Department of Agriculture.

CAULIFLOWER—NELLIS' WHITE CAP.

(For description, see 1st inside cover page.)

Price of Extra Choice Seed, packet 30 cents; 1-4 oz. \$1.00; oz. \$3.50; 1-4 lb. \$12.00.

FREE DELIVERY.—All seeds delivered transportation paid to any R. R. station in U. S. or Canada.

NOTICE.—A. C. Nellis has been engaged in seed-growing since 1876. He has no business connection with a corporation bearing his name (The A. C. Nellis Company), who have removed to the interior of the State. Those wishing Nellis' Seeds should order them from headquarters.

A. C. NELLIS & CO.,

WHOLESALE SEED GROWERS, 62 Cortlandt St., New York.

SEASON 1890.

Selected Pedigree Seeds

FOR THE

MOST CRITICAL MARKET GARDENERS' TRADE

-AT-

Wholesale Growers' Prices.

WITH THIS SEASON WE HAVE INAUGURATED NEW FEATURES.

FREE DELIVERY.—Having made special arrangements with the transportation companies, we are enabled, at our wholesale prices, to deliver all seeds offered in this price-list, freight or express charges prepaid, to any railroad station in the United States or Canada. We ask nothing for postage when seeds go by mail, or for bags, boxes, or packing. When comparing our prices with others, please bear in mind that no extra expenditure for freight, etc., is necessary. Our prices mean seeds delivered to your nearest station.

QUALITY.—The seeds offered are in most instances *market gardeners' private stock*, the same as grown for their own use, and should not be confounded with cheap old seeds.

TERMS.—Our terms are strictly cash, as we have not added a per cent. to our prices to cover losses by bad debts growing out of the credit system. Remittances should be made by bank draft on New York, Post-office money order, express money order, or by express or registered letter. Postage stamps, when clean and free from moisture, will be taken in small amounts. Postal-notes are convenient for small sums, but are not safe, as they are made payable to bearer, and, if lost, cannot be duplicated. *One-fourth pounds at pound rates; pecks at bushel rates.*

C. O. D.—We will ship seed, C. O. D.; when a small remittance is enclosed, with order to cover express charges, should the seeds not be taken.

NELLIS' WHITE CAP CAULIFLOWER.

On first outside cover page we illustrate this superb strain of Cauliflower, which, for *purity, earliness, evenness of growth, and certainty to head*, is far in advance of any variety grown in this country. It has been perfected at great expense of time and labor, and is designed to meet all the wants of the most critical growers. It having few outer leaves and short stumps allows its being set very close, and, therefore, is most profitable for growers, either for forcing or outside. Price of seed, packet 30 cents; $\frac{1}{4}$ oz. \$1.00; oz. \$3.50; $\frac{1}{4}$ lb. \$12.00.

NELLIS' SELF-BLANCHING CELERY.

We show a row of this superior Celery hilled-up on page 3. It combines the following superior qualities: extra fine flavor, solid, crisp, and beautiful stalks, which are a delicate, light, creamy color, with light yellow leaves, slightly tinted green, causing it to grow in a blanched condition to a remarkable degree, thus obviating the tedious task of digging trenches in which to transplant it, and afterward the great labor of banking-up to secure eatable Celery. Growers realize from 75 cents to \$1.50 advance per dozen bunches over any other kinds in this market—a practical proof which speaks volumes. Price of headquarter seed, packet 15 cents; oz. 75 cents; lb. \$8.00.

We append herewith statements from one of the largest hotels and from the largest eating-house in New York City:

Mr. J. M. OTTER, Manager of the METROPOLITAN HOTEL, Broadway and Prince Street, New York City, writes, under date of October 29, 1887:

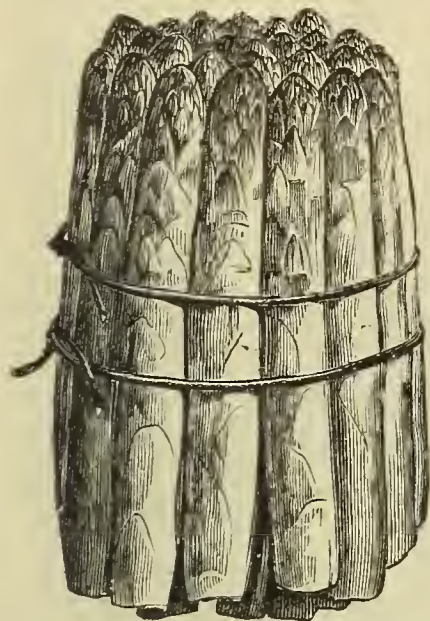

I must confess the celery just received from your Company to be the finest I ever saw. I gave it to several of our permanent guests, and sent several bunches to Judge Hilton's house for his opinion. Thanking you for such a liberal sample, I am, yours very truly, J. M. OTTER.

Mr. T. R. McNell, proprietor of Smith & McNell's Restaurant, running through from Greenwich to Washington streets, between Vesey and Fulton streets, stated in person, after having tested a few bunches of Nellis' Self-blanching Celery with some of his friends, during October and November, that it was the best celery he had ever put into his mouth, and said it is a valuable variety. He considered its self-blanching qualities an improvement, as celery now could be grown without high earthing-up, and consequently the heart would be free from impurities. ADDRESS

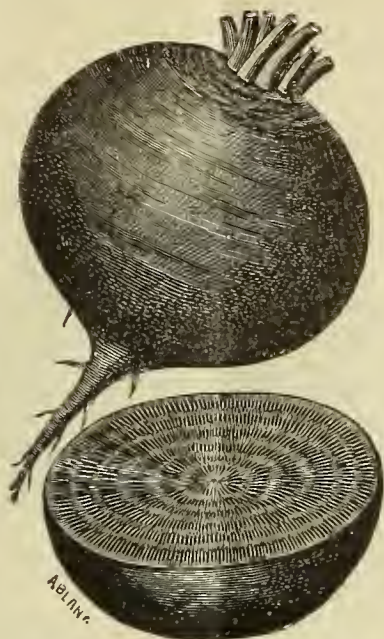

A. C. NELLIS & CO., 62 Cortlandt Street, New York.

All Seeds, etc., offered will be prepaid to any railroad station in the United States or Canada at prices mentioned, except where specially noted "not prepaid."

SEEDS IN PACKAGES.—Except where otherwise noted, we will supply large packages of all kinds of Seed at a uniform price of 5 cents each, prepaid; one-fourth (1-4) lb. at pound rates; one-fourth (1-4) bushel at bushel rates.

POTATOES.—Ger. Kartoffeln.

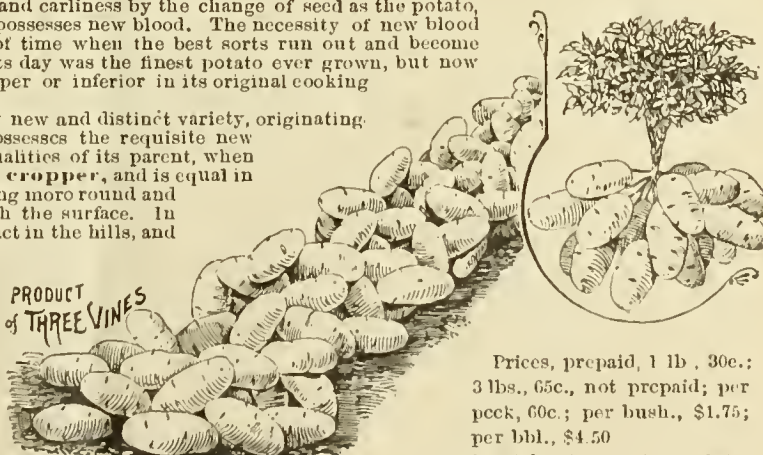

Prices subject to change. Not prepaid. We can furnish all the leading varieties at a uniform price of \$3.50 per barrel, except where noted.

**THE FAMILY PRIDE,
The Earliest and Best Potato.**

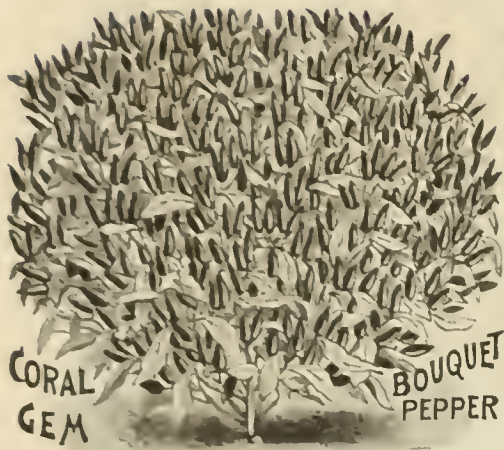

No farm or garden crop is so much improved in yield and earliness by the change of seed as the potato, especially if the seed selected comes from the far north and possesses new blood. The necessity of new blood in potatoes is caused by the fact that it is only a question of time when the best sorts run out and become unprofitable to grow. The old and popular Early Rose in its day was the finest potato ever grown, but now has run out, to a great extent, either becoming a shy cropper or inferior in its original cooking qualities.

In **THE FAMILY PRIDE** we offer an entirely new and distinct variety, originating from a seed-ball of the original *Early Rose*, and hence possesses the requisite new blood, besides coming from the far north. It excels the qualities of its parent, when that was in its prime, by being earlier and a heavier cropper, and is equal in fine cooking qualities, and differs from it in form, being more round and slightly flattened, with but few eyes, and they lie even with the surface. In habit it is of robust growth and strong vine, growing compact in the hills, and matures ahead of all others. It was the first in this market the past season, and on good land produces from 300 to 450 bushels per acre. The entire stock was in the hands of a few northern growers, who had a monopoly of it. The stock we offer is all grown in the far north, and by the originators. It is better adapted to grow on Long Island for first early crop than any strain or sort offered. We guarantee it will give more satisfaction than any new variety in potatoes offered at double the price. We have put prices at popular rates, so as to be within the reach of all. No better investment can be made than to use this variety for seed, as the increased yield will more than four times pay for the additional cost over that of home-grown seed.

PRODUCT OF THREE VINES

Prices, prepaid, 1 lb. 30c.; 3 lbs., 65c., not prepaid; per peck, 60c.; per bush., \$1.75; per bbl., \$4.50. Special prices on larger lots.

HIGH-GRADE FLOWER SEEDS.

We prepay all Flower-Seeds at prices named in this list.

TRADE PACKAGES.—The right-hand column is price of TRADE PACKAGES; they contain four to six times as much seed as the usual *packets*.

PACKETS.—For those only wishing a small quantity for private use, we will supply 5-cent *packets* of all kinds offered at \$1.00 per oz., or less, and 10-cent *packets* of all higher priced varieties.

SEEDS BY WEIGHT.—No kind sold by weight for less than 10 cents; for example, one half-ounce of seed listed at 15 cents per oz., we charge 10 cents for. Higher-priced varieties we will supply fraction of an ounce at ounce rates, but not less than 10 cents' worth.

PANSY Seed is a specialty with us. See our five Pansy collections offered on pages 15 and 16.

— New Tom Thumb, double mixed..	“ .25	.25
— Haageana, double extra ..	“ 1.25	.10

NELLIS' PERFECTION LAWN GRASS-SEED MIXTURE.

The small cost and brief time required to obtain a perfect lawn should inspire all to possess such an adornment, combining beauty and restful comfort. Having had many years' experience in making lawns and supplying seed for some of the largest lawns and public grounds around New York, enables us to prepare a mixture which is *perfection*, it being only made up of our best American hardy grasses, which will withstand our severe winters, blended together in proper proportion to produce a *deep, rich, velvety green*, so much sought after by all admirers of a fine lawn. We pronounce this mixture superior, and will guarantee the result if ordinary care is taken in the preparation of the ground and sowing of the seed.

Directions: Soil should be deeply plowed or spaded, mixing in plenty of rotted manure; this is necessary both for a sandy or heavy clay soil. Thorough preparation of the ground is required by finely pulverizing the lumps and removing the stones, etc., with a fine-tooth

iron rake. Seeds should be sown as early as possible, using at the rate of four bushels to the acre, which is about one quart to every three hundred square feet (20x30). It should be sown thick for best results. Seed should be raked in and ground carefully rolled. If a lawn is wanted for immediate use, sprinkle some oats with grass-seed, say one quart of oats to each four quarts of lawn grass-seed, and rake all in together. As soon as oats appear, commence mowing with lawn-mower and keep mowed all season. The oats will give a green sward, and at same time protect the tender grass sufficiently (if kept mowed); and in fall, when the grass has a good hold, the oats will have disappeared. By this method all weeds are kept down and a perfect lawn will be the result. We should be pleased to correspond with parties intending to make large lawns, and are sure we can be of value to them.

Prices of Nellis' Perfection Lawn Grass - Seed, bushel of 15 lbs., \$3.50, prepaid; qt., 25c., prepaid.

NELLIS' MEADOW AND PASTURE GRASS-SEED MIXTURES.

Space will not allow going into this most important subject as we should like to do. It has been demonstrated of late years that there are *better* mixtures than the old set idea of timothy and clover. By long experience we have made up mixtures suited to all soils and climates. If party ordering will mention general characteristics of both, and the use it is wanted for, we will prepare a proper mixture which will be suitable. By blending the proper kinds together in a mixture pre-

vents failure, if any one or two should winter-kill, and thus saves the crop and prevents the ground from being filled with weeds and daisies. We solicit correspondence with all who are interested in this subject, and are ever willing to give all the information possible.

We can furnish a first-class grass-seed mixture, suitable for meadows or permanent pastures, if soil and climate are mentioned, as follows:

Bushel of 14 lbs., \$2.00, not prepaid.

A NEW POTATO.

Be sure and include NELLIS' FAMILY PRIDE in your order; it is the best and earliest potato grown. (See page 7.)
