# Goals

1. **You** learn about Structured Data on Commons (SDC);
2. The **SDC team** learns what you need in order to be able to work with SDC;
3. We **all** leave this workshop with a list of ideas and potential pilot projects!

# Schedule

<b>Structured Commons and GLAM: intro</b>	30 minutes
<b>Workshop exercise 1:</b> List your upcoming GLAM projects	5 minutes
<b>Workshop exercise 2:</b> Project highlights and issues	5 minutes
<b>Workshop exercise 3:</b> Changes and needs	60 minutes
<b>Group summaries</b>	10 minutes
<b>Wrapping up, conclusions and follow-up</b>	10 minutes

# Structured Data on Commons

converts metadata on Commons  
to a **structured & machine-readable**  
format  
making Commons files easier to  
**view, search, edit, organize and re-use,**  
in many **languages**

The screenshot shows a Wikimedia Commons file page for the painting 'Starry Night' by Vincent Van Gogh. The page includes a navigation menu on the left, a central image of the painting, and a 'Data' section with a table of metadata. Below the table is a category section.

# 5 outcomes

(and one corollary outcome)

1. Make editing metadata easier  
(and enable multilingual statements)
2. Make search more effective
3. **Satisfy GLAM use case**
4. Allow license compliant reuse
5. Support tool development

- Uses Wikidata items/properties via federation

# Upcoming

- **A first feature**
  - Multilingual captions (Summer 2018)
- **Full structured data rollout**
  - 'Depicts' in Autumn 2018
- **Search**
- **Upload**
- **New data modelling by Commons and Wikidata communities**

## Personas

Wikimedian in Residence

**Sammy**

**Tech skills:** Intermediate

**Wikimedian:** No

**People involved:** Sammy, GLAM Lawyer (for licensing)

**Type of media:** Historical books and pictures

**Location:** Canada

### Problems

**Limited knowledge of different templates and template syntax**

Needs to manually correct errors after batch uploads

How to show impact of uploads?

*"I don't understand Commons well and have a hard time optimizing my uploads."*

Example 1:  
**GLAMs and Wikimedians need  
good documentation**

- Embark on GLAM pilot projects, starting April 2018
- to be well documented

Example 2:

**Data wrangling before uploads is hard!**

→ Work on mapping GLAM metadata schemes to Wikidata and Commons

**What does SDC  
make possible for  
new GLAM-Wiki  
projects?**

## Birdwatching Rijksmuseum

On Sunday October 4th, World Animal Day, the Rijksmuseum will host a birdwatching day in collaboration with Naturalis Biodiversity Center, Wikimedia Netherlands and the COMMIT SealincMedia project.

### Rijksmuseum – Naturalis Biodiversity Center – Wikimedia Nederland & COMMIT/ SEALINCMedia present a unique birdwatching event

Birds are everywhere. In your own garden, in nature, and also in art. Among the Rijksmuseum's 1,2 million collection objects are many prints, paintings and artefacts that have bird species depicted on them. Among the 37 million objects in the Naturalis collection are many birds from all over the world that have been collected in the last 200 years, as well as historical drawings of plants and animals in which many birds are depicted.

#### Wikimedia Commons

Some of the depicted birds are easily identified. Others require a trained eye to determine which species the artist has pictured. The Rijksmuseum and Naturalis are looking for experienced bird watchers and other avian enthusiasts to join an expedition through their digital collections and help the museums identify bird species in works of art.

The Rijksmuseum and Naturalis are currently in the process of donating large parts of their digitized collections of bird images to Wikimedia Commons, Wikipedia's open multimedia library. Participants of the birdwatching day are challenged to collaboratively identify as

Name of person who enters this information	What is interesting/special about this project?	What is challenging/difficult about this project?	Do you feel ready to do this project with structured data? Why (not)?
François le Français (from WMFE)	We don't have many historical maps of these regions on Commons and Wikipedia yet. It is our first collaboration with this museum.	The museum doesn't have very extensive descriptions of the maps. We don't have many volunteers who do GLAM projects locally and who can help with the upload.	No. Our chapter and volunteers don't have a lot of experience with Wikidata yet and even Commons uploads are still quite new for us.
