## RETAIL TRADE

Eating and Drinking Places and  
Merchandising Machine Operators

MAR 2 12 27 PM '67  
LIBRARY

U.S.  
DEPARTMENT  
OF COMMERCE  
BUREAU OF  
THE CENSUS

The following comprise the Retail Trade series of publications:

#### RETAIL TRADE, SUBJECT REPORTS (BC67-RS)

A series of reports presenting data based on the following characteristics of individual establishments: Sales-size; employment-size; and single or multiunit ownership. Statistics are presented for the United States, States, and standard metropolitan statistical areas, by kind of business.

#### RETAIL TRADE, AREA STATISTICS (BC67-RA)

A U.S. Summary report and reports for each State, the District of Columbia, Guam, and the Virgin Islands. Statistics are presented by kind of business, for counties, cities, standard metropolitan statistical areas, and for selected towns and townships in New England, New Jersey, and Pennsylvania. The kind-of-business detail varies in accordance with the number of retail establishments in an area.

#### MAJOR RETAIL CENTERS (BC67-MRC)

A summary report and a report for each State showing separate statistics for each standard metropolitan statistical area (SMSA) in the State. Each report presents data for the major retail centers (MRC's) in the SMSA's and for the central business district (CBD) in each city with 100,000 inhabitants or more in the SMSA. Statistics for the CBD are presented for retail trade by kind of business. Data for each major retail center include (a) sales and establishment counts for total retail trade and for three major subgroups of retail trade and (b) establishment counts only, by detailed kind of business.

#### RETAIL MERCHANDISE LINE SALES (BC67-MLS)

A U.S. summary report and reports for each State. Each report presents statistics on (a) number of establishments and total sales for establishments in a specified kind of business, (b) the number and total sales of those establishments reporting their sales by the 25 broad merchandise lines, (c) the percentage of total sales accounted for by each of the 25 broad lines, and for (d) establishments handling a specific line, what percent of their total sales is represented by sales of that line. Additional merchandise line detail is shown for selected kinds of business.

U.S. Government Printing Office, Washington, D.C., 1971

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D. C. 20402, or any Department of Commerce field office. Price 60 cents.

## BUREAU OF THE CENSUS

George Hay Brown, Director

Walter F. Ryan, Associate Director

Dino S. Villa, Deputy Associate Director

### BUSINESS DIVISION

Harvey Kailin, Chief

**Acknowledgments**—This report was prepared in the Business Division under the general direction of Harvey Kailin, Division Chief, with direct supervision by Louis Greenberg, Assistant Chief, Program Development, who succeeded Henry Wulff. Michael Farrell was responsible for implementation of the Retail Trade plans. Bobby Russell, Mabel Foster, and Robert Wales contributed in resolving problems and in reviewing the data for publication. Robert Viehman served as Coordinator and was the Business Division's liaison officer with other divisions. Staff assistance was provided by Paul Shapiro, Assistant Division Chief, Program Implementation, Ralph S. Woodruff, Assistant Division Chief, Research and Methodology, and Max Shor, Assistant Division Chief, Staff and Special Projects.

Systems and procedures were developed in the Systems Division, Sol Dolleck, Chief, by Eugene Wendt, Assistant Division Chief for Periodic Censuses, assisted by Samuel Schweid, Economic Census Program Manager, and Alvin Barten. Electronic computer programs were developed under the supervision of William Lorenz, assisted by Barbara Barton and Robert Wilner.

Production controls were established under the supervision of Francis Boucher and James R. Pepal, assisted by Caromel Wooten. Data processing and related operations were performed by the Processing Division, M. Douglas Fahey, Chief, assisted by Rudolph Micoly and James Shores. Editorial supervision was provided by Julia Moring of the Administrative and Publications Services Division.

Processing of retail reports was performed by the Jeffersonville Census Operations Division, Joseph F. Arbena, Chief.

Arthur Horowitz, in his capacity as the coordinator of the economic censuses, made important contributions to the planning and operational phases of the work.

Special acknowledgment is due to the many businesses whose cooperation has contributed to the publication of the data.

# Introduction

This report presents data on: (1) seating capacity, waiter or waitress services, days open per week, and hours open per day for eating and drinking places; (2) on franchise operations and sale of prepared food for carryout for eating places; and (3) on type of machine for merchandising machine operators. Data on vending machines are shown only for the United States. All other data are shown for the United States, geographic divisions, and States.

Only establishments with payroll were asked to report the data items listed above (See "Method of Coverage" in appendix).

In 1967, eating and drinking places which reported information on seating capacity averaged 75 seats per establishment. This ranged from a high of 183 seats in cafeterias to a low of 33 in refreshment places. More than 71 percent of all seats were in eating places, with restaurants-lunchrooms-caterers accounting for 58.9 percent, cafeterias 7.1 percent, and refreshment places 5.3 percent.

Almost 62 percent of the eating and drinking places had waiter or waitress services and employed an average of 9.5 employees per establishment. Cafeterias were highest with an average of 15.5 employees per establishment, while the drinking places were lowest with 4.3 employees.

Data from respondents indicate that almost 93 percent of the eating and drinking places were open 6 days or more per week and 52.7 percent were open 7 days. Only about 1 percent were open less than 5 days per week. More than 98 percent of the drinking places were open 6 days or more per week compared to 63.2 percent for cafeterias. Eating and drinking places open 6 days or more per week accounted for 94.4 percent of sales and those open 7 days accounted for 63.6 percent.

More than 76 percent of the eating and drinking places were open 12 hours or more per day and 1.6 percent were open fewer than 6 hours. About 91 percent of the drinking places were open 12 hours or more per day, while less than 44 percent of the cafeterias were open that many hours.

To identify franchise holders, each eating place was asked to indicate if it had a written contract for a franchise which entitled it to use a trade name common to all holders of the franchise. About 11 percent of the eating places reported they were franchise holders, and they accounted for 13.1 percent of sales.

Almost 38 percent of the sales of refreshment places were accounted for by sales of franchise holders, while less than 5 percent of cafeteria sales were from franchise operations.

Approximately 13,900 eating places had carry-out sales which accounted for more than 75 percent of their total sales. Refreshment places accounted for more than 70 percent of that number.

Cigars-cigarettes-tobacco vending machines accounted for 34.4 percent of all merchandise vending machines, followed by candy-confectionery-gum-nut machines with 27.9 percent, and coffee-soup-other hot beverage machines 9.4 percent. The average sales per vending machine was almost \$1,400.

**AUTHORITY AND SCOPE**—The Economic Censuses are required by law under 13 U.S.C., sections 131, 191, and 224. The 1967 Census of Business portion of the Economic Censuses consists of firms engaged in retail trade, wholesale trade, and selected services (hotels and motels; personal, business, and repair services; and amusement and recreation services including the motion picture industry) which operated in the United States. In addition, the Census of Business covered public warehouses, dental laboratories, law firms, architectural and engineering firms, travel agencies and truck and bus carriers not subject to economic regulation by the Interstate Commerce Commission. Data for the contract construction industry also were collected in this Census but published in a separate series of reports. The Census of Business also covered Guam and the Virgin Islands. A separate 1967 Census of Business, Manufacturers, and Construction for Puerto Rico was conducted jointly with the Commonwealth Government.

**KINDS OF BUSINESS COVERED**—See the Kind-of-Business Classifications section of the appendix for definitions of the kind-of-business categories for which data are shown in this report.

**CENSUS DISCLOSURE RULES**—In accordance with Federal law governing census reports, any data which would disclose the operations of an individual establishment or business organization are not published. However, the number of establishments in a kind of business is not considered a disclosure, so that this item may appear in instances where other items of information for the same kind of business or locality are withheld.

# Appendix A

## GENERAL EXPLANATION

### CENSUS COVERAGE

**Method of Coverage**—Effective with the 1967 Census of Business, a major shift in the method of compiling data was introduced. In the 1954, 1958, and 1963 Censuses data for all “employer” establishments (those which had some paid employment during the census year) were obtained through a mail canvass. Information for “nonemployers” was obtained from Federal income tax records.

In the 1967 Census of Business, retail firms were divided into two categories—the “mail universe” and the “nonmail” universe. The coverage of each component and the method of obtaining census information for these two groups are described below.

1. **The “nonmail” universe**—This group consists of firms which were not required to file a regular census return and includes the following categories:

a. **All “nonemployers”**—Consists of all firms with no paid employment during 1967. Sales information for these firms was obtained from 1967 Federal income tax records. Although made up of a large number of firms, the nonemployer segment accounts for only about 5 percent of total retail sales. (See “Comparison of the 1963 Census With the 1967 Census,” item 2, on the next page.)

In the 1967 Census, data for all non-employer establishments were compiled from tax records. In the 1963 Census, data were compiled from only one-half of the non-employer tax returns and were multiplied by 2 to establish census totals.

The census included only those retail non-employer firms which reported a sales volume of \$2,500 or more during 1967 or, having been in operation for less than the full year, reported sales which would have reached a total of \$2,500 or more on an annual basis. This treatment is the same as in the 1963 Census.

b. **Selected “small employers”**—“Employers” consist of all business firms in the active records of the Internal Revenue Service (IRS) which were subject to payment of Federal Insurance Contribution Act (FICA) taxes. “Small employers” consist basically of all those single unit firms with payroll below a specified cutoff (except for a 10-percent sample of these which were included in the “mail” universe). The cutoff varied by kind of

business and was designed, in most cases, to limit the “nonmail” group to establishments which would account for approximately 20 percent of total sales in each kind of business. The “number-of-employee” equivalent of the payroll cutoff generally was in the range of one to three employees.

Data on sales, payroll, and employment for “under cutoff” employer firms were obtained from the administrative records of the Internal Revenue Service (IRS) and the Social Security Administration (SSA).

2. **The “mail” universe**—Information for firms in this group was obtained basically by means of a mail canvass. However, information on first quarter payroll and mid-March employment for single-unit employers (section b below) was obtained from IRS and SSA records. The “mail” universe includes the following categories:

a. **Firms in the census prec canvass**—The census prec canvass operation was basically designed to identify firms which operated units at more than one location.

Firms which were included in the prec canvass were drawn primarily from 1963 Census records of multiunit firms and large employers. Miscellaneous categories of organizations (e.g., cooperative associations; State, county, and municipal liquor stores; and retail stores of utility companies) were also included in the prec canvass.

b. **Firms not in the census prec canvass**—Other firms included in the “mail” universe consist of the following categories:

- (1) The 10 percent of “small employer” firms referred to in section 1–b above.
- (2) Other employers than those covered by section 1–b or 2–a above.

**Comparison of the 1963 Census with the 1967 Census**—Except for the method of coverage described above, the 1963 and 1967 censuses were conducted under similar conditions and procedures. Strict comparability of the data for the two censuses is limited by the following factors:

1. **Classification**—For both 1963 and 1967, nonemployer firms were classified on the basis of information supplied on the Federal income tax returns. However, the 1967 classifications for “nonemployer” firms were coded in less detail than in 1963. Therefore, 1967 data for the combination of “employer” and “nonemployer”

establishments are presented in less kind-of-business detail than was the case in 1963. Data for employer establishments, however, are shown in full detail.

For 1963, nonemployer firms were classified by IRS personnel with technical assistance of Census Bureau personnel. For 1967, classification of these firms was performed by personnel of the IRS through use of a coded listing of the kinds of business which were to be separately identified. While the technique of classification was substantially the same and was based on the firm's description of its principal business activity, greater use was made in 1967 of "basket" classifications (e.g., miscellaneous food stores).

The 1967 Census classification for the small employer firms (see coverage of employers above) which were not mailed the Census report form was based on the following:

- a. If the firm had been in business in 1963, the kind-of-business classification which had been assigned in that census was used.
- b. If the firm was a "birth" since 1963, the SSA classification was used if it corresponded to a census classification.
- c. If an adequate kind-of-business classification could not be assigned under the procedure outlined in a. and b. above, the firm was mailed a brief inquiry requesting information needed to assign such a classification.
- d. If these three procedures proved inadequate, the firm's description of its principal business activity as entered on its IRS business tax return was used.

The 1967 Census classification for establishments in the mail universe (section 2 above) was assigned on the basis of answers to questions on sales by merchandise lines and other special inquiries.

In addition to differences in classification based on the method of enumeration, some changes were made in the 1967 Census in the individual kind-of-business classifications which are detailed in the "Kind-of-Business Classifications" section below. The kinds of business involving significant changes are building materials dealers, optical goods stores, and refreshment places. These changes importantly limit the comparability of the 1967 Census data for these kinds of business with those for the previous census.

**2. Coverage of nonemployers** — Although a comparison of data for nonemployer firms from the 1963 and 1967 Censuses seems to indicate that there was an increase in the number of such firms and that they accounted for approxi-

mately as large a proportion of total retail sales volume in 1967 as in 1963, these conclusions are subject to the following limitations:

The combination of (1) the census processing cutoff occurring before the completion of the flow of tax forms from which the census nonemployer data were derived and (2) other processing omissions is estimated to have led to a loss of about 50,000 nonemployer firms, accounting for about one-half of 1 percent of retail sales volume in 1963. This estimate, which is based on a study of a sample of tax forms made after the 1963 Census results were compiled, reflects a more substantial census omission than previously had been estimated. Because of a later processing date for the 1967 Census, omissions from this census are believed negligible. Both censuses probably omitted a small number of nonemployers (accounting for a negligible sales volume) because the tax form kind-of-business description was inadequate to indicate they conducted an in-scope kind of business.

As noted in section 1-a under "Method of Coverage" above, only those retail nonemployer establishments were included in the census which reported a sales volume of \$2,500 or more during 1967 or, having been in operation for less than the full year, reported sales which would have reached a total of \$2,500 or more on an annual basis. While these are the same rules used in the 1963 Census, a modification to reflect price changes probably would have resulted in the exclusion of several thousand additional marginal firms.

## EXPLANATION OF TERMS

**Establishments**—An establishment is a single physical location at which business is conducted. An establishment is not necessarily identical with the "company" or "enterprise" which may consist of one or more establishments. Census of Business figures represent a summary of reports for individual establishments rather than companies. For businesses which were mailed a census form, separate information was obtained for each location where business was conducted, including each location of multiunit organizations. Each report was tabulated in accordance with the physical location at which the business was conducted.

Where two or more activities were carried on at a single location under a single ownership, all activities generally were grouped together as a single establishment, and the entire establishment was classified on the basis of its major activity, with all data for it included in that classification. However, in cases where distinct and separate economic activities (for

which different industry classification codes were appropriate) were conducted under the same ownership at a single location, and where conditions prescribed by the Standard Industrial Classification (SIC) Manual<sup>1</sup> for recognizing the existence of more than one establishment were met, separate establishment reports for each of the different activities were reported in the census.

In the case of leased departments (separately owned businesses operated as departments of a retail business under another ownership such as a separately owned shoe department in a department store), only a single establishment combining leased departments with the retail establishment in which they are located is recognized for 1967 Census purposes.

**Sales**—Sales include merchandise sold and receipts from repairs and from other services to customers whether or not payment was received in 1967. Sales are net of deductions for refunds and allowances for merchandise returned by customers. Trade-in allowances are not deducted from total sales. Total sales exclude amounts other than those received from customers, such as income from investments, rental of real estate, etc. They include local and State sales taxes and Federal excise taxes collected by the store directly from customers and paid directly by the store to a local, State, or Federal tax agency. Gasoline, liquor, tobacco, and other excise taxes which are paid by the manufacturer or wholesaler and passed along to the retailer are also included.

Sales do not include retail sales made by manufacturers, wholesalers, service establishments, and other businesses whose primary activity is other than retail trade. They do, however, include receipts other than from the sale of merchandise at retail (e.g., service receipts, sales to industrial users, and sales to other retailers) by establishments primarily engaged in retail trade.

Although the count of establishments in this report represents the number in business at the end of the year, the sales figures include sales of all establishments in business at any time during the year. Data for nonemployer establishments are included in the tables if they operated at an annual sales volume rate of \$2,500 or more; however, data for part year nonemployers have not been projected to a full year's operation.

**Payroll, entire year**—Payroll includes all forms of compensation such as salaries, wages, com-

missions, bonuses, vacation allowances, sick leave pay, and the value of payments in kind (such as free meals and lodgings) paid during the year to all employees. Tips and gratuities received by employees from patrons which are reported to employers are included. For corporations, it includes amounts paid to officers and executives; for unincorporated businesses, it does not include compensation of proprietors or of partners. Payroll is reported before deductions for social security, income tax, insurance dues, etc. This definition of payroll is the same as that used by the Internal Revenue Service for purposes of reporting on Form 941.

**Payroll for the first quarter of 1967**—This item consists of payroll, as defined above, paid to persons on the payroll during the January–March 1967 quarter.

The rounding procedures used in summarizing quarterly payrolls resulted in an overstatement in the amount tabulated for establishments having a quarterly payroll of under \$1,000. For total retail trade in the United States the estimated effect resulted in an overstatement of quarterly payroll of about 2 percent. The overstatement for individual areas and kinds of business will vary from the national average depending upon differences in their proportion of such small payroll cases.

**Paid employees for the pay period including March 12, 1967**—Paid employees consist of the number of employees, including salaried officers and executives of corporations, who were on the payroll in the pay period including March 12, 1967. Included are employees on paid sick leave, paid holidays, and paid vacations. Proprietors and partners of unincorporated businesses are not included. The definition of paid employees is the same as used in reporting on IRS Form 941.

**Active proprietors of unincorporated businesses**—The number of active proprietors shown in this report is based on crediting each sole proprietorship with one active proprietor and each partnership with two active proprietors for the following types of firms:

1. All payroll firms which had a first quarter payroll.
2. All nonpayroll firms in business the full year.
3. Every other nonpayroll firm not in business the full year.

For multiunit proprietorships and partnerships, proprietors were credited to only one establishment of such multiunits.

<sup>1</sup> Executive Office of the President, Bureau of the Budget, **Standard Industrial Classification Manual, 1967.**

### **Central administrative offices and auxiliaries—**

Each company included in this census was asked to identify and report separately as "central administrative offices" or "auxiliaries" those locations whose primary functions were to manage, administer, service, or support the activities of the other establishments of the company. Data for such central administrative offices or auxiliaries which primarily service retail establishments are given in tables 12 and 13 of the area reports.

### **KIND-OF-BUSINESS CLASSIFICATIONS**

Retail trade, as defined in major groups 52 through 59 of the 1967 edition of the SIC Manual, includes establishments primarily engaged in selling merchandise to customers for personal, household, or farm use. Some of the important characteristics of retail trade establishments are: (1) The establishment is engaged in activities to attract the general public to buy; (2) the establishment buys or receives merchandise as well as sells; (3) the establishment may process its products, but such processing is incidental or subordinate to selling; and (4) the establishment is considered "retail" by the trade.

In this report, liquor stores operated by State and local governments, classified in SIC major groups 92 and 93, are also included.

Excluded from retail trade are places of business operated by institutions and open only to members or personnel, such as school cafeterias, restaurants and bars operated by clubs, eating places operated by industrial and commercial enterprises for their own employees, establishments operated by agencies of the Federal Government on military posts, hospitals, etc. (As noted previously, there is a table in the area reports showing data for establishments on military, air, and naval posts.)

Establishments covered by the census were assigned a kind-of-business classification in accordance with the provisions of the 1967 edition of the SIC Manual. However, because in some instances a more detailed classification is required for census purposes than is available in the SIC Manual, additional kinds of business have been identified within the SIC categories.

It should be noted that kind-of-business classifications are not interchangeable with commodity classifications. Most businesses sell a number of kinds of commodities. The kind-of-business code assigned generally reflects either the individual commodity or the

commodity group which is the primary source of the establishment's receipts or some mixture of commodities which characterize the establishment's business. Thus, the classification of establishments by kind of business generally does not make it possible to determine either the number of establishments handling a particular commodity or the sales of that commodity. (Some indication of the extent to which various broad groups of commodities or lines of merchandise are characteristic of different kinds of business will be available in the Census of Business report, Sales by Line of Merchandise, Series BC67-RS.)

The basis for kind-of-business classification is described above in the sections under "Method of Coverage" and "Comparison of the 1963 Census With the 1967 Census—Classification." Descriptions of those kinds of business for which data are provided follow.

### **EATING AND DRINKING PLACES**

(SIC Major Group 58)

This major group includes establishments primarily selling prepared foods and drinks for consumption on or near the premises; and lunch counters and refreshment stands selling prepared foods and drinks for immediate or take home consumption. Also included are caterers who sell prepared foods which are served elsewhere than at their place of business and in-plant food contractors. Data for in-plant food contractors are included in the United States Summary report. Eating and drinking places operated as leased concessions in theaters, hotels, motels, and places of amusement are included here. Candy and popcorn stands located in theaters are, however, included in "Candy, nut, and confectionery stores" (SIC 5441).

### **Restaurants, lunchrooms, caterers (part of SIC**

**5812)**—Establishments primarily selling prepared food and drink for consumption either on the premises or at a place designated by the customer. Establishments calling themselves caterers but not selling prepared foods as part of their business activity are not included in this category.

Establishments in which sales of alcoholic beverages for consumption on the premises exceed receipts from sales of prepared foods and nonalcoholic beverages are classified as "Drinking places" (SIC 5813). Counter or table service may be provided at establishments calling themselves restaurants or lunchrooms.

**Cafeterias (part of SIC 5812)**—Establishments primarily selling prepared foods and drinks for consumption on the premises. In these establishments the customers serve themselves.

**Refreshment places (part of SIC 5812)**—Establishments primarily selling limited lines of refreshments and prepared food items. Included in this group are establishments which prepare refreshment items such as frozen custard, pizza, barbecued chicken, and hamburgers for consumption either on or near the premises or for “take-home” consumption.

In the 1963 Census of Business, ice cream, frozen custard, soft ice cream, and similar refreshment items sold from trucks were included in this classification. In the 1967 Census of Business, these establishments are classified as “Direct selling (house-to-house canvass) establishments” (SIC 5351) in the “Nonstore Retailers” group.

**Drinking places (alcoholic beverages) (SIC 5813)**—Establishments primarily selling drinks such as beer, ale, wine, liquor, and other alcoholic beverages for consumption on the premises. Prepared foods are frequently sold at these establishments, but receipts from sales of alcoholic beverages exceed receipts from sales of food.

## NONSTORE RETAILERS (Part of SIC Major Group 53)

**Merchandising machine operators (SIC 534)**—Establishments primarily selling merchandise through coin-operated vending machines which are generally located on the premises of other businesses. In the 1963 Census of Business this industry was titled “Merchandise vending machine operators.”

Since a large number of merchandise vending machine operations are conducted in conjunction with the operation of manufacturing plants and of wholesale and other establishments not classified in retail trade, data for “retail” merchandise vending machine operators should not be interpreted as providing a measure of total sales through merchandise vending machines. The data for “retail” merchandise vending machine operators also do not include sales made through vending machines owned by establishments classified in other kinds of retail trade. Merchandise vending machine operators are divided into subclassifications on the basis of the merchandise sold in the machines on location as of the end of the census year. Operators of coin-operated service machines such as washers, dryers, music machines, and amusement and game machines are included in the Selected Services portion of the 1967 Census of Business.

# 1970

... a NEW decade ... and a NEW LOOK for the 1970 STATISTICAL ABSTRACT OF THE UNITED STATES!

1042 Pages  
(CLOTH) \$5.75

Between the covers of this 91st edition of the "Stat Abstract," as it is popularly known, are the Nation's most sought-after facts and figures in the world of government and private enterprise. Statesmen . . . businessmen . . . scientists . . . teachers and students alike FIND the information they want on the social, economic, and governmental characteristics of the United States — both current and historical. Statistics are presented in over 1,300 tables and charts derived from over 200 government, private, and international agencies. A special introductory table features RECENT TRENDS for selected measures of social and economic change. The GUIDE TO SOURCES lists over 800 statistical publications on 50 major subjects, such as population, government, health, education, agriculture, industry, construction, recreation, trade, and scores of other subjects. Whatever your line of work, business, profession, or avocational interests — when you need the facts, you want THE comprehensive and authoritative STATISTICAL ABSTRACT of the United States, 1970!

For users of urban information, the Abstract features an individual 66-page section of current data for over 200 metropolitan areas entitled, "Metropolitan Area Statistics." available as a separate reprint, priced at 35¢.
