia traveler, and Harry Norton, representing Sherman, Clay & Co., San Francisco.

Arthur Cobb has severed his connection with the "talker" business and will hereafter sell lard, beef and hams for a local packer.

John R. Ramaker, manager of Sherman Clay's Tacoma store, has fixed up one of the finest phonograph departments in the Northwest. The private demonstrating rooms are light, airy and cozy.

Eilers' Tacoma store has enlarged its "talker" department, now having a row of demonstrating rooms on the main floor. Mr. Peterson, manager of the department, has done wonders towards developing the business in Tacoma.

Edward Borgum, formerly with the Southern California Music Co., Los Angeles, has taken charge of the Edison business phonograph department for Eilers' Music House in Seattle and has already closed some nice deals. There is a great future in this section for this line.

Eilers' Music House have just inaugurated regular Saturday evening concerts in their recital hall, the Victrola and Grafonola being used exclusively. It is no uncommon thing to turn away 300 or 400 people at one of these "talker" concerts. H. Dawley, late of Bellingham, is concert director, and is ably assisted by Colonel Mitchell, who does some original entertaining stunts.

Perry C. Graves has severed his connection with Graves Music Co., Portland, and is open-

ing an elegant store on Washington street, Portland. He will handle a full line of Victor, Edison and Columbia (disc) goods.

Miss Jo Cohn, who is with Eilers', Seattle, has just returned to her duties from a sojourn in Fremont, Wash.

OUR FOREIGN CUSTOMERS.

Amount and Value of Talking Machines Shipped Abroad from the Port of New York.

(Special to The Talking Machine World.)

Washington, D. C., April 10, 1910.

Manufacturers and dealers in talking machines will doubtless be interested in the figures showing the exports of talking machines for the past five weeks from the port of New York:

MARCH 9.

Berlin, 8 pkgs., \$105; 14 pkgs., \$300; Bristol, 60 pkgs., \$760; Callao, 6 pkgs., \$155; Cape Town, 6 pkgs., \$123; Demerara, 18 pkgs., \$1,000; Havana, 12 pkgs., \$286; Havre, 3 pkgs., \$200; Kobe, 2 pkgs., \$150; London, 20 pkgs., \$1,394; 178 pkgs., \$4,986; Maracaibo, 7 pkgs., \$378; Moscow, 5 pkgs., \$700; Pernambuco, 60 pkgs., \$2,852; Shanghai, 4 pkgs., \$307; Sydney, 23 pkgs., \$425; Trinidad, 8 pkgs., \$297; Valparaiso, 2 pkgs., \$100; Vera Cruz, 71 pkgs., \$2,172; Wellington, 400 pkgs., \$2,080.

MARCH 16.

Berlin, 116 pkgs., \$830; Callao, 2 pkgs., \$283; Colon, 10 pkgs., \$109; Havana, 619 pkgs., \$6,134; Kingston, 2 pkgs., \$183; London, 223 pkgs., \$6,712; Melbourne, 175 pkgs., \$3,710; Para, 5 pkgs., \$181; Port Limon, 31 pkgs., \$385; Porto Barrios, 5 pkgs., \$449; Porto Plato, 5 pkgs., \$289; Rio de Janeiro, 21 pkgs., \$1,555; Tampico, 5 pkgs., \$447; Valparaiso, 5 pkgs., \$372.

Talk "quality" in selling the Victor

"Quality" is the argument that convinces people.

Prove to them that the Victor is best musically and mechanically. This means greater business and more profit for you.

Tell people that the voices of the greatest singers in the world are recorded exclusively for the Victor; that the foremost bands and orchestras make records for the Victor only.

Make a strong point of the clear, vibrant, true-to-life tone-quality of Victor Records; and of the perfect construction of the Victor, which assures perfect playing.

Explain to vocal students and teachers the opportunity, possible only through the Victor, to closely study the voices of the great singers.

Use all these "quality" arguments, make your salesroom attractive, and you will at once attract the better class of people—those who have the money and buy the best.

You will be abundantly repaid for your effort. Your sales, your profits, and your prestige will greatly increase.

STUDYING ONE'S CUSTOMERS.

A Profitable Chat During Which Our Special Correspondent Hears a Good Trade Story, and Passes It Along to World Readers.

There was a delightful quality of balmy spring in the air; even a faint earthy odor from the distant fields came with a pleasant tang to the nostrils as I wended my way down Chestnut street. Every face I met seemed overspread with a new cheerfulness due to the time of year and the beautiful morning. As I crossed the street it occurred to me that Flanigan, of the traffic squad, beamed upon me with more than his usual good humor, and remarked on the "lilgant" weather.

It was just the kind of a morning to send one news hunting, and I then and there decided to visit my friend Jones and endeavor to glean from him something of interest to The World and its readers.

I found him busily engaged in superintending the dismantling of his Easter window display. "Hello, Middleton!" he called to me from behind a papier-mache choir loft, at the same time throwing a rosy-faced altar boy of the same composition to one of his clerks and coming forward to greet me.

"Don't let me interfere with your labors," I said, moving towards the door; "I can call later."

"No, don't go," he replied. "The boys can finish this job, all right. Come in the office, will you? I have something of interest to impart. I take it for granted that is what you came for," he added, laughingly.

After we were seated and our cigars lighted, Mr. Jones launched forth as follows:

"What I have to tell you may not be very valuable from the standpoint of a trade journal reporter, but it proved to me very conclusively one thing, viz.: that it pays the 'talker' man to take stock of every customer who calls, for by so doing he can arrive at a conclusion regarding his wants in the record line, and, therefore, wait upon him intelligently. For example, the other afternoon an elderly gentleman, very erect, and with a certain easy swing to his walk which bespoke the soldier, came into the store. This opinion was strengthened by his broad-brimmed Stetson with a tasseled band and the gold-mounted cane held saberwise against his hip.

"Did you wish to hear some records, sir?" I asked. "Yes," he answered falteringly, "but I guess I shall have to leave the choice of selections to you, as I am not very well posted upon such matters." His voice was low and rich, and he spoke with the careful deliberation and precision of the perfect gentleman, and I sized him up at once as an ex-officer of the Union Army, and therefore naturally interested in records of a military character. I played "Just Before the Battle, Mother," which brought tears to his eyes. There were several other selections also to which he took a great fancy, among them "A Call to Arms" and "Marching Through Georgia," but the climax came when I placed "Sheridan's Ride"

upon the mandrel. He sat perfectly still in his chair, gripping the arms hard with his gloved hands, and when the last bars of "Columbia, the Gem of the Ocean," of which the orchestral finale consisted, died away, he was greatly moved. "A very wonderful record, sir," he exclaimed, brokenly. "I assure you it brings back the old days very keenly." After he had finished purchasing records, as he seemed in no hurry and I was not busy, we had a most delightful informal chat, and when he departed he left his card and a kind invitation for me to call and see him. I was so taken with the old chap that when, a few evenings later, I found myself in his neighborhood, I decided to look him up. A white-capped maid answered my ring and ushered me into a wide hall. From beyond the portieres as I fumbled for my card I heard the voice of my old soldier and the high-pitched laughter of children. Search as I might, I could not find a card, so explaining to the maid that I would

AN EDUCATION IN PATRIOTISM.

dispense with that formality, I relieved myself of hat and coat and prepared to make my entrance. Just then I heard a boy's voice ask pleadingly "Can't we have the 'Sheridan's Ride' record, please, grandfather? And can't I hold your sword while it is playing? I am to be a soldier, too, some day, you know, and there is nothing like beginning early." I waited for the reply. It came in the form of an enthusiastic affirmative and then before I could make my presence known the sweet strains of the introductory, "The Dawn of Day" filled the room and held me spellbound with its beauty.

I made another attempt to enter at the close of the selection, but before I could do so the confidential tone of the old man's voice stopped me.

"Jack," he said, drawing the boy close to him, "there is something in connection with that record I want you to become familiar with. I have never had the courage to tell you before, but somehow to-night I feel it would be best for you to know. I want you to hear this, too, Edith," he called to a little girl playing before the fire. She laid down her doll without a word and took up a position beside his knee.

The old man lit a cigar, puffed awhile in silence, and then began: "Do you remember, children, during our trip to your uncle's ranch in Montana last summer the flock of sheep we saw stampeded by a coyote and how after the poor things had first scented danger they crowded together with heads high, sniffing down the wind

with nervous, quivering nostrils, and then, as they saw their enemy, dashed wildly away, eager only to escape a terrible foe? Do you remember all that, kiddies?" "You bet!" cried the boy excitedly, "and then dear old Phil stopped that stampede in no time and chased the coyote a mile. Nearly got him, too," he added reminiscently. "That is just what he did, dear old Phil, the greatest sheep dog in Montana," echoed the old man proudly, then continued, "Jack, General Sheridan, in his great ride from Winchester, did for us exactly what old Phil did for those sheep. Our leader had gone to Washington to confer with the Secretary of War on business of vital importance to the whole Northern army, and we were more or less demoralized in consequence, so when the rebels, taking advantage of our weakness, stormed down upon us, we broke and ran, and just as utter defeat seemed imminent, the quick beat of hoofs came to us from afar, and then through a smoke cloud which enveloped us a horseman dashed. His general's uniform was covered with dust, his boots mud-spattered, and his steed, a noble animal, black as coal, with flaming eyes and quivering flanks, though nearly exhausted, still showed the mettle of the true thoroughbred. With sword waving high, he rode among us, stemming the tide of retreat and by his wonderful magnetism leading us back into the fray and on to victory."

The old man ceased speaking, and looked hungrily at the boy on his knee. "Tell me, Jack, were we cowards?" "Cowards, nothin'," the boy replied authoritatively. "Old Phil got there in time to save you, didn't he, just as the other old Phil saved the sheep up in Montana?"

"Yes."

"Well, that was all right then, grandfather; you weren't cowards," and then hugging the sword tightly to his breast, he cried with a great yearning in his young voice, "Gee! how I wish I had been there."

Thinking this a fitting time to make my presence known, I parted the portieres and entered the room with a cheery "Good evening, Colonel."

My host greeted me with much courtesy and we spent a very pleasant evening together.

"Now, can't you see, Middleton," remarked Jones, turning to me as he finished his story, "how interesting it will be in the future to study my customers, and, perhaps, learn to anticipate their wants as I did the Colonel's, and form other friendships, too? Who knows?"

I thoroughly agreed with him and told him so.

HOWARD TAYLOR MIDDLETON.

NEW MANAGER IN SYRACUSE.

Carroll Koon, a well-known musician and organist, has been appointed to the position of manager of the new talking machine department established by Leiter Bros., Syracuse, N. Y. The company handle Victor machines and records, and have given much attention to the equipment of their departments.

If a good idea should strike you, don't let it catch you off your guard.

WITH THE TRADE IN MILWAUKEE.

Strong Reaction in the Trade After the Lenten Quietude—Business Good Throughout the State—What the Various Houses Have to Report—Metropolitan Grand Opera Season Helps Sales of Red Seal Records—New Edison Records Selling Well—Wisconsin Dealer in New Quarters—Other News.

(Special to The Talking Machine World.)

Milwaukee, Wis., April 11, 1910.

A genuine reaction has taken place in the talking machine trade after a quiet business during the Lenten period. Retail dealers say that the spring trade has opened with a rush, and that indications are that conditions will be highly satisfactory from now on. Machines, records and supplies are selling well, a feature of the local business still being the excellent demand for high-grade machines.

Retail business in the larger cities and towns about the State is exceptionally good, but it is a little quiet in the smaller places as a result of the busy times that the farmers are experiencing. Spring put in an appearance in Wisconsin earlier this season than in many years, and while it has curtailed sales in certain districts, it has boosted business in other sections.

Wholesalers are entirely satisfied with the business that they are rounding up, although sales might be larger. Dealers about the State have been restocking since the first of the year, but wholesalers believe that they can see plenty of good times ahead.

"The wholesale business is very good," said Lawrence McGreal, the well-known talking machine jobber. "Dealers are well pleased with the proposition made by the Edison people, whereby customers get ten Amberola records with an Amberola attachment. The only trouble is that we cannot keep enough stock on hand to satisfy the demands of the trade."

Mr. McGreal has just returned from an enjoyable ten days' outing at French Lick Springs.

The appearance of the Metropolitan Grand Opera Company in Milwaukee, April 17, 18, 19 and 20, under the local management of Mrs. Edwina Kellenberger, is expected to boom the business in the Red Seal records and in the higher class of machines. Caruso himself will appear, and it is expected that the Auditorium will house audiences of 10,000 at each performance. "Parsifal," "Aida," "Lohengrin," "Hansel und Gretel," "Pagliacci" and "Tannhauser" will be presented.

The Hoeffler Mfg. Co. are making the most of their opportunities and are displaying a fine line of grand opera records in their windows, while under the direction of Manager J. H. Becker, Jr., special afternoon concerts are given, at which grand opera selections are featured. "During the next month we expect to meet with the greatest sale of Red Seal records in our history," said Mr. Becker. "The coming appearance of the Metropolitan Grand Opera Company has already stimulated an unusual interest, but we are looking for even greater things."

Roy Keith of The Talking Machine Co., Mr. Gibbs of the Rudolph Wurlitzer Co. and Mr. Pribyl of the Universal Talking Machine Co. were recent visitors at the Hoeffler Mfg. Co.

The new Edison records for April are meeting with an excellent sale in Milwaukee. Two of the most popular seem to be "The Cubanola Glide," sung by Collins and Harlan with the New York Military Band, and "By the Light of the Silvery Moon," by Ada Jones and chorus. Both selections are now at the height of their popularity.

William J. Voss, the well-known talking machine dealer of Appleton, Wis., has moved into new and larger quarters in the Lyons building, on College avenue, of which he has secured a five-years' lease. Mr. Voss announces that he will enlarge his present stock of machines and supplies. During the three years that Mr. Voss was located at his former stand on Oneida street he built up a business that of recent date had assumed such large proportions that he was forced to look around for a new location.

Alfred Hille, manager of the talking machine department of the Joseph Flanner Music House of Milwaukee, recently made a record for long distance sales by disposing of a Victrola to a resident of Texas. Mr. Hille reports that the spring business is taking on a most satisfying outlook.

"The arrangement just announced by the Edison company, that customers will get ten Amberola records with the purchase of each attachment, is one of the finest schemes that the company has ever evolved," said J. H. Becker, Jr., manager of the talking machine department of the Hoeffler Mfg. Co. "People are quick to take advantage of an offer of this kind, and there are a number of our customers who are hurrying to exchange their old machines."

W. J. Augustine, the "talker" dealer of Oshkosh and Fond du Lac, Wis., and Bert Fort, of Waterford, Wis., were recent visitors at the wholesale establishment of Lawrence McGreal.

A. G. Kunde, new owner of the downtown Columbia store at 516 Grand avenue, is considering the erection of a handsome new front at his establishment, having unusual display facilities. He has just completed the work of redecorating his new quarters. "One of our biggest sellers at the present time is the 'Improved Royal' Columbia, the new BNW model," said Mr. Kunde: "General business is very good, and we are looking for a satisfactory spring."

William P. Hope, traveling representative of the National Phonograph Co., was in Milwaukee for a few days after meeting with an excellent business in his territory.

A new disc record cabinet, embodying new and striking features, has been devised and patented by William Schmidt, traveling wholesale representative of Lawrence McGreal, and will be placed on the market at once by Mr. McGreal. The new cabinet, which is provided with a changeable top to match any machine and is equipped with new sliding files, is something entirely new, and has been creating no end of interest among the dealers of the State who have

inspected it. "We have received orders from every dealer who has seen the new cabinet, and I predict that we will meet with a wonderful demand for the cabinet when it is placed before the trade," said Mr. McGreal. "We intend to interest jobbers as well as the retailers."

Miss Gertrude Gannon, present owner of the McGreal retail store, is enthusiastic over the manner in which the spring trade has opened in Milwaukee. "The remarkable demand for Amberolas and Amberola records is one of the leading features of the trade," said Miss Gannon. "I find it almost impossible to keep enough stock on hand to meet the demands of the trade in this line."

Gimbel Bros.' new talking machine headquarters have been opened to the trade. With handsome parlors, having unusually good acoustic qualities and the best of modern facilities, the new department on the second floor is among the finest in the city.

The "Lawrence McGreals," one of the leading baseball teams in the Milwaukee City League, has entered upon its present season with Arthur Dunn as manager. Last season the team secured third place; the season before it came out second in the race, and so Lawrence McGreal, president of the club, believes that the organization will be in line to capture first place this year.

SPRINGTIME FANCIES.

Summer shower come passin' by; rainbow yonder in de sky; sort o' strikes dese eyes o' mine like a slice o' melon fine! When dem drops come soft'ly down, flowers blossom all around; satisfaction seems complete. Sho! Dat melon juice am sweet!

Many ad. writers try to say too much. They should learn that "half is better than the whole"—that an ad. should express the quintessence of thought and not be given in a crude state.

Learn Spanish, French, German, or Italian

The I. C. S. System of Language Instruction by the phonograph method makes easy the mastering of a foreign language and appeals with compelling power to thousands. The dealer in phonographs that does not carry I. C. S. Language Outfits is neglecting a quick and sure way to increase his business. The new \$35 Language Outfit of the I. C. S. is a marvel. It represents the highest art in the teaching of languages, and embodies a method that has won the warmest praise of thousands qualified to speak authoritatively. The Spanish, French, German, and Italian Embassies at Washington, as well as the leading colleges, have cordially indorsed the I. C. S. Method of teaching languages.

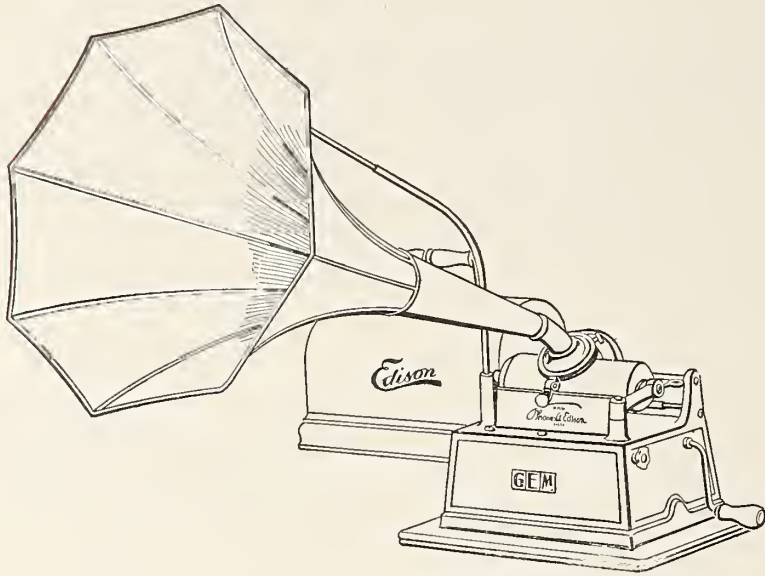

The I. C. S. Language Outfit consists of an Edison Gem Phonograph made especially for language work; 14-inch brass horn; special hearing tube; recorder; reproducer; speaking tube; winding crank; camel's-hair brush; blank cylinders on which to make phonographic recitations; and 25 Conversational Records, teaching pronunciation guaranteed to be absolutely correct, with native intonation and inflection. In addition to these Conversational Records there are pamphlet Instruction Papers teaching the theory of languages. The new Outfit is the best and cheapest ever offered—the price being only \$35.

If you want to increase your business, write today for full particulars.

NEW YORK, APRIL 15, 1910.

TALKING machine dealers in eastern territory have long discussed the formation of an association for trade good and in last month's World there appeared a detailed report of the first meeting and this month we present the subsequent moves made by the new organization.

For an embryo association considerable interest has been aroused and there is every belief that this organization will increase rapidly in numbers and influence.

There is an idea prevailing in some quarters that the manufacturers are opposed to such an organization.

This belief is absurd.

At the first meeting expressions from the manufacturers clearly emphasized their attitude towards the proposed organization.

Manufacturers are interested vitally in any project which makes for trade betterment and the theory that they are opposed to an association is too ridiculous to be considered for one moment.

On the contrary, they favor it, and if the talking machine dealers of this country can work up trade organizations in various localities they will aid themselves very materially.

They will keep the trade from certain depressing influences—they will arouse interest on the part of the members and they will stimulate better work, bring about new thought and materially assist the trade in every particular.

Now, the manufacturers are just as much interested in seeing ideal conditions as the dealers themselves.

Organizations which bring the manufacturing and retailing departments of any trade into close union are beneficial and must necessarily bring about more cordial relations between the manufacturing and distributing forces.

NO organization in the talking machine trade can be autocratic and attempt to dictate what the manufacturers shall do.

That is impossible, nor would sober, sensible men for one moment recommend such action, but to work together in harmony, making suggestions here and there in order to eliminate certain defects will work out admirably for the benefit of each division of trade.

If the talking machine men will stand together they can accomplish a good deal in every way.

They can build the business on a firmer basis and they can conduct their own enterprises so that they will command greater respect and attention from the public.

They will work their territory more thoroughly and more completely, and right here brings us to an interesting subject—unworked territory.

We venture to assert that there is not a part of this great, big country that has been worked in the manner which it should have been in the talking machine business.

The surface has not been scratched and if men get together, exchange views and discuss ways and means whereby this unworked territory may be developed, each one will profit by the suggestions and experiences of the other.

Each one will draw some enthusiasm from contact with optimistic, successful business men and the result is the weak ones will become stronger.

There is rich territory closely adjacent to every talking machine man in this country—territory which is not half or quarter developed and it promises good returns if close attention be paid to it.

BUT you cannot work territory by sitting down in your wareroom and not building up systematic plans for trade capturing.

People are not going to fall over each other in their haste to reach talking machine warerooms.

They must be interested. Talking machine men must evolve new thoughts—new ways—with which to win trade.

In the piano business the system of personal calls—"door bell pulling" they call it—has been the means of vastly augmented piano sales.

All of the big houses follow up this plan systematically.

They cut territory up into blocks and they put a corps of men working over each division.

Reports are made and prospects checked up and the whole campaign framed as completely and systematically as it is possible to do in working any territory.

Now, talking machine men might take a leaf out of the piano trade history in this particular.

They are selling expensive creations.

They are selling home entertainers which are unrivaled.

They are entering a field which affords splendid sales possibilities and they have got to appreciate that fact.

They must realize that good trade requires

good work and a good business cannot be made up through carelessness or indifference.

Making mistakes in business is like falling down in a foot race.

It is a setback—a very serious one at that and the talking machine man makes a mistake who believes that trade is gotten easily and without effort on his part.

It is not so.

THE time was when the talking machine business came easier than to-day.

But the talking machine has indeed won a settled position among the products of this country and must be pushed as systematically and progressively as any other creation of human skill and genius.

To sit supinely down and say that the talking machine business is in its decadence is to invite evil and disaster.

The man who has such a conception of the future of the trade should rub elbows with some of the men who are doing the great, big talking machine business of this country to-day.

They might meet them if they joined organizations and attended meetings and got vaccinated with a little of the enthusiasm virus.

It will probably help them out and Lord knows some of them need it.

Now, if the men in any business are to advance they must do it through their own efforts, and this industry affords ample opportunity for the future of the men who are in sympathy with modern methods—who are in sympathy with the future of the up-to-date product—who realize the value of the talking machine as an entertainer and as an instructor, and who do not view it with indifference or do not appreciate its marvelous sales-getting qualities.

Now, an association can be of no particular benefit unless it is supported by men in a fair manner.

Some always have to make sacrifices, and it will be necessary to devote some time and money to a successful upbuilding of a trade organization, but it will be worth many times its cost in money and in time.

THE eccentricities of individuals are oftentimes beyond human understanding, and editors and publishers have probably to stand as much blame as any people engaged in professional work.

Some of the correspondence received at this office is interesting—some humorous.

Recently we received a communication from a subscriber, who writes: "You may cancel my subscription, because one of your advertisers cost me about ten dollars on account of not knowing how to pack a shipment of merchandise. I sent a bill of lading in time for me to get it corrected before paying freight in the deal, and I am practically out the above amount."

In other words, this subscriber blames The World for an excessive freight rate and the methods by which some manufacturers ship their merchandise.

Probably someone will blame us if the tail of Halley's comet swishes dangerously close to the earth!

We can stand for it—it doesn't matter much.

TRADE HAPPENINGS IN LONDON.

Trade Conditions Show Improvement—Coal Strike Hurts Business—The Price-Cutting Evil Rampant—A Few Conditions That Tend to Upset Trade—Now Want Talker Dealers to Handle Cycles—Improving Record Production—Booking Artists Exclusively for Columbia Co.—News from the Provinces—Sales Unsteady—First Amberolas Arrive—New Record Lists—Keeping Trade Active—Interesting Decision Anent Commissions—Vanload Thieves Rob Twin Record Co. Premises—Bureau of Commercial Information for Cape Town—Other Interesting News of the Month from Great Britain.

(Special to The Talking Machine World.)

London, Eng., April 8, 1910.

During the course of my rounds in the trade this month I have noticed that, somewhat contrary to last month, there are signs of a cheery nature which leads one to the conclusion that talking machine sales, especially in records, have much improved. And this is all the more satisfactory in view of the general uneasiness brought about by another threatened disturbance in the coal trade. Up to a day or so back the outlook was very serious and it was stated that directly and indirectly over a million hands would be thrown idle in the event of a strike, in addition to the usual disastrous effects which it would entail upon the many sources of industry whose very existence largely depends on a plentiful supply of fuel. The Board of Trade, whose intervention had been sought, is now busily engaged in trying to effect a settlement, and a report just to hand from that department promises more hopeful results.

An Era of Price Cutting.

Following upon the mention in these columns last month of the price-cutting of records by some of the large stores, further startling offers have been published this month. Upon inquiry we learn that Gamages still hold a large stock of the old "Imperial" disc records, and these they were recently advertising at 10d each, or 9s. 6d. a doz. Harrod's go one better in offering (we believe, the "Star") disc records at the ridiculous price of 7½d. each, or in parcels of twelve assorted single and double records 6s. And we believe there is another American record offered by a well-known city dealer at an even lower price than this. Naturally the public have taken full advantage of these prices, but the poor dealers all over the country are loud in their complaints of a system which permits of the dumping of foreign bankrupt stocks on this market entirely free of any duty whatever.

Result of American Patent Litigation.

This is one result of the prolonged patent litigation in the American courts, in more than one case the losers' stocks having been jobbed by the receiver at scrap prices. Thanks to our open-door policy, this country proved very obliging when these goods were to be picked up cheap, and it can therefore cause no surprise that the market is entirely upset. The lack of stability which marks the talking machine trade in this country has been brought about in the first place by new manufacturers entering the field with a cut-price article; by that I mean at a price below the standard figure then existing, and in consequence forcing other manufacturers to reduce prices to that level, which could not possibly stand the strain of competition. Result, several of our best firms were forced to go under, their stocks—usually pretty big—were auctioned off very often at more than 50 per cent. less than the cost prices, and for the past twelve months or more the small dealer has had to contend with competition in the shape of first-class cylinder

records priced as low as 3d. each and first-class discs at 7½d. each, or even slightly less. Not a very satisfactory state of things, it must be admitted.

A Ridiculous Suggestion.

Hitherto the music shop proper has not devoted itself to selling cycles, the majority were somewhat slow in taking up the sale of talking machines, and it is therefore somewhat surprising that a certain Coventry cycle firm should not have better acquainted themselves with the conditions and exclusiveness of the musical industry before issuing the following circular: "Music warehouses throughout the Kingdom should be handling cycles as a fixed and important feature of their business. The demand is so great, the net profits are so considerable, that progressive tradesmen cannot afford to be indifferent to a practice that is growing by leaps and bounds. The vital consideration is not 'Are cycles worth handling?' but 'Which are the best to handle?' i. e., Which will give the most satisfaction to buyers and the biggest profit to the seller? Our special offer to music warehouses enables you to add this lucrative adjunct to your business without extra capital, without interfering with the present routine, and practically without risk." Whatever obtains in other countries, as applied to England the statements in the above circular are quite erroneous, and I do not hesitate to say that the great majority of musical instrument traders think too much of their calling to even consider such a ridiculous suggestion.

Eliminating the Scratch in Records.

It is but three months ago since I drew attention in these columns to the objectionable surface scratch which characterizes most disc records of any make. At the time I remarked that manufacturers constantly experimented for improvements in that direction, and it is but fair to say that there is already a noticeable change for the better. Having tested a large number of the current issues of various makes, I find that greater care has been taken in obtaining that even and smooth surface without which any record, however well recorded it may have been in the first place, is something to fight shy of.

Want Queenstown as Cunard Port.

A deputation recently waited upon the Postmaster-General to ask him to use his influence to induce the Cunard Co. to make Queenstown a port of call, both on the outward and homeward passages from New York for their mail steamers. The Postmaster-General pointed out that the "Lusitania" and the "Mauretania" carried 90 per cent. mail for Great Britain and he could not advise delaying the mails nearly four hours to land the 10 per cent. of Irish mail in Queenstown. It would not be wise or businesslike.

Selling Balance of "Star" Machines.

The balance of the stock of the "Star" machines, now in the American liquidator's hands, it is reported, will be sold in this country by the Star Manufacturing Co., located at 15 City Road.

Exclusive Columbia Co. Artists.

The Columbia Phonograph Co. have been going ahead under the management of Louis Sterling, one very fine move of his being the fixing up of no less than eleven well known artistes to sing exclusively on Columbia records. Another recent departure is the issue of an all Scottish list, a special Welsh supplement and a splendid list of descriptive record by Eric Foster, in the original Tyneside dialect. There are also some special Irish selections in the same list (April).

Provincial Notes.

Reports to hand from Provincial trade centers would seem to indicate that sales have eased up somewhat, which is not a little due to the fact

that our cycle friends have, as is usual about this time, lost all interest in talking machine goods, and are devoting their energies to the sale of cycles, etc. Particularly is this the case in the great Yorkshire centers where phonograph and disc machine factors now have to stock innumerable lines to make both ends meet. As a matter of fact the wholesalers' profits of the old days have vanished, and their present position in the majority of cases is simply that of giving change for a penny, so to speak. Up Manchester, Liverpool and the great north way generally, things are little better. There is no steadiness in the labor market, thousands of mill hands are still on short time, money is tight and altogether the outlook is not of a very hopeful nature. It is noticeable that record customers are satisfied with the purchase of one or two selections where formerly in many cases the quantities sold were in half-dozen lots or more. Machine sales, while not bad, are not by any means satisfactory, and those dealers who do pay a little attention to the business during the spring and summer months have a very good selling line in the large variety of portable disc machines now on the market. Up Newcastle way traders received good fillip through the special series of Tyneside Rena records. In each case the selections were composed and spoken in the Tyneside dialect, by the inimitable Eric Foster. "By Gum, the'r Champion!" is the local opinion of these splendid records.

Teaching of Languages by Talking Machines.

The recent interesting lecture in Belfast by Professor Savory upon the uses and value of the phonograph as an aid in the teaching of foreign languages has inspired some of the students of Queen's College, Belfast, with ideas. T. Edens Osborne, the well known Belfast factor, sends us a copy of an interesting monthly entitled Q. C. B., wherein we notice certain references to the talking machine, a direct outcome of the professor's lecture. Here is a sample:

"We have classical surroundings and a scientific zone,

A philosophic temper and an ultra-English tone, While we're taught to parlezvous upon the gramophone.

Comme on marche en avant."

First Amberolas Arrive.

Notice is given by the National Phonograph Co. that they have received a first supply of Amberolas and that orders will now be filled as quickly as possible. A further series of grand opera titles have been issued on the Amberol

The STROH VIOLIN

A new instrument possessing a VIOLIN TONE of great beauty and remarkable power.

The "Stroh" is constructed largely of aluminium, but the absence of any metallic quality of tone is another notable feature.

Musical Instrument Dealers and others interested should write for free descriptive booklet to the Sole Maker.

FROM OUR LONDON HEADQUARTERS—(Continued.)

record and these continue to receive strong support from the whole of the trade. The current issues for May are as follows: Standard Records—"Kelly Two-Step" (Murphy), and "The Cooks—Dance Grotesque" (Gabriel-Marie), by National Military Band. "The Old Grey Coat" (Hyson), Billy Williams; "The Green, Green Ribbon" (Mellor, Lawrance & Gifford), Miss Florrie Forde; "You're a Naughty Boy" (Clifford), Jack Pleasants; "Let's All Go Down the Strand" (Castling & Murphy), Stanley Kirkby; "A Chapter of Incidents" (Albert), Ben Albert; "Impudence Schottische" (Macey), Alex. Prince; "Don't Go Any Further" (Penso), Arthur Osmond; "Oh! What a Surprise" (Formby), Geo. Formby; "The Berlin Reel" (Scott Skinner), J. Scott Skinner; "Narcissus" (Nevin), Sousa's Band; "Christmas Time Seems Years and Years Away" (Snyder), Manuel Romain; "Some Day" (Gabriel), Miss Marvin and Mr. Anthony; "Come to the Land of Bohemia" (Evans), Joe Maxwell; "Just a Little Ring for You" (Morse), Miss Ada Jones and Billy Williams; "Under the Tent" (Daniels), American Standard Orchestra; "By the Light of the Silvery Moon" (Edwards), Miss Ada Jones; and "En Route to Camp March" (Sharpe), New York Military Band. Edison Amberol Records—"Belhegor March" (Brepant), National Military Band; "Abide With Me" (Liddee), Miss Violet Oppenshaw; "I Got Married To-day" (Mills and Scott), Jack Lorimer; "Just for To-night" (French), Pike & Kirkby; "Playing the Game" (Kendle & Formby), Geo. Formby; "Les Folies, Polka" (Waldtenfel), Alexander Prince; "For Months and Months and Months" (Tabrar), Arthur Osmond; "Mary (Kind, Kind and Gentle Is She)" (Richardson), Ernest Pike; "The Colliers" (Castling & Godfrey), Billy Williams; "H. M. S. Pinafore" (Sullivan), National Military Band; "The Bonnie Lass o' Bon Accord" (Skinner), J. Scott Skinner; "La Gipsy—Mazurka Ecossaise" (Ganve), Sousa's Band; "I Wish That You Was My Gal, Molly" (Snyder), M. Romain; "The Kiss

Waltz" (Arditi), H. Benne Heuton; "Beautiful Beckoning Hands" (Bryant), Edison Mixed Quartette; "By the Light of the Silvery Moon" (Edwards), Miss Ada Jones and Male Quartette; "Tho' Your Sins Be as Scarlet" (Doane), Stanley & Gillette; "I'd Like to Be the Fellow That Girl Is Waiting For" (Mills), Joe Maxwell; "To You—Waltz Serenade" (Czibulka), Vienna Instrumental Quartette; "Characteristic Negro Medley," Peerless Quartette; "The Cubanolo Glide" (Von Tiltzer), Collins & Harlan, with New York Military Band.

The Ideal List Competition.

In this month's Gramophone News, which, by the way, is now issued as a public organ at the price of a penny, particulars are given of the recent Ideal list competition inaugurated by the company—a competition which has resulted in a marked increase of sales all over the country. All who have participated, in particular gramophone traders, are unanimous in their praise of the scheme, because the interest aroused in the user and his ready co-operation lends color to the belief that for a considerable time ahead beneficial effects will be felt in consequence of the generous amount of publicity which the competition has enjoyed. The Gramophone Co., by their persistent advertising, duly manifest the necessity of keeping their goods prominently before the public, a condition of trading which spells "success"—ever the essence of progress. It remains for dealers to follow this wise example. Don't let the interest which this competition has awakened pass into oblivion; rather should you make it the basis of some strong local advertising and reap that advantage which follows a systematic and continuous investment in good newspaper space, booklets and other publicity ideas.

Mr. Thumens Leaves Symphonium Co.

We understand that Mr. Thumens, for many years managing director of the Symphonium Co., of Leipsic, has severed connection with the company.

The April Gramophone List.

Some seasonable impressions figure in the April list of Gramophone records issued in good time before Easter, an advantage which dealers obviously appreciated to the full. The following selections go to make up a list of unusual strength: "Chanson Triste; Chanson Humoresque" (Tschai-kowsky), "Lubly Lulu," Chopin's "Funeral March," and "Students' Songs," all by the band of H. M. Coldstream Guards; "The Pilgrims of Love" and "I Think," by John Harrison; "Land of the Almond Blossom," by Kennerley Rumford; "A Sergeant of the Line," Harry Dearth; "Arm, Arm, Ye Brave" (Handel), R. Radford; "Entreat Me Not to Leave Thee" (Gounod), Miss Edna Thornton; "O Memory," trio, Miss Percival Allen, Miss Alice Lakin and John Harrison; "La Czarina," concertina solo by Alex. Prince, and the following six hymns, all beautifully rendered by a mixed church choir: "Jesus Christ Is Risen To-day," "Onward, Christian Soldiers," "For Ever with the Lord," "Holy, Holy, Holy," "Days and Moments Quickly Flying," and "Now the Laborer's Task Is O'er."

An Interesting Legal Decision.

Judge Lumley Smith, K.C., recently had a very contentious case before him in that of Valentine vs. Ault, in which a traveler and commission agent sued a firm of merchants for the sum of £100, commission due after the termination of the agency. As will be seen the case is of much importance to employers and travelers. Plaintiff was engaged to obtain orders on 5 per cent. commission. He worked for defendants over two years and the agency was then terminated by notice. Plaintiff now urged that he was entitled to be paid commission for orders which came in after he left, because they were obtained by his influence. Counsel stated that that would amount to plaintiff receiving a pension for life and the claim was unreasonable. After giving a verdict in favor of defendants the judge said: "To entitle the plaintiff to commission after he had

ceased to be defendants' agent there must be a definite contract to that effect."

Some Excellent Beka Records.

Two more records, "Down Came the Blind" and "Never Let Your Braces Dangle," by Harry Champion, sung in his usual breezy style, appear in the April Beka list. Other good impressions are overture from "Mignon," parts 1 and 2, by the Beka London Orchestra; "Stone-Cracker John" and "Anchored," by Harry Thornton; "Kathleen Mavourneen" and "Killarney," by Philip Ritte; "Valse Bluette" and "Air on G String," excellent violin solos by Leon Sametini.

Punished for Receiving Stolen Goods.

On the 4th inst., before Mr. Wallace, K.C., William Heliot and J. Higgs, cycle makers, of Hackney Road, appeared to answer a charge of having feloniously received articles belonging to the Gramophone Co. J. Dennis, an employe of the firm, pleaded guilty of stealing the property and was put back for sentence. Without hearing the witnesses for the defense the jury unanimously returned a verdict acquitting Heliot and Higgs of any felonious intent. Judge Wallace said the case should never have been sent for trial.

Twin Record Co.'s Premises Robbed.

An instance of the daring impudence of members of the gang of thieves who employ themselves in the occupation of carmen, driving a van around London, with the evident intention of filling it by fair means or foul, came to light a week or so back. The center of attraction in this instance was the "Twin" Record Co.'s premises in Christopher street, to which the thieves drove up in their van and removed a case of records temporarily left in the passageway. Fortunately, owing to the presence nearby of some of the city detectives, four men were captured and duly received their deserts by imprisonment. In view of the prevalence of these cases it would be as well for merchants to keep a closer eye upon their goods when it is necessary to temporarily leave them outside. There should be a guard.

The New Zonophone List.

The Zonophone monthly lists of recent date are in matter of title, if anything, superior to those which have gone before, and this exercise of wise discrimination is all the more noticeable since W. Mausar took over the management of the Zonophone interests. A well-defined policy is at the bottom of it all, and I am not therefore surprised to learn that it has resulted in obtaining a real and ever increasing support from the trade generally. The following titles from the April list demonstrate to some extent the excellent fare now being offered: Seventeenth Grand Opera record, "La Donna e Mobile," "Rigoletto," sung by Ernest Pike, Thorpe Bates and Alvena Yarrow; Mendelssohn's "Wedding March," with church bells, by the Black Diamond Band; "Land of Hope and Glory," by Madame Edna Thornton; "Kaiser Friederich March" and "Druid's Prayer Waltz," by the Black Diamond Band; "The Fair Land of Poland," from the "Bohemian Girl," by Ernest Pike; "Rising Early in the Morning," by Harry Lauder, and "The Poets Song—La Bohème," by violin, flute and harp trio—excellent selections in every way.

Cape Town's Commercial Information Bureau.

His Majesty's Trade Commissioner in South Africa (R. Sothorn Holland) proposes to establish in connection with his office at Cape Town a bureau of commercial information in order that buyers in South Africa may readily be able to obtain the fullest possible information concerning goods manufactured in the United Kingdom. The bureau is not intended in any way to supersede existing arrangements between British firms and their South African agents or independent importers. On the contrary, persons in South Africa seeking information will be advised of the names of local firms stocking the particular goods about which inquiry is made. Communications on the subject should be addressed direct to His Majesty's Commissioner, P. O. Box 1,346, Cape Town.

AT THE LEIPZIG FAIR.

One of the Busiest on Record—Talking Machine Exhibitors Capture Good Orders—Beka Records Co. and Fritz Puppel Amalgamate—Some of the More Important Exhibits—Many Hornless Machines—A Novel Sideboard—English Orders Fall Off—Record Makers do Not Exhibit—General Review of the Fair from a Trade Standpoint.

(Special to The Talking Machine World.)

Berlin, Germany, April 2, 1910.

In contradistinction to last year, the recent Leipzig Fair held March 7-12 will rank as one of the busiest yet experienced. There were several novelties which attracted considerable curiosity, but that is about all that can be said, since for the most part they were of no practical value, simply freak ideas with which this trade in common with others is only too familiar. Everybody, however, was in an indulgent mood; in fact, a holiday spirit prevailed, owing no doubt to the magnificent weather experienced during the whole week, yet business in no wise suffered. As usual, very great interest centered in that part of the fair devoted to talking machines and the most important firms were the happy recipients of some large contracts placed by trade visitors, who attended in force from all parts of the world. Perhaps the most important event of the fair this year was the Beka Record Co.'s amalgamation with the Fritz Puppel concern, which aroused much speculative interest among the visitors. This new combination exhibited a very fine array of machines in tastefully designed cases at remarkably low prices, and they were very energetic in securing new buyers both for machines and records. A recent introduction to Continental traders, the new Beka 10-in. double record, selling under the very appropriate title of "Vene, vidi, vici" (I came, I saw and was victor), also came in for a deal of notice. A

FROM OUR LONDON HEADQUARTERS—(Continued.)

particular feature is that two selections are recorded on each side and, although this may appeal to many, I am of the opinion that the idea is not one which would justify a strong attack upon the English market, and, as a matter of fact, I understand that there is no intention of doing so at present.

Carl Lindstrom's Exhibit.

Carl Lindstrom's exhibition of goods in Peterstrasse attracted more than ordinary interest by reason of the fact that, extraordinary as it may seem, the firm's display included over 200 different designs in machines alone. Many of these are of quite recent introduction, notably the new styles in interior horn cabinet instruments and portable machines ranging in price from 15s. up to £15 odd. The former are indeed beautiful models, and needless to say they proved to be much in demand from buyers located in the chief cities of the world. The company's new motor, too, was undoubtedly the talk of the fair, and visitors were loud in their praise of its originality, strength and beauty of construction. A brief description may not be out of place. All the parts of the motor are entirely encased in metal, and as additional protection the spring is separately enclosed in a barrel of the usual pattern. This outer case is so made as to be easily detachable when necessary. Only hardened metals are used in its construction, and the scientific assembling of the parts insures that smooth and silent running upon which depends an even revolving of the turntable. I would mention that the largest motor will play ten 10-inch records with one winding. Some index of the enormous business the firm are doing is found in that so far this year their turnover is far ahead of even time last year, a matter for congratulation in these days of keen competition.

Another Interesting Display.

Another very excellent display of machines was that of the Excelsiorwerke concern. Here various new designs were noticed, and better

still, bought. Altogether the week's trade was highly satisfactory, and some nice contracts were placed by foreign buyers.

Many Hornless Machines.

It was noticed that a very large proportion of the machines exhibited this year were of the (so-called) hornless type showing improvements of a satisfactory nature. The opinion is held in some quarters that these hornless machines are making such good progress as to seriously threaten the influence exercised in trade circles of the horn variety.

The Pathe Freres Showing.

Pathé Frères, of Paris, had a very fine exhibition. They were showing an extensive array of their sapphire machines and records, which was the center of attraction for some of the largest home and foreign buyers.

There were also endless varieties of needles, and most, if not all, the leading continental makers were kept busy satisfying the inquiries of real and prospective buyers from all parts of the world.

Other Details of the Exhibition.

One would think that every conceivable shape and design in horns had been exhausted by the irrepressible continental manufacturers. But such a thought was at once dispelled by an inspection of the fine display of trumpets in Peterstrasse. There were some entirely new and well-balanced types to be seen, and the ingenuity and intelligent foresight thus expressed in these models deserves much credit. Some substantial orders were placed. There were no English displays, and we therefore cannot take any credit for the noticeable fact that our German friends did not have it entirely their own way. Some of the leading manufacturers from Switzerland were there, and their motors particularly were very much admired by all who saw them. Among those whose exhibits deserve mention were Messrs. Palliard, Mermod Freres, and Herman Thorens.

Krebs & Klenk report a most satisfactory demand for their well-known series of Klingsor machines. These appear to be capturing the popular fancy very much, and I am therefore not surprised to learn that their export business has materially increased since the Leipzig Fair. The names of English visitors who went over appeared in our last issue.

One of the most novel models shown was in the form of a sideboard for the dining room with a disc machine mounted upon it. Two of the drawers were also equipped with reproducing devices operated through wire connection with the main machine on the top, thus greatly increasing the volume of sound. While the device worked very well, it did not seem to appeal to any great extent to the buyers, as it was conceded that while the idea might prove desirable for public rooms, it did not fit into the private dining room for which the style of sideboard was best suited.

Though the various exhibitors complained loudly of the keen competition and the closeness of prices they were obliged to overcome, nevertheless, in practically every instance, they secured a much greater number of orders than was the rule last year, though it is claimed that orders from England were far behind the average.

The manufacturers of records and discs did not take part in the fair. They took the view that dealers attending the fair have not the necessary leisure to hear new discs; they are also only too willing to send any dealer a collection of sample discs, which he can try at his ease in his own place of business. Then again the manufacturers of talking machines demonstrated all the well known makes of discs in connection with their machines. The expenses connected with taking part in the Leipzig Fair are certainly considerable, but, on the other hand, it must not be forgotten what advantages are to be derived therefrom, inasmuch as a manufacturer is able to get into personal touch with his customers

THE PHONOGRAPH AS A TEACHER.

Prof. Savory, M. A., of Queens University at Belfast, Ireland, Recently Delivered a Most Interesting Lecture in Which He Demonstrated the Important Place of the Phonograph as an Educator and in the Teaching of Modern Languages.

For some years now we on this side of the "big pond" have been familiar with the use of the phonograph as an almost invaluable aid in the teaching of languages, and through the efforts of the National Phonograph Co. and the International Correspondence Schools, as well as others, the use of the phonograph in that connection is no longer an experiment to be wondered at but an actual and accomplished fact.

It seems, however, that our British cousins have not given this use of the talking machine the attention it deserves, but the recognition of its value is slowly though surely spreading, aided largely through the efforts of a number of enthusiasts among both the talking machine dealers and the teachers of languages.

Early last month, for instance, Professor Savory, M. A., professor of French and Romance Philology at Queen's University at Belfast, Ireland, and an educator of note, delivered a most interesting lecture, under the auspices of the University Physical Society, upon "The Use of the Phonograph in the Teaching of Modern Languages." The lecture created a profound impression. He said:

Of the many tempting problems for the consideration of those who are interested in the study and teaching of modern languages I have chosen one which up to now has not yet received the attention it deserves—the use that can and should be made in the teaching of modern languages by a talking machine such as the phonograph.

The question that first confronts us is the place that should be reasonably accorded to the phonograph in modern language study and teaching. With regard to this, I wish to say most emphatically at the outset that it is my firm belief that the highest aim of modern language teaching in our secondary—as apart from technical and commercial—schools should always be the imparting of literary training and culture, that modern languages should become for this twentieth century a kind of new humanism not inferior in its refining and elevating powers to the great influence that was once exercised by the old humanities of the Renaissance.

By the side of this most important literary training, that is mainly, although not exclusively, obtained by reading, by the study of the great classical writers of past and present times, the great importance of oral training must not be overlooked.

We cannot rest satisfied with the training possessed by a man who can perhaps easily read a monologue occurring in a play of Corneille or Victor Hugo, but who pronounces the names of the poets Corneille and Voogoo, and is unable to understand (or to answer) a single sentence addressed to him by a Parisian with whom he may have correspondence for years.

The modern methods of language teaching aim at training the ear and the speech-organs no less than the eye, and there are now various devices, unknown 20 years ago, of improving the oral training of modern language scholars, students and teachers.

One of these is the way of training the ear by recitations given by particularly eloquent actors. Several competent Frenchmen and Germans are now traveling in England and are giving, in schools and at evening lectures, highly appreciated recitations of select passages in their mother-tongue.

This way of hearing foreign languages, as they are spoken by recognized masters of speech, is certainly as helpful as it is enjoyable. But these recitations will always be rare—they are expensive and not easy to procure. They can only take place at long intervals, and will consequently always be an extra—an occasional treat. They cannot form a regular part of school instruction, and it must also be borne in mind that such recitations by professional speakers cannot be heard over and over again, they cannot be repeated at the will of the student, above all they cannot be interrupted, analyzed and discussed.

All this is, however, easily done in the case of some mechanical contrivance such as should before long be the property of every good secondary school, a modern talking machine like the gramophone or the phonograph. Both instruments are very similar in their use.

After going into a description of the mechanical and scientific principles of talking machines, their construction and reproduction, Professor Savory continues:

It cannot be doubted that the frequent hearing of passages of literary excellence, as spoken by a master of speech, if well reproduced by a good phonograph, must prove a valuable stimulus to learners. By the frequent repetition in exactly the same way of exactly the same words and sentences a steady training of the ear is secured such as cannot be obtained in any other less uniform way. Like a good book, the phonograph invites us to repeated study. It is heard to the greatest advantage in a small private room, a drawing-room or a study, and also in a small class room for about 25 to 30 pupils. But the instrument is really not calculated for a large lecture room such as this. Another inevitable drawback in a public lecture is that it always must take some time for the ears of the hearers to become fully accustomed to the room and to the machine. You ought really to hear each record several times, at least twice, to do it justice. This disadvantage, which is unavoidably connected with a lecture, does not exist in the study or the classroom.

In the case of a phonograph we only hear, but we see nothing, or merely a sheet of printed paper with the recited text before us. The eloquent mouth, the expressive eye, the helping gesture of a good reciter are all absent. This is a decided loss, and gives to the phonograph a certain unpleasant coldness. Everyone knows how

About Needles

One of the most important matters in connection with the development of the talking machine business to-day is the sale of a talking machine needle that is correctly made—made by the greatest authority in the world—a needle, the POINT of which is warranted and which insures the best reproduction for each individual quality of tone—a needle that doesn't wear out the record; that preserves its life, and always gives forth the very best quality of tone that is contained in the record. Such a needle is the

CONDOR

It has the highest and most perfect finish, the smoothest grain, and gives unexcelled satisfaction.

Why not get the customer who purchases a high-grade and a high-priced talking machine to buy needles of the highest quality, such as the Condor?

One cannot be satisfactory without the other.

We shall be pleased to give the fullest information to all interested. Address .

much the understanding of a passage is helped by the play of the features, hands and shoulders, how well we generally understand the dumb language of a pantomime. If we are engaged in a lively conversation with a man, we see him speak no less than we hear him. There cannot be any doubt that the living word of the living native who speaks his own language with artistic perfection is the ideal to which the phonograph can never approach. But then it must be asked: How often can the average schoolboy have such a treat? Again, a very clever and interesting man may speak very badly, too quickly, too indistinctly, without ever opening his mouth or moving his lips, or without taking the trouble to raise his voice or to articulate his words and phrases. Such cases, as we all know, are not uncommon. Even teachers, small I add, even modern language teachers, for whom there is less excuse than for anybody else, are not invariably free from these blemishes; are sometimes good scholars but poor speakers.

Here the phonograph comes in. It always speaks well and with spirit, it does not mind being interrupted or made to repeat itself over and over again. Its speaking capacity and its patience are alike inexhaustible. If we make our own records—as is perfectly easy with a phonograph—this has the advantage that by means of it, provided we have a good ear and some phonetic training, we may detect the defects of our pronunciation of our own as well as foreign languages. The instrument takes instantaneous and faithful snapshots of speech sounds and fixes them for many years. It is as honest as a mirror and as outspoken as a true friend. It has never yet stooped to flattery, it shows us as we are. It allows us to hear ourselves as others hear us, and also to hear others who are bodily far away from us, at any moment we wish, and in any place, and for any length of time. Thus you see, if a teacher can never be superseded by the instrument, he can yet be very materially helped by it. It saves his voice, his strength, and also his time, as it relieves him from the monotonous but necessary task of constantly repeating to the class the same sounds and phrases.

The various uses to which the phonograph may be put in the teaching of modern foreign languages are the following:

Above all it is helpful in teaching the proper intonation of connected speech, the right phras-

ing of groups of words, and the idiomatic play of the stresses. The faithful exhibition of the idiomatic foreign intonation is even more important than mere correctness in pronouncing individual foreign sounds. It must be admitted that—at least at present—a few sounds are not yet reproduced by the machine with absolute perfection, a difficulty which can be partly met by altering the pitch of the machine, though this may have to be done at the cost of a slight deviation from the natural pitch of the voice. No such reproach can, however, be made against the phonograph with regard to intonation, which is in all cases remarkably well reproduced.

In first-rate records, and only such should be employed, the articulation of each single word can also most profitably be studied. Lists of model words should be drawn up and spoken into a good machine—records should thus be obtained giving examples of difficult sounds, combinations of sounds or words, such as the French nasal sounds, the English impure vowels, the German modified vowels or the voiceless palatal or guttural spirants (loch, tuch, tücher, küchengerüche), or the peculiar German glottal stop, such as is heard in abändern, durchaus, allüberall, Oberammergau. Such difficult sounds must be repeated over and over again, in many lessons, slowly and distinctly. This is quite easy, as the machine can be stopped after each word and put back again for repetition.

It is also a great help to precision; for the precision of the machine impresses upon the student the importance of precision in speaking. For elocution the phonograph is evidently very helpful, as it allows students who have few or no opportunities of hearing great speakers or actors to study model records spoken by them. Certain meters, for instance the stately blank verse, the splendid roll of the hexameter, and the expressive, rugged old ballad verse, can be studied to perfection in good records. One drawback in some of them is caused by the fact that records must inevitably be rather short—hence, in the endeavor to get as many words as possible on one cylinder, the record makers sometimes curtail the natural pauses between certain words more than is desirable. Those who make records for their own use or for the use of their classes, should beware of speaking too rapidly. Most cylinders easily take what can be spoken in two and a half or three minutes, which time is

sufficient for many small poems or the important parts of dramatic monologues.

Teachers who use the phonograph in class will obtain the best results if they allow the scholars to have the text before them, in order to follow the words that are spoken by the machine on the pamphlets that should be given to each pupil. Thus the eye and the ear are trained at the same time, while until recently appeal was made almost entirely to the eye. It is also desirable that the student's ears should become accustomed to hear in a number of varied records the different voices of different speakers, and thus not be limited, often for years, to the one voice of his school teacher. The greater the variety of speakers, the more useful is the practice afforded. Dictation of pieces of foreign prose may also not unprofitably be given by means of the phonograph.

Apart from speaking the machine can also be used for records of singing. English nursery rhymes and ditties, French chansons, and German Volkslieder may with little trouble be obtained for use in the classroom, and will, if judiciously used on proper occasions, give variety to a lesson. They may even be used in teaching pupils to sing the foreign songs, and they may also be given to specially interested pupils during leisure hours. Much depends upon the skill and resourcefulness of the teacher, who can, by means of characteristic foreign songs, initiate his pupils into the understanding of some of the most characteristic manifestations of foreign life, feeling and thought.

In discussing in this lecture the use of the phonograph for the teaching of modern languages, I have mainly referred to its manifold uses for the school teaching of English, French and German.

But, apart from school teaching, there are the uses of a good talking machine for private study, on the one hand, and for university teaching and scientific research on the other.

Private students with no means of hearing foreign languages well spoken by natives can first of all learn the sounds and the intonation of the foreign idiom from a number of well-chosen records. They may afterward proceed to making their own records, and constantly compare their utterances with those of their models, noticing and accounting for any discrepancy, and cor-

FOOD FOR THOUGHT

The Fibre Needle is a "GOOD" needle, because it neither scratches nor cuts the record.

It is a "BETTER" needle, because it does not and cannot injure the record.

It is "THE BEST" needle, because it reproduces the natural or musical tone quality of both instrument and voice.

The Fibre Needle is in every sense of the word a "superlative" needle, because it conveys an element of elegance, refinement and daintiness hitherto unknown in phonographic reproductions.

It is a "commercial" needle, because it is the only needle that has proved a factor in the Talking Machine business, that has created sales of high priced machines and records, that has instilled interest and enthusiasm in customers.

It is a "business proposition" needle, because it will bring you more dollars directly and indirectly than thousands spent in advertising.

We know whereof we speak.

PHILADELPHIA, PA.

(Continued from page 20.)

recting themselves by means of the models. Thus the phonograph may become an invaluable self-corrector for the student, who, by dint of perseverance, will, with the help of it, gradually bring his pronunciation and intonation to a high standard of excellence.

Finally, in a university city like ours it would be wrong not to point, at least with a few words, to the manifold uses that can be made of the phonograph for the purpose of higher study and scientific research. At the university we are able to proceed to the more careful analysis of the ordinary and the elevated speech of the principal European nations, and also to the study of the sounds and intonation of the various Asiatic and African peoples. With the aid of the phonograph philologists are no longer dependent on the accounts and transcripts of travelers, missionaries and other untrained observers. The phonograph also enables us to give students at the university specimens of the principal dialects of the lan-

guages the literary forms of which they study in so much detail. The phonograph allows us to produce the same English passage as pronounced by a Cockney, a man from York, from Aberdeen, from New York, or Germany as spoken by a Bavarian, Swiss, Saxon, Hanoverian or Berliner. And again, in reconstructing the pronunciation of former generations for scientific purposes, how useful would it be if we had records of a monologue from Shakespeare as he spoke it, or Molière as he spoke it. We should then not only know their peculiar accent and pronunciation, but we might occasionally even know how they themselves spoke certain contested lines of their own works, e. g., how Goethe himself recited the much-discussed line at the beginning of "Faust":

"Und sehe dasz wir nichts wissen können."

Alas, in the case of Goethe, Molière and Shakespeare, let alone Chaucer, Chrétien de Troyes and Walther v. d. Vogelweide, nothing can be done any more, but there is no reason why we should not preserve for future genera-

tions the voices, and above all, the characteristic way of speaking, of some of our prominent contemporaries.

* * * *

Prof. Savory's interesting lecture was duplicated at a later date at the Municipal Technical Institute in Belfast. Thomas Edens Osborne, the prominent talking machine jobber of that city, co-operated with the professor to some extent in order that his lecture may be made successful, so far as the reproduction of phonograph selections are concerned, by means of an Edison phonograph, to which was attached a trumpet fifty inches long with a large bell.

These lectures and demonstrations of the talking machine have aroused the enthusiasm of both teachers and students and have resulted in much permanent good. As a matter of fact, Mr. Osborne sold a number of Edison phonographs and French language records as a direct result of Prof. Savory's valuable lecture. Mr. Osborne has furnished talking machines and records to several educational institutions in the North of Ireland for the purposes of language study and reports that the innovation has proven successful in every instance. He strongly advocates the listing of more records in different languages by the various manufacturers as an aid to teachers in their work.

CONCEALED HORN MACHINE SUITS.

One Suit Just Decided and Three More Now Pending in the Courts, Between the Big Manufacturers—Some Important and Interesting Points to be Decided—Details of the Cases for Benefit of Those Interested.

(Special to The Talking Machine World.)

Philadelphia, Pa., April 5, 1910.

Friday last a perpetual injunction was issued by Judge Lacombe, United States Circuit Court, New York City, in the case of the Victor Talking Machine Co., Camden, N. J., against Jerome Duke, "sued as 'Henry' Duke, the name Henry being fictitious," 275 West street, New York, for price cutting on Victor goods. The order was served the following day by the United States marshal.

The Victor Co. have brought suit—No. 117 on the calendar of the United States Circuit Court, southern district of New York—against the American Graphophone Co. (Columbia Phonograph Co.) for infringing reissue patent No. 13,069, issued to Elbridge R. Johnson, president of the first-named concern. The patent in question relates to the manufacture and sale of an alleged imitation of the Victrola cabinet or concealed horn machine. This invention of Mr. Johnson's was taken out January 4, 1910, and three days later the bill of complaint was filed. An answer has been made by the defense.

Another case—No. 127 on the calendar—has been instituted by the Victor Co. against the American Graphophone Co., etc., in which infringement of patent No. 946,442, also issued to Mr. Johnson, is charged. This invention, according to the specifications, relates "more particularly to improvements in that class of talking machine in which the actuating mechanism and amplifying means are enclosed within a cabinet." This patent was issued January 11, 1910, and three days subsequently the complaint was filed in the Federal Circuit Court, New York City.

It will be remembered that on February 18 the American Graphophone Co. filed a bill against the Victor Co., charging the latter with infringing their Phillips cabinet machine patent. From the foregoing citations from the court records it is certain the legal fight between these two big companies over the concealed horn cabinet proposition is now on in earnest. Preliminary injunctions are sought in each of these cases, and it is probable the taking of proof will consume considerable time before they reach court for final hearing.

When precedent and progress clash, drop precedent.

A HANDSOME DEPARTMENT.

That of the Bailey Co. in Cleveland—Elaborate Soundproof Rooms Provided—Carry Complete Stock of Victor, Edison and Zonophone Lines.

(Special to The Talking Machine World.)
Cleveland, O., April 9, 1910.

One of the finest talking machine departments in this city is that of the Bailey Co., under the management of E. A. Friedlander. The main showroom where the machines are attractively displayed is flanked on one side by a series of handsome glass-enclosed soundproof booths for the purpose of trying out machines and records. An exterior view of the booths or record rooms

is shown herewith and gives an excellent idea of their beauty.

Manager Friedlander reports a most satisfactory business in his department, with a rapid increase in the sales of both machines and records. The demand for the Red Seal records is especially strong, and with the opera season under way in this city it is expected that the demand for that class of records will show a rapid increase. The Bailey Co.'s department handles the Victor, Edison and Zonophone lines and carries a complete stock in each.

THE "NEW IDEA" CABINET.

An Unique Style Cabinet for Disc Records Put on the Market by a Milwaukee Firm—Each Cabinet Equipped with Four Tops to Fit Different Styles of Victor Machines—Other Original Features.

(Special to The Talking Machine World.)
Milwaukee, Wis., April 9, 1910.

A decided novelty in the way of disc record cabinets has been put on the market by the New Idea Cabinet Co., of this city, it being designed to enable the dealer to carry a complete line of cabinets at a minimum outlay.

The cabinet is known as the "New Idea" cabinet and is built along very original lines, each cabinet being equipped with four different interchangeable tops designed to fit the different forms of Victor machines Nos. I, II, III, IV, or V. In other words, with one cabinet and three extra covers the dealer is in a position to supply any owner of a Victor machine with a cabinet to match his machine. The manufacturers claim that ten of the new cabinets will constitute a complete stock for the dealer and will meet the demands as well as a stock of 100 of the ordinary styles of machines.

The sliding record files, which can only be drawn out far enough to permit removal of records and which cannot possibly fall out, is another practical feature. It does away with the inconvenience of having to kneel down to find what you want or removing and placing the file on a table or chair in order to get a record. These files, which have fifteen indexed file leaves each, are faced and finished in oak or mahogany to match the finish of the cabinet. There are twelve files holding fifteen 10-in. or 12-in. records each, giving the cabinet a capacity of one hundred and eighty records.

Wm. Schmidt, who for some time was connected with the Victor Talking Machine Co. as traveling salesman through Wisconsin and

northern Michigan, devised and patented this cabinet and is now superintending the manufacture of same for the New Idea Cabinet Co.

A large sale is predicted for this "New Idea" cabinet, and it is the manufacturer's purpose to sell through the jobber only and protect the selling price by contract. It would be well for all live jobbers to get in touch with the manufacturer at once and secure further information regarding this cabinet.

In an advertisement on another page the "New Idea" cabinet is illustrated and described at length.

S. B. DAVEGA RETURNS IN JULY

From an Enjoyable Visit to Seattle, Wash.—
In Talking Machine Business to Stay.

S. B. Davega, president of the S. B. Davega Co., New York, under date of April 3, sends to The World the appended information from Seattle, Wash.:

"My attention was called to a statement appearing in your last issue (March) to the effect that I was in Spokane, Wash., and if certain deals were consummated would take up my permanent home there. In this connection I wish to state that I am not in Spokane nor have I ever visited that city, nor do I intend to remain away longer than next July.

"I am at the present time in Seattle, Wash., having first visited the West during the summer of 1909, on the occasion of the Alaska-Yukon-Pacific Exposition. There I was fortunate enough to make a real estate investment that has proved its value; in fact, the offers received during the month of February, while in New York City, induced me to revisit Seattle, and offers were renewed which I have since declined. I can assure you and the trade generally that I am in the talking machine business to stay.

"I have no fault to find and no complaints to make in any manner whatsoever, as our business for the months of January, February and March of this year has been the largest of any corresponding months of any other year since we have been in business; and, if present indications are to be relied upon, this will be our banner year.

"With best wishes to all in the trade, and hoping this will prove a prosperous year to all, and with kindest regards to you, I beg to remain,
"Respectfully yours,
S. B. DAVEGA."

DEALERS SHOULD MAKE NOTE.

The National Phonograph Co., Orange, N. J., in the Edison Phonograph Monthly for April, publish the following caution to dealers and jobbers:

"The necessity of specifying on your orders at all times, whether or not Amberol or Standard records are intended, grows more urgent with each addition to the Amberol catalogs. The numbers in both the domestic and foreign Amberol lists are duplicating those in the Standard lists, and the duplication will become more common as the Amberol supplements increase and the Standard decrease in number.

"Of course, it is expected that eventually the Amberol records will entirely supplant the Standards, but until that time it will be absolutely necessary, in order to avoid possible confusion and delay, that every order to jobbers and to the factory shall distinctly specify whether or not Amberol or Standard records are wanted. Jobbers are requested to impress this necessity upon their dealers, and the latter are urged to paste a reminder in a conspicuous place for guidance when making out orders.

Frank Dorian, formerly connected with the Columbia Phonograph Co.'s recording laboratory in New York City, is now president and general manager of the Dictaphone Co., vice J. W. Binder. This concern handle the Columbia Co.'s commercial machine exclusively.

A series of Neapolitan songs recorded in Italy have just been received by the export department of the Columbia Phonograph Co., General.

The secret of getting trade and holding it.

Keep that motto before you all the time and you're sure to come out at the right end of the horn.

Keep your stock right up to the minute. Don't be "just out" and give your customer a chance to go elsewhere if you can help it.

When a customer comes to your store at all, he should be counted as one of your regular customers. *He will be* if you take care of him properly and give him what he wants. If you happen to be out, you ought to know where to get what you want without delay.

We're ready to help you get trade and hold it. Anything you want in Victors, Victrolas, Victor Records, record cabinets, horns, needles, fibre cases or other Victor accessories you can get from us quickly.

We won't keep you waiting for the goods. We won't fill you up with promises and make it necessary to stand your customers off. We will fill your order at once—goods are always shipped the same day the order reaches us—and send it to you as fast as the railroads will carry it.

Let us send you copies of our latest catalog and our booklet, "The Cabinet That Matches," which tells about our record cabinets that match perfectly each style of Victor.

Write us to-day.

SHACKLETON'S PHONOGRAPH RECORD

The Experiences of the Famous Explorer, Who Came Near Reaching the South Pole, Recorded for National Phonograph Co.—Ready for the Trade on April 20.

The sales department of the National Phonograph Co., on April 9, 1910, mailed the following bulletin to their dealers:

"We are pleased to advise that we have made a record, with a short story, of the experience of Lieut. E. H. Shackleton and which will be ready for shipment from the factory on or about April 20. From the immense and enthusiastic audiences which have greeted Lieut. Shackleton on his various public appearances, we believe the experience he has recited for us regarding the south polar expedition (and which will not appear on any other talking machine records) will prove a great seller and which may be placed on sale as soon as received. List price, 50 cents. It will be listed as Amberol Record No. 473. This above price will be subject to a special allowance to obviate any possible demand for replacement or further allowance for breakage.

"Lieut. Ernest H. Shackleton, of England, is scarcely less famous as an Arctic explorer than our own Peary. Lieut. Shackleton did not actually get to the south pole, but the feat of his

party in reaching a point only ninety-seven miles distant from it is second only to the discovery of the north pole. The knowledge of the Antarctic regions gained by Lieut. Shackleton's expedition is of the greatest importance to science and history. On this record he gives some of the privations of his party and he tells of some of the dangers that beset them on all sides. It is a notable record made by a notable man.

"At a dinner given in New York recently ex-Ambassador Choate, in an address to Lieut. Shackleton, said: 'America has no lack of Arctic explorers of its own, real and pretended. It has a profound admiration for all the explorers of other lands, especially of the mother country. You have come to a people of 80,000,000, all eager to hear the story of your great career. It is only twenty years since you left Dulwich College and entered the merchant marine. Now you are known everywhere and honored everywhere. Not the least part of your achievement is that you have aroused no envy, no inquiry, no criticism. We ask our own explorers to submit to inquiry and investigation. We take your own word for your thrilling story.

"For 127 days you took your life in your hands. You came back starved and exhausted, but you brought every one of your men with you and you have been within 100 miles of the south pole. The Stars and Stripes float over the north pole. It is only fair that we should leave the field open for the hoisting of the Union Jack at the South."

Lieut. Shackleton was on March 23 presented with the Cullen geographical medal by the American Geographical Society.

A GO-AHEAD BANGOR DEALER.

M. H. Andrews Building Up a Big Victor Business in His Town.

(Special to The Talking Machine World.)

Bangor, Me., April 6, 1910.

M. H. Andrews, of this city, reports that they are doing a tremendously big business in their section of the country on Victor goods, and they say that their country is only beginning to realize the fine qualities of the Victor product. R. W. Simpson, manager for the M. H. Andrews house, speaks in a very optimistic view of the rapid growth of their business, and they feel that the coming season will be the greatest of their industry. They complain, however, as all other jobbers, of the difficulty experienced in getting sufficient goods from the factory. Mr. Simpson has recently put on the road J. S. Hanley to look after the interests of their wholesale business, and it is safe to say, from his energetic spirit, congenial manner and exceptional ability, that he will prove a very valuable addition to the Andrews house and to the general trade.

COLUMBIA RECORDING IN CHINA.

The recording laboratory of the Columbia Phonograph Co., General, at Hong Kong, China,

under the personal supervision of John H. Dorian, occupies an entire building. The native talent is obtained through compradors or commercial agents, and are lodged at the laboratory until the work is through. Tea is supplied the artists by Mr. Dorian, which is about all they need, with the exception of a little rice. Bunks line the walls of the place, and the singers are idle or record as they are required. The company recently received a lot of masters from Mr. Dorian, which Mr. Burns says are the finest ever recorded in the Orient.

BRIGHTSON AT THE HEAD

Of the Sonora Phonograph Co., Whose Products Are Now Being Introduced to the Trade—Other Well-Known Men Interested in This Enterprise.

George E. Brightson, president of the Sonora Phonograph Co., 76 and 78 Reade street, New York, for many years connected with the H. B. Claflin Co., where he built up and managed the

GEO. E. BRIGHTSON, PRESIDENT SONORA PHONOGRAPH CO.

novelty department until his retirement from business, is a typical New Yorker. A man of large affairs, he is besides broad-minded and has a pleasing personality.

The other executive officers of the Sonora Phonograph Co. are William H. Hoschke, vice-president and general manager, and William E. Hoschke, secretary and treasurer. In addition to its plant for manufacturing talking machines and its well-appointed show rooms, the company owns a fully equipped and carefully manned laboratory for the recording of master records. Their line is presented to the trade for the first time in this issue of The World in two full pages (12 and 13).

Talking Machine Dealers ATTENTION!

Here is a "hot-weather" BUSINESS STIMULATOR. BIG SALES—BIG PROFITS are within your reach if you represent us on the

ICY-HOT

bottle in your territory. Your customers are in need of the "ICY-HOT" in their homes, on their travels, when camping, automobiling, fishing and in a hundred different useful ways. A PROFITABLE SIDE LINE FOR YOU TO CARRY. The "ICY-HOT" bottle is guaranteed to keep contents either steaming hot for 24 hours or ICY cold for 72 hours. Write for our SPECIAL PROPOSITION to represent us in your city. Illustrated booklets for the asking.

PROFIT BY GRAND OPERA TOUR.

Talking Machine Dealers in the West Exploit Records Made by Artists Appearing with Metropolitan Company—How Some Slow Dealers Let the Opportunity Pass By—Neglecting to Take Advantage of Great Advertising Campaigns—A Business with Large Profits and a Big Future.

The tour of the Metropolitan Grand Opera Co. to the West is being taken advantage of by a great many dealers to exploit the records made by the artists of this great organization. It is an excellent opportunity to win public interest in these records and in their store. Window displays have been a help in this connection as well as the concerts given during or before the various productions.

Now an important point arises in this connection and it is that while a great many dealers have availed and are availing themselves of this splendid chance to do some very impressive and effective advertising—advertising that not only accrues to the benefit of themselves, but to the goods which they handle—many other dealers seem to be indifferent to such splendid opportunities.

It matters not how small the dealer's store, or how humble the locality in which he resides, a love of music prevails everywhere, among the poor as well as the rich, and it doesn't follow that because the locality is not a fashionable one that people are not interested in grand opera, and in the records of the artists connected therewith.

Dealers should be alive to such opportunities as this at all times, and in this way feature their line of goods.

There is no other business in the world where dealers are provided with such quantities of appropriate and non-expensive advertising as in the talking machine field. Every time a great artist appears in opera or in concert, and his or her record is handled by the dealer, he must be indeed slow not to make strenuous efforts to inform his purchasing public that this great artist can be heard just as effectively in his store as in the opera house or concert hall.

The dealer who does not take advantage of such an opportunity should retire from business and give somebody else a chance.

We know of no other business in the world where the manufacturer does so much for the dealer as in the talking machine line. New ideas and "tips" of all kinds to develop business are sent out from the factories week after week, and notwithstanding all this there are to be found dealers who absolutely do nothing out of the ordinary to attract new trade.

Of course this condition of things cannot be tolerated.

The live people are doing the business, and the slow ones are gradually drying up with the result that they will make their exit off the business stage in due course.

Opportunities for the live man in the talking machine business exist on all sides.

There is a good profit and a big future in the business for those who are awake to its possibilities and cooperate with the manufacturers in developing trade.

E. N. BURNS' NEW DUTIES.

Will Spend Part of His Time Looking After the Making of Columbia Master Records in New York and Machines at Bridgeport.

Hereafter Edward N. Burns, vice-president of the American Graphophone Co. and manager of the insurance and export departments of the Columbia Phonograph Co., General, will devote half of his time to supervising the making of masters at the recording laboratory in New York and the manufacture of records and machines at the Bridgeport, Conn., factory. In other words, he will look after the general product of the company with a view of maintaining the highest possible standard of excellence in the various lines of goods bearing the Columbia brand.

Mr. Burns has always been a stickler for

quality in respect to the product handled by the export department, which has been the means of building up a large and ever expanding trade for the Columbia company in the Spanish-American countries and the Orient. The methods followed so successfully in his special field will be transferred to the widest range of articles in the company's service.

NEW CARUSO VICTOR WINDOW DISPLAY.

(Special to The Talking Machine World.)

Philadelphia, Pa., April 8, 1910.

The Victor Talking Machine Co., Camden, N. J., in sending to the trade the special letter and illustrated circular relating to their ready-made "Window Display, No. 16," describe the "rich and artistic" Caruso window display as follows:

"A life-size figure of Caruso in the character of 'Cavaradossi,' in 'Tosca,' with palette and brush standing beside an easel on which rests a framed announcement of his twenty-five-year contract to make records only for the Victor. Note the artistic plainness of this display and how thoroughly in keeping with the quality of the Victor and the Caruso records. Remember—Caruso is one of your biggest drawing cards. His name is the biggest attraction in the whole world of music, and the Caruso records, solos, duets and concerted numbers are all so perfect that you are sure to increase your Victor sales and add to your prestige by immediately ordering

one of these window displays and inaugurating a special Caruso selling campaign." The company also give notice that these goods are shipped strictly in the order in which they are received.

BARKELEW IN CHARGE.

E. A. S. Barkelew, one of the veterans of the business, has taken the general management of Stanley & Pearsall, Victor distributors exclusively, 541 Fifth avenue, New York.

"GETTING THE STRIDE" IN BUSINESS.

When a trainer is coaching a man to make him a successful foot racer one of the first essentials he drills that man on is to get his stride, so that he can start in right and be working to the best possible advantage every minute he is in the race. In business get your stride. In social intercourse get your stride. Once it is secured you will work to the best advantage, and you will get the best results of which you are capable.

AN INTERESTING ADDRESS.

At a late meeting of the Eastern Talking Machine Co. Associates, Boston, Mass., S. J. Freeman, a salesman, delivered an address on the different types of Victor machines. It was listened to attentively and its educational worth favorably commented upon.

IMPROVE YOUR SYSTEM

AND

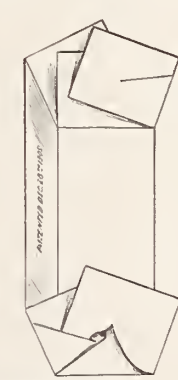

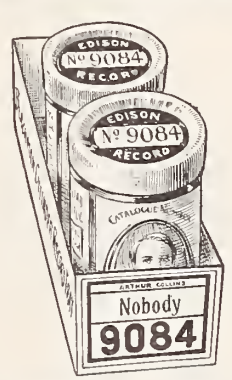

INCREASE YOUR RECORD SALES

BY USING

THE BLACKMAN CYLINDER RECORD TRAY

(Patented Dec. 28, 1909.)

A Record Tray With Record Label for Less Than One Cent

The BLACKMAN Folding Trays for Cylinder Records are shipped FLAT and can be FOLDED into STRONG TRAYS in a few seconds, as shown above. This tray, with Rapke Label, makes a handsome looking record stock and a system you can't beat. The labels act as Silent Record Salesman and the customer can point to the record he wants to hear. Adopt this system and your sales will not only increase but it will never take more than a few minutes to make up a Record order.

THE BLACKMAN FOLDING TRAY USED IN THE SYRACUSE WIRE RACKS enables you to carry a large stock in a small space, and also use the Rapke Label. We furnish wire racks at regular prices, either wall or revolving style, with opening to accommodate Blackman Trays. Write for prices.

TRADE IN THE CITY OF CULTURE.

Spring Business Opens Up Well—Extensive Advertising and Live Methods Make for Record Season—Boom in Grand Opera Records—Eastern Co.'s Quick Service—Their Telephone Coupon Books—Excellent Ditson Trade—Strong Demand for High Grade Columbia Outfits—Constantino Gives Grafonola to Hospital—Change in H. F. Miller & Sons Co. Department—Columbia Line for Nelson's Department Stores.

(Special to The Talking Machine World.)

Boston, Mass., April 12, 1910.

New sales of the higher-priced machines have had a wonderful impetus with the coming of warmer weather, and the April volume of business is of such proportion to justify the prediction that the present season will be the largest in the history of the industry. One of the biggest houses say that up to the first of April they have transacted a 40 per cent. increased business over the similar period of last year, and from the good reports heard on all sides from jobbers, retailers and salesmen, it looks as though an era of profit-making is opening for the entire talking machine trade. The vigorous and extensive advertising done by the parent concerns with literature and other successful sale-closing publicity, all built on one platform—absolutely one price—is certainly valuable co-operation. Generally speaking, in no other commercial lines are the trade conditions similar—remember the "sticker," one and only one price—and with this thought it certainly behooves the dealer and distributor of the highest grade instruments to reciprocate by giving special attention to the selling end, particularly so with the opening of the present "rush" season.

Opera records had a big sale during the last month. During one week two opera companies—Hammerstein's Grand Opera Co. and the Metropolitan Opera Co.—were performing, and any evening in the whole month one could go to the Boston Opera House, so opera records secured a large boom. Each of the recognized factors of the industry had their quota of exclusive singers' records and everyone could hear his or her favorite artist. Telegraph requisitions to the factories for the more popular opera numbers were numerous, as the urgent demand quickly depleted stocks which at any other season would be considered large.

"Quick service" with talking machine jobbers should be the most prominent virtue of the establishment. The mere term "quick service" may or may not mean something, as what one jobber might call "quick" would be slow to another. In their efforts to render "wireless" service the Eastern Talking Machine Co., Victor and Edison jobbers, have made a hit with their telephone service books comprising 24 coupons, like this:

Good for.....cents, the amount of
toll charge on telephone order from
Name

Place

Date

This coupon to be used only in case of actual orders amounting to not less than 10 dollars and from points within the New England States. Eastern Talking Machine Co.

The dealer makes his telephone call in the usual way and the telephone company bills him for the amount of the toll. At the close of the conversation the dealer fills out the coupon, sends it to the Eastern Co., and the sum involved is placed to his credit. This is surely a unique idea and solves the "quick service" problem completely, particularly so with the smaller dealers, who will be able to clinch sales readily with this "Eastern assistance." The writer doesn't know whose brain created this new plan, but it reflects great credit on the originator for the promotion of good service and the general expansion of trade.

S. J. Freeman, manager of the Victor department of the Eastern Talking Machine Co., commenting on trade conditions, said: "We find

business very satisfactory, although at this season we expect and have a slight let-up. The Victor Talking Machine Co. have fallen off about 50 per cent. in filling of record orders, due to the recent 'exchange,' but this inconvenience is gradually revolving for the better, and we hope shortly to receive prompt and complete filling of our orders. The record shortage is not the only bad phase of the situation, as the home company are equally behind on machine deliveries, principally on Victrolas of both sizes." Mr. Freeman has been quoted as "manager of the retail department" once or twice in the past, and he asks The World to announce that this is an error, as his "official title," so to speak, is "manager of the Victor department."

Henry A. Winkelman, manager of the talking machine department of the Oliver Ditson Co.'s organization, reports the existence of a very excellent trade, without regard to season or conditions. He turns from this joyful expression of business brilliancy to lamentation over the delivery of Victrolas to the Ditson display rooms, saying it is impossible for them to fill anywhere near the orders already booked. "At present the Victrola delivery outlook is discouraging, although we are living in hope of receiving liberal shipments at any time," he added. The Oliver Ditson Co. spend a large sum of money in exploiting the merits of Victor talking machines, which has made and is maintaining a talking machine volume of business that is stupendous. Considerable space in their immense building is occupied by this department, embracing a number of reception rooms, record libraries and supply counters, and in all their publicity they emphasize the fact that a talking machine is a "wonderful musical instrument." So everything working together is responsible for the Ditson Co. transacting this immense talking machine business—one that is always in excess of their allotment of machines from the home company.

"Our March business," said Arthur C. Erisman, manager of the New England branch of the Columbia Phonograph Co., "was the largest we have had for four years, and our sale of Columbia Grafonolas is responsible for this achievement in a large measure. On records I can say that the presence of the Boston Opera Co. promoted the sale of opera records. With our many exclusive artists' reproductions it was not difficult in totaling a large aggregate of business in this department."

The "Library table" Columbia Grafonolas have rapidly leaped into prominence in New England circles, and in a number of cases the sale of one instrument has actuated the purchase of one, two or three more by as many friends of the first owner. A. C. Erisman, manager of the New England headquarters, is overrunning with enthusiasm on the sales possibilities of this machine, and were it not for inability of making deliveries the Grafonola would be given the general public advertising that its merit deserves. Little effort is now required to dispose of their New England quota, and Mr. Erisman hopes the obstacle of slow and small factory deliveries will soon be removed so they may begin a prominent campaign in this "two in one" (library table and talking machine) Grafonola.

Constantino, the noted opera singer recently at the Boston Opera House, presented a Columbia Grafonola to the Massachusetts General Hospital, which is the source of a great deal of pleasure to the patients. The local offices of the Columbia Phonograph Co. received a splendid letter of recommendation from the officials of that hospital, highly praising the Grafonola and suggesting its use by other institutions of that character.

Extremes are attractions, as it's a common occurrence for a customer at the Columbia exhibition rooms to select a few of Gipsy Smith's records and also a few of Raymond Hitchcock's. Gipsy Smith is the noted singing evangelist and his records are reproductions of religious work, while Raymond Hitchcock is one of the most widely-known comedians in the world, and his records are laughter producers of the highest horsepower. "Raymond's" appearance at the Tremont Theater the past few weeks has pro-

duced a largely increased call for these records.

To-night the Eastern Talking Machine Associates put on their big minstrel show, which is comprised of "home" talent. That this troupe is going to give a rattling good show is sure. S. H. Brown, chairman of the entertainment committee, deserves praise for his "director" efforts in making a company of "professional" minstrels.

An important change will shortly occur in the Victor department of the Henry F. Miller & Sons Co. In the past and since the inauguration of this new line the Victor department has been in the basement of the Miller building. The enormous business of this branch is now too large for its quarters, and plans are being molded to use the required floor space on the first floor. So if everything materializes as at present outlined, Victor talking machines will have a home that for environment will be A1. The Henry F. Miller piano warerooms are classed to-day as the most spacious and magnificent in New England; costly paintings decorate the walls, and other handsome features of construction, electrical and furnishing, abound. It's mutual progress if the Miller Co. actually devote a generous amount of first floor to the Victor and it's sure recognition of the latter's worth as a profitable commercial proposition.

Nelson's Department Stores, embracing a chain of six large stores in Massachusetts, New Hampshire and Vermont, have added a complete stock of Columbia goods at each store. They have met with splendid success for so short a period of time and are greatly pleased with the Columbia line.

"Never before, never again, first time, last time, 75c. disc records at 19c., 6 for \$1," so advertises the Henry Siegel Co., and they had a rush of business that was tremendous. This company claim to have purchased 300,000 at one time, which is the reason for the low price. The name of the record was not advertised. C. B. Thompson, manager of the talking machine department, attests a remarkable business in Columbia products, and says they sell considerable of the massive \$200 styles.

THE "ICY-HOT" BOTTLE.

A very important line that is being developed by the talking machine dealers is the vacuum bottle for keeping liquids hot or cold, according to how they are put into the bottle. The "Icy-Hot" Bottle made by the Icy-Hot Bottle Co., 207 Longworth street, Cincinnati, O., is recognized as the best heat and cold retaining bottle made. It is well made, very efficient, and is handsome in appearance. Besides, it yields a very liberal profit.

One of the features that makes the "Icy-Hot" Bottle a good seller is that the inner glass vacuum bottle can be instantly removed from its outer metal casing, making it possible for the user to repair his own bottle in case of accidental breakage. From a sanitary standpoint this is a very desirable feature, for the inner bottle can be removed for sterilizing.

The makers of the "Icy-Hot" have overcome a serious fault which is frequently found in bottles of this class. The "Icy-Hot" is so constructed that it is impossible for the contents to come in contact with the metal part when pouring out. The contents touch only glass, just as in an ordinary bottle. For the convenience of the dealer the manufacturers have made up a number of assortments suitable for any size town, so that a dealer in a small town can, in comparison, make as good a display as one in a large city. Prices, terms and other information will be cheerfully given by the makers on request.

New Victor distributors are the Elmira (N. Y.) Arms Co. and the Knoxville (Tenn.) Phonograph & Typewriter Co.

EXECUTIVE COMMITTEE TO MEET.

The National Association of Talking Machine Jobbers to Hold Executive Session in Columbus, O., Next Sunday—Visitors to Convention at Atlantic City Will Be Splendidly Entertained.

A meeting of the Executive Committee of the National Association of Talking Machine Jobbers will be held in the offices of the Perry B. Whitsit Co., Columbus, O., on next Sunday, April 17, and it is expected that all the members of the committee will make special efforts to be present. Besides the regular business of the committee at the coming meeting the final arrangements for the convention will be consummated.

In regard to the convention, to be held at the Chalfonte, Atlantic City, July 5, 6 and 7, Vice-President J. Newcomb Blackman reported that judging from the present outlook there would be a record attendance of jobbers and that much would be accomplished for the benefit of the trade at large. The factories, as usual, have evinced a decided interest in the coming convention and will have a number of representa-

FOR SALE

Entire line of Victor, Edison and Columbia Records, Machines, Cabinets, Horns, etc. Going out of the talking machine business, as we want the room to enlarge other departments. Bargain to quick buyer. Address "Quick Buyer," care The Talking Machine World.

SALESMAN WANTED

As Salesman or Manager in Talking Machine Department, either retail or wholesale; have had 10 years' experience in Victor and Edison lines; can furnish best of references; have been connected with largest talking machine jobbers in U. S. Address "ABILITY," care Talking Machine World, 1 Madison Ave., New York.

tives on the ground to keep in touch with the situation.

J. C. Roush, as chairman of the entertainment committee, in a recent letter to the members of the association, states that a regular program of entertainment will be provided this year, such as sailing parties, a baseball game between the eastern and western jobbers, a shore dinner, followed by a dance and other features. And it will be pleasing to a large number of the members to learn that the "Old Vienna" will be official headquarters after 10.30 p. m.

The Victor Talking Machine Co. will entertain the members of the association on Friday, July 8, on the day following the close of the convention, when the Victor factory will be visited and other entertainment provided. The National Phonograph Co. have invited such of the jobbers as find it convenient to visit and inspect the Edison factories on Saturday, July 9.

J. Newcomb Blackman, vice-president of the National Association of Talking Machine Jobbers, in speaking of the advance of that organization, said: "Those not members of the association cannot realize what we have accomplished for the good of the individual member, especially at the annual conventions. Many jobbers coming to the meetings in a discouraged frame of mind and doubtful as to the future of their business have had the opportunity of mixing with those who have won success in the same field, and have obtained invaluable knowledge of the modern methods that make for good results in their business. Ofttimes they have been speedily convinced that their trouble did not lie with the business itself, but rather with themselves and their manner of conducting their affairs. One such lesson, properly learned and carried out, is worth the price of many years' dues to the association.

"Then again, the National Association of Talking Machine Jobbers is neither a radical offensive nor defensive organization, but seeks rather to bring about the betterment of the trade, where possible, through suggestion. This is a fact that both the members and the factories fully appreciate. When the association sends a committee to the factories for any reason the manufacturers know that the jobbers have given the matter careful consideration before arriving at their decision, but are nevertheless open to argument. The factories now receive such committees in a most cordial manner, listen to the suggestions, and present their own case. In every instance an agreement is speedily arrived at that is satisfactory to both sides.

"In brief, the association has accomplished an incalculable amount of good through bringing the members in closer touch with one another and bringing the jobbers as a body closer to the factories, and all without any display of selfish purpose. That the work has been appreciated is evident from the fact that the membership of the association is steadily on the increase."

HAWTHORNE & SHEBLE CO. SALE.

(Special to The Talking Machine World.)

Philadelphia, Pa., April 11, 1910.

On Friday last the stock and other property of the Hawthorne & Sheble Mfg. Co., bankrupts, of this city, were sold at public auction at their factory, in this city, by the trustee, under order of the United States District Court. On the following day a meeting of creditors was held at the office of the referee in bankruptcy, 528 Walnut street, when the returns of the sale were made. It is expected the court will accept the results, though not reaching 75 per cent. of the appraisal, as required by the statute.

Kitty Cheatham, the famous interpreter of the songs and moods of childhood, now makes records exclusively for the Columbia Phonograph Co. Two of her records appear in the 12-inch double-disc list for June, namely, A5168, "I've Got a Pain in My Sawdust," Herman Avery Wade, soprano solo, orchestra accompaniment; (a) "Visitors," W. Cooke, and (b) "Sugar Dolly," Gaynor, also soprano solo, orchestra accompaniment.

To Enjoy Your Talking Machine

to the fullest, it is essential that your library of Records be so cared for that you can at any moment lay your hands on the particular selection you want to hear.

THE OWNER OF A VICTOR OR COLUMBIA who takes care of Records by stacking them in a "bunch" on a table, or on the window-sill, is depriving himself of one of the real joys of a Talking Machine, which is the satisfaction of hearing any one particular record just when you are in the mood for it. This is possible only when you have a place for every record and every record in its place.

"ECHO" Record Albums

ARE THE SOLUTION!

They Fit all Disc Cabinets and Bookcases

They form a complete system for filing disc records, which can be added to, album by album, on the Library plan. Just the thing for both Single and Double Face Records, and

MEETING OF DEALERS' ASSOCIATION.

Second Regular Session Held at New Grand Hotel on Wednesday—Some of the Matters Discussed—New Members Enrolled.

The second regular meeting of the Eastern States Talking Machine Dealers' Association was held at the New Grand Hotel on Wednesday of this week with President Storck presiding. The morning session was given over to informal discussions of matters of trade interest, one of the speakers being Victor H. Rapke, who drew on his experience of eighteen years in the business for some interesting and valuable advice. Considerable attention was directed toward the department store method of getting the jobbers' privilege and doing only a retail business, the selling of records by such stores at 19 cents when the price for the dealers is restricted to 50 cents, and the question of having the new records of the Victor and National companies put out either on the same day or with a longer interval than three days between the dates. Lower freight charges, less packing and the convenience of placing before the public, were given as reasons for considering the last question.

At the meeting thirteen new members were enrolled: G. J. Scott, Englewood, N. J.; The Bremmer-Chalmers Co., New York City; The A. B. Clinton Co., New Haven, Conn.; Theo. Jespe, Glen Cove, N. Y.; Frank A. Jenkins, Honesdale, Pa.; N. J. Roth, New York City; T. C. Eisbill, Bridgeton, N. J.; Theo. Anson, New York City; Thomas J. Blauch, Highland Falls, N. Y.; F. A. Trowbridge Co., Morristown, N. J.; Saul Birn, New York City, and Abe Mandel, New York City.

The members present at the meeting were very enthusiastic over the manner in which the association is progressing and were firm in their belief of the good it could accomplish if things were handled slowly and carefully.

Executive Committee meetings were held on March 18 and on Wednesday before the regular meeting, when various plans were discussed for advertising the association and enlarging its membership and other matters of importance to that organization taken up and discussed.

ECHO RECORD ALBUMS

Continue to Grow in Favor—Dealers Will Find Them a Profitable Line to Handle.

It is evident the "best trade now use Echo Record Albums," from the growing demand for this complete system for filing disc records, and

which can be added to, album by album, on the library plan, as applied in the Gerson record cabinet. It is just the thing for Victor Red Seal collections—every record instantly available. The Echo Record Albums preserve disc records against dust, careless handling, scratching or breakage. Any cabinet becomes a Gerson disc record cabinet when the old-style racks are removed and the space on the shelves is filled with Echo Albums. This admirable device is manufactured solely by the Echo Album Co., 926 Cherry street, Philadelphia, Pa., who will supply prices and other information on application. See their advertisement on page 27 for particulars.

COLUMBIA BRIEFLETS.

Six Hundred New Columbia Dealers in Two Months—Preparing for Piano Trade Exhibition—Those in Attendance—Boston Opera Co. Make Records.

During the last two months the Columbia Phonograph Co., General, have made 600 additions to their list of dealers.

Preparations are being made by the Columbia Co. for the Piano Trade Exhibition in Richmond, Va., next month. Instead of the three big manufacturing companies being alongside of each other, as originally intended by General Manager Green, the Columbia Co. will be on spaces 8 and 9, the Victor Talking Machine Co. on 27 and 28, and the National Phonograph Co. on 23 and 24. H. A. Yerkes, manager of the wholesale department; George P. Metzger, in charge of the advertising department; B. Feinberg and T. K. Henderson, and probably others of the selling staff, will represent the Columbia Co.

Edward N. Burns, manager of the Columbia Co.'s export department, was in Washington, D. C., this week for several days, visiting friends with Mrs. Burns.

The recording laboratory of the Columbia Phonograph Co., General, New York, has been busy night and day making masters of the principals and chorus of the Boston Opera Co. This week, commencing Monday, the voices of the leading artists, including Constantino, the tenor; Mardones, basso; Celestina Boninsegna, coloratura singer, were recorded in the leading roles of "Faust." Paul H. Cromelin, vice-president of the company, has been present in the laboratory while this important and interesting work was carried on.

Yates, Bonner & Co., music dealers, Roanoke, Ala., who also have a store at West Point, Ga., recently placed a big order for machines and

records and have been created exclusive Columbia agents for the two places.

Another fine order received by the Columbia Co. this week was from D. B. Orndorff's music house at Knoxville, Tenn.

PIRATED PLEASANTRIES

A little chap in Philadelphia, whose father is a prominent merchant, and, as such, never loses an opportunity to descant upon the virtues of advertising, one day asked his mother "May Lucy and I play at keeping store in the front room?"

"Yes," assented the mother; "but you must be very quiet."

"All right," said the youngster; "we'll pretend we don't advertise."

"You know you won't go to heaven, Tommy, if you tell lies!" "Well, I'd much rather be with you, mother. That was a corker you told Mrs. Brown yesterday about that hat coming from Paris!"

A summer visitor who was trying a horse, the property of a New Hampshire farmer, with a view to buying him, noticed that after driving a few miles the animal pulled very hard, requiring a firm hand and constant watching. "Do you think this is just the horse for a lady to drive?" he inquired, doubtfully. "Well," answered the owner, with an air of great candor, "I must say I shouldn't really want to be the husband of the woman who could drive that horse."

Dolan—"So Casey was running me down an' ye stood up for me?" Callahan—"Oi did; Oi siz to him, 'Casey,' siz Oi, 'ye're honest and truthful, and ye're no coward—and ye work hard and pay yer dibts—and ye don't get drunk and lick yer woife—but in other respects ye're no better than Dolan!"

"Wot's hydrophobia?" asked Weary Watkins, as he spelled out the article in the piece of newspaper which he had picked up. "It means hatred of water," replied his pal, "and it is a fatal disease." "Then run for a doctor," cried Weary, as he fell back with a groan. "I'm a dead man."

THE LATEST AIR.—"I'm looking for a breezy march," said a customer in visiting a local talking machine store the other day.

"How about this one dedicated to the Aero Club?" the facetious clerk asked.

"I suppose it is written for wind instruments," the bandmaster countered.

"Well, the air is easy," the clerk shot back, and the interchange stopped.

Smith—What did your wife say about your being so late in coming home the other night?

Brown—Absolutely nothing. She had the talking machine all prepared and gently tip-toeing to it, I heard the strains of "Tell Me the Old, Old Story." That was all.

An old hen was picking at some stray carpet tacks in the backyard.

"Now, what do you suppose that fool hen is eating those tacks for, Jones?"

"Perhaps," rejoined his better half, "she is going to lay a carpet."

Plans are being considered by the National Phonograph Co. looking toward a rearrangement of the interior of their office building by which additional space may be secured at once for their sales, agreement and advertising departments, all of which have been augmented by recent additions to their respective staffs. An extension to the building itself of about 50 feet on Lakeside avenue is also under consideration, and ground for it will probably be broken in the spring.

TIMELY TALKS ON TIMELY TOPICS

In the official figures of exports issued by the United States government it will be noted how rapidly the foreign business of the talking machine trade is expanding. Every month shows a remarkable increase over its predecessor, and though the trade is comparatively young alongside the music industry, still the exports of talking machines, records, etc., exceed those of all kinds of musical instruments combined. For instance, take the latest report furnished by the government, revealing the following amazing totals: The total exports of talking machines, records and supplies for February, 1910, amounted to \$290,358, as compared with \$214,341 for the same month of the previous year. The eight months' exportations of talking machines, records and supplies amounted to \$2,481,906, as against \$1,926,228 for the same period in 1909. This is certainly a handsome showing. It should be recalled also that three-fourths at least of these goods go to the Spanish-American countries and Australia, very little going to Europe, which is covered with agencies manufacturing their own lines, even if they are of American origin.

In last month's World mention was made in a "Topic" relative to the talk about "restraint" of trade as applied to patented inventions. It was made clear that this application was erroneous, an opinion strengthened by a decision rendered by Judge Noyes a few weeks ago in the United States Circuit Court, Southern District of New York, in a moving picture case, who said: "I am of the opinion that the charge, if established, that the complainant (Moving Pictures Patent Co.) is itself, or is a member of, a combination in violation of the Federal (Sherman) anti-trust statute is *not a defense available in an action for the infringement of a patent* and fails to show a defect in the complainant's title." The attorney for the defense who set up this argument is evidently entitled to the proverbial leather medal for his legal knowledge and acumen!

To be sure, as is well known, the decisions of the courts in patent suits are not relished by the defeated. That is in the very nature of things. At the same time, it is just as well to exercise one's common sense in such matters and make the most of it. Both sides cannot be victorious, and twisting and turning statements that may present a plausible appearance will not alter the court's decision.

Not infrequently remarks are made that the judges have been "approached," been "bribed," etc., which is the rankest nonsense. It is true that the litigation over certain talking machine patents has covered years of work and been bitterly contested, and when the final deciding opinion is written the fellows who have to bear

the brunt of the adverse action of the court have boldly stated such and such a judge was paid "\$350,000," etc. These exact figures are quoted because they were the ones actually employed in speaking of one of the most distinguished of Federal jurists. Of course there was not a word of truth in this ridiculous statement, and when it was uttered by a man who did know better its absurdity is only the more glaring.

The Eastern Talking Machine Associates, composed of the employes of the Eastern Talking Machine Co., of Boston, Mass., hold monthly meetings which are very beneficial not only to the members, but the company also. At one of the recent meetings W. J. Fitzgerald, a salesman, read a paper on "The Selling Points of Edison Phonographs." The various models of the National Phonograph Co.'s product were described and commented upon in an interesting manner and were of special benefit to the younger members of the selling staff. Organizations of this character would be helpful in every establishment of any size and their formation should be encouraged by the principals.

Again the New York Phonograph Co., defunct, has been in court, but in no way to concern the trade. When the settlement was made by the National Phonograph Co. one of the lawyers failed to get a share of the proceeds. He claimed he had made arrangements with the former to be their counsel and this contention was carried into the New York Supreme Court. The judge awarded the counselor in question a lien for \$131,625, and unless this is set aside in the Court of Appeals this amount must be paid over. The particulars of this curious incident appears in the news columns of The World.

An inventor who had been rummaging among a lot of British talking machine patents declares he discovered that Thomas A. Edison invented a double-face disc record in 1878. Of course, the patent has expired; but this is a "find" that will doubtless be of interest—if true.

J. A. Macnabb, vice-president and general manager of the Universal Talking Machine Manufacturing Co., Philadelphia, Pa., writes as follows to The World: "I find it will be impossible for us to get out a list of records for May on account of taking so long to get our laboratory established. I expect, however, to get out a list of about twenty-five records and this list we will call May and June and will rush it out at the earliest possible moment. Will also state that business is very much improved. We have received several large orders from the West and have established four new jobbers inside of two weeks."

R. H. Macy & Co., the great New York department store, on March 30 made the following an-

nouncement in the New York Evening World: "We have bought two hundred and sixty-five thousand Zon-o-phone records and will sell them at nineteen cents. Until this offer was made by us Zon-o-phone records were never sold for less than the restricted price—sixty cents. When the factory owners decided to limit their production to double-faced records, they found that they had an unsold balance of 265,000 single-faced records in their stock room. Wanting to close them out quickly, they accepted our offer for the entire lot. Of course they could have realized much more money had they sold them to different retailers in small quantities. Many dealers would have paid double what we did for lots of five to ten thousand. But the makers were bent on making a clean sweep of them with a single transaction—and we got over one-quarter of a million of these splendid records so advantageously that we are enabled to sell them at nineteen cents." The sale was negotiated by Louis Silverman.

The National Phonograph Co., Orange, N. J., is the first of the great manufacturing companies to market what they term "A Combination Outfit," the particulars of which were published in last month's World. It has attracted a great deal of attention on the part of the entire trade, and, from fugitive reports since, it would not be a surprise if other like offers would make their appearance before long. The primary object of the National company is for "bringing into active use the many Edison phonographs which may have been laid aside due to their being equipped for standard (two-minute) records only," besides "creating a new interest on the part of phonograph users in Amber records."

There is no question that a great many talking machines have been laid aside, and probably forgotten nearly by their owners. There are various reasons for this seeming neglect and the energetic dealer should make it his business to "dig them up," create a new interest in their possession and again put their owners on the list of active and not passive record buyers. The suggestion—and a splendid one it is—has been made that dealers who are up to date and progressive would lose little, if anything, in the long run if they offered to overhaul these machines and if necessary add such little repairing as would be needful to put them in prime condition.

Dealers are not lacking in foresight so far as getting people to renew their interest in the talking machine is concerned. The products of the manufacturers were never finer and their list of records never so elegantly finished or diversified as to the high character of selections, whether the numbers include vocal, band, orchestral or "talking" subjects. These facts should be attractively and forcibly presented to the public. When this has been followed the results have been very satisfactory, and in some instances abundantly so—it has made friends for the dealer, ergo more trade.

VALUE OF FREE CONCERTS.

No Better Method for Attracting Public Attention to a Dealer's Business—Talker Men Agree That Concert Work Is a Profitable Investment—The Experience of a Kansas House.

No better means of concentrating the attention of the public on the talking machine—at least of those musically inclined—can be conceived than the giving of concerts by dealers. Not only are the possibilities of the talking machine brought home to hundreds of people at each concert, but the people come to your store, become acquainted with your staff of salesmen, and in this way an important and valuable connection is established.

Of course if this concert publicity is to be conducted along the right lines everything in connection therewith must be right. If the store is not large enough it would be best to hire a small hall, send out either engraved or well-printed invitations and have the programs daintily printed and well selected. Whatever expense is involved will be well repaid in a short time.

We have on file letters from talking machine men in widely separated sections of the country who have been and are giving concerts for several seasons, and in each instance they have found this concert work a profitable investment. And these people do not include the dealers in the larger cities, such as Wanamaker in New York and Philadelphia, who has been giving talking machine concerts on a palatial scale. No matter how humble the effort, it can be made a success if properly carried out. We know of no better scheme of publicity than this.

Only recently we received a letter from the Emahizer-Spielman Furniture Co., Topeka, Kan., regarding their Victrola and piano concerts, which they state were a great success, adding: "They were the means of bringing us a large number of Victrola sales. We are so pleased with this way of advertising that we feel it would be of benefit to others who would like to enlarge their Victrola sales."

We reproduce herewith for the benefit of dealers generally one of the programs of their concerts which was given in Chickering Hall in Topeka, Kan., recently. It will be found interesting:

- | | |
|---------|---|
| | PROGRAM. |
| No. 1. | Valse Lente, "Adorable, Tourneurs" Caruso. Barthelemy Enrico Caruso, (Tenor). |
| No. 2. | Faust, "Air des Bijoux" (Jewel Song) Gououd Emma Eames (Soprano). |
| No. 3. | "A Born Inventor" (Reading) Miss Ernestine Klein. |
| No. 4. | Lucia, Sextette, Act. II. Chi mi fren a (What Restrains Me) Donizetti Sembrich, Caruso, Scotti, Jaumet Severina, Daddi. |
| No. 5. | "The Breeze that Blows the Barley" Miss Grace Clark |
| No. 6. | Martha, "Last Rose of Summer" Moore Marcella Sembrich. |
| No. 7. | The Wayside Chapel Wilson Melody in F. Rubinstein Behning Player-Piano. |
| No. 8. | Les Deux Grenadiers (The Two Grenadiers) Schumann M. Pol Piancon |
| No. 9. | "Christopher Cobb" (Reading) Miss Ernestine Klein |
| No. 10. | "Carmen" Habanera (Love is Like Wood-bird Wild) Bizet Emma Calve |
| No. 11. | "If I Build a World for You" Lehmann Miss Grace Clark |
| No. 12. | Rigoletto, quartet, Act 3, "Bella figlia dell' amore" (Fairest Daughter of the Graces) Verdi Caruso, Abbott, Homer and Scotti Miss Marjorie Erwin at the piano. |

We claim to be the first to feature the combination of Victrola with the real piano accompaniment in Topeka, and will use on this occasion the largest Victrola and Red Seal records, together with a Chickering Grand Piano. We have secured the services of Miss Marjorie Erwin, late of the New England Conservatory of Music of Boston, to render the accompaniments. The accompaniments will be played with each voice the same as though the artists, Caruso, Sembrich, Piancon, Farrar, and others stood beside the piano. The effect is truly wonderful.

GOOD COLUMBIA TRADE IN DETROIT.

(Special to The Talking Machine World.)

Detroit, Mich., April 6, 1910.

"I have never seen trade in talking machines as good as it has been since last fall," says K. M. Jons, manager of the local Columbia Phonograph store. "We are doing more business every day than we have ever done, and it is almost im-

possible for us to get enough machines to fill our orders, to say nothing of getting a sufficient number to use for exhibition purposes. We are not only selling many of the cheaper talking machines, but our business in the high-grade machines has been phenomenal. Our high-grade machines are fast becoming popular and we can not get enough of them in stock to show a complete line.

TRADE FABLE

No. 6

Smith was some picker. He picked a dad that was well fixed, in the first place, then he picked a wife that certainly showed class, and then a little bungalow that was certainly the goods, that is, to speak mildly. Finally, as a business in which to carve out his future wherewithal he picked the talking machine business. Any flies on Smithy had to pay fashionable rents. But—

When Old Man Smith passed over the coin Smith fils got careless and let him slide—to an 8 x 10 hall room in a cheap prune dispensary. Then the wife was shoved past till she felt like hiring a Pinkerton to guard the lone nickel in her pocketbook. Finally the bungalow ran for Sweeney till the neighbors' chickens mistook it for a hen house and used it for a roost.

About the business, more anon, brother, more anon.

At first that talking machine store of Smith's shined out from the neighboring emporiums like the Great White Way, from Main street, Punkinville, and the sound of the demonstrations issuing therefrom had Barnum's calliope beaten by a mile, so strong was the business. And the stock—just ask for something in the machine or record line, that was all, just ask.

It was not long, however, before the welching instinct got the better of Brother Smith and he started in to economize by bouncing two of the highest-priced salesmen, men who could sell a talker to a deaf and dumb man who hated music. Bad stufh.

Then he began to get palpitation of the heart every time a jobber or his salesman hove into view, and declared solemnly and with much apparent sorrow that business was rotten, punk and even more. Those people bustling in empty handed and rushing out with bundles were simply a bunch of pikers who were taking records home to try out. Gee! if business didn't improve he'd study embalming and get busy on the dead ones of the town.

Naturally the stock began to get frazzled at the edges, then get holes in the middle, and finally reached a point where the local cut-ups could

amuse themselves by walking in and asking for any of the latest records, feeling sure that they would not be supplied.

It eventually got to a point where there was really a decided shrinkage in the Smith business because there were not enough first-class records left in stock to supply one lone family, let alone an entire town, and it looked very much as though the sheriff would pitch in and muss up things. Still, in the face of it all, Smithy stuck to his roll closer than a flea to a Newfoundland dog and refused to see where spending a little money on new stock would put him back into the game on a winning basis.

There finally came a day, however, when a live jobber hit the town and called upon Smith for the first time. It took said jobber just about two minutes to size up the proposition he was up against, and he proceeded to get into action. He first asked to be shown several of the latest disc records that had proven successful and were in demand all over the country. Nothing doing. A request for cylinder records brought the same response, while the latest attachments were an unknown quantity.

Naturally Smith began to rave about the bad business, and then the jobber sat into the game with a few trite remarks about investing money in stock being the real dope for a live business man to follow. The result was that Smith finally took the rubber bands from around the remainder of his roll and loosened up to the extent of \$100 in new goods as a means of saving the \$1,000 worth of stock lying idle upon the shelves. When the new records arrived and were properly announced business again began to wake up. The run of customers increased steadily and were held by the continual freshening up of the stock as the new record lists came out.

The lesson thus learned in the talking machine business was applied to Smith's other interests, with the result that the bungalow was saved for an amount equaling a small per cent. of its cost, and Mrs. S. began to look so good that she was a positive asset. Incidentally the treatment of the old man gained the good will of all the neighbors, and as a result everything was rosy at the store.

Moral—Success does not lie in the hand you hold but in how you play it.

C. J. SCHMELZER A VISITOR.

Charles J. Schmelzer, of the Schmelzer Arms Co., Kansas City, Mo., Edison jobbers and Victor distributors, was a visitor at the factory of the National Phonograph Co., Orange, N. J., last week.

Substantial orders for Columbia goods have recently been placed by Mathis-Youmans & Co., successors to Mathis & Coleman, music dealers, Valdosta, Ga., and D. L. Halbert, Athol, Mass.

BLACKMAN TALKING MACHINE CO.

J. NEWCOMB BLACKMAN, President

97 CHAMBERS STREET

NEW YORK CITY

QUAKER CITY HAPPENINGS.

Business Exceptionally Good—Opera Season Has Helped High Class Trade—Many Dealers Find Difficulty in Getting High Priced Machines and Records—The Reports Made by the Leading Houses Are Most Encouraging and Prove That Philadelphia Is a "Live" Talking Machine City.

(Special to The Talking Machine World.)

Philadelphia, Pa., April 10, 1910.

The talking machine business in Philadelphia, in spite of the general conditions that may exist in other lines, has been exceptionally good all through March. The latter end of the month there was a slight falling off, but not to any great extent, and was more due to the actual conditions of the period than any other reason. It got warm suddenly, people began preparing for spring, the Easter excitement upset things slightly, and from all this there will no doubt be a speedy recovery, and already the firms have evidence that April is going to be a very satisfactory month.

The musical season in Philadelphia closed with the end of the Hammerstein opera season, and it was one of the most active in the history of music in Philadelphia. Naturally all this will tend to help the talking machine business. Each season of the opera the patrons make new favorites, and when they have passed out their friends want to retain the pleasure of their voices, and will resort to the talking machine to do this. It is for this very reason that the talking machine dealer will tell you that the operatic records are having an increased sale.

Louis Buehn & Bro. report that their business in March, particularly the first part, was exceptionally good. And even although the last two weeks were not up to the first two, the month shows a healthy increase. The firm have just gotten in a number of new Edison Amberolas, which their patrons say are the best toned and the best finished they have ever offered. They

have also been having a heavy sale on cabinets, and as to records, the demand for the disc and cylinder records have about evened up.

Among the out-of-town visitors here this week were Fred Kramer, of Allentown, and William Warner, of Easton, Pa.

Edward Buehn started on Thursday of last week on his first April trip through the southern part of the State and Maryland, and has been sending in some good orders. He reports that he has found conditions in that section most satisfactory. The two new Edison special records, "Cubanola Glide" and "By the Light of the Silvery Moon," have been selling very well with the Buehn firm.

At the end of last week there were a number of representatives of the National Phonograph in Philadelphia, William Pelzer, Frank Madison, Frank Stanton, Mr. Stewart and Mr. Pike. The object of their visit was a legal proceeding in which they were attempting to restrain Mr. Weinberg, a Kensington avenue talking machine dealer, from selling second-hand Edison records at cut prices, as it is alleged he has been doing. The hearing was in the United States Circuit Court, and a decision in the matter will no doubt be rendered very shortly. Through some source or other, it was alleged that the Kensington dealer was able to obtain some records, in many instances of the very latest, which he would offer at cut prices.

The Penn Phonograph Co. report that their March business was excellent, and that the chief difficulty they experienced is not in selling goods but the difficulty they had in securing them. They have been having very great trouble in securing sufficient stock to fill orders, and they believe they would have been able to have done even more business had they been able to get the instruments. They say that as a matter of fact they have not received one order for records which they could fill complete. They do not complain particularly over these conditions, for they say that the demand has been so great at both factories that they have been unable to get out

the instruments fast enough, even by working day and night. They find the condition of affairs to be worse than it was during the Christmas rush.

This same trouble of scarcity of goods is noted by the manager of the Heppes department. They also claim that their demand is considerably greater than their supply, and that they have been forced to lose business for this reason. D. D. O'Neill, in charge of the Heppes department, was away several days last week in the northern part of the State, where he was calling on their dealers, all of whom reported that they were looking for a very heavy business for the next few months.

In March they had the biggest month they ever had in a wholesale way. They are looking to enlarging their department considerably in the next few months. In spite of the different enlargements that have been made of their department in the past few years they are still handicapped for want of space. In their talking machine department they devote considerable space to a line of small musical instruments, such as violins, cornets, etc. They have a fairly good business on these instruments, but have never properly pushed them, and they are thinking some of abandoning that department entirely and devoting the space it now occupies to still further enlarging their talking machine space. They have not completed their talking machine salesrooms on the fourth floor and will not do so until fall. These two rooms they were going to furnish as a smoking room, mostly for male customers who might want to enjoy a smoke while they were hearing records. They do not believe they will have much use for it during the summer, and in consequence will not hurry its completion. The Heppes, as well as their customers, think very well of the new attachment gotten out by the National Co. It is an attachment to play the Amberol records. They are advocating it very strongly to their customers.

The Columbia Phonograph Co. have the same report to make as the other large firms, that

THE NEW IDEA

Combination Disc Record Cabinet

A unique and practical cabinet with changeable cover to fit and match Victor I, II, III, IV, V or VI. Dealers who handle the New Idea Cabinet need carry but one or two in stock, and with extra tops, at a very small expense, be in a position to supply customers with a cabinet for any type Victor Machine.

A Jobber with ten New Idea Cabinets and a few extra tops, will be able to fill orders more promptly than he is to-day with a stock of 100 of the present style Disc Cabinets. The New Idea Cabinet holds 180 10-in. or 12-in. Records. There are twelve sliding files with indexed interiors, each holding fifteen records. Files are wood faced and finished to match cabinet, oak or Mahogany. Sold through the Jobbing Trade only.

Write for Catalog and Prices

NEW IDEA CABINET COMPANY

441-443 National Ave., Milwaukee, Wis.

Those Columbia tandem musical notes on a record label mean just as much as the X-mark on a ten-dollar bill.

the month of March was the largest their store here has had for years, despite the strike and other unsettled conditions. It was the best month they had this year, and the best in years. They sold a very large number of Grafonola Regents and Grafonola De Luxe with Regina attachment. They have been visited by a great many out of town dealers within the past week, and have established a number of new agencies in various parts of the State. R. B. Robinson is at present on the road through the State and he finds things in a very flourishing condition. They have had a good, big run on their grand opera records, and on their new records of popular music, notably "Cubanola Glide" and "By the Light of the Silvery Moon." They are having a nice exhibit this week at the House Furnishing Show, which is being held at the Horticultural Hall. T. K. Henderson, the local manager, will go to Richmond, Va., next month as one of the representatives of the company at the exhibit they will make there during the national convention of piano dealers.

The Columbia Co. have arranged to have their Grafonola take part in a church service on Sunday evening at the services of the East Baptist Church. They will use the Gipsy Smith records and other selections. This will be somewhat of an innovation and one that ought to be appreciated and open up still another field for this wonderful instrument. They note that David Bispham's record of the "Palms" has been a wonderful seller, and believe that the talking machine could be used with very good effect in church services.

The firm of H. A. Weymann & Son note that there has been a very satisfactory revival of business following the Lenten season. Their March business was good both in wholesale and retail. In wholesale they started quite a few new dealers. They report that the Amberolas are coming along very nicely, and the sales on Victrolas still keep up. They have had as good a March as they have had in four or five years in Pennsylvania, and they look for big things there from now on.

Norbert Whiteley, representing the firm, is up through Pennsylvania at present. W. H. Doerr will go down through New Jersey this week, making a special effort among the seashore cities. The firm expect this summer again to open up a branch store on even a larger scale than last year in Ocean City. The Victor McCormack records are among their very big sellers.

NORA BAYES' IRISH SONG

"Has Anybody Here Seen Kelly?" Is Being Put Forth by the Victor Talking Machine Co., Who Have Signed an Exclusive Contract with Her.

Nora Bayes has just signed an exclusive contract with the Victor Co. and they are now presenting her big Irish song hit, "Has Anybody Here Seen Kelly?" There is no comedienne before the public to-day more popular than jolly Nora Bayes, who, as an attractive colleen with a delicious brogue, is making the biggest kind of

a hit in "The Jolly Bachelors," now playing to crowded houses in New York city at the Broadway Theater.

"Has Anybody Here Seen Kelly?" is her principal song and the hit of the show. It is proving a screaming Victor hit and dealers everywhere report it one of the season's big sellers.

MEXICO'S FAMOUS BAND

Under Direction of Captain Pacheco Make a Number of Excellent Records for the National Phonograph Co.

We show herewith a photograph of the Banda de Artilleria (Artillery Band), a very famous Mexican band, taken at St. Louis during the recent World's Fair there, where they received first prize. This band is one of three similar organizations supported by the Mexican Government, every one of which is of the very highest rank. Besides receiving highest honors at St. Louis, for a number of years they have captured the laurel in the annual band contests held under the auspices of the Spanish Covadonga Committee in Mexico City.

The National Phonograph Co. are so fortunate as to have a number of records made by this organization, eight Amberol and three Standard, and they will list other numbers by them from time to time. These selections are extremely

THE BANDA DE ARTILLERIA OF MEXICO.

beautiful and represent a wide variety of airs, many of which possess the peculiar charm of Spanish music, which appeals so strongly to Americans whenever presented to them.

Captain Ricardo Pacheco, director of this band, was delighted with the Amberol records, and expressed his appreciation of same in a letter to the Mexican National Phonograph Co. as follows: "I have heard with great pleasure the Amberol four-minute records of the selections played by the Banda de Artilleria under my direction, and I must acknowledge that, owing to the superior quality of the recording machine and the great pains taken to obtain a perfect reproduction, the result achieved is one of which I am more than satisfied."

MUSICAL LEAGUE PLAYS BALL.

Teams of San Francisco Music Houses Look Forward to Active Summer—First Game a Lively One.

(Special to The Talking Machine World.)

San Francisco, April 2, 1910.

The baseball fans in the trade will be interested in learning that the Musical League of this city opened their season last month with the prospects of a very active summer. The first game of the season was between Sherman, Clay & Co., San Francisco, and Sherman, Clay & Co., Oakland, the San Francisco boys carrying off the honors to the tune of 11 to 3. Among the features of the game was the batting of Cassassa and the pitching of Hedderman, a youngster who was given a try-out and carried off all the pitching honors. Opposed to him was that veteran, Fallon, who had such a successful year last season with the Sherman, Clay & Co. (San Francisco) team. The outlook for a very successful season is promising, as some of the boys are already playing up to midsummer form.

RALPH CABANAS EXPECTED.

Ralph Cabanas, president and general manager of the Compania Fonographica Mexicana, City of Mexico, who handle the product of the Columbia Phonograph Co., General, as distributors for the

entire republic, is expected to arrive in New York to-day (April 15). He will be on his honeymoon and is bringing his bride with him. Mr. Cabanas, who is spoken of as a particularly energetic talking machine man, will stop in Washington, D. C., en route to New York, where he will make his headquarters at the executive offices. Senor and Mme. Cabanas will remain North for several weeks. E. N. Burns, manager of the Columbia Co.'s export department, will look after the entertainment of Senor Cabanas, and he will be accorded a cordial welcome by the other officers.

Lots of dealers entirely overlook the great sales value of attractive display windows.

THE VICTROLA IN THE WHITE HOUSE.

A Favorite with the President and His Family—Used to Entertain Guests—Grand Opera Records Favored.

Photo Copyright by Waldon Fawcett, Washington, D. C.

One of the prominent objects in the music room of the White House—the famous Blue room—during the administration of President Taft is a Victor Victrola, which is supplied with a large and choice library of records. The President and his family are enthusiastic admirers of the talking machine and entertain the guests at the White House with concerts on the Victrola on frequent occasions. Both Mr. and Mrs. Taft are musical, the latter being principal patron and supporter of the Cincinnati Symphony Orchestra for many years. Then, too, when presidential responsibili-

ties weigh heavily upon Mr. Taft he often finds solace in the music of the Victrola. While grand opera records are his favorites, he is not above listening to popular selections occasionally and has a number of records of the latter nature. We take pleasure in presenting herewith a photograph of the Victrola as it appears in the White House, specially taken for The Talking Machine World. Enshrined in a bower of azaleas, it presents a most attractive picture. It is worthy of its environment in the home of the nation's chief executive.

FILE PETITION IN BANKRUPTCY.

Creditors of Maurice J. Harrison Take Action to Recover on Notes—Claim That He Made General Assignment.

(Special to The Talking Machine World.)
Boston, Mass., April 6, 1910.

An involuntary bankruptcy petition was filed in the United States District Court last week against Maurice J. Harrison, doing business as the Bowdoin Square Phonograph Co. The petition was brought by Aaron Schwartz, Louis R. Hunter and Samuel Linsky, who hold claims on notes. They allege that Harrison made a general assignment for the benefit of his creditors on March 25.

HOW MR. DIPPEL HEARS THE OPERA.

Andreas Dippel, the retiring administrative manager of the Metropolitan Opera House, has an apparatus in his office which brings the music

of the opera to him while he is sitting at his desk. In a corner of the room up near the ceiling is a horn like the transmitter of a talking machine. If Mr. Dippel wants to know how far an opera has proceeded he goes to the wall, throws on a switch as though he were lighting an electric lamp and out of the horn comes the music of the opera. At the end of an act or an aria comes the sound of the handclapping.

"I can tell how successful a new artist is," said Mr. Dippel, "from that horn. I can judge from the applause the number of curtain calls as faithfully as though I were in the body of the house."

C. ALFRED WAGNER MARRIED.

C. Alfred Wagner, manager of the talking machine department of the Henry F. Miller & Sons' Co., Boston, was recently married to Mrs. C. I. Haines. The wedding took place at Arlington, Mass., at the home of the relatives of the bride. Mr. and Mrs. Wagner left immediately upon a wedding tour occupying several weeks.

GAUMONT CO.'S STATEMENT.

Explain That the Gaumont Chronophone Co., of Cleveland, Who Are Now in Financial Difficulties Have No Relation Directly or Indirectly with the Gaumont Co. of New York.

We are in receipt of the following communication from the Gaumont Co., 124 East 25th street, New York, which speaks for itself:

"Dear Sir—Our attention is called to an article in your issue No. 2, Vol. VI., of February 15, 1910, which article, dated Cleveland, O., February 8, 1910, contains a reference to the difficulties of the Gaumont Chronophone Co. of that city.

The company to which you refer, which, by the way, has no relation direct or indirect with this company, was organized in Cleveland with a view to selling Gaumont machines manufactured in France. It has never had authority to manufacture or in any way exploit Gaumont inventions, and has forfeited its selling privilege by failure to take and pay for, during the first year of its existence, the stipulated number of machines.

"There is no outstanding subscription for stock of that company by Mr. Gaumont or any of the companies in which the latter is interested. In exchange for the selling privilege the Cleveland company did issue stock of the par value of \$100,000, the value of which disappeared with the privilege against which it was issued. Our company was organized under the laws of the State of New York and should not be mistaken for the company to which you refer.

"The above particulars are given you at the request of Leon Gaumont, who is president of this company, but the writer has personal knowledge of the facts given above.

"It is hoped that you will publish this letter with a view to preventing a confusion in the minds of people in the trade with respect to the identity of the insolvent Cleveland company and our company.

"It may be added that neither Mr. Gaumont nor any officer of the Société des Etablissements Gaumont has had any connection with the Cleveland company, which was launched and controlled by Messrs. R. E. McKisson and Max Falkenauer. Yours respectfully,

GAUMONT Co.,

"H. Blad, Secretary and Treasurer."

VICTOR CO.'S CORRECTION.

In correction of a mis-statement recently made and frankly acknowledged by the Victor Talking Machine Co., Camden, N. J., they recently sent out the following explanatory letter:

"Camden, N. J., March 16, 1910.

"To the Talking Machine Trade—The Victor Talking Machine Co. recently announced the making of an exclusive contract with Harry Lauder under which, from that date, he was to make records only for the Victor. The contract rights of the National Phonograph Co., Ltd., of London, Eng., were promptly brought to the attention of the Victor Co., and, accepting the statements of the National Phonograph Co., of Orange, N. J., that such a contract was and is in existence, we are pleased to correct our previous statement that Mr. Lauder is making records exclusively for us—the fact being that Mr. Lauder is making disc records only for us exclusively in the United States. Yours very truly,

"VICTOR TALKING MACHINE Co.,

"Louis F. Geissler, General Manager."

The J. W. Jenkins Sons Music Co., the well-known jobbers of Victor talking machines and Edison phonographs, and who have built up a large business in talking machine supplies, report that their Thorn needle, of which they have something to say in their advertisement elsewhere in this issue, is meeting with great success. Jobbers report that customers who have used the Thorn needle speak very highly of it, and the Jenkins Sons Co. are steadily enlarging the popularity sphere of this specialty.

Records of recitations and readings by well-known personalities are growing in demand.

The HALLEY COMET

VISIBLE * ONLY

* EVERY 75 YEARS *

WHILE THE VICTOR IS VISIBLE EVERY DAY

In the exclusive homes of the rich and the humble abodes of the poor.

Mr. Wide-awake Dealer, their mutual love for the best in music is your opportunity.

Would a plan which would personally solicit, in a high-class dignified manner, the ten most influential men of your community, whose names you would send us, be of interest to you?

We are prepared to do this for you at no expense or investment on your part. Our reputation as exclusive wholesalers is our only testimonial.

If you are interested we can name dozens of Dealers for whom we have made sales. Write us. Get in touch with us. Our interests are common. You must sell goods to make us successful and we want to help you do it.

FROM OUR CHICAGO HEADQUARTERS

ROOM 806, NO. 156 WABASH AVENUE, E. P. VAN HARLINGEN, MANAGER.

Jobbers Well Satisfied with the Manner in Which the Spring Trade Has Opened Up—Retail Business in the West Also Shows Improvement—Grand Opera Season Helps Record Sales—The Lyon & Healy Concerts—Aeolian Co. to Handle Talking Machines—Some Opinions on Conditions—Interesting Personalities—Larger Quarters for the B. & H. Fibre Mfg. Co.—Other Activities of the Various Houses in the Windy City—Summary of the News of the Month.

(Special to The Talking Machine World.)

Chicago, Ill., April 7, 1910.

The first spring month of 1910 brought its tale of satisfaction to the Chicago talking machine jobbers. Perhaps there was not the large business predicted on the basis of the notable February transactions, but it made a big, round gain over March of last year.

Talks with local wholesalers reflect gratification with the general status of the dealers. Taken as a whole, the retail business in the West is in better hands than a couple of years ago. There certainly has been a weeding out of the weak-kneed—the little fellows without means or ambition to push the business aggressively. This has been due to two causes, the natural consequence of a period of depression and the efforts of the big companies to confine their agencies to aggressive, responsible merchants. The new dealers now signing up are of a better class and the old are rapidly learning to adapt themselves to modern conditions and go after the best class of trade, to go after it earnestly and not wait for it to drift into their doors. Of course, what has been said here refers to general tendencies—that there are many dealers who are not making the most of their opportunities is true, but the present policy of the companies is inimical to the perpetuation of the laggard.

Local retail trade made a very fair showing the first half of March, but fell off the latter part. The week before Easter was exceptionally dull. The weather was beautiful and the people seemed more wrapped up in preparing their Easter attire than in making purchases. In the foreign colonies of the city, who are big machine and record buyers, Lent is rigorously observed, and the effect was very noticeable on the trade of the small dealers catering to this clientele. Since Easter trade has been opening up although it has not reached normal proportions for the season.

Influence of Opera on Business.

The large downtown dealers are all looking forward to a mighty fine high grade record trade as soon as the grand opera season gets fully under way. The Metropolitan forces opened a four-week's season on Monday night of this week, and the daily papers are teeming with advertisements calling attention to the possibilities of enjoying grand opera in one's own home, and of securing for further study and enjoyment records of the identical numbers sung by the same artists heard at the Auditorium. This kind of exploitation has succeeded in the past in stimulating the sale of both machines and records, and with the golden-throated galaxy lingering in our midst double the time usually spent, the benefit to the "talker" trade should be correspondingly increased.

Lyon & Healy Concerts.

Lyon & Healy, at their afternoon concerts at Victor Hall, feature the selections to be sung at the opera the same evening and advertise the fact liberally in the dailies. Printed programs covering not only the Edison and Victor concerts, but the other complimentary recitals given in the other departments are now furnished visitors.

There is no doubt but that Victor Hall is re-

sponsible to no small degree for the remarkable development of interest in grand opera in Chicago the past few years. As one of the Lyon & Healy sales force remarked the other day: "Six years ago if we played a grand opera selection the majority of the people would get up and depart quietly but expeditiously. Now if we should want to empty the hall quickly all we would need to do would be to put on a couple of very popular selections in succession and the deed would be done."

Even the department stores are catering to the high grade trade this year as never before. Siegel, Cooper & Co. are running Victrola opera concerts every afternoon to fair sized audiences.

Retain Talking Machines.

When it became known that the Bissell-Cowan Piano Co. would discontinue business and the lease on their building at 202 Michigan avenue had been sold to the great Aeolian Co., of New York, for their new Chicago branch there was considerable speculation as to whether the talking machine department would be continued, as the Aeolian Co. do not handle talking machines in any of their other stores. The question was speedily answered in the affirmative, however. Arthur Bissell, who becomes associate manager of the Chicago Aeolian branch, was able to give a good report of what the department had accomplished and Manager Thomas Fletcher confessed that he had always had a sneaking desire to try his hand at the talking machine game. Consequently the Victor department, which occupies the mezzanine floor, is to remain undisturbed and the services of Manager Searles retained. It's an ideal location for Victrola and Red Seal record trade, and if the Aeolian Co. give to the department anything like the support and exploitation afforded their own lines it should develop into one of the most important retail talking machine businesses in the city.

Little Interviews.

"Nothing has demonstrated the cumulative effect of the years of study and experiment spent by talking machine experts as some of the recent records," remarked Arthur Geissler, general manager of the Talking Machine Co. "Voices and instruments which it has seemed impossible to cope with successfully during the past are now being reproduced in a most perfect manner. An instance in point is the late piano solo records of the Victor Co., and from the expressions I have heard from those most qualified to judge a quality of tone is obtained that was impossible a few years ago."

"An encouraging feature of the trade is the manner in which the progressive dealers are adapting the recital idea," said L. C. Wiswell, manager of the talking machine department of Lyon & Healy. "We have a number of dealers in towns of 10,000 and up who have, within the past year or so, inaugurated regular or occasional concerts and they all testify to the great benefits accruing to their trade."

A. V. Chandler, Illinois traveler for the National Phonograph Co., made a trip through the State just prior to the spring election. He found the excitement anent the "drys" and "wets" very high, and one would think from listening to the combatants' talk that the future of the towns depended on the outcome. As a matter of fact some of the towns that went dry a year ago are now wet, and vice versa. In looking over the State Chandler says that the best towns, from a phonographic standpoint the past year, have been about equally divided as to "wetness" and "dryness," consequently the results will have little effect on trade conditions.

Aggressive Dictaphone Campaign.

The Dictaphone department of the Columbia Phonograph Co. was removed on April 1 from the Heyworth building to 210 Wabash avenue, the general Columbia headquarters here, and W.

Parsons and E. A. Parsons, who for fifteen years were associated with the company in the development of the commercial dictation machine business in Chicago, are in charge. They are both experts, pioneers in the business and have a big following. They have already placed orders for quantities of goods which serve to tax the factory capacity. The dictaphones now being shipped are all equipped with universal motors which can be instantly adapted to either alternating or direct current and embody a number of recent improvements.

Various Personals.

E. H. Uhl, manager of the Chicago branch of the Rudolph Wurlitzer Co., is spending a fortnight's vacation at Hot Springs, Ark. He will return Monday.

Marquette Healy, treasurer of Lyon & Healy, has reached Paris in his European wanderings and expects to sail for home on the 10th.

R. Shaw, managing director of the Western Talking Machine Co., Victor distributors at Winnipeg, Manitoba, was a recent Chicago visitor.

Richard Pribyl, who has been connected with the Chicago talking machine trade for some years, and who is now traveling for the Zonophone Co., is here on his first visit to the city since making his new connection.

M. Kreuzsch, who is doing good work for the National Co. through Indiana, was a visitor this week.

John E. Moyer, a live talking machine dealer of Dixon, Ill., and an Amberola enthusiast, is calling on the local jobbers.

Columbia's Kansas City Location.

District Manager W. C. Fuhri, of the Columbia Phonograph Co., has just closed a lease for a new store for their Kansas City branch. The new location is on Grand avenue, adjoining the store of the Hoffman Music Co., and is in the very heart of the music district. The new store is 24 by 125 feet in size with a good basement. It will be handsomely fitted up with four private demonstration rooms, a large opera room in the rear, enclosed offices, etc. The new quarters will be occupied about May 10, and are far more centrally located than the present ones at 809 Walnut street. Mr. Fuhri says that while retail business was somewhat quiet the latter part of March the wholesale business of the Chicago office was the best for a long time.

B. & H. Expansion.

The B. & H. Fibre Manufacturing Co. have outgrown their present factory and have secured larger quarters at the same location, Dearborn and Kinzie streets. After May 1 they will occupy the entire third floor of the building. It is lighted on three sides and admirably adapted for their purpose. Not only will the capacity be greatly increased but commodious offices and demonstration rooms, partitioned off from the factory, will be provided. President F. D. Hall, who has confined himself very closely to the factory heretofore, now has the business so well organized that he is getting a little time to visit his customers among the jobbers in person. He recently spent a couple of days in Kansas City and is now on a trip to New York and other eastern points.

Columbia Co.'s Opera Window.

The Columbia Co. have a good opera window. Printed slips referring to the Columbia artists now appearing with the Metropolitan forces are attached to the window panes and are connected with records of these artists in the center of the window by various colored streamers.

W. A. Lawrence, representing the Standard Sheet Metal Co., manufacturers of talking machine horns, called on the local jobbers recently.

A. D. Geissler's Latest Specialty.

The Talking Machine Co. are having a big demand on their new combination record album and carrying case which they brought

The logo for Lyon & Healy, featuring the company name in a cursive script font, enclosed within a dark, horizontally-oriented oval shape.

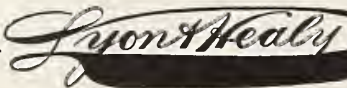

Let Us Assist You

In increasing your sales. We have always tried to do this by giving you the best distributing service in this country. We know that such service enables a dealer to make promises and to keep them, thus insuring increased patronage from his old trade.

Now we propose to help you in securing more new business from new customers and to this end we offer you the services of AN ADVERTISING DEPARTMENT WITHOUT COST TO YOU. We will gladly furnish any dealer who wishes to advertise in his home newspaper, with copies of our most successful retail advertisements *absolutely free* and when desired will send "cuts" used in them, charging only actual cost for the electros. In addition we always welcome inquiries relative to advertising methods. We want to be of genuine help.

With Lyon & Healy's complete service, a dealer handling the Victor or Edison goods, or, better still, both of these unequalled lines, is sure of increased trade.

Write to-day asking for copies of the Talking Machine advertisements. They have brought us business and will do it for you.

The logo for Lyon & Healy, featuring the company name in a cursive script font, enclosed within a dark, horizontally-oriented oval shape.

Wabash Ave. & Adams St.
CHICAGO

out last month. It has proved to be one of the most attractive specialties ever introduced by the company. General Manager A. D. Geissler says that March was not only far ahead of the corresponding month last year but was within 2 per cent. of 1907, the largest March in their history.

L. & H. "Co-operation."

Lyon & Healy offer the services of their advertising department, one of the best organized and most efficient in the country, to their dealers. Not only will they send free of cost proofs of remarkably clever and result-bringing advertisements used in their own retail business, together with the cuts used in them, if desired, at the bare cost of making the electros, but they will be glad to furnish copy for advertisements for special occasions when requested. In fact they desire to co-operate with their dealers in every way to their mutual advantage.

NEW SEEBURG ART CATALOG.

Handsome Volume Shows Various Styles of Coin-Operated Pianos and Explains the Seeburg Selling System—The Seeburg Factory Working Overtime.

(Special to The Talking Machine World.)

Chicago, Ill., April 7, 1910.

The J. P. Seeburg Piano Co., of this city, manufacturers of coin-controlled electric pianos, have just brought forth a handsome "Art" catalog showing cuts of the various styles and explaining in detail the celebrated Seeburg selling system. Inside an attractive cover of Quaker gray on a specially designed page is shown the strong points embodied in the Seeburg product—"Tone," "Art," "Unique Case Designs" and "Perfect Player Mechanism." The top of the page bears the following inscription: "It is a poor piano that knoweth not its own master. Every Seeburg piano bears the name of the maker and carries the maker's guarantee." Pertinent and instructive matter is featured in chapters on "The Seeburg Constructional System," "The Player Construction," "The Acme of Convenience," "The Case" and "The Price."

The factory, located at 1276-1282 Clybourn avenue, has been working overtime to supply the demand for the Seeburg electric coin-controlled pianos; in fact, to such an extent that the company have acquired an additional floor, thus facilitating the output to a considerable degree. However, there is seemingly no let up in the demand since the acquisition and the trade are beginning to realize that the Seeburg instruments are destined to fill a long felt want in the coin-controlled electric field.

BETRAYED BY SUSPENDERS.

H. R. Arris Writes of This Most Essential Article of Man's Dress—How a Richly Embroidered Pair Spelled the Ruin of Jones' Plans to Keep a Talking Machine Free.

In the Chicago Tribune the other day, H. R. Arris discoursed in a learned way on that most essential concomitant to man's happiness—suspenders. He said: "A man will go and buy trousers, neckties, shirts, handkerchiefs, and all his other wearing apparel in any number imaginable, but never would think of possessing more than one pair of suspenders at a time. Any more than this number would seem to be a useless luxury. When the old pair begins to wear he will make use of all kinds of makeshifts to patch them up rather than buy new ones. Wire, string and rope are used indiscriminately for repair work on the broken galuses until one scarcely can tell where the original leaves off and the patchwork starts. No matter what the financial standing of the man with the broken suspenders, no matter how careful he is of his clothing in other ways, he will neglect this article longer and more consistently than any other part of his dress.

"A pair of fancy embroidered suspenders played an important part in a small comedy of domestic life some time ago. A man who re-

joiced in the possession of such a fancy home-made article, but who rejoiced in the possession of scarcely anything else, had bought a talking machine on the instalment plan. Although at the time the purchase was made he was able and willing to pay for the machine, a run of hard luck befell him soon after and he fell behind in his payments.

"The future seemed to indicate a change in the run of hard luck so that the buyer hoped that he soon would be in a position to take up all the back-payments and go on with the future ones. But while he was thus rosily planning how he would pay up, the company was planning how they would get the money.

"Many collectors were sent around to see the purchaser who didn't wish to see them. He was afraid that his promise of future payments would not be sufficient and that they would take the talking machine away from him. Whenever, therefore, a collector hove to in the offing the buyer would fade away on the distant horizon.

"After making a number of such attempts to see the man who owned, or rather possessed, the machine, the collectors thought it was time for decisive action. One of them was therefore sent around with instructions to get the money or get the machine.

"With determination in his heart he hunted up the house of the purchaser and by the ill luck of the hunted found the man who had bought the machine. Being a new collector, he was not known to the buyer nor did he know him, so that although he managed to meet the man at the door before he had time to disappear as usual, he did not know to whom he was talking.

"The purchaser immediately saw that he was unknown and when a request was made for Mr. Jones he replied that Jones was out of town and wouldn't be back for several weeks. The collector wanted to know if any one of the family was at home, but was told that the man to whom he was talking was merely a boarder and that all of the family had gone for several weeks. Thus baffled in his search, the collector started down the steps, but turned to ask one more question. The owner was going into the house and, being in his shirt sleeves, his suspenders were exposed to the view of all who wished to enjoy their embroidered loveliness. But what caught the eye of the collector was that on the back of these works of art was plainly worked out by a loving sister the initials and name of 'J. W. Jones,' the man he was seeking, and thus the canned music was heard no more in that household.

"Incidentally it might be added that the next ragman who visited the Jones' residence carried away with him a pair of hand embroidered suspenders."

PANAMA-PACIFIC EXPOSITION

Planned for 1915, to Celebrate the Completion of the Panama Canal and the Centennial of the Discovery of the Pacific Ocean—To be Held in San Francisco.

(Special to The Talking Machine World.)

San Francisco, Cal., April 5, 1910.

Plans are already being discussed in the various cities on the Coast for the holding of a World's Fair in this city in 1915 to celebrate the opening of the Panama Canal. The title of the celebration will be the Panama-Pacific International Exposition, and it has already been advertised considerably, though no definite arrangements have been made at the present time. Efforts will be made to make the celebration one of the most elaborate ever held in this country, for besides marking the completion of the Panama Canal, the occasion will be taken advantage of to celebrate the fifth centennial of the discovery of the Pacific Ocean by Balboa in 1513 and the rebuilding of San Francisco.

The man who simply does daily duties as they arise will in time achieve the power to meet any emergency.

SUGGESTION VS. ARGUMENT.

Each Have Their Place in Salesmanship—Where Too Much Argument Lost a Big Sale.

Mr. Dealer, do you ever put yourself in the customer's place when you are trying to sell an outfit? Do you stop to realize that salesmanship consists just as much in ascertaining the wants of the customer and meeting them as in persuading him to purchase something he does not want? A certain dealer not far from New York lost a sale that amounted in all to nearly \$350 because he tried too hard to persuade the customer that a mahogany-cased machine would fit into a room of mahogany furniture though the prospect had set his mind on a Circassian walnut case. The dealer urged about the eternal fitness of things until the prospect got tired of the discussion and bought the outfit from another house. True, it was an extreme case, and the dealer was right in theory and according to decorative standards, but the situation was one where suggestion and not argument was needed. The customer is the one who is spending the money, and when he is perfectly satisfied it means an excellent advertisement for the store.

PHONOGRAPH IN PIANO.

A New Development Noted by a Writer in a Philadelphia Paper.

We occasionally find some extraordinary items in our contemporaries of the daily press. For instance, the following from a Philadelphia paper informs us that a local inventor with an eye to the economy of space and dollars "has perfected an arrangement whereby a piano and a phonograph can both be nicely housed in one case. Where space is at a premium, which is distinctly the case in flats, this invention will be found most desirable. The top of the piano is divided into three compartments. In one of the end compartments the turntable of the phonograph is located, the crank extending from the sides; in the other compartments the records are kept and they are open in front so that the discs can be easily removed or replaced. When the lid of the piano is down the caller would not suspect that any other instrument was concealed within, unless he wondered what the crank was for. When the lid is raised, however, the talking machine and its records are disclosed to view. The record is inserted, the lid closed down and the tone passes below either through a panel in front or at the side." Next!

ASKED FOR MONEY, PROBABLY.

Mrs. Hoyle—They say that the tones of the voice have color.

Mrs. Doyle—Shouldn't wonder; I know I have said things which made my husband get purple in the face.

COURT HOLDS WITH VICTOR CO.

That Sale of Leeds & Catlin Records by American Graphophone Co. Was an Infringement of Berliner Patent and Violated Permanent Injunction—Court Imposes \$1,000 Fine—Decision to be Appealed—Messrs. Pettit's and Cromelin's Views of the Decision.

On April 1 the case of the Victor Talking Machine Co., Camden, N. J., against the American Graphophone Co., New York, was argued in the United States Circuit Court, New York City, before Judge Lacombe. The question at issue was whether the stenciling or relabeling of a quantity of Leeds & Catlin Co.'s records by the defense was an infringement of the Berliner patent, and therefore their sale to the Simpson-Crawford Co., of that city, contempt of court.

Practically a like issue was involved in a suit between the same companies pending in the United States Circuit Court at Trenton, N. J.,

which was reached Monday and sent over until Judge Lacombe's decision was rendered. The latter's opinion was handed down on April 6, the Victor Co.'s contention being sustained, the American Graphophone Co. were found guilty of contempt in evading the perpetual injunction on the Berliner patent, and were fined \$1,000.

Regarding the decision, Horace Pettit, counsel for the Victor Talking Machine Co., said: "On March 14, 1910, we secured a rule on the defendant to show cause why attachment should not issue for contempt of court in violating the injunction of April 6, 1906, in the suit of the Victor Talking Machine Co. et al., against the American Graphophone Co., on the Berliner patent No. 534,543. While the American Graphophone Co. has a license under the Berliner patent allowing it to manufacture disc records and machines and to sell the same, that company, as we contended, in violation of the decree of court, bought a large number of disc records manufactured by the Leeds & Catlin Co., which had been held to infringe that patent in a suit of the Victor Co. against the Leeds & Catlin Co., and which had been enjoined in accordance with the decisions of the Circuit Court, Circuit Court of Appeals and the Supreme Court of the United States. The American Graphophone Co. then sold some of these Leeds & Catlin records to certain dealers, among others Simpson-Crawford Co., of New York City, with a new label thereon, styled 'Sir Henri' records.

"These contempt proceedings were fully argued before Judge Lacombe on April 1. The defendants held that they had a right, under their license, among other things, to buy and sell these Leeds & Catlin records. We contended that to buy and sell these Leeds & Catlin records, which had been enjoined as infringing records by the Circuit Court, Circuit Court of Appeals and Supreme Court of the United States, was not only a violation of the license agreement but a violation of the decree of the court in the suit against the American Graphophone Co., entered in April, 1906, and in contempt of court.

"The opinion of the court was filed Wednesday, sustaining our contention. The court said, among other things: 'It could hardly have been the intention of both parties to allow the Graphophone Co. to gather up wherever it could the infringing records of other convicted violators of complainants' rights and resell them under its own name.'

Paul H. Cromelin's Statement.

When asked for a statement regarding the matter, Paul H. Cromelin, vice-president of the Columbia Phonograph Co., said: "Some weeks ago the American Graphophone Co. began an action in the United States Circuit Court at Trenton, N. J., against the Victor Talking Machine Co. with a view to enjoining that company from unlawfully interfering with our customers in the prosecution of their business. The proceedings were begun March 3. One of the grounds of dispute arose out of the sale by us to a customer of a small lot of single-faced Leeds & Catlin records, which had been taken in under our exchange plan from customers of the Leeds & Catlin Co., after we had enjoined that concern from further manufacturing records in infringement of our Jones patent, No. 688,739.

"As is well known, we have discontinued the manufacture of single-faced records, and last fall, in the ordinary course of business, we sold this customer a quantity of these old uncatalogued records of our own manufacture with their special trade label 'Sir Henry.' Included were the lot of Leeds & Catlin records referred to, which were also relabeled 'Sir Henry.' There is no dispute as to our right to sell records of our own manufacture, and the question involved in the differences which have arisen is whether our license under the Berliner patent, which we have taken from the Victor Co. in exchange for our license to them under our Jones patent, is broad enough to warrant our reselling this lot of Leeds & Catlin records. We believe it is. The Victor Co. thinks it is not, and after we had begun suit in New Jersey, they brought proceedings against

us in New York on March 14. We have had one skirmish and the court of first instance in New York agrees with them. That's all there is to it. The decision in no way affects goods of our manufacture.

"The matter is hardly of sufficient importance to warrant a continuance of the fight, for the acts complained of were committed months ago and the records are all sold. In order, however, to try out the legal question as to the breadth and scope of the license we have granted the Victor Co. and received from them an appeal will be taken immediately. There has never been any doubt in our minds that we were in the right, but should the Circuit Court of Appeals sustain the lower court in defining the scope of the licenses, the result will have no effect whatsoever on our business and we will gracefully submit to the judgment of the honorable court."

EXPANSION WITH C. B. HAYNES & CO.

This Enterprising House of Richmond Moves Retail Department to New Quarters—Will Occupy Their Own Building for Wholesale Purposes on June 1.

(Special to The Talking Machine World.)
Richmond, Va., April 10, 1910.

C. B. Haynes & Co., the enterprising jobbers of Edison phonographs, records and supplies, have moved their retail department to 5 North Seventh street, where they have fitted up a store that ranks to-day as one of the finest talking machine establishments in the South. On June 1 they intend to move their wholesale department to their own building at 10 North Fourteenth street, where they will have splendid facilities to cater to their increasing trade. It has always been the policy of this house to keep the dealers well supplied, and to that end they will carry a stock in the new quarters that will enable them to look after the needs of their dealers in a manner that must excite the appreciation of their clientele.

VICTOR-VICTROLA FOR BAZAAR.

Presented with a Full List of Records by Enrico Caruso to the Bazaar for the Benefit of the French Hospital.

Among the many gifts presented by prominent personalities to the Bazaar which occurred last week at the Metropolitan Opera House for the benefit of the French Hospital one of the most interesting was a Victor Victrola and a full assortment of Victor records of Caruso's own voice, presented by Enrico Caruso, the famous tenor of the Metropolitan Opera House. Judging from the tickets sold for this gift more than twenty times the value of the machine and records was realized for the hospital. The gift was much appreciated by those interested in the Bazaar.

"ORECALWAS" APPEARS IN PORTLAND.

The people of Portland, Ore., have been much interested in an Eilers announcement inviting the public to hear the "Orecalwas" sing at the Eilers piano house, 353 Washington street. To people who were invited to analyze the "Orecalwas" and figure out whether it was human or operated mechanically, the latter mystery appeared as a cross between the cartoonist's picture of Roosevelt's head and the body of a sea lion.

While the secret of this mysterious object was not revealed, yet it is to be assumed that it was a talking machine enclosed in a semi-human dress which was doing all the stunts. And it may be also assumed that the "Orecalwas" meant the States in which the Eilers stores are prominent factors—Oregon, California and Washington. Meanwhile the "Orecalwas" was the talk of Portland for some time, and concentrated considerable attention on the Eilers talking machine department.

If you are interested in the goods you can interest the other fellow. Finding out the interesting points and telling them—that's salesmanship.

PACIFIC COAST HAPPENINGS.

Spring Season Opens Up Well—Sales Steadily Increasing—Hornless Machines Popular—Pacific Phonograph Co. in New Quarters—Bacigalupi & Sons Rearranging Store—New Downtown Location for Columbia Wholesale Store—Columbia Co. Items—Sherman, Clay & Co. Pushing the Victor Line—Kohler & Chase in Oakland—Other Items.

(Special to The Talking Machine World.)

San Francisco, Cal., April 1, 1910.

The spring season in talking machine goods is now at its height. While sales in some quarters quieted down a little just before Easter, there was a steady increase of sales up to the middle of March, and the month as a whole is far ahead of the earlier part of the year. The last week has been particularly satisfactory, with reports of heavy sales and orders for new goods coming from all parts of the State. Conditions are especially promising in the country. It is too early for the strenuous work of the fruit and grain harvests, but with rain at just the right time and all conditions favorable for heavy production, country people are loosening their hold on their money. The development of the outside trade in recent years has been wonderful, not so much in quantity as in quality of the goods purchased. Victrolas, Grafouolas and Amberolas, which were at first regarded with suspicion by the small outside dealers, are now becoming almost staples in the trade, and a heavy demand is setting in for the best records that can be had.

The Pacific Phonograph Co. have just occupied offices and storage rooms on Stevenson street, in the rear of Peter Bacigalupi & Sons, and have about completed the stock-taking and other work incident to the transfer of the Edison jobbing business. The complete stock has not yet arrived, but is expected within a week or two. The salesmen are now getting together, and within the next week will be started on the road, many of those formerly with Peter Bacigalupi & Sons having gone over to the Pacific Phonograph Co.

Peter Bacigalupi & Sons are rearranging their Market street store to adapt it to the new conditions. The jobbing business in the Zonophone line is being carried on with customary energy, and by concentrating on this line Mr. Bacigalupi expects to expand the trade materially. He is still selling off a lot of the stock taken over from Kohler & Chase last month, and while business has been somewhat upset by the changes, the local retail business is in good condition.

Aside from the changes affecting the Pacific Phonograph Co. and Peter Bacigalupi & Sons, the most interesting announcement of late is of the downtown location of the Columbia Phonograph Co.'s wholesale branch in this city. The company have taken a three-year lease on the entire top floor of the Allied Arts building, 334 Sutter street, in the musical merchandise district. Mr. Scott, the local manager, states that for the present no attempt will be made to do a local retail

business, this being left to Kohler & Chase, who are handling the trade very satisfactorily in their new building on O'Farrell street. By the time this lease expires it is hoped that suitable quarters can be secured on a ground floor, where a retail branch can be installed. Coast Manager W. S. Gray, of the Columbia Phonograph Co., is now on his regular trip through the north, and W. S. Storms, the outside man, is in the San Joaquin valley. He reports that the outlook in the country is extremely good.

Since the Dictaphone business was taken up again by the local Columbia branch, the offices have been retained in the Phelan building, under Francis W. Downe, who has had charge of this business for several years. The outlook in this line is especially good, several large orders having been sent to the factory of late, including one from the Southern Pacific for about \$10,000 worth of machines.

Kohler & Chase have just started their Columbia agency in Oakland, where they expect to build up a large business in this line. The Sacramento agency has been turned over to the Columbia Graphophone Co., which will continue to conduct their business in Kohler & Chase's store.

The San Francisco management is very enthusiastic over the Grafonoia Regent, orders for which are still coming in faster than they can be filled. The offices will be established in the downtown quarters before the middle of the month.

Andrew G. McCarthy, of Sherman, Clay & Co., returned from a strenuous northern trip about the middle of March. He states that business is flourishing all through the Northwest, with prospects for a big summer on Victor goods. He states that the business for last month set a new record for March, and that there is a healthy growth of business all over the Coast, good orders being received from all the outside men. Large shipments of Victrolas are being received all the time, but it seems impossible to accumulate any considerable stock ahead of requirements.

Sherman, Clay & Co. have had some notable talking machine displays in the last few weeks. The local window this week was decorated with Victor machines, records and violins, with the announcement of the recitals here and in Oakland of Maud Powell. The store in Portland, Ore., had a magnificent Easter display, in which the background was made in imitation of a pipe organ, with a choir boy in the foreground and an attractive arrangement of Victor machines and records suitable for the season.

CRESSEY & ALLEN PROGRESS.

(Special to The Talking Machine World.)

Portland, Me., April 7, 1910.

Cressey & Allen, jobbers of Victor goods, report that their business during the last two years has been steadily increasing, particularly so during the last year. The past six months has convinced them, without any doubt, that it is only a question of time when more room and greater facilities will be necessary to enable them to take care

of their Victor business in the manner in which they are anxious to do. They say their wholesale business is increasing daily, while their retail business is entirely satisfactory to them.

HALL OF FIBRE NEEDLE FAME

Visits New York and Other Eastern Centers—B. & H. Fibre Needles Grow in Popularity—How They Increase Record Trade—Interesting Chat with Mr. Hall.

Fred D. Hall, president of the B. & H. Fibre Mfg. Co., Chicago, was a visitor to New York last week, looking over the trade situation in this city, as well as Philadelphia, Boston and other points.

In the course of a pleasant chat in The World sanctum Mr. Hall spoke in a most optimistic way of the increasing demand for fibre needles throughout the country. He said: "Our business has been increasing month after month, and dealers and jobbers find that their customers appreciate the B. & H. fibre needles, because they result in an increased demand for records among the largest purchasers of high-priced records—people who like to get the best and most musical effects in interpretation. These purchasers find that the B. & H. fibre needle makes the playing of a record a source of extreme pleasure, and as a consequence dealers who sell fibre needle users say their record sales are simply doubled.

"We have been increasing our facilities to meet the increasing demand for our fibre needles, and have been compelled to take this course in order not to disappoint our customers.

"We have hundreds of very interesting letters from users of B. & H. fibre needles, which, if read, would open the eyes of those who are not acquainted with the special qualities of the fibre needles and their ability to preserve the life of the record for all time. The B. & H. fibre needles have led to a new interest in the talking machine. People become as enthusiastic in getting the finest results out of their various records as do the musicians who operate piano-playing mechanisms with all the latest marvelous devices for securing color effects when playing the works of the great masters. The B. & H. fibre needle makes the talking machine essentially musical, and by this means it appeals to a large constituency."

During his sojourn in the East Mr. Hall visited the Edison plant at Orange and the Victor plant at Camden, N. J. He expressed himself as delighted with the courtesies shown him all along the line, and paid some pretty compliments to New York City and its remarkable progress since his last visit to the metropolis. It is not at all improbable that Mr. Hall will make a short trip to the South previous to returning to Chicago.

And speaking of the B. & H. fibre needle—it will be worth while for the reader to look up the B. & H. fibre needle advertisement which appears elsewhere in this issue of The World and read the concise but forceful statements regarding this specialty put forth by the manufacturers.

INDIANAPOLIS GLEANINGS.

Business Not Over Active—Grafonola for Store Opening—Musical Echo Co.'s Victor Display Admired—Dealers Looking Forward to Opera Period—Pearson's Plans—Grafonola Regent a Big Seller—Other Happenings.

(Special to The Talking Machine World.)

Indianapolis, Ind., April 9, 1910.

The talking machine business in Indianapolis has been up to the average for the last month. The weather has been fairly good, although three or four excessively warm days about Easter time cut into the business to some extent. Dealers are now getting ready for the summer business which includes the sale of talking machines to be used in summer camps and at summer entertainments and concerts. This line of business is not up to the winter standard, but it is about all there is in the summer time.

S. F. Knox & Co. have opened a new five-and-ten-cent store, in East Washington street, the largest in the city. They gave a grand opening and a Grafonola and orchestra were used. Hundreds of people viewed the new store, but no goods were sold on that day. The company have on sale at ten cents each the Columbia wax records, which are now no longer made.

Warren Bird, in the State Life Building, who represents the Dictaphone Co., is doing a nice business. He has placed commercial machines in the offices of some of the best known lawyers and business men of the city. The only trouble is, he says, that he can't get enough stock to supply the demand.

The play of Charles B. Sommers, "The Winding Way," which was presented at the Murat Theater by William Faversham, was well received and favorable comment was given in the press. Mr. Sommers is manager of D. Sommers & Co., which firm among other things handles Columbia talking machines.

The Grafonola Regent is popular in Indianapolis and is one of the best sellers among the

high-priced machines. The local Columbia agency has disposed of every Grafonola that was received within a few days after it was placed in stock and many future orders have been taken.

Several nice Easter windows were shown by the talking machine dealers. One that attracted much attention was that of the Musical Echo Co., which handle Victor machines. This window was a cathedral scene showing a choir boy before an immense organ. C. V. Weaver, who has charge of the window decoration department of the Columbia agency, prepared a window, the central device of which was a revolving instrument showing a double-disc record and a Regina music plate.

Talking machine dealers are looking forward to good sales on April 27 and 28, when the Metropolitan Opera Co. will appear in Indianapolis. They expect to sell many Victor records made by the stars of this company.

The remodeling of the Pearson Piano house in North Pennsylvania street has been delayed somewhat. This company will not vacate its branch house in Massachusetts avenue until the new store is to be completed and the removal of the Kipp-Link Co., who handle Edisons, will therefore be delayed until that time.

The Wulschner-Stewart Co., who handle Edison talking machines, are pushing the business in commercial machines pretty hard. Heavy advertising is being carried on and it is said this line of the business is showing rapid progress.

The Orpheum moving picture theater in East Washington street, has installed a pipe organ at a cost of \$2,700, which is a great attraction for all of the patrons of such shows. It will be used with pictures based on Biblical, mythological and historical subjects. The mechanism of the organ is in the basement and the player sits in the orchestra pit.

The automobile show brought a good crowd to Indianapolis and the penny arcades and the moving picture shows noticed a considerable increase in business. Several big things are scheduled

for Indianapolis in the next few months, among them a grand aeroplane meet at the Speedway.

The Chance-Clough advertising agency, one of the largest in the city, has recently installed several Edison business phonographs. They are greatly pleased on account of the amount of time which is saved by using the machines. The machines were bought from the Wulschner-Stewart Co., the local agents.

A YOUNG MAN OF TALENT.

M. D. Easton, the Clever Son of Edward D. Easton, on Tour with Princeton's Famous Triangle Club, Composed of the Dramatic Talent of the University.

M. D. Easton, only son of Edward D. Easton, president of the Columbia Phonograph Co., General, now in his senior year at Princeton College, was on tour with the Triangle Club, composed of the dramatic talent of the university, returning Wednesday of last week. The visit of this famous club is a social event wherever they present their play, and in this capacity have given performances in Washington, D. C., Indianapolis, St. Louis and Chicago. In St. Louis the members were tendered a banquet by the local alumni. Mr. Easton, who is twenty-two years of age, will finish his collegiate course and graduate in June. He has developed unusual talent in the dramatic field.

SPAIN AS A "TALKER" MARKET.

Spain is proving a good market for high class talking machines and records, and it is being worked to very good purpose by the talking machine men of France. The market is especially large for popular priced machines, because the working classes are extremely musical, but, of course, limited in means.

Tact is one of the best of mental possessions, either natural or acquired.

No. 400 Closed

When closed, the complete cabinet occupies a minimum of space, being much less than a foot square. Thus it will be seen what an ideal self-selling proposition this new Collapsible Display Cabinet is. The cabinet costs you nothing, and besides, you are the gainer by over 50% in cash profit on your investment.

The C-D-C DEVICE contains 38 pieces of the very best selling

HOHNER HARMONICAS

assorted in 16 different styles, all keys, and can be retailed at the following prices:

ASSORTED HARMONICAS	YOUR INVESTMENT	YOUR GAIN
16 pieces to retail at 25c ... \$4.00	\$8.75	Per cabinet and Harmonica Assortment
12 pieces to retail at 35c ... 4.20		
10 pieces to retail at 50c.... 5.00		
Total retail value \$13.20		Over 50 per cent. Cash Profit and a superb Display Cabinet

M. HOHNER, 475 Broadway, NEW YORK

CANADIAN OFFICE, 76 York Street, Toronto MEXICAN OFFICE, 4a Calle de Tacuba, No. 33, Mexico City

HARMONICAS

ACCORDIONS

BLOW ACCORDIONS

What is the C-D-C Device ?

Why, it is the most remarkable Harmonica selling proposition ever devised. It sells Harmonicas. The C-D-C Device consists of a three-tray cabinet of the best seasoned wood, beautifully finished in a dark mahogany piano polish, and when closed resembles an elaborate jewel case.

The enormous demands that we have so far received for the Assortment speaks for the excellence of this money maker. Owing to the novel arrangement of this cabinet and its peculiar construction it can be thrown open and closed in a moment's time. When the cabinet is open the Harmonica display is exceptionally attractive, exhibiting its entire contents of 38 Harmonicas at one time.

No. 400 Opened

REVIEW OF MAY RECORDS.

Issued by the Victor, National, Columbia and Universal Companies

An impressive feature of the Victor Talking Machine Co.'s Red Seal list of records for May is a series of seven records from the garden scene in "Faust" which completes this greatest of operatic acts. The artists participating are: Geraldine Farrar, who sings "Le Roi de Thule" (88229); Farrar-Caruso-Journet-Mme. Gilbert in "Seigneur Dieu," quartet (95204); "Eh Quoi Tournes Sente," quartet (95205); Marcel Journet, bass, "Invocation Mephistopheles" (64119); Miss Farrar and Caruso, "Tardi si Fa," duet (89032); "Sempre Amar," duet (89031); Miss Farrar and Journet, "Elle Ouvre Sa Fenetre" (89040). Riccardo Martin, the American tenor of the Metropolitan Opera Co., is represented by two Red Seal records, Puccini's "E Luceran le Stelle," from "Tosca" (87050), and Dvorak's Love Song, "Als Die Alte Mutter" (87051). Leo Slezak, the notable tenor of the Metropolitan Opera forces, is heard in two numbers in German, a selection from Goldmark's "Queen of Sheba" (64115) and "Depart, Fair Vision," from Massenet's "Manon" (64116). Lovers of the piano will be delighted with two Chopin studies by Wilhelm Backhaus, the Etude in G sharp and the Etude in A flat (74159). This is a most important and invaluable addition to the piano records listed by the Victor Co. Backhaus seems to possess the happy knack of getting the very best tonal results on the records. The regular list of Victor records for May includes some numbers that are destined to win a wide popularity. The prelude from Wagner's "Lohengrin," played by the La Scala Orchestra of Milan (31779), is a remarkable performance of a remarkable work. Other instrumental numbers of unusual merit are the "Blue Danube Waltz," by Strauss (31777); Pierne's Serenade (5770), played with brilliancy and charm by the Vienna Quartet, and Von Suppe's Tantalusqualeen overture (31776), which is given a splendid reading by Arthur Pryor's Band. The Victor Light Opera Co. is represented by Gems from "San Toy" (31778), and Gems from "The Chocolate Soldier" (31780), which afford proof that the Victor Light Opera singers are improving all the time. M. Rocca, the accomplished young tenor of the Opera Comique, contributes a vocal number from "Lakme" (5771) which will win favor. In the popular field Nora Bayes is heard in her inimitable singing of "Has Anybody Here Seen Kelly" (60013), while Jack Norworth is represented by a medley of college songs (60014), which undoubtedly will be included in the repertoire of every college boy and college graduate the country over. The Victor double-faced record list is especially good this month, and, as can be seen elsewhere, includes some combinations of instrumental and vocal numbers that must unquestionably win the consideration of purchasers.

* * *

Some distinguished artists are to be found in the National Phonograph Co.'s list of grand opera Amberol records for May. Carmen Melis, the celebrated operatic soprano, sings "Vissi D'Arte" from "Tosca" (B188); Marguerita Sylva, soprano, is heard in Habanera from "Carumen" (B189); Blanche Arral is heard to splendid advantage in "Lecocq Bolero" (B190); Riccardo Martin, the American tenor of the Metropolitan Co., is represented by "The Drinking Song" from Mascagni's "Cavalleria Rusticana" (B191); while Gustave Huberdeau, baritone, sings the "Berceuse" from "Mignon" (B192) in a really charming and finished style. It is a splendid example of baritone or bass singing. This list, as a whole, is one of the best ever put out by the National Co. and will undoubtedly add to the growing popularity of the grand opera Amberol records. In the regular Edison Amberol list, among the instrumental numbers that will win favor are the "Entr'acte" from "The Prima Donna," played

charmingly by Victor Herbert and his orchestra (420); Strauss' "Memories Waltz," by the National (London) Military Band (428); "To You," waltz serenade by the Vienna Instrumental Quartet (429); "La Gipsy" mazourka, brilliantly played by Sousa's Band (413), and a very clever arrangement of Arditi's "Kiss Waltz," played by H. B. Henton (417) as a saxophone solo. In the vocal list, as will be noted elsewhere, many of the popular productions of the day, as well as the standard numbers, are represented. The well-known popular song, "By the Light of the Silvery Moon," is destined to score a tremendous popularity. It is sung by Ada Jones and male quartet in a really delightful manner, and is destined to win a great vogue. In the Edison Standard list, among the numbers that particularly stand out is the playing of "Narcissus" (10350) by Sousa's Band, and the "Hungarian Dance" by Victor Herbert and his orchestra (10353). In the foreign Amberol list two numbers in Italian sung by F. Daddi (7500-7501), and two Standard numbers, an Italian song by Daddi (20606) and a Hebrew song by S. Paskal (21016), are numbers of more than ordinary merit. The list, taken as a whole, is an interesting and comprehensive one, and should certainly hold the attention of Edison adherents.

* * *

There is a pleasing diversity in the records listed by the Columbia Phonograph Co. for May. There is a strong representation in the 12-inch list, a striking feature being Raymond Hitchcock, whose singing of Burt's "Wal, I Swan" is a classic of its kind. Few can equal Hitchcock in songs of this character. The record backing up this is "Visions of Salome," played by Prince's Orchestra (A5162). Another unusually strong record in this list is selections from Verdi's operas by Prince's Orchestra, and "The Miserere" from "Il Trovatore," sung by Miss Stevenson, John Young and the Columbia Quartet (A5165). This record will be a delight to the followers of Verdi, and is destined to win a remarkable popularity. George Lashwood, the celebrated English music hall baritone, is represented by two songs sung most delightfully and humorously (A5164). Another recent engagement of the Columbia Co.—Manuel Klein's New York Hippodrome Orchestra—is heard in Tchaikowsky's "Flower Song," which is backed up by a soprano-tenor duet from "The Dollar Princess" (A5163). In the 12-inch Symphony record list David Bispham, the distinguished operatic baritone, is heard in "The Boat Song" and "The Pauper's Drive," the latter a new song which has made quite a sensation in concert circles (A5166). Bispham sings these numbers in a manner to display his remarkable vocal and dramatic powers. The Columbia 10-inch list includes quite a number of the latest copyrighted song successes of the day. A glance through the list will show dealers that they have here an opportunity for building up a big trade with the songs that are being sung by all the

leading musical artists and the popular singers of the day. For instance, "Where the River Shannon Flows" and "Red Clover" (A815), and "Has Anybody Here Seen Kelly?" by Miss Ada Jones; "Whoop, La, Willie, Don't Let Me Go," by Paul Southe (A810), and "The Cubanola Glide" and "Shaky Eyes," sung by Arthur Collins (A811), are only a few among a very imposing list of the favorites of the day. It is unnecessary to enumerate the numbers listed under the captions of the Columbia two-minute and four-minute indestructible cylinder records—they can be seen in the list printed elsewhere. They include a number of standard numbers—songs that will ever be popular. In the four-minute records three numbers that stand out especially strong are the Sextette from "Lucia," played by Lacalle's Band (3060); "Come Where My Love Lies Dreaming," vocal quartet (3062); "That Mesmerizing Mendelssohn Tune," baritone and tenor duet by Collins and Harlan (3065), and the "Keler-Bela" overture played by Lacalle's Orchestra in a very spirited manner (3063). The Columbia list, taken as a whole, as before stated, is admirably diversified and covers all demands along classic and popular lines.

LOVE-MAKING BY PHONOGRAPH.

After having been courted for more than five years by a suitor upon whom she set eyes for the first time less than two months ago, Miss Katherine Bell, ingenue for Blanche Walsh, in "The Test," has finally succumbed to the entreaties of a New York law school student, and at the end of the actress' engagement in Los Angeles, she retired from the stage to marry.

The bridegroom-to-be is Hastings Speed, son of a well-known New York lawyer of that name. The young man, it is said, carried on his courtship by phonograph. Month after month he poured his entreaties into records and sent them about the country after Miss Bell. She put them on her phonograph and listened from time to time, purely out of curiosity. Finally she consented to meet her suitor. Speed made haste to Chicago and found that Miss Bell was a girl whom he had known in his childhood days at Elmira.

The odd courtship came about as the result of a visit the actress made to a phonograph store in New York. She priced machines, but left the shop without buying any. The following day a phonograph was delivered to her hotel. Thinking there was a mistake, she called the dealer on the telephone and he told her a young man unknown to him had paid for it and ordered it delivered to her address. From that time she began to receive "The Love Letters of a Record."

Both young people, after consulting with their parents, set the wedding day for March 14 in Los Angeles.

A talking machine company in Paris is publishing disc records of socialistic songs.

TRADE IN MONUMENTAL CITY.

April Business Starts Off in a Lively Manner—Dealers Satisfied with Conditions—Silverstein Giving Daily Concerts—J. A. Grotten-dick with Cohen & Hughes—Other Changes—With the Other Houses in the Trade.

(Special to The Talking Machine World.)
Baltimore Md., April 9, 1910.

Judging from the way the present month has started in business for April will not be up to the expectations desired by the dealers. The slacking up in the trade seemed to have started in toward the end of Lent and there has been no material change toward briskness since then. The month of March, as a whole, however, was quite satisfactory, while reports for the first three months of the present year show a healthy increase over the conditions that prevailed during the same months of 1909. It must be admitted though that the local dealers in almost every case are optimistic, and they feel that the slight falling off in the trade is only temporary and that before the spring ends they will be able to say that that particular season of 1910 was one of the most satisfactory that they have had for several years.

Naturally, when these slumps appear, the dealers look for the reason or reasons for these vagaries of the trade. One dealer said that he found many of his customers are investing their money in various kinds of stock, with the result that they have no ready money for talking machines or records, while another declared that automobiles have been responsible for a part, at least, of the dropping off of receipts. He says that several of his buyers have admitted giving way to the motor car craze and, consequently, they find all they can do just now to pay for machines that they have purchased. Many other reasons have also been given by former purchasers, especially those who have kept a good supply of records in their homes.

Morris Silverstein, who handles Victors and

Columbias at 116 North Howard street, has been giving daily concerts at his store. He also has a very attractive window display which attracts large crowds.

B. Feinberg, traveling representative for the Columbia Phonograph Co., has been visiting in this territory and was a caller on Manager L. Allan Laurie, of the local branch.

Joseph A. Grotten-dick, who has been manager of the local branch of the E. F. Droop Co. since its advent into Baltimore about five years ago, has resigned that position and taken a similar one with Cohen & Hughes. The latter firm has become a local jobber for the Edison machines, thus making two jobbing houses in Baltimore. The other one is the E. F. Droop Co.

W. C. Robert, who has been connected with the Droop Co. for a number of years, has been made manager of the local store. He reports business with both the Victor and Edison machines to be in excellent shape.

Sanders & Stayman report a good month with the Columbia and Victor machines, while similar reports are made by E. R. Eisenbrandt Sons regarding the Victors.

NEW YORK TALKING MACHINE CO.

Have Built Up a Strong Organization and Are Steadily Expanding Their Business—The Opening Months of This Year Show Big Improvement as Compared with Same Months Last Year.

The steady increase in the business of the New York Talking Machine Co., 83 Chambers St., New York, is a tribute to this effective and efficient organization. When reports of slow or even dull trade were uppermost topics this company never failed to render an optimistic statement, which was borne out by the facts. Carrying as full and complete a stock of Victor records, machines, etc., as any distributor in the country, if not larger, they have seldom, if ever, been unprepared to fill 100 per cent. of the dealers' orders entrusted to their care. This has been their invariable policy, and it has been maintained sometimes in the

face of great odds, when congestion has ruled at the factory and they have been so far behind on orders that daylight was not even in sight.

The energetic spirit dominating this enterprising and resourceful company prevails in every department, from Manager Williams, through the office force and traveling staff to the stock and shipping departments. Of current conditions, in so far as they pertain to the company, General Manager Williams, a man of few words but of forceful action, said:

"Every month this year is not only ahead of that in 1909, but exceeds any previous month in the history of the firm. This is particularly true of March, which has been the best on record. We cannot see why 1910 should not be a prosperous one for the talking machine trade, especially for Victor dealers. The Victor goods are so firmly established as leaders in their line that argument to the contrary seems idle talk. At any rate, that is our firm belief, and the great increase in our business proves this statement to be a fact. As a matter of truth, at times we have been pushed to fill orders, not from lack of stock, as we keep this up to the top notch at all times, carrying out our 100 per cent. delivery policy to the letter, but for other reasons not worth while mentioning just now.

AN ATTRACTIVE WINDOW DISPLAY.

The Kramer Music House, Allentown, Pa., made a window display in honor of the Easter season that aroused the admiration and won the praise of all who saw it. They used the standard Victor prepared display as the basis of the treatment. The window was illuminated at night and resulted in the sale of a large number of machines and records.

None of the talking machine record makers have yet reproduced the still small voice of conscience we read about.

The rich man calls it ennui, the young man calls it spring fever, but the general public calls it laziness.

THE TRADE IN CINCINNATI.

Decided Improvement Reported in Middle West Business—New Firm of Talking Machine Dealers—Geo. P. Gross to Handle Talkers—Billboards for the Salm Co., New Lines for J. C. Groene & Co.—What the Various Dealers Have to Report Anent Conditions—Difficult to Get Enough Goods.

(Special to The Talking Machine World.)
Cincinnati, O., April 9, 1910.

There is said to have been a decided improvement in the Middle West business in the past month. Jobbers have been receiving inquiries from new sources and are busy tending to the wants of those already on their list.

A. Cipolloni & Co. is the name of a new firm which has joined the ranks of dealers selling talking machines. Cipolloni has established a store at 625 Plum street, where he is making a feature of Caruso pieces and others savoring of Sunny Italy.

George P. Gross, Main and Woodward streets, has arranged with the Milner Music Co. to take on a line of talking machines in connection with his piano wareroom. His wants in this direction were supplied last week. The Milner Music Co. are giving much of their time looking after the desires of dealers. Manager W. A. Timmerman stated a few days ago that additional help has been employed to open up new fields in the line of dealers' agencies. The former spent the early part of this week in Chicago, visiting the Windy City on a business mission.

The Salm Talking Machine Co. last week closed contracts for eighteen signs, of thirty feet each, for billboards in various parts of Cincinnati. The Victrola and the Grafonola will be featured.

The Victrola and the Amberola lines have been taken on by J. C. Groene & Co., and the firm believe both will be winners. They have already had quite a number of inquiries and have good prospects of selling those now on the floor. The company are about to make extensive changes

about the premises. The talking machine department, including the Concertophone, which has been bought outright by the Ohio Concertophone Co. from Chicago people, will be installed in the basement. The ground floor will be given over to the display of sheet music. Hereafter the Concertophone will be manufactured in Cincinnati. Joseph Krolage, who has charge of the talking machine department of the Groene Co., is again back on the job, after having been separated from his appendix. Krolage is exceedingly happy over his recovery.

John Arnold's talking machine business during March was fairly steady particularly in the popular priced lines. The special Victor record, "Has Anybody Here Seen Kelly?" sung by Miss Nora Bayes, is the big selling record on the April list.

Manager S. H. Nichols, of the Columbia Phonograph Co., advises that he has just closed a very satisfactory business for March, it ranking with the largest March business in the history of the Cincinnati store. The demand for the Grafonolas and grand opera records continues to increase almost daily, and one day's business in March included the sale of seventeen Grafonolas. Next to the Grafonolas, the medium priced instruments made the best showing, with a large sale of double face discs and Columbia indestructible records.

This branch signed up more exclusive Columbia dealers in March than any other previous month. Inquiries by mail are very large, and these inquiries invariably result in orders of satisfactory amounts.

The Rudolph Wurlitzer Co. report that the talking machine business for the month of March has been in every sense of the word a record breaker. The traveling men all report business improving and are sending in substantial orders as well as starting new dealers in all sections, in both the Victor and Edison lines. The mail orders have also been increasing, necessitating an extra night shift of men to fill same.

The local retail trade has been particularly

satisfactory. The large number of Victrolas and Amberolas sold this past month to representative musical families is particularly reassuring. The new McCormick Victor records are going like wild fire.

The question as it now presents itself is not can the goods be sold, but how to get them. The standing orders on hand for Victrolas and Amberolas are enormous. The Red Seal record trade is growing very rapidly, proving the fact that Cincinnati is a musical city. All in all the trade seems solid and durable, totally different from the spasmodic kind of some few months ago.

WILL EXHIBIT AT RICHMOND.

The Victor Co., the National Phonograph Co. and the Columbia Co. Will Be In Evidence at the Trade Exhibit to be Held in May.

The Victor Talking Machine Co., Camden, N. J., have reserved two spaces, Nos. 27 and 28, on the side, at the Richmond Piano Exhibition. The National Phonograph Co., which were placed on 23, adjoining the Columbia Phonograph Co. on 22, have likewise secured an additional space at No. 24. The exhibition runs from May 16 to 21.

Manager Green, in speaking of these additional reservations, said, "The talking machine firms are going to make an elaborate display of their goods, and in a way that will open the eyes of the piano people. They are entering into the proposition in a spirit that should be an inspiration to everybody. After the Richmond exhibition I am quite satisfied Chicago will be the successful applicant for the next show. Milwaukee—well, it is a small city, I must admit. The exhibition of 1911, if the Richmond affair is a success, and of this there is no doubt whatever, is due to go west, and Chicago is in line. These expositions, however, to do the most good, should be held in the larger cities—New York, Chicago, Boston, Philadelphia, etc."

Don't forget the Jobbers' Convention at Atlantic City.

BAD FIRE IN NEW HAVEN.

Columbia Phonograph Co. Store Suffer Considerable Damage from Fire on April 3.

(Special to The Talking Machine World.)

New Haven, Conn., April 4, 1910.

Last night's fire damaged the stock and premises of the Columbia Phonograph Co., in the Theater building at 25 Church street. The cause of the fire is unknown, but it was checked after a hard fight on the part of the department. Harry Blakeborough, the manager, said he was unable to state the loss, but it would be considerable. Edward N. Burns, who looks after insurance matters for the company, may be here during the week to make the adjustment. In the meantime Manager Blakeborough will go right ahead getting his stock in shape to carry on business with slight if any interruption.

E. C. PLUME A VISITOR.

E. C. Plume, manager of the Columbia Phonograph Co.'s Western wholesale branch, with headquarters in Chicago, was a visitor to the executive offices last week. He says he finds business much better in the Middle West than on the Coast or in the East. Mr. Plume left on Saturday for home.

WALTER STEVENS HEARD FROM.

A cable was received from Walter Stevens, manager of the National Phonograph Co.'s export department, who arrived at the Port of Spain, Trinidad, W. I., last week. He and Mrs. Stevens are both enjoying excellent health. They will be in New York late this week.

INTEREST IN BUSINESS GROWS.

J. Newcomb Blackman Makes Cheery Report Regarding the Talking Machine Business for the Opening Months of the Year.

J. Newcomb Blackman, when seen by The World last week, expressed himself as being well satisfied with the manner in which the talking machine business is showing up for the opening months of the year.

"We have found our trade to be steadily on the increase," said Mr. Blackman, "and thus far there has been a substantial gain over the volume of business for the same period of 1909. As far as I can learn, this condition is common with the majority of jobbers and dealers.

"A feature of the business of the last couple of months that is especially pleasing is the number of applications from those who desire to qualify as dealers, and this marks a renewed interest in the business. While in a number of instances the applications had to be refused because the territory was sufficiently covered by established dealers, still the fact that they were made can be taken as a healthy sign.

"I am firm in the belief that the year 1910 will be a memorable one in the talking machine trade, due to a number of reasons. In the first place there is better representation. By that I mean that though the number of dealers in a given territory may have been reduced, the remaining dealers are carrying better stocks and giving closer attention to the business. The purchaser is not confronted by a half-dozen stores each with an incomplete line, but finds instead two or three stores each equipped to meet every legitimate demand.

"This preparedness cannot fail to accomplish better results, and I feel sure that the results of the year will be from 25 to 50 per cent. better than those for previous years. Barring the unexpected, the coming fall should be the most active the trade has ever seen, at least that's the way I feel about it."

VALUE OF CONTINUOUS PUBLICITY.

It has been truthfully said by many advertisers of national reputation, when asked the reason for their continued advertising when their goods were so well and favorably known: "Once you begin advertising make up your mind that you will never be able to stop, if you would continue to be successful." Some narrow-gage merchants point to this as an argument against

advertising, but there are mighty few clear-headed business men of to-day who object to continue an investment which is bound to show at the end of each year an ever-increasing balance on the profit side of the account. When you have made your name a household word, don't let it be forgotten—there's everything in a name.

NEW COLUMBIA DEALERS.

Two new Columbia dealers were created recently, both of whom placed substantial initial orders for machines, records, Grafonolas, etc., for early shipment, namely J. C. Martin & Co., the music house, of Dayton, O., and D. F. Fallee, of Pomona, Cal. This is their first venture in the talking machine line. The Martin order came through the Columbia's Cincinnati jobber, and Fallee's is credited to the San Francisco office.

Joseph A. Grottendick, formerly with the E. F. Droop & Sons Co., Washington, D. C., is the manager of Cohen & Hughes' talking machine department, Baltimore, Md.

Charles A. Johnson has purchased the talking machine business of Mrs. S. C. Rowlen, Red Wing, Minn.

Edison dealers in cities, manufacturing towns and wherever extensive business correspondence is carried on, can reap big profits in a field that is practically without competition by handling the

Edison Business Phonograph

The Edison Business Phonograph is displacing stenographic dictation in businesses of every kind and every character throughout the United States to-day. Because it saves half the dictator's time, half the typewriter operator's time, and all the time in which the stenographer is ordinarily engaged in taking dictation—cutting the cost of letter writing from eight cents down to four and to even two-and-a-half cents a letter.

The use of the Edison Business Phono-

graph is becoming more general every day, and it is only a matter of a few years before all business correspondence will be carried on in this way.

It is the only dictating machine that is recognized by business men everywhere as a real time, labor and money saving business appliance. It is the only dictating machine that *stays sold*.

The field is young, there is practically no competition and the profits are generous.

Get in now.

Write us to-day for complete information.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Special to The Talking Machine World.)

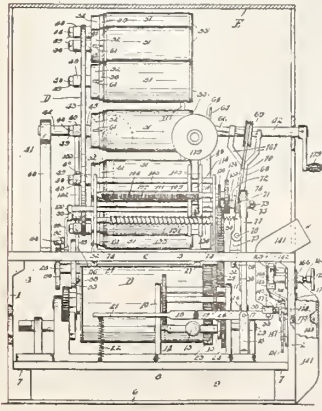

Washington, D. C., April 10, 1910.

PHONOGRAPH. Peter M. Ravenskilde, Cabery, Ill. Patent No. 948,675.

This invention relates to new and useful improvements in phonographs, and has for its object to provide a device of this character having a rotatable element adapted to carry a plurality of phonographic records to be played—to provide a coin-actuated means for starting the motor—to provide means adapted to intermittently rotate the record-

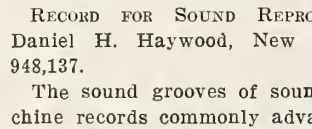

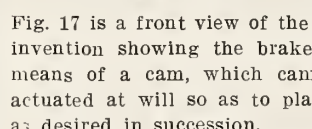

carrying element a part of a revolution—to provide a movable means adapted to intermittently engage and rotate one of the record-holders while the record carried thereby is being played—to provide means for engaging and disengaging the needle of the reproducer with and from the phonographic records—to provide means for automatically carrying the reproducer back to the starting point after having played a record—to provide a mechanism adapted to release a brake lever to allow the motor to run long enough to cause two records to be played and then actuate said brake lever for stopping the motor—to provide a clock-controlled means for starting the motor.

Referring to the drawings forming a part of this specification, wherein like characters of reference denote similar parts throughout the several views: Figure 1 is a plan view of the invention with portions of the top thereof broken away. Fig. 2 is a right-hand side elevation of the phonograph with the side of the casing attached thereto removed. Fig. 3 is a left-hand side elevation of the phonograph with the side of the casing thereof removed. Fig. 4 is a front elevation of the phonograph with the end of the casing thereof removed. Fig. 5 is a view taken on the line x-x of Fig. 1 showing the levers and cams in their proper positions when the motor

is stopped. Fig. 6 is a similar view showing the position the cam-operated lever assumes while the two records are being played. Fig. 7 is a perspective view of the cam element adapted to actuate the lever for releasing and engaging the brake lever with the governor friction wheel. Fig. 8 is a sectional view taken on the line z-z of Fig. 7. Fig. 9 is a detail showing the means for automatically engaging one of the record-holders at a time for rotating same when playing the record, and the cam for disengaging said means from the record-holder when the record carried thereby has been played. Fig. 10 is a view showing the means for carrying the reproducer, and the means for engaging the needle with and disengaging the same from a phonograph record. Fig. 11 is a perspective view of the cam which actuates the means adapted to engage the record holders for rotating the same. Fig. 12 is a plan view of the cam-actuated lever which causes the reproducer to travel back to the starting point after having played a record. Fig. 13 is a view partly in section of one of the improved record-holders. Fig. 14 is a sectional view thereof taken on the line y-y of Fig. 13. Fig. 15 is a modification of the invention showing the clock-controlled means for releasing the brake lever from the governor frictional wheel for the length of time sufficient to play one record. Fig. 16 is a front view of a portion of the clock showing the cam and lever actuated thereby. Fig. 17 is a front view of the modification of the invention showing the brake lever actuated by means of a cam, which cam is adapted to be actuated at will so as to play as many records as desired in succession.

is stopped. Fig. 6 is a similar view showing the position the cam-operated lever assumes while the two records are being played. Fig. 7 is a perspective view of the cam element adapted to actuate the lever for releasing and engaging the brake lever with the governor friction wheel. Fig. 8 is a sectional view taken on the line z-z of Fig. 7. Fig. 9 is a detail showing the means for automatically engaging one of the record-holders at a time for rotating same when playing the record, and the cam for disengaging said means from the record-holder when the record carried thereby has been played. Fig. 10 is a view showing the means for carrying the reproducer, and the means for engaging the needle with and disengaging the same from a phonograph record. Fig. 11 is a perspective view of the cam which actuates the means adapted to engage the record holders for rotating the same. Fig. 12 is a plan view of the cam-actuated lever which causes the reproducer to travel back to the starting point after having played a record. Fig. 13 is a view partly in section of one of the improved record-holders. Fig. 14 is a sectional view thereof taken on the line y-y of Fig. 13. Fig. 15 is a modification of the invention showing the clock-controlled means for releasing the brake lever from the governor frictional wheel for the length of time sufficient to play one record. Fig. 16 is a front view of a portion of the clock showing the cam and lever actuated thereby. Fig. 17 is a front view of the modification of the invention showing the brake lever actuated by means of a cam, which cam is adapted to be actuated at will so as to play as many records as desired in succession.

RECORD FOR SOUND REPRODUCING MACHINES. Daniel H. Haywood, New York. Patent No. 948,137.

The sound grooves of sound reproducing machine records commonly advance, independently of their sound producing undulations, in the form of a regular spiral or helix, so that the stylus employed in connection therewith has a regular and uniform transverse feeding movement as the record rotates.

The object of the present invention is to provide for an irregular transverse feeding movement of the stylus, and to this end is constructed the record with a sound groove which, independently of its sound producing undulations,

advances irregularly. The preferred form of feeding movement is desired to impart to the stylus a to and fro movement (the total movements in one direction being, of course, in excess of the tonal movements in the other, whereby the stylus is gradually, though irregularly, advanced) and to effect this is provided the record with a sound groove which advances and recedes as the record rotates. The inventor preferably provides the record with a positioning recess so that the record may be properly positioned upon its support in the machine with respect to the feeding mechanism. Included among the advantages of this form of feed are, first, that the stylus carrying arm has thereby a free swinging movement; second, the normal pressure upon the sound box diaphragm is thereby more uniformly distributed, i. e., such pressure is applied first upon one side of the diaphragm, and then upon the other; third, there is a greater tendency toward centralizing the stylus in the sound groove, and fourth, the records so constructed are adapted only for use in the specific form of

machine for which they are designed, or which is designed to receive them. This latter is a feature of great commercial importance in that it tends to largely reduce the unauthorized copying of records, and the unauthorized use of records in machines for which they were not intended.

In the drawings: Fig. 1 is a face view of a record of the flat disc type, constructed according to the invention. Figs. 2 and 3 are similar views, illustrating different forms of the sound groove. Fig. 4 is a view in side elevation of a record of the cylinder type, constructed in accordance with the invention.

SOUND REPRODUCER OR RECORDER. Charles Thoma, Jr., and Walter Thoma, Carlstadt, N. J. Patent No. 949,991.

This invention relates to sound reproducers or recorders for talking machines, and has for its object to simplify structures of this kind, to increase their efficiency and to reduce the cost of manufacture.

One feature of the invention resides in a stylus supporting member having a socket whose mouth is provided with a restricted portion, the stylus being seated in said socket and held in place by the restricted portion aforesaid. This restricted portion may take the form of a plurality of prongs, or it may be a continuous flange. Preferably the socket is obtained by making the supporting member in the form of a tube whose mouth is restricted and in which there is seated a follower. Between the restricted portion and the follower the stylus is interposed. The stylus is held against longitudinal axial movement in the holder, so as to vibrate in unison with such holder. So far as certain features of the invention are concerned the stylus may be of any shape found useful; but preferably it is provided with a circular contact surface concentric with the center of the stylus. Thus for cylinder machines the stylus will preferably be spherically shaped, and for disc machines the stylus will be in the form of a knife-edge disc. In the preferred embodiment of the invention the stylus will be mounted for rotation around its own axis. This may be effected by any suitable means, but preferably

by the socket construction of stylus supporting member above described. By making the stylus rotatable friction is greatly reduced and admits, if desired, of the use of a cheap material as steel in place of precious stones. Furthermore, by the employment of a rotatable stylus a less harsh and more perfect tone can be produced. A non-rotatable stylus has a scraping action as it travels over the record and reproduces not only the recorded sound waves but also minute recorded imperfections. These recorded imperfections are so minute that the stylus, if rotatably mounted, will roll over them without being sensibly affected by them. Moreover, by using a rotatable stylus, when recording, these minute imperfections will not be recorded, and hence will not be reproduced.

In the said drawings Figure 1 is a vertical sectional view on the line 1-1 of Fig. 2, showing a sound reproducer or recorder, embodying the invention. Fig. 2 is a plan view of Fig. 1 looking in the direction of the arrow 2 in Fig. 1. Figs. 3, 4, 5 and 6 show various forms of stylus supporting members and stylus. Fig. 7 is a perspective view of one form of stylus. Fig. 8 is a detail of the centering device.

TALKING MACHINE. James H. Mount, Jamesburg, N. J. Patent No. 949,939.
This invention relates to talking machines, particularly those of the disc-record type, but

some of the improvements are also applicable to talking machines of the cylinder-record type.

The objects of this invention are to provide for taking the machine apart and putting it together to facilitate packing and transportation—to simplify, strengthen and improve the attachment of the stylus to the diaphragm holder—to provide for conveying the vibrations through the sound box from both sides of the diaphragm so that the sound will be amplified and made more powerful and more distinct—to provide for conveying the vibrations from opposite sides of

the diaphragm through concentric tubes so that the vibrations from the front of the diaphragm will so merge with the vibrations from the back of the diaphragm as to produce a large volume of tone of great distinctness, power and melody—to provide for removing the sound box from the record to replace the needle or substituting the record—to counterbalance the sound box and accommodate its motion over the record that the grinding noise peculiar to most talking ma-

chines will be further obviated—to support the sound box on the cabinet that the whole machine can be jarred or moved without disturbing the sound or scratching the record.

Figure 1 is a perspective view of a talking machine of the disc-record type embodying the invention, a part being in section. Fig. 2 is a side elevation of the same. Fig. 3 is a plan view of the same. Fig. 4 is an enlarged side elevation of the same, parts being in section and the cabinet removed. Fig. 5 is a detail view showing the sound box and stylus in full lines swung aside for replacing the stylus and, in dotted lines, raising for introducing the record. Fig. 6 is an end view of the sound box showing the stylus resting on the record. Fig. 7 is a similar view showing the stylus and sound box partly raised for introducing the record. Fig. 8 is a similar view showing the sound box and stylus fully raised for replacing the needle. Fig. 9 is an end view of the sound box and attachments with its cover removed so as to disclose its interior. Fig. 10 is a sectional view of the sound box and attachments. Fig. 11 is a detail view showing the diaphragm and attachments removed from the sound box. Fig. 12 is an enlarged detail view showing the stylus clamp and its attachments to the diaphragm holder. Fig. 13 is a detail view showing the method of supporting the diaphragm holder in the sound box. Fig. 14 is an end elevation of the cabinet showing the device for adjusting the inclination of the record and the means for opening the cabinet without removing the winding handle.

SOUND-BOX FOR TALKING MACHINES. Eldridge R. Johnson, Merion, Pa., assignor to Victor Talking Machine Co. Patent No. 951,127.

The main objects of this invention are: to provide a stylus bar and mounting thereof of simple construction and of few parts, and having no parts subject to wear due to the oscillation of the bar, or likely to become loose and to permit of lost motion of the bar; to provide an improved mounting for a stylus bar that will permit the bar to oscillate in a single plane about a substantially fixed axis, but which will hold the bar rigidly against any other movement with respect to its mounting; to provide an improved mounting for a stylus bar which will counteract any undesirable momentum or movement of the bar; to provide in a sound-box an improved stylus bar and mounting thereof in combination

with a diaphragm, in which the axis of oscillation of the stylus bar will be in the plane of the diaphragm, so that the movement of the end of the stylus bar connected to the diaphragm will be in a direction perpendicular to the diaphragm so as not to exert any oblique stress upon the diaphragm tending to buckle it; and to provide other improvements.

In the accompanying drawings Figure 1 is a front elevation of a sound-box constructed in accordance with this invention; Fig. 2 is a side elevation of the same; Fig. 3 is a longitudinal section on lines 3-3 of Figs. 1 and 4, and Fig. 4 a fragmentary bottom plan view of the sound-box.
TALKING MACHINE. Clarence Vogt, Berlin, Germany, assignor to the Victor Talking Machine Co., Camden, N. J. Patent No. 951,158.
One object of the invention is to provide an improved talking machine, having a plurality of record supports, each support being provided with sound-reproducing means adapted to co-operate therewith. A further object is to produce such arrangement of parts in the talking machine above mentioned, that the records may be accurately placed upon the carrying mechanism, so that the parts of the reproducing mechanism may have the correct relation with each other to cause the sounds produced from the records to harmonize, and to combine the sound waves, to produce the most musical and pleasing effects.
A further object is to so construct the parts of the talking machine that the same may be played as a talking machine having a single disc or record, and also may be played as a talking machine comprising a plurality of discs without the necessity of radical changes in the machine, or the adjustment of delicate parts.
In the accompanying drawings Figure 1 is a top plan view of a talking machine constructed in accordance with this invention, parts of the record discs and turntables being broken away to show the reproducing mechanisms more clearly; Fig. 2 is a front elevation thereof; Fig. 3 is a plan view of a record as the same appears in position upon the turntable; Fig. 4 is a sectional view taken substantially upon the line 4-4, Fig. 3, showing three superposed turntables and records, and Fig. 5 is a detailed view showing one edge of a record adjacent the starting point of the record groove.
SOUND-BOX. Eugene C. Smith, New York, assignor by Mesne assignments to the Victor Talking Machine Co., Camden, N. J. Patent No. 951,292.
The main objects of this invention are, to pro-

with a diaphragm, in which the axis of oscillation of the stylus bar will be in the plane of the diaphragm, so that the movement of the end of the stylus bar connected to the diaphragm will be in a direction perpendicular to the diaphragm so as not to exert any oblique stress upon the diaphragm tending to buckle it; and to provide other improvements.

In the accompanying drawings Figure 1 is a front elevation of a sound-box constructed in accordance with this invention; Fig. 2 is a side elevation of the same; Fig. 3 is a longitudinal section on lines 3-3 of Figs. 1 and 4, and Fig. 4 a fragmentary bottom plan view of the sound-box.

TALKING MACHINE. Clarence Vogt, Berlin, Germany, assignor to the Victor Talking Machine Co., Camden, N. J. Patent No. 951,158.

One object of the invention is to provide an improved talking machine, having a plurality of record supports, each support being provided with sound-reproducing means adapted to co-operate therewith. A further object is to produce such arrangement of parts in the talking machine above mentioned, that the records may be accurately placed upon the carrying mechanism, so that the parts of the reproducing mechanism may have the correct relation with each other to cause the sounds produced from the records to harmonize, and to combine the sound waves, to produce the most musical and pleasing effects.

other to cause the sounds produced from the records to harmonize, and to combine the sound waves, to produce the most musical and pleasing effects.

A further object is to so construct the parts of the talking machine that the same may be played as a talking machine having a single disc or record, and also may be played as a talking machine comprising a plurality of discs without the necessity of radical changes in the machine, or the adjustment of delicate parts.

In the accompanying drawings Figure 1 is a top plan view of a talking machine constructed in accordance with this invention, parts of the record discs and turntables being broken away to show the reproducing mechanisms more clearly; Fig. 2 is a front elevation thereof; Fig. 3 is a plan view of a record as the same appears in position upon the turntable; Fig. 4 is a sectional view taken substantially upon the line 4-4, Fig. 3, showing three superposed turntables and records, and Fig. 5 is a detailed view showing one edge of a record adjacent the starting point of the record groove.

SOUND-BOX. Eugene C. Smith, New York, assignor by Mesne assignments to the Victor Talking Machine Co., Camden, N. J. Patent No. 951,292.

The main objects of this invention are, to pro-

vide an improved sound-box for talking machines; to provide an improved casing for a sound-box; to provide an improved mounting for a stylus bar; to provide an improved mounting for a diaphragm; to provide an improved connection between a stylus bar and a diaphragm, and to provide other improvements.

In the accompanying drawings Figure 1 is a front elevation of a sound-box constructed in accordance with this invention; Fig. 2 a longitudinal axial section of the same; Fig. 3 a perspective view of a portion of the same, and Fig. 4 a fragmentary axial sectional view of a portion of the same.

SOUND CONVEYING TUBE FOR TALKING MACHINES. Robert A. Boswell, Washington, D. C. Patent No. 951,998.

The invention about to be set forth and claimed belongs to the art of acoustics, and it particularly pertains to a new and useful sound-conveying tube having a joint located at a point between the free ends thereof, and adapted for use upon talking machines and the like; and the object of the invention is to improve and simplify the structure shown, set forth and claimed in the Patent No. 859,165.

A further object of the invention is to provide an amplifying horn having a flexible ball joint breaking at a point between the free ends thereof, said ball having means to be engaged by the parts of the amplifying horn, for the purpose of retaining them in their proper relative positions, and in order to allow them to have universal movements.

A further object of the invention is to provide the ball and one of the parts of the amplifying horn with means, by which the said parts may be held in raised positions, as desired.

Referring to the drawings: Figure 1 is a side elevation of a talking machine, showing an amplifying horn having a flexible ball joint breaking at a point between the free ends thereof. Fig. 2 is a vertical sectional view through the flexible ball joint, showing parts of the amplifying horn connected to the ball. Fig. 3 is a perspective view of the upper half or part of the amplifying horn, showing the spherical flange to engage the ball of the joint. Fig. 4 is a perspective view of the lower half of the amplifying horn, or, in other words, the reproducer arm, also having a spherical flange to engage said ball.

PHONOGRAPH. Frank L. Dyer, Montclair, N. J., assignor to New Jersey Patent Co., West Orange, N. J. Patent No. 951,757.

This invention relates to phonographs, and the object thereof is, broadly speaking, the production of a compact and efficient device for the conveying and dissemination of sound in the reproduction thereof. More specifically, this device is an improvement on the invention of Peter Weber disclosed in his application for improvements in phonographs, Serial No. 509,061, filed on even date herewith. In the invention of the said Weber, a structure is provided wherein the cover for the phonograph is pivoted and when in open position may be supported in such position that a sound-conveying tube connected with the neck of the reproducer may deliver the sound waves set up by the vibration of the reproducer diaphragm into the interior of the said cover. The cover is provided in its interior with sound-deflecting

means and means for conveying the sound so deflected smoothly to the open or bottom end of the cover, this sound-conveying means within the body of the cover being of such a character as to amplify the sound. In the improvement on this structure, the sound-conveying tube consists of telescoping sections supported within the cover, whereby, when the cover is in open position, the tube may be extended into the same to deliver the sound waves from the reproducer against the deflecting means within the cover, while, when the cover is in closed position incasing the phonograph, the sound-conveying tube or horn is collapsed within the same. By this construction sound-conveying and amplifying means of sufficient amplification are provided in a compact space when the cover is open, the whole device being self-contained and compact when the cover is closed.

For a more perfect understanding of the invention, attention is hereby directed to the accompanying drawing, forming part of this specification, representing an end elevation of a phonograph equipped with this device, the sound-conveying tube and the cover being shown in section for the open position of the cover, these parts being shown in dotted lines in the position occupied thereby when the cover is closed.

PHONOGRAPH-REPRODUCER. Peter Weber, Orange, N. J., assignor to New Jersey Patent Co., West Orange, N. J. Patent No. 951,496.

This invention relates to phonograph reproducers, and has for its object the provision of an improved stylus and mounting therefor, adapted more particularly for use with records in which the pitch of the record groove is one two-hundredth (1/200) of an inch. In order to properly track records of this character as now on the market it is necessary that the reproducer stylus be of microscopic size, since the record groove is formed by a stylus having a curved cutting edge, the diameter of which is only .008 of an inch. The reproducer stylus should have a rounded surface and should be so shaped as not to cause undue wear upon the record. It should also be supported in such a manner as to be capable of lateral movement, so that it will track the record groove properly; and it is also desirable that the stylus should be so connected to the diaphragm that the vertical movement of the stylus will be magnified, so as to produce an amplified movement of that portion of the diaphragm to which it is connected.

Figure 1 is a side elevation, partly in section, of a phonograph reproducer constructed in accordance with the invention; Fig. 2 is an end view, showing the stylus lever and the stylus carried thereby in operative position with respect to the record surface, and Fig. 3 is a bottom plan view of the same and of the adjacent portion of the floating weight.

PHONOGRAPH REPRODUCER. Robert Head, New York. Patent No. 951,781. This invention relates to improvements in phonograph reproducers, wherein the inventor seeks to provide an improved construction adapted for the reproduction of sounds which are free from harsh metallic tones and grating noises, the latter being serious objections to ordinary talking machines.

Another part of the invention is the provision of a sound-box, which is constructed and arranged for use in connection with a disc or a cylindrical record, such end being attained without change in the structure of the sound-box and by simply changing the position thereof.

Another part of the invention is an improved reproducer embracing a vibratory diaphragm which is mounted in a novel manner to secure greater sensitiveness and an increased amplitude of vibration, and furthermore, to so construct the diaphragm as to prevent it from splitting, and to make it work steadily under the vibration given thereto.

The invention resides, broadly, in a reproducer having a vibratory diaphragm held or confined in or on a suitable body, the edges being free or unconfined, as distinguished from an ordinary reproducer wherein the edge portion of the diaphragm is fixed or secured firmly to the body.

Fig. 1 is a side elevation, partly broken away, and showing the reproducer adapted for use in connection with a disc record. Fig. 2 is a cross section of the sound-box of Fig. 1. Fig. 3 is a sectional elevation of the sound-box adjusted for use on a cylindrical record. Figs. 4 and 5 are views in side elevation and cross section respectively of another form of sound-box. Fig. 6 is a cross section of still another form of sound-box.

PROCESS OF DUPLICATING PHONOGRAMS. Frederick W. Matthews, New York. Patent No. 951,483.

This invention relates to improvements in processes of duplicating phonograms of the so-called "indestructible" type and the objects are the simplification of the processes of manufacture, the cheapening of the cost of production, the use of very thin impressible material for the facing if desired, and the production of faced, backed and imprinted phonograms at one operation if desired.

The process is a modification of the "spinning" process of duplicating phonograms and the apparatus comprises a frame 1 carrying a shaft 2 provided with a driving pulley 3. The upper end of the shaft carries a base 4 on which a shell 5 rests and within which shell may be placed any desired matrix 6 having a negative phonogram on its inner face. A cap 7 with a central aperture 8 covers the top of the shell and matrix while clamp rods 9, 9' hold all the parts to the base. A faucet 10 affords means for injecting centrifugal pressure material to the apparatus.

HOFFAY SUCCEEDS TOSI

As Columbia Representative in the Argentine Capital—Masters Recorded by Freiberg.

Ernesto Tosi, who has represented the Columbia Phonograph Co.'s export department in Buenos Ayres, Argentine, S. A., for over a year, has resigned to become the manager of the establishment of José Tagine, of that city. The latter is said to be the largest talking machine dealer in the world, doing a business of over a million dollars yearly. José Hoffay will succeed Senor Tosi as the Columbia's representative in the Argentine capital.

By the way, the Columbia Co. recently received a large batch of masters recorded at Buenos Ayres by William Freiberg. These include typical Spanish songs, band and orchestral records, for which they have large orders. Mr. Burns described the lot as the very finest and best records made in that part of the world.

EVERY JOBBER in this country should be represented in this department. The cost is slight and the advantage is great. Be sure and have your firm in the May list.

ST. LOUIS TRADE IMPROVES.

Much Better Than for Same Period of Last Year—Recent Visitors—What the Various Houses Have to Report—J. H. Buettner Co. Exhibit at Household Supply Show.

(Special to The Talking Machine World.)
St. Louis, Mo., April 8, 1910.

The talking machine trade here for the past month has been quite good, and considerably better than for the same month a year ago. The best type of machines and high class records are in demand, and dealers are well pleased with their trade.

Manager Walthall, of the Columbia Phonograph Co., reports that their trade has been very good during the month of March, both wholesale and retail. The month's business was much better than for the same period a year ago, and the buying tendency was towards higher grade of goods.

M. D. Easton, son of E. D. Easton, president of the Columbia Phonograph Co., spent March 26 in St. Louis with the Princeton Glee Club, which gave an entertainment that night at the Odeon.

E. O. Rockmond, treasurer of the Columbia Phonograph Co., spent March 19 here, returning to New York.

F. O. Seidel, Columbia dealer at Troy, Ill., was a recent visitor here.

"January, February and March business is way ahead of the same months last year, and 1910 promises to be the best year the talking machine business has known," said Manager Gressing, of the St. Louis Talking Machine Co. "Our dealers are ordering in advance to take care of the demands that will be made on them these spring months." Mr. Gressing called on the trade recently in Hannibal, Quincy, Springfield, Decatur, etc., where he found the dealers all doing a good business and reporting conditions most glowingly. He spent the Easter holidays with his sister in Milwaukee, Wis.

L. E. McGreal, the well known talking machine dealer of Milwaukee, Wis., spent several days here visiting his old friend, P. E. Conroy, president of the Conroy Piano Co. He returned home on March 28.

The Koerber-Brenner Music Co. report that their talking machine trade has been brisk for the last month.

Visiting dealers at the St. Louis Talking Machine Co. recently were: A. D. Welburn, Nashville, Tenn.; Wm. Blumhoff, Wentzville, Mo.; Mr. Ferand, of Ferand Bros., Madison, Ill.; John Winkler, Mascoutah, Ill.; W. W. Fisher, Murphysboro, Ill.; K. Cowley, Amory, Miss.

The St. Louis Talking Machine Co. have had one of the Moorish Marquetry Victrolas in their window and report having sold three of these instruments during the short time they have had the machine on hand.

The J. H. Buettner Furniture & Carpet Co. had a nice talking machine booth at the Household Supply show at the Coliseum during the second week of March. The display was in charge of L. R. Kern. A Victrola was used and the booth was continually crowded at all times and large crowds were on the outside. Miss Sadie Rosenblatt, manager of this firm's talking machine department, reports a lively trade for the past month.

The Thiebes Piano Co. report that their talking machine business for the month has been very good, with a demand almost exclusively for the higher grade machines and records.

L. A. Cummins, traveler for the St. Louis Talking Machine Co., shortly after Easter started on a trip through Arkansas and Missouri. Mr. Cummins declares that business conditions are phenomenally bright and that this year should prove a banner talking machine year.

Walter J. Staats, of the Victor Co., spent a day here recently and expressed himself most enthusiastically on the promising business outlook for 1910.

The Silverstone Talking Machine Co. report having had an active month's trade on Amberola machines. This firm will make considerable alterations in their store to make room for their increased stock. Mr. Silverstone states that the dealers are buying heavier now than for some time in the past.

D. K. Myers, the well known Zonophone dealer, reports that his trade for the past month has been fair.

HYMAN LANDS SMALL FORTUNE

In Lien Secured Against the Defunct New York Phonograph Co.—The National Phonograph Co. Not Concerned in the Matter.

Again the name of the New York Phonograph Co. appears in the public prints, but in no way to concern the trade. It will be remembered that the National Phonograph Co., Orange, N. J., made an amicable settlement with this company after years of litigation. The latter had not been an active proposition for years out of mind, and their contest with the National Co. was purely one relating to the construing of a contract. In the final wind up Samuel F. Hyman, a New York attorney, who brought suit in the State courts against the Edison jobbers and dealers of New York, was not admitted in the settlement, and his services were ignored by the New York Phonograph Co.

Thereupon Mr. Hyman lodged a suit against the latter for half of the sum received from the National Phonograph Co., reported to be \$263,250. Friday, April 1, before Judge Keogh, Mr. Hyman obtained a lien for \$131,625, one-half of the amount, as his fee. Unless this decision is reversed the fortunate counselor will collect.

When Mr. Hyman was called upon by The World he said: "This matter has nothing whatever to do with the National Phonograph Co. nor its business. My case is against the New York Phonograph Co., and while they were not in active business, so far as the manufacture of talking machines, etc., were concerned, still they are a live corporation under the laws of the State of New York. I feel very well satisfied with the judicial result, as it is a just recognition of my services."

William Pelzer, vice-president of the National Phonograph Co., said: "The suit is of no earthly interest to us. The controversy was settled for all time when the New York Phonograph Co. accepted the terms mutually agreed upon. I am inclined to think, however, that the amount named in the Hyman case is not correct; double that would be nearer the right figure."

The TALKING MACHINE SECTION

NEW YORK, APRIL 15, 1910

ADVERTISING AS A FORCE

In Building up Business—Must Be Steadily and Persistently Developed—Many Expect Results too Soon.

Did you ever watch a person feed little chicks from one's hand? How timid the little things are at first; how you have to coax and coax them along, throw a few grains of feed out onto the grass—if it be palatable chick feed they will want more. As the feed is thrown out a little nearer each time to the person feeding, the chicks become bolder and bolder until they finally eat from the hand. Fool them once, however, with something that's not to their liking, or hurt them the least bit, and it's a struggle, and a hard one, too, to get them back again. Keep on feeding them good things, pet them, and they come after a bit at the first call—and in a hurry, too.

But what, you say, has this chick talk to do with advertising? says Buck's Shot. It's got a whole lot to do with it. It teaches the observer a mighty important lesson—and one that should be well learned.

Advertising is like feeding the chicks. Your first big page announcement, filled, as you believe, with the most attractive values—hardly any direct results in goods actually sold, lots of "look around," but they are a little timid. The next announcement, however, brings more lookers and you close a few sales. Keep up this constant feeding, with the sort of food the buyers want; keep coaxing and coaxing with good, dependable offerings, follow it up with good, clean store and delivery service, and, like the chicks, the public will soon learn to trust you—through liking your advertising food, and will come instantly at your call.

It won't do to stop that coaxing; while you are stopping someone else may come along and educate the chicks his way. Keep up a constant coaxing; allow no lagging in your feeding the public, no lagging in your store or delivery service, and the public will soon learn to know that you and your store are their best friends.

Learn your lesson from the feeding of the chicks, and learn it well; it means great broods of well-developed, well-pleased, constantly-buying, satisfied customers.

WAR BY CINEMATOGRAPH.

A New Field in Which This Wonderful Invention Is Proving a Source of Interest—Real Warfare Made Possible for the Looker-On.

In a newly invented cinematograph target in England the man in front, with a real gun, sees his enemy come up the hill, dodging from tree to tree, piece in hand, ready at any moment for a shot. The opportunity comes. The moving-picture figure kneels, aims quickly, fires. There is simultaneous action by the living marksman. A rattling exchange of shots goes on with all the noise of single-handed war. It is not difficult for a man with an imagination to supply a thrill akin to that of the skirmish line. By a

contrivance in the target every actual shot is registered at its marksmanship value.

Is this new device a factor for peace or for war? Undoubtedly it affords training for a rifle-man's eye and nerve. Will it nourish a desire to try one's fresh steadiness of aim in a field where somebody is going to get hurt?

Suppose an extension of the target were such as to afford room for the deployment of a company, a battalion, a regiment. Against the pictured force should advance in modern open order a living contingent. There would be the rattle of rifles from one side and realistic rolls of photographic smoke from the other. No bloodshed, no mutilation, no deaths, no making of griefs for distant mourners. Just a fair test of speed and accuracy at the sights. The target registry would disclose after the battle the details of a dreadful might-have-been.

Tests in such cinematographic conflicts might be instituted for the picked sharpshooters of two disputing nations. There would be fuss, fury and burnt powder. Bugles might blow. Should not an exchange of records, then, with advantage to one party or the other, be acceptable in lieu of the grim old arbitrament of death-feeling?

CAMERAPHONE CO. PROPERTY SOLD

At Public Auction by Direction of Trustee—
Amount Realized Distributed Among
Creditors.

Friday week the property of the Cameraphone Co., bankrupts, was sold at public auction, under

the direction of Arnold F. Wainwright, trustee. It consisted of: cameraphones, rheostats, talking machines, reels, horns, photo mounts, Edison records, cameraphone records, drill press. Power's heads, developing drums, tanks, drying drums, motors, shaving machine, recording machine, recording shells, office furniture, engine lathes, milling machines, gear cutters, motors, etc., together with eleven cameraphone outfits now rented by the trustee, and also the following patents: United States patent No. 903,493 and Dominion of Canada patents Nos. 113,149 and 114,624. The amount realized was satisfactory. Later it was accepted by the court and ordered to be distributed to the proven claims of the creditors. This concern had invented and developed a system of synchronized motion pictures, in combination with the talking machine.

"CHEER UP!"

By Cora M. W. Greenleaf.

Away with the blues, oh ye sad and dejected,
"Cheer up" be our watchword and let us be jolly;
Braace up! for the world leaves no brave smile neglected;
So whatever you do, do not be melancholy.

Enough for each day is its burden of evil;
So if one day should ever be free from dark sorrow,
Spoil not its joy with forebodings and evil,
Foretelling the troubles to come on the morrow.

While clear and undimmed is the blue arch above us,
And the sunlight glows brightly and warm, do not say
That tempests may rage before night—if you love us—
But let us be happy, dear—happy to day.

The high grade salesman never stoops to disparage the standing of a competitor.

A PAYING SIDE LINE

For Talking Machine Dealers Is Hohner Harmonicas, Which Are Big Sellers.

As a profitable side line for talking machine dealers to handle, the Hohner harmonicas are in a class by themselves. In connection with these meritorious goods special attention is directed to the new C-D-C device, described and illustrated in the advertisement of M. Hohner, 475 Broadway, New York, appearing on another page. The C-D-C device consists of a three-tray cabinet, as shown in the accompanying cut, which contains thirty-eight pieces of the very best selling Hohner harmonicas, assorted in sixteen different styles and

THE C-D-C DEVICE

all keys. Owing to its novel arrangement and peculiar construction the cabinet can be thrown open and closed in a moment's time. When open the display of these unusually fine goods is exceptionally attractive, exhibiting its entire contents at one time and showing the instruments to the very best advantage. No article placed on the market in this special line has ever proven such a success. So popular is the C-D-C device that orders should be placed early so as to have them filled promptly.

INNOVATION INSTITUTED.

An innovation was instituted by the government on February 2 when, for the first time in the history of the country, Uncle Sam undertook the printing of his own postal cards. The work is being done in the government printing office. Until all of the new presses are installed the issue will be approximately 1,500,000 a day; afterward it will aggregate 3,500,000 a day. As soon as the special equipment for printing has been established, a new card, to be known as the index, or library card, will be issued. This card will be of an excellent quality of paper and of attractive design. The paper used will not be quite so heavy as that used in the present card, but it will be more flexible and will take ink much better than the old yellow one with which we are familiar.

Browne, McMillan & Co., Savannah, Ga., recently held the formal opening of their new branch store in Greensboro, N. C., and a large crowd visited the store during the course of the day.

IN THE OLD TIMES.

Told by a Knight of the Grip—Peculiar Road Experience.

I was one of a dozen or more men in the smoking car of a slow western train. It was in the cow-boy days, the cow-boy of the dime novel, which I am inclined to think did not do his reckless dare devil ways much injustice after all.

At a station where we stopped a few minutes a newcomer entered our car, a cow-boy evidently, by his costume and general appearance, and a drunken one at that. As he came in the train started and the sudden lurch of the car sent him sprawling in the aisle in a most ridiculous fashion.

I dare say we all smiled, but the man across the aisle from me did more than that—he laughed outright. The cow-boy struggled to his feet with a good deal of trouble, and with an ugly look on his face, pulled a six shooter out of his hip pocket. He was evidently fighting drunk and in a mood to do anything desperate.

"Who's the blankety blank fool that did that laffin?" he asked, glaring about at us with his red rimmed eyes. "I'll larn him to make fun of a shentilman, jest 'cause this car threw me off my balance."

He started up the aisle, hanging onto the seats to aid his lurching progress, the revolver swaying about generally in his other hand.

"I'll let the daylight into him," he went on.

I stole a glance at the man—a commercial traveler—who had laughed and saw he was as pale as I felt. In fact, we were all in an uncomfortable position, at the mercy of a reckless, drunken ruffian, liable to shoot any of us accidentally, even if he did not do so purposely. If any of us had made a move to leave the car, it would probably have made him who did so an immediate target, and not one of us had an answering weapon about us.

"Who laffed?" he blustered. As he came near me, the car gave another lurch, and he pitched down on the seat by my side.

"Do you know who laffed, young feller?" he asked. "Ye, do ye?"

What could I say? An inspiration came to me; I could say nothing. I pointed to my mouth and ears and shook my head.

"What d'ye mean?"

I took an envelope from my pocket, wrote on it, "I'm deaf and dumb," and handed it to him.

He read it with an appearance of interest. "Ye don't say so!" he burst out. "How long ye ben so?"

"Please write it," I wrote on the envelope, and handed him the pencil.

"How long yu ben so?" he wrote.

"Born so," I wrote back.

"As good lookin' as ye air!" he said, turning to look me over.

"Please write it," I wrote again.

"A shudent; no it by yer luks," he wrote. "How d'ye git yer livin'?"

"Working at anything honest I can do," I wrote back.

"Sho, now! Poor cuss! Mean shame!"

"Please write it," I again wrote.

"Buly for you, but ime — sorry for ye, whar d'ye liv when yer air to home?"

"I used to live back East," I wrote.

"You don't look jest like a Yankee. Here," he

added, taking a black bottle from his pocket, "take a nip."

I looked at it and shook my head.

"Doctor doesn't allow me to take anything," I wrote. "Bad for the ears."

"Why? What's the matter of ye?" he asked.

"Please write it," I wrote.

"What dises is ou gut?"

"Nervous and other troubles," I wrote back. "Will you please put up your gun? It makes me very nervous to have you hold it in your hand."

"Anything to 'blige sech a — nice feller as you be," he said, slipping it into his pocket again.

"Thank you," I wrote.

By this time he was getting quite interested, and we covered the backs of several envelopes with our written conversation. He would often break into speech full of oaths, but my "please write it" would keep him busy, his jaws working as he wrote, while the sweat stood out on his rough, dirty forehead. Evidently the cowboy's quirt was an easier weapon for him to handle than a lead pencil. The other passengers looked on in a silence that could be almost felt.

The engine gave a loud whistle. "Pig Creek," called the conductor, poking his head in at the door. "Here's where you want to get off, Bill," he said to my companion.

Bill arose, I helping him on to his feet. The conductor came and took his arm and helped him out, and on to the platform, where a number of men, evidently of his stamp, were slouching around.

"I say, fellers," he remarked to the crowd, as he leaned up against the wall, "I've had a — queer time. Say! there's a lot o' — fools in that 'ere smoker, and there ain't but one ggentilman among 'em, and — it! he's deaf and dumb!"—*Mattie W. Baker in the Traveling Man.*

FOR SHOW CARD WRITERS.

An expert at show-card writing advises care in the preparation of such cards. He says:

Do not use periods at the end of display lines unless after an abbreviation. They are worse than unnecessary. Lay out your card roughly but carefully with lead pencil before touching brush to it.

Do not sign the firm name on a display card for use in the window or store. Your name is over the front door. That's enough.

If price cards are used make them on cardboard of the same color and painted with the same paint used on the window card.

Last and most important, write out the matter to go on the card with great care, in such a way that it will attract and not repel custom.

A FEW RECORD SCRATCHES.

The man who writes a Spencerian hand fills in the check and the man who writes a poor hand signs it.

Hot advertising is sometimes used to attract the cold cash.

Every man who has seen the world knows that nothing is so useless as a general maxim.

To Business Men

Business men in every line admit the value of good trade papers.

A trade paper must be original—it must contain a variety of matter including news service—technical information—in fact it must crystallize the entire news of the special business world, and be a helpful adjunct to every department of trade.

Scan the columns of *The Talking Machine World* closely and after you have completed an analysis of the contents of this publication see if you can duplicate its value in any other trade!

The World is a help to the talking machine business.

It exerts an healthful optimism.

It wields an influence for the good and every man who sells talking machines, no matter in what part of the universe he may be located, should receive this publication as regularly as it is issued. He is missing a vital business point if he fails to do this.

Thousands of dealers not only in the United States but in every country on earth consult the pages of the *World* regularly.

They draw from the *World* pleasure and profit.

The talking machine business has a brilliant future, and this publication is doing much to enlarge the business horizon of every retail talking machine man in the world.

To receive this paper annually costs but \$1.00. All foreign countries \$1.25.

NOVELTY
NEWS

Published Each Month by Edward Lyman Bill at 1 Madison Avenue, New York, May 15, 1910

The best-known trade mark in the world

“The Victor talking machine’s design, ‘His Master’s Voice,’ has become a household word, and the quaint little fox terrier at attention before the horn is familiar to more Americans than any of the world’s great masterpieces.”—COLLIER’S, May 22, 1909.

THE PLEASURE
DOUBLED

THE COST
REDUCED

10 inch **65c.** **DOUBLE RECORD DISCS** 12 inch **\$1.00**

Zon-o-phone Records are pre-eminently the BEST that money, brains, and a thorough knowledge of the art of sound recording can produce.

They are justly famous for their remarkably clear, natural tones, absence of scratch and wearing quality.

The greatest care is exercised in combining the selections, each side of the disc presenting the latest and best in popular music or standard compositions.

The price appeals to the masses, the quality to the classes, making them indeed a popular record at a popular price.

A new catalogue of Hebrew Single Side Selections has just been issued. Solos by Mme. Prager, Mr. Juvelier, Master Mirsky, the boy soprano, and other eminent singers. These are undoubtedly the most perfect Hebrew records ever recorded. 10 inch, 50 cents, 12 inch, 75 cents.

Resolve yourself, Mr. Dealer, into a committee of one and investigate these claims. Consider, criticize, compare. ZON-O-PHONE RECORDS will stand the test. A trial will verify all that we say.

THE TALKER IN TEACHING

Proves Especially Valuable to Vocal Instructors—How One Teacher Does It—Henry D. Tovey, of University of Arkansas, Makes Some Interesting Comments Upon That Form of Instruction—Field of the Talking Machine as an Educational Factor Continually Broadening as Value Is Appreciated.

The educational value of the talking machine from a musical viewpoint has been frequently discussed in these columns. Prominent vocal teachers, who took pains some years ago to deride and belittle the talking machine, claiming that it possessed no musical or educational value whatsoever, have since been converted into enthusiastic adherents and supporters. As a necessity and help to up-to-date music teachers and educators the talking machine is now being largely employed. It is only necessary to visit the studios of some of our leading vocal instructors to comprehend how the talking machine is being utilized as an assistant in teaching style, phrasing, expression and interpretation. This is the case not only in New York, but in all the leading cities. Henry D. Tovey, of the University of Arkansas, in a recent letter said:

"In this department we use the Victor in our work. I have given concerts every two weeks with my machine, and by the third week in May we will have studied thirty-two operas and a large number of other works, solos, oratorios, etc. With the records I show pictures of the singers, have girls read the story of the operas, and the lives of the singers. I have found the year's work with this machine most helpful. I can notice greater interest in outside musical matters. While passing through the halls I often hear pupils comparing the different voices heard. I am much pleased with this phase of the work and shall continue it next year."

The foregoing illuminating communication was recently used by the Oliver Ditson Co. as the basis of a very clever advertisement. In this connection they stated: "Mr. Tovey expresses the sentiment of many of our most advanced teachers and to those who have not become familiar with the Victor talking machine we recommend a careful analysis of its possibilities. Such an analysis can be made in our reception rooms, free of cost, and educators in the arts of singing, speaking and music may learn the value of this wonderful musical instrument as a help to their teachings. Accuracy, precision and beauty of expression, such as cannot be obtained in other ways, may be listened to with great benefit to teacher and pupil alike."

We are confident that the talking machine is going to play a still greater part in the future, not merely as an educational factor in the vocal field, but will occupy a still wider sphere in disseminating musical knowledge and musical culture throughout the nation.

SOME REASONS FOR FAILURE.

Lack of Self Reliance and Courage One of the Chief Troubles of the Unsuccessful Man.

The man who failed was not trained to grasp subjects, to generalize, to make combinations. He was not self-reliant, did not depend upon his own judgment; leaned upon others, and was always seeking other people's opinion and advice. He lacked courage, energy, boldness. He was not resourceful or inventive. He could not multiply himself in others. He did not carry the air of a conqueror. He did not radiate the power of a leader.

There was no power back of his eye to make men obey him. He could not handle men. He antagonized people. He did not believe in himself. He tried to substitute "gall" for ability. He could not project himself into his lieutenants;

he wanted to do everything himself. He could not cover up his weak points. He did not know that to reveal his own weakness was fatal to the confidence of others.

MAKING RECORDS OF STORMS.

Prof. Schultz Spent Winter on Island in Sound Preparing Them for Use at Oberammergau.

(Special to The Talking Machine World.)
South Norwalk, Conn., May 3, 1910.

All winter a mysterious man has dwelt in a shack on the uttermost point of Nauvoo Island, in Long Island Sound. Whenever a storm came up he was seen scurrying about, very busy about something. Oystermen, mariners and oldest inhabitants in general speculated about him.

Now the secret is out. The mysterious man is Prof. Herman Schultz, of Newark, and he is making phonographic records of storms and thunder for use, it is said, in the Passion Play at Oberammergau this year. Prof. Schultz is reported to have rigged up gigantic phonograph records on the island, which have been digesting elemental noise for months.

MONTELIUS HOUSE EXPANDS.

Vancouver Dealers Enlarge and Improve Talking Machine Department—To Handle Band Instruments Made by York & Sons.

(Special to The Talking Machine World.)
Vancouver, B. C., April 29, 1910.

The Montelius Piano House, of this city, who, besides pianos, handle complete lines of both Edison and Victor machines and records, have recently finished a number of alterations in their talking machine department, including the installation of two more commodious record rooms and additional facilities for the storage of stock and records. The company have also recently secured the agency for British Columbia for the J. W. York & Sons band instruments. They report an excellent volume of business at both their Vancouver and Victoria stores.

SELLING METHODS COUNT.

Present Day Conditions Necessitate Close Attention to Numerous Details Besides Quality of Goods and Size of Stock.

The time has gone by when entire dependence in the matter of making and holding trade can be placed on the selling of good goods. Almost every store of any respectability nowadays sells pretty fair goods and gives pretty fair values. It is no longer a singularity to do this; no longer a sure passport to public favor.

Of course no store can be permanently successful unless it sells good goods, but we must guard ourselves against believing that good merchandise is the only requisite, because it is not.

Attractiveness of store appearance, inside and out, has become nowadays a very, very potent trade-winning factor. Probably no one thing has so much to do with the impression a store produces on its visitors—not even attentiveness and courtesy of the sales people.

Surface indications determine the judgment of the masses of buyers. They are not, in the main, discriminating judges of the merchandise, however much they may fondly cherish the delusion that they are.

But everyone, however little fitted he or she may be to accurately analyze the general character of a store's merchandise, is certainly fully capable of judging a store's general appearance.

Quality of merchandise and prices being fairly equal, the store that is attractive in fittings and arrangements will outdraw two to one the store that is rather old-fashioned and commonplace in these respects.

The store with an old-fashioned, dingy-looking

front, with old counters and fixtures, and a jumbled up, unkempt looking stock, is laboring under a heavy handicap which it will take more than good advertising to overcome.

Good advertising will not offset the effects of bad stock keeping.

Keeping the stock in apple pie order—having everything neat and orderly and scrupulously clean—is an absolute essential to forceful advertising.

Advertising can bring people into the store, but it cannot make them buy or induce them to visit the store a second time if the first visit is unsatisfactory.

OUR EXPORT AND IMPORT TRADE

Of Talking Machines for March—Exports Show Strong Gain as Compared with Last Year—Some Interesting Figures.

(Special to The Talking Machine World.)
Washington, D. C., May 9, 1910.

In the summary of exports and imports of the commerce of the United States for the month of March (the latest period for which it has been compiled), which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following interesting figures relating to talking machines and supplies are set forth:

The total exports of talking machines, records and supplies for March, 1910, amounted to \$361,836, as compared with \$248,128 for the same month of the previous year. The nine months' exportations of talking machines, records and supplies amounted to \$2,843,742, as against \$2,174,356 for the same period in 1909.

The total export figures for the nine months of the past three years are as follows: 1908, \$3,851,521; 1909, \$2,174,356; 1910, \$2,843,742.

The value in detail of exportations of talking machine records and supplies amounted to \$221,642 in March, 1910, as against \$248,128 for the same month of 1909, and for the nine months ending in March, 1910, they amounted to \$1,797,304, as against \$2,174,356 in 1909 and \$3,851,521 in 1908.

The value of all other parts relating to talking machines, phonographs, records and materials therefor sent abroad during March, 1910, amounted to \$140,194; the total exports for the nine months under this heading foot up \$1,046,438.

R. C. ROGERS CO.'S ENTERPRISE.

Giving a Strong Representation to the Victor and Edison Lines in Washington.

(Special to The Talking Machine World.)
Washington, D. C., May 6, 1910.

The Robt. C. Rogers Co., who recently succeeded John F. Ellis & Co., as talking machine dealers at 1313 F street, are building up an excellent business. Mr. Rogers, the head of this institution, was in the employ of the Ellis house for more than twenty-five years, and for several years previous to the incorporation of the Robt. C. Rogers Co. was in charge of the talking machine department of the Ellis firm. The Victor and Edison lines are handled, and it is intended to give these the strongest kind of representation in this city. The Rogers Co. have attractive quarters and a good organization.

WOOKEY & CO.'S NEW QUARTERS.

Wookey & Co. have recently taken possession of a large double store at 320-322 South Adams street, Peoria, Ill., where they are making a very complete display of Victor talking machines and Columbia phonographs, as well as the records made by this concern. They also handle pianos and player-pianos. They occupy over 24,600 square feet of floor space, elevator service and other modern conveniences.

THE TRADE IN MILWAUKEE.

Dealers Satisfied with Present Business Though It Might be Livelier—Visit of Metropolitan Grand Opera Co. Helps the Sale of Grand Opera Records—"New Idea" Cabinets Prove Decided Success—Some Interesting Personalities—Good Supply of Amberol Records and Attachments—Wisconsin State Talking Machine Dealers' Association Inactive—Lacks Energetic Head.

(Special to The Talking Machine World.)

Milwaukee, Wis., May 8, 1910.

Milwaukee retailers seem to be entirely satisfied with present business even though it is not as brisk as it might be. Dealers say that trade is no more quiet than it usually is at this season of the year, that, in fact, it is showing a decided improvement over a year ago. As soon as the summer resort season opens a revival is expected. The one disquieting feature of the local retail situation is the fact that collections are a little slow. While money seems to be plentiful enough, people are busily engaged in investing it in various enterprises and are allowing their accounts to wait for a time.

The wholesale trade, taken as a whole, is very satisfactory. Of course, demand is quiet in some lines as a result of the rather dull trade that country dealers are meeting with at this season of the year.

The recent appearance of the Metropolitan Grand Opera Company in a three days' engagement at the Auditorium did much to increase sales in grand opera records in the different lines. Even at the present time, a lively interest is being manifested in Red Seal records and dealers say that they are selling more high priced records than they have in months. Miss Gertrude Gannon, proprietress of the McGreal retail store, was one of the heaviest advertisers of grand opera records during the time that the Metropolitan Company was in the city. Miss Gannon arranged a most interesting Caruso window that attracted wide attention. J. H. Becker, Jr., manager of the talking machine department of the Hoeffler Mfg. Co., offered a big window display that brought him some fine sales of grand opera records. Mr. Becker's afternoon grand opera concerts were well patronized and were something of an innovation.

The "New Idea" disc cabinet, invented by William Schmidt, traveling salesman for Lawrence McGreal, and manufactured by the New Idea

Cabinet Co., of Milwaukee, is creating no end of interest among the retailers and wholesalers of the Middle West. It is expected that the new cabinet will be placed on the market by May 20. "The 'New Idea' cabinet seems to be creating even more interest in the trade than we had anticipated," said Lawrence McGreal, the leading factor in the organization of the New Idea Cabinet Co. "The interchangeable tops, designed to fit the different forms of the Victor machines are proving decidedly popular, while the practical feature offered in the sliding record files is meeting with favor. Orders are being received from all sections of the country."

Lawrence McGreal attended the meeting of the executive committee of the National Talking Machine Jobbers' Association held at Columbus, O., recently.

John E. Daly, well known talking machine dealer of Grand Rapids, Mich., was a recent Milwaukee visitor.

William P. Hope, Wisconsin and Upper Michigan representative of the National Phonograph Co., is expected to return to Milwaukee in a few weeks for a most successful trip to Winnipeg and other Canadian points.

Laurence Lucker, of the Minnesota Phonograph Co., of Minneapolis, stopped over in Milwaukee recently on his return from the East as the guest of Lawrence McGreal.

William Schmidt, traveling representative of Lawrence McGreal, is now covering southwestern and western Wisconsin, where he is meeting with a good wholesale business.

Shipments of Amberola records and machines are beginning to arrive at Milwaukee with more frequency, and the demands of dealers are being satisfied to a certain extent. The trade is well satisfied with the special offer made by the National Phonograph Co., giving ten Amberola records with the sale of attachments. Miss Gertrude Gannon, retailer, sent out more than 5,000 letters to the public advertising this offer and as a result she is meeting with a phenomenal business in the Amberola line.

Many dealers seem to believe that the Wisconsin State Talking Machine Dealers' Association is to be allowed to die a natural death. Since the association was organized, on September 21 of last year, when President Taft visited Milwaukee, and when dealers from all over the State flocked to the metropolis with two ends in view: one to help in the organization of the association and the other to see the new President, not a meeting has been held. The keen

interest which was displayed at that time by the many dealers seems to have died out completely. That there is ample need for such an association and that it would be decidedly useful has always been conceded, but for some reason the present association seems to be on its last legs.

The prime mover in effecting the organization among the dealers last fall was Lawrence McGreal and it was he who sent out letters to the dealers of the State explaining the value of an organization and calling the meeting for September 21. Since that time Mr. McGreal has retired from the retail field and is now devoting his entire attention to the jobbing business. It is highly probable that if some prominent dealer would take up the matter that new life might be instilled into the now inanimate association.

Immediately following his election, Emil Seidel Social Democratic Mayor of Milwaukee, has announced that the school buildings of the city may be used by the young people for dances on Saturday nights. This is his first step toward the betterment of the social conditions of the poorer classes, and later, he states, that he will arrange for talking machine concerts and moving picture shows in the schools. His other motive in this campaign is to do away with the vice breeding wine rooms and saloon dance halls, which are so numerous in all cities.

The talking machine and its educational value was the topic of an interesting address given recently before the Milwaukee Library Club by Lewis A. Valentine. Mr. Valentine treated the subject from all sides and angles, and the talking machine as a factor in education has risen a great deal in the opinion of the different members of the club.

Lawrence McGreal, the well known jobber, and Miss Gertrude Gannon, retailer, have sold a number of Victrolas in the different cafes and ice cream establishments in Milwaukee for the entertainment of the customers. Among the places where the Victrolas are in evidence are the "Sweet Shop," located on Wisconsin street, and La Mont's cafeteria on Third street. Concerts are given throughout the day and evening, and they are becoming very popular among the patrons of the different establishments.

J. W. BINDER LOCATES IN CHICAGO.

Becomes General Sales Manager of the C. E. Zimmerman Co.

J. W. Binder, formerly vice-president and general sales manager of the Dictaphone Co. of America, with offices at 290 Broadway, New York, has connected himself with the C. E. Zimmerman Co., Chicago, as general sales manager. The arrangement has just been completed.

The C. E. Zimmerman Co. is an advertising and sales promotion agency organized to furnish to merchants and bankers in small towns an advertising agency service of exactly the same standard as is given to the great national advertisers by the big agencies. The concern is backed by a group of the leading capitalists in Chicago, each of whom is a "headliner" in his particular business. Mr. Binder will at once organize a selling force of the highest grade, which will operate under his direction on the district office plan. This organization will be headed by ten of the strongest men obtainable who, as district managers, will organize and operate the several territories allotted to them.

Mr. Binder is well known throughout the specialty selling field as an authority on that subject. He has written and lectured on salesmanship quite extensively. His address on "Advertising and Selling" in Madison Square Garden, New York, during the last business show will be remembered by those who heard it, as one of the best ever made. His "Salesmanship" stories in "System" and other magazines have been read and enjoyed by thousands.

Chicago is to be congratulated on acquiring him as a resident and as a "doer," who will help in making her what she is destined to be—the leading city of the world.

EASTERN SERVICE IS GOOD SERVICE

It stands for prompt and careful filling of orders. Special attention to rush orders. Quick and satisfactory adjustment of claims, and the fact of our handling both

VICTOR AND EDISON

gives the additional advantage to the trade of the one source of supply, one transportation charge.

Try Our Service and No Other Will Satisfy

THE EASTERN TALKING MACHINE CO.

177 Tremont Street

BOSTON, MASS.

Go after the Victor business in your locality

Victor goods are better now than ever before, and your sales should be larger than ever.

How much larger? That depends upon you. Our business has been increasing by leaps and bounds, and unless your business shows the same kind of a growth you are not keeping pace with us.

Every Victor dealer in this land should make the most of his opportunity. His profit is just about five times our profit—for every dollar we make, you make five dollars. So you see, it is worth your while to get your shoulder to the wheel and put forth more effort.

Advertise in your local newspapers and drive home the impression created by our regular systematic magazine, newspaper and farm paper advertising. Make your window displays as frequent and attractive as you possibly can—our ready-made window displays are a big help. Give Victor concerts and invite people to your store. Send a Victor out on trial and let it prove its value.

Make use of every opportunity to push the Victor and you are sure to get all the Victor business that you should have, and to make this year the biggest and most profitable year you ever had.

The completeness of the Columbia line and its rapidly growing popularity, together with the solid and fair policy of the Company behind that program, cannot safely be ignored either by you or your competitors.

Columbia Phonograph Co., Tribune Building, New York.

TRADE ON THE PACIFIC COAST.

Retail Business Rather Dull—How Some Dealers Account for the Condition—Wholesale Trade Active—Frequent Changes Agitate—What the Pacific Phonograph Co. Are Doing—New Location for Bacigalupi—Columbia Phonograph Co. in New Quarters—Activities of the Other Houses

(Special to The Talking Machine World.)

San Francisco, Cal., May 2, 1910.

While everybody started the season with high hopes, and expectations have been more than fulfilled in the Coast territory as a whole, there is no dodging the fact that the retail talking machine business in this city just now is dull. There are exceptions in the case of certain dealers who may have some advantages in situation or management, but nearly all local houses which confine themselves to the retail department find conditions unsatisfactory. One or two are inclined to think that the enthusiasm for talking machines is subsiding, but this statement is controverted by the great activity in other quarters. The prevalent view is that the local condition is only temporary, and will pass off as the season advances.

Wholesale dealers have no complaint to make of business in general, as business in the country towns has continued on fully as large a scale as last month. There will naturally be a lull during the summer months, but it has not started yet, and there can hardly be a doubt that the fall season will be one of the best ever experienced. Coast crops are all heavy, and with prospects of a high average of prices money is moving freely in the agricultural districts.

The San Francisco trade continues to be agitated by frequent changes in the wholesale talking machine trade, but it is believed that the era of change is about over, and that the different houses will soon settle down to the usual steady pull for trade. The changes now in progress are the removal of the Columbia Phonograph Co. and the Pacific Phonograph Co. into permanent quarters.

The Pacific Phonograph Co.'s stay in the quarters first secured at the rear of Peter Bacigalupi & Sons' establishment was short. They gave up their lease almost as soon as they moved in, and are now transferring their stock to the Bass-Hueter building, 816 Mission street, which they consider one of the best locations for wholesale business in the city. The offices are still in the Stevenson street location, but will be removed in a few days. The company are now putting up the shelving and arranging the stock in the new location, the work being under the immediate supervision of A. R. Pommer and Mr. Jones. The main stock has not yet been brought over from the Oakland warehouse, but will be transferred immediately after the first of the month. Mr. Pommer says that the stock of records carried will be the second largest in the United States, the intention being to have everything in the Edison catalog always on hand. A well-tested

system of stock keeping is being installed, by which automatic indicators will give notice when the number of any records reaches the minimum, and the stock will be gone over every day. The location, on an upper floor, gives ample facilities for handling this enormous stock, with freight and passenger elevators at front and rear. In addition to the record racks, running half the length of the building, a large space in the rear will be reserved for the machines and packed stock, as well as a packing department. The latter is furnished with a power saw for boxing, and a packing bench 47 feet long. A room at the side, especially well lighted, will be fitted up for repair work, and space at the front will be reserved for offices. The entire loft is unusually well lighted for a place of that character, and Mr. Pommer believes it is the best that could be found in the city. Mr. Pommer says the wholesale business has been remarkable, in view of the numerous recent changes, and is highly optimistic regarding the future of the concern. He says there has been a wonderful demand of late for Amberolas. The company has furnished stock to a lot of new talking machine departments recently, among them being those of W. F. Denby, at Esparto, Cal.; Perry & Harper, in Oakland, Cal.; F. A. Phillips, at Round Mountain, Cal.; Chas. L. Fork, at Woodleaf, Cal.; the Weill-Nickoll Co., at Rocklin, Cal.; and Hanby's Pharmacy, on Seventh street, Oakland, Cal.

Peter Bacigalupi & Sons also expect to get into a new location before long. Mr. Bacigalupi states that the lease on his present store, 557 Market street, will soon expire, and he is endeavoring to dispose of it for the short time remaining. Mr. Bacigalupi will take a trip through the East in May, and after his return will begin to look around for a new place, preferably in the musical center of the city. With the numerous lines he is now handling in addition to talking machines, and others he expects to secure, he will require a comparatively large store.

Mr. Bacigalupi will be accompanied on his Eastern trip, about May 6, by Leon F. Douglass, vice-president of the Victor Co., who makes his home in San Rafael, Cal. Mr. Douglass finds his health greatly improved, and, it is said that he finds it very difficult to tear himself away from his suburban home.

The Columbia Phonograph Co.'s San Francisco headquarters are now at 334 Sutter street, in the Allied Arts building. The Van Ness avenue place was finally abandoned April 18, just four years since the fire. The stock is not yet in order, but Mr. Scott, the local manager, is busily at work on it, and expects to complete the job in a couple of weeks. The new quarters afford plenty of space for both stock and offices, and it is believed that the location will prove advantageous in many ways, being very close to the musical center, and accordingly convenient for visiting customers. Kohler & Chase, who have the retail business for the Columbia goods in this city, are keeping up their work in this department energetically, and are making a good record even at the local store. As they now carry the Columbia line in all their

stores in California, they are getting away with a decidedly large quantity of goods. Coast Manager W. S. Gray has just returned from a visit to the North, where he secured several new accounts. He states that the Grafonola Regent has been placed in furniture stores in every important place from Los Angeles north, the dealers everywhere taking a lively interest in it and using it to great advantage for display. Mr. Gray says the local business is looking up a little now, though rather quiet early in the month. He has spent much of his time in southern California this year, and states that conditions there are very much to his liking.

Andrew G. McCarthy, of Sherman, Clay & Co., has been giving considerable attention for the last few weeks to the promotion of the Panama-Pacific Exposition for San Francisco, but the talking machine business has not been neglected, and Mr. McCarthy reports a volume of business fully up to the former record. He expects to go East in about ten days.

GOING AFTER BUSINESS.

O. K. Houck Co. Doing a Splendid Trade in the Edison Attachment Proposition—Their Plan of Developing Business Worth Emulating.

The O. K. Houck Piano Co., Memphis, Tenn., are carrying on a great campaign in connection with the Edison special combination attachment offer. They have got out some very interesting letters bearing on this subject as well as on the latest Edison Amberol records, which must undoubtedly bring them splendid results. In connection with the special offer on the Edison attachment they have sent out return postal cards, in which their representative is invited to call with the attachment at the sender's house.

This is certainly going after business in the right way. They are not waiting for the customer to come, but are going after him. This is the kind of work which brings results and piles up business. It demonstrates that there is a live man at the head of the Houck talking machine department—a man who believes in "doing" things as well as talking about them. This is a spirit worth emulating. If every dealer would get after trade in this manner there would be little talk about dull times. Trade is oftentimes dull because dealers don't enforce plans whereby they may become busy.

Probably more than half the battle in building up a retail business consists in getting people into the store. A well-managed show window attracts trade at regular prices and if given constant attention may be made exceedingly productive. Newspaper advertising is valuable, especially when given personal care by one who understands how to tell a convincing story in print. These much used methods are good, but a suggestion discussed at several conventions recently goes a little farther in carrying out the idea that a merchant must go after the business if he wants to build up his trade on a profitable basis.

A LIVE MEMBER OF THE TRADE.

Archie Matheis, Proprietor of Talking Machine Co., Minneapolis, Has Successful Career in Jobbing and Retail Fields.

(Special to The Talking Machine World.)
Minneapolis, Minn., May 5, 1910.

Archie Matheis, proprietor of the Talking Machine Co., located at 236 Nicollet avenue, this city, is one of the men who have made a special study of the talking machine business, and who as a result of the knowledge thus gained have made a success in that field.

A few years ago Mr. Matheis joined the forces of Koehler & Hindrichs, of St. Paul, as manager

ARCHIE MATHEIS.

of a couple of their departments, and learned that the firm had a jobber's contract with the Victor Talking Machine Co., but were not doing very much with it. Mr. Matheis took hold of that department, rearranged the stock and started a lively campaign among the dealers. The success of the venture necessitated larger quarters in a very few months, whereupon the Edison line was added and proved equally successful.

Mr. Matheis then entered the retail business, and following the lines that won success for him in the jobbing business, soon built up a strong trade. His work is an excellent example of what may be accomplished by a live wire in the talking machine business.

THE NEWS FROM INDIANAPOLIS.

Various Conditions Tend to Retard Trade—Kipp-Link Co. in New Quarters—Successful Woman Manager—Columbia Activity—Playing of Talking Machines Before Cheap Theaters—Other Trade News.

(Special to The Talking Machine World.)
Indianapolis, Ind., May 6, 1910.

The talking machine business in Indianapolis has not been so good for the last month. Several conditions have entered into this. Cold weather toward the close of April caused many to replenish their coal bins. The last month also was the final time for paying the first instalment on taxes. The talking machine houses feel the effect of such conditions more than stores which sell instruments of greater price.

The Kipp-Link Co., who handle Edisons, are now transacting business in their new and commodious quarters in Massachusetts avenue, near the big Marott department store. A retail department is also conducted by the Kipp-Link Co., but, as usual, most of their attention is given to the wholesale business. The new location gives every promise of being a good one.

Miss Ada Willsey, who has charge of the new store of the Musical Echo Co., in North Pennsylvania street, which handles Victors, is the only woman in Indianapolis, so far as is known, who is in charge of a talking machine store.

She has been with the company for the last five years, and likes the business. The Musical Echo store is one of the neatest in the city. Business with this house has been good for the last month, the best demand being for the Victrola.

Manager Devine of the Columbia Phonograph Co. is greatly pleased with a record by Lina Cavalieri, which is included in the list of sample records for June. He considers it one of the finest soprano records ever made, and he predicts a good sale for it.

As an evidence that the advertising campaign which the Columbia Co. have been conducting with marked vigor for several months is beginning to bear fruit, the sale of two \$225 Grafonolas in one day is cited.

There seems to be a feeling among the jobbers that dealers generally are beginning to wake up to the fact that high-priced machines can be sold in smaller cities with less trouble and to better advantage than even the less expensive machines.

H. H. Myers, traveling representative of the Columbia Co. in Chicago, was in Indianapolis one day. J. A. Herdman, traveling representative from Cincinnati, also stopped in Indianapolis on his way South.

An ordinance is now in the Council which will prevent the playing of talking machines in front of the low-priced vaudeville houses. It might be thought on first impulse that the talking machine men would oppose this move. However, the playing of talking machines in front of the picture shows has never benefited the talking machine business very much. Machines in such places are allowed to get out of order, and old records are played over and over until the passing public get tired of the sound of a talking machine. It is evident that this is not so good for the business. And, again, the picture show field in Indianapolis is about full, and there is not a chance that there will be so many more picture shows for which the talking machine men can provide machines.

The order issued by Mayor Shank which

again permits the use of talking machines and electric pianos in the amusement resorts is proving a stimulus to the talking machine business to a certain degree. The Mayor declared that talking machines and pianos were useful in keeping the inmates of such resorts off the streets, and therefore were beneficial.

Robert Campbell, investigating officer for the Children's Aid Association, has been making an investigation of the moving picture shows in Indianapolis. He says that most of the picture shows present scenes which are instructive.

TO HANDLE "TALKERS" EXCLUSIVELY.

The W. G. Walz Co., who conduct a large establishment in El Paso, Tex., have given up their line of pianos and organs and will devote themselves exclusively in the future to developing their business in talking machines and side lines. They handle the Victor and Edison machines and records and the I. C. S. phonograph language outfits. The business is now in active charge of Harry T. and William G. Walz, Jr., W. G. Walz, the head of the business, having retired. They have a handsomely equipped store and a good organization, and are destined to make a still greater record in the talking machine line.

MME. ALDA MAKES VICTOR RECORDS.

Mme. Alda, who recently became the wife of Signor Gatti-Casazza, director of the Metropolitan Opera Co., left for Paris shortly after the close of the Chicago opera season with her husband, where she will sing with the Metropolitan Opera Co.'s forces, who will give a season of opera in the French capital. Before her departure for Europe, however, she was busily employed at the Victor laboratory making a number of records in compliance with a desire to follow the great success her "Othello" records have had. Among the most interesting records issued this season is the one by Mme. Alda and Signor Caruso.

**Learn Spanish, French, German, or Italian**

The I. C. S. System of Language Instruction by the phonograph method makes easy the mastering of a foreign language and appeals with compelling power to thousands. The dealer in phonographs that does not carry I. C. S. Language Outfits is neglecting a quick and sure way to increase his business. The new \$35 Language Outfit of the I. C. S. is a marvel. It represents the highest art in the teaching of languages, and embodies a method that has won the warmest praise of thousands qualified to speak authoritatively. The Spanish, French, German, and Italian Embassies at Washington, as well as the leading colleges, have cordially indorsed the I. C. S. Method of teaching languages.

The I. C. S. Language Outfit consists of an Edison Gem Phonograph made especially for language work; 14-inch brass horn; special hearing tube; recorder; reproducer; speaking tube; winding crank; camel's-hair brush; blank cylinders on which to make phonographic recitations; and 25 Conversational Records, teaching pronunciation guaranteed to be absolutely correct, with native intonation and inflection. In addition to these Conversational Records there are pamphlet Instruction Papers teaching the theory of languages. The new Outfit is the best and cheapest ever offered—the price being only \$35.

If you want to increase your business, write today for full particulars.

For Everyone

HOME

TRIUMPH

AMBEROLA

to \$200.00

EVERYBODY wants the Edison, because—it plays both Standard and Amberol Records, rendering the best music of every class from the Grand Opera arias of Slezak, Carmen Melis and other great Grand Opera stars, to the head-liners of Vaudeville, like Lauder and Stella Mayhew; because it has the permanent sapphire reproducing point that does not wear out the Records and does not wear *itself* out; because it is the only instrument upon which records can be made at home—and everyone knows that *that* is more than half the pleasure of having a sound reproducing instrument.

Instrument that everybody wants

NEW YORK, MAY 15, 1910.

EARLY in July The National Association of Talking Machine Jobbers will convene at Atlantic City.

There will be several days given over to the discussion of business topics and it is the intention of the directors to make the Convention in all respects interesting and valuable to the talking machine jobbers of this country.

This will be the fourth annual meeting of the jobbers' organization and it must be conceded that the jobbers of America have labored faithfully to perpetuate an association along lines which should be helpful to the best interests of the talking machine trade.

It is an acknowledged fact that by organization men in all lines may help themselves materially.

Organization and agreement on a code of ethics to do away with many of the wastes which come from unkind competition and objectionable practices is a good thing.

Organization which means protection to the legitimate trade is also helpful and in many ways the talking machine men of this country may advance their own interests by standing together, and they will, without question, be inclined to rake their territory thoroughly, and there is a powerful lot of wasted territory in this country, and that question of wasted territory is a peculiar one.

WHAT should a certain territory produce in the talking machine trade according to population?

That is a question which is well worthy of discussion and the more it is discussed the clearer it will become that territory is not half worked.

There are plenty of good, thriving towns and cities in this country where good talking machine trade may be secured if the jobbers and dealers only go after it right.

It is up to the jobbers to interest bright, active, wide-awake men, to enthuse them with up-to-date ideas regarding the talking machine possibilities.

There is plenty of business to be had in this country if men only go after it—business for the jobber and business for the dealer.

It cannot be obtained by sitting down and figuring that trade will come knocking at your doors clamoring for talking machines.

It is pretty safe to bet that the man who figures on these lines will be seeking favors in the way of extensions because the business will not come to him, and he will have his stock on his hands.

The only way to get business is to go after it and not in a half-hearted manner.

Go after it with a ginger spirit and red blood in your veins and presumably you will land the trade.

THERE are thousands and thousands of people in this country who have no adequate conception of the evolution of the talking machine and its present position as an entertainer and instructor.

Now, they are the people to interest and an association, whether composed of jobbers or dealers, can forward the interests of all members if it simply injects a little trade enthusiasm into the business.

The dealers of the East have recently formed an association and it seems to be in excellent working order and is taking in new members all the time.

Now, that's the kind of work which counts and organizations which bring men of a particular trade into healthy contact will be beneficial.

They will help the manufacturing department and they will help themselves.

In fact, all will be benefited by the adoption of modern, progressive and up-to-date ideas, and there is no question but that there are some men in the talking machine trade who need some of the ginger spirit.

THERE are some jobbers who are not doing their full duty to the manufacturers and to their constituency by adhering to too conservative a policy.

They are not working their territory as they should.

They are not spending the money for developing their trade.

Now, many dealers are unacquainted with the talking machine possibilities.

They entered the business with little or no knowledge of the peculiar environment of the talking machine.

They simply looked upon it as a good thing and their very ignorance of the trade situation is holding back their own development.

Now, it is the jobber's business, because the jobber stands between the dealer and the manufacturer to aid them.

It is the jobber's business to enthuse—to educate and to train his trade and he cannot do this if he hides his business light under the bushel of indifference.

He must be up and doing.

He must exploit his product and let the talking machine men in his vicinage understand that he is in business and that he knows

the talking machine trade from A to Z and that he has got special attractive features.

THERE is a good opportunity for talking machines. Excellent.

A widespread publicity in every line has created with the consumer new wants because advertising has brought about a change of conditions.

It has changed luxuries into necessities.

Not only is this true of the city dwellers, but the farming communities are demanding the best of everything.

The farmer must have his automobile, his player-piano and why not his talking machine?

To our minds, continuous advertising has brought about the actual demand for these things and it has helped to raise the standard of living.

It has impressed upon the people the necessity of having certain articles in their household which formerly they viewed as luxuries.

Why should not the talking machine men have their share of the increased demand?

Why has the great consuming public come to make these demands?

By education, and who has been a greater educator than the national advertiser?

Who has taught the world that progress is possible only by elevation to a higher standard of living?

The public is taking to itself the best of music and good pictures.

The public is reading more and better books than ever before in the world's history, and this means a greater consumption of paper, ink and other accessories.

The average man and woman are better dressed than ever before.

We ride in better carriages, in automobiles, and our railroad coaches are better appointed as regards the comfort of the traveling public.

WHAT has brought this all about?

Well, one great factor has been the steady hammering of the big advertisers.

They have actually compelled people to think that certain things were necessities.

Advertising has created the demand and in this connection it must be conceded that the talking machine manufacturers of this country have not lagged behind the procession in this particular.

They have been right in the front ranks and they have spent fortunes annually in acquainting the public with talking machine development.

But if the dealers and jobbers do not act in the same spirit and work along harmonious lines how can they expect to profit by this tremendous educational work which has been done through talking machine advertising all these years.

There is work—plenty of it—for everyone, and while trade conditions in parts of the country are not of the best, it is no time to sit down and view the outlook in an indifferent way.

On the contrary, it is time to be up and doing and thereby secure a fair slice of public patronage.

WHY DEALERS LOSE TRADE.

Many Retailers Sit Down and Wait About Trade Going to Large Houses and Department Stores Instead of Trying to Get the Business Themselves—No Secret in Having a Store That People Like to Visit—A Direct Talk Upon an Important and Interesting Subject.

It was Shakespeare who said, "Wise men ne'er sit and wait their loss, but cheerily seek how to redress their harms."

This will form the text for a heart-to-heart talk with some of those talking machine dealers located in what is termed "the poorer sections" of New York City, who are habitually complaining of dull trade, stating that the big stores are getting too large a share of what they should get.

It is our belief that a resident of an apartment on the east or west side of New York would just as soon buy records or machines from the dealer in his locality as to go downtown to a large single dealer or department store, if there wasn't some reason for his so doing.

And there is not only a reason, but reasons. As a matter of fact, but few of the smaller dealers take any pains to make their stores attractive or inviting. Moreover, their stock is inadequate and invariably dusty and poorly displayed.

Now, there is no excuse for this neglect, unless the dealer becomes a willing victim to that fatal disease, "dry rot."

In this case his business days are numbered, and there is an understandable justification for the complaint, "Somebody else gets the business."

In these days of keen competition any one who desires to succeed must be up and doing.

Among the elementary essentials is that the stock of talking machine records and supplies carried should be attractively displayed, kept immaculately clean, and the windows considered of advertising value.

And they cannot be of value if the glass is dirty and the stock dusty, and the whole place wears a dress of neglect.

During the past two weeks we have made it a point to visit a great many of these stores, and we must confess to a positive surprise at the conditions revealed. It is true these stores are controlled by small dealers. But they are small because of their failure to comprehend modern commercial or successful business requirements.

In the talking machine field to-day there is no excuse for dealers "creeping" along.

They are given every help by the manufacturers to work out original ideas and to build trade.

The man who neglects to study these pointers is cheating himself and cheating the company whose goods are handled, simply because he is not playing fair.

There is still a virgin retail field in New York City, right in the very center where these dealers are located, in which an immense trade may be developed.

It requires energy and originality to win out, of course, but the opportunity is there if the dealers awake to it.

New York, in many ways, is the best talking machine field in the world, but we are inclined to the belief that it is not properly worked, simply because a great many dealers are too content to straggle along at the tail end instead of at the head of the procession.

And what applies to New York applies to small dealers in all the large cities in the United States.

It is time to wake up!

WHERE ADVERTISING SHINES.

Advertising introduces the goods and paves the way for the salesman; insures for the traveler a respectful hearing when he arrives; brings orders when the salesman is not on the ground; increases the volume of the order which the sales-

man can secure in person; makes the merchant respect the firm and the salesman; cements the friendship between the house and the merchant; tells the merchant what the salesman forgets to mention; supports the salesman in his statements to the merchant, and brings about a better acquaintance and understanding between the merchant and the traveler.

TRADE IN SAINTLY CITY.

Active Business During April—Demand for Better Grade Goods—Some Recent Visitors—Visit of Opera Company Booms Record Sales—Interesting Personalities—Doings of the Various Houses.

(Special to The Talking Machine World.)
St. Louis, Mo., May 11, 1910.

The talking machine trade for the month of April has been quite active in all departments, with an exceptional good demand for high class instruments. The month's business showed a nice improvement over that for the same period in 1909.

Manager Walthall, of the Columbia Phonograph Co., reports a splendid business for April, the total being almost double that of April, 1909.

Col. F. B. T. Hollenberg, of the Hollenberg Talking Machine Co., Little Rock, Ark., spent some days here recently and was met by W. C. Fuhri, district manager of the Columbia Phonograph Co., who secured a very handsome wholesale order for his company from Mr. Hollenberg.

The visit of the Metropolitan Opera Company to St. Louis was a remarkable one, and Manager Gressing, of the St. Louis Talking Machine Co., took advantage of every opportunity the opera season afforded them in the way of an advertisement. The special Caruso Ready-Made Victor Window was installed in their show window, and elaborate signs and cards giving each singer's records were displayed around the store. The result was that quite a number of high-priced machines were sold, and the record trade was enormous.

The St. Louis Talking Machine Co. report that business is exceptionally good. The demand is mostly for the high-priced machines, both the Victrola styles leading. Miss Clara Goetz, who left this firm last year, is back again in her old position.

Visiting dealers at the St. Louis Talking Machine Co. were E. Marks, Edwardsville, Ill.; H. A. Tunehorst, Jerseyville, Ill.; J. A. Kieselhorst

and L. Davis, of the Kieselhorst Piano Co., Alton, Ill.; John Winkler, Mascoutah, Ill.; Mrs. Parks, Louisiana, Mo.; Mr. Wells, of Wells Mercantile Co., Bonne Terre, Mo.; Mr. and Mrs. Robertson, Mexico, Mo.; H. D. Tovey, Fayetteville, Ark.

A. Roos, chief accountant of the Columbia Phonograph Co., Chicago, spent several days here recently on business for the company.

W. M. Todd, who has been connected with the accounting department of the Columbia Phonograph Co., at Bridgeport, Conn., has accepted the position of accountant of the St. Louis branch of the company, and took charge April 4.

Charles Kauffmann, traveler for the local branch of the Columbia Phonograph Co., left on April 11 for a two months' trip through Northern Missouri.

The Silverstone Talking Machine Co. report their business for April to have been quite satisfactory and that they had an excellent trade on Amberolas.

Miss Sadie Rosenblatt, manager of the talking machine department of the J. H. Buettner Furniture and Carpet Co.; D. K. Myers, the well known Zonophone jobber, and The Koerber-Brenner Music Co. report that their trade for April was good in all departments.

The Thiebes Piano Co. report having had a good trade in their talking machine department in April, and that the demand for high priced instruments and records was excellent.

J. H. Allgaier, traveler for the National Phonograph Co., was a recent visitor here.

H. C. Rhodes, treasurer of the Rhodes-Burford Co., Paducah, Ky., a large dealer in Columbia phonographs at that place, spent two days here recently. Other visiting dealers were: G. E. Turpen, Flat Rock, Ill., and M. H. Phipps, Cowden, Ill.

REGARDING BUSINESS HABITS.

"Many men make the mistake of confining business habits to business hours. Do you know that it's a splendid privilege to be able to acquire business habits? A well-regulated store is a business college conducted on a practical basis. Its specialty is imbuing its men with 'business habits' and watching them acted out. In college we have a recitation. In the store we have the real thing. The professor corrects the one. The manager corrects the other. But the point is to carry this habit outside of the store. Let your trained business habits apply to home life, social life, church life, political life."

Purchase Quality Needles

BURCHARD needles naturally cost more than needles of an inferior quality, but, they have advantages which will be plain to all.

They move noiselessly over the disc and each needle can be used at least six times. You can get more out of BURCHARD needles than any other on the market. Send for a sample order of these needles and you will use no others.

Special Announcement To the

WITHIN the next few weeks formal announcement will be made to the public, through the pages of broadly circulated magazines, of the development and perfection of what is destined to be the most widely-demanded line of graphic goods in America—the **U-S Combination Phonograph** and **U-S Everlasting**

We say "most widely-demanded" not as a high sounding advertising expression because the very essentials which guide people in the choice of an outfit are those in which the U-S line has an actual and **provable** superiority—**convenience of operation of tone-production and indestructibility of records.**

The U-S Phonograph is a **new** instrument; it is built on **new** lines; its performance is **new** to anyone accustomed to the old line phonograph. An advantage of first importance is its **Automatic-Change Reproducer Carriage**, by which with a single turn of an indicator machine is automatically and instantly adjusted to play either a two-minute or one-minute record. In other words, the troublesome process of disconnecting the mandrel gears to change the speed, the removing of one reproducer and fastening on another, are all done away with in the

U-S Combination Phonograph

and the same result accomplished, in a **fraction of a second**, by simply a touch of the thumb and forefinger. The mechanism by which this instantaneous change is accomplished is simple in construction, never-failing in its operation. No other phonograph in the world has this most desirable improvement.

The Motor of the U-S Machine is of a New Type, remarkable for its simple construction and unusual power. It is so nearly noiseless that were it not for **seeing** the revolution of the mandrel scarcely able to tell whether the motor is running or not. Its ample reserve power, under most delicate control, gives a smooth, evenly-balanced and positive revolution of the record mandrel. As an added safeguard against the tone-destroying speed variations found in a motor, the U-S is fitted with a pulley balance wheel—another exclusive feature and **positively the only means of insuring a reproduction true to pitch.**

The Diaphragm is much larger than any here before used. This extra size, together with the fact that it is made of an unusually sensitive material, gives it marked superiority over a "voicing" instrument, particularly in bringing out fine music detail, much of which is lost in the average machine. The reproducer has a sapphire point, most carefully adjusted and rounded so as to eliminate scratching and to fit perfectly, **without friction**, in the sound hole.

Every dealer, no matter what his present stock, can upon request, upon, or write a letter, and secure particulars. He only offers a phonograph line in all its complete

See our Exhibit and hear the
of Piano Dealers and Musicians

U-S Phonograph Company

Announcement Trade

As the U-S Phonograph is of a revolutionary character among phonographs, so is U-S Everlasting Record a wide and radical departure and improvement in cylindrical phonograph records.

This Record is not a Wax Record; in substance and structure it is unlike any other. It is composed of a wear-proof surface mounted upon an unbreakable cylinder base. The whole makes a record that is absolutely **Everlasting**—proof against scratching, proof against cracking by extreme heat or cold, proof against damage from careless handling or dropping; it may even be sent through the mails in its original carton, unprotected. To the dealer who suffers repeated losses through breakage, and also in view of the extra business to be received through mail delivery, this point will appeal with peculiar force.

Let us repeat: the **U-S Record absolutely will not break!** Nor can playing wear it. As a test, a record was taken from stock and played continuously for eight days (100 times), yet a microscope failed to reveal the slightest trace of wear, either upon the record or the sapphire point. It could have been played 10,000 or 100,000 times with the same result.

U-S Everlasting Records

The features we have enumerated are simply ones of **mechanical** excellence. To convey **musical** excellence of U-S Phonographs and Records nothing short of actual hearing will suffice; and not only hearing but **rigid comparison** with any other phonograph, graphophone or talking machine you ever sold or heard.

Note the purity of tone, the fullness and roundness of volume, the brilliancy with which detail is brought out. Note the **naturalness** of the voice or instrument—the sympathy and feeling that bring you into the **presence** of that voice or instrument. All the metallic, artificial character usually noticed in a mechanical reproduction is eliminated; there is no scratching or hissing; it is **genuine music**, the kind that makes an enthusiast of the most sceptical listener.

As a Business Proposition we are offering merchandise and **musical possibilities** of a quality and character never before placed at the disposal of the trade. This is not a proposition of promise or claim, but of **proof and conviction**. From the very start we will prove to the world the difference between U-S Machines and Records and other machines and records. We are not going to **tell** people they are better; through actual comparative demonstrations at our dealers we are going to **show them** they are better.

In a word this is a broad, fully-perfected business plan, built on absolute merit and with unlimited resource behind it, **big** enough for the permanent co-operation of the biggest dealer, **sure** enough to justify the confidence of the smallest.

Should fill out and mail the accompanying coupon—the wonderful U-S proposition, one that not only carries with it **increased profit**. Write to-day.

TALKER SUCCEEDS "HURDY-GURDY."

First Machine to Succeed Hand-Organ in This Country Makes Its Appearance in Flatbush in Charge of a Son of Italy—How He Made the Innovation Pay.

Judging from present-day developments, the hand-organ man of New York and suburbs has taken a hint from his contemporary in Germany and adopted the talking machine as the successor of the time-honored "hurdy-gurdy," the talking machine having made its debut in its new field in Flatbush one day recently.

The operator would make a fine subject for an artist who wanted to picture a typical native of Sunny Italy, well along in years. With a long, drooping gray mustache he was typical of an aged Sicilian mountaineer. His clothes did not spell opulence, to be sure, but he expects that with the aid of the "talker" he will soon have enough to enable him to dress more respectably.

The talking machine was mounted on a hand-cart, such as those used by rag and waste paper gatherers. The "musician" said he got it from a man who didn't like that style of music and who abstracted the machine and a couple of dozen records from the house when his wife wasn't looking. It is a disc machine, of a well-known make, and can be heard a block away. It gives forth a really superior brand of music and nearly all of the records are operatic.

For this reason the innovation has made a hit in Flatbush, where the culture and wealth of Brooklyn is to be found in abundance.

The new style "hurdy-gurdy" attracts great attention wherever it goes and children follow it for blocks, singing and dancing. The operator has it easier than the men who grind the regular piano organs, for he does not have to keep winding it continuously. It has another advantage over the piano organ in that its repertoire is more extensive and calculated to please all tastes.

The operator explained in broken English that he used different records in different neighborhoods, having some of the popular variety to play in sections where the residents are not educated up to opera. So far, he says, he has the field to himself, but expects to encounter some opposition before long, as rival "hurdy-gurdy" men are jealous of his success with the new musical device and are anxious to follow his lead.

Most of the piano organs of the city are controlled by padrones or companies and are merely rented by the operators. It is expected that they will soon begin to put out talking machines to keep up with the march of progress. Talking machines have been in use in Europe by street musicians for some time, but the one now amusing the Flatbush section is believed to be the first one in this country.

Every extravagance, whether it be state or individual; every increase in prices, whether it be in wages, rates or commodities, comes out of the consumer. He must pay the bills.

OUR FOREIGN CUSTOMERS.

Amount and Value of Talking Machines Shipped Abroad from the Port of New York.

(Special to The Talking Machine World.)

Washington, D. C., May 2, 1910.

Manufacturers and dealers in talking machines will doubtless be interested in the figures showing the exports of talking machines for the past five weeks from the port of New York:

APRIL 13.

Adelaide, 75 pkgs., \$753; Bahia, 136 pkgs., 9,148; Berlin, 22 pkgs., \$457; Buenos Ayres, 16 pkgs., \$472; Calcutta, 4 pkgs., \$134; Cape Town, 36 pkgs., \$827; Guayaquil, 6 pkgs., \$246; Havana, 39 pkgs., \$1,833; Havre, 13 pkgs., \$290; Liverpool, 5 pkgs., \$208; Manila, 88 pkgs., \$5,186; Matanzas, 2 pkgs., \$146; Mazatlan, 8 pkgs., \$341; Port Barrios, 8 pkgs., \$207; Savanilla, 15 pkgs., \$775; Sydney, 170 pkgs., \$2,374; Tampico, 12 pkgs., \$328; Valparaiso, 2 pkgs., \$105.

APRIL 20.

Algoa Bay, 84 pkgs., \$2,479; Berlin, 34 pkgs., \$520; Brussels, 38 pkgs., \$260; Demerara, 6 pkgs., \$318; Havana, 19 pkgs., \$1,183; Iquique, 8 pkgs., \$735; Iquitos, 9 pkgs., \$616; Kingston, 14 pkgs., \$290; 3 pkgs., \$105; La Paz, 2 pkgs., \$148; Liverpool, 98 pkgs., \$2,347; London, 332 pkgs., \$7,137; 5 pkgs., \$341; Melbourne, 111 pkgs., \$2,677; Molendo, 15 pkgs., \$410; Moscow, 5 pkgs., \$200; Port Au Prince, 1 pkg., \$130; Port of Spain, 6 pkgs., \$297; Riga, 12 pkgs., \$2,100; Shanghai, 3 pkgs., \$193; Tampico, 37 pkgs., \$1,518; Vera Cruz, 68 pkgs., \$2,753.

APRIL 27.

Brussels, 3 pkgs., \$135; Buenos Ayres, 6 pkgs., \$196; Callao, 2 pkgs., \$159; Colon, 3 pkgs., \$177; Havana, 22 pkgs., \$319; Havre, 19 pkgs., \$459; London, 80 pkgs., \$2,334; 17 pkgs., \$1,853; Montevideo 22 pkgs., \$1,786; Para, 10 pkgs., \$610; St. Johns, 7 pkgs., \$120; Sydney, 437 pkgs., \$10,784; Trieste, 1 pkg., \$250; Vera Cruz, 6 pkgs., \$126.

MAY 3.

Acajutla, 4 pkgs., \$150; Berlin, 9 pkgs., \$674; Buenaventura, 2 pkgs., \$101; Buenos Ayres, 107 pkgs., \$4,955; Callao, 33 pkgs., \$610; Cienfuegos, 15 pkgs., \$235; Colon, 2 pkgs., \$170; Havana, 31 pkgs., \$2,474; London 276 pkgs., \$6,520; 9 pkgs., \$846; 23 pkgs., \$629; Manila, 13 pkgs., \$717; Moscow, 7 pkgs., \$257; Para, 3 pkgs., \$291; Puerto Plata, 6 pkgs., \$202; Rio de Janeiro, 18 pkgs., \$2,210; Santos, 10 pkgs., \$681; Savanilla, 2 pkgs., \$115; Sydney, 152 pkgs., \$5,135; Tampico, 11 pkgs., \$369; Trinidad, 16 pkgs., \$336; Valparaiso, 16 pkgs., \$348; Vera Cruz, 317 pkgs., \$6,389.

GEO. K. CHENEY TO BOSTON.

Will Assume Charge of the Laboratory of a Talking Machine Co. Recently Organized in Boston.

George K. Cheney, manager of the recording laboratory of the Sonora Phonograph Co., New York, resigned May 14, and will accept a similar

position with a new talking machine company now being organized in Boston, Mass. Mr. Cheney will be succeeded by L. Muller, formerly in charge of the Leeds & Catlin Co.'s laboratory, now wiped off the map by bankruptcy proceedings. Mr. Cheney has had great experience as a recorder and has traveled over the entire world making masters for the Universal Talking Machine Manufacturing Co., whose laboratory he had also charge of for a number of years. Mr. Cheney will enjoy a handsome salary in his new position. The World wishes him abundant success and he is deserving of it.

THE DICTOGRAPH.

A Remarkable Instrument—It Magnifies Sound Waves—Now Being Used in a Great Many Public Places in New York City.

At police headquarters and in different public offices in Manhattan there has been installed a little instrument that may play an important part in future official investigations. It is called the dictograph, and is a mechanical eavesdropper that will strike terror to the heart of the corrupt politician when he knows what it is. Politicians in search of questionable favors and wrongdoers who imagine they are pouring their confidences into the ears of a single and friendly official had better look around the official's desk before opening their hearts.

The instrument is primarily used to facilitate communication between distant rooms. It makes the faintest whisper in one room audible to a stenographer in another room. The instrument magnifies sound waves ten or twelve octaves. Borough President McAneny, who has installed the instrument in his Park Row building offices, said last week:

"Yes, it is a wonderful little thing. I touch a push button and then talk. The person in another part of the building to whom I talk hears me distinctly, though I may be five or six feet from the instrument itself. I believe any sound in my office could be heard in another room, but of course I have never used it for such a purpose and have no intention of doing so. With us it is merely a very fine line of communication, that is all."

Police Commissioner Baker has installed the instrument at headquarters, where, it was said that it is used only for conversation between officials. The dictograph has been used by Chief Wilkie in the United States Secret Service offices in Washington and many large banks have it.

NEW STORE IN MARQUETTE.

The Cable Piano Co. has shipped its entire stock of talking machines and records from its store at Marinette, Wis., to its new store at Marquette, Mich.

Joseph Thomas, a talking machine dealer and printer of Wilkesbarre, Pa., has moved to new quarters in that city.

FROM OUR EUROPEAN HEADQUARTERS

69 BASINGHALL STREET, LONDON, E. C., W. LIONEL STURDY, MANAGER.

TRADE HAPPENINGS IN LONDON.

Talking Machine Sales of Satisfactory Volume Except in Provincial Centers—Public Demanding the Better Grades of Machines and Records—Poor Goods Harm Industry—Optimistic in the Export Field—A New Home Recorder for Discs—What's in a Name?—Trade on the Continent Unsatisfactory—Phonograph for the Pope—New Artists Making Records—The Lists for the Month—Talking Machines Entertain Lepers—A New Way of Giving Away Machines—Attractive Show Windows Cause Trouble—Summary of the News from the Provinces—Happenings of the Month in London and Vicinity.

(Special to The Talking Machine World.)
London, E. C., May 10, 1910.

Apart from the depression existing in certain provincial centers, as reported elsewhere in this issue, there is no cause to complain of talking machine sales generally. True, things are quiet, but nothing out of the ordinary for this time of year. Dealers are placing fine orders for the various styles of portable disc instruments, which is sufficient index that they recognize this as a line capable of profitable handling during the outdoor season, a line, too, which may be relied upon to give extra fillip to record sales. Another point worthy of note just now in directing the dealers' policy is the steady call for "quality" goods. The cheap and unreliable stuff meets with little encouragement from a public who each month becomes more discerning, and it would certainly seem that the best course for traders to adopt is the featuring of better-class machines—instruments calculated to give such satisfaction to the buyer that he forever will remain a steady enthusiast and a regular buyer of good records. I believe that quite half of the people who give up all interest in their instruments do so because of some mechanical defect in the motor, often the outcome of bad workmanship and material, and that is why the sale of these cheap machines does an incalculable amount of harm to this industry as a whole. It is well that dealers are becoming alive to this fact, and that in pushing the best goods they are taking care of their own interests, present and future.

Export Business Improving.

In the export field business is improving very considerably, yet much of the colonial and foreign trade which should come to England goes elsewhere, partly owing to the scant amount allowed for expenditure on energetic advertising methods and the fact that our manufacturers do not trouble to ascertain the wants and market requirements of traders located overseas. Our manufacturers do not seem to realize the splendid business possibilities in Australia, New Zealand, Canada, South Africa, India and other colonies. They are not content to let the orders go to Germany or America, but they do little or nothing to obtain a share themselves. We are told that colonial merchants are only too anxious to deal with English manufacturers, if the latter will cater to their requirements more satisfactorily. Isn't this sufficient encouragement? Can manufacturers expect to sell their products, however well made, if those products do not suit the climatic conditions and colonial ideas? Of course not. Then let them offer what is wanted and advertise that offer freely.

Numerous Visitors of Note.

During the week quite a number of distinguished visitors have been to London, and among whom may be mentioned Mr. Rosenbaum (Beka Record Co., Berlin), Emil Rink (managing director of the International Talking Machine Co. and Fonotopia, Ltd.), M. Strauss (Carl Lindstrom, Ltd.), and Mr. Wyneken (director of the Favorite Record Co., Hanover).

New Home Recording Device.

Since the passing of the old Neophone Co. (the only remaining asset of which is, or was, a first-class season from London to Brighton), disc record users have been unable to enjoy the delights of home recording. J. E. Hough, Ltd., have now come to the rescue in filling the proverbial long-felt want by a timely introduction of an ingenious device for this purpose. The recorder is only adaptable to the phonograph cut, but in view of its practicability it will no doubt exercise a big influence in further popularizing this class of disc among users of the needle-cut type.

More Trouble.

A deal of comment, not to say astonishment, was caused in the trade last month by the association of the word Gramophone in Barnett Samuel & Sons, Ltd., press announcements advertising their well-known series of Dulcephone disc machines. It appears that Barnett Samuel recently registered a trade-mark containing the words "The Dreadnought Gramophone," and it is the advertising of this which has not unnaturally been taken exception to by the Gramophone Co., Ltd. I use the phrase "not unnaturally" advisedly, because whatever may be the merits of the case it cannot be denied that up to the present the Gramophone Co. have enjoyed the use of the name exclusively and have spent thousands or pounds in making that name, in a sense, very valuable from a commercial point of view. In a circular letter to the trade the Gramophone Co. advise that an action has been commenced against Barnett Samuel, and that they intend to institute proceedings against any persons infringing the company's rights. In reply to this Barnett Samuel inform traders that "if the action is proceeded with it will be defended, and we have no anxiety as to the result. We are advised that the Gramophone Co., Ltd., have never had any exclusive right to the use of the word 'Gramophone,' and that it is open to us or anyone else to use it." And there the matter rests for the present.

New Cable to Belgium.

In addition to the new London-Paris telephone cable to be laid between Dover and Cape Grisnez shortly, preparations are being made to lay yet another telephone cable across the Channel to Belgium, in order to open out the principal center of England beyond London. There are now no less than eight telephonic services to the Continent, and this facility should weigh materially in establishing quicker communication with continental machine and record makers.

Trade Conditions on the Continent.

Discussing the continental trade situation with your correspondent, M. Strauss, of the well-known Lindstrom concern, and a recent visitor to this city, said that the talking machine business in Germany, while not entirely unsatisfactory, left a good deal to be desired. There was room for improvement, especially in the matter of prices, which were so much cut up as to leave little or no profit for progressive development. Particularly was this the case in the record field, and it is somewhat astonishing to learn that a fairly good disc record is sold there for about tenpence wholesale. Such a situation demonstrates very forcibly the need for trade protection associations, the existence and value of which in America is the envy of all business men this side. Dealing with the German copyright situation, Mr. Strauss informed me that the second reading of the copyright bill may be expected to come up before the summer vacation. While the Odeon and Gramophone companies, supported by the publishers, are asking for a monopoly clause, the rest of the manufacturers, who are supported by the composers, advocate a similar system of license stamps as obtains in France. The situation is therefore somewhat complex, but in Mr.

Strauss' opinion the French method will eventually obtain and come into force only from the date of the passing of the new act. It seems to me that that healthy competition so vital to business progress can only be kept open by giving to every record manufacturer the freedom and right to adapt any musical piece or song to reproduction mechanically upon a royalty basis, quite apart from the question of local conditions. And this view is apparently most favored in trade circles both here and abroad.

Idelia Phonograph and Edison Records for Pope.

The trade will be interested to learn that the Pope has been pleased to accept an Idelia phonograph, with a selection of Edison records, presented to him by Mr. Edison through the National Phonograph Co., Ltd. The Chevalier Bocchi, managing director of Ashton & Mitchell's Royal Agency, of Old Bond street, London, made the presentation. The Pope expressed his great pleasure with the instrument and asked to have his thanks conveyed to Mr. Edison. His holiness presented Signor Bocchi with a handsome gold medal as a souvenir of the occasion.

Signor Bocchi has given to a representative of the Pall Mall Gazette the following account of the presentation: "When I was informed that the Pope would receive me in private audience, and that he would also be most pleased to accept the phonograph which Thomas Edison desired to offer, I was pleasantly surprised. I was busy preparing the machine in his studio under the impression that I was quite alone, when I was startled at hearing a voice quite close to me. I looked up to see his holiness evidently taking a great deal of interest in my doings. For the moment I felt somewhat taken back. The Holy Father, however, has such a charming and benign manner that one is instantly put at one's ease. After hearing several records, the Pope was quite charmed, and, turning to me, said: 'It is really quite marvelous; the tone is wonderful'; while after hearing a violin record by Mr. Spalding, he remarked, 'There is no doubt the violin is the finest instrument of all!' I explained that one great advantage of this machine was that his holiness could make his own records and dictate his own correspondence, to be transcribed later on. This idea pleased him immensely and he exclaimed, 'Ah! that is an excellent idea; no one would then be able to say I had said anything but what I really did say.'"

Interesting Hire-Purchasing Decision.

A case of much interest to traders who sell talking machines and records on the hire-purchase system was that in which Shenstone & Co., pianoforte manufacturers of Leyton, sued a Mr. Freeman under the Law of Distress Amendment Act, 1908. At the Lambeth County Court Judge Emden had held that the landlord of certain premises in Southwark Bridge Road was entitled in distraining for rent to take possession of a piano which had been obtained by the tenant's wife on a hire-purchase agreement. Messrs. Shenstone appealed against that decision, and the matter being regarded as a test case, the appellants were supported by the Hire Traders' Protection Association. By the Law of Distress Amendment Act, 1908, part of the Lodgers' Goods Protection Act, 1871, is repealed, and additional protection is afforded to lodgers and others whose goods happen to be on premises where the landlord distrains for rent. The act, however, provides that it should not apply to goods belonging to husband or wife of a tenant whose rent is in arrears nor to goods included in a bill of sale, hire-purchase agreement, or settlement made by such tenant, nor to goods in the possession, order or disposition of such tenant by the consent and permission of the true owner under such circumstances that such tenant is the reputed owner thereof. Justice Darling, delivering judgment,

FROM OUR LONDON HEADQUARTERS—(Continued.)

stated that it could not be said the piano was in the possession of the tenant, Mr. Wyard. Even if it were there was no evidence that it was in his possession "by the consent and permission of the true owner." Their lordships allowed the appeal with costs, and granted leave to take the case to the Court of Appeal.

Gramophone Records by Sammarco.

The Gramophone Co. draw special attention this month to a new series of records by Signor Sammarco, who, by the way, possesses one of the finest baritone voices known in operatic circles. Effective show cards are being issued in connection with this series. The usual monthly supplementary list for May contains many gems by popular artists of the day, and it is not too much to say that if anything the recording of these records are even better than the usual excellent standard maintained by the Gramophone Co. Here is the list: "Zanetta Overture," Students' Songs (No. 3), "March Russe" and "Valse Triste," all by the Band of H. M. Coldstream Guards; "Hebrides" ("Fingal's Cave") overture, by the La Scala Symphony Orchestra; "Japanese National Anthem," by the Black Diamond Band; "Onaway, Awake, Beloved!" Evan Williams; "The Sweetest Flower That Blows," John Harrison; "Long Ago in Alcalá," Thorpe Bates; "Rolling Down to Rio," Stewart Gardner; (a) "Love Is a Dream" and (b) "O That We Two," Mme. Kirkby Lunn; "Bolero-Merci dilette amiche" ("I Vespri Sicilliana"), Miss Amy Castles; "In a Child's Small Hand," Miss Edna Thornton; "I Dreamt That I Dwelt" ("Bohemian Girl"), Miss Perceval Allen; duet, "Watchman, What of the Night?" John Harrison and Robert Radford; "Slavisch Tanze, No. 8," by the Renard Instrumental Quartet, and "Adagio Cantabile," cello solo by Hugo Becker. Truly, a very fine list.

T. A. Edison Contemplates Visit?

A Daily Chronicle report speaks of Mr. Edison's intention to pay a visit to this country some time next year. We have read reports of a sim-

ilar nature many times within the last year or so, but if it should turn out to be true, what a welcome awaits him! And what a fillip, too, it would give to sales of the goods which bear his name!

Cooks Athletic Co. Fail.

Cooks Athletic Co. (1907) Ltd., of Beech street, Barbican, have called a meeting of creditors. The liquidator is G. Askew. This is the firm who first handled the old Imperial records in London, but the agency was terminated after a few months.

The "Twins" list for June contains a budget of real good titles, which will certainly be in great demand, a summer trade reviver.

Beka Records in Bengal.

Another addition to the many world agencies for the Beka Record Co.'s English discs is the appointment of Sen & Sen, of 1, Chowringhee, Calcutta, as sole agents for the Province of Bengal.

Summerfeld with Favorite Co.

Following upon A. Vischer's retirement from the Favorite Record Co., this line will in future be handled by Mr. Summerfeld, a gentleman, by the way, whose experience in the offices of O. Ruhl, Ltd., well qualifies him for the position. The Favorite record has long been popular with talking machine lovers, and it is not too much to expect that Mr. Summerfeld, with the friendly aid of Mr. Ruhl, will increase the enviable reputation of his product.

Phonographs for Leper Settlement.

In the leper settlement at Kalawao, Molokai, Hawaii, says the Edison Phonograph Monthly, several Home phonographs and over 1,200 records, distributed throughout the entire reservation, afford unlimited entertainment to the inmates, especially to the young people. The records of native songs and dancers made in America by Toots Paka's Hawaiians, are, of course, in greatest demand, but the leper boys extract no end of amusement from making records of their own voices, which, says the superintendent of the

colony, are very good—low and quiet, but tuneful.

British Zonophone Co.'s Fine List.

One of the best record lists for this month is that issued by the British Zonophone Co., who offer some real good selling titles, which their dealers will appreciate to the utmost at this time of the year. A beautiful record is that of Tosti's "Good-bye," made by an instrumental trio composed of violin, flute and harp, a combination which is very popular these days. Others are (12-inch), "O Ruddier Than the Cherry" (Handel), by Harry Dearth; (10-inch), selection, "Il Trovatore," by the Black Diamonds Band; "Monte Cristo Waltz," the Peerless Orchestra; "By the Fountain," Ernest Pike; duet, "Love and War," E. Pike and S. Kirkby, and "I've Found Kelly," Billy Williams.

A New View of Price-Cutting.

At the annual general meeting of A. W. Gamage, Ltd., Mr. Gamage had something to say upon the question of price-cutting, a policy for which his firm has obtained some notoriety. He said: "The people who took exception to the company's methods were all cutters, more or less, but they did it in different ways. The company preferred to do it in a straightforward and open manner, paying full prices for the goods they purchased. Many of those who had created such a disturbance signed agreements which they broke at the first opportunity." After giving particulars in support of these statements, Mr. Gamage continued: "That afternoon a meeting was to be held having for its object not the protection of the consumer but the formation of a new society of motor traders, the object of which would be to squeeze the bonds still tighter about retailers so that they should not cut prices. The suggestion was that if a retailer did not charge the prices established by any particular manufacturer all the manufacturers of the country would refuse to supply that retailer with goods. Similar efforts had been made before, but in vain. In his view this policy of price-maintenance was im-

moral! It had undoubtedly tended to create great business immorality. It had turned men of good principle into liars and breakers of agreements. He felt sure that the shareholders would not agree with the tactics of certain societies, because it was right that the trader, so long as he conducted his business in an honest, straightforward manner, should be left to decide for himself what profit he was content with."

This is without question a bold and specious pronouncement, but we reckon Mr. Gamage would soon change his tune if all traders took up the same attitude. Competition along these lines could only end in one way. Profits would dwindle to nothing in order that one trader might get the better of the other. Sheer philanthropy! Gamage, by the way, are still selling Imperial records at 10d. each!

Prominent Artists Make Rena Records.

It can hardly be said that the monthly supplements of Rena records suffer from a lack of variety, either in artistes or titles. This month's list of 10-inch Rena embraces three new artists, one of them Mrs. A. Stewart Holt, the lovely contralto hitherto only associated with the 12-inch records. Another is Carroll Clerk, who sings "Darling Nelly Gray" and "Daddy's Pickaninny Boy" as his introductory offerings.

Harry Ford is back again on Rena records. He sings this month two of his own unpublished songs, so that they are quite exclusive to Rena. The King of Patter Comedians, as he is billed, has made a big name for himself on Rena.

Imperial Graphophone a Success.

The Columbia Phonograph Co. announce that the Imperial graphophone in the new style is a distinct success. It may be stated that the cabinet design has been altered and now has curved sides and rounded corners. But the most striking improvement is the addition of a mahogany horn, the new Columbia Symphony horn.

Boom in Lashwood Records.

Those who participated in the boom in Lash-

wood records on the Rena list a little while back—a boom which still exists—will be interested to know that George Lashwood is touring the principal cities of the United States, taking each one by storm as he goes. He is featured as the "Vaudeville Beau Brummel" and the saner critics of the newspapers on the other side unite in declaring his receptions to surpass even Chevalier and Vesta Victoria at their best. In the States, the Columbia Co. secured him to sing for them, just as was the case over here.

The New Rena Record List.

The 12-inch Rena supplement for this month takes a somewhat novel form. It comprises four double records, and is, we are informed, somewhat in the nature of an experiment. The two band records offer "Carmen" selections in two parts, obverse and reverse of a record, and "Tannhauser" selections, also in two parts on one double record. The vocalist is Kirk Towns, the celebrated baritone of the Wiesbaden Opera, and he is represented by two records of contrasting character but of unexampled brilliance.

The Gipsy Smith Records.

Gipsy Smith, records by whom, under exclusive contract with the Columbia Phonograph Co., are just being issued in a special Rena supplement on 12-inch discs, was always a singer as well as a preacher. As far back as 1883 we find critics enlarging upon his charming vocalization. He tells how in the year in the circus of Hanley, Staffs he sang a solo. His records may without exaggeration be said to show the same felicitous treatment and depth of feeling that characterized his singing those twenty-seven years ago and that have given him so firm a grip on his crowded audiences since and now. With a full sense of the fitness of things, the Columbia Co. are issuing the series in a specially designed 12-inch album, gold-lettered and tied with ribbon.

Give Machines to Record Buyers.

In a previous issue attention was drawn to the operations of the English Record Co. in giv-

ing away a machine upon a promise to purchase fifty-two double discs at half a crown each. This is a perfectly legitimate form of competition, it must be admitted, but dealers very naturally take exception to the company's methods of trading direct by means of house to house canvassers. All would be well if only the manufacturers were to insist upon the scheme being conducted through the proper trade channels. And in this connection a somewhat similar idea inaugurated by Messrs. Lockwoods, the well-known Twin and Zonophone factors, deserves the support of traders, because it is conducted only through dealer-agents appointed by the firm in specified districts. Messrs. Lockwoods offer embodies an agreement to purchase one Twin record at 2s. 6d. regularly per week for 48 weeks, in consideration of which a model 6 Perophone disc machine, value 4 guineas, is given upon a promise to pay at the end of that period the sum of one guinea, or four weekly payments of 5s. 3d. From the description before me the machine is a thoroughly reliable one, and is quite remarkable value for the money. This is a sensible proposition which will no doubt meet with a good reception, since it furnishes dealers with a splendid opportunity of easily combatting the competition of the English Record Co., whose free machine, by the way, is very poor value for the estimated price put upon it.

To Pay Creditors Small Percentage.

It may be of interest to those of my readers who are creditors of the defunct American Talking Machine Co. to know that the stock in trade and effects have realized a sum sufficient to pay all creditors 3s. 6d. in the pound. The trustee, G. E. Corfield, of Balfour House, Finsbury Pavement, London, will, however, pay out this sum only on condition that the creditors sign the following understanding, which is self-explanatory:

"We understand from you that Mr. Cowen, Berwick-on-Tweed, claims to be a creditor on the

Novelties in Current Beka List.

There are several interesting novelties in the current monthly Beka record list which will meet a ready demand if featured prominently by those dealers who have an eye to quick business. The records of most interest, perhaps, are those by A. D. Dobrochotof, who operates a new kind of instrument called a Balalaika, which combines a banjo, mandolin and guitar in one. Then there are another two fine records by Harry Champion, "A Member of the Force," and "Robin Redbreast." Other selections worthy of note are: Parts 1 and 2 of the Raymond overture, "On Jersey Shore, March" and "Austria March," "Russian National Hymn" and "Marseillaise," and "Rule Britannia" and "God Save the King," all by the Beka London Orchestra; "Song of Titania," from "Mignon," and "Last Rose of Summer," by Mme. Isabel Carol, and "All I Said was Ha! Ha! Ha!" and "Laughing All the Day," by Billy Whitlock. A really fine list!

A Premium on Enterprise.

Some material action has at last been taken against the police interference of traders rights in the matter of shop window displays. A meeting was held at the Holborn Restaurant recently for the purpose of considering the position in regard to the law of traders whose displays caused crowds to collect, thus obstructing the traffic. The gathering was summoned at the instance of certain trade journals in consequence of recent prosecutions of shopkeepers whose win-

dows had been too attractive in this way to the public. There was a large attendance of representatives from the leading London stores. The chairman expressed the opinion that the traders had a grievance against the police regulations which put an end to enterprise and novelty. Under present conditions if a trader arranged a display which attracted a crowd to his premises he was haled before the magistrates and penalized. If all were treated alike there would be no cause for grumbling, but places of amusement and newspaper offices, which attracted crowds, appeared to be exempt from prosecution. In these cases the police actually assisted in marshaling the crowds. Mr. Conly, legal adviser to the committee, explained that there was no defense in law where a shopkeeper occasioned an obstruction by causing a crowd to assemble outside his premises. A resolution expressing dissatisfaction with the present state of the law, and that a deputation be appointed to wait upon the commissions of police, was duly moved and carried unanimously. Gamage & Co., Catesby & Sons, and Selfridge & Co., large talking machine traders, strongly supported the resolution. It is to be hoped that the effect of this meeting will result in obtaining some concrete advantage.

Provincial News.

At the time of writing trade conditions in the provinces have shown little signs of improvement since my last report, and indeed, if anything, sales are on the downward grade. It is, however, not considered entirely unsatisfactory for the time of year, and then, too, the fortunate settlement of the great strike threatened in the coal industry has caused much rejoicing in Welsh trade circles, where talking machine prospects are much brighter in consequence. Around the Midlands business is reported to be somewhat quiet in machine sales, but Twin, Zonophone and Edison records still enjoy a pretty good demand. Disc machines of the portable type are gaining in popularity as a good summer line for dealers,

and some good orders have recently been placed with the London manufacturers.

Up Manchester way things are still somewhat unsettled. For over ten months now the cotton mill operatives have been working short time, and there seems a likelihood of further trouble arising out of the masters seeking to reduce wages 5 per cent. This would mean in the aggregate a loss to the operatives of something like £10,000 a week, and a corresponding loss to talking machine dealers, since at least 5 per cent. of this amount may be reckoned as surplus spending money. Despite such conditions, however, trade might be worse, but for all that it is significant that very little advertising is being indulged in by the Manchester factors. A trade exhibition to be held in Manchester during May will be supported by several musical instrument houses, and we are glad to learn that J. E. Hough, Ltd., makers of cylinder and disc machine records, have taken a large stand in a prominent position, with the object of stimulating trade in that city and Lancashire generally. Owing to the continuance of the coal strike, which shows no signs of settlement, business in the county of Northumberland is very depressed, and traders in talking machines are complaining bitterly of the absence of sales of any material note.

Irish ditties or melodies, we are told, are as popular north of the Tweed as they are across the Channel, so that the two special Irish songs appearing in the May list of Rena records are sure of a big demand in Bonnie Scotland.

Good Selections in Edison List.

The usual batch of good selections appear in the Edison record list for June, and are as follows: Amberol records—"Bohemian Girl Overture" (Balfé), and "Trafalgar March" (Zehle), by National Military Band; "Give It to Father" (David and Lyle), Miss Vesta Tilly; "Boss of the House" (Murphy), Jack Pleasants; "The Irish Emigrant" (Baker), Stanley Kirkby; "I Put On My Coat and Went Home" (Hargreaves),

Public Wireless Service.

April 23 saw the opening of Marconi's transatlantic wireless telegraph service for public use between Europe and America. The rate is 7½d. per word.

More Record Litigation.

Some litigation has arisen over the raised edge rim on Favorite records. This is alleged to be an infringement of a gramophone record, and I understand that in consequence the Gramophone Co. have taken action against the liquidators of the firm of H. Lange's Successors, Ltd.

English Record Co. to Market Favorite Records.

I hear that the English Record Co. have now

contracted arrangements with the Favorite Record Co., of Hanover, to supply the Favorite records for marketing under their hire-purchase scheme.

It Was W. Manson.

Owing to a typographical error, the name of Mr. W. Manson, in the article referring to the new Zonophone List last month was spelt incorrectly, but his friends soon had the matter right.

KLINGSOR WORKS TO MOVE.

To Occupy Much Larger Premises on Tabernacle Street—To Introduce New Record—Success of the Klingsor Products—Plans Undertaken for a Big Expansion of Business Throughout the Country.

(Special to The Talking Machine World.)
London, Eng., May 2, 1910.

A matter of more than ordinary importance this month is the information that the Klingsor works are shortly to remove from City Road to much larger premises at 22 and 24 Tabernacle street, close by, where they will continue the manufacture of the many successful Klingsor models, and, in addition, introduce a new record. In these days of strenuous competition only the best records can be expected to weather the test of time, and, recognizing this fact, the promoters of the Klingsor disc have arranged to submit to a discerning public something which, it is said, will create quite a sensation. The record is of the needle cut style, and although the price is not yet fixed, I am told that it will be such as to insure, in conjunction with quality, an immediate demand both from the traders and the talking machine public generally. Certain it is that no finer combination could be found than the Klingsor machine and Klingsor disc record, and in view of the fact that it will make its introduction under the best auspices, there seems indeed a splendid future for its commercial success. The new undertaking, too, will have the co-operation of two very powerful firms, whose names I shall be in a position to publish next month. Mr. A. Vischer, of whom there is no more popular man in the trade, is joining the organizer of this new concern, Mr. H. E. Heyder, whose conspicuous business ability and wide experience of the trade conditions in all continental countries must certainly go a long way to at once place the new Klingsor works as one of the foremost concerns in the trade. More anon.

COUNTERFEITING RECORDS.

Important Opinion Against Counterfeiting Records Handed Down by the Supreme Court of Germany.

The German Gramophone Co., of Berlin, some time ago began proceedings against two firms, one in Leipzig and another in Berlin, on the charge that these firms had copied and sold records in Germany and Russia made from original records sold by the plaintiff company. A temporary injunction prohibiting the manufacture of illegal copies of gramophone records was obtained against both defendants and suits for damages were filed. When the matter was heard on appeal by the Court of Appeals the opinion of the lower courts was confirmed in both instances.

The reasons for the decision coincided very

Don't Buy Needles That Damage Records

Bad Needles

Condor Needles

When a needle is running a record, the friction causes the polished surface of the needle to be taken off, while its interior (grain) is exposed and touches the sound waves.

Consequence:

The poorer the polishing and rougher the grain, the more the sound waves are injured!

Only *Condor Needles* are warranted to have always the highest and most perfect polish, smoothest grain. Using them means:

bei Apolda i. Th., Germany

The largest manufacturing plant in the world devoted exclusively to the manufacture of Master-Waxes for Gramophone and Phonograph

We are prepared to make every sale of the Columbia Grafonola on the basis of comparison. Once a prospective customer gets as far as comparison, its all over but the name and address on the order sheet.

Columbia Phonograph Co., Tribune Building, New York.

closely in both courts and were based on paragraphs 823 and 826 of the civil law dealing with the question of unfair competition, which recited, "Whoever intentionally and in a manner opposed to proper public policy causes damage to another, shall be liable to the latter for such damage and to make suitable compensation."

The Court of Appeals at Berlin adds further expressly that in this instance particularly the copying under the circumstances was most aggravating, the question as to whether others had done the same thing and manufactured counterfeits in a similar manner before was said to be immaterial, as the practising of a mischievous habit did not render the latter permissible in the eyes of the law.

In both instances the defendants appealed again to the Supreme Court at Leipzig (Reichsgericht) and this court has handed down a decision fully concurring with the views of the lower courts.

The business of making unlawful copies of talking machine records may now be regarded as legally prohibited at last. The disc and cylinder industry has been freed from a most serious handicap and should now make use of every opportunity as soon as it learns of any further counterfeiting, to take a most energetic stand against it. It is expected that when the new copyright law goes into effect it will contain a provision which will give further protection against making unlawful copies.—Die Sprechmaschine, Berlin, April 16, 1910.

A NOTABLE COINCIDENCE

When Wizard Edison Stumbled on Wizard Morse's Diary.

In the middle '80s Thomas A. Edison took a house in Gramercy Park, where he found himself very well situated for the leisure which he always enjoys, being by nature a reposeful man and not the grinding dynamo that people so often fancy him.

Few things suit better the mood of idleness than to poke aimlessly around an old house that has its legible traces and signs of human occupancy, and thus one day Edison found himself in the garret of the house, where some old furniture had been stored.

Opening one of the drawers he saw a flat, oblong book labeled "Daily Journal." To his great

astonishment, says the Metropolitan, this proved to be nothing less than an original diary kept by Samuel F. B. Morse, inventor of the system of telegraphy which bears his name.

The entries belonged to a brief but interesting period of his life, the year 1848, supplemented by transcripts of important correspondence dated back as far as 1843, when the electro-magnetic telegraph system was being constructed between Washington and Baltimore.

Edison put the book away carefully and took it with him when he established himself at his present country home in New Jersey. He has now placed it in the hands of the American Institute of Electrical Engineers with this comment in his accompanying letter:

"As this appears to me to be a matter of great scientific and public interest, I feel that this journal should be placed where it may be accessible to others, and I therefore take much pleasure in forwarding the same herewith and in presenting it to your institute in the hope that it may be deemed worthy of receiving a place among the mementos of the telegraphic art in your library."

That Edison himself, the great-telegraph inventor of our own age, who stands next in line to Franklin and Morse as master of the electrical forces, should have chanced thus casually on such a lost relic of his predecessor is to say the least a notable coincidence.

"NEW RICHMOND IN THE FIELD."

The U. S. Phonograph Co. Makes Its Formal Debut with a Line of Machines and Records. An Important Announcement Worth Reading.

The first formal introduction of their line of machines and cylinder records is made by the U. S. Phonograph Co., Cleveland, O., on pages 12-13 of this issue of *The World*. It is a frank and candid statement regarding their product and doubtless the entire trade will read it carefully. The company term their machines the "U. S. Combination phonograph," and their records the "U. S. Everlasting records." Besides appealing to the trade the company will exploit their goods to the buying public through the medium of broadly circulated magazines, in which it is proposed to speak of what they say is "the development and perfection of what is

destined to be the most widely demanded line of phonographic goods in America." In explanation of this encomium it is further stated that the "U. S. line has an actual and provable superiority—convenience of operation, quality of tone production and indestructibility of records." The U. S. machine is a new instrument built on new lines and the record in substance and structure is unlike any other they report.

MAX LANDAY AT RICHMOND.

Max Landay, of Landay Bros., 400 Fifth avenue, New York, is attending the Piano Trade Exhibition in Richmond, Va., and will probably remain until it closes. Max is one good hustler and has a great many friends and customers among music dealers for his Talking Machine Supply Co. lines. This means he will write some good business, meet more new people and have a cheerful time besides.

JOHN C. BUTTON MARRIED.

John C. Button, assistant to H. A. Yerkes, manager of the Columbia Phonograph Co.'s wholesale department at headquarters, was married on May 4 in Washington, D. C., to Olive Lyle, daughter of Dr. and Mrs. Cornelius Lydecker Demarest, of that city. The ceremony took place in Calvary Baptist Church, and among the guests present were Edward D. Easton, president of the Columbia Co., uncle of the bride; Mrs. Easton, Miss Easton, M. D. Easton, Mr. Yerkes, Reginald Demarest, W. D. F. Baker, of the advertising department; C. N. Malliet and W. A. Kitchen, on the traveling staff of the Columbia Co.'s Chambers street store. The presents were numerous and handsome. Mrs. Button is also a cousin of George W. Lyle, general manager of the company, and sister of Reginald Demarest, Columbia manager at Hartford, Conn.

Following a reception at the home of the bride's parents, attended by a number of people prominent in the social and official life of the national capital, the happy couple started on a wedding trip to the coast, to be away a couple of weeks. They will be "at home" after June 1 at Arcola, N. J., the beautiful estate of President Easton, of whom Mr. Button was private secretary for several years.

PHILADELPHIA, PA.

AUSTRALIA A GOOD MARKET

For Talking Machines and Supplies, Says Chas. Wortley—A Country of Great Possibilities.

A recent arrival at the executive offices of the Columbia Phonograph Co., general, is Charles Wortley, general manager of the Columbia business in Australia, with headquarters at Sydney. He is stopping at the Herald Square Hotel, New York, and will be here some time. Speaking of trade in that distant part of the world he said:

"Australia is one of the best countries in the world for the talking machine business. Australians are extremely fond of the machine and never seem to tire of the records. I think there are greater possibilities for the trade with us than any other part of the globe. All sorts of goods are sold in Australia, chiefly English, French and German, the latter make being chiefly cheap stuff. The cylinder record has the preference over the disc in Australia, strange

as it may seem; or rather, when one considers the popularity of the disc record in Europe and the United States. Of course, our best and most appreciated line of goods—because of their superiority over the European product—come from the States. Australians are naturally partial to anything and everything American, because, I suppose, we are nearer to you than to England. Business with us was never better, and there is every indication that it will continue."

R. CABANAS OFF TO EUROPE.

R. Cabanas, president and general manager of the Compania Fonografia Mexicana, of the City of Mexico, who is here with his bride on their wedding trip, sails for Europe Wednesday next on the "Lusitania" of the Cunard Line. He has had a very enjoyable visit at the headquarters of the Columbia Phonograph Co., general, New York, the officers showing him every possible courtesy.

THE TRADE IN BALTIMORE.

April Business of Satisfactory Volume Despite Unfavorable Weather—Dealers Well Pleased with Present Conditions and the Outlook—Cohen & Hughes Manager on the Road—What the Various Large Houses Have to Report Regarding General Business.

(Special to The Talking Machine World.)

Baltimore, Md., May 9, 1910.

Despite the extremely bad weather that prevailed during the latter part of April, there was a good business done by the talking machine people in this city. Summing up the reports of all the dealers, it is fair to say that the volume of business for the month exceeded that for the same period of 1909. This has been a source of encouragement to the experts of the trade who feel that they are in for a good spring business, while they also declare that they have every reason to believe that the summer trade will be much more active than for several years past. They express this opinion in regard to both machines and records as the activity of the past month has been in both branches of the business. Unlike the promoters of other lines of business, the men engaged here in the talking machine trade are very optimistic and are always looking on the rosy side of life.

Manager Joseph Grottendick, of the talking machine department of Cohen & Hughes music store, 315 North Howard street, has been on the road for a week or more extending the business of the firm to a number of points on the Eastern Shore of Maryland and Virginia, as well as in other sections of the State. Reports at the Cohen & Hughes store are to the effect that the firm has had a good month with the Victor and Edison machines and the records of the two concerns.

E. F. Droop & Sons' Co., who also carry a large line of Edisons and Victors, according to Manager Roberts, have been in the swim all during April, while the startoff for May has been very satisfactory. Manager Roberts contemplates an early visit to a number of the firm's customers in the State, where the trade has been showing up in good style.

At William McCallister & Sons, Baltimore street near Howard, similar bright statements concerning the trade are made. The company has been particularly busy furnishing the customers with the records of the latest popular songs. There has been a heavy raid on many of these. McCallister & Co. have a line of Victor and Edison machines.

Morris Silverstein & Co., who had been running a line of Columbia and Victor machines at 216 North Howard street, have moved from that location. Mr. Silverstein is well known in the talking machine field, having been manager for the Columbia Phonograph Co. at Louisville, Ky., and Baltimore stores before entering business on his own hook.

Sanders & Stayman have also been busy with the sales of Victrolas and Grafonolas, while the demand there for operatic and other records has been brisk.

Manager Laurie, of the Columbia Phonograph Co., and the several other houses here, make reports of a similar encouraging nature.

NEW VICTOR CONTRACT.

On May 4 the Victor Talking Machine Co., Camden, N. J., forwarded to their dealers a new contract or agreement, revised to May 1, for their signatures, which are then to be returned through the distributor with whom they have accounts. In their circular letter to the trade the company say: "There are no changes in the new contract from the old, of any importance. We have simplified the same by leaving the price list out of the contract, issuing that in separate form. By this elimination, our contract will not seem to grow obsolete so early and the price list can be readily revised and issued at intervals, when necessary."

THE COMPLETE CONVENTION PROGRAMME.

Planned to Make Every Moment of the Stay at Atlantic City Full of Interest—Time Between Business Sessions to be Given Over to the Full Enjoyment of the Pleasures of That Famous Resort—Headquarters at the Chalfonte—Every Progressive Jobber Will Be There.

Headquarters will be at the Chalfonte. Special rates have been arranged which will greatly modify the usual charges. Unusual arrangements have been made with the management of the hotel to provide every accommodation for the convenience and pleasure of the Association. Rooms, single and en suite, are reserved on one floor and adjoining each other, so that the association members will be grouped together and spared the annoyance of going from floor to floor. A certain section of the dining-room will be at the individual disposal of the association. Music, special attendants, including our own corps of waiters, bell boys and other attendants, have been proffered. With a further addition of very assured courtesies, the association members are guaranteed something very unusual.

Each member will have the entire freedom of Atlantic City and can govern his movements to suit his individual taste. The main features of the entertainment are enough to occupy the entire time, but anyone wishing to deviate in any particular, by reason of friends, acquaintances or special desires on his part, can do so ad libitum.

First Day, Tuesday, July 5th.

Personally conducted tour of the boardwalk and general features of the beach, immediately after breakfast until 11 a. m.

Bathing, 11 a. m.

Luncheon.

Association meet, 2:30 to 4:30 p. m.

Dinner, 6 p. m.

Dancing, 9 to 11 p. m., on Amusement Pier.

Old Vienna, 11 p. m. to 6 a. m.

Second Day, Wednesday, July 6th.

After breakfast, sail at the Inlet.

Bathing, 11 a. m.

Luncheon.

Association meet, 2:30 to 4:30 p. m.

Dinner, 6 p. m.

Personally conducted tour of Young's Pier and inspection of the Wireless Station. Numerous side attractions have been arranged for, allowing an assortment for selection that will meet any taste.

THORN NEEDLES PROVE POPULAR.

J. W. Jenkins & Sons Music Co. Report Encouraging Demand for That Product—Burton J. Pierce on Commercial Club Tour—Conditions in West.

(Special to The Talking Machine World.)

Kansas City, Mo., May 7, 1910.

The J. W. Jenkins Sons Music Co. are experiencing a very encouraging demand on their thorn needle. They report the receipt of orders from all parts of the United States. They have also received considerable inquiry from abroad.

Burton J. Pierce, manager of the talking machine department of the company, returned early this month from a week's trip through Northern Arkansas, Oklahoma and Eastern Kansas with the Kansas City Commercial Club. The crowd traveled in a special train and made about ninety towns in the territory named. "We found business conditions very satisfactory," said Mr. Pierce, "considering the fact that the recent cold weather has partly destroyed a large portion of the fruit and garden truck, and almost all of the country has been in need of rain, although the heavy rain we have had during the last 24 hours seems to have been general, and it will improve conditions wonderfully in the country.

"Our branch store managers in Oklahoma City, Okla., and Independence, Kan., are very hopeful for a splendid year's business. In fact, Oklahoma is booming to such an extent that they are bound to have a good year in that

10 p. m., Special Seashore Dinner with elaborate musical program.

Old Vienna follows until the wee sma' hours.

Third Day, Thursday, July 7th.

9 a. m., ball game between the Eastern and Western Jobbers at the Atlantic City Ball Park.

Bathing, 11 a. m.

Luncheon, 11 a. m.

Association Open Meeting, 2:30 p. m. Reading of special papers prepared by Association members and experts from the various talking machine factories.

5 p. m., English Afternoon Tea with light luncheon.

7:30 p. m., banquet at the Shelburne "Rose Room," specially decorated for the occasion, with elaborate menu and select musical program. Guests of honor: Emil Berliner, of Montreal; Eldridge R. Johnston, president of the Victor Co.; Leon F. Douglass, vice-president and chairman of the Board of Directors of the Victor Talking Machine Co.; Frank L. Dyer, president of the National Phonograph Co., and Edward Lyman Bill, Editor of The Talking Machine World.

Fourth Day, Friday, July 8th.

The association members will board the 9:30 a. m. train, arriving in Camden about 45 minutes later. As guests of the Victor Talking Machine Co., the association will visit the factory. After visiting this plant, luncheon will be served on the roof garden of the Hotel Bellevue-Stratford, Philadelphia. An interval will elapse before dinner, which will allow members to "see" Philadelphia. After dinner members are invited to join the representatives of the Victor Talking Machine Co. in attending a theatrical entertainment, following which supper will be provided at one of the leading cafes.

Fifth Day, Saturday, July 9th.

Specially arranged meet and visit at the Edison factory, Orange, N. J., a short run from Philadelphia. The officers and members of the Edison Co. will show the association their usual handsome attention, which will include ample provision for the entertainment and pleasure of all while in Orange.

section of a prosperous and go-ahead country.

"I traveled very extensively through the western part of Oklahoma four years ago, through what was then known as the 'short grass' country, and I passed through miles and miles of country without seeing any plowed ground. This year I went over the same territory, and, as far as the eye could reach, I could see nothing but land under cultivation, and everything seemed to be surrounded by a prosperous atmosphere. In spots, where a few years ago there was only grazing ground, I found splendid little towns. The people seem to be very progressive, and everyone of these towns claims to be the future metropolis of the Southwest.

"The talking machine is keeping pace with the business growth of the Southwest, and I found the various lines represented everywhere. Many dealers are complaining of business being slack at the present time, but are not at all alarmed, and are looking forward to a great increase in business as soon as the various crops are assured."

Robert Chanler, the famous ex-sheriff of Dutchess County, N. Y., brother of former Lieutenant-Governor Chanler, the fiancee of Lena Cavallieri, the celebrated operatic singer, has a Grafonola de Luxe on which he plays only the records of her voice. Mr. Chanler is a man of means, and has provided himself with every Cavallieri record made, and during her present absence in Europe this is his mode of paying homage to his fiancee. They will be married in October, when the lady returns to this country.

Make your jobber "toe the mark"

You can't take the proper care of your customers unless your jobber does his part by you.

If he doesn't send goods to you promptly and makes you keep your customers waiting, he is working against you, and all your efforts to please your customers and build up a larger and more profitable business will count for nothing.

You want your customers to depend on you to have what they want or to get it for them quickly. And you ought to have a jobber you can depend on. If he values your trade, he will show it by taking care of it.

Nothing slow about us in filling orders. We always have a large stock of Victors, Victor Records, Victrolas, record cabinets, horns, fibre cases, needles, extra parts and accessories of every kind right on hand, and all orders are packed and shipped the same day they reach us.

We help you best by helping you to please your customers. We know that means more money and increased trade for you—and we'll get our share of the business from you.

Good idea to give us a trial order for the things you generally have the most trouble to get. That will be a pretty good test of what you can expect from us.

Write to-day for our latest catalog and our booklet, "The Cabinet That Matches."

New York Talking Machine Co.

Successors to
Victor Distributing and Export Co.
83 Chambers Street New York

The Columbia business in both machines and records is so far ahead of last year, that it takes three figures and a per cent. mark to express it.

Columbia Phonograph Co., Tribune Building, New York.

TIMELY TALKS ON TIMELY TOPICS

While it is true the marvelous growth of the talking machine industry was materially checked by the financial depression of the past years, the plants of the principal manufacturers have been steadily expanding. To be sure, much of the work along these lines was probably laid out before the monetary disturbance of 1907 had materialized. At any rate, at the present time none of the three big companies whose fame is world-wide, but is crowded for room capacity. It is true the advent of the high priced lines is responsible in great measure for the volume of business now booked or in sight.

The National Phonograph Co., Orange, N. J., have a group of buildings which are worth a long journey to see. A recent visit to the plant by The World revealed many improvements and enlargements of which the trade at large possibly are not aware. In the hands of Sales Manager Dolbeer this expansion, under way and to be undertaken in the near future, was made clear. The Edison works own a large tract of land where the plant is located, and it is gradually being covered by concrete buildings of massive and impressive appearance.

Only a couple of the old low frame buildings

survive, and these will in time be replaced by others of a more substantial structure. Several of the lofty new buildings will be extended in some instances fifty and a hundred feet, so as to provide for what the company feels assured will be many prosperous years. The introduction of the Amberola cabinet and Amberol records has opened up an entirely new field of activity, and for months the capacity of the plant to supply these goods has been employed. In the record-moulding department a new method of "spinning" has increased the production greatly, the process being simplified and the output running up to 600 completely finished records an hour.

The wonderful factory of the Victor Talking Machine Co., Camden, N. J., is going ahead with such rapid strides that those not actually in close touch with its affairs at first hand would scarcely realize. Where only a few years ago one modest building was sufficient to house the entire business, now stands a group of magnificent brick and concrete structures covering many acres of ground, running from the Delaware River front back a half dozen squares. The buildings are consecutively numbered, and when one notices 60 there is a real basis for astonishment.

A visitor will occupy nearly three hours in going over the Victor plant, on a steady go all the time, and then not get into everyone of the departments or loiter very long to witness some particularly interesting process or operation. The business or executive end of this celebrated company occupies one large building alone. The structures accommodating the various manufacturing departments, every one of which to the person not familiar with the work of making talking machines, records, etc., is a study. If it will be borne in mind that nearly everyone of the processes involved in the manufacture of talking machines—or, as the intelligent guide, with considerable pride, will doubtless inform his guest, the "Victor is a scientific apparatus for the reproduction of sound, not a talking machine"—and disc records were originated, developed and perfected for the work, he will be still more amazed. Such is the fact, however.

The trade are prone to take everything for granted, and comparatively few, indeed, have a conception what a splendid organization is represented by the personnel of the Victor Talking Machine Co., from President Johnson and General Manager Geissler down through the ranks to the humblest employe in the most unimportant department of the service. The affable general manager, whose consistent policy and indefatigable industry, aided by a capable corps of alert and resourceful assistants, has done so

much toward building up the present gigantic business of the Victor Co., speaks with pardonable pride of what has been accomplished. With a record of 97,000 unfilled orders for machines on the books, a demand for Victrolas running into such high figures that all records are broken, the company are literally swamped, so to speak, with business. So true is this that, as related more in detail by a special correspondent, the cabinet-making plant, designed on such a scale as was deemed sufficient to meet every requirement, is now so inadequate that a new building was recently decided upon and is now being hurried to completion that will double the capacity. The writer, who had the pleasure of witnessing the industrial activity embodied in the Victor plant, could keep right on describing at length that what is an every day operation, but lack of available space compels him to desist. In conclusion, it might be said, however, that if a dealer is ever in Philadelphia and fails to visit the Victor plant he will miss a sight long to be remembered.

The trip to South America recently concluded by Walter Stevens, manager of the export department of the National Phonograph Co., the narrative of which appears on another page, is worth a careful perusal by readers of The World. Aside from his graphic description of the points visited, manners of the people and intelligent summing up of the business methods—ceremonious to a degree—followed by our Latin-American neighbors, he gives point to the fact that the American flag is seldom seen on any vessels in these ports. The lack of banking facilities in the hands of Americans is also dwelt upon, though a movement is on foot to establish a financial institution in Rio de Janeiro. The lack of shipping and direct transportation connections with the United States is also spoken of as to be regretted. Mr. Stevens' candid opinion concerning the glorious opportunities for the American manufacturers of talking machines in South America is shared and endorsed by everyone whoever has traveled in that part of the world. Needless to say, the field is not neglected, but is being sedulously cultivated, and the companies now shipping their product to that vast market are not allowing any grass to grow under their feet.

Last week the export department of the Columbia Phonograph Co., general, issued a supplementary list of their August double-disc records for the Spanish-American countries. The bulletin includes twenty-two selections, in band, orchestral, instrumental and vocal music. The names of some well known native artists appear, among them admirable records, of which shipments were made at the same time.

The time for a man to retire from active business depends on conditions. Some men are young at seventy; others are old at fifty. The method of living, the occupation, habits, successes or failures all have their influences.

Talking Machine Dealers ATTENTION!

Here is a "hot-weather" BUSINESS STIMULATOR. BIG SALES—BIG PROFITS are within your reach if you represent us on the

AROUND THE BOSTON TRADE.

Business Is Normal—Publicity Brings Results—Columbia Progress—Eastern Talking Machine Co.'s Progress—Steinert's Attractive Quarters—Business Active with Oliver Ditson Co.—Special Summer Service Inaugurated by the Boston Cycle and Sundry Co.—News of the Month.

(Special to The Talking Machine World.)

Boston, Mass., May 10, 1910.

"Normal" consistently sums up talking machine conditions in Boston. April, as a rule, is expected to bring a little lull in sales of every character, and, while this is true more or less this year, there was no decided break in volume. On the contrary—outside of a little lessening—business is in a good staple state. A feature of the month was the large increase in instalment business on the lower-priced machines, as goods of this character are always in active demand during the spring. This is natural, owing to the opening of summer cottages, camps and canoe clubs, which, of course, carries with it a contingent call for records and supplies. There was a fair gain in orders for the high-priced "talkers," as these have been firmly established in the mind of the public as the acme of talking machine construction—an instrument that is musical and ornamental to the fullest degree.

Dealers Advertise Liberally.

A vigorous campaign of newspaper advertising has been maintained during April by the retail distributors of talking machines. It was not uncommon to see several large-sized "ads" of different dealers appearing on the same day, and this is something that has not been witnessed for some time. Books and circulars galore have been mailed to the trade, customers and prospects, and this, with the general publicity of the home offices, ought surely to be of immense advantage in securing an excessive May business, bearing in mind the phrase that "Advertising of all kinds helps all kinds of advertising."

"Columbia Conciselets."

Here are some "Columbia Conciselets": The National Sportsman Co., of this city, have taken on the Columbia line exclusively, starting with a complete stock of machines and records.

F. E. Hightner, formerly with the Columbia Phonograph Co. in Toledo, is now connected with the Boston end, where his efforts are proving particularly successful.

George P. Donnelly, former assistant manager of the Columbia Co.'s Boston store, has been transferred to Portland, Me., with the lettering on his private office reading, "Manager." There is no doubt but that his ability and experience will stimulate an increased Columbia business in that territory.

The Household Furniture Co., of New Bedford, Mass., is another concern to secure the exclusive Columbia agency. A complete line of goods, including all the new-type machines and records, shows the confidence they have in the fast selling qualities of "Columbia's."

Arthur Erisman, the genial manager of the Boston store, reports a very satisfactory business for the past month. "Of course we experience no grand rush," remarked Mr. Erisman, "but the fact is that a seasonable business was transacted. It is very gratifying to note the activity in Columbia Grafonolas—the library table style—which we are producing in many kinds of woods. The mission oak style is proving very popular for hungalows, club rooms and summer homes, while the oak, mahogany and other finishes easily match the environs of the library, parlor or living room of the modern home."

Some of the boys in the Columbia warerooms are wearing a pretty watch fob, with the compliments of the home office. It is a reproduction in gold and black of the notes and bar which comprise the Columbia trade-mark.

"Window-decorator" Mason says he has something in mind for an artistic window display that will make passersby "stop short and notice" the merits of the Columbia line. His accomplishments in the past have been A-1, so he will

It will interest The World readers in Boston and New England to know that a larger service will be rendered the interests of the trade in that section of the country in the columns of this publication than heretofore.

We have opened World headquarters at 180 Tremont Street, Boston, Mass., with Glad. W. Henderson in charge.

Mr. Henderson, whose training in business and journalistic life especially fits him for the work before him, will devote his time and energy to furthering World interests in Boston and vicinity.

He is admirably qualified to strengthen The World lines and to render to the trade a specialized service which will be of obvious advantage.

He enters upon his managerial duties with the desire to give to the Boston and New England trade a service which will be beneficial in every way.

Editor The Talking Machine World

have to "go some" to exceed his foregoing efforts.

E. T. M. "Bulletin Board" Service.

As a means of acquainting the sales force of the Eastern Talking Machine Co. regarding changes in goods, new records, local advertising and other details that are constantly arising, this company has instituted a "Bulletin Board" service. Items are tacked on this board from time to time, as they occur, and as employees are expected to read the "Board" daily they are fully

versed in all the late news. It occupies a relative position of a newspaper's bulletin and the information thus obtained keeps the salesman fully apprised of transpiring events in the selling field.

Inaugurates "Special Summer Service."

Charles R. Cooper, manager of the talking machine department of the Boston Cycle and Sundry Co., Edison jobbers, reports an extensive trade, both wholesale and retail. Mr. Cooper has inaugurated a scheme for the benefit of their patrons during the coming months which is covered by the slogan, "Special Summer Service." Edison dealers will find this bureau to be of great assistance for rapid shipments of orders—one that will save dollars when it comes to a rush. Mr. Cooper feels confident that the dealers of the country will be pleased at the innovation, and he bases the theory that he practices on the ground that even a slight delay will jeopardize profits that rightfully belong to the dealer. And this "service" ought to secure some good new accounts.

John L. Gately, New England representative of the Victor Talking Machine Co., is making a "fine-tooth comb" trip of this territory, at present being in Maine.

C. E. Osgood Co.'s Handsome Window.

Picture in your mind a tent in the woods, pine trees, log fire, a little pond in the distance and a man sitting cross-legged smoking and listening to the strains of a Victor talking machine and you have the whole "plot and story" of the window display of the C. E. Osgood Co. Manager C. J. Sylvester, of the Osgood talking machine department, is the "instigator," and this reproduction of a camp scene is a most longing appeal to vacationists to hie away with a Victor. It is getting business, too, judging from the inquiries to look at a machine "like the one in

the window." Mr. Sylvester predicts a large May business.

Forty cents bought 50 high-priced records, including a case to carry them in, at the recent auction of unclaimed express packages held by a local company. History repeats itself; and by rigid economy some of the boys say they will be on hand at the next sale with the aforesaid amount, hoping for a repetition.

A. W. Chamberlain, assistant general manager of the Eastern Talking Machine Co., says from his observations that the ensuing months will show a brightening of trade that will be decidedly pleasing to the talking machine fraternity.

Commodious Quarters of M. Steinert & Sons.

One of the big sights of this city is the large talking machine emporium of the M. Steinert & Sons So. They occupy entirely one large building containing five stores, where every possible convenience and improvement is employed in the conduct of their business. On the first floor are numerous sound-proof booths for the use of customers, salesmen's desks and general sales headquarters. In one corner of the second floor is the private office of Manager Royer (one of the most popular "talking men" in the country). The auditing department is also located on "the second," with the remaining space devoted to a magnificent stock of records. The third floor finds a huge number of the many styles and types of Victor machines, with the fourth floor being occupied by the repair department. In the two extremes—the top and the basement—are to be seen the shipping ends and other various departments. It's a monument that testifies to the big volume of business that this company handles each year, including a gracious testimonial to Victor selling qualities.

Oliver Ditson Co. Active.

Meteor Needles, which are controlled exclusively by the Oliver Ditson Co., are meeting with marked success everywhere. The trade all over the country have ordered them in large lots, and the wide and continuous distribution of Meteor Needles is the best evidence that can possibly be cited. Manager Henry Winkleman, of the Ditson Victor department, still has the illness diagnosed as "Can't get Victrolas fast enough." The symptoms of this disease are a quickening of the pulse accompanied by a flushed face at the pleasure of booking Victrola orders, followed by a chill at the thought of losing those profits because of inability to secure the machines.

AEOLIAN ADDS TALKING MACHINES.

Reported That Great Company Will Establish Talking Machine Departments in Their Various Branch Stores and Become Victor Distributers at St. Louis—Arthur D. Geissler Swings Big Deal.

There has been a great deal of whispering in the Western trade the past week or so regarding the effecting of a large deal by which it is said the Aeolian Co. will enter the talking machine trade on a large scale, establishing Victor departments in their various branch stores and lending their immense prestige and bringing their vigorous advertising and exploitive policy to bear on the talking machine business in the various cities where they have their own retail branches.

It is learned that Herman B. Schaad, of the Aeolian Co., and Arthur D. Geissler, manager of the Talking Machine Co., of Chicago, have been in St. Louis, Indianapolis, Cincinnati and Dayton, making arrangements for the rearrangement of these stores for the establishment of Victor departments.

It would appear that to Mr. Geissler is due the credit of initiating and carrying the deal through, and it is reported that he has arranged for the sale to the Aeolian Co. of the stock and business of the St. Louis Talking Machine Co., Victor distributers to the Aeolian Co., who will remove the stock to their own store in that city. This will make the Aeolian Co. Victor distributers in that city and enable them to sell all

their branches in the leading cities from that point.

The conversion of the Aeolian Co. to the talking machine idea seems to have had its inception in the fact that when they recently bought the lease of the Bissell-Cowan Co. in Chicago for the establishment of their new branch in that city they found a well-established Victor department, which it was decided to continue as an experiment and which promised so well that Manager Tom Fletcher became an enthusiast and used his influence to the company to take up the matter along the lines indicated above.

The above report is confirmed by the Aeolian Co., who added that it would not be long before they would be Victor dealers.

The Talking Machine Co., of Salt Lake City, have filed articles of incorporation in Utah for the purpose of carrying on talking machine and music business, with a capital of \$25,000. N. W. Clayton is president; Ashton B. Snow, vice-president, and C. C. Clayton, secretary and treasurer.

JOBBER'S ASSOCIATION ACTIVE.

Work of Association Benefits Entire Trade—Preparations for Convention at Atlantic City Under Way.

In reviewing the work of the National Association of Talking Machine Jobbers, J. Newcomb Blackman, vice-president of the association and chairman of the Press Committee, said in a chat with *The World*:

"To the chairman of the Press Committee of an association is allotted the task of letting the trade know what the association is doing. This would not seem so difficult were it not for the fact that the association desires to be modest without creating the impression that nothing has been accomplished as a result of association work.

"We cannot by any means claim that every favorable change or action taken on the subject by the manufacturer, after presentation through the association, was a direct result of its work. Let us first remember that while we may present some good suggestions to the factories it remains for them to use them, and in doing so we want them to get due credit. Experience has proved that committees representing the association have often seen matters in a different light after hearing some of the problems that confront the situation from a factory standpoint.

"On the other hand, the jobbers have been able, by reasoning, to convince the factory officials on certain points from the jobbers' standpoint which, when presented by a single individual, might not have been considered seriously.

"We jobbers don't pretend to know how to run a talking machine factory, but as the Edison and Victor companies have chosen to market their goods through us as their representatives, it is natural that we should be a little closer to certain situations than the factory. Committee meetings seem to be a continuous performance in both the Victor and Edison works. There are day sessions and night sessions, and in this way the knotty problems are unraveled. It is not human nature and customary to take the path of least resistance, and in such meetings, therefore, agree with the man higher up, perhaps at the expense of what should be the real result of the conference.

"This does not exist to such an extent in our jobbers' meetings, for we are all on an equal basis. How many times have important moves been made by officials in all lines of business when a mistake, afterward discovered, was presented in ample time, but not considered because of the position held by the one with the opinion? In these progressive days can we afford to overlook a suggestion made with best intent, though it come from a man on the low rungs of the ladder? At least the suggestion is worth some consideration.

"What we want between jobbers and the factory is confidence in each other to the fullest extent. Each ready to yield and placing ourselves in the position of the other, thus treating with as little selfishness as possible everything at issue. With this spirit the factory interest will

be ours and ours will be theirs, and the result of conferences will ripen into decisions that bespeak advancement and prosperity.

"The above is not to be construed as an evidence of lack of harmony, but for the benefit of any jobbers who doubt the importance of the Jobbers' Association and for those in the factories who might prefer fewer suggestions from the jobbers as an association. Every member of the association has been advised direct from time to time as to what the association was doing, as trade papers are not the best medium in which to give the details of association work. Rest assured, therefore, Mr. Manufacturer, that we propose to hold confidential and personal, to the parties interested, the details of our association work.

"We do desire to go on record for publication as approving the friendly receptions our committees are receiving at the hands of the factories, for it makes us think you have confidence in us and it will encourage extra effort on the part of the members of the association to have you increase it, if possible.

"The Jobbers' Association has been successful from the start and all in the trade have benefited in the results. Is there a jobber who can honestly say otherwise and should not feel obligated to support the association by his membership and the payment of dues, even though he should do nothing else. Every name on the roll of members gives strength and importance to the organization.

"The last two conventions at Atlantic City were pronounced a success, and it remains with the jobbers and manufacturers to make the coming one at the Hotel Chalfonte, July 5, 6 and 7, bigger and better than ever. J. C. Roush, of the Standard Talking Machine Co., of Pittsburg, secretary of the association, is also chairman of the Committee of Arrangements for the coming convention. Give him all the help you can to get everybody in your territory to attend the convention. Last year they talked hard times or most anything for an excuse not to come.

"This year business has certainly been better and it should take very little coaxing to be convinced that your attendance at this year's convention will be a good investment. Use Sunday, the 3d, and Monday, the 4th, to travel, if necessary, but be on hand on the 5th. The hotel rates, etc., are a duplicate of last year, and details of same can be obtained from Mr. Roush.

"In addition to the natural attractions of Atlantic City there will be an arranged program of entertainment, with ample time so that the business meetings will not interfere with the pleasure program."

Reformers will swarm at the Richmond conventions. But those who mistake the excitement and agitation of reform for the source of danger, must have overlooked all history.

Unfailing politeness will do your store more good than daily bargain sales.

If you are a dealer in the city or a life-size town where much business correspondence is carried on, we want you to investigate

The Edison Business Phonograph

the greatest business appliance of the age.

Business men everywhere now dictate their letters to the Edison Business Phonograph, because it saves at least half their time.

It also saves half the actual writing time of the typewriter operators who transcribe from the Edison Business Phonograph.

It also saves *all* of the time in which the stenographer is ordinarily engaged in taking shorthand notes.

It cuts the cost of letter-writing in two—and every business man will listen to that argument, if you can prove it. And you *can* prove it with the Edison Business Phonograph.

The whole business world is your field, the game is young and the profits are generous.

Write us for full particulars to-day.

Edison Business Phonograph Company, 207 Lakeside Avenue, Orange, N. J.

THE RICHMOND EXHIBITION.

The Talking Machine Companies Will Be Well in Evidence at the Great Exhibition Which Opens at Richmond, Va., Next Monday in Connection with the Convention of the Piano Manufacturers and Dealers to be Held in That City—Those Who Will Attend.

At the Piano Trade Exhibition, which opens at Richmond, Va., this week, remaining open from May 16 to 21, four talking machine manufacturers are making an elaborate display of their products. As stated elsewhere this marks a new era in the history of the music trade, dignified always, and generally opposed to innovations of a radical nature. At least this is the first time that the talking machine is officially recognized as a musical instrument, the entertaining qualities of which embody the most splendid and artistic of vocal and instrumental triumphs in the realms of music.

The companies who are exhibiting the latest and most perfect products of their great factories include the Columbia Phonograph Co., general, New York; National Phonograph Co., Orange, N. J.; United States Phonograph Co., Cleveland, O., and the Victor Talking Machine Co., Camden, N. J.

Booths 8 and 9 will be occupied by the Columbia Phonograph Co., in which a complete line of Grafonolas—De Luxe, Regent, Elite and Mignon—will be displayed. The Grafonola Mignon is

H. A. YERKES, COLUMBIA CO.

shown for the first time. Besides every type of machine—disc and cylinder—will be exhibited. There will be also a selection of double disc and indestructible cylinder records. The representatives of this company present will include H. A. Yerkes, manager of the wholesale department; George P. Metzger, manager of the advertising and publicity department; T. K. Henderson, manager of the company's distributing branch in Philadelphia, Pa.; Ben Feinberg, special traveling envoy.

The National Phonograph Co. will occupy booths 23 and 24, displaying likewise a complete line of their beautiful Amberola concealed horn cabinet machines, together with a line of their regular machines, namely, the Gem, Home, Fireside, Triumph, Ideal, etc. Besides a fine lot of Amberola and Standard records will be on hand for demonstrating purposes. The gentlemen who will be present to meet the trade are F. K. Dolbeer, sales manager; "Colonel" J. W. Scott, chief of the traveling staff at large, and C. E. Goodwin, manager of salesmen.

In close proximity to the other companies in this line the United States Phonograph Co. will be found, and their goods of the cylinder type

LOUIS F. GEISSLER, VICTOR CO.

exclusively will have their initial introduction as a trade product. Four models of machines will be exhibited in connection with their new Everlasting record, of which great things have been reported in point of fine finish and clear reproduction. T. H. Towell, general manager of this company, will be in charge.

The Victor Talking Machine Co. are on spaces 27 and 28, where an elegant exhibit of this great

F. K. DOLBEER, NATIONAL PHONOGRAPH CO.

company's line will be placed. These include the wonderfully successful Victrola—all the various types and finishes, running as high as \$500 for the Vernis Martin cabinets. A complete line of their standard machines from Victor O to VI, will also be displayed, with the various horns known to the trade. In records, the famous Victrola and Red Seal and regular single and double-disc goods will be in full supply. Louis F. Geissler, general manager of the company, assisted by a competent corps of assistants from the traveling staff, will be in attendance.

E. T. M. CO. ASSOCIATES GIVE SHOW.

Provide Evening's Entertainment in the Role of Minstrel Men—An Excellent Performance—S. R. O. Sign Required Early.

(Special to The Talking Machine World.)

Boston, Mass., May 11, 1910.

The Eastern Talking Machine Company Associates gave a most enjoyable evening's entertainment in the form of a minstrel show on April 12 at the Store Reception Hall. Mr. S. H. Brown, chairman of the entertainment committee, was most ably assisted by M. L. Read, Edward Welch and W. J. Fitzgerald, and all are to be highly congratulated upon their wonderful achievements as "high-class entertainers."

From the opening to closing choruses every detail was most punctually and accurately given with a zest and zeal known only to professionals. Mr. Fitzgerald and Mr. Brown as end men proved themselves heroes of the hour, their wit and art being manifested by every word of song and speech. Fortunately for the company, no hustling theatrical manager was on hand to sign up these two artists and star them as comedians.

There was not a dull moment during the entire evening. Among those deserving special mention for their splendid performance are W. R. Anderton, a brother of the famous Walter Anderton, favorably known to both theatrical and record-buying public. Mr. Louden rendered several beautiful seaside songs and captivated several of the ladies in the audience. His imitations of "Seaside Life" were the best ever. Mr. Fitzgerald and Mark L. Read presented a coon sketch in the olio, entitled "The Two Loony Coons," the most side-splitting 15-minute entertainment. Mr. McCourt, with three others, gave a splendid account of themselves in the darky sketch entitled "The Hen Roost Inspector Man." The quartet chords had it all over the barber shop aggregation. Others who helped to make this entertainment one of the season's hits in the talking machine business were Fred Finn, who sang "Cubanola Glide"; J. J. Spillane, who sang "I Wish I Was in Heaven Sitting Down," and B. T. Reardon, who rendered "By the Light of the Silvery Moon."

Even the "No Standing Room" sign had to be "turned to the wall," as the seating capacity, accommodating about 250, was taken up very early in the evening.

Nothing like this has ever been done before by any one talking machine house with such splendid results. Best wishes are due for their continued success.

Among those present in the audience were Mr. and Mrs. E. F. Taft, Mr. and Mrs. John L. Gately, Mrs. S. H. Brown, wife of the chairman of the committee, and a party of friends, Mr. and Mrs. S. J. Freeman, Mr. and Mrs. A. W. Chamberlain, representatives from other jobbing houses, and others.

Those who participated in the minstrel show were: G. T. Waldron, R. Levett, W. J. Fitzgerald, J. J. Spillane, M. L. Read, E. A. Welch, S. H. Brown, R. Durkee, P. H. Cohen, G. W. Reese, D. Moore, R. M. McCourt, H. P. Cadegan, A. J. Collins, A. L. Osgood, M. P. Rice, C. J. Auerback, B. F. Reardon, and F. Finn. In the center of the circle was the Victor mascot, "His Master's Voice."

J. N. BLACKMAN TO GO TO RICHMOND.

J. Newcomb Blackman, of the Backman Talking Machine Co., has planned to attend the convention of the piano dealers at Richmond, Va., this week. He will be accompanied by Mrs. Blackman and will stop off at Old Point Comfort for a short time en route.

Sol Bloom, who has one of the handsomest establishments in the country at 366 Fifth avenue, handling the Victor line exclusively, has given up the store at 40 West Thirty-fourth street, New York, consolidating the two. Mr. Bloom is said to pay \$25,000 a year rental for his Fifth avenue place.

CAVALIER

CAVALIER'S fame is known to the American public, with a worth. In these first Cavalier records it is at its best. Every note is clear and every inflection as when rendered by a human voice.

No Columbia dealer ought to be without it.

Reach the people who have never had a chance to own a talking machine of any make—and who have never even had a chance to hear every good-sized town in the United States. People who have never even had a demonstration of a concealed-horn machine.

There is one point of triumph for the Grafonola that you may have overlooked. No musical instrument will fail to give you satisfaction. He won't let that \$200 instrument

There are Grafonola prospects in your neighborhood every day of scores of purchasers—more than you can get at your dealer's door apparently with their minds a mile away. One mail, just the other day, contained several orders.

"One man came in this morning and he said 'Send it up.' Here is the order."

"A man I had never seen before."

"Either the advertising or the Grafonola 'Regent' in its regular mail."

You have the one biggest and best feature of the Grafonola—its means confined to the large dealers in the

TRADE GOOD IN PHILADELPHIA.

Marked Increase Over Last Year—National Co.'s Proposition Helps—Weymann in Ocean City—Heppe's Report—Other Items.

(Special to The Talking Machine World.)
Philadelphia, Pa., May 7, 1910.

Business in Philadelphia during the first four months of the year has been most satisfactory. Each month has shown an advance over the previous month, and a large increase over the corresponding months of 1909. There have been various elements entering into the business that have helped the dealers to create trade. Not the least interesting or productive of results have been the proposition made by the National Co. on their four-minute attachment. All firms who handle the Edison report that they have had a tremendous business on this proposition.

The Penn Phonograph Co. report that their business in April was almost double that of a year ago. Ralph Clark and Edward Smullen are both on the road for the firm at present, and T. W. Barnhill has just returned from a trip up the State, where he reports having found conditions very healthy.

H. A. Weymann & Sons are very well pleased with the outlook for May business in talking machines. They have rented the same store on the boardwalk at Ocean City they conducted last summer, and will feature this year talking machines along with their sheet music. Norbet Whitley, their road man, is up the State at present and is sending in some very nice orders for Amberolas and Victrolas, while William Doerr is looking after the New Jersey and seashore trade. Mr. Weymann says that the new Edison proposition has stimulated trade among all the dealers.

When I asked F. J. Heppe what he had to report regarding his talking machine business he said, "You may say that our retail business in April increased one hundred per cent. over the corresponding month of last year, and fully seventy-five per cent. in the wholesale department." The Heppes have opened a very fine talking machine branch at Lancaster, Pa., in the Y. M. C. A. building in that city and they have been doing very well with it.

The Columbia Phonograph Co. report an excellent business. They have been giving quite a few church concerts in various parts of the

city recently with the Gipsy Smith and other records of a similar character, which have been very popular and through which they got some very good returns. They have also been giving exhibitions of other characters, last week playing a long list of numbers of Irish composers and singers for the Knights of Columbus at their club house. At this concert they played the full list of McCormack records. Among the visitors to the Columbia were E. D. Easton, president of the company, and Mr. Dorian. The Columbia Co. have been having quite a trade among the hotel and cafe people through the State on their new disc machines.

Louis Buehn & Bro. are about to open a new place at 1115 Walnut street, devoted to Business phonographs. Fred Smith, who has had considerable experience in this part of the work, will be in charge. Edward Buehn is traveling through the Cumberland Valley at present, and is finding the business very much improved in that section.

SONORA PHONOGRAPH CO.'S CATALOG.

Their first complete catalog has been issued by the Sonora Phonograph Co., 76 Reade street, New York, in which their full line of machines and records is illustrated and described, and it will certainly interest jobbers and dealers. The Sonora, termed "the instrument of quality," is thus explained in this handy booklet:

"The Sonora phonographs with invisible horn free from metallic effects represent purest quality of tone, perfect construction, beauty and durability. All cases are covered so that the mechanism is concealed from view, and the scratch of the needle is almost imperceptible. Our motors and sound boxes are made in Switzerland, at a factory with vast facilities, backed by the experience of a century in building motors for fine mechanisms. Their construction is scientifically perfect and simple, solid and durable. In Europe, the sapphire, in connection with disc records, is superseding the needle more and more, because the same sapphire may be used indefinitely, and because sapphire records are not destroyed in playing. As the sapphire requires records with up-and-down grooves, while the needle plays those with lateral grooves, it is convenient to have a sound box which can be used with both, so that either style of record may be played. Our duplex sound box, of wonderful tone quality, provides for this."

J. C. Rousch, secretary of the National Association of Talking Machine Jobbers, is sending out some interesting literature as well as illustrated postal cards urging on jobbers the necessity of being represented at the convention to take place at Atlantic City early in July. There is no excuse for jobbers this time.

THE SENECA

☐ Here's the new disc rack equipped with board shelving.

☐ Openings are 3 inches wide, over double the width of our other disc racks.

☐ It is 46 inches wide and 51 inches high. Four shelves for 10 inch discs. One for 12 inch.

☐ Finish in bright or dull copper.

☐ Price is \$14.00, envelopes not included.

☐ "The Heise System" of wire racks is the "last word" in stock carrying systems.

THE SOUTH AMERICA OF TO-DAY.

Observations of Walter Stevens, Who Recently Visited a Number of South American Ports on the Trip of the Bluecher—The Country from a Business Man's Viewpoint—Visited Many Talking Machine Houses—A Rich Field Sadly Neglected by Business Men of the United States—Cities Full of Cultured People and Decidedly European in Sentiment—An Interesting Review of a Memorable Trip Which Makes Instructive Reading.

Primarily, Walter Stevens, manager of the export department of the National Phonograph Co., Orange, N. J., went on the cruise of the Hamburg-American liner "Bluecher" to South American ports for pleasure and recreation. That was the intention of the company when he and Mrs. Stevens were given bon voyage at the dock in Hoboken and the steamer backed out into the Hudson River on January 22 and bade farewell to American waters until she poked her nose through the Narrows again April 13. While Mr. Stevens enjoyed the voyage greatly, he could not, however, wholly set business aside, and as he is a close observer and is possessed of that valuable asset, trained judgment, what he saw, heard and thoughtfully considered cannot help but be interesting to readers of the World everywhere. When asked for a "few remarks" appertaining to his journey, he replied as follows:

"As you know, I have been into Mexico several times, but had never made the South American trip. It was an experience I shall never forget, as every moment was enjoyable and each incident worth remembering. Of course, I was supposed to be going for pleasure, but at the same time being a business man, and one especially interested in the affairs of the National Phonograph Co., particularly the development of their foreign trade in the countries visited, naturally no opportunity was lost to study conditions and visit the trade. As a matter of fact, wherever the steamer made a port of call every house handling talking machines was called

sult is the goods are made up in Germany in exact imitation of the original American article, shipped and offered in competition at so low a price that the market is lost or so demoralized a foothold is difficult to regain.

"We have ignored and neglected one of the richest chances for gaining a great and splendid trade in South America. Possibly our own domestic business has been so large that it is more indifference than absolute neglect, but an American who is really alive to the vast importance of cultivating closer trade relations with the South Americans, not only for commercial but political reasons as well, cannot but regret the poor showing we make as compared to the standing of European nations. Having made no special effort to gain the regard and confidence of the South Americans in business matters, we have only ourselves to blame, if in turn, they do not hold us in the highest esteem. It is a common saying there that an Englishman's word is his bond, but who will believe a Yankee?

others, are overwhelmingly European in sentiment, taste and inclination. The foreign population is largely German, English, Italian, with a considerable mingling of Scotch and few Americans.

"With this mixture you may imagine what chance the Americans stand unless more aggressive and persistent efforts are made along lines that harmonize with existing conditions. This is strikingly true so far as it affects the

VIEW OF RIO DE JANEIRO, BRAZIL.

products of the American talking machine manufacturers. There are at present tons of cheap German, French and English types of talking machines and worse records. The American manufacturers, however, are making rapid headway with their superior goods, even if they do command a higher price. In other words, there is a great and splendid future for the American-made talking machine in South America, if properly handled. I made a number of valuable connections, which I feel assured will develop into a very satisfactory volume of business for the National Phonograph Co.

BANQUET BY AMERICAN COLONY, SAO PAULO, BRAZIL.

"Undoubtedly, we will get the trade in South America, for events in recent years point that way. It will, however, take time. Inexperienced salesmen from the United States, with little, if any, knowledge of the language, and with a patronizing air, are obnoxious in every sense of the word. There are a great many bright people in these countries, people who have traveled, are experienced in business affairs, and highly cultured besides. The cities, especially Rio, Montevideo, Buenos Ayres, Valparaiso, and

VIEW OF ST. THOMAS, D. W. I.

upon. To be sure, this was incidental, but it was the means of putting me in close touch with the situation, and it was, besides, time well and profitably spent in a strictly business sense.

"South America has been not only sadly, but shamefully, neglected by the business men of the United States. It is the most wonderful market in the world, and instead of these great and magnificent countries having an influential representation of American merchants and mercantile and manufacturing interests, there are comparatively only a handful of our people in evidence. After leaving the harbor of New York I never saw an American flag in any of the South American ports, though each was crowded with shipping, until I returned, excepting the one on the tug that brought the United States Minister to Brazil out to a banquet aboard the 'Bluecher' in the harbor of Rio de Janeiro.

"There is not an American bank in any South American country. The banking business is in the hands of the Germans and English, with the Germans predominating everywhere. For example, if an invoice of goods is shipped from the United States, and a draft is drawn against documents, as is usual, it is presented to the German bank designated, and every item is not only closely scrutinized before payment, but a copy is made of the bill, in which cost prices, etc., are given in detail, and sent to Germany. The home bank passes the duplicate invoice on to some manufacturer, who is told to get busy. The re-

TOURISTS CROSSING THE ANDES.

"The party aboard the 'Bluecher' were shown every courtesy at whatever port we called. Among the passengers were men prominent in banking, manufacturing and professional circles, with a large number of seasoned globe trotters, including some who came from Europe especially to take the trip. At the same time, while probably not one of the passengers had any idea of making the trip one of business, yet many of them hoped to gain a thorough knowledge of the countries to be visited and learn what the possibilities were for doing business in the countries of South America.

"After touching at Trinidad, the first stop of importance was Para, Brazil, a city of 130,000 inhabitants, where 65 per cent. of the world's supply of crude rubber is shipped from. Tons upon tons of rubber here awaiting shipment. At Bahia the view of the harbor from the city, with a population of 265,000, is inspiring. It is built on a high bluff rising abruptly from the sea. A carnival was in progress while we were

PLAZA HOTEL, BUENOS AYRES.

Do you realize fully the difference between "exclusive selling rights" as granted by the Columbia Phonograph Company and the restrictive and arbitrary competitive plan of selling "One line of goods exclusively"?

Columbia Phonograph Co., Tribune Building, New York.

there, and the costumes, lighting effects, floats and orderly behavior of the crowds occasioned favorable comment. Bahia is a famous diamond market. Santos, our next port of call, is not particularly attractive. From there we took a trip to Sao Paulo, the second largest city in Brazil, with 280,000 people. Half of the population are Italians, the remainder being German and Portuguese, with only eight or ten American families. The latter are a small but important factor and exert considerable influence.

"Our experience with exchanging American money for 'coin of the realm'—in each country

MASKED BALL ABOARD SHIP.

we entered, of course—was rather amusing, to say the least. The 'Bluecher's' voyagers had been described as 'arch' millionaires, and what we received in Brazilian money exchange certainly made us feel that way. As an instance, for \$32 of American gold 100,000 reis were received, but as we were obliged to pay 10,000 reis for carriages and the same for luncheon, the alleged wealth rapidly decreased. The exchange figured: In Brazil, 3,200 reis for \$1 American money; Chile, \$5 for \$1; Argentine, \$2.35 for \$1, while in Uruguay we had to pay \$1.03 of our coin for \$1 of theirs. Living expenses throughout South America are extremely high, especially so in Rio and in Buenos Ayres. When foreigners protest the reply is, with a shrug, everything is high in America. They do not hesitate a moment to palm off articles as being of American (United States) manufacture when they really were made in Europe, in order to command an increased price.

"On arriving in Sao Paulo the ladies of the American colony tendered us a reception, followed by a banquet in the open air, under an arbor of trailing vines, decorated with flowers and American flags. There was no concealing the delight of these thirteen ladies in meeting some of their own people under such pleasing circumstances. February 15 we reached Montevideo, capital of Uruguay, with a population of 350,000, where we were most cordially received by the president of the republic. Uruguay claims to have the most beautiful women in the world, and no one who is fortunate enough to see them will dispute the claim, as they are handsome physically and are charming from every

point of view. At Pocitos, a fashionable beach resort of the capital, the hotel compares favorably with the best places of the kind in this country.

"Buenos Ayres, the capital of the Argentine Republic, is directly opposite Montevideo, across the La Plata river, which is only 120 miles wide at this point. It took us twelve hours to steam across. At Montevideo some of the passengers decided to leave the ship, so they would have more time in seeing Buenos Ayres, and to take the trip across the Andes to Valparaiso and Santiago, Chili. Buenos Ayres, with its population of a million and a quarter, is the Paris of South America, and its general appearance is not unlike the important cities in the United States, though the atmosphere of the place is typically European.

"The journey across the Andes, partly by rail and carriage, was an experience novel, exhilarating and decidedly enjoyable. The tunnel through the mountains was opened April 1, but too late for our trip. We climbed the mountains 10,000 feet on a cog road, and then up to the summit 3,000 feet by carriage, and it was made on a run. At the top, on the boundary line between Chili and Argentine, we passed the heroic statue of 'Christ of the Andes,' erected to commemorate the settlement of the dispute between the two countries. Cannon were melted to furnish material for this remarkable monument, and the inscription reads: 'These mountains shall crumble to dust ere Argentines and Chileans break the peace which, at the feet of Christ, the Redeemer, they have sworn to maintain.'

WOMAN CAR CONDUCTOR IN CHILI.

"We visited Santiago, the capital, a beautiful city of 400,000, with straight, wide streets and many fine buildings and beautiful parks. Valparaiso, the seaport of Chili, is the largest city on the west coast, with 150,000 population. In Chili the conductors on the trolley cars are women and the 'chambermaids' at the hotels are men. We rejoined the 'Bluecher' at Buenos Ayres, and then started for the North, stopping again at Montevideo, and then at Rio de Janeiro. Rio is a modern city in every way, with a population of 800,000, and, as you possibly know, is situated on the most beautiful and largest landlocked bay in the world.

"In Rio the entire party aboard were received by the Brazilian Minister of Foreign Affairs, Baron de Rio Branco, one of the great statesmen of South America. Then followed Pernambuco, Trinidad, Kingston and New York, where once again we had the pleasure of seeing the Stars and Stripes. I would not have missed the trip for a great deal, now that I know its value and can appreciate its true worth socially and commercially. The South Americans are truly a wonderful people, and it is a pity we do not know more of them."

Mr. Stevens has a large collection of photographs of the different places visited, almost all of which were taken by himself. It was really a difficult task to select the few in connection with this account of his travels from his very interesting collection.

SOME BIG LEAGUE STUFF

To Be Pulled Off During the Scheduled Baseball Game Between the Eastern and Western Jobbers at Atlantic City in July.

The lively members of the National Talking Machine Jobbers' Association are evincing much interest in the proposed game of baseball between the Eastern and Western jobbers, and a number of them have gone into active training with a view of securing places on the teams representing their respective localities. One of the rules laid down is that while every member of the association may compete for positions on the teams, only one representative of any one concern may play in the game.

J. Newcomb Blackman has been appointed captain of the Eastern team and announces that he is open for applications from good players, the only qualifications necessary being that they must be able to pitch like Mathewson, bat like Hans Wagner and look upon Bugs Raymond as a horrible example.

It is rumored that both Louis Buehn and E. H. Taft, who have been suggested as possible members of the Eastern team, are training hard to qualify. Mr. Buehn may be seen any sunny afternoon racing around the green spots in Spring Garden street, while they say that Mr. Taft, who is a candidate for shortstop, has pulled off twenty pounds by sprinting around the Common and the Public Gardens. The Western fellows will certainly have to play ball.

NEW VICTOR JOBBERS IN PEORIA.

The Putnam-Page Co., Inc., Take Over the Talking Machine Department of the C. Adams Co. Who Are Now Devoting All Their Attention to Pianos—Will Move to New and Attractive Quarters in That City in June—Both Gentlemen Recently Visited New York.

Fred H. Putnam and Roy Page, of the Putnam-Page Co., Inc., Peoria, Ill., were recent visitors to New York. These gentlemen have recently purchased the talking machine department of the C. Adams Co., piano dealers, and will move to new and larger quarters at 324 South Adams street on June 1, where they intend to have a splendid emporium for the jobbing of Victor talking machines, Edison phonographs and records.

During their stay in the city they visited all the leading talking machine stores for the purpose of getting pointers on the equipment of their own establishment, as well as the factories of the Victor Talking Machine Co. at Camden, N. J., and the National Phonograph Co. at Orange, N. J.

In a chat with Mr. Page in *The World* sanctum he expressed himself most optimistically regarding trade in his territory for the lines which his firm are representing. "We intend to get after trade and develop it," he said, "and are fully confident that there is a tremendous future not merely for the talking machine but for the business phonograph in our section of the country." Both Messrs. Putnam and Page left for home on Saturday last.

A BLACKMAN ANNOUNCEMENT.

New Style Place Record Brush for Use with the Exhibition Sound Box, Now Ready.

The Blackman Talking Machine Co. announce that the new style 10 Place record brush, for use with the exhibition sound-box, is now ready for the market, and orders for any quantity will be

filled promptly. The new brush differs from the previous styles in that it is equipped with a spring clamp which snaps over the edge of the sound-box and allows for the accurate adjustment of the brush, so that it will bear on the record surface with the proper pressure.

Owing to the changes being made in the brush, the Blackman Co., for a short time, got behind in deliveries, but all standing orders have now been filled and there will be no delay in the future in the shipment of any style of brush. Some live new advertising matter is now in preparation regarding the new style 10 brush, which will be ready for distribution at an early date.

Dealers who have received samples of the latest addition to the line of Place record brushes are enthusiastic over the manner in which it fills a long-felt want, and its success seems assured.

SOME DISTINGUISHED VISITORS.

President Williams, of the Gramophone Co. and Messrs. Clark and De La Rue Visiting Victor Co.'s Plant.

Friday of last week the Hon. H. Trevor Williams, president of the Gramophone Co., London, England, who assisted in framing the new copyright bill, which Parliament may pass before adjourning; Alfred Clark, managing director, and Ernest de La Rue, a director of the same company, arrived in New York on the "Mauretania" of the Cunard Line. They were met at the pier by Louis F. Geissler, general manager; Charles K. Haddon, vice-president and treasurer, and C. G. Child, manager of the recording laboratory of the Victor Talking Machine Co., Camden, N. J. These gentlemen are now in Philadelphia, staying at the Bellevue-Stratford Hotel, and are at the Victor Co.'s plant daily for the purpose of securing a larger percentage of the Victor outfit for the European trade.

JOHN A. B. CROMELIN A VISITOR.

John A. B. Cromelin, of London, England, European representative of the Columbia Phono-

graph Co.'s interests, and a nephew of Paul H. Cromelin, vice-president of the company, arrived in New York last Friday on the "Mauretania." He leaves for Liverpool again next Wednesday on the "Lusitania" of the Cunard Line. In chatting with *The World* this week, he said business in Europe was looking up and that by the fall he anticipated a splendid trade. Mr. Cromelin has not been over here for several years.

C. H. WILSON'S BUSINESS CHAT.

Business Active at National Co.'s Headquarters—National Political Conditions Interfere with the Restoration of Complete Confidence.

C. H. Wilson, general manager of the National Phonograph Co., Orange, N. J., at the factory the other day, in chatting about business, said: "We are very busy, but are not so crowded as in rush times; at the same time we are turning out a lot of goods, and have difficulty keeping up with orders. I do not believe confidence in business affairs has been entirely restored, and it will not be until the national political situation is settled. Financial men cannot sell bonds and other securities, and if they are slow in selling why there is no money to keep the wheels going around. That is about the way we size up current conditions."

WITH U. S. PHONOGRAPH CO.

John Kaiser, one of the best known men in the talking machine trade East, who was a prominent figure in its early history and development, is manager of the recording laboratory of the United States Phonograph Co., at 662 Sixth avenue, New York. C. L. Hibbard, formerly in charge, is now at the company's headquarters in Cleveland, O.

The Trade Situation Reviewed—Fundamental Conditions Excellent—Growth of Musical Knowledge Helps Talking Machine Sales—Fibre Needles Increase in Favor—April Shows 25 Per Cent. Increase with Talking Machine Co.—Some Distinguished Visitors—Interesting Columbia Figures Regarding Business Growth at Important Points—Wiswell Wants Jobbers to Join Forces at Chicago for Convention at Atlantic City—Summary of the News of the Month.

(Special to The Talking Machine World.)

Chicago, Ill., May 7, 1910.

Take it all in all the Chicago jobbers have every reason to be satisfied with the volume of business coming forward. While April did not show quite the amount of business credited to March this is only a condition naturally to be expected and the decrease was exceptionally small. The month, on the other hand, showed a gain as compared with last year fully equal to that shown by previous months and can be placed at approximately twenty-five per cent. Fundamental conditions in the West are considered excellent. As reports come in from salesmen in the various sections the reports of damage by the recent cold weather to fruit and other crops, are found to be grossly exaggerated and the general attitude is one of decided optimism and belief in a good round, normal year's business. Judging from reports received here the talking machine factories are very busy and are having difficulty in supplying the demands for goods. Victrolas are hard to get as ever and there seems to be considerable shortage on other types of Victor machines. Jobbers report that the Edison proposition by which customers get ten special Amberol records with an Amberola attachment promises to prove one of the most profitable trade deals in years and that the demand is discounting all their expectations. Local retail business in April was peculiar. It was exceedingly quiet the first half of the month, but the latter part was exceptionally good, the last ten days making a finish that was something phenomenal considering the previous quietness and this was in spite of the decidedly unfavorable weather. So far this month business has been of very fair proportions and shows the usual emphasis on higher grade goods.

Grand Opera Season Helps Record Sales.

The grand opera at the Auditorium for a solid four weeks was taken full advantage of by all the large retail establishments in the way of exploitation by special advertising, newspapers and programs, window displays and other methods. The stimulating effect on opera record sales was not felt materially until the latter part of the month, but since the engagement closed is increasingly in evidence. The prospects for English opera at McVicker's for a large part of the summer with a single opera featured for an entire week will undoubtedly have much to do in cinching the good exploitive work already accomplished, and our permanent opera next fall, with the assurance of a list of stars, which we did not dream of at first, means the maintenance of the interest in opera at a white heat.

On Roosevelt's Trail.

C. A. Hughes, a former newspaper man of Chicago, who accompanied the W. D. Boyce expedition to Africa last year, has returned to the Windy City and relates that none of his jungle experiences were of more interest than the Victor concerts around the campfire every night. "We had two fine Victor machines with us," said Mr. Hughes, "and, thanks to A. D. Geissler, of the Talking Machine Co., a stack of the best records for keeping a camp gay and not a few to remind us of home. We would have considered missing our dinner as soon as passing up the big show around the blazing fire at night. The natives would crowd around to listen

to the 'little man' in the talking machine. For that is how those untutored minds account for the sound that comes out. They are quite certain that a human being is inside the box. They were greatly confused one night when we played that song about 'The Preacher and the Bear.' They heard the bear growl and the man shriek when the bear hugged him. Of course, that was too much for them. They had a lot of sympathy for the man struggling in there with the bear. Whenever a particularly laughable piece was played the natives would howl with mirth until they had to sneak away from the scene, for they appear ashamed when white men catch them laughing. British East Africa probably has more talking machines than any other country in the world in proportion to the number of white inhabitants. New records are received from England every three weeks and the agent of the Gramophone (the name under which the Victor is sold in England and her colonies) is nearly mobbed by anxious buyers whenever a new consignment arrives."

Good Publicity.

George and Cecil Davidson, proprietors of the Talking Machine Shop, 169 Michigan Boulevard, took advantage of the Grand Opera season to do some very classy Victor exploitation all along the line, but none more effective perhaps than a facsimile reproduction of a letter which George Davidson received from Riccardo Martin, the famous tenor who was heard here in a number of the operas. He called at the shop, listened to his records, went back to his hotel and on the Congress stationery wrote the following autograph letter which was reproduced in facsimile and enclosed in the regular monthly communication to the patrons of the store:

"My Dear Mr. Davidson:—The Victor records of my voice which you have been so kind to play for me, have pleased me exceedingly. What a truly wonderful invention! The mirror of the voice, I call it. With cordial greetings. Faithfully yours, Riccardo Martin."

Fred. D. Hall's Eastern Trip.

Fred. D. Hall, president of the B. & H. Fibre Co., returned on the 18th of last month from a two weeks' Eastern trip, during which he called on the jobbers in New York, Boston, Philadelphia, Baltimore, Pittsburg, Buffalo and other cities. He was more than gratified with the cordial reception accorded him and the many courtesies extended him. He found the East thoroughly interested in the Fibre needle and the jobbers glad to meet in person its inventor and manufacturer. While the trip was undertaken more as a means of getting acquainted than anything else, Mr. Hall was favored with some very substantial orders for his product, and is assured that the fibre needle, which is already widely recognized in the East, will be strongly featured and pushed by some of the strongest Eastern distributors.

Mr. Hall's visit to the large talking machine factories was fraught with particular interest to him. Since his return he has been telling everyone how thoroughly impressed he was with the fact that whatever is turned out by the factories is the very best that can possibly be produced under the existing conditions and that no pains or expense is spared to make every record that goes forth just as perfect as it possibly can be. He wishes that the general public knew how thorough the work of the factories in this regard is, and how absolute the attention to every detail in order to give every purchaser of a record the most perfect possible rendition of the voice of the artist.

B. & H. Fibre Needle Factory Moved.

The B. & H. factory moved the first of the month to the larger quarters in the present building at Dearborn and Kinzie streets, where they not only have the increased productive ca-

capacity that the growth of the business demands, but handsome offices and demonstration rooms shut off from the noise of the factory. Mr. Hall expects to leave in a week or so for a visit to the jobbers in Detroit, Cleveland, Columbus and Toledo and will shortly make journeys from time to time gradually covering the principal jobbing centers.

Edward A. Geissler a Visitor.

Edward A. Geissler, of the George J. Birkel Co., the large piano and talking machine dealers, Los Angeles, Cal., accompanied by his wife and son, has been in the city the past ten days, the guest of Arthur Geissler, general manager of the Talking Machine Co. Ted. Geissler, the son, although but 19 years of age, tips the scale at 185, is an all round athlete, is ranked as one of the best football players on the Coast and holds the broad jump and 100-yard dash records in high school circles in Los Angeles. Next week the party will continue their journeyings eastward.

Gus Eilers Visits Chicago.

Gus Eilers, who has general charge of the talking machine and small goods interests of the various Eiler's stores on the Coast, and who makes his headquarters at Portland, Ore., spent several days in Chicago on his way East, where he will visit the talking machine factories and spend several weeks combining business and pleasure.

Marquette Healy Home Again.

Marquette Healy, vice-president of Lyon & Healy, arrived in New York on April 19 after an enjoyable trip abroad, and was met by Vice-President Paul J. Healy, who ran up from Atlantic City for the purpose, and by L. C. Wiswell, manager of the company's talking machine department. The former remained in the East, but Marquette Healy and Mr. Wiswell on their return visited both the Victor and Edison factories. They found everyone decidedly optimistic regarding business, the plants crowded with orders and even working overtime in some departments.

George Davidson, of the Talking Machine Shop, accompanied by his wife, is spending a week's vacation with his parents at Decatur, Ill.

Evan Williams in Town.

Evan Williams, of the Victor Red Seal galaxy, who sang at Orchestra Hall in April, called at Lyon & Healy's, heard some of his records and chatted interestingly regarding his experiences at the Victor laboratories.

Remarkable Order Filling.

Arthur D. Geissler, general manager of the Talking Machine Co., states that April showed an increase of 25 per cent. as compared with the corresponding month of last year, which was a really excellent month for them, and came within 5 per cent. of the same month of 1907. An instance of remarkable order filling is found in the fact that they were recently able to fill an order for 706 records complete, with the exception of only two outs.

Samuel Goldschmidt, district manager of salesmen for the Victor Co., was a Chicago visitor the latter part of last month.

A. V. Chandler, Illinois representative for the National Phonograph Co., is on a visit to the factory at Orange.

Notes of the Dealers.

Con Hogan, the famous blind talking machine dealer of Ashland, Wis., paid one of his occasional visits to Chicago in April. He came alone as usual, but engaged a messenger boy to pilot him around the city. He is a perfect mine of optimism, is always ready with a good story or pungent witticism and is a far more inspiring visitor than many in full possession of their faculties.

W. A. Payton, of Baraboo, Wis., was a trade visitor recently. Mr. Payton is one of the large

Another

Innovation

THE DEALER who fails to have the new records on his shelves promptly on opening day is not catering to this feature of his business and will surely lose a big record trade which otherwise would be his. Quite often the failure to have the new records is apparently unavoidable.

With the new plan which we have just perfected such a misfortune as being without the new records is impossible. We do all the heavy work. All the dealer does is to sell the records and pocket the profits.

You will want to take advantage of this plan. And it is only one of many which Lyon & Healy are constantly carrying through for the benefit of dealers who buy their supplies of them.

Allow us to explain our new record delivery plan, together with the many superior features which have made our house America's foremost distributors of Victor Talking Machines and Edison Phonographs. Use the coupon for convenience sake.

CHICAGO

T M W

dealers of the Badger State, and not only sells talking machines at his main store at Baraboo, but also at prosperous branches at Lodi, Marshfield and Leedsburg.

L. D. Guest, of the Guest Piano Co., Burlington, Ia., was in the city a couple of weeks ago and brought reports of a prosperous talking machine business.

The Quincy Phonograph Co., of Quincy, Ill., have recently enlarged their retail department and have added several handsome demonstrating booths. Manager L. E. Caldwell is a hustler of first degree and reports an excellent wholesale business on Edison goods, for which they are the distributors.

To Atlantic City.

An effort is being made to get all the Western jobbers, who will attend the conventions of the National Talking Machine Jobbers' Association at Atlantic City July 5, 6 and 7, to come to Chicago and go in a special car with the local contingent. All those who favor the plan are invited to correspond with L. C. Wiswell, of Lyon & Healy, who has been asked by Secretary Roush to line up the Westerners. Mr. Wiswell is also on the lookout for good baseball talent among the Western jobbers. It is the intention to have a ball game between the Western and Eastern forces at Atlantic City and volunteers are in demand.

Good Columbia Business.

District Manager W. C. Fuhri, of the Columbia Phonograph Co., reports some remarkable increases in business for April in the various branch houses under his jurisdiction as compared with April of last year. The figures, which cover, of course, both wholesale and retail, run as follows: Chicago, 50 per cent.; Dallas, 90 per cent.; Des Moines, 20 per cent.; Denver, 60 per cent.; Kansas City, 50 per cent.; New Orleans, 25 per cent.; Omaha, 33 1-3 per cent.; St. Louis, 98 per cent. He attributed the remarkable showing to generally improved business conditions, improved product, popularity of the double disc record and the excellent graphophone business. As compared with March, April made about an even break.

C. F. Baer, manager of the Chicago office of the Columbia Co., recently went to Galesburg, Ill., and made arrangements with the Galesburg Piano Co. for the extensive handling of their line. The company is just fitting up a fine, large three-story building for their business, and the graphophone department will occupy large space with handsome demonstrating booths. H. H. Myers, Indiana traveler for the Columbia Chicago branch, has recently had eight counties added to his territory and has already established several new Columbia dealers and is getting increased business from those already established.

Among the recent visitors to the Columbia Chicago office were J. McCourt, Ludington, Mich.; A. D. Chattell, Beloit, Wis.; Myra T. Crane, Necedah, Wis.

Hobnobbed with the Artists.

L. Kean Comeron, manager of the retail talking machine department of the Rudolph Wurlitzer Co., as usual, spent a great deal of time behind the scenes during the engagement of the Metropolitan Opera forces. He renewed his acquaintances with many of the artists and incidentally increased his remarkable collection of autographs. Quite a few of the grand opera singers were visitors at the Wurlitzer warehouses.

New Salter Cabinet.

The Salter Mfg. Co., of this city, have just brought out a new low-priced cylinder cabinet embodying their idea of holding the records in the cartons which are placed between the pegs. The record is thus protected from breakage and dust and is easily found by the box label. There are six sliding shelves, each accommodating twenty-five records, thus giving the cabinet a capacity of one hundred and fifty. It is furnished either in oak, mission or mahogany finish. The company's new Victrola XII cabinet, with the Salter horizontal felt-lined shelf ar-

angement, is experiencing an excellent demand.

E. C. Plume Returns from New York.

E. C. Plume, western wholesale manager of the Columbia Phonograph Co., returned from a trip to New York last week. He is enthusiastic about some magnificent new operatic records which will soon be added to the Columbia list.

Victor Lecture-Recital.

John Otto, of the retail machine sales department of Lyon & Healy, gave a two hours' Victor lecture-recital before the Men's Club of Irving Park last month. He told about the manufacture

A GREAT ESTABLISHMENT.

The Lyon & Healy Department Considered a Model in Organization and Equipment—How the Department Is Arranged—System the Watchword—Something of the Manager.

(Special to The Talking Machine World.)

Chicago, Ill., May 7, 1910.

The talking machine department of the great house of Lyon & Healy is such a constant subject of comment in the trade and is so frequently referred to from Coast to Coast as a model in point of organization and equipment that the new photographs here reproduced will be found of great interest to those who have visited it and those who still have that delightful experience in prospect.

L. C. Wiswell, the manager of the talking machine department, is, by the way, always at the service of those who desire to study the most advanced methods of conducting a great "talker" business at first hand and to pilot the visitor in person through the department.

In the language of the store the talking machine department is known as "H." How much "H" means to Lyon & Healy is appreciated when it is known that the department is recognized throughout the establishment as one of the most important factors in the affairs of the business. Occupying the entire fifth floor in the immense building and annex at Wabash avenue and Adams street, as well as practically all of the Adams street side of the main floor, the Lyon & Healy talking machine department is one of the busiest places in downtown Chicago.

Facing on Wabash avenue are the spacious and luxurious record trial rooms of the retail division and which were described and illustrated in The World at the time of their construction. There are twelve large individual rooms, finished in mahogany and enclosed in plate glass, making them absolutely sound proof, enabling record purchasers to hear under the most favorable circumstances any record desired. M. N. Blackman, in charge of the retail record division, is known as one of the most proficient men in this branch of the business. A well trained and polite corps of assistants make record buying a real pleasure. Joseph Vesey, in charge of retail machine sales down on the main floor, is also to be reckoned with as a business producer worth while.

However, it is in the wholesale division where the clockwork system is seen working to best advantage. The wholesale occupies the greater part of the immense fifth floor, and in point of

of records, and chatted interestingly concerning the artists and their selections. Mr. Otto now has charge of the I. C. S. language course department at L. & H.'s, in addition to his other duties.

J. P. Seeburg Co. Remove.

The J. P. Seeburg Piano Co., manufacturers of electric pianos, have moved their general offices from the Republic building to suite 718-723 Steger building, corner Wabash avenue and Jackson boulevard. The new quarters give them ample space for displaying their complete line, and besides Mr. Seeburg enjoys the luxury of a commodious private office.

space occupied, arrangement and stock carried is one of the most notable of the country. Nothing has been left undone to facilitate the filling of dealers orders properly and promptly. It is a pleasure to watch the men who make this department a regular hive of industry. Every man has his work and does it. Some are to be seen collecting from the long rows of properly labeled and numbered bins, the records which are necessary to fill the multitudinous orders received in the latest mails. The Victor records are under the supervision of a man who knows the Victor catalog from A to Z. The Edison records are

MANAGER L. C. WISWELL AT HIS DESK.

under another man who is just as well acquainted with the Edison output.

Each order as it is received is stamped with time and date and sent immediately to the assembling rooms. It is attached to the assembling truck and no matter how varied are the items everyone is filled and checked with mathematical precision. It is almost accounted a criminal act to hold an order unfilled over a working day.

Most of the photographs here shown present views very familiar to visitors at the wholesale department and full of human interest. One of the most impressive is a view of the Victor record bins showing the record assembly clerks at work filling orders. Owing to the compact arrangement of the Edison record department it was difficult to get an adequate photograph of it. Another view shows the wholesale machine sales rooms, under the superintendence of Harry Hopkins and which the out-of-town or city dealer finds a very pleasant place to spend

A GROUP OF DEPARTMENT "HUSTLERS."

VIEW OF WHOLESALE MACHINE ROOMS WITH MR. HOPKINS AT HIS DESK.

a half hour and incidentally leave his orders for "talkers."

One glance at the portrait group tells plainly why one may expect good service from the Lyon & Healy talking machine department. Mr. Wiswell is surrounded by as efficient a corps of helpers as can be found. From the traveling salesman down to Max, the general utility man, every individual is thoroughly trained in his

house for twelve years and his promotion from assistant manager to manager was a logical one and richly deserved because of his conscientious and enthusiastic labors in the interest of the business. He has a personality that instantly attracts and is a man who not only elicits the loyalty of every employe of his department, but makes him exceedingly popular with the patrons of the house. Above all he is a systematic

PART OF LYON & HEALY RECORD STOCK ROOMS.

particular duties and has a deep interest in the successful working of the department.

Mr. Wiswell is a young man who has emphatically made good in the very responsible position he occupies. He has been a prominent factor in the talking machine department of the

hustler, a man bound to make his way in any department of life.

In conclusion, it is not amiss to say that the publicity put out by Lyon & Healy in the interest of the talking machine business has been of vital importance to the general trade. Daily concerts are given in the concert room on the first floor. Here all the latest records are played and the auditors are supplied with elaborate programs such as are only provided at the highest class entertainments. Hundreds of people visit these concerts daily. Every retail dealer who buys through Lyon & Healy is kept posted to the minute on matters which will enable him to give his customers the very best service. Only a slight idea can be given here of the facilities possessed by Lyon & Healy by reason of their organization and equipment and long experience for giving their immense number of wholesale customers a service both of goods and ideas calculated to help them to the utmost in the business game. A visit to the department and a careful investigation of their methods is bound to prove forcefully convincing.

GET PRIZE FOR WINDOW DISPLAY.

M. W. Waitt Co. Get Award in Class "D" During Horse Show—How the Display Was Arranged.

(Special to The Talking Machine World.)

Vancouver, B. C., May 5, 1910.

M. W. Waitt Co., the prominent music house of this city, are being congratulated on their window display during the Horse Show, which was arranged by Manager Bowes, and for which they

received the prize for windows in class D, open to all.

The display, with the colors of the Horse Show as a background, represented a little girl driving at the show. The body of the horse was made of a gramophone machine case and its legs were of record boxes. A large record box made the body of the rig, while gramophone horns composed the wheels, and music rolls the shafts. A life-sized doll occupied the seat. A "magic mirror" was placed at one side of the window, into which a doll and toy donkey were looking, while passing people could also have a good view of themselves. Close by the mirror were these lines:

We donkeys cannot sing or play,
But watch our smoke when'er we bray.
We're not quite in the horse show class;
We're just a simple, common ass.

ROYALTIES FOR ARTISTS.

Some Big Sums Received by Leading Opera Artists Who Sing for the Victor Talking Machine Co.—Figures That Stagger.

When the "Kaiser Wilhelm II." sailed from New York, May 10, and a number of operatic singers were aboard, it was a reminder that in addition to their salaries in opera they had enjoyed almost unbelievable incomes from making records. Of course, Caruso, in this respect stands at the head of the list as being the highest paid artist by the Victor Talking Machine Co., Camden, N. J., General Manager Geissler stating that during the past year his royalties amounted to \$68,000 on ten songs.

Mme. Eames has made enough out of the records to support her in luxury without touching her income from any other sources. Geraldine Farrar's account footed up \$17,000; Mme. Gadski, about \$10,000; Mme. Homer, \$20,000; Scotti, \$20,000; Mme. Tetrazzini, \$30,000.

POPE PIUS HEARS SPALDING RECORD.

His Holiness Pius X, as is well known, is particularly fond of music and his chapel master, Abbe Perosi, is one of the most distinguished composers and conductors in Europe. Thus surrounded by competent musical authorities the venerable pontiff keeps closely in touch with the higher class in the musical world and, learning the immense success this year in Europe of Albert Spalding, the celebrated violin virtuoso, he expressed the desire to hear him. As Mr. Spalding could not, on account of his engagements, go to Rome, an enterprising phonograph company offered to replace him with one of their instruments. After hearing the phonograph repeat Mr. Spalding's famous piece de resistance, the Sarasate Gipsy Airs, His Holiness, says the Pall Mall Gazette, said, "There is no doubt the violin is the finest instrument of all."

SOUTHERN CALIFORNIA NEWS.

Fine Weather Helps to Enliven Trade—Columbia Co. Take Over Fitzgerald Department—Holmes Music Co. in Handsome New Store—Demand for Red Seal Records—Southern California Music Co. Pushing the Amberola—Among the Visiting Dealers—Number of New Firms Handling Talkers—The News of the Month in Brief.

(Special to The Talking Machine World.)
Los Angeles, Cal., April 28, 1910.

Splendid weather, as usual, has prevailed throughout Southern California during the past three months, and with the exception of three days, during which there were light showers, every day has been a summer day.

Several important changes have taken place of late. The most important is possibly the Columbia-Fitzgerald affair, whereby the latter gives over his talking machine department to the Columbia Co., who will henceforth conduct it as their retail store, having closed their old store on Broadway, between Fifth and Sixth streets, and establishing an exclusive wholesale warehouse at 429 South Broadway on the fifth floor. The new wholesale department is exceptionally well appointed for handling the business, being large and systematically arranged. A large shipment of Grafonola Regents has been received and are rapidly being shipped to the trade.

Another item of marked interest is the removal of the Holmes Music Co. from their old location, No. 113 South Spring street, to a handsome new storeroom on South Broadway, No. 422. Their talking machine department is to be a main feature, and elaborate plans have been made for the fixtures and fittings. This move of the Holmes Co. makes them neighbors of the Wiley B. Allen Co., who are located on the same side of Broadway, a few doors north. This same block has gained the name of "Talking Machine Row," for beside the Holmes and Allen companies is also the home of the Victor distributors, Sherman, Clay & Co. and the Columbia Co., while a little later the Geo. J. Birkel Co. will occupy their new home in the same block. Broadway now has seven of the city's largest dealers and jobbers in a stretch of four blocks.

Sherman, Clay & Co. are having unusual success with the newly issued Red Seal records. The records of Maud Powell had a heavy run during her recitals in this section. The improved Victrolas have arrived and are being shipped and delivered to the many waiting dealers.

The Southern California Music Co. are receiving a shipment of the new Amberola, which have met with undaunted success, the demand being far greater in Southern California than can be supplied for sometime to come. Those dealers who have been fortunate in receiving the Amberola have placed further orders, till now there seems to be no end to the demand. The new combination attachments have met with much success, having been lately sent to the trade. W. L. Reynard, of the same company's traveling force, has succeeded in establishing

several new Edison dealers during a recent trip.

The J. B. Brown Music Co. have displayed the Regent Grafonola in an artistic manner, having transformed one of their show windows into a drawing room, wherein wax figures are poised as though listening to the instrument.

Contracts for the erection of the Geo. J. Birkel Music Co.'s building have been given, and preparations for occupancy of the new home are in mind.

Several out of town dealers have been visitors lately, among whom are: N. L. A. Cody, of Merced, where he says trade is growing better all the while. O. A. Brehler, of Sanger, made a short stay, meanwhile investigating new stock and fixtures. Arthur Burson, the brake-man of Santa Barbara, called with his latest model of the Burson brake. Chas. MacGregor, of MacGregor Bros., Ventura, called on the jobbers last week.

San Diego, one of the fastest growing cities in this southern section, is thereby attracting much attention.

A number of new firms have recently taken to the talking machine business, two of whom are Burbeck & Frank, at corner of Fourth and C streets, and The Bowers Music Co., at No. 1154 Fifth street. Both have met with much success and are enthusiasts in the Victor line.

The Wiley B. Allen Co. have had great success in their new location and have a splendidly equipped department.

Therle's music store have placed a nice order for Victor goods, and will extend their department considerably. Their store is one of the most handsome in the Southwest.

Loring & Co. have added a new section to their Edison department and will be better able to supply their trade.

The South California Music Co. have received one of the Regent grafonolas, which is the first to arrive in San Diego. A. J. Moore, manager, contemplates a heavy demand for these instruments.

O. P. Brady, of Redondo, has taken over the business of Helen Huston at Redondo Beach, Cal., where she has conducted an Edison store for several years.

W. S. Dousett is a new dealer at Sierra Madre. E. A. Helyer, the Business phonograph man of the Southern California Music Co., is now using an automobile in his business rounds.

F. K. Babson, of Babson Bros., Chicago, passed through Los Angeles on a pleasure trip in company with Mrs. Babson.

W. L. Aylsworth, chief chemist of the experimental department of the Edison works at Orange, N. J., visited his brothers at Long Beach and incidentally dropped in to see the Los Angeles jobbers.

W. A. Voltz, Edison representative on the Coast, has had splendid success with the line, especially the Amberola.

The parents of Nora Bayes, famous for her purple label Victoria record, "Has Anybody Here Seen Kelly," are old residents of Los Angeles and are justly proud of her success.

A CLEAN UP OF PRICE CUTTERS.

The National Phonograph Co. Secures Injunctions Against Violators in the Greater New York Territory.

The National Phonograph Co. have just completed what has amounted to almost a crusade in New York and Brooklyn against price cutters, both dealers in their new goods and also those who have dealt in second-hand goods. The atmosphere throughout Greater New York has been thoroughly cleared up by injunctions which have recently been obtained against the following: In New York city—Frantz Prikovitz, Morris Workman and John Morchenross. In Brooklyn—J. J. Dixon, Jacob Workman, George Hausenbauer and Charles Fredericks.

Of the above, Prikovitz and Fredericks were second-hand dealers, and Morris Workman, of Vesey street, New York, was a regularly licensed dealer of the National Phonograph Co., who made use of his brother, Jacob Workman, in Brooklyn, for the disposition of the Edison goods at less than list prices. The investigation of the agents of the National Phonograph Co. in the case of the Workman Bros. resulted in the discovery of a previously unknown underground passage from Manhattan to Brooklyn, through which the Edison goods sold to the regularly licensed dealers of the National Phonograph Co. on the Manhattan side were passed to become part of a price cutter's stock in Brooklyn.

Since these injunctions have been obtained there has been practically no price cutting in Greater New York. The jobbers and dealers throughout the greater city have found that practical—not merely theoretical—protection is afforded them by this policy of the National Phonograph Co.

THE PEERLESS SUCTION CLEANER CO.

The charter for the Peerless Suction Cleaner Co., successors to the Manufacturers' Outlet Co., 89 Chambers street, New York, has been issued, and the new concern is officered as follows: Walter L. Eckhardt, president and general manager; Willard I. Hamilton, vice-president; J. H. Huntington, Jr., treasurer; James F. Meng, secretary; Albert P. Massey, director and general counsel. Henry E. Marschalk is assistant general manager, who will have charge of the office details. The company have factories in New York city, Newark, N. J., and in Connecticut. The capital of the company is \$400,000—\$150,000 preferred and \$250,000 common, and none for sale.

Mr. Eckhardt, for many years connected with the talking machine trade, East and West, occupying many positions of trust and responsibility, has removed his residence from Flatbush (Brooklyn) to Whitestone, up on the north shore of Long Island Sound. He has recently purchased a new seven-seat automobile, and takes pleasure in having his friends join him on extended trips on the superb roads of the island, visiting its many picturesque spots.

CINCINNATI'S BUDGET OF NEWS.

April Business Shows Drop—Rudolph Wurlitzer Co. Well Pleased with Conditions—May Musical Festival Helps Trade—Featuring the Fibre Needles—Edison Circular Stimulates Dealers—Columbia Co. Business Good—Milner Musical Co. Establishing New Agencies—Ohio Concertophone Co. Succeeds the National Concertophone—Other Interesting News Worthy of Record.

(Special to The Talking Machine World.)

Cincinnati, O., May 6, 1910.

April was not quite up to the standard of the first three months of this year, but compared with the corresponding period in 1909 the trade are well pleased with the month that was recently torn from the calendar. The outlook for business is satisfactory, the jobbers announcing plans for getting into closer touch with dealers. In

VICTOR and EDISON

Jobbers in Greater New York

S. B. Davega Co.
126 University Pl.
NEW YORK CITY, N. Y.

some instances additional men have been employed for this particular purpose.

The management of the Rudolph Wurlitzer Co. is well pleased with the results so far obtained in their talking machine department during the year 1910. The retail business, thanks to the musical activity in Cincinnati, has been very brisk. The volume of Victrola and Red Seal business is always proportionate to the number of musical affairs given, and the year 1910 has been particularly favorable in this regard. The Cincinnati May Festival, which is a feature of musical life in Cincinnati, brought home practically to every Cincinnati the work of the great masters and the art of such singers as Schumann-Heink, Evan Williams, Herbert Witherspoon, Louise Homer and Emmy Destinn, who were heard during the festival. Needless to say the records of these singers were in great demand during and after the festival.

Local dealers look forward to the month of May to be a record breaker in the talking machine business.

The Wurlitzer Co. are featuring the fibre needle on the main floor of their establishment. The Victrola is placed just within the front of the store, and the sweet music given by this instrument, upon which the fibre needle is used, fills the entire store without interfering in the least with the transaction of other business at the musical merchandise counter or office. This feature alone has sold many Victrolas, and the Wurlitzer Co. will hereafter give it a permanent place. The entire musical store was redecorated and a magnificent electrical display illuminated the front of the building during the festival season.

Schumann-Heink and Evan Williams were among the most popular of the artists who came to Cincinnati for the fall festival. In this connection it is quite a tribute to the Victor to state that the engagement of Evan Williams was secured through an enthusiastic purchaser of a Victrola, who appreciated Evan Williams' records, and recommended his selection as a May Festival soloist. The Wurlitzer Co. did some extensive advertising during the May Festival season, in which visitors were invited to call and hear the voices of the May Festival stars through the Victrola, with a view of being able to secure many prospects for dealers who are located in this city and Ohio, Indiana, Kentucky and other neighboring States. The artists who took part in the festival were invited to call at the Wurlitzer store to hear their records on the Victor Victrola.

The circular just issued to Edison dealers, calling attention to the immense number of small Edison machines which are scattered through the country, and suggesting that they take in trade these instruments on an Amberola, has been most stimulating to Edison trade in this city and locality. Every dealer should carry an Amberola and the jobbers stand ready to make this possible regardless of his capital, as long as he proves himself to be progressive and upright.

Manager S. H. Nichols, of the Columbia Phonograph Co., reports business for the month of April even better than he anticipated, and his anticipations were very high. He said: "The demand for the Grafonolas, especially the Regent, continues beyond the supply. At this time we are holding orders for Regents, awaiting shipment, although deliveries from the factory have been very satisfactory, but the sales have gone away beyond what we really planned for. We have been using a wide campaign of advertising, including the newspapers, billboards and street cars, and the effects of this publicity are being felt strongly in our retail department, where the sales have been satisfactory from every point of view. The demand for the Grafonolas is greater than before, and the Grafonolas carry with them a large demand for our Fonotopia double-disc records. With the opening of spring our dealers are being furnished with plenty of posters and advertising for outdoor work, and the signing up of exclusive Columbia dealers continues almost daily. The simplicity of our four-minute aluminum tone arm cylinder graphophones and the perfection of the four-

minute Indestructible records has been recognized and appreciated fully by our dealers, who are enthusiastic over them and who are doing a larger cylinder business with them than ever before. Conditions are good and business is good, and we are enjoying our full share of this prosperity, together with our hundreds of Columbia dealers. Our dealers are doing a splendid business with the Grafonolas, and are delighted with the wide working field these high-class instruments have opened for them."

The Milner Musical Co. intend to devote the most of their energies this month toward establishing new agencies. A new man has been taken on in order to enable Manager W. A. Timmerman to put one of his live wires out in the field. George Gross, who took on a line of Edison goods last month from the Milner house, has proven a winner at his new location, Woodward and Main streets. He has come back with new orders and promises to be one of the best agency buyers on the list of the company.

Manager Timmerman this morning stated that the Edison line of records for May is the best yet produced and predicts a record breaking business for the next thirty days. He said the house is ahead of last April's record. Several Amberolas were sold last week and he has plenty of good prospects in tow. Wm. J. Kenney, one of the hustlers of the Milner Co., carried off the honors during April for the largest aggregate sales of machines and supplies.

The Ohio Concertophone Co. have been succeeded by the National Concertophone Co., the two being the successors of the Victor Novelty Works, of Chicago, which was bought out recently by John C. Groene and others of this city. Arrangements were made last week for the establishment of a factory at Rising Sun, Ind., which will be in charge of Thomas Skelly, the inventor. The officers of the new concern are: President, J. W. Whitlock; vice-president, Charles Luhn; treasurer, Jno. C. Groene, and secretary, Frank K. Bowman.

John Arnold, 507 Elm street, believes the best thing that has happened to the trade in months is the offer of the National Phonograph Co. to place their new attachments on old machines for four-minute records. "People," he said, "tired of hearing the short selections, have come forth and are having a new attachment placed upon their machines. This has brought us a large volume of business."

The Salm Talking Machine Co. are disappointed at the lack of results in their publicity campaign, in which billboards were extensively used. This many claim is a roundabout way of reaching purchasers.

COLUMBIA GLEANINGS.

Feinberg's Southern Trip—Something New Coming.

B. Feinberg, who has been touring the South for the wholesale department of the Columbia Phonograph Co., general, for six weeks past, returned to New York Monday. He reports writing a lot of good business. Thursday last he went to Richmond, Va., via the water route and remain until the close of the Piano Trade Exhibition.

The Columbia Co. will shortly announce something that will be welcomed by their dealers and jobbers. It in no way interferes with their present strong line, but is an addition. The catalog or booklet is under way, and possibly the goods will be shown for the first time in their space at the Piano Trade Exhibition in Richmond, Va., May 16 to 21.

On May 2 Don Emilio Murillo, a distinguished composer of Bogota, Republic of Columbia, S. A., arrived in this country to supervise the recording of some of his best known works for sale in his native country. Not a few of Senor Murillo's compositions have been produced with eclat in Paris, France. He will remain here for three months, and devote his exclusive services to the Columbia Phonograph Co., General.

REVIEW OF JUNE RECORDS.

Issued by the Victor, National, Columbia and Universal Companies

In the National Phonograph Co.'s Grand Opera Amberol list for June there are many excellent numbers which will increase the army of Edison admirers. Marguerita Sylva, soprano, is represented by an excellent number in the "Ballatello" from "Pagliacci" (B194), which is sung with ease and effective style. Mme. Carmen Melis, soprano, give a most dramatic reading to the "Mamma" song from "Zaza" (B193). Another impressive number is "Eri tu" from "Ballo in Maschera," sung delightfully by Ernesto Caronna. The selection from Massenet's "Werther," sung by Luigi Cilla, tenor, is a splendid example of the lyric art most effectively recorded. Luigi Lucenti, basso, has made a fine record of an aria from Verdi's little known opera "Simon Boccanegra" (B197), which demonstrates the versatility of the great Italian master and the beauty of Signor Lucenti's voice. In the Edison Amberol list Victor Herbert and his orchestra are represented by selections from "The Tattooed Man" (440), which, as might be expected, are recorded in the most finished style. Another striking orchestral number is "Moraima, Spanish Caprice" (446), played by the American Standard Orchestra. This is a characteristic Spanish number, full of lights and shades, and most fascinating. Sousa's Band is represented by Strauss' "Morgenblätter" Waltzes (452), which are played with verve, charm and finish. Another excellent instrumental number in the lighter vein is the barn dance, "Dem Dear Old Days" (433), played by the United States Marine Band. Among the most striking numbers in the vocal list is a sacred selection, "My Jesus As Thou Wilt" (445), sung with fervor and charm by singers of recognized ability, composing the Edison Mixed Quartet. There are quite a number of the popular songs of the day listed, all of which are greatly in demand, and which, as usual, are well recorded. Among the striking numbers in the Edison Standard list is the harp solo, "Annie Laurie" (10368), by R. P. LaRocca. This charming old melody is given a new setting, beautifully embellished and artistically rendered. Other instrumental numbers are: "The Salute to Washington March" (10365), which is played in brilliant fashion by the United States Marine Band; Chaminate's "The Flatterer" (10372) is given a very attractive orchestral reading by Victor Herbert. The recording of this little gem of the well-known French composer is a delight. The Gipsy waltz, "Love's Torment" (10376), so popular in London, is well rendered by the American Standard Orchestra. Under this heading, as in the Amberol list, there is to be found a goodly showing of all the standard songs of the day, sung by well-known composers, which will be found listed in the regular department of The World.

* * * *

The Columbia Phonograph Co., in their list for June, introduce the famous Italian operatic soprano, Lina Cavalieri, whom they have signed exclusively. Her selections are from "La Boheme" and "Mefistofele" (A5172), in the 12-inch Symphony list. This famous artist is heard to great advantage. Every note is clear and true and musical, and marks the first of a series of double discs by Cavalieri to be issued by the Columbia Co. Kitty Cheatham, the great interpreter of songs of the South and childhood, is represented by the first of a number of records which she intends making for the Columbia Co. Her initial effort in the 12-inch list is "The Plaint of the Little Bisque Doll," "Visitors" and "The Sugar Dolly" (A5163). These songs and sketches are sung in that inimitable manner for which Miss Cheatham is famous. They are unique and therefore must win a big following. Raymond Hitchcock and George Lashwood, baritones, have two excellent numbers (A5167) this month. They are both character sketches, and anyone who has heard the well-known American and the popular Englishman will feel that he is again in their

presence when this record is heard. Manuel Klein's New York Hippodrome Orchestra is represented this month by "The Nut Cracker Suite," by Tschaiakowsky, and "Meet Me Where the Lanterns Glow," sung by Miss Tillotson, contralto, and Harry Burr, tenor with the orchestra (A5169). In the 10-inch list there are some numbers of more than ordinary merit, notably the double record comprising "The Friar of Orders Gray" and "Rolling Down to Rio," sung by George Clarence Jell, baritone (A828). The former is an old-time favorite, while the latter is an English song which has created quite a sensation in the old country. Two operatic selections played by Prince's Orchestra—"Bright Eyes" and "The Arcadians" (A823)—are full of graceful, catchy melodies which are very popular. Space will not permit a detailed analysis of the other numbers, which, however, are worthy of careful consideration by dealers. The two-minute and four-minute Indestructible cylinder list for June contains thirty numbers instead of twenty, as heretofore. In the four-minute list appears the first five of a series of fifteen records of dance music played in strict dance time and issued in response to many demands. The general list, as will be noticed elsewhere, contains many numbers, both popular and standard, of real merit. It is well diversified and well selected.

* * * *

The Victor Talking Machine Co. have turned out an excellent list of records for June sufficiently catholic to please all fancies. The Red Seal list is notable for three new Caruso records, two "Germania" airs by Franchetti (87053-87054) and the famous duet trio from "Faust" (95206), which Caruso sings with Scotti and Journet. John McCormack, the popular young Irish tenor, is represented by an English ballad by Harford-Marshall (64120) and selections from "Carmen" and "Faust" (88216-88230). Mme. Gadski, the great Wagnerian soprano, is heard to great advantage in a selection from "Götterdämmerung" (87052). The admirers of "Mme. Butterfly" will be delighted with the two selections, one a solo by Geraldine Farrar (87055) and the other the trio from Act II, admirably sung by Fornia, Martin and Scotti (87053). Mme. Sembrich, the incomparable soprano, and Sammarco, the baritone, are represented by a duet from "Rigoletto" (89042), a beautiful record. Another duet that will interest is that sung by Mes. Gadski and Homer from "Orfeo ed Euridice" (89041). Mischa Elman, the clever violinist, who has just finished a tour of this country, has made new records of seven of his selections already listed, and played several new numbers, two of which are herewith presented, namely, Beethoven Minuet in G (64121) and Dvorak's Humoresque (74163). These, as well as the entire list, are splendidly played by this violin wizard. In the Purple Record Label list there is an interesting talk by Shackleton, the great English explorer (70014); two new Bayes-Norworth records, "Young Amer-

ica" (70015), "Come Along, My Mandy" (70016), and two new Lauder songs, "Killiecrankie" (60018), and "We Parted at the Shore" (70013). These are sung in Lauder's inimitable style with plenty of rolling "r's". Other records of merit listed include a selection from Massenet's "Hérodiade" (31786), played with brilliancy by Arthur Pryor's Band. Another interesting record is Wagner's "Lohengrin Fantasie" (31785), played by Victor Sorlin, 'cello, and C. H. H. Booth, pianist. In this record there is an admirable balance of tone and the ensemble effect is most pleasing. The Victor Light Opera Co. is represented this month by gems from "Pinafore" (31782), one of Gilbert and Sullivan's most successful operas. The old favorites from this opera are admirably sung and undoubtedly will appeal to hundreds of thousands of admirers. A new piano record, and a mighty good one at that, is the Strauss "Voice of Spring Waltz" (31784), played with some amazing variations by Alfred Grünfeld. M. Rocca, of the Opera Comique, Paris, is the singer of an aria from Massenet's "Manon" (5775). This record will give a great deal of satisfaction to opera lovers. Lucy Marsh and Harry Macdonough have two charming duets from current opera successes in "The Stepping Stones," from "The Belle of Brittany" (5776), and "Ring O'Roses" from "The Dollar Princess" (31783). Twelve double-faced records are listed for June, and as will be seen from the list elsewhere, they include a number of popular, classic and religious selections that are well worthy the consideration of dealers.

THE COLUMBIA WHOLESALE STAFF.

R. F. Bolton, manager of the Columbia Phonograph Co.'s wholesale branch, 89 Chambers street, New York, in speaking of business said: "The last week has shown a marked improvement over the preceding weeks. The demand for high-priced goods continues and the factory is behind on deliveries. As a whole the Columbia trade is getting steadily better. Last week we sold a nice bill of goods to Frank Storck, Red Bank, N. J., amounting to \$2,000.

"Our traveling staff consists of O. P. Graffan, who travels through New York State; C. M. Mallette, who looks after the trade in New Jersey and Connecticut; L. C. Ziegler, who sees the dealers in Greater New York, and C. M. Dolly, Jr., a special representative in the same territory. They are all live wires."

We are in receipt of a handsome photograph showing the interior of the talking machine display rooms of the Abelowitz Phonograph Co., Inc., at 510 East 138th street, New York. The instruments which they handle are most attractively displayed, the Victor being prominently featured with the famous trade-mark occupying the place of honor. The store is attractively arranged and bears all the evidences of careful and progressive management.

The THORN NEEDLE and HOLDER is Pleasing Everybody

ESPECIALLY THE DEALER WHO SELLS THEM

Put in a stock of Thorn Needles and Holders and give them a THOROUGH try-out with your trade. You will be as surprised with the results as other dealers all over the country who have taken the time to demonstrate them.

WITH THE TRADE IN CLEVELAND.

Business in the Talking Machine Field of Satisfactory Volume—Grand Opera Records Selling Well—Moving Pictures to Help Deaf and Dumb—A Talking Machine Enthusiast—W. J. Roberts, Jr., and W. H. Buescher & Sons Consolidate—Good Columbia Co. Business—How the Various Houses are Handling the Trade—General Increase in Business Reported—Expansion With May Co.

(Special to The Talking Machine World.)

Cleveland, O., May 10, 1910.

Business in the talking machine trade is of moderate volume as usual at this season of the year, and if anything has been accentuated by the changeable, disagreeable, unseasonable weather. But from the fact that general business is good, the outlook is regarded as encouraging. However, opinions are somewhat mixed regarding conditions, and there are some who believe a quiet trade is the best situation can boast of. Complaint is made that there are too many engaged in the talking machine business, engendering unnatural competition, and hints are dropped of underhanded price cutting and explanations of how it is done. But, as a general proposition, it is doubtful if much, or any, price cutting is resorted to in making sales.

These lovers of music who did not, and those who did, hear the famous singers at the recent brief grand opera season in this city are now, thanks to the May lists of records, hearing them sung at their homes, and as often as they like, as well as many other world-famed songsters in the popular field.

With the passing of the winter season, regardless of the weather, patrons of opera, concert, lecture and stage find fewer opportunities for indulging their tastes. In a lesser measure it is true even of the lovers of vaudeville. These patrons have learned that it is no longer necessary to store up their temperamental tastes, not to be brought out again until fall arrives. Throughout the summer they can, and do, depend on the never failing, always enjoyable music records, and find their wants satisfied.

In collaboration with the phonograph the deaf and dumb of Cleveland have determined to use the moving picture machine to preserve the work of their famous lectures. In a lecture by Robert McGregor, a celebrated deaf and dumb reader on "The Helmet of Navarre," moving pictures were taken of his graphic sign language, which will be preserved for future generations of the deaf and dumb. Heretofore there has been no record of the sign language. Slang expressions have crept in, and through the instrumentality of educated lecturers the deaf and dumb hope to preserve purity of diction of the silent language.

E. F. Stafford, a prominent business man of this city, who resides in the suburban town of Lakewood, is an enthusiastic admirer of the talking machine. He has installed in his cozy home

a golden oak Victrola, and is the possessor of over one thousand records, including nearly every red seal record in the Victor catalog. Mr. Stafford, a musician of considerable local note, is baritone soloist at Emmanuel Episcopal Church and has participated in a number of operatic functions in recent years. Notwithstanding his large number of records they have been made with care, and constitute a repertoire of selections which would be difficult to duplicate, including the seven of the garden scene from Faust, by Caruso, Farrar, Gilbert and Journot.

W. J. Roberts, Jr., has merged his business with W. H. Buescher & Sons, and is now in charge of the Victrola sales department. This merging of the two businesses, while greatly decreasing the expenses of operation, will strengthen the forces, centering the trade in one of the finest equipped Victor stores in the country. W. H. Buescher stated business was giving daily evidence of improvement, many sales of Victrolas were made during the month.

Phil Doran, manager of the talking machine department of Collister & Sayle, said sales of machines were slow, but record trade, especially in red seals, was very good.

At the Columbia graphophone store of the G. J. Probeck Co. this month's business is reported excellent, and the trade holding up remarkably well. A. W. Robertson, of the company, said: "We are experiencing a growing demand for Columbia grand opera and other special records, made by exceptionally good talent, and the interest in Grafonolas is not abating, one prospective customer even proposing to so plan the arrangement of the library and living room portion of his new home, now under construction, as to most suitably accommodate the new library table Grafonola. The new 4-minute Columbia indestructible cylinder records are making friends every day, and, as Mr. Post would say, 'There's a reason.'"

Great activity is evident in all departments at E. McMillin's music store, especially in the talking machine department. Mr. O. E. Kellogg, the new manager, has perfected extensive improvements for the benefit of customers by greatly expanding the list of records carried, which now includes a large number of the foreign selections. Through Mr. Kellogg's up-to-date methods every record is always in stock. "Our sales of Red Seal records," he said, "has shown a steady increase and the demand now exceeds our most sanguine expectations. We also feature the entire Edison line, the same as the Victor, and are now the only Edison dealers in the Cleveland New Center."

Next to attractive demonstration rooms and an appropriate display of talking machines and cabinets, E. A. Friedlander, manager of the talking machine department of the Bailey Co., believes in as wide publicity as possible, and is alert in taking advantage of the liberal advertising by the different manufacturers in following up the various announcements in the daily papers with matters of local import. With the

extensive and varied stock of Victrolas, Phonographs, Zonophones and complete lists of the records, Mr. Friedlander is enabled to meet customers with propositions that meet their pocketbook. He states that business is very good and improving, the demand for the more expensive machines and records, especially, constantly increasing, and that he had more orders than he could fill for the special Amberola attachment offer. He stated the Zonophone foreign records were very popular and selling well.

The talking machine trade is very good at the store of B. L. Robbins & Co. "The special Amberola proposition is proving very popular, and is being taken advantage of by many of our customers," said Mr. Robbins.

The May Co. are building an addition to their already large store, and when completed will undoubtedly house the piano and talking machine departments in more accessible quarters than the present. The company are doing a fairly good business, and report a number of sales of Victrolas. The manager stated that, judging from inquiries, there would be a good continuous demand for the new Victor May Red Seal records, especially of the garden scene from Faust, as sales of the entire set of seven are being daily made.

Brown Bros., who handle the Columbia exclusively, report a very satisfactory trade during the past month. Miss L. Byrnes, in charge of this department, stated that while there had been a little slacking up, they had been making good sales right along, and that business was now steadily improving again.

H. E. Jones, formerly with the Columbia Co., is now engaged with the C. E. Zimmerman Co., publicity and sales promoters of Chicago. He is in charge of the State of Ohio territory, with headquarters in Cleveland.

The Goodman Piano Co. have increased their capital stock from \$25,000 to \$100,000. Mr. Goodman said business in both the talking machine and piano line was constantly improving.

A run around the trade generally reveals conditions as uneven with a tendency to betterment. The Flesheim-Smith Co. report increasing sales in Victrolas and Victor records; the Aldrich-Howey Co. make a similar report regarding Columbia graphophones and double disc records; Chas. I. Davis, of the Music and Novelty Shop, reports many sales of Victrolas and increasing record trade; Mr. Towle, of the Eclipse Musical Co., says machine sales are slow, but record trade is good; the Lewis-Welsh Piano Co., 5907 Euclid avenue, are giving talking machines quite a prominence as a side line; Mr. Rood, of the Talking Machine Store, reports business as seasonably good; Cobletz Bros., whose trade is largely in records of foreign languages, complains that business is very poor. So there you are.

The Columbia list of the foreign series of disc and cylinder records is proving a successful aid to dealers in securing patronage from that large class of our fellow-citizens who appreciate records in their own tongue.

TRADE IN THE PACIFIC NORTHWEST.

April a Record Month in Both Wholesale and Retail Lines—Looking for Good Summer Business—A Canadian Visitor—Conditions in Oregon—What the Various Dealers Are Doing—Jobbers Very Active—Talking Machine News of the Month in Brief.

(Special to The Talking Machine World.)

Seattle, Wash., May 1, 1910.

The month of April has been the biggest month so far this year in both wholesale and retail business. Probably the great activity shown by the country dealers is due to the special attachment proposition made by the Edison people. This offer has served to wake up quite a number of the "dead ones" and has spurred the "live ones" to greater effort than ever before. The Victor business, of course, is holding up in good shape, especially the Victrola and Red Seal records. The Columbia Regent Grafonola is also coming in for its share of attention by the trade.

From now on the dealers are looking for continued prosperity, as the summer homes and house-boats are rapidly being occupied and the talking machine will be more popular than ever with this class of people. Quite a number of sales have already been made by dealers to occupants of these summer homes.

Seattle enjoyed a visit by a distinguished talking machine man lately in the person of James P. Bradt, Canadian manager for the Columbia Phonograph Co. Mr. Bradt states that business is excellent across the line and that the Columbia product is "the one best bet" with the dealers. While in Seattle Mr. Bradt was entertained by Edw. P. Kelly, also by C. H. Hopper, who is one of the directors of the Eilers Music House.

Ed. Lyons, Northwestern representative for the National Phonograph Co., made a brief visit to Seattle a few days ago. He reports that the dealers in Oregon are at last beginning to show signs of life. It is the opinion of all travelers who have made this State that the possibilities

of the talking machine from a commercial standpoint are greater than any Coast territory. This will be apparent when it is considered that Oregon is just entering into a great era of railroad building which will naturally be followed by new towns and general prosperity when its millions of acres of the richest land in the world will be placed in direct outlet with Portland and San Francisco.

E. B. Hyatt, of the Portland Phonograph Agency, claims the record of the Coast for Amberola sales. He has purchased 24 and sold 19 since January 1. Mr. Hyatt handles Edison products exclusively.

Mr. Glenn, manager of the Columbia Phonograph Co., Portland, reports that the business of his branch is unprecedented. He is booking orders by the carload for immediate delivery.

The Edison business phonograph is gaining prestige every day in Seattle. A demonstration of its advantages was given by Eilers Music House to a gathering of 200 good-looking stenographers recently. They are establishing a training department where stenographers may receive free instruction in the operation of this device.

Manager Rice, of Kohler & Chase's talking machine department, states that their business for April exceeded that of any other month so far, with the exception of December, 1909.

Hugh Barrett Dobbs, late of New York city, who is traveling for Sherman, Clay & Co., is making quite a record for himself in establishing Victor dealers. Only "live wires" are wanted by Mr. Dobbs, and a few of his latest acquisitions into the Victor fold are such firms as A. L. Hotchkiss Co., Seabeck; E. C. MacReavy, Union City; Webster, Eckhardt, Sims Co., Enemclaw, and the Carbon Hill Coal Co., Carbonado, all in Washington.

J. H. Ferguson, traveler for Eilers Music House, Seattle, has just returned from the southern part of the State and Grays Harbor points, with his usual package of orders.

Ward & Co., the hustling dealers of Bremerton, Wash., have just sold seven Victors and

five Edisons to the battleships at the Navy Yard.

A. T. Raebeck, Olympia, Wash., has just completed the task of remodeling his warerooms to make room for his growing talking machine business.

White & Gabel, the dealers at Chehalis, Wash., have recently opened up a swell store in Centralia, Wash., with a full line of Edison machines and records. This firm have certainly done wonders toward developing the "talker" business in their territory.

Business in Alaska continues to go by leaps and bounds. The Seattle jobbers having received heavy orders from the leading dealers, among whom are the Ryus Drug Co., Ketchikan; J. Huebner, Douglas; Seward Drug Co., Seward; Owl Drug Co., Valdez, and W. W. Powell, Fairbanks.

Mr. Wilson, of White & Co., Cordova, Alaska, spent a few days in Seattle recently on his way to mining property in Oregon.

J. T. Spickett, a dealer of Juneau, Alaska, stopped off to call on Seattle jobbers on his way to Texas, where he is going on a short business and pleasure trip.

J. Woodburn, of Tideman & Woodburn, Everett, Wash., was a recent visitor at Eilers Music House, placing an order for three Amberolas.

HONESTY IN ADVERTISING.

Be absolutely honest in advertising. Be straightforward and honest. It may be true that misrepresentations will sell goods. Lying salesmen can sell shoddy stuff. These are men who have become rich by cheating. Dishonesty in the store or in advertising is not a sign of cleverness, but rather of business weakness. Transient trade will follow the alluring dishonest advertisement, but no permanently successful business has ever been built without honesty and integrity as foundation stones. P. T. Barnum's remark might have been true regarding a circus, but it can't be applied to merchandising.

THE NEW IDEA**Combination Disc Record Cabinet**

A unique and practical cabinet with changeable cover to fit and match Victor I, II, III, IV, V or VI. Dealers who handle the New Idea Cabinet need carry but one or two in stock, and with extra tops, at a very small expense, be in a position to supply customers with a cabinet for any type Victor Machine.

A Jobber with ten New Idea Cabinets and a few extra tops, will be able to fill orders more promptly than he is to-day with a stock of 100 of the present style Disc Cabinets. The New Idea Cabinet holds 180 10-in. or 12-in. Records. There are twelve sliding files with indexed interiors, each holding fifteen records. Files are wood faced and finished to match cabinet, oak or Mahogany. Sold through the Jobbing Trade only.

BOGART CONCERTS TRADE BUILDERS.

Wallace F. Bogart, dealer in talking machines, pianos, etc., at 1263 Ogden avenue, is numbered among those who believe in holding concerts with a view of bringing his customers in closer touch with his store and incidentally exploit his

line of goods. Over 200 people accepted his invitation to the concert and later complimented him on the strength of his program. The Bogart player-piano was used during the evening and proved an attraction. Mr. Bogart was so well pleased with the results that he intends to hold another at an early date.

VICTOR CO.'S GREAT BUSINESS.

Unprecedented Activity in Every Department at Camden—Best Proof That There Are No Dull Times with Progressive Talking Machine Dealers—Big Call for Victrolas.

(Special to The Talking Machine World.)

Philadelphia, Pa., May 2, 1910.

Never in its history has the Victor Talking Machine Co., Camden, N. J., been so busy in every one of its departments. Shipments are very much in arrears, and the congestion is likely to continue for months to come. For years the company have not been in a position to ship 100 per cent. of the orders received. General Manager Geissler recently made the statement to a prominent distributor of this city that at present they were 97,000 machines behind on orders.

It is also reported that the company said that while it was gratifying to know they were doing such a tremendous business, the future promising a still further increase, at the same time it was embarrassing—an "embarrassment of riches," as it were. Explanations to distributors not acquainted with the situation at the factory were daily occurrences, and this is not an altogether pleasant feature. As it stands, not a few departments are working overtime, and to compensate for this extra pressure on their employees a voluntary increase of wages had been made by the company.

The demand for Victrolas is not only extraordinary, but is greater now than during the holiday period. Regular shipments on the allotment plan are made daily, but the supply is and has been so inadequate that drastic action to remedy the deficiency was rendered necessary. This step was taken recently relative to the cabinet making plant, the board of directors, after careful consideration of the matter, instructing the building committee of the company to not only run up the present structure (now six stories and a hundred feet or more square) to its original intended height, but to also put up an additional building adjoining. This will double the capacity of the cabinet making factory. Excavating has been under way for a week or more, and work on the foundations will follow immediately with the building rushed to completion as rapidly as substantial construction, in keeping with the numerous other buildings of the marvelous Victor plant, will permit.

H. C. Brown, manager of the advertising department of the Victor Co., has been detained at his home for a couple of weeks by illness. He is expected to report for duty in a few days.

"There are many ways to do a thing wrong, but only one way to do it right."

WILLIAM F. NYE
NEW BEDFORD, MASS.

SWITKY'S NEW QUARTERS.

The Victor, Edison and Zonophone Dealer Will Occupy New Quarters in the Fifth Avenue Building, New York, on May 15.

Benj. Switky, handling the Edison, Victor and Zonophone lines, at 27 E. 14th street, New York, for many years, on May 15 will remove to the new Fifth Avenue building, at the junction of Broadway, Fifth avenue and Twenty-third street, one of the most prominent locations in the city. His store, on which he has taken a long lease, will be on the Twenty-third street side, adjoining the Garfield National Bank's quarters. As Mr. Switky remarked: "Business has been good with me, and I have made money, else I could not be in a position to move into such a swell place. I'll make good, of course, and I will have a dandy store."

COLUMBIA LITHOGRAPH HANGERS.

The first of a series of elaborate colored lithographed hangers—the finest and most artistic ever sent the trade—was mailed Columbia dealers this week. They are an ornament to any store and really deserve framing. The initial of this splendid stroke of enterprise on the part of the Columbia Phonograph Co., General, is that of Constantino, the famous Spanish tenor, in costume of the character he has adorned in "La Gioconda." The others to follow are Campanari, David Bispham and Lina Cavalieri. The pose of the latter prima donna is one that is well worth preservation for its artistic value. In fact, this is true of the entire series, the portraits being excellent and the coloring faithful and delicate. The posters are lithographed on splendid heavy colored stock, and in size are about 20 x 30 inches.

SEEBURG ELECTRIC PIANOS

- A revelation in coin-controlled instruments.
- A perfect player mechanism in a high class sweet-toned piano.
- No obstructive boxes front or back.
- Unique speed regulation and expression devices.
- The piano is constructed throughout to withstand the heavy requirements placed upon it.
- Made in three attractive styles.

Write for catalog giving full descriptions and illustrations, and let us tell you how to increase your business by handling the right electric piano in the right way.

A WIDE-AWAKE CANADIAN.

Robert Shaw Managing Director of Western Talking Machine Co., Winnipeg, Believes in Up-to-Date Methods—What He Says in the "Western Talking Machine News."

(Special to The Talking Machine World.)

Winnipeg, Man., April 30, 1910.

While the talking machine jobbers of the States are acknowledged to be a live and progressive lot of men as a body, it may be interesting for the readers of The World to learn that there are a number of distributors on the other side of the border who conduct their business in a decidedly up-to-date manner and might in some instances give pointers to their brethren in the States. One such house in this city is the Western Talking Machine Co., western wholesale Victor-Berliner distributors, who, under the management of Robert Shaw, have steadily forged to the front in the Canadian trade.

The excellent publicity campaign carried on by the company has in a large measure contributed to their success, one of the features being a monthly magazine entitled "The Western Talking Machine News," which is full of valuable information and "ginger talks" for the dealer and is distributed free of charge. The material printed in the booklet is excellent, and the following is an extract from a talk on "the good old times" which appeared in a recent number:

"Some people like to talk about them, but you never heard me do it. I was in the talking machine business in—the good old times—that's why!

"I tell you, there's no time like 'the present time,' when the whole musical world is waiting breathlessly to see what the Victor is going to give them next.

"And what has March brought forth? Read my selling letter—and tell me (you old timers in the business) do you want to come back with me and do 'His Master's Voice' (as we used to say) in front of a 'talker' asking, 'What do you think of Hoolahan, Hoolahan, Hoolahan.'

ROBERT SHAW.

"You can have your 'old times,' when it broke a man's heart to put \$15 into a gramophone. I live in 'the present' when an agent in a town of 800 population in Manitoba can sell \$1,000 in 10 days. That thing was done last week! Do you believe it? Ask Parker of Manitou.

"It may not interest you, but listen! I am only two and a half years up here and I have sold more Victor-Berliner goods in the month of February than I expected to do during my first twelve months in the country. More in one month than I hoped to in a year.

"I thank you all, from the bottom of my heart, for this. But I deserve some thanks, too—don't I?—for waking you all up to the possibilities of replacing the sales of player-pianos with Victrolas and Victor records. But I must not forget that this is a general letter and I'm going to ask

a personal question. Have you sold a Victrola? Will you let me help you try?

"I'm putting the sample copy of the 'Selling Letter' this month on my letterhead paper to show how much nicer it looks that way. Why not have it on your letterhead paper? It costs you nothing. I'll hold it in type for a week from the day you read this in case you want it. Free, mind you, 'Scot free.'"

NEW WORD NECESSARY

To Describe the Merits of the New Victor Records Say the Victor Co.

The Victor Talking Machine Co. have been carrying some very cleverly written advertisements in the daily papers. Under the caption of the famous trade-mark, "His Master's Voice," and above their name the following text recently attracted our notice. The matter was very strikingly displayed and must have caught the attention of hundreds of thousands of people who were no doubt impelled to consider the talking machine question with beneficial results to the dealer. The text ran as follows:

"PERFECT-EST.

"A new word! But a new word is needed to describe the height of perfection reached in the new Victor records.

"So great is the improvement that we made over, at a cost of a half-million dollars, practically our entire list of Victor records—records universally acknowledged to be perfect.

"And the result is a record that plays clearer and sweeter and better than ever before.

"Take one of your old Victor records to any dealer's and hear it in comparison with a new Victor record of the same selection.

"The Victor record catalog lists more than 3,000 selections—both single and double-faced records. Same quality—only difference is in price. Buy double-faced if the combination suits you. And be sure to hear the Victrola."

Idleness is the sepulcher of the living man.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Special to The Talking Machine World.) Washington, D. C., May 10, 1910.

APPARATUS FOR COATING SOUND RECORDS WITH ELECTRO-CONDUCTIVE MATERIAL. Isaac W. Norcross, New York. Patent No. 952,753.

This invention relates to the art of making sound-records and to the production of numerous duplicates from an original or master record.

The invention is directed to that portion of the operation of making duplicate sound-records from an original, which consists in preparing the surface of the original record by coating it with an electro-conductive substance so that a matrix may be made thereon by electro-plating. Original sound-records are commonly formed of a waxy substance and in order to form a matrix on this original it is common to provide a coating of graphite upon the surface of the original record to make its surface conductive prior to putting the record in the electro-plating bath.

Heretofore it has been the practice to apply graphite to the surface of a sound-record manually with a camel's-hair brush by wiping the brush against the record at one point and then another repeatedly to coat the record with the graphite and rub the latter into the grooves of the record as thoroughly as possible. The application of the graphite to the surface of the original record in this way has not been satisfactory, both because of the character of the results obtained and because of the amount of time required, and it is the object of the present invention to provide an improved process and apparatus whereby this step in the manufacture of sound-records may be performed in a much superior manner and in much less time than is required under the method heretofore employed.

This invention consists in loading the surface of an original sound-record with the electro-conductive material and then, in an operation distinct from the loading operation, burnishing the surface of the record.

In this way a very much superior coating of the material is obtained, this coating having a bright, burnished surface similar to an enamel. Furthermore, the particles of the graphite are so closely laid upon the surface of the record that the coating is impervious to moisture; this is an advantage of considerable importance, for the record, after being coated, must be placed in the electro-plating bath, and if the water of the bath finds

its way through the graphite coating the record is quite apt to be spoiled by the water coming in contact with alkali in the sound-record and forming what is known as a "soft spot." Furthermore, the coating of graphite obtained in accordance with this invention is such that the coated record may be handled with little danger of affecting the coating thereon, whereas with records coated under the process heretofore commonly employed, great care had to be exercised to keep from touching the surface of the coated record.

In these drawings, Figure 1 is a perspective view of the apparatus; Fig. 2 is an elevation of the same, with one member in vertical section; Fig. 3 is a sectional view of the mandrel, and

Fig. 4 is a plan view of the machine with one of the parts shown in horizontal section.

ATTACHMENT FOR TALKING MACHINES. William S. McNamara, San Francisco, Cal. Patent No. 954,455.

This invention relates to sound reproducing in machines of the disc type and has special reference to a mechanism adapted to be applied to such machines for the purpose of stopping the machine after the reproducing needle has covered a definite part of the record.

In the accompanying drawings, like characters of reference indicate like parts in the several views, and Figure 1 is a top plan view of a portion of a disc sound reproducing machine equipped with the invention. Fig. 2 is a partial side elevation of such a machine.

Fig. 3 shows the collar or clip adapted for application to the sound-box of a talking machine. Fig. 4 shows a view of a modified form of brake end. Fig. 5 is a second modification of the brake end such as is used for machines employing discs or records larger than the revolving plate. Fig. 6

is a modified form of the brake arm or standard. Fig. 7 is another modification thereof. Fig. 8 is a modification showing a lug cast on the sound-box of a talking machine for the attachment of the stop.

SOUND-BOX FOR TALKING MACHINES. Robert L. Gibson, Philadelphia, Pa. Patent No. 954,953.

The object of this invention is to provide a construction of sound-box for talking machines which shall have great sensitiveness, whereby the volume of sound may be increased without loss of timbre or accuracy of articulation.

This invention consists in supporting the stylus bar on a pivotal connection formed by a spring whose length is in a plane at right angles to the plane of the diaphragm. In providing the sound-box with a stylus bar secured to or in contact with the diaphragm and suspended from the frame of the sound-box by a wire structure under tension. In providing an expansible frame to which the wire structure is secured, combined with adjusting devices for the expansible frame whereby the wire structure may have its tension adjusted.

Figure 1 is an elevation of a talking machine embodying the invention; Fig. 2 is a front elevation of the sound-box; Fig. 3 is a bottom view of the sound-box; Fig. 4 is an enlarged sectional view on line 4-4 of Fig. 2, showing the improved

manner of suspending the stylus bar; Fig. 5 is a bottom view of a sound-box showing a modification of the invention, and Fig. 6 is a sectional elevation of the same.

SOUND-MODIFIER FOR TALKING MACHINES. Edward P. Shepard, San Diego, Cal. Patent No. 953, 557.

This invention relates to an improvement in sound-modifiers for talking machines, and its object is to provide means whereby the sound can be modified or reduced without in anywise producing a detrimental muffling effect.

In the accompanying drawings, Figure 1 is a fragmentary view of the goose-neck of a talking machine, showing the invention applied; Fig. 2 is a plan view of the modifier, and Fig. 3 is a sectional view of the same.

DUPLICATE SOUND-RECORD. Jones W. Aylsworth, East Orange, N. J., assignor to New Jersey Patent Co., West Orange, N. J. Patent No. 953,454.

The purpose of the present application is to describe and claim an improved sound-record as a new article of manufacture. As such, the invention may be defined as a duplicate sound-record formed of celluloid (in which term is included all so-called indestructible materials for the

purpose, such as collodion, pyroxylin and cellulose acetate, and having homogeneous or non-laminated walls and with a cast permanent record surface, as distinguished from one in which the material is merely distorted or displaced.

Figure 1 is a longitudinal sectional view of the improved record, Fig. 2, a diagrammatic view of a suitable apparatus for producing the same, and Fig. 3, a cross-sectional view through the matrix showing one way of removing the finished records therefrom.

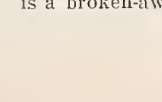

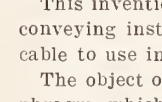

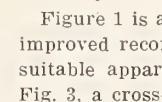

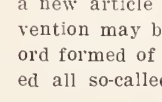

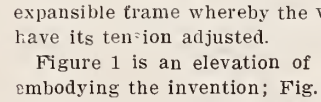

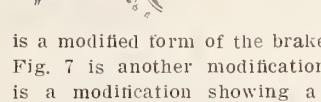

DIAPHRAGM. Clark Zarr, Newberry, Pa. Patent No. 953,889.

This invention relates to diaphragms for sound-conveying instruments, and is particularly applicable to use in talking machines.

The object of the invention is to provide a diaphragm which will transmit the human voice, instrumental music and other sounds without detracting from the tonal qualities or adding any unpleasant sounds. The diaphragm will be made of suitably prepared and treated fiber sheet material. If a center post is employed this may be made of similar material. The fibrous sheet material diaphragms and post may be assembled and fastened together by a coating of some resilient waterproof material. In practice the diaphragm may have applied to it a gasket of yield-

able material to prevent the parts which will normally clamp the diaphragm in position interfering with the proper working of the diaphragm.

Figure 1 is a perspective view showing one side of the improved diaphragm, namely the lower or post-carrying side. Fig. 2 is a similar view of the other or upper side of the diaphragm. Fig. 3 is a broken-away, enlarged central cross-sectional

view of the diaphragm and center post. Fig. 4 is a central sectional view of a sound-box illustrating the diaphragm and gasket in position, and Fig. 5 is a perspective view of a form of gasket which may be employed with the diaphragm.

PHONOGRAPH. Henry T. Oliver, Newark, N. J., assignor to New Jersey Patent Co., West Orange, N. J. Patent No. 955,424.

This invention relates to phonographs and has for its object the provision of interchangeable means for feeding the traveling carriage upon which the sound-box is mounted at either of two rates of speed; one of which may be suitable for operating upon a record having one hundred threads per inch. The particular means employed in a general way embodies the invention disclosed in the application of Peter Weber, Serial No. 425,844, filed April 8, 1908, in that there is a hollow rotary feed screw mounted concentrically with respect to an inner shaft and capable of being locked to said shaft so as to rotate therewith, or of being unlocked therefrom and driven thereby through interposed gearing so as to rotate at a different rate of speed.

This invention relates more particularly to improvements in the mounting of the hollow shaft, the means for locking the same to the inner shaft and for gearing the two shafts together, with a view to obtaining a structure in which the movable parts are protected to a great extent, are few in number, and capable of operating at the desired high rate of speed without undue wear or noise, such as would be objectionable in a phonograph, and in which the arrangement of the parts is compact and capable of being applied

to phonographs of ordinary construction without any changes in the frame or stationary parts of such machines, and without the provision of any supplementary or auxiliary frame for attachment to the phonograph body.

Figure 1 is a plan view, partly in section, of a phonograph constructed in accordance with the invention, the parts being arranged for feeding the sound-box carriage at a suitable speed for operating upon records having one hundred threads per inch; Fig. 2 is a view of a portion of Fig. 1, except that the parts occupy the positions which are assumed when the carriage is to be fed at a speed suitable for operating upon records having two hundred threads per inch; Fig. 3 is a section on line 3-3 of Fig. 1, and Fig. 4 is a section on line 4-4 of Fig. 1.

SOUND-RECORDING AND REPRODUCING MACHINE. Charlie E. West, Hopkinsville, Ky. Patent No. 956,460.

This invention has reference to improvements in sound-recording and reproducing machines of the type where the recorder or reproducer is constrained to move in a right line across the record tablet.

The object of the present invention is to adapt to such a machine the type of sound-amplifier wherein either the amplifier as a whole is movable in one plane only about a vertical axis, or one member only is movable to any point of the horizon and the other member is moved by the sound-box as it travels across the record tablet, and both members coact to constitute a single continuously-expanding sound-horn or amplifier.

The invention consists in providing a sound-reproducing or recording machine of the type wherein the sound-box is positively propelled across the record in a straight line with a taper horn movable in one plane only or with a swing-

ing taper arm connection forming a part of a sound-amplifier, the other part of which connects at its smaller end with the large end of the taper arm and is expanded into an open mouth or bell of usual type.

The invention comprises a connection between the sound-box and the taper arm, whereby the latter is permitted to move about a vertical axis so that its smaller end, adjacent to the sound-box,

describes an arc and, therefore, changes its relation with the sound-box. This connection is so related to the taper arm that it will move relatively into and out of the same to permit the arm to travel through a curved path, and it will also have a relative movement to the sound-box itself, so as to have a relative movement to the sound-box about an axis perpendicular to the axis of the sound-box.

Figure 1 is a side elevation, partially in section, of a sound-reproducing machine with the invention applied thereto, unessential parts being omitted; Fig. 2 is a plan view of the same; Fig. 3 is a longitudinal section, partly in elevation, of a modified form of the invention, and Fig. 4 is a cross section of the structure shown in Fig. 3.

SOUND-BOX FOR TALKING MACHINES. Edwin H. Mobley, Hillside, Pa. Patent No. 955,894.

This invention relates to sound-boxes for use in connection with records having grooves of the "hill-and-valley" type, the objects of the invention being to provide for the secure connection of the stylus lever to the diaphragm, and for the proper contact of the stylus with the undulating bottom of the groove without impairing the desired freedom of movement of said stylus and without affecting the purity of the reproduction. Reference is made to the accompanying drawing, in which—

Figure 1 is a view partly in side elevation and partly in vertical longitudinal section of a sound-box constructed in accordance with the invention; Fig. 2 is a perspective view showing certain elements of said sound-box detached therefrom; Fig. 3 is an enlarged perspective view of the blank from which the diaphragm connection is made; Fig. 4 is a perspective view of the same after it has been bent for application to the diaphragm and connecting ring, and Fig. 5 is a sectional view illustrating a modification of one of the features of the invention.

SOUND-AMPLIFIER FOR PHONOGRAPHS. Vito Ettore D'Urso, New York. Patent No. 956,235.

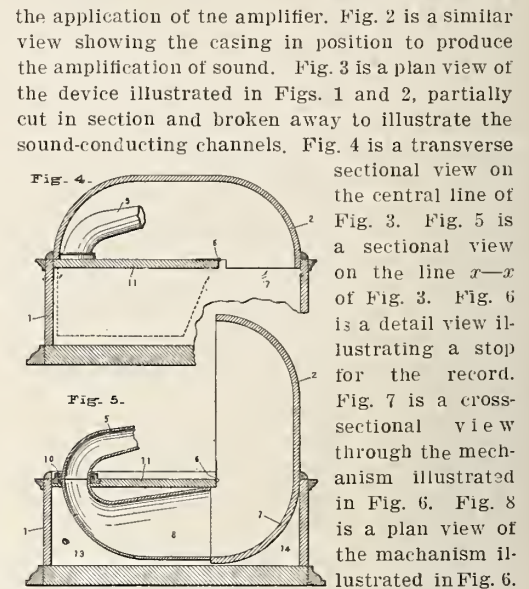

The objects of the invention are to provide a simple and compact device in which the inclosing casing may be utilized as a sound-amplifier.

A further object is to provide a device which will dispense with the ordinary horn type of amplifier and secure the necessary amplification of sound by utilizing a direct channel for the transmission of

sound from the disc or record through the inclosing casing of the device.

A still further object is to provide a casing in the form of a sound-amplifier, which, in normal position, will inclose the parts of the mechanism, and when opened for use will provide an amplifying or sound-board effect, which will give clear unobstructed tones.

Referring to the drawings: Figure 1 is a perspective view of the device illustrating the application of the amplifier. Fig. 2 is a similar view showing the casing in position to produce the amplification of sound. Fig. 3 is a plan view of the device illustrated in Figs. 1 and 2, partially cut in section and broken away to illustrate the sound-conducting channels. Fig. 4 is a transverse sectional view on the central line of Fig. 3. Fig. 5 is a sectional view on the line x-x of Fig. 3. Fig. 6 is a detail view illustrating a stop for the record. Fig. 7 is a cross-sectional view through the mechanism illustrated in Fig. 6. Fig. 8 is a plan view of the mechanism illustrated in Fig. 6.

"FROM BRAIN TO TYPE."

Something of the Handsome and Admirably Written Volume Just Issued by the Edison Business Phonograph Co., of Orange, N. J., Bearing Upon the Edison Commercial System Conducted with the Edison Business Phonograph.

The Edison Business Phonograph Co. have just sent out a volume of unusual interest bearing upon the Edison commercial system conducted with the Business Phonograph. It is a work of art from a typographical standpoint, being superbly printed in two colors with specially designed borders on heavy coated paper.

The volume is made up of a series of essays under the following headings: "The Progress of Voice Writing"; "Independent Dictation"; "Stenographic vs. Voice Writing"; "Centralized Transcribing"; "Importance of Design"; "Equipment."

It is only necessary to read these interestingly written essays to conceive the broad field which the Business Phonograph covers and to realize its great future in the commercial world. Progressive business institutions have tried and found the Business Phonograph an indispensable part of their equipment and an accelerator in clearing up correspondence.

The illustrations throughout the volume are in two colors and afford a splendid idea of the perfection of this remarkable mechanism for use in the commercial field. The volume must be productive of excellent results in compelling a larger measure of interest being concentrated on the possibilities of the Business Phonograph. Heads of departments cannot read this volume without being convinced that no modern business is complete without an adoption of the Edison commercial system.

The price-cutter is always in hot water, for no salesman ever had enough ingenuity to keep cut prices secret. Let it be known that you cut prices and the news will travel fast.

TALKING MACHINE JOBBERS MEET.

Executive Committee Hold Meeting in Columbus, O., on April 17 with a Full Attendance—Convention Outlook Most Satisfactory—Look for a Tremendous Fall Trade—Ask Factories to Prepare—Visitors Entertained by Mr. Whitsit.

A meeting of the executive committee of the National Association of Talking Machine Jobbers was held in the offices of the Perry B. Whitsit Co., Columbus, Ohio, on April 17, when a number of matters of importance to the association were discussed at length, and suitable action taken where possible. Every officer and member of the executive committee was present at the meeting, namely: President Perry B. Whitsit, Vice-President J. Newcomb Blackman; Secretary J. C. Roush, Treasurer Louis Buehn, E. F. Taft, J. F. Bowers, Lawrence McGreal and Rudolph Wurlitzer and H. H. Blish. Others present at the meeting were: W. F. Davison, vice-president of the Perry B. Whitsit Co.; P. J. Towle and T. Towle, of the Eclipse Musical Co., Cleveland, O.; Laurence H. Lucker, Minneapolis Phonograph Co., Minneapolis, Minn.; E. J. Heffelman and P. Shrake, Klein & Heffelman Co., Canton O.

One of the more important works taken up by the committee was the completing of the final arrangements for the convention at Atlantic City. Those present at the meeting were very enthusiastic over the outlook for a large attendance, especially from the West, where the jobbers have had a good business and feel inclined to bear the expenses of the trip.

It was the unanimous opinion of the jobbers attending the jobbers' meeting, that while the business for the holidays and thus far this year had been very satisfactory, the trade in the fall would open in a way that would surprise even the most optimistic and it was urged that the factories take advantage of any dull time during the summer to make up as large a reserve stock of machines for the fall trade as pos-

sible. On their part the jobbers are asked to aid the factories in providing for the coming demand by placing orders as far ahead as possible and carrying a maximum amount of stock in their stores.

The meeting was divided into morning and afternoon sessions, those present being entertained at lunch at the Ohio Club by Mr. Whitsit. In the evening those of the committee and visitors who stayed over for the night, had dinner at the Southern Hotel, after which they were invited to witness the press review of the moving pictures taken during the Roosevelt hunt in the African jungles, and other films of timely interest that were to be released the following morning.

Louis Buehn and J. N. Blackman left Columbus on Monday, April 18, dropping off at Cincinnati, where they visited the Wurlitzer Co.'s establishment. They arrived in Philadelphia next day for the purpose of serving on the committee appointed to confer with the Victor Co. on several matters of interest. The committee was subsequently received by Louis F. Geissler, general manager of the company, and a satisfactory understanding arrived at.

REHEARING IN STENCILING CASE.

Motion Granted for Rehearing of Case of Victor Talking Machine Co. vs. American Graphophone Co. for Infringement of Berliner Patent.

April 22 a motion for a rehearing in the so-called record stenciling case of the Victor Talking Machine Co. against the American Graphophone Co. was argued and granted by Judge Lacombe, United States Circuit Court, southern district of New York. The decision of Judge Lacombe was published in The World of April 15, in which the Federal court said that in relabeling a quantity of Leeds & Catlin Co.'s records as "Sir Henry" and selling them under this title

to the Simpson-Crawford Co., a New York department store, the defendants had infringed the Berliner patent.

C. A. L. Massie, of the American Graphophone Co.'s legal staff, has associated with him in this proceeding Richard N. Dyer, elder brother of Frank L. Dyer, president of the National Phonograph Co., Orange, N. J. Horace Pettit appeared for the Victor Co. When the case is made up the hearing will be held before Judge Lacombe in chambers. In the event of the judge not reversing himself, which is rare, the case will be immediately taken to the Circuit Court of Appeals for review and final adjudication.

"THE PHONOGRAPHIC CLOCK."

Swiss Device Announces the Hour to Any Room When Desired—Phonographs in German Reichstag.

A German trade journal says, under the headline "The Phonograph Clock," that Switzerland has gained a point over America in the clock industry by placing on the market a timepiece which bears that name. It is valuable as a novelty and "a source of comfort to the blind and the lazy." The clock may be placed in any room in connection with a phonograph and a person in an adjoining room, having no clock and where connection has been made with the timepiece by electric wires, needs merely to press a button to hear the time called aloud by the instrument. The same principle has been employed in the German Reichstag, where by touching a button the members in distant parts of the building are told by phonograph the name of the next speaker.

J. W. Moody, brother of V. W. Moody, sales manager of the New York Talking Machine Co., has gone to Birmingham, Ala., to take charge of the talking machine department of the E. E. Forbes Co. in that city. Mr. Moody formerly traveled for the Victor Talking Machine Co.

TRAINING SUCCESSFUL MEN.

What Part the Employe Can Play in Helping a Man Succeed and How He Profits by His Work.

Out of a certain 1,000 business men who have made a success in life, that is, have done something besides make money that is worth taking notice of, only 50 had wealthy parents to give them a start. That means that only 5 per cent. of these men who have amounted to something of real usefulness to the world have come from homes where wealth was able to purchase anything wanted and where financial prospects were good enough to give the boy a start. The other 95 per cent. have to hustle for themselves and dig out of the whirl and twist of the doings of life the thing which has made them prominent in one way or another. They demonstrated the stuff they were made of and proved that the only way a man can reasonably expect to rise above the ordinary level is to push himself along without specific aid. What has that got to do with retailing? Just this—there are thousands of young men who are clerks in stores who have in them the making of just successful business men as these one thousand mentioned, but they don't know it themselves, and there is prospect that a good deal of good material will be allowed to go to waste for that very reason. These young people need not so much the pushing and assistance of their employers as they need to come to a realizing sense of what there is in themselves for the building of a useful and profitable future. It is very true that the best material will show itself in time and that those who have the ability and the natural gift of business will eventually pull through as remarkable business men, but it is also true that they might reach that goal much sooner and much better equipped if the men who employ them at present would take enough interest in the upbuilding of not only the future of these young people but also their own present business to discover what sort of natural material there is working behind their counters and what can be made out of it. Why is it that great retail houses in a score of big cities maintain schools for their younger employes, lecture courses for the older employes and have frequent conferences with their heads of departments on stated and special subjects? Is it all philanthropy and personal interest? Not much. If we give that point of view all that is due it—and there is a great deal due it—we must consider that it is all primarily a matter of good business, of most excellent business, says the Sporting Goods Dealer. Out of it all, these big stores will develop more business men in five years than could "just grow" in 20 years. If they don't retain them for their own stores, they know the general good of the business world is enhanced through it all. This is what dealers should consider above all things.

HOW TO POLISH BRASS STORE FIXTURES.

Brass store fixtures, through handling or unnecessary cleaning, frequently become tarnished as the lacquer wears off, and attempts to brighten

up the dull spots or places by polishing make conditions worse because of the remaining lacquer, which must be entirely removed in order to give a uniform polish. If entirely removed or on a certain part, this must be kept polished frequently, which means more unnecessary work.

The dealer usually sends the tarnished part back to the makers, but this is unnecessary. The dealer can do the work himself if ordinary care is used in using the following solution: Gum shellac, dissolved in alcohol makes a thin varnish which is applied with a small brush; 10 cents' worth of shellac is enough to cover many fixtures and the work can be done in less than an hour.

THE VOGUE OF MOVING PICTURES.

A Revolution in Popular Amusement—Legitimate Productions Undermined—Moving Pictures Amuse the Crowds in Smallest Towns as Well as Largest Cities.

The Moving Picture Revolution is the apt title of a very interesting article which appears in the current issue of "Success," telling how the man at the crank has brought about a crisis in the theatrical business of America. It is a remarkable story in a way, for but few know how the legitimate theatrical business has been undermined, not merely in the larger cities, but in the leading towns throughout the country by the moving picture show which brings drama and amusement to the public at from ten cents to a quarter a seat.

Not since Gilbert and Sullivan brought into vogue the popular comic opera and thus revolutionized the drama has such a sudden and extraordinary change in the stage amusements of this country and of Europe taken place as is culminating this year, says this writer. The switch from the rigid drama of our granddads to the lighter, gayer, more fantastical musical representations of the present time was gradual and explainable. The hothouse development of the motion-picture industry was so inexplicable to the powers that be in the dramatic and musical comedy world, and was so nearly instantaneous, that not one of these mighty men had the acumen or the alacrity to climb aboard the band-wagon when it started. As most of them are business men rather than experts in the histrionic arts, and as everyone of them has had a dent made in his bank account by the motion-picture industry, they all regret sincerely that a lot of real estate men, grocers, delicatessen venders, ticket takers and stage hands rather than they, the lawful owners of the amusement field, recognized the value of a simple invention and the drawing powers of a sign reading "Admission ten cents: Orchestra seats a quarter of a dollar."

A Bad Season for the Theaters.

Has anyone told you or have you discovered for yourself that this is the worst season the stage has known in years? Were you aware of the fact that one of the most picturesque forms of theatrical entertainment we ever have had—the blood-curdling, hands-up-or-I'll-shoot melo-

drama—has all but disappeared from our midst? Do you know that during the six weeks prior to last Christmas more American theatrical companies disbanded for lack of business than disbanded during any mid-season twelve weeks in the previous history of our stage?

It's a horrible thing to say and it's a hard thing to understand, but it's a fact: a spool of photographic film projected on a white canvas from a humming picture machine has wrought more havoc to the arts of Sarah Siddons, David Belasco and Theodore Kremer than did Oliver Cromwell, the Iroquois Theater fire and the late financial panic combined.

This effect has been felt in several ways, and although you may take little or no interest in acrobatic snap-shots and may not be an habitual theatergoer, you cannot help being amazed at the decisive manner in which a clump of inventors and some sagacious business men, unused to the underground methods of theatricals, have put what is vulgarly known as a "crimp" into what Broadwayites term the show business and all its ramifications.

Extent of the Moving-Picture Industry.

To appreciate what has happened, is happening, and is likely to happen, you must understand something of the picture industry itself. There are at present between 11,000 and 12,000 motion-picture houses in the United States—auditoriums, big and little, where moving film photographs thrown on a screen are the main or only source of amusement. In New York alone there are approximately seven hundred. Chicago, Philadelphia and Boston each possesses upward of five hundred. In every little and big city, in every country, in every State in the Union, the picture machine has settled and is literally coining money. The beauty of the business is its simplicity. An empty store, some chairs, a white curtain, a machine, half a dozen films and a ticket taker are all that the impresario really needs. As his bank-roll and his ambition increase, he may find other means of spending money on his property, but even then he is limited. If he has anything like a good location and is not an idiot, he is bound to make more than he spends. To begin with, it is not necessary for him to buy anything save his machine, and he may rent even that.

The writer, in enumerating the theaters that have given up the legitimate drama and taken on moving pictures in the last two years, add that the motion-picture people are after the Academy of Music, and that for months a standing offer of \$90,000 rental has been held over the heads of the lessees, and the other day the temptation was raised to \$100,000—the biggest price ever offered for a legitimate theater in the United States.

How can they afford to pay such colossal sums? The answer is easy. Where it costs \$2,500 a week to operate the average first-class theater while a dramatic or musical piece is the attraction, the same house can be run nicely for \$500 with pictures as the offering. Excepting at holiday seasons, eight performances weekly is the limit in a theater where entertainments other than vaudeville prevail. In any motion-picture house twenty-eight "shows"—four a day—can be given. In many of them hourly exhibitions from eleven in the morning until eleven at night are the rule. Suppose the manager does throw in a few variety "turns" as extra attractions. If he has a good location and

an adequate knowledge of the tastes of his public, he cannot lose. That is why the owners of the Harlem Opera House, the best of all the New York playhouses north of the New Theater, were able to lease their property for five years at an annual rental of \$50,000. It is why the proprietors of five other "legitimate" houses—Circle, Majestic, Lincoln Square, Yorkville and Metropolis—none of which have been successful ventures in the past, have found an easy road to monthly dividends by turning over their handsome auditoriums to the men with the spinning reels of film. It is the reason why hundreds of the theaters throughout the country—whole circuits of them—have ceased to be homes of music and drama. It is why every business man is rapidly becoming an amusement magnate, and it is why hundreds of theatrical companies disbanded before the last season was half over, and left thousands of experienced actors and actresses out of work, with hardly a chance of obtaining histrionic employment for another year.

A DEALER'S VIEW OF SALESMANSHIP.

A Sporting Goods Man Offers Some Candid Opinions on How to Sell Goods.

I have seen a so-called salesman shake his head to a customer, saying, "We are all out," just because he didn't know his stock or his business. He was probably happy in the thought that he had gotten rid of one trouble, never thinking of the reflection on the house or the disgust of the customer. Learn to say "I have it," or "I will get it for you." On the other hand, I have seen clerks, by introducing goods other than those asked for, accomplish most satisfactory results. Make up your mind to be a salesman—not an order-taker.

This will illustrate what I mean.

You are standing in the front of the store, by the sweater counter. A customer asks, "Have you a 'Jimerack' air rifle?" You say, "No," and out he goes. Result—loss of sale and dissatisfied customer.

Just suppose you had answered, "I will show you our air rifles," and escorted the customer back to the counter where air rifles are sold. Result—you would probably have sold him a "Daisy" and made a satisfied customer. Impress this everlastingly on your mind, "Show the goods."

I have noticed some men meet customers with a "No" expression on their countenances before they know what is wanted. Others have a "Yes" look about them which attracts. The "No" man drives trade away; the other is a business-builder.

Salesmanship is a science and you can't master it unless you think and study and work.

Some talk a customer into buying and then talk him out. Others don't talk enough. There is no rule to follow.

Every buyer likes the close attention of a salesman and no two people can be handled exactly alike.

LOCAL VIEW CARDS IN DEMAND.

The local view card is the card that never goes out of style. Other cards have their day and are forgotten, but the local view is the backbone of the business, the cause of the business, in fact.

The National Colortype Co., of Cincinnati, O., are turning out better cards every year and increasing their output as fast as they can install suitable machinery. They can now deliver their high grade hand-colored card in two to three weeks. Ask them for samples and they will gladly send them, if you mention The Talking Machine World.

IMPORTANCE OF SELF-CONTROL.

When Manager Gets Excited He Loses Control of Employees—How One Irascible Character Got in Bad with a Customer.

The man who gets excited in the management of his business not only is liable to lose control of himself but he also burns up uselessly an amount of nervous energy that ought to be used to better purpose and advantage in the conduct of the business. Not only may he lose control of himself but he almost invariably loses control of his employes in such a way that they are careless of immediate consequences. During the rush of trade at a certain season a retailer acquaintance got excited over the incoming of so many people at once and endeavored to do managing to the extent of directing each clerk where to wait upon customers and when. One clerk took a particular customer to another counter than where he had been expected to serve the trade, because that customer was worth pleasing at just that moment. The retailer came along and found the clerk out of regular place and immediately began an excited mass of orders to the effect that he should leave his counter under no sort of inducement and customers must be waited upon by clerks at the respective counters where the goods were for sale. In a sense he was right, but he did not have reason enough at the time to tumble to the fact that he was making an ass of himself not only before that one customer but before all others who were within hearing. The one customer left the store in high dudgeon and the clerk went back to his counter with the feeling that he didn't care about results for the rest of that day at least. This retailer did the same thing on another occasion and allowed his voice to raise so high in making his directions and giving all his orders that it sounded somewhat like a megaphone on a baseball ground, says a writer in the Sporting Goods Dealer. All of which not only showed a disregard of gentlemanly behavior but had a grating effect upon the minds of the people who had witnessed and heard. Clerks were distracted and annoyed and assumed the attitude of "don't care," with the result that the retailer lost far more business than could have been gained by his hornet-like activity. Anything important enough to get excited over is important enough to handle calmly and with considerable judgment. What's the use of boiling over, anyway?

A man who has a natural personality that is attractive is to be envied. Just as the man who hasn't is to be pitied. But it is an ill wind that blows no one good.

Taking everything into consideration, I am of the belief that more men have been successful because of the work they did than because of the talents they inherited.

To Business Men

Business men
in every line admit
the value of good
trade papers.

A trade paper must be
original—it must contain a
variety of matter including news
service—technical information—in
fact it must crystallize the entire news
of the special business world, and be a
helpful adjunct to every department of trade.

Scan the columns of *The Talking Machine
World* closely and after you have completed an
analysis of the contents of this publication see if you
can duplicate its value in any other trade!

The World is a help to the talking machine
business.

It exerts an healthful optimism.

It wields an influence for the good and every man
who sells talking machines, no matter in what part
of the universe he may be located, should receive
this publication as regularly as it is issued. He is
missing a vital business point if he fails to do this.

Thousands of dealers not only in the United
States but in every country on earth consult the
pages of the *World* regularly.

They draw from the *World* pleasure and profit.

The talking machine business has a brilliant
future, and this publication is doing much to enlarge
the business horizon of every retail talking machine
man in the world.

To receive this paper annually costs but \$1.00.
All foreign countries \$1.25.

The best-known trade mark in the world

“The Victor talking machine’s design, ‘His Master’s Voice,’ has become a household word, and the quaint little fox terrier at attention before the horn is familiar to more Americans than any of the world’s great masterpieces.”—COLLIER’S, May 22, 1909.

THE PLEASURE
DOUBLED

THE COST
REDUCED

10 inch 65c. **DOUBLE RECORD DISCS** 12 inch \$1.00

Zon-o-phone Records are pre-eminently the BEST that money, brains, and a thorough knowledge of the art of sound recording can produce.

They are justly famous for their remarkably clear, natural tones, absence of scratch and wearing quality.

The greatest care is exercised in combining the selections, each side of the disc presenting the latest and best in popular music or standard compositions.

The price appeals to the masses, the quality to the classes, making them indeed a popular record at a popular price.

A new catalogue of Hebrew Single Side Selections has just been issued. Solos by Mme. Prager, Mr. Juvelier, Master Mirsky, the boy soprano, and other eminent singers. These are undoubtedly the most perfect Hebrew records ever recorded. 10 inch, 50 cents, 12 inch, 75 cents.

Resolve yourself, Mr. Dealer, into a committee of one and investigate these claims. Consider, criticize, compare. ZON-O-PHONE RECORDS will stand the test. A trial will verify all that we say.

The Talking Machine World

Vol. 6. No. 6.

New York, June 15, 1910.

Price Ten Cents

VALUE OF WELL LIGHTED STORE.

The Talking Machine Dealer Who Substitutes Light and Cleanliness for Gloom and Dust Is Bound to Win Out—Good Cure for the Blues—Trade Is Attracted.

The truth never grows old, and hence too much emphasis cannot be placed on the value of the well-lighted talking machine window or store. Travel in what city you will, you naturally gravitate to the clean, attractively arranged, well-lighted store. It is the magnet which holds the attention of the passer-by, and it is a splendid advertisement.

It is a subject which dealers should not overlook, and it is a subject which The Talking Machine World has dilated on time and time again. But it is worth emphasis—worth pounding away—because every subscriber converted to the value of a well-arranged store and a well-lighted window is a man who is destined to win greater influence in the business world.

The wise man never overlooks a good idea, and he looks to his trade paper for such assistance. The well-lighted talking machine store or show window never fails to burn into the memory of passers-by the things displayed and the location of the premises. It is the most effective means of attracting direct and individual attention. The public is served by very brilliant show windows. A purchaser finds no enjoyment in gloomy surroundings.

Light induces cheerfulness and cheerfulness means trade. If well served the purchaser returns—brings friends—sends others—becomes a living advertisement. With good illumination deception is impossible. Generous illumination carries with it the unconscious but positive conviction of fair dealing, honesty of purpose and a superior quality of merchandise.

MUSIC BY TELEPHONE.

Experiment Has Proved Successful in Wilmington—May be Tried Here.

"Hello, Central, give me the Sextet from Lucia." This request and similar ones may become common in New York and other cities if the experiment which has been found to be so successful in Wilmington, Del., is taken up. And if it is city folk may sit down to dinner made pleasant by the music of the world's masters.

The experiment is the coupling of the telephone and talking machine. From a central station at the telephone company's building the music is transmitted over the regular telephone wires and "voiced" at the subscriber's end through the customary horn.

The try-out in Wilmington has shown that there is an ever-growing demand for music among telephone subscribers. The music room at the exchange is a large chamber, around the sides of which is a switchboard. The room is equipped with a great number of talking machines and all of the latest records are on file.

When a subscriber wants music he calls the exchange and asks for this room. He tells the girl in charge what selection he wishes to hear, making his choice from a catalog which is supplied by the company. Then the subscriber affixes the horn to the telephone receiver, the music operator puts the desired record on a talking machine which is plugged into the subscriber's line, and starts the machine. At the conclusion of the music the connection is automatically cut off.

Arrangements may be made for an evening's entertainment this way, the program being made up in advance and submitted to the company by telephone, with orders to begin at a given time. Should two or more subscribers simultaneously want the same piece this can be done simply by connecting both lines to the same machine.

In Wilmington the company asks music subscribers to guarantee \$18 a year, the charge for records being from 3 cents for the regular records to 7 for those by the great operatic stars.

TALKING MACHINES IN SCHOOLS.

Big Field for the Dealer to Develop Prospects—How the Work May be Carried On—Petmecky Co. Place Victrolas in the Public Schools of Austin.

For years The World has been impressing upon dealers the wisdom of suggesting the use of talking machines in schools and other public institutions in their respective cities, towns and districts.

As an educator the talking machine has come in for a wide acknowledgment apart from its ability to interest and amuse. There is no reason in the world why talking machine dealers should not be able to influence their local aldermen, or other public boards to the end of having talking machines supplied to their high schools—in fact, to every public school in their district.

We are pleased to note that the Petmecky Co., of Austin, Tex., have recently succeeded in placing Victor Victrolas in the public schools of that city with a splendid assortment of grand opera records rendered by the famous artists of the day. Thus the very best of music will be featured with these schools, and thus a greater love for music generated.

Now this move of the Petmecky Co. is along the lines which we have long advocated, and we sincerely trust that dealers will get busy right away and include in their "prospect list" not only schools but public institutions of all kinds.

AN EMBRYO EDISON DEALER.

The subject of this sketch is Master John Durkin, of 2220 E. 82d street, Cleveland, O. There is nothing remarkable about the photograph, but the boy, who is eight years of age, has been an Edison admirer from infancy. When he was a puling baby in the cradle he used to cry—as most babies do—and nothing would pacify and comfort him but the phonograph. Every night he was ushered to dreamland by the strains of music emanating from the Edison. As he grew older, and ever since, he has been able to walk, he has operated the machine, disdaining assist-

MASTER JOHN DURKIN AND HIS EDISON.

ance, and during all that time has broken but five records. His one greatest amusement now is the phonograph. His parents have confided the entire care of the instrument, and selection of records, to his masterful judgment, depending on him to entertain their friends. As he grows older Master John will unquestionably become more enthusiastic, and the reader is likely to hear of him as the manager of some talking machine emporium, made popular by his ardent love of the business.

THE "TALKER" AS VOCAL TEACHER.

In Testing Voices of Candidates for Municipal Opera Company Several Aspirants Confessed to Having Secured Their Knowledge of Grand Opera from Talking Machine Records—This Points a Moral.

What is called a Municipal Opera Company is being organized in this city. Its organizers hope to make it resemble the municipal opera companies of Paris, Berlin and other European cities.

The solo singers are to be fifty young men and women who are employed in the city's department stores. The chorus will consist of 100 other young department store employes, who earn from \$6 to \$15 a week and who consequently can't pay music teachers to train their voices. The organizer of the company is Albert Mildenberg, a music teacher, with a studio on the thirteenth floor of Carnegie Hall. He is musical director of the Miss Ely's School.

The company will offer "La Boheme," "Pagliacci" and "Michael Angelo" in the first two weeks of next January, according to present plans. It will then go "on the road" for several weeks. It will return to this city and sing for two weeks more next April. Signor Bonci, the Metropolitan Opera House tenor, who is one of the movement's backers, has promised to sing at one performance.

Nearly one hundred candidates had their voices tested during the first couple of days of the trials, and in a number of instances the judges discovered voices of rare promise. Among the candidates was a poorly dressed girl who said she was going to sing an aria from "Trovatore." Something in her enunciation of the Italian words arrested Mr. Mildenberg's attention.

"Where did you learn to sing Italian music? Have you ever taken lessons from a teacher?" Mr. Mildenberg asked.

"I couldn't afford a teacher. I learned from a talking machine we have at home," the girl said.

Another voice, similarly trained, belonged to a young man who had what Mr. Mildenberg called a "great, big, ripping baritone." So anxious was this boy to study music that he hired a machine out of his earnings. He does not know the meaning of one of the Italian words he sings, but pronounces them correctly from catching them accurately as they come from the machine.

Thus we have another proof of the value of the talking machine as an educator.

ZACKEY TALKING MACHINE CO.

The Zackey Talking Machine Co., of Philadelphia, Pa., was incorporated last week with a capital stock of \$10,000. Those interested are H. W. Leslie, C. P. Yasker, of Philadelphia, and F. R. McCarthy, Claymont, Del.

WILL BE GLAD TO RECEIVE SAMPLES.

Frank Holden, who handles gramophones and other talking machine specialties at 100 Drake street, Rockdale, Eng., will be glad to receive samples, price lists, literature, etc., from American manufacturers, or jobbers in relation to any salable article in connection with that line.

CONTRIBUTES \$5,000 FOR HOSPITAL.

Among the largest subscribers to a fund for a new building for the West Jersey Homeopathic Hospital were the Victor Talking Machine Co., of Camden, N. J., who contributed \$5,000. The Victor Co. have always been noted for their liberality in matters of this kind, and the hospital authorities have expressed their appreciation of this handsome donation.

TRADE ON THE PACIFIC COAST.

Talking Machine Business Makes Excellent Spring Record, Especially in Wholesale End—Country Business Strong—Expect Lively Summer—Clark Wise & Co. Adopt Club Plan of Selling Machines—Pacific Phonograph Co. Progress—Holmes Music Co.'s New Store—Department in Eilers New Spokane Store—Bacigalupi in the East—Personal Items of Interest—General Summary of the Month's News.

(Special to The Talking Machine World.)

San Francisco, Cal., June 6, 1910.

The talking machine business for the spring seems to have run considerably ahead of other lines of the music trade. City retail business has been rather quiet with most of the houses, but even here the total for the spring months runs ahead of the total for the same months of last year. It is, however, in the wholesale end of the trade that the best showing is made. One leading wholesale house claims to have out-distanced all previous seasons in the number and value of talking machines and records sold during the last three months. This showing is due chiefly to the wholesale sales, and to the country wholesale business in particular, as the city sales, while better than last year, have not been heavy.

During the summer months a similar state of affairs is expected. The vacation season is only a short distance off and this will naturally cause a drop in city trade, while stimulating the demand at the summer resorts and at a considerable number of interior points. Some of the city retailers are, however, working up quite a little business just now and are confident of a good run for a few weeks, at least.

Clark Wise & Co., of this city, began this week with the advertising of a club plan of selling talking machines somewhat along the line of a recent piano sale held by them. The incorporation of the business with a capital stock of \$250,000 has just been accomplished, the official completion being effected by the filing of papers this week. Besides Clark Wise and R. A. Wise, the incorporators are Clarence Jellison, J. F. Thompson and L. F. Beedy.

The furnishing of the new wholesale depot of the Pacific Phonograph Co. in the Bass-Hueter building on Mission street, in this city, is proving to be a large job. A good portion of the company's stock is in and several miles of shelving is completed, but the big loft is still far from furnished as it is to be. The company, who are to

job the Edison goods, still have 50,000 Edison records in their Oakland establishment, and still have their office in the Bacigalupi building. Manager A. R. Pommer, of the company, is hoping to open the new month with the removal practically completed, though with a lot of work still to be done. A few days ago a large shipment of Amberolas and other Edison goods arrived at this city via the Tehuantepec half-water route. The fact that this shipment came in in less than a month, or practically on railroad time, may lead to a lot of shipping being done in that way. Mr. Pommer is still determined to make his stock of machines and records the largest on the Coast and it may now be found necessary to take even additional space, in spite of the large loft already occupied.

The Tacoma store of the Eilers Music House has been making a drive on talking machines during the last few days. This house plays no favorites and is offering Victor, Columbia and Edison goods, complete stocks of machines and records of all three lines being carried. Their half-page advertisements this week have been headed: "Grafonola, Amberola, Victrola."

The Holmes Music Co., of 422 South Broadway, Los Angeles, Cal., have opened their new store to the public and are now reporting a lot of business. This house was formerly at 113 South Spring street.

It develops that the talking machine department of the Spokane (Wash.) branch of the Eilers Music House will be well cared for in the new six-story building for the company, which was started early this month. The main talking machine business will be done on the first floor of the building, and ample show space and window space will be provided. The wholesale department will be on the third floor. The new building will be 75x33 feet. The tearing down of the old building will be started in a few days. During the tearing down of the old and the construction of the new building, the company will be temporarily located on Sprague avenue near Stevens street. Here the talking machine departments will be rather crowded, but will be able to turn out a lot of business.

Peter Bacigalupi, the San Francisco dealer, and Leon Douglass, vice-president of the Victor Talking Machine Co., have left for the East on a more or less extended trip. Mr. Bacigalupi is going on a business trip and will look after the talking machine, as well as the other departments of his business. The recent selling out of his wholesale business in Edison goods has left him quite free in the talking machine field. Mr.

Douglass, whose home is in San Rafael, in this State, is going East, more on a visit than on business.

The boys of the Victor department of Sherman, Clay & Co. are trying to make a record during the absence of A. G. McCarthy, as a sort of a wedding present for him on his return. Mr. McCarthy was married a few days ago and is now in the East on a wedding trip. He is expected to be absent for several months, and as he, aside from his duties as a director of the company, takes an especial interest in the talking machine department, the force is anxious to make a good showing.

W. S. Gray, of the Columbia Phonograph Co., has returned from a short visit to the company's Los Angeles house. He found the Los Angeles branch doing a splendid business, both wholesale and retail, and is convinced that the present season in the southern part of the State will show a new high level in the sale of Columbia machines and records. Mr. Gray is beginning to think about vacations, and will start for the mountains for an outing before very long. The new store at 334 Sutter street is now running smoothly, and is proving quite generally satisfactory.

Mr. Scott, assistant manager for the San Francisco house of the Columbia Co., will leave for Sacramento and the central part of the State this week for a stay of a couple of weeks. At Sacramento the wholesale Columbia business is handled by Kirk, Geary & Co., prominent wholesale druggists.

Kohler & Chase have given additional space on the ground floor of the big O'Farrell street building to their Columbia department and have had the satisfaction of increasing their sales very materially in consequence. So far, this season, the business in this department has just about doubled month for month, as compared with the business of last year. A fine exhibit during the present week has attracted a lot of attention.

The Simon Piano Co., of Spokane, Wash., have begun work on the new music store in that city. The new store will provide amply for the talking machine department, and when it is occupied the company will be in better shape than ever to care for the talking machine and small goods business.

A MULTIPLEX PHONOGRAPH

Invented and Manufactured by Geo. Gomber—Operator Has Choice of Dozen Records—Some of the Features.

About three years ago George Gomber invented a new form of multiplex phonograph, which he has since manufactured, in a small way, for the trade of this country, having disposed of the patent rights in Canada and Germany some time ago.

The machine is especially designed for use in arcades, cafes, etc., and is coin-operated, the power being gained from a spring motor wound up with a crank. A dial is provided bearing the names of twelve selections, and after the coin is placed in the machine, a pointer may be moved to the selection desired, a push on the handle starting the mechanism.

Numerous advantages are claimed for the machine. In the first place, instead of having only one selection, the customer has his choice of twelve selections. The ordinary phonograph records can be placed in and taken out at will. There are also two sets of ear tubes, and a person dropping a cent can not only use one set of tubes, but on the opposite side is the other set, which can be placed in the ears of anyone desired. On the top of the machine is also the ordinary horn. In case the person dropping a penny prefers to play the music or song so that all in the room can hear it, it can readily be arranged by just changing the sound from the tube to the horn.

For you to be cheerful may not take the grouch out of every customer that comes in, but it may take an extra dollar out of his pocketbook.

EASTERN CO. SERVICE

IS THE KIND THAT GETS THE GOODS INTO YOUR HANDS WHEN YOU WANT THEM

Popular Records in the height of their demand, not after your competitor has supplied the demand. Try Eastern Service. Once Tried, Always Used.

Write us for samples, descriptive circular and prices of

THE EASTERN TALKING MACHINE CO.

177 Tremont Street

BOSTON, MASS.

DISTRIBUTERS OF EDISON AND VICTOR MACHINES, RECORDS, SUPPLIES

A "tip" for you on summer business

Get all the good you can out of your summer business. Tell the people in your neighborhood how the Victor can be used during the summer months.

Impress on them that the Victor is the best entertainer for summer homes; that the Victor is just the thing for club houses; and don't forget to drive home the fact that the Victor takes the place of an orchestra for dancing.

Throw out the suggestion to campers and yachtsmen that they should have a Victor on their outings, and see if they don't take to your hint.

Keep right at it, and you'll do a hustling business throughout the entire summer—and have a bigger bank account at the end of the season.

**The Columbia Grafonola "Regent"
at \$200 is the surest prestige-and-profit
feature ever displayed in a talking-
machine window: a library table and a
concealed-horn talking machine—com-
bined value \$250 of any man's money.**

Columbia Phonograph Co., Tribune Building, New York.

PHONOGRAPH INFLUENCED JURY.

**It Is Claimed by Lawyer Who Asks Pardon for
Convicted Man Because They Heard "Lasca"
Before Bringing in Verdict.**

(Special to The Talking Machine World.)

Sedan, Kan., June 1, 1910.

Did the plaintive tones of "Lasca," a dramatic recital, reproduced on a phonograph, influence a jury of twelve "good men and true" to bring in a verdict of guilty against Robert Moore and send him to the penitentiary for killing his neighbor, Frank Berree?

Judge Aikman, of the District Court, held that the phonograph had nothing to do with the verdict, and when the case went to the Supreme Court that tribunal said the same thing and sustained the lower court's refusal to grant a new trial.

The friends of Moore, however, refuse to be satisfied and are now circulating a petition for his pardon from the penitentiary at Lansing, where he went one year ago to begin a ten year sentence. These friends assert that if the jury-men had not heard the phonograph they would never have convicted Moore.

Moore and Berree lived on adjoining farms in the north part of this county. Their children quarreled at school and the parents took up the battles of their children. One word brought on another one morning in May, 1908, when Moore met Berree in the public road. Then another farmer drove up with a load of corn and, seeing two neighbors quarreling, persuaded both to move on. It looked as if there would be no more trouble, when Berree suddenly turned his horse and rode back toward Moore. Moore believed Berree was going to shoot him, he says, and shot first. Berree fell dead in the road.

The case was hard fought. Half a dozen lawyers were hired by each side. Several of the lawyers had spoken when the court adjourned. After the jury had supper they started down the street and passed a jewelry store from which the sounding horn of a phonograph protruded through the window.

One jurymen proposed that all stop and have some music. They did so, and the first and only selection played was "Lasca." This is a pathetic recital with musical accompaniment. It tells of the death of a beautiful Mexican girl in a cattle stampede. It is a selection calculated to bring tears and heart throbs. The jury listened to it and then returned to the courtroom, where the final plea for the State was made. The lawyer was at his best and he followed the strains of pathos that "Lasca" had already started. The jury retired and brought in a verdict of guilty in the second degree.

When the motion for a new trial was being argued the attorneys for Moore had the phonograph brought to the courtroom and the selection played for the court. The motion for a new trial was denied. The case was carried to the Supreme Court. The phonograph "record" was filed with the papers in the case and the attorneys offered

to have it played in the Supreme Court room, but the judges were willing to take the word of the lawyers for it, so it was not used. The lower court was sustained.

When Moore heard of this he came to Sedan and offered to go to Lansing alone to begin his time. His friends are working hard now to get him pardoned.

TRADE IN THE SAINTLY CITY.

**Business in Excellent Condition—Aeolian Co.'s
Handsome Victor Department—Entire
Sales Force of St. Louis T. M. Co. Retained
—Big Columbia Co. Increase—News of the
Travelers—Trade News of the Month—In-
teresting Personalities.**

(Special to The Talking Machine World.)

St. Louis, Mo., June 6, 1910.

The talking machine business for the month of May has been quite active, and the general trade reports show that the conditions are good.

As it had been announced some time before, on May 31 the Aeolian Co. branch of this city took over the St. Louis Talking Machine Co.'s interests here. Your correspondent has just inspected the handsome new Victor talking machine department established by the Aeolian Co., and it is certainly most attractively arranged. A large Colonial stairway goes from the first floor direct into the department, the decorations of which are most tastily carried out in white and gold. There are five soundproof booths with record cases running the entire length of the rear, being accessible from each room. The booths are painted on eggshell white and the walls are decorated with a gold-tinted burlap. This department makes a very elaborate addition to Aeolian Hall, the furnishings of which are carried out in Mission.

The entire sales and office forces of the St. Louis Talking Machine Co. have been retained by the Aeolian Co., and the same efficient service will be given their patrons. O. A. Gressing, late manager of the St. Louis Talking Machine Co., will remain with the Aeolian Co. until about August 1, thoroughly posting J. A. Honea, manager of the Aeolian Co., regarding the details of the department, when he will leave to accept an important position at the Victor factory.

E. B. Walthall, manager of the Columbia Phonograph Co., reports an increase of nearly 100 per cent. in the total business of this branch in April as compared with April of 1909, and that the May trade will show as great an increase. Mr. Byars, sales manager of this concern, sold to Mrs. P. S. Marquis, 5427 Waterman avenue, this city, one of their superb fumed oak Regent grafonolas, which was shipped to Philadelphia as a bridal present to her son, P. S. Marquis, Jr., who will be married to a young lady resident of that city on June 10.

Chas. Kauffman, traveling salesman for the Columbia Phonograph Co., spent May 13 and 14 here, leaving on the 15th for a trip through Central and South Missouri.

W. C. Fuhrl, western district manager of the Columbia Phonograph Co., and C. W. Smith, manager of the Kansas City store of the company, spent May 11 here. W. E. Heath, assistant manager of the company at Kansas City, and his wife, spent Decoration Day here. Mrs. Elmer C. Murtry, wife of the manager of the Pittsburg, Pa., store of the company, spent the month of May visiting her mother in St. Louis.

Marks Silverstone, of the Silverstone Talking Machine Co., reports an excellent business for the month of May, both wholesale and retail. He reports an extra good demand for Amberola machines. Mr. Silverstone will attend the National Talking Machine Jobbers' convention at Atlantic City, N. J., in July. Miss Blanche Silverstone, sister of Marks Silverstone, and an attache of the office force of the company, was married to Chas. Aronberg, a prosperous young jeweler of this city, on May 26.

The Thiebes Piano Co. report their talking machine business for the month of May as being fair, with the best demand for high-class machines. They sold a Victor Auxetophone to the Budweiser Rathskeller, one of our prominent cafes.

F. Denizet, a Columbia dealer of Perryville, Mo., spent two days here recently.

D. K. Myers, the well-known Zonophone jobber, reports having had a fair trade during May and looks for an improvement in June.

The Koerber-Brenner Music Co. report having had a good trade during May. W. A. Brenner, secretary of this concern, returned recently from a two weeks' western trip.

Miss Sadie Rosenblatt, manager of the talking machine department of the J. H. Buettner Furniture & Carpet Co., reports a fair degree of activity for the month of May.

WINS GERMAN RECOGNITION.

**Columbia Co.'s European Headquarters Receive
Big Order for Dictaphones and Cylinders
from the German Post Office Department—
Used Also by the English Government Of-
ficials.**

The Columbia Phonograph Co., General, has just received news from the European headquarters that the German Post Office Department has placed an order for a large supply of Dictaphones and several thousand cylinders, to be used in the Post Office Savings Bank Department. The British Post Office, as well as a number of other Government Departments, has been using Dictaphones for several years. So have a number of British Cabinet Ministers and ex-Ministers. Prominent among these are the Rt. Hon. Winston Churchill and the Rt. Hon. A. J. Balfour. Dictaphones have been used extensively in the American Government service for many years past.

When you put in a display window, let the display be complete so far as one line is concerned, but do not attempt to show a variety of stock representing all the departments of the business.

WITH THE TRADE IN SAINTLY CITY.

Taking on of Victor Line by Aeolian Co. Arouses Interest—Voluntary Dissolution of Salm Talking Machine Co.—Groene to Feature Edison and Victor Lines—Cabinet Machines in Demand—Milner Musical Co.'s Active Business—Summary of the Trade News of the Month Worthy of Record.

(Special to The Talking Machine World.)

Cincinnati, O., June 8, 1910.

One of the principal developments during the past month in the local talking machine world was the announcement that the Aeolian Co.'s local branch was to handle the full line of Victor goods. Another feature, if such it can be called, was the voluntary dissolution of the Salm Talking Machine Co., 538 Main street.

On or before July 1, 1910, the Aeolian Co.'s new department will be in full swing, according to Manager W. O. Black, who has engaged Louis Ahaus, for seven years identified with the Wurlitzer Co.'s talking machine force, to take charge under the former's direction. Mr. Ahaus is fully conversant with the business, and the Aeolian people believe he will make good. The latter house has plans for fixtures which will be quite a departure in the talking machine business. The framework will be white-enameled, with mahogany doors. There will be three booths in a space 24 feet square and in the rear or to the north will be the file cases where the full Victor line of records will be installed immediately. The talking machine department will take off a slice of the manager's office and the rest of the space in the rear of same.

The Salm Talking Machine Co. ceased business without an obligation, it is said. All the new goods were returned to the factories and the smaller dealers bought that which was left. J. Salm, the proprietor, who was in the talking machine field for seven years, has no definite plans for the future. It is possible that he may go into the automatic machine field in the fall. Salm was located on upper Vine street until January 1, on which date he moved to 538 Main street. For a time he appeared to be doing good business, but early in May the entire neighborhood suffered from lack of patronage, several miscellaneous dealers telling Salm they could make more money by keeping their doors closed.

J. C. Groene, the Race street dealer, is going to make a specialty of the Victor and Edison lines. He cleaned up his shelves of all other stock on June 1 and intends to give this department more systematic attention. Business there during May was not very good.

The suit of the Rudolph Wurlitzer Co. against J. E. Poorman, respecting a question of discount, which was filed last year, was set for hearing last week, when the case reached the top of the calendar. It, however, was not tried, having been postponed until October.

Manager S. H. Nichols, of the Columbia Phonograph Co., in a chat with The World representative, said: "Business continues good in both retail and wholesale departments, showing a very substantial increase over the business of this time last year. The Grafonolas of all types are in great demand, and it is simply impossible to receive sufficient Grafonolas to fill our orders.

"Marion Dorian, our auditor, of New York City, spent several days with us the last week of May, and seemed to be well pleased with business and general conditions.

"The number of exclusive Columbia dealers being signed up is very gratifying, and our territory is being rapidly covered by exclusive contracts."

Four Victrola sales in a single day was the record mark in May for the Milner Musical Co., honors for three of the deals being carried off by Lloyd Kieffer, formerly of Charleston, W. Va. "This is quite a spurt for Victrolas," remarked Manager W. W. Timmerman, "considering the anticipated approach of the off season, but shows that with the proper 'hustle while you wait' idea before you, each month shows an increase which we always look forward to.

"We recently sold," he continued, "an Amber-

ola in Pineville, Ky., which adds another sale to our long list of Amberola customers. We find the grand opera list becoming more and more in demand, and attribute the purchases of the Amberolas principally to the increased sale of the higher-class records. One helps the other, and we are 'pushing the one that helps.' Trade in general is satisfactory, and I believe June should be equally as good as May."

The Rudolph Wurlitzer Co. report that the talking machine business during the month of May was satisfactory, but nothing extraordinary. The wholesale demand for Victor Victrolas was above the average established during the months of March and April, but the record business was light in comparison with the large number of machines sold.

A steady demand for Amberolas has been experienced during the entire month, showing that the Edison dealer is fully alive to the possibilities offered in this machine, and the demand has ready been felt for a machine used in summer homes and in camps, and a number of outfits have been delivered at distant points.

The Victor Victrola No. 16, although a very bulky article, seems to be selected as the proper machine for fashionable resorts, and the sale ranges from the highest grade Victor to the cheaper styles, which find their way into the more humble country homes, and river camps.

There is every probability of an active summer campaign in this territory. A healthy sign is the fact that dealers are reordering Amberolas and Victrolas in spite of the lateness of the season, and it stands to reason that with the smaller dealer enthusiastic, the large dealer will have necessity in giving the business his usual energetic support.

MARCONI'S LATEST.

Marconi will shortly begin a series of tests in throwing electric waves charged with messages over the Rocky Mountains to the Pacific coast. If perfected, it is believed it will save great prop-

erty losses to telegraph poles and wires along the railways in the West. It is also declared practicable to communicate with moving trains by wireless.

VICTOR FOR NEVADA HOSPITAL.

The State Hospital for Mental Diseases Buy Machine from the Emporium of Music at Reno—Why Arthur Holgate Is Pleased.

(Special to The Talking Machine World.)

Reno, Nev., June 1, 1910.

Arthur L. Holgate, manager of the Emporium of Music, handling Victor and Edison machines and Victor, Zonophone and Columbia disc records, as well as musical merchandise and sheet music in this city, is enthusiastic over the talking machine business in this section. His house has just supplied the Nevada State Hospital for Mental Diseases, otherwise known as the Insane Asylum, with a large Victor V machine with oak horn and a quantity of records. The officials of this State hospital claim that music has proven to be beneficial other than simply as an entertainer. During the serious stages of the inmates, when their minds are overworked by thoughts upon one particular theme, if the proper music is played for them, it has a soothing effect and will oftentimes subdue a patient when everything else fails. For the pleasure end of it the asylum has a fine auditorium, where every Saturday night visitors are allowed to witness the patients dancing, and after they are through then the visitors are allowed to take the floor. Although some of the inmates are musically inclined, there being several fine violinists and pianists among the inmates, who oftentimes furnish music for dancing, the playing of the Victor is looked forward to by all.

The Emporium of Music feels quite proud in making this sale for the simple reason that the Nevada State Hospital has done them the honor of providing this Victor machine, instead of sending to the East or to the Coast.

Learn Spanish, French, German, or Italian

The I. C. S. System of Language Instruction by the phonograph method makes easy the mastering of a foreign language and appeals with compelling power to thousands. The dealer in phonographs that does not carry I. C. S. Language Outfits is neglecting a quick and sure way to increase his business. The new \$35 Language Outfit of the I. C. S. is a marvel. It represents the highest art in the teaching of languages, and embodies a method that has won the warmest praise of thousands qualified to speak authoritatively. The Spanish, French, German, and Italian Embassies at Washington, as well as the leading colleges, have cordially indorsed the I. C. S. Method of teaching languages.

The I. C. S. Language Outfit consists of an Edison Gem Phonograph made especially for language work; 14-inch brass horn; special hearing tube; recorder; reproducer; speaking tube; winding crank; camel's-hair brush; blank cylinders on which to make phonographic recitations; and 25 Conversational Records, teaching pronunciation guaranteed to be absolutely correct, with native intonation and inflection. In addition to these Conversational Records there are pamphlet Instruction Papers teaching the theory of languages. The new Outfit is the best and cheapest ever offered—the price being only \$35.

If you want to increase your business, write today for full particulars.

NEW YORK, JUNE 15, 1910.

TRADE conditions improved somewhat during the month of May and our reports indicate that in many sections of the country the trade record is ahead of that of the corresponding months last year.

The talking machine trade is certainly undergoing changes. That is apparent to anyone who gives the industry close study.

The number of men engaged in selling talking machines is lessening rather than broadening.

A number have not succeeded in making a success out of the business.

Their failure has been due largely to their own inability and indifference and, of course, accentuated by reason of the poor business conditions for the past two years.

We are, however, retaining in the trade a better class of business men, for by a steady process of elimination the better ones are bound to remain in the game, and the smaller non-progressive ones will be eventually weeded out.

It is a case of the survival of the fittest, and the fittest in this instance will be the men who have faith in the future of the business and who are willing to back their faith with good hard work and money investments.

The man who has nothing at stake in any business can be pretty safely counted upon as a failure unless he be a rare type.

The talking machine is steadily coming into its own and is now being sold as a staple rather than as a novelty.

In other words, it has marvelous powers, arousing admiration just the same as in days ago, but it does not create the wide-spread surprise which was manifest everywhere a few years ago. It is becoming a steady selling commodity and so it will remain.

The business will fluctuate according to the emphasis placed upon it.

Changes will be made, for this trade as well

as all others must conform to the resistless laws of change.

The talking machine men must make their establishments interesting, as anything that attracts the public to the store helps to get the people to trade there.

That is advertising and the most valuable kind of advertising a man can have.

Talking machine men must figure to interest the public.

The more interest that can be aroused and sustained the better it will be for everyone.

JUDGING from the program which the talking machine jobbers have outlined for the meet next month at Atlantic City, an interesting time is in store for members who will journey to that fascinating spot for Convention purposes.

Secretary Roush and his confrères have been hard at work for the past few weeks getting things in shape and from special information which is imparted to The World we feel confident in predicting an interesting Convention.

A number of important business matters which have a direct bearing upon the trade are scheduled for discussion, and then there is the social side which makes a very pleasing diversion, and, so far as athletic amusements go, there is a baseball game planned between the Eastern and Western jobbing contingents.

That struggle for athletic supremacy alone will be worth going a long ways to witness.

The secretary, while discussing the plans recently with The World, stated that from data which he had received he predicted a larger gathering in point of attendance than last year, which, by the way, reached the high water mark so far as Conventions go in the talking machine industry.

It is certain that the jobbers manifest a deep interest in their organization, which now seems to have become a permanent factor in the industry.

IN every trade there will always be a few who remain aloof from participating in association work, but, as long as any organization works along lines which tend to trade uplift it should be warmly supported.

The jobbers are working with the manufacturers to promote trade welfare and certain recommendations which they have made have been pleasantly received by the latter.

When business men get together and discuss trade conditions in a serious and sensible vein, cutting out abuse and threats, it may be presumed that good will come from such considerations.

At least that has been the history of trade associations in all lines.

Piano dealers, many of whom handle talking machines, held a Convention in Richmond, Va., last month.

In many respects it was the most interesting convention gathering which had taken place for years in the music trade.

In fact, the piano manufacturers and piano salesmen held their Conventions in the same city and at the same time so that there should be no break between sessions.

For months The Music Trade Review has urged the piano dealers to take some definite action regarding the plan of selling

pianos by guessing contests, issuing coupons, certificates, etc.

The development of schemes, whereby the public have been offered beautifully embossed certificates for the solution of some alleged puzzle which a child of six years could decipher in a minute and a half, has grown to such an extent that it has threatened to destroy the confidence of the public in piano values.

In this connection we may state that many of the concerns which have issued these certificates would not give the price of a postage stamp for them when presented at their stores, and yet they have been used simply for the purpose of fooling the public.

In many instances the prices on pianos have been marked up so that when the certificates were applied upon piano sales there would be actually no saving in cost to the purchaser.

These plans have been worked in nearly every city in the United States.

The Music Trade Review was the only paper in the piano industry which took a positive stand against these methods of selling pianos.

Interest was stimulated in all sections of the country and the piano dealers passed resolutions requesting its members to aid in the crusade against the use of such certificates in piano selling.

The result of this action on the part of the Association will have a wide-spread influence in checking the coupon certificate method of piano selling.

ON account of price contracts in the talking machine trade the conditions are such that it is not probable that similar methods could be employed for the sale of machines, yet, we can see possibilities whereby this certificate plan might be used, and, if this evil should rear its head in the talking machine trade the Association would stand ready to deal it a crushing blow at the start, as one can never tell just what conditions may arise whereby the aid of a powerful organization is needed for trade protection.

An organization cannot be immediately called into active being, therefore, if the jobbers live in a state of preparedness, and are always keenly alert to meet contingencies which may arise from time to time, they occupy the same position as a police force.

They become at once a menace to the evildoer and whenever trouble arises at any point they are in a position to exert a strong influence to right the wrong.

It is difficult sometimes to trace just what should be credited to the combined work of all, but it is certain that if we study conditions in all trades we will find that great good must be credited to associated effort.

The cleaner lines upon which business may be conducted works to the advantage of every man in the business and the reforms in the credit system operate to the advantage of all.

There are many things which should be seriously considered by those who have interests at stake, and we know that the jobbers at Atlantic City have planned to consider a number of matters which have a direct bearing upon the talking machine affairs.

THERE has been some discussion in trade circles as to who will be elected the next president of the association. The Eastern men say that the honors should come into Eastern territory this time, as since the association was formed at Buffalo the chief executive position has been held by Western jobbers.

There is no sectional feeling shown in the matter, but the Eastern jobbers feel that the different sections of the country should be represented and that the honors should go round.

Splendid work has been done for the organization by men in the East, and there is good presidential timber in this locality.

A LIVE TALKING MACHINE MAN.

O. A. Gressing, Long in Charge of St. Louis Talking Machine Co. and Now With Aeolian Co., Has Made Enviably Record as Manager—To Remain with Victor Co. Forces.

(Special to The Talking Machine World.)
St. Louis, Mo., June 10, 1910.

We present herewith a very good likeness of O. A. Gressing seated at his desk, and who, up to the first of June, had charge of the St. Louis

O. A. GRESSING, SNAPPED SITTING AT HIS DESK.

Talking Machine Co., which was purchased by the Aeolian Co. Mr. Gressing has made a most enviable record while manager of this company, and the Victor dealers in his territory are expressing their keen regrets at his leaving. Mr. Gressing has established a reputation as one of the "live wires" of the talking machine trade, and with his very able advice and counsel has helped many a dealer over the rough places. His enthusiasm and zeal for the Victor was contagious and instilled in the dealers an ambition and aim that they found easy of attainment by following him.

At the request of General Manager Geissler, of the Victor Co., Mr. Gressing will remain with the Aeolian Co. until Mr. Honea, the new manager, feels that he has the reins of the new department firmly in hand. This is a splendid arrangement, as the retail and wholesale experience of Mr. Gressing has been of such wide scope that his admirable assistance and coaching to Mr. Honea will prove inestimable.

The many friends of Mr. Gressing will be pleased to know that he will remain with the Victor Co. Preparations are on foot among the dealers of the Southwest to tender a banquet to Mr. Gressing when the time comes for him to leave the St. Louis field.

TRADE ACTIVE IN NORTHWEST.

In Better Condition Than Ever Before—Dealers Make Excellent Reports—Minnesota Phonograph Co. in New Quarters—W. J. Dyer & Bro. Concerts Popular—Other News.

(Special to The Talking Machine World.)
Minneapolis and St. Paul, June 5, 1910.

Trade in talking machines is flourishing in St. Paul and the entire Northwest as it never has since the days when the Edison phonograph was first exhibited in these parts as a wonderful curi-

osity. All dealers report a substantial increase in sales, in the retail way and a most satisfactory growth in the jobbing trade.

The Minnesota Phonograph Co., Lawrence H. Lucker, president, recently took possession of a three-story building at 519 First avenue South, Minneapolis. It is about 160 feet long, the first floor being used for retail business, the second and third for wholesale, and the basement and two-story warehouse in the rear for storage and workshop. Twelve sound-tight demonstrating rooms, tastefully furnished, give fine opportunity for purchasers to hear talking machines to advantage. Mr. Lucker reports trade exceedingly good. Victrolas for the summer homes at Lake Minnetonka and other lake resorts are increasing in popularity.

The Victrola and Amberola concerts begun by W. J. Dyer & Bro. before the grand opera season proved so popular that they have become a regular event. The concerts are held semi-monthly and are doing good work in educating the public to the real merits of the once despised machines.

The Columbia Phonograph Co.'s Northwestern branch has had an excellent spring trade. Jay H. Wheeler is more than gratified over the substantial enlargement of the retail sales in Minneapolis and St. Paul, as well as the business that is obtained from the rural sections. The Dictaphone is winning its way in the larger law offices and mercantile offices, where it is regarded as a necessity, rather than as a convenience.

COLUMBIA WITH GALESBURG CO.

The Piano House of Galesburg, Ill., Will Conduct an Exclusive Department Devoted to Columbia Machines and Records—Scheuber Drug Co. Become Columbia Jobbers.

(Special to The Talking Machine World.)
Chicago, June 3, 1910.

The Columbia Phonograph Co. have consummated arrangements with the Galesburg Piano Co., of Galesburg, Ill., whereby the latter will conduct an exclusively Columbia talking machine department. This is the result of the activity of the Chicago organization of the Columbia Co. and the general campaign being carried on in the interest of the piano trade. The order received included machines of all types of Graphophones as well as Grafonolas and a large assortment of records. The Columbia line is rapidly being identified with the piano trade, many progressive piano concerns realizing the advantages of being connected with the talking machine business.

E. C. Plume, western wholesale department manager of the Columbia Phonograph Co., with headquarters in this city, has left his office for several days and gone on a trip which will include Minneapolis, St. Paul, and Livingston, Mont. While at the latter point he will call on F. A. Scheuber, president of the Scheuber Drug Co., exclusive Columbia jobbers for the State of Montana.

IMPROVE YOUR SYSTEM
AND
INCREASE YOUR RECORD SALES

BY USING
THE BLACKMAN CYLINDER RECORD TRAY

(Patented Dec. 28, 1909.)

A Record Tray With Record Label for Less Than One Cent

The BLACKMAN Folding Trays for Cylinder Records are shipped FLAT and can be FOLDED into STRONG TRAYS in a few seconds, as shown above. This tray, with Rapke Label, makes a handsome looking record stock and a system you can't beat. The labels act as Silent Record Salesman and the customer can point to the record he wants to hear. Adopt this system and your sales will not only increase but it will never take more than a few minutes to make up a Record order.

THE BLACKMAN FOLDING TRAY USED IN THE SYRACUSE WIRE RACKS enables you to carry a large stock in a small space, and also use the Rapke Label. We furnish wire racks at regular prices, either wall or revolving style, with opening to accommodate Blackman Trays. Write for prices.

The New Phonograph Instant Response

U-S Phonola, Model A

U-S Opera Model

U-S Phonola, Model B

SELDOME, if ever, in the history of the music trade has an event aroused such universal interest as the introduction of the U-S Combination Phonograph and U-S Everlasting Record.

This interest, unmistakably manifested at our recent demonstration at Richmond and expressed again in hundreds of letters from every section of the country, is the direct result of one big fact—that U-S Phonographs and Records have an actual superiority over any other machine or record the trade or the public has ever seen or heard.

This is a broad statement, but we can *prove* it. We can prove that the U-S line stands unapproached in *convenience of operation, quality of tone production and indestructibility of records*. In this machine and record all the mistakes of the old-line machines and records have been corrected, and in correcting them we have produced a **NEW** instrument, built on **NEW** lines, **NEW** in its mechanical simplicity and artistic musical performance.

The first of the many advantages that are sweeping the

U-S Combination Phonograph

into instant popularity is the **AUTOMATIC-CHANGE REPRODUCER CHANGE**, by which, with a simple twist of a shift key, it is automatically and instantly adjusted to play either a two-minute or a four-minute record. The convenience of this device can be appreciated only by one who is acquainted with the old style and troublesome method of disconnecting the horn, removing one reproducer and fastening on another, then the inconvenience of shifting mandrel gears to change the speed.

In the U-S all this is accomplished in a fraction of a second by a touch of the thumb and forefinger. Nothing could be simpler or more convenient, yet no other phonograph on the market has this remarkable improvement.

IN THE MOTOR OF THE U-S MACHINE, we are offering a device absolutely unique in its simplicity, long-running quality and unusual power. It embodies the nearest approach to positive noiselessness yet reached in phonograph construction. Its ample power insures a smooth, evenly-balanced action, and in addition the U-S is fitted with a pulley balance wheel, another exclusive feature, and *absolutely the only means of insuring a reproduction true to pitch*.

THE DIAGRAM OF THE U-S is much larger than any heretofore used and being made of an extraordinarily sensitive material it has marked superiority as a "voicing" instrument, particularly in bringing out delicate musical detail.

The point is of selected sapphire, and is ground to a shape different from, and unquestionably superior to, any other reproducer point on the market. It is scientifically accurate, and fits so perfectly into the sound groove that all scratching and harshness is eliminated.

U-S MEANS BUSINESS. And our terms are such that you can buy on credit. Fill out and mail at once.

U-S PHONOGRAPH CO.

Write for Prices
and Particulars

and Record Receive from the Trade

Even after you thoroughly appreciate the many revolutionary features of the U-S Phonograph, there is another and equally startling chapter to the U-S story—the perfection of the U-S Everlasting Record, beyond all question the most radical departure and improvement ever introduced in cylinder records.

This Record is not a Wax Record. Both in material and method of making, it is the result of research and experiment in entirely new fields. It is composed of a wear-proof surface mounted upon an unbreakable cylinder base, and is *everlasting* in the fullest meaning of the word—proof against scratching, proof against cracking by extreme heat or cold, proof against damage from careless handling or dropping. It may even be sent through the mails in its original carton, with no other protection whatsoever.

It does away with the heavy loss dealers formerly were obliged to stand through record breakage, and, moreover, it opens up big possibilities of new business through mail delivery.

No amount of playing can wear out

U-S Everlasting Records

One was played continuously for eight days (1,000 times) yet a microscope failed to reveal the slightest trace of wear, either upon the record or upon the sapphire point. Even 10,000 times more would not have interfered with its faultless reproduction.

Great as these points of mechanical excellence are, they are for the moment forgotten when you hear the rich, round tone, the resonance and mellowness that pour forth when the U-S Phonograph and Record are played.

Being accustomed to the unnatural tone of other machines, you are surprised at the purity of tone, the fullness and volume of the U-S. It is so natural in character, so full of sympathy and feeling, that it virtually brings you into the very presence of the original voice or instrument. All the "tinny," artificial character is eliminated. This is the music that has at last placed the phonograph among *recognized* musical instruments; it is the kind that SELLS phonographs.

Bear in mind that ours is A FULLY MATURED BUSINESS PROPOSITION, based upon absolute merit and having unlimited resource behind it. It is broad enough in its scope and possibilities to merit the confidence and co-operation of any dealer.

The wonderful U-S story will soon be sent broadcast to the public—not a proposition of promise merely, but of *positive proof*. By actual comparative demonstrations at dealers we are going to show to the world the difference between U-S machines and records and other machines and records, and it is a difference that will arouse the enthusiasm of your customers.

THE EXHIBITION AT RICHMOND.

The Leading Talking Machine Companies Well Pleased with Result of Display at the National Piano Exhibition in Richmond—Much Interest Manifested by Dealers and the General Public in the Exhibits—Those in Attendance Pleased with General Results.

Perhaps the most ambitious displays made at the National Piano Exhibition, held in Richmond, Va., during the period of the convention of the National Piano Dealers' Association of America, from May 16 to 21, were those of the Columbia Phonograph Co., the National Phonograph Co., the Victor Talking Machine Co. and the U. S. Phonograph Co. These concerns occupied well-located booths, handsomely decorated, sound proof and with plate glass fronts. Considerable business was done by the "talking men" during the afternoons, when the exhibition was open for dealers only, while in the evenings, when the public attended, the talking machine booths were always crowded, the voices of the great artists appealing to visitors even more strongly than the music of the United States Marine Band and the Bostonia Ladies' Orchestra, which were in attendance.

The people of Richmond and vicinity displayed much interest in the exhibition and on society night, May 17, over 5,000 people crowded into the building at one time, causing such a jam that the fire chief took charge and closed the doors temporarily. The exploitation of the latest conceptions in machines and records before such crowds could not but result in much good for the cause in general.

Keeping to the right with the crowd the first talking machine exhibit seen was that of the Victor Talking Machine Co., who had a full line of Victor machines displayed, including five models of Victrolas. The voices of the famous artists reproduced through the medium of the Red Seal records served to attract crowds of people to the booth, where they were greeted with knightly grace by Oliver Jones, ably seconded by Ernest Johns. Max Landay, of Landay Bros., New York, was much in evidence around the Victor exhibit. Ellis Hansen, the window display expert of the Victor Co., had arranged a most attractive special display for setting off the booth, the chief features of which were Red Seal records, and the bright colors of the frames in which they were set when lighted up by concealed electric bulbs was very enchanting. George D. Ornstein, sales manager, and J. M. Gately were also in attendance at the Victor booth.

Next in line was the double booth of the National Phonograph Co., wherein were shown a full line of Edison machines, including the Gem, Standard, Home, Triumph, Idealia and the Amberola, several styles of which were shown with a variety of attractive finishes. At the exhibition they took occasion to exhibit for the first time their new reproducer, which gets a beautiful volume of sound out of the records, and surpasses any previous form of reproducer used by the

National Co. A large assortment of records were on hand for the entertainment and edification of visitors. F. K. Dolbeer, sales manager of the company, was in charge of the exhibit, assisted by J. W. Scott and M. B. Romaine.

The United States Phonograph Co. had a well-located booth, where they showed a number of different styles of their combination phonograph, playing with two and four-minute records as desired, and including Banner and Opera models with horns and models A and B Phonolas, or hornless machines, and their Everlasting record, which in resisting all efforts to break them, live right up to their name, besides giving forth an excellent volume and quality of tone. Perhaps the most interesting portion of this company's exhibit was their combination reproducer, which, by turning a thumbscrew, could be shifted to play either two or four-minute records. The shifting of the soundbox also made the necessary changes in the carriages, automatically and instantly. Those in charge of this booth were T. H. Towell, A. W. Cole, F. L. Fritchey.

Following the circuit of the booths one came to the double display space of the Columbia Phonograph Co., where the full line of graphophones and grafonolas were arranged most attractively. The feature of this exhibit was the new Mignon Grafonola, a cabinet machine full of Columbia quality and retailing at \$150, only \$50 more than the small Elite model grafonola. Other styles of grafonolas were shown, including the Regent style in various finishes. The booth was handsomely decorated with framed pictures of prominent Columbia artists. Geo. P. Metzger, the advertising manager, had some convincing matter on hand for the benefit of visiting dealers, including motto cards bearing the trite paragraphs that have appeared in the recent advertisements in The Talking Machine World. Gold pins bearing the Columbia trade-mark—the two notes—were much in evidence. Besides Mr. Metzger, B. Feinberg, H. A. Yerkes, T. Allen Laurie and C. B. Woodhead were in evidence in the interests of the Columbia line.

H. N. McMenimen, general manager, Sheip & Vandergrift, Inc., manufacturers of the Music Master wood horns, attended the convention for the purpose of getting in touch with the dealers. Several styles of Music Master horns were shown on machines in both the Columbia and Edison exhibits. One of the horns was handsomely inlaid with pearl, while the others were finished in mahogany and oak. On the whole the Music Master horns were much in evidence and were greatly admired for their attractiveness and acoustical value as tone augmentors.

TALKER FOILS BURGLARS.

Proves Such Attraction to Busy Cracksmen That They Play It While Working and Arouse Suspicions of Neighbors—Police Get Musical Crooks.

In the future it will be the wise burglar who keeps away from the house which shelters a talk-

ing machine, or at least controls his desire to listen to the latest music until he has collected the swag and has made his getaway. So it would seem from the experiences of a trio of cracksmen who were caught with the goods in Harlem.

The burglars had made their entrance into a residence that had been closed for the summer and had a really good time collecting bundles of valuables, prying open bureau drawers, smashing furniture just for the fun of it, and listening to tunes on a phonograph. William H. Haigh, owner of the house, thinks the burglars must have enjoyed the music, as many cigarette butts were found lying near the phonograph.

The burglars blame their troubles on the phonograph, for a little girl's bedroom in the house at 414 West 147th street, adjoining on the west, was so near that she heard the music and ran and told her papa, William Baxter. Baxter dressed hurriedly and made his way down 147th street to Amsterdam avenue, where he met Policeman Rice on post.

The burglars, when surprised by the police, started to beat a hasty retreat without waiting to say a formal good-bye, but the whistling of revolver shots around their heads so appealed to their musical natures that they were impelled to stop and listen, at the same time carefully raising their hands around their heads so as not to interfere with the sound waves. The burglars were held in \$2,000 bail each and all the loot was recovered by the police.

COLUMBIA LINE IN STATHAM

Has Been Placed with Sikes, Lanier & Fite Who Will Also Handle It in Athens.

(Special to The Talking Machine World.)

Atlanta, Ga., June 2, 1910.

The Columbia line has been placed with Sikes, Lanier & Fite, successors to W. M. Fite & Co. at Statham, Ga., with a branch in Athens. The negotiations were carried on and closed by the Columbia wholesale branch in Atlanta through W. A. Barfield, its special representative. Westervelt Terhune, manager in Atlanta, in writing H. A. Yerkes, in charge of the wholesale department at the executive offices, stated that Sikes, Lanier & Fite carried the best stock of Columbia goods, for a town of its size, of any place on his territory. The firm in question certainly carry a diversified stock, for, in addition to talking machines, they also handle pianos, organs, small goods, buggies, wagons, harness, automobile supplies, oils, do general repairing, besides writing fire insurance. W. S. Lanier will be the partner in active charge.

The Columbia Phonograph Co., General, have again notified the trade that they intend to protect dealers in Columbia goods by prosecuting every case of price-cutting which may be brought to their attention.

To advertise right, you've got to believe in advertising and want to advertise.

THE TRADE IN CLEVELAND.

Talking Machine Dealers Well Satisfied with Present Conditions—Opening of Summer Resorts Helps Sales of Low-Priced Outfits—New Screen Makes It Possible to Show Moving Pictures in Full Daylight—Talker Music Spurs Hens to Greater Efforts—U. S. Phonographs Well Received—Double Reproducer Carriage Arouses Interest—What the Various Dealers Have to Report.

(Special to the Talking Machine World.)

Cleveland, O., June 9, 1910.

The gratifying volume of trade during May and which has continued without abatement since the first of June, is pleasing to the dealers, who have reason to be satisfied with the business now in evidence. There was a very satisfactory percentage of gain compared with the same period last year and prospects are flattering. Complaint is made by dealers of inability to procure goods with reasonable promptness, especially Victrolas, and there seems to be a shortage also in other types of Victor machines. The Amberola Edison phonograph attachment proposition is attracting customers and proving a profitable as well as popular deal.

The Columbia dealers have adorned the walls of their stores with a set of elegant colored lithographs, life-like presentations of prominent authors in the Columbia lists of records.

The opening of summer camps, cottages, parks and clubs has improved the trade in lower-priced machines to be taken to the various resorts. But the bulk of trade is in the higher grade machines and records, a large proportion of which is for the Grafonola Regent, Victrola XVI. and the Edison Amberola, with selections of records suited to the various tastes.

The general agent of the Humane Society, which has lately been giving considerable attention to the subject, accompanied by representatives of the Lake Shore Film Co. and a number of moving picture theater owners, visited the Columbia Theater and witnessed the demonstration of a new picture screen which makes it possible to see the films clearly in a room made as light as day. The Humane agent approved the invention as conducive to good morals. "This is certainly a long-looked-for and much-needed improvement," he said, as he watched the progress of the test. "I believe it is the solution of the moving picture show problem along the lines of health and morality."

A Buckeye woman noticing a newspaper paragraph to the effect that music would encourage hens to lay and, having tried many other devices, resolved to try its effect on her idle flock. Opening the kitchen door and placing her phonograph nearby she played a melange of the popular songs of the day. The hens soon gathered nearby, showing their interest in the entrancing strains by turning their heads to one side and intently listening. The next day the woman found she was six eggs ahead of the usual supply and, elated at the result, showed her faith in the new incentive by placing the phonograph out on the porch as close to the hennery as possible and furnishing them continuous entertainment. It is reported that the hens paid handsomely for the attention, accepting the recorded notes at their face value, freely offering as collateral the choicest of fresh eggs. It is not improbable that this woman's experiment may lead to the installation of phonographs in thousands of henneries throughout the country, and thus put a quietus on the cold storage egg trust. Let us hope so.

A moving picture, conjointly with a talking machine, to be used in connection with classroom work, is the desire of Technical School students of the city, who are now arranging for their purchase. The idea of buying the machines originated with the principal and he has interested all the pupils. The Cleveland Builders' Exchange sent a moving picture to the school one day and one firm portrayed a scene from Tennyson's "Idylls of the King." "Just the thing—with the aid of a phonograph," thought the principal, "to use in the English classrooms. If

Tennyson's poems can be illustrated they can be made to speak, so can Shakespeare's, so, indeed, can many others. Demonstrations will interest the students and will give them a better, more thorough understanding of the work." The teachers in the different departments of the school are co-operating with the students in raising funds to make the purchase. A year ago the school purchased a piano-player, the only one at present owned by a Cleveland school. "We do things out here," said one of the students. "Tech. wants to be original."

Marion Dorian, traveling auditor for the Columbia Phonograph Co., was a visitor here May 27 on his way to Cincinnati. He stated the business of the company was constantly increasing to enormous proportions, emphasizing the popularity of Columbia goods.

For a long time a number of gentlemen prominent in Cleveland financial circles have been quietly but industriously working on what they term a new everlasting record and combination phonograph. Quite recently announcements have gone out to the trade regarding the new product and the company, which styles itself the "U. S. Phonograph Co.," is receiving a splendid response from all over the country where The Talking Machine World finds readers. It is characteristic of the U. S. product that it was not put upon the market until fully complete and in every respect perfected, and the company is not running any risks of having defective machines leave their plant.

At the Richmond National Conventions the company's product attracted a great deal of attention and the response therefrom and through the special announcement in The World from phonograph dealers since has been such as to give every promise of success.

The special features of the machine are a double reproducer carriage, which contains both two and four-minute reproducers. A turn of a shift key, which takes but a second, changes the reproducing sapphire and automatically shifts the feed mechanism. Both results are accomplished simultaneously and there is not the slightest opportunity for a mistake when changing from a two to a four-minute record. In addition to the reproducer carriage, a new feature is the mandrel pulley balance, which positively controls the speed of the mandrel and corrects any variation in the speed of the motor.

A new venture for Charles I. Davis, who conducts fifteen stores, located in various cities, was the talking machine business. Just seven months ago he installed the Victor and Edison line of goods in his up-to-date music emporium, considered one of the finest equipped in the country. "The showing," he says, "that the department has made is remarkable, not alone in the large record business that has been worked up, but in the large number of machines that have been sold and those, too, of the higher grade." The department is arranged in the most artistic manner and the business pushed very aggressively.

While "everything musical" may be obtained at the emporium of H. E. McMillin, department E, the talking machine quarters, under the management of O. E. Kellogg, is forging to the front in popularity. He reports the record trade for the past month to have been very good and that machine sales were fair. He stated the Edison machines and records seemed to be more in demand. "Among the machines sold by us during the past month," said Mr. Kellogg, "was a complete Victor outfit to the Euclid Avenue Congregational Church. They presented it to A. F. Hansey, Bolonge, F. C. M. S., Matadi, Congo. It is to be used in helping to civilize the Africans in the Wandy district."

Regardless of the season's execrable weather, Mr. Robertson, of G. J. Probeck Co., reports a very excellent trade. "Business," he said, "has been very fair during the past month. The demand for the new high class double-disc Columbia records has been a marked feature of this month's trade. Many inquiries are coming to us concerning the Columbia Grafonola, as well as for the more popular priced machines. The

Stop handing out excuses to customers

When customers come to your store for anything, you ought to have it on hand or be able to get it quickly and tell them just when you will have it.

Maybe you can't do that with your regular jobber, but if you give us your order you can easily figure almost down to the very day when you will get your goods.

We keep our supply of Victors, Victrolas, Victor Records, record cabinets, fibre cases, horns, needles, repair parts, and specialties of every sort right up to the minute and send you the goods without delay. All orders are shipped the same day they are received.

We don't keep you waiting and you don't need to keep your customers waiting. You won't need to put them off from day to day with the excuse that you expect the goods almost any hour. Customers won't stand that sort of thing very long—they want what they order and they ought to get it quickly.

It's our part of the job to see that you get your goods quickly, and if you send us your next rush order you'll find out that we know our business.

Just because there is nothing you want at the present time, don't put off sending for our latest catalogue. Write for a copy to-day so you'll have it when you need it, and we'll also send you our booklet, "The Cabinet that Matches."

New York Talking Machine Co.

Successors to

SOLID WOOD (NOT VENEERED)

Mr. Dealer!

One of the largest Talking Machine Dealers in the United States, writes us unsolicited:

"I am pleased to say that the MUSIC MASTER is the best horn that is on the market.

I have a lot in general use, and customers like them very much. It sells machines and helps sell records.

Often customers say we have the best Talking Machines they ever heard."

Yours very truly,
(Name on request.)

Why not investigate the MUSIC MASTER product?

Should your jobber be unable to supply you, write us, and we will send you sample line of oak, mahogany and spruce disc, or cylinder horns.

If you are not entirely satisfied with the superior merits of the MUSIC MASTER, you can return them to us for credit.

SHEIP & VANDEGRIFT, Inc.

PHILADELPHIA, PA.

demand is still steady for Columbia indestructible cylinder records of both the two and four-minute variety. The indestructible feature seems to appeal very strongly to users of the four-minute records."

Good sales of Victrolas are reported by W. H. Buescher & Sons, with an excellent demand for records. "Business was very satisfactory during May," said Mr. Buescher, "and June trade is proving quite as good. I visited the factory recently and secured the promise of weekly shipments of Victrolas, but which will fall short of supplying the demand. The variety and excellence of the June list of Victor records is attracting scores of customers."

"The volume of business in May was an improvement over April," said the manager of the talking machine department of the Goodman Piano Co. "We are making daily sales of Victrolas and just sold one to a citizen of San Francisco, who was visiting in the city. There is also a very good demand for Reginas. There are nothing more than fair average sales of records."

A very good jobbing trade in the Victrola line is reported by Collister & Sayle, who are making an attractive display of Victrolas.

Mr. Friedlander reports business quite satisfactory at the Bailey store. "The sales of Edison Combination, Home Cygnet and Victor III," he said, "are exceptionally good and there is a good demand for cabinets. Our record trade is fine and we are interesting a large number of foreigners by furnishing them records in their mother tongue."

G. J. Probeck, local manager of the Dictaphone Co., closed a number of good sized deals in Dictaphones during the past week.

Mr. Goldsmith, representative of the Victor Talking Machine Co., was in the city last week and stated that in all the towns he visited he found business good and conditions in the talking machine trade prosperous.

H. F. Tinker, in charge of the talking machine department of the May Co., is quite optimistic about business and reports a big demand for Victrolas of all styles and prices.

Mr. Robbins, of D. L. Robbins & Co., makes a similar report with the addition that he is doing a big business in Edison phonographs, covering the entire line.

Mr. Towell, of the Eclipse Musical Co., and Mr. Rood, of the talking machine store, claim that the weather has had a deterrent effect on trade for the past couple of years, particularly in the country districts.

John Reiling, who handles the Columbia Co.'s goods exclusively, is building up a big following in German records as well as others of the foreign series.

S. B. DAVEGA RETURNS

From His Visit to the Pacific Coast and Chats of Conditions as He Found Them in That Section.

S. B. Davega, president of the S. B. Davega Co., New York, who has been on the Pacific Coast looking after important property interests in Spokane, Wash., for over six months, returned East recently. Of his visit, Mr. Davega said: "I came back a little sooner than I expected on account of the illness of Mrs. Davega. I was in Spokane only while away, and though my personal affairs engaged the greater part of my time, still I did not overlook talking machine affairs altogether. The business was in excellent condition. As you probably know, Sherman, Clay & Co., of San Francisco, are the sole Victor distributors for the Coast, and it is a great proposition. The furniture houses handle talking machines to a much greater extent than in the East and they sell quantities of goods. Our own business is as good as can be expected for this time of year, and we are ahead of last year's record of sales. We anticipate a fine trade in the fall."

FIRST BLACKMAN CO. OUTING.

Company Entertain Entire Staff of Employees During Afternoon and Evening at Coney Island—Generosity Appreciated.

The Blackman Talking Machine Co. held their first annual outing on Saturday last at Coney Island, the entire party being the guests of the company on this occasion. The employees, with their wives, sweethearts, etc., left New York on the 2 o'clock boat and immediately on landing at the Island proceeded to plunge into the joys of Dreamland and Steeplechase. When hunger, stimulated by the ocean breezes, asserted itself the party repaired to Feltman's where a bounteous shore dinner was enjoyed, followed by a tour through Luna Park. It was a tired crowd that sailed back to Manhattan on one of the last boats, but everyone voted the first Blackman Co. outing a grand success and were loud in their praise of the company's generous treatment. J. Newcomb Blackman and R. G. Caldwell accompanied the party to do the honors. The former made an interesting address, to which Mr. Caldwell responded on behalf of the sales force.

LATEST LIST OF ZONOPHONE RECORDS.

As previously announced, the Universal Talking Machine Mfg. Co., in removing their plant from Newark, N. J., to Philadelphia, Pa., suspended their May list of Zonophone double-disc records. May and June are therefore combined, and the bulletin has now been sent the trade. About twenty double record discs—or forty selections—are listed and the range of music covers a wide field of the latest hits, as well as a number of standard favorites. The company's factory is now running smoothly and orders are being filled as rapidly as possible. General Manager MacNabb gets into New York about once a week.

No small thing in a shop or store is too small to overlook. But no small thing should ever be magnified into a mountain.

TRADE HAPPENINGS IN LONDON.

Talking Machine Industry Advancing Slowly but Surely, Is Consensus of Opinion—Acute Competition in Disc Record Field—Machine Sales Drop Off—Edison Record by the Late King—A New Disc Record—Business Flourishing in Australia—An Original Form of Motor—To Play 'Phono Cut Discs on Columbia Machines—Some New Companies—The New Record Lists Offer Much of Interest—Advance in Color Cinematography—Barnett, Samuel & Sons' Interesting Trade Literature—Surprise Occasioned by Edison's Remarks—Exhibits at Japan-British Exhibition—First Large Dividend—News of the Provinces.

(Special to The Talking Machine World.)
London, E. C., June 3, 1910.

At times one is inclined to view things from a pessimistic standpoint, at others times just the reverse. The reason is usually a personal one. It is amply demonstrated in the talking machine business when fluctuation of sales causes many to take up somewhat inconsistent attitudes in relation to the future of our industry. A round of visits among traders on any one day would reveal opinions which are intensely interesting, if only because of their contrast. One enthusiastic manufacturer believes the business to be only in its infancy, and would stake his life upon the prospects of the future. He is doing a fine trade. Another will dwell enviously upon the boom times of the past, talk despondently of the future, give it as his opinion that the public is getting indifferent, and stops advertising; needless to say he is going badly. Pass to the factors and dealers, and we hear the same diversity of individual opinion. What is the explanation? Is the talking machine trade losing ground or making headway? Taken as a whole, I am inclined to believe, after careful thought, that this industry has not reached that stage which might be called stagnation. It is not marking time, but its progress is slow, for all that, especially if considered from the point of view of profits. Here in England competition in the disc field is becoming more acute each season, with this result, that while trade in bulk is larger, it is not sufficiently so to keep up profits, because expenses are proportionately more, and I venture to say that there is not one firm who could truthfully say they are doing better for their shareholders to-day than in the past. That is not evidence of progress. Apart from competition, there is another aspect which bears pertinently upon the situation, and it is this: People do get indifferent to their machines, which fall into disuse and are eventually sold. That means a loss of new business to the machine manufacturers and a loss to the record maker.

Purchasers of new machines do not far outnumber those who dispose of their instruments second hand, and as time goes on this private trading will be felt more keenly by the manufacturers. Again, the trade is to-day in the hands of a larger number of distributors, whose individual sales are proportionately less on that account, because the demand falls much below supply. To sum up, it is evident that talking machine conditions on this side are in a very unsettled state, and are likely to remain so under the present order of things.

Record Made by King Edward.

Since my last report we have had to mourn the death of one who held a more sympathetic place in our hearts than we realized while he was living. Our King—Edward the Peacemaker—as he was best known, always took a lively interest in any new invention, and the story of his first introduction to the Edison phonograph, how amazed and delighted he was with every record, is well known. Mr. Edison, we believe is the fortunate possessor of a record made by his late Majesty when Prince of Wales, and if it is now in good enough condition to allow of reissue, that record, to say the least, is worth its weight in gold.

A New Disc Record Ready Soon.

Yet another disc record will shortly make its appearance on this market under the auspices of the Dacapo Record Co., who will be located somewhere in the City Road district. The Dacapo record is of needle-cut type, double-sided, and will be sold at the competitive price of 2s. 6d. A fine English repertoire, comprising over 300 titles, will figure in the first list, to be ready about the end of June. It is intended to market the record through factors only. W. J. Wisener, a gentleman of some experience in the talking machine trade, will handle the agency for this country, as well as the colonies.

A Visitor from Australia.

I had the pleasure of meeting W. W. Stodart the other day, who hails from far-off Australia. In the course of a short conversation, Mr. Stodart said that general business conditions were never more flourishing out there than at the present time, and there was ample scope for the building up of a fine trade in all classes of machines and records, especially the disc, which was gaining in popularity more and more every day. Their chief industries—gold mining and wool exporting—are most satisfactory, while in other directions prospects were exceedingly bright, a condition of things which had exercised a very beneficial effect on talking machine sales. Mr. Stodart is connected with the well-established house of Nicholson's, Perth, Western Australia, who handle all kinds of musical instruments, and it was interesting to learn that they were one of the first to introduce gramophones in their district. Start-

ing many years ago with the sale of the old hand-wheel type—the earliest model—their talking machine department to-day takes second place only to the pianoforte section, and is increasing satisfactorily all the time.

One Man's Idea of a Musician.

His Father's Plea.—Perhaps the poorest opinion of music as a vocation is attributed to a certain excellent master-builder, who had sent his son to college, where the young man excelled in musical accomplishments. In course of time he announced to his father his intention to become a musician. The father objected vehemently. The son begged, and at last was affected to tears, declaring that he should never be happy in any other calling. This melted the father's heart, and he exclaimed: "All right, do as you like—but don't you ever come round grinding your organ in front of my house."

New Tresor Motor Is Original.

It is not often that one meets with originality in motors, they are all so much alike in form of construction, that anything different to the stereotyped patterns will at once command attention. And in this connection the new "Tresor" motor, as illustrated elsewhere in these columns, is the very embodiment of originality. A glance at its design will convey more than any words of mine can do, and its unique advantages will be at once apparent. All the parts are encased in metal, thus preserving the delicate gearing from dust and at the same time ensuring easy and silent running. The spring is afforded additional protection by being separately enclosed in a barrel of the usual type. It is evident that its constituent parts are made only of hard wearing metals, while the scientific assembling and general construction at once marks the "Tresor" motor as the essence of perfection. Its future prospects are indeed excellent, judging by the amount of orders already placed by traders both here and on the continent.

New Attachment for Columbia Machines.

Musogram, Ltd., have just introduced a new device enabling phono cut discs to be played on Columbia machines, while they also have in hand an ingenious adaptor for the same purpose applied to Gramophone instruments. Mr. Packman, the manager, always has something new to offer, and is just now working upon a very fine thread needle cut disc. His long process phono cut are really wonderful for purity of tone and volume, and indeed some recent issues I had the pleasure of hearing, impressed me with the conviction of their superiority.

A Peculiar Legal Case.

An application was made by the Gramophone Co. to strike out the statement of claim in an action brought against them by Lionel Monckton to restrain them from reproducing

FROM OUR LONDON HEADQUARTERS—(Continued.)

on gramophone records his song "Moonstruck," sung by Miss Gertie Millar in "Our Miss Gibbs" at the Gaiety Theater. Mr. Macgillivray, for the company, stated that Mr. Monckton's statement of claim disclosed no reasonable cause of action and it was embarrassing. It had been decided that the making of a printed roll for a pianola was not an infringement of the author's copyright, and under the pleadings it was impossible to understand what position Mr. Monckton took up.

Ogden Lawrence, K. C., said that Mr. Monckton relied upon the common law right of a man to live on the fruit of his labor. This was a most serious question for authors, as gramophones had become practically perfect and were now used by really musical people. When people could get a song on a record it was found that the sale of the music was practically nil, and the important point was how far the author had a proprietary right in works which he put before the world—for people to play certainly, but not for reproduction in such a way as to destroy the value of the author's work. Mr. Justice Eve refused the application.

The Gramophone Trade-Mark Action.

The important Gramophone trade mark action will probably have been heard in the courts by the time these lines appear.

New Companies.

Irolite Manufacturing Co., Ltd. Talking Machine Manufacturers, etc. Capital, £2,000 in £10 shares. Registered office, 9 Hart street, Bloomsbury W. C.

Express Cable Inventions, Ltd. Photographs by Telegraphy. Capital, £50,000. 29a Charing Cross Road, London W. C.

A prospectus has been issued by the "Harper" Electric Piano (1910) Co., Ltd. Capital, £30,000. Apart from developments in other directions, the new company will continue the sale of pianos, organs, gramophones and all other kinds of

musical instruments in which a profitable business has been carried on by the vendor company at Holloway Road, London.

Gramophone Co. Shares Advance.

The Gramophone Co.'s shares have been very considerably on the upward grade of late, the last quotation at the time of writing being 39s. 4½d. With a steady market, as at present, prospects would seem to be very satisfactory in view of the fact that machine and record sales are well above the average for the time of year.

New Color Cinematography.

The latest invention in color cinematography is being shown at the Palace Theater, London. The pictures, taken by the Urban-Smith process known as Kinemacolor, form a complete pictorial account in color of the funeral procession of King Edward and the bringing of the body to Westminster Hall from Buckingham Palace. Nothing is omitted. The early morning crowds in the streets, the arrival of the soldiers to keep the route, the coming of the empty gun-carriage, the arrival of those taking part in the procession, are all shown. The marching soldiers and the brilliant uniforms of the sovereigns and officers upon the background of the trees in the park give some wonderful contrasts.

Choice List of Gramophone Records.

A choice batch of records is to hand from the Gramophone Co. They are of a quality which will appeal to all music lovers and dealers are well advised to keep a good stock in hand. The following titles are contained in the list for June:

"Egmont Overture" (Beethoven), "Grand Duchess of Gerolstein" (Offenbach) selections I. and II., by the Band of H. M. Coldstream Guards; "Dollar Princess," two step, by the Black Diamonds band; "Star of the Desert" (Bonheur), by John Harrison; "O Paradise" ("L'Africaine") (Meyerbeer), sung by Evan Williams; "The Low-backed Car" (Samuel Lover), by Thorpe Bates; "Ben the Bo'sun" (Ad-

ams), Harry Dearth; "Invocazione" ("Ballo in Maschera"—Verdi), sung by Miss Edna Thornton; Gems from "The Dollar Princess" (Rossini), by The Light Opera Company; "Quando Corpus" ("Stabat Mater"), Rossini, quartet, by Miss Perceval Allen, Miss Edna Thornton, Messrs. John Harrison and Robert Radford; "My Wife's Gone to the Country," humorous song, by Harry Carlton; "Josephus Orange Blossom," by the Minster Singers; Causerie—"The Prairie Flower," violin solo by Francis Macmillan, and two fine pianoforte pieces on one record entitled "Pastoral" and "Capriccio" (Scalati) by Mark Hambourg. The famous Irish tenor, John McCormack, now singing at Covent Garden Opera, has been exclusively retained for Gramophone records, and here are some of the titles already issued: Fra Poco a me ricovero, "Lucia di Lammermoor"; Racconto di Rurolfo, "La Bohème"; Una Furtiva, "L'Elisir di Amore"; "When Shadows Gather," "The Minstrel Boy," "Annie Laurie," "Come Back to Erin," "Killarney" and "The Snowy Breasted Pearl."

A new series of Gramophone records by Nicola Zerola and Riccardo Martin has just been issued.

Complete List of Edison Bell Discs.

J. E. Hough, Ltd., have recently issued a complete list of their Edison Bell disc records. It is conveniently arranged, and Colonial traders will find it very useful for reference.

H. Cullum Expected Home.

H. J. Cullum, of the factoring firm of Lockwood's, 43 City Road, has been visiting the West Indies. He will be in New York when this reaches you, and he is expected home within ten days.

New Japanese Customs Tariff Law.

For the information of the commercial community the Board of Trade have issued, as a blue-book, a translation of the proposed new customs tariff law for Japan.

FROM OUR LONDON HEADQUARTERS—(Continued.)

Talking Machine World regarding the introduction of a new disc record by the Klingsor Works aroused much speculative interest in the trade as to who were the promoters back of the new product. It was known that Heyder & Vischer are the sole agents here, and I am now in a position to say that three well-known leading continental firms are concerned. They are: Polyphon Musikwerke, A. G., of Wahren, Leipzig; Excelsiorwerke, Cologne, and the Klingsor Werke. A powerful combination, indeed! Information is not yet available as to the price of the new record, but I understand it will soon be settled. Recording is now in full swing and the first list will be ready shortly.

Interesting Trade Literature.

A batch of interesting publicity literature is to hand from Barnett Samuel & Sons, Ltd., Worship street, London, comprising catalogs and the latest record lists. Dealers will find the 1910 catalog of Odeon and Fonotopia celebrity records particularly handy for quick reference, on account of its unique arrangement. Similarly, the Jumbo record list calls for mention. The alphabetical index renders it indispensable to dealers who have constantly to pick upon a title at a moment's notice. The company, by the way, have just issued a special 5-inch double-sided Jumbo record containing Queen Alexandra's touching message to the nation on one side, and "God Save the King," by a military band, on the reverse. One other item worthy of special mention is the introduction of a magnificent series of Odeon double records by those delightful entertainers, "The Follies." The set complete, comprising six records, is put up in art portfolios for 24s., but any number may be obtained separately. I shall hope to make further reference to the company's products in my next report. Meanwhile dealers interested in having only the best English steel needles should send a card to Barnett Samuels for particulars of their new Dulcephone needles, which I have found to give splendid results.

Anent Edison's Remarks.

In view of the successful introduction here of the all-color cinematograph machine, and the perfect synchronization of the disc machine with the moving picture, Mr. Edison's remarks as reported in the Daily Telegraph from their New York correspondent are somewhat surprising. The report is as follows: "It is announced that T. A. Edison, the wizard of electricity, has succeeded in making a machine to photograph and reproduce moving pictures in their natural colors; but the great inventor, while admitting that he is experimenting in that line, and is hopeful of success, says that he is still battling with great difficulties, more especially the seeming impossibility of reproducing reds. With other colors he is tolerably successful. Mr. Edison spoke with much enthusiasm of the talking and moving picture machine he has just completed. 'You know,' he said 'they've claimed to have a talking machine for some time to go with moving pictures, but it was a false claim—the talking was done by a man at the back of the curtain. But we've got a machine now that produces a perfect illusion. A whole drama can be reproduced by it vocally. The voices are so perfect that they seem like ordinary stage voices. A band can also be reproduced. The music has no phonograph sound; it is the real thing. When we can produce colors perfectly, then you'll have a whole drama by machinery—speech, gesture, life and color. There is no jar or flutter in these talking and moving pictures. There was none in my first moving picture machine, but commercialism produced flickering pictures; why?' and his eyes twinkled merrily. 'Well, because men run machines twice as slowly as I intended. They produce quantity at the cost of quality. If they ran twice as fast there would be the perfect picture.' In conclusion, Mr. Edison said that he had seen the proposal to establish an aeroplane line between New York and the distant suburbs, and he agreed with Hudson Maxim, the president of the Aeronautical Society of America, that all things

were becoming possible, and that the day might be near when aeroplanes would be at least as safe as motor cars."

At the Japan-British Exhibition.

One of the most interesting features of the Japan-British Exhibition at Shepherds Bush is the Palace of Music, wherein may be found effectively arranged stands displaying the products of various musical instrument firms. Phonogrand, Ltd., have a particularly striking exhibit in the best position. Here may be found displayed in imposing order an extensive series of their popular models of the interior horn pattern. These have been fully described in a previous issue. On inquiry at the company's offices in Oxford street I learn that some very nice orders have been booked, and in view of the thousands of persons who daily visit the exhibition, Phonogrand will receive that publicity usually so fruitful of good results.

Another prominent exhibit is that of the Pallas Mfg. Co., who are showing their popular Radiaphone soundbox, in addition to a new machine constructed upon somewhat novel principles. This I hope to review in a later issue. These are the only two firms representing the talking machine industry at the exhibition.

Four-Minute Indestructible Records Coming.

Next season we are promised the issue of 200 thread Columbia Indestructible records!

New Company Organized.

Charles Foulds (Ltd.), musical instruments manufacturers, May 27; £12,000, in £1 shares (6,000 preferred); 19 Chapel Bar, Nottingham.

He Was a "Music Smith."

Counsel at the Shoreditch county court recently asked a witness what he was. Witness: A music smith. Counsel: A musical smith? There are hundreds of Smiths in the directory, I know, but I have not heard of the musical Smith. Witness: "A music smith," I said. Counsel: I have heard of the village blacksmith, but what is

a music smith? Witness: I make the iron frames for pianos.

Policy Pleases Dealers.

Discussing conditions with your correspondent, Mr. Manson, manager of the Twin and Zonophone companies, said that despite the seeming quietness in other directions, it was pleasing to find dealers were everywhere expressing their appreciation of his companies' policy in giving always only the best marketable titles, by leading artists, in conjunction with good recording. And, indeed, this appreciation took a very substantial form in the shape of increased orders, so much so that sales this year were much ahead of even time last year. Not due to spasmodic rushes, but a steady, well-balanced demand from all over the country. Zonophone machine sales, too, were forging ahead, the demand being continuous and satisfactory. Congratulations!

The Edison List for July.

The Edison list for July contains many selections of more than passing interest, and it is doubtful if any of the records will be more appreciated by the older school of music lovers than the favorite selections from the "Mikado," that dainty Sullivan comic opera. This is the first record of the kind ever put out by the National Phonograph Co. The Amberol list includes: Baby's Opera (arr. by G. W. Byng), National Military Band; The Last Rose of Summer (Moore), Amy Evans; The Pilgrims (Formby), George Formby; The Broken Melody (Van Biene), Jean Schwiller; The Arrow and the Song (Balfe), Peter Dawson; In Your Old Tam o'Shanter (Murphy), Florrie Forde; La Czarine, Mazurka (Ganne), Alexander Prince; The Promise of Life (Cowen), Violet Oppenshaw; Have a Banana (Mayne), Arthur Osmond; With Sword and Lance, march (Starke), National Military Band; When You and I Were Young, Maggie (J. A. Butterfield), Will Oakland and chorus; There's No Girl Like Your Old Girl (Dempsey and Smith),

Manuel Romain and chorus; When They Gather the Sheaves, Mary Dear (J. Fred Helf), W. H. Thompson; Beyond the Smiling and the Weeping (Geo. C. Stebbins), Peerless Quartet; Slavonic Rhapsody (C. Friedemann), Sousa's Band; Favorites from the "Mikado" (Sullivan), Edison Comic Opera Co.; Dream Pictures (H. C. Lumbye), American Standard Orchestra; Come Along My Mandy (Mellor, Lawrence and Clifford), Ada Jones and Billy Murray; Columbus March (Bolognese), New York Military Band; True to the Flag, march (F. von Blon), United States Marine Band. In the grand opera selections are *Barbiere di Siviglia*—Ecco didente in cielo (Rossini), sung in Italian by Florencio Constantino, tenor; *Huguenots*—Piff Paff (Meyerbeer), sung in Italian by Luigi Lucenti; *Samson et Delilla*—Mon coeur s'ouvre (C. Saint-Saens), sung in French by Marie Delna; *Zaza*—Dir che ci sono al mondo (Leoncavallo), sung in Italian by Carmen Melis, soprano; *Carmen*—Seguediglia (Bizet), sung in French by Marguerita Sylva. There is also a series of a dozen Amberols in Welsh that should prove very successful sellers.
