TUBERCULOSIS ERADICATION UNDER THE ACCREDITED-HERD PLAN

SUPPLEMENT 1 TO
HERD LIST NO. 3

LIST OF HERDS OF AYRSHIRE, GUERNSEY, HOLSTEIN-
FRIESIAN, AND JERSEY CATTLE WHICH HAVE PASSED
ONE OFFICIAL TUBERCULIN TEST WITH A VIEW TO
BEING ACCREDITED

Tuberculosis Eradication Division
J. A. KIERNAN, Chief

UNITED STATES DEPARTMENT OF AGRICULTURE
DEPARTMENT CIRCULAR 143

Contribution from the Bureau of Animal Industry
JOHN R. MOHLER, Chief

Washington, D. C.

Revised to June 30, 1920

CONTROL with a view to the eventual eradication of tuberculosis in cattle is being accomplished by the systematic efforts of Federal and State authorities in cooperation with cattle breeders' associations and herd owners.

A plan was adopted in 1917 whereby herds of cattle passing the prescribed number of official tuberculin tests should be certified or accredited as free from tuberculosis.

An accredited herd is one that has passed successfully two annual or three semiannual tuberculin tests applied by regularly employed veterinary inspectors of the Bureau of Animal Industry or of the State where cooperative work is conducted, and has otherwise complied with the regulations governing the work.

The following list shows herds that have passed successfully one test, without reactors, with a view to certification. If the status of any of the herds in this list is changed, prompt notice of the fact will be furnished to the officials of the various States.

The breeds of cattle, the names of the owners, and the States in which the herds are located are arranged in alphabetical order.

TUBERCULOSIS ERADICATION UNDER THE ACCREDITED-HERD PLAN.

SUPPLEMENT 1 TO HERD LIST NO. 3.
